NiSource Reaches Landmark Settlement in Indiana; Deserves Premium Valuation

Analyst Note Travis Miller, Strategist, 13 Mar 2023

We are reaffirming our $32 fair value estimate for NiSource after the company announced it reached a settlement in its Indiana electric rate review case, one of the largest in recent years. We are also reaffirming our narrow moat and stable moat trend ratings.

NiSource trades at a 17% discount to our fair value estimate, making it one of the most undervalued utilities in our coverage as of March 13. Although its 17 times price/earnings ratio and 3.7% dividend yield are near the sector median, we think NiSource deserves a premium valuation, given its highly constructive regulation and growth opportunities, both of which the Indiana decision supports. We rank NiSource in the top five of all U.S. utilities for most constructive regulation.

The settlement would result in a $291.8 million annualized rate increase, below the $395 million request but in line with our expectations. We consider this a constructive outcome that keeps NiSource on track to deliver at least 7% earnings growth for the next three years.

We expect NiSource to hit the top end of management's $1.54-$1.60 earnings per share guidance range for 2023, implying a second consecutive year of 7% earnings growth. The new Indiana rates will begin in September and support what we expect will be another year of 7% earnings growth in 2024. We assume regulators approve the settlement.

Sector
Utilities

Industry
Utilities - Regulated Gas

Business Description

NiSource is one of the nation's largest natural gas distribution companies with approximately 3.2 million customers in Indiana, Kentucky, Maryland, Ohio, Pennsylvania, and Virginia. NiSource's electric utility transmits and distributes electricity in northern Indiana to about 500,000 customers. The regulated electric utility also owns more than 3,000 megawatts of generation capacity, most of which is now coal-fired but is being replaced by natural gas and renewable energy.

The Indiana settlement also should make it easier for NiSource to complete its planned sale of a minority interest in the Indiana utility at a higher valuation than NiSource's common stock. This should be a positive for shareholders by providing low-cost capital to support what we estimate will be an average $3 billion of capital investment annually for at least the next five years, much of which will go to clean energy projects in Indiana.

Ongoing constructive regulation and the minority interest sale should help management maintain a 60%-70% dividend payout ratio, higher than most utilities and supporting 6% dividend growth.

Business Strategy & Outlook Travis Miller, Strategist, 26 Jan 2023

NiSource continues to transition away from its roots as a natural gas distribution and midstream company. An increasing focus on electric infrastructure and renewable energy will be a key growth driver in the coming years, creating a more even mix of earnings from its natural gas and electric businesses.

We expect about 70% of NiSource's operating income will come from its six natural gas distribution utilities and 30% from its electric utility in Indiana following the planned minority interest sale in its electric utility in 2023.

NiSource's utilities have constructive regulatory frameworks that allow it to collect a cash return of and a cash return on the bulk of its capital investments within 18 months. We expect NiSource to invest more than $8 billion over the next three years, including what could be $2 billion of renewable energy projects in Indiana, where NiSource enjoys favorable regulation.

That growth could extend beyond 2025 based on electric and gas system infrastructure improvement projects NiSource has identified. Replacing steel and cast-iron pipe with plastic at its natural gas distribution utilities is a key initiative along with investments across the business that reduce greenhouse gases. Almost all of these investments receive favorable regulatory treatment, enhancing NiSource's cash flow.

The business diversification started with its Columbia Pipeline Group separation in 2015. In October 2020, NiSource sold its Columbia Gas of Massachusetts utility and received $1.1 billion of proceeds that it used to strengthen the balance sheet. The sale came nearly two years after a natural gas explosion on NiSource's Massachusetts system killed one person north of Boston. Insurance covered roughly half of the almost $2 billion of claims, penalties, and other expenses.

Earnings are set to rebound quickly from their low in 2020 when COVID-19 pandemic costs, lower energy use, the Massachusetts utility sale, and a large equity issuance weighed on earnings. We expect modest customer growth combined with NiSource's infrastructure growth investments to support 8%

annual earnings growth and 6% annual dividend growth from 2023 to 2026.

Bulls Say Travis Miller, Strategist, 26 Jan 2023

- We expect the dividend to grow near 6% annually during the next few years before accelerating to keep pace with earnings in 2024 and beyond.
- NiSource's growth plan will support Indiana policymakers' desire to cut the state's carbon emissions by replacing coal generation with renewable energy and energy storage.
- New legislation has improved the regulatory framework in Indiana for NiSource's electric and natural gas distribution utilities.

Bears Say Travis Miller, Strategist, 26 Jan 2023

- Industrial customers account for over half of NiSource's electric sales, higher than most utilities. Industrial sales are more sensitive to the economy than residential and commercial sales.
- Policies to reduce carbon emissions could be a long-term threat for NiSource's natural gas distribution

NiSource Inc NI ★★★★ 10 Mar 2023 22:17, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
26.71 USD 10 Mar 2023	32.00 USD 24 Aug 2022 19:55, UTC	0.83	11.02 USD Bil 10 Mar 2023	Narrow	Stable	Low	Standard	1 Mar 2023 06:00, UTC

business if policymakers in states it serves aim to reduce retail gas use.

- NiSource has issued nearly $3 billion of equity and preferred stock since 2017, resulting in little EPS growth.

Economic Moat Travis Miller, Strategist, 26 Jan 2023

Service territory monopolies and efficient scale advantages are the primary moat sources for NiSource's regulated gas and electric utilities. State and federal regulators grant regulated utilities like NiSource exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their networks. In exchange for regulated utilities' service territory monopolies, state and federal regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.

This implicit contract between regulators and capital providers should, on balance, allow NiSource's regulated utilities to achieve at least their costs of capital, though observable returns might vary in the short run based on demand trends, investment cycles, operating costs, and access to financing.

We estimate NiSource will derive roughly 70% of its operating earnings from its natural gas distribution utilities and 30% from its integrated electric business in Indiana following the planned sale of a minority interest share of its electric utility in 2023. In all cases, state and federal regulators set customer rates that allow NiSource to recover its operating and capital costs.

NiSource has no direct commodity price risk that could weaken its moat. NiSource exited the no-moat retail energy supply business in 2010.

Fair Value and Profit Drivers Travis Miller, Strategist, 26 Jan 2023

Our fair value estimate for NiSource is $32 per share.

We assume NiSource invests nearly $9 billion in 2023-25, including $2 billion of investment in renewable energy projects in Indiana to replace its coal-fired power generation fleet by 2028.

We expect NiSource's safety-related gas distribution investments will remain well above maintenance-level spending for several more years, resulting in earnings growth at all of its gas utilities. We expect investment at the gas utilities to slow beyond 2025 while growth investment at the electric utility continues.

In total, we expect 11% average annual rate base growth and 8% average annual earnings growth through 2026 when combining the planned electric and gas system investments. The key factor in our growth outlook is a favorable outcome in NiSource's 2023-24 electric rate case in Indiana.

Renewable energy and gas distribution infrastructure investments should support strong dividend

MORNINGSTAR®

NiSource Inc NI ★★★★ 10 Mar 2023 22:17, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
26.71 USD 10 Mar 2023	32.00 USD 24 Aug 2022 19:55, UTC	0.83	11.02 USD Bil 10 Mar 2023	Narrow	Stable	Low	Standard	1 Mar 2023 06:00, UTC

growth, a better ESG profile, and lower regulatory risk for investors. We don't expect a material valuation impact from year-to-year policy-related shifts in investment, notably Indiana solar projects.

We use a 5.8% cost of capital in our discounted cash flow valuation, which incorporates a 7.5% cost of equity. Our cost of equity is lower than the 9% rate of return we expect investors will demand of a diversified equity portfolio. We believe our cost of equity reflects the risk associated with regulated electric and natural gas distribution utilities like NiSource operating in states that have constructive regulatory frameworks.

Risk and Uncertainty Travis Miller, Strategist, 26 Jan 2023

We assign NiSource a Low Morningstar Uncertainty Rating. Regulatory risk remains the key uncertainty. However, NiSource's regulatory exposure is diversified with state-regulated gas and electric operations in six states and a federally regulated electric transmission system. NiSource has reduced some of the regulatory uncertainty related to its planned investments by securing preapprovals and favorable rate mechanisms that provide for customer rate increases as the utility makes its infrastructure investments.

In 2020, NiSource announced it would eliminate all coal-fired generation from its power plant fleet by 2028, significantly reducing environmental, social, and governance risk. This transition will require signing power purchase agreements for renewable energy, building new solar and wind farms, and making modifications to its electric grid. There is a modest amount of execution risk to this dramatic transition away from coal generation.

Capital Allocation Travis Miller, Strategist, 26 Jan 2023

We assign NiSource a Standard Morningstar Capital Allocation Rating primarily due to management's work with regulators and policymakers to build support for its investments in clean energy, infrastructure modernization, and safety.

The CEO transition from Joe Hamrock to Lloyd Yates in February 2022 appears as if it will bring no major changes. Yates has been a director at NiSource since 2020 and previously led Duke Energy's core Carolina operations, which are more than twice the size of NiSource.

Although there was some speculation when Yates took over that NiSource would divest one or more of its gas distribution utilities, the market collapse in 2022 nixed that as an immediate option. Instead, it appears NiSource will sell a small share of its Indiana electric utility to reduce NiSource's equity needs to fund its growth investments.

Current and former NiSource management made two key capital allocation decisions that we think were favorable for shareholders and positioned the company to execute its current growth plan. The first move was forming Columbia Pipeline Partners and executing Columbia Pipeline Group's tax-free

separation.

The second move was selling Columbia Gas of Massachusetts to Eversource Energy in 2020 after regulators determined NiSource was responsible for a gas explosion north of Boston. Even though the incident had a negative effect on shareholder value, NiSource resolved the issues quickly and received an attractive price to exit a region that was farthest from its core Midwest utilities.

Hamrock championed NiSource's clean energy growth strategy after succeeding Bob Skaggs in mid-2015 when Skaggs, a 32-year NiSource veteran, chose to lead the newly formed Columbia Pipeline Group. CFO Donald Brown joined NiSource in April 2015 after stints at UGI Utilities and Constellation Energy.

Analyst Notes Archive

NiSource Raises Outlook for 2023, Remains a Top Pick in Utilities Sector Travis Miller, Strategist, 22 Feb 2023

We are reaffirming our $32 fair value estimate for NiSource after the company announced $1.47 in operating earnings per share for 2022, up 7% from 2021. Results were in line with our expectations. We are reaffirming our narrow moat and stable moat trend ratings.

NiSource is the most undervalued utilities stock in our coverage, trading at a 16% discount to our fair value estimate as of Feb. 22. We think it has better regulation and more long-term investment opportunities than most other utilities relative to its size. The stock's 3.7% dividend yield and above-average growth relative to its peers suggests total returns should top most utilities' during the next five years.

Management reaffirmed its 6%-8% annual earnings growth rate target through 2027 and raised its 2023 EPS guidance range to $1.54-$1.60, implying another year of 7% earnings growth. This is now in line with our outlook. We already had been forecasting 2023 earnings at the high end of management's previous range.

Earnings growth is translating into dividend growth, as we expect. NiSource's board recently raised the dividend 6% to $1.00 per share annualized for 2023. We think NiSource has enough financial flexibility and constructive rate regulation to maintain a 60%-70% payout ratio, higher than other utilities. This enhances cash returns for shareholders.

NiSource's key growth factors remain the pace of renewable energy investments and the outcome of Indiana electric rate proceedings this year. We continue to assume NiSource invests $8 billion in 2023-25 with that pace accelerating beyond 2025.

MORNINGSTAR®

NiSource Inc NI ★★★★ 10 Mar 2023 22:17, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
26.71 USD 10 Mar 2023	32.00 USD 24 Aug 2022 19:55, UTC	0.83	11.02 USD Bil 10 Mar 2023	Narrow	Stable	Low	Standard	1 Mar 2023 06:00, UTC

We think an electric rate case settlement will expedite NiSource's plan to sell 19.9% of its Indiana utility, NIPSCO, this year, as management announced in November.

Elliott Management, which has been active in the utilities sector during the last decade, made NiSource one of its top six new buys and the only utilities holding during the fourth quarter, according to recent fund filings.

No Surprises at NiSource's Investor Day; Still an Attractive Long-Term Investment Travis Miller, Strategist, 7 Nov 2022

We are reaffirming our $32 fair value estimate after NiSource announced a strategic plan focused on strengthening the balance sheet, managing operating costs, and increasing capital investments, all in line with our expectations. We are reaffirming our narrow moat and stable moat trend ratings.

NiSource is one of our top utilities picks, trading at a 20% discount to our fair value estimate. Compared with other utilities, we think NiSource has more long-term investment opportunities relative to its size and better regulation. The stock's 3.6% dividend yield and above-average growth relative to its peers suggests total returns should top most utilities' during the next five years.

Management lowered its long-term annual earnings growth target to 6%-8% from 7%-9% but extended the timeframe to 2027 from 2024. We forecast 8% annual growth from 2021-26. We think management's extended timeframe is a net positive for investors even though it implies slightly lower 2023-24 earnings. The previous growth range largely reflected accelerated renewable energy investments and large rate increases in Indiana and Ohio in 2023-24. We think the new growth target better reflects NiSource's 10-year, $30 billion investment plan and opportunities for cost savings.

As we expected, NiSource announced no significant M&A activity. Throughout the year, CEO Lloyd Yates suggested the firm might sell one of its six gas utilities, but we thought that was unlikely as interest rates climbed and utilities' valuations sank. NiSource intends to sell 19.9% of its Indiana utility, NIPSCO, to strengthen the balance sheet and avoid large equity needs. We think NIPSCO is the most valuable part of NiSource's portfolio, but we expect any transaction will be too small to impact our fair value estimate.

NiSource reported $0.10 of adjusted EPS in the third quarter and is on track to meet our full-year forecast. Our 2023 EPS estimate is in line with management's $1.50-$1.57 guidance.

NiSource's Near-Term Growth Depends on Regulatory Outcomes in Ohio, Indiana Travis Miller, Strategist, 20 Oct 2022

We are reaffirming our $32 fair value estimate, narrow moat, and stable moat trend ratings for NiSource after reviewing recent regulatory developments. NiSource remains one of our top utilities picks, trading

at a 22% discount to our fair value estimate.

NiSource's regulatory risk will ramp up in 2023 and ultimately determine whether NiSource hits the high end or low end of management's 7%-9% annual average earnings growth range. We forecast 8% growth.

NiSource's largest utility, NIPSCO in Indiana, last month requested a $218 million electric rate increase with a decision likely next year. NiSource's second-largest utility, Columbia Gas of Ohio, last year requested a $221 million rate increase. Delayed hearings mean a decision this year is unlikely. The regulatory staff this summer proposed a rate increase between $35.2 million and $57.6 million.

Allowed returns on equity will be key in both cases. NiSource's 10.39% allowed ROE in Ohio and 9.75% allowed ROE in Indiana are above the sector average. We assume Ohio commissioners cut NiSource's allowed ROE to 10%, the high end of the regulatory staff's 9% to 10% proposed range but below NiSource's 11.5% request. We assume Indiana commissioners keep NiSource's electric allowed ROE at 9.75%, lower than its 10.4% request. Last year, Maryland regulators cut NiSource's allowed ROE to 9.65% from 10.85% and Kentucky regulators cut its allowed ROE to 9.35% from 10.3%, both in line with recent decisions for other utilities.

A critical issue in Ohio is the extension of its capital investment rate plans, which have helped NiSource avoid a base rate review in Ohio since 2008. Similar rate plans at NiSource's other utilities are key to converting what we estimate will be $2 billion of annual growth investment into earnings growth beyond 2024. We think CEO Lloyd Yates will announce new growth opportunities and cost savings on Nov. 7. Gas utility divestures seem unlikely given the recent drop in utilities' valuations.

NiSource Initiates Critical Electric Rate Review in Indiana Travis Miller, Strategist, 30 Sep 2022
We are reaffirming our $32 fair value estimate for NiSource after the company initiated a long-anticipated electric rate review in Indiana. We are also reaffirming our narrow moat and stable moat trend ratings.

NiSource remains one of our top picks in the utilities sector in part because we think that Indiana utility rate regulation will remain constructive as the company executes its capital investment growth plan. The stock trades at a 19% discount to our fair value estimate as of Sept. 29, making it one of the cheapest U.S. utilities in our coverage. Its 3.6% dividend yield is in line with peers'.

Last week, NiSource requested a $218 million net revenue increase effective September 2023 along with other ratemaking changes that would improve cash recovery of operating and capital costs. NiSource's request includes a 10.4% allowed return on equity, which is about 100 basis points higher than other state regulators have allowed recently. We assume regulators approve $180 million of rate increases in two steps through 2024 based on NiSource's current 9.75% allowed ROE.

MORNINGSTAR®

NiSource Inc NI ★★★★ 10 Mar 2023 22:17, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
26.71 USD 10 Mar 2023	32.00 USD 24 Aug 2022 19:55, UTC	0.83	11.02 USD Bil 10 Mar 2023	Narrow	Stable	Low	Standard	1 Mar 2023 06:00, UTC

The outcome of this proceeding will largely determine whether NiSource hits the high end or low end of management's 7%-9% annual average earnings growth range through 2024. NiSource faces extra regulatory risk as customers face higher energy costs. This could make regulators hesitant to approve a large base rate increase.

We continue to assume NiSource invests $8 billion of capital in 2022-24, including $2 billion in renewable energy. We expect the company will be able to keep a similar level of growth investment beyond 2024, supporting our 8% average annual earnings growth forecast.

We also expect new CEO Lloyd Yates to announce the outcome of his strategic review, possibly at NiSource's investor day Nov. 7. The recent market drop and rise in interest rates could make it less likely that NiSource will divest its gas utilities.

Raising U.S. Electricity Demand Growth Outlook, Reaffirming Utilities Fair Value Estimates Travis Miller, Strategist, 27 Sep 2022

We are reaffirming our fair value estimates for U.S. utilities after raising our 10-year annual U.S. electricity demand growth forecast to 1.4%, up from 1.2% in our previous forecast two years ago. We also are reaffirming our economic moat and moat trend ratings for all U.S. utilities.

We believe the path to eliminate carbon emissions and meet environmental targets will lead to accelerating electricity demand growth and new infrastructure growth investment opportunities for utilities. We forecast 6%-8% annual earnings and dividend growth for most utilities through the decade to support electricity demand growth. With most utilities yielding above 3%, we think utilities investors are well positioned to earn 8%-9% long-term annualized total returns even if valuations compress, as we think they will. We consider the sector 5% overvalued on a median basis as of Sept. 27.

Our new electricity demand forecast is more bullish than most. We think other forecasts underestimate the speed and scale of the U.S. clean energy transition. With many regions already facing strained electric grids, electricity demand growth presents opportunities and challenges for utilities as they manage the surge of electric vehicles, Big Data, building electrification, and other mandates.

We expect electricity demand from electric vehicles will grow faster than any other new source of electricity demand in our forecast, climbing 15-fold by 2032. Data centers, already sizable electricity users, are the second-fastest-growing new source of electricity demand in our forecast. Building and industrial electrification represents upside to our forecast.

Energy efficiency gains will offset some of the core electricity demand growth that we forecast. We expect U.S. electricity intensity of the economy to fall 12% over our forecast period. Energy efficiency gains have held U.S. electricity demand mostly flat for the last decade.

Inflation Reduction Act: Increasing Our Confidence in Utilities' Long-Term Growth Travis Miller, Strategist, 16 Aug 2022

Our initial analysis of the U.S. Inflation Reduction Act that President Joe Biden plans to sign on Aug. 16 has led us to reaffirm or make slight increases to our fair value estimates for U.S. utilities. We are reaffirming our moat and moat trend ratings.

Overall, the act gives us more confidence in our 5%-7% annual average long-term growth outlooks for most utilities. With most utilities yielding above 3%, we think utilities investors are well positioned to earn 7%-8% long-term annualized total returns even if valuation multiples compress, as we think they will. We consider the sector 13% overvalued on a median basis.

Utilities likely will not benefit directly from the act's clean energy tax credits since they will pass the savings to customers. However, utilities should benefit indirectly from lower regulatory risk as tax benefits offset bill increases related to their growth investments. Utilities with the largest share of renewable energy investments relative to their total investment budgets should have an easier time hitting their earnings growth targets without substantial customer bill increases.

Electric utilities should benefit from more electricity demand and infrastructure growth opportunities if the act speeds adoption of electric vehicles and building electrification, two areas that have been slow to decarbonize.

Partially offsetting those customer benefits is the act's 15% minimum tax, which we estimate will raise cash taxes for most mid- and large-cap utilities. Ultimately, utilities will recover these higher taxes by raising customer bills. Customers also might lose the long-term benefits from accelerated tax depreciation, especially for utilities with large growth investment plans. The act's tax on book income rather than taxable income might cause a slight near-term reduction in utilities' cash flow but should accelerate long-term earnings growth. We don't expect this tax change to have a material impact on our long-term valuations.

MORNINGSTAR®

Research Methodology for Valuing Companies

Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, indepth competitive advantage analysis, and a variety of other analytical tools to augment this process. Moreover, we think analyzing valuation through discounted cash flows presents a better lens for viewing cyclical companies, high-growth firms, businesses with finite lives (e.g., mines), or companies expected to generate negative earnings over the next few years. That said, we don't dismiss multiples altogether but rather use them as supporting cross-checks for our DCF-based fair value estimates. We also acknowledge that DCF models offer their own challenges (including a potential proliferation of estimated inputs and the possibility that the method may miss shortterm market-price movements), but we believe these negatives are mitigated by deep analysis and our longterm approach.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk adjusted discount to their fair values, whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our singlepoint star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.

Our model is divided into three distinct stages:

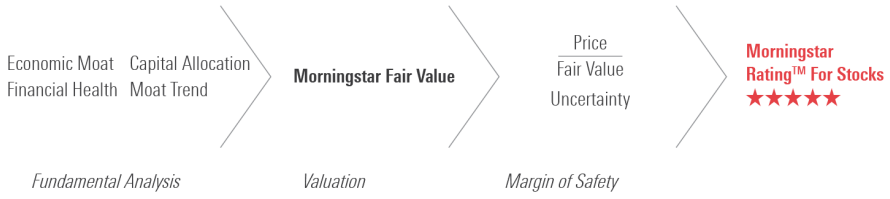
Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in workingcapital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes (EBI) and the net new investment (NNI) to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital (RONIC), and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until a perpetuity value is calculated. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity



Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term, market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating is designed to capture the range of potential outcomes for a company's intrinsic value. This rating is used to assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating is

Research Methodology for Valuing Companies

aimed at identifying the confidence we should have in assigning a fair value estimate for a given stock.

Our Uncertainty Rating is meant to take into account anything that can increase the potential dispersion of future outcomes for the intrinsic value of a company, and anything that can affect our ability to accurately predict these outcomes. The rating begins with a suggested rating produced by a quantitative process based on the trailing 12-month standard deviation of daily stock returns. An analyst overlay is then applied, with analysts using the suggested rating, historical rating data, and their own knowledge of the company to inform them as they make the final Uncertainty Rating decision. Ultimately, the rating decision rests with the analyst. Analysts take into account many characteristics when making their final decision, including cyclical factors, operational and financial factors such as leverage, company-specific events, ESG risks, and anything else that might increase the potential dispersion of future outcomes and our ability to estimate those outcomes.

Our recommended margin of safety—the discount to fair value demanded before we'd recommend buying or selling the stock—widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the potential dispersion of outcomes, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the Uncertainty Rating provides guidance in portfolio construction based on risk tolerance.

Our Uncertainty Ratings are: Low, Medium, High, Very High, and Extreme.

	Margin of Safety	
Qualitative Analysis Uncertainty Ratings	★★★★★Rating	★Rating
Low	20% Discount	25% Premium
Medium	30% Discount	35% Premium
High	40% Discount	55% Premium
Very High	50% Discount	75% Premium
Extreme	75% Discount	300% Premium

Our uncertainty rating is based on the interquartile range, or the middle 50% of potential outcomes, covering the 25th percentile–75th percentile. This means that when a stock hits 5 stars, we expect there is a 75% chance that the intrinsic value of that stock lies above the current market price. Similarly, when a stock hits 1 star, we expect there is a 75% chance that the intrinsic value of that stock lies below the current market price.

4. Market Price

The market prices used in this analysis and noted in the report come from exchange on which the stock is listed which we believe is a reliable source.

Morningstar Equity Research Star Rating Methodology

For more details about our methodology, please go to https://shareholders.morningstar.com

Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open. Our analysts keep close tabs on the companies they follow, and, based on thorough and ongoing analysis, raise or lower their fair value estimates as warranted.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk adjusted return is highly likely over a multiyear time frame. Scenario analysis developed by our analysts indicates that the current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. Scenario analysis by our analysts indicates that the market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Research Methodology for Valuing Companies

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environment, social and governance (ESG) factors. Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

NiSource Inc.

Beat and Raise

Q: How did the results compare vs expectations?

A: NiSource reported adjusted Q4'22 EPS of $0.50 vs. consensus/UBS for the quarter of $0.48 and $0.49. The company reported $0.39 in Q4'21. For the full year, adjusted EPS was $1.47 vs. consensus and UBS of $1.45.

Q: What were the most noteworthy areas in the results?

A: The year over year improvement was due to higher rates at the gas segment +11c, higher PPA revenues at the electric segment +2c, partially offset by higher D&A at -4c; Lower untracked O&M was a +4c benefit in the quarter. Share dilution was a -2c drag.

Q: Has the company's outlook/guidance changed?

A: Yes. The company increased its 2023 guidance to $1.54-$1.60 per share from $1.50-$1.57. This compares to UBS/consensus of $1.54. The long term growth rate remains 6-8% through 2027 off a 2021 base of $1.37. The five year capex outlook through 2027 remains unchanged at $15.0. Rate base growth over that time is also unchanged at 8-10%. The company said it is actively working with stakeholders on a settlement in the pending NIPSCO rate case. NI also announced it has officially launched its sale process for the minority interest in NIPSCO that was previously announced in November.

Q: How would we expect investors to react?

A: Positive. The beat on results and raise on '23 guidance should be viewed as a modest positive surprise by investors. There was some concern back at the November investor day that the '23 guide was below the 6-8% LT growth range, but this update puts the trajectory of annual 6-8% growth on track. We expect questions to focus on the NIPSCO sale process, settlement efforts in the rate case, and ongoing cost mitigation efforts.

Company Description

NI is a fully regulated gas and electric utility serving customers in six states in the Midwest and Mid-Atlantic. NI is a gas distribution utility with 3.2 million customers in Indiana, Kentucky, Maryland, Ohio, Pennsylvania, and Virginia. NI is an integrated electric utility serving 0.5 million customers in Indiana. NI's mix of operating earnings is 60% gas and 40% electric.

Valuation Method and Risk Statement

Our $31 price target is an 8% premium to the Regulated Utility average multiple or 18.7x our UBSe 2024 eps of $1.66. The premium is the sum of +5% for the group's undervaluation on a 12 month basis relative to Baa corporate bonds, -2% for third quartile EPS growth and 5% for second quartile regulation. Risks include, but are not limited to, the following: changes to the regulatory environment, ability to achieve favorable returns on investment projects, and ability to continue to reinvest in the business for growth.

Research Bulletin

NiSource (NI.N)

Initial Thoughts on FY22 Results: Positive on FY23 Guide; Continued Line of Sight to Top Quartile Growth

- Initial Thoughts on NI's AM Print which we view as positive.

- **Headlines Positive: Watching NIPSCO & Reg Execution:** NI delivered FY22 EPS of $1.47 and raised its FY23 EPS guidance range +3.5c at the midpoint to $1.54-1.60 which compares to BBG / CSe of $1.54 / $1.53. Importantly, NI's new LT EPS range (6-8%) is based off the new 2023 guidance range. At the midpoint, this implies +2c to BBG / CSe for 2024. The increase in FY23 guidance is due to better performance realized through 2022 (usage, O&M, reg outcomes) vs. the plan outlined at the Fall Analyst Day. The capital program was reaffirmed at $15Bn over 5yrs with some shifting of 2024 capital (~$500Mn) pulled into 2023 and the overall financing plan remains unchanged from the investor day. On renewable investment programs in Indiana, the timeline for projects also remains unchanged outside of $150Mn transmission projects (now 2Q23 from '21-'22 estimated ISD). On the current NIPSCO Min Interest sale, mgmt commentary suggest they remain on track with current schedule, and we look for more commentary the investor call today. Other conference call items include: Ability to settle NIPSCO rate review post intervenor testimony; Gas price declines relative to the current plan; Current RFP outlook with bid evaluations underway. NI mgmt is demonstrating they're moving back to a simple beat and raise story with line of sight to top quartile growth. We believe this is underappreciated in the stock's current multiple at an -11% / -8% discount to gas / electrics on 2025E P/E. Maintain Outperform.

J.P. Morgan Securities LLC

- **4Q22 beats estimates…** NI reported 4Q22 adj EPS of $0.50, ahead of the $0.49/$0.48 JPM/Street median estimates. 2022 results of $1.47 topped NI's $1.44-1.46 guidance range (narrowed on 3Q; results consistent with prior $1.42-1.48 outlook). Lower O&M benefited the quarter, contributing to a strong finish to the company's year.
- **...and 2023 guidance raised.** Continuing this momentum, NI raised its 2023 guidance to $1.54-1.60 (JPMe/Street median $1.54), marking a +2% increase at the midpoint from the company's initial $1.50-1.57 range (6-8% annual EPS growth rate reaffirmed). We see the upward revision as indicative of continued execution on and de-risking of NI's plan, including gas rate case settlement approvals in OH/PA/MD and settlement filing in VA. The release also notes active settlement discussions in the company's IN electric rate case, screening as the final hurdle to achieving a clean 2023 regulatory outlook. Here, we continue to expect NI to benefit from strong stakeholder relationships to reach a constructive outcome. Separately, we note modest capex revisions to pull ~ $400mm of 2024 investment into 2023 and look to management's color on the call summarizing these changes and the associated impacts to 2023-2024 earnings.
- **NIPSCO transaction formally launched.** The company's NIPSCO minority stake sale process is now active, and high level disclosures imply this plan continues to track completion within 2023. While valuation scrutiny of deals across the space appears to be increasing, our recent conversations with investors indicate general comfort with the prospects of NI receiving a favorable outcome given NIPSCO's attractive growth and ratemaking qualities.
- **Conference call details.** NI will host a webcast to discuss 4Q22 results on Wednesday, February 22 at 11 AM ET.

Table 1: NI 4Q22 Results

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight [Over the next six to twelve months, we expect this stock will outperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Neutral [Over the next six to twelve months, we expect this stock will perform in line with the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Underweight [Over the next six to twelve months, we expect this stock will underperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Not Rated (NR): J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap equity research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying analyst's coverage universe can be found on J.P. Morgan's research website, https://www.jpmorganmarkets.com.

Coverage Universe: Sunderland III, Richard W: AES Corp. (AES), Algonquin Power & Utilities Corp. (AQN.TO), Allete Inc. (ALE), American Water Works Company, Inc. First Crack at 4Q22

We believe NiSource's 4Q22 earnings release has positive implications for the stock. Q4 EPS beat consensus and 2023 earnings guidance raised.

Key Takes:

- NI reported Q4 adjusted diluted Net operating EPS (NOEPS) of $0.50 vs. our estimate/street consensus of $0.48.
  - 2022 EPS of $1.47 is slightly above the higher end of guidance range of $1.44-$1.46, +7.3% growth vs $1.37 in 2021
- Increased 2023 non-GAAP NOEPS guidance range to $1.54-$1.60 from $1.50-$1.57, $0.03 or 2% higher at the mid-pt.
  - Midpoint of $1.57 represents 6.8% growth off 2022 NOEPS. Consensus is at $1.54.
- Reaffirmed annual non-GAAP NOEPS growth of 6-8% through 2027.
  - Off the 2023 earnings forecast range of $1.54-$1.60.
  - Implied 2024 EPS at the mid-pt of $1.68 vs our estimate/consensus of $1.65/$1.66 respectively
  - Implied 2025 EPS at the mid-pt of $1.80 in line with our estimate/consensus of $1.80
- Reaffirmed $15B 2023-2027 capex plan with ~75% of investments beginning earning in less than 18 months
  - Still project 8%-10% annual utility rate base growth
- Northern Indiana Public Service Company (NIPSCO) minority sale process launched and on track for 2023
- NIPSCO is actively working with stakeholders toward a settlement in the electric rate case filed on September 19

NI will host a conference call at 11am ET. Dial-in: 1 (888) 330-2391. Passcode: 28323. We will follow the call with a detailed note.

Additional Details:

- **Minority Interest sale**: In Nov, NI announced minority interest sale of NIPSCO (up to 19.9%) in a tax efficient transaction to strengthen the balance sheet, which is expected to be completed in second half of 2023. The company has initiated the sale process, and we expect an announcement by mid-year and close by year-end. We estimate $1.5-$2B in cash proceeds.
- **NIPSCO Electric rate case:** On Sep 18th, NIPSCO Electric rate case was filed in Indiana, requesting rate increase of $292M net of infrastructure trackers with a 10.4% ROE and 58.5% equity ratio on a rate base of $5.95B. The company is actively working with stakeholders toward a settlement and expects to receive a final order in 3Q2023. Rates will go into effect in the fall of 2023 and the second tranche in spring of 2024.
- **OH gas rate case**: On Oct 31st, 2022, Columbia Gas of Ohio filed a settlement representing a $68.2M revenue increase with 9.6% ROE and 50.6% equity layer. The company originally requested $221MM with ROE of 10.9%. The equity ratio request of ~51% was not disputed. NI currently has an allowed ROE of 10.4% and equity ratio of 51% in Ohio. Hearings were held on Nov. 16, 2022, and the commission approved the settlement in January 2023 for new rates that will go into effect in March.
- **Virginia gas rate case**: On Dec 9th, Columbia Gas of Virginia reached a settlement with $25.8 million rate increase, inclusive of SAVE (Steps to Advance Virginia's Energy Plan) infrastructure tracker ($14.5MM), representing a settlement as to a specific revenue number but not as to a specific ROE. Recall that NiSource requested $40.6MM revenue increase net of the SAVE infrastructure tracker ($17.7MM) with a 10.75% ROE and 39.3% equity ratio on a rate base of $1.0B with a 12/21 test year. A final order is expected in 1Q23.

Please see the analyst certification and important disclosures on page 4 of this report. Evercore ISI and affiliates do and seek to do business with companies covered in its research reports. Investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

This report is prepared solely for the use of Michael Weisenburger

- **O&M management:** NI projects O&M to be flat from 2023 to 2027, which supports average annual customer rate increases of <3% annually and provides bill headroom for customer and reliability related investments. They also plan to invest ~$1B in IT systems to support field and customer service enhancements and productivity.
- **2023-2027 financing plan unchanged**
    - Dividends and capital investments funded through cash from operations, minority interest sale, $4.5-$5.5B new debt and ATM in 2025+.

This report is prepared solely for the use of Michael Weisenburger

VALUATION METHODOLOGY

We use a SOTP analysis to arrive at our price target

RISKS

Risks to our thesis include an inability to deploy capital at the company's expected rate resulting in a lower rate base and regulatory pressure resulting in lower allowed ROEs

Utilities

NI – FY22 beats; 2023 raised, reaffirms 6-8% annual EPS growth off higher base; positive

- **FY22 beats.** 2022 EPS of $1.47 – ahead of us/consensus at $1.45 and above the top end of the $1.44-1.46 guidance range
- **2023 guidance raised.** Now sees range of $1.54-1.60 vs $1.50-1.57 prior; current consensus is at $1.54 (WRe $1.54)
- **Reaffirms 6-8% annual EPS growth off higher 2023.** Implies the following EPS (assuming 7% growth) –
  - 2024 EPS of $1.68 vs current consensus $1.66 (WRe $1.67)
  - 2025 EPS of $1.80 vs current consensus $1.80 (WRe $1.81)
- **5-yr capex plan unchanged, some shifting into 2023 from 2024.** The $15B investment plan over 2023-27 was unchanged; 2023 capex now expected to be $3.3-3.6B (was $2.8-3.1B), 2024 now $2.6-2.9B (was $3.0-3.3B)
  - Estimated CODs for renewable projects better defined now in slide presentation
  - NI's financing plan was unchanged
- **Actively working toward settlement in NIPSCO electric case.**
- **NIPSCO minority sale underway.** We assume a 19.9% stake is sold for 2x book equity (in-line w/ DUK's sale)

A positive update across the board – 2022 EPS came in above guidance and the 2023 guidance provided at Analyst Day in November was already raised. NI is now pointing 6-8% annual EPS growth off the higher 2023 guidance, which implies a 2024 slightly ahead of consensus and an in-line 2025. At EEI NI was messaging the 6-8% as a CAGR, thus we end up in a similar place but the linear growth is better to see. The capex/financing plan was unchanged, though there was some shifting of capex into 2023 from 2024 (unclear if from renewable project timing or base capex). Separately, it is nice to see that NI is in active talks to settle its NIPSCO electric case. The NIPSCO minority sale is now officially underway; we expect some questions here on the call and continue to believe NI will receive a good price.

AGR – 2022 EPS beats, 2023 guidance in-line; NECEC cost up $200M and timeline slips to 2025

Reports 2022 adjusted EPS of $2.33 vs. $2.18 last year – beats consensus $2.28, but in-line with our $2.32 estimate; also in-line with $2.20-2.38 guidance
  - Networks -$0.22 YoY – rate relief in NY/ME; offset by higher depreciation, business expense, and finance costs
  - Renewables +$0.57 YoY – primarily on offshore wind restructuring gain of $0.47; also pricing/production party offset by absence of Storm Uri gain in 2021
    - Wind capacity factor = ~28.5% vs. ~30% normal and 28.1% last year
  - Corporate -$0.20 YoY
  - Includes $0.06 non-GAAP add-back for offshore contract provision
- **Issues 2023 guidance at $2.20-2.35** – **in-line** with consensus $2.27, but light of our pro forma PNM estimate (half-year) at $2.41; our estimate ex-PNM is $2.13
  - AGR previously implied a similar range in 2023 to 2022 (~$2.20-2.40)
  - Assumes PNM closes by mid-year ($0.30/sh), NECEC resumes construction in mid-2023, partial sale of Kitty Hawk offshore wind, and potential partnership structure in onshore projects – all disclosed at Analyst Day
  - Includes non-GAAP add-backs of $0.24 in merger costs and $0.00-0.08 of contract reserves
- **Reaffirms 6-7% EPS CAGR over 2022-2025 (w/ PNM) as of September Analyst Day**
- **NECEC.** Cost up to $1.4B (from $1.2B). Evaluating construction schedule for COD August 2025 (from YE24 previously). Slides note working on multiple fronts to ensure economic viability.
  - Positive recent legal outcomes, but construction restart still pending April trial at Maine local court
- **Renewables.** 395 MWs COD in 2022, 480/106 MWs solar/wind in 2023 (all unchanged)
  - Notes successful PPA negotiations on 780 MWs of existing projects
  - Onshore pipeline unchanged at 19.7 GWs
  - No new PPAs signed for sixth consecutive quarter
- **Offshore Wind.** Vineyard Wind timeline unchanged – 2H23 generating power and 2024 COD
  - Vineyard Wind capex unchanged, offshore export cable started
  - Committed to bid in upcoming MA solicitation w/ Commonwealth Wind

The 2023 earnings guidance is the main focus and this matched consensus (unclear if including PNM or not) and what AGR had implied back at its Analyst Day. We had estimated slightly higher, but our ~$0.30 PNM swing factor matches AGR's expectations. However, the incremental NECEC cost increase and delay despite successful recent legal outcomes is a bit disappointing. On the call we expect questions on rate case settlement discussions (mainly NY), Vineyard Wind construction progress, Commonwealth Wind PPA negotiation updates, as well as the latest on NECEC and PNM proceedings. There is a lot for AGR to execute on over the next 12 months.

<u>D – OSW bill passes in the House with minor amendments; still waiting on conferees for regulatory bill</u>

- Yesterday, the VA House of Delegates passed SB 1477 (OSW bill) by a vote of 87-12
- The House adopted minor amendments, none of which change the substance of the

bill
    - Given the amendments, the bill will need to be approved by the Senate again
- Separately, as it relates to SB 1265 and HB 1770 (regulatory bills), conferees have yet to be named
- Virginia's legislative session is due to adjourn on Saturday (2/25)

Not a surprise to see the OSW bill pass given the amount of support it has received thus far. We would expect the Senate to approve the amended version today or later this week ahead of the 2/25 deadline. As a reminder, the bill would give the SCC full discretion in potentially allowing D to bring on a noncontrolling equity investor for CVOW. This would help reduce D's project risk and also decrease the cash drag while building the project. As it relates to the regulatory bill, we would expect conferees to be named today given that there are only a few days left in the session. Conferees typically include, but are not limited to, leadership from both the Senate (Saslaw) and House (Kilgore) as well as chief patrons of the bill (Saslaw and Kilgore).

NRG – Statement on adverse Vivint court decision is interesting; Monitoring near-term deal closing

- Yesterday, VVNT issued an 8-K indicating that a U.S. District Court ordered Vivint to pay CPI Security Systems $50M of compensatory damages and an additional $140M of punitive damages from a 2020 lawsuit related to VVNT sales practices
- NRG's public statement acknowledged the court decision and stated they "are continuing to evaluate the decision and our options. As we shared during our recent earnings announcement, NRG's acquisition of Vivint is pending and has not yet closed."

We found NRG's statement to be interesting as one could read it to imply that the company could consider seeking some remedy for the court decision. It's unclear to us if NRG could claim this is a material adverse event and use it to renegotiate the merger terms modestly. On the other hand, the statement could simply be highlighting that NRG could seek to appeal the decision in the future. It is of interest, however, particularly given investor reaction to the deal and the negative impact it has had on NRG's stock price.

PPL – Prices $900M exchangeable note at 2.875%, sets conversion price at 23% premium to close; complex debt issuance, not equity-like; stock hit overdone

- After close 2/21, PPL said it priced $900M exchangeable notes due 3/15/28, with an option for $100M shoe, at 2.875%. The net proceeds are $882M (before the shoe).
    - The aggregate principal amount will be paid in cash.
- Notes will be exchangeable at rate of 29.3432 shares per $1,000 principal amount; that is equivalent to an initial exchange price of $34.08 per share of common stock, which represents an exchange premium of ~22.5% to the last reported sale price of $27.82.
    - If the share price exceeds, the exchange price, the excess value is paid by PPL to exchangeable noteholders in stock, cash or a combination of the two.
- Prior to 12/15/27, notes are exchangeable at option of noteholder only if specified

conditions are met; on or after 12/15/27, notes are exchangeable at any time.
- The note is callable after 3 years (3/15/26).

This offering was a complex debt issuance that included a stock option to the buyer that led to a lower interest rate. This was a way to get cheaper debt, not an equity-like issuance. But it still caused convert arb shorting. The 2.875% is lower than both the UST 5Y bond (4.1%) and pricing for recent 5Y bond issuances for similarly rated utilities (115bp spread for CNP). Every 100bp on $1B of debt is $0.01/sh in 2025. If PPL stock price exceeds $34.08, PPL pays just that excess times 29.3432 shares per $1,000 principal note. But PPL can elect to pay that in the form of equity, cash or a combination of the two. The stock lagged the UTY by ~150bp, likely on the announcement of the notes. The stock move seems overdone. The noteholder effectively has an option on the stock if price appreciates by at least 23% (though payable in cash/stock/both) in exchange for a lower interest rate to PPL.

PJM Auction – FERC accepts proposal to revise small DPL South zone results

- Yesterday, FERC issued an order accepting PJM's proposal to resolve the small DPL South zone issue that resulted in a price spike due to a supply/demand mismatch in the recently held 2024-2025 capacity auction (**link**)
    - Specifically it would "exclude planned generation capacity resources from the calculation of locational deliverability area (LDA) reliability requirement if the addition of such resources materially increases the reliability requirement and such resources do no participate in the capacity auction"
- Recall that PJM made a 205 FERC filing in late-December after the results of the auction were realized, but not yet public
- Commissioner Danly dissented, finding PJM's attempt to retroactively apply a rate proposal to an already-run auction as illegal, and calling for a section 206 proceeding to investigate whether the existing PJM construct is just/reasonable
- Commissioner Christie concurred and found the DPL South zone results were blatantly unjust/unreasonable, but also again called for a comprehensive review of the PJM capacity market

It appears PJM now has its answer and should be able sssto release results, as the effective date is retroactive to 12/24/22. We're not sure on the precedent this sets, as it effectively changes the rules after-the-fact, but perhaps isn't surprising given the pro-consumer bent of the current FERC. VST, CEG, NRG and PEG have modest exposure to the PJM auction (and no one is materially exposed to the DPL South Zone). Please see our original preview note for company sensitivities and exposures by zone – **link**

The Bi-Weekly Mark – The New New Jersey energy plan
Click here to view our complete note
CEG finishes 2022 strong, NRG not so much; PEG less eventful. Last week started earnings season for power names – CEG led off with a net positive update. 2022 EBITDA beat, 2023 guidance was in-line, and implied 2024 EBITDA was above us/consensus. The capital allocation plan has a little a bit of everything and left $2B of unallocated FCF. CEG's nuke fuel also rose $500M/year as it builds more inventory to ween off Russia, which was viewed

less favorably (PEG saw as a non-issue). NRG on the other hand limped to the finish line in 2022 – missing the low-end of a guidance range that had already been lowered by $200M (and original guidance by 16%!). NRG's reaffirmed 2023 guidance implies a big YoY step-up as some risk management issues in 2022 abate, but the burden of proof is now on the company after 2 straight disappointing years. Vivint still has doubters and a $190M court ruling against it last Friday adds some uncertainty. PEG's report this morning was less eventful. Key questions remain more strategic – what does it do with nuclear and how much is its yet to be exited offshore wind worth?

PEG – The New New Jersey energy plan
Click here to view our complete note
2022 EPS in-line. PEG posted operating earnings of $3.47, which matched consensus/us and was within PEG's $3.40-3.50 guidance. The year was down from $3.65 in 2021, as utility rate base growth of 8% was more than offset by fossil asset sale timing items.

Midstream

TRGP – Strong 2023 EBITDA outlook on robust volumes and despite weaker commodities; Capex a little high; Larger dividend boost; Positive

- **Q4 results.** EBITDA of $840M beat consensus by 2% with FY 2022 EBITDA landing right at the midpoint of guidance despite commodity weakness.
    - G&P EBITDA missed big and was down $21M QoQ despite volumes that were right in line with our forecast and good realized gas prices. The quarter was negatively impacted by winter storm Elliott.
    - L&T EBITDA beat big. This appears to be partially due to strong marketing margins and lower costs. NGL pipeline and fractionation volumes were flattish QoQ and below our forecast possibly due to Elliott effects.
- **Strong initial 2023 guidance.** 2023 EBITDA guidance of $3.5B – $3.7B is better than our $3.5B estimate and further above $3.44B consensus
    - TRGP expects average FY 2023 Permian G&P volumes to be 10% above 4Q22 volumes – this is better than our forecast
    - Guidance assumes commodity prices of $0.70/gallon NGLs, $2.25/MMBtu Waha gas, and $75/bbl WTI crude. NGLs and crude are close to forward curves, although Waha gas is now lower than this. TRGP only sees a $60-100M impact on 2023 EBITDA for a 30% change in commodity prices.
- **Capex a little above already elevated expectations.** 2023 growth capex of $1.8B - $1.9B is modestly ahead of our $1.7B forecast and our view of investor expectations.
    - TRGP announced plans to transfer an existing 230 mmcf/d South Texas plant recently acquired to its Delaware basin system with COD in 2Q24
- **Larger than expected dividend boost.** TRGP will raise the dividend by 43% effective next quarter to $2/share (2.7% yield)
    - Buybacks will remain opportunistic. TRGP repurchased $225M of stock for FY 2022 which implies only about $28M of purchases in Q4.

This is a positive update for Targa and continues a trend of better than expected 2023

EBITDA outlooks, as well as higher capex, across the midstream space. The strong 2023 outlook appears to be driven by robust volume growth as TRGP is using close to current forward commodity prices which have weakened considerably over the past couple of months. 2023 growth capex came in even a little above already heightened expectations. The 43% dividend hike is a positive – while TRGP will still yield well below peers, it is a notable step change while the company will still retain considerable financial flexibility for buybacks. Lastly, on the quarter results beat nicely with help from strong marketing results and despite some winter storm Elliott impacts on volumes.

EPD – Phantom unit grants to management and EPCO Board members

- EPD filed a series of form 4s yesterday with typical annual grants and vesting of phantom units awarded to senior executives
- Of note, our reading of the filing is that Chair Randa Duncan Williams received a 535,000 unit grant of phantom units (worth $14M at the current stock price) with vesting in February 2027. 370,000 previously granted phantom units vested this year.
- Separately, Director Richard Bachmann was awarded 375,000 phantom units ($10M) that also vest in 2027
- Co-CEOs Jim Teague and Randy Fowler each received 300,000 phantom units ($8M) that vest in equal increments over 4 years starting in February 2024

We wouldn't typically highlight annual normal course filings of phantom unit grants as all companies have some element of long-term stock-based compensation and EPD's CEO compensation in our most recent proxy report was consistent with peers. However, once again this year it caught our attention that Directors Randa Duncan Williams and Richard Bachmann received a greater number of phantom units than the co-CEOs of the company, which is very different than other companies we are aware of.

WMB – Making the case for gas

Click here to view our complete note

Investor meeting makes the gas for natural gas. Williams held its annual investor day on Tuesday. The tone of the meeting was upbeat, underscoring confidence in the long-term demand for natural gas globally combined with its broad footprint to serve that demand. Overall we see WMB as very well positioned for long term natural gas growth and its execution on operations, growth and on the balance sheet has been good. We remain Peer Perform on WMB but we believe it remains a high-quality gas play.

ETRN – Hoping to go 4 for 4 at the 4th Circuit

Click here to view our complete note

Solid 2022 results undermined by MVP uncertainty and high capex. Shares of ETRN underperformed by about 400 bps after higher than expected 2023 capex guidance and lack of clarity on the no-MVP '23 EBITDA picture. The market continues to react against higher than expected capex across the sector. We see the stock as fairly valued at current levels after taking into account the higher capex and remain Peer Perform. While we remain skeptical of a 2023 MVP completion we note that if the pipeline is completed ETRN could have significant upside.

PJM Capacity Auction results February 27th

PJM indicated that it will post the long-delayed results of the 2024/2025 base residual auction (RA) after 4PM ET on Monday February 27th. FERC ruled on February 21st providing clarity (ER23-729-000). See our expectations and background here: PJM Delay.

NI: FY22 beat and FY23 guide up

NiSource (NI) reported $1.47 adjusted EPS a beat vs $1.45 BofA/Consensus and above the $1.44-$1.46 narrowed guidance range. NI increased its 2023 guidance to $1.54-$1.60 vs $1.55 BofA/Consensus, a favorable change from the recently initiated $1.50-$1.57. NI reaffirmed its 6-8% annual adjusted EPS with a new slide indicating that there is annual 6-8% growth every year from 2024-2027.

Mgmt appears clearly confident on NIPSCO electric rate case outcome heading into March hearings: could see status update by late Feb for progress. Watch cost cut provisions and coal closure recovery as key subjects ahead still. Overall perceive clear-derisking thru 1H23. Minority interest sale process also key and continuing as intended: key catalyst to drive a positive re-rating. *We continue to view NI as one of the most attractive regulated utility opportunities given the discounted valuation and above-average growth prospects with near-term risking. Reit Buy.* See our latest: NiSource Inc: Painting Path for a Constructive Indiana Rate Case Outcome: Minority Sale Too 01 February 2023

AVA: 4Q/FY22 beats on biotech investment MtM

Avista Corp (AVA) reported $2.12 FY22 EPS, well above $1.92 BofA/$1.89 Consensus and above the high-end of the $1.88-$2.08 guidance range (at the high-end of the prior $1.93-$2.13 range). Avista utilities $1.61 was below the $1.66-$1.82 guidance, Alaska $0.10 was at the top-end ($0.08-$0.10), and Other was materially higher than the $0.14-$0.16 range. AVA reported $22Mn Other net income in 4Q22 ($0.30) and $30Mn FY22 ($0.41). Avista has an investment in a biotechnology company with a patented biologic. AVA described its FY22 earnings as better than expected due to "significant increases in the fair value of certain non-regulated investments". AVA has $54Mn of Level 3 investments which was identified as a critical audit matter by its external auditor. Deloitte stated that the Avista elected the "fair value option for the measurement of certain investments in equity securities without a readily determinable fair value."

Avista has a history of material unregulated investments including energy management company Ecova that was sold to GDF Suez for $335Mn in 2014 with $136Mn net cash to Avista ($62Mn gain).

We view the 4Q22 earnings update cautiously as Avista missed its 2022 Utilities EPS and capex guidance. FY22 EPS beat expectations entirely to the biotechnology investment mark-to-market which is non-core and not indicative of future value: that said still a positive update on these peripheral investments. The balance sheet metrics continue to erode which could lead to additional future equity.

Please see full report for more on AVA, Missouri regulation, and PEG.

AVA: Capex and balance sheet in focus (Cont.)

The $475Mn annual capex in 2023-2024 was reaffirmed and 2025 was introduced also at $475Mn. In 2025 natural gas spending is declining YoY and is replaced by electric transmission & distribution spending. 2022 Avista utilities capex was $443Mn, -7% below the $475Mn guidance. FY23 guidance was reaffirmed at $2.27-$2.47 which excludes the ERM where management expects +$0.03

The equity ratio declined QoQ to 44% from 45% and is likely higher today due to the short-term borrowing increase announced in early 2023. The company indicated plans to reduce short-term debt throughout the year but also increase its credit facility capacity +$100Mn in 2Q23. AVA now expects to issue $200Mn long-term debt in 2023, up from $140Mn previously, and an unchanged $120Mn equity. Maintain Underperform rating

MO Regulatory stakeholder check-in

We caught up with stakeholders on the regulatory situation for Missouri utilities, a timely update given the recent transition of former Chair Ryan Silvey and a number of regulatory efforts in progress and recently completed. On balance, most utilities enjoy a constructive regulatory relationship. Directionally the most positive feedback was on Spire (SR), where stakeholders indicated that the challenges experienced in the prior two rate cases were isolated events, and that negative sentiment is not expected to hold over. We continue to see Ameren (AEE) as the best-positioned in terms of regulatory perception, where stakeholder note particularly successful efforts in communicating with regulatory counterparts at the commission. *Separately we have heard that Ameren stakeholder relations in Illinois has improved as well.* Evergy (EVRG) also has a generally positive perception, despite late-stage consternation during last year's Missouri electric cases where the commission and staff experienced frustration over the failure to implement time of use (TOU) rates – we see this as more of a communications-related isolated instance than a policy viewpoint.

As had been previously articulated by management teams and others active in the state, expectations remain low for any substantial energy legislation this session. Policymakers have passed substantial energy bills in recent years including securitization, the original plant in service accounting (PISA), and last year's PISA modifications. We perceive legislative attention will be directed elsewhere in this session and likely next year's. Note this is the case for transformative and complex legislation, though we still see as possible incremental items such as right of first refusal (ROFR) legislation which may benefit incumbent transmission operators including Ameren. Generally speaking, we do not see significant barriers to future rate case settlements with stakeholders viewing the outcomes as generally constructive.

There could be a shift away from 'black box' outcomes given opacity which have been common in Missouri. We also do not expect that MO commissioners will take aggressive positions on authorized ROEs as seen previously in states including WI, rather letting staff and other intervener positions on the record dictate the direction of rates.

PEG Follow-up: Taking the Long-Term View at Analyst Day

Look for management to take a focus on 2027 & beyond at its March Analyst Day, focusing on the Governor's latest electrification plans. We note few details were provided in reaction to Gov Phil Murphy's latest efforts to accelerate the RPS to 100% by 2035 - but anticipate a particular focus on meshing electrification into utility operations. While we perceive this could add modestly to the tail end (2027) of the existing 5-year plan (and some on EV chargers potentially in the interim too) - we look for a bigger 10-year view of spending plans offering up an improving core regulated utility background. Related, we also look for PSEG (PEG) to articulate perhaps for the first time its inaugural efforts to maximize its nuclear portfolio with a focus on uprates, subsequent license extension and finally some articulation of a Hydrogen plan. This last bit is likely understated within expectations. While pension nuances are likely to persist a delayed timeline on the lift out of its Power pension makes this less likely of a relevant

detail. We reiterate our existing EPS CAGR of ~5.5% and continue to see a positive risk-adjusted return outlook for shares. *Don't expect a meaningful step in ratebase growth with the Analyst Day despite the improving regulatory backdrop. Remains among our favorite utility picks of the wider universe.*

Price objective basis & risk

Ameren Corporation (AEE;A-1-7;$86.04)
Our $96 price objective is predicated on a P/E based sum of the parts, valuing each business subsidiary relative to the 2025E ratebase weighted peer multiple of 16.0x for electric and 16.1x for gas. We apply a 2.0x premium to peers at AEE Missouri to account for the improving prospects of capital spend, supplemented by a regulatory jurisdiction becoming more favorable - but lack of decoupling. We apply a 2.0x premium to peers at AEE Illinois to account for decoupling on the distribution business which aids in earnings predictability. At Ameren Transmission, we apply a 4.0x premium to peers to reflect the FERC ROEs and robust growth outlook. At the Parent, we assume 2.0x multiple premium reflecting average of the subs and given the healthy debt metrics with FFO/Debt at 17%+. Electric peer P/E multiple is grossed up for a year to 2023 by 5% to reflect capital appreciation across the sector.

The risks to our price objective are the utilities earning their allowed returns or worse, a significant change in 30-year U.S. Treasury bond yields, and adverse regulatory outcomes that could impact mgmt's ability to earn its allowed return.

Avista (AVA)
Our $36 PO is based on our 2025E sum-of-the-parts (SOTP) analysis, based on the large cap electric group multiple of 15.2x for electric and 15x for gas. Both electric and gas

PEG – 4Q EPS Beat; 2023 EPS Guidance Narrowed, LT Value Remains With Execution and Rate Case Reset (see our note HERE)

NI – 2022 beat and 2023 guidance raise; reiterates and further clarifies 6%-8% annual EPS trajectory

AVA – 2022 beat on non-utility "Other" segment; reiterates 2023 guidance

NRG – Vivint lawsuit damages continue to raise investor questions over deal

PCG – PG&E files comments on PG&E GRC process and Track 2 settlement

D/VA – Bills SB1321, SB1265, SB1477, and HB1604 advance following chamber votes

PPL – PPL prices exchangeable senior notes

PCG – PG&E prepares for potential storm outages

PJM – RTO Board approves additional RTEP project updates

NI reports 2022 net operating EPS of $1.47 vs Gugg/consensus at $1.45/$1.45; raises 2023 guidance to $1.54-$1.60 ($1.57 midpoint) vs prior guidance of $1.50-$1.57 ($1.54 midpoint) and Gugg/consensus at $1.54/$1.55

- **NIPSCO minority stake:** sale process launched, and 2023 close continues to be expected
- **EPS CAGR:** reiterates 6%-8% annual EPS growth through 2027 (slide 6)
- **Capex:** shifted capex (primarily generation) from 2024 into 2023
  - **2023:** now **$3.3bn-$3.6bn** vs $2.8bn-$3.1bn previously
  - **2024:** now **$2.6bn-$2.9bn** vs $3.0bn-$3.3bn previously
- **Rate Base:** reiterated 8%-10% annual rate base growth… **sees potential upside through 2027 from:**
  - New gas system modernization programs focused on replacing legacy plastic mains and services installed prior to 1985
  - Gas transmission programs focused on inspection retrofits and reconfirmations to comply with PHMSA regulations
  - New programs to deploy advanced metering infrastructure (AMI) for gas systems
  - Increased ownership of electric generation investments utilizing the IRA's tax transferability provision
- **Electric Generation:** New request for proposals (RFP) for generation resources closed in September; bid evaluation underway
- **Financing:** maintains 2023–2027 financing plan
  - Includes remarketed equity units ($863m)
  - ATM equity in 2025+ to support current investment grade credit ratings; may also be used to redeem outstanding preferred stock ($900m)
- **Credit:** continuing to target 14%-16% FFO/debt post-sale of NIPSCO minority interest
- **Dividends:** continuing to target 9%-11% total shareholder return
- Call is at **11:00am at 1-888-330-2391... Passcode: 28323**

AVA reports 2022 EPS beat of $2.12 vs guidance of $1.88-$2.08 ($1.98 midpoint) and Gugg/consensus at $1.89/$1.89; reiterates 2023 EPS guidance of $2.27-$2.47 ($2.37 midpoint) vs Gugg/consensus at $2.28/$2.31

- **2022 EPS beat:** "Other" segment produced **$0.41 of EPS in 2022, vs 2022 guidance of $0.14-$0.16** for the segment, and $0.21 in 2021
  - **4Q22 release:** "*Earnings attributable to our other businesses increased primarily due to an increase in the fair value of our investment in a biotechnology company, which stems from an investment that was originally focused on the development of biofuels. Their patented biologic drug platform accelerates time to market for orally delivered antibody drugs and has advanced through testing stages, increasing the value of our investment.*"

> "*Our 2022 consolidated earnings were better than our expectations,* ***due to significant increases in the fair value of certain non-regulated investments***," said Avista President and CEO Dennis Vermillion.

- **2023 "Other" guidance: $0.04 to $0.06** per diluted share
- **Capex:** reiterated capex of $475m per year at Avista Utilities through 2025, plus ~$15m/yr at AEL&P
- **Pension:** contributed $42m to the pension plan in 2022; AVA expects to contribute a total of $50m during 2023-2027 ($10m/yr)
- **2023 Financing:** AVA expects to issue up to **$200m of long-term debt** (*vs $140m previously*), and **reiterated plans to issue up to $120m of common stock** to fund planned capital expenditures and decrease short-term borrowings; also planning to increase the capacity of its $400m credit facility to $500m in 2Q23.
- **2022 Financing:** issued $400m of long-term debt and $138m of common stock.
- Call is at **10:30am at 1-844-543-045… Passcode: 327211**

NRG – Vivint lawsuit damages continue to raise investor questions over deal

- Friday's $189M award included ~$140M of punitive damages and $49.7M of compensatory damages
- See our prior note HERE [NYSE:VVNT]

Guggenheim takeaway: *We caught up with the company, and we continued to field questions on this issue throughout the day yesterday following our AM flag of the ruling in the Daily. In our understanding, the case in question stems from a prior period in the company before its 2021 settlement with FTC on past sales practices.* ***In our view the development may give NRG the option to reprice or walk away from the deal*** *depending on the boundaries of any material adverse change (MAC) clause in the purchase agreement, however we emphasize that it is difficult to make any specific calls here without a clearer picture of the deal's legal landscape. NRG continues to provide limited and narrow commentary on this latest legal development (not the first – see HERE), and it remains unclear if a repricing process would trigger a further delay to the closing process, which we had expected with the completion of the underlying finances by mid-March (reg approvals in place). For example, it remains unclear if any repricing would include a need to wait for any adjustments to the award on appeals. While our conversations indicated opinions of the overall deal remain mixed, we would not be surprised to see a positive reaction to a deal break given how shares traded yesterday and investor sentiment coming off the call. The share price reaction yesterday with VVNT down 5.4% (vs. S&P 500 down 2%) shows that investors may assume that NRG will in some form or another change the deal either by walking or recutting the price. Regarding the actual deal, as we highlighted in past research, we are sympathetic as to why some investors may not want this deal to happen – See our thoughts HERE and HERE.*

PCG – PG&E files comments on PG&E GRC process and Track 2 settlement

- PG&E filed comments in support of Track 2 settlement approval (unopposed settlement) and requesting to maintain Track 1 proceedings on schedule.
- Track 1 is the main proceeding addressing O&M and capital cost recovery.
- PG&E previously filed updated testimony in the 2023 General Rate Case which incorporates updated cost escalation on O&M and capital, as well as tax law changes which impact revenue requirements.
- The updated testimony results in a 2023 base year revenue requirement increase of $835M (the bulk of the contribution from expense escalation, $641M).

- Escalation for 2024-2026 results in revenue requirement increases of $31M, $105M and $119M in the respective attrition years.
- Capital cost escalation also results in increased to rate base, with a 2023 base year step up to $50.9B (+$1.7B vs prior request) and up to $68B by 2026 (+$5.4B vs. prior request)
- Docket: A2106021

Guggenheim takeaway:*FYI. Intervenors have previously been focused on specific revenue reductions, including alternative insurance proposals, reduction in operating costs, reduction in capital programs including undergrounding, etc. Between the broader stakeholder support for undergoing, and legislative outcomes (noted HERE), there is a clear push to do more in CA, but we acknowledge the regulatory process bid-ask and intervenor scrutiny. Ultimately, we still see an upside to the base capex for PCG even among the bid-ask as system needs are not going away. More on our thesis here.*

D/VA — Bills SB1321, SB1265, SB1477, and HB1604 advance following chamber votes

- SB1477 also passed the House on an 87-12 vote
- HB1604 HERE, SB1321 HERE
- Commentary on SB1265 and HB1770 HERE

Guggenheim takeaway: *Several procedural steps for your awareness as the session enters its final days – as noted by lawmakers and media, the more detailed Saslaw package continues as well (the original SB1265). As a reminder, that package contains the language of McClellan's original SB1321, alongside key focus areas like fuel securitization and the ROE/equity layer language. Anything passed would have to head to governor, who has also opened the door to a potential special session (narrowly focused on the budget for now).*

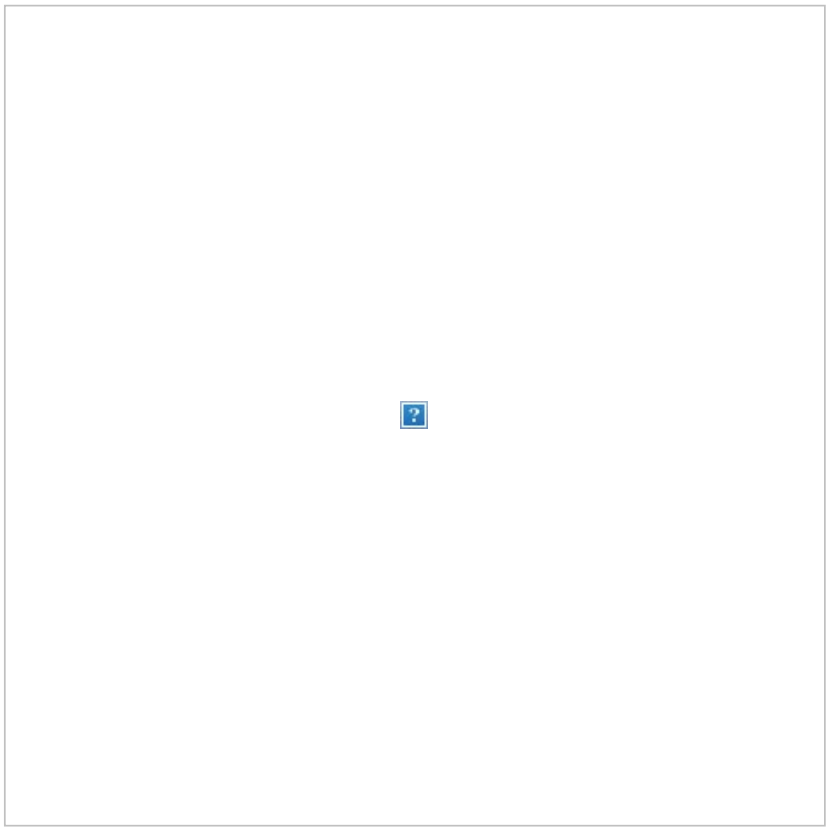
PPL — PPL prices exchangeable senior notes

- PPL announced pricing and the initial exchange rate on its $900M of senior notes at 2.875%, with an initial exchange price of $34.08
- "Upon exchange of the notes, PPL Capital Funding will pay cash up to the aggregate principal amount of the notes to be exchanged and pay or deliver (or cause to be delivered), as the case may be, cash, shares of common stock or a combination of cash and shares of common stock, at PPL Capital Funding's election, in respect of the remainder, if any, of its exchange obligation in excess of the aggregate principal amount of the notes being exchanged." - PPL
- More HERE

Guggenheim takeaway: *Flagged for your awareness as the exchangeability generated some questions yesterday. This remains debt for all intents and purposes – the principal is not converting to equity upon 12/15/27 or maturation, but rather the company has the ability to use equity for the premium on shares to the conversion price at that time. If shares are below $34.08 the company only owes the $900M. The premium generally comes with very modest dilution (~$0.01) in the event shares were to rise to the $40s. Based on our conversations yesterday's reaction may have been in part investors hedging their share price exposure as a part of the offering.*

PCG – PG&E prepares for potential storm outages

- PG&E issued a notice of high winds and rain that could impact electric service.
- The incoming adverse weather could result in trees, limbs and other debris falling into powerlines.



- Weather forecasts anticipate potential snowfall even at low elevations
- PR here.

Guggenheim takeaway: *FYI.*

PJM – RTO Board approves additional RTEP project updates

- "Since then, PJM has identified new baseline reliability criteria violations, and the transmission system enhancements needed to solve them, at an estimated cost of $634.14 million. PJM is also recommending the approval of one new PJM-MISO Interregional Targeted Market Efficiency Project (TMEP) at a cost of $0.20 million. Scope changes to an existing project will result in a net increase of $10.64 million. This yields an overall RTEP net increase of $644.34 million, for which PJM is recommending Board approval. Additionally, PJM is recommending the cancellation of $0.26 million in previously identified baseline upgrades as a result of updates to analysis performed. Altogether, the changes result in an overall RTEP net increase of approximately $644.72 million." - PJM
- More HERE

Guggenheim takeaway: *Minor FYI.*

NiSource Raises Outlook for 2023, Remains a Top Pick in Utilities Sector

Analyst Note Travis Miller, Strategist, 22 Feb 2023

We are reaffirming our $32 fair value estimate for NiSource after the company announced $1.47 in operating earnings per share for 2022, up 7% from 2021. Results were in line with our expectations. We are reaffirming our narrow moat and stable moat trend ratings.

NiSource is the most undervalued utilities stock in our coverage, trading at a 16% discount to our fair value estimate as of Feb. 22. We think it has better regulation and more long-term investment opportunities than most other utilities relative to its size. The stock's 3.7% dividend yield and above-average growth relative to its peers suggests total returns should top most utilities' during the next five years.

Management reaffirmed its 6%-8% annual earnings growth rate target through 2027 and raised its 2023 EPS guidance range to $1.54-$1.60, implying another year of 7% earnings growth. This is now in line with our outlook. We already had been forecasting 2023 earnings at the high end of management's previous range.

Earnings growth is translating into dividend growth, as we expect. NiSource's board recently raised the dividend 6% to $1.00 per share annualized for 2023. We think NiSource has enough financial flexibility and constructive rate regulation to maintain a 60%-70% payout ratio, higher than other utilities. This enhances cash returns for shareholders.

NiSource's key growth factors remain the pace of renewable energy investments and the outcome of Indiana electric rate proceedings this year. We continue to assume NiSource invests $8 billion in 2023-25 with that pace

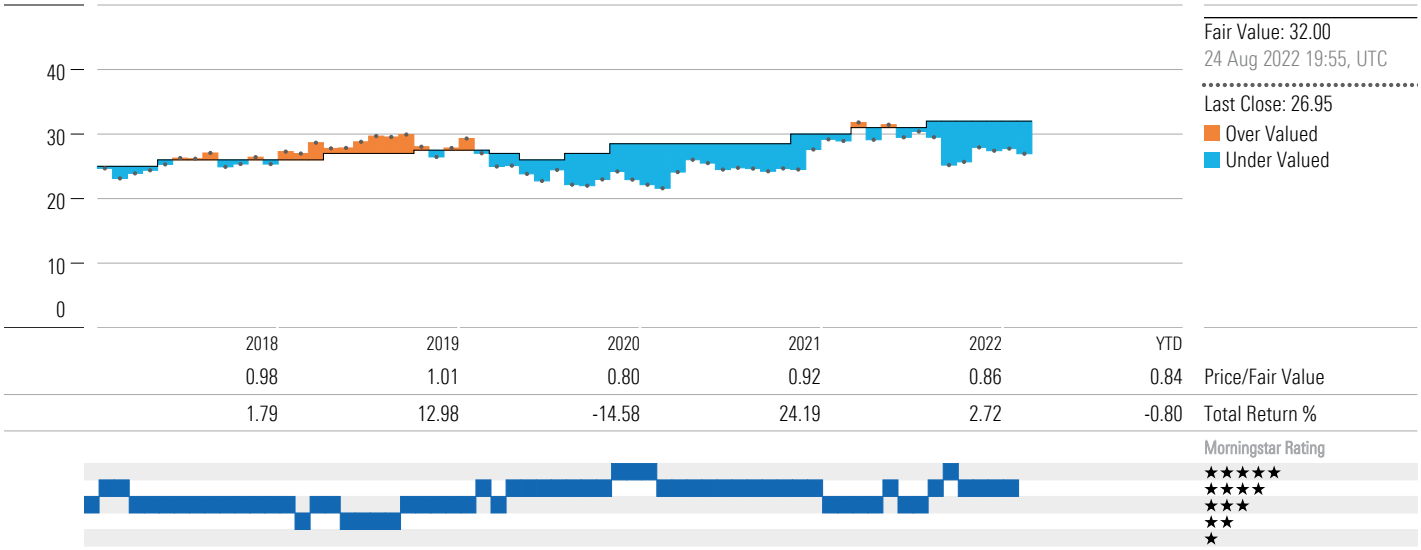
Utilities - Regulated Gas

Business Description

NiSource is one of the nation's largest natural gas distribution companies with approximately 3.2 million customers in Indiana, Kentucky, Maryland, Ohio, Pennsylvania, and Virginia. NiSource's electric utility transmits and distributes electricity in northern Indiana to about 500,000 customers. The regulated electric utility also owns more than 3,000 megawatts of generation capacity, most of which is now coal-fired but is being replaced by natural gas and renewable energy.

accelerating beyond 2025.

We think an electric rate case settlement will expedite NiSource's plan to sell 19.9% of its Indiana utility, NIPSCO, this year, as management announced in November.



Elliott Management, which has been active in the utilities sector during the last decade, made NiSource one of its top six new buys and the only utilities holding during the fourth quarter, according to recent fund filings.

MORNINGSTAR®

Research Methodology for Valuing Companies

Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, indepth competitive advantage analysis, and a variety of other analytical tools to augment this process. Moreover, we think analyzing valuation through discounted cash flows presents a better lens for viewing cyclical companies, high-growth firms, businesses with finite lives (e.g., mines), or companies expected to generate negative earnings over the next few years. That said, we don't dismiss multiples altogether but rather use them as supporting cross-checks for our DCF-based fair value estimates. We also acknowledge that DCF models offer their own challenges (including a potential proliferation of estimated inputs and the possibility that the method may miss shortterm market-price movements), but we believe these negatives are mitigated by deep analysis and our longterm approach.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk adjusted discount to their fair values, whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our singlepoint star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.

Our model is divided into three distinct stages:

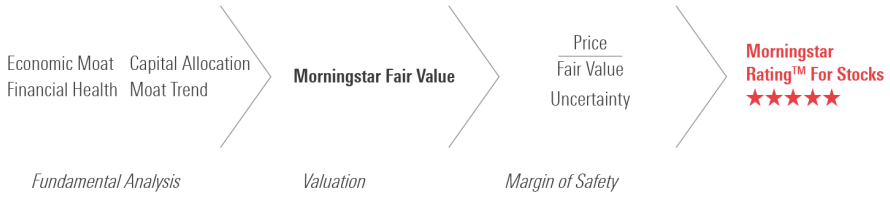
Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in workingcapital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes (EBI) and the net new investment (NNI) to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital (RONIC), and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until a perpetuity value is calculated. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity



Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term, market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating is designed to capture the range of potential outcomes for a company's intrinsic value. This rating is used to assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating is

MORNINGSTAR®

Research Methodology for Valuing Companies

aimed at identifying the confidence we should have in assigning a fair value estimate for a given stock.

Our Uncertainty Rating is meant to take into account anything that can increase the potential dispersion of future outcomes for the intrinsic value of a company, and anything that can affect our ability to accurately predict these outcomes. The rating begins with a suggested rating produced by a quantitative process based on the trailing 12-month standard deviation of daily stock returns. An analyst overlay is then applied, with analysts using the suggested rating, historical rating data, and their own knowledge of the company to inform them as they make the final Uncertainty Rating decision. Ultimately, the rating decision rests with the analyst. Analysts take into account many characteristics when making their final decision, including cyclical factors, operational and financial factors such as leverage, company-specific events, ESG risks, and anything else that might increase the potential dispersion of future outcomes and our ability to estimate those outcomes.

Our recommended margin of safety—the discount to fair value demanded before we'd recommend buying or selling the stock—widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the potential dispersion of outcomes, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the Uncertainty Rating provides guidance in portfolio construction based on risk tolerance.

Our Uncertainty Ratings are: Low, Medium, High, Very High, and Extreme.

	Margin of Safety	
Qualitative Analysis Uncertainty Ratings	★★★★★Rating	★Rating
Low	20% Discount	25% Premium
Medium	30% Discount	35% Premium
High	40% Discount	55% Premium
Very High	50% Discount	75% Premium
Extreme	75% Discount	300% Premium

Our uncertainty rating is based on the interquartile range, or the middle 50% of potential outcomes, covering the 25th percentile–75th percentile. This means that when a stock hits 5 stars, we expect there is a 75% chance that the intrinsic value of that stock lies above the current market price. Similarly, when a stock hits 1 star, we expect there is a 75% chance that the intrinsic value of that stock lies below the current market price.

4. Market Price

The market prices used in this analysis and noted in the report come from exchange on which the stock is listed which we believe is a reliable source.

Morningstar Equity Research Star Rating Methodology

For more details about our methodology, please go to https://shareholders.morningstar.com

Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open. Our analysts keep close tabs on the companies they follow, and, based on thorough and ongoing analysis, raise or lower their fair value estimates as warranted.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk adjusted return is highly likely over a multiyear time frame. Scenario analysis developed by our analysts indicates that the current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. Scenario analysis by our analysts indicates that the market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

MORNINGSTAR®

Research Methodology for Valuing Companies

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environment, social and governance (ESG) factors. Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

WELLS FARGO

Price Target Change — February 22, 2023

Natural Gas LDCs

NiSource Inc. (NI)

NI: Rebuilding the Track Record—Reiterate Overweight

Our Call

Amidst various sector headwinds, we are encouraged by NI's solid 2022 results and 2% increase in '23 guidance. We view continued strong execution as key to positive re-rating in NI's P/E multiple.

Positive YE Update. Our Overweight rating is based on NI achieving a modest P/E premium to peers over the next 12-18 months driven primarily by execution on the 6-8% EPS growth plan. Considering sector headwinds tied to inflation/interest rates, we view the YE'22 update as a positive step as '22A EPS of $1.47 was a penny above the range and NI raised '23 guidance to $1.54-1.60 from $1.50-1.57. We look to the NIPSCO electric rate case and equity stake sale as the next two pieces to the puzzle.

NIPSCO Electric Rate Case. The company is engaged with key parties on settlement talks tied to the $279mm rate request (new rates September '23 with an incremental step-up in '24). The likely timeline for an agreement is late February though there could also be extensions to the March 13th hearing date, if needed. We would view the settlement path favorably, particularly considering a more challenging regulatory backdrop due to recent customer bill pressure (commodity prices).

Equity Stake Sale. NI launched the sale process for a minority interest in NIPSCO. It remains early and mgmt. is understandably tight-lipped but noted a broad range of qualified partners. While BKH's process to explore an equity stake was terminated, we note that BKH mgmt. indicated that pricing actually held up fairly well amidst rising interest rates and BKH was offering an interest in all gas utility operations vs. NI's interest in NIPSCO (electric-heavy single subsidiary, single state).

EPS Outlook & PT. We have adjusted our model based on the slightly higher '22A base and updated regulatory/capex disclosures – our new/old '23-26E EPS are $1.57/1.55, $1.70/1.72, $1.82/1.82 & $1.94/1.90 and we introduce '27E of $2.06. We raise our forward price target to $32/sh (18.5-19X our '24E EPS reflecting a 3-5% premium to peers) from $31/sh.

Investment Thesis, Valuation and Risks

NiSource Inc. (NI)

Investment Thesis

We rate shares Overweight, as we do not think NI's robust long-term infrastructure growth opportunities and supportive regulatory treatment are properly reflected in the current share price.

Target Price Valuation for NI: $32.00 from $31.00

Our $32/sh price target is based on a P/E multiple analysis (18.5-19X, a 3-5% premium to the 2023 blended gas/electric peer group multiple of 18X, on our '24E EPS).

Risks to Our Price Target and Rating for NI

Risks include lower-than-expected sales growth, unfavorable regulatory developments, unexpected cost pressures, and incidents on the gas system, which could result in shareholder liabilities.

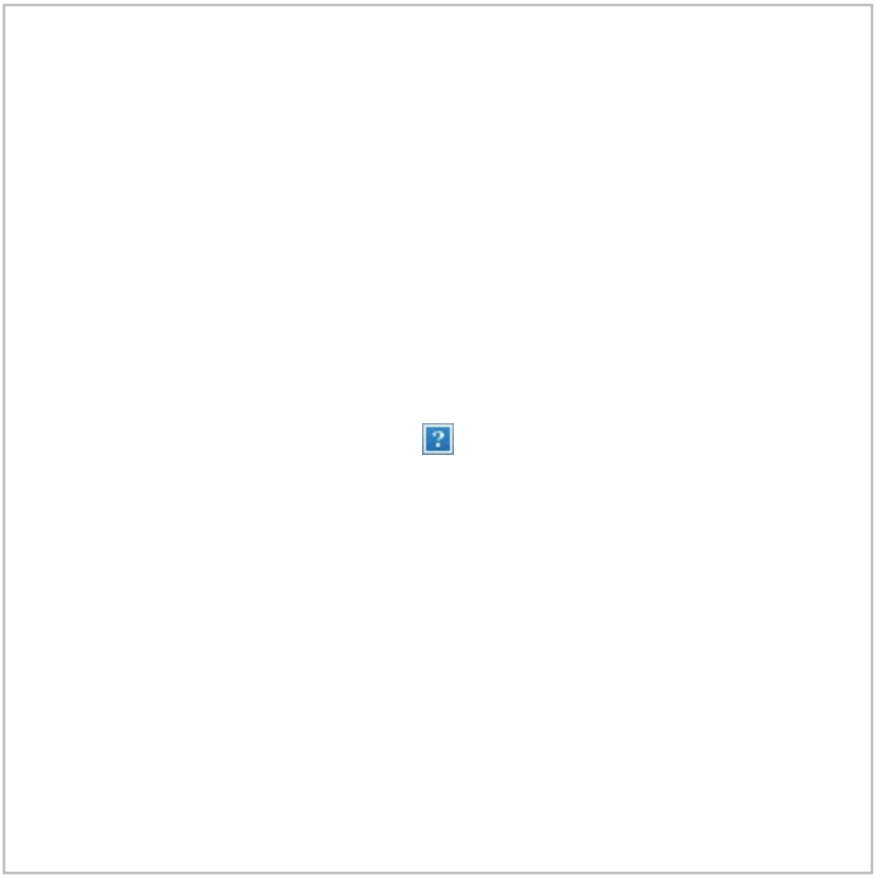
Key Message: NI delivered a small beat vs. our/consensus expectations and raised its 2023 guidance. Now, 2023 is no longer a "divot" in the 5-year growth plan but rather another year of 6%-8% growth in the company's consistent trajectory from its $1.37 base in 2021 through 2027. In our view, the guidance raise solidifies that mgmt. remains confident that a combination of capex and O&M levers will allow NI to mitigate near-term macroeconomic headwinds in 2023/2024. The NIPSCO minority interest sale process launched in 1Q23 as planned, and, despite few details currently available, we expect more updates in the months ahead. NIPSCO Electric's rate case could reach a settlement by the end of February or the following week, ahead of the start of hearings on March 13th. We remain skeptical that the variable cost tracker for

coal-fired generation costs will make it in to any stipulation, although we note that mgmt. remains optimistic – either way, we believe a settlement would be a sound win. NI's 4Q22 call offered investors a clarified LT EPS growth trajectory, examples of potential incremental capex vs. the current plan, and, in our view, demonstrated continued regulatory and strategic execution. **We reiterate BUY and our $31 PT.**

NI reported 2022 net operating EPS of $1.47 vs. Gugg/consensus at $1.45/$1.45 and '22 guidance of $1.42-$1.46 ($1.44 midpoint). The company raised 2023 guidance to $1.54-$1.60 ($1.57 midpoint) vs. prior guidance of $1.50-$1.57 ($1.54 midpoint) and previous Gugg/consensus at $1.54/$1.55. Raising 2023 guidance brought it in line with the company's 6%-8% annual growth trajectory through 2027 off of a base of $1.37 in 2021. Previously, 2023 had represented a divot, which had confused many investors we spoke with, who were unsure whether to grow ***annually*** off of 2023's previously lower numbers ***or as a CAGR off of 2021***. We now consider this issue to have been put to rest. For more, see the company's **4Q22 presentation, slide 6 HERE.** Along with LT EPS growth, NI reiterated its **8%-10% annual rate base growth rate** and **9%-11% total shareholder return target**. Mgmt. also reaffirmed the existing financing plan, including striking a NIPSCO minority interest deal in the near term and closing it in 2023, which will support the balance sheet without the need for block or ATM equity in 2023/2024. In 2025 and beyond, mgmt. expects to use NI's ATM to support the company's current investment grade credit ratings and may also use it to redeem outstanding preferred stock of $900m. Mgmt. also **maintained the company's existing 14%-16% FFO/debt target.** We are revising our 2023 EPS forecast upwards by $0.03 (to $1.57 from $1.54 previously) to reflect mgmt.'s revised outlook for the utility's 2023 earnings power. **Our EPS estimates for 2024 and beyond already reflected NI's 6%-8% growth trajectory from 2021-2027 and remain unchanged. We reiterate BUY.**

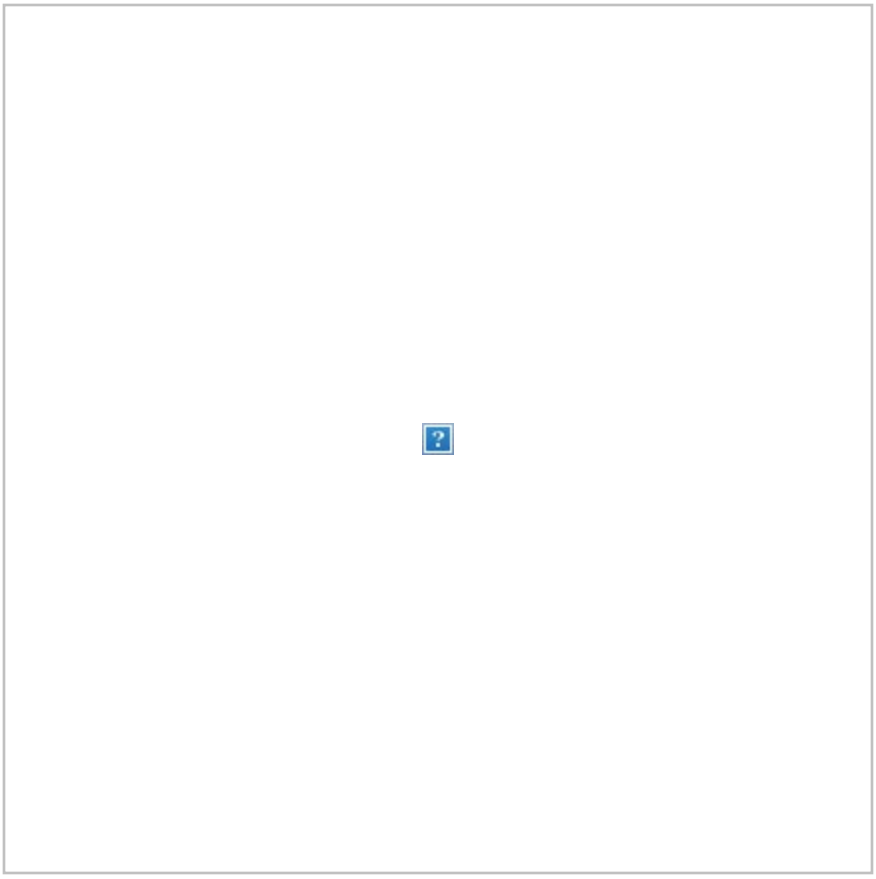


NIPSCO has already begun settlement discussions with the other parties in its Electric's general rate case in Indiana after the utility filed its rebuttal testimony on February 16th. While the official deadline to file a settlement is February 27th, mgmt. stated on today's earnings call that if discussions are progressing well, then it would not be unusual to see the timeline for a settlement extended by another week. The utility's proposed "variable cost tracker" for its coal-fired generation plants remains a point of contention with the Indiana OUCC and could prove difficult to include in a settlement, we believe, although **mgmt. remains optimistic on finding common ground**. For background on this case, investors should recall that NIPSCO Electric filed its current rate case in September 2022 with the utility seeking an aggregate $291.8m base rate

increase that would be implemented in FY23 and FY24. The first step rate change in the multiyear rate plan would be a $234.6m increase based on a 10.40% ROE vs. 9.75% currently authorized **and our modeled assumption of a 9.00% earned ROE**. NIPSCO is also asking for a 51.41% equity layer vs. 47.86% in the utility's last rate case. This would result in a 7.07% return on a $5.642bn rate base. Rates would take effect shortly after the Indiana Utility Regulatory Commission (IURC) issues its final order, which we would expect to occur around September 1, 2023. The second rate increase of ~$57.1m is also based on a 10.40% ROE ask **(compared to our 2024 earned ROE assumption of 9.1%)** as well as a 51.63% equity layer, resulting in a 7.10% return on a $5.946bn rate base (forecasted as of December 31, 2023), and would be implemented March 1, 2024. Should the company's requested "variable cost tracker" for its coal-fired generation plants end up being approved, an additional increase would apply in July 2024. However, if the variable cost tracker is rejected, NIPSCO would instead support a $395m rate increase.

Capex (primarily electric generation investment) is being pulled forward from 2024 into 2023, as below. NI now expects to invest $3.3bn-$3.6bn in 2023 (vs. $2.8bn-$3.1bn previously) and $2.6bn-$2.9bn in 2024 (vs. $3.0bn-$3.3bn); 2025-2027 capex guidance remains unchanged. Mgmt. clarified that there had not been any increase to the capex plan at this point, suggesting that the slight uptick in aggregate spending is likely due to rounding. Looking out through its current 5-year planning horizon, NI does in fact see potential for incremental capex and laid out the following near-term investment opportunities that it believes can enhance its current investment plan:

- New gas system modernization programs focused on replacing **legacy plastic mains** and services installed prior to 1985
- Gas transmission programs focused on **inspection retrofits and reconfirmations to comply with PHMSA regulations**
- New programs to deploy **advanced metering infrastructure (AMI)** for gas systems
- **Increased ownership of electric generation** investments utilizing the IRA's tax transferability provision



NI 2023–2027 capex plan changes

Source: Company materials, Guggenheim Securities, LLC analysis.

Mgmt. confirmed that the NIPSCO minority stake sale process kicked off in 1Q23 as planned but had fewer details to share at this point regarding buyer interest and whether the targeted 2H23 closing date could potentially shift. Investors should recall that this sale is unique in that: **1)** it does not require any regulatory approvals, **2)** management has expressed an expectation of having minimal tax leakage at the 19.9% stake level, and **3)** it has a successful recent precedent for the company to point to in the form of **DUK**'s transaction, where it sold a similar 19.9% stake of its Duke Energy Indiana (DEI) utility subsidiary to Singapore-based GIC. **We continue to believe a deal is worth in the range of $2.6bn-$3.1bn (see our note HERE for more)** with equity values of 50% of those figures, as per the company's methodology of reporting rate base for Indiana due to its treatment of deferred taxes. We await further updates from the company on how the transaction is progressing.

NI EPS: Guggenheim and consensus forecasts

Source: Company reports, Bloomberg, and Guggenheim Securities, LLC estimates.

Valuation

We value NI as a regulated utility, arriving at our $31 price target using our regulated group multiple of 17x, with a premium applied to the electric business to reflect top-quartile rate base growth through the forecast period as well as incremental growth opportunities and strategic initiatives that aren't currently being captured in our estimates and applying those multiples to 2025 fundamentals. We value the company via SOTP and (1) attribute a 2.0x premium on NIPSCO Electric, reflecting strong renewable-driven rate base growth, and (2) do not apply a discount to the gas business due to NI's guidance of zero O&M increases from 2022-2027 despite ongoing inflation. Applied together to our 2025 $1.82 EPS estimate and discounted back by 1 year, we arrive at our 12-month $31 PT.

Risks

Primary risks to our thesis include an underwhelming valuation for NIPSCO's minority stake sale or no sale at all as well as traditional risk factors inherent with all regulated utilities, including: (1) rate case risk, (2) potential for a lower capex outlook, and (3)

interest rate changes above/below what we account for in our regression model.

Outperform	$26.95
Price Target:	**% Upside:**
$30.00	11.3%
Prior: $28.00	

The Wolfe Byte

2022 EPS came in above the top end of guidance and NI raised its 2023 outlook to $1.54-1.60 from $1.50-1.57. NI reaffirmed its annual 6-8% EPS growth target off the higher 2023 guide. Mgmt sounded upbeat on possibly settling its key Indiana electric rate case.

2022 beats and 2023 guidance raised. NI reported 2022 EPS of $1.47 — ahead of us/cons at $1.45 and above its $1.44-1.46 range. The strong performance was aided by continued execution in the regulatory arena as well as a focus on O&M. NI raised its 2023 guidance to $1.54-1.60 from $1.50-1.57, which was ahead of prior cons $1.54. NI's 6-8% annual EPS growth target through 2027 was reaffirmed off the higher 2023 guide, suggesting 2024 EPS of $1.68 vs prior cons $1.66. Separately, NI's renewable projects remain on schedule and the recent decline in nat gas is expected to drive 20-25% bill savings in 2023 vs 2022. NI O/P the UTY by 300bps on the update.

Active settlement talks in NIPSCO case. NI mentioned that it was in active settlement discussions with intervenors in NIPSCO's rate case. Evidentiary hearings are due to start on 3/13 and mgmt was optimistic that it could file a settlement or request to delay hearings to further talks in the coming weeks. Key items being hashed out include O&M, ROE and NI's

proposed variable non-labor coal expense rider; there is effectively no debate on rate base additions.

NIPSCO minority sale underway; we expect a good price. NI formally kicked off the process in Q1 and noted a broad level of interest thus far. It is possible there could be an announcement around midyear and NI expects to close the transaction by YE. We currently assume a 19.9% stake is sold for 2.2x book equity, yielding ~$2.2B in tax-free proceeds. This is in-line with what DUK got for its IN stake sale, though we think NIPSCO could ultimately fetch a better price.

PT up to $30. We are raising our 2023E to $1.58 from $1.54 and our 2024E to $1.68 from $1.67 following today's update; our 2025E is unchanged. Our PT moves up to $30 from $28 after rolling forward our valuation year to 2025 and due to the rise in gas LDC multiples (now slight premium vs electrics). We target group averages for NI and see good value in the stock at this level — reiterate Outperform.

Onward and Upward

Key 4Q22 Takes:

- NI reported Q4 adjusted diluted Net Operating EPS (NOEPS) of $0.50 vs. our estimate/street consensus of $0.48.
    - 2022 EPS of $1.47 is slightly above the high end of $1.44-$1.46 guidance range, +7.3% growth vs $1.37 in 2021
- Increased 2023 NOEPS guidance range to $1.54-$1.60 from $1.50-$1.57, $0.03 or 2% higher at the mid-pt.
    - Midpoint of $1.57 represents 6.8% growth off 2022 NOEPS. Consensus is at $1.54.
- Reaffirmed annual NOEPS growth of 6-8% through 2027.
    - Off the 2023 earnings forecast range of $1.54-$1.60.
    - Implied 2024 EPS at the mid-pt of $1.68 vs our estimate/consensus (going into the print) of $1.65/$1.66 respectively
    - Implied 2025 EPS at the mid-pt of $1.80 in line with our estimate/consensus of $1.80
- Reaffirmed $15B 2023-2027 capex plan with ~75% of investments beginning earning in less than 18 months.
    - Still project 8%-10% annual utility rate base growth through the forecast period
- Northern Indiana Public Service Company (NIPSCO) minority sale process launched and on track for 2023.
- NIPSCO is actively working with stakeholders toward a settlement in the electric rate case filed on September 19.
- Lower gas prices are projected to reduce customer bills by 20-25% in 2023 vs 2022.

Maintaining our Outperform rating and $31TP (details within)

Additional Details:

- **Minority Interest sale:** In Nov, NI announced minority interest sale of NIPSCO (up to 19.9%) in a tax efficient transaction to strengthen the balance sheet, which is expected to be completed in second half of 2023. The company has initiated the sale process, and we expect an announcement by mid-year and close by year-end. We estimate $1.5-$2B in cash proceeds.

© 2023. Evercore Group L.L.C. All rights reserved.

This report is prepared solely for the use of Michael Weisenburger

- **NIPSCO Electric rate case:** On Sep 18th, NIPSCO Electric rate case was filed in Indiana, requesting rate increase of $292M net of infrastructure trackers with a 10.4% ROE and 58.5% equity ratio on a rate base of $5.95B. Company filed rebuttal testimony on February 16th. The company is actively working with stakeholders toward a settlement and expects to receive a final order in 3Q2023. Rates will go into effect in the fall of 2023 and the second tranche will become effective in spring of 2024.
- **OH gas rate case**: On Oct 31st, 2022, Columbia Gas of Ohio filed a settlement representing a $68.2M revenue increase with 9.6% ROE and 50.6% equity layer. The company originally requested $221MM with ROE of 10.9%. The equity ratio request of ~51% was not disputed. NI currently has an allowed ROE of 10.4% and equity ratio of 51% in Ohio. Hearings were held on Nov. 16, 2022, and the commission approved the settlement in January 2023 for new rates that will go into effect in March.
- **Virginia gas rate case**: On Dec 9th, Columbia Gas of Virginia reached a settlement with $25.8 million rate increase, inclusive of SAVE (Steps to Advance Virginia's Energy Plan) infrastructure tracker ($14.5MM), representing a settlement as to a specific revenue number but not as to a specific ROE. Recall that NiSource requested $40.6MM revenue increase net of the SAVE infrastructure tracker ($17.7MM) with a 10.75% ROE and 39.3% equity ratio on a rate base of $1.0B with a 12/21 test year. A final order is expected in 1Q23.
- **2023-2027 financing plan unchanged:** Dividends and capital investments funded through cash from operations, minority interest sale, $4.5-$5.5B new debt and ATM in 2025+.
- **Target Price**: Maintaining our Outperform rating and our target price of $31/share. We are updating our 2023/2024/2025 EPS estimates to $1.57/$1.69/$1.80. See our base case SOTP valuation of $31 on Exhibit 1. We apply a conservative 5% premium to our peer target 17x multiple for the electric business, which we estimate will grow rate base by 8-10% through 2027 versus peers at 6-7%. Our base case for the LDCs applies an in-line gas multiple, now of 16.8x 2025 EPS as we mark to market comparable trading multiples. Our bear case in Exhibit 1 below derives $26/share valuation assuming NI can grow EPS at 6% using low end of 2023 guidance range of $1.54, while our bull case is $33/share assuming the company can grow at 8% using high end of 2023 guide of $1.60.

Exhibit 1: NiSource SOTP Valuation

Base

Base Case	'25 EPS	P/E	Val/Shr
Gas EPS	$1.35	16.8x	$22.73

VALUATION METHODOLOGY

We use a SOTP analysis to arrive at our price target

RISKS

Risks to our thesis include an inability to deploy capital at the company's expected rate resulting in a lower rate base and regulatory pressure resulting in lower allowed ROEs

2023 Guidance Raise, Eyes on NIPSCO & Renewable Execution

22 Feb 2023 16:50:57 ET

ESG Matrix

Request Company Model

CITI'S TAKE

With M&A speculation premium out of the stock, NiSource continues to execute on renewable projects, NIPSCO rate case, and NIPSCO minority sale. We see NIPSCO transacting at 1.9x rate but are concerned that some of the renewable projects could slip again (although only modestly).

2023 Guidance Raise — 2023 EPS guidance was raised to $1.54 to $1.60 due to regulatory outlook, O&M and financing plans. We are conservatively assuming the low end of the range for 2023 given our business outlook view.

Indiana Renewable Delay Risk — NiSource management continue to expect COD of Crossroads Solar and Dunns Bridge Solar I in 1H23, but our view is that there remains some timeline risk given global supply chain (risk more that it slips into 2H23). We are less concerned about Indiana Crossroads II Wind, and Dunns Bridge II and Cavalry Solar (now reflected revised contracts details). The management team reaffirmed the timelines but noted that several supply agreements were amended (Nisource seeing 10-25% cost inflation for projects) and there remains some timeline execution risk given interconnections and supply chain challenges. Full details on the amended contract details weren't disclosed given the contracts confidential nature.

Indiana Minority Interest Sale Remains on Track — As NiSource starts to go to the market, we expect the valuation of this high growth asset will transact at ~1.8-1.9x YE2023 rate base as it is a higher growth business but is a non-control stake. As of November, data rooms hadn't been formed but it is not clear how much in any progress has been made. The company is formally saying the deal will close in 2023 but choppy deal market adds to investor concerns around process (might be good for stock if strategy were to evolve given market response to initial plan announcement).

Rate Case Update — Management is actively looking to settle the case as the remaining points of negotiation are O&M and ROE ahead of the scheduled start of hearings on March 13, 2023. The formal company request 10.4% ROE and 58.5% equity component and $291.8M revenue increase request. We don't expect the capex or 58.5% equity component to change much at this point. An order is expected in 3Q23 with rates proposed effective September 2023 if no settlement. This is the first GRC since 2018 and the company is actively engaging stakeholders. O&M outlook remains fluid as inflation expectations continue to evolve.

NiSource Inc

Company description

across seven states through its two main business segments, including 1) Gas Distribution, which delivers natural gas in several states, and 2) Electric Operations, which consist of NiSource's regulated electric utility, Northern Indiana Public Service Company (NIPSCO).

ESG Matrix

Request Company Model

Investment strategy

We rate the shares of NiSource (NI) Neutral (2). We believe that NI's long-term earnings are relatively stable due to diverse operations areas and constructive regulatory jurisdictions. Our estimates do not include 1) substantial industrial load growth at the utilities; 2) colder-than-normal weather and faster-than-average customer growth; or 3) slower than typical timeline in regulatory filing and approval process for new infrastructure projects and cost recovery mechanisms.

Valuation

We average multiple valuation methodologies to derive our $30 target price. Our NAV yields a value of $32. We value regulated assets at a multiple of 1.5x rate base. These values are partially offset by the company's net debt. Our DDM, which incorporates our rate base growth assumptions, values the company at $30 per share. Our P/E and EV/EBITDA analyses yield values of $32 and $29, respectively.

Risks

The key risks to our investment thesis are as follows: (1) Rate Cases – We estimate the company will receive rate relief at several of its utilities. Under- or over-estimation of relief could materially impact our estimates. (2) Weather – Changes in weather impact the stability of earnings. (3) Capital Investment Recovery — NI spends a substantial amount of capital to maintain and expand its distribution system. NI depends on rate increases from public utility commission to earn a fair return on this expansion. (4) Capital Markets — Access to cheap capital markets could be limited due to the size of the company. If the impact on the company from any of these factors proves to be greater/less than we anticipate, it may prevent the stock from achieving our target price or could cause the stock price to materially under/outperform our target.

ANALYST CERTIFICATION

The research analysts primarily responsible for the preparation and content of this research report are either (i) designated by "AC" in the author block or (ii) listed in bold alongside content which is attributable to that analyst. If multiple AC analysts are designated in the author block, each analyst is certifying with respect to the entire research report other than (a) content attributable to another AC certifying analyst listed in bold alongside the content and (b) views expressed solely with respect to a specific issuer which are attributable to another AC certifying analyst identified in the price charts or rating history tables for that issuer shown below. Each of these analysts certify, with respect to the sections of the report for which they are responsible: (1) that the views expressed therein accurately reflect their personal views about each issuer and security referenced and were prepared in an independent manner, including with respect to Citigroup Global Markets Inc. and its affiliates; and (2) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in this report.

IMPORTANT DISCLOSURES

Citigroup Global Markets Inc. owns a position of 1 million USD or more in the debt securities of NiSource Inc.

IN Fact

De-risked Story With Solid 4Q22/FY22 and Raised FY23 Guidance

James M. Thalacker • Utilities, Power & Renewables
(212) 885-4007

Bottom Line:

With a solid quarter to wrap 2022 and 2023 guidance raised, we view the story as largely de-risked in the near term. This positive release and outlook were reflected in the ~290bps relative outperformance in its shares today. With the above-average growth prospects, balance sheet enhancement, and a relatively de-risked regulatory agenda with ongoing settlement discussions in the NIPSCO electric rate case, we believe the stock remains attractive at a ~3-4% discount to the group even after today's outperformance. We reiterate our Outperform rating and target price moves to $31.

Key Points

NiSource reported better-than-expected 4Q22 earnings with operating EPS of $0.50 which was above BMO and Street estimates of $0.48. Management raised its 2023 non-GAAP diluted net operating earnings per share (NOEPS) guidance to $1.54-1.60 (prior range of $1.50-1.57) with a midpoint of $1.57. The company reaffirmed its 2023-2027 capital program at ~$15bn level that drives 8-10% rate base growth, and it continues to expect annual NOEPS of 6-8% through 2027.

NiSource finished the year with FFO/debt at 13.5% vs. the 13% downgrade threshold.

However, we note that deferred fuel balance was weighing on the metrics to the tune of 54bps (albeit down from 76bps in the year prior). On a normalized basis, the FFO/debt ratio was closer to 14% and management expects that metrics will continue to improve into the 14-16% range with metrics at the top end of the range after the company executes the NIPSCO minority interest sale. We view the balance sheet strength represented by the ~300bps cushion above the downgrade threshold expected to be generated in the near term as a significant positive differentiator to peers in the current environment.

We view the various regulatory developments on the electric and gas side as positive de-risking events for the company, particularly the NIPSCO electric rate case settlement talks and OH gas rate case order. Additionally, with natural gas prices declining, management noted that it expects customer bills to be down 20-25% in 2023 due to favorable natural gas prices, which should provide additional bill headroom to support the company's capital programs.

We maintain our Outperform rating given the company's current discount to the peer group as we believe valuation does not adequately reflect the de-risked regulatory environment, 6-8% EPS growth rate, or the balance sheet strength. Our 2023-2025 estimates remain unchanged at $1.54, $1.67, and $1.78, respectively.

Wolfe Utility & Midstream Materials: Utility Comps, Utility Stock Charts, Midstream Comps, Midstream Stock Charts, Clean Energy Comps, Valuation Charts, Models

Utilities

NI – PUCO approves rate case settlement; $68.2M base rate increase, 9.6% ROE and 50.6% equity ratio

- Yesterday, the Public Utilities Commission of Ohio (PUCO) approved NI's settlement agreement for its gas rate case in the state
  - Signatories included PUCO Staff, Consumer Counsel, industrial groups, and others
- PUCO approved the proposed $68.2M base rate increase net of trackers (+7.38%) using a 9.60% ROE, 50.6% equity ratio and 3,505M rate base
- Also, NI's Infrastructure Replacement (IRP) and Capital Expenditure Program (CEP) riders will continue for capital placed in service through 2026, where the expectation is that it would file its next rate case in OH on or before 9/1/27
- New rates will become effective immediately

It is nice to see the case finally get wrapped up as it was quite drawn out, taking 18 months in total to complete. The outcome here was already baked into the plan that NI unveiled at its Analyst Day in November.

AEE – Staff raises recommended rate increase by $52M in MO rate case, helpful to see bid/ask narrow ahead of settlement talks

- Earlier this week, the MoPSC Staff, a key intervenor, raised its recommended increase in AEE's MO electric rate case to $199M from $147M earlier this month, based on revised fuel/purchased power costs, fuel adjustment clause expenses, Rush Island coal plant availability, build transfer expenses, capacity sale/expenses and income taxes.
- Both the updated and initial recommendations include a $128M true-up allowance, 9.34-9.84% ROE, and 51.8% equity ratio; the updated recommendation added ~$50M to rate base ($10.5B from $10.4B, as of 6/30/22).
- AEE's request of $316M is based on 10.2% ROE, 51.9% equity ratio and $11.6B rate base, all estimated for 12/31/22.
- The procedural schedule includes a settlement conference starting 3/6 and evidentiary hearings starting 4/3.

- In Dec 2021, the MoPSC approved a black box settlement in Ameren MO's last electric case, which included a $220M rate increase on a $10.2B rate base but did not specify an ROE range.

Staff's updated testimony continues to include a true-up allowance, which is intended to estimate what the recommended increase will be when Staff updates for 12/31/22. We think the narrowing bid/ask spread helps ahead of settlement talks in early March; AEE has settled the past three MO rate cases, generally ahead of evidentiary hearings.

XEL – A track record that is now military eligible
Click here to view our complete note
FY22 in-line, execution streak continues; 2023 guide reaffirmed. XEL posted FY22 EPS of $3.17 which was in-line with us/cons and marked its 18 consecutive year of meeting/beating guidance (14th at/above the midpoint). 2023 guidance of $3.30-3.40 was reaffirmed, though some drivers were updated. Notably, O&M is now expected to be down 2% vs flattish before. Most of this is just a function of where 2022 ended as there some pull forward due to favorable weather. We are at $3.36 for 2023 vs consensus at $3.38.

Midstream

LNG Sector - Freeport cooldown approved by FERC; could see restart in coming weeks

- Yesterday FERC approved Freeport LNG's request to start the cooldown of the trains, a key step in restarting the facility
- Freeport had made the request earlier in the week
- Initial gas flow to facilitate the cooldown have commenced

Freeport will still need formal PHMSA and FERC approval for a restart but the cooldown is a good sign that Freeport could restart in the coming weeks. The news didn't appear to have a meaningful impact on gas prices but there have been a lot of stops and starts in the Freeport process; once it is up and running we estimate the facility would represent about 2 Bcf/d of demand.

Clean Energy

Solar trade tensions – U.S. resolution seeks to reverse Biden 2-year AD/CVD pause; China seeking comment on ban on exporting wafer technologies

- Several Congressmen yesterday from both parties introduced a resolution under the Congressional Review Act to reverse the Biden's administrative 2-year pause on new tariffs on China related to solar imports from 4 Southeast Asian countries (AD-CVD)
    - Recall, back in December the Department of Commerce issued a preliminary determination that 4 of the 8 companies being investigated were circumventing tariffs on China by doing minor processing in the Southeast Asian countries
    - President Biden made a Presidential Proclamation that would pause any new

tariffs on this matter until June 2024 at the earliest

- Separately, Bloomberg reports that China's Ministry of Commerce and Ministry of Science and Technology are seeking public comment on adding some wafer manufacturing technologies to its list of technologies that are prohibited from export
    - Chine is said to account for 97% of the global output for solar wafers

Our initial take is that the resolution to reverse the Biden 2-year pause seems unlikely to pass given the disruption that would create to a sector that benefits both Democratic and Republican states, although our understanding is it only requires a simple majority to pass. On the China technology export review, there aren't many details at this point, but the consequences of a wafer technology export ban by China could be detrimental to the pace of solar additions globally. China is clearly looking to slow down the speed with which other countries can compete. This potential move is undoubtedly a response to the Inflation Reduction Act in the U.S., as well as new programs in India and proposals in the EU to incentivize domestic solar manufacturing. Bottom line, there continue to be trade tensions across solar manufacturing, and this is positive for FSLR as the only material domestic manufacturer in the U.S.

NY offshore wind – At least five bidders into state's third RFP; Ørsted/ES JV bid but shouldn't impact ES' sale

- Ørsted and ES, who have a 50/50 offshore wind JV, were among at least five bidders in NY state's third offshore wind RFP for at least 2 GW and up to 4.2 GW.
- The Ørsted/ES JV did not state the capacity. But like other bidders pointed to economic and job development, creation of supply chain hubs, and the like.
    - The JV has 1,758 MW of contracted offshore under construction and up to 175k of undeveloped lease acres open for additional offshore wind development.
- RWE and National Grid's Community Offshore Wind said their bid was 1.3 GW but was not specific on the potential investment, saying that it would deliver $3B to the NY economy. RWE/NatGrid won 126k of acres in last Feb's NY Bight auction, which has the potential for up to 3 GW.
- Equinor, which won all of the capacity in NY's second offshore wind RFP, also bid with their partner bp. Other bidders were industry newcomer Invenergy and CIP, who told *Recharge News* it bid through its Vineyard Offshore.
    - The avg all-in development cost for Equinor's Empire Wind 2 (1260 MW) and Beacon Wind 1 (1230 MW) projects in NY's second RFP in 2020 was $80.40/MWh.
- 1/26 was the last day to bid, and NYSERDA is expected to announce the winners by end of 1Q23 with contracts executed by end of 2Q23.
- NY targets at least 9 GW of offshore wind by 2035; five projects totaling over 4.3 GW are under development.

NY's third RFP could be the largest offshore wind solicitation in the US. Given the high NY Bight prices (~$9k/acre), supply chain/inflation, and cost of capital, the outcome will be interesting, as there still looks to be robust competition. Regarding ES' pending sale of its share in the Ørsted JV, we don't see the NY bid impacting the timing. We continue to believe

ES won't announce the buyers of its projects and undeveloped lease areas until later this quarter or possibly early next.

New homes sales – December sales +2.3% MoM but -26.6% YoY; key West region particularly weak

- Wolfe's Homebuilder Analyst Truman Patterson had a note out last night (**here**) on December's new home sales (NHS) data
- December NHS were up +2.3% from November but declined -26.6% on a YoY basis (seasonally adjusted)
- The NHS data showed negative sequential declines for two of the largest markets for rooftop solar – Northeast -19.4% and West -15.3% (not seasonally adjusted)

We highlight this data given the impact to the solar installers who rely on new homes sales for a percentage of their annual solar additions. Recall, within our coverage SPWR has the most New Homes exposure (~20%-25%) followed by NOVA (~10%-15%) and RUN (<5%). The -15.3% decrease in the West region is most troubling as it includes California where there is a mandate for solar installations on all new homes built and the state represents most of the New Homes exposure for the installers. The one positive is that December sales historically only account for ~7% annual NHS.

Utilities

NI – Announces leadership changes/additions; Shawn Anderson to move into the role of CFO

- This morning, NI announced that Michael Luhrs will join on 3/27 as the company's EVP of strategy & risk and Chief Commercial Officer.
    - Luhrs previously served as SVP of customer experience & strategy at LNT. Prior to that, he held numerous positions with DUK and has ~25 years of energy industry experience.
- Shawn Anderson, currently SVP of risk and Chief Strategy Officer, will assume the role of EVP and CFO.
- Donald Brown, NI's current CFO, will move into the role of EVP and Chief Innovation Officer, replacing Melody Birmingham.
- Melody Birmingham has been named as NI's EVP and Group President of Utilities.

We view this as part of normal management rotation and development. Shawn has been presenting to investors for several years so we think the transition to CFO will be smooth. CEO Lloyd Yates continues to bring in former colleagues from his time at DUK.

AWK – EPA proposes rules to limit PFAS chemicals in drinking water; worth monitoring

- Yesterday, the EPA issued proposed regulation that calls for a maximum contaminant level (MCL) for two PFAS – PFOS and PFOA – of 4 parts per trillion (ppt) each.
    - EPA is also proposing four additional PFAS – PFNA, PFHxS, PFBS, and GenX – to have a combined hazard index limit of 1.0.
- 10 states already have enforceable limits on some PFAS chemicals in drinking water; if finalized, the EPA's limits would supersede state regulations that had set less stringent thresholds.
    - For reference, PA and NJ (two of AWK's largest jurisdictions) have MCL standards for PFOA/PFOS in the mid-teens ppt range.
- The proposed regulation will now undergo a 60-day public comment period, after which EPA will either modify and recirculate it for additional comment or continue the adoption process.
    - The agency has indicated that it aims to finalize the regulation by the end of 2023.
- If adopted as is, water providers/utilities would need to comply with the final regulation within three years of the date of adoption (implying an end of 2026 timeframe at present).
- The EPA has estimated the annual cost of implementing the rule to be $772M for public water systems.
    - The American Water Works Association (industry group) has estimated that such limits for two chemicals would cost water systems $40B (over time) to comply with the rule.

While setting a national standard for PFAS provides clarity, there remain questions over who will bear the costs of treatment and ultimate impact to customer bills. Several water utilities, states, and local communities have already filed lawsuits against companies that manufactured/used PFAS, seeking to recover costs for cleanups and filtrations. The EPA is also initiating the distribution of $10B in funding to address emerging contaminants under the Bipartisan Infrastructure Law. While this creates some uncertainty but it also presents opportunity. Rate base investments to comply with PFAS regulation would be recoverable in rates and this rulemaking could potentially accelerate tuck-in acquisitions if municipal systems are unable to make investments to meet federal limits. We will be looking for mgmt. commentary on this proposed regulation on AWK's Q1 earnings call and curious to know how it would affect the capital plan, if adopted as is.

Midstream

FERC Liquids Pipeline Index – Preliminary February data is flat vs. January

- This morning, the U.S. Bureau of Labor Statistics released its preliminary February PPI data
- The February 2023 Final Demand-Finished Goods PPI reading of 254.187 was flat from January and a 6.4% increase from February 2022
    - Note, PPI-FG (used for the pipeline index) is a different measure than headline "PPI" often reported in the press
- As a reminder, midstream liquids pipelines often have a natural hedge to inflation via their regulated rate structures – the FERC liquids pipeline index applies an "annual changes in PPI-FG + adder" methodology
    - The FERC ceiling rates will increase by 13.3% in July 1, 2023 based on changes in 2022 PPI
    - Looking forward, the annual increase in 2023 PPI - 0.21% will be added to regulated liquids pipeline ceiling rates for the July 1, 2024 to June 30, 2025 period

Inflation has been a good story for midstream and we see MMP, PAA, and TRGP as the most clear net beneficiaries to date. Looking forward, PPI-FG has now been pretty flat since mid-2022. If this trend continues through yearend, then FERC ceiling rates should see much smaller increases in mid-2024.

Clean Energy

ENLT – 2023 EBITDA guidance beats net of acctng change, increase in near-term projects and total portfolio; large projects mostly on track

- **2022 EBITDA beats.** $130M vs $123M consensus, $126M WRe (results exclude $18M from projects treated as financial assets; WRe is $144M with the $18M).
- **2023 EBITDA guidance beats.** $188-198M (excludes $15M from financial assets) vs $172M consensus, $186M WRe (WRe is $204M when including $18M for financial

assets).

- **Increase in Mature Portfolio.** 4.5 GW capacity and 2.7 GWh of storage vs 4.0 GW and 2.1 GWh previously; Mature Projects are those operational, under construction or expected to begin construction within 12 months.
- **Increase in Adv Dev Portfolio.** ENLT now includes 4.2 GW capacity and 10.0 GWh of storage in its Advanced Development portfolio vs 3.8 GW and 7.3 GWh previously; Adv Dev projects are those expected to begin construction in the next 13-24 months.
- **Total Portfolio, including Mature Projects and entire backlog, rises.** 18.9 GW capacity and 20.6 GWh vs 18.6 GW and 19.4 GWh previously. 8.4 GW have completed system impact studies in the US for interconnections (60% of US portfolio)
- **885 MW of additional PPA amendments under negotiation.** ENLT amended PPAs for 988 MW of capacity and 1.2 GWh of storage in 2022, with price changes of 17-25%.
- **Large projects mostly on track; Co Bar project increased, expected COD in 2025.** Atrisco (360 MW, 1.2 GWh) in NM still expected to COD in 1H24, with financial closing 2Q23. Gecama solar and storage addition in Spain still expected COD by YE24. CoBar cluster in AZ increased in size to 1.2 GW capacity and 824 MWh of storage from 580 MW of capacity previously, after last year's acquisition; COD for entire cluster is 2025.

Net of the accounting change, the results were better than expected and it was good to see an increase in the near-term, highly-visible projects, which should be COD by 2025. ENLT said the Mature Projects are on track and potential PPA amendments under negotiations are expected to result in 20-25% price increases. We recently initiated on ENLT's US listing; see **note**.

NOVA – Announces free battery offer in CA to counter NEM 3.0

- This morning, NOVA announced that the company will be providing a free battery, valued at $8k, to new CA customers who sign a solar+storage lease agreement.
- The offer is in response to NEM 3.0 implementation, which takes effect on April 15th, and will help customers maximize their solar investment.
- The free battery offer is only available to new customers who sign up for a residential solar+storage lease agreement under the Sunnova Easy Plan and does not include the cost of installation, the solar system, or the 25-year Sunnova Protect.

NOVA's battery giveaway is an interesting development in the race to position for NEM 3.0. We expect that incremental servicing revenue could offset much of the $8,000 battery cost. Recall that RUN announced a new NEM 3.0 optimized storage offering on their 4Q call which, to us, implied a scaled down storage system but not necessarily one with embedded discounts.

Comps, **Midstream Stock Charts**, **Clean Energy Comps**, **Clean Energy Stock Charts**, **Models**

Utilities

NI/CNP/DUK – Electric service reliability bill passed in Indiana's house; plant retirement-related provisions not expected to impact fleet transition plans away from coal

- Yesterday, IN's House of Representatives passed **SB 9**, which deals with electric utility reliability.
- This bill would require a public utility, through 7/1/26, to provide the IURC will at least 6 months of notice if it plans to retire, sell, or transfer a generating facility of at least 80 MW capacity if:
    - A) That plant retirement isn't outlined in its most recent IRP; or
    - B) If the utility intends to accelerate that plant retirement vs. the date set forth in its latest IRP.
- The IURC would be authorized to consider plant retirements under the aforementioned conditions, whilst not being mandated to investigate.
- This legislation would also require the IURC to prohibit granting accelerated depreciation if a retirement/sale/transfer wasn't included or is set to take place earlier than specified in an IRP.
    - But the IURC may permit accelerated depreciation if it finds that such an adjustment is necessary for a utility to provide reliable service and unamended depreciation rates would cause an unjust/unreasonable impact on the utility & its ratepayers.
- SB 9 also amends the federal mandate statute to provide greater clarity for recovery of pre- and post-regulatory petition costs related to federally mandated projects.
    - This includes costs that a utility has incurred, or estimates that it will incur, in connection with a compliance project – coal ash clean-up costs, for example.

We **don't** anticipate this bill to have a major impact on fleet transition plans in Indiana, as in-state IOUs have indicated coal plant retirements in their IRPs. Recall, NI secured depreciation schedule approval for coal retirements in NIPSCO's previous rate case, with minor modifications made in the current rate case's settlement agreement that was recently filed; CNP chose to securitize its first tranche of coal retirements vs. requesting for accelerated depreciation. The provision related to recovery of federally mandated costs is more supportive to utilities vs. status quo and good to see. SB 9 has broad support in the state and is expected to be implemented.

AEP – OH state lawmakers propose repeal of OVEC subsidies

- This week, two Democratic state lawmakers in OH proposed legislation – HB 120 – that would repeal HB 6, which includes subsidies for OVEC.
- OVEC is OH Valley Electric Corporation and operates two coal plants. AEP, DUK, AES OH and others own OVEC. In 2018, PUCO approved subsidy requests from AEP, DUK and AES through a Legacy Generation Rider. For instance, AEP has OVEC recovery

through 2024.

- The two Dems were joined by other co-sponsors, including Rep Merrin (R), who almost became House speaker late last year but lost out to current Speaker Stephens (R). Rep Merrin told the media earlier this week: "I never supported the subsidies in HB6, I voted to remove the green energy mandates. But I'm all for getting rid of the subsidies...I think there's enough support between the House Republicans and the Democrats that are on the bill to push it through the house, whether [current Speaker Stephens] supports it or not."
- Gov. Mike DeWine (R) has said the coal subsidies should be repealed.
- The OH legislative session adjourns 12/31/23.

For AEP, the OVEC rider historically has brought in roughly $40M/yr (~$0.07/sh). If eliminated, that would be a modest headwind.

ED – Moody's affirms credit rating and revises outlook to positive from stable; expects improvement in FFO/D to 17% from ~14% in 2022 if CECONY's settlement is approved; good to see

- Yesterday, Moody's affirmed ED/CECONY's senior unsecured debt ratings at Baa2/Baa1 and changed its outlook to positive from stable.
    - Moody's cited the prospects for financial metric improvement following the filing of a joint settlement proposal in CECONY's electric/gas rate cases as its rationale.
- If the NY PSC were to approve rates similar to those in the joint proposal, Moody's estimates that ED/CECONY could generate CFO pre-WC to Debt ratios above 17%.
    - This represents a substantial improvement from ~14% that each produced in 2022, as per Moody's.
- Moody's views the joint proposal as evidence of ED's more cooperative stakeholder/customer relationships, improving regulatory/political relationships, and NY's recovery from COVID-19.
- Moody's also considers COVID-19 arrears recovery, which was initiated through the NY PSC's Phase 1/2 orders in Apr. 2022/Jan. 2023, as credit positive.
    - This recovery consists of state funds applied to a portion of customer arrears balances & surcharge mechanisms to address ~$780M of outstanding CECONY arrears over 10 yrs.
- Moody's noted that ~$1.25B of CEBs' sale proceeds used to retire parent-level debt will leave the HoldCo essentially unlevered – *"a unique and financially conservative position"*.

The revision to positive outlook at Baa2 is good to see and reflects the progress ED has made over the past year – reaching a constructive settlement agreement in CECONY's rate case, securing mechanisms for COVID-19 arrears reduction, announcing/closing CEBs' sale and using the proceeds for parent debt repayment and avoidance of equity needs in 2023-24.

SRE - S&P reaffirms BBB+ rating and revises outlook to stable from negative following Port Arthur announcement

- Last night S&P updated its views on Sempra after financing details of the Port Arthur LNG FID were released
- S&P reaffirmed its BBB+ rating on Sempra and took its outlook to stable from negative
- The agency cited the fixed-price EPC contract, Bechtel's track record in building LNG liquefaction units, and the selldown of significant equity to COP and KKR
- S&P also expects that FFO to debt for Sempra will remain above 15%

The move to stable at BBB+ is good to see and we think reflects the overall risk-minimization approach Sempra is taking on Port Arthur. We'll be looking for Moody's take on Port Arthur; note that Moody's has a Baa2 rating on Sempra.

Clean Energy

Solar – Industry fighting against legislature push to undo tariff pause, waiting on domestic content details

- The solar industry is set to defend President Biden's two year pause of tariffs that went into place last summer
- A resolution to undo the tariff pause is being put forth (via Congressional Review Act) by a bipartisan group from the House and Republicans in the Senate - the group has been pointing to the preliminary DoC outcome that found that tariff circumvention was actually occurring
- SEIA is saying this could result in the cancellation of 4 GWs of planned solar
- Separately, the WSJ is out this morning with an article with some industry quotes related to waiting on Treasury guidance regarding 10% domestic content ITC adders in the IRA
- AES is quoted as saying that once it has guidance it is ready to sign a $1B solar purchase after a manufacturer commits to building an onshore factory

These two topics are intertwined, as the industry is trying to bridge the gap from last year's significant uncertainty created by the DoC AD/CVD investigation, to the implementation of the highly supportive IRA. There are a lot of politics at play here too given the sensitivity to China. We are approaching the one year mark of the tariff pause, such that some of the re-domestication of solar manufacturing should already be in the initial stages. But clearly the removal of an additional year could reintroduce some choke points in the supply chain.

Clean Energy: GREEN Playbook
WEBCAST: Wolfe Utilities & Midstream Earnings Preview Webcast, TODAY at 11:00am ET; register here
WEBCAST REPLAY: Fleish on Fridays; replay here, slides here, poll results here

Utilities sentiment meter – down to "4" from "5". Last week was discouraging as utilities underperformed even on down days for the market. The market is turning more offensive underneath the hood and the safety trades of 2022 – utilities, staples and health care – are suffering as a result. This could last a little while but utilities valuation is now back at a discount and we think the recent decline in rates and gas prices has actually de-risked the sector to some degree. Year end earnings kick off this week with NEE, please see our preview note below and hope you can join our call today at 11am.

Utilities

Utilities & Power: Q4 preview and outlooks – Utilities likely to lay low
NI – Consumer advocate recommends $245.7M rate increase, 9.20% ROE and 49.3% equity ratio in NIPSCO's electric case; decent starting point

NEE – FP&L announces plan to recover hurricane/fuel costs over 12/21 months; ~10% customer bill impact
AGR – Files appeal on DPU's approval of Commonwealth Wind contract; not surprising
AGR – Bloomberg reports weighing stake sale in renewables business
EMA – Three sections of Labrador Island Link transmission reportedly failed during Dec/Jan ice storms
CAL Watch – Weekly update of implied 2024 ROEs; utility bond yields flat for week but ROE still on track for at least a 50bp increase

Midstream

Midstream: Q4 Preview – Can 2023 guidance meet expectations
Midstream of Consciousness - What's the bull case, MVP court hearing, and readthroughs from KMI

Clean Energy

Wolfe GREEN Playbook – Inverter share in CA; PLUG preview; Off week for offshore; Corp. PPAs keep growing

Quarterly data: Weather, Forward Prices, Spot Prices, Nuke Outages

Wolfe Utility & Midstream Materials: Utility Comps, Utility Stock Charts, Midstream Comps, Midstream Stock Charts, Clean Energy Comps, Valuation Charts, Models

Utilities

Utilities & Power: Q4 preview and outlooks – Utilities likely to lay low
Click here to view our complete note
Q4 preview and 2023 outlooks – utilities likely to lay low. Pressures from nat gas and interest rate spikes have moderated, but we expect utilities to be conservative on earnings updates – this is not a time to be aggressive from a political/regulatory standpoint. 13 of our 32 utilities will be guiding 2023 for the first time; we definitely see more misses than beats mainly on interest rate and pension pressures and regulatory timing (lag). Asset sale news will be key with announcements or updates likely from FE, AEP, DUK, NI, and ES. Renewables are likely a bright spot driven by strong demand, IRA, and better supply chain (like on UFLPA). We lowered estimates on EIX, ES, EVRG, POR, PNW; raised on ED and FE. We also adjusted our very low Wolfe power price deck close to market slightly boosting CEG, PEG and VST.

NI – Consumer advocate recommends $245.7M rate increase, 9.20% ROE and 49.3% equity ratio in NIPSCO's electric case; decent starting point

- On Friday, intervenor testimony was filed in NIPSCO's electric rate case
- The Office of the Utility Consumer Counselor (OUCC) recommended a $245.7M total

rate increase using a 9.20% ROE and 49.3% equity ratio
    - Recall, NIPSCO requested a total $291.7M base rate increase in two steps ($393.3M when including the VCT rider in base rates) using a 10.4% ROE and 51.6% equity ratio
        - First increase of $234.6M effective 9/1/23, based on rate base as of 6/30/23
        - Second increase of $57.1M effective 3/1/24, based on rate base as of 12/31/23
    - NIPSCO is currently allowed 9.75% ROE and 47.9% equity ratio
- The OUCC recommended that the IURC deny NIPSCO's request for a new semi-annual tracking mechanism to recover variable non-labor coal expenses (i.e., VCT rider)
    - The VCT rider covered $101.6M of O&M not reflected in NI's $291.7M base rate increase request given the request to move it into a separate tracking account
- The OUCC also recommended that the IURC deny NIPSCO's request to implement a pension/OPEB balancing account

This looks like a fairly decent starting point, coming in just over 60% of NIPSCO's ask. ROE being at 9.20% is low, but not surprising given that this is a consumer advocacy group (there is no Staff testimony in Indiana). There are very little discrepancies in rate base, which is good to see as the majority of the ask is to get 4 of NIPSCO's renewable projects put into rates. From what we can tell, most of the difference between NIPSCO and the OUCC is on O&M (~$80M) and cost of capital (~55M). We are hopeful that the IURC will side with NIPSCO on the VCT rider and pension/OPEB balancing account requests.

<u>NEE – FP&L announces plan to recover hurricane/fuel costs over 12/21 months; ~10% customer bill impact</u>

- This morning, NEE's FP&L filed its plan with the FL PSC to recover the costs of two hurricanes and higher natural gas prices from customer bills
    - FP&L will recover fuel bills from 2022 (already paid for by company) over 21 months – $2.1B in total
    - FP&L will recover costs for Hurricanes Ian and Nicole over 12 months – $1.3B in total
- The typical residential customer is expected to see a 10% bill increase in April 2023 (versus what rates would've otherwise been)
- The recent decline in natural gas prices is expected to provide a partial offset to the customer bill impact ($1.0B decreased in 2023 projected fuel factor for 9 months)

This filing was expected and NEE had been clear that it wouldn't spread cost recovery over too long of a period to avoid pancaking with future storms. We expect NEE to be found prudent on its hurricane spend (as it historically has) and fuel is a simple pass-through where the state doesn't allow hedging.

<u>AGR – Files appeal on DPU's approval of Commonwealth Wind contract; not surprising</u>

- Late last week, AGR filed an appeal to the Massachusetts DPU's approval of the

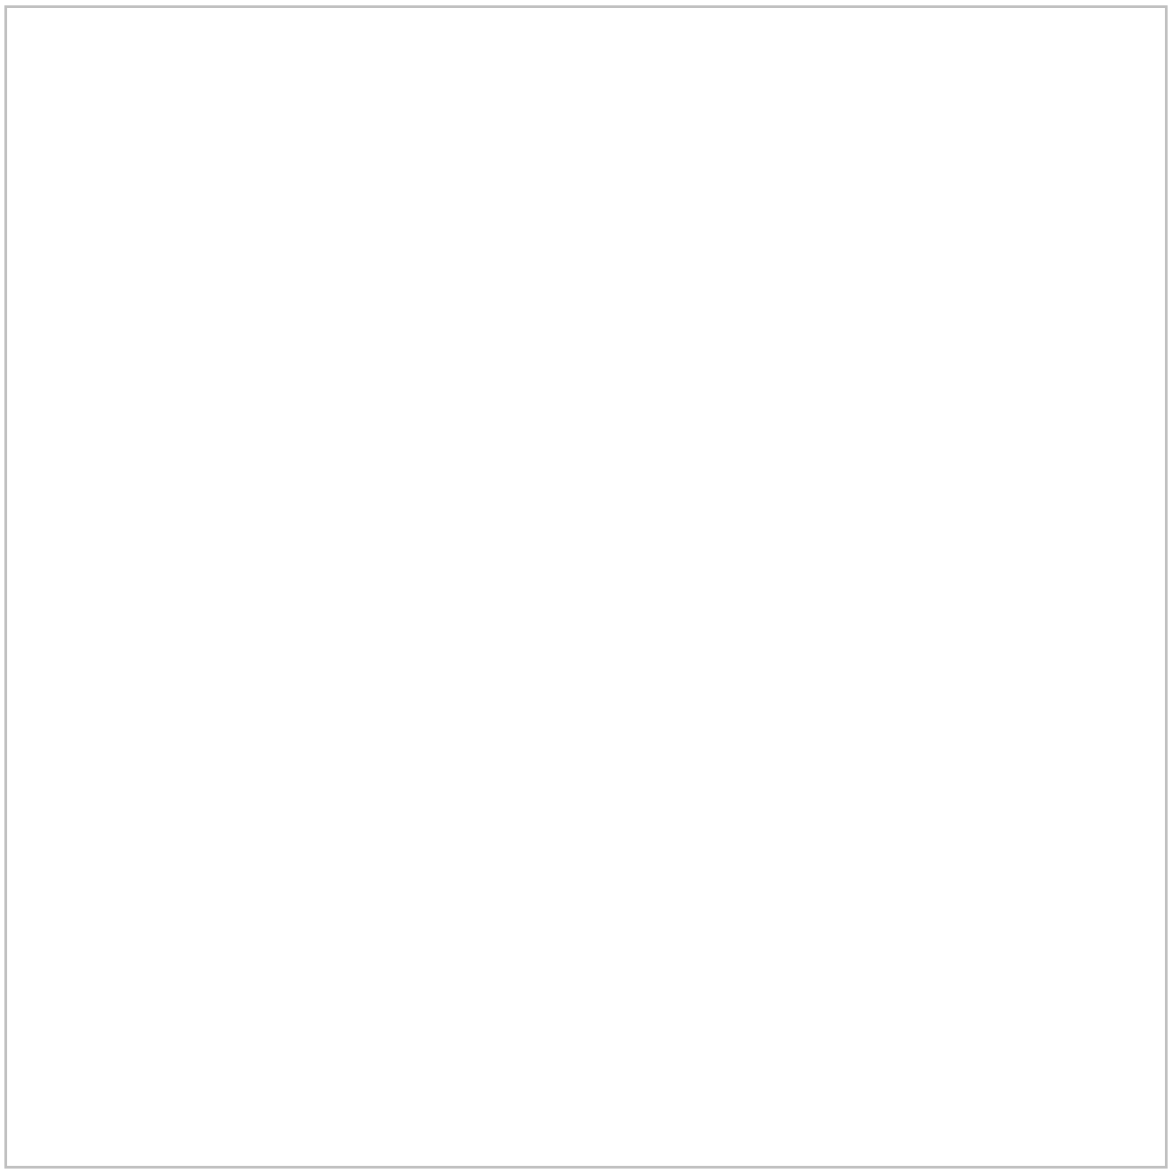
contracts for Commonwealth Wind
    - AGR wrote that the project cannot be financed and will not proceed under the PPA
- If unsuccessful AGR will have to post an additional $24M letter of credit (on top of original $24M)
- Recall that Commonwealth Wind had attempted to the renegotiate the PPA price – the 3 MA utility counterparties rejected this and the DPU said any renegotiations would require new filings
- AGR previously indicated that it intended to bid Commonwealth Wind into the next MA offshore wind competitive solicitation in April 2023
- AGR's Commonwealth Wind (1.2 GWs) was selected as the winner of the Massachusetts RFP in late-2021, with PPAs announced in May of this year
    - The originally filed PPAs were starting at $59.60/MWh nominal price ($47.68/MWh for energy and $11.92 for RECs, both of which escalate by 2.5% annually)
    - The total levelized all-in energy price for Commonwealth Wind is $72.17/MWh

This was expected and success on an appeal seems less likely. At worst, AGR would be on the hook for the $48M letter of credit, but a re-bid could open up the potential for a much higher PPA price, which could help the economic viability.

AGR – Bloomberg reports weighing stake sale in renewables business

- ***Bloomberg*** is reporting that Iberdrola is weighing the sale of a stake in its U.S. renewables business (AGR) – seeking a financial partner for existing projects (over 9 GWs operating)
    - No final decisions on timing or size have been made
- Recall that AGR's September Analyst Day plan featured $1.9B of common equity in 2024, a partnership for its onshore pipeline (60% of 1.7 GWs), and a partial sale of its Kitty Hawk offshore lease in NC

This isn't surprising, as AGR has been clear about its asset rotation strategy for some time. To the extent it sells more than the partnership in its plan, this could help alleviate some of the $1.9B of equity needs.



EMA – Three sections of Labrador Island Link transmission reportedly failed during Dec/Jan ice storms

- Last week, the ***Canadian Broadcasting Corp*** (CBC) reported that three sections of the Labrador Island Link transmission line have failed since early December
- ***CBC*** said that three sections of conductor wire have dropped to the ground after turnbuckles broke during a stretch of freezing rain in December and early January
- These line failures are in addition to a setback that occurred in November after the transmission line tripped during testing

Commissioning of the LIL transmission line and related issues with the Muskrat Falls hydro station (owned by Nalcor Energy) has been a pain point for EMA in recent years. EMA has an equity stake in the LIL line, having invested ~C$725M in the project. However, since the project has yet to be fully commissioned, EMA has only recorded AFUDC earnings. Starting to book actual cash earnings is an important piece to EMA hitting its 12% FFO/D target.

CAL Watch – Weekly update of implied 2024 ROEs; utility bond yields flat for week but ROE still on track for at least a 50bp increase

- This our weekly series on the utility bond yield index used for the Cost of Capital mechanism (CCM). The allowed ROEs in 2023 for CA utilities are 10.05% for EIX; 10.00% for PCG; and 9.95% for SRE's SDG&E and 9.85% for SRE's SoCal Gas. But 2024 ROEs depend on whether the CCM is triggered.
- CCM: On 9/30, if the difference between the 12-month average of the Moody's Bond Utility Baa Index and the benchmark value (currently 4.38%) exceeds 100bp, then the allowed ROE for the next calendar year is adjusted by one-half of the difference, and the current value of the index becomes the new benchmark value. (The index for SoCal Gas is Moody's Utility A Index).
    - If the difference is within 100bp, ROEs and the benchmark index value remain the same for the subsequent year.
- Below is a chart with the Index values from 10/1/22 through the last available date (light blue bar charts); the average over that period is 5.88% (solid orange line).
- The last Index value was 5.39%; if that were the average from now through 9/30/23, under the CoC mechanism, 2024 ROEs would be increased by 58bp [=(5.53-4.38)/2].
- It is still early, but the CCM is on track to be triggered, implying at least a 50bp increase in 2024 ROEs, if the Index from now through 9/30/23 averages at least 5.18%.

Midstream

Midstream: Q4 Preview – Can 2023 guidance meet expectations

Click here to view our complete note

Midstream stocks have been resilient…but initial 2023 guides could pose a test. Midstream equities had a great 2022 and have started off well in 2023. However, investor sentiment has become more mixed heading into earnings as we transition from the beat and raise cycle of 2022 to initial 2023 outlooks that likely reflect moderating commodity prices and production growth as well as potential conservatism. We think capex in 2023 will be similar to 2022, but with a slight majority of companies raising capex in 2023 and a smaller number reducing spend - see Ex. 5. Overall, midstream financial positions remain quite strong with positive FCF and balance sheets in better shape than history, which we think makes the group more defensive in a downturn

Midstream of Consciousness - What's the bull case, MVP court hearing, and readthroughs from KMI

- In this week's Midstream of Consciousness, we assess the bull case for midstream by comparing dividend yields across income sectors, historical EV/EBITDA multiples, and the energy sector's weight in the S&P 500. We then provide thoughts on ETRN's Mountain Valley Pipeline court hearing this upcoming week. Lastly, we review KMI's volume data post-Q4 earnings.
- **Can midstream outperform 3 years in a row in 2023 – what's the bull case?** The bull case is the lack of an obvious valuation ceiling. Interestingly, if the stocks rose 20%, our coverage would then only trade in line with their 4-year average EV/EBITDA multiple with an average dividend yield still north of 5% which would still be well north of competing income alternatives. Additionally, energy's sector weight in the S&P 500 remains well below its historical level, and it does not seem crazy to us that energy's weighting in the S&P 500 could continue to move higher from here.
- **ETRN - MVP back in front of the 4th Circuit this week; the paths from here.** We refresh on key permits including VA and WV water permits, the Fish and Wildlife Service's biological opinion, and the National Forest crossing permit. The chances of permitting reform are not clear especially given the dynamics in the House and finding a compromise with Democrats in the Senate could be difficult. We continue to monitor as permitting reform can provide a $300M EBITDA uplift and incremental expansion opportunities.
- **KMI – solid quarterly results, but volumes continued to lag.** KMI reported solid Q4 results last week, but volumes remain weak. We look forward to this week's Investor Day where we are particularly focused on the detailed project backlog which has grown considerably since last year. See our Q4 recap note here (**link**).
- Please see the full report **here** for more.

Clean Energy

Wolfe GREEN Playbook – Inverter share in CA; PLUG preview; Off week for offshore; Corp. PPAs keep growing

- In yesterday's Wolfe GREEN Playbook, we review inverter market share in the CA resi solar market, preview PLUG's business update call, discuss Ørsted's Sunrise Wind impairment, and highlight the continued strong growth in the corporate PPA market.
- **Youngkin's Trojan-horse quote highlights political risks on China, IRA; relevant for panels and FSLR.** VA Gov Youngkin called a proposed Ford/CATL plant a "Trojan horse for China". This highlights a key theme for 2023 – will the US allow Chinese companies to build factories here and get IRA benefits? FSLR is surely noticing.
- **California NEM-Tracker: Zooming in on the Inverters.** The data shows ENPH's tremendous share gains, but also highlights the risk if the CA market really shifts from loans toward PPAs/leases.
- **PLUG update call Wednesday - it's all about execution.** The company has laid out significant growth potential, but now they are going to need to show they can execute on that growth and give confidence on when the earnings and cash flow picture flips to positive.

An off week for US offshore wind – Ørsted impairment, ES sale delay, PEG exiting, D introduces selldown option. Ørsted announced an impairment on Sunrise Wind; ES sees no impairment, but the sale is going slowly. PEG is exiting Ocean Wind 1, while D may seek an equity partner for Coastal Virginia Offshore Wind.

- **Corporate PPAs hit a new high in 2022.** ACPA's annual report shows nearly 20 GWs of clean energy were purchased by corporates last year – up 4 GWs vs. 2021. We're seeing increasing solar contracted announcements, while wind still appears to have peaked in 2018-2019. ACPA also notes that PPA prices were up 30%/37% on average for solar/wind in 2022.
- Please see the full report **here** for more.

Q4 preview and 2023 outlooks – utilities likely to lay low

The Wolfe Byte

More bad than good on YE updates. Interest rate and nat gas spikes have moderated, but we still expect some 2023 guides to be weak on rates, pensions, and regulatory. Renewables should be a bright spot. Asset sale updates are a key focus.

Q4 preview and 2023 outlooks – utilities likely to lay low. Pressures from nat gas and interest rate spikes have moderated, but we expect utilities to be conservative on earnings updates – this is not a time to be aggressive from a political/regulatory standpoint. 13 of our 32 utilities will be guiding 2023 for the first time; we definitely see more misses than beats mainly on interest rate and pension pressures and regulatory timing (lag). Asset sale news will be key with announcements or updates likely from FE, AEP, DUK, NI, and ES. Renewables are likely a bright spot driven by strong demand, IRA, and better supply chain (like on UFLPA). We lowered estimates on EIX, ES, EVRG, POR, PNW; raised on ED and FE. We also adjusted our very low Wolfe power price deck close to market slightly boosting CEG, PEG and VST.

Positives: **1) AES** – 2023 guide in line, calming investor fears; positive tone on renewables; **2) DTE** – offset MI rate order and reaffirm 2023, potential rehearing; **3) NEE** – internal investigation likely resolved with no adverse outcome, bullish on renewables growth; **4) SRE** – Port Arthur FID, better Oncor rate order, 2024 guide in line.

Negatives: **1) AGR** – pressure on 2023 w/o PNM; offshore wind risks; **2) EIX** – 2023 guide below consensus, tracking to low end of 5-7%; **3) EVRG** – 2023 below consensus, LT outlook reaffirm and we are buyers on weakness; **4) NRG** – miss on 2022, will re-highlight Vivint deal; **5) PNW** – miss on 2023 guide due to pension, lag; **6) POR** – miss on 2023 guide, takes a while to get to 5-7% growth; **7) SO** – miss on 2023 guide, lower 2024, Vogtle and mgmt. update, we buyers as long as Vogtle 3 on track for 1H.

Important: **1) AEP** – KY and renewables sale updates; **2) CEG** – Energy Harbor outcome, capital allocation plan, 23/24 margin and hedge guides; **3) DUK** – potential renewables sale news; **4) ED** – settlement update, 2023 and CAGR guide including asset sale, buybacks; **5) ES** – offshore wind sale update, higher capital plan but unlikely any change to 5-7% CAGR; **6) EXC** – 2023 guide, may rebase CAGR to 22-26, may give yr-by-yr guide, keep 6-8% or lower it?; **7) FE** – 2023 guide, capex update, outlook likely reaffirmed, asset sale and CEO updates.

Please see full report for company by company previews.

Investment Conclusion

Our Regulated Utilities sector rating is Market Outperform. Utilities relative P/E valuation vs. the market is now slightly below the L-T average. The sector has largely completed its simplification from non-regulated businesses and the regulated business has the strongest set of investment opportunities in years from renewables transition under IRA. However, the inflationary environment is creating challenges for utilities with higher interest rates and pension/fuel/O&M costs. With a fully regulated profile, we think utilities are as well positioned as they have ever been if a recession hits, especially if that same recession tames the inflationary pressures.

Average Spot Prices

In Exhibit 6 below, we highlight the year over year change in the average spot power price in different regions. Spot prices were up substantially in every region compared to 4Q21. Most notably, spot prices out West were up 127-168%, led by Mid-C. PJM spot prices were up 23-34%, New England spot prices were up ~30%, and ERCOT spot prices were up ~28%, on average. This was largely driven by the spike in natural gas prices as spot gas averaged $6.10/MMBtu (a 26% YoY increase).

Exhibit 6: Average 7x24 Spot Prices

Northeast	Q422	Q421	% Change

WOLFE RESEARCH

January 22, 2023

Wolfe Research Prices vs. Market Prices

We've revised our power price deck to reflect the latest moves in forwards. This is our first update in several quarters. Our prior commodity assumptions had become above current market in 2023, but still below current market in 2024. So while commodities have rolled over hard in recent weeks, much of the pressure was on the front-end of the curve, where the companies are close to fully-hedged. Further out in time, we had been using conservative assumptions and now see upward estimate revisions. Our latest estimates for the generators now effectively reflect a mark-to-market as of early-January. Since then there has been more declines in pricing.

Exhibit 7: Wolfe 7x24 power price estimates

WOLFE RESEARCH

January 22, 2023

Market Power Prices (09/30/22 vs. 12/31/22)

In Exhibits 10-12, we show market 7x24 power and commodity prices at September 30, 2022 and December 31, 2022. 2022/2023 contracts were down significantly in most regions, whereas 2024 contracts were more flattish vs. 9/30 marks. The West was a notable exception rising over 30-40%. For 2023, Midwest contracts were down 19-23%, PJM contracts were down 17-18%, ERCOT contracts were down 13-17%, and NY contracts were down 12-13%. Contracts out West were up over 40%. For 2024, ERCOT contracts were down 3-7% and PJM contracts were flattish, while contracts out West were up over 30%.

WOLFE RESEARCH

January 22, 2023

Highlights and Lowlights

AEE: Busy year on all fronts but expecting in line call

- We estimate 2022 EPS of $4.08, in line with consensus. We expect AEE to introduce 2023 guidance with a midpoint of ~$4.35 in line with consensus of $4.34 and our $4.37e.
- Other new disclosures that we expect are 2023-27 capital plan, financing plan and EPS growth. We also expect an update on AEE's pending regulatory proceedings: MO rate case, MO renewables CCNs, IL electric rate case, and IL gas rate case.
- We think AEE will extend its 6-8% EPS growth target off 2023 guidance through 2027, and like last year we anticipate it will exclude incremental MO renewables and potentially MISO transmission.
- Upside to capital plan: AEE tends to wait until large projects receive regulatory approval before including them in its capital plan; AEE was awarded $1.8B of MISO transmission projects for in-service late this decade, but even brownfield projects require regulatory approval. Another $700M up for competitive bids in AEE's region is likely to occur in stages and take about a year to determine the winners.
- MO rate case: It is in the middle innings, and AEE has settled the past three cases, mostly before hearings start (in this case 4/3). We will be watching for another settlement, particularly as the MoPSC has one vacancy (Chair Silvey left). We think a deal reduces the uncertainty around a fully litigated case with only four commissioners.
- MO renewables: Two announced new renewables projects are awaiting approvals, and more are expected. AEE has settled past CCNs for renewables projects, as it strived to meet state compliance. Starting with one of the pending projects (150 MW Boomtown), AEE's proposed renewables are expected to be for fleet transition as opposed to compliance. We will be watching for a settlement ahead of hearings next month, following Staff recommendation that the 150 MW project is not needed; other intervenors supported AEE.
- IL rate cases: AEE will be in its first 4-year electric rate case in IL this year; it's in the very early innings, with a decision expected in Dec for rates effective in 2024. And AEE filed a gas rate case in IL earlier this month. Collectively, IL elec and gas distribution make up ~25% of AEE.

AEP: Key updates on KY and Contracted Renewables sales

- We estimate 2022 EPS of $5.02, in line with consensus. We anticipate AEP reaffirm 2023 guidance of $5.19-5.39. Our 2023E is $5.30 is in line with consensus.
- We expect AEP to reaffirm its long-term EPS growth target of 6-7% and 5yr capital and financing plans.
- KY Power sale: AEP and Algonquin are expected to refile with FERC for approval to sell KY Power to AQN, after the regulator rejected the deal on 12/16 for not showing customer benefits. The parties reaffirmed their commitment to closing the deal earlier this month and will seek expedited treatment at FERC, which currently has four commissioners (two of whom suggested in Dec they would have conditionally approved the deal). The 18-month deal close deadline is 4/26, but that could be extended. AEP's financing plan has $1.2B of KY Power proceeds.
- Contracted Renewables sale: AEP has indicated it will announce a deal for its Contracted Renewables portfolio by the time of its call (2/23), with closing sometime in 2Q23. AEP previously said it was getting "great" interest on the portfolio, despite market volatility. The proceeds are not in AEP's financing plan and would help mitigate the loss of KY Power proceeds in the event that deal falls through.

AES: Solid 2023 outlook with increasing renewables PPAs/CODs

- We see 2022 EPS of $1.65 – in-line with consensus and at the top-end of $1.55-1.65 guidance, which is where AES is pointing. We expect Q4 to be driven by new renewable investments, the AES Andes buy-in, and in improvement in AES Next results (Fluence); partially offset by taxes and absence of a one-time gain at Alto Maipo.
- AES is expected to issue 2023 guidance on the call – our estimate is $1.77 and just above $1.75 consensus. Our estimate reflects a 7% CAGR off the 2020 base and thus is at the low-end of AES' 7-

Please help us protect your advantage...
DO NOT FORWARD

Provided for the exclusive use of Michael Weisenburger at NiSource on 23-Jan-2023 08:32 AM.

9% target. We expect 2023 to be driven by a big step-up in renewables commissioning (PTC/ITCs) and U.S. utility rate base growth; partially offset by coal asset sales, the absence of the Panama LNG sales which were a big tailwind in 2022 (AES doesn't assume this going forward), and equity convert dilution.

- There's been a lot of focus on AES' 7-9% long-term growth outlook that currently covers 2020-2025. This was last refreshed at the March 2021 Analyst Day. Our sense is AES could follow this practice again, rather than addressing it on the year-end call. We believe the 7-9% can ultimately be extended beyond 2025.
- We see AES as well on track to hit its renewable backlog target of 4.5-5.5 GW for 2022. As of Q3, this stood at 3.2 GWs, but we already know there was a publicly disclosed 1 GW PPA signing in Chile in Q4. AES continues to work through industry-wide supply chain challenges, with all panels secured for last year's renewables CODs. UFLPA has been a challenge too, but is being managed. We think AES will target *at least* 4.5-5.5 GWs of PPA signing annually going forward.
- Obviously the big news in December was AES' massive hydrogen announcement with Air Products. We'll be interested to learn more about this, as well as other potential hydrogen opportunities in the hopper (Chile, Brazil, U.S. hydrogen hub involvement).
- AES is also working through its asset sale process. Last year, AES announced sales in Vietnam (Mong Duong 2) and Jordan (Amman East & IPP4) that accounted for $350-400M of its $500M target. However, neither actually closed by YE, so we will be curious to get an update on the call. It is possible we could also get more details on the full coal exit, which AES has committed to by YE25.

AGR: Unclear how 2023 guide factors in PNM; offshore wind news flow remains messy

- We estimate 2022 EPS of $2.32 – slightly above consensus and the midpoint of $2.20-2.38 guidance. We see Q4 driven by rate relief in New York and new renewables resources online; offset by depreciation and absence of a $10M one-time benefit from Winter Storm Uri last year. We've yet to see wind performance data for Q4, but last year saw a 28.6% capacity factor versus 29.7% under normal conditions.
- We forecast 2023E at $2.13 ex-PNM and $2.41 w/ PNM. We expect AGR to issue 2023 guidance, after at the Fall Analyst Day it indicated the range should be similar to 2022 (~$2.20-2.40). Our understanding is that was given with several assumptions – half-year contribution from PNM (we estimate ~$0.27), a one-time gain on selling the Kitty Hawk offshore wind lease (we estimate ~$0.20), and new rates in effect across NY/ME/CT. The primary headwind is the absence of a $0.47 accounting gain that was booked in 1Q22.
- Speaking of PNM, we now have 3 Governor-appointed commissioners in place at the NM PRC. At the same time the case remains pending at the NM Supreme Court, with hearings expected to begin this month. Given support for the merger from both Governor Grisham and nearly all of the parties, we still think there is a more likely than not chance that this deal ultimately closes.
- On the regulatory side, AGR remains in pending rate cases across NY/ME/CT. Both ME/CT saw relatively reasonable Staff recommendations in December. Focus remains on New York though (50%+ of rate base), where AGR is in settlement discussions, though some parties have filed that an agreement was not imminent. On the flip side, we saw Staff testimony in NY as relatively reasonable.
- Offshore wind news flow, particularly in Massachusetts, has remained noisy. AGR was unable to renegotiate its contracts and was disappointed to see the DPU approve them as is. At worst, AGR is on the hook for $48M in letters of credit. The plan is to re-bid in an April RFP, as AGR is committed to the business. Meanwhile, others in the sector continue to exit (PEG, ES).

AWK: MO/CA rate cases pending, with a large equity issuance on the horizon

- We see FY22 EPS of $4.49 (excluding a $0.06 weather benefit in Q3), which is above consensus at $4.45 and at the top-end of AWK's $4.39-4.49 weather-normalized guidance range. We project YoY results in Q4 to be flat, as traditional rate relief/rider mechanisms and interest income from the seller's note/revenue share from HOS are offset by inflationary pressures/higher O&M, D&A, property taxes, interest expense as well as loss of earnings from the sales of HOS ($0.07) & the NY subsidiary ($0.02).

Please help us protect your advantage...
DO NOT FORWARD

Provided for the exclusive use of Michael Weisenburger at NiSource on 23-Jan-2023 08:32 AM.

- Our expectation is that AWK will re-affirm its 2023 guidance range of $4.72-4.82. Our 2023E of $4.78 is in-line with consensus at $4.77 and implies ~7.7% growth off weather-adjusted 2022 guidance midpoint of $4.44. We will be watching for mgmt.'s commentary on cost inflation/interest rates, which are expected to drive a $0.25-0.29 headwind in 2023, over 75% of which is expected to be mitigated by regulatory solutions – AWK has pension trackers in MO/CA, a 2-year deferral in NJ, and updated pension/OPEB, chemical & fuel/power cost estimates in PA/IL after the conclusion of recent rate cases.
- We do not expect any significant updates to the capital plan given that a complete refresh was provided at Q3. However, on equity needs, we will be curious to see if AWK discloses any specifics on size, form (whether a forward component is included or not), valuation/pricing, or timing. Mgmt. has pointed to >$1B of equity issuance around mid-year, likely as a block or single-issue, with incremental debt/equity financing being a $0.20-0.22 drag in 2023.
- AWK has rate cases pending in MO (3rd largest jurisdiction, ~13% of rate base) and CA (<5% of rate base, cost of capital is not in the scope). In Nov., MO PSC Staff recommended a reasonable ~$57M rate hike/9.73% ROE, but disappointing parent capital structure of ~41% equity. Rebuttal testimony was filed on Jan. 18th, with hearings to be held in Feb. and an outcome expected by the end of 2Q23. It is still early in the CA rate case, but it will be important to see if CalAm is able to renew decoupling for 2024-26 under the new water revenue adjustment mechanisms implemented by SB 1469.
- Other items we are monitoring include: (i) EPA's impending rulemaking on PFAS and potential water quality accountability/safety legislations in states across AWK's footprint; (ii) MSG's two outstanding bids, with one contract expected to be awarded in 2023; and (iii) CalAm's re-hearing request to recover infrastructure costs for Pure Water Monterey project expansion after the CPUC's recent decision to delay recovery of supporting investments and change capital structures for project development.

CEG: 2023 EBITDA, 2024 gross margins, PTC value

- We estimate 2022 EBITDA of $2,538M, below consensus of $2,597 but closer to the midpoint of CEG's revised $2,450-2,650M.
- We believe CEG will introduce FY23 EBITDA guidance with a midpoint of $3.10B using YE22 marks. That would be slightly below consensus of $3.16B but above our updated $3.03B; the latter is using our deck that is close to mid-Jan 2023 market prices, which are below prices at YE22. CEG was about 90% hedged for 2023, as of 9/30/22.
- 2024 disclosures: For 2024, CEG will not give EBITDA guidance but will roll-forward gross margins and hedges to 2024. CEG is also expected to update its O&M outlook through at least 2024, which likely will be higher than the flattish 2024 O&M disclosed last Jan. From those new disclosures, a rough 2024 EBITDA could be implied by adding the net of the YoY increase in gross margins and O&M for 2024. Our new 2024 EBITDA estimate is $3,532 (from $3,323), using our price deck, which is now about in line with current market compared to well-below market previously. It also includes our estimate of PTC value.
- PTC value: We anticipate CEG to provide an estimate of nuclear PTC value in 2024, despite the IRS guidelines yet to be issued. Based on YE22 marks and assuming 2024 hedge prices are consistent with 2023, we estimate ~$135M of PTC value (all from CEG's LaSalle nuclear in IL). Given declining power prices since YE22, we see that PTC value at ~$175M using latest mark-to-market. We will be watching for any sense of PTC "floor-price" EBITDA, though we do not anticipate a number.
- Capital allocation likely to be focused on 2022-23 free cash flow: CEG's capital allocation update was delayed on the potential for nuclear M&A. While a deal remains possible, our base case is CEG will announce its capital allocation for the 2022-23 free cash flow, which is likely more than the ~$2B targeted last Jan. We think CEG will do a mix of buybacks, higher dividend growth and investment in growth opportunities, namely hydrogen and uprates. We anticipate a commercial deal on hydrogen to be announced sometime in 1H23 but likely after the YE call.
- M&A: CEG has expressed interest in any existing nuclear assets up for sale, which at this point is now only Energy Harbor's nuclear portfolio. We believe the process is nearing an end, but CEG is not the only interested party. We discussed nuclear consolidation last fall (note). Notably, CEG has an IG B/S and is on positive outlook, with even S&P saying it would look past any temporary high leverage for M&A given CEG's long-term cash flow projections and business risk profile.

Please help us protect your advantage...
DO NOT FORWARD

Provided for the exclusive use of Michael Weisenburger at NiSource on 23-Jan-2023 08:32 AM.

- Below we show our estimates of CEG 2022-23 margins as of 12/31/22 vs those using 9/30/22 pricing (CEG only provides margins 2022-23). CEG is almost entirely hedged in 2022. For 2023, when CEG is ~10% open (ex CMCs), prices fell ~17-22% in NiHub/PJM 12/31 from 9/30.

Wolfe Projected CEG Total and Open Gross Margin		
	2022	2023
12/31/2022		
Total Gross Margin Est	7,350	8,150
Open Gross Margin Est	10,100	7,000
	-	-
9/30/2022		
Total Gross Margin	7,350	8,250
Open Gross Margin	9,750	8,500

CMS: Completing the settlement trifecta

- We forecast 2022 EPS at $2.88 – in-line with consensus and $2.87-2.89 guidance, where CMS pointed to the midpoint. We see Q4 driven by favorable weather, gas rate relief and the absence of storms; partially offset by cost pull-aheads and one-time bill credits booked as part of the electric rate settlement.
- We expect CMS to re-base its 6-8% EPS CAGR off 2022A, though if the year finishes at the midpoint that doesn't change much. CMS will likely reaffirm 2023 guidance of $3.05-3.11 or tweak it up a penny.
- CMS closed out a highly successful year on the regulatory front in 2022. It settled its Integrated Resource Plan, gas rate case, and electric rate case. The electric rate settlement was just approved last week, which was encouraging to see after in-state peer DTE's electric rate case was fully litigated and had an unfavorable outcome in November. CMS will be back in for electric and gas rate cases this year as well.
- As is typical, CMS will refresh its five-year capex plan. This will be moving up from the current $14.3B, as it will include the $800M Covert plant. This should support continued rate base growth of 7%
- We'll also get an updated view on cash flows and credit. We expect CMS to continue targeting FFO/Debt of 14-15%. CMS already did $493M in equity last year ($438M for Covert) via forward. There are no additional needs in 2023-2024, before equity returns to $250M/year in 2025-2026. We expect CMS to extend this out to 2027, where it could move up to $300-350M, commensurate with the capex plan. all of this should continue to be doable under the ATM program.

CNP: Texas regulatory and legislative session the focus early on

- We forecast FY22 EPS of $1.38, which is in-line with consensus and at the midpoint of CNP's 1.37-1.39 range. We think 2022 finished on track with some weather favorability in Q4 at CEHE.
- We expect CNP to reaffirm its 2023 guidance of $1.48-1.50. Our 2023E of $1.49 matches consensus. We don't expect CNP to make any material updates to its capex plan, which was just refreshed at Q3.
- It will be a busy year for CNP on the regulatory front. The rate case cadence will be as follows – TX gas, Indiana Electric and CEHE (though could be filed early 2024). Houston Electric is the overwhelming focus and we will be watching the outcome of Oncor's case closely for potential readthroughs. The next data point will be exceptions to the ALJ report due 1/24 and then case is tentatively scheduled be in front of the PUCT at the Feb 15-16 meeting. We note that CNP's outlook assumes ROE/equity ratio that were in-line with Staff's recommendation for Oncor.
- TX's 2023 legislative session will also be something to watch as CNP is likely to pursue two impactful bills 1) getting equity ratios that are set based on actual levels; and 2) the ability to file two distribution cost recovery factor (DCRF) applications each year (similar to TCOS). The DCRF legislation is expected to be less controversial given that the industrials aren't impacted by distro charges. TX's legislative session has already convened and runs through the end of May.

Please help us protect your advantage...
DO NOT FORWARD

Provided for the exclusive use of Michael Weisenburger at NiSource on 23-Jan-2023 08:32 AM.

- Other items that we will look for an update on include CNP's on-going CFO search and what is causing the hold up for getting TX securitization proceeds. On the former, it is possible a candidate could be identified by the Q4 call. On the latter, CNP was supposed to have the ~$1B of proceeds by YE22 but obviously that timeline slipped. However, we don't believe this to be any cause for concern.

CWEN: Should be uneventful quarter; Focused on next round of growth, CFO plans, and California energy margins

- **Expecting uneventful quarter.** We forecast 4Q22 EBITDA and CAFD of $262M and $22M, respectively, which is consistent with FY 2022 guidance although EBITDA would be modestly below consensus. We're not aware of any factors that would cause 2022 results to be materially off plan vs. the updated guidance in November.
- **Key topics.** It's possible CWEN has more details on the potential next $220M drop-down offer from the sponsors – we'd be curious if that is also done at the more constructive 9.5% CAFD yield that the most recent drop-down was offered at. We're still waiting on a new CFO announcement as the process has taken longer than initially expected. Lastly, California power prices and forwards have been very high and volatile alongside natural gas supply constraints. We're curious how this may impact CWEN's gas assets which transition this summer to having energy market exposure on top of the fixed capacity payments.

D: "No comment"

- Our FY22 estimate of $4.11 matches consensus and is just above the midpoint of D's range. We see Q4 finishing mostly in-line with D's plan. Positive drivers include the absence of a Millstone outage, rider investments and tax timing. Partial offsets include higher interest expense and share dilution.
- We do not expect D to provide 2023 guidance. This is due to its pending business review, the outcome of which, will have a material impact to the earnings power of the company in 2023 and onward. We don't expect D to comment on any pending legislation in Virginia. And without full clarity in Virginia, D won't be in a position to discuss any other strategic actions either. That said, we should have a decent idea of what the big regulatory bill looks like by the time of the earnings call on 2/8 (the day prior is the crossover date at the Virginia legislature).
- There is another piece of legislation pending would provide D with the option of pursuing an equity financing partner for the Costal Virginia Offshore Wind project. We don't expect to hear much from D on this either. But assuming it were to pass, we like the strategy as it helps address one of our key concerns for D's stock (large project risk) once it gets on the other side of its business review.
- A key variable of where D's earnings will shake out in 2025 is the extent of balance sheet repair that it will undertake following the Virginia giveback. In our talks with investors, expectations are all over the place – some think 14-15% FFO/D, others think 16%. Our $4.05E in 2025 targets 15.5%, so we think D will err on the side of having ample cushion above its 14% downgrade threshold to set itself up for the long term.

DTE: Managing through the rate case headwind

- We forecast 2022 EPS at $6.01 – in-line with consensus and the midpoint of $5.90-6.10 guidance. We expect Q4 to be driven by favorable weather, electric deferrals/refund absence, and less corporate drag; partially offset by the REF roll-off at Vantage and an unwind at Trading from some outsized timing benefits in Q1.
- DTE already issued 2023 guidance of $6.09-6.40 at EEI. This reflected 7.0% growth off original 2022 guidance, with our estimate and consensus being in-line. We don't see any changes here.
- The big investor focus will be how DTE manages through the year following a disappointing electric rate case outcome shortly after EEI. DTE was unable to settle and got a final rate hike that was less than 10% of its ask and below both Staff and the ALJ. A large portion of the delta came down to a dispute over post-COVID sales growth assumptions. DTE has since filed for rehearing, asking for the ALJ recommendation to be adopted, and committing to voluntary customer refunds for any incremental sales realized. DTE is not counting on a successful rehearing, but we expect an MI PSC decision before its

Please help us protect your advantage...
DO NOT FORWARD

Provided for the exclusive use of Michael Weisenburger at NiSource on 23-Jan-2023 08:32 AM.

earnings call. The good news is that we believe DTE has enough levers to pull in order to offset the headwind – pointing to its COVID cost cutting playbook. We were also encouraged by in-state peer CMS' electric rate case settlement that was just approved unanimously – helping to restore faith that Michigan remains a premium jurisdiction.

- The other pending item for DTE is its Integrated Resource Plan filing that was made back in November. The next data point will be Staff/Intervenor testimony on March 9. DTE is hoping to settle, with its plan featuring robust renewables additions and an acceleration in exiting coal.

DUK: Update on Comm Renewables sale, key NC rate cases

- We estimate 2022 EPS of $5.24, modestly below consensus. We expect DUK to affirm 2023 guidance of $5.55-5.75; our estimate is $5.62 vs consensus of $5.67. We think DUK will affirm its 5-7% EPS growth target.
- Other disclosures include detailed 5yr capital plan and rate base forecasts. But the over 5yr and 10yr capital plans were previously disclosed.
- CR sale: The key update will be on DUK's CR sale, with a buyer/price expected to be announced in 1Q23. DUK said CR's book value is ~$4B (including $1B of tax attributes). Proceeds are expected to reduce debt and avert equity needs through 2027, both of which are reflected in DUK's EPS growth outlook.
- Interest rates and O&M: Last fall, DUK pointed to interest rates and inflation when it upsized O&M cuts to $300M from $200M. We will be watching for an update on the O&M reduction program and interest rate sensitivity (100bp = $0.12 in 2022).
- NC rate cases, Carbon Plan and Holiday outages: The main focus this year will be on two NC rate cases – the first under a 2021 utility law that introduced multiyear plans and ROE bands; intervenor testimony in the first one (DEP) expected on 3/27. This will also be the first investor call since the NCUC issued an order on the Carbon Plan, which includes an update filing this Sep and will be revisited every two years. It also will be the first call since the Christmas Eve outages in NC, which the company told regulators was caused by faster than expected demand during extreme weather and unanticipated resource shortfalls.

ED: CECONY settlement close; more clarity on use of CEBs' sale proceeds & equity needs

- We project FY22 EPS of $4.55, which is in-line with consensus at $4.54 and at the midpoint of ED's $4.50-4.60 guidance that was raised in Q3. We see YoY results in Q4 down $0.19, driven by the reversal of a big one-time benefit from the recovery of late payment fees foregone due to COVID in 4Q21, higher property taxes, O&M, D&A, interest expense, storm-related costs, and share dilution. Partial offsets include rate relief, positive incentives/EAMs, and more favorable weather vs. 4Q21.
- ED will provide 2023 guidance along with its Q4/YE earnings release. We are raising our 2023E by $0.02 to $4.79, reflecting accretion from the use of proceeds net of earnings lost from CEBs' sale, which we assume closes by Q1-end (expected in 1H23). We use ~$1B for HoldCo debt repayment and ~$1.8B to implement a buyback at $100/sh. by mid-year. Our new 2023E is slightly below current consensus at $4.82. Our 2024-25E move higher by $0.12/$0.14 to $5.20/$5.44 after fully implementing use of proceeds and removing CEBs' earnings from our model vs. conducting net accretion/dilution analysis previously; every $5 increase in repurchase price is ~$0.01 less accretive in the outyears. We expect ED to re-affirm its L-T 5-7% EPS CAGR off a new base year – the midpoint of its 2023 guidance range (our 2025E implies a CAGR of ~6.5% off our new 2023E).
- ED will provide equity needs for 2023-25 and likely more clarity on use of proceeds from CEBs' sale. Based on the $3.7B midpoint of net cash proceeds from CEBs' sale and with $450M of equity needs mitigated in 2022, if ED foregoes another $375M (half of prev. $750M block equity guide in aggregate over 2023-24) and repays $1.05B of parent debt, $1,825M is available for repurchases. Alternatively, if ED pre-funds its 2024 block equity needs, we estimate that the buyback size reduces to $1,450M.
- In late-Dec., ED informed the ALJs in CECONY's electric/gas rate cases that it is *"very close to an agreement"*, with settlement negotiations continuing to resolve a few remaining issues. Our estimates assume that CECONY is only able to earn ~30bps below its currently allowed 8.8% ROE, but Staff's

Please help us protect your advantage...
DO NOT FORWARD

Provided for the exclusive use of Michael Weisenburger at NiSource on 23-Jan-2023 08:32 AM.

8.8% recommendation and the 45bps multi-year stayout premium in O&R's most recent settlement indicate upside potential – every 10bps of ROE at CECONY is ~$0.05-0.06 of EPS. In the Steam rate case, CECONY is scheduled to file an update on Feb. 10th and Staff is set to file testimony on Mar. 24th. Securing a de-coupling mechanism is key, as ED's energy efficiency initiatives have led to declining Steam sales, even on weather-normalized basis.

- ED will also roll forward its capex plan through 2025. Most of the plan is already known given CECONY's electric/gas and steam rate cases; for O&R, we currently assume that 2025 capex is similar to 2024 levels. Our sense is that there are incremental investment opportunities at CECONY from $4.1B of proposed Phase 2 transmission projects, including the ~$1B Brooklyn Clean Energy Hub, and at CET from the Propel NY proposal. In Dec., CECONY filed a $810M scalable reliability proposal, requesting the NY PSC to approve either the original hub design or the alternative version by its Mar. 16th session.

EIX: Interest rates pressure easing but ROE cut weigh on 2023, 5-7% growth target

- We estimate 2022 EPS of $4.56, near consensus. We expect EIX to introduce 2023 guidance with a midpoint around $4.70, missing $4.78 consensus but in-line with our now-lower $4.69E (about $0.03 below our previous estimate). Our estimates assume the 25bp ROE cut approved last month.
- We expect an update to 2025 guidance and updated capital plan through 2025, though we do not believe the latter will change much.
- Reducing 2023-25E: We cut 2023-25E to $4.69/5.01/5.55 from $4.72/5.07/5.65, mostly reflecting the 25bp ROE cut. Previously, we only had about half of the ~$0.11 hit to 2023 from the ROE cut (no hit to 2024-25), assuming some offsets. But we see operational variances in 2023 roughly flattish to those in 2022, then rising in 2024 and in line with those assumed by EIX for 2025. Our 2024-25E now assume the 25bp ROE cut. Our estimates still assume the previously identified refinancing risk of low-cost debt maturities related to 2017/18 wildfire damages through 2025.
- We see low end of 2025 guidance: On 2025 guidance, a few things to consider are interest rates have moderated since last Nov, modestly less dilution as price of new issuances are higher, and the 2025 allowed ROE could be higher if the cost of capital mechanism is triggered. But we still see 2025E near the lower end of EIX's guidance of $5.50-5.90, as we do not expect EIX to assume ROEs rise. Every 10bp = $0.05 in 2025.
- Wildfire damages: EIX tends to update its 2017-18 wildfire damages estimate every quarter. The last update was a sizeable increase to $8.8B from $7.9B, as of 9/30/22, which was disappointing. EIX indicated the number could still be updated. EIX plans to seek recovery of ~$6B by the end of 2023. No recovery is assumed in EIX's outlook or our estimates. On wildfire risk, EIX received approval of its annual safety certificate for the upcoming wildfire season.
- Equity and B/S: EIX had initially projected $300-400M of equity or equity-like content in 2022. But around $100M of that was tied to the purchase of a storage project being built by Ameresco, which has been delayed to 2023. We believe EIX did not issue equity last year beyond DRIP (~$100M) given the delay and weak share price. This year, we think EIX could issue ~$400-500M, which is above the $200-300M expected annually given Ameresco and a higher share price. EIX points the rating agencies' 15-17% FFO/Debt.

EMA: Not expecting much ahead of Analyst Day

- We forecast FY22 EPS of C$2.97 which is in-line with consensus. We see several puts in takes in Q4. To the positive, we expect better performance at Emera Energy, favorable weather in FL, and a much better FX rate (1.35 vs 1.26). To the negative, reversal of positive FX/LTIP hedges from 4Q21, warmer than normal weather in Nova Scotia, and higher interest costs at the parent.
- EMA does not provide annual EPS guidance. Our 2023E of C3.22 is a touch below consensus at C$3.24. Our estimate implies 8.5% EPS growth YoY driven by TECO's second step increase, new rates at NM gas and continued customer growth at People's Gas. Partial offsets include share dilution and regulatory lag at Nova Scotia Power. We assume a FX rate of 1.30, consistent with EMA's guidance at Q3. Every 0.01 in FX is worth C$0.02 of EPS on an annualized basis.
- EMA has plans to hold an Analyst Day on 3/2 which is just a few days after it reports Q4 results on 2/24. We aren't expecting to get too many new details ahead of the A.D. when EMA reports. One item we do

Please help us protect your advantage...
DO NOT FORWARD

Provided for the exclusive use of Michael Weisenburger at NiSource on 23-Jan-2023 08:32 AM.

expect to have clarity on by the earnings call is the final order in Nova Scotia Power's rate case – recall, there is a settlement pending before the utility review board; the only intervenor that filed negative comments against the settlement was the Province, which is unsurprising given the prior political intervention in the case.

- At a high level, our expectation for the Analyst Day is that EMA will focus investors to the investment opportunities in FL going forward. We also expect there to be a focus on the trajectory of the balance sheet improvement and when EMA will achieve 12% FFO/D. We do not expect any update or extension of the capital plan.

ES: Offshore wind sale after YE call; higher RB but EPS growth target likely unchanged

- We estimate 2022 EPS of $4.10, in line with consensus. We expect ES to introduce 2023 guidance with a midpoint of $4.40 vs our $4.39 and consensus of $4.38.
- We anticipate disclosures on ES' 5yr capital plan, including an update to the existing plan through 2026, which ES has said would be at least $3B higher than its plan from last Feb. We also believe ES will affirm its LT EPS growth target of the top half of 5-7%, regardless of the outcome of its offshore wind sale. While we see the top end as achievable, we understand the risk to raising EPS growth expectations.
- Offshore wind sale likely in 1Q23 but after call: The market is waiting on the two buyers of ES' 50% interest in the offshore wind JV with Ørsted: one for the 1.76 GW of contracted projects under development and another for the 175k acres of undeveloped lease areas. We think the announcement will come after ES' call next month, likely in March or even early 2Q23. We think ES will still get a premium to what the company have invested, given the high value on the lease acreage. ES expects to replace offshore wind earnings in 2026 ($130-150M) with returns from at least $3B of incremental utility investments, the majority of which has been approved or identified (e.g., AMI, MA DER-related resources, and interconnections to third-party offshore wind facilities).
- Reducing 2024-25E: We cut 2024-25E to $4.77/5.11 from $4.87/5.17, mostly reflecting a lower assumed price for its offshore wind interest, which translates into less debt reduction and interest savings, as well as higher interest rates.
- Rates/bills still in focus but weather has helped: ES is not in any large rate cases. But rates were set to rise on commodity prices (mostly from 2022 procurements when prices were higher) and other annual changes 1/1/23. We were bracing for political pushback as customers got their bills this winter, but the mild weather has blunted that near-term. A CT lawmaker proposed legislation that would have the state legislature sign off on rate changes; but we believe that does not have wide support.
- Equity plan unchanged for now: In 2Q22, ES began issuing some equity under its $1.2B ATM program (plus $600M of DRIP), which goes through 2025. But we don't believe ES issued much equity in the latter portion of 2022. We expect ES to continue its ATM program, refining it after the offshore wind sale closes.

ETR: Quite noisy since last earnings call; reg relations in focus

- We estimate 2022 EPS of $6.42, above consensus. We expect ETR to affirm 2023 guidance of $6.55-6.85; our estimate is $6.73 vs consensus of $6.74.
- It has been noisy since Drew and Kimberly's first call as CEO and CFO last Nov, centered around LaPSC storm cost securitization and FERC SERI orders.
- Storm cost securitization: It was resolved last week after a deal was reached (see note). But the tone of the LaPSC meeting was one that may be concerning for investors. We believe ETR will address its strategy to improve regulatory relations, particularly ahead of the next storm season this summer.
- SERI: A late Dec FERC order appeared to resolve two of the more meaningful matters related to lawsuits against ETR's SERI, which owns Grand Gulf nuclear plant. After that 12/23 order, ETR reaffirmed its LT EPS outlook, but the LaPSC, speaking on behalf of the other claimants – AR PSC and NOLA CC – claimed another $850M of incremental refunds related to uncertain tax positions ($510M of which would be owed to the three claimants). ETR has made a compliance filing detailing its conclusion

Please help us protect your advantage...
DO NOT FORWARD

Provided for the exclusive use of Michael Weisenburger at NiSource on 23-Jan-2023 08:32 AM.

that no incremental refunds are owed, and the regulators are expected to file a response soon. FERC may need to clarify.

- Resiliency: ETR filed small portions of its 10yr resiliency plan ($15B) with NOLA CC and the LaPSC. The performance of an advanced resilient grid in FL after Ian is a real-world example of the benefits from resiliency investments. Given the recent noise at LaPSC, we think investors will ask about the chances of getting resiliency approved. Note ETR has only $900M of the $2.6B of resiliency costs through 2025 in its 2023-25 capital plan.

EVRG: Weak 2023, but strong second half story into manageable KS case

- We are raising our 2022E to $3.62 (from $3.57) – ahead of consensus and at the top-end of $3.53-3.63 guidance. This range was just raised on the Q3 call, but there was a lot of favorable weather that came in since then. Besides weather, we see Q4 driven by absence of a one-time Kansas tax hit, transmission rate relief, O&M savings and bill credit expirations; partially offset by higher depreciation and absence of non-regulated outperformance last year.
- We've also lowered our 2023E to $3.63 (from $3.72) ahead of EVRG issuing guidance – below consensus and implying only 2.5% growth off the original 2022 guidance midpoint. This has likely been a big driver of recent underperformance. While we previously added back some of the benefits of the revised Missouri rate order, we underappreciated the inability to find material short-term offsets to interest rate headwinds (300bps = $0.12/sh). Which when combined with $0.08 of one-time Missouri rate items (Sibley $0.05, AMI $0.01, hydro PPA $0.02), is too much to overcome.
- Importantly though, we expect EVRG to reaffirm its long-term 6-8% EPS CAGR over 2021-2025 (no changes to the base of time horizon). It will be important for mgmt. to convey what are the drivers to get back on track after 2023, such as O&M management.
- The big focus for 2023 will be the Kansas rate case, which will kick-off in late-April. The state has had rate sensivity, but we believe EVRG has a good story to tell. Rates were up just 1% over the 2017-2022 stayout and are projected to rise at a 2% CAGR over 2022-2026. This is far below inflation and regional peers. We found commissioner commentary at a December workshop to be relatively constructive. Further, we saw the recent KCC Staff recommendation in the ATO case to be reasonable – higher ROE and equity ratio.
- We also expect EVRG to roll-forward its five-year capital plan to 2027. This could move up modestly from $10.7B, but should still support 5-6% rate base growth. In June EVRG will file its latest Integrated Resource Plan, which should lay out the latest fleet transition plan post-IRA.

EXC: EPS growth again in focus on roll-forward; hoping addressed by return to annual ranges

- We estimate 2022 EPS of $2.25, in line with consensus. We expect EXC to introduce 2023 guidance with a midpoint around $2.33, slightly below consensus of $2.36, the 30Y UST yield (currently 3.7%) will be a key assumption since it is the final year of IL's formulaic rate plan; every 50bp increase in 30Y is about +$0.04, though that is partially offset by higher interest rates, with every 50bp increase in rates equal to -$0.01.
- EPS growth will again be in focus, this time 2026 and beyond; still see 6-8%: EXC stock was hurt last year on the question over nonlinear EPS growth and conviction on its 6-8% through 2025. New mgmt. clarified and confirmed the messaging around both, helping the stock somewhat recover. We now expect the market to focus on growth beyond 2025. The nonlinearity – driven by triennial PECO rate cases – will remain, so whether the 6-8% is intact through 2026 and off what base year will be key questions. Every new year, EXC typically extended its utility EPS growth one-year and based it off actuals. Last year, it estimated off an expected 2021. We think EXC can still be within 6-8% through 2026 and off 2022A. We project 6.5% growth 2022-26.
- Annual ranges: We think EXC could return to providing annual EPS ranges during its forecast period, which would go a long way in terms of visibility.
- IL rate case: EXC filed a ComEd rate case last week under the 4-year rate plan framework enacted in 2021. It is quite early, but we expect questions on planning assumptions. ComEd requested ~10.5%

Please help us protect your advantage...
DO NOT FORWARD

Provided for the exclusive use of Michael Weisenburger at NiSource on 23-Jan-2023 08:32 AM.

ROEs, rising 5bp annually. But we suspect EXC's outlook will assume something less than that. Notably, EXC will be able to earn up to 32bp of incentives to the ROE under the MYP framework. Our ComEd ROE forecasts in 2024 and beyond are ~9.5%, close to the 9.6-9.7% ROEs authorized to gas LDCs in IL over the past few years.

- AMT and equity: EXC expects to get IRS guidelines on the deductions under IRA but has indicated a worst case is ~$200M/yr cash hit. EXC suggested it would work to mitigate that impact. EXC does not anticipate any incremental equity needs beyond the $400-450M previously identified and expected to be issued anytime in 2023-25.

FE: Big catalysts remain pending; asset sale could be before call

- We project 2022 EPS of $2.42 – in-line with consensus and just in the top-half of $2.30-2.50 guidance that FE pointed too. We see Q4 driven by similar items to earlier this year – Ohio rate credits, vegetation mgmt. accounting change, equity dilution, and the FET stake sale. To the positive, FE will benefit from both distribution/transmission rate base growth and interest cost savings from debt paydown, as well as continued mining outperformance.
- Alongside our earnings preview, we published a refreshed FE model that results in our estimates moving up to $2.50/2.65/2.83 across 2023-2025 (from $2.43/2.62/2.80). This assumes another 20% FET stake sale for $2.4B closes around mid-year, with proceeds going towards debt paydown in an accretive manner. We also assume continued coal mining outperformance in 2023 that nearly fully offsets the pension headwind. FE will issue 2023 guidance on the call – our new $2.50 estimate is in-line with consensus and slightly below the implied range of 6-8% growth ($2.55-2.60). Our 2025E implies a 5.7% CAGR off the 2022 guidance base and is still slightly below consensus.
- Speaking of pension risk exposure – we see the 2023 headwind finishing close to the $0.45/sh it was at Q3-end. FE has been working on mitigants like cost cutting and interest cost savings; but our sense is the vast majority is really coming from the low-quality mining business.
- As part of our updated model assumptions, we believe FE can achieve its target of 14-15% FFO/Debt by 2024. FE will be able to significantly reduce its outsized holdco leverage. We expect restoration of investment grade ratings this year, which could be a nice catalyst.
- We're also looking for updated disclosures on capex and rate base, as FE has alluded to potential upside in NJ/PA. We believe a stronger balance sheet could help enable this. Current rate base growth is only 4% at the distribution businesses (9% at transmission). This year will also start a big rate case cycle for FE with filings in NJ/WV/MD in 1H23. The bigger PA/OH jurisdiction filings will be made in 2024.
- Finally, everyone is still waiting on the outcome of the important CEO search. We sense the timing on this may have slipped beyond the year-end call, as FE continues to seek someone with a strong reputation amongst investors.

FTS: Low key call after the big Q3 update

- We project 2022 EPS of $2.75 – in-line with consensus. We see Q4 earnings driven by ITC rate base growth, more favorable FX rates, and potentially better Belize hydro; partially offset by weaker higher interest costs. Notably, our estimate would imply 6% growth YoY, which is the first material growth since 2017. As a reminder, FTS doesn't give annual guidance. We forecast 2023E of $2.96 versus $2.98 consensus.
- FX continues to move in FTS' favor. They assumed $1.30 in their outlook versus the $1.34 current rate. Every $0.01 move is $0.01 of EPS.
- FTS refreshed its five-year capex and rate base growth with Q3. It also lowered its dividend growth outlook to 4-6% (from 6%). We don't see any changes to any of this.
- The big focus to start 2023 is the pending Arizona rate case. We found the ACC Staff recommendation to be a reasonable starting point – an allowed ROE of 9.60% would be above TEP's current 9.15%, and Staff was on board with the higher 54% equity ratio. We're still waiting on rate design testimony (1/27) that will take positions on TEP's proposed renewables transition rider. It'll be key to see how the new

Please help us protect your advantage...
DO NOT FORWARD

Provided for the exclusive use of Michael Weisenburger at NiSource on 23-Jan-2023 08:32 AM.

ACC weighs in following the elections for 2 seats last fall. In recent history, final rate case outcomes have been worse than the Staff rec.

LNT: Working to address the remaining solar/storage in IA; WI rate case filing in Q2

- We forecast 2022 EPS of $2.79 – in-line with consensus and just below the midpoint of the $2.76-2.83 guidance that was raised back in Q3. We see the quarter up materially YoY, driven by rate relief, catch-up AFUDC earnings due to switching from tax equity to full ownership of renewables in Q3, more favorable weather vs. 4Q21, and sales growth. Partial offsets include higher D&A and interest expense.
- We expect LNT to reaffirm 2023 guidance of $2.82-2.96. As is typical, we expect LNT to re-base its long-term 5-7% EPS CAGR off temperature-normal 2022 guidance midpoint of $2.73. Given the lack of rate relief in 2023, LNT is focused on lowering O&M to offset the pressures forecasted from higher interest expense and equity dilution.
- LNT thinks there is a good path for rate-basing NEE's 200 MW Duane Arnold solar and plans to file more information requested by the IUB by January-end. On the remaining 200 MWs of solar in IA, LNT is currently deliberating whether to restart the advanced ratemaking process, which gets a premium ROE, by more definitively identifying sites vs. moving forward and requesting recovery through a traditional rate case. 75 MWs of proposed battery storage will likely require further discussion with the IUB. In WI, LNT intends to place 600 MWs of solar in-service in 2023 and bring another 250 MWs online in 1Q24 – within the 6/1/24 accredited capacity deadline for the MISO capacity auction.
- LNT will file its next WI rate case at the end of April/beginning of May, with an outcome expected by YE23. At EEI, mgmt. pointed to mid-single-digit annual customer bill increases over the life of its plan, inclusive of fuel. In prior WI rate cases, LNT used regulatory liabilities on WP&L's books to mitigate customer bill increases. LNT is engaging in discussions with intervenors, but we sense that the absence of these offsets makes reaching an upfront settlement (even before filing) more difficult this time. This rate case will be watched closely given some concern around WEC's recent one that resulted in a constructive outcome after the initial settlement was rejected.

NEE/NEP: All about the investigation

- We estimate 2022 NEE earnings of $2.86 – slightly below consensus and the top-end of its $2.80-2.90 range. We see 9% rate base growth at FPL. Typically NEE uses some reserve amortization in Q4 ($137M last year) and this stood at the full $1.45B as of Q3-end. New Resources projects online will also be a driver, though wind conditions were just above normal last year (101% last year). Equity dilution from the unit conversions will also be a headwind.
- NEE has been consistent that it expects to provide an update on its second internal investigation around the Florida political noise by the year-end call. We view the fact that nothing has been disclosed yet as possibly a good signal. If something concerning was found, we believe NEE would've acted quickly rather than waited until the call. If the findings of the investigation are benign this would lift an overhang on the stock.
- We're not expecting any changes to NEE's long-term financial outlook, after it was re-based higher two times last year. We expect NEE to point to the high-end of 2023 guidance of $2.98-3.13 (us/consensus are already there), as well as the high-end of the long-term 6-8% EPS CAGR based off 2024.
- As always, NEER's backlog additions will be in focus. Last quarter saw an impressive 2.36 GWs added, but there was also 0.68 GWs that came out of the backlog. In Q4 last year, NEE added 1.52 GWs. We expect 2022 to a set a new high watermark, above the 7.2 GWs added across 2021. The current backlog totals 20.0 GWs.
- At NEP we estimate Q4 EBITDA of $401M – below consensus, but above $322M last year. This is being driven by a multitude of dropdowns that closed last year and the absence of major maintenance costs at Genesis. Wind conditions were 101% of normal last year, so this may not be a big swing factor. We expect NEP to reaffirm its 2022-2023 year-end run-rate guidances of $1,785-1,985M and $2,200-2,420M respectively.

Please help us protect your advantage...
DO NOT FORWARD

Provided for the exclusive use of Michael Weisenburger at NiSource on 23-Jan-2023 08:32 AM.

NI: Looking for updates on NIPSCO minority sale and rate case

- We estimate FY22 EPS of $1.45 which is in-line with consensus. Positive drivers in Q4 include rider investments and O&M savings. Partial offsets include share dilution and higher interest expense and D&A.
- Our expectation is that NI will reaffirm its 2023 guidance of $1.50-1.57. Our 2023E of $1.54 matches current consensus. Given that NI recently refreshed/roll forward its capex and financing plan at its Analyst Day, we don't expect any material financial updates on the call.
- Intervenor testimony in NIPSCO's rate case was just filed on Friday (1/20) and we thought the OUCC's recommendation was a decent starting point coming in at ~62% of NIPSCO's ask. ROE at 9.20% (vs the 10.4% request and 9.75% currently allowed) is low but not surprising. There were no major differences on rate base. We look to hear more from management on the potential for reaching a settlement.
- The other rate case that still needs to be finalized is OH, where parties filed a settlement in early November. PUCO has yet to place the settlement on an agenda for a final vote. We don't believe there to be any cause for concern in not acting yet and will be watching upcoming agendas closely (PUCO meets twice a month, next open meeting is 2/25). Note, OH's rate structure is such that each month is effectively equal from an earnings standpoint – so a delay in getting new rates in Q1 isn't overly impactful.
- The sale process for a minority stake in NI's NIPSCO electric/gas utility formally kicked off in 1Q23 and we will be interested to get an update on the call. NI has had some inbound conversations ahead of formally launching the process and our sense is that the company has been pleased thus far with the level of interest. Our expectation is a formal sale announcement around midyear, with the sale to close be YE. The sale shouldn't require IURC approval but is likely to need FERC to sign off. We currently assume NI can sell a 19.9% stake for 2.2x book equity, though think there could be upside to that.

NRG: Expecting big Q4 miss vs. guidance on continued challenges; Vivint revenue synergies

- **Big miss expected with results well below guidance.** We forecast 4Q22 EBITDA of $430M, which is significantly below consensus. This implies FY 2022 EBITDA of $1,749M, or about $200M below the bottom end of the FY 2022 EBITDA guidance range of $1,950M - $2,050M. We assume a $100M placeholder negative for performance during the December winter storm due to a mix of net capacity performance penalties in PJM and stronger than expected load during the price spikes in ERCOT. Additionally, on the last call NRG referenced expectations for $100M+ of YoY growth in Q4 due to power and gas optimization opportunities with plans to keep the gas plants fully available. We don't think this materialized and so is a negative vs. the guidance.
- **Vivint and buybacks.** It's unclear if the VVNT acquisition will close prior to the Q4 call – our guess would be it does not and so we expect 2023 standalone guidance to be reiterated. That said, we think NRG will provide more details on expectations for revenue synergies as this wasn't discussed much as part of the transaction announcement call. On buybacks, the remaining $360M commitment seems less likely to be completed until later in the year given recent challenges and until the VVNT financing plan is completed. This may be frustrating for investors given the large decline in the stock price created an opportunity to buy the equity back cheaper.
- **Estimate changes.** We lower our 2022 EBITDA estimate by $211M to $1,749M to reflect a negative placeholder for performance during winter storms in both PJM and ERCOT, as well as reduced optimization opportunities. We trim our 2023-24 EBITDA estimates by $30M to $3,090M and $3,110M, respectively, given reduced confidence in the outlook after a number of challenges in recent years. Our 2023-24E assume a full year contribution from VVNT for simplicity.

OGE: Initial 2023 guide, 5-year outlook refresh; pre-approval of RFP capex key focus

- Our consolidated FY22 estimate is $2.20; for OG&E, our EPS of $2.10 is in-line with the midpoint of the $2.08-2.12 utility guidance range that was raised in Q3. We YoY utility-only results in Q4 down $0.05, driven by higher D&A, O&M, interest expense/property taxes, and decreased recovery through rider mechanisms; partial offsets include more favorable weather vs. 4Q21, rate relief, load growth, and the

Please help us protect your advantage...
DO NOT FORWARD

Provided for the exclusive use of Michael Weisenburger at NiSource on 23-Jan-2023 08:32 AM.

reversal of one-time headwinds from 4Q21 (Uri securitization settlement & transmission reserve). We assume pull-forward of some O&M from 2023 into Q4 given strong YTD results. Our consolidated 4Q22 estimate is down $0.12 YoY, primarily due to the loss of midstream earnings from OGE's full ET exit.

- Key updates on the Q4/YE call include initial 2023 guidance & financing plan as well as a roll forward / refresh of OG&E's 5-year capital plan. Our 2023E of $2.03 is slightly below consensus at $2.05; our utility-only estimate of $2.05 implies a ~6.5% CAGR off the 2021 utility guidance midpoint of $1.81. We will also be watching for OGE's sales growth forecast, with mgmt. being confident at Q3 that 2023 W/A load growth will exceed OGE's 1% historical level, even excluding incremental data mining load.
- To meet ~1.3-1.4 GW of generation needs over 2023-27, OGE is currently negotiating with bidders to its solar, flexible & existing resource RFPs and intends to file for pre-approval of capacity resources by the end of Q1 – it could either request a rider or seek recovery later through a traditional rate case. Consequently, we do not expect OGE to add any RFP capex to its capital plan until it secures pre-approval for these investments from regulators. At EEI, mgmt. also pointed to moderating T&D capex some in generation capex heavy years to smooth rate base growth and manage customer bill impact.
- Given the loss of midstream distributions, OGE will need to issue HoldCo debt in the outyears to finance higher capex. While OGE presently targets 18-20% FFO/Debt over 2022-24, a lower credit rating downgrade threshold in the range of 16-17% post its complete ET stake exit would provide more balance sheet headroom.
- Another item to monitor in Q1 is OG&E's FRP rate adjustment application in AR, where APSC Staff recently recommended a $9.59M hike (based on 4% of revenues cap) effective Apr. 1st. A hearing is scheduled for Feb. 8th, with an APSC decision anticipated by early-Mar.

PCG: Operational and regulatory improvement should pay dividends

- We estimate 2022 EPS of $1.09, in line with consensus. We anticipate PCG will reaffirm 2023 guidance of $1.19-1.23 and its total return target of at least 10% annually. Our 2023E is $1.20 vs $1.22 consensus.
- We do not anticipate new material disclosures, given they were provided on the 3Q22 call. PCG had some noticeable successes improving operations and regulatory/legislative relations last year, which we anticipate mgmt. to highlight. Looking forward, we expect a discussion on the dividend, GRC, undergrounding, minority sale and wildfire mitigation. PCG cannot say much on FVT holdings, but we expect questions around the FVT's stock sales.
- PCG is our top utility pick: For more on our thoughts on PCG, please see our recent note. PCG is also on Wolfe's Alpha List (note).
- Dividend resumption: PCG's eligibility to reinstate the dividend is $6.2B of cumulative non-GAAP core earnings since 3Q20 (inclusive). PCG is on track to reach that by 2Q23 reporting. While the exact declaration and payment dates remain TBD, PCG has been clear that when the dividend is reinstated it would be "very small" and grow "over time." We think the size is less important at this stage than to its resumption. We view this as a key catalyst for the stock.
- FVT stock sales: The FVT now has 188M shares left after selling 290M shares since last Jan (over several blocks). We believe the FVT overhang is abating and see a complete exit this year – a key catalyst for the stock.
- GRC decision still expected 3Q23: The primary regulatory item this year is the GRC, which has been ongoing since 2021 by design. A final decision is expected in 3Q23. PCG has settled a couple of items – including self-insurance and certain cash recovery items – but at this point we anticipate a full decision. It is a sizeable ask in the first year (~30%) and contains undergrounding spend, though 40% less than it had initially requested. Undergrounding is one the final items yet to be fully briefed, but it is not expected to delay the GRC.
- PacGen minority interest sale schedule appears to be later than hoped: In Nov, PCG said no equity issuances are planned through YE24, assuming a sell of up to 49.9% in its newly created utility generation subsidiary were approved and completed by YE23. Intervenors pushed back on the requested expedited process at the CPUC, and just on 1/20 a scoping memo was issued rejecting both of PCG's requests: an assigned commissioner's ruling on the framework before evidentiary hearings – to derisk the sale for interested buyers – and a final decision in Jun (the scoping memo implies Dec).

Please help us protect your advantage...
DO NOT FORWARD

Provided for the exclusive use of Michael Weisenburger at NiSource on 23-Jan-2023 08:32 AM.

We don't anticipate the delay to meaningfully impact PCG's outlook, as it appears to be more a question of timing.

- Wildfire litigation and safety certificate: PCG still has some pending litigation from Zogg and Dixie. It has reached settlements with counties, including an immaterial settlement on Dixie last week. PCG is in settlement talks with the CPUC SED over a proposed $155M penalty, putting the case on hold through end of this month. Notably, PCG has already received its safety certificate for the next wildfire season.
- Undergrounding plan later this year, would be 10yr plan from 2024 or later: PCG was able work with legislators on undergrounding legislation (as well as a Diablo Canyon life extension bill) last year. The undergrounding bill de-risks PCG's planned 10,000 miles. PCG reduced its undergrounding plans in the pending GRC to $6B from $10B, covering spend through 2026. When PCG files its undergrounding plan, expected after the CPUC kicks off the process this year, it will be a full 10yr plan from either 2024 or maybe even 2025; i.e., undergrounding investments will run into the mid-2030s. The regulatory approval process will take 18 months from filing.

PEG: Relatively uneventful after EEI kitchen sink

- We see 2022 EPS of $3.48 – slightly above consensus and the midpoint of PEG's $3.40-3.50 range. Similar to prior quarters, we see Q4 being driven by a number of timing items related to 2021's fossil asset sale. There was also an $0.08 tax timing hit at the utility last year. Positive drivers at the utility include transmission and infrastructure investment recoveries.
- Alongside our earnings preview, we also updated our commodities assumptions for generators. Our PEG estimates move to $3.46/3.65/4.10 over 2023-2025 (from $3.47/3.57/3.99). PEG was basically fully hedged in 2023 (where pricing had rolled over), with more exposure in 2024 (where pricing was still above our prior assumptions). Our 2025E is slightly below consensus, but actually implies a 9% CAGR off 2023. PEG's 5-7% CAGR assumed pricing at the PTC floor (or 2025 estimate would be ~$0.15 lower in that scenario)
- PEG issued 2023 guidance of $3.35-3.55 at EEI. This was disappointing, as the company re-based its long-term 5-7% EPS CAGR off this low level. Our estimate is $3.46 and in-line with consensus. We expect the guidance to be tightened to a $0.15 range as PEG will have a better sense of its year-end pension impact. At EEI, PEG assumed a $0.25-0.30 pension headwind in 2023 (we're also still waiting on action from the BPU on the request for an accounting order to mitigate ~20%).
- There's been some focus recently on PJM fleet performance during the Christmas cold front that strained the grid. PEG's joint-owned Salem Unit 2 was down for 2 days, but the rest of its nukes ran well. Our sense is that any penalties would likely be offset by performance payments.
- The big recent news was just last week – PEG formally decided to exit its 25% stake in Ørsted's 1.1 GW Ocean Wind 1 project in NJ. This was unsurprising given prior caution around the nascent industry expressed by management. We're now waiting to see what comes of PEG's GSOE lease area that it shares with Ørsted and will likely look to monetize.
- We expect PEG to hold an Analyst Day in March, where it could provide a further update on its long-term vision.

PNW: Expecting a weak 2023 guide due to pension pressure

- Our FY22 EPS estimate of $4.29 is in-line with consensus at $4.27. Weather looked favorable in Q4, so it is possible that PNW could finish at or slightly above the top end of its guidance range of $4.20-4.35.
- We believe PNW will provide 2023 guidance despite having its rate case pending. This is counter to prior practice, but we think management wants to be transparent + the rate case outcome will have very little impact on 2023. We are lowering our 2023E to $3.95 from $4.15 – a miss vs current consensus at $4.16. The main driver is the $0.30 hit from pension that we now assume, which mostly offsets sales growth. We leave our 2024-25E unchanged for now as half the pension impact should be addressed in the rate case and we wait to see if PNW can find some offsets to minimize the remaining amount.
- We also expect PNW to extend its capex and rate base forecast through 2025. We think capex in 2025 to be similar to 2024 at $1.65B, supporting the same 5-6% rate base CAGR. We don't think PNW has any incentive to make material updates to capex without seeing the outcome of the rate case first. What

Please help us protect your advantage...
DO NOT FORWARD

Provided for the exclusive use of Michael Weisenburger at NiSource on 23-Jan-2023 08:32 AM.

happens with the clean energy rider request will also dictate future levels of capex for renewable projects.

- As it relates to APS's rate case, we thought Staff's testimony for in-state peer TEP was fairly constructive. The 9.6% ROE rec is well above APS's current 8.7%. However, Staff recs have generally been OK in Arizona, it is the Commissioners that have proved difficult (though recent signs have suggested that will get better). We will be closely watching when testimony on rate design is filed on 1/27 to see where Staff stands on TEP's Resource Transition Mechanism request.
- We are still likely months away from know the outcome of PNW's rate case appeal at the state appellate court. Oral arguments concluded at the end of November and we now await the judges' final decision. A ruling in PNW's favor would most importantly fix precedent in the state for utility asset recovery but would also be a ~$0.10 EPS boost.

POR: Weak 2023 guidance; high power costs hurt Q4; rate case filing soon?

- We are lowering FY22 EPS estimate by $0.09 to $2.76, which is below consensus at $2.82 and towards the low-end of POR's $2.74-2.89 non-GAAP guidance range. We see YoY results in Q4 down $0.15, primarily due to higher NVPC, with Mid-C power prices averaging 155% higher vs. 4Q21 as per EIA.
- POR will provide 2023 guidance on its Q4/YE call. We are cutting our 2023E by $0.08 to $2.64, which is below current consensus at $2.73, to reflect POR's upsized equity forward and lower issuance price. We expect 2023 to be a weak year due to Faraday's drag (~$0.08), cost inflation/O&M pressures, and higher interest rates, partially offset by sales growth. AFUDC from Clearwater Wind will largely offset dilution from RFP progress payments, but the timing of POR balance sheet restoration equity draw will be important – we presently assume mid-year. Similarly, we are trimming our 2024/25E by $0.06/$0.08 to $3.02/$3.17 due to the aforementioned equity dilution and assuming modestly more regulatory lag. Our 2025E implies a ~4% CAGR off POR's 2022 non-GAAP guidance midpoint of $2.82.
- We think it's likely that POR files a rate case this year (typical timeline is in Feb., with a 10-month process), where the key focus will be addressing/proposing an alternative to the PCAM mechanism to reduce earnings volatility. Our sense is that POR will also seek to include Faraday (~$149M of CWIP + AFUDC as of Q3) in its rate base, secure recovery for O&M inflation/cost pressures, and address rate design since its load growth appears to be more weighted towards lower-margin industrial customers.
- POR remains optimistic about the possibility of rate basing ~200 MW of battery storage stemming from its active 2021 RFP, although contract awards will likely slip into Q1. Assuming ~$2,000/kW of installed capacity, this implies ~$400M of incremental capex. Every $100M of additional RFP capex is ~$0.015 of EPS, net of more equity financing required, which POR expects to issue through an ATM.
- POR will file an updated IRP in Q1, along with its 1st Clean Energy Plan, and launch its next RFP in Q2; bidding and negotiations will occur in 2H23, followed by contract awards in 1H24. POR needs ~3,400 MW of renewables/non-emitting capacity to meet OR's HB 2021 goals, for which it will likely issue an additional RFP later this decade. Winning additional RFP projects will be key to hitting the L-T 5-7% EPS CAGR by 2025 – POR has >50% ownership of renewables generation in the outstanding RFP with Clearwater Wind and will own >50% of non-emitting capacity if it wins ~200 MW of batteries.

SO: Flattish 2023 guidance, lower 2024 well-telegraphed; Vogtle update

- We estimate 2022 EPS of $3.59, in line with consensus and SO's own guidance of top end of $3.50-3.60. We believe SO will introduce 2023 guidance that is flattish to 2022, maybe a midpoint of $3.60, which is below consensus of $3.71 but in line with our $3.61e.
- SO is expected to disclose its 2023-27 capital and financing plans, projected rate base growth, updated 2024 guidance and LT EPS growth. We expect SO to affirm 5-7% growth off 2024 guidance.
- 2024 guidance to be lowered: SO has widely telegraphed a reduction to its 2024 guidance of $4.00-4.30, pointing to the lower tercile given interest rate headwinds and carrying costs on Vogtle impairments subsequent to the initiation of the 2024 guidance in early 2021. We see 2024 guidance with a midpoint of $4.05, slightly below consensus of $4.08.
- Vogtle update: SO pointed to a pipe issue earlier this month on U-3 as cause for a one-month delay to COD (now Apr 2023); SO has since gotten NRC approval for a remediation. GaPSC Staff recently said it did not see a similar pipe issue at U-4 and actually said it was "impressed" by the "high-quality" work

Provided for the exclusive use of Michael Weisenburger at NiSource on 23-Jan-2023 08:32 AM.

at U-4. SO still anticipates COD of U-4 by YE22. Staff has said it is "reasonably possible" for SO's CODs to be delayed a quarter (implying 2Q23 for U-3 and 1Q24 for U-4). Every quarter delay is $0.02 for U-3 and $0.05 for U-4. SO will provide an update on Vogtle on its 2/16 call, as it submits VCM 28 (the semiannual update).

- Vogtle prudency: Once U-4 achieves fuel load (Jul/Aug), the prudency case will begin. That will be only major regulatory proceeding for SO over the next few years, following last month's GA Power rate case decision, which we viewed as constructive (10.5% ROE with 11.9% cap, 56% equity ratio).
- GA PSC: The two PSC comms (Echols and Johnson) up for reelection last year remain on the PSC until an election is set by the state of GA. That could be this year, but it depends on a pending court appeal and GA lawmakers. All current comms could vote on any Vogtle prudency matters this year. GA Power also will file for fuel cost recovery next month, but the deferrals (over $1.7B) are expected to spread out over several years, mitigating rate shock.

SRE: Full refresh of outlook expected; approaching Port Arthur FID

- Our 2022 EPS estimate is $9.02 vs. $8.42 in 2021; we are at the top end of SRE's 2022 guidance range and ahead of consensus. We expect a strong Q4 on a combination of steady CA utility growth, cold weather at Oncor and upside at Infrastructure net of the selldown. The main swing variable will be to what extent SRE benefited from the high SoCal border gas prices in its marketing arrangements; the question is how much open exposure SRE had to the high prices.
- **Full refresh of outlook and growth rate likely.** We expect SRE to do a full capital plan and outlook update on the yearend call. This will include an update of 2023 current guidance of $8.60-$9.20, introduction of 2024 guidance ($9.58 WRe vs. $9.62 consensus), and a refresh of the LT growth rate. On the growth rate, we wouldn't be surprised if SRE maintains a 6%-8% LT growth rate over 2022 (original guidance of $8.10-$8.70 as the 2022 base)-2026 just for projects that are in the execution backlog.
- **Oncor rate case clarity?** The PUCT is expected to consider the Oncor rate case at its February 16 open meeting; as a result there should be clarity on what the rate case means for SRE's outlook. The ALJ's recommendation was fairly mediocre for Oncor but a correction filed last week resolved some uncertainty on rate base; exceptions will be filed on 1/24.
- **LNG and Port Arthur.** The keys on the LNG strategy in the coming months is finalizing the conversion of the PGNiG heads of agreement into a binding SPA and the finalization of the financing of Port Arthur. At that point the facility can FID. SRE has targeted a Q1-23 FID so we see a reasonable likelihood of there being positive announcements on this on the call.

VST: Fleet performance feels okay; otherwise uneventful after Q3 updates

- We're forecasting 2022 EBITDA of $3,113M – in-line with consensus and in the upper-half of the $2,960-3,160M guidance range. We see Q4 down materially YoY, as recall that last year featured a $540M gain from Uri securitization proceeds.
- Alongside our earnings preview, we also updated our commodities assumptions for generators. Our VST estimates move to $3,605/3,636M over 2023-2024 (from $3,581/3,454M. Recall that for most of 2022 we had conservatively kept our assumptions below market pricing, but have now seen a material roll-off in the commodity environment in recent months. While 2023 pricing actually moved below our deck, VST is 90% hedged. Whereas 2024 pricing was still above our deck. Notably, the downward shift in nat gas has outpaced power, such that sparks haven't been hit as hard. That said, the sustained elevated coal pricing environment could be a modest pressure.
- We expect VST to reiterate its 2023 guidance range of $3.4-4.0B. Further, we still believe the soft guidance of a ~$3.5-3.7B range over 2024-2025 should still be intact. VST was 70% hedged over 2023-2025 as of the Q3 call. We expect a more detailed look at 2024 hedges with the year-end call.
- The big focus on VST's call will be its fleet performance during Winter Storm Elliott that resulted in chilling temperatures across the country. We have better insight into outage data within ERCOT, where we saw modest outages for VST's fleet, but nothing material during the periods of price spikes. There's been a lot of focus on PJM, where we're more in the dark on outage data, but it was reported that 23% of power plants were down around Christmas. Most of these were nat gas plants, with most of VST's

Please help us protect your advantage...
DO NOT FORWARD

Provided for the exclusive use of Michael Weisenburger at NiSource on 23-Jan-2023 08:32 AM.

PJM fleet being gas. PJM reported that there could be fines of up to $1-2B based on its capacity performance construct. Our sense is that VST's PJM fleet had some plusses and minuses in terms of performance that should result in a manageable outcome.

- We don't expect any major capital allocation updates. VST had $1.2B to go on its buyback by YE23 as of the Q3 call. The rollover in commodities should alleviate some of the liquidity strains (and temporary debt costs), as cash collateral comes back in the door.

WEC: Wisconsin rate case post mortem; headed into Illinois cases

- We forecast 2022 EPS of $4.40 – in-line with consensus and at the top-end of WEC's $4.38-4.40 guidance, which is where it has pointed after raising several times last year. We see Q4 EPS driven by favorable weather and Wisconsin rate relief; offset by depreciation and interest costs.
- WEC already issued 2023 guidance back in December at $4.58-4.62. This was in-line with consensus/us and reflected 6.7% growth off original 2022 guidance – consistent with WEC's 6.5-7% EPS CAGR. Rate relief in Wisconsin is expected to be a primary driver for this year.
- We expect continued focus on the Wisconsin regulatory environment, after WEC saw a constructive final outcome in its case last year, but this was accompanied by some bothersome commentary from commissioners. As a reminder, allowed ROEs came down modestly to 9.80%, but allowed equity ratios moved up to 53%. WEC also got ~79% of its original revenue ask. WEC won't file its next case for another year, but many will also be watching in-state peer LNT's case this year.
- WEC also recently announced that it would be filing rate cases in Illinois. At PGL, this is the first case in 9 years (before WEC acquired TEG). Interestingly, WEC decided not to pursue a renewal of the QIP rider legislation. At the smaller NSG, WEC saw a recent outcome in late-2021 that resulted in a better ROE and equity ratio than PGL has currently.

XEL: Key is resolving Minnesota rate case constructively

- We estimate FY22 EPS of $3.17 which is a penny above consensus and at the midpoint of XEL's $3.14-3.19 guide. We think XEL saw some weather favorability in Q4, which should allow the company to finish in the upper half of its range.
- We expect XEL to reaffirm its 2023 guidance of $3.30-3.40. Our estimate of $3.36 is slightly below consensus at $3.38. We don't expect any material updates to the capex/financing plan as XEL just did its roll forward/refresh on the Q3 call.
- Most of our focus for XEL currently is on the pending Minnesota electric rate case. There is still time for parties to reach a settlement as the ALJ report isn't due until March 1st. Our understanding is that XEL has made some progress with a key intervenor – the Dept. of Commerce – but it is less clear if the other parties will get on board. As a reminder, every 10bps of ROE is worth about a $0.01 of EPS for XEL; MN electric accounts for ~30% of XEL's total rate base.
- Outside of the MN rate case, we will also be watching the CO electric case closely in 2023. However, that case is still early days and there has yet to be a procedural schedule set. XEL's pending RFPs in CO and MN are also focus items this year. The two RFPs represent $1.5-3B of incremental capex upside, majority of which would come from the CO RFP. Details in the MN RFP should be known around midyear while CO is likely some point in the fall.
- As it relates to IRA, we will be curious to hear if there are any updates with respect to XEL's plans to transfer tax credits directly to other big corporations in Minneapolis. Recall, XEL's 5-year plan assumes $1.8B of tax credit transfers.

WOLFE RESEARCH

January 22, 2023

DISCLOSURE SECTION

Analyst Certification:

The various Wolfe Research, LLC analysts who are primarily responsible for this research report certify that (i) the recommendations and opinions expressed in this research report accurately reflect the research analysts' personal views about the subject securities or issuers and (ii) no part of the research analysts' compensation was, is or will be directly or indirectly related to the specific recommendations or views contained in this report.

Important Disclosures:

Other Disclosures:

Wolfe Research, LLC Fundamental Stock Ratings Key:

Outperform (OP):	The security is projected to outperform analyst's industry coverage universe over the next 12 months.
Peer Perform (PP):	The security is projected to perform approximately in line with analyst's industry coverage universe over the next 12 months.
Underperform (UP):	The security is projected to underperform analyst's industry coverage universe over the next 12 months.

Effective August 1, 2022, Wolfe Research, LLC will no longer publish target prices for Peer Perform rated companies.

Wolfe Research, LLC uses a relative rating system using terms such as Outperform, Peer Perform and Underperform (see definitions above). Please carefully read the definitions of all ratings used in Wolfe Research, LLC research. In addition, since Wolfe Research, LLC research contains more complete information concerning the analyst's views, please carefully read Wolfe Research, LLC research in its entirety and not infer the contents from the ratings alone. In all cases, ratings (or research) should not be used or relied upon as investment advice and any investment decisions should be based upon individual circumstances and other considerations.

Wolfe Research, LLC Industry Weighting System:

Market Overweight (MO):	Expect the industry to outperform the primary market index for the region (S&P 500 in the U.S.) by at least 10% over the next 12 months.
Market Weight (MW):	Expect the industry to perform approximately in line with the primary market index for the region (S&P 500 in the U.S.) over the next 12 months.
Market Underweight (MU):	Expect the industry to underperform the primary market index for the region (S&P 500 in the U.S.) by at least 10% over the next 12 months.

Wolfe Research, LLC Distribution of Fundamental Stock Ratings (As of January 22, 2023):

Outperform:	47%	8% Investment Banking Clients within the previous 12 months
Peer Perform:	42%	5% Investment Banking Clients within the previous 12 months
Underperform:	11%	0% Investment Banking Clients within the previous 12 months

Wolfe Research, LLC does not assign ratings of Buy, Hold or Sell to the stocks it covers. Outperform, Peer Perform and Underperform are not the respective equivalents of Buy, Hold and Sell but represent relative weightings as defined above. To satisfy regulatory requirements, Outperform has been designated to correspond with Buy, Peer Perform has been designated to correspond with Hold and Underperform has been designated to correspond with Sell.

Utilities

PEG – 2023 guide, 5-7% CAGR, ratebase/capex all affirmed; fully committing to nuclear and disclosing $500M of EBITD with more detail on growth opps; in-line

- **2023 guidance of $3.40-3.50 reaffirmed.** Segment has been renamed back to PEG Power (from Carbon-Free In
- **Reaffirms 5-7% EPS CAGR over 2023-2027**. Notes 85-90% of EPS is regulated over duration of plan
- **Reaffirms Rate base CAGR.** 6-7.5% over 2023-2027
    - Reaffirms PSE&G capex of $15.5-18B over 2023-2027 (also discloses $34-40B over 2023-2032)
- **Nuclear.** Committed to retaining the assets and disclosing $500M of EBITDA at PTC floor (rises to $600M in 20 adjustment). Also talking about uprates($100M for 45-60 MWs in 2027-2029), fuel cycle extensions (Hope Cre 2025), and license extensions ($95M for Salem/Hope Creek)
    - Also more detail on other components of PEG Power/Other – BGSS/LIPA is $225M of EBITDA
- **Offshore Wind.** Sold 25% equity stake in Ocean Wind 1 for $225M reimbursement and exiting 50% GSOE stak
- **Credit.** Reaffirms no equity needs and mid-teens FFO/Debt target. $2B debt capacity and $4B investment capac

As expected the earnings and rate base outlook are unchanged, though there is more detail on the regulated capex. The detail is on the PEG Power side though, where PEG is officially committing to retaining nuclear for a variety of reasons a Further, the company is now breaking out the components of PEG Power with EBITDA, depreciation, and interest; plus a future growth opportunities . The PTC floor EBITDA for the nukes aligns with our prior estimates that we published last will be interesting to see this number now officially out there after earlier this week we saw nuclear assets transact. Inte

PEG slides point to 1-2x multiple expansion opportunity to align with premium peer valuations – this is something prior
make the case for as well.

Utilities short interest – down 4% to lows; shorts in FE, PNW up a lot; D and CA utes down; VST short was tiny

- Utilities short interest fell 4% this period and is back at its lows multi-year lows.
- FE short rose 68% likely due to the delay in CEO announcement and continued worries of a rebasing that didn't
- This short increase likely reflects increasing investor concerns on the CEO outcome.
- PNW short rose 35% on the heels of a positive Q4 reaction in the stock on higher sales growth.
- The positive AZ court order came after this short data.
- PPL's 37% short increase was likely due to arb hedging on the recent convert option that was a cheap form of d
- D short fell 22% and continues to fall to multi-year lows. We would frankly prefer to see more shorts since stoc
wall of doubters.
- CA utilities shorts continue to decline as the stocks re-rate higher. EIX short fell 11% and PCG fell 10%.
- VST short position was less than $200M going into their Energy Harbor deal. Thus, no short squeeze drove the s
week, just refocus on a stock that was stuck in mud.

Source: FactSet

SRE/Oncor - PUCT eyes granting Oncor 9.7% ROE but keeping equity ratio at 42.5%; not great but better than fears; CN

- Yesterday at its open meeting the PUCT discussed the Oncor base rate case
- The commissioners agreed to a 9.7% ROE (down 10 bp from the current level but above CNP/AEP), which was a
the ALJ recommended range and above most intervenor positions
- The equity ratio will remain 42.5%, which is unchanged from before but short of Oncor's 45% request
- PUCT also agreed with Oncor's approach on self-insurance reserve and regulated asset recoveries (5 year amor
as recovery of extraordinary COVID costs, and accrued interest
- The updated decision will be reflected in an updated rate order which will be taken up within the next couple m
vote

Overall the decision will keep Oncor roughly in line with where it had been before on ROE/equity ratio. The ROE is bette the adoption of Oncor's position on several other items was good to see; the main disappointment was the unchanged e commissioners appeared unconvinced on the rationale for a higher equity ratio but appeared open to further considerati Moreover, part of the reason for going higher on the ROE was to partially compensate for staying at 42.5% equity. Semp able to give an updated capital plan as well as 2024 guidance on the Q1 call in May. CNP is the other Texas T&D utility 42.5% equity ratio but its last allowed ROE was 9.4% so this outcome would suggest slightly better in the future. There in the TX legislative session that could enhance equity ratios but chances for passage are tough to predict right now.

EVRG – modified Kansas transmission bill moving forward with broad support including EVRG; no regulatory lag, but R $0.04 EPS risk; mixed

- Yesterday, a bill focused on EVRG's transmission delivery charge (**HB2225**) passed out of committee with the co after revisions (the original version would've resulted in more regulatory lag)
    - Video of the discussion can be found at the 1:12 mark here: **Link**
- The passed bill focuses on local transmission rate base (non-FERC/SPP mandated) and reduces the allowed RO the Kansas state level (9.30% for EVRG) from the FERC level (10.30%)
- We estimate this will result in a ~$0.04/sh earnings impact from the 100bps ROE reduction – EVRG's FERC rate (14% of $17.7B total) and a portion of that is FERC/SPP-mandated and a portion is non-retail-load related, thus actual exposed rate base is slightly less than ~$2B (House committee said yesterday it applied to about 80% of transmission)
    - This also sync with what KCC Staff said at the hearing – $40-45M pre-tax revenue impact over the next ~$0.04 annually)
- The bill now goes to the full House and ultimately the Senate, but we are expecting full passage

Our understanding is that this bill had the highest likelihood of passage as it relates to Kansas utility legislation this yea earnings headwind from the lower ROE is disappointing, it avoids the originally proposed version that would have incre lag. Importantly, EVRG is supporting the bill, which we don't believe they would have done if it created risk to their EPS Further, given this was backed by the KCC, it may help to build some goodwill into the upcoming rate case. There are st pending as well that would shift the KCC to an elected commission (**HB2154**/**SB88**) and require the KCC to review regi competitiveness **SB78**, but there has been limited momentum thus far and we see low likelihood of passage.

DTE – Staff files IRP testimony supporting coal shutdowns and regulatory asset treatment, but at lower return; also pus adders

- Yesterday, Michigan PSC Staff filed its recommendations in DTE's Integrated Resource Plan (IRP) – some initial t
    - Supporting regulatory asset treatment for retiring Monroe and Belle River coal plants at book value, but should be complete by 2040 (quicker) and return should be long-term debt (lower)
    - Supports Belle River coal to gas conversion in 2025-2026 and shutting Monroe Units 3/4 in 2028

  - Against request for financial compensation mechanism (FCM) on PPAs – willing to do at WACC and if D 50/50 ownership/PPA split, and only on carbon free resources (Staff noted that prior FCMs for peer utilit come about via settlement)
  - Supporting higher energy waste reduction target of 2.5% (2% proposed)
- Recall that DTE filed its IRP last November — laying out 15.4 GWs of renewables, 1.8 GWs of storage, and an a exit by 2035
  - Renewables – 800/240 MWs of solar/storage in 2023-2027; 3,600/1,000/520 MWs of solar/wind/storag 2,100/7,900 MW/1,050 MW solar/wind/storage in 2033-2042
  - Coal – DTE will accelerate conversion of Belle River from coal to a gas peaker to 2026 (from 2028), whil retirement of Monroe beginning in 2028 (1.5 GWs) and ending with the remainder in 2035 (from 2040)
  - Gas – plan to develop a 950 CCGT with carbon capture in 2035

Our initial take on the Staff testimony is mixed, but this is a starting point. There seems to be general support for the res we had constructive read-throughs from peer CMS on some of the areas of pushback like regulatory asset recovery (CM and PPA adders (CMS has settled on this in the past). DTE has historically rate-based more renewables and thus we do an FCM as being as meaningful. That said, it will be important to get a higher return on the regulatory assets. DTE had p indicated that it is hopeful a settlement can be achieved in 2H22.

<u>CNP – PUCT approves 2022's ~$78M DCRF settlement and recovery of mobile generation investments; constructive</u>

- At its open meeting held yesterday, the PUCT unanimously voted to approve CNP's distribution cost recovery fa settlement agreement filed in July 2022.
  - This stipulates a revenue increase of ~$78M, which excludes the ~$57M revenue requirement for the mo facilities, with rates effective 9/1/22.
- The PUCT also voted 4-1 (Comm. Glotfelty dissenting) to approve the recovery of the ~$200M investment made facilities, which was being addressed in a separate proceeding.
  - This investment includes ~$49M/~$150M for the S-T lease/a portion of the L-T lease.
- Recall, the ALJs' proposal for decision recommended no recovery of CNP's mobile gen. costs.
- The Commissioners agreed to classify CNP's mobile gen. investments as a regulatory asset, with recovery throu 7.5-year regulatory amortization period (i.e., lease term).

We view this as a constructive outcome, particularly given that the ALJs' proposal for decision recommended against re gen. costs. It was also good to see the PUCT acknowledge the context of acquiring mobile gen. facilities – ERCOT's T&D legislatively required to do so in the aftermath of Winter Storm Uri. The Commissioners also underlined the need for rul investments going forward (for example, more competitive/robust RFP processes) as well as clear evidence on the cost of units (how mobile, how many MWs, etc.). CNP expects to file for recovery of the remaining ~$350M portion of its mo L-T lease in Apr.-May this year.

EXC/AEE – IL Gov appoints 2 new ICC commissioners, chair leaving; first multiyear rate cases pending

- IL Gov appointed Conrad Reddick and Stacey Paradis to the IL Commerce Commission and named current comm Scott chair of the 5-member board.
- Current ICC chair Zalewski announced her departure on 6/16. She said: "I thought what was best for the commis commissioner who would be replacing me is to leave now…So they have a chance to sit with documents, unders make really informed decisions as opposed to leaving kind of in the middle of it."
- Both AEE and EXC's ComEd filed in Jan 4-yr rate plans under the 2021 utility law that includes performance-ba as IL formulaic rates sunset YE23.
- The ICC is expected to issue decisions by mid-Dec.

The ICC changes are important as they will review AEE/EXC key multiyear rate cases this year. Incoming chair Scott has (last decade). We are still reviewing the backgrounds of the two new commissioners. Ms Paradis was in leadership at M Efficiency Alliance.

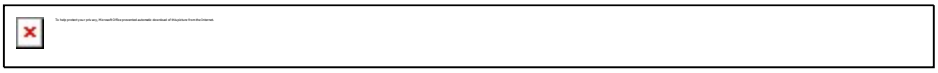
NI – Notifies the IURC that a settlement will be filed in NIPSCO's electric rate case by today

- Earlier this week, NIPSCO notified the IURC that an agreement in principle of all issues in its electric rate case ha and it intends to file a settlement on or before 3/10.
- Settling parties include the Office of Utility Consumer Counselor, NIPSCO Industrial Group, NLMK Indiana, and V additional parties may join after a formal agreement is written.
- Further, NI suggested a modified procedural schedule as follows:
    - Pre-filing of testimony supporting the settlement by 3/17.
    - Pre-filing of testimony opposing the settlement by 3/31.
    - Evidentiary hearing starting on 4/26.

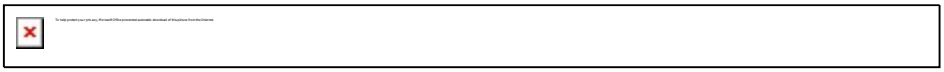
This is encouraging to see to see after mgmt. noted on the Q4/YE earnings call that it was in active settlement discussio intervenors in NIPSCO's electric case

Midstream

Midstream Short Interest – Relatively uneventful with a few modest short interest increases



- The WES short rose 20% in the second half of February alongside the company reporting a Q4 miss and issuing EBITDA guidance below consensus



- The EPD short rose 17% but remains at fairly low levels. The stock had outperformed in the first half of Februar interest period) on good results and a constructive 2023 outlook.
- The ETRN short rose 14% alongside high capex guidance for 2023 and continued poor stock performance. The s its lowest price since April 2020!!
- The ET short rose 12% but this was off a 3-year low in absolute number of units sold short

Clean Energy

Clean Energy short interest continues to climb; RUN up, CWEN vs NEP

- TAN short interest rose another 7% to its highest level in over a year.
- Rising rates is likely a concern for the sector.
- RUN short rose 7% potential also on concerns over rising rates.
- Yieldco shorts diverged with CWEN up 9% and NEP down 4%.

Source: FactSet

RUN – Silicon Valley Bank (SVB) acts as Collateral Agent on RUN's $425mn Credit Facility

- SVB has been topping headlines after the bank's stock fell ~60% on Thursday and continued collapse pre-mark base financing need.
  - Prominent venture capital investors have publicly warned others to withdraw assets creating fears of a b
- A screen of Clean Tech 10-K's reveals that SVB acts as the collateral agent on Sunrun's $425mn recourse lendi
  - The facility was arranged in January 2022 and replaced the prior $250mn facility with enhanced terms.

We will be monitoring this exposure as well as others to SIVB given risk it continues to deteriorate. We believe collatera replaced but need to monitor systematic risks. The Clean Tech funding ecosystem overlaps considerably with VCs and s could impact many private companies as well.

Utilities sentiment meter – up to "4" from "3". Utilities were the best GIC sector performer last week but still didn't perform as well as we would hope considering the crisis conditions at the end of the week. Investors are likely weighing utilities heavy use of credit markets relative to defensive nature of the business. The big drop-in interest rates this morning should be a positive for the sector as rising rates have been the biggest earnings pressure for the sector. We think earnings pressure for the market are growing and that investors come back to utilities as the year goes on.

Utilities

NI – Files NIPSCO electric settlement stipulating ~$292M rate hike, 9.80% ROE, and 51.63% equity ratio; solid

New England – Capacity auction prices at $2.59 across zones for 2026-2027; similar to last year and in-line

Utilities

NI – Files NIPSCO electric settlement stipulating ~$292M rate hike, 9.80% ROE, and 51.63% equity ratio; solid

- On Friday, NIPSCO and certain intervenors filed a settlement agreement that will resolve all issues in its electric rate case, if approved.
    - Settling parties include the Office of Utility Consumer Counsel (OUCC), NIPSCO Industrial Group, NLMK Indiana, Walmart, U.S. Steel Corp., and RV Industry User's Group.
- Settling parties agreed to a $291.8M rate increase premised on a 9.80% ROE, 51.63% equity ratio, and a $5.295B pro forma rate base as of 12/31/23.
- Recall, NIPSCO requested a total $291.7M base rate increase in two steps (or ~$395.0M when including the VCT rider in base rates) using a 10.4% ROE and 51.6% equity ratio.
    - First increase of $234.6M effective 9/1/23, based on rate base as of 6/30/23.
    - Second increase of $57.1M effective 3/1/24, based on rate base as of 12/31/23.
- NIPSCO is currently allowed 9.75% ROE and 47.9% equity ratio.

Settling parties agreed to withdraw NIPSCO's proposed variable cost tracker (VCT) and instead agreed to establish a new Environmental Cost Tracker (ECT).
    - NIPSCO is forecasted to annually recover ~$29.9M of costs through its ECT rider.
- Settling parties also agreed to accept NIPSCO's proposed adjustment to increase Pension/OPEB expense by $15.2M in total; NIPSCO withdrew its request for a pension/OPEB balancing account.
- NIPSCO expects a final order on the settlement agreement by 8/23/23, with new rates effective 9/1/23.

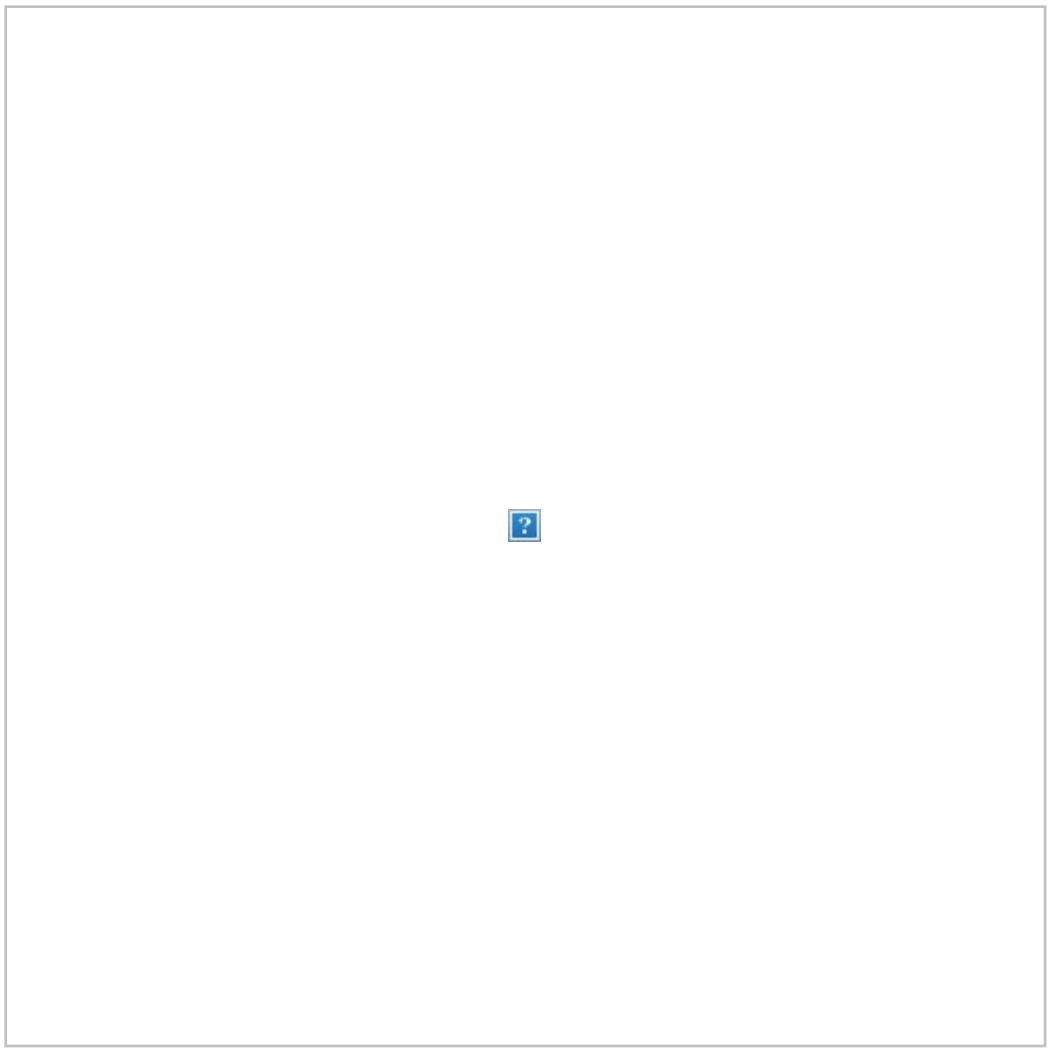
We are still reviewing the settlement agreement in depth, but it looks constructive, coming in at ~74% of NIPSCO's initial ask. The small bump in NIPSCO's allowed ROE and the increase in its equity ratio are good to see. We also note that the rate base agreed to reflects the forecasted additions to the Renewable Energy JV Investments since the majority of NI's ask is to get 4 of NIPSCO's renewables projects put into rates.

New England – Capacity auction prices at $2.59 across zones for 2026-2027; similar to last year and in-line

- Yesterday, ISO-NE released the results for the 17th forward capacity auction covering 2026-2027 – pricing at $2.59/kW-month for Rest of Pool, Northern New England, and Southeast New England (this zone wasn't even separately modeled anymore)
- This compares with the 2025-2026 auction pricing last year at: $2.59/kW-month for Rest of Pool, $2.53 for Northern New England, and $2.64 for Southeast New England
- Within in our coverage, VST owns ~3.4 GWs in New England, EXC owns Mystic 8/9 which closes in 2024 and minimal capacity otherwise, and both PEG/NRG sold their remaining assets in the region to ArcLight
- In total, 31.4 GWs cleared relative to a 30.3 GW net installed capacity requirement; 16% (~5 GWs) of cleared capacity was from renewables and DR; 619 MWs of new resources cleared
    - This compares with 32.8 GWs clearing in the previous auction relative to a 31.6 GW net ICR

This was about in-line with expectations It is really only impactful for VST and even for them is very small. We forecast annualized 2026-2027 capacity revenues of ~$100M for VST and with the latest pricing, we see calendarized 2025 capacity revenues looking very similar assuming the same amount of capacity was cleared (historically ~3.1 GWs).

FE/Ohio – Ohio AG seeking to resume civil lawsuit against FE/Randazzo/Jones following last week's Householder verdict



- Late last week, Ohio Attorney General Dave Yost filed a motion to lift the stay on his civil case against FE (along with its former CEO Chuck Jones and former PUCO Chair Sam Randazzo) tied to the HB6 fallout
- This followed a jury verdict last Thursday in the trials for former Ohio House Speaker Larry Householder and former state Republican Chairman Matt Borges

- Yost issued a statement: “Yesterday’s guilty verdicts in federal court against Larry Householder and Matt Borges mark only the beginning of accountability regarding House Bill 6… with the federal prosecution complete, the state of Ohio’s racketeering lawsuit, which already stopped the implementation of HB 6, should now be able to resume.”

Recall that FE already paid a $230M fine as part of its deferred prosecution agreement with the DoJ. FE also already reached a partial settlement with the AG in early-2021 to remove its decoupling mechanism enacted by HB6.

CAL Watch – Weekly update of implied 2024 ROEs; utility bond yields fall, ROE on track for at least a 50bp increase

- This our weekly series on the utility bond yield index used for the Cost of Capital mechanism (CCM). The allowed ROEs in 2023 for CA utilities are 10.05% for EIX; 10.00% for PCG; and 9.95% for SRE’s SDG&E and 9.85% for SRE’s SoCal Gas. But 2024 ROEs depend on whether the CCM is triggered.
- CCM: On 9/30, if the difference between the 12-month average of the Moody’s Bond Utility Baa Index and the benchmark value (currently 4.37%) exceeds 100bp, then the allowed ROE for the next calendar year is adjusted by one-half of the difference, and the current value of the index becomes the new benchmark value. (The index for SoCal Gas is Moody’s Utility A Index).
    - If the difference is within 100bp, ROEs and the benchmark index value remain the same for the subsequent year.
- Below is a chart with the Index values from 10/1/22 through the last available date (light blue bar charts); the average over that period is 5.78% (solid orange line).
- The Index value through last Thu was 5.74%, an 11bp decrease; if that were the average from now through 9/30/23, under the CoC mechanism, 2024 ROEs would be increased by 69bp [=(5.76-4.37)/2].
- It is still early, but the CCM is on track to be triggered, implying at least a 50bp increase in 2024 ROEs, if the Index from now through 9/30/23 averages at least 5.06%.

PEG – Good or bad, happy or sad, let's stay together

Click here to view our complete note

Analyst Day focused on predictability/transparency. This was the resounding message from mgmt. The regulated business is growing rate base at 6-7.5%, with transmission formula rates and the CIP mechanism limiting volatility. Steps are still being taken to limit pension exposure. Meanwhile PEG officially committed to retaining its nukes, which are de-risked by the PTC floor and anything above it is an upside. However, this is a stock that still trades at just below an average multiple on elevated estimates, despite a no growth-year in 2023 and a disappointing CAGR re-basing just a few months ago. Peer Perform.

Midstream

Rig Count – Permian rig count starting to moderate some

- Baker Hughes rig count data on Friday showed a 6 rig decline in the Permian last week. The Permian oil rig count hit a recent peak of 353 in mid-January but has now moderated to 339 in the latest data.

The Permian rig count remains slightly above its 2022 average. The data can be a little volatile, but any continued declines in rigs will be important to monitor as robust Permian volume growth is important to many companies' investment stories.

Midstream of Consciousness – The big fundamental – assessing 3-year growth and total return propositions

- In yesterday's Midstream of Consciousness, we compare 3-year growth outlooks across EBITDA, OCF/share, and total return of capital using our models that now extend out to 2025. We make observations on total return offerings and compare the stocks across growth and return of capital potential.
- **Comparing company growth outlooks off a record-setting 2022.** For the sector as a whole, we forecast average 2023-25 EBITDA and OCF/share growth of around 4%/yr. That's a little better than we would have thought off a robust 2022 base. See report for company-specific takeaways.
- **So what is the yield plus growth value proposition?** We take our 3-year OCF/share growth rates and combine that with 2023 dividend yields to rank total return. We were surprised to see that TRGP screens as offering the highest total return even with the well below average dividend yield!
- **Who will be the return of capital leaders over the next three years?** We compare the stocks in our coverage on a total return of capital basis for the next 3 years – i.e., dividends plus buybacks, divided by the market cap. The median company in our coverage offers a 24% total return of capital yield over 2023-25. WES, MPLX, MMP, PAA, and ET, each offer a 30%+ return of capital through 2025.
- **Modeling updates and company-specific nuances.** We initiate 2025 EBITDA estimates for EPD, MMP, and MPLX.
- Please see full report **here** for more.

Clean Energy

FSLR – China based manufacturer LONGi may partner with Invenergy to build modules in the U.S.

- Local organizations in Ohio issued a press release on Friday that renewable energy developer Invenergy will invest more than $600M into a JV with China-based

manufacturer LONGi to produce up to 5 GW per year of solar modules in Ohio. The JV is called Illuminate USA.
- Operations of the facility are expected to start by the end of this year
- Invenergy is the anchor customer of the JV

This is an interesting announcement where a large U.S. renewable developer (Invenergy) is looking to source U.S. made solar using a China-based manufacturing partner in LONGi. Our read of the announcement and the quick time to completion of the factory at yearend suggests this would be a module completion facility and so likely only able to receive $0.07/watt subsidy vs. the $0.17/watt fully integrated subsidy. For First Solar, this would be new competition next door in Ohio and a sign of how China-based companies could look to enter the market through JV structures. Importantly, we continue to think FSLR is well protected for a long time given they are nearly full sold on production through 2026 at fixed prices with continued sales over 2027-29.

Wolfe GREEN Playbook – SVB fallout; GE bullish tone on wind; ENLT preview

- In yesterday's Wolfe GREEN Playbook, we highlight Clean Energy exposure to the Silicon Valley Bank collapse which appears modest overall, highlight GE's bullish Investor Day tone on renewables under IRA, and preview ENLT's earnings this week.
- **RUN on the bank: clean tech exposure to SVB.** RUN is the one company to monitor given long-standing relations with SVB, but it looks manageable. Broader contagion and impact on financing markets are the real risks to watch this week.
- **Clean Energy takeaways from GE Investor Day.** GE Vernova sees robust onshore wind growth and expects the U.S. buildout to increase by 2x vs. the prior decade driven by the PTC extension. Cautious offshore wind commentary was not surprising given N-T challenges, but GE seemed optimistic for the industry to improve in 2024.
- **Initiated on ENLT; earnings coming this week.** Our 2022-25E EBITDA are $144/204/306/420M vs. ENLT's current guidance of $145-148M EBITDA in 2022. We expect ENLT to introduce 2023 EBITDA guidance and provide an update on its highly visible projects (what ENLT calls its Mature Portfolio). We also think ENLT may pull forward some projects from its backlog, raising the projected amount of capacity/storage in its Mature Portfolio.
- Please see the full report **here** for more.

What Happened?

On Friday, intervenor testimony in NiSource's NIPSCO electric rate case was filed. The Office of Utility Consumer Counselor proposed a $246mm rate increase premised on a 9.2% ROE, 49.3% equity ratio and $5.979bn rate base. The OUCC also recommended rejecting NIPSCO's request for a variable cost tracker to recover costs related to its coal-fired generation plants in base rates. NIPSCO's overall revenue request, inclusive of the tracker, is $393.5 or a 25.7% increase. The company is seeking a two step increase, a $235mm increase to take effect by 9/1/23 and a $57mm increase to take effect by 3/1/24, plus the rider going into effect in July '24. NIPSCO's request reflects a 10.4% ROE and 51.63% equity ratio and rate base of $5.946bn. The company was last authorized a 9.75% ROE and 47.86% equity ratio in December of 2019.

Our Takeaway

While the recommended ROE looks a bit low at 9.2% given the rise in the interest rates over the past year, we see the revenue increase, which is 62.5% of the company's ask, as a reasonable amount for a key intervenor position. If the recommendation for the denial of the variable cost tracker were to be granted by Indiana regulators, it would likely necessitate NIPSCO to adjust rates for the impact of coal plant retirements in a subsequent base rate case proceeding. This is an important rate case for NI, with NIPSCO Electric accounting for ~37% of operating earnings. The fleet transition at NIPSCO from coal to renewables underpins a large portion of the 6-8% LT EPS growth rate the company unveiled at it's November analyst day. Affordability remains a concern for us across the industry and NI's ask is substantial. However, we believe management is keenly focused on this and elected to spread out the investment over a longer period of time and moderated earnings growth in an effort to manage rate pressure to customers.

What's Next?

The schedule calls for intervenor testimony 1/20/23, settlement filing window 2/27/23, hearings the week of 3/13/23 and a final order expected by 7/16/23. Additionally, Nisource has begun the process of marketing up to a 19.9% stake in NIPSCO for sale, as announced in November. An announcement is expected around mid-year with an expected close by year-end '23. See our note from post the November analyst day here for more details.

Valuation:

The stock is trading at a 4% discount to peer group average on '24E earnings. Constructive resolution of the NIPSCO rate case should support an improved valuation. We maintain our Neutral rating and $31 price target.

Forecast price appreciation	+13.9%
Forecast dividend yield	3.7%
Forecast stock return	+17.7%
Market return assumption	9.2%
Forecast excess return	+8.5%

Company Description

NI is a fully regulated gas and electric utility serving customers in six states in the Midwest and Mid-Atlantic. NI is a gas distribution utility with 3.2 million customers in Indiana, Kentucky, Maryland, Ohio, Pennsylvania, and Virginia. NI is an integrated electric utility serving 0.5 million customers in Indiana. NI's mix of operating earnings is 60% gas and 40% electric.

Valuation Method and Risk Statement

Our $31 price target is an 8% premium to the Regulated Utility average multiple or 18.7x our UBSe 2024 eps of $1.66. The premium is the sum of +5% for the group's undervaluation on a 12 month basis relative to Baa corporate bonds, -2% for third quartile EPS growth and 5% for second quartile regulation. Risks include, but are not limited to, the following: changes to the regulatory environment, ability to achieve favorable returns on investment projects, and ability to continue to reinvest in the business for growth.

Quantitative Research Review

UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. The views for this month can be found below. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For previous responses please make reference to (i) previous UBS research reports; and (ii) where no applicable research report was published that month, the Quantitative Research Review which can be found at https://neo.ubs.com/quantitative, or contact your UBS sales representative for access to the report or the Quantitative Research Team on qa@ubs.com. A consolidated report which contains all responses is also available and again you should contact your UBS sales representative for details and pricing or the Quantitative Research Team on the email above.

NiSource Inc.

Question	Response
1. Is the industry structure facing the firm likely to improve or deteriorate over the next year? Rate on a scale of 1-5 (1 = getting worse, 3 = no change, 5 = getting better, N/A = no view)	3

4. Relative to the current CONSENSUS EPS forecast, is the next company EPS update likely to lead to: (1 = negative surprise vs consensus, 3 = in-line with consensus, 5 = positive surprise vs consensus expectations, N/A = no view)	3
5. What's driving the difference?	
6. Relative to YOUR current earnings forecast, is there relatively greater risk at the next earnings result of:(1 = downside skew risk to earnings, 3 = equal upside or downside risk to earnings, 5 = upside skew risk to earnings, N/A = no view)	2
7. What's driving the difference?	
8. Is there an upcoming catalyst for the company over the next three months?	
9. Is there an actual or approximate date for the catalyst?	
10. Is the catalyst date an actual or approximate date?	
11. What is the catalyst?	

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit https://www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 23 January 2023 03:51 AM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations. **Quantitative Research Review:** UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For the latest responses, please see the Quantitative Research Review Addendum at the back of this report, where applicable. For previous responses please make reference to (i) previous UBS research reports; and (ii) where no applicable research report was published that month, the Quantitative Research Review which can be found at https://neo.ubs.com/quantitative, or contact your UBS sales representative for access to the report or the Quantitative Research Team on qa@ubs.com. A consolidated report which contains all responses is also available and again you should contact your UBS sales representative for details and pricing or the Quantitative Research team on the email above.

Analyst Certification:
Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	55%	24%
Neutral	FSR is between -6% and 6% of the MRA.	36%	21%
Sell	FSR is > 6% below the MRA.	9%	18%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 31 December 2022.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS: Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES: UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/ qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. The name of each affiliate and analyst employed by that affiliate contributing to this report, if any, follows.

UBS Securities LLC: Ross Fowler, CFA, William Appicelli, CFA.

Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo. Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab and you would like to access that data please contact your UBS sales representative. UBS Evidence Lab data is available on UBS Neo. The level and types of services provided by Global Research and UBS Evidence Lab to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

When you receive Global Research through a system, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (https://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (https://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (https://www.ubs.com/global/en/legal/privacy/users.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

In certain circumstances (including for example, if you are an academic or a member of the media) you may receive Global Research otherwise than in the capacity of a client of UBS and you understand and agree that (i) the Global Research is provided to you for information purposes only; (ii) for the purposes of receiving it you are not intended to be and will not be treated as a "client" of UBS for any legal or regulatory purpose; (iii) the Global Research must not be relied on or acted upon for any purpose; and (iv) such content is subject to the relevant disclaimers that follow.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. The recipient should carefully read this document in its entirety and not draw inferences or conclusions from the rating alone. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at https://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas

within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

United Kingdom: This material is distributed by UBS AG, London Branch to persons who are eligible counterparties or professional clients. UBS AG, London Branch is authorised by the Prudential Regulation Authority and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. **Europe:** Except as otherwise specified herein, these materials are distributed by UBS Europe SE, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients (as detailed in the Bundesanstalt fur Finanzdienstleistungsaufsicht (BaFin) Rules and according to MIFID) and are only available to such persons. The information does not apply to, and should not be relied upon by, retail clients. UBS Europe SE is authorised by the European Central Bank (ECB) and regulated by the BaFin and the ECB. **Germany, Luxembourg, the Netherlands, Belgium and Ireland:** Where an analyst of UBS Europe SE has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE. Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates (**"UBS"**) with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is **for your information only**; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes: (i) valuation or accounting purposes; (ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or (iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and UBS Global Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/research-methodology.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit the portfolio manager's ability to participate in certain investment opportunities that otherwise would be consistent with its investment objective and other principal investment strategies. The returns on a portfolio consisting primarily of sustainable investments may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by the portfolio manager, and the investment opportunities available to such portfolios may differ. Companies may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues; there is also no guarantee that any company will meet expectations in connection with corporate responsibility, sustainability, and/or impact performance.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Bahrain: UBS is a Swiss bank not licensed, supervised or regulated in Bahrain by the Central Bank of Bahrain to undertake banking or investment business activities in Bahrain. Therefore, prospects/clients do not have any protection under local banking and investment services laws and regulations. **Brazil**: This report is only intended for Brazilian residents who are directly purchasing or selling securities in the Brazil capital market through a local authorized institution. **Canada**: The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. Under no circumstances is the information contained herein to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada or, alternatively, pursuant to a dealer registration exemption. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon these materials, the information contained herein or the merits of the securities described herein and any representation to the contrary is an offence. In Canada, this publication is distributed by UBS Investment Management Canada Inc. **China**: This report and any offering material such as term sheet, research report, other product or service documentation or any other information (the "Material") sent with this report was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly delete it and inform UBS immediately. This report is prepared by UBS Switzerland AG or its offshore subsidiary or affiliate (collectively as "UBS Offshore"). UBS Offshore is an entity incorporated out of China and is not licensed, supervised or regulated in China to carry out banking or securities business. The recipient should not contact the analysts or UBS Offshore which produced this report for advice as they are not licensed to provide securities investment advice in China. UBS Investment Bank (including Research) has its own wholly independent research and views which at times may vary from the views of UBS Global Wealth Management. The recipient should not use this document or otherwise rely on any of the information contained in this report in making investment decisions and UBS takes no responsibility in this regard. **Czech Republic**: UBS is not a licensed bank in the Czech Republic and thus is not allowed to provide regulated banking or investment services in the Czech Republic. This communication and/or material is distributed for marketing purposes and constitutes a "Commercial Message" under the laws of Czech Republic in relation to banking and/or investment services. Please notify UBS if you do not wish to receive any further correspondence. **Denmark**: This publication is not intended to constitute a public offer under Danish law. It is distributed only for information purposes to clients of UBS Europe SE, Denmark Branch, filial af UBS Europe SE, with place of business at Sankt Annae Plads 13, 1250 Copenhagen, Denmark, registered with the Danish Commerce and Companies Agency, under No. 38 17 24 33. UBS AG, its affiliates or subsidiaries may have debt holdings or positions in the subject Indian company/companies. UBS AG, its affiliates or subsidiaries may have financial interests (e.g. like loan/derivative products, rights to or interests in investments, etc.) in the subject Indian company/companies from time to time. Within the past 12 months, UBS AG, its affiliates or subsidiaries may have received compensation for non-investment banking securities-related services and/or non-securities services from the subject Indian company/companies. The subject company/companies may have been a client/clients of UBS AG, its affiliates or subsidiaries during the 12 months preceding the date of distribution of the research report with respect to investment banking and/or non-investment banking securities-related services and/or non-securities services. With regard to information on associates, please refer to the Annual Report at: https://www.ubs.com/global/en/about_ubs/investor_relations/annualreporting.html. **Indonesia**: This communication and any offering material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed without the consent of UBS. None of the Material has been registered or filed under the prevailing laws and with any financial or regulatory authority in your jurisdiction. The Material may not have been approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to

enter into any transaction or contract (including futures contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Israel**: UBS is a premier global financial firm offering wealth management, asset management and investment banking services from its headquarters in Switzerland and its operations in over 50 countries worldwide to individual, corporate and institutional investors. In Israel, UBS Switzerland AG is registered as Foreign Dealer in cooperation with UBS Wealth Management Israel Ltd., a wholly owned UBS subsidiary. UBS Wealth Management Israel Ltd. is an Investment Marketing licensee which engages in Investment Marketing and is regulated by the Israel Securities Authority. This publication is intended for information only and is not intended as an offer to buy or solicitation of an offer. Furthermore, this publication is not intended as an investment advice. No action has been, or will be, taken in Israel that would permit an offering of the product(s) mentioned in this document or a distribution of this document to the public in Israel. In particular, this document has not been reviewed or approved by the Israeli Securities Authority. The product(s) mentioned in this document is/are being offered to a limited number of sophisticated investors who qualify as one of the investors listed in the first supplement to the Israeli Securities Law, 5728-1968. This document may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. Anyone who purchases the product(s) mentioned herein shall do so for its own benefit and for its own account and not with the aim or intention of distributing or offering the product(s) to other parties. Anyone who purchases the product(s) shall do so in accordance with its own understanding and discretion and after it has received any relevant financial, legal, business, tax or other advice or opinion required by it in connection with such purchase(s). The word "advice" and/or any of its equivalent terms shall be read and construed in conjunction with the definition of the term "investment marketing" as defined under the Israeli Regulation of Investment Advice, Investment Marketing and Portfolio Management Law. The Swiss laws and regulations require a number of mandatory disclosures to be made in independent financial research reports or recommendations. Pursuant to the Swiss Financial Market Infrastructure Act and the Financial Market Infrastructure Ordinance-FINMA, banks must disclose the percentage of voting rights they hold in companies being researched, if these holdings are equal to or exceed the statutory thresholds. In addition, the Directives on the Independence of Financial Research, issued by the Swiss Bankers Association, mandate a number of disclosures, including the disclosure of potential conflicts of interest, the participation within previous 12 months in any securities issues on behalf of the company being researched, as well as the fact that remuneration paid to the financial analysts is based generally upon the performance of (i) the new issues department or investment banking; or (ii) securities trading performance (including proprietary trading) or sales. **Italy**: This publication is not intended to constitute a public offer under Italian law. It is distributed only for information purposes to clients of UBS Europe SE, Succursale Italia, with place of business at Via del Vecchio Politecnico, 3-20121 Milano. UBS Europe SE, Succursale Italia is subject to the joint supervision of the European Central Bank, the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin"), as well as of the Bank of Italy (Banca d'Italia) and the Italian Financial Markets Supervisory Authority (CONSOB - Commissione Nazionale per le Società e la Borsa), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by BaFin. **Jersey**: UBS AG, Jersey Branch, is regulated and authorized by the Jersey Financial Services Commission for the conduct of banking, funds and investment business. Where services are provided from outside Jersey, they will not be covered by the Jersey regulatory regime. UBS AG, Jersey Branch is a branch of UBS AG a public company limited by shares, incorporated in Switzerland whose registered offices are at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH 8001 Zurich. UBS AG, Jersey Branch's principal place of business is 1, IFC Jersey, St Helier, Jersey, JE2 3BX. **Luxembourg**: This publication is not intended to constitute a public offer under Luxembourg law. It is distributed only for information purposes to clients of UBS Europe SE, Luxembourg Branch ("UBS Luxembourg"), R.C.S. Luxembourg n° B209123, with registered office at 33A, Avenue J. F. Kennedy, L-1855 Luxembourg. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea (HRB n° 107046), with registered office at Bockenheimer Landstrasse 2-4, D-60306 Frankfurt am Main, Germany, duly authorized by the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin") and subject to the joint prudential supervision of BaFin, the European Central Bank and the central bank of Germany (Deutsche Bundesbank). UBS Luxembourg is furthermore supervised by the Luxembourg prudential supervisory authority (Commission de Surveillance du Secteur Financier), in its role as host member state authority. This publication has not been submitted for approval to any public supervisory authority. **Malaysia**: This communication and any offering material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or derivatives products). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or derivatives products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Mexico**: This information is distributed by UBS Asesores México, S.A. de C.V. ("UBS Asesores"), an affiliate of UBS Switzerland AG, incorporated as a non-independent investment advisor under the Mexican regulation due to the relation with a Foreign Bank. UBS Asesores is registered under number 30060-001-(14115)-21/06/2016 and subject to the supervision of the Mexican Banking and Securities Commission ("CNBV") exclusively regarding the rendering of (i) portfolio management services, (ii) securities investment advisory services, analysis and issuance of individual investment recommendations, and (iii) anti-money laundering and terrorism financing matters. This UBS publication or any material related thereto is addressed only to Sophisticated or Institutional Investors located in Mexico. Research reports only reflect the views of the analysts responsible for the report. The compensation of the analyst(s) who prepared this report is determined exclusively by research management and senior management of any entity of UBS Group to which such analyst(s) render(s) services. **Nigeria**: The investment products mentioned in this material are not being offered or sold by UBS to the public in Nigeria and they have not been submitted for approval nor registered with the Securities and Exchange Commission of Nigeria. If you are interested in products of this nature, please let us know. The investment products mentioned in this material are not being directed to, and are not being made available for subscription by any persons within Nigeria other than the selected investors to whom the offer materials have been addressed as a private sale or domestic concern within the exemption and meaning of Section 69(2) of the Investments and Securities Act, 2007 (ISA). This material has been provided to you at your specific unsolicited request and for your information only. **Philippines:** This communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or derivatives products). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or derivatives products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Portugal**: UBS Switzerland AG is not licensed to conduct banking and financial activities in Portugal nor is UBS Switzerland AG supervised by the portuguese regulators (Bank of Portugal "Banco de Portugal" and Portuguese Securities Exchange Commission "Comissão do Mercado de Valores Mobiliários"). **Qatar**: UBS Qatar LLC is authorized by the Qatar Financial Centre Regulatory Authority, with QFC no. 01169, and has its registered office at 14th Floor, Burj Alfardan Tower, Building 157, Street No. 301, Area No. 69, Al Majdami, Lusail, Qatar. UBS Qatar LLC neither offers any brokerage services nor executes any order with, for or on behalf of its clients. A client order will have to be placed with, and executed by, UBS Switzerland AG in Switzerland or an affiliate of UBS Switzerland AG, that is domiciled outside Qatar. It is in the sole discretion of UBS Switzerland AG in Switzerland or its affiliate to accept or reject an order and UBS Qatar LLC does not have authority to provide a confirmation in this respect. UBS Qatar LLC may however communicate payment orders and investment instructions to UBS Switzerland AG in Switzerland for receipt, acceptance and execution. UBS Qatar LLC is not authorized to act for and on behalf of UBS Switzerland AG or an affiliate of UBS Switzerland AG. This document and any attachments hereto are intended for eligible counterparties and business customers only. **Russia**: This document or information contained therein is for information purposes only and constitutes neither a public nor a private offering, is not an invitation to make offers, to sell, exchange or otherwise transfer any financial instruments in the Russian Federation to or for the benefit of any Russian person or entity and does not constitute an advertisement or offering of securities in the Russian Federation within the meaning of Russian securities laws. The information contained herein is not an "individual investment recommendation" as defined in Federal Law of 22 April 1996 No 39-FZ "On Securities Market" (as amended) and the financial instruments and operations specified herein may not be suitable for your investment profile or your investment goals or expectations. The determination of whether or not such financial instruments and operations are in your interests or are suitable for your investment goals, investment horizon or the acceptable risk level is your responsibility. We assume no liability for any losses connected with making any such operations or investing into any such financial instruments and we do not recommend to use such information as the only source of information for making an investment decision. **Saudi Arabia**: UBS Saudi Arabia is authorised and regulated by the Capital Market Authority to conduct securities business under licence number 08113-37. **Singapore**: Clients of UBS AG Singapore branch are asked to please contact UBS AG Singapore branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or report. UBS AG is incorporated in Switzerland with limited liability. UBS AG has a branch registered in Singapore (UEN S98FC5560C). This communication and any offering material term sheet, research report, other product or service documentation or any other

information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Sweden**: This publication is not intended to constitute a public offer under Swedish law. It is distributed only for information purposes to clients of UBS Europe SE, Sweden Bankfilial, with place of business at Regeringsgatan 38, 11153 Stockholm, Sweden, registered with the Swedish Companies Registration Office under Reg. No 516406-1011. UBS Europe SE, Sweden Bankfilial is subject to the joint supervision of the European Central Bank, the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin"), as well as of the Swedish supervisory authority (Finansinspektionen), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by BaFin. **Taiwan**: This material is provided by UBS AG, Taipei Branch in accordance with laws of Taiwan, in agreement with or at the request of clients/prospects. **Thailand**: This communication and any offering material, term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication were done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. What Happened?

This morning, Nisource filed an 8-k announcing a settlement with five key parties to the NIPSCO general rate case, including the Office of Utility Consumer Counselor. The agreement, which still needs Indiana Utility Regulatory Commission approval, calls for a $291.8mm revenue increase over two phases in '23 and '24. This reflects a 9.8% ROE, 51.6% equity ratio and $5.925bn rate base. The company had sought a $393.5mm rate increase, 10.4% ROE and 51.6% equity ratio. The settlement also calls for the establishment of a Environmental Cost Tracker (ECT) which is a modified and smaller in scope version of the Variable Cost Tracker (VCT) that NIPSCO has initially proposed. The ECT will track ~$30mm in cost and in is included the headline revenue number of $291.8mm. The first rate increase will take effect 9/1/23.

What's Our Take?

We view this as a constructive outcome with ~74% of the revenue ask being awarded and the 9.8% ROE being in-line with the 9.75% awarded in December 2019. The revenue percentage of ask and the ROE metrics are both modestly above national averages. Nisource management had indicated on the fourth quarter earnings call that a settlement was likely, so investors had expectations this was coming, but nonetheless good to see announced. The company had a positive update on the Q4 call where they raised guidance for 2023 and reiterated the long term outlook as unveiled at the November investor day. See our notes here and here for more details.

What's Next?

Parties not signed on to the agreement have until 3/31/23 to file opposition with the IURC. NIPSCO anticipates a final order by 8/23/23. Additionally, Nisource has begun the process of marketing up to a 19.9% stake in NIPSCO for sale, as announced in November. An announcement is expected around mid-year with an expected close by year-end '23.

Valuation:

We maintain our Neutral rating and $30 target.

Company Description

NI is a fully regulated gas and electric utility serving customers in six states in the Midwest and Mid-Atlantic. NI is a gas distribution utility with 3.2 million customers in Indiana, Kentucky, Maryland, Ohio, Pennsylvania, and Virginia. NI is an integrated electric utility serving 0.5 million customers in Indiana. NI's mix of operating earnings is 60% gas and 40% electric.

Valuation Method and Risk Statement

Our $30 price target is an 12% premium to the Regulated Utility average multiple or 18.1x our UBSe 2024 eps of $1.66. The premium is the sum of +5% for the group's undervaluation on a 12 month basis relative to Baa corporate bonds, 2% for second quartile EPS growth and 5% for second quartile regulation.Risks include, but are not limited to, the following: changes to the regulatory environment, ability to achieve favorable returns on investment projects, and ability to continue to reinvest in the business for growth. Our price target is derived using a sum-of-the-parts P/E valuation.

Quantitative Research Review

UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. The views for this month can be found below. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For previous responses please make reference to (i) previous UBS research reports; and (ii) where no applicable research report was published that month, the Quantitative Research Review which can be found at https://neo.ubs.com/quantitative, or contact your UBS sales representative for access to the report or the Quantitative Research Team on qa@ubs.com. A consolidated report which contains all responses is also available and again you should contact your UBS sales representative for details and pricing or the Quantitative Research Team on the email above.

NiSource Inc.

Question	Response
1. Is the industry structure facing the firm likely to improve or deteriorate over the next year? Rate on a scale of 1-5 (1 = getting worse, 3 = no change, 5 = getting better, N/A = no view)	3
2. Is the regulatory/government environment facing the firm likely to improve or deteriorate over the next year? Rate on a scale of 1-5 (1 = getting tougher 3 = no change, 5 = getting better, N/A = no view)	3
3. Over the last 3-6 months in broad terms have things been improving/no change/getting worse for this stock? Rate on a scale of 1-5 (1 = getting a lot worse, 3 = not much change, 5 = getting a lot better, N/A = no view)	3
4. Relative to the current CONSENSUS EPS forecast, is the next company EPS update likely to lead to: (1 = negative surprise vs consensus, 3 = in-line with consensus, 5 = positive surprise vs consensus expectations, N/A = no view)	3
5. What's driving the difference?	
6. Relative to YOUR current earnings forecast, is there relatively greater risk at the next earnings result of:(1 = downside skew risk to earnings, 3 = equal upside or downside risk to earnings, 5 = upside skew risk to earnings, N/A = no view)	3
7. What's driving the difference?	
8. Is there an upcoming catalyst for the company over the next three months?	
9. Is there an actual or approximate date for the catalyst?	
10. Is the catalyst date an actual or approximate date?	
11. What is the catalyst?	

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit https://www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 13 March 2023 02:03 PM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations. **Quantitative Research Review:** UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For the latest responses, please see the Quantitative Research Review Addendum at the back of this report, where applicable. For previous responses please make reference to (i) previous UBS research reports; and (ii) where no applicable research report was published that month, the Quantitative Research Review which can be found at https://neo.ubs.com/quantitative, or contact your UBS sales representative for access to the report or the Quantitative Research Team on qa@ubs.com. A consolidated report which contains all responses is also available and again you should contact your UBS sales representative for details and pricing or the Quantitative Research team on the email above.

Analyst Certification:
Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	55%	24%
Neutral	FSR is between -6% and 6% of the MRA.	36%	21%
Sell	FSR is > 6% below the MRA.	9%	18%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 31 December 2022.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS: Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES: UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/ qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. When you receive Global Research through a system, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (https://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (https://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (https://www.ubs.com/global/en/legal/privacy/users.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

In certain circumstances (including for example, if you are an academic or a member of the media) you may receive Global Research otherwise than in the capacity of a client of UBS and you understand and agree that (i) the Global Research is provided to you for information purposes only; (ii) for the purposes of receiving it you are not intended to be and will not be treated as a "client" of UBS for any legal or regulatory purpose; (iii) the Global Research must not be relied on or acted upon for any purpose; and (iv) such content is subject to the relevant disclaimers that follow.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. The recipient should carefully read this document in its entirety and not draw inferences or conclusions from the rating alone. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at https://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas

within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

United Kingdom: This material is distributed by UBS AG, London Branch to persons who are eligible counterparties or professional clients. UBS AG, London Branch is authorised by the Prudential Regulation Authority and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. **Europe:** Except as otherwise specified herein, these materials are distributed by UBS Europe SE, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients (as detailed in the Bundesanstalt fur Finanzdienstleistungsaufsicht (BaFin) Rules and according to MIFID) and are only available to such persons. The information does not apply to, and should not be relied upon by, retail clients. UBS Europe SE is authorised by the European Central Bank (ECB) and regulated by the BaFin and the ECB. **Germany, Luxembourg, the Netherlands, Belgium and Ireland:** Where an analyst of UBS Europe SE has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE. In all cases it is distributed by UBS Europe SE and UBS AG, London Branch. **Turkey:** Distributed by UBS AG, London Branch. No information in this document is provided for the purpose of offering, marketing and sale by any means of any capital market instruments and services in the Republic of Turkey. Therefore, this document may not be considered as an offer made or to be made to residents of the Republic of Turkey. UBS AG, London Branch is not licensed by the Turkish Capital Market Board under the provisions of the Capital Market Law (Law No. 6362). Accordingly, neither this document nor any other offering material related to the instruments/services may be utilized in connection with providing any capital market services to persons within the Republic of Turkey without the prior approval of the Capital Market Board. However, according to article 15 (d) (ii) of the Decree No. 32, there is no restriction on the purchase or sale of the securities abroad by residents of the Republic of Turkey. **Poland:** Distributed by UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce regulated by the Polish Financial Supervision Authority. Where an analyst of UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce. **Russia:** Prepared and distributed by UBS Bank (OOO). Should not be construed as an individual Investment Recommendation for the purpose of the Russian Law - Federal Law #39-FZ ON THE SECURITIES MARKET Articles 6.1-6.2.**Switzerland:** Distributed by UBS AG to persons who are institutional investors only. UBS AG is regulated by the Swiss Financial Market Supervisory Authority (FINMA). **Italy:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, Italy Branch. Where an analyst of UBS Europe SE, Italy Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, Italy Branch. **France:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, France Branch. Where an analyst of UBS Europe SE, France Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, France Branch. **Spain:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, Spain Branch. Where an analyst of UBS Europe SE, Spain Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, Spain Branch. **Sweden:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, Sweden Branch. Where an analyst of UBS Europe SE, Sweden Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, Sweden Branch.**South Africa:** Distributed by UBS South Africa (Pty) Limited (Registration No. 1995/011140/07), an authorised user of the JSE and an authorised Financial Services Provider (FSP 7328). **Saudi Arabia:** This document has been issued by UBS AG (and/or any of its subsidiaries, branches or affiliates), a public company limited by shares, incorporated in Switzerland with its registered offices at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH-8001 Zurich. This publication has been approved by UBS Saudi Arabia (a subsidiary of UBS AG), a Saudi closed joint stock company incorporated in the Kingdom of Saudi Arabia under commercial register number 1010257812 having its registered office at Tatweer Towers, P.O. Box 75724, Riyadh 11588, Kingdom of Saudi Arabia. UBS Saudi Arabia is authorized and regulated by the Capital Market Authority to conduct securities business under license number 08113-37. **UAE / Dubai:** The information distributed by UBS AG Dubai Branch is only intended for Professional Clients and/or Market Counterparties, as classified under the DFSA rulebook. No other person should act upon this material/communication. The information is not for further distribution within the United Arab Emirates. UBS AG Dubai Branch is regulated by the DFSA in the DIFC. UBS is not licensed to provide banking services in the UAE by the Central Bank of the UAE, nor is it licensed by the UAE Securities and Commodities Authority. **Israel:** This Material is distributed by UBS AG, London Branch. UBS Securities Israel Ltd is a licensed Investment Marketer that is supervised by the Israel Securities Authority (ISA). UBS AG, London Branch and its affiliates incorporated outside Israel are not licensed under the Israeli Advisory Law. UBS may engage among others in issuance of Financial Assets or in distribution of Financial Assets of other issuers for fees or other benefits. UBS AG, London Branch and its affiliates may prefer various Financial Assets to which they have or may have an Affiliation (as such term is defined under the Israeli Advisory Law). Nothing in this Material should be considered as investment advice under the Israeli Advisory Law. This Material is being issued only to and/or is directed only at persons who are Eligible Clients within the meaning of the Israeli Advisory Law, and this Material must not be furnished to, relied on or acted upon by any other persons. **United States:** Distributed to US persons by either UBS Securities LLC or by UBS Financial Services Inc., subsidiaries of UBS AG; or by a group, subsidiary or affiliate of UBS AG that is not registered as a US broker-dealer (a **'non-US affiliate'**) to major US institutional investors only. UBS Securities LLC or UBS Financial Services Inc. accepts responsibility for the content of a report prepared by another non-US affiliate when distributed to US persons by UBS Securities LLC or UBS Financial Services Inc. All transactions by a US person in the securities mentioned in this report must be effected through UBS Securities LLC or UBS Financial Services Inc., and not through a non-US affiliate. UBS Securities LLC is not acting as a municipal advisor to any municipal entity or obligated person within the meaning of Section 15B of the Securities Exchange Act (the "Municipal Advisor Rule"), and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of the Municipal Advisor Rule. **Canada:** Distributed by UBS Securities Canada Inc., a registered investment dealer in Canada and a Member-Canadian Investor Protection Fund, or by another affiliate of UBS AG that is registered to conduct business in Canada or is otherwise exempt from registration. **Brazil:** Except as otherwise specified herein, this Material is prepared by UBS Brasil Corretora de Câmbio, Títulos e Valores Mobiliários S.A.[1] (UBS Brasil CCTVM) to persons who are eligible investors residing in Brazil, which are considered to be Professional Investors (Investidores Profissionais), as designated by the applicable regulation, mainly the CVM Resolution No. 30 from the 11th of May 2021 (determines the duty to verify the suitability of products, services and transactions with regards to the client´s profile). [1]UBS CCTVM is a subsidiary of UBS BB Servicos de Assessoria Financeira e Participacoes S.A. ("UBS BB"). UBS BB is an association between UBS AG and Banco do Brasil (through its subsidiary BB – Banco de Investimentos S.A.), of which UBS AG is the majority owner and which provides investment banking services and coverage in Brazil, Argentina, Paraguay, Peru and Uruguay. **Hong Kong:** Distributed by UBS Securities Asia Limited. Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates (**"UBS"**) with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is **for your information only**; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes: (i) valuation or accounting purposes; (ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or (iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and UBS Global Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/research-methodology.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit the portfolio manager's ability to participate in certain investment opportunities that otherwise would be consistent with its investment objective and other principal investment strategies. The returns on a portfolio consisting primarily of sustainable investments may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by the portfolio manager, and the investment opportunities available to such portfolios may differ. Companies may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues; there is also no guarantee that any company will meet expectations in connection with corporate responsibility, sustainability, and/or impact performance.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Bahrain: UBS is a Swiss bank not licensed, supervised or regulated in Bahrain by the Central Bank of Bahrain to undertake banking or investment business activities in Bahrain. Therefore, prospects/clients do not have any protection under local banking and investment services laws and regulations. **Brazil**: This report is only intended for Brazilian residents who are directly purchasing or selling securities in the Brazil capital market through a local authorized institution. **Canada**: The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. Under no circumstances is the information contained herein to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada or, alternatively, pursuant to a dealer registration exemption. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon these materials, the information contained herein or the merits of the securities described herein and any representation to the contrary is an offence. In Canada, this publication is distributed by UBS Investment Management Canada Inc. **China**: This report and any offering material such as term sheet, research report, other product or service documentation or any other information (the "Material") sent with this report was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly delete it and inform UBS immediately. This report is prepared by UBS Switzerland AG or its offshore subsidiary or affiliate (collectively as "UBS Offshore"). UBS Offshore is an entity incorporated out of China and is not licensed, supervised or regulated in China to carry out banking or securities business. The recipient should not contact the analysts or UBS Offshore which produced this report for advice as they are not licensed to provide securities investment advice in China. UBS Investment Bank (including Research) has its own wholly independent research and views which at times may vary from the views of UBS Global Wealth Management. The recipient should not use this document or otherwise rely on any of the information contained in this report in making investment decisions and UBS takes no responsibility in this regard. **Czech Republic**: UBS is not a licensed bank in the Czech Republic and thus is not allowed to provide regulated banking or investment services in the Czech Republic. This communication and/or material is distributed for marketing purposes and constitutes a "Commercial Message" under the laws of Czech Republic in relation to banking and/or investment services. Please notify UBS if you do not wish to receive any further correspondence. **Denmark**: This publication is not intended to constitute a public offer under Danish law. It is distributed only for information purposes to clients of UBS Europe SE, Denmark Branch, filial af UBS Europe SE, with place of business at Sankt Annae Plads 13, 1250 Copenhagen, Denmark, registered with the Danish Commerce and Companies Agency, under No. 38 17 24 33. UBS AG, its affiliates or subsidiaries may have debt holdings or positions in the subject Indian company/companies. UBS AG, its affiliates or subsidiaries may have financial interests (e.g. like loan/derivative products, rights to or interests in investments, etc.) in the subject Indian company/companies from time to time. Within the past 12 months, UBS AG, its affiliates or subsidiaries may have received compensation for non-investment banking securities-related services and/or non-securities services from the subject Indian company/companies. The subject company/companies may have been a client/clients of UBS AG, its affiliates or subsidiaries during the 12 months preceding the date of distribution of the research report with respect to investment banking and/or non-investment banking securities-related services and/or non-securities services. With regard to information on associates, please refer to the Annual Report at: https://www.ubs.com/global/en/about_ubs/investor_relations/annualreporting.html. **Indonesia**: This communication and any offering material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed without the consent of UBS. None of the Material has been registered or filed under the prevailing laws and with any financial or regulatory authority in your jurisdiction. The Material may not have been approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to

enter into any transaction or contract (including futures contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Israel**: UBS is a premier global financial firm offering wealth management, asset management and investment banking services from its headquarters in Switzerland and its operations in over 50 countries worldwide to individual, corporate and institutional investors. In Israel, UBS Switzerland AG is registered as Foreign Dealer in cooperation with UBS Wealth Management Israel Ltd., a wholly owned UBS subsidiary. UBS Wealth Management Israel Ltd. is an Investment Marketing licensee which engages in Investment Marketing and is regulated by the Israel Securities Authority. This publication is intended for information only and is not intended as an offer to buy or solicitation of an offer. Furthermore, this publication is not intended as an investment advice. No action has been, or will be, taken in Israel that would permit an offering of the product(s) mentioned in this document or a distribution of this document to the public in Israel. In particular, this document has not been reviewed or approved by the Israeli Securities Authority. The product(s) mentioned in this document is/are being offered to a limited number of sophisticated investors who qualify as one of the investors listed in the first supplement to the Israeli Securities Law, 5728-1968. This document may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. Anyone who purchases the product(s) mentioned herein shall do so for its own benefit and for its own account and not with the aim or intention of distributing or offering the product(s) to other parties. Anyone who purchases the product(s) shall do so in accordance with its own understanding and discretion and after it has received any relevant financial, legal, business, tax or other advice or opinion required by it in connection with such purchase(s). The word "advice" and/or any of its equivalent terms shall be read and construed in conjunction with the definition of the term "investment marketing" as defined under the Israeli Regulation of Investment Advice, Investment Marketing and Portfolio Management Law. The Swiss laws and regulations require a number of mandatory disclosures to be made in independent financial research reports or recommendations. Pursuant to the Swiss Financial Market Infrastructure Act and the Financial Market Infrastructure Ordinance-FINMA, banks must disclose the percentage of voting rights they hold in companies being researched, if these holdings are equal to or exceed the statutory thresholds. In addition, the Directives on the Independence of Financial Research, issued by the Swiss Bankers Association, mandate a number of disclosures, including the disclosure of potential conflicts of interest, the participation within previous 12 months in any securities issues on behalf of the company being researched, as well as the fact that remuneration paid to the financial analysts is based generally upon the performance of (i) the new issues department or investment banking; or (ii) securities trading performance (including proprietary trading) or sales. **Italy**: This publication is not intended to constitute a public offer under Italian law. It is distributed only for information purposes to clients of UBS Europe SE, Succursale Italia, with place of business at Via del Vecchio Politecnico, 3-20121 Milano. UBS Europe SE, Succursale Italia is subject to the joint supervision of the European Central Bank, the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin"), as well as of the Bank of Italy (Banca d'Italia) and the Italian Financial Markets Supervisory Authority (CONSOB - Commissione Nazionale per le Società e la Borsa), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by BaFin. **Jersey**: UBS AG, Jersey Branch, is regulated and authorized by the Jersey Financial Services Commission for the conduct of banking, funds and investment business. Where services are provided from outside Jersey, they will not be covered by the Jersey regulatory regime. UBS AG, Jersey Branch is a branch of UBS AG a public company limited by shares, incorporated in Switzerland whose registered offices are at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH 8001 Zurich. UBS AG, Jersey Branch's principal place of business is 1, IFC Jersey, St Helier, Jersey, JE2 3BX. **Luxembourg**: This publication is not intended to constitute a public offer under Luxembourg law. It is distributed only for information purposes to clients of UBS Europe SE, Luxembourg Branch ("UBS Luxembourg"), R.C.S. Luxembourg n° B209123, with registered office at 33A, Avenue J. F. Kennedy, L-1855 Luxembourg. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea (HRB n° 107046), with registered office at Bockenheimer Landstrasse 2-4, D-60306 Frankfurt am Main, Germany, duly authorized by the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin") and subject to the joint prudential supervision of BaFin, the European Central Bank and the central bank of Germany (Deutsche Bundesbank). UBS Luxembourg is furthermore supervised by the Luxembourg prudential supervisory authority (Commission de Surveillance du Secteur Financier), in its role as host member state authority. This publication has not been submitted for approval to any public supervisory authority. **Malaysia**: This communication and any offering material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or derivatives products). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or derivatives products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Mexico**: This information is distributed by UBS Asesores México, S.A. de C.V. ("UBS Asesores"), an affiliate of UBS Switzerland AG, incorporated as a non-independent investment advisor under the Mexican regulation due to the relation with a Foreign Bank. UBS Asesores is registered under number 30060-001-(14115)-21/06/2016 and subject to the supervision of the Mexican Banking and Securities Commission ("CNBV") exclusively regarding the rendering of (i) portfolio management services, (ii) securities investment advisory services, analysis and issuance of individual investment recommendations, and (iii) anti-money laundering and terrorism financing matters. This UBS publication or any material related thereto is addressed only to Sophisticated or Institutional Investors located in Mexico. Research reports only reflect the views of the analysts responsible for the report. The compensation of the analyst(s) who prepared this report is determined exclusively by research management and senior management of any entity of UBS Group to which such analyst(s) render(s) services. **Nigeria**: The investment products mentioned in this material are not being offered or sold by UBS to the public in Nigeria and they have not been submitted for approval nor registered with the Securities and Exchange Commission of Nigeria. If you are interested in products of this nature, please let us know. The investment products mentioned in this material are not being directed to, and are not being made available for subscription by any persons within Nigeria other than the selected investors to whom the offer materials have been addressed as a private sale or domestic concern within the exemption and meaning of Section 69(2) of the Investments and Securities Act, 2007 (ISA). This material has been provided to you at your specific unsolicited request and for your information only. **Philippines:** This communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or derivatives products). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or derivatives products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Portugal**: UBS Switzerland AG is not licensed to conduct banking and financial activities in Portugal nor is UBS Switzerland AG supervised by the portuguese regulators (Bank of Portugal "Banco de Portugal" and Portuguese Securities Exchange Commission "Comissão do Mercado de Valores Mobiliários"). **Qatar**: UBS Qatar LLC is authorized by the Qatar Financial Centre Regulatory Authority, with QFC no. 01169, and has its registered office at 14th Floor, Burj Alfardan Tower, Building 157, Street No. 301, Area No. 69, Al Majdami, Lusail, Qatar. UBS Qatar LLC neither offers any brokerage services nor executes any order with, for or on behalf of its clients. A client order will have to be placed with, and executed by, UBS Switzerland AG in Switzerland or an affiliate of UBS Switzerland AG, that is domiciled outside Qatar. It is in the sole discretion of UBS Switzerland AG in Switzerland or its affiliate to accept or reject an order and UBS Qatar LLC does not have authority to provide a confirmation in this respect. UBS Qatar LLC may however communicate payment orders and investment instructions to UBS Switzerland AG in Switzerland for receipt, acceptance and execution. UBS Qatar LLC is not authorized to act for and on behalf of UBS Switzerland AG or an affiliate of UBS Switzerland AG. This document and any attachments hereto are intended for eligible counterparties and business customers only. **Russia**: This document or information contained therein is for information purposes only and constitutes neither a public nor a private offering, is not an invitation to make offers, to sell, exchange or otherwise transfer any financial instruments in the Russian Federation to or for the benefit of any Russian person or entity and does not constitute an advertisement or offering of securities in the Russian Federation within the meaning of Russian securities laws. The information contained herein is not an "individual investment recommendation" as defined in Federal Law of 22 April 1996 No 39-FZ "On Securities Market" (as amended) and the financial instruments and operations specified herein may not be suitable for your investment profile or your investment goals or expectations. The determination of whether or not such financial instruments and operations are in your interests or are suitable for your investment goals, investment horizon or the acceptable risk level is your responsibility. We assume no liability for any losses connected with making any such operations or investing into any such financial instruments and we do not recommend to use such information as the only source of information for making an investment decision. **Saudi Arabia**: UBS Saudi Arabia is authorised and regulated by the Capital Market Authority to conduct securities business under licence number 08113-37. **Singapore**: Clients of UBS AG Singapore branch are asked to please contact UBS AG Singapore branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or report. UBS AG is incorporated in Switzerland with limited liability. UBS AG has a branch registered in Singapore (UEN S98FC5560C). This communication and any offering material term sheet, research report, other product or service documentation or any other

information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Sweden**: This publication is not intended to constitute a public offer under Swedish law. It is distributed only for information purposes to clients of UBS Europe SE, Sweden Bankfilial, with place of business at Regeringsgatan 38, 11153 Stockholm, Sweden, registered with the Swedish Companies Registration Office under Reg. No 516406-1011. UBS Europe SE, Sweden Bankfilial is subject to the joint supervision of the European Central Bank, the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin"), as well as of the Swedish supervisory authority (Finansinspektionen), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by BaFin. **Taiwan**: This material is provided by UBS AG, Taipei Branch in accordance with laws of Taiwan, in agreement with or at the request of clients/prospects. **Thailand**: This communication and any offering material, term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication were done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or derivatives products). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or derivatives products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Turkey**: The information in this document is not provided for the purpose of offering, marketing or sale of any capital market instrument or service in the Republic of Turkey. Therefore, this document may not be considered as an offer made, or to be made, to residents of the Republic of Turkey in the Republic of Turkey. UBS Switzerland AG is not licensed by the Turkish Capital Market Board (the CMB) under the provisions of the Capital Market Law (Law No. 6362). Accordingly, neither this document nor any other offering material related to the instrument/service may be utilized in connection with providing any capital market services to persons within the Republic of Turkey without the prior approval of the CMB. However, according to article 15 (d) (ii) of the Decree No. 32 residents of the Republic of Turkey are allowed to purchase or sell the financial instruments traded in financial markets outside of the Republic of Turkey. Further to this, pursuant to article 9 of the Communiqué on Principles Regarding Investment Services, Activities and Ancillary Services No. III-37.1, investment services provided abroad to residents of the Republic of Turkey based on their own initiative are not restricted. **United Arab Emirates (UAE)**: UBS is not a financial institution licensed in the UAE by the Central Bank of the UAE nor by the Emirates' Securities and Commodities Authority and does not undertake banking activities in the UAE. UBS AG Dubai Branch is licensed by the DFSA in the DIFC. This document is provided for your information only and does not constitute financial advice. **United Kingdom**: This document is issued by UBS Wealth Management, a division of UBS AG which is authorised and regulated by the Financial Market Supervisory Authority in Switzerland. In the United Kingdom, UBS AG is authorised by the Prudential Regulation Authority and is subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. Details about the extent of regulation by the Prudential Regulation Authority are available from us on request. A member of the London Stock Exchange. This publication is distributed to retail clients of UBS Wealth Management. **Ukraine**: UBS is not registered and licensed as a bank/financial institution under Ukrainian legislation and does not provide banking and other financial services in Ukraine. UBS has not made, and will not make, any offer of the mentioned products to the public in Ukraine. No action has been taken to authorize an offer of the mentioned products to the public in Ukraine and the distribution of this document shall not constitute financial services for the purposes of the Law of Ukraine "On Financial Services and State Regulation of Financial Services Markets" dated 12 July 2001. Any offer of the mentioned products shall not constitute an investment advice, public offer, circulation, transfer, safekeeping, holding or custody of securities in the territory of Ukraine. Accordingly, nothing in this document or any other document, information or communication related to the mentioned products shall be interpreted as containing an offer, a public offer or invitation to offer or to a public offer, or solicitation of securities in the territory of Ukraine or investment advice under Ukrainian law. Electronic communication must not be considered as an offer to enter into an electronic agreement or other electronic instrument within the meaning of the Law of Ukraine "On Electronic Commerce" dated 3 September 2015. This document is strictly for private use by its holder and may not be passed on to third parties or otherwise publicly distributed. **USA**: Distributed to US persons by UBS Financial Services Inc. or UBS Securities LLC, subsidiaries of UBS AG. UBS Switzerland AG, UBS Europe SE, UBS Bank, S.A., UBS Brasil Administradora de Valores Mobiliários Ltda., UBS Asesores México, S.A. de C.V., UBS SuMi TRUST Wealth Management Co., Ltd., UBS Wealth Management Israel Ltd. and UBS Menkul Degerler AS are affiliates of UBS AG. **UBS Financial Services Inc. accepts responsibility for the content of a report prepared by a non-US affiliate when it distributes reports to US persons. All transactions by a US person in the securities mentioned in this report should be effected through a US-registered broker dealer affiliated with UBS, and not through a non-US affiliate. The contents of this report have not been and will not be approved by any securities or investment authority in the United States or elsewhere. UBS Financial Services Inc. is not acting as a municipal advisor to any municipal entity or obligated person within the meaning of Section 15B of the Securities Exchange Act (the "Municipal Advisor Rule") and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of the Municipal Advisor Rule.**

First Crack at 1Q23

We believe NiSource's 1Q23 earnings release has neutral implications for the stock. Q1 EPS slightly beat consensus. The company reaffirmed its 2023 non-GAAP NOEPS earnings guidance and annual non-GAAP NOEPS growth of 6-8% through 2027. NIPSCO minority sale is on track for 2023.

Key Takes:

- NI reported Q1 adjusted diluted Net operating EPS (NOEPS) of $0.77 vs. our estimate of $0.77 and street consensus of $0.75. 1Q23 NOEPS is 3% higher than 1Q22 NOEPS of $0.75.
- Reaffirmed 2023 non-GAAP NOEPS guidance range of $1.54-$1.60.
    - Midpoint of $1.57 represents 6.8% growth off 2022 NOEPS. Consensus is at $1.55.
- Reaffirmed annual non-GAAP NOEPS growth of 6-8% through 2027.
    - Off the 2023 earnings guidance range of $1.54-$1.60.
- Reaffirmed $15B 2023-2027 capex plan with ~75% of investments beginning earning in less than 18 months
    - Driving 8%-10% annual utility rate base growth
- Northern Indiana Public Service Company (NIPSCO) minority sale process on track for 2023
- Long-term 14-16% FFO/Debt target reaffirmed
- NIPSCO reached a settlement in the electric rate case on March 10th
- Shawn Anderson, formerly senior vice president of risk and chief strategy officer, moved into the role of executive vice president and chief financial officer, effective Mar 27th

NI will host a conference call at 11am ET. Dial-in: 1 (888) 330-2391. Passcode: 28323. We will follow the call with a detailed note.

Additional Details:

- **Minority Interest Sale:** Minority interest sale of NIPSCO is still expected to be completed in 2023 and continues to track as expected. The company remains confident in the attractiveness of the asset and has previously stated that there is no decline in interest attributable to interest rates, particularly given the quality of the potential counterparties with ready capital to deploy, bank leverage tools, and long-term investment preference. NiSource has initiated the sale process, and we expect an announcement by mid-year and close by year-end. We estimate $1.5-$2B in cash proceeds.
- **NIPSCO Electric rate case**: On March 10th, NIPSCO and other parties reached a settlement agreement in its electric rate case in Indiana. The settlement proposed a $292M rate increase compared with $395M company requested, including base rate increase and tracker. The parties agreed on an ROE of 9.8% versus current 9.75%, and an equity layer of 51.63% versus current 47.86%. Recall that company requested a 10.4% ROE and a 58.5% equity ratio on a rate base of $5.95B. We view the settlement as constructive if approved. A final Commission order is expected in mid-August with rates going into effect in September.
- **Virginia gas rate case**: On Dec 9th, Columbia Gas of Virginia reached a settlement with $25.8 million rate increase, inclusive of SAVE (Steps to Advance Virginia's Energy Plan) infrastructure tracker ($14.5MM), representing a settlement as to a specific revenue number but not as to a specific ROE. Recall that NiSource requested $40.6MM revenue increase net of the SAVE infrastructure tracker ($17.7MM) with a 10.75% ROE and 39.3% equity ratio on a rate base of $1.0B with a 12/21 test year. A final order is expected in 2Q23.

Please see the analyst certification and important disclosures on page 4 of this report. Evercore ISI and affiliates do and seek to do business with companies covered in its research reports. Investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.
© 2023. Evercore Group L.L.C. All rights reserved.

- **OH gas rate case**: On Oct 31st, 2022, Columbia Gas of Ohio filed a settlement representing a $68.2M revenue increase with 9.6% ROE and 50.6% equity layer. The company originally requested $221MM with ROE of 10.9%. The equity ratio request of ~51% was not disputed. The commission approved the settlement in January 2023 for new rates effective in March.
- **Leadership changes:** The company announced several leadership changes on March 15th, link. Notably Shawn Anderson formerly senior vice president of risk and chief strategy officer, moved into the role of executive vice president and chief financial officer effective Mar 27th. Donald Brown, NiSource's former chief financial officer, assumed the role of executive vice president and chief innovation officer on Mar 27th, replacing Melody Birmingham, who was named as executive vice president, and group president, NiSource utilities.

VALUATION METHODOLOGY

We use a SOTP analysis to arrive at our price target

RISKS

Risks to our thesis include an inability to deploy capital at the company's expected rate resulting in a lower rate base and regulatory pressure resulting in lower allowed ROEs

ANALYST CERTIFICATION

The analysts, Durgesh Chopra, Sharon Wang, primarily responsible for the preparation of this research report attest to the following: (1) that the views and opinions rendered in this research report reflect his or her personal views about the subject companies or issuers; and (2) that no part of the research analyst's compensation was, is, or will be directly related to the specific recommendations or views in this research report.

IMPORTANT DISCLOSURES

This report is approved and/or distributed by Evercore Group L.L.C. ("Evercore Group"), a U.S. licensed broker-dealer regulated by the Financial Industry Regulatory Authority ("FINRA"), and Evercore ISI International Limited ("ISI UK"), which is authorised and regulated in the United Kingdom by the Financial Conduct Authority. The institutional sales, trading and research businesses of Evercore Group and ISI UK collectively operate under the global marketing brand name Evercore ISI ("Evercore ISI"). Both Evercore Group and ISI UK are subsidiaries of Evercore Inc. ("Evercore "). The trademarks, logos and service marks shown on this report are registered trademarks of Evercore.

The analysts and associates responsible for preparing this report receive compensation based on various factors, including Evercore's Partners' total revenues, a portion of which is generated by affiliated investment banking transactions. Evercore ISI seeks to update its research as appropriate, but various regulations may prevent this from happening in certain instances. Aside from certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Evercore ISI generally prohibits analysts, associates and members of their households from maintaining a financial interest in the securities of any company in the analyst's area of coverage. Any exception to this policy requires specific approval by a member of our Compliance Department. Such ownership is subject to compliance with applicable regulations and disclosure. Evercore ISI also prohibits analysts, associates and members of their households from serving as an officer, director, advisory board member or employee of any company that the analyst covers.

This report may include a Tactical Call, which describes a near-term event or catalyst affecting the subject company or the market overall and which is expected to have a short-term price impact on the equity shares of the subject company. This Tactical Call is separate from the analyst's long-term recommendation (Outperform, In Line or Underperform) that reflects a stock's forward 12-month expected return, is not a formal rating and may differ from the target prices and recommendations reflected in the analyst's long-term view.

Applicable current disclosures regarding the subject companies covered in this report are available at the offices of Evercore ISI: 55 East 52nd Street, New York, NY 10055, and at the following site: https://evercoreisi.mediasterling.com/disclosure.

Evercore and its affiliates, and I or their respective directors, officers, members and employees, may have, or have had, interests or qualified holdings on issuers mentioned in this report. Evercore and its affiliates may have, or have had, business relationships with the companies mentioned in this report.

Additional information on securities or financial instruments mentioned in this report is available upon request.

Ratings Definitions

Current Ratings Definition

Evercore ISI's recommendations are based on a stock's total forecasted return over the next 12 months. Total forecasted return is equal to the expected percentage price return plus gross dividend yield. We divide our stocks under coverage into three primary ratings categories, with the following return guidelines:

Outperform- the total forecasted return is expected to be greater than the expected total return of the analyst's coverage sector.
In Line- the total forecasted return is expected to be in line with the expected total return of the analyst's coverage sector.
Underperform- the total forecasted return is expected to be less than the expected total return of the analyst's coverage sector.
Coverage Suspended- the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances.*
Rating Suspended- Evercore ISI has suspended the rating and target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon.*

*Prior to October 10, 2015, the "Coverage Suspended" and "Rating Suspended" categories were included in the category "Suspended."

FINRA requires that members who use a ratings system with terms other than "Buy," "Hold/Neutral" and "Sell" to equate their own ratings to these categories. For this purpose, and in the Evercore ISI ratings distribution below, our Outperform, In Line, and Underperform ratings can be equated to Buy, Hold and Sell, respectively.

Historical Ratings Definitions

Prior to March 2, 2017, Evercore ISI's recommendations were based on a stock's total forecasted return over the next 12 months:

Buy- the total forecasted return is expected to be greater than 10%
Hold- the total forecasted return is expected to be greater than or equal to 0% and less than or equal to 10%
Sell -the total forecasted return is expected to be less than 0%

On October 31, 2014, Evercore Partners acquired International Strategy & Investment Group LLC ("ISI Group") and ISI UK (the "Acquisition") and transferred Evercore Group's research, sales and trading businesses to ISI Group. On December 31, 2015, the combined research, sales and trading businesses were transferred back to Evercore Group in an internal reorganization. Since the Acquisition, the combined research, sales and trading businesses have operated under the global marketing brand name Evercore ISI.

ISI Group and ISI UK:

Prior to October 10, 2014, the ratings system of ISI Group LLC and ISI UK which was based on a 12-month risk adjusted total return:

Strong Buy- Return > 20%
Buy- Return 10% to 20%
Neutral - Return 0% to 10%
Cautious- Return -10% to 0%
Sell- Return< -10%

For disclosure purposes, ISI Group and ISI UK ratings were viewed as follows: Strong Buy and Buy equate to Buy, Neutral equates to Hold, and Cautious and Sell equate to Sell.

Evercore Group:

Prior to October 10, 2014, the rating system of Evercore Group was based on a stock's expected total return relative to the analyst's coverage universe over the following 12 months. Stocks under coverage were divided into three categories:

Overweight- the stock is expected to outperform the average total return of the analyst's coverage universe over the next 12 months.
Equal-Weight- the stock is expected to perform in line with the average total return of the analyst's coverage universe over the next 12 months.
Underweight -the stock is expected to underperform the average total return of the analyst's coverage universe over the next 12 months.
Suspended- the company rating, target price and earnings estimates have been temporarily suspended.

For disclosure purposes, Evercore Group's prior "Overweight," "Equal-Weight" and "Underweight" ratings were viewed as "Buy," "Hold" and "Sell," respectively.

Ratings Definitions for Portfolio-Based Coverage

Evercore ISI utilizes an alternate rating system for companies covered by analysts who use a model portfolio-based approach to determine a company's investment recommendation. Covered companies are included or not included as holdings in the analyst's Model Portfolio, and have the following ratings:

Long- the stock is a positive holding in the model portfolio; the total forecasted return is expected to be greater than 0%.
Short- the stock is a negative holding in the model portfolio; the total forecasted return is expected to be less than 0%.
No Position- the stock is not included in the model portfolio.
Coverage Suspended- the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company, and in certain other circumstances; a stock in the model portfolio is removed.
Rating Suspended - Evercore ISI has suspended the rating and/or target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon; a stock in the model portfolio is removed.

Stocks included in the model portfolio will be weighted from 0 to 100% for Long and 0 to -100% for Short. A stock's weight in the portfolio reflects the analyst's degree of conviction in the stock's rating relative to other stocks in the portfolio. The model portfolio may also include a cash component. At any given time the aggregate weight of the stocks included in the portfolio and the cash component must equal100%.

Stocks assigned ratings under the alternative model portfolio-based coverage system cannot also be rated by Evercore ISI's Current Ratings definitions of Outperform, In Line and Underperform.

FINRA requires that members who use a ratings system with terms other than "Buy," "Hold/Neutral" and "Sell," to equate their own ratings to these categories. For this purpose, and in the Evercore ISI ratings distribution below, our Long, No Position and Short ratings can be equated to Buy, Hold and Sell respectively.

Evercore ISI rating (as of 03 May 2023)

GENERAL DISCLOSURES

This report is approved and/or distributed by Evercore Group L.L.C. (“Evercore Group”), a U.S. licensed broker-dealer regulated by the Financial Industry Regulatory Authority (“FINRA”) and by International Strategy & Investment Group (UK) Limited (“ISI UK”), which is authorized and regulated in the United Kingdom by the Financial Conduct Authority. The institutional sales, trading and research businesses of Evercore Group and ISI UK collectively operate under the global marketing brand name Evercore ISI ("Evercore ISI"). Both Evercore Group and ISI UK are subsidiaries of Evercore Inc. ("Evercore"). The trademarks, logos and service marks shown on this report are registered trademarks of Evercore Inc.

This report is provided for informational purposes only. It is not to be construed as an offer to buy or sell or a solicitation of an offer to buy or sell any financial instruments or to participate in any particular trading strategy in any jurisdiction. The information and opinions in this report were prepared by employees of affiliates of Evercore. The information herein is believed by Evercore ISI to be reliable and has been obtained from public sources believed to be reliable, but Evercore ISI makes no representation as to the accuracy or completeness of such information. Opinions, estimates and projections in this report constitute the current judgment of the author as of the date of this report. They do not necessarily reflect the opinions of Evercore or its affiliates and are subject to change without notice. In addition, opinions, estimates and projections in this report may differ from or be contrary to those expressed by other business areas or groups of Evercore and its affiliates. Evercore ISI has no obligation to update, modify or amend this report or to otherwise notify a reader thereof in the event that any matter stated herein, or any opinion, projection, forecast or estimate set forth herein, changes or subsequently becomes inaccurate. Facts and views in Evercore ISI research reports and notes have not been reviewed by, and may not reflect information known to, professionals in other Evercore affiliates or business areas, including investment banking personnel. Evercore ISI salespeople, traders and other professionals may provide oral or written market commentary or trading strategies to our clients that reflect opinions that are contrary to the opinions expressed in this research. Our asset management affiliates and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

Evercore ISI does not provide individually tailored investment advice in research reports. The financial instruments discussed in this report are not suitable for all investors and investors must make their own investment decisions using their own independent advisors as they believe necessary and based upon their specific financial situations and investment objectives. This report has been prepared without regard to the particular investment strategies or financial, tax or other personal circumstances of the recipient. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to the recipient’s individual circumstances, or otherwise constitutes a personal recommendation to the recipient. None of Evercore Group or its affiliates will treat any recipient of this report as its customer by virtue of the recipient having received this report.

Securities and other financial instruments discussed in this report, or recommended or offered by Evercore ISI, are not insured by the Federal Deposit Insurance Corporation and are not deposits of or other obligations of any insured depository institution. If a financial instrument is denominated in a currency other than an investor’s currency, a change in exchange rates may adversely affect the price or value of, or the income derived from the financial instrument, and such investor effectively assumes such currency risk. In addition, income from an investment may fluctuate and the price or value of financial instruments described in this report, either directly or indirectly, may rise or fall. Estimates of future performance are based on assumptions that may not be realized. Furthermore, past performance is not necessarily indicative of future performance.

Please note that this report was prepared for and distributed by Evercore ISI to its institutional investor and market professional customers. Recipients who are not institutional investor or market professional customers of Evercore ISI should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.

Electronic research is simultaneously distributed to all clients. This report is provided to Evercore ISI clients and may not be redistributed, retransmitted or disclosed, in whole or in part, or in any form or manner, without the express written consent of Evercore ISI. Receipt and review of this research report constitutes your agreement not to redistribute, retransmit, or disclose to others the contents, opinions, conclusion or information contained in this report (including any investment recommendations, estimates or target prices) without first obtaining express permission from Evercore ISI.

This report is not intended for distribution to or use by any person or entity in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Evercore Group or its affiliates to any registration or licensing requirement within such jurisdiction. If this report is being distributed by a financial institution other than Evercore ISI or its affiliates, that financial institution is solely responsible for such distribution and for compliance with the laws, rules and regulations of any jurisdiction where this report is distributed. Clients of that financial institution should contact that institution to effect any transaction in the securities mentioned in this report or if such clients require further information. This report does not constitute investment advice by Evercore ISI to the clients of the distributing financial institution, and neither Evercore ISI nor its affiliates, nor their respective officers, directors or employees, accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content.

For persons in the UK: In making this report available, Evercore makes no recommendation to buy, sell or otherwise deal in any securities or investments whatsoever and you should neither rely or act upon, directly or indirectly, any of the information contained in this report in respect of any such investment activity. This report is being directed at or distributed to, (a) persons who fall within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”)); (b) persons falling within the definition of high net worth companies, unincorporated associations, etc. (set out in Article 49(2) of the Order); (c) other persons to whom it may otherwise lawfully be communicated (all such persons together being referred to as “relevant persons”). This report must not be acted on or relied on by persons who are not relevant persons.

For persons in Switzerland: The distribution of these materials to persons or entities in Switzerland is not intended to, and does not, constitute a financial service under the Swiss Financial Services Act (FinSA). In particular, the distribution of these materials does not constitute the provision of personal recommendations on transactions with financial instruments (investment advice) within the meaning of Article 3(c)(4) of FinSA.

For persons in Australia: Evercore does not have an Australian Financial Services License ("AFSL"). This report is only to be distributed to persons who fall within the definition of "wholesale" investors under section 761G of the Corporations Act 2001 (Cth). This report must not be acted on or relied on by persons who are not wholesale investors. Evercore relies on the relief provided under ASIC Corporations (Foreign Financial Services Providers—Limited Connection) Instrument 2017/182 to provide this report to wholesale investors in Australia without an AFSL.

For persons in New Zealand: This material has been prepared by Evercore Group L.L.C. for distribution in New Zealand to financial advisors and wholesale clients only and has not been prepared for use by retail clients (as those terms are defined in the Financial Markets Conduct Act 2013 (‘FMCA’)). Evercore Group L.L.C. is not, and is not required to be, registered or licensed under the FMCA, and unless otherwise stated any financial products referred to in this material are generally only available in New Zealand for issue to those satisfying the wholesale investor criteria in the FMCA.

Applicable current disclosures regarding the subject companies covered in this report are available at the offices of Evercore ISI: 55 East 52nd Street, New York, NY 10055, and at the following site: https://evercoreisi.mediasterling.com/disclosure.

In compliance with the European Securities and Markets Authority's Market Abuse Regulation, a list of all Evercore ISI recommendations disseminated in the preceding 12 months for the subject companies herein, may be found at the following site: https://evercoreisi.mediasterling.com/disclosure.

CAISO – CA transmission RTO bill is referred to Appropriations committee

WEC – S&P Revises WEC Energy Group Outlook to Negative

AEP/DUK/NI – Indiana legislation signed into law this week protects utilities' control over building power lines

EXC reports 1Q23 earnings

- EXC reported $0.70 vs. Gugg/Cons of $0.67/0.66
- Reaffirmed 2023 EPS guidance of $2.30-2.42 vs. Gugg/Cons $2.36/2.37
- Results for the quarter featured ($0.04) of weather at PECO, ($0.01) at PHI
- Key long term outlook messages unchanged from 4Q22 update (EPS and DPS growth/payout ratio commentary)
- Key parameters of financing plan unchanged ($425m equity by '25), 80% of debt financing needs executed in 1Q
- Call at 10am – register HERE
- Slides HERE

NI reports 1Q23 in line net operating EPS of $0.77 vs Gugg/consensus at $0.76/$0.76; maintains 2023 guidance of $1.54-$1.60 ($1.57 midpoint) vs Gugg/consensus at $1.57/$1.56

- **Asset sale update:** NI reports being "on track" with regard to strengthening its balance sheet via a successful minority interest sale of its NIPSCO utility
  - Company still expects a **close in 2023**

- **Credit:** continuing to target 14%-16% FFO/debt post-sale of NIPSCO minority interest
- **EPS CAGR:** reiterates 6%-8% expected annual NOEPS growth through 2027 (illustrated clearly on slide 5)
- **Cost management:** reiterates guidance of flat O&M
- **Capex:** $15bn 2023–2027 capex plan reiterated, along with 2023 capital investment guidance
- **Rate Base:** reiterated 8%-10% expected annual rate base growth; recall that FY22 projected rate base was estimated at ~$16.6bn
- **Credit:** ~$11.6bn of total debt as of March 31, 2023; ~$10.3bn of LT debt; ~13yr weighted average maturity; 3.83% weighted average interest rate
    - Committed to maintaining current investment-grade credit ratings: S&P (BBB+), Moody's (Baa2), and Fitch (BBB)
- **Financing:** maintains 2023–2027 financing plan; equity plans (excluding the remarketed equity units of $863m) are to restart the company's ATM equity in 2025+, to support current investment grade credit ratings; may also be used to redeem o/s preferred stock ($900m)
- **TSR:** continuing to target 9%-11% total shareholder return
- **Dividend:** reiterated 60%–70% payout target.
- Call is at **11:00am at 1-888-330-2391... Passcode: 28323**

ALE reports 1Q23 earnings

- ALE reported $1.02 vs. Gugg/Cons of $1.22/1.18
- Reaffirmed 2023 EPS guidance of $3.55 to $3.85 vs. Gugg/Cons of $3.70/3.71
- Weather was ($0.10) impact on the quarter
- "Sales to residential, commercial and municipal customers decreased from 2022 primarily due to warmer weather in 2023 compared to 2022. Sales to municipal customers also decreased as a result of a new contract entered into with Hibbing Public Utilities in April 2022 with sales under the new contract classified under other power suppliers." - Q
- ACE 'below expectations' on lower wind and availability of assets
- ACE O&M up 25% (+$2.9m)
- Higher O&M also dragged on MN Power (+$10.4m vs. 1Q22)
- 1Q23 contribution of $4.5mm from New Energy
- Still planning next MN Power case in 4Q23
- Call at 10am – register HERE
- Slides to be posted HERE

SR reports 2FQ23 beat of $3.70 in NEEPS vs Gugg/consensus at $3.44/$3.50; narrows FY23 NEEPS guidance to $4.20–$4.30 (from $4.15–$4.35), maintaining $4.25 midpoint, vs Gugg/consensus at $4.25/$4.25

- Reiterates confidence in 5-7% long-term EPS growth off of a base of the midpoint of the company's original fiscal 2023 earnings guidance of $**4.15**

- Following fiscal Q2 2023 results, SR has updated its segment guidance as below:
    - **Gas Utility:** $210m–$220m, **down** from $225m–$235m, previously
    - **Gas Marketing:** $43m–$48m, **up** vs $25m–$30m, previously
    - **Midstream**: $10m–$12m **a minor tweak upwards** vs $9m–$11m, previously
    - **Corporate & Other:** $-25m–$-30m vs $-20m–$-25m, previously
    - *Notable offsets to the strength at Marketing and Midstream were the impacts of lower margins during the winter of the Gas Utilities, as well as high interest expenses (impactful at both Gas Utilities and Corporate costs).*

- **Capex:** targeted 10-year capital investment plan remains $7bn, and expected capex for fiscal 2023 remain $700m, including the company's Midstream expansion for Spire Storage, which it reports "remains on plan".
- **Rate Base growth:** Capex is anticipated to drive 7%–8% utility rate base growth
- *Presentation and accompanying details not yet released*
- Earnings call will be held today at 9**:00 AM ET**… Dial-in: **844-824-3832**…(**no access code**)

AVA reports large miss for 1Q23 of $0.73 vs Gugg/consensus at $1.23/$1.16 and 1Q22 EPS of $0.99; maintains 2023 annual guidance of $2.27–$2.47 ($2.37 midpoint) vs Gugg/consensus at $2.28/2.34

- $–0.11 of EPS decline was driven primarily by inflationary pressures resulting in increased labor and benefits costs, among other operating expenses.
- $–0.09 came from timing-driven changes to AVA's effective tax rate; EFT was –13.7% in 1Q23 vs –17.8% in 1Q22.
- $–0.08 was a direct result of higher interest rates.
- $–0.02 at "other businesses", due to net investment losses recognized in 2023 compared to net investment gains recognized in 2022.
- **Margins:** compared to 1Q22, electric utility margin was flat, while natural gas utility margin increased EPS by $0.06 in 1Q23
- **"***We expect lower net power supply costs for the remainder of the year, resulting in a benefit under the ERM***" —** Dennis Vermillion, President and CEO
    - AVA booked a $7.6m pre-tax expense under the Energy Recovery Mechanism (ERM) in Washington, compared to a $1.9m pre-tax benefit in 1Q22

- **Capex:** 2023 capex guidance at Avista Utilities was reiterated at $475m; AEL&P capex is expected to be $19m vs $15m previously.
- **Debt Financing:** AVA issued $250m of long-term debt in 1Q23 (vs prior guidance of $200m for 2023) and does not expect to issue further LT debt this year.
    - The company ***does however*** expect to increase the capacity of its $400m credit facility to $500m in 2Q23.

- **Equity Financing:** $30m of equity was issued in 1Q23, and common stock issuance guidance was maintained at $120m for 2023.

EXC/IL – ComEd trial results in 4 guilty verdicts

- Michael McClain, former ComEd CEO Anne Pramaggiore, ex-ComEd lobbyist John Hooker and former City Club President Jay Doherty were convicted on all counts following 27 hours of deliberation
- More HERE

Guggenheim takeaway: *The case has been a constant point of media noise in IL in recent weeks, so good to see resolution in our view ahead of the second phase (former speaker Madigan). As a reminder, this matter was the driver of the July 2020 deferred prosecution agreement between the utility and the US Attorney's Office for the Northern District of Illinois. More recently, the case had tangential readthrough to the ICC given certain linkages (see HERE).*

SMR – NuScale continues to pursue opportunities in SE Asia; news release correction clarifies SMR's role

- Alongside a state visit of the Philippine president to DC, the president's office initially indicated in a release that the company would invest ~$7bn in the country to build a 430MW plant
- The language around the meeting with NuScale executives was subsequently amended yesterday to clarify that the company is working on a study and potentially with a local developer
- More HERE

Guggenheim takeaway: *The headline of NuScale potentially investing several times its market cap in the country generated some noise yesterday, with the subsequent clarifications helping to underscore that this is a normal outreach process for the country – similar to what we have seen to date in eastern Europe. We continue to monitor for additional data points on leads like these.*

MA/Wind – MA DOER and other agencies issue RFP for up to 3.6GWs of offshore wind

- The blockbuster RFP will set in motion a ~8 month response period in which projects of varying sizes may be bid in
- "If approved, the draft RFP will invite submittals for offshore wind generation to procure up to 3,600 MW, which represents 25 percent of the state's annual electricity demand and a significant increase over the previous procurement, which sought approximately 1,600 MW of offshore wind." - release
- "The procurement team would have flexibility to evaluate bids ranging from 400 MW to 2,400 MW in size, and to select a project or projects that bring significant benefits to the Commonwealth." - release
- Bids are due 31 January 2024
- More HERE

Guggenheim takeaway: *Flagged for your awareness as MA joins NY in seeking additional procurements of wind. The latest request is the first to come after last summer's modifications to the process and is the first to be lead by the DOER. The solicitation includes a weighting towards economic development and other social considerations, which was a point of interest in the state during last year's session. While we would not be*

surprised to see ES' JV bid into this latest RFP, we continue to expect an exit in the coming quarters, with an announcement potentially by the 2Q call. The state is also grappling with the ongoing fallout around the technical default for the Commonwealth project.

Policy ─ Senator Manchin advances efforts on permitting reform in Senate

- The Senator's office has re-released his prior legislation on permitting reform to serve as a starting point in Senate and Congressional negotiations
- "Today, U.S. Senator Joe Manchin (D-WV), Chairman of the Senate Energy and Natural Resources Committee, introduced the *Building American Energy Security Act of 2023*, the text of the National Defense Authorization Act (NDAA) amendment that was supported by 47 Senators (40 Democrats and 7 Republicans) in a tied floor vote in December 2022. This legislation will serve as a starting point for upcoming conversations in the Senate around reforming energy permitting to ensure American energy security and independence." – Manchin's office
- More HERE

Guggenheim takeaway: *Heads up as the process begins to heat up on both sides of the Hill – the successful passage of a budget package (with permitting items) by Republicans sets up further conversations on this specific topic, and we continue to see the area as ripe for bipartisanship in the coming weeks.*

SPP ─ Grain Belt developers update on phasing of HVDC work

- The developers continue to analyze potential impacts of the line and its second phase into IL for impacts on energy and capacity pricing in MISO and potentially PJM
- "Preliminary design has begun. Detailed design is required to start Q4 2023, in order to meet 2028 COD. Results of SPP TWG studies are needed to start detailed design in Q4 2023." - presentation
- More HERE

Guggenheim takeaway: *We continue to monitor Grain Belt as a both a resource adequacy option for adjacent utilities, and for its potential impact on energy and capacity pricing in MISO Zone 4 and beyond.*

PCG – PCG CEO makes constructive comments on company culture in media interview

- PCG CEO Patti Poppe made comments in a Press Democrat interview on transformation progress.
- Commentary directly addressed the ongoing culture change and PG&E.
- More here.

Guggenheim takeaway: *FYI. Transparent and open commentary on PG&E legacy issues.*

CAISO – CA transmission RTO bill is referred to Appropriations committee

- CA Legislature re-referred the bill addressing CAISO expansion into a western RTO to the appropriations

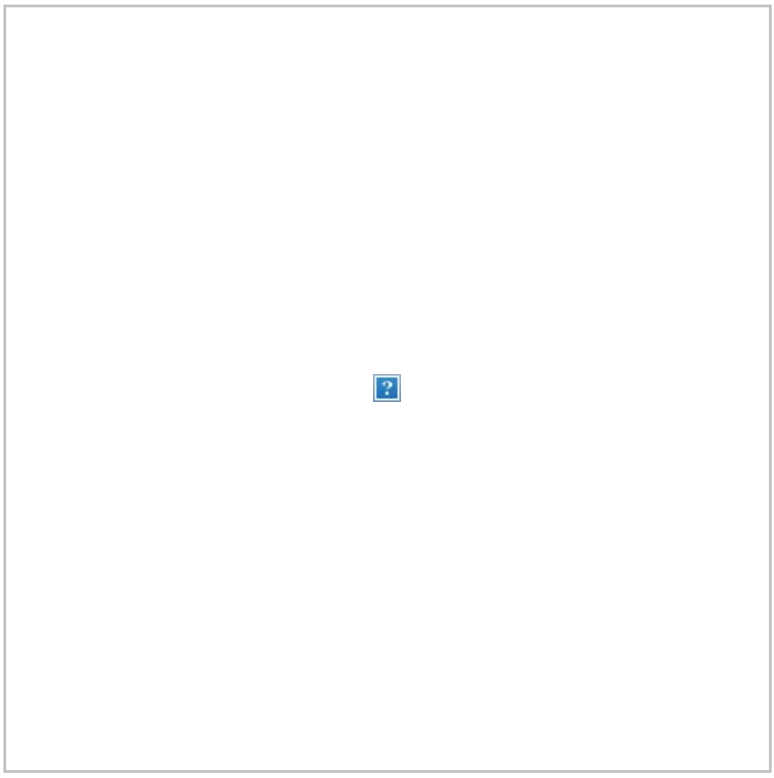
committee.

- CA introduced an assembly bill (AB538) that would look for CAISO to become an expanded western RTO with increased governance and multistate jurisdiction.
- The CAISO would be able to submit a plan to the CEC for expanded governance and multistate inclusion of resources into the RTO structure.
- Lawmakers believe this would be a solution to the resource adequacy constraints that CAISO has felt in recent years and would open up more availability of clean energy resources aligned with CA policy goals.
- Bill text here: AB538.

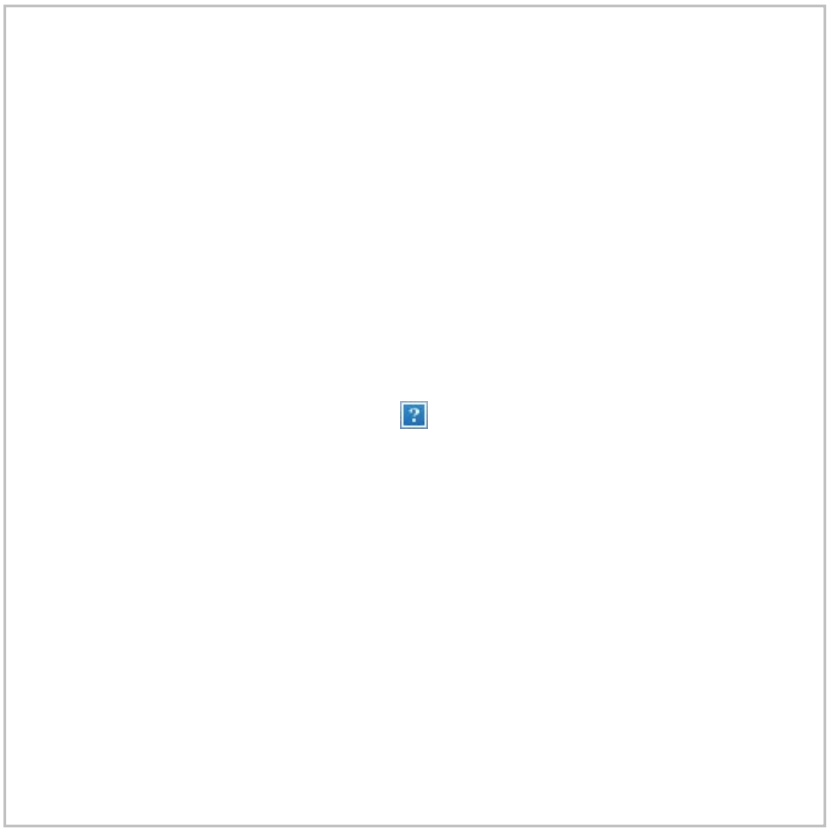
Guggenheim takeaway: *FYI. Resource adequacy work continues in CA.*

WEC – S&P Revises WEC Energy Group Outlook to Negative

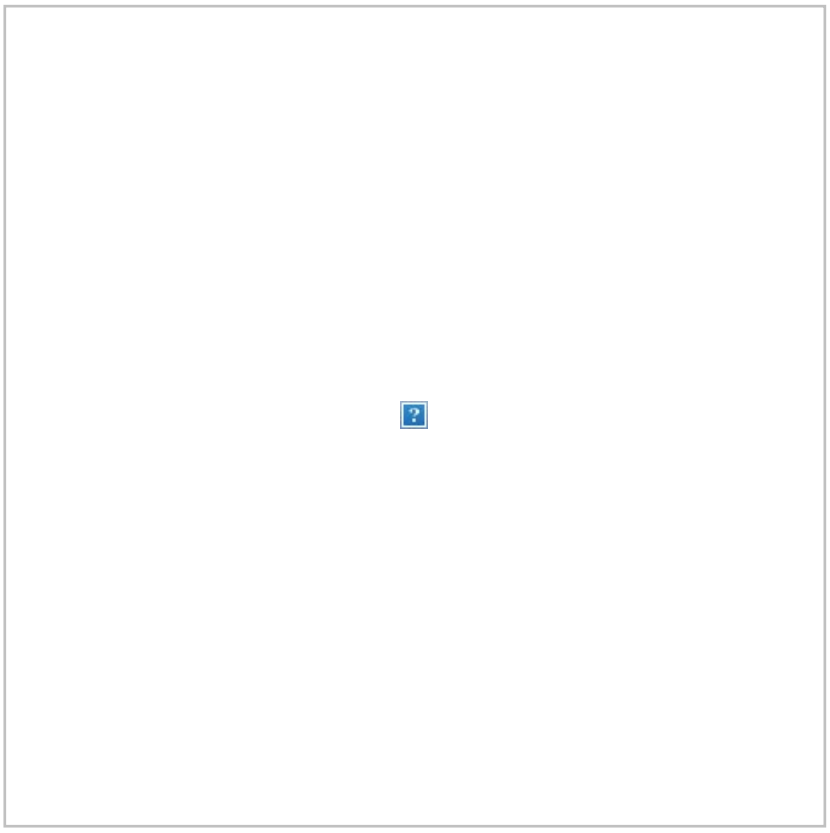
- S&P highlighted at the top of its report that WEC reaffirmed its expectation to fund its capital plan without any new equity issuance, a plan which incorporates $12.4bn of investments through 2025.
- S&P further states that WEC's negative operating cash flow has grown in recent years primarily from high capital spending and large nonutility acquisitions, and that S&P believes the company is disproportionately funding this cash deficit with incremental debt, weakening financial measures, in the rating agency's view.
- As a result, S&P believes its consolidated FFO- to-Debt could reside below S&P's downgrade threshold for the next three years.
- Bloomberg link to S&P release HERE



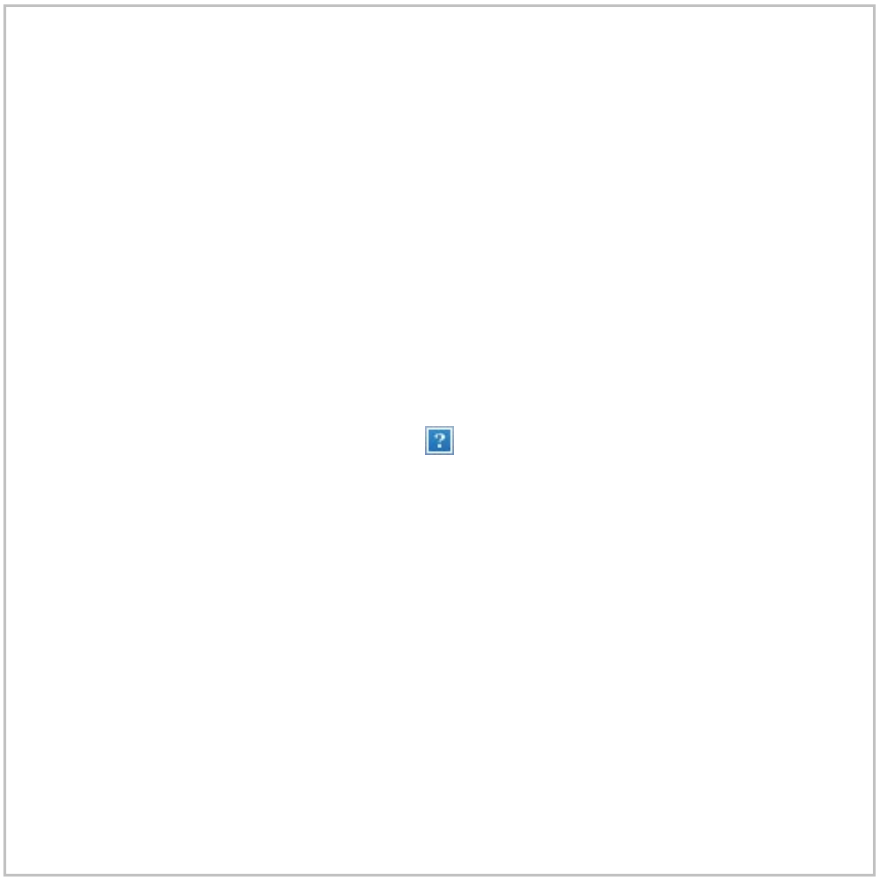
Guggenheim takeaway: *We caught up with the company following this release. WEC stated that from their perspective, S&P hasn't looked at the longer term, and highlighted that the outlook on WEC's utilities remains stable. The company does not expect this will materially impact its ability to access the capital markets, a view which we agree with, while also explicitly clarifying that WEC remains confident in its outlook.*



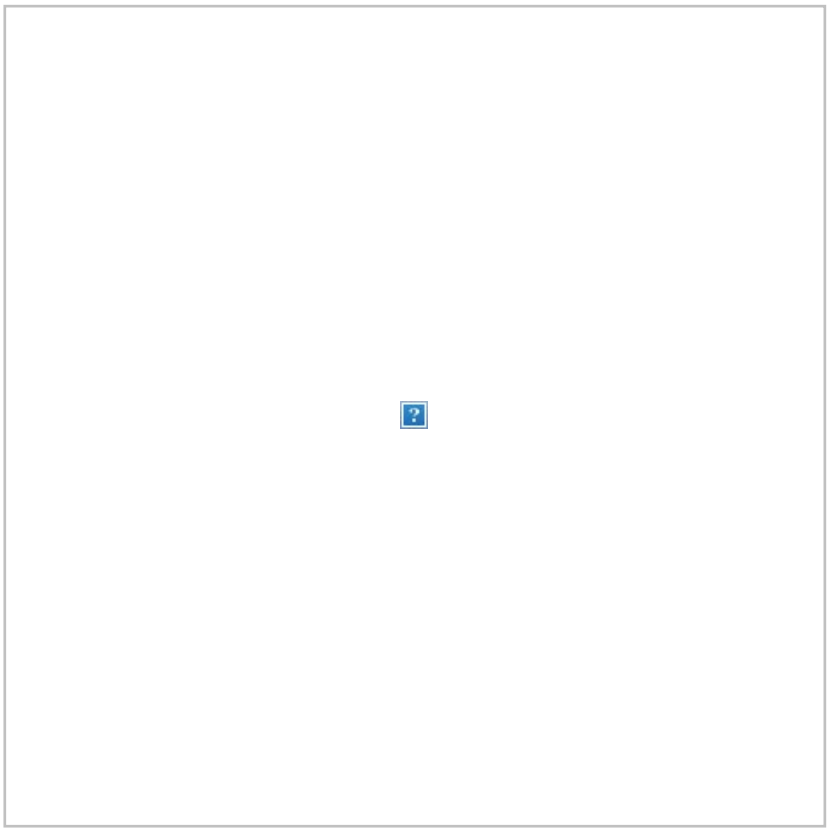
AEP/DUK/NI – Indiana legislation signed into law this week protects utilities' control over building power lines



- Governor Eric Holcomb, a Republican, signed legislation Monday that will give utilities the right to build and operate transmission projects that connect to their existing systems. Utilities owned by NiSource Inc. and AES Corp. also stand to benefit.
- Indiana Energy Association President Danielle McGrath hailed the new law as "sound policy," in response to an email sent to Duke for comment. AEP, AES and NiSource also referred to McGrath for comments.
- We note that transmission costs have apparently increased by an average of ~63% in Indiana over the preceding five years, as per the Electricity Transmission Competition Coalition, an advocacy group representing manufacturers and others who opposed the bill.
- Utilities will have to competitively bid to build projects and have the advantage of having crews on hand to make timely repairs after storms, according to McGrath.
- More HERE



Guggenheim takeaway: *From our coverage universe, we see AEP, DUK, and NI, as best positioned to benefit*



from this new law.

UBS

First Read

NiSource Inc.

Q1 Earnings Inline, LT Outlook Reaffirmed

Q: How did the results compare vs expectations?

A: Inline. The company reported adjusted Q1'23 earnings of $0.77/ per share vs. UBS/ consensus of $0.76/$0.75 per share. The company reported $0.75 per share for Q1'22.

Q: What were the most noteworthy areas in the results?

A: The company removed the impact of weather from its adjusted earnings, but weather would've been a 6c negative in the quarter relative to the operating number. The company saw higher revenues at both the electric and gas segments, but this was largely offset by higher interest and D&A. The company also benefited from higher corporate owned life insurance, while also facing a modestly higher tax rate in the quarter.

Q: Has the company's outlook/guidance changed?

A: No. The company reaffirmed 2023 full year EPS guidance of $1.54-1.60 and longer-term guidance of 6-8% annual EPS guidance through 2027 driven by 8-10% rate base growth. The company remains on track to transact a minority interest in the NIPSCO subsidiary in 2023.

Q: How would we expect investors to react?

A: Neutral. The print looks inline with expectations. We expect questions to focus on the sales process at NIPSCO, efforts to keep O&M flat going forward and the recently announced NIPSCO settlement.

Forecast returns

Forecast price appreciation	+11.1%
Forecast dividend yield	3.7%
Forecast stock return	+14.8%
Market return assumption	9.1%
Forecast excess return	+5.6%

Company Description

NI is a fully regulated gas and electric utility serving customers in six states in the Midwest and Mid-Atlantic. NI is a gas distribution utility with 3.2 million customers in Indiana, Kentucky, Maryland, Ohio, Pennsylvania, and Virginia. NI is an integrated electric utility serving 0.5 million customers in Indiana. NI's mix of operating earnings is 60% gas and 40% electric.

Valuation Method and Risk Statement

Risks include, but are not limited to, the following: changes to the regulatory environment, ability to achieve favorable returns on investment projects, and ability to continue to reinvest in the business for growth. Our $31 price target is based off a 14% premium to the regulated group average or 19.8x our 2024 estimate of $1.56. The premium consists of +5% for the group undervaluation, +5% for second quartile regulation and +4% for first quartile EPS growth.

Quantitative Research Review

UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. The views for this month can be found below. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For previous responses please make reference to (i) previous UBS research reports; and (ii) where no applicable research report was published that month, the Quantitative Research Review which can be found at https://neo.ubs.com/quantitative, or contact your UBS sales representative for access to the report or the Quantitative Research Team on qa@ubs.com. A consolidated report which contains all responses is also available and again you should contact your UBS sales representative for details and pricing or the Quantitative Research Team on the email above.

NiSource Inc.

Question	Response
1. Is the industry structure facing the firm likely to improve or deteriorate over the next year? Rate on a scale of 1-5 (1 = getting worse, 3 = no change, 5 = getting better, N/A = no view)	3
2. Is the regulatory/government environment facing the firm likely to improve or deteriorate over the next year? Rate on a scale of 1-5 (1 = getting tougher 3 = no change, 5 = getting better, N/A = no view)	3
3. Over the last 3-6 months in broad terms have things been improving/no change/getting worse for this stock? Rate on a scale of 1-5 (1 = getting a lot worse, 3 = not much change, 5 = getting a lot better, N/A = no view)	3
4. Relative to the current CONSENSUS EPS forecast, is the next company EPS update likely to lead to: (1 = negative surprise vs consensus, 3 = in-line with consensus, 5 = positive surprise vs consensus expectations, N/A = no view)	3
5. What's driving the difference?	
6. Relative to YOUR current earnings forecast, is there relatively greater risk at the next earnings result of:(1 = downside skew risk to earnings, 3 = equal upside or downside risk to earnings, 5 = upside skew risk to earnings, N/A = no view)	3
7. What's driving the difference?	
8. Is there an upcoming catalyst for the company over the next three months?	
9. Is there an actual or approximate date for the catalyst?	
10. Is the catalyst date an actual or approximate date?	
11. What is the catalyst?

KEY DEFINITIONS: Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES: UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/ qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. The name of each affiliate and analyst employed by that affiliate contributing to this report, if any, follows.

UBS Securities LLC: Ross Fowler, CFA, William Appicelli, CFA.

UBS Evidence Lab data is available on UBS Neo. The level and types of services provided by Global Research and UBS Evidence Lab to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

When you receive Global Research through a system, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (https://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (https://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (https://www.ubs.com/global/en/legal/privacy/users.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

In certain circumstances (including for example, if you are an academic or a member of the media) you may receive Global Research otherwise than in the capacity of a client of UBS and you understand and agree that (i) the Global Research is provided to you for information purposes only; (ii) for the purposes of receiving it you are not intended to be and will not be treated as a "client" of UBS for any legal or regulatory purpose; (iii) the Global Research must not be relied on or acted upon for any purpose; and (iv) such content is subject to the relevant disclaimers that follow.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. The recipient should carefully read this document in its entirety and not draw inferences or conclusions from the rating alone. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at https://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas

Provided for the exclusive use of Michael Weisenburger at NiSource on 03-May-2023 07:57 AM.

within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

United Kingdom: This material is distributed by UBS AG, London Branch to persons who are eligible counterparties or professional clients. UBS AG, London Branch is authorised by the Prudential Regulation Authority and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. **Europe:** Except as otherwise specified herein, these materials are distributed by UBS Europe SE, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients (as detailed in the Bundesanstalt fur Finanzdienstleistungsaufsicht (BaFin) Rules and according to MIFID) and are only available to such persons. The information does not apply to, and should not be relied upon by, retail clients. UBS Europe SE is authorised by the European Central Bank (ECB) and regulated by the BaFin and the ECB. **Germany, Luxembourg, the Netherlands, Belgium and Ireland:** Where an analyst of UBS Europe SE has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE. In all cases it is distributed by UBS Europe SE and UBS AG, London Branch. **Turkey:** Distributed by UBS AG, London Branch. No information in this document is provided for the purpose of offering, marketing and sale by any means of any capital market instruments and services in the Republic of Turkey. Therefore, this document may not be considered as an offer made or to be made to residents of the Republic of Turkey. UBS AG, London Branch is not licensed by the Turkish Capital Market Board under the provisions of the Capital Market Law (Law No. 6362). Accordingly, neither this document nor any other offering material related to the instruments/services may be utilized in connection with providing any capital market services to persons within the Republic of Turkey without the prior approval of the Capital Market Board. However, according to article 15 (d) (ii) of the Decree No. 32, there is no restriction on the purchase or sale of the securities abroad by residents of the Republic of Turkey. **Poland:** Distributed by UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce regulated by the Polish Financial Supervision Authority. Where an analyst of UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce. **Russia:** Prepared and distributed by UBS Bank (OOO). Should not be construed as an individual Investment Recommendation for the purpose of the Russian Law - Federal Law #39-FZ ON THE SECURITIES MARKET Articles 6.1-6.2.**Switzerland:** Distributed by UBS AG to persons who are institutional investors only. UBS AG is regulated by the Swiss Financial Market Supervisory Authority (FINMA). **Italy:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, Italy Branch. Where an analyst of UBS Europe SE, Italy Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, Italy Branch. **France:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, France Branch. For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit the portfolio manager's ability to participate in certain investment opportunities that otherwise would be consistent with its investment objective and other principal investment strategies. The returns on a portfolio consisting primarily of sustainable investments may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by the portfolio manager, and the investment opportunities available to such portfolios may differ. Companies may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues; there is also no guarantee that any company will meet expectations in connection with corporate responsibility, sustainability, and/or impact performance.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Bahrain: UBS is a Swiss bank not licensed, supervised or regulated in Bahrain by the Central Bank of Bahrain to undertake banking or investment business activities in Bahrain. Therefore, prospects/clients do not have any protection under local banking and investment services laws and regulations. **Brazil**: This report is only intended for Brazilian residents who are directly purchasing or selling securities in the Brazil capital market through a local authorized institution. **Canada**: The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. Under no circumstances is the information contained herein to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada or, alternatively, pursuant to a dealer registration exemption. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon these materials, the information contained herein or the merits of the securities described herein and any representation to the contrary is an offence. In Canada, this publication is distributed by UBS Investment Management Canada Inc. **China**: This report and any offering material such as term sheet, research report, other product or service documentation or any other information (the "Material") sent with this report was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly delete it and inform UBS immediately. This report is prepared by UBS Switzerland AG or its offshore subsidiary or affiliate (collectively as "UBS Offshore"). UBS Offshore is an entity incorporated out of China and is not licensed, supervised or regulated in China to carry out banking or securities business. The recipient should not contact the analysts or UBS Offshore which produced this report for advice as they are not licensed to provide securities investment advice in China. UBS Investment Bank (including Research) has its own wholly independent research and views which at times may vary from the views of UBS Global Wealth Management. The recipient should not use this document or otherwise rely on any of the information contained in this report in making investment decisions and UBS takes no responsibility in this regard. **Czech Republic**: UBS is not a licensed bank in the Czech Republic and thus is not allowed to provide regulated banking or investment services in the Czech Republic. This communication and/or material is distributed for marketing purposes and constitutes a "Commercial Message" under the laws of Czech Republic in relation to banking and/or investment services. Please notify UBS if you do not wish to receive any further correspondence. **Denmark**: This publication is not intended to constitute a public offer under Danish law. It is distributed only for information purposes to clients of UBS Europe SE, Denmark Branch, filial af UBS Europe SE, with place of business at Sankt Annae Plads 13, 1250 Copenhagen, Denmark, registered with the Danish Commerce and Companies Agency, under No. 38 17 24 33. UBS Europe SE, Denmark Branch, filial af UBS Europe SE is subject to the joint supervision of the European Central Bank, the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin"), as well as of the Danish Financial Supervisory Authority (Finanstilsynet), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by BaFin. **Egypt**: Securities or other investment products are not being offered or sold by UBS to the public in Egypt and they have not been and will not be registered with the Egyptian Financial Regulatory Authority (FRA). **France**: This publication is not intended to constitute a public offer under French law, it does not constitute a personal recommendation as it is distributed only for information purposes to clients of UBS (France) S.A., French "société anonyme" with share capital of € 132.975.556, at 69 boulevard Haussmann F-75008 Paris, registered with the "Registre du Commerce et des Sociétés" of Paris under N° B 421 255 670. UBS (France) S.A. is a provider of investment services duly authorized according to the terms of the "Code monétaire et financier", regulated by French banking and financial authorities as the "Autorité de contrôle prudentiel et de résolution" and "Autorité des marchés financiers", to which this publication has not been submitted for approval. **Germany**: This publication is not intended to constitute a public offer under German law. It is distributed only for information purposes to clients of UBS Europe SE, Germany, with place of business at Bockenheimer Landstrasse 2-4, 60306 Frankfurt am Main. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin") and supervised jointly by the European Central Bank, the German Central Bank (Deutsche Bundesbank) and BaFin, to which this publication has not been submitted for approval. **Hong Kong SAR**: This publication is distributed to clients of UBS AG Hong Kong Branch by UBS AG Hong Kong Branch, a licensed bank under the Hong Kong Banking Ordinance and a registered institution under the Securities and Futures Ordinance. UBS AG Hong Kong Branch is incorporated in Switzerland with limited liability. **India**: Distributed by UBS Securities India Private Ltd. (Corporate Identity Number U67120MH1996PTC097299) 2/F, 2 North Avenue, Maker Maxity, Bandra Kurla Complex, Bandra (East), Mumbai (India) 400051. Phone: +912261556000. It provides brokerage services bearing SEBI Registration Number INZ000259830; merchant banking services bearing SEBI Registration Number: INM000010809 and Research Analyst services bearing SEBI Registration Number: INH000001204. UBS AG, its affiliates or subsidiaries may have debt holdings or positions in the subject Indian company/companies. UBS AG, its affiliates or subsidiaries may have financial interests (e.g. like loan/derivative products, rights to or interests in investments, etc.) in the subject Indian company/companies from time to time. Within the past 12 months, UBS AG, its affiliates or subsidiaries may have received compensation for non-investment banking securities-related services and/or non-securities services from the subject Indian company/companies. The subject company/companies may have been a client/clients of UBS AG, its affiliates or subsidiaries during the 12 months preceding the date of distribution of the research report with respect to investment banking and/or non-investment banking securities-related services and/or non-securities services. With regard to information on associates, please refer to the Annual Report at: https://www.ubs.com/global/en/about_ubs/investor_relations/annualreporting.html. **Indonesia**: This communication and any offering material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed without the consent of UBS. None of the Material has been registered or filed under the prevailing laws and with any financial or regulatory authority in your jurisdiction. The Material may not have been approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including futures contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Israel**: UBS is a premier global financial firm offering wealth management, asset management and investment banking services from its headquarters in Switzerland and its operations in over 50 countries worldwide to individual, corporate and institutional investors. In Israel, UBS Switzerland AG is registered as Foreign Dealer in cooperation with UBS Wealth Management Israel Ltd., a wholly owned UBS subsidiary. UBS Wealth Management Israel Ltd. is an Investment Marketing licensee which engages in Investment Marketing and is regulated by the Israel Securities Authority. This publication is intended for information only and is not intended as an offer to buy or solicitation of an offer. Furthermore, this publication is not intended as an investment advice. No action has been, or will be, taken in Israel that would permit an offering of the product(s) mentioned in this document or a distribution of this document to the public in Israel. In particular, this document has not been reviewed or approved by the Israeli Securities Authority. The product(s) mentioned in this document is/are being offered to a limited number of sophisticated investors who qualify as one of the investors listed in the first supplement to the Israeli Securities Law, 5728-1968. This document may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. Anyone who purchases the product(s) mentioned herein shall do so for its own benefit and for its own account and not with the aim or intention of distributing or offering the product(s) to other parties. Anyone who purchases the product(s) shall do so in accordance with its own understanding and discretion and after it has received any relevant financial, legal, business, tax or other advice or opinion required by it in connection with such purchase(s). The word "advice" and/or any of its equivalent terms shall be read and construed in conjunction with the definition of the term "investment marketing" as defined under the Israeli Regulation of Investment Advice, Investment Marketing and Portfolio Management Law. The Swiss laws and regulations require a number of mandatory disclosures to be made in independent financial research reports or recommendations. Pursuant to the Swiss Financial Market Infrastructure Act and the Financial Market Infrastructure Ordinance-FINMA, banks must disclose the percentage of voting rights they hold in companies being researched, if these holdings are equal to or exceed the statutory thresholds. In addition, the Directives on the Independence of Financial Research, issued by the Swiss Bankers Association, mandate a number of disclosures, including the disclosure of potential conflicts of interest, the participation within previous 12 months in any securities issues on behalf of the company being researched, as well as the fact that remuneration paid to the financial analysts is based generally upon the performance of (i) the new issues department or investment banking; or (ii) securities trading performance (including proprietary trading) or sales. **Italy**: This publication is not intended to constitute a public offer under Italian law. It is distributed only for information purposes to clients of UBS Europe SE, Succursale Italia, with place of business at Via del Vecchio Politecnico, 3-20121 Milano. UBS Europe SE, Succursale Italia is subject to the joint supervision of the European Central Bank, the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin"), as well as of the Bank of Italy (Banca d'Italia) and the Italian Financial Markets Supervisory Authority (CONSOB - Commissione Nazionale per le Società e la Borsa), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by BaFin. **Jersey**: UBS AG, Jersey Branch, is regulated and authorized by the Jersey Financial Services Commission for the conduct of banking, funds and investment business. Where services are provided from outside Jersey, they will not be covered by the Jersey regulatory regime. UBS AG, Jersey Branch is a branch of UBS AG a public company limited by shares, incorporated in Switzerland whose registered offices are at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH 8001 Zurich. UBS AG, Jersey Branch's principal place of business is 1, IFC Jersey, St Helier, Jersey, JE2 3BX. **Luxembourg**: This publication is not intended to constitute a public offer under Luxembourg law. It is distributed only for information purposes to clients of UBS Europe SE, Luxembourg Branch ("UBS Luxembourg"), R.C.S. Luxembourg n° B209123, with registered office at 33A, Avenue J. F. Kennedy, L-1855 Luxembourg. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea (HRB n° 107046), with registered office at Bockenheimer Landstrasse 2-4, D-60306 Frankfurt am Main, Germany, duly authorized by the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin") and subject to the joint prudential supervision of BaFin, the European Central Bank and the central bank of Germany (Deutsche Bundesbank). UBS Luxembourg is furthermore supervised by the Luxembourg prudential supervisory authority (Commission de Surveillance du Secteur Financier), in its role as host member state authority. This publication has not been submitted for approval to any public supervisory authority. **Malaysia**: This communication and any offering material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or derivatives products). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or derivatives products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Mexico**: This information is distributed by UBS Asesores México, S.A. de C.V. ("UBS Asesores"), an affiliate of UBS Switzerland AG, incorporated as a non-independent investment advisor under the Mexican regulation due to the relation with a Foreign Bank. UBS Asesores is registered under number 30060-001-(14115)-21/06/2016 and subject to the supervision of the Mexican Banking and Securities Commission ("CNBV") exclusively regarding the rendering of (i) portfolio management services, (ii) securities investment advisory services, analysis and issuance of individual investment recommendations, and (iii) anti-money laundering and terrorism financing matters. This UBS publication or any material related thereto is addressed only to Sophisticated or Institutional Investors located in Mexico. Research reports only reflect the views of the analysts responsible for the report. The compensation of the analyst(s) who prepared this report is determined exclusively by research management and senior management of any entity of UBS Group to which such analyst(s) render(s) services. **Monaco**: This document is not intended to constitute a public offering or a comparable solicitation under the Principality of Monaco laws, but might be made available for information purposes to clients of UBS (Monaco) S.A., a regulated bank having its registered office at 2 avenue de Grande Bretagne 98000 Monaco operating under a banking license granted by the "Autorité de Contrôle Prudentiel et de Résolution" (ACPR) and the Monegasque government which authorizes the provision of banking services in Monaco. UBS (Monaco) S.A. is also licensed by the "Commission de Contrôle des Activités Financières" (CCAF) to provide investment services in Monaco. The latter has not approved this publication. **Nigeria**: The investment products mentioned in this material are not being offered or sold by UBS to the public in Nigeria and they have not been submitted for approval nor registered with the Securities and Exchange Commission of Nigeria. If you are interested in products of this nature, please let us know. The investment products mentioned in this material are not being directed to, and are not being made available for subscription by any persons within Nigeria other than the selected investors to whom the offer materials have been addressed as a private sale or domestic concern within the exemption and meaning of Section 69(2) of the Investments and Securities Act, 2007 (ISA). This material has been provided to you at your specific unsolicited request and for your information only. **Philippines:** This communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or derivatives products). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or derivatives products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Portugal**: UBS Switzerland AG is not licensed to conduct banking and financial activities in Portugal nor is UBS Switzerland AG supervised by the portuguese regulators (Bank of Portugal "Banco de Portugal" and Portuguese Securities Exchange Commission "Comissão do Mercado de Valores Mobiliários"). **Qatar**: UBS Qatar LLC is authorized by the Qatar Financial Centre Regulatory Authority, with QFC no. 01169, and has its registered office at 14th Floor, Burj Alfardan Tower, Building 157, Street No. 301, Area No. 69, Al Majdami, Lusail, Qatar. UBS Qatar LLC neither offers any brokerage services nor executes any order with, for or on behalf of its clients. A client order will have to be placed with, and executed by, UBS Switzerland AG in Switzerland or an affiliate of UBS Switzerland AG, that is domiciled outside Qatar. It is in the sole discretion of UBS Switzerland AG in Switzerland or its affiliate to accept or reject an order and UBS Qatar LLC does not have authority to provide a confirmation in this respect. UBS Qatar LLC may however communicate payment orders and investment instructions to UBS Switzerland AG in Switzerland for receipt, acceptance and execution. UBS Qatar LLC is not authorized to act for and on behalf of UBS Switzerland AG or an affiliate of UBS Switzerland AG. This document and any attachments hereto are intended for eligible counterparties and business customers only. **Russia**: This document or information contained therein is for information purposes only and constitutes neither a public nor a private offering, is not an invitation to make offers, to sell, exchange or otherwise transfer any financial instruments in the Russian Federation to or for the benefit of any Russian person or entity and does not constitute an advertisement or offering of securities in the Russian Federation within the meaning of Russian securities laws. The information contained herein is not an "individual investment recommendation" as defined in Federal Law of 22 April 1996 No 39-FZ "On Securities Market" (as amended) and the financial instruments and operations

Provided for the exclusive use of Michael Weisenburger at NiSource on 03-May-2023 07:57 AM.

specified herein may not be suitable for your investment profile or your investment goals or expectations. The determination of whether or not such financial instruments and operations are in your interests or are suitable for your investment goals, investment horizon or the acceptable risk level is your responsibility. We assume no liability for any losses connected with making any such operations or investing into any such financial instruments and we do not recommend to use such information as the only source of information for making an investment decision. **Saudi Arabia**: UBS Saudi Arabia is authorised and regulated by the Capital Market Authority to conduct securities business under licence number 08113-37. **Singapore**: Clients of UBS AG Singapore branch are asked to please contact UBS AG Singapore branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or report. UBS AG is incorporated in Switzerland with limited liability. UBS AG has a branch registered in Singapore (UEN S98FC5560C). This communication and any offering material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Sweden**: This publication is not intended to constitute a public offer under Swedish law. It is distributed only for information purposes to clients of UBS Europe SE, Sweden Bankfilial, with place of business at Regeringsgatan 38, 11153 Stockholm, Sweden, registered with the Swedish Companies Registration Office under Reg. No 516406-1011. UBS Europe SE, Sweden Bankfilial is subject to the joint supervision of the European Central Bank, the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin"), as well as of the Swedish supervisory authority (Finansinspektionen), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by BaFin. **Taiwan**: This material is provided by UBS AG, Taipei Branch in accordance with laws of Taiwan, in agreement with or at the request of clients/prospects. **Thailand**: This communication and any offering material, term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication were done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or derivatives products). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or derivatives products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Turkey**: The information in this document is not provided for the purpose of offering, marketing or sale of any capital market instrument or service in the Republic of Turkey. Therefore, this document may not be considered as an offer made, or to be made, to residents of the Republic of Turkey in the Republic of Turkey. UBS Switzerland AG is not licensed by the Turkish Capital Market Board (the CMB) under the provisions of the Capital Market Law (Law No. 6362). Accordingly, neither this document nor any other offering material related to the instrument/service may be utilized in connection with providing any capital market services to persons within the Republic of Turkey without the prior approval of the CMB. However, according to article 15 (d) (ii) of the Decree No. 32 residents of the Republic of Turkey are allowed to purchase or sell the financial instruments traded in financial markets outside of the Republic of Turkey. Further to this, pursuant to article 9 of the Communiqué on Principles Regarding Investment Services, Activities and Ancillary Services No. III-37.1, investment services provided abroad to residents of the Republic of Turkey based on their own initiative are not restricted. **United Arab Emirates (UAE)**: UBS is not a financial institution licensed in the UAE by the Central Bank of the UAE nor by the Emirates' Securities and Commodities Authority and does not undertake banking activities in the UAE. UBS AG Dubai Branch is licensed by the DFSA in the DIFC. This document is provided for your information only and does not constitute financial advice. **United Kingdom**: This document is issued by UBS Wealth Management, a division of UBS AG which is authorised and regulated by the Financial Market Supervisory Authority in Switzerland. In the United Kingdom, UBS AG is authorised by the Prudential Regulation Authority and is subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. Details about the extent of regulation by the Prudential Regulation Authority are available from us on request. A member of the London Stock Exchange. This publication is distributed to retail clients of UBS Wealth Management. **Ukraine**: UBS is not registered and licensed as a bank/financial institution under Ukrainian legislation and does not provide banking and other financial services in Ukraine. UBS has not made, and will not make, any offer of the mentioned products to the public in Ukraine. No action has been taken to authorize an offer of the mentioned products to the public in Ukraine and the distribution of this document shall not constitute financial services for the purposes of the Law of Ukraine "On Financial Services and State Regulation of Financial Services Markets" dated 12 July 2001. Any offer of the mentioned products shall not constitute an investment advice, public offer, circulation, transfer, safekeeping, holding or custody of securities in the territory of Ukraine. Accordingly, nothing in this document or any other document, information or communication related to the mentioned products shall be interpreted as containing an offer, a public offer or invitation to offer or to a public offer, or solicitation of securities in the territory of Ukraine or investment advice under Ukrainian law. Electronic communication must not be considered as an offer to enter into an electronic agreement or other electronic instrument within the meaning of the Law of Ukraine "On Electronic Commerce" dated 3 September 2015. This document is strictly for private use by its holder and may not be passed on to third parties or otherwise publicly distributed. **USA**: Distributed to US persons by UBS Financial Services Inc. or UBS Securities LLC, subsidiaries of UBS AG. UBS Switzerland AG, UBS Europe SE, UBS Bank, S.A., UBS Brasil Administradora de Valores Mobiliários Ltda., UBS Asesores México, S.A. de C.V., UBS SuMi TRUST Wealth Management Co., Ltd., UBS Wealth Management Israel Ltd. and UBS Menkul Degerler AS are affiliates of UBS AG. **UBS Financial Services Inc. accepts responsibility for the content of a report prepared by a non-US affiliate when it distributes reports to US persons. All transactions by a US person in the securities mentioned in this report should be effected through a US-registered broker dealer affiliated with UBS, and not through a non-US affiliate. The contents of this report have not been and will not be approved by any securities or investment authority in the United States or elsewhere. UBS Financial Services Inc. is not acting as a municipal advisor to any municipal entity or obligated person within the meaning of Section 15B of the Securities Exchange Act (the "Municipal Advisor Rule") and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of the Municipal Advisor Rule.**

EXC – Q1 beat but FY guidance and EPS growth target affirmed
NI – Small Q1 beat; FY23 guidance and L-T 6-8% annual EPS growth target reaffirmed; NIPSCO minority interest sale on track for 2023; in-line
FTS – Big Q1 EPS beat; capex, rate base growth, dividend growth all unchanged
AGR/PNM – Latest filings by companies and New Mexico PRC provide more transparency on merger rehearing discussions; still waiting on NM Supreme Court
NY Gas Ban – Bill to prohibit gas use in new construction progressing as part of state's annual budget process
EIX – File GRC in May and go away till key Q2 call
PEG – Devils win; "gotta support the team"

Midstream

OKE - Q1 tops estimate on insurance recovery; 2023 guidance unchanged
ET – Setting up for a beat and raise repeat in 2023

EPD – Count Project $10B be a stretch goal in 2024?
Earnings Takeaways in one page – LNG, MPLX, EPD, ETRN, DTM

Clean Energy

SPWR – 1Q EBITDA weaker than anticipated on backlog build and adverse weather; FY23 guidance affirmed due to growing backlog
Ørsted – 1Q23 EBITDA misses Bloomberg consensus but in line with sell-side survey; FY23 guidance affirmed
Offshore Wind – Massachusetts set to launch 4th RFP
ENPH – CFO Yang acquires $549k of stock

Wolfe Utility & Midstream Materials: Utility Comps, Utility Stock Charts, Midstream Comps, Midstream Stock Charts, Clean Energy Comps, Clean Energy Stock Charts, Models

Utilities

EXC – Q1 beat but FY guidance and EPS growth target affirmed

- **1Q23 beat**. $0.70 vs $0.66 consensus, $0.67 WRe.
- **2023 guidance affirmed:** $2.30-2.42 vs $2.36 consensus, $2.37 WRe
- **Affirmed 6-8% EPS growth rate through 2026 off 2022.** EXC's 6-8% CAGR off midpoint of 2022 guidance ($2.25), implying 2025E of $2.76 vs $2.74 consensus and $2.76 Wolfe estimate; reaffirmed same annual growth indicators below:
  - 2023: below low end of 6-8%
  - 2024: low end of 6-8% growth
  - 2025: above 6-8% growth
  - 2026: middle of 6-8%

- **IRA impact reflected in FFO/D range of 13-14% in 2023-26; no incremental equity needs through 2025 beyond the remaining $425M.** EXC notes if repairs deduction issue is fixed, then EXC sees high end of 13-14% through 2026; if not, then low end. EXC's downgrade threshold is 12%.
- **IL MYP rate case:** Intervenor testimony is expected 5/22 on ComEd 4-yr rate plan under the 2021 law, requesting 10.5% ROE; every 50bp of ROE is $0.04 in 2024-26. A decision is expected by 12/20/23.
- **Says earned ROE on track to be within 9-10% target range**. Earned ROE for trailing twelve months through 1Q23 was not specified; 4Q22 was 9.4%.

Slightly positive given Q1 beat but guidance and growth outlook affirmed. midpoint of 6-8% or better and providing indications of annual growth. On the call, we expect questions around the repairs deduction and cash tax impact, ComEd rate case intervenor testimony this month,

and other MYP/reconciliation cases in Maryland and DC. We also anticipate some questions on any read-through from yesterday's jury verdict in the former ComEd executive's bribery case.

NI – Small Q1 beat; FY23 guidance and L-T 6-8% annual EPS growth target reaffirmed; NIPSCO minority interest sale on track for 2023; in-line

- **Small Q1 EPS beat.** NI reported 1Q23 EPS of $0.77, slightly above us/cons. at $0.76/$0.75.
- **2023 guidance reaffirmed.** Range of $1.54-1.60 vs. cons. at $1.55 (WRe $1.58).
- **L-T 6-8% annual EPS growth target reaffirmed through 2027.**
- **5-yr. capex plan unchanged.** $15B of capex over 2023-27 drives 8-10% annual rate base growth.
- **Updates on IN renewables projects.** Estimated in-service date for Fairbanks Solar refined to 2Q25 (from 2024-25 prior); amendment for Green River Solar PPA approved.
    - Construction on Indiana Crossroads Solar and Dunns Bridge Solar I projects is nearing completion; work has begun on Dunns Bridge II and Cavalry Solar projects.
- **NIPSCO minority interest sale.** Remains on track for 2023; L-T 14-16% FFO/D target reiterated.
- **NIPSCO electric rate case.** Settlement stipulates a $292M revenue increase based on a 9.8% ROE and $5.95B rate base; order anticipated in Aug. with rates effective Sept. 2023/Mar. 2024.

An in-line update from NI, as Q1 slightly beats, the $15B 5-yr. capex plan & L-T growth outlook are reaffirmed, and IN renewables projects remain on target with previously revised in-service dates. On the call, we will be looking for color from mgmt. on how NISPCO's minority interest sale process is progressing.

FTS – Big Q1 EPS beat; capex, rate base growth, dividend growth all unchanged

- **FTS reported adjusted 1Q23 EPS of $0.91 vs. $0.78 last year – up 16.7% YoY and big beat** versus $0.82 consensus and our $0.82
    - Driven by rate base growth, FX, AZ weather, and Aitken Creek gas / Belize hydro; partially offset by financing costs and share dilution
        - Timing of wholesale sales and FERC transmission in AZ also had a +$0.04-0.05 impact
- No 2023 guidance as expected (consensus: $2.95, WRe: $2.96)
    - Consensus implies 6.1% YoY set-up off 2022A
- **Reaffirms dividend growth at 4-6% through 2027**
- **Five-year capex plan over 2023-2027 of $22.3B reaffirmed**
- **Rate base growth CAGR affirmed at 6.2% ($40.7B/$46.1B in 2025/2027)**
- **Aitken Creek sale.** Announced earlier this week for $400M CAD – proceeds used to repay credit facilities and support regulated growth
- **FX. Assuming $1.30 in plan** vs. $1.36 currently (every $0.05 in FX change = $0.06 EPS and $500M capex)

Another solid quarter from FTS, even though some of the beat appears to be timing. The company is starting to show material EPS growth again for the first time in several years. The call is ongoing, but we expect focus on the pending AZ rate case, Iowa Supreme Court decision on ROFRs, and future ITC opportunities in MISO.

AGR/PNM – Latest filings by companies and New Mexico PRC provide more transparency on merger rehearing discussions; still waiting on NM Supreme Court

- Merger applicants AGR/PNM's most recent filing was in response to New Energy Economy's (the only party opposed to the original merger settlement) claims that the New Mexico PRC had ex parte discussions
- These claims were centered around the pending Supreme Court process and eventual reconsideration of the merger at the NM PRC
- AGR/PNM explain that the communications were not improper, as it didn't concern the merits of the merger applications
- AGR/PNM and the NM PRC have made public the email exchanges that were alleged to be ex parte
- NM PRC stated its intention is to indicate support for a motion that would dismiss this appeal and remand jurisdiction to the Commission so that Commission may consider a motion to reopen

The AGR/PNM and NM PRC filings push against the latest claims of the one party that opposed the original settlement. AGR/PNM's intention is that they have nothing to hide. We're still waiting on the New Mexico Supreme Court to decide on remanding the case, but our conversations with AGR indicated that a decision at the NM PRC is still possible by the current merger deadline of July 20.

NY Gas Ban – Bill to prohibit gas use in new construction progressing as part of state's annual budget process

- On 5/1, NY lawmakers released a budget bill that directs state code officials to prohibit fossil fuel equipment and building systems in new construction with 7 or fewer floors by 2026.
    - This requirement would expand to all new construction by 2029.
- This measure passed as part of the state's annual budget process; the budget is overdue and legislators are expected to vote on the bill this week.
- Recall, Gov. Hochul had backed the Climate Action Council's earlier recommendation to prohibit fossil fuel combustion in small/larger buildings by the end of 2025/2028.
- To address emissions from existing buildings, the Climate Action Council separately recommended a requirement to replace end-of-life equipment with heat pumps or other non-fossil fuel systems beginning in 2030; the legislature has not taken up that recommendation yet.

This bill would support electrification and energy efficiency investments, which in-state

utilities like ED have been focused on. However, we worry about the reliability and affordability issues that could stem from transitioning away from natural gas use too fast, especially given that NY is depending on future offshore wind projects, which run intermittently.

EIX – File GRC in May and go away till key Q2 call
Click here to view our complete note
Stock recovery continues, still cheap option on 17/18 recoveries; raise PT to $79. EIX 1Q23 of $1.09 beat $0.95 cons but was in-line with our $1.08. EIX affirmed 2023 and 2025 guidance. EIX raised its 2017-18 wildfire costs by $90M but still sees the total costs at $8.8B ($6B of which it plans to request recovery). EIX is the best performing utility YTD, beating the UTY by 1,920bp. But it still trades at a ~19% discount. None of the potential 17/18 fire cost recovery is in its 5-7% EPS growth target through 2025, which EIX will update through 2028 this Jul. We raise our PT by $1 to $79.

PEG – Devils win; "gotta support the team"
Click here to view our complete note
Q1 EPS beats, 2023 guide reaffirmed. PEG posted Q1 EPS of $1.39 – ahead of our above-consensus estimate. This was also above $1.33 a year ago – driven by utility rider recovery and higher nuke hedge pricing; offset by weaker BGSS, lower pension earnings, and interest costs. The CIP mechanism neutralized weather impacts on sales, while transmission formula rates protect as well. PEG maintained its $3.40-3.50 guidance range and reaffirmed the 5-7% EPS CAGR over 2023-2027.

Midstream

OKE - Q1 tops estimate on insurance recovery; 2023 guidance unchanged

- ONEOK reported Q1 EBITDA of $1.72B vs. $864M last year, ahead of street consensus
- The quarter was up on a $779M insurance settlement gain for Medford, higher volumes and fees at the G&P and NGL segments, and higher storage rates at the transmission segment
- **Guidance maintained.** OKE reaffirmed 2023 guidance of $4.425B-$4.725B inclusive of the net insurance recovery benefit ($779M gain less $240M in 3rd party frac costs)
- **Key projects completed.** OKE's two major growth projects - Demicks Lake III processing plant and MB-5 fractionator were completed and placed into service; MB-5 will help partially handle volumes from Medford as MB-6 work continues

The quarter looked solid benefiting from higher volumes and rates generally as expected. The key will be any incremental color on guidance and what potential impact the commodity price dynamics may be having on the year.

ET – Setting up for a beat and raise repeat in 2023
Click here to view our complete note

Big Q1 beat. EBITDA beat consensus by 5% with strong beats vs. our estimate in 1) NGLs on an inventory item and blending, 2) Interstate on what appears to be core business improvement, and 3) Intrastate on better gas sales with volatility. Volumes were pretty much in line with our expectations to even a little light in the NGL segment.

EPD – Count Project $10B be a stretch goal in 2024?
Click here to view our complete note
Q1 beat on market opportunities…and despite very weak NGL marketing. EBITDA of $2,321M was 3% ahead of our estimate / consensus. The beat was driven by very strong propylene results on a blow-out in PGP-RGP spreads, gas gathering uplift from Rockies price strength, and high NGL export and pipeline volumes, the latter of which EPD sees continuing. Strong results came despite the lowest NGL marketing margin quarter (excluding MTM items) since 3Q21.

Earnings Takeaways in one page – LNG, MPLX, EPD, ETRN, DTM
Click here to view our complete note
An overall constructive surge of earnings this morning ran into an unfavorable macro tape. MPLX had a big beat that lends support to mid-single digit growth commentary, the LNG guide raise was a nice relief after spreads weakened, and EPD beat with a "growthy" tone. *We will update models with company-specific notes at a later time.

Clean Energy

SPWR – 1Q EBITDA weaker than anticipated on backlog build and adverse weather; FY23 guidance affirmed due to growing backlog

- Customer additions of 21,000 vs. WRe of 20,289.
  - Enters Q2 with backlog of 23,000 retrofit customers.
  - NEM 2.0 bookings for retrofit customers up 135% resulting in >6 month backlog.
  - Leases grew 268% y/y.
- Adj. EBITDA of $0.6M vs. WRe of $3.9M and consensus of $14M.
  - Adjusted EBITDA/customer before platform investment of $1,200 vs. WRe of $1,725.
- **Affirmed 2023 guidance of $2,450–$2,900 Adjusted EBITDA per customer before platform investment; 90,000–110,000 customer adds; $125–$155M Adjusted EBITDA.**
- SPWR also put out a separate press release announcing a new $550M solar loan purchase agreement with KKR.
  - YTD capital raised sufficient to fund $1 billion of solar loans.

SPWR's EBITDA miss vs. consensus was expected by us due to adverse weather, but results were even weaker than anticipated. Adverse weather was flagged as keeping crews idle while SG&A was higher due to NEM 2.0 grandfathering backlog build. Management notes that NEM 2.0 orders are still coming in from dealers and the growing backlog gives them confidence in meeting the FY23 guide. The conference call is underway.

Ørsted – 1Q23 EBITDA misses Bloomberg consensus but in line with sell-side survey; FY23 guidance affirmed

- Ørsted reported 1Q23 results both with and without farmdown gains that missed *Bloomberg* consensus but was in line with a recent sell-side survey.
- **1Q23 EBITDA vs sell-side survey consensus and WRe (all in DKK); Offshore beat, Onshore in line, Bio/other missed.**
    - Total: DKK 6.9B vs DKK 6.9B sell-side survey; WRe was DKK 7.8B; Bloomberg has consensus at DKK 7.1B
    - Offshore: DKK 5.4B vs 4.8B sell-side survey vs WRe of DKK 5.8B
    - Onshore: DKK 0.8B vs 0.9B vs 1.1B
    - Bio/other: DKK 0.5B vs 1.1B vs 0.8B
- **2023 EBITDA of DKK 20-23B (ex gains) affirmed.** Sell-side survey consensus (ex gains) was DKK 22.0B vs WRe of DKK 21.6B; Bloomberg has consensus at DKK 22.8B.

- **FFO/adj net debt is 38% vs 37% in previous quarter; target remains 25%**.
- **6/8 CMD**. Expects to update outlook, which was last provided in 2021; updates will include financial targets.

We view the update as modestly negative, as it relates mostly to the Bioenergy/CHP business, not the company's core offshore and onshore business. The call is ongoing, as we publish. We anticipate questions on the US, including potential impact on returns from energy communities tax bonus and other IRA benefits, as well as the company's interest in Eversource's offshore wind sale and pending offshore wind solicitations. We also expect questions on any potential equity needs and any previews to next month's CMD strategic and financial outlook.

Offshore Wind – Massachusetts set to launch 4th RFP

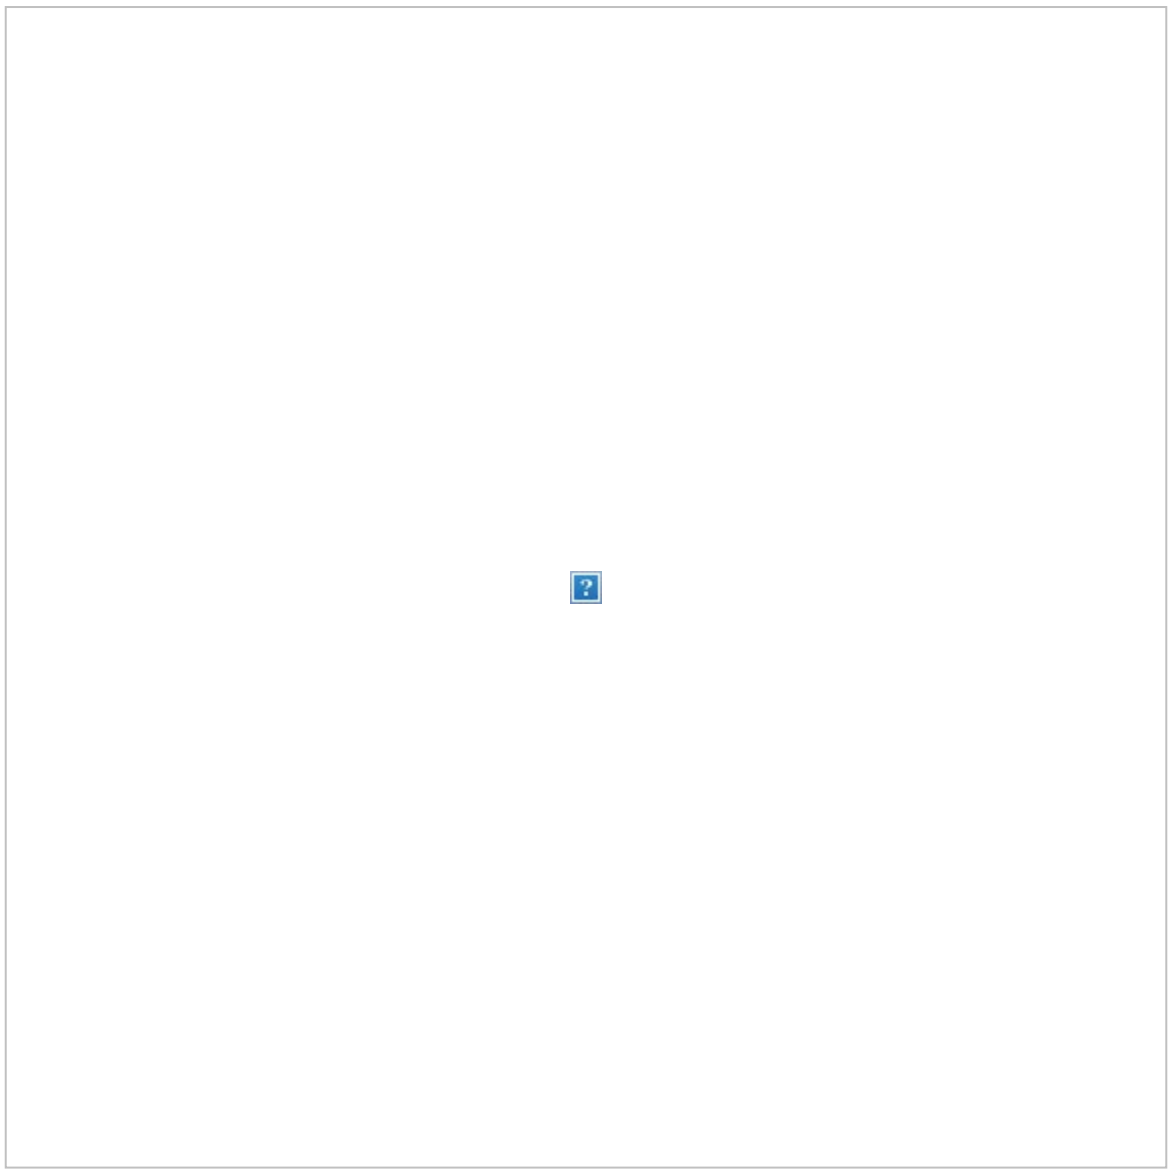
- Yesterday, a request for approval to launch the 4th offshore wind solicitation was filed with the Massachusetts DPU – allowing bids for 200-2,400 MWs
    - The proposed timeline would have bids due in January 31 2024 and selection of winners in June 12 2024
- Recall that AGR's Commonwealth Wind (1.2 GWs) and Shell/EDPR/Engie's Mayflower Wind (0.4 GWs) were winners of the third solicitation (these same parties have won all MA bids thus far and were the only bidders in the most recent one
- AGR's Commonwealth Wind subsequently sought to renegotiate its contract, then cancel it and re-bid, due to economic conditions
    - The originally filed PPAs were starting at $59.60/MWh nominal price ($47.68/MWh for energy and $11.92 for RECs, both of which escalate by 2.5% annually)
    - The total levelized all-in energy price for Commonwealth Wind was $72.17/MWh
- Massachusetts has a goal of 5.6 GWs of offshore wind by 2027 and has awarded 3.2 GWs so far (including Commonwealth Wind)

We'll be interested to see how the next MA solicitation progresses, as AGR has made it clear it intends to re-bid. Shell/EDPR/Engie have been successful in the past and Ørsted owns lease areas that can bid. One important nuance is that a change in MA law makes it such that each successive auction no longer has to have a lower PPA price than the last. The ability to bid higher PPA prices this time, should help with economic viability.

ENPH – CFO Yang acquires $549k of stock

- Yesterday, ENPH CFO Mandy Yang acquired 3,500 shares of ENPH for a total of $549,022.

Good to see, especially following board member TJ Rodgers' >$10M of purchases last week



Wolfe Events

03 May 2023 13:50:43 ET | 12 pages

NiSource Inc (NI.N)

Slight Beat, NIPSCO Sale Timeline Guidance Unchanged

CITI'S TAKE

Ni modestly beat on EPS, reaffirmed NIPSCO sale and generation buildout timeline, and should modestly benefit from new Indiana law on T&D.

Q1 — Nisource's $0.77 beat consensus's $0.75/Citi's $0.73, driven by new gas rates and weather decoupling mechanism, offset by higher D&A, interest expense, & taxes.

NIPSCO Sale – Timeline Unchanged? — NI talked to a broad range of qualified buyers. They do not anticipate any approval process with the IURC but will engage with the commission by filing after an agreement is reached. The company reiterated the current timeline for the transaction (YE 2023 transaction), but choppy deal markets and lots of assets on the market increases deal execution risk, in our opinion.

Indiana ROFR Bill Signage, Transmission Projects — Under HB1420 (just signed by the Governor), NIPSCO and other incumbent Indiana utilities have the right to build, own and operate transmission projects in their current service territory without going through competitive bidding. This bill gives Nisource more footing to participate in MISO's transmission plan, earliest in service date in 2028 -- tranche 1 outlined 18 projects with $10B cost, and tranche 2 targeted approval in 1H24. Nisource will work with MISO to quantify the capex. Beyond HB1420, SB9 and HB1007 may modestly impact the Company's outlook given impact for generation outside of IRPs and future rates (although doesn't impact our current estimates).

Future of Gas: As the 9th circuit decision in California makes it harder to ban gas hookups, NiSource has laws on the books in 3 of 6 jurisdictions that prevent local governments to ban gas hookups, so the impact is limited for NiSource.

Program Apollo: $40M-$60M Recurring Savings — Management is working on recurring lean program to cut $40-60M/yr in O&M. The current CIO is focused on $1B investment in IT to cut costs in planning, execution, and customer service.

Renewable Projects on Track — Dunns Bridge I Solar and Crossroads Solar are still targeting Q2 COD. Calvary Solar and Dunns Bridge II Solar have started construction, and Crossroads 2 Wind is targeting 2023 COD.

Convert Financing? — Nisource could consider doing a convert with *cash* premium paid in the future (if necessary), in our view, to lower interest expense modestly. In investor dialogue, NI is on a short list of utilities investors focused on this.

GAS-ROR-010
Attachment F
Page 67 of 963

NiSource Inc

Company description

NiSource Inc (NI) is primarily a regulated utility with an integrated network of gas distribution in the Northeast, Mid-Atlantic, and Midwest. NiSource also operates an electric utility in Northern Indiana. The company serves around 4 million customers across seven states through its two main business segments, including 1) Gas Distribution, which delivers natural gas in several states, and 2) Electric Operations, which consist of NiSource's regulated electric utility, Northern Indiana Public Service Company (NIPSCO).

Investment strategy

We rate the shares of NiSource (NI) Neutral (2). We believe that NI's long-term earnings are relatively stable due to diverse operations areas and constructive regulatory jurisdictions. Our estimates do not include 1) substantial industrial load growth at the utilities; 2) colder-than-normal weather and faster-than-average customer growth; or 3) slower than typical timeline in regulatory filing and approval process for new infrastructure projects and cost recovery mechanisms.

Valuation

We average multiple valuation methodologies to derive our $30 target price. Our NAV yields a value of $32. We value regulated assets at a multiple of 1.5x rate base. These values are partially offset by the company's net debt. Our DDM, which incorporates our rate base growth assumptions, values the company at $30 per share. Our P/E and EV/EBITDA analyses yield values of $32 and $29, respectively.

Risks

The key risks to our investment thesis are as follows: (1) Rate Cases – We estimate the company will receive rate relief at several of its utilities. Under- or over-estimation of relief could materially impact our estimates. (2) Weather – Changes in weather impact the stability of earnings. (3) Capital Investment Recovery — NI spends a substantial amount of capital to maintain and expand its distribution system. NI depends on rate increases from public utility commission to earn a fair return on this expansion. (4) Capital Markets — Access to cheap capital markets could be limited due to the size of the company. If the impact on the company from any of these factors proves to be greater/less than we anticipate, it may prevent the stock from achieving our target price or could cause the stock price to materially under/outperform our target.

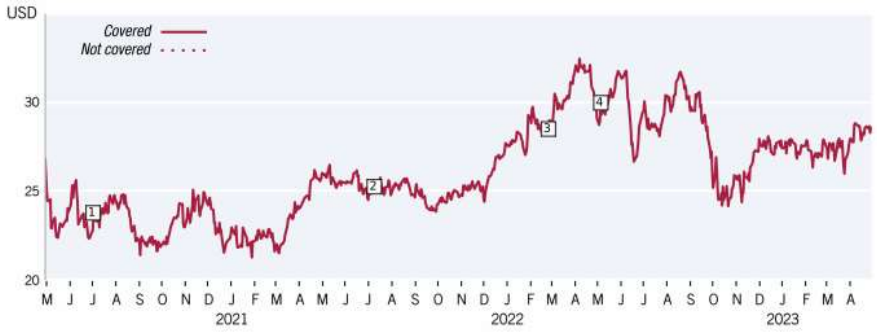
Appendix A-1

ANALYST CERTIFICATION



The research analysts primarily responsible for the preparation and content of this research report are either (i) designated by "AC" in the author block or (ii) listed in bold alongside content which is attributable to that analyst. If multiple AC analysts are designated in the author block, each analyst is certifying with respect to the entire research report other than (a) content attributable to another AC certifying analyst listed in bold alongside the content and (b) views expressed solely with respect to a specific issuer which are attributable to another AC certifying analyst identified in the price charts or rating history tables for that issuer shown below. Each of these analysts certify, with respect to the sections of the report for which they are responsible: (1) that the views expressed therein accurately reflect their personal views about each issuer and security referenced and were prepared in an independent manner, including with respect to Citigroup Global Markets Inc. and its affiliates; and (2) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in this report.

Rating/target price changes above reflect Eastern Time

Citigroup Global Markets Inc. owns a position of 1 million USD or more in the debt securities of NiSource Inc.

Citigroup Global Markets Inc. or its affiliates has received compensation for investment banking services provided within the past 12 months from NiSource Inc.

Citigroup Global Markets Inc. or its affiliates received compensation for products and services other than investment banking services from NiSource Inc in the past 12 months.

Citigroup Global Markets Inc. or its affiliates currently has, or had within the past 12 months, the following as investment banking client(s): NiSource Inc.

Citigroup Global Markets Inc. or its affiliates currently has, or had within the past 12 months, the following as clients, and the services provided were non-investment-banking, securities-related: NiSource Inc.

Citigroup Global Markets Inc. or its affiliates currently has, or had within the past 12 months, the following as clients, and the services provided were non-investment-banking, non-securities-related: NiSource Inc.

Analysts' compensation is determined by Citi Research management and Citigroup's senior management and is based upon activities and services intended to benefit the investor clients of Citigroup Global Markets Inc. and its affiliates (the "Firm"). Compensation is not linked to specific transactions or recommendations. Like all Firm employees, analysts receive compensation that is impacted by overall Firm profitability which includes investment banking, sales and trading, and principal trading revenues. One factor in equity research analyst compensation is arranging corporate access events between institutional clients and the management teams of covered companies. Typically, company management is more likely to participate when the analyst has a positive view of the company.

For financial instruments recommended in the Product in which the Firm is not a market maker, the Firm is a liquidity provider in such financial instruments (and any underlying instruments) and may act as principal in connection with transactions in such instruments. The Firm is a regular issuer of traded financial instruments linked to securities that may have been recommended in the Product. The Firm regularly trades in the securities of the issuer(s) discussed in the Product. The Firm may engage in securities transactions in a manner inconsistent with the Product and, with respect to securities covered by the Product, will buy or sell from customers on a principal basis.

Prepared for Michael Weisenburger

Unless stated otherwise neither the Research Analyst nor any member of their team has viewed the material operations of the Companies for which an investment view has been provided within the past 12 months.

For important disclosures (including copies of historical disclosures) regarding the companies that are the subject of this Citi Research product ("the Product"), please contact Citi Research, 388 Greenwich Street, 6th Floor, New York, NY, 10013, Attention: Legal/Compliance [E6WYB6412478]. In addition, the same important disclosures, with the exception of the Valuation and Risk assessments and historical disclosures, are contained on the Firm's disclosure website at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures. Valuation and Risk assessments can be found in the text of the most recent research note/report regarding the subject company. Pursuant to the Market Abuse Regulation a history of all Citi Research recommendations published during the preceding 12-month period can be accessed via Citi Velocity (https://www.citivelocity.com/cv2) or your standard distribution portal. Historical disclosures (for up to the past three years) will be provided upon request.

Citi Research Equity Ratings Distribution

	12 Month Rating			Catalyst Watch		
Data current as of 31 Mar 2023	**Buy**	**Hold**	**Sell**	**Buy**	**Hold**	**Sell**
Citi Research Global Fundamental Coverage (Neutral=Hold)	56%	34%	9%	30%	57%	13%
% of companies in each rating category that are investment banking clients	59%	65%	53%	67%	56%	62%

Guide to Citi Research Fundamental Research Investment Ratings:
Citi Research stock recommendations include an investment rating and an optional risk rating to highlight high risk stocks.
Risk rating takes into account both price volatility and fundamental criteria. Stocks will either have no risk rating or a High risk rating assigned.
Investment Ratings: Citi Research investment ratings are Buy, Neutral and Sell. Our ratings are a function of analyst expectations of expected total return ("ETR") and risk. ETR is the sum of the forecast price appreciation (or depreciation) plus the dividend yield for a stock within the next 12 months. The target price is based on a 12 month time horizon. The Investment rating definitions are: Buy (1) ETR of 15% or more or 25% or more for High risk stocks; and Sell (3) for negative ETR. Any covered stock not assigned a Buy or a Sell is a Neutral (2). For stocks rated Neutral (2), if an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of Citi Research management not to assign a target price and, thus, not derive an ETR. Citi Research may suspend its rating and target price and assign "Rating Suspended" status for regulatory and/or internal policy reasons. Citi Research may also suspend its rating and target price and assign "Under Review" status for other exceptional circumstances (e.g. lack of information critical to the analyst's thesis, trading suspension) affecting the company and/or trading in the company's securities. In both such situations, the rating and target price will show as "—" and "-" respectively in the rating history price chart. Prior to 11 April 2022 Citi Research assigned "Under Review" status to both situations and prior to 11 Nov 2020 only in exceptional circumstances. As soon as practically possible, the analyst will publish a note re-establishing a rating and investment thesis. Investment ratings are determined by the ranges described above at the time of initiation of coverage, a change in investment and/or risk rating, or a change in target price (subject to limited management discretion). At times, the expected total returns may fall outside of these ranges because of market price movements and/or other short-term volatility or trading patterns. Such interim deviations will be permitted but will become subject to review by Research Management. Your decision to buy or sell a security should be based upon your personal investment objectives and should be made only after evaluating the stock's expected performance and risk.

Catalyst Watch Upside/Downside calls:
Citi Research may also include a Catalyst Watch Upside or Downside call to highlight specific near-term catalysts or events impacting the company or the market that are expected to influence the share price over a specified period of 30 or 90 days. A Catalyst Watch Upside (Downside) call indicates that the analyst expects the share price to rise (fall) in absolute terms over the specified period. A Catalyst Watch Upside/Downside call will automatically expire at the end of the specified 30/90 day period (or earlier if the investment rating of the company is assigned Rating Suspended or Under Review status); the analyst may also close a Catalyst Watch call prior to the end of the specified period in a published research note. A Catalyst Watch Upside or Downside call may be different from and does not affect a stock's fundamental equity rating, which reflects a longer-term total absolute return expectation. For purposes of FINRA ratings[1]distribution-disclosure rules, a Catalyst Watch Upside call corresponds to a buy recommendation and a Catalyst Watch Downside call corresponds to a sell recommendation. Any stock not assigned to a Catalyst Watch Upside or Catalyst Watch Downside call is considered Catalyst Watch Non-Rated (CWNR). For purposes of FINRA ratings-distribution-disclosure rules, we correspond CWNR to Hold in our ratings distribution table for our Catalyst Watch Upside/Downside rating system. However, we reiterate that we do not consider CWNR to be a recommendation. For all Catalyst Watch Upside/Downside calls, risk exists that the catalyst(s) and associated share-price movement will not materialize as expected.

RESEARCH ANALYST AFFILIATIONS / NON-US RESEARCH ANALYST DISCLOSURES
The legal entities employing the authors of this report are listed below (and their regulators are listed further herein). Non-US research analysts who have prepared this report (i.e., all research analysts listed below other than those identified as employed by Citigroup Global Markets Inc.) are not registered/qualified as research analysts with FINRA. Such research analysts may not be associated persons of the member organization (but are employed by an affiliate of the member organization) and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Citigroup Global Markets Inc.	Ryan Levine; Xinru Yin

OTHER DISCLOSURES

Any price(s) of instruments mentioned in recommendations are as of the prior day's market close on the primary market for the instrument, unless otherwise stated.

The completion and first dissemination of any recommendations made within this research report are as of the Eastern date-time displayed at the top of the Product. If the Product references views of other analysts then please refer to the price chart or rating history table for the date/time of completion and first dissemination with respect to that view.

Regulations in various jurisdictions require that where a recommendation differs from any of the author's previous recommendations concerning the same financial instrument or issuer that has been published during the preceding 12-month period that the change(s) and the date of that previous recommendation are indicated. For fundamental coverage please refer to the price chart or rating change history within this disclosure appendix or the issuer disclosure summary at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

Prepared for Michael Weisenburger

Citi Research has implemented policies for identifying, considering and managing potential conflicts of interest arising as a result of publication or distribution of investment research. A description of these policies can be found at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

The proportion of all Citi Research research recommendations that were the equivalent to "Buy","Hold","Sell" at the end of each quarter over the prior 12 months (with the % of these that had received investment firm services from Citi in the prior 12 months shown in brackets) is as follows: Q1 2023 Buy 33% (65%), Hold 43% (55%), Sell 23% (51%), RV 0.5% (86%); Q4 2022 Buy 33% (64%), Hold 43% (55%), Sell 23% (51%), RV 0.6% (91%); Q3 2022 Buy 33% (65%), Hold 43% (55%), Sell 23% (49%), RV 0.5% (89%); Q2 2022 Buy 33% (66%), Hold 43% (55%), Sell 23% (50%), RV 0.6% (88%). For the purposes of disclosing recommendations other than for equity (whose definitions can be found in the corresponding disclosure sections), "Buy" means a positive directional trade idea; "Sell" means a negative directional trade idea; and "Relative Value" means any trade idea which does not have a clear direction to the investment strategy.

European regulations require a 5 year price history when past performance of a security is referenced. CitiVelocity's Charting Tool (https://www.citivelocity.com/cv2/#go/CHARTING_3_Equities) provides the facility to create customisable price charts including a five year option. This tool can be found in the Data & Analytics section under any of the asset class menus in CitiVelocity (https://www.citivelocity.com/). For further information contact CitiVelocity support (https://www.citivelocity.com/cv2/go/CLIENT_SUPPORT). The source for all referenced prices, unless otherwise stated, is DataCentral, which sources price information from Thomson Reuters. Past performance is not a guarantee or reliable indicator of future results. Forecasts are not a guarantee or reliable indicator of future performance.

Investors should always consider the investment objectives, risks, and charges and expenses of an ETF carefully before investing. The applicable prospectus and key investor information document (as applicable) for an ETF should contain this and other information about such ETF. It is important to read carefully any such prospectus before investing. Clients may obtain prospectuses and key investor information documents for ETFs from the applicable distributor or authorized participant, the exchange upon which an ETF is listed and/or from the applicable website of the applicable ETF issuer. The value of the investments and any accruing income may fall or rise. Any past performance, prediction or forecast is not indicative of future or likely performance. Any information on ETFs contained herein is provided strictly for illustrative purposes and should not be deemed an offer to sell or a solicitation of an offer to purchase units of any ETF either explicitly or implicitly. The opinions expressed are those of the authors and do not necessarily reflect the views of ETF issuers, any of their agents or their affiliates.

Citigroup Global Markets India Private Limited and/or its affiliates may have, from time to time, actual or beneficial ownership of 1% or more in the debt securities of the subject issuer.

Please be advised that pursuant to Executive Order 13959 as amended (the "Order"), U.S. persons are prohibited from investing in securities of any company determined by the United States Government to be the subject of the Order. This research is not intended to be used or relied upon in any way that could result in a violation of the Order. Investors are encouraged to rely upon their own legal counsel for advice on compliance with the Order and other economic sanctions programs administered and enforced by the Office of Foreign Assets Control of the U.S. Treasury Department.

This communication is directed at persons who are "Eligible Clients" as such term is defined in the Israeli Regulation of Investment Advice, Investment Marketing and Investment Portfolio Management law, 1995 (the "Advisory Law"). Within Israel, this communication is not intended for retail clients and Citi will not make such products or transactions available to retail clients. The presenter is not licensed as investment advisor or marketer by the Israeli Securities Authority ("ISA") and this communication does not constitute investment or marketing advice. The information contained herein may relate to matters that are not regulated by the ISA. Any securities which are the subject of this communication may not be offered or sold to any Israeli person except pursuant to an exemption from the Israeli public offering rules, including according to the Israeli Securities Law.

Citi Research generally disseminates its research to the Firm's global institutional and retail clients via both proprietary (e.g., Citi Velocity and Citi Personal Wealth Management) and non-proprietary electronic distribution platforms. Certain research may be disseminated only via the Firm's proprietary distribution platforms; however such research will not contain changes to earnings forecasts, target price, investment or risk rating or investment thesis or be otherwise inconsistent with the author's previously published research. Certain research is made available only to institutional investors to satisfy regulatory requirements. Individual Citi Research analysts may also opt to circulate published research to one or more clients by email; such email distribution is discretionary and is done only after the research has been disseminated. The level and types of services provided by Citi Research analysts to clients may vary depending on various factors such as the client's individual preferences as to the frequency and manner of receiving communications from analysts, the client's risk profile and investment focus and perspective (e.g. market-wide, sector specific, long term, short-term etc.), the size and scope of the overall client relationship with the Firm and legal and regulatory constraints.

Pursuant to Comissão de Valores Mobiliários Resolução 20 and ASIC Regulatory Guide 264, Citi is required to disclose whether a Citi related company or business has a commercial relationship with the subject company. Considering that Citi operates multiple businesses in more than 100 countries around the world, it is likely that Citi has a commercial relationship with the subject company.

Disclosure for investors in the Republic of Turkey: Under Capital Markets Law of Turkey (Law No: 6362), the investment information, comments and recommendations stated here, are not within the scope of investment advisory activity. Investment advisory service is provided in accordance with a contract of engagement on investment advisory concluded between brokerage houses, portfolio management companies, non-deposit banks and clients. Comments and recommendations stated here rely on the individual opinions of the ones providing these comments and recommendations. These opinions may not fit to your financial status, risk and return preferences. For this reason, to make an investment decision by relying solely to this information stated here may not bring about outcomes that fit your expectations. Furthermore, Citi Research is a division of Citigroup Global Markets Inc. (the "Firm"), which does and seeks to do business with companies and/or trades on securities covered in this research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report, however investors should also note that the Firm has in place organisational and administrative arrangements to manage potential conflicts of interest of this nature.

Securities recommended, offered, or sold by the Firm: (i) are not insured by the Federal Deposit Insurance Corporation; (ii) are not deposits or other obligations of any insured depository institution (including Citibank); and (iii) are subject to investment risks, including the possible loss of the principal amount invested. The Product is for informational purposes only and is not intended as an offer or solicitation for the purchase or sale of a security. Any decision to purchase securities mentioned in the Product must take into account existing public information on such security or any registered prospectus. Although information has been obtained from and is based upon sources that the Firm believes to be reliable, we do not guarantee its accuracy and it may

Prepared for Michael Weisenburger

be incomplete and condensed. Note, however, that the Firm has taken all reasonable steps to determine the accuracy and completeness of the disclosures made in the Important Disclosures section of the Product. The Firm's research department has received assistance from the subject company(ies) referred to in this Product including, but not limited to, discussions with management of the subject company(ies). Firm policy prohibits research analysts from sending draft research to subject companies. However, it should be presumed that the author of the Product has had discussions with the subject company to ensure factual accuracy prior to publication. Statements and views concerning ESG (environmental, social, governance) factors are typically based upon public statements made by the affected company or other public news, which the author may not have independently verified. ESG factors are one consideration that investors may choose to examine when making investment decisions. All opinions, projections and estimates constitute the judgment of the author as of the date of the Product and these, plus any other information contained in the Product, are subject to change without notice. Prices and availability of financial instruments also are subject to change without notice. Notwithstanding other departments within the Firm advising the companies discussed in this Product, information obtained in such role is not used in the preparation of the Product. Although Citi Research does not set a predetermined frequency for publication, if the Product is a fundamental equity or credit research report, it is the intention of Citi Research to provide research coverage of the covered issuers, including in response to news affecting the issuer. For non-fundamental research reports, Citi Research may not provide regular updates to the views, recommendations and facts included in the reports. Notwithstanding that Citi Research maintains coverage on, makes recommendations concerning or discusses issuers, Citi Research may be periodically restricted from referencing certain issuers due to legal or policy reasons. Where a component of a published trade idea is subject to a restriction, the trade idea will be removed from any list of open trade ideas included in the Product. Upon the lifting of the restriction, the trade idea will either be re-instated in the open trade ideas list if the analyst continues to support it or it will be officially closed. Citi Research may provide different research products and services to different classes of customers (for example, based upon long-term or short-term investment horizons) that may lead to differing conclusions or recommendations that could impact the price of a security contrary to the recommendations in the alternative research product, provided that each is consistent with the rating system for each respective product.

Investing in non-U.S. securities, including ADRs, may entail certain risks. The securities of non-U.S. issuers may not be registered with, nor be subject to the reporting requirements of the U.S. Securities and Exchange Commission. There may be limited information available on foreign securities. Foreign companies are generally not subject to uniform audit and reporting standards, practices and requirements comparable to those in the U.S. Securities of some foreign companies may be less liquid and their prices more volatile than securities of comparable U.S. companies. In addition, exchange rate movements may have an adverse effect on the value of an investment in a foreign stock and its corresponding dividend payment for U.S. investors. Net dividends to ADR investors are estimated, using withholding tax rates conventions, deemed accurate, but investors are urged to consult their tax advisor for exact dividend computations. Investors who have received the Product from the Firm may be prohibited in certain states or other jurisdictions from purchasing securities mentioned in the Product from the Firm. Please ask your Financial Consultant for additional details. Citigroup Global Markets Inc. takes responsibility for the Product in the United States. Any orders by US investors resulting from the information contained in the Product may be placed only through Citigroup Global Markets Inc.

The Product is made available in **United States** by Citigroup Global Markets Inc., which is a member of FINRA and registered with the US Securities and Exchange Commission. 388 Greenwich Street, New York, NY 10013.

Unless specified to the contrary, within EU Member States, the Product is made available by Citigroup Global Markets Europe AG ("CGME"), which is regulated by the European Central Bank and the German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht-BaFin).

The Product is not to be construed as providing investment services in any jurisdiction where the provision of such services would not be permitted. Subject to the nature and contents of the Product, the investments described therein are subject to fluctuations in price and/or value and investors may get back less than originally invested. Certain high-volatility investments can be subject to sudden and large falls in value that could equal or exceed the amount invested.The yield and average life of CMOs (collateralized mortgage obligations) referenced in this Product will fluctuate depending on the actual rate at which mortgage holders prepay the mortgages underlying the CMO and changes in current interest rates. Any government agency backing of the CMO applies only to the face value of the CMO and not to any premium paid. Certain investments contained in the Product may have tax implications for private customers whereby levels and basis of taxation may be subject to change. If in doubt, investors should seek advice from a tax adviser. The Product does not purport to identify the nature of the specific market or other risks associated with a particular transaction. Advice in the Product is general and should not be construed as personal advice given it has been prepared without taking account of the objectives, financial situation or needs of any particular investor. Accordingly, investors should, before acting on the advice, consider the appropriateness of the advice, having regard to their objectives, financial situation and needs. Prior to acquiring any financial product, it is the client's responsibility to obtain the relevant offer document for the product and consider it before making a decision as to whether to purchase the product.
Citi Research product may source data from dataCentral. dataCentral is a Citi Research proprietary database, which includes the Firm's estimates, data from company reports and feeds from Thomson Reuters. The source for all referenced prices, unless otherwise stated, is DataCentral. Past performance is not a guarantee or reliable indicator of future results. Forecasts are not a guarantee or reliable indicator of future performance. The printed and printable version of the research report may not include all the information (e.g. certain financial summary information and comparable company data) that is linked to the online version available on the Firm's proprietary electronic distribution platforms.

Card Insights. Where this report references Card Insights data, Card Insights consists of selected data from a subset of Citi's proprietary credit card transactions. Such data has undergone rigorous security protocols to keep all customer information confidential and secure; the data is highly aggregated and anonymized so that all unique customer identifiable information is removed from the data prior to receipt by the report's author or distribution to external parties. This data should be considered in the context of other economic indicators and publicly available information. Further, the selected data represents only a subset of Citi's proprietary credit card transactions due to the selection methodology or other limitations and should not be considered as indicative or predictive of the past or future financial performance of Citi or its credit card business.

J.P. Morgan Securities LLC

- **1Q23 lands just ahead of estimates; 2023 guidance reaffirmed.** NI reported 1Q23 adj EPS of $0.77, just ahead of the $0.75/$0.76 JPM/Street median estimates. The company also reaffirmed its 2023 guidance range of $1.54-1.60 (JPMe/Street median $1.56), plus long-term growth targets. Management spent meaningful time on the call outlining active O&M efficiency efforts, continuing a significant topic since the company's fall investor day. On balance, targeted flat O&M through 2027 remains on track, and NI intends to offer further details on efficiencies as the latest cost effort progresses.
- **NIPSCO transaction remains on track.** NI offered no new information on the NIPSCO minority stake sale process, but framed the transaction as on track for its 2023 targets (mid-year announcement and 2023 completion). Overall tone remains positive, in our view, with management noting broad interest and a straightforward process to close. While investor attention remains firmly focused on the prospects for a favorable deal valuation and overall execution on this key element of NI's long-term plan, we did not anticipate any significant update into the quarter and instead await a targeted mid-year announcement as the next sale update.
- **IN transmission ROFR legislation further underpins plan upside.** Recently signed Indiana transmission ROFR legislation received notable enthusiasm from management, with the impacts framed as solidifying NI's transmission upside within the 2028+ outlook. To quantify this, NI pointed to MISO's ongoing LRTP work, where we expect tranche 2 potential to start emerging into the end of 2023 and early 2024. Securing clearer leverage to this long-dated theme is a positive starting point, in our view, and we look to further updates as MISO's process unfolds.
- **Other takeaways: Gas M&A, IN rate case settlement.** On gas M&A, topical given recent media reports around LDC assets hitting the market, management emphasized the current focus on organic growth and executing NI's investor day plan. We see no surprises in this response, although note this topic has been a source of recent investor questions. Separately, the company highlighted positive regulatory progress in reaching a settlement in NIPSCO's electric rate case, and we expect closing out the final case hurdles will further showcase NI's declining regulatory risk.

See page 3 for analyst certification and important disclosures.
J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight [Over the next six to twelve months, we expect this stock will outperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Neutral [Over the next six to twelve months, we expect this stock will perform in line with the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Underweight [Over the next six to twelve months, we expect this stock will underperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Not Rated (NR): J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap equity research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying analyst's coverage universe can be found on J.P. Morgan's research website, https://www.jpmorganmarkets.com.

Coverage Universe: Sunderland III, Richard W: AES Corp. (AES), Algonquin Power & Utilities Corp. (AQN.TO), Allete Inc. (ALE), American Water Works Company, Inc. (AWK), Atmos Energy (ATO), Avangrid, Inc (AGR), Emera Inc. (EMA.TO), Fortis Inc. (FTS.TO), New Jersey Resources (NJR), NiSource Inc. (NI), SJW Group (SJW), Southwest Gas Holdings Inc. (SWX), Spire Inc (SR)

J.P. Morgan Equity Research Ratings Distribution, as of April 01, 2023

	Overweight (buy)	**Neutral** (hold)	**Underweight** (sell)
J.P. Morgan Global Equity Research Coverage*	47%	38%	15%
IB clients**	47%	44%	34%
JPMS Equity Research Coverage*	46%	41%	13%
IB clients**	66%	65%	53%

***Please note that the percentages might not add to 100% because of rounding.**
****Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.**
For purposes only of FINRA ratings distribution rules, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at http://www.jpmorganmarkets.com, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, http://www.jpmorganmarkets.com. This report also sets out within it the material underlying

Richard W Sunderland

Effective Execution

Key Takes:

- NI reported Q1 adjusted diluted Net operating EPS (NOEPS) of $0.77 vs. our estimate of $0.77 and street consensus of $0.75. 1Q23 NOEPS is 3% higher than 1Q22 NOEPS of $0.75.
- Reaffirmed 2023 non-GAAP NOEPS guidance range of $1.54-$1.60.
    - Midpoint of $1.57 represents 6.8% growth off 2022 NOEPS. Consensus is at $1.55.
- Reaffirmed annual non-GAAP NOEPS growth of 6-8% through 2027.
    - Off the 2023 earnings guidance range of $1.54-$1.60.
- Reaffirmed $15B 2023-2027 capex plan with ~75% of investments beginning earning in less than 18 months
    - Driving 8%-10% annual utility rate base growth
- Northern Indiana Public Service Company (NIPSCO) minority sale process on track for 2023
- Long-term 14-16% FFO/Debt target reaffirmed
- NIPSCO reached a settlement in the electric rate case on March 10th

Maintaining our Outperform rating and $31TP (details within)

Additional Details:

- **Minority Interest Sale:** Minority interest sale of NIPSCO is still expected to be completed in 2023 and continues to track as expected. The company remains confident in the attractiveness of the asset and has previously stated that there is no decline in interest attributable to higher rates, particularly given the quality of the potential counterparties with ready capital to deploy, bank leverage tools, and long-term investment preference. NiSource has initiated the sale process, and we anticipate an announcement and close by year end. We estimate $1.5-$2B in cash proceeds.

Please see the analyst certification and important disclosures on page 4 of this report. Evercore ISI and affiliates do and seek to do business with companies covered in its research reports. Investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.
© 2023. Evercore Group L.L.C. All rights reserved.

- **NIPSCO Electric rate case**: On March 10th, NIPSCO and other parties reached a settlement agreement in its electric rate case in Indiana. The settlement proposed a $292M rate increase compared with $395M company requested, including base rate increase and tracker. The parties agreed on an ROE of 9.8% versus current 9.75%, and an equity layer of 51.63% versus current 47.86%. Recall that company requested a 10.4% ROE and a 58.5% equity ratio on a rate base of $5.95B. We view the settlement as constructive if approved. A final Commission order is expected in mid-August with rates going into effect in September.
- **Virginia gas rate case**: On Dec 9th, Columbia Gas of Virginia reached a settlement with $25.8 million rate increase, inclusive of SAVE (Steps to Advance Virginia's Energy Plan) infrastructure tracker ($14.5MM), representing a settlement as to a specific revenue number but not as to a specific ROE. Recall that NiSource requested $40.6MM revenue increase net of the SAVE infrastructure tracker ($17.7MM) with a 10.75% ROE and 39.3% equity ratio on a rate base of $1.0B with a 12/21 test year. A final order is expected in 2Q23.
- **OH gas rate case**: On Oct 31st, 2022, Columbia Gas of Ohio filed a settlement representing a $68.2M revenue increase with 9.6% ROE and 50.6% equity layer. The company originally requested $221MM with ROE of 10.9%. The equity ratio request of ~51% was not disputed. The commission approved the settlement in January 2023 for new rates effective in March.
- **Indiana ROFR legislation**: HB 1420 was signed by the Governor on May 1st, which gives Indiana utility companies the right of first refusal (ROFR) to build, own, and operate new transmission lines approved by a regional transmission organization in their service area, and prevents new projects from being bid on by other competitive transmission companies. The legislation would solidify NI's position to own and invest in Transmission assets, which could be upside to their current capex plan.
- **Leadership changes:** The company announced several leadership changes on March 15th, link. Notably Shawn Anderson formerly senior vice president of risk and chief strategy officer, moved into the role of executive vice president and chief financial officer effective Mar 27th. Donald Brown, NiSource's former chief financial officer, assumed the role of executive vice president and chief innovation officer on Mar 27th, replacing Melody Birmingham, who was named as executive vice president, and group president, NiSource utilities.
- **Target Price**: Maintaining our Outperform rating and our target price of $31/share. We keep our 2023/2024/2025 EPS estimates of $1.57/$1.69/$1.80 unchanged. See our base case SOTP valuation of $31 on Exhibit 1. We apply a conservative 5% premium to our peer target 17x multiple for the electric business, which we estimate will grow rate base by 8-10% through 2027 versus peers at 6-7%. Our base case for the LDCs applies an in-line gas multiple, now of 16.6x 2025 EPS as we mark to market comparable trading multiples. Our bear case in Exhibit 1 below derives $27/share valuation assuming NI can grow EPS at 6% using low end of 2023 guidance range of $1.54, while our bull case is $33/share assuming the company can grow at 8% using high end of 2023 guide of $1.60.

ANALYST CERTIFICATION

The analysts, Durgesh Chopra, Sharon Wang, primarily responsible for the preparation of this research report attest to the following: (1) that the views and opinions rendered in this research report reflect his or her personal views about the subject companies or issuers; and (2) that no part of the research analyst's compensation was, is, or will be directly related to the specific recommendations or views in this research report.

IMPORTANT DISCLOSURES

This report is approved and/or distributed by Evercore Group L.L.C. ("Evercore Group"), a U.S. licensed broker-dealer regulated by the Financial Industry Regulatory Authority ("FINRA"), and Evercore ISI International Limited ("ISI UK"), which is authorised and regulated in the United Kingdom by the Financial Conduct Authority. The institutional sales, trading and research businesses of Evercore Group and ISI UK collectively operate under the global marketing brand name Evercore ISI ("Evercore ISI"). Both Evercore Group and ISI UK are subsidiaries of Evercore Inc. ("Evercore "). The trademarks, logos and service marks shown on this report are registered trademarks of Evercore.

The analysts and associates responsible for preparing this report receive compensation based on various factors, including Evercore's Partners' total revenues, a portion of which is generated by affiliated investment banking transactions. Evercore ISI seeks to update its research as appropriate, but various regulations may prevent this from happening in certain instances. Aside from certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Evercore ISI generally prohibits analysts, associates and members of their households from maintaining a financial interest in the securities of any company in the analyst's area of coverage. Any exception to this policy requires specific approval by a member of our Compliance Department. Such ownership is subject to compliance with applicable regulations and disclosure. Evercore ISI also prohibits analysts, associates and members of their households from serving as an officer, director, advisory board member or employee of any company that the analyst covers.

This report may include a Tactical Call, which describes a near-term event or catalyst affecting the subject company or the market overall and which is expected to have a short-term price impact on the equity shares of the subject company. This Tactical Call is separate from the analyst's long-term recommendation (Outperform, In Line or Underperform) that reflects a stock's forward 12-month expected return, is not a formal rating and may differ from the target prices and recommendations reflected in the analyst's long-term view.

Applicable current disclosures regarding the subject companies covered in this report are available at the offices of Evercore ISI: 55 East 52nd Street, New York, NY 10055, and at the following site: https://evercoreisi.mediasterling.com/disclosure.

Evercore and its affiliates, and I or their respective directors, officers, members and employees, may have, or have had, interests or qualified holdings on issuers mentioned in this report. Evercore and its affiliates may have, or have had, business relationships with the companies mentioned in this report.

Additional information on securities or financial instruments mentioned in this report is available upon request.

Ratings Definitions

Current Ratings Definition

Evercore ISI's recommendations are based on a stock's total forecasted return over the next 12 months. Total forecasted return is equal to the expected percentage price return plus gross dividend yield. We divide our stocks under coverage into three primary ratings categories, with the following return guidelines:

Outperform- the total forecasted return is expected to be greater than the expected total return of the analyst's coverage sector.
In Line- the total forecasted return is expected to be in line with the expected total return of the analyst's coverage sector.
Underperform- the total forecasted return is expected to be less than the expected total return of the analyst's coverage sector.
Coverage Suspended- the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances.*
Rating Suspended- Evercore ISI has suspended the rating and target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon.*

*Prior to October 10, 2015, the "Coverage Suspended" and "Rating Suspended" categories were included in the category "Suspended."

FINRA requires that members who use a ratings system with terms other than "Buy," "Hold/Neutral" and "Sell" to equate their own ratings to these categories. For this purpose, and in the Evercore ISI ratings distribution below, our Outperform, In Line, and Underperform ratings can be equated to Buy, Hold and Sell, respectively.

Historical Ratings Definitions

Prior to March 2, 2017, Evercore ISI's recommendations were based on a stock's total forecasted return over the next 12 months:

Buy- the total forecasted return is expected to be greater than 10%

Hold- the total forecasted return is expected to be greater than or equal to 0% and less than or equal to 10%
Sell -the total forecasted return is expected to be less than 0%

On October 31, 2014, Evercore Partners acquired International Strategy & Investment Group LLC ("ISI Group") and ISI UK (the "Acquisition") and transferred Evercore Group's research, sales and trading businesses to ISI Group. On December 31, 2015, the combined research, sales and trading businesses were transferred back to Evercore Group in an internal reorganization. Since the Acquisition, the combined research, sales and trading businesses have operated under the global marketing brand name Evercore ISI.

ISI Group and ISI UK:

Prior to October 10, 2014, the ratings system of ISI Group LLC and ISI UK which was based on a 12-month risk adjusted total return:

Strong Buy- Return > 20%
Buy- Return 10% to 20%
Neutral - Return 0% to 10%
Cautious- Return -10% to 0%
Sell- Return< -10%

For disclosure purposes, ISI Group and ISI UK ratings were viewed as follows: Strong Buy and Buy equate to Buy, Neutral equates to Hold, and Cautious and Sell equate to Sell.

Evercore Group:

Prior to October 10, 2014, the rating system of Evercore Group was based on a stock's expected total return relative to the analyst's coverage universe over the following 12 months. Stocks under coverage were divided into three categories:

Overweight- the stock is expected to outperform the average total return of the analyst's coverage universe over the next 12 months.
Equal-Weight- the stock is expected to perform in line with the average total return of the analyst's coverage universe over the next 12 months.
Underweight -the stock is expected to underperform the average total return of the analyst's coverage universe over the next 12 months.
Suspended- the company rating, target price and earnings estimates have been temporarily suspended.

For disclosure purposes, Evercore Group's prior "Overweight," "Equal-Weight" and "Underweight" ratings were viewed as "Buy," "Hold" and "Sell," respectively.

Ratings Definitions for Portfolio-Based Coverage

Evercore ISI utilizes an alternate rating system for companies covered by analysts who use a model portfolio-based approach to determine a company's investment recommendation. Covered companies are included or not included as holdings in the analyst's Model Portfolio, and have the following ratings:

Long- the stock is a positive holding in the model portfolio; the total forecasted return is expected to be greater than 0%.
Short- the stock is a negative holding in the model portfolio; the total forecasted return is expected to be less than 0%.
No Position- the stock is not included in the model portfolio.
Coverage Suspended- the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company, and in certain other circumstances; a stock in the model portfolio is removed.
Rating Suspended - Evercore ISI has suspended the rating and/or target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon; a stock in the model portfolio is removed.

Stocks included in the model portfolio will be weighted from 0 to 100% for Long and 0 to -100% for Short. A stock's weight in the portfolio reflects the analyst's degree of conviction in the stock's rating relative to other stocks in the portfolio. The model portfolio may also include a cash component. At any given time the aggregate weight of the stocks included in the portfolio and the cash component must equal100%.

Stocks assigned ratings under the alternative model portfolio-based coverage system cannot also be rated by Evercore ISI's Current Ratings definitions of Outperform, In Line and Underperform.

FINRA requires that members who use a ratings system with terms other than "Buy," "Hold/Neutral" and "Sell," to equate their own ratings to these categories. For this purpose, and in the Evercore ISI ratings distribution below, our Long, No Position and Short ratings can be equated to Buy, Hold and Sell respectively.

In addition, opinions, estimates and projections in this report may differ from or be contrary to those expressed by other business areas or groups of Evercore and its affiliates. Evercore ISI has no obligation to update, modify or amend this report or to otherwise notify a reader thereof in the event that any matter stated herein, or any opinion, projection, forecast or estimate set forth herein, changes or subsequently becomes inaccurate. Facts and views in Evercore ISI research reports and notes have not been reviewed by, and may not reflect information known to, professionals in other Evercore affiliates or business areas, including investment banking personnel. Evercore ISI salespeople, traders and other professionals may provide oral or written market commentary or trading strategies to our clients that reflect opinions that are contrary to the opinions expressed in this research. Our asset management affiliates and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

Evercore ISI does not provide individually tailored investment advice in research reports. The financial instruments discussed in this report are not suitable for all investors and investors must make their own investment decisions using their own independent advisors as they believe necessary and based upon their specific financial situations and investment objectives. This report has been prepared without regard to the particular investment strategies or financial, tax or other personal circumstances of the recipient. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to the recipient’s individual circumstances, or otherwise constitutes a personal recommendation to the recipient. None of Evercore Group or its affiliates will treat any recipient of this report as its customer by virtue of the recipient having received this report.

Securities and other financial instruments discussed in this report, or recommended or offered by Evercore ISI, are not insured by the Federal Deposit Insurance Corporation and are not deposits of or other obligations of any insured depository institution. If a financial instrument is denominated in a currency other than an investor’s currency, a change in exchange rates may adversely affect the price or value of, or the income derived from the financial instrument, and such investor effectively assumes such currency risk. In addition, income from an investment may fluctuate and the price or value of financial instruments described in this report, either directly or indirectly, may rise or fall. Estimates of future performance are based on assumptions that may not be realized. Furthermore, past performance is not necessarily indicative of future performance.

Please note that this report was prepared for and distributed by Evercore ISI to its institutional investor and market professional customers. Recipients who are not institutional investor or market professional customers of Evercore ISI should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.

Electronic research is simultaneously distributed to all clients. This report is provided to Evercore ISI clients and may not be redistributed, retransmitted or disclosed, in whole or in part, or in any form or manner, without the express written consent of Evercore ISI. Receipt and review of this research report constitutes your agreement not to redistribute, retransmit, or disclose to others the contents, opinions, conclusion or information contained in this report (including any investment recommendations, estimates or target prices) without first obtaining express permission from Evercore ISI.

This report is not intended for distribution to or use by any person or entity in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Evercore Group or its affiliates to any registration or licensing requirement within such jurisdiction. If this report is being distributed by a financial institution other than Evercore ISI or its affiliates, that financial institution is solely responsible for such distribution and for compliance with the laws, rules and regulations of any jurisdiction where this report is distributed. Clients of that financial institution should contact that institution to effect any transaction in the securities mentioned in this report or if such clients require further information. This report does not constitute investment advice by Evercore ISI to the clients of the distributing financial institution, and neither Evercore ISI nor its affiliates, nor their respective officers, directors or employees, accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content.

For persons in the UK: In making this report available, Evercore makes no recommendation to buy, sell or otherwise deal in any securities or investments whatsoever and you should neither rely or act upon, directly or indirectly, any of the information contained in this report in respect of any such investment activity. This report is being directed at or distributed to, (a) persons who fall within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”)); (b) persons falling within the definition of high net worth companies, unincorporated associations, etc. (set out in Article 49(2) of the Order); (c) other persons to whom it may otherwise lawfully be communicated (all such persons together being referred to as “relevant persons”). This report must not be acted on or relied on by persons who are not relevant persons.

For persons in Switzerland: The distribution of these materials to persons or entities in Switzerland is not intended to, and does not, constitute a financial service under the Swiss Financial Services Act (FinSA). In particular, the distribution of these materials does not constitute the provision of personal recommendations on transactions with financial instruments (investment advice) within the meaning of Article 3(c)(4) of FinSA.

For persons in Australia: Evercore does not have an Australian Financial Services License ("AFSL"). This report is only to be distributed to persons who fall within the definition of "wholesale" investors under section 761G of the Corporations Act 2001 (Cth). This report must not be acted on or relied on by persons who are not wholesale investors. Evercore relies on the relief provided under ASIC Corporations (Foreign Financial Services Providers—Limited Connection) Instrument 2017/182 to provide this report to wholesale investors in Australia without an AFSL.

For persons in New Zealand: This material has been prepared by Evercore Group L.L.C. for distribution in New Zealand to financial advisors and wholesale clients only and has not been prepared for use by retail clients (as those terms are defined in the Financial Markets Conduct Act 2013 (‘FMCA’)). Evercore Group L.L.C. is not, and is not required to be, registered or licensed under the FMCA, and unless otherwise stated any financial products referred to in this material are generally only available in New Zealand for issue to those satisfying the wholesale investor criteria in the FMCA.

Applicable current disclosures regarding the subject companies covered in this report are available at the offices of Evercore ISI: 55 East 52nd Street, New York, NY 10055, and at the following site: https://evercoreisi.mediasterling.com/disclosure.

In compliance with the European Securities and Markets Authority's Market Abuse Regulation, a list of all Evercore ISI recommendations disseminated in the preceding 12 months for the subject companies herein, may be found at the following site: https://evercoreisi.mediasterling.com/disclosure.

ARGUS

NISOURCE INC

NiSource Inc. is an energy holding company whose subsidiaries are fully regulated natural gas and electric utility companies serving nearly 4 million natural gas customers and 500,000 electric customers in six states. NiSource's principal subsidiaries include Columbia Gas, a natural gas distribution holding company; and NIPSCO, a regulated gas and electric company. NiSource derives substantially all of its revenues and earnings from the operating results of these rate-regulated utilities. The company has approximately 7,500 employees. NI shares are a component of the S&P 500.

Analyst's Notes

Analysis by Marie Ferguson, June 28, 2023

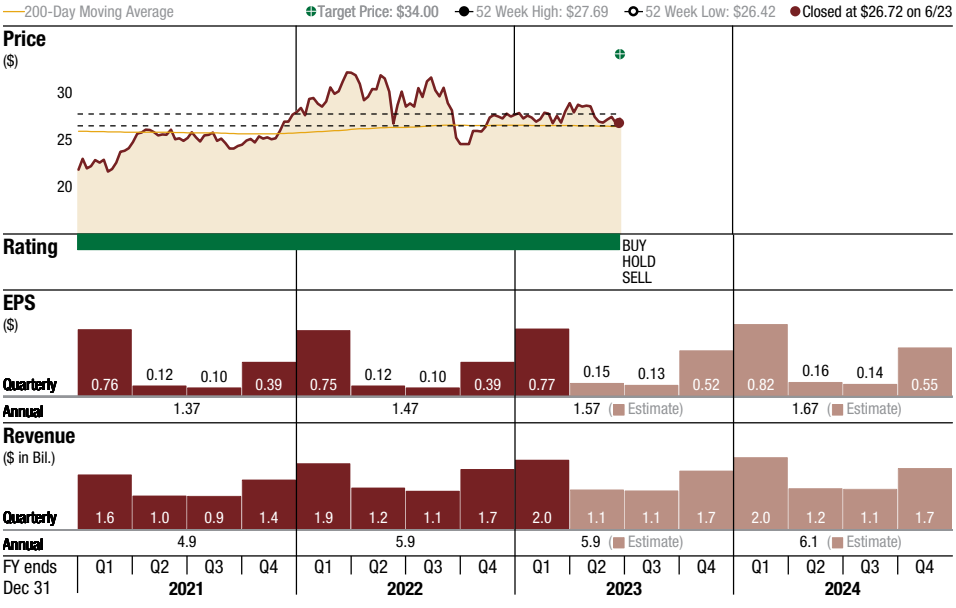
ARGUS RATING: BUY

- Maintaining BUY
- NiSource recently posted above-consensus 1Q23 EPS and reaffirmed its 2023 guidance.
- We are raising our 2023 adjusted EPS estimate to $1.57 from $1.55 and our 2024 forecast to $1.67 from $1.65.
- NiSource recently boosted its dividend by 6% to an annualized $1.00. The current yield is about 3.7%.
- In June, the company agreed to sell a 19.9% minority stake in its NIPSCO utility to Blackstone for $2.15 billion. It will use the proceeds to strengthen its balance sheet, and invest in utility operations and renewables.

INVESTMENT THESIS

Our rating on NiSource Inc. (NYSE: NI) is BUY based on valuation and historical earnings performance. Focusing on its regulated electric and gas utilities, NiSource recently completed a corporate restructuring that resulted in the spinoff of its nonregulated pipeline group. The company keeps a tight rein on operating expenses as well as capital spending, though it is making significant investments in green energy generation. Our target price is $34.

We note that NiSource, with an $11 billion market cap, could become a buyout target, as larger utilities and private equity firms pursue smaller utilities because of their stable earnings growth and above-average dividend yields.



RECENT DEVELOPMENTS

NI shares have underperformed over the past three months, rising 2.2% while the S&P 500 has risen 9.4%. The shares have fallen 4.5% over the past year, compared to a 10.7% gain for the index. They have underperformed over the past five years.

NiSource reported 1Q23 results on May 3. The company posted adjusted net income of

Argus Recommendations

Twelve Month Rating	SELL	HOLD	**BUY**
Five Year Rating	SELL	HOLD	**BUY**
Sector Rating	Under Weight	**Market Weight**	Over Weight

Argus assigns a 12-month BUY, HOLD, or SELL rating to each stock under coverage.

- BUY-rated stocks are expected to outperform the market (the benchmark S&P 500 Index) on a risk-adjusted basis over the next year.
- HOLD-rated stocks are expected to perform in line with the market.
- SELL-rated stocks are expected to underperform the market on a risk-adjusted basis.

The distribution of ratings across Argus' entire company universe is: 70% Buy, 30% Hold, 0% Sell.

Analyst's Notes...Continued

$343.0 million or $0.77 per share, up from $328.7 million or $0.75 per share a year earlier. EPS beat the consensus forecast of $0.75. Revenue rose 5% from the prior year to $1.97 billion.

In 2022, adjusted net income rose to $648.2 million or $1.47 per share from $571.2 million or $1.37 per share in 2021. Revenue rose 19% to $5.85 billion.

Along with the 1Q results, management reaffirmed its 2023 adjusted EPS guidance of $1.54-$1.60, which it raised from $1.50-$1.57 in February. The company expects to grow adjusted EPS at a 6%-8% annual rate through 2027.

NiSource projects capex of $3.3-$3.6 billion in 2023, $2.6-$2.9 billion in 2024, and a total of $15 billion in 2023-2027. It expects to reduce greenhouse gas emissions by 90% by 2030 and to be coal-free by 2028.

EARNINGS & GROWTH ANALYSIS

NiSource has two segments: Gas Distribution Operations (77% of 1Q23 revenue) and Electric Operations (23%). In 1Q23, Gas Distribution operating revenue rose 7% to $1.54 billion, while Electric Operations revenue increased 8% to $466 million.

In the Electric Operations segment, in September 2022, operating subsidiary Northern Indiana Public Service Co. (NIPSCO) filed it first electric case since 2018. The NIPSCO rate case settlement provides a revenue increase of $292 million, in line with the company's request, to support renewable generation and associated transmission projects, grid modernization, and customer-centric improvements. A final order is anticipated in August 2023.

At Columbia Gas of Ohio, new rates were implemented in the first quarter of 2023 following a rate case settlement. The company has also had gas rate settlements approved in Pennsylvania and Maryland.

The company continues to work on the Indiana Crossroads II Wind project, which is expected to enter service in 2023.

We are raising our 2023 adjusted EPS estimate to $1.57 from $1.55 and our 2024 forecast to $1.67 from $1.65.

NiSource relies on its utility infrastructure programs for earnings and dividend growth. The company's regulated gas and electric segments are investing in pipelines and in electric transmission projects as well as in distribution modernization programs, and should continue to benefit from favorable regulation.

FINANCIAL STRENGTH & DIVIDENDS

NiSource has improved its balance sheet by selling noncore assets, recalibrating capital expenditures, and carefully managing operating expenses and working capital. As part of this effort, it recently agreed to sell a 19.9% minority stake in its NIPSCO utility to Blackstone for $2.15 billion.

Our financial strength rating on NiSource is Medium. The company receives average scores on our main financial strength criteria of debt levels, fixed-cost coverage, profitability, earnings quality, and cash generation. The company has investment-grade

©2023 Argus Research Company

Analyst's Notes...Continued

ratings from Moody's (Baa2/stable) and Standard & Poor's (BBB+/stable).

The company had cash of $35.8 million at the end of 2022 and net available liquidity of $1.56 billion. Debt totaled $9.6 billion at the end of 2022, and accounted for 58.9% of total capitalization. As noted above, the company expects to make capital investments of approximately $15 billion through 2027.

In February 2023, NiSource raised its quarterly dividend by 6% to $0.25, or $1.00 annually, for a yield of about 3.7%. We think the dividend is safe and likely to grow modestly. Our dividend estimates are $1.00 for 2023 and $1.04 for 2024.

MANAGEMENT & RISKS

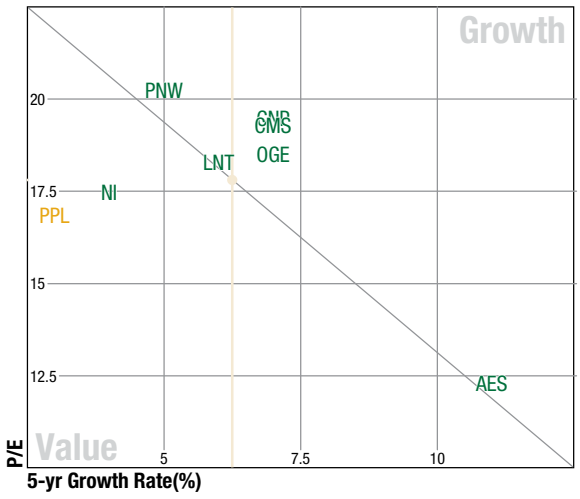
Lloyd Yates succeeded Joseph Hamrock as the company's president and CEO in February 2022. Donald E. Brown is the CFO. The chairman is Kevin T. Kabat, the former CEO of Fifth Third Bancorp. The COO is Pablo Vegas.

Management is committed to electric and gas service expansion strategies in the company's regulated service territories, and to the expansion of its gas transmission and storage business. We think the company's platform for a return to growth is solid, and are confident in management's ability to provide shareholders with increased value over the long term.

Key risks for stocks in our electric utility universe include fluctuations in interest rates and commodity prices, the effect of adverse weather on revenue, regulatory issues (especially involving construction cost recovery), and potential environmental and safety liabilities. In addition, the capital-intensive nature of the utility industry creates ongoing liquidity risk that must be actively managed by each company.

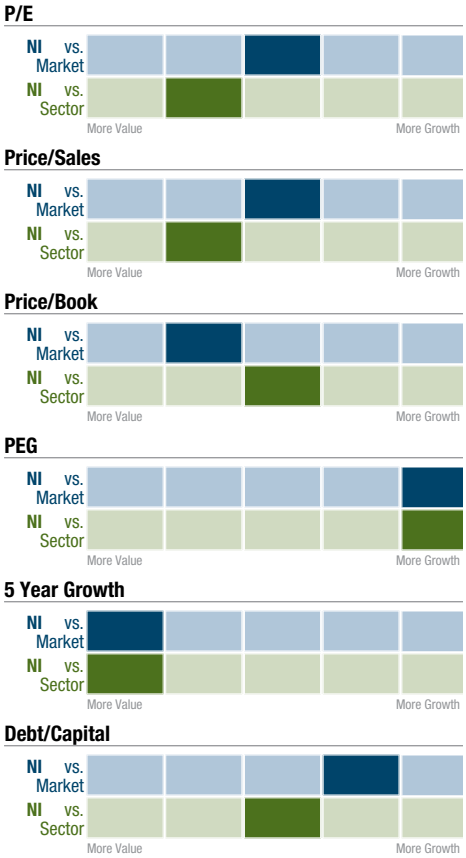
COMPANY DESCRIPTION

NiSource Inc. is an energy holding company whose subsidiaries are fully regulated natural gas and electric utility companies serving nearly 4 million natural gas customers and 500,000 electric customers in six states. NiSource's principal subsidiaries include Columbia Gas, a natural gas distribution holding company; and NIPSCO, a regulated gas and electric company. NiSource derives substantially all of its revenues and earnings from the operating results of these rate-regulated utilities. The company has approximately 7,500 employees. NI shares are a component of the S&P 500.



VALUATION

We think that NI shares are attractively valued at current prices near $27. On the fundamentals, the shares trade at 17.9-times our 2023 EPS estimate, near the average multiple of 17.6 for comparable electric and gas utilities. They are also trading at a price/sales multiple of 2.0, below the peer average of 2.4, and at a PEG ratio of 2.3, below the peer average of 2.8. The dividend yield of about 3.7% is in line with the industry average. We are reiterating our BUY rating on NI with a 12-month target price of $34.



Peer & Industry Analysis

The graphics in this section are designed to allow investors to compare NI versus its industry peers, the broader sector, and the market as a whole, as defined by the Argus Universe of Coverage.

- **The scatterplot shows how NI stacks up versus its peers on two key characteristics: long-term growth and value. In general, companies in the lower left-hand corner are more value-oriented, while those in the upper right-hand corner are more growth-oriented.**
- **The table builds on the scatterplot by displaying more financial information.**
- **The bar charts on the right take the analysis two steps further, by broadening the comparison groups into the sector level and the market as a whole. This tool is designed to help investors understand how NI might fit into or modify a diversified portfolio.**

About Argus

Argus Research, founded by Economist Harold Dorsey in 1934, has built a top-down, fundamental system that is used by Argus analysts. This six-point system includes Industry Analysis, Growth Analysis, Financial Strength Analysis, Management Assessment, Risk Analysis and Valuation Analysis.

Utilizing forecasts from Argus' Economist, the Industry Analysis identifies industries expected to perform well over the next one-to-two years.

The Growth Analysis generates proprietary estimates for companies under coverage.

In the Financial Strength Analysis, analysts study ratios to understand profitability, liquidity and capital structure.

During the Management Assessment, analysts meet with and familiarize themselves with the processes of corporate management teams.

Quantitative trends and qualitative threats are assessed under the Risk Analysis.

And finally, Argus' Valuation Analysis model integrates a historical ratio matrix, discounted cash flow modeling, and peer comparison.

THE ARGUS RESEARCH RATING SYSTEM

Argus uses three ratings for stocks: BUY, HOLD, and SELL. Stocks are rated relative to a benchmark, the S&P 500.

- A BUY-rated stock is expected to outperform the S&P 500 on a risk-adjusted basis over a 12-month period. To make this determination, Argus Analysts set target prices, use beta as the measure of risk, and compare expected risk-adjusted stock returns to the S&P 500 forecasts set by the Argus Market Strategist.
- A HOLD-rated stock is expected to perform in line with the S&P 500.
- A SELL-rated stock is expected to underperform the S&P 500.

Argus Research Disclaimer

BARCLAYS

High Grade Utilities: 1Q23 Results (EIX, EXC and NI)

Improving Credit Pathways Persist

CORE

Key points: 1) Issuance needs: EXC sees remaining needs at PECO ($525mn) and BGE ($600mn), NiSource expects to issue senior unsecureds, and we see continued needs at SoCalEd and EIX holdco; 2) NI 5.65% perp near-term call in focus; 3) credit metric improvement path for EIX and NI, still scope for S&P upgrade at EXC.

Trade Recommendations

- **Hybrids:** Buy NI 5.650% perps; sell EIX 8.125% 2053s/buy EIX 5.000% perps
- **Opco FMBs:** Buy EIX 5.700% 2053s (Southern California Edison)
- **CDS:** Buy EXC 5y CDS (48/51) and sell FE 5y CDS (87/96)

Relative Value

- **Buy NI 5.650% perps** (~$95; first call June 15): The NiSource perps lose equity credit on the first call date. Further, given a reset to 6.3%, we think they become expensive to maintain on the balance sheet, and we expect NiSource to redeem them. The perps have discrete 5y calls (next call is in June 2028), so the window to call them is now fairly tight (we think it would have to give 30 days' notice).
- **Sell EIX 8.125% 2053s/buy EIX 5.000% perps:** We view the newly issued EIX 8.125% 2053s as less attractive than the outstanding EIX 5.000% perps. The latte rare being quoted at a 10% yield to first call (December 2026), which is the call date preceding their loss of equity credit in March 2027 (given a cumulative 100bp coupon step in 2047). Given that EIX has utilized hybrid issuance to help keep FFO/debt above 15%, we expect EIX to call and replace to maintain equity credit (the 5% perps are worth ~20bp right now, with FFO/debt thinly positioned versus their 15% downgrade threshold at S&P). The 8.125% 2053s are quoted at a 7.3% yield to first call (March 2028), but the loss of equity credit would not occur until 2033 (ie, 20 years before maturity). The reset on the EIX 8.125% 2053s and the EIX 5.000% perps is similar (386.4bp versus 390.1bp). Finally, we prefer the low dollar price of the EIX holdco hybrids through the traditional fire season period.
- **Buy EXC 5y CDS (48/51) and sell FE 5y CDS (87/96):** We see a 30bp compression opportunity, largely with FE tightening in. We view EXC as a good comp to FE, as both are largely T&D utilities. We also see improving credit trajectories for both, though FE has the higher FFO/debt target in the medium term (14-15%, post the sale of the FET minority

interest in 2024). FE targets FFO/debt improvement to 12% in 2023 from 11% in 2022, which is only slightly below EXC at 13%. Over time, we expect ratings to compress (FE to mid-BBB over the next two to three years, reflecting the higher metrics). Prior to FE's negative governance headlines in summer 2020 , FE and EXC 5y CDS traded about flat (Figure 1). For more on FirstEnergy, see FE: With New CEO, upgrade to IG within reach, 1 May 2023.

FIGURE 1. **FE 5y CDS used to trade about flat to EXC 5y CDS prior to the summer 2020 HB 6 related headlines, and the CEO departure/revolver drawings and downgrade to HY in November 2020**

- **Buy EIX 5.700% 2053s (Southern California Edison):** At ~177bp, the A2/A-/A- rated FMBs are only ~5bp tight of mid-BBB rated Duk holdco 30y. We think SoCalEd has made meaningful progress in its wildfire risk mitigation plans, and over the next three years has a line of sight to effectively reduce risk largely through an accelerated covered conductor rollout (Figure 4). While we think issuance needs will persist for the opco, especially as it continues to pay for 2017-18 wildfire liabilities, we also think there is path to improve precedence around wildfire recovery, albeit this is not a 2023 event. Even partial recovery could help drive further upside to ratings (wildfire liabilities currently weighs down FFO/debt by ~500bp). We think fair value for EIX 30y should be modestly wide to other California-exposed electric utilities, which have seen lower wildfire costs over the past 10 years (eg, SDG&E or PacifiCorp). This implies ~20-25bp of spread compression opportunity.

Edison International (EIX): 1Q23 Highlights

We maintain our Overweight rating on Southern California Edison (EIX). While EIX opco has outperformed in excess return terms YTD (Figure 2), we continue to see compression opportunities (~20bp across the curve), as levels are more consistent with mid-BBB utility holdocs than A category opcos. EIX has a pathway to substantially cover its high-fire-risk distribution line miles with covered conductor by 2026, and has seen limited material fires since 2017-18, having implemented a wide-ranging wildfire mitigation plan. Given an elevated capex plan, and deferred recovery in California's regulatory framework, cash flow recovery has been gradual, but we expect cash flow to improve through 2023-25. As with other opcos, we expect SoCalEd to regularly access debt, and note it had ~$0.9bn drawn under its credit facilities at end 1Q23.

We maintain our Market Weight rating on Edison International (EIX). EIX holdco has also outperformed YTD, and it remains a wider-trading holdco (~50-60bp back of other mid-BBB holdcos). We think risk-reward is relatively negatively skewed against the holdco going into the traditional wildfire season, and therefore maintain a relative preference for SoCalEd. At ~60bp, the holdco-opco differential for EIX is broadly similar to PCG, though EIX holdco differentials have been less volatile (Figure 3).

FIGURE 2. **EIX Entities versus the Index**

Issuer	Ticker	Amt Out ($mn)	Moody's	S&P	OAS	OASD	Excess Return 1Month	Excess Return 3Months	Excess Return YTD

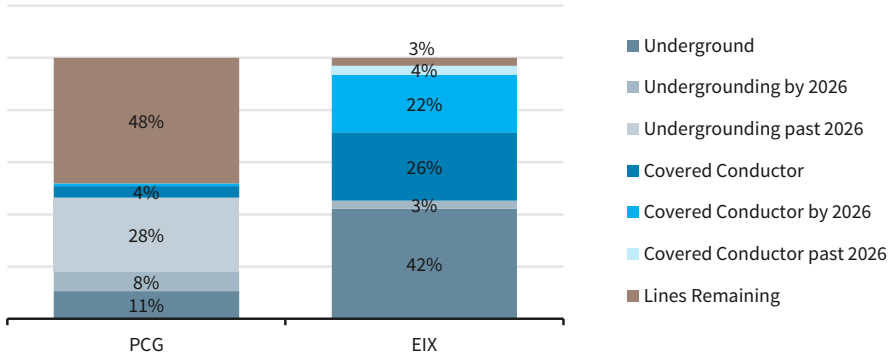
FIGURE 3. **EIX Holdco/Opco Differential versus PCG**



Open in Barclays Live Chart

Source: **Credit** - Barclays Trading, IHS Markit

- **1Q23 results:** We calculate 1Q23 EBITDA of $1,424mn, +8.0% y/y, with about flat revenue. O&M costs were down 27% y/y, which was the main EBITDA growth driver. We calculate a meaningful improvement to FFO to $1,058mn, up from $705mn in 1Q22. That said, working capital moves were significantly negative in the quarter, due in large part to accounts payable (-$508mn), as well as regulatory assets (-$296mn). We calculate CFO pre-WC/debt (on a GAAP basis) at 11.2%, +120bp versus 4Q22. Delays in cash flow recovery are the reason for the difference between FFO and CFO pre-WC. We estimate FFO (EBITDA less interest less cash taxes)/ debt at ~15.5% (compared with 15% or more required for the BBB- S&P rating).

- **Wildfire mitigation plan:** Management highlighted that it filed its 2023-25 wildfire mitigation plan with the Office of Energy Infrastructure, including covered conductor (2,850 miles over 2023-25), as well as 600 miles of undergrounding by the end of 2028. EIX has a total of 16.8k distribution line miles in high-fire-threat districts, of which 7.1k is already undergrounded and 4.4k has seen covered conductors completed. We estimate that by end 2026, almost all of EIX's power lines in these high-threat districts will either be undergrounded or have covered conductors.

FIGURE 4. **EIX vs. PCG Wildfire Mitigation Plan (Covered Conductor vs. Undergrounding)**

Source: Company reports

- **2017-18 wildfire costs:** Through March 31, 2023, SCE estimates ~$8.8bn of total losses, and it has so far paid $7.8bn, including $135mn left to pay under executed settlements, up from $7.6bn at end 4Q22. The company still expects to request total cost recovery of $6bn (plus interest and legal costs), which excludes $2.4bn of insurance and FERC recovery, and $0.5bn that EIX had agreed not to request to recovery. As indicated last quarter, the company will request $2bn of recovery.

- **ROE adjustment:** Management noted that if the 12-month average of Moody's Baa1 bond index exceeds 5.37% at the end of September, SCE will file a Tier 2 advice letter to implement the adjustment to the 2024 ROE. The adjustment would be half the difference between the average and 4.37%. For example, the spot difference was cited at 5.42%, so that would imply a ~52.5bp addition. The cost of debt and preferred would also be updated.

- **Issuance needs:** The company noted ~$400mn of holdco funding needs, and when asked on the call, management was open to convertibles. At the opco level, SCE has ~$0.9bn drawn, and we expect it to be in the market for opco bonds in the near term. SCE's recent securitization proceeds were used to repay a $730mn term loan priority maturity in May 2023.

- **Electrification efforts:** SCE noted that there are nearly 200 EV charging sites to potentially support 4k medium/heavy-duty vehicles. For these sites, SCE might have to upgrade the distribution system, and the company is liaising with customers to understand when and where these vehicles will materialize. For building electrification, SCE has proposed a $677mn 5y program for adopting electric heat pumps.

Exelon Corp (EXC): 1Q23 Highlights

We maintain our Overweight rating on Exelon (EXC): We recently upgraded Exelon to Overweight[1] and there are no further issuance needs at the holdco level for the remainder of the year, and a modest level of issuance left at two opcos. We believe EXC, as a pure-play T&D utility, faces less risk due to commodity price volatility, as well as to the energy transition. While there are ongoing headlines around the prior conductor issues at Commonwealth Edison, the company has addressed the topic, noting that these issues were resolved with the Justice Department under the 2020 deferred prosecution agreement. We see the IL rate case this year as also being a key regulatory item, along with the final effect of corporate minimum taxes (expected later this year). That said, we view EXC as being on the path to an upgrade to BBB+ at S&P, and view EXC holdco as one of the higher-quality holdcos (similar to Southern/NiSource).

[1] High Grade Utilities: Dislocations in Relative Value, 29 March 2023

We maintain our Market Weight on the larger operating companies (Commonwealth Edison, PECO and Baltimore Gas & Electric). We view the larger opcos as well positioned T&D opcos, and in the case of Commonwealth Edison, with some scope for improvement as it transitions to a multiyear rate case. We view valuations, along the tighter end of the range of secured opcos, as fairly reflecting a relatively low risk profile overall.

FIGURE 5. **EXC Entities versus the Index**

Issuer	Ticker	Amt Out ($mn)	Moody's	S&P	OAS	OASD	Excess Return 1Month	Excess Return 3Months	Excess Return YTD
Utility Index		587,846	A2/A3	A-/BBB+	136	9.1	8	(122)	1
Holdco & Other Custom Index		220,595	Baa1/Baa2	BBB+	134	7.2	13	(91)	28
Exelon Corp	EXC	10,376	Baa2	BBB	136	8.1	8	(188)	(73)
Opco Secured Custom Index		261,574	A1/A2	A/A-	135	10.3	6	(144)	(28)
Delmarva Power & Light Co	EXC	375	A2	A	147	13.1	6	(267)	42
Potomac Electric Power	EXC	1,150	A2	A	138	11.1	44	(49)	102

Baltimore Gas & Electric Co	EXC	3,750	A3	A	127	11.7	31	(139)	(46)

Source: Bloomberg Fixed Income Indices

- **1Q23 results:** We calculate 1Q23 EBITDA at $1,966mn, +14.5% y/y, supported by revenue growth (+4.4%). Purchased power and fuel costs were slightly higher (+0.6%), while O&M was lower (-2.3%). Cash from operations ($484mn) was notably weaker in the quarter, driven by changes in working capital and regulatory assets/liabilities (-$833mn). Accounts payable (-$482mn) and collateral (-$214mn) were notable changes. Comparability in cash flows versus 1Q22 is impacted by the spin-off of Constellation in 1Q22. We calculate FFO/debt of 12%.

- **2023 financing plans (80% complete):** Exelon's 2023 financing plan is largely complete, with PECO ($525mn) and Baltimore Gas & Electric ($600mn) the main issuers remaining. We note that the company utilized the private placement market for Pepco, Atlantic City and Delmarva Power, and using a delayed draw feature will fund an incremental $600mn at Pepco and Delmarva in September and November 2023.

- **Credit metrics:** The company maintained its 13-14% FFO/debt targets, which gives it a cushion against Moody's downgrade threshold of 12%. S&P has a more constructive take on Exelon, and has an upgrade threshold of 13%. In its May 2023 update, S&P calculated adjusted FY22 FFO/debt at 13.1%. EXC is attempting to mitigate potential negative impacts of the Corporate Minimum Tax and is awaiting guidance from the Treasury; if its proposed repairs are not permitted, then EXC would expect to be the at the low end of the 13-14% guidance.

- **Deferred prosecution agreement:** The company reminded investors that the deferred prosecution agreement signed in 2020 resolved the Justice Department's investigation into ComEd. Management also noted that it has made substantial changes to contracting, lobbying and compliance operations to avoid future conduct issues. The comments were in response to questions regarding the trial of former Commonwealth Edison executives and

associates.[2]

- **Rate cases:** We view the Commonwealth Edison Multi-Year Plan (MYP) case as the most significant for Exelon. The company filed the four-year plan on January 17, and a commission order is expected on December 20. The proposal includes a phase-in of new rates, with the equity layer increasing from 50.58% in 2024 to 51.19% in 2027, and ROE increasing from 10.50% in 2024 to 10.65% in 2027. The plan also expects to defer recovery of 35% of the rate increase to 2026 (but accrued in earnings). The existing Commonwealth Edison rate plan includes a 49.45% equity ratio, and an ROE of 7.85%. Atlantic City ($105mn), Baltimore Gas & Electric ($602mn 3y multi-year plan), Pepco DC ($191mn 3 year plan) and Delmarva - Delware ($48mn) are the other rate cases.

NiSource (NI): 1Q23 Highlights

We maintain our Overweight rating on NiSource (NI): The company maintains solid credit goals, including an FFO/debt target of 14-16% (it reported 13.5% in 2022). It still expects the sale of a minority interest in NIPSCo to take place this year (~$7bn rate base), to support financing for the $15bn capex plan over 2023-27. NiSource targets net zero scope 1 and scope 2 emissions by 2040. NiSource 10y (153bp) and 30y (172bp) are about 10bp tight to DUK holdco, which we view as about fair. Nonetheless, our Overweight for NiSource within the index reflects more modest issuance at NiSource for 2023 (given its expected minority interest sale in NISPCO), our view of better-than-average credit metrics at NI with meaningful cushion to d/g thresholds (13%), and lack of meaningful opco debt.

FIGURE 6. **NI Entities versus the Index**

Issuer	Ticker	Amt Out ($mn)	Moody's	S&P	OAS	OASD	Excess Return 1Month	Excess Return 3Months	Excess Return YTD

NiSource Inc	NI	9,697	Baa2	BBB+	132	8.2	16	(89)	41

Source: Bloomberg Fixed Income Indices

- **1Q23 results:** We calculate 1Q EBITDA at $738mn, +7.3% y/y, reflecting an increase in 1Q revenue (+4.9% y/y), which more than offset an increase in fuel costs (+8.3% y/y). Cash from operations improved by ~$100mn y/y to $683mn, due largely to working capital changes. We calculate FFO/debt at 15% on a GAAP basis, about in line with 4Q22. NiSource has $1.55bn of preferred stock, and a 50/50 debt/equity treatments leads to a ~100bp reduction in the FFO/debt metric. The company's longer-term targets are 14-16%.

- **NIPSCo minority interest sale:** The company continues to target a NIPSco minority stake sale in 2023, and is confident on the process for this year. While it is keeping the regulator up to date, it does not expect a requirement for approvals. During the investor day presentation in 2022, management indicated ~$18bn of aggregate capital uses ($15bn capex and $3bn dividends) for 2023-27. Along with $10bn of cash, and $5bn of debt, the company expected to procure the remaining $3bn from a mix of ATM equity and the proceeds from the minority stake sale. NIPSCO has a total rate base of $7.8bn (equity layer cited as ~50% inclusive of deferred taxes), and we note that Duke Energy sold a minority interest in its Indiana opco at a ~1.3-1.4x rate base.[3]

[3] https://s201.q4cdn.com/583395453/files/doc_presentation/2021/01/gic-ir-slides.pdf

- **FFO/debt:** Over 2024-27, NiSource aims to improve FFO/debt to 14-16%, versus 13.5% achieved in 2022. For 2025 and beyond, NiSource expects to use ATM equity to support the metrics, as it looks to execute on an elevated capex program. NiSource's downgrade/upgrade thresholds are 13-17% at Moody's (Baa2) and 13-16% at S&P (for BBB+), with its targets leaving significant cushion versus the downgrade thresholds.

- **NIPSCo rate case:** The settlement achieved in March 10, 2023, supports an ROE of 9.8%, a $292mn revenue increase. An order is expected in August, with rates to be effective in September.

- **Debt issuance:** Following $750mn of debt issuance earlier in the year, NiSource stated that it would likely issue more debt later this year. During the investor day, NiSource indicated ~$5bn of aggregate net debt issuance through 2023-27, implying ~$1bn a year. In its 10Q, the company stated that it has $300mn remaining under its $750mn ATM, though during the call, management said it did not expect to utilize this. The company also expects to remarket its Series C Mandatory Convertible Preferred Stock prior to December 1, 2023. Separately, NiSource has $400mn of perps callable on June 15, 2023. This security was not referenced on the call, but given that it is due to lose equity credit at S&P, and resets to ~6.3%, we expect the company to redeem the security.

We, Srinjoy Banerjee, CFA and Dylan Paup, CFA, hereby certify (1) that the views expressed in this research report accurately reflect our personal views about any or all of the subject securities or issuers referred to in this research report and (2) no part of our compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this research report.

Important Disclosures:
This document is intended for institutional investors and is not subject to all of the independence and disclosure standards applicable to debt research reports prepared for retail investors under U.S. FINRA Rule 2242. Barclays trades the securities covered in this report for its own account and on a discretionary basis on behalf of certain clients. Such trading interests may be contrary to the recommendations offered in this report.

Barclays Research is produced by the Investment Bank of Barclays Bank PLC and its affiliates (collectively and each individually, "Barclays").

All authors contributing to this research report are Research Analysts unless otherwise indicated. The publication date at the top of the report reflects the local time where the report was produced and may differ from the release date provided in GMT.

Availability of Disclosures:
For current important disclosures regarding any issuers which are the subject of this research report please refer to https://publicresearch.barclays.com or alternatively send a written request to: Barclays Research Compliance, 745 Seventh Avenue, 13th Floor, New York, NY 10019 or call +1-212-526-1072.

Barclays Capital Inc. and/or one of its affiliates does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that Barclays may have a conflict of interest that could affect the objectivity of this report. Barclays Capital Inc. and/or one of its affiliates regularly trades, generally deals as principal and generally provides liquidity (as market maker or otherwise) in the debt securities that are the subject of this research report (and related derivatives thereof). Barclays trading desks may have either a long and / or short position in such securities, other financial instruments and / or derivatives, which may pose a conflict with the interests of investing customers. Where permitted and subject to appropriate information barrier restrictions, Barclays fixed income research analysts regularly interact with its trading desk personnel regarding current market conditions and prices. Barclays fixed income research analysts receive compensation based on various factors including, but not limited to, the quality of their work, the overall performance of the firm (including the profitability of the Investment Banking Department), the profitability and revenues of the Markets business and the potential interest of the firm's investing clients in research with respect to the asset class covered by the analyst. To the extent that any historical pricing information was obtained from Barclays trading desks, the firm makes no representation that it is accurate or complete. All levels, prices and spreads are historical and do not necessarily represent current market levels, prices or spreads, some or all of which may have changed since the publication of this document. Barclays Research Department produces various types of research including, but not limited to, fundamental analysis, equity-linked analysis, quantitative analysis, and trade ideas. Recommendations and trade ideas contained in one type of Barclays Research may differ from those contained in other types of Barclays Research, whether as a result of differing time horizons, methodologies, or otherwise.

Explanation of the Barclays Research Corporate Credit Sector Rating System

Overweight (OW):
For sectors rated against the Bloomberg U.S. Credit Index, the Bloomberg Pan-European Credit Index, the Bloomberg EM Asia USD High Grade Credit Index or the Bloomberg EM USD Corporate and Quasi-Sovereign Index, the analyst expects the six-month excess return of the sector to exceed the six-month excess return of the relevant index.

For sectors rated against the Bloomberg U.S. High Yield 2% Issuer Capped Credit Index, the Bloomberg Pan-European High Yield 3% Issuer Capped Credit Index excluding Financials, the Bloomberg Pan-European High Yield Finance Index or the Bloomberg EM Asia USD High Yield Corporate Credit Index, the analyst expects the six-month total return of the sector to exceed the six-month total return of the relevant index.

Market Weight (MW):
For sectors rated against the Bloomberg U.S. Credit Index, the Bloomberg Pan-European Credit Index, the Bloomberg EM Asia USD High Grade Credit Index or the Bloomberg EM USD Corporate and Quasi-Sovereign Index, the analyst expects the six-month excess return of the sector to be in line with the six-month excess return of the relevant index.

For sectors rated against the Bloomberg U.S. High Yield 2% Issuer Capped Credit Index, the Bloomberg Pan-European High Yield 3% Issuer Capped Credit Index excluding Financials, the Bloomberg Pan-European High Yield Finance Index or the Bloomberg EM Asia USD High Yield Corporate Credit Index, the analyst expects the six-month total return of the sector to be in line with the six-month total return of the relevant index.

Underweight (UW):
For sectors rated against the Bloomberg U.S. Credit Index, the Bloomberg Pan-European Credit Index, the Bloomberg EM Asia USD High Grade Credit Index or the Bloomberg EM USD Corporate and Quasi-Sovereign Index, the analyst expects the six-month excess return of the sector to be less than the six-month excess return of the relevant index.

For sectors rated against the Bloomberg U.S. High Yield 2% Issuer Capped Credit Index, the Bloomberg Pan-European High Yield 3% Issuer Capped Credit Index excluding Financials, the Bloomberg Pan-European High Yield Finance Index or the Bloomberg EM Asia USD High Yield Corporate Credit Index, the analyst expects the six-month total return of the sector to be less than the six-month total return of the relevant index.

Sector definitions:
Sectors in U.S. High Grade Research are defined using the sector definitions of the Bloomberg U.S. Credit Index and are rated against the Bloomberg U.S. Credit Index.

Sectors in U.S. High Yield Research are defined using the sector definitions of the Bloomberg U.S. High Yield 2% Issuer Capped Credit Index and are rated against the Bloomberg U.S. High Yield 2% Issuer Capped Credit Index.

Sectors in European High Grade Research are defined using the sector definitions of the Bloomberg Pan-European Credit Index and are rated against the Bloomberg Pan-European Credit Index.

Sectors in Industrials and Utilities in European High Yield Research are defined using the sector definitions of the Bloomberg Pan-European High Yield 3% Issuer Capped Credit Index excluding Financials and are rated against the Bloomberg Pan-European High Yield 3% Issuer Capped Credit Index excluding Financials.

Sectors in Financials in European High Yield Research are defined using the sector definitions of the Bloomberg Pan-European High Yield Finance Index and are rated against the Bloomberg Pan-European High Yield Finance Index.

Sectors in Asia High Grade Research are defined on Barclays Live and are rated against the Bloomberg EM Asia USD High Grade Credit Index.

Sectors in Asia High Yield Research are defined on Barclays Live and are rated against the Bloomberg EM Asia USD High Yield Corporate Credit Index.

Sectors in EEMEA and Latin America Research are defined on Barclays Live and are rated against the Bloomberg EM USD Corporate and Quasi Sovereign Index. These sectors may contain both High Grade and High Yield issuers.

To view sector definitions and monthly sector returns for Asia, EEMEA and Latin America Research, go to https://live.barcap.com/go/research/EMSectorReturns on Barclays Live.

Explanation of the Barclays Research Corporate Credit Rating System

For all High Grade issuers covered in the US, Europe or Asia, and for all issuers in Latin America and EEMEA, the credit rating system is based on the analyst's view of the expected excess return over a six-month period of the issuer's index-eligible corporate debt securities* relative to the expected excess return of the relevant sector, as specified on the report.

Overweight (OW): The analyst expects the six-month excess return of the issuer's index-eligible corporate debt securities to exceed the six-month expected excess return of the relevant sector.

Market Weight (MW): The analyst expects the six-month excess return of the issuer's index-eligible corporate debt securities to be in line with the six-month expected excess return of the relevant sector.

Underweight (UW): The analyst expects the six-month excess return of the issuer's index-eligible corporate debt securities to be less than the six-month expected excess return of the relevant sector.

Rating Suspended (RS): The rating has been suspended temporarily due to market events that make coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Investment Bank of Barclays Bank PLC is acting in an advisory capacity in a merger or strategic transaction involving the company.

Coverage Suspended (CS): Coverage of this issuer has been temporarily suspended.

Not Covered (NC): Barclays' fundamental credit research team does not provide formal, continuous coverage of this issuer and has not assigned a rating to the issuer or its debt securities. Any analysis, opinion or trade recommendation provided on a Not Covered issuer or its debt securities is valid only as of the publication date of this report and there should be no expectation that additional reports relating to the Not Covered issuer or its debt securities will be published thereafter.

For all High Yield issuers (excluding those covered in EEMEA or Latin America), the credit rating system is based on the analyst's view of the expected total returns over a six-month period of the rated debt security relative to the expected total return of the relevant sector, as specified on the report.

Overweight (OW): The analyst expects the six-month total return of the debt security subject to this rating to exceed the six-month expected total return of the relevant sector.

Market Weight (MW): The analyst expects the six-month total return of the debt security subject to this rating to be in line with the six-month expected total return of the relevant sector.

Underweight (UW): The analyst expects the six-month total return of the rated debt security subject to this rating to be less than the six-month expected total return of the relevant sector.

Rating Suspended (RS): The rating has been suspended temporarily due to market events that make coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Investment Bank of Barclays Bank PLC is acting in an advisory capacity in a merger or strategic transaction involving the company.

Coverage Suspended (CS): Coverage of this issuer has been temporarily suspended.

Not Covered (NC): Barclays' fundamental credit research team does not provide formal, continuous coverage of this issuer and has not assigned a rating to the issuer or its debt securities. Any analysis, opinion or trade recommendation provided on a Not Covered issuer or its debt securities is valid only as of the publication date of this report and there should be no expectation that additional reports relating to the Not Covered issuer or its debt securities will be published thereafter.

Where a recommendation is made at the issuer level, it does not apply to any sanctioned securities, where trading in such securities would be prohibited under applicable law, including sanctions laws and regulations.

*In EEMEA and Latin America (and in certain other limited instances in other regions), analysts may occasionally rate issuers that are not part of the Bloomberg U.S. Credit Index, the Bloomberg Pan-European Credit Index, the Bloomberg EM Asia USD High Grade Credit Index or Bloomberg EM USD Corporate and Quasi Sovereign Index. In such cases the rating will reflect the analyst's view of the expected excess return over a six-month period of the issuer's corporate debt securities relative to the expected excess return of the relevant sector, as specified on the report.

Distribution of ratings assigned by Barclays Corporate Credit Research at the issuer level:
26% have been assigned an Overweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Buy rating; 63% of issuers with this rating category are investment banking clients of the Firm; 84% of the issuers with this rating have received financial services from the Firm.

US Credit Research & Strategy

Hybrid/preferred relative value as the dust settles

CORE

Hybrids/preferreds had a difficult March but have regained about half of their losses and outperformed the corporate index year-to-date. We find the discount for Libor/SOFR-based resets too large, as investors have preferred constant-maturity reset indices. The most attractive trades are in utilities, banks, and midstream.

Total returns were -4% for hybrids/preferreds in March as volumes and volatility spiked. Trading volumes were up 50%, driven by financials, which were at the center of the storm. At one point during the month, PFF was down more than 8% before recovering about half of those losses. From a year-to-date perspective, junior subs/preferreds have outperformed the US corporate index in total returns.

Extension risks back in focus. The recent bank turmoil has increased the attention paid to extension risk. We believe it is appropriate to think of reset/senior ratios above 1.9x as having limited extension risk and those below 1.5x as having increased risk.

We think that extension risk worries have led to an exaggerated increase in the discount for Libor/SOFR reset indices, particularly for bonds that are likely to be called. Running a multi-factor regression, we find that the penalty for Libor/SOFR-based resets has increased by about 15bp, to around 25bp, for non-bank corporate hybrids and by 20bp, to around 40bp, for US bank preferreds, implying investor preference for constant-maturity reset reference rates.

Broadly, some of the most attractive hybrid securities are in the electric utility, Big 6 bank, and midstream sectors. First, they are trading toward the wide end of the range relative to seniors. Second, bonds in these sectors have higher resets (relative to senior spreads) and higher spread ratios to seniors when priced to maturity/perpetuity. In financials, Big 6 bank preferreds have better reset/senior ratios than regionals, driving our preference for the Big 6.

Trade ideas

- **Electric utilities:** Buy NI 5.650% perps; buy CNP 6.125% perps; buy EMACN 6.750% 2076s; sell EIX 8.125% 2053s, buy EIX 5.000% perps.
- **Financials:** Buy CRBG 6.875% 2052s; buy CFG 5.65% perp NC5s (series F); buy C 5.0% perp NC5s (series U)

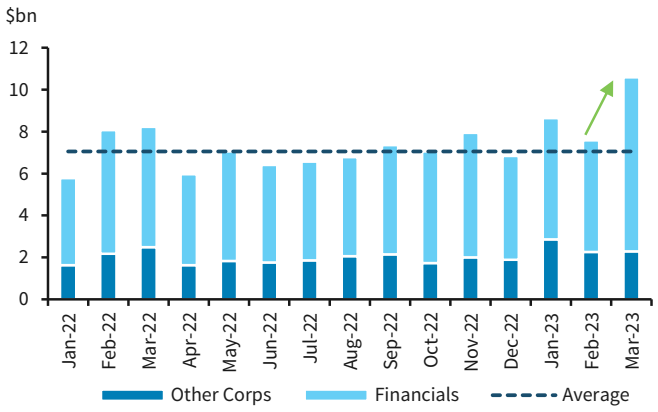
- **Energy/midstream:** Buy the ET 6.5% series H perps, sell the ET 6.625% series B perps; sell TRPCN 5.6% 2082s outright or paired against the TRPCN senior 5.1% 2049s.
- **A&D:** Buy the GE 0 perps.
- **TMT:** Buy PARA 2062s.
- **Tobacco:** Buy BATSLN €3.0 2026 perps and €3.75 2029 perps.

Strategy - Brad Elliott

Hybrids/preferreds have recovered about half of their March losses. After being up 11.4% on the year at one point in early February, PFF is now up only 4.7% for 2023 (Figure 1). That is a clear recovery from the year-to-date lows in March and slightly better than the total returns for the US corporate index (+3.2% YTD).



Trading volumes were up 50% in March, driven by financials. Volumes spiked amid the banking turmoil, with acute focus on the AT1 market as Credit Suisse securities were wiped out. This led to widespread underperformance of subordinated paper. Hybrid/pref volumes were up 50% versus the 2022-23 average, with the increase driven entirely by financials (Figure 2). As the dust has settled in April, volumes have dropped significantly and are on pace to be lowest since June 2022.

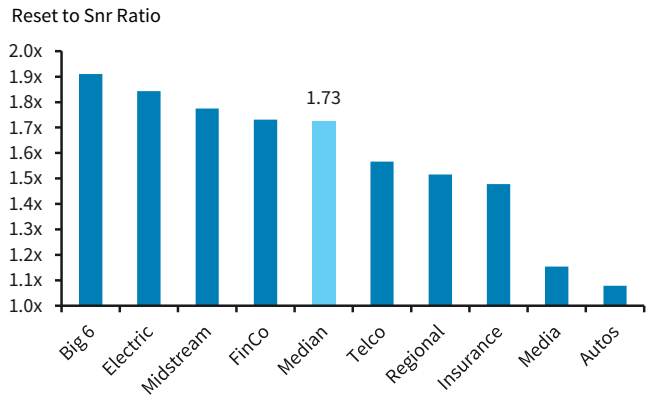
Amid the turmoil, extension risks have come back into focus. One way to assess extension risk is to look at reset-to-senior ratios, with the senior bond likely being a long-dated issue for the same credit. Across the hybrid/pref universe, the average ratio of reset spread over long-dated senior spread is 1.73x, with Big 6 bank prefs having the highest average ratio, followed by electric utilities (Figure 3). We think of reset-to-senior ratios above 1.9x as having limited extension risk and those below 1.5x as having a relatively large risk of extension.

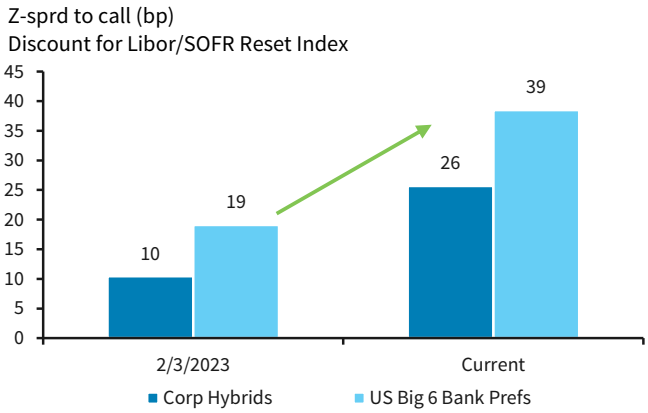
Using the reset spread over a senior long spread is a reasonable proxy for extension risk. In our view, this ratio can be thought of as cheap cost of capital when the ratio is low and expensive when high. In the US, the average cost of equity (excluding financials) is 11-12%,[1] whereas the average cost of debt is 5-6%, or 4.0-4.5% tax-adjusted. Therefore, for a 50/50 debt/equity blend, cost of capital is about 8.5% (or 7.8% using after-tax cost of debt). Looking at this cost of capital versus senior debt implies a range of 1.5x to 1.9x: The 1.5x ratio corresponds



[1] https://pages.stern.nyu.edu/~adamodar/pc/datasets/wacc.xls

to 8.5% versus 5.5% cost of debt, and the 1.9x ratio corresponds to 7.80% versus 4.25% cost of debt.

Therefore, in theory, the natural range for the cost of a hybrid security should be 1.5-1.9x what senior debt costs an issuer, to be equivalent to the cost/value of the capital treatment investors are receiving.



If the cost is below 1.5x, the issuer is receiving value for leaving the hybrid outstanding (ie, there is incentive to extend). If it is above 1.9x, the issuer is paying too much for the hybrid relative to its capital treatment, so it makes more sense to redeem. The current average ratio is exactly in the middle of this range at 1.73x.

FIGURE 3. Reset/senior ratio by sector

Source: Bloomberg, Barclays Research

FIGURE 4. Discount for the Libor/SOFR reset index has risen

Note: Model was run on securities with at least 1.5 years to call.
Source: Bloomberg, Barclays Research

The discount for Libor/SOFR reset indices has increased. Running a multi-factor regression[2] to explain a hybrid/pref z-spread (to call), we find that there is a discount for Libor/SOFR-based reset indices compared with constant-maturity 5y, 7y, or 10y indices. At the beginning of February, this discount was relatively small: 10bp for corporate hybrids and 19bp for US Big 6 bank preferreds. It has now increased by about 15bp for non-bank corporate hybrids and by 20bp for US bank preferreds (Figure 4). This implies a greater flight to safety from hybrid investors as extension risk concerns have increased post-SVB.

In our view, the increased compensation for Libor/SOFR-based structures creates an opportunity to pick up spread/yield in structures that have a high probability of being called, therefore eliminating uncertainty about the shape of the yield curve. The CNP 6.125% perps trade discussed below and C 5% perps are both prime examples.

In financials, we prefer Big 6 bank preferreds to regionals. On average, the Big 6 perps have a relatively high reset-to-senior ratio of 1.9x (implying lower extension risk), while the average for regional bank perps is much lower at 1.5x. Therefore, we view extension risk as too elevated broadly, although we highlight some attractive single-name trades below.

The auto, electric utility, and midstream sectors are trading toward the wide end of the range relative to seniors. Figure 5 highlight aggregate sector-level metrics. While autos trade relatively wide to call, extension risk is greater in the sector, with a 1.08x reset/senior ratio on average, and it is inherently exposed to the economic cycle. Therefore, we prefer midstream

[2] Multifactor regression was run on all non-bank corporate hybrids with more than 1.5 years to call, using reset spread, reset index, ratings, senior spreads, and years to call as inputs to explain z-spread to call. We then ran a similar regression for Big 6 preferreds.

and electric utility hybrids given higher resets (relative to senior spreads) and higher spread ratios to seniors when priced to maturity/perpetuity.

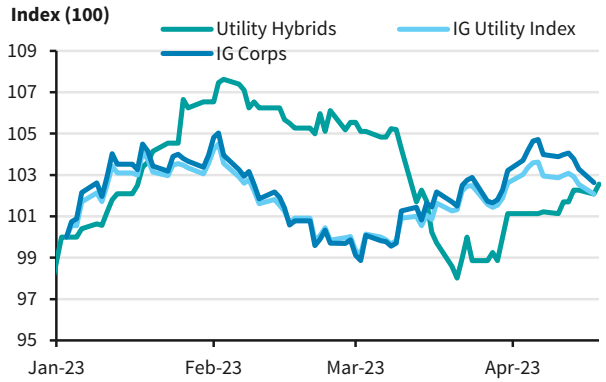
Power & Utilities - Srinjoy Banerjee

With Edison International (EIX 8.125% 2053s) and NRG Energy (NRG 10.250% perps) issuing hybrids in 1Q22, we believe that the power & utility sector, in general, will continue to evaluate hybrid issuance as a core part of its financing plans, largely for the purposes of obtaining equity credit to preserve ratings. For EIX, hybrid issuance is being utilized to preserve metrics as the company continues to pay for 2017/18 wildfire liabilities. For NRG, hybrid issuance was largely to fund M&A. Hybrid issuance to support funding for elevated capex plans has not been a feature this year, with companies instead turning to capital rotation, and we expect reliance on hybrids to persist as the sector continues to target elevated capex/high-single digit rate base growth. With the NI 5.650% perps (callable June 15, 2023) and CNP 6.125% perps (callable September 1, 2023) callable this year and, in our view, likely to be called, we see scope for further hybrid issuance in the sector.



With valuations coming under pressure in recent weeks (Figure 6 and Figure 7), we like hybrids with relatively short-dated calls and with a higher probability of call due to 1) a loss of equity credit, and/or 2) a high reset that would make it more attractive to call and replace the hybrid, and/or 3) a lack of need for the hybrid. We also consider the relative ratio between a company's hybrids and its unsecured notes (or those of the closest comp if more relevant).

FIGURE 6. Utility hybrid performance versus equities

Source: Barclays Research

FIGURE 7. Utility hybrid performance versus credit

Source: Barclays Research

Trade idea - Buy NI 5.650% perps

- The NiSource hybrids are callable on June 15, 2023, and have a discrete call schedule (the following call is in June 2028). The hybrids lose equity credit at S&P on the first call date because of a cumulative 100bp coupon step in 2043. The hybrids have intent-to-replace language in the docs. We expect NiSource to evaluate refinancing the $400mn hybrids in order to maintain the equity cushion they currently provide (~30bp FFO/debt; FY22 FFO/debt was 14.4%, versus a downgrade threshold of 13%; management target 14-15%). With a reset spread of (284bp) about 1.8x that of NiSource 30y unsecureds, along with the loss of equity credit, we think management would prefer to replace rather than keep the perps outstanding.

- NiSource is looking to sell a minority stake sale of NIPSCo (expected to close by year-end 2023); it has indicated that use of proceeds will include the $900mn preferred equity. Otherwise, we expect proceeds to prioritize near-term maturities (~$1bn term loan maturing 2023), offsetting other capex-related issuance needs.

Trade idea - Buy CNP 6.125% perps

- The CNP hybrids are callable at par from September 1, 2023. While these hybrids do not lose equity credit, we think the economic decision is relatively clear for CNP, given a reset of 327bp (assumed coupon of 8.53%). Given that weaker-rated EIX was able to fund a hybrid at 8.125%, we assume that CNP would be able to refinance at a better rate (in unsecureds, CNP is quoted around 60bp tight to EIX).

- The CNP hybrids were issued to help fund the Vectren acquisition, and we think CNP has made substantial progress in improving its credit profile since. We estimate that the CNP hybrids provide about 50bp of FFO/debt cushion, and with FFO of 15% 100-200bp above downgrade thresholds, we think that the cushion is supportive, but not essential to maintain ratings.

Trade idea - Buy EMACN 6.750% 2076s

- We believe that outstanding concerns about Emera's ability to maintain its investment grade unsecured ratings have eased following the Nova Scotia rate case outcome, despite government intervention. The pathway to 12% FFO/debt remains unclear, though we think this is more relevant for the Moody's rating. That said, we think that a one-notch credit rating downgrade at Moody's is less meaningful for the already high yield-rated hybrids (rated Ba2 Neg/BB+ Neg/BB+ Neg). We expect FFO/debt to continue to improve from depressed FY22 levels (7%), supported by deferred fuel cost recovery, as well as about C$205mn of net incremental cash flow in 2022. This would mean run-rate FFO/debt at around 11.5% (above S&P's current threshold of 10%, but short of Moody's threshold for a Baa3 unsecured rating of 12%).

- We also believe there is a high probability that the Emera hybrids will be called at the first opportunity (June 2026), with a reset of 544bp (or 1.8x the 30y senior unsecured spread). The Emera hybrids would also lose S&P equity credit at that date, providing further incentivize for a call: the hybrids offer a 55bp FFO/debt benefit. At 8.6% yield to the June 2026 call, the Emera hybrids screen relatively attractive to our high yield utility universe (e.g, single-B rated CPN unsecured 2028s are quoted at 8.5% to the March 2026 call, or 7.2% to March 2028 maturity).

Trade idea - Sell EIX 8.125% 2053s, Buy EIX 5.000% Perps

- We view the newly issued EIX 8.125% 2053s less attractive than the outstanding EIX 5.000% perps. The EIX 5.000% perps are offered at a 8% yield to first call (December 2026), which is the call date preceding their loss of equity credit in March 2027 (given a cumulative 100bp

coupon step in 2047). Given that EIX has utilized hybrid issuance to help keep FFO/debt above 15% (the 5% perps are worth ~20bp right now; with FFO/debt thinly positioned versus their 15% downgrade threshold at S&P). The 8.125% 2053s are quoted at a 7.3% yield to first call (March 2028), but the loss of equity credit would not occur until 2033 (ie, 20 years before maturity). The reset on the EIX 8.125% 2053s and the EIX 5.000% perps is similar (386.4bp versus 390.1bp). Finally, we prefer the low dollar price of the EIX holdco hybrids through the traditional fire season period (albeit, likely delayed this year, see: PCG - Delayed 2023 Fire Season Offers Relief, but Mitigation Work Continues, April 17, 2023).

- Through the first call period for the two EIX hybrids, we expect to gain clarity on the company's ability to recover 2017-18 wildfire claims ($6bn). EIX has been funding claims as short-term debt on the opco balance sheet, and even partial recovery would support a substantial improvement in credit metrics (~300-350bp), a potential credit positive for the structure.

Financials - Peter Troisi

Hybrids serve different purposes for financials

Financials are the largest issuers of hybrids, but the securities serve different purposes depending on issuer type. Banks, on the one hand, issue hybrids primarily for regulatory purposes. In particular, they issue perpetual preferreds to fill Additional Tier 1 (AT1) capital needs. The regulatory threshold for AT1s at US banks is 1.5% of risk-weighted assets (RWAs), and accordingly, banks optimize the amount of preferreds they have outstanding to this standard.

US-domiciled insurance companies,[3] on the other hand, issue hybrids primarily for rating agency purposes. Hybrids issued by insurance holding companies in the US do not receive regulatory credit. As a result, the way that US insurers approach the hybrids market is similar to non-financial entities, ie, the value hybrids have to insurers is mainly in the equity credit assigned by rating agencies.

For banks, the binding constraint on hybrid structure and fit within the capital structure is their regulatory treatment. However, for US insurers, the binding constraint is the rating agencies, namely S&P. Each agency assigns different levels of equity/capital credit to insurance hybrids (see this report for more detail), but S&P is the most generous. Therefore, US insurers optimize hybrids to the S&P hybrid methodology.

In general, the S&P criteria grant 100% capital credit to hybrids (eg, subs, junior subs, preferreds) as long as two conditions are met:

- The sum of all hybrids in the structure is less than 15% of the insurer's total capital. The 15% cap is under review by S&P, but we do not expect it to change materially, and any change would not affect the 100% equity treatment standard (see First Impressions: S&P's Proposed Capital Model Changes);
- For dated subordinated debt, the security has at least 20 years of remaining tenor prior to its legal final maturity. In other words, S&P grants 100% equity credit to hybrids issued by US insurers until they reach 20 years prior to their effective maturity date (pursuant to a slight tweak made in 2019 to S&P's rules, see this report).

[3] Hybrids issued by Bermuda-based insurers are given some regulatory credit because the regulatory rules there are different in the US.

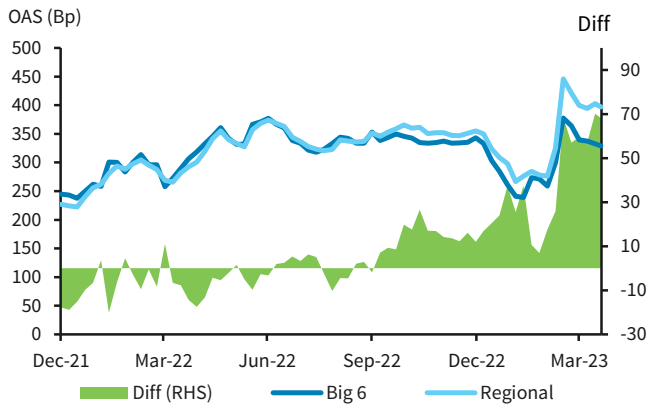
Call dates are not always optimized to the S&P rules for insurers

If insurers fully optimized to S&P's methodology, the call date in their hybrids would align with the point at which they lose equity credit, 20 years prior to maturity. After that date, hybrids no longer receive 100% equity credit and are treated 100% as debt, which in many cases would be inefficient because hybrids typically have higher coupons than senior debt. For this reason, many hybrids issued by US insurers are structured as 30NC10s, for example. However, some issuers opt for an earlier call date for additional financial flexibility. Below, we evaluate one of these structures that we think is attractively priced.

Trade idea - Buy CRBG 6.875% 2052s

CRBG 6.875% 2052 (Baa3/BBB-/BBB-) is a 30NC5 hybrid, yielding 9.6% ($90.5) to its 2027 call, or a z-spread of about +590bp. This compares with its 30y senior bonds (4.4% of 2052) quoted at z+285bp. With the spread ratio above 2x, the security is pricing in extension risk, reflecting the additional five years of S&P capital credit after the call date in 2027. Priced to the date of equity treatment loss, the yield is still 8.7% and the z-spread is +524bp.

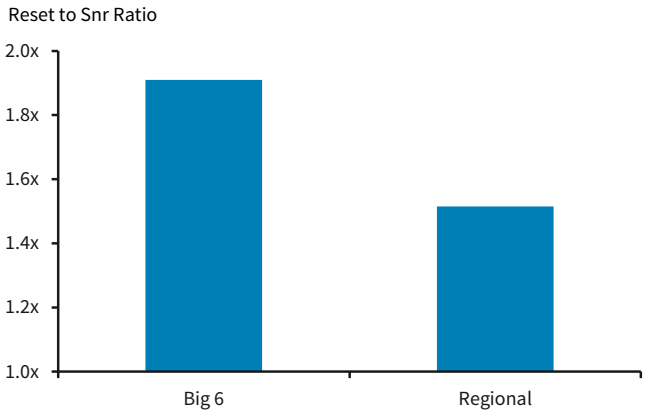
CRBG is a relatively new credit to the investment grade market following its initial separation from AIG (see Good news at the 'core' for bondholders). The 2052s were its debut offering in the hybrid market and continue to carry a spread discount because of its lack of a track record as a stand-alone credit, in our view. We expect the company's credit valuations to improve as a function of time, particularly given its solid fundamental profile. CRBG is a large, diversified life insurer with solid regulatory capitalization and moderate leverage. In our view, its combination of diversification and scale is rivaled only by higher-rated credits such as MET and PRU.



If we are correct in our view about the market's increased comfort with CRBG as a stand-alone credit, its hybrid spreads should be tighter by their call date in 2027 than they are now. The coupon on the CRBG 2052s resets at the constant-rate 5y UST plus 3.846% starting in 2027. We do not believe that spread is low enough to compensate for the loss of S&P equity credit the security would suffer in its final 25 years. **As a result, we recommend buying CRBG 6.875% 2052s.**

One risk to the trade is the likelihood of additional hybrid issuance from CRBG. The company expects to repay $1.5bn of legacy unsecured bank debt with proceeds from the issuance of new hybrids. That said, it does not face imminent pressure to execute the refinancing because the term loan does not mature until February 2025.

Despite wider spreads, not all regional preferreds look attractive



Most preferreds issued by banks sold off following the failures of SVB and emergency merger of UBS and CS. In the US, regional bank preferred spreads have underperformed the Big 6 (Figure 9), driving the basis to about 70bp, reversing the historical relationship. However, the median ratio of reset spread to senior spread in regional preferreds is only about 1.5x, compared with 1.9x for the Big 6 (Figure 10). This suggests that the decompression, broadly speaking, was warranted. On a more granular basis, though, we see select opportunities in regional bank preferreds.

FIGURE 9. **Regionals have underperformed the Big 6**

Source: Bloomberg, Barclays Research

FIGURE 10. **Reset-to-senior ratio**

Source: Bloomberg, Barclays Research

Trade idea - Buy CFG 5.65% perp NC5s (series F)

CFG 5.65% preferreds yield 10% to their 2025 call at $91. The securities have a relatively high reset spread of +531bp, which is about 2.0x its senior spreads. We think the market is pricing in too much extension risk for the preferreds. CFG reported 1Q23 earnings earlier this week that were relatively stable. Its net interest margin (NIM) was unchanged at 3.30%, and asset quality remains sound, with a low net charge-off ratio of 34bp as of 1Q23. CFG's aggregate exposure to commercial real estate (CRE) lending is comparable to peers, and the performance of its portfolio through the Global Financial Crisis was better than several other regionals, suggesting solid underwriting acumen (see HG Banks: Qualifying the CRE Discussion).

Liquidity pressure on banks from deposit volatility has dissipated, and their capital positions remain strong. We expect banks, particularly regionals, to face higher funding costs, as competition for deposits remains high. However, this is an issue that CFG can manage in the context of its earnings capacity, in our view. **We recommend buying CFG 5.65% preferreds.**

Trade idea - Buy C 5.0% perp NC5s (series U)

Citi ended 2022 with five perps totaling $6bn that reach their first call date this year (see US Banks: 2023 Supply Outlook). The three with the earliest call dates (or notice periods) have been extended (Figure 11). The first two extensions occurred prior to the failure of SVB despite seemingly uneconomic reset spreads of L+407bp and L+423bp. We think there is a temporary reason for these non-call decisions. We believe the bank is holding off on making major debt and capital decisions until there is more clarity with regard to its Banamex unit, which is in the process of being sold. We believe that Citi could return to the capital markets to refinance its extended preferreds (or just net redeem them) after it announces a definitive agreement regarding the divestiture of Banamex.

These non-call decisions have priced extension risk across the rest of Citi's preferred structure. Its 5% perps callable in September 2024 reflect this, in our view, trading at $94, or a YTC of 9.7%. The securities have a reset spread of +381bp over SOFR. Although this approximates the weighted average back-end spread of the three perps that have already been extended (+389bp), we believe it would be economic for Citi to call these securities once it has more clarity on Banamex. We expect this to occur before the 2024 call date of the C 5.0% perp NC5s.

FIGURE 11. **Citi perps reaching their first call date in 2023**

Ticker	Original Coupon (%)	Current Coupon (%)	Extended?	Amt. Out ($mn)	Par	First Call Date	Reset Spread (bp)

C	5.9	9.09	Yes	750	1,000	2/15/2023	423.0

The C 5.35s are first callable on May 15, 2023, with 30 days' prior notice. C has not issued a call notice.
Source: Bloomberg, Barclays Research

Energy - Good structures turning good, again - Harry Mateer

In early 2022, we noted (*When Bad Structures Turn Good*, April 7, 2022) that quickly rising front-end rates, relatively anchored senior spreads, and floaters or soon-to-be-floaters trading at a discount (providing negative rates duration) meant that "bad" hybrid structures with near-term, low back-end resets could actually outperform. In general, that proved to be the case, with some securities also benefiting from investors' pricing in a higher call probability as the Fed raised rates more quickly than originally expected.

Since our last quarterly report on corporate hybrids, senior spreads have widened, moving reset/senior ratios lower and increasing extension risk across the group. As discussed above, we generally view reset-to-senior spread ratios outside of a 1.5-1.9x band (governed by relative costs of capital) as indicative of lower (above 1.9x) and higher (below 1.5x) extension risk, with the median midstream figure currently at 1.7x. However, this is somewhat misleading given that some hybrids, such as many of those issued by TC Energy (TRPCN) and Enbridge (ENBCN), include structural nuances that make redemption at the first call more likely.

With US rates futures currently pricing an end to Fed rate hikes in June 2023 and Barclays Economics estimating negative GDP growth for several quarters later this year, we think that investors could re-attach value to better hybrid/perpetual structures, namely resets with higher back ends and those that benchmark off the constant maturity five-year (CMT).

Within the Energy Transfer (ET) complex, several perps have moved to trading at a spread ratio of more than 2.0x to senior bonds, a level that we consider attractive and at the wides (on a ratio basis) of the past year. Within the group, **we recommend buying the ET 6.5% series H perps**, with a 2.3x reset-to-senior ratio, a CMT+569bp back end, and a 9.8% yield to perp (+330bp spread pickup to senior, or a 2.1x ratio). Against these, **we recommend selling the ET 6.625% series B perps**, which have a 1.4x reset-to-senior ratio and a L+415bp back end.

With respect to ET's floating-rate perps, our view is that the partnership has capacity to redeem some hybrids without violating S&P's criteria for equity credit on outstandings, although we expect near-term redemption activity to be focused on $25 par perps that have higher resets (see *S&P Update on Hybrids Could Open Redemption Door a Bit Wider*, March 7, 2023) rather than the $1,000 pars.

Since the beginning of the year, TC Energy's hybrids have been notable laggards, versus both the overall midstream cohort and its closest comp, Enbridge. We view this as warranted in light of TRPCN's weaker credit metrics and ratings pressure, with negative outlooks at Moody's and S&P on the company's high-BBB senior ratings. However, the underperformance has been entirely driven by widening senior spreads, with the spread differential between hybrids and senior relatively unchanged since the beginning of the year.

With a two-notch ratings differential between senior and hybrid ratings at TRPCN, we see risk that TC Energy's hybrid ratings could move to high yield if the senior ratings fall to mid-BBB. On that basis, we would expect the subordination premium for TRPCN's hybrids to widen rather than stay constant. Although TRPCN is working on asset sales to accelerate its leverage improvement, we think there is execution risk due to the magnitude of its plan; TC Energy has guided for at least C$5bn of divestitures, and we estimate that it needs at least C$10bn to meaningfully improve its leverage. See *Ratings Pressure Happens Gradually, Then Suddenly* (March 22, 2023).

Given our view that the loss of equity capital treatment at S&P after the first call date is likely to motivate TRPCN to call its hybrids, we recommend reducing exposure to hybrids with longer-dated calls that are further away from a potential par redemption. **We recommend selling the TRPCN 5.6% 2082s**, with just a 213bp spread pickup over senior and a first call date in 2031. **For investors who are concerned about being underexposed into a potentially successful asset sale program, we recommend pairing the 5.6% 2082s against TC Energy's senior 5.1% 2049s, to isolate the subordination premium part of the trade.**

Pricing of hybrid/preferred and senior securities reflects bid-side levels.
Source: Barclays Research

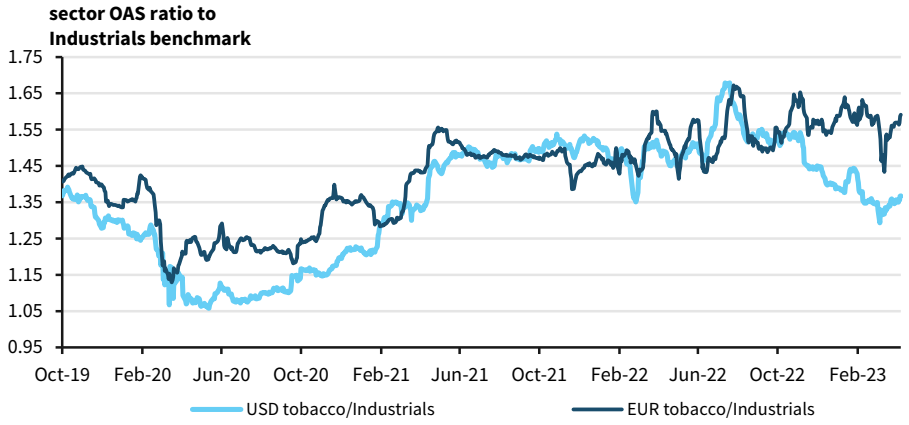
Within aerospace & defense, General Electric and Textron are the only corporates with hybrid/preferred bonds outstanding, and both have already reset and are floating. Although the TXT hybrids lost equity credit last year, we see little incentive for the company to call them at this point given the low reset spread, though they do screen as fairly attractive relative to the TXT 2031s at almost three times the spread. On the other hand, **we recommend buying the GE preferreds,** which are likely to be retired in the next 12 months, in our view. At L+333bp, the preferreds carry a 8.6% dividend, or 10.1% on a tax-adjusted basis when compared with senior notes, making them GE's largest and most expensive debt security outstanding. The company retired about half of the tranche earlier this year, but equity credit was preserved at the agencies because of the nature of the GE Healthcare transaction. However, our model suggests that GE has an ability to maintain BBB+ credit ratings after spinning its Power/Renewable business in early 2024, making the equity credit less valuable (for background, see our update from 1Q). With significant cash inflows in the next 12 months (proceeds from GE Healthcare + AerCap), we see a high likelihood that the remaining balance will be retired around the time of spin. Although already trading at par, we view the preferreds as an attractive one-year (or less) carry trade.

Within autos, the hybrid universe is limited to General Motors Financial (GMF), which has three preferreds outstanding. Among these, the 5.7% preferreds offer the best structure. They reset against a constant Treasury index and carry a high reset spread (500bp), making a call highly likely, in our view. That said, the market is ascribing a premium to the 5.7s relative to the GMF 5.75s and 6.5s, which reference LIbor/SOFR and reset at lower spreads (344-360bp). The 5.7% preferred still offer attractive yield pickup over comparable GM/GMF 2030 notes (approximating first call) and GM's long end; however, the spread ratios are on the lower end of the broader hybrid landscape. Moreover, investors are unlikely to gravitate toward junior subordinated paper in the current auto environment, especially with the reset/call still seven years away.

Telecom, Media, and Technology - Sandeep Gupta

Trade idea - Buy PARA 2062s, as equity treatment falls away on call date

We recommend that investors buy PARA 2062s, as we believe the notes are likely to be called in 2027, as equity treatment will go away on the call date and the senior notes will become a more attractive financing option. The current 2027 senior notes trade at a spread of 175bp, compared with the reset, which would be 400bp over the 5y Treasury. S&P considers the effective maturity of the 2062s to be 2047 because the interest rate structure has step-ups in the fixed component, implying that the notes will lose their equity credit in 2027 (20 years before the effective maturity). At a price of $84.46, the current yield to call is 11.37%. PARA 6.25 2057s also become callable in 2027; however, the S&P equity credit will remain until 2037. We expect the company to value the equity credit and not call these notes.



Recent performance

Over the past three months, PARA senior 2050s have performed in line with the 2062s, while the 2057s are almost 200bp wider. This decreased the 2062s' hybrid/senior ratio from 2.5x to 2.4x over the same period.

Tobacco - Priya Ohri-Gupta

As highlighted recently in HG Tobacco: Too much defense, not enough ESG; Lower to UW, we recommend that investors look for opportunities to rotate exposure in the tobacco sector to EUR. In this vein, we view the BATSLN hybrids as an attractive way to pick up spread within the sector, particularly since we have an Overweight rating on BATSLN. The BATSLN hybrids (EUR3.0 2026 perps and EUR3.75 2029 perps) offer compelling pickup both compared with similar-tenor EUR senior unsecureds (Figure 15) and relative to USD bonds on a hedged basis (Figure 16), with a EUR pickup of up to 500bp and a USD pickup of up to 630bp.

FIGURE 14. Given divergence in valuations within tobacco, we recommend rotating from USD to EUR

USD inclusive of 144A.

While the credit ratings agencies typically account for these securities as 50-50 debt-equity, in accordance with IFRS standards, BATS classifies them as full equity on its balance sheet. Because of their subordinated nature, hybrid notes can come with a two-notch lower ratings differential – in the case of BATS, the hybrids are rated Ba1/BBB-/BB+; that said, with Fitch recently revising its outlook on the credit to Positive, we think that a future upgrade would push the rating on these notes up as well, such that they would have two investment grade ratings potentially within the next 12 months.

That said, while the instruments initially receive 50% equity credit from the rating agencies, there is a strong incentive to call and/or replace hybrids at the first call date, as not doing so would cause the instruments to be fully treated as debt by S&P, and the coupon would also reset higher. The first call date for the EUR3 2026 perp is September 2026, and for the EUR3.75 2029 perp, it is June 2029. There is also typically reputational risk associated with a non-call event.

In such a non-call event, the loss of equity consideration from the agencies would essentially make the securities expensive senior debt. At the call date, the coupon on the NC5.25s would reset to 337.2bp, with the NC8s resetting to 395.2bp + EUSA5 at first call. Currently, the EUSA5 is at 324bp, implying that if they were to reset now, the coupons would jump to the mid-6% to

low-7% range. Comparatively, the credit's USD intermediates are yielding in the high-5%/low-6% area and the 8y EUR bonds are in the mid-5% range.

T: Barclays Bank PLC and/or an affiliate is providing investor engagement services to this issuer.

U: The equity securities of this Canadian issuer include subordinate voting restricted shares.

V: The equity securities of this Canadian issuer include non-voting restricted shares.

Explanation of the Barclays Research Corporate Credit Sector Rating System

Overweight (OW):
For sectors rated against the Bloomberg U.S. Credit Index, the Bloomberg Pan-European Credit Index, the Bloomberg EM Asia USD High Grade Credit Index or the Bloomberg EM USD Corporate and Quasi-Sovereign Index, the analyst expects the six-month excess return of the sector to exceed the six-month excess return of the relevant index.

For sectors rated against the Bloomberg U.S. High Yield 2% Issuer Capped Credit Index, the Bloomberg Pan-European High Yield 3% Issuer Capped Credit Index excluding Financials, the Bloomberg Pan-European High Yield Finance Index or the Bloomberg EM Asia USD High Yield Corporate Credit Index, the analyst expects the six-month total return of the sector to exceed the six-month total return of the relevant index.

Market Weight (MW):
For sectors rated against the Bloomberg U.S. Credit Index, the Bloomberg Pan-European Credit Index, the Bloomberg EM Asia USD High Grade Credit Index or the Bloomberg EM USD Corporate and Quasi-Sovereign Index, the analyst expects the six-month excess return of the sector to be in line with the six-month excess return of the relevant index.

For sectors rated against the Bloomberg U.S. High Yield 2% Issuer Capped Credit Index, the Bloomberg Pan-European High Yield 3% Issuer Capped Credit Index excluding Financials, the Bloomberg Pan-European High Yield Finance Index or the Bloomberg EM Asia USD High Yield Corporate Credit Index, the analyst expects the six-month total return of the sector to be in line with the six-month total return of the relevant index.

Underweight (UW):
For sectors rated against the Bloomberg U.S. Credit Index, the Bloomberg Pan-European Credit Index, the Bloomberg EM Asia USD High Grade Credit Index or the Bloomberg EM USD Corporate and Quasi-Sovereign Index, the analyst expects the six-month excess return of the sector to be less than the six-month excess return of the relevant index.

For sectors rated against the Bloomberg U.S. High Yield 2% Issuer Capped Credit Index, the Bloomberg Pan-European High Yield 3% Issuer Capped Credit Index excluding Financials, the Bloomberg Pan-European High Yield Finance Index or the Bloomberg EM Asia USD High Yield Corporate Credit Index, the analyst expects the six-month total return of the sector to be less than the six-month total return of the relevant index.

Sector definitions:
Sectors in U.S. High Grade Research are defined using the sector definitions of the Bloomberg U.S. Credit Index and are rated against the Bloomberg U.S. Credit Index.

Sectors in U.S. High Yield Research are defined using the sector definitions of the Bloomberg U.S. High Yield 2% Issuer Capped Credit Index and are rated against the Bloomberg U.S. High Yield 2% Issuer Capped Credit Index.

Sectors in European High Grade Research are defined using the sector definitions of the Bloomberg Pan-European Credit Index and are rated against the Bloomberg Pan-European Credit Index.

Sectors in Industrials and Utilities in European High Yield Research are defined using the sector definitions of the Bloomberg Pan-European High Yield 3% Issuer Capped Credit Index excluding Financials and are rated against the Bloomberg Pan-European High Yield 3% Issuer Capped Credit Index excluding Financials.

Sectors in Financials in European High Yield Research are defined using the sector definitions of the Bloomberg Pan-European High Yield Finance Index and are rated against the Bloomberg Pan-European High Yield Finance Index.

Sectors in Asia High Grade Research are defined on Barclays Live and are rated against the Bloomberg EM Asia USD High Grade Credit Index.

Sectors in Asia High Yield Research are defined on Barclays Live and are rated against the Bloomberg EM Asia USD High Yield Corporate Credit Index.

Sectors in EEMEA and Latin America Research are defined on Barclays Live and are rated against the Bloomberg EM USD Corporate and Quasi Sovereign Index. These sectors may contain both High Grade and High Yield issuers.

To view sector definitions and monthly sector returns for Asia, EEMEA and Latin America Research, go to https://live.barcap.com/go/research/EMSectorReturns on Barclays Live.

Explanation of the Barclays Research Corporate Credit Rating System

For all High Grade issuers covered in the US, Europe or Asia, and for all issuers in Latin America and EEMEA, the credit rating system is based on the analyst's view of the expected excess return over a six-month period of the issuer's index-eligible corporate debt securities* relative to the expected excess return of the relevant sector, as specified on the report.

Overweight (OW): The analyst expects the six-month excess return of the issuer's index-eligible corporate debt securities to exceed the six-month expected excess return of the relevant sector.

Market Weight (MW): The analyst expects the six-month excess return of the issuer's index-eligible corporate debt securities to be in line with the six-month expected excess return of the relevant sector.

Underweight (UW): The analyst expects the six-month excess return of the issuer's index-eligible corporate debt securities to be less than the six-month expected excess return of the relevant sector.

Rating Suspended (RS): The rating has been suspended temporarily due to market events that make coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Investment Bank of Barclays Bank PLC is acting in an advisory capacity in a merger or strategic transaction involving the company.

Coverage Suspended (CS): Coverage of this issuer has been temporarily suspended.

Not Covered (NC): Barclays' fundamental credit research team does not provide formal, continuous coverage of this issuer and has not assigned a rating to the issuer or its debt securities. Any analysis, opinion or trade recommendation provided on a Not Covered issuer or its debt securities is valid only as of the publication date of this report and there should be no expectation that additional reports relating to the Not Covered issuer or its debt securities will be published thereafter.

For all High Yield issuers (excluding those covered in EEMEA or Latin America), the credit rating system is based on the analyst's view of the expected total returns over a six-month period of the rated debt security relative to the expected total return of the relevant sector, as specified on the report.

Overweight (OW): The analyst expects the six-month total return of the debt security subject to this rating to exceed the six-month expected total return of the relevant sector.

Market Weight (MW): The analyst expects the six-month total return of the debt security subject to this rating to be in line with the six-month expected total return of the relevant sector.

Underweight (UW): The analyst expects the six-month total return of the rated debt security subject to this rating to be less than the six-month expected total return of the relevant sector.

Rating Suspended (RS): The rating has been suspended temporarily due to market events that make coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Investment Bank of Barclays Bank PLC is acting in an advisory capacity in a merger or strategic transaction involving the company.

Coverage Suspended (CS): Coverage of this issuer has been temporarily suspended.

Not Covered (NC): Barclays' fundamental credit research team does not provide formal, continuous coverage of this issuer and has not assigned a rating to the issuer or its debt securities. Any analysis, opinion or trade recommendation provided on a Not Covered issuer or its debt securities is valid only as of the publication date of this report and there should be no expectation that additional reports relating to the Not Covered issuer or its debt securities will be published thereafter.

Where a recommendation is made at the issuer level, it does not apply to any sanctioned securities, where trading in such securities would be prohibited under applicable law, including sanctions laws and regulations.

*In EEMEA and Latin America (and in certain other limited instances in other regions), analysts may occasionally rate issuers that are not part of the Bloomberg U.S. Credit Index, the Bloomberg Pan-European Credit Index, the Bloomberg EM Asia USD High Grade Credit Index or Bloomberg EM USD Corporate and Quasi Sovereign Index. In such cases the rating will reflect the analyst's view of the expected excess return over a six-month period of the issuer's corporate debt securities relative to the expected excess return of the relevant sector, as specified on the report.

Distribution of ratings assigned by Barclays Corporate Credit Research at the issuer level:
27% have been assigned an Overweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Buy rating; 63% of issuers with this rating category are investment banking clients of the Firm; 84% of the issuers with this rating have received financial services from the Firm.

49% have been assigned Market Weight rating which, for purposes of mandatory regulatory disclosures, is classified as a Hold rating; 67% of issuers with this rating category are investment banking clients of the Firm; 84% of the issuers with this rating have received financial services from the Firm.

24% have been assigned an Underweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Sell rating; 63% of issuers with this rating category are investment banking clients of the Firm; 81% of the issuers with this rating have received financial services from the Firm.

Distribution of ratings assigned by Barclays Corporate Credit Research at the bond level:
32% have been assigned an Overweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Buy rating; 48% of bonds with this rating category are investment banking clients of the Firm; 74% of the issuers with this rating have received financial services from the Firm.

48% have been assigned Market Weight rating which, for purposes of mandatory regulatory disclosures, is classified as a Hold rating; 50% of bonds with this rating category are investment banking clients of the Firm; 70% of the issuers with this rating have received financial services from the Firm.

20% have been assigned an Underweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Sell rating; 37% of bonds with this rating category are investment banking clients of the Firm; 61% of the issuers with this rating have received financial services from the Firm.

Explanation of the Barclays EM Sovereign Credit Issuer Rating System
Overweight (OW):
The analyst expects the six-month excess return of the country's index eligible bonds to exceed the six-month excess return of the Bloomberg EM USD Sovereign Index.

Market Weight (MW):
The analyst expects the six-month excess return of the country's index eligible bonds to be in line with the six-month excess return of the Bloomberg EM USD Sovereign Index.

Underweight (UW):
The analyst expects the six-month excess return of the country's index eligible bonds to be less than the six-month excess return of the Bloomberg EM USD Sovereign Index.

Rating Suspended (RS):
The rating has been suspended temporarily due to market events that make coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Investment Bank of Barclays Bank PLC is acting in an advisory capacity.

Distribution of ratings assigned by Barclays Emerging Markets Sovereign Research at the issuer level:
41% have been assigned an Overweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Buy rating; 7% of issuers with this rating category are investment banking clients of the Firm; 71% of the issuers with this rating have received financial services from the Firm.

38% have been assigned Market Weight rating which, for purposes of mandatory regulatory disclosures, is classified as a Hold rating; 15% of issuers with this rating category are investment banking clients of the Firm; 85% of the issuers with this rating have received financial services from the Firm.

21% have been assigned an Underweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Sell rating; 14% of issuers with this rating category are investment banking clients of the Firm; 71% of the issuers with this rating have received financial services from the Firm.

Types of investment recommendations produced by Barclays FICC Research:
In addition to any ratings assigned under Barclays' formal rating systems, this publication may contain investment recommendations in the form of trade ideas, thematic screens, scorecards or portfolio recommendations that have been produced by analysts in FICC Research. Any such investment recommendations produced by non-Credit Research teams shall remain open until they are subsequently amended, rebalanced or closed in a future research report. Any such investment recommendations produced by the Credit Research teams are valid at current market conditions and may not be otherwise relied upon.

Disclosure of other investment recommendations produced by Barclays FICC Research:
Barclays FICC Research may have published other investment recommendations in respect of the same securities/instruments recommended in this research report during the preceding 12 months. To view all investment recommendations published by Barclays FICC Research in the preceding 12 months please refer to https://live.barcap.com/go/research/Recommendations.

Barclays does not assign ratings to asset backed securities. Barclays Capital Inc. and/or one of its affiliates may have acted as an underwriter for public offerings of any asset backed securities that are otherwise recommended in trade ideas contained within its securitised research reports.

Disclaimer:
This publication has been produced by Barclays Research Department in the Investment Bank of Barclays Bank PLC and/or one or more of its affiliates (collectively and each individually, "Barclays").

It has been prepared for institutional investors and not for retail investors. It has been distributed by one or more Barclays affiliated legal entities listed below or by an independent and non-affiliated third-party entity (as may be communicated to you by such third-party entity in its communications with you). It is provided for information purposes only, and Barclays makes no express or implied warranties, and expressly disclaims all warranties of merchantability or fitness for a particular purpose or use with respect to any data included in this publication. To the extent that this publication states on the front page that it is intended for institutional investors and is not subject to all of the independence and disclosure standards applicable to debt research reports prepared for retail investors under U.S. FINRA Rule 2242, it is an "institutional debt research report" and distribution to retail investors is strictly prohibited. Barclays also distributes such institutional debt research reports to various issuers, media, regulatory and academic organisations for their own internal informational news gathering, regulatory or academic purposes and not for the purpose of making investment decisions regarding any debt securities. Media organisations are prohibited from re-publishing any opinion or recommendation concerning a debt issuer or debt security contained in any Barclays institutional debt research report. Any such recipients that do not want to continue receiving Barclays institutional debt research reports should contact debtresearch@barclays.com. Unless clients have agreed to receive "institutional debt research reports" as required by US FINRA Rule 2242, they will not receive any such reports that may be co-authored by non-debt research analysts. Eligible clients may get access to such cross asset reports by contacting debtresearch@barclays.com. Barclays will not treat unauthorized recipients of this report as its clients and accepts no liability for use by them of the contents which may not be suitable for their personal use. Prices shown are indicative and Barclays is not offering to buy or sell or soliciting offers to buy or sell any financial instrument.

Without limiting any of the foregoing and to the extent permitted by law, in no event shall Barclays, nor any affiliate, nor any of their respective officers, directors, partners, or employees have any liability for (a) any special, punitive, indirect, or consequential damages; or (b) any lost profits, lost revenue, loss of anticipated savings or loss of opportunity or other financial loss, even if notified of the possibility of such damages, arising from any use of this publication or its contents.

Other than disclosures relating to Barclays, the information contained in this publication has been obtained from sources that Barclays Research believes to be reliable, but Barclays does not represent or warrant that it is accurate or complete. Appearances by Third-Party Speakers: Any views or opinions expressed by third-party speakers during this event are solely those of the speaker and do not represent the views or opinions of Barclays. Barclays is not responsible for, and makes no warranties whatsoever as to, the information or opinions contained in any written, electronic, audio or video presentations by any third-party speakers at the event ("Third-Party Content"). Any such Third-Party Content has not been adopted or endorsed by Barclays and does not represent the views or opinions of Barclays. Third-Party Content is provided for information purposes only and has not been independently verified by Barclays for its accuracy or completeness.

This material, where distributed to persons in Australia, is produced or provided by Barclays Bank PLC.

This communication is directed at persons who are a "Wholesale Client" as defined by the Australian Corporations Act 2001.

Please note that the Australian Securities and Investments Commission (ASIC) has provided certain exemptions to Barclays Bank PLC (BBPLC) under paragraph 911A(2)(l) of the Corporations Act 2001 from the requirement to hold an Australian financial services licence (AFSL) in respect of financial services provided to Australian Wholesale Clients, on the basis that BBPLC is authorised by the Prudential Regulation Authority of the United Kingdom (PRA) and regulated by the Financial Conduct Authority (FCA) of the United Kingdom and the PRA under United Kingdom laws. The United Kingdom has laws which differ from Australian laws. To the extent that this communication involves the provision of financial services by BBPLC to Australian Wholesale Clients, BBPLC relies on the relevant exemption from the requirement to hold an AFSL. Accordingly, BBPLC does not hold an AFSL.

This communication may be distributed to you by either: (i) Barclays Bank PLC directly or (ii) Barrenjoey Markets Pty Limited (ACN 636 976 059, "Barrenjoey"), the holder of Australian Financial Services Licence (AFSL) 521800, a non-affiliated third party distributor, where clearly identified to you by Barrenjoey. Barrenjoey is not an agent of Barclays Bank PLC.

This material, where distributed in New Zealand, is produced or provided by Barclays Bank PLC. Barclays Bank PLC is not registered, filed with or approved by any New Zealand regulatory authority. This material is not provided under or in accordance with the Financial Markets Conduct Act of 2013 ("FMCA"), and is not a disclosure document or "financial advice" under the FMCA. This material is distributed to you by either: (i) Barclays Bank PLC directly or (ii) Barrenjoey Markets Pty Limited ("Barrenjoey"), a non-affiliated third party distributor, where clearly identified to you by Barrenjoey. Barrenjoey is not an agent of Barclays Bank PLC. This material may only be distributed to "wholesale investors" that meet the "investment business", "investment activity", "large", or "government agency" criteria specified in Schedule 1 of the FMCA.

Middle East: Nothing herein should be considered investment advice as defined in the Israeli Regulation of Investment Advisory, Investment Marketing and Portfolio Management Law, 1995 ("Advisory Law"). This document is being made to eligible clients (as defined under the Advisory Law) only. Barclays Israeli branch previously held an investment marketing license with the Israel Securities Authority but it cancelled such license on 30/11/2014 as it solely provides its services to eligible clients pursuant to available exemptions under the Advisory Law, therefore a license with the Israel Securities Authority is not required. Accordingly, Barclays does not maintain an insurance coverage pursuant to the Advisory Law.

This material is distributed in the United Arab Emirates (including the Dubai International Financial Centre) and Qatar by Barclays Bank PLC. Barclays Bank PLC in the Dubai International Financial Centre (Registered No. 0060) is regulated by the Dubai Financial Services Authority (DFSA). Principal

place of business in the Dubai International Financial Centre: The Gate Village, Building 4, Level 4, PO Box 506504, Dubai, United Arab Emirates. Barclays Bank PLC-DIFC Branch, may only undertake the financial services activities that fall within the scope of its existing DFSA licence. Related financial products or services are only available to Professional Clients, as defined by the Dubai Financial Services Authority. Barclays Bank PLC in the UAE is regulated by the Central Bank of the UAE and is licensed to conduct business activities as a branch of a commercial bank incorporated outside the UAE in Dubai (Licence No.: 13/1844/2008, Registered Office: Building No. 6, Burj Dubai Business Hub, Sheikh Zayed Road, Dubai City) and Abu Dhabi (Licence No.: 13/952/2008, Registered Office: Al Jazira Towers, Hamdan Street, PO Box 2734, Abu Dhabi). This material does not constitute or form part of any offer to issue or sell, or any solicitation of any offer to subscribe for or purchase, any securities or investment products in the UAE (including the Dubai International Financial Centre) and accordingly should not be construed as such. Furthermore, this information is being made available on the basis that the recipient acknowledges and understands that the entities and securities to which it may relate have not been approved, licensed by or registered with the UAE Central Bank, the Dubai Financial Services Authority or any other relevant licensing authority or governmental agency in the UAE. The content of this report has not been approved by or filed with the UAE Central Bank or Dubai Financial Services Authority. Barclays Bank PLC in the Qatar Financial Centre (Registered No. 00018) is authorised by the Qatar Financial Centre Regulatory Authority (QFCRA). Barclays Bank PLC-QFC Branch may only undertake the regulated activities that fall within the scope of its existing QFCRA licence. Principal place of business in Qatar: Qatar Financial Centre, Office 1002, 10th Floor, QFC Tower, Diplomatic Area, West Bay, PO Box 15891, Doha, Qatar. Related financial products or services are only available to Business Customers as defined by the Qatar Financial Centre Regulatory Authority.

Russia: This material is not intended for investors who are not Qualified Investors according to the laws of the Russian Federation as it might contain information about or description of the features of financial instruments not admitted for public offering and/or circulation in the Russian Federation and thus not eligible for non-Qualified Investors. NiSource

NI-NYSE	Rating	Price: May-3	Target	Total Rtn
	Outperform	$28.12	$31.00	14%

Less Is More – Quiet Set of Updates

Bottom Line:

NiSource reported a small beat for 1Q23 earnings with operating EPS of $0.77 compared to BMO and street estimates of $0.75/$0.76 respectively. **Management reaffirmed their 2023 non-GAAP diluted net operating earnings per share (NOEPS) guidance of $1.54-$1.60 (BMO/Consensus at $1.54/$1.56) with a midpoint of $1.57.** The company also reaffirmed its 2023-2027 capital program totaling ~$15B, which drives an 8-10% rate base growth and underpins the annual NOEPS growth of 6-8% through 2027. **We reiterate our Outperform rating and $31 target price.**

Key Points

On the electric side, the NIPSCO Electric rate case continues to expect a final order in August. Recently on May 1, NIPSCO and the settling parties filed their proposed order with the IURC.

For the NIPSCO minority interest sale, management noted that there are no changes and that it remains on track to close in 2023. Additionally, management reaffirmed their 14-16% FFO/Debt range with metrics at the top end of the range after the company executes the NIPSCO minority interest sale. Management also reiterated that it does not see any equity needs until 2025 and that any equity needs beyond 2025 would be done via an ATM program. **We view the balance sheet strength represented by the ~300bps cushion above the downgrade threshold expected to be generated in the near term as a significant positive differentiator to peers in the current environment**.

On the call, management was asked about their interest in M&A given current market activity. **In response, management noted they do not comment on market rumors and are primarily focused on deploying $15B in their current plan that drives organic growth**. **Accordingly, it is clear that the organic plan remains the priority and any inorganic growth would require an incredibly high hurdle rate.** That being said, management did remark they would welcome assets with a price tag in the vicinity of ~1x rate base.

We view the lack of material updates as a positive for NiSource in the current environment. **Furthermore, with macroeconomic uncertainty and a lack of conviction remaining, we believe investors will continue to favor de-risked names in the near term with visibility and confidence in the execution of both its capital and financing plan will be the keys to continued re-rating potential for the stock over the next 12-18 months**. **We reiterate our Outperform rating.**

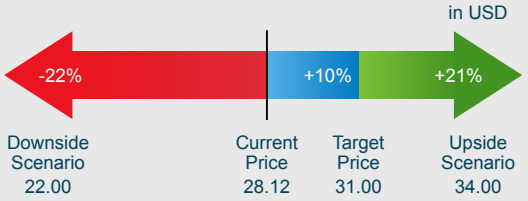
Source: BMO Capital Markets, Company Reports

Scenarios

Valuation



Our target price is the product of a P/E-based sum of the parts. We utilize a regulated-group average multiple using 2025E EPS as base valuation and then make specific adjustments to reflect our current view of the fundamental outlook.

Upside Scenario $34.00

Our upside scenario reflects continued multiple expansion associated with the company's premium and above-average earnings and dividend growth profile, as well as the material improvement in the balance sheet with the successful execution of the minority interest sale in NIPSCO.

Downside Scenario $22.00

Our downside scenario reflects a tightening monetary policy, a deceleration of the company's rate base growth and failure to execute on the sale of a minority interest in NIPSCO to strengthen the balance sheet.

Key Catalysts

Successful execution of both its upcoming NIPSCO Electric rate case as well as sale of a minority interest in its NIPSCO subsidiary by mid-year 2023.

Company Description

NiSource, Inc. is a regulated utility holding company, serving approximately 3.5 million natural gas customers and 500,000 electric customers across seven states. Through its Columbia Gas and NIPSCO brands, it provides natural gas, electricity, and other products and services. The company was founded in 1987 and is headquartered in Merrillville, Indiana.

Glossary

Company Models

Less Is More – Quiet Set of Updates – Focus Remains on NIPSCO Sale and Electric Rate Case

Bottom Line: We view the lack of material updates as a positive for NiSource in the current environment. The company continues to make steady progress on its NIPSCO minority interest (MI) sale as well as the Electric rate case, which supports its long-term growth plan as well as a strong balance sheet. As seen by its YTD outperformance vs its peers, we believe NI has benefited from its de-risked story and expected balance sheet strength over the forecast period. **Furthermore, with macroeconomic uncertainty and a lack of conviction remaining, we believe investors will continue to favor de-risked names in the near term with visibility and confidence in the execution of both its capital and financing plan will be the keys to continued re-rating potential for the stock over the next 12-18 months. We reiterate our Outperform rating and $31 target price.**

NiSource reported a small beat for 1Q23 earnings with operating EPS of $0.77 compared to BMO and street estimates of $0.75/$0.76 respectively. Gas distribution earnings were $73mm higher year over year as net operating revenues were ~$83mm higher, mainly due to new rates resulting from base rate cases in Ohio, Pennsylvania, Indiana, Virginia, and Maryland and regulatory capital programs/trackers in Ohio, Kentucky, and Virginia. Net operating expenses were ~$4mm higher due primarily to higher outside service costs and uncollectible accounts. On the Electric side, operating earnings were $16mm lower as net operating revenues were ~$4mm lower, primarily due to lower weather-normalized customer usage and net operating expenses were ~$7mm higher primarily due to outside service expense related to generation maintenance. **Management reaffirmed their 2023 non-GAAP diluted net operating earnings per share (NOEPS) guidance of $1.54-$1.60 (BMO/Consensus at $1.54/$1.56) with a midpoint of $1.57.** The company also reaffirmed its 2023-2027 capital program totaling ~$15B that drives 8-10% rate base growth and underpins annual NOEPS growth of 6-8% through 2027.

On the electric side, the NIPSCO Electric rate case continues to expect a final order in August. Recently on May 1, NIPSCO and the settling parties filed their proposed order with the IURC, and while there is a possibility of reply briefs in the interim, an order from the commission is expected to be the next significant event in the August time frame. On the renewable generation investments, all of the projects remain on track with the only change being the Fairbanks Solar Project estimated in-service time was refined from 2024-2025 timeframe to 2Q25. Additionally, the company filed a motion to stay the proceeding on the FMCA Trackers for the recovery of costs related to the closure of Michigan City Generating Station's CCR ash ponds and R.M. Schahfer Generating Station's multi-cell unit, pending the outcome of the electric rate case settlement agreement.

On the gas distribution side, the only pending gas rate case is at Columbia Gas of Virginia and the company expects the final order in 2Q23. **Outside of the final order in the NIPSCO electric rate case, we view the regulatory calendar as largely de-risked in the near term**. Additionally, management noted that in 2022, commodity costs represented ~45% of an average residential customer total bill, on the gas side. With natural gas prices declining almost 50%, this significantly reduces the average customer bill, which should provide additional bill headroom to support the company's capital programs.

On the NIPSCO minority interest sale, management noted that there are no changes and that it remains on track to close in 2023. Additionally, management reaffirmed their 14-16% FFO/Debt range with metrics at the top end of the range after the company executes the NIPSCO minority interest sale. Management also reiterated that it does not see any equity needs until 2025 and that any equity needs beyond 2025 would be done via an ATM program with the goal of sustaining FFO/Debt in the 14-16% range. **We view the balance sheet strength represented by the ~300bps cushion above the downgrade threshold expected to be generated in the near term as a significant positive differentiator to peers in the current environment**.

Also, on the call, management was asked about their interest in M&A given current market activity. **In response, management noted that they do not comment on market rumors and are primarily focused on deploying $15B in the company's current plan that drives organic growth. Accordingly, it is clear that the organic plan remains the priority and any inorganic growth would require an incredibly high hurdle rate. That being said, management did remark they would welcome assets with a price tag in the vicinity of ~1x rate base.**

Recently legislative activity in Indiana advanced (HB 1420) and became law, which expanded the ROFR rights for incumbent transmission owners. We believe that this could provide the company with another upside capex opportunity to its 2028-2032 capital plan.

We maintain our Outperform rating and $31 target price given the de-risked regulatory environment, 6-8% EPS growth rate, and the balance sheet strength. Our 2023-2025 estimates remain unchanged at $1.54, $1.67, and $1.78, respectively.

Exhibit 1: NiSource Inc. - Model Summary

NI Model Summary	2020A	2021A	2022A	2023E	2024E	2025E

IMPORTANT DISCLOSURES

Analyst's Certification

I, James M. Thalacker, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Analysts employed by BMO Nesbitt Burns Inc. and/or BMO Capital Markets Limited are not registered as research analysts with FINRA. These analysts may not be associated persons of BMO Capital Markets Corp. and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Company Specific Disclosures

Disclosure 9B: BMO Capital Markets makes a market in NiSource Inc in United States.

Methodology and Risks to Target Price/Valuation for NiSource Inc (NI-NYSE)

Methodology: Our target price is the product of a P/E-based sum-of-the-parts (SOTP) analysis of the company's primary regulated operating companies. We utilize a regulated-group average multiple based on 2025E EPS as our initial basis for valuation and then make adjustments specific to each jurisdiction to reflect our current view of the fundamental outlook.

Risks: NI's regulated profile exposes the company to business risk including but not limited to federal and state regulatory risk, federal and state political risk, environmental policy, interest rate risk, access to capital markets, construction risk, changes in customer demand trends, changes in customer affordability, extreme weather, natural disaster, and equipment failure.

Ratings Key (as of October 2016)

We use the following ratings system definitions:
OP = Outperform - Forecast to outperform the analyst's coverage universe on a total return basis;
Mkt = Market Perform - Forecast to perform roughly in line with the analyst's coverage universe on a total return basis;
Und = Underperform - Forecast to underperform the analyst's coverage universe on a total return basis;
(S) = Speculative investment;
Spd = Suspended - Coverage and rating suspended until coverage is reinstated;
NR = No Rated - No rating at this time; and
R = Restricted - Dissemination of research is currently restricted.

The total return potential, target price and the associated time horizon is 12 months unless otherwise stated in each report. BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small Cap, Income, CDN Quant, and US Quant have replaced the Top Pick rating).

General Disclaimer

"BMO Capital Markets" is a trade name used by BMO Financial Group for the wholesale banking businesses of Bank of Montreal, BMO Harris Bank N.A. (member FDIC), Bank of Montreal Europe p.l.c, and Bank of Montreal (China) Co. Ltd, the institutional broker dealer business of BMO Capital Markets Corp. (Member FINRA and SIPC) and the agency broker dealer business of Clearpool Execution Services, LLC (Member FINRA and SIPC) in the U.S., and the institutional broker dealer businesses of BMO Nesbitt Burns Inc. (Member Investment Industry Regulatory Organization of Canada and Member Canadian Investor Protection Fund) in Canada and Asia, Bank of Montreal Europe p.l.c. (authorised and regulated by the Central Bank of Ireland) in Europe and BMO Capital Markets Limited (authorised and regulated by the Financial Conduct Authority) in the UK and Australia. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents

have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. Nothing herein constitutes any investment, legal, tax or other advice nor is it to be relied on in any investment or decision. If you are in doubt about any of the contents of this document, the reader should obtain independent professional advice. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Additional Matters

This report is directed only at entities or persons in jurisdictions or countries where access to and use of the information is not contrary to local laws or regulations. Its contents have not been reviewed by any regulatory authority. BMO Capital Markets does not represent that this report may be lawfully distributed or that any financial products may be lawfully offered or dealt with, in compliance with regulatory requirements in other jurisdictions, or pursuant to an exemption available thereunder.

To Australian residents: BMO Capital Markets Limited and Bank of Montreal are exempt from the requirement to hold an Australian financial services licence under the Corporations Act in respect of financial services they provide to wholesale investors (as defined in the Corporations Act). BMO Capital Markets Limited is regulated by the UK Financial Conduct Authority under UK laws, and Bank of Montreal in Hong Kong is regulated by the Hong Kong Monetary Authority and the Securities and Futures Commission, which differ from Australia laws. This document is only intended for wholesale clients (as defined in the Corporations Act 2001), Eligible Counterparties or Professional Clients (as defined in Annex II to MiFID II) and Professional Investors (as defined in the Securities and Futures Ordinance and the Securities and Futures (Professional Investor) Rules under the Securities and Futures Ordinance of Hong Kong).

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Colin Hamilton, Alexander Pearce or Raj Ray:

This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and distributed by BMO Capital Markets Limited or Bank of Montreal Europe Plc and is subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom and the Central Bank of Ireland (CBI) in Ireland. FCA and CBI regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore each of BMO Capital Markets Limited and Bank of Montreal Europe Plc will disclose its and its affiliates' ownership interest in the subject issuer only if such ownership exceeds 5% of the equity of the issuer.

To E.U. Residents: In an E.U. Member State this document is issued and distributed by Bank of Montreal Europe plc which is authorised and regulated in Ireland and operates in the E.U. on a passported basis. This document is only intended for Eligible Counterparties or Professional Clients, as defined in Annex II to "Markets in Financial Instruments Directive" 2014/65/EU ("MiFID II").

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to retail clients.

To Hong Kong Residents: In Hong Kong, this report is published and distributed by Bank of Montreal. Bank of Montreal (incorporated in Canada with limited liability) is an authorized institution under the Banking Ordinance and a registered institution with the Securities and Futures Commission (CE No. AAK809) to carry on Type 1 (dealing in securities) and Type 4 (advising in securities) regulated activities under the Securities and Futures Ordinance (Cap 571 of the Laws of Hong Kong). This report has not been reviewed or approved by any regulatory authority in Hong Kong. Accordingly this report must not be issued, circulated or distributed in Hong Kong other than (a) to professional investors as defined in the Securities and Futures Ordinance and the Securities and Futures (Professional Investor) Rules under the Securities and Futures Ordinance of Hong Kong, or (b) in circumstances which do not result in or constitute an offer to the public in Hong Kong.

To Korean Residents: This report has been provided to you without charge for your convenience only. All information contained in this report is factual information and does not reflect any opinion or judgement of BMO Capital Markets. The information contained in this report should not be construed as offer, marketing, solicitation or investment advice with respect to financial investment products in this report.

To Japan Residents: This report has not been reviewed by any regulatory authority in Japan. This report is provided for information purposes only and it should not be construed as an offer to sell, a solicitation to buy, or a recommendation for any security, or as an offer to provide investment management or advisory or other services in Japan. Securities may not be offered or sold in Japan by means of this report or any other document other than to Qualified Financial Institutions within the meaning of item (i) of Article 17-3 of the Government Ordinance to enforce the Financial Instruments and Exchange Act (Kinyu Shohin Torihiki Ho Sekou Rei). Unless specified otherwise, the securities that may be offered to you are not and will not be registered in Japan pursuant to the Financial Instruments and Exchange Acts.

To Taiwanese Residents: This report is not intended to constitute investment advice nor a public offer for any investment products to investors in Taiwan. This report should only be accessed by investors in Taiwan that are qualified to invest in investment products pursuant to relevant Taiwanese laws and regulations, and subject to sales restrictions as set forth in the relevant Taiwanese laws and regulations. BMO Capital Markets has not and will not secure the required licenses in Taiwan for the offer of securities and investment services. Any offer of securities has not been and will not be registered or filed with or approved by the Financial Commission of Taiwan and/or other regulatory authority pursuant to relevant securities laws and regulations of Taiwan, and may not be issued, offered or sold within Taiwan through a public offering or in circumstances which constitute an offer that requires a registration, filing or approval of the Financial Supervisory Commission of Taiwan and/or other regulatory authority in Taiwan under relevant securities laws and regulations of Taiwan. No person or entity in Taiwan has been authorized to offer or sell the securities in Taiwan.

To Singapore Residents: This report is intended for general circulation and does not and is not intended to constitute the provision of financial advisory services, whether directly or indirectly, to persons in Singapore. You should seek advice from a financial adviser regarding the suitability of the investment products, taking into account your specific investment objectives, financial situation or particular needs before you make a commitment to purchase the investment product. This report has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, it should not be circulated or distributed, nor may the securities described herein be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than (a) to an institutional investor or a relevant person as defined in and pursuant to and in accordance with the conditions of the relevant provisions of the Securities and Futures Act of Singapore or (b) otherwise pursuant to and in accordance with the conditions of, any other applicable provision of the SFA.

To Israeli residents: BMO Capital Markets is not licensed under the Israeli Law for the Regulation of Investment Advice, Investment Marketing and Portfolio Management of 1995 (the "Advice Law") nor does it carry insurance as required thereunder. This document is to be distributed solely to persons that are qualified clients (as defined under the Advice Law) and qualified investors under the Israeli Securities Law of 1968. This document represents the analysis of the analyst but there is no assurance that any assumption or estimation will materialize.

These documents are provided to you on the express understanding that they must be held in complete confidence and not republished, retransmitted, distributed, disclosed, or otherwise made available, in whole or in part, directly or indirectly, in hard or soft copy, through any means, to any person, except with the prior written consent of BMO Capital Markets.

NI-NYSE	Rating	Price: Jun-20	Target ↓	Total Rtn
	Outperform	$27.22	$30.00	14%

Checking Another Box – Modestly Better-Than-Expected MI Interest Sale

Bottom Line:

We see today's NIPSCO minority-interest sale to Blackstone as one of the key derisking events supporting our Outperform rating. At a 1% discount to peers, we continue to recommend NI as a core holding in the sector as it checks the three primary attributes we believe investors place a premium on: 1) strong balance sheet (200 b/p of cushion); 2) predictable regulatory environment with minimal rate case risk; and 3) increasing emphasis on GARP/relative valuation given the widening dispersion in the group which has led to a shrinking investable universe.

Key Points

NiSource announced it has entered into a definitive agreement to sell a 19.9% MI in NIPSCO to Blackstone Infrastructure Partners for $2.15bn. Per the agreement, Blackstone has also committed to funding a pro rata share of NIPSCO's ongoing capital requirements commensurate with its 19.9% interest into perpetuity. This is supported by a $250mm equity commitment letter which is expected to be utilized over 3 years (2024-2026) and brings the total funding commitment to $2.4bn through NI's five-year capital plan. To maintain its 19.9% ownership stake, Blackstone has the option to satisfy its funding requirements through direct contributions and/or by forgoing cashflow distributions from NIPSCO.

Using our YE2022, Blackstone's $2.15b of initial proceeds implies an EV/Rate base multiple of 1.85x, which was in line/slightly above our 1.75x assumption (~$2bn proceeds). **Despite some investors' fear of a lower multiple due to rising interest rates over the past year, we believe NIPSCO's attractive rate-base growth of 13-14%, constructive regulatory environment, and strong credit profile drove the modestly better-than-expected premium transaction multiples.**

Although we do not expect any changes to the company's forward outlook with management clearly placing its emphasis on execution and predictability, we see several potential drivers that could provide upside or cushion to its current outlook: 1) Blackstone's perpetual equity commitment/improving consolidated cash flow outlook, which could potentially reduce its ongoing maintenance ATM needs in 2025+; 2) conservative regulatory planning assumptions; and 3) modest financing efficiencies including the redemption of its $500mm Perpetual B's (~7.6%/non-tax deductible coupon if not called at call date) and lack of upside collar on the YE2023 settlement of its equity purchase contracts ($24.51 floor).

Although we see some bias to the upside, our 2023-2025 estimates remain unchanged at $1.54, $1.67, and $1.78, respectively. **Our target price moves to $30 as we MTM our peer group multiples.**

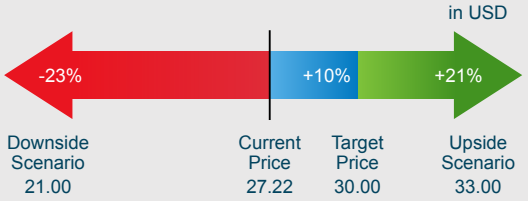
Scenarios

Valuation



Our target price is the product of a P/E-based sum of the parts. We utilize a regulated-group average multiple using 2025E EPS as base valuation and then make specific adjustments to reflect our current view of the fundamental outlook.

Upside Scenario $33.00

Our upside scenario reflects continued multiple expansion associated with the company's premium and above-average earnings and dividend growth profile, as well as the material improvement in the balance sheet with the successful execution of the minority interest sale in NIPSCO.

Downside Scenario $21.00

Our downside scenario reflects a tightening monetary policy, a deceleration of the company's rate base growth and failure to execute on the sale of a minority interest in NIPSCO to strengthen the balance sheet.

Key Catalysts

Successful execution of both its upcoming NIPSCO Electric rate case as well as sale of a minority interest in its NIPSCO subsidiary by mid-year 2023.

Company Description

NiSource, Inc. is a regulated utility holding company, serving approximately 3.5 million natural gas customers and 500,000 electric customers across seven states. Through its Columbia Gas and NIPSCO brands, it provides natural gas, electricity, and other products and services. The company was founded in 1987 and is headquartered in Merrillville, Indiana.

Checking Another Box – Modestly Better-Than-Expected MI Interest Sale

Bottom Line: We see today's NIPSCO minority-interest sale to Blackstone as one of the key de-risking events supporting our Outperform rating. We continue to recommend NI as a core holding in the sector as it checks the three primary attributes we believe investors are placing a premium on (currently and longer-term): 1) strong balance sheets with cushion to their metrics; 2) predictable regulatory environment with minimal or diversified rate case risk; and 3) increasing emphasis on attractive relative valuation given the widening dispersion in the group which has led to a shrinking investable universe.

With the January approval of the company's Ohio rate settlement and pending August order in its NIPSCO rate case, we see today's announcement as adding significant visibility to the company's financing plan and balance sheet improvement. Moreover, although we do not expect any significant changes to the company's forward outlook with management clearly placing its emphasis on execution and predictability, in conjunction with today's announcement, we see several potential drivers that could add upside or at least cushion to its current outlook including: 1) Blackstone's perpetual equity commitment and improving consolidated cash flow outlook which could potentially reduce its ongoing maintenance ATM needs in 2025+; 2) conservative regulatory planning assumptions; and 3) modest financing efficiencies including the redemption of its $500 million perpetual Bs (~7.6%/non-tax deductible coupon if not called at call date) and lack of upside collar on the YE2023 settlement of its equity purchase contracts ($24.51 floor). **Management reaffirmed its 2023 non-GAAP diluted net operating earnings per share (NOEPS) guidance of $1.54-1.60 (BMO/Consensus at $1.54/$1.57) with a midpoint of $1.57.** The company also reaffirmed its 2023-2027 capital program totaling ~$15 billion that drives 8-10% rate base growth and underpins annual NOEPS growth of 6-8% through 2027.

We reiterate our Outperform rating and would continue to be buyers of the stock as we see today's further derisking as adding to the visibility and cushion to the of the company's financial outlook, which should drive multiple expansion. At a 1% discount to the group, we find NI shares to be one of the most attractive names in our coverage universe given its 7% EPS growth, strong balance sheet, constructive regulatory environment, and minimal and diversified regulatory activity. Although we see some bias to the upside, our 2023-2025 estimates remain unchanged at $1.54, $1.67, and $1.78, respectively. **Our target price moves to $30 as we MTM our peer group multiples used in our SOTP valuation framework.**

Checking Another Derisking Box on the Long-Term Strategy

NiSource announced today that it has entered into a definitive agreement to sell a minority interest (19.9%) in NIPSCO to Blackstone Infrastructure Partners for $2.15 billion. Per the agreement, Blackstone has also made the commitment to fund a pro rata share of NIPSCO's ongoing capital requirements commensurate with its 19.9% interest into perpetuity. This is supported by a $250 million equity commitment letter which is expected to be utilized over a three-year period (2024-2026) and brings the total funding commitment to $2,400mm through NI's five-year capital plan. To maintain its 19.9% ownership stake, Blackstone has option satisfy its funding requirements through direct contributions and/or by forgoing cashflow distributions from NIPSCO.

The transaction implies and equity value of $10.8b and enterprise value of $14.3 billion for 100% of NIPSCO. Using YE2022, Blackstone's $2.15 billion of initial proceeds implies an EV/Rate base multiple of 1.85x, which was in line/slightly above our 1.75x assumption. The company estimates using TTM adj. net income of $333 million, the transaction implies ~32.5x P/E and directionally in line with the ~29x P/E we see using our 2023 forecast net income. **Despite some investors fear of a lower multiple due to rising interest rates over the last year, we believe NIPSCO's attractive rate base growth of 13-14%, constructive regulatory environment and strong credit profile drove the modestly better-than-expected premium transaction multiples.**

The transaction is expected to close by year-end 2023, subject to customary closing conditions, including receiving FERC approvals and clearances. While the transaction does not need IURC approval, the company discussed the transaction with IURC prior to today's announcement. We see limited risk in terms of the FERC approval based on prior precedent with other minority interest sales.

Balance Sheet/Credit Metrics: Management reaffirmed its 14-16% FFO/Debt range with metrics reaching the higher end of the range at YE2023 and moderating towards the midpoint of the target range over the longer term. Management also reiterated that it does not see the need for any additional equity at least until 2025 and that any maintenance equity requirements would be done via a its ATM program ($200-300mm) with the goal of sustaining the healthy cushion above its 13% downgrade threshold (200 b/p at the midpoint). The company also met with all three rating agencies prior to the announcement and while no updated credit comments have been issued, we believe the transaction is likely in-line to modestly better than the plan the company had originally communicated. We would expect both NiSource's/NIPSCO's Stable credit ratings to be affirmed at both Moody's (Baa2/Baa1) and S&P (BBB+/BBB).

NIPSCO Settlement Still on Track for August Final Order

On the NIPSCO Electric rate case, the company continues to expect a final order from the commission in August with rates going into effect in September. **We view this as the last remaining event that completes the de-risking of the story over the next 12-18 months.**

April 20, 2023 | 10:32 ET~

NiSource

NI-NYSE	Rating	Price: Apr-19	Target	Total Rtn
	Outperform	$28.55	$31.00	12%

Revising 1Q23 Estimate With Preview Walk

Bottom Line:

We are lowering our 1Q23 EPS estimate to $0.75 post our 1Q23 preview. Our 2023 quarterly estimates now reflect a more normalized quarterly pattern than previously assumed in our model. On the call, we expect management to reaffirm its 2023 outlook of $1.54-1.60 (Consensus/BMO at $1.55/$1.54, respectively) and reiterate its LT growth rate of 6-8%, and the 14-16% FFO/debt ratio. **We maintain our Outperform rating and our $31 price target.**

Key Points

We are updating our estimate for NI's 1Q23 earnings given the difference in our preview walk and our current quarterly EPS estimate for NI in 2023. As such, despite significantly milder weather y/y, we see a relatively flat y/y comparison as not only does the company report its operating earnings on a weather-normalized basis, but rate relief (+10c) offset the higher y/y interest rate impact (5c), non-service cost for pension (2c), D&A/opex (2c) and modest dilution. Although NI does not include the impact from weather in its operating earnings (only on a GAAP basis), the impact shows up primarily in its cash flow statement. We note that relative to the ~13.5% FFO/debt metric at YE22 and its 13% downgrade threshold, each $10mm of weather-related impact lowers its FFO/debt by ~10 bps. Based on our best estimates, 1Q23's impact could be ~$30mm or 30 bps, all things held equal. However, given its pending MI sale at NIPSCO, we do not see this early-2023 impact as a concern. **In Exhibit 1 (page 3), we detail the drivers of our EPS walk to $0.75. This compares to our previous estimate of $0.94 which was likely pulling up consensus estimate of $0.81.**

In terms of updates, we do not expect any change in messaging related to the NIPSCO minority stake sale. The company still anticipates an announcement in mid-2023 and a transaction close by the end of 2023. On the regulatory side, the company is expecting an order in August in the NIPSCO electric case. We are also watching legislative activity in Indiana (HB 1420), which could expand the ROFR rights for incumbent transmission owners and provide the company with another upside capex opportunity to its 2028-2032 capital plan. The bill has passed in the House and awaits a vote in the Senate.

IMPORTANT DISCLOSURES

Analyst's Certification

I, James M. Thalacker, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Analysts employed by BMO Nesbitt Burns Inc. and/or BMO Capital Markets Limited are not registered as research analysts with FINRA. These analysts may not be associated persons of BMO Capital Markets Corp. and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Company Specific Disclosures

Disclosure 9B: BMO Capital Markets makes a market in NiSource Inc in United States.

Methodology and Risks to Target Price/Valuation for NiSource Inc (NI-NYSE)

Methodology: Our target price is the product of a P/E-based sum-of-the-parts (SOTP) analysis of the company's primary regulated operating companies. We utilize a regulated-group average multiple based on 2025E EPS as our initial basis for valuation and then make adjustments specific to each jurisdiction to reflect our current view of the fundamental outlook.

Risks: NI's regulated profile exposes the company to business risk including but not limited to federal and state regulatory risk, federal and state political risk, environmental policy, interest rate risk, access to capital markets, construction risk, changes in customer demand trends, changes in customer affordability, extreme weather, natural disaster, and equipment failure.

Ratings Key (as of October 2016)

We use the following ratings system definitions:
OP = Outperform - Forecast to outperform the analyst's coverage universe on a total return basis;
Mkt = Market Perform - Forecast to perform roughly in line with the analyst's coverage universe on a total return basis;
Und = Underperform - Forecast to underperform the analyst's coverage universe on a total return basis;
(S) = Speculative investment;
Spd = Suspended - Coverage and rating suspended until coverage is reinstated;
NR = No Rated - No rating at this time; and
R = Restricted - Dissemination of research is currently restricted.

The total return potential, target price and the associated time horizon is 12 months unless otherwise stated in each report. BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small Cap, Income, CDN Quant, and US Quant have replaced the Top Pick rating).

Other Important Disclosures

For Important Disclosures on the stocks discussed in this report, please go to https://researchglobal0.bmocapitalmarkets.com/public-disclosure/ or write to Editorial Department, BMO Capital Markets, 151 West 42nd St, 33rd Floor, New York, NY 10036 or Editorial Department, BMO Capital Markets, 1 First Canadian Place, Toronto, Ontario, M5X 1H3.

Dissemination of Research

Dissemination of fundamental BMO Capital Markets Equity Research is available via our website https://researchglobal0.bmocapitalmarkets.com/. Institutional clients may also simultaneously receive our fundamental research via email and/or via services such as Refinitiv, Bloomberg, FactSet, Visible Alpha, and S&P Capital IQ.

BMO Capital Markets issues a variety of research products in addition to fundamental research. Institutional clients may request notification when additional research content is made available on our website. BMO Capital Markets may use proprietary models in the preparation of reports. Material information about such models may be obtained by contacting the research analyst directly. There is no planned frequency of model updates.

The analyst(s) named in this report may discuss trading strategies that reference a catalyst or event that may have a near or long term impact on the market price of the equity securities discussed. In some cases, the impact may directionally counter the analyst's published 12 month target price and rating. Any such trading or alternative strategies can be based on differing time horizons, methodologies, or otherwise and are distinct from and do not affect the analysts' fundamental equity rating in the report.

Research coverage of licensed cannabis producers and other cannabis-related companies is made available only to eligible approved North American, Australian, and EU-based BMO Nesbitt Burns Inc., BMO Capital Markets Limited, Bank of Montreal Europe Plc and BMO Capital Markets Corp. clients via email, our website and select third party platforms.

~ Research distribution and approval times are provided on the cover of each report. Times are approximations as system and distribution processes are not exact and can vary based on the sender and recipients' services. Unless otherwise noted, times are Eastern Standard and when two times are provided, the approval time precedes the distribution time.

General Disclaimer

"BMO Capital Markets" is a trade name used by BMO Financial Group for the wholesale banking businesses of Bank of Montreal, BMO Harris Bank N.A. (member FDIC), Bank of Montreal Europe p.l.c, and Bank of Montreal (China) Co. Ltd, the institutional broker dealer business of BMO Capital Markets Corp. (Member FINRA and SIPC) and the agency broker dealer business of Clearpool Execution Services, LLC (Member FINRA and SIPC) in the U.S., and the institutional broker dealer businesses of BMO Nesbitt Burns Inc. (Member Investment Industry Regulatory Organization of Canada and Member Canadian Investor Protection Fund) in Canada and Asia, Bank of Montreal Europe p.l.c. (authorised and regulated by the Central Bank of Ireland) in Europe and BMO Capital Markets Limited (authorised and regulated by the Financial Conduct Authority) in the UK and Australia. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents

have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. Nothing herein constitutes any investment, legal, tax or other advice nor is it to be relied on in any investment or decision. If you are in doubt about any of the contents of this document, the reader should obtain independent professional advice. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Additional Matters

This report is directed only at entities or persons in jurisdictions or countries where access to and use of the information is not contrary to local laws or regulations. Its contents have not been reviewed by any regulatory authority. BMO Capital Markets does not represent that this report may be lawfully distributed or that any financial products may be lawfully offered or dealt with, in compliance with regulatory requirements in other jurisdictions, or pursuant to an exemption available thereunder.

To Australian residents: BMO Capital Markets Limited and Bank of Montreal are exempt from the requirement to hold an Australian financial services licence under the Corporations Act in respect of financial services they provide to wholesale investors (as defined in the Corporations Act). BMO Capital Markets Limited is regulated by the UK Financial Conduct Authority under UK laws, and Bank of Montreal in Hong Kong is regulated by the Hong Kong Monetary Authority and the Securities and Futures Commission, which differ from Australia laws. This document is only intended for wholesale clients (as defined in the Corporations Act 2001), Eligible Counterparties or Professional Clients (as defined in Annex II to MiFID II) and Professional Investors (as defined in the Securities and Futures Ordinance and the Securities and Futures (Professional Investor) Rules under the Securities and Futures Ordinance of Hong Kong).

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Colin Hamilton, Alexander Pearce or Raj Ray:

This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and distributed by BMO Capital Markets Limited or Bank of Montreal Europe Plc and is subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom and the Central Bank of Ireland (CBI) in Ireland. FCA and CBI regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore each of BMO Capital Markets Limited and Bank of Montreal Europe Plc will disclose its and its affiliates' ownership interest in the subject issuer only if such ownership exceeds 5% of the equity of the issuer.

To E.U. Residents: In an E.U. Member State this document is issued and distributed by Bank of Montreal Europe plc which is authorised and regulated in Ireland and operates in the E.U. on a passported basis. This document is only intended for Eligible Counterparties or Professional Clients, as defined in Annex II to "Markets in Financial Instruments Directive" 2014/65/EU ("MiFID II").

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to retail clients.

To Hong Kong Residents: In Hong Kong, this report is published and distributed by Bank of Montreal. Bank of Montreal (incorporated in Canada with limited liability) is an authorized institution under the Banking Ordinance and a registered institution with the Securities and Futures Commission (CE No. AAK809) to carry on Type 1 (dealing in securities) and Type 4 (advising in securities) regulated activities under the Securities and Futures Ordinance (Cap 571 of the Laws of Hong Kong). This report has not been reviewed or approved by any regulatory authority in Hong Kong. Accordingly this report must not be issued, circulated or distributed in Hong Kong other than (a) to professional investors as defined in the Securities and Futures Ordinance and the Securities and Futures (Professional Investor) Rules under the Securities and Futures Ordinance of Hong Kong, or (b) in circumstances which do not result in or constitute an offer to the public in Hong Kong.

To Korean Residents: This report has been provided to you without charge for your convenience only. All information contained in this report is factual information and does not reflect any opinion or judgement of BMO Capital Markets. The information contained in this report should not be construed as offer, marketing, solicitation or investment advice with respect to financial investment products in this report.

To Japan Residents: This report has not been reviewed by any regulatory authority in Japan. This report is provided for information purposes only and it should not be construed as an offer to sell, a solicitation to buy, or a recommendation for any security, or as an offer to provide investment management or advisory or other services in Japan. Securities may not be offered or sold in Japan by means of this report or any other document other than to Qualified Financial Institutions within the meaning of item (i) of Article 17-3 of the Government Ordinance to enforce the Financial Instruments and Exchange Act (Kinyu Shohin Torihiki Ho Sekou Rei). Unless specified otherwise, the securities that may be offered to you are not and will not be registered in Japan pursuant to the Financial Instruments and Exchange Acts.

To Taiwanese Residents: This report is not intended to constitute investment advice nor a public offer for any investment products to investors in Taiwan. This report should only be accessed by investors in Taiwan that are qualified to invest in investment products pursuant to relevant Taiwanese laws and regulations, and subject to sales restrictions as set forth in the relevant Taiwanese laws and regulations. BMO Capital Markets has not and will not secure the required licenses in Taiwan for the offer of securities and investment services. Any offer of securities has not been and will not be registered or filed with or approved by the Financial Commission of Taiwan and/or other regulatory authority pursuant to relevant securities laws and regulations of Taiwan, and may not be issued, offered or sold within Taiwan through a public offering or in circumstances which constitute an offer that requires a registration, filing or approval of the Financial Supervisory Commission of Taiwan and/or other regulatory authority in Taiwan under relevant securities laws and regulations of Taiwan. No person or entity in Taiwan has been authorized to offer or sell the securities in Taiwan.

To Singapore Residents: This report is intended for general circulation and does not and is not intended to constitute the provision of financial advisory services, whether directly or indirectly, to persons in Singapore. You should seek advice from a financial adviser regarding the suitability of the investment products, taking into account your specific investment objectives, financial situation or particular needs before you make a commitment to purchase the investment product. This report has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, it should not be circulated or distributed, nor may the securities described herein be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than (a) to an institutional investor or a relevant person as defined in and pursuant to and in accordance with the conditions of the relevant provisions of the Securities and Futures Act of Singapore or (b) otherwise pursuant to and in accordance with the conditions of, any other applicable provision of the SFA.

To Israeli residents: BMO Capital Markets is not licensed under the Israeli Law for the Regulation of Investment Advice, Investment Marketing and Portfolio Management of 1995 (the "Advice Law") nor does it carry insurance as required thereunder. This document is to be distributed solely to persons that are qualified clients (as defined under the Advice Law) and qualified investors under the Israeli Securities Law of 1968. This document represents the analysis of the analyst but there is no assurance that any assumption or estimation will materialize.

These documents are provided to you on the express understanding that they must be held in complete confidence and not republished, retransmitted, distributed, disclosed, or otherwise made available, in whole or in part, directly or indirectly, in hard or soft copy, through any means, to any person, except with the prior written consent of BMO Capital Markets.

US Utilities & IPPs

Let's Make a Deal: AGA Full Download. Consolidation, Inflation, & Credit

Industry Overview

Consolidation remains absolutely front and center

We leave the Florida American Gas Association (AGA) Financial Conference with more questions than when we came in. The next handful of months could bring the largest wave of utility transaction we have seen in years, based on the feedback from the conference. This is counterintuitive as higher interest rates and generally reduced credit quality across the sector would seemingly reduce the ability to execute. There was a clear bifurcation of parties open to buying and those who would not. Companies that expressed an openness to potential inorganic growth included Duke Energy (DUK), UGI Corp (UGI), Spire (SR), Unitil (UTL) and Avangrid (AGR). In contrast, natural gas focused Atmos Energy (ATO), Black Hills (BKH), and NiSoure (NI), OneGas (OGS) downplayed interest in buying for a variety of factors.

Mild weather & higher costs a recipe for challenges

Another key theme was the degree to which higher operating expenses (O&M) are stubbornly persistent with some natural gas companies seeing 5%+ cost increases as they serve growth while staffing up. If inflation was supposed to be a theme pressuring FY22 and bleeding into FY23, we see clear affirmation that YoY pressures will manifest in 2024 again. The very mild weather to start 2023 in the Eastern US has raises risk of FY23 estimate revisions and erodes latitude for 2024. We see greater risk to smaller cap companies with less scale. We continue to prefer larger-cap, defensive utilities

PTC monetization with transferability a key new angle

We see a multitude of companies evaluating strategies now that PTCs can be monetized directly (even for legacy renewable projects) still generating tax credits from renewables such as wind. Moody's appears to provide wide latitude in including these financing transactions in funds from operations (FFO). In contrast, S&P has taken a definitive view that these are not operating cash flows. The bifurcation between Moody's and S&P could be meaningful for impacted companies. Less reliance on tax equity will be positive for many with NiSource (NI) highlighting a potential +$500Mn rate base opportunity in the ~2025 timeframe. On balance reiterate our Buy rating given positive trends.

What are the best meetings of the conference?

Positive meetings included Xcel Energy (XEL), Northwestern Corp (NWE), Atmos Energy (ATO), CenterPoint Energy (CNP), NiSource (NI), and Sempra (SRE). CNP could raise 2023 capex, financed with a non-core divestiture, on the back of a successful Texas distribution legislation (DCRF). Assuming an uneventful rate case, CNP has latitude to increase its EPS profile to ~8%. SRE management was as confident as ever on CA prospects and there is a real possibility of incremental capex, potentially as soon as the 4Q22 earnings call. Controversial meetings included Southwest Gas (SWX) and UGI Corp (UGI). For SWX, positive long-term ROE statements were juxtaposed against near-term cost pressures and a DPS cut ahead. Expect volatility but increasingly positive setup. For UGI, the challenges for AmeriGas have sapped investor excitement about a consolidated company that trades at a ~10x P/E.

Please see the full report for the full set of conference takeaways.

Contents

Key Macro Points to Note 3
Alliant (LNT) The tax man comes 4
Ameren (AEE) All Illinois, all day 5
Atmos Energy (ATO) Victim of own success 6
Avangrid (AGR) PNM & following M&A in focus 8
Avista Corp: New CFO, same focus 11
Black Hills Corp (BKH) Execution, Without Distractions 13
Centerpoint Energy: Even More Robust... 15
CMS Energy (CMS) Looking for summer 16
DTE Energy (DTE) Reliability wags the dog 18
Duke Energy (DUK) Balancing credit 20
Consolidated Edison (ED): JP, all the time 21
Dominion Energy (D) Wordsmithing the business review 22
Essential Utilities: Repairing the repairs 24
MDU Resources (MDU) Cutting a path to the big spin ahead 26
MGE Energy (MGEE) Incrementalism here 27
New Jersey Resources (NJR) Solar is core 28
Northwest Natural (NWN) Where policy and practicality on decarbonization meet 29
NorthWestern Corp (NWE) Dare to Dream 30
OneGas (OGS) More rate cases to come 32
PSEG Corp (PEG) Steady as she goes 34
Sempra (SRE) From coast to coast & back to California 35
Southern Co (SO) Powering up Vogtle 36
Southwest Gas (SWX): ROEs > rate base 37
Spire Inc (SR) Searching for a new star 38
UGI Corp: Balancing AmeriGas refinancing 39
Until Corp (UTL) Open to scaling up, if the puzzle pieces fit well 41
WEC Energy (WEC) Not melting under weather pressure 42
Xcel Energy (XEL) Execution stands outs 43

Key Macro Points to Note

- **Repairs tax:** since updated guidance was issued from the IRS in early April we note a growing focus on updating repairs tax deductions across guidance for many companies. While a few companies indicated uncertainty still as to their deduction policies relative to the new guideline (WTRG, SRE) many companies overall noted they thought on their initial understandings their deduction strategies were consistent with the updated list of activities that qualified. Stay tuned: while this is unlikely to have any true-up effect with the IRS considering safe harbor this could yet reduce ability to over-earn in some jurisdictions.

- **Undergrounding the distribution grid:** We note companies in both Iowa (LNT) and Michigan (CMS/DTE) discussed their efforts in undergrounding the distribution grid to improve outage times. We stress that this is among the first times we perceive a real focus to shift the grid – we note other regional peers such as WEC do not have a meaningful focus (yet) on this angle. We appreciate the need to upgrade grids to accommodate expanded EV penetration over time and as such gradual shift towards undergrounded wires as these upgrades are made. Stay tuned for others to opine on this front. Capital crowding on priorities remains the key worry here.

- **O&M inflation yes – but no one is 'concerned' (yet) on guidance:** Cannot ignore the drumbeat of concerns and fingerpointing across the sector as expectations of where O&M was going to settle for the year heads yet higher. While not an issue *yet* – further weather pressures could yet expose guidance by later this year. Companies with confidence & upside bias in their outlook will stand out. See CNP's positive bias on capex for '23 as likely received uniquely positively later this year.

- **Acquisitions galore.** The focus at the conference was among the most pronounced in recent memory on deal making. We stress expectations have yet to fully reset lower on just where gas LDC transactions could print, but we assume a step-function lower following rally in rates in recent months. On balance, expect less of a sizable premium: we attribute recent gas utility strength to twin M&A trends as well as reduced overall gas prices.

- **RNG pullback?** Less clarity and pullback in market prices has reduced enthusiasm for Renewable Natural Gas (RNG) strategies. A year ago at the AGA conference a number of companies were buzzing about their expansion strategies. Today, market RINS prices have retreated and execution challenges leave some cautious on execution. Finally, uncertainty as to the fate of whether so-called e-RINS will qualify for the EPA program leaves developers unsure as to whether they should install gas equipment to 'clean up' gas to insert in the pipeline network or leave intact existing sour gas (less/unprocessed) to power generation. Term price for RNG prices has increased markedly trending towards high teens per MMbtu despite pullback in D3. EPA appears to have iced the concept for now despite earlier enthusiasm for a dramatically expanded scope of the program to include e-RINS & qualification for EVs to receive benefits from this program.

Alliant (LNT) The tax man comes

We met with CEO John Larsen, CFO Robert Durian, and Director of IR Susan Gille.

Framing the tax credit opportunity post-IRA

Discussions with LNT mgmt touched on potential updates to the company's capital plan expected with the November update, as is customary. While mgmt has articulated equity needs in 2023, there is the possibility that future needs will be reduced via monetization of production tax credits (PTCs) following passage of the Inflation Reduction Act (IRA). PTCs generated starting in 2023 are expected to be eligible for monetization under the act, including those from the 1.2 GW of wind that LNT currently operates. The coming solar buildout in both Iowa and Wisconsin will add 1.5 GW – mgmt estimates potential incremental cash flows from monetizing all of the associated credits at $350m annually. Questions about impact on the financing plan yet to be resolved include 1) credit rating agency treatment for funds from operations (FFO) purposes, 2) proceeds from the sale of the second stake in West Riverside, and 3) higher equity layer requested in the Wisconsin rate case. Mgmt indicated it expects some visibility into these factors by the time of the November refresh.

Resiliency in focus as lines move under ground

Undergrounding remains a nascent opportunity for both the Iowa and Wisconsin utilities with a long runway yet to be completed – with an estimated 25% of LNT's distribution lines currently underground vs. a long-term goal of 80%. The current pace is 1.5-2.0% per annum (approx. 600 miles) with mgmt reporting that crew efficiency and ability to execute continues to improve with ongoing rollout of the initiative. Cost advantages are particularly robust for three-phase distribution lines, both in the initial install and lifetime maintenance. The limiting factor on accelerating the buildout continues to be bill impacts, though this remains a nascent area that mgmt may opt to scale up following the current solar build initiative in both jurisdictions, particularly given well-documented reliability advantages of undergrounding.

Iowa solar push continues on both fronts

LNT continues to push ahead in Iowa on its Duane Arnold and Creston/Weaver solar & battery storage efforts. Duane Arnold had previously received approval for advance ratemaking without an ROE incentive, but LNT recently filed for rehearing on the ROE incentive portion. While new members of the Iowa Utility Board (IUB) may not want to overrule a decision made by the previous iteration, mgmt indicated a note of cautious optimism given the enhanced evidence filed and support for the project. The outcome of the Creston & Weaver court proceeding is less clear given the judicial process with a July hearing scheduled – note the initial finding of an incomplete record makes this comparably riskier than Duane Arnold. Nonetheless, mgmt expressed confidence in the content of their respective cases for both projects and potential for yet more favorable outcomes given broad-based support for solar generation in the state.

2023 not de-risked, but built-in savings to come in 2H

With Q1's results putting may utilities on the back foot with respect to weather-driven load impacts, LNT sees a degree of built-in savings in its O&M program in the back half of the year. Lower contributions to the charitable foundation, overhead from operating the Lansing plant, and consultant fees are all embedded in the plan to reduce costs in 2023. While we do expect LNT to rely on some 'flex' provisions, we note the company's plan relies largely on execution rather than outright short-term cuts in order to hit EPS numbers. Q3 weather impacts remain by far the largest unknown given seasonality.

Ameren (AEE) All Illinois, all day

We met with Ameren CEO Marty Lyons, CFO Michael Moehn, Ameren Illinois Chairman and President Lenny Singh, Senior Vice President, Regulatory Affairs and Financial Services Teresa Shaw, Director of Investor Relations Andrew Kirk, and Manager of Investor Relations and Corporate Modeling Megan McPhail.

Management did an effective jump in talking down concerns on ROEs and disarming what could have been among the most cautious updates from the company in a while. Still investors read into comments around backfilling lost capex in Illinois cautiously. On balance, we think we are near the 'low mark' in rate case risk and could see some recovery from here.

Illinois testimony – downplaying the earnings impact

Ameren mgmt acknowledged that the staff ROE recommendation at Ameren IL's multi year rate plan (MYRP) proceeding for the electric utility came in below expectations with an initial 8.9% recommendation well below the company's 10.5% ask and 9.89% recommendation in the Ameren IL gas rate case. While the lower capex and rate base recommendation from staff appears concerning, mgmt was more constructive in this regard framing it as 1) a normal part of the back and forth with staff when discussing projects several years out in the forecast and 2) the size of the rate base delta (cumulatively $700m over the term of the MYRP) as modest in relation to the $20B five-year capital plan. *While acknowledging that staff testimony is a cautious starting point, mgmt indicated confidence in 1) achieving its long-run 6-8% EPS CAGR target and 2) shifting capex if needed across the enterprise.*

Reconciling staff views vs. legislation

IL's Climate and Equitable Jobs Act (CEJA) mandates among other provisions that electric utilities receive a determined ROE for the duration of the MYRP. Mgmt noted that the staff rec opens with an 8.9% level in year 1 subject to a formula-like adjustment in future years, and likewise would reflect 9.7% when marked to market for the latest actuals. The issue of Other Postemployment Benefits (OPEB) treatment will also likely need to be reconciled as staff recommended excluding the balance from rate base (roughly $100m) while the treatment under performance-based ratemaking (PBR) would call for inclusion of this item in rate base. Given the relatively small impact from OPEB we could see this as being considered a 'give' in subsequent talks with interveners and staff. We note as well that mgmt was constructive on prospects for reaching an acceptable point on the equity layer, with the 50% vs. 54% proposals from staff and Ameren respectively setting up a natural middle ground.

IL Gas: Constructive starting point

The IL Gas rate case is proceeding on a very similar time frame, with staff testimony coming in recently – data points suggest a much narrower bid-ask with staff than the electric utility, with staff recommending an ROE of 9.89%, 50% equity, and $129m base rate increase vs. the company's $160m. Gas utility dynamics are different from electric in that there is no MYRP on the gas side, thus rate case filings will likely occur at a somewhat regular cadence going forward.

MO regulatory wins: constructive, but in the rearview

Ameren achieved solid regulatory wins via settlement of the Missouri Electric rate case and commission approval of two solar projects. While the Huck Finn project was relatively uncontroversial given its need with respect to renewable energy standards, the Boomtown facility required slightly more back and forth with staff and the commission, with staff ultimately not wanting to opine on a relatively novel approach – note the commission ultimately approved 4-0. The latter project is instructive in our view of Ameren's ability to deliver on its regulated agenda. While we do not make a direct read-across to Illinois as they are distinct jurisdictions with unique regulatory structures and dynamics, Ameren has a strong track record of working constructively with its regulators. Expect intense focus on the Illinois processes in the back half of the year as Missouri is now relatively de-risked.

Atmos Energy (ATO) Victim of own success

It was another constructive meeting with Atmos, our first back in person with the senior management team in years. We suspect it was many others as well – and to that end we thought they made a notably positive impression.

Our meeting focused on what makes Atmos different from many of its peers, and most importantly, the company reaffirmed that it is not interested in third-party acquisitions. The company believes that over time its track record of positive execution will be reflected in its share price and is focusing on the areas within its control. We maintain our Buy rating on shares of ATO, which remain undervalued relative to natural gas peers due to the company's strong growth prospects and consistent historical profile.

"It's not as easy as it looks"

Overall, the senior management described the company's outlook as intact, with the business outlook on track. Atmos believes that its consistent operating and financial execution is often taken for granted relative to peers – effectively a view that it has become a "victim of their own success." The company is highly focused on serving customers at affordable rates and does not see the East and West Coast discussions regarding a shorter duration for natural gas infrastructure as pervasive in its service territories. As evidence, Atmos pointed to the large number of customer fuel choice bills that have been enacted. There are currently 24 states with all fuels legislation enacted and a couple proposals pending in the current state sessions.

Colorado and Virginia the two states without fuel choice

The two states that Atmos operates in without all fuels legislation are Colorado and Virginia. Atmos will support its existing gas system in Colorado in its clean heat plan, pointing to strong customer demand for natural gas and economics versus an alternative. In a scenario with additional electrification, the natural gas consumption on a system would remain elevated as the overall system shifted toward an overnight/ early morning peak when less renewable electric generation is available. In Virginia, there are only ~25,000 customers, with a concentration among large industrial and government/military consumers.

Relatively quiet legislatives session(s), even in Texas

We and investors have been closely watching the legislative sessions to start 2023. We have been tracking Texas, which is Atmos' largest jurisdiction. Overall, the company does not expect major changes from this pending Texas legislative session, which concludes at the end of May. The proposed and advanced legislation relate more to the electric sector for transmission & distribution as well as power generation. Cryptocurrency mining and electric vehicle registration have also been topical areas of the natural gas local distribution companies, not related to Atmos.

In December, Texas Governor Abbott and the Railroad Commission requested investigations into Atmos, which has been a lingering risk area. Management is taking the process seriously and did not appear concerned, but this is still an area of uncertainty.

Fight to control costs more challenging with growth

While Atmos has not been immune to the macroeconomics factors of higher operating and financing costs, management attributed its success to constructive jurisdictions that understand the requirements when building a reliable gas delivery system. Atmos believes that costs could continue to exhibit pronounced inflation due to growth, which is not slowing off elevated levels. For example, in Mid-Texas, the line locates have increased to 1.4Mn from 1.1Mn. This has been attributed to a variety of factors, including new construction, fiber expansions, and renewables projects.

Singing the same story on M&A

Atmos reaffirmed that it is focused on its strong organic growth plan and is not interested in acquisitions, despite the large number of assets reportedly for sale. This was an expected answer but still favorable to hear given the volume of disparate assets that could transact at seemingly more attractive valuations than five years ago.

Storms “lessons learned” as continuing to evolve

Management described the operating differences between Winter Storm Uri's extended freezing weather and Winter Storm Elliott's sharp decline in temperatures. The company is evaluating the areas where the system could have performed better during Winter Storm Elliott and is implementing prospective improvements, as any prudent operator would do. There was elevated media and political attention to the winter storms, and it remains to be seen whether there could be lingering financial impacts, although we do not expect anything material.

Repairs tax reforms have been closely watched for years

On the new formalized repairs tax guidance, Atmos does not expect a material impact. The company has been tracking the progress and engaging for numerous years, following closely given the importance. The company is still reviewing the ~100 pages of guidance but overall did not seem concerned about any prospective impacts.

Management has been closely watching and working with parties on the new repairs tax guidelines, with changes already being implemented. This was one of the strongest statements from a company under coverage and highlights the “best-in-class” approach to multiple facets of the business.

See our 4 May 2023 report, US Utilities & IPPs: PowerPoints: ATO Guide up.

Avangrid (AGR) PNM & following M&A in focus

Our management meeting with Avangrid was a lightning round, touching on just a few of the pivotal topics pending for the company. Avangrid plans to host an Analyst Day after it receives clarity on a litany of regulatory items, including the New York, Maine, and Connecticut rate cases as well as the pending PNM Resources (PNM) merger and large construction projects such as New England Clean Energy Connect (NECEC). Although there are puzzle pieces that need additional clarity, management emphasized the strides it believes it has made in regulatory outreach and the quantum of organic networks opportunities, which are multiple sizes as large as the PNM purchase price. We maintain our Underperform rating on shares of AGR, where we see substantial uncertainty into the prospective earnings profile and below-average growth rate based on large projects. The interest in prospective regulated acquisitions is a risk area as well.

We see upside in New York on any eventual settlement and shifting sentiment on the state as the single most constructive backdrop to shares. We still see a net cautious backdrop as the loss of PNM could force a rebasing/revision to '24+ EPS guidance (even if '23 itself isn't technically at risk per mgmt's statements). On balance, maintain our Underperform given more negatives than positives to EPS outlook.

Regulation wait-and-see

Management believes that it has presented a strong case in New York and believes that it is better positioned than in recent years due to its proactive stakeholder outreach before filing the rate case. Parties have publicly disclosed that they are having settlement discussions in New York, and management described these as "very advanced conversations." Avangrid stated that recovering cash flow and improving its New York credit metrics will be a priority after only a ~2% cash increase in the last rate case during Covid. Management was pleased that the New York Commission/Department Staff recognized the importance of credit quality in its public testimony. Although rate case uncertainty is relatively high, management pointed to $2Bn+ Climate Leadership and Community Protection Act (CLCPA) transmission in 2025-2030 as an example of unique visibility. Avangrid is engaging with stakeholders on ways in which it can have cash cost recovery for some of the long-term projects.

Investors have focused on Connecticut regulation recently for Avangrid and its peer Eversource (ES), but Avangrid management was quick to remind investors that it views the pending rate case as relating to less than 10% of its rate base. The company is waiting for a draft decision and is not in settlement discussions due to the late stage of the process. We did not discuss the Maine rate case, but the parties had the latest settlement conference last week.

Following the progress and favorable datapoints for Consolidated Edison's (ED) rate case joint proposal (i.e., settlement), we have been cautiously optimistic that Avangrid can receive a constructive outcome in its case. The magnitude of the cash increase leads to additional uncertainty, so we will be watching closely.

NECEC construction under evaluation

Consistent with the earnings call, Avangrid stated that it is evaluating the restart of construction on the transmission project after legal successes. The revised ~$1.4Bn capex projection, up from ~$1.2Bn and ~$950Mn originally, will likely pressure economics, in our view. The company redescribed the public contract structure where earnings decline upon commercial operations date (COD) after higher allowance for funds used during construction (AFUDC) stop accruing and cash recovery begins.

This remains a high-profile project, although we see de minimis earnings contribution upon COD; however, the project would have negative net income if construction is not successful. The latest cost estimate was described as reflecting the latest macroeconomic environment, but we believe that could be further increased with a very

tight labor and construction market. Watch for updates here – where admittedly cost increases and need for contract renegotiation remain front-and-center.

We believe the project is likely to happen but the economics post COD remain the key point of ambiguity. On this point, watch for discussion with Massachusetts yet again on reactions to contract negotiations following a 'change in law' exemption. Given our muted expectations we admit this is a potential upside on balance.

M&A - PNM... can it still happen?

Much of the meeting focused on the prospects of M&A based on the latest developments for the pending PNM Resources (PNM) merger in New Mexico but more broadly. First, Avangrid management stated that it remains committed to the PNM acquisition and is pleased that there is now a concrete date for a judicial path forward. The current route was described as the "cleanest" to address elevated procedural focus from stakeholders. Avangrid management stated that the most important next step will be for the respective Boards of Avangrid and PNM Resources to work on an extension of the merger process ahead of the July 20th termination date.

M&A ... and beyond PNM

Overall, Avangrid remains interested in future acquisitions regardless of what happens to the pending PNM transaction. If the PNM transaction is not completed, it appears that Avangrid would look at potential inorganic acquisitions sooner, as it stated a preference to not pursue multiple utility acquisitions at one time.

Smaller gas LDC divestments remain a priority such as Berkshire Gas in Massachusetts in an effort to prune the portfolio too. This should not be under-stated amidst the wider efforts to sell down renewable assets too.

With respect to the $2Bn of potential strategy asset sales, Avangrid clarified that these will be reviewed separately from the PNM process. This was described as very consistent with Iberdrola's ongoing financial planning methodology. Priorities that management considers when evaluating asset sales are (1) the relative net present value (NPV) of the asset under Avangrid versus third-party ownership; (2) consistency of the asset with its networks and renewables focus; and (3) geography of assets, among other factors. Here, we believe that some of the smaller natural gas local distribution companies and/or joint ventures could be candidates within the scope of the plan, which is not in the company's base case long-term outlook. There are some asset sales embedded in the long-term outlook, including a portion of the Kitty Hawk offshore lease and select renewable partnership transactions.

Avangrid described the third-party interest as still high following the IRA, despite the increase in assets available for sale on the market.

Credit metrics depend on PNM outcome

Avangrid did not go into specifics regarding its credit targets but described a desire to have some level of cushion above the 14% FFO/Debt current Moody's downgrade trigger over time. Management highlighted that Moody's stated a -100bp favorable potential lowering of the funds from operations (FFO)/debt target to 13% with PNM due to a higher mix of regulated earnings.

The delta in the credit rating requirement without PNM is an underappreciated nuance from our investor conversations that could lead to management pursuing additional assets sales.

Offshore wind evaluating domestic content

The Vineyard Wind project will not qualify for the new IRA +10pp incentive for using domestic content (DC). Vineyard Wind is set to have its first monopile installed in May, the most visible sign to date of construction progress. Park City and Commonwealth Wind are evaluating the DC benefit but stated that the higher incentive was not large enough to make the Commonwealth power purchase agreement (PPA) viable with the

Massachusetts counterparties. The DC benefits are offset by higher costs and additional supply-chain challenges. AGR expects to rebid its project into the anticipated January 2024 Massachusetts procurement, which has additional flexibility on reflecting future project cost changes.

We had not expected that Vineyard Wind would qualify for domestic content, as it is in such an advanced stage. Other offshore wind developers have described domestic content as a positive driver, so we had expected that Avangrid would have been more bullish on the prospects for its subsequent projects.

See our 26 April 2023 report, Avangrid: 1Q23 underwhelms but mgmt reaffirms FY23 guide. Regulatory outcomes key.

Avista Corp: New CFO, same focus

Our first meeting with new CFO after the formal promotion as expected represented a continuation in our long-standing series of meetings. We do not look for any change in strategy or approach to the company, perhaps with some small tweaks on the margin. Key takeaways from our meeting were: (1) the customer bill impact related to Climate Commitment Act [CCA] remains largely unknown. The customer bill impact relies on Department of Ecology's allowances granted to AVA, which is yet to be finalized. (2) management's core focus is securing good regulatory outcomes in Washington, Idaho and Oregon, specifically Washington given the multi-year rate case framework. (3) no major change in priorities or philosophy from the new CFO who has worked at Avista for nearly 20 years. We will be closely watching the next Washington rate case which will set the stage for ability to improve earned returns and grow EPS closer to rate base. Maintain Underperform on shares of AVA which trade at a premium valuation to our view of the fundamentals.

New CFO looking to continue the well plowed path

Avista has a new CFO Kevin Christie who is focused on continuing where his predecessor left-off: delivering good regulatory outcomes as the company works towards earning its allowed return on equity. The 1Q23 call introduced loose quarterly earnings guidance cadence and the company is evaluating whether it will continue the practice at all. While disclosures may be adjusted slightly, the core strategy including plans to invest in corporate venture projects is not expected to change.

CCA bills & financial implications entirely unknown still

The Climate Commitment Act (CCA) effectively establishes a cap-and-trade program in Washington. Under the program, Washington will hold quarterly auctions of carbon allowances with each allowance representing a metric ton of CO2. These allowances will be sold to carbon emitters with the revenue from sales allocated to state greenhouse gas reduction projects. Critically, utilities will receive allowances at no cost, per the state legislature. The utilities can have the Department of Ecology sell their 'free' allowances and the revenues generated from these sales will benefit ratepayers. The program applies to those businesses emitted more than 25k metric tons of CO2 per year. AVA qualifies for the program. AVA has yet to quantify the customer or financial impact related to the CCA program. Management cited it remains very difficult to determine the gas bill impact from the legislation. A key factor influencing the bill impact is the level of 'free' allowances the utility will receive and flow back to customers. "Low income" customers will not be impacted directly by the CCA legislation at least initially, but the affordability metrics have not been finalized. Management does not currently expect permanent cash flow drag from CCA although there could be timing between CCA payment and customer recovery in rates.

We believe this is one of the more important aspects of the investment outlook for all Washington utilities that is underappreciated by investors today: prices are already at $60/t+ and poised to climb further following discussions with participants in this novel carbon market (given its ambitious targets vs overall emission increases of late). Washington has some of the more ambitious decarbonization objectives which could have an outsized impact on customer utility bills in the 2020s.

Washington multi-year rate case the next reg. milestone

Management plans to file a multi-year rate case in Washington with the (relatively) new legislation in place. The duration of the rate case filing is still to be determined in the two-to-four-year range. If the utility is underearning by a large amount between rate cases AVA is allowed to file for better rate recovery with the 'circuit breaker' feature. Avista has made progress on revenue visibility and areas for further regulatory mechanism adjustment could be around the power cost sharing (ERM) and pension, the latter of which was a notable drag of late – a theme for many in the industry.

Quiet regulatory success in Oregon & Idaho visibility

Avista was able to reach a relatively fast cost of capital settlement in Oregon with a +10bp higher allowed ROE. Management pointed to a recent Idaho settlement for a peer utility with a similar 9.5% allowed ROE. Although Oregon and Idaho are smaller and historically relatively less contentious, these are favorable datapoints.

Lumen: No news is no news

Management is a wait-and-see-mode on its biotechnology investment in Lumen with clinical trial updates not expected until late 2024. The company will continue to mark-to-market the investment quarterly but major updates

Black Hills Corp (BKH) Execution, Without Distractions

Our meeting with management was constructive with the team expressing confidence in its credit metric improvement trajectory and described the overall strategic plan progressing well. Management did not fully close the door on further acquisitions, but this did not sound like an area that the company would meaningfully explore. We maintain Underperform on shares of BKH despite the more favorable meeting as we look for more consistent earnings execution and achievement of credit metrics to restore confidence.

Colorado stakeholder engagement remains a priority

Much of the meeting was focused on the Colorado backdrop which has been topical after the legislation session and with the new rate case filed recently. Black Hills is still engaging with stakeholders on the potential natural gas commodity risk sharing mechanism as well as ways to reduce volatility. Management indicated that it is too early in the process to have a view on reforms but is looking at mechanisms in other states to assess the potential parameters that Colorado could pursue. The changes to some smaller expenses recovery parameters such as lobbying was described as not material. The company's top focus remains operating reliability followed by affordability and believes that it can continue to balance the needs of all stakeholders. Lower commodity costs are in the best interest of all parties and BKH said that everything is on the table at this point. Examples included hedging improvements/expansions and physical gas storage investments.

Overall management did not appear overly worried about the financial impact of Colorado legislation but emphasized it is still very early days. The increased uncertainty is unfortunate and adds to risk in periods of extreme volatility, but we do not view the enacted Colorado legislation as having a material impact on our view of BKH or other Colorado utilities.

The Colorado natural gas rate case was filed shortly after the legislation advanced, and the timing was unrelated to the legislation. In the proceeding, BKH is requesting a ~33% revenue requirement increase that is complicated due to proposal to align rates across different customer geographies. Specifically, the consolidation of the gas cost recovery rate is part of the company's objective of moving towards more consistency.

M&A: Neither a buyer nor a seller

In the past, Black Hills has described itself as a platform for consolidation due to its scalable platform, but the company has not emphasized those attributes of late. Management reiterated that they are very focused on strengthening the balance sheet metrics which was a factor in why the company had pursued the potential minority stake (sub-20%) sale process in 2H22. While BKH did see interest in its assets from a variety of parties, it did not see the valuations that it saw in the market earlier in 2022 and found the conditions associated with the transaction is not adequately compensating for the additional complexity. BKH sold a small unregulated asset in 1Q23 but indicated that it is not pursuing any other unregulated assets at this time.

Progressing on the rate case front at a measured pace

Black Hills is currently targeting approximately three rate cases per year and has now announced Colorado and Wyoming Gas in recent weeks. If the historical cadence and managing messaging holds, this implies another rate case filing is being developed. Management has consistently said that it wants to vet potential filings with regulators and key stakeholders in the respective jurisdictions before disclosing the details to the broader public and investment community. This is a prudent approach. We will be closely watching for the next application as management looks to recovery higher operating and financing costs experienced over the past year-plus.

Historical earned ROEs will be a large governor of which jurisdictions are pursued for rate cases. Some utilities have had more sizeable deltas that have been eroded from macroeconomic pressures.

Credit metrics oscillate between agencies but improving

The 12% 2022 FFO/Debt disclosed with 4Q22 earnings is Black Hill's GAAP-derived calculation which does not necessarily align with Moody's/Fitch Ratings/S&P credit rating methodologies. BKH continues to target 14-15% FFO/Debt and believes that it is on track and potentially ahead of plan to achieve its internal and credit rating agency metrics. The cold winter drove higher volumetric sales and led to a faster than anticipated pace of improvement. The treatment of ~$260Mn regulatory assets is a ~5pp delta between agencies which is a driver between the relatively large spread. The $140-$160Mn at-the-market (ATM) equity in the near-term financing plan is designed purely by management to get back to BBB+ metrics, a level at which the company is comfortable.

1Q23 earnings improvement in the FFO/Debt QoQ along with favorable commentary was the biggest takeaway from earnings from the company. Progress on restoring the balance sheet is one of the most important areas that we and investors we talk to are focused on.

Generation upside opportunities could come with 3Q23

Black Hills recapped its incremental generation capital opportunities which management believes could potentially be formalized with the 3Q23 earnings call. The Colorado 400MW generation request for proposal (RFP) is expected to be initiated in the middle of 2023. The regulated utility can pursue up to 50% ownership if deemed reasonable, a broadly undefined standard. The mix of resource types has not yet been determined and the best technology choices will be balanced based upon levelized cost of energy (LCOE), reliability, and other related parameters. A Colorado Commission order is expected in 1Q24, but management said that it could be able to provide a capital plan update on the third quarter earnings call based upon the current schedule.

Separately there is a South Dakota 100MW build-own-transfer (BOT) process for mid-2026 commercial operations with a 10MW battery addition. This also represents upside to the plan.

Management is still evaluating small modular reactor (SMR) nuclear technology which was described as promising but not even an intermediate-term solution given the lack of commercial progress to date. The company is also reviewing carbon capture, which was described as very expensive, consistent with its exploratory regulatory filing in Wyoming. The next statutory update filing for Wyoming is due in March 2024.

Incremental generation capital is an area of upside and would likely come with 25-30% incremental equity financing to preserve credit quality. Still, this represents net upside to the plan if the utility can present a case that its ownership is reasonable versus third party ownership.

Centerpoint Energy: Even More Robust...

We met with the whole team including newly joined CFO Chris Foster. We saw the meeting as among the most offensive across our utility coverage and still offered upside against a robust set of expectations. Mgmt prospects for rolling forward their 8% EPS growth in '25 continues to progress nicely as the single most important metrics investors are watching (despite offering an already heathy long-term 6-8% EPS).

Legislation is key to the story: poised for resolution imminently

Management suggested it could yet increase capex modestly upon successful passage of the new DCRF mechanism in the Texas legislature this year. We anticipate such a move would allow the company to file for a further, subsequent DCRF filing with the PUCT for recovery this Fall (in lieu of its rate case – which would be delayed to 1Q24 on the electric side). Meanwhile its gas case remains contemplated for this Summer.

A more meaningful step-up in capex remains possible in '25 with mgmt having repeatedly flagged a further $3Bn of upside opportunities lingering.

We perceive authorized equity ratio upside for its gas utility

With a 54% authorized ratebase for its gas utility in Texas, we see upside in its forthcoming rate case up to 60% - consistent with peer utilities in the state including ATO. Watch this as a best nuance in coming months – and follows earlier expectations for a higher equity ratio to be enabled via legislation this session (this does not appear likely at this point). On balance, this should have an annualized effect for '25. We estimate this is worth ~1.5c.

Expansion of emergency generation lingers too

While unlikely to be passed in the current legislative session, we note a more meaningful expansion of emergency generation backstop at its Houston Electric utility appears a potentially further meaningful (and unexpected) angle for many. We note the existing 10-year emergency gen program will begin recoveries this Fall and should boost cash recovery metrics later in the year ($700 Mn over 6-years).

Rate case activity will pick up later this year – not overly concerned

We see a potentially heightened period of investor anxiety as the page turns to 2024 with twin major rate cases for its Electric & Gas businesses in Houston/Texas. We stress latest discussions continue to suggest substantive derisking in the backdrop for both cases. We continue to believe that an equity ratio increase (at least up to 43.75% from 42.5%) remains an entirely conceivably outcome in the electric case despite Oncor having recently concluded its case without any such uplift. See the fears resulting from the last rate case cycle in Texas as likely sizably alleviated through the next cycle.

Elsewhere it will file its latest Minnesota gas case in November and then its latest Indiana electric case this December. The totality of all these cases remains the linchpin behind rolling forward its commitment of 8% EPS growth in '23/24 over to '25. We see growing reason to believe this should be achievable.

O&M: still firmly holding the line, despite peer pressures

Despite outsized O&M pressures from its two peer gas utilities in 2022, we see CNP as quite confident in its ability to hold the line at a flat budget. Both ATO and OGS have signaled outsized (high single digit) inflation in their current year guidance; by contrast CNP has indicated even without its inflation mitigation measures costs would only be organically increasing at a 2-3% clip. We flag the success in cost mgmt as a key differentiator for CNP vs peers.

CMS Energy (CMS) Looking for summer

We met with CMS Energy (CMS) Chief Executive Officer (CEO) Garrick Rochow and Chief Financial Officer (CFO) Reiji Hayes during AGA. CMS reiterated confidence in its ability to achieve FY23 guidance targets, with increased confidence to the high end of the range, despite 1Q23 headwinds. Management emphasized that its FY23 guidance includes contingency for summer weather and storms – meaning that FY23 guidance is achievable even if summer conditions deviate from "normal." Further, CMS characterized the Michigan regulatory construct as strong despite the latest less predictable developments, including a less favorable Staff proposal in Consumer Energy's gas rate case and elevated stakeholder scrutiny post the February ice storms. CMS is confident in its ability to settle its electric and gas rate cases in Michigan. We maintain our Buy rating on shares of CMS given the above-average earnings growth outlook, which is supported by the strong Michigan regulatory backdrop despite recent regulatory noise.

Latest convertible transaction and tender accretive to FY23 earnings

CMS' recent $700Mn, 3.375% convertible senior notes due 2028 and subsequent cash tender offer for up to $150Mn of Consumers Energy notes contribute to FY23 corporate-level cost-saving initiatives that offset 1Q23 earnings headwinds. The convert represented a pull-forward of 2024 financing needs. A portion of convert proceeds were used to cash tender operating company bonds trading below par. We await 2Q23 earnings for quantification of FY23 earnings uplift related to the financing transactions. Cost accretion from the financing transaction as well as CMS tax planning initiatives should offset the 1Q23 earnings headwind from weather and storms.

MI regulatory backdrop constructive, management confident on 2023 rate case outcomes

Management remains confident about the MI regulatory construct and continues to target settlement across gas and electric rate cases. Consumers recently submitted rebuttal testimony in its outstanding Consumers Gas rate case. The testimony revised Consumer Gas' revenue deficiency to $175Mn from the $212Mn initially requested. Management characterized the Michigan Public Service Commission (MPSC) Staff's proposal, which stipulates the $89Mn revenue increase as "strong." Yet, CMS doubled down on its gas sales forecast – the higher Staff gas sales forecast was a driver of the lower Staff revenue proposal (for details, see our 8 May 2023 report: US Utilities & IPPs: Michigan: We still see LT value despite NT regulatory noise. Reit. Buy on CMS & DTE). CMS implemented a sales forecasting methodology consistent with MPSC order from over a decade ago, and management remains encouraged that the MPSC will side with CMS' sales forecast, consistent with historical precedent. We look to June 1st investor meetings with the MPSC for further insight into MPSC's position on key utility issues.

MISO capacity auction supports long-term earnings trajectory, despite YoY decline

The latest MISO capacity auction results printed 2023-2024 capacity prices down significantly from 2022-2023 levels. While it is difficult to compare the results on a year-over-year basis given MISO's pivot to seasonal capacity pricing, the MISO 2023-2024 capacity auction yielded $2/MW-Day to $15/MW-Day capacity prices (depending on the season) versus $236.66/MW-Day capacity prices in 2022-2023. CMS has exposure to capacity prices via its Dearborn Industrial Generation (DIG) operating asset. The lower 2023-2024 capacity prices are unlikely to impact the near-term earnings trajectory given that CMS has contracted majority (~80%) of its near-term capacity exposure. However, if capacity prices continue to decline in future MISO auctions, this may lower 2025+ earnings trajectory at DIG. We currently embed ~$4-5/MW-day (average) capacity prices 2025+ in our CMS earnings estimates. Management expects that despite the lower YoY capacity auction print, the longer-dated transition from renewables and out of coal will support higher capacity prices prospectively. Further, CMS emphasized that its 6-8% EPS CAGR is intact regardless of potentially lower out-year MISO capacity prices.

We see reason for MISO capacity prices to rise between both the shift towards a sloped demand curve to reduce future volatility as well as expanded accreditation criteria which could well reduce capacity qualification for a variety of assets – looking specifically at their performance during the most acute events. On balance, prices likely recovering from here but not back to the all-time peaks from before. Still anticipate robust long-term capacity pricing.

2024 Integrated Resources Plan (IRP): More owned solar, stand-alone storage

CMS is expected to file its next IRP in 2024. While it remains early stages, we expect the next IRP to increase owned solar and stand-alone storage targets. The previous CMS IRP pre-dated IRA tax credits. We expect the incorporation of IRA credits in the plan to result in greater utility-owned solar deployment targets (~50-60% owned solar target currently). Further, we may see further ramp in stand-alone energy storage investment. The upcoming IRP is critical to informing the long-term earnings and growth outlook for the utility.

DTE Energy (DTE) Reliability wags the dog

We met with CEO Jerry Norcia, CFO David Ruud, and President of DTE Gas Joi Harris during AGA. Key takeaways were: (1) The response / mitigation plan to 2023 earnings headwinds (rate case, weather, storms) is progressing better than expected. The 2023 electric rate case decision is fundamental to FY24 EPS. (2) DTE has seen strong stakeholder participation in Integrated Resource Plan (IRP) proceedings to date. 'Controversial' areas of the IRP include timing of Monroe coal plant retirements and treatment of undepreciated balance of Monroe coal plants. (3) Michigan Public Service Commission (MPSC) is likely to paint a more positive picture of MI regulatory backdrop for investors in upcoming June 1st investor meetings. Management maintains strong alignment between DTE and MPSC as DTE plays critical role in MI infrastructure and electrification goals. We maintain Buy on DTE with shares trading at a discount to the group despite above-average investment and earnings growth outlook.

Coal retirement, undepreciated balance key issues in IRP

Management highlights strong stakeholder participation in ongoing IRP discussions supports IRP settlement prospects. Key areas of pushback include timing of Monroe coal plant retirements. DTE's IRP currently contemplates two units of Monroe retiring in 2028 with the other two units retiring in 2035. Stakeholders argue that DTE should fully retire Monroe as early as 2030. Further, treatment of undepreciated coal plant balances is an area of stakeholder contention, specifically whether undepreciated balances should earn debt or equity return. The accounting treatment of ~$700Mn undepreciated Monroe coal plant balances pose material financial implications for DTE relative to other IRP considerations. We note that Consumers Energy and Indiana-Michigan Power IRPs stipulate 9% return on undepreciated coal balances. This suggests a strong precedent for equity-like recovery. Lastly, management highlights that of its 3,200MW solar deployment targets, only 900MW is attributable IRP solar investments while the other 2,400MW represents voluntary renewables. Of the 2,400 MW voluntary renewables, 2,300 MW are already subscribed. DTE is ahead of schedule for subscribing voluntary renewables and continues to see significant demand in this end market. Voluntary renewables program offers contingency to the IRP solar targets pending approval. Management aims to settle the IRP by mid-July.

Regulatory construct supports MI investment goals

DTE reaffirmed its commitment to spend $22Bn capex over the next 5-years. The company believes regulatory and political goals in Michigan – including electrification, EV penetration and manufacturing load growth – supports DTE's 5-year capex plan. Overall, management signaled infrastructure investment goals in MI support MPSC and utility alignment and continues to view favorable MI regulatory construct despite recent noise. The MPSC's recent decision approving 700 MW of DTE's renewable program is the latest positive regulatory datapoint for the company. We look to June 1st MPSC meetings and intervenor testimony in DTE's electric rate case expected June 13th to further gauge the regulatory backdrop in Michigan. However, we are similarly confident in a favorable MI construct.

Resiliency efforts focus on tree-trimming, automation & (longer-term) undergrounding

Management emphasized that severe storms are Michigan's new reality, and double-downed on the near-term criticality of resiliency investments. DTE is focused on advancing its tree-trimming program and ramping grid automation to strengthen grid resiliency. Automation reduces storm duration approx. 70-80%. While DTE requires five years to complete its automation investment initiatives, automation will drive ratable year-over-year improvements to system resiliency through 2028. DTE is five years into its seven-year tree trimming initiative. Management emphasized that tree trimming initiatives mitigated customer outages during the February ice storm – only 16% of customers lost power within the 24 hours of the ice storm versus ~30-40% customer outages within first 24 hours of a severe 2017 storm. Management attributes improved

outages to tree trimming initiatives. Longer-term, DTE will look to ramp undergrounding investment. Currently, approx. 1/3 of DTE's grid is underground while another 1/3 represents higher-voltage wires with stronger poles. The last 1/3 (~15-16k miles) represents old, above-ground wires. This portion of the system is unlikely to support electrification and EV trends long-term. DTE aims to underground as much as possible, although this investment opportunity is likely longer dated.

Duke Energy (DUK) Balancing credit

We met with CFO Brian Savoy, SVP & Head of Natural Gas Sasha Weintraub, and VP of Investor Relations Abby Motsinger. Reactions to the meeting were among the most cautious of AGA large-cap attendees given emerging risk of a modest-sized acquisition: fears linger this would effectively be an over-equitized transaction. Care to indicate balance sheet strength otherwise will remain essential.

90-10 mix feels right, but will evaluate smaller deals

With the pending transaction to monetize the commercial renewables business, DUK mgmt expects to be a mostly regulated business model on a go-forward basis with an approximate mix of 90-10 electric to gas. While there is some (modest) flex on that balance, mgmt indicated there is no desire to significantly expand its natural gas mix (ie to 70-30 electric). Several other parameters will dictate whether the company would consider a transaction for regulated assets including 1) preference for a jurisdiction that DUK already operates in and which has a constructive regulatory framework, 2) credit-accretive asset, 3) balanced financing mix including ~50% equity, and 4) additional operational benefits / synergies. While the parameters initially would appear to limit the scope of transactions, we perceive DUK intends to be disciplined with its approach to any potential transactions in order to remain opportunistic.

Balance sheet implications are top of mind

Mgmt reiterated that the company's existing base capital plan does not contemplate M&A, though a potential transaction would likely require a mix of funding. Unlike the Piedmont gas acquisition, which was principally debt-funded, expect a more balanced mix in the event of a transaction, likely incorporating 50-50 debt and equity. Mgmt indicated that for the deal to be credit accretive based on this type of mix would be a gating item to a potential transaction. Regulatory considerations have been top of mind for utility strategic acquisitions with recent transactions being derailed altogether (Kentucky Power) or otherwise substantially extended (New Mexico). DUK mgmt noted that it would expect to have a compelling case in front of regulators in a jurisdiction where the company already operates, centered around customer benefits and potential for operational improvements.

Resource plan updates to focus on reliability needs

DUK expects to file the next iteration of its integrated resource plans (IRPs) in both North Carolina and South Carolina this calendar year. While decarbonization remains a key theme of the overall mgmt transition, mgmt stressed the need to balance additional considerations of 1) transmission constraints limiting the number of MWs of renewables that can be added and 2) the need to account for higher assumed winter peaks. The parameters as outlined suggest additional need for further generation – either traditional dispatchable or large-scale battery storage. The setup is for potential long-term capital plan upside in the *next* iteration of multi-year rate plans in DUK's Carolinas footprint.

Fuel and renewables sale to provide 50-75 bps uplift

Improving balance sheet metrics based on fuel recovery have been a theme across the sector. In addition to recovery of the "big" balances at DUK's Florida and North Carolina utilities, the pending sale of the commercial renewables business is expected to provide an uplift of 50-75 bps by ear-end 2023 on a run rate basis toward the company's 14% consolidated target. Potential upside on funds from operations (FFO) to debt could still materialize in the form of a credit accretive transaction as discussed above, as well as a better than expected cash flow outcome from the ongoing North Carolina cases – recall that Duke Energy Progress (DEP) achieved a partial settlement, suggesting a degree of regulatory certainty. DUK expects its fleet to qualify for nuclear production tax credits (PTCs) under recent legislation, but federal guidance is yet to be published including key prevailing wage guidelines – mgmt noted a high degree of confidence in the latter point.

Consolidated Edison (ED): JP, all the time

We met with ED CEO Tim Cawley, CFO Robert Hoglund, Treasurer Yukari Saegusa, and Director of IR Jan Childress.

CECONY settlement approval timing still uncertain

The Con Edison Company of New York (CECONY) announced a joint proposal (JP) for a settlement of its electric and gas rate cases with interveners and staff in February 2023 – while this is later than in previous years, the time frame is not significantly stretched, with new rates in effect January 1 retroactively assuming commission approval. Data points suggest that the length of time without a commission approval of the JP is due to elevated workload at the commission – Con Ed's smaller Orange & Rockland utility reached its own JP in November 2022, with approval coming at the commission's April 2023 agenda meeting. Management indicated that there has not been an active back and forth or numerous data requests since announcing the JP – in our view, this suggests that the delay is more likely to be a workflow issue at the commission. Investors are increasingly sensitive to commissions modifying settlements that are presented in recent months, with the WEC electric rate case in December being a prominent recent example of a premium jurisdiction catching investors by surprise.

Steam case – talks ongoing, ROE should trend higher

Given the status of the Steam rate case (settlement talks remain ongoing), incremental updates on expectations were limited. Management continues to stress the need to add a decoupling mechanism in order to incentivize the utility to invest in decarbonization while supporting lower consumption by customers. Absent full decoupling, weather normalization would help to take some of the seasonal volatility out of the business. It remains uncertain how likely these items would be to receive support in a potential settlement, though we note that initial staff testimony opposed decoupling.

Large projects outside of latest rate case

ED management has been outlining the incremental opportunity from large development projects outside of its current rate case. Previously announced projects, including Reliable Clean City (RCC) at $780m and Brooklyn hub ($800m), remain part of the existing capital and financing plan, along with the yet-to-be filed Queens planned substation (Gateway), which the company initially estimates at $1.1B. While projects outside of the approved rate plan introduce a degree of incremental risk, the system improvements are aligned with the city's and state's broader decarbonization goal and climate priorities, which we expect to be long-term supportive. We expect incremental announcements of state-directed investments supporting electric vehicle infrastructure under the New Efficiency New York (NENY) program – recall that ED had previously received $300m in investment awards supporting make-ready investments in electric vehicle charging infrastructure.

Expect equity layer to stay at 48%

Under the (yet-to-be-approved) joint proposal, CECONY received a 9.25% ROE with a 50 bps band before customer sharing. The approved equity layer can be flexed up to 50%, though this would only be to the utility's advantage in the event that the earned ROE can sustainably be at or above the 50 bps threshold. Management indicated that staying above the 50 bps band for a sustained period is not the baseline expectation and correspondingly that the equity layer will not be flexed up.

Dominion Energy (D) Wordsmithing the business review

Key takeaways are (1) the impression that Dominion could like to have slightly more than 100bp of FFO/Debt contingency over time above the downgrade threshold; (2) the company targets earning at the allowed return level in Virginia prospectively; and (3) We maintain Underperform on shares with downside to Consensus adjusted EPS forecast and a significant degree of financial & regulatory uncertainty that warrants a discounted valuation today versus utility peers.

Business review progresses: Holistic analysis

Dominion management emphasized that it did not have updates to its business review and is still evaluating the best path forward to achieve its objectives. The company is still fairly definitive on its plans to host an investor day by September 30t hand provide the investment community as much information as possible. The company is evaluating potential asset sales vs equity/equity-linked securities and the preference appears to be heavier on asset sales based upon where the stock trades. The company emphasized that the analysis is not as simple as comparing the implied P/E on an asset sale versus where the stock trades because there are qualitative and quantitative factors to consider. Dominion did note that there are dis-synergies associated with larger core state regulated utility sales that would need to be (and would be) incorporated into the analyses. The company acknowledged again that it has been a challenging time for shareholders, but it is hopeful it can emerge from the business review process positioned to deliver future growth with its good assets & good people.

Equity-linked securities are also under evaluation but appear less likely due to the limited equity credit (25-50%) that would not support as meaningful of leverage reduction. Overall the company is trying to minimize but not necessarily eliminate the common equity needs. The core businesses are the state regulated utilities and the unregulated businesses are not the core assets. These include the Millstone nuclear plant, Cove Point LNG export facility, contracted renewables, and renewable natural gas investments.

Credit metric targets is a key investor debate

The company is still evaluating what the financing picture looks like for the post business review emerged company but is open to modest at-the-market (ATM) equity to finance growth. Management believes there is a tremendous opportunity to deploy capital and success on reliability driven investments will require a 'really good/strong balance sheet'. The final FFO/Debt credit targets have not been publicly communicated yet but management has provided examples of negative historical items to provide a sense of magnitude: ~70bp for fuel cost deferral, ~25-30bp for regional greenhouse gas initiative (RGGI) customer relief, and ~35bp first triennial review settlement.

We currently assume a 15% prospective FFO/Debt level in our estimates and continue to believe this is a fair assumption but potentially slightly on the low side of what management ultimately targets. With more regulated utilities making higher credit metrics (~17%) a feature deserving a premium valuation, we will be watching with intrigue of where the company ultimately opts to target. 14.5-15.5% or 15-16% could ultimately be the sweet spot.

Dividend change still off the table

The guiding principle that the $2.67 annualized dividend per share will not change is intact. The company reiterated that it is targeting mid-60% payout ratio and it could take time to achieve to the extent that the post business review emerged company has a lower earnings per share.

Many investors we speak to have advocated for more flexibility in the dividend decision. Dominion has remained steadfast that it will not lower the dividend per share as part of this business review.

Virginia engagement remains strong

Dominion characterized its Virginia regulatory and legislative relationships as strong and pointed to the enactment of legislation in 2022 as a success. While the company acknowledged noise in the process, the chief objective of a healthy utility with regulatory certainty has largely been achieved. The meaningful customer bill relief sets the stage for a hopefully less contentious rate review that is anticipated to be less controversial given some of the new 'guardrails' on key parameters. Despite the legislative process, Dominion described its engagement with the Virginia Commission Staff as reasonable, productive, and professional. Prospectively Dominion stated that its objective is to earn at or very close to the allowed rate of return.

Between organic sales growth and cost control, Dominion could be in a position to exceed its plan, but we believe a planning assumption (consistent with our estimates) around the allowed return is prudent before we have more experience in the new regulatory regime.

Essential Utilities: Repairing the repairs

Our management meeting was dominated by discussion of (1) new repairs tax guidelines; (2) the outlook for potential Pennsylvania (PA) natural gas earnings in the late 2023 rate case; (3) the balance sheet trajectory; and (4) the prospects of water acquisitions. Our investor conversations have focused on the equity overhang most acutely followed by the PA regulatory certainty with the forthcoming rate case. We maintain Neutral on shares with the segment trading at discounts to peers that appear approximately appropriate due to the lower visibility into earnings growth today.

Repairs tax reforms: 'Not a night & day difference'

Essential Utilities' Peoples Natural Gas utility has one of the larger benefits from repairs tax in our coverage universe from our review of regulatory and financial filings. Repairs taxes are far from new, and the water utility has been utilizing the flowthrough tax accounting since 2011. The new Internal Revenue Service (IRS) guidelines have been an area of industry speculation for over the five years. WTRG is still evaluating the new guidelines to see how it compares to their current policies and at a high level, management did not expect a material impact while emphasizing it was still relatively early in its review. Essential stated that it has been conservative in its policies, so it did not see wide deviations between the guidelines and its accounting. Although the new IRS parameters are specific to natural gas, management expects to align its water policies with the natural gas accounting. The company believes it will be able to provide more clarity with its next earnings call.

Repairs tax was described as approximately representing ~$50Mn for water and $45-50Mn for natural gas annually. The water business has reserves in place that could be unwound. Prior to Essential Utilities' acquisition of the PA natural gas business, repairs tax was not being elected so there is less historical within even a broadly interpreted scope. In the water rate case, there is a ~$160Mn annual capex of repairs eligible spending with the benefits flowing back to customers.

There is increased uncertainty with the new IRS represents a degree of overhang although our initial review of the IRS parameters and company engagement do not appear to be a regime change that would be unexpected for companies. Repairs tax has been a contributor to the delta between the earned and allowed return on equity which was a feature of the acquisition and related agreement to file a rate case. As a result, management would have expected and planned for the 2023 rate case within their EPS trajectory which extends through 2025.

Capital needs predictable - except PFAS

Management remains comfortable with its natural gas spending and did not anticipate any material changes to the volume of annual pipeline replacement. The capital opportunities historically and prospectively are driven by physical/operating constraints which supports ~25 miles per year. After the rate case, the Pennsylvania earnings profile should more closely align with rate base growth prospectively.

In the water business, the capital was similarly described as a fairly predictable $500-600Mn annually with incremental needs as the business grows from inorganic acquisitions. Essential Utilities has developed its initial estimate of Perfluoroalkyl and Polyfluoroalkyl Substances (PFAS) capital and operating expense requirements which are still being refined. Before providing public disclosures, management wants to evaluate if there are opportunities for funding from the Federal government and industrial parties.

Comments are due in mid-June to the Environmental Protection Agency (EPA) which should be the next datapoint of insights into potential higher spending. Management was quick to emphasize that whatever spending estimate is provided for PFAS would not be entirely incremental to its base plan. The company will seek to manage affordability and look for ways to remove other spending from the plan for treatment and related areas. Net, there will still be additional spending required.

High revolver costs & regulatory needs point to equity issuance sooner rather than later

Essential currently has ~$600Mn short-term debt on the revolver which appears to be a primary driver for why management plans to issue the $500Mn equity in the 2023 plan sooner rather than later. The company is still evaluating the mix of security types, methodology (block and/or at-the-market [ATM]), and timing. The current credit metrics are depressed below the 12% FFO/Debt downgrade threshold and have been for at least the past two years. Essential Utilities expects to improve to above 13% FFO/Debt pro-forma for the $500Mn equity issuance and assuming increased cash collection from customers in the Pennsylvania rate case. Besides credit rating agency considerations, there is a need to realign the Pennsylvania natural gas and water capital structures ahead of the 2023 and 2024 rate cases.

Water acquisitions come in fits & starts but still upside

Management described a holding pattern for the DELCORA acquisition and reaffirmed that the odds of financially closing in 2023 appear low based on the regulatory datapoints. Beyond DELCORA, management remains optimistic that it can continue its cadence of smaller water roll-ups but has not given up on more sizeable deals. There has not been a change to management's view that another natural gas acquisition is unlikely.

Investors have perpetually focused on the public valuations for natural gas and water utility pure-play peers, but we did not get the impression that further simplification is a management priority.

MDU Resources (MDU) Cutting a path to the big spin ahead

We met with CEO Dave Goodin, CFO Jason Vollmer, and Director of Investor Relations Brent Miller. Maintain Underperform on MDU given negative total return implied by our valuation.

Juggling several processes as Knife River prepares to spin

MDU's tax-free spin of materials subsidiary Knife River will take effect at the end of the month, with when-issued trading of both the spin and 'RemainCo' tickers effective on May 25. Last week's Investor Day addressed the question of margin improvement, targeting 15% EBITDA margins by 2025 under a new strategy that accelerates ongoing initiatives beyond passing through price increases. We continue to expect Knife River to trade at an EBITDA multiple in the mid-high single-digit range, already largely reflected in the price of the consolidated MDU.

Construction Services Group (CSG) firing on all cylinders

The other substantial data point to be completed in coming weeks is the outcome of the strategic review of the CSG business. Mgmt has not indicated whether one outcome is preferred vs. another – we note that tax consequences are likely to be a meaningful input as basis is in part impacted by historical bolt-on acquisitions. The scale of the business is another key consideration as a standalone CSG would likely be one of the smaller pure-play public peers in the contracting services business. Fundamentals of the segment have continuously remained strong – mgmt noted strength in customer activity and backlog growth in traditional areas of strength including high tech manufacturing, hospitality, and retail distribution centers.

Electric demand set to rise, can rate base follow?

We continue to see rate base growth at a 'pure play' remainco as the key metric to watch for re-rating potential, which remains highly dependent on the outcome of the CSG process. Mgmt noted one particularly strong data point for electric utility fundamentals in the form of a large bilateral interruptible contract with a data services offtaker which is expected to ramp to total demand of 180 MW vs an existing load of 660 MW. While the announced customer is contracting under an interruptible supply agreement and thus MDU does not have to add rate base investment to accommodate higher peaks, the selection of MDU's territory for a sizeable data center offtaker is an important affirmation and potential indicator of future rate base growth. Note that at present MDU does not see rate base growth needs in order to meet growth of data center or other customers. The ability of mgmt to affirm/address long-run rate base growth is expected to take on greater importance as MDU pivots to a pure play model. With affordability as a percentage of wallet share consistently scoring among the best across our coverage, we look for additional data points suggesting acceleration.

MGE Energy (MGEE) Incrementalism here

We met with CFO and Treasurer Jared Bushek and Director of IR Ken Frasetto. We maintain Underperform on shares due to relative valuation considerations.

Capex still skewed toward renewable generation

MGEE recently refreshed its long-term capital plan, targeting over $1B in investment over the 5 years ending 2027. As has been the pattern in recent years, the current renewables buildout accounts for a substantial part of capex over the coming five years, with an incremental contribution from the purchase of a stake in West Riverside. Previously announced renewables projects where MGEE is a 10-33% partner with larger utility peers are accounted for in the current WI rate case, which has forward test years covering 2024 and 2025. Years 2026 and 2027 include white space capex, though we expect that this includes projects with partial line of sight and early-stage development.

Gas utility incrementalism, de-carbonization opportunity

Large-scale infrastructure investment is less of a theme for the gas utility. Management notes that long-term planning and proactive investments have reduced the incidence of leak-prone pipe; thus MGEE's system does not have the same need to replace aging infrastructure as other large urban systems. We expect capital investments to continue to focus on core customer growth and maintenance capex priorities. MGEE Gas has rolled out a renewable natural gas (RNG) tariff program for customers to opt in to, but given pricing tied to the Renewable Identification Numbers (RINS) program, this is likely to remain a small program for less price-elastic customers. A more ambitious target of reaching net zero at the gas utility is expected to accelerate the use of offset programs by its target date of 2035 – for the current 5-year capital plan, we continue to see the balance as weighted toward investment in the electric side of the regulated utility business.

Rate case ask is modest versus 2021-22

Management framed its current electric and gas rate case requests as relatively low risk given the size and tenor of the request. MGEE's requested 9.8% ROE is unchanged and in line with recent outcomes. We see the request for a higher equity layer as somewhat risky given the already-elevated level, though note that equity layer is one area where the commission has shown flexibility to the upside of late. Base rate requests of 3-4% for electric and gas screen favorably versus MGEE's increases in recent years, which were driven partially by the elevated cost of fuel including natural gas. Overall, we see MGEE's rate case as generally low risk and likely to deliver a key data point for the commission's latest views, including some of the first on-record statements from the latest commissioner, who was not part of the bench for the WEC settlement modification.

The mantra remains stick to our knitting

MGEE management was adamant that the company sees continued success and a long runway of opportunity in its stated strategy of focusing on regulated investments in its existing WI service territory. We perceive very little appetite for M&A despite a stock that would be considered valuable currency, either with respect to regulated rate base or unregulated infrastructure investments. MGEE tends to limit the scope of its communication with investors (no earnings call, EPS guidance), though given the persistence of its premium to the peer group, there is little incentive to change the strategy at present.

See our 17 March 2023 report, MGE Energy: Smallest WI utility has strong start in '23, still expensive; Reiterate Underperform.

New Jersey Resources (NJR) Solar is core

We met with New Jersey Resources (NJR) CEO Stephen Westhoven and CFO Roberto Bel. Management emphasized strong visibility to 7-9% EPS CAGR given organic growth at Storage and Transportation (S&T), more normalized earnings at Energy Services due to Asset Management Agreements (AMA), New Jersey Natural Gas (NJNG) rate case in 2024, rate base-like return on solar projects, and long-term contracts at Leaf River. Management characterized earnings as volatile in the near term (i.e., above the high end of the 7-9% guidance range) due in part to AMA. AMA revenue recognition is somewhat "lumpy." However, AMA furthers the company's plan to de-risk Energy Service and strengthens the balance sheet overall. The company did not comment on any incremental M&A plans. We maintain our Underperform rating on NJR, with shares trading at an unfavorable risk/reward skew.

Committed to solar asset ownership and continued solar development

Management doubled down on the benefits of solar asset ownership, specifically given the ability to generate strong cash flow and return on capital. Management targets high-single-digit unlevered returns on solar projects. Project returns are assessed on a project-by-project basis. In other words, individual solar projects must offer strong stand-alone returns for NJR to progress with project development. The company continues to see value from solar ownership and did not detail expectations for solar asset sales, unlike many other utilities pursing renewable M&A. IRA credits are incremental to NJR's earnings outlook.

New Jersey Governor Executive Order, Future of Gas are favorable to NJR

NJR characterized the New Jersey Future of Gas proceedings and the Governor's recent Clean Energy Executive Order as favorable to NJR long term. Despite NJ political goals to transition away from natural gas, NJR believes that its current natural gas infrastructure will enable the energy transition. The Governor's order specifically carves out decarbonized fuel and prioritizes supporting jobs in the pipeline industry. Thus, NJR sees its New Jersey pipelines as a crucial element of NJ's long-term decarbonization plans given the ability to blend in hydrogen or renewable natural gas (RNG). However, the timeline on when NJR can capitalize on these opportunities remains undefined and likely far out.

Organic expansion opportunities across S&T business

Management highlighted potential for the fourth cavern at its Leaf River salt cabin storage facility in Mississippi. While the company has yet to announce a deal to expand the facility, the latest uptick in liquified natural gas (LNG) development activity and focus on reliability in the Southeast supports additional storage capacity. Further, management emphasized organic expansion opportunities at the Adelphia Gateway pipeline. Strong demand remains for pipeline capacity given its location within the refining-heavy Philadelphia region. Organic expansion may be palatable from a permitting perspective, with brownfield expansion and/or small laterals to incremental customers easier to certify. The pipeline is currently fully subscribed.

See our 2 February 2023 report, US Electric Utilities & IPPs: PowerPoints: CMS/UGI/NJR beats, EXC ComEd, PCG US1, Offshore Wind & DUK.

Northwest Natural (NWN) Where policy and practicality on decarbonization meet

We met with CEO David Anderson, CFO Frank Burkhartsmeyer, and SVP Strategy & Business Development & President of NW Natural Water Justin Palfreyman. NWN emphasized that 4-6% EPS growth rate does not assume additional RNG projects or water acquisitions beyond what the company has already announced. Incremental (or unannounced) M&A and/or RNG development opportunities represent upside to the current earnings trajectory. Nevertheless, management expects consolidation will continue across gas and water operations. NWN remains open to both buying and selling utility assets if in the best interest of shareholders. We monitor incremental M&A announcements, although we expect the overall NWN business mix will diversify away from natural gas as RNG and water investment ramps overtime. Maintain Neutral on NWN with shares trading in-line with fair value.

RNG an undefined, ‘clean slate’ growth opportunity

NWN only recently launched its competitive renewable natural gas (RNG) business at its NW Natural Renewables subsidiary. NWN has committed $50Mn to develop two RNG projects, one of which is approaching commercial operations date (COD) while the other facility is expected to reach COD summer 2023. The RNG business remains early stages and the magnitude of potential incremental earnings or capex upside is undefined. Yet, management double-downed on targets to grow the competitive RNG business, citing that the latest RNG projects are not intended to be 'one-off' efforts. Management highlights that the credit backing of NWN supports its competitive advantage in RNG development - offtakers i.e. utilities prefer contracting with credit worthy counterparties. NW Natural Renewables aims to contract a majority of RNG offtake with long-term contracts. This stands-out relative to peers that leave greater uncontracted exposure to sell RNG into Renewable Identification Numbers (RIN) or Low Carbon Fuel Standards (LCFS) markets. However, NWN may increase RIN/LCFS 'spot' exposure slightly as the business scales and risk profile moderates. NWN expects strong RNG demand from utility counterparties although management confirmed commercial counterparties may likely drive RNG growth longer-term. NW Natural Renewables targets double digit unlevered returns for RNG projects. Partnerships were described as a tool to facilitate development of larger-scale RNG projects.

NWN to diversify business, increase Water business mix

'Tuck-in' acquisitions of small, private water companies remains a core component of NW Natural Water business strategy. NWN targets single digit unlevered returns (i.e. 'rate base like’ returns) on water acquisitions. NWN has invested almost $300Mn in water M&A and follow-on capex to-date which could scale to ~$500Mn in time. Management implied objectives to increase the percent business mix attributable to water longer-term. NW Natural Water recently acquired water and wastewater service companies in western Oregon. These acquisitions diversify NW Natural Water business and expand total addressable market of the water business overall by broadening business exposure to the O&M contract services market.

IRP process shows difference ways to invest in decarbonization

The Oregon 2022 natural gas integrated resource plan (IRP) process has been very topical and an area of investor focus after the Oregon Public Utility Commission (PUC) Staff provided comments and recommendations. The Staff in part advocated for what it viewed as less expensive emission reduction compliance solutions. While also within the parameters of Senate Bill 98, the Staff also noted that to date the RNG projects have been out of state. NWN management described intervenor testimony as part of the process and in part representing a difference of opinions in compliance strategies. This did not sound like a total surprise to management given the novel legislation. Management is hopeful that it can achieve lower cost carbon reduction solutions as well as additional in-state resources as well, indicating strong alignment.

NorthWestern Corp (NWE) Dare to Dream

Our meeting was constructive with management describing themselves as among the most bullish on the jurisdiction in nearly twenty years. Our client conversations have shown little receptivity towards shares based on the historical view that NWE has unfavorable regulation and limited growth. These were indeed true in the past and we remain positive on shares because we see and opportunity for the company to see renewed interest. We maintain Buy on shares of NWE due to the discounted valuation and improving backdrop.

Regulatory engagement and strategy starting to bear fruit

Management attributed its recent regulatory progress to the engagement with the Commissioners, Montana Commission Staff, and other stakeholders that was followed-up with strong witness testimony explaining the need for rate relief. Aside from the actual rate case, the underpinning of an improving regulatory climate were further enhanced in December 2022 (winter peak) and January 2023 (Colstrip ownership increase). There had been some uncertainty among parties in the state regarding Northwestern's intention for Colstrip but the agreement to purchase more reaffirmed what management has been advocating for over multiple years.

In December, Northwestern was importing over 40% of its electricity needs from outside the state and was paying up to $900/MWh for purchased power. This was the latest datapoint of the merits of building new ownership that the company believes is further validation of its plans to build new generation. This is also in-line with the Montana's Commission efforts to explore resource adequacy as well. From a financial perspective, the Colstrip acquisition should reduce downside from the power cost adjustment mechanism and overall provide more stability for customers as well.

Our base case is that the multi-party settlement is approved without material modification. While the higher market power prices had an unfavorable impact on customers and shareholders in late 2022, this has further validated management's strategy.

Yellowstone construction set to resume sooner rather than later

Northwestern remained cautiously optimistic that it could resume construction soon as it works with its construction partner to remobilize at the site. It does appear that there could be a small delay to the commercial operations date (COD) but not overly significant. If the rate case settlement is approved, there will be less regulatory lag with cost deferral but the company has been clear that another rate case will be necessary to get cash recovery of the new power plant. It remains possible that 2024 is the test year for the subsequent rate case although there will be multiple variables into that equation still to be finalized.

The swift enactment of legislation is perhaps the strongest datapoint of how far engagement with stakeholders has come.

Growth rate parameters coming into focus

The rate case could conclude in late July or early August which may align with the 2Q23 earnings call. After a final order in the rate case is issued, we expect Northwestern to issue 2023 guidance and provide a long-term rate base/EPS CAGR using 2022 as a base. Currently NWE has a legacy 3-6% EPS and 4-5% rate base growth rate, both of which we anticipate are rebased. We see upside to Consensus for FY23+ EPS even before factoring in incremental transmission & distribution capital that we believe is increasingly probable. As our estimates confirm, the prospective will be somewhat lumpy due to rate case timing, not dissimilar to other peers with less tracked capital spending. The constraints on spending are customer affordability and the balance sheet where management wants to target a 14%+ FFO/Debt.

Management described its transmission system as nearing the edge of its capacity and requiring significant spending increases to support customer growth, power flows, and new generation. This is consistent with renewable developer datapoints which have pointed toward Montana transmission being a constraint.

Prospectively we expect Northwestern to double-down on electric transmission and distribution spending which is lower construction and regulatory risk. Not only does transmission have less regulatory lag from earnings/cash perspective, it expands regulatory diversity on the margin. From management's perspective it is not purely a financial conversation: transmission investments are a critical reliability necessity which is the top focus in the state today. Another areas of upside capital spending is fire mitigation, consistent with regional peers but to a far lesser degree than in California.

The timing of the long-term guidance refresh may not align with the 2Q23 earnings call and may not come until 3Q22 ahead of the Edison Electric Institute (EEI) Financial Conference. Regardless of if the update comes in July or October, we believe that the growth update will surpass relatively low investor expectations.

Earned ROEs set to improve, the question is: how much?

In 2022 NWE had ~200bp of regulatory lag with only a partial year of interim rate case relief. The company has internal targets to improve the rate of underearning and has noted historical ability to earn within ~50bp of its allowed return of return in years with more favorable conditions. While an accelerated rate of distribution and generation spending could bring additional regulatory lag, we would expect this gap could decline below 100bp over time.

Between a higher rate base trajectory, refocus on wires investments, and earned ROE improvement, there is newfound visibility into earnings for the first time in multiple years.

OneGas (OGS) More rate cases to come

Our meeting with OGS management reemphasized the steady nature of the operations, regulatory strategy, and financial approach. Overall, it appears that the business is operating on plan, with no major positive or negative deviations from the last long-term guidance refresh. We maintain our Neutral rating on shares of OGS, which trade approximately at fair value.

Regulatory activity in normal course

The Oklahoma performance-based rate change (PBRC) that Oklahoma filed in March was described as a top priority for management. Under the construct, OGS makes interim filings between rate cases and the March filing requested a +$28Mn annual rate increase, which is up significantly YoY. Other Texas filings that management is working to diligently implement are the +$12Mn Central-Gulf and +$7Mn West-North Gas Reliability Infrastructure Program (GRIP) filings, although these are more routine processes.

We look for rate cases to kick up in 2024 and 2025 following the completion of a full estimated year with elevated costs in 2023. We see timelines as broadly on track to file substantive cases in ~2024. We see abating of fuel costs as helpful to the backdrop for these cases. Regardless, we perceive an improving backdrop, particularly in Oklahoma with the naming of Kim David as Vice Chair of the OCC.

We expect O&M inflation levels to remain a key focus, however, with the company seeing elevated costs on re-staffing post Covid as well as driven by outsized growth. We remain a bit cautious on risk of further inflationary pressures upwards for OGS given its compounding growth plants through the period, while O&M is slated to moderate materially in the near term. We watch this dynamic carefully. Ultimately, it could just result in accelerated rate case activity, but ongoing lag could be outsized versus our EPS.

Another gas pure-play not interested in M&A

OGS management described the strong successes that it has had in steadily growing the company via organic capital investments with its favorable jurisdictions. Given the interest rate backdrop with higher financing costs, management is even less interested in paying a premium to acquire others' assets. The company has more than doubled since its spin-off and is investing $650-675Mn annually on low-risk capital, which the company stated is like adding a modest-sized acquisition every three years. OGS does not believe that it is lacking in scale or has a need to execute a large inorganic transaction. Finally, OGS stated that its simple financing approach without back leverage is more transparent.

Cash taxes should be volatile but not related to repairs tax

Cash taxer payer status has oscillated around Covid losses and securitization proceeds but largely net out. In response to the volatility, management has started providing enhanced quarterly disclosures to aid investors but does not see this as a material driver of performance. Like our conversation with peer Atmos Energy (ATO), OneGas management did not expect any material change to its financial profile from potential repairs tax reforms. Overall, this did not appear to be a focus area for management.

Robust costs that are front end weighted

OGS has had been focused on in-sourcing some spending areas, such as line locations, to become more efficient and improve its internal capabilities. Management is now paying for a training school, as it has an objective to further increase its employee base of talent. Operating and maintenance costs are still increasing at a high-single-digit rate, but the company is hopeful that inflation will moderate over time back towards a more normal level. Consistent with the prior message, cost increases are higher in the five-year plan, so more robust increases above the 6% CAGR embedded in the annual plan.

The higher costs are dampened by continued strong new customer connections, which more than offsets the small annual declines in residential customer usage. Customer growth is the strongest in Texas (+1.6%), multiples higher than in Kansas (+0.3%), which blends toward ~1%, with Oklahoma still solid (+1.2%).

Compensation tied to leak reductions, aligning all stakeholders

Management highlighted its new short-term compensation program, which is tied to emissions. OGS has a -55% 2005-2035 scope one emissions objective from its distribution pipelines leaks, which the company has almost achieved today, with -48% as of year-end 2022.This will require a 50-60bp annual reduction, which the company expects to achieve with its ~100-mile unprotected bare steel and ~30-mile protected bare steel replacement programs.

PSEG Corp (PEG) Steady as she goes

Another constructive management meeting with the team laser-focused on affordable rates for customers, supporting economic activity & jobs, and promoting reliability. The latest regulatory settlement and advocacy for reliability are consistent with PEG's operating and investment thesis. We maintain Buy on shares of PEG which continue to offer visible growth with consistent execution and below-average regulatory risk.

Energy efficiency settlement and regulatory overview

Public Service Electric and Gas Company (PSEG) recently filed a stipulation with the New Jersey Board of Public Utilities (BPU) for an extension of its Clean Energy Future Energy Efficiency (EE) program to capture the short nine-month period September 30, 2023-June 30, 2024. The interim period is designed to align with the New Jersey-wide program July-June term which will commence July 1, 2024. Key parties to the stipulation include the BPU Staff, New Jersey Division of Rate Counsel, EE-focused groups, and large energy users. The extension provides $280Mn investment plus 10% administrative costs. BPU Docket No. GO18101112 and EO18101113.

Although small dollars and a limited scope proceeding, this is another constructive datapoint. This sets the stage for the forthcoming general rate case where PEG has a very strong track record of reaching constructive settlements, like this EE filing. Our base case is that PEG can settle the next rate case at some point in the process.

PEG along with the industry are waiting for Internal Revenue Service (IRS) guidance on the nuclear production tax credit (PTC) guidelines, specifically the 'benchmark' that will be used when calculating the PTC level. PEG has been engaged with the IRS and provided its views as well as feedback regarding what a reasonable framework should look like.

Again, it is favorable to see that PEG is viewed as a thought leader by the government as a large well, run nuclear operator. It remains to be seen when the IRS issues its draft guidelines which will likely lead to companies including PEG to continue a fairly ratable hedging program, to the extent that market prices are attractive.

NJ and regional electrification mgmt's key focus

Management continues to meet with PJM Interconnection (PJM) regarding regional reliability, specifically the load forecast. PEG believes that increasing electrification trends, specifically electric vehicle adoption, is an area where the PJM forecast may not be fully reflecting the customer and policy trends. PEG is starting to see electric vehicle adoption tick-up and believes that regional utilities need to be proactive in supporting the growth. While the path of adoption is uncertain, PEG believes that it should be proactive in building the supporting infrastructure to prevent being behind the 'hockey stick' curve.

We will be closely watching PJM's interim and annual load forecast refreshes to see if there is a noticeable increase in PSEG and New Jersey demand from the last refresh. External validation of electrification demand would support stakeholder engagements regarding a need for more electric infrastructure on distribution & transmission.

Public Service Electric and Gas Company and PSEG Power LLC were co-authors to a May 17th letter to PJM "Stakeholder Efforts to Undermine PJM’s Capacity Performance Framework". Other coauthors are Vistra (VST), PPL Electric Utilities (PPL subsidiary), Avangrid Renewables (AGR subsidiary), NextEra Energy Resources (NEE subsidiary), Exelon (EXC), Constellation Energy Generation (CEG), and Calpine Energy Services (CPN - Private). PEG and the parties request that PJM not file for a proposed capacity performance penalty reduction for a variety of reasons, including the potential for negative reliability impacts. The coauthors write " There is simply no justification for submitting Proposed Penalty Reductions that PJM staff has publicly opposed."

It is notable to us that the letter is signed by both PEG's regulated and unregulated affiliates. Other transmission & distribution companies like PEG and PPL writing the request show the importance of the matter to a variety of parties.

Repairs tax is a small opportunity

PEG has been analyzing and tracking the new repairs tax guidance for some time and overall does not expect a material impact. If anything, management described this is an opportunity to deliver additional customer savings.

Latest example of management working to keep its rates affordable and preserve wallet share.

Sempra (SRE) From coast to coast and back to California

Following our AGA meeting with Sempra (SRE), we are even more confident in the company's ability to earn at the top-end of the long-term guidance range. Management conveyed a confident tone on outstanding California General Rate Case (GRC) proceedings. The TX Distribution Cost Recovery Factor (DCRF) bill (SB1015) appears more than likely to pass. We believe this bill would reduce underearning in TX and incentivize incremental Oncor (SRE TX subsidiary) distribution capex. Management highlighted successful DCRF bill passage is contemplated in FY24 capex and earnings guidance range, and we believe the bill would support earnings growth skewed to the high-end of the guidance range. Maintain Buy on shares of SRE given the above-average long-term growth profile backstopped by unique exposure to LNG development projects and favorable TX utility tailwinds.

CA natural gas outlook is 'improving'

Natural gas prices spiked across the Western US in early 2023 due to El Paso pipeline outages and low hydroelectric electricity imports from the Northwest. These events increased customer bills and resulted in elevated scrutiny of CA gas utilities including SoCalGas. Management maintains that SoCalGas did not cause the winter gas issue and gas price spikes impacted the entire Western US. Management does not believe the gas issue will have material read-throughs to 2024 GRC outcome as many stakeholders recognize the winter 2023 event as an anomaly. Rather, the natural gas shortages and price spikes caused by a complication at a single pipeline reflect the need for greater investment in CA gas infrastructure. Management perceives CA's tone on natural gas is improving and CA will support incremental natural gas investment. SRE highlights successful developments across the natural gas business: California Geologic Energy Management Division (CalGEM) may increase Aliso Canyon allowed storage capacity following the 2017 well failure. SoCalGas energy storage and hydrogen investments are aligned with state policy objectives. Lastly, SoCalGas is focused on driving cost efficiencies by absorbing interest rate pressures, implementing new technologies and increasing automation.

Management believes in constructive GRC outcome

Management continues to view likelihood for reasonable GRC outcomes. Intervenor testimony to-date has not deviated from usual areas of intervenor pushback including SG&A forecasts and wildfire spending. Hearings are expected in June and full briefings in August. The 2019 GRC decision supports a constructive precedent for the 2024 electric and gas GRC decisions.

Extension of Cameron 2 FEED not entirely cautionary

Inflationary pressures including cost pressures and longer equipment lead times prompted management to announce (potentially) prolonged timelines for Cameron Phase 2 Front End Engineering Design (FEED) process. Management double-downed that the LNG development industry overall continues to face inflationary challenges, and the issue is unlikely specific to Sempra Infrastructure Partners (SIP - SRE subsidiary). A

prolonged FEED process should buy time for further negotiations with project suppliers. This ensures SIP would capitalize on more favorable project terms, i.e. lowering project costs and potentially expediting COD timeframe. While Final Investment Decision (FID) is critical to advancing development projects, timely COD remains SIP's ultimate project execution benchmark.

Southern Co (SO) Powering up Vogtle

We met with CEO Chris Womack, CFO Dan Tucker, VP of IR and Treasurer Scott Gammill, and Investor Relations Manager Ashley Black.

Vogtle prudency approaching as Unit 3 ramps up

Incremental Vogtle updates were positive, indicating that Unit 3 is on track to be commissioned. After a several-day outage the reactor is up to 75%+ based on the latest Nuclear Regulatory Commission (NRC) data. The company expects to bring it up to 90% before initiating a final round of testing and a forced trip, before once again powering up mid-month. Mgmt indicated that things are on track for a timely commissioning.

Prudency review likely to coincide with Unit 4 load (July)

The Georgia commission will undertake a review of Vogtle capital prudency spending, expected to commence around the time that fuel load begins at Unit 4 which mgmt is targeting around July. The standard of prudence appears to be an achievable bar to clear, but the additional layer of reasonableness may keep the total approved recovery capped at the $7.3B figure previously articulated. Incremental costs such as those incurred to respond to the Covid pandemic appear to be prudent at face value, but layering on additional customer rate increases on top of the estimated +8% associated with both Units 3 and 4 will likely given the commission reason to not approve additional costs.

Election timeline still unclear, most expect 2024

Among the other most-discussed intermediate term considerations for Georgia Power is the Georgia Public Service Commission election(s), the timing of which remains uncertain given the current legal challenge which remains pending before the court of appeals. We note that expectations appear to be shifting to the election potentially being pushed in to 2024, which would result in the Vogtle prudency hearing likely being heard by the existing bench of commissioners

Rate increases layered in for Vogtle, fuel, and new rates

The Georgia Power three-year fuel recovery plan will add a +12% rate increase for recovery of the deferred balance. Additional rate increases that are known and set to go in effect by 2024 include net increases of ~4% associated with each of Vogtle Unit 3 and Unit 4, as well as base rates from the latest GA Power rate case which accounts for an incremental +12%. Mgmt frames the increases as largely out of its control, in particular fuel which is subject to market forces – average customer rates are around average for the US Southeast and still below the national average. Timing of the extended recovery of the deferred fuel balance will likely coincide with the *next* Georgia Power rate case where the fuel roll off should provide bill headroom for updated rates.

Southern Power $3B upside, balanced opportunity set

Mgmt reaffirmed that the $3B upside previously flagged at the unregulated Southern Power segment remains outside of the formal capital plan, and while the company is confident in achieving its long-run 5-7% EPS aspirations *with* the upside, the range is still intact excluding the $3B. IRA benefits for renewables and battery storage have helped to even out the playing field across these generation types. Unlike the unregulated platforms recently monetized by peers including ED and DUK, mgmt remains comfortable with its risk and return profile (utility-like) with discrete projects contracted on a bilateral basis, in contrast to its peers who operated substantial devco models. Regarding the coming Georgia renewables solicitation, look for Southern Power to potentially submit its own projects, though the preferred method would be through rate base at Georgia Power.

Southwest Gas (SWX): ROEs > rate base

Our meeting was constructive, principally around an evolving and improving backdrop regarding a plan for earned ROEs to improve. We see the confluence of potential cost programs from consultants in place and improved processes helping to streamline performance in 2024. Meanwhile, we see prospects of filing rate cases on an accelerated basis versus the historical timeline of waiting 12 months for a full new test year to drive a rate case likely by the end of October, if not broadly in 4Q. In parallel, we look for a rate case by the end of 3Q in Nevada. We look for cost programs backfill here too.

We do see still see risks to the outlook. Challenges on the spin include lumpiness of the Centuri business (spin) as well as clear ongoing and outsized inflationary pressures in 20223 (and likely persisting into 2024 without rate relief). We see management firmly walking back from the prior 8% earned ROE guidance for 2023 as indicative of just how much pressure remains in the 2023 outlook on the O&M front. We stress that inflation remains a persistent theme across the conference with companies, and SWX remains clearly exposed.

On balance, we remain Neutral, but see an improving narrative ahead. The technical dividend cut ahead (even if premised off 2024 or 2025 EPS) as well as further equity raise likely at Centuri to fund debt paydown remain a clear further overhang on shares (20% stake sell-down remains targeted and likely, in our view, given desires to improve credit).

Recovery of deferred fuel balances remains a key input to resolving the outstanding balance sheet trajectory to 14% FFO/debt by 2024. We expect weaker credit quality and a protracted timeline to recovery to remain an overhang, but much of the stock will trade in the interim on improving prospects in Arizona under the new Arizona Corporation Commission (ACC) in place and prospects for improving one of the widest under-earning gaps in the space.

Rate case remains essential to turn around

While much of the attention has been on the shareholder-driven theme of strategic review and Centuri spin, we continue to see the backdrop on shares as firmly around the regulatory process to turn around SWX. We remain fixated on prospects for an improving rate case backdrop. We watch how Tucson and, even more critically, the Pinnacle West cases are resolved for clues. On balance, we are more constructive on prospects for addressing the extent of under-recovery. Management did not endorse any higher earned ROE outlook beyond the former 8%+ level that was articulated for the long term last year. This simply has not been renewed.

New outlook and new CAGR, but what is the baseline?

We look for an updated utility outlook incorporating the latest inputs as soon as late 2023 or early 2024, when the Centuri spin is effectuated. We see the ability to articulate hopefully a more precise turnaround, if not outright better outlook with the bigger utility plan update, as hopefully offsetting the technical dividend-per-share (DPS) cut poised to happen. We see an updated earnings CAGR as potentially rebased off 2022 or 2023 with a lower starting point than previously contemplated, enabling an EPS CAGR driven more by improving ROE than necessarily rate base growth. We expect equity discussion to prove a subtle message that is key to look for in this spin-out discussion, as there remains clear incremental need to address the balance sheet: the question is how and to what extent.

Spire Inc (SR) Searching for a new star

We met with Executive VP and COO Steve Lindsey, VP-Treasurer and CFO of Gas Utilities Adam Woodard, Managing Director of Investor Relations Scott Dudley, and Alabama Gas President Joe Hampton.

Transition: "Strong" internal candidate

The incremental update on management succession is that a strong and well-qualified internal candidate has been identified. The company's board has not given an exact timeline for fully resolving its search process, but we expect an announcement to align with the transition of the outgoing CEO (ahead of year-end).

Business mix remains biased toward regulated

Mgmt indicated a general level of satisfaction with the business mix at present with an approximately 90-10 split in favor of regulated natural gas assets. While technically not regulated, the storage business is characterized as generally low risk as well given long tenor of average contracts. Spire's marketing business has provided a balance of late, in particular in Q1 where volatility helped on the marketing side, but mild weather impacted utility results. Reduced equity needs are another benefit of the cash flow positive marketing business – in summary while mgmt acknowledged some potential for volatility in the non-regulated 'tail' of the company, on balance we did not perceive a strong desire to materially alter the existing business mix.

Non-organic opportunities worth looking at

With the history of the company as one characterized by growth via acquisition, mgmt acknowledged that while they do not feel a sense of urgency to do a transaction, deals are evaluated on an ongoing basis. In addition to financial metrics, SR places heavy emphasis on strategic and cultural integration. Policy and regulatory considerations are key as well – we see a distinct bias toward jurisdictions that have indicated directly or via signaling that natural gas bans are not a risk in the near to intermediate term.

Credit metrics should improve from Q1 low

Recovery of SR's funds from operations (FFO) to debt metric is under way after reaching a low during Q1 on elevated gas pricing. Consolidate metrics averaged 15-16% in the two years before storm Uri, with mgmt expecting to return to this level from around 13% today – the current target is by year-end 2024. One adjustment worth noting is S&P which imputes Asset Retirement Obligations (AROs) into the debt calculation, an adjustment that can cause metrics to move by 100 bps or more in the AL utility in particular. Constructive developments of late including removing the negative outlook from the Missouri utility. The holdco currently has total debt of under $600m which mgmt views as close to the 'normal' level and indicative of typical fluctuations in working capital.

Regulatory outlook in MO and elsewhere

The overall tone of commentary on existing regulatory schemes was relatively constructive, with mgmt seeing the last two MO regulatory outcomes as positive. We note that this tracks with feedback we have heard from regulatory-focused stakeholders in the state of Missouri who indicated that Spire's rate case issues should be considered relatively discrete. While Missouri is known as a state where certain utilities consistently do better in terms of regulatory outcomes than others, we note that the overall tenor of commentary and regulatory outcomes has trended constructive of late, including for Spire. Expect the recent rate increase to be an upside driver in Spire's next annual EPS guidance as well given the full-year impact.

UGI Corp: Balancing AmeriGas refinancing

The management meeting focus on the volume of potential natural gas assets available for sale in the marketplace, next steps in the AmeriGas business improvement process, and international renewable feedstock investment opportunities. The ability to return to sustained growth while also lowering segment/non-utility leverage will be the key to restoring investor confidence in the outlook. We maintain Underperform on shares of UGI which appear relatively expensive despite the discounted relative P/E multiple. The above-average debt balance at AmeriGas (APU) and mix of unregulated assets informs our view of a materially lower consolidated valuation than regulated utility pure-play peers.

Natural gas acquisitions are an opportunistic focus

Management stated that it is focused on growing its natural gas footprint, both at the regulated utilities and in the midstream businesses. The West Virginia Mountaineer acquisition ~18 months ago has met the company's expectations and it sees opportunities for continued favorable regulatory evolution. The Mountaineer purchase was described as ~1.4x EV/rate base multiple, a lower price than other transactions at the time. If an attractive utility acquisition in a favorable jurisdiction arose, management would consider the potential. UGI does not want to use equity to finance any additional utility acquisition so would look at financing options such as partnerships, debt at other segments, by flexing up consolidated leverage, and by using organic cash flow generation between announcement & transaction close.

Similarly, management stated that it would be acquirers of midstream businesses if (1) the right assets; (2) the right geography; and (3) the right valuation/price.

UGI generally has a solid regulatory track record and further utility acquisitions at reasonable valuations would be positive. There is high financing uncertainty but even an EPS dilution transaction that reshapes the business mix could help reposition the company for more visible, sustained success over the long-term.

International customers more willing to pay for low carbon

The additional conservation efforts encouraged by the European governments had a clear impact in the winter of 2022-2023 but management believes that the degree of conservation could be more difficult to sustain if there is a normal cold winter. The company is focused on expanding it renewable dimethyl ether (RDE) offerings with potential plans for significant capital investments at a double-digit unlevered IRR. UGI is still evaluating the price of the blend to customers but has seen a customer willingness to pay for the lower carbon attributes.

Before material capital investments are made for uncontracted assets, we look for further details proving out the consumer demand on a smaller scale first. While a promising opportunity, the high capital costs could make this a longer dated opportunity or require sizable partnerships in our view.

What needs to happen for AmeriGas' recovery?

Despite the recent challenges with customer service, inflation, and financing costs, management continues to believe that the future for AmeriGas is brighter. The strategy is 'back to basics' with billing customers accurately, having on-time deliveries, and providing leading customer service. Management believes that this focus on customers will help to reduce churn and lead to stronger future performance. The most significant driver of the declining adjusted EBITDA profile 2020-2022 was higher employee compensation and benefits as there has been more competition for drivers. The challenges in staffing up the business had the unfortunate impact of leading to lower than desired customer service. Overall management believes that it is past the worst of challenges and is set up to have a full contingent of drivers for winter 2023-2024.

AmeriGas cost of debt has increased

AmeriGas completed a $500Mn 2028 senior note offering at 9.375% which is expected to be used to repay the $675Mn 5.625% 2024 AmeriGas senior notes, along with a $150Mn cash contribution from the parent company UGI Corp.

Fitch Ratings placed AmeriGas Partners LP and AmeriGas Finance Corp entities on negative outlook while placing a BB- credit rating on the new debt. Fitch attributed the negative shift to the leverage and interest coverage ratios with a favorable offset from the UGI Corp equity contribution & cure. Fitch expects AmeriGas adjusted EBITDA to recovery in FY24 to ~$507Mn FY22 levels vs $430Mn 3/31/23 TTM.

The actual cost of debt has increased. UGI recently reduced its FY23 adjusted EPS to $2.75-$2.90 from $2.85-$3.15 and higher financing costs were not cited as a driver at the time.

Until Corp (UTL) Open to scaling up if the puzzle pieces fit well

We met with CEO, Thomas Meissner, Chief Administrative Officer, Robert Hevert, and CFO, Daniel Hurstak during the AGA conference. Key takeaways include: (1) Return to dividend growth in-line with EPS growth. Earnings growth has outpaced dividend growth as management spent the last ~10 years resetting the payout ratio to ~55%-65% target versus 70-80%+ pre-2017. UTL achieved its targeted payout ratio in 2022 (~59%) and is now targeting dividend growth at pace with 5-7% EPS growth. (2) Electric mix likely to increase. Gas represents ~2/3 of UTL's overall rate base and earnings mix. However, incremental solar development and robust electric grid investment opportunities likely increases electric business mix prospectively. (3) Gas M&A is a possibility in certain jurisdictions. Management would assess M&A in 'gas friendly' Northeast jurisdictions. We maintain Underperform on UTL with shares trading at an unbalanced risk/reward skew.

UTL is open to gas M&A ... in the right jurisdictions

UTL management detailed it would assess M&A opportunity. However, the decision to pursue M&A is contingent on price and accretion to overall business profile. Acquisitions would need to complement UTL's current portfolio. For example, UTL is unlikely to pursue M&A in jurisdictions outside its current Northeast utility base. Further, UTL would likely only consider gas M&A opportunities in 'favorable' natural gas jurisdictions i.e. Maine and New Hampshire. Management believes its Massachusetts natural gas infrastructure serves a critical role in facilitating state decarbonization plans and UTL continues to capitalize from synergies between its MA electric and gas business. However, it is less clear the utility would expand its Massachusetts gas portfolio via M&A given the state's political and regulatory construct related to natural gas.

Incremental NH solar development is upside to capex plan

Management highlights incremental solar development beyond the current Kingston project remains a key area of upside to current rate base and capex plans. The lot size of the Kingston solar projects enables up to ~5MW incremental onsite capacity. Management highlighted potential to pair energy storage systems with the Kingston solar farm. UTL did not include energy storage in its initial Kingston solar filing for regulatory approval to avoid complicating the filing. UTL is confident in its ability to continue to ramp utility-owned solar development in New Hampshire through leveraging learnings from Kingston Solar regulatory and development process.

ME rate case: forward looking test year reduces lag

Northern Utilities (UTL subsidiary) recently filed a gas rate case in Maine. Management cites strong relationships with key Maine stakeholders. Northern Utilities proposes to move to forward test year ended January 31, 2025 which mgmt expects will reduce regulatory lag if approved. The utility is encouraged by latest settlement progress across Maine electric utility peers.

Voluntary 'green' tariffs an option to integrate RNG

UTL highlighted potential to offer renewable natural gas via customer supply agreements. RNG unlikely represents an incremental investment opportunity. Rather, management would offer voluntary 'green' tariffs to customers in exchange for delivering renewable natural gas. The opportunity remains early-stages although management expects customer demand and state policies will support voluntary green tariff opportunities.

WEC Energy (WEC) Not melting under weather pressure

We met with Executive Chairman Gale Klappa, WEC CEO Scott Lauber, CFO Xia Liu, and Director of Investor Relations Beth Straka.

Illinois Gas settlement window likely in Oct-Nov

WEC mgmt framed the recent staff and intervener testimony in the People's Gas and North Shore Gas rate cases as constructive, with a relatively narrow bid-ask spread on ROE and total revenue requirement as compared to other cases (and particularly when compared to electric rate cases currently under way in Illinois). Staff also expressed support for ongoing investment in pipe replacement – while previously this had been recovered under an expiring rider, initial testimony supported ongoing investment in the effort. WEC's replacement of aging pipes in the city of Chicago in particular has been the target of negative headlines in recent months, but we note that staff support is an important affirmation of the core need for the program. One area where parties remain somewhat far apart is equity layer with WEC requesting 54% while staff recommended actual equity, which was just below 51% - with the other items aligning relatively constructively, we see this as one area that WEC could conceivably forego in a settlement. Typically settlement discussions take place after the administrative law judge issues a proposal, which is expected around the Oct-Nov timeframe.

Reiterate confidence in 2023 outlook, earnings shaping

Following a cut to its initial Q1 guidance range driven by historically mild weather, mgmt reiterated its confidence in the existing guidance range of $4.58-4.62. Specific drivers are impacting the shaping of EPS this year and with a weighting toward the second half. Mgmt pointed to $52m of earnings sharing expense that was borne partially in Q3 and largely in Q4 of last year, along with some O&M pull forward, and a charitable contribution in the single digit millions of dollars. All told mgmt estimates the absence of these items to drive a 15-18c structural improvement, along with a revision to the O&M increase forecasted from 3-5% to 2-3%, a delta that provides another 4-6c of EPS upside. These items serve to offset 12c of weather drag in Q1 and otherwise build contingency into the year's results.

Undergrounding a small but growing priority

With grid reliability playing an increasingly prominent role in regulators' evaluations of utility performance, WEC noted that its current plan includes $700m over 10 years for undergrounding efforts. While this screens as a relatively modest amount, mgmt expects the total allocated to undergrounding to grow over time given positive results in terms of reliability. Note that while this was framed as a growing bucket in the overall capital plan over time, we do not perceive it as additive to rate base or EPS growth, rather added investment in undergrounding would likely displace other spending. Nonetheless we like the operational de-risking likely to materialize.

Economic development re-accelerates with new anchor

Another trend across utility names has been the addition of substantial load growth via discrete projects with data center customers. MDU highlighted its deal with an off-taker for 180 MW of interruptible supply, which represents a roughly 1/3 increase to its entire electric load. WEC expects to add Microsoft as a customer at the Foxconn industrial park in WI where the ultimate demand may eventually reach 1000 MW. In contrast to the MDU deal, Microsoft is expected to be a firm purchaser which would require additions to the supporting transmission & distribution infrastructure – while mgmt did not offer estimates on the potential size of the capex opportunity, directionally the data point and addition of a strong counterparty is a positive trend. Groundbreaking on the site is expected later this year with staged commissioning potentially as soon as 2025.

Xcel Energy (XEL) Execution stands outs

We met with CFO Brian Van Abel, Treasurer / VP of Investor Relations Paul Johnson, and Assistant Treasurer Patty Martin. We maintain our view that XEL is among the best Buys across our utility coverage: key low-risk, defensive equity with more ahead.

New Mexico settlement contested; financial issues settled

Southwestern Public Service (SPS) announced a contested settlement of its electric rate case late last week. Financial items are largely resolved, with an ROE of 9.5%, up from the current 9.35%, with the main unresolved item around operations at the Tolk coal-fired plant. The forward test year included in the settlement is a particular constructive outcome and should help to offset the expected loss of sales from wholesale customers – we note that in prior years the earned ROE gap has been relatively modest, though the forward test year should be earnings positive and help offset to loss of load.

CO rate case testimony does not preclude a settlement

Staff testimony in the electric rate case came in relatively low at 9.02% – while optically low and below the level currently approved, we note that this is generally consistent with the historical pattern for CO staff. In our meetings, management expressed a willingness to continue to engage with parties and did not preclude the possibility of a settlement despite the relatively low starting point. We expect a rebuttal filing to come relatively soon, with the procedural schedule targeting a mid-June settlement conference.

Legislation introduces smoothing, performance incentives

The gas utility legislation recently passed in Colorado is directly aimed at smoothing the volatility of price increases and aligning procurement via a performance incentive mechanism (PIMS). We expect a proposal for fuel recovery smoothing to come in November – the basic mechanics will result in longer recovery times of above-average spikes in fuel price to mitigate bill shocks of the type seen last winter. At a high level, we see the introduction of additional filings as risky given the potential for additional regulatory/recovery complexity, though over time a smoothed and less volatile track of bill impacts stemming from fuel increases would likely accrue to customers. While the PIMS proceeding is in process, we expect a relatively narrow band, with positive and negative adjustments roughly symmetrical.

Several renewable procurements under way

Requests for proposal (RFPs) for renewable generation assets remain in progress for XEL utilities in MN, CO, and NM. We expect partial visibility into these around the typical November refresh cadence. MN appears the furthest along with 350 megawatts (MW) of solicitations out of an original target of 900 MW filed and XEL proposing to own 250 MW of the submitted projects. The remaining 550 MW will be part of a subsequent RFP, and thus we do not expect visibility here until 2024. CO procurements are also proceeding relatively quickly, with a proposed portfolio expected to be filed in August – management cited levelized cost estimates of $22/kilowatt hour (KWh) for wind and $33 for solar, indicating that winning projects would likely come in at sub-$20 and sub-$30, respectively. On balance, we expect the November refresh to include a combination of high-visibility processes (MN and CO) along with an updated view on upside from renewable procurements (currently $2-4B).

Unclear if minimums will ease on premium balance sheet

XEL maintains a strong balance sheet, with key funds from operations (FFO) metrics in excess of 17% on an adjusted basis, compared to the Moody's minimum of 16%. Moody's requirement of 25% or less parent to total debt remains the other guardrail – while this appears overly conservative given XEL's strong cash flow profile, we do not see an obvious reason that it would be relaxed in the near future. We note, however, that comparable utilities are increasingly positioning themselves as "premium balance sheet" names.

BofA GLOBAL RESEARCH

Price objective basis & risk

Alliant Energy Corporation (LNT)

Our $58 PO is based on a sum of the parts analysis employing relative premium and discounts to the large cap regulated peer multiple of 16.4x 2025E P/E. We note that electric peer P/E multiple is grossed up for a year by 5% to reflect capital appreciation across the sector. We apply an in line P/E premium on IPL as we see the rate case overhang being resolved. We apply a 1.0x P/E premium on Wisconsin Power & Light Company reflecting 1) low risk investment nature of the state, 2) above average ROEs, 3) higher than average growth runway for investments, and 4) potential risks around solar deployment in both WI and IA. At ATC, we reflect a 4.0 x P/E premium on LNT's 16% share in the transmission company. Growth expectations for this segment are high, paired with above average ROEs that we believe face less downward pressure vs. regulated state distribution ROEs. We apply an in line multiple at the parent to account for the blend of numerous businesses some which benefit from long term stable PPAs via intercompany generation. Risks to our Price Objective are: 1) rate case outcomes, 2) further equity dilution beyond our estimates, 3) interest rate fluctuations, 4) natural disasters, and 5) inflation and ability to earn the allowed rate of return.

Ameren Corporation (AEE)
Our $99 price objective is predicated on a P/E based sum of the parts, valuing each business subsidiary relative to the 2025E ratebase weighted peer multiple of 16.4x for electric and 16.6x for gas. We apply a 2.0x premium to peers at AEE Missouri to account for the improving prospects of capital spend, supplemented by a regulatory jurisdiction becoming more favorable - but lack of decoupling. We apply a 2.0x premium to peers at AEE Illinois to account for decoupling on the distribution business which aids in earnings predictability. At Ameren Transmission, we apply a 4.0x premium to peers to reflect the FERC ROEs and robust growth outlook. At the Parent, we assume 2.0x multiple premium reflecting average of the subs and given the healthy debt metrics with FFO/Debt at 17%+. Electric peer P/E multiple is grossed up for a year to 2023 by 5% to reflect capital appreciation across the sector.

The risks to our price objective are the utilities earning their allowed returns or worse, a significant change in 30-year U.S. Treasury bond yields, and adverse regulatory outcomes that could impact mgmt's ability to earn its allowed return.

Atmos Energy Corporation (ATO)
Our $120 PO is based on our 2025E sum-of-the-parts (SOTP) analysis, based on the gas LDC peer group multiple of 14.3x.
Our gas peer P/E multiple is grossed up to reflect the group's 5% CAGR (2021-26E) to reflect capital appreciation across the sector. We then apply a 3x premium across jurisdictions to reflect the high-quality nature of the assets given a sustainable runway for capex/EPS underpinned by constructive regulatory mechanisms and jurisdictions.
For the Pipeline & Storage segment we apply a 9.2x EV/EBITDA multiple as a base to our '25E EBITDA. We then apply a 2.0x premium to the assets given their fully regulated nature and unique ability for APT to benefit from the spread differentials.
Upside risks: 1) improving regulatory relationships, 2) decrease in interest rates, 3) incremental capital spending, 4) constructive rate case outcomes, 5) less equity needs.
Downside risks: 1) deteriorating regulatory relationship, 2) increase in interest rates, 3) less or deferred capital spending, 4) poor rate case outcomes, 5) more equity needs.

Avangrid (AGR)
Our $34 PO is based on an 2025E sum of the parts analysis. The core utilities are valued on by applying discounts to the base sector P/E of 16.0x/16.3x for electric/gas due to below average growth and regulatory jurisdictions. We apply an in-line multiple to the PNM Resources assets with the transaction pending. Both electric and gas peer P/Es are grossed up +5% to reflect capital appreciation across the sector. The renewables are valued at approximately 10x EV/EBITDA, consistent with peers while offshore wind is valued using discounted cash flows at a 12% discount rate. Future potential value creation from the renewable development 'DevCo' is provided as well. Lastly parent/HoldCo financing negatives are ascribed.

Up/downside risks to achievement of the PO and estimates are 1) earned ROEs at the utilities, 2) utility capital expenditure forecasts, 3) regulatory/political/legislative outcomes, particularly regarding the pending acquisition of PNM Resources, 4) equity needs, 5) offshore wind construction, 6) Iberdrola owns over 80% of AGR common stock, limiting float and presenting a potential for governance conflicts, despite the BoD being majority unaffiliated with Iberdrola. 7) natural disasters, 8) commodity and interest rate fluctuations, and 9) management changes.

Avista (AVA)
Our $39 PO is based on our 2025E sum-of-the-parts (SOTP) analysis, based on the electric group multiple of 16.6x for electric and 17.0x for gas. Both electric and gas peer P/E multiples are grossed to reflect the group's 5% CAGR to reflect capital appreciation across the sector. We then use a blended electric and gas multiple of approximately 80% and 20%, respectively, for AVA's WA and ID jurisdictions given the composition of its

rate base. We apply a -2x discounts to WA, ID, and OR to capture below average-growth, inconsistent execution, and regulatory uncertainty. We apply the gas multiple to its OR jurisdiction as it is entirely comprised of natural gas distribution assets. We apply an electric multiple to its Alaska subsidiary, AEL&P, as it is a vertically integrated electric utility. The Corporate & Other segment is valued with (1) a utility P/E multiple on the HoldCo expenses, (2) fully offset by the disclosed fair market value of other assets & investments.

Risks to achievement of the price objective are changes in: 1) regulatory, political, and legislative, 2) interest rates and commodities, 3) wildfires and natural disasters, 4) phase-out of natural gas, 5) capital expenditures, 6) debt and equity needs, 7) credit ratings, 8) clinical trials, and 9) other investments.

Black Hills Corporation (BKH)
Our $60 per share valuation is based on a sum-of-the-parts analysis. We apply the latest peer average electric (16.0x) and natural gas (17.0x) 2025E P/E multiples. We gross-up +5% the base multiples across the coverage universe to reflect capital appreciation in the sector. We apply a -2x discount for below average EPS and dividend growth prospectively. Coal Mine: We apply an 2x peer EV/EBITDA multiple, which is in line with other PRB coal producers. Based on our view of the strength/maintainability of different coal plant output contracts, we apply a premium multiple to that portion of the mine. IPP Assets: We use the recent sale price and '23 EV/EBITDA multiple for Pueblo Airport and Wygen I assets, respectively. Parent Expense, Debt, and Eliminations: We apply an average regulatory P/E multiple to this segments income. This captures some Interco revenues that are double counted as well as parent SG&A drag and debt.

Downside risks: inability to earn the authorized rate of return, unfavorable regulatory outcomes, reductions in capital expenditures forecasts, higher operating and financing costs, lower sales volumes, unfavorable political and legislative changes, higher interest rates, and natural disasters.

Upside risks: ability to earn above the authorized rate of return, favorable regulatory outcomes, higher capex deployment, lower operating and financing costs, higher sales volumes, favorable political and legislative changes, decrease in interest rates.

CenterPoint Energy (CNP)
Our CenterPoint Energy PO is $35 using a 2025E sum-of-the-parts methodology. We apply the 16.7x electric and 17.3x gas base multiples. The base multiples are grossed-up +5% to reflect sector capital appreciation, a consistent approach across the coverage universe. We apply a 15% (2.6x) premium due to above-average growth and constructive jurisdictions.

Risks to achievement of the Price Objective are changes in 1) legislative, regulatory, and political outcomes, 2) capital expenditure forecasts and deployments, 3) earned return on equity, 4) asset sales, 5) capital markets access, costs, and needs, 6) interest rates, 7) weather and natural disasters, 8) management changes, and 9) inflation.

CMS Energy (CMS)
Our PO of $67 is based on a SotP relying on 2025E forward P/E multiples for the utility business and a 2025E forward EV/EBITDA multiple for CMS' IPP assets. For the utility seg we apply a 2.0x prem to the average 2025E regulated multiple P/E of 16.6x for the electric segment and of 16.7x for the gas segment, with the 10-yr capex update providing clear sight on ratebase growth and further upside, as well as continued favorable regulatory environment, and finally historically proven ability to consistently perform at the high end of guidance range.

Both electric and gas peer P/E multiples are grossed up +5% to reflect capital

appreciation across the sector.

For CMS' merchant business we apply a 4x EV/EBITDA multiple, in line with current market value of CMS' power plants. We value Dearborn Industrial Generation (DIG) on a DCF basis through 2030 given the plant is no longer expected to be sold to Consumers.

Downside risks are: 1) earned ROEs declining which reduce CMS utility earnings 2) execution risk on capex and cost cutting which would primarily affect the utility earnings, 3) negatives changes to market energy prices which could affect the DIG plant's ability to re-contract at the assumed prices.

Consolidated Edison (ED)
Our $96 PO is based on a sum-of-the-parts analysis applying premiums and discounts to the regulated group multiples 16.4x/16.7x for electric/gas respectively with an in-line multiple for Electric, Steam, & Gas to reflect a combination of historically challenging regulation but above-peer growth and de-risked profile. Both electric and gas peer 2025 P/E multiples are grossed up by 5% to reflect capital appreciation across the sector. For noncore segments we apply a -2x discount to Con Edison Electric Transmission (CET) and a -6x discount to the Wholesale Energy business given elevated risk profiles. For the Mountain Valley Pipeline stake we apply a 5x EBITDA multiple to our 2024 EPS estimate reflecting elevated risk.
Upside/Downside risks to achievement of the Price Objective and Rating are 1) earned regulatory returns, 2) capital expenditures, 3) regulatory/political/legislative changes, 4) interest rates, 5) natural disasters, 6) execution on unregulated projects, 7) Covid, 8) ability to complete the Mountain Valley Pipeline, and 9) raw materials costs and supply-chain delivery timelines.

Dominion Energy (D)
We value Dominion Energy at $52 using a 2025E sum-of-the-parts analysis. For the utilities we apply the comparable electric (16.4x) and gas (16.7x) peer multiples which we gross-up by 5% to reflect capital appreciation across the sector. We apply -1.5x discount for base Virginia (-9%). We apply discount adjustments to lower value utility sources in South Carolina (NND) and Utah (Wexpro) as well as the South Carolina bill credits.

Contracted assets are valued at: 13x EV/EBITDA Cove Point, 5x Millstone (13% FCF Yield), and 5x for renewables. For remaining debt beyond that allocated to state utilities, we include a 50% weight towards a straight netting of leverage, with the remaining 50% using a P/E multiple on associated interest expense, in line with the methodology employed for diversified utilities with relatively higher levers of leverage. We lastly include prospective interest rate exposure that is not impacting near-term estimates due to hedges.

Risk to achievement of the Price Objective are 1) regulatory, legislative, and political actions, 2) ability to earn or exceed the regulatory allowed ROE, 3) capital markets and equity requirements, 4) changes to the capital expenditure and rate base forecast for both regulated & unregulated segments, 5) volatility in interest rates and pension returns, 6) changes in commodity prices, 7) natural disasters, 8) inflation, & 9) offshore wind construction.

DTE Energy (DTE)
We value DTE Energy at $135 using a sum-of-the-parts (SOTP) approach. We value the utility segment on a 2025E forward P/E multiple basis and the non-utility segment on a 2024E forward EV/EBITDA multiple basis. For the utility segment we apply a 2x premium to both our regulated electric and gas utility peer multiples (of 16.6x and 16.7x, respectively). Both electric and gas peer P/E multiples are grossed up by 5% to reflect capital appreciation across the sector. We value the DTE Vantage segment on a multiple

of 2025 EPS - the grossed-up electric multiple of 17.3x to account for the renewable natural gas (RNG) business. We assign an equity value of zero to the Equity Trading segment given potential for earnings volatility and opacity of the segment. We also reduce the equity value for estimated unallocated parent debt by applying a 17.5x multiple to both the interest expense and corporate overhead expenses at the parent. Risks are: regulatory/political/legislative actions, realized returns from the unregulated Vantage segment, changes in equity needs, load growth/class mix, equity needs, weather/natural disasters, and interest rate fluctuations.

Duke Energy (DUK)
Our $110 PO is derived from a sum-of-the-parts valuation. We value the Electric and Gas utilities using peer 2025E P/E multiples. We apply a 3x multiple premium to Duke's operations in FL and 2x in IN to reflect more favorable regulatory environments (and potential generation opps in IN). We apply a 2x multiple to the Carolinas given upside to spending in improving regulatory construct combined with latest IRP & wider legislative reforms into 2023.

We value the other regulated electric utilities at 16.3x and the gas utilities at peer group multiples of 16.1x 2025E P/E, respectively. Both electric and gas peer P/E multiples are grossed up by 5% for the groups CAGR to reflect capital appreciation across the sector. The commercial midstream, and transmission are valued on a 2025E EV/EBITDA basis. We use 8.0x multiples for midstream and 9.0x for transmission segments. We subtract out the impact of commercial debt, and add back for the renewable debt.

Upside risks: constructive rate case results, higher capital expenditure additions vs our assumptions, lower interest rates.

Downside risks: poor rate case results, operating errors, and negative changes in the regulatory environment, Macro risks: Increases in interest rates and decreases in equity market valuations.

Essential Utilities (WTRG)
Our Price Objective is based on a 2025 P/E sum-of-the-parts methodology. The base natural gas (16.8x) and water (24.4x) 2025 P/Es are used and grossed up +5% and +7%, respectively, to reflect capital appreciation opportunities across the subsectors. The water utilities are valued at a -2x P/E discount for below average growth. The natural gas utilities are valued at a -1x P/E due to regulatory uncertainty and historically earnings above allowed levels. The parent & other costs are valued at a blended water/natural gas multiple.

Positive and negative risks to achievement of the Price Objective are: 1) regulatory, legislative, judicial, and political outcomes, 2) ability to close pending and future acquisitions, 3) repairs tax guidance, 4) weather, natural disasters, and gas accidents, 5) change in interest/discount rates and pension returns, 6) ability to control costs and earn the allowed rate of return, 7) water contamination and standards, 8) bad debts and macroeconomics factors,

MDU Resources Group, Inc. (MDU)
Our $29 PO is derived from SOTP. At the regulated electric and gas utilities, we use a P/E approach on our 2025 estimates and use peer multiples of 16.1x for electric and 16.4x for gas, respectively with a -1.0x discount for each reflecting the latest management capex guidance, we then gross this multiple by +5% to account for sectorwide EPS growth to derive a 12-month forward PO.

We value the Construction Materials business using a '24 EV/EBITDA estimate, applying a multiple of 8.8x based on an average of several publicly-traded peers in the cement, asphalt, and aggregates business. We apply a -2.0x discount to reflect margins lower vs.

peers.

We value the Construction Services business using a '24 EV/EBITDA estimate, applying a multiple of 9.4x based on an average of several publicly-traded specialty construction services peers. We also apply a -1.0x valuation discount reflecting the high level of competition in the space.

We value the Pipeline business using a '24 EV/EBITDA est., applying a multiple of 9.1x based on an average of several publicly-traded midstream peers. We also apply a -1.0x valuation discount reflecting uncertainty about growth at projects including North Bakken. We net out total parent drag and back out remaining non-regulated debt.

Upside risks are higher utility capex, improving margins at the construction business, and infrastructure stimulus.
Downside risks are a macro downturn pressuring construction margins, and rate case outcomes.

MGE Energy (MGEE)
Our $72 PO is based on a sum-of-the-parts analysis applying premiums and discounts to the regulated group 2025E multiples (15.8x/16.1x for electric/gas respectively) with a 3.0x premium on WI regulated gas and electric to reflect the constructive regulatory mechanism, and a 4.0x premium on Transmission assets. We note that both electric and gas peer P/E multiples are grossed up for a year to 2023 by 5% to reflect capital appreciation across the sector. We apply +3.0x utility premiums to the non-regulated Elm Road and West Campus assets as these are leased under long-term contractual arrangements. Downside risks: MGEE, like all utility stocks, is sensitive to changes in the market level of interest rates. Utilities historically underperform if bond yields rise, and outperform when they fall. Further downside risks are the inability to secure further renewable rate base investments, adverse regulatory outcomes, a deteriorating regulatory environment, or adverse weather leading to less consumption of electricity and gas. Upside risks are acceleration of renewable gen investment, legacy coal asset early retirement, and enactment of further pro-renewable state policies.

New Jersey Resources Corp (NJR)
Our $45 PO is off our 2024E SOTP, based on gas peers of 16.9x. For non-reg biz, we apply a 10.0x multiple. For Midstream, we capitalize EBITDA at a base multiple of 9.4x but add a 1x discount to the business as we see less growth potential than the peer set. For CEV, we value CEV PowerCo for existing assets and DevCo assets to be deployed separately. We separately value DevCo assets to be deployed for '21 through '25 at NPV of unlevered FCF including upfront system install cost and ITC value for new deployment. We also value SREC balance that CEV has yet to monetize. We apply a 5.5% unlevered discount rate to project level CFs in-line with our discount rate for resi solar service providers. We incl. three additional years of DevCo NPV ('26-'29) with terminal value based on post-ITC step-down trough volumes/economics in '29 and utilize a 4x terminal value. We also attribute a 75% weighting for the full value of DevCo NPV for '24+. We assume 75% based on a likelihood of some action on ITCs. For parent, we apply a 50/50 weighting for holdco debt/interest expense for re-capitalization purposes.

Upside risks: Constructive regulatory outcomes, decrease in interest rates, incremental capex opportunities, extension of subsidies and further renewables acceleration

Downside risks: Poor regulatory outcomes, increase in interest rates, and lower capex.

Northwest Natural Holdings (NWN)
Our $51 PO is based on our 2025E sum-of-the-parts (SOTP) analysis, based on the gas LDC peer group 2025E P/E multiple of 17.1x applied to WA and OR natural gas distribution and regulated storage assets. We gross up the gas LDC multiple by 5% to

reflect capital appreciation across the group. We use a -1x discount for Oregon and Washington to capture the below-average growth and align with the valuations of peer utilities.
For NWN's gas storage (unregulated), appliance, and asset management business, we apply an 8x EV/EBITDA multiple, in line with comparable asset class, and net out debt. We apply a water utility peer P/E multiple of 27.9x to NWN's water earnings, similarly grossed-up +5%. Finally, we net out corporate & other drag (largely SG&A) using a weighted average multiple of 18.0x on 2025.

Positive and negative risks to the Price Objective are changes in: 1) regulatory, legislative, or judicial rulings, 2) weather and natural disasters, 3) regulated capital expenditures and rate base forecasts, 4) equity and debt needs, 5) inflation and operating costs, 6) execution on renewables and water strategy, 7) commodity prices, and 8) customer growth.

NorthWestern Corporation (NWE)
Our $64 price objective is based 2025E price/earnings (P/E) methodology. We apply the electric utility sector P/E of 16.27 as a base then gross-up +5% to reflect capital appreciation across the sector. We apply a -1x discount to reflect historically challenged regulation, below-average rate base (4-5%) / EPS (3-6%) growth, and inflationary concerns.

Risks to our price objective are changes in 1) regulatory, political, and legislative outcomes, 2) ability to recover costs and earn the regulatory allowed return on equity [ROE], 3) differences in future equity needs, 4) capital expenditure forecasts, 5) commodity and interest rates, 6) natural disasters and wildfires, and 7) management changes.

ONE Gas, Inc. (OGS)
We use a sum-of-the-parts analysis to calculate our $80 price objective for OGS, applying a FY25E Gas LDC peer multiple of 16.0x (grossed up by 5% to reflect capital appreciation across the space). We use a 1x premium to the group for TX to reflect the constructive regulation and growth trends. We apply in-line multiples for Kansas and Oklahoma.

Upside and downside risks are: 1) political, regulatory, and legislative changes, 2) capital expenditures, 3) inflation and operating costs, 4) commodity prices, 5) pandemics, natural disasters, and weather, 6) policy changes for natural gas investments.

PNM Resources Inc. (PNM)
Our $50 price objective is based on a 2024E sum of the parts valuation methodology utilizing P/E multiples for each electric business segment. The electric peer P/E multiple is grossed up for +5% reflect capital appreciation across the sector, consistent with our approach for the coverage universe. We apply a 17.1x 2024E P/E multiples are applied to each subsidiary in New Mexico, Texas, and Federal as well as the parent HoldCo: PNM, FERC PNM, TMNP, Parent.

Risks to the achievement of our price objective and estimates are 1) regulatory, political, and legislative outcomes, 2) ability to control costs and achieve the allowed return on equity - including on AMI capital, 3) interest rates volatility, 4) pending M&A activity, 5) changes in interest rates, 6) natural disasters, and 7) inability to achieve capital expenditure guidance.

Public Service Enterprise Group (PEG)
Our $71 PO is derived from our 2025 sum of the parts valuation. For the regulated utilities we utilize the electric (16.7x) and gas (17.0x) 2025E sector P/E multiples, which we then gross-up by 5% to reflect capital appreciation across the sector. We apply an in-

line group multiple to PSE&G Utility given the utility's below-average growth forecast, which is offset by our view that New Jersey remains a favorable jurisdiction, with PSE&G Utility offering low-risk transmission & distribution (T&D) profile.

Positive or negative risks to achievement of the price objective are 1) regulatory/political/legislative outcomes, 2) changes in capital expenditures relative to forecasts, 3) nuclear incidents and natural disasters, 4) equity and capital markets needs, cost and timing adjustments for offshore wind developments, 5) ability to earn the regulated rate of return, 6) inflation, 7) interest rates, and 8) pension returns.

Sempra Energy (SRE)
Our $173 PO is based on a sum of the parts valuation of 2025E earnings. The US utilities are valued using the electric (16.5x) and gas (16.7x) average P/E that we grossed-up +5% to account for sector growth. We apply a -2x discounted valuation to the California gas utility (SoCal Gas) for concerns about long-term use of natural gas. We apply a -1x discounted valuation to the California electric utility (SDG&E) to reflect the wildfire risk exposure. We apply a +2x premium to the TX utility (Oncor) for above average growth and high visibility into rider recovery. The Infrastructure segment (SIP) is valued at 11x EV/EBITDA, an implied premium to the Mexican market (5.5x) and select premium US midstream comparable (Williams and TC Energy at approximately 9-10x) on EV/EBITDA due to its long duration contracted cash flows. The parent drag is treated on a balanced blend of P/E and HoldCo debt and cash netting.

Risks to achievement to our Price Objective are: 1) Wildfire and other natural disasters/catastrophic events, 2) regulatory outcomes, 3) interest rates, 4) equity needs, 5) earned returns and operating costs, 6) LNG development, 7) ability to deploy capital, and 8) environmental, social, & governance [ESG] profile.

Southern Company (SO)
Our $64 PO is derived from a sum-of-the-parts analysis (SOTP). We use a P/E valuation approach on 2025 estimates and use peer multiples of 16.3x for electric and 16.2x for gas, respectively (with dis/prem applied per asset depending on growth/risk): we then gross up these multiples by +5% to account for sector wide EPS growth to derive a 12-month forward PO. We subtract 50% of the 2025 parent interest expense multiple by an electric P/E peer multiple to reflect parent leverage supporting the utilities. We net out total parent drag and add back the remaining parent interest expense with a 50% weighting.

Upside/downside risks to achievement of the PO are: 1) Vogtle construction timing and costs, 2) regulatory, political, and legislative changes, 3) ability to earn the allowed rate of return, 4) changes to the capital expenditure forecast, 5) nuclear incidents, weather, and natural disasters, 6) rate of customer and sales growth, 7) O&M trends, 8) interest rates, 9) environmental policies and regulations, 10) M&A, and 11) interest rates.

Southwest Gas Holdings (SWX)
Our $62 PO is based on our 2024E/2025E Sum-of-the-parts (SOTP) analysis. We apply a 16.2x our 25E peer Gas LDC utility P/E to the utility EPS across the company's three major jurisdictions, which include Arizona, Nevada and California. We gross this peer multiple up by 5% to reflect capital appreciation across the sector.

For the regulated assets, we apply a -2x discount to reflect below average jurisdiction and lack of consistent execution. For the infrastructure services segment, we apply 8.9x FY24E EV/EBITDA multiple (based on peer consensus multiples), which is a 1.0x discount to the business' closest industrial comps due again to a history of missing guidance. Lastly, for parent debt in the Corp & Other segment, we net out 50/50 weighting for re-capitalization and add back 50% of parent interest expense using the same P/E multiple as the regulated utilities.

Upside/downside risks to achieving the Price Objective are 1) M&A, 2) activist shareholders, 3) infrastructure services performance, 4) construction margins, 5) regulatory outcomes, 6) ability to earn regulatory rates of return, 7) capital markets access, 8) rating agency actions, 9) regulatory, legislative, or judicial outcomes.

Spire (SR)
Our $66 PO for SR is based on a sum-of-the-parts analysis. Consistently across our coverage universe we apply the peer gas 2025 P/E multiple (16.8x) as a starting point and 'gross-up' by five percent to account for growth across the sector. We include a 3x discount for Missouri given a less-constructive regulatory environment and an in-line multiple for Mississippi/Gulf and AL assets given their location and de-risked nature. For the midstream assets, we use a base 9.5x EV/EBITDA multiple with a 4x discount for storage given uncertainty, and a 2x discount for marketing due to volatility. We weight STL pipeline as 75% in our valuation given uncertainty with the pipe's future.

Upside risks: 1) favorable regulatory and/or legislative outcomes, 2) lower interest rates, 3) ability to earn the regulatory allowed rate of return, 4) lower equity needs, 5) higher capital expenditures, 6) Favorable FERC ruling on STL pipeline commercial operations, and 7) favorable unregulated performance.

Downside risks:
1) adverse regulatory and/or legislative outcomes, 2) higher interest rates, 3) inability to earn the regulatory allowed rate of return, 4) higher equity needs, 5) lower capital expenditures, 6) unfavorable ruling from FERC on STL pipeline commercial operations, and 7) natural disaster

UGI Corp. (UGI)
Our $32 PO is derived from our SOTP analysis. We mark-to-market (MtM) our UGI Utilities segment to 2025E peer P/E multiples of 16.7x for gas &16.4x for electric. For U.S. & international LPG, we apply an 8.8x EBITDA base multiple in-line with propane comps & apply a -3x discount to UGI International based on a challenged energy environment in Europe. We apply a -3x discount to AmeriGas based on challenges to customer retention & a slow return to the M&A market. We apply an 8.8x EV/EBITDA multiple to the midstream segment with premiums based on the asset. For the renewables business, we take the NPV of future cash flows, which implies a 7.2x FY25E EV/EBITDA multiple. For parent debt in the Corp & Other segment we net out 50/50 weighting for recapitalization & add back 50% of parent interest expense.

Upside risks: favorable weather, improving propane logistics efficiencies domestically or in Europe, increased conversion rates or faster new home construction within PA, and favorable currency exchange rates. Macroeconomic concerns are declining interest rates, lack of volatility and declining natural gas prices, and a general economic upturn.

Downside risks: unfavorable weather, propane logistics issues and shortages domestically or in Europe, reduced conversion rates or slower new home construction within PA, and unfavorable currency exchange rates. Macroeconomic concerns are rising interest rates, volatile and rising natural gas prices, and a general economic slowdown.

Unitil Corporation (UTL)
We value UTL at a $48 PO based on a 2025e forward P/E basis using a utility group multiple of 14.5x for electric and 15.1x for gas. Both electric and gas peer P/E multiples are grossed up for a year to 2025 by 5% each to reflect capital appreciation across the sector.
Risks to our price objective on the upside are capex updates around MA gas pipeline replacement, regulatory asks around ROEs, and M&A. On the downside, risks are interest rate risk which could reduce the appetite for M&A, regulatory challenges.

WEC Energy Group Inc (WEC)
Our $103 PO is based on 2025E SoTP, with a large cap electric group multiple of 16.2x and gas regulated multiple of 15.8x. Electric and gas peer P/E multiples are grossed up for a year to reflect capital appreciation across the sector. We apply a 3.0x premium to WEC's WI electric & gas subs for surety in earnings growth for the next two years following the Commission's recent settlement. We ascribe a 4x premium vs. the group at ATC to account for steady earnings growth as well as above avg Federal ROE's. We give Power the Future (PTF) a 3.0x P/E premium as the ROE is set indefinitely on historical and new investments. We ascribe an in line multiple for the parent accounting for the interest expense which finances overall utility operations. We value Energy Infrastructure on a net present value basis using a WACC of 5.6%, in line with other renewable assets. We net out 50% of HoldCo debt from equity valuation and adjust to add back the parent drag on interest exp. Risks to our PO are positive or negative changes in: 1) earned regulatory returns, 2) capital expenditures, 3) regulatory/political/legislative changes, 4) interest rates, 5) natural disasters, and 6) execution on unregulated projects.

Xcel Energy Inc (XEL)
Our PO is $74. We value Xcel Energy using a sum of the parts (SOTP) approach. Given the difference in geography, earnings strength, growth opportunity and risk profile, we divide the segments by subsidiary. We use 2025E forward P/E multiple of 16.0x to derive a value for the different business segments, including the parent segment. Electric peer P/E multiple is grossed up for a year to reflect capital appreciation across the sector. We apply a 4x premium to XEL subsidiaries in MN and NM, and 3x in CO and WI as both utilities present solid or improving regulatory treatment with tangible investment upside. We see this multiple as appropriate as the company has growth opportunities, resolving regulatory drag and resolving uncertainty around rate cases. We also net back 50% of the parent interest expense and instead subtract out 50% of parent debt to more accurately reflect HoldCo leverage.

Risks to achievement of the Price Objective are interest rate changes, regulatory risk, such as lower authorized ROEs or less favorable riders/trackers for renewables and transmission, inability to deploy capital at guided levels, adverse legislation, execution delays, and weather/natural disasters.

[R1] Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. *VOLATILITY RISK RATINGS*, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. *INVESTMENT RATINGS* reflect the analyst's assessment of both a stock's: absolute total return potential as well as its attractiveness for investment relative to other stocks within its *Coverage Cluster* (defined below). There are three investment ratings: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster[R2]
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

[R2]Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

The issuer is or was, within the last 12 months, a non-securities business client of BofAS and/or one or more of its affiliates: Alliant Energy, Ameren Corporation, Atmos Energy, Avangrid, Avista, Black Hills Corporat, CenterPoint, CMS Energy, Consolidated Edison, Dominion Energy, DTE Energy, Duke Energy, Essential Utilities, MDU Resources, MGE Energy, New Jersey Resources, Northwest Natural, Northwestern Corpora, ONE Gas, Inc., PNM Resources, Public Service, Sempra Energy, Southern Company, Southwest Gas, Spire, Inc, UGI Corp., Unitil Corporation, WEC Energy Group Inc, Xcel Energy Inc.
BofAS or an affiliate has received compensation for investment banking services from this issuer within the past 12 months: Alliant Energy, Ameren Corporation, Atmos Energy, Avangrid, Avista, Black Hills Corporat, CenterPoint, CMS Energy, Consolidated Edison, Dominion Energy, DTE Energy, Duke Energy, Essential Utilities, MDU Resources, New Jersey Resources, Northwestern Corpora, ONE Gas, Inc., PNM Resources, Public Service, Sempra Energy, Southern Company, Southwest Gas, UGI Corp., Unitil Corporation, WEC Energy Group Inc, Xcel Energy Inc.
BofAS or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer or an affiliate of the issuer within the next three months: Alliant Energy, Ameren Corporation, Atmos Energy, Avangrid, Avista, CenterPoint, CMS Energy, Consolidated Edison, Dominion Energy, DTE Energy, Duke Energy, New Jersey Resources, Northwestern Corpora, ONE Gas, Inc., PNM Resources, Sempra Energy, Southern Company, Southwest Gas, UGI Corp., Xcel Energy Inc.
BofAS together with its affiliates beneficially owns one percent or more of the common stock of this issuer. If this report was issued on or after the 9th day of the month, it reflects the ownership position on the last day of the previous month. Reports issued before the 9th day of a month reflect the ownership position at the end of the second month preceding the date of the report: Atmos Energy, CMS Energy, Dominion Energy, DTE Energy, Duke Energy, Sempra Energy, Southern Company, Spire, Inc, WEC Energy Group Inc, Xcel Energy Inc.
BofAS or one of its affiliates is willing to sell to, or buy from, clients the common equity of the issuer on a principal basis: Alliant Energy Corp, Ameren Corp, Atmos Energy, Avangrid, Avista Corp, Black Hills, CenterPoint Energy, CMS Energy, Consolidated Edison, Dominion Energy, DTE Energy, Duke Energy, Essential Utilities, MDU Resources, MGE Energy, New Jersey Resources, Northwest Natural, NorthWestern Corp, ONE Gas, Inc., PNM Resources Inc., Public Service, Sempra Energy, Southern Company, Southwest Gas, Spire, UGI Corp., Unitil Corp, WEC Energy Group Inc, Xcel Energy.
The issuer is or was, within the last 12 months, a securities business client (non-investment banking) of BofAS and/or one or more of its affiliates: Alliant Energy, Ameren Corporation, Atmos Energy, Avangrid, Avista, Black Hills Corporat, CenterPoint, CMS Energy, Consolidated Edison, Dominion Energy, DTE Energy, Duke Energy, Essential Utilities, MGE Energy, New Jersey Resources, Northwest Natural, Northwestern Corpora, ONE Gas, Inc., PNM Resources, Public Service, Sempra Energy, Southern Company, Southwest Gas, Spire, Inc, UGI Corp., Unitil Corporation, WEC Energy Group Inc, Xcel Energy Inc.
BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

Other Important Disclosures

BofAS together with its affiliates beneficially owns a net short position of 0.5% or more of the total issued share capital of this issuer. Ownership positions speak as of a date no more than three trading days prior to the date of this report: Atmos Energy, CMS Energy, ONE Gas, Inc., PNM Resources.
From time to time research analysts conduct site visits of covered issuers. BofA Global Research policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits.
Prices are indicative and for information purposes only. Except as otherwise stated in the report, for any recommendation in relation to an equity security, the price referenced is the publicly traded price of the security as of close of business on the day prior to the date of the report or, if the report is published during intraday trading, the price referenced is indicative of the traded price as of the date and time of the report and in relation to a debt security (including equity preferred and CDS), prices are indicative as of the date and time of the report and are from various sources including BofA Securities trading desks.
The date and time of completion of the production of any recommendation in this report shall be the date and time of dissemination of this report as recorded in the report timestamp.

Recipients who are not institutional investors or market professionals should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.
Officers of BofAS or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments.
Refer to BofA Global Research policies relating to conflicts of interest.
"BofA Securities" includes BofA Securities, Inc. ("BofAS") and its affiliates. Investors should contact their BofA Securities representative or Merrill Global Wealth Management

financial advisor if they have questions concerning this report or concerning the appropriateness of any investment idea described herein for such investor. "BofA Securities" is a global brand for BofA Global Research.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection

therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.

You should therefore assume that BofA Securities will not update any fact, circumstance or opinion contained herein.

Subject to the quiet period applicable under laws of the various jurisdictions in which we distribute research reports and other legal and BofA Securities policy-related restrictions on the publication of research reports, fundamental equity reports are produced on a regular basis as necessary to keep the investment recommendation current.

Certain outstanding reports or investment opinions relating to securities, financial instruments and/or issuers may no longer be current. Always refer to the most recent research report relating to an issuer prior to making an investment decision.

In some cases, an issuer may be classified as Restricted or may be Under Review or Extended Review. In each case, investors should consider any investment opinion relating to such issuer (or its security and/or financial instruments) to be suspended or withdrawn and should not rely on the analyses and investment opinion(s) pertaining to such issuer (or its securities and/or financial instruments) nor should the analyses or opinion(s) be considered a solicitation of any kind. Sales persons and financial advisors affiliated with BofAS or any of its affiliates may not solicit purchases of securities or financial instruments that are Restricted or Under Review and may only solicit securities under Extended Review in accordance with firm policies.

Neither BofA Securities nor any officer or employee of BofA Securities accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this information.

US Utilities & IPPs

PowerPoints: EXC beat, ES/Orsted, WEC IL, FE/CMS, AVA miss, NI, NWE, AMRC, & VST

Industry Overview

EXC: 1Q23 EPS beat on lower O&M drag, Corp. 'Other'

Exelon (EXC) reported $0.70 1Q23 EPS above $0.63 BofA and $0.66 Street. The delta versus BofA was +2c at Baltimore Gas and Electric (BGE) related to flat year-over-year operations and maintenance (O&M) expense, +3c at Pepco Holdings (PHI) from lower-than-expected weather and O&M drag and +4c at Corporate from +2c uplift related to Corporate 'Other'. This was offset by -1c lower distribution rates at both Commonwealth Edison (ComEd) and Philadelphia Electric Company (PECO). We reiterate than O&M management and mitigation remains a key outperformance opportunity especially at PECO where the existing plan has less robust growth between cases. EXC reaffirmed $2.30-$2.42 FY23 adjusted operating earnings guidance in-line with $2.38 BofAe / $2.36 Street. On the earnings call management sounded very comfortable in its ability to offset the ~$0.05 weather headwinds and deliver at or above the full year 2023 guidance midpoint. As expected, EXC maintained 6-8% '21-'25 EPS CAGR and 6-8% 2022-2026 EPS CAGR with expectation to be at midpoint or better.

EXC reiterated 13-14% FFO to Debt and CFO (Pre-WC) to Debt range 2023-2026. The company executed 80% of its debt financing needs in 1Q23 including $2,500Mn Corp and expects remaining $425Mn equity issued by 2025, in-line with previous guidance. We await regulatory updates across EXC's pending rate cases primarily its multi-year plan (MYP) filings in IL where intervenor direct testimony is expected in May. The Nicor datapoint on page 2 is a constructive ROE datapoint. We expect the resolution of its regulatory efforts primarily in IL and across jurisdictions with multi-year plans will de-risk the utility outlook, lending to share outperformance. *Maintain Buy on EXC which trades at an overly discounted valuation despite strong long-term investment outlook.*

ES: Orsted's earnings call focused on US offshore wind

Orsted hosted its 1Q23 earnings call this morning where the question & answer session was nearly unanimously focused on the United States assets and outlook. Orsted is the joint venture partner with Eversource Energy (ES) for its offshore wind projects and has worked with Public Service Enterprise Group (PEG). Orsted is evaluating whether any of its US projects would qualify for the energy community investment tax credit (ITC) incremental incentives but did not definitively affirm this opportunity. Orsted declined to provide project level disclosures and reiterated that the Northeast and Mid-Atlantic are below their return targets but have a path to create value on a 'life cycle basis' which assumes that the company can retain the domestic content requirement incentive tax credits. Orsted is hopeful that New Jersey will be open to sharing tax credits with the developments and the company is having discussions with other states. Orsted described its New York bid as compliant with the new parameters of the IRA. The Rhode Island bid was characterized as creating value as the company attempts to avoid the 'race to the bottom' on pricing. As a result, Orsted expects awarded prices to increase in the United States.

ES/Orsted: ES offshore strategy review the focus (Cont)

When asked about minority interest asset sales, Orsted management said there was good interest, and they are confident that they can realize gains from these transactions consistent with prior levels. Orsted reiterated that if it does not see value creation from projects, the company 'will do something' and is open to incurring project specific break costs and walking away from projects. See our peers' note on Orsted in detail.

Orsted's earnings call did not provide new major insights into the economics or outlook for the Eversource joint venture. The reliance on favorable Internal Revenue Service (IRS) and state negotiations for tax credits to create value for the projects remains a risk We remain cautious on unregulated US offshore wind (ie not built under a rate base model) where returns have significantly compressed. Maintain Underperform on Eversource (ES) and Avangrid (AGR) which trade at premiums to our view of the fundamentals. We will be closely watching for Eversource's offshore wind strategic review update with 1Q23 earnings.

EXC/WEC/SO: Illnois Staff posts cost of capital

The Illinois Commerce Commission (ICC) Staff posted a cost of capital recommendation in the ongoing Nicor rate case. The Staff recommends 9.89% allowed ROE and a 50.0% equity ratio which compares with 10.35% ROE and 54.5% request. On a comparable basis, assuming the equity ratio remains constant at 54% would imply a 9.1% ROE. This is notable because Exelon (EXC) has a current authorized cap structure of ~49.5%, which would imply a higher ROE rec of around 9.9%. Exelon has proposed a modest increase in ROE to ~51.2%. This remains a closely watched set of proceedings as the ICC has several new members and is in the middle of several rate cases including multiyear rate plans (MYRP) for the electrics and new rate reviews for the gas utilities ahead of the sunsetting of the infrastructure rider at the end of 2023. We view this as particularly relevant for IL utilities including EXC, WEC which has testimony set to come out May 9, and AEE which has electric testimony set to be published May 5.

WEC: ICC poses questions to Peoples in ongoing gas case

The Illinois Commerce Commission (ICC) posed questions to People Gas (WEC Energy [WEC] subsidiary) in an April 17th filing within Peoples Gas ongoing natural gas rate case (Docket 23-0069). The questions included the following:

- How would the proposed rate increase and rate design affect residential customers ($/month), particularly those already having difficulty paying bills or staying connected?

- How have Federal electrification priorities, electrification initiatives like Illinois' 220 ILCS 5/8- 103B(b-27), and the general trend toward electrification been considered in scaling or targeting proposed main replacement investments?

Recall Peoples natural gas rate case requested +$407Mn rate increase (details here: PowerPoints: WEC Illinois 10 January 2023). While the rate case is not projected to increase customer bills given declines in forward natural gas prices, Peoples' proposal has received elevated pushback from IL stakeholders following given the 2022 uptick in natural gas prices which elevated customer bill pressures and Illinois environmental goals which target a shift away from natural gas and thus limited incremental natural gas infrastructure investment. We view the ICC questions as unusual this early in the rate case litigation process. Perceived ICC pushback to natural gas bill pressures and incremental gas infrastructure investment is cautionary for the outlook of Peoples gas rate case outcome. *We closely monitor ICC positioning in the outstanding IL gas rate cases as well as IL electric rate cases especially following recent ICC turnover. Maintain Buy on shares of WEC with shares trading at an attractive risk/reward skew despite regulatory risk.*

WEC Energy Group Inc: Regulatory execution critical in coming months as gas pressure builds 03 May 2023

FE/CMS: Convertible notes priced

FirstEnergy (FE) announced pricing of $1.3Bn, 4% convertible senior notes due 2026. The company expects $1.28Bn net proceeds on $1.3bn issuance after deducting discounts and commissions and offering expenses payable by the Company. The 4% cost of debt represents +40bps spread to US 5-Yr Treasuries and approx. -15bps discount to US 2-Yr Treasury. The conversion rate for the notes will initially be 21.3620 shares common stock per $1,000 principal amount of convertible notes, implying ~$46.81 conversion price per share of common stock or 20% premium over last reported FE share price. FE has cited plans to use a portion of proceeds to voluntarily contribute to its qualified pension plan. FirstEnergy 1Q23 10Q cites +8% return on assets (ROA) related to the pension plan, subject to market conditions. We estimate this creates 4% return spread (8% ROA versus 4% cost of debt). Assuming $1,280Mn net proceeds, this implies +$51Mn pre-tax earnings accretion ($1,280 * 4%) and +$38Mn post-tax earnings accretion, or approximate +7c EPS accretion. **This is a 'high-case' scenario as it remains unclear what portion of FE's ~$1.3Bn convertible offering will be used to fund the pension plan.** (Details here: PowerPoints: FE/CMS Debt 01 May 2023) *Maintain Underperform on shares of FE as we continue to see above-average earnings risk which is underappreciated by Street. Earnings accretion related to the latest convertible note transaction may offset some EPS drag although represents lower quality pension income.*

CMS Energy (CMS) priced $700Mn, 3.375% Convertible Senior Notes due 2028, upsized versus previous offering of $650Mn principal amount of convertible notes. The company expects $688.4Mn net proceeds after deducting discounts, commissions and estimated offering expenses payable by the Company. The note will mature May 1, 2028 and bear interest at a fixed rate of 3.375%. This represents ~24bp discount to the US 5-Yr Treasury. The conversion rate for the notes will initially be 13.5194 shares common stock per $1,000 principal amount of convertible notes, implying ~$73.97 conversion price per share of common stock or 20% premium over last reported CMS share price. CMS has cited opportunistic financing driving FY23 earnings growth as a offset to weak 1Q23 weather and severe storms. *Maintain Buy on CMS with shares trading at discount to fair value despite above-average near-term and long-term earnings profile intact.*

AVA: Wide 1Q23 miss but reaffirm FY23

Avista Corp (AVA) reported $0.73 EPS a wide miss vs $1.19 BofA/$1.16 Consensus. Natural gas utility margin was -$0.11 vs +$0.10 BofA while electric utility margin was +$0.06 vs +$0.23 BofA. Income tax was also a -$0.09 driver vs BofA expectation of neutral. Interest expense and other businesses were each also -$0.02 vs BofAe. In 1Q23 Avista had investment losses compared with investment gains in 1Q22. Despite the large 1Q23 miss, Avista reaffirmed $2.27-$2.47 guidance vs $2.30 BofA and $2.34 Consensus. The segment contributions were unchanged but Avista introduced new quarterly cadence disclosures with 50% of FY23 EPS expected in 4Q23 and 10% in 3Q23. This compares with a 3Q22 small loss. $475Mn annual capex 2023-2025 was unchanged. Avista announced that its CFO Mark Thies is retiring, replaced by Kevin Christie. Thies is one of the longest serving CFOs and one of only two CFOs in our coverage universe who have been in their role since the 2008 financial crisis.

As of 3/31/23 there was $231Mn revolver borrowings outstanding at 5.8% on the $400Mn facility, favorably down from $313Mn at 5.3% as of 12/31/22. Avista issued $30Mn of common stock during the quarter (0.7Mn shares) with Board authority to issue an incremental 1.6Mn. Avista expects issuing an incremental $90Mn for the balance of 2023 with the $120Mn FY23 target unchanged. After the $250Mn long-term debt issuance in 1Q23 (up from $200Mn original plan), AVA does not anticipate further long-term debt issuances in 2023. The Colstrip litigation and arbitration have been stayed to June 16, 2023.

Avista is in the process of determining if it will need to procure additional carbon allowances under the Washington Climate Commitment Act (CCA). Avista estimates that it would have had an additional $5.9Mn cost if it was required to purchase additional allowances. Management did not record the expense because it does not view them as probable given the uncertainty regarding the applicability to electric wholesale operations. Avista ultimately expects to recover any associated costs through its ratemaking.

The wide 1Q23 miss is a disappointing update and the CFO retirement casts additional uncertainty on the long-term outlook. We maintain Underperform on shares of Avista which are expensive relative to our fundamental view.

NI: 1Q23 in line with expectations, LT guidance reaffirmed

NiSource (NI) reported 1Q23 adj. NOEPS (net operating EPS) of $0.77 vs. our estimate of $0.78 and Consensus of $0.76. Adjusted results include a $0.06 net positive impact from weather normalization. NI also reaffirmed 2023 NOEPS guidance of $1.54-1.60 as well as the long-term NOEPS growth guidance of 6-8% through 2027. NI ended the quarter with total debt of $11.6Bn (up from $11.3Bn las quarter) with long term debt at $10.3Bn (up from $9.6Bn last quarter) and a weighted average interest rate of 3.83% (up from $3.72 last quarter). The long term FFO (funds from operations)/debt target of 14-166% was also reaffirmed. With the successful achievement of a rate case settlement at subsidiary NIPSCO (Northern Indiana Public Service Company) in March and a final order expected in August, NI noted the minority interest sale of the subsidiary remains on track for 2023. Lastly, NI continues to target $15Bn in cumulative investments through 2027, further supported the long-term growth outlook.

We reiterate Buy on shares with an attractive valuation and favorable de-risking of its regulatory plan. Investors have focused on the multiple reports of natural gas local distribution (LDC) sales for peer utilities and whether there are any implications for NiSource. Overall remain constructive with renewables on time, and sale ahead to derisk financing plan.

In Indiana House Bill 1420 regarding utility transmission right of first refusal (ROFR) has passed the State legislature and was signed by Governor Holcomb. Industrial users called for the Governor to veto the bill which they described as anti-consumer.

NWE: Montana acts on key legislation

We provide legislative recaps on key bills we are tracking. The following bills passed both legislative chambers: Florida SB250 (natural emergencies & related liability), Montana SB208/SB228 (prohibition on energy choice bans), Montana HB971 (environmental policy), Montana SB176 (committee membership)

The swift drafting and passage of Montana HB971 is favorable for Northwestern Corp (NWE). We maintain Buy on shares of NWE where we see a favorable valuation and among the best rate-of-change opportunities. NorthWestern Corporation: 1Q23 light vs Street on tax but core was strong: Reiterate Buy. Legislature watch. 28 April 2023

AMRC/EIX: Storage project timeline extended further

Southern California Edison's (SCE, subsidiary of Edison International [EIX]) 537.5MW (megawatt) battery storage project was further delayed on force majeure claims by construction contractor Ameresco (AMRC - Buy) citing weather-related damage. As a result, the damaged portion of the project, which represents 225MW, is expected to be delayed beyond early-summer 2023 when the remaining capacity is expected to placed in service (per AMRC). The original agreement, signed in October 21, contemplated a completion date of Aug. 1, 2022 and included consideration for EPC (engineering, construction and procurement) and O&M (operations and maintenance) services of $892Mn. AMRC has already made force majeure claims once under the agreement citing supply delays. EIX and AMRC are still working to determine the extent of the latest delay. Meaningful delays could have implications for summer peak reliability needs, depending

on weather and load. For AMRC, an inability to reach an extension agreement could result in liquidated damages payable to EIX as high as $89Mn based on prior disclosures as well as a loss of cost recovery related to schedule changes. *Maintain Buy on AMRC as we remain constructive on long-term prospects for the Company's biogas project pipeline and an accelerating end market EPC demand. The California storage disclosure is a setback but still relatively small in the context of the company. The possibility of reputational damage among investors and potential counterparties for this high-profile projects is the more important dynamic to watch. Our Underperform rating on Edison International is unrelated to the battery project but rather the below-average growth prospects. See details here:* Edison International: Significant updates pushed to 2Q, EPS risk remains w/ growth concentrated 2026+ 03 May 2023

VST: Feedback on our preview; reframing SotP to illustrate equity value

In our calls with investors, the focus remains on two key elements of the Vistra (VST - Buy) story: 1.) potential for further M&A activity, and 2.) valuation. On the former, we do not believe the Energy Harbor (ENGH - Not covered) acquisition precludes additional M&A in the near-to-medium term. Further, under the right terms, we believe acquisitions in the nuclear and/or renewables space could be viewed favorable by investors. Regarding valuation, the critical debate centers on just how much equity to attribute to Vistra Vision vs. Tradition. While in our preview we illustrated the two segments on an enterprise value basis using an SotP (sum-of-the-parts), below we reframe our valuation to better capture the equity values embedded in our analysis. Additionally, we deduct the 15% minority interest in Vistra Vision. Our reframed SotP implies a 6.7x EV/EBITDA multiple to Vistra Vision (vs. 6.0x previously) as we believe this better reflects the underlying value of the assets after layering in net debt of $3.4Bn and estimated minority interest of ~$2.0Bn. For Vistra Tradition, our implied EV/EBITDA multiple is unchanged at 3.9x. Net, our analysis implies ~$11Bn of equity value at Vistra Vision and ~$(2)Bn to Vistra Tradition. Further clarity and disclosures on the outlook for Tradition could be an opportunity of upside. Our PO moves to $29 from $30. We maintain our Buy rating given what we view is an attractive valuation profile (levered FCF of ~30%) and compelling shareholder return story (we model $2.8Bn in repurchases through 2025).

Exhibit 1: VST SotP
We arrive at a $29 PO

BofA GLOBAL RESEARCH

Price objective basis & risk

Ameresco (AMRC)
Our $59 price objective is based on a 2025E sum-of-the-parts (SOTP) methodology, with EBITDA multiples for each business segment driven by peer group valuations.

We value the Projects segment at a 5% discount relative to sustainable infrastructure Engineering & Construction (to adjust for Tetra Tech's implied water premium). We apply an average 7.4x EBITDA multiple for the Energy Assets business, with 12.2x multiple for solar and storage, 1x prem to peers. We apply 8.2x multiple for LFG, relative to the group of renewable gas peers.

Within the Energy Assets biz, we value RNG on a discounted cash flow (DCF) methodology with a 10.24% discount rate and apply an 8x exit multiple to the post-2032E terminal FCFE.

For the O&M business, we apply a multiple in line with the Projects segment, given related businesses. For the Other segment, we apply a multiple in line with the Energy Assets business.

Risks are CEO tenure, construction delays, revenue concentration, as c.75% of revenues from from federal, state and local government entities, government contract risk, regulatory risks, merchant exposure, and interest rates.

Avangrid (AGR)
Our $34 PO is based on an 2025E sum of the parts analysis. The core utilities are valued on by applying discounts to the base sector P/E of 16.0x/16.3x for electric/gas due to below average growth and regulatory jurisdictions. We apply an in-line multiple to the PNM Resources assets with the transaction pending. Both electric and gas peer P/Es are grossed up +5% to reflect capital appreciation across the sector. The renewables are valued at approximately 10x EV/EBITDA, consistent with peers while offshore wind is valued using discounted cash flows at a 12% discount rate. Future potential value creation from the renewable development 'DevCo' is provided as well. Lastly

parent/HoldCo financing negatives are ascribed.

Up/downside risks to achievement of the PO and estimates are 1) earned ROEs at the utilities, 2) utility capital expenditure forecasts, 3) regulatory/political/legislative outcomes, particularly regarding the pending acquisition of PNM Resources, 4) equity needs, 5) offshore wind construction, 6) Iberdrola owns over 80% of AGR common stock, limiting float and presenting a potential for governance conflicts, despite the BoD being majority unaffiliated with Iberdrola. 7) natural disasters, 8) commodity and interest rate fluctuations, and 9) management changes.

Avista (AVA)
Our $39 PO is based on our 2025E sum-of-the-parts (SOTP) analysis, based on the electric group multiple of 16.6x for electric and 17.0x for gas. Both electric and gas peer P/E multiples are grossed to reflect the group's 5% CAGR to reflect capital appreciation across the sector. We then use a blended electric and gas multiple of approximately 80% and 20%, respectively, for AVA's WA and ID jurisdictions given the composition of its rate base. We apply a -2x discounts to WA, ID, and OR to capture below average-growth, inconsistent execution, and regulatory uncertainty. We apply the gas multiple to its OR jurisdiction as it is entirely comprised of natural gas distribution assets. We apply an electric multiple to its Alaska subsidiary, AEL&P, as it is a vertically integrated electric utility. The Corporate & Other segment is valued with (1) a utility P/E multiple on the HoldCo expenses, (2) fully offset by the disclosed fair market value of other assets & investments.

Risks to achievement of the price objective are changes in: 1) regulatory, political, and legislative, 2) interest rates and commodities, 3) wildfires and natural disasters, 4) phase-out of natural gas, 5) capital expenditures, 6) debt and equity needs, 7) credit ratings, 8) clinical trials, and 9) other investments.

CMS Energy (CMS)
Our PO of $68 is based on a SotP relying on 2025E forward P/E multiples for the utility business and a 2025E forward EV/EBITDA multiple for CMS' IPP assets. For the utility seg we apply a 2.0x prem to the average 2025E regulated multiple P/E of 16.6x for the electric segment and of 17.0x for the gas segment, with the 10-yr capex update providing clear sight on ratebase growth and further upside, as well as continued favorable regulatory environment, and finally historically proven ability to consistently perform at the high end of guidance range.

Both electric and gas peer P/E multiples are grossed up +5% to reflect capital appreciation across the sector.

For CMS' merchant business we apply a 4x EV/EBITDA multiple, in line with current market value of CMS' power plants. We value Dearborn Industrial Generation (DIG) on a DCF basis through 2030 given the plant is no longer expected to be sold to Consumers.

Downside risks are: 1) earned ROEs declining which reduce CMS utility earnings 2) execution risk on capex and cost cutting which would primarily affect the utility earnings, 3) negatives changes to market energy prices which could affect the DIG plant's ability to re-contract at the assumed prices.

Edison International (EIX)
Our $59 PO is based on sum of the parts analysis with a peer 16.5x 2024 P/E grossed-up 5% for group growth. A -3x P/E discount is applied to the CPUC, as well as the Parent/Other segment, and -1x P/E discount to FERC jurisdictional utilities. The discount reflects below-average growth and regulatory considerations, albeit FERC risk profile is less challenging than the CPUC. The negative wildfire adjustments are netted-out to reflect a probabilistic approach to the risk of shareholder funded wildfires and the

ongoing contribution to the CA fund on an NPV basis.

Positive and negative risks are changes in: 1) Wildfire and other natural disasters/catastrophic events, 2) regulatory outcomes, 3) interest rates, 4) equity needs, 5) earned returns and operating costs, 6) Edison Energy returns, 7) ability to deploy capital, 8) environmental, social, & governance [ESG] profile, and 9) wildfire liabilities for shareholders.

Eversource Energy (ES)
Our sum of the parts based price objective of $78 uses P/E multiples on 2025E earnings. The valuation is based on a 2025 sum of the parts analysis. We apply the 2025 average peer P/Es of 16.4x electric, 16.4x natural gas, and 24.8x water. For Connecticut electric & gas utilities, we value at -3x discount to 16.4x base multiple to reflect historical and prospective earnings risks. Connecticut water is valued in-line with natural gas. The other utilities are valued at a peer average multiple. Parent net loss per share is valued at an average electric utility multiple.

Upside and downside risks to our Price Objective are 1) regulatory/political/legislative changes, 2) capital expenditures forecasts, 3) ability to earn the regulatory allowed ROE, 4) offshore wind development, 5) natural disasters & storms, 6) operational performance and gas incidents, 7) integration of historical and prospective M&A, 8) pension plan performance, and 9) equity issuances.

Exelon (EXC)
Our $47 PO is based on an sum of the parts valuation. Our base electric peer 2025 P/E multiple of 16.3x is grossed up for a year by 5% to reflect capital appreciation across the sector. We apply an in-line multiple across EXC utilities ComEd, PECO, BGE, PHI with above-average growth prospects and below average risks counterbalanced but non-linear growth and inconsistent execution.

Risks to achievement of the rating and price objective include: 1) Adverse regulatory, political, and legislative outcomes, 2) inability to deploy the guided capital expenditures, 3) equity needs that differ from guidance, 4) storms and other natural disasters, 5) inability to control operating costs, 6) changes in effective tax and interest rates, and 7) changes in credit rating agency metric requirements.

FirstEnergy (FE)
The $39 Price Objective is based on a sum-of-the-parts valuation. Our multiples are driven by relative P/E premiums/discounts to the 16.7x 2025E regulated peer multiple. Peer P/E multiple is grossed up for a year by 5% to reflect capital appreciation across the sector, a consistent approach across our coverage universe. We apply -2x discount to reflect rate review risk, below average risk, and pension exposure. We subtract out the holding company debt given the above-average leverage

Upside and downside risks to the Price Objective are: 1) regulatory/political/legislative outcomes, 2) ability to earn the allowed ROEs and/or other changes in regulatory earnings, 3) weather and natural disasters, 4) investigation revelations, 5) equity needs versus forecasts, 6) capital expenditures, 7) pension plan returns, discount rate changes, and interest/service costs associated with the plan, 8) economic conditions & interest rates, and 9) taxes.

NiSource Inc (NI)
Our $32 PO is based on a sum of the parts valuation. We value each gas and electric utility separately using 2025 forward P/E multiples that are marked-to-market to the latest peer utility multiples of 16.4x for gas and 16.4x for electric. Consistent across our coverage universe, the base electric & gas peer P/E multiples are grossed up by +5% to reflect capital appreciation across the sector. We utilize a +1x premium for NIPSCO

Gas/Electric due to generally constructive regulatory outcomes. We subtract the value of excess holding company debt at the parent not supporting the utility subsidiaries.

Positive and negative risks to our Price Objective are changes in 1) regulatory, political, and legislative outcomes, 2) ability to execute on capital expenditure plan, 3) inflation, operating expense, and interest rates as they influence earned rates of return, 4) customer count and load growth, 5) commodities, 6) natural disasters, 7) pension plan returns, 8) equity and asset sale needs.

NorthWestern Corporation (NWE)
Our $64 price objective is based 2025E price/earnings (P/E) methodology. We apply the electric utility sector P/E of 16.27 as a base then gross-up +5% to reflect capital appreciation across the sector. We apply a -1x discount to reflect historically challenged regulation, below-average rate base (4-5%) / EPS (3-6%) growth, and inflationary concerns.

Risks to our price objective are changes in 1) regulatory, political, and legislative outcomes, 2) ability to recover costs and earn the regulatory allowed return on equity [ROE], 3) differences in future equity needs, 4) capital expenditure forecasts, 5) commodity and interest rates, 6) natural disasters and wildfires, and 7) management changes.

Vistra Energy (VST)
Our $30 price objective is based on a 2025E SOTP valuation. For Vistra Vision, we arrive at a 6.0x blended EV/EBITDA. We apply a 6.5x EV/FCF multiple to nuclear, which we believe fairly represents the risk/reward profile of the assets. For Renewables and Storage, we apply a 10x EV/FCF multiple given the accelerating nature of the end markets. For Retail, we apply a 6.5x EV/FCF multiple, consistent with peers. For Vistra Tradition, we arrive at a 3.9x blended EV/EBITDA multiple. We apply a 5.5x EV/FCF multiple to Gas Generation given favorable spark spreads and end market demand dynamics and a 1.0x EV/FCF multiple to Coal Generation which we believe appropriately captures the limited long-term value of the assets.

Positive and negative risks: 1) changes to regulatory, political, or legislative standards, 2) wholesale power, natural gas, & capacity prices, 3) competitive & regulatory change to retail businesses, principally in Texas, 4) operational performance, 5) development of new renewables and storage assets, 6) natural disasters, 7) interest rates, 8) nuclear fuel access/cost, and 10) retail market attrition.

WEC Energy Group Inc (WEC;A-1-7;$95.25)
Our $103 PO is based on 2025E SoTP, with a large cap electric group multiple of 16.2x and gas regulated multiple of 15.8x. Electric and gas peer P/E multiples are grossed up for a year to reflect capital appreciation across the sector. We apply a 3.0x premium to WEC's WI electric & gas subs for surety in earnings growth for the next two years following the Commission's recent settlement. We ascribe a 4x premium vs. the group at ATC to account for steady earnings growth as well as above avg Federal ROE's. We give Power the Future (PTF) a 3.0x P/E premium as the ROE is set indefinitely on historical and new investments. We ascribe an in line multiple for the parent accounting for the interest expense which finances overall utility operations. We value Energy Infrastructure on a net present value basis using a WACC of 5.6%, in line with other renewable assets. We net out 50% of HoldCo debt from equity valuation and adjust to add back the parent drag on interest exp. Risks to our PO are positive or negative changes in: 1) earned regulatory returns, 2) capital expenditures, 3) regulatory/political/legislative changes, 4) interest rates, 5) natural disasters, and 6) execution on unregulated projects.

[R1] Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. *VOLATILITY RISK RATINGS*, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. *INVESTMENT RATINGS* reflect the analyst's assessment of both a stock's: absolute total return potential as well as its attractiveness for investment relative to other stocks within its *Coverage Cluster* (defined below). There are three investment ratings: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster[R2]
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

[R2]Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Price Charts for the securities referenced in this research report are available on the Price Charts website, or call 1-800-MERRILL to have them mailed.
BofAS or one of its affiliates acts as a market maker for the equity securities recommended in the report: Ameresco, Avangrid, Avista Corp, CMS Energy, Edison Intl, Eversource Energy, Exelon Corp, FirstEnergy, NiSource Inc, NorthWestern Corp, Vistra Energy, WEC Energy Group Inc.
BofAS or an affiliate was a manager of a public offering of securities of this issuer within the last 12 months: Edison Intl, Eversource Energy, NiSource Inc.
The issuer is or was, within the last 12 months, an investment banking client of BofAS and/or one or more of its affiliates: Avangrid, Avista, CMS Energy, Edison Intl, Eversource Energy, Exelon Corp., FirstEnergy Corp, NiSource Inc, Northwestern Corpora, Vistra Energy, WEC Energy Group Inc.
BofAS or an affiliate has received compensation from the issuer for non-investment banking services or products within the past 12 months: Ameresco, Avangrid, Avista, CMS Energy, Edison Intl, Eversource Energy, Exelon Corp., FirstEnergy Corp, NiSource Inc, Northwestern Corpora, Vistra Energy, WEC Energy Group Inc.
The issuer is or was, within the last 12 months, a non-securities business client of BofAS and/or one or more of its affiliates: Ameresco, Avangrid, Avista, CMS Energy, Edison Intl, Eversource Energy, Exelon Corp., FirstEnergy Corp, NiSource Inc, Northwestern Corpora, Vistra Energy, WEC Energy Group Inc.
BofAS or an affiliate has received compensation for investment banking services from this issuer within the past 12 months: Avangrid, Avista, CMS Energy, Edison Intl, Eversource Energy, Exelon Corp., FirstEnergy Corp, NiSource Inc, Northwestern Corpora, Vistra Energy, WEC Energy Group Inc.
BofAS or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer or an affiliate of the issuer within the next three months: Avangrid, Avista, CMS Energy, Edison Intl, Eversource Energy, Exelon Corp., FirstEnergy Corp, NiSource Inc, Northwestern Corpora, Vistra Energy.
BofAS together with its affiliates beneficially owns one percent or more of the common stock of this issuer. If this report was issued on or after the 9th day of the month, it reflects the ownership position on the last day of the previous month. Reports issued before the 9th day of a month reflect the ownership position at the end of the second month preceding the date of the report: CMS Energy, NiSource Inc, Vistra Energy, WEC Energy Group Inc.
BofAS or one of its affiliates is willing to sell to, or buy from, clients the common equity of the issuer on a principal basis: Ameresco, Avangrid, Avista Corp, CMS Energy, Edison Intl, Eversource Energy, Exelon Corp, FirstEnergy, NiSource Inc, NorthWestern Corp, Vistra Energy, WEC Energy Group Inc.
The issuer is or was, within the last 12 months, a securities business client (non-investment banking) of BofAS and/or one or more of its affiliates: Ameresco, Avangrid, Avista, CMS Energy, Edison Intl, Eversource Energy, Exelon Corp., NiSource Inc, Northwestern Corpora, Vistra Energy, WEC Energy Group Inc.
BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

Other Important Disclosures

BofAS together with its affiliates beneficially owns a net short position of 0.5% or more of the total issued share capital of this issuer. Ownership positions speak as of a date no more than three trading days prior to the date of this report: CMS Energy.
From time to time research analysts conduct site visits of covered issuers. BofA Global Research policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits.
Prices are indicative and for information purposes only. Except as otherwise stated in the report, for any recommendation in relation to an equity security, the price referenced is the publicly traded price of the security as of close of business on the day prior to the date of the report or, if the report is published during intraday trading, the price referenced is indicative of the traded price as of the date and time of the report and in relation to a debt security (including equity preferred and CDS), prices are indicative as of the date and time of the report and are from various sources including BofA Securities trading desks.
The date and time of completion of the production of any recommendation in this report shall be the date and time of dissemination of this report as recorded in the report timestamp.

Recipients who are not institutional investors or market professionals should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.
Officers of BofAS or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments.
Refer to BofA Global Research policies relating to conflicts of interest.
"BofA Securities" includes BofA Securities, Inc. ("BofAS") and its affiliates. Investors should contact their BofA Securities representative or Merrill Global Wealth Management financial advisor if they have questions concerning this report or concerning the appropriateness of any investment idea described herein for such investor. "BofA Securities" is a global brand for BofA Global Research.

Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities.

This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.

BofA SECURITIES

US Utilities & IPPs

Jan/Feb Weather: Mild winter reduces gas supply risks, but EPS the tradeoff.

Industry Overview
Equity | 10 March 2023

Key takeaways

- Warmest Jan/Feb in years likely to weigh on 1Q23 earnings as 25 of 47 electric, 24 of 43 gas utes see >5% decrease in HDDs
- Mild weather exacerbates '23 EPS headwinds as fav '22 weather reverses. An issue for utes w/ little latitude in FY23 guidance
- Jan (-12% HDDs) likely embedded in 4Q updates but Feb (-8%) also weak. Gas LDCs relying on winter gas sales challenged for 23

FULL REPORT

Warmer winter exacerbates 2023 earnings risks

We update our weather analysis for January and February Heating Degree Days (HDDs) by region and utility to assess how electric and gas load has trended year-to-date. Utilities generally benefitted from weather in 2022. We previously highlighted increased risk that earnings growth stagnates if weather normalizes in 2023 as '22 weather benefit would reverse out of 2023 EPS (see 4Q weather analysis here: US Utilities & IPPs: 4Q Weather Report: Cold snap implies yet another quarter of weather benefit 10 January 2023). **This risk is materializing**. The EIA cites that January and February may be close to the warmest on record for the period going back to 1895, and NOAA HDD data supports a much milder start to

2023. Average HDDs across US states decreased by **14%** in the first two months of 2023 vs 2022, **-9%** vs trailing 10-year average and by **10%** vs trailing 20-year average. This implies EPS drag across many utilities relative to 4Q21 *and* utility guidance targets as weather-related load reverses YoY. As a result, utilities may need to further cut costs in an inflationary backdrop to mitigate earnings impacts from declining load and support 2023 earnings guidance. Accelerating O&M and financing costs already create a difficult backdrop for 2023 earnings growth, and less favorable weather versus average may further weigh on growth versus guidance expectations. While utilities likely embedded weak January weather in guidance updates during 4Q earnings, average February HDDs across the US was **-8%** vs 10-year average, signaling further downward earnings pressure relative to expectations. Southeast (**Duke Energy [DUK], Emera [EMA] and Southern [SO]**) and Midwest (**First Energy [FE], NiSource [NI], DTE Energy [DTE] / CMS Energy [CMS]**) electric utilities saw the most significant decrease in HDDs YTD. By contrast, California and Arizona saw **>25%** increase in HDDs versus 2022 and 10-year average. AZ utilities **Pinnacle West (PNW)** and **Fortis (FTS)** are poised to benefit, although CA utilities are decoupled and therefore do not benefit from higher weather-related load. All said, we estimate **33** of **47** electric utilities saw HDDs **decrease** in Jan/Feb relative to 'normal', implying challenged '23 earnings set-up vs guidance & Consensus.

Gas LDCs as mild weather implies a tough 2023 set-up

Milder Jan/Feb weather comes as welcome reprieve for majority decoupled Northeast and California gas utilities given gas supply constraints and elevated natural gas prices that augmented affordability and reliability risks into 2023. While **Eversource (ES)** and **Avangrid (AGR)** did not benefit from 2022 weather-related gas demand growth, mild Jan/Feb weather mitigated winter '23 gas supply concerns across their Northeast jurisdictions and, unlike peers, these utilities will not see earnings drag from lower gas demand due to revenue decoupling. However, we see an increasingly cautious outlook for dedicated gas LDCs (i.e. companies without electric operations): **Spire (SR), Atmos (ATO) and UGI Corp (UGI).** *See unique risks to UGI between weaker European weather trends & US on unregulated propane volume*. Additionally, it is more difficult for dedicated gas LDCs to 'cut' O&M to offset weaker weather given less 'flexible' costs. For example, electric IOUs can flex tree trimming, while gas LDC O&M costs are more fixed. *Overall, milder weather YTD foreshadows a difficult EPS outlook for gas LDCs without decoupling.*

North American Utilities & IPPs

Power Points: VST-ENGH Feedback, ED Clean Energy Hub, NI Indiana, DUK Refresh

Price Objective Change

VST: FERC filing for ENGH transaction. Investor Feedback

Energy Harbor (ENGH - Not Covered) and Vistra Corp (VST) filed a Section 203 request at the Federal Energy Regulatory Commission (FERC) for the previously disclosed merger between the companies (EC23-74). Energy Harbor will be part of the new Vistra Vision subsidiary with a 15% minority ownership by financial investments. The cross-ownership of Nuveen Asset Management and Vistra Vision and Talen Energy Supply (TLN - Private) was disclosed where Nuveen is expected to own 11-16% voting right in Talen. Parties requested approval by July 17, 2023. The filing confirms that the Pleasants coal plant will not be affiliated with Vistra.

We reiterate Buy on shares of Vistra which have given back the relative outperformance vs the S&P 500 since the Energy Harbor acquisition, despite an improvement in wholesale power since early March. Despite the attractive valuation profile, we still hear hesitation from our investor conversations as capital allocation questions linger. Specifically, we believe that additional M&A is a still-viable scenario and believe management would consider various options (including equity) for funding. Potential areas could include further nuclear, retail, and/or renewable deals closely. The increasingly likely probability of the Texas Performance Credit Mechanism (PCM) would be a positive as the backup generation 'Berkshire Hathaway' plan appears to have faced growing opposition.

ED: Clean Energy Hub approved by NY state

The New York State Public Service Commission (PSC) approved Consolidated Edison Company of New York, Inc.'s (CECONY) petition for construction of a transmission substation in northwest Brooklyn. ED projects ~$810Mn capex for the project which has been reframed of late to focus on its need for addressing local electric reliability needs in Brooklyn and Queens. The PSC press release also refers to the hub's ability to support up to 1,500 megawatts (MW) of new clean-energy resources including offshore wind. We do not view the Clean Energy Hub approval as additive to ED's capital plans as the company has already included it in their latest multi-year projections. *Maintain Neutral on ED given valuation and limited upside as capital plans, share buyback, and other drivers are well known and largely priced in at this point.*

NI: FERC filing for NIPSCO reorganization

NiSource (NI) subsidiary Northern Indiana Public Service Company, LLC. filed a Section 203 request at FERC to approve an internal reorganization (EC-23-75). NI states that there will be no change in the ultimate ownership of NIPSCO because of the proposed internal reorganization. The stated rationale is "to improve the flexibility of the intercompany corporate ownership structure." The proposal would create a NIPSCO Holdings I LLC and NIPSCO Holdings II LLC as intermediate entities between NiSource Inc. and Northern Indiana Public Service Company, LLC. *NiSource management publicly disclosed plans to divest a minority stake in NIPSCO at its Analyst Day and this enhanced structure flexibility could be a component. We look for further updates and insight with upcoming earnings. We reiterate Buy with an attractive valuation and lower risk outlook.*

DUK: Fine tuning our EPS estimate for Q1

We modify our Duke Energy (DUK) Q1 EPS walk as detailed below. The main change for Q1 is reducing the amount of storm cost normalization from 2022 – this had previously been a +13c driver and is now +7c, in line with the level of drag seen last year. As a result, our Q1 EPS estimate moves down to $1.26 from $1.30 previously as we expect some other incremental shifts that will provide a partial offset. For the full year we still see DUK delivering EPS of $5.58, at the lower end of the $5.55-5.75 range provided by mgmt. as Q1 weather is set to start the company off (and many other utilities) on a relatively challenged footing.

Exhibit 1: Duke Energy Adjusted EPS Walk
Tweaking our Q1 estimate lower to $1.26, Street $1.30

DUK 2023 EPS Walk	EPS	Q1	Q2	Q3	Q4

Price objective basis & risk

Consolidated Edison (ED)
Our $96 PO is based on a sum-of-the-parts analysis applying premiums and discounts to the regulated group multiples 16.4x/16.7x for electric/gas respectively with an in-line multiple for Electric, Steam, & Gas to reflect a combination of historically challenging regulation but above-peer growth and de-risked profile. Both electric and gas peer 2025 P/E multiples are grossed up by 5% to reflect capital appreciation across the sector. For noncore segments we apply a -2x discount to Con Edison Electric Transmission (CET) and a -6x discount to the Wholesale Energy business given elevated risk profiles. For the Mountain Valley Pipeline stake we apply a 5x EBITDA multiple to our 2024 EPS estimate reflecting elevated risk.
Upside/Downside risks to achievement of the Price Objective and Rating are 1) earned regulatory returns, 2) capital expenditures, 3) regulatory/political/legislative changes, 4) interest rates, 5) natural disasters, 6) execution on unregulated projects, 7) Covid, 8) ability to complete the Mountain Valley Pipeline, and 9) raw materials costs and supply-chain delivery timelines.

Duke Energy (DUK)
Our $112 PO is derived from a sum-of-the-parts valuation. We value the Electric and Gas utilities using peer 2025E P/E multiples. We apply a 3x multiple premium to Duke's operations in FL and 2x in IN to reflect more favorable regulatory environments (and potential generation opps in IN). We apply a 2x multiple to the Carolinas given upside to spending in improving regulatory construct combined with latest IRP & wider legislative reforms into 2023.

We value the other regulated electric utilities at 16.5x and the gas utilities at peer group multiples of 16.3x 2025E P/E, respectively. Both electric and gas peer P/E multiples are grossed up by 5% for the groups CAGR to reflect capital appreciation across the sector. The commercial midstream, and transmission are valued on a 2025E EV/EBITDA basis. We use 8.0x multiples for midstream and 9.0x for transmission segments. We subtract out the impact of commercial debt, and add back for the renewable debt. Upside risks: constructive rate case results, higher capital expenditure additions vs our assumptions, lower interest rates. Downside risks: poor rate case results, operating errors, and negative changes in the regulatory environment, Macro risks: Increases in interest rates and decreases in equity market valuations.

NiSource Inc (NI)
Our $32 PO is based on a sum of the parts valuation. We value each gas and electric utility separately using 2025 forward P/E multiples that are marked-to-market to the latest peer utility multiples of 16.4x for gas and 16.4x for electric. Consistent across our coverage universe, the base electric & gas peer P/E multiples are grossed up by +5% to reflect capital appreciation across the sector. We utilize a +1x premium for NIPSCO Gas/Electric due to generally constructive regulatory outcomes. We subtract the value of excess holding company debt at the parent not supporting the utility subsidiaries.

Positive and negative risks to our Price Objective are changes in 1) regulatory, political, and legislative outcomes, 2) ability to execute on capital expenditure plan, 3) inflation, operating expense, and interest rates as they influence earned rates of return, 4)

customer count and load growth, 5) commodities, 6) natural disasters, 7) pension plan returns, 8) equity and asset sale needs.

Vistra Energy (VST)
Our $29 price objective is based on a 2025E SOTP valuation. We assign a discount/premium to the peer group EV/FCF multiple of 7.0x: We include the full $300mn of margin-enhancing initiatives as well as $200mn optimization benefits and the $290mn of synergies related to the DYN acquisition. We capitalize our estimated income tax for the combined entity to reflect the higher tax burden than peers, and we include a $50mn NPV of TRA payments. We reflect Vistra Zero accretion at 12x EV/EBITDA, with '26 FCF discounted at 12% back to '23. We also reflect $500mn of ERCOT securitization proceeds (implied in net debt balance). We include impact from future bill credits from Uri storm & NPV of ERCOT uplifts. For the pending announced Energy Harbor deal, we apply a peer multiple of 7.0x EV/FCF, consistent with our target multiple for legacy VST nuclear and retail. We also layer in Energy Harbor Synergies at a 2.0x discount to the peer multiple (consistent with our approach for DYN) and an in-line multiple for margin offsets (consistent with our prior approach for offsets).

Positive and negative risks: 1) changes to regulatory, political, or legislative standards, 2) wholesale power, natural gas, & capacity prices, 3) competitive & regulatory change to retail businesses, principally in Texas, 4) operational performance, 5) development of new renewables and storage assets, 6) natural disasters, 7) interest rates, 8) nuclear fuel access/cost, and 10) retail market attrition.

[R1] Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. *VOLATILITY RISK RATINGS*, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. *INVESTMENT RATINGS* reflect the analyst's assessment of both a stock's: absolute total return potential as well as its attractiveness for investment relative to other stocks within its *Coverage Cluster* (defined below). There are three investment ratings: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster[R2]
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

[R2] Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Price Charts for the securities referenced in this research report are available on the Price Charts website, or call 1-800-MERRILL to have them mailed.
BofAS or one of its affiliates acts as a market maker for the equity securities recommended in the report: Consolidated Edison, Duke Energy, NiSource Inc, Vistra Energy.
BofAS or an affiliate was a manager of a public offering of securities of this issuer within the last 12 months: Duke Energy, NiSource Inc.
The issuer is or was, within the last 12 months, an investment banking client of BofAS and/or one or more of its affiliates: Consolidated Edison, Duke Energy, NiSource Inc, Vistra Energy.
BofAS or an affiliate has received compensation from the issuer for non-investment banking services or products within the past 12 months: Consolidated Edison, Duke Energy, NiSource Inc, Vistra Energy.
The issuer is or was, within the last 12 months, a non-securities business client of BofAS and/or one or more of its affiliates: Consolidated Edison, Duke Energy, NiSource Inc, Vistra Energy.
BofAS or an affiliate has received compensation for investment banking services from this issuer within the past 12 months: Consolidated Edison, Duke Energy, NiSource Inc, Vistra Energy.
BofAS or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer or an affiliate of the issuer within the next three months: Consolidated Edison, Duke Energy, NiSource Inc, Vistra Energy.
BofAS together with its affiliates beneficially owns one percent or more of the common stock of this issuer. If this report was issued on or after the 9th day of the month, it reflects the ownership position on the last day of the previous month. Reports issued before the 9th day of a month reflect the ownership position at the end of the second month preceding the date of the report: Duke Energy, NiSource Inc, Vistra Energy.
BofAS or one of its affiliates is willing to sell to, or buy from, clients the common equity of the issuer on a principal basis: Consolidated Edison, Duke Energy, NiSource Inc, Vistra Energy.
The issuer is or was, within the last 12 months, a securities business client (non-investment banking) of BofAS and/or one or more of its affiliates: Consolidated Edison, Duke Energy, NiSource Inc, Vistra Energy.
BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

Other Important Disclosures

BofAS together with its affiliates beneficially owns a net short position of 0.5% or more of the total issued share capital of this issuer. Ownership positions speak as of a date no more than three trading days prior to the date of this report: Consolidated Edison.
From time to time research analysts conduct site visits of covered issuers. BofA Global Research policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits.
Prices are indicative and for information purposes only. Except as otherwise stated in the report, for any recommendation in relation to an equity security, the price referenced is the publicly traded price of the security as of close of business on the day prior to the date of the report or, if the report is published during intraday trading, the price referenced is indicative of the traded price as of the date and time of the report and in relation to a debt security (including equity preferred and CDS), prices are indicative as of the date and time of the report and are from various sources including BofA Securities trading desks.
The date and time of completion of the production of any recommendation in this report shall be the date and time of dissemination of this report as recorded in the report timestamp.

Recipients who are not institutional investors or market professionals should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.
Officers of BofAS or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments.
Refer to BofA Global Research policies relating to conflicts of interest.
"BofA Securities" includes BofA Securities, Inc. ("BofAS") and its affiliates. Investors should contact their BofA Securities representative or Merrill Global Wealth Management financial advisor if they have questions concerning this report or concerning the appropriateness of any investment idea described herein for such investor. "BofA Securities" is a global brand for BofA Global Research.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.

US Utilities & IPPs

PowerPoints: NIPSCO sale, SO Vogtle, AES, PNM/AGR merger, VST nuclear

Industry Overview

NI: stake sale better than expected; key derisking: Buy

NiSource (NI) announced the sale of a 19.9% stake in its subsidiary, Northern Indiana Public Service Co (NIPSCO), to Blackstone. Under the deal terms, Blackstone would acquire a 19.9% noncontrolling stake in NIPSCO for $2.15B in cash and an additional $250m of equity commitments (at the NIPSCO level) to fund ongoing capex over 3 years. We view the print as very positive. Future ATM needs are unchanged (we watch nuances here for ~$0.25Bn/year in 2025+) for now despite future opco investment, keeping its 19.9% stake intact over time. The deal would imply an equity value of $10.8B and an EV of $14.3B at 100%, per the deal announcement. Disclosed multiples are 32.5x trailing EPS and solid 1.85x EV / 2022 year-end rate base of $7.7B. The transaction would take out equity needs in 2023, which we previously estimated at $2B, so deal valuation is slightly better than anticipated. Management reiterated that it expects to keep financial targets unchanged, including growth in NOEPS of 6-8% and cash flow metrics of 14-16% FFO to net debt. Additional equity is not expected until 2025, when management expects to utilize its ATM. Management reaffirmed 2023 EPS guidance of $1.54-1.60. The deal is subject to normal closing conditions, including FERC approval, which management stated is expected by year-end. We maintain our Buy rating; this removes the clearest impediment to shares, affirms balance sheet, in our view.

SO: Vogtle Unit 3 in-service delayed until July

After market close on Friday, June 16, Southern Co (SO) issued an 8-k that disclosed that in-servicing of Unit 3 of Vogtle has been delayed until July from its previous target of June. The delay is attributed to degradation of the hydrogen seals on the generation during final stages at the 100% level. SO is in the process of replacing the seals and expects to return to 100% testing once the replacements are in place. The target timing for returning to 100% level of testing is the end of the month, with two tests remaining to be done after replacement of the seals. Output at Unit 3 dropped to 0% on June 7 and recovered to 32% for several days and was reported as zero from June 12 through 18. SO's 8-k did not specify a date in July when in-servicing is expected to take place and did not include incremental updates on Unit 4. The update is a clear negative, in our view, though ultimately a minor delay, as SO had previously been targeting in servicing the unit by the end of June. We expect weakness in shares as investors digest the news and evaluate the likelihood for additional delays after SO had been one of the better-performing large cap utility stocks thus far year to date. We maintain our Underperform rating given valuation.

AES: New Board member a positive twist

AES announced that Gerard Anderson was elected to the company's Board of Directors, effective July 17. Investors may remember Mr. Anderson from his time as Executive Chairman and CEO of DTE Energy (DTE) and as chairman of EEI. We view the appointment of Mr. Anderson to the Board as a positive considering his extensive experience in the utility space, especially as AES seeks to rapidly grow its own utility businesses over the next several years. We maintain our Buy rating on AES given attractive risk/reward, though note that cautious data points have begun to emerge as head of the renewables business recently resigned and AES acquired 2GW of backlog from a competitor.

Please see details on PNM/AGR merger, PNW staff, VST Comanche.

NI: Deal suggests just under 24x on 2025 EPS

The disclosed equity in the NIPSCO sale implies just under 24x on our forecast 2025 earnings – see table below. We note that the management team gave 32.5x on a trailing 12-month basis as the deal multiple, which is based on $333m of adjusted net income for the period ending March 31. We previously had a placeholder assumption of $2B in deal proceeds, which would be a 22x 2025 EPS multiple, or 7% below the deal that was announced. We see this as positive for NI directly but also supporting utility valuations for opco level sales overall as a trend. We expect that this could very well still prove a "high water mark" across the year on contemplated sales. On balance, we could see a modest positive to others seeking to sell.

Exhibit 1: Implied EPS multiple
Our $2B assumed about 7% lower 2025 multiple

Earnings (NIPSCO)	258	296	435	457	521	534
Implied P/E multiple	41.9	36.4	24.8	23.6	20.7	20.2

Source: BofA Global Research estimates, company report

BofA GLOBAL RESEARCH

Management indicated that it expects to "turn on" the ATM issuance at a clip of approximately $250m per annum beginning around 2025 – we note that this is equity at the corporate level, and the additional $250mm equity commitment from Blackstone as part of the deal and additional contributions thereafter required to maintain its 19.9% stake would be incremental.

PNM/AGR: Merger agreement extended to December 31

PNM Resources (PNM) and Avangrid (AGR) mutually agreed to an amendment and extension of their merger agreement through December 31, 2023. Under the amended agreement, AGR and PNM may mutually agree to extend the "end date" to March 31, 2024. The merger agreement was previously extended through July 20, 2023 on April 12. However, the New Mexico Supreme Court (NMSC) recently denied AGR's, PNM's, and New Mexico Public Regulatory Commission's (NMPRC) request to remand the merger appeal case to the NMPRC and scheduled oral hearings for a merger appeal case on September 12, 2023. This implied need for further extension of the merger agreement, as the previous agreement stipulated that the merger may be terminated if closing of the merger does not occur by July 20.

The merger extension update is a slight disappointment given that the amended agreement does not include a "go-shop" period or higher AGR bid for PNM shares versus $50.30/share currently, per our latest PNM deep-dive report: PNM Resources Inc.: Refreshing our view on PNM standalone: Attractive story warrants higher premium 12 June 2023. However, the extension is not a surprise. We monitor key stakeholder positioning at NMSC oral hearings in September. We expect PNM/AGR merger uncertainty to remain until year-end 2023 given the prolonged merger timeline. The merger agreement extension suggests company expectations for potential year-end 2023 or 1Q24 merger resolution. We maintain our Buy rating on shares of PNM given our view that share upside potential remains across all scenarios, including that the existing AGR/PNM merger materializes as is – i.e., without a higher AGR bid or potential third-party bid for PNM shares.

VST: Comanche Peak Unit 1 briefly shut down

A feed water pump issue (non-nuclear related) caused Unit 1 of Vistra's (VST) Comanche Peak nuclear generation facility to automatically shut down over the weekend. According to ERCOT (Electric Reliability Council of Texas) public data, the 1,205 MW (megawatt) unit was reported offline beginning Friday, June 16, at 6:32 p.m. and returned to service Sunday, June 18, at 10:00 a.m. This exposes VST to some potential commercial impacts given elevated prices during the heat wave. The impact is likely modest but emphasizes focus on the need to keep reinvestment in plants to ensure availability. As of this writing, NRC (Nuclear Regulatory Commission) data shows the unit as operating at 78% capacity. We are encouraged by the rapid response by VST to return the unit to operations in a timely manner. With the pending acquisition of Energy Harbor, VST's nuclear fleet is ever more relevant to earnings and valuation. We maintain our Buy rating on VST given attractive risk-adjusted free cash flow yield and growing "green" generation portfolio.

BofA GLOBAL RESEARCH

Price objective basis & risk

AES (AES)

Our price objective is $24 and is based on a sum of the parts analysis applying a blended valuation approach which is the summation of: 1) EV/EBITDA approach for US Renewable Generation using an 10.0x 2025E base for US peer 2.) NPV approach for DevCo using a 15% discount on 5.5GW+ of annual renewables beyond '23 given market dynamics, 3.) EV/EBITDA approach for Legacy Southland (US), 4.) NPV for Warrior Run (US) 5.) P/E approach for US Utilities using a 16.3x 2025E base for US peers plus a premium/discount, 6.) EV/EBITDA approach for LATAM non-public subsidiaries using a 7.0x 2025E base for peers plus a premium/discount, 7.) Mark-to-market value of publicly listed LATAM subsidiaries, 8.) Asia Generation is marked to carrying value while the Asian LNG import facility is valued on EPS accretion relative to total build cost, and 9.) EV/EBITDA 2025E multiple for Europe generation (except Jordan, which we mark to sales price). We also credit the company with its investment in Uplight and Fluence.

Risks are: 1) regulatory, legislative, and political changes, 2) international currencies devaluing against the US dollar, 3) changes in value of Fluence (FLNC) subsidiary stock, 4) overall inability to execute on the renewables plan, 5) ability to control costs, 6) financing needs, and 7) tax policies.

NiSource Inc (NI)

Our $32 PO is based on a sum of the parts valuation. We value each gas and electric utility separately using 2025 forward P/E multiples that are marked-to-market to the latest peer utility multiples of 16.4x for gas and 16.4x for electric. Consistent across our

coverage universe, the base electric & gas peer P/E multiples are grossed up by +5% to reflect capital appreciation across the sector. We utilize a +1x premium for NIPSCO Gas/Electric due to generally constructive regulatory outcomes. We subtract the value of excess holding company debt at the parent not supporting the utility subsidiaries.

Positive and negative risks to our Price Objective are changes in 1) regulatory, political, and legislative outcomes, 2) ability to execute on capital expenditure plan, 3) inflation, operating expense, and interest rates as they influence earned rates of return, 4) customer count and load growth, 5) commodities, 6) natural disasters, 7) pension plan returns, 8) equity and asset sale needs.

PNM Resources Inc. (PNM)
We value PNM Resources at $51 based on a 2025E sum of the parts valuation methodology utilizing P/E multiples for each business segment. We apply the electric utility average 15.8x 2025E which we grossed up for +5% reflect capital appreciation across the sector. This is a consistent approach for the coverage universe. We apply a +1.0x P/E premium to shares to reflect the visibility into growth and potential upside to the outlook. The regulatory and legislative outlooks have improved in both New Mexico and improved

Risks to the achievement of our price objective and estimates are changes in: 1) regulatory, political, judicial, and legislative outcomes, 2) operating and financing costs, 3) interest rates and asset returns, 4) pending M&A activity, 6) natural disasters and weather, 8) commodity prices, 9) capital expenditures, 10) credit rating agency actions.

Southern Company (SO)
Our $67 PO is derived from a sum-of-the-parts analysis (SOTP). We use a P/E valuation approach on 2025 estimates and use peer multiples of 15.5x for electric and 16.0x for gas, respectively (with dis/prem applied per asset depending on growth/risk): we then gross up these multiples by +5% to account for sector wide EPS growth to derive a 12-month forward PO. We subtract 50% of the 2025 parent interest expense multiple by an electric P/E peer multiple to reflect parent leverage supporting the utilities. We net out total parent drag and add back the remaining parent interest expense with a 50% weighting.

Upside/downside risks to achievement of the PO are: 1) Vogtle construction timing and costs, 2) regulatory, political, and legislative changes, 3) ability to earn the allowed rate of return, 4) changes to the capital expenditure forecast, 5) nuclear incidents, weather, and natural disasters, 6) rate of customer and sales growth, 7) O&M trends, 8) interest rates, 9) environmental policies and regulations, 10) M&A, and 11) interest rates.

Vistra Energy (VST)
Our $30 price objective is based on a 2025E SOTP valuation. For Vistra Vision, we arrive at a 6.0x blended EV/EBITDA. We apply a 6.5x EV/FCF multiple to nuclear, which we believe fairly represents the risk/reward profile of the assets. For Renewables and Storage, we apply a 10x EV/FCF multiple given the accelerating nature of the end markets. For Retail, we apply a 6.5x EV/FCF multiple, consistent with peers. For Vistra Tradition, we arrive at a 3.9x blended EV/EBITDA multiple. We apply a 5.5x EV/FCF multiple to Gas Generation given favorable spark spreads and end market demand dynamics and a 1.0x EV/FCF multiple to Coal Generation which we believe appropriately captures the limited long-term value of the assets.

Downside risks to our PO are: 1) changes to regulatory, political, or legislative standards, 2) wholesale power, natural gas, & capacity prices, 3) competitive & regulatory change to retail businesses, principally in Texas, 4) operational performance, 5) development of new renewables and storage assets, 6) natural disasters, 7) interest rates, 8) nuclear fuel access/cost, and 10) retail market attrition.

Equity Investment Rating Distribution: Utilities Group (as of 31 Mar 2023)

Coverage Universe	Count	Percent	Inv. Banking Relationships [R1]	Count	Percent
Buy	78	50.65%	Buy	53	67.95%
Hold	40	25.97%	Hold	28	70.00%
Sell	36	23.38%	Sell	24	66.67%

Equity Investment Rating Distribution: Global Group (as of 31 Mar 2023)

Coverage Universe	Count	Percent	Inv. Banking Relationships [R1]	Count	Percent
Buy	1869	53.01%	Buy	1030	55.11%
Hold	827	23.45%	Hold	476	57.56%
Sell	830	23.54%	Sell	389	46.87%

[R1] Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster[R2]
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

[R2] Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Price Charts for the securities referenced in this research report are available on the Price Charts website, or call 1-800-MERRILL to have them mailed.
BofAS or one of its affiliates acts as a market maker for the equity securities recommended in the report: AES Corp, NiSource Inc, PNM Resources Inc., Southern Company, Vistra Energy.
BofAS or an affiliate was a manager of a public offering of securities of this issuer within the last 12 months: AES Corporation, NiSource Inc, Southern Company.
The issuer is or was, within the last 12 months, an investment banking client of BofAS and/or one or more of its affiliates: AES Corporation, NiSource Inc, PNM Resources, Southern Company, Vistra Energy.
BofAS or an affiliate has received compensation from the issuer for non-investment banking services or products within the past 12 months: AES Corporation, NiSource Inc, PNM Resources, Southern Company, Vistra Energy.
The issuer is or was, within the last 12 months, a non-securities business client of BofAS and/or one or more of its affiliates: AES Corporation, NiSource Inc, PNM Resources, Southern Company, Vistra Energy.
BofAS or an affiliate has received compensation for investment banking services from this issuer within the past 12 months: AES Corporation, NiSource Inc, PNM Resources, Southern Company,

Vistra Energy.
BofAS or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer or an affiliate of the issuer within the next three months: AES Corporation, NiSource Inc, PNM Resources, Southern Company, Vistra Energy.
BofAS together with its affiliates beneficially owns one percent or more of the common stock of this issuer. If this report was issued on or after the 9th day of the month, it reflects the ownership position on the last day of the previous month. Reports issued before the 9th day of a month reflect the ownership position at the end of the second month preceding the date of the report: NiSource Inc, Southern Company, Vistra Energy.
BofAS or one of its affiliates is willing to sell to, or buy from, clients the common equity of the issuer on a principal basis: AES Corp, NiSource Inc, PNM Resources Inc., Southern Company, Vistra Energy.
The issuer is or was, within the last 12 months, a securities business client (non-investment banking) of BofAS and/or one or more of its affiliates: AES Corporation, NiSource Inc, PNM Resources, Southern Company, Vistra Energy.
BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

Other Important Disclosures

BofAS together with its affiliates beneficially owns a net short position of 0.5% or more of the total issued share capital of this issuer. Ownership positions speak as of a date no more than three trading days prior to the date of this report: PNM Resources.
From time to time research analysts conduct site visits of covered issuers. BofA Global Research policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits.
Prices are indicative and for information purposes only. Except as otherwise stated in the report, for any recommendation in relation to an equity security, the price referenced is the publicly traded price of the security as of close of business on the day prior to the date of the report or, if the report is published during intraday trading, the price referenced is indicative of the traded price as of the date and time of the report and in relation to a debt security (including equity preferred and CDS), prices are indicative as of the date and time of the report and are from various sources including BofA Securities trading desks.
The date and time of completion of the production of any recommendation in this report shall be the date and time of dissemination of this report as recorded in the report timestamp.

General Investment Related Disclosures:

Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities.

This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.

BofA Securities is under no obligation to update this information and BofA Securities ability to publish information on the subject issuer(s) in the future is subject to applicable quiet periods. You should therefore assume that BofA Securities will not update any fact, circumstance or opinion contained herein.

Subject to the quiet period applicable under laws of the various jurisdictions in which we distribute research reports and other legal and BofA Securities policy-related restrictions on the publication of research reports, fundamental equity reports are produced on a regular basis as necessary to keep the investment recommendation current.

Certain outstanding reports or investment opinions relating to securities, financial instruments and/or issuers may no longer be current. Always refer to the most recent research report relating

to an issuer prior to making an investment decision.
In some cases, an issuer may be classified as Restricted or may be Under Review or Extended Review. In each case, investors should consider any investment opinion relating to such issuer (or its security and/or financial instruments) to be suspended or withdrawn and should not rely on the analyses and investment opinion(s) pertaining to such issuer (or its securities and/or financial instruments) nor should the analyses or opinion(s) be considered a solicitation of any kind. Sales persons and financial advisors affiliated with BofAS or any of its affiliates may not solicit purchases of securities or financial instruments that are Restricted or Under Review and may only solicit securities under Extended Review in accordance with firm policies.
Neither BofA Securities nor any officer or employee of BofA Securities accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this information.

US Utilities & IPPs

Who Owns What? Growing divide between hedge funds and long onlys as utilities lag

Industry Overview

Crowding dynamics remain the critical factor to watch

We provide our latest quarterly analysis of 13-F ownership data in our "Who owns what?" series in which we compile crowding data by examining a broad group of ~45 investment funds, including 21 hedge funds (HFs) and 25 "long-only" (LO) funds. Utilities underperformed the S&P 500 -11% in 1Q23 and have further slumped an incremental -10% in 2Q23. The relative weakness was a factor for us recently shifting to a more constructive orientation on the sector: US Electric Utilities & IPPs: We Think There's a Defensive Angle to be Had Here.... Utilities Looking Cheaper 07 June 2023. Overall hedge fund crowding decreased during the quarter in sharp contrast to long only investors increasing exposure and concentration overall. This creates a cleaner setup overall.

Crowded names are NI, PPL, DTE/CMS vs AGR, ED, & DUK

The most crowded hedge fund names are NiSource (NI), PPL Corp (PPL), and DTE Energy (DTE)/CMS Energy (CMS). Among long-onlys, the highest concentration is in CenterPoint (CNP), Entergy Corp (ETR), WEC Energy (WEC), and Ameren (AEE). The least popular regulated utilities for investors remain Avangrid (AGR), Consolidated Edison (ED), and Duke Energy (DUK). Among these, we see opportunity in Duke Energy. We acknowledge a challenged near-term setup ahead of potential Carolinas M&A, but that appears to be more than priced in after -4% recent relative underperformance.

Where do investor types differ? CNP, ETR, WEC, & AEP

The largest relative ownership deltas between long-onlys and hedge funds are for long-onlys' greater preference for CenterPoint, Entergy, WEC Energy, and American Electric Power (AEP). Among these, CenterPoint is the single best-owned name among long-onlys and has mixed hedge funds support. We believe that CNP can re-rate further with upside to capex and EPS estimates increasingly visible – reiterate Buy. See the full extent of recent Texas legislation as yet to be fully appreciated and disclosed.

What evolved the most QoQ? EVRG, LNT, & WEC

Among hedge funds, Evergy (EVRG) had the most significant QoQ decline in median ownership while Alliant Energy (LNT) had the largest increase. Dominion Energy (D) and CMS Energy also had notable declines in hedge fund ownership. CenterPoint had a notable increase in hedge fund median ownership as well but buying was more significant for long-onlys. WEC Energy had the most significant increase in long only ownership QoQ, while Duke Energy had the least relative long only buying during the period.

Wisdom of the crowds – we tend to agree here

In general, our ratings align with many names with more concentrated ownership including Buy-rated NiSource, PPL, CenterPoint, and CMS. We continue to highlight Duke as one of the better non-consensus long opportunities. See our latest thoughts here: Advancing toward a fully regulated vision following commercial renewables sale 6/13/23.

46 large investors analyzed

We examine 13-F ownership disclosures for a broad group of 46 representative investment funds. This includes 21 hedge funds (up from 17 previously) and 25 funds with typically longer-term investment horizons ("long only" – up from 23 previously). We believe that this sample captures a diverse group of investor styles and approaches to investing.

Below, we show various statistics to assess relative ownership. Due to differing firm sizes, we analyze the data in different ways. This approach is consistent with our prior analyses for comparability. *The concentration approach could be the most meaningful, as it shows the breadth of ownership. This is likely is a better representation of positioning crowding, as it should correlate better with relative performance around events and grossing events. Additionally, it shows whether the investment opportunity has resonated with a wider number of investors, whereas even median ownership can be skewed by larger investor positions.*

- **Median – All:** The median percentage ownership of total utility stock shares outstanding, for *all* funds in the group, including those with no ownership.
- **Median – Owned:** The median percentage ownership of total stock shares outstanding, for only those funds in the group which own shares.
- **Concentration:** The number of funds that own shares in each respective stock.

We caution against overreliance on any one source of crowding when assessing a position, but this information can help, particularly around sizing when constructing a portfolio. PCG remains owned by many HFs but remains a small position for many.

BofA GLOBAL RESEARCH

Among the regulated premiums Consolidated Edison (ED) is the least owned by long-only investors as well as having the one of the lowest concentrations. ED is also generally under-owned by hedge funds across the spectrum. Avangrid continues to be the single least owned utility across all investor types and metrics. *We maintain Neutral on shares of ED which has an approximately balanced risk/reward. We maintain Underperform on shares of AGR which trades at a premium to our view of the fundamentals.*

Price objective basis & risk

Avangrid (AGR)

Our $35 PO is based on a sum of the parts analysis. The core utilities are valued on by applying discounts to the base sector P/E of 15.7x/15.8x for electric/gas due to below average growth and regulatory jurisdictions. Both electric and gas peer P/Es are grossed up +5% to reflect capital appreciation across the sector. The renewables are valued at approximately 10x EV/EBITDA, consistent with peers while offshore wind is valued using discounted cash flows at a 12% discount rate. Future potential value creation from the renewable development 'DevCo' is provided as well. Lastly parent/HoldCo financing negatives are ascribed.

Up/downside risks to achievement of the PO and estimates are 1) earned ROEs at the utilities, 2) utility capital expenditure forecasts, 3) regulatory/political/legislative outcomes, particularly regarding the pending acquisition of PNM Resources, 4) equity needs, 5) offshore wind construction, 6) Iberdrola owns over 80% of AGR common stock, limiting float and presenting a potential for governance conflicts, despite the BoD being majority unaffiliated with Iberdrola. 7) natural disasters, 8) commodity and interest rate fluctuations, and 9) management changes.

CenterPoint Energy (CNP)

Our CenterPoint Energy PO is $35 using a 2025E sum-of-the-parts methodology. We apply the 16.7x electric and 17.3x gas base multiples. The base multiples are grossed-up +5% to reflect sector capital appreciation, a consistent approach across the coverage universe. We apply a 15% (2.6x) premium due to above-average growth and constructive jurisdictions.

Risks to achievement of the Price Objective are changes in 1) legislative, regulatory, and political outcomes, 2) capital expenditure forecasts and deployments, 3) earned return on equity, 4) asset sales, 5) capital markets access, costs, and needs, 6) interest rates, 7) weather and natural disasters, 8) management changes, and 9) inflation.

CMS Energy (CMS)

Our PO of $67 is based on a SotP relying on 2025E forward P/E multiples for the utility business and a 2025E forward EV/EBITDA multiple for CMS' IPP assets. For the utility seg we apply a 2.0x prem to the average 2025E regulated multiple P/E of 16.6x for the electric segment and of 16.7x for the gas segment, with the 10-yr capex update providing clear sight on ratebase growth and further upside, as well as continued favorable regulatory environment, and finally historically proven ability to consistently perform at the high end of guidance range.

Both electric and gas peer P/E multiples are grossed up +5% to reflect capital appreciation across the sector.

For CMS' merchant business we apply a 4x EV/EBITDA multiple, in line with current

market value of CMS' power plants. We value Dearborn Industrial Generation (DIG) on a DCF basis through 2030 given the plant is no longer expected to be sold to Consumers.

Downside risks are: 1) earned ROEs declining which reduce CMS utility earnings 2) execution risk on capex and cost cutting which would primarily affect the utility earnings, 3) negatives changes to market energy prices which could affect the DIG plant's ability to re-contract at the assumed prices.

Consolidated Edison (ED)
Our $92 PO is based on a sum-of-the-parts analysis applying premiums and discounts to the regulated group multiples 15.6x/15.0x for electric/gas respectively with an in-line multiple for Electric, Steam, & Gas to reflect a combination of historically challenging regulation but above-peer growth and de-risked profile. Both electric and gas peer 2025 P/E multiples are grossed up by 5% to reflect capital appreciation across the sector.

For noncore segments we apply an in line valuation to Con Edison Electric Transmission (CET) given potential for earnings growth and attractive regulatory characteristics. For the Mountain Valley Pipeline stake we apply a 10x EBITDA multiple to our 2024 EPS estimate reflecting recent positive legal and legislative developments.

Upside/Downside risks to achievement of the Price Objective and Rating are 1) earned regulatory returns, 2) capital expenditures, 3) regulatory/political/legislative changes, 4) interest rates, 5) natural disasters, 6) execution on unregulated projects. Downside risk lack of approval or modification of the JP by the New York state commission.

Duke Energy (DUK)
Our $104 PO is derived from a sum-of-the-parts valuation. We value the Electric and Gas utilities using peer 2025E P/E multiples. We apply a 2x multiple premium to Duke's operations in FL and 2x in IN to reflect more favorable regulatory environments (and potential generation opps in IN). We apply a 1x multiple to the Carolinas given upside to spending in improving regulatory construct combined with latest IRP & wider legislative reforms into 2023.

We value the other regulated electric utilities at 15.5x and the gas utilities at peer group multiples of 16.0x 2025E P/E, respectively. Both electric and gas peer P/E multiples are grossed up by 5% for the groups CAGR to reflect capital appreciation across the sector. The commercial midstream, and transmission are valued on a 2025E EV/EBITDA basis. We use 8.0x multiples for midstream and 9.0x for transmission segments. We subtract out the impact of commercial debt, and add back for the renewable debt.

Upside risks: constructive rate case results, higher capital expenditure additions vs our assumptions, lower interest rates.

Downside risks: poor rate case results, operating errors, and negative changes in the regulatory environment, Macro risks: Increases in interest rates and decreases in equity market valuations.

NiSource Inc (NI)
Our $31 PO is based on a sum of the parts valuation. We value each gas and electric utility separately using 2025 forward P/E multiples that are marked-to-market to the latest peer utility multiples of 15.7x for gas and 15.5x for electric. Consistent across our coverage universe, the base electric & gas peer P/E multiples are grossed up by +5% to reflect capital appreciation across the sector. We utilize a +1x premium for NIPSCO Gas/Electric due to generally constructive regulatory outcomes. We subtract the value of excess holding company debt at the parent not supporting the utility subsidiaries.

Positive and negative risks to our Price Objective are changes in 1) regulatory, political,

and legislative outcomes, 2) ability to execute on capital expenditure plan, 3) inflation, operating expense, and interest rates as they influence earned rates of return, 4) customer count and load growth, 5) commodities, 6) natural disasters, 7) pension plan returns, 8) equity and asset sale needs.

Analyst Certification

We, Julien Dumoulin-Smith and Paul Zimbardo, hereby certify that the views each of us has expressed in this research report accurately reflect each of our respective personal views about the subject securities and issuers. We also certify that no part of our respective compensation was, is, or will be, directly or indirectly, related to the specific recommendations or view expressed in this research report.

Equity Investment Rating Distribution: Global Group (as of 31 Mar 2023)

Coverage Universe	Count	Percent	Inv. Banking Relationships [R1]	Count	Percent
Buy	1869	53.01%	Buy	1030	55.11%
Hold	827	23.45%	Hold	476	57.56%
Sell	830	23.54%	Sell	389	46.87%

[R1] Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster[R2]
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

[R2]Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Price Charts for the securities referenced in this research report are available on the Price Charts website, or call 1-800-MERRILL to have them mailed.
BofAS or one of its affiliates acts as a market maker for the equity securities recommended in the report: Avangrid, CenterPoint Energy, CMS Energy, Consolidated Edison, Duke Energy, NiSource Inc.
BofAS or an affiliate was a manager of a public offering of securities of this issuer within the last 12 months: CMS Energy, Duke Energy, NiSource Inc.
The issuer is or was, within the last 12 months, an investment banking client of BofAS and/or one or more of its affiliates: Avangrid, CenterPoint, CMS Energy, Consolidated Edison, Duke Energy, NiSource Inc.
BofAS or an affiliate has received compensation from the issuer for non-investment banking services or products within the past 12 months: Avangrid, CenterPoint, CMS Energy, Consolidated Edison, Duke Energy, NiSource Inc.
The issuer is or was, within the last 12 months, a non-securities business client of BofAS and/or one or more of its affiliates: Avangrid, CenterPoint, CMS Energy, Consolidated Edison, Duke Energy, NiSource Inc.
BofAS or an affiliate has received compensation for investment banking services from this issuer within the past 12 months: Avangrid, CenterPoint, CMS Energy, Consolidated Edison, Duke Energy, NiSource Inc.
BofAS or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer or an affiliate of the issuer within the next three months: Avangrid, CenterPoint, CMS Energy, Consolidated Edison, Duke Energy, NiSource Inc.
BofAS together with its affiliates beneficially owns one percent or more of the common stock of this issuer. If this report was issued on or after the 9th day of the month, it reflects the ownership position on the last day of the previous month. Reports issued before the 9th day of a month reflect the ownership position at the end of the second month preceding the date of the report: CMS Energy, Duke Energy, NiSource Inc.
BofAS or one of its affiliates is willing to sell to, or buy from, clients the common equity of the issuer on a principal basis: Avangrid, CenterPoint Energy, CMS Energy, Consolidated Edison, Duke Energy, NiSource Inc.
The issuer is or was, within the last 12 months, a securities business client (non-investment banking) of BofAS and/or one or more of its affiliates: Avangrid, CenterPoint, CMS Energy, Consolidated Edison, Duke Energy, NiSource Inc.
BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

Other Important Disclosures

BofAS together with its affiliates beneficially owns a net short position of 0.5% or more of the total issued share capital of this issuer. Ownership positions speak as of a date no more than three trading days prior to the date of this report: CMS Energy.
From time to time research analysts conduct site visits of covered issuers. BofA Global Research policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits.
Prices are indicative and for information purposes only. Except as otherwise stated in the report, for any recommendation in relation to an equity security, the price referenced is the publicly traded price of the security as of close of business on the day prior to the date of the report or, if the report is published during intraday trading, the price referenced is indicative of the traded price as of the date and time of the report and in relation to a debt security (including equity preferred and CDS), prices are indicative as of the date and time of the report and are from various sources including BofA Securities trading desks.
The date and time of completion of the production of any recommendation in this report shall be the date and time of dissemination of this report as recorded in the report timestamp.

Recipients who are not institutional investors or market professionals should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.
Officers of BofAS or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments.
Refer to BofA Global Research policies relating to conflicts of interest.
"BofA Securities" includes BofA Securities, Inc. ("BofAS") and its affiliates. Investors should contact their BofA Securities representative or Merrill Global Wealth Management financial advisor if they have questions concerning this report or concerning the appropriateness of any investment idea described herein for such investor. "BofA Securities" is a global brand for BofA Global Research.

General Investment Related Disclosures:

Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities.

This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.

Facts and views presented in this material have not been reviewed by, and may not reflect information known to, professionals in other business areas of BofA Securities, including investment banking personnel. BofA Securities has established information barriers between BofA Global Research and certain business groups. As a result, BofA Securities does not disclose certain client relationships with, or compensation received from, such issuers. To the extent this material discusses any legal proceeding or issues, it has not been prepared as nor is it intended to express any legal conclusion, opinion or advice. Investors should consult their own legal advisers as to issues of law relating to the subject matter of this material. BofA Global Research personnel's knowledge of legal proceedings in which any BofA Securities entity and/or its directors, officers and employees may be plaintiffs, defendants, co-defendants or co-plaintiffs with or involving issuers mentioned in this material is based on public information. Facts and views presented in this material that relate to any such proceedings have not been reviewed by, discussed with, and may not reflect information known to, professionals in other business areas of BofA Securities in connection with the legal proceedings or matters relevant to such proceedings.
This information has been prepared independently of any issuer of securities mentioned herein and not in connection with any proposed offering of securities or as agent of any issuer of any securities. None of BofAS any of its affiliates or their research analysts has any authority whatsoever to make any representation or warranty on behalf of the issuer(s). BofA Global Research policy prohibits research personnel from disclosing a recommendation, investment rating, or investment thesis for review by an issuer prior to the publication of a research report containing such rating, recommendation or investment thesis.
Any information relating to the tax status of financial instruments discussed herein is not intended to provide tax advice or to be used by anyone to provide tax advice. Investors are urged to seek tax advice based on their particular circumstances from an independent tax professional.
The information herein (other than disclosure information relating to BofA Securities and its affiliates) was obtained from various sources and we do not guarantee its accuracy. This information may contain links to third-party websites. BofA Securities is not responsible for the content of any third-party website or any linked content contained in a third-party website. Content contained on such third-party websites is not part of this information and is not incorporated by reference. The inclusion of a link does not imply any endorsement by or any affiliation with BofA Securities. Access to any third-party website is at your own risk, and you should always review the terms and privacy policies at third-party websites before submitting any personal information to them. BofA Securities is not responsible for such terms and privacy policies and expressly disclaims any liability for them.
All opinions, projections and estimates constitute the judgment of the author as of the date of publication and are subject to change without notice. Prices also are subject to change without notice. BofA Securities is under no obligation to update this information and BofA Securities ability to publish information on the subject issuer(s) in the future is subject to applicable quiet periods. You should therefore assume that BofA Securities will not update any fact, circumstance or opinion contained herein.
Subject to the quiet period applicable under laws of the various jurisdictions in which we distribute research reports and other legal and BofA Securities policy-related restrictions on the publication of research reports, fundamental equity reports are produced on a regular basis as necessary to keep the investment recommendation current.
Certain outstanding reports or investment opinions relating to securities, financial instruments and/or issuers may no longer be current. Always refer to the most recent research report relating to an issuer prior to making an investment decision.
In some cases, an issuer may be classified as Restricted or may be Under Review or Extended Review. In each case, investors should consider any investment opinion relating to such issuer (or its security and/or financial instruments) to be suspended or withdrawn and should not rely on the analyses and investment opinion(s) pertaining to such issuer (or its securities and/or financial instruments) nor should the analyses or opinion(s) be considered a solicitation of any kind. Sales persons and financial advisors affiliated with BofAS or any of its affiliates may not solicit purchases of securities or financial instruments that are Restricted or Under Review and may only solicit securities under Extended Review in accordance with firm policies.
Neither BofA Securities nor any officer or employee of BofA Securities accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this information.

NiSource Inc (NI.N)

Slight Beat, NIPSCO Sale Timeline Guidance Unchanged

CITI'S TAKE

Ni modestly beat on EPS, reaffirmed NIPSCO sale and generation buildout timeline, and should modestly benefit from new Indiana law on T&D.

Q1 — Nisource's $0.77 beat consensus's $0.75/Citi's $0.73, driven by new gas rates and weather decoupling mechanism, offset by higher D&A, interest expense, & taxes.

NIPSCO Sale – Timeline Unchanged? — NI talked to a broad range of qualified buyers. They do not anticipate any approval process with the IURC but will engage with the commission by filing after an agreement is reached. The company reiterated the current timeline for the transaction (YE 2023 transaction), but choppy deal markets and lots of assets on the market increases deal execution risk, in our opinion.

Indiana ROFR Bill Signage, Transmission Projects — Under HB1420 (just signed by the Governor), NIPSCO and other incumbent Indiana utilities have the right to build, own and operate transmission projects in their current service territory without going through competitive bidding. This bill gives Nisource more footing to participate in MISO's transmission plan, earliest in service date in 2028 -- tranche 1 outlined 18 projects with $10B cost, and tranche 2 targeted approval in 1H24. Nisource will work with MISO to quantify the capex. Beyond HB1420, SB9 and HB1007 may modestly impact the Company's outlook given impact for generation outside of IRPs and future rates (although doesn't impact our current estimates).

Future of Gas: As the 9th circuit decision in California makes it harder to ban gas hookups, NiSource has laws on the books in 3 of 6 jurisdictions that prevent local governments to ban gas hookups, so the impact is limited for NiSource.

Program Apollo: $40M-$60M Recurring Savings — Management is working on recurring lean program to cut $40-60M/yr in O&M. The current CIO is focused on $1B investment in IT to cut costs in planning, execution, and customer service.

Renewable Projects on Track — Dunns Bridge I Solar and Crossroads Solar are still targeting Q2 COD. Calvary Solar and Dunns Bridge II Solar have started construction, and Crossroads 2 Wind is targeting 2023 COD.

Convert Financing? — Nisource could consider doing a convert with *cash* premium paid in the future (if necessary), in our view, to lower interest expense modestly. In investor dialogue, NI is on a short list of utilities investors focused on this.

Prepared for Michael Weisenburger

Prepared for Michael Weisenburger

NiSource Inc

Company description

NiSource Inc (NI) is primarily a regulated utility with an integrated network of gas distribution in the Northeast, Mid-Atlantic, and Midwest. NiSource also operates an electric utility in Northern Indiana. The company serves around 4 million customers across seven states through its two main business segments, including 1) Gas Distribution, which delivers natural gas in several states, and 2) Electric Operations, which consist of NiSource's regulated electric utility, Northern Indiana Public Service Company (NIPSCO).

Investment strategy

We rate the shares of NiSource (NI) Neutral (2). We believe that NI's long-term earnings are relatively stable due to diverse operations areas and constructive regulatory jurisdictions. Our estimates do not include 1) substantial industrial load growth at the utilities; 2) colder-than-normal weather and faster-than-average customer growth; or 3) slower than typical timeline in regulatory filing and approval process for new infrastructure projects and cost recovery mechanisms.

Valuation

We average multiple valuation methodologies to derive our $30 target price. Our NAV yields a value of $32. We value regulated assets at a multiple of 1.5x rate base. These values are partially offset by the company's net debt. Our DDM, which incorporates our rate base growth assumptions, values the company at $30 per share. Our P/E and EV/EBITDA analyses yield values of $32 and $29, respectively.

Risks

The key risks to our investment thesis are as follows: (1) Rate Cases – We estimate the company will receive rate relief at several of its utilities. Under- or over-estimation of relief could materially impact our estimates. (2) Weather – Changes in weather impact the stability of earnings. (3) Capital Investment Recovery — NI spends a substantial amount of capital to maintain and expand its distribution system. NI depends on rate increases from public utility commission to earn a fair return on this expansion. (4) Capital Markets — Access to cheap capital markets could be limited due to the size of the company. If the impact on the company from any of these factors proves to be greater/less than we anticipate, it may prevent the stock from achieving our target price or could cause the stock price to materially under/outperform our target.

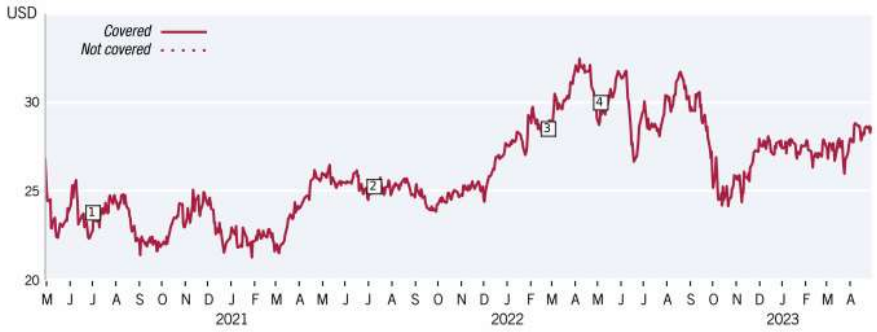
Appendix A-1

ANALYST CERTIFICATION



The research analysts primarily responsible for the preparation and content of this research report are either (i) designated by "AC" in the author block or (ii) listed in bold alongside content which is attributable to that analyst. If multiple AC analysts are designated in the author block, each analyst is certifying with respect to the entire research report other than (a) content attributable to another AC certifying analyst listed in bold alongside the content and (b) views expressed solely with respect to a specific issuer which are attributable to another AC certifying analyst identified in the price charts or rating history tables for that issuer shown below. Each of these analysts certify, with respect to the sections of the report for which they are responsible: (1) that the views expressed therein accurately reflect their personal views about each issuer and security referenced and were prepared in an independent manner, including with respect to Citigroup Global Markets Inc. and its affiliates; and (2) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in this report.

Rating/target price changes above reflect Eastern Time

Citigroup Global Markets Inc. owns a position of 1 million USD or more in the debt securities of NiSource Inc.

Citigroup Global Markets Inc. or its affiliates has received compensation for investment banking services provided within the past 12 months from NiSource Inc.

Citigroup Global Markets Inc. or its affiliates received compensation for products and services other than investment banking services from NiSource Inc in the past 12 months.

Citigroup Global Markets Inc. or its affiliates currently has, or had within the past 12 months, the following as investment banking client(s): NiSource Inc.

Citigroup Global Markets Inc. or its affiliates currently has, or had within the past 12 months, the following as clients, and the services provided were non-investment-banking, securities-related: NiSource Inc.

Citigroup Global Markets Inc. or its affiliates currently has, or had within the past 12 months, the following as clients, and the services provided were non-investment-banking, non-securities-related: NiSource Inc.

Analysts' compensation is determined by Citi Research management and Citigroup's senior management and is based upon activities and services intended to benefit the investor clients of Citigroup Global Markets Inc. and its affiliates (the "Firm"). Compensation is not linked to specific transactions or recommendations. Like all Firm employees, analysts receive compensation that is impacted by overall Firm profitability which includes investment banking, sales and trading, and principal trading revenues. One factor in equity research analyst compensation is arranging corporate access events between institutional clients and the management teams of covered companies. Typically, company management is more likely to participate when the analyst has a positive view of the company.

For financial instruments recommended in the Product in which the Firm is not a market maker, the Firm is a liquidity provider in such financial instruments (and any underlying instruments) and may act as principal in connection with transactions in such instruments. The Firm is a regular issuer of traded financial instruments linked to securities that may have been recommended in the Product. The Firm regularly trades in the securities of the issuer(s) discussed in the Product. The Firm may engage in securities transactions in a manner inconsistent with the Product and, with respect to securities covered by the Product, will buy or sell from customers on a principal basis.

Prepared for Michael Weisenburger

Unless stated otherwise neither the Research Analyst nor any member of their team has viewed the material operations of the Companies for which an investment view has been provided within the past 12 months.

For important disclosures (including copies of historical disclosures) regarding the companies that are the subject of this Citi Research product ("the Product"), please contact Citi Research, 388 Greenwich Street, 6th Floor, New York, NY, 10013, Attention: Legal/Compliance [E6WYB6412478]. In addition, the same important disclosures, with the exception of the Valuation and Risk assessments and historical disclosures, are contained on the Firm's disclosure website at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures. Valuation and Risk assessments can be found in the text of the most recent research note/report regarding the subject company. Pursuant to the Market Abuse Regulation a history of all Citi Research recommendations published during the preceding 12-month period can be accessed via Citi Velocity (https://www.citivelocity.com/cv2) or your standard distribution portal. Historical disclosures (for up to the past three years) will be provided upon request.

Citi Research Equity Ratings Distribution

	12 Month Rating			Catalyst Watch		
Data current as of 31 Mar 2023	**Buy**	**Hold**	**Sell**	**Buy**	**Hold**	**Sell**
Citi Research Global Fundamental Coverage (Neutral=Hold)	56%	34%	9%	30%	57%	13%
% of companies in each rating category that are investment banking clients	59%	65%	53%	67%	56%	62%

Guide to Citi Research Fundamental Research Investment Ratings:
Citi Research stock recommendations include an investment rating and an optional risk rating to highlight high risk stocks.
Risk rating takes into account both price volatility and fundamental criteria. Stocks will either have no risk rating or a High risk rating assigned.
Investment Ratings: Citi Research investment ratings are Buy, Neutral and Sell. Our ratings are a function of analyst expectations of expected total return ("ETR") and risk. ETR is the sum of the forecast price appreciation (or depreciation) plus the dividend yield for a stock within the next 12 months. The target price is based on a 12 month time horizon. The Investment rating definitions are: Buy (1) ETR of 15% or more or 25% or more for High risk stocks; and Sell (3) for negative ETR. Any covered stock not assigned a Buy or a Sell is a Neutral (2). For stocks rated Neutral (2), if an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of Citi Research management not to assign a target price and, thus, not derive an ETR. Citi Research may suspend its rating and target price and assign "Rating Suspended" status for regulatory and/or internal policy reasons. Citi Research may also suspend its rating and target price and assign "Under Review" status for other exceptional circumstances (e.g. lack of information critical to the analyst's thesis, trading suspension) affecting the company and/or trading in the company's securities. In both such situations, the rating and target price will show as "—" and "-" respectively in the rating history price chart. Prior to 11 April 2022 Citi Research assigned "Under Review" status to both situations and prior to 11 Nov 2020 only in exceptional circumstances. As soon as practically possible, the analyst will publish a note re-establishing a rating and investment thesis. Investment ratings are determined by the ranges described above at the time of initiation of coverage, a change in investment and/or risk rating, or a change in target price (subject to limited management discretion). At times, the expected total returns may fall outside of these ranges because of market price movements and/or other short-term volatility or trading patterns. Such interim deviations will be permitted but will become subject to review by Research Management. Your decision to buy or sell a security should be based upon your personal investment objectives and should be made only after evaluating the stock's expected performance and risk.

Catalyst Watch Upside/Downside calls:
Citi Research may also include a Catalyst Watch Upside or Downside call to highlight specific near-term catalysts or events impacting the company or the market that are expected to influence the share price over a specified period of 30 or 90 days. A Catalyst Watch Upside (Downside) call indicates that the analyst expects the share price to rise (fall) in absolute terms over the specified period. A Catalyst Watch Upside/Downside call will automatically expire at the end of the specified 30/90 day period (or earlier if the investment rating of the company is assigned Rating Suspended or Under Review status); the analyst may also close a Catalyst Watch call prior to the end of the specified period in a published research note. A Catalyst Watch Upside or Downside call may be different from and does not affect a stock's fundamental equity rating, which reflects a longer-term total absolute return expectation. For purposes of FINRA ratings[1]distribution-disclosure rules, a Catalyst Watch Upside call corresponds to a buy recommendation and a Catalyst Watch Downside call corresponds to a sell recommendation. Any stock not assigned to a Catalyst Watch Upside or Catalyst Watch Downside call is considered Catalyst Watch Non-Rated (CWNR). For purposes of FINRA ratings-distribution-disclosure rules, we correspond CWNR to Hold in our ratings distribution table for our Catalyst Watch Upside/Downside rating system. However, we reiterate that we do not consider CWNR to be a recommendation. For all Catalyst Watch Upside/Downside calls, risk exists that the catalyst(s) and associated share-price movement will not materialize as expected.

RESEARCH ANALYST AFFILIATIONS / NON-US RESEARCH ANALYST DISCLOSURES
The legal entities employing the authors of this report are listed below (and their regulators are listed further herein). Non-US research analysts who have prepared this report (i.e., all research analysts listed below other than those identified as employed by Citigroup Global Markets Inc.) are not registered/qualified as research analysts with FINRA. Such research analysts may not be associated persons of the member organization (but are employed by an affiliate of the member organization) and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Citigroup Global Markets Inc.	Ryan Levine; Xinru Yin

OTHER DISCLOSURES

Any price(s) of instruments mentioned in recommendations are as of the prior day's market close on the primary market for the instrument, unless otherwise stated.

The completion and first dissemination of any recommendations made within this research report are as of the Eastern date-time displayed at the top of the Product. If the Product references views of other analysts then please refer to the price chart or rating history table for the date/time of completion and first dissemination with respect to that view.

Regulations in various jurisdictions require that where a recommendation differs from any of the author's previous recommendations concerning the same financial instrument or issuer that has been published during the preceding 12-month period that the change(s) and the date of that previous recommendation are indicated. For fundamental coverage please refer to the price chart or rating change history within this disclosure appendix or the issuer disclosure summary at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

Prepared for Michael Weisenburger

Citi Research has implemented policies for identifying, considering and managing potential conflicts of interest arising as a result of publication or distribution of investment research. A description of these policies can be found at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

The proportion of all Citi Research research recommendations that were the equivalent to "Buy","Hold","Sell" at the end of each quarter over the prior 12 months (with the % of these that had received investment firm services from Citi in the prior 12 months shown in brackets) is as follows: Q1 2023 Buy 33% (65%), Hold 43% (55%), Sell 23% (51%), RV 0.5% (86%); Q4 2022 Buy 33% (64%), Hold 43% (55%), Sell 23% (51%), RV 0.6% (91%); Q3 2022 Buy 33% (65%), Hold 43% (55%), Sell 23% (49%), RV 0.5% (89%); Q2 2022 Buy 33% (66%), Hold 43% (55%), Sell 23% (50%), RV 0.6% (88%). For the purposes of disclosing recommendations other than for equity (whose definitions can be found in the corresponding disclosure sections), "Buy" means a positive directional trade idea; "Sell" means a negative directional trade idea; and "Relative Value" means any trade idea which does not have a clear direction to the investment strategy.

European regulations require a 5 year price history when past performance of a security is referenced. CitiVelocity's Charting Tool (https://www.citivelocity.com/cv2/#go/CHARTING_3_Equities) provides the facility to create customisable price charts including a five year option. This tool can be found in the Data & Analytics section under any of the asset class menus in CitiVelocity (https://www.citivelocity.com/). For further information contact CitiVelocity support (https://www.citivelocity.com/cv2/go/CLIENT_SUPPORT). The source for all referenced prices, unless otherwise stated, is DataCentral, which sources price information from Thomson Reuters. Past performance is not a guarantee or reliable indicator of future results. Forecasts are not a guarantee or reliable indicator of future performance.

Investors should always consider the investment objectives, risks, and charges and expenses of an ETF carefully before investing. The applicable prospectus and key investor information document (as applicable) for an ETF should contain this and other information about such ETF. It is important to read carefully any such prospectus before investing. Clients may obtain prospectuses and key investor information documents for ETFs from the applicable distributor or authorized participant, the exchange upon which an ETF is listed and/or from the applicable website of the applicable ETF issuer. The value of the investments and any accruing income may fall or rise. Any past performance, prediction or forecast is not indicative of future or likely performance. Any information on ETFs contained herein is provided strictly for illustrative purposes and should not be deemed an offer to sell or a solicitation of an offer to purchase units of any ETF either explicitly or implicitly. The opinions expressed are those of the authors and do not necessarily reflect the views of ETF issuers, any of their agents or their affiliates.

Citigroup Global Markets India Private Limited and/or its affiliates may have, from time to time, actual or beneficial ownership of 1% or more in the debt securities of the subject issuer.

Please be advised that pursuant to Executive Order 13959 as amended (the "Order"), U.S. persons are prohibited from investing in securities of any company determined by the United States Government to be the subject of the Order. This research is not intended to be used or relied upon in any way that could result in a violation of the Order. Investors are encouraged to rely upon their own legal counsel for advice on compliance with the Order and other economic sanctions programs administered and enforced by the Office of Foreign Assets Control of the U.S. Treasury Department.

This communication is directed at persons who are "Eligible Clients" as such term is defined in the Israeli Regulation of Investment Advice, Investment Marketing and Investment Portfolio Management law, 1995 (the "Advisory Law"). Within Israel, this communication is not intended for retail clients and Citi will not make such products or transactions available to retail clients. The presenter is not licensed as investment advisor or marketer by the Israeli Securities Authority ("ISA") and this communication does not constitute investment or marketing advice. The information contained herein may relate to matters that are not regulated by the ISA. Any securities which are the subject of this communication may not be offered or sold to any Israeli person except pursuant to an exemption from the Israeli public offering rules, including according to the Israeli Securities Law.

Citi Research generally disseminates its research to the Firm's global institutional and retail clients via both proprietary (e.g., Citi Velocity and Citi Personal Wealth Management) and non-proprietary electronic distribution platforms. Certain research may be disseminated only via the Firm's proprietary distribution platforms; however such research will not contain changes to earnings forecasts, target price, investment or risk rating or investment thesis or be otherwise inconsistent with the author's previously published research. Certain research is made available only to institutional investors to satisfy regulatory requirements. Individual Citi Research analysts may also opt to circulate published research to one or more clients by email; such email distribution is discretionary and is done only after the research has been disseminated. The level and types of services provided by Citi Research analysts to clients may vary depending on various factors such as the client's individual preferences as to the frequency and manner of receiving communications from analysts, the client's risk profile and investment focus and perspective (e.g. market-wide, sector specific, long term, short-term etc.), the size and scope of the overall client relationship with the Firm and legal and regulatory constraints.

Pursuant to Comissão de Valores Mobiliários Resolução 20 and ASIC Regulatory Guide 264, Citi is required to disclose whether a Citi related company or business has a commercial relationship with the subject company. Considering that Citi operates multiple businesses in more than 100 countries around the world, it is likely that Citi has a commercial relationship with the subject company.

Disclosure for investors in the Republic of Turkey: Under Capital Markets Law of Turkey (Law No: 6362), the investment information, comments and recommendations stated here, are not within the scope of investment advisory activity. Investment advisory service is provided in accordance with a contract of engagement on investment advisory concluded between brokerage houses, portfolio management companies, non-deposit banks and clients. Comments and recommendations stated here rely on the individual opinions of the ones providing these comments and recommendations. These opinions may not fit to your financial status, risk and return preferences. For this reason, to make an investment decision by relying solely to this information stated here may not bring about outcomes that fit your expectations. Furthermore, Citi Research is a division of Citigroup Global Markets Inc. (the "Firm"), which does and seeks to do business with companies and/or trades on securities covered in this research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report, however investors should also note that the Firm has in place organisational and administrative arrangements to manage potential conflicts of interest of this nature.

Securities recommended, offered, or sold by the Firm: (i) are not insured by the Federal Deposit Insurance Corporation; (ii) are not deposits or other obligations of any insured depository institution (including Citibank); and (iii) are subject to investment risks, including the possible loss of the principal amount invested. The Product is for informational purposes only and is not intended as an offer or solicitation for the purchase or sale of a security. Any decision to purchase securities mentioned in the Product must take into account existing public information on such security or any registered prospectus. Although information has been obtained from and is based upon sources that the Firm believes to be reliable, we do not guarantee its accuracy and it may

Prepared for Michael Weisenburger

be incomplete and condensed. Note, however, that the Firm has taken all reasonable steps to determine the accuracy and completeness of the disclosures made in the Important Disclosures section of the Product. The Firm's research department has received assistance from the subject company(ies) referred to in this Product including, but not limited to, discussions with management of the subject company(ies). Firm policy prohibits research analysts from sending draft research to subject companies. However, it should be presumed that the author of the Product has had discussions with the subject company to ensure factual accuracy prior to publication. Statements and views concerning ESG (environmental, social, governance) factors are typically based upon public statements made by the affected company or other public news, which the author may not have independently verified. ESG factors are one consideration that investors may choose to examine when making investment decisions. All opinions, projections and estimates constitute the judgment of the author as of the date of the Product and these, plus any other information contained in the Product, are subject to change without notice. Prices and availability of financial instruments also are subject to change without notice. Notwithstanding other departments within the Firm advising the companies discussed in this Product, information obtained in such role is not used in the preparation of the Product. Although Citi Research does not set a predetermined frequency for publication, if the Product is a fundamental equity or credit research report, it is the intention of Citi Research to provide research coverage of the covered issuers, including in response to news affecting the issuer. For non-fundamental research reports, Citi Research may not provide regular updates to the views, recommendations and facts included in the reports. Notwithstanding that Citi Research maintains coverage on, makes recommendations concerning or discusses issuers, Citi Research may be periodically restricted from referencing certain issuers due to legal or policy reasons. Where a component of a published trade idea is subject to a restriction, the trade idea will be removed from any list of open trade ideas included in the Product. Upon the lifting of the restriction, the trade idea will either be re-instated in the open trade ideas list if the analyst continues to support it or it will be officially closed. Citi Research may provide different research products and services to different classes of customers (for example, based upon long-term or short-term investment horizons) that may lead to differing conclusions or recommendations that could impact the price of a security contrary to the recommendations in the alternative research product, provided that each is consistent with the rating system for each respective product.

Investing in non-U.S. securities, including ADRs, may entail certain risks. The securities of non-U.S. issuers may not be registered with, nor be subject to the reporting requirements of the U.S. Securities and Exchange Commission. There may be limited information available on foreign securities. Foreign companies are generally not subject to uniform audit and reporting standards, practices and requirements comparable to those in the U.S. Securities of some foreign companies may be less liquid and their prices more volatile than securities of comparable U.S. companies. In addition, exchange rate movements may have an adverse effect on the value of an investment in a foreign stock and its corresponding dividend payment for U.S. investors. Net dividends to ADR investors are estimated, using withholding tax rates conventions, deemed accurate, but investors are urged to consult their tax advisor for exact dividend computations. Investors who have received the Product from the Firm may be prohibited in certain states or other jurisdictions from purchasing securities mentioned in the Product from the Firm. Please ask your Financial Consultant for additional details. Citigroup Global Markets Inc. takes responsibility for the Product in the United States. Any orders by US investors resulting from the information contained in the Product may be placed only through Citigroup Global Markets Inc.

Important Disclosures for Bell Potter Customers: Bell Potter is making this Product available to its clients pursuant to an agreement with Citigroup Global Markets Australia Pty Limited. Neither Citigroup Global Markets Australia Pty Limited nor any of its affiliates has made any determination as to the suitability of the information provided herein and clients should consult with their Bell Potter financial advisor before making any investment decision.

The Citigroup legal entity that takes responsibility for the production of the Product is the legal entity which the first named author is employed by.

The Product is not to be construed as providing investment services in any jurisdiction where the provision of such services would not be permitted. Subject to the nature and contents of the Product, the investments described therein are subject to fluctuations in price and/or value and investors may get back less than originally invested. Certain high-volatility investments can be subject to sudden and large falls in value that could equal or exceed the amount invested.The yield and average life of CMOs (collateralized mortgage obligations) referenced in this Product will fluctuate depending on the actual rate at which mortgage holders prepay the mortgages underlying the CMO and changes in current interest rates. Any government agency backing of the CMO applies only to the face value of the CMO and not to any premium paid. Certain investments contained in the Product may have tax implications for private customers whereby levels and basis of taxation may be subject to change. If in doubt, investors should seek advice from a tax adviser. The Product does not purport to identify the nature of the specific market or other risks associated with a particular transaction. Advice in the Product is general and should not be construed as personal advice given it has been prepared without taking account of the objectives, financial situation or needs of any particular investor. Accordingly, investors should, before acting on the advice, consider the appropriateness of the advice, having regard to their objectives, financial situation and needs. Prior to acquiring any financial product, it is the client's responsibility to obtain the relevant offer document for the product and consider it before making a decision as to whether to purchase the product.
Citi Research product may source data from dataCentral. dataCentral is a Citi Research proprietary database, which includes the Firm's estimates, data from company reports and feeds from Thomson Reuters. The source for all referenced prices, unless otherwise stated, is DataCentral. Past performance is not a guarantee or reliable indicator of future results. Forecasts are not a guarantee or reliable indicator of future performance. The printed and printable version of the research report may not include all the information (e.g. certain financial summary information and comparable company data) that is linked to the online version available on the Firm's proprietary electronic distribution platforms.

Card Insights. Where this report references Card Insights data, Card Insights consists of selected data from a subset of Citi's proprietary credit card transactions. Such data has undergone rigorous security protocols to keep all customer information confidential and secure; the data is highly aggregated and anonymized so that all unique customer identifiable information is removed from the data prior to receipt by the report's author or distribution to external parties. This data should be considered in the context of other economic indicators and publicly available information. Further, the selected data represents only a subset of Citi's proprietary credit card transactions due to the selection methodology or other limitations and should not be considered as indicative or predictive of the past or future financial performance of Citi or its credit card business.

Where included in this report, MSCI sourced information is the exclusive property of Morgan Stanley Capital International Inc. (MSCI). Without prior written permission of MSCI, this information and any other MSCI intellectual property may not be reproduced, redisseminated or used to create any financial products, including any indices. This information is provided on an "as is" basis. The user assumes the entire risk of any use made of this information. MSCI, its affiliates and any third party involved in, or related to, computing or compiling the information hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of this information. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates or any third party involved in, or related to, computing or compiling the information have any liability for any damages of any kind. MSCI, Morgan Stanley Capital International and the MSCI indexes are services marks of MSCI and its affiliates. Part of this product may contain Sustainalytics proprietary information that may not be reproduced, used, disseminated, modified nor published in any manner without the express written consent of Sustainalytics. Sustainalytics, its affiliates and any third party involved in, or related to, computing or compiling the information hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of this information. F L A S H | US Gas Pipelines & Distribution Utilities

New Federal Court Decision - A Win for the Gas Utility Market, Mixed Implication for PCG Ahead of CA Senate Testimony Today

CITI'S TAKE

Berkeley Restaurant Association legal decision released yesterday is a win for the natural gas community, in our view, and should help the valuation for gas utilities when a ban on new gas hookup in a progressive/liberal city such as Berkeley has been unsuccessful in implementing its policy. The decision has broader implications for future cases about gas hookup in other parts of the US given a federal court.

News: In a court case in Berkeley, California, the federal appeals court is the first to weigh in on bans against new natural gas hookups. Link to the 9th Circuit Decision (April 17). This decision indicated that the Energy Policy and Conservation Act preempts the Berkeley ordinance which prevents cities from banning gas hookups since the federal policy was created. The Act expressly preempts state and local regulation concerning the energy use for many gas appliances. Instead of directly banning these appliances in new buildings, Berkeley took a more circuitous route to the same result, so the court decided against the Berkeley Restaurant Association. The Court also noted that there were some conflicting decisions on similar cases, which leaves more issues to be decided in the future.

Industry Implications: The implication of this decision, in our view, is the anti-gas movement will likely slow. We would expect future litigation on this front but this decision creates precedent. This outcome is positive for gas utilities such as Atmos (ATO), Sempra (SRE), NiSource (NI), and CenterPoint (CNP) given their business mix. It is more negative for the electric utility / decarbonization movement. The decision more directly relates to PG&E (PCG) and the company filed information in connection with the case (see 9th Circuit Decision).

PCG Implications: From a PCG perspective, they own both gas and electric utility assets so the outcome may have less impact. In practice, a near-term shift from electric hookup to gas hookup in their service territory actually may be positive, in our view, for the stock. In January, during our field trip to California, almost every expert we met with was focused on the slow pace of electric hookups for PCG (US Diversified Utilities – Top Takes from Annual Ca. Utility & Energy Field Trip—CA Energy Transition Evolving). Since then, there has been a political and company management response due to the problems it created for the community. PCG management on the earnings call, announced a new “play” to their management playbook, and we would expect them to provide additional details at the upcoming analyst day. In Sacramento, there has been a Senate bill to address this issue (https://leginfo.legislature.ca.gov/faces/billAnalysisClient.xhtml?bill_id=202320240SB83#). In addition, there is a hearing today at noon EST (9am PST) to dive deeper in this issue with the energy, utilities, and communication committee. The company may disclose additional details about PCG’s operational progress, and the opportunity for distributed generation and storage in their service territory. Longer term, we believe a shift from electric to gas is negative for rate base spending for PCG.

Ping us for the dial-in if interested.

Atmos Energy Corp

(ATO.N; US$114.1; 2; 17 Apr 23; 16:00)

Valuation

We average our valuation methodologies to derive a $125 target price. (1) Our NAV value is a multiple of 1.6x of rate base for utilities. These values are partially offset by the company's net debt. (2) Our DDM values the company's forecasted cash flows discounted by a WACC/CAPM based discount rate. We calculate a hypothetical dividend, based on regulated capital growth, authorized returns and cost of equity to arrive at our DDM valuation. (3) Our P/E analysis indicates multiples of 20x for the company's distribution and transmission businesses. For our EV/EBITDA analysis, we use multiples of 12x for the company's distribution and transmission businesses.

Risks

The key risks to our investment thesis on ATO are (1) Capital Investment Recovery – ATO, relying on future rates, spends capital to maintain and expand pipeline and utility systems. A politicized commission could delay or put at risk this recovery; (2) Customer Growth – An unexpected increase or decrease in population could affect earnings substantially, either favorably or unfavorably; (3) Capital Markets – ATO is a relatively small utility in terms of market cap and trading volumes, impacting ATO's ability to access capital markets while this type of liquidity may make it difficult for institutional investors to trade in and out of the stock; (4) Derivatives Markets – Volatile markets and dislocated hedges might cause losses on earnings or make ATO occur liability. If the impact on the company from any of the following factors proves to be greater or less than we anticipate, the company could fail to achieve or exceed our target price.

CenterPoint Energy Inc

(CNP.N; US$30.64; 2; 17 Apr 23; 16:00)

Valuation

We take an average of multiple valuation methodologies to derive our $31 price target. We value regulated assets at a multiple of rate base (2.0x for gas based on the recent LDC transaction price and 1.7x electric utilities). We use the latest public trading prices for the publicly listed securities. Our DDM values the company at $29. Our P/E and EV/EBITDA multiples are based on our proprietary analyses, which utilize current equity risk premiums, current betas and projected risk-free yields. For our P/E analysis, we use multiples of 19x earnings for the company's utility. For our EV/EBITDA analysis, we use multiples of 12.5x EBITDA for the company's electric utility assets. Our P/E and EV/EBITDA analyses yield values of $28 and $32, respectively.

Risks

The key risks to our investment thesis are: (1) Oil and gas production outlook. (2) TX and MN Regulatory Environments: The PUCT or MPUC could reduce delivery rates below what we consider to be a reasonable rate of return. (3) Capital Investment Recovery: CNP, relying on future rates, spends capital to maintain and expand utility systems. A politicized commission could delay or put at risk this recovery. (4) Customer Growth: An unexpected increase or decrease in population could affect earnings substantially, either favorably or unfavorably. (5) Commodity Prices: Equity earnings derived from Enable are highly sensitive to changes in NGL and natural gas prices. (6) Energy Services Exposure: Our estimates are dependent on the future NYMEX costs. Any substantial changes in gas costs could materially impact results, especially if CNP continues to acquire other energy services business in the future. (6) Changes in Interest Rates: Any future upwards or downwards interest rate movement could affect valuation substantially, either favorably or unfavorably. If the impact on the company from any of the following factors proves to be greater or less than we anticipate, the company could fail to

achieve/exceed our target price.

NiSource Inc

(NI.N; US$28.3; 2; 17 Apr 23; 16:00)

Valuation

We average multiple valuation methodologies to derive our $30 target price. Our NAV yields a value of $32. We value regulated assets at a multiple of 1.5x rate base. These values are partially offset by the company's net debt. Our DDM, which incorporates our rate base growth assumptions, values the company at $30 per share. Our P/E and EV/EBITDA analyses yield values of $32 and $29, respectively.

Risks

The key risks to our investment thesis are as follows: (1) Rate Cases – We estimate the company will receive rate relief at several of its utilities. Under- or over-estimation of relief could materially impact our estimates. (2) Weather – Changes in weather impact the stability of earnings. (3) Capital Investment Recovery — NI spends a substantial amount of capital to maintain and expand its distribution system. NI depends on rate increases from public utility commission to earn a fair return on this expansion. (4) Capital Markets — Access to cheap capital markets could be limited due to the size of the company. If the impact on the company from any of these factors proves to be greater/less than we anticipate, it may prevent the stock from achieving our target price or could cause the stock price to materially under/outperform our target.

PG&E Corp

(PCG.N; US$16.86; 1H; 17 Apr 23; 16:00)

Valuation

Our valuation considered 2024 industry average P/E multiple to PCG's 2024 earnings and then adjusts the valuation lower to account for our assumptions of a future wildfire liability, smaller than peer dividend, and growth prospects. This results in a price target of $19 per share.

Risks

We rate PCG High Risk given the potential for future wildfires even though AB1054 does provide some level of protection.
Regulatory risk – Failure to obtain fair recovery for capital expenditures or increases in operating costs could negatively affect PG&E's earnings and equity value.
Outstanding legal disputes.
Victims Trust second sale could impact the trading price of PCG.
Future political & regulatory impact from prior accident and investigations which carry a risk not only in financial penalties and fines, but more importantly, potentially damaging the standing of the company, in front of the CPUC and stakeholders.
Potential M&A – PCG could be acquired or merged with another utility.
If the impact on the company from any of these factors proves to be greater than we anticipate, the stock will likely have difficulty achieving our target price. However, should they be less than anticipated, the stock could trade above our target price.

Sempra Energy

(SRE.N; US$154.98; 2; 17 Apr 23; 16:00)

Valuation

We average four multiple valuation methodologies to derive our adjusted $171 target price. Our SOTP yields a value of $167. We apply an appropriate valuation metric for each asset in the SOTP approach that varies between P/E, EBITDA multiple, and trading value, based on the business we are valuing. These values are partially offset by the company's net debt and preferred shares. Our DDM values the company at $179. Our P/E and EV/EBITDA multiples are based on analyses of current equity risk premiums, current betas and projected risk-free yields. For our P/E analysis, we apply multiples to 2023 earnings at the utility and infrastructure segments. Our P/E analysis yields a value of $165. For our EV/EBITDA analysis, we apply multiples to 2023 utility and pipeline EBITDA. Our EV/EBITDA analysis yields a value of $174.

Risks

The key risks to our investment thesis are as follows. (1) The utilities are subject to regulation from federal, state, and local authorities which may impose rulings adverse to Sempra's interests. (2) Uncertainty in the contracting of capacity on expansions at the company's LNG facilities may negatively impact earnings in the coming years, along with changes in the regulatory outlook towards exporting gas. (3) Sempra is exposed to currency issues in Mexico and earnings could be impacted with significant volatility in the value of the Mexican Peso. (4) Ability to access debt or equity markets at a reasonable cost in the future could materially impact growth in the future. (5) Cameron construction delays could further reduce earnings outlook over the next few years. In addition, we view the following risks: 6) Mexico Administration changes the course of energy reform to IEnova's detriment, 7) the City of San Diego and CPUC move forward with community choice aggregation and SDG&E is unable to recover stranded costs, and 8) a fire hits SDG&E and/or there is an unfavorable resolution to the wildfire cases (legislature, courts, CPUC, executive branch). If the impact on the company from any of these factors proves to be greater/less than we anticipate, it may prevent the stock from achieving/exceeding our target price.

US Diversified Utilities

Utilities Still Most Crowded Sector into Potential Recession

Ryan Levine [AC]
Xinru Yin

CITI'S TAKE

Investor conversations with generalists over the last month of marketing point to the utility/power space becoming very crowded. Citi's quant analysis supports this takeaway as the industry remains the most crowded sector. Due to fundamentals, we have started to become more bullish, but these crowding scores add some worry. DTE, CNP, PPL, NI, and SRE rank as some of the most crowded, while PEG, PCG, and EIX are gaining popularity. Meanwhile NRG, AGR, and SWX remain out of favor.

Largest Increases in Crowding Scores — GNE, NWE, and UGI have some of the biggest increases in crowding scores since the end of Q1 2023. BIPC, BIP, PEG, POR, EIX and PCG also saw relatively large increases. GNE, AWK, PCG, PNW, and POR have some of the biggest increases in crowding scores since the end of Q4 2022. The gas names benefited from an improving regulatory environment (link) and lower commodity prices. The California stocks also benefited from decoupling, improving regulatory environment, and operational execution.

Largest Decreases in Crowding Scores — Stocks that saw some of the largest decreases in crowding scores since the end of Q1 2023 include UTL, PNM, AMPS, PNW, CMS, and ES. SJW, BEPC, PNM, NFG, BKH, and ES saw some of the largest decreases in crowding scores since the end of Q3 2022. There has been a growing concern around the challenging M&A market which has hurt sentiment around PNM, ES, and others. In addition, declining power prices and utility have decreased the outlook for AMPS, and others.

Most Crowded Stocks — DTE is the most crowded name in the space, followed by CNP (the most crowded in Jan and Mar), PPL, NI, SRE, and BIP. We continue to like DTE but remain concerned about the upcoming rate case for CNP. The outlook for NiSource continues to improve while Sempra continues to execute and capitalize on changing gas price environment.

Least Crowded Stocks — NRG is the least crowded stock within our coverage and has been among the least crowded stocks since June 2022. It was not surprising to see the activist campaign start on NRG given the poor investor sentiment. We see value here though. Other names with low crowding scores include OGS, AGR, SWX, and UGI.

Short Interest — We utilize short interest data that is more accurate than the Bloomberg data (less lag) so worth noting. NOVA has the highest short interest in the utility's universe, followed by POR, NRG, ORA, AGR, AMPS, and BIPC.

Changes in Short Interest since December and March — NRG, POR, AMPS, PNW, BIPC, AES, and CMS saw the largest increases in short interest from the end of Q1. Other names with large increases include CMS and OGE. NOVA, BIPC, NRG, SJW, and PNW saw the largest increases in short interest from the end of Q4. CMS and NFG also have large increases since December. On the other end of the spectrum, the largest declines in short interest came from SJW, BKH, PCG, and SWX. ED, BIPC, NFG, and ORA saw relatively large declines in short interest as well. The largest declines in short interest since Q4 2022 came from PCG, ATO, and BKH. UGI, CNP, and PNM also saw relatively large declines.

See Appendix A-1 for Analyst Certification, Important Disclosures and Research Analyst Affiliations.

Prepared for Michael Weisenburger

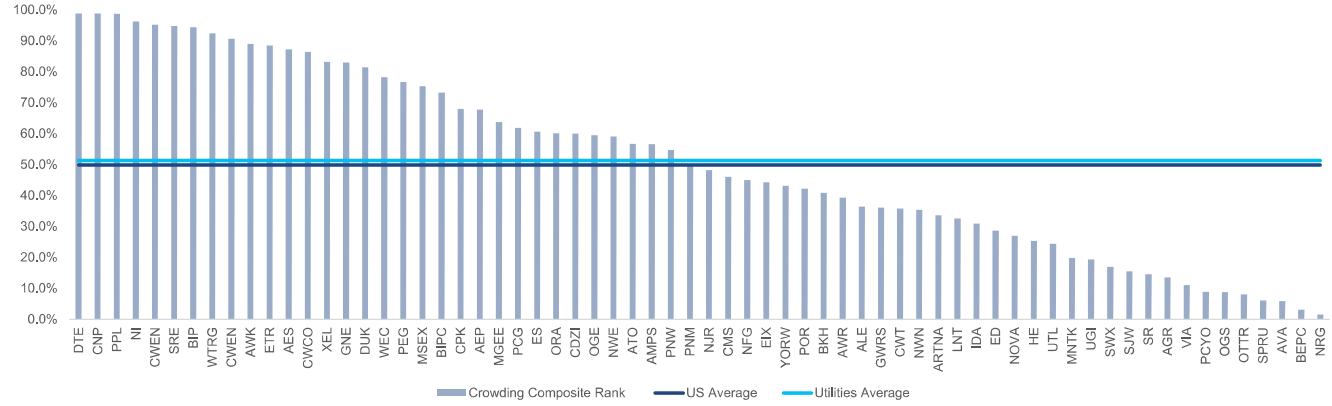
Utilities Crowding

Utilities remains the most crowded sector in the Citi Quant Research team's May update (link). It was the most crowded as of our last update in March 2023 (link).

Figure 1. Sector Crowding

© 2023 Citigroup Inc. No redistribution without Citigroup's written permission.

Source: Citi Research



Crowding Scores

DTE is the most crowded name in the space, followed by CNP (the most crowded in Jan and Mar), PPL, NI, SRE, and BIP. It is interesting to see DTE on the top of the charts as the company starts pursuing new unregulated CCUS projects and pursues rate cases in Michigan (recent rate case didn't go great given questions around google mobility data). PPL remains popular among investors but there are longer-term concerns around rate base growth in Kentucky and cost-cutting initiatives. NiSource outlook appears to be improving with new growth initiatives including RNG and Indiana transmission being more certain, but NIPSCO sale process in earlier stages. Sempra continues to perform well operationally with a CoC positive adjustment for 2024 potentially coming in the near future.

NRG is the least crowded stock within our coverage and has been among the least crowded stocks since June 2022. Other names with low crowding scores include OGS, AGR, SWX, and UGI. SWX has been under pressure on concerns around a dividend cut, spin economics, balance sheet, regulatory approvals, and potential shareholder overhang.

Changes in Crowding Since Q1 2023 & Q4 2022

Utilities' rate of improvement in crowding score among all GICS industry groups has slowed down in the last month (1.2% vs. 8.7% in March) but remains the most improved industry in the last quarter, 6.2%.

Figure 3. Changes in Sector Crowding

GICS Industry Group	April	May	1M Chg	3M Chg
Health Care Equipment & Services	48.8%	51.9%	3.3%	4.5%
Insurance	58.5%	61.5%	3.0%	1.5%
Financial Services	48.8%	51.2%	2.3%	0.2%

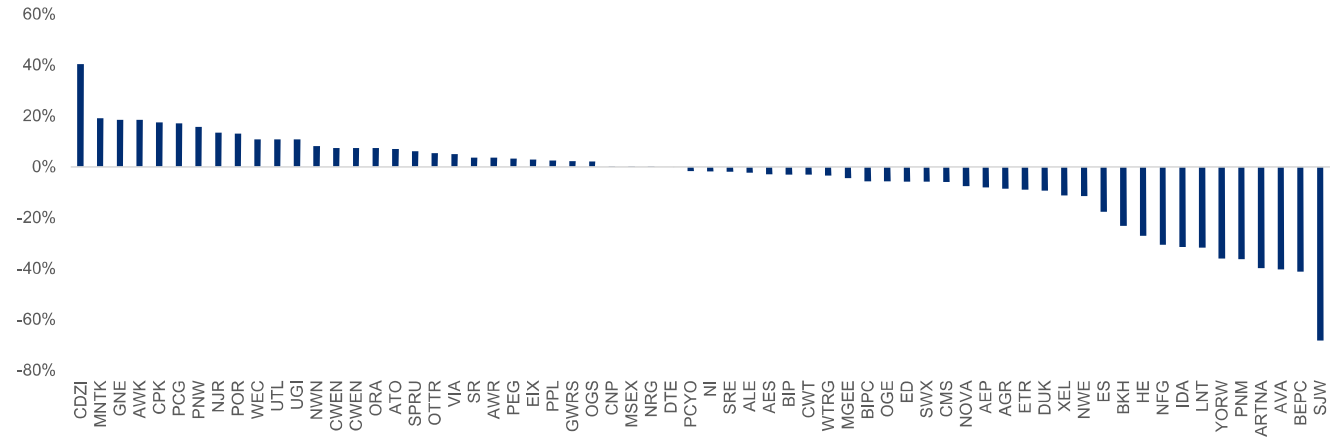
Prepared for Michael Weisenburger

In general, the California utilities and some the gas utilities seemed to become more crowded as California is decoupled from load and has potential improvement to earnings outlook coming in the near future, while the gas utilities are expected to benefit from "ban on bans," and improving regulatory environments. Atmos is the exception given higher O&M outlook. Looking at specific names in the utilities space, GNE, NWE, and UGI have some of the biggest increases in crowding scores since the end of Q1 2023. BIPC, BIP, PEG, POR also saw relatively large increases.

The stocks that became less crowded are names with M&A risk and power price exposure. Stocks that saw some of the largest decreases in crowding scores since the end of Q1 2023 include UTL, PNM, AMPS, PNW, CMS, and ES.

Figure 4. Changes in Crowding (3/2023 - 5/2023)



© 2023 Citigroup Inc. No redistribution without Citigroup's written permission.

Source: Citi Research

Similar trends in crowding from recent weeks also apply from late 2022. GNE, AWK, PCG, PNW, and POR have some of the biggest increases in crowding scores since the end of Q4 2022. Stocks that saw some of the largest decreases in crowding scores since the end of Q3 2022 include SJW, BEPC, PNM, NFG, BKH, and ES.

Prepared for Michael Weisenburger

Short Interest

NOVA continues to have the highest short interest in the utility's universe, followed by POR, NRG, ORA, AGR, AMPS, and BIPC. The lower power curves and changing power development market has weighed on several of these stocks.

Figure 6. Short Interest - % of Float (5/22/2023)

Appendix A-1

ANALYST CERTIFICATION

The research analysts primarily responsible for the preparation and content of this research report are either (i) designated by "AC" in the author block or (ii) listed in bold alongside content which is attributable to that analyst. If multiple AC analysts are designated in the author block, each analyst is certifying with respect to the entire research report other than (a) content attributable to another AC certifying analyst listed in bold alongside the content and (b) views expressed solely with respect to a specific issuer which are attributable to another AC certifying analyst identified in the price charts or rating history tables for that issuer shown below. Each of these analysts certify, with respect to the sections of the report for which they are responsible: (1) that the views expressed therein accurately reflect their personal views about each issuer and security referenced and were prepared in an independent manner, including with respect to Citigroup Global Markets Inc. and its affiliates; and (2) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in this report.

IMPORTANT DISCLOSURES

The Firm has made a market in the publicly traded equity securities of Sempra on at least one occasion since 1 Jan 2022.

Due to Citi's involvement as advisor to NRG Energy Inc. (the company) in its acquisition of Direct Energy LP, a wholly owned subsidiary of Centrica PLC, Citi Research restricted publication of new research reports, and suspended its rating and target price on 24 July, 2020 (the Suspension Date). Please note that the Company price chart that appears in this report and available on Citi Research's disclosure website does not reflect that Citi did not have a rating or target price between the Suspension Date and 03 Feb, 2021 when Citi Research resumed full coverage.

Citi Research suspended its rating and target price on December 17, 2019. Please note that the Company price chart that appears in this report and available on Citi Research's disclosure website does not reflect that Citi Research did not have a rating or target price between the Suspension Date and June 17, 2020 when Citi Research resumed full coverage.

Citigroup Global Markets Inc. or its affiliates has a net short position of 0.5% or more of any class of common equity securities of PPL Corp.

Within the past 12 months, Citigroup Global Markets Inc. or its affiliates has acted as manager or co-manager of an offering of securities of NRG, Altus Power Inc.

Citigroup Global Markets Inc. owns a position of 1 million USD or more in the debt securities of CenterPoint Energy Inc, Sempra Energy, NRG, Avangrid, Inc., NiSource Inc, DTE Energy Co, PPL Corp.

Citigroup Global Markets Inc. or its affiliates has received compensation for investment banking services provided within the past 12 months from CenterPoint Energy Inc, Sempra Energy, NRG, Avangrid, Inc., Brookfield Infrastructure Partners, Altus Power Inc, NiSource Inc, DTE Energy Co, PPL Corp.

Citigroup Global Markets Inc. or its affiliates expects to receive or intends to seek, within the next three months, compensation for investment banking services from Sempra Energy, Avangrid, Inc., Brookfield Infrastructure Partners.

Citigroup Global Markets Inc. or its affiliates received compensation for products and services other than investment banking services from CenterPoint Energy Inc, Sempra Energy, NRG, Avangrid, Inc., Brookfield Infrastructure Partners, Altus Power Inc, NiSource Inc, DTE Energy Co, PPL Corp in the past 12 months.

Citigroup Global Markets Inc. or its affiliates currently has, or had within the past 12 months, the following as clients, and the services provided were non-investment-banking, non-securities-related: CenterPoint Energy Inc, Sempra Energy, NRG, Avangrid, Inc., Brookfield Infrastructure Partners, Altus Power Inc, NiSource Inc, DTE Energy Co, PPL Corp.

Citigroup Global Markets Inc. and/or its affiliates has a significant financial interest in relation to CenterPoint Energy Inc, Sempra Energy, NRG, Avangrid, Inc., Brookfield Infrastructure Partners, DTE Energy Co. (For an explanation of the determination of significant financial interest, please refer to the policy for managing conflicts of interest which can be found at www.citiVelocity.com.)

Analysts' compensation is determined by Citi Research management and Citigroup's senior management and is based upon activities and services intended to benefit the investor clients of Citigroup Global Markets Inc. and its affiliates (the "Firm"). Compensation is not linked to specific transactions or recommendations. Like all Firm employees, analysts receive compensation that is impacted by overall Firm profitability which includes investment banking, sales and trading, and principal trading revenues. One factor in equity research analyst compensation is arranging corporate access events between institutional clients and the management teams of covered companies. Typically, company management is more likely to participate when the analyst has a positive view of the company.

For financial instruments recommended in the Product in which the Firm is not a market maker, the Firm is a liquidity provider in such financial instruments (and any underlying instruments) and may act as principal in connection with transactions in such instruments. The Firm is a regular issuer of traded financial instruments linked to securities that may have been recommended in the Product. The Firm regularly trades in the securities of the issuer(s) discussed in the Product. The Firm may engage in securities transactions in a manner inconsistent with the Product and, with respect to securities covered by the Product, will buy or sell from customers on a principal basis.

The Firm is a market maker in the publicly traded equity securities of Sempra Energy.

Prepared for Michael Weisenburger

Unless stated otherwise neither the Research Analyst nor any member of their team has viewed the material operations of the Companies for which an investment view has been provided within the past 12 months.

Within the previous 12 months, Ryan Levine, Analyst, and/or members of their team have viewed the material operations of Sempra Energy and were not reimbursed by the company for expenses associated with the visit.

Within the previous 12 months, Xinru Yin, Associate, and/or members of their team have viewed the material operations of Sempra Energy and were not reimbursed by the company for expenses associated with the visit.

For important disclosures (including copies of historical disclosures) regarding the companies that are the subject of this Citi Research product ("the Product"), please contact Citi Research, 388 Greenwich Street, 6th Floor, New York, NY, 10013, Attention: Legal/Compliance [E6WYB6412478]. In addition, the same important disclosures, with the exception of the Valuation and Risk assessments and historical disclosures, are contained on the Firm's disclosure website at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures. Valuation and Risk assessments can be found in the text of the most recent research note/report regarding the subject company. Pursuant to the Market Abuse Regulation a history of all Citi Research recommendations published during the preceding 12-month period can be accessed via Citi Velocity (https://www.citivelocity.com/cv2) or your standard distribution portal. Historical disclosures (for up to the past three years) will be provided upon request.

Citi Research Equity Ratings Distribution

	12 Month Rating			Catalyst Watch		
Data current as of 31 Mar 2023	**Buy**	**Hold**	**Sell**	**Buy**	**Hold**	**Sell**
Citi Research Global Fundamental Coverage (Neutral=Hold)	56%	34%	9%	30%	57%	13%
% of companies in each rating category that are investment banking clients	59%	65%	53%	67%	56%	62%

Guide to Citi Research Fundamental Research Investment Ratings:

Citi Research stock recommendations include an investment rating and an optional risk rating to highlight high risk stocks.

Risk rating takes into account both price volatility and fundamental criteria. Stocks will either have no risk rating or a High risk rating assigned.

Investment Ratings: Citi Research investment ratings are Buy, Neutral and Sell. Our ratings are a function of analyst expectations of expected total return ("ETR") and risk. ETR is the sum of the forecast price appreciation (or depreciation) plus the dividend yield for a stock within the next 12 months. The target price is based on a 12 month time horizon. The Investment rating definitions are: Buy (1) ETR of 15% or more or 25% or more for High risk stocks; and Sell (3) for negative ETR. Any covered stock not assigned a Buy or a Sell is a Neutral (2). For stocks rated Neutral (2), if an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of Citi Research management not to assign a target price and, thus, not derive an ETR. Citi Research may suspend its rating and target price and assign “Rating Suspended” status for regulatory and/or internal policy reasons. Citi Research may also suspend its rating and target price and assign "Under Review" status for other exceptional circumstances (e.g. lack of information critical to the analyst's thesis, trading suspension) affecting the company and/or trading in the company's securities. In both such situations, the rating and target price will show as “—“ and “-“ respectively in the rating history price chart. Prior to 11 April 2022 Citi Research assigned “Under Review” status to both situations and prior to 11 Nov 2020 only in exceptional circumstances. As soon as practically possible, the analyst will publish a note re-establishing a rating and investment thesis. Investment ratings are determined by the ranges described above at the time of initiation of coverage, a change in investment and/or risk rating, or a change in target price (subject to limited management discretion). At times, the expected total returns may fall outside of these ranges because of market price movements and/or other short-term volatility or trading patterns. Such interim deviations will be permitted but will become subject to review by Research Management. Your decision to buy or sell a security should be based upon your personal investment objectives and should be made only after evaluating the stock's expected performance and risk.

Catalyst Watch Upside/Downside calls:

Citi Research may also include a Catalyst Watch Upside or Downside call to highlight specific near-term catalysts or events impacting the company or the market that are expected to influence the share price over a specified period of 30 or 90 days. A Catalyst Watch Upside (Downside) call indicates that the analyst expects the share price to rise (fall) in absolute terms over the specified period. A Catalyst Watch Upside/Downside call will automatically expire at the end of the specified 30/90 day period (or earlier if the investment rating of the company is assigned Rating Suspended or Under Review status); the analyst may also close a Catalyst Watch call prior to the end of the specified period in a published research note. A Catalyst Watch Upside or Downside call may be different from and does not affect a stock's fundamental equity rating, which reflects a longer-term total absolute return expectation. For purposes of FINRA ratings[1]distribution-disclosure rules, a Catalyst Watch Upside call corresponds to a buy recommendation and a Catalyst Watch Downside call corresponds to a sell recommendation. Any stock not assigned to a Catalyst Watch Upside or Catalyst Watch Downside call is considered Catalyst Watch Non-Rated (CWNR). For purposes of FINRA ratings-distribution-disclosure rules, we correspond CWNR to Hold in our ratings distribution table for our Catalyst Watch Upside/Downside rating system. However, we reiterate that we do not consider CWNR to be a recommendation. For all Catalyst Watch Upside/Downside calls, risk exists that the catalyst(s) and associated share-price movement will not materialize as expected.

RESEARCH ANALYST AFFILIATIONS / NON-US RESEARCH ANALYST DISCLOSURES

The legal entities employing the authors of this report are listed below (and their regulators are listed further herein). Non-US research analysts who have prepared this report (i.e., all research analysts listed below other than those identified as employed by Citigroup Global Markets Inc.) are not registered/qualified as research analysts with FINRA. Such research analysts may not be associated persons of the member organization (but are employed by an affiliate of the member organization) and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Citigroup Global Markets Inc.	Ryan Levine; Xinru Yin

OTHER DISCLOSURES

Any price(s) of instruments mentioned in recommendations are as of the prior day’s market close on the primary market for the instrument, unless otherwise stated.

The completion and first dissemination of any recommendations made within this research report are as of the Eastern date-time displayed at the top of the Product. If the Product references views of other analysts then please refer to the price chart or rating history table for the date/time of completion and first dissemination with respect to that view.

Regulations in various jurisdictions require that where a recommendation differs from any of the author’s previous recommendations concerning the same financial instrument or issuer that has been published during the preceding 12-month period that the change(s) and the date of that previous

Prepared for Michael Weisenburger

recommendation are indicated. For fundamental coverage please refer to the price chart or rating change history within this disclosure appendix or the issuer disclosure summary at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

Citi Research has implemented policies for identifying, considering and managing potential conflicts of interest arising as a result of publication or distribution of investment research. A description of these policies can be found at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

The proportion of all Citi Research research recommendations that were the equivalent to "Buy","Hold","Sell" at the end of each quarter over the prior 12 months (with the % of these that had received investment firm services from Citi in the prior 12 months shown in brackets) is as follows: Q1 2023 Buy 33% (65%), Hold 43% (55%), Sell 23% (51%), RV 0.5% (86%); Q4 2022 Buy 33% (64%), Hold 43% (55%), Sell 23% (51%), RV 0.6% (91%); Q3 2022 Buy 33% (65%), Hold 43% (55%), Sell 23% (49%), RV 0.5% (89%); Q2 2022 Buy 33% (66%), Hold 43% (55%), Sell 23% (50%), RV 0.6% (88%). For the purposes of disclosing recommendations other than for equity (whose definitions can be found in the corresponding disclosure sections), "Buy" means a positive directional trade idea; "Sell" means a negative directional trade idea; and "Relative Value" means any trade idea which does not have a clear direction to the investment strategy.

European regulations require a 5 year price history when past performance of a security is referenced. CitiVelocity's Charting Tool (https://www.citivelocity.com/cv2/#go/CHARTING_3_Equities) provides the facility to create customisable price charts including a five year option. This tool can be found in the Data & Analytics section under any of the asset class menus in CitiVelocity (https://www.citivelocity.com/). For further information contact CitiVelocity support (https://www.citivelocity.com/cv2/go/CLIENT_SUPPORT). The source for all referenced prices, unless otherwise stated, is DataCentral, which sources price information from Thomson Reuters. Past performance is not a guarantee or reliable indicator of future results. Forecasts are not a guarantee or reliable indicator of future performance.

Investors should always consider the investment objectives, risks, and charges and expenses of an ETF carefully before investing. The applicable prospectus and key investor information document (as applicable) for an ETF should contain this and other information about such ETF. It is important to read carefully any such prospectus before investing. Clients may obtain prospectuses and key investor information documents for ETFs from the applicable distributor or authorized participant, the exchange upon which an ETF is listed and/or from the applicable website of the applicable ETF issuer. The value of the investments and any accruing income may fall or rise. Any past performance, prediction or forecast is not indicative of future or likely performance. Any information on ETFs contained herein is provided strictly for illustrative purposes and should not be deemed an offer to sell or a solicitation of an offer to purchase units of any ETF either explicitly or implicitly. The opinions expressed are those of the authors and do not necessarily reflect the views of ETF issuers, any of their agents or their affiliates.

Citigroup Global Markets India Private Limited and/or its affiliates may have, from time to time, actual or beneficial ownership of 1% or more in the debt securities of the subject issuer.

Please be advised that pursuant to Executive Order 13959 as amended (the "Order"), U.S. persons are prohibited from investing in securities of any company determined by the United States Government to be the subject of the Order. This research is not intended to be used or relied upon in any way that could result in a violation of the Order. Investors are encouraged to rely upon their own legal counsel for advice on compliance with the Order and other economic sanctions programs administered and enforced by the Office of Foreign Assets Control of the U.S. Treasury Department.

This communication is directed at persons who are "Eligible Clients" as such term is defined in the Israeli Regulation of Investment Advice, Investment Marketing and Investment Portfolio Management law, 1995 (the "Advisory Law"). Within Israel, this communication is not intended for retail clients and Citi will not make such products or transactions available to retail clients. The presenter is not licensed as investment advisor or marketer by the Israeli Securities Authority ("ISA") and this communication does not constitute investment or marketing advice. The information contained herein may relate to matters that are not regulated by the ISA. Any securities which are the subject of this communication may not be offered or sold to any Israeli person except pursuant to an exemption from the Israeli public offering rules, including according to the Israeli Securities Law.

Citi Research generally disseminates its research to the Firm's global institutional and retail clients via both proprietary (e.g., Citi Velocity and Citi Personal Wealth Management) and non-proprietary electronic distribution platforms. Certain research may be disseminated only via the Firm's proprietary distribution platforms; however such research will not contain changes to earnings forecasts, target price, investment or risk rating or investment thesis or be otherwise inconsistent with the author's previously published research. Certain research is made available only to institutional investors to satisfy regulatory requirements. Individual Citi Research analysts may also opt to circulate published research to one or more clients by email; such email distribution is discretionary and is done only after the research has been disseminated. The level and types of services provided by Citi Research analysts to clients may vary depending on various factors such as the client's individual preferences as to the frequency and manner of receiving communications from analysts, the client's risk profile and investment focus and perspective (e.g. market-wide, sector specific, long term, short-term etc.), the size and scope of the overall client relationship with the Firm and legal and regulatory constraints.

Pursuant to Comissão de Valores Mobiliários Resolução 20 and ASIC Regulatory Guide 264, Citi is required to disclose whether a Citi related company or business has a commercial relationship with the subject company. Considering that Citi operates multiple businesses in more than 100 countries around the world, it is likely that Citi has a commercial relationship with the subject company.

Disclosure for investors in the Republic of Turkey: Under Capital Markets Law of Turkey (Law No: 6362), the investment information, comments and recommendations stated here, are not within the scope of investment advisory activity. Investment advisory service is provided in accordance with a contract of engagement on investment advisory concluded between brokerage houses, portfolio management companies, non-deposit banks and clients. Comments and recommendations stated here rely on the individual opinions of the ones providing these comments and recommendations. These opinions may not fit to your financial status, risk and return preferences. For this reason, to make an investment decision by relying solely to this information stated here may not bring about outcomes that fit your expectations. Furthermore, Citi Research is a division of Citigroup Global Markets Inc. (the "Firm"), which does and seeks to do business with companies and/or trades on securities covered in this research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report, however investors should also note that the Firm has in place organisational and administrative arrangements to manage potential conflicts of interest of this nature.

Securities recommended, offered, or sold by the Firm: (i) are not insured by the Federal Deposit Insurance Corporation; (ii) are not deposits or other obligations of any insured depository institution (including Citibank); and (iii) are subject to investment risks, including the possible loss of the principal amount invested. The Product is for informational purposes only and is not intended as an offer or solicitation for the purchase or sale of a security. Any decision to purchase securities mentioned in the Product must take into account existing public information on such security or any registered prospectus. Although information has been obtained from and is based upon sources that the Firm believes to be reliable, we do not guarantee its accuracy and it may be incomplete and condensed. Note, however, that the Firm has taken all reasonable steps to determine the accuracy and completeness of the disclosures

Prepared for Michael Weisenburger

made in the Important Disclosures section of the Product. The Firm's research department has received assistance from the subject company(ies) referred to in this Product including, but not limited to, discussions with management of the subject company(ies). Firm policy prohibits research analysts from sending draft research to subject companies. However, it should be presumed that the author of the Product has had discussions with the subject company to ensure factual accuracy prior to publication. Statements and views concerning ESG (environmental, social, governance) factors are typically based upon public statements made by the affected company or other public news, which the author may not have independently verified. ESG factors are one consideration that investors may choose to examine when making investment decisions. All opinions, projections and estimates constitute the judgment of the author as of the date of the Product and these, plus any other information contained in the Product, are subject to change without notice. Prices and availability of financial instruments also are subject to change without notice. Notwithstanding other departments within the Firm advising the companies discussed in this Product, information obtained in such role is not used in the preparation of the Product. Although Citi Research does not set a predetermined frequency for publication, if the Product is a fundamental equity or credit research report, it is the intention of Citi Research to provide research coverage of the covered issuers, including in response to news affecting the issuer. For non-fundamental research reports, Citi Research may not provide regular updates to the views, recommendations and facts included in the reports. Notwithstanding that Citi Research maintains coverage on, makes recommendations concerning or discusses issuers, Citi Research may be periodically restricted from referencing certain issuers due to legal or policy reasons. Where a component of a published trade idea is subject to a restriction, the trade idea will be removed from any list of open trade ideas included in the Product. Upon the lifting of the restriction, the trade idea will either be re-instated in the open trade ideas list if the analyst continues to support it or it will be officially closed. Citi Research may provide different research products and services to different classes of customers (for example, based upon long-term or short-term investment horizons) that may lead to differing conclusions or recommendations that could impact the price of a security contrary to the recommendations in the alternative research product, provided that each is consistent with the rating system for each respective product.

Investing in non-U.S. securities, including ADRs, may entail certain risks. The securities of non-U.S. issuers may not be registered with, nor be subject to the reporting requirements of the U.S. Securities and Exchange Commission. There may be limited information available on foreign securities. Foreign companies are generally not subject to uniform audit and reporting standards, practices and requirements comparable to those in the U.S. Securities of some foreign companies may be less liquid and their prices more volatile than securities of comparable U.S. companies. In addition, exchange rate movements may have an adverse effect on the value of an investment in a foreign stock and its corresponding dividend payment for U.S. investors. Net dividends to ADR investors are estimated, using withholding tax rates conventions, deemed accurate, but investors are urged to consult their tax advisor for exact dividend computations. Investors who have received the Product from the Firm may be prohibited in certain states or other jurisdictions from purchasing securities mentioned in the Product from the Firm. Please ask your Financial Consultant for additional details. Citigroup Global Markets Inc. takes responsibility for the Product in the United States. Any orders by US investors resulting from the information contained in the Product may be placed only through Citigroup Global Markets Inc.

Important Disclosures for Bell Potter Customers: Bell Potter is making this Product available to its clients pursuant to an agreement with Citigroup Global Markets Australia Pty Limited. Neither Citigroup Global Markets Australia Pty Limited nor any of its affiliates has made any determination as to the suitability of the information provided herein and clients should consult with their Bell Potter financial advisor before making any investment decision.

solicitation for the purchase or sale of a security or financial products. Any decision to purchase securities or financial products mentioned in the Product must take into account existing public information on such security or the financial products or any registered prospectus.

The Product is made available in **Thailand** through Citicorp Securities (Thailand) Ltd., which is regulated by the Securities and Exchange Commission of Thailand. 399 Interchange 21 Building, 18th Floor, Sukhumvit Road, Klongtoey Nua, Wattana ,Bangkok 10110, Thailand.

The Product is made available in **Turkey** through Citibank AS which is regulated by Capital Markets Board. Tekfen Tower, Eski Buyukdere Caddesi # 209 Kat 2B, 23294 Levent, Istanbul, Turkey.

In the **U.A.E**, these materials (the "Materials") are communicated by Citigroup Global Markets Limited, DIFC branch ("CGML"), an entity registered in the Dubai International Financial Center ("DIFC") and licensed and regulated by the Dubai Financial Services Authority ("DFSA") to Professional Clients and Market Counterparties only and should not be relied upon or distributed to Retail Clients. A distribution of the different Citi Research ratings distribution, in percentage terms for Investments in each sector covered is made available on request. Financial products and/or services to which the Materials relate will only be made available to Professional Clients and Market Counterparties.

The Product is made available in **United Kingdom** by Citigroup Global Markets Limited, which is authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA. This material may relate to investments or services of a person outside of the UK or to other matters which are not authorised by the PRA nor regulated by the FCA and the PRA and further details as to where this may be the case are available upon request in respect of this material. Citigroup Centre, Canada Square, Canary Wharf, London, E14 5LB.

The Product is made available in **United States** by Citigroup Global Markets Inc., which is a member of FINRA and registered with the US Securities and Exchange Commission. 388 Greenwich Street, New York, NY 10013.

Unless specified to the contrary, within EU Member States, the Product is made available by Citigroup Global Markets Europe AG ("CGME"), which is regulated by the European Central Bank and the German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht-BaFin).

The Product is not to be construed as providing investment services in any jurisdiction where the provision of such services would not be permitted.
Subject to the nature and contents of the Product, the investments described therein are subject to fluctuations in price and/or value and investors may get back less than originally invested. Certain high-volatility investments can be subject to sudden and large falls in value that could equal or exceed the amount invested.The yield and average life of CMOs (collateralized mortgage obligations) referenced in this Product will fluctuate depending on the actual rate at which mortgage holders prepay the mortgages underlying the CMO and changes in current interest rates. Any government agency backing of the CMO applies only to the face value of the CMO and not to any premium paid. Certain investments contained in the Product may have tax implications for private customers whereby levels and basis of taxation may be subject to change. If in doubt, investors should seek advice from a tax adviser. The Product does not purport to identify the nature of the specific market or other risks associated with a particular transaction. Advice in the Product is general and should not be construed as personal advice given it has been prepared without taking account of the objectives, financial situation or needs of any particular investor. Accordingly, investors should, before acting on the advice, consider the appropriateness of the advice, having regard to their objectives, financial situation and needs. Prior to acquiring any financial product, it is the client's responsibility to obtain the relevant offer document for the product and consider it before making a decision as to whether to purchase the product.
Citi Research product may source data from dataCentral. dataCentral is a Citi Research proprietary database, which includes the Firm's estimates, data from company reports and feeds from Thomson Reuters. The source for all referenced prices, unless otherwise stated, is DataCentral. Past performance is not a guarantee or reliable indicator of future results. Forecasts are not a guarantee or reliable indicator of future performance. The printed and printable version of the research report may not include all the information (e.g. certain financial summary information and comparable company data) that is linked to the online version available on the Firm's proprietary electronic distribution platforms.

Card Insights. Where this report references Card Insights data, Card Insights consists of selected data from a subset of Citi's proprietary credit card transactions. Such data has undergone rigorous security protocols to keep all customer information confidential and secure; the data is highly aggregated and anonymized so that all unique customer identifiable information is removed from the data prior to receipt by the report's author or distribution to external parties. This data should be considered in the context of other economic indicators and publicly available information. Further, the selected data represents only a subset of Citi's proprietary credit card transactions due to the selection methodology or other limitations and should not be considered as indicative or predictive of the past or future financial performance of Citi or its credit card business.

Favorable NIPSCO Deal Price; IURC Settlement Approval Increasingly Likely

CITI'S TAKE

We think today's NIPSCO sale announcement is attractive given the 32.5x LTM P/E and 1.85x rate base multiples, and the merger document language on the IURC settlement was generally constructive, but we note that the $250M equity commitment over 3 years implies $1B of NIPSCO funding needs from NiSource (may come from operating activities). Given the delays we have witnessed for other utility processes YTD, in our view, it is a positive sign around the quality of NIPSCO that this deal was announced at a healthy valuation.

News: NIPSCO announced the 19.9% sale at $10.8B equity value and enterprise value of $14.3B, which is expected by the end of 2023. As part of the transaction, Blackstone is committed to funding its pro rata share of ongoing capital requirements, which is supported by a $250 million equity commitment letter. This deal was quicker than expected and the headline P/E multiple multiple of 32.5x LTM P/E and 1.85x rate base multiples look attractive given non-control stakes.

Commitment Letter, Potential Future Equity Needs?: Blackstone's $250M equity commitment over the next 3 years implies that the business will need about $1.25B of "maintenance" equity to fund NIPSCO over this time period. NiSource continues to indicate it does not need external equity until at least 2025 as the company can utilize internally generated capital to meet its short-term capital needs. In 2025 and beyond, the financing plan may evolve. We note that NiSource hired new operating executive(s) that could help develop new investment opportunities and drive upside to plan (both capex, and funding needs).

Merger Agreement Language Supportive of IURC Settlement: Our view of the disclosed commentary and likely investor diligence is positive formal update on the process. "Neither Parent nor any of its Affiliates has received written notice or any other affirmative indication that the Indiana Utility Regulatory Commission (the "IURC") will not approve that certain March 10, 2023 Settlement Agreement (the "Settlement Agreement") by and between NIPSCO and NIPSCO Industrial Group; NLMK Indiana; United States Steel Corporation; Walmart Inc.; RV Industry User's Group; and the Indiana Office of Utility Consumer Counselor (collectively, the "Settling Parties" and each, a "Settling Party") consistent with the terms provided for in the Settlement Agreement and to the Knowledge of Company, there are not currently any facts or circumstances that would reasonably be expected to cause the IURC not to approve such Settlement Agreement in its entirety without modification of material condition deemed unacceptable to any Settling Party. "

NiSource Inc

Valuation

We average multiple valuation methodologies to derive our $30 target price. Our NAV yields a value of $32. We value regulated assets at a multiple of 1.5x rate base. These values are partially offset by the company's net debt. Our DDM, which incorporates our rate base growth assumptions, values the company at $30 per share. Our P/E and EV/EBITDA analyses yield values of $32 and $29, respectively.

Risks

The key risks to our investment thesis are as follows: (1) Rate Cases – We estimate the company will receive rate relief at several of its utilities. Under- or over-estimation of relief could materially impact our estimates. (2) Weather – Changes in weather impact the stability of earnings. (3) Capital Investment Recovery — NI spends a substantial amount of capital to maintain and expand its distribution system. NI depends on rate increases from public utility commission to earn a fair return on this expansion. (4) Capital Markets — Access to cheap capital markets could be limited due to the size of the company. If the impact on the company from any of these factors proves to be greater/less than we anticipate, it may prevent the stock from achieving our target price or could cause the stock price to materially under/outperform our target.

US Diversified Utilities

Thoughts into Q1, Ugly Prints, but Fundamentals Improving

CITI'S TAKE

We are more positive on SRE, NI, and PCG on prints but more concerned about AEP, DUK, and CMS. Expect weather, M&A, financing, and costs in focus.

Ryan Levine [AC]

Xinru Yin

Poor Weather — As we walked through Q1 previews with most of our coverage, CMS, AEP (link), and NOVA stuck out on the negative, given mild winter weather and weak seasonality for NOVA's generation portfolio (only ~10% in Q1). Nisource adjusts its weather in EPS, so less of a headwind. These dynamics point to the positive for Sempra (link) higher Cameron volumes, LNG cargo divergence, and Mexico/US gas arb, and PCG (weather allows memo account for large storm costs, so cost saving from an EPS print standpoint). AES restructured contracts to have less TTF/HH exposure (new segments and disclosure on EPS/FFO adds near term risk).

Operational Improvement Focus — With weather and other factors driving weak expected Q1 prints, we expect the utilities to look for ways to improve EPS numbers in the rest of the year which could emphasize more aggressive operational improvements, pushing costs in 2024, and managing deferred gas costs/etc.

Evolving Financing Markets – Converts Hot for Utilities/Power: We witnessed Ormat (link), PPL(link), Duke(link), and 3 others raise convertible notes in the last few months. These deals termed out CP balances and other financing gaps, while helping 2023 EPS given the lower interest rates, but lead to modest potential dilution or cash outflow in the future. The feedback we receive from convert investors is the window is open now for issuers but may not last that long. Companies that investors debate if they will issue converts include NiSource, AEP, Sempra, Edison, and Eversource.

Slowing M&A — With choppy M&A markets and prolonged legal/regulatory processes, we already witnessed PNM merger extension to July 20th and AEP Kentucky deal scrapped, but we expect more delays to come with earnings release. We are concerned about Duke's renewable sale timeline given public peer multiples contracting and think LDC sales may be more attractive (link). We have a positive catalyst watch for MDU into the Knife River spin. We also expect that AEP decides to start a process to sell its retail business in the coming weeks given Kentucky. We also are optimistic that Ormat will look at buying a merchant power portfolio (link).

Supply Chain Starting to Normalize — During our calls, the companies indicated that the supply chain started to ease in March around supplies for transformers and other key inputs. As excitement around permitting reform in Washington starts to pick up again, supply chain improvement helps. We have an expert event on T&D and policy outlook scheduled post earnings on May 31st at 10am. Ping us for details.

Tapping Government Capital — As ratepayer bills start to normalize with gas, we see the utilities/power markets finding ways to access lower cost governments funds, from IIJA and IRA to push energy transition (NOVA made headline, but more to come).

Upcoming Citi Energy/Utility Conference – May 9-10th, Boston — Great lineup with 1x1 meetings available for the utility and energy space.

See Appendix A-1 for Analyst Certification, Important Disclosures and Research Analyst Affiliations.

Appendix A-1

ANALYST CERTIFICATION

The research analysts primarily responsible for the preparation and content of this research report are either (i) designated by "AC" in the author block or (ii) listed in bold alongside content which is attributable to that analyst. If multiple AC analysts are designated in the author block, each analyst is certifying with respect to the entire research report other than (a) content attributable to another AC certifying analyst listed in bold alongside the content and (b) views expressed solely with respect to a specific issuer which are attributable to another AC certifying analyst identified in the price charts or rating history tables for that issuer shown below. Each of these analysts certify, with respect to the sections of the report for which they are responsible: (1) that the views expressed therein accurately reflect their personal views about each issuer and security referenced and were prepared in an independent manner, including with respect to Citigroup Global Markets Inc. and its affiliates; and (2) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in this report.

IMPORTANT DISCLOSURES

The Firm has made a market in the publicly traded equity securities of Sempra Energy on at least one occasion since 1 Jan 2022. Citi is advising Sempra Energy on a pending M&A.

Citi is advising American Electric Power Company Inc on a pending M&A with IRG Acquisition Holdings. The Firm has made a market in the publicly traded equity securities of American Electric Power Company Inc on at least one occasion since 1 Jan 2022.

Citigroup Global Markets Inc. or its affiliates has a net short position of 0.5% or more of any class of common equity securities of Duke Energy, PPL Corp.

Within the past 12 months, Citigroup Global Markets Inc. or its affiliates has acted as manager or co-manager of an offering of securities of Duke Energy, PG&E Corp, Ormat Technologies, Inc., Sunnova Energy International Inc.

Citigroup Global Markets Inc. owns a position of 1 million USD or more in the debt securities of The AES Corp, Sempra Energy, Duke Energy, American Electric Power Co Inc, NiSource Inc, PG&E Corp, PPL Corp.

Citigroup Global Markets Inc. or its affiliates has received compensation for investment banking services provided within the past 12 months from The AES Corp, Sempra Energy, Duke Energy, CMS Energy Corporation, American Electric Power Co Inc, NiSource Inc, PG&E Corp, PPL Corp, Ormat Technologies, Inc., Sunnova Energy International Inc.

Citigroup Global Markets Inc. or its affiliates expects to receive or intends to seek, within the next three months, compensation for investment banking services from The AES Corp, Sempra Energy, American Electric Power Co Inc.

Citigroup Global Markets Inc. or its affiliates received compensation for products and services other than investment banking services from The AES Corp, Sempra Energy, Duke Energy, CMS Energy Corporation, American Electric Power Co Inc, NiSource Inc, PG&E Corp, PPL Corp, Ormat Technologies, Inc. in the past 12 months.

Citigroup Global Markets Inc. or its affiliates currently has, or had within the past 12 months, the following as investment banking client(s): The AES Corp, Sempra Energy, Duke Energy, CMS Energy Corporation, American Electric Power Co Inc, NiSource Inc, PG&E Corp, PPL Corp, Ormat Technologies, Inc., Sunnova Energy International Inc.

Citigroup Global Markets Inc. or its affiliates currently has, or had within the past 12 months, the following as clients, and the services provided were non-investment-banking, securities-related: The AES Corp, Sempra Energy, Duke Energy, CMS Energy Corporation, American Electric Power Co Inc, NiSource Inc, PG&E Corp, PPL Corp, Ormat Technologies, Inc..

Citigroup Global Markets Inc. or its affiliates currently has, or had within the past 12 months, the following as clients, and the services provided were non-investment-banking, non-securities-related: The AES Corp, Sempra Energy, Duke Energy, CMS Energy Corporation, American Electric Power Co Inc, NiSource Inc, PG&E Corp, PPL Corp, Ormat Technologies, Inc..

Citigroup Global Markets Inc. and/or its affiliates has a significant financial interest in relation to The AES Corp, Sempra Energy, Duke Energy, CMS Energy Corporation, American Electric Power Co Inc, PG&E Corp. (For an explanation of the determination of significant financial interest, please refer to the policy for managing conflicts of interest which can be found at www.citiVelocity.com.)

Analysts' compensation is determined by Citi Research management and Citigroup's senior management and is based upon activities and services intended to benefit the investor clients of Citigroup Global Markets Inc. and its affiliates (the "Firm"). Compensation is not linked to specific transactions or recommendations. Like all Firm employees, analysts receive compensation that is impacted by overall Firm profitability which includes investment banking, sales and trading, and principal trading revenues. One factor in equity research analyst compensation is arranging corporate access events between institutional clients and the management teams of covered companies. Typically, company management is more likely to participate when the analyst has a positive view of the company.

For financial instruments recommended in the Product in which the Firm is not a market maker, the Firm is a liquidity provider in such financial instruments (and any underlying instruments) and may act as principal in connection with transactions in such instruments. The Firm is a regular issuer of traded financial instruments linked to securities that may have been recommended in the Product. The Firm regularly trades in the securities of the issuer(s) discussed in the Product. The Firm may engage in securities transactions in a manner inconsistent with the Product and, with respect to securities covered by the Product, will buy or sell from customers on a principal basis.

The Firm is a market maker in the publicly traded equity securities of Sempra Energy, American Electric Power Co Inc.

Unless stated otherwise neither the Research Analyst nor any member of their team has viewed the material operations of the Companies for which an investment view has been provided within the past 12 months.

Prepared for Michael Weisenburger

Within the previous 12 months, Ryan Levine, Analyst, and/or members of their team have viewed the material operations of PG&E Corp,MDU Resources Group Inc,The AES Corp,Sunnova Energy International Inc,Sempra Energy and were not reimbursed by the company for expenses associated with the visit.

Within the previous 12 months, Xinru Yin, Associate, and/or members of their team have viewed the material operations of Sempra Energy and were not reimbursed by the company for expenses associated with the visit.

For important disclosures (including copies of historical disclosures) regarding the companies that are the subject of this Citi Research product ("the Product"), please contact Citi Research, 388 Greenwich Street, 6th Floor, New York, NY, 10013, Attention: Legal/Compliance [E6WYB6412478]. In addition, the same important disclosures, with the exception of the Valuation and Risk assessments and historical disclosures, are contained on the Firm's disclosure website at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures. Valuation and Risk assessments can be found in the text of the most recent research note/report regarding the subject company. Pursuant to the Market Abuse Regulation a history of all Citi Research recommendations published during the preceding 12-month period can be accessed via Citi Velocity (https://www.citivelocity.com/cv2) or your standard distribution portal. Historical disclosures (for up to the past three years) will be provided upon request.

Citi Research Equity Ratings Distribution

	12 Month Rating			Catalyst Watch		
Data current as of 31 Mar 2023	**Buy**	**Hold**	**Sell**	**Buy**	**Hold**	**Sell**
Citi Research Global Fundamental Coverage (Neutral=Hold)	56%	34%	9%	30%	57%	13%
% of companies in each rating category that are investment banking clients	59%	65%	53%	67%	56%	62%

Guide to Citi Research Fundamental Research Investment Ratings:
Citi Research stock recommendations include an investment rating and an optional risk rating to highlight high risk stocks.
Risk rating takes into account both price volatility and fundamental criteria. Stocks will either have no risk rating or a High risk rating assigned.
Investment Ratings: Citi Research investment ratings are Buy, Neutral and Sell. Our ratings are a function of analyst expectations of expected total return ("ETR") and risk. ETR is the sum of the forecast price appreciation (or depreciation) plus the dividend yield for a stock within the next 12 months. The target price is based on a 12 month time horizon. The Investment rating definitions are: Buy (1) ETR of 15% or more or 25% or more for High risk stocks; and Sell (3) for negative ETR. Any covered stock not assigned a Buy or a Sell is a Neutral (2). For stocks rated Neutral (2), if an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of Citi Research management not to assign a target price and, thus, not derive an ETR. Citi Research may suspend its rating and target price and assign "Rating Suspended" status for regulatory and/or internal policy reasons. Citi Research may also suspend its rating and target price and assign "Under Review" status for other exceptional circumstances (e.g. lack of information critical to the analyst's thesis, trading suspension) affecting the company and/or trading in the company's securities. In both such situations, the rating and target price will show as "—" and "-" respectively in the rating history price chart. Prior to 11 April 2022 Citi Research assigned "Under Review" status to both situations and prior to 11 Nov 2020 only in exceptional circumstances. As soon as practically possible, the analyst will publish a note re-establishing a rating and investment thesis. Investment ratings are determined by the ranges described above at the time of initiation of coverage, a change in investment and/or risk rating, or a change in target price (subject to limited management discretion). At times, the expected total returns may fall outside of these ranges because of market price movements and/or other short-term volatility or trading patterns. Such interim deviations will be permitted but will become subject to review by Research Management. Your decision to buy or sell a security should be based upon your personal investment objectives and should be made only after evaluating the stock's expected performance and risk.

Catalyst Watch Upside/Downside calls:
Citi Research may also include a Catalyst Watch Upside or Downside call to highlight specific near-term catalysts or events impacting the company or the market that are expected to influence the share price over a specified period of 30 or 90 days. A Catalyst Watch Upside (Downside) call indicates that the analyst expects the share price to rise (fall) in absolute terms over the specified period. A Catalyst Watch Upside/Downside call will automatically expire at the end of the specified 30/90 day period (or earlier if the investment rating of the company is assigned Rating Suspended or Under Review status); the analyst may also close a Catalyst Watch call prior to the end of the specified period in a published research note. A Catalyst Watch Upside or Downside call may be different from and does not affect a stock's fundamental equity rating, which reflects a longer-term total absolute return expectation. For purposes of FINRA ratings[1]distribution-disclosure rules, a Catalyst Watch Upside call corresponds to a buy recommendation and a Catalyst Watch Downside call corresponds to a sell recommendation. Any stock not assigned to a Catalyst Watch Upside or Catalyst Watch Downside call is considered Catalyst Watch Non-Rated (CWNR). For purposes of FINRA ratings-distribution-disclosure rules, we correspond CWNR to Hold in our ratings distribution table for our Catalyst Watch Upside/Downside rating system. However, we reiterate that we do not consider CWNR to be a recommendation. For all Catalyst Watch Upside/Downside calls, risk exists that the catalyst(s) and associated share-price movement will not materialize as expected.

RESEARCH ANALYST AFFILIATIONS / NON-US RESEARCH ANALYST DISCLOSURES
The legal entities employing the authors of this report are listed below (and their regulators are listed further herein). Non-US research analysts who have prepared this report (i.e., all research analysts listed below other than those identified as employed by Citigroup Global Markets Inc.) are not registered/qualified as research analysts with FINRA. Such research analysts may not be associated persons of the member organization (but are employed by an affiliate of the member organization) and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Citigroup Global Markets Inc.	Ryan Levine; Xinru Yin

OTHER DISCLOSURES

Any price(s) of instruments mentioned in recommendations are as of the prior day's market close on the primary market for the instrument, unless otherwise stated.

The completion and first dissemination of any recommendations made within this research report are as of the Eastern date-time displayed at the top of the Product. If the Product references views of other analysts then please refer to the price chart or rating history table for the date/time of completion and first dissemination with respect to that view.

Regulations in various jurisdictions require that where a recommendation differs from any of the author's previous recommendations concerning the same financial instrument or issuer that has been published during the preceding 12-month period that the change(s) and the date of that previous recommendation are indicated. For fundamental coverage please refer to the price chart or rating change history within this disclosure appendix or the issuer disclosure summary at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

Prepared for Michael Weisenburger

Citi Research has implemented policies for identifying, considering and managing potential conflicts of interest arising as a result of publication or distribution of investment research. A description of these policies can be found at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

The proportion of all Citi Research research recommendations that were the equivalent to "Buy","Hold","Sell" at the end of each quarter over the prior 12 months (with the % of these that had received investment firm services from Citi in the prior 12 months shown in brackets) is as follows: Q1 2023 Buy 33% (65%), Hold 43% (55%), Sell 23% (51%), RV 0.5% (86%); Q4 2022 Buy 33% (64%), Hold 43% (55%), Sell 23% (51%), RV 0.6% (91%); Q3 2022 Buy 33% (65%), Hold 43% (55%), Sell 23% (49%), RV 0.5% (89%); Q2 2022 Buy 33% (66%), Hold 43% (55%), Sell 23% (50%), RV 0.6% (88%). For the purposes of disclosing recommendations other than for equity (whose definitions can be found in the corresponding disclosure sections), "Buy" means a positive directional trade idea; "Sell" means a negative directional trade idea; and "Relative Value" means any trade idea which does not have a clear direction to the investment strategy.

European regulations require a 5 year price history when past performance of a security is referenced. CitiVelocity's Charting Tool (https://www.citivelocity.com/cv2/#go/CHARTING_3_Equities) provides the facility to create customisable price charts including a five year option. This tool can be found in the Data & Analytics section under any of the asset class menus in CitiVelocity (https://www.citivelocity.com/). For further information contact CitiVelocity support (https://www.citivelocity.com/cv2/go/CLIENT_SUPPORT). The source for all referenced prices, unless otherwise stated, is DataCentral, which sources price information from Thomson Reuters. Past performance is not a guarantee or reliable indicator of future results. Forecasts are not a guarantee or reliable indicator of future performance.

Investors should always consider the investment objectives, risks, and charges and expenses of an ETF carefully before investing. The applicable prospectus and key investor information document (as applicable) for an ETF should contain this and other information about such ETF. It is important to read carefully any such prospectus before investing. Clients may obtain prospectuses and key investor information documents for ETFs from the applicable distributor or authorized participant, the exchange upon which an ETF is listed and/or from the applicable website of the applicable ETF issuer. The value of the investments and any accruing income may fall or rise. Any past performance, prediction or forecast is not indicative of future or likely performance. Any information on ETFs contained herein is provided strictly for illustrative purposes and should not be deemed an offer to sell or a solicitation of an offer to purchase units of any ETF either explicitly or implicitly. The opinions expressed are those of the authors and do not necessarily reflect the views of ETF issuers, any of their agents or their affiliates.

Citigroup Global Markets India Private Limited and/or its affiliates may have, from time to time, actual or beneficial ownership of 1% or more in the debt securities of the subject issuer.

Please be advised that pursuant to Executive Order 13959 as amended (the "Order"), U.S. persons are prohibited from investing in securities of any company determined by the United States Government to be the subject of the Order. This research is not intended to be used or relied upon in any way that could result in a violation of the Order. Investors are encouraged to rely upon their own legal counsel for advice on compliance with the Order and other economic sanctions programs administered and enforced by the Office of Foreign Assets Control of the U.S. Treasury Department.

This communication is directed at persons who are "Eligible Clients" as such term is defined in the Israeli Regulation of Investment Advice, Investment Marketing and Investment Portfolio Management law, 1995 (the "Advisory Law"). Within Israel, this communication is not intended for retail clients and Citi will not make such products or transactions available to retail clients. The presenter is not licensed as investment advisor or marketer by the Israeli Securities Authority ("ISA") and this communication does not constitute investment or marketing advice. The information contained herein may relate to matters that are not regulated by the ISA. Any securities which are the subject of this communication may not be offered or sold to any Israeli person except pursuant to an exemption from the Israeli public offering rules, including according to the Israeli Securities Law.

Citi Research generally disseminates its research to the Firm's global institutional and retail clients via both proprietary (e.g., Citi Velocity and Citi Personal Wealth Management) and non-proprietary electronic distribution platforms. Certain research may be disseminated only via the Firm's proprietary distribution platforms; however such research will not contain changes to earnings forecasts, target price, investment or risk rating or investment thesis or be otherwise inconsistent with the author's previously published research. Certain research is made available only to institutional investors to satisfy regulatory requirements. Individual Citi Research analysts may also opt to circulate published research to one or more clients by email; such email distribution is discretionary and is done only after the research has been disseminated. The level and types of services provided by Citi Research analysts to clients may vary depending on various factors such as the client's individual preferences as to the frequency and manner of receiving communications from analysts, the client's risk profile and investment focus and perspective (e.g. market-wide, sector specific, long term, short-term etc.), the size and scope of the overall client relationship with the Firm and legal and regulatory constraints.

Pursuant to Comissão de Valores Mobiliários Resolução 20 and ASIC Regulatory Guide 264, Citi is required to disclose whether a Citi related company or business has a commercial relationship with the subject company. Considering that Citi operates multiple businesses in more than 100 countries around the world, it is likely that Citi has a commercial relationship with the subject company.

Disclosure for investors in the Republic of Turkey: Under Capital Markets Law of Turkey (Law No: 6362), the investment information, comments and recommendations stated here, are not within the scope of investment advisory activity. Investment advisory service is provided in accordance with a contract of engagement on investment advisory concluded between brokerage houses, portfolio management companies, non-deposit banks and clients. Comments and recommendations stated here rely on the individual opinions of the ones providing these comments and recommendations. These opinions may not fit to your financial status, risk and return preferences. For this reason, to make an investment decision by relying solely to this information stated here may not bring about outcomes that fit your expectations. Furthermore, Citi Research is a division of Citigroup Global Markets Inc. (the "Firm"), which does and seeks to do business with companies and/or trades on securities covered in this research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report, however investors should also note that the Firm has in place organisational and administrative arrangements to manage potential conflicts of interest of this nature.

Securities recommended, offered, or sold by the Firm: (i) are not insured by the Federal Deposit Insurance Corporation; (ii) are not deposits or other obligations of any insured depository institution (including Citibank); and (iii) are subject to investment risks, including the possible loss of the principal amount invested. The Product is for informational purposes only and is not intended as an offer or solicitation for the purchase or sale of a security. Any decision to purchase securities mentioned in the Product must take into account existing public information on such security or any registered prospectus. Although information has been obtained from and is based upon sources that the Firm believes to be reliable, we do not guarantee its accuracy and it may be incomplete and condensed. Note, however, that the Firm has taken all reasonable steps to determine the accuracy and completeness of the disclosures made in the Important Disclosures section of the Product. The Firm's research department has received assistance from the subject company(ies) referred to in this Product including, but not limited to, discussions with management of the subject company(ies). Firm policy prohibits research analysts from

Prepared for Michael Weisenburger

sending draft research to subject companies. However, it should be presumed that the author of the Product has had discussions with the subject company to ensure factual accuracy prior to publication. Statements and views concerning ESG (environmental, social, governance) factors are typically based upon public statements made by the affected company or other public news, which the author may not have independently verified. ESG factors are one consideration that investors may choose to examine when making investment decisions. All opinions, projections and estimates constitute the judgment of the author as of the date of the Product and these, plus any other information contained in the Product, are subject to change without notice. Prices and availability of financial instruments also are subject to change without notice. Notwithstanding other departments within the Firm advising the companies discussed in this Product, information obtained in such role is not used in the preparation of the Product. Although Citi Research does not set a predetermined frequency for publication, if the Product is a fundamental equity or credit research report, it is the intention of Citi Research to provide research coverage of the covered issuers, including in response to news affecting the issuer. For non-fundamental research reports, Citi Research may not provide regular updates to the views, recommendations and facts included in the reports. Notwithstanding that Citi Research maintains coverage on, makes recommendations concerning or discusses issuers, Citi Research may be periodically restricted from referencing certain issuers due to legal or policy reasons. Where a component of a published trade idea is subject to a restriction, the trade idea will be removed from any list of open trade ideas included in the Product. Upon the lifting of the restriction, the trade idea will either be re-instated in the open trade ideas list if the analyst continues to support it or it will be officially closed. Citi Research may provide different research products and services to different classes of customers (for example, based upon long-term or short-term investment horizons) that may lead to differing conclusions or recommendations that could impact the price of a security contrary to the recommendations in the alternative research product, provided that each is consistent with the rating system for each respective product.

Investing in non-U.S. securities, including ADRs, may entail certain risks. The securities of non-U.S. issuers may not be registered with, nor be subject to the reporting requirements of the U.S. Securities and Exchange Commission. There may be limited information available on foreign securities. Foreign companies are generally not subject to uniform audit and reporting standards, practices and requirements comparable to those in the U.S. Securities of some foreign companies may be less liquid and their prices more volatile than securities of comparable U.S. companies. In addition, exchange rate movements may have an adverse effect on the value of an investment in a foreign stock and its corresponding dividend payment for U.S. investors. Net dividends to ADR investors are estimated, using withholding tax rates conventions, deemed accurate, but investors are urged to consult their tax advisor for exact dividend computations. Investors who have received the Product from the Firm may be prohibited in certain states or other jurisdictions from purchasing securities mentioned in the Product from the Firm. Please ask your Financial Consultant for additional details. Citigroup Global Markets Inc. takes responsibility for the Product in the United States. Any orders by US investors resulting from the information contained in the Product may be placed only through Citigroup Global Markets Inc.

Important Disclosures for Bell Potter Customers: Bell Potter is making this Product available to its clients pursuant to an agreement with Citigroup Global Markets Australia Pty Limited. Neither Citigroup Global Markets Australia Pty Limited nor any of its affiliates has made any determination as to the suitability of the information provided herein and clients should consult with their Bell Potter financial advisor before making any investment decision.

The Citigroup legal entity that takes responsibility for the production of the Product is the legal entity which the first named author is employed by.

Citigroup Centre, Canada Square, Canary Wharf, London, E14 5LB.

The Product is made available in **United States** by Citigroup Global Markets Inc., which is a member of FINRA and registered with the US Securities and Exchange Commission. 388 Greenwich Street, New York, NY 10013.

Unless specified to the contrary, within EU Member States, the Product is made available by Citigroup Global Markets Europe AG ("CGME"), which is regulated by the European Central Bank and the German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht-BaFin).

The Product is not to be construed as providing investment services in any jurisdiction where the provision of such services would not be permitted.
Subject to the nature and contents of the Product, the investments described therein are subject to fluctuations in price and/or value and investors may get back less than originally invested. Certain high-volatility investments can be subject to sudden and large falls in value that could equal or exceed the amount invested.The yield and average life of CMOs (collateralized mortgage obligations) referenced in this Product will fluctuate depending on the actual rate at which mortgage holders prepay the mortgages underlying the CMO and changes in current interest rates. Any government agency backing of the CMO applies only to the face value of the CMO and not to any premium paid. Certain investments contained in the Product may have tax implications for private customers whereby levels and basis of taxation may be subject to change. If in doubt, investors should seek advice from a tax adviser. The Product does not purport to identify the nature of the specific market or other risks associated with a particular transaction. Advice in the Product is general and should not be construed as personal advice given it has been prepared without taking account of the objectives, financial situation or needs of any particular investor. Accordingly, investors should, before acting on the advice, consider the appropriateness of the advice, having regard to their objectives, financial situation and needs. Prior to acquiring any financial product, it is the client's responsibility to obtain the relevant offer document for the product and consider it before making a decision as to whether to purchase the product.
Citi Research product may source data from dataCentral. dataCentral is a Citi Research proprietary database, which includes the Firm's estimates, data from company reports and feeds from Thomson Reuters. The source for all referenced prices, unless otherwise stated, is DataCentral. Past performance is not a guarantee or reliable indicator of future results. Forecasts are not a guarantee or reliable indicator of future performance. The printed and printable version of the research report may not include all the information (e.g. certain financial summary information and comparable company data) that is linked to the online version available on the Firm's proprietary electronic distribution platforms.

Card Insights. Where this report references Card Insights data, Card Insights consists of selected data from a subset of Citi's proprietary credit card transactions. Such data has undergone rigorous security protocols to keep all customer information confidential and secure; the data is highly aggregated and anonymized so that all unique customer identifiable information is removed from the data prior to receipt by the report's author or distribution to external parties. This data should be considered in the context of other economic indicators and publicly available information. Further, the selected data represents only a subset of Citi's proprietary credit card transactions due to the selection methodology or other limitations and should not be considered as indicative or predictive of the past or future financial performance of Citi or its credit card business.

Where included in this report, MSCI sourced information is the exclusive property of Morgan Stanley Capital International Inc. (MSCI). Without prior written permission of MSCI, this information and any other MSCI intellectual property may not be reproduced, redisseminated or used to create any financial products, including any indices. This information is provided on an "as is" basis. The user assumes the entire risk of any use made of this information. MSCI, its affiliates and any third party involved in, or related to, computing or compiling the information hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of this information. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates or any third party involved in, or related to, computing or compiling the information have any liability for any damages of any kind. MSCI, Morgan Stanley Capital International and the MSCI indexes are services marks of MSCI and its affiliates. Part of this product may contain Sustainalytics proprietary information that may not be reproduced, used, disseminated, modified nor published in any manner without the express written consent of Sustainalytics. Sustainalytics, its affiliates and any third party involved in, or related to, computing or compiling the information hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of this information. Any information attributed to Sustainalytics is provided solely for informational purposes and on its own should not be considered an offer to buy or sell a security. Neither Sustainalytics nor all its third-party suppliers provide investment advice (as defined in the applicable jurisdiction) or any other form of (financial) advice. The information is provided "as is" and, therefore Sustainalytics assumes no responsibility for errors or omissions. Sustainalytics cannot be held liable for damage arising from the use of this product or information contained herein in any manner whatsoever. Where data is attributed to Morningstar that data is © 2023 Morningstar, Inc. All Rights Reserved. Effective Execution

Key Takes:

- NI reported Q1 adjusted diluted Net operating EPS (NOEPS) of $0.77 vs. our estimate of $0.77 and street consensus of $0.75. 1Q23 NOEPS is 3% higher than 1Q22 NOEPS of $0.75.
- Reaffirmed 2023 non-GAAP NOEPS guidance range of $1.54-$1.60.
    - Midpoint of $1.57 represents 6.8% growth off 2022 NOEPS. Consensus is at $1.55.
- Reaffirmed annual non-GAAP NOEPS growth of 6-8% through 2027.
    - Off the 2023 earnings guidance range of $1.54-$1.60.
- Reaffirmed $15B 2023-2027 capex plan with ~75% of investments beginning earning in less than 18 months
    - Driving 8%-10% annual utility rate base growth
- Northern Indiana Public Service Company (NIPSCO) minority sale process on track for 2023
- Long-term 14-16% FFO/Debt target reaffirmed
- NIPSCO reached a settlement in the electric rate case on March 10th

Maintaining our Outperform rating and $31TP (details within)

Additional Details:

- **Minority Interest Sale:** Minority interest sale of NIPSCO is still expected to be completed in 2023 and continues to track as expected. The company remains confident in the attractiveness of the asset and has previously stated that there is no decline in interest attributable to higher rates, particularly given the quality of the potential counterparties with ready capital to deploy, bank leverage tools, and long-term investment preference. NiSource has initiated the sale process, and we anticipate an announcement and close by year end. We estimate $1.5-$2B in cash proceeds.

Please see the analyst certification and important disclosures on page 4 of this report. Evercore ISI and affiliates do and seek to do business with companies covered in its research reports. Investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.
© 2023. Evercore Group L.L.C. All rights reserved.

- **NIPSCO Electric rate case**: On March 10th, NIPSCO and other parties reached a settlement agreement in its electric rate case in Indiana. The settlement proposed a $292M rate increase compared with $395M company requested, including base rate increase and tracker. The parties agreed on an ROE of 9.8% versus current 9.75%, and an equity layer of 51.63% versus current 47.86%. Recall that company requested a 10.4% ROE and a 58.5% equity ratio on a rate base of $5.95B. We view the settlement as constructive if approved. A final Commission order is expected in mid-August with rates going into effect in September.
- **Virginia gas rate case**: On Dec 9th, Columbia Gas of Virginia reached a settlement with $25.8 million rate increase, inclusive of SAVE (Steps to Advance Virginia's Energy Plan) infrastructure tracker ($14.5MM), representing a settlement as to a specific revenue number but not as to a specific ROE. Recall that NiSource requested $40.6MM revenue increase net of the SAVE infrastructure tracker ($17.7MM) with a 10.75% ROE and 39.3% equity ratio on a rate base of $1.0B with a 12/21 test year. A final order is expected in 2Q23.
- **OH gas rate case**: On Oct 31st, 2022, Columbia Gas of Ohio filed a settlement representing a $68.2M revenue increase with 9.6% ROE and 50.6% equity layer. The company originally requested $221MM with ROE of 10.9%. The equity ratio request of ~51% was not disputed. The commission approved the settlement in January 2023 for new rates effective in March.
- **Indiana ROFR legislation**: HB 1420 was signed by the Governor on May 1st, which gives Indiana utility companies the right of first refusal (ROFR) to build, own, and operate new transmission lines approved by a regional transmission organization in their service area, and prevents new projects from being bid on by other competitive transmission companies. The legislation would solidify NI's position to own and invest in Transmission assets, which could be upside to their current capex plan.
- **Leadership changes:** The company announced several leadership changes on March 15th, link. Notably Shawn Anderson formerly senior vice president of risk and chief strategy officer, moved into the role of executive vice president and chief financial officer effective Mar 27th. Donald Brown, NiSource's former chief financial officer, assumed the role of executive vice president and chief innovation officer on Mar 27th, replacing Melody Birmingham, who was named as executive vice president, and group president, NiSource utilities.
- **Target Price**: Maintaining our Outperform rating and our target price of $31/share. We keep our 2023/2024/2025 EPS estimates of $1.57/$1.69/$1.80 unchanged. See our base case SOTP valuation of $31 on Exhibit 1. We apply a conservative 5% premium to our peer target 17x multiple for the electric business, which we estimate will grow rate base by 8-10% through 2027 versus peers at 6-7%. Our base case for the LDCs applies an in-line gas multiple, now of 16.6x 2025 EPS as we mark to market comparable trading multiples. Our bear case in Exhibit 1 below derives $27/share valuation assuming NI can grow EPS at 6% using low end of 2023 guidance range of $1.54, while our bull case is $33/share assuming the company can grow at 8% using high end of 2023 guide of $1.60.

VALUATION METHODOLOGY

We use a SOTP analysis to arrive at our price target

RISKS

Risks to our thesis include an inability to deploy capital at the company's expected rate resulting in a lower rate base and regulatory pressure resulting in lower allowed ROEs

ANALYST CERTIFICATION

The analysts, Durgesh Chopra, Sharon Wang, primarily responsible for the preparation of this research report attest to the following: (1) that the views and opinions rendered in this research report reflect his or her personal views about the subject companies or issuers; and (2) that no part of the research analyst's compensation was, is, or will be directly related to the specific recommendations or views in this research report.

IMPORTANT DISCLOSURES

This report is approved and/or distributed by Evercore Group L.L.C. ("Evercore Group"), a U.S. licensed broker-dealer regulated by the Financial Industry Regulatory Authority ("FINRA"), and Evercore ISI International Limited ("ISI UK"), which is authorised and regulated in the United Kingdom by the Financial Conduct Authority. The institutional sales, trading and research businesses of Evercore Group and ISI UK collectively operate under the global marketing brand name Evercore ISI ("Evercore ISI"). Both Evercore Group and ISI UK are subsidiaries of Evercore Inc. ("Evercore "). The trademarks, logos and service marks shown on this report are registered trademarks of Evercore.

The analysts and associates responsible for preparing this report receive compensation based on various factors, including Evercore's Partners' total revenues, a portion of which is generated by affiliated investment banking transactions. Evercore ISI seeks to update its research as appropriate, but various regulations may prevent this from happening in certain instances. Aside from certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Evercore ISI generally prohibits analysts, associates and members of their households from maintaining a financial interest in the securities of any company in the analyst's area of coverage. Any exception to this policy requires specific approval by a member of our Compliance Department. Such ownership is subject to compliance with applicable regulations and disclosure. Evercore ISI also prohibits analysts, associates and members of their households from serving as an officer, director, advisory board member or employee of any company that the analyst covers.

This report may include a Tactical Call, which describes a near-term event or catalyst affecting the subject company or the market overall and which is expected to have a short-term price impact on the equity shares of the subject company. This Tactical Call is separate from the analyst's long-term recommendation (Outperform, In Line or Underperform) that reflects a stock's forward 12-month expected return, is not a formal rating and may differ from the target prices and recommendations reflected in the analyst's long-term view.

Applicable current disclosures regarding the subject companies covered in this report are available at the offices of Evercore ISI: 55 East 52nd Street, New York, NY 10055, and at the following site: https://evercoreisi.mediasterling.com/disclosure.

Evercore and its affiliates, and I or their respective directors, officers, members and employees, may have, or have had, interests or qualified holdings on issuers mentioned in this report. Evercore and its affiliates may have, or have had, business relationships with the companies mentioned in this report.

Additional information on securities or financial instruments mentioned in this report is available upon request.

Ratings Definitions

Current Ratings Definition

Evercore ISI's recommendations are based on a stock's total forecasted return over the next 12 months. Total forecasted return is equal to the expected percentage price return plus gross dividend yield. We divide our stocks under coverage into three primary ratings categories, with the following return guidelines:

Outperform- the total forecasted return is expected to be greater than the expected total return of the analyst's coverage sector.
In Line- the total forecasted return is expected to be in line with the expected total return of the analyst's coverage sector.
Underperform- the total forecasted return is expected to be less than the expected total return of the analyst's coverage sector.
Coverage Suspended- the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances.*
Rating Suspended- Evercore ISI has suspended the rating and target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon.*

*Prior to October 10, 2015, the "Coverage Suspended" and "Rating Suspended" categories were included in the category "Suspended."

FINRA requires that members who use a ratings system with terms other than "Buy," "Hold/Neutral" and "Sell" to equate their own ratings to these categories. For this purpose, and in the Evercore ISI ratings distribution below, our Outperform, In Line, and Underperform ratings can be equated to Buy, Hold and Sell, respectively.

Historical Ratings Definitions

Prior to March 2, 2017, Evercore ISI's recommendations were based on a stock's total forecasted return over the next 12 months:

Buy- the total forecasted return is expected to be greater than 10%

Hold- the total forecasted return is expected to be greater than or equal to 0% and less than or equal to 10%
Sell -the total forecasted return is expected to be less than 0%

On October 31, 2014, Evercore Partners acquired International Strategy & Investment Group LLC ("ISI Group") and ISI UK (the "Acquisition") and transferred Evercore Group's research, sales and trading businesses to ISI Group. On December 31, 2015, the combined research, sales and trading businesses were transferred back to Evercore Group in an internal reorganization. Since the Acquisition, the combined research, sales and trading businesses have operated under the global marketing brand name Evercore ISI.

ISI Group and ISI UK:

Prior to October 10, 2014, the ratings system of ISI Group LLC and ISI UK which was based on a 12-month risk adjusted total return:

Strong Buy- Return > 20%
Buy- Return 10% to 20%
Neutral - Return 0% to 10%
Cautious- Return -10% to 0%
Sell- Return< -10%

For disclosure purposes, ISI Group and ISI UK ratings were viewed as follows: Strong Buy and Buy equate to Buy, Neutral equates to Hold, and Cautious and Sell equate to Sell.

Evercore Group:

Prior to October 10, 2014, the rating system of Evercore Group was based on a stock's expected total return relative to the analyst's coverage universe over the following 12 months. Stocks under coverage were divided into three categories:

Overweight- the stock is expected to outperform the average total return of the analyst's coverage universe over the next 12 months.
Equal-Weight- the stock is expected to perform in line with the average total return of the analyst's coverage universe over the next 12 months.
Underweight -the stock is expected to underperform the average total return of the analyst's coverage universe over the next 12 months.
Suspended- the company rating, target price and earnings estimates have been temporarily suspended.

For disclosure purposes, Evercore Group's prior "Overweight," "Equal-Weight" and "Underweight" ratings were viewed as "Buy," "Hold" and "Sell," respectively.

Ratings Definitions for Portfolio-Based Coverage

Evercore ISI utilizes an alternate rating system for companies covered by analysts who use a model portfolio-based approach to determine a company's investment recommendation. Covered companies are included or not included as holdings in the analyst's Model Portfolio, and have the following ratings:

Long- the stock is a positive holding in the model portfolio; the total forecasted return is expected to be greater than 0%.
Short- the stock is a negative holding in the model portfolio; the total forecasted return is expected to be less than 0%.
No Position- the stock is not included in the model portfolio.
Coverage Suspended- the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company, and in certain other circumstances; a stock in the model portfolio is removed.
Rating Suspended - Evercore ISI has suspended the rating and/or target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon; a stock in the model portfolio is removed.

Stocks included in the model portfolio will be weighted from 0 to 100% for Long and 0 to -100% for Short. A stock's weight in the portfolio reflects the analyst's degree of conviction in the stock's rating relative to other stocks in the portfolio. The model portfolio may also include a cash component. At any given time the aggregate weight of the stocks included in the portfolio and the cash component must equal100%.

Stocks assigned ratings under the alternative model portfolio-based coverage system cannot also be rated by Evercore ISI's Current Ratings definitions of Outperform, In Line and Underperform.

FINRA requires that members who use a ratings system with terms other than "Buy," "Hold/Neutral" and "Sell," to equate their own ratings to these categories. For this purpose, and in the Evercore ISI ratings distribution below, our Long, No Position and Short ratings can be equated to Buy, Hold and Sell respectively.

GENERAL DISCLOSURES

This report is approved and/or distributed by Evercore Group L.L.C. (“Evercore Group”), a U.S. licensed broker-dealer regulated by the Financial Industry Regulatory Authority (“FINRA”) and by International Strategy & Investment Group (UK) Limited (“ISI UK”), which is authorized and regulated in the United Kingdom by the Financial Conduct Authority. The institutional sales, trading and research businesses of Evercore Group and ISI UK collectively operate under the global marketing brand name Evercore ISI ("Evercore ISI"). Both Evercore Group and ISI UK are subsidiaries of Evercore Inc. ("Evercore"). The trademarks, logos and service marks shown on this report are registered trademarks of Evercore Inc.

This report is provided for informational purposes only. It is not to be construed as an offer to buy or sell or a solicitation of an offer to buy or sell any financial instruments or to participate in any particular trading strategy in any jurisdiction. The information and opinions in this report were prepared by employees of affiliates of Evercore. The information herein is believed by Evercore ISI to be reliable and has been obtained from public sources believed to be reliable, but Evercore ISI makes no representation as to the accuracy or completeness of such information. Opinions, estimates and projections in this report constitute the current judgment of the author as of the date of this report. They do not necessarily reflect the opinions of Evercore or its affiliates and are subject to change without notice. In addition, opinions, estimates and projections in this report may differ from or be contrary to those expressed by other business areas or groups of Evercore and its affiliates. Evercore ISI has no obligation to update, modify or amend this report or to otherwise notify a reader thereof in the event that any matter stated herein, or any opinion, projection, forecast or estimate set forth herein, changes or subsequently becomes inaccurate. Facts and views in Evercore ISI research reports and notes have not been reviewed by, and may not reflect information known to, professionals in other Evercore affiliates or business areas, including investment banking personnel. Evercore ISI salespeople, traders and other professionals may provide oral or written market commentary or trading strategies to our clients that reflect opinions that are contrary to the opinions expressed in this research. Our asset management affiliates and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

Evercore ISI does not provide individually tailored investment advice in research reports. The financial instruments discussed in this report are not suitable for all investors and investors must make their own investment decisions using their own independent advisors as they believe necessary and based upon their specific financial situations and investment objectives. This report has been prepared without regard to the particular investment strategies or financial, tax or other personal circumstances of the recipient. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to the recipient’s individual circumstances, or otherwise constitutes a personal recommendation to the recipient. None of Evercore Group or its affiliates will treat any recipient of this report as its customer by virtue of the recipient having received this report.

Securities and other financial instruments discussed in this report, or recommended or offered by Evercore ISI, are not insured by the Federal Deposit Insurance Corporation and are not deposits of or other obligations of any insured depository institution. If a financial instrument is denominated in a currency other than an investor’s currency, a change in exchange rates may adversely affect the price or value of, or the income derived from the financial instrument, and such investor effectively assumes such currency risk. In addition, income from an investment may fluctuate and the price or value of financial instruments described in this report, either directly or indirectly, may rise or fall. Estimates of future performance are based on assumptions that may not be realized. Furthermore, past performance is not necessarily indicative of future performance.

Please note that this report was prepared for and distributed by Evercore ISI to its institutional investor and market professional customers. Recipients who are not institutional investor or market professional customers of Evercore ISI should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.

Electronic research is simultaneously distributed to all clients. This report is provided to Evercore ISI clients and may not be redistributed, retransmitted or disclosed, in whole or in part, or in any form or manner, without the express written consent of Evercore ISI. Receipt and review of this research report constitutes your agreement not to redistribute, retransmit, or disclose to others the contents, opinions, conclusion or information contained in this report (including any investment recommendations, estimates or target prices) without first obtaining express permission from Evercore ISI.

This report is not intended for distribution to or use by any person or entity in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Evercore Group or its affiliates to any registration or licensing requirement within such jurisdiction. If this report is being distributed by a financial institution other than Evercore ISI or its affiliates, that financial institution is solely responsible for such distribution and for compliance with the laws, rules and regulations of any jurisdiction where this report is distributed. Clients of that financial institution should contact that institution to effect any transaction in the securities mentioned in this report or if such clients require further information. This report does not constitute investment advice by Evercore ISI to the clients of the distributing financial institution, and neither Evercore ISI nor its affiliates, nor their respective officers, directors or employees, accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content.

For persons in the UK: In making this report available, Evercore makes no recommendation to buy, sell or otherwise deal in any securities or investments whatsoever and you should neither rely or act upon, directly or indirectly, any of the information contained in this report in respect of any such investment activity. This report is being directed at or distributed to, (a) persons who fall within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”)); (b) persons falling within the definition of high net worth companies, unincorporated associations, etc. (set out in Article 49(2) of the Order); (c) other persons to whom it may otherwise lawfully be communicated (all such persons together being referred to as “relevant persons”). This report must not be acted on or relied on by persons who are not relevant persons.

For persons in Switzerland: The distribution of these materials to persons or entities in Switzerland is not intended to, and does not, constitute a financial service under the Swiss Financial Services Act (FinSA). In particular, the distribution of these materials does not constitute the provision of personal recommendations on transactions with financial instruments (investment advice) within the meaning of Article 3(c)(4) of FinSA.

For persons in Australia: Evercore does not have an Australian Financial Services License ("AFSL"). This report is only to be distributed to persons who fall within the definition of "wholesale" investors under section 761G of the Corporations Act 2001 (Cth). This report must not be acted on or relied on by persons who are not wholesale investors. Evercore relies on the relief provided under ASIC Corporations (Foreign Financial Services Providers—Limited Connection) Instrument 2017/182 to provide this report to wholesale investors in Australia without an AFSL.

For persons in New Zealand: This material has been prepared by Evercore Group L.L.C. for distribution in New Zealand to financial advisors and wholesale clients only and has not been prepared for use by retail clients (as those terms are defined in the Financial Markets Conduct Act 2013 (‘FMCA’)). Evercore Group L.L.C. is not, and is not required to be, registered or licensed under the FMCA, and unless otherwise stated any financial products referred to in this material are generally only available in New Zealand for issue to those satisfying the wholesale investor criteria in the FMCA.

Applicable current disclosures regarding the subject companies covered in this report are available at the offices of Evercore ISI: 55 East 52nd Street, New York, NY 10055, and at the following site: https://evercoreisi.mediasterling.com/disclosure.

In compliance with the European Securities and Markets Authority's Market Abuse Regulation, a list of all Evercore ISI recommendations disseminated in the preceding 12 months for the subject companies herein, may be found at the following site: https://evercoreisi.mediasterling.com/disclosure.

NiSource Inc

NI | $27.27 | Target Price/Base Case: $30.00 | Outperform

Promises Made, Promises Kept

This morning, NiSource Inc. (NYSE: NI) announced an agreement to sell the 19.9% non-controlling equity interest in NIPSCO for $2.15 billion to an affiliate of Blackstone Infrastructure Partners, Blackstone's (NYSE: BX) dedicated Infrastructure group, with additional equity commitment of $250 million to fund ongoing capital requirements. NiSource intends to use the proceeds to support growth at the utility, strengthen the balance sheet, and fund capital needs consistent with the plan laid out at its Investor Day in November 2022. The transaction is expected to close by year-end 2023, subject to customary closing conditions, including receiving FERC approvals and clearances. In conjunction with the announcement, NiSource reaffirmed its 2023 non-GAAP EPS guidance of $1.54 to $1.60, 6-8% growth through 2027 and its FFO/debt target of 14-16%. The company still projects annual rate base growth of 8-10% is driven by $15 billion of planned capital expenditures during the 2023-2027 period.

Our take – Positive. The $2.15B in proceeds is above the top end of our estimated $1.5B-$2B range. The 32.5x LTM P/E multiple is higher than the 28x LTM P/E multiple of DUK's minority interest sale announced in January 2021, see our note here. As part of the transaction, Blackstone is committed to funding its pro rata share of ongoing capital requirements, which is supported by a $250 million equity commitment letter and contractual obligations. Including the value of the total $2.4 billion equity raise from Blackstone, the company still does not expect new equity in the plan other than the maintenance equity under the ATM starting no earlier than 2025. With this transaction, NI continues to execute strongly on the plan laid out in November. The company raised its 2023 EPS expectations in February (note), announced a constructive NIPSCO electric rate case settlement in March with a final order expected by August for rates effective in September. We are maintaining our EPS projections and lowering TP to $30 from $31. Our lowered TP is predicated on electric utility target P/E of 15x (vs 17x previously) close to where the group is trading today. Rating still Outperform.

Notes From Our Ohio Road Trip

On June 19-20th, we hosted investor meetings with executives of AEP, AES and NI in Columbus, Ohio. We also met with Ohio State Representative Bill Seitz. See below for takeaways from our meetings.

American Electric Power (AEP), In Line rating, $90 price target

- **Contracted Renewable asset sale**: AEP has now received FERC approval as well as approval from antitrust authorities. The only remaining approval required is from the Committee on Foreign Investment in the United States. The transaction is now expected to close in July or August 2023 (versus Q2 previously). Recall in February 2023, AEP announced the sale of its contracted renewable assets to IRG Acquisition Holdings for enterprise value of $1.5B ($1.3B equity value is in line with our $1.2-1.4B estimate).

- **New Mexico Renewable Development (NMRD) asset sale:** AEP said an announcement could be imminent, with expected closure by year-end 2023. This asset represents a 50/50 joint venture partnership with PNM Resources consisting of eight operating solar projects of 135 MW, one project under construction of 50 MW, six development projects of 440 MW, all located in New Mexico. The book value of AEP's investment as of 3/31/2023 was $102MM. The assets contribute $0.01 EPS in 2023 operating earnings guidance.

- **Divestiture of retail and distributed resources businesses (not including NMRD).** AEP said it plans to launch the process in July/August 2023 with an expected closure date in the first half of 2024. The book value of AEP's investment as of 3/31/2023 was $200MM for the retail and $350MM for distributed resources assets. The expected EPS contributions to 2023 operating guidance are $0.04 retail and $0.02 distributed resources.

- **Strategic review of certain non-core transmission joint venture businesses:** AEP said it intends to complete the strategic review by year-end 2023. As of 3/31/2023, AEP's portion of PP&E was $551M and rate base was $456M.The assets contribute $0.05 EPS in 2023 operating earnings guidance. We estimate ~$1B in total proceeds from the announced strategic reviews/asset sales- NMRD, retail, DER and Transmission. Assuming that the proceeds are used towards lowering future equity needs, we see the transactions as earnings neutral to modestly accretive to our 25E of $6.00.

Continued on next page…

Please see the analyst certification and important disclosures on page 6 of this report. Evercore ISI and affiliates do and seek to do business with companies covered in its research reports. Investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

This report is prepared solely for the use of Michael Weisenburger

AEP highlights continued…

- **SWEPCO renewables**: In May 2023, the Public Utility Commission of Texas (PUCT) voted 5- 0 to reject SWEPCO's filing for three new regulated wind/solar projects. AEP's Southwestern Electric Power Company (SWEPCO) filed for approval of 999 MW of wind and solar projects with the Texas, Louisiana, and Arkansas commissions. These projects total $2.2 billion of investment that is included in AEP's current five-year 2023-2027 capital plan of $40 billion. This rejection by the PUCT follows the Louisiana commission's decision in April 2023 to not approve a settlement reached there, with the commission requesting that AEP propose more options for PPAs in a special meeting is being held on June 29th . Note that the settlement in Louisiana approved a flex option to include a portion or all three of the 999 MW of wind / solar projects. In Arkansas, a settlement was approved in June 2023. We estimate these SWEPCO projects would contribute roughly $0.20/share annually starting in 2026 or ~3% of 2025 EPS estimate of $6.00/share. Following the Texas decision, AEP stated to us that all its financial commitments remain intact, and the company still expects to deliver its long-term 6-7% EPS growth target. AEP said that if it ultimately does not move forward with part or all of the $2.2 billion of SWEPCO projects that it could backfill that capital with transmission and/or other renewable generation investment.

- **Kentucky strategy**: In the near-term, AEP will be focused on: 1) filing a base rate case in Kentucky in June 2023 (14% rate increase request) with a six-month expected commission approval process, and new rates taking effect in January 2024; 2) right-sizing its Kentucky rate base to better meet the region's needs and address costs while providing reliable service to customers in the near-term; this includes securitizing retired coal assets through the Kentucky commission's approval to reduce rates for customers.

- **PSO rate case settlement:** On May 5th, AEP reached a settlement in its PSO rate case for a $50MM revenue increase with a 9.5% ROE and 54.6% equity ratio. A final order is expected in 3Q23 to be effective June 1, 2023. Recall on November 22nd, AEP filed a rate case in Oklahoma, requesting a net revenue increase of $103MM with an ROE of 10.4% and equity ratio of 54.6% on a rate base of $4.4B.

- **ApCo Virginia rate case**: On March 31st, ApCo Virginia filed a rate case, requesting a net revenue increase of $160MM with a 10.6% ROE and 48.3% equity ratio on a rate base of $2.9 billion with a 12/31/22 test year. Next step is direct testimony on July 14th, followed by rebuttal testimony on August 11th, then a hearing on August 24th, with an expected commission decision in 4Q23 for rates effective January 2024.

- **Target Price change**: We are maintaining our EPS projections and lowering TP to $90 from $102. Our lowered TP is predicated on electric utility target P/E of 15x (vs 17x previously) close to where the group is trading today

AES Corporation (AES), Outperform rating, $29 price target

- **Feedback from May 8th Investor Day**: AES said it received positive feedback about its new business segment disclosures and on the more granular detail it provided about the utilities. Investors were disappointed about how EPS dilutive the coal retirement process would be over the planning period. Investors also felt negatively about the five-year financing plan, which includes $1,600-1,900 million of equity issuance.
- **Utilities Investment Proposition**: The company highlighted the substantial need for investment in IN and OH due to a significantly older asset base compared to peers (45 to 60% assets depreciated vs peers in the 23-34% range). With bills still materially below peer average, AES is investing ~$5B in capex through 2027 which is projected to grow rate base at 10% CAGR from 2022-2027
- **Ohio ESP 4 filing:** AES said it anticipates a final decision in late summer 2023. Recall in September 2022, AES Ohio filed a new ESP 4 to provide a regulatory foundation to upgrade and modernize its network and settle any outstanding regulatory proceedings. The company is asking for a distribution rider (covers 75-80% of distribution spend) with quarterly updates. Note that the final order in the December 2022 Ohio rate case outcome will take effect once the pending ESP is approved. In that case, AES was granted a $76 million revenue increase with a 10.0% ROE, 53.87% equity ratio on a rate base of $783 million. The ESP will be in effect for three years upon receiving commission approval expected in the August/September time frame. Post the ESP4 implementation the company projects that 90% of the capex (vs 60% currently) will be eligible for recovery under riders/formula rates minimizing regulatory lag.
- **Indiana IRP**: AES spoke about its pending Indiana IRP that it filed in December 2022. Its near-term plan includes the conversion of the utility's last two coal units to gas in 2025 using an existing on-site gas pipeline. It also includes the addition of up to 1.3 GWs of new wind, solar and storage by 2027 and should reduce AES Indiana's carbon intensity by 2/3rds from 2018 to 2030. CCNs to be filed for new projects have a statutory requirement for an order within 120 days.
- **Bellefield project:** On June 7th, AES announced the acquisition of the 2 GW Bellefield project, which is currently in late-stage development, and is the largest permitted solar-plus-storage project in the United States. The project, located in Kern County, California, includes two phases, each with 500 MW of solar and up to 500 MW of four-hour duration battery

This report is prepared solely for the use of Michael Weisenburger

energy storage. Phase one of the project has a 15-year Power Purchase Agreement (PPA) to deliver hourly, carbon-free energy to an existing AES corporate customer. AES expects to contract up to an additional 1 GW of solar-plus-storage in phase two by the end of 2023. The two phases of the project are being developed by the seller, Avantus, and are expected to come online in 2025 and 2026, respectively. Including the Phase one PPA, company's signed backlog now stands at 12.3GW versus 11.3GW as of their investor day in early May. Our take on the transaction is positive - we estimate ~$2B purchase price for project which will be part owned by Alberta Investment Management Corporation (AIMCo), an investor in AES' clean energy business in the US with 25% ownership of the business' growth projects. AES' ~1.5B investment will be predominantly funded by debt and tax equity which is incorporated in company's financial plan laid out on the May 8th investor day (key highlights here). We project ~$500M in ITC's attributed to AES's ownership share and ~$100M in annual EBITDA contribution starting in 2026 (~3% of total 2026 implied EBITDA guidance of $3.1B). This transaction demonstrates AES' leadership position as a top provider of renewable energy solutions for corporates which we think will be a key differentiating factor as AES executes on and grows earnings/cash flow from the multi decade long decarbonization trend.

NiSource (NI), Outperform rating, $30 price target

- **NIPSCO asset sale:** Yesterday, NiSource announced an agreement to sell the 19.9% non-controlling equity interest in NIPSCO for $2.15 billion to an affiliate of Blackstone Infrastructure Partners, Blackstone's (NYSE: BX) dedicated Infrastructure group, with additional equity commitment of $250 million to fund ongoing capital requirements. NiSource intends to use the proceeds to support growth at the utility, pay down debt, and fund capital needs, consistent with the plan laid out at its Investor Day in November 2022. The transaction is expected to close by year-end 2023, subject to customary closing conditions, including receiving FERC approvals and clearances. In conjunction with the announcement, NiSource reaffirmed its 2023 non-GAAP EPS guidance of $1.54 to $1.60, 6-8% growth through 2027 and its FFO/debt target of 14-16%. The company still projects annual rate base growth of 8-10% is driven by $15 billion of planned capital expenditures during the 2023-2027 period.. Our take on the transaction is positive as the $2.15B in proceeds is above the top end of our estimated $1.5B-$2B range. The 32.5x LTM P/E multiple is higher than the 28x LTM P/E multiple of DUK's minority interest sale announced in January 2021, see our note here. As part of the transaction, Blackstone is committed to funding its pro rata share of ongoing capital requirements, which is supported by a $250 million equity commitment letter and contractual obligations. Including the value of the total $2.4 billion equity raise from Blackstone, the company still does not expect new equity in the plan other than the maintenance equity under the ATM starting no earlier than 2025. With this transaction, NI continues to execute strongly on the plan laid out in November. The company raised its 2023 EPS expectations in February (note), announced a constructive NIPSCO electric rate case settlement in March with a final order expected by August for rates effective in September.
- **NIPSCO Electric rate case**: NiSource said a final decision is expected in August 2023 with new rates to be effective in September 2023. Recall on March 10th, NIPSCO and other parties reached a settlement agreement in its electric rate case in Indiana. The settlement proposed a $292MM rate increase compared with $395MM company requested, including a base rate increase and a tracker. The parties agreed on an ROE of 9.80% versus the current 9.75%, and an equity layer of 51.63% versus the current 47.86%. Recall that company requested a 10.4% ROE and a 58.5% equity ratio on a rate base of $5.95B. We view the settlement as constructive, if approved. A final Commission order is expected in mid-August 2023 with rates going into effect in September 2023.
- **Key focuses this year**: NI said its next major milestone is a final decision on the NIPSCO rate case settlement. Second, the company said it remains focused on delivering its 2023 EPS guidance of $1.54-1.60/share. Third, NiSource is focused on closing the announced NIPSCO transaction by year-end 2023.

Meeting with Ohio State Representative Bill Seitz (30th District of the Ohio House of Representatives)

- Our discussion with Bill Seitz focused primarily on four pending bills in the House, including HB79, HB33, HB197 and HB120. Bill also spoke about a rate case reform bill that is expected to be introduced soon.
- **HB79** would reinstate a modified energy efficiency program. The bill applies only to residential customers who can opt out, and commercial customers who would like to opt in. The prior legislation was involuntary. Another key difference in the new bill is that it has more modest attainment goals, including energy efficiency sales reductions of 0.5% per year, as opposed to prior program's 2.0% per year. In addition, the new legislation proposes a 3 to 5 year program, depending on PSC approval.
- **HB33** encourages the extension of electric transmission lines (through $1B state sponsored funding) to select sites with the goal of accelerating future growth.
- **HB197** is a community solar bill that would support developers of small non-utility scale installations in locations such as condo complexes and distressed economic areas. The bill calls for installing community solar equally (based on utility

This report is prepared solely for the use of Michael Weisenburger

customer count) across each of the utilities' territories. A key component of the bill is deciding how the solar developers should get compensated.

- **HB120** would repeal OVEC subsidies (subsidies for coal plants owned by the energy company consortium known as the Ohio Valley Electric Corporation). The proponents of the bill argue that the subsidies extend the life of coal plants and the current bill credits are temporary because of near term power market conditions.
- **Rate case reform bill to be introduced**: the legislation is expected to propose a requirement for rate case filings every 5-7 years with forward-looking test years. It would also propose additional trackers for cost recovery and would be intended to speed up the rate case decision process.

This report is prepared solely for the use of Michael Weisenburger

Company Changes			Rating			Target Price			Estimates Current Year			Estimates Next Year	
Symbol	Company	Price		Curr	Prev		Curr	Prev	Curr	Prev		Curr	Prev
AEP	American Electric Power	$84.54	-	IL	IL	▼	$90.00	$102.00	- $5.30	$5.30	-	$5.65	$5.65
AES	The AES Corporation	$21.01	-	OPF	OPF	-	$29.00	$30.00	- $1.70	$1.70	-	$1.90	$1.90
NI	NiSource Inc	$27.22	-	OPF	OPF	-	$30.00	$31.00	- $1.57	$1.57	-	$1.69	$1.69

Source: Company Data, Evercore ISI Research

Valuation and risks:

AEP:

Valuation: Our new TP is predicated on electric utility target P/E of 15x (vs 17x previously) close to where the group is trading today.

Risks: The perceivable risks to our thesis include unfavorable regulatory outcomes, cost management and sales growth.

AES:

Valuation: We value AES using a sum-of-the-parts analysis.

Risks: Our EPS forecast and target price could be too high / too low if: commodity prices, FX rates, and hydrology in Brazil worsen / recover, and or the proportional FCF falls short of articulated targets, limiting share repurchase potential and debt reduction / FCF meets targets and capital allocation proves more accretive than we assume. Also, their backlog of infrastructure projects could fail to realize / meet ROE targets, causing net income to fall short of / match our estimates.

NI:

Valuation: We value NI using a sum-of-the-parts analysis.

Risks: Risks to our thesis include an inability to deploy capital at the company's expected rate resulting in a lower rate base and regulatory pressure resulting in lower allowed ROEs

This report is prepared solely for the use of Michael Weisenburger

ANALYST CERTIFICATION

The analysts, Durgesh Chopra, Michael Lonegan, Sharon Wang, primarily responsible for the preparation of this research report attest to the following: (1) that the views and opinions rendered in this research report reflect his or her personal views about the subject companies or issuers; and (2) that no part of the research analyst's compensation was, is, or will be directly related to the specific recommendations or views in this research report.

IMPORTANT DISCLOSURES

This report is approved and/or distributed by Evercore Group L.L.C. ("Evercore Group"), a U.S. licensed broker-dealer regulated by the Financial Industry Regulatory Authority ("FINRA"), and Evercore ISI International Limited ("ISI UK"), which is authorised and regulated in the United Kingdom by the Financial Conduct Authority. The institutional sales, trading and research businesses of Evercore Group and ISI UK collectively operate under the global marketing brand name Evercore ISI ("Evercore ISI"). Both Evercore Group and ISI UK are subsidiaries of Evercore Inc. ("Evercore "). The trademarks, logos and service marks shown on this report are registered trademarks of Evercore.

The analysts and associates responsible for preparing this report receive compensation based on various factors, including Evercore's Partners' total revenues, a portion of which is generated by affiliated investment banking transactions. Evercore ISI seeks to update its research as appropriate, but various regulations may prevent this from happening in certain instances. Aside from certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Evercore ISI generally prohibits analysts, associates and members of their households from maintaining a financial interest in the securities of any company in the analyst's area of coverage. Any exception to this policy requires specific approval by a member of our Compliance Department. Such ownership is subject to compliance with applicable regulations and disclosure. Evercore ISI also prohibits analysts, associates and members of their households from serving as an officer, director, advisory board member or employee of any company that the analyst covers.

This report may include a Tactical Call, which describes a near-term event or catalyst affecting the subject company or the market overall and which is expected to have a short-term price impact on the equity shares of the subject company. This Tactical Call is separate from the analyst's long-term recommendation (Outperform, In Line or Underperform) that reflects a stock's forward 12-month expected return, is not a formal rating and may differ from the target prices and recommendations reflected in the analyst's long-term view.

Applicable current disclosures regarding the subject companies covered in this report are available at the offices of Evercore ISI: 55 East 52nd Street, New York, NY 10055, and at the following site: https://evercoreisi.mediasterling.com/disclosure.

Evercore and its affiliates may have, or have had, business relationships with the companies mentioned in this report.

Additional information on securities or financial instruments mentioned in this report is available upon request.

Ratings Definitions

Current Ratings Definition

Evercore ISI's recommendations are based on a stock's total forecasted return over the next 12 months. Total forecasted return is equal to the expected percentage price return plus gross dividend yield. We divide our stocks under coverage into three primary ratings categories, with the following return guidelines:

Outperform- the total forecasted return is expected to be greater than the expected total return of the analyst's coverage sector.
In Line- the total forecasted return is expected to be in line with the expected total return of the analyst's coverage sector.
Underperform- the total forecasted return is expected to be less than the expected total return of the analyst's coverage sector.
Coverage Suspended- the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances.*
Rating Suspended- Evercore ISI has suspended the rating and target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon.*

*Prior to October 10, 2015, the "Coverage Suspended" and "Rating Suspended" categories were included in the category "Suspended."

FINRA requires that members who use a ratings system with terms other than "Buy," "Hold/Neutral" and "Sell" to equate their own ratings to these categories. For this purpose, and in the Evercore ISI ratings distribution below, our Outperform, In Line, and Underperform ratings can be equated to Buy, Hold and Sell, respectively.

Historical Ratings Definitions

Prior to March 2, 2017, Evercore ISI's recommendations were based on a stock's total forecasted return over the next 12 months:

Buy- the total forecasted return is expected to be greater than 10%
Hold- the total forecasted return is expected to be greater than or equal to 0% and less than or equal to 10%

This report is prepared solely for the use of Michael Weisenburger

Sell -the total forecasted return is expected to be less than 0%

On October 31, 2014, Evercore Partners acquired International Strategy & Investment Group LLC ("ISI Group") and ISI UK (the "Acquisition") and transferred Evercore Group's research, sales and trading businesses to ISI Group. On December 31, 2015, the combined research, sales and trading businesses were transferred back to Evercore Group in an internal reorganization. Since the Acquisition, the combined research, sales and trading businesses have operated under the global marketing brand name Evercore ISI.

ISI Group and ISI UK:

Prior to October 10, 2014, the ratings system of ISI Group LLC and ISI UK which was based on a 12-month risk adjusted total return:

Strong Buy- Return > 20%
Buy- Return 10% to 20%
Neutral - Return 0% to 10%
Cautious- Return -10% to 0%
Sell- Return< -10%

For disclosure purposes, ISI Group and ISI UK ratings were viewed as follows: Strong Buy and Buy equate to Buy, Neutral equates to Hold, and Cautious and Sell equate to Sell.

Evercore Group:

Prior to October 10, 2014, the rating system of Evercore Group was based on a stock's expected total return relative to the analyst's coverage universe over the following 12 months. Stocks under coverage were divided into three categories:

Overweight- the stock is expected to outperform the average total return of the analyst's coverage universe over the next 12 months.
Equal-Weight- the stock is expected to perform in line with the average total return of the analyst's coverage universe over the next 12 months.
Underweight -the stock is expected to underperform the average total return of the analyst's coverage universe over the next 12 months.
Suspended- the company rating, target price and earnings estimates have been temporarily suspended.

For disclosure purposes, Evercore Group's prior "Overweight," "Equal-Weight" and "Underweight" ratings were viewed as "Buy," "Hold" and "Sell," respectively.

Ratings Definitions for Portfolio-Based Coverage

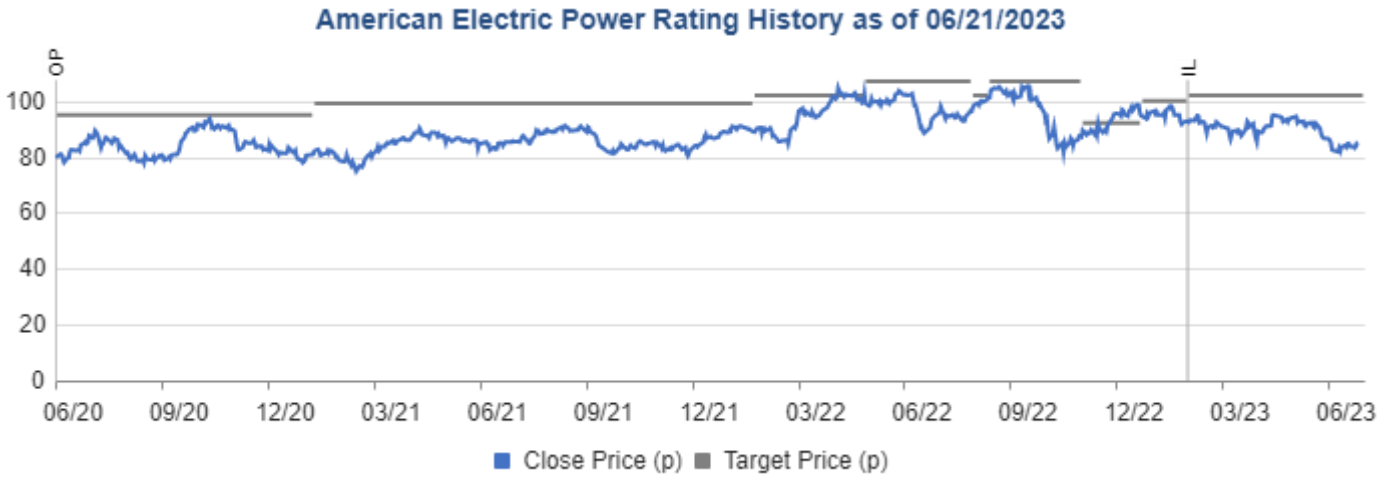
Evercore ISI utilizes an alternate rating system for companies covered by analysts who use a model portfolio-based approach to determine a company's investment recommendation. Covered companies are included or not included as holdings in the analyst's Model Portfolio, and have the following ratings:

Long- the stock is a positive holding in the model portfolio; the total forecasted return is expected to be greater than 0%.
Short- the stock is a negative holding in the model portfolio; the total forecasted return is expected to be less than 0%.
No Position- the stock is not included in the model portfolio.
Coverage Suspended- the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company, and in certain other circumstances; a stock in the model portfolio is removed.
Rating Suspended - Evercore ISI has suspended the rating and/or target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon; a stock in the model portfolio is removed.

Stocks included in the model portfolio will be weighted from 0 to 100% for Long and 0 to -100% for Short. A stock's weight in the portfolio reflects the analyst's degree of conviction in the stock's rating relative to other stocks in the portfolio. The model portfolio may also include a cash component. At any given time the aggregate weight of the stocks included in the portfolio and the cash component must equal100%.

Stocks assigned ratings under the alternative model portfolio-based coverage system cannot also be rated by Evercore ISI's Current Ratings definitions of Outperform, In Line and Underperform.

FINRA requires that members who use a ratings system with terms other than "Buy," "Hold/Neutral" and "Sell," to equate their own ratings to these categories. For this purpose, and in the Evercore ISI ratings distribution below, our Long, No Position and Short ratings can be equated to Buy, Hold and Sell respectively.



Evercore ISI rating (as of 06/21/2023)

Coverage Universe			**Investment Banking Services I Past 12 Months**		
Ratings	**Count**	**Pct.**	**Ratings**	**Count**	**Pct.**
Buy	468	57	Buy	59	13

GENERAL DISCLOSURES

This report is prepared solely for the use of Michael Weisenburger

This report is approved and/or distributed by Evercore Group L.L.C. (“Evercore Group”), a U.S. licensed broker-dealer regulated by the Financial Industry Regulatory Authority (“FINRA”) and by International Strategy & Investment Group (UK) Limited (“ISI UK”), which is authorized and regulated in the United Kingdom by the Financial Conduct Authority. The institutional sales, trading and research businesses of Evercore Group and ISI UK collectively operate under the global marketing brand name Evercore ISI ("Evercore ISI"). Both Evercore Group and ISI UK are subsidiaries of Evercore Inc. ("Evercore"). The trademarks, logos and service marks shown on this report are registered trademarks of Evercore Inc.

This report is provided for informational purposes only. It is not to be construed as an offer to buy or sell or a solicitation of an offer to buy or sell any financial instruments or to participate in any particular trading strategy in any jurisdiction. The information and opinions in this report were prepared by employees of affiliates of Evercore. The information herein is believed by Evercore ISI to be reliable and has been obtained from public sources believed to be reliable, but Evercore ISI makes no representation as to the accuracy or completeness of such information. Opinions, estimates and projections in this report constitute the current judgment of the author as of the date of this report. They do not necessarily reflect the opinions of Evercore or its affiliates and are subject to change without notice. In addition, opinions, estimates and projections in this report may differ from or be contrary to those expressed by other business areas or groups of Evercore and its affiliates. Evercore ISI has no obligation to update, modify or amend this report or to otherwise notify a reader thereof in the event that any matter stated herein, or any opinion, projection, forecast or estimate set forth herein, changes or subsequently becomes inaccurate. Facts and views in Evercore ISI research reports and notes have not been reviewed by, and may not reflect information known to, professionals in other Evercore affiliates or business areas, including investment banking personnel. Evercore ISI salespeople, traders and other professionals may provide oral or written market commentary or trading strategies to our clients that reflect opinions that are contrary to the opinions expressed in this research. Our asset management affiliates and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

Evercore ISI does not provide individually tailored investment advice in research reports. The financial instruments discussed in this report are not suitable for all investors and investors must make their own investment decisions using their own independent advisors as they believe necessary and based upon their specific financial situations and investment objectives. This report has been prepared without regard to the particular investment strategies or financial, tax or other personal circumstances of the recipient. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to the recipient’s individual circumstances, or otherwise constitutes a personal recommendation to the recipient. None of Evercore Group or its affiliates will treat any recipient of this report as its customer by virtue of the recipient having received this report.

Securities and other financial instruments discussed in this report, or recommended or offered by Evercore ISI, are not insured by the Federal Deposit Insurance Corporation and are not deposits of or other obligations of any insured depository institution. If a financial instrument is denominated in a currency other than an investor’s currency, a change in exchange rates may adversely affect the price or value of, or the income derived from the financial instrument, and such investor effectively assumes such currency risk. In addition, income from an investment may fluctuate and the price or value of financial instruments described in this report, either directly or indirectly, may rise or fall. Estimates of future performance are based on assumptions that may not be realized. Furthermore, past performance is not necessarily indicative of future performance.

Please note that this report was prepared for and distributed by Evercore ISI to its institutional investor and market professional customers. Recipients who are not institutional investor or market professional customers of Evercore ISI should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.

Electronic research is simultaneously distributed to all clients. This report is provided to Evercore ISI clients and may not be redistributed, retransmitted or disclosed, in whole or in part, or in any form or manner, without the express written consent of Evercore ISI. Receipt and review of this research report constitutes your agreement not to redistribute, retransmit, or disclose to others the contents, opinions, conclusion or information contained in this report (including any investment recommendations, estimates or target prices) without first obtaining express permission from Evercore ISI.

This report is not intended for distribution to or use by any person or entity in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Evercore Group or its affiliates to any registration or licensing requirement within such jurisdiction. If this report is being distributed by a financial institution other than Evercore ISI or its affiliates, that financial institution is solely responsible for such distribution and for compliance with the laws, rules and regulations of any jurisdiction where this report is distributed. Clients of that financial institution should contact that institution to effect any transaction in the securities mentioned in this report or if such clients require further information. This report does not constitute investment advice by Evercore ISI to the clients of the distributing financial institution, and neither Evercore ISI nor its affiliates, nor their respective officers, directors or employees, accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content.

For persons in the UK: In making this report available, Evercore makes no recommendation to buy, sell or otherwise deal in any securities or investments whatsoever and you should neither rely or act upon, directly or indirectly, any of the information contained in this report in respect of any such investment activity. This report is being directed at or distributed to, (a) persons who fall within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”)); (b) persons falling within the definition of high net worth companies, unincorporated associations, etc. (set out in Article 49(2) of the Order); (c) other persons to whom it may otherwise lawfully be communicated (all such persons together being referred to as “relevant persons”). This report must not be acted on or relied on by persons who are not relevant persons.

For persons in Switzerland: The distribution of these materials to persons or entities in Switzerland is not intended to, and does not, constitute a financial service under the Swiss Financial Services Act (FinSA). In particular, the distribution of these materials does not constitute the provision of personal recommendations on transactions with financial instruments (investment advice) within the meaning of Article 3(c)(4) of FinSA.

For persons in Australia: Evercore does not have an Australian Financial Services License ("AFSL"). This report is only to be distributed to persons who fall within the definition of "wholesale" investors under section 761G of the Corporations Act 2001 (Cth). This report must not be

This report is prepared solely for the use of Michael Weisenburger

acted on or relied on by persons who are not wholesale investors. Evercore relies on the relief provided under ASIC Corporations (Foreign Financial Services Providers—Limited Connection) Instrument 2017/182 to provide this report to wholesale investors in Australia without an AFSL.

For persons in New Zealand: This material has been prepared by Evercore Group L.L.C. for distribution in New Zealand to financial advisors and wholesale clients only and has not been prepared for use by retail clients (as those terms are defined in the Financial Markets Conduct Act 2013 ('FMCA')). Evercore Group L.L.C. is not, and is not required to be, registered or licensed under the FMCA, and unless otherwise stated any financial products referred to in this material are generally only available in New Zealand for issue to those satisfying the wholesale investor criteria in the FMCA.

Applicable current disclosures regarding the subject companies covered in this report are available at the offices of Evercore ISI: 55 East 52nd Street, New York, NY 10055, and at the following site: https://evercoreisi.mediasterling.com/disclosure.

In compliance with the European Securities and Markets Authority's Market Abuse Regulation, a list of all Evercore ISI recommendations disseminated in the preceding 12 months for the subject companies herein, may be found at the following site: https://evercoreisi.mediasterling.com/disclosure.

First Crack at 1Q23

We believe NiSource's 1Q23 earnings release has neutral implications for the stock. Q1 EPS slightly beat consensus. The company reaffirmed its 2023 non-GAAP NOEPS earnings guidance and annual non-GAAP NOEPS growth of 6-8% through 2027. NIPSCO minority sale is on track for 2023.

Key Takes:

- NI reported Q1 adjusted diluted Net operating EPS (NOEPS) of $0.77 vs. our estimate of $0.77 and street consensus of $0.75. 1Q23 NOEPS is 3% higher than 1Q22 NOEPS of $0.75.
- Reaffirmed 2023 non-GAAP NOEPS guidance range of $1.54-$1.60.
    - Midpoint of $1.57 represents 6.8% growth off 2022 NOEPS. Consensus is at $1.55.
- Reaffirmed annual non-GAAP NOEPS growth of 6-8% through 2027.
    - Off the 2023 earnings guidance range of $1.54-$1.60.
- Reaffirmed $15B 2023-2027 capex plan with ~75% of investments beginning earning in less than 18 months
    - Driving 8%-10% annual utility rate base growth
- Northern Indiana Public Service Company (NIPSCO) minority sale process on track for 2023
- Long-term 14-16% FFO/Debt target reaffirmed
- NIPSCO reached a settlement in the electric rate case on March 10th
- Shawn Anderson, formerly senior vice president of risk and chief strategy officer, moved into the role of executive vice president and chief financial officer, effective Mar 27th

NI will host a conference call at 11am ET. Dial-in: 1 (888) 330-2391. Passcode: 28323. We will follow the call with a detailed note.

Additional Details:

- **Minority Interest Sale:** Minority interest sale of NIPSCO is still expected to be completed in 2023 and continues to track as expected. The company remains confident in the attractiveness of the asset and has previously stated that there is no decline in interest attributable to interest rates, particularly given the quality of the potential counterparties with ready capital to deploy, bank leverage tools, and long-term investment preference. NiSource has initiated the sale process, and we expect an announcement by mid-year and close by year-end. We estimate $1.5-$2B in cash proceeds.
- **NIPSCO Electric rate case**: On March 10th, NIPSCO and other parties reached a settlement agreement in its electric rate case in Indiana. The settlement proposed a $292M rate increase compared with $395M company requested, including base rate increase and tracker. The parties agreed on an ROE of 9.8% versus current 9.75%, and an equity layer of 51.63% versus current 47.86%. Recall that company requested a 10.4% ROE and a 58.5% equity ratio on a rate base of $5.95B. We view the settlement as constructive if approved. A final Commission order is expected in mid-August with rates going into effect in September.
- **Virginia gas rate case**: On Dec 9th, Columbia Gas of Virginia reached a settlement with $25.8 million rate increase, inclusive of SAVE (Steps to Advance Virginia's Energy Plan) infrastructure tracker ($14.5MM), representing a settlement as to a specific revenue number but not as to a specific ROE. Recall that NiSource requested $40.6MM revenue increase net of the SAVE infrastructure tracker ($17.7MM) with a 10.75% ROE and 39.3% equity ratio on a rate base of $1.0B with a 12/21 test year. A final order is expected in 2Q23.

Please see the analyst certification and important disclosures on page 4 of this report. Evercore ISI and affiliates do and seek to do business with companies covered in its research reports. Investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.
© 2023. Evercore Group L.L.C. All rights reserved.

- **OH gas rate case**: On Oct 31st, 2022, Columbia Gas of Ohio filed a settlement representing a $68.2M revenue increase with 9.6% ROE and 50.6% equity layer. The company originally requested $221MM with ROE of 10.9%. The equity ratio request of ~51% was not disputed. The commission approved the settlement in January 2023 for new rates effective in March.
- **Leadership changes:** The company announced several leadership changes on March 15th, link. Notably Shawn Anderson formerly senior vice president of risk and chief strategy officer, moved into the role of executive vice president and chief financial officer effective Mar 27th. Donald Brown, NiSource's former chief financial officer, assumed the role of executive vice president and chief innovation officer on Mar 27th, replacing Melody Birmingham, who was named as executive vice president, and group president, NiSource utilities.

VALUATION METHODOLOGY

We use a SOTP analysis to arrive at our price target

RISKS

Risks to our thesis include an inability to deploy capital at the company's expected rate resulting in a lower rate base and regulatory pressure resulting in lower allowed ROEs

TIMESTAMP

ANALYST CERTIFICATION

The analysts, Durgesh Chopra, Sharon Wang, primarily responsible for the preparation of this research report attest to the following: (1) that the views and opinions rendered in this research report reflect his or her personal views about the subject companies or issuers; and (2) that no part of the research analyst's compensation was, is, or will be directly related to the specific recommendations or views in this research report.

IMPORTANT DISCLOSURES

This report is approved and/or distributed by Evercore Group L.L.C. ("Evercore Group"), a U.S. licensed broker-dealer regulated by the Financial Industry Regulatory Authority ("FINRA"), and Evercore ISI International Limited ("ISI UK"), which is authorised and regulated in the United Kingdom by the Financial Conduct Authority. The institutional sales, trading and research businesses of Evercore Group and ISI UK collectively operate under the global marketing brand name Evercore ISI ("Evercore ISI"). Both Evercore Group and ISI UK are subsidiaries of Evercore Inc. ("Evercore "). The trademarks, logos and service marks shown on this report are registered trademarks of Evercore.

The analysts and associates responsible for preparing this report receive compensation based on various factors, including Evercore's Partners' total revenues, a portion of which is generated by affiliated investment banking transactions. Evercore ISI seeks to update its research as appropriate, but various regulations may prevent this from happening in certain instances. Aside from certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Evercore ISI generally prohibits analysts, associates and members of their households from maintaining a financial interest in the securities of any company in the analyst's area of coverage. Any exception to this policy requires specific approval by a member of our Compliance Department. Such ownership is subject to compliance with applicable regulations and disclosure. Evercore ISI also prohibits analysts, associates and members of their households from serving as an officer, director, advisory board member or employee of any company that the analyst covers.

This report may include a Tactical Call, which describes a near-term event or catalyst affecting the subject company or the market overall and which is expected to have a short-term price impact on the equity shares of the subject company. This Tactical Call is separate from the analyst's long-term recommendation (Outperform, In Line or Underperform) that reflects a stock's forward 12-month expected return, is not a formal rating and may differ from the target prices and recommendations reflected in the analyst's long-term view.

Applicable current disclosures regarding the subject companies covered in this report are available at the offices of Evercore ISI: 55 East 52nd Street, New York, NY 10055, and at the following site: https://evercoreisi.mediasterling.com/disclosure.

Evercore and its affiliates, and I or their respective directors, officers, members and employees, may have, or have had, interests or qualified holdings on issuers mentioned in this report. Evercore and its affiliates may have, or have had, business relationships with the companies mentioned in this report.

Additional information on securities or financial instruments mentioned in this report is available upon request.

Ratings Definitions

Current Ratings Definition

Evercore ISI's recommendations are based on a stock's total forecasted return over the next 12 months. Total forecasted return is equal to the expected percentage price return plus gross dividend yield. We divide our stocks under coverage into three primary ratings categories, with the following return guidelines:

Outperform- the total forecasted return is expected to be greater than the expected total return of the analyst's coverage sector.
In Line- the total forecasted return is expected to be in line with the expected total return of the analyst's coverage sector.
Underperform- the total forecasted return is expected to be less than the expected total return of the analyst's coverage sector.
Coverage Suspended- the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances.*
Rating Suspended- Evercore ISI has suspended the rating and target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon.*

*Prior to October 10, 2015, the "Coverage Suspended" and "Rating Suspended" categories were included in the category "Suspended."

FINRA requires that members who use a ratings system with terms other than "Buy," "Hold/Neutral" and "Sell" to equate their own ratings to these categories. For this purpose, and in the Evercore ISI ratings distribution below, our Outperform, In Line, and Underperform ratings can be equated to Buy, Hold and Sell, respectively.

Historical Ratings Definitions

Prior to March 2, 2017, Evercore ISI's recommendations were based on a stock's total forecasted return over the next 12 months:

Buy- the total forecasted return is expected to be greater than 10%
Hold- the total forecasted return is expected to be greater than or equal to 0% and less than or equal to 10%
Sell -the total forecasted return is expected to be less than 0%

On October 31, 2014, Evercore Partners acquired International Strategy & Investment Group LLC ("ISI Group") and ISI UK (the "Acquisition") and transferred Evercore Group's research, sales and trading businesses to ISI Group. On December 31, 2015, the combined research, sales and trading businesses were transferred back to Evercore Group in an internal reorganization. Since the Acquisition, the combined research, sales and trading businesses have operated under the global marketing brand name Evercore ISI.

ISI Group and ISI UK:

Prior to October 10, 2014, the ratings system of ISI Group LLC and ISI UK which was based on a 12-month risk adjusted total return:

Strong Buy- Return > 20%
Buy- Return 10% to 20%
Neutral - Return 0% to 10%
Cautious- Return -10% to 0%
Sell- Return< -10%

For disclosure purposes, ISI Group and ISI UK ratings were viewed as follows: Strong Buy and Buy equate to Buy, Neutral equates to Hold, and Cautious and Sell equate to Sell.

Evercore Group:

Prior to October 10, 2014, the rating system of Evercore Group was based on a stock's expected total return relative to the analyst's coverage universe over the following 12 months. Stocks under coverage were divided into three categories:

Overweight- the stock is expected to outperform the average total return of the analyst's coverage universe over the next 12 months.
Equal-Weight- the stock is expected to perform in line with the average total return of the analyst's coverage universe over the next 12 months.
Underweight -the stock is expected to underperform the average total return of the analyst's coverage universe over the next 12 months.
Suspended- the company rating, target price and earnings estimates have been temporarily suspended.

For disclosure purposes, Evercore Group's prior "Overweight," "Equal-Weight" and "Underweight" ratings were viewed as "Buy," "Hold" and "Sell," respectively.

Ratings Definitions for Portfolio-Based Coverage

Evercore ISI utilizes an alternate rating system for companies covered by analysts who use a model portfolio-based approach to determine a company's investment recommendation. Covered companies are included or not included as holdings in the analyst's Model Portfolio, and have the following ratings:

Long- the stock is a positive holding in the model portfolio; the total forecasted return is expected to be greater than 0%.
Short- the stock is a negative holding in the model portfolio; the total forecasted return is expected to be less than 0%.
No Position- the stock is not included in the model portfolio.
Coverage Suspended- the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company, and in certain other circumstances; a stock in the model portfolio is removed.
Rating Suspended - Evercore ISI has suspended the rating and/or target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon; a stock in the model portfolio is removed.

Stocks included in the model portfolio will be weighted from 0 to 100% for Long and 0 to -100% for Short. A stock's weight in the portfolio reflects the analyst's degree of conviction in the stock's rating relative to other stocks in the portfolio. The model portfolio may also include a cash component. At any given time the aggregate weight of the stocks included in the portfolio and the cash component must equal100%.

Stocks assigned ratings under the alternative model portfolio-based coverage system cannot also be rated by Evercore ISI's Current Ratings definitions of Outperform, In Line and Underperform.

FINRA requires that members who use a ratings system with terms other than "Buy," "Hold/Neutral" and "Sell," to equate their own ratings to these categories. For this purpose, and in the Evercore ISI ratings distribution below, our Long, No Position and Short ratings can be equated to Buy, Hold and Sell respectively.

Evercore ISI rating (as of 03 May 2023)

Off to a Bumpy Start – Q1 2023 Preview

Following a strong 2022 (UTY/S&P500 -2.4%/-19.4%), utilities have materially underperformed in the first quarter of 2023 (UTY/S&P500 -4.5%/+7.0%) and YTD (UTY/S&P500 -2.9%/+8.2% pg.31). Utilities are now trading at ~18.3x, still above the 15-year average multiple of 17x (NTM) (pg.32). Versus Bond Yields, group valuation remains elevated at 20% expensive (pg.34). NTM P/E relative to S&P500 is 1.00x, lower than the historical average of 1.07x (pg.35). Our sector thesis played out last year (see our Recession read through for Utilities deep dive note published in late March 2022 here) as utilities materially outperformed**.** Against an ongoing challenging macro backdrop (high inflation/rates, elevated customer bills driven by higher fuel costs, regulatory risk rising throughout the year), the group is expensive absolutely and versus bond yields. While Utes outperform in the run-up to a recession, the sector lags during and post the recession. With a recession approaching, we remain cautious and expect reversal of the material outperformance last year.

Q1 2023 Preview (Bumpy Start) – We expect mild weather to be a dominant theme heading into earnings next week. As we point out in our note on April 9th US weather in 1Q 2023 was abnormally warm for utilities vs. the same period last year, and as compared to normal. Based on National Oceanic and Atmospheric Administration (NOAA) heating degree day data, the weather in 1Q 2023 drove -8% lower degree days vs. last year and -10% below normal, on average across the US (pg.36). As we show on pg.38, we expect over 70% of utilities to miss consensus expectations with mild weather being the major driver. For the majority, we expect weather to be a headwind ranging from -0.5% to -7.4% (Average -2.4%) compared to our 23E for each company (pg.37). With that said, we expect many companies to implement cost mitigations, and to reaffirm 2023 EPS targets, for now, until after the third quarter which makes up a substantial portion of annual electric sales. Separately, we hosted Moody's Utilities team in March (link), and they do not currently see material risks for utilities amidst the latest developments in the banking sector. The credit agency stated that the utilities sector is primarily dependent on larger banks (not regional ones) for their credit facilities and that companies currently have strong access to capital markets. Moody's did add that it is thinking more cautiously about utilities with revolver facilities coming due soon. We are positive on NI and PEG going into 1Q prints and cautious on AES and ETR.

Stock Selection. We prefer value over quality: DTE, ES, ETR, EXC, FE, NI, PPL and SRE are Outperform-rated names within the regulated value bucket. We are also Outperform-rated on AEE, CNP and XEL within quality. Within diversified names, we view AES (top pick) as best risk/reward and are Outperform-rated on PEG. Amongst IPP's, we have Outperform ratings on CEG and VST.

Within, we include company-specific tear sheets with our / consensus first quarter 2023 EPS estimates along with discussion on key investor debates going into earnings. On page 40, we show trends of short interest by company over two-week, four-week and six-month timeframes.

Please see the analyst certification and important disclosures on page 41 of this report. Evercore ISI and affiliates do and seek to do business with companies covered in its research reports. Investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Outperform **TP $30**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q1 EPS Bridge:** We project year-over-year EPS to decrease by -$0.01 to $0.20. Weather was likely not a major factor during the quarter. Last year in 1Q22, there were +$0.02 of positive nonrecurring items that need to be adjusted out for comparison purposes. In terms of negative YoY drivers, we primarily anticipate lost earnings from asset sales and higher interest expense. In terms of positive YoY drivers, we expect AES to benefit from a Fluence earnings growth, as well as from a small amount from new renewable generation that is typically not a large driver in the first quarter.

- **What to look for in the earnings report (Key debates/themes):**
  - **Q1 expectations**: We expect AES to reaffirm its 2023 EPS guidance of $1.65-$1.75, the company also plans to introduce new business reporting segments. We expect the most incremental detail for AES to be provided at its May 8th Investor Day a few days after the earnings call, which could include some further discussion of the 2023 earnings outlook, which does not include up to $0.10 potential EPS upside from 600 MW of new 2023 projects in the US that are currently expected to slip to 2024, but which AES is still working to complete this year and updated/extended EBITDA/earnings growth rate through 2027. AES currently targets long-term EPS growth rate of 7-9% through 2025 (based off of 2020).Below are more topics that could also be discussed on the Q1 call.
  - **Renewable PPAs and backlog:** The company's backlog, which includes projects with signed contracts, but which are not yet operational, is now 12,179 MW, including 5,453 MW under construction. AES is targeting signing a total of 14-17 GW of new long-term renewables PPAs through 2025. Management still expects 4.5-5.5GW of new PPAs each year, on average, but stated that it could be lumpy.
  - **Indiana IRP:** AES filed an Indiana IRP in December 2022. Its near-term plan includes the conversion of the utility's last two coal units to gas in 2025 using an existing on-site gas pipeline. It also includes the addition of up to 1.3 GWs of new wind, solar and storage by 2027 and should reduce AES Indiana's carbon intensity by 2/3rds from 2018 to 2030.
  - **Asset sales:** AES is still targeting $1B in proceeds from asset sales in total from 2022-2025. They received $150MM in 2022 and project $400-$600MM this year.
  - **Coal plant PPA termination:** on April 18th, AES announced an agreement to terminate the PPA for its 205 MW Warrior Run coal plant in Maryland. The off taker, Potomac Edison, a subsidiary of FirstEnergy, agreed to terminate the PPA for a total consideration of $357MM, subject to approval by the Maryland PSC. If approved, the early termination of the PPA is forecasted to save Potomac Edison's customers nearly $80MM over the next seven years and will help the State of Maryland achieve its decarbonization targets. Under the terms of the agreement, AES will continue to operate the Warrior Run plant through at least May 2024. AES will maintain full operational control of the site following decommissioning. AES' $357MM of proceeds is expected to be utilized for its targeted $1B of asset sales through 2025.
  - **Ohio ESP 4 filing:** In September 2022, AES Ohio filed a new ESP 4 to provide a regulatory foundation to upgrade and modernize its network and settle any outstanding regulatory proceedings. The company is asking for a rider with quarterly updates. AES recently reached a settlement and will provide an update on the financial impacts on the Q1 call. A hearing will be held in early May with a final decision expected mid-year 2022 or sometime this summer. Note that the final order in the December 2022 Ohio rate case outcome will take effect once the pending ESP is approved. In that case, AES was granted a $76MM revenue increase with a 10.0% ROE, 53.87% equity ratio on a rate base of $783MM.
  - **Green hydrogen production**: In December 2022, AES and Air Products announced a joint venture to invest ~$4B to build, own and operate a green hydrogen production facility in Texas. This mega-scale renewable to hydrogen project includes 1.4 GWs of wind and solar generation, along with electrolyzer capacity capable of producing >200 metric tons per day (MT/D) of green hydrogen, making it the largest green hydrogen facility in the US. The facility is targeted to begin commercial operations in 2027 and will serve growing demand in the mobility market as well as other industrial markets. AES projects a 10-13% levered after-tax return (or $40-52MM, $0.07 annual EPS at the mid-pt) on their equity portion of the investment ($400MM), with the remaining $1.6B to be funded by debt and/or tax equity. Lastly, Alberta Investment Management Company (AIMCo) is an investor in AES' clean energy business and will fund 25% of AES' capital investment. See our note here.
  - **Exposure to Silicon Valley Bank, Credit Suisse or other**: AES' exposure to SVB is not seen as a material risk because the SVB-sponsored revolving credit is relatively small and should be easy to replace.

- **Positioning into Qtr: Negative.** Our below consensus EPS estimate drives our negative view. Furthermore, AES is expected to introduce new segment and disclosures (EBITDA or cash flow metrics vs EPS previously) at the upcoming Investor Day, which creates some uncertainty in the near team and limits upside in our view.

Outperform **TP $94**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q1 EPS Bridge:** We project year-over-year EPS to decrease -$0.02 to $0.95. Last year in 1Q22, weather was $0.02 favorable and this year in 1Q23 we expect it to be -$0.08 unfavorable.

- **What to look for in the earnings report (Key debates/themes):**
  - **Q1 expectations:** Ameren typically reaffirms its guidance on its first quarter calls. We expect the company to maintain its 2023 EPS guidance of $4.25-4.45, reiterate its long-term EPS growth target of 6-8% for 2023-2027, reaffirm its $19.7 billion capital plan for 2023-2027, and maintain its rate base growth outlook of 8% for 2022-2027. Below are thematic topics we believe could be discussed.
  - **Missouri electric rate case settlement**: On Mar. 29, 2023, parties reached settlement for a $140MM revenue increase with an unspecified allowed ROE, capital structure and rate base. The annual revenue increase drivers include increased investments made under the Smart Energy Plan, including higher cost of capital and depreciation expense, and increased net fuel expense due to reduced off system sales primarily driven by reduced operations at Rush Island Energy Center. The settlement also includes a continuation of existing FAC, RESRAM and other regulatory mechanisms. A MoPSC decision is expected by June 2023 for new rates effective by July 1, 2023. Recall on March 24, 2023, Ameren Missouri filed true-up testimony requesting a $239MM annual revenue increase with a 10.2% ROE and equity ratio of 51.91%. Also on March 24, 2023, MoPSC Staff filed true-up testimony recommending a $107MM annual revenue increase with an ROE of 9.59% (midpoint of 9.34% to 9.84% range) and an equity ratio of 51.91%.
  - **Illinois multi-year rate case filing**: Staff/intervenor testimony is due on May 11th, and a regulatory decision is required by December 2023. Recall on January 20th, Ameren filed this multi-year electric rate case with the Illinois commission to set distribution rates for 2024 through 2027. For 2024, the company requested a revenue increase of $175MM with a 10.5% ROE and 53.99% equity ratio on a forecasted average annual rate base of $4.3 billion. For 2025, Ameren requested a revenue increase of $91MM with a 10.5% ROE and 53.97% equity ratio on a forecasted average annual rate base of $4.6 billion. For 2026, the company requested a revenue increase of $104MM with a 10.5% ROE and 54.02% equity ratio on a forecasted average annual rate base of $5.0 billion. For 2027, Ameren requested a revenue increase of $79MM with a 10.5% ROE and 54.03% equity ratio on `a forecasted average annual rate base of $5.3 billion. AEE has said it also proposed to defer 50% of the 2024 rate increase of $175MM as a regulatory asset to be collected from customers in 2026. Recall on Sept. 27, 2022, the Illinois commission issued performance incentives for Ameren (see our note).
  - **MISO transmission planning**: Ameren has been assigned $1.8B of the ~$10B of MISO approved Tranche 1 transmission projects. In addition to the assigned projects, MISO approved $700MM of competitive projects that cross through AEE's Missouri territory, which provide additional potential capex opportunities for Ameren. RFPs are due for the $172MM project (Orient-Denny-Fairport) in Missouri on May 2023, for the $560MM project (Denny-Zachary-Thomas Hill-Maywood) in Missouri on November 2023, and for the $22MM project (Skunk River – Ipava) in Illinois on October 2023. The competitive bidding process is expected to take 12-24 months. For projects assigned to AEE, the company expects the capex to begin in 2025 with completion dates expected near the end of this decade (current capex plan includes $0.8B of the $1.8B). Work on three additional MISO tranches has begun and MISO has indicated that an initial set of Tranche 2 projects, also located at MISO North, is scheduled to be approved in 4Q23. Projects included in Tranche 3 are expected to be located in MISO South, with approval scheduled for 4Q24, while projects identified in Tranche 4 are expected to improve transfer capability between MISO North and MISO South, with approval scheduled for 4Q25.
  - **Solar projects**: Huck Finn's CCN was approved in February 2023, and the project has a targeted in-service date in 4Q24. Ameren's Boomtown CCN was approved this month, and the project has targeted in-service date of 4Q24 as well. Both Huck Finn (200 MW) and Boomtown (150 MW) are already included in the company's capex plan.
  - **Rush Island**: The original March 31, 2024 compliance date remains in effect unless extended by the court. Ameren expects a decision in the nearer term.
  - **Illinois gas rate case**: Staff / intervenor testimony is due May 5th with a decision required by Dec. 2023 for new rates expected to be effective by early Dec. 2023. Recall in Jan. 2023, Ameren requested a $160MM annual base rate increase that includes ~$77MM that would otherwise be recovered in 2024 under QIP and other riders. The request is based on a 10.7% ROE and 54% equity ratio on a $2.9 billion rate base with a 2024 future test year. The rate base is as of year-end 2023 plus estimated average 2024 rate base additions.

- **Positioning into Qtr: Neutral**.

In Line **TP $102**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q1 EPS Bridge:** We project year-over-year EPS to decrease by -$0.08 to $1.14/share driven the most by very unfavorable weather. In terms of negative YoY drivers, we also expect higher depreciation and amortization, increased interest expense, and higher property taxes. Positive YoY drivers primarily include rate relief, higher retail load, and the benefit of the TCOS and DCRF riders in Texas.

- **What to look for in the earnings report (Key debates/themes):**

  - **Q1 expectations:** AEP typically updates guidance on its third quarter call or for the EEI conference in November. As such, this quarter we expect AEP to reaffirm its 2023 EPS guidance of $5.19-5.39, its long-term 6-7% EPS growth forecast, and its five-year 2023-2027 capital plan of $40B, driving a 7.6% rate base CAGR. We anticipate the company will also reiterate its FFO to debt target of 14-15% and its equity financing plan. Below are thematic items we believe could be discussed on the Q1 call.
  - **Contracted Renewable asset sale:** in February 2023, AEP announced the sale of its contracted renewable assets to IRG Acquisition Holdings for enterprise value of $1.5B ($1.3B equity value is in line with our $1.2-1.4B estimate). The sale is expected to close in 2Q23 and will result in an after-tax GAAP loss of $100-150MM in 1Q23.
  - **Kentucky asset sale**: on February 13th, parties filed a new FERC 203 application requesting expedited approval as they work to close the transaction by April 26, 2023. FERC issued a notice incorporating a shortened 45-day comment deadline related to the application.
  - **Retail business strategic review**: AEP announced at its October 2022 Analyst Day that it had initiated a strategic review of its retail business to be complete in 2Q23; we estimate the company could generate $220-$260MM in net proceeds at 7-8x our estimate for 2023 EBITDA of $32MM.
  - **Credit metrics and equity issuance plan**: AEP's equity issuance plan for 2023-2027 remains $2.8B, including $100MM, $600MM, $700MM, $700MM and $700MM by year, respectively. The company will provide an update following the potential sale of Kentucky in late April. AEP's long-term FFO to debt target remains unchanged at 14-15%. Currently, the company stands at 13.2% on both a Moody's and GAAP basis, reflecting 100bps drag due to $1.7B deferred fuel balance at year-end 2022.
  - **Deferred fuel cost recovery in West Virginia**: AEP continues to work through recovery of ~$500MM in deferred fuel costs in West Virginia. The Commission recently instructed its Staff to finish its prudence review of the 2021-2022 costs. The state legislature passed securitization legislation on March 11th and it became law upon passage. There is a prudency review ongoing, and AEP will file later this year for bonds to be issued in the first half of next year.
  - **Rate case update:** On November 22nd, AEP filed a rate case in Oklahoma, requesting a net revenue increase of $103MM with an ROE of 10.4% and equity ratio of 54.6% on a rate base of $4.4B; a hearing is scheduled for May 9th with an expected Commission order in 2Q23. On March 31st, ApCo Virginia filed a rate case, requesting a net revenue increase of $160MM with a 10.6% ROE and 48.3% equity ratio on a rate base of $2.9 billion with a 12/31/22 test year.
  - **Regulated renewable filings:** For PSO, the company reached a settlement in Oklahoma in April 2023 for the 999.5 MW of wind/solar projects totaling $2.5B of investment; a final order is expected in 3Q23. For SWEPCO, the company also reached settlements in Arkansas and Louisiana in January and March 2023, respectively, in their regulated renewable filings and a decision in Texas is expected in 3Q23; these wind/solar projects total 999 MW and $2.2B of investment. Regardless of what is decided in Texas, Arkansas and Louisiana are expected to flex up their spending to the total $2.2B. For PSO and SWEPCO, these combined $4.7B of investments (SWEPCO $2.2B and Oklahoma $2.5B) are currently reflected in the five-year $40B capital plan. Recall ApCo's 209 MWs of owned solar and wind resources were approved by West Virginia and Virginia, marking a $500MM investment that is also included in the current capex plan.

- **Positioning into Qtr: Neutral**

This report is prepared solely for the use of Michael Weisenburger

CenterPoint Energy

Outperform **TP $32**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q1 EPS Bridge:** We project year-over-year EPS to decrease by -$0.01 to $0.46/share. We expect weather to contribute unfavorably in 1Q23 versus normal. In terms of negative YoY, there will be the loss of earnings from the Arkansas and Oklahoma gas LDC divestitures, higher depreciation & amortization expense, and increased interest expense. In terms of positive YoY drivers, we anticipate positive contributions from rate recovery, sales growth and O&M reductions.

- **What to look for in the earnings report (Key debates/themes):**

  - **Q1 expectations**: We expect CenterPoint to reaffirm its 2023 EPS guidance of $1.48-1.50 as well as its annual EPS target of 8% in 2024, and its mid-to-high end of 6-8% target for 2025-2030. We anticipate the company will also reaffirm its five-year capex plan of $20.3B for 2021-2025 and its ten-year capex program of $43B for 2021-2030. CenterPoint has indicated it has $3B of potential incremental opportunities from increased and accelerated C&I electrification, accelerated EV adoption, and additional grid modernization projects. We expect CNP to reiterate its organic growth and O&M savings targets (more details below) and its zero external equity issuance plan through 2030. Below are more thematic items we believe could be discuss on the Q1 call.

  - **Texas legislative session**: There are three bills being proposed in the legislative session that could have implications for CenterPoint, including: one that presents an opportunity to file two DCRF riders per year, which would be similar to the TCOS riders; another pertaining to management compensation to ensure utilities have the right management team in place to be incentivized to be the best operators as possible; and a third bill pertaining to cap structure with higher equity layer. The legislative session ends at the end of May.

  - **Rate case schedule**: Texas gas is still expected to file a rate case in mid-2023. In addition, Texas electric is still expected to file in late 2023/early 2024. Indiana electric is also still expected to file in late 2023. Northern Indiana gas and Southern Indiana gas are both still expected to file post-2025. In addition, Louisiana gas is still expected to file post-2025. Mississippi gas is still expected to file post-2025. Lastly, Ohio gas is still expected to file in mid-2024.

  - **Indiana IRP**: CenterPoint received approval for the 130 MW CrossTrack Solar project CPCN in January 2023. The company filed for a wind project in January 2023. The next Indiana IRP is on track to be filed in mid-2023.

  - **Organic growth and O&M reductions**: CenterPoint continues to expect 1-2% annual organic growth and 1-2% annual average O&M savings.

  - **Texas securitization proceeds**: the $1.1B of proceeds were received at the end of March 2023 after several months of delay.

  - **CFO appointment**: In March, CNP announced the appointment of Christopher Foster as Executive Vice President and Chief Financial Officer, effective May 5. Foster joins CenterPoint Energy from PG&E Corporation where he held roles of increasing responsibility over the past 11 years. Most recently, he served as Executive Vice President and Chief Financial Officer overseeing PG&E's financial activities.

- **Positioning into Qtr: Neutral**

In Line **TP $68**
Analyst: Durgesh Chopra / Sharon Wang

- **Q1 EPS Bridge:** We project year-over-year EPS to decrease by -$0.53 to $0.67/share. Weather and storms were significant headwinds during the quarter. Warmer than normal weather was similar to the weather in Q1 2020, which contributes to 18-25 cents of drag for gas and electric utilities. We also assume 20 cents of drag from storm costs, which according to the company was planned for in their full-year guidance.

- **What to look for in the earnings report (Key debates/themes):**

  - **Q1 expectations:** We expect CMS to maintain its 2023 EPS guidance of $3.06-$3.12 and its long-term EPS growth forecast of 6-8% CAGR for 2023-2027 despite headwinds in the first quarter. We also anticipate the company will reaffirm its five-year capex plan of $15.5 billion for 2023-2027, which is expected to drive rate base growth higher than 7% CAGR. Below are more thematic items that we expect could be covered in the company's Q1 presentation.

  - **Voluntary Refund Mechanism (VRM):** In Dec 2022, the company filed for VRM to use $22 million in excess revenue form 2022 towards 2023 expenses. On April 13th, the commission denied Consumers Energy Company's issuing a voluntary refund pertaining to the $17 million towards incremental electric capital spending, or in the alternative, storm restoration efforts. On the other hand, the commission approved Consumers Energy Company's proposed methodology to issue a voluntary refund in the form of $5 million towards assistance for low-income and payment-challenged gas customers with utility bills and the associated accounting requests

  - **Gas rate case**: Gas rate case was filed in Dec 2022. CMS requested a $212 million rate increase with 10.25% ROE and 51.50% equity ratio. Staff's position came out on April 17th with $89 million rate increase based on 9.7% ROE and 50.5% equity layer. Settlement discussion will continue through the summer for proposed final decision in mid-August. Final decision is expected in September 2023 with rates going in to effect on Oct 1st, 2023.

  - **Commission's storm response review**: The review is going to take place over the course of 2023 and beyond after CMS files its next electric rate case in May this year. The commission is pursuing an external consultant to conduct the review.

  - **Contingency in 2023**: As per the electric rate case settlement agreement approved on Jan 19th, Consumers Energy will provide a $15 million voluntary refund of 2022 revenue through a 12-month bill credit in 2023. The company will also make $10 million contribution towards programs that assist low-income customers. Taking VRM into consideration, these 3 prior year pull-forward items total ~10 cents of EPS contingency in 2023. CMS stated they are working on cost reductions to get back on track to achieve the full-year guidance, including hiring freezes, reducing contractors, taking out consultants, efficient financing, and tax planning, etc.

  - **Legislative bills in Michigan**: Given Michigan's track record and bipartisan energy policy, CMS doesn't see substantial changes to energy policy in Michigan. The legislative session that just started follows the house terms with a two-year cycle.

  - **DIG & Peakers upside in 2025+**: CMS has 50% of the combined capacity (950MW) is contracted which is projected to generate $30MM in pretax earnings from 2023-2025+ (0.08 EPS or 2% of our 25E). Management pointed to $10-$25MM in pre-tax upside ($0.03-$0.07 EPS upside or 1% of our 25E using the mid-pt) from higher power prices utilizing the uncontracted capacity.

- **Positioning into Qtr: Neutral**

Adj. EPS	2021A	2022A	1Q23E	2023E	2024E	2025E

conEdison

In Line **TP $93**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q1 EPS Bridge:** We project year-over-year EPS to increase by +$0.02 to $1.49/share. Positive YoY drivers primarily include revenue increases under the multi-year rate agreement at O&R. Negative YoY drivers include unfavorable weather impacting steam business, higher O&M, increased interest expense, higher depreciation & amortization, and increased property taxes.

- **What to look for in the earnings report (reminder that ED does not host a conference call):**

  - **Q1 expectations**: We expect Con Ed to maintain its 2023 EPS guidance of $4.75-4.95 and its long-term EPS growth forecast of 5-7% CAGR for 2023-2027. We also anticipate the company will reaffirm its three-year capex plan of $14.6 billion for 2023-2025, which is expected to drive rate base growth of 6.2% CAGR. Below are more thematic items that we expect could be covered in the company's Q1 presentation.
  - **CECONY electric and gas rate case settlement**: On February 16th, CECONY reached a settlement with a three-year ROE of 9.25% (request was 10.0%), equity layer of 48% (versus 50% request) and $11.8 billion in new capital investment authorized. The electric revenue increase totals $442 million in 2023, $518 million in 2024, and $382 million in 2025, for an annual levelized rate increase of $457 million. The gas revenue increase totals $217 million in 2023, $173 million in 2024, and $122 million in 2025, for an annual levelized rate increase of $187 million. A final decision is expected this year with rates retroactive to January 1, 2023.
  - **Steam rate case filing**: On March 24th, Staff recommended a $94MM revenue increase with a 9.0% ROE and 48% equity ratio on a rate base of $1.79B with a 10/31/24 test year. Staff disagreed with the Con Ed's revenue decoupling request. Recall on February 10th, Con Ed's revised request included a $141MM revenue increase with a 10.0% ROE and 50% equity ratio on a $1.812B rate base. As mentioned, the request includes a new revenue decoupling mechanism, in addition to a continuation of full reconciliation of costs for pension and OPEBs and environmental remediation. Con Ed is also requesting full reconciliation of property taxes, municipal infrastructure support costs, and long-term debt cost rate as well as continued reconciliation for uncollectible costs. In addition, the company is asking for symmetrical reconciliation for labor and non-labor inflation rate to the extent that actual inflation rate deviates from what is assumed in the revenue requirement by 50 bps up or down. Con Ed last filed a steam rate case several years ago in 2013 for rates effective in 2014. The business typically represents ~5% of consolidated annual earnings. A final decision expected by year-end 2023.
  - **CEB asset sale closed on March 1st**. Proceeds from the divestiture are being used to repay $1.25 billion of parent debt in 2023, invest in the utilities, and repurchase up to $1 billion of equity.
  - **Shares repurchase plan**: In March 2023, Con Ed commenced an accelerated repurchase plan, for which the company made payments of $1 billion in aggregate to the dealers on March 7, 2023 and received 8.7 million common shares in aggregate on the same day. The final number of Con Edison common shares to be repurchased from the dealers will be based on the volume-weighted average share price of ED's common shares during the term of the applicable transaction, less a discount. The final settlement of the transactions under the accelerated share repurchase agreements is expected to occur no later than 3Q23.
  - **Equity issuance plan**: Con Ed plans to issue up to $900MM of common equity in 2025.

- **Positioning into Qtr: Neutral.**

Analyst: Durgesh Chopra / Michael Lonegan

- **Q1 EPS Bridge:** We project 1Q23 adjusted EBITDA of $727MM for Constellation versus last year's 1Q22 adjusted EBITDA of $866MM. We expect the primary drivers of the YoY increase to be higher open gross margin, partially offset by lower capacity revenues and higher O&M expense.

- **What to look for in the earnings report (Key debates/themes):**

  - **Q1 expectations**: We expect CEG to maintain its 2023 EBITDA guidance range of $2.9-$3.3B. Below are more thematic items that we expect could be covered in the company's Q1 presentation.

  - **Capital allocation strategy**: with Q4 results, Constellation announced an initial capital allocation strategy that includes $1.5B in organic growth capital that will exceed its double-digit return threshold, doubling the per share dividend from the 2022 level of $0.5640/sh to $1.1280/sh while targeting growth at 10% annually, and authorizing $1B in share buybacks. The organic growth capex will be allocated to a commercial-scale hydrogen project, nuclear uprates at Byron and Braidwood, and wind repowering and refurbishment. Approximately $2.0B of the additional capital to be allocated in 2023-2024.
  - **M&A:** Management said they will be patient and disciplined in going after inorganic growth opportunities. The company said it prefers dual units instead of single units because the cash flow profile is better. It also applies on a DCF valuation and focuses on the liabilities involved.
  - **December 2022 PJM Performance Bonuses**: On Dec. 23-25, as a result of Winter Storm Elliott, a significant portion of PJM's fossil generation fleet failed to perform as reserves were called, while CEG's operated nuclear fleet performed at 100%. PJM's initial estimate of nonperformance charges ranges from $1-2B and, in accordance with its tariff, funds collected from those charges are redistributed to generating resources that performed above expectations during the event, including nuclear. Leveraging preliminary data from PJM and applying significant judgments and assumptions, CEG recognized an estimated benefit of $109MM (pre-tax) for performance bonuses in Q4 (net of non-performance charges), primarily driven by the over performance of its nuclear fleet that prevented rolling blackouts across PJM. Constellation said that it is confident that number will hold or be better and could present upside this year.
  - **Commercial hydrogen production**: Hydrogen facility will initially use ~250 MWs and produce ~33,450 TPA hydrogen, with the ability to expand to 400 MWs. Constellation said to expect long-term off-take agreements to consume more than 90% of the output. The company is investing total construction capex of $900MM from 2023-2025. Hydrogen will be provided to customers co-located at the facility. Commercial production of hydrogen expected in 2026.
  - **Nuclear uprates**: CEG announced that it was increasing nuclear output by ~135 MWs at Byron and Braidwood and investing ~$800MM from 2023-2029 for needed low pressure turbine replacements, upgrades of the high pressure turbines, and a pull-forward of planned generator maintenance at Byron, of which ~$200MM is growth capital to uprate the plants. The company said to anticipate uprate MWs to be phased in starting in 2026 with full implementation by 2029, based on timing of the turbine installations during planned refuel outages.
  - **Wind repower and refurbishment**: The repowering program totals 315 MWs in initial scope. Constellation is investing $350MM from 2023-2025. The 70 MWs of partial repowering is expected to be in commercial operation in 2023.
  - **CEG plans to apply for license renewals for Clinton and Dresden nuclear plants sometime next year**. On Oct. 31, 2022, Constellation announced its intent to seek renewal of the operating licenses for our Clinton and Dresden nuclear power plants. These renewals, if granted, would allow the plants to operate for an additional 20 years. Clinton could operate until 2047 and Dresden could operate until 2049 (Unit 2) and 2051 (Unit 3).
  - **Hedging**: Percentage of 2023 generation hedged is 94-97%. 2024 generation hedged is 75-78%.

In Line **TP $65**
Analyst: Durgesh Chopra / Sharon Wang

- **Q1 EPS Bridge:** We project year-over-year EPS to decrease by -$0.22 to $0.96. Weather was a materially negative driver during the quarter. We expect other negative YoY drivers to mainly include interest expense, solar ITC, partially offset by regulated investment, higher millstone hedge prices, and sales growth.

- **What to look for in the earnings call (Key debates/themes):**

  - **Q1 call expectations**: Dominion has said they will discuss the recently passed legislations in VA. The VEPCO-related measures were passed as H.B. 1770/S.B. 1265. Both chambers also accepted Youngkin's modifications to the bill addressing legislative oversight of utilities but declined to approve the governor's proposed amendments to a bill intended to accelerate the deployment of offshore wind in the state. Youngkin has until May 15, 2023, to act on the reconvened session bills. The approved bills are effective July 1.

  - **H.B. 1770:** As per the bill, Dominion will move from a triennial to biennial review. The new law requires VEPCO to file its next earnings review on or after July 1, 2023, covering 2021 and 2022. The legislation provides that a 9.70% ROE (vs current 9.35%) and 52.1% equity layer will be authorized in the 2023 review. If the Commission determines that the utility has earned more than 70 basis points above authorized ROE during the 2023 biennial review, the Commission will direct 85% (vs 70% under the prior framework) of the overearnings be credited to customers' bills. The bill requires Dominion Energy Virginia, in its 2023 biennial review, to select a subset of rate adjustment clauses with annual revenue requirement of at least $350 million and combine them with the utility's base rates. The combination of such rate adjustment clauses will be subject to audit by the Commission in the utility's 2023 biennial review filing. The bill states that this combination cannot be used to justify an increase in base rates in the 2023 earnings review; VEPCO will effectively be required to reduce rates by $350 million.

  - **SB 1477 - Electric utility; offshore wind affiliate:** The bill signed into law in March, allows Dominion to sell a passive stake in its ~$10 billion Coastal Virginia Offshore Wind project. Senate Bill 1477 authorizes Dominion Energy Virginia to establish an offshore wind affiliate, subject to approval by the Virginia State Corporation Commission. The bill also includes provisions that allow the affiliate to "construct, own, or operate the project" and enable the affiliate to cost recovery as a public utility. Any premium or purchase price in excess of book value resulting from the sale will be passed onto customers.

  - **Business review update**: D is expected to provide a comprehensive business and financial update at the conclusion of the strategic review process on an investor day to be held in Q3 2023. On the q4 earnings call management reiterated the business review priorities which include focus on premier state regulated utility profile and commitment to current credit profile and dividend.

  - **Regulated offshore wind project**: As expected, the total project costs excluding contingency are currently more than 90% fixed now vs. 80% as of Q4 2022. The company remains on track to complete construction of the project by the end of 2026. Draft Environmental Impact Statement (DEIS) has finished its public comment period. The company has received minimal comments with no red flags, so they are working with agencies to move the permit forward. Next milestone to watch is the Final Environmental Impact Statement (EIS) expected on September 30th and Record of Decision for Final Environmental Impact Statement on October 30th, later than the previously expected mid-2023 but still in support of current project schedule, according to the company.

  - **RPS development program**: On April 14th, the State Corporation Commission (SCC) approved the 2022 Renewable Energy Portfolio Standard (RPS) development plan for Dominion Energy Virginia including nine solar projects, one energy storage project, and PPAs, totaling more than 800 MW. The company is required to submit an annual plan to the SCC to comply with the Virginia Clean Economy Act (VCEA). The SCC also approved a revenue requirement of $89.154 million for the recovery of certain VCEA-related resources for the rate year of May 2023 through April 2024.

Outperform **TP $126**
Analyst: Durgesh Chopra / Sharon Wang

- **Q1 EPS Bridge:** We project year-over-year EPS to decrease by -$1.11 to $1.20. We expect YoY negative drivers to include materially unfavorable weather versus last year, storm costs, trading margin, depreciation, property taxes and interest, accelerated deferred tax amortization, and parent company drag, partially offset by O&M savings, rate increases, and Vantage revenue.

- **What to look for in the earnings report (Key debates/themes):**

  - **Q1 expectations:** We expect DTE to reaffirm its 2023 EPS guidance of $6.09 - $6.40 and its long-term EPS growth forecast of 6-8% CAGR for 2023-2027 despite headwinds in the first quarter. We also anticipate the company will reaffirm its five-year capex plan of $21.6 billion for 2023-2027. Below are more thematic items that we expect could be covered in the company's Q1 presentation.

  - **Storms in Michigan:** We expect DTE's storm costs to be 30 cents of headwind in Q1 2023, which taps out all of its electric contingency. Company said they are going to work on rebuilding electric contingency and better manage the outages. On March 24th, the MPSC's order increased power outage credits to $35 for eligible customers plus $35 more each additional day the power's out and makes the credits automatic, also strengthened rules and technical standards for regulated utilities as the MPSC continues its work to improve the reliability of Michigan's electric grid against more frequent storms due to climate changes.

  - **Commission investigation**: In Nov, the company submitted a report updating the Commission on the efforts to improve the utilities' storm response and restoration times. DTE pointed to its track record and does not view the process as punitive but rather creating more alignment between the two parties and focusing on the additional grid investment. The commission is pursuing an external consultant to conduct the review.

  - **Electric rate case:** On Feb 10th, DTE Electric Company filed a general rate case requesting rate increase of $622M with ROE of 10.25%, equity layer of 50%, and rate base of $22.6B, vs current 9.9% ROE and 50% equity ratio. This rate case primarily supports investments in system reliability, grid modernization, and cleaner generation investments. The requested rate relief is based on a projected test year for the 12-month period ending November 30, 2024, utilizing a historical test year of 2021. In terms of sales forecast, management said DTE will have more stability going into this filing as they saw residential sales down ~3% in 2022 versus 2021 with people returning to work. Company is also proposing an investment recovery mechanism (IRM) focused on certain distribution capital expenditures that will be recovered by means of an IRM surcharge, which will help the company to stay out longer between rate cases. The rate increase request will be $619 million if the IRM proposed by the company is accepted. DTE will start conversations for settlement around the electric rate case later this year. Proposed final decision is anticipated in October and final decision is expected in December.

  - **Future gas rate case**: DTE is still considering the timing to file gas rate case (originally it was planned for early 2023, but now timing could be later this year or early next year).

  - **Clean Vision Plan (IRP) filing**: In early November, DTE filed an updated IRP to support generation transformation to cleaner energy and the modernization of electric grid for resiliency and reliability to prepare for increasing climate extremes and load growth from EV adoption. The plan accelerates 4,100 MW of coal plant retirements and drives 5,400 MW renewables development in 2023 – 2032, and 10,000 MW in 2033 – 2042. Some of the IRP investment could be incremental to current capex in the back end of five-year plan. Proposed final decision is due on July 14th, and final commission decision is expected in 2H 2023. Since they already have staff and intervener testimony, DTE is working towards a settlement with various parties.

In Line **TP $102**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q1 EPS Bridge:** We project 1Q23 adjusted EPS of $1.20/share, which excludes the Commercial Renewables segment (for the second straight quarter) that is being sold and will be reported as discontinued operations. Weather last year in 1Q23 was $0.03 unfavorable and we expect it to be $0.18 unfavorable this year. In terms of positive YoY drivers, we expect rate cases and riders to contribute favorably, in addition to higher sales growth, lower O&M, lower storm costs, an AFUDC equity benefit, and a modest increase in gas utilities contribution. In terms of negative YoY drivers, we primarily anticipate increased depreciation and amortization and higher interest expense.

- **What to look for in the earnings report (Key debates/themes):**
  - **Q1 expectations**: Duke typically updates its current-year guidance on its third quarter call, so we expect the company to reaffirm its outlooks this quarter. These include 2023 EPS guidance of $5.55-5.75, and a long-term 5-7% EPS growth through 2027 based off the $5.65 midpoint of 2023 guidance. The company has a five-year 2023-2027 capex plan of $65 billion and five-year 2028-2032 capex program of $80-85 billion. The spending is expected to drive rate base growth of 7.1% CAGR for 2022-2027. Below are thematic items we believe could be discussed on the Q1 call.
  - **Commercial Renewables business asset sale**: Duke targets closing its planned sale of its Commercial Renewables business in the second half of this year. The sale is currently presented as discontinued operations. We estimate DUK could fetch $3-3.5 billion in cash proceeds at a 11-13x EV/EBITDA multiple applied to our $360 million of EBITDA estimate less $1 billion of debt. Proceeds will be used to avoid holding company future debt issuance. The Commercial Renewables business comprises of ~5.1 GW of wind and solar in operation (~3.5 GW net ownership, $150MM net income).
  - **North Carolina Carbon Plan**: in February 2023, Duke filed for 2023 solar procurement, with an order expected by year-end 2023. The updated North Carolina Carbon Plan and IRP will be filed by September 1st with an order expected by year-end 2024. Duke will file the CPCNs for gas generation in late 2023 or early 2024 with a final expected order date to be determined. The related capex is included in Duke's plan and will be addressed in future rate cases.
  - **North Carolina DEP rate case Staff recommendation**: On October 6, 2022, DEP filed a rate case with the North Carolina commission that includes a Performance Based Regulation (PBR) Application which includes a Multi-Year Rate Plan (MYRP) and proposes rates for 3 years within the MYRP period. The rate case filing requests approval of a $615MM revenue increase with a 10.4% ROE and 53% equity layer and is based on a retail rate base of $12.3B as of December 31, 2021, adjusted for known and measurable changes projected through April 30, 2023. The MYRP includes impacts of approximately $3.8B (NC retail allocation) of capital projects that are projected to go in service over the MYRP period. In late March 2023, Staff recommended a $260MM revenue increase with a 9.25% ROE and 52% equity layer on a $11.6B rate base. Key drivers between Duke's original application and the PSC staff request include ROE ($80MM) and depreciation rates. The rest includes normal adjustments proposed by Staff like incentive, amortization periods, and other. The Q1 supplemental updates are not included in the Public Staff numbers (~$70MM), which accounts for the delta between the original application and the supplemental testimony. Rebuttal testimony is due April 17th and hearings are expected to start in May 2023. Duke intends to implement temporary rates subject to refund June 1, 2023 for the historic base case increase and has requested the NCUC approve the requested permanent total Year 1 rates to be effective no later than Oct. 1, 2023.
  - **North Caroline DEC rate case**: Duke recently filed for a revenue increase of $833MM with a 10.4% ROE and 53% equity ratio.
  - **Florida cost recovery**: Duke was recently granted recovery of $1.2 billion of 2022 deferred fuel costs and $450 million of storm costs to be recovered over a 12-month period.
  - **Indiana IRP**: final stakeholder meeting on the IRP refresh was held in Q1. Duke plans to file for CPCNs in Q2.
  - **Kentucky rate case**: DUK filed a Kentucky electric rate case in Dec. 2022. Key components of the rate case include a revenue increase request of +$75 million with an ROE of 10.35% and equity ratio of 52.51% on a rate base of $1,177 million with a June 2024 test year. A hearing will be held in May 2023 with a decision expected by the end of June.
  - **Convertible note issuance**: Duke recently announced the offering of $1.5B aggregate principal amount of 4.125% convertible senior notes due 2026 in a private placement. The conversion rate for the convertible notes will initially be 8.4131 shares of common stock per $1,000 principal amount of convertible notes. The notes will mature on April 15, 2026, unless earlier converted or repurchased in accordance with their terms. Conversion could represent $0.07-0.08 annualized EPS dilution, which for example would be ~1% of estimated 2027 EPS if Duke were to deliver the midpoint of its long-term 5-7% EPS growth forecast.

EDISON INTERNATIONAL®

In Line **TP $70**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q1 EPS Bridge:** We project year-over-year EPS to decline -$0.03 to $1.04/share, Positive YoY drivers primarily include GRC revenues benefits. Negative YoY drivers primarily consist of increased depreciation, higher property taxes, increased interest expense, and some share dilution.

- **What to look for in the earnings report (Key debates/themes):**
  - **Q1 expectations**: We expect EIX to reaffirm its 2023 EPS guidance of $4.55-4.85 and its targeted long-term growth rate of 5-7% CAGR through 2025, based off of the original 2021 guidance range of $4.42-4.62. We also anticipate the company to maintain its five-year $27-30B capex plan for 2021-2025 (and financing outlook), which is expected to drive a 7-9% rate base CAGR over that time period. Below are thematic items we believe could be discussed on the Q1 call.
  - **Best estimate of expected losses for the 2017/2018 Wildfire/Mudslide events:** With Q4 results, EIX maintained its best estimate at $8.8B; now $900MM of claims remain. SCE targets filing the TKM (2017 Thomas and Koenigstein fires and the 2018 Montecito Mudslides) cost recovery application totaling ~$2B in the third quarter of 2023 with an 18-month decision timeline request. The company also plans to request securitization of approved amounts. SCE will make a separate filing for Woolsey.
  - **Cost of capital triggering mechanism**: EIX's long-term EPS growth forecast does not include upside from the cost of capital mechanism trigger where a 50bps ROE change impacts 2025 EPS by $0.28 (5% of our estimate). The target also does not include potential upside from successful recovery of wildfire claims. The measurement period for the cost of capital mechanism ends September 30th and it would kick into effect in January 2024.
  - **Equity issuance plans**: EIX issued ~$505MM of junior subordinated notes with 50% equity content ($250MM) in early March; the notes are tax deductible. The company has said it plans to issue $300-400MM of equity content securities this year, through a potential combination of hybrids (50% content), $50-100mm of internal programs (100% content), and an ATM program (100% content). EIX has been saying it expects to issue equity content up to $250MM annually, on average, from 2022-2025. The company issued ~$100mm in 2022.
  - **Rate case**: EIX still plans to file a rate case in May for the 2025-2028 period.
  - **Sales growth**: SCE is projecting a 2% average annual sales growth from 2023- 2035. The ramp up to 2% is expected to be gradual with majority of the impact to be in 2025 and beyond. The company will incorporate this growth along with associated capex needs in the 2025-2028 GRC.
  - **Probability of losses from catastrophic wildfire**: As of the Q4 earnings call, Management estimates that its wildfire mitigation and PSPS have reduced probability of losses from catastrophic wildfires by 75-80% from 65-70% previously.

- **Positioning into Qtr: Neutral**

Adj. EPS	2021A	2022A	1Q23E	2023E	2024E	2025E

Analyst: Durgesh Chopra / Michael Lonegan

- **Q1 EPS Bridge:** We project year-over-year EPS to decrease by -$0.02 to $1.30/share. Last year in 1Q22 weather was $0.08 favorable, and this year in 1Q23 we expect it to be $0.16 unfavorable. We estimate that the negative impact of weather will more than offset the benefits driven primarily by sales growth, higher FRP revenue in Arkansas, storm cost recovery, and recovery under the Texas DCRF rider.

- **What to look for in the earnings report (Key debates/themes):**
  - **Q1 expectations**: Entergy revisits guidance on every earnings call, but we expect the company to reaffirm its 2023 EPS guidance of $6.55-6.85, as well as its 2024 and 2025 guidance of $7.05-7.35 and $7.50-7.90, respectively. We also anticipate the company will maintain its $16B capital plan for 2023-2025. Below are thematic items we believe could be discussed on the Q1 call.
  - **Resiliency spending:** The current three-year $16B capex program for 2023-2025 includes $0.9B of accelerated "resiliency" spending of the total $1.7B amount that will be recommended to regulators through 2025; the $0.8B balance will be added to the capex plan once regulators approve it. Entergy New Orleans filed for $1.5 billion in investment over ten years in the third quarter with a final decision expected in 4Q23. Entergy Louisiana filed in December 2022 for $9B in investment over ten years and has a hearing scheduled in January 2024. Entergy Texas expects to make its initial regulatory filing in the third quarter of this year after legislative efforts are completed. The company is targeting a decision from the Texas Commission sometime next year.
  - **SERI update**: FERC did not rule on SERI's compliance refund report (order was expected 2/23/23). SERI filed an appeal with the 5th circuit Court on the uncertain tax position and leaseback ruling, and the Court is going to wait for FERC to clarify its order before acting. FERC has no timeline to decide. Recall on December 23rd, the FERC issued orders regarding the SERI sale leaseback and uncertain tax position case. Entergy said that it believes the orders are a positive step toward resolving a number of long-standing issues raised by its retail regulators. The company said that while it disagrees with some elements of FERC's findings, in particular its ruling on the sale leaseback claim, it is pleased that FERC's remedy results in no additional refunds due to customers beyond those already provided in 2021 on the uncertain tax positions taken by SERI.
    - Regarding the uncertain tax position issue, under the remedy specified by FERC, for uncertain tax positions that the IRS fully disallowed, and for which SERI received no tax benefits, no refunds are due. Entergy therefore calculates the remaining refund for the uncertain tax positions issue to be zero dollars. Litigators in the case are calling for $800MM in additional refunds ($450MM additional refunds taking into account SERI's previous settlement with the Mississippi PSC).
    - On the sale leaseback case, the order calls for SERI to refund approximately $149MM, including interest, resulting from the disallowance of $17MM in annual lease payments from 2015 through 2022. Taking into account SERI's previous settlement with the Mississippi PSC, the total sale leaseback refund amount is $89MM. The order also states that SERI can no longer collect $17MM in annual lease payments on a prospective basis. Net of the Entergy Mississippi settlement, the prospective exclusion would be $10MM annually (or $0.03 EPS hit). Regarding the financial impacts of these FERC orders, assuming there are no changes to either order upon rehearing, Entergy reaffirmed its adjusted EPS guidance for 2023-2025 subsequent to receiving the order in December 2022.
  - **Credit metrics**: Entergy's equity needs forecast through 2024 totals just $130MM remaining to be sourced as of 12/31/22. The company has also been saying it expects to issue $1.4B of combined equity for the subsequent 2025-2026 years. Entergy still expects CFO pre-working capital to debt to be in the range or better than Moody's >14% target, and FFO to debt to be in the range or better than S&P's 14-16% target.
  - **Louisiana FRP / rate case**: In Q3, Entergy will file a rate case to be effective Sept. 2024 or for extension request for the FRP, or both. The current FRP will be effective through end of Aug. 2024.
  - **Louisiana storm cost recovery:** Entergy recently received $1.5B of securitization proceeds for the balance of Ida stock cost recovery.
  - **Entergy Texas rate case update:** Parties are currently working to reach a settlement. On July 1, 2022, Entergy Texas filed for a net revenue increase of $131MM with an ROE of 10.8%, equity ratio of 51.21% on a rate base of $4.4B with a December 2021 test year. On November 2, 2022, Staff recommended a net revenue increase of $77MM with a 9.45% ROE and 51.21% equity ratio on a rate base of $4.4B. A final decision is expected in May 2023.

- **Positioning into Qtr: Negative.** Our below consensus EPS estimate drives our negative view into earnings. In addition, SERI concerns still loom, investors will also focus on the Louisiana FRP extension, and there could be a recession that would impact strong C&I load growth.

EVERSOURCE

Outperform **TP $92**
Analyst: Durgesh Chopra / Sharon Wang

- **Q1 EPS Bridge:** We project year-over-year EPS to increase by +$0.07 to $1.37. We expect positive drivers to include rate increase at electric and gas companies, increased transmission earnings, and trackers. Negative drivers include higher depreciation and property taxes, debt interest expense, and pension.

- **What to look for in the earnings report (Key debates/themes):**

  - **Q1 expectations:** We expect ES to maintain its 2023 EPS guidance of $4.25 - $4.43 and its long-term EPS growth forecast of 5-7% CAGR for 2023-2027. We also anticipate the company will reaffirm its five-year capex plan of $21.5 billion for 2023-2027, which is expected to drive rate base growth 7.5% CAGR. The company is likely to provide an update on offshore wind strategic review. Below are more thematic items that we expect could be covered in the company's Q1 presentation.
  - **Offshore Wind Strategic Review:** Update on the strategic review of offshore wind assets is expected in Q2 2023 versus original expectation of having the review completed by 2022 year-end. We estimate up to $3-3.5B in proceeds from the sale of Eversource's share. The company anticipates an expedited sale completion post the announcement as early as Q3 or latest by year end. Sale proceeds would be used on day one to pay down parent debt, which will create increased financial flexibility to fund regulated investments in the future.
  - **Additional Details on Offshore Wind:** In terms of capital investment, ES estimates total capex of $5.5-$6B as of the Q4 call versus previous estimate of $5.1-$5.8B. During the review process, the company will continue execution of the three offshore wind projects and lead the onshore portion of the projects during citing and construction. Despite high costs due to global supply chain issues, company has locked in 90% of the costs in Feb 2023, vs 82% in Oct 2022. Offshore investment as of the Q4 call totaled $1.95B versus $1.8B in Oct 2022. Projected in-service dates for the three projects are unchanged – late 2023 for South Fork Wind (130 MW), 2025 for Revolution Wind (704 MW), and late 2025 for Sunrise Wind (924 MW). When asked about Ørsted's impairment charge related to Sunrise Wind on the Q4 earnings call, ES pointed to different accounting standards, and they don't foresee booking a charge under GAAP.
  - **Aquarion Rate Case:** On March 15, 2023, the Public Utilities Regulatory Authority (PURA) ordered a rate decrease of $2M, or approximately 1%, from the company's currently approved revenue requirement for the rate year commencing on March 15, 2023. Recall that company's requested revenue deficiency was $27.5M in year 1 and $22.4M over 2 subsequent rate years. Aquarion Connecticut rate case filed in August 2022 was its first rate review in roughly 10 years. PURA approved an allowed ROE of 8.70% and 50.35% common equity, vs. the requested 10.35% ROE and 53% Equity Layer. ES appealed the rate case decision on March 30th with no timeline for a final decision. According to the company, ES had been significantly under-earning and will likely continue to do so. Since Aquarian earnings make up a small portion of ES's earnings (~3%) we don't see material implications to near and long term EPS growth outlook.
  - **Advanced Meter Infrastructure (AMI).** In November, the MA DPU authorized company's proposed AMI spending of $535M through 2028 (versus ask of $575M) which is now included in the updated five-year plan. In CT, ES targets all customers on AMI during 2023-2027 with capital investment of approximately $475 million awaiting approval, which will be incremental to current capex plan. Decision is expected sometime this year.
  - **Distributed Energy Resources (DER) Projects**: In Massachusetts, Eversource's proposed capital investment in the six solar clusters is ~$980M (included in the five year plan), of which about $310M would be reimbursed over 15 to 20 years by solar developers. Current proposal would enable up to 1 GW of solar, with interconnection upgrades needed to deliver additional clean energy to company's system. One of the six solar cluster is approved, with decision on remaining five projects expected by mid-year. Eversource is targeting completion of the projects 4 years from decision dates.
  - **Senate Bill 7.** An Act Strengthening Protections for CT Consumers Energy" sets conditions for PURA to approve a settlement in a rate amendment proceeding, limits the term of any provision in the settlement to three years instead of four, and brings water companies that have at least 75,000 customers (including Aquarion) under the requirement for a general rate case at least every four years. The bill could have negatively impacted some of the capital trackers that ES has in CT, if adopted. We'll continue to monitor the process on this proposed bill, Connecticut General Assembly 2023 Regular Session adjourns June 7th

- **Positioning into Qtr: Neutral.**

In Line **TP $62**
Analyst: Durgesh Chopra / Sharon Wang

- **Q1 EPS Bridge:** We project year-over-year EPS to be flat at $0.58/share. Key YoY positive factors are tax timing, retail demand, FERC revenue, O&M reduction, corporate-owned life insurance (COLI), offset by Sibley accounting adjustment, unfavorable weather, higher D&A, and interest expense.

- **What to look for in the earnings report (Key debates/themes):**

  - **Q1 expectations:** We expect EVRG to maintain its 2023 EPS guidance of $3.55-$3.75 and its long-term EPS growth forecast of 6-8% CAGR through 2025. We also anticipate the company will reaffirm its five-year capex plan of $11.6 billion for 2023-2027, which is expected to drive rate base growth 6% CAGR. The inflection point that will impact their outlook and perspective on the mix of capital expenditures is going to be IRP update in the second quarter, which would support more owned renewable generation. Below are more thematic items that we expect could be covered in the company's Q1 presentation.
  - **Kansas Rate Cases:** Evergy is preparing to file Kansas Central and Kansas Metro rate cases in late April 2023. We expect to see staff testimony in August. The Company expects a test year ending September 30, 2022, and the true-up date around June 30, 2023, with new rates becoming effective in December 2023.
  - **Annual Update to IRP:** EVRG will file an annual update to its IRP for both states in June this year, which will include the impact of IRA, higher commodity curves, and increased SPP (Southwest Power Pool) capacity margin requirement, these factors can be more supportive of EVRG owning more renewables. Recall that in June 2022, Evergy filed an annual update to its Missouri and Kansas IRP. The Company's preferred plan for the next decade is consistent with the resource plan laid out in 2021 triennial IRP filing and the renewables development discussed during EVRG's Investor Day in Sep 2021. The minor tweaks in the plan reflect updates to the sequencing of near-term investments. Overall, by the end of 2032, Evergy's preferred plan now includes 3,500 MWs of renewable additions while also retiring nearly 2,000 MWs of coal.
  - **Winter Storm Uri Securitization** (EF-2022-0155): In March 2022, the company initiated the securitization process in Missouri to recover ~ $300 million of Storm Uri cost in Missouri West with recovery period over 15 years, which significantly moderate the impacts on customers. In November 2022, the MPSC issued a revised financing order authorizing Evergy Missouri West to issue securitized bonds to recover its extraordinary fuel and purchased power costs incurred as part of the February 2021 winter weather event. In January 2023, the OPC filed an appeal with the Missouri Court of Appeals challenging the financing order regarding the treatment of income tax deductions, carrying costs and discount rates related to the financing of the extraordinary fuel and purchased power costs incurred. A final non appealable financing order is required prior to the issuance of securitized bonds. In terms of timing, a decision by the Missouri Court of Appeals is currently expected in the second half of 2023. The company has room in the 2023 EPS guidance to absorb the delay in receiving securitization proceeds.
  - **Persimmon Creek Acquisition** (EA-2022-0328): In Missouri, the company had applied for the acquisition of the 199 MW Persimmon Creek Wind Farm. On April 6th, Commission issued an approval of the Certificate of Convenience or Necessity (CCN) but with certain performance guarantees that considerably increase the financial risk associated with the project. EVRG may file for the project to be included in rate base in the upcoming Kansas rate case filing. The acquisition is expected to contribute $0.05 in EPS this year which is included in EVRG's 2023 EPS guidance.
  - **HB 2225**: HB 2225 or "The Electric Utility Cost Recovery through Transmission Delivery Charges" legislation that becomes effective July 1st amends the law authorizing a Kansas Corporation Commission (KCC)-regulated utility to recover costs associated with the transmission of electric power through a transmission delivery charge (TDC). As a result, EVRG voluntarily agreed to an ROE reduction on the elective projects to be from FERC's jurisdictional ROE down to the KCC's authorized ROE, which is roughly a 100bps decrease in ROE, or a 4c headwind to EPS starting in 2024.

exelon℠

Outperform **TP $46**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q1 EPS Bridge:** We project year-over-year EPS to increase by +$0.03 to $0.67. We expect weather to unfavorable (we estimate -$0.03) this year. However, weather is not a major driver of earnings for EXC given that roughly 75% of its earnings are decoupled. Note that last year in 1Q22 there was $0.03 of negative nonrecurring items. In terms of the primary positive YoY drivers, we expect higher rates at Pepco, Delmarva and BGE to contribute positively, in addition to a benefit in Illinois from the increased 30-year Treasury rate and plus lower storm costs. Recall every 50bps increase in the 30-year Treasury rate equates to a $0.04 annual EPS benefit. In terms of negative YoY drivers, we primarily expect increased interest expense and higher depreciation.

- **What to look for in the earnings report (Key debates/themes):**
  - **Q1 expectations**: Exelon typically updates its guidance on the third quarter call. This quarter we expect the company to reaffirm its 2023 EPS guidance of $2.30-2.42, as well as its outlook for delivering the midpoint or better of 6-8% EPS growth through 2026 off the midpoint of 2022 adjusted guidance ($2.25).
  - **Illinois multi-year plan rate case filing**: Next step is the intervenor testimony in mid-May. Recall on January 17th, ComEd filed its Illinois electric distribution multi-year rate plan asking for base rate revenue requirements of ~$3.8B in 2024, $3.9B in 2025, $4.1B in 2026 and $4.4B in 2027. ComEd's requested revenue requirements are based on requested returns on common equity of 10.50%, 10.55%, 10.60%, and 10.65% in 2024, 2025, 2026, and 2027, respectively, and on capital structures that reflect between 50.58% and 51.19% common equity. The approved revenue requirements will be reconciled to actual costs incurred during each such year, subject to certain limitations and to ICC review, in accordance with law. In the filing, ComEd will ask the ICC to phase-in the new rates by deferring 35% of the 2024 base rate increase, with that amount being recovered in 2026. The ICC must review the Rate and Grid Plans in a proceeding on a consolidated basis and issue a decision by 12/20/23. On September 27, 2022, the Illinois commission issued performance incentives for Exelon (see our note).
  - **Delmarva rate case**: In December 2022, Exelon filed a Delaware electric rate case, requesting a $60MM revenue increase with a 10.5% ROE and 50.5% equity ratio on a rate base of $1.1B with a test year of 6/30/23. Interim rates will go into effect on July 15th and a final order is expected in 2Q24.
  - **Atlantic City rate case**: In February, Exelon filed an Atlantic City electric rate case, requesting a $105MM revenue increase with a 10.5% ROE and 50.2% equity ratio on a rate base of $2.2B with a 6/30/23 test year. No procedural schedule has been made public yet. As permitted by New Jersey law, Atlantic City Electric may implement full proposed rates on November 17, 2023, subject to refund. Procedural schedule for ACE base rate case is expected to be finalized in 2Q23 with a final decision expected in 1Q24.
  - **BGE rate case**: Next step is intervenor direct testimony in June 2023 with a final decision is expected in December 2023. Recall in February, Exelon filed a Baltimore Gas & Electric rate case, requesting $602MM over a three-year cumulative multi-year plan with a 10.4% ROE and 52% equity ratio. The company proposed incremental revenue requirement increases with rates effective January 1, 2024, January 1, 2025, and January 1, 2026, respectively. The proposed revenue requirement increase in 2024 reflects $84.8MM increase for electric and $158.3MM increase for gas; 2025 reflects $103.3MM increase for electric and $77.0MM increase for gas; 2026 reflects $125.0MM increase for electric and $54.0MM increase for gas. These include a proposed acceleration of certain tax benefits.
  - **Pepco DC rate case**: Pepco DC recently filed its second multi-year plan (upon conclusion of the PSC's stay-out provision) for rates effective 2024-2026. Exelon is requesting a cumulative revenue increase of $191MM with an ROE of 10.5% and equity ratio of 50.5%
  - **Pepco MD rate case**: Exelon has said that it plans to file a Pepco MD rate case in 2Q23.

- **Positioning into Qtr: Neutral.**

This report is prepared solely for the use of Michael Weisenburger

FirstEnergy

Outperform **TP $45**
Analyst: Michael Lonegan / Durgesh Chopra

- **Q1 EPS Bridge:** We project year-over-year EPS to increase +$0.05 to $0.65/share. FE's guidance for the quarter is $0.56-0.66/share. In terms of positive YoY divers, we anticipate FirstEnergy will benefit from higher rates from Ohio grid modernization, plus Pennsylvania and transmission rate base growth, reduced O&M, increased Signal Peak earnings, and a benefit from lower Ohio rate credits. In terms of negative YoY drivers, we expect the primary impacts to be lower pension EPS, unfavorable weather, and loss of earnings from the FET asset sale.

- **What to look for in the earnings report (Key debates/themes):**
  - **Q1 expectations**: We expect FirstEnergy to reaffirm its 2023 EPS of $2.44-$2.64, long-term EPS, capital, rate base, and balance sheet targets until at least the new CEO is in place, who is said to be committed to the existing plan. Below are thematic topics we believe could be addressed on the Q1 call.
  - **CEO hire**: FirstEnergy recently announced Brian Tierney as the new President and CEO, effective June 1st. He succeeds interim President and CEO John Somerhalder II. Tierney joins FirstEnergy from Blackstone where here he serves as the global head of Portfolio Operations and Asset Management for the Infrastructure group. He previously spent 23 years at AEP, where he held a number of leadership positions, including most recently serving as executive VP of Strategy following more than 11 years as its CFO.
  - **Balance sheet**: FirstEnergy paid down roughly $3 billion of long-term debt in 2022 and achieved its targeted 11% FFO to debt for the year. FE lowered holding company debt as a percentage of total debt to 24% at year-end 2022 from 33% at year-end 2021. As disclosed with its announced FET asset sale on February 2nd, the company is now targeting 14-15% FFO to debt in 2024 and 2025, solidly in line with investment grade peers.
  - **Dividend expected to resume growth later this year for first time since 2020**: The Board approved a new dividend policy that raises FE's targeted payout ratio to 60-70%, up from 55-65% previously. FirstEnergy said it expects to resume dividend growth (current annual dividend is $1.56/share) subject to Board approval for dividends payable late this year. Its new payout ratio is more in line with peers and reflects the steps the company has taken to improve its credit profile and its commitment to enhancing value for investors.
  - **Rate cases**: FirstEnergy filed rate cases in New Jersey and Maryland on March 16th and 22nd, respectively. A good summary of the filings is in the IR Summary of the Regulatory Corner section on FE's website here. The company plans to file in West Virginia in second quarter 2023. In New Jersey, the last case was filed a case in 2020, and for West Virginia and Maryland, the last base rate case was filed in 2014 and 2018, respectively. In 2024, FirstEnergy is required to file a rate case for its Ohio utilities, and the Company stated it will also potentially file a rate case in Pennsylvania in 2024. Finally, in these regulatory filings, FE plans to adjust recovery of regulatory asset balances such as the first storm costs, which currently amount to approximately $680 million across all its jurisdictions.
  - **Strong mining results**: FirstEnergy's coal mining legacy investment in Montana dates back to the late 2000s with the Company as a minority investor with a 33% share in the facility. Historically, the mining business has not been a significant driver of earnings. However, given higher commodity prices, the mine is outperforming expectations for 2022-2023 with both earnings and cash distributions, which provides significant flexibility to accelerate reliability and maintenance work in the distribution business. Signal Peak and pension comprised roughly 30% of total operating earnings for the full-year 2022 (we estimate Signal Peak was $0.20-0.25/share EPS or 10% of the consolidated $2.41/share). The Signal Peak and pension combined earnings contributions are expected to be 15% of consolidated EPS guidance this year and 10% for both 2024 and 2025. FirstEnergy has generally been looking at exploring how to transition out of the facility over time, but it is a challenge to do given lack of interest in coal.
  - **Planned consolidation of Pennsylvania and Ohio operating companies**: FirstEnergy filed an application on March 6th to consolidate its Pennsylvania utilities, requesting a decision by year-end 2023. This company views this as an important step to align with its new state operating model, to simplify its legal entity structure and to increase the flexibility and efficiency of its financing strategy. This consolidation will not represent any changes in current electric rates for its Pennsylvania customers; those will be combined as appropriate over time through future rate case activity. Next, the company plans to file for consolidation of its Ohio utilities.
  - **Ohio audits and SEC investigation**: The four Ohio audits are stayed another six months as of February 2023.The SEC investigation remains ongoing with no timeline for a decision.

- **Positioning into Qtr: Neutral.**

Adj. EPS	2021A	2022A	1Q23E	2023E	2024E	2025E

This report is prepared solely for the use of Michael Weisenburger

In Line **TP $38**
Analyst: Michael Lonegan / Durgesh Chopra

- **Q1 EPS Bridge:** We project year-over-year EPS to decrease -0.08 to $0.55/share. Recall last year in 1Q22 there was a $0.06 gain on sale of investment in EverCharge at Pacific Current. In terms of negative YoY drivers, we primarily expect bank provisioning expense, higher interest expense, increased O&M, higher depreciation, and increased property taxes. In terms of positive drivers, we primarily anticipate higher ARA revenues.

- **What to look for in the earnings report (Key debates/themes):**
  - **Q1 expectations:** We expect Hawaiian to reaffirm its 2023 utility EPS guidance of $1.75-1.85, but potentially revisit its bank guidance of $0.75-0.85 which could be hard to predict for the company due to all of the economic uncertainty. Given the supply chain issues that HE has been facing, we are uncertain if it will update its 2023-2025 capital plan or wait until later in the year to do so, if necessary. Below are more thematic items we believe could be discussed on the Q1 call.
  - **Hawaiian economy and American Savings Bank (ASB):** The strength of the Hawaiian economy has large implications for the bank; recall the utilities are decoupled. The University of Hawaii Economic Research recently published a report highlighting a potential US recession where Hawaii itself may not experience one because of an increase of international tourism (offsetting lower from the US) which has remained low. The University stated that is expects relatively strong government spending. American Savings Bank's 15% loan growth last year reflected its solid credit quality and a still-healthy Hawaii economy. Loan growth is expected to return to more normalized low single-digit growth levels in 2023. In order to fund the strong loan growth in 2022 given flat deposit growth, ASB increased its wholesale borrowings and CD balances, which reduced its balance sheet asset sensitivity to be essentially neutral. As a result, the company said that although additional Fed rate increases should continue to benefit the bank, it will also have to manage its funding costs to see improved net interest margin. HE stated that is already taking measures to manage its funding costs, including focusing on paying down higher cost wholesale borrowings as those costs have come up considerably as short-term rates have risen. Note that the average cost of funds was 16 basis points for the full-year 2022, 10 basis points higher than the prior year. American Savings Bank saw a larger increase in the fourth quarter as the bank utilized the wholesale borrowings to support its strong loan growth. As a result, the company saw an increase in its funding costs in the fourth quarter to 38 basis points, up 25 basis points from the prior quarter. Hawaiian said that it expects higher funding costs to continue throughout 2023 as market interest rates continue to increase and to the extent its level of wholesale funding remains elevated. However, ASB believes the strength of its core deposit base will allow it to maintain its funding cost advantage in comparison to its peers throughout 2023.
  - **Utility EPS growth and regulatory lag**: Hawaiian now expects to deliver long-term EPS growth of 5% "including $4-5 million of net PIM rewards annually," a forecast that was lowered from the most recent 5% expected for 2022 through 2024 "with upside from PIMs." New guidance reflects continued higher generating station maintenance moderating in the coming years as the company brings new generation and storage resources online and as units are retired. It also accounts for higher O&M expenses due to the inflationary environment and increased bad debt expense, updated timelines for placing EPRM-recovered projects in service, and higher interest expense. PBR and its associated PIMs are expected to materially improve regulatory lag, a persistent problem for the Company.
  - **PIMs:** Hawaiian has stated that there is the potential for $4 million of PIM rewards this year, mostly driven by RPS-A. The company is guiding to $4-5 million of PIM rewards per year in its long-term EPS growth forecast.
  - **Cost management**: HE has been implementing aggressive cost management to respond to the inflationary and interest rate environment. Higher generation cost is being offset by savings in labor, outside services, and leased space expense. For the utility, 2023 adjusted O&M excluding pension is expected to be below ARA allowed levels.
  - **Oil price impact on customer bills**: While HE has aggressive renewable and decarbonization targets to 100% renewables by 2045, currently about 50% of its generation is derived from conventional oil-fired steam units. While oil prices have come down some, they remain elevated and electric bills are higher than have been in recent years, which could potentially result in higher bad debt expense than normal.
  - **Capex and supply chain**: Utility capex in 2022 totaled $357 million, towards the low end of the guidance range of $350-375 million. Capex was lower than originally anticipated due to supply chain disruptions, customer work delays, project rescoping, resource availability and permitting delays.
  - **Stage 3 RFPs**: Bids are expected this month with projects expected to be chosen by July 2023.
  - **Major projects:** HE has pending filings for major projects as it relates to public EV charging, self-build storage and resiliency, for which decisions are expected in 2023.

- **Positioning into Qtr: Neutral.**

In Line **TP $90**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q3 EPS Bridge:** We expect year-over-year EPS to decline -$0.06 to $0.68. We anticipate that Florida Power & Light will grow rate base by 9% and utilize part of its depreciation reserve ($1.45 billion) to earn towards the top end of its 9.8-11.8% allowed ROE band. In the NEER segment, we anticipate growth to be driven by new projects added, plus existing projects, though wind resource could be weaker YoY after a strong 1Q22 at 107%. We expect some drag from a planned outage at Point Beach unit 2 nuclear plant for 20 days in 1Q23 versus an outage at the same unit for five days during the same period last year. We also anticipate higher interest expense and share dilution from the 33.3 million shares issued in March 2023.

- **What to look for in the earnings report (Key debates/themes):**

  - **Q1 expectations:** We expect NextEra to reiterate its 2023-2026 EPS guidance ranges with the expectation that it will deliver at or near the top end of the range for all years. We anticipate the company will reaffirm its renewable development expectations as well. We expect some commentary on NEE's plan to file for dismissal of the FEC complaint. We anticipate some messaging from Armando Pimentel, who replaced Eric Silagy in mid-February as President and CEO of FPL. Pimentel previously served in several senior executive roles with NextEra. Below are additional thematic items we believe could be discussed on the Q1 call.
  - **NEER origination:** Energy Resources' origination amount increased at a slower pace in 4Q22 than the prior sequential quarter in 3Q22. In total, the origination amount for 4Q22 was ~1,700 MW versus last quarter's 2,345 MW increase. It included: 730 MW of solar, 670 of battery storage, 300 MW of wind MW of battery storage. Energy Resources now has ~19,000 MW in its year-end record backlog.
  - **NEER renewable development:** with Q4 results, NextEra rolled forward its NEER renewable development program by one year and raised it 15% at the midpoints. New expectations for the 2023-2026 period total 32,700-41,800 MW, which includes guidance for 14,900-19,000 of solar, 12,000-14,600 MW of wind, 5,100-6,800 MW of storage, and 700-1,400 of wind repowering.
  - **NextEra has said it plans to file for dismissal of the complaint to FEC.** Recall the FEC complaint was filed by a special interest group and primarily relies on media articles to allege certain violations of the Federal Election Campaign Act by various parties, including, by implication, FPL. The FEC process is a confidential, civil administrative process, with an investigation only commencing if the FEC votes to do so, which decision likely will not occur until late this year. After an internal investigation, NEE has said it is confident there was no wrongdoing by the company and plans to file its response seeking dismissal of the complaint and does not believe it is appropriate for a complaint such as this to move forward. Some investors were concerned about the timing of Eric Silagy's retirement, announced on the 4Q22 call. The total amount of contributions referenced in the complaint is less than $1.3MM and NextEra does not expect that allegations of federal campaign finance law violations taken as a whole would be material to them.
  - **Florida PSC approval of fuel and storm cost recovery**: FPL filed to recover approximately $2.1B of incremental fuel costs incurred in 2022. Based on the drop in projected natural gas prices, FPL is now expected to benefit customers by offsetting the 2022 fuel cost recovery by approximately $1.4B this year. FPL also received approval of approximately $1.3 billion of storm costs incurred in 2022. Taking both proposals together, FPL anticipates that its typical 1,000-kilowatthour residential customer bills as of May 2023 will remain well below the projected national average and the projected average for Florida investor-owned utilities.
  - **Solar projects and supply chain**: FPL completed 13 different solar projects totaling 1 GW in the first quarter 2023. The company stated that the supply chain has been improving.
  - **Construction on FPL's green hydrogen pilot at Okeechobee remains on schedule** as it continues to advance toward its projected commercial operation date later this year.
  - **Treasury guidance on clean energy tax credits**: Expected late Q2 or early Q3 this year.
  - **NEP**: Addressing investor concerns, NextEra has stated that NEP is well-positioned with $3 billion of liquidity, $6 billion of forward swaps and room in credit metrics.

- **Positioning into Qtr: Neutral.**

Outperform **TP $31**
Analyst: Durgesh Chopra / Sharon Wang

- **Q1 EPS Bridge:** We project year-over-year EPS to increase $0.02 to $0.77. Recall that NiSource adjusts weather out of its non-GAAP EPS results. In terms of positive YoY drivers, we expect riders and rate increases partially offset by increased depreciation & amortization, higher interest expense, pension, and share dilution.
- **What to look for in the earnings report (Key debates/themes):**
  - **Q1 expectations:** We expect NI to maintain its 2023 EPS guidance of $1.54-$1.60 and its annual NOEPS growth of 6-8% through 2027. We also anticipate the company will reaffirm its five-year capex plan of $15 billion for 2023-2027, which is expected to drive 8%-10% annual utility rate base growth. Below are more thematic items that we expect could be covered in the company's Q1 presentation.
  - **Minority Interest Sale:** Minority interest sale of NIPSCO is still expected to be completed in 2023 and continues to track as expected. The company remains confident in the attractiveness of the asset and stated that there is no decline in interest attributable to interest rates, particularly given the quality of the potential counterparties with ready capital to deploy, bank leverage tools, and long-term investment preference. NiSource has initiated the sale process, and we expect an announcement by mid-year and close by year-end. We estimate $1.5-$2B in cash proceeds.
  - **NIPSCO Electric rate case**: On March 10th, NIPSCO and other parties reached a settlement agreement in its electric rate case in Indiana. The settlement proposed a $292M rate increase compared with $395M company requested, including base rate increase and tracker. The parties agreed on an ROE of 9.8% versus current 9.75%, and an equity layer of 51.63% versus current 47.86%. Recall that company requested a 10.4% ROE and a 58.5% equity ratio on a rate base of $5.95B. We view the settlement as constructive if approved. An IURC settlement hearing is scheduled to start on Apr. 26, 2023. A final Commission order is expected in mid-August with rates going into effect in September.
  - **Virginia gas rate case**: On Dec 9th, Columbia Gas of Virginia reached a settlement with $25.8 million rate increase, inclusive of SAVE (Steps to Advance Virginia's Energy Plan) infrastructure tracker ($14.5MM), representing a settlement as to a specific revenue number but not as to a specific ROE. Recall that NiSource requested $40.6MM revenue increase net of the SAVE infrastructure tracker ($17.7MM) with a 10.75% ROE and 39.3% equity ratio on a rate base of $1.0B with a 12/21 test year. A final order is expected in 2Q23.
  - **Leadership changes:** The company announced several leadership changes on March 15th, link. Notably Shawn Anderson formerly senior vice president of risk and chief strategy officer, moved into the role of executive vice president and chief financial officer effective Mar 27th. Donald Brown, NiSource's former chief financial officer, assumed the role of executive vice president and chief innovation officer on Mar 27th, replacing Melody Birmingham, who was named as executive vice president, and group president, NiSource utilities.
- **Positioning into Qtr: Positive.** Despite our below consensus EPS projection for the quarter, we expect NiSource to reaffirm EPS guidance for 2023. Recall that NI adjusts weather out of its non-GAAP EPS results. NiSource has been a relative underperformer over the past month (+2.6% vs peers +3.6%), and we see reversal of the underperformance going into earnings supported by the constructive settlement filed last month in Indiana and NI's ability to meet/exceed 2023 EPS guidance given that they don't have a weather-related headwind to start the year like majority of their peers.

Analyst: Durgesh Chopra

- **Q1 EBITDA Bridge:** We project year over year EBITDA to increase by +$81MM to $590MM. We primarily expect the benefits of the VVNT contribution starting in March 2023 and Direct energy synergies to be partially offset by lost EBITDA from asset sales.

- **What to look for in the earnings report (Key debates/themes):**
  - **Q1 expectations:** We expect NRG to discuss combined company guidance (post VVNT) with VVNT included as a separate segment. NRG targets $2.27-2.47B legacy business EBITDA this year with $770M EBITDA contribution from VVNT. We also anticipate the company will reaffirm its targeted 15-20% free cash flow per share growth through 2025. NRG has plans of hosting an investor day later in the year with a final date to be determined. Below are thematic topics we believe could be addressed on the Q1 call.

  - **VVNT acquisition:** On March 13th, NRG completed the announced acquisition of VVNT. In December 2022, NRG announced that they have entered into a definitive agreement to acquire Vivint Smart Home, Inc (NYSE: VVNT) for $2.8B or $12/share in an all-cash transaction ($5.2B Enterprise Value including VVNT's debt). The acquisition price of $12/share represented a ~33% premium to VVNT's closing price of $8.99 on 12/05/22. NRG's expected annual run-rate EBITDA is $835mm (including $100mm of assumed synergies to be realized by 2025), representing a transaction multiple of 6.3x EV/EBITDA with a 16% FCF Yield (or 7.2x EV/EBITDA pre-synergies). The acquisition was financed with a mix of debt, hybrid securities ($2,290mm), and cash on hand ($600mm).

  - **$1 Billion Share Repurchase Program.** As of the Q4 call, NRG had completed NRG has completed $645mm (vs $640mm as of Nov 2022) in share repurchases with $355mm remaining to be executed in 2023.

  - **Parish Unit 8 Fire.** On May 9, 2022, a fire was reported at Unit 8 at the WA Parish coal-fired power plant in Texas. The fire tripped the 610MW unit offline as designed, which translated into a $70mm headwind for the quarter and $200mm projected for the whole year. NRG is still targeting to return the unit to service by the end of the second quarter of 2023.

  - **PJM Plant Outage:** PJM said on January 11th that it had an "unacceptably high" level of power generation resources unavailable for the December 24, 2022, morning peak amid extremely cold weather. For those that did not perform as promised when called upon to do so, the grid operator said it expects to levy between $1-2 billion in fines. NRG booked a $80mm charge in Q4 last year.

- **Positioning into Qtr: Neutral.**

OGE

In Line **TP $39**
Analyst: Durgesh Chopra / Sharon Wang

- **Q1 EPS Bridge:** We project year-over-year (utility plus parent) EPS to decrease -$0.03 to $0.22/share. We expect weather to be a drag this year, with heating degree days down 10% versus normal and 16% versus last year. Negative drivers include hold co drag, O&M and D&A, weather drag, interest expense, partially offset by customer growth, AFUDC, rate increase, other income and recovery of URI cost.
- **What to look for in the earnings report (Key debates/themes):**
  - **Q1 expectations:** We expect OGE to maintain its 2023 EPS guidance of $1.93-2.07 and its long-term EPS growth forecast of 5-7% CAGR through 2027. We also anticipate the company will reaffirm its five-year capex plan of $4.75 billion for 2023-2027, excluding potential investments associated with 2021 IRP. Below are more thematic items that we expect could be covered in the company's Q1 presentation.
  - **Fuel recovery:** Fuel clause under-recovery balance was $515 million as of December 31, 2022.
    - Oklahoma $474 million being recovered with 21 months left as of January 1, 2023.
    - Arkansas $41 million being recovered with 15 months left as of January 1, 2023
  - **Limited interest rate exposure:** OGE is targeting FFO to debt ratio of 17.5%-18%. With no equity issuance need in current 5-year plan, OGE expects to issue in Q2 up to $400 million of long-term debt at OG&E to support capital investments. Due to Energy Transfer unit exit and increased capital plan, the company will start to grow Holdco Debt over the years. OGE has less than $200 million of floating-rate debt and no fixed-rate debt maturities through 2026, excluding Uri-related debt that matures in May 2023.
  - **Re-issued solar RFP:** OGE re-issued the solar RFP last year to incorporate favorable opportunities from the Inflation Reduction Act. The company received multiple bids in early November. Decision is expected in May 2023. Management said they will review the three active RFPs (solar, CT units, and existing resource) for long-term generation holistically as their service area continues to grow combined with the increased reserve margin requirements, and they will provide an update once they review the results from all the RFP's.
  - **Uri proceeds.** Winter Storm Uri bond proceeds of $750MM in Oklahoma were received in July 2022. In Arkansas, the Company had filed a request to recover $80MM of Uri costs over ten years at a weighted average cost of capital (WACC). On Jan 2nd, 2023, commission authorized OGE to recover the remaining balance of ~$64 million at WACC over eight years.
  - **Natural gas storage plan:** Following storm URI in 2021, OGE started to build up and acquire more physical gas storage capabilities. The company said they will continue to take the opportunities to build and fill their physical storage capability which can help with supply shortages caused by extreme weather or outages.
- **Positioning into Qtr: Neutral.**

PINNACLE WEST CAPITAL CORPORATION

Underperform **TP $75**
Analyst: Michael Lonegan / Durgesh Chopra

- **Q1 EPS Bridge:** We project year-over-year EPS to be flat at $0.15/share. Last year in 1Q22, weather was relatively neutral. This year in 1Q23, weather was beneficial as shown on the company website here**).** In terms of positive YoY drivers, we primarily expect sales growth and higher AFUDC. In terms of negative YoY drivers, we expect Pinnacle West to see pension impacts, higher O&M expense (even though full-year is expected to be flat), increased D&A, higher property taxes, increased interest expense, and a small TCA drag.

- **What to look for in the earnings report (Key debates/themes):**
  - **Q1 expectations**:. Given the pending rate case and not yet finalized reversal of the SCR disallowance and ROE penalty, we expect PNW to reaffirm its 2023 and long-term EPS growth forecasts, as well as its capex plan, rate base growth and financing outlook. Below are additional thematic items we believe could be discussed on the Q1 call.
  - **Arizona rate case**: Pinnacle West filed its Arizona rate case on October 28th and key highlights include: Requested net revenue increase of 460 million; Equity ratio of 51.93% (versus current 54.67%); ROE of 10.25% (versus current 8.7%); ACC adjusted rate base of $10.5 billion with test year ended June 30, 2022; A 1% return on the increment of fair value rate base above APS's original cost rate base, as provided for by Arizona law; Modification of its adjustment mechanisms including the elimination of the Environmental Improvement Surcharge and collection of costs through base rates; Eliminating the Lost Fixed Cost Recovery mechanism and collecting costs through base rates and the Demand Side Management Adjustment Charge ("DSMAC"); Maintaining as inactive the Tax Expense Adjustor Mechanism; Maintaining the Transmission Cost Adjustment mechanism; Modifying the performance incentive in the DSMAC; Modifying the Renewable Energy Adjustment Charge to include recovery of capital carrying costs of APS owned renewable and storage resources; Changes to its limited-income program, including a second tier to provide an additional discount for customers with greater need; using a Twelve months of post-test Year plant to reflect used and useful projects that will be placed into service prior to July 1, 2023. Staff testimony is due May 22nd and hearings are set for August 2nd. APS requested that the increase become effective December 1, 2023.
  - **Court of Appeals' decision to vacate the SCR disallowance and ROE penalty presents potential upside.** The Court of Appeals issued its decision vacating the Commission's decision on the SCR disallowance and remanding it back to the Commission for further process. In addition, the Court vacated the Commission's 20 basis point "penalty" on ROE. The other parties have 30 days from the date of the decision on March 7th to appeal the Court of Appeals decision to the Supreme Court. The Supreme Court has discretion over whether it wants to take up the case or not. There is not a statutory timing requirement for when the Supreme Court makes that decision, however it is expected within a few months. If the decision gets appealed, Pinnacle West will need to wait for that process to conclude. If it does not get appealed, then PNW will need to figure out with the Commission the next steps. That can come in a few different forms, including folding into the current pending case, or keeping it in its own separate process. Either could happen, and it is unknown what will happen. As for the impact, the disallowed SCR portion was $216 million, which combined with the 20 basis point ROE benefit presents an opportunity for $0.20-0.30/share upside to our forecast. But again, it depends on how it is ultimately addressed by the Commission to know the actual earnings impact. Pinnacle West has not assumed any impact from the SCR in its current guidance and numbers, so obviously any impact would be in the positive unless the Supreme Court reversed the Court of Appeals' decision.
  - **Strong sales growth**: This year, PNW forecasts steady customer growth and robust weather-normalized sales growth of +1.5-2.5% and +3.5-5.5%, respectively. The company's long-term forecast now assumes retail customer growth of +1.5-2.5% for 2023 through 2025 and weather-normalized sales growth of +4.5-6.5% over the same period.
  - **O&M expense**: Pinnacle West continues to target declining adjusted O&M per kWh (with respect to 2021 levels) over its long-term plan and flat nominal adjusted O&M this year.
  - **IRP**: Pinnacle West plans to file an IRP in August 2023. It is typically a two-year process.
  - **Equity issuance plan**: PNW plans to continue to defer any equity issuance until the current rate case is resolved. The plan still includes $400-500 million of equity/alternatives. PNW's credit metric target remains 16-18% FFO to debt.

- **Positioning into Qtr: Neutral.**

Analyst: Durgesh Chopra / Sharon Wang

- **Q1 EPS Bridge:** We project year-over-year ongoing EPS to increase by $0.05 to $0.46, driven by addition of Rhode Island Energy and incremental transmission investment, O&M savings in PA, partially offset by less favorable weather than last year, and higher interest expense.

- **What to look for in the earnings report (Key debates/themes):**

  - **Q1 expectations:** We expect PPL to maintain its 2023 EPS guidance of $1.50-$1.65 and its long-term EPS growth forecast of 6-8% CAGR through 2026. We also anticipate the company will reaffirm its five-year capex plan of $11.9 billion for 2023-2026, which results in 5.6% average annual rate base growth through 2026, with greater than 7% rate base growth in back half of the plan. Below are more thematic items that we expect could be covered in the company's Q1 presentation.

  - **KY CPCN filling** (No. 2022-00402): In Dec, PPL subsidiaries Kentucky Utilities Company and Louisville Gas and Electric Company announced their plan to replace 1,500 MW of aging coal-fired generation by 2028. LG&E and KU are seeking approval of the Certificate of Public Convenience and Necessity (CPCN) filing from the KPSC (Kentucky Public Service Commission) by Oct.1, 2023. If approved, the proposed replacement plan represents ~$2.1B of investment in Kentucky from 2023-2028. PPL's Jan 11th updated capex plan through 2026 includes $1.6 billion out of the total $2.1 billion KY replacement generation spend and ~$1B of higher transmission spend in PA and RI. Next steps are intervener testimony in May and hearings scheduled in late August. Final decision is expected by Nov 6th.

  - **Additional details on the coal replacement strategy.** The proposal includes building two new 621 MW combined-cycle natural gas plants, building a 120 MW solar array, acquiring another 120 MW array to be developed by a third-party and constructing 125 MW of battery storage. LG&E and KU also plan to secure PPA (Power Purchase Agreement) for over 600 MW of additional solar generation and adding 14 new energy efficiency programs, which would reduce LG&E and KU's overall need for future generation by nearly 200 MW. PPL is also seeking permission to book AFUDC (Allowance for Funds During Construction) on these projects while under construction.

  - **Senate Bill 4:** Senate Bill 4 became law on March 29th, which requires Kentucky Public Service Commission (KPSC) approval of the retirement of fossil fuel-fired electric generating units in the state. PPL does not expect this bill to alter its KY generation investment plans as filed with the KPSC, or the timing of a KPSC decision on the filing. The Company also does not expect the new law to materially impact its business outlook and reaffirmed its earnings forecast and growth targets subsequent to the bill becoming effective in March.

  - **Rhode Island ISR**: On March 29th, the Rhode Island Public Utilities Commission ("RIPUC") approved $290 million (vs $352 million proposed) to improve Rhode Island's electric and gas networks in connection with the latest Infrastructure, Safety, and Reliability ("ISR") plans proposed by PPL subsidiary Rhode Island Energy for the period from April 1, 2023 to March 31, 2024. Proposed investments not approved (~$60million) may be considered in future proceedings.

- **Positioning into Qtr: Neutral.**

Outperform **TP $68**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q1 EPS Bridge:** We project year-over-year adjusted EPS to decrease by -0.04 to $1.29/share. PEG is decoupled, so weather will not impact results. Negative YoY drivers should primarily be driven by higher interest expense and pension/OPEB impacts. In terms of positive YoY drivers, we primarily anticipate growth from T&D investment programs and lower O&M.

- **What to look for in the earnings report (Key debates/themes):**
  - **Q1 expectations**: We expect PEG to reaffirm all of its guidance and messaging that it provided at its March 10th Investor Conference (highlights below).
  - **Quiet quarter following PEG's March 10th Investor Conference.** The company reaffirmed its 2023 EPS guidance of $3.40-3.50 and its long-term consolidated growth forecast of 5-7% EPS CAGR for 2023 through 2027, which includes a matching growth rate at the utility, and is driven by rate base growth and the PTC threshold for nuclear. In addition, PEG reaffirmed its five-year 2023-2027 utility capex program of $15.5-18.0B, which is still expected to drive a 2022-2027 rate base CAGR of 6.0-7.5%. The company also initiated a ten-year $34-40B capex program for 2023-2032 with the potential for $3-7B of incremental opportunities linked to NJ's accelerated electrification goals per Governor Murphy's Feb. 2023 executive order. PEG still does not plan to issue equity over its forecast period through 2027 and is targeting mid-teens FFO to debt. As previously known, PEG plans to exit offshore wind generation to eliminate large project risk (see our note) but will continue to pursue regulated offshore transmission projects. The company has said the 2023 EPS pension impacts are a $0.25-0.30 headwind. The New Jersey BPU recently approved its request to overlay a regulatory mechanism that reduced 20% of the headwind which is incorporated into PEG's 2023 EPS guidance range. PEG is also pursuing a lift-out approach which could mitigate another 20-30% of volatility moving forward. The lift-out pension expense mitigation strategy (transferring some pension related assets and obligations to a third party thereby reducing pension expense volatility) being considered is expected to be completed by year-end. As a reminder, 70% of the company's pension is recoverable through future rate cases.
  - **Rate case**: PEG plans on filing a rate case by year-end 2023 for rates effective in late 2024/early 2025. The rate case combined with the lift-out strategy should materially de-risk PEG's pension related earnings exposure in 2025 and beyond.
  - **PJM Outage:** An unplanned outage at Salem unit 2 in late Dec. 2022 occurred during a PJM region-wide generation emergency action and resulted in capacity performance penalties. The financial impact of the outage, including replacement power, penalties, as well as bonuses earned by the other operating PEG units, is not expected to be material.
  - **Offshore wind generation**: In Jan. 2023, PSEG announced it would sell its 25% equity interest in the Ocean Wind 1 offshore wind generation project to Ørsted (~$200MM in proceeds expected this year). PSEG has also decided not to exercise its option to purchase 50% of Ørsted's two Skipjack generating projects in Maryland or pursue an ownership interest in Ørsted's Ocean Wind 2 project or other offshore wind generation projects. PSEG is evaluating its options for the potential sale of its 50% interest in Garden State Offshore Energy, which holds rights to an offshore wind lease area south of New Jersey which we estimate could fetch $150MM. In total, the $350MM of potential cash inflow would be incremental to PEG's current earnings and financing plan through 2027. Assuming the company uses $350MM in excess cash to pay down debt at 4%, or lower future debt issuances in the plan, we see a small $0.02/share (or less than 1% of our 25E) EPS benefit. While we see a modest EPS benefit, we believe PEG's strategic decision to exit offshore wind and focus on its core utilities and nuclear generation business will be well perceived by investors
  - **Offshore wind Transmission investment**: On October 26th, PEG was awarded just ~$40MM of offshore wind transmission projects by the NJ BPU; the Company had been expecting a much higher $1-3B, however, the BPU also indicated an additional solicitation to consider the state's increased offshore wind generation targets. PEG has said that it remains optimistic that the Coastal Wind Link's emphasis on reliability and resiliency will keep it as a strong contender for any future transmission solicitations to bring regional offshore wind projects onshore.

- **Positioning into Qtr: Positive**. Our above-consensus EPS estimate drives our positive view into earnings. PEG is decoupled, so weather will not impact results unlike the majority of peers. We expect the stock to build on the YTD momentum (+9% vs peers +3.6%) as PEG is strongly positioned with first quarter results to deliver on 2023 targets with a light regulatory calendar for the balance of the year. PEG is expected to file its NJ rate case by year-end 2023.

Sempra Energy®

Outperform **TP $175**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q1 EPS Bridge:** We project year-over-year EPS to decrease -$0.06 to $2.85/share. We expect weather to be favorable (+$0.04 estimate) this year, driven by Texas. In terms of negative YoY drivers, we primarily anticipate lower Infrastructure business earnings, higher interest expense, and the negative impact of the cost of capital decision in California. In terms of positive YoY drivers, we expect benefits in Texas from higher rate base and sales growth, and increased earnings from a step-up in FERC rate base in California.

- **What to look for in the earnings report (Key debates/themes):**

  - **Q1 expectations:** Sempra has said it will issue 2024 EPS guidance and extend its capex forecast by a year to 2027 on the 1Q23 earnings call, now that it has received a final outcome in the Texas rate case and has made a positive FID on Port Arthur Phase 1. We expect the company to reaffirm 2023 EPS guidance of $8.60-9.20 and extend its long-term 6-8% growth forecast through 2027 based off of 2023 guidance. Below are thematic items that we believe could be discussed on the Q1 call.
  - **On March 20th, Sempra announced that its 70%-owned subsidiary Sempra Infrastructure Partners (SIP) reached a positive final investment decision (FID) for the development, construction, and operation of the Port Arthur LNG Phase 1 project**. Total capex for the Phase 1 project is estimated to be $13 billion which includes previously announced EPC contract with Bechtel of $10.5 billion. SIP also announced an agreement whereby KKR will acquire indirect, non-controlling interest in the Port Arthur LNG Phase 1 project. Using the 25% midpoint of SIP's targeted 20-30% project ownership, KKR/ConocoPhillips (NYSE: COP, covered by Stephen Richardson) will own 45%/30% respectively. Sempra stated that if SIP's indirect ownership interest is at 25% ($3.3 billion capex), Sempra Infrastructure would expect its share of average adjusted EBITDA after full commercial operations to be ~$410MM annually which after taxes translates into ~$330MM annually or 10% unlevered return, in line with company's high single digit to low double digit targeted returns. The Port Arthur LNG Phase 1 project located in Texas, is fully permitted and is designed to include two natural gas liquefaction trains, two LNG storage tanks and associated facilities with a nameplate capacity of 13 Mtpa. The expected commercial operation dates for Train 1 and Train 2 are 2027 and 2028, respectively. The long-term contractable capacity of 10.5 Mtpa is fully subscribed under binding long-term agreements with the following counterparties: ConocoPhillips, RWE Supply and Trading, PKN ORLEN S.A., INEOS and ENGIE S.A., all of which became effective upon reaching FID. Sempra Infrastructure also announced the closing of the project's $6.8B non-recourse debt financing and the issuance of the final notice to proceed under the project's engineering, procurement and construction agreement. Finally, SRE is actively marketing and developing the competitively positioned Port Arthur LNG Phase 2 project, which is expected to have similar offtake capacity to Phase 1. See our note.
  - **Credit metrics**: Moody's stated that the positive FID in the Port Arthur LNG Phase 1 project is credit negative, but the credit agency has maintained its Stable outlook for its Baa2 rating. Moody's said on our March 21st webinar (see note) that it was waiting to see how the Oncor rate case played out (positively, in our view). Recall that Sempra does not currently have any equity issuance in its plan.
  - **Oncor rate case**: On April 5th, the Texas commission issued an order granting Oncor a ~$150MM revenue increase (ask was ~$250MM) with a 9.7% ROE (request 10.3%) and equity ratio of 42.5% (ask was 45%).
  - **Cost of Capital potential trigger**: For the 2023-2025 cost of capital, a final decision lowered the ROE by 25bps to 9.95% for SDGE and to 9.80% for SCG, with the equity layer for both maintained at 52%. The CCM mechanism is still in place and if the current interest rate environment holds, could trigger to the upside in 2024 and increase ROE.
  - **California rate cases**: Sempra has a pending rate case in California for new rates effective in 2023 and 2024, respectively. A proposed decision is expected in 2Q24.
  - **Cameron LNG**: the FID decision is expected this summer 2023.

- **Positioning into Qtr: Neutral**

This report is prepared solely for the use of Michael Weisenburger

Southern Company

In Line **TP $69**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q1 EPS Bridge:** We project year-over-year EPS to decrease -$0.27 to $0.70/share. Company guidance for 1Q23 is also $0.70, which includes -$0.13 of unfavorable weather as of the first half of the quarter when the outlook was issued. Weather last year in 1Q22 was -$0.02 unfavorable. In terms of negative YoY drivers, we primarily expect the Company to see higher O&M, increased interest expense, higher depreciation & amortization, increased taxes other than income, and share dilution from the mandatory convertible that converted in August 2022. For positive YoY drivers, Southern should benefit primarily from new electric rates and higher sales growth at the utilities.

- **What to look for in the earnings report (Key debates/themes):**

  - **Q1 expectations**: We expect Southern to reaffirm its 2023 EPS guidance of $3.55-3.65, its 2024 EPS guidance of $3.95-4.10, and its long-term 5-7% EPS growth forecast. We anticipate the company will also maintain its $43 billion capital plan for 2023-2027 and its 6% total rate base growth for 2022-2027, including 5% electric and 10% gas. Below are additional thematic items that we believe could be discussed on the Q1 call.
  - **Management change:** Chris Womack recently became the new President and CEO of Southern Company. Womack has served as president of Georgia Power since 2020 and chairman, president and CEO since 2021. Womack is expected to host the 1Q23 earnings call, so investors will be keenly focused on any new messaging from the company.
  - **Vogtle project update:** Georgia Power recently announced that the generator at Vogtle Unit 3 has generated electricity for the first time, and the unit has successfully synchronized and connected to the electric grid. Connecting to the electric grid is part of ongoing startup testing for Vogtle Unit 3, and operators will continue to raise reactor power for electricity generation while performing tests at various power levels. This Unit 3 milestone follows initial criticality, reached on March 6th, when operators safely started the nuclear reaction inside the reactor, generating nuclear heat to produce steam. Once all startup testing is successfully completed and the unit is available for reliable dispatch, Unit 3 is expected to enter commercial operation in May or June 2023. As it pertains to Unit 4, Georgia Power recently announced that hot functional testing has begun. Hot functional testing marks the last series of major tests underway for the new nuclear unit ahead of initial fuel load. As part of the testing process, nuclear operators will use the heat generated by the unit's four reactor coolant pumps to raise the temperature and pressure of plant systems to normal operating levels. Once normal operating temperature and pressure levels are achieved and sustained, the unit's main turbine will be raised to normal operating speed using steam from the plant. During these series of tests, nuclear operators will be able to exercise and validate procedures as required ahead of fuel load. Vogtle Unit 4 is projected to enter service in late 4Q23 or 1Q24. The total cost of the Vogtle unit 3 and unit 4 remains $10.5B.
  - **Vogtle prudency filing**: Southern will make its prudency filing in the summer or fall of 2023 and it should take six months for approval. Any cost recovery above the $7.3 billion (of the total $10.5 billion) of Vogtle costs would be additive to the financial plan as SO has already written of ~$3.2 billion. Roughly $3.6 billion of total costs has already been deemed prudent.
  - **Incremental capex opportunities:** with Q4 results, Southern rolled forward and raised its five-year capex program by 5% to 43 billion for 2023-2027 versus $41 billion for the 2022-2025 period. The company reiterated is previous disclosure (but for this new extended plan) that there could have incremental opportunities totaling $3 billion for Southern Power growth projects and additional regulated investments. That could bring this program to $46+ billion. SO still does not have any plans to issue equity.

- **Positioning into Qtr: Neutral**

This report is prepared solely for the use of Michael Weisenburger

Outperform **TP $31**
Analyst: Durgesh Chopra

- **Q1 EBITDA Bridge:** We project VST's 1Q23 EBITDA to be $550MM, which would be relatively flat versus the $547MM from the same period last year. In terms of positive YoY drivers, we primarily expect the company to benefit from higher power prices with lower capacity revenues. In terms of negative YoY drivers, we expect a NOPEC-related headwind.

- **What to look for in the earnings report (Key debates/themes):**
  - **Q1 expectations:** We expect VST to reaffirm its 2023 legacy business EBITDA guidance range of $3.4-$4.0B. We also expect affirmation of the $3.5-3.7B targeted annual EBITDA range for 2024 and 2025. VST is likely to provide a combined company (Pro Forma Energy Harbor acquisition) EBITDA guidance/disclosures after the transaction closes, which is currently expected in second half of this year. Below are thematic topics we believe could be addressed on the Q1 call.
  - **Energy Harbor Acquisition**. On March 6th, VST announced acquisition of Energy Harbor for $3B in cash and 15% equity interest in Vistra Vision, a newly found subsidiary, which will include Energy Harbor's nuclear and retail businesses and Vistra's nuclear, retail businesses and renewables/storage projects. The expected annual run rate EBITDA is $900mm (including $125mm of assumed synergies to be realized by 2025 and excluding ~$150mm average annual impact of out-of-the money generation hedges), representing a transaction multiple of ~7.5x EV/EBITDA. The implied valuation for Vistra Vision is ~9.5x EV/EBITDA. The company plans to finance the $3.2B (including fees) cash payment with a mix of senior secured, unsecured and term loan ($2.6B) and cash on hand ($0.6B) Management continues to target long-term net Debt/EBITDA of sub 3x. The transaction is expected to close in second half of 2023 and subject to customary approvals, including from the Nuclear Regulatory Commission (NRC); the Federal Energy Regulatory Commission (FERC), and the Department of Justice (DOJ) under HartScott-Rodino Act. We view the transaction as the right strategic move which gives VST diversification and scale across multiple carbon-free technologies, making them the second largest merchant operator of nuclear assets in the US. We have run a simple accretion/dilution analysis on Exhibit 2 to gauge the economic value of this transaction which we estimate to be 16% to 28% value accretive, see our note here.
  - **NOPEC related headwind.** In September 2022, citing rising electric prices, Ohio's retail energy provider Northeast Ohio Public Energy Council (NOPEC) moved its 550K customers form its own platform to their utility default service provider. We estimate ~$10MM EBITDA impact per month (~$40MM for 2022) assuming VST has to procure power to serve as the default service provider to roughly 1/3rd of NOPEC customers. The company's 2023 guidance incorporates a continued headwind this year, which we estimate to be $50MM through May 2023 (VST's obligation as a default service provider ends in May 2023) .
  - **Capital Allocation Update**: VST had completed~$2.45 billion of share repurchases as of 02/23/23. The remaining~$0.8 billion of the upsized $3.25 billion authorization is expected to be executed by year-end 2023. Through 2026 the company projects a total of $3B in additional repurchases
  - **VST Zero**: VST announced its 50MW Brightside Solar Facility was online in April 2022 in TX. The Company also announced in each of May and June 2022 that its 260MW DeCordova Energy Storage Facility and its 108MW Emerald Grove Solar Facility were online in Texas. With these announcements, VST Zero has >1GW of renewable assets (solar and storage) in operation versus their target of ~5 GWs by year-end 2026 with the ~$5B in development capital (generating $450-500MM EBITDA) funded by project debt and other financings ($3.5B), Vistra Zero projects cash flow($0.5B) and $1B preferred stock offering proceeds.
  - **Hedge update:** As of the Q4 call, VST had hedged approximately 73% of its expected generation volumes on average for the three-year period 2023 to 2025, with 2023 hedged at approximately 92% (vs. 87% as of Q3 call) and 2024 hedged at approximately 73%.

WEC Energy Group

In Line **TP $98**
Analyst: Durgesh Chopra / Sharon Wang

- **Q1 EPS Bridge:** We project year-over-year EPS to decrease $0.22 to $1.57 in Q1 2023. Weather is roughly a 15c hit YoY (13c vs normal). Other negative drivers include higher interest expense, D&A, fuel expense, reversal of one-time items at WEC Infrastructure partially offset by new rate increase.

- **What to look for in the earnings report (Key debates/themes):**
  - **Q1 expectations:** On March 27th, WEC reaffirmed its 2023 annual earnings guidance of $4.58 to $4.62 per share, assuming normal weather for the remainder of the year. In light of one of the warmest winters in history in the Upper Midwest, the company lowered its Q1 guidance to $1.56-$1.58 from $1.68-$1.72 per share. We expect WEC to maintain its 2023 EPS guidance of $$4.58 to $4.62 and its 6.5-7% long-term EPS growth target. We also anticipate the company will reaffirm its five-year capex plan of $20.1 billion for 2023-2027. Below are more thematic items that we expect could be covered in the company's Q1 presentation.
  - **Limited Reopener**: WEPCO will file for a limited reopener in May 2023 to address the revenue requirements associated with recovering new capital investments that will achieve commercial operation in 2023 and 2024, as well as to address reduced O&M expenses from future coal plant retirements. WEC will also seek limited 2024 rate reopeners for WEPCO gas and WG to address the additional revenue requirements associated with a new facility being place in service for a full year and a liquefied natural gas facility that will achieve commercial operation during 2024.
  - **Illinois Rate Reviews**: In January, Peoples Gas and North Shore Gas filed applications with the Illinois Commerce Commission for rate increase of $194.7 million and $18.7 million, respectively. Peoples Gas proposed ROE is 9.9% vs current 9.05%, and North Shore Gas proposed ROE is 9.9% vs current 9.67%. Proposed equity ratios for both are 54% vs Peoples Gas current 50.33% and North Shore Gas current 51.58%. Final Order is expected by the November timeframe for new rates effective January 1, 2024.
  - **MERC Rate Case**: In Nov, WEC filed a rate review at one of their smaller utilities, Minnesota Energy Resources Corporation (MERC). The company is seeking an adjusted increase in revenues of $32.8M with a 10.3% ROE and a 53.0% equity layer, leading to an overall bill increase of 7.9% primarily driven by capital investment. Decision is expected in Q4 2023 with new rates going into effect on January 1, 2024.
  - **Samson Solar Energy Acquisition**: On Feb 24th, 2023, WEC purchased an 80% ownership interest in Samson I from Invenergy with ~$250M investment, which is a 250-megawatt solar project located in northeastern Texas. The total 1,300 MW Samson is the largest solar project under construction in the United States, and the second solar investment announced in WEC's Infrastructure segment. In early March, Samson I was damaged by a windstorm. Certain sections across 40% of the project have incurred some amount of damage. Company is continuing to assess the extent of the damage at the site. We don't expect material earnings drag from it with insurance and warranties in place.
  - **MISO Transmission Capex**: In July 2022, MISO awarded roughly $900 million investment opportunity out of the total $10.3B MISO transmission capex in the first tranche of Phase 1 projects to ATC (American Transmission Company), in which WEC has an approximately 60% equity ownership interest. Investment in these projects is expected to start as early as 2024 (portion of $900m is included in WEC's 2023-2027 plan). Work on three additional MISO tranches has begun and MISO has indicated that an initial set of Tranche 2 projects, also located at MISO North, is scheduled to be approved in 4Q23. Projects included in Tranche 3 are expected to be located in MISO South, with approval scheduled for 4Q24, while projects identified in Tranche 4 are expected to improve transfer capability between MISO North and MISO South, with approval scheduled for 4Q25.

- **Positioning into Qtr: Neutral.**

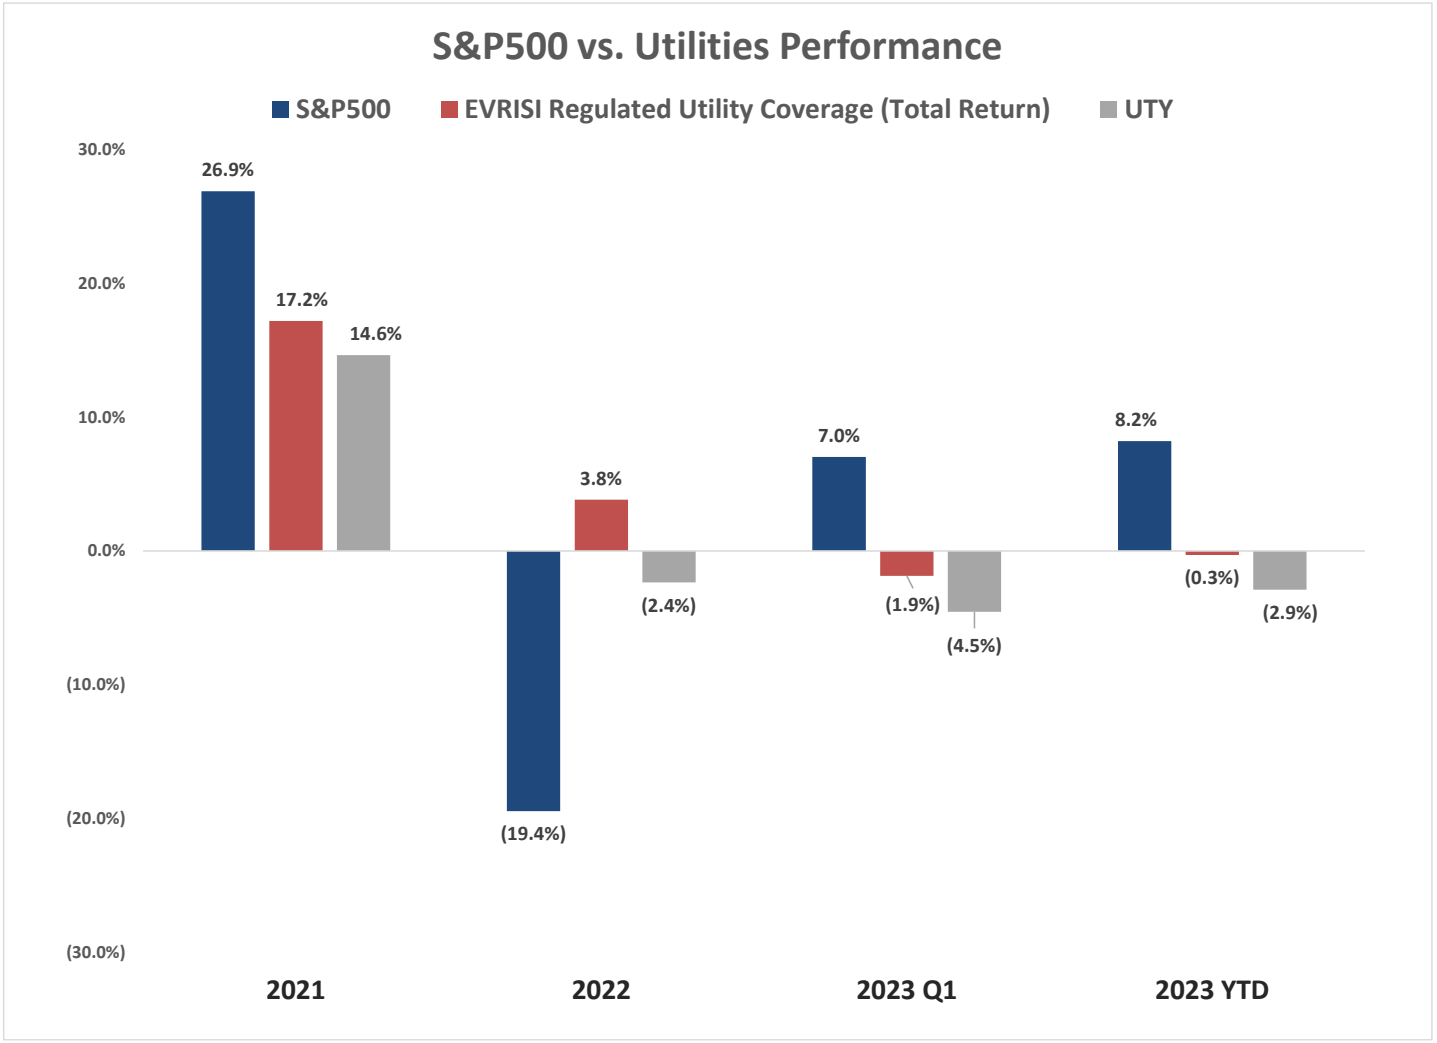
Outperform **TP $75**
Analyst: Durgesh Chopra / Sharon Wang

- **Q1 EPS Bridge:** We project year-over-year EPS to increase $0.02 to $0.72/share. Weather impact is expected to be slightly favorable YOY for XEL. Positive YoY drivers include higher electric and gas sales volumes, riders, and new rates, partially offset by O&M increase and share dilution.

- **What to look for in the earnings report (Key debates/themes):**

  - **Q1 expectations:** We expect XEL to maintain its 2023 EPS guidance of $3.30 to $3.40 and its long-term annual EPS growth of 5%-7%. We also anticipate the company will reaffirm its five-year capex plan of $29.5 billion for 2023-2027. Below are more thematic items that we expect could be covered in the company's Q1 presentation.
  - **MN electric rate case**: NSPM filed a three-year electric rate case requesting rate increase of $677M (revised to $498M) over three years, with ROE of 10.2% and equity ratio of 52.5%. On March 31, 2023, the Administrative Law Judge (ALJ) recommended a rate increase of $384M based on a ROE of 9.87% and an equity ratio of 52.5%. In addition, it also reflects rate reductions associated with certain wind and nuclear generation life extensions and Midcontinent Independent System Operator, Inc. (MISO) capacity revenues and related tracker, as proposed in NSP-Minnesota's revised rate request. We see it as a constructive recommendation and will look for final decision in Q2 2023.
  - **MN gas rate case**: In October, XEL filed a constructive settlement in the gas rate case for a $20.5M revenue increase (vs $36M requested) with a 9.57% ROE (vs 10.5% requested) and 52.5% equity ratio (same with requested). In March 2023, Minnesota commission approved the settlement without modification.
  - **CO electric rate case**: In Nov, XEL filed Colorado electric rate case requesting revenue increase of $312 million, with 10.25% ROE and 55.7% equity layer. Intervenor testimony is due on May 3rd and hearings will start on July 6th. Final decision is expected in Sep 2023.
  - **New Mexico electric rate case**: In Nov, XEL also filed New Mexico electric rate case, requesting rate increase of $78 million with 10.75% ROE and 54.7% equity layer. Final decision is expected in Sep 2023.
  - **South Dakota electric rate case**: In June 2022, NSP-Minnesota filed a South Dakota electric rate case seeking a revenue increase of ~$44M, based on a ROE of 10.75 and an equity ratio of 53%. A final decision is expected in mid-2023.
  - **Texas electric rate case filing**: In Feb 2023, XEL filed Texas electric rate case requesting revenue increase of $158 million, based on a 10.65% ROE and a 54.68% equity layer. We expect the final decision to be in the first quarter next year.
  - **Generation RFPs of approved resource plans:** RFPs for 7.5GW of generation opportunities are issued in MN and CO. Company expects a decision in Minnesota in Q3 timeframe. Commission decision in Colorado is anticipated to be filed in 2H 2023.
  - **MISO**: XEL still estimates ~$1.2 billion investment opportunity (included in the current plan) out of the total $10.3 billion MISO transmission capex in the first tranche of Future 1 projects awarded by MISO in July 2022. The total $30B spending in all of Future 1 should be awarded over the next 10-15 years, which could mean potential for up to $4-$5 billion incremental investment for XEL, ~$0.15 annual EPS upside or 4% of our 25E.



- **Positioning into Qtr: Neutral.**

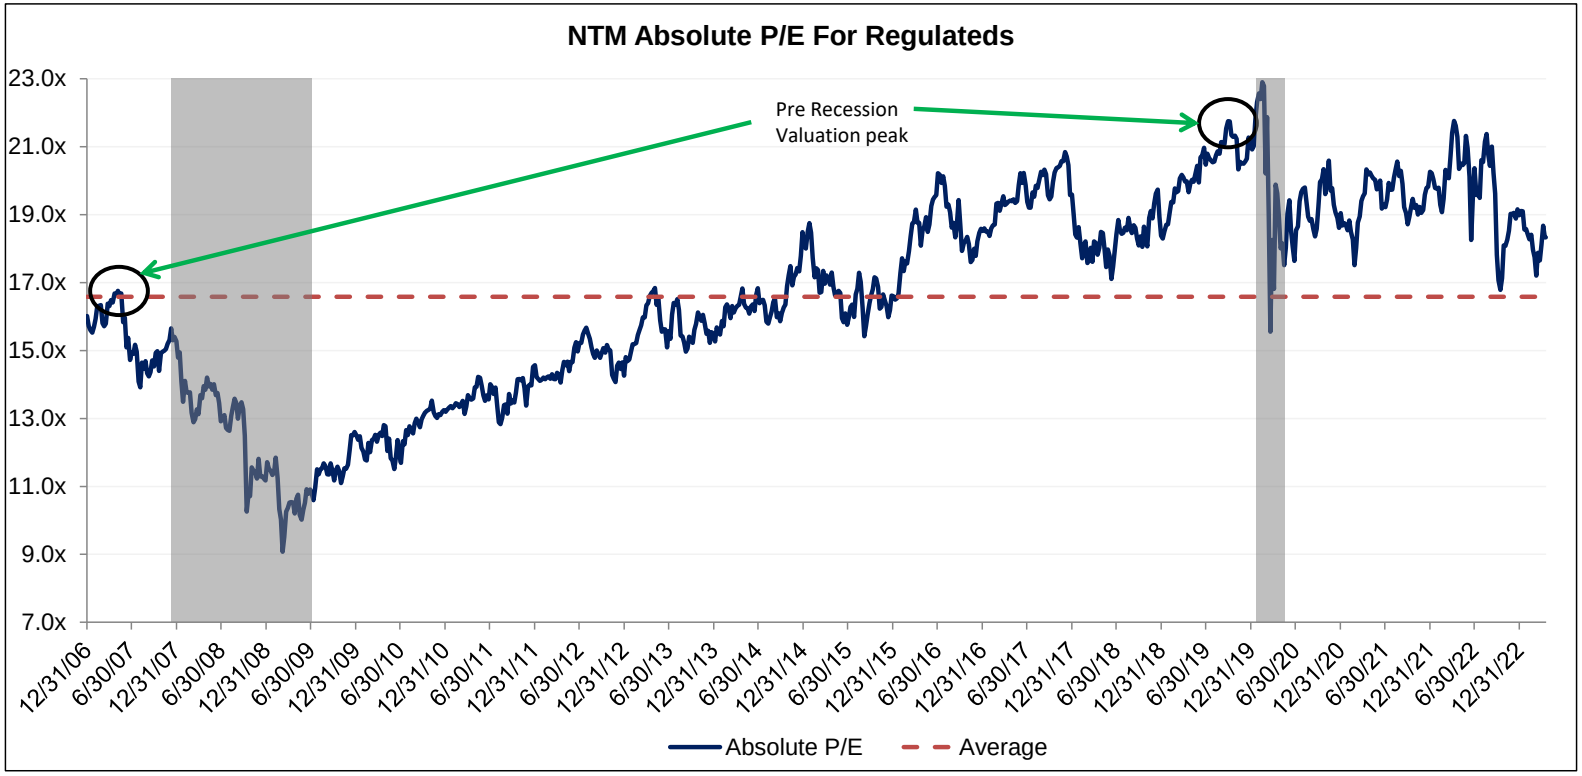
After a Strong 2022, Utes Have Underperformed YTD



Updated as of 4/18/23

Source: FactSet, Evercore ISI Research

This report is prepared solely for the use of Michael Weisenburger

Absolute valuation is higher than historical average

- The group is now trading at ~18.3x, higher than the 15-year average multiple of 16.6x (NTM)
- On an absolute basis, NTM PEs for Utes averaged ~15x 12mths leading up to the 08/09 recession peaking at ~17x, below where the group is trading currently.
- In the COVID recession however, absolute P/E for Utes averaged ~21x 12mths prior and peaked at 23x, which would be 26% upside from current levels at ~18.3x.

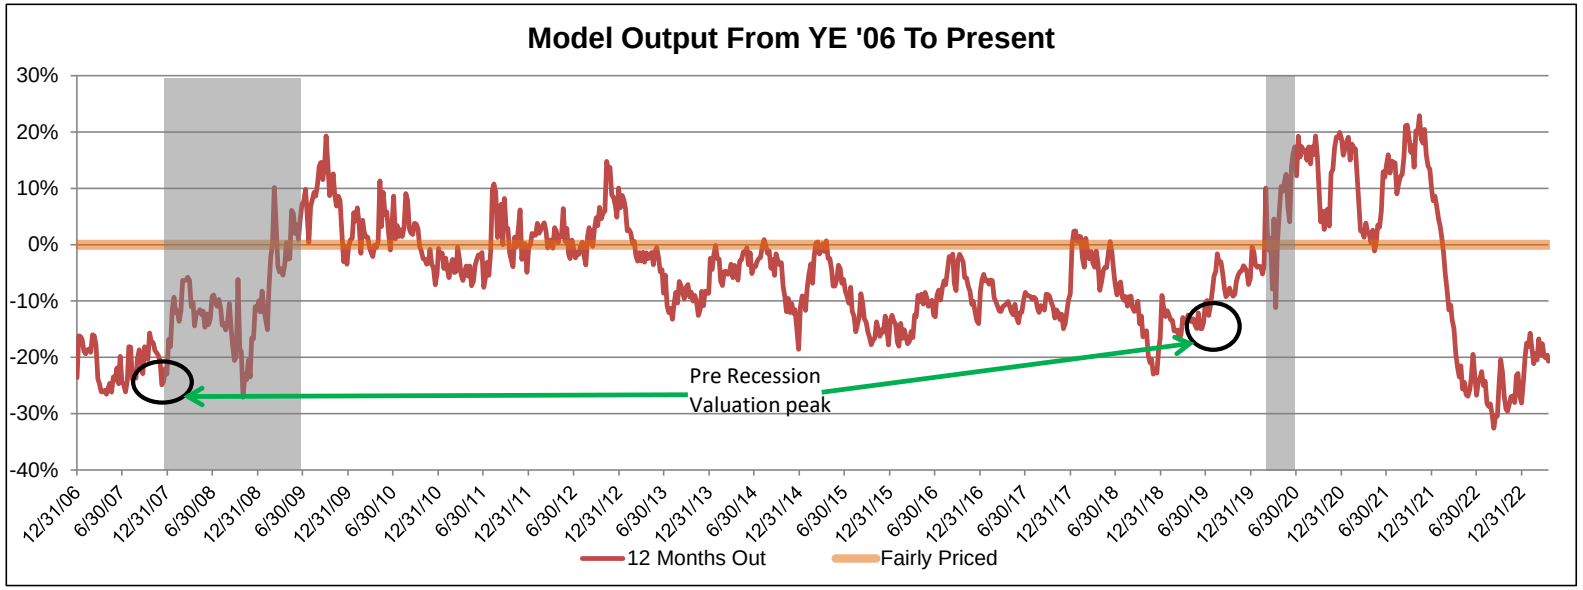
If rates stay unchanged for the next 12 months, regulated utilities now ~20% expensive



Updated as of 4/18/23

Source: FactSet, Evercore ISI Research

This report is prepared solely for the use of Michael Weisenburger

Versus Bond Yields, group valuation remains elevated, 20% expensive

- The group was 16% expensive on average when compared to Moody's Baa yield in our bond regression model 12mths prior to the 08/09 recession with group valuation peaking at 24%.
- Utes were 4% expensive on average in our bond regression model 12mths leading up to the COVID recession peaking at 12%.
- Utes are now 20% expensive in our bond model, 4% below 08/09 pre-recession peak.

Group's NTM P/E relative to S&P 500 is lower than the historical average

- NTM P/E relative to S&P 500 is 1.00x, lower than the historical average of 1.07x.
- NTM relative PEs for Utes averaged 1.07x 12mths leading up to the 08/09 recession peaking at 1.13x, 13% higher than where the group is trading currently.
- In the COVID recession, relative P/E for Utes averaged 1.22x 12mth prior and peaked at 1.30x, which would be ~30% upside from current levels at 1.00x assuming S&P500 stays flat.

US weather in 1Q 2023 was unfavorable for utilities versus the same period last year and as compared to normal.

- **US weather in 1Q 2023 was unfavorable for utilities versus the same period last year and as compared to normal.** Based on National Oceanic and Atmospheric Administration (NOAA) heating degree day data, the weather in 1Q23 drove -8% lower degree days versus last year and -10% below normal, on average across the US. Most of the regions were meaningfully lower when compared to the same period last year in 1Q22, with the SW Central having the largest decrease. Relative to normal, most of the regions had unfavorable weather, with South Atlantic having the most unfavorable weather. In March, WEC Energy lowered its Q1 guidance in light of one of the warmest winters in history in the Upper Midwest, based on our Q1 preview conversations with several companies to date, weather has also been communicated as unfavorable versus guidance (normal weather), but the impact does vary on a company-by-company basis versus the prior year.

ANALYST CERTIFICATION

The analysts, Durgesh Chopra, Michael Lonegan, Sharon Wang, primarily responsible for the preparation of this research report attest to the following: (1) that the views and opinions rendered in this research report reflect his or her personal views about the subject companies or issuers; and (2) that no part of the research analyst's compensation was, is, or will be directly related to the specific recommendations or views in this research report.

IMPORTANT DISCLOSURES

This report is approved and/or distributed by Evercore Group L.L.C. ("Evercore Group"), a U.S. licensed broker-dealer regulated by the Financial Industry Regulatory Authority ("FINRA"), and Evercore ISI International Limited ("ISI UK"), which is authorised and regulated in the United Kingdom by the Financial Conduct Authority. The institutional sales, trading and research businesses of Evercore Group and ISI UK collectively operate under the global marketing brand name Evercore ISI ("Evercore ISI"). Both Evercore Group and ISI UK are subsidiaries of Evercore Inc. ("Evercore "). The trademarks, logos and service marks shown on this report are registered trademarks of Evercore.

The analysts and associates responsible for preparing this report receive compensation based on various factors, including Evercore's Partners' total revenues, a portion of which is generated by affiliated investment banking transactions. Evercore ISI seeks to update its research as appropriate, but various regulations may prevent this from happening in certain instances. Aside from certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Evercore ISI generally prohibits analysts, associates and members of their households from maintaining a financial interest in the securities of any company in the analyst's area of coverage. Any exception to this policy requires specific approval by a member of our Compliance Department. Such ownership is subject to compliance with applicable regulations and disclosure. Evercore ISI also prohibits analysts, associates and members of their households from serving as an officer, director, advisory board member or employee of any company that the analyst covers.

This report may include a Tactical Call, which describes a near-term event or catalyst affecting the subject company or the market overall and which is expected to have a short-term price impact on the equity shares of the subject company. This Tactical Call is separate from the analyst's long-term recommendation (Outperform, In Line or Underperform) that reflects a stock's forward 12-month expected return, is not a formal rating and may differ from the target prices and recommendations reflected in the analyst's long-term view.

Applicable current disclosures regarding the subject companies covered in this report are available at the offices of Evercore ISI: 55 East 52nd Street, New York, NY 10055, and at the following site: https://evercoreisi.mediasterling.com/disclosure.

Evercore and its affiliates, and I or their respective directors, officers, members and employees, may have, or have had, interests or qualified holdings on issuers mentioned in this report. Evercore and its affiliates may have, or have had, business relationships with the companies mentioned in this report.

Additional information on securities or financial instruments mentioned in this report is available upon request.

Ratings Definitions

Current Ratings Definition

Evercore ISI's recommendations are based on a stock's total forecasted return over the next 12 months. Total forecasted return is equal to the expected percentage price return plus gross dividend yield. We divide our stocks under coverage into three primary ratings categories, with the following return guidelines:

Outperform- the total forecasted return is expected to be greater than the expected total return of the analyst's coverage sector.
In Line- the total forecasted return is expected to be in line with the expected total return of the analyst's coverage sector.
Underperform- the total forecasted return is expected to be less than the expected total return of the analyst's coverage sector.
Coverage Suspended- the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances.*
Rating Suspended- Evercore ISI has suspended the rating and target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon.*

*Prior to October 10, 2015, the "Coverage Suspended" and "Rating Suspended" categories were included in the category "Suspended."

FINRA requires that members who use a ratings system with terms other than "Buy," "Hold/Neutral" and "Sell" to equate their own ratings to these categories. For this purpose, and in the Evercore ISI ratings distribution below, our Outperform, In Line, and Underperform ratings can be equated to Buy, Hold and Sell, respectively.

Historical Ratings Definitions

Prior to March 2, 2017, Evercore ISI's recommendations were based on a stock's total forecasted return over the next 12 months:

Buy- the total forecasted return is expected to be greater than 10%
Hold- the total forecasted return is expected to be greater than or equal to 0% and less than or equal to 10%

This report is prepared solely for the use of Michael Weisenburger

Sell -the total forecasted return is expected to be less than 0%

On October 31, 2014, Evercore Partners acquired International Strategy & Investment Group LLC ("ISI Group") and ISI UK (the "Acquisition") and transferred Evercore Group's research, sales and trading businesses to ISI Group. On December 31, 2015, the combined research, sales and trading businesses were transferred back to Evercore Group in an internal reorganization. Since the Acquisition, the combined research, sales and trading businesses have operated under the global marketing brand name Evercore ISI.

ISI Group and ISI UK:

Prior to October 10, 2014, the ratings system of ISI Group LLC and ISI UK which was based on a 12-month risk adjusted total return:

Strong Buy- Return > 20%
Buy- Return 10% to 20%
Neutral - Return 0% to 10%
Cautious- Return -10% to 0%
Sell- Return< -10%

For disclosure purposes, ISI Group and ISI UK ratings were viewed as follows: Strong Buy and Buy equate to Buy, Neutral equates to Hold, and Cautious and Sell equate to Sell.

Evercore Group:

Prior to October 10, 2014, the rating system of Evercore Group was based on a stock's expected total return relative to the analyst's coverage universe over the following 12 months. Stocks under coverage were divided into three categories:

Overweight- the stock is expected to outperform the average total return of the analyst's coverage universe over the next 12 months.
Equal-Weight- the stock is expected to perform in line with the average total return of the analyst's coverage universe over the next 12 months.
Underweight -the stock is expected to underperform the average total return of the analyst's coverage universe over the next 12 months.
Suspended- the company rating, target price and earnings estimates have been temporarily suspended.

For disclosure purposes, Evercore Group's prior "Overweight," "Equal-Weight" and "Underweight" ratings were viewed as "Buy," "Hold" and "Sell," respectively.

Ratings Definitions for Portfolio-Based Coverage

Evercore ISI utilizes an alternate rating system for companies covered by analysts who use a model portfolio-based approach to determine a company's investment recommendation. Covered companies are included or not included as holdings in the analyst's Model Portfolio, and have the following ratings:

Long- the stock is a positive holding in the model portfolio; the total forecasted return is expected to be greater than 0%.
Short- the stock is a negative holding in the model portfolio; the total forecasted return is expected to be less than 0%.
No Position- the stock is not included in the model portfolio.
Coverage Suspended- the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company, and in certain other circumstances; a stock in the model portfolio is removed.
Rating Suspended - Evercore ISI has suspended the rating and/or target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon; a stock in the model portfolio is removed.

Stocks included in the model portfolio will be weighted from 0 to 100% for Long and 0 to -100% for Short. A stock's weight in the portfolio reflects the analyst's degree of conviction in the stock's rating relative to other stocks in the portfolio. The model portfolio may also include a cash component. At any given time the aggregate weight of the stocks included in the portfolio and the cash component must equal100%.

Stocks assigned ratings under the alternative model portfolio-based coverage system cannot also be rated by Evercore ISI's Current Ratings definitions of Outperform, In Line and Underperform.

FINRA requires that members who use a ratings system with terms other than "Buy," "Hold/Neutral" and "Sell," to equate their own ratings to these categories. For this purpose, and in the Evercore ISI ratings distribution below, our Long, No Position and Short ratings can be equated to Buy, Hold and Sell respectively.

Evercore ISI rating (as of 04/19/2023)

Coverage Universe			**Investment Banking Services I Past 12 Months**		
Ratings	**Count**	**Pct.**	**Ratings**	**Count**	**Pct.**
Buy	471	57	Buy	55	12
Hold	298	36	Hold	28	9
Sell	15	2	Sell	0	0
Coverage Suspended	35	4	Coverage Suspended	4	11
Rating Suspended	10	1	Rating Suspended	3	30

Issuer-Specific Disclosures (as of April 19, 2023)

Evercore ISI or an affiliate has acted as a manager or co-manager of a public offering of securities by Sempra Energy in the last 12 months.

This report is prepared solely for the use of Michael Weisenburger

NextEra Energy Inc and Sempra Energy is a client of Evercore LLC, and Evercore LLC has provided investment banking services to NextEra Energy Inc and Sempra Energy in the last 12 months.

Evercore ISI or an affiliate has received compensation from NextEra Energy Inc and Sempra Energy for investment banking services in the last 12 months.

Access This Report

Key Message: We are combining our 3 days of meetings at the AGA conference in FL and providing stock-by-stock takes below as well as highlighting the most interesting meetings we had where we received some incremental datapoints. While many of our meetings focused on company-specific issues, broader themes across the three days included the impacts of falling natural gas prices on bill headroom, ongoing inflation, high interest rates, overcoming 1Q23 weather headwinds, and potential LDC M&A. Companies often took clear stances in our meetings on potential interest in acquisitions. **Interesting Meetings to flag: CNP dinner, D, DUK, ED, NWE, SO, SR, WEC.**

Key Takeaways:

- **AEE:** All about Illinois Staff recommendation. Message similar to EXC – Mgmt. was surprised, early in the process, and believes they have a strong argument around capex reduction (i.e., could be solved with incremental documentation) and won't spend without recovery; ROE recommendation pegged to 30-year was just setting a floor – in the end, they said it won't sway their guidance. Watch for rebuttals on 6/14.

- **AVA:** Roll-off of tax credits from prior rate agreements and recovery of ERM & PGA balances to reduce equity needs post-2023. We like the new CFO.

- **BKH:** 2023 equity need of $140M-$160M is focused on B/S repair; mgmt. expects to be above BBB credit metric thresholds by YE23.

- **CMS:** Company is confident in O&M offset measures to remain within guidance – detailed some tactical and perpetual savings including IT, voluntary separations, return to office policies; storm audits kick off in September – key event to watch for confidence in regulatory relationships/construct as MI remains a concern for investors given mixed datapoints.

- **CNP:** We hosted a well-attended dinner – higher capex coming in 2Q from the incremental $3bn identified (a portion will go into plan) with DSIC approved in TX; per the company, more asset sales could be utilized to fund higher growth; upcoming Houston case is expected to remain non-contentious. CFO Foster remains big win for CNP.

- **CPK:** From a guidance perspective, management noted a continuous 5-year planning update cycle internally, despite providing a simple 2025 guidance reiteration for investors; remains focused on organic growth; despite a history of growing through regulated and unregulated acquisitions, management doesn't see any attractive valuations or accretive opportunities.

- **D:** No change in message regarding strategic review; the company expects an announcement in July–Sept timeframe with analyst day following shortly thereafter. Investors should have all questions answered with only remaining items being closure of deals – as we have highlighted, D could be solely left with VEPCO, Millstone, Scana with modest O/S ownership as we believe the company is looking for a simpler story and all gas LDCs could be on the block (i.e., Questar, NC, etc.) including potentially Cove Point… the O/S wind vessel potentially being second phase of a sale post initial strategic review.

- **DTE:** Continues to restore confidence in management's ability to execute against headwinds; noted progress in settlement talks around the IRP as well as constructive datapoints on the voluntary renewables program approval; Vantage remains a source of upside potential from higher-return projects; management noted vastly increased conversations with the MPSC as well as the MPSC's recognition of the negative optics of the prior litigated outcome for DTE Electric.

- **DUK:** 2023 firmly on track; management noted interest in M&A in states DUK already operates in, as long as credit positive and earnings accretive. Remains confident around '23 guide; rate cases could be key driver year-over-year with opportunities to diminish lag, earn above allowed returns.

- **ED:** An interesting potential upside also exists on the side of NY Transco – there is Long Island transmission debottlenecking, where NY Transco and NYPA put out several solutions. NYISO will evaluate the ultimate recommendation, but staff has recommended the top 3 solutions as those coming from Transco. The project's $3bn investment by 2030 would be about 30% attributed to ED, and for financing there would be some project-level debt and push-down equity (incremental to guidance); in settlement talks on CECONY Steam; items outside the base rate case include the Brooklyn clean energy hub, which is now approved and in plan, but needs around new capacity are emerging outside of plan, such as new substations and transmission (~2028 timeframe, $1.1bn in capex).

- **LNT:** Wisconsin process just kicking off, but management strikes an upbeat tone

as the core of the regulatory asks remain straightforward (fuel, capital, and ROE/equity layer); noted that transparency with the PSCW and Staff has been a priority in the new case, with management acknowledging subtle changes in approach; IPL case remains a longer-dated item to monitor as management continues to work through advanced ratemaking efforts in the near term. The financing plan remains partially dependent on guidance from the treasury on transferability, with management reiterating several familiar points and introducing incremental ones. The company now expects that transferability guidance could come as soon as later this quarter, with the team conducting several RFIs to evaluate the optionality – the company could start selling some credits by the second half of the year, with the team laying out expectations to earn in the mid-90% range on the transfers, with the delta passed on to customers.

- **MDU:** We caught up with the company on the strategic direction (including the imminent separation of Knife River materials business) and thoughts around business fundamentals related to construction, regulated utilities, and pipelines. We are focused on the post-separation RemainCo and any further optimization between the regulated businesses and construction services (currently under strategic review; management targeting end of 2Q outcome).

- **NI:** NIPSCO sale reiterated by YE23; we came away with increased confidence in continued 6%-8% annual NOEPS growth beyond existing plan through 2027.

- **NJR:** Management still expects ‘23/‘24 EPS to be top of range, regardless of level of CEV capital investment.

- **NWE:** Came away incrementally positive on prospects post-MT GRC outcome; could see LT CAGR tightened higher on expected rebase off 2022.

- **NWN:** Conversations focused on water opportunities and as scale is built, management will look to break this segment out, likely when ~10% of the mix. We also asked about gas M&A more broadly, given the current industry backdrop,

with the team noting that they remain focused on water and renewables growth as an adjunct to the core utility – the bar for both regional and national LDC M&A remains high.

- **OGS:** 1.0% customer growth target will likely prove overly conservative, we believe; targeting 19%-20% FFO/D & 58%-59.5% equity to keep A3/A- rating.

- **PEG:** PEG continues to enjoy reduced volatility from the 2022 reset on pension, interest, and other guidance assumptions. Messaging was exactly consistent with 1Q23 earnings call disclosures and the only volatility we anticipate is the late 2023 rate case filing.

- **SO:** Vogtle Unit 3 in service in June; prudency review request may be above $7.3bn but won't be close to $10.5bn potential ask; no M&A interest and happy with existing portfolio of businesses.

- **SR:** Company expects new CEO announcement well in advance of YE23. Potential for additional natural gas asset/system acquisitions (including LDCs), in our view.

- **SRE:** Continued strong messaging around long term earnings growth (not linear but pointing to the high end of 6-8%); remains muted on acquisition strategy, and management prefers organic regulated investments to support business mix while LNG growth provides upside on earned returns; overall, management plans to optimize the business mix to 80/20 with LNG project equity sell-downs.

- **WEC:** Potential MSFT data center capacity need could be incremental 1 GW; Nov. '23 capex update could be accompanied by growth-driven equity.

IN – Indiana legislation aimed at greater consideration of reliability and resiliency in utility resource plans signed by the House Speaker

CMS/DTE/MI – MI lawmaker to introduce bill for elected commission

FE – Solar generation rider docket opened for comment following review of Ohio Supreme Court decision

EVRG/MO – MO PSC grants CCN for Persimmon Creek wind farm

PJM/FERC – Storm penalties draw multiple complaints at FERC

ED – Evidentiary hearing on joint proposal to be held 4/18

ES/MA – DPU issues clarifications on Phase 2 EV requests

AEE – Details of Missouri settlement released

- AEE MO has released the details of its settlement with the PSC Staff, OPC, CCM, and various other stakeholder groups (MECG, MIEC) calling for a $140m revenue increase with new rates effective 7/1/23.
- "On April 7, 2023, Ameren Missouri, the staff of the MoPSC, the Missouri Office of Public Counsel, and certain other intervenors filed a nonunanimous stipulation and agreement with the MoPSC. The stipulation and agreement, which is subject to MoPSC approval, would result in a $140 million increase to Ameren Missouri's annual revenue requirement for electric service compared to its prior revenue requirement established in the MoPSC's December 2021 electric rate order. The stipulation and agreement did not specify an allowed return on equity or common equity ratio. The stipulation and agreement also did not specify a rate base amount or any rate base disallowances." – filing

Provided for the exclusive use of Michael Weisenburger at NiSource on 10-Apr-2023 09:56 AM.

- "As a result of these discussions, the Signatories have agreed to a series of compromises to determine mutually acceptable resolutions to all issues relating to the revenue requirement and certain other issues as set forth in more detail below. The Signatories agree that resolution of these issues will shorten the forthcoming hearing, and only certain issues (i.e., Issue 4 (and all subparts), 24.B, and 30) will require a hearing. The Signatories agreed to the settled "black box" revenue requirement increase amount using their own assumptions." – filing
- More in docket HERE.
- Hearings on issues 24B and 30 were previously proposed to be rescheduled for 4/13.
- Earlier Position Statement from AEE with issues HERE.

Guggenheim takeaway: *Generally as-expected coming off the 3/29 motion (see our note HERE), with the remaining issue items appearing unchanged from that initial filing. The black box outcome is consistent with prior MO processes and not a surprise coming off our very recent NDR (see our note HERE) where this route was raised as a potential pathway forward. As a reminder, AEE MO's most recent trued-up ask was ~$239m, while Staff on the same date put forward a $107m recommended increase. As we noted previously, the major drivers of $120mm in variance between Staff and the company were threefold:* ***1)*** *ROE of 9.59% vs. requested 10.2% (~$50mm of the difference),* ***2)*** *High Prairie curtailments (~$30m), and* ***3)*** *Rush Island availability (~$40-50m). We continue to model approximately average earned ROEs of 9.5% through 2027 for Ameren MO. We see AEE's ongoing ability to reach settlements in MO as further underscoring what we see as the name's premium attributes (management, growth, execution, etc.).*

NWE – NorthWestern to appeal district court order vacating air quality permit for Yellowstone facility

- The judge supported the majority of the state-issued air quality permit but vacated the permit after taking issue with certain elements of the Montana DEQ analysis, the company said.
- The Montana DEQ originally issued NorthWestern an air quality permit on Sept. 8, 2021, which enabled the commencement of construction of the project.
- The current ruling "appears to require new criteria to be analyzed," according to a company spokesman.
- NorthWestern is seeking an immediate stay and will appeal the decision.
- Company statement HERE.

Guggenheim takeaway: *We continue to expect the Yellowstone County Generating Station to be constructed as planned and will be monitoring the appeals process, with more details expected as it gets underway.* ***Based on our current expectation of construction still proceeding on schedule, we do not expect this to be impactful to NWE's capital plan or CAGR at this time.***

FE – West Virginia regulators to hear proposal to keep Pleasants Power Plant on April 23rd

- The WV PSC has scheduled an April 23, 2023, evidentiary hearing on the request by Monongahela Power and Potomac Edison.
- Recall that the West Virginia PSC reopened a docket to consider an interim solution and proposed surcharge relating to FE's potential acquisition of the Pleasants Power Station.
- On March 31, 2023, the companies filed a report on the possibility of acquiring Pleasants.
- In order to provide time for the companies, interested parties, regulatory bodies, and others to further review a possible acquisition of Pleasants, the companies proposed an interim solution to preserve Pleasants' operations in 2023 while the companies complete their analysis. The interim solution proposal includes a temporary surcharge of $3 million per month.
- Docket 22-0793-E-ENEC

Guggenheim takeaway: *For your calendar. The 1,300 MW Pleasants plant was last owned by Energy Harbor (ENGH), which acquired it as part of the FirstEnergy Solutions bankruptcy proceedings. Various parties in WV support FE acquiring the plant, potentially as a replacement for Ft. Martin Power Station, which lacks selective catalytic reduction (SCR) technology. During the 2023 WV legislative session, both WV's Senate and House passed resolutions which encouraged Mon Power to buy Pleasants (i.e., HR12 and*

Provided for the exclusive use of Michael Weisenburger at NiSource on 10-Apr-2023 09:56 AM.

SB29, respectively). The legislature also passed HB 3308, allowing securitization of the undepreciated book value of retired coal plants. The timeline for a decision to be made has been accelerated due to falling market prices causing Energy Harbor to move up the plant's planned retirement date from 4Q23 to May 31, 2023. We continue to monitor.

TX ─ Multiple energy bills advance through legislative process

- Several pieces of legislation advanced or stalled in their respective chambers at the end of last week.
- A committee report for SB1076, which deals with deadlines for transmission CPCN deadlines has been printed - see HERE
- SB1015, related to distribution system cost recovery (DCRF) has been transmitted to the House - HERE
- HB2555, pertaining to T&D resiliency planning, was left in committee last week – see HERE
- SB6 and SB7 were transmitted to the House and marked as received – see HERE

Guggenheim takeaway: *Another legislative roundup for your awareness as several of the bills in focus have now been transmitted to the House for their own deliberations. Aside from SB6, pieces of utility legislation above are generally tertiary relative to our focus on the more impactful rate-specific bills such as HB3042 (cap ratios). While some bills have been marked as left in committee, we note that this is not necessarily an indication they have been discarded – it remains possible that they were appended to another bill in that particular chamber. Finally, we continue to believe SB6 and SB7 will face more resistance in the House following their successful navigation of the Senate last week – see our recent note HERE for more on the ERCOT side.*

IN ─ Indiana legislation aimed at greater consideration of reliability and resiliency in utility resource plans signed by the House Speaker

- Recall that the Senate previously passed the House bill and returned it to the House with amendments.
- The bill includes guidance for the regulators to consider reliability and resiliency of resources in IRPs.
- The process saw Senate add co-sponsors to the bill.
- Regulators would need to consider the ability of resources to provide dispatchable power.
- The guidance from the bill also includes affordability and competitive rates as a goal for the IURC.
- Bill text here: HB1007

Guggenheim takeaway: *FYI. The bill tries to bring a legislated balance to Indiana's decarbonization focus (i.e., balancing reliability with intermittent resources like solar and wind). While the changes to the framework are open-ended, we could see a change in IRP approach from CNP, DUK and NI as the state's electric IOUs.* ***Ultimately, we see this as neutral to slightly positive for the state's utilities, as it should serve to enhance reliability.***

CMS/DTE/MI ─ MI lawmaker to introduce bill for elected commission

- Sen. Jim Runestad reportedly plans to introduce 'transparency and accountability' legislation this week with a focus on utility lobbying and the selection of the PSC.
- More HERE.

Guggenheim takeaway: *Efforts to transition to elected commissions are a periodic occurrence across this space, however, in this case we believe some of the recent storm frustration has driven the push here, as indicated by media above. We continue to monitor these kinds of efforts as they arise, but in many cases, they do not advance past committee – stay tuned for more this week.*

FE ─ Solar generation rider docket opened for comment following review of Ohio Supreme Court decision

- The Attorney Examiner made a filing requiring all comments be filed in this docket on or before **May 7, 2023**, and reply comments be filed on or before **May 22, 2023**.
- Recall that this docket was created due to legislation which requires PUCO to establish a rate mechanism for the retail recovery of costs related to the solar generation fund for the period up to December 31, 2027.

Provided for the exclusive use of Michael Weisenburger at NiSource on 10-Apr-2023 09:56 AM.

- PUCO was tasked with determining the proper rate design for recovering $20m annually for total disbursements required under the new law from the solar generation fund.
- Case 21-447-EL-UNC

Guggenheim takeaway: *For your calendar. Recall that the matter made its way to the Ohio Supreme Court, which remanded it for clarification on December 7, 2022. The Supreme Court had instructed PUCO to "expressly determine whether the revenue recovered by Rider SGF is subject to the CAT and billable to customers." In the current filing, the attorney examiner states that after reviewing the Supreme Court's remand, the issue is being opened for comment.*

EVRG/MO ─ MO PSC grants CCN for Persimmon Creek wind farm

- The PSC has granted a CCN for the wind project alongside a series of conditions regarding costs and benefits.
- "EMW is authorized to acquire and is granted a certificate of convenience and necessity to own, operate, maintain, and otherwise control and manage Persimmon Creek with the conditions set out below." – filing
- "The Commission finds it necessary to condition the grant of a certificate on some added protection for those

  captive ratepayers. The benefits in conjunction with the conditions, outlined below, promote the public interest." – filing
- "Any costs associated with owning and operating Persimmon Creek, including but not limited to those related to PISA treatment and any required wildlife mitigation, that exceed the ratepayer realized market revenues and ratepayer realized tax benefits shall be shared equally between EMW shareholders and rate payers including the market value of energy serving EMW customers." - filing
- More HERE.

Guggenheim takeaway: *Welcome closure on the process that had seen some back and forth between Staff, OPC, and the company over the benefits of the project. We see the successful navigation of this process as a minor positive for our perception of the stakeholder/regulatory environment in MO (coming on the heels of AEE's recent settlement). As a reminder, the asset is included in the 2023 guide (~$0.05).*

PJM/FERC ─ Storm penalties draw multiple complaints at FERC

- A group of gas generators and a solar generator have filed different complaints at FERC over their perceived grievances stemming from the 2022 storm charges.
- "As described further below in Section IV.C, during Winter Storm Elliot on December 23-24, 2022, as a result of PAIs called by PJM during two evenings, the Solar Projects' are being assessed an amount of Non-Performance Charges, with approximately 87% of such Non-Performance Charges accruing during Evening Hours when the Solar Projects are incapable of operating no matter how much investment is made to improve those resources' operational performance. The first of the Non-Performance Charges are scheduled to be invoiced to SunEnergy1 on April 7, 2023. This is not a just and reasonable result." - filing
- EL23-58 HERE
- "PJM now intends to assess $1 to $2 billion in Non-Performance Charges to those generators that were not operating during Winter Storm Elliott, notwithstanding the load forecasting errors, PJM's failure to adhere to its emergency procedures in violation of the Tariff, and the general failure on PJM's part to identify what generation was needed and to communicate that need in a timely and compliant manner." - filing
- EL23-55 HERE

Guggenheim takeaway: *Zero surprise to see more complaints as the penalties are finalized by the RTO – as a reminder, this event was one of the bigger PAI tests since the 2014 polar vortex. The sheer size of the penalties has driven several smaller single-asset entities toward bankruptcy, so not a surprise to see significant legal action at FERC ahead of the payment deadlines. We expect this to remain a noisy process in the near term and a significant policy/reform area for the RTO as the Board sets out on a new examination of the RPM.*

ED ─ Evidentiary hearing on joint proposal to be held 4/18

- The PSC will hold an evidentiary hearing on 4/18 regarding the 2/16 joint proposal.

Provided for the exclusive use of Michael Weisenburger at NiSource on 10-Apr-2023 09:56 AM.

- "The purpose of the hearing is to receive into evidence and evaluate, through the presentation of evidence and cross-examination of witnesses, a Joint Proposal filed in these proceedings on February 16, 2023." - filing
- More HERE.

Guggenheim takeaway: *For your calendars.*

ES/MA – DPU issues clarifications on Phase 2 EV requests

- The DPU has issued a lengthy response to both requests for reconsideration, requests for clarification, and a motion from the AG to reopen the record in the DPU's ongoing EV docket.
- More HERE.

Guggenheim takeaway: *Very minor heads up – most of the items in the DPU's combined filing appear to be relatively minor and procedural as all parties continue to finalize the earlier (Dec) order from the DPU.*

Provided for the exclusive use of Michael Weisenburger at NiSource on 10-Apr-2023 09:56 AM.

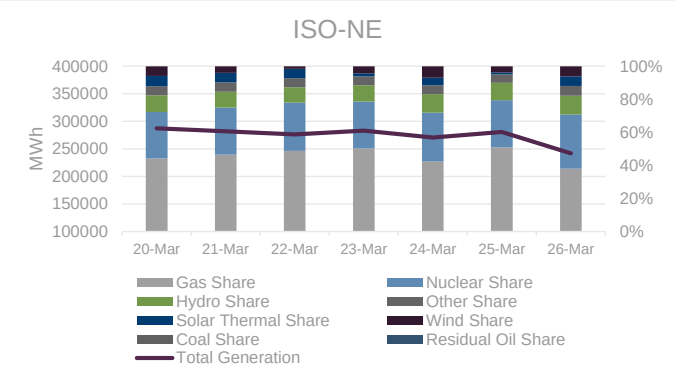
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)

(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.



(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

RATINGS DISTRIBUTIONS FOR GUGGENHEIM SECURITIES:

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgement. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conducts an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers

Provided for the exclusive use of Michael Weisenburger at NiSource on 10-Apr-2023 09:56 AM.

on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

This communication does not constitute an offer of Shares to the public in the United Kingdom. No prospectus has been or will be approved in the United Kingdom in respect of the Securities. Consequently, this communication is directed only at (i) persons who are outside the United Kingdom or (ii) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order"), (iii) high net worth entities falling within Article 49(2) of the Order (iv) and other persons to whom it may lawfully be communicated (all such persons together being referred to as "relevant persons"). Any investment activity to which this communication relates will only be available to, and will only be engaged with, relevant persons. Any person who is not a relevant person should not act or rely on this document or any of its contents.

NEE/ED – USFWS posts letter on endangered species consultation with FERC, Sierra Club notes 4th circuit court appeal of new biological opinion

D/VA – General Assembly passes utility reform legislation, discards Governor's amendments to wind bill

FE – West Virginia's Gov. Justice continues to be hopeful regarding future for Pleasants Power Plant

ERCOT – Calpine announces plans for two 425MW gas plants, credits PCM

TX – Texas utility bills progress through committee review

SRE – Cameron Pipeline issues force majeure notice; minor compression reduction

Policy – WOTUS rule enjoined in another 24 states

PJM/NJ – BPU Staff publish progress report on resource adequacy work

IL/Wind – Chicago lawmakers continue to advocate for offshore wind on Lake Michigan

D – Chief nuclear officer to retire; replacement named

AEE – MO PSC grants CCN for 150MW Boomtown solar facility

NI – As expected, NiSource issues its 2022 Integrated Annual Report

NEE/ED – USFWS posts letter on endangered species consultation with FERC, Sierra Club notes 4th circuit court appeal of new biological opinion

- The US fish and Wildlife Service continued correspondence with FERC on endangered species, while Sierra Club noted a 4th circuit court appeal of the February 2023 Biological Opinion.
- The appeal requests a court review of the new USFWS BO.
- MVP is still pending several administrative and judicial outcomes including: fourth circuit appeals court review of WV agency permits, Army Corps of engineers needs VA/WV permits for its water discharge permit approval and FERC has to reissue a Biological Opinion (US Fish and Wildlife previously filed the new biological opinion on MVP with FERC, pending approval).
- FERC staff and the US Wildlife Service have previously reviewed the Updated SBA and requested clarification on endangered species impacts and protective actions.

Provided for the exclusive use of Michael Weisenburger at NiSource on 17-Apr-2023 02:42 PM.

- Mountain Valley Pipeline also submitted an Implementation Plan for the Amendment Project for Mountain Valley Pipeline Project.
- The plan supports the amended application including changing the crossing method for 183 waterbodies and wetlands at 120 locations from open cut to trenchless.
- Media overview on recent actions here.
- FERC Docket: CP16-10. / CP21-57

Guggenheim takeaway: *The appeal of the new biological opinion is not a surprise as opposition groups have been active in challenging every aspect of reissued permitting from FERC and administrative agencies. As the docket filings indicate, there continue to be opposition and challenges to MVP construction. The MVP project was largely built (~90+ % by prior developer estimates) but the fourth circuit rejection of water permits puts any potential progress on hold. The tug of war continues on MVP legal challenges. The final authorizations to resume construction are still outstanding and FERC commissioners have previously dissented on "continuation of work" approvals. Both ED and NEE have taken major write downs on the MVP project (i.e., not in financial guidance).*

D/VA — General Assembly passes utility reform legislation, discards Governor's amendments to wind bill

- The General Assembly has passed SB1265 following the Governor's amendments, which were largely technical/grammatical - HERE
- The Senate passed by the Governor's amendments to HB2444, which would have set a competitive process for any phase 2 offshore wind procurement.

Guggenheim takeaway: *Little surprise on both counts, with both chambers rejecting the surprise amendments from the Governor's office to the wind bill. As we noted previously, the Governor's amendment had specifically focused on procurement's after CVOW and would not have impacted the current ongoing credit repair process/strategic review, nor the associated optionality around a passive stake sale in CVOW (the current project). The move sets up a return of the original unmodified language (without amendments) to the governor's office, which he can still sign. The legislative finality come as the company previously committed to a business review update in 2Q.*

FE — West Virginia's Gov. Justice continues to be hopeful regarding future for Pleasants Power Plant

- During his weekly virtual briefing from the Capitol, Gov. Justice said he "*was pleased that FirstEnergy Corp. subsidiaries Monongahela Power Co. and Potomac Edison Co. submitted a plan to the PSC at the end of March to operate the plant for a 12-month period while it considers a more permanent proposal.*"
- Recall that Pleasants Power is slated for closure on May 31.
- In order to provide time for the companies, interested parties, regulatory bodies, and others to further review a possible acquisition of Pleasants, the companies proposed an interim solution to preserve Pleasants' operations in 2023 while the companies complete their analysis. The interim solution proposal includes a temporary surcharge of $3 million per month.
- Docket 22-0793-E-ENEC

Guggenheim takeaway: *Recall that the WV PSC has scheduled an April 23, 2023, evidentiary hearing on the request made by Monongahela Power and Potomac Edison. The 1,300 MW Pleasants plant was last owned by Energy Harbor, who acquired it as part of the FirstEnergy Solutions bankruptcy proceedings. Various parties in WV support FE acquiring the plant, potentially as a replacement for Ft. Martin Power Station, which lacks selective catalytic reduction (SCR) technology. During the 2023 WV legislative session, both WV's Senate and House passed resolutions which encouraged Mon Power to buy Pleasants (i.e., HR12 and SB29, respectively). The legislature also passed HB 3308, allowing securitization of the undepreciated book value of retired coal plants. The timeline for a decision to be made has been accelerated due to falling market prices causing Energy Harbor to move up the plant's planned retirement date from 4Q23 to May 31, 2023. We continue to monitor.*

ERCOT — Calpine announces plans for two 425MW gas plants, credits PCM

- "Calpine [PRIVATE] has announced it is relaunching its Texas power plant development program following a move by state regulators to embrace market-based incentives for reliable power. Calpine's plan includes multiple projects in various stages of development

Provided for the exclusive use of Michael Weisenburger at NiSource on 17-Apr-2023 02:42 PM.

and squarely supports goals outlined by the Public Utility Commission (PUC)… The initial project is a new 425 MW gas-fired power plant adjacent to the existing Freestone Energy Center in Freestone County. Efforts underway include engineering and site planning, grid interconnection requests, and environmental permitting. Critical components including gas turbines and generators have been procured and are ready for deployment. The new facility will be operational before the summer of 2026." - release

- More HERE

Guggenheim takeaway: *Interesting timing from Calpine as the House now grapples with the Senate-passed pieces of energy legislation (SB6/7), and the PUCT examines a formal reliability standard to underpin the PCM. The company specifically elevated the PCM as a root cause of improved investment signals in its release, although we note that the mechanism has not found particular favor in the legislature or with the Lt. Governor. For both Senate bills, we have heard firsthand and in media that they could have chilling effects on new investment –* ***most recently with our expert conversation last week (note HERE****). We continue to monitor closely for indications on the Governor's willingness to potentially move away from the PCM and towards more state-supported expenditures.*

TX – Texas utility bills progress through committee review

- TX Senate bill SB 1015 related to bi-annual DCRF review at the PUCT moves to House state affairs committee.
- The committee report is supportive of aligning the DCRF and TCOS frameworks and does not see any change in authority resulting from the bill.
- The bill aligns DCRF reviews to twice in one year, similar to the TCOS process already in place.
- TX SB 1076 was received at the house.
- The bill addresses timelines for CPCN approvals on transmission projects.

Guggenheim takeaway:*FYI. SB1015 seems to be one of the less contested bills in front of the TX legislature as it does not change any agency authorities or introduce any new concepts in ratemaking. The DCRF cadence could help offset some of the regulatory lag for TX utilities (CNP, SRE, ETR, AEP). Texas legislative session starting to pick up as we are watching multiple utility related bills including on the electric side where there is a capital structure bill proposed (HB 3042).*

SRE – Cameron Pipeline issues force majeure notice; minor compression reduction

- SRE's Cameron pipeline, serving Cameron LNG posted a notice of force majeure capacity reduction due to compressor issues.
- The issues only impact a small fraction of available capacity and could be restored within days.

Guggenheim takeaway:*FYI. No major impacts for Cameron LNG, despite the headline.*

Policy ─ WOTUS rule enjoined in another 24 states

- The ruling by a federal judge in ND adds to the two prior states (TX and ID) in which the rules were previously blocked.
- More HERE.
- EPA HERE.

Guggenheim takeaway: *Very minor FYI as the battle over groundwater jurisdiction and definitions continues to ricochet between the executive branch and Congress. As a reminder, this has been a back-and-forth issue for almost a decade at this point following attempted revisions in 2015, with groundwater considerations touching many points in the energy complex (e.g., coal ash). We expect this to remain a litigious issue.*

PJM/NJ ─ BPU Staff publish progress report on resource adequacy work

- BPU Staff have docketed a progress report building on their 20212 efforts to analyze future pathways for the state and PJM.
- "In response to the Board's directive to provide a progress report and make additional recommendations, Staff has prepared this 2022 Progress Report on New Jersey's Resource Adequacy Alternatives ("Progress Report" or "2022 Report"). After two years of intensive investigation and consultation with our fellow PJM states, market design

Provided for the exclusive use of Michael Weisenburger at NiSource on 17-Apr-2023 02:42 PM.

experts, and stakeholders, this Progress Report largely echoes the conclusions of the initial Resource Adequacy Report" - report
- More HERE.

Guggenheim takeaway: *Interesting resource adequacy data points for your awareness as NJ continues to proactively manage its options for ongoing decarbonization.*

IL/Wind – Chicago lawmakers continue to advocate for offshore wind on Lake Michigan

- HB2132 seeks to create a program that would enable the construction of a ~$700m wind farm.
- "Amends the Illinois Power Agency Act. In provisions concerning the procurement of renewable energy credits, provides that in addition to the amount of renewable energy credits to be procured from wind projects, the Illinois Power Agency shall procure at least 700,000 renewable energy credits, delivered annually for at least 20 years, from one new utility-scale offshore wind project." – text
- Bill HERE.
- More HERE.

Guggenheim takeaway: *Interesting FYI as lawmakers appear to be seeking support for a single discrete project with economic development benefits for the city.*

D – Chief nuclear officer to retire; replacement named

- Dominion "today announced that Daniel G. Stoddard, senior vice president & chief nuclear officer and president-Contracted Assets, will retire, effective Aug. 1, 2023. The company also announced that it has hired Eric S. Carr, president and chief nuclear officer of PSEG Nuclear. Carr will begin his tenure at Dominion Energy on June 5, 2023, as president-Nuclear Operations and will add the chief nuclear officer title on July 1, 2023."
- More HERE.

Guggenheim takeaway: *Minor FYI.*

AEE – MO PSC grants CCN for 150MW Boomtown solar facility

- AEE MO "received approval from the Missouri Public Service Commission (MoPSC) to acquire, upon completion, a 150-megawatt (MW) solar facility in White County, Illinois. The solar facility is part of Ameren Missouri's plan to ensure that it can supply its customers with clean and affordable energy. The acquisition is subject to customary closing conditions and is anticipated to begin generating clean energy late next year."
- More HERE.

Guggenheim takeaway: *Minor FYI and part of the plan following the earlier approval of the Huck Finn CCN.*

NI – As expected, NiSource issues its 2022 Integrated Annual Report

- The document incorporates its 10-K as well.
- Link HERE

Guggenheim takeaway: *Minor FYI.*

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

RATINGS DISTRIBUTIONS FOR GUGGENHEIM SECURITIES:

			IB Serv./ Past 12Mos.

NEUTRAL	112	31.02%	10	8.93%
SELL	9	2.49%	0	0.00%

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgement. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conducts an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers

Provided for the exclusive use of Michael Weisenburger at NiSource on 17-Apr-2023 02:42 PM.

on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

This communication does not constitute an offer of Shares to the public in the United Kingdom. No prospectus has been or will be approved in the United Kingdom in respect of the Securities. Consequently, this communication is directed only at (i) persons who are outside the United Kingdom or (ii) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order"), (iii) high net worth entities falling within Article 49(2) of the Order (iv) and other persons to whom it may lawfully be communicated (all such persons together being referred to as "relevant persons"). Any investment activity to which this communication relates will only be available to, and will only be engaged with, relevant persons. Any person who is not a relevant person should not act or rely on this document or any of its contents.

ALTO: Normalizing Crush Spreads Set Path to Business Transformation; Not Out of The Woods Yet (see our note HERE)

IL: Staff Direct Testimony Sets Disappointing Floor in MYP Bid-Ask vs. Investor Expectations (see our note HERE)

EIX – SCE filed 2025 GRC; 8% Rate Base CAGR 2023-2028 at requested levels

TX – Texas utility bills progress through legislature

AEP – AEP hires advisor for retail energy sale

PCG – New spent fuel storage methods implemented at Diablo Canyon

PCG – Plaintiffs ask for judge not to drop manslaughter charges against PG&E in the Zogg fire court proceeding

ERCOT – New whitepaper points to significant EE/DR optionality in ERCOT

PJM – RTO points to sufficient summer resources, with tail risk on extreme scenarios

DUK – Ohio Consumers' Counsel objects to Duke Energy Ohio settlement

NI – Intervenor exceptions filed regarding NIPSCO settlement

DUK – Staff file mechanism review letter

AEP – Walmart files as an intervenor in ApCo triennial rate review

EIX – SCE filed 2025 GRC; 8% Rate Base CAGR 2023-2028 at requested levels

- SCE filed a General Rate Case application (A2305010) for revenue increases in support of O&M and capex in 2025-2028.
- The test year increase is $1.9B or 23% over the currently pending 2024 GRC Track 4 request; the application also seeks proposed increases of $600M, $700M and $700M in 2026, 2027 and 2028, respectively.
- The resulting rate base is $55.2B for the range case and $60.9B at the fully requested level in 2028 representing a 6-8% rate base CAGR from 2023 to 2028.
- The majority of the request supports capex in base infrastructure replacement and wildfire mitigation but also embeds an inflection point for load growth with %14% of capex allocated to growth and new service.
- EIX Summary here.
- Docket: A2305010

Guggenheim takeaway: *2025 GRC now has an initial filing, with complete testimony to be filed on May 15, 2023. The request is in line with prior growth trajectory for SCE and encompasses many of mgmt.'s recent comments on infrastructure needs and load growth. Filing not a surprise especially post our visit for their prior small event they hosted at the headquarters for investors.*

TX – Texas utility bills progress through legislature

- TX HB 2555 was reported favorably as substituted at the Senate.
- The bill focuses on transmission and distribution resiliency plans for utilities
- TX Senate bill SB 1015 related to bi-annual DCRF review at the PUCT considered in formal meeting on May 12, 2023.

- The committee report is supportive of aligning the DCRF and TCOS frameworks and does not see any change in authority resulting from the bill.
- The bill aligns DCRF reviews to twice in one year, similar to the TCOS process already in place.
- TX SB 1076 was placed on general calendar at the house.
- The bill addresses timelines for CPCN approvals on transmission projects.

Guggenheim takeaway: *FYI. SB1015 seems to be one of the less contested bills in front of the TX legislature as it does not change any agency authorities or introduce any new concepts in ratemaking. The DCRF cadence could help offset some of the regulatory lag for TX utilities (CNP, SRE, ETR, AEP). Texas legislative session starting to pick up as we are watching multiple utility related bills including on the electric side where there is a capital structure bill proposed (HB 3042).*

AEP ─ AEP hires advisor for retail energy sale

- RBC Capital Markets will be advising AEP on the sale of its Retail business, according to PeakLoad.
- The sale process will also include AEP OnSite Partners.
- Article HERE

Guggenheim takeaway: *The retail business contributes ~$0.04 to AEP's 2023 EPS, and the distributed resources business contributes ~$0.02, as we have previously written about HERE.* ***We have entire C-suite in NY for NDR this Wednesday.***

PCG – New spent fuel storage methods implemented at Diablo Canyon

- PG&E Diablo Canyon is utilizing a new horizontal spent fuel storage (vs. vertical).
- PG&E will store new spent fuel in the horizontal system after it is installed between June 2025 and March 2026.
- PG&E sees the new system being more efficient with need for storage pool use for spent fuel.
- More in media here.

Guggenheim takeaway: *FYI.*

PCG – Plaintiffs ask for judge not to drop manslaughter charges against PG&E in the Zogg fire court proceeding

- Zogg wildfire victims requested the judge overseeing the Zogg fire lawsuit does not drop the manslaughter charges against PG&E.
- More in media here.

Guggenheim takeaway: *FYI. PG&E committed to defending its employees against criminal charges.*

ERCOT ─ New whitepaper points to significant EE/DR optionality in ERCOT

- Nonprofit ACEEE has released a follow on to its 2021 study detailing potential savings from energy efficiency and demand response measures, as compared to the Senate's backstop proposal.
- "The study finds that implementing these programs from 2024 through 2030 could reduce summer peak loads statewide by about 14,800 MW and reduce winter peak loads by about 23,500 MW (far more than the 10,000 MW in increased supply from the proposed power plants)." - release

- More HERE

Guggenheim takeaway: *Price responsive demand remains the holy grail of electricity market design, and while it is not yet a reality we note that ERCOT continues to feature a significant amount of DR on the bulk system.*

PJM – RTO points to sufficient summer resources, with tail risk on extreme scenarios

- "PJM projects a non-diversified peak demand for electricity this summer at approximately 156,000 MW and has performed reliability studies at loads nearing 163,000 MW. PJM has more than 186,000 MW of installed generating capacity" - release
- "While its assessment shows that PJM is prepared to maintain reliability this summer, modeling of extreme scenarios indicates tightening reserve margins and the potential need to reduce load by deploying demand response in certain conditions. PJM can deploy demand response by instructing customers who have agreed in advance to be temporarily interrupted in exchange for a capacity payment to reduce their load. This scenario could occur in the event of extraordinary electricity demand and high generator outages – an unlikely but possible set of circumstances." - release
- More HERE

Guggenheim takeaway: *Flagged for your awareness. On paper PJM's reserve margins remain excessive, however as the December event shows, resource availability can quickly tighten reserves.*

DUK – Ohio Consumers' Counsel objects to Duke Energy Ohio settlement

- Recommends a 9.52% ROE vs 9.60% in settlement.
- Recommends a 47.61% equity layer vs 52.32% in settlement.
- Docket 22-0507-GA-AIR

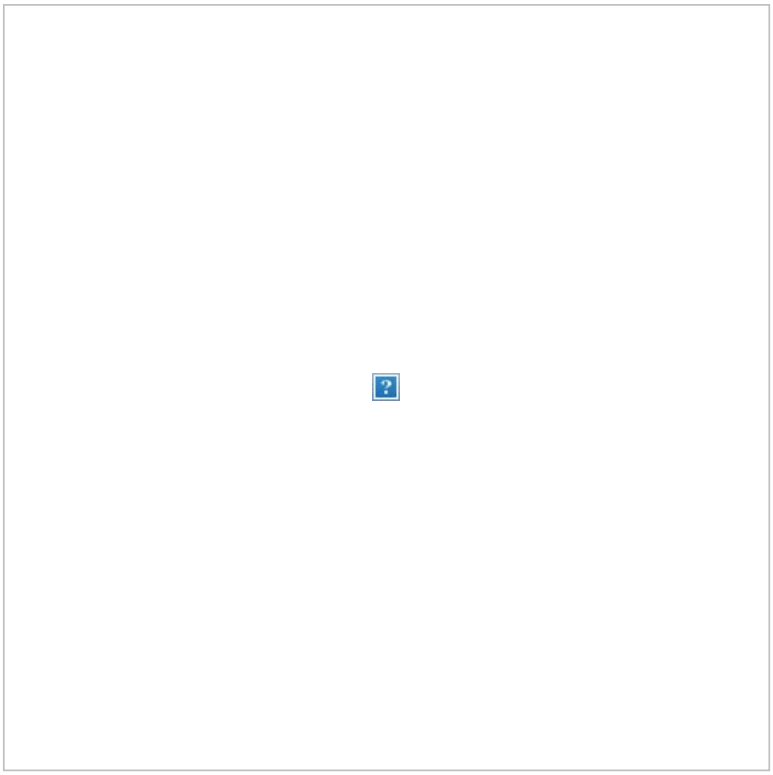
Guggenheim takeaway: *This is not a surprise given the party. Consumers' Counsel files oppositional comments to low-income weather normalization, treatment of depreciation, capital structure, and ROE, among other items.*

NI – Intervenor exceptions filed regarding NIPSCO settlement

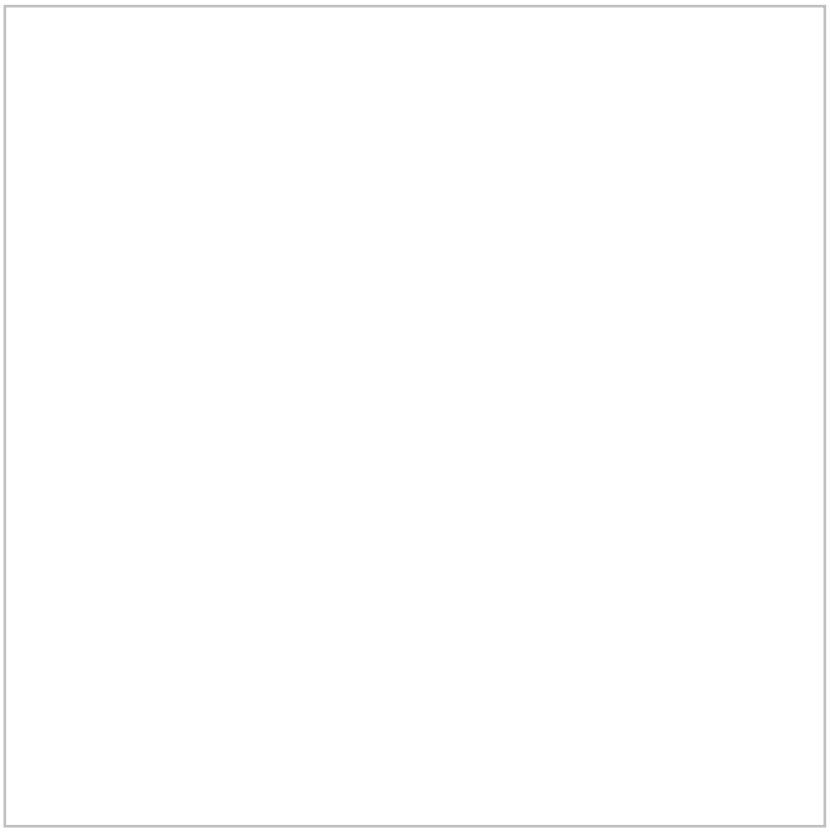
- Michigan City, Indiana filed objections and proposed changes to the NIPSCO settlement.
- Topics included ROE as well as issues such as rates related to low-income housing programs.
- Docket 45772

Guggenheim takeaway: *Most notable was the 9.2% proposed ROE, vs 9.8% in the stipulation agreement. More noise.*

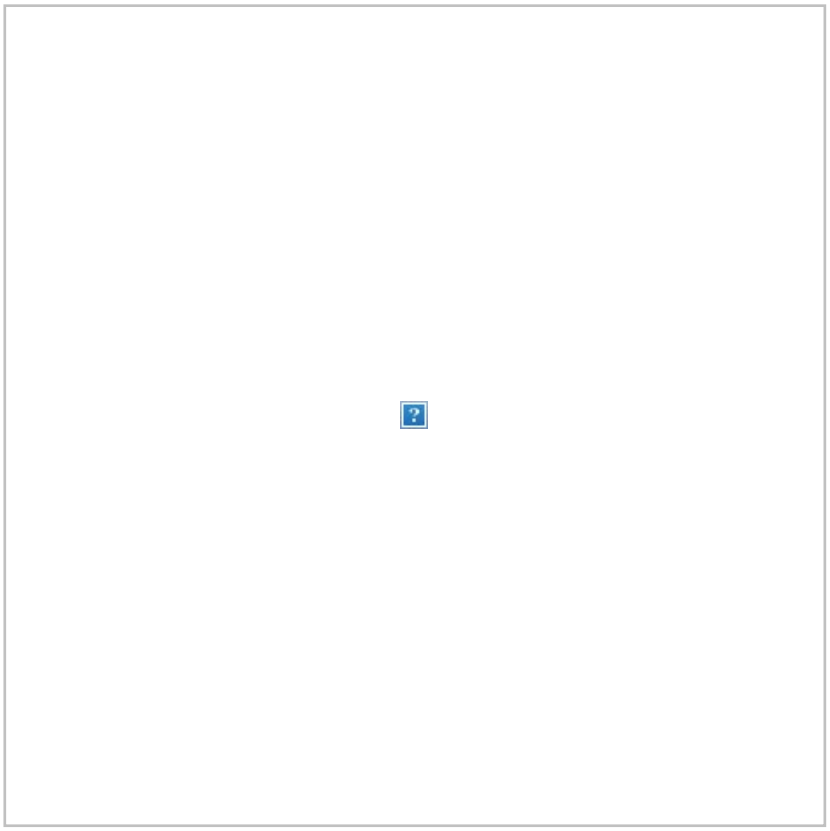
DUK – Staff file mechanism review letter



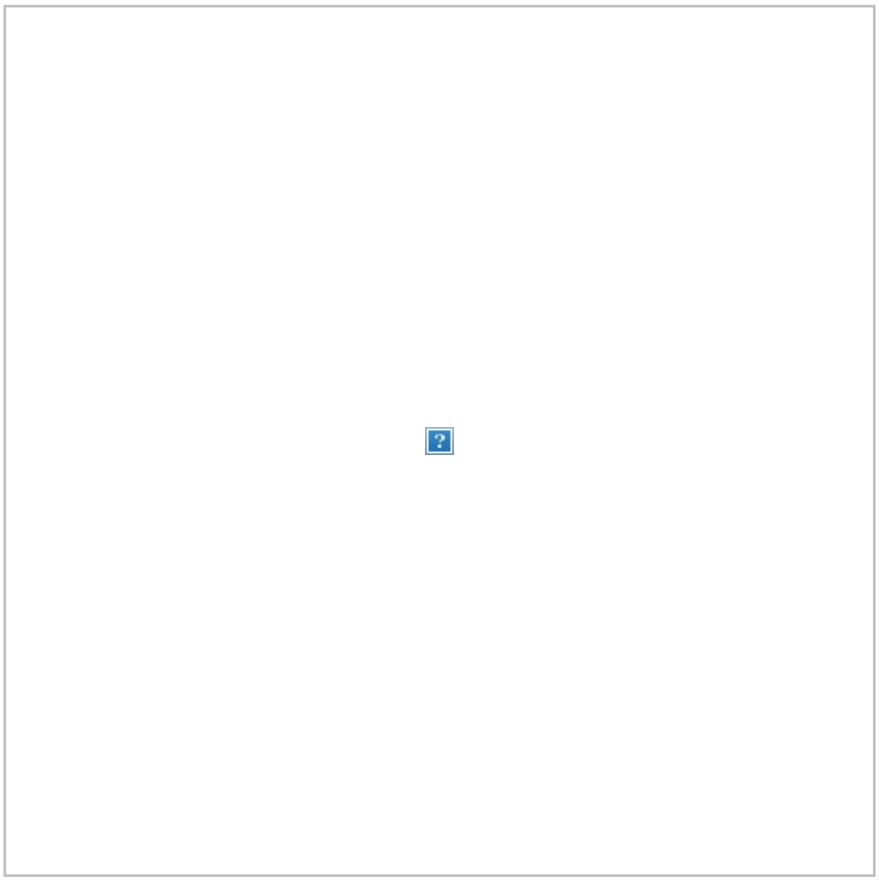
- Public Staff filed a review of the DSM/EE mechanism proposed in the Carbon Plan.
- Staff takes the position that certain language in the Carbon Plan Order only required consideration of proposed enablers (regarding broadening the definition of low-income customers, for example), rather than adoption into the mechanism.
- Docket E-100 Sub 179



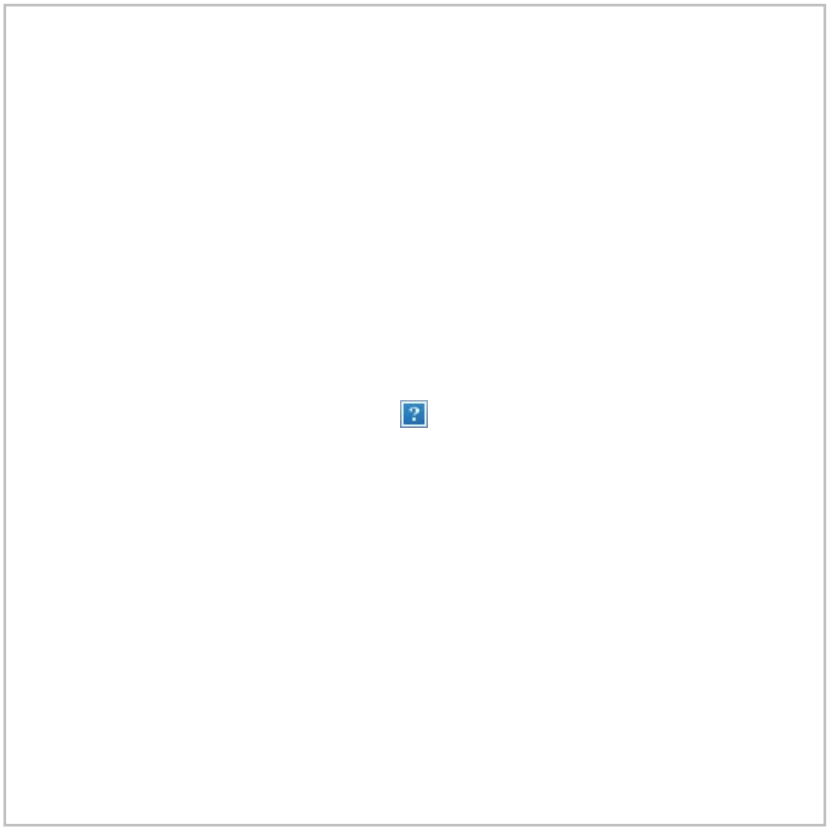
Guggenheim takeaway: *Minor FYI.*



AEP – Walmart files as an intervenor in ApCo triennial rate review



- Walmart (WMT) has filed a notice of participation.
- Docket PUR-2023-00002



Guggenheim takeaway: *Minor FYI.*

POR: Stepping to the Sidelines as 1H23 Momentum Closes Valuation Gap, NT Catalyst Pathway Quiets, Downgrading to Neutral (see our note HERE)

Forward Power Curves, Genco MtM, and Weekly Commentary (see our note HERE)

NI – NIPSCO 19.9% minority interest sale announced

ERCOT/VST – Comanche Peak experiences partial outage

SO – Vogtle Unit start-up delayed by one month, into July

D/VA – Media continues to draw attention to political donations ahead of primaries

PJM/FERC – Commission meeting on PJM BRA yields little clarity on pathways forward

D – 1GW peaking plant proposed at Chesterfield site draws media coverage

Policy – President Biden announces grid-related grants and climate funding

DTE – Intervenors filed reply briefs in the DTE IRP proceeding; positions reiterated and administrative issues highlighted

SR – Surrebuttal testimony filed in PGA/ACA docket

Wildfire – Media highlights systemic climate change impacts on wildfire risk for utilities

CA/Wildfire – Wildfires reported in northern CA, starting wildfire season

ETR – ETR MS storm recovery continues, MPSC voices concerns

AEP – SWEPCO tax normalization ALJ ruling

DUK – Interim true-up adjustment letters filed in storm securitization dockets

NI – NIPSCO 19.9% minority interest sale announced

- Blackstone (NYSE:BX) agreed to acquire 19.9% non-controlling equity interest in NIPSCO for $2.15bn, with an additional equity commitment of $250m to fund ongoing capital requirements.
- Company 8-K HERE
- Company press release HERE

Guggenheim takeaway: *We caught up with the company this morning and will be publishing our thoughts on the transaction shortly.*

ERCOT/VST – Comanche Peak experiences partial outage

- The dual unit plant experienced a ~1.235GW derating on Friday after a feed water pump issue on the non-nuclear side of the plant.
- More HERE.

Guggenheim takeaway: *VST typically operates with sufficient open length to account for issues at Comanche, however, we continue to dig into the potential ramifications of any prolonged outage – the media reports indicate that the unit in question appears to already be returning to operations. As a reminder, the NRC notifications were not published yesterday on account of the holiday.*

SO – Vogtle Unit start-up delayed by one month, into July

- Georgia Power announced on Friday after the close that it will delay the startup of Vogtle Unit 3 by a month (into July) due to remediating a damaged hydrogen seal.
- More HERE.

Guggenheim takeaway: *Vogtle Unit 3 will now enter base rates in August 2023, with a resulting one-time EPS impact in 2023 of roughly half a penny. As a reminder (and also ahead of the Vogtle prudency review), please join us for our 2nd Annual Guggenheim Georgia Field Trip: Southern Company (SO), Racing Porsches & GA Commissioner Meetings, which will take place July 11 & 12 in Atlanta.* ***For more on our recent meeting with SO at AGA, see HERE.***

D/VA – Media continues to draw attention to political donations ahead of primaries

- The coverage comes ahead of primaries next week, with several candidates in focus having received donations from Dominion.
- More HERE.

Guggenheim takeaway: *This is nothing more than media noise in our view, however, we are flagging for your awareness, as we have been for several months now. As a reminder, D publicly reports all of its donations/activities.*

PJM/FERC – Commission meeting on PJM BRA yields little clarity on pathways forward

- Parties, including load and generation representatives, remain far apart on how the RTO should overhaul the BRA, per the Commission's meeting last week.
- State representatives remain in favor of the 3-year forward procurement, while others have pushed for more prompt designs (e.g., NYISO).
- More HERE.

Guggenheim takeaway: *Flagged for your awareness as the reform process begins to kick into a higher gear. As a reminder, FERC recently greenlit a yearlong delay to the auction cycle. The importance of the BRA to our IPP coverage universe continues to shrink as eastern generation is retired or augmented with PTC-insulated nuclear.*

D ─ 1GW peaking plant proposed at Chesterfield site draws media coverage

- Multiple media sources have flagged Dominion's ongoing evaluation of a potential 1GW peaking plant alongside the existing Chesterfield site, consisting of 4 CTs to be placed into service by 2027.
- More HERE.

Guggenheim takeaway: *Minor FYI as Dominion's latest IRP and resource plans continue to draw stakeholder attention – the proposal for gas here is similar to many other recent NT IRP needs we have seen across the space, however, certain groups remain extremely vocal on any and all newbuild.*

Policy ─ President Biden announces grid-related grants and climate funding

- The President announced $575M in funding for the NOAA Climate Resilience Regional Challenge, alongside power grid funds and planned meetings.
- More HERE.

Guggenheim takeaway: *Minor FYI.*

DTE – Intervenors filed reply briefs in the DTE IRP proceeding; positions reiterated and administrative issues highlighted

- Intervenors in DTE's integrated resource plan, including MPSC staff, AG office and DTE, filed reply briefs on a variety of issues.
- In reply briefs, intervenors highlight agreement/dissent from prior testimony including both accounting treatment, modeling parameters and administrative issues of record.
- Key aspects being debated remains the same from the initial briefs including renewable procurement, FCM and reg asset treatment for coal retirements; Staff broadly supportive of methodology used to develop the plan, but argues certain financial and accounting requests.

- Intervenors propose a 50/50 ownership requirement for new renewables, but DTE argues for an uncapped competitive RFP process to align with the intent of the current law.
- Intervenors oppose the structure of the FCM for PPAs including WACC recovery, DTE argues for FCM including WACC, which is consistent with the commission's prior decision and process.
- Intervenors debate regulatory asset treatment for retiring coal assets and the appropriate returns; DTE argues for needed certainty on treatment and returns (i.e., consistent with prior commission precedent).
- More thoughts on the IRP in our note here.
- Docket: U-21193

Guggenheim takeaway: *The responses are generally in line with the debated topics in the IRP proceeding. Staff and AG recommendations are somewhat contradictory to prior commission precedent and certain aspects of MI law, which leads us to believe those are largely focused on creating a bid-ask, not necessarily something the commission would adopt. The FCM recommendations depart from precedent, which we do not believe will be utilized in the final outcome. The regulatory asset treatment and rate of return was widely debated, but in our view, the CMS IRP precedent sets a reasonable final outcome (i.e., slight discount vs. WACC). Overall, we find DTE's arguments in support of the proposal more compelling than the intervenors' but acknowledge there is room to negotiate for DTE. DTE previously noted that conversations with stakeholders are robust and there is a pathway to settlement (having Initial Briefs filed is an important step in that process, in our view).*

SR – Surrebuttal testimony filed in PGA/ACA docket

- The company, Staff, and Intervenors filed surrebuttal testimony in SR's Purchased Gas Adjustment docket on Friday.
- Docket GR-2021-0127

Guggenheim takeaway: *Flagging for your calendars, evidentiary hearings are scheduled to begin on July 25th. Recall that an order was issued back in January, approving a partial stipulation in this docket (see HERE).*

Wildfire – Media highlights systemic climate change impacts on wildfire risk for utilities

- Media coverage picked up earlier verdicts on PacifiCorp (NYSE: BRK.A) wildfire claims and efforts by PCG to reduce wildfire risk.
- The media coverage recognizes systemic issues beyond the utilities' control as a major contributing factor to rising liabilities.

- More here.

Guggenheim takeaway: *FYI. Demonstrates broad stakeholder recognition of factors beyond operator control as a contributor to increasing wildfire risks. That said, PG&E has taken the most proactive role in wildfire mitigation, including 10,000 mi of undergrounding.*

CA/Wildfire – Wildfires reported in northern CA, starting wildfire season

- Media coverage picked up small pockets of wildfires in CA.
- The fires were reported in San Jose, Napa and Sonoma regions, but were limited to brush fires and geographically limited.
- No structure damage reported and firefighters controlled the fires immediately.
- More here.

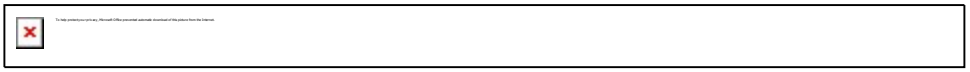
Guggenheim takeaway: *FYI. While the fires were very small, the fires starting highlight a start to another active season. Our recent NDR highlighted that mgmt. is cognizant of the risks, but has layers of protection in place to limit the ignition and spread of wildfire this summer season.* ***See more thoughts on PCG wildfire mitigation here.***

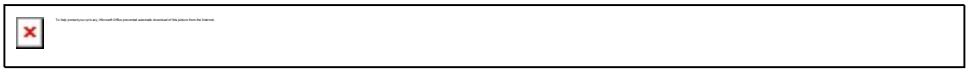
ETR – ETR MS storm recovery continues, MPSC voices concerns

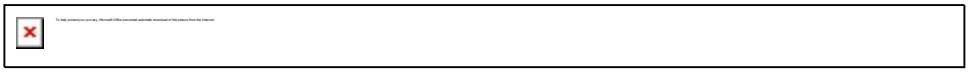
- ETR MS continues storm recovery from about 138,000 outages at the peak.
- The restoration efforts have caused some concern from MPSC regulators as customers have voiced their complaints in restoration delays.
- MPSC commissioner Brent Bailey voiced his concern and disappointment with ETR MS response in media; see here.

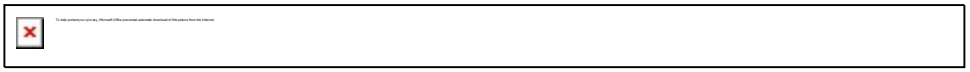
Guggenheim takeaway: *FYI. Customer complaints are expected for a storm restoration process and we believe ETR has generally been timely and prudent in restoration. MPSC voicing concerns is a datapoint on public feedback for ETR, but also supports the need for resiliency, which ETR has pushed up in the capex stack.*

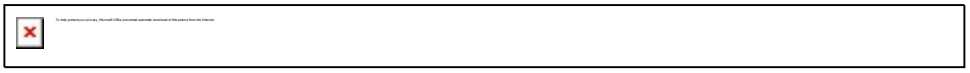
AEP – SWEPCO tax normalization ALJ ruling





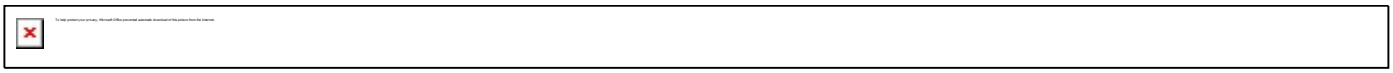






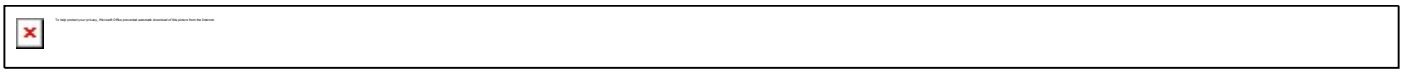
- Regarding the determination of a tax normalization violation, the ALJ ruled that once a private letter ruling is received from the IRS, SWEPCO should be authorized to book a regulatory asset/(liability). At such time as a determination is made by the IRS, SWEPCO would then be eligible to seek recovery.
- Docket U-35441

Guggenheim takeaway: *FYI.*



DUK – Interim true-up adjustment letters filed in storm securitization dockets

- DUK's utilities DEP and DEC filed interim true-up adjustment letters in North Carolina relating to storm securitization costs.
- Docket E-7, Sub 1243
- Docket E-2, Sub 1262



Guggenheim takeaway: *Minor FYI.*

Key Message: Solid results; "annual" guidance maintained – NIPSCO sale on track; mgmt. not interested in organic LDC acquisitions. Reiterate BUY on value, strong growth, and NT catalysts.

Overall thoughts - NI's 1%+ outperformance vs. peers (+0.75% on the day vs. -0.38% for UTY) was driven less, in our view, by EPS results or guidance and more by the clear and unwavering reiteration that a NIPSCO minority stake sale transaction will close by YE23. On the quarter, NI delivered a penny beat vs. Gugg/consensus expectations and maintained its current FY23 guidance after previously raising full-year 2023 EPS guidance (by +$0.035/sh at the midpoint) in order to fully put to rest any remaining confusion some investors had about NI's 6-8% annual EPS growth rate. The highly anticipated but still unannounced NIPSCO minority stake sale transaction remains a key catalyst, if not the primary focus for investors right now, in our view. Because of this, we highlight mgmt.'s clarity and lack of caveats when reiterating both its confidence in a sale process occurring as well as that it will close by the end of 2023. Finally, we still believe NI is well equipped and has the right plan to meaningfully offset much of the O&M-related inflationary pressures it faces, even as these factors seem to weigh on all small cap utilities and many larger ones as well. For more on our expectations of which utilities are most and least likely to be impacted, please click HERE to visit our January 2033 Annual Outlook piece. We see NI as somewhere between the larger cap utilities it is beginning to more closely resemble and the LDCs "peers" that it is most commonly still grouped with despite its market cap of ~$11.5bn (vs. many LDCs at ~$3bn-$5bn). **We remain confident that a combination of capex and O&M levers will allow NI to mitigate near-term macroeconomic headwinds in 2023 and 2024** and also model a successful YE23 NIPSCO transaction, which we also see as supporting NI achieving its targeted FFO/debt of range of 14-16%. Overall, NI continues to build confidence in its clear LT EPS growth trajectory, has provided examples of potential incremental capex vs. the current plan (see pg. 2 of our note HERE), and, in our view, continues to demonstrate both regulatory (e.g., recent NIPSCO settlement) and strategic execution (e.g., the reiterated minority stake sale closing date). **We reiterate BUY and our $31 PT.**

Please see our 1Q23 earnings preview note HERE, quarterly weather note HERE, and sector debt note HERE.

NI reported 1Q23 net operating EPS of $0.77, a slight beat vs. Gugg/consensus each at $0.76/$0.76, and maintained its 2023 EPS guidance of $1.54-$1.60 ($1.57 midpoint) vs. Gugg/consensus both at $1.57/$1.57. Investors will recall that NI previously raised its 2023 guidance from its original level of $1.50-$1.57 ($1.54 midpoint) in order to remove any concerns some investors had surrounding what the company intended to imply about its EPS growth trajectory. Along with LT EPS growth, NI reiterated its **8-10% annual rate base growth rate** and **9-11% total shareholder return target**. Mgmt. also reaffirmed the existing financing plan (unchanged since the investor day), including striking a NIPSCO minority interest deal in the near term and closing it in 2023, which would support the balance sheet without the need for block or ATM equity in 2023/2024. In 2025 and beyond, mgmt. expects to use NI's ATM to support the company's current investment grade credit ratings and may also use it to redeem outstanding preferred stock of $900m. Mgmt. also maintained the company's existing 14-16% FFO/debt target.

Mgmt. once again confirmed that the NIPSCO minority stake sale process had kicked off in 1Q23 as planned but still had few details to share at this point regarding buyer interest. However, and most important, in our view, there seemed to be no debate around whether the targeted YE23 closing date could potentially shift. We believe investors should recall that this sale is unique in that: **1)** it does not require any regulatory approvals, **2)** management has expressed an expectation of having minimal tax leakage at

Provided for the exclusive use of Michael Weisenburger at NiSource on 04-May-2023 08:57 AM.

the 19.9% stake level, and **3)** it has a successful recent precedent for the company to point to in the form of **DUK**'s transaction, where it sold a similar 19.9% stake of its Duke Energy Indiana (DEI) utility subsidiary to Singapore-based GIC. We await further updates from the company on how the transaction is progressing.

We have rebalanced our quarterly estimates to reflect the company's reported Q1 actual results and have maintained our 2023–2027 EPS estimates. We reiterate BUY and our $31 PT.

Valuation

We value NI as a regulated utility, arriving at our $31 price target using our regulated group multiple of 17x, with a premium applied to the electric business to reflect top-quartile rate base growth through the forecast period as well as incremental growth opportunities and strategic initiatives that aren't currently being captured in our estimates, and applying those multiples to 2025 fundamentals. We value the company via SOTP and (1) attribute a 2.0x premium on NIPSCO Electric, reflecting strong renewable-driven rate base growth, and (2) do not apply a discount to the gas business due to NI's guidance of zero O&M increases from 2022-2027 despite ongoing inflation. Applied together to our 2025 $1.82 EPS estimate and discounted back by 1 year, we arrive at our 12-month $31 PT.

Risks

Primary risks to our thesis include an underwhelming valuation for NIPSCO's minority stake sale or no sale at all as well as traditional risk factors inherent with all regulated utilities, including: (1) rate case risk, (2) potential for a lower capex outlook, and (3) interest rate changes above/below what we account for in our regression model.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Guggenheim Securities, LLC or its affiliates expect(s) to receive or intend(s) to seek compensation for investment banking services from NiSource Inc. in the next 3 months.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

Rating and Price Target History for: NiSource Inc. (NI) as of 05-02-2023

Created by: BlueMatrix

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Provided for the exclusive use of Michael Weisenburger at NiSource on 04-May-2023 08:57 AM.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

ES: Potential Gillett Renomination Another Piece in a Deteriorating CT Regulatory Mosaic (see our note HERE)

NI – NIPSCO minority stake sale apparently approaching final innings

AEP – Kentucky PSC continues to ramp up for Kentucky Power rate case

AEP – Final PUCT order denying Texas' participation in proposed 999 MW renewables project issued; all eyes turn to AR/LA

ETR – LPSC votes to advance proposal for review of ratepayer funded political spending

SRE – Port Arthur files comments regarding the supplemental environmental assessment for Port Arthur Phase II Expansion at FERC

FE – Maryland Office of People's Counsel files for rehearing in HB6-related docket

VA/RGGI – VA Air Pollution Control Board votes to repeal RGGI

NI – NIPSCO minority stake sale apparently approaching final innings

- According to four sources cited by Inframation, the minority stake sale process for NI's Indiana utility NIPSCO is in advanced stages.
- Interested parties are purported to include: The Blackstone Group [NYSE:BX], Abu Dhabi Investment Authority sovereign wealth fund [PRIVATE], and KKR & Co. [NYSE:KKR].
- Recall that on its 1Q23 earnings call in early May, NI affirmed 2023 guidance and LT growth commitments, while also reaffirming that the NIPSCO minority interest sale was still expected to occur in 2023.
- More HERE

Guggenheim takeaway: *As we wrote in our recent AGA write-up following a meeting with NI's full senior mgmt. team (see HERE for more), we continue to believe that the NIPSCO sale remains on track for 2023, and also note that mgmt. suggests that NI's post-sale FFO-to-debt is likely to be towards the higher end of the targeted 14%-16% range initially, before of course beginning to migrate down from there.*

AEP – Kentucky PSC continues to ramp up for Kentucky Power rate case

- The Kentucky Public Service Commission issued a standard procedural order authorizing the Office of Rate Intervention (Attorney General) to intervene as a party in the rate case.
- "The Attorney General is entitled to the full rights of a party and shall be served with the Commission's Orders and with filed testimony, exhibits, pleadings, correspondence, and all other documents submitted by parties after the date of this Order." – PSC Order (link HERE)
- Docket 2023-00159

Guggenheim takeaway: *Minor procedural FYI as the docket gets underway. See our NDR note HERE. We will closely monitor this case despite its smaller sized utility vs. the total enterprise, as a proxy for rate case execution in a relatively challenged state from a bill headroom perspective.*

AEP – Final PUCT order denying Texas' participation in proposed 999 MW renewables project issued; all eyes turn to AR/LA

- As we previously published (see our note HERE) following the PUCT's vote, the commission rejected the proposal for decision (PFD), denied the requested CCN amendment, and found that acquiring the selected facilities is not in the public interest.
- Docket 53625

Guggenheim takeaway: *Given Texas' decision not to proceed, the fate of the project falls to Arkansas and Louisiana. Recall last week's approval in Arkansas of their originally allocated 20% portion of the total proposed 999 MW project, as well as a flex-up pending Louisiana's decision. Assuming that Louisiana ultimately approves their portion of the project, we see two potential paths from here: (1) if Louisiana approves the project with a flex-up, Arkansas will not flex-up and the full 999 MW project is approved; (2) however, if Louisiana approves the project without a flex-up, Arkansas would then flex-up and between the two states (AR/LA), 600 MWs of the*

initially proposed 999 MWs would be approved. Again, similar to a rate case in KY, this will be a closely followed process as investors are trying to assess regulatory risk and execution.

ETR – LPSC votes to advance proposal for review of ratepayer funded political spending

- The LPSC voted to advance the proposal for reviews of ratepayer funding for political spending among investor-owned utilities, namely Entergy.
- While the commissioners made an argument that adequate mechanisms already exist to review such spending within customer rates, a 3-2 majority approved the measure to increase transparency.
- The LPSC secretary noted that there is no specific audit rule nor a policy on disallowance of such spending, but ETR noted that any spending for advocacy has been typically removed from ratepayer funds (i.e. not funded from customer bills).

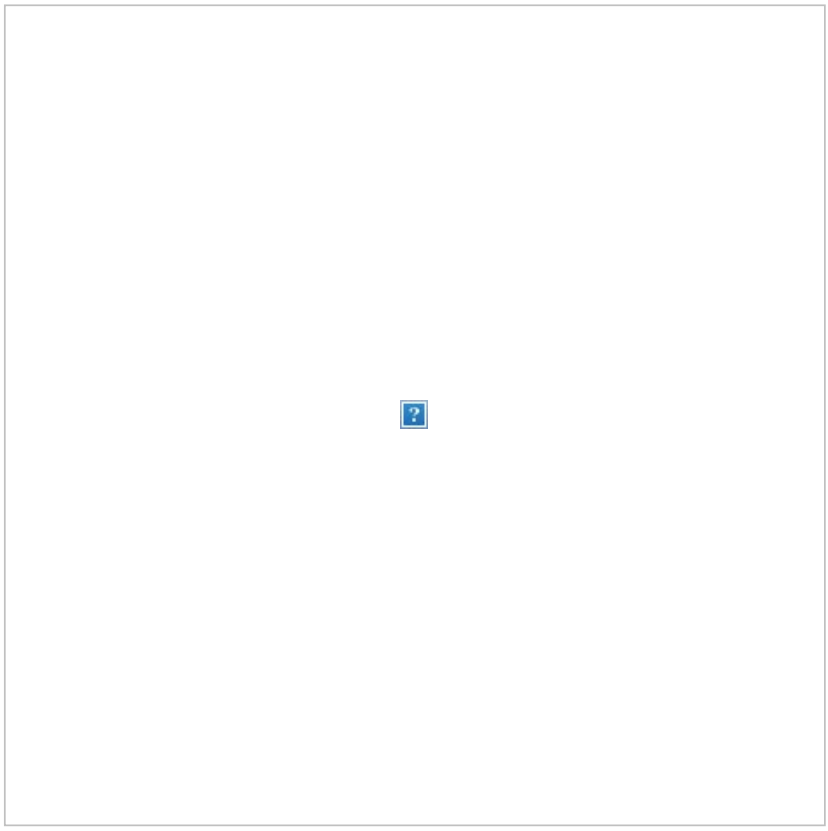
Guggenheim takeaway: *FYI. While mechanically there may not be any direct ratepayer funding for advocacy, ETR did note that the company advocates for issues including customer savings. The proposal does demonstrate an increasing level of tension at the LPSC feeling inadequate levels of oversight on specific issues, which follows a series of debates around the commission actions on generation approval and securitization. For ETR there are few tangible datapoints on adverse outcomes, but we acknowledge the risk of an adversarial commission.*

SRE – Port Arthur files comments regarding the supplemental environmental assessment for Port Arthur Phase II Expansion at FERC

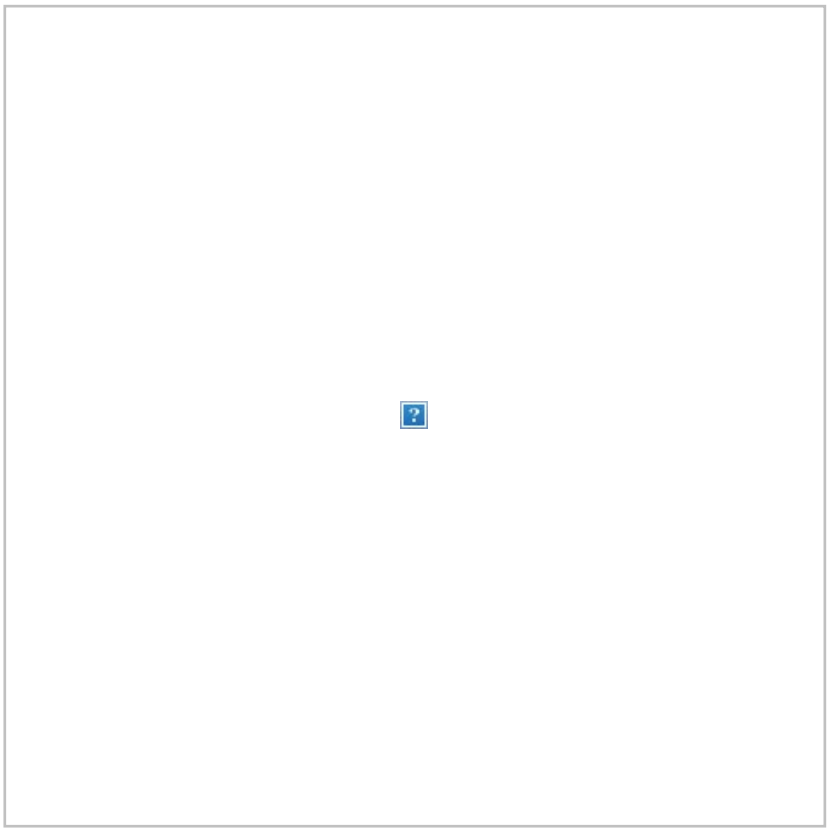
- Port Arthur filed comments addressing a wide selection of stakeholder concerns on the supplemental environmental assessment for Port Arthur Phase II expansion.
- Intervenors previously filed comments questioning various aspects of the project design and administrative process (Intervenors ranged from individuals to local agencies and the EPA).
- The Port Arthur responses are 160+ pages long.
- EPA in particular disagreed with or questioned certain practices used in the EA, including recommending an upstream/downstream GHG impacts analysis as part of FERC's obligations for the EA.
- FERC has been working on supplemental environmental assessments for PA phase 2.
- FERC Docket: CP20-55

Guggenheim takeaway: *FYI. Update on FERC process as SRE pursues further LNG expansions. There is strong local pushback on environmental impacts, but SRE has been focused on lowering environmental impacts through electrification and CCS opportunities (relative to other LNG developers). While the plans for FID on PA development are largely completed, the expansion project is still in the earlier stage of development. The co-location for the expansion project could provide an opportunity to accelerate development timelines.*

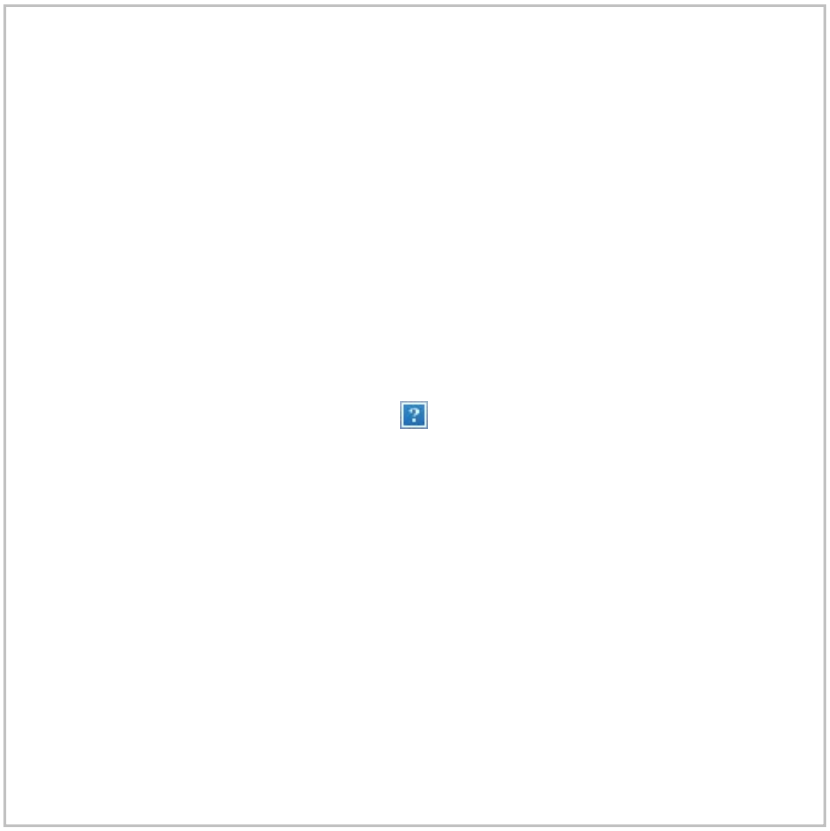
FE – Maryland Office of People's Counsel files for rehearing in HB6-related docket



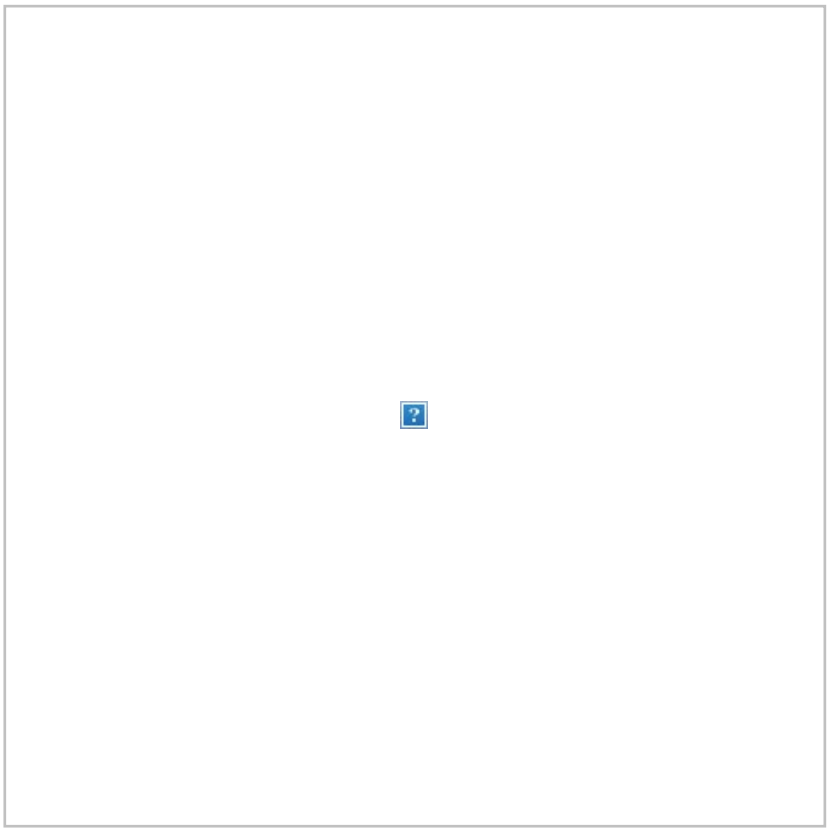
- The MD OPC has requested a rehearing following the PSC's May 5, 2023 final order, which had otherwise closed the proceeding.
- As per the OPC: "*The Office of People's Counsel requests that the Commission grant rehearing of Order No. 90615, in which the Commission terminated its investigation into the impacts of FirstEnergy's "HB6 scandal" on Potomac Edison and its ratepayers.*"
- Case No. 9667



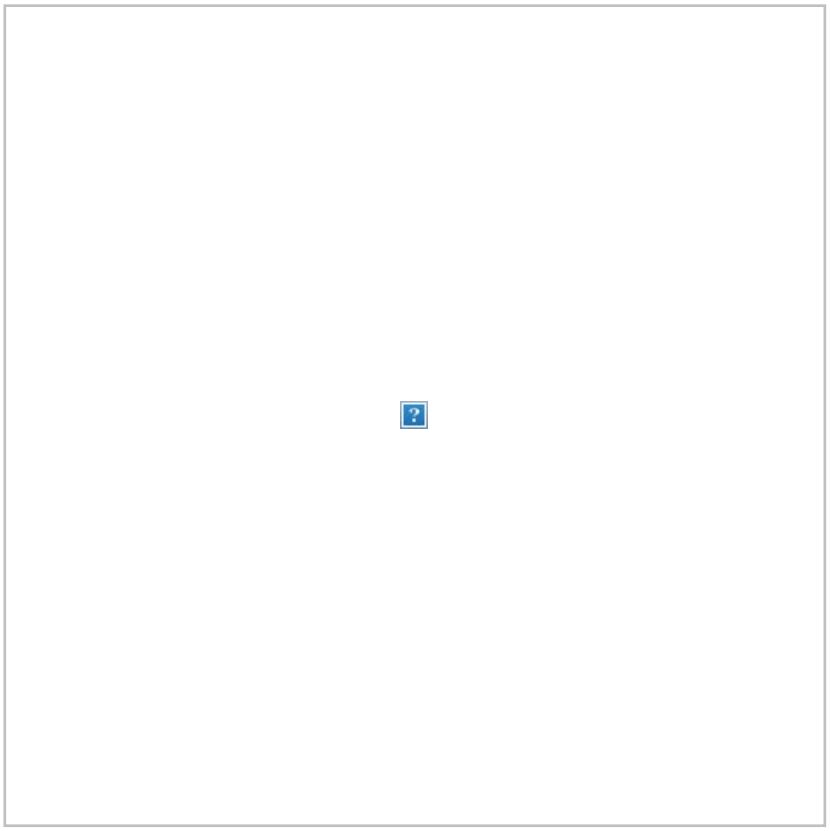
Guggenheim takeaway: *Flagging for your awareness as we await the PSC's decision to either entertain or deny the request. Recall that in its May 5th order, the PSC had concluded that insufficient evidence existed to justify the basis to proceed with a further investigation.*



VA/RGGI – VA Air Pollution Control Board votes to repeal RGGI



- The State Air Pollution Control Board voted 4-3 to repeal/exit RGGI, according to reports
- Youngkin statement HERE
- More HERE



Guggenheim takeaway: *Flagged for your awareness. As media has repeatedly indicated, opponents of the move have made substantial noise over the legality of the Board's actions – setting up a potentially lengthy court process.*

Key Message: Today's transaction came in at an attractive valuation in our view, as well as that of consensus, at multiples of 32.5x LTM P/E (as of 1Q23) and 1.85x 2022A rate base. **In 2023 terms, we estimate that the transaction implies a ~26.5x 2023E P/E, and ~1.5x 2023E rate base.** Despite mgmt.'s comments clearly reaffirming zero equity needs until 2025, investors still had questions this morning around how to think about the $250m equity commitment letter from Blackstone – i.e., this lack of clarity persists beyond 2025, with investors asking how to model Blackstone's ongoing capex-driven equity infusions and what impact they have on NI's equity needs going forward and should it be accretive to the valuation metrics – i.e., if mgmt. would have previously mentioned a potential elimination of equity needs beyond '25, the incremental

value created from Blackstone's equity infusion would have been more clear and certainly accretive vs. our model. How does this compare vs DUK's DEI transaction in January 2021? Fairly favorable especially given the changes to capital market conditions.

What's implied for 2023?... Taking NIPSCO's $7.7bn YE 2022A rate base, the ~$2.1bn of capex guided to in today's slides, and incorporating incremental depreciation of just under $400m, **we see the potential for NIPSCO's 2023 rate base to come in at ~$9.4bn as of YE23**. Using the company's provided figure of ~$333m LTM Non-GAAP net income as of March 31, 2023, and the $10.8bn equity value implied by the deal ($14.3bn EV minus $3.5bn of debt) results in the 32.5x 2022A P/E and 1.85x 2022A rate base multiples presented in the company's slides. For comparison's sake, using **our $9.4bn 2023E YE rate base estimate** and maintaining the same implied ROE, **we estimate that the transaction implies a ~26.5x 2023E P/E, and ~1.5x 2023E rate base, *as below***.

NIPSCO 2022 Transaction Multiples & Guggenheim's 2023 estimates

Source: Company slides, Guggenheim Securities, LLC analysis.

How does this compare vs DUK's DEI transaction in January 2021? Fairly favorable especially given the changes to capital market conditions (i.e. higher rate environment vs. when DUK announced their deal)... We highlight that when DUK announced its minority interest stake sale to GIC in January 2021, it presented an implied valuation of **27.7x DEI P/E multiple (LTM P/E as of 9/30/2020)**. This transaction also valued DEI at a $10.3bn equity value and $14.5bn firm value on a 100% basis, with a DEI net debt balance of $4.2bn as of 9/30/2020 (source HERE).

What does this deal mean for equity needs?.. Investors continued to have questions regarding Blackstone's $250m equity commitment letter (which is intended to address NIPSCO's capex). Specifically, there appears to be a lack of clarity as to whether Blackstone's NIPSCO capex contributions should be treated effectively as equity-offsets which reduce NI's equity needs in

2025 and beyond. Meanwhile, NI spoke with the three ratings agencies yesterday and expects them to comment in the days and weeks ahead. **In our view, this transaction appears constructive from a financing and balance sheet perspective, as mgmt. was clear that it will push NI's FFO/debt to the top end of its 14%-16% FFO/debt range soon after closing.** As that credit metric begins to drift back down, mgmt. expects to start using ATM equity in 2025+ to maintain its 15% midpoint FFO/debt target and support its current investment grade credit ratings.

What happened?... This morning, NI announced that Blackstone (NYSE:BX) will invest $2.15bn of cash for a 19.9% stake in NIPSCO, with closing expected by year-end 2023 (pending FERC approval). NI intends to use the proceeds from the partial sale of its natural gas and electric company to pay down debt and fund capital needs related to its renewable generation transition. NI will continue to own an 80.1% stake in NIPSCO, and going forward, **Blackstone will maintain its 19.9% stake through funding its corresponding allocation of NIPSCO's capex spending.** To facilitate its ongoing capex contributions, Blackstone will issue a $250m equity commitment letter for its pro rata share of funding, including the next few years of renewable-driven capex at NIPSCO. **NI reaffirmed its adjusted NOEPS guidance** of $1.54-$1.60 ($1.57 midpoint) for 2023, as well as its 6%-8% annual NOEPS growth guidance through 2027. The company also **reiterated overall 8%-10% annual utility rate base growth guidance**, with NIPSCO clearly positioned as the main growth driver due to its significant planned renewable investments — **NIPSCO's $7.7bn 2022A year-end rate base is expected to ~$15bn+ by the end of 2027 (a ~13%-14% CAGR).**

EIX: 1Q23 EPS Beat; All Quiet on the Western Front, Regulatory Activity Spikes Mid-May but More Tailwinds, in Our View (see our note HERE)

PEG – 1Q EPS Beat; Quiet Quarter Emblematic of Lower Risk Business Mix; Electrification for the Long-Haul Upside (see our note HERE)

OGS: Calm Despite Stormy Weather — 1Q23 In Line & 2023 Guidance Maintained (see our note HERE)

EXC reports 1Q23 earnings

NI 1Q23 in line; reiterates all guidance, including YE23 anticipated NIPSCO minority interest sale closing date

ALE reports 1Q23 earnings

SR reports fiscal Q2 2023 NEEPS beat; narrows guidance around unchanged midpoint

AVA reports large miss for 1Q23; maintains annual guidance

EXC/IL – ComEd trial results in 4 guilty verdicts

SMR – NuScale continues to pursue opportunities in SE Asia; news release correction clarifies SMR's role

MA/Wind – MA DOER and other agencies issue RFP for up to 3.6GWs of offshore wind

Policy – Senator Manchin advances efforts on permitting reform in Senate

SPP – Grain Belt developers update on phasing of HVDC work

PCG – PCG CEO makes constructive comments on company culture in media interview

CAISO – CA transmission RTO bill is referred to Appropriations committee

WEC – S&P Revises WEC Energy Group Outlook to Negative

AEP/DUK/NI – Indiana legislation signed into law this week protects utilities' control over building power lines

EXC reports 1Q23 earnings

- EXC reported $0.70 vs. Gugg/Cons of $0.67/0.66
- Reaffirmed 2023 EPS guidance of $2.30-2.42 vs. Gugg/Cons $2.36/2.37
- Results for the quarter featured ($0.04) of weather at PECO, ($0.01) at PHI
- Key long term outlook messages unchanged from 4Q22 update (EPS and DPS growth/payout ratio commentary)
- Key parameters of financing plan unchanged ($425m equity by '25), 80% of debt financing needs executed in 1Q
- Call at 10am – register HERE
- Slides HERE

NI reports 1Q23 in line net operating EPS of $0.77 vs Gugg/consensus at $0.76/$0.76; maintains 2023 guidance of $1.54-$1.60 ($1.57 midpoint) vs Gugg/consensus at $1.57/$1.56

- **Asset sale update:** NI reports being "on track" with regard to strengthening its balance sheet via a successful minority interest sale of its NIPSCO utility
    - Company still expects a **close in 2023**

- **Credit:** continuing to target 14%-16% FFO/debt post-sale of NIPSCO minority interest
- **EPS CAGR:** reiterates 6%-8% expected annual NOEPS growth through 2027 (illustrated clearly on slide 5)
- **Cost management:** reiterates guidance of flat O&M
- **Capex:** $15bn 2023–2027 capex plan reiterated, along with 2023 capital investment guidance
- **Rate Base:** reiterated 8%-10% expected annual rate base growth; recall that FY22 projected rate base was estimated at ~$16.6bn
- **Credit:** ~$11.6bn of total debt as of March 31, 2023; ~$10.3bn of LT debt; ~13yr weighted average maturity; 3.83% weighted average interest rate
    - Committed to maintaining current investment-grade credit ratings: S&P (BBB+), Moody's (Baa2), and Fitch (BBB)
- **Financing:** maintains 2023–2027 financing plan; equity plans (excluding the remarketed equity units of $863m) are to restart the company's ATM equity in 2025+, to support current investment grade credit ratings; may also be used to redeem o/s preferred stock ($900m)
- **TSR:** continuing to target 9%-11% total shareholder return
- **Dividend:** reiterated 60%–70% payout target.
- Call is at **11:00am at 1-888-330-2391... Passcode: 28323**

ALE reports 1Q23 earnings

- ALE reported $1.02 vs. Gugg/Cons of $1.22/1.18
- Reaffirmed 2023 EPS guidance of $3.55 to $3.85 vs. Gugg/Cons of $3.70/3.71
- Weather was ($0.10) impact on the quarter
- "Sales to residential, commercial and municipal customers decreased from 2022 primarily due to warmer weather in 2023 compared to 2022. Sales to municipal customers also decreased as a result of a new contract entered into with Hibbing Public Utilities in April 2022 with sales under the new contract classified under other power suppliers." - Q
- ACE 'below expectations' on lower wind and availability of assets
- ACE O&M up 25% (+$2.9m)
- Higher O&M also dragged on MN Power (+$10.4m vs. 1Q22)
- 1Q23 contribution of $4.5mm from New Energy
- Still planning next MN Power case in 4Q23
- Call at 10am – register HERE
- Slides to be posted HERE

SR reports 2FQ23 beat of $3.70 in NEEPS vs Gugg/consensus at $3.44/$3.50; narrows FY23 NEEPS guidance to $4.20–$4.30 (from $4.15–$4.35), maintaining $4.25 midpoint, vs Gugg/consensus at $4.25/$4.25

- Reiterates confidence in 5-7% long-term EPS growth off of a base of the midpoint of the company's original fiscal 2023 earnings guidance of $**4.15**

- Following fiscal Q2 2023 results, SR has updated its segment guidance as below:
    - **Gas Utility:** $210m–$220m, **down** from $225m–$235m, previously
    - **Gas Marketing:** $43m–$48m, **up** vs $25m–$30m, previously
    - **Midstream**: $10m–$12m **a minor tweak upwards** vs $9m–$11m, previously
    - **Corporate & Other:** $-25m–$-30m vs $-20m–$-25m, previously
    - *Notable offsets to the strength at Marketing and Midstream were the impacts of lower margins during the winter of the Gas Utilities, as well as high interest expenses (impactful at both Gas Utilities and Corporate costs).*

- **Capex:** targeted 10-year capital investment plan remains $7bn, and expected capex for fiscal 2023 remain $700m, including the company's Midstream expansion for Spire Storage, which it reports "remains on plan".
- **Rate Base growth:** Capex is anticipated to drive 7%–8% utility rate base growth
- *Presentation and accompanying details not yet released*
- Earnings call will be held today at 9**:00 AM ET**… Dial-in: **844-824-3832**…(**no access code**)

AVA reports large miss for 1Q23 of $0.73 vs Gugg/consensus at $1.23/$1.16 and 1Q22 EPS of $0.99; maintains 2023 annual guidance of $2.27–$2.47 ($2.37 midpoint) vs Gugg/consensus at $2.28/2.34

- $–0.11 of EPS decline was driven primarily by inflationary pressures resulting in increased labor and benefits costs, among other operating expenses.
- $–0.09 came from timing-driven changes to AVA's effective tax rate; EFT was –13.7% in 1Q23 vs –17.8% in 1Q22.
- $–0.08 was a direct result of higher interest rates.
- $–0.02 at "other businesses", due to net investment losses recognized in 2023 compared to net investment gains recognized in 2022.
- **Margins:** compared to 1Q22, electric utility margin was flat, while natural gas utility margin increased EPS by $0.06 in 1Q23
- **"***We expect lower net power supply costs for the remainder of the year, resulting in a benefit under the ERM***" —** Dennis Vermillion, President and CEO
    - AVA booked a $7.6m pre-tax expense under the Energy Recovery Mechanism (ERM) in Washington, compared to a $1.9m pre-tax benefit in 1Q22

- **Capex:** 2023 capex guidance at Avista Utilities was reiterated at $475m; AEL&P capex is expected to be $19m vs $15m previously.
- **Debt Financing:** AVA issued $250m of long-term debt in 1Q23 (vs prior guidance of $200m for 2023) and does not expect to issue further LT debt this year.
    - The company ***does however*** expect to increase the capacity of its $400m credit facility to $500m in 2Q23.

- **Equity Financing:** $30m of equity was issued in 1Q23, and common stock issuance guidance was maintained at $120m for 2023.

EXC/IL – ComEd trial results in 4 guilty verdicts

- Michael McClain, former ComEd CEO Anne Pramaggiore, ex-ComEd lobbyist John Hooker and former City Club President Jay Doherty were convicted on all counts following 27 hours of deliberation
- More HERE

Guggenheim takeaway: *The case has been a constant point of media noise in IL in recent weeks, so good to see resolution in our view ahead of the second phase (former speaker Madigan). As a reminder, this matter was the driver of the July 2020 deferred prosecution agreement between the utility and the US Attorney's Office for the Northern District of Illinois. More recently, the case had tangential readthrough to the ICC given certain linkages (see HERE).*

SMR – NuScale continues to pursue opportunities in SE Asia; news release correction clarifies SMR's role

- Alongside a state visit of the Philippine president to DC, the president's office initially indicated in a release that the company would invest ~$7bn in the country to build a 430MW plant
- The language around the meeting with NuScale executives was subsequently amended yesterday to clarify that the company is working on a study and potentially with a local developer
- More HERE

Guggenheim takeaway: *The headline of NuScale potentially investing several times its market cap in the country generated some noise yesterday, with the subsequent clarifications helping to underscore that this is a normal outreach process for the country – similar to what we have seen to date in eastern Europe. We continue to monitor for additional data points on leads like these.*

MA/Wind – MA DOER and other agencies issue RFP for up to 3.6GWs of offshore wind

- The blockbuster RFP will set in motion a ~8 month response period in which projects of varying sizes may be bid in
- "If approved, the draft RFP will invite submittals for offshore wind generation to procure up to 3,600 MW, which represents 25 percent of the state's annual electricity demand and a significant increase over the previous procurement, which sought approximately 1,600 MW of offshore wind." - release
- "The procurement team would have flexibility to evaluate bids ranging from 400 MW to 2,400 MW in size, and to select a project or projects that bring significant benefits to the Commonwealth." - release
- Bids are due 31 January 2024
- More HERE

Guggenheim takeaway: *Flagged for your awareness as MA joins NY in seeking additional procurements of wind. The latest request is the first to come after last summer's modifications to the process and is the first to be lead by the DOER. The solicitation includes a weighting towards economic development and other social considerations, which was a point of interest in the state during last year's session. While we would not be*

surprised to see ES' JV bid into this latest RFP, we continue to expect an exit in the coming quarters, with an announcement potentially by the 2Q call. The state is also grappling with the ongoing fallout around the technical default for the Commonwealth project.

Policy ─ Senator Manchin advances efforts on permitting reform in Senate

- The Senator's office has re-released his prior legislation on permitting reform to serve as a starting point in Senate and Congressional negotiations
- "Today, U.S. Senator Joe Manchin (D-WV), Chairman of the Senate Energy and Natural Resources Committee, introduced the *Building American Energy Security Act of 2023*, the text of the National Defense Authorization Act (NDAA) amendment that was supported by 47 Senators (40 Democrats and 7 Republicans) in a tied floor vote in December 2022. This legislation will serve as a starting point for upcoming conversations in the Senate around reforming energy permitting to ensure American energy security and independence." – Manchin's office
- More HERE

Guggenheim takeaway: *Heads up as the process begins to heat up on both sides of the Hill – the successful passage of a budget package (with permitting items) by Republicans sets up further conversations on this specific topic, and we continue to see the area as ripe for bipartisanship in the coming weeks.*

SPP ─ Grain Belt developers update on phasing of HVDC work

- The developers continue to analyze potential impacts of the line and its second phase into IL for impacts on energy and capacity pricing in MISO and potentially PJM
- "Preliminary design has begun. Detailed design is required to start Q4 2023, in order to meet 2028 COD. Results of SPP TWG studies are needed to start detailed design in Q4 2023." - presentation
- More HERE

Guggenheim takeaway: *We continue to monitor Grain Belt as a both a resource adequacy option for adjacent utilities, and for its potential impact on energy and capacity pricing in MISO Zone 4 and beyond.*

PCG – PCG CEO makes constructive comments on company culture in media interview

- PCG CEO Patti Poppe made comments in a Press Democrat interview on transformation progress.
- Commentary directly addressed the ongoing culture change and PG&E.
- More here.

Guggenheim takeaway: *FYI. Transparent and open commentary on PG&E legacy issues.*

CAISO – CA transmission RTO bill is referred to Appropriations committee

- CA Legislature re-referred the bill addressing CAISO expansion into a western RTO to the appropriations

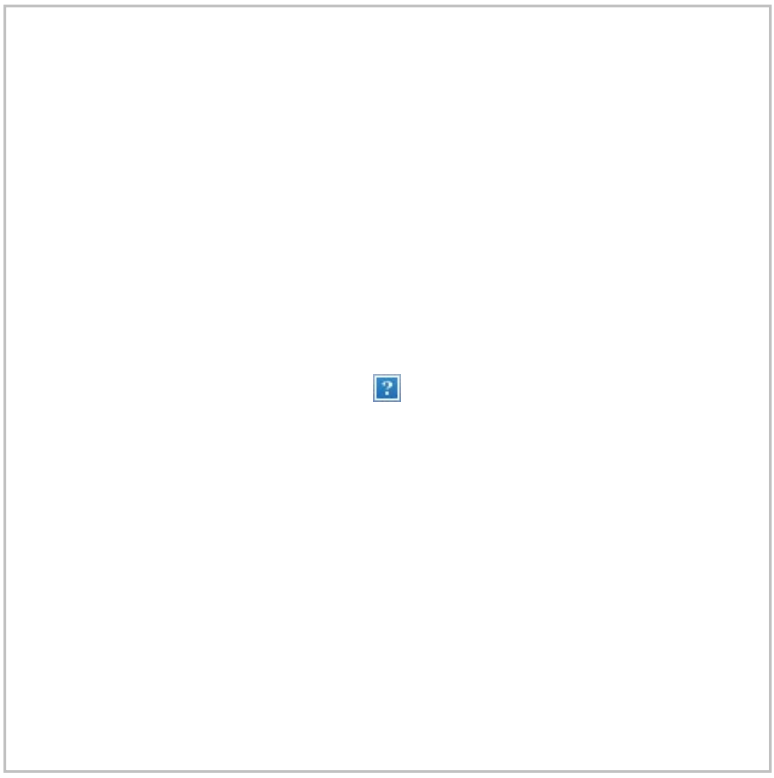
committee.

- CA introduced an assembly bill (AB538) that would look for CAISO to become an expanded western RTO with increased governance and multistate jurisdiction.
- The CAISO would be able to submit a plan to the CEC for expanded governance and multistate inclusion of resources into the RTO structure.
- Lawmakers believe this would be a solution to the resource adequacy constraints that CAISO has felt in recent years and would open up more availability of clean energy resources aligned with CA policy goals.
- Bill text here: AB538.

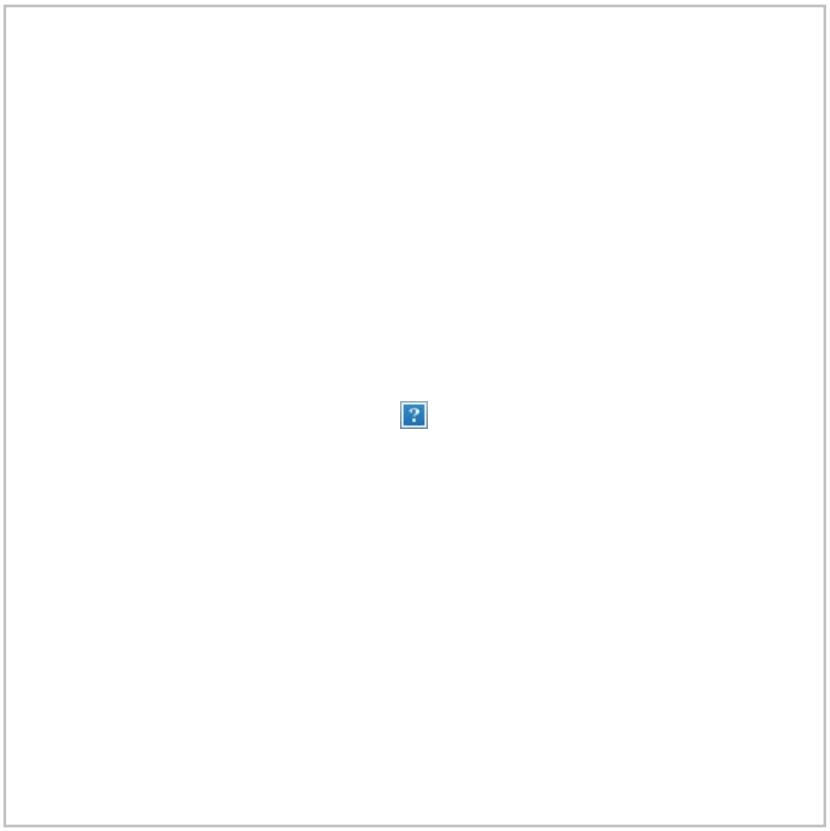
Guggenheim takeaway: *FYI. Resource adequacy work continues in CA.*

WEC – S&P Revises WEC Energy Group Outlook to Negative

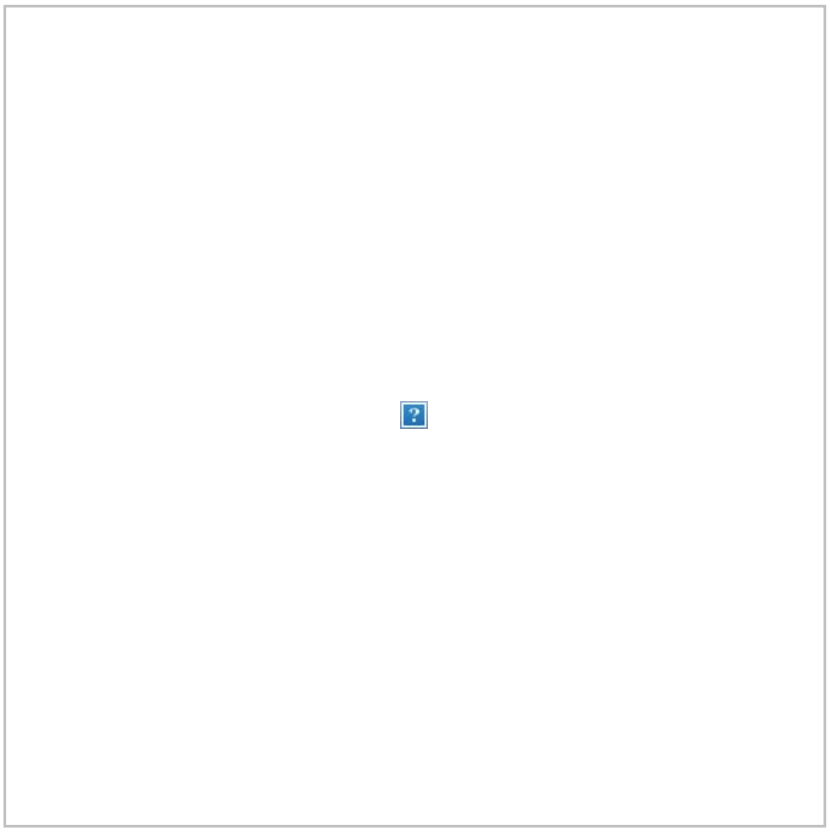
- S&P highlighted at the top of its report that WEC reaffirmed its expectation to fund its capital plan without any new equity issuance, a plan which incorporates $12.4bn of investments through 2025.
- S&P further states that WEC's negative operating cash flow has grown in recent years primarily from high capital spending and large nonutility acquisitions, and that S&P believes the company is disproportionately funding this cash deficit with incremental debt, weakening financial measures, in the rating agency's view.
- As a result, S&P believes its consolidated FFO- to-Debt could reside below S&P's downgrade threshold for the next three years.
- Bloomberg link to S&P release HERE



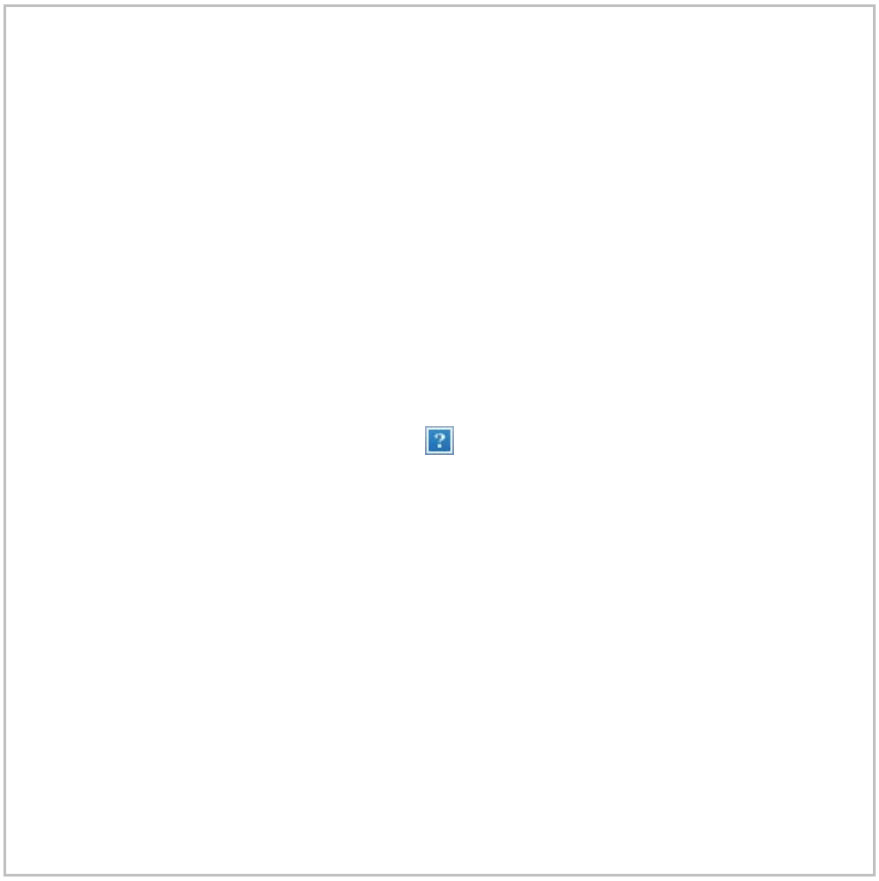
Guggenheim takeaway: *We caught up with the company following this release. WEC stated that from their perspective, S&P hasn't looked at the longer term, and highlighted that the outlook on WEC's utilities remains stable. The company does not expect this will materially impact its ability to access the capital markets, a view which we agree with, while also explicitly clarifying that WEC remains confident in its outlook.*



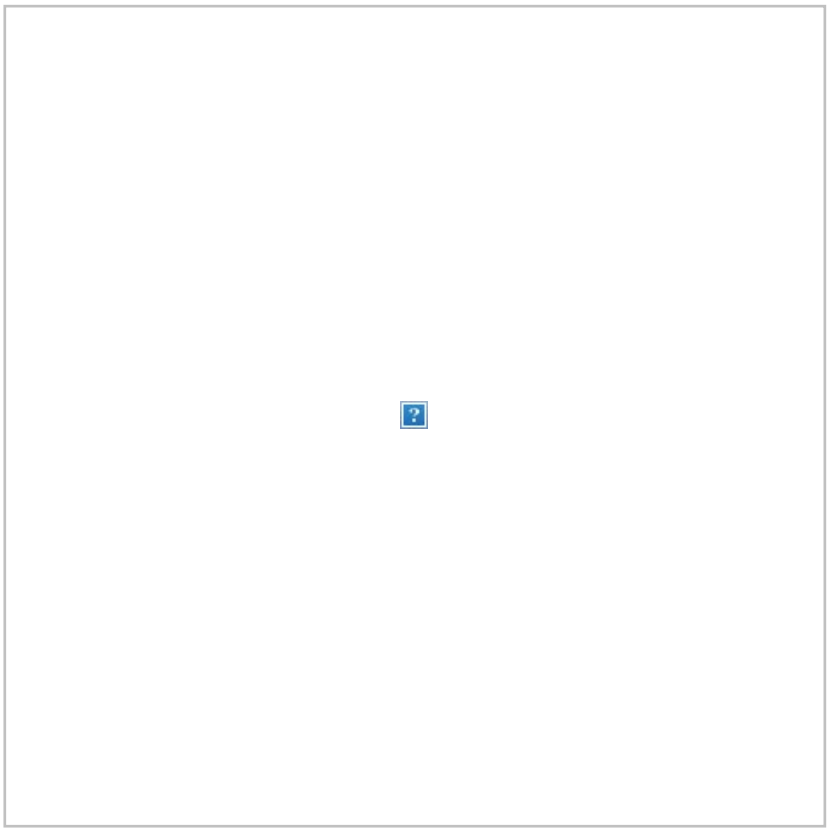
AEP/DUK/NI – Indiana legislation signed into law this week protects utilities' control over building power lines



- Governor Eric Holcomb, a Republican, signed legislation Monday that will give utilities the right to build and operate transmission projects that connect to their existing systems. Utilities owned by NiSource Inc. and AES Corp. also stand to benefit.
- Indiana Energy Association President Danielle McGrath hailed the new law as "sound policy," in response to an email sent to Duke for comment. AEP, AES and NiSource also referred to McGrath for comments.
- We note that transmission costs have apparently increased by an average of ~63% in Indiana over the preceding five years, as per the Electricity Transmission Competition Coalition, an advocacy group representing manufacturers and others who opposed the bill.
- Utilities will have to competitively bid to build projects and have the advantage of having crews on hand to make timely repairs after storms, according to McGrath.
- More HERE



Guggenheim takeaway: *From our coverage universe, we see AEP, DUK, and NI, as best positioned to benefit*



from this new law.
