Evergy, Inc.

We estimate EVRG will report adjusted EPS of $1.94 versus $1.86 consensus and 3Q '21 results of $1.98. Drivers in the quarter will likely be a net 2c benefit from weather, as degree days were slightly more favorable year-over-year. The company benefited by 4c last year from a tax timing item that will not repeat. Higher transmission rates are expected to add 2c, and the absence of a merger bill credit will add 1c. D&A, property tax and interest expense should be a 7c headwind. We assume flat O&M as the FY guidance and YTD results imply 6c of savings this quarter but warmer weather should drive higher utilization of the generation fleet and require additional O&M, offsetting the expected savings. We assume a 2c COLI contribution as well.

Focus for the call will likely be the final resolution of the Sibley plant issue, which we see as a 2-3c risk for EVRG. A black box settlement was reached on the rest of the rate case issues in late August (see our notes here and here). New rates are expected to take effect on 12/6/22, with a final decision issued by the Missouri PSC in early/mid November. Also of interest will be any indications or revised thoughts on the upcoming rate case filing in Kansas.

Eversource Energy (ES)

We expect Eversource Energy to report 3Q'22E EPS of $1.00 versus $1.08 consensus and $1.02 last year. Year over year the NSTAR PBR of $36.8mln in Jan '22. ES is on track to hit the midpoint of $4.04-$4.14 2022 EPS guidance without additional growth in 2H'22. We expect benefits from the company's pension contributions, transmission growth and NST Electric performance based revenue of $37 million starting in Jan. 2022 as well as very minor dilution from the continued DRIP and ATM programs. There could be a slight increase in equity issuance year over year as the ATM program was authorized in May. We expect an increase in interest expense from $1.5 billion issued in June at 4.4% and impacts related to $1 billion in commercial paper.

Focus for investors on the call will likely be on any updates on the strategic review of the offshore wind business which was announced on the 1Q'22 conference call.

Exelon Corp

We expect Exelon to report 3Q '22E EPS of $0.69 versus $0.69 consensus estimates, and a stand alone estimated 2Q '21 result of $0.66. This is our estimate of Exelon stand alone results that will be reported for 3Q'21 post the impacts of the Exelon Generation spin transaction in February. Drivers in the quarter will likely be distribution investment and increasing interest rates resulting in a higher formulaic ROE in Illinois. There were also rate cases at the other utility subsidiaries: Delmarva MD - $12.5mln effective March 2022, PECO electric - $132mln in Nov. 2021, Delmarva DE - $13.5mln in Sept 2021, and ACE NJ - $41mln effective after netted tax benefits in January 2022. We expect these positive drivers to be partially offset by higher O&M and D&A. At corporate, higher interest expense from $2.0bn of new debt at a 3.4% blended rate plus $2.0bn of term

loans at floating rates. The company issued $575mm of equity in August that was used to partially pay down the term loans.

We expect the call to focus on the recent management changes, efforts to defray the $200mm/year impact from the Inflation Reduction Act, the trajectory of earnings growth over the next few years and the impact to interest expense for parent debt given the rapid increase in interest rates this year. Additionally, EXC be making a determination in the coming months if they will purse a mutli-year rate plan at ComEd. Following the Illinois Commerce Commissions recent decision to allow performance metric incentive adders of up to 32bps, we believe it more likely EXC will purse the multi-year plan. Regarding the IRA impact, it may be possible for the Treasury to issue preliminary guidelines by the end of Q1'23 so companies have incremental guidance before making their first tax payments under the new tax law.

FirstEnergy

We expect FE will report 3Q'22E EPS of $0.79 versus the $0.78 consensus and $0.82 last year. The non-recurring drivers include Ohio rate credits, vegetation management accounting policy changes, FirstEnergy Transmission lower rate base earnings due to the asset sale and equity dilution which total -$0.14/share. Positive drivers include Signal Peak coal (assumed in line with 1H'22), $2.5 million of debt reduction in 1Q'22, rate base investment and riders, and weather. Offsets include the absence of load demand from COVID and non-fuel operations and maintenance expense which could include pull forward expenses to offset pension impacts in 2023.

We expect updates on the external CEO search and the transmission and distribution minority stake sale which are expected to take 3-6 months or late 2022/early 2023. We could also get an update on the Signal Peak hedging which prices off Newcastle coal.

Source: Company Reports, UBS Estimates

Fortis Inc.

Fortis will report 3Q 2022 results on October 28 and has also announced that they will update their 5 year capital plan that same day. The current capital plan totals C$20Bln for the period 2022-2026 with C$3.8Bln targeted to cleaner energy investments. This plan leads to ~6% five year CAGR to a total rate base of C$41.6Bln in 2026 from C $31.1Bln in 2021. Projects that may get included in the updated capital plan are small scale LNG investment in British Columbia, and continued clean generation investments in Arizona to decarbonize. The current decarbonization plan move the Arizona generation fleet to coal free by 2032, a 75% GHG emissions reduction by 2035 (vs. 2019), and Scope 1 net-zero emissions target by 2050. The updated capital forecast could also include some portion of the MISO Tranche 1 transmission awards which ~US $1.4-US$1.8Bln at ITC through 2030 that will likely need to start construction in the out years of the updated five year capital plan. Current capex projections are C$3,967/C $3,839/C$4,041/C$3,951/C$4,238mln for '22-'26 respectively. Total rate base projections by year are C$31.1/C$33.5/C$35.7/C$37.3/C$39.4/C$41.6Bln for the same forecast period.

For 3Q '22E we expect Fortis to report Adj. EPS of C$0.68 v. C$0.69 consensus estimates and C$0.64 in 3Q'21. Drivers are provided in the table below. Weather was slightly cooler in Alberta year on year, and we expect rate base growth will continue to be the main earnings driver for ITC. There was a +C$0.02/share due to accelerated depreciation on interest swaps from 3Q'21 that we do not expect to recur. For UNS, weather will be a driver as 3Q'21 was a cooler than normal summer and 3Q this year was warmer than normal. Central Hudson will see the impact of the rate case year over year as in 2021 the GRC was decided in 4Q and revenues retroactive to 3Q'21 were booked in 4Q. We expect Corporate & Other will be slight drag due to stock based compensation and higher variable rates on credit facilities. There will also be higher weighted average shares due to the ongoing DRIP program.

On the call we expect investors will be focused on the ongoing Arizona general rate case for TEP, and the updated capital plan.

Source: Company Reports, FactSet, UBS Estimates

NextEra Energy

We expect NEE to report 3Q '22E adjusted EPS of $0.80 vs. $0.79 consensus estimates and $0.75 in 3Q 2021. We anticipate results will be driven by the tailwinds related to increased guidance at the June 2022 investor conference which increased the range by $0.05/share to $2.80-$2.90. At FPL there will be regular year over year rate base growth which was 11.4% in 2Q'22 with a regulatory ROE of 11.6%, equivalent to management's target for 2022. The surplus balance was $1.37Bln and that is seasonally typically utilized in the first and fourth quarters and replenished in the second and third. Management did file for an ROE trigger to increase to 10.8% from 10.6% which would, if approved, take the high end of the range from 11.6% to 11.8%. The company also filed to return $400mln of tax savings from the inflation reduction act back to customers across 2023 – 2025 because the IRA changes the tax expenses embedded in the previously decided general rate case. At NEER wind resource was 98% and as a reminder every 1% variance is ~$0.01/share for the 2H'22. Growth in new investments year over year will be more seasonally skewed to the 4Q given the timing of in-service dates this year versus last.

The topic of conversation on the call will likely center on further refining the impacts of the IRA for both investment in the utility and at Energy Resources. Further, investors will be focused on the ongoing efforts at restoration at FPL. As of 10/2 about 80% of customers were back on with 1.7mln customers restored and 459k still out. FPL deployed over 25k people to work at storm restoration efforts. As a reminder, storm costs can be deferred on the balance sheet as a regulatory asset for future recovery. FPL can file with the commission for storm cost recovery and receive interim recovery within 60 days subject to final approval. The amount for interim recovery is capped at $4/ month on customer bills unless total annual storm costs are above $800mln, at which time FPL could file for an increase in the cap. Our understanding is that there was no damage to FPL's generation fleet, and due to storm hardening no single transmission structure was lost. In distribution assets that were undergrounded performed five times better than overhead lines.

NiSource Inc.

We expect NiSource to report $0.09 versus the $0.13 consensus and $0.11 last year. We see rate case and revenue impacts positive year on year but more than offset by headwinds from higher O&M due to inflationary pressures, higher D&A related to capital investments year on year, higher interest expense, as well as modestly higher share count.

The Analyst Day on November 7 should reveal the outcome of the company's strategic review. The outcomes may range from the status quo to selling LDC assets; we believe a sale of the company is a low probability. We believe management will also provide a full update of the earnings and rate base growth outlook and the capital expenditure and financing plans. The current plan calls for 7-9% EPS from '21-'24. We expect the new plan will roll out an earnings growth rate through at least 2026.

Q3'22 Estimate	**$ 0.09**

Source: Company Reports, FactSet, UBS Estimates

OGE Energy

We expect OGE to report $1.16 versus the $1.09 consensus and $1.11 last year for OG&E and parent. To normalize last year's result we remove $0.03/share of positive weather versus normal and -$0.01/share related to the Oklahoma flat bill program. The biggest positive drivers were the Oklahoma rate case implementation and weather. Sales will weight the rate case benefit to 3Q'22 versus 4Q'22 and weather to OGE's specific territory improved (degree days +25% versus normal versus +5% last year). We also expect slightly more depreciation and O&M in 3Q'22 versus 4Q'22.

We believe that the company's holding in Energy Transfer added $0.03/share. This includes $0.03/share for the capital gain and $0.01/share for the $0.23/share dividend. We assume OGE exited virtually all of its 22 M share position coming into the quarter.

On the investor call we expect an update on EPS guidance, the integrated resource plan and the Energy Transfer position.

Figure 31: OGE 3Q'22E Earnings Drivers

PG&E Corp.

We estimate PCG will report $0.25 versus the $0.24 consensus and $0.23 last year. PCG will likely provide an update on progress on earnings drivers like rate base growth and cost cuts. Guidance showed other factors for 2H'22 are $0.00 to -$0.04/share. On the call we expect an update on the Diablo Canyon life extension, the cost of capital and progress on achieving the next Wildfire Safety Certificate.

Source: Company Reports, FactSet, UBS Estimates

Pinnacle West Capital

We estimate PNW will report $2.71 versus the $2.53 consensus and $3.00 last year. The company should pick up +20c year over year from the below average weather last year which improved to slightly above average weather this quarter. The impact of the rate case is the other large driver and O&M, pension and interest expense were also headwinds.

On the call, we expect the focus to be on weather normal load growth trends, previewing the upcoming APS rate case filing which should occur by the end of this month and potential impacts from the Arizona Corporation Commission elections.

Q3'22 Estimate	**$ 2.71**

Source: Company Reports, FactSet, UBS Estimates

PPL Corporation

We estimate PPL will report $0.40 versus the $0.43 consensus and $0.36 last year. We see a benefit from PA transmission growth under formula rates. The last Kentucky rate case was implemented in July 2021 so there is no incremental impact. The Rhode Island Energy transaction represents the first full quarter contribution. On a pro-forma basis we included $0.18/share in our 2022E EPS forecast. We do not expect any material news on the cost savings as the company is likely still investing to achieve the savings. We expect an update on the Rhode Island ISR cap-ex filing in November, the Kentucky generation procurement and Department of Energy projects.

Q3'22 Estimate	**$0.40**

Source: Company Reports, FactSet, UBS Estimates

Public Service Enterprise Group

We expect Public Service Enterprise Group to report 3Q '22E EPS of $0.82 versus $0.82 consensus and $0.98 in 3Q '21. As a reminder the 3Q '21 results are inclusive of the fossil assets that were sold and closed in 1Q '22, however depreciation stopped being booked in mid-August for the assets. PEG did not report any earnings associated with the fossil assets in 2022, as all earnings were accounted for as an adjustment to the sale price at close. PEG now also reports along two segments: the utility PSE&G, and Carbon Free, Infrastructure, & Other segment, which will be inclusive of the nuclear fleet, the enterprises business, and corporate and other.

Earnings at the utility should be down $0.03/share year over year driven by transmission rate base growth offset by the settled FERC formula rate ROE reset. Earnings from Energy Strong II should help electric margins. O&M will be slightly higher, but benefits from the absence of storms this year that impacted last year. There is also a benefit from lower share count as a result of the $500mln buyback from the power asset sale proceeds. As a reminder the decoupled conservation incentive program (CIP) mechanisms went into place for electric and gas in June and October of last year, respectively.

Consolidating the prior reported segments of PEG Power and Enterprises, Corporate & Other into Carbon Free, Infrastructure, & Other (CFIO) leads to a prior 3Q 2021 EPS of $0.21. We see this dropping to $0.08 in 3Q 2022E mainly on the asset sales of the fossil units. Capacity revenues on the nuclear fleet are expected to be lower by $0.16 on the decline in the capacity price from $166-MW/Day to $97-MW/Day. Interest expense is expected to be higher year on year as a result of $2.5Bln in leverage this year, given higher required collateral postings as power prices rose vs. hedge levels, versus $500mln last year. PEG issued term loans of $1.5Bln in the spring, and issued $1.25Bln in debt in early March.

The call should focus on pension exposure for 2023 earnings, which have worsened as the stock market has continued to decline. We expect an update on the filing PSE&G made at the NJ BPU to help mitigate some of pension exposure through a accounting adjustment. Additionally, the BPU may issue a decision this month on the off-shore wind transmission projects that PEG and Orsted jointly bid on for up to $2.0bn of potential capital projects.

Southern Company

We expect Southern Company to report 3Q '22E EPS of $1.34 versus $1.30 consensus, 3Q '21 of $1.23, and guidance of $1.32. The net effect of weather should add 4c year-over-year. Retail rates and sales growth will be the biggest positive driver with +$0.20, with $0.19 at Georgia Power and $0.01 at Mississippi Power. Higher utility interest expense and D&A expected to be a ($0.05) impact. Parent & Other is ($0.02) related to higher costs and higher interest expense on higher debt balances, while there is another ($0.01) related to the sale of the leveraged lease portfolio.

On the call we expect focus will be on the progress of fuel loading at Unit 3 and the outlook for the remaining schedule for Unit 4. The company will also likely update on the Georgia Power rate case, as it is winding down and we may see a settlement announced in late November or early December. Additionally, we may get an update on succession planning for the CEO.

Source: Company Reports, FactSet, UBS Estimates

Sempra Energy

We expect Sempra Energy to report adjusted EPS of $1.97 versus $1.99 consensus and $1.70 in 3Q 2021. Results are expected to be driven by an incremental $300mln in FERC rate base at SDG&E which is regulated at a 56% equity ratio and a 10.6% allowed ROE. Two tranches of debt were also issued at SDG&E totaling about $1Bln with a 3.5% coupon or ~$6mln of impact for the quarter year over year. At SoCalGas we expect a flat year on year result given seasonality, and an negative impact from $700mln in debt issued at almost 3% or ~$3.5mln of impact year over year in the quarter. In Texas we expect growth year over year in line with the annual guidance mid-point of $690mln and 11% warmer weather year over year to contribute to higher volumes. SIP will be higher on midstream and Cameron LNG but lower related to the lower ownership stake after the closing of the 10% sale to ADIA on June 1. Further there were $16mln of maintenance related revenues recorded in 2Q'22 and on timing the $16mln in expenses related to those revenues will impact 3Q'22. Marketing also saw a significant uptick in 2Q '22 to $33mln but given SIP's LNG contract structure this should be viewed as a one-time impact rather than ongoing earnings. At corporate there is an increase in the cost of short-term debt of approximately 200bp and share count is down to 315mln shares from 320mln year over year.

Source: Company Filings, UBS Estimates

WEC Energy Group

We expect WEC Energy Group to report 3Q'22E EPS of $0.85 versus $0.86 consensus, $0.92 in 3Q '21, and guidance of $0.82-$0.84. As part of the rate case stay out settlement there will be amortization items that will impact results year over year that will equate to ~$0.30/share on a full year basis around the amortization of escrow and sharing balances that should be roughly evenly distributed across the quarters. The amortization balances are, at WPS, ~$19mln in transmission escrow balances, $21.6mln

in 2020 sharing, $18.4mln; and at WEPCO/WG, $18.4mln in of D&A and interest expense related to capex that would have otherwise been additive to rate base in a 2022 test year, ~$62mln related to transmission escrow balances, at $10mln related to the Bluewater Natural Gas Storage LLC O&M escrow.

Otherwise we expect results at utility operations to be driven by less favorable weather when compared to 3Q'21 and increased storm costs year over year. Fuel will likely be a small headwind year over year given the band and higher natural gas costs. Interest expense will be slightly higher given floating rate debt costs and issuances of $500mln at 4.75% at WE Energies and $900mln at ~5% at WEC, although these were in late September. There might be a headwind to controllable O&M year over year to maintain the guidance range into 2023, and D&A will be a drag given continued capital investment and the delayed rate case filing in Wisconsin.

At the infrastructure segment we expect a slight tailwind given better wind resource year over year. ATC should not be a significant driver year over year. WEC is still booking a 10.52% ROE on the ATC transmission assets which is inclusive of the 50bp adder for RTO membership. At the corporate segment the energy investment fund performance could be a headwind year on year.

On the call investors will likely be focused on the Wisconsin rate case filing, and the ROE which is the one item still to be decided. We expect WEC to release the updated capital plan for 2024-2028 and updated long term growth guidance although it is likely that 2023 earnings guidance and dividend expectations will be released after the Wisconsin ROE is fully adjudicated, which is likely by mid-December.

Source: Company Filings, UBS Estimates

Xcel Energy (XEL)

We expect XEL to report 3Q '22E EPS of $1.17 versus $1.13 last year and the $1.27 consensus estimate. Due to unfavorable 4Q'21 weather and expense timing, we anticipate 4Q'22 growth is stronger than 3Q'22 versus 2021. We expect similar weather conditions to 3Q'21 and modest weather normalized sales growth. We expect XEL to roll forward the cap-ex plan to 2023-2027 and give 2023 EPS guidance.

Based on XEL published earnings driver guidance other positives are capital riders and rate recovery. Rate recovery includes revenues related to the $25mln in interim rates at NSPM natural gas effective Jan '22, $247mln in interim rates at NSPM electric effective

December 2021, the NSPW electric and natural gas settlements effective in November 2021 for $35mln and $10mln in increases for 2022, respectively, the SPS NM settlement for $62mln effective on March 1 and the PSCo electric rate case settlement for $177mln effective in April '22. Cumulatively we calculated that this adds $0.17/share of electric margin and $0.02/share of gas margin versus Q3'21.

Other offsets will be a storm Uri disallowances at NSPM (-$0.02/share), a 2% increase in non-fuel O&M expense and depreciation and property taxes. In addition interest expense will be higher related to $2Bln in new debt issuance in May that will increase interest expense by $80-$90mln annually (average weighted cost of 4.25%).

Power

Constellation Energy

We expect CEG to report adjusted EBITDA of $550mln vs. $553mln consensus estimates and an estimated 3Q 2021Adj. EBITDA of $1,014mln. On the quarterly call we expect CEG to recast 3Q 2021 with allocated corporate costs, and provide a clean adjusted EBITDA number for the prior quarter. Drivers in the quarter are inclusion of the CENG assets year on year, lower PJM capacity prices, non-recurrance of Winter Storm Uri cost saving initiative impacts from 2021, CMCs now in place in Illinois with set prices on those three nuclear units, and the shaping of retail contracts with negative or small up front margins in 2022, but priced to profitable margins over the three year term 2022-2024 as the curve backwardates.

NRG Energy

We expect NRG to report adjusted EBITDA of $422mln versus $625mln consensus estimates and $767mln in 3Q 2021. In line with annual guidance and expected seasonality we expect drivers will be: sale of the Northeast portfolio year over year ($60)mln, retirement of assets in PJM and New York ($60)mln, lower capacity revenues in NY ($15)mln, ERCOT coal supply constraints ($10)mln, PJM coal supply constraints ($15)mln, Texas ancillary headwinds ($50)mln, the sale of the Watson power plant ($10)mln, and synergies from Direct Energy +$5mln.

Another drag on the quarter will be the outage at Parrish Unit 8. This outage will extend through the full year and is expected to lower results by ~$135mln in the quarter. NRG does have business interruption insurance, but our understanding is that there is a deductible related to time (not financial impact). If there are insurance proceeds related to the 3Q or 4Q it would shift earnings from 2022 to 2023, given such proceeds would not be booked until the cash is received.

On the call we expect management to update 2022 guidance and potentially issue 2023 guidance with a look forward to a cleaner year in 2023. We see drivers at +$110mln in Direct Energy synergies, the majority will be offset by the PJM generation adjustment, the sale of the Watson plan, and the sale of the Astoria plant. This should normalize to ~$2.3Bln in Adjusted EBITDA and ~$1.5Bln in Adjusted FCF. Alternative corporate minimum tax might be ~($50)mln impact although we are waiting further guidance on this issue from management.

Figure 40: NRG Energy 3Q'22E Adj. EBITDA by Segment

Source: Company Reports,UBS Estimates

Vistra Corp

We expect VST to report adjusted EBITDA of $965mln versus $1,289mln consensus estimates and $1,177mln last year. We expect drivers for the quarter to be self help costs achieved in 3Q 2021 in the wake of Winter Storm Uri not recurring in 3Q 2022 which is ~($210)mln drag. Weather was better year over year and and we expect retail to perform better given less volatility in power prices and volumes across 3Q'22. There will be slight ongoing headwind from the move from a retail service provider in Ohio to place all customers on default service which increased Vistra's customers significantly and unexpectedly without hedges in place to protect margins. Comanche Peak was also offline for five days in the quarter related to a probe measurement issue for one of the turbines which has been addressed.

We expect management to narrow 2022 guidance where we believe they will be tracking above the mid-point of the range, and to issue guidance for 2023 on the 3Q call. Capital allocation is likely to be largely reiterated given the significant hedging achieved through 2025.

Water Utilities

American Water Works (AWK)

We expect American Water Works to report $1.51 versus the $1.53 consensus estimate and $1.53 last year. We expect an update on customer acquisitions and rate cases on the call. The the New York American sale is -$0.12/share in 2H'22 but -$0.09/share in 3Q'22. The company will have additional revenue in 3Q'22 from several infrastructure mechanisms including Pennsylvania and New Jersey. We expect an update on the New Jersey rate outcome and the Pennsylvania rate case as well as on acquisitions.

Q3'22 Estimate	**$1.51**

Source: Company reports, UBS estimates

Essential Utilities (WTRG)

We expect Essential Utilities to report $0.26 versus the $0.24 consensus estimate and $0.20 last year. WTRG will benefit from a full quarter of the Pennsylvania rate increase ($76 million). We expect an impact from inflation and from higher interest expense. Updates on the call include the DELCORA process and the financing plan.

With the DELCORA transaction in the late stages of the Pennsylvania Public Utility Commission approval process the company could be in position to provide 2023 EPS guidance in 4Q'22.

Source: FactSet, UBS Securities LLC, Company Reports

We are lowering our AES Price Target to $28 from $29 to reflect a mark to market update of valuation multiples and to expand the global multi-utility comps to include RWE.

Our $28 sum-of-the-parts reflects $6/share for the U.S. Utilities and Generation, $14/ share for renewables and clean energy including the backlog, $9/share for emerging markets less $1/share for corporate debt and other. The 17% U.S. utility P/E premium reflects +5% for sustainable group undervaluation relative to corporate bonds, +10% for top quartile regulation and +2% for second quartile EPS growth.

Our prior $29 sum-of-the-parts reflects $7/share for the U.S. Utilities and Generation, $15/share for renewables and clean energy including the backlog, $9/share for emerging markets less $2/share for corporate debt and other. The17% U.S. utility P/E premium reflects +5% for sustainable group undervaluation relative to corporate bonds, +10% for top quartile regulation and +2% for second quartile EPS growth. It is 16x $2.00 in 2024 EPS.

UPSIDE ($32): Our upside AES scenario includes an improvement in emerging markets valuations and higher EPS growth including an incremental $0.13/share from renewable PPAs versus the base scenario. Emerging markets include South America, MCAC (Mexico,Caribbean and Central America) and Eurasia. This scenario reflects 9% EPS growth.

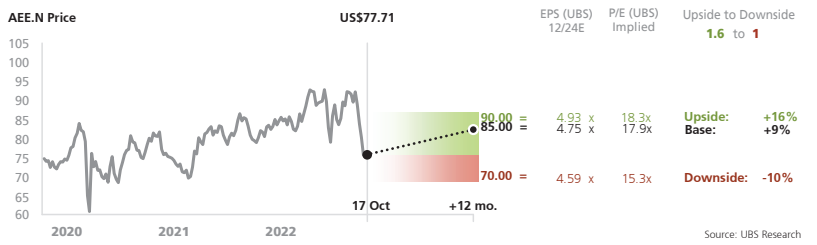
BASE ($28): Our $2 sum-of-the-parts reflects $6/share for the U.S. Utilities and Generation, $16/share for renewables and clean energy including the backlog, $8/share for emerging markets less $2/share for corporate debt and other. This scenario reflects 8% EPS growth.

DOWNSIDE ($20): Our downside scenario for AES assumes lower valuations for emerging markets and a -$0.14/share reduction in PPA origination. The Ohio rate case represents risk as well but is unlikely to materially impact EPS. This scenario reflects 6% EPS growth

Alliant Energy

Figure 47: LNT Upside/Downside Scenarios

Source: FactSet, UBS Equity Research Estimates



BASE ($53): Our $53 price target is an 11% premium to the Regulated Utility average P/E multiple or 16.9x $3.13 EPS in 2024E. The premium includes 10% for first quartile regulation, 5% for the group's undervaluation, and -4% discount for quartile EPS growth.

UPSIDE ($66): Our $66 upside case is a 21% premium to the Regulated Utility average P/E multiple or 18.6x $3.54 EPS in 2024E. The premium includes 10% for first quartile regulation, 5% for the group's undervaluation, -4% discount for quartile EPS growth, 5% premium for clean energy growth, and 5% premium for EPS guidance reliability.

DOWNSIDE ($42): Our $42 downside case is a 2% premium to the Regulated Utility average P/E multiple or 16.9x $2.72 EPS in 2024E. The premium includes -5% discount for quartile regulation, 5% for the group's undervaluation, and 2% premium for quartile EPS growth.

Ameren Corp

Figure 48: AEE Upside/Downside Analysis

Source: FactSet, UBS Securities LLC Estimates

UPSIDE ($90): Our upside scenario includes an incremental $1.0 billion of cap-ex investment which most likely relates to transmission or renewables. Our $90 upside

valuation is an 18% premium to the Regulated Utility average in 2024. This translates to 2024 EPS of $4.93/shr. The 18% premium includes: +5% for the Regulated Utility group undervaluation relative to the Baa corporate bond; +5% for second quartile regulation; +4% for second quartile EPS growth and +4% for EPS reliability premium.

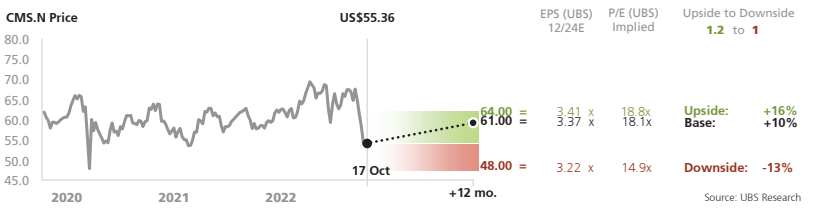
BASE ($85): Our $85 price target is based upon a 16% premium applied to the Regulated Utility average '24 P/E on our 2024E EPS of $4.75. The 16% premium includes: +5% for the Regulated Utility group undervaluation relative to the Baa corporate bond; +5% for second quartile regulation; +2% for second quartile EPS growth and +4% for EPS reliability premium.

DOWNSIDE ($70): Our downside scenario includes lower cap-ex versus the base plan, less constructive regulation and a write-off of Rush Island which equates to $4.59 EPS in 2024. The downside scenario implies 6.2% EPS growth from 2022-2026 which is third quartile. The $70 valuation is an inline multiple with the group.

American Electric Power

Figure 49: AEP Upside/Downside Analysis

Source: FactSet, UBS Securities LLC Estimates



UPSIDE ($111): Our upside scenario is based off EPS of $5.79/shr which reflects 8% EPS growth driven by higher sales and acerated capital investments. For our $111 upside valuation, we apply a ~23% premium which includes: +5% for the Regulated Utility group undervaluation relative to the Baa corporate bond; +10% for first quartile regulation; +4% for second quartile EPS growth and +4% for EPS reliability premium

BASE ($100): Our $100 price target is based upon a ~15% premium applied to the Regulated Utility average '24 P/E on our 2024E EPS of $5.64. The 15% premium includes: +5% for the Regulated Utility group undervaluation relative to the Baa corporate bond; +5% for second quartile regulation; +2% for second quartile EPS growth and +4% for EPS reliability premium.

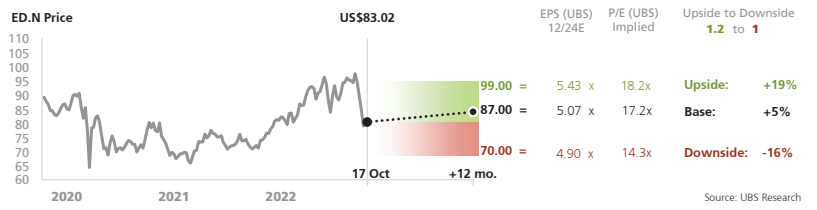
DOWNSIDE ($77): Our downside scenario includes lower cap-ex versus the base plan and less constructive regulation which equates to $5.46 EPS in 2024. The downside scenario implies 5% EPS growth from 2022-2026 which is third quartile. We apply 5% discount multiple to this earnings power to arrive at an $77/share downside valuation.

CMS Energy

Figure 50: CMS Upside/Downside Analysis

Source: FactSet, UBS Securities LLC Estimates

UPSIDE ($64): Our upside case of $64 for CMS represents 9% EPS growth and an additional 4% premium for earnings reliability. Our upside valuation of $64 is a 23%



premium to the Regulated Utility average or 19x $3.41 in 2024. The premium includes +5% for the sustainable premium relationship of the relative yield versus the Baa corporate bond, +10% for first quartile regulation, +4% or top quartile growth and +4% for earnings reliability.

BASE ($61): Our $61 price target is a 19% premium to the Utility average or 18x $3.37 in 2024E. The base scenario represents 8% EPS growth or the high-end of the 6% to 8% EPS growth guidance. The 19% premium includes +5% for the sustainable premium relationship of the relative yield versus the Baa corporate bond, +10% for first quartile regulation, and +4% or top quartile growth.

DOWNSIDE ($48): Our $48 downside case represents 6% EPS growth which is average and third quartile regulation in Michigan. It is 15x $3.22 in 2024.

Consolidated Edison

Figure 51: ED Upside/Downside Analysis

Source: FactSet, UBS Securities LLC Estimates

UPSIDE ($99): Our $99 upside valuation reflects an incremental $1.5 billion of regulated cap-ex investment (+$0.17/share) and a 50 bp improvement in earned ROE to 9.2% (+ $0.19/share). Combined these factors would move ED's EPS growth for the next 2 years to 9%. The $99 valuation reflects a 19% Utility premium or 18x $5.43 in 2024. The premium includes +5% for a sustainable P/E premium on a relative yield basis to the Baa corporate, -5% for third quartile regulation, +4% for first quartile EPS growth, +10% for a clean business mix, and +5% for a ESG growth premium

BASE ($87): Our $87 price target is an 8% Utility P/E premium or 17x $5.07 in 2024E. The 8% premium reflects: +5% for a sustainable P/E premium on a relative yield basis to the Baa corporate, -10% for fourth quartile regulation, -2% for third quartile EPS growth, +10% for a clean business mix, and +5% for an ESG growth premium

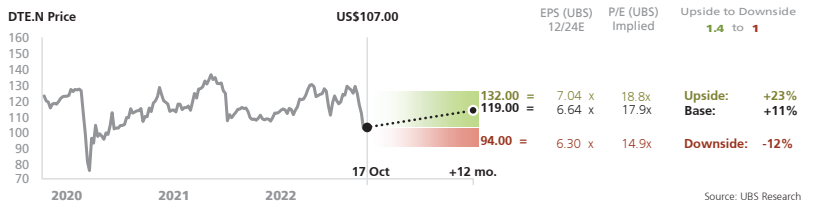
DOWNSIDE ($70): The $70 downside case represents a $1.5 billion additional cap-ex disallowance in CECONY utility investment (-$0.17/share) and the absence of a clean business mix premium. The downside valuation is a 7% Utility discount P/E or 14x $4.90 in 2024.

Dominion Energy

Figure 52: D Upside/Downside Analysis

Source: FactSet, UBS Securities LLC Estimates

UPSIDE ($86): Our upside case accelerates the clean energy transition increasing rate base growth to 11%, leaves the Virginia Clean Economy Act unchanged and incorporates a 17% premium on earnings power of $4.81/shr. The premium consists of



5% for the Regulated Utility group undervaluation relative to the Baa corporate bond, 2% premium for EPS growth, the regulatory ranking premium of 5% presuming improvement in VA, NC, and SC, and includes a clean energy transition premium of 5%

BASE ($80): Our base case valuation of $80 is premised upon an ~11% premium to the regulated utility multiple on our 2024 UBSe EPS of $4.67. The 11% premium is the sum of a group undervaluation premium of 5%, an EPS growth discount of 4%, regulatory jurisdiction premium of+5% and clean energy transition premium of 5%.

DOWNSIDE ($58): Our downside case assumes a repeal of the Virginia Clean Economy Act and lowers rate base growth to 6% as coal plants will still need to retire out by 2028 due to EPA effluent rules. Offshore wind project does not move forward. The reflects an EPS of $4.38/shr. Assign a ~14% discount to arrive at our downside valuation of $58. This a -10% regulatory discount and -4% EPS growth discount.

DTE Energy

Figure 53: DTE Upside/Downside Analysis

Source: FactSet, UBS Securities LLC Estimates

UPSIDE: ($132): Our $132 upside case is a 23% Utility premium or 19x $7.04 in 2024. The upside case includes an incremental $1 billion in cap-ex (+$0.15/share) and upside at DTE Vantage (+$0.15/share) that results in 9% EPS growth. The 23% premium includes +5% for a sustainable P/E premium on a relative yield basis to the Baa corporate bond yield, +10% for first quartile Regulation, +4% for first quartile EPS growth, and +4% for EPS reliability.

BASE ($119): Our $119 price target is a 17% premium to the Utility group average or 18x our $6.64 2024E EPS estimate. The 17% premium reflects: +5% for a sustainable P/E premium on a relative yield basis to the Baa corporate bond yield, +10% for first quartile Regulation, -2% for third quartile EPS growth, and +4% for EPS reliability.

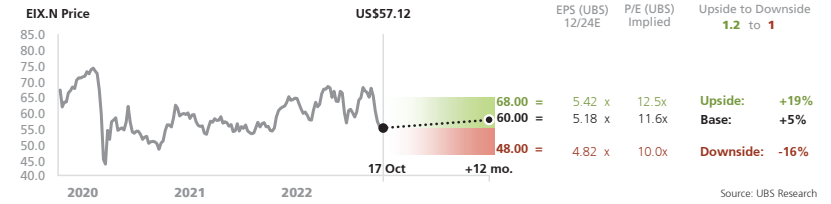
DOWNSIDE ($94): Our $94 downside case is 15x $6.30 in 2024. It includes 5% EPS growth that reflects a 25 bp ROE reduction (-$0.25/share) and lower unregulated EPS (-$0.10/share). The valuation reflects -4% or fourth quartile EPS growth, average regulation and +5% for a sustainable P/E premium on a relative yield basis to the Baa corporate bond yield.

Duke Energy

Figure 54: DUK Upside/Downside Analysis

Source: FactSet, UBS Securities LLC Estimates

UPSIDE ($108): Our upside case assumes an acceleration in EPS growth to 7% per annum with a constructive NC carbon plan decision and a nuclear production tax credit



allowing for bill headroom. This reflects $6.31/shr of earnings and a 12% premium to the group average multiple. This also would move Duke to a 2nd quartile growth premium of +2% and an unchanged regulatory quality premium of 5% for 2nd quartile regulation and +5% for the Regulated Utility group undervaluation relative to the Baa corporate bond. It assumes no block equity needed and an accretive sale of Commercial Renewables.

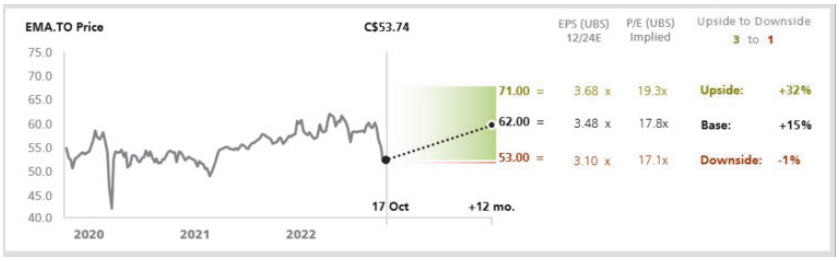
BASE ($98): Our base case of $98/share is premised upon a net 6% premium to the 2024 regulated utility multiple of 15.3.x and our 2024E EPS estimate of $6.08. Our 6% net premium is the sum of a 5% premium for our view of sustainable group overvaluation vs. Baa corporate bonds, a 5% premium for 2nd quartile regulation, and a 4% discount for 4th quartile EPS growth.

DOWNSIDE ($82): Our downside case assumes a 5% per annum growth rate at the low end of the company's guidance range and a North Carolina decarbonization docket decision that backloads capital and growth through the 2034 70% reduction target and requires $3Bln in block equity to shore up the balance sheet due to slower growth and cash flows. The reflects a $5.60/shr earnings power in '24. The valuation is a 5% discount to the group average which reflects a 4th quartile regulatory quality discount of 10%, a 5% premium for our view of sustainable group overvaluation vs. Baa corporate bonds.

Edison International

Figure 55: EIX Upside/Downside Analysis

Source: FactSet, UBS Securities LLC Estimates



UPSIDE ($68): The $68 upside case is an 18% discount to the Regulated Utility average or 13x $5.42. The upside case includes an incremental 25 bp in allowed ROE to 10.5% ($0.12/share) and $1 billion in cap-ex (+$0.12/share) which results in 7% EPS growth. The valuation includes +5% for a sustainable P/E premium on a relative yield basis to the Baa corporate bond yield, -5% for third quartile Regulation, +2%% for second quartile 5 year EPS growth, and -20% for the maximum wildfire fund contribution.

BASE ($60): Our $60 price target is a 24% discount to the Utility average 2024E P/E or 12x $5.18. The 24% discount reflects: -5% for third quartile Regulation, -2% for third quartile EPS growth, -22% for the maximum wildfire fund contribution, which is an 8 year net present value at an 8% discount rate and +5% for a sustainable P/E premium on a relative yield basis to the Baa corporate bond yield.

DOWNSIDE ($48): Our $48 downside case is 10x $4.82 in 2024 EPS. The downside case reflects an incremental 32% discount for resolution of legacy wildfire liabilities (consistent with PCG wildfire discount), a 25 bp reduction in allowed ROE 10.1% (-$0.12/share), and a $2B reduction in cap-ex (-$0.25/share).

Emera

Figure 56: EMA Upside/Downside Scenarios

Source: FactSet, UBS Equity Research Estimates

BASE (C$62): The C$62 base case consists of a 16% premium to the Regulated Utility average P/E multiple or 17.8x $3.48 EPS in 2024E. The premium includes 10% for first quartile regulation, 5% for the group's undervaluation, 5% for lower risk in clean energy growth capability, and -4% discount for fourth quartile EPS growth.

UPSIDE (C$71): Our $71 upside case is a 26% premium to the Regulated Utility average P/E multiple or 19x $3.48 EPS in 2024E. The premium includes 10% for first quartile regulation, 5% for the group's undervaluation, 4% premium for quartile EPS growth, 5% premium for clean energy growth, and 2% premium for EPS guidance reliability.

DOWNSIDE (C$53): Our $53 downside case is a 12% discount to the Regulated Utility average P/E multiple or 17.1x $3.10 EPS in 2024E. The premium includes 5% premium for first quartile regulation, 5% for the group's undervaluation, and 2% premium for EPS guidance reliability.

Entergy Corp.

Figure 57: ETR Upside/Downside Analysis

Source: FactSet, UBS Securities LLC Estimates

UPSIDE ($119): Our upside scenario of $119 reflects improved sales and regulatory outcomes driving a 25bps expansion in earned ROE and additional $1.0bn of capex deployed and in rates above the current plan. This puts 2024 EPS at $7.48/shr. We then apply a 4% premium multiple which reflects a 5% premium for the group being undervalued, an improvement to third quartile regulation (-5%), and top quartile EPS growth (+4%).

BASE ($107): Our $107 PT, reflects a 3% discount to the regulated utility average P/E of 15.3x. The discount is comprised of a 5% premium for the group being undervalued, ETR's 2nd quartile EPS growth (+2%), and a 4th quartile regulatory ranking (-10%).

DOWNSIDE ($93): Our downside scenario of $93 reflects sales and regulatory outcomes falling short of expectations and degrading earned ROE by 25bps while the rate base growth trajectory is reduced by $1.0bn. This puts the 2024 EPS at $6.63/shr. We then apply a 9% discount to the 2024 target multiple which assumes a 5% premium for the group being undervalued, a bottom quartile EPS growth profile (-4%) and a -10% regulatory risk discount.

Evergy Inc.

Figure 58: EVRG Upside/Downside Analysis

Source: FactSet, UBS Securities LLC Estimates

UPSIDE ($67): Our upside scenario includes an incremental $1 billion of investment and better state regulatory environment. Our upside value of $67 is a 2% premium to the Regulated Utility average or 15.7x $4.26. The 4% premium includes: 5% for Regulated Utility group undervaluation; 4% for top quartile EPS growth and -5% for third quartile regulation.

BASE ($62): Our $62 price target is a 1% discount to the Regulated Utility average or 15.3x $4.06 in 2024E. The 1% discount includes +5% for the Regulated Utility undervaluation to the long-term mean relationship to the Baa corporate bond, -10% for fourth quartile regulation, and +4% for first quartile EPS growth.

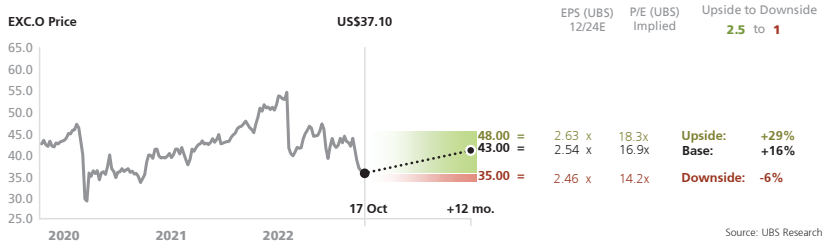
DOWNSIDE ($52): Our downside scenario of $52 reflects a 50 bp reduction in earned ROE due to a regulatory disallowance (-$0.30/share) and a reduction in cap-ex investment (-$0.20/share). The downside valuation is $53 or a 5% discount to the average Regulated Utility or 14.9x $3.56 in 2024. The discount includes: +5% for 12 month forward Regulated Utility group undervaluation and -10% for fourth quartile regulation.

EverSource Energy

Figure 59: ES Upside/Downside Analysis

Source: FactSet, UBS Securities LLC Estimates

UPSIDE ($84): Our $84 upside case is a 9% premium to the Utility average or 17x $5.07 in 2024. The upside case includes an incremental 50 bp in earned ROE to 9.2% (+$0.20/share) and an incremental $2 billion in cap-ex (+$0.25/share). The 9% premium reflects +5% for a sustainable P/E premium on a relative yield basis to the Baa corporate bond yield, a 5% discount for fourth quartile regulation, a 4% premium for top quartile EPS growth, and +5% premium for Clean Energy transition growth opportunity.



BASE ($76): Our ES $76 price target is a 4% premium to the Utility average or 16x our $4.62 2024E EPS estimate. The premium is the sum of a +5% for a sustainable P/E premium on a relative yield basis to the Baa corporate bond yield, a 10% discount for fourth quartile regulation, a 4% premium for top quartile EPS growth, and +5% premium for Clean Energy transition growth opportunity.

DOWNSIDE ($59): Our $59 downside case is a 7% discount to the Utility average P/E or 14x $4.17 in 2024. The downside case assumes 3rd quartile 6% EPS growth driven by a 50 bp reduction in earned ROE to 8% (-$0.20/share) and -$2 billion in cap-ex versus the base case which is -$0.25/share. The 7% discount is +5% for a sustainable P/E premium

on a relative yield basis to the Baa corporate bond yield, a 10% discount for fourth quartile regulation, and a -2% discount for third quartile EPS growth,

Exelon Corp.

Figure 60: EXC Upside/Downside Analysis

Source: FactSet, UBS Securities LLC Estimates

UPSIDE ($48): Our upside case of $48/share is premised upon a 19% premium to the group average. This is driven by +5% for 12 month forward Regulated Utility group undervaluation, improving regulatory environments and a 2nd quartile regulatory premium of 5%, a 1st quartile EPS growth of 4%, and EPS growth at the top end of Exelon's guidance range of 8%, driving 2024 earnings of $2.63. We also apply a 5% premium for clean energy transition.

BASE ($43): Our base case valuation of $43/share is premised upon a 9% premium to the regulation group average on our 2024E earnings of $2.54. The premium is fueled by +5% for 12 month forward Regulated Utility group undervaluation, a 4% premium for top quartile EPS growth, a 5% discount for third quartile regulatory rating, and a 5% clean energy transition premium.

DOWNSIDE ($35): Our downside case of $35/share is premised upon deteriorating regulatory environments which drive 2024 earnings of $2.46/shr and a 7% valuation discount. The discount is comprised of +5% for 12 month forward Regulated Utility group undervaluation, 4th quartile regulatory quality (-10% discount), and a -2% earnings growth discount.

FirstEnergy

Figure 61: FE Upside/Downside Analysis

Source: FactSet, UBS Securities LLC Estimates

UPSIDE ($48): Our upside scenario reflects resolution of the FE legal risk related to HB 6 without a material financial impact. The EPS growth rate reflects the high-end of the company's 6-8% EPS growth guidance. The valuation is a 5% premium to the Regulated Utility average or 16.5x $2.91 2024E. The valuation multiple reflects +4% for first quartile EPS growth, +5% for second quartile regulation, -7% for legal risk, +5% for a sustainable P/E premium on a relative yield basis to the Baa corporate bond yield, and -2% for legal risk.

BASE ($43): Our $43 price target is a Regulated Utility average or 15x $2.80 in 2024E. It is +5% for second quartile Regulation, +2% for second quartile EPS growth, +5% for a sustainable P/E premium on a relative yield basis to the Baa corporate bond yield, and -

12% for legal risk.

DOWNSIDE ($33): Our $33 downside scenario assumes an incremental $750 million equity (-$0.12/share) need -$0.10/share for pension EPS risk and a more significant legal discount of -10%. The $33 valuation is 13x $2.58 in 2024E, which is a 14% discount to the Regulated Utility average. The discount reflects -4% for fourth quartile EPS growth, -5% for third quartile regulation, +5% for a sustainable P/E premium on a relative yield basis to the Baa corporate bond yield, and -20% for legal risk.

Fortis

Figure 62: FTS Upside/Downside Scenarios

Source: FactSet, UBS Equity Research Estimates

BASE (C$50): Our C$50 base case is a 3% premium to the Regulated Utility average P/E multiple or 15.9x $3.14 EPS in 2024E. The premium includes -5% discount for quartile regulation, 5% for the group's undervaluation, -2% discount for regulated EPS growth guidance, and 5% premium for specific adjustment.

UPSIDE (C$54): Our C$54 upside case is a 3% premium to the Regulated Utility average P/E multiple or 15.7x $3.44 EPS in 2024. The premium includes -5% discount for quartile regulation, 5% for the group's undervaluation, -2% discount for regulated EPS growth guidance, and 5% premium for specific adjustment.

DOWNSIDE (C$45): Our C$45 case is a 3% discount to the Regulated Utility average P/E multiple or 15.3x $2.94 EPS in 2024. The premium includes -5% discount for quartile regulation, 5% for the group's undervaluation, -2% discount for regulated EPS growth guidance, and 5% premium for specific adjustment.

NextEra Energy

Figure 63: NEE Upside/Downside Analysis

Source: FactSet, UBS Equity Research Estimates

UPSIDE ($106): Our upside case reflects a SOTP methodology. For FPL and Corporate we increase our ESG premium by 15%, include an earnings reliability premium of 4% and increase FPL earnings by $0.10/share in 2024 on higher achieved ROEs. For NEER we use a 21x '24 EV/EBITDA multiple on peak clean energy comp valuation. We mark the stake in NEP to market.

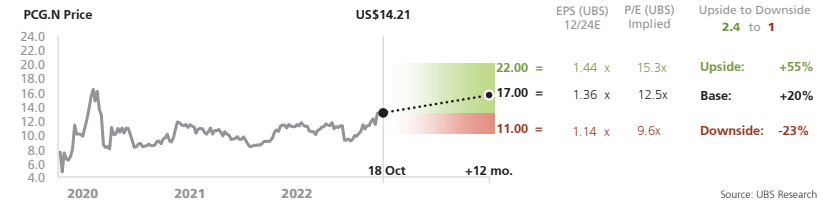
BASE ($90): Our valuation reflects a SOTP methodology. For FPL and Corporate, we assign a 24% premium to the Regulated Utility average P/E of 15.4x 2024E EPS of $2.10. For NEER, we assign a P/E of 34.6x 2024E EPS of $1.29 premised upon the valuation of Orsted SA and Ormat. We mark-to-market NEE's LP ownership stake in NEP.

DOWNSIDE ($64): Our downside case reflects a SOTP methodology. For FPL and Corporate we use 2nd quartile growth and 2nd quartile regulatory quality versus 1st quartile for both in our base case. We also remove any ESG or earnings reliability premium and lower FPL earnings by $0.10/share in 2024 on lower achieved ROEs. For NEER we use a 2x PEG ratio on low end 10% growth or 20x P/E on 2024 EPS of $1.29. We mark the NEP stake to market.

NiSource, Inc.

Figure 64: NI Upside/Downside Analysis

Source: FactSet, UBS Securities LLC Estimates



UPSIDE ($30): Our $30 upside case reflects a 14% premium to the Regulated Utility average on $1.72 in 2024. The higher earnings power reflects an incremental $600 million of investment driving 7% EPS growth. The valuation includes +5% for the 12 month undervaluation on a relative yield basis to the Baa corporate bond, +5% for second quartile regulation, and +4% for first quartile EPS growth.

BASE ($27): Our $27 price target is a 6% premium to the Regulated Utility average P/E or 16.3x $1.66 in 2024E. The valuation includes +5% for the group being undervalued, +5% for second quartile regulatory jurisdictions and -4% discount for fourth quartile EPS growth.

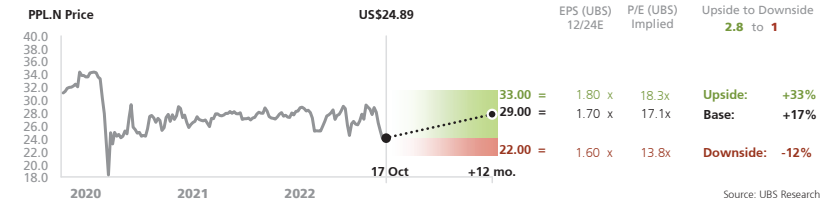
DOWNSIDE ($23): Our $23 downside case is a 1% discount to the Regulated Utility average 2024 P/E on earnings of $1.51 in 2023E. The downside case reflects a $1.2 billion reduction in investment by 2024 and third-quartile regulation.

PG&E Corp.

Figure 65: PCG Upside/Downside Analysis

Source: FactSet, UBS Securities LLC Estimates

We are lowering our price target on PCG to $17 from $18 due to a 14% reduction in the average P/E multiple (15.3x versus 17.8x) offset by a 6% reduction in California wildfire liability discount (-24% versus -30% previously).



UPSIDE ($22): Our PCG upside case assumes full implementation of AB 1054 and full implementation of the $7.5 billion securitization. It is 15x upside case EPS of $1.44 in 2024.

BASE ($17): Our $17 price target is 12.5x our $1.36 EPS in 2024E, which is -21% discount to the Regulated Utility average P/E. The -21% discount is: a +5% for a sustainable over valuation to the Baa corporate bond, +4% for top quartile earnings growth, -5% for third quartile regulation, and -25% for California wildfire exposure for including -17% for 75% of the maximum use of the wildfire fund to 2030 and -8% for a $1.5 billion liability exposure.

DOWNSIDE ($11): Our PCG downside scenario reflects ineffective implementation of AB 1054 resulting in a -$4 billion exposure and $1.14 of EPS in 2024. Our downside scenario is 10x our downside case EPS of $1.14.

PPL Corp.

Figure 66: PPL Upside/Downside Analysis

Source: FactSet, UBS Securities LLC Estimates

UPSIDE ($33): Our upside scenario includes an improvement in the company's UBS Regulatory Ranking from a high 3rd quartile to 2nd quartile and an incremental $1 billion in cap-ex from renewable RFPs or transmission, which adds $0.10/share. The $33 upside 18% premium is 18x $1.80 in 2024.

BASE ($29): Our PPL $29 price target is at an 8% premium to the Utility average, or 17x our $1.70 2024E EPS estimate. The premium is the sum of +5% for a sustainable P/E premium on a relative yield basis to the Baa corporate bond yield, a 5% discount for third-quartile regulation, a 4% premium for top-quartile EPS growth, and a 4% EPS reliability premium.

DOWNSIDE ($22): Our downside scenario is primarily a shortfall in investment, which results in the company falling short of the EPS growth guidance range at 5%, which is fourth quartile. The $22 downside valuation is at a 12% discount, or 14x $1.60 in 2024E.

Pinnacle West Capital Corp

Figure 67: PNW Upside/Downside Analysis

Source: FactSet, UBS Equity Research Estimates

UPSIDE ($77): The $77 upside case includes an incremental $1.0 billion of net investment funded one-half with equity and an incremental 1% sales growth versus the baseline. The EPS impact of the net investment is $0.18/share and the higher allowed ROE is $0.24/share. Our upside valuation of $77 is an inline multiple to the Regulated Utility average or 15.3x $5.00 in 2024. The valuation includes -5% for third quartile regulation and +5% for the Regulated Utility group undervaluation versus the long-term relationship to the Baa bond.

BASE ($60): Our $60 price target is a 15% discount to the average Regulated Utility multiple or 13.2x $4.54 in 2024E. The 15% discount includes -10% for fourth quartile regulation, -2% for third quartile EPS growth, -8% for rate case risk and +5% for the Regulated Utility group undervaluation versus the long-term relationship to the Baa bond.

DOWNSIDE ($50): Our $50 downside case is a 15% discount to the average Regulated Utility or 13.1x $3.82 in 2024. The downside case assumes a write-off of Palo Verde and Four Corners and new equity to maintain the capital structure as the proceeds are used to repay debt at a 3.5% rate. The 15% discount includes -10% for fourth quartile regulation, -2% for third quartile EPS growth, -8% for rate case risk and +5% for the Regulated Utility group undervaluation versus the long-term relationship to the Baa bond.

Public Service Enterprise Group

Figure 68: PEG Upside/Downside Analysis

Source: FactSet, UBS Equity Research Estimates

UPSIDE ($81): Our $81 upside case reflects a 22% premium to the Regulated Utility average on $4.20 in 2024. The higher earnings power reflects an incremental $1.0 billion of investment driving 7+% EPS growth. The valuation includes +5% for the 12 month undervaluation on a relative yield basis to the Baa corporate bond, +5% for second quartile regulation, and +4% for first quartile EPS growth, +4% for earnings consistency and +5% for clean energy transition.

BASE ($76): Our $76 price target is a 22% premium to the Regulated Utility average P/E or 18.8x $4.05 in 2024E. The valuation includes +5% for the 12 month undervaluation on a relative yield basis to the Baa corporate bond, +5% for second quartile regulation, and +4% for first quartile EPS growth, +4% for earnings consistency and +5% for clean energy transition.

DOWNSIDE ($48): Our $48 downside case is a 10% discount to the Regulated Utility average 2024E P/E on earnings of $3.50 in 2024E. The downside case reflects a $1.5 billion reduction in investment by 2024 and a 200bps reduction in earned return due to higher inflationary and pension costs and are reduced allowed ROE. The -10% discount reflects +5% for the 12 month undervaluation on a relative yield basis to the Baa corporate bond and -10% for fourth quartile regulatory jurisdiction and -5% for lower earnings growth.

Sempra

Figure 69: SRE Upside/Downside Analysis

Source: FactSet, UBS Equity Research Estimates

UPSIDE ($206): Our upside case is premised on a SOTP valuation methodology. We value the Texas utilities at a 25% premium for growth and T&D only assets to the group multiple of 15.4x on '24 EPS of $2.23/share ($43/share) and the California utilities at the 7% premium in our base case to the group multiple of 15.4x on $5.15/share ($85/share). For SIP we use a Brookfield Infrastructure comparable multiple on '24 EV/EBITDA of 15.1x versus 10.4x in our base case which leads to a value of $50/share. We incorporate $27/share for the LNG backlog including ECA Phase 1 by adding an additional $2/share for the potential Selina Cruz LNG project.

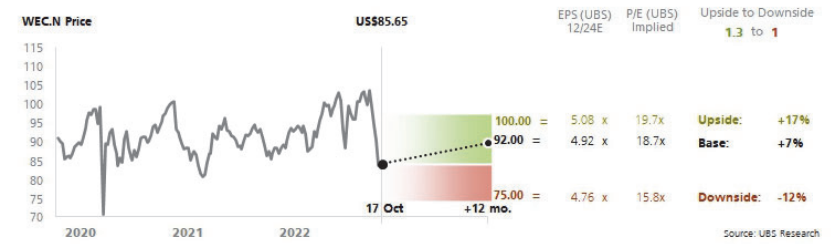
BASE ($178): Our $178 price target is premised upon a SOTP valuation methodology. We value the utilities at a 7% premium to the 15.4x regulated utility multiple on our consolidated UPO of $7.66, yielding $127/share. Our 7% premium is a 5% premium for the group valuation vs. interest rates, a 5% discount for fourth quartile regulation, a 2% discount for 3rd quartile EPS growth, and a 5% premium for lower risks to the clean energy transition, and a 4% premium for earnings consistency. We value SIP using an infrastructure comparable '24E EV/ EBITDA multiple of 10.4x, $5.9Bln of net debt, and ~305mln shares outstanding, yielding $27/share. We value ECA Phase 1 LNG under construction at $3/share and the remaining LNG backlog at $22/share using similar economics to Cameron Phase 1, the LNG/Midstream comparable 2023 P/E multiple of 15.4x and a 10% discount for Cameron LNG Phase 2, a 25% discount for Vista Pacifico, and for Port Arthur, and a 50% discount for ECA Phase 2.

DOWNSIDE ($121): Our downside case is premised on a SOTP valuation methodology. We value the Texas utilities at a 7% premium as in our base case, ($36/share), and the California utilities using the average of the group multiple and EIX or 13.2x, which results in $67/share. SIP is valued at the Mexican Airport comparable 8.5x '24 EV/EBITDA or $18/share inclusive of ECA Phase 1, and LNG Development is valued at $2/share as a discounted value of Cameron Train 4.

Southern Company

Figure 70: SO Upside/Downside Scenarios

Source: actSet, UBS Equity Research Estimates



UPSIDE ($88): Our upside case incorporates a growth rate increase to 6%-8%, earnings power of $4.30, a Vogtle premium of 10% related to cash flow the in-service project would need to fund the higher growth without equity needs, and a 5% premium for clean energy transition on a post Vogtle acceleration of fleet transformation to clean from coal.

BASE ($77): Our base case incorporates $4.21/shr of earnings in '24E, a 5% premium for group valuation at the high end of the company's 5%-7% growth rate and the elimination of the Vogtle ROE penalty and Vogtle completion in the first half of 2023. We also incorporate a 4% premium for first quartile EPS growth, and a 10% premium for top quartile regulatory constructiveness.

DOWNSIDE ($58): Our downside case incorporates Vogtle not being able to move to commercial operations in 2023, a Vogtle related write off of $3Bln on prudency review and a 25% Vogtle risk to completion discount and a $4.04/share earnings power in 2024.

WEC Energy Group

Figure 71: WEC Upside/Downside Scenarios

Source: FactSet, UBS Equity Research Estimates

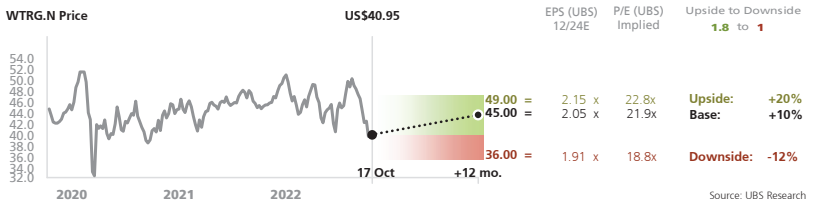
UPSIDE ($100): In our upside case we grow earnings per share at 8%/year off of the 2021 base year to $5.08 in earnings per share in 2024. We value WEC at a 28% premium to the RU average P/E multiple by increasing to a 5% 1st quartile eps growth premium, for a –2% third quartile discount in our base case.

BASE ($92): In our base case, we value WEC at a 22% premium to the RU average P/E multiple. The premium reflects our group valuation bias (5% premium), as well as WEC's 3rd quartile EPS growth (2% discount) and 1st quartile regulatory ranking (10% premium), an earnings consistency premium (4% premium), and a lower risk path to the clean energy transition (5% premium). Our base case incorporates our 2024E EPS estimate of $4.92.

DOWNSIDE ($75): In our downside case we slow earnings growth to 5%/year off of the 2021 base to $4.76/share in 2024. We value WEC at a 6% premium to the RU average P/E multiple by moving EPS growth to 4th quartile or a -4% discount. We also take the earnings consistency and ESG premiums to 0%.

Xcel Energy

Figure 72: XEL Upside/Downside Analysis



Source: FactSet, UBS Securities LLC Estimates

UPSIDE ($70): Our $70 upside case is a 23% premium to the Utility group and is 19x $3.74 in 2024. The upside scenario includes an improved regulatory ranking and EPS growth versus the base case. We assume an incremental $2.0 billion in cap-ex or + $0.19/share (9.6% and 52% equity ratio) and 8% EPS growth. The 23% premium reflects: +5% for second quartile Regulation, +4% for first quartile EPS growth, +4% for EPS guidance reliability, +5% for an ESG risk-adjusted opportunity premium and +5% for a sustainable P/E premium on a relative yield basis to the Baa corporate bond yield.

BASE ($62): Our XEL $62 price target is an 11% premium to the group average or 17x our 2024E EPS of $3.55. The 11% premium reflects: -5% for third quartile Regulation, +2% for second quartile EPS growth, +4% for EPS guidance reliability, +5% for an ESG risk-adjusted opportunity premium and +5% for a sustainable P/E premium on a relative yield basis to the Baa corporate bond yield.

DOWNSIDE ($51): Our $51 downside case is a Utility average P/E of 15x $3.41 in 2024. The downside case reflects a $1.5 billion reduction in cap-ex at a 9.6% ROE and 52% equity ratio which is -$0.14/share and 6% annualized EPS growth from 2022-2026.

Figure 73: WTRG Upside/Downside Analysis

Source: FactSet, UBS Securities LLC Estimates

We are changing our WTRG price target to $45 from $51 due to a change in average multiples. Our $45 price target is a sum of the parts which is $33 for a 7% P/E premium to the Water Utility group or 26x applied to $1.28 of Water Utility and parent EPS in 2024E plus $12 for a gas utility average P/E of 16x applied to $0.77. The 7% premium reflects +5% for second quartile Regulation and +2% for second quartile EPS growth.

Previously our $51 target target was the sum of $38 for a 7% P/E premium to the Water Utility group or 29.3x applied to $1.28 of Water Utility and parent EPS in 2024 plus $13 for a gas utility average P/E of 17.8x applied to $0.77. The 7% premium reflected +5% for second quartile Regulation and +2% for second quartile EPS growth.

UPSIDE ($49). Our $49 upside case includes an incremental $500 million in water utility rate base through an acquisition or other investment which contributes $0.10/share assuming a 10% ROE and 50% equity ratio. This results in first quartile EPS growth of 8% from 2022-2026. The upside case is $37 for the Water Utility and Parent at a 9% premium to the Water Utility average P/E or 27x $1.38 in 2024 plus $12 for the gas utility at 16x $0.77. The 9% premium includes +4% for first quartile EPS growth and +5% for second quartile regulation.

BASE ($45): Our $45 price target is a sum of the parts which is $33 for a 7% P/E premium to the Water Utility group or 26x applied to $1.28 of Water Utility and parent EPS in 2024E plus $12 for a gas utility average P/E of 16x applied to $0.77. The 7% premium reflects +5% for second quartile Regulation and +2% for second quartile EPS growth.

DOWNSIDE: ($36): Our $36 downside case includes a $750 million reduction in water utility rate base versus the base case or -$0.14/share. This results in third quartile EPS growth of 6% from 2022-2026. The downside case is $26 for the Water Utility and Parent at a 7% discount to the Water Utility average P/E or 23x $1.14 in 2024 plus $10 for the gas utility at a 20% gas utility discount P/E of13x $0.77. The 9% premium includes -2% for third quartile EPS growth and -5% for third quartile regulation.

Figure 74: WTRG Sum of the Parts

WTRG-Current	2024E	Multiple	Value
Water	$1.46	26.2x	$38
Gas Distribution	$0.77	15.6x	$12
Parent & Other	-$0.18	26.2x	-$5
Total	$2.05		$45

WTRG-Prior	2024E	Multiple	Value
Water	$1.46	29.3x	$43
Gas Distribution	$0.77	18.1x	$14
Parent & Other	-$0.18	29.3x	-$5
Total	$2.05		$51

Source: Factset, UBS Securities LLC

Valuation Method and Risk Statement

Our valuation methodology for the group is price-to-earnings based. The adjustments applied fall into 7 categories. These are as follows: 1) Group Valuation Bias: Flowing from our valuation work comparing Baa corporate yields to group dividend yields and RU price to earnings ratios to those for the S&P 500, we incorporate a positive or negative adjustment to our group multiple representing the gap we calculate to the nearest 5%; 2) Growth Adjustment: We adjust our valuations based on the growth quartile each utility occupies. First quartile receives a 4% premium, second quartile a 2% premium, third quartile a 2% discount and fourth quartile a 4% discount; 3) Regulatory Adjustment: Our valuation adjustments for regulation are based on our proprietary Regulatory Rankings. First quartile jurisdictions receive 10%, second quartile 5%, third quartile -5% and fourth quartile -10%; 4) Clean Energy Transition: A potential 5% premium for a risk adjusted clean energy transition growth opportunity; 5) Earnings Consistency Adjustment: For companies that fall in the top quartile of % Time Beat/Meet, we include +4%; 6) Multi Utility Diversified Valuation: For multi utilities (those with more than 15% of unregulated earnings), we perform a sum-of-the-parts analysis applying business/region appropriate valuations to those diversified businesses; 7) One-off Adjustments: In special situations, we value risk on an issue-specific basis. Common areas where we apply such an adjustment include: large project construction risk, legal risk, and announced M&A completion risk. We identify the following risk factors: rising interest rates; regulatory and policy risks; operational risks; construction risks; cybersecurity risk to the transmission grid and/or customer data, and extreme weather events.

North American utilities: We identify the following risk factors for the sector overall: rising interest rates; regulatory and policy risks; operational risks; construction risks; cybersecurity risk to the transmission grid and/or customer data, and extreme weather events.

IPPs: We identify the following risks for the sector: Demand for new renewable installations has historically been volatile around changes in state and federal policy, and we expect this volatility to continue. In addition, margins for product manufacturers can be impacted by swings in raw materials pricing and the overall level of energy prices.

Our valuation methodology for water utilities is P/E based and includes a: 1) Growth Adjustment: We adjust our valuations based on the growth quartile each utility occupies. First quartile receives a 4% premium, second quartile a 2% premium, third quartile a 2% discount and fourth quartile a 4% discount and a 2) Regulatory Adjustment: Our valuation adjustments for regulation are based on our proprietary Regulatory Rankings. First quartile jurisdictions receive 10%, second quartile 5%, third quartile -5% and fourth quartile -10%. Risks for the sector are rising interest rates; regulatory and policy risks; operational risks; construction risks; cybersecurity, and water access.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit https://www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 19 October 2022 06:22 PM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations. **Quantitative Research Review:** UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For the latest responses, please see the Quantitative Research Review Addendum at the back of this report, where applicable. For previous responses please make reference to (i) previous UBS research reports; and (ii) where no applicable research report was published that month, the Quantitative Research Review which can be found at https://neo.ubs.com/quantitative, or contact your UBS sales representative for access to the report or the Quantitative Research Team on qa@ubs.com. A consolidated report which contains all responses is also available and again you should contact your UBS sales representative for details and pricing or the Quantitative Research team on the email above.

Analyst Certification:
Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	56%	26%
Neutral	FSR is between -6% and 6% of the MRA.	35%	22%
Sell	FSR is > 6% below the MRA.	9%	18%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 30 September 2022.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS: Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES: UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/ qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. The name of each affiliate and analyst employed by that affiliate contributing to this report, if any, follows.

UBS Securities LLC: Gregg Orrill, Ross Fowler, CFA, William Appicelli, CFA.

The Disclaimer relevant to Global Wealth Management clients follows the Global Disclaimer.

Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo. Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab and you would like to access that data please contact your UBS sales representative. UBS Evidence Lab data is available on UBS Neo. The level and types of services provided by Global Research and UBS Evidence Lab to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

When you receive Global Research through a system, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (https://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (https://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (https://www.ubs.com/global/en/legal/privacy/users.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

In certain circumstances (including for example, if you are an academic or a member of the media) you may receive Global Research otherwise than in the capacity of a client of UBS and you understand and agree that (i) the Global Research is provided to you for information purposes only; (ii) for the purposes of receiving it you are not intended to be and will not be treated as a "client" of UBS for any legal or regulatory purpose; (iii) the Global Research must not be relied on or acted upon for any purpose; and (iv) such content is subject to the relevant disclaimers that follow.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. The recipient should carefully read this document in its entirety and not draw inferences or conclusions from the rating alone. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at https://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas

within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

United Kingdom: This material is distributed by UBS AG, London Branch to persons who are eligible counterparties or professional clients. UBS AG, London Branch is authorised by the Prudential Regulation Authority and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. **Europe:** Except as otherwise specified herein, these materials are distributed by UBS Europe SE, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients (as detailed in the Bundesanstalt fur Finanzdienstleistungsaufsicht (BaFin) Rules and according to MIFID) and are only available to such persons. The information does not apply to, and should not be relied upon by, retail clients. UBS Europe SE is authorised by the European Central Bank (ECB) and regulated by the BaFin and the ECB. **Germany, Luxembourg, the Netherlands, Belgium and Ireland:** Where an analyst of UBS Europe SE has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE. In all cases it is distributed by UBS Europe SE and UBS AG, London Branch. **Turkey:** Distributed by UBS AG, London Branch. No information in this document is provided for the purpose of offering, marketing and sale by any means of any capital market instruments and services in the Republic of Turkey. Therefore, this document may not be considered as an offer made or to be made to residents of the Republic of Turkey. UBS AG, London Branch is not licensed by the Turkish Capital Market Board under the provisions of the Capital Market Law (Law No. 6362). Accordingly, neither this document nor any other offering material related to the instruments/services may be utilized in connection with providing any capital market services to persons within the Republic of Turkey without the prior approval of the Capital Market Board. However, according to article 15 (d) (ii) of the Decree No. 32, there is no restriction on the purchase or sale of the securities abroad by residents of the Republic of Turkey. **Poland:** Distributed by UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce regulated by the Polish Financial Supervision Authority. Where an analyst of UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce. **Russia:** Prepared and distributed by UBS Bank (OOO). Should not be construed as an individual Investment Recommendation for the purpose of the Russian Law - Federal Law #39-FZ ON THE SECURITIES MARKET Articles 6.1-6.2.**Switzerland:** Distributed by UBS AG to persons who are institutional investors only. UBS AG is regulated by the Swiss Financial Market Supervisory Authority (FINMA). **Italy:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, Italy Branch. Where an analyst of UBS Europe SE, Italy Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, Italy Branch. **France:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, France Branch. Where an analyst of UBS Europe SE, France Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, France Branch. **Spain:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, Spain Branch. Where an analyst of UBS Europe SE, Spain Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, Spain Branch. **Sweden:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, Sweden Branch. Where an analyst of UBS Europe SE, Sweden Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, Sweden Branch.**South Africa:** Distributed by UBS South Africa (Pty) Limited (Registration No. 1995/011140/07), an authorised user of the JSE and an authorised Financial Services Provider (FSP 7328). **Saudi Arabia:** This document has been issued by UBS AG (and/or any of its subsidiaries, branches or affiliates), a public company limited by shares, incorporated in Switzerland with its registered offices at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH-8001 Zurich. This publication has been approved by UBS Saudi Arabia (a subsidiary of UBS AG), a Saudi closed joint stock company incorporated in the Kingdom of Saudi Arabia under commercial register number 1010257812 having its registered office at Tatweer Towers, P.O. Box 75724, Riyadh 11588, Kingdom of Saudi Arabia. UBS Saudi Arabia is authorized and regulated by the Capital Market Authority to conduct securities business under license number 08113-37. **UAE / Dubai:** The information distributed by UBS AG Dubai Branch is only intended for Professional Clients and/or Market Counterparties, as classified under the DFSA rulebook. No other person should act upon this material/communication. The information is not for further distribution within the United Arab Emirates. UBS AG Dubai Branch is regulated by the DFSA in the DIFC. UBS is not licensed to provide banking services in the UAE by the Central Bank of the UAE, nor is it licensed by the UAE Securities and Commodities Authority. **Israel:** This Material is distributed by UBS AG, London Branch. UBS Securities Israel Ltd is a licensed Investment Marketer that is supervised by the Israel Securities Authority (ISA). UBS AG, London Branch and its affiliates incorporated outside Israel are not licensed under the Israeli Advisory Law. UBS may engage among others in issuance of Financial Assets or in distribution of Financial Assets of other issuers for fees or other benefits. UBS AG, London Branch and its affiliates may prefer various Financial Assets to which they have or may have an Affiliation (as such term is defined under the Israeli Advisory Law). Nothing in this Material should be considered as investment advice under the Israeli Advisory Law. This Material is being issued only to and/or is directed only at persons who are Eligible Clients within the meaning of the Israeli Advisory Law, and this Material must not be furnished to, relied on or acted upon by any other persons. **United States:** Distributed to US persons by either UBS Securities LLC or by UBS Financial Services Inc., subsidiaries of UBS AG; or by a group, subsidiary or affiliate of UBS AG that is not registered as a US broker-dealer (a **'non-US affiliate'**) to major US institutional investors only. UBS Securities LLC or UBS Financial Services Inc. accepts responsibility for the content of a report prepared by another non-US affiliate when distributed to US persons by UBS Securities LLC or UBS Financial Services Inc. All transactions by a US person in the securities mentioned in this report must be effected through UBS Securities LLC or UBS Financial Services Inc., and not through a non-US affiliate. UBS Securities LLC is not acting as a municipal advisor to any municipal entity or obligated person within the meaning of Section 15B of the Securities Exchange Act (the "Municipal Advisor Rule"), and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of the Municipal Advisor Rule. **Canada:** Distributed by UBS Securities Canada Inc., a registered investment dealer in Canada and a Member-Canadian Investor Protection Fund, or by another affiliate of UBS AG that is registered to conduct business in Canada or is otherwise exempt from registration. **Brazil:** Except as otherwise specified herein, this Material is prepared by UBS Brasil Corretora de Câmbio, Títulos e Valores Mobiliários S.A.[1] (UBS Brasil CCTVM) to persons who are eligible investors residing in Brazil, which are considered to be Professional Investors (Investidores Profissionais), as designated by the applicable regulation, mainly the CVM Resolution No. 30 from the 11th of May 2021 (determines the duty to verify the suitability of products, services and transactions with regards to the client´s profile). [1]UBS CCTVM is a subsidiary of UBS BB Servicos de Assessoria Financeira e Participacoes S.A. ("UBS BB"). UBS BB is an association between UBS AG and Banco do Brasil (through its subsidiary BB – Banco de Investimentos S.A.), of which UBS AG is the majority owner and which provides investment banking services and coverage in Brazil, Argentina, Paraguay, Peru and Uruguay. **Hong Kong:** Distributed by UBS Securities Asia Limited. Please contact local licensed persons of UBS Securities Asia Limited in respect of any matters arising from, or in connection with, the analysis or document **Singapore:** Distributed by UBS Securities Pte. Ltd. [Co. Reg. No.: 198500648C] or UBS AG, Singapore Branch. Please contact UBS Securities Pte. Ltd., an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110); or UBS AG, Singapore Branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or document. The recipients of this document represent and warrant that they are accredited and institutional investors as defined in the Securities and Futures Act (Cap. 289). **Japan:** Distributed by UBS Securities Japan Co., Ltd. to professional investors (except as otherwise permitted). Where this report has been prepared by UBS Securities Japan Co., Ltd., UBS Securities Japan Co., Ltd. is the author, publisher and distributor of the report. Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates (**"UBS"**) with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is for your information only; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes: (i) valuation or accounting purposes; (ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or (iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and UBS Global Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS Financial Services Inc. does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS Financial Services Inc. and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit the portfolio manager's ability to participate in certain investment opportunities that otherwise would be consistent with its investment objective and other principal investment strategies. The returns on a portfolio consisting primarily of sustainable investments may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by the portfolio manager, and the investment opportunities available to such portfolios may differ. Companies may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues; there is also no guarantee that any company will meet expectations in connection with corporate responsibility, sustainability, and/or impact performance.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Austria: This publication is not intended to constitute a public offer under Austrian law. It is distributed only for information purposes to clients of UBS Europe SE, Niederlassung Österreich, with place of business at Wächtergasse 1, A-1010 Wien. UBS Europe SE, Niederlassung Österreich is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Austrian Financial Market Authority (Finanzmarktaufsicht, FMA), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Bahrain**: UBS is a Swiss bank not licensed, supervised or regulated in Bahrain by the Central Bank of Bahrain to undertake banking or investment business activities in Bahrain. Therefore, prospects/clients do not have any protection under local banking and investment services laws and regulations. **Brazil**: This report is only intended for Brazilian residents who are directly purchasing or selling securities in the Brazil capital market through a local authorized institution. **Canada**: The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. Under no circumstances is the information contained herein to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada or, alternatively, pursuant to a dealer registration exemption. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon these materials, the information contained herein or the merits of the securities described herein and any representation to the contrary is an offence. In Canada, this publication is distributed by UBS Investment Management Canada Inc. **China**: This report and any offering material such as term sheet, research report, other product or service documentation or any other information (the "Material") sent with this report was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly delete it and inform UBS immediately. This report is prepared by UBS Switzerland AG or its offshore subsidiary or affiliate (collectively as "UBS Offshore"). UBS Offshore is an entity incorporated out of China and is not licensed, supervised or regulated in China to carry out banking or securities business. The recipient should not contact the analysts or UBS Offshore which produced this report for advice as they are not licensed to provide securities investment advice in China. UBS Investment Bank (including Research) has its own wholly independent research and views which at times may vary from the views of UBS Global Wealth Management. The recipient should not use this document or otherwise rely on any of the information contained in this report in making investment decisions and UBS takes no responsibility in this regard. **Czech Republic**: UBS is not a licensed bank in the Czech Republic and thus is not allowed to provide regulated banking or investment services in the Czech Republic. This communication and/or material is distributed for marketing purposes and constitutes a "Commercial Message" under the laws of Czech Republic in relation to banking and/or investment services. Please notify UBS if you do not wish to receive any further correspondence. **Denmark**: This publication is not intended to constitute a public offer under Danish law. It is distributed only for information purposes to clients of UBS Europe SE, Denmark Branch, filial af UBS Europe SE, with place of business at Sankt Annae Plads 13, 1250 Copenhagen, Denmark, registered with the Danish Commerce and Companies Agency, under No. 38 17 24 33. UBS Europe SE, Denmark Branch, filial af UBS Europe SE is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Danish Financial Supervisory Authority (Finanstilsynet), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Egypt**: Securities or other investment products are not being offered or sold by UBS to the public in Egypt and they have not been and will not be registered with the Egyptian Financial Regulatory Authority (FRA). **France**: This publication is not intended to constitute a public offer under French law, it does not constitute a personal recommendation as it is distributed only for information purposes to clients of UBS (France) S.A., French "société anonyme" with share capital of € 132.975.556, at 69 boulevard Haussmann F-75008 Paris, registered with the "Registre du Commerce et des Sociétés" of Paris under N° B 421 255 670. UBS (France) S.A. is a provider of investment services duly authorized according to the terms of the "Code monétaire et financier", regulated by French banking and financial authorities as the "Autorité de contrôle prudentiel et de résolution" and "Autorité des marchés financiers", to which this publication has not been submitted for approval. **Germany**: This publication is not intended to constitute a public offer under German law. It is distributed only for information purposes to clients of UBS Europe SE, Germany, with place of business at Bockenheimer Landstrasse 2-4, 60306 Frankfurt am Main. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the European Central Bank ("ECB"), and supervised by the ECB, the German Central Bank (Deutsche Bundesbank) and the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), to which this publication has not been submitted for approval. **Hong Kong SAR**: This publication is distributed to clients of UBS AG Hong Kong Branch by UBS AG Hong Kong Branch, a licensed bank under the Hong Kong Banking Ordinance and a registered institution under the Securities and Futures Ordinance. UBS AG Hong Kong Branch is incorporated in Switzerland with limited liability. **India**: Distributed by UBS Securities India Private Ltd. (Corporate Identity Number U67120MH1996PTC097299) 2/F, 2 North Avenue, Maker Maxity, Bandra Kurla Complex, Bandra (East), Mumbai (India) 400051. Phone: +912261556000. It provides brokerage services bearing SEBI Registration Number INZ000259830; merchant banking services bearing SEBI Registration Number: INM000010809 and Research Analyst services bearing SEBI Registration Number: INH000001204. UBS AG, its affiliates or subsidiaries may have debt holdings or positions in the subject Indian company/companies. UBS AG, its affiliates or subsidiaries may have financial interests (e.g. like loan/derivative products, rights to or interests in investments, etc.) in the subject Indian company/companies from time to time. Within the past 12 months, UBS AG, its affiliates or subsidiaries may have received compensation for non-investment banking securities-related services and/or non-securities services from the subject Indian company/companies. The subject company/companies may have been a client/clients of UBS AG, its affiliates or subsidiaries during the 12 months preceding the date of distribution of the research report with respect to investment banking and/or non-investment banking securities-related services and/or non-securities services. With regard to information on associates, please refer to the Annual Report at: https://www.ubs.com/global/en/about_ubs/investor_relations/annualreporting.html. **Indonesia**: This communication and any offering material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons

entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed without the consent of UBS. None of the Material has been registered or filed under the prevailing laws and with any financial or regulatory authority in your jurisdiction. The Material may not have been approved, disapproved or endorsed by or registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including futures contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Israel**: UBS is a premier global financial firm offering wealth management, asset management and investment banking services from its headquarters in Switzerland and its operations in over 50 countries worldwide to individual, corporate and institutional investors. In Israel, UBS Switzerland AG is registered as Foreign Dealer in cooperation with UBS Wealth Management Israel Ltd., a wholly owned UBS subsidiary. UBS Wealth Management Israel Ltd. is a Portfolio Manager licensee which engages also in Investment Marketing and is regulated by the Israel Securities Authority. This publication is intended for information only and is not intended as an offer to buy or solicitation of an offer. Furthermore, this publication is not intended as an investment advice. No action has been, or will be, taken in Israel that would permit an offering of the product(s) mentioned in this document or a distribution of this document to the public in Israel. In particular, this document has not been reviewed or approved by the Israeli Securities Authority. The product(s) mentioned in this document is/are being offered to a limited number of sophisticated investors who qualify as one of the investors listed in the first supplement to the Israeli Securities Law, 5728-1968. This document may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. Anyone who purchases the product(s) mentioned herein shall do so for its own benefit and for its own account and not with the aim or intention of distributing or offering the product(s) to other parties. Anyone who purchases the product(s) shall do so in accordance with its own understanding and discretion and after it has received any relevant financial, legal, business, tax or other advice or opinion required by it in connection with such purchase(s). The word "advice" and/or any of its equivalent terms shall be read and construed in conjunction with the definition of the term "investment marketing" as defined under the Israeli Regulation of Investment Advice, Investment Marketing and Portfolio Management Law. The Swiss laws and regulations require a number of mandatory disclosures to be made in independent financial research reports or recommendations. Pursuant to the Swiss Financial Market Infrastructure Act and the Financial Market Infrastructure Ordinance-FINMA, banks must disclose the percentage of voting rights they hold in companies being researched, if these holdings are equal to or exceed the statutory thresholds. In addition, the Directives on the Independence of Financial Research, issued by the Swiss Bankers Association, mandate a number of disclosures, including the disclosure of potential conflicts of interest, the participation within previous 12 months in any securities issues on behalf of the company being researched, as well as the fact that remuneration paid to the financial analysts is based generally upon the performance of (i) the new issues department or investment banking; or (ii) securities trading performance (including proprietary trading) or sales. **Italy**: This publication is not intended to constitute a public offer under Italian law. It is distributed only for information purposes to clients of UBS Europe SE, Succursale Italia, with place of business at Via del Vecchio Politecnico, 3-20121 Milano. UBS Europe SE, Succursale Italia is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Bank of Italy (Banca d'Italia) and the Italian Financial Markets Supervisory Authority (CONSOB - Commissione Nazionale per le Società e la Borsa), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Jersey**: UBS AG, Jersey Branch, is regulated and authorized by the Jersey Financial Services Commission for the conduct of banking, funds and investment business. Where services are provided from outside Jersey, they will not be covered by the Jersey regulatory regime. UBS AG, Jersey Branch is a branch of UBS AG a public company limited by shares, incorporated in Switzerland whose registered offices are at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH 8001 Zurich. UBS AG, Jersey Branch's principal place of business is 1, IFC Jersey, St Helier, Jersey, JE2 3BX. **Luxembourg**: This publication is not intended to constitute a public offer under Luxembourg law. It is distributed only for information purposes to clients of UBS Europe SE, Luxembourg Branch ("UBS LUX"), R.C.S. Luxembourg n° B209123, with registered office at 33A, Avenue J. F. Kennedy, L-1855 Luxembourg. UBS LUX is a branch of UBS Europe SE, a credit institution constituted under German law in the form of a Societas Europaea (HRB n° 107046), with registered office at Bockenheimer Landstrasse 2-4, D-60306 Frankfurt am Main, Germany, duly authorized by the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht – "BaFin") and subject to the joint prudential supervision of BaFin, the central bank of Germany (Deutsche Bundesbank) and the European Central Bank. UBS LUX is furthermore supervised by the Luxembourg prudential supervisory authority (Commission de Surveillance du Secteur Financier), in its role as host member state authority. This publication has not been submitted for approval to any public supervisory authority. **Malaysia**: This communication and any offering material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Mexico**: This information is distributed by UBS Asesores México, S.A. de C.V. ("UBS Asesores"), an affiliate of UBS Switzerland AG, incorporated as a non-independent investment advisor under the Mexican regulation due to the relation with a Foreign Bank. UBS Asesores is registered under number 30060-001-(14115)-21/06/2016 and subject to the supervision of the Mexican Banking and Securities Commission ("CNBV") exclusively regarding the rendering of (i) portfolio management services, (ii) securities investment advisory services, analysis and issuance of individual investment recommendations, and (iii) anti-money laundering and terrorism financing matters. This UBS publication or any material related thereto is addressed only to Sophisticated or Institutional Investors located in Mexico. Research reports only reflect the views of the analysts responsible for the report. The compensation of the analyst(s) who prepared this report is determined exclusively by research management and senior management of any entity of UBS Group to which such analyst(s) render services. **Nigeria**: The investment products mentioned in this material are not being offered or sold by UBS to the public in Nigeria and they have not been submitted for approval nor registered with the Securities and Exchange Commission of Nigeria. If you are interested in products of this nature, please let us know. The investment products mentioned in this material are not being directed to, and are not being made available for subscription by any persons within Nigeria other than the selected investors to whom the offer materials have been addressed as a private sale or domestic concern within the exemption and meaning of Section 69(2) of the Investments and Securities Act, 2007 (ISA). This material has been provided to you at your specific unsolicited request and for your information only. **Philippines:** This communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. **Portugal**: UBS Switzerland AG is not licensed to conduct banking and financial activities in Portugal nor is UBS Switzerland AG supervised by the portuguese regulators (Bank of Portugal "Banco de Portugal" and Portuguese Securities Exchange Commission "Comissão do Mercado de Valores Mobiliários"). **Qatar**: UBS Qatar LLC is authorized by the Qatar Financial Centre Regulatory Authority, with QFC no. 01169, and has its registered office at 14th Floor, Burj Alfardan Tower, Building 157, Street No. 301, Area No. 69, Al Majdami, Lusail, Qatar. UBS Qatar LLC neither offers any brokerage services nor executes any order with, for or on behalf of its clients. A client order will have to be placed with, and executed by, UBS Switzerland AG in Switzerland or an affiliate of UBS Switzerland AG, that is domiciled outside Qatar. It is in the sole discretion of UBS Switzerland AG in Switzerland or its affiliate to accept or reject an order and UBS Qatar LLC does not have authority to provide a confirmation in this respect. UBS Qatar LLC may however communicate payment orders and investment instructions to UBS Switzerland AG in Switzerland for receipt, acceptance and execution. UBS Qatar LLC is not authorized to act for and on behalf of UBS Switzerland AG or an affiliate of UBS Switzerland AG. This document and any attachments hereto are intended for eligible counterparties and business customers only. **Russia**: This document or information contained therein is for information purposes only and constitutes neither a public nor a private offering, is not an invitation to make offers, to sell, exchange or otherwise transfer any financial instruments in the Russian Federation to or for the benefit of any Russian person or entity and does not constitute an advertisement or offering of securities in the Russian Federation within the meaning of Russian securities laws. The information contained herein is not an "individual investment recommendation" as defined in Federal Law of 22 April 1996 No 39-FZ "On Securities Market" (as amended) and the financial instruments and operations specified herein may not be suitable for your investment profile or your investment goals or expectations. The determination of whether or not such financial instruments and operations are in your interests or are suitable for your investment goals, investment horizon or the acceptable risk level is your responsibility. We assume no liability for any losses connected with making any such operations or investing into any such financial instruments and we do not recommend to use such information as the only source of information for making an investment decision. **Saudi Arabia**: UBS Saudi Arabia is authorised and regulated by the Capital Market Authority to conduct securities business under licence number 08113-37. **Singapore**: Clients of UBS AG Singapore branch are asked to please contact UBS AG Singapore branch, an exempt financial adviser under

the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or report. UBS AG is incorporated in Switzerland with limited liability. UBS AG has a branch registered in Singapore (UEN S98FC5560C). This communication and any offering material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. 2023 Utility Outlook: Potholes Emerging on the Yellow Brick Road

Our Call

In last year's outlook report, we advised investors to, "Jump In! The Water's Fine." This year, the water is a bit chilly. What's changed? A lot! First, following strong outperformance in 2022 (YTD +4% vs. the S&P 500 -15%), the group now trades at a 4% P/E premium (FY1) to the S&P 500 (vs. a ~20% discount in late '21). Second, with the spike in interest rates, utilities flipped from looking cheap relative to rates to expensive. Higher interest rates also increase utility financing costs on top of inflationary pressure on O&M. Lastly, higher energy prices have resulted in bill pressure that puts utility regulatory proceedings under increased scrutiny.

But just as important is what hasn't changed — mostly notably the long runway of capital investment opportunities across the electric, gas, and water space. There continues to be a strong need to replace aging infrastructure and maintain reliable and safe systems, while at the same time working to achieve decarbonization and clean energy goals. These initiatives enjoy support from a broad group of stakeholders, which should prevent excessive backlash to rising utility bills.

All told, our outlook for the sector is not as bullish heading into '23, nor are we outright bearish. And we still believe that the defensive nature of the group holds appeal in an uncertain macroeconomic environment.

High-Quality Bias. Given sector headwinds tied to inflation (O&M) and interest rates, we look to a basket of high-quality utilities where our confidence level on execution is relatively high. While these stocks trade at premium multiples relative to peers, we think the premiums are warranted, and we still see room for outperformance over a 12-18 month period and over a longer-term horizon. We recommend **AEE, CMS, CNP, H-TSE** &**WEC**.

Lastly, we flag renewable pacesetter **NEE**, a laggard in '22, as a highlighted pick for '23. We attribute the YTD underperformance (~800 bps vs. the S&P Utes) largely to the negative impact of rising interest rates on growth equities. That being said, the fundamental backdrop for renewables strengthened in '22, boosted by both high energy prices and the IRA. And NEE is leveraging the company's strong competitive position and expertise in wind/solar/storage to attack other high-TAM verticals such as transmission, water & RNG.

Re-Rating Stories. Using history as a guide, the way to generate meaningful alpha in the utility space over a 12-18 month time horizon is finding re-rating stories. Identifying the next big mover(s) is difficult, as it often includes a change in regulatory environment, which is uncommon and can happen without a lot of warning and/or a change in investor perception. Our top candidates for positive multiple re-rating in 2023 are **ES, ETR, NI, PCG, PEG & PPL.**

Rating Change. We upgrade **FTS** to Equal Weight from Underweight and increase our forward price target to C$59/sh from C$54/sh (blend of P/E multiple & DDM analysis). Rationale: (1) valuation—shares trade at 5-7% P/E multiple discounts vs. high-quality Regulated Electrics on our '23E and '24E EPS compared to in-line multiples at the time

2022 Performance, Valuation & 2023 Outlook

Utilities lived up to their defensive reputation in '22 as the sector far outpaced the S&P 500 (+4% vs. -15%) amidst a period of unusually high economic and geopolitical uncertainties. Heading into '22, utilities were out of favor and trading at historically low levels relative to both interest rates and the broader market. Inflationary pressures that emanated from the global pandemic and were exacerbated by Russia's invasion of Ukraine (Feb. '22) prompted investors to shun longer duration (growth) equities in favor of value stocks such as utilities. U.S. utilities also had an added appeal of virtually no international exposure.

Our outlook for the sector is not as bullish heading into '23, nor are we outright bearish. In terms of valuation, the case for the sector is not as obvious as it was at the end of '22. As depicted in Exhibits 1 and 2, the sector screens expensive relative to interest rates and fairly valued relative to the S&P 500 on FY1 P/E. Turning to fundamentals, there is no real change to the strong, long-term capital investment growth narrative for the sector. For electric utilities, the parallel trends of decarbonization and electrification are resulting in substantial capex needs (renewables, transmission, EV-related infrastructure, etc.). For electric, gas, and water utilities, there continues to be a long runway of replacement/resiliency spend. That being said, risks to the near-term EPS outlooks are emerging, particularly on the regulatory front.

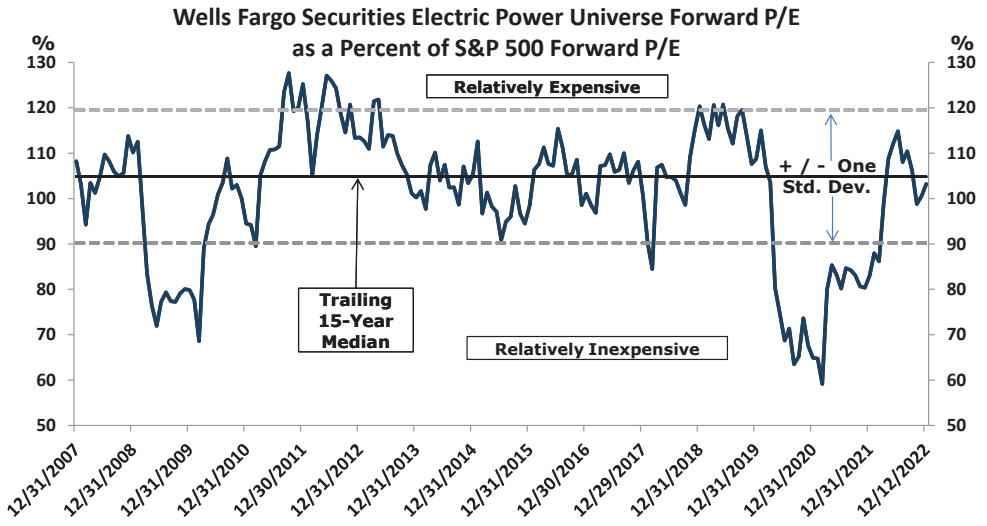

Exhibit 1: Utilities Screen Modestly Expensive to Interest Rates

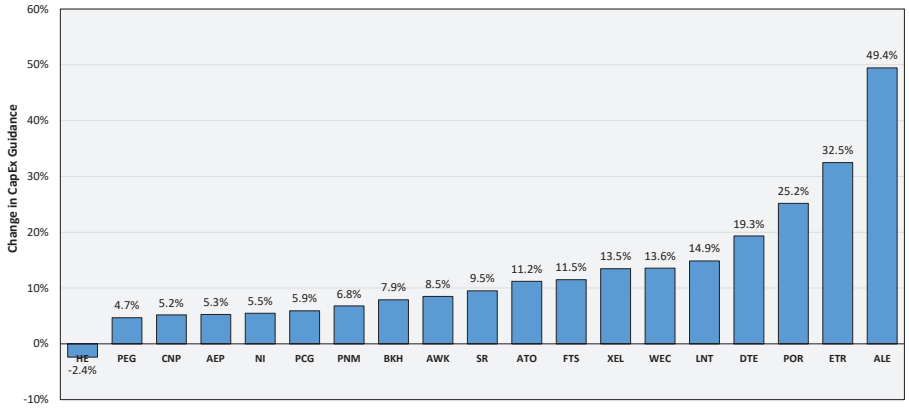
Exhibit 2: Utilities Look Fairly Valued on Relative P/E

Source: Wells Fargo Securities, LLC and FactSet

Regulation—Watch Out for Potholes

Of particular concern is a potential deterioration in regulation due to growing customer bill pressures. The 2010s were characterized by benign overall bill increases as the impact of declining natural gas prices on the energy portion of electric and natural gas bills substantially offset base rate increases. The math changed in 2022 as natural gas prices increased from <$4/mmBtu at the end of '21 to $5-10/mmBtu during '22 resulting in overall bill increases of 10-50% for many electric and gas utilities (vs. inflation of 7-8%). While regulators have historically allowed for full recovery of energy costs (a pass-through for utilities), the resulting bill impact can put pressure on commissions to seek other ways to save customers money.



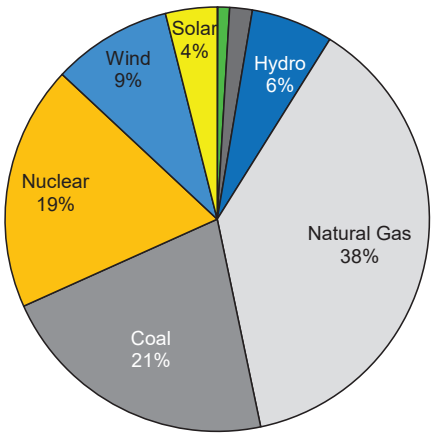
Our current view is that the (high?) majority of regulatory outcomes over the next 12-18 months will be constructive. That said, it can be difficult to predict where the potholes will emerge, prompting us to consider *all* rate cases to carry an elevated level of risk in the existing economic backdrop. We flag recent events In Nova Scotia and Michigan as examples of the "hard to predict" nature of regulatory risk. In Nova Scotia, the government, to everyone's surprise, proposed legislation that caps Nova Scotia Power's electric rate increases through '24, circumventing the regulators and causing EMA to scale back planned capex. Separately, the Michigan PSC, which is widely considered to be a top-quartile regulatory body, authorized DTE Electric an annual revenue increase that represented only 20% of the ALJ's Proposal for Decision and <10% of DTE's original ask (base rate case outcomes typically result in 40-60% of a company's original revenue request).

Rate Base Growth—No Signs of a Slowdown

Judging by recent 5-yr capex refreshes (Exhibit 3) and the messaging out of the November EEI conference, customer bill concerns do not appear to be having an impact on utility capital investment plans (at least not yet). For electric utilities, the theme remains largely the same as the parallel trends of decarbonization and electrification are creating substantial investment opportunities across the entirety of the infrastructure (generation, transmission & distribution). In addition, the provisions of the 2022 Inflation Reduction Act (IRA), which include renewable tax credit extensions and new tax credits for stand-alone energy storage and clean hydrogen, will likely accelerate the path to net zero carbon. That being said, decarbonization (and electrification) remain multi-decade trends. Below, we discuss the three key themes driving the strong rate base growth outlook for the electric utility industry (decarbonization, electrification, and resiliency).

This document is for mweisenburger@nisource.com and should not be distributed further.

Exhibit 3: Recent Updates to 3-5 Year Capex Plans Show Positive Trend



Note: Figure reflects changes in 3-5 year capex guidance vs. Q2 updates (i.e. same years compared) except those that rolled forward capex plans including AEP, ALE, ATO, AWK, DTE, ETR, LNT, PEG POR, SR & XEL; LNT's 22-25 capex guidance of $6.1B is inclusive of $1.3B of tax equity - we exclude the tax equity for comparison purposes.

Source: Company filings and Wells Fargo Securities, LLC estimates

Decarbonization—the transformation of the U.S. generation fleet remains in the early stages as carbon-free resources (wind, solar, nuclear & hydro) account for <40% of electricity production (Exhibit 4). Over time, we think wind/solar market share will increase to more than 60% (vs. 15% now), with the balance made up with dispatchable baseload generation. The composition of the dispatchable portion remains unclear. Along with the nation's existing ~100 GW nuclear fleet, which gained critical financial support in the IRA, other options include long-duration energy storage solutions (including clean hydrogen) and advanced nuclear (including SMRs).

Of course, the impacts of decarbonization are not limited to generation investment. The shift away from centralized power generation to a more decentralized model (remote utility scale renewables) will require substantial new transmission investment. For example, the Midcontinent ISO, which covers a large swath of the central U.S. (high renewable penetration), is in the midst of a Long Range Transmission Plan that could result in up to $100B of new transmission investment by 2040 (Tranche 1 awards totaled $10B). We expect this theme will play out in other regions as renewables continue to proliferate.

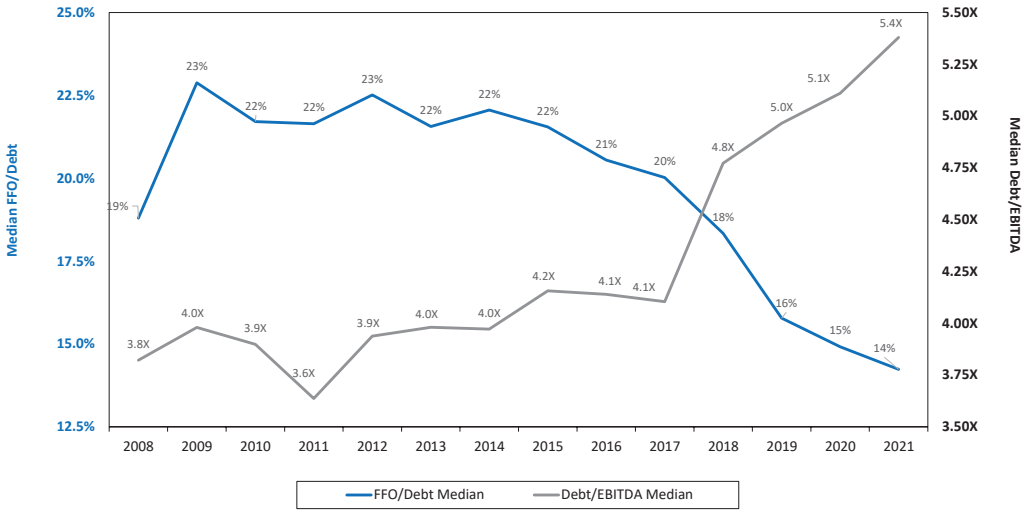
Exhibit 4: Carbon-Free Resources <40% of Electricity Production, 2021 Mix

Source: EIA and Wells Fargo Securities, LLC estimates

This document is for mweisenburger@nisource.com and should not be distributed further.

Electrification—In reality, electrification is simply a subset of decarbonization. In order to fully decarbonize the U.S. economy, the thought process is that the most cost-effective path is for carbon-free electricity to replace fossil fuel-based energy sources used in other sectors (i.e., transportation, industrial processes, space heating, etc.). What are the implications of electrification for the electric sector? First and foremost, it is simply more demand for the core product, which, in turn, means more generation, transmission, and distribution investment will be needed. Full decarbonization could have a profound impact on the electric sector. In a recent conversation with management from Hydro-One (an Ontario T&D utility), they indicated that achieving Canada's ambitious 2035 zero-carbon goal could require effectively ***doubling or tripling the size of the existing grid***. Similarly, EIX projects that achieving CA's 2045 carbon-neutral goal will result in a 60% increase in electricity demand and require a "reimagining" of the grid in order to support the change in generation and consumption patterns. Second, electric utilities are increasingly viewed as catalyzing agents that could help accelerate electrification, while offering new profit-making opportunities. Examples include rate-basing EV charging infrastructure and customer incentive programs for EVs, heat pumps, electric appliances, etc.

Resiliency—while decarbonization and electrification dominate the electric capex narrative, resiliency continues to be a growing theme, driven by (a) customer reliability needs in an increasingly electrified world and (b) climate changes that may be resulting in more severe weather events (hurricane, wildfire, and severe storm events). Companies with notable/discrete grid hardening initiatives include CNP, DTE, EIX, ETR, LNT, NEE, PCG, and SRE.



Balance Sheets Continue to Weaken

The overall credit profile for utilities is of modest concern, given the rising interest rate environment. The credit metrics for the group have weakened over the past several years, as management teams have shown a willingness to employ higher leverage in response to low interest rates. In addition, the 2017 Tax Jobs & Cuts Act, which eliminated the 50% bonus depreciation deduction for utilities, reduced FFO/Debt ratios by 150-300 bps, with many utilities opting not to substantially mitigate the impact with new equity. Exhibit 5 shows the average FFO/Debt and Debt/EBITDA ratios during the period 2008-2021.

Our perception is that equity investors are far more focused on credit metrics today than they were 10-20 years ago. Indeed, the relative valuation multiples seem to bear that out, as regulated utilities with FFO/Debt ratings >15% tend to command higher P/E multiples (Exhibit 6). And for companies with FFO/Debt ratios of less than 15%, equity needs command significant investor attention and concern, even if the expected annual needs (relative to market capitalizations) are not dissimilar to the stronger balance sheet names. Should the multiple disparities persist and/or equity valuations for the group further decline, we would not be surprised to see regulated utilities prune "less" core assets and/or evaluate sales of minority interests in operating utilities similar to DUK (Duke Energy Indiana) and FE (FirstEnergy Transmission).

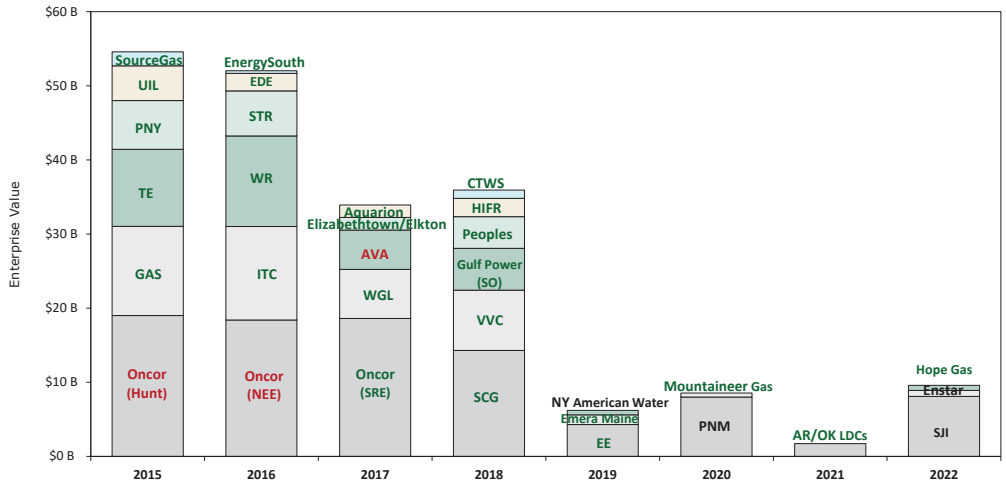
M&A—It Makes Sense, but …



We have been playfully predicting the return of the merger of equals or low premium deals in our industry outlooks for the past several years. One year we will be right. That being said, if there ever was a backdrop that called for the reemergence of the MOE, arguably, it is now…

Regulated utility M&A in the 2010s was characterized by high-premium/high-multiple cash deals for SMID caps in which the acquirer leaned on low-cost debt in order to maximize EPS accretion. In our view, that ship has largely sailed in the wake of tightening credit markets and the sector's weaker overall credit profiles. As for larger low-premium deals, strong organic growth prospects across the board have justifiably weakened the business case for such combinations. However, growing regulatory risks and tighter capital markets could prompt companies to critically evaluate utility M&A. Benefits

This document is for mweisenburger@nisource.com and should not be distributed further.

include the potential for lengthy base rate case stay-outs driven by synergies, advantages related to scale (equipment costs, financing costs, etc.), and, to a lesser extent, regulatory/geographic diversity.

Exhibit 7: Utility Consolidation Slowed Post-2018

Note: Utility M&A deals are listed in the year they were announced and are categorized by completed (green), pending (black) and terminated (red) deals WR's EV is based on the initial deal, which was later revised to be a merger of equals.

Sub-Sector Review & Outlook: Gas & Water

During 2022, the Gas LDCs and Regulated Electrics each provided a median total return of 5%, while the Water Utilities were down 6%.

- The **Water** premium of 70-75% to Regulated Electrics represents a decrease from ~95% at YE'21. However, in early June '22, it had shrunk to 40-45% as rising interest rates affected high-P/E multiple sectors. But the lower risk nature of the Waters, including limited ratepayer bill pressure from rising commodity prices, seemingly led to 2H'22 relative outperformance. Looking toward '23, we see room for further compression as our generic DDM, which attempts to capture the long runway of growth opportunities associated with infrastructure investment needs and municipal consolidation trends, supports a premium closer to 30%. We also keep in mind that the waters arguably benefit from scarcity considerations (ESG/water funds).
- The **Gas LDCs** continue to trade at 0-5% discounts to Regulated Electrics, which we consider to be fair. The group offers similar near- to intermediate-term EPS growth prospects to Regulated Electrics with arguably lower regulatory risk, given the critical nature of the infrastructure (i.e., safety). That said, absent an acquisition premium, a modest discount is reasonable, in our view, as the electrics offer a more direct way to play clean energy/electrification trends and certain states are looking to discourage gas use.

Both the water and gas groups are small-cap heavy, which put them on our radar for potential near-term challenges as the small-cap universe (electrics included) tends to lack the same degree of flexibility to manage the aforementioned unexpected macro headwinds than their mid- and large-cap brethren often do.

Due, in part, to our higher confidence on execution from mid-caps **ATO** and **NI**, those are our favorite gas utilities in the group, and we favor NI between the two on valuation.

In the water arena, **WTRG** remains our lone Overweight rating, reflecting our overall valuation concerns with the sub-sector. While the only "near-term" catalyst we foresee is the (hopeful) 1H'23 PA approval of the DELCORA acquisition, we do take solace in the fact that WTRG has indicated that investors will not be surprised with the '23 guidance initiation event in January (i.e., 5-7% EPS CAGR).

37.5% of companies covered by Wells Fargo Securities, LLC Equity Research are rated Equal Weight.
9.0% of companies covered by Wells Fargo Securities, LLC Equity Research are rated Underweight.
Wells Fargo Securities, LLC has provided investment banking services for 35.6% of its Equity Research Overweight-rated companies.
Wells Fargo Securities, LLC has provided investment banking services for 32.4% of its Equity Research Equal Weight-rated companies.
Wells Fargo Securities, LLC has provided investment banking services for 34.6% of its Equity Research Underweight-rated companies.

Important Disclosure for U.S. Clients

This report was prepared by Wells Fargo Securities Global Research Department ("WFS Research") personnel associated with Wells Fargo Securities, LLC ("Wells Fargo Securities").

WFS Research may, from time to time, provide clients with short-term trading views in its research reports regarding subject companies on which Wells Fargo Securities currently has equity research coverage. A short-term trading view offers a view on how the market price of a subject company's common equity may trend in absolute terms during the 30 days following the date of the short-term trading view. A short-term trading view on a subject company's common equity does not impact our fundamental investment rating or price target for that company, which reflect our view of how the subject company's common equity may perform over a one-year period. A short-term trading view may reach a different conclusion than the firm's fundamental investment rating and price target for a subject company and, therefore, short-term trading views could result in short-term price movements that are contrary to our fundamental investment rating and price target. Short-term trading views are not ratings and the firm does not intend, nor undertakes any obligation, to maintain, update or close out short-term trading views. Short-term trading views may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any short-term trading views discussed in WFS Research reports.

Important Disclosure for International Clients

United Kingdom – The securities and related financial instruments described herein may not be eligible for sale in all jurisdictions or to certain categories of investors. For recipients in the United Kingdom, this report is distributed by Wells Fargo Securities International Limited ("WFSIL"). WFSIL is a UK incorporated investment firm authorised and regulated by the Financial Conduct Authority. For the purposes of Section 21 of the UK Financial Services and Markets Act 2000 (the "Act"), the content of this report has been approved by WFSIL, an authorised person under the Act. WFSIL does not deal with retail clients as defined in the Directive 2014/65/EU ("MiFID2"). The FCA rules made under the Financial Services and Markets Act 2000 for the protection of retail clients will therefore not apply, nor will the Financial Services Compensation Scheme be available. This report is not intended for, and should not be relied upon by, retail clients.

EEA – The securities and related financial instruments described herein may not be eligible for sale in all jurisdictions or to certain categories of investors. For recipients in the EEA, this report is distributed by WFSIL or Wells Fargo Securities Europe S.A. ("WFSE"). WFSE is a French incorporated investment firm authorized and regulated by the Autorité de contrôle prudentiel et de résolution and the Autorité des marchés financiers. WFSE does not deal with retail clients as defined in the Directive 2014/65/EU ("MiFID2"). This report is not intended for, and should not be relied upon by, retail clients.

Australia – Wells Fargo Securities, LLC and Wells Fargo Securities International Limited are exempt from the requirements to hold an Australian financial services license in respect of the financial services they provide to wholesale clients in Australia. Wells Fargo Securities, LLC is regulated under the laws of the United States and Wells Fargo Securities International Limited is regulated under laws of the United Kingdom. All such laws differ from Australian laws. Any offer or documentation provided to Australian recipients by Wells Fargo Securities, LLC or Wells Fargo Securities International Limited in the course of providing the financial services will be prepared in accordance with the laws of the United States or United Kingdom and not Australian laws.

This document is for mweisenburger@nisource.com and should not be distributed further.

Canada – This report is distributed in Canada by Wells Fargo Securities Canada, Ltd., a registered investment dealer in Canada and member of the Investment Industry Regulatory Organization of Canada (IIROC) and Canadian Investor Protection Fund (CIPF). Wells Fargo Securities, LLC's research analysts may participate in company events such as site visits but are generally prohibited from accepting payment or reimbursement by the subject companies for associated expenses unless pre-authorized by members of Research Management.

China – Strictly Private and Confidential. For the sole use of the recipient only. Not to be copied or redistributed within the People's Republic of China.

Brazil - This report was not created for distribution to investors resident in Brazil or to the Brazilian public in general. Wells Fargo Securities, LLC is a broker-dealer registered in United States of America with and regulated by the U.S. Securities and Exchange Commission. Wells Fargo Securities, LLC is not registered in Brazil and its products, including this report and the securities mentioned in this report, have not been and will not be publicly issued, placed, distributed, offered or negotiated in the Brazilian capital markets, and, as a result, have not been and will not be registered with the Brazilian Securities Commission (Comissão de Valores Mobiliários, the CVM). The offer of Wells Fargo Securities, LLC's products, including this report and any securities mentioned in this report, is intended only for residents in the countries in which Wells Fargo Securities, LLC is authorized to operate.

About Wells Fargo Securities

Wells Fargo Securities is the trade name for the capital markets and investment banking services of Wells Fargo & Company and its subsidiaries, including but not limited to Wells Fargo Securities, LLC, a U.S. broker-dealer registered with the U.S. Securities and Exchange Commission and a member of NYSE, FINRA, NFA and SIPC, Wells Fargo Prime Services, LLC, a member of FINRA, NFA and SIPC, Wells Fargo Securities Canada, Ltd., a member of IIROC and CIPF, Wells Fargo Bank, N.A. and Wells Fargo Securities International Limited, authorized and regulated by the Financial Conduct Authority.

This report is for your information only and is not an offer to sell, or a solicitation of an offer to buy, the securities or instruments named or described in the report. This report, including any ratings it contains, should not be considered a recommendation tailored to a particular investor with respect to (i) the security or securities or (ii) any investment strategy or strategies discussed in the report. Interested parties are advised to contact the entity with which they deal, or the entity that provided this report to them, if they desire further information or they wish to effect transactions in the securities discussed in this report. WELLS FARGO

Price Target Change — November 7, 2022

Natural Gas LDCs

NiSource Inc. (NI)

NI: Analyst Update Falls Short of Expectations; but Share Weakness Offers Opportunity

Our Call

While NI's 6-8% annual EPS growth target through '27 (off '21A) is a solid growth rate among electric/gas peers, it is disappointing in the context of the pre-existing 7-9% target through '24; if investors relied on the 7-9%, then the implication for growth in '25-27 is 5-7%. That falls short of expectations in light of previous mgmt. comments around seeking to extend the robust growth combined with the strategic review.

In response, shares fell 5.9% on 11/7 (vs. S&P Utilities -1.9%) and now trade at 4-5% P/E discounts to peers. We think this represents an attractive entry point considering NI's generally constructive regulatory treatment, ample investment opportunities, and no near-term equity needs. That said, given a somewhat disappointing update following a thorough business/strategic review, we think mgmt. is back in a position of needing to regain investors' confidence.

What Happened. The modestly disappointing growth update appears to reflect a more cautious approach to capital investments by NI, which now expects an 8-10% rate base CAGR (thru '27) versus the prior 10-12% (thru '24). Mgmt. indicated that the change was appropriate in consideration of affordability challenges and higher financing costs. Aside from the growth update, mgmt. announced plans to explore the sale of an interest in NIPSCO (electric and gas) up to a 19.9%. We view this as an efficient financing source, but note that the strategic option that was more in line with investor expectations was a sale of one of the LDCs; we reserve final judgement until an actual transaction is announced.

EPS Outlook & Thesis. We worked the various new disclosures and recent rate case updates through our model. There are no change to our '22E & '23E EPS of $1.45 & $1.55; we lower our '24E & '25E to/from $1.66/1.72 & $1.78/1.82, maintain our '26E of $1.90, and initiate '27E at $2.02. With shares trading at 4-5% P/E discounts to gas/electric peers, we reiterate our Overweight rating. We think NI merits a modest premium considering the 6-8% EPS growth rate, solid credit metrics (we model in the 15-16% range including an equity sale in NIPSCO) and generally constructive regulatory treatment, though we note that it may take some time and execution for shares to re-rate following today's update. We lower our price target to $28/sh (16.8x on our '24E EPS of $1.66) from $31/sh, reflecting a slightly lower '24E EPS and lower peer group multiple.

Investment Thesis, Valuation and Risks

NiSource Inc. (NI)

Investment Thesis

We rate shares Overweight, as we do not think NI's robust long-term infrastructure growth opportunities and supportive regulatory treatment are properly reflected in the current share price.

Target Price Valuation for NI: $28.00 from $31.00

Our $28/sh price target is based on a P/E multiple analysis (16.8x, a 0-5% premium to the 2023 blended gas/electric peer group multiple of ~16.5x, on our '24E EPS).

Risks to Our Price Target and Rating for NI

Risks include lower-than-expected sales growth, unfavorable regulatory developments, unexpected cost pressures, and incidents on the gas system, which could result in shareholder liabilities.

Important Disclosure for U.S. Clients

This report was prepared by Wells Fargo Securities Global Research Department ("WFS Research") personnel associated with Wells Fargo Securities, LLC ("Wells Fargo Securities").

WFS Research may, from time to time, provide clients with short-term trading views in its research reports regarding subject companies on which Wells Fargo Securities currently has equity research coverage. A short-term trading view offers a view on how the market price of a subject company's common equity may trend in absolute terms during the 30 days following the date of the short-term trading view. A short-term trading view on a subject company's common equity does not impact our fundamental investment rating or price target for that company, which reflect our view of how the subject company's common equity may perform over a one-year period. A short-term trading view may reach a different conclusion than the firm's fundamental investment rating and price target for a subject company and, therefore, short-term trading views could result in short-term price movements that are contrary to our fundamental investment rating and price target. Short-term trading views are not ratings and the firm does not intend, nor undertakes any obligation, to maintain, update or close out short-term trading views. Short-term trading views may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any short-term trading views discussed in WFS Research reports.

ARGUS

NYSE: NI

NISOURCE INC

NiSource Inc. is an energy holding company whose subsidiaries are fully regulated natural gas and electric utility companies serving nearly 4 million natural gas customers and 500,000 electric customers in six states. NiSource's principal subsidiaries include Columbia Gas, a natural gas distribution holding company; and NIPSCO, a regulated gas and electric company. NiSource derives substantially all of its revenues and earnings from the operating results of these rate-regulated utilities. The company has approximately 7,500 employees. NI shares are a component of the S&P 500.

Analyst's Notes

Analysis by David Coleman, March 3, 2023

ARGUS RATING: BUY

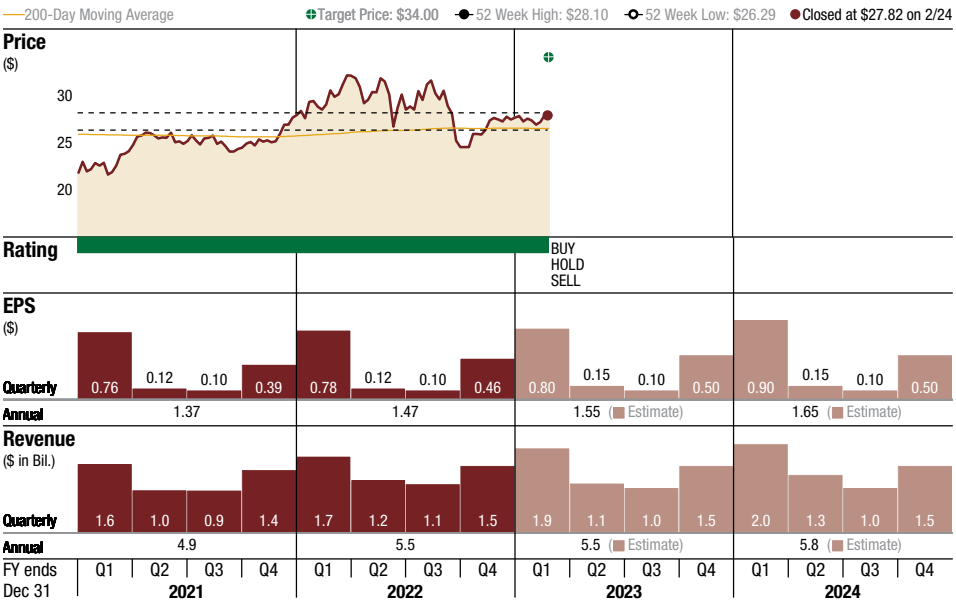
- Maintaining BUY
- NiSource recently posted above-consensus 4Q22 EPS and raised its 2023 guidance.
- It also boosted its dividend by 6% to an annualized $1.00. The current yield is about 3.7%.
- We are maintaining our 2023 EPS estimate and initiating a 2024 EPS estimate.
- The company is pursuing the sale of a minority stake in its NIPSCO utility in order to strengthen the balance sheet.

INVESTMENT THESIS

Our rating on NiSource Inc. (NYSE: NI) is BUY based on valuation and historical earnings performance. Focusing on its regulated electric and gas utilities, NiSource recently completed a corporate restructuring that resulted in the spinoff of its nonregulated pipeline group. The company keeps a tight rein on operating expenses as well as capital spending. Our target price is $34.

We note that NiSource could become a buyout target, as larger utilities and private equity firms pursue smaller utilities because of their stable earnings growth and above-average dividend yields. The company has also allocated significant capital to green energy generation.

RECENT DEVELOPMENTS



NI shares have outperformed over the past quarter, falling fractionally while the S&P 500 has fallen 2%. They have also outperformed the broad market over the past year but have underperformed over the past five years.

NiSource reported 4Q22 results on February 22. The company posted adjusted net income of $221 million or $0.50 per share, up from $166.7 million or $0.39 per share a year earlier. EPS beat the consensus forecast of $0.48. Revenue rose to $1.7 billion.

Full-year adjusted net income rose to $648.2 million or $1.47 per share from $571.2

Market Data

Pricing reflects previous trading week's closing price.

Argus Recommendations

Twelve Month Rating	SELL	HOLD	**BUY**
Five Year Rating	SELL	HOLD	**BUY**
Sector Rating	Under Weight	**Market Weight**	Over Weight

Argus assigns a 12-month BUY, HOLD, or SELL rating to each stock under coverage.

- BUY-rated stocks are expected to outperform the market (the benchmark S&P 500 Index) on a risk-adjusted basis over the next year.
- HOLD-rated stocks are expected to perform in line with the market.
- SELL-rated stocks are expected to underperform the market on a risk-adjusted basis.

The distribution of ratings across Argus' entire company universe is: 70% Buy, 30% Hold, 0% Sell.

Analyst's Notes...Continued

million or $1.37 per share in 2021. Revenue rose 19% to $5.85 billion.

Along with the results, management raised its 2023 adjusted EPS guidance to $1.54-$1.60 from $1.50-$1.57. It projects capex of $3.3-$3.6 billion in 2023, $2.6-$2.9 billion in 2024, and a total of $15 billion in 2023-2027. The company expects to reduce greenhouse gas emissions by 90% by 2030 and to be coal-free by 2028.

EARNINGS & GROWTH ANALYSIS

NiSource has two segments: Gas Distribution Operations (74% of revenue) and Electric Operations (26%). In 4Q, Gas Distribution operating revenue rose 24.9% to $1.26 million, while Electric Operations revenue increased 9% to $447.8 million.

In the Electric Operations segment, on September 19, operating subsidiary Northern Indiana Public Service Co. (NIPSCO) filed it first electric case since 2018. The company is requesting $291.8 million to support renewable generation and associated transmission projects, grid modernization, and customer-centric improvements. The new rates would take effect in September 2023, with incremental new charges applied in 2024. The company has also begun construction on the Indiana Crossroads II Wind project, which is expected to enter service in 2023. The Indiana Crossroads Solar and Dunns Bridge Solar I projects are scheduled to enter service in the first half of 2023.

In Gas Distribution Operations, the company has had rate case settlements approved in Ohio, Pennsylvania, and Maryland.

We are maintaining our 2023 adjusted EPS estimate of $1.55 and initiating a 2024 forecast of $1.65.

NiSource relies on its utility infrastructure programs for earnings and dividend growth. The company's regulated gas and electric segments are investing in pipelines and in electric transmission projects as well as in distribution modernization programs, and should continue to benefit from favorable regulation.

FINANCIAL STRENGTH & DIVIDENDS

NiSource has improved its balance sheet by selling noncore assets, recalibrating capital expenditures, and carefully managing operating expenses and working capital. As part of this effort, it is also planning to sell a minority stake in its NIPSCO utility.

Our financial strength rating on NiSource is Medium. The company receives average scores on our main financial strength criteria of debt levels, fixed-cost coverage, profitability, earnings quality, and cash generation. The company has investment-grade ratings from Moody's Baa2/stable, and Standard & Poor's BBB+/stable, both with a stable outlook.

The company had cash of $35.8 million at the end of 2022 and net available liquidity of $1.56 billion. Debt totaled $9.6 billion and accounted for 58.9% of total capitalization.

The company expects to make capital investments of approximately $15 billion through 2027.

In February 2023, NiSource raised its quarterly dividend by 6%

Analyst's Notes...Continued

to $0.25, or $1.00 annually, for a yield of about 3.7%. We think the dividend is safe and likely to grow modestly over time. Our dividend estimates are $1.00 for 2023 and $1.04 for 2024.

MANAGEMENT & RISKS

Lloyd Yates succeeded Joseph Hamrock as the company's president and CEO on February 14, 2022. Donald E. Brown is the CFO. The chairman is Kevin T. Kabat, the former CEO of Fifth Third Bancorp. The COO is Pablo Vegas.

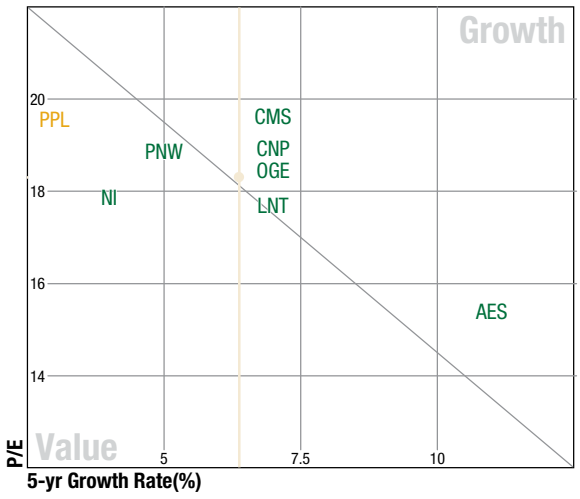
Management is committed to electric and gas service expansion strategies in the company's regulated service territories, and to the expansion of its gas transmission and storage business. We think the company's platform for a return to growth is solid, and are confident in management's ability to provide shareholders with increased value over the long term.

Key risks for stocks in our electric utility universe include fluctuations in interest rates and commodity prices, the effect of adverse weather on revenue, regulatory issues (especially involving construction cost recovery), and potential environmental and safety liabilities. In addition, the capital-intensive nature of the utility industry creates ongoing liquidity risk that must be actively managed by each company.

COMPANY DESCRIPTION

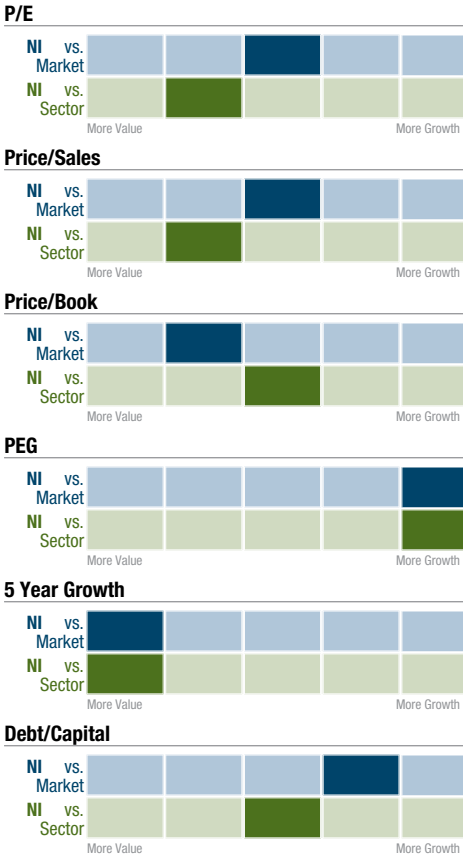
NiSource Inc. is an energy holding company whose subsidiaries are fully regulated natural gas and electric utility companies serving nearly 4 million natural gas customers and 500,000 electric customers in six states. NiSource's principal subsidiaries include Columbia Gas, a natural gas distribution holding company; and NIPSCO, a regulated gas and electric company. NiSource derives substantially all of its revenues and earnings from the operating results of these rate-regulated utilities. The company has approximately 7,500 employees. NI shares are a component of the S&P 500.

VALUATION



We think that NI shares are attractively valued at current prices near $27. On the fundamentals, the shares trade at 18-times our 2023 EPS estimate, above the average multiple of 16 for comparable electric and gas utilities. They are also trading at a price/book multiple of 1.9, slightly below the peer average of 2.0. The price/cash flow ratio is 7.9, below the peer average of 10. The dividend yield of about 3.7% is near the industry average. We are reiterating our BUY rating on NI with a 12-month target price of $34.

On March 3, BUY-rated NI closed at $27.70, up $0.43.



Peer & Industry Analysis

The graphics in this section are designed to allow investors to compare NI versus its industry peers, the broader sector, and the market as a whole, as defined by the Argus Universe of Coverage.

- **The scatterplot shows how NI stacks up versus its peers on two key characteristics: long-term growth and value. In general, companies in the lower left-hand corner are more value-oriented, while those in the upper right-hand corner are more growth-oriented.**
- **The table builds on the scatterplot by displaying more financial information.**
- **The bar charts on the right take the analysis two steps further, by broadening the comparison groups into the sector level and the market as a whole. This tool is designed to help investors understand how NI might fit into or modify a diversified portfolio.**

About Argus

Argus Research, founded by Economist Harold Dorsey in 1934, has built a top-down, fundamental system that is used by Argus analysts. This six-point system includes Industry Analysis, Growth Analysis, Financial Strength Analysis, Management Assessment, Risk Analysis and Valuation Analysis.

Utilizing forecasts from Argus' Economist, the Industry Analysis identifies industries expected to perform well over the next one-to-two years.

The Growth Analysis generates proprietary estimates for companies under coverage.

In the Financial Strength Analysis, analysts study ratios to understand profitability, liquidity and capital structure.

During the Management Assessment, analysts meet with and familiarize themselves with the processes of corporate management teams.

Quantitative trends and qualitative threats are assessed under the Risk Analysis.

And finally, Argus' Valuation Analysis model integrates a historical ratio matrix, discounted cash flow modeling, and peer comparison.

THE ARGUS RESEARCH RATING SYSTEM

Argus uses three ratings for stocks: BUY, HOLD, and SELL. Stocks are rated relative to a benchmark, the S&P 500.

- A BUY-rated stock is expected to outperform the S&P 500 on a risk-adjusted basis over a 12-month period. To make this determination, Argus Analysts set target prices, use beta as the measure of risk, and compare expected risk-adjusted stock returns to the S&P 500 forecasts set by the Argus Market Strategist.
- A HOLD-rated stock is expected to perform in line with the S&P 500.
- A SELL-rated stock is expected to underperform the S&P 500.

NI-NYSE	Rating	Price: Mar-13	Target	Total Rtn
	Outperform	$27.33	$31.00	17%

NIPSCO Settlement Reached - Key Execution Amidst Macro Uncertainty

Bottom Line:

NI and certain parties (including the Office of Utility Consumer Counsel) filed a comprehensive settlement in the NIPSCO electric rate case. The settlement proposes a revenue increase of $291.8mm, with a 9.8% ROE and a 51.63% equity ratio. We see the settlement as a positive de-risking event if approved as filed. NIPSCO anticipates a final order on the settlement agreement by August 23, 2023. **We reiterate our Outperform rating and our $31 price target.**

Key Points

On March 10, NI and other key parties (including the Office of Utility Consumer Counsel) entered into a comprehensive settlement in its NIPSCO electric rate case. The company anticipates an order from the IURC by August 23, 2023, with new rates effective as of September 1, 2023.

The settlement proposes a revenue increase of $291.8mm compared with the company's original request of ~$395mm. The rate-making parameters include a 9.80% ROE and a 51.63% equity ratio.

The rate change would be implemented in at least two steps. The first step would come shortly after an IURC order with balances subject to refund through the June 30, 2023, verification period. The second step would be expected on March 1, 2024, utilizing balances through December 31, 2023. Additionally, there could be an interim increase between the steps if the Dunn's Bridge I or Indiana Crossroads Solar projects are not in service by June 30, 2023.

Opposing parties have until March 31, 2023, to file any opposition against the proposed settlement.

If approved as filed, it would represent another significant regulatory item the company has been able to settle and evidence of continued execution from NI's management team.

NI has been one of the best performers in the group year-to-date outperforming peers by ~8.1% which includes ~5.6% of outperformance over the past month. **However, we continue to view shares of NI favorably especially given ongoing macroeconomic uncertainty as NI offers balance sheet cushion and a quiet regulatory calendar with above-average growth at an attractive ~1% discount to the group on 2025 P/E.**

Accordingly, NI remains a key part of our BMO barbell. We reiterate our Outperform rating and our $31 price target.

IMPORTANT DISCLOSURES

Analyst's Certification

I, James M. Thalacker, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Analysts employed by BMO Nesbitt Burns Inc. and/or BMO Capital Markets Limited are not registered as research analysts with FINRA. These analysts may not be associated persons of BMO Capital Markets Corp. and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Company Specific Disclosures

Disclosure 9B: BMO Capital Markets makes a market in NiSource Inc in United States.

Methodology and Risks to Target Price/Valuation for NiSource Inc (NI-NYSE)

Methodology: Our target price is the product of a P/E-based sum-of-the-parts (SOTP) analysis of the company's primary regulated operating companies. We utilize a regulated-group average multiple based on 2025E EPS as our initial basis for valuation and then make adjustments specific to each jurisdiction to reflect our current view of the fundamental outlook.

Risks: NI's regulated profile exposes the company to business risk including but not limited to federal and state regulatory risk, federal and state political risk, environmental policy, interest rate risk, access to capital markets, construction risk, changes in customer demand trends, changes in customer affordability, extreme weather, natural disaster, and equipment failure.

General Disclaimer

"BMO Capital Markets" is a trade name used by BMO Financial Group for the wholesale banking businesses of Bank of Montreal, BMO Harris Bank N.A. (member FDIC), Bank of Montreal Europe p.l.c, and Bank of Montreal (China) Co. Ltd, the institutional broker dealer business of BMO Capital Markets Corp. (Member FINRA and SIPC) and the agency broker dealer business of Clearpool Execution Services, LLC (Member FINRA and SIPC) in the U.S., and the institutional broker dealer businesses of BMO Nesbitt Burns Inc. (Member Investment Industry Regulatory Organization of Canada and Member Canadian Investor Protection Fund) in Canada and Asia, Bank of Montreal Europe p.l.c. (authorised and regulated by the Central Bank of Ireland) in Europe and BMO Capital Markets Limited (authorised and regulated by the Financial Conduct Authority) in the UK and Australia. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents

have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. Nothing herein constitutes any investment, legal, tax or other advice nor is it to be relied on in any investment or decision. If you are in doubt about any of the contents of this document, the reader should obtain independent professional advice. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Additional Matters

This report is directed only at entities or persons in jurisdictions or countries where access to and use of the information is not contrary to local laws or regulations. Its contents have not been reviewed by any regulatory authority. BMO Capital Markets does not represent that this report may be lawfully distributed or that any financial products may be lawfully offered or dealt with, in compliance with regulatory requirements in other jurisdictions, or pursuant to an exemption available thereunder.

To Australian residents: BMO Capital Markets Limited and Bank of Montreal are exempt from the requirement to hold an Australian financial services licence under the Corporations Act in respect of financial services they provide to wholesale investors (as defined in the Corporations Act). BMO Capital Markets Limited is regulated by the UK Financial Conduct Authority under UK laws, and Bank of Montreal in Hong Kong is regulated by the Hong Kong Monetary Authority and the Securities and Futures Commission, which differ from Australia laws. This document is only intended for wholesale clients (as defined in the Corporations Act 2001), Eligible Counterparties or Professional Clients (as defined in Annex II to MiFID II) and Professional Investors (as defined in the Securities and Futures Ordinance and the Securities and Futures (Professional Investor) Rules under the Securities and Futures Ordinance of Hong Kong).

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Colin Hamilton, Alexander Pearce or Raj Ray:

This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and distributed by BMO Capital Markets Limited or Bank of Montreal Europe Plc and is subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom and the Central Bank of Ireland (CBI) in Ireland. FCA and CBI regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore each of BMO Capital Markets Limited and Bank of Montreal Europe Plc will disclose its and its affiliates' ownership interest in the subject issuer only if such ownership exceeds 5% of the equity of the issuer.

To E.U. Residents: In an E.U. Member State this document is issued and distributed by Bank of Montreal Europe plc which is authorised and regulated in Ireland and operates in the E.U. on a passported basis. This document is only intended for Eligible Counterparties or Professional Clients, as defined in Annex II to "Markets in Financial Instruments Directive" 2014/65/EU ("MiFID II").

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to retail clients.

To Hong Kong Residents: In Hong Kong, this report is published and distributed by Bank of Montreal. Bank of Montreal (incorporated in Canada with limited liability) is an authorized institution under the Banking Ordinance and a registered institution with the Securities and Futures Commission (CE No. AAK809) to carry on Type 1 (dealing in securities) and Type 4 (advising in securities) regulated activities under the Securities and Futures Ordinance (Cap 571 of the Laws of Hong Kong). This report has not been reviewed or approved by any regulatory authority in Hong Kong. Accordingly this report must not be issued, circulated or distributed in Hong Kong other than (a) to professional investors as defined in the Securities and Futures Ordinance and the Securities and Futures (Professional Investor) Rules under the Securities and Futures Ordinance of Hong Kong, or (b) in circumstances which do not result in or constitute an offer to the public in Hong Kong.

To Korean Residents: This report has been provided to you without charge for your convenience only. All information contained in this report is factual information and does not reflect any opinion or judgement of BMO Capital Markets. The information contained in this report should not be construed as offer, marketing, solicitation or investment advice with respect to financial investment products in this report.

To Japan Residents: This report has not been reviewed by any regulatory authority in Japan. This report is provided for information purposes only and it should not be construed as an offer to sell, a solicitation to buy, or a recommendation for any security, or as an offer to provide investment management or advisory or other services in Japan. Securities may not be offered or sold in Japan by means of this report or any other document other than to Qualified Financial Institutions within the meaning of item (i) of Article 17-3 of the Government Ordinance to enforce the Financial Instruments and Exchange Act (Kinyu Shohin Torihiki Ho Sekou Rei). Unless specified otherwise, the securities that may be offered to you are not and will not be registered in Japan pursuant to the Financial Instruments and Exchange Acts.

To Taiwanese Residents: This report is not intended to constitute investment advice nor a public offer for any investment products to investors in Taiwan. This report should only be accessed by investors in Taiwan that are qualified to invest in investment products pursuant to relevant Taiwanese laws and regulations, and subject to sales restrictions as set forth in the relevant Taiwanese laws and regulations. BMO Capital Markets has not and will not secure the required licenses in Taiwan for the offer of securities and investment services. Any offer of securities has not been and will not be registered or filed with or approved by the Financial Commission of Taiwan and/or other regulatory authority pursuant to relevant securities laws and regulations of Taiwan, and may not be issued, offered or sold within Taiwan through a public offering or in circumstances which constitute an offer that requires a registration, filing or approval of the Financial Supervisory Commission of Taiwan and/or other regulatory authority in Taiwan under relevant securities laws and regulations of Taiwan. No person or entity in Taiwan has been authorized to offer or sell the securities in Taiwan.

To Singapore Residents: This report is intended for general circulation and does not and is not intended to constitute the provision of financial advisory services, whether directly or indirectly, to persons in Singapore. You should seek advice from a financial adviser regarding the suitability of the investment products, taking into account your specific investment objectives, financial situation or particular needs before you make a commitment to purchase the investment product. This report has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, it should not be circulated or distributed, nor may the securities described herein be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than (a) to an institutional investor or a relevant person as defined in and pursuant to and in accordance with the conditions of the relevant provisions of the Securities and Futures Act of Singapore or (b) otherwise pursuant to and in accordance with the conditions of, any other applicable provision of the SFA.

To Israeli residents: BMO Capital Markets is not licensed under the Israeli Law for the Regulation of Investment Advice, Investment Marketing and Portfolio Management of 1995 (the "Advice Law") nor does it carry insurance as required thereunder. This document is to be distributed solely to persons that are qualified clients (as defined under the Advice Law) and qualified investors under the Israeli Securities Law of 1968. This document represents the analysis of the analyst but there is no assurance that any assumption or estimation will materialize.

These documents are provided to you on the express understanding that they must be held in complete confidence and not republished, retransmitted, distributed, disclosed, or otherwise made available, in whole or in part, directly or indirectly, in hard or soft copy, through any means, to any person, except with the prior written consent of BMO Capital Markets.

NiSource Inc

Painting Path for a Constructive Indiana Rate Case Outcome: Minority Sale Too

Reiterate Rating: BUY
PO:32.00 USD | Price:27.75 USD
Equity | 01 February 2023

Key takeaways

- Indiana rate case intervenor testimony reasonable starting point for settlement conversations. 9.2% ROE and prepaid pension.
- Breakdown of O&M adjustments includes focus on admin/general, pension, cost, and depreciation. All reasonable areas to note.
- Reiterate Buy. Constructive outcome in Indiana rate case key to supporting positive re-rating from here. Minority sale too.

FULL REPORT

Intervenor filings in NIPSCO rate case were reasonable

Intervenor testimony was filed in the NIPSCO Indiana rate case, the most critical regulatory proceeding ongoing for NiSource currently. The Office of the Utility Consumer Counselor (OUCC) recommends a +$246Mn (+16%) multi-step revenue increase for NIPSCO (Docket 45772) with

+$191Mn in step 1 (~September 2023) and +$55Mn March 2024. The OUCC does not support the variable cost tracker (VCT) which represented the third step of NIPSCO's requested increase. The $246Mn OUCC supported increase compares with ~$394Mn total aggregate rate increase request, implying ~62% of NIPSCO's proposed increase. Importantly the OUCC testimony effectively supported the entirety of NIPSCO's proposed capex/rate base at $5,979Mn vs $5,946 request with the higher OUCC relating to ~$33Mn Michigan City & Schahfer accumulated depreciation. *Support for rate base is consistent with our base case.*

Cost of capital and O&M the key areas for parties to work

The OUCC recommendation was premised on 9.2% ROE (top-end of the 8.5-9.2% range for a gradual decrease) and notes that the overall rate of return would still be higher than market at the proposed equity ratio. UCC recommends a ~49% regulatory capital structure vs 51-52% proposed by NIPSCO with the delta pertaining to prepaid pension plan, an area that the parties were able to reach an agreement on last rate case. This is comparable with the ~58% guided to by NiSource view of investor supplied capital. The largest proposed operating & maintenance adjustment is -$17.3Mn for administrative and general where the OUCC believes that a reduction is warranted due to "poor performance". The proposed adjustment would normalize to the 2nd highest quintile level. Other proposed adjustments relate to pension, depreciation, coal costs, vegetation management, and other incentive compensation. **See full report for details.**

Reiterate Buy as NiSource continues to progress in Indiana

We reiterate our Buy rating on NiSource following the generally constructive regulatory developments. The shares outperformed utility peers (XLU) by 3% in January, but are still -5% over 12 months. If NiSource can reach a constructive outcome in the pending NIPSCO rate case, we see a path for continue positive re-rating to be more aligned with a premium valuation. Favorable regulatory updates should also help the pending minority interest sale process.

NI: NIPSCO Rate case settled – key positive. Terms TBD

Northern Indiana Public Service Co (NIPSCO – NiSource [NI] subsidiary) filed a notice of settlement agreement in principle with key parties in its pending electric rate case (Docket 45772). NIPSCO filed on March 6th with the Indiana Utility Regulatory Commission (IURC) that it has a settlement on **all issues** with the Indiana Office of Utility Consumer Counselor, NIPSCO Industrial Group, NLMK Indiana, and Walmart. No parties expressed an objection to the settlement. The fully settlement is ordered to be filed by March 10th followed by any opposition testimony by March 31st. The hearings have been continued to April 26th with the statutory deadline for the proceeding extended to August 23rd after receiving NIPSCO consent.

*We look for details on the key settlement terms, but it is positive that the agreement on **all issues** with key parties is positive. Based on our detailed review of intervenor testimony, we thought a settlement was likely and this is an expected constructive update. We maintain Buy on shares of NI which are increasingly de-risked and offer above-average growth at a discounted valuation. See our latest here: A Bright Spot in an Uncertain Utility World.*

AEP/D: VA orders fuel audit for APCo

The Virginia State Corporation Commission (SCC) approved a higher fuel rate for Appalachian Power Company (APCo - American Electric Power [AEP] subsidiary) with mitigation elements (Docket PUR-2022-00139). The SCC approved recovery of $361Mn deferred fuel over a two-year period with a +$20/month increase versus +$33/month without mitigation. The SCC ordered the SCC Staff to conduct a fuel audit for 2019-2022 including an assessment of the utility's coal procurement processes. In the Order the SCC stated it was "deeply concerned about the significant rate increase", specifically the timing coming during the higher-usage winter months (November 1 interim rates) and following other APCo rate increases. The SCC reaffirmed its core policy that regulated utilities are legally entitled to recovery prudent fuel costs.

Fuel cost recovery and timing has become more contentious across the US given the more challenging economic backdrop compounded by energy costs increasing faster than the rate of inflation. We maintain Neutral on shares of AEP which has a balanced risk-return profile but a growing number of regulatory risks, including fuel cost recovery in West Virginia. See PowerPoints: AEP West Virginia 06 February 2023. Maintain Underperform on shares of Dominion where we see further downside to Consensus EPS estimates and a challenging path forward to improve the balance sheet metrics.

PNM/AGR: Parties withdraw appeal, stage set for action

Avangrid (AGR), Iberdrola (IBE), and PNM Resources (PNM) jointly filed a motion for stipulated dismissal of its appeal in the denied PNM-AGR/IBE merger. Separately we provide updates on AGR Maine regulatory datapoints. **Please see full report.**

PNM/AGR: Parties withdraw appeal, stage set for action

Avangrid (AGR), Iberdrola (IBE), and PNM Resources (PNM) jointly filed a motion for stipulated dismissal of its appeal in the denied PNM-AGR/IBE merger. The motion for dismissal and remand was joined by the regulator, New Mexico Public Regulation Commission (PRC). The PRC docket is 20-00222-UT and the New Mexico Supreme Court case is S-1-SC-39152. In the filing, the PRC stated it will pursue an expedited proceeding, noting that the appealing parties requested a decision by April 12th, designed to meet the April 20th merger agreement deadline. The parties requested the NM Supreme Court reduce its response period. The filing notes the party statuses as: International Brotherhood of Electrical Workers Local 611 supporting; Coalition for Clean Affordable Energy, Western Resource Advocates (WRA), and others supportive but expecting to update the record; the Attorney General neither supporting nor opposing; and New Energy Economy **opposing**. The original regulatory settlement had support from the vast majority of parties but not from New Energy Economy so the opposition is consistent with prior positioning.

The decision to withdraw the appeal is consistent with public messaging from Iberdrola & Avangrid in an attempt to get the merger back on track. While the timeline appears tight, we still believe that the newly appointed PRC (two participating with one recusal) will approve the transaction between IBE/AGR and PNM. We maintain Buy on shares of PNM which trades at a discount to our view of the fundamentals. Conversely, we maintain Underperform on shares of AGR which have below-average EPS growth and above-average regulatory & large project risk.

US Utilities: Beantown Buzz Returns – Latest Conversations with AGR & PNM: 3/2/23

AGR: Positive ME regulatory datapoints

Counsel for Central Maine Power (CMP - Avangrid subsidiary) filed a letter in CMP's outstanding electric rate case docket (Docket #2022-00152) requesting on behalf of CMP and the Office of Public Advocate (OPA) that the Hearing Examiners schedule a **settlement conference**. The letter cites that the OPA and CMP believe that '*settlement discussions would be worthwhile at this procedural step in the proceeding and suggest that the Hearing Examiners schedule a conference for the last week of March*'.

Further, the Maine Public Utilities Conference (PUC) sided with CMP and ruled that a continuing obligation to file a quarterly report on CMP's SQI Metrics and to report a rolling 18-month average pursuant to a February 2022 order is no longer necessary. The utility will provide metrics nearly identical to SQI metrics quarterly, pursuant to an August 27, 2022 amendment to Commission Rule Chapter 320. CMP stated that having the MPUC rely solely on the Chapter 320 quarterly filing instead of relying on the Chapter 320 filing **and** the legacy filings related to the Feb. 2022 order will help avoid confusion. The legacy SQI metrics measure (1) percentage of business calls answered within 30 seconds (benchmark 80% of more), (2) call-abandonment rate (benchmark of 7% or less), (3) bill-error rate (benchmark of 0.4% of less) and (4) percentage of estimated bills (benchmark of no more than 1%).

We note that these small positive Maine regulatory updates support an improved regulatory backdrop in Maine versus only a few years ago. A CMP electric rate case settlement would be constructive and signal a clear improvement in AGR-Maine regulatory relationships. Nevertheless, we see resolution of AGR's rate cases in New York and Connecticut, and its ongoing proceedings around offshore wind projects and New England Clean Energy Connect (NECEC) as more critical for the company and shares near-term. *We remain cautious that favorable regulatory and political developments will materialize. Maintain Underperform on shares of AGR given above-average regulatory and earnings risk, despite improving ME regulatory datapoints.*

Avangrid: 4Q22: Pro-forma 2023 guide underwhelms. EPS CAGR reaffirmed as of Sept 2022 22 February 2023

CEG: NY hydrogen pilot advances. Watching Treasury rules

Constellation Energy (CEG) announced that its 1MW demonstration pilot hydrogen facility has begun operations. The electrolyzer at the Nine Mile Point nuclear plant in New York is supported by $5.8Mn Department of Energy (DOE) funding with 1.25MW of electricity generating 560kg/day of clean hydrogen, more than satisfying the nuclear plant's operational needs. CEG is utilizing a Proton Exchange Membrane (PEM) electrolyzer manufactured by Nel Hydrogen. Nel recently announced a final investment decision (FID) for a PEM electrolyzer manufacturing facility in Connecticut which will bring ~500MW run-rate production in 2025 with a 260Mn NOK investment. Longer-term, CEG guides to $900Mn investment 2023-2025 for clean hydrogen investments at its nuclear assets with ~250MW and ~33,450tpa hydrogen.

The successful advancement of the project is a small positive and consistent with our views. The clean hydrogen opportunity could be very material for CEG and other US nuclear plants in 2026+ depending on the finalization of the US Treasury tax credit regulations. Key focus areas are the (1) hourly vs annual matching; and (2) 'additionality' of resources. An hourly or more real-time standard would be beneficial for baseload nuclear owners whereas an annual standard would facilitate alignment with more wind/solar. Maintain Neutral on shares of CEG which have a balanced risk/return profile at the current level.

Nuclear fuel security a key focus area for CEG and the industry

Separately, Constellation CEO Joe Dominguez will be testifying today at the US Senate Energy and Natural Resources Committee regarding the risk of inadequate US supply of nuclear fuel.

Source: BofA Global Research

Price objective basis & risk

American Electric Power (AEP)
Our price objective of $95 is based on sum-of-the-parts (SOTP) analysis. We ascribe a peer forward FY25E P/E multiple (15.9x) with a 1.0x premium for its Texas transmission and distribution utilities and transmission-only utilities segments and a 0x premium (in-line multiple) for Ohio. Vertically integrated utilities are assigned a -2x discount on regulatory and execution risks. For the unregulated portion, we apply a 3.5x discount to the legacy energy supply and marketing business and an 8x premium to the contracted renewables business to reflect sale aspirations. Our valuation reflects that the Kentucky Power sale pending appears to be nearing close. We note that electric peer P/E multiple is grossed up for a year by 5% to reflect capital appreciation across the sector.

Risks to achievement of the price objective are 1) regulatory outcomes are less favorable than expected, which could result in reduced return on equity (ROE), 2) large capital intensive projects are subject to delays or cost overruns, which can change the return profile, 3) natural disasters or catastrophic events can affect system reliability and are subject to regulatory cost recovery risk, 4) utilities are subject to interest rate risk to fund their business, which affects cost of capital, 5) uncertainty around announced asset divestitures versus guidance expectations, 6) volatility in volume of electric sales, 7) other adverse regulatory, political, or similar actions.

Avangrid (AGR)
Our $37 PO is based on an 2025E sum of the parts analysis. The core utilities are valued on by applying discounts to the base sector P/E of 16.0x/17.1x for electric/gas due to below average growth and regulatory jurisdictions. We apply an in-line multiple to the PNM Resources assets with the transaction pending. Both electric and gas peer P/Es are grossed up +5% to reflect capital appreciation across the sector. The renewables are valued at approximately 10x EV/EBITDA, consistent with peers while offshore wind is valued using discounted cash flows at a 12% discount rate. Future potential value creation from the renewable development 'DevCo' is provided as well. Lastly parent/HoldCo financing negatives are ascribed.

Up/downside risks to achievement of the PO and estimates are 1) earned ROEs at the utilities, 2) utility capital expenditure forecasts, 3) regulatory/political/legislative outcomes, 4) equity needs, 5) offshore wind construction, 6) Iberdrola owns over 80% of AGR common stock, limiting float and presenting a potential for governance conflicts, despite the BoD being majority unaffiliated with Iberdrola. 7) natural disasters, 8) commodity and interest rate fluctuations, and 9) management changes.

Constellation Energy Corp (CEG)
Our $88 Price Objective is based on a 8.8% 2025E equity Free Cash Flow yield (FCF yield) on an unhedged/'open' basis. The 8.8% FCF yield represents a weighted average of 8.0% (first quartile) for the support FCF and 14.9% (third quartile) for merchant FCF, utilizing energy comparables.

Risks to achievement of the Price Objective and rating are: 1) changes in energy & capacity prices, 2) retail margins, renewals, win rate, & overall market share, 3) operating, capital, and fuel costs, 4) capital allocation decisions including M&A, 5) nuclear incidents or accidents, 6) legislative and regulatory changes, 7) nuclear fuel costs & availability, 8) change in environmental standards for generation assets, 9) management turnover, 10) pension & nuclear decommissioning trust returns, 11) credit rating agency requirements, and 12) interest rates.

Dominion Energy (D)
We value Dominion Energy at $52 using a 2025E sum-of-the-parts analysis. For the utilities we apply the comparable electric (15.8x) and gas (16.8x) peer multiples which we gross-up by 5% to reflect capital appreciation across the sector. We apply -1.5 discount for for base Virginia (-9%). We apply discount adjustments to lower value utility sources in South Carolina (NND) and Utah (Wexpro) as well as the South Carolina bill credits.

Contracted assets are valued at: 13x EV/EBITDA Cove Point, 5x Millstone (13% FCF Yield), and 5x for renewables. For remaining debt beyond that allocated to state utilities, we include a 50% weight towards a straight netting of leverage, with the remaining 50% using a P/E multiple on associated interest expense, in line with the methodology employed for diversified utilities with relatively higher levers of leverage. We lastly include prospective interest rate exposure that is not impacting near-term estimates due to hedges.

Risk to achievement of the Price Objective are 1) regulatory, legislative, and political actions, 2) ability to earn or exceed the regulatory allowed ROE, 3) capital markets and equity requirements, 4) changes to the capital expenditure and rate base forecast for both regulated & unregulated segments, 5) volatility in interest rates and pension returns, 6) changes in commodity prices, 7) natural disasters, 8) inflation, & 9) offshore wind construction.

NiSource Inc (NI)
Our $32 PO is based on a sum of the parts valuation. We value each gas and electric utility separately using 2025 forward P/E multiples that are marked-to-market to the latest peer utility multiples of 16.3x for gas and 15.8x for electric. Consistent across our coverage universe, the base electric & gas peer P/E multiples are grossed up by +5% to reflect capital appreciation across the sector. We utilize a +1x premium for NIPSCO Gas/Electric due to generally constructive regulatory outcomes. We subtract the value of excess holding company debt at the parent not supporting the utility subsidiaries.

Positive and negative risks to our Price Objective are changes in 1) regulatory, political, and legislative outcomes, 2) ability to execute on capital expenditure plan, 3) inflation, operating expense, and interest rates as they influence earned rates of return, 4) customer count and load growth, 5) commodities, 6) natural disasters, 7) pension plan returns, 8) equity and asset sale needs.

PNM Resources Inc. (PNM)
Our $50 price objective is based on a 2024E sum of the parts valuation methodology utilizing P/E multiples for each electric business segment. The electric peer P/E multiple is grossed up for +5% reflect capital appreciation across the sector, consistent with our approach for the coverage universe. We apply a 17.1x 2024E P/E multiples are applied to each subsidiary in New Mexico, Texas, and Federal as well as the parent HoldCo: PNM, FERC PNM, TMNP, Parent.

Risks to the achievement of our price objective and estimates are 1) regulatory, political, and legislative outcomes, 2) ability to control costs and achieve the allowed return on equity - including on AMI capital, 3) interest rates volatility, 4) pending M&A activity, 5) changes in interest rates, 6) natural disasters, and 7) inability to achieve capital expenditure guidance.

[R1] Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. *VOLATILITY RISK RATINGS*, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. *INVESTMENT RATINGS* reflect the analyst's assessment of both a stock's: absolute total return potential as well as its attractiveness for investment relative to other stocks within its *Coverage Cluster* (defined below). There are three investment ratings: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster[R2]
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

[R2]Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities.

This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.

This information may contain links to third-party websites. BofA Securities is not responsible for the content of any third-party website or any linked content contained in a third-party website. Content contained on such third-party websites is not part of this information and is not incorporated by reference. The inclusion of a link does not imply any endorsement by or any affiliation with BofA Securities. Access to any third-party website is at your own risk, and you should always review the terms and privacy policies at third-party websites before submitting any personal information to them. BofA Securities is not responsible for such terms and privacy policies and expressly disclaims any liability for them.

All opinions, projections and estimates constitute the judgment of the author as of the date of publication and are subject to change without notice. Prices also are subject to change without notice. BofA Securities is under no obligation to update this information and BofA Securities ability to publish information on the subject issuer(s) in the future is subject to applicable quiet periods. You should therefore assume that BofA Securities will not update any fact, circumstance or opinion contained herein.

Subject to the quiet period applicable under laws of the various jurisdictions in which we distribute research reports and other legal and BofA Securities policy-related restrictions on the publication of research reports, fundamental equity reports are produced on a regular basis as necessary to keep the investment recommendation current.

Certain outstanding reports or investment opinions relating to securities, financial instruments and/or issuers may no longer be current. Always refer to the most recent research report relating to an issuer prior to making an investment decision.

In some cases, an issuer may be classified as Restricted or may be Under Review or Extended Review. In each case, investors should consider any investment opinion relating to such issuer (or its security and/or financial instruments) to be suspended or withdrawn and should not rely on the analyses and investment opinion(s) pertaining to such issuer (or its securities and/or financial instruments) nor should the analyses or opinion(s) be considered a solicitation of any kind. Sales persons and financial advisors affiliated with BofAS or any of its affiliates may not solicit purchases of securities or financial instruments that are Restricted or Under Review and may only solicit securities under Extended Review in accordance with firm policies.

Neither BofA Securities nor any officer or employee of BofA Securities accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this information.

Assessing SVB fallout for clean energy and utilities

We provide our initial thoughts on the Silicon Valley Bank (SIVB -SVB Financial Group [Not Rated]) - see details here for Clean Energy and for Hawaiian Electric examining the banking subsidiary reports. The California utilities confirmed no exposure to Silicon Valley Bank, not a surprise given the larger market capitalizations. AES Corp (AES) has syndicated loans originated by SVB. AES indicated that the repayments will be under the original terms and AES will have the right to approve a new buyer if outside the existing lending group. AES has ~$921Mn of syndicated project financing/green bonds at its AES DE (distributed energy) IV and VIII issuers. AES states is SVB portion is significantly smaller, and the company expressed confidence in the ability to replace as a lending source, if needed. *Maintain Buy on shares of AES which trade at an attractive relative valuation.*

NRG/VVNT: Merger closes despite litigation

On Friday March 10th NRG Energy (NRG) announced the successful close of Vivint Smart Home (VVNT), completing the transaction at the original terms despite legal uncertainty. Many investors we had spoken to were optimistic that NRG could renegotiate the transaction or extract other favorable adjustments which did not materialize. Vivint had a $189 mn litigation loss related to allegations of improper sales practices and has other litigation pending against the company. Our base case was that NRG acquired Vivint on the original terms and we continue to view the acquisition as a net negative for shares of NRG but largely priced-in after the steep underperformance after the transaction. We subsequently upgraded shares to Neutral from Underperform in conjunction with the improvement in the commodity backdrop (i.e. decline) which we think should help improve NRG's prospective profitability. We look to see if/how NRG alters Vivint's sales practices. After Vistra's Energy Harbor (ENGH - Not Covered) transaction we would expect NRG to look to highlight its nuclear and retail EBITDA. We see a risk that NRG loses incremental investor attention as it does not have the same scale of clean owned generation. *Maintain Neutral on shares of NRG with an approximately balanced risk/reward.*

NI: NIPSCO settlement achieved

Northern Indiana Public Service Company (NIPSCO - NiSource [NI] subsidiary) filed the details of the settlement (Docket 45772) on Friday March 10th with a +$292Mn revenue increase relative to the $395Mn request and the +$246Mn Office of the Utility Consumer Counselor (OUCC) recommendation with +$191Mn September 2023 and +$55Mn March 2024. See report for additional background: NiSource Inc: Painting Path for a Constructive Indiana Rate Case Outcome: Minority Sale Too 01 February 2023

From our review of the intervenor testimony around O&M and settlement details, we believe this is a constructive outcome and supportive of NI's financial targets. Maintain Buy on shares of NI which continue to trade at a discount to utility peers despite an improving backdrop.

Please see full report for more on FirstEnergy and nuclear cost data.

FE: Ohio proceedings to resume

Last week an Ohio jury convicted former Ohio Speaker Larry Householder in a trial related to bribery and public corruption surrounding Ohio House Bill 6 (HB6). HB6 was legislation designed to benefit FirstEnergy (FE) and its then unregulated subsidiary FirstEnergy Solutions - now Energy Harbor. The Ohio Attorney General (AG) Dave Yost issued a statement and made a court filing requesting to lift the stay on discovery in the civil case after resolution of the criminal trial. The AG is pursuing an investigation into "FirstEnergy executives who funded the corrupt Householder Enterprise". The AG continued: "The discovery process may yield additional information that will reveal an expanded number of defendants who participated in the corrupt Householder Enterprise." A statement was released by former FE CEO Chuck Jones attorney: "Mr. Jones did not make or authorize any payment of any money to any public official in exchange for any official act," she said. "He did not engage in any unlawful activity or violate any of FirstEnergy's policies. Mr. Jones is not aware of any other FirstEnergy employee engaging in unlawful activities in their dealings with government officials." FE did not comment in the media articles we reviewed.

Shares of FE were not negatively impacted during the Householder trial and the company has made strides in advancing from the legacy issues, but we still see tail risks with litigation and state audits proceeding. Our conversations with ESG-oriented investors indicate limited receptivity for shares due to the events surrounding the Deferred Prosecution Agreement (DPA). Separately, Vistra's Energy Harbor acquisition is subject to US Department of Justice (DOJ) approval as it relates to the events of Ohio's HB6. Maintain Underperform on shares of FE. Our more cautious view of FE shares is unrelated to the legacy Ohio issues, and we do not embed any future negative impact for the company.

SMR: Amends agreement to support cost increase up to $89/MWh

NuScale Power (SMR – Not Covered) filed an amendment to its development cost reimbursement agreement which in part increase the target cost to $89/MWh from $58/MWh as part of other agreement changes. NuScale disclosed that it may be required to refund a portion of net development costs if the Nuclear Regulatory Commission (NRC) does not issue the Standards Design Approval (SDA) for the NuScale six-module 77MWe NuScale Power module design within one-year of NRC formally beginning the review.

We continue to closely monitor the nuclear industry economics, including the outlook for small modular reactors. Small modular reactors are generally targeting late in the 2020s and it will be critical for the technology to materially reduce its levelized cost of energy to represent a larger portion of the energy mix. Northwestern Corp recently announced plans to explore a deployment: US Utilities & Clean Tech: NWE Nuclear 03 March 2023

BofA GLOBAL RESEARCH

Price objective basis & risk

AES (AES)

Our price objective is $31 and is based on a sum of the parts analysis applying a blended valuation approach which is the summation of: 1) EV/EBITDA approach for US Renewable Generation using an 8.0x 2024E base for US peer plus a premium/discount, 2.) NPV approach for DevCo using a 10% discount on 5.5GW+ of annual renewables beyond '23 given market dynamics, 3.) EV/EBITDA approach for Legacy Southland (US), 4.) NPV for Warrior Run (US) 5.) P/E approach for US Utilities using a 15.9x 2025E base for US peers plus a premium/discount, 6.) EV/EBITDA approach for LATAM non-public subsidiaries using a 7.4x 2024E base for peers plus a premium/discount, 7.) Mark-to-market value of publicly listed LATAM subsidiaries, 8.) Asia Generation is marked to carrying value while the Asian LNG import facility is valued on EPS accretion relative to total build cost, and 9.) EV/EBITDA 2024E multiple for Europe generation (except Jordan, which we mark to sales price). We also credit the company with its investment in Uplight and Fluence.

Risks to our price objective and rating are: 1) regulatory, legislative, and political changes, 2) international currencies devaluing against the US dollar, 3) changes in value of Fluence (FLNC) subsidiary stock, 4) overall inability to execute on the renewables plan, 5) ability to control costs, 6) financing needs, and 7) tax policies.

FirstEnergy (FE)

The $38 Price Objective is based on a sum-of-the-parts valuation. Our multiples are driven by relative P/E premiums/discounts to the 15.8x 2025E regulated peer multiple. Peer P/E multiple is grossed up for a year by 5% to reflect capital appreciation across the sector, a consistent approach across our coverage universe. We apply -2x discount to reflect rate review risk, below average risk, and pension exposure. We subtract out the holding company debt given the above-average leverage

Upside/downside risks are 1) regulatory/political/legislative outcomes, 2) ability to earn the allowed ROEs and/or other changes in regulatory earnings, 3) weather and natural disasters, 4) investigation revelations, 5) equity needs versus forecasts, 6) capital expenditures, 7) pension plan returns, discount rate changes, and interest/service costs associated with the plan, and 8) taxes.

NiSource Inc (NI)

Our $32 PO is based on a sum of the parts valuation. We value each gas and electric utility separately using 2025 forward P/E multiples that are marked-to-market to the latest peer utility multiples of 16.3x for gas and 15.8x for electric. Consistent across our

coverage universe, the base electric & gas peer P/E multiples are grossed up by +5% to reflect capital appreciation across the sector. We utilize a +1x premium for NIPSCO Gas/Electric due to generally constructive regulatory outcomes. We subtract the value of excess holding company debt at the parent not supporting the utility subsidiaries.

Positive and negative risks to our Price Objective are changes in 1) regulatory, political, and legislative outcomes, 2) ability to execute on capital expenditure plan, 3) inflation, operating expense, and interest rates as they influence earned rates of return, 4) customer count and load growth, 5) commodities, 6) natural disasters, 7) pension plan returns, 8) equity and asset sale needs.

NRG Energy (NRG)
Our $35 Price Objective is based on 2025E sum-of-the-parts analysis. We apply a premium/discount to our 7.0x base EV/FCF multiple, which is premised on long-term historical industry trends, to each segment based on our views of the specific asset type and region. All three segments are initially valued at 7x EV/FCF including Generation, Retail & Vivint.

Upside/Downside risks to the price objective are changes in: 1) commodities including gas, coal, nuclear fuel & power, 2) operating costs, 3) environmental costs and regulation, 4) retail margins and customer counts, 5) natural disasters, 6) generation volume, 7) regulatory, legislative, and political changes, 8) customer acquisition costs, 9) retail competition, 10) pension and nuclear decommissioning trust assets/liabilities, and 11) interest rates.

Equity Investment Rating Distribution: Energy Group (as of 31 Dec 2022)

Coverage Universe	Count	Percent	Inv. Banking Relationships [R1]	Count	Percent
Buy	82	59.85%	Buy	65	79.27%
Hold	32	23.36%	Hold	21	65.63%
Sell	23	16.79%	Sell	14	60.87%

Equity Investment Rating Distribution: Utilities Group (as of 31 Dec 2022)

Coverage Universe	Count	Percent	Inv. Banking Relationships [R1]	Count	Percent
Buy	72	48.98%	Buy	51	70.83%
Hold	38	25.85%	Hold	29	76.32%
Sell	37	25.17%	Sell	25	67.57%

Equity Investment Rating Distribution: Global Group (as of 31 Dec 2022)

Coverage Universe	Count	Percent	Inv. Banking Relationships [R1]	Count	Percent
Buy	1853	52.58%	Buy	1040	56.13%
Hold	840	23.84%	Hold	493	58.69%
Sell	831	23.58%	Sell	404	48.62%

[R1] Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. *VOLATILITY RISK RATINGS*, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. *INVESTMENT RATINGS* reflect the analyst's assessment of both a stock's: absolute total return potential as well as its attractiveness for investment relative to other stocks within its *Coverage Cluster* (defined below). There are three investment ratings: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster[R2]
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

[R2] Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Price Charts for the securities referenced in this research report are available on the Price Charts website, or call 1-800-MERRILL to have them mailed.
BofAS or one of its affiliates acts as a market maker for the equity securities recommended in the report: AES Corp, FirstEnergy, NiSource Inc, NRG Energy.
BofAS or an affiliate was a manager of a public offering of securities of this issuer within the last 12 months: NiSource Inc, NRG Energy, Inc.
The issuer is or was, within the last 12 months, an investment banking client of BofAS and/or one or more of its affiliates: AES Corporation, FirstEnergy Corp, NiSource Inc, NRG Energy, Inc.
BofAS or an affiliate has received compensation from the issuer for non-investment banking services or products within the past 12 months: AES Corporation, FirstEnergy Corp, NiSource Inc, NRG Energy, Inc.
The issuer is or was, within the last 12 months, a non-securities business client of BofAS and/or one or more of its affiliates: AES Corporation, FirstEnergy Corp, NiSource Inc, NRG Energy, Inc.
BofAS or an affiliate has received compensation for investment banking services from this issuer within the past 12 months: AES Corporation, FirstEnergy Corp, NiSource Inc, NRG Energy, Inc.
BofAS or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer or an affiliate of the issuer within the next three months: AES Corporation, FirstEnergy Corp, NiSource Inc, NRG Energy, Inc.
BofAS together with its affiliates beneficially owns one percent or more of the common stock of this issuer. If this report was issued on or after the 9th day of the month, it reflects the ownership position on the last day of the previous month. Reports issued before the 9th day of a month reflect the ownership position at the end of the second month preceding the date of the report: NiSource Inc, NRG Energy, Inc.
BofAS or one of its affiliates is willing to sell to, or buy from, clients the common equity of the issuer on a principal basis: AES Corp, FirstEnergy, NiSource Inc, NRG Energy.
The issuer is or was, within the last 12 months, a securities business client (non-investment banking) of BofAS and/or one or more of its affiliates: AES Corporation, NiSource Inc, NRG Energy, Inc.
BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

Other Important Disclosures

From time to time research analysts conduct site visits of covered issuers. BofA Global Research policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits.
Prices are indicative and for information purposes only. Except as otherwise stated in the report, for any recommendation in relation to an equity security, the price referenced is the publicly traded price of the security as of close of business on the day prior to the date of the report or, if the report is published during intraday trading, the price referenced is indicative of the traded price as of the date and time of the report and in relation to a debt security (including equity preferred and CDS), prices are indicative as of the date and time of the report and are from various sources including BofA Securities trading desks.
The date and time of completion of the production of any recommendation in this report shall be the date and time of dissemination of this report as recorded in the report timestamp.

Recipients who are not institutional investors or market professionals should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.
Officers of BofAS or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments.
Refer to BofA Global Research policies relating to conflicts of interest.
"BofA Securities" includes BofA Securities, Inc. ("BofAS") and its affiliates. Investors should contact their BofA Securities representative or Merrill Global Wealth Management financial advisor if they have questions concerning this report or concerning the appropriateness of any investment idea described herein for such investor. "BofA Securities" is a global brand for BofA Global Research.

General Investment Related Disclosures:

Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities.

This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related

attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.

Materials prepared by BofA Global Research personnel are based on public information. Facts and views presented in this material have not been reviewed by, and may not reflect information known to, professionals in other business areas of BofA Securities, including investment banking personnel. BofA Securities has established information barriers between BofA Global Research and certain business groups. As a result, BofA Securities does not disclose certain client relationships with, or compensation received from, such issuers. To the extent this material discusses any legal proceeding or issues, it has not been prepared as nor is it intended to express any legal conclusion, opinion or advice. Investors should consult their own legal advisers as to issues of law relating to the subject matter of this material. BofA Global Research personnel's knowledge of legal proceedings in which any BofA Securities entity and/or its directors, officers and employees may be plaintiffs, defendants, co-defendants or co-plaintiffs with or involving issuers mentioned in this material is based on public information. Facts and views presented in this material that relate to any such proceedings have not been reviewed by, discussed with, and may not reflect information known to, professionals in other business areas of BofA Securities in connection with the legal proceedings or matters relevant to such proceedings.

This information has been prepared independently of any issuer of securities mentioned herein and not in connection with any proposed offering of securities or as agent of any issuer of any securities. None of BofAS any of its affiliates or their research analysts has any authority whatsoever to make any representation or warranty on behalf of the issuer(s). BofA Global Research policy prohibits research personnel from disclosing a recommendation, investment rating, or investment thesis for review by an issuer prior to the publication of a research report containing such rating, recommendation or investment thesis.

Any information relating to the tax status of financial instruments discussed herein is not intended to provide tax advice or to be used by anyone to provide tax advice. Investors are urged to seek tax advice based on their particular circumstances from an independent tax professional.

The information herein (other than disclosure information relating to BofA Securities and its affiliates) was obtained from various sources and we do not guarantee its accuracy. This information may contain links to third-party websites. BofA Securities is not responsible for the content of any third-party website or any linked content contained in a third-party website. Content contained on such third-party websites is not part of this information and is not incorporated by reference. The inclusion of a link does not imply any endorsement by or any affiliation with BofA Securities. Access to any third-party website is at your own risk, and you should always review the terms and privacy policies at third-party websites before submitting any personal information to them. BofA Securities is not responsible for such terms and privacy policies and expressly disclaims any liability for them.

All opinions, projections and estimates constitute the judgment of the author as of the date of publication and are subject to change without notice. Prices also are subject to change without notice. BofA Securities is under no obligation to update this information and BofA Securities ability to publish information on the subject issuer(s) in the future is subject to applicable quiet periods. You should therefore assume that BofA Securities will not update any fact, circumstance or opinion contained herein.

Subject to the quiet period applicable under laws of the various jurisdictions in which we distribute research reports and other legal and BofA Securities policy-related restrictions on the publication of research reports, fundamental equity reports are produced on a regular basis as necessary to keep the investment recommendation current.

Certain outstanding reports or investment opinions relating to securities, financial instruments and/or issuers may no longer be current. Always refer to the most recent research report relating to an issuer prior to making an investment decision.

In some cases, an issuer may be classified as Restricted or may be Under Review or Extended Review. In each case, investors should consider any investment opinion relating to such issuer (or its security and/or financial instruments) to be suspended or withdrawn and should not rely on the analyses and investment opinion(s) pertaining to such issuer (or its securities and/or financial instruments) nor should the analyses or opinion(s) be considered a solicitation of any kind. Sales persons and financial advisors affiliated with BofAS or any of its affiliates may not solicit purchases of securities or financial instruments that are Restricted or Under Review and may only solicit securities under Extended Review in accordance with firm policies.

Neither BofA Securities nor any officer or employee of BofA Securities accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this information.

Crowding considerations key as investor flock to safety

We provide our latest quarterly analysis of 13-F ownership data in our "*Who owns what?*" series in which we compile crowding data by examining a broad group of ~40 investment funds, including 17 hedge funds (HFs) and 23 "long-only" (LO) funds. Utilities have caught up a bid relative to the overall market in recent days as investors flock to safer asset groups amid the fallout from the latest bank failures and broad financial uncertainty. Yet, utilities have underperformed the broader equity markets year-to-date with another challenging 4Q earnings cycle and unfavorable weather introducing new challenges across many utilities (DTE, NEE). Although the data is ~80 days old, the positioning information is vital in these periods of acute unwinds and de-grossing. For a full comparison with our 9/30 analysis, please see our report: Positioning Tells Bifurcated Story: Explaining Some of Relative Performances.

HFs double-down on NI, DTE, CMS, & PPL

Popular hedge fund names remain NiSource (NI), DTE Energy (DTE), PPL Corp (PPL) and CMS Energy (CMS). HFs further added to these positions in 4Q22. We see elevated risk of crowding for DTE near-term as the utility faces a challenging 2023 driven by unfavorably weather, recent ice storms and growing regulatory tension following the large rate increase request. We maintain our Buy on shares of DTE given the overly discounted valuation although acknowledge the riskier backdrop. DTE has underperformed -3% YTD, likely with crowding a factor. By contrast, the most popular long-only names were American Electric Power (AEP), Xcel Energy (XEL), Entergy (ETR) and Sempra (SRE). HFs and LOs continue to disagree across a broad base of utility names. AEP, Centerpoint (CNP), Sempra (SRE) and Ameren (AEE) were popular among long-onlys while ownership concentration was more muted across hedge funds. Consistent with 9/30/2022 13-F data, PPL remains a hedge fund favorite although shares are relatively under owned by LOs. Relative weakness of PPL is likely due at least in part to the crowding dynamics, exasperating the mixed datapoints of late.

Where has positioning changed most? D, EVRG, ETR

Dominion (D) and Evergy (EVRG) positioning changes differed significantly across hedge fund versus LOs – HFs were buyers of both D and EVRG in 4Q22 despite cautionary updates for either utility into EEI. By contrast, D and EVRG were among the most sold names for LOs. Both hedge funds and LOs sold shares of ETR during 4Q22, although LO ownership of ETR remains relatively strong, a slight risk. We downgraded ETR to Neutral in Jan. 2023 given the increasingly cautious regulatory backdrop. Aside from ETR, Alliant (LNT) and FirstEnergy (FE) saw most significant change in HF positioning. Nextera Energy (NEE) was well-owned by LOs as of 12/31/2022 while HFs were sellers in 4Q22. We await 1Q23 13-F data for updates on NEE positioning following a cautionary 4Q22 update which prompted our d/g of NEE shares to Neutral. PG&E Corp (PCG) gained traction among both HF and LO investors in 4Q22, a positive signal as investors grow more comfortable with the increasingly de-risked outlook. We think PCG's dividend reinstatement expected mid-year 2023 should further support PCG ownership data. Ownership data supports PSE&G Corp (PEG) which remains relatively under owned by both LOs and HFs.

HF: Hedge Fund

LO: Long-only

Unauthorized redistribution of this report is prohibited. This report is intended for BEE8741AC8CB11EDB6543F4D115E8962 F.

40 large investors analyzed

We examine 13-F ownership disclosures for a broad group of 40 representative investment funds. This includes 17 hedge funds and 23 funds with typically longer-term investment horizons ("long only"). We believe that this sample captures a diverse group of investor styles and approaches to investing.

Exhibit 1: Investment funds included in our data analysis
17 Hedge Funds and 23 'Long-Only' Investors

BofA GLOBAL RESEARCH

Below, we show various statistics to assess relative ownership. Due to differing firm sizes, we analyze the data in different ways. This approach is consistent with our prior analyses for comparability. The concentration approach could be the most meaningful, as it shows the breadth of ownership. This is likely is a better representation of positioning crowding, as it should correlate better with relative performance around events and grossing events. Additionally, it shows whether the investment opportunity has resonated with a wider number of investors, whereas even median ownership can be skewed by larger investor positions.

- **Median – All:** The median percentage ownership of total utility stock shares outstanding, for *all* funds in the group, including those with no ownership.
- **Median – Owned:** The median percentage ownership of total stock shares outstanding, for only those funds in the group which own shares.
- **Concentration:** The number of funds that own shares in each respective stock.

We caution against overreliance on any one source of crowding when assessing a position, but this information can help, particularly around sizing when constructing a portfolio.

Where is crowding risk most apparent?

We see the most astute crowding risk for shares of DTE given the challenged near-term outlook driven by elevated regulatory risk related to 2023 ice storms and the utilities large rate increase request. Nevertheless, shares trade at a steep discount to peers

despite above-average long-term earnings outlook, backstopping hedge fund's support of the name. PCG ownership improved in 4Q22, unsurprising given 2022 share outperformance as investor grow more comfortable with the business outlook. PPL remains a hedge-fund favorite although relative under-owned by LOs.

Companies with persistently low ownership include Edison International (EIX), Avangrid and Pinnacle West. Concentration is more pronounced for LOs relative to HFs, specifically across CNP, AEE, CMS and WEC Energy (WEC).

We see low ownership of PEG as an opportunity still among HFs and LOs.

Exhibit 2: Large Cap 12/31/2022 Hedge Fund and 'Long Only' Positioning Analysis – Segmented by Utility Peer Group
Presenting the ownership profile for hedge funds and "long onlys" for median, median of those who own, and number of funds holding a position (concentration).

BofA GLOBAL RESEARCH

The most significant change in positioning QoQ for hedge funds was a reduction in weighting for Alliant (LNT), Entergy (ETR), and FirstEnergy (FE) with a fairly significant increased ownership for Evergy (EVRG), DTE Energy (DTE), and Dominion Energy (D). Dominion ownership concentration increased significantly with 16 of 17 funds reviewed owning shares. Exelon ownership concentration increased with 16 of 17 funds reviewed owning shares although percentage ownership of total utility stock shares decreased. EIX saw the largest decline in number of funds owning (4) and had 8 of 16 showing positions at YE22. This was the lowest among hedge funds, tied with Avangrid (AGR).

Exhibit 3: Large Cap 12/31/2022 vs. 9/30/2022 Hedge Fund Positioning Analysis QoQ – Sorted by Most HF Median
Overall EVRG, DTE, PPL, CMS got more crowded. D ownership increased although off a low base as of 9/30/2022.

BofA GLOBAL RESEARCH

Where do hedge funds and long onlys agree and disagree?

Both were sellers of Entergy, FirstEnergy, WEC Energy and American Electric Power and both were buyers of PG&E Corp and PPL Corp. WEC is a top performing regulated utility in 2023, +5% relative outperformance, most of which came in the last two weeks. WEC's longest track record of meeting and exceeding its own guidance (and often Consensus) is coveted in times of broader financial stress. In contrast, while hedge funds were buying Dominion, Long Onlys were selling. Dominion saw among the largest decline in ownership. Evergy and Exelon were other names where hedge funds and long onlys differed.

Below we show the reports in the series:

BofA GLOBAL RESEARCH

Price objective basis & risk

DTE Energy (DTE)

We value DTE Energy at $139 using a sum-of-the-parts (SOTP) approach. We value the utility segment on a 2025E forward P/E multiple basis and the non-utility segment on a 2024E forward EV/EBITDA multiple basis. For the utility segment we apply a 2x premium to both our regulated electric and gas utility peer multiples (of 16.5x and 16.8x, respectively). Both electric and gas peer P/E multiples are grossed up by 5% to reflect capital appreciation across the sector. We value the DTE Vantage segment on a multiple of 2025 EPS - the grossed-up electric multiple of 17.3x to account for the renewable natural gas (RNG) business. We assign an equity value of zero to the Equity Trading segment given potential for earnings volatility and opacity of the segment. We also reduce the equity value for estimated unallocated parent debt by applying a 17.5x multiple to both the interest expense and corporate overhead expenses at the parent. Risks are: regulatory/political/legislative actions, realized returns from the unregulated Vantage segment, changes in equity needs, load growth/class mix, equity needs, weather/natural disasters, and interest rate fluctuations.

Entergy (ETR)

Our $119 Price Objective is based on a sum-of-the-parts analysis. The 2025E electric utilities average P/E of 16.4x is grossed-up +5%, to reflect capital appreciation across the sector. We apply in-line P/E multiples to the subsidiaries except for +1x Texas to reflect the constructive regulation environment and -1x Louisiana & New Orleans based upon historical contentious proceedings and growing concerns about prospective storm recovery. We net out 50% of the parent HoldCo long-term debt and apply a P/E multiple to 50% of the interest expense.

Positive and negative risks to achievement of our Price Objective are: (1) regulatory, political, and legislative changes, (2) natural or nuclear disasters including hurricanes, (3) ability to deploy capital expenditures consistent with guidance, (4) earned rates of returns at the jurisdictions, (5) interest rates fluctuations, (6) equity issuances relative to management's forecast and access to capital markets, (7) pension and nuclear decommissioning fund performance and (8) costs and operational volumes at the remainder of the wholesale commodity subsidiary.

NextEra Energy (NEE)

Our $80 PO is derived using an sum-of-the-parts (SOTP) approach, with the utilities and parent segment valued on a 2025E P/E basis, and the generation segment valued on a 2025E EV/EBITDA basis. In addition, we include NEE's ownership stake in NextEra Energy Partners (NEP) as well as the value of fixed fee IDR (DCF, at 6.7% disc rate). We

assign 25E peer multiples of 15.8x for electric and 27.6x for water (grossed up by 5% and 7%, respectively, to reflect capital appreciation) with discount/premium to reflect the growth/risk profile of the businesses. We apply a 3x premium for FPL and Gulf. For NEER, we apply a peer EV/EBITDA multiple of 9.5x, which we adjust depending on asset type. We give contracted renewables and 8x premium given fuel type and contracted nature. We utilize a DCF of new renewable for projects beyond 2024 and include a 12x terminal multiple. We value contracted nuclear on a DCF approach using an 8% discount rate. We apply a 1x premium multiple to pipelines, -4.5x discount to gas infrastructure and -1x discount for supply and trading given lower asset quality, a 1x premium for contracted gas peakers and 1x discount for merchant peakers (other), again based on asset quality.

Risks to achievement of PO and rating are 1) regulatory/political/legislative outcomes, 2) weather and natural disasters, 3) commodity price changes, 4) fluctuations in stock prices for NextEra Energy Partners, 5) renewable development margins & margin, and 6) election commission review

PG&E Corporation (PCG)
Our PO of $19 reflects an in-line P/E versus the respective electric (15.8x) and gas (16.4x) peer P/E groups with both grossed-up by 5% to reflect capital appreciation across the sector) based on 2025E. The acute wildfire risk is incorporated separately via a scenario probability weighted at 100% assuming PCG hits the cap in 3-year increments. Lastly, we net out 50% weighting of HoldCo debt and add back 50% weighting of interest expense to derive our Price Objective.

Risks to achievement to estimates and Price Objective are: 1) Wildfire and other natural disasters/catastrophic events, 2) regulatory outcomes, 3) interest rates, 4) equity needs, 5) earned returns and operating costs, 6) Fire Victim Trust monetizations, 7) ability to deploy capital, and 8) environmental, social, & governance [ESG] profile.

Equity Investment Rating Distribution: Utilities Group (as of 31 Dec 2022)

Coverage Universe	Count	Percent	Inv. Banking Relationships [R1]	Count	Percent
Buy	72	48.98%	Buy	51	70.83%
Hold	38	25.85%	Hold	29	76.32%
Sell	37	25.17%	Sell	25	67.57%

Equity Investment Rating Distribution: Global Group (as of 31 Dec 2022)

Coverage Universe	Count	Percent	Inv. Banking Relationships [R1]	Count	Percent
Buy	1853	52.58%	Buy	1040	56.13%
Hold	840	23.84%	Hold	493	58.69%
Sell	831	23.58%	Sell	404	48.62%

[R1] Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. *VOLATILITY RISK RATINGS*, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. *INVESTMENT RATINGS* reflect the analyst's assessment of both a stock's: absolute total return potential as well as its attractiveness for investment relative to other stocks within its *Coverage Cluster* (defined below). There are three investment ratings: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster[R2]
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

[R2] Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Price Charts for the securities referenced in this research report are available on the Price Charts website, or call 1-800-MERRILL to have them mailed.
BofAS or one of its affiliates acts as a market maker for the equity securities recommended in the report: DTE Energy, Entergy Corp., NextEra Energy, PG&E Corp.
The issuer is or was, within the last 12 months, an investment banking client of BofAS and/or one or more of its affiliates: DTE Energy, Entergy, NextEra Energy, PG&E Corp.
BofAS or an affiliate has received compensation from the issuer for non-investment banking services or products within the past 12 months: DTE Energy, Entergy, NextEra Energy, PG&E Corp.
The issuer is or was, within the last 12 months, a non-securities business client of BofAS and/or one or more of its affiliates: DTE Energy, Entergy, NextEra Energy, PG&E Corp.
BofAS or an affiliate has received compensation for investment banking services from this issuer within the past 12 months: DTE Energy, Entergy, NextEra Energy, PG&E Corp.
BofAS or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer or an affiliate of the issuer within the next three months: DTE Energy, Entergy, NextEra Energy, PG&E Corp.
BofAS together with its affiliates beneficially owns one percent or more of the common stock of this issuer. If this report was issued on or after the 9th day of the month, it reflects the ownership position on the last day of the previous month. Reports issued before the 9th day of a month reflect the ownership position at the end of the second month preceding the date of the report: DTE Energy, Entergy, NextEra Energy.
BofAS or one of its affiliates is willing to sell to, or buy from, clients the common equity of the issuer on a principal basis: DTE Energy, Entergy Corp., NextEra Energy, PG&E Corp.
The issuer is or was, within the last 12 months, a securities business client (non-investment banking) of BofAS and/or one or more of its affiliates: DTE Energy, Entergy, NextEra Energy, PG&E Corp.
BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

Other Important Disclosures

From time to time research analysts conduct site visits of covered issuers. BofA Global Research policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits.
Prices are indicative and for information purposes only. Except as otherwise stated in the report, for any recommendation in relation to an equity security, the price referenced is the publicly traded price of the security as of close of business on the day prior to the date of the report or, if the report is published during intraday trading, the price referenced is indicative of the traded price as of the date and time of the report and in relation to a debt security (including equity preferred and CDS), prices are indicative as of the date and time of the report and are from various sources including BofA Securities trading desks.
The date and time of completion of the production of any recommendation in this report shall be the date and time of dissemination of this report as recorded in the report timestamp.

Recipients who are not institutional investors or market professionals should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.
Officers of BofAS or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments.
Refer to BofA Global Research policies relating to conflicts of interest.
"BofA Securities" includes BofA Securities, Inc. ("BofAS") and its affiliates. Investors should contact their BofA Securities representative or Merrill Global Wealth Management financial advisor if they have questions concerning this report or concerning the appropriateness of any investment idea described herein for such investor. "BofA Securities" is a global brand for BofA Global Research.

General Investment Related Disclosures:

Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities.

This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial

stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.

BofA Securities has established information barriers between BofA Global Research and certain business groups. As a result, BofA Securities does not disclose certain client relationships with, or compensation received from, such issuers. To the extent this material discusses any legal proceeding or issues, it has not been prepared as nor is it intended to express any legal conclusion, opinion or advice. Investors should consult their own legal advisers as to issues of law relating to the subject matter of this material. BofA Global Research personnel's knowledge of legal proceedings in which any BofA Securities entity and/or its directors, officers and employees may be plaintiffs, defendants, co-defendants or co-plaintiffs with or involving issuers mentioned in this material is based on public information. Facts and views presented in this material that relate to any such proceedings have not been reviewed by, discussed with, and may not reflect information known to, professionals in other business areas of BofA Securities in connection with the legal proceedings or matters relevant to such proceedings.

This information has been prepared independently of any issuer of securities mentioned herein and not in connection with any proposed offering of securities or as agent of any issuer of any securities. None of BofAS any of its affiliates or their research analysts has any authority whatsoever to make any representation or warranty on behalf of the issuer(s). BofA Global Research policy prohibits research personnel from disclosing a recommendation, investment rating, or investment thesis for review by an issuer prior to the publication of a research report containing such rating, recommendation or investment thesis.

Any information relating to the tax status of financial instruments discussed herein is not intended to provide tax advice or to be used by anyone to provide tax advice. Investors are urged to seek tax advice based on their particular circumstances from an independent tax professional.

The information herein (other than disclosure information relating to BofA Securities and its affiliates) was obtained from various sources and we do not guarantee its accuracy. This information may contain links to third-party websites. BofA Securities is not responsible for the content of any third-party website or any linked content contained in a third-party website. Content contained on such third-party websites is not part of this information and is not incorporated by reference. The inclusion of a link does not imply any endorsement by or any affiliation with BofA Securities. Access to any third-party website is at your own risk, and you should always review the terms and privacy policies at third-party websites before submitting any personal information to them. BofA Securities is not responsible for such terms and privacy policies and expressly disclaims any liability for them.

All opinions, projections and estimates constitute the judgment of the author as of the date of publication and are subject to change without notice. Prices also are subject to change without notice. BofA Securities is under no obligation to update this information and BofA Securities ability to publish information on the subject issuer(s) in the future is subject to applicable quiet periods. You should therefore assume that BofA Securities will not update any fact, circumstance or opinion contained herein.

Subject to the quiet period applicable under laws of the various jurisdictions in which we distribute research reports and other legal and BofA Securities policy-related restrictions on the publication of research reports, fundamental equity reports are produced on a regular basis as necessary to keep the investment recommendation current.

Certain outstanding reports or investment opinions relating to securities, financial instruments and/or issuers may no longer be current. Always refer to the most recent research report relating to an issuer prior to making an investment decision.

In some cases, an issuer may be classified as Restricted or may be Under Review or Extended Review. In each case, investors should consider any investment opinion relating to such issuer (or its security and/or financial instruments) to be suspended or withdrawn and should not rely on the analyses and investment opinion(s) pertaining to such issuer (or its securities and/or financial instruments) nor should the analyses or opinion(s) be considered a solicitation of any kind. Sales persons and financial advisors affiliated with BofAS or any of its affiliates may not solicit purchases of securities or financial instruments that are Restricted or Under Review and may only solicit securities under Extended Review in accordance with firm policies.

Neither BofA Securities nor any officer or employee of BofA Securities accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this information.

D: Natural gas utility sales a potential part of biz review

According to an industry media report, Dominion Energy (D) is initiating an auction process for "several" natural gas local distribution companies (LDCs) as part of its publicly disclosed comprehensive business review. Dominion has stated that repairing and then strengthening its credit metrics is a priority for the process. Dominion discloses the following natural gas LDCs rate base: $4.2Bn Ohio, $3.0Bn Utah, Wyoming, & Wexpro (Questar), and $2.0Bn North Carolina. Dominion also has $1.0Bn integrated natural gas rate base in South Carolina (SCANA). While Dominion has not refreshed its long-term capital plans, gas distribution was a favorable contributor with 8% utility rate base CAGR, including unregulated renewable natural gas. If Dominion does pursue significant regulated sales, we believe there could be dis-synergies from formerly allocated costs as well as reduced purchasing power scale & diversity. *See the full report for additional thoughts. Reiterate Underperform on shares of D, which is expensive with downside to Street estimates and faces a protracted process to regain investor confidence.*

CEG: Nuclear reactor penetration weld defect

During the planned Nine Mile Point Unit 1 (Nine Mile) nuclear refueling outage, Constellation (CEG) identified a metal weld defect which is unacceptable under American Society of Mechanical Engineers (ASME) standards. The "dissimilar weld is on reactor penetration N2E". Operator Constellation filed a non-hour emergency event (#56421) with the Nuclear Regulatory Commission (NRC) under the condition of "principal safety barriers, being seriously degraded". No US nuclear plants reported defects in 2022 NRC reportable events. Nine Mile has been offline for refueling since March 13th after a glidepath into the refueling starting in mid-January. For reference the 2019 refueling outage began March 18th and the plant was back to full output on May 8th, notably longer than Constellation's ~21-day average refueling. The 2021 refueling was faster, spanning March 22 to April 14. Nine Mile Point is one of the most important plants in CEG's portfolio due the hydrogen pilot project and broader ambitions for hydrogen production.

We look to see if this event has implications for maintenance capex or other financial impact. While nuclear refueling outages are typically non-events, infamously Duke's Crystal River nuclear plant in Florida had containment structure damage during a steam generator replacement. EDF in Europe has seen a reduction in its operational capacity due to pipe weld cracking. Constellation emphasized the differences between its assets and EDF's: (1) boiling water reactor [BWR] vs pressurized water reactors [PWB]; (2) operating service conditions; (3) configurations; and (4) welding practices. CEG has a long-standing program to assess for any deterioration of metal welds and the Nine Mile finding was part of that process. Repairs for the cracking are in progress per CEG. *By no means do we anticipate a significant impact for shares of CEG at this point but nuclear refuelings do come with risks. Maintain Neutral on shares of CEG which are trading approximately at fair value.* *See background on nuclear cost structure here.*

See full report for more on Dominion, Indiana legislation (DUK/NI), Oklahoma legislation (OGE/AEP).

D: Business review process starts to pick up pace (Cont.)

If Dominion does pursue Gas LDC sales, these could be accretive to our EPS forecasts depending on the price, but we reiterate our Underperform rating. There have been two high profile LDC sale processes/strategic reviews recently that did not result in LDC sales: Southwest Holdings (SWX) and Black Hills Corp (BKH). These processes faced challenges before the recent significant erosion in financial market and credit conditions in the recent weeks. Additionally, selling high FFO/Debt utilities is credit dilutive and could come with tax leakage. This reduces the effective P/E on a sale. As a result, asset sales will need to be significantly higher than the nominal amount of straight common equity needed. Finally, we increasingly believe that Dominion will sell a large piece of its regulated Virginia offshore wind project. Under the new Virginia law, this sale would be at 1x rate base with the premium returned to ratepayers at the State Corporation Commission (SCC) discretion. Due to the statutorily limited rate base multiple, offshore wind sales could perhaps be the most EPS dilutive option. While it would reduce risk and future financing needs, this could be an offset to more accretive LDC sales. Separately, Dominion placing its offshore wind assets on the market would increase the supply in the market, a negative for Eversource and Avangrid own publicly disclosed sale processes. We continue to believe that the market underappreciates the quantum of credit repair necessary and overstates EPS.

Exhibit 1: Dominion Energy (D) Relative Equity Performance versus Utilities Sector (XLU)
Dominion has underperformed the sector -5% YTD, -10% from since January 31st

Source: Bloomberg

BofA GLOBAL RESEARCH

Initial investor feedback to the media report was cautious that Dominion was considering such a large quantum of asset sales. The report indicates that Dominion is in the early stages of an auction process and has not made definitive decisions.

DUK/NI: Indiana busy legislative session ongoing

The Indiana legislative session activity has been picking up with the recent enactment of Senate Bill 9 (SB9) that was signed by the Governor yesterday. SB9 has been described by opponents as a "blank check for Indiana's Monopoly Electric Utilities". SB9 would be positive for Duke Energy (DUK) and NiSource (NI). Legislation we are tracking includes House Bill 1007 (utility owned generation, performance based rates, affordability, etc.), Senate Bill 9 referenced above (environmental compliance recovery), SB298 (infrastructure improvement charges), SB451 (carbon sequestration pilot), HB1417 (deferred cost and accounting regulatory reforms), HB1420 (transmission competition), HB 1421 (construction work in progress expansion), SB114 (overdue utility bill receivership), SB176 (small modular reactors), and SB170 (felony for intimidating utility workers).

SB335/HB1453 (climate solutions task force), HB1604 (climate change studies), SB33 (solar and wind equipment disposal studies), SB390 (solar and wind 'ready communities'), HB1401 (wind asset transaction requirements), and HB1173 (limitations on utility scale batteries) all relate to clean energy reforms.

Less relevant for the regulated utilities but also worth monitoring are the Environmental, Social, and Governance (ESG) related bills HB1008 and SB292.

We are watching the closest for implications from HB1007 which has broad support. The bill would require that the Indiana generation mix consider reliability, affordability, stability, resiliency, stability, and environmentally sustainability. A framework for performance-based rates (PBR) would begin by September 1, 2023 which could consider multi-year rate plans, performance incentive mechanisms (PIMs), and other elements. Oklahoma also has pending PBR legislation discussed in the next section.

Investors have been acutely focused on state legislative sessions across the US but Indiana has received less attention than many other states such as Virginia, Connecticut, or Kentucky. While the legislative action in Kentucky has been viewed as less constructive for the energy transition, we view HB1007 and many of the other draft bills as potentially positive for the regulated utilities in the state, depending on final enactment and implementation. A shift towards multi-year rate plans would be constructive as well as other elements that could provide additional visibility into earnings and cash flow recovery for investments. Indiana is most material for NiSource (NI) but other states with operations include Duke Energy (DUK), AES Corp (AES), CenterPoint via Vectren (CNP), and American Electric Power (AEP). We maintain Buy on shares of NI which are increasingly derisked and offer above-average growth at a discounted valuation. We also maintain Buy on DUK which trades at attractive relative valuations. We continue to view Indiana as one of the more constructive regulatory jurisdictions.

OGE/AEP: OK PBR legislation controversial

The Oklahoma Corporation Commission (OCC) held a special Commission meeting on March 20th regarding Senate Bill 1103 (SB1103) titled the "Ratepayer Protection Act". Oklahoma Gas & Electric (OG&E – OGE Corp [OGE] subsidiary) described the bill as good for customers and decried the misinformation about the bill. OG&E indicated that the bill would lead to more effective regulation, greater customer protections, and stabilize customer bills - particularly fuel costs via two-weeks of gas storage for 80% of maximum daily quantity. OG&E indicated that it currently has capacity for 70% of its needs. Other elements of the legislation that OG&E spoke positively of included performance-based rates (PBR) with annual reviews. 75% of earnings above the ROE +/- 50bp dead-band would be credited or otherwise returned to customers with the 25% balance "retained by the utility and reinvested in the utility's power delivery infrastructure" with a return earned on those capital investments. The rate case timeline was described by OG&E as "more streamlined", but the Commission disagreed with shorting the timeframe for consumer comments to 75 days from 120 days. All riders aside from fuel and securitization would be eliminated under the PBR proposal.

OG&E publicly supports the legislation and the OCC stated that consumer and business entities opposed. At the special meeting, some parties such as the US Department of Defense and Wal-Mart spoke out against PBR based on Massachusetts and Louisiana experiences. Public Utilities Division (PUC) stated that the legislation was far too skewed in favor of the utilities and negative for ratepayers. PUD does not support the legislation and critiqued most aspects of the legislation.

Chairman Hiett introduced a motion for the OCC to formally oppose the legislation and instruct their legislative liaison accordingly. New Commissioner David abstained from voting due to pending rate cases with performance-based rates but did indicate reservations. Vice-Chair Commissioner Anthony ultimately did not participate in the motion to oppose due to the degree of uncertainty on the evolving legislation. Anthony wanted to complete pending OCC work before taking a position on the pending bill.

The special Commission meeting was fairly contentious based on the Commissioner and stakeholder commentary. Depending on the implementation of PBR, the legislation could be favorable for the regulated utilities OGE and American Electric Power (AEP) with increased earnings visibility as well as a potential capital opportunity for gas storage. Maintain Neutral on shares of OGE and AEP which are approximately trading at fair value.

BofA GLOBAL RESEARCH

Price objective basis & risk

American Electric Power (AEP)

Our price objective of $95 is based on sum-of-the-parts (SOTP) analysis. We ascribe a peer forward FY25E P/E multiple (15.9x) with a 1.0x premium for its Texas transmission and distribution utilities and transmission-only utilities segments and a 0x premium (in-line multiple) for Ohio. Vertically integrated utilities are assigned a -2x discount on regulatory and execution risks. For the unregulated portion, we apply a 3.5x discount to the legacy energy supply and marketing business and an 8x premium to the contracted renewables business to reflect sale aspirations. Our valuation reflects that the Kentucky Power sale pending appears to be nearing close. We note that electric peer P/E multiple is grossed up for a year by 5% to reflect capital appreciation across the sector.

Risks to achievement of the price objective are 1) regulatory outcomes are less favorable than expected, which could result in reduced return on equity (ROE), 2) large capital intensive projects are subject to delays or cost overruns, which can change the return profile, 3) natural disasters or catastrophic events can affect system reliability and are subject to regulatory cost recovery risk, 4) utilities are subject to interest rate risk to fund their business, which affects cost of capital, 5) uncertainty around announced asset divestitures versus guidance expectations, 6) volatility in volume of electric sales, 7) other adverse regulatory, political, or similar actions.

Constellation Energy Corp (CEG)
Our $88 Price Objective is based on a 8.8% 2025E equity Free Cash Flow yield (FCF yield) on an unhedged/'open' basis. The 8.8% FCF yield represents a weighted average of 8.0% (first quartile) for the support FCF and 14.9% (third quartile) for merchant FCF, utilizing energy comparables.

Risks to achievement of the Price Objective and rating are: 1) changes in energy & capacity prices, 2) retail margins, renewals, win rate, & overall market share, 3) operating, capital, and fuel costs, 4) capital allocation decisions including M&A, 5) nuclear incidents or accidents, 6) legislative and regulatory changes, 7) nuclear fuel costs & availability, 8) change in environmental standards for generation assets, 9) management turnover, 10) pension & nuclear decommissioning trust returns, 11) credit rating agency requirements, and 12) interest rates.

Dominion Energy (D)
We value Dominion Energy at $52 using a 2025E sum-of-the-parts analysis. For the utilities we apply the comparable electric (15.8x) and gas (16.8x) peer multiples which we gross-up by 5% to reflect capital appreciation across the sector. We apply -1.5 discount for for base Virginia (-9%). We apply discount adjustments to lower value utility sources in South Carolina (NND) and Utah (Wexpro) as well as the South Carolina bill credits.

Contracted assets are valued at: 13x EV/EBITDA Cove Point, 5x Millstone (13% FCF Yield), and 5x for renewables. For remaining debt beyond that allocated to state utilities, we include a 50% weight towards a straight netting of leverage, with the remaining 50% using a P/E multiple on associated interest expense, in line with the methodology employed for diversified utilities with relatively higher levers of leverage. We lastly include prospective interest rate exposure that is not impacting near-term estimates due to hedges.

Risk to achievement of the Price Objective are 1) regulatory, legislative, and political actions, 2) ability to earn or exceed the regulatory allowed ROE, 3) capital markets and equity requirements, 4) changes to the capital expenditure and rate base forecast for both regulated & unregulated segments, 5) volatility in interest rates and pension returns, 6) changes in commodity prices, 7) natural disasters, 8) inflation, & 9) offshore wind construction.

Duke Energy (DUK)
Our $107 PO is derived from a sum-of-the-parts valuation. We value the Electric and Gas utilities using peer 2025E P/E multiples. We apply a 3x multiple premium to Duke's operations in FL and 2x in IN to reflect more favorable regulatory environments (and potential generation opps in IN). We apply a 2x multiple to the Carolinas given upside to spending in improving regulatory construct combined with latest IRP & wider legislative reforms into 2023. We value the other regulated electric utilities at 15.8x and the gas utilities at peer group multiples of 16.6x 2025E P/E, respectively. Both electric and gas peer P/E multiples are grossed up by 5% for the groups CAGR to reflect capital appreciation across the sector. The commercial midstream, and transmission are valued

on a 2025E EV/EBITDA basis. We use 8.0x multiples for midstream and 9.0x for transmission segments. We subtract out the impact of commercial debt, and add back for the renewable debt.
Upside risks: constructive rate case results, higher capital expenditure additions vs our assumptions, lower interest rates. Downside risks: poor rate case results, operating errors, and negative changes in the regulatory environment, Macro risks: Increases in interest rates and decreases in equity market valuations.

NiSource Inc (NI)
Our $32 PO is based on a sum of the parts valuation. We value each gas and electric utility separately using 2025 forward P/E multiples that are marked-to-market to the latest peer utility multiples of 16.3x for gas and 15.8x for electric. Consistent across our coverage universe, the base electric & gas peer P/E multiples are grossed up by +5% to reflect capital appreciation across the sector. We utilize a +1x premium for NIPSCO Gas/Electric due to generally constructive regulatory outcomes. We subtract the value of excess holding company debt at the parent not supporting the utility subsidiaries.

Positive and negative risks to our Price Objective are changes in 1) regulatory, political, and legislative outcomes, 2) ability to execute on capital expenditure plan, 3) inflation, operating expense, and interest rates as they influence earned rates of return, 4) customer count and load growth, 5) commodities, 6) natural disasters, 7) pension plan returns, 8) equity and asset sale needs.

OGE Energy Corp (OGE)
Our OGE PO is $39/share based on a sum of the parts. For the utility and holdco we apply the FY25 peer multiple of 16.0x. Electric peer P/E multiple is grossed up for +5% to reflect capital appreciation across the sector, a consistent methodology across our coverage universe. We apply a 1x premium for incremental growth not yet embedded in plan as well as the above-average balance sheet metrics

Upside and downside risks are changes in: 1) regulatory, legislative, and political outcomes, 2) ability to earn the allowed rate of return, 3) interest rates and commodity costs, 4) customer and sales growth, particularly energy and data mining customers, 5) natural disasters, 6) credit rating agency requirements, 7) capital expenditure plan, and 8) request for proposal outcomes.

[R1] Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. *VOLATILITY RISK RATINGS*, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. *INVESTMENT RATINGS* reflect the analyst's assessment of both a stock's: absolute total return potential as well as its attractiveness for investment relative to other stocks within its *Coverage Cluster* (defined below). There are three investment ratings: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster[R2]
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

[R2]Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.

Power: PJM Capacity Auction Delayed – Expectations Low

Ahead of the forthcoming PJM Interconnection 2024/2025 capacity auction, we prepared our latest expectations with $40/MW-day for RTO and an upside bias for Eastern zones. **Last evening PJM unexpected delayed the auction results** and will post "as soon as possible" with at least one business day notice. The importance of the auction has clearly diminished but total capacity revenues still represented 3-5% of adjusted EBITDA and free cash flow for Vistra (VST) and Constellation Energy (CEG). *We maintain Buy ratings on the three PJM power exposed names: Vistra, Constellation Energy, and PSEG (PEG). We see a positive skew for IPPs, as expectations have been almost non-existent this year on this key datapoint.* See our full forecast here: US Electric Utilities & IPPs: Powering Down? Coal the Wildcard in 2024/2025 PJM Auction: Positive Skew.

ETR: LA PSC Meeting Kickstarts Regulatory Storm

Last week the Louisiana Public Service Commission (PSC) Business & Executive Session meeting discussed Entergy Louisiana (ETR) and subsidiary System Energy Resources Inc. (SERI) in an unflattering light. Specifically, at least two of the Commissioners (Greene & Campbell) made cautious comments about the company's storm cost recovery prudency and reliability. Entergy's proposal for ~$1.6Bn Hurricane Ida storm securitization (LPSC Docket 36350 & Agenda #16) was **neither approved nor denied, simply there was not enough votes to pass the motion for approval.** The Commission reignited discussions about ways in which Entergy shareholders could share in storm costs. Select Commissioner argued that the ultimate standard of just & reasonable rates superseded a prudency determination on storm costs such that the Commission was not legally required to pass 100% of storm costs to customers. The Staff emphasized that storm cost recovery 'was not set in stone' and there was ambiguity based on the Federal and state decisions. The Commissioner commentary was bifurcated with two strongly advocating for Entergy having "skin in the game". Commissioner Greene's actions were the most concerning for the company as he created a presentation discussing his opinion of how poor the company's reliability had been followed, by an open letter titled "PSC Refuses $1.6Bn Entergy Storm Increase". The incremental angle is that 18-year incumbent Commissioner Lambert Boissiere III lost a run-off election to challenger Davante Lewis who made negative comments about Entergy when campaigning and after the election. With regards to SERI (FERC Docket EL20-72 & LPSC Agenda item #14), we did not get the impression that the PSC was interested in a comprehensive settlement. See background here: Louisiana Volatility for ETR at SERI plus LPSC Election.

The latest regulatory updates for Entergy have clearly been negative and raise questions about the ability to achieve constructive outcomes. We look to engage more with Louisiana stakeholders to see if there are areas of positive alignment such as Entergy's forthcoming storm resiliency/hardening proposal anticipated in the upcoming days or renewables. As a result, we maintain Buy on shares of ETR with the potential for improvement with the key assumption that the company gets full storm cost recovery.

Indiana Utilities: Regulatory catch-up remains constructive

We recently engaged with Indiana stakeholders to discuss the latest regulatory backdrop for the utilities in the state. Our conversation touched on key areas of focus for the Indiana Utility Regulatory Commission (IURC). Not surprisingly, customer affordability is issue number one with residential rates up +14% y/y statewide based on September data from the Energy Information Administration (EIA), outpacing broader inflation during this time period. This reflects both higher base rates as well as fuel pass throughs. Opportunities for reducing customer bills in the near term appear fairly limited as utilities and policymakers have utilized 'low hanging fruit'. Here we see Northern Indiana Public Service Co (NIPSCO – NiSource [NI] subsidiary) as differentiating itself for proactively reducing 2023-2024 capital as a measure to mitigate rate increases. Based on our conversations we do not believe that the capital reduction was coordinated with or otherwise dictated by regulators, with the company maintaining real-time communications with the IURB as it developed its updated plan.

Overall we sense an appetite from regulators for original and novel ("creative") ideas for cutting costs, with the IURB preferring that utilities bring proposals rather than being put in a place as a regulator to impose policy. One specific lever that remains available is reduction of the 7% state sales tax applicable to utility bills. Given relatively strong state finances this could be an area of alignment, but legislative action would be necessary. Another key theme highlighted during our discussion is regional coordination among members of the Midcontinent Independent System Operator (MISO) on resource adequacy. Here our stakeholder conversation suggests an acute focus on improved communication and data-sharing across states including Indiana, particularly notable as participants have different reporting standards and resource planning processes. Overbuild of renewables was a risk flagged, though likely this remains relatively remote in the near term.

We did not perceive any incremental shift in tone toward changes in ownership of utilities, either via outright consolidation or stake sales in the form of DUK's 19.9% sale announced in 2021. The IURC indicated an overall level of satisfaction with the 'early and often' communication model that utilities take when considering a transaction, which in our view suggests a constructive stance. CenterPoints' (CNP) Vectren and AES Indiana (AES Corp [AES] subsidiary) were highlighted as utilities with improved relationships across the state of Indiana, though still with some room for improvement on bringing creative solutions to deal with bill inflation.

We walk away from our conversations continuing to view Indiana as a constructive regulatory jurisdiction. We maintain Buy on shares of CNP, AES, and NI each of which trade at their respective attractive risk/reward profiles.

Source: BofA Global Research

BofA GLOBAL RESEARCH

Price objective basis & risk

AES (AES)
Our price objective is $28 and is based on a sum of the parts analysis applying a blended valuation approach, the summation of 1) EV/EBITDA approach across global generation assets. We use an 8.0x base for US peer IPPs and apply a +6x premium for US distributed generation for further growth expectations, valuing them at 14x 24E EV/EBITDA. Meanwhile, we value the DevCo using a 10% discount on 4.5GW+ of annual renewables beyond '22 given market dynamics. In Asia, we apply various multiples based upon jurisdiction risk across the rest of the portfolio and overall investor appetite as reflected in local peer multiples. We use mark-to-market value of publicly listed LATAM subs as well as apply a P/E methodology for US regulated utilities using the peer multiple of 16.1x 24E. We also credit the company with Vietnam and its investment in Uplight.

Risks to our price objective and rating are: 1) regulatory, legislative, and political changes, 2) international currencies devaluing against the US dollar, 3) changes in value of Fluence (FLNC) subsidiary stock, 4) overall inability to execute on the renewables plan, 5) ability to control costs, 6) financing needs, and 7) tax policies.

CenterPoint Energy (CNP)
Our CenterPoint Energy PO is $30 using a 2024E sum-of-the-parts methodology. We apply the 14.4x electric and 13.5x gas base multiples which we gross-up +5% across our coverage to reflect sector growth. We apply a 20% (3.0x) premium due to above-average growth and constructive jurisdictions.

Previously we utilizes a 2024E P/E sum-of-the-parts with 17.3x electric and 16.8x gas P/Es and a 25% (4.0x) premium.

Risks are 1) ability to deploy capital expenditures and earn the regulatory allowed rate of return, 2) regulatory/political/legislative actions, 3) changes in equity needs, 4) interest rates, 6) natural disasters, and 7) management changes.

Constellation Energy Corp (CEG)
Our $109 Price Objective is based on a 11.8% 2024E equity Free Cash Flow yield (FCF yield) on an unhedged/'open' basis. The 11.8% FCF yield represents the median of energy comparable peers.

Risks to achievement of the Price Objective and rating are: 1) changes in energy & capacity prices, 2) retail margins, renewals, win rate, & overall market share, 3) operating and capital costs, 4) capital allocation decisions including M&A, 5) nuclear incidents or accidents, 6) legislative and regulatory changes, 7) nuclear fuel costs & availability, 8) change in environmental standards for generation assets, 9) management turnover, 10) pension & nuclear decommissioning trust returns, 11) credit rating agency requirements, and 12) interest rates.

Entergy (ETR)
Our $135 Price Objective (PO) is based on a sum-of-the-parts analysis. The 2024E electric utilities average P/E of 17.8x (vs 17.3x previously) is grossed-up +5%, to 18.7x, to reflect capital appreciation across the sector. We apply in-line P/E multiples to the subsidiaries except for +2x Texas to reflect the constructive regulation environment and -1x New Orleans based upon historical contentious proceedings. We net out 50% of the parent HoldCo long-term debt and apply a P/E multiple to 50% of the interest expense.

Risks to achievement of our Price Objective is 1) changing rate-making mechanisms or

unexpected regulatory outcomes, 2) earned return on equities by jurisdiction, 3) hurricanes and other weather events, 4) nuclear accidents, safety events, or other incidents, 5) interest rates fluctuations, 6) equity issuances relative to management's forecast and access to capital markets, 7) ability to deploy regulated capital expenditures, 8) pension fund performance and 9) costs and operational volumes at the wholesale commodity subsidiary.

NiSource Inc (NI)
Our $29 PO is based on a sum of the parts valuation. We value each gas and electric utility separately using 2025 forward P/E multiples that are marked-to-market to the latest peer utility multiples of 14.4x for gas and 14.8x for electric. We reduce relative premiums to +1x to NIPSCO Gas/Electric given sale & reduce other biz units to in-line with base peer P/E multiple. Latest capex guidance lowered '23 expectations, but moved up '24 spending. We highlight incremental renewable buildout opportunities, but acknowledge industrial gen load migration risk. While there still could be some near-term headwinds for solar, we are confident in mgmt. ability to manage and mitigate the impacts.

Consistent across our coverage universe, the base electric & gas peer P/E multiples are grossed up by +5% to reflect capital appreciation across the sector. We subtract the value of excess holding company debt at the parent not supporting the utility subsidiaries.

Risks to our Price Objective are changes in 1) regulatory, political, and legislative outcomes, 2) customer count and load growth, 3) interest rates, 4) commodities, 5) natural disasters, 6) capital expenditures, 7) equity and asset sale needs.

Public Service Enterprise Group (PEG)
Our $67 PO is derived from our 2025 sum of the parts valuation. For the regulated utilities we utilize the electric (16.4x) and gas (16.4x) 2025E sector P/E multiples, which we then gross-up by 5% to reflect capital appreciation across the sector. We apply an in-line group multiple to PSE&G Utility given the utility's below-average growth forecast, which is offset by our view that New Jersey remains a favorable jurisdiction, with PSE&G Utility offering low-risk transmission & distribution (T&D) profile.

Positive or negative risks to achievement of the price objective are 1) regulatory/political/legislative outcomes, 2) changes in capital expenditures relative to forecasts, 3) nuclear incidents and natural disasters, 4) equity and capital markets needs, cost and timing adjustments for offshore wind developments, 5) ability to earn the regulated rate of return, 6) inflation, 7) interest rates, and 8) pension returns.

Vistra Energy (VST)
Our $30 price objective is based on a 2024E SOTP valuation. We assign a discount/premium to the peer group EV/FCF multiple of 7.0x for each fuel within each geography, depending on our specific views for the asset type and market: We include the full $275mn of margin-enhancing initiatives as well as $200mn optimization benefits and the $275mn of synergies related to the DYN acquisition. We further capitalize our estimated income tax for the combined entity to reflect the higher tax burden than peers, and we include a $50mn NPV of TRA payments. We reflect Vistra Zero accretion at 12x EV/EBITDA, with '26 FCF discounted at 12% back to '23. We also reflect $500mn of ERCOT securitization proceeds (implied in net debt balance). Our average implied 24E EV/FCF multiple for the overall business is 4.8x based on our latest Mtm of commodities. We include impact from future bill credits from Uri storm & NPV of ERCOT uplifts, exclude Koch litigation.

Downside risks: 1) declining wholesale power & capacity prices, 2) competitive & regulatory change to retail businesses, principally in Texas, 3) operational issues

pertaining to running power assets including Nuclear asset in Texas.

Upside risks: 1) VST may improve its retail margins and retain customers, 2) VST may beat its margin enhancements initiatives, 3) VST may see a decrease in the price of key inputs such as natural gas and coal, and 4) VST may see an increase in wholesale power prices.

Disclosures

Important Disclosures

Equity Investment Rating Distribution: Energy Group (as of 30 Sep 2022)

Coverage Universe	Count	Percent	Inv. Banking Relationships [R1]	Count	Percent
Buy	77	61.11%	Buy	63	81.82%
Hold	28	22.22%	Hold	21	75.00%
Sell	21	16.67%	Sell	11	52.38%

Equity Investment Rating Distribution: Utilities Group (as of 30 Sep 2022)

Coverage Universe	Count	Percent	Inv. Banking Relationships [R1]	Count	Percent
Buy	77	53.47%	Buy	54	70.13%
Hold	33	22.92%	Hold	26	78.79%
Sell	34	23.61%	Sell	22	64.71%

Equity Investment Rating Distribution: Global Group (as of 30 Sep 2022)

Coverage Universe	Count	Percent	Inv. Banking Relationships [R1]	Count	Percent
Buy	1839	53.46%	Buy	1071	58.24%
Hold	800	23.26%	Hold	498	62.25%
Sell	801	23.28%	Sell	379	47.32%

[R1] Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. *VOLATILITY RISK RATINGS*, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. *INVESTMENT RATINGS* reflect the analyst's assessment of both a stock's: absolute total return potential as well as its attractiveness for investment relative to other stocks within its *Coverage Cluster* (defined below). There are three investment ratings: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster[R2]
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

[R2]Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Price Charts for the securities referenced in this research report are available on the Price Charts website, or call 1-800-MERRILL to have them mailed.
BofAS or one of its affiliates acts as a market maker for the equity securities recommended in the report: AES Corp, CenterPoint Energy, Constellation Energy, Entergy Corp., NiSource Inc, Public Service, Vistra Energy.
BofAS or an affiliate was a manager of a public offering of securities of this issuer within the last 12 months: NiSource Inc.
The issuer is or was, within the last 12 months, an investment banking client of BofAS and/or one or more of its affiliates: AES Corporation, CenterPoint, Constellation Energy, Entergy, NiSource Inc, Public Service, Vistra Energy.
BofAS or an affiliate has received compensation from the issuer for non-investment banking services or products within the past 12 months: AES Corporation, CenterPoint, Constellation Energy, Entergy, NiSource Inc, Public Service, Vistra Energy.
The issuer is or was, within the last 12 months, a non-securities business client of BofAS and/or one or more of its affiliates: AES Corporation, CenterPoint, Constellation Energy, Entergy, NiSource Inc, Public Service, Vistra Energy.
BofAS or an affiliate has received compensation for investment banking services from this issuer within the past 12 months: AES Corporation, CenterPoint, Constellation Energy, Entergy, NiSource Inc, Public Service.
BofAS or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer or an affiliate of the issuer within the next three months: AES Corporation, CenterPoint, Constellation Energy, Entergy, NiSource Inc, Vistra Energy.
BofAS together with its affiliates beneficially owns one percent or more of the common stock of this issuer. If this report was issued on or after the 9th day of the month, it reflects the ownership position on the last day of the previous month. Reports issued before the 9th day of a month reflect the ownership position at the end of the second month preceding the date of the report: Entergy, NiSource Inc, Vistra Energy.
BofAS or one of its affiliates is willing to sell to, or buy from, clients the common equity of the issuer on a principal basis: AES Corp, CenterPoint Energy, Constellation Energy, Entergy Corp., NiSource Inc, Public Service, Vistra Energy.
The issuer is or was, within the last 12 months, a securities business client (non-investment banking) of BofAS and/or one or more of its affiliates: AES Corporation, CenterPoint, Constellation Energy, Entergy, NiSource Inc, Public Service, Vistra Energy.
BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

Other Important Disclosures

From time to time research analysts conduct site visits of covered issuers. BofA Global Research policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits.
Prices are indicative and for information purposes only. Except as otherwise stated in the report, for any recommendation in relation to an equity security, the price referenced is the publicly traded price of the security as of close of business on the day prior to the date of the report or, if the report is published during intraday trading, the price referenced is indicative of the traded price as of the date and time of the report and in relation to a debt security (including equity preferred and CDS), prices are indicative as of the date and time of the report and are from various sources including BofA Securities trading desks.
The date and time of completion of the production of any recommendation in this report shall be the date and time of dissemination of this report as recorded in the report timestamp.

Recipients who are not institutional investors or market professionals should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.
Officers of BofAS or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments.
Refer to BofA Global Research policies relating to conflicts of interest.
"BofA Securities" includes BofA Securities, Inc. ("BofAS") and its affiliates. Investors should contact their BofA Securities representative or Merrill Global Wealth Management financial advisor if they have questions concerning this report or concerning the appropriateness of any investment idea described herein for such investor. "BofA Securities" is a global brand for BofA Global Research.

General Investment Related Disclosures:

Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities.

This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.

Securities clients and may not be redistributed, retransmitted or disclosed, in whole or in part, or in any form or manner, without the express written consent of BofA Securities. BofA Global Research information is distributed simultaneously to internal and client websites and other portals by BofA Securities and is not publicly-available material. Any unauthorized use or disclosure is prohibited. Receipt and review of this information constitutes your agreement not to redistribute, retransmit, or disclose to others the contents, opinions, conclusion, or information contained herein (including any investment recommendations, estimates or price targets) without first obtaining express permission from an authorized officer of BofA Securities.

Materials prepared by BofA Global Research personnel are based on public information. Facts and views presented in this material have not been reviewed by, and may not reflect information known to, professionals in other business areas of BofA Securities, including investment banking personnel. BofA Securities has established information barriers between BofA Global Research and certain business groups. As a result, BofA Securities does not disclose certain client relationships with, or compensation received from, such issuers. To the extent this material discusses any legal proceeding or issues, it has not been prepared as nor is it intended to express any legal conclusion, opinion or advice. Investors should consult their own legal advisers as to issues of law relating to the subject matter of this material. BofA Global Research personnel's knowledge of legal proceedings in which any BofA Securities entity and/or its directors, officers and employees may be plaintiffs, defendants, co-defendants or co-plaintiffs with or involving issuers mentioned in this material is based on public information. Facts and views presented in this material that relate to any such proceedings have not been reviewed by, discussed with, and may not reflect information known to, professionals in other business areas of BofA Securities in connection with the legal proceedings or matters relevant to such proceedings.

This information has been prepared independently of any issuer of securities mentioned herein and not in connection with any proposed offering of securities or as agent of any issuer of any securities. None of BofAS any of its affiliates or their research analysts has any authority whatsoever to make any representation or warranty on behalf of the issuer(s). BofA Global Research policy prohibits research personnel from disclosing a recommendation, investment rating, or investment thesis for review by an issuer prior to the publication of a research report containing such rating, recommendation or investment thesis.

Any information relating to the tax status of financial instruments discussed herein is not intended to provide tax advice or to be used by anyone to provide tax advice. Investors are urged to seek tax advice based on their particular circumstances from an independent tax professional.

The information herein (other than disclosure information relating to BofA Securities and its affiliates) was obtained from various sources and we do not guarantee its accuracy. This information may contain links to third-party websites. BofA Securities is not responsible for the content of any third-party website or any linked content contained in a third-party website. Content contained on such third-party websites is not part of this information and is not incorporated by reference. The inclusion of a link does not imply any endorsement by or any affiliation with BofA Securities. Access to any third-party website is at your own risk, and you should always review the terms and privacy policies at third-party websites before submitting any personal information to them. BofA Securities is not responsible for such terms and privacy policies and expressly disclaims any liability for them.

All opinions, projections and estimates constitute the judgment of the author as of the date of publication and are subject to change without notice. Prices also are subject to change without notice. BofA Securities is under no obligation to update this information and BofA Securities ability to publish information on the subject issuer(s) in the future is subject to applicable quiet periods. You should therefore assume that BofA Securities will not update any fact, circumstance or opinion contained herein.

Subject to the quiet period applicable under laws of the various jurisdictions in which we distribute research reports and other legal and BofA Securities policy-related restrictions on the publication of research reports, fundamental equity reports are produced on a regular basis as necessary to keep the investment recommendation current.

Certain outstanding reports or investment opinions relating to securities, financial instruments and/or issuers may no longer be current. Always refer to the most recent research report relating to an issuer prior to making an investment decision.

In some cases, an issuer may be classified as Restricted or may be Under Review or Extended Review. In each case, investors should consider any investment opinion relating to such issuer (or its security and/or financial instruments) to be suspended or withdrawn and should not rely on the analyses and investment opinion(s) pertaining to such issuer (or its securities and/or financial instruments) nor should the analyses or opinion(s) be considered a solicitation of any kind. Sales persons and financial advisors affiliated with BofAS or any of its affiliates may not solicit purchases of securities or financial instruments that are Restricted or Under Review and may only solicit securities under Extended Review in accordance with firm policies.

Neither BofA Securities nor any officer or employee of BofA Securities accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this information.

No 4Q fireworks anticipated after November Analyst Day

We reiterate our Buy rating on the shares of NiSource into 2023 after the company's November 2022 Analyst Day, which set a more conservative outlook. See our deep dive here: Our Updated Take on Shares Post A-Day: 'Terminal EPS' Intact - Reiterate Buy 08 November 2022. With freshly updated guidance and no major developments over the past two months, we anticipate a relatively low-key 4Q call with consistent messaging. We will be listening for management characterization of the NIPSCO electric rate case process with February the critical settlement window. **See details in the full report.**

Indiana fills the calendar for 2023 – lots to watch

After the recent resolution of the Ohio and Pennsylvania rate cases we have characterized the regulatory outlook as 'relatively quiet'; however, there are still critical proceedings in Indiana to watch. For NIPSCO we are monitoring the **(1)** Electric rate case; **(2)** minority interest sale process; **(3)** request for proposals; and **(4)** fuel adjustment clause increase. There is some degree of comfort in Indiana's track record of generally being constructive and NiSource's proactive efforts to reduce the bill impact. NI reduced capex to moderate the customer bill increase closer to ~3% CAGR from ~5% under the prior plan and has also proposed staggered increases in September 2023 (+8%), March 2024 (+3%), & July 2024 (+5%). Based on our latest stakeholder check-in, we still see a solid relationship with key parties. Nevertheless, it is a +17% rate increase request (+$19 per month) and will draw attention. *Our investor conversations have focused on the significant Indiana activity as an overhang on shares, limited near-term positive re-rating. A reasonable settlement of the Indiana rate case could be the catalyst beyond NIPSCO sale.*

Valuation: Increase PO +$3/sh on MtM

Our PO increases +$3/sh to $32 based primarily upon the peer multiple increases – details on Page 6. We slightly increase our FY22-FY23 estimates based on our detailed earnings walk in the full report; however, trim the long-term 2026-2027 estimates to embed additional conservatism. Our new 2021A-2027E EPS CAGR of 7.5% is still above the 6-8% midpoint, but now more aligned with consensus forecasts.

Company Sector

Natural Gas-Local Distribution Companies

Company Description

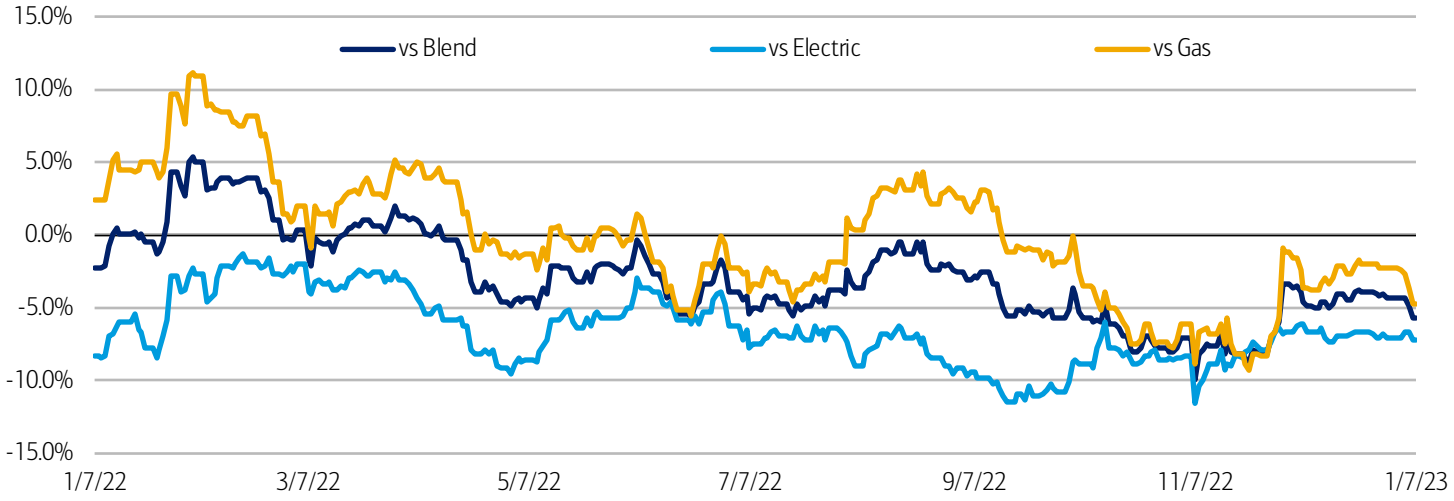
NiSource Inc. (NI) is a fully-regulated utility company serving over 3 million natural gas customers and 500,000 electric customers across six states through its local Columbia Gas and NIPSCO franchises. Key states are Indiana, Ohio, Pennsylvania, Kentucky, Virginia, and Maryland. There is a smaller Federally regulated electric transmission business as well. NI generates substantially all of its operating income through these rate-regulated businesses.

Investment Rationale

We rate NiSource (NI) Buy premised on an above-average 6-8% EPS growth profile, improving balance sheet, opportunity for accretive asset sales, and decarbonization investment opportunity. The company's 2022 Investor Day update detailed annual growth within the with a relatively smooth growth profile an advantage vs some peers with non-linear growth. Shares can positively re-rate with successful execution of the Indiana plan.

Stock Data

Average Daily Volume	3,691,210



Quarterly Earnings Estimates

	2021	2022
Q1	0.77A	0.75A

Q3	0.11A	0.10A
Q4	1.10A	0.48E

NiSource: Remain positive on the outlook

We reiterate our Buy rating on the shares of NiSource into 2023 where we see a busy but manageable Indiana regulatory calendar. Even constructive jurisdictions had unexpected negative curveballs in 2022, notably Wisconsin and Michigan, so we are cognizant of the risks here. In a world where we see more risks than opportunities overall (2023 outlook report here: Risks Outnumber Opportunities in the "Lost Year"), we see NiSource's plan as reasonable. The actions to proactively reduce the customer bill impacts (capex reduction and staggering rate increases) should help to deliver constructive outcomes. We see mgmt. as having already 'taken the hit' for customer affordability as part of its efforts to its state regulators.

Exhibit 1: NI Relative 2023E P/E versus Similar P/E Peers (Dark Blue) and Overall Utilities Index (Light Blue)
NiSource should be able to re-rate positively if it can successfully execute in 2023

BofA GLOBAL RESEARCH

All eyes on Indiana

Critical period of rate case commencing

In the NIPSCO Electric rate case (Cause 45772) the current procedural schedule calls for intervenor testimony by January 20th and NIPSCO rebuttal testimony by February 16th. There is a formal settlement opportunity through February 27th which could influence the subsequent schedule. Currently there are hearings scheduled for March 13-31st and an outside 300-day statutory deadline of August 2nd. *Depending on the updates before the late February 2023 earnings call, this could be an opportunity for management to share thoughts on intervenor testimony at a high-level and the prospects for a settlement, assuming one has not been reached yet.*

Of the estimated +$19/month increase from the rate case, NiSource has proposed +$10/month effective September 2023, +$3/month effective March 2024, and +$6/month effective July 2024.

Further details on Indiana broadly are available below:

Fuel adjustment clause drawing additional attention

The quarterly Fuel Adjustment Clause (FAC) proceeding has had higher than usual media and intervenor attention due to the magnitude (Cause 38706 FAC-137). NIPSCO is requesting a +$6-9/month increase in February 2023 which follows a +$5/month increase in the prior FAC period. Unfortunately, NIPSCO had significant major forced outages during 3Q22 at Schahfer 16 (continue downtime after significant turbine damage), Schahfer 17-18 (boiler tube leaks), and Michigan City 12 (superheat spray valve). Peer Southern Indiana Gas and Electric Company (CNP CenterPoint subsidiary) has made a larger application as well.

See further details on Indiana and fuel proceedings across the US broadly in our report: Fuel on My Mind: Indiana, West Virginia, & Kentucky Latest States to Watch 01 December 2022

Expect elevated scrutiny in these proceeds with elevated power/gas prices during a period of unplanned generator outages.

4Q22/FY22 EPS In-Line

Our $0.48 4Q22 adjusted EPS estimate puts NiSource FY22E EPS at $1.45, in-line with its recently tightened FY22 guidance midpoint of $1.44-$1.56. There is +$0.09 YoY improvement in 4Q22, a large increase which is common given the seasonality of the business and timing of rate relief under the general rate cases and trackers. A key assumption is that the YTD trend of sharply higher operation & maintenance (O&M costs) moderate. Management noted that there are some discrete drivers of the +8% YoY YTD and that the rate could inflect favorably.

BofA GLOBAL RESEARCH

FY23: Underpinned by substantial rate relief

The $1.50-$1.57 2023 EPS guidance presented at the Analyst Day appears reasonable to us, but will require a reasonable and timely NIPSCO Electric general rate case outcome. Due to the seasonality of Indiana electric and the proposal to stagger the rate increase, the earnings benefit will be spread into FY24 and FY25. If there is an unfavorable element in Indiana, we would expect management to flex O&M lower and pull-forward some savings into 2023 embedded in the later periods of the plan.

Adjusted EPS Estimates: Now largely in-line with Street

We slightly increase our FY22-FY23 estimates based on our detailed earnings walks above but moderate the long-term 2026-2027 estimates to embed additional conservatism. There is still investor confusion about the intersection of the prior 2021-2024 7-9% and the new 2021-2027 6-8% EPS CAGRs which has been compounded by the messaging of annual 6-8% YoY growth. Management's commentary on the 4Q22 call will be dissected for any change in tone.

BofA GLOBAL RESEARCH

Valuation: Lift valuation primarily on MtM

The NiSource valuation is based on a 2025 sum of the parts analysis. We apply the latest natural gas (16.1x vs 14.4x previously) and electric (16.0x vs 14.8x previously) base multiples that we gross-up +5% across the coverage universe to reflect sector capital appreciation.

We continue to ascribe a +1x premium for NIPSCO Gas/Electric to reflect the favorable characteristics of the jurisdiction. Indiana has fairly consistently delivered above-average regulatory outcomes. *The +$3/sh increase is driven entirely by the change in group multiple with no material adjustments to our FY25 EPS estimate (-$0.01 vs prior).*

Exhibit 5: NiSource Sum of the Parts Valuation

Price objective basis & risk

NiSource Inc (NI)
Our $32 PO is based on a sum of the parts valuation. We value each gas and electric utility separately using 2025 forward P/E multiples that are marked-to-market to the latest peer utility multiples of 16.1x for gas and 16.0x for electric. Consistent across our coverage universe, the base electric & gas peer P/E multiples are grossed up by +5% to reflect capital appreciation across the sector. We utilize a +1x premium for NIPSCO Gas/Electric due to generally constructive regulatory outcomes. We subtract the value of excess holding company debt at the parent not supporting the utility subsidiaries.

Positive and negative risks to our Price Objective are changes in 1) regulatory, political, and legislative outcomes, 2) ability to execute on capital expenditure plan, 3) inflation, operating expense, and interest rates as they influence earned rates of return, 4) customer count and load growth, 5) commodities, 6) natural disasters, 7) pension plan returns, 8) equity and asset sale needs.

NiSource Inc (NI) Price Chart

B: Buy, N: Neutral, U: Underperform, PO: Price Objective, NA: No longer valid, NR: No Rating

The Investment Opinion System is contained at the end of the report under the heading "Fundamental Equity Opinion Key". Dark grey shading indicates the security is restricted with the opinion suspended. Medium grey shading indicates the security is under review with the opinion withdrawn. Light grey shading indicates the security is not covered. Chart is current as of a date no more than one trading day prior to the date of the report.

Equity Investment Rating Distribution: Energy Group (as of 31 Dec 2022)

Coverage Universe	Count	Percent	Inv. Banking Relationships [R1]	Count	Percent
Buy	82	59.85%	Buy	65	79.27%
Hold	32	23.36%	Hold	21	65.63%
Sell	23	16.79%	Sell	14	60.87%

Equity Investment Rating Distribution: Utilities Group (as of 31 Dec 2022)

Coverage Universe	Count	Percent	Inv. Banking Relationships [R1]	Count	Percent
Buy	72	48.98%	Buy	51	70.83%
Hold	38	25.85%	Hold	29	76.32%
Sell	37	25.17%	Sell	25	67.57%

Equity Investment Rating Distribution: Global Group (as of 31 Dec 2022)

Coverage Universe	Count	Percent	Inv. Banking Relationships [R1]	Count	Percent
Buy	1853	52.58%	Buy	1040	56.13%
Hold	840	23.84%	Hold	493	58.69%
Sell	831	23.58%	Sell	404	48.62%

[R1] Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. *VOLATILITY RISK RATINGS*, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. *INVESTMENT RATINGS* reflect the analyst's assessment of both a stock's: absolute total return potential as well as its attractiveness for investment relative to other stocks within its *Coverage Cluster* (defined below). There are three investment ratings: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster[R2]
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

[R2] Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Price Charts for the securities referenced in this research report are available on the Price Charts website, or call 1-800-MERRILL to have them mailed.
BofAS or one of its affiliates acts as a market maker for the equity securities recommended in the report: NiSource Inc.
BofAS or an affiliate was a manager of a public offering of securities of this issuer within the last 12 months: NiSource Inc.
The issuer is or was, within the last 12 months, an investment banking client of BofAS and/or one or more of its affiliates: NiSource Inc.
BofAS or an affiliate has received compensation from the issuer for non-investment banking services or products within the past 12 months: NiSource Inc.
The issuer is or was, within the last 12 months, a non-securities business client of BofAS and/or one or more of its affiliates: NiSource Inc.

BofAS or an affiliate has received compensation for investment banking services from this issuer within the past 12 months: NiSource Inc.
BofAS or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer or an affiliate of the issuer within the next three months: NiSource Inc.
BofAS together with its affiliates beneficially owns one percent or more of the common stock of this issuer. If this report was issued on or after the 9th day of the month, it reflects the ownership position on the last day of the previous month. Reports issued before the 9th day of a month reflect the ownership position at the end of the second month preceding the date of the report: NiSource Inc.
BofAS or one of its affiliates is willing to sell to, or buy from, clients the common equity of the issuer on a principal basis: NiSource Inc.
The issuer is or was, within the last 12 months, a securities business client (non-investment banking) of BofAS and/or one or more of its affiliates: NiSource Inc.
BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

Other Important Disclosures

From time to time research analysts conduct site visits of covered issuers. BofA Global Research policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits.
Prices are indicative and for information purposes only. Except as otherwise stated in the report, for any recommendation in relation to an equity security, the price referenced is the publicly traded price of the security as of close of business on the day prior to the date of the report or, if the report is published during intraday trading, the price referenced is indicative of the traded price as of the date and time of the report and in relation to a debt security (including equity preferred and CDS), prices are indicative as of the date and time of the report and are from various sources including BofA Securities trading desks.
The date and time of completion of the production of any recommendation in this report shall be the date and time of dissemination of this report as recorded in the report timestamp.

Recipients who are not institutional investors or market professionals should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.
Officers of BofAS or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments.
Refer to BofA Global Research policies relating to conflicts of interest.
"BofA Securities" includes BofA Securities, Inc. ("BofAS") and its affiliates. Investors should contact their BofA Securities representative or Merrill Global Wealth Management financial advisor if they have questions concerning this report or concerning the appropriateness of any investment idea described herein for such investor. "BofA Securities" is a global brand for BofA Global Research.

General Investment Related Disclosures:
Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities.
This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment

objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.

information.

Big updates ahead as part of annual updates

4Q earnings calls is a pivotal opportunity for many companies to comprehensively update financial guidance, for some the first time in over a year. Many updated their outlooks with 3Q earnings or the Edison Electric Institute (EEI) Financial Conference but there is still a large swath of our universe who has not yet reflected the significantly changed macro backdrop. While interest rates have moderated to start 2023, they still represent a significant headwind for many. See our Year Ahead 2023 report for details on key themes such as operating and maintained (O&M) inflation, higher interest rates, pension pressures, and Inflation Reduction Act (IRA): 23 Themes for 2023: Risks Outnumber Opportunities in the "Lost Year". The most anticipated updates are from **NEE** (renewables post-IRA and EPS guidance), **EXC** (EPS CAGR roll-forward), **CEG** (capital allocation), **SO** (2023, 2024, and LT guidance), **ES** (offshore wind, capex, and LT guidance), **AES** (2023 and LT guidance), **SRE** (LNG and capex updates), **OGE/PNW/EIX/ALE** (2023 guidance), **HE** (utility EPS CAGR), **IDA** (2023 guidance and rate case timing), and **POR** (4Q22 actuals & 2023 guidance). We have revised our POs for LNT, WEC, EIX, PEG, and SO – see inside for details.

Wait and see mode for litany of companies still

Many companies owe significant guidance updates to the market but are not expected to come with 4Q earnings due primarily to regulatory uncertainty but also select business reviews and asset sales. This includes **D/AQN** (business reviews), **MDU/SWX** (spin-offs), **NWE/EVRG** (rate case/regulatory), **FE** (CEO search & asset sale), **AEP** (asset sales), and more.

Regulatory rebuttal: opportunity for companies to respond

While somewhat distant history for some, this will be the first earnings call for select management teams to address the latest regulatory developments over the past few months: AEP, AGR, DTE, EMA, ETR, EVRG, HE, LNT, NI, SO, WEC, and California utilities. *We reiterate our preference for companies with lighter regulatory calendars and more affordable utility bills ahead. Natural gas and coal prices have eased in the last two months which should dampen some bill impacts; however, we expect continued inflation for at least 2023 given the regulatory lag inherent in fuel adjustment clauses.*

Prefer quiet updates: Top picks still PPL, PCG, & PEG

Our **top picks of PPL, PCG, and PEG** are unchanged but with higher conviction from even a few weeks ago. PPL's business update was better than even our optimistic expectations with the premium dividend growth an under-appreciated facet. PCG has struggled out of the gates in 2023 due to a mix of a broad market revision out of 2022 winners but with the acute near-term overhang from Victim Trust sales. With solid fundamentals intact, we reiterate Buy. Lastly PEG should benefit from a third-party valuation datapoint on unregulated nuclear M&A. Our NJ stakeholder engagement still shows a constructive regulatory landscape for reliability investments - look for a nice capex bump at the mid-March Analyst Day. Other equities that should have more derisked or otherwise quiet calls are AWK, PCG, DUK, NRG, and VST. NI may be in a position to provide a Indiana rate case settlement update.

Premium De-Rates & Gas Re-Rates

The premium vs value spread has compressed even further to the lowest point in the last year, despite the recent decline in interest rates over the past month. We have also seen natural gas utilities positive re-rate to near parody with electric utilities, partially due to some companies negatively rebasing.

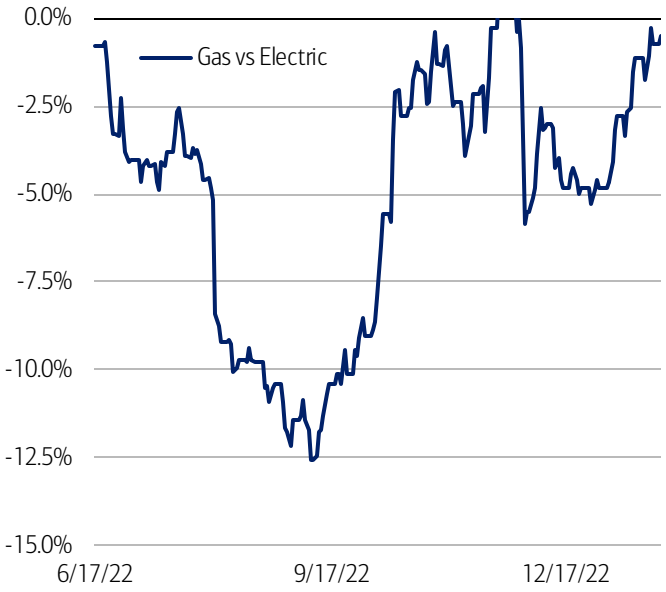

Exhibit 3: Premium vs Value Utility Relative Premium 2024E (%)

Northwest SMID Lightning Round: Cautious updates ahead

Utilities in the northwest United States and California have faced significantly higher natural gas and thus power prices in December 2022 as shown in the Exhibit below Mid-Columbia On-Peak Day Ahead Electricity Spot Prices were significantly higher YoY in December. The elevated prices have continued into January 2023 with a $159/MWh average to start the year versus $44/MWh for the same period in 2022. This creates an earnings headwind for 4Q22 as well as 1Q23/FY23 with shareholder assuming some risk in the regulatory power cost adjustment mechanisms (PCAM). This is a negative driver for **Avista Corp (AVA), Northwestern Corp (NWE), and Portland General Electric.** Avista has already filed two 8K updates about receiving margin calls from high commodity costs that forced the company to take on additional short term borrowings.

While the same dynamics are not critical factors for **Idacorp's (IDA)** Idaho Power subsidiary, we see cost pressure in 4Q22 and anticipate an overall subdued earnings profile in FY23 ahead of the anticipated rate case. IDA management has discussed for years the merits of utilizing its unique regulatory tax construct before a rate case filing which would imply a decline in earned ROE to ~9.4% from the ~9.8% we currently anticipate in FY22. This should generally be expected by investors but could come as a surprise to some who forecast more linear growth ahead.

Exhibit 5: Mid-Columbia On-Peak Day Ahead Electricity Spot Prices
December 2022 and January 2023 power prices have been significantly elevated

Source: Bloomberg

BofA GLOBAL RESEARCH

Ameren Corp. (AEE)

The latter months of 2022 saw previously highly regarded jurisdictions including Michigan and Wisconsin come out with uncharacteristically cautious rulings impacting premium utility stocks. While admittedly IL rates are up disproportionately vs adjacent states due to its restructured nature, some investors have flagged AEE as a potential next shoe to drop given its premium valuation and exposure to Missouri via its recently filed electric rate case. The Staff testimony was less constructive than we hoped but we still see a path for a reasonable outcome - US Utilities & IPPs: PowerPoints: AEE MO Staff 11 January 2023. We are comparably less concerned here - looking at Ameren's recent regulatory outcomes, mgmt. has consistently achieved constructive solutions in Missouri, a track record that stands in sharp contrast to peer in-state peers. Reiterate Buy on attractive valuation as shares have pulled back along with the rest of the premium utility group.

(Originally Published on Jan 6, 2023)

A busy regulatory calendar ahead for 2023

We remain constructive on Ameren's ability to negotiate a number of key regulatory hurdles in 2023, including its latest Missouri electric rate case as well as its inaugural multi-year rate plan (MYRP) filing in Illinois along with an Illinois gas filing ahead of the expiry of the Qualifying Infrastructure Plant (QIP) rider at the end of 2023. Another non-rate case proceeding worth watching are the Certificate of Convenience and Necessity (CCN) applications for two solar projects pursuant to Ameren Missouri's latest integrated resource plan (IRP). We review key data points and catalysts below.

- **Missouri Electric rate case (docket #2023-0031)** – We continue to flag the Missouri rate case as comparably lower-risk vs. in state peers, looking back at AEE's strong track record of settlements and overall magnitude of the ask - Ameren's Missouri request would result in a CAGR of +2.3% vs. 2017's levels if approved – current rates reflect a CAGR of +0.5% from 2017. Given the increase is well below the Plant in Service Accounting (PISA)-mandated cap of 2.85%, we see comparably less risk that Ameren will be subject to disallowance risk as Evergy was earlier in 2022. See our earlier note on AEE for additional detail: Ameren Corporation: A steady ship in an increasingly stormy Midwest 23 December 2022.

- **Illinois Multi-Year Rate Plan (MYRP**) – Following statutory adoption of the MYRP for IL electric utilities, Ameren filed its inaugural multi year plan case, with the goal of putting new rates in place for 2024. According to Bloomberg consensus, the average forecast for the 30Y US Treasury is approximately 3.9% for 2023, which would equate to a 9.7% authorized ROE under the current formulaic ROE that adds 580 bps to the bond benchmark. With Ameren's IL Gas ROE of 9.67% as the closest available proxy, we see limited downside to ROEs under the new MYRP mechanism, particularly as the gas rate was set in 2021 when overall rates were lower. We also look to potential upside via embedded performance metrics which could improve (or reduce) the authorized return by up to 24 bps. Bottom line, do not perceive too much risk, although novel exposure to a new construct has raised some attention given jump in state rates.

- **IL Gas rate case** – The IL Gas utility is expected to make a rate case filing in 2023 for rates effective 2024. Of note is the coming expiry of the QIP rider which had previously allowed 50% of annual capex. The rider has drawn unfavorable coverage in the press (largely for Chicago utility People's Gas) and with the current focus on customer rates we do not expect it to be renewed. Illinois Gas is eligible to file with a forward test year which should mitigate lag somewhat. The current ROE of 9.67% was authorized in early 2021 and thus we do not see significant downside here given the broader move in rates in the ensuing two years.

- **Missouri solar (docket #s 2022-0244 & 2022-0245)** – Ameren currently has pending applications with the MPSC for two solar projects: 200 MW Huck Finn and

150 MW Boomtown. The facilities target in service dates of Q4 2024. Historically Ameren has not added new generation spend to its formal capital plan until the approval of the CCN application. Given that both remain pending and decisions from the MPSC are not expected until later this year, we do not anticipate that these two projects will be formally rolled into the capital plan. In particular the MPSC staff's opposition to the Boomtown project suggests these dockets are more than just procedural. From an earnings perspective neither project alone moves the needle significantly, and as they are not likely to be included in the capex roll-forward the risk here is to the degree that there is upside to the plan, rather than a potential disallowance of capital already included in guidance.

2023 EPS Walk: In line with Street

We forecast that Ameren will deliver EPS of $4.36 in 2023, in line with Street expectations. Key drivers and unknows are below.

- **Key drivers –** We expect the 2022 Missouri electric rate case to be the largest individual driver in 2023, with a back-weighted impact given the expectation for rates in place Jul 1. Our forecast assumes a revenue increase of $150m pretax which is just under half of the initial company ask. We also assume higher Operations and Maintenance (O&M) given continuing inflationary pressures, although not at the same order of magnitude as in '22 and offset slightly by the absence of pressure from company-owned life insurance (COLI) which was a -10c drag through the first 3 quarters of '22 and is largely a mark to market effect. We also assume upside vs. the 2022 ROE for IL electric with a +8c impact corresponding roughly to a +100 bps improvement y/y. Our forecast assumes normal weather which would be a modest drag on '22 results, weighted toward the first half of the year.

- **Swing factors –** Our forecast assumes normal weather, flat y/y asset returns resulting in no mark-to-market COLI gains or losses, and a UST largely in line with Bloomberg consensus. The other items that can swing our EPS forecast are 1) outcome of the MO electric rate case where our sub-50% of revenue requirement assumption is less than that achieved in the last settlement, 2) retail sales growth where we see +5c y/y, and 3) O&M where we see continued pressure, though not to the same degree as what the company saw in '22.

Estimates

We maintain our forecast for Ameren earnings, having recently refreshed our estimates. Our 2022-26 EPS CAGR is at the midpoint of mgmt's guidance range at +7.2% using the original 2022 midpoint of $4.05 as a baseline. Our estimates are slightly below Street consensus on '25-26 which we attribute to our lower estimates at Ameren Missouri – note this reflects a degree of conservatism on earned ROE outcomes given recent regulatory orders. Regulatory execution remains a critical question mark in the coming quarters and we expect Ameren to be able to maintain its long-run trajectory targeting 6-8% EPS growth over time.

Exhibit 7: Ameren estimates
Our estimates are consistent with $4.25-4.45 guidance

Alliant Energy (LNT)

After the company released its 2023 EPS guidance and updated capital plan with its Q3 update, we expect that LNT will post EPS of $2.87, which represents y/y growth of +5% over the initial '22 midpoint of $2.74.

LNT mgmt. is messaging that 2023 will be at the low end of its long-run CAGR range as there are no rate step-ups in place (rate base growth accounting for uplift), weather normalization will be a modest headwind, retail sales growth will moderate from 2022's pace, and inflation continues to pressure O&M. However given mgmt.'s commitment to long-run consistent EPS growth we do not expect the messaging to deviate from the 5-7% target even for one year, using the original '22 midpoint of $2.74 as a baseline – note that growth from our actual forecast in '22 will be more modest at +4%.

Exhibit 9: LNT EPS walk

Estimates

We maintain our estimates which we had previously taken down incrementally to reflect a) WI ROE risk and b) IA solar ROE risk given an uncertain outcome in the advance ratemaking docket. We still see a CAGR above 6% from the '22 midpoint through most of the forecast period.

Our updated estimates are 1-2c below Street consensus. LNT has one of the better track records of compounding low-vol EPS growth in the sector and we expect the mgmt. team to be able to manage through the current challenging environment better than most, though acknowledge a potentially tricky regulatory setup heading in to 2023.

Exhibit 10: LNT estimates
Non-linear growth sees a pickup back above midpoint in '24+

Avangrid (AGR)

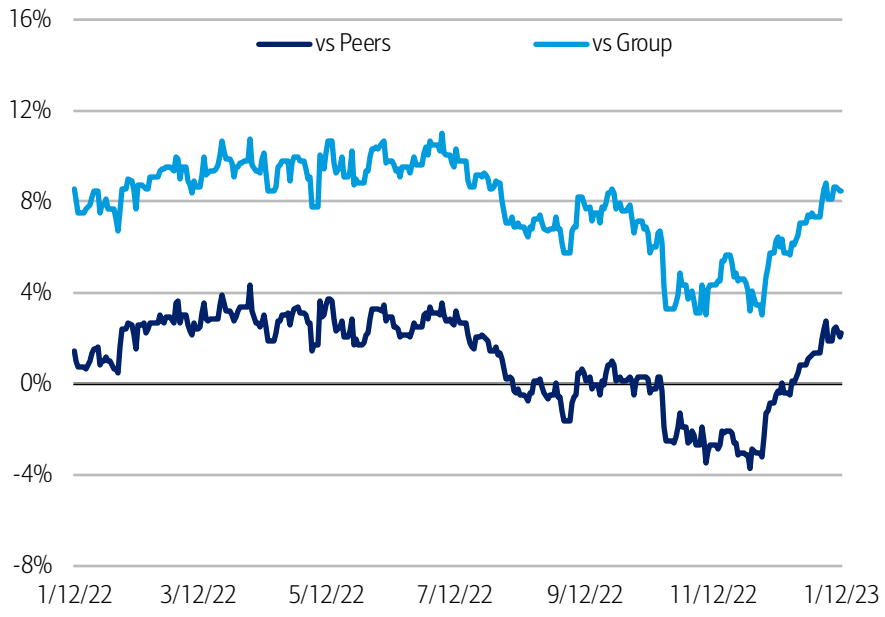
We reiterate Underperform on shares of Avangrid which has pressure on long-term earnings and cash flows that require successful rate case outcomes across the portfolio. We will be closely watching the pending CT, NY, and ME rate cases but we remain cautious given affordability considerations and below-average historical customer satisfaction. The shareholder funded customer relief in Connecticut increased the political and regulatory risk across all New England utilities broadly in our view. See background here: CT utilities 'shareholder contribution plan' could leave intervenors wanting more 01 December 2022

The outlook for offshore wind projects has eroded with Avangrid publicly describing its Commonwealth Wind project as having a negative net present value (NPV). On January 19th Commonwealth Wind filed a petition of appeal at the Massachusetts Department of Public Utilities (DPU) requesting that Supreme Judicial Court for Suffolk County vacate the DPU's Final Order. Details in DPU Dockets 22-70/22-71/22-72. Industry datapoints have indicated erosion for projects broadly (see Orsted's impairment announcement here) and we see reduced returns for Commonwealth Wind and Park City Wind. Vineyard Wind construction appears to be progressing on time but we are still view Avangrid's exposure to large project risk as deserving a discount relative to regulated utility peers.

At its Analyst Day management provided initial directional FY23 adjusted EPS guidance of approximately flat YoY at $2.20-$2.40, consistent with $2.20-$2.38 FY22 guidance. *Currently we estimate $2.30 FY23, slightly above $2.29 Consensus median; however, the outcome and timing of the pending PNM transaction are critical variables.* 3Q22 YTD 2022 earnings contribution has lagged our expectations with a reliance on merchant power and tax items to offset weaker networks (utilities). Networks have approximately flat net income YTD YoY and are -9% (-$0.12) with the $1.22 YTD 2022 consistent with $1.22 YTD 2020. We do not anticipate a change in the 6-7% 2022-2025 EPS CAGR recently initiated at the September 2022 Analyst Day but we see headwinds from additional dilution, interest expense, and other factors. Aside from FY23+ EPS guidance we will be closely watching the renewables development backlog for positive evolution post-Inflation Reduction Act.

From our investor conversations and the 13-F data, Avangrid remains a consensus underweight name for investors based upon the track record of missing long-term EPS targets. For example AGR has 5.5% of float short, one of the highest for regulated utilities.

Avangrid: Dissecting Investor Day EPS outlook: Identifying upside and pressure points 03 October 2022



CMS Energy Corporation (CMS)

Maintain Neutral on shares of CMS which have performed well in recent weeks and trade at a deserved premium to peers.

(Originally published on Jan 17, 2023)

CMS inflected to trading at ~2% premium to premium peers following the late-December settlement announcement in the 2023 electric rate case. The announcement followed a less favorable MPSC decision in MI peer DTE's 2023 electric rate case. The settlement enables continued, de-risked earnings growth near the top-end of management's 6-8% EPS range. Following FY22 outperformance, driven in part by favorable weather, CMS returned approx. $47Mn (pre-tax) in 4Q22 to customers via refunds and grants. We expect 2023 electric rates, and 2022 cost pull-forward will enable continued cost latitude in 2023, which will accrue to further growth into 2024. In sharp contrast to DTE, we forecast CMS has room to spend or pull-forward 45Mn incremental O&M in FY23, while still earning near the top-end of the preliminary guidance range – we estimate $3.10 FY23 EPS versus $3.05-$3.11 guidance range. All said, we expect CMS's 2023 electric rate case settlement and 2022 cost flexibility prompts continued execution on above-average growth in 2023+. We believe CMS is deserving of its premium valuation given the increasingly de-risked, above-average growth outlook. Yet, we estimate lower total shareholder return relative to other premium peers, especially following recent outperformance. We reiterate Neutral given our view that CMS shares trade in-line with fair value.

Exhibit 12: CMS Energy (CMS) Relative Price to Earnings (P/E) based on FY24 Consensus
CMS trades at ~2% premium to 'premium' peers following recent outperformance.

BofA GLOBAL RESEARCH

FY23 Walk: Comfortably at high-end of '23 EPS range

We forecast $3.10 FY23 EPS versus $3.11 FY23 Consensus and at the high end of management $3.05-$3.11 preliminary guidance range. Management is expected to provide a 'final' guidance range as of 4Q22 earnings, which will be based on FY22 EPS.

- **Key Drivers:** +$161Mn CMS electric rate increase ($155 Mn annual revenue increase plus +$6Mn surcharge) and +$170Mn increase in gas rates effective October 2022. Reversal of 2022 tax benefit -5c FY23 EPS drag. -19c weather reversal following favorable FY22 weather. +4c reversal of 3Q22 storm costs. Additionally, we expect +7Mn share dilution from the Covert acquisition - the 3Q

10Q details that three separate forward contracts were priced in August for 2.944Mn shares at $67.78 (price as of 9/30), 1.678Mn shares at $69.59 (price as of 9/30), and 1.783Mn shares at $68.29 (price as of 9/30). Assuming $68 share price for at-the-market (ATM) transaction to fund Covert, this would result in -4c/sh drag.

- **Swing factors:** Northstar Clean Energy growth. Management indicated potential for asset improvements that drive Northstar earnings growth in FY23. Additionally, we model -16c drag from elevated O&M spend, although it remains unclear whether management will leverage this cost latitude to further pull-forward O&M spend or grant customer refunds, deferring earnings to future years. Nevertheless, we see enhanced flexibility for management to flex costs in 2023 and secure 2024 growth at the high-end of the range. Lastly, we expect CMS will file its gas rate case in 1H23, with new rates effective 4Q23.

Exhibit 13: CMS FY23 Quarterly Walk
We forecast $3.10 2023 adj. EPS versus $3.11 Consensus / $3.08 guidance midpoint.

BofA GLOBAL RESEARCH

FY22 Walk: Top-end of guidance

We forecast $2.88 FY22 EPS, in-line with guidance and the mid-point of management updated $2.87-$2.89 guidance range.

- **4Q Key Drivers:** +9c reversal of 4Q21 storm restoration costs. +8c from weather normalization following unfavorable 4Q21. +11c from Consumers Gas rate case effective October 2022. We forecast $47Mn pre-tax in 4Q22 customer refunds and grants will result in -12c 4Q22 EPS drag. The company imbedded cost flexibility in FY22 earnings guidance and can therefore absorb 12c lower EPS while earnings at the top-end of the original 2022 guidance range.

Exhibit 14: CMS FY22 Quarterly Walk
Expect $2.88 FY23 EPS, in-line with the midpoint of the company's updated guidance range.

BofA GLOBAL RESEARCH

Valuation: $68 PO

Our valuation is based on a sum of the parts analysis with a 16.5x electric and 16.8x gas 2025 base peer multiple. We maintain EPS estimates in-line with prior forecasts, and reiterate our confidence that management can earn at the top-end of their 6-8% CAGR range. We continue to value the Enterprises segment on a blended DCF (Dearborn Industrial) and EV/EBITDA for remaining peakers. The EV/EBITDA multiple applied to the peakers is 4x, relatively conservative and resulting in a minimal impact on our valuation given our 2025 EBITDA estimate is $4Mn. Accordingly, we see the majority of equity value derived from the regulated business.

Dominion Energy (D)

We reiterate Underperform on shares of Dominion despite the potential for the business review reset to be less negative than our estimates. Our view is that the dilutive implications of management's business review are not fully priced in. Dominion has outperformed utility peers +4% in early January 2023 trading +9% from the mid-December lows with the exuberance about a positive reversion. As we turn the page into 2023, we are closely focused on the Virginia legislative session as it relates to the ongoing business review. There has been a litany of draft bills in both the House and the Senate with potential significant impacts on Dominion and other Virginia utilities. The path forward for the company will be challenged with expectation of an equity issuance and pivotal rate case. With the offshore wind construction and uncertainty for the 2024 Virginia legislative session, we believe a large discount for shares is warranted. One of the most interesting proposals is to allow for a minority interest sale in the offshore wind asset, potentially achieving our view of Dominion's objectives. This would allow the company to reduce Virginia earnings mix and large project risk while raising capital.

We emphasize that it is still very early in the VA legislative cycle, and we anticipate more proposals as well as material modifications to existing bills. Virginia Governor Youngkin has previously discussed a five-year rolling review of the Virginia Clean Economy Act (VCEA) as well as his desire to exit the Regional Greenhouse Gas Initiative (RGGI). We reviewed the initial 500+ draft legislation introduced for the 2023 legislative session based upon the initial pre-filings.

The legislative session is short at just 30 days (odd-number years) starting January 11th and ending February 25th. The legislature can be reconvened beginning April 12th for an additional 15 days and the Governor can request a special session as well. Key topics for this legislative session include the typical high-profile areas: abortion, corporate tax cuts, education, marijuana, and of course energy. Every seat of the VA General Assembly will be up for election in 2023 and there are expected to be key leadership transitions that could shift the balance of power. **We are closely watching for the Governor's view on legislation to inform our view of shares.**

Exhibit 17: D Relative 2024E P/E versus Similar P/E Peers (Dark Blue) and Overall Utilities Index (Light Blue)
D has positively re-rated off the lows

Source: Company Filings, Bloomberg, BofA Global Research

Media reports suggest Dominion Energy is collaborating on draft House Bill 1770/Senate Bill 1265 includes proposal to reduce Dominion's Virginia revenue by ***at least $300Mn***. Favorable changes proposed would lead to a more prescriptive ROE/equity ratio 'southeast' comparable universe from a broader pool of 'peer utilities'. This could have the effect of increasing the base allowed ROE to ~10% from 9.35% and equity ratio to ~53.5% from 52.2%. This would be above the ~9.4% national average awarded in 2023. This compares with D's current authorized 9.35% ROE where we assume a 10.3% ROE in our current reset scenario (9.35% + 70bp). The utility's draft bill stipulates (1) returning both Dominion and Appalachian Power Company (American Electric Power [AEP] subsidiary) to **two-year rate review schedules** (versus the triennial / three-year rate review currently) and (2) rolling rate adjustment clauses (RACs) into base rates.

The original draft of HB1770 appears to have an initial -$0.27 EPS impact before a potential positive offset from an increased in equity ratio and ROE that would bring the adverse impact closer to ~$0.20. With the new stronger biennial review proposed, we continue to believe that a -$0.33 'Virginia Earnings Above Allowed Adjustment' is prudent in 2023+. *See details in our notes below.*

We continue to forecast $4.31 FY23, in-line with Consensus median but above the $4.17 mean. Even if there is legislation enacted, we do not expect a rate change to be effective before January 2024. Our FY23 reset scenario case is $3.51.

What do we expect with the 4Q22 call? Not much

Assuming that legislation has not been enacted, we do not foresee management as being in a position to provide significant updates. Dominion is unlikely to provide FY23 guidance or change its 1Q23 dividend, a change from the expected pattern although not surprising given the magnitude of the ongoing review. On the 3Q22 earnings call management spent significant time detailing the "path" to +6.5% growth in 2023 but did not reaffirm its guidance or initiate FY23. Similarly, we do not anticipate Dominion updating its traditional financial metrics like capital expenditures but some of the less critical elements could be refreshed such as pension returns and funding status.

With the quantum of the business review reset ahead, we and investors we speak to are less focused on near-term earnings. For FY22 we expect $4.12 adjusted EPS, consistent with Consensus and in-line with the narrowed $4.04-$4.18 guidance. The company has gone to efforts indicating that it was targeting precisely 6.5% growth.

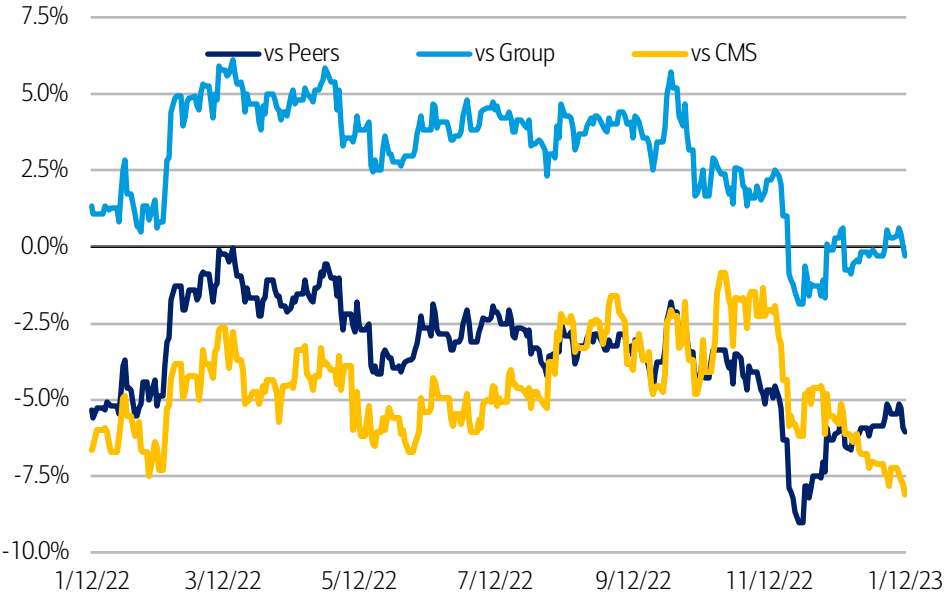
Dominion Energy: Another Reset Ahead Puts Shares in Penalty Box: Downgrade to Underperform	Paul Zimbardo	09 November 2022



DTE Energy Co. (DTE)

More recently, DTE has underperformed MI peer CMS Energy (CMS) following DTE's less favorable MPSC final order in its 2023 electric rate case, while CMS has outperformed premium peers following its settlement agreement (see details on pg 14). While we believe DTE's 2023 electric rate case order will impair the company's ability to meet the mid-point of the 2023 EPS guidance range– we forecast $6.15 2023 EPS versus $6.25 Consensus / guidance midpoint – we see long-term growth intact.

(Originally published on Jan 17, 2023)

Michigan utilities, DTE Energy (DTE) and CMS Energy (CMS), underperformed the broader utilities group in 4Q22 amid growing investor caution around Michigan as a 'premium' utility jurisdiction. The Michigan Public Service Commission (MPSC) scrutiny of MI utilities' storm management and grid reliability efforts prompted investor concerns that the MI regulatory backdrop was growing more cautious (details in report: *US Electric Utilities & IPPs: Power Points: MPSC reliability efforts 09 September 2022*). Additionally, we do not expect DTE will update its 2023 guidance range during 4Q22 earnings, prior to the resolution of its petition for rehearing. During Electric Edison Institute (EEI), DTE updated its long-term EPS CAGR guidance to 6-8% from 5-7% prior and detailed its latest Integrated Resource Plan which should drive rate base growth and support customer affordability through 2030+ (details in report: *US Utilities & IPPs: PowerPoints: DTE IRP 04 November 2022*). Reiterate Buy on shares of DTE despite 2023 earnings risk with shares trading at an overly discounted valuation.

Exhibit 18: DTE Energy (DTE) Relative Price to Earnings based on FY24 Consensus
Following 4Q22 underperformance, DTE now trades at greater than 5% discount to peers.

BofA GLOBAL RESEARCH

O&M contingency – how realistic is $120Mn in O&M cuts?

While $120Mn in O&M cuts in 2023 may seem an ambitious target amid accelerating inflationary cost pressures, we flag that DTE has historically succeeded in shedding O&M to counter unexpected earnings pressures. For example, DTE planned to cut up to $120Mn at the onset of the COVID-19 pandemic to mitigate earnings pressures from declining load. While we do not believe DTE leveraged the full $120Mn in 2020 O&M cuts due to higher-than-expected 2020 residential load growth, we see the COVID O&M contingency plan as an important precedent for management to achieve $100Mn+ cost flex. Additionally, management has cited up to $130Mn in O&M cuts during the 2008

recession. DTE's consolidated O&M is over $2,500Mn, therefore $120Mn in O&M flex represents ~5% of DTE total O&M.

As of today, we do not believe our assumptions for ~$120Mn in cost cuts are overly ambitious. Yet we acknowledge risk that DTE's ability to flex O&M akin to historical cost contingency plans will be challenged by rising inflation across capital equipment, financing costs and labor. Additionally, the MPSC's enhanced oversight over MI utilities vegetation management efforts likely discourages significant cuts from DTE's tree-trimming and veg. management O&M program. We look for further clarity on the company's O&M contingency plan during 4Q22 earnings, assuming the company is unsuccessful in securing an electric rate case rehearing and revised MPSC final order.

FY23 Walk: Expect '23 EPS at lower-half of 2023 guide

We forecast $6.15 FY23 EPS versus $6.25 Consensus. BofAe 2023 EPS is at the lower end of management's $6.09-$6.40 guidance range.

- **Key Drivers:** +12c from DTE Electric's 2023 rate case. This assumes the November MPSC final order holds (+30.6Mn revenue increase), and DTE's petition for rehearing in the case is unsuccessful. -21c weather reversal following favorable MI weather YTD 2022 (-13c electric, -8c gas). +20c ($50Mn pre-tax) O&M savings from the 2022 Trenton Channel and St. Clair coal plant retirements. Additionally, +2c savings at DTE Gas as DTE filed for $5Mn refund to gas customers in 4Q22 which will reverse out in 2023. Per management commentary, we expect 40c drag from elevated depreciation and interest at DTE Electric and 8c drag at DTE Gas.

    - **Variable Rate Debt:** In June, DTE Energy (parent) entered into a $1.125Bn unsecured, variable rate term loan with December 2023 maturity. Pursuant to mandatory draw obligations, DTE drew $400Mn in August 2022 from the facility and an additional $400Mn in 4Q22, for a total of $800Mn outstanding. The loan bears interest at secured overnight financing rate (SOFR) plus 0.90%, although it is possible DTE locked-in fixed rates via hedges. This likely results in incremental interest cost drag in 2023 – we forecast **13c 2023 EPS drag**. DTE added language in the 3Q 10Q around its exposure to rising interest rates, citing *'DTE Energy currently expects its primary source of long-term financing to be the issuance of debt and is monitoring the impact of rising interest rates on the cost of borrowing.'* Additionally, DTE's 10Q cites $1.4Bn of floating rate debt as of September 30, 2022 versus only $815Mn disclosed as of June 30, 2022.

    - **Remarketable Senior Notes (RSN):** We discussed the remarketing of DTE's 2019 RSN issued in consort with the 2019 Midstream acquisition in our 3Q22 Michigan utilities preview (see report). We predicted that the $1.3Bn remarketing would increase near-term interest cost pressures given recent interest rate movements. However, the 10Q disclosed that DTE Energy successfully remarketed the $1.3Bn 2019 Series F 2.25% remarketable service notes in August 2022. As a result of the remarketing, the interest rate was reset to **4.22%**. This is slightly lower than 5% BofAe, creating less of a drag on 2023 EPS versus BofAe. We now forecast -7c/sh 2023 EPS drag from the remarketing of RSNs versus -11c/sh prior.

- **Swing factors:** We embed $120Mn O&M cuts ($100Mn DTE Electric / $20Mn DTE gas), assuming DTE is unsuccessful in securing a revised MPSC final order. We await the 4Q22 earnings call for further clarity on a cost contingency plan. The company plans to file a new electric and gas rate case in March 2023, and we expect both rate cases effective in November 2023. We credit the company with a more favorable 2024 electric and gas rate case (+$0.05 4Q23 benefit assuming rate

effective November 2023), although we await the company's Spring 2023 rate case filings. We imbed +10c earnings uplift from retail sales, although this is a key unknown.

Exhibit 19: DTE Energy (DTE) 2023 Walk
We estimate $6.15 2023 EPS, slightly above the lower-end of management guidance range and below $6.25 Consensus.

FY22 Walk: Midpoint of '22 guide

We forecast $6.00 FY22 EPS / $1.21 4Q22 EPS, at the midpoint of management's $5.90-$6.10 FY22 guidance range and in-line with $6.01 FY22 / $1.20 4Q22 Consensus estimates.

- **4Q Key Drivers:** +35c at DTE Electric related to reversal of $70mn tax impact in 4Q21. We forecast -2c drag related to the approved $5Mn 4Q22 revenue refund at DTE Gas. Additionally, we imbed +7c benefit related to unfavorable 4Q21 weather reversal and slightly favorable weather in 4Q22 at DTE Gas. Lastly, expect -18c drag at corporate from the reversal of favorable one-time items in 4Q21 and -4c drag following the stock repurchase from the 2019 midstream transaction. We forecast the stock repurchase in November 2022 resulted in +11Mn higher shares outstanding.

- **4Q Swing factors:** Retail sales growth in 4Q22. We forecast de-minimus impact from retail sales growth in 4Q, although we expect sales growth will accelerate in 2024+ with the introduction of larger-scale commercial and industrial (C&I) contracts.

Valuation: Reiterate Buy, $139 PO

Our valuation is based on a 2025 sum of the parts basis using 16.5x electric and 16.8x gas 2025 peer multiples. **We maintain the 2x premium applied to DTE estimates given our view that the recent Michigan PSC final order is *not* indicative of a deteriorating regulatory backdrop. Rather, we believe C&I load growth, transmission and distribution (T&D) hardening and clean energy transition targets in MI affirms the jurisdiction premium jurisdiction going forward.** We stress our recent dialogues maintain a positive bias to the state. We maintain the relative discount applied to Vantage to reflect robust peer valuations, especially considering the latest federal policy developments. We maintain Buy on shares of DTE given our view that long-term (2024+) growth remains intact and double-digits implied potential total return.

Edison International (EIX)

We remain less constructive on Edison International (EIX) due to its relatively high unfavorable exposure to interest rates at the parent and utility for wildfire expenses. EIX shares have pared back losses year-to-date given the recent moderation in interest rates which should alleviate some earnings pressure 2023+. Compared to 2022 'highs' of 6% we estimate pro-forma financing costs have moderated to ~5.2%. This is slightly below EIX assumed interest rate expectations of 5.3-6.1% as of the 3Q22 call. Yet, we continue to forecast 3.4% '21-'25 EPS CAGR, below management's 5-7% EPS CAGR guidance and 5.2% Street. Aside from interest rates, there is additional pressure from the parent preferred stock issued in 2021 which resets in 2026/2027. The California Cost of Capital Mechanism (CCM) remains an area of potential 2024-2025 upside. However, we do not yet imbed higher return on equity (ROE) in 2024+ estimates given ambiguity over whether (1) the CCM will trigger (2) the CCM trigger will actualize higher CA ROEs amid affordability pressures (see details here: US Utilities & IPPs: California Reset? Refocusing on Core Outlook Post Wildfire Season 13 December 2022). Reiterate Underperform on shares of EIX given the below-average earnings growth outlook which we believe is underappreciated by the Street.

Adjusted EPS: Increase 2024+ on lower rates, but CAGR remains pressured

We estimate ~3.4% '21-'25 EPS CAGR. This is higher than BofAe previous ~2.9% '21-'25 EPS CAGR as of our last model update given the recent moderation in Treasury rates. **However, we remain well below 5.2% Consensus '21-'25 EPS CAGR and the company's 5-7% EPS CAGR.** Our estimates are approx 4-6% below Consensus EPS 2023-2025, and we see above-average risk of an upcoming earnings reset. Management has described 'non-linear' growth in 2023, and we forecast <1% growth in 2023. We await further clarity from management on potential interest rate offsets.

2022 Drivers

We maintain our FY22 EPS estimate at $4.56. Key drivers include CPUC revenue uplift, less drag from O&M versus 1Q22-3Q22, higher depreciation rate following 2021 GRC change, higher net financing costs at the utility. We estimate -8c/sh tax impact following favorable +8/sh from the 4Q21 tax settlement with California Franchise Tax Board (FTB). Our FY22 EPS estimate is slightly lower than $4.58 midpoint of management guidance and $4.59 Consensus due to our assumptions of higher financing costs at the parent. Yet, our $0.58 4Q22 is in-line with $0.58 Consensus.

Exhibit 24: EIX 2022 Drivers
Forecast $4.56 FY22 EPS, below $4.58 guidance midpoint and $4.59 Consensus.

BofA GLOBAL RESEARCH

Valuation: PO to $56 ($52 prior) on valuation roll-forward

Our Edison International valuation is based on a 2025 sum-of-the-parts analysis for the core regulated utilities with discrete adjustments for the California wildfire risk profile. We utilize the base 2025E electric (15.9x versus 16.4x 2024E previously) peer 2025E P/E which we gross-up +5% to reflect capital appreciation across the sector, consistent with our coverage universe. We apply an unchanged -3x discount to the California CPUC jurisdictional regulated utilities primarily to reflect the below-average prospective growth profile. The +$4/sh increase in our PO is driven by the valuation roll forward to 2025E from 2024E prior.

Entergy Corp (ETR)

We maintain Neutral on shares of Entergy which we appropriately see trading at a discounted valuation to peers given the above-average uncertainty into the outlook. The 4Q22 call should focus squarely on regulatory developments in recent weeks and months, specifically Louisiana and System Energy Resources Inc. (SERI). The Louisiana Public Service Commission (PSC) outcome on storm cost securitization was a favorable development given the cautious public statements by Commissioners into the meeting. Nevertheless, we are looking for additional signs that the regulatory relationships across its Gulf footprint are intact. Entergy has one of the most attractive long-term capital investment opportunity sets from decarbonization, industrial reshoring, and energy export exposure. In order to convert the capital spending into above-average EPS growth, ETR will need to find alignment with its retail regulators in all key jurisdictions. *From our investor conversations, Entergy is much debated but the consensus appears to be that some are avoiding the equity until there are tangible data points to show that the regulatory profile is intact. Key areas that investors and we are focused on include the three storm hardening proposals (capex magnitude and recovery mechanism) and SERI complaints that ETR has quantified as representing over $2Bn.*

Exhibit 26: ETR Relative 2024E P/E versus Similar P/E Peers (Dark Blue) and Overall Utilities Index (Light Blue)
ETR has had volatile equity performance of late

Source: Company Filings, Bloomberg, & BofA Global Research

BofA GLOBAL RESEARCH

Quarterly and annual earnings should largely be an after-thought with FY23 outlook provided and recently reaffirmed by management. FY22 $6.37 is slightly above the midpoint of narrowed $6.25-$6.45 guidance and we are comfortable with our estimate given a fairly neutral weather backdrop and management's efforts to pull-forward O&M to date. FY23 BofA $6.61 is a Street-low and toward the low-end of $6.55-$6.85 guidance outlook range below $6.75 Consensus which is above the guidance midpoint. We do not expect Entergy to change its FY23+ earnings expectations but we do see more pressures on the outlook than our initial impressions of the June 2022 Analyst Day.

Eversource Energy (ES)

Ahead of the long anticipated 4Q22 refresh, we reiterate Underperform on Eversource Energy (ES) where we do not expect management to increase its long-term EPS growth rate. For much of 2022 including as recently as the mid-November Financial Conference, Eversource management highlighted that their long-term EPS guidance implied upside above 7%. We have perceived more cautiousness of late and see risk of a disappointing update with the backdrop of an earnings call as ratepayers receive high January bills. We believe that the three core legs of the bull argument are overly optimistic: offshore wind proceeds, capex & regulated returns net of interest and O&M, and balance sheet equity needs.

Exhibit 27: ES Relative 2024E P/E versus Similar P/E Peers (Dark Blue) and Overall Utilities Index (Light Blue)
ES has de-rated but we remain cautious

Source: Company Filings, Bloomberg, & BofA Global Research

BofA GLOBAL RESEARCH

Over the past year, our long-term EPS forecast has been below guidance and most buyside investors that we speak to for a few key reasons: (1) lower offshore wind development proceeds as project economics have declined materially with higher interest rates; (2) underappreciated drag from pension losses, parent/operating company interest, and O&M; (3) higher equity issuance to repair the deteriorating credit metrics [negative outlook at Moody's], and (4) conservatism on regulatory capex in light of affordability concerns. While more subdued offshore proceeds has increasingly become investors base case, few reflect the lower pension earnings and quantum of equity we believe is likely. See the recent Sunrise Wind impairment details here: US Utilities & Clean Tech: Offshore Wind Latest Headwind: Ørsted Impairs Sunrise Wind – ES Joint Venture 20 January 2023. The most probable area of positive upside surprise is management including more utility capex but we emphasize that the shift to offshore contractual transmission capex is an emerging shift on the risk/quality spectrum.

What is the bull case?

The optimistic view is that Eversource could sell its offshore wind business for a favorable valuation, deliver the full $3.0Bn of incremental capital that management has previewed, and have minimal/no equity financing needs. Success on these metrics could lead to ES offering an above-average EPS growth rate and returning to its historical premium to the group.

ES has a relatively light regulatory calendar in 2023 with long term constructs in many jurisdictions. ES has positive environmental, social and governance (ESG) attributes and is one of the few predominately transmission and distribution (T&D) investment opportunities. We certainly acknowledge that ES has less regulatory activity in the near term than many other companies, a positive characteristic. What unfavorables ES have is some of the highest electric and gas bills in the United States. This leads to top decile political risk as evidenced by the frequent gubernatorial, legislative, and attorney general involvement. Our New England stakeholder conversations indicate a clear interest in learning more about the shareholder contribution to Connecticut ratepayers but not neighboring states. While the risk should ebb as we exit winter, the potential for an adverse political 'lightning bolt' at any moment should limit a positive re-rating.

Shareholder base could rotate with more T&D and ESG competition

ES has one of the highest foreign ownership levels, which has grown in recent years due in part to European investors looking to invest in the U.S. offshore wind buildout. ES was also an early adopter of ESG disclosures and 'embracing the principals.' Between ES exiting its offshore wind business where returns ultimately did not live up to our expectations and other companies improving their ESG focus, we see a further risk of de-rating.

More and more investors we speak to are focused on emission rate of change (ie decrease) where by definition ES is lower by not owning any thermal generation today. Additionally post the Inflation Reduction Act, we and many investors increasingly prefer integrated utilities over pure T&D with the thesis that generation (renewables) will take an increasing share of the investment mix. In ES' deregulated states, this generation investment will accrue to third party developers and risks "crowding out" some distribution investments.

FY22 adjusted EPS had been tracking quite well but the Operation Fuel item and higher interest expense could dampen results. BofA $4.13 FY22 EPS is ahead of $4.10 Consensus median and is near the top-end of the $4.04-$4.14 narrowed guidance range. In recent year's ES has delivered towards the midpoint of the annual guidance range. If that trend continues, there would be ~1% EPS downside to our forecast. For FY23 our $4.36 is similar to $4.38 Consensus with +6% YoY growth. Our estimate incorporates substantially a full year of debt paydown from the offshore wind strategy review underway which could be an area of timing moderation to our estimate.

FirstEnergy (FE)

We reiterate Underperform on shares of FE with a challenged risk/reward profile based on net dilution from the higher pension expense that we do not believe management can fully offset. We believe that investor expectations are overly optimistic regarding the asset sale plan that FE has articulated as well as the external CEO search. *FirstEnergy has significantly re-rated in recent months, with +17% trough-to-peak performance through January 22nd despite our view that the fundamentals are weaker than peers. We are now the only Underperform versus 10 Buys and 5 Neutrals, per Bloomberg. On our new lowered numbers, FE is trading at a premium to the group despite the above-average risks, weaker balance sheet (pro-forma for asset sales), and adverse catalysts ahead.*

Further details are available in our January 23rd downgrade: FirstEnergy: Downgrade to Underperform: Next Reset Ahead. Can a New CEO Right the Ship? 23 January 2023

BofA GLOBAL RESEARCH

2023 Drivers: BofA -3% below Consensus

We forecast $2.41 2023 EPS, -3% below $2.49 Consensus and -6% lower than $2.55-$2.60 targeted operating midpoint. While management has implied an ability to offset more of the $0.45 pension headwind with Signal Peak contribution, this would create a more challenging base year for a prospective 2023+ EPS CAGR.

- **Key Drivers:** +4c/sh uplift from Distribution rates and riders in 2023. Ohio rate credits are $60Mn in 2023 versus $80Mn in 2024, resulting in +3c YoY EPS uplift. We estimate $1,490Mn rate base growth at Transmission. However, EPS growth from higher Transmission investment should taper off in 2H23, following the 1H23 expected ~30% FE Transmission sale. -4c/sh decrease from 19.9% FET sale on May 31, 2022.

- **Pension & Offsets:** Consistent with management commentary, we expect -45c/sh pension headwind in 2023. Management detailed 30c/sh in offsets. We anticipate +12c/sh corporate O&M offset and +16c/sh regulated O&M offset. We flag the +16c/sh regulated O&M costs is supported by ~14c/sh O&M pull-forward in FY22. Additionally, we forecast +~7-8c/sh related to 2022 debt paydown. Thus, we credit management with achieving -10c/sh drag related to pension headwind on a net basis (versus -15c/sh guidance as of 3Q22 earnings call).

- **Swing factors: 1H23 FET Sale.** We assume 30% FET sale, consistent with mgmt commentary, which would lead to proforma ~51% FET ownership by year-end 2023. Given $485Mn BofAe FET earnings in 2023, we estimate -13c/sh 2H23 impact from the divestment. This is mostly offset by +12c/sh favorable EPS from corporate debt paydown in 2H23. Yet, we flag that the sale does not appear *accretive* (-1c initially), with the post-tax interest cost benefits falling slightly short of the full 2023 net income impact. Relative dilution should be accentuated over time due to decelerated core ratebase growth. **Signal Peak** income remains another key unknown. Strong 2022 coal prices drove BofAe ~18c/sh EPS uplift in 2022 (see details in Exhibit 7). We expect positive YoY EPS variance from still-elevated coal prices in 1H23 will be offset by moderation in 2H23 Signal Peak earnings. All said, expect net no impact to annual FY23 EPS from Signal Peak earnings following a strong FY22.

BofA GLOBAL RESEARCH

2022 Drivers: In-line with Consensus

We forecast $2.45 FY22 EPS slightly above $2.44 Consensus and $0.53 4Q22 EPS versus $0.52 Consensus.

- **4Q Key Drivers:** +1c/sh from slightly warmer weather across FE jurisdictions versus 4Q21. -3c/sh drag from vegetation management accounting changes, less drag versus 1Q-3Q22 given FE started implementing the policy late-2021. +4c/sh full quarter impact from Corporate debt paydown.

- **Swing factors:** Signal Peak mining income. Expect similar YoY uplift versus 3Q22, although we note Signal Peak cut production by ~30% in December 2022. O&M pull forward: forecast similar YoY O&M reduction as 3Q22.

Exhibit 31: First Energy 2022 Earnings Walk

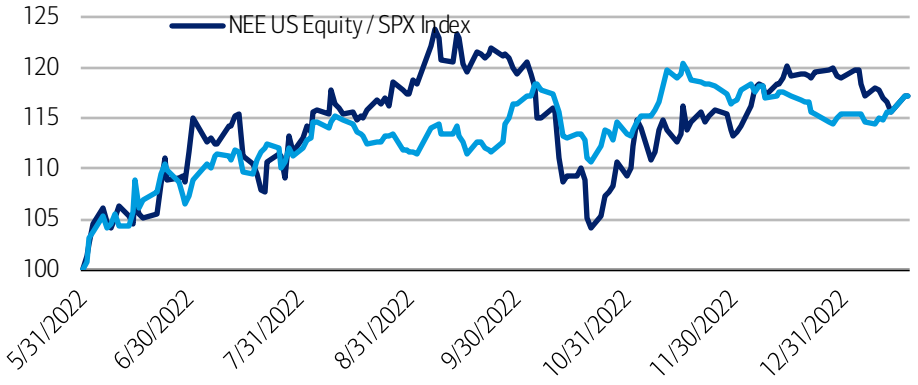
NextEra Energy (NEE)

(Originally published on Jan 19, 2023)

Stock performance through 2022

NEE was a stark underperformer early in 2022, which we believe is largely due to the U.S. Commerce Department's investigation into potential solar panel tariff circumvention across the industry. Announced in March, the investigation spurred NEE to disclose expectations for 2.1-2.8 GW of 2022 solar/storage projects may shift to 2023 due to the investigation. Despite mgmt. stressing renewable development plans were to remain unchanged for 2021-2024 in total, shares clearly were adversely affected.

Exhibit 32: NEE relative stock performance
Start of 2022 through tariff waive



Source: Bloomberg, BofA Global Research

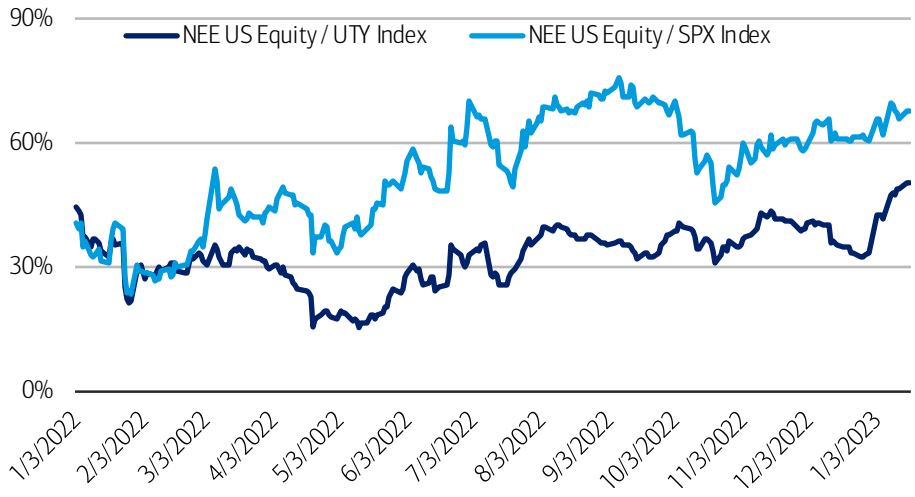
BofA GLOBAL RESEARCH

Beginning in June, NEE shares shifted trajectory to outperformance following President Biden's tariff waive, effectively negating effects from the Commerce Department investigation. With a duration of 24-months, the exemption provided renewable developers (and investors) with improved visibility to near-term project progress.

Exhibit 33: NEE relative stock performance
Tariff waive to present – yes, Analyst day, IRA and cresting of rate concerns appear to have contributed to recovery.

Source: Bloomberg, BofA Global Research

BofA GLOBAL RESEARCH



A similar dynamic can be seen in valuation, with NEE's premium vs. peers and the broader market shrinking early on in 2022 before rebounding mid-year and climbing higher following the passage of the IRA. Critically in the near-term we continue to watch backlog trends across all segments.

Explaining the latest & what we expect on 4Q:

We broadly do not expect meaningful upside to forward year targets on procurements considering the robust expectations set at the Analyst Day. Recall at this time the update contemplated a roll-off of wind production tax credits (PTCs) which would have led too robust procurement in 2025. We expect delayed upside to wind (expect weaker adds on this front) to be offset by more solar & storage procurement, bolstered by novel hydrogen procurement. Also expect updates on the RNG front (given its 3Q acquisition of existing waste-gas gen assets). Critically look for an update on repowering activities given extended credits too following 3Q commentary: expect this to be only modest initially.

On balance, clearly a positive setup on 4Q and 2023 EPS estimates, but don't anticipate a big uptick yet from IRA. With rules still outstanding from IRS on how to interpret the IRA we note some delays in procurement activity despite what some investors may otherwise have been expecting. This should still prove a positive call; moreover, with many investors still subtly cautious about datapoints on Florida, the lack of any new disclosed negatives on either the call or embedded in the 10k will drive shares higher regardless of any renewable datapoints. Investors need to appreciate wariness of many around FPL – this will still drive incremental moves in shares thru 1H. We also attribute rally of late to seeming 'cresting' of rate concerns across infrastructure investors, driving disproportionate move higher in NEE shares vs many peers.

4Q22 and FY23 Earnings Walks

We forecast 4Q22 adj. EPS of $0.54, **a 9% beat vs. Consensus and 18% beat vs. implied guidance**. Key positive drivers include growth at FPL (+$0.05), NEER investment (+$0.04) and the reversal of one-time expenses in 4Q21 (~$140 mil. or $0.07/share). We acknowledge uncertainty related to wind performance (we model a -$0.01 drag) as well as potential for D&A creep given renewable deployments.

Exhibit 35: NEE 4Q22E Earnings Walk
We forecast a $0.04/share beat vs. Consensus

BofA GLOBAL RESEARCH

For FY23, we forecast adj. EPS of $3.23 (+**4% above current consensus and +6% above the midpoint of guidance**). Here, again, growth at FPL (+$0.05) and new investments at NEER (+$0.09) drive the yoy increase. On the negative side, we forecast a drag from existing wind assets (-$0.07), representing performance normalization following a strong year in 2022, while dilution also represents a slight drag (-$0.01).

Valuation: Reiterate Buy after move up

We reiterate our $94 PO which is based on our sum-of-the-parts (SOTP) analysis. While our PO is unchanged, we do make a few key changes to our SOTP. First, we roll forward to 2025 EPS and EBITDA (from 2024 previously) and assign corresponding 2025 peer multiples of 16.3x and 9.8x. We also increase the premium on contracted renewables to 8x (from 4x) to reflect the value uplift afforded by NEE's recent decision to adopt the PTC (production tax credit) for solar deployments (vs. ITC [investment tax credit] previously). We see a clear positive backdrop to prospects on assets altogether. For our DCF of new renewables in 2025+, we now formally include a terminal multiple in our Devco to perpetuity value of the IRA (Inflation Reduction Act) passage. For gas infrastructure we increase the discount to -3x (vs. -1x previously) given recent declines in natural gas pricing. We attribute recent strength to bid for renewables altogether as prospects for renewable deployment in declining commodity environment for poly and panels contribute to renewed enthusiasm. We agree on wider pivot back to utility-scale.

Exhibit 37: Updated valuation keeps value split 60/40 in favor of the Utility

NiSource Inc. (NI)

No fireworks anticipated on 4Q after Nov. Analyst Day

We reiterate Buy on shares of NiSource into 2023 after the company's November 2022 Analyst Day which set a more conservative outlook. See our deep dive here: Our Updated Take on Shares Post A-Day: 'Terminal EPS' Intact - Reiterate Buy 08 November 2022. With freshly updated guidance and no major developments over the past two months, we anticipate a relatively low-key 4Q call with consistent messaging. We will be listening for management characterization of the NIPSCO electric rate case process with February the critical settlement window. Intervenor testimony was filed on January 20th and our initial read did not indicate material negative areas of disagreement but we intend to dive deeper.

Even constructive jurisdictions had unexpected negative curveballs in 2022, notably Wisconsin and Michigan, so we are cognizant of the risks here. In a world where we see more risks than opportunities overall (2023 outlook report here: Risks Outnumber Opportunities in the "Lost Year"), we see NiSource's plan as reasonable. The actions to proactively reduce the customer bill impacts (capex reduction and staggering rate increases) should help to deliver constructive outcomes. We see mgmt. as having already 'taken the hit' for customer affordability as part of its efforts to its state regulators.

4Q22/FY22 EPS In-Line

Our $0.48 4Q22 adjusted EPS estimate puts NiSource at $1.45, in-line with its recently tightened FY22 guidance midpoint of $1.44-$1.56. There is +$0.09 YoY improvement in 4Q22, a large increase which is common given the seasonality of the business and timing of rate relief under the general rate cases & trackers. A key assumption is that the YTD trend of sharply higher operation & maintenance (O&M costs) moderate. Management noted that there are some discrete drivers of the +8% YoY YTD and that the rate could inflect favorably.

BofA GLOBAL RESEARCH

FY23: Underpinned by substantial rate relief

The $1.50-$1.57 2023 EPS guidance presented at the Analyst Day appears reasonable but will require a reasonable and timely NIPSCO Electric general rate case outcome. Due to the seasonality of Indiana electric and the proposal to stagger the rate increase, the earnings benefit will be spread into FY24 and FY25. If there is an unfavorable element in Indiana, we would expect management to flex O&M lower and pull-forward some savings into 2023 embedded in the later periods of the plan.

See our detailed 4Q22 for more on regulatory proceedings and the outlook: NiSource Inc: The Hoosier Rundown: Indiana in the spotlight with lots of activity ahead 09 January 2023

PG&E Corporation (PCG)

PG&E Corp made strides to de-risk the outlook in 2022. Key developments include S&P 500 inclusion, undergrounding/nuclear legislative progress, non-nuclear generation asset sales to defer equity issuance and self-insurance settlement. While PCG outperformed the broader utilities group and CA peer Edison International (EIX) in 2H22, this trend has reverted YTD in part driven by extreme rainstorms in PCG's California jurisdiction and interest rate moderation unwinding the relative PCG vs. EIX pair trade. However, we see an increasingly favorable set-up for PCG into 2023. The advancement of PCG's 10k undergrounding plan should support above-average rate base and earnings growth that will kickstart in 2023. We monitor settlement updates in PCG's outstanding General Rate Case (GRC), although favorable California Public Utilities Commission (CPUC) decisions in 2022 cement a more constructive CA regulatory environment. Recent acceleration of Fire Victims Trust (FVT) share sales has pressured the stock in recent weeks. Yet, progress towards the removal of the FVT overhang should support outperformance in the medium-term. While favorable 2022 developments chipped away at the relative discount of PCG shares to utility peers, PCG shares continue to trade at ~6x discount (>30% discount) to the overall utility group. We reiterate Buy on PCG with shares trading at an overly discounted valuation despite above-average earnings growth and an increasingly derisked business profile. Affordability pressures and 2023 wildfire season remain key risks to monitor in 2023 but are overly priced-in considering the more constructive regulatory and political backdrop in California.

Exhibit 41: PCG Relative 2024E P/E versus Utilities Peers (XLU) and EIX
PCG outperformance has moderated YTD, and shares continue to trade at steep discount to utility peers

2023 Walk: FY23 EPS above high-end of PCG guidance

We forecast $1.29 FY23 adj. EPS, above the high-end of management's $1.19-$1.23 EPS guidance range and $1.22 Consensus. BofAe $1.29 FY23 EPS represents ~**18%** EPS growth versus BofAe $1.09 FY22 EPS. **The primary driver our above-average EPS forecast is PCG's 2022 and 2023 rate base guidance implies ~17% rate base growth in 2023, above 9.5% '21-'26 rate base CAGR.** *We expect management's FY23 EPS guidance imbeds conservatism, and FY23 EPS will comfortably exceed the high-end of the guidance range.*

- **Key Drivers:** +19c/sh EPS uplift from BofAe +8,500Mn transmission and distribution (T&D) rate base growth. This is partially offset by the California Cost of Capital (CoC) Decision which stipulated -25bp reduction to 2023 distribution ROE's. We forecast -3c reduction to 2023 EPS related to the CoC decision (details here: US Utilities & IPPs: California Cost of Capital: ALJ proposal more positive than the headline read 11 November 2022). -2c/sh from Unrecoverable interest expense given mgmt guidance. We forecast +6c/sh EPS uplift related to PCG's -2% annual cost savings target. While some of the cost savings will not impact EPS, we expect a similar EPS uplift as 2022.

- **Swing factors:** We assume +141Mn shares are issued in 2023 related to ~16Mn equity units issued in 2020. This would lead to -4c drag from According to PCG's 10K, the equity units represent the right to receive between 138Mn and 168Mn PG&E Corp common stock on settlement date. The settlement date of the equity unit purchase contracts is August 16, 2023, subject to postponement / acceleration. Due to the non-nuclear generation sale, PCG will not require incremental equity in 2023-2024.

Exhibit 42: PG&E Corp 2023 Earnings Walk
We forecast $1.29 FY23 EPS, +5% above the high-end of management's FY23 guidance range

2022 Walk: In-line with Consensus

We estimate $1.10 FY22 EPS, in-line with $1.10 Consensus and $1.10 midpoint of management guidance. Our $0.27 4Q22 EPS estimate is slightly above $0.26 Consensus.

- **Key Drivers:** +2c YoY rate base growth, consistent with 1Q22-3Q22. We continue to forecast approx +1c/sh EPS uplift per quarter from annual cost savings initiatives. -3c from unrecoverable interest expense. We expect majority of unrecoverable interest is recognized in 2H22 given the 2H acceleration in interest rates. -2c from regulatory items / other consistent with mgmt guidance for ~5-6c/sh drag on EPS from 'other' items (unrecoverable interest, regulatory items, etc.).

Adjusted EPS: Maintain ~10% CAGR

We maintain FY24+ estimates given our view that the PCG narrative will remain 'landing the plane' at 10% EPS CAGR growth. We see ample cushion for ~10% earnings CAGR given the above-average rate base growth and continued cost savings initiatives. It is unclear whether PCG will roll forward earnings guidance to 2027 during 4Q22 earnings, given the outstanding General Rate Case (GRC) applies to 2023-2026 rate base and earnings. This implies less PCG visibility to 2027 earnings. We monitor for updates in the ongoing GRC, although we note settlement talks underway.

Exhibit 44: PG&E Corp Financial Snapshot

Valuation: Maintain PO at $19

Our $19 PO reflects an in-line 2025 P/E versus the respective electric (15.8x down from 16.4x 2025E) and gas (maintain at 16.4x 2025E) peer P/E groups with both grossed-up by 5% to reflect capital appreciation across the sector). The lower Electric multiple MtM is offset by slightly higher 2025 EPS estimates. The acute wildfire risk is incorporated separately via a scenario probability weighted at 100% assuming PCG hits the cap in 3-year increments. Lastly, we net out 50% weighting of HoldCo debt and add back 50% weighting of interest expense to derive our Price Objective.

PPL Corp (PPL)

One of the most defensive utilities for 2023 & beyond

We reiterate Buy on shares of PPL which is one of our top picks for 2023 with a clear runway to positive re-rate to a premium versus peers with successful execution. Why do we like PPL so much despite the outperformance? PPL is one of the most defensive utilities with no rate case activity planned through 2026, one of the very few utilities with a 'clear runway'. Regulatory proceedings are a sector risk due to the high commodity environment leading to more stakeholder scrutiny; we witnessed many contentious proceedings in 2022 with challenging outcomes for peers. PPL can achieve this in large part by cutting absolute O&M ~11% 2021-2026 with a -2.5% 2022-2026 CAGR, even more impressive with the elevated inflation backdrop. PPL has one of the longest track records of cost control at its Pennsylvania subsidiary and will deploy the playbook to its newly acquire Rhode Island business. The Kentucky franchise agreed to a base rate stay-out in its last rate case and will implement many of the best practices from Pennsylvania which will help to control rate pressures, leading to goodwill with regulators. Lastly, the above-average balance sheet impressively remains solid without material erosion despite +$2.5Bn incremental capex in the plan.

FY2022 Annual and Quarterly Earnings Drivers

We estimate $0.30 4Q22 adjusted EPS, +9% above $0.27 Consensus but our $1.41 FY22 is in-line with $1.41 Consensus/$1.40 guidance midpoint. YoY earnings improvement comes from the acquired Rhode Island contribution, Pennsylvania transmission, and overall cost control. Our refreshed estimate is slightly above the midpoint and there is a small positive bias from weather and sales growth.

FY2023 Annual and Quarterly Earnings Drivers

Our FY23 $1.62 adjusted EPS is +3% above the new $1.50-$1.65 guidance midpoint and +2% higher than $1.59 Consensus. Similar to 2022, the large earnings improvement comes from an incremental 1H23 of Rhode Island earnings and cost reductions, primarily in Kentucky early in the multi-year plan. Corporate drag shaping around taxes could shift earnings a few cents but we still see relatively strong 1H23 based on known factors. PPL indicated that it will provide the detailed segment guidance with the 4Q22 call and the subsidiary guidances are BofA forecasts of anticipated guidance.

See our latest thoughts below: PPL Corporation: PPL Takes Another Giant Step in Transformation: A Top Pick for 2023 17 January 2023

Public Service Enterprise Group (PEG)

PSE&G Corp (PEG) shares underperformed the broader utilities group throughout 2022 given the pension headwind and Edison Electric Institute (EEI) earnings update which implied lower-than-expected growth in 2025-2027. However, PEG shares have recovered from losses of late as investors begin to appreciate the relatively de-risked outlook following the EEI EPS 'reset'. PEG recently announced the sale of its stake in Ocean Wind 1 offshore wind project to Orsted. In our view, PEG's exit of its OSW project further derisks the business outlook given the inflationary pressures weighing on offshore wind project returns. All said, investor inbounds on PEG have been relatively muted as 2023 kicks off a quiet year for the company, specifically on the regulatory front. Key near-term catalysts include 4Q22 earnings pension disclosure for 'final' pension drag estimate, Board of Public Utilities (BPU) decision on pension accounting changes and the upcoming 2024/2025 PJM capacity auction. We reiterate Buy on shares of PEG with the company's uniquely low earnings and regulatory risk into 2023 driving de-risked growth outlook. See latest detailed update here: [Public Service Enterprise Group: 2022 disappointed but EPS upside & derisked outlook sets up well for 2023 16 December 2022]

Exhibit 48: PEG US Equity Price to 2024 Earnings (P/E) relative to broader utilities group (XLU)
PEG continues to trade at a discount to peers although shares have pared back losses of late.

2023 Drivers: In-line w/ mgmt. guidance

We forecast $3.45 FY23 EPS versus $3.47 Consensus and $3.45 midpoint of mgmt FY23 EPS guidance.

- **PSE&G Key Drivers:** Increased spending through the newly approved Infrastructure Advancement program and YoY benefit from Conservation Incentive Program (CIP) true-up. +11c/sh from Transmission rate base growth. Management guided that PSE&G operating and maintenance (O&M) will continue to grow at ~3% CAGR through 2023. We forecast -8c/sh 2023 drag. With 2023 the test year for the upcoming 2025 PSE&G Utility rate case, we do not expect management will cut FY23 O&M to offset the pension drag.

- **Carbon-Free, Infrastructure and Other:** Higher FY23 hedged prices, management cites +4/MWh hedge price uplift in FY23. Higher nuclear generation in 2023 versus 2022 from absence of Hope Creek refueling. This is partially offset by lower capacity payments and higher financing costs – we forecast -11c/sh EPS drag from related to higher rates on $3.25Bn in floating rate debt to fund PEG Power collateral postings. Additionally, expect -4c/sh EPS drag at PEG parent related to refinancing of debt at 5.85% versus 2.65%.

- **Pension:** We continue to imbed net -$0.30 pension drag. Critically, this includes +$0.06 from BPU approval of accounting policy decisions and +$0.05 higher return on assets. The BPU decision is expected near-term, and we note the risk of higher pension drag if the BPU rejects PEG's request. Further, we acknowledge the +$0.05 from higher return on assets is a lower quality earnings driver and increases risk to FY23 earnings.

2022 Drivers: Minimal impact from Salem Creek outage

We forecast $3.43 FY22 EPS versus $3.45 Consensus / midpoint of management guidance. We lower FY22 estimates slightly to account for -$0.01 EPS impact from Salem outage. PEG has 3,700MW of nuclear operating capacity and only bids 3,300 MW of nuclear capacity. This implies 400MW of 'reserve capacity'. During December 2022, 1,100 MW of Salem nuclear plant did not perform, of which 627 MW is attributed to PEG (PEG owns 57% of Salem). In theory, this would indicate net 227 MW of nuclear capacity exposed to penalty (627 MW less 400 MW of 'reserves'). Assuming $97/day capacity payments, net 227 MW of failed nuclear capacity would indicate $8Mn (pre-tax) / $6Mn (post-tax) penalty, or only -$0.01 EPS drag in 4Q22.

Exhibit 50: 2022 Earnings Drivers
We forecast $3.43 FY22 EPS, slightly below $3.45 Consensus / midpoint of mgmt guidance.

Valuation: PO to $66 ($67 prior)

We lower our to $66 from $67 prior driven by lower 2025 nuclear EBITDA estimates and multiple MtM. The PEG valuation is based on a sum-of-the-parts valuation analysis. We utilize 15.9x 2025 electric base multiple and 16.4x gas base multiple (from prior 16.4x / 16.4x, respectively), which we gross-up +5% for capital appreciation across the sector, consistent with our overall utility valuation. We continue to value PSE&G Electric and Gas at in-line multiples. We separately account for nuclear plant value, offset by hedges and power long-term debt. Power prices have moderated and we now imbed power PTC floor value. We increase power valuation to a 12% free cash flow (FCF) yield on the nuclear assets now that our estimates are at the implied PTC 'floor'. Please see our latest Constellation Energy Group (CEG) note for detailed methodology (details here: Constellation Energy Corp: Deal or No Deal? That is the question. We see attractive risk/reward near PTC level 20 January 2023).

Reiterate Buy on shares of PEG with shares trading at an overly discounted valuation despite the favorable NJ utility jurisdiction and PEG exposure to nuclear / power.

Exhibit 51: PEG Sum of the Parts Valuation
We lower our PO to $66 ($67 prior).

Southern Company (SO)

We expect SO to post 2023 EPS of $3.61, approx. 2% below Street at $3.69. The company has flagged 2024 as the year that growth will resume with in-servicing of Vogtle, though we see clear downsides to the $4.00-4.30 range previously released. The coming update to the 2024 range is more closely watched than 2023 which will largely be flat y/y based on our numbers. Based on our walk below we expect an initial EPS range of $3.55-3.65.

Exhibit 1: SO EPS walk

BofA GLOBAL RESEARCH

- **Key Drivers** – New rates at Georgia Power will be among the biggest upside drivers with a pre-tax base rate increase of $216m per last year's settlement, or approx. 16c EPS contribution. A new Alabama Power rider will allow for the recovery of $318m of incremental D&A beginning in 2023. We assume only modest upside from growth in retail sales contributing +2c. Normalizing for the impacts of weather will be a modest drag at -6c, as will the recently-announced one month Vogtle delay at -1c. The company is targeting flat O&M on a y/y basis and accordingly we do not see this as a major driver directionally.

- **Swing factors –** Our retail sales forecast assumes only modest growth y/y – the company has previously guided to pre-tax upside of $18m/$35m/$45m for 1% load growth in industrial/commercial/residential sales, accordingly this driver could yet surprise to the upside. Our numbers do not embed additional Vogtle delays aside from the 1 month associated with Unit 3 that was recently disclosed.

Vogtle delay drives a modest EPS impact in '23

SO filed a Nuclear Regulatory Commission (NRC) event notice related to the Vogtle Unit 3 delay disclosed in January. NRC event #56311 occurred on Jan 14 and was related to pre-criticality testing. At a Georgia Public Service Commission (PSC) hearing, the issue was described as a lack of pipe support bracing installation. Staff testimony at the hearing was somewhat cautious, indicating that it is unusual that critical piping components per the design were not installed; staff further noted that additional issues could be identified during the current testing process that could cause further delays still. SO's existing guidance for one quarter's delay is 2c of EPS.

Transition news drives additional questions

The other substantial news item from early 2023 was the announcement that SO has put in place a succession plan - current chairman, president, and CEO Tom Fanning will relinquish the president and CEO titles to Chris Womack who has served as the president of Georgia Power since 2020 and has worked at SO in various roles since 1988. The President title transition will be effective Mar 31 while the CEO title transition will take place following the conclusion of the 2023 meeting of shareholders. The announcement was received with surprise by some investors given the age of the successor is not far from the company's stated retirement age of 65. Additionally, while Vogtle is in late stages of construction and testing, the company had previously indicated that transition would not take place until after the plant is fully in service. Questions from investors mostly centered around whether the timing of the announcement suggests further delays still as both units that are under construction head into critical phases of testing.

Estimates

We tweak our estimates incrementally lower. For 2022 we remain at $3.58 - note that mgmt. did not guide above the top end on the Q3 call with potential for pull-ahead of some expenses to de-risk 2024. We further fine tune our 2023 estimate based on the EPS walk above, moving to $3.61. We assume slightly higher interest expense to finance the $1.7B of overage cost at Vogtle. For 2024 the combination of higher interest expense and one quarter's delay at Vogtle keep our estimate the low end of guidance. While Street have been ticking lower, reflecting skepticism around the 2024 guidance range in particular, our estimates are now 1-2% below consensus. We see a mid-5s CAGR through 2027 making it difficult to see a path for the stock to re-rate above the discount reflected today.

2024 EPS guidance remains very much in focus as investors have largely written off 2023 as a year of "non-linear growth" (note SO is not the only utility with below-target EPS growth targeted in 2023 reflecting overall challenging conditions). SO has been telegraphing an update to a more precise 2024 EPS guidance range, effectively conceding that the lower 10c third ($4.00-4.10) is a more likely starting point. We see downside here and embed a 5c drag associated with one quarter's delay in U4.

Exhibit 52: SO estimates
Our estimates remain 1-2% below Street consensus

Valuation

We mark to market our valuation for SO to reflect the latest peer multiples of 15.9x (vs prior 16.4x) for electric and 16.4x (unchanged) for Gas. We additionally tweak our relative valuation for Georgia Power to -1x from in-line on Vogtle timeline risk and for Southern's Gas Utilities to in-line from +1x given peer-average growth trajectory. Our PO moves to $64 from $68 as a result of the changes and we accordingly reiterate our Undeperform rating given negative implied total return.

Exhibit 53: SO valuation

WEC Energy (WEC)

We forecast that WEC will post Q3 EPS of $4.59, slightly below Street consensus at $4.61 and near the midpoint of mgmt.'s EPS range. Key upside drivers remain the outcome of the WI utilities' rate settlement, rider spending at the IL gas utilities, and new projects at Energy Infrastructure. Principal headwinds include interest expense and D&A. O&M remains a critical swing factor as the company has had good success in reducing day to day O&M in recent years but in the current inflationary environment has shifted to guiding to 'flattish' year-on-year growth, reflecting the 'flat is the new down' dynamic seen across the sector over the past several quarters. Expect that Q4 will be largely free of long-term updates after the company rolled forward its capital plan in Nov and issued 2023 guidance in Dec. The Q4 call will be the first opportunity for the mgmt team to address Dec's WI rate case decision by the state's commission – we expect a constructive tone that focuses on the rate increases achieved despite commissioners' rhetoric.

Estimates

We update our model to reflect our latest outlook including Wisconsin rate settlement, and company guidance. We continue to see WEC as among the most high-quality EPS growth stories in the sector (if not the highest growth) given mgmt.'s consistent track record of meeting and beating its own targets over time. Our estimates point to the upper end of mgmt.'s newly updated 6.5-7.0% EPS CAGR using the original 2022 range as a baseline, with an assumption that the WI utilities will earn at or slightly above their authorized returns.

Exhibit 55: WEC estimates
See CAGR near mid point of 6.5-7.0% range

Xcel Energy Inc. (XEL)

(Originally published on Jan 5, 2023)

Q4 preview: Modest beat, middle of '22 range

We forecast Q4 EPS for XEL at 68c, ahead of Street consensus of 67c. Our estimate implies a full year 2022 result of $3.16, in the middle of the $3.14-3.19 guidance range.

- **Key drivers –** Authorized rate increases at the utilities are the largest y/y drivers on our estimates, with Colorado gas rates going into effect on Nov 1 and contributing an estimated +2c. The other drivers are largely consistent with known and measurables as updated by the company following its Q3 report.

- **Swing factors –** Weather is expected to be largely flattish relative to normal, representing a +5c uptick y/y to account for below average degree days in Q4 of 2021. Retail sales on a normalized basis are assumed at +2% full year (approx. +$100m pretax) for electric and +1% for gas, consistent with the latest company guidance.

Estimates

With the January 5th report we tweaked our 2022 estimate lower as outlined in the EPS walk above.

For 2023 we expect a result in the upper half of the guidance range issued in November at $3.37. Our ahead of Street numbers in 2024-25 reflect partial upside that is not yet reflected in the company's forecast with correspondingly higher financing via a mix of debt and equity, as the company has previously outlined.

Exhibit 58: XEL estimates
Still see a CAGR at the upper end of the 5-7% range

Valuation

With the January 5th report, we updated our valuation to reflect a +4x premium for XEL's Minnesota utilities and +4x for Southwestern Public Service (SPS). Our previous channel checks with MN-based interveners were constructive (see more here: US Electric Utilities & IPPs: Power Points: LNT solar, MN utility regulation, DUK/PPL valuation, Cali Gas 04 January 2023) and we additionally see SPS as deserving of a premium given solid execution and growth trajectory. We also marked to market to reflect the latest electric utility premium of 16.4x reflecting broad re-rating across the utility space. Our PO remains $76 and we reiterate our Buy rating on XEL given the double-digit total return implied by our updated sum of the parts valuation.

Exhibit 59: XEL valuation
PO is $76, Reiterate Buy

Price objective basis & risk

Alliant Energy Corporation (LNT)
Our $55 PO is based on a sum of the parts analysis employing relative premium and discounts to the large cap regulated peer multiple of 15.9x 2025E P/E. We note that electric peer P/E multiple is grossed up for a year by 5% to reflect capital appreciation across the sector. We apply an in line P/E premium on IPL as we see the rate case overhang being resolved. We apply a 1.0x P/E premium on Wisconsin Power & Light Company reflecting 1) low risk investment nature of the state, 2) above average ROEs, 3) higher than average growth runway for investments, and 4) potential risks around solar deployment in both WI and IA. At ATC, we reflect a 4.0 x P/E premium on LNT's 16% share in the transmission company. Growth expectations for this segment are high, paired with above average ROEs that we believe face less downward pressure vs. regulated state distribution ROEs. We apply an in line multiple at the parent to account for the blend of numerous businesses some which benefit from long term stable PPAs via intercompany generation. Risks to our Price Objective and rating are 1) Rate case outcomes, 2) further equity dilution beyond our estimates, 3) interest rate fluctuations, 4) natural disasters, and 5) inflation and ability to earn the allowed rate of return.

Ameren Corporation (AEE)
Our $96 price objective is predicated on a P/E based sum of the parts, valuing each business subsidiary relative to the 2025E ratebase weighted peer multiple of 16.0x for electric and 16.1x for gas. We apply a 2.0x premium to peers at AEE Missouri to account for the improving prospects of capital spend, supplemented by a regulatory jurisdiction becoming more favorable - but lack of decoupling. We apply a 2.0x premium to peers at AEE Illinois to account for decoupling on the distribution business which aids in earnings predictability. At Ameren Transmission, we apply a 4.0x premium to peers to reflect the FERC ROEs and robust growth outlook. At the Parent, we assume 2.0x multiple premium reflecting average of the subs and given the healthy debt metrics with FFO/Debt at 17%+. Electric peer P/E multiple is grossed up for a year to 2023 by 5% to reflect capital appreciation across the sector.

The risks to our price objective are the utilities earning their allowed returns or worse, a significant change in 30-year U.S. Treasury bond yields, and adverse regulatory outcomes that could impact mgmt's ability to earn its allowed return.

Avangrid (AGR)
Our $38 PO is based on an 2024E sum of the parts analysis. The core utilities are valued on by applying discounts to the base sector P/E of 15.7x/14.5x for electric/gas due to below average growth and regulatory jurisdictions. We apply an in-line multiple to the PNM Resources assets with the transaction pending. Both electric and gas peer P/Es are grossed up +5% to reflect capital appreciation across the sector. The renewables are valued at approximately 11x EV/EBITDA, consistent with peers while offshore wind is valued using discounted cash flows at a 12% discount rate. Future potential value creation from the renewable development 'DevCo' is provided as well. Lastly parent/HoldCo financing negatives are ascribed.

Up/downside risks to achievement of the PO and estimates are 1) earned ROEs at the utilities, 2) utility capital expenditure forecasts, 3) regulatory/political/legislative outcomes, 4) equity needs, 5) offshore wind construction, 6) Iberdrola owns over 80% of AGR common stock, limiting float and presenting a potential for governance conflicts, despite the BoD being majority unaffiliated with Iberdrola. 7) natural disasters, 8) commodity and interest rate fluctuations, and 9) management changes.

CMS Energy (CMS)
Our PO of $68 is based on a SotP relying on 2025E forward P/E multiples for the utility business and a 2025E forward EV/EBITDA multiple for CMS' IPP assets. For the utility seg we apply a 2.0x prem to the average 2025E regulated multiple P/E of 16.5x for the electric segment and of 16.8x for the gas segment, with the 10-yr capex update providing clear sight on ratebase growth and further upside, as well as continued favorable regulatory environment, and finally historically proven ability to consistently perform at the high end of guidance range.

Both electric and gas peer P/E multiples are grossed up +5% to reflect capital appreciation across the sector.

For CMS' merchant business we apply a 4x EV/EBITDA multiple, in line with current market value of CMS' power plants. We value Dearborn Industrial Generation (DIG) on a DCF basis given the plant is expected to be sold to Consumers at the end of 2025, with our valuation reflecting the remaining cash flows.

Risks are: 1) earned ROEs declining which reduce CMS utility earnings 2) execution risk on capex and cost cutting which would primarily affect the utility earnings, 3) negatives changes to market energy prices which could affect the DIG plant's ability to re-contract at the assumed prices.

Dominion Energy (D)
We value Dominion Energy at $57 using a 2025E sum-of-the-parts analysis. For the utilities we apply the comparable electric (16.1x) and gas (15.7x) peer multiples which we gross-up by 5% to reflect capital appreciation across the sector. We apply -1.5 discount for for base Virginia (-9%). The VA earnings above the allowed are further discounted -100% due to growing uncertainty about sustainability. We apply discount adjustments to lower value utility sources in South Carolina (NND) and Utah (Wexpro) as well as the South Carolina bill credits.

Contracted assets are valued at: 13x EV/EBITDA Cove Point, 5x Millstone (13% FCF Yield), and 11x for renewables. For remaining debt beyond that allocated to state utilities, we include a 50% weight towards a straight netting of leverage, with the remaining 50% using a P/E multiple on associated interest expense, in line with the methodology employed for diversified utilities with relatively higher levers of leverage. We lastly include prospective interest rate exposure that is not impacting near-term estimates due to hedges.

Risk to achievement of the Price Objective are 1) regulatory, legislative, and political actions, 2) ability to earn the regulatory allowed ROE, 3) capital markets and equity requirements, 4) changes to the capital expenditure forecast for both regulated & unregulated segments, 5) volatility in interest rates and pension returns, 6) changes in commodity prices, 7) natural disasters, & 8) offshore wind construction.

DTE Energy (DTE)
We value DTE Energy at $139 using a sum-of-the-parts (SOTP) approach. We value the utility segment on a 2025E forward P/E multiple basis and the non-utility segment on a 2024E forward EV/EBITDA multiple basis. For the utility segment we apply a 2x premium to both our regulated electric and gas utility peer multiples (of 16.5x and 16.8x, respectively). Both electric and gas peer P/E multiples are grossed up by 5% to reflect capital appreciation across the sector. We value the DTE Vantage segment on a multiple of 2025 EPS - the grossed-up electric multiple of 17.3x to account for the renewable natural gas (RNG) business. We assign an equity value of zero to the Equity Trading segment given potential for earnings volatility and opacity of the segment. We also reduce the equity value for estimated unallocated parent debt by applying a 17.5x multiple to both the interest expense and corporate overhead expenses at the parent.

Risks are: regulatory/political/legislative actions, realized returns from the unregulated Vantage segment, changes in equity needs, load growth/class mix, equity needs, weather/natural disasters, and interest rate fluctuations.

Edison International (EIX)
Our $56 PO is based on sum of the parts analysis with a peer 15.9x 2024 P/E grossed-up 5% for group growth. A -3x P/E discount is applied to the CPUC, as well as the Parent/Other segment, and -1x P/E discount to FERC jurisdictional utilities. The discount reflects below-average growth and regulatory considerations, albeit FERC risk profile is less challenging than the CPUC. The negative wildfire adjustments are netted-out to reflect a probabilistic approach to the risk of shareholder funded wildfires and the ongoing contribution to the CA fund on an NPV basis.

Positive and negative risks are changes in: 1) Wildfire and other natural disasters/catastrophic events, 2) regulatory outcomes, 3) interest rates, 4) equity needs, 5) earned returns and operating costs, 6) Edison Energy returns, 7) ability to deploy capital, 8) environmental, social, & governance [ESG] profile, and 9) wildfire liabilities for shareholders.

Entergy (ETR)
Our $119 Price Objective is based on a sum-of-the-parts analysis. The 2025E electric utilities average P/E of 16.4x is grossed-up +5%, to reflect capital appreciation across the sector. We apply in-line P/E multiples to the subsidiaries except for +1x Texas to reflect the constructive regulation environment and -1x Louisiana & New Orleans based upon historical contentious proceedings and growing concerns about prospective storm recovery. We net out 50% of the parent HoldCo long-term debt and apply a P/E multiple to 50% of the interest expense.

Positive and negative risks to achievement of our Price Objective are: (1) regulatory, political, and legislative changes, (2) natural or nuclear disasters including hurricanes, (3) ability to deploy capital expenditures consistent with guidance, (4) earned rates of returns at the jurisdictions, (5) interest rates fluctuations, (6) equity issuances relative to management's forecast and access to capital markets, (7) pension and nuclear decommissioning fund performance and (8) costs and operational volumes at the remainder of the wholesale commodity subsidiary.

Eversource Energy (ES)
Our sum of the parts based price objective of $76 uses P/E multiples on 2024E earnings. For electric utilities, we attribute a 1x premium NSTAR,in line multiple to PSNH, and a 2x discount for CL&P to peer 15.4x multiple 2024E, reflecting future potential positive revisions to capex and earnings and the latest challenges in CT. For gas, we apply a 1x premium to the peer 14.9x 2024E multiple, given capex upside particularly in MA and a 2x for Columbia Gas. We apply a 2x discount to Yankee Gas given the less favorable jurisdiction. Both electric and gas peer P/E multiples are grossed up by 5% to reflect 2024E capital appreciation across the sector. We value Aquarion at the 23.7x water multiple. We reflect ES's 50% ownership in Revolution and South Fork offshore wind sites on an NPV basis.

Upside and downside risks to our Price Objective are 1) regulatory/political/legislative changes, 2) capital expenditures forecasts, 3) ability to earn the regulatory allowed ROE, 4) offshore wind development, 5) natural disasters, 6) operational performance and gas incidents, and 7) recent M&A integration.

Exelon (EXC)
Our $47 PO is based on an sum of the parts valuation. Our base electric peer 2025 P/E multiple of 16.3x is grossed up for a year by 5% to reflect capital appreciation across the sector. We apply an in-line multiple across EXC utilities ComEd, PECO, BGE, PHI with above-average growth prospects and below average risks counterbalanced but non-linear growth and inconsistent execution.

Risks to achievement of the rating and price objective include: 1) Adverse regulatory, political, and legislative outcomes, 2) inability to deploy the guided capital expenditures, 3) equity needs that differ from guidance, 4) storms and other natural disasters, 5) inability to control operating costs, 6) changes in effective tax and interest rates, and 7) changes in credit rating agency metric requirements.

FirstEnergy (FE)
The $38 Price Objective is based on a sum-of-the-parts valuation. Our multiples are driven by relative P/E premiums/discounts to the 15.8x 2025E regulated peer multiple. Peer P/E multiple is grossed up for a year by 5% to reflect capital appreciation across the sector, a consistent approach across our coverage universe. We apply -2x discount to reflect rate review risk, below average risk, and pension exposure. We subtract out the holding company debt given the above-average leverage

Upside/downside risks are 1) regulatory/political/legislative outcomes, 2) ability to earn the allowed ROEs and/or other changes in regulatory earnings, 3) weather and natural disasters, 4) investigation revelations, 5) equity needs versus forecasts, 6) capital expenditures, 7) pension plan returns, discount rate changes, and interest/service costs associated with the plan, and 8) taxes.

NextEra Energy (NEE)
Our $94 PO is derived using an SOTP approach, with the utilities and parent segment valued on a 2025E P/E basis, and the generation segment valued on a 2025E EV/EBITDA basis. In addition, we include NEE's ownership stake in NextEra Energy Partners (NEP) as well as the value of fixed fee IDR (DCF, at 6.7% disc rate). We assign 25E peer multiples of 16.3x for electric and 25.9x for water (grossed up by 5% and 7%, respectively, to reflect capital appreciation) with discount/premium to reflect the growth/risk profile of the businesses. We apply a 4x premium for FPL and Gulf. For NEER, we apply a peer EV/EBITDA multiple of 9.8x, which we adjust depending on asset type. We give contracted renewables and 8x premium given fuel type and contracted nature. We utilize a DCF of new renewable for projects beyond 2024 and include a 12x terminal multiple. We value contracted nuclear on a DCF approach using an 8% discount rate. We apply a 1x premium multiple to pipelines, 3x discount to gas infrastructure and 1x discount for supply and trading given lower asset quality, a 1x premium for contracted gas peakers and 1x discount for merchant peakers (other), again based on asset quality.
Risks to achievement of PO and Rating are 1) regulatory outcomes, 2) weather & natural disasters, 3) commodity price changes, 4) fluctuations in stock prices for YieldCo NextEra Energy Partners, 5) renewable development margins.

NiSource Inc (NI)
Our $32 PO is based on a sum of the parts valuation. We value each gas and electric utility separately using 2025 forward P/E multiples that are marked-to-market to the latest peer utility multiples of 16.1x for gas and 16.0x for electric. Consistent across our coverage universe, the base electric & gas peer P/E multiples are grossed up by +5% to reflect capital appreciation across the sector. We utilize a +1x premium for NIPSCO Gas/Electric due to generally constructive regulatory outcomes. We subtract the value of excess holding company debt at the parent not supporting the utility subsidiaries.

Positive and negative risks to our Price Objective are changes in 1) regulatory, political, and legislative outcomes, 2) ability to execute on capital expenditure plan, 3) inflation,

operating expense, and interest rates as they influence earned rates of return, 4) customer count and load growth, 5) commodities, 6) natural disasters, 7) pension plan returns, 8) equity and asset sale needs.

PG&E Corporation (PCG)
Our PO of $19 reflects an in-line P/E versus the respective electric (15.8x) and gas (16.4x) peer P/E groups with both grossed-up by 5% to reflect capital appreciation across the sector) based on 2025E. The acute wildfire risk is incorporated separately via a scenario probability weighted at 100% assuming PCG hits the cap in 3-year increments. Lastly, we net out 50% weighting of HoldCo debt and add back 50% weighting of interest expense to derive our Price Objective.

Risks to achievement to estimates and Price Objective are: 1) Wildfire and other natural disasters/catastrophic events, 2) regulatory outcomes, 3) interest rates, 4) equity needs, 5) earned returns and operating costs, 6) Fire Victim Trust monetizations, 7) ability to deploy capital, and 8) environmental, social, & governance [ESG] profile.

PPL Corporation (PPL)
Our $34 price objective is based on a sum of the parts methodology applying respective premium/discounts to the 2025E peer group multiple of 16.4x. Electric peer P/E multiple is grossed up by 5% to reflect capital appreciation across the sector, a consistent methodology across our coverage universe. We value all of the utility subsidiaries at +1x premium to the sector to reflect the lack of regulatory activity, above-average credit metrics, transmission earnings mix, and reasonable jurisdictions.

Risks to the achievement of our Rating and Price Objective are: 1) Integration of Rhode Island assets, 2) regulatory/political/legislative changes, 3) capital markets, 4) ability to earn at or above the regulatory allowed return on equity, 5) cost control, 6) capital expenditures forecasts and execution, 7) natural disasters/weather, 8) equity issuance/repurchase plans, 9) corporate taxes, 10) pension returns, and 11) litigation

Public Service Enterprise Group (PEG)
Our $66 PO is derived from our 2025 sum of the parts valuation. For the regulated utilities we utilize the electric (15.9x) and gas (16.4x) 2025E sector P/E multiples, which we then gross-up by 5% to reflect capital appreciation across the sector. We apply an in-line group multiple to PSE&G Utility given the utility's below-average growth forecast, which is offset by our view that New Jersey remains a favorable jurisdiction, with PSE&G Utility offering low-risk transmission & distribution (T&D) profile.

Positive or negative risks to achievement of the price objective are 1) regulatory/political/legislative outcomes, 2) changes in capital expenditures relative to forecasts, 3) nuclear incidents and natural disasters, 4) equity and capital markets needs, cost and timing adjustments for offshore wind developments, 5) ability to earn the regulated rate of return, 6) inflation, 7) interest rates, and 8) pension returns.

Southern Company (SO)
Our $64 PO is derived from a sum-of-the-parts analysis (SOTP). We use a P/E valuation approach on 2025 and use peer multiples of 15.9x for electric and 16.4x for gas, respectively (with dis/prem applied per asset depending on growth/risk): we then gross up these multiples by +5% to account for sector wide EPS growth to derive a 12-month forward PO. We subtract 50% of the 2025 parent interest expense multiple by an electric P/E peer multiple to reflect parent leverage supporting the utilities. We net out total parent drag and add back the remaining parent interest expense with a 50% weighting. Upside/Downside Risks to achievement of the PO are: 1) Vogtle construction timing and costs, 2) regulatory, political, and legislative changes, 3) ability to earn the allowed rate of return, 4) changes to the capital expenditure forecast, 5) nuclear incidents, weather, and natural disasters, 6) rate of customer and sales growth, 7) O&M trends, 8) interest rates, 9) environmental policies and regulations, 10) M&A, and 11) interest rates.

WEC Energy Group Inc (WEC)
Our $103 PO is based on 2025E SoTP, with a large cap electric group multiple of 15.9x and gas regulated multiple of 16.4x. Electric and gas peer P/E multiples are grossed up for a year to reflect capital appreciation across the sector. We apply a 3.0x premium to WEC's WI electric & gas subs for surety in earnings growth for the next two years following the Commission's recent settlement on above avg ROEs of 10%+. We apply a 3.0x premium to the gas utilities, except IL's Peoples Gas which is 2.0x, and North Shore Gas with the Gas System Modernization Program (GSMP) and capex forecasts de-risked following the ICC order. We ascribe a 4x premium vs. the group at ATC to account for steady earnings growth as well as above avg Federal ROE's. We give Power the Future (PTF) a 3.0x P/E premium as the ROE is set indefinitely on historical and new investments. We ascribe an in line multiple for the parent accounting for the interest expense which finances overall utility operations. We value Energy Infrastructure on a net present value basis using a WACC of 5.6%, in line with other renewable assets. We net out 50% of HoldCo debt from equity valuation and adjust to add back the parent drag on interest exp. Risks to our PO are positive or negative changes in: 1) earned regulatory returns, 2) capital expenditures, 3) regulatory/political/legislative changes, 4) interest rates, 5) natural disasters, and 6) execution on unregulated projects.

Xcel Energy Inc (XEL)
Our PO is $76. We value Xcel Energy using a sum of the parts (SOTP) approach. Given the difference in geography, earnings strength, growth opportunity and risk profile, we divide the segments by subsidiary. We use 2025E forward P/E multiple of 16.4x to derive a value for the different business segments, including the parent segment. Electric peer P/E multiple is grossed up for a year to reflect capital appreciation across the sector. We apply a 4x premium to XEL subsidiaries in MN and NM, and 3x in CO and WI as both utilities present solid or improving regulatory treatment with tangible investment upside. We see this multiple as appropriate as the company has growth opportunities, resolving regulatory drag and resolving uncertainty around rate cases. We also net back 50% of the parent interest expense and instead subtract out 50% of parent debt to more accurately reflect HoldCo leverage.

Risks to achievement of the Price Objective are interest rate changes, regulatory risk, such as lower authorized ROEs or less favorable riders/trackers for renewables and transmission, inability to deploy capital at guided levels, adverse legislation, execution delays, and weather/natural disasters.

Analyst Certification

We, Julien Dumoulin-Smith and Paul Zimbardo, hereby certify that the views each of us has expressed in this research report accurately reflect each of our respective personal views about the subject securities and issuers. We also certify that no part of our respective compensation was, is, or will be, directly or indirectly, related to the specific recommendations or view expressed in this research report.

[R1] Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. *VOLATILITY RISK RATINGS*, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. *INVESTMENT RATINGS* reflect the analyst's assessment of both a stock's: absolute total return potential as well as its attractiveness for investment relative to other stocks within its *Coverage Cluster* (defined below). There are three investment ratings: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster[R2]
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

[R2] Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Price Charts for the securities referenced in this research report are available on the Price Charts website, or call 1-800-MERRILL to have them mailed.
BofAS or one of its affiliates acts as a market maker for the equity securities recommended in the report: Alliant Energy Corp, Ameren Corp, Avangrid, CMS Energy, Dominion Energy, DTE Energy, Edison Intl, Entergy Corp., Eversource Energy, Exelon Corp, FirstEnergy, NextEra Energy, NiSource Inc, PG&E Corp., PPL Corp., Public Service, Southern Company, WEC Energy Group Inc, Xcel Energy.
BofAS or an affiliate was a manager of a public offering of securities of this issuer within the last 12 months: Dominion Energy, Exelon Corp., NiSource Inc.
The issuer is or was, within the last 12 months, an investment banking client of BofAS and/or one or more of its affiliates: Alliant Energy, Ameren Corporation, Avangrid, CMS Energy, Dominion Energy, DTE Energy, Edison Intl, Entergy, Eversource Energy, Exelon Corp., FirstEnergy Corp, NextEra Energy, NiSource Inc, PG&E Corp., PPL Corp., Public Service, Southern Company, WEC Energy Group Inc, Xcel Energy Inc.
BofAS or an affiliate has received compensation from the issuer for non-investment banking services or products within the past 12 months: Alliant Energy, Ameren Corporation, Avangrid, CMS Energy, Dominion Energy, DTE Energy, Edison Intl, Entergy, Eversource Energy, Exelon Corp., FirstEnergy Corp, NextEra Energy, NiSource Inc, PG&E Corp., PPL Corp., Public Service, Southern Company, WEC Energy Group Inc, Xcel Energy Inc.
The issuer is or was, within the last 12 months, a non-securities business client of BofAS and/or one or more of its affiliates: Alliant Energy, Ameren Corporation, Avangrid, CMS Energy, Dominion Energy, DTE Energy, Edison Intl, Entergy, Eversource Energy, Exelon Corp., FirstEnergy Corp, NextEra Energy, NiSource Inc, PG&E Corp., PPL Corp., Public Service, Southern Company, WEC Energy Group Inc, Xcel Energy Inc.
BofAS or an affiliate has received compensation for investment banking services from this issuer within the past 12 months: Alliant Energy, Ameren Corporation, Avangrid, CMS Energy, Dominion Energy, DTE Energy, Edison Intl, Entergy, Eversource Energy, Exelon Corp., FirstEnergy Corp, NextEra Energy, NiSource Inc, PG&E Corp., Public Service, Southern Company, WEC Energy Group Inc, Xcel Energy Inc.
BofAS or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer or an affiliate of the issuer within the next three months: Alliant Energy, Ameren Corporation, Avangrid, CMS Energy, Dominion Energy, DTE Energy, Edison Intl, Entergy, Eversource Energy, Exelon Corp., FirstEnergy Corp, NextEra Energy, NiSource Inc, PG&E Corp., PPL Corp., Southern Company, WEC Energy Group Inc, Xcel Energy Inc.
BofAS together with its affiliates beneficially owns one percent or more of the common stock of this issuer. If this report was issued on or after the 9th day of the month, it reflects the ownership position on the last day of the previous month. Reports issued before the 9th day of a month reflect the ownership position at the end of the second month preceding the date of the report: CMS Energy, Dominion Energy, DTE Energy, Entergy, NextEra Energy, NiSource Inc, Southern Company, WEC Energy Group Inc, Xcel Energy Inc.
BofAS or one of its affiliates is willing to sell to, or buy from, clients the common equity of the issuer on a principal basis: Alliant Energy Corp, Ameren Corp, Avangrid, CMS Energy, Dominion Energy, DTE Energy, Edison Intl, Entergy Corp., Eversource Energy, Exelon Corp, FirstEnergy, NextEra Energy, NiSource Inc, PG&E Corp., PPL Corp., Public Service, Southern Company, WEC Energy Group Inc, Xcel Energy.
The issuer is or was, within the last 12 months, a securities business client (non-investment banking) of BofAS and/or one or more of its affiliates: Alliant Energy, Ameren Corporation, Avangrid, CMS Energy, Dominion Energy, DTE Energy, Edison Intl, Entergy, Eversource Energy, Exelon Corp., NextEra Energy, NiSource Inc, PG&E Corp., PPL Corp., Public Service, Southern Company, WEC Energy Group Inc, Xcel Energy Inc.

BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

Other Important Disclosures

BofAS together with its affiliates beneficially owns a net short position of 0.5% or more of the total issued share capital of this issuer. Ownership positions speak as of a date no more than three trading days prior to the date of this report: CMS Energy.
From time to time research analysts conduct site visits of covered issuers. BofA Global Research policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits.
Prices are indicative and for information purposes only. Except as otherwise stated in the report, for any recommendation in relation to an equity security, the price referenced is the publicly traded price of the security as of close of business on the day prior to the date of the report or, if the report is published during intraday trading, the price referenced is indicative of the traded price as of the date and time of the report and in relation to a debt security (including equity preferred and CDS), prices are indicative as of the date and time of the report and are from various sources including BofA Securities trading desks.
The date and time of completion of the production of any recommendation in this report shall be the date and time of dissemination of this report as recorded in the report timestamp.

Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology. ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.

What is ESGMeter?

ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of BofA Global Research's equity investment rating, volatility risk rating, income rating, and price objective for that company. For full details, refer to "BofA ESGMeter Methodology" (https://rsch.baml.com/BofA_ESGMeter).

Key takeaways

- Reiterate Buy on NiSource with a subdued 4Q22 call expect but watch for NIPSCO settlement update. PO +$3/sh on MtM.
- Busy Indiana regulatory calendar anchored by rate case, RFP, and fuel proceeding. Separately, minority interest process too.
- Moderating long-term EPS on more conservatism but still see the new financial plan as reasonable. 4Q22/FY22 in-line w/ Street

NIPSCO: Northern Indiana Public Service Company
MtM: Mark to Market
O&M: Operating and maintenance
FAC: Fuel Adjustment Clause
RFP: Request for Proposal

No 4Q fireworks anticipated after November Analyst Day

We reiterate our Buy rating on the shares of NiSource into 2023 after the company's November 2022 Analyst Day, which set a more conservative outlook. See our deep dive here: Our Updated Take on Shares Post A-Day: 'Terminal EPS' Intact - Reiterate Buy 08 November 2022 (https://rsch.baml.com/r?q=d9WEgDfxeTF7JvC-gPbpew). With freshly updated guidance and no major developments over the past two months, we anticipate a relatively low-key 4Q call with consistent messaging. We will be listening for management characterization of the NIPSCO electric rate case process with February the critical settlement window. **See details in the full report.**

Indiana fills the calendar for 2023 - lots to watch

After the recent resolution of the Ohio and Pennsylvania rate cases we have characterized the regulatory outlook as 'relatively quiet'; however, there are still critical proceedings in Indiana to watch. For NIPSCO we are monitoring the **(1)** Electric rate case; **(2)** minority interest sale process; **(3)** request for proposals; and **(4)** fuel adjustment clause increase. There is some degree of comfort in Indiana's track record of generally being constructive and NiSource's proactive efforts to reduce the bill impact. NI reduced capex to moderate the customer bill increase closer to ~3% CAGR from ~5% under the prior plan and has also proposed staggered increases in September 2023 (+8%), March 2024 (+3%), & July 2024 (+5%). Based on our latest stakeholder check-in, we still see a solid relationship with key parties. Nevertheless, it is a +17% rate increase request (+$19 per month) and will draw attention. *Our investor conversations have focused on the significant Indiana activity as an overhang on shares, limited near-term positive re-rating. A reasonable settlement of the Indiana rate case could be the catalyst beyond NIPSCO sale.*

Valuation: Increase PO +$3/sh on MtM

Our PO increases +$3/sh to $32 based primarily upon the peer multiple increases - details on Page 6. We slightly increase our FY22-FY23 estimates based on our detailed earnings walk in the full report; however, trim the long-term 2026-2027 estimates to embed additional conservatism. Our new 2021A-2027E EPS CAGR of 7.5% is still above the 6-8% midpoint, but now more aligned with consensus forecasts.

NiSource: Remain positive on the outlook

We reiterate our Buy rating on the shares of NiSource into 2023 where we see a busy but manageable Indiana regulatory calendar. Even constructive jurisdictions had unexpected negative curveballs in 2022, notably Wisconsin and Michigan, so we are cognizant of the risks here. In a world where we see more risks than opportunities overall (2023 outlook report here: Risks Outnumber Opportunities in the "Lost Year") (https://rsch.baml.com/r?q=a!WyE2LfABbfXbB93ND6Ow), we see NiSource's plan as reasonable. The actions to proactively reduce the customer bill impacts (capex reduction and staggering rate increases) should help to deliver constructive outcomes. We see mgmt. as having already 'taken the hit' for customer affordability as part of its efforts to its state regulators.

Exhibit 1: NI Relative 2023E P/E versus Similar P/E Peers (Dark Blue) and Overall Utilities Index (Light Blue)
NiSource should be able to re-rate positively if it can successfully execute in 2023

Source: Company Filings, Bloomberg, & BofA Global Research

BofA GLOBAL RESEARCH

All eyes on Indiana

Critical period of rate case commencing

In the NIPSCO Electric rate case (Cause 45772) the current procedural schedule calls for intervenor testimony by January 20th and NIPSCO rebuttal testimony by February 16th. There is a formal settlement opportunity through February 27th which could influence the subsequent schedule. Currently there are hearings scheduled for March 13-31st and an outside 300-day statutory deadline of August 2nd. *Depending on the updates before the late February 2023 earnings call, this could be an opportunity for management to share thoughts on intervenor testimony at a high-level and the prospects for a settlement, assuming one has not been reached yet.*

Of the estimated +$19/month increase from the rate case, NiSource has proposed +$10/month effective September 2023, +$3/month effective March 2024, and +$6/month effective July 2024.

Further details on Indiana broadly are available below:

US Utilities & IPPs: Fuel on My Mind: Indiana, West Virginia, & Kentucky Latest States to Watch (https://rsch.baml.com/r?q=9VJhhn9fExFI-ESk6JIXJA)	Julien Dumoulin-Smith	01 December 2022

Fuel adjustment clause drawing additional attention

The quarterly Fuel Adjustment Clause (FAC) proceeding has had higher than usual media and intervenor attention due to the magnitude (Cause 38706 FAC-137). NIPSCO is requesting a +$6-9/month increase in February 2023 which follows a +$5/month increase in the prior FAC period. Unfortunately, NIPSCO had significant major forced outages during 3Q22 at Schahfer 16 (continue downtime after significant turbine damage), Schahfer 17-18 (boiler tube leaks), and Michigan City 12 (superheat spray valve). Peer Southern Indiana Gas and Electric Company (CNP CenterPoint subsidiary) has made a larger application as well.

See further details on Indiana and fuel proceedings across the US broadly in our report: Fuel on My Mind: Indiana, West Virginia, & Kentucky Latest States to Watch 01 December 2022 (https://rsch.baml.com/r?q=9VJhhn9fExFI-ESk6JIXJA)

Expect elevated scrutiny in these proceeds with elevated power/gas prices during a period of unplanned generator outages.

4Q22/FY22 EPS In-Line

Our $0.48 4Q22 adjusted EPS estimate puts NiSource FY22E EPS at $1.45, in-line with its recently tightened FY22 guidance midpoint of $1.44-$1.56. There is +$0.09 YoY improvement in 4Q22, a large increase which is common given the seasonality of the business and timing of rate relief under the general rate cases and trackers. A key assumption is that the YTD trend of sharply higher operation & maintenance (O&M costs) moderate. Management noted that there are some discrete drivers of the +8% YoY YTD and that the rate could inflect favorably.

Exhibit 2: NiSource (NI) 4Q22 Earnings Drivers Walk

BofA GLOBAL RESEARCH

FY23: Underpinned by substantial rate relief

The $1.50-$1.57 2023 EPS guidance presented at the Analyst Day appears reasonable to us, but will require a reasonable and timely NIPSCO Electric general rate case outcome. Due to the seasonality of Indiana electric and the proposal to stagger the rate increase, the earnings benefit will be spread into FY24 and FY25. If there is an unfavorable element in Indiana, we would expect management to flex O&M lower and pull-forward some savings into 2023 embedded in the later periods of the plan.

BofA GLOBAL RESEARCH

Adjusted EPS Estimates: Now largely in-line with Street

We slightly increase our FY22-FY23 estimates based on our detailed earnings walks above but moderate the long-term 2026-2027 estimates to embed additional conservatism. There is still investor confusion about the intersection of the prior 2021-2024 7-9% and the new 2021-2027 6-8% EPS CAGRs which has been compounded by the messaging of annual 6-8% YoY growth. Management's commentary on the 4Q22 call will be dissected for any change in tone.

BofA GLOBAL RESEARCH

Valuation: Lift valuation primarily on MtM

The NiSource valuation is based on a 2025 sum of the parts analysis. We apply the latest natural gas (16.1x vs 14.4x previously) and electric (16.0x vs 14.8x previously) base multiples that we gross-up +5% across the coverage universe to reflect sector capital appreciation.

We continue to ascribe a +1x premium for NIPSCO Gas/Electric to reflect the favorable characteristics of the jurisdiction. Indiana has fairly consistently delivered above-average regulatory outcomes. *The +$3/sh increase is driven entirely by the change in group multiple with no material adjustments to our FY25 EPS estimate (-$0.01 vs prior).*

*iQ*profile℠ NiSource Inc

Company Description

NiSource Inc. (NI) is a fully-regulated utility company serving over 3 million natural gas customers and 500,000 electric customers across six states through its local Columbia Gas and NIPSCO franchises. Key states are Indiana, Ohio, Pennsylvania, Kentucky, Virginia, and Maryland. There is a smaller Federally regulated electric transmission business as well. NI generates substantially all of its operating income through these rate-regulated businesses.

Investment Rationale

We rate NiSource (NI) Buy premised on an above-average 6-8% EPS growth profile, improving balance sheet, opportunity for accretive asset sales, and decarbonization investment opportunity. The company's 2022 Investor Day update detailed annual growth within the with a relatively smooth growth profile an advantage vs some peers with non-linear growth. Shares can positively re-rate with successful execution of the Indiana plan.

Price Objective Basis & Risk

NiSource Inc (NI)

Our $32 PO is based on a sum of the parts valuation. We value each gas and electric utility separately using 2025 forward P/E multiples that are marked-to-market to the latest peer utility multiples of 16.1x for gas and 16.0x for electric. Consistent across our coverage universe, the base electric & gas peer P/E multiples are grossed up by +5% to reflect capital appreciation across the sector. We utilize a +1x premium for NIPSCO Gas/Electric due to generally constructive regulatory outcomes. We subtract the value of excess holding company debt at the parent not supporting the utility subsidiaries.

Positive and negative risks to our Price Objective are changes in 1) regulatory, political, and legislative outcomes, 2) ability to execute on capital expenditure plan, 3) inflation, operating expense, and interest rates as they influence earned rates of return, 4) customer count and load growth, 5) commodities, 6) natural disasters, 7) pension plan returns, 8) equity and asset sale needs.

R1 Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. *VOLATILITY RISK RATINGS*, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. *INVESTMENT RATINGS* reflect the analyst's assessment of both a stock's: absolute total return potential as well as its attractiveness for investment relative to other stocks within its *Coverage Cluster* (defined below). There are three investment ratings: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster[R2]
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

R2 Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Price Charts for the securities referenced in this research report are available on the Price Charts website (https://pricecharts.baml.com/), or call 1-800-MERRILL to have them mailed.

BofAS or one of its affiliates acts as a market maker for the equity securities recommended in the report: NiSource Inc.

BofAS or an affiliate was a manager of a public offering of securities of this issuer within the last 12 months: NiSource Inc.

The issuer is or was, within the last 12 months, an investment banking client of BofAS and/or one or more of its affiliates: NiSource Inc.

BofAS or an affiliate has received compensation from the issuer for non-investment banking services or products within the past 12 months: NiSource Inc.

The issuer is or was, within the last 12 months, a non-securities business client of BofAS and/or one or more of its affiliates: NiSource Inc.

BofAS or an affiliate has received compensation for investment banking services from this issuer within the past 12 months: NiSource Inc.

BofAS or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer or an affiliate of the issuer within the next three months: NiSource Inc.

BofAS together with its affiliates beneficially owns one percent or more of the common stock of this issuer. If this report was issued on or after the 9th day of the month, it reflects the ownership position on the last day of the previous month. Reports issued before the 9th day of a month reflect the ownership position at the end of the second month preceding the date of the report: NiSource Inc.

BofAS or one of its affiliates is willing to sell to, or buy from, clients the common equity of the issuer on a principal basis: NiSource Inc.

The issuer is or was, within the last 12 months, a securities business client (non-investment banking) of BofAS and/or one or more of its affiliates: NiSource Inc.

BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

Other Important Disclosures

General Investment Related Disclosures:
Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities.
This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.
Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the

value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

BofA ESGMeter Methodology:

ESGMeter is a proprietary metric based on quantitative analysis and fundamental analyst inputs that reflects our assessment of a company's Environmental, Social and Governance-related attributes. The ESGMeter is intended to indicate a company's likelihood of experiencing stronger financial stability (higher return on equity and lower earnings and price volatility) over the next three years relative to peer group. There are three ESGMeter levels - Low, Medium, and High - which indicate whether a company has attributes most likely to translate into superior financial stability (in the case of a High level) or weaker financial stability (in the case of a Low level) over the next three years relative to its peer group. A Medium level suggests that a company exhibits ESG characteristics that are likely associated with financial stability results in line with its peer group over the next three years. Full details of our methodology, financial stability definition and disclaimers are available at BofA ESGMeter methodology (https://rsch.baml.com/BofA_ESGMeter). ESGMeter is not indicative of a company's future stock price performance and is not an investment recommendation or rating. ESGMeter is independent of the BofA Global Research fundamental equity analyst's investment rating, volatility risk rating, income rating or price objective for that company.

Facts and views presented in this material have not been reviewed by, and may not reflect information known to, professionals in other business areas of BofA Securities, including investment banking personnel. BofA Securities has established information barriers between BofA Global Research and certain business groups. As a result, BofA Securities does not disclose certain client relationships with, or compensation received from, such issuers. To the extent this material discusses any legal proceeding or issues, it has not been prepared as nor is it intended to express any legal conclusion, opinion or advice. Investors should consult their own legal advisers as to issues of law relating to the subject matter of this material. BofA Global Research personnel's knowledge of legal proceedings in which any BofA Securities entity and/or its directors, officers and employees may be plaintiffs, defendants, co-defendants or co-plaintiffs with or involving issuers mentioned in this material is based on public information. Facts and views presented in this material that relate to any such proceedings have not been reviewed by, discussed with, and may not reflect information known to, professionals in other business areas of BofA Securities in connection with the legal proceedings or matters relevant to such proceedings.

This information has been prepared independently of any issuer of securities mentioned herein and not in connection with any proposed offering of securities or as agent of any issuer of any securities. None of BofAS any of its affiliates or their research analysts has any authority whatsoever to make any representation or warranty on behalf of the issuer(s). BofA Global Research policy prohibits research personnel from disclosing a recommendation, investment rating, or investment thesis for review by an issuer prior to the publication of a research report containing such rating, recommendation or investment thesis.

Any information relating to the tax status of financial instruments discussed herein is not intended to provide tax advice or to be used by anyone to provide tax advice. Investors are urged to seek tax advice based on their particular circumstances from an independent tax professional.

The information herein (other than disclosure information relating to BofA Securities and its affiliates) was obtained from various sources and we do not guarantee its accuracy. This information may contain links to third-party websites. BofA Securities is not responsible for the content of any third-party website or any linked content contained in a third-party website. Content contained on such third-party websites is not part of this information and is not incorporated by reference. The inclusion of a link does not imply any endorsement by or any affiliation with BofA Securities. Access to any third-party website is at your own risk, and you should always review the terms and privacy policies at third-party websites before submitting any personal information to them. BofA Securities is not responsible for such terms and privacy policies and expressly disclaims any liability for them.

All opinions, projections and estimates constitute the judgment of the author as of the date of publication and are subject to change without notice. Prices also are subject to change without notice. BofA Securities is under no obligation to update this information and BofA Securities ability to publish information on the subject issuer(s) in the future is subject to applicable quiet periods. You should therefore assume that BofA Securities will not update any fact, circumstance or opinion contained herein.

Subject to the quiet period applicable under laws of the various jurisdictions in which we distribute research reports and other legal and BofA Securities policy-related restrictions on the publication of research reports, fundamental equity reports are produced on a regular basis as necessary to keep the investment recommendation current.

Certain outstanding reports or investment opinions relating to securities, financial instruments and/or issuers may no longer be current. Always refer to the most recent research report relating to an issuer prior to making an investment decision.

In some cases, an issuer may be classified as Restricted or may be Under Review or Extended Review. In each case, investors should consider any investment opinion relating to such issuer (or its security and/or financial instruments) to be suspended or withdrawn and should not rely on the analyses and investment opinion(s) pertaining to such issuer (or its securities and/or financial instruments) nor should the analyses or opinion(s) be considered a solicitation of any kind. Sales persons and financial advisors affiliated with BofAS or any of its affiliates may not solicit purchases of securities or financial instruments that are Restricted or Under Review and may only solicit securities under Extended Review in accordance with firm policies.

Neither BofA Securities nor any officer or employee of BofA Securities accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this information.

Management Shuffle – What's Next?

CITI'S TAKE

We spoke with the new CFO and new Chief Innovation Offer (outgoing CFO) post the release this morning. The Company messaging was that this doesn't signal any change to the organization or financing plan but more to the augmentation of the management bench / skill sets and helps with future succession planning. The new CFO Shawn is a familiar face to many in the investment and deal community, given the company's history having a deep bench at investor conferences and Shawn being increasingly visible in recent years.

NIPSCO Sale Process Unchanged: Shawn had been leading this process since the start, so the title change doesn't have a large impact to the process. During our meetings with the new CFO over the last few months, he has been most up to date on the deal timeline, data room formation, and engagement with interested parties.

Why Change the Management roles now?: With Pablo's departure, the new CEO had an opportunity to change the structure of the management team. This triggered a more comprehensive review and gave the new CEO an opportunity to expand the skills set of the senior leadership team. From a board perspective, the changes improve the likelihood of internal succession planning, if the CEO were to leave the Company in the future, without having to look externally.

New COO and New Chief Innovation Officer: Donald (outgoing CFO) is stepping into the Chief Innovation Officer role, which is focused on a $1B IT investment, customer service process changes, and other technology initiatives. The new COO, Michael, was hired externally, with a background / focus on electric customer facing solutions.

Neutral	
Price (14 Mar 23 16:00)	US$27.76
Target price	US$30.00

Citi Research is a division of Citigroup Global Markets Inc. (the "Firm"), which does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Certain products (not inconsistent with the author's published research) are available only on Citi's portals.

NiSource Inc

Valuation

We average multiple valuation methodologies to derive our $30 target price. Our NAV yields a value of $32. We value regulated assets at a multiple of 1.5x rate base. These values are partially offset by the company's net debt. Our DDM, which incorporates our rate base growth assumptions, values the company at $30 per share. Our P/E and EV/EBITDA analyses yield values of $32 and $29, respectively.

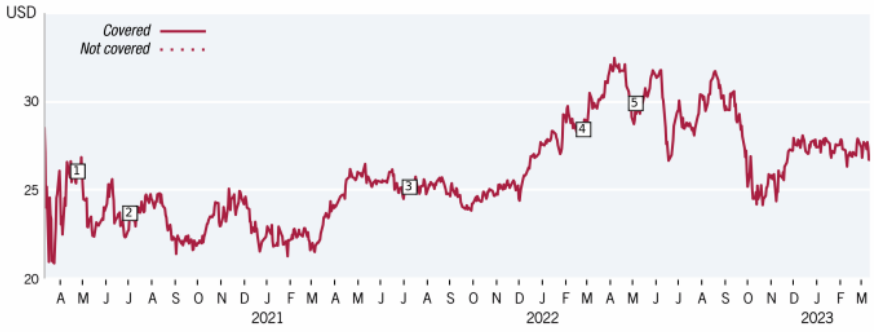
Risks

The key risks to our investment thesis are as follows: (1) Rate Cases – We estimate the company will receive rate relief at several of its utilities. Under- or over-estimation of relief could materially impact our estimates. (2) Weather – Changes in weather impact the stability of earnings. (3) Capital Investment Recovery — NI spends a substantial amount of capital to maintain and expand its distribution system. NI depends on rate increases from public utility commission to earn a fair return on this expansion. (4) Capital Markets — Access to cheap capital markets could be limited due to the size of the company. If the impact on the company from any of these factors proves to be greater/less than we anticipate, it may prevent the stock from achieving our target price or could cause the stock price to materially under/outperform our target.

If you are visually impaired and would like to speak to a Citi representative regarding the details of the graphics in this document, please call USA 1-888-800-5008 (TTY: 711), from outside the US +1-210-677-3788

Appendix A-1

ANALYST CERTIFICATION



The research analysts primarily responsible for the preparation and content of this research report are either (i) designated by "AC" in the author block or (ii) listed in bold alongside content which is attributable to that analyst. If multiple AC analysts are designated in the author block, each analyst is certifying with respect to the entire research report other than (a) content attributable to another AC certifying analyst listed in bold alongside the content and (b) views expressed solely with respect to a specific issuer which are attributable to another AC certifying analyst identified in the price charts or rating history tables for that issuer shown below. Each of these analysts certify, with respect to the sections of the report for which they are responsible: (1) that the views expressed therein accurately reflect their personal views about each issuer and security referenced and were prepared in an independent manner, including with respect to Citigroup Global Markets Inc. and its affiliates; and (2) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in this report.

Rating/target price changes above reflect Eastern Time

Citigroup Global Markets Inc. owns a position of 1 million USD or more in the debt securities of NiSource Inc.

Citigroup Global Markets Inc. or its affiliates has received compensation for investment banking services provided within the past 12 months from NiSource Inc.

Citigroup Global Markets Inc. or its affiliates received compensation for products and services other than investment banking services from NiSource Inc in the past 12 months.

Citigroup Global Markets Inc. or its affiliates currently has, or had within the past 12 months, the following as investment banking client(s): NiSource Inc.

Citigroup Global Markets Inc. or its affiliates currently has, or had within the past 12 months, the following as clients, and the services provided were non-investment-banking, securities-related: NiSource Inc.

Citigroup Global Markets Inc. or its affiliates currently has, or had within the past 12 months, the following as clients, and the services provided were non-investment-banking, non-securities-related: NiSource Inc.

Disclosure for investors in the Republic of Turkey: Under Capital Markets Law of Turkey (Law No: 6362), the investment information, comments and recommendations stated here, are not within the scope of investment advisory activity. Investment advisory service is provided in accordance with a contract of engagement on investment advisory concluded between brokerage houses, portfolio management companies, non-deposit banks and clients. Comments and recommendations stated here rely on the individual opinions of the ones providing these comments and recommendations. These opinions may not fit to your financial status, risk and return preferences. For this reason, to make an investment decision by relying solely to this information stated here may not bring about outcomes that fit your expectations. Furthermore, Citi Research is a division of Citigroup Global Markets Inc. (the "Firm"), which does and seeks to do business with companies and/or trades on securities covered in this research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report, however investors should also note that the Firm has in place organisational and administrative arrangements to manage potential conflicts of interest of this nature.

Analysts' compensation is determined by Citi Research management and Citigroup's senior management and is based upon activities and services intended to benefit the investor clients of Citigroup Global Markets Inc. and its affiliates (the "Firm"). Compensation is not linked to specific transactions or recommendations. Like all Firm employees, analysts receive compensation that is impacted by overall Firm profitability which includes investment banking, sales and trading, and principal trading revenues. One factor in equity research analyst compensation is arranging corporate access events between

institutional clients and the management teams of covered companies. Typically, company management is more likely to participate when the analyst has a positive view of the company.

For financial instruments recommended in the Product in which the Firm is not a market maker, the Firm is a liquidity provider in such financial instruments (and any underlying instruments) and may act as principal in connection with transactions in such instruments. The Firm is a regular issuer of traded financial instruments linked to securities that may have been recommended in the Product. The Firm regularly trades in the securities of the issuer(s) discussed in the Product. The Firm may engage in securities transactions in a manner inconsistent with the Product and, with respect to securities covered by the Product, will buy or sell from customers on a principal basis.

Unless stated otherwise neither the Research Analyst nor any member of their team has viewed the material operations of the Companies for which an investment view has been provided within the past 12 months.

For important disclosures (including copies of historical disclosures) regarding the companies that are the subject of this Citi Research product ("the Product"), please contact Citi Research, 388 Greenwich Street, 6th Floor, New York, NY, 10013, Attention: Legal/Compliance [E6WYB6412478]. In addition, the same important disclosures, with the exception of the Valuation and Risk assessments and historical disclosures, are contained on the Firm's disclosure website at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures. Valuation and Risk assessments can be found in the text of the most recent research note/report regarding the subject company. Pursuant to the Market Abuse Regulation a history of all Citi Research recommendations published during the preceding 12-month period can be accessed via Citi Velocity (https://www.citivelocity.com/cv2) or your standard distribution portal. Historical disclosures (for up to the past three years) will be provided upon request.

Citi Research Equity Ratings Distribution

	12 Month Rating			Catalyst Watch		
Data current as of 31 Dec 2022	**Buy**	**Hold**	**Sell**	**Buy**	**Hold**	**Sell**
Citi Research Global Fundamental Coverage (Neutral=Hold)	57%	33%	9%	29%	59%	12%
% of companies in each rating category that are investment banking clients	60%	65%	52%	68%	57%	65%

Guide to Citi Research Fundamental Research Investment Ratings:

Citi Research stock recommendations include an investment rating and an optional risk rating to highlight high risk stocks.

Risk rating takes into account both price volatility and fundamental criteria. Stocks will either have no risk rating or a High risk rating assigned.

Investment Ratings: Citi Research investment ratings are Buy, Neutral and Sell. Our ratings are a function of analyst expectations of expected total return ("ETR") and risk. ETR is the sum of the forecast price appreciation (or depreciation) plus the dividend yield for a stock within the next 12 months. The target price is based on a 12 month time horizon. The Investment rating definitions are: Buy (1) ETR of 15% or more or 25% or more for High risk stocks; and Sell (3) for negative ETR. Any covered stock not assigned a Buy or a Sell is a Neutral (2). For stocks rated Neutral (2), if an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of Citi Research management not to assign a target price and, thus, not derive an ETR. Citi Research may suspend its rating and target price and assign “Rating Suspended” status for regulatory and/or internal policy reasons. Citi Research may also suspend its rating and target price and assign "Under Review" status for other exceptional circumstances (e.g. lack of information critical to the analyst's thesis, trading suspension) affecting the company and/or trading in the company's securities. In both such situations, the rating and target price will show as “—“ and “-“ respectively in the rating history price chart. Prior to 11 April 2022 Citi Research assigned “Under Review” status to both situations and prior to 11 Nov 2020 only in exceptional circumstances. As soon as practically possible, the analyst will publish a note re-establishing a rating and investment thesis. Investment ratings are determined by the ranges described above at the time of initiation of coverage, a change in investment and/or risk rating, or a change in target price (subject to limited management discretion). At times, the expected total returns may fall outside of these ranges because of market price movements and/or other short-term volatility or trading patterns. Such interim deviations will be permitted but will become subject to review by Research Management. Your decision to buy or sell a security should be based upon your personal investment objectives and should be made only after evaluating the stock's expected performance and risk.

Catalyst Watch Upside/Downside calls:

Citi Research may also include a Catalyst Watch Upside or Downside call to highlight specific near-term catalysts or events impacting the company or the market that are expected to influence the share price over a specified period of 30 or 90 days. A Catalyst Watch Upside (Downside) call indicates that the analyst expects the share price to rise (fall) in absolute terms over the specified period. A Catalyst Watch Upside/Downside call will automatically expire at the end of the specified 30/90 day period (or earlier if the investment rating of the company is assigned Rating Suspended or Under Review status); the analyst may also close a Catalyst Watch call prior to the end of the specified period in a published research note. A Catalyst Watch Upside or Downside call may be different from and does not affect a stock’s fundamental equity rating, which reflects a longer-term total absolute return expectation. For purposes of FINRA ratings[1]distribution-disclosure rules, a Catalyst Watch Upside call corresponds to a buy recommendation and a Catalyst Watch Downside call corresponds to a sell recommendation. Any stock not assigned to a Catalyst Watch Upside or Catalyst Watch Downside call is considered Catalyst Watch Non-Rated (CWNR). For purposes of FINRA ratings-distribution-disclosure rules, we correspond CWNR to Hold in our ratings distribution table for our Catalyst Watch Upside/Downside rating system. However, we reiterate that we do not consider CWNR to be a recommendation. For all Catalyst Watch Upside/Downside calls, risk exists that the catalyst(s) and associated share-price movement will not materialize as expected.

RESEARCH ANALYST AFFILIATIONS / NON-US RESEARCH ANALYST DISCLOSURES

The legal entities employing the authors of this report are listed below (and their regulators are listed further herein). Non-US research analysts who have prepared this report (i.e., all research analysts listed below other than those identified as employed by Citigroup Global Markets Inc.) are not registered/qualified as research analysts with FINRA. Such research analysts may not be associated persons of the member organization (but are employed by an affiliate of the member organization) and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Citigroup Global Markets Inc. Ryan Levine; Xinru Yin

OTHER DISCLOSURES

Any price(s) of instruments mentioned in recommendations are as of the prior day’s market close on the primary market for the instrument, unless otherwise stated.

The completion and first dissemination of any recommendations made within this research report are as of the Eastern date-time displayed at the top of the Product. If the Product references views of other analysts then please refer to the price chart or rating history table for the date/time of completion and first dissemination with respect to that view.

Regulations in various jurisdictions require that where a recommendation differs from any of the author's previous recommendations concerning the same financial instrument or issuer that has been published during the preceding 12-month period that the change(s) and the date of that previous recommendation are indicated. For fundamental coverage please refer to the price chart or rating change history within this disclosure appendix or the issuer disclosure summary at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

Citi Research has implemented policies for identifying, considering and managing potential conflicts of interest arising as a result of publication or distribution of investment research. A description of these policies can be found at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

The proportion of all Citi Research research recommendations that were the equivalent to "Buy","Hold","Sell" at the end of each quarter over the prior 12 months (with the % of these that had received investment firm services from Citi in the prior 12 months shown in brackets) is as follows: Q4 2022 Buy 33% (64%), Hold 43% (55%), Sell 23% (51%), RV 0.6% (91%); Q3 2022 Buy 33% (65%), Hold 43% (55%), Sell 23% (49%), RV 0.5% (89%); Q2 2022 Buy 33% (66%), Hold 43% (55%), Sell 23% (50%), RV 0.6% (88%); Q1 2022 Buy 34% (67%), Hold 43% (55%), Sell 23% (48%), RV 0.6% (84%). For the purposes of disclosing recommendations other than for equity (whose definitions can be found in the corresponding disclosure sections), "Buy" means a positive directional trade idea; "Sell" means a negative directional trade idea; and "Relative Value" means any trade idea which does not have a clear direction to the investment strategy.

European regulations require a 5 year price history when past performance of a security is referenced. CitiVelocity's Charting Tool (https://www.citivelocity.com/cv2/#go/CHARTING_3_Equities) provides the facility to create customisable price charts including a five year option. This tool can be found in the Data & Analytics section under any of the asset class menus in CitiVelocity (https://www.citivelocity.com/). For further information contact CitiVelocity support (https://www.citivelocity.com/cv2/go/CLIENT_SUPPORT). The source for all referenced prices, unless otherwise stated, is DataCentral, which sources price information from Thomson Reuters. Past performance is not a guarantee or reliable indicator of future results. Forecasts are not a guarantee or reliable indicator of future performance.

Investors should always consider the investment objectives, risks, and charges and expenses of an ETF carefully before investing. The applicable prospectus and key investor information document (as applicable) for an ETF should contain this and other information about such ETF. It is important to read carefully any such prospectus before investing. Clients may obtain prospectuses and key investor information documents for ETFs from the applicable distributor or authorized participant, the exchange upon which an ETF is listed and/or from the applicable website of the applicable ETF issuer. The value of the investments and any accruing income may fall or rise. Any past performance, prediction or forecast is not indicative of future or likely performance. Any information on ETFs contained herein is provided strictly for illustrative purposes and should not be deemed an offer to sell or a solicitation of an offer to purchase units of any ETF either explicitly or implicitly. The opinions expressed are those of the authors and do not necessarily reflect the views of ETF issuers, any of their agents or their affiliates.

Citigroup Global Markets India Private Limited and/or its affiliates may have, from time to time, actual or beneficial ownership of 1% or more in the debt securities of the subject issuer.

Please be advised that pursuant to Executive Order 13959 as amended (the "Order"), U.S. persons are prohibited from investing in securities of any company determined by the United States Government to be the subject of the Order. This research is not intended to be used or relied upon in any way that could result in a violation of the Order. Investors are encouraged to rely upon their own legal counsel for advice on compliance with the Order and other economic sanctions programs administered and enforced by the Office of Foreign Assets Control of the U.S. Treasury Department.

This communication is directed at persons who are "Eligible Clients" as such term is defined in the Israeli Regulation of Investment Advice, Investment Marketing and Investment Portfolio Management law, 1995 (the "Advisory Law"). Within Israel, this communication is not intended for retail clients and Citi will not make such products or transactions available to retail clients. The presenter is not licensed as investment advisor or marketer by the Israeli Securities Authority ("ISA") and this communication does not constitute investment or marketing advice. The information contained herein may relate to matters that are not regulated by the ISA. Any securities which are the subject of this communication may not be offered or sold to any Israeli person except pursuant to an exemption from the Israeli public offering rules, including according to the Israeli Securities Law.

Citi Research generally disseminates its research to the Firm's global institutional and retail clients via both proprietary (e.g., Citi Velocity and Citi Personal Wealth Management) and non-proprietary electronic distribution platforms. Certain research may be disseminated only via the Firm's proprietary distribution platforms; however such research will not contain changes to earnings forecasts, target price, investment or risk rating or investment thesis or be otherwise inconsistent with the author's previously published research. Certain research is made available only to institutional investors to satisfy regulatory requirements. Individual Citi Research analysts may also opt to circulate published research to one or more clients by email; such email distribution is discretionary and is done only after the research has been disseminated. The level and types of services provided by Citi Research analysts to clients may vary depending on various factors such as the client's individual preferences as to the frequency and manner of receiving communications from analysts, the client's risk profile and investment focus and perspective (e.g. market-wide, sector specific, long term, short-term etc.), the size and scope of the overall client relationship with the Firm and legal and regulatory constraints.

Pursuant to Comissão de Valores Mobiliários Resolução 20 and ASIC Regulatory Guide 264, Citi is required to disclose whether a Citi related company or business has a commercial relationship with the subject company. Considering that Citi operates multiple businesses in more than 100 countries around the world, it is likely that Citi has a commercial relationship with the subject company.

Securities recommended, offered, or sold by the Firm: (i) are not insured by the Federal Deposit Insurance Corporation; (ii) are not deposits or other obligations of any insured depository institution (including Citibank); and (iii) are subject to investment risks, including the possible loss of the principal amount invested. The Product is for informational purposes only and is not intended as an offer or solicitation for the purchase or sale of a security. Any decision to purchase securities mentioned in the Product must take into account existing public information on such security or any registered prospectus. Although information has been obtained from and is based upon sources that the Firm believes to be reliable, we do not guarantee its accuracy and it may be incomplete and condensed. Note, however, that the Firm has taken all reasonable steps to determine the accuracy and completeness of the disclosures made in the Important Disclosures section of the Product. The Firm's research department has received assistance from the subject company(ies) referred to in this Product including, but not limited to, discussions with management of the subject company(ies). Firm policy prohibits research analysts from sending draft research to subject companies. However, it should be presumed that the author of the Product has had discussions with the subject company to ensure factual accuracy prior to publication. Statements and views concerning ESG (environmental, social, governance) factors are typically based upon

public statements made by the affected company or other public news, which the author may not have independently verified. ESG factors are one consideration that investors may choose to examine when making investment decisions. All opinions, projections and estimates constitute the judgment of the author as of the date of the Product and these, plus any other information contained in the Product, are subject to change without notice. Prices and availability of financial instruments also are subject to change without notice. Notwithstanding other departments within the Firm advising the companies discussed in this Product, information obtained in such role is not used in the preparation of the Product. Although Citi Research does not set a predetermined frequency for publication, if the Product is a fundamental equity or credit research report, it is the intention of Citi Research to provide research coverage of the covered issuers, including in response to news affecting the issuer. For non-fundamental research reports, Citi Research may not provide regular updates to the views, recommendations and facts included in the reports. Notwithstanding that Citi Research maintains coverage on, makes recommendations concerning or discusses issuers, Citi Research may be periodically restricted from referencing certain issuers due to legal or policy reasons. Where a component of a published trade idea is subject to a restriction, the trade idea will be removed from any list of open trade ideas included in the Product. Upon the lifting of the restriction, the trade idea will either be re-instated in the open trade ideas list if the analyst continues to support it or it will be officially closed. Citi Research may provide different research products and services to different classes of customers (for example, based upon long-term or short-term investment horizons) that may lead to differing conclusions or recommendations that could impact the price of a security contrary to the recommendations in the alternative research product, provided that each is consistent with the rating system for each respective product.

Investing in non-U.S. securities, including ADRs, may entail certain risks. The securities of non-U.S. issuers may not be registered with, nor be subject to the reporting requirements of the U.S. Securities and Exchange Commission. There may be limited information available on foreign securities. Foreign companies are generally not subject to uniform audit and reporting standards, practices and requirements comparable to those in the U.S. Securities of some foreign companies may be less liquid and their prices more volatile than securities of comparable U.S. companies. In addition, exchange rate movements may have an adverse effect on the value of an investment in a foreign stock and its corresponding dividend payment for U.S. investors. Net dividends to ADR investors are estimated, using withholding tax rates conventions, deemed accurate, but investors are urged to consult their tax advisor for exact dividend computations. Investors who have received the Product from the Firm may be prohibited in certain states or other jurisdictions from purchasing securities mentioned in the Product from the Firm. Please ask your Financial Consultant for additional details. Citigroup Global Markets Inc. takes responsibility for the Product in the United States. Any orders by US investors resulting from the information contained in the Product may be placed only through Citigroup Global Markets Inc.

The Product is not to be construed as providing investment services in any jurisdiction where the provision of such services would not be permitted. Subject to the nature and contents of the Product, the investments described therein are subject to fluctuations in price and/or value and investors may get back less than originally invested. Certain high-volatility investments can be subject to sudden and large falls in value that could equal or exceed the amount invested.The yield and average life of CMOs (collateralized mortgage obligations) referenced in this Product will fluctuate depending on the actual rate at which mortgage holders prepay the mortgages underlying the CMO and changes in current interest rates. Any government agency backing of the CMO applies only to the face value of the CMO and not to any premium paid. Certain investments contained in the Product may have tax implications for private customers whereby levels and basis of taxation may be subject to change. If in doubt, investors should seek advice from a tax adviser. The Product does not purport to identify the nature of the specific market or other risks associated with a particular transaction. Advice in the Product is general and should not be construed as personal advice given it has been prepared without taking account of the objectives, financial situation or needs of any particular investor. Accordingly, investors should, before acting on the advice, consider the appropriateness of the advice, having regard to their objectives, financial situation and needs. Prior to acquiring any financial product, it is the client's responsibility to obtain the relevant offer document for the product and consider it before making a decision as to whether to purchase the product.
Citi Research product may source data from dataCentral. dataCentral is a Citi Research proprietary database, which includes the Firm's estimates, data from company reports and feeds from Thomson Reuters. The source for all referenced prices, unless otherwise stated, is DataCentral. Past performance is not a guarantee or reliable indicator of future results. Forecasts are not a guarantee or reliable indicator of future performance. The printed and printable version of the research report may not include all the information (e.g. certain financial summary information and comparable company data) that is linked to the online version available on the Firm's proprietary electronic distribution platforms.

Card Insights. Where this report references Card Insights data, Card Insights consists of selected data from a subset of Citi's proprietary credit card transactions. Such data has undergone rigorous security protocols to keep all customer information confidential and secure; the data is highly aggregated and anonymized so that all unique customer identifiable information is removed from the data prior to receipt by the report's author or distribution to external parties. This data should be considered in the context of other economic indicators and publicly available information. Further, the selected data represents only a subset of Citi's proprietary credit card transactions due to the selection methodology or other limitations and should not be considered as indicative or predictive of the past or future financial performance of Citi or its credit card business.

Where included in this report, MSCI sourced information is the exclusive property of Morgan Stanley Capital International Inc. (MSCI). Without prior written permission of MSCI, this information and any other MSCI intellectual property may not be reproduced, redisseminated or used to create any financial products, including any indices. This information is provided on an "as is" basis. The user assumes the entire risk of any use made of this information. MSCI, its affiliates and any third party involved in, or related to, computing or compiling the information hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of this information. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates or any third party involved in, or related to, computing or compiling the information have any liability for any damages of any kind. MSCI, Morgan Stanley Capital International and the MSCI indexes are services marks of MSCI and its affiliates. Part of this product may contain Sustainalytics proprietary information that may not be reproduced, used, disseminated, modified nor published in any manner without the express written consent of Sustainalytics. Sustainalytics, its affiliates and any third party involved in, or related to, computing or compiling the information hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of this information. Any information attributed to Sustainalytics is provided solely for informational purposes and on its own should not be considered an offer to buy or sell a security. Neither Sustainalytics nor all its third-party suppliers provide investment advice (as defined in the applicable jurisdiction) or any other form of (financial) advice. The information is provided "as is" and, therefore Sustainalytics assumes no responsibility for errors or omissions. Sustainalytics cannot be held liable for damage arising from the use of this product or information contained herein in any manner whatsoever. Where data is attributed to Morningstar that data is © 2023 Morningstar, Inc. All Rights Reserved. US Utilities: Assessing General Rate Case Risk

85% of Sector in Rate Cases in FY23

Utilities | Theme

We are providing a refreshed rate case matrix for our entire coverage universe so investors can better gauge general rate case (GRC) risk for 2023. Regulatory execution should be a large theme for '23 given the new inflationary paradigm, and we stress rate cases can lead to material catalysts for stocks discussed, adding to our overall cautious view on the utilities sector. Utility bills grew 12% y/y in 2022 nationally and greater scrutiny from local stakeholders is likely in our view. Further, most utilities in our coverage universe have now filed for high single digit to low double-digit rate increases which are being compounded by higher cost of capital and fuel balances. We have consistently received questions from on investors on "Where can I hide" amidst what has been a challenging 3 months of regulatory execution as is evidenced by various state level issues that have cropped up, specifically in MI (CMS/DTE), WI (LNT/WEC), LA (ETR), and VA (D) among others. We stress minimal names across the sector likely carry zero regulatory execution risk in FY23.

- **The Bottom Line: 90% of Sector in GRCs for FY23:** We size up the companies most exposed using rate base (regulatory asset base) which is often used as a proxy for earnings power. We see ~41% of our coverage universe having more than 50% of rate base up for review, while ~65% of the sector has +25% of rate base exposed in the 2023 investment year. Lastly, ~85% of the sector has at least 5% of rate base in cases, meaning there are very few stories that screen clean on GRC risk. We believe investors will need to stomach rate case risk one way or another if they want to be involved in the sector this year. Given higher regulatory asks across the board, we believe settlements overall could also be less likely with parties more willing to take rate cases the full distance. We also see increased pressure from Commissions nationally to defend rate payers amidst a heightened inflation backdrop. As highlighted in our April '22 launch, investors should also be acutely aware of single state exposures (CMS, DTE, POR, PNW, ED) given the outsized impacts to earnings power. This theme is likely to continue through the course of 2023.
- **Who Stands Out:** AEP, CNP, ES, PPL, NEE, PEG, OGE, and EIX all have less rate case risk vs. the average (49% of rate base) based on our matrix. PCG, SRE, POR, NI, XEL, PNW, DTE, and CMS stand out to have more risk than the average.
- **Bar-belling the 'Haves' & 'Have Nots' not necessarily going to be a successful strategy:** We are providing this analysis as a simple tool for investors to scan GRC risk. We're unsure if simply avoiding GRC risk will be a successful strategy in '23, principally as there are multiple execution items that companies need to affirm current year and LT EPS metrics which should be needle movers for the stocks discussed. For instance, ETR has limited rate case risk but the securitization proceedings in E-LA will likely be the driver of the stock. AEP also screens lower than average, but we think mgmt needs to execute on the KY Power deal, various renewable generation proposals at the PUC level which underpin the current $40Bn capex plan, as well as the OH ESP. SO has limited rate case risk, but we believe execution of U4 nuclear will be the larger driver of shares through FY23.

DISCLOSURE APPENDIX AT THE BACK OF THIS REPORT CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, LEGAL ENTITY DISCLOSURE AND THE STATUS OF NON-US ANALYSTS. US Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Additional Considerations

- **Reg Jurisdictions Where We Have Confidence: Michigan:** DTE / CMS essentially have 100% of earnings power up for review in '23 via multiple cases, which we think they address constructively as evidenced by the recent CMS settlement. We stress the CMS settlement is an important data-point showing the constructive nature of the jurisdiction where we expect commission approval by mid-Jan. DTE already saw a negative rate order in its GRC, but we're expecting the company to reaffirm FY23 guidance (6.25 midpoint) on the upcoming 4Q call. **Illinois:** This is a big year for the state given MYRPs expected to be filed (by Jan 20) in IL which matters for EXC/AEE. For EXC we're encouraged by the CMC mechanism which has protected customers from an inflationary standpoint this past year. We believe IL will be resolved constructively.
- **Reg Jurisdictions We're Watching with More Caution: Wisconsin:** Given current rhetoric out of the W-PSC, we see some risk to LNT's rate filing at WPL. **Arizona:** While we have seen new commissioners' step in, they are unproven, and AZ is one of the toughest jurisdictions on our rate affordability analysis.
- **Affordability Angle Matters Too:** We re-hash our affordability screen triangulating customer bills, average median income, and usage to get a better sense of where true bill pressure could surmount. CA, NY, and NJ companies screen positively while Southern companies SO, NEE, PNW, ETR screen negatively. ETR has already seen follow through given securitization concerns in E-LA with commissioners being vocal on wanting ETR to share some portion of IDA costs. The south generally screens negatively on this analysis due to lower-than-average median incomes and higher usage. Utility bills grew 12% y/y nationally, 8% y/y in 1H22 and 15% y/y in 2H22.

Select Company Considerations

- **AEE:** With pending rate cases for MO electric and IL nat gas businesses, we see the major new development for the company being the IL electric multi-year rate review expected to be filed by January 20th. The company established a PBR framework for the IL electric business in Dec. 2022, and we expect this to lead to a more constructive rate case process for this ask.
- **CMS:** Company plans to file its annual electric rate case in 2H23, with CMS having a historical precedent of filing annual rate cases to true-up actual vs. forecasted costs. The company is currently amidst an electric and gas rate case, with the electric rate case seeing a settlement and pending a final order. We see a strong focus on execution of regulatory strategy for CMS in '23.
- **DTE:** Company plans to file a new gas rate case this year but the '22 approved electric rate case is still going through rehearing process without statutory timeline. We do expect the company to file a rate case at the electric side following rehearing process in the current electric rate case. Regarding the current rehearing request, we expect potential clarity (amended order or denial) before the 4Q22 call.
- **POR:** While management has yet to commit to a OR GRC filing, we have high confidence the 4Q call will be met with an announcement to file for the 2023.
- **FE:** '23 is a big year for FE's rate filing strategy with new GRCs filing in three jurisdictions: MD (PE), NJ (JCPL) and WC(MP/PE). We also flag that company is planning to file OH ESP during 1H23 and further consolidate PA utilities during the same time frame. The larger rate cases will be PA / OH where we don't expect filings until very late 2023 or 2024 timeframe.
- **PNW:** With one major rate case outstanding, we expect the market to test the improvement in AZ's regulatory construct with newly elected commissioners. The appealing process for '19 GRC is still ongoing and with a possible court decision by 1Q23. We expect rate

filing strategy to remain the same to address the lower authorized ROE with clarity via staff testimony sometime May / June '23.

- **NI:** Another execution name post '22 AD strategic announcement. We are monitoring NIPSCo, Columbia Gas OH and VA all navigating through rate filing process to become a premium name as envisioned by mgmt. We have confidence in NI's regulatory execution, principally in Indiana given historical precedent and recent data points. The Columbia Gas OH case was already settled which as well was a major item for FY23.
- **SRE/PCG/EIX:** All CA utilities are going through or plan to enter rate filing process. Essentially the entirety of SRE's rate base (CA+TX) is subjected to rate case risk this year. EIX is navigating through Track 4 filing and plan to file GRC this May while PCG is expecting a rate decision by 1H23. While SRE / EIX attrition years are more relevant to 2024+ earnings power considerations, we're including them in our matrix; we see the rate outcomes as a potential driver for share performance.
- **OGE:** The company currently does not have any pending rate cases or plans to file in '23. That said, management is planning on seeking pre-approval in OK for upcoming generation replacement in '23, based on our discussions.
- **PPL:** The company does not currently have any rate cases pending or plans to file in '23 and we expect this paradigm to continue until at least 2025 with the potential to extend further depending on efficiency initiatives.
- **XEL:** On top of all rate filings underway in CO/MN/NM/SD, we expect XEL to file CO gas rate case sometime in '23. We still see the MN rate cases as de-risking factors and hold positive view based on XEL's historical ability to manage the regulatory process and achieve constructive outcomes. Our recent move to Neutral was valuation based but it's notable that the stock now trades at the highest premium in the sector with outsized rate exposure.

Please reference the below pages for the rate case & affordability matrix. Both matrices are available to clients in Excel format upon request.

Valuation Methodology and Risks

Target Price and Rating
Valuation Methodology and Risks: (12 months) for AEP Inc (AEP.OQ)

Method: We value AEP using an SOTP methodology and our target price is $100. We apply the electric group's 17.7x P/E multiple to all subsidiaries while applying a 15% multiple premium to AEP TransCo, reflecting formulaic/timely recovery in FERC jurisdictions. For the unregulated power generation business, we apply a 15% discount given there's less earnings visibility and AEP is transitioning to a more regulated growth strategy. We also apply 5% discount to all VIUs and revised TX multiple to neutral. We currently have zero EPS contribution from Kentucky Power under a base-case assumption. We rate AEP Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to our Outperform rating and $100 target price include: (1) any non-constructive regulatory decision for renewable capital spending recovery; (2) untimely execution of the Kentucky sale or unfavorable valuation applied to contracted renewable sales; (3) aggressive coal retirement programs could increase stranded asset risk given AEP's vision to retire an additional 5GW of coal generation by 2028.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Alliant Energy (LNT.N)

Method: We value Neutral-rated LNT using a SOTP to determine our $51 target price, applying relative P/E premiums/discounts to the various operating subsidiaries. In general, we view IA and WI as favorable jurisdictions. We apply a 10% premium to the business, giving a 16.8x 2024E P/E multiple, as both jurisdictions the company operates within have allowed for favorable outcomes in rate cases, historically speaking.

Risk: Risks to achieve our $51 target price and Neutral rating include the company seeing greater-than-expected returns in the unregulated renewable business, being unable to keep pace with peers' 6-8% EPS growth CAGR, or seeing decreased growth in service territories.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Ameren (AEE.N)

Method: Our target price is $82: We value AEE using a P/E methodology, applying relative P/E premiums and discounts to the company as a whole. In general, we view the Midwest (Illinois and Missouri) as a premium jurisdiction given the pro-development regulators and robust transmission development plan likely to be passed soon. We take a premium view on AEE (17.7x vs. 15.4x for the peer average), which we view to be fair given the strong upside potential and relatively limited downside risk for the company. We rate AEE Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to achieving our $82 target price and Outperform rating include: Common equity funding that is not contemplated in our base-case scenarios, MISO Future 1 and 3 seeing delays, natural disasters, and a political landscape in the coverage area that is less favorable than current times. Climate change is also a risk to the extent that federal or state legislatures implement more restrictions on GHG emissions expected, which would increase standard asset risk for AEE's fossil generation. Commodity prices are surging, so Ameren must be diligent in maintaining bill pressure as it scales capex across IL and MO.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for CMS Energy Corp (CMS.N)

Method: Our target price is $69: We value CMS using an SOTP, applying relative P/E premiums/discounts to the two operating subsidiaries. In general, we view Michigan as a premium jurisdiction, given the historically constructive decisions and heathy earned ROEs. Michigan is also offering a premium allowed ROEs for renewable projects and EE. We take a premium view on both the Consumers and Enterprise segments with an 18.8x implied multiple for the electric and gas groups versus 16.7x and 16.1x implied multiples for the electric and gas peer groups, respectively. We place a premium on the two operating segments given the strength of the businesses and upside potential in both. We rate CMS Outperform as we expect the stock's total return to be above that of peers over the next 12 months.

Risk: Risks to achieving our $69 target price and Outperform rating include: Difficulty executing on settled IRP plans that could lead to reduced capex spending and ultimately rate base growth. Construction delays could push back timelines for renewable projects and could delay upside from increased ROEs currently offered in Michigan for such projects. Increased severe weather events, particularly as coal plants are being phased out, could cause service continuity issues that would be costly to address.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for CenterPoint Energy (CNP.N)

Method: We value CNP using an SOTP methodology on 2025E EPS and have a $31 target price. We apply a 15% premium to the electric utility group multiple to Houston Electric, given the high-growth nature of the subsidiary and constructive regulatory mechanisms that allow management to realize ROEs close to authorized. We apply an 15% premium to SIGECO, given the generation replacement opportunity and transactions for peers in the state, which have garnered north of 20x P/E. We are also applying a 15% premium to the

gas distribution segment, given management has already been actively monetizing its LDC portfolio north of 2.0x rate base. We rate CNP Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to our Outperform rating and $31 target price include: Failure to obtain constructive outcomes in regulatory proceedings, failure to execute on the companies proposed IRP in IN, natural disasters, labor/inflationary pressures above management's current O&M trajectory. Climate change is also a risk to the extent federal or state legislatures implement restrictions on GHG emissions in a more expected manner than contemplated. Commodity volatility is also a risk as it can lead to higher bills for customers, and crowd out growth opportunities.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Consolidated Edison (ED.N)

Method: Our target price is $78: We value ED on an SOTP approach. The company historically has had a challenging time earning its allowed ROE in the state, and we see an 8.8% authorized ROE as one of the lowest in the country. We are including a post-transaction NI of $1,666Mn for CEB sale given there is now a clear valuation/proceeds amount. We rate ED Neutral as we expect the stock's total return to be in line with peers over the next 12 months.

Risk: Risks to achieving our $78 target price and Neutral rating include: Common equity funding that is not contemplated in our base-case, Blue Sky, or Grey Sky scenarios. Failure to establish new rates at CECONY, which could lead investors to take a discounted view on ED's largest earnings contributor. Natural disaster risk, which could accelerate liabilities surrounding the NYC distribution system. EDs natural gas system is subject to greater operational risk given gas is a combustible molecule. NY is increasingly focused on electrification, which increases stranded assert risk associated with ED's LDC system. Upside risk includes a better than expected rate case outcome.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for DTE Energy (DTE.N)

Method: We value DTE using an SOTP, applying 15% P/E premiums to both the electric (15.4x) and gas (14.7x) subsidiary, which yields a $118 target price. We hold a discounted view on Trading (-30% discount), given these are non-core businesses and contain higher earnings volatility. We rate DTE Outperform as we expect the stock's total return to be above peers over the next 12 months.

Risk: Risks to our Outperform rating and $118 target price include: The uncertainties around timely recovery cost through base rate increase. The unregulated business earning is more susceptible to economic and industry cycles, with potential upside/downside.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Edison International (EIX.N)

Method: We value Neutral-rated EIX using an SOTP to determine our $64target price, applying relative P/E premiums/discounts to the various operating subsidiaries. In general, we view California as a discount jurisdiction, with wildfire risk persistent throughout the state. We apply a 20% discount to the Electric GRC earnings and a 10% discount to the Transmission earnings, largely because of the risk of wildfires and related capital recovery proceedings. We adjust our SOTP for current and ongoing liabilities, principally (1) a $1Bn wildfire liability, offset by $1Bn of aggregate insurance, ongoing wildfire fund contributions of $95Mn/year discounted at a 9.5% IRR, and (2) remaining legacy wildfire claims of $900Mn assuming EIX foregoes cost of debt recovery on the remaining claims.

Risk: Risks to achieve our $64 target and Neutral rating include the company seeing delays in both the covered conductor installation and capital recovery, seeing increased wildfire activity in the coming years, and seeing a faster-than-expected recovery of costs associated with the '17/'18 natural disasters.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Entergy Corporation (ETR.N)

Method: Our target price Is $117: We value ETR on a P/E approach using the 2024E multiple of 16.3x on our 2024E EPS. We think ETR offers in above-average jurisdictions for growth, but ongoing hurricane costs can stress ETR's balance sheet. We see the currently constructive regulatory environment in ETR's service territories partially offsetting this negative. We do not ascribe any value to the stock for potential upside capex, or potential value accretive events such as an NCI sale. Overall, we still see ETR as attractive on this base-case discount approach. We rate ETR Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to achieving our Outperform rating and $117 target price include: Failure to obtain constructive outcomes in regulatory proceedings, failure to execute on the company's proposed securitizations, natural disasters, labor/inflationary pressures above management's current O&M trajectory. Climate change is a risk to the extent federal or state legislatures implement more restrictions on GHG emissions than expected, or if there are increased hurricanes in the Gulf Coast this season. A worse-than-contemplated hurricane season could inhibit ETR from reaching our target price.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Eversource Energy (ES.N)

Method: Our target price is $75: We value ES using an SOTP, applying relative P/E premiums/discounts to the various operating subsidiaries. In general, we view CT, MA, and RI as relatively favorable jurisdictions, although there have been recent conflicts in CT related to performance and penalties. We apply a 5% premium to the natural gas business as ES has a strong track record for operations and earned ROEs. For the Transmission segment, we apply a 5% premium, which is lower than our transmission approach for peer utilities, as we attempt to reflect risk of further ROE cuts to NE transmission operators. We rate ES Neutral as we expect the stock's total return to be in line with peers over the next 12 months.

Risk: Risks to achieving our Neutral rating and $75 target price include: The company seeing further rate pressure from inflation, particularly in CL&P's jurisdiction. Other risks include further downgrade of forecasted ROE for offshore projects or an unfavorable monetization outcome, natural disaster/other issue that could delay wind projects under construction. Given the nature of offshore projects, climate-related issues pose a large risk to the company and its growth plans. Upside risk includes a better than expected rate outcomes.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Exelon Corporation (EXC.OQ)

Method: We utilized an SOTP method to determine our target price of $42 per share and a blended P/E multiple of 15.3x for Outperform-rated EXC. We derived the blended P/E multiple by creating a proportion of each segment for the electric group, transmission group, and gas group. We based the proportion on each segment's contribution to rate base. We applied a conservative, in line multiple to the current blended multiple of 15.3x. We believe that an improving regulatory environment in Illinois will be favorable for EXC investors by allowing ComEd to file a rate case that is in line with industry average. Changes in the allowed ROE structure could increase the allowed ROE by 2% in 2024. Another key driver is the execution of the $29Bn capital plan.

Risk: Risks to achieve our $42 target price and Outperform rating include: (1) management not meeting RAB projected growth; (2) not reaching stated growth metrics, including the 6-8% LT EPS CAGR; (3) increasing commodity cost for electric and gas service, natural disaster risk; (4) worse-than-expected regulatory outcomes; and (5) volatility to 30yr US Treasuries, as ComEd ROEs are linked to 30YR USTs.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for FirstEnergy (FE.N)

Method: We value FE using an SOTP, applying relative P/E premiums/discounts to the various operating subsidiaries, which yields a $39 target price. We hold a discounted view on all utilities subsidiaries other than FET (-20% discount to Ohio utilities and 10% discount to the rest of the portfolio), given FE's reputational risk and the upcoming base rate case filings across all jurisdictions, while the transmission company benefits from more constructive FERC regulation with timely and formulaic recovery. We rate FE Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to out Outperform rating and $39 target price include: although the HB6 investigation is behind FE through the DPA, FE carries the reputation risk of a historically challenging organization. Even though the new management team has introduced internal control programs and is re-building the company's compliance culture, we recognize it takes time for a large organization to gradually achieve it.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for NextEra Energy Inc. (NEE.N)

Method: Our target price is $89 is based on a SOTP analysis. On the regulated front, we use P/E approach based on forecasted 2024 EPS and electric group multiple of 15.3x. We apply 25% multiple premium to FPL and Gulf, given Florida is one of the most regulatory supportive jurisdiction in the country for of timely recovery of utilities' spending. We also consider the scale and efficiency of its operation as one of the best in the utilities space. We use EV/EBITDA approach to value the enterprise value of NEER's various business lines based on 2023 EBITDA. Our multiple is in-line with recent transaction multiples for each earning's driver. We subtract NEER's debt from enterprise value to derive equity value. We use a NPV approach to value DevCo's forecasted monetization proceeds with an assumed discount rate of 9.2%. Lastly, we value NEE's NEP LP stake proportionally using the current NEP share price multiply by NEE's LP share, then add GP IDR value, which is also estimated through an NPV approach. We rate NEE Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to your Outperform rating and $89 target price include: 1) NEE's valuation multiple is more susceptible to market volatility as a growth name compared the value names; 2) the recent probe on solar anti-circumvention could exacerbate supply chain pressures; 3) Although benefiting from a deep bench of senior executives, Robo's retirement cast some doubt to the LT growth if NEE is not able to secure an effective new leadership team; 4) NEE's capital structures is among the most complex names and is more dependent on market condition.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for NiSource (NI.N)

Method: We value NI on a P/E approach that yields a $27 target price. Our base-case multiple of 16.1x is derived by taking the regulated electric and regulated gas group multiples and applying a weighted-average approach based on NI's rate base mix. We apply a 5% premium to this number to account for: (1) numerous tracking mechanisms in place to realize real-time return on capital; (2) new management, which is taking a refreshed view of the company's operating segments and pushing forward with a strategic review with the goal of creating value; and (3) potential upside to capex that isn't contemplated in our current EPS estimates. Our target price implied P/E multiple is in line to electrics and a premium to gas LDCs. We rate NI Neutral as we expect the stock's total return to be in line with peers over the next 12 months.

Risk: Risks to our Neutral rating and $27 target price include: Increased inflation above NI's cost-control ability, as well as headwinds delaying solar development via supply chain issues. Gas is a combustible molecule, and NI has a history of two separate high-profile explosions in the last 10 years, which could negatively affect the share price. Management also discussed buying and selling assets as part of its new strategy, and we think buying assets could weigh on NI's multiple. Climate change and increased scrutiny on GhG emissions is also a risk given ~70% of NI's rate base is coming from the gas distribution utility.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for OGE Energy (OGE.N)

Method: We value OGE using an SOTP with a $36 target price, applying relative P/E premiums/discounts to the various operating subsidiaries. In general, we view Oklahoma as an average jurisdiction given the strong focus on affordability for customers. We take apply a 5% premium to the business given limited rate case risk, IRA positioning, ST growth and CapEx growth not current included in our forecasts. We value OGE on the small-cap multiple given the relatively small operational area and that it is a largely single-state jurisdiction. In our view, the stock is fairly prices on an SOTP basis given the strong catalysts, but there are clear risks to the company. We rate OGE Neutral as we expect the stock's total return to be in line with peers over the next 12 months.

Risk: Risks to our Neutral rating and $36 target price include: common equity funding that is not contemplated in our base-case, Blue Sky, or Grey Sky scenarios. Failure to execute on IRP as planned, supply chain issues related to solar panels or a significant decline in population and load growth could cause the market to take a discounted view on the name. Potential upside from the current rate case filing.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for PG&E Corporation (PCG.N)

Method: Our target price is $17. We value PCG on an SOTP. We apply a 25% discount to our 2024E electric earnings, a 15% discount to gas earnings, and 5% discount to transmission earnings relative to the 2025E electric and gas group P/E multiples. We impute ~$1.0Bn of net wildfire liabilities, which include an additional $1Bn wildfire liability for fires to handicap incremental wildfire event risk. We see ~12% total return for PCG in our base case, which is the above average for our coverage universe. Our target price implies an 11.8x consolidated P/E, a -22% discount, which is still one of the widest across the sector. We rate PCG Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to our Outperform rating and $17 target price include: PCG has a history of having utility assets involved with large wildfires in CA. Additional wildfires in 2022-24 could materially affect our valuation. PCG is subject to environmental factors such as severe weather conditions and climate change, which could increase wildfire events. PCG's higher-than-average debt/capital and lower-than-average FFO/debt, while we forecast improving lower cash flow from rate proceedings or materially adverse rate case outcomes, could drive incremental equity needs or reduce the likelihood of reinstating the dividend.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for PPL Corporation (PPL.N)

Method: Our target price is $29. We value PPL using an SOTP, applying relative P/E premiums/discounts to the various operating subsidiaries. We take a premium view on PA (10% premium, 17.3x multiple), which we flag as conservative given the recent settlement in PA and the favorable storm recovery mechanisms recently utilized. We take a discounted view on LU and KU (5% discount, 14.9x multiple) because of the current stay-out of Kentucky rates and the risk of inflation weighing on customer bills in the years until 2025 when another rate case can be filed. We rate PPL Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to achieving our $29 target price and Outperform rating include: the inability to sustain new dividend and increased growth rate, and the inability to execute fully on the AMI and renewables projects. Increased inflation amid a rate stay-out in Kentucky, as well as headwinds delaying solar development via supply chain issues also pose a threat to the company. Other risks include more natural disasters/storms in Kentucky and Pennsylvania that delay projects and are expensive to repair, as well as climate change and related concerns. Upside risk includes the company cutting O&M expenses more than expected.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Pinnacle West Capital Corporation (PNW.N)

Method: We value PNW using a P/E, applying relative premiums/discounts to the various operating subsidiaries, which yields a $77 target price. We hold a discounted view on APS (-5% discount), given Arizona's general regulatory climate and additional uncertainties surrounded by APS being at the nexus of managing both rate case filing and separate judicial review against Arizona's challenging regulatory backdrop. We rate PNW Neutral as we expect the stock's total return to be in-line with peers over the next 12 months.

Risk: Risks to our Neutral rating and $77 target price include: The uncertainties around the timely recovery of investment and operating expense associated with pollution control costs and earning sufficient return on equity to compensate the shareholder.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Portland General Electric (POR.N)

Method: We value POR using a P/E relative valuation methodology, applying a relative P/E premium/discount to the business, which yields a $46 target price. In general, we view Oregon as a favorable jurisdiction, with the offsetting factor being that POR has been challenged in the past obtaining favorable agreements. We apply a 5% discount for this, and use a 15.9x base multiple for small caps in the space. Although there are some prospects for growth for the company, there are many potential hurdles and a history of falling short on key initiatives that make us hesitant to place a premium on the stock. We rate POR Neutral going the equity issuance and '23 building year guided by management.

Risk: Risks to our Neutral rating and $46 target price include: A continuation of the trend of severe weather events leading to large deferrals and increased customer bills. Continuation of poor outcomes in terms of execution of RFP projects, etc. that leads to larger discrepancies between earned and allowed ROEs. Unfavorable rate case outcome for filing expected in '23.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Public Service Enterprise Group (PEG.N)

Method: We value PEG (excl. nuclear) using an SOTP on 2024E EPS using 2024E multiples, which yields a $61 target price. We apply peer P/E premiums to New Jersey compared to peer jurisdictions given PEG's historical higher-than-peer ROE, constructive rider mechanisms, and heavy FERC-regulated rate base. We hold a discounted view on the earnings derived from the LIPA contract (-25% discount) given its extension risk. We value PEG's nuclear generation using an EV/EBITDA multiple on 2024E EBITDA and a 10x multiple to derive the nuclear generation enterprise value (excluding the portion from ZEC), then subtract associated debt and add back NPV from ZEC payments to calculate the equity value from contracted nuclear. We rate PEG Neutral as we expect the stock's total return to be in line with peers over the next 12 months.

Risk: Risks to our $61 target price and Neutral rating include the following: PEG has robust capital spending programs with large-scale offshore wind project contemplated and a regulatory solar build-out, which are both subjected to state and federal regulation and scrutiny. The construction of such projects may face supply chain restraints and labor shortages. The contracted generation business remains commercial exposure with market price risk. The pension position could lead to significant EPS drag as well.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Sempra Energy (SRE.N)

Method: Our $172 target price is based on an SOTP analysis. At the utilities, we use a P/E approach based on 2024 projected net income. We apply a 10% multiple discount to SDGE, a 10% premium to Sempra Texas, and 5% discount to SoCalGas vs. their respective electric/gas 2024E group multiples. We view CA as a discount jurisdiction, owing to wildfire risk/recovery frameworks, and we see TX as a premium jurisdiction given outside growth opportunities and constructive regulatory framework. At SRE Infra, we apply a 12.5x EV/EBITDA multiple, which is 0.5-1.0x turns below where SRE recently monetized a 10% NCI interest in SRE. At for incremental LNG, we NPV the 20-year cash flows associated with ECA1 and Cameron Train 4 expansion, discounting them at Sempra's current expected market return of 9.3% for US projects and add 100bps to Mexico projects to reflect a country risk premium. Our SOTP base-case valuation implies a consolidated P/E multiple of 18.1x, which is in-line with current electric comps. We rate SRE Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to our Outperform rating and $172 target price include: (1) SRE operates several fossil fuel distribution systems, which subjects the company to event risk associated with transporting combustible molecules; (2) climate change and the increased frequency of wildfires across CA; (3) stranded asset risk associated with the gas distribution system; (4) regulatory outcomes, as our estimates assume constructive resolutions in both CA and TX on pending rate cases; and (5) performance of equity method investments, which SRE relies upon for cash flow.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Southern Co (SO.N)

Method: We value SO using an SOTP that leads to a $62 target price, applying relative P/E premiums/discounts to the various operating subsidiaries. All P/Es are based on our 2024E EPS. We view Georgia and Alabama as premium jurisdictions given numerous

constrictive mechanisms for real-time capital recovery. We have a discounted view on Southern Power (-25% discount, 13.4x), given its non-regulated earning with higher volatility. We also take a discounted view of 30% on the Vogtle-related earnings given the uncertainties in project delay, concerns on cost overrun, and potentially higher burden to Georgia Power among other co-owners given the co-ownership agreement. We rate SO Underperform as we expect the stock's total return to underperform peers over the next 12 months.

Risk: Risks to achieve our $62 target price and Underperform rating include: The marketability of mandatory convertible securities and corresponding equity issuance. Non constructive ruling on Georgia Power's rate review, which could lead investors to take a discounted view on SO's largest earnings contributor. Climate change, and increased regulation on GHG emissions could accelerate closure of certain fossil investments which would increase stranded asset risks to shares. Lastly, Federal legislation, such as change in tax policy could negatively impact CFO for SO given its tax equity exposure through Southern Power.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for WEC Energy Group (WEC.N)

Method: Our target price is $93: We value WEC using a P/E valuation methodology, applying relative P/E premiums/discounts to the company. In general, we view Wisconsin and much of the Midwest as premium jurisdictions given numerous constructive mechanisms for real-time capital recovery, constructive rate case outcomes, and solid load growth. We take a premium view on WEC (15%, 18.9x), as we believe the company has a relatively limited number of levers that can be pulled to sustain capex growth in near future. Rate case risks appear priced in, although we think quality peers offer more attractive risk/reward skews. We rate WEC Underperform as we expect the stock's total return to be less than peers over the next 12 months.

Risk: Risks to our $93 target price and Underperform include: Sustained population growth in service territory driving load demand; the current supply chain issues related to solar panels are resolved in timely manner and Badger Hollow 2 is able to reduce the time of delay; Investor sentiment shifts and companies pursuing renewable projects and other non-core, regulated utility projects are rewarded by investors.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Xcel Energy (XEL.N)

Method: Our target price is $68. We ascribe a 15% P/E premium to the wider regulated utility group average, which is in-line with XEL's historical 5yr average. XEL tends to trade with the 'premium' utilities given its strong track record for delivering on the high end of its 5-7% EPS CAGR. We see the premium further supported by XEL's history of generally constructive regulatory outcomes, the company's Steel for Fuel program, which has enabled an acceleration of energy transition-related capital expenditures, as well as the potentially positive benefits stemming from Build-Back-Better legislation. We rate XEL Neutral as we expect the stock's total return to perform in-line with peers over the next 12 months.

Risk: Risks to Neutral rating and $68 target price include: Failure to obtain constructive outcomes in regulatory proceedings, failure to execute on the company's proposed IRP in CO, natural disasters, labor/inflationary pressures above management's current O&M trajectory. Climate change is also a risk to the extent federal or state legislatures implement more restrictions on GHG emissions than expected. Wildfires are becoming more common in some of XEL's service territories, which can cause its multiple to fluctuate more than peers.

As of December 10, 2012 Analysts' stock rating are defined as follows:
Outperform (O) : The stock's total return is expected to outperform the relevant benchmark* over the next 12 months.
Neutral (N) : The stock's total return is expected to be in line with the relevant benchmark* over the next 12 months.
Underperform (U) : The stock's total return is expected to underperform the relevant benchmark* over the next 12 months.
**Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European (excluding Turkey) ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin America, Turkey and Asia (excluding Japan and Australia), stock ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark (India - S&P BSE Sensex Index); for China A share the relevant index is the Shanghai Shenzhen CSI 300 (CSI300); prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, the expected total return (ETR) calculation includes 12-month rolling dividend yield. An Outperform rating is assigned where an ETR is greater than or equal to 7.5%; Underperform where an ETR less than or equal to 5%. A Neutral may be assigned where the ETR is between -5% and 15%. The overlapping rating range allows analysts to assign a rating that puts ETR in the context of associated risks. Prior to 18 May 2015, ETR ranges for Outperform and Underperform ratings did not overlap with Neutral thresholds between 15% and 7.5%, which was in operation from 7 July 2011.*
Restricted (R) : In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.
Not Rated (NR) : Credit Suisse Equity Research does not have an investment rating or view on the stock or any other securities related to the company at this time.
Not Covered (NC) : Credit Suisse Equity Research does not provide ongoing coverage of the company or offer an investment rating or investment view on the equity security of the company or related products.

Volatility Indicator [V] : A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector* relative to the group's historic fundamentals and/or valuation:
Overweight : The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.
Market Weight : The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.
Underweight : The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	53%	(27% banking clients)
Neutral/Hold*	36%	(22% banking clients)
Underperform/Sell*	10%	(20% banking clients)
Restricted	1%	

Please click here to view the MAR quarterly recommendations and investment services report for fundamental research recommendations.
For purposes of the NYSE and FINRA ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Important Global Disclosures

Credit Suisse's research reports are made available to clients through our proprietary research portal on CS PLUS. Credit Suisse research products may also be made available through third-party vendors or alternate electronic means as a convenience. Certain research products are only made available through CS PLUS. The services provided by Credit Suisse's analysts to clients may depend on a specific client's preferences regarding the frequency and manner of receiving communications, the client's risk profile and investment, the size and scope of the overall client relationship with the Firm, as well as legal and regulatory constraints. To access all of Credit Suisse's research that you are entitled to receive in the most timely manner, please contact your sales representative or go to https://plus.credit-suisse.com .

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment.
To the extent any Credit Suisse equity research analyst employed by Credit Suisse International (a "UK Analyst") has interactions with a Spanish domiciled client of Credit Suisse AG or its affiliates, such UK Analyst will be acting for and on behalf of Credit Suisse Bank (Europe), S.A., with respect only to the provision of equity research services to Spanish domiciled clients of Credit Suisse AG or its affiliates.
Pursuant to CVM Resolution No. 20/2021, of February 25, 2021, the author(s) of the report hereby certify(ies) that the views expressed in this report solely and exclusively reflect the personal opinions of the author(s) and have been prepared independently, including with respect to Credit Suisse. Part of the author(s)´s compensation is based on various factors, including the total revenues of Credit Suisse, but no part of the compensation has been, is, or will be related to the specific recommendations or views expressed in this report. In addition, Credit Suisse declares that: Credit Suisse has provided, and/or may in the future provide investment banking, brokerage, asset management, commercial banking and other financial services to the subject company/companies or its affiliates, for which they have received or may receive customary fees and commissions, and which constituted or may constitute relevant financial or commercial interests in relation to the subject company/companies or the subject securities.
This research report is authored by:
Credit Suisse Securities (USA) LLC..... Nicholas Campanella ; Fei She, CFA ; Nathan Richardson
There is currently no universal definition or exhaustive list defining the issues or factors that are covered by the concept of "ESG" (Environmental, Social, Governance). If not indicated otherwise, 'ESG' is used interchangeably with the terms 'sustainable' and 'sustainability'. Unless indicated otherwise, the views expressed herein are based on CS' own assumptions and interpretation of ESG at the time of drafting. CS' views on ESG may evolve over time and are subject to change.
Where a sustainability assessment is identified as including elements which track environmental, social or governance (ESG) objectives, CS is, wholly or in part, reliant on third-party sources of information (including, but not limited to, such information produced by the issuing/manufacturing company itself) and external guidance. These sources of information may be limited in terms of accuracy, availability and timeliness. It is possible that the data from ESG data providers may be incorrect, unavailable (e.g., not existing, or absence of look-through), or not fully updated. CS has not sought to independently verify information obtained from public and third-party sources and makes no representations or warranties as to accuracy, completeness or reliability of such information. Additionally, as global laws, guidelines and regulations in relation to the tracking and provision of such data are evolving, all such disclosures are made on a non-reliance basis and are subject to change. Unless required by applicable law, CS is not obliged to provide updates on sustainability assessments. Any updates might be subject to a time lag, due to e.g. lack of available data.
An ESG assessment reflects the opinion of the assessing party (CS or external parties such as rating agencies or other financial institutions). In the absence of a standardized ESG assessment system, each assessing party has its own research and analysis framework/methodology. Therefore, ESG assessment or risk levels given by different assessing parties to the same company can vary. Further, ESG assessment is limited to considering company performance against certain ESG criteria only and does not take into account the other factors needed to assess the value of a company.

Important disclosures regarding companies that are the subject of this report are available by calling +1 (877) 291-2683. The same important disclosures, with the exception of valuation methodology and risk discussions, are also available on Credit Suisse's disclosure website at https://rave.credit-suisse.com/disclosures . For valuation methodology and risks associated with any recommendation, price target, or rating referenced in this report, please refer to the disclosures section of the most recent report regarding the subject company.

This report is produced by subsidiaries and affiliates of Credit Suisse ("CS") operating under its Securities Research function within the Investment Banking Division. For more information on our structure, please use the following link: https://www.credit-suisse.com/who-we-are All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS. CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. Please note in particular that the bases and levels of taxation may change. Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of any such website does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk. This report may contain material that is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject CS to any registration or licensing requirement within such jurisdiction.The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor.This research report does not, and is not intended to be, an advertisement within the meaning of article 68 of the Swiss Financial Services Act and/or article 95 of the Swiss Financial Services Ordinance. This research report is not a prospectus, basic information sheet (BIB) or a key information document (KID). Any recipients of this document should, however, note that any communication forwarding or using this research report as a basis for discussion, would qualify as such advertisement if it is intended to draw the recipient's attention to specific financial instruments covered by this research report.

Additional Regional Disclaimers

Australia: Credit Suisse Securities (Europe) Limited ("CSSEL") and Credit Suisse International ("CSI") are authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority ("FCA") and the Prudential Regulation Authority under UK laws, which differ from Australian Laws. CSSEL and CSI do not hold an Australian Financial Services Licence ("AFSL") and are exempt from the requirement to hold an AFSL under the Corporations Act (Cth) 2001 ("Corporations Act") in respect of the financial services provided to Australian wholesale clients (within the meaning of section 761G of the Corporations Act) (hereinafter referred to as "Financial Services"). This material is not for distribution to retail clients and is directed exclusively at Credit Suisse's professional clients and eligible counterparties as defined by the FCA, and wholesale clients as defined under section 761G of the Corporations Act. Credit Suisse (Hong Kong) Limited ("CSHK") is licensed and regulated by the Securities and Futures Commission of Hong Kong under the laws of Hong Kong SAR, which differ from Australian laws. CSHKL does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. Investment banking services in the United States are provided by Credit Suisse Securities (USA) LLC, an affiliate of Credit Suisse Group. CSSU is regulated by the United States Securities and Exchange Commission under United States laws, which differ from Australian laws. CSSU does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. Credit Suisse Asset Management LLC (CSAM) is authorised by the Securities and Exchange Commission under US laws, which differ from Australian laws. CSAM does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. This material is provided solely to Institutional Accounts (as defined in the FINRA rules) who are Eligible Contract Participants (as defined in the US Commodity Exchange Act). Credit Suisse Equities (Australia) Limited (ABN 35 068 232 708) ("CSEAL") is an AFSL holder in Australia (AFSL 237237).

EU: This report has been produced by subsidiaries and affiliates of Credit Suisse operating under its Securities Research function within the Investment Banking Division.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements.

This material is issued and distributed in the U.S. by CSSU, a member of NYSE, FINRA, SIPC and the NFA, and CSSU accepts responsibility for its contents. Clients should contact analysts and execute transactions through a Credit Suisse subsidiary or affiliate in their home jurisdiction unless governing law permits otherwise.

CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials, management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. No information or communication provided herein or otherwise is intended to be, or should be construed as, a recommendation within the meaning of the US Department of Labor's final regulation defining "investment advice" for purposes of the Employee Retirement Income Security Act of 1974, as amended and Section 4975 of the Internal Revenue Code of 1986, as amended, and the information provided herein is intended to be general information, and should not be construed as, providing investment advice (impartial or otherwise).

Malaysia: Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn Bhd, to whom they should direct any queries on +603 2723 2020.

Singapore: This report has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (each as defined under the Financial Advisers Regulations) only, and is also distributed by Credit Suisse AG, Singapore Branch to overseas investors (as defined under the Financial Advisers Regulations). Credit Suisse AG, Singapore Branch may distribute reports produced by its foreign entities or affiliates pursuant to an arrangement under Regulation 32C of the Financial Advisers Regulations. Singapore recipients should contact Credit Suisse AG, Singapore Branch at +65-6212-2000 for matters arising from, or in connection with, this report. By virtue of your status as an institutional investor, accredited investor, expert investor or overseas investor, Credit Suisse AG, Singapore Branch is exempted from complying with certain compliance requirements under the Financial Advisers Act, Chapter 110 of Singapore (the "FAA"), the Financial Advisers Regulations and the relevant Notices and Guidelines issued thereunder, in respect of any financial advisory service which Credit Suisse AG, Singapore Branch may provide to you.

US Utilities: Week Ahead

ED ASR; PEG Analyst Day; SO Initial Criticality; Watching Sector Equity Issuance; Weekly Analysis & More

Utilities | Weekly Analysis

- **What we're watching week of 3/13: NI Indiana Settlement Achieved:** This coming week we expect NIPSCO electric rate case hearings on 3/13, and a final rate order for ES' outstanding rate case for the Aquarian Water segment on 3/15. This morning, NIPSCO (NI) filed a rate settlement with parties for an annual revenue increase of $291.8Mn vs. the $395Mn ask including a 9.8% ROE and NIPSCOs actual capital structure (51.63%). We see this representing an increasing in both ROE (+5bps) and equity layer (377bps) vs. the prior case authorized in 2019The 8-K notes there may be parties that oppose the settlement with parties having until March 31 to file opposition. Recall parties including NIPSCO industrials, NLMK, Walmart and the Office of Utility Consumer Counselor all previously filed that there was an agreement in principle on 3/6. Overall, we see the ability to reach the settlement as positive as we await additional details through hearings with an order expected by August and the first step increase of new rates by Sept 1, 2023, which is in-line with the original GRC timeline & expectations.
- **Week in Review:** Utilities outperformed the S&P 500 this past week with the UTY seeing a 270bp loss vs. a 450bp loss for the SPX. 10YR/30YR USTs closed the week -25bps/-17bps narrower. Large Caps (-3.0%), Small Caps (-3.3%) Diversified (-4.5%) and LDCs (-4.2%) all closed the week lower. **Top performers:** VST, PNM, ED, NEE, SO, IDA, EIX, AEP, CEG and WEC. **Bottom performers:** ETR, POR, DTE, SRE, D, SR, NRG, PEG, AES and OGS. This was the first week of outperformance for the sector in some time, with the sector reaching -1STD deviation vs. the S&P on relative P/E as of last week.
- **SO: Vogtle Reaches Initial Criticality:** On March 6th, GP announced that Vogtle U3 safely reached initial criticality. Based on 4Q22 key milestone definition, Initial Criticality is the initiation of the nuclear chain reaction and the start of increasing reactivity in the reactor by raising the control rods from the core and reducing the boron concentration of the water in the reactor through dilution. "Criticality" is achieved in the reactor when the chain reaction becomes self-sustaining. The projected initial criticality date was March/April '23 based on 4Q22 update. Vogtle seems progressing in line with expectation in terms of hitting initial criticality and the guided ISD for Unit 3 remains May or June '23, consistent with 4Q22 update. It's positive to see Vogtle 3 moving to initial criticality and we're watching for next steps through the May / June ISD, as well as progress on Unit 4. As it currently stands the Vogtle prudency review will be sometime this summer '23 which we see as a major de-risking factor of $7Bn of nuclear spend expected to enter rate base.

DISCLOSURE APPENDIX AT THE BACK OF THIS REPORT CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, LEGAL ENTITY DISCLOSURE AND THE STATUS OF NON-US ANALYSTS. US Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Weekly Data Points

- **PEG: Analyst Day: In-line Update: Committed to Nuclear; 5-7% LT EPS Affirmed:** PEG held analyst day on March 10th and re-affirmed '23 EPS guidance of $3.40-3.50, 5-7% LT growth rate for '23-'27 timeframe, $15.5-18bn utility capital investment plan for the same timeframe, all consistent with 4Q22 update. PSE&G utility introduced a 10yr capital plan of $34-40bn, providing further clarity into further investment horizon. Rate base growth at the utility is unchanged at 6-7.5%. Mgmt. announced the plan to formally retain nuclear generation given the support from IRA and which we view as unsurprising vs our / Street expectations. Further growth opportunities at CFIO are clarified although not impacting current capital plan, including 45-60MW uprate at Salem, extended refueling cycles and license extension (Salem and Hope Creek), and hydrogen (should have more substantial impact on second half of the decade). Mgmt did give an outlook on PTC threshold EBITDA, noting nuclear EBITDA is expected to average $500mn in FY24, growing to $600Mn by 2027. Regarding pension, PEG appears committed to exploring a pension lift out strategy which could assist un-regulated pension drag with an update expected by calendar year end.

- **AGR/PNM: Jointly filed motion for rehearing and reconsideration for merger:** On March 9th, PNM/AGR (Not Covered) filed a motion jointly with the NM PRC to dismiss the merger appeal and resolve through rehearing and reconsideration. The NMPRC acknowledges that the joint applicants are seeking an expedited resolution by no later than April 12th, while PNM and AGR previously entered into an amendment of their merger agreement extending the end date to April 20th. We note the latest filing appears shows the companies are working together with the NMPRC to expedite a decision at the state regulator which our understanding is the last remaining approval needed for deal close.

- **CMS & DTE: MI regulator on power outage:** The Michigan Public Service Commission said it will hold two town hall-style meetings on March 20th in Jackson and Dearborn to allow the public to provide feedback on their experiences with the storm and to hear the steps MPSC is taking to address reliability in MI. Another meeting will be livestreamed at 6 p.m. on March 21st over webcast. We are excepting some noise around the recent storms in the state though fundamentally see CMS & DTE bull cases as intact. See our latest view here.

- **Equity issuance in the utility sector: SWX, OGS & AWK:** We flag several equity issuances by uncovered peers is a signal that the capital markets remain open for utility secondary issuances. The largest equity issues in our coverage universe with un-priced equity needs are ATO, D, AEE, and ES (largely ATM) when comparing as a percentage of market cap. We note multiple companies have ongoing ATMs through the 5yr plan though most have committed to executing programmatically instead of opportunistically. **SWX** Announces Public Offering of $215mn of equity: SWX: On March 8th, 2023, SWX announced that it has priced an underwritten public offering of 3,576,180 shares of its common stock at $60.12/sh, net of underwriting discount, generating proceeds amounting $207.7mn. The offering was expected to close on March 10, 2023. The company indicated that it intends to use the net proceeds to repay outstanding borrowings under its credit facility and the remaining amounts due under the amended 364-day term loan credit agreement entered in November 2021 in connection with the acquisition of MountainWest Pipelines Holding Company. The remainder of the proceeds will be utilized as working capital and general corporate purposes. **OGS**: On March 8th, 2023, OGS announced that it has priced an underwritten public offering of 2mn shares at $76.9/sh, net of underwriting discounts, commissions, and other expenses. The offering is expected to close on March 13th, 2023. Settlement of the forward sale agreement is expected to occur by December 29, 2023, with respect to 1.4 million shares of OGS common stock, with the balance to be settled by December 31, 2024. The company intends to use the net proceeds received upon the settlement for general corporate purposes, which may include repayment/refinancing of debt, working capital, construction and acquisition expenditures, investments, and repurchases/redemptions of securities. **AWK**: On February 28th, 2023,

AWK announced the pricing of an upsized registered underwritten offering of 11mn shares of its common stock at $135.50/sh and has granted the underwriters a 30-day option to purchase an additional 1.65mn shares at the offered price, less the underwriting discount, subject to market and other conditions. The company intends to use the net proceeds for repaying the short-term commercial paper obligations of American Water Capital Corp., AWK's wholly owned finance subsidiary, and for general corporate purposes.

- **ED: ASR Announcement:** On March 6th ED announced that the company has entered accelerated share repurchase agreements (ASR) with several banks to repurchase $1Bn in aggregate ED shares. The company is funding the ASR with a portion of the proceeds from the sale of CEB, and will make initial payments of $1Bn to the dealers to repurchase 8.7Mn in shares. The final amount of shares to be repurchased will be based on the volume-weighted average share price of common shares during the term of the transaction. The final settlement of the ASR contracts is expected to occur no later than 3Q23. We see this as a positive but expected data point as it is indicative of ED executing on the plan to divest the CEB assets and buyback shares. The stock notably was a top performer this week and we're watching for future updates on short interest which could be indicative of ASR deployment.
- **PPL: Storm Damage Update:** On March 3rd PPL released an 8k indicating that LG&E and KU experienced significant damage to assets from storm activity in KY, which resulted in interrupted service for ~380k electric customers in the state, 3,300 downed power lines and 700 damaged utility poles. As of March 8th there are ~16k customers still seeing effects to electric service. The company's preliminary estimate of cost from the damage is $80-100Mn, but indicated that actual costs will not be known until all repairs are completed. The company estimates that ~60% of costs will be incurred at KU and 40% at LG&E, with 75% of these costs expected to be capitalized and 25% expected to be added to O&M. Additionally, the company expects to submit a formal request to the KPSC to treat the storms O&M expenses as reg assets and defer the costs. Historically speaking this has occurred in KY for similar events, and this could be a possibility for this event as well. We expect further updates in the coming months as the company moves forward with the request and note every $25Mn of O&M is ~$0.03/sh of EPS but consideration deferrals.
- **Weekly power price update:** CSe blended power forward pricing moved upward modestly during the past week, with blended curve for '23/'24/'25/'26/'27 moved by 6.5%/6.1%/6.1%/4.8%/6.5% and term structure to continue becoming less backwarded. The recent increase in power prices is likely driven by increases in spot natural gas prices which are up materially off recent ~$2/MMBtu lows, though remain sub $3/MMBtu. We note any continued strength in commodities & natural gas could create further pressure on ISO forwards which we're monitoring for PEG & CEG.

- **EIX, SRE and PCG: CA CoC Update:** CA utilities have a CoC adjustment mechanism based off the Moody's BAA Utilities Bond Index. The current rolling average for the index is 576bps vs. the high-end of the deadband of 537bps and mdpt of 437bps. The time for measuring the difference between the two ends on Sept. 30th, 2023 and, for example, should the index remain at the current level through the end of the time period it would imply a ~70bp increase to CA utility ROEs. See our breakdown of the CA CoC mechanism here.

Valuation Methodology and Risks

Target Price and Rating
Valuation Methodology and Risks: (12 months) for CMS Energy Corp (CMS.N)

Method: Our target price is $69: We value CMS using an SOTP, applying relative P/E premiums/discounts to the two operating subsidiaries. In general, we view Michigan as a premium jurisdiction, given the historically constructive decisions and heathy earned ROEs. Michigan is also offering a premium allowed ROEs for renewable projects and EE. We take a premium view on both the Consumers and Enterprise segments with an 19x implied multiple for the electric and gas groups versus 16.4x and 16.7x implied multiples for the electric and gas peer groups, respectively. We place a premium on the two operating segments given the strength of the businesses and upside potential in both. We rate CMS Outperform as we expect the stock's total return to be above that of peers over the next 12 months.

Risk: Risks to achieving our $69 target price and Outperform rating include: Difficulty executing on settled IRP plans that could lead to reduced capex spending and ultimately rate base growth. Construction delays could push back timelines for renewable projects and could delay upside from increased ROEs currently offered in Michigan for such projects. Increased severe weather events, particularly as coal plants are being phased out, could cause service continuity issues that would be costly to address.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Consolidated Edison (ED.N)

Method: Our target price is $91: We value ED on a P/E approach. We use a 5% premium to the regulated large cap multiple of 15.9x to account for 1) no rate case risk through 2025, 2) buy-backs of $1Bn in the near-term; 3) better-than-average balance sheet partially offset by 4) a single state jurisdictional exposure which has proven to be a historically challenging operating environment.

Risk: Risks to achieving our $91 target price and Neutral rating include: Common equity funding that is not contemplated in our base-case, Blue Sky, or Grey Sky scenarios. Failure to establish new rates at CECONY, which could lead investors to take a discounted view on ED's largest earnings contributor. Natural disaster risk, which could accelerate liabilities surrounding the NYC distribution system. ED's natural gas system is subject to greater operational risk given gas is a combustible molecule. NY is increasingly focused on electrification, which increases stranded assert risk associated with ED's LDC system. Upside risk includes a better-than-expected rate case outcome.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for DTE Energy (DTE.N)

Method: We value DTE using an SOTP, applying 12.5% P/E premiums to both the electric (18.2x) and gas (18.0x) subsidiary, which yields a $131 target price. We hold a discounted view on Trading (-30% discount), given these are non-core businesses and contain higher earnings volatility. We rate DTE Outperform as we expect the stock's total return to be above peers over the next 12 months.

Risk: Risks to our Outperform rating and $131 target price include: The uncertainties around timely recovery cost through base rate increase. The unregulated business earning is more susceptible to economic and industry cycles, with potential upside/downside.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Edison International (EIX.N)

Method: We value Neutral-rated EIX using an SOTP to determine our $67 target price, applying relative P/E premiums/discounts to the various operating subsidiaries. In general, we view California as a discount jurisdiction, with wildfire risk persistent throughout the state. We apply a 20% discount to the Electric GRC earnings and a 10% discount to the Transmission earnings, largely because of the risk of wildfires and related capital recovery proceedings. We adjust our SOTP for current and ongoing liabilities, principally (1) a $1Bn wildfire liability, offset by $1Bn of aggregate insurance, ongoing wildfire fund contributions of $95Mn/year discounted at a 9.5% IRR, and (2) remaining legacy wildfire claims of $900Mn assuming EIX foregoes cost of debt recovery on the remaining claims.

Risk: Risks to achieve our $67 target and Neutral rating include the company seeing delays in both the covered conductor installation and capital recovery, seeing increased wildfire activity in the coming years, and seeing a faster-than-expected recovery of costs associated with the '17/'18 natural disasters.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for NiSource (NI.N)

Method: We value NI on a P/E approach that yields a $30 target price. Our base-case multiple of 18.0x is derived by taking the regulated electric and regulated gas group multiples and applying a weighted-average approach based on NI's rate base mix. We apply a 5% premium to this number to account for: (1) numerous tracking mechanisms in place to realize real-time return on capital; (2) new management, which is taking a refreshed view of the company's operating segments and pushing forward with a strategic review with the goal of creating value; and (3) potential upside to capex that isn't contemplated in our current EPS estimates. Our target price

implied P/E multiple is in line to electrics and a premium to gas LDCs. We rate NI Outperform as we expect the stock's total return to be in line with peers over the next 12 months.

Risk: Risks to our Outperform rating and $30 target price include: Increased inflation above NI's cost-control ability, as well as headwinds delaying solar development via supply chain issues. Gas is a combustible molecule, and NI has a history of two separate high-profile explosions in the last 10 years, which could negatively affect the share price. Management also discussed buying and selling assets as part of its new strategy, and we think buying assets could weigh on NI's multiple. Climate change and increased scrutiny on GhG emissions is also a risk given ~70% of NI's rate base is coming from the gas distribution utility.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for PG&E Corporation (PCG.N)

Method: Our target price is $19. We value PCG on an SOTP. We apply a 20% discount to our 2025E electric earnings, a 15% discount to gas earnings, and 5% discount to transmission earnings relative to the 2025E electric and gas group P/E multiples. We impute ~$1.0Bn of net wildfire liabilities, which include an additional $1Bn wildfire liability for fires to handicap incremental wildfire event risk. We see ~14% total return for PCG in our base case, which is the above average for our coverage universe. Our target price implies an 12.8x consolidated P/E, a -18% discount, which is still one of the widest across the sector. We rate PCG Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to our Outperform rating and $19 target price include: PCG has a history of having utility assets involved with large wildfires in CA. Additional wildfires in 2022-24 could materially affect our valuation. PCG is subject to environmental factors such as severe weather conditions and climate change, which could increase wildfire events. PCG's higher-than-average debt/capital and lower-than-average FFO/debt, while we forecast improving lower cash flow from rate proceedings or materially adverse rate case outcomes, could drive incremental equity needs or reduce the likelihood of reinstating the dividend.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for PPL Corporation (PPL.N)

Method: Our target price is $30. We value PPL using an SOTP, applying relative P/E premiums/discounts to the various operating subsidiaries. We take a premium view on PA (10% premium, 17.8x multiple), which we flag as conservative given the recent settlement in PA and the favorable storm recovery mechanisms recently utilized. We take a discounted view on LU and KU (5% discount, 16.2x multiple) because of the current stay-out of Kentucky rates and the risk of inflation weighing on customer bills in the years until 2025 when another rate case can be filed. We rate PPL Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to achieving our $30 target price and Outperform rating include: the inability to sustain new dividend and increased growth rate, and the inability to execute fully on the AMI and renewables projects. Increased inflation amid a rate stay-out in Kentucky, as well as headwinds delaying solar development via supply chain issues also pose a threat to the company. Other risks include more natural disasters/storms in Kentucky and Pennsylvania that delay projects and are expensive to repair, as well as climate change and related concerns. Upside risk includes the company cutting O&M expenses more than expected.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Public Service Enterprise Group (PEG.N)

Method: We value PEG (excl. nuclear) using an SOTP on 2024E EPS using 2024E multiples, which yields a $61 target price. We apply peer P/E premiums to New Jersey compared to peer jurisdictions given PEG's historical higher-than-peer ROE, constructive rider mechanisms, and heavy FERC-regulated rate base. We hold a discounted view on the earnings derived from the LIPA contract (-25% discount) given its extension risk. We value PEG's nuclear generation using an EV/EBITDA multiple on 2024E EBITDA and a 10x multiple to derive the nuclear generation enterprise value (excluding the portion from ZEC), then subtract associated debt and add back NPV from ZEC payments to calculate the equity value from contracted nuclear. We rate PEG Neutral as we expect the stock's total return to be in line with peers over the next 12 months.

Risk: Risks to our $61 target price and Neutral rating include the following: PEG has robust capital spending programs with large-scale offshore wind project contemplated and a regulatory solar build-out, which are both subjected to state and federal regulation and scrutiny. The construction of such projects may face supply chain restraints and labor shortages. The contracted generation business remains commercial exposure with market price risk. The pension position could lead to significant EPS drag as well.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Sempra Energy (SRE.N)

Method: Our $172 target price is based on an SOTP analysis. At the utilities, we use a P/E approach based on 2024 projected net income. We apply a 10% multiple discount to SDGE, a 10% premium to Sempra Texas, and 5% discount to SoCalGas vs. their respective electric/gas 2024E group multiples. We view CA as a discount jurisdiction, owing to wildfire risk/recovery frameworks, and we see TX as a premium jurisdiction given outside growth opportunities and constructive regulatory framework. At SRE Infra, we apply a 12.5x EV/EBITDA multiple, which is 0.5-1.0x turns below where SRE recently monetized a 10% NCI interest in SRE. At for incremental

LNG, we NPV the 20-year cash flows associated with ECA1 and Cameron Train 4 expansion, discounting them at Sempra's current expected market return of 9.3% for US projects and add 100bps to Mexico projects to reflect a country risk premium. Our SOTP base-case valuation implies a consolidated P/E multiple of 18.1x, which is in-line with current electric comps. We rate SRE Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to our Outperform rating and $172 target price include: (1) SRE operates several fossil fuel distribution systems, which subjects the company to event risk associated with transporting combustible molecules; (2) climate change and the increased frequency of wildfires across CA; (3) stranded asset risk associated with the gas distribution system; (4) regulatory outcomes, as our estimates assume constructive resolutions in both CA and TX on pending rate cases; and (5) performance of equity method investments, which SRE relies upon for cash flow.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Southern Co (SO.N)

Method: We value SO using an SOTP that leads to a $70 target price, applying relative P/E premiums/discounts to the various operating subsidiaries. All P/Es are based on our 2024E EPS. We view Georgia and Alabama as premium jurisdictions given numerous constrictive mechanisms for real-time capital recovery. We have a discounted view on Southern Power (-25% discount, 13.3x), given its non-regulated earning with higher volatility. We also take a discounted view of 30% on the Vogtle-related earnings given the uncertainties in project delay, concerns on cost overrun, and potentially higher burden to Georgia Power among other co-owners given the co-ownership agreement. We rate SO Underperform as we expect the stock's total return to underperform peers over the next 12 months.

Risk: Risks to achieve our $70 target price and Underperform rating include: The marketability of mandatory convertible securities and corresponding equity issuance. Non constructive ruling on Georgia Power's rate review, which could lead investors to take a discounted view on SO's largest earnings contributor. Climate change, and increased regulation on GHG emissions could accelerate closure of certain fossil investments which would increase stranded asset risks to shares. Lastly, Federal legislation, such as change in tax policy could negatively impact CFO for SO given its tax equity exposure through Southern Power.

Disclosure Appendix

Analyst Certification

I, Nicholas Campanella, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

As of December 10, 2012 Analysts' stock rating are defined as follows:

Outperform (O) : The stock's total return is expected to outperform the relevant benchmark* over the next 12 months.

Neutral (N) : The stock's total return is expected to be in line with the relevant benchmark* over the next 12 months.

Underperform (U) : The stock's total return is expected to underperform the relevant benchmark* over the next 12 months.

**Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European (excluding Turkey) ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin America, Turkey and Asia (excluding Japan and Australia), stock ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark (India - S&P BSE Sensex Index); for China A share the relevant index is the Shanghai Shenzhen CSI 300 (CSI300); prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, the expected total return (ETR) calculation includes 12-month rolling dividend yield. An Outperform rating is assigned where an ETR is greater than or equal to 7.5%; Underperform where an ETR less than or equal to 5%. A Neutral may be assigned where the ETR is between -5% and 15%. The overlapping rating range allows analysts to assign a rating that puts ETR in the context of associated risks. Prior to 18 May 2015, ETR ranges for Outperform and Underperform ratings did not overlap with Neutral thresholds between 15% and 7.5%, which was in operation from 7 July 2011.*

Restricted (R) : In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Not Rated (NR) : Credit Suisse Equity Research does not have an investment rating or view on the stock or any other securities related to the company at this time.

Not Covered (NC) : Credit Suisse Equity Research does not provide ongoing coverage of the company or offer an investment rating or investment view on the equity security of the company or related products.

Volatility Indicator [V] : A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector* relative to the group's historic fundamentals and/or valuation:

Overweight : The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

Market Weight : The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

Underweight : The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

**An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	52%	(27% banking clients)
Neutral/Hold*	37%	(22% banking clients)
Underperform/Sell*	10%	(21% banking clients)
Restricted	1%	

Please click here to view the MAR quarterly recommendations and investment services report for fundamental research recommendations.

**For purposes of the NYSE and FINRA ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment.

To the extent any Credit Suisse equity research analyst employed by Credit Suisse International (a "UK Analyst") has interactions with a Spanish domiciled client of Credit Suisse AG or its affiliates, such UK Analyst will be acting for and on behalf of Credit Suisse Bank (Europe), S.A. but not an employee of Credit Suisse Bank (Europe) S.A. , with respect only to the provision of equity research services to Spanish domiciled clients of Credit Suisse AG or its affiliates.

Pursuant to CVM Resolution No. 20/2021, of February 25, 2021, the author(s) of the report hereby certify(ies) that the views expressed in this report solely and exclusively reflect the personal opinions of the author(s) and have been prepared independently, including with respect to Credit

Suisse. Part of the author(s)´s compensation is based on various factors, including the total revenues of Credit Suisse, but no part of the compensation has been, is, or will be related to the specific recommendations or views expressed in this report. In addition, Credit Suisse declares that: Credit Suisse has provided, and/or may in the future provide investment banking, brokerage, asset management, commercial banking and other financial services to the subject company/companies or its affiliates, for which they have received or may receive customary fees and commissions, and which constituted or may constitute relevant financial or commercial interests in relation to the subject company/companies or the subject securities.
This research report is authored by:
Credit Suisse Securities (USA) LLC..... Nicholas Campanella ; Fei She, CFA ; Nathan Richardson
There is currently no universal definition or exhaustive list defining the issues or factors that are covered by the concept of "ESG" (Environmental, Social, Governance). If not indicated otherwise, 'ESG' is used interchangeably with the terms 'sustainable' and 'sustainability'. Unless indicated otherwise, the views expressed herein are based on CS' own assumptions and interpretation of ESG at the time of drafting. CS' views on ESG may evolve over time and are subject to change.
Where a sustainability assessment is identified as including elements which track environmental, social or governance (ESG) objectives, CS is, wholly or in part, reliant on third-party sources of information (including, but not limited to, such information produced by the issuing/manufacturing company itself) and external guidance. These sources of information may be limited in terms of accuracy, availability and timeliness. It is possible that the data from ESG data providers may be incorrect, unavailable (e.g., not existing, or absence of look-through), or not fully updated. CS has not sought to independently verify information obtained from public and third-party sources and makes no representations or warranties as to accuracy, completeness or reliability of such information. Additionally, as global laws, guidelines and regulations in relation to the tracking and provision of such data are evolving, all such disclosures are made on a non-reliance basis and are subject to change. Unless required by applicable law, CS is not obliged to provide updates on sustainability assessments. Any updates might be subject to a time lag, due to e.g. lack of available data.
An ESG assessment reflects the opinion of the assessing party (CS or external parties such as rating agencies or other financial institutions). In the absence of a standardized ESG assessment system, each assessing party has its own research and analysis framework/methodology. Therefore, ESG assessment or risk levels given by different assessing parties to the same company can vary. Further, ESG assessment is limited to considering company performance against certain ESG criteria only and does not take into account the other factors needed to assess the value of a company.

The same important disclosures, with the exception of valuation methodology and risk discussions, are also available on Credit Suisse's disclosure website at https://rave.credit-suisse.com/disclosures . For valuation methodology and risks associated with any recommendation, price target, or rating referenced in this report, please refer to the disclosures section of the most recent report regarding the subject company.

Credit Suisse Report

This report is produced by subsidiaries and affiliates of Credit Suisse ("CS") operating under its Securities Research function within the Investment Banking Division. For more information on our structure, please use the following link: https://www.credit-suisse.com/who-we-are All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS. CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. Please note in particular that the bases and levels of taxation may change. Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of any such website does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk. This report may contain material that is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject CS to any registration or licensing requirement within such jurisdiction.The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor.This research report does not, and is not intended to be, an advertisement within the meaning of article 68 of the Swiss Financial Services Act and/or article 95 of the Swiss Financial Services Ordinance. This research report is not a prospectus, basic information sheet (BIB) or a key information document (KID). Any recipients of this document should, however, note that any communication forwarding or using this research report as a basis for discussion, would qualify as such advertisement if it is intended to draw the recipient's attention to specific financial instruments covered by this research report.

Additional Regional Disclaimers

Australia: Credit Suisse Securities (Europe) Limited ("CSSEL") and Credit Suisse International ("CSI") are authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority ("FCA") and the Prudential Regulation Authority under UK laws, which differ from Australian Laws. CSSEL and CSI do not hold an Australian Financial Services Licence ("AFSL") and are exempt from the requirement to hold an AFSL under the Corporations Act (Cth) 2001 ("Corporations Act") in respect of the financial services provided to Australian wholesale clients (within the meaning of section 761G of the Corporations Act) (hereinafter referred to as "Financial Services"). This material is not for distribution to retail clients and is directed exclusively at Credit Suisse's professional clients and eligible counterparties as defined by the FCA, and wholesale clients as defined under section 761G of the Corporations Act. Credit Suisse (Hong Kong) Limited ("CSHK") is licensed and regulated by the Securities and Futures Commission of Hong Kong under the laws of Hong Kong SAR, which differ from Australian laws. CSHKL does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. Investment banking services in the United States are provided by Credit Suisse Securities (USA) LLC, an affiliate of Credit Suisse Group. CSSU is regulated by the United States Securities and Exchange Commission under United States laws, which differ from Australian laws. CSSU does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. Credit Suisse Asset Management LLC (CSAM) is authorised by the Securities and Exchange Commission under US laws, which differ from Australian laws. CSAM does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. This material is provided solely to Institutional Accounts (as defined in the FINRA rules) who are Eligible Contract Participants (as defined in the US Commodity Exchange Act). Credit Suisse Equities (Australia) Limited (ABN 35 068 232 708) ("CSEAL") is an AFSL holder in Australia (AFSL 237237).

EU: This report has been produced by subsidiaries and affiliates of Credit Suisse operating under its Securities Research function within the Investment Banking Division.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements.

This material is issued and distributed in the U.S. by CSSU, a member of NYSE, FINRA, SIPC and the NFA, and CSSU accepts responsibility for its contents. Clients should contact analysts and execute transactions through a Credit Suisse subsidiary or affiliate in their home jurisdiction unless governing law permits otherwise.

CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials, management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. No information or communication provided herein or otherwise is intended to be, or should be construed as, a recommendation within the meaning of the US Department of Labor's final regulation defining "investment advice" for purposes of the Employee Retirement Income Security Act of 1974, as amended and Section 4975 of the Internal Revenue Code of 1986, as amended, and the information provided herein is intended to be general information, and should not be construed as, providing investment advice (impartial or otherwise).

Malaysia: Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn Bhd, to whom they should direct any queries on +603 2723 2020.

Singapore: This report has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (each as defined under the Financial Advisers Regulations) only, and is also distributed by Credit Suisse AG, Singapore Branch to overseas investors (as defined under the Financial Advisers Regulations). Credit Suisse AG, Singapore Branch may distribute reports produced by its foreign entities or affiliates pursuant to an arrangement under Regulation 32C of the Financial Advisers Regulations. Singapore recipients should contact Credit Suisse AG, Singapore Branch at +65-6212-2000 for matters arising from, or in connection with, this report. By virtue of your status as an institutional investor, accredited investor, expert investor or overseas investor, Credit Suisse AG, Singapore Branch is exempted from complying with certain compliance requirements under the Financial Advisers Act, Chapter 110 of Singapore (the "FAA"), the Financial Advisers Regulations and the relevant Notices and Guidelines issued thereunder, in respect of any financial advisory service which Credit Suisse AG, Singapore Branch may provide to you.

- We provide key takeaways from PCG's recent NDR, investor feedback from PNW's upgrade to Outperform, quick take on NI/CNP mgmt. change and EXC's regulatory update.

- **PCG NDR with Chris Foster, Mgmt Update & C-Suite Dinner:** We held virtual meetings with Chris Foster (CFO) on March 13-14th where discussions focused on several factors which we thought overall were in-line with expectations from the 4th Quarter Conference Call. We also attended a dinner with C-Suite (Patti Poppe CEO, Carolyn Burke Incoming CFO, Chris Foster Outgoing CFO, and Tom Webb Strategic Advisor) on March 15th with additional takeaways surrounding the recent management changes. On March 15th PCG announced that Carolyn Burke will assume the role of CFO and Executive VP effective May 4th with Foster resigning to take the CFO role at CNP. Burke was most recently Executive VP/CFO at Chevron Phillips Chemical Company, with the company expressing during an investor call on the same day that they expect her to help enable the current plan laid out at the recent AD and reaffirmed all metrics set forth from it. First, we acknowledge CFO Foster's transition could pressure sures in the near term as investors will naturally be skeptical on the move away from one the largest discount stories (-28.5% P/E on '25E) in the sector, but overall, we're expecting messaging, strategy, communication and the ability to hit financial targets including the 10% EPS growth through 2024 and 9% growth in 2025 and 2026 to remain unchanged. Outgoing CFO Foster has been with PCG for ~11 years, and spear-headed regulatory policy initiatives while also taking on a large restructuring effort with then CFO Jason Wells who will be re-joining at CNP. As the company is now in a more stable spot relative to 2 years ago, discussions noted Foster remains comfortable in making the move to a multi-state utility where he has a clear skill set which is ready for new challenges. While Carolyn Burke has not acted in a CFO capacity, we note she has already served as an advisor to Chris through her time with the company and has been in the background making key financial decisions. We believe the transaction will be natural from an operational and financial perspective leading to no big changes for the company. Bottom line: We're comfortable with the recent mgmt change seeing it neutral for the stock.

- **PCG: Additional Points Following Mgmt Discussions: Financing considerations:** The company reiterated that they do not expect to issue equity in '23 and '24 and expects to finance growth in the current plan through the debt capital market transactions and the PacGen sale which remains on track. Regarding credit, the company keeps open lines of communication with all of the rating agencies and indicated that the agencies are focused on continued wildfire risk reduction, strong policy signals from the CA Commission, as well as the outcome of the pending GRC (2Q PD expected), PacGen sale and the prior recovery of wildfire expenses. Moody's revised PCG's credit outlook to positive, and we expect continued momentum on credit as the company executes their risk reduction plans. **O&M control:** PCG was able to cut O&M by 3% this past year despite the current inflationary environment, something that could create headroom in customer bills and allow for increased investment in electrification within the service territory. PCG retains one of the highest O&M / Capital ratios in the sector which we believe is an under-appreciated long-term opportunity for shares and we note that discussions at the March 15th dinner pointed to additional cost-cutting opportunities than what the executive team highlighted just a year ago. Regarding Load, PCG sees increased load via increased EV use-- with CA's current goal of 5Mn EV's by 2030 and 2Mn of which could be within PCG's service territory-- this could lead to increased investment in electrification and ultimately the spreading of fixed costs amongst more customers, a potential hedge for customer affordability. **Dividend:** The company indicated that they expect the initial return of the dividend to be small and is currently targeting 3Q for dividend eligibility. The company is currently deliberating on the initial dividend amount (dependent on BoD approval) and growth rate guidance, and more clarity is expected in the coming quarters. We believe while PCGs pay-out ratio will remain low, the company will still be able to target dividend growth that is above peers assuming growth in-line with earnings. **Storms:** While recent storms have caused outages in the service territory, state of emergencies have been declared at various times in the state which should allow for a deferral of these costs in our view (no ongoing PnL impact). The effect on higher snowpack and rain could lead to higher veg mgmt growth but is also helping address dead trees that may have otherwise been still standing come fire season. We maintain our Outperform rating on PCG shares.

- **PNW Upgrade Feedback:** We upgraded shares of PNW to Outperform from Neutral on 3/14 and are providing feedback from investor conversations. We note investors largely agreed with our view

DISCLOSURE APPENDIX AT THE BACK OF THIS REPORT CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, LEGAL ENTITY DISCLOSURE AND THE STATUS OF NON-US ANALYSTS. US Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

on PNW's EPS outlook post the SCR appellate court win, especially that EPS could be $5.00+ in 2024. We did receive some push back on our 2025E EPS ($5.23 vs Cons. $4.91) with some believing we're slightly too high due to parent drag and potential equity needs. We note our 2025E assumes a 9.3% allowed ROE while investors debated with us what the true level of earned returns could be where we note CSe assumes 70bps of ongoing retail lag out of the GRC. We also received push back on the timing of the call principally due to the lack of catalysts until the May '23 staff testimony, though we see ample opportunities for mgmt. to potentially communicate positive implications of the SCR appeal in the upcoming 1Q call and investor conferences. Overall while investors have agreed with the trajectory of EPS momentum, we don't believe PNW is a consensus Outperform among the buy-side and note continued bearish/neutral views from our competitors. See our upgrade note here.

- **NI: Management Rotation In-line for Shares:** On March 15th NI announced several leadership changes and additions including appointing Michael Luhrs to the executive leadership team as the VP of Strategy & Risk and Chief Commercial Officer, from Alliant Energy where he was previously the Senior VP of Customer Experience and Strategy. Additionally, Shawn Anderson will become the CFO, from his role prior as Senior VP of Risk and Chief Strategy, with Melody Birmingham to be the Executive VP of NiSource and Group President of NiSource Utilities. Donald Brown (current CFO) is transitioning to EVP and Chief Innovation Officer, succeeding Birmingham. All new appointments will begin effective March 27th. The timing of these leadership change announcements is largely due to the broader management team rotation and is not necessarily a signal of something more following the AD, based on our discussions, and is a part of less visible internal changes the company has done recently. Overall, we believe Shawn Anderson will be well received as the new CFO of the organization and we see the update as largely neutral to shares. We caught up with Anderson briefly yesterday and note the recent Indiana settlement achieved on 3/10 remains in-line with the current LT EPS growth plan and FY23 guidance. The process surrounding the NIPSCO NCI sale as communicated on the 4Q call also remains on track. We maintain our Outperform rating seeing NI as a top idea through FY23.

- **CNP: Chris Foster Incoming CFO is Positive for Shares:** On March 15th CNP announced that Chris Foster will assume the role of CFO and Executive Vice President of the company, effective May 5th. Prior to joining CNP Foster served as CFO for PCG. Foster will be rejoining Jason Wells (COO) who he previously worked closely with at PCG and we view the update as clearly positive for CenterPoint as we believe the addition of Foster adds further credibility to CNPs premium management team.

- **EXC: Watching Regulatory Moves:** We note several takeaways on EXCs regulatory outlook following commissioner changes: **1) Commissioner Turnovers:** During recent regulatory sessions, MD nominated two commissioners but one backed out due to pressure from the environmental side of intervenors, while in IL there were two vacancies on the commission but it was resolved last Friday when the governor announced Conrad Reddick and Stacey Paradis being appointed as new commissioners, pending confirmation by state Senate, but we believe the process should be relatively swift (does not require full confirmation). **2) ICC Chair Stepping Down:** Chairperson Carrie Zalewski is stepping down from her position as announced last week and will leave ICC on June 16. Governor Pritzker nominated former ICC chair Doug Scott to replace Zalewski. For the newly formed 5-person commission, no more than three commissioners from the same party are allowed and each term is five years. We note Doug Scott served as ICC chair from 2011-2015 and view having an experienced chairperson filling in as valuable to the upcoming ComEd rate case process. The Zalewski resignation does raise questions given the Madigan ComEd trial will kick off momentarily leading to some headline risk for shares, but ultimately, we're less concerned on broader fundamental impacts to EXC.

Valuation Methodology and Risks

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Exelon Corporation (EXC.OQ)

Method: We utilized an SOTP method to determine our target price of $46 per share and a blended P/E multiple of 16.8x for Outperform-rated EXC. We derived the blended P/E multiple by creating a proportion of each segment for the electric group, transmission group, and gas group. We based the proportion on each segment's contribution to rate base. We apply a 3% premium multiple to the current blended multiple of 16.3x. We believe that an improving regulatory environment in Illinois will be favorable for EXC investors by allowing ComEd to file a rate case that is in line with industry average. Changes in the allowed ROE structure could increase the allowed ROE by 2% in 2024. Another key driver is the execution of the $29Bn capital plan.

Risk: Risks to achieve our $46 target price and Outperform rating include: (1) management not meeting RAB projected growth; (2) not reaching stated growth metrics, including the 6-8% LT EPS CAGR; (3) increasing commodity cost for electric and gas service, natural disaster risk; (4) worse-than-expected regulatory outcomes; and (5) volatility to 30yr US Treasuries, as ComEd ROEs are linked to 30YR USTs.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for NiSource (NI.N)

Method: We value NI on a P/E approach that yields a $30 target price. Our base-case multiple of 18.0x is derived by taking the regulated electric and regulated gas group multiples and applying a weighted-average approach based on NI's rate base mix. We apply a 5% premium to this number to account for: (1) numerous tracking mechanisms in place to realize real-time return on capital; (2) new management, which is taking a refreshed view of the company's operating segments and pushing forward with a strategic review with the goal of creating value; and (3) potential upside to capex that isn't contemplated in our current EPS estimates. Our target price implied P/E multiple is in line to electrics and a premium to gas LDCs. We rate NI Outperform as we expect the stock's total return to be in line with peers over the next 12 months.

Risk: Risks to our Outperform rating and $30 target price include: Increased inflation above NI's cost-control ability, as well as headwinds delaying solar development via supply chain issues. Gas is a combustible molecule, and NI has a history of two separate high-profile explosions in the last 10 years, which could negatively affect the share price. Management also discussed buying and selling assets as part of its new strategy, and we think buying assets could weigh on NI's multiple. Climate change and increased scrutiny on GhG emissions is also a risk given ~70% of NI's rate base is coming from the gas distribution utility.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for PG&E Corporation (PCG.N)

Method: Our target price is $19. We value PCG on an SOTP. We apply a 20% discount to our 2025E electric earnings, a 15% discount to gas earnings, and 5% discount to transmission earnings relative to the 2025E electric and gas group P/E multiples. We impute ~$1.0Bn of net wildfire liabilities, which include an additional $1Bn wildfire liability for fires to handicap incremental wildfire event risk. We see ~14% total return for PCG in our base case, which is the above average for our coverage universe. Our target price implies an 12.8x consolidated P/E, a -18% discount, which is still one of the widest across the sector. We rate PCG Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to our Outperform rating and $19 target price include: PCG has a history of having utility assets involved with large wildfires in CA. Additional wildfires in 2022-24 could materially affect our valuation. PCG is subject to environmental factors such as severe weather conditions and climate change, which could increase wildfire events. PCG's higher-than-average debt/capital and lower-than-average FFO/debt, while we forecast improving lower cash flow from rate proceedings or materially adverse rate case outcomes, could drive incremental equity needs or reduce the likelihood of reinstating the dividend.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Pinnacle West Capital Corporation (PNW.N)

Method: We value PNW using a P/E approach, applying relative premiums/discounts to the various operating subsidiaries, which yields a $80 target price. We hold an outperform rated view on APS, given our view of an improving AZ regulatory climate and the pending SCR case which further strengthens the companies case around it's legacy SCR investment. We rate PNW Outperform as we expect the stock's total return to be above peers over the next 12 months.

Risk: Risks to our Outperform rating and $80 target price include: The uncertainties around the timely recovery of investment and operating expense associated with pollution control costs and earning sufficient return on equity to compensate the shareholder.

Companies Mentioned *(Price as of 15-Mar-2023)*

Exelon Corporation (EXC.OQ, $41.84)

NiSource (NI.N, $27.85)

PG&E Corporation (PCG.N, $15.86, OUTPERFORM, TP $19.0)

Pinnacle West Capital Corporation (PNW.N, $78.21, OUTPERFORM, TP $80.0)

As of December 10, 2012 Analysts' stock rating are defined as follows:

Outperform (O) : The stock's total return is expected to outperform the relevant benchmark* over the next 12 months.

Neutral (N) : The stock's total return is expected to be in line with the relevant benchmark* over the next 12 months.

Underperform (U) : The stock's total return is expected to underperform the relevant benchmark* over the next 12 months.

**Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European (excluding Turkey) ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin America, Turkey and Asia (excluding Japan and Australia), stock ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark (India - S&P BSE Sensex Index); for China A share the relevant index is the Shanghai Shenzhen CSI 300 (CSI300); prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, the expected total return (ETR) calculation includes 12-month rolling dividend yield. An Outperform rating is assigned where an ETR is greater than or equal to 7.5%; Underperform where an ETR less than or equal to 5%. A Neutral may be assigned where the ETR is between -5% and 15%. The overlapping rating range allows analysts to assign a rating that puts ETR in the context of associated risks. Prior to 18 May 2015, ETR ranges for Outperform and Underperform ratings did not overlap with Neutral thresholds between 15% and 7.5%, which was in operation from 7 July 2011.*

Restricted (R) : In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Not Rated (NR) : Credit Suisse Equity Research does not have an investment rating or view on the stock or any other securities related to the company at this time.

Not Covered (NC) : Credit Suisse Equity Research does not provide ongoing coverage of the company or offer an investment rating or investment view on the equity security of the company or related products.

Volatility Indicator [V] : A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector* relative to the group's historic fundamentals and/or valuation:

Overweight : The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

Market Weight : The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

Underweight : The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

**An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	52%	(26% banking clients)

Rating	Versus universe (%)	Of which banking clients (%)
Neutral/Hold*	37%	(22% banking clients)
Underperform/Sell*	10%	(21% banking clients)
Restricted	1%	

Please click here to view the MAR quarterly recommendations and investment services report for fundamental research recommendations.

**For purposes of the NYSE and FINRA ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Credit Suisse Securities (USA) LLC	Nicholas Campanella ; Fei She, CFA ; Nathan Richardson

There is currently no universal definition or exhaustive list defining the issues or factors that are covered by the concept of "ESG" (Environmental, Social, Governance). If not indicated otherwise, 'ESG' is used interchangeably with the terms 'sustainable' and 'sustainability'. Unless indicated otherwise, the views expressed herein are based on CS' own assumptions and interpretation of ESG at the time of drafting. CS' views on ESG may evolve over time and are subject to change.

Where a sustainability assessment is identified as including elements which track environmental, social or governance (ESG) objectives, CS is, wholly or in part, reliant on third-party sources of information (including, but not limited to, such information produced by the issuing/ manufacturing company itself) and external guidance. These sources of information may be limited in terms of accuracy, availability and timeliness. It is possible that the data from ESG data providers may be incorrect, unavailable (e.g., not existing, or absence of look-through), or not fully updated. CS has not sought to independently verify information obtained from public and third-party sources and makes no representations or warranties as to accuracy, completeness or reliability of such information. Additionally, as global laws, guidelines and regulations in relation to the tracking and provision of such data are evolving, all such disclosures are made on a non-reliance basis and are subject to change. Unless required by applicable law, CS is not obliged to provide updates on sustainability assessments. Any updates might be subject to a time lag, due to e.g. lack of available data.

An ESG assessment reflects the opinion of the assessing party (CS or external parties such as rating agencies or other financial institutions). In the absence of a standardized ESG assessment system, each assessing party has its own research and analysis framework/methodology. Therefore, ESG assessment or risk levels given by different assessing parties to the same company can vary. Further, ESG assessment is limited to considering company performance against certain ESG criteria only and does not take into account the other factors needed to assess the value of a company.

The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of any such website does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

This report may contain material that is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject CS to any registration or licensing requirement within such jurisdiction.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor.

This research report does not, and is not intended to be, an advertisement within the meaning of article 68 of the Swiss Financial Services Act and/or article 95 of the Swiss Financial Services Ordinance. This research report is not a prospectus, basic information sheet (BIB) or a key information document (KID). Any recipients of this document should, however, note that any communication forwarding or using this research report as a basis for discussion, would qualify as such advertisement if it is intended to draw the recipient's attention to specific financial instruments covered by this research report.

Additional Regional Disclaimers

Australia: Credit Suisse Securities (Europe) Limited ("CSSEL") and Credit Suisse International ("CSI") are authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority ("FCA") and the Prudential Regulation Authority under UK laws, which differ from Australian Laws. CSSEL and CSI do not hold an Australian Financial Services Licence ("AFSL") and are exempt from the requirement to hold an AFSL under the Corporations Act (Cth) 2001 ("Corporations Act") in respect of the financial services provided to Australian wholesale clients (within the meaning of section 761G of the Corporations Act) (hereinafter referred to as "Financial Services"). This material is not for distribution to retail clients and is directed exclusively at Credit Suisse's professional clients and eligible counterparties as defined by the FCA, and wholesale clients as defined under section 761G of the Corporations Act. Credit Suisse (Hong Kong) Limited ("CSHK") is licensed and regulated by the Securities and Futures Commission of Hong Kong under the laws of Hong Kong SAR, which differ from Australian laws. CSHKL does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. Investment banking services in the United States are provided by Credit Suisse Securities (USA) LLC, an affiliate of Credit Suisse Group. CSSU is regulated by the United States Securities and Exchange Commission under United States laws, which differ from Australian laws. CSSU does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. Credit Suisse Asset Management LLC (CSAM) is authorised by the Securities and Exchange Commission under US laws, which differ from Australian laws. CSAM does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. This material is provided solely to Institutional Accounts (as defined in the FINRA rules) who are Eligible Contract Participants (as defined in the US Commodity Exchange Act). Credit Suisse Equities (Australia) Limited (ABN 35 068 232 708) ("CSEAL") is an AFSL holder in Australia (AFSL 237237).
EU: This report has been produced by subsidiaries and affiliates of Credit Suisse operating under its Securities Research function within the Investment Banking Division.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements.

This material is issued and distributed in the U.S. by CSSU, a member of NYSE, FINRA, SIPC and the NFA, and CSSU accepts responsibility for its contents. Clients should contact analysts and execute transactions through a Credit Suisse subsidiary or affiliate in their home jurisdiction unless governing law permits otherwise.

CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials, management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. No information or communication provided herein or otherwise is intended to be, or should be construed as, a recommendation within the meaning of the US Department of Labor's final regulation defining "investment advice" for purposes of the Employee Retirement Income Security Act of 1974, as amended and Section 4975 of the Internal Revenue Code of 1986, as amended, and the information provided herein is intended to be general information, and should not be construed as, providing investment advice (impartial or otherwise).

Malaysia: Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn Bhd, to whom they should direct any queries on +603 2723 2020.
Singapore: This report has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (each as defined under the Financial Advisers Regulations) only, and is also distributed by Credit Suisse AG, Singapore Branch to overseas investors (as defined under the Financial Advisers Regulations). Credit Suisse AG, Singapore Branch may distribute reports produced by its foreign entities or affiliates pursuant to an arrangement under Regulation 32C of the Financial Advisers Regulations. Singapore recipients should contact Credit Suisse AG, Singapore Branch at +65-6212-2000 for matters arising from, or in connection with, this report. By virtue of your status as an institutional investor, accredited investor, expert investor or overseas investor, Credit Suisse AG, Singapore Branch is exempted from complying with certain compliance requirements under the Financial Advisers Act, Chapter 110 of Singapore (the "FAA"), the Financial Advisers Regulations and the relevant Notices and Guidelines issued thereunder, in respect of any financial advisory service which Credit Suisse AG, Singapore Branch may provide to you.

- ***Erratum:*** *In the 3rd bullet of the previous version of this note published on 1/31, we incorrectly wrote that we are modelling D below consensus. We corrected it in this version.*
- **4Q22 Preview To-Date:** We are providing previews for AEP, AES, ATO, CEG, DTE, DUK, ED, EIX, ES, ETR, EVRG, FE, NI, OGE, PCG, PPL and WEC as we round out quarterly considerations for companies in our coverage universe into 4Q earnings.
- **What do we like? DTE, ETR, PCG, NI and FE:** We are bullish discount names which are offering top quartile growth prospects where we have high confidence in the execution trajectory. We expect DTE to affirm FY23 EPS despite headwinds from the MI rate order; Gas price declines will be a key theme for 1H23 which we see accruing positively to ETR and NI both who we expect to affirm full year and long-term growth metrics on the 4Q calls. At PCG, the ~30% P/E discount provides for an attractive long-term entry point with our expectations for the 9-10% EPS CAGR to be affirmed through '26 on the 4Q call. At FE, while we acknowledge some pressure to earnings from pension, we don't think the bears will benefit on a reset in long term EPS prospects which the street already seems to capture. FE investor sentiment is already

poor, and valuation is cheap to us, even on lower EPS w/NCI sale around the corner and a new CEO announced around the 4Q call.

- **Where are we more cautious? AES, D, ES, SO, EIX, EVRG:** We are modeling below consensus EPS for AES, ES, EIX and EVRG in FY23 where we expect guidance for all companies. AES is especially notable given FY23 is being underpinned by 3-4GWs of solar ISD which is at risk for slippage. Tax credit considerations at risk for these renewables equal $0.20/sh of EPS. At ES, we similarly see the FY23 EPS predicated on pending OSW sales which are delayed with debt paydown underpinning FY23 numbers. Street seems to be assuming a full year of contribution vs. a half year which is more likely. At SO, we expect ~flat EPS in FY23 with a Vogtle U3 / U4 update also expected. At EIX / EVRG, while we believe mgmt teams are likely to *push* the formal LT CAGR update until after core rate reviews, the bias for long-term EPS is still below the stated CAGRs of 5-7% for EIX and 6-8% for EVRG. At D, buy-side expectations have recalibrated to a $4.00-4.25 EPS range (CSe $4.26), and we emphasize the recent outperformance of the stock keeps us cautious into the qtr update where investors will be getting limited details on the strategic review outside of sequencing and critical legislative outcomes not until March ’23.

- **Target Price Adjustments Across the Board:** We are adjusting TPs: AEP (from $100 to $97), AES (from $26 to $30), ATO (from $121 to $131), CEG (from $98 to $91), DTE (from $118 to $131), DUK (from $94 to $106), ED (from $78 to $95), EIX (from $64 to $68), ES (from $75 to $84), ETR (from $117 to $115), EVRG (from $57 to $57, unchanged), FE (from $39 to $43), NI (from $27 to $30), OGE (from $36 to $38), PCG (from $17 to $18), PPL (from $32 to $30), and WEC (from $93 to $94). We are maintaining our Neutral ratings on AES, DUK, ED, EIX, ES and OGE, our Outperform rating on AEP, ATO, CEG, DTE, ETR, FE, NI, PCG & PPL, and Underperform rating on EVRG & WEC.

- **4Q Previews by Company:** Please also see our published previews on: AEE, CMS, CNP, D, EXC, LNT, POR, PNW, SO, SRE and XEL for additional 4Q qtr considerations.

AEP Inc

FY23 Preview: Waiting on KY; Ests intact in either scenario; Outperform

AEP

Target price (12M, US$) 97.00

Outperform

Electric Utilities

We are providing preview on AEP's 4Q22/FY23 preview for AEP shares and re-affirm our Outperform rating. AEP currently has several strategic initiatives underway, and we expect the CEO and new CFO to re-affirm: 1) '23 EPS range of $5.19-5.39; 2) 6-7% LT EPS CAGR; 3) $40bn capital plan for '23-'27; 4) current financing plan including equity issuance. Since the FERC denial on the KY transaction on December 15, the P/E multiple on '24/'25 CSe EPS has been down by 250bps, reflecting rising concern on the KY deal, although AEP has been conveying to the investment community that they are actively seeking a FERC refiling to close the deal by April 26. Our view that both AEP and AQN remain committed to the deal hasn't changed, but the tighter timeline with FERC and financing concerns if the transaction gets further delayed are worrying.

- **FERC 203 refile and deal closing timeline; contracted renewable sale:** We now expect a quicker process on the contracted renewable sales process, targeting a 2Q23 announcement. We still expect AEP to file a new FERC 203 application in the very near future. We note that AEP and AQN can agree to amend the April 26 best effort date. However, any amendment would put more pressure on the mgmt.'s ability to execute and multiple recovery. Even in this delayed deal execution scenario, we expect mgmt. to utilize bridging debt financing, instead of new equity issuance. Another aid would be expedited contracted renewable sales process, which is purposefully not included in the financing forecast provided during EEI, leaving some more cushion. We see the messaging from AQN's investor day as indicating commitment, with a fully budgeted financing plan to close the deal, including reaffirmed debt issuance and capital recycling program.
- **TP, Valuation & EPS updates:** We are revising our TP from $100 to $97, reflecting the latest MtM group multiple on our SOTP. Our view on '23/'24 EPS estimates and capital plan is largely unchanged as we wait for better clarities on the FERC 203 process. Our base case still assumes AEP to receive KY sales proceeds but as it stands today, we don't see estimates materially changing on a no-deal scenario given the contracted renewable sale is outside of current forecast. Risks: Regulatory outcomes, supply chain risks, asset sale execution.

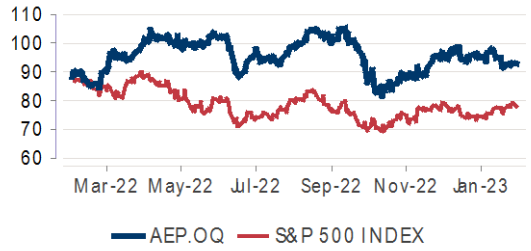
Company Background

American Electric Power, Inc. operates as a regulated utility holding company. The company generates, transmits, distributes and sells electricity to residential commercial and industrial customers.

Blue/Grey Sky Scenario



Our Blue Sky Scenario (US$) **(from 107.00) 104.00**

Our Blue Sky scenario contemplates an 18.4x 2024E P/E, which could be achieved if: (1) AEP executes its sales strategy of KY Power and contracted renewable assets timely and at favorable valuation; (2) AEP receives a constructive regulatory outcome to support cost recovery of regulated renewable expansion.

Our Grey Sky Scenario (US$) **(from 85.00) 83.00**

Our Grey Sky scenario assumes AEP trades at a 14.6x P/E. We think the multiple could be justified if we see any unexpected delay in sales strategy execution, or an unconstructive ruling on regulatory renewable buildout and coal retirement.

AES Corp

FY23 Preview: Contemplating Headwinds to '23 while 7-9% likely affirmed; Neutral

AES

Target price (12M, US$) 30.00
Neutral

Multi Utilities

We review investment drivers and provide a FY23 preview for AES shares. On the call, we expect mgmt. to re-affirm current 7-9% LT EPS CAGR guidance through '25 off '20, although we recognize that it has been two years since the last Analyst Day (March 2021) and there is an increasing probability to host one where mgmt. can give more clarity on LT EPS CAGR guidance and extend it, if not during the 4Q call. We expect mgmt. to give guidance on '23 renewable PPA execution, including number of MWs.'23 is going to be a year of increasing uncertainties, mostly coming from potential delays of project online date, pushing earnings '24 from '23 – to this end, we have a FY23 miss of $1.68 modeled vs. BBG $1.74. AES outperformed UTY (21.76% vs. 0.57%) in the past 12 months, mostly driven by IRA tailwinds. We re-iterate our Neutral rating as we see the current valuation is full considering a more volatile '23. Overall, we're slightly negative on shares into the quarter given the perceived miss overshadows clear positive steps forward in recent execution of EPS growth.

- **Renewable backlog and pipeline; Regulated utility execution:** Recall AES is on track to execute its 4.5-5.5GW of PPA signing with 3Q balance of 3.2GW and several large projects underway. We note that AES's renewable construction pipeline is very 4Q23 weighted, which suggests any slight delay from supply chain would push projects into '24, creating more uncertainties for '23, although we see it's at most a quarterly delay issue, not necessarily leading to project cancelations. The company is seeing suppliers pushing cargo through customs, but ultimately for '23 execution we need to look at the supply chain during summer and re-assess. We also do not assume LNG upside to continue going into '23, with recent conversations with the company pointing to them not banking on such strength. On the regulated side of the business, we continue to see mgmt. managing ESP 4 process and expect new OH rate to go into effect along with ESP 4 approval in 2H23.
- **Valuation, EPS Ests and TP adjustment:** TP is tweaked from $26 to $30, reflecting higher 5yr average AES P/E multiple. We are cutting '23 EPS estimates by 7c due to potential delayed solar execution and related delayed receipt for PTC benefit. We assume certain bounce back in earnings as delayed '23 projects get executed in '24/'25/'26, raising EPS ests by 1c/1c/3c. We are not revising DevCo valuation for now. FLNC mkt val. is updated with minimal impact on TP. Risks: supply chain, inflation, country & reg. risk.

Company Background

AES is an electric power distribution company. The company owns. and operates renewable energy power plants as well as regulated electric utilities.

Blue/Grey Sky Scenario

Our Blue Sky Scenario (US$) **(from 31.00) 36.00**

Blue Sky Scenario ($36): Our Blue Sky scenario could be realized if AES: (1) manages its developing country exposure and achieves favorable risk-adjusted return in such territories; (2) continues to monetize its energy transition focused development business with favorable valuation; and (3) receives supportive regulatory outcome within its US-regulated operating jurisdictions.

Our Grey Sky Scenario (US$) **(from 21.00) 24.00**

Grey Sky Scenario ($24): Our Grey Sky scenario could be realized if: (1) there are unexpected project delays owing to the solar anti-circumvention probe; (2) AES disproportionally increases its exposure in emerging markets, increasing currency and political risks; and (3) AES receives non-supportive regulatory outcomes in the US.

Atmos Energy

1Q23 Preview: Quite Execution Quarter with Pending Securitization; Outperform

ATO

Target price (12M, US$) 131.00

Outperform

Gas Utilities

We are reviewing investment drivers for ATO shares going into 1Q23 and are re-affirming the Outperform rating. We expect mgmt. to affirm all guidance during the 1Q call, including: 1) '23 EPS guidance of $5.90-$6.10; 2) re-affirm 6-8% EPS CAGR through '27 with '27 EPS of $7.65-8.05 and 3-3.5% annual O&M increase to the forecast. Our 1Q23 EPS is in line, with CSe $1.92 vs. Consensus $1.89, mostly driven by regulatory execution and new rates from Distribution, Pipeline & Storage, offset by dilution and incremental interest expense. We are maintaining our Outperform rating as there is no change in ATO's business fundamentals, including timely cost recovery through high proportion of riders/trackers, favorable growth prospects within the TX service territory, plus reasonable valuation. We remain cognizant that securitization and gas cost inflation are the two topical issues for shares and we're looking for additional details from mgmt. on gas price moderation, as well as the securitization delay on the call.

- **Securitization; Fuel cost and gas price;** We see ATO still working through the securitization process for the $2bn winter recovery cost in Texas. Recall, S&P recently affirmed ATO's rating, citing the current delay by the Texas Bond Review Board to approve the securitization bonds will not weaken the credit quality. We see the company still committed to bring the process across the finish line, even though it has been almost two years since the start of the filing. In terms of gas cost and customer bill, historically fuel cost would take up ~40% of total customer bill but could be higher this quarter. As we start to see gas price coming down, the company would expect the percentage to go back to an historical level. We also note that as gas strip moves down, the company is proactively taking advantage of a lower pricing environment mostly through physically hedging based on market supply.
- **TP, Valuation & EPS Estimates:** We are not changing EPS estimates based on change of views, and the slight EPS move is due to share count (+1c/3c/4c in '25/'26/'27). We are maintaining our above consensus EPS outlook in 2024 and beyond. Our TP shifts to $131 (from $121) due to higher gas utility multiple of 16.0x. Risks: Regulatory outcomes, securitization execution, commodity and operational risks associated with transportation of natural gas.

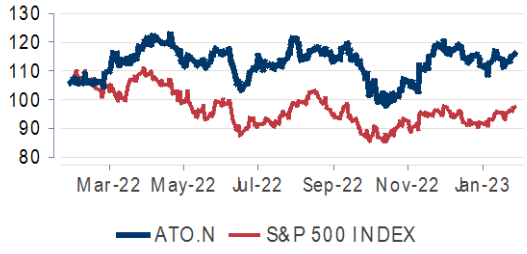
Company Background

Atmos Energy is a utility holding company headquartered in Dallas, TX. Atmos it the countries largest natural-gas-only distributor base on number of customers, with operations across Texas, Louisiana, Kentucky, Mississippi, Colorado and Kansas

Blue/Grey Sky Scenario



Our Blue Sky Scenario (US$) **(from 130.00) 141.00**

Our Blue Sky scenario contemplates a 19.7x 2024E P/E, which could be achieved if: (1) the LDC sector continues to re-rate, (2) ATO is able to accelerate growth prospects north of 12% rate base growth, or (3) if ATO re-bases its guidance rate higher to capture the lower cost of capital implied in the stock price today.

Our Grey Sky Scenario (US$) **(from 103.00) 112.00**

Our Grey Sky scenario assumes ATO trades at a 15.7x P/E, which could happen if LDC multiples de-rate, if anti-methane bills are introduced in ATO's service territory, or if management is unable to obtain favorable regulatory treatment in its jurisdictions. If ATO experiences another Winter Storm Uri-type event, we believe the stock could also be pressured toward our Grey Sky scenario.

Constellation Energy

FY23 Preview: Managing a Different Power Pricing Environment; Outperform

CEG.N

Target price (12M, US$) 91.00

Outperform

Power

We are providing a 4Q/FY23 preview for CEG where we expect company to announce close to high-end of range '22 EBITDA with Cse projects $2,630mm vs. 3Q22 narrowed guidance range of $2,450-2,650mm and Cons. $2,576mm; In terms of the '23 EBITDA, we see it at $3,309mm vs. Cons $3,159, based on Cse power pricing assumptions. This is the first year that CEG reports as a separate entity post the January 2022 spin from EXC so we see less transparency into quarterly numbers but believe the narrowed '22 EBITDA guidance during 3Q should hold, considering close to 90% of the generation for '22 has been hedged at disclosed pricing assumptions as of 3Q22. Our view that IRA is a catalyst for nuclear generation, particularly as CEG is one of the largest nuclear owners in the US, providing investors with scarcity value, remains unchanged. Market valuation has dropped by ~20% since the November peak, as power forward curve dropped by 10% during the same timeframe. We see the current potential upside based on valuation and forward curve still warranting an Outperform rating.

- **What to expect on the call, Capacity Revenue, O&M, Capital Allocation:** We expect CEG to roll forward financial disclosures, provide '24 gross margin guidance, which could include certain PTC impacts. '23 EBITDA guidance should also be provided with updated capex plan, O&M disclosures (recall company has seen pressure managing it) and a 2YR FCF outlook. Well-expected capital allocation decision should drop, potentially on hydrogen and other growth opportunities, but we are not expecting quantitative disclosure on this. We also note that capital allocation announcement should lean towards projects that are more long term in nature. On the M&A front, there is possibility to get further update, but we note the Talen chapter 11 process indicates less viable path for any Susquehanna M&A opportunities. In terms of the priorities of concerns when making capital allocation decision, our understanding to the general rule is balance sheet quality comes first, then dividend growth. Share buyback/special dividend would be the last resort if any surplus. We see a dividend raise to a 2.5% yield as likely needed to compete with peers as most likely.
- **Valuation, TP and Thoughts on Shares:** Our target price is tweaked from $98 to $91, driven by slightly lower '23 adj. EBITDA. We revised '23/'24/'25/'26 adj. EBITDA by -$92mm/-$310mm/-$249mm/-$178mm, respectively, reflecting updated forward curve. Our SOTP valuation methodology with implied 10.5x EV/EBITDA multiple on '23 EBITDA remains unchanged. Risks: power market price, hedging, Treasury interpretation on IRA.

Previous target price (12M, US$)	98.00
Price (27 Jan 23, US$)	86.58

Company Background

Constellation Energy is an energy company that conducts its business through various subsidiaries and joint ventures organized in three business segments: a generation business, a customer supply business, and Baltimore Gas and Electric Company.

Blue/Grey Sky Scenario

Our Blue Sky Scenario (US$) **(from 111.00) 103.00**

The EV/EBITDA multiple for our Blue Sky scenario is 11.8x under the following conditions: (1) forward curve across different ISOs continues to at least remain at current pricing levels; (2) management identifies capex project with mid-teens IRR with manageable execution risk; (3) management executes capital allocation strategy to drive EBITDA growth or conduct share buyback; and (4) favorable IRS interpretation and implementation on IRA.

Our Grey Sky Scenario (US$) **(from 80.00) 74.00**

Our Grey Sky scenario assumes CEG trades at an 8.6x multiple and (1) unfavorable power market movement reduces profitability upside potential and (2) the current backwardation power market structure persists, which pressures margin.

Share price performance

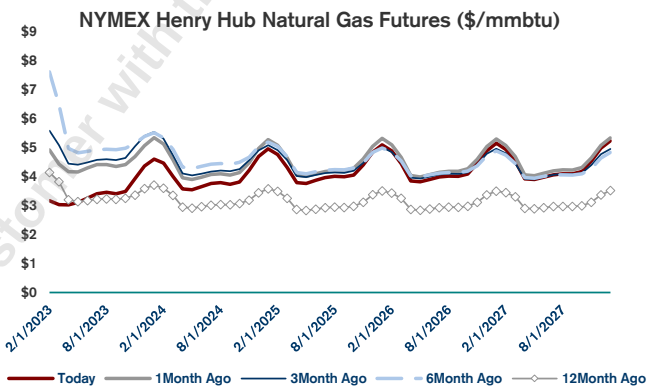
Commodities Pricing Dynamics



- **Where forward curve is now vs. PTC floor & when we launched:** We note that the current Cse forward power price in '23 (excluding capacity revenue and other ancillary revenues) is slightly lower than the ~$42/MWh PTC floor price, although the investment community is still waiting for IRS/treasury guidance on how the PTC flooring price is implemented. We note that our current valuation is based on forward price assumption lower than $42/MWh, which suggests a $70mm EBITDA upside potential if using PTC flooring price ($3/sh TP upside, or ~4% upside). We also note that compared to when we launched in October 2022, when we used a pricing assumption of ~$65/MWh for '23, the current $45/MWh is significantly lower. But thanks to close to ~90% hedged position, valuation based on '23 EBITDA didn't drop in proportion. We also note that the current forward curve environment could aid pressure in margin due to less degree of backwardation (mentioned by 18atha. in previous calls), but lower pricing environment could directly hurt revenue upside potential.

DTE Energy

FY23 Preview: Solid Value for a High-Quality Compounder; Outperform

DTE

Target price (12M, US$) 131.00

Outperform

Multi Utilities

We are providing our 4Q22/FY23 preview with updated thoughts since EEI and electric rate decision by MPSC (both November 2022), where we believe despite the less constructive rate case decision, 21atha. is able to pull cost-reduction levers, improve ultimate regulatory outcome, and execute on the '23 EPS guidance provided during EEI ($6.25 midpt). We see unlikely for company to de-rail new 6-8% EPS CAGR. On the 4Q call, we expect re-affirming '23 EPS guidance, LT CAGR driven by the upsized capital plan, with higher probability to announce project development updates at Vantage. Relative valuation has been reflecting a more cautious sentiment on the stock with '23/'24/'25 P/E multiple dropped by ~500 bps relative to peers since November Maintaining Outperform seeing risk now priced in with MI's regulatory construct intact/21atha.'s ability to execute should backstop further performance deterioration.

- **Electric rate case decision tree; Gas rate case:** Since we published our thoughts on the electric rate order late November, DTE has been communicating with the market, conveying mitigation strategies, including cost saving initiatives and re-filing electric rate case on or around February 10. Concurrent DTE still plans to file gas rate case by 1H23. At the same time, we are still looking for a decision by the commission regarding the pending request for a re-hearing on the '22 electric GRC during the February open meeting, although we're not certain about this, it would help shore up confidence in shares more expeditiously.
- **What else to offset rate outcome uncertainties:** Recall IRA has been beneficial to RNG project IRR/valuation and 21atha. has been indicating the optionality from the RNG portfolio/development pipeline. In our view, although there is higher probability for 21atha. to consider rotation now than before given the headwind, it's more likely to expect typical updates on project pipeline addition.
- **Valuation, TP shift & Risks:** We are tweaking our TP to $131 from $118 to reflect the updated MtM multiple. We continue to apply 12.5% P/E premiums to regulated utilities segments based on and a 30% discount to earnings from trading business. No change to our ests. Risks: Reg outcomes, commodity risk, inflation.

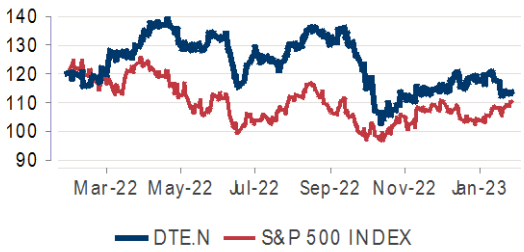
Company Background

DTE is a utility holding company headquartered in Michigan. The company principally operates through its DTE Electric and DTE Gas Business. The company generates, transmits and distributes electricity across Michigan, and offers gas distribution services.

Blue/Grey Sky Scenario



Our Blue Sky Scenario (US$) **(from 132.00) 150.00**

Our Blue Sky scenario contemplates a 20.8x 2025E P/E, which could be achieved if: (1) DTE achieves constructive regulatory outcome in electric rate case filing; and (2) DTE realizes upside from coal replace power and gains supportive regulatory outcome.

Our Grey Sky Scenario (US$) **(from 103.00) 111.00**

Our Grey Sky scenario assumes DTE trades at a 15.4x P/E, or inline P/E. We think the multiple could be justified if we see an unexpected non-constructive regulatory outcome for DTE's electric rate case filing.

Duke Energy

4Q22/FY23 Preview: All About the Carolinas; Neutral

DUK

Target price (12M, US$) 106.00
Neutral

Electric Utilities

We provide our 4Q22/FY23 earnings preview for DUK where our expectation for '22 EPS remains at low end of range (Cse $5.40 vs. $5.30-5.60 guidance range). During the call, we expect management to re-affirm the FY23 EPS guidance of $5.55-5.75, 5-7% LT EPS CAGR off '23 midpoint of $5.65. We continue to focus on the commercial renewables sale where we see as a big driver and management appears keen to provide greater clarity in terms of timing for deal closing, also optionality on debt paydown, proceeds and the effect on FY23 EPS. DUK currently is trading at a -2.4%/-2.2% discount compared to peers based on Cse '24/'25 EPS which we see as appropriate given 1) pending asset sales needed to execute FY23, 2) rate reviews for ~60% of EPS this year, and 3) balance sheet. Maintain Neutral.

- **Heavy regulatory calendar, Gas price movement, Commercial renewable, FY23 Walk:** We note that DUK currently has DEP-NC, DEP-SC, DEK Electric, and DEO Gas going though rate filing and DEC (NC) just filed MYRP on January 19, requesting 10.4% ROE with 53% equity content. Regarding fuel recovery, we also note that given the recent move on gas price, FL utility is planning to file for fuel cost adjustment which is helpful for cumulative deferred fuel balance. Look for more updates on the call regarding how the recent move in gas is translating to customer rates (we expect a benefit). On commercial renewable sale, the messaging has been similar where the company sees robust interest with IRA being a tailwind. Timing-wise, we now expect 1Q23 for announcement and target mid-year closing. Our $5.65 FY23 EPS (close to midpoint of guidance) is driven by base rate change through various rate case execution (+29c), interest expense saving (+15c), O&M saving (15c), offset by D&A (-10c) and reverse of favorable weather (-10c).
- **Valuation, EPS Ests & thoughts on shares:** Our ests are unchanged as we await further details on the comm renewables sale. We increase our TP to $106 from $94 on account of slightly higher electric and gas peer group multiples. We roll our valuation forward, applying a P/E multiple to '25 EPS by segment. Risks: Better / Worse than expected regulatory outcomes and asset sales, inflation, storms.

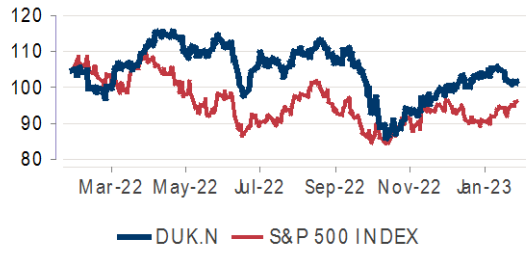
Company Background

Duke Energy is a large-cap regulated utility headquartered in Charlotte, North Carolina. The company operates primarily across three segments: Regulated Utilities, International Energy, and Commercial Portfolio.

Blue/Grey Sky Scenario



Our Blue Sky Scenario (US$) **(from 101.00) 113.00**

Our Blue Sky scenario contemplates an 17.6x 2024E P/E, which could be achieved if: (1) DUK is able to further monetize non-core assets ahead of current market multiples; (2) if management is able to garner better-than-expected regulatory outcomes or (3) if management is able to accelerate earned ROE improvement in the Carolinas faster than we have contemplated.

Our Grey Sky Scenario (US$) **(from 87.00) 98.00**

Our Grey Sky scenario assumes DUK trades at a 15.2x P/E. We think the market would likely return to a discounted view on the stock if management fails to properly execute on its decarbonization plan, if management decides to grow in-organically rather than through 1.0x rate base investments, or if management is unable to execute at the mid-point of the 5-7% EPS CAGR.

FY23 EPS Walk

- **Drivers:** We see $5.65/sh FY23 vs. $5.65/sh Consensus (FS) and $5.25/sh FY22 guidance midpoint, and company guidance for FY23 of $5.55 to $5.75/sh. We see a $0.10/sh drag from negative weather and $0.10 drag from D&A expense, as well as a $0.15/sh pick-up from interest expense and $0.04/sh pick-up from base rates.

Consolidated Edison

4Q Preview: All Eyes CECONY; Model Update Pro Forma Asset Sales; Neutral

ED

Target price (12M, US$) 95.00
Neutral

Multi Utilities

We are providing our 4Q preview for ED and reiterating our Neutral rating on the stock. We see ED shares as expensive despite our current above-consensus estimates which are now pro-forma the CEB sale with buy-backs for UoP and our base case for the CECONY rate review, with the name currently trading at an 18.2x P/E multiple on 2025E EPS vs. 16.2x average for the large-cap electric peer group. We see variability and uncertainty with the CECONY rate cases which is a key driver for the name, where we see a settlement expected by 1H23. For the 4Q update, we expect clarity on the current rate case, as well as guidance on the share buyback plan which our current model assumes full completion by YE23 with $1.3Bn of deployment. This is a debate among the investment community, but we see the stock expensive in most scenarios out of the CECONY rate review.

- **Share Buyback Plan & New CSe Model:** In October, ED signed a purchase and sale agreement for sale of CEB assets for $6.8Bn which we see at 10-11x EV/EBITDA. Use of proceeds will go towards $1Bn of debt repayment, CECONY/O&R investments and a share purchase program with ED forgoing equity issuances in 2022/23. Our cash walk points to $1.3Bn of buybacks but we're unsure if ED formally guides to this in the 4Q report. The company expects the transaction to close in the first half of 2023, and the share buyback program could begin shortly after that. The recent strategic actions were a major driver of share performance for FY22 with shares now looking more fairly valued to slightly expensive to us. We emphasize our model incorporates a $1.3Bn repurchase in 2H23 which is the main driver of our above consensus estimates but lack visibility from mgmt on the timeline. Outside of the buybacks, key assumptions underpinning our pro-forma model include 95% of the capex ask at CECONY, and a 9.2% authorized ROE (vs. 9.0% earned). The joint proposal has been delayed from current market expectations, but we still see it on track for 1H23 resolution.
- **Valuation, TP and risks:** We increase our TP to $95 from $78 on account of rolling forward our valuation, now applying a P/E multiple to 2025E EPS (from 2024 prior). We continue to apply a 5% premium to the name on account of the company's strong B/S and limited rate case risk after CECONY resolution. We tweak FY22 EPS +6c, increase '23 est by 3c, '24 est by 29c, '25 est by 39c and '26 est by 44c. Risks: climate change, better/worse than expected regulatory outcomes, history of under earning.

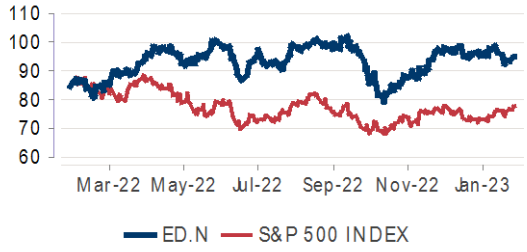
Company Background

Consolidated Edison, Inc. is a utility holding company based in New York City. The company provides electric and gas distribution services to customers in New York and New Jersey. ConEd also owns and operates a commercial renewables business.

Blue/Grey Sky Scenario



Our Blue Sky Scenario (US$) **(from 83.00) 102.00**

Blue Sky Scenario ($102): Our Blue Sky scenario contemplates a 18.2x 2025E P/E, which could be achieved if: (1) ED gets more constructive testimony than expected in the NY PSC rate case; (2) if ED can reinvest proceeds of CEB assets in a constructive manner; or (3) if management is able to execute above the 5-7% EPS CAGR in its new CECONY rate plan.

Our Grey Sky Scenario (US$) **(from 73.00) 88.00**

Grey Sky Scenario ($88): Our Grey Sky scenario assumes ED trades at a 15.8x multiple, below the peer group average of 16.2x. Our Grey Sky could be realized on a worse-than-thought GRC outcome at the NY PSC, specifically an allowed ROE below 8.8%, or material disallowances in rate base. Our Grey Sky could also be realized if ED does not reinvest proceeds in regulated business and instead reinvests in another unregulated asset.

Investment Considerations

- **CECONY electric and gas rate case:** ED is currently amidst a rate case for CECONY for the electric and gas businesses. The electric and gas rate cases were filed in January 2022. The electric rate case saw an initial ask of $1,198Mn, with the company revising its request in April to $1,037.8Mn with a 10% ROE and 50% equity layer, and staff's recommendation in May of $278.2Mn, 8.8% ROE and 48% equity layer. The gas rate case saw an initial request of $502.7Mn, with the company revising its request in April to $402.2Mn with a 10% ROE and 50% equity layer, and staff's recommendation in May of $164.4Mn, 8.8% ROE and 48% equity layer. We see this as a pivotal rate case for the company as it represents a potentially significant change to rates and improvement in ROE and equity layer, something that has historically been a headwind for the company. We currently assume a 9.2% ROE and 48% equity layer (CSe) for both segments. We see the outcome as uncertain given the NY regulatory environment has not historically been overly constructive for utilities. The company is currently amidst settlement discussions, which we view as a positive, but still see uncertainty in being able to achieve a constructive outcome for ED. We expect a resolution of this rate case sometime during 1H23. We see this rate case as having a potentially significant impact to EPS growth trajectory given the electric and gas segments of CECONY made up ~87% of total ED rate base in '22. We note that our estimates reflect 95% of the capex ask in the CECONY rate review.
- **CECONY steam rate case:** The steam rate case was filed in November 2022 and included an initial ask of $136.7Mn, 10% ROE and 50% equity layer, with staff recommendation pending. We see this as a cautious data point given the outcome of the last steam rate case which was initially filed in January 2013 and included a $5Mn rate decrease with the company revising the ask in June 2013 to a $10.54Mn rate increase. The prior rate case saw an adoption of a joint proposal in February 2014 that included a $22.4Mn rate decrease, 9.3% ROE and 48% equity layer. Given the length of time for a resolution in the past rate case, we could expect a resolution in late '23 or early '24, with our current forecasts of 9.4% ROE and 48% equity layer (CSe) for the segment in '24. The steam segment makes up ~4% of total ED rate base in '22, so we view the decision as having relatively limited risk to EPS growth for the name.

Valuation: TP to $95 from $78

We increase our TP to $95 from $78 on account of rolling forward our valuation, now applying a P/E multiple to 2025E EPS (from 2024 prior). We continue to apply a 5% premium to the name on account of the company's strong B/S and limited rate risk after CECONY resolution.

EIX

Target price (12M, US$) 68.00

Neutral

Electric Utilities

This article is intended for the sole use of customer with the trading ID of 10111678

We are providing our FY23 preview for EIX where we reaffirm our Neutral rating and provide key considerations going into the 4Q call. During the 4Q call we expect FY23 EPS guidance, with current FY22 guidance of $4.48-$4.68/sh, which was narrowed during the 3Q call from $4.40-$4.70/sh. The company currently guides to 5-7% LT EPS growth CAGR from '21 to '25, however actual EPS growth is expected to be non-linear particularly in '23, based on our discussions. That said, we expect management to reaffirm current LT EPS growth guidance. We currently forecast $4.71/sh '23 EPS (CSe) vs. Consensus of $4.78/sh (FS), implying a ~3.5% growth rate from the midpoint of original FY22 guidance. Despite the below-guidance growth rate, we see this possibility as well telegraphed to the Street with EIX unlikely to change the 5-7% CAGR in the medium term.

- **Capital plan, funding and EPS CAGR update:** We expect management to reaffirm the current capital plan & rate base growth of 7-9%. These investments are currently set to be mostly in safety and reliability, something we view as a positive given a history of destructive wildfires in the service territory. We do not expect the company however to update the street on the LT EPS CAGR (current 5-7%) which we see as slightly cautious given most utiltiies will have already rolled forward the growth rate and our estimates at or below the low end of the CAGR through the forecast period. On the funding plan, recall EIX forwent issuance in FY22 ($2-300Mn) where we expect an update on equity content for 2023/2024 on the 4Q call. Recall mgmt is also at the bottom of stated FFO/debt minimums (15%) after the last legacy wildfire cost update where we're also expecting an update from mgmt. Lastly, we flag some upward pressure to ROEs from the recent Moody's dead band update but are not incorporating any higher ROE in our estimates at this time with 8 months to go in the year.
- **Valuation, TP and risks:** We increase our TP to $68 from $64 on account of a slightly higher large-cap electric group P/E multiple and continue to apply a 20% discount to the electric GRC earnings and 10% discount to transmission business on account of wildfire risk in the service territory. We increase our '23 to '24 EPS est by 1c, increase '25 est by 2c and '26 est by 3c on funding considerations. Risks: wildfire damage, better/worse than expected regulatory outcomes, inflation.

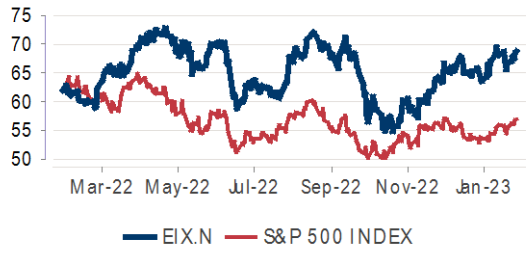
Company Background

Edison International is a utility holding company base in California. The company operates Southern California Edison (SCE), an electric utility which distributes electricity to 15 million people across central, coastal and southern California.

Blue/Grey Sky Scenario



Our Blue Sky Scenario (US$) **(from 71.00) 75.00**

Our Blue Sky scenario is $75, which contemplates a 15.0x 2024E P/E, which could be achieved if (1) EIX's wildfire mitigation efforts lead to less damage from wildfires and less costs associated w/ recovery; (2) reduced wildfire activity in the state in general; and (3) a timely and complete recovery of the legacy costs ($5Bn) sooner than expected.

Our Grey Sky Scenario (US$) **(from 53.00) 56.00**

Our Grey Sky scenario is $56 and assumes EIX trades at a 11.2x P/E, or a ~19% discount. We think the market could return to a discounted view of EIX if the recovery filing is delayed, and if management fails to provide incremental growth in the current plan that leads to a decline in EPS expectations. Increased wildfire risk and a delay in covered conductor installation could also weigh on shares in the future.

Investment Considerations

- **Cost of capital:** CA utilities are subject to an annual Coc adjustment mechanism where any year where the difference between 1) the benchmark, which is the average of each month of daily averages for the past twelve months (from October 1, 2021, to September 30, 2022) of the Moody's Baa Utility Bond Index; and 2) the index, which is the rolling average of daily yield for the current twelve months of the Moody's Baa Utility Bond Index (from October 1, 2022 to September 30, 2023) exceeds 100bps from the midpoint of the benchmark, the utility's ROE would increase/decrease by 50% of the difference. The benchmark is currently 4.37% and, as of January 19, the index is 5.83%, as of January 27. For example purposes, if the end of the period saw these same figures the dead band would trigger and EIX's ROE would increase by ~75bps to 10.81%. When the dead band is triggered, the company's cost of debt and preferred is refreshed to equal the most recently recorded levels for forecasted debt issuance and forecasted interest rates for the next 12 months. Additionally, should the dead band be triggered, both the benchmark and dead band reset. We view this as a positive for the stock as it allows for cost of capital and ROE to keep pace with current market conditions with relatively minimal lag, and should current trends continue EIX could see an increased ROE and refreshed cost of preferred and debt in 2023.

Figure 24: Moody's Baa Utility Bond Index vs. CPUC CoC Dead Band for '23

Source: FactSet

- **Covered conductor:** During the 4Q call, we expect an update on covered conductor progress and strategy for 2023. We see covered conductors as a key hedge against wildfire damage and reliability. The company current has ~17k miles of distribution lines in high fire-risk areas, with ~10k of those currently above-ground (with the balance underground). The company has currently covered ~4.3k miles of lines as of the end of '22 and is targeting ~8.6k additional miles of covered conductor by the end of 2028. We expect an update on progress for this initiative during the 4Q call, as well as any update on cadence/timing for hardening power lines in these high-risk areas.
- **Legacy wildfire claims update:** During the 4Q call, we expect an update on the legacy wildfire claims, a key item for EIX's story. In October 2022, management revised its estimate of expected loss for '17/'18 wildfire/mudslide event by $880Mn to $8.8Bn,

This report is intended for the sole use of customer with the tracking ID of 10111678

indicating the company plans to seek CPUC recovery of prudently incurred costs (now $6Bn). Messaging up to this point going into the 4Q call is unchanged, and we expect further clarity on timing of getting these costs behind the company during the call. Remaining losses are currently $1.2Bn in total. We expect a neutral reaction by investors on this topic should the company indicate that it is on track for filing for CPUC recovery in late 2023.

Valuation: TP to $68 from $65

We tweak our TP slightly on account of higher large-cap electric group P/E multiple. We continue to apply a 20% discount to electric GRC earnings and 10% discount to transmission earnings on account of wildfire risk and cost recovery risk in the state.

4Q Preview: Near the End of the Offshore Tunnel; Light FY23 and 5-7% Going Forward

ES

Target price (12M, US$) 84.00
Neutral

Electric Utilities

This article is intended for the sole use of the customer with the tracking ID of 10111678

We expect an eventful 4Q update for ES given mgmt is set to refresh the LT EPS CAGR (likely 5-7%), extend its capital / financial plan out to FY27 including Capex of ~$3Bn for newly identified opportunities, and introduce FY23 EPS guidance where we see the potential to slightly underwhelm street given debt paydown considerations are tied to the pending OSW sale, which is likely coming after the 4Q call. ES has seen success in addressing key regulatory items in FY22 including the positive outcome in the MA NSTAR rate review accompanied by newly identified T&D opportunities to replace lost offshore wind earnings. ES trades at a 2% premium to large cap electrics and we continue to see the valuation skew as fair given higher than average execution risk with the pending OSW deal, FY23 guidance considerations and our expectation for the LT EPS CAGR to remain unchanged at 5-7%. Maintain Neutral.

- **CS Model Now Pro-Forma OSW Sale:** We are updating our model to reflect post-tax cash considerations of $2.6Bn for the OSW asset with UoP going entirely to debt paydown. We also include higher capex in the near years of the plan as ES executes on Grid Mod & AMI strategies in MA. We project ES FY23 EPS at the lower end of the 5-7% CAGR in FY23 but still see ES in the upper half of FY24/FY25. The OSW strategic review, capex increases, and funding considerations remain a core debate among investors into the 4Q call, but all in our expectation is that ES will likely target a 5-7% CAGR with messaging that it expects to be in the upper half of the range.
- **Orsted OSW Impairment Cautious Ahead of Sale Announcement:** We think the $365Mn USD impairment taken by Orsted on sunrise wind (ES 50% owned project), is a cautious datapoint to the asset valuation and return profile and could affect the multiples of the project. Most Northeast utilities including ES are now divesting projects and recent datapoints imply more limited premia given the backdrop for higher CoC.
- **Valuation, EPS Ests., Risks:** We tweak of FY22 EPS to $4.10 (from $4.12) based on 4Q qtrly considerations; FY24 EPS is raised to $4.68 due to asset sale accretion. TP shifted to $84 from $75 due to the latest MtM of group multiple and higher estimates. Risks: Reg outcomes, asset sale outcomes, inflation.

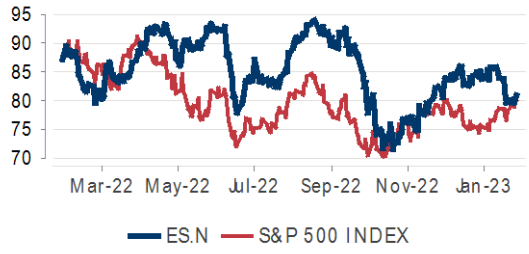
Company Background

Eversource Energy is a Boston, Massachusetts based regulated electric and gas utility focused on serving customers in the Connecticut, Massachusetts, and New Hampshire regions through its subsidiaries.

Blue/Grey Sky Scenario



Our Blue Sky Scenario (US$) **(from 86.00) 92.00**

Blue Sky Scenario ($92): Our Blue Sky scenario contemplates a 19.6x 2024E P/E, which could be achieved if: (1) ES is able to execute fully on AMI, EV infrastructure and grid modernization projects; (2) Investors place higher multiples on transmission and distribution businesses for safety/ security; and (3) ES is able to raise CapEx more than our current model predicts

Our Grey Sky Scenario (US$) **(from 66.00) 75.00**

Grey Sky Scenario ($75): Our Grey Sky scenario assumes ES trades at a 16.0x P/E, or an -5% discount. We think the market would likely return to a discounted view on the stock if mgmt fails to properly have a favorable execution in regards to the offshore monetization, inflation creates pressure on customer bills in jurisdictions, if there is an unfavorable rate outcome in PSNH or Aquarian reviews, or significant debt pay down with OSW proceeds.

FY23 EPS Walk

We project FY23 EPS of $4.31 vs. Consensus $4.37. ES currently target a 5-7% LT EPS CAGR based off 2021A of $2.86, which implies an EPS range of $4.26-4.42 in FY23. We are slightly below the midpoint of the implied FY23 range as we see higher rates (NSTAR Elect Disty +14c), lapping of storms (+3c), Electric Transmission earnings (+14c) and the grid mod (+3c) & AMI CapEx (+2c) being partially offset by debt drag (-8c), pension (-7c) and D&A (-14c). We also flag that FY22 benefited from 3c of MtM on clean energy investments (RIN investments) which is a headwind to the FY23 number that we're assuming is fully offset. All in, we see the FY23 number underpinned by timing and proceeds of OSW sale proceeds where debt paydown should benefit the quarter. We see most of the street assuming a full year of debt paydown where our walk below assumes mid-year.

OSW Sale Considerations

ES has a total equity investment of $1.82Bn as of the 3Q22 conference call and has launched a strategic review of the investment portfolio which is likely to include two buyers--one of the operating assets (1.7GWs) and one of the lease areas. We include our latest valuation below for the portfolio which underpins our model. We assume $1.25/MW acquisition multiples for the contracted assets and 0.27/MW for the pipeline, with limited cash taxes leading to $2.6Bn of post-tax cash proceeds back to ES. ES in incurring ~$100Mn/month in costs for the OSW investment so we see a net $2Bn CWIP consideration as appropriate for ES' 50% stake. As communicated through the quarter it's likely the acquisition announcement is *after* the 4Q22 conference call.

Figure 28: ES OSW Portfolio Valuation

Offshore Wind Sale	Multiple ($/mw)	GW	$Mn	Notes
Contracted	1.25	1,700	2,125	All secured contracts
Pipeline	0.27	4,200	1,134	708sq km, 6MW per sq km
CWIP		2,000	2,000	ES current portion $1.8Bn for as of 3Q22

Other Updates We're Watching for in 4Q

- **Equity Needs:** Recall ES has a $1.2Bn ATM program which it launched in 2022. We see $257Mn executes YTD with more likely in 4Q22. We also look for a communication on the CapEx roll forward for future equity needs which we're expecting to be minimal given ES is raising cash with the OSW asset sale.
- **Progress on Replacement CapEx:** ES has $1Bn of AMI across CT / MA with the MA portion de-risked, OSW transmission opportunities ($500Mn) and solar DER CapEx which is driving $637Mn of distribution investment in MA and $265Mn of transmission investment. We see it as logical for the opportunities to start to get rolled into the current $18.1Bn capital plan on the 4Q call, though believe it adds ~$100-200Mn/yr of incremental capex in the near years as ES begins to execute on the program.

Valuation: $84 TP; Maintain Neutral

We are including our latest valuation below, continuing to ascribe similar premiums to ES businesses with the core change to our valuation being the latest MtM of group multiples (Electric 16.9x, Gas 17.0x, Water 28.7x) and the removal of OSW valuation as the sale is now fully reflected in our EPS estimates for 2024.

Fundamental Dashboard

We include our latest ES estimates below incorporating the removal of OSW in 2023 with $2.6Bn of post-tax proceeds. The OSW sale is accretive to the near year of the plan, but this is before considering headwinds from pension & CL&P ROEs. Our EPS is unchanged in FY23, raised in 2024 / 2025 to $4.68 / $4.92, respectively. We see credit improvement from 2022-2025 as ES pays down debt with proceeds which should cure agency concerns at the current Baa1 negative outlook.

Entergy Corporation

4Q Preview; Focus is on LA After Ida Securitization Resolution; Outperform

ETR

Target price (12M, US$) 115.00

Outperform

Electric Utilities

We are providing our 4Q EPS preview for ETR, reiterating our Outperform rating on the stock. Recall during the 3Q call ETR narrowed FY22 EPS guidance to $6.25 to $6.45/sh, from $6.15 to $6.45/sh prior. We see the recent favorable outcome regarding the Hurricane Ida securitization in LA as a key de-risking event for ETR and for future storm cost recovery cases. During the 4Q call we expect management to reaffirm the current 6-8% LT EPS growth guidance from 2021 to 2025, as well as provide an update on the current $15.5Bn capital spending plan for '23 to '25. We also see it likely ETR re-affirms FY23 EPS guidance of $6.55-6.85 (CSe $6.71). We see ETR as having a robust catalyst path in terms of electrification of the Gulf Coast given the company's strong industrial customer base in the area, with Ida securitization offering an attractive entry point for shares.

- **Ida securitization outcome a key de-risking event:** On January 18, the LA PSC ordered to reduce ETR's Hurricane Ida securitization amount by $180Mn to $1,420Mn via acceleration of the ADIT for tax purposes. This comes amidst a strong focus by the Commission in LA and other states to reduce the cost burden on customers, something that this order will help to achieve. We view this as a positive for the company as it is a relatively small amount of reduction in costs. We view this as a key de-risking event for the company given many investors were uncertain of a positive outcome given signs of deteriorating relationship between ETR and LA PSC, in our view. SERI continues to be focus with FERC ordering a refund in Mid-Jan of $103Mn which ETR is appealing, but all in we still see the company on track to reaffirm all financial metrics. E-LA customers will also benefit from gas price declines with every $1/MMBtu leading to a 3-4% reduction in customer bills.
- **Valuation, TP and risks:** We decrease our TP to $115 from $117 on account of a slightly lower peer large-cap electric group multiple. We continue to apply a 5% discount to the name on account of the hurricane risk in the service territory and subsequent cost recovery needs. We keep our '22 and '23 ests unchanged and increase our '24 to '26 ests by 1c. Risks: better/worse than expected regulatory outcomes, climate change, natural disaster.

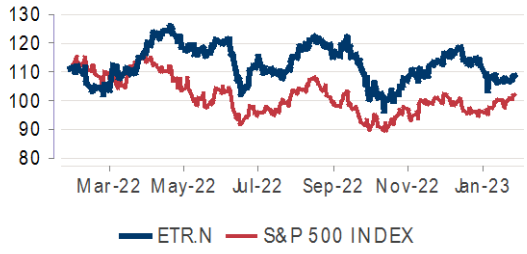
Company Background

Entergy is a regulated utility holding company with operations across the US Gulf Coast. The company produces and delivers electricity to customers in Arkansas, Louisiana, Mississippi and Texas.

Blue/Grey Sky Scenario



Our Blue Sky Scenario (US$) **(from 126.00) 136.00**

Blue Sky Scenario ($136): Our Blue Sky scenario contemplates a 17.6x P/E. Our Blue Sky scenario could be achieved if ETR delivers more capex in the five-year window than we/Street expect; if management is able to earn ROEs materially north of the current allowed ROE; or if ETR can fund its capital plan with less equity than we currently contemplate. This could also be achieved if ETR sees strong reg outcomes.

Our Grey Sky Scenario (US$) **(from 100.00) 94.00**

Grey Sky Scenario ($94): Our Grey Sky scenario contemplates a 12.2x consolidated P/E, which could be realized if earned ROEs deteriorate for the electric businesses, or if management has to pare back capital owing to the current inflationary environment. Our Grey Sky could also materialize if ETR is unable to successful navigate currently regulatory proceedings, or if hurricanes cause more stress on the balance sheet than we anticipate.

Investment Considerations

- **LA FRP update:** 2023 is the final year for the E-LA FRP, with the next filing date of May 31 in LA. This is the third year of the FRP, with selections for the renewable assets the company will purchase/build expected to come sometime around 2H23. The company plans to ask for an extension of the FRP or will file a rate case after the last filing date in May, and expects a rate change by September 1, based on our discussions. This is a key development for ETR as LA is a significant aspect to the overall story for the company and something that we are monitoring.
- **Equity needs:** We expect ETR to settle most of its outstanding ATM in the 4Q with only $130Mn of equity needs to be sourced as of 9/30/2022. There are some equity needs in the 2025-2026 timeframe ($1.4Bn) which management noted strategic financing options remain under consideration. This could potentially mean a non-controlling interest sale where we expect additional information potentially by the 4Q call.
- **Gas price sensitivity:** We see higher expectations being baked into bills by ETR, with an update expected on gas prices and bill inflation outlook from the company during the 4Q call. Every $1/mmbtu increase in the price of natural gas is roughly equal to 3-4% increase in customer bills (and vice versa), with ETR currently assuming $5.51/mmbtu for '23 gas prices vs. $3.30/mmbtu today. We view this as a potential positive as it could bring actual gas prices more into alignment with commission expectations, and ultimately customer bills, as many Commissions across the company are weary of bill inflation for customers. Additionally, should natural gas prices decline this year, it could create more headroom in bills from forecasted levels that the company could utilize for increased investment.
- **SERI: Refund update:** On January 11, ETR announced that SERI has begun the process of sending refunds to customers in AR, LA and New Orleans in response to the recent order from FERC for uncertain tax positions at the subsidiary. FERC ordered a refund of $103Mn, broken down to $41.6Mn for AR, $27.8Mn for LA and $34Mn for New Orleans. SERI plans on appealing the FERC order but will provide the refunds in the meantime under terms that will be decided by state and local regulators. SERI's stance is the subsidiary has already paid refunds due under the remedy outlined in the FERC order, however FERC believes refunds are still due. We expect an update on the timeline for appeal for SERI regarding FERC's order during the 4Q call, with ETR indicating in the press release that the company remains committed to a global settlement being the best way to come to a resolution with FERC. Recall the global settlement is what is currently reflected in guidance.

4Q EPS Walk

- **Drivers:** We see a $0.49/sh for 4Q22 vs. $0.51/sh Consensus (FS) and $0.76/sh for 4Q21. The below consensus number is partially due to a stale figure. For 4Q22 we see a $0.08/sh pick-up from Ida, as well as a $0.19/sh drag from O&M headwinds, $0.12/sh drag from depreciation expense and $0.05/sh drag from positive tax timing reversal.

Valuation: TP to $115 from $117

We decrease our TP to $115 from $117 on account of a slightly lower peer large-cap electric group multiple. We continue to apply a 5% discount to the name on account of the hurricane risk in the service territory and subsequent cost recovery needs.

Underperform

Electric Utilities

This article is intended for the sole use of Credit Suisse clients with the tracking ID of 20111678

We provide our 4Q EPS preview for EVRG, reiterating our Underperform rating on the stock. We see several cautious data points for the company, with key catalyst being the Kansas rate case. During the 4Q call we expect an update on the execution of the refreshed $6.782Bn capital plan in KS from 2022 to 2026, coming off the KS capital workshop update in December. Additionally, we expect management to reaffirm the current 6-8% LT EPS growth CAGR guidance from 2021 to 2025, with the company's goal being to hit the implied midpoint of $3.78/sh for FY23, based on our discussions, though our expectations are below this level. Recall EVRG raised FY22 EPS guidance midpoint during the 3Q call to $3.53 to $3.63. We note that FY22 EPS is currently ahead of schedule, with the company seeing $3.43/sh YTD, and our current 4Q22 estimate of $0.35/sh (CSe) leading to our FY22 estimate of $3.78/sh (CSe), which is above current FY22 guidance. During the 4Q call we expect the company to provide FY23 EPS guidance, with the current implied EPS range of $3.71 to $3.85 ($3.78 midpoint) vs. our forecast for FY23 of $3.61 vs. Consensus of $3.65/sh (FS). We note our below-consensus forecasts in the coming years with our '24 and '25 ests of $3.81 and $3.92 (CSe) vs. Consensus (FS) of $3.96 and $4.23, respectively remain one of the more glaring deltas to consensus, keeping us Underperform rated.

- **Moving Past Sibely in MO and Onto KS:** In November 2022, the MO PSC issued a rate order for the MO rate review, with the final order including language on impacts to Sibley, which the company sees $0.05/sh drag from Sibley return disallowance and $0.01/sh drag for AMI, summing to a total $0.06/sh ongoing impact to EPS. Mgmt is now moving towards to KS rate review which is a major execution item for FY23. We also note KCC legislation moving the commission to an elected vs. appointed commission is a cautious data-point to watch. We're not expecting material increases in CapEx given KS rate review, with more to come in the IRP filing later this year.

  Valuation, TP and risks: We leave our TP unchanged, and continue to apply a 10% discount to the name on account of the slightly unfavorable regulatory jurisdictions the company operates in, specifically KS. We leave our EPS ests unchanged as well. Risks: inflation, better/worse than expected regulatory outcomes, climate change.

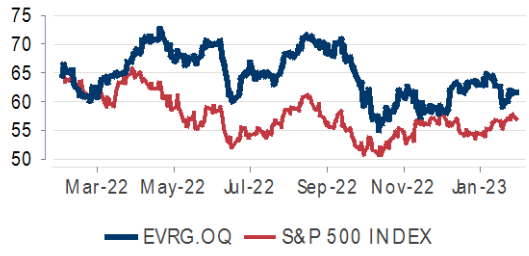
Company Background

Evergy, Inc. provides electricity generation, transmission and distribution services principally through it's Missouri and Kansas utility operating companies.

Blue/Grey Sky Scenario



Our Blue Sky Scenario (US$) **62.00**

Blue Sky Scenario ($62): Our Blue Sky scenario contemplates a 15.8x P/E, which is a ~3% P/E discount. Our Blue Sky scenario could be achieved if EVRG delivers more capex in the five-year window than we/Street expect; if management is able to earn ROEs materially north of the current allowed ROE; or if new legislation is introduced that materially changes the Missouri/Kansas regulatory framework in a positive way.

Our Grey Sky Scenario (US$) **(from 53.00) 52.00**

Grey Sky Scenario ($52): Our Grey Sky scenario contemplates a 13.4x consolidated P/E, which could be realized if earned ROEs deteriorate for the electric businesses, or if management has to pare back capital owing to the current inflationary environment. Our Grey Sky could also materialize if EVRG is unable to see constructive outcomes for the MO and KS rate cases.

Investment Considerations

- **Capital plan:** During the 4Q call we expect an update on the company's capital plan. In December the company refreshed the capital plan in KS, which is now ~$6.7Bn from 2022 to 2025 in the state, and the company guiding to ~$10.7Bn of infrastructure investment planned over the same period. We expect the company to roll-forward the capex plan, and to provide capex guidance for 2027 during the call. This could provide incremental growth opportunities but we're not coming into this with high expectations principally due to the pending rate review, and more to come in the April IRP.
- **IRP filing:** We expect management to provide an update on the annual IRP filing, which is currently expected to be filed to the regulator in April 2023. The IRP is expected to incorporate impacts from the IRA, SPP capacity margin requirement recommendations and resource and renewables generation plans. We see this as a positive as it could include significant renewables investment, something that the market has historically favored. Management could provide an update on this filing, reaffirm the timeline and potentially give clarity on the scale/scope of projects expected to be included.
- **KS legislation to move KCC to elected jurisdiction:** During the 4Q call we expect an update on recent legislation in Kansas, HB 2154, which provides for the statewide election of Commissions to the state corporate commission as well as establishes the utilities regulation division in the office of the Attorney General. This bill is in the early innings of the legislative process (introduced January 24, referred to Committee on Energy, Utes, & Telcos Jan 24th). We see this as something worth mentioning as it could have outsized impacts to future rate reviews in the state. In general, elected vs. appointed commissioners are seen as more consumer focused given their platforms to be elected, and we view this as cautious to EVRG shares, especially given past rhetoric in Kansas from industrials surrounding rates.
- **Large Delta to EPS estimates still exists:** We're materially below street estimates 3-8% in the outyears as we continue to see 4-5% rate base growth against the 6-8% long term EPS CAGR. This is a significant delta where we expect incremental capital to partially help the issue, though we see the long term CAGR somewhat challenged by interest rate headwinds among other items.

4Q EPS Walk

- **Drivers:** We see a $0.35/sh 4Q22 vs. $0.18/sh Consensus (FS) and $0.16/sh 4Q21. The above consensus figure is largely due to a stale figure. For 4Q22 we see $0.10/sh pick-up from weather and $0.04/sh from tax timing, both positives for the quarter. Additionally, we see $0.03/sh pick-up from retail demand (of ~1.5%). For 4Q we see $0.03/sh drag from depreciation expense, $0.03/sh drag from interest expense and $0.01/sh drag from Sibley via the return on going away.

Valuation: Leaving $57 TP Unchanged

We leave our $57 TP unchanged and continue to apply a 10% discount to the name on account of the slightly unfavorable regulatory jurisdictions the company operates in, specifically KS.

FirstEnergy

FY23 Preview: Year of Regulatory and Strategic Execution; Outperform

FE

Target price (12M, US$) 43.00

Outperform

Electric Utilities

We are reviewing and updating investment drivers for FE going into '23. We expect the company to provide '23 guidance and refreshed capital plan during 4Q call after a favorable '22 execution year, recalling mgmt. re-affirmed '22 guidance ($2.30-$2.50) at 3Q with top half of the range expectation. We see weaker-than-Consensus '23 EPS driven by our conservative view on pension, assuming net 15c drag and the risk of FE carrying lower pension asset base going forward which affects future growth rate. FE slightly outperformed UTY in '22 (+1.7% vs. -1.3%) as the stock has been benefiting from the execution of the FE forward plan (cost cut and refinancing) while at the same time going through executive transition and strategic sales process, adding uncertainties for shares going into '23 with large regulatory items to execute. Upside narrowed since our last update. We maintain our OP rating on shares.

- **'23 Walk; Reflecting YE pension and offsets; Expect announcement on strategic initiatives:** We cut 2023 EPS to $2.42, now reflecting our '23 number with full impact from the 15c net pension drag, despite the market rebound since 3Q, though we acknowledge additional offsets (Signal peak) could translate to a more favorable number. Balance sheet improvement should be fueled by contemplated T&D asset sales (we still see higher likelihood to re-apply the FET playbook) proceeds ($3.5bn) in the new year albeit slight headwind in M&A due to higher cost of capital. New CEO should provide a new start for leadership team, but this is likely to come around the 4Q call or after with the NCI sale more an immediate focus. Sentiment has shifted negative for shares on the potential for a recast in LT EPS growth, but we note our /consensus estimates are already at the low end of what 6-8% EPS growth would imply on a year-to-year basis.
- **Valuation, TP & EPS Estimates:** Our TP is raised to $43 from $39, driven by MtM of group multiple. Our EPS estimates is revised down by 15c/10/c/8c/4c for '23/'24/'25/'26, reflecting pension headwind for '23 and likelihood for company to incorporate such into the following years' budgeting and forecast. We continue to assign a 20% discount to Ohio utilities and 10% discount to other T&D utilities and parent, as we continue to see noise related to the Ohio legacy claims and uncertainties, but much of this is priced in in our view. FET is valued with a 15% premium reflecting formulaic recovery. Risks: Regulatory execution, inflation, pension.

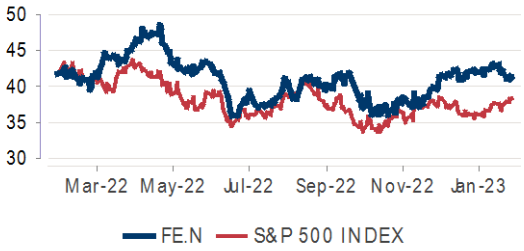
Company Background

FirstEnergy Corp is a public utility holding company with electric T&D assets across the Untied States.

Blue/Grey Sky Scenario



Our Blue Sky Scenario (US$) **(from 42.00) 46.00**

Our Blue Sky scenario contemplates an 17.4x 2024E P/E, which could be achieved if: (1) FE achieves a better-than-expected base rate filing outcome and successfully manages Ohio-related audits and investigations, managing ROE close to authorized level without significant under earnings; (2) successful execution of its capital investment plan, FET minority sales, and staying disciplined on equity issuance.

Our Grey Sky Scenario (US$) **(from 30.00) 36.00**

Our Grey Sky scenario assumes FE trades at a 13.8x P/E. We think the multiple could be justified if we see any unexpected regulatory outcome associated with any Ohio-related audits, or any unexpected breach to the DPA.

FY23 Preview: On Track for Execution Path Laid Out at Analyst Day; Outperform

NI

Target price (12M, US$) 30.00

Outperform

Gas Utilities

This article is intended for exclusive use of customer with the tracking ID of 10111678

We are reviewing investment drivers for NI going into 4Q22/FY23 and we re-iterate the Outperform rating. On the 4Q call, we expect mgmt. to re-affirm essentially all updated guidance at November 2022 AD, including: 1) $1.50-1.57 EPS guidance for '23; 2) 6-8% EPS annual growth rate (not CAGR) off '23 guidance; 3) 8-10% RAB growth rate along with $15bn capital plan during the '23- '27 timeframe; 4) 14-16% FFO/debt with projected BBB+ credit rating. We expect mgmt. to provide an update on NIPSCO sale where we continue to see the deal could close by '23 YE with no change in perceived timeline. '23 is the first year post current mgmt.'s strategic review and should be a touchstone for the ability to execute and ultimately getting NI back to a premium utility. NI we think is also benefiting from the recent gas price move with keeps us optimistic on executing at the high end of the stated range.

- **Pending NIPSCO sale; Recent gas price movement; Solar execution noise; Regulatory execution:** We expect to get more colors on the transaction as the process officially commences during 1Q23 and we see possible public announcement by mid-year and deal close by YE. Transaction multiple would be the focus given the interest rate environment, but we remain relatively optimistic regarding valuation that could be achieved. LDCs have been riding a more volatile gas strip lately and note that NI is 70% hedged for its gas customer and gas cost has been up 40% YoY, while the commodity component of customer bill has been around 38% in '21. Clearly in '22 we should expect a higher percentage given higher gas cost and we look for mgmt. comment on bill inflation and related mitigants. In terms of solar execution, we believe NI is on track. We are still being watchful for the pending OH and IN electric rate case where we should see OH rate outcome by end of first quarter and final order for NIPSCO by July. For NIPSCO, we see the intervenor 's recommendation ($246mm vs. $292mm ask) in January as a good starting point, albeit 9.2% ROE and 49.26% equity layer is lower than 10.4%/51.63% ask. Any potential delay in OH rate order could hurt earnings, but the impact relatively flat to any specific month given the rate structure in OH.
- **Valuation, EPS Ests & Risks:** We are tweaking TP from $27 to $30 due to MtM. We maintain the 5% multiple premium, reflecting conservative view on cost recovery. We raised '22 EPS by 2c, as we believe NI should execute close to guided midpoint. Other moves due to share price change. Risks: strategy execution, inflation, regulatory risk.

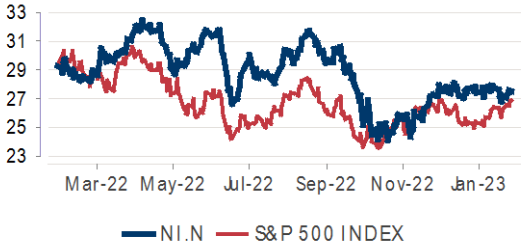
Company Background

NiSource (NI) is a gas & electric utility holding company.

Blue/Grey Sky Scenario



Our Blue Sky Scenario (US$) **(from 29.00) 32.00**

Our Blue Sky scenario contemplates a 19.2x blended 2024E P/E multiple, which could be achieved if: (1) NI raises capex above Street/our expectations; (2) management decides to pursue a go-private; or (3) NI raises 2022E EPS above consensus/our estimates and rebases the LT EPS CAGR higher.

Our Grey Sky Scenario (US$) **(from 24.00) 27.00**

Our Grey Sky scenario contemplates a 16.2x blended 2024E P/E multiple, which could be realized if: (1) solar projects in NI's generation transition plan are delayed; (2) if management is unable to hit the midpoint of its stated EPS targets in 2022 or beyond; or (3) if management receives less constructive rate case outcomes than we expect.

Neutral

Electric Utilities

This article is intended for the sole use of customer with the trading ID of 10111678

We are providing our 4Q EPS preview for OGE and reaffirming our Neutral rating on the name. During the 4Q call we expect the company to reaffirm its 5-7% LT EPS CAGR, and provide FY '23 EPS guidance where we expect $2.03 (CSe) vs. Consensus of $2.04 (FS). Growth guidance for the utility is based off the original 2021 EPS guidance midpoint of $1.81/sh. implying a FY23 range of $2.00 to $2.07/sh. The new guidance is presumably moving towards a UP&O outlook as OGE has officially divested midstream earnings. Our new 2023 estimate is comprised of $2.06 of Utility EPS and -$0.03 of parent drag. Recall that OGE updated FY22 EPS guidance range of $2.08 to $2.12/sh during the 3Q call. During the 4Q call we expect load growth guidance for the service territory given load is a large part of the company's story, with the company currently guiding to 2023 load growth to exceed 1%, as well as an updated capital plan, where we still think it may be too soon to reflect forward capacity considerations in the forecast. Maintain Neutral on valuation.

OK rate case settlement: OGE saw a settlement for the electric rate case in OK in September 2022, which included a $30Mn rate increase, 9.5% ROE and 53.37% equity layer vs the company's ask of $163.5Mn rate increase, 10.2% ROE and 53.37% equity layer. In addition to the rate increase, the company also was able to get approval to extend the grid enhancement mechanism in the state which allows the company to add $6Mn of investment in '23, and another $6Mn/yr in '24 and '25. We look for incremental updates on rate case strategy for OK on the 4Q call where mgmt has yet to detail rate filing strategy, but we see a pre-approval path for generation additions as more likely.

- Valuation, TP and risks: We increase our TP to $38 from $36 and roll forward our SOTP valuation to apply the small cap electric peer group multiple to 2025E EPS. We continue to apply a 5% premium to the name on account of limited rate case risk in the service territory. We move our EPS estimates lower in 2023+ to account for higher parent drag and our FY23 walk considerations. Risks: climate change, inflation, better/worse than expected regulatory outcomes.

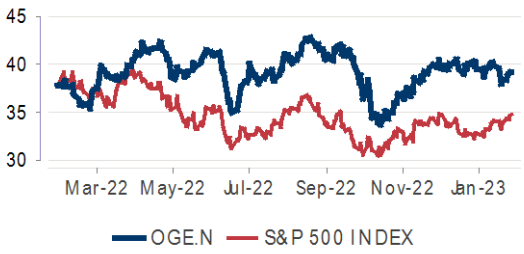
Company Background

OGE Energy Corp generates transmits and distributes electricity to wholesale and retail customers in Oklahoma and Western Arkansas.

Blue/Grey Sky Scenario



Our Blue Sky Scenario (US$) **(from 38.00) 41.00**

Our Blue Sky scenario contemplates an 17.2x 2025E P/E, which could be achieved if: (1) growth in the jurisdiction continues at the current pace with no further decreases in guidance; (2) the sale of the ET assets occurs without hiccups and the company is able to use the proceeds to de-lever its operating company; and (3) the IRP is approved and solar panel supply chains are not a major factor for the renewable build out.

Our Grey Sky Scenario (US$) **(from 33.00) 35.00**

Our Grey Sky scenario assumes OGE trades at a 14.8x P/E, or a 10.8% discount. We think the market would likely return to a discounted view on the stock if management fails to properly execute on renewable energy plan and T&D upgrades that allow the company to meet rapidly growing demand, if the IRP plan is significantly reduced/revised downward, and if regulatory environment in Oklahoma becomes unfavorable.

Share price performance

On 27-Jan-2023 the S&P 500 INDEX closed at 4070.56
Daily Jan31, 2022 - Jan27, 2023, 01/31/22 = US$37.92

This article is intended for the sole use of customer with the tracking ID of 10111670

Investment Considerations

- **AR annual formula rate filing:** During the 4Q call we expect an update on the currently outstanding AR formula rate filing, where the company initially asked for a rate increase of $13.2 Mn, later revising the requested increase to $8.5Mn. Staff currently recommends a $9.6Mn increase, something we view as a positive as it is indicative of the potential for a favorable regulatory outcome for the company. Rates are expected to be in effect April 1. Additionally, on January 20 the AR Commission ordered in favor of the company, granting OGE the ability to file for rate increases via the formula rate filing two additional times, something that saw pushback from stakeholders in the past. We view this as another positive for the name in AR and see it as potentially leading to future rate increases in the future.
- **OK pre-approval:** The company does not currently have any pending legislation in OK, however is currently guiding to potentially seeking pre-approval for upcoming generation investments in the state. Although currently not a concrete plan, pre-approval could lead to a smoother transition as the company invests in renewable assets in the service territory. The company is expecting to file for pre-approval of the generation assets in 4Q23. OGE is currently guiding to no rate case activity in 2023, but we could see guidance from management on what plan are for filing in 2024.

FY23 EPS Walk

- **Drivers:** We see a $2.03/sh FY23 vs. $2.04/sh Consensus (FS) and $2.10/sh FY22 (implied midpoint of FY '22 guidance). We see $0.03/sh pick-ups from new rates in AR effective April first 2022 and grid enhancements in OK. Additionally, we see a $0.09/sh drag from depreciation, $0.04/sh drag from interest expense and a $0.08/sh drag from parent holdco debt paydown. We expect further clarity on FY23 EPS during the 4Q call.

PG&E Corporation

4Q Preview; Looking to Rate Case and Clarity on Diablo Canyon; Outperform

PCG

Target price (12M, US$) 18.00

Outperform

Electric Utilities

We provide our 4Q preview for PCG and reiterate our Outperform rating on the stock. PCG remains a strong opportunity in the space given the deep discount on the name with the current 2025E EPS P/E premium of 10.8x vs. 16.2x average for the large-cap electric peer group. We see PCG as an opportunity given the name has historically seen headwinds related to wildfire risk and we see that as the risk subsides via wildfire mitigation tactics, as well as mgmt execution on sector high EPS growth of 9-10% EPS, multiples are likely to expand. Recall that during the 3Q call management provided FY '22 EPS guidance of $1.09 - $1.11/sh, as well as FY '23 EPS guidance of $1.19 - $1.23/sh. We expect management to reaffirm current LT EPS growth guidance of 10% from '22 to '26 as well as near term financial targets.

- **Wildfire mitigation, '23 GRC & More:** During the 4Q call we expect an update on the company's plan and timeline for wildfire mitigation tactics to reduce risk to the service territory. The company is engaged in certain tactics right now such as inspection of assets and vegetation management, as well as plans for undergrounding certain power lines in high-risk areas via SB 884 which was signed into law in September 2022. The bill includes a 10yr LT undergrounding plan with an 18-month expedited review, with some cost recovery to be approved in a 4yr GRC cycle. We're also expecting an update on the '23 GRC as PCG filed briefs during the quarter adjusting the revenue requirement. Lastly, we look for an update on the dividend reinstatement timeline (mid-year target), Diablo Canyon NRC approval, storm impacts from the start of January as well as an updated scorecard for FY22 execution. All in, we expect PCG to remain on track with its core plan outlined this time last year.
- **Valuation, TP and risks:** We increase our TP to $18 from $17 on account of slightly higher electric and gas peer group multiples. We continue to apply a 25% discount to electric GRC earnings, 15% discount to GT&S earnings and 5% discount to transmission on account of wildfire risk in the area. We increase our '22 EPS est by 2c, leave our '23 and '24 ests unchanged, and increase our '25 and '26 ests by 1c. Risks: wildfire, climate change, inflation.

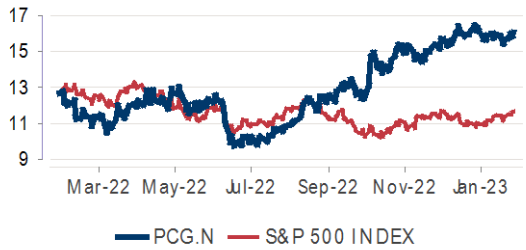
Company Background

PG&E Corporation is a utility holding company. The company holds interests in a public utility operating in northern and central California that provides electric and gas distribution, generation, procurement and transmission services.

Blue/Grey Sky Scenario



Our Blue Sky Scenario (US$) **(from 22.00) 23.00**

Our Blue Sky scenario contemplates a 16.0x 2024E P/E, which could be achieved if PCG is able to execute on the high end of its proposed capital spending ($10Bn/yr), if management is able to obtain better-than-expected outcomes on current CPUC proposals, or if investor attitudes on wildfire risk significantly improve. We see most investors already approaching CA with a 20%+ discount and think that can only improve with time.

Our Grey Sky Scenario (US$) **(from 11.00) 12.00**

Our Grey Sky scenario assumes PCG trades at a 8.3x P/E, which could happen if the wildfire recovery framework deteriorates in CA, if mgmt. sees new liabilities crop up in subrogation claims for prior fires or new fires, or if management fails to properly receive constructive outcomes in the 2023 GRC, cost-of-capital proceeding, or rate-neutral securitization. We also include a $10Bn wildfire liability (pre-tax) in our downside case

Share price performance

Investment Considerations

- **Victims fire trust:** The FVT continues to scale down its position, and as of January 2023 owns ~187Mn shares of PCG stock, which makes it PCG's fourth-largest shareholder (~9.5% ownership). On January 11 the FVT announced a pro-rata payment increase to 60% from 45% effective January 31 which could potentially increase the cadence of the sale of assets.
- **Electric rate case:** PCG is currently amidst a rate case for the electric business which was filed in September 2021 with the company asking for a total rate increase of $3.239Bn from 2022 to 2026, with staff recommending in November a total rate increase of $689Mn over the same time. PCG responded with a revised request that included a $4.263Bn total multi-year rate increase which includes an increase of $3.17Bn for electric generation and distribution revenues in the 2023 test year, followed by a $518Mn rate increase in 2024, $391Mn increase in 2025 and $184Mn increase in 2026. We expect an update on the 4Q call regarding confidence level to achieve a constructive outcome for this rate case, as well as a potential timeline for next steps post briefs. We think a settlement is unlikely at this point.
- **Gas distribution rate case:** In June 2021 PCG filed for a multi-year rate plan for the natural gas business, which included an original total increase in rates of $2.223Bn from 2023 to 2026 for gas distribution and gas transmission and storage investments. In November, staff recommended a $469Mn rate increase over the same period, with PCG responding with a revised request of $2.291Bn. We see this as a slightly cautious data point for the company given the large delta between asks and that CA is historically a challenging regulatory environment.
- **Diablo Canyon**: We expect an update on Diablo Canyon during the 4Q call after recent news that the NRC declined PCG's request to resume the review of the license renewal application to delay the closure of the nuclear plant. In a letter from the NRC regarding the issue the organization cites that resuming the review of the withdrawn application would be inconsistent with regulation and that a review cannot be conducted until PCG submits additional information on the plant in its current state, among other things. In October, PCG requested to extend the closure date of the power plant which is currently scheduled to be retired in 2024 and 2025. We see this as a slightly cautious data point as it brings uncertainty to the timeline. Per the NRC letter, PCG has stated that they will provide an updated application with updated information by the end of 2023.
- **Cost of capital:** During the 4Q call we expect a potential update from management on CoC. CA utilities are subject to an annual CoC adjustment mechanism where any year where the difference between 1) the benchmark, which is the average of each month of daily averages for the past 12 months (from October 1, 2021, to September 30, 2022) of the Moody's Baa Utility Bond Index; and 2) the index, which is the rolling average of daily yield for the current 12 months of the Moody's Baa Utility Bond Index (from October 1, 2022, to September 30, 2023) exceeds 100bps from the midpoint of the benchmark, the utility's ROE would increase/decrease by 50% of the difference. The benchmark is currently 4.37% and as of January 19 the index is 5.83%, as of January 27. For example purposes, if the end of the period saw these same figures the dead band would trigger and PCG's ROE would increase by ~75bps to ~10.8%. When the dead band is triggered, the company's cost of debt and preferred is refreshed to equal the most recently recorded levels for forecasted debt issuance and forecasted interest rates for the next 12 months. Additionally, should the dead band be triggered, both the benchmark and dead band reset. We view this as a positive for the stock as it allows for cost of capital and ROE to keep pace with current market conditions with relatively minimal lag, and should current trends continue PCG could see an increase, though we see this more as creating future 'flex' for 2024-2025 considerations.

4Q EPS Walk

- **Drivers:** We see a $0.29/sh 4Q22 vs. $0.28/sh Consensus (FS) and $0.29/sh 4Q21. The above consensus estimate is partially due to a stale figure. For 4Q22 we see a $0.03/sh pick-up from rate base growth and $0.02/sh pick-up from tax timing. Additionally, we see a $0.02/sh drag from dilution, and $0.01/sh drag from cost reductions.

Valuation: TP to $18 from $17

We increase our TP to $18 from $17 on account of slightly higher electric and gas peer group multiples. We continue to apply a 25% discount to electric GRC earnings, 15% discount to GT&S earnings and 5% discount to transmission on account of wildfire risk in the area.

PPL Corporation

Expecting a Quiet 4Q Post Investor Update; Reiterate Outperform

PPL

Target price (12M, US$) 30.00

Outperform

Electric Utilities

We are providing our 4Q preview for PPL and reiterating our Outperform rating on the stock. PPL remains a strong name in the space with a robust catalyst path coming off the May 2022 Narragansett Electric acquisition. With the recent investor update on January 11 we do not see much in terms of incremental updates during the 4Q call, but are focused on the execution of the plan and expect management to reaffirm all metrics in-line with current guidance.

- **Investor update:** PPL provided a comprehensive update for investors on January 11 with the key takeaways being extension of 6-8% LT EPS growth guidance through 2026 (from 2025), incremental capex increases of $2.5Bn for generation replacement and transmission investments and incremental O&M savings forecast of $25Mn through 2026. We see this update as a positive for the company as it reiterates PPL's robust catalyst path.
- **Valuation, TP and risks:** We decrease our TP to $30 from $32 on account of a lower large-cap electric peer group multiple and continue to apply a 10% premium to the PA segment on account of the favorable regulatory environment in the state, and a 5% discount to the LU & KU. We decrease our '22 EPS est by 2c, keep '23 est unchanged, decrease '24 est by 2c, '25 est by 3c and '26 est by 2c. Risks: Better/worse than expected regulatory outcomes, inflation, climate change.

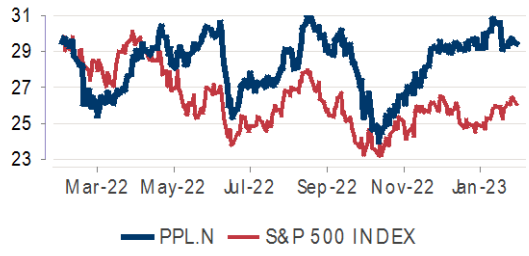
Company Background

PPL Corporation is an energy and utility holding company. The company operates vertically integrated utilities in Kentucky, and transmission utilities in PA.

Blue/Grey Sky Scenario



Our Blue Sky Scenario (US$) **(from 35.00) 33.00**

Blue Sky Scenario ($33): Our Blue Sky scenario contemplates a 18.5x 2025E P/E multiple, which could be achieved if: (1) cash flows associated with recent Narragansett acquisition allow for sustained increase in dividends; (2) Kentucky coal retirement and renewable build-out continues at the current pace with the current recovery mechanisms; 3) The recent business plan is realized to the fullest extent such as new O&M and capex guidance.

Our Grey Sky Scenario (US$) **(from 29.00) 27.00**

Grey Sky Scenario ($27): Our Grey Sky scenario assumes PPL trades at a 15.2x P/E multiple, or a 8.3% discount to the group regulated multiple. We think the market may return to a discounted view of the company if management fails to execute on its incremental growth strategies of AMI and renewable projects or is unable to reach its O&M reduction targets.

Share price performance

On 30-Jan-2023 the S&P 500 INDEX closed at 4017.77
Daily Jan31, 2022 - Jan30, 2023, 01/31/22 = US$29.68

This article is intended for the sole use of customer with the tracking ID of 1011107

Valuation: TP to $30 from $32

We decrease our TP to $30 from $32 on account of a lower large-cap electric peer group multiple and continue to apply a 10% premium to the PA segment on account of the favorable regulatory environment in the state, and a 5% discount to the LU & KU segments because of slightly less favorable regulatory environments. See our report on the investor update here.

WEC Energy Group

4Q Preview: Battling Declining Rhetoric in WI; Underperform

WEC

Target price (12M, US$) 94.00

Underperform

Multi Utilities

We are providing our 4Q EPS preview for WEC and reiterating our Underperform rating on the stock. WEC remains a strong name in the space, however given the current P/E premium the company trades at (17.8x 2025E vs. 16.7x electric peer group average) we see limited upside potential in the current environment. Management gave 4Q22 EPS guidance of $0.73-$0.75/sh, and we expect management to reaffirm current LT EPS growth CAGR guidance of 6.5%-7% during the 4Q call. Management provided FY22 EPS guidance of $4.38-$4.40. Current FY23 guidance is $4.58-$4.62/sh, a 6.7% growth rate from the original FY22 guidance midpoint. During the call we expect an update on the $5.4Bn regulated renewable investment plan, as well as views on the WI jurisdiction following the successful settlement approval in the WI rate cases, given general investor focus here. WEC's fundamentals are sound, but we remain concerned on asset mix and WI commission perceptions among other items which can pressure the premium multiple.

- **Focus is on WI Commission:** Given WI has had a historically strong regulatory construct we see strong financial outcomes for WI utilities, but also see continually declining rhetoric. We recently caught up with Commissioners, with several key takeaways. Discussions noted a focus on rates over returns with some willingness to moderate ROEs over time. Overall, we see our conversations with the Commissioners as mixed for the jurisdiction with more data-points to play out through 2023 in the Wisconsin rate reviews for peers LNT & XEL.
- **Valuation, TP shift and risks:** We shift our TP to $94 from $93 for slightly higher ROE assumptions at ATC. We apply 10% premium to WEC given the historically strong reg outcomes in WI. We increase our '22 est by 1c, decrease our '23 est by 1c, decrease '24 est by 2c and decrease our '25 and '26 est by 1c. Risks: Better/worse than expected reg outcomes, inflation, supply chain.

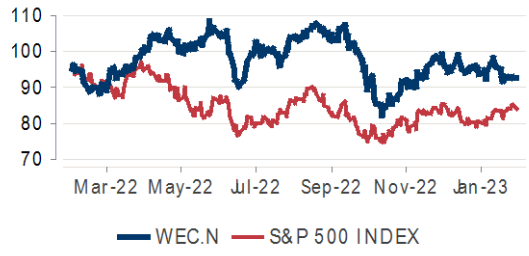
Company Background

WEC Energy Group, Inc. operates as an electric and natural gas holding company. The company manages and operates regulated utilities across Wisconsin, Illinois, Michigan, and Minnesota.

Blue/Grey Sky Scenario



Our Blue Sky Scenario (US$) **(from 99.00) 100.00**

Blue Sky Scenario ($100): Our Blue Sky scenario contemplates a 19.0x 2025E P/E, which could be achieved if: (1) the Wisconsin rate case achieves a favorable outcome; (2) the ROE adder is replaced by a comparable incentive for renewables; (3) the renewable projects do not face any further delays; and (4) population growth in the Midwest, namely Wisconsin, continues to grow at a strong rate.

Our Grey Sky Scenario (US$) **87.00**

Grey Sky Scenario ($87): Our Grey Sky scenario assumes WEC trades at a 16.6x P/E, or a ~6% discount. We think the market would likely return to a discounted view on the stock if management is unable to control O&M expenses and customer bills, the rate case outcome is less than ideal and the allowed ROE is left at a low level for the two-year period, and if there are significant delays on the renewables project.

Share price performance

Investment Considerations

- **ATC adder update:** FERC is currently amidst the process of disallowing the 50bp adder associated with certain transmission lines. On April 15 a Notice of Proposed Rule Making was filed at FERC, where WEC indicated the expectation of the adder being absolved. The current ATC subsidiary has an ROE of 10.38% (inclusive of the adder), which is likely to see a 50bp decline to 9.88%. WEC previously did not include this adder in the forecast but now is including it once more.
- **2023-2027 $5.4Bn regulated renewable plan:** During the call we expect an update on the company's current regulated renewable plan, which currently includes building and owning ~3,300MW of solar, battery and wind assets. We view this as a key potential update as the company moves away from fossil-fuel generation and into renewable energy, something the market has historically favored. With WEC currently guiding to only using coal-fired assets as reliability hedges by 2030. We see the spending cadence and specifics of this renewable plan as a key data point to the story for the stock, in our view, and expect an update on the cadence during the 4Q call.
- **IL natural gas rate case:** During the 4Q call we also expect an update on the IL natural gas rate cases, which were both filed in January. The North Shore rate case includes a $18.7Mn rate increase, 9.9% ROE and 54% equity ratio, and the People's Gas rate case includes a $194.7Mn rate increase, 9.9% ROE and 54% equity ratio. Given these cases were filed recently, we could expect commentary on the timeline for resolution of these cases during the call, as well as an indication of confidence level from the company on a constructive outcome.

Valuation: TP tweaked to $94

We increase our TP to $94 from $93 on account of a slightly higher electric group multiple. We maintain a 10% premium on the name on account of the historically strong regulatory construct in WI.

Valuation Methodology and Risks

Target Price and Rating
Valuation Methodology and Risks: (12 months) for AEP Inc (AEP.OQ)

Method: We value AEP using an SOTP methodology and our target price is $97. We apply the electric group's 17.2x P/E multiple to all subsidiaries while applying a 15% multiple premium to AEP TransCo, reflecting formulaic/timely recovery in FERC jurisdictions. For the unregulated power generation business, we apply a 15% discount given there's less earnings visibility and AEP is transitioning to a more regulated growth strategy. We also apply 5% discount to all VIUs and revised TX multiple to neutral. We currently have zero EPS contribution from Kentucky Power under a base-case assumption. We rate AEP Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to our Outperform rating and $97 target price include: (1) any non-constructive regulatory decision for renewable capital spending recovery; (2) untimely execution of the Kentucky sale or unfavorable valuation applied to contracted renewable sales; (3) aggressive coal retirement programs could increase stranded asset risk given AEP's vision to retire an additional 5GW of coal generation by 2028.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for AES Corp (AES.N)

Method: Our target price is $30 and is based on a SOTP analysis. We value the consolidated AES operation using a P/E method with a historical five-year average P/E multiple (13.5x) and projected 2023 EPS. For the Fluence stake, we derive AES's proportional equity value using Fluence's current market value and AES's 34% ownership. We value AES's DevCo business using an NPV approach by discounting to FCF to equity holders with a 11% discount rate. We rate AES Neutral as we expect the stock's total return to be in line with peers over the next 12 months.

Risk: Risks to achieving our $30 target price and Neutral rating include: (1) unexpected negative regulatory outcome in the US; (2) negative impact to AES's valuation owing to exposure to Fluence ownership; and (3) currency and political risks associated with AES's international business segments. Upside risk includes a better than expected rate outcome.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Atmos Energy (ATO.N)

Method: We value ATO on a sum of the parts with a $131 target price. We apply relative P/E premiums/discounts to the regulated gas group multiple of 16.2x. At the distribution business, we apply a 15% premium. We think this is justified given ATO's best-in-class jurisdictions, continued constructive treatment in the regulatory arena, and management's conservative planning assumptions. At the Pipelines segment, we apply a 10% premium, lower than 15% to handicap for the unregulated nature of the RRC pipes. That said, we see the contracts offering utility-like returns with long-term contracts in place with all of ATO's LDCs. Our base-case scenario contemplates a 17.0x consolidated P/E, which is slightly lower the company's five-year historical average of 19.5x. We rate ATO Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to our Outperform rating and $131 target price include: Common equity funding that is not contemplated in our base-case, Blue Sky, or Grey Sky scenarios could adversely affect our estimates. Gas is a highly combustible molecule. Pipeline leaks and explosions are risks of operating a gas distribution system, and any explosion/leak events could have a material adverse effect on ATO's multiple. ATO is subject to federal and state regulations, principally through rate regulatory proceedings. Failure to execute in the regulatory arena would inhibit shares from reaching our target price.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Consolidated Edison (ED.N)

Method: Our target price is $95: We value ED on an SOTP approach. The company historically has had a challenging time earning its allowed ROE in the state, and we see an 9.2% authorized ROE as one of the lowest in the country. We are including a post-transaction NI of $1,666Mn for CEB sale given there is now a clear valuation/proceeds amount. We rate ED Neutral as we expect the stock's total return to be in line with peers over the next 12 months.

Risk: Risks to achieving our $95 target price and Neutral rating include: Common equity funding that is not contemplated in our base-case, Blue Sky, or Grey Sky scenarios. Failure to establish new rates at CECONY, which could lead investors to take a discounted view on ED's largest earnings contributor. Natural disaster risk, which could accelerate liabilities surrounding the NYC distribution system. EDs natural gas system is subject to greater operational risk given gas is a combustible molecule. NY is increasingly focused on electrification, which increases stranded assert risk associated with ED's LDC system. Upside risk includes a better than expected rate case outcome.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Constellation Energy (CEG.N)

This article is intended for the sole use of the customer with the tracking ID 20211678

Method: Our target price of $91 is based on an SOTP approach for Outperform-rated CEG. We use an EV/EBITDA approach based on forecasted 2023 EBITDA and current trading multiple of 10.5x. We apply a 25% multiple premium to contracted EBITDA, as it reflects more stable cash flow through timely hedging over market for customers. We do not assign any multiple adjustment to the merchant portion of EBITDA as it is a commodity business. Our valuation also reflects our favorable view on CEG's generation fleet, which consists of 65% nuclear generation that benefits from the passage of IRA. We subtract net debt from enterprise value to derive equity value. We use an NPV approach to value ZEC/CMC revenue with 5% discount, reflecting reduced risk given its quasi-regulated nature.

Risk: Our $91 target price and Outperform rating could be affected by (1) unexpected/unfavorable power market price movement and increased volatility; (2) increased competition among competitive energy suppliers, which puts CEG's competitive position at risk; (3) IRA implementation not as favorable as expected, including tax provisions; and (4) undisciplined execution on ratable hedging program which amplifies discretionary risk.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for DTE Energy (DTE.N)

Method: We value DTE using an SOTP, applying 12.5% P/E premiums to both the electric (18.2x) and gas (18.0x) subsidiary, which yields a $131 target price. We hold a discounted view on Trading (-30% discount), given these are non-core businesses and contain higher earnings volatility. We rate DTE Outperform as we expect the stock's total return to be above peers over the next 12 months.

Risk: Risks to our Outperform rating and $131 target price include: The uncertainties around timely recovery cost through base rate increase. The unregulated business earning is more susceptible to economic and industry cycles, with potential upside/downside.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Duke Energy (DUK.N)

Method: We value DUK using an SOTP, applying relative P/E premiums/discounts to the various operating subsidiaries, which yields a $106 target price. In general, we view Florida as a premium jurisdiction given numerous constrictive mechanisms for real-time capital recovery. We take a premium view on DEI (5% premium), which we flag as conservative given DUK has proven it can monetize this sub for 27.7x most recently with the announced minority sale to GIC. We take a discounted view on the commercial renewables segment given broad supply chain/inflation concerns and high proportion of HLBV income, which we believe are low-quality, non-cash earnings. We rate DUK Neutral as we see total return in-line with peers over the next 12 months.

Risk: Risks to our Neutral rating and $106 target price include: common equity funding that is not contemplated in our base-case, Blue Sky, or Grey Sky scenarios. Failure to establish new rates at DEC/DEP, which could lead investors to take a discounted view on DUK's largest earnings contributor. Natural disaster risk, which could accelerate liabilities at DUK's numerous coal ash ponds or nuclear facilities. Climate change and increased regulation on GHG emissions could accelerate closure of certain fossil investments, which would increase stranded asset risks to shares. Lastly, Federal legislation, such as change in tax policy, could negatively impact CFO for DUK.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Edison International (EIX.N)

Method: We value Neutral-rated EIX using an SOTP to determine our $68 target price, applying relative P/E premiums/discounts to the various operating subsidiaries. In general, we view California as a discount jurisdiction, with wildfire risk persistent throughout the state. We apply a 20% discount to the Electric GRC earnings and a 10% discount to the Transmission earnings, largely because of the risk of wildfires and related capital recovery proceedings. We adjust our SOTP for current and ongoing liabilities, principally (1) a $1Bn wildfire liability, offset by $1Bn of aggregate insurance, ongoing wildfire fund contributions of $95Mn/year discounted at a 9.5% IRR, and (2) remaining legacy wildfire claims of $900Mn assuming EIX foregoes cost of debt recovery on the remaining claims.

Risk: Risks to achieve our $68 target and Neutral rating include the company seeing delays in both the covered conductor installation and capital recovery, seeing increased wildfire activity in the coming years, and seeing a faster-than-expected recovery of costs associated with the '17/'18 natural disasters.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Entergy Corporation (ETR.N)

Method: Our target price Is $115: We value ETR on a P/E approach using the 2024E multiple of 14.9x on our 2024E EPS, a 5% discount to the 16.2x electric peer group multiple. We ascribe a P/E discount given the increasingly cautious reg environment in LA, particularly going into the LA securitization hearing. Overall, given the capex opportunity in electrifying the Gulf Coast we see ETR as attractive on this base-case discount approach. We rate ETR Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to achieving our Outperform rating and $115 target price include: Failure to obtain constructive outcomes in regulatory proceedings, failure to execute on the company's proposed securitizations, natural disasters, labor/inflationary pressures above

This article is intended for the sole use of the customer with the tracking ID of 10...

management's current O&M trajectory. Climate change is a risk to the extent federal or state legislatures implement more restrictions on GHG emissions than expected, or if there are increased hurricanes in the Gulf Coast this season. A worse-than-contemplated hurricane season could inhibit ETR from reaching our target price.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Evergy (EVRG.OQ)

Method: Our target price is $57: We value EVRG on a P/E approach using the 2025E group multiple of 16.2x, applying a 10% discount to the business on account of the average to below-average jurisdictions EVRG operates in, specifically Kansas. We see EVRG as a company with a strong management team, however, could see hurdles within the current regulatory environment. We rate EVRG Underperform as we expect the stock's total return to underperform peers over the next 12 months.

Risk: Risks to achieving our $57 target price and Underperform rating include: Better than expected regulatory outcomes, strong execution of the company's proposed IRP in MO/KS, natural disasters, labor/inflationary pressures above/below management's current O&M trajectory. Climate change is a risk to the extent federal or state legislatures implement more restrictions on GHG emissions than expected. Commodity volatility can lead to higher bills for customers, and crowd-out growth opportunities, which would inhibit shares from reaching our target price.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Eversource Energy (ES.N)

Method: Our target price is $84: We value ES using an SOTP, applying relative P/E premiums/discounts to the various operating subsidiaries. In general, we view CT, MA, and RI as relatively favorable jurisdictions, although there have been recent conflicts in CT related to performance and penalties. We apply a 5% premium to the natural gas business as ES has a strong track record for operations and earned ROEs. For the Transmission segment, we apply a 5% premium, which is lower than our transmission approach for peer utilities, as we attempt to reflect risk of further ROE cuts to NE transmission operators. We rate ES Neutral as we expect the stock's total return to be in line with peers over the next 12 months.

Risk: Risks to achieving our Neutral rating and $84 target price include: The company seeing further rate pressure from inflation, particularly in CL&P's jurisdiction. Other risks include further downgrade of forecasted ROE for offshore projects or an unfavorable monetization outcome, natural disaster/other issue that could delay wind projects under construction. Given the nature of offshore projects, climate-related issues pose a large risk to the company and its growth plans. Upside risk includes a better than expected rate outcomes.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for FirstEnergy (FE.N)

Method: We value FE using an SOTP, applying relative P/E premiums/discounts to the various operating subsidiaries, which yields a $43 target price. We hold a discounted view on all utilities subsidiaries other than FET (-20% discount to Ohio utilities and 10% discount to the rest of the portfolio), given FE's reputational risk and the upcoming base rate case filings across all jurisdictions, while the transmission company benefits from more constructive FERC regulation with timely and formulaic recovery. We rate FE Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to out Outperform rating and $43 target price include: although the HB6 investigation is behind FE through the DPA, FE carries the reputation risk of a historically challenging organization. Even though the new management team has introduced internal control programs and is re-building the company's compliance culture, we recognize it takes time for a large organization to gradually achieve it.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for NiSource (NI.N)

Method: We value NI on a P/E approach that yields a $30 target price. Our base-case multiple of 18.0x is derived by taking the regulated electric and regulated gas group multiples and applying a weighted-average approach based on NI's rate base mix. We apply a 5% premium to this number to account for: (1) numerous tracking mechanisms in place to realize real-time return on capital; (2) new management, which is taking a refreshed view of the company's operating segments and pushing forward with a strategic review with the goal of creating value; and (3) potential upside to capex that isn't contemplated in our current EPS estimates. Our target price implied P/E multiple is in line to electrics and a premium to gas LDCs. We rate NI Outperform as we expect the stock's total return to be in line with peers over the next 12 months.

Risk: Risks to our Outperform rating and $30 target price include: Increased inflation above NI's cost-control ability, as well as headwinds delaying solar development via supply chain issues. Gas is a combustible molecule, and NI has a history of two separate high-profile explosions in the last 10 years, which could negatively affect the share price. Management also discussed buying and selling assets as part of its new strategy, and we think buying assets could weigh on NI's multiple. Climate change and increased scrutiny on GhG emissions is also a risk given ~70% of NI's rate base is coming from the gas distribution utility.

This analyst is intended for the sole use of Atomic Intel the trading ID 01011670

Target Price and Rating
Valuation Methodology and Risks: (12 months) for OGE Energy (OGE.N)

Method: We value OGE using an SOTP with a $38 target price, applying relative P/E premiums/discounts to the various operating subsidiaries. In general, we view Oklahoma as an average jurisdiction given the strong focus on affordability for customers. We apply a 5% premium to the business given limited rate case risk, IRA positioning, ST growth and CapEx growth not current included in our forecasts. We value OGE on the small-cap multiple given the relatively small operational area and that it is a largely single-state jurisdiction. In our view, the stock is fairly prices on an SOTP basis given the strong catalysts, but there are clear risks to the company. We rate OGE Neutral as we expect the stock's total return to be in line with peers over the next 12 months.

Risk: Risks to our Neutral rating and $38 target price include: common equity funding that is not contemplated in our base-case, Blue Sky, or Grey Sky scenarios. Failure to execute on IRP as planned, supply chain issues related to solar panels or a significant decline in population and load growth could cause the market to take a discounted view on the name. Potential upside from the current rate case filing.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for PG&E Corporation (PCG.N)

Method: Our target price is $18. We value PCG on an SOTP. We apply a 25% discount to our 2024E electric earnings, a 15% discount to gas earnings, and 5% discount to transmission earnings relative to the 2025E electric and gas group P/E multiples. We impute ~$1.0Bn of net wildfire liabilities, which include an additional $1Bn wildfire liability for fires to handicap incremental wildfire event risk. We see ~14% total return for PCG in our base case, which is the above average for our coverage universe. Our target price implies an 12.6x consolidated P/E, a -29% discount, which is still one of the widest across the sector. We rate PCG Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to our Outperform rating and $18 target price include: PCG has a history of having utility assets involved with large wildfires in CA. Additional wildfires in 2022-24 could materially affect our valuation. PCG is subject to environmental factors such as severe weather conditions and climate change, which could increase wildfire events. PCG's higher-than-average debt/capital and lower-than-average FFO/debt, while we forecast improving lower cash flow from rate proceedings or materially adverse rate case outcomes, could drive incremental equity needs or reduce the likelihood of reinstating the dividend.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for PPL Corporation (PPL.N)

Method: Our target price is $30. We value PPL using an SOTP, applying relative P/E premiums/discounts to the various operating subsidiaries. We take a premium view on PA (10% premium, 17.8x multiple), which we flag as conservative given the recent settlement in PA and the favorable storm recovery mechanisms recently utilized. We take a discounted view on LU and KU (5% discount, 15.4x multiple) because of the current stay-out of Kentucky rates and the risk of inflation weighing on customer bills in the years until 2025 when another rate case can be filed. We rate PPL Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to achieving our $30 target price and Outperform rating include: the inability to sustain new dividend and increased growth rate, and the inability to execute fully on the AMI and renewables projects. Increased inflation amid a rate stay-out in Kentucky, as well as headwinds delaying solar development via supply chain issues also pose a threat to the company. Other risks include more natural disasters/storms in Kentucky and Pennsylvania that delay projects and are expensive to repair, as well as climate change and related concerns. Upside risk includes the company cutting O&M expenses more than expected.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for WEC Energy Group (WEC.N)

Method: Our target price is $94: We value WEC using a P/E valuation methodology, applying relative P/E premiums/discounts to the company. In general, we view Wisconsin and much of the Midwest as premium jurisdictions given numerous constructive mechanisms for real-time capital recovery, constructive rate case outcomes, and solid load growth. We take a premium view on WEC (10%), as we believe the company has a relatively limited number of levers that can be pulled to sustain capex growth in near future. Rate case risks appear priced in, although we think quality peers offer more attractive risk/reward skews. We rate WEC Underperform as we expect the stock's total return to be less than peers over the next 12 months.

Risk: Risks to our $94 target price and Underperform include: Declining population growth rate in service territory hurting load demand; the current supply chain issues related to solar panels are resolved in timely manner and Badger Hollow 2 is able to reduce the time of delay; Investor sentiment shifts and companies pursuing renewable projects and other non-core, regulated utility projects are rewarded by investors.

As of December 10, 2012 Analysts' stock rating are defined as follows:

Outperform (O) : The stock's total return is expected to outperform the relevant benchmark* over the next 12 months.

Neutral (N) : The stock's total return is expected to be in line with the relevant benchmark* over the next 12 months.

Underperform (U) : The stock's total return is expected to underperform the relevant benchmark* over the next 12 months.

**Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European (excluding Turkey) ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin America, Turkey and Asia (excluding Japan and Australia), stock ratings are based on a stock's total return relative to the average total return of the relevant country or*

regional benchmark (India - S&P BSE Sensex Index); for China A share the relevant index is the Shanghai Shenzhen CSI 300 (CSI300); prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, the expected total return (ETR) calculation includes 12-month rolling dividend yield. An Outperform rating is assigned where an ETR is greater than or equal to 7.5%; Underperform where an ETR less than or equal to 5%. A Neutral may be assigned where the ETR is between -5% and 15%. The overlapping rating range allows analysts to assign a rating that puts ETR in the context of associated risks. Prior to 18 May 2015, ETR ranges for Outperform and Underperform ratings did not overlap with Neutral thresholds between 15% and 7.5%, which was in operation from 7 July 2011.

Restricted (R) : In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Not Rated (NR) : Credit Suisse Equity Research does not have an investment rating or view on the stock or any other securities related to the company at this time.

Not Covered (NC) : Credit Suisse Equity Research does not provide ongoing coverage of the company or offer an investment rating or investment view on the equity security of the company or related products.

Volatility Indicator [V] : A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector* relative to the group's historic fundamentals and/or valuation:

Overweight : The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

Market Weight : The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

Underweight : The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

**An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	53%	(26% banking clients)
Neutral/Hold*	36%	(22% banking clients)
Underperform/Sell*	10%	(21% banking clients)
Restricted	1%	

Please click here to view the MAR quarterly recommendations and investment services report for fundamental research recommendations.

**For purposes of the NYSE and FINRA ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment.
To the extent any Credit Suisse equity research analyst employed by Credit Suisse International (a "UK Analyst") has interactions with a Spanish domiciled client of Credit Suisse AG or its affiliates, such UK Analyst will be acting for and on behalf of Credit Suisse Bank (Europe), S.A., with respect only to the provision of equity research services to Spanish domiciled clients of Credit Suisse AG or its affiliates.
Pursuant to CVM Resolution No. 20/2021, of February 25, 2021, the author(s) of the report hereby certify(ies) that the views expressed in this report solely and exclusively reflect the personal opinions of the author(s) and have been prepared independently, including with respect to Credit Suisse. Part of the author(s)' compensation is based on various factors, including the total revenues of Credit Suisse, but no part of the compensation has been, is, or will be related to the specific recommendations or views expressed in this report. In addition, Credit Suisse declares that: Credit Suisse has provided, and/or may in the future provide investment banking, brokerage, asset management, commercial banking and other financial services to the subject company/companies or its affiliates, for which they have received or may receive customary fees and commissions, and which constituted or may constitute relevant financial or commercial interests in relation to the subject company/companies or the subject securities.
This research report is authored by:
Credit Suisse Securities (USA) LLC..... Nicholas Campanella ; Fei She, CFA ; Nathan Richardson
There is currently no universal definition or exhaustive list defining the issues or factors that are covered by the concept of "ESG" (Environmental, Social, Governance). If not indicated otherwise, 'ESG' is used interchangeably with the terms 'sustainable' and 'sustainability'. Unless indicated otherwise, the views expressed herein are based on CS' own assumptions and interpretation of ESG at the time of drafting. CS' views on ESG may evolve over time and are subject to change.
Where a sustainability assessment is identified as including elements which track environmental, social or governance (ESG) objectives, CS is, wholly or in part, reliant on third-party sources of information (including, but not limited to, such information produced by the issuing/manufacturing company itself) and external guidance. These sources of information may be limited in terms of accuracy, availability and timeliness. It is possible that the data from ESG data providers may be incorrect, unavailable (e.g., not existing, or absence of look-through), or not fully updated. CS has not sought to independently verify information obtained from public and third-party sources and makes no representations or warranties as to accuracy, completeness or reliability of such information. Additionally, as global laws, guidelines and regulations in relation to the tracking and provision of such data are evolving, all such disclosures are made on a non-reliance basis and are subject to change. Unless required by applicable law, CS is not obliged to provide updates on sustainability assessments. Any updates might be subject to a time lag, due to e.g. lack of available data.
An ESG assessment reflects the opinion of the assessing party (CS or external parties such as rating agencies or other financial institutions). In the absence of a standardized ESG assessment system, each assessing party has its own research and analysis framework/methodology. Therefore, ESG assessment or risk levels given by different assessing parties to the same company can vary. Further, ESG assessment is limited to considering company performance against certain ESG criteria only and does not take into account the other factors needed to assess the value of a company.

This report is produced by subsidiaries and affiliates of Credit Suisse ("CS") operating under its Securities Research function within the Investment Banking Division. For more information on our structure, please use the following link: https://www.credit-suisse.com/who-we-are All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS. CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. Please note in particular that the bases and levels of taxation may change. Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of any such website does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk. This report may contain material that is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject CS to any registration or licensing requirement within such jurisdiction.The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor.This research report does not, and is not intended to be, an advertisement within the meaning of article 68 of the Swiss Financial Services Act and/or article 95 of the Swiss Financial Services Ordinance. This research report is not a prospectus, basic information sheet (BIB) or a key information document (KID). Any recipients of this document should, however, note that any communication forwarding or using this research report as a basis for discussion, would qualify as such advertisement if it is intended to draw the recipient's attention to specific financial instruments covered by this research report.

Additional Regional Disclaimers

Australia: Credit Suisse Securities (Europe) Limited ("CSSEL") and Credit Suisse International ("CSI") are authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority ("FCA") and the Prudential Regulation Authority under UK laws, which differ from Australian Laws. CSSEL and CSI do not hold an Australian Financial Services Licence ("AFSL") and are exempt from the requirement to hold an AFSL under the Corporations Act (Cth) 2001 ("Corporations Act") in respect of the financial services provided to Australian wholesale clients (within the meaning of section 761G of the Corporations Act) (hereinafter referred to as "Financial Services"). This material is not for distribution to retail clients and is directed exclusively at Credit Suisse's professional clients and eligible counterparties as defined by the FCA, and wholesale clients as defined under section 761G of the Corporations Act. Credit Suisse (Hong Kong) Limited ("CSHK") is licensed and regulated by the Securities and Futures Commission of Hong Kong under the laws of Hong Kong SAR, which differ from Australian laws. CSHKL does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. Investment banking services in the United States are provided by Credit Suisse Securities (USA) LLC, an affiliate of Credit Suisse Group. CSSU is regulated by the United States Securities and Exchange Commission under United States laws, which differ from Australian laws. CSSU does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. Credit Suisse Asset Management LLC (CSAM) is authorised by the Securities and Exchange Commission under US laws, which differ from Australian laws. CSAM does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. This material is provided solely to Institutional Accounts (as defined in the FINRA rules) who are Eligible Contract Participants (as defined in the US Commodity Exchange Act). Credit Suisse Equities (Australia) Limited (ABN 35 068 232 708) ("CSEAL") is an AFSL holder in Australia (AFSL 237237).

EU: This report has been produced by subsidiaries and affiliates of Credit Suisse operating under its Securities Research function within the Investment Banking Division.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements.

This material is issued and distributed in the U.S. by CSSU, a member of NYSE, FINRA, SIPC and the NFA, and CSSU accepts responsibility for its contents. Clients should contact analysts and execute transactions through a Credit Suisse subsidiary or affiliate in their home jurisdiction unless governing law permits otherwise.

CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials, management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. No information or communication provided herein or otherwise is intended to be, or should be construed as, a recommendation within the meaning of the US Department of Labor's final regulation defining "investment advice" for purposes of the Employee Retirement Income Security Act of 1974, as amended and Section 4975 of the Internal Revenue Code of 1986, as amended, and the information provided herein is intended to be general information, and should not be construed as, providing investment advice (impartial or otherwise).

Malaysia: Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn Bhd, to whom they should direct any queries on +603 2723 2020.

Singapore: This report has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (each as defined under the Financial Advisers Regulations) only, and is also distributed by Credit Suisse AG, Singapore Branch to overseas investors (as defined under the Financial Advisers Regulations). Credit Suisse AG, Singapore Branch may distribute reports produced by its foreign entities or affiliates pursuant to an arrangement under Regulation 32C of the Financial Advisers Regulations. Singapore recipients should contact Credit Suisse AG, Singapore Branch at +65-6212-2000 for matters arising from, or in connection with, this report. By virtue of your status as an institutional investor, accredited investor, expert investor or overseas investor, Credit Suisse AG, Singapore Branch is exempted from complying with certain compliance requirements under the Financial Advisers Act, Chapter 110 of Singapore (the "FAA"), the Financial Advisers Regulations and the relevant Notices and Guidelines issued thereunder, in respect of any financial advisory service which Credit Suisse AG, Singapore Branch may provide to you.

Park Elsewhere – Q4 2022 Preview

After a strong showing in 2022 (UTY/S&P500 -2%/-19%), utilities have materially underperformed YTD with the group down -3% vs S&P500 +5%, as of Jan 30th. Utilities are now trading at ~18.5x, still above the 15-year average multiple of 17x (NTM) (pg.34). Versus Bond Yields, group valuation remains elevated at 18% expensive (pg.36). NTM P/E relative to S&P500 is 1.05x, modestly lower than the historical average of 1.07x (pg.35). Our sector thesis played out last year with utilities materially outperforming (see our Recession Read-throughs for Utilities deep dive note published in late March **here**), as we discussed earlier. Here, against an ongoing challenging macro backdrop (high inflation/rates, elevated customer bills driven by higher fuel costs, regulatory risk rising throughout the year), the group is expensive absolutely and versus bond yields. While Utes outperform in the run-up to a recession, the sector lags during and post the recession. With a recession approaching, we are cautious on the sector entering 2023 and expect reversal of the material outperformance last year.

Q4 2022 Preview (Park Elsewhere - More Headwinds than Tailwinds) – High inflation/rates have caused several utilities to rebase (lower) earnings expectations and we could see more companies disappoint versus 2023 estimates (see individual company section for details). Customer bill increases during winter months could range anywhere from high single digits to 50% driven by higher fuel costs, with gas utilities expected to be closer to the high end of that range. With elevated bills, we see regulatory risks increasing throughout the year. Not unique to utility sector, there is added pressure from material/supply chain constraints. We view the Inflation Reduction Act (IRA) signed into law on Aug 16th, 2022, as a major positive for the sector with a potential to boost rate base/earnings growth (driven by investment in renewables) while improving ESG profiles of companies within our coverage. With that said, given the already elevated customer bills and still constrained supply chain, we see limited upside in the near term and don't foresee material shifts (for most companies) in earnings/capex plans from IRA until later in 2023 or 2024. Overall, we generally expect Q4 results to be largely in line with expectations with the majority companies projected to meet or exceed estimates (pg.29). Based on National Oceanic and Atmospheric Administration (NOAA) heating degree day data, the weather in 4Q22 drove 23% higher degree days versus last year while being -1% below normal, on average, across the US (pg.30). Based on our Q4 preview conversations with several companies to date, weather has also been communicated as normal (in line with guidance), on average, but the impact does vary on a company-by-company basis. We are positive on SRE (O/P) going into 4Q prints and cautious on AES (O/P). We expect Sempra shares to benefit from positive messaging on the continued strong progress on LNG projects. Updated 2023 EPS guidance and 2024 earnings projections could also surprise to the upside. For AES, it continues to be our top pick, but we are cautious on the combination of top performance last year (AES total return of 21% vs peers 4%) and supply chain constraints that could slightly delay commercial operation/earnings recognition form Q4 '23 to '24. We expect management to guide conservatively on this account where 2023 numbers could come in below street expectations.

Stock Selection. We prefer value over quality: DTE, ETR, ES, FE, EXC, NI, PPL, and SRE are Outperform-rated names within the regulated value bucket. Within diversified names, we view AES (top pick) as best risk/reward and are Outperform-rated on PEG. We are also Outperform-rated on AEE, CNP, and XEL within quality.

Within, we include company-specific tear sheets with our / consensus fourth quarter 2022 EPS estimates along with discussion on key investor debates going into earnings.

Please see the analyst certification and important disclosures on page 37 of this report. Evercore ISI and affiliates do and seek to do business with companies covered in its research reports. Investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Outperform **TP $31**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q4 EPS Bridge:** We project year-over-year EPS to increase by +$0.02 to $0.47, which would bring full-year 2022 EPS to $1.65, the top end of $1.55-1.65 guidance as the company has indicated it expected to deliver. Weather was likely not a major factor during the quarter. In terms of positive YoY drivers, we expect AES to benefit from new renewable generation, increased ownership of AES Andes, and a Fluence earnings true-up. In terms of negative YoY drivers, we anticipate a higher tax rate, increased interest expense, and lower earnings from Alto Maipo in Chile.

- **What to look for in the earnings report (Key debates/themes):**
  - **Q4 expectations:** We expect AES to issue 2023 EPS guidance, a key item to look out for is that AES has said there might be risk to the timeline of solar panel deliveries into the US and even minor delays could push COD's of renewable projects from Q4 2023 into early 2024. The delay would also move ITC recognition from 2023 to 2024 which could be a headwind to 2023 earnings while boosting 2024, we estimate $0.10-$0.15 of 2023 EPS consensus (or 7% at the mid-pt) at risk.
  - **Ohio rate case:** A final order was issued in Dec. 2022 that included a $76MM revenue increase with a 10.0% ROE, 53.87% equity ratio on a rate base of $783MM. The rate increase will take effect once the pending Electric Security Plan (ESP) is approved, expected in second half of 2023. Recall on March 4th 2022, Staff for the Public Utilities Commission of Ohio recommended that the Commission freeze DPL's (Company's OH regulated subsidiary) rates, representing a reversal after hearings from its prior recommendation for a ~$65MM revenue increase from July 2021. The key driver of the Staff's change was an analytical investigation into DPL's costs, with the most notable item being DPL's $70MM Rate Stabilization Charge through 2024. In November 2020, AES filed for a $121MM revenue increase with a 10.5% ROE with a 53.87% equity ratio on a $796MM rate base with a May 2021 test year.
  - **Ohio ESP 4 filing:** In September 2022, AES Ohio filed a new ESP 4 to provide a regulatory foundation to upgrade and modernize its network and settle any outstanding regulatory proceedings. The company is asking for a rider with quarterly updates. Hearing is scheduled for March 2023 with an approval expected within the next 12 months.
  - **Renewable PPAs and backlog**: Including the Jan 11th PPA signing with Codelco for 980 MW the Company has now signed 4,158 MW in 2022. Management at our January Utility CEO conference pointed to its Q3 disclosure of several large projects in late state negotiations that were intended to deliver a targeted 4.5-5.5GW of new PPA's in 2022.
  - **Green hydrogen production**: In December 2022, AES and Air Products announced a joint venture to invest ~$4 billion to build, own and operate a green hydrogen production facility in Wilbarger County, Texas. This mega-scale renewable power to hydrogen project includes roughly 1.4 GWs of wind and solar power generation, along with electrolyzer capacity capable of producing greater than 200 metric tons per day (MT/D) of green hydrogen, making it the largest green hydrogen facility in the United States. The facility is targeted to begin commercial operations in 2027 and will serve growing demand in the mobility market as well as other industrial markets. AES and Air Products will jointly and equally own the renewable energy and electrolyzer assets, with Air Products serving as the exclusive off-taker and marketer of the green hydrogen under a 30- year take or pay contract. The project is expected to generate $200- 350 million in annual tax credits using $3-5 per kilogram in PTCs and ITCs generated from wind, solar, storage and hydrogen production. AES projects a 10-13% levered after-tax return (or $40-52 million, $0.07 annual EPS at the mid-pt) on their equity portion of the investment ($400 million), with the remaining $1.6B to be funded by debt and/or tax equity. Lastly, Alberta Investment Management Company (AIMCo) is an investor in AES' clean energy business and will fund 25% of AES' capital investment. See our note here.

- **Positioning into Qtr: Cautious** AES has said there might be risk to the timeline of solar panel deliveries into the US and even minor delays could push COD's of renewable projects from Q4 2023 into early 2024. The delay would also move ITC recognition from 2023 to 2024 which could be a headwind to 2023 earnings while boosting 2024, we estimate $0.10-$0.15 of 2023 EPS consensus (or 7% at the mid-pt) at risk.

Outperform **TP $93**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q4 EPS Bridge:** We project year-over-year EPS to increase +$0.09 to $0.57/share, which would result in full-year 2022 EPS of $4.08, which would match the midpoint of the company's full-year $4.00-4.15 guidance. Last year in 4Q21, weather was $0.02 unfavorable and this year in 4Q22 it is not expected to be a major driver. In terms of positive YoY drivers in Missouri, Ameren should benefit from new Missouri electric rates effective late February 2022, plus higher investments in infrastructure and wind generation eligible for PISA and RESRAM, as well as higher energy efficiency performance incentives. These benefits should be partially offset by higher O&M expense, a negative COLI impact due to lower market returns, and higher interest expense. In Ameren Transmission, the Company should see the higher earnings from increased average estimated rate base. In Illinois Electric, we expect increased contribution from higher estimated rate base and an increased 30-year Treasury rate. In Illinois Gas, the company should benefit from higher QIP rider revenues, partially offset by increased O&M and a negative COLI impact due to lower market returns. At the parent, Ameren should see some share dilution and higher interest expense.

- **What to look for in the earnings report (Key debates/themes):**
  - **Q4 expectations**: As Ameren typically does, we expect it to issue 2023 EPS guidance. We also anticipate the Company will roll forward and update its five-year (2023-2027) EPS growth forecast (6-8%), its five-year capital plan, and its rate base growth outlook. Lastly, we expect AEE to refresh its financing plan with higher equity to support higher capex.
  - **Missouri electric rate case filing – Staff recommendation update**: On August 1, 2022, Ameren filed a Missouri electric rate case, requesting a $316MM revenue increase with a 10.2% ROE and 51.93% equity ratio on a rate base of $11.6B with a test year ended December 31, 2022. On January 10, 2023, Staff recommended a $147MM revenue increase with a 9.59% ROE and 51.84% on equity ratio on a rate base of $10.4B but with a test year ended June 30, 2022. Ameren's current Missouri electric rates are based on a black box settlement; but note for AFUDC purposes Ameren earns a 9.4-9.5% ROE. The main drivers of the $169MM lower rate increase recommendation (Request vs Staff's position) are $134MM- lower fuel/power expense and $40MM - lower ROE+equity layer offset by other items. The next step is Surrebuttal testimony on March 13th and a PSC decision is expected by June 2023 for new rates effective by July 1, 2023. Ameren has historically reached settlement on many Missouri electric rate cases.
  - **Illinois multi-year rate case filing:** On January 20th, Ameren filed a multi-year electric rate case with the Illinois commission to set distribution rates for 2024 through 2027. For 2024, the company requested a revenue increase of $175MM with a 10.5% ROE and 53.99% equity ratio on a forecasted average annual rate base of $4.3 billion. For 2025, Ameren requested a revenue increase of $91MM with a 10.5% ROE and 53.97% equity ratio on a forecasted average annual rate base of $4.6 billion. For 2026, the company requested a revenue increase of $104MM with a 10.5% ROE and 54.02% equity ratio on a forecasted average annual rate base of $5.0 billion. For 2027, Ameren requested a revenue increase of $79MM with a 10.5% ROE and 54.03% equity ratio on a forecasted average annual rate base of $5.3 billion. AEE has said it also proposed to defer 50% of the 2024 rate increase of $175MM as a regulatory asset to be collected from customers in 2026. The company said a regulatory decision is required by December 2023. On September 27, 2022, the Illinois commission issued performance incentives for Ameren (see our note).
  - **MISO transmission planning**: Ameren has been assigned $1.8B of the ~$10B of MISO approved Tranche 1 transmission projects, in addition to the assigned projects, MISO approved $700MM of competitive projects that cross through AEE's Missouri territory, which provide additional potential capex opportunities for Ameren. The RFP process has begun, and the competitive bidding is expected to take 12-24 months. For projects assigned to AEE, the Company expects the capex to begin in 2025 with completion dates expected near the end of this decade (capex update expected on year-end call). Work on three additional MISO tranches has begun and MISO has indicated that an initial set of Tranche 2 projects also located at MISO North, is scheduled to be approved in the 1Q23. Projects included in Tranche 3 are expected to be located in MISO South, with approval scheduled in the 4Q24, while projects identified in Tranche 4 are expected to improve transfer capability between MISO North and MISO South, with approval scheduled for 4Q25.
  - **IL Gas Rate Case**: In Jan. 2023, requested a $160 million annual base rate increase from the Commission; includes ~$77 million that would otherwise be recovered in 2024 under QIP and other riders. Based on 10.7% ROE, 54% equity ratio; $2.9 billion rate base; 2024 future test year. Rate base is year-end 2023 plus estimated average 2024 rate base additions. Commission decision required by Dec. 2023 with new rates expected to be effective by early Dec. 2023.

- **Positioning into Qtr: Neutral**.

In Line **TP $102**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q4 EPS Bridge:** We project year-over-year EPS to increase by +$0.01 to $0.99/share, which would bring full-year 2022 EPS to $5.03, slightly above the midpoint of full-year guidance range of $4.97-5.07/share. Weather is expected to be favorable versus normal due to a cold snap in Texas. Positive YoY drivers primarily include rate relief, higher retail load, and the benefit of the TCOS and DCRF riders in Texas. On the negative side, we primarily expect transmission true-ups, higher depreciation and amortization, increased interest expense and higher property taxes. This quarter also reflects the removal of the FERC RTO adder. Lastly, we also anticipate a negative impact from AEP's ownership of ChargePoint (CHPT) shares.

- **What to look for in the earnings report (Key debates/themes):**

  - **Q4 expectations**: We expect AEP to reaffirm its 2023 EPS guidance and reiterate its long-term EPS (6-7% annual EPS growth), dividend, capital, rate base and financing outlooks that it rolled forward and updated at its Analyst Day in October 2022 and subsequently maintained with Q3 results. We also expect updates on KY and nonregulated renewable asset sale processes.
  - **Kentucky asset sale:** AEP recently announced that it plans to make a new FERC 203 filing. Next steps will be for the FERC to put out a procedural schedule. AEP intends to request for an expedited process, requesting a FERC decision by April 26th. Recall in mid-December 2022, the FERC denied AEP's proposed sale of its Kentucky operations to Liberty (Algonquin Power & Utilities). The final order denies the transaction without prejudice on the grounds that applicants failed to submit evidence showing that the sale will not have an adverse effect on rates. Obviously, we view the Commission decision as a negative development. Under the scenario where the sale does not move forward, AEP's financing needs would increase by $1.2B (net cash proceeds from the sale). Modeling a no sale framework, assuming AEP issues $1.2B in additional equity and adding back $60MM annual earnings from KY operations we see only a modest $0.03 or 0.5% pro forma EPS dilution versus our current 2024 EPS estimate of $5.65 (see our note).
  - **Unregulated renewable sale:** AEP has said its sales process for its unregulated renewable assets continues (began in August 2022) and is on track to close during 2Q23 with announcement expected on the Q4 call. The Company recently accepted bids for Phase I of the auction process and are proceeding into Phase II due diligence with selected bidders. We believe AEP could fetch $1.2-1.4B in cash proceeds using Con Ed's recent transaction multiple and yieldco trading multiples of 11-12x applied to $150MM of 2023 EBITDA less $375MM of debt.
  - **Retail business strategic review:** AEP had announced at its 2022 Analyst Day that it had initiated a strategic review of its retail business to be complete in 1H23; we estimate the Company could generate $220-$260MM in net proceeds at 7-8x our estimate for 2023 EBITDA of $32MM. We believe these planned asset sales along with incoming CEO Julie Sloat's focus on actively managing the portfolio could materially lower the Company's $2.8B in equity needs through 2027.
  - **House Bill 6 Second Subpoena:** AEP disclosed that they received a second subpoena from the SEC in August seeking various additional documents relating to its ongoing inquiry associated with HB6 investigation in OH. We do not view it as a material risk for AEP but will be following it closely.
  - **Regulatory update:** In Louisiana, on December 18, 2020, AEP filed a rate case for a $73MM net revenue increase based on a 10.35% ROE with a 50.8% equity ratio on a rate base of $2.1B with a December 31, 2019 test year. In January 2022, an unopposed motion was filed to stay the hearing as parties engaged in settlement discussions. An order in that case is expected in the first quarter of 2023. In Oklahoma, AEP filed a rate case on November 22, 2022, requesting a net revenue increase of $103MM with a 10.4% ROE and 54.6% equity ratio on a rate base of $4.4B with a test of year June 30, 2022. Separately, SWEPCO is taking steps to secure renewable resources, making regulatory filings in May 2022 in Arkansas, Louisiana and Texas to own three renewable turnkey projects totaling 999 MW. As an update, on October 19, 2022 related to these projects totaling $2.2 billion of investment, the Arkansas staff filed support of these resources subject to conditions. This $2.2B investment is currently reflected in the five-year $40B capital plan. ApCo's 409 MWs of owned solar and wind resources were approved by West Virginia and Virginia, marking a $841MM investment that is also included in the current capex plan.

- **Positioning into Qtr: Neutral.**

CenterPoint Energy

Outperform **TP $32**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q4 EPS Bridge:** We project year-over-year EPS to decrease by -$0.07 to $0.29/share, which would result in full-year 2022 EPS that is at the top end of guidance of $1.37-1.39/share. We expect weather to contribute favorably in 4Q22 versus normal due to a cold snap in Texas. In terms of positive YoY drivers, we anticipate positive contributions from the DCRF and TCOS riders, plus increased gas rates, and higher sales. The primary negative YoY drivers are loss of earnings from the Arkansas and Oklahoma gas LDC divestitures, higher depreciation & amortization expense, and increased interest expense.

- **What to look for in the earnings report (Key debates/themes):**

  - **Q4 expectations:** We expect CenterPoint to reaffirm its current 2023 EPS guidance. We expect the company to also reaffirm its long-term EPS, capex, rate base, financing, O&M, and sales / customer growth outlooks. Given significant update on the Q3 call, we do not anticipate the company will provide major updates to these outlooks until after some rate cases are concluded.

  - **Leadership updates**: CenterPoint recently announced a series of leadership changes. Notably, the company announced the promotion of Jason Wells, EVP and CFO, to the role of President and COO, which became effective January 1st. Dave Lesar continues to serve as CEO. The company is currently conducting a public search for a CFO while Wells continues to serve in his current capacity until his successor has been appointed; CNP has said a new CFO could be announced in February 2023.

  - **Incremental capex:** With Q3 results, CenterPoint increased ten-year 2021-2030 capex plan by $2.3B to nearly $43B driven by resiliency and grid modernization ($1.6-1.8B) and transmission upgrades ($600-800MM). Roughly ~$300MM of which was expected to be deployed in 2022. The Company also identified another $3B of potential incremental opportunities from increased and accelerated C&I electrification, accelerated EV adoption and additional grid modernization projects. None of this total $5.3B incremental capex announced with Q3 results is currently factored into long-term guidance (8% annual EPS growth through 2024 and mid to high end thereafter). CNP's new five-year 2021-2025 capex now totals $20.3B versus $19.3B previously, company's five-year rate base growth for 2021-2025 is still expected to be 11% CAGR. CenterPoint now expects its ten-year 2021-2030 rate base to grow 9.5% CAGR versus 9.0% previously. Despite the capital raise, the Company still projects no equity issuance through 2030.

  - **Rate case schedule:** CenterPoint plans to file a Texas gas rate case in mid-2023, and a Texas electric case in late 2023 or early 2024. Indiana electric is expected to be filed in late 2023. An Ohio gas rate case is anticipated to be filed in mid-2024. Several gas cases are expected to be filed post-2025, including Louisiana, Mississippi, Northern Indiana, and Southern Indiana.

  - **Indiana IRPs:** CenterPoint received approval for projects totaling 460 MW gas combustion turbine, 400 MW of solar, and 335 MW of solar PPAs. The Company filed in July 2022 for approval of 130 MWs of owned Crosstrack solar generation; these projects will bring CenterPoint's total owned and contracted solar to over 800 MWs, which is tracking well against its IRP that calls for 700-1,000 MWs of solar and 300 MWs of wind. The Company anticipates filing for the remaining balance of generation needs soon, which will include a project to be owned by its Indiana electric utility. Lastly, CenterPoint is planning to file its next IRP in mid-2023, which will provide guidance on CNP's remaining coal assets. As a foundation for this next IRP, the Company recently conducted an all-source RFP where it received nearly 100 proposals from several dozen participants, including wind, solar and storage that will help inform the process.

This report is prepared solely for the use of Michael Weisenburger

In Line **TP $68**
Analyst: Durgesh Chopra / Sharon Wang

- **Q4 EPS Bridge:** We project year-over-year EPS to increase +$0.12 to $0.59/share, which would result in full-year 2022 EPS of $2.88, matching the midpoint of the company's full-year $2.87 to $2.89 guidance. We expect weather to be relatively neutral this year versus normal last year also. Positive YoY result is primarily driven by electric rate increase, partially offset by refunds and Voluntary Refund Mechanism (VRM) filing discussed within.

- **What to look for in the earnings report (Key debates/themes):**

  - **Q4 expectations**: We expect CMS to update 2023 EPS guidance issued on the Q3 call and refresh the current $14.3B five-year capex plan to include upside from the IRP approved last year. They will also discuss the approved settlement in electric rate case and recently filed gas rate case.

  - **Electric rate case settlement**: On Jan 19th, settlement agreement in electric rate case was approved. Total new revenue for the 2023 test year is $161 million vs. $272mm requested (raised to $293.5 million later), including surcharge to recover $6 million for a 2021 distribution deferral. The capital structure includes the existing 9.9% ROE with a 50.75% equity ratio vs, current 51.02%, which is consistent with the gas settlement. As per the agreement, Consumers Energy will provide a $15 million voluntary refund of 2022 revenue through a 12-month bill credit in 2023. The company will also make $10 million contribution towards programs that assist low-income customers. The settlement also includes pension and retiree health care expense deferral.

  - **Voluntary Refund Mechanism**: In Dec, the company filed for $22 million under the Voluntary Refund Mechanism (VRM) which if approved (could be voted on Feb 2nd commission meeting) would allow CMS to use $22 million in excess revenue form 2022 towards 2023 expenses (de-risk 2023).

  - **Gas rate case**: Gas rate case was filed in Dec. CMS requested a $212 million rate increase with 10.25% ROE and 51.50% equity ratio. Final decision is expected in September 2023 with rates going in to effect on Oct 1st, 2023.

  - **Commission's storm response review**: Management don't foresee this as punitive for CMS and/or other utilities serving the state rather Michigan regulators acknowledging climate change and extreme weather risks and monitoring progress on recommended actions in 2021 to proactively prepare for future events. CMS has stated that their average Interruption duration index is improved. Vegetarian management was doubled and recovered by the support of commission. The review is going to take place over the course of 2023 and may show the need for more reliability capital investment.

  - **Financing plan**: CMS completed $800M of debt issuances at the utility in 2022 as planned, priced at a weighted average coupon of 3.9%. For the acquisition of Covert plant ($815M), CMS priced $438M of equity-forward contracts during Q3 at a weighted average price of $68 per share. The settlement of equity forwards will largely occur in the first half of 2023, concurrent with the acquisition timing and in accordance with the approved IRP. To fund the current 2022-2026 investment plan of $14.3B, CMS continues to project no equity through 2024 with up to $250MM per year in 2025 and 2026.

- **Positioning into Qtr: Neutral**

Adj. EPS	2020A	2021A	1Q22A	2Q22A	3Q22A	4Q22E	2022E	2023E	2024E	2025E

Source: Evercore ISI and FactSet as of 1/31/23

This report is prepared solely for the use of Michael Weisenburger

In Line **TP $92**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q4 EPS Bridge:** We project year-over-year EPS to decrease by -$0.20 to $0.80/share, which would bring the full-year 2022 EPS to $4.54/share, in line with the midpoint of $4.50-4.60 guidance. Negative YoY drivers include higher O&M, increased interest expense, higher depreciation & amortization, and increased property taxes. Positive YoY drivers primarily include revenue increases under the multi-year rate agreements in CECONY and O&R, as well as credit collection payments that resumed on September 1st.

- **What to look for in the earnings report (reminder that ED does not host a conference call):**

  - **Q4 expectations**: As it typically does, we expect Con Ed to issue current-year (2023) EPS guidance and roll forward and update its long-term EPS (5-7% EPS CAGR through 2026), capex, rate base and financing plans. Investors are likely to focus on Con Ed's potential plan to buy back shares. We also expect an update on the progress of closure of the announced CEB asset sale expected in 1H23 and CECONY rate case settlement discussions.

  - **CECONY electric and gas rate case:** Con Edison is in settlement discussions which began on July 6th 2022 and another 30 day extension was requested on January 13th. We believe the Staff recommendation for both electric and gas was positive on the cost of capital side with a 48% equity layer and 8.8% ROE being same as the current levels while there were concerns that the equity ratio may be reduced. Expenses are the other large drivers in the difference between the revised revenue request and Staff's recommendation, with $450 million combined for electric (with $90 million due to depreciation which will not impact earnings), so $360 million needs to be negotiated. We believe this is where the risk lies. A high level reconciliation between request and Staff is: on electric a $738 million difference in rate increase with: 1) ~$300 million from ROE and equity ratio, 2) ~$350 million is expenses (including $50 million in depreciation which shouldn't impact earnings), 3) $50 million rate base, and 4) $38 million other items. On the gas side, there is a $237 million difference in rate increase between the request and Staff driven by: 1) ~$100 million in ROE and equity layer, 2) ~$100 million in expenses (including $40 million depreciation which should not impact earnings), and 3) $37 million other items. Recall on January 28th, Con filed this CECONY electric and gas rate case that is a one-year 2023 proposal with 2024-2025 illustrations. ED requested a revenue increase of $1,199 million for electric and $503 million for gas in 2023, with illustrations for $853 million and $234 million in 2024 plus $608 million and $218 million for 2025, respectively. The request is based on a 10.0% ROE with a 50% equity ratio on a historical test year of 12-months ended September 30, 2021 for rates to be effective on January 1, 2023.

  - **CEB asset sale and use of proceeds, including potential share repurchase**: On October 1st, Con Edison announced an agreement to sell its unregulated renewal business to RWE for $6.8 billion. Accounting for ~$2.6 billion in total debt, the transaction translates into $4.2 billion in equity value, which is in line with the top end of our previously-estimated $3-4 billion range. Of the total $3.6-3.8B (updated from $3.9B) in expected after-tax proceeds, approximately $1.1B is expected to be allocated for debt redemption and another $850MM towards eliminating 2022 equity issuance, leaving ~$2B which could go towards elimination of 2023-2024 combined equity needs of previously $750MM (now rescinded for evaluation) and/or share buy backs. The transaction is subject to HSR approval and is expected to close in the first half of 2023. We view this announcement as a positive step for Con Ed, as it would transition the company to a fully regulated utility, thereby improving its risk profile with the creation of more steady earnings and cash flow growth, while also reducing its equity needs through 2024. The transaction is valued is 11x our 2023 EBITDA estimate of ~$600 million, a valuation which was in line with peer yieldco trading multiples of 11-12x.

  - **Steam rate case filing**: On November 23rd, Con Ed filed a CECONY Steam rate case, requesting in its one-year proposal a revenue increase of $137MM with a 10.0% ROE and 50.0% equity ratio on a rate base of $1,778MM with a test year ended June 30, 2022. The request includes a new revenue decoupling mechanism with a continuation of full reconciliation of costs for pension and OPEBs and environmental remediation. Con Ed is also requesting full reconciliation of property taxes, municipal infrastructure support costs, and long-term debt cost rate as well as continued reconciliation for uncollectible costs. In addition, the company is asking for symmetrical reconciliation for labor and non-labor inflation rate to the extent that actual inflation rate deviates from what is assumed in the revenue requirement by 50 bps up or down. Con Ed last filed a steam rate case several years ago in 2013 for rates effective in 2014. The business typically represents ~5% of consolidated annual earnings. Staff's position is expected in March with a final decision expected by year end.

- **Positioning into Qtr: Neutral.**

Outperform **TP $93**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q4 EPS Bridge:** We project 4Q22 adjusted EBITDA of $550MM for Constellation, which would result in full-year 2022 EBITDA of $2,611MM which is in the upper half of company's 2022 EBITDA guidance range of $2,450-2,650MM.
- **What to look for in the earnings report (Key debates/themes):**
  - **Q4 expectations**: On the Q4 call, CEG plans on providing a 2023 EBITDA guidance range, a gross margin update for 2023, and a gross margin outlook for 2024. The company is also expected to provide a capital allocation update, they have previously guided to free cash flow for 2022-2023 of $1.8-2.2B which is still expected to be utilized for M&A, unidentified growth capital and/or return of capital to shareholders in the form of buybacks and special dividends. Constellation sees opportunities to deploy capex at double digit IRR's in the area of nuclear plant acquisition, repowering existing fleet, producing clean hydrogen and growing its offering of sustainability products and services for its C&I customers.
  - **IRA legislation benefits**: The Nuclear PTC is in effect beginning after 12/31/23 and through 12/31/32. In the base year 2024, Constellation qualifies for the nuclear PTC up to $15/MWh; the PTC amount is reduced by 80% of gross receipts exceeding $25/MWh, phasing out completely after $43.75/MWh. The nuclear PTC can be credited against taxes or monetized by transferring to an eligible taxpayer. Starting in 2025, the maximum PTC and gross receipts threshold are subject to an inflation adjustment based on the GDP price deflator for the preceding calendar year: Inflation Adjustment = GDP price deflator in preceding year divided by GDP price deflator in 2023. Maximum PTC adjustment is rounded to nearest $2.5/MWh and gross receipts threshold is rounded to nearest $1/MWh.
  - **License renewals for Clinton and Dresden nuclear plants**: CEG is seeking license renewals for Clinton (1,080 MW) and Dresden Nuclear Power Plants (1,845 MW). These renewals, if granted, would allow the plants to operate for an additional 20 years. Clinton could operate until 2047 and Dresden could operate until 2049 (Unit 2) and 2051 (Unit 3).
  - **Credit rating upgrade**: On October 13th, Standard & Poor's (S&P) upgraded CEG from BBB- to BBB while maintaining a positive outlook.
  - **Agreement with city of Chicago**: Constellation recently executed a 300 MW agreement with the City of Chicago to purchase 100% clean, renewable energy by 2025.
  - **Potential changes to financial guidance and reporting**: CEG is evaluating providing revised metrics for financial guidance and disclosure. Among its guidance, the company currently issues EBITDA outlooks. Constellation is considering changing this to a different metric, such as earnings per share instead of EBITDA, given the IRA implementation of nuclear tax credits.
  - **PJM Plant Outage:** The PJM said Jan. 11 that it had an "unacceptably high" level of power generation resources unavailable for the Dec. 24, 2022, morning peak amid extremely cold weather. For those that did not perform as promised when called upon to do so, the grid operator said it expects to levy between $1 billion and $2 billion in fines. CEG and PSEG's jointly owned (43%/57% respectively) Salem unit 2 (1.1GW) was offline for a day during the December winter storm. Management stated that while unit 2 was offline for a day, other units operated at higher than normal capacity which would serve to offset any fines/penalties.
- **Positioning into Qtr: Neutral.**

In Line **TP $65**
Analyst: Durgesh Chopra / Sharon Wang

- **Q4 EPS Bridge:** We project year-over-year EPS to increase by +$0.08 to $0.98, which would bring full-year 2022 EPS to $4.04, closer to the low end of $4.03-4.18 guidance. We expect YoY drivers to include favorable weather vs last year, base revenue growth, absence of outage at Millstone offset by share dilution, higher interest expense and other.

- **What to look for in the earnings call (Key debates/themes):**

  - **Q4 call expectations**: Dominion has said they will provide any update they can on the strategic review followed by an analyst day later in 2023. 2023 guidance range is typically announced on the Q4 earnings call but that will not be the case this time around given the ongoing review. We also expect discussion around recently introduced legislations in VA.

  - **HB 1770 - Virginia Electric Utility Regulation Act**: As per the proposed bill, Dominion will move from a triennial to biannual review. The bill requires Dominion Energy Virginia, in its 2023 biennial review, to combine certain rate adjustment clauses having a combined annual revenue requirement of at least $300 million with the utility's base rates. The bill provides that the combination of such rate adjustment clauses is subject to audit by the Commission in the utility's 2023 biennial review filing. The bill also requires that if, during a biennial review, the Commission determines that the utility has earned more than 70 basis points above its fair combined rate of return on its generation and distribution services, the Commission will direct that 70 percent of the amount of such overearnings be credited to customers' bills. The bill if approved also implies an ROE floor of 10% and higher equity layer of 53.5% vs 52% currently. There is an identical bill in the Senate also being discussed, as a reminder the legislative session in VA ends of Feb 25th.

  - **SB 1477:** On Jan 18th, new legislation SB 1477 filed in the Virginia General Assembly could allow Dominion to sell a passive stake in its ~$10 billion Coastal Virginia Offshore Wind project. Senate Bill 1477 authorizes Dominion Energy Virginia to establish an offshore wind affiliate, subject to approval by the Virginia State Corporation Commission. The bill also includes provisions that allow the affiliate to "construct, own, or operate the project" and enable the affiliate to cost recovery as a public utility. Any premium or purchase price in excess of book value resulting from the sale will be passed onto customers

  - **Business review**: With Q3 results on Nov 4th, D Initiated a 'top-to-bottom' business review, they expect to share updates on Q4 2022 earnings call in early 2023 and plan to hold an investor day later in 2023. In our view, as part of this review process, the company could take actions to modify the regulatory construct in VA to address investor concerns around the triennial review/over earnings risk (40-45c annual EPS or ~10%% of our 2024E.

  - **Offshore wind settlement agreement**: On Dec. 15th, SCC adopted the Second Stipulation related to the 2.6 GW Coastal Virginia Offshore Wind (CVOW) project and struck the performance guarantee provision. Specifically, the Second Stipulation asks the Commission to replace the performance standard with five enumerated requirements, which address the following: (1) construction cost sharing; (2) operating performance provisions; (3) Inflation Reduction Act; (4) scope of agreement; and (5) no precedential effect. The cost-sharing approach includes: (1) Shareholders will share 50% of any costs in the range of $10.3B to $11.3B. D estimates total project cost to be $9.8B. (2) The company has further voluntarily agreed that shareholders will be responsible for 100% of any prudently incurred costs in the range of $11.3B to $13.7B, if any. (3) There is no cost-sharing agreement for any costs that exceed $13.7 billion. D will provide a detailed explanation of the factors contributing to any shortfall in energy output from projected amounts in a future Commission proceeding. The order on reconsideration stated that the Commission finds that the performance standard ordered in the Final Order is stricken and replaced with the Second Stipulation.

  - **Utah rate case**: On Dec 23rd, the Public Service Commission of Utah (PSC) approved a revenue increase of $47.8 million (vs $70.5M requested) for Dominion Energy Utah (DEU), with ROE of 9.6% (vs requested 10.3%) and equity layer of 51% (vs requested 53.21%).

DTE

Outperform **TP $126**
Analyst: Durgesh Chopra / Sharon Wang

- **Q4 EPS Bridge:** We project year-over-year EPS to increase by +$0.16 to $1.21, which would bring full-year 2022 EPS to $6.00, the mid-point of $5.90-$6.10 guidance. We expect YoY drivers to include rate increases and favorable weather versus last year offset by higher depreciation, interest and other items.

- **What to look for in the earnings report (Key debates/themes):**
  - **Q4 Expectation:** We expect DTE to reiterate its LT operating EPS growth target of 6%-8%, supported by utility capital investment recently rolled forward and increased by $3.5B in the 5-year plan from $18.1B to $21.6B, which is 95% of the total $23B projected capital investment. At EEI, the company provided 2023 operating EPS early outlook of $6.09 - $6.40, which delivers 7% growth from original 2022 guidance midpoint of $5.84.
  - **Electric rate case**: On Nov. 18th, MPSC authorized DTE to implement a rate increase of $31mm on a rate base of $20.5B, with a 9.9% ROE and 50% equity ratio. The largest amount of the reduction in the approved rate increase versus DTE's ask was disputed sales forecast projections. The commission found that, despite DTE Electric's previous projections of declining electric use among its residential customers, residential electric sales surged in 2020 and increased again in 2021, even as many Michiganders returned to working from their places of employment and resumed pre-COVID activities. DTE's requested $388mm rate increase was based on rate base of $21.3B, ROE of 10.25% and equity ratio of 50%, versus company's current ROE of 9.9%. The staff recommended in May a rate increase of $143mm, rate base of $20.6bn, ROE of 9.60% and equity ratio of 50%. ALJ's Proposal for Decision in September was a rate increase of $145.7mm, rate base of $20.5bn, ROE of 9.90%, and equity ratio of 50%. In Dec, DTE submitted petition for rehearing. There could be a potential order on Feb 2nd. Company still views their relationship with regulators as constructive.
  - **Future rate cases**: DTE is still considering the timing to file both electric and gas rate cases (originally it was planned for Q1, but timing could move due to the rehearing petition we discussed earlier). In the next electric rate case, DTE is going to introduce a tracker for distribution investment in the grid, which is similar to what they have in the gas business and will help the company to stay out longer between rate cases.
  - **Clean Vision Plan (IRP) filing**: In early November, DTE filed an updated IRP to support generation transformation to cleaner energy and the modernization of electric grid for resiliency and reliability to prepare for increasing climate extremes and load growth from EV adoption. The plan accelerates 4,100 MW of coal plant retirements and drives 5,400 MW renewables development in 2023 – 2032, and 10,000 MW in 2033 – 2042. Some of the IRP investment could be incremental to current capex in the back end of five-year plan. Final commission decision is expected in 2H 2023.
  - **Commission investigation**: At our January Utility CEO conference DTE pointed to its track record and does not view the process as punitive but rather creating more alignment between the two parties. In Nov, the company submitted a report updating the Commission on the efforts to improve the utilities' storm response and restoration times.
  - **Customer Bill increases:** DTE is relatively well positioned to mitigate customer bill impacts from rising commodities as they are 75%/50% hedged at the gas utility for 2023/2024 respectively. Furthermore 80% of the fuel costs at the electric utility are fixed/contracted through 2023

- **Positioning into Qtr: Neutral.**

DUKE ENERGY

In Line **TP $102**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q4 EPS Bridge:** We project 4Q22 adjusted EPS of $1.10/share, which excludes the Commercial Renewables segment that is being sold and will be reported as discontinued operations. In terms of positive YoY drivers, we expect rate cases and riders to contribute favorably, in addition to higher sales growth, lower O&M, an AFUDC equity benefit, and a modest increase in gas utilities contribution. In terms of negative YoY drivers, we primarily anticipate increased depreciation and amortization, higher interest expense, and reduced market equity returns for the executive benefit trust.

- **What to look for in the earnings report (Key debates/themes):**
  - **Q4 expectations**: We expect Duke to reaffirm its 2023 EPS guidance and also maintain its five-year 2023-2027 EPS growth outlook (5-7% CAGR through 2027), both of which it issued with Q3 results. We also expect an update regarding the Company's strategic review of its Commercial Renewables business, for which Duke anticipates making an announcement in 1Q23 for closure by mid-2023. In addition, we expect the Company to provide an update on its 2023 cost mitigation target of $300MM.
  - **Commercial Renewables strategic review**: Duke completed the strategic review of its Commercial Renewables segment and expects to announce a sale in 1Q23 for close by mid-2023. We estimate DUK could fetch $3-3.5 billion in cash proceeds at a 11-13x EV/EBITDA multiple applied to our $360 million of EBITDA estimate less $1B of debt. The sale will be presented as discontinued operations in Q4. The company says it addresses its equity needs through at least 2027.
  - **North Carolina commission issues order adopting an initial Carbon Plan.** Duke at our January Utility CEO conference said that the December 31st decision on the Carbon Plan is in line with its expectations. Consistent with the Companies' proposal, Duke says the order recognizes the value of an "all-of-the-above" approach to achieving CO2 emission reductions. The order approves a number of near-term activities requested by the Companies that are needed to continue progress toward achieving the CO2 emissions reduction targets. It also affirms the resource ownership structure described in HB 951. All new generation facilities or other resources selected by the North Carolina commission to achieve the CO2 emission reductions shall be owned and recovered on a cost of service basis by DUK, with a carveout for solar and solar plus storage generation facilities, where the Companies will own 55%, and 45% will be procured through long term purchase power agreements with third parties. The Carbon Plan also approves Duke's proposed plan to continue utilizing remaining coal generation assets, ensuring that appropriate replacement generating units and associated transmission infrastructure are in service before existing generating units are retired and providing an orderly transition out of coal generation by 2035. The order requires DUK to refresh the Carbon Plan modeling – including impacts of the Inflation Reduction Act of 2022, Infrastructure Investment Jobs Act, and other future legislative changes and changing conditions – and file an updated Carbon Plan with the North Carolina commission by September 1, 2023. The Carbon Plan will be reviewed and adjusted every two years thereafter. In Aug. 2023, Duke will file an IRP with the South Carolina PSC, which will take into account the Carbon Plan, the IRA legislation and other factors relevant to resource planning.
  - **DEP rate cases**: On October 6th, DEP filed a rate case with the North Carolina commission that includes a Performance Based Regulation (PBR) Application which includes a Multi-Year Rate Plan (MYRP) and proposes rates for 3 years within the MYRP period. The rate case filing requests approval of a $236MM revenue increase with a 10.20% ROE and 53% equity layer and is based on a retail rate base of $12.3B as of December 31, 2021, adjusted for known and measurable changes projected through April 30, 2023. The MYRP includes impacts of approximately $3.8B (NC retail allocation) of capital projects that are projected to go in service over the MYRP period. Hearings are expected to start in May 2023. Duke intends to implement temporary rates subject to refund June 1, 2023 for the historic base case increase and has requested the NCUC approve the requested permanent total Year 1 rates to be effective no later than Oct. 1, 2023. In South Carolina, Duke announced on January 12th that it has reached a settlement agreement for a revenue increase of $52MM ($89MM requested) with an ROE of 9.6% (ask 10.2%) and equity ratio of 52.43% (request 53.0%). A final decision is expected in March 2023. Separately, Duke plans to file a DEC rate case in 1Q23.
  - **Cost mitigation**: With Q3 results, Duke raised its cost mitigation target for 2023 to $300MM from $200MM to offset inflation and higher interest expense.
  - **Indiana IRP filing**: In Indiana, following the filing of the IRP in December 2021, Duke issued a request for proposal for generation resources. The company held stakeholder meetings to review updated IRP results ahead of a planned CPCN filing in early 2023.
  - **Ohio electric rate case**: In Dec. 2022, the Ohio commission issued an order in the rate case, approving the settlement for a $22.5MM revenue increase (request $55MM), ROE of 9.5% (ask was 10.3% and existing 9.84%), and equity ratio of 50.5% (request was also 50.5% and existing 50.8%) on a rate base of $2,036MM (ask was $2,069MM).

- **Positioning into Qtr: Neutral**

EDISON INTERNATIONAL®

In Line **TP $70**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q4 EPS Bridge:** We project year-over-year EPS to decline -$0.07 to $1.09/share, which would result in full-year 2022 EPS of $4.58/share, matching the midpoint of the company's $4.48-4.68/share guidance. We expect the primary drivers to be higher interest expense related to wildfire financing, increased O&M, higher depreciation & amortization and increased property taxes, partially offset by higher rate base growth.

- **What to look for in the earnings report (Key debates/themes):**

  - **Q4 expectations**: As it typically does, we expect EIX to issue current-year (2023) EPS guidance and revisit its five-year EPS (5-7% CAGR through 2025), capital, rate base and financing outlooks. Extension of the plan beyond 2025 is not expected given the anticipated rate case filing in May this year.

  - **Best estimate of expected losses for the 2017/2018 Wildfire/Mudslide events**: with Q3 results, EIX increased its best estimate of expected losses for SCE by $880MM to $8.8B; it resolved $350MM of claims and now 85% (vs. 89% last quarter) of the best estimate has been resolved. SCE still plans to make a cost recovery filing by late 2023 to seek recovery for prudently incurred actual losses in excess of insurance, assuming relevant proceedings progress as expected.

  - **Equity issuance plan**: As previously disclosed and expected, EIX stated that it deferred equity content issuances planned for 2022 to 2023. The company had originally planned to issue $300-400MM last year. With Q3 results, EIX had stated that it expected to issue $100MM of common equity via internal programs ($75MM completed as of then) in 2022. The company said it will incorporate deferred equity issuances into its 2023 financing plan to be shared on the 4Q22 call. As of now, EIX still expects to issue equity content up to $250MM annually, on average from 2022-2025.

  - **Cost of Capital filings**: EIX recently posted an illustration of its Cost of Capital mechanism on its website (see link) with data through December 2022. On November 3, 2022, for the 2022 Cost of Capital proceeding the California commission found that an extraordinary event did occur and thus the CCM would not be automatically triggered, so the 2022 authorized cost of capital is preserved. For the 2023-2025 Cost of Capital filing, the Commission recently issued a decision for a 10.05% ROE (request was 10.53%) versus the prior 10.3%.

  - **Rate case**: EIX plans to file a rate case in May 2023 for the 2025-2028 period.

  - **Wildfire mitigation:** Management still estimates that its wildfire mitigation and PSPS have reduced probability of losses from catastrophic wildfires by 65-70%.

- **Positioning into Qtr: Neutral**

Outperform **TP $118**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q4 EPS Bridge:** We project year-over-year EPS to decrease by -$0.30 to $0.46/share, which would result in full-year 2022 EPS of $6.40 within the $6.25-6.45 guidance. We expect weather to be relatively neutral this year versus normal. In terms of positive YoY drivers, we primarily anticipate the benefits of rate relief and riders, and one-time adjustments from the same period last year. In terms of negative YoY drivers, we primarily expect higher taxes other than income, increased O&M, higher interest expense, increased D&A, and a higher effective tax rate.

- **What to look for in the earnings report (Key debates/themes):**
  - **Q4 expectations**: We expect ETR to revisit its current 2023 EPS guidance as well as refresh its long-term EPS (6-8% CAGR through 2025), capex, rate base, and financing outlooks. At the EEI conference in November 2022, the company rolled forward its three-year capital plan to 2023-2025 as well as its rate base outlook and provided drivers for its 2023 EPS guidance.
  - **Hurricane Ida Louisiana cost recovery**: On January 29th, the commission voted 3-2 approving recovery of all but $180MM of the $1.6B of storm costs, which was the NPV of storm ADIT benefits and not a disallowance. ETR has used this net securitization approach before for Hurricane Rita costs in Texas.
  - **SERI update:** On December 23rd, the FERC issued orders regarding the SERI sale leaseback and uncertain tax position case. Entergy believes the orders are a positive step toward resolving a number of long-standing issues raised by its retail regulators. The company said that while it disagrees with some elements of FERC's findings, in particular its ruling on the sale leaseback claim, it is pleased that FERC's remedy results in no additional refunds due to customers beyond those already provided in 2021 on the uncertain tax positions taken by SERI.
    - Regarding the uncertain tax position issue, FERC's orders address a series of decommissioning uncertain tax positions that SERI said it took in order to benefit customers. SERI assumed the risk of Internal Revenue Service penalties and interest that could have resulted from unsuccessful portions of these positions. The IRS ultimately allowed over $100MM of an uncertain tax position SERI took in 2015. The remedy in FERC's order directed SERI to compute a refund based on the accumulated deferred income tax, or ADIT, amounts resulting from the IRS's partial allowance of SERI's 2015 decommissioning uncertain tax position. Consistent with FERC's order, upon resolution with the IRS of the 2015 uncertain tax position, SERI began to provide an ongoing rate base credit for the ADIT associated with the successful portion of the uncertain tax position, which is estimated to result in a benefit of $69MM to customers over the remaining expected life of Grand Gulf. Additionally, in 2021, SERI provided a one-time credit of $25MM inclusive of interest for the ADIT created by the 2015 decommissioning uncertain tax position, which is consistent with the directives of FERC's order. Therefore, SERI's position is that it has already satisfied the remedy required in FERC's order. The FERC's order also specified that the remedy must not "reestablish" ADIT balances for tax positions that were denied by the IRS, as SERI received no tax benefits from tax positions that were not successful. Beyond the partial acceptance of the 2015 tax position, the IRS did not allow any portion of SERI's other decommissioning uncertain tax positions. Under the remedy specified by FERC, for uncertain tax positions that the IRS fully disallowed, and for which SERI received no tax benefits, no refunds are due. Entergy therefore calculates the remaining refund for the uncertain tax positions issue to be zero dollars. Litigators in the case are calling for $800MM in additional refunds ($450MM additional refunds taking into account SERI's previous settlement with the Mississippi PSC). SERI intends to file a compliance refund report reflecting that calculation as required by the order, which FERC will review and address in a future order (expected in 60 days from 12/23/22).
    - On the sale leaseback case, the order calls for SERI to refund approximately $149MM, including interest, resulting from the disallowance of $17MM in annual lease payments from 2015 through 2022. Taking into account SERI's previous settlement with the Mississippi PSC, the total sale leaseback refund amount is $89MM. The order also states that SERI can no longer collect $17MM in annual lease payments on a prospective basis. Net of the Entergy Mississippi settlement, the prospective exclusion would be $10MM annually (or $0.03 EPS hit). SERI disagrees with this ruling and will seek rehearing. Regarding the financial impacts of these FERC orders, assuming there are no changes to either order upon rehearing, Entergy reaffirmed its adjusted EPS guidance for 2022 and adjusted EPS outlooks for 2023-2025.
- **Resiliency spending:** The current five-year $25B capex program includes $2.2B of accelerated "resiliency" spending, with potential upside to $4B based on planned regulatory filings. Entergy New Orleans filed for $1.5 billion in investment over ten years in the third quarter with a final decision expected in Q42023. Entergy Louisiana recently filed in December 2022 for $9B in investment over ten years. Entergy Texas is expected to file by mid-2023.

- **Positioning into Qtr: Neutral**.

EVERSOURCE

Outperform **TP $92**
Analyst: Durgesh Chopra / Sharon Wang

- **Q4 EPS Bridge:** We project year-over-year EPS to increase by $0.01 to $0.92, which would result in full-year 2022 EPS of $4.09, matching the midpoint of the company's full-year $4.04 to $4.14 guidance. We expect positive drivers to include increased transmission earnings, rate increase at NSTAR electric and gas companies, and trackers. Negative drivers include higher depreciation and property taxes, debt interest expense, share dilution, $10 million corporate contribution, and storm damage,

- **What to look for in the earnings report (Key debates/themes):**
  - **Q4 expectations**: We expect ES to issue 2023 EPS guidance, update capex plan and rate base growth outlook. We expect extension of the upper half of 5-7% EPS growth target through 2027(vs 2026 currently) with the potential of achieving the top end of the range. The company is likely to provide an update on offshore wind strategic review and the remaining $0.5B incremental capex to fill offshore earnings loss (As of Q3 ES identified $2.5B of investment opportunities with $0.5B remining to be identified to replace the offshore earnings loss).
  - **NSTAR Electric rate case**: In Nov, MA Department of Public Utilities (DPU) granted NSTAR Electric (Eversource's MA subsidiary) a $64M rate increase effective Jan 1.2023. The allowed ROE was modestly lowered to 9.8% versus 10% currently and the DPU accorded the requested equity ratio of 53.21%. The order also renews the Performance based ratemaking (PBR) plan for a total of five consecutive years starting January 1, 2023, with the last adjustment taking effect on January 1, 2027. Under the PBR framework, the company can adjust rates annually based on established performance metrics with a revenue cap tied to inflation. The PBR also calls for earnings sharing mechanism whereby If the Company's actual ROE exceeds the authorized ROE by more than 100bps, the earnings above the 100bps dead band will be shared 75 percent with customers and 25 percent with the Company. We view the outcome as constructive, striking the right balance between investor and customer interest. In a separate order issued in November, the DPU also authorized company's proposed AMI spending of $535M through 2028 (versus ask of $575M) which would be incremental to the current five-year plan.
  - **Offshore wind strategic review:** The strategic review of the offshore wind investment portfolio is advancing, which could result in a potential sale of all or part of Eversource's 50% interest in offshore wind joint venture with Ørsted. ES said they are working closely with potential buyers and seeing great interest in the assets, as their wind assets are more mature in the market and over 85% contracted now. We estimate up to $3-3.5B in proceeds from the sale of Eversource's share. Sale proceeds would be used to fund incremental capex opportunities (AMI, onshore transmission, etc.) and/or reduce current financing needs. We will look for an update on the year-end call, but management suggested they may not have completed the review by then.
  - **$3B incremental Capex to offset offshore earnings loss:** By 2026, incremental investments required to replace the earnings contribution from offshore wind will be approximately $3B above the current $18B capital forecast. This aligns with company's guidance in February, where wind business was expected to contribute ~$150 million in 2026, translating to $3B capex requirement from a regulated standpoint to offset the divestiture of offshore wind using a ~50% equity layer and 10% ROE. Eversource feels confident to reach this level of investment as $2.5B in higher spending is now identified, which includes 1) $1.1B AMI spending where approval was granted in MA and the company is still waiting for authorization in CT. 2) $0.5B in transmission interconnection spending of which they already have approval for $0.2B; 3) $0.9B in DER related spending with a $150M project approved recently and the and remaining five projects totaling $750M to be decided by the commission this year.
  - **Advanced Meter Infrastructure (AMI).** In CT, ES targets all customers on AMI during 2022-2026 with capital investment of approximately $475 million. Decision is expected sometime this year (vs Q4 2022 previously). In November, the MA DPU authorized company's proposed AMI spending of $535M through 2028 (versus ask of $575M) which would be incremental to the current five year plan
  - **Aquarion rate case**: Aquarion Connecticut rate case was filed on August 29, 2022, which is its first rate review in roughly 10 years. Revenue deficiency is $27.5M in year 1 and $22.4M over 2 subsequent rate years with a 10.35% ROE and a 53% Equity Layer. Expected decision date is March 15, 2023. In January, the Attorney general recommended that the Commission should reject Aquarion's rate increase. The Office of Consumer Counsel suggested that company's requested ROE of 10.35% should be reduced to 9.00% or lower.
- **Positioning into Qtr: Neutral.**

evergy

In Line **TP $62**
Analyst: Durgesh Chopra / Sharon Wang

- **Q4 EPS Bridge:** we project year-over-year EPS to increase by $0.14 to $0.30/share, which would result in full-year 2022 EPS of $3.75, above top end of the company's full-year $3.53 to $3.63 guidance. Overall weather is close to normal. Key positive YoY factors are returning to normal weather, lower O&M offset by higher D&A, interest and Sibley related drag.

- **What to look for in the earnings report (Key debates/themes):**

  - **Q4 expectations**: We expect EVRG to issue 2023 EPS guidance, reaffirm its long-term EPS growth forecast (currently 6-8% CAGR through 2025, unlikely to get extended), roll over capex plan to 2027 and update rate base growth outlook. The company pointed to $0.08 of EPS hit ($0.05 Sibley related disallowance and $0.03 other items) from the MO rate order which combined with our estimated higher interest expense impact of $0.10-$0.12 represents a total $0.20 (or 5% of our 23E) headwind for 2023. Management stated they will try to find offsets largely around O&M savings and provide guidance on the Q4 call. Company mentioned the true inflection point that will impact their outlook and perspective on the mix of capital expenditures is going to be IRP update in the second quarter, which would support more owned renewable generation.

  - **Kansas rate case**: Evergy is preparing to file Kansas Central and Kansas Metro rate cases in late April 2023. We expect to see staff testimony in August. The Company expects a test year ending September 30, 2022, and the true-up date around June 30, 2023, with new rates becoming effective in December 2023.

  - **Annual update to IRP:** EVRG will file an annual update to its IRP for both states in Q2 this year, which will include the impact of IRA, higher commodity curves, and increased SPP (Southwest Power Pool) capacity margin requirement, which are the factors that can be more supportive of EVRG owning more renewables. Recall that in June 2022, Evergy filed an annual update to its Missouri and Kansas IRP. The Company's preferred plan for the next decade is consistent with the resource plan laid out in 2021 triennial IRP filing and the renewables development discussed during EVRG's Investor Day in Sep 2021. The minor tweaks in the plan reflect updates to the sequencing of near-term investments. Specifically, Evergy shifted the 190 MW solar edition and the Lawrence 4 coal retirements to 2024, primarily due to the dynamic market conditions facing the solar supply chain and the benefits to customers of keeping Lawrence 4 online with current high natural gas prices. In 2026, Evergy shifted a planned solar project to wind and increased the capacity assumption for the project by 100 MWs. Beyond 2026, the Company slightly reduced megawatt assumptions for its solar projects, which on a net basis offset some upward pressures on pricing. Overall, by the end of 2032, Evergy's preferred plan now includes 3,500 MWs of renewable additions while also retiring nearly 2,000 MWs of coal. A pre-determination filing is likely to be made this year to accommodate the updated IRP plans for the Lawrence 4 retirement and the delay in the solar additions. The delay from 2023 would not have a meaningful impact on earnings expectations as the structure for new solar was expected to contribute <$0.01 to annual EPS in both 2024 and 2025.

Outperform **TP $46**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q4 EPS Bridge:** We project 4Q22 adjusted EPS of $0.41/share for Exelon, which as a reminder is now a standalone utility that has been reporting as such for the fourth time since 1Q22 following its separation from GenCo in February 2022. Our 4Q22 EPS estimate would result in a full-year 2022 EPS of $2.25/share, which matches the midpoint of the company's full-year guidance range of $2.21-2.29/share. We expect weather to be favorable this year in 4Q22 versus normal. However, weather is not a major driver of earnings for EXC given that roughly 75% of it is decoupled. In terms of the primary positive YoY drivers, we expect higher rates and a benefit in Illinois from the increased 30-year Treasury rate. We see the primary negative drivers being higher O&M and increased interest expense.

- **What to look for in the earnings report (Key debates/themes):**

  - **Q4 expectations**: We expect EXC to issue 2023 EPS guidance as well as roll forward and update its long-term EPS (6-8% CAGR through 2025), dividend, capex, rate base and financing outlooks.
  - **Leadership change:** CEO Chris Crane retired from his position as CEO and as a director of the Exelon Board on December 30th. The Exelon Board elected Calvin G. Butler Jr., previously president and COO, to the role of president and CEO on December 31st. Butler stated that he is focused on executing on the existing plan.
  - **Illinois multi-year plan rate case filing**: On January 17th, ComEd filed its Illinois electric distribution multi-year rate plan asking for base rate revenue requirements of ~$3.8B in 2024, $3.9B in 2025, $4.1B in 2026 and $4.4B in 2027. ComEd's requested revenue requirements are based on requested returns on common equity of 10.50%, 10.55%, 10.60%, and 10.65% in 2024, 2025, 2026, and 2027, respectively, and on capital structures that reflect between 50.58% and 51.19% common equity. The approved revenue requirements will be reconciled to actual costs incurred during each such year, subject to certain limitations and to ICC review, in accordance with law. In the filing, ComEd will ask the ICC to phase-in the new rates by deferring 35% of the 2024 base rate increase, with that amount being recovered in 2026. The ICC must review the Rate and Grid Plans in a proceeding on a consolidated basis and issue a decision by mid-December 2023. On September 27, 2022, the Illinois commission issued performance incentives for Exelon (see our note).
  - **Equity needs**: Exelon still expects to issue no more than $1B of equity through 2025, and just $425MM remains. The issuance plan is intended to target a 2022-2024 average FFO to debt of 13-14% for S&P's current BBB rating, which has a downgrade threshold of 12%, and CFO (pre-WC) to debt of 13-14% for Moody's current Baa2 rating which has a downgrade threshold of 12%.
  - **Delmarva rate cases**: In October 2022, Exelon received a final order in its Delaware gas rate case for a ~$13.4MM rate increase with a 9.6% ROE and 50% equity ratio, both in line with previously levels. In December 2022, the Maryland commission approved a partial settlement for a $29MM cumulative revenue increase over the 2023-2025 period with a 9.6% ROE (current is also 9.6%) and 50.5% equity ratio (not disclosed currently). In December 2022, Exelon filed a Delaware electric rate case, requesting a $72MM revenue increase with a 10.5% ROE and 50.5% equity ratio on a rate base of $1.1B with a test year of 6/30/23. A final decision is expected by year-end 2023.
  - **Expected future rate case filings**: ComEd expects to file for reconciliation of 2022 actual costs in April 2023 through its final rider filing. Final orders are expected from the Illinois commission by December 2023. BGE expects to file its second gas and electric multi-year plan in 1Q23 for rates effective 2024-2026. BGE expects this filing to include a reconciliation from its first multi-year plan. Final orders are anticipated in December 2023. Pepco DC expects to file its second multi-year plan in 1H23 (upon conclusion of the PSC's stay-out provision) for rates effective 2024-2026. Pepco DC expects to file a reconciliation from its first multi-year plan. Pepco MD expects to file a second electric multi-year plan in 2Q23 for rates effective 2024-2026. Pepco MD expects this filing to include the reconciliation of year one of its multi-year plan. A final order is anticipated by March 31, 2024.
  - **AMT Impact from the Inflation Reduction Act**: Exelon has said it expects a $200MM per year cash flow hit from the AMT provision in the law.

- **Positioning into Qtr: Neutral.**

FirstEnergy

Outperform **TP $48**
Analyst: Michael Lonegan / Durgesh Chopra

- **Q4 EPS Bridge:** We project year-over-year EPS to increase +$0.05 to $0.56/share, which would result in $2.48/share for the full-year 2022, the top half (company also said top half) of full-year guidance of $2.30-2.50/share. Weather is not expected to be materially different than normal. In terms of positive YoY divers, we anticipate FirstEnergy will benefit from higher rates from Ohio grid modernization, plus Pennsylvania and transmission rate base growth, as well as increased Signal Peak earnings. In terms of negative YoY drivers, we expect the primary impacts to be accounting policy changes for vegetation management and corporate support, the Ohio prospective rate reduction, higher O&M expense, loss of earnings from the FET sale, and share dilution from the equity financing transaction in November 2021.

- **What to look for in the earnings report (Key debates/themes):**
  - **Q4 expectations**: We expect FE to update its 2023 EPS guidance, including the impact of pension expense. We do not anticipate the company will extend its forecasts beyond the existing 2025 year for EPS, capex and rate base until a new CEO is well situated in his/her role. FirstEnergy plans to announce an EPS-accretive sale of a minority interest in a transmission or distribution asset by January 31st and said it could announce a new CEO as early as the 4Q22 call on February 14th.
  - **CEO search**: FirstEnergy said the Board's external search is narrowed down to 2-4 candidates, and it expects to make an announcement as early as the 4Q22 earnings call. The key attributes the Company is looking for include a strong track record of executive leadership within the utility industry, a demonstrated ability to execute on the regulatory front, leading operational and financial discipline, and high credibility with external stakeholders. Candidates have included existing and retired utility executives.
  - **Planned asset sales**: FirstEnergy plans to announce an EPS-accretive sale of a minority interest in a transmission or distribution asset by January 31st. The company has been saying that it was leaning towards divesting part of a transmission asset. The sale is expected to accelerate FirstEnergy's post-2023 credit metric target for FFO to debt of 14-15% into this year (currently targeting 13% this year). We think a divestiture could fetch as high as 35-45x and 25-35x LTM P/E valuation, respectively. Proceeds could be used to pay down HoldCo debt, avoid additional debt at the utilities, and fund capital projects.
  - **Pension update**: For the full-year 2022, FirstEnergy said to assume the same 2023 EPS impact of $0.45 that it had stated as of September 30th. On the third quarter 2022 call, the company said that the headwind from the qualified pension plan had increased from $0.30/share as of June 30th to approximately $0.45/share as of September 30th. FE had said it was confident in its previously outlined mitigation plan to address the $0.30/share and stated that it had captured the majority of it already. This includes costs FirstEnergy had already begun accelerating into 2022, the benefits from its balance sheet improvement efforts, specifically the $1 billion of high coupon debt that FE retired in June 2022, and the expected uplift from other corporate cost reductions and earnings from its legacy investment in the Signal Peak mining operation. At our Utility CEO conference earlier this month, the company stated that it had not given up on offsetting the full $0.45 as Signal Peak earnings are expected to be higher than previously anticipated for 2023. FirstEnergy said that it was continuing to contemplate longer-term regulatory approaches to moderate the impact of market volatility on its pension plan. The funded status of FE's qualified pension plan was 81% as of the third quarter of 2022, lower than the 84% as of the second quarter of 2022. There are no expected cash contributions through 2024.
  - **FE was awarded onshore transmission investment (incremental to plan) to support New Jersey offshore wind.** On October 26th, FirstEnergy was awarded $723 million in investment opportunity by the New Jersey Board of Public Utilities for onshore wind transmission projects to support offshore wind development off the coast of the state. FE stated that this spending would likely begin in late 2024 or in 2025 and that it would be incremental to its long-term capital plan. The Company also has the option to buy a 20% stake in an offshore wind transmission project being developed by Mid-Atlantic Offshore Development, which is 50:50 partnership between Shell New Energies US, LLC and EDF Renewables North America.
  - **Ohio audits and SEC investigation:** As known, the four Ohio audits are stayed until February 2023.The SEC investigation remains ongoing with no timeline for a decision.
  - **Strong Signal Peak mining results**: FirstEnergy's Signal Peak coal mining legacy investment in Montana dates back to the late 2000s with the Company as a minority investor with a 33% share in the facility. Historically, the mining business has not been a significant driver of earnings. However, given higher commodity prices, the mine had been outperforming expectations for 2022 (through the third quarter) with both earnings and cash distributions, which has provided flexibility to accelerate reliability and maintenance work in the distribution business. FE originally assumed $0.10/share of EPS this year from this business, and zero earnings contribution in 2023 and beyond. The company has most recently said it was expecting $0.20-0.25/share in 2022 and expects an even higher contribution this year. FE has generally been looking at exploring how to transition out of the facility over time, but it is a challenge to do given lack of interest in coal.

- **Positioning into Qtr: Neutral.**

This report is prepared solely for the use of Michael Weisenburger

In Line **TP $39**
Analyst: Michael Lonegan / Durgesh Chopra

- **Q4 EPS Bridge:** We project year-over-year EPS to increase -+0.06 to $0.56/share, which would bring them to full-year 2022 EPS of $2.24/share or above the top end of $2.02-2.20/share. In terms of positive drivers, we primarily expect higher ARA revenues. We anticipate the primary negative YoY drivers to include higher interest expense, increased O&M, higher depreciation, increased property taxes, and a fuel cost risk-sharing penalty at the utilities. We expect bank provisioning expenses to have a relatively neutral impact for the quarter with -$700,000 YTD versus -$3 million to +$3 million guidance for the full-year.

- **What to look for in the earnings report (Key debates/themes):**

  - **Q4 expectations**: We expect Hawaiian to issue 2023 EPS guidance, including its typical breakouts for the utility, bank and HoldCo. The Company is expected to update its long-term forecasts for EPS, capex and rate base. HE also typically provides an update to its current-year equity issuance plan.
  - **New CFO announcement**: Hawaiian recently announced (effective January 1st) the appointment of Paul Ito as CFO. Ito had been serving as the interim CFO since July 2022. He has been with HE since 2018, and has served as vice president of tax, controller and treasurer. Ito has led the accounting, financial reporting, tax and treasury functions, and provided support in the enterprise risk management, investment analysis, and strategic and operating plan functions. He also managed information technology efforts, digital transformation initiatives in accounting, tax and financial reporting.
  - **Hawaiian economy and American Savings Bank (ASB):** The strength of the Hawaiian economy has large implications for the bank; recall the utilities are decoupled. The University of Hawaii Economic Research recently published a report highlighting a potential US recession where Hawaii itself may not experience one because of an increase of international tourism (offsetting lower from the US) which has remained low. The University stated that is expects relatively strong government spending. American Savings Bank reported Q4 earnings on January 30th and reported $80MM in net income for the full year 2022, which would equate to roughly $0.73/share, the lower half of $0.72-0.76 guidance.
  - **Utility EPS growth and regulatory lag**: With Q3 results, Hawaiian rescinded its expectation for 2022-2024 earnings growth of 5% with upside from Performance Incentive Mechanisms (PIMs), just stating that it is currently going through its annual process of refreshing its long-term forecast and will provide an update along with 2023 guidance in February 2023. HE has previously said it continues to expect the utilities to grow EPS by 5% per year starting in 2022 through 2024, excluding any upside from PIMs, which are expected to materially improve regulatory lag, a persistent problem for the Company.
  - **PIMs:** Hawaiian has stated that there is the potential for a moderate net penalty from PIMs in 2022 driven the most by a maximum fuel cost risk sharing penalty expected given high fuel prices.
  - **Cost management**: HE has been implementing aggressive cost management to respond to the inflationary and interest rate environment. Higher generation cost is being offset by savings in labor, outside services, and leased space expense. For the utility, 2022 adjusted O&M excluding pension has been expected to be moderately above than ARA allowed levels. Hawaiian accelerated long-term-debt financing to ensure adequate liquidity and pre-fund a December 2022 maturity.
  - **Oil price impact on customer bills**: While HE has aggressive renewable and decarbonization targets to be net-zero by 2040, currently about 50% of its generation is derived from conventional oil-fired steam units. While oil prices have come down some, they remain elevated and electric bills are significantly higher than have been in recent years, which as mentioned could potentially result in higher bad debt expense as well as drive a maximum penalty from HE's fuel cost risk sharing mechanism.
  - **Capex and supply chain**: With third quarter results, Hawaiian stated that it anticipated that 2022 capex would be $350-375 million, down from the $350-400 million range previously, due to headwinds from continuing supply chain disruptions, customer work delays, resource availability constraints, and permitting delays. The Company had said that it now expected 2023 capex to total $370-410 million, down $10 million from $380-420 million previously, and 2024 capex to be $320-420 million, down $10 million at the top end of the range from $320-430 million previously.
  - **Stage 2 and 3 RFPs**: Hawaiian has now filed 10 PPAs for solar and storage and two self-build storage application. The state's commission has now approved six PPAs and one standalone storage ESPPA under active development. The Stage 2 RFP has the potential to add 382 MW of solar and 2 GWh of storage by the end of 2023. Draft Stage 3 RFPs have been filed totaling 1605 GWh/yr of variable renewable dispatchable energy and 540-740 MW of renewable firm capacity.
  - **Major projects:** HE has pending filings for major projects as it relates to public EV charging, self-build storage and resiliency, for which decisions are expected in 2023.

- **Positioning into Qtr: Neutral.**

NiSource

Outperform **TP $31**
Analyst: Durgesh Chopra / Sharon Wang

- **Q4 EPS Bridge**: We project year-over-year EPS to increase $0.09 to $0.48. Recall that NiSource adjusts weather out of its non-GAAP EPS results. In terms of negative YoY drivers, we expect higher O&M, increased depreciation & amortization, higher interest expense, and share dilution. We expect rate relief and other income to be the primary positive drivers.

- **What to look for in the earnings report (Key debates/themes):**

  - **Q4 call expectations:** We expect NI to provide an update on the minority interest sale of NIPSCO. We also expect the company to reaffirm its 2023 EPS guidance, long-term EPS growth target (6-8% through 2027), dividend, capital plan and financing outlooks issued at its Investor Day last year.

  - **Minority Interest sale**: NI announced minority interest sale of NIPSCO (up to 19.9%) in a tax efficient transaction to strengthen the balance sheet, which is expected to be completed in second half of 2023. The company has initiated the sale process, and we expect an announcement by mid-year and close by year-end. We estimate $1.5-$2B in cash proceeds.

  - **OH rate case**: On Oct 31st, 2022, Columbia Gas of Ohio filed a settlement representing a $68.2M revenue increase with 9.6% ROE and 50.6% equity layer, rates are expected to be implemented in early 2023. The company originally requested $221MM with ROE of 10.9%. The equity ratio request of ~51% was not disputed. NI currently has an allowed ROE of 10.4% and equity ratio of 51% in Ohio. Hearings were held on Nov. 16, 2022, and the commission approved the settlement last week.

  - **NIPSCO Electric rate case:** On Sep 18th, NIPSCO Electric rate case was filed in Indiana, requesting rate increase of $292M with a 10.4% ROE and 53.2% equity ratio on a rate base of $5.95B. The settlement deadline is Feb 27th, and hearings begin on March 13th. The company expect to get a final order by mid-July. The company expects rates to go into effect in the fall of 2023, and the second tranche in spring of 2024.

  - **Virginia gas rate case**: On Dec 9th, Columbia Gas of Virginia reached a settlement with $40.3 million rate increase, inclusive of SAVE (Steps to Advance Virginia's Energy Plan) infrastructure tracker ($14.5MM), representing a settlement as to a specific revenue number but not as to a specific ROE. Recall that NiSource requested $40.6MM revenue increase net of the SAVE infrastructure tracker ($17.7MM) with a 10.75% ROE and 39.3% equity ratio on a rate base of $1.0B with a 12/21 test year. An order is expected in 1Q23.

  - **Pennsylvania gas rate case:** In Dec 2022, the settlement proposing rate increase of $44.5M was approved. Columbia gas of PA will use the ROE for gas utilities contained in the Commission's most recent Quarterly Report on the Earnings of Jurisdictional Utilities and will update the ROE each quarter. The company initially requested a revenue increase of $82.2MM on Mar 17th, with an 11.2% ROE and 54.38% equity ratio on $3.0B forecasted rate base with a 12/22 test year.

  - **Maryland rate case:** In November, NI received final order approving settlement in Maryland gas rate case with $4.8M rate increase (vs $6.7M requested), ROE of 9.65% (vs 10.95% requested), equity layer of 52.97% (vs 52.97% requested). New rate went into effect in December.

  - **O&M management:** NI projects O&M to be flat from 2023 to 2027, which supports average annual customer rate increases of <3% annually and provides bill headroom for customer and reliability related investments. They also plan to invest ~$1B in IT systems to support field and customer service enhancements and productivity.

- **Positioning into Qtr: Neutral.**

In Line **TP $42**
Analyst: Durgesh Chopra

- **Q4 EBITDA Bridge:** We project NRG's 4Q22 EBITDA to be $431MM, which would bring full-year 2022 EBITDA to $1,750MM which is $200MM lower than NRG's targeted $1,950MM, or the low end of the $1,950-$2,050 guidance range. We estimate $100MM lower generation EBITDA (vs guidance) from lower than forecasted power prices in Texas and model another $100MM EBITDA headwind related to PJM Dec plant outages.

- **What to look for in the earnings report (Key debates/themes):**
  - **Q4 expectations:** We expect NRG to revisit base business 2023 EBITDA guidance range of $2.27-2.47B. If VVNT acquisition is closed by the time of earnings release, we would expect NRG to share 2023 expected contribution from the newly acquired business line. NRG has also said that they will provide more clarity around their targeted 15-20% free cash flow per share growth through 2025.
  - **VVNT acquisition:** On 12/06/22, NRG announced that they have entered into a definitive agreement to acquire Vivint Smart Home, Inc (NYSE: VVNT) for $2.8B or $12/share in an all-cash transaction ($5.2B Enterprise Value including VVNT's debt). The acquisition price of $12/share represents a ~33% premium to VVNT's closing price of $8.99 on 12/05/22. NRG's expected annual run-rate EBITDA is $835mm (including $100mm of assumed synergies to be realized by '25), representing a transaction multiple of 6.3x EV/EBITDA with a 16% FCF Yield (or 7.2x EV/EBITDA pre-synergies). Management plans to finance the acquisition with a mix of debt, hybrid securities ($2,290mm), and cash on hand ($600mm). The transaction is expected to close in 1Q23 and is subject to antitrust review under the Hart-Scott-Rodino (HSR) act
  - **$1 Billion Share Repurchase Program.** As of 12/06/22, NRG had completed $640MM in share repurchases with $360MM remaining to be executed in 2023.
  - **Parish Unit 8 Fire.** On May 9th, 2022, a fire was reported at Unit 8 at the WA Parish coal-fired power plant in Texas. The fire tripped the 610MW unit offline as designed, which translated into a $70MM headwind for the quarter and $200MM projected for the whole year. NRG is still targeting to return the unit to service by the end of the second quarter of 2023.
  - **PJM Plant Outage:** The PJM said on January 11th that it had an "unacceptably high" level of power generation resources unavailable for the Dec. 24, 2022, morning peak amid extremely cold weather. For those that did not perform as promised when called upon to do so, the grid operator said it expects to levy between $1 billion and $2 billion in fines. Our preliminary estimate is $100MM EBITDA hit for NRG's assets that failed to meet the performance requirement during the winter storm.

- **Positioning into Qtr: Neutral.**

This report is prepared solely for the use of Michael Weisenburger

In Line **TP $39**
Analyst: Durgesh Chopra / Sharon Wang

- **Q4 EPS Bridge:** We project year-over-year utility (plus parent) EPS to increase +$0.05 to $0.22/share, which would bring full-year 2022 EPS to $2.14, higher than top end of $2.08-$2.12 guidance. Note our full-year 2022 EPS estimate excludes ET contribution. We expect weather to be more favorable this year. Positive drivers include securitization of 4 cents and transmission reserve of 2 cents in the fourth quarter last year, FRP Rider (Formula Rate Plan Rider) in Arkansas, grid enhancement rider in Oklahoma, rate case went into effect in mid-2022, and customer growth. Negative drivers include O&M and D&A.

- **What to look for in the earnings report (Key debates/themes):**
  - **Q4 expectations:** We expected OGE to issue 2023 EPS guidance, extend LT EPS growth rate target (5-7% through 2026), and update capex and financing plans.
  - **Oklahoma fuel rate case.** OGE adjusts its fuel factor once a year. Since the balance (over-recovered or-under recovered) became greater than $50 million, OGE filed for interim factor update in Sep 2022. Oklahoma Corporation Commission initiated a Show Cause docket because of the recovery size, regarding OGE's request to recover ~$450 million in higher fuel costs over 24 months ending in Oct 2024. OGE submitted their factors again in December adjusting the unrecovered fuel balance to $460 million, which was approved by the Commission staff for recovery starting Jan 1, 2023, over the original recovery period through Oct 2024.
  - **Uri proceeds.** Winter Storm Uri bond proceeds of $750MM in Oklahoma were received in July 2022. In Arkansas, the Company had filed a request to recover $80MM of Uri costs over ten years at a weighted average cost of capital (WACC). On Jan 2nd, 2023, commission authorized OGE to recover the remaining balance of ~$64 million at WACC over eight years.
  - **Energy Transfer unit exit:** As of September 30, 2022, OGE Energy sold all 95.4 million Energy Transfer limited partner units acquired in the merger between Energy Transfer and Enable in December 2021. OGE Energy no longer has any ownership interest in Natural Gas Midstream Operations and has transformed to a pure-play electric utility. Realized average pre-tax sales price of $11.19 per unit compared to $8.32 per unit (+34%) on the transaction close date and $6.96 per unit (+61%) on transaction announcement date, which translates to ~$1.07B proceeds in total.
  - **Re-issued solar RFP:** OGE re-issued the solar RFP last year to incorporate favorable opportunities from the Inflation Reduction Act. The company received multiple bids in early November. Decision is expected in May 2023. Management said they will review the three active RFPs (solar, CT units, and existing resource) for long-term generation holistically as their service area continues to grow combined with the increased reserve margin requirements, and they will provide an update once they review the results from all the RFP's.
  - **Limited interest rate exposure:** OGE is targeting 18-20% FFO to debt ratio. Due to Energy Transfer unit exit and increased capital plan, the company will start to grow holdco debt over the years. OGE has less than $200 million of floating-rate debt. In terms of refinancing risk, the company has no fixed-rate debt maturity through 2026.
  - **Natural gas storage plan:** Following storm URI in 2021, OGE started to build up and acquire more physical gas storage capabilities. The company said they will continue to take the opportunities to build and fill their physical storage capability which can help with supply shortages caused by extreme weather or outages.

- **Positioning into Qtr: Neutral.**

PINNACLE WEST CAPITAL CORPORATION

Underperform **TP $73**
Analyst: Michael Lonegan / Durgesh Chopra

- **Q4 EPS Bridge:** We project year-over-year EPS to decrease by -$0.34 to -0.10/share, which would result in full-year 2022 EPS of $4.38, above the top end of $4.25-4.35 guidance. In terms of negative YoY drivers, we expect Pinnacle to see the impact of significantly lower rates, higher O&M expense, increased D&A, higher property taxes, increased interest expense, and a headwind from LFCR. In terms of positive YoY drivers, we primarily expect sales growth and higher AFUDC.

- **What to look for in the earnings report (Key debates/themes):**

  - **Q4 expectations**: PNW said it is leaning towards issuing 2023 EPS guidance, which would be a change from prior practice where the company had not issued current-year guidance during a pending rate case. Pinnacle West also said it may roll forward its long-term EPS growth forecast (5-7% EPS CAGR through 2026) and, as it typically does, also roll forward its capex plan and rate base outlook. PNW may also provide an update to its financing plan. In addition, we anticipate Pinnacle West will update current-year and long-term customer / sales growth.
  - **New Arizona commissioners**: Republicans Kevin Thompson and Nick Meyers recently won the election of the Arizona Corporation Commission. Incumbent Democrat Sandra Kennedy lost her seat. The Commission is now a 4:1 Republican majority and Pinnacle West feels constructive about this outcome. The commissioners have signaled support for the utility during the election process as well as during the swearing in ceremony.
  - **Arizona rate case:** The Company filed its Arizona rate case on October 28th and key highlights include: Requested net revenue increase of 460 million; Equity ratio of 51.93% (versus current 54.67%); ROE of 10.25% (versus current 8.7%); ACC adjusted rate base of $10.5 billion with test year ended June 30, 2022; A 1% return on the increment of fair value rate base above APS's original cost rate base, as provided for by Arizona law; Modification of its adjustment mechanisms including the elimination of the Environmental Improvement Surcharge and collection of costs through base rates; Eliminating the Lost Fixed Cost Recovery mechanism and collecting costs through base rates and the Demand Side Management Adjustment Charge ("DSMAC"); Maintaining as inactive the Tax Expense Adjustor Mechanism; Maintaining the Transmission Cost Adjustment mechanism; Modifying the performance incentive in the DSMAC; Modifying the Renewable Energy Adjustment Charge to include recovery of capital carrying costs of APS owned renewable and storage resources; Changes to its limited-income program, including a second tier to provide an additional discount for customers with greater need; using a Twelve months of post-test Year plant to reflect used and useful projects that will be placed into service prior to July 1, 2023. Staff testimony is due May 22nd and hearings are set for August 2nd. APS requested that the increase become effective December 1, 2023.
  - **Strong sales growth:** With third quarter results, Pinnacle West's sales growth forecast for 2022 was increased to 2-3% versus 1.5-2.5% previously under the same 1.5-2.5% retail customer growth outlook. For 2022-2024, the Company still assumes retail customer growth of 1.5-2.5% and weather-normal retail sales growth of 3.5-4.5%.
  - **O&M expense amid inflation:** Pinnacle West continues to target declining O&M per kWh (with respect to 2021 levels) over its long-term plan. The company had previously also targeted flat nominal O&M, but inflation has presented a challenge to achieving that.
  - **Arizona rate case appeal:** PNW has an outstanding appeal for a prudency determination made on SCRs as well as reduction of ROE as penalty. Oral arguments were held in November 2022, with a final decision date unknown but likely within the next few months.

- **Positioning into Qtr: Neutral.** We expect the beat versus current consensus to be driven by favorable weather.

Adj. EPS	2020A	2021A	1Q22A	2Q22A	3Q22A	4Q22E	2022E	2023E	2024E	2025E

Source: Evercore ISI, FactSet as of 1/31/23

This report is prepared solely for the use of Michael Weisenburger

Outperform **TP $32**
Analyst: Durgesh Chopra / Sharon Wang

- **Q4 EPS Bridge:** We project year-over-year ongoing EPS to increase by $0.06 to $0.28, which would result in full-year 2022 EPS of $1.40/share, matching the midpoint of the company's $1.35-1.45/share guidance, driven by addition of Rhode Island Energy and sales volumes, O&M savings, partially offset by less favorable weather than last year, and higher depreciation & amortization expense.

- **What to look for in the earnings report (Key debates/themes):**

  - **PPL January Investor Update:** On Jan 11th, PPL extended its long-term 6%-8% annual EPS and dividend growth guidance from 2025 through at least 2026. Company issued 2023 EPS forecast range of $1.50-$1.65, with midpoint representing 7% growth off 2022. Management also announced expected increase to quarterly common stock dividend by 7% to $0.24 per share, with payout ratio of 60-65%. PPL added $2.5 billion of generation replacement and transmission investments to the capital plan through 2026, increasing projected rate base growth rate from 3.5% to 5.6% in 2022 – 2026 timeframe. We view this as a positive update for PPL to accelerate their decarbonization plan, extend earnings growth, while maintaining strong balance sheet with no equity issuance.

  - **Q4 expectations:** We expect PPL to reaffirm its 2023 EPS guidance, long-term EPS growth target, dividend, capital plan and financing outlooks issued in January.

  - **$175M O&M savings target**: Management increased annual cost savings target from $150 million by 2025 to at least $175 million by 2026, driven by continued deployment of technology and T&D operational playbook. PPL continues to see additional opportunities to scale and drive incremental savings longer term.

  - **Financing plan**: The new plan still calls for no equity issuances while targeting an FFO/CFO to Debt ratio in the range of 16-18%, supportive of Baa1/A- rating at Moody's/S&P respectively. PPL is also targeting holding company debt to remain less than 25% of total debt.

  - **KY CPCN filling**: In Dec, PPL subsidiaries Kentucky Utilities Company and Louisville Gas and Electric Company announced their plan to replace 1,500 MW of aging coal-fired generation by 2028. LG&E and KU are seeking approval from the KPSC (Kentucky Public Service Commission) by Oct.1, 2023. If approved by the KPSC, the proposed replacement plan represents ~$2.1B of investment in Kentucky from 2023-2028. PPL's updated capex plan through 2026 includes $1.6 billion out of the total $2.1 billion KY replacement generation spend and ~$1B of transmission spend in PA and RI.

  - **Additional details on the coal replacement strategy.** The proposal includes building two new 621 MW combined-cycle natural gas plants, building a 120 MW solar array, acquiring another 120 MW array to be developed by a third-party and constructing 125 MW of battery storage. LG&E and KU also plan to secure PPA (Power Purchase Agreement) for over 600 MW of additional solar generation and adding 14 new energy efficiency programs, which would reduce LG&E and KU's overall need for future generation by nearly 200 MW. PPL is also seeking permission to book AFUDC (Allowance for Funds During Construction) on these projects while under construction.

  - **Future rate cases**: 60% of planned capex through 2026 is eligible for recovery through existing regulatory mechanisms including trackers/formula rates, and $175mm in targeted O&M savings will account for return on the balance of the spending, such that there will be no major rate cases in PA or KY through at least 2026. PPL plans to file a RI rate case in 2025 for rates to be effective in mid-2026.

- **Positioning into Qtr: Neutral**.

PSEG
We make things work for you.

Outperform **TP $68**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q4 EPS Bridge:** We project year-over-year adjusted EPS to decrease by -0.07 to $0.62/share, which would bring full-year 2022 adjusted EPS to $3.45, matching the midpoint of the guidance range of $3.40-3.50/share. We expect the lower EPS to be driven primarily by loss of earnings from the fossil sale, as well as by the impacts of higher interest expense and reduced capacity revenues.

- **What to look for in the earnings report (Key debates/themes):**

  - **Q4 expectations:** We expect PEG to refine its 2023 EPS guidance. At the EEI conference in November 2022, the company issued long-term 2023-2027 EPS (5-7% CAGR), capex and rate base outlooks, which we expect it to reaffirm with Q4 results and possibly revisit at its Analyst Day this year in March.
  - **Offshore wind Transmission investment:** On October 26th, PEG was awarded just ~$40MM of offshore wind transmission projects by the NJ BPU; the Company had been expecting a much higher $1-3B, however, the BPU also indicated an additional solicitation to consider the state's increased offshore wind generation targets. PEG says it remains optimistic that the Coastal Wind Link's emphasis on reliability and resiliency will keep it as a strong contender for any future transmission solicitations to bring regional offshore wind projects onshore.
  - **Offshore wind generation:** On 01/18/23 PEG announced an agreement to sell to Orsted its 25% equity stake in the Ocean Wind 1 offshore wind project, providing Orsted with 100% ownership of the project. We estimate PEG will receive ~$200MM in proceeds from the sale (PEG's last disclosure was $190MM in their share of spending) upon transaction close, expected in the first half of this year. We think that this announcement increases the likelihood that they could sell their offshore wind leases, which we estimate could fetch $150MM. In total, the $350MM of potential cash inflow would be incremental to PEG's current earnings and financing plan through 2027. Assuming the company uses $350MM in excess cash to pay down debt at 4%, or lower future debt issuances in the plan, we see a small $0.02/share (or less than 1% of our 24E) EPS benefit. While we see a modest EPS benefit, we believe PEG's strategic decision to exit offshore wind and focus on its core utilities and nuclear generation business will be well perceived by investors.
  - **Pension**: PEG said to expect 2023 EPS pension impacts due to higher pension expense to be consistent with the $0.25-0.30 headwind it disclosed at the EEI conference. The Company made a pension filing in September 2022 in New Jersey related to pension treatment that would not change how it accounts for pension but would enable PEG to overlay a regulatory mechanism such that they could offset 20% of the headwind. PEG is also considering a lift-out approach which could mitigate another 20-30% of the impact. The lift-out pension expense mitigation strategy (transferring some pension related assets and obligations to a third party thereby reducing pension expense volatility) being considered is expected to be completed by the Analyst Day early next year. PEG will also look to offset the remaining impact with sustainable O&M reductions. As a reminder, 70% of the company's pension is recoverable through future rate cases, which PEG plans on filing for in early 2024.
  - **Analyst Day**: PEG said it plans to host an Analyst Day in March 2023, where the company will revisit its 2023, long-term outlooks and plans for offshore generation.
  - **PJM Plant Outage:** The PJM said Jan. 11 that it had an "unacceptably high" level of power generation resources unavailable for the Dec. 24, 2022, morning peak amid extremely cold weather. For those that did not perform as promised when called upon to do so, the grid operator said it expects to levy between $1 billion and $2 billion in fines. CEG and PSEG's jointly owned (43%/57% respectively) Salem unit 2 (1.1GW) was offline for a day during the December winter storm. Management stated that while unit 2 was offline for a day, other units operated at higher than normal capacity which would serve to offset any fines/penalties.

Sempra Energy®

Outperform **TP $175**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q4 EPS Bridge:** We project year-over-year EPS to decrease -$0.16 to $2.00/share, which would result in a full-year 2022 EPS of $8.86, slightly above the midpoint of $8.70-9.00/share guidance. We expect weather to be favorable this year due to a cold snap in Texas. In terms of negative YoY drivers, we anticipate the Infrastructure business will see the impact of lower ownership share and higher O&M expense from signed contracts, plus the high-priced commodity environment, partially offset by the benefit of new projects. We also expect higher interest expense at the parent. In terms of positive drivers, at SDG&E we anticipate an increase from a step-up in FERC rate base. At SoCal gas, we expect a modest decrease due to higher interest expense. Sempra Texas should benefit from higher rate base and sales growth plus recovery under the TCOS and DCRF riders. Lastly, SRE will benefit from a lower share count due to its buybacks.

- **What to look for in the earnings report (Key debates/themes):**
  - **Q4 expectations**: Sempra will revisit its previously-issued 2023 EPS guidance and initiate expectations for 2024 EPS, as well as extend its long-term EPS growth (6-8% CAGR through 2026), capex and rate base outlooks. The Company is expected to layer in capex and financing associated with Port Arthur.
  - **LNG project updates**: Sempra recently signed an agreement with RWE to provide 2.3 million tons per year of LNG from the Port Arthur Phase 1 project under development in Texas. The company also received export licenses for two LNG projects, announcing that ECA LNG and Vista Pacifico received authorization from the US Department of Energy to re-export US-sourced LNG from Mexico to non-Free Trade agreement (FTA) nations. The DOE also increased the authorized export volumes of ECA LNG Phase 2, permitting it to export up to 636 Bcf/year of LNG from US-sourced natural gas from the proposed project in Baja California to non-FTA nations. In a third development, Sempra also announced an agreement with ENGIE for supply of US LNG from Port Arthur LNG Phase 1. Sempra Infrastructure is targeting a FID for Phase 1 of its Port Arthur LNG project in the first quarter of 2023. The company stated that it has launched project-level financing options for Phase 1 ($10.5B investment) which includes issuing debt at the project level and raising capital by selling project-level equity to one or more investors. COD for Phase 1 is expected to be 50-60 months from FID. Separately, Sempra Infrastructure has continued to advance its Cameron LNG Phase 2 project under development and anticipates FID on Train 4 after the front-end engineering and design process is completed, which is currently targeted for the summer of 2023.
  - **Oncor rate case**: On January 19th, the ALJ reversed out the mathematical error for the entire $680MM of accumulated depreciation rate base disallowance. The correction increases the revenue recommendation by +$51MM from -$61MM to -$9MM. Recall the ALJ is also recommending a 9.3% ROE and 42.5% equity layer. Next steps include reply to the exceptions due on February 1st, then the docket will get taken up at the open meeting scheduled for February 16th, though we believe it will not be fully decided upon until either the March 9th or March 23rd open meetings or during a special session, if scheduled. Recall that Staff is recommending a net revenue increase of $21MM, a 9.3% ROE and a 40% equity layer versus Oncor's $251MM revenue increase request on a 10.3% ROE and 45% equity layer (Authorized 9.8%/42.5%).
  - **California rate cases**: Sempra has a pending rate case in California for new rates effective in 2023 and 2024, respectively. A proposed decision is expected in May 2024.
  - **Cost of Capital filings**: On November 3rd, the California commission found that an extraordinary event did occur and thus the CCM would not be automatically triggered, so the 2022 authorized cost of capital is preserved. For the 2023-2025 cost of capital proceeding, a final decision has been issued, lowering ROE by 25bps to 9.95% for SDGE and to 9.80% for SCG, with the equity layer for both maintained at 52%. The CCM mechanism is still in place and if the current interest rate environment holds, could trigger to the upside in 2024 and increase ROE.
  - **SoCal gas reached settlement on investigation relating to Aliso Canyon gas leak**: On Oct. 11, 2022, SoCalGas reached a settlement with the Safety and Enforcement Division and California Public Advocates of the California commission to resolve the investigation regarding the Aliso Canyon gas leak. The settlement provides for financial penalties, certain costs that SoCalGas will reimburse, a violation of California Public Utilities Code section 451, and costs incurred by SoCalGas for which it will not seek recovery from ratepayers. The settlement agreement is subject to approval by the CPUC. As a result of entering into the settlement agreements with the fifth Developer Plaintiff and with SED and CalPA to resolve all aspects of the leak, Sempra expects to record a charge of $122MM, $101MM after tax, in 3Q22. As of Aug. 15, 2022, over 98% of the Individual Plaintiffs had agreed to participate and submitted releases, and SoCalGas paid $1.77B under the agreement on Aug. 30, 2022. As of Oct. 10, 2022, SoCalGas had either not received or not accepted as valid releases from approximately 390 Individual Plaintiffs, ~80% of whom had not been located or had failed to respond. The Individual Plaintiffs who do not participate in the settlement will be able to continue to pursue their claims.
- **Positioning into Qtr: Positive.** We expect Sempra shares to benefit from positive messaging on the continued strong progress on LNG projects. Updated 2023 EPS guidance and 2024 earnings projections could also surprise to the upside.

Southern Company

In Line **TP $70**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q4 EPS Bridge:** We project year-over-year EPS to decrease -$0.12 to $0.24/share, which would bring the full-year 2022 EPS to $3.55/share versus full-year guidance of $3.58/share. Weather last year in 4Q21 was -$0.07 unfavorable and weather this year is expected to be slightly unfavorable. In terms of negative YoY drivers, we primarily expect the Company to see higher O&M, increased interest expense, higher depreciation & amortization, and increased taxes other than income. For positive YoY drivers, Southern should benefit primarily from new electric rates and higher sales growth at the utilities.

- **What to look for in the earnings report (Key debates/themes):**
  - **Management change:** On January 5th, Southern announced that effective March 31st Chris Womack will become president of Southern Company and elected as a member of the board. Tom Fanning, the current chairman of the board, CEO and president of Southern Company, will relinquish the role of president upon Womack's assumption of the role in March and assume the role of Executive Chairman of the board upon Womack's assumption of the role of CEO. Womack has served as president of Georgia Power since 2020 and chairman, president and CEO since 2021.
  - **Q4 updates:** Consistent with prior practice, Southern is expected to issue a 2023 annual EPS outlook and quarterly 1Q23 EPS guidance. The Company has said it will also provide an update to its 2024 EPS outlook (tracking in the $4.00-$4.10 range) as well as its long-term capex and rate base forecasts. Headwinds for both 2023-2024 include higher interest expense and additional carrying costs with Vogtle overruns. The company has also alluded to potentially issuing a new long-term 5-7% EPS growth outlook based off of updated 2024 guidance.
  - **Vogtle:** On January 11, 2023, Georgia Power announced that during the start-up and pre-operational testing for Plant Vogtle Unit 3, it had identified, and is in the process of remediating, vibrations associated with certain piping within the cooling system. Southern expects to file a license amendment request with the U.S. Nuclear Regulatory Commission (NRC) to help expedite the remediation. As a result, Georgia Power now projects that initial criticality will occur during February 2023 and that Unit 3 will be placed in service during April 2023. Extension of the in-service date for Unit 3 beyond the first quarter 2023 is estimated to result in additional base capital costs for Georgia Power of up to $15 million pre-tax per month, as well as the related allowance for funds used during construction and any additional related construction, support resources, or testing costs. As it pertains to Vogtle unit 4, there is currently no delay or additional cost expected. As of 3Q22, Georgia Power's share of the total cost estimate was ~$10.4 billion and the remaining costs totalled ~$1.1 billion. A prudency review of Vogtle costs will occur in the July/August 2023 timeframe.
  - **Georgia rate case**: In November 2022, the Georgia PSC approved a settlement in Georgia Power's rate case. The company asked for roughly $1B revenue increased based on a 11% ROE and 56% equity ratio. The settlement included revenue increases of $216MM in year 1 (2023), $377MM in year 2 (2024) and $403MM in year 3 (2025), which equates to a total increase of $996MM. Southern was also granted a 10.5% set point ROE (matching previous, though top end of band came down from 12.0% to 11.9%) and 56% equity ratio (matching previous).

- **Positioning into Qtr: Neutral.**

Outperform **TP $31**
Analyst: Durgesh Chopra

- **Q4 EBITDA Bridge:** We project VST's 4Q22 EBITDA to be $800MM, which would bring full-year 2022 EBITDA to $3,146MM in the upper half of the $2,960-$3,160 guidance range.

- **What to look for in the earnings report (Key debates/themes):**
  - **Q4 expectations:** We expect VST to reaffirm 2023 EBITDA guidance range of $3,4B-$4B introduced on the Q3 call. We will also look for commentary around 2024-2025 EBTIDA expectations where they have been guiding to $3.5-3.7B using forward power curves through October 2022.
  - **NOPEC related headwind.** In September 2022, citing rising electric prices, Ohio's retail energy provider Northeast Ohio Public Energy Council (NOPEC) moved its 550K customers form its own platform to their utility default service provider. We estimate ~$10MM EBITDA impact per month (~$40MM for 2022) assuming VST has to procure power to serve as the default service provider to roughly 1/3rd of NOPEC customers. The company's 2023 guidance incorporates a continued headwind this year, which we estimate to be $50MM through May 2023 (VST's obligation as a default service provider ends in May 2023) .
  - **Capital Allocation Update**: VST had completed~$2.05 billion of share repurchases as of November 1, 2022. The remaining~$1.2 billion of upsized $3.25 billion authorization is expected to be executed by year-end 2023.
  - **VST Zero**: Vistra restored Phases I and II of the 400-megawatt Moss Landing Energy Storage Facility in CA to service at 98% of its maximum capacity in July last year. VST announced its 50MW Brightside Solar Facility was online in April 2022 in TX. The Company also announced in each of May and June 2022 that its 260MW DeCordova Energy Storage Facility and its 108MW Emerald Grove Solar Facility were online in TX. With these announcements, VST has close to 1.5GW of renewable assets in operation versus their target of ~5 GWs by year-end 2026 with the ~$5B in development capital (generation $350-500MM EBITDA) funded by project debt and other financings ($3.5B), Vistra Zero project cash flow($0.5B), and $1B preferred stock offering proceeds
  - **PJM Plant Outage:** The PJM said January 11th that it had an "unacceptably high" level of power generation resources unavailable for the Dec. 24, 2022 morning peak amid extremely cold weather. For those that did not perform as promised when called upon to do so, the grid operator said it expects to levy between $1 billion and $2 billion in fines.VST said that they managed the fleet well during the storm and some units operated at higher than normal capacity which would serve to offset any fines/penalties.

- **Positioning into Qtr: Neutral**

WEC Energy Group

In Line **TP $98**
Analyst: Durgesh Chopra / Sharon Wang

- **Q4 EPS Bridge:** We project year-over-year EPS to increase $0.03 to $0.74 in Q4 2022, which would result in full-year 2022 EPS of $4.40/share, matching the top end of the company's $4.38-4.40/share guidance. We expect weather to be warmer than normal but colder than last year, which is roughly 4c hit YoY. Positive drivers include accounting order of 8c, Michigan gas utility settlement of 1c, WEC Infrastructure of 1c, and lower O&M expense of 2c, partially offset by weather and higher D&A of 5c year over year.

- **What to look for in the earnings report (Key debates/themes):**
  - **Q4 expectations:** 2023 EPS guidance of $4.58-$4.62 was provided in December following WEC's board meeting. We expect WEC to reaffirm its recently issue 2023 EPS guidance and targeted long term annual EPS growth of 6.5%-7%.
  - **WI Rate Case**: In Dec, WI Rate Case final order was issued, approving rate increase of $505mm predicated on 9.80% authorized ROE, 53% equity layer vs current 52.5%, and earnings sharing mechanism. Requested ROE was 10.00% for Wisconsin Electric & Wisconsin Public Service and 10.20% for Wisconsin Gas. Commission staff positions were 9.8% for all. WEC had reached a partial settlement earlier for a base revenue increase of $507mm with a 53% equity ratio, earnings sharing mechanism unchanged from 2022, and an authorized ROE to be decided by the commission.
  - **Limited Reopener**: WEC will file for a limited reopener in April or May 2023 to address the revenue requirements associated with recovering new capital investments that will achieve commercial operation in 2023 and 2024, as well as to address reduced O&M expenses from future coal plant retirements
  - **Illinois Rate Reviews**: In January, Peoples Gas and North Shore Gas filed applications with the Illinois Commerce Commission for rate increase of $194.7 million and $18.7 million, respectively. Peoples Gas proposed ROE is 9.9% vs current 9.05%, and North Shore Gas proposed ROE is 9.9% vs current 9.67%. Proposed equity ratios for both are 54% vs Peoples Gas current 50.33% and North Shore Gas current 51.58%. Final Order is expected in Q4 2023 for new rates effective January 1, 2024.
  - **QIP (Qualifying Infrastructure Plant) Rider**: Currently in place through 2023, the rider supports $280-300MM on average in investment in IL or ~$0.05 (or 1%) annual EPS contribution for WEC. Management stated that Peoples Gas will not seek an extension of the QIP rider.
  - **MERC Rate Case**: In Nov, WEC filed a rate review at one of their smaller utilities, Minnesota Energy Resources Corporation (MERC). The company is seeking an adjusted increase in revenues of $32.8M with a 10.3% ROE and a 53.0% equity layer, leading to an overall bill increase of 7.9% primarily driven by capital investment. Decision is expected in Q4 2023 with new rates going into effect January 1, 2024.
  - **Capex Plan Update**: With Q3 results WEC introduced 2023-2027 capex plan of $20.1B vs prior plan of $17.7B for 2022-2026, increasing five-year capital plan by $2.4B, mainly at ATC and WI Generation. The drivers of increase include: 1) renewable investments in Wisconsin bolstered by the Inflation Reduction Act (IRA), 2) increased needs in transmission investment, driven by renewable projects and the long-range planning process conducted by MISO, and 3) $700M 10-year grid hardening program in WI for reliability. The higher WI generation capex is driven by raised capacity for renewable regulated energy projects to 3,300 MW from 2,400 MW in the previous plan, which will result in $5.4B investment in total in the updated plan. The 3,300 MW regulated renewables include 1,900MW of solar projects, 670MW of wind projects, and 720MW of storage projects.
  - **Maple Flats Solar Energy Center**: In October WEC announced plans to invest approximately $360M for 80% ownership of the Maple Flats Solar Energy Center, a 250-MW solar project with commercial operation expected in early 2024. This project is the first solar investment in WEC's Infrastructure segment. The company also has existing or planned investments in eight major wind farms totaling more than 1.5 gigawatts of capacity.
  - **MISO Transmission Capex**: In July 2022, MISO awarded roughly $900 million investment opportunity out of the total $10.3B MISO transmission capex in the first tranche of Phase 1 projects to ATC (American Transmission Company), in which WEC has an approximately 60% equity ownership interest. Investment in these projects is expected to start as early as 2024 (portion of $900m is included in WEC's 2023-2027 plan). We estimate the earnings contribution of these projects to be roughly $27 million or ~2% of our 2024 EPS estimate of $4.91/share, though these projects are not expected to start going into service until at least 2028.

- **Positioning into Qtr: Neutral.**

US weather in 4Q 2022 was relatively normal, on average, but very favorable for utilities versus the same period last year.

- **US weather in 4Q 2022 was relatively normal, on average, but very favorable for utilities versus the same period last year**. Based on National Oceanic and Atmospheric Administration (NOAA) heating degree day data, the weather in 4Q22 drove 23% higher degree days versus last year while being -1% below normal, on average, across the US. All regions were meaningfully higher when compared to the same period last year in 4Q21, with the SW Central having the largest increase and New England the smallest. Relative to normal, about half of the regions had favorable weather versus half that did not, with the SW Central, Mountain and Pacific regions having a similar amount of favorability and New England having most unfavorable weather. Based on our Q4 preview conversations with several companies to date, weather has also been communicated as normal (in line with guidance), on average, but the impact does vary on a company-by-company basis.

This report is prepared solely for the use of Michael Weisenburger

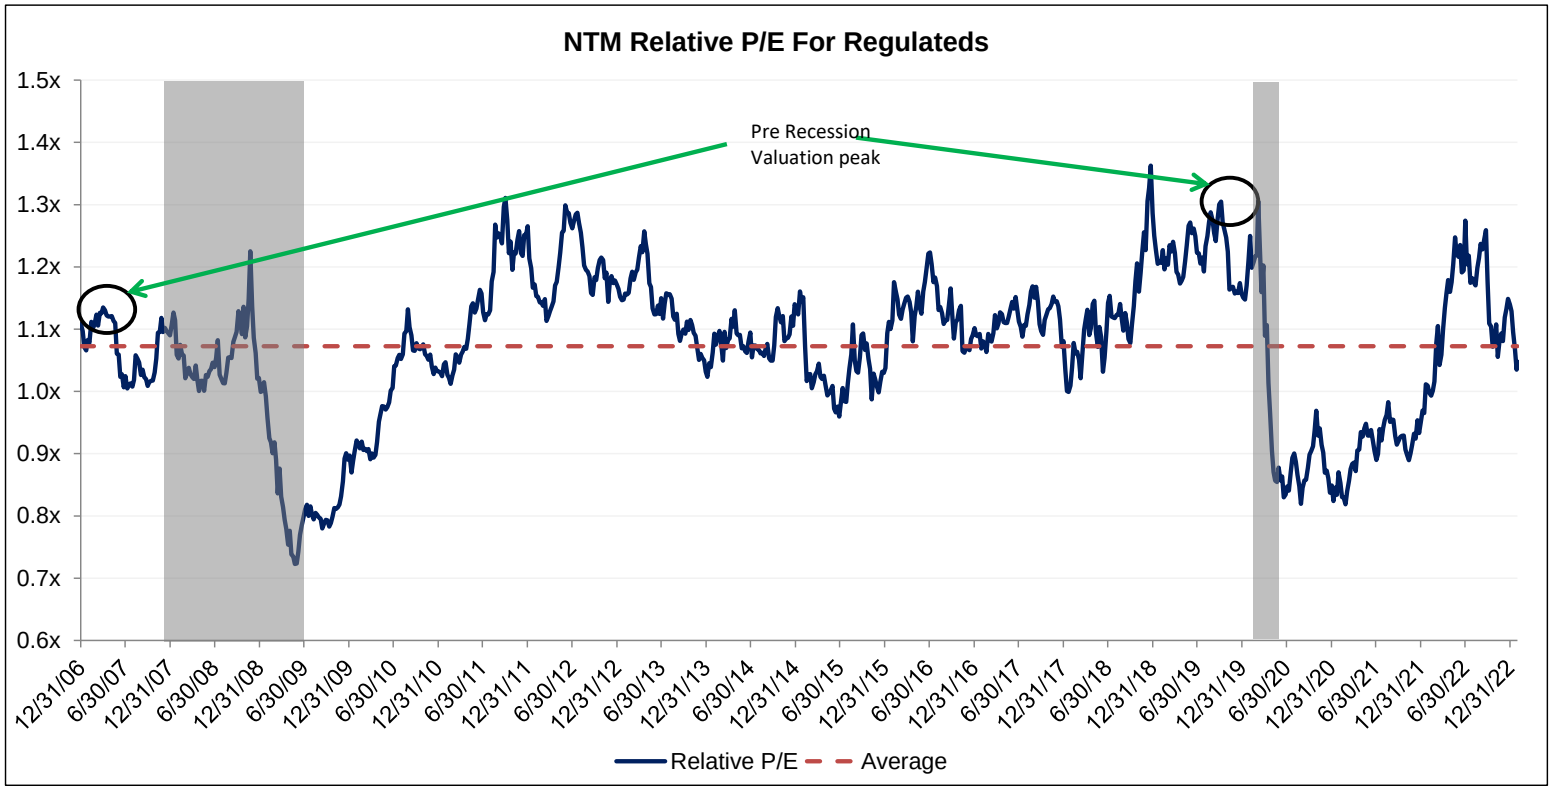
Absolute valuation is higher than historical average

- The group is now trading at ~18.5x, above the 15-year average multiple of 17x (NTM)
- On an absolute basis, NTM PEs for Utes averaged ~15x 12mths leading up to the 08/09 recession peaking at ~17x, below where the group is trading currently.
- In the COVID recession however, absolute P/E for Utes averaged ~21x 12mths prior and peaked at 23x, which would be 24% upside from current levels at ~18.5x.



Updated as of 1/30/23

Group's NTM P/E relative to S&P 500 is modestly lower than the historical average

- NTM P/E relative to S&P 500 is 1.05x, modestly lower than the historical average of 1.07x
- NTM relative PEs for Utes averaged 1.07x 12mths leading up to the 08/09 recession peaking at 1.13x, 8% higher than where the group is trading currently.
- In the COVID recession, relative P/E for Utes averaged 1.22x 12mth prior and peaked at 1.30x, which would be ~24% upside from current levels at 1.05x assuming S&P500 stays flat.

ANALYST CERTIFICATION

The analysts, Durgesh Chopra, Michael Lonegan, Sharon Wang, primarily responsible for the preparation of this research report attest to the following: (1) that the views and opinions rendered in this research report reflect his or her personal views about the subject companies or issuers; and (2) that no part of the research analyst's compensation was, is, or will be directly related to the specific recommendations or views in this research report.

IMPORTANT DISCLOSURES

This report is approved and/or distributed by Evercore Group L.L.C. ("Evercore Group"), a U.S. licensed broker-dealer regulated by the Financial Industry Regulatory Authority ("FINRA"), and Evercore ISI International Limited ("ISI UK"), which is authorised and regulated in the United Kingdom by the Financial Conduct Authority. The institutional sales, trading and research businesses of Evercore Group and ISI UK collectively operate under the global marketing brand name Evercore ISI ("Evercore ISI"). Both Evercore Group and ISI UK are subsidiaries of Evercore Inc. ("Evercore "). The trademarks, logos and service marks shown on this report are registered trademarks of Evercore.

The analysts and associates responsible for preparing this report receive compensation based on various factors, including Evercore's Partners' total revenues, a portion of which is generated by affiliated investment banking transactions. Evercore ISI seeks to update its research as appropriate, but various regulations may prevent this from happening in certain instances. Aside from certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Evercore ISI generally prohibits analysts, associates and members of their households from maintaining a financial interest in the securities of any company in the analyst's area of coverage. Any exception to this policy requires specific approval by a member of our Compliance Department. Such ownership is subject to compliance with applicable regulations and disclosure. Evercore ISI also prohibits analysts, associates and members of their households from serving as an officer, director, advisory board member or employee of any company that the analyst covers.

This report may include a Tactical Call, which describes a near-term event or catalyst affecting the subject company or the market overall and which is expected to have a short-term price impact on the equity shares of the subject company. This Tactical Call is separate from the analyst's long-term recommendation (Outperform, In Line or Underperform) that reflects a stock's forward 12-month expected return, is not a formal rating and may differ from the target prices and recommendations reflected in the analyst's long-term view.

Applicable current disclosures regarding the subject companies covered in this report are available at the offices of Evercore ISI: 55 East 52nd Street, New York, NY 10055, and at the following site: https://evercoreisi.mediasterling.com/disclosure.

Evercore and its affiliates, and I or their respective directors, officers, members and employees, may have, or have had, interests or qualified holdings on issuers mentioned in this report. Evercore and its affiliates may have, or have had, business relationships with the companies mentioned in this report.

Additional information on securities or financial instruments mentioned in this report is available upon request.

Ratings Definitions

Current Ratings Definition

Evercore ISI's recommendations are based on a stock's total forecasted return over the next 12 months. Total forecasted return is equal to the expected percentage price return plus gross dividend yield. We divide our stocks under coverage into three primary ratings categories, with the following return guidelines:

Outperform- the total forecasted return is expected to be greater than the expected total return of the analyst's coverage sector.
In Line- the total forecasted return is expected to be in line with the expected total return of the analyst's coverage sector.
Underperform- the total forecasted return is expected to be less than the expected total return of the analyst's coverage sector.
Coverage Suspended- the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances.*
Rating Suspended- Evercore ISI has suspended the rating and target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon.*

*Prior to October 10, 2015, the "Coverage Suspended" and "Rating Suspended" categories were included in the category "Suspended."

FINRA requires that members who use a ratings system with terms other than "Buy," "Hold/Neutral" and "Sell" to equate their own ratings to these categories. For this purpose, and in the Evercore ISI ratings distribution below, our Outperform, In Line, and Underperform ratings can be equated to Buy, Hold and Sell, respectively.

Historical Ratings Definitions

Prior to March 2, 2017, Evercore ISI's recommendations were based on a stock's total forecasted return over the next 12 months:

Buy- the total forecasted return is expected to be greater than 10%
Hold- the total forecasted return is expected to be greater than or equal to 0% and less than or equal to 10%

This report is prepared solely for the use of Michael Weisenburger

Sell -the total forecasted return is expected to be less than 0%

On October 31, 2014, Evercore Partners acquired International Strategy & Investment Group LLC ("ISI Group") and ISI UK (the "Acquisition") and transferred Evercore Group's research, sales and trading businesses to ISI Group. On December 31, 2015, the combined research, sales and trading businesses were transferred back to Evercore Group in an internal reorganization. Since the Acquisition, the combined research, sales and trading businesses have operated under the global marketing brand name Evercore ISI.

ISI Group and ISI UK:

Prior to October 10, 2014, the ratings system of ISI Group LLC and ISI UK which was based on a 12-month risk adjusted total return:

Strong Buy- Return > 20%
Buy- Return 10% to 20%
Neutral - Return 0% to 10%
Cautious- Return -10% to 0%
Sell- Return< -10%

For disclosure purposes, ISI Group and ISI UK ratings were viewed as follows: Strong Buy and Buy equate to Buy, Neutral equates to Hold, and Cautious and Sell equate to Sell.

Evercore Group:

Prior to October 10, 2014, the rating system of Evercore Group was based on a stock's expected total return relative to the analyst's coverage universe over the following 12 months. Stocks under coverage were divided into three categories:

Overweight- the stock is expected to outperform the average total return of the analyst's coverage universe over the next 12 months.
Equal-Weight- the stock is expected to perform in line with the average total return of the analyst's coverage universe over the next 12 months.
Underweight -the stock is expected to underperform the average total return of the analyst's coverage universe over the next 12 months.
Suspended- the company rating, target price and earnings estimates have been temporarily suspended.

For disclosure purposes, Evercore Group's prior "Overweight," "Equal-Weight" and "Underweight" ratings were viewed as "Buy," "Hold" and "Sell," respectively.

Ratings Definitions for Portfolio-Based Coverage

Evercore ISI utilizes an alternate rating system for companies covered by analysts who use a model portfolio-based approach to determine a company's investment recommendation. Covered companies are included or not included as holdings in the analyst's Model Portfolio, and have the following ratings:

Long- the stock is a positive holding in the model portfolio; the total forecasted return is expected to be greater than 0%.
Short- the stock is a negative holding in the model portfolio; the total forecasted return is expected to be less than 0%.
No Position- the stock is not included in the model portfolio.
Coverage Suspended- the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company, and in certain other circumstances; a stock in the model portfolio is removed.
Rating Suspended - Evercore ISI has suspended the rating and/or target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon; a stock in the model portfolio is removed.

Stocks included in the model portfolio will be weighted from 0 to 100% for Long and 0 to -100% for Short. A stock's weight in the portfolio reflects the analyst's degree of conviction in the stock's rating relative to other stocks in the portfolio. The model portfolio may also include a cash component. At any given time the aggregate weight of the stocks included in the portfolio and the cash component must equal100%.

Stocks assigned ratings under the alternative model portfolio-based coverage system cannot also be rated by Evercore ISI's Current Ratings definitions of Outperform, In Line and Underperform.

FINRA requires that members who use a ratings system with terms other than "Buy," "Hold/Neutral" and "Sell," to equate their own ratings to these categories. For this purpose, and in the Evercore ISI ratings distribution below, our Long, No Position and Short ratings can be equated to Buy, Hold and Sell respectively.

Evercore ISI rating (as of 01/31/2023)

GENERAL DISCLOSURES

This report is approved and/or distributed by Evercore Group L.L.C. (“Evercore Group”), a U.S. licensed broker-dealer regulated by the Financial Industry Regulatory Authority (“FINRA”) and by International Strategy & Investment Group (UK) Limited (“ISI UK”), which is authorised and regulated in the United Kingdom by the Financial Conduct Authority. The institutional sales, trading and research businesses of Evercore Group and ISI UK collectively operate under the global marketing brand name Evercore ISI ("Evercore ISI"). Both Evercore Group and ISI UK are subsidiaries of Evercore Inc. ("Evercore"). The trademarks, logos and service marks shown on this report are registered trademarks of Evercore Inc.

This report is provided for informational purposes only. It is not to be construed as an offer to buy or sell or a solicitation of an offer to buy or sell any financial instruments or to participate in any particular trading strategy in any jurisdiction. The information and opinions in this report were prepared by employees of affiliates of Evercore. The information herein is believed by Evercore ISI to be reliable and has been obtained from public sources believed to be reliable, but Evercore ISI makes no representation as to the accuracy or completeness of such information. Opinions, estimates and projections in this report constitute the current judgment of the author as of the date of this report. They do not necessarily reflect the opinions of Evercore or its affiliates and are subject to change without notice. In addition, opinions, estimates and projections in this report may differ from or be contrary to those expressed by other business areas or groups of Evercore and its affiliates. Evercore ISI has no obligation to update, modify or amend this report or to otherwise notify a reader thereof in the event that any matter stated herein, or any opinion, projection, forecast or estimate set forth herein, changes or subsequently becomes inaccurate. Facts and views in Evercore ISI research reports and notes have not been reviewed by, and may not reflect information known to, professionals in other Evercore affiliates or business areas, including investment banking personnel.

Evercore ISI does not provide individually tailored investment advice in research reports. This report has been prepared without regard to the particular investments and circumstances of the recipient. The financial instruments discussed in this report may not suitable for all investors and investors must make their own investment decisions using their own independent advisors as they believe necessary and based upon their specific financial situations and investment objectives. Securities and other financial instruments discussed in this report, or recommended or offered by Evercore ISI, are not insured by the Federal Deposit Insurance Corporation and are not deposits of or other obligations of any insured depository institution. If a financial instrument is denominated in a currency other than an investor’s currency, a change in exchange rates may adversely affect the price or value of, or the income derived from the financial instrument, and such investor effectively assumes such currency risk. In addition, income from an investment may fluctuate and the price or value of financial instruments described in this report, either directly or indirectly, may rise or fall. Estimates of future performance are based on assumptions that may not be realized. Furthermore, past performance is not necessarily indicative of future performance.

Recipients who are not institutional investors or market professionals should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.

Evercore ISI salespeople, traders and other professionals may provide oral or written market commentary or trading strategies to our clients that reflect opinions that are contrary to the opinions expressed in this research. Our asset management affiliates and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

Electronic research is simultaneously available to all clients. This report is provided to Evercore ISI clients and may not be redistributed, retransmitted or disclosed, in whole or in part, or in any form or manner, without the express written consent of Evercore ISI. Receipt and review of this research report constitutes your agreement not to redistribute, retransmit, or disclose to others the contents, opinions, conclusion or information contained in this report (including any investment recommendations, estimates or target prices) without first obtaining express permission from Evercore ISI.

This report is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

For investors in the UK: In making this report available, Evercore makes no recommendation to buy, sell or otherwise deal in any securities or investments whatsoever and you should neither rely or act upon, directly or indirectly, any of the information contained in this report in respect of any such investment activity. This report is being directed at or distributed to, (a) persons who fall within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”)); (b) persons falling within the definition of high net worth companies, unincorporated associations, etc. (set out in Article 49(2) of the Order); (c) other persons to whom it may otherwise lawfully be communicated (all such persons together being referred to as “relevant persons”). This report must not be acted on or relied on by persons who are not relevant persons.

The distribution of these materials to persons or entities in Switzerland is not intended to, and does not, constitute a financial service under the Swiss Financial Services Act (FinSA). In particular, the distribution of these materials does not constitute the provision of personal recommendations on transactions with financial instruments (investment advice) within the meaning of Article 3(c)(4) of FinSA.

This material has been prepared by Evercore Group L.L.C. for distribution in New Zealand to financial advisers and wholesale clients only and is not intended for retail clients (as those terms are defined in the Financial Markets Conduct Act 2013 (‘FMCA’)). Evercore Group L.L.C. is not, and is not required to be, registered or licensed under the FMCA, and unless otherwise stated any financial products referred to in this material are generally only available in New Zealand for issue to those satisfying the wholesale investor criteria in the FMCA.

2023 Utilities Outlook Client Conference Call w/ Shar Pourreza & Team including Director of Utility Trading John Ritter — TODAY at 8:15am

For details on our Guggenheim-hosted client Utility events including our WEC NDR, DUK NDR, ES NDR, PNW NDR, and other events, scroll down…

2023 Utility Outlook: Magic Mirror on the Wall, Who Is the Fairest One of All? (see our note HERE)

D/VA — Legislation introduced Friday would shorten process for next OSW project by 2 years

D/VA — AWS announces plans to invest $35B in Virginia data centers by 2040

NI — Office of the Utility Consumer Counselor weighs in on NIPSCO rate case

DUK — North Carolina and South Carolina lawmakers are drafting substation security legislation

MA/Wind — DPU hearing officer gives parties until Friday to respond to Mayflower and Commonwealth wind motions

Uranium — Russian nuclear industry drawing increasing sanctions scrutiny

SMR – NuScale receives final certification for 50MW design

PCG – City of San Francisco re-initiates public utility alternative study

IRS – Republican IRS policies could endanger tax credit deployments

D/VA – Legislation introduced Friday would shorten process for next OSW project by 2 years

- "**Development of offshore wind capacity; cost recovery.** Provides that the State Corporation Commission shall give preference to requests for cost recovery by a Phase II Utility for generating facilities utilizing energy derived from offshore wind that maximize economic benefits to the Commonwealth. The bill also shortens the timeline for public utilities to construct or purchase one or more offshore wind generation facilities located off the Commonwealth's Atlantic shoreline or in federal waters and interconnected directly into the Commonwealth from 2034 to 2032." - LIS
- More HERE

Guggenheim takeaway: *Interesting minor development on the last day for introductions – flagged for your awareness. See our prior note HERE for more on some of the more important pieces of legislation we are tracking.*

D/VA – AWS announces plans to invest $35B in Virginia data centers by 2040

- "Governor Glenn Youngkin today announced that Amazon Web Services (AWS), an Amazon.com, Inc. company (NASDAQ: AMZN), plans to invest $35 billion by 2040 to establish multiple data center campuses across Virginia. Numerous localities in the Commonwealth are under consideration and will be decided at a later date. These new campuses will combine expandable capacity to position AWS for long-term growth in the Commonwealth. Amazon is among the largest private-sector employers in the Commonwealth of Virginia, establishing its first AWS data centers and operations facilities in 2006 and later announcing its second headquarters (HQ2) in Arlington in 2018. This announcement of planned investment will create at least 1,000 total new jobs across Virginia." - release
- More HERE

Guggenheim takeaway: *Data center load and potential underlying transmission capex opportunities remain a unique positive nuance to the Virginia market in our view, which is already one of the strongest zones within PJM by load growth (~5% 10-year summer peak load growth). See the recently updated 2023 PJM load forecast for DOM HERE for more.*

NI – Office of the Utility Consumer Counselor weighs in on NIPSCO rate case

- On Friday, the OUCC in Indiana proposed that NIPSCO should receive a 9.2% ROE, vs 9.75% currently authorized and the company's ask in the current case of 10.4%.
- The OUCC also proposed a capital structure consisting of 49.26% equity, vs 47.86% currently authorized and the company's ask in the current case of 51.63%.

- Finally, the OUCC recommends that NIPSCO's proposed variable cost tracker for its coal-fired generation plants be rejected and the costs that would otherwise be recoverable in the rider be reflected in base rates instead.
- Docket 45772

Guggenheim takeaway: *Note: evidentiary hearings are scheduled beginning March 13, 2023.*

DUK – North Carolina and South Carolina lawmakers are drafting substation security legislation

- Following recent attacks on utility infrastructure in Moore County, North Carolina as well as other attacks in Washington, Oregon, South Carolina and Nevada, new legislation is being prepared.
- In North Carolina and South Carolina, lawmakers are drafting legislation which would require utilities to provide 24/7 substation security. Security provisions would vary from site to site, some of which are already protect with gates and nearby cameras, however others remain more exposed.
- More HERE

Guggenheim takeaway: *FYI. The legislation is still in the process of being drafted.*

MA/Wind – DPU hearing officer gives parties until Friday to respond to Mayflower and Commonwealth wind motions

- "Any party that wishes to submit a written response to the motion filed on January 19, 2023 by Mayflower Wind Energy LLC in the above-referenced proceedings must do so by 5:00 P.M. on Friday, January 27, 2023." - DPU
- More HERE

Guggenheim takeaway: *For your calendars and awareness.*

Uranium – Russian nuclear industry drawing increasing sanctions scrutiny

- Lengthy reporting by the Washington Post indicates that key companies in the industry may be aiding sanctions evasion, raising further discussion of EU sanctions on the industry
- More HERE

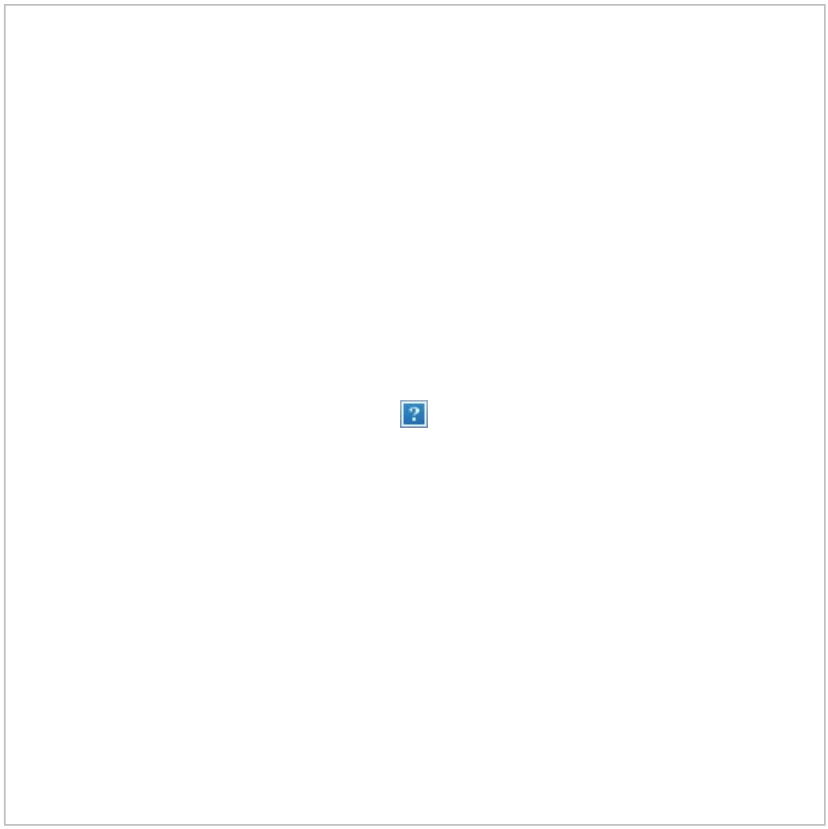
Guggenheim takeaway: *Flagged for your awareness as this was something we took an in-depth look at last year in our uranium baseline note – HERE.*

SMR – NuScale receives final certification for 50MW design

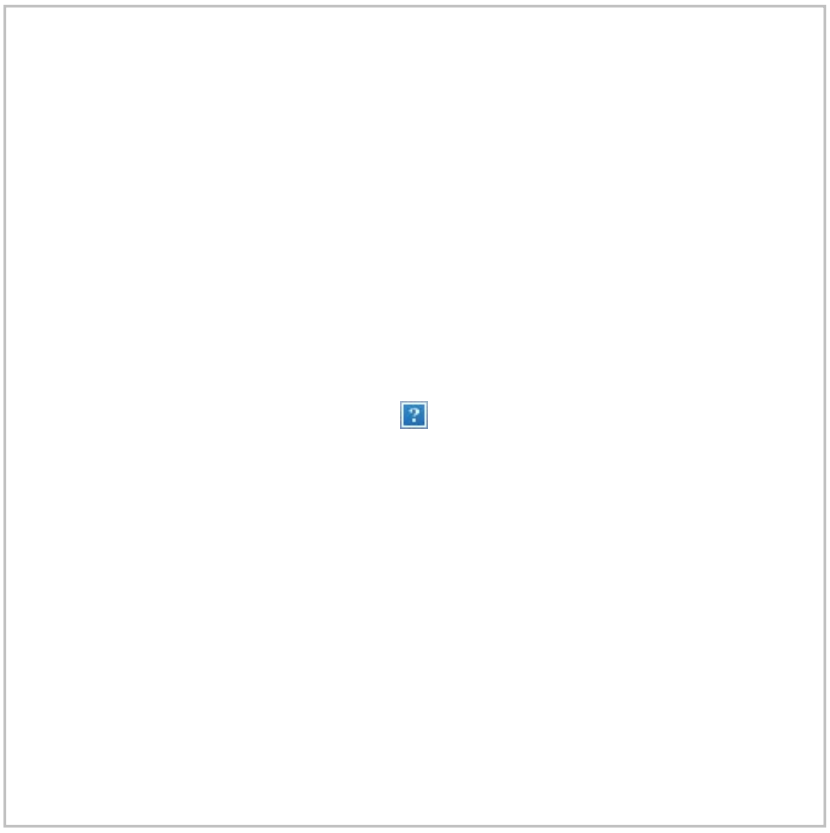
- The 50MW configuration received its final certification from the NRC
- More HERE

Guggenheim takeaway: *Heads up and an important conclusion the company's initial pathway through the NRC – as a reminder the 77MW uprate is now before the Commission (second SDA).*

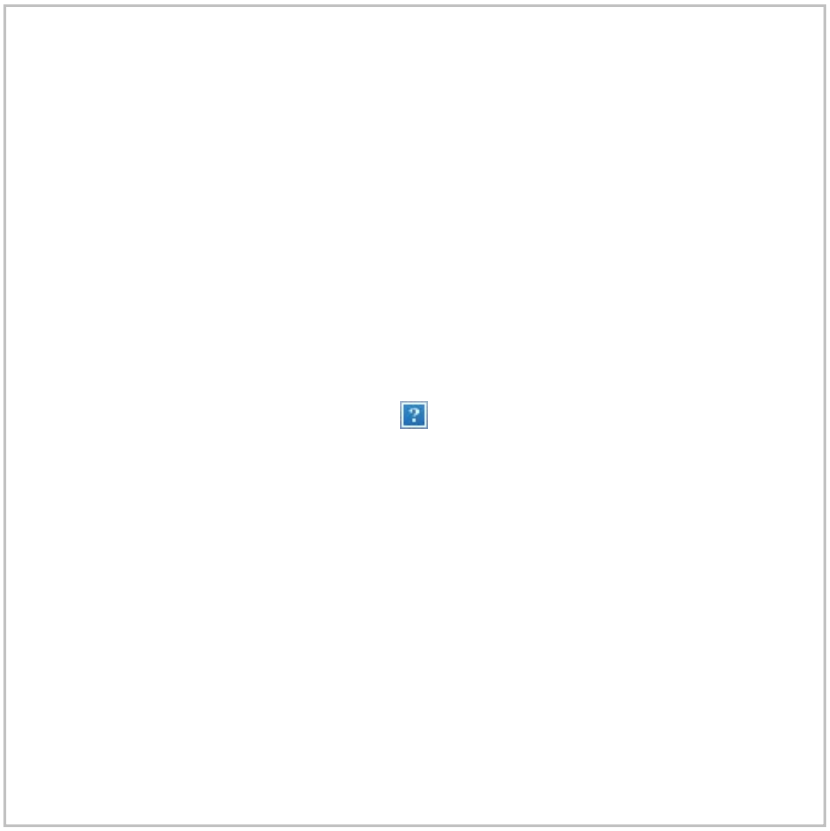
PCG – City of San Francisco re-initiates public utility alternative study



- City of San Francisco restarted the analysis on forming a public utility that was a part of the PG&E bankruptcy alternatives plan.
- The alternative utility system proposal is supported by energy advocates.
- More in media here

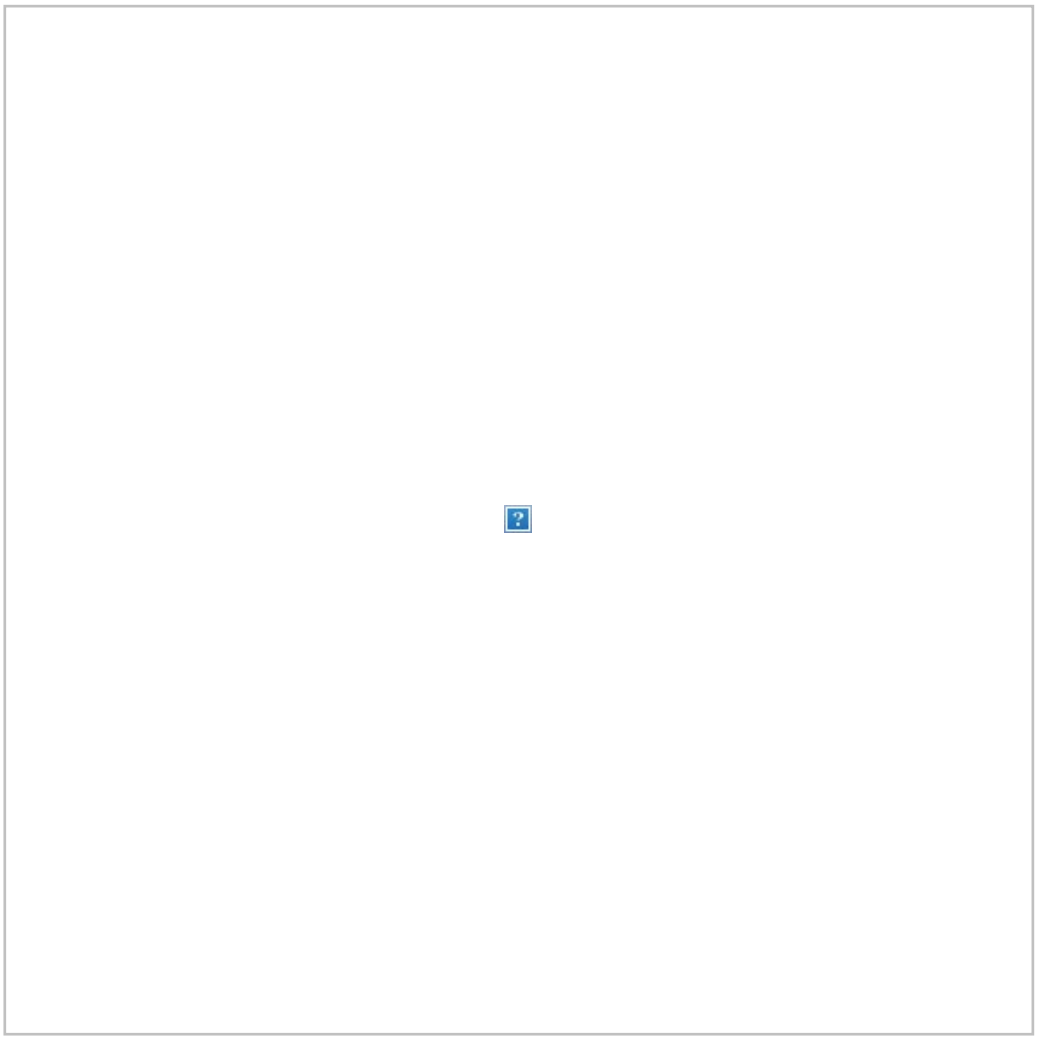


Guggenheim takeaway: *FYI. The conversation of municipal utility options occasionally comes up, but the complexity usually makes such action prohibitive or expensive as the municipal entity would have to compensate PG&E for the assets. More specifically in the case of San Francisco, such a move would concentrate wildfire risk and would be at odds with state policy.*



IRS – Republican IRS policies could endanger tax credit deployments

- Media is reporting that Treasury officials have been airing concerns in private that Republican efforts to rescind funding from the IRS could impact their ability to implement the credit provisions of the IRA
- More HERE



Guggenheim takeaway: *The implementation processes at Treasury and the IRS are moving somewhat slowly in our view – we continue to monitor.*

Power & Utilities

March 15, 2023

The Guggenheim Daily Transmission: HE, NI, AEE, VA, MI, IN, AZ

For our AGA conference (May 20-23) meeting schedule, please scroll down…

For details on our Guggenheim-hosted client Utility events including our NEE NDR, AEE NDR, PPL NDR, EXC NDR, ETR NDR, DTE NDR, PCG NDR, SMR NDR, ES NDR, LNT NDR, PNW NDR, CMS NDR, POR NDR, and other events, scroll down…

HE – Making Sense of Banking Turbulence; HE's ASB Remains Well Insulated From Isolated Liquidity Issues (see our note HERE)

NI – NiSource announces leadership succession, new CFO and group president

AEE – Surrebuttal testimony filed in MO

VA – Energy legislation transmitted to Governor

MI – Energy Storage legislation getting traction in Michigan

IN – IN house bill for greater consideration of reliability and resiliency in utility resource plans passed Senate committee

AZ – Arizona bills on in-state transmission development put on consent calendar in Senate

NI – NiSource announces leadership succession, new CFO and group president

- NiSource announced leadership changes including succession for CFO and group president and appointment of Michael Luhrs (external from LNT) as executive vice president of strategy and risk and the company's chief commercial officer.
- Coinciding with these changes, Shawn Anderson, currently SVP of risk and chief strategy officer, will move into the role of EVP and CFO. Donald Brown, NiSource's current CFO, will assume the role of EVP and chief innovation officer, replacing Melody Birmingham, who has been named EVP and group president of NiSource utilities.
- More here.

Guggenheim takeaway: *FYI. Major progression in terms of leadership succession.*

AEE – Surrebuttal testimony filed in MO

- AEE MO, OPC, PSC Staff, and other stakeholders have all filed surrebuttal testimony in the ongoing case ahead of hearings next month
- Staff have also updated the accounting schedules through December 31st
- Rate base of $11.263B – see build up for rev req HERE
- "Staff found no reason to change Staff's recommended authorized ROE of 9.59%" - testimony
- More HERE

Guggenheim takeaway: *For your awareness as we continue to parse the full filings. Procedurally, the surrebuttal testimony will now be followed by final reconciliations ahead of evidentiary hearings in early April. As a reminder, management pointed to this general timeframe (March/April) for potential settlement discussions on the recent 4Q22 call.*

VA – Energy legislation transmitted to Governor

- SB1075, SB1265, SB1477, and other pieces of legislation were transmitted to Governor Youngkin on Monday

Provided for the exclusive use of Michael Weisenburger at NiSource on 15-Mar-2023 02:05 PM.

- More HERE

Guggenheim takeaway: *This is a procedural step at this point, and while we have very minimal expectations for any changes whatsoever to most of the energy legislation passed this winter by the General Assembly, we remain on the lookout for any commentary around the finalization process.*

MI ─ Energy Storage legislation getting traction in Michigan

- Michigan House bill HB 4256, addressing energy storage goals in support of Governor Whitmer's energy policy was filed and referred to committee.
- The bill would mandate 2,500 MW of storage by 2030 and 4,000 MW by 2040.
- The MPSC would also set targets for long duration storage of greater than 10 hours and multi-day storage as part of implementation.
- Bill text here.

Guggenheim takeaway: *FYI. While DTE and CMS have already put forth IRPs which included almost 2,500MW of storage deployment, the legislative codification could accelerate deployment with a defined regulatory framework.*

IN – IN house bill for greater consideration of reliability and resiliency in utility resource plans passed Senate committee

- IN Senate committee passed the House bill for increased guidance on utility resource plans and the need to consider reliability and resiliency of resources.
- The process saw Senate add co-sponsors to the bill.
- Regulators would need to consider the ability of resources to provide dispatchable power.
- The guidance from the bill also includes affordability and competitive rates as a goal for the IURC.
- Bill text here: HB1007

Guggenheim takeaway: *FYI. The bill tries to bring a legislated balance to IN decarbonization focus (i.e., balancing reliability with intermittent resources like solar and wind).*

AZ – Arizona bills on in-state transmission development put on consent calendar in Senate

- Arizona HB 2496 and HB 2437 were put on consent calendar in the Senate (proper for consideration from rules committee).
- HB 2437 addresses in state transmission statutory requirements for environmental certifications, facilitating development process.
- HB 2496 deals with the statutory definitions of transmission lines to be a minimum of a quarter mile.
- Bill text here: HB2437

Guggenheim takeaway:*FYI. Minor progress on transmission bills in AZ.*

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

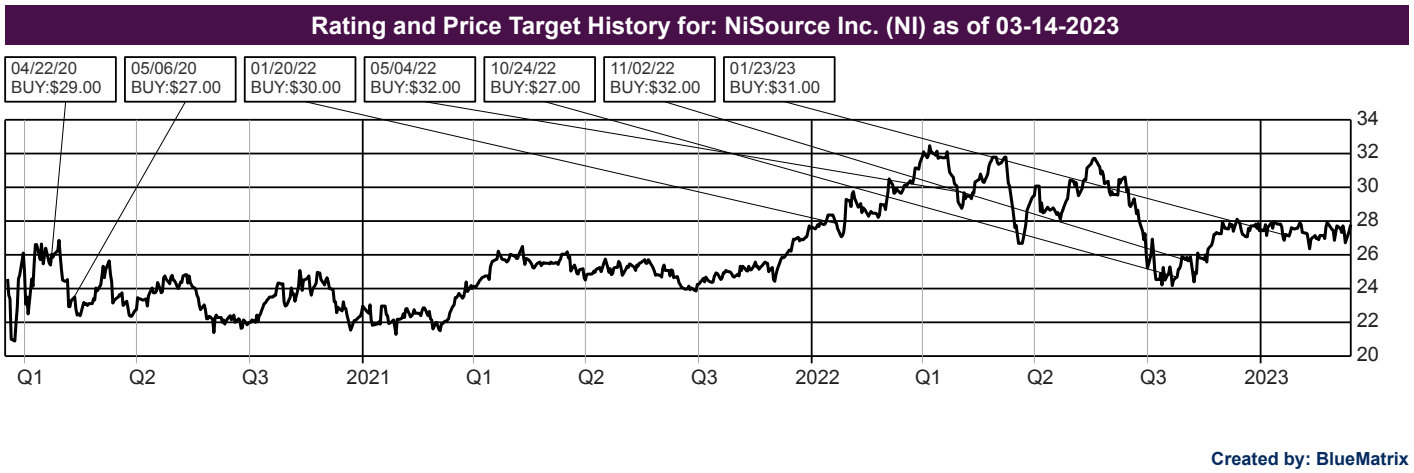
IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Guggenheim Securities, LLC or its affiliates expect(s) to receive or intend(s) to seek compensation for investment banking services from Ameren Corporation, Hawaiian Electric Industries, Inc. and NiSource Inc. in the next 3 months.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

Rating and Price Target History for: Ameren Corporation (AEE) as of 03-14-2023



Created by: BlueMatrix

Rating and Price Target History for: Hawaiian Electric Industries, Inc. (HE) as of 03-14-2023

Created by: BlueMatrix

Provided for the exclusive use of Michael Weisenburger at NiSource on 15-Mar-2023 02:05 PM.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgement. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conducts an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions

Provided for the exclusive use of Michael Weisenburger at NiSource on 15-Mar-2023 02:05 PM.

expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

This communication does not constitute an offer of Shares to the public in the United Kingdom. No prospectus has been or will be approved in the United Kingdom in respect of the Securities. Consequently, this communication is directed only at (i) persons who are outside the United Kingdom or (ii) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order"), (iii) high net worth entities falling within Article 49(2) of the Order (iv) and other persons to whom it may lawfully be communicated (all such persons together being referred to as "relevant persons"). Any investment activity to which this communication relates will only be available to, and will only be engaged with, relevant persons. Any person who is not a relevant person should not act or rely on this document or any of its contents.

For our AGA conference (May 20-23) meeting schedule, please scroll down…

For details on our Guggenheim-hosted client Utility events including our PPL NDR, EXC NDR, ETR NDR, PNW NDR, DTE NDR, PCG NDR, SMR NDR, ES NDR, LNT NDR, AWK NDR, CMS NDR, POR NDR, and other events, scroll down…

NEE NDR: Management Continues to Chop Through IRA Upside Opportunities but Baseline Remains Conservative; Headline Hurdles Require Time (see our note HERE)

TX – Texas Senate Bill on transmission certificate of necessity approval process is scheduled for public hearing

PJM – PJM updates cost of new entry calculations

WEC/Hydrogen – Emissions reduced at MI gas plant using hydrogen mix in fuel

DUK – Hearing scheduled in Kentucky rate case

NI – Limited rehearing granted in Columbia Gas rate case

CMS – MI appeals court denies rehearing appeal of CMS IRP

TX – Texas Senate Bill on transmission certificate of necessity approval process is scheduled for public hearing

- TX SB 1076 was set for public hearing on March 28, 2023.
- The bill addresses timelines for CPCN approvals on transmission projects.

Guggenheim takeaway:*FYI. Texas legislative session starting to pick up as we are watching multiple utility related bills including on the electric side where there is a capital structure bill proposed (HB 3042). The bill proposes a 180-day timeframe for CPCN approval of transmission projects for requests made after the bill is enacted, which would shorten the time for Texas utilities to gain CPCN approval incl. CNP, SRE, ETR, AEP.*

PJM – PJM updates cost of new entry calculations

- PJM has updated the cost of new entry and avoided cost calculations (CONE) for the 2026/2027 delivery year.
- CONE helps set pricing curves for PJM capacity auction.
- The review is on a 4-year cycle and FERC still has to approve those changes.
- Major changes include:
  - Nuclear power up to $2,568/MW-day.
  - Combined-cycle gas up to $540/MW-day,
  - Combustion turbines up to $427/MW-day.
  - Energy storage decreased to $502/MW-day.

Guggenheim takeaway:*FYI and a pricing datapoint.*

WEC/Hydrogen ─ Emissions reduced at MI gas plant using hydrogen mix in fuel

- The test results, announced yesterday, occurred in October 2022 and were conducted at the 55 MW UMERC-operated AJ Mihm power plant.
- Emissions were reduced by 9% at the plant by using a 25% hydrogen blend.
- More HERE

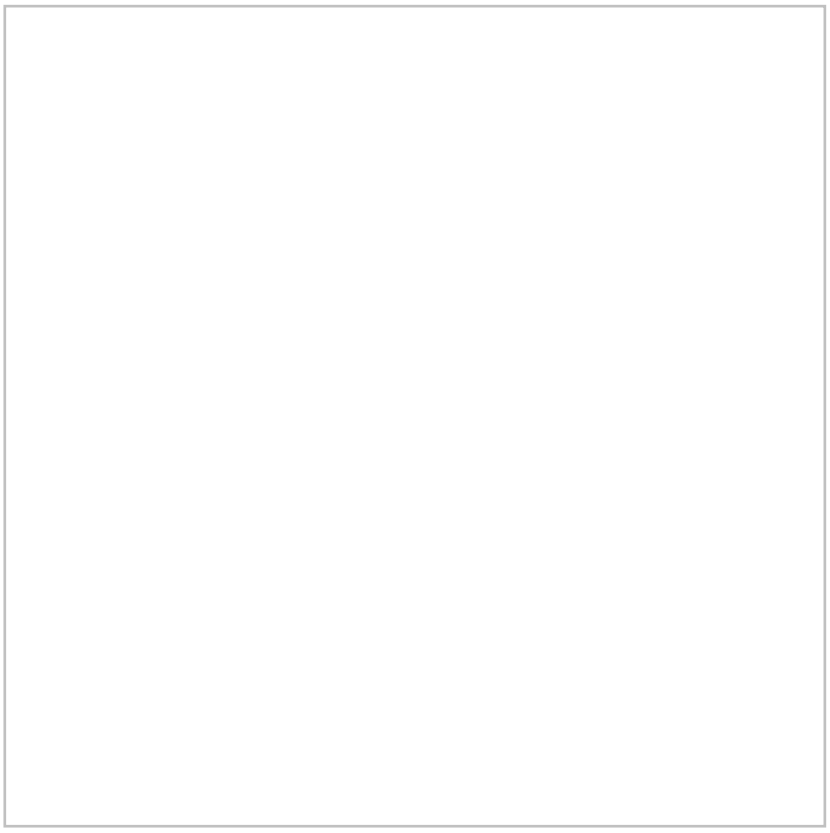
Guggenheim takeaway: *WEC continues to prioritize carbon-reduction strategies, including the use of hydrogen blends in generation fuel mixes. We continue to monitor the hydrogen market in general given material growth prospects for our space. For some visibility on hydrogen, see our NEE NDR note (link above) as hydrogen opportunities and IRS guidance visibility on the topic was a key inquiry among investors throughout our 3-day roadshow.*

DUK ─ Hearing scheduled in Kentucky rate case

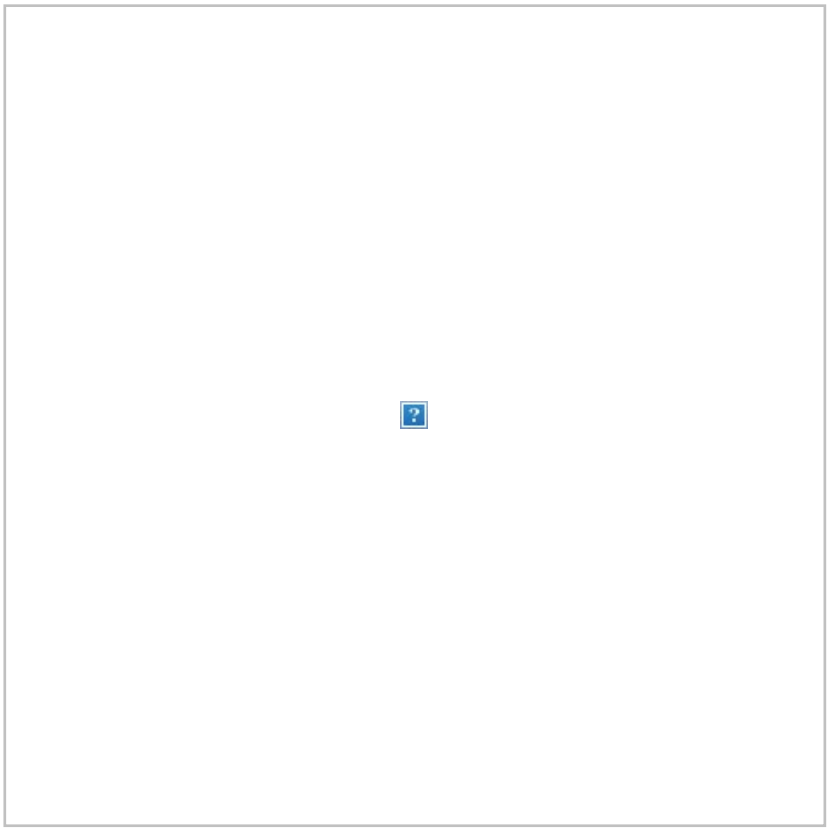
- A hearing in this matter will be held on May 9, 2023, through May 12, 2023, at 9 a.m. EDT.
- Witnesses who sponsor schedules, testimony, or responses to requests for information shall participate in person at the hearing.
- Docket 2022-00372

Guggenheim takeaway: *For your calendar. We continue to model a 9.6% ROE and 50% equity layer.*

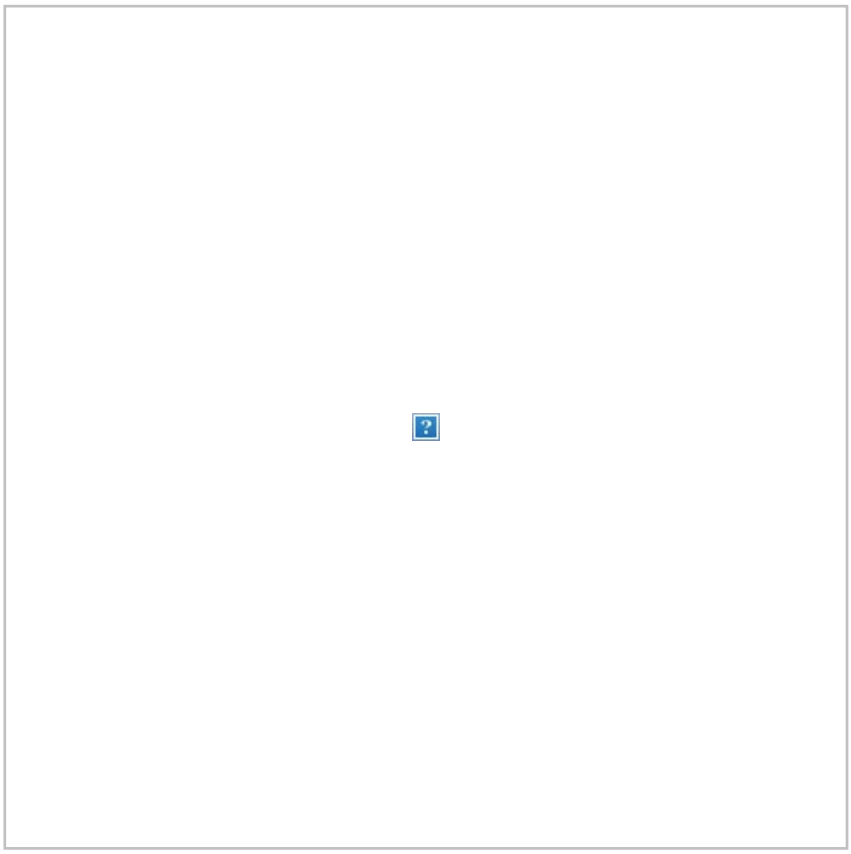
NI ─ Limited rehearing granted in Columbia Gas rate case



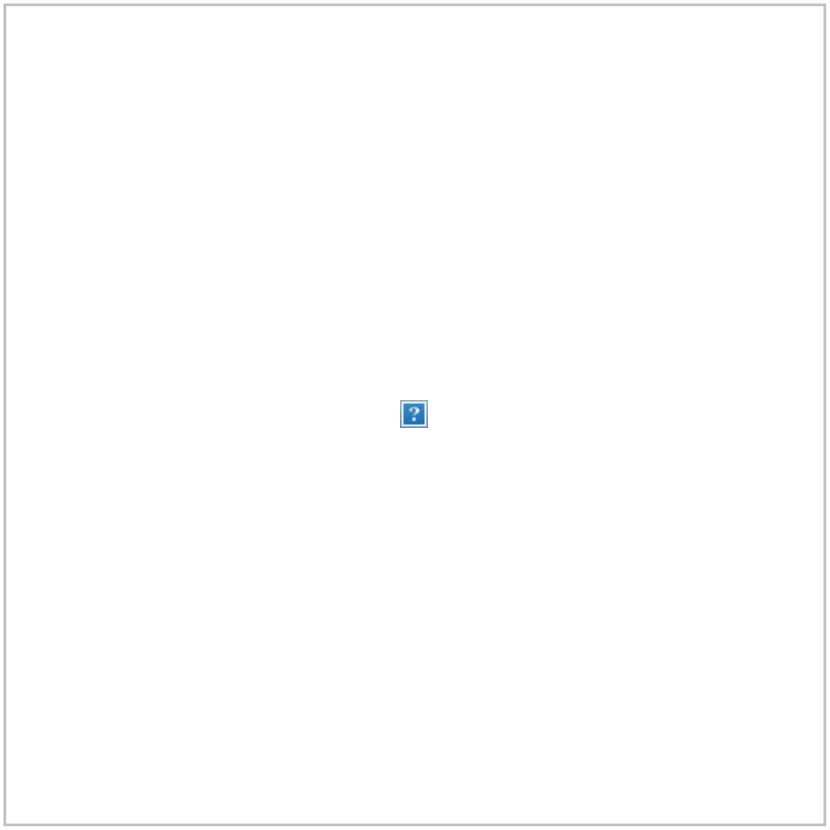
- January 26, 2023: the Commission issued its Opinion and Order in this proceeding, **approving the Stipulation**.
- February 27, 2023: OPAE, ELPC, and CUB each filed an application for rehearing. OPAE filed a corrected application for rehearing later that same day. ELPC filed a corrected application for rehearing on February 28, 2023.
- March 9, 2023: **Columbia Gas *and* OCC** filed memoranda *against the applications for rehearing* filed by OPAE, ELPC and CUB.
- Docket 21-0637-GA-AIR



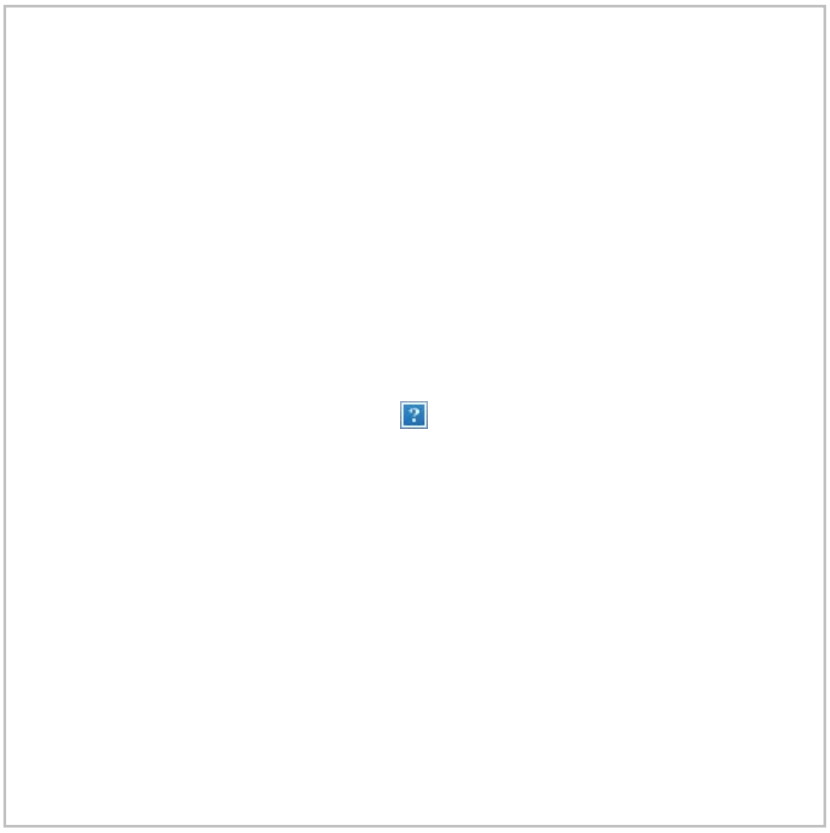
Guggenheim takeaway: *For your awareness. We continue to model the $68.2m rate increase authorized, with a 9.6% ROE and 50.6% equity layer.*



CMS – MI appeals court denies rehearing appeal of CMS IRP



- The MI appeals court denied a stakeholder appeal for rehearing of the CMS IRP.
- The complaint was opposed to shutting down coal but didn't prove there was an unjust MPSC decision in approving settlement.
- The IRP settlement was a strong multiparty agreement. Key points from the IRP are:
    - A full exit of coal and ~60% carbon emissions reduction by 2025. CMS will collect the unrecovered book value of Campbell 1-3 through the design life (2031 for Campbell 1&2 and 2039 for Campbell 3). CMS will earn a return of 9.0% ROE on these retired assets.
    - Acquisition of the natural gas Covert plant for $815M in May of 2023.
    - An RFP for PPAs for up to 700 MW of Michigan-based capacity starting in 2025 (CMS Enterprises can participate in the RFP).
    - An FCM equal to CMS's after-tax WACC on new PPAs.
- Docket: U-21090



Guggenheim takeaway: *FYI and not a surprise. CMS has one of the more aggressive coal retirement stories within our coverage.*

Investment Thesis, Valuation and Risks

Atmos Energy *(Overweight; Price Target: $119.00)*

Investment Thesis
ATO remains a top-tier rate base and EPS growth story versus gas and electric utility peers, with one of the most conservatively managed balance sheets among our utility coverage. The company's ability to cut costs and/or use balance sheet capacity provides dry powder, in addition to strong customer growth providing tailwinds to growth between rate cases. We view the 6-8% LT EPS CAGR guided by management as comfortably achievable.

Valuation
We lower our YE 2023 price target to $119 from $131/share. We base our valuation on our 2024 EPS estimate and a 18.4x P/E multiple, a premium to gas utility peers due to strong rate base growth visibility and transparent, low-lag regulatory mechanisms. The lower price target is due to decreased peer average multiples.

Risks to Rating and Price Target

- Regulated electric and gas utilities are subject to strict federal and state regulation, including determinations of allowed revenues. Any change to the existing ratemaking mechanisms, including a repeal of the mechanism itself, may cause future earnings to differ materially from our current expectations.
- Achievement of Atmos's long-term rate base and EPS CAGR targets is heavily dependent on robust capital investments, regulatory support, and favorable ratemaking mechanism. Any deferral of spending could put the company at risk of falling short of the LT rate base and earnings growth CAGR in any one year.
- Gas pipeline accidents in the industry have heightened the importance of pipeline safety and integrity management. These accidents can result in significant financial strains related to pipeline replacement, accident investigations, life and property claims, regulatory fines, and disallowances.
- Atmos is in the midst of a robust capital spending program, and any change in the company's operating environment and/or project cost overruns could require greater external equity funding, exposing investors to potential dilution risk in the future.

Richard W Sunderland
(1-212) 622-2869
richard.w.sunderlandiii@jpmorgan.com

Investment Thesis, Valuation and Risks

NiSource Inc. *(Overweight; Price Target: $30.00)*

Investment Thesis

NiSource hosted its most recent investor day last year, extending its financial plan through 2027 and providing a much anticipated update on conclusions from its business review. A planned 19.9% minority stake sale of NIPSCO dominated headlines, with management identifying this route out of the review to fund growth and alleviate balance sheet constraints in a tax-efficient manner. Headline 6-8% annual EPS growth screens attractively, with strong 8-10% annual rate base growth supporting this. Additionally, themes of balance sheet cushion under the new 14-16% long-term FFO/debt target and customer bill support through targeting flat O&M align well with premium qualities in the space. Overall, we acknowledge some initial investor frustration over this NIPSCO lever versus LDC asset rotation but see NI's approach as pragmatic and thematically consistent with recent minority stake sale trends across the group. Additionally, we see near-term tradeoffs relative to the company's prior 2024 outlook as reasonable against longer-term plan line of sight and greater financial flexibility, especially given designs for a variety of commodity price backdrops and positioning for future upside capital opportunities. We remain constructive on NI's long-term outlook and relative positioning vs. LDC peers.

Valuation

We lower our YE 2023 price target to $30 from $31/share. We base our price target on a sum-of-the-parts analysis using our 2024 electric and gas segment EPS forecasts. We value the gas and electric segments using 17.6x and 18.4x P/E multiples, respectively. These represent premiums to peers' on account of NI's coal generation transition, incremental renewables investment, ongoing pipe replacement programs, and above-average growth as a result, plus favorable ratemaking mechanisms. The lower price target is due to decreased peer average multiples.

Risks to Rating and Price Target

Gas pipeline accidents in the industry have heightened the importance of pipeline safety and integrity management. These accidents can result in significant financial strains related to pipeline replacement, accident investigations, life and property claims, regulatory fines, and disallowances.

Achievement of NiSource's long-term rate base and EPS CAGR targets is heavily dependent on robust capital investments, regulatory support, and favorable ratemaking mechanism. Any deferral of spending could put the company at risk of falling short of the LT rate base and earnings growth CAGR in any one year.

Regulated electric and gas utilities are subject to federal and state regulations, including determinations of allowed revenues. Negative changes to the regulatory environments may cause future earnings to be materially lower than current expectations.

Richard W Sunderland
(1-212) 622-2869
richard.w.sunderlandiii@jpmorgan.com

Investment Thesis, Valuation and Risks

New Jersey Resources *(Underweight; Price Target: $45.00)*

Investment Thesis

New Jersey Resources is facing uncertainty in recapturing CEV's solar development momentum in the face of PJM interconnection delays and an extended process around the BPU's solar successor program. While SREC sales and strong performance across the company's other businesses have insulated earnings, renewables capital deployment remains critical to NJR's long-term earnings growth outlook. Here, we see risk of a pushout of segment investment. On this front, mounting delays also serve to further back-end load CEV's MW deployment, raising execution risk when development activity ultimately returns to prior levels. NJR's current valuation prices in little room for this execution risk, in our view, as CEV is increasingly the driver of earnings growth over NJR's plan.

Valuation

We decrease our YE 2023 price target to $45/share, from $47, using a 16.3x P/E multiple on our 2024 estimate. The multiple reflects a discount to natural gas LDC peers on account of 1) ongoing solar development risk while PJM and NJ market changes remain in flux, 2) exposure to non-utility transportation & storage and energy services earnings, and 3) NJ-specific energy transition risks. The lower price target is due to decreased peer average multiples.

Risks to Rating and Price Target

- Robust capital investments, regulatory support, and favorable ratemaking mechanisms are significant drivers of NJR's long-term rate base and EPS CAGR targets. Any increases to regulated investment could raise these growth rates.
- Changing state receptivity to continued natural gas system investment has the potential to meaningfully alter NJNG's capex opportunities. While we see current New Jersey policies as balanced, the state has demonstrated a commitment to clean energy that could lead to widespread electrification as a means to decarbonize its overall economy. Conversely, any NJ prioritization of RNG and hydrogen for future use of current gas infrastructure could expand both regulated and non-regulated growth opportunities.
- NJR's solar projects have faced delays that are lowering near-term segment investment. Should the company's pivot outside of NJ and PJM enable an acceleration of capex versus current levels, earnings growth could exceed our estimates.

Richard W Sunderland
(1-212) 622-2869
richard.w.sunderlandiii@jpmorgan.com

Investment Thesis, Valuation and Risks

Spire Inc *(Neutral; Price Target: $68.00)*

Investment Thesis

With an MO rate order in hand approving Spire's rate case settlement last year, regulatory risk going forward stands at lows relative to recent history over the past two years. Execution against the company's current plan, including the Spire Storage expansion project, is now in focus as SR moves on from back-to-back rate cases and EPS volatility associated with its 2021 rate order. We see current levels as fairly balancing the company's MO regulatory exposure and inconsistent growth track record with this new clean regulatory slate following the rate case.

Valuation

We lower our YE23 price target to $68/share from $73. We base our price target on a P/E multiple of 15.9x applied to our 2024 EPS estimate. The multiple incorporates a discount to the gas utility peer group, reflecting MO regulatory risk and limited line of sight to recurring Marketing earnings. The lower price target is primarily due to decreased peer average multiples.

Risks to Rating and Price Target

Given the importance of capital spending levels to the company's adjusted net income, timely rate relief is a necessity for the company to continue to grow earnings. Any change to the regulatory environments may cause future earnings to materially differ from current expectations.

Utilities are subject to federal and state regulation, including determination of allowed revenues. A meaningful change to the regulatory environment may cause future earnings to be lower than our current expectations.

Our estimates assume some inflation-driven regulatory lag. Cost controls or other operational variances to offset these impacts could drive results above our estimates.

Richard W Sunderland
(1-212) 622-2869
richard.w.sunderlandiii@jpmorgan.com

Investment Thesis, Valuation and Risks

Southwest Gas Holdings Inc. *(Neutral; Price Target: $67.00)*

Investment Thesis

Southwest Gas Holdings and large shareholder Carl Icahn reached a settlement in their conflict over the company's Questar Pipelines transaction and overall SWX strategy in the face of a perceived SOTP valuation discount, among other items. The company's subsequent strategic review update indicated that SWX is no longer pursuing potential total company and utility sale processes, pointing to more incremental action around separating Centuri and MountainWest. While we see the MountainWest sale and Centuri spin as positive steps in unlocking value, the path to near-term upside appears less clear at this time as the company works through operational improvements at the utility.

Valuation

We lower our Dec 2023 price target to $67 from $75/share, based on an SOTP valuation using our 2024 segment forecasts. Our price target includes $40 of value for SWX's natural gas distribution operations inclusive of parent drag, utilizing a 14.2x P/E multiple. This multiple reflects a discount to gas utility peers on account of AZ regulatory risk and below-average AZ ratemaking mechanics. Additionally, we include $26/share of value for Centuri, based on an in-line 9.6x EV/EBITDA multiple. Our SOTP also includes $2/share of COLI value. We exclude COLI mark-to-market and future payouts from our 2023-25 EPS estimates. The lower price target is due to decreased peer average multiples.

Our price target remains sensitive to the assumed EV/EBITDA multiple for Centuri. Here, a +/- 1x change drives a +/- $4-5 impact to total value per share.

Risks to Rating and Price Target

Rates charged to the company's utility customers are set by separate state regulators in AZ, NV, and CA. Given the current elevated level of capital spending, consistent rulings and interim recovery riders remain instrumental in providing rate relief to drive earnings growth. Any meaningful positive or negative change to the regulatory framework in these jurisdictions may cause future earnings to differ materially from current expectations.

SWX has guided that a portion of its three-year capex plan will be funded by incremental equity issuances. Equity timing and ultimate funding levels may cause future earnings per share to differ from current expectations.

The company intends to separate its construction business. Potential paths include a tax-free spin, and the ultimate method pursued could impact value to shareholders versus our assumptions and SWX's residual equity needs, as discussed above.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight [Over the next six to twelve months, we expect this stock will outperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Neutral [Over the next six to twelve months, we expect this stock will perform in line with the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Underweight [Over the next six to twelve months, we expect this stock will underperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Not Rated (NR): J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap equity research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying analyst's coverage universe can be found on J.P. Morgan's research website, https://www.jpmorganmarkets.com.

Coverage Universe: Sunderland III, Richard W: AES Corp. (AES), Algonquin Power & Utilities Corp. (AQN.TO), Allete Inc. (ALE), American Water Works Company, Inc. (AWK), Atmos Energy (ATO), Avangrid, Inc (AGR), Emera Inc. (EMA.TO), Fortis Inc. (FTS.TO), New Jersey Resources (NJR), NiSource Inc. (NI), SJW Group (SJW), Southwest Gas Holdings Inc. (SWX), Spire Inc (SR)

J.P. Morgan Equity Research Ratings Distribution, as of January 01, 2023

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	48%	37%	14%
IB clients**	47%	45%	35%
JPMS Equity Research Coverage*	47%	40%	13%
IB clients**	65%	66%	55%

***Please note that the percentages might not add to 100% because of rounding.**
****Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.**
For purposes only of FINRA ratings distribution rules, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at http://www.jpmorganmarkets.com, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on

the company pages of our client website, http://www.jpmorganmarkets.com. This report also sets out within it the material underlying assumptions used.

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of http://www.jpmorganmarkets.com where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to UK MIFID Research Unbundling exemption for details of JPMorgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Any digital or crypto assets discussed in this research report are subject to a rapidly changing regulatory landscape. For relevant regulatory advisories on crypto assets, including bitcoin and ether, please see https://www.jpmorgan.com/disclosures/cryptoasset-disclosure.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit https://www.theocc.com/components/docs/riskstoc.pdf for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or http://www.finra.org/sites/default/files/Security_Futures_Risk_Disclosure_Statement_2018.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below, this material has been distributed by the legal entity responsible for production. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

Morgan Securities (Taiwan) Limited, subject to the license scope and the applicable laws and the regulations in Taiwan. According to Paragraph 2, Article 7-1 of Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers (as amended or supplemented) and/or other applicable laws or regulations, please note that the recipient of this material is not permitted to engage in any activities in connection with the material that may give rise to conflicts of interests, unless otherwise disclosed in the "Important Disclosures" in this material. **Thailand**: This material is issued and distributed in Thailand by JPMorgan Securities (Thailand) Ltd., which is a member of the Stock Exchange of Thailand and is regulated by the Ministry of Finance and the Securities and Exchange Commission, and its registered address is 3rd Floor, 20 North Sathorn Road, Silom, Bangrak, Bangkok 10500. **UK:** Unless specified to the contrary, research is distributed in the UK by J.P. Morgan Securities plc ("JPMS plc") which is a member of the London Stock Exchange and is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority. JPMS plc is registered in England & Wales No. 2711006, Registered Office 25 Bank Street, London, E14 5JP. This material is directed in the UK only to: (a) persons having professional experience in matters relating to investments falling within article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) (Order) 2005 ("the FPO"); (b) persons outlined in article 49 of the FPO (high net worth companies, unincorporated associations or partnerships, the trustees of high value trusts, etc.); or (c) any persons to whom this communication may otherwise lawfully be made; all such persons being referred to as "UK relevant persons". This material must not be acted on or relied on by persons who are not UK relevant persons. Any investment or investment activity to which this material relates is only available to UK relevant persons and will be engaged in only with UK relevant persons. Research issued by JPMS plc has been prepared in accordance with JPMS plc's policy for prevention and avoidance of conflicts of interest related to the production of Research which can be found at the following link: J.P. Morgan EMEA - Research Independence Policy. **U.S.**: J.P. Morgan Securities LLC ("JPMS") is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.

J.P.Morgan

North American Utilities Weekly

Utilities Outperform in a Volatile Week; CNP/PCG/NI CFO Changes; News Flow; Weekly Comps

- **Utilities surge as investors seek stability; sentiment check.** Utilities (+4.0%) outperformed the S&P 500 (+1.5%) as investors de-risked while financials continued to dominate market headlines. Within the group, a flight to quality saw **WEC**, **XEL**, and **AWK** outperform, plus defensive trades benefiting Canadians **FTS** and **EMA**. **NEE** ended the week relatively flat with uncertainty surrounding the ultimate timeline of Supreme Court appeal and FEC issues. CFO changes across **CNP**, **PCG**, and **NI** sparked investor conversation but no notable pushback. We continue to see **CMS** and **NI** as top picks in the current market.

- **Please join us at the JPM Midwest Utilities & Midstream 1x1 Forum, April 5-6.** Working with our US IG credit colleagues, the Chicago event will feature ~15 expected corporate attendees hosting 1x1 meetings with regional investors. April 5th will feature Utility management representatives from **AEE**, **AEP**, **CMS**, **ETR**, **ES**, **EXC**, **WEC**, and **XEL**. April 6th will feature Midstream management representatives from **ENB**, **EPD**, **OKE**, **PPL CN**, **TRGP, PAA, DTM** and **KEY CN**. Please contact your J.P. Morgan sales representative for more details.

- **Please join us at the 2023 AGA Financial Forum, May 21-23.** The American Gas Association will host its annual investor conference in Fort Lauderdale this spring, where we will meet with ~18 management teams, including **ED**, **NI**, **NJR**, and **SWX** on May 21st, **AEE**, **AGR**, **ATO**, **CMS**, **CNP**, **D**, **DTE**, **NWE**, **PEG**, **SRE**, and **XEL** on May 22nd, and **DUK**, **SR**, and **WEC** on May 23rd. Please contact your J.P. Morgan sales representative for more details.

- **CNP and PCG CFO announcements surprise, with PCG CFO Chris Foster moving to CNP.** In dueling updates, **CNP** announced its hire of PCG CFO Chris Foster to fill the company's CFO role opened after last year's promotion of Jason Wells to President and COO. Additionally, **PCG** tapped current company advisor Carolyn Burke to assume the CFO role upon Foster's May departure. For Centerpoint, this change echoes a similar move by Wells to CNP from PCG, where both executives previously overlapped. We see Foster bringing a highly visible track record to the company, having led PCG's financial efforts since shortly after the emergence from bankruptcy. For PG&E, Burke offers wide enterprise improvement experience from stints at Dynegy and NRG Energy after restructurings and was most recently CFO of Chevron Phillips Chemical Company before joining PCG as an advisor earlier this year. PCG CEO Patti Poppe, outgoing CFO Chris Foster, and incoming CFO Carolyn Burke held a call with the investment community shortly after the announcements. Points of emphasis included, 1) continuity in the transition with Foster staying on through May, 2) no changes to PCG's targets or financial

J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

plan, 3) alignment of Burke's efficiency experience, particularly at Dynegy, with PCG's ongoing work to transition from bankruptcy recovery to steady state operations, and 4) some potential to accelerate cost initiatives given Burke's deep expertise. Overall, these moves screen as a win-win for both companies, with CNP landing a well-regarded industry figure in Foster and PCG leveraging Burke's unique experience as the company continues its post-bankruptcy transformation.

- **NI management shuffle sees CFO change, among others.** NiSource announced a series of leadership changes, including naming Shawn Anderson as CFO and current CFO Donald Brown as Chief Innovation Officer. In speaking with the company, management offered a message emphasizing plan continuity, no changes to financial targets, and Anderson's longstanding work with Brown that includes close collaboration on the strategic review and current financial plan. We highlight that Anderson is a familiar face to the investment community in his current role as SVP of Risk and Chief Strategy Officer, in a positive development, and see these moves as consistent with broadening experience across the executive bench. As such, we have no concerns on the timing overlap with NI's NIPSCO minority stake sale process given the normal course nature of these changes and that this also furthers personnel changes under CEO Lloyd Yates after assuming leadership of NI last year. In taking over as Chief Innovation Officer, Brown will oversee a critical area of technology and transformation that underpins the company's O&M efforts identified at last year's investor day. Other changes include, 1) the hire of Michael Luhrs as EVP of Strategy and Risk and Chief Commercial Officer (joining from Alliant Energy), and 2) the naming of Melody Birmingham as EVP, NiSource and group president, NiSource Utilities (currently Chief Innovation Officer).

- **AQN: $0.22 actual, $0.20 JPMe, $0.19 Street.** On the KY Power acquisition, management pointed to company efforts as part of last month's new FERC application, encompassing commitments that run through the transaction agreement's April 26 outside date. Declining to speculate beyond this date or quantify long-term growth drivers with and without KY Power, management appears focused on meeting these near-term commitments until the outside date. Unsurprisingly in reaction, investors appear to be reading this commentary as softening resolve to see the deal through or extend beyond April 26. We do not expect this sentiment to change absent a definitive company update alongside FERC review that reiterates AQN's long-term commitment to the deal should approvals lag the accelerated timeframe currently targeted. Optionality to meet its $1bn 2023 asset sale target stood as another top call theme, but plan color otherwise remains high level across timing, current or planned processes, and potential tie-ins with Atlantica's (AY, covered by Mark Strouse) strategic review. Here, we see the company's sprawling portfolio as offering logical divestments across both the regulated and renewables businesses, potentially driving a multi-year capital rotation opportunity. However, the KY Power deal remains a key hurdle to framing this overall need, before considering the impact of various Atlantica outcomes as well.

- **News flow: ES** announced a joint proposal with Orsted for Revolution Wind 2, an 884MW offshore wind project in Rhode Island. If selected, RW2 will include a ~$35mm investment into a regional offshore wind logistics and operations hub at Quonset Point, the construction of two new crew transfer vessels, and more than $2bn in direct economic benefits to Rhode Island. Separately, the PURA voted 2-1 to uphold the draft decision clipping Aquarion's proposed annual revenue requirement by $36mm to $197mm, premised upon an 8.70% ROE (vs 10.35% requested) on a 50.35% equity layer and rate base valued at $989.4mm. President Joe Biden and European Commission President Ursula von der Leyen pledged more cooperation and transparency on green incentives, working to end a recent dispute over protectionism. Judy Chang, the former Massachusetts Undersecretary of Energy

and Climate Solutions under Governor Charlie Baker (R), is being considered for an opening on the FERC. The DOE is launching a $750mm fund for green hydrogen R&D. With the support of both Legislative Chambers and the Governor, New York is poised to become the first state to fully ban natural gas in new buildings, requiring the use of electric stoves and heating instead. The Texas Legislature is considering offering low interest loans to incentivize the construction of natural gas fired power plants while also cutting subsidies for renewables. **ETR** is requesting to add 3 GW of new solar power in Louisiana, representing the largest increase in its renewable generation to-date. The request is part of ETR's plan to add 17 GW of renewables by the end of 2031. The EIA predicts that U.S. energy-related carbon emissions will fall to 25-38% below 2005 levels by 2030, short of the 50-52% called for in the Paris Agreement.

Companies Discussed in This Report (all prices in this report as of market close on 17 March 2023)
Atlantica Sustainable Infrastructure(AY/$27.05/N)

Analyst Certification: The Research Analyst(s) denoted by an "AC" on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an "AC" on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst's personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. For all Korea-based Research Analysts listed on the front cover, if applicable, they also certify, as per KOFIA requirements, that the Research Analyst's analysis was made in good faith and that the views reflect the Research Analyst's own opinion, without undue influence or intervention.

All authors named within this report are Research Analysts who produce independent research unless otherwise specified. In Europe, Sector Specialists (Sales and Trading) may be shown on this report as contacts but are not authors of the report or part of the Research Department.

Important Disclosures

Company-Specific Disclosures: Important disclosures, including price charts and credit opinion history tables, are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting https://www.jpmm.com/research/disclosures, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight [Over the next six to twelve months, we expect this stock will outperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Neutral [Over the next six to twelve months, we expect this stock will perform in line with the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Underweight [Over the next six to twelve months, we expect this stock will underperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Not Rated (NR): J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap equity research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying analyst's coverage universe can be found on J.P. Morgan's research website, https://www.jpmorganmarkets.com.

J.P. Morgan Equity Research Ratings Distribution, as of January 01, 2023

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	48%	37%	14%
IB clients**	47%	45%	35%
JPMS Equity Research Coverage*	47%	40%	13%
IB clients**	65%	66%	55%

*Please note that the percentages might not add to 100% because of rounding.
**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.
For purposes only of FINRA ratings distribution rules, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at http://www.jpmorganmarkets.com, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, http://www.jpmorganmarkets.com. This report also sets out within it the material underlying assumptions used.

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of http://www.jpmorganmarkets.com where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Registration of non-US Analysts: Unless otherwise noted, the non-US analysts listed on the front of this report are employees of non-US affiliates of J.P. Morgan Securities LLC, may not be registered as research analysts under FINRA rules, may not be associated persons of J.P. Morgan Securities LLC, and may not be subject to FINRA Rule 2241 or 2242 restrictions on communications with covered companies, public appearances, and trading securities held by a research analyst account.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to UK MIFID Research Unbundling exemption for details of JPMorgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Any digital or crypto assets discussed in this research report are subject to a rapidly changing regulatory landscape. For relevant regulatory advisories on crypto assets, including bitcoin and ether, please see https://www.jpmorgan.com/disclosures/cryptoasset-disclosure.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit https://www.theocc.com/components/docs/riskstoc.pdf for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or http://www.finra.org/sites/default/files/Security_Futures_Risk_Disclosure_Statement_2018.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below, this material has been distributed by the legal entity responsible for production. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

Legal Entities Disclosures and Country-/Region-Specific Disclosures:

NiSource's Long-Term Growth Focused on Clean Energy

Business Strategy & Outlook Travis Miller, Strategist, 26 Jan 2023

NiSource continues to transition away from its roots as a natural gas distribution and midstream company. An increasing focus on electric infrastructure and renewable energy will be a key growth driver in the coming years, creating a more even mix of earnings from its natural gas and electric businesses.

We expect about 70% of NiSource's operating income will come from its six natural gas distribution utilities and 30% from its electric utility in Indiana following the planned minority interest sale in its electric utility in 2023.

NiSource's utilities have constructive regulatory frameworks that allow it to collect a cash return of and a cash return on the bulk of its capital investments within 18 months. We expect NiSource to invest more than $8 billion over the next three years, including what could be $2 billion of renewable energy projects in Indiana, where NiSource enjoys favorable regulation.

That growth could extend beyond 2025 based on electric and gas system infrastructure improvement projects NiSource has identified. Replacing steel and cast-iron pipe with plastic at its natural gas distribution utilities is a key initiative along with investments across the business that reduce greenhouse gases. Almost all of these investments receive favorable regulatory treatment, enhancing NiSource's cash flow.

Sector
Utilities

Industry
Utilities - Regulated Gas

Business Description

NiSource is one of the nation's largest natural gas distribution companies with approximately 3.5 million customers in Indiana, Kentucky, Maryland, Ohio, Pennsylvania, and Virginia. NiSource's electric utility transmits and distributes electricity in northern Indiana to about 500,000 customers. The regulated electric utility also owns more than 3,000 megawatts of generation capacity, most of which is now coal-fired but is being replaced by natural gas and renewable energy.

The business diversification started with its Columbia Pipeline Group separation in 2015. In October 2020, NiSource sold its Columbia Gas of Massachusetts utility and received $1.1 billion of proceeds that it used to strengthen the balance sheet. The sale came nearly two years after a natural gas explosion on NiSource's Massachusetts system killed one person north of Boston. Insurance covered roughly half of the almost $2 billion of claims, penalties, and other expenses.

Earnings are set to rebound quickly from their low in 2020 when COVID-19 pandemic costs, lower energy use, the Massachusetts utility sale, and a large equity issuance weighed on earnings. We expect modest customer growth combined with NiSource's infrastructure growth investments to support 8% annual earnings growth and 6% annual dividend growth from 2023 to 2026.

Bulls Say Travis Miller, Strategist, 26 Jan 2023

- We expect the dividend to grow near 6% annually during the next few years before accelerating to keep pace with earnings in 2024 and beyond.
- NiSource's growth plan will support Indiana policymakers' desire to cut the state's carbon emissions by replacing coal generation with renewable energy and energy storage.
- New legislation has improved the regulatory framework in Indiana for NiSource's electric and natural gas distribution utilities.

Bears Say Travis Miller, Strategist, 26 Jan 2023

- Industrial customers account for over half of NiSource's electric sales, higher than most utilities. Industrial sales are more sensitive to the economy than residential and commercial sales.
- Policies to reduce carbon emissions could be a long-term threat for NiSource's natural gas distribution business if policymakers in states it serves aim to reduce retail gas use.
- NiSource has issued nearly $3 billion of equity and preferred stock since 2017, resulting in little EPS growth.

Economic Moat Travis Miller, Strategist, 26 Jan 2023

Service territory monopolies and efficient scale advantages are the primary moat sources for NiSource's regulated gas and electric utilities. State and federal regulators grant regulated utilities like NiSource exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their networks. In exchange for regulated utilities' service territory monopolies, state and federal regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.

This implicit contract between regulators and capital providers should, on balance, allow NiSource's regulated utilities to achieve at least their costs of capital, though observable returns might vary in the short run based on demand trends, investment cycles, operating costs, and access to financing.

Investment Style	Mid Core	Mid Core	Mid Core	Mid Core

We estimate NiSource will derive roughly 70% of its operating earnings from its natural gas distribution utilities and 30% from its integrated electric business in Indiana following the planned sale of a minority interest share of its electric utility in 2023. In all cases, state and federal regulators set customer rates that allow NiSource to recover its operating and capital costs.

NiSource has no direct commodity price risk that could weaken its moat. NiSource exited the no-moat retail energy supply business in 2010.

Fair Value and Profit Drivers Travis Miller, Strategist, 26 Jan 2023

Our fair value estimate for NiSource is $32 per share.

We assume NiSource invests nearly $9 billion in 2023-25, including $2 billion of investment in renewable energy projects in Indiana to replace its coal-fired power generation fleet by 2028.

MORNINGSTAR®

NiSource Inc NI ★★★★ 25 Jan 2023 22:28, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
27.58 USD 25 Jan 2023	32.00 USD 24 Aug 2022 19:55, UTC	0.86	11.20 USD Bil 25 Jan 2023	Narrow	Stable	Low	Standard	4 Jan 2023 06:00, UTC

We expect NiSource's safety-related gas distribution investments will remain well above maintenance-level spending for several more years, resulting in earnings growth at all of its gas utilities. We expect investment at the gas utilities to slow beyond 2025 while growth investment at the electric utility continues.

In total, we expect 11% average annual rate base growth and 8% average annual earnings growth through 2026 when combining the planned electric and gas system investments. The key factor in our growth outlook is a favorable outcome in NiSource's 2023-24 electric rate case in Indiana.

Renewable energy and gas distribution infrastructure investments should support strong dividend growth, a better ESG profile, and lower regulatory risk for investors. We don't expect a material valuation impact from year-to-year policy-related shifts in investment, notably Indiana solar projects.

We use a 5.8% cost of capital in our discounted cash flow valuation, which incorporates a 7.5% cost of equity. Our cost of equity is lower than the 9% rate of return we expect investors will demand of a diversified equity portfolio. We believe our cost of equity reflects the risk associated with regulated electric and natural gas distribution utilities like NiSource operating in states that have constructive regulatory frameworks.

Risk and Uncertainty Travis Miller, Strategist, 26 Jan 2023

We assign NiSource a Low Morningstar Uncertainty Rating. Regulatory risk remains the key uncertainty. However, NiSource's regulatory exposure is diversified with state-regulated gas and electric operations in six states and a federally regulated electric transmission system. NiSource has reduced some of the regulatory uncertainty related to its planned investments by securing preapprovals and favorable rate mechanisms that provide for customer rate increases as the utility makes its infrastructure investments.

In 2020, NiSource announced it would eliminate all coal-fired generation from its power plant fleet by 2028, significantly reducing environmental, social, and governance risk. This transition will require signing power purchase agreements for renewable energy, building new solar and wind farms, and making modifications to its electric grid. There is a modest amount of execution risk to this dramatic transition away from coal generation.

Capital Allocation Travis Miller, Strategist, 26 Jan 2023

We assign NiSource a Standard Morningstar Capital Allocation Rating primarily due to management's work with regulators and policymakers to build support for its investments in clean energy, infrastructure modernization, and safety.

The CEO transition from Joe Hamrock to Lloyd Yates in February 2022 appears as if it will bring no major changes. Yates has been a director at NiSource since 2020 and previously led Duke Energy's core

NiSource Inc NI ★★★★ 25 Jan 2023 22:28, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
27.58 USD 25 Jan 2023	32.00 USD 24 Aug 2022 19:55, UTC	0.86	11.20 USD Bil 25 Jan 2023	Narrow	Stable	Low	Standard	4 Jan 2023 06:00, UTC

Carolina operations, which are more than twice the size of NiSource.

Although there was some speculation when Yates took over that NiSource would divest one or more of its gas distribution utilities, the market collapse in 2022 nixed that as an immediate option. Instead, it appears NiSource will sell a small share of its Indiana electric utility to reduce NiSource's equity needs to fund its growth investments.

Current and former NiSource management made two key capital allocation decisions that we think were favorable for shareholders and positioned the company to execute its current growth plan. The first move was forming Columbia Pipeline Partners and executing Columbia Pipeline Group's tax-free separation.

The second move was selling Columbia Gas of Massachusetts to Eversource Energy in 2020 after regulators determined NiSource was responsible for a gas explosion north of Boston. Even though the incident had a negative effect on shareholder value, NiSource resolved the issues quickly and received an attractive price to exit a region that was farthest from its core Midwest utilities.

Hamrock championed NiSource's clean energy growth strategy after succeeding Bob Skaggs in mid-2015 when Skaggs, a 32-year NiSource veteran, chose to lead the newly formed Columbia Pipeline Group. CFO Donald Brown joined NiSource in April 2015 after stints at UGI Utilities and Constellation Energy.

No Surprises at NiSource's Investor Day; Still an Attractive Long-Term Investment Travis Miller, Strategist, 7 Nov 2022

We are reaffirming our $32 fair value estimate after NiSource announced a strategic plan focused on strengthening the balance sheet, managing operating costs, and increasing capital investments, all in line with our expectations. We are reaffirming our narrow moat and stable moat trend ratings.

NiSource is one of our top utilities picks, trading at a 20% discount to our fair value estimate. Compared with other utilities, we think NiSource has more long-term investment opportunities relative to its size and better regulation. The stock's 3.6% dividend yield and above-average growth relative to its peers suggests total returns should top most utilities' during the next five years.

Management lowered its long-term annual earnings growth target to 6%-8% from 7%-9% but extended the timeframe to 2027 from 2024. We forecast 8% annual growth from 2021-26. We think management's extended timeframe is a net positive for investors even though it implies slightly lower 2023-24 earnings. The previous growth range largely reflected accelerated renewable energy investments and large rate increases in Indiana and Ohio in 2023-24. We think the new growth target

27.58 USD 25 Jan 2023	32.00 USD 24 Aug 2022 19:55, UTC	0.86	11.20 USD Bil 25 Jan 2023	Narrow	Stable	Low	Standard	4 Jan 2023 06:00, UTC

better reflects NiSource's 10-year, $30 billion investment plan and opportunities for cost savings.

As we expected, NiSource announced no significant M&A activity. Throughout the year, CEO Lloyd Yates suggested the firm might sell one of its six gas utilities, but we thought that was unlikely as interest rates climbed and utilities' valuations sank. NiSource intends to sell 19.9% of its Indiana utility, NIPSCO, to strengthen the balance sheet and avoid large equity needs. We think NIPSCO is the most valuable part of NiSource's portfolio, but we expect any transaction will be too small to impact our fair value estimate.

NiSource reported $0.10 of adjusted EPS in the third quarter and is on track to meet our full-year forecast. Our 2023 EPS estimate is in line with management's $1.50-$1.57 guidance.

NiSource's Near-Term Growth Depends on Regulatory Outcomes in Ohio, Indiana Travis Miller, Strategist, 20 Oct 2022

We are reaffirming our $32 fair value estimate, narrow moat, and stable moat trend ratings for NiSource after reviewing recent regulatory developments. NiSource remains one of our top utilities picks, trading at a 22% discount to our fair value estimate.

NiSource's regulatory risk will ramp up in 2023 and ultimately determine whether NiSource hits the high end or low end of management's 7%-9% annual average earnings growth range. We forecast 8% growth.

NiSource's largest utility, NIPSCO in Indiana, last month requested a $218 million electric rate increase with a decision likely next year. NiSource's second-largest utility, Columbia Gas of Ohio, last year requested a $221 million rate increase. Delayed hearings mean a decision this year is unlikely. The regulatory staff this summer proposed a rate increase between $35.2 million and $57.6 million.

Allowed returns on equity will be key in both cases. NiSource's 10.39% allowed ROE in Ohio and 9.75% allowed ROE in Indiana are above the sector average. We assume Ohio commissioners cut NiSource's allowed ROE to 10%, the high end of the regulatory staff's 9% to 10% proposed range but below NiSource's 11.5% request. We assume Indiana commissioners keep NiSource's electric allowed ROE at 9.75%, lower than its 10.4% request. Last year, Maryland regulators cut NiSource's allowed ROE to 9.65% from 10.85% and Kentucky regulators cut its allowed ROE to 9.35% from 10.3%, both in line with recent decisions for other utilities.

A critical issue in Ohio is the extension of its capital investment rate plans, which have helped NiSource avoid a base rate review in Ohio since 2008. Similar rate plans at NiSource's other utilities are key to converting what we estimate will be $2 billion of annual growth investment into earnings growth beyond 2024. We think CEO Lloyd Yates will announce new growth opportunities and cost savings on

27.58 USD 25 Jan 2023	32.00 USD 24 Aug 2022 19:55, UTC	0.86	11.20 USD Bil 25 Jan 2023	Narrow	Stable	Low	Standard	4 Jan 2023 06:00, UTC

Nov. 7. Gas utility divestures seem unlikely given the recent drop in utilities' valuations.

NiSource Initiates Critical Electric Rate Review in Indiana Travis Miller, Strategist, 30 Sep 2022

We are reaffirming our $32 fair value estimate for NiSource after the company initiated a long-anticipated electric rate review in Indiana. We are also reaffirming our narrow moat and stable moat trend ratings.

NiSource remains one of our top picks in the utilities sector in part because we think that Indiana utility rate regulation will remain constructive as the company executes its capital investment growth plan. The stock trades at a 19% discount to our fair value estimate as of Sept. 29, making it one of the cheapest U.S. utilities in our coverage. Its 3.6% dividend yield is in line with peers'.

Last week, NiSource requested a $218 million net revenue increase effective September 2023 along with other ratemaking changes that would improve cash recovery of operating and capital costs. NiSource's request includes a 10.4% allowed return on equity, which is about 100 basis points higher than other state regulators have allowed recently. We assume regulators approve $180 million of rate increases in two steps through 2024 based on NiSource's current 9.75% allowed ROE.

The outcome of this proceeding will largely determine whether NiSource hits the high end or low end of management's 7%-9% annual average earnings growth range through 2024. NiSource faces extra regulatory risk as customers face higher energy costs. This could make regulators hesitant to approve a large base rate increase.

We continue to assume NiSource invests $8 billion of capital in 2022-24, including $2 billion in renewable energy. We expect the company will be able to keep a similar level of growth investment beyond 2024, supporting our 8% average annual earnings growth forecast.

We also expect new CEO Lloyd Yates to announce the outcome of his strategic review, possibly at NiSource's investor day Nov. 7. The recent market drop and rise in interest rates could make it less likely that NiSource will divest its gas utilities.

Raising U.S. Electricity Demand Growth Outlook, Reaffirming Utilities Fair Value Estimates Travis Miller, Strategist, 27 Sep 2022

We are reaffirming our fair value estimates for U.S. utilities after raising our 10-year annual U.S. electricity demand growth forecast to 1.4%, up from 1.2% in our previous forecast two years ago. We also are reaffirming our economic moat and moat trend ratings for all U.S. utilities.

We believe the path to eliminate carbon emissions and meet environmental targets will lead to accelerating electricity demand growth and new infrastructure growth investment opportunities for

MORNINGSTAR®

NiSource Inc NI ★★★★ 25 Jan 2023 22:28, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
27.58 USD 25 Jan 2023	32.00 USD 24 Aug 2022 19:55, UTC	0.86	11.20 USD Bil 25 Jan 2023	Narrow	Stable	Low	Standard	4 Jan 2023 06:00, UTC

utilities. We forecast 6%-8% annual earnings and dividend growth for most utilities through the decade to support electricity demand growth. With most utilities yielding above 3%, we think utilities investors are well positioned to earn 8%-9% long-term annualized total returns even if valuations compress, as we think they will. We consider the sector 5% overvalued on a median basis as of Sept. 27.

Our new electricity demand forecast is more bullish than most. We think other forecasts underestimate the speed and scale of the U.S. clean energy transition. With many regions already facing strained electric grids, electricity demand growth presents opportunities and challenges for utilities as they manage the surge of electric vehicles, Big Data, building electrification, and other mandates.

We expect electricity demand from electric vehicles will grow faster than any other new source of electricity demand in our forecast, climbing 15-fold by 2032. Data centers, already sizable electricity users, are the second-fastest-growing new source of electricity demand in our forecast. Building and industrial electrification represents upside to our forecast.

Energy efficiency gains will offset some of the core electricity demand growth that we forecast. We expect U.S. electricity intensity of the economy to fall 12% over our forecast period. Energy efficiency gains have held U.S. electricity demand mostly flat for the last decade.

Inflation Reduction Act: Increasing Our Confidence in Utilities' Long-Term Growth Travis Miller, Strategist, 16 Aug 2022

Our initial analysis of the U.S. Inflation Reduction Act that President Joe Biden plans to sign on Aug. 16 has led us to reaffirm or make slight increases to our fair value estimates for U.S. utilities. We are reaffirming our moat and moat trend ratings.

Overall, the act gives us more confidence in our 5%-7% annual average long-term growth outlooks for most utilities. With most utilities yielding above 3%, we think utilities investors are well positioned to earn 7%-8% long-term annualized total returns even if valuation multiples compress, as we think they will. We consider the sector 13% overvalued on a median basis.

Utilities likely will not benefit directly from the act's clean energy tax credits since they will pass the savings to customers. However, utilities should benefit indirectly from lower regulatory risk as tax benefits offset bill increases related to their growth investments. Utilities with the largest share of renewable energy investments relative to their total investment budgets should have an easier time hitting their earnings growth targets without substantial customer bill increases.

Electric utilities should benefit from more electricity demand and infrastructure growth opportunities if the act speeds adoption of electric vehicles and building electrification, two areas that have been slow to decarbonize.

NiSource Inc NI ★★★★ 25 Jan 2023 22:28, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
27.58 USD 25 Jan 2023	32.00 USD 24 Aug 2022 19:55, UTC	0.86	11.20 USD Bil 25 Jan 2023	Narrow	Stable	Low	Standard	4 Jan 2023 06:00, UTC

Partially offsetting those customer benefits is the act's 15% minimum tax, which we estimate will raise cash taxes for most mid- and large-cap utilities. Ultimately, utilities will recover these higher taxes by raising customer bills. Customers also might lose the long-term benefits from accelerated tax depreciation, especially for utilities with large growth investment plans. The act's tax on book income rather than taxable income might cause a slight near-term reduction in utilities' cash flow but should accelerate long-term earnings growth. We don't expect this tax change to have a material impact on our long-term valuations.

NiSource's Growth Plan and Strategic Review On Track; Stock Offers Attractive Total Return Potential Travis Miller, Strategist, 3 Aug 2022

We are reaffirming our $31 per share fair value estimate for NiSource after the company reported earning $0.12 per share on an adjusted basis during the second quarter of 2022. Results remain on track to meet our full-year and long-term outlooks. We are reaffirming our narrow moat and stable moat trend ratings.

We think NiSource's combination of a 3.1% dividend yield, long runway of 7% annual growth, and potential incremental value from its current strategic review makes it among the most attractive utilities in our coverage. The stock trades at a 5% discount to our fair value estimate and a discount to other utilities with similar growth outlooks.

Management reaffirmed its $1.42 to $1.48 EPS guidance range for 2022, in line with our estimate. We continue to assume $8 billion of capital investment in 2022-24, including $2 billion of renewable energy investments. The timing of this capital investment might shift due to delays in renewable energy projects, but we don't expect that to have a material impact on NiSource's long-term growth trajectory. Potential delays don't impact our 2022 outlook.

CEO Lloyd Yates said he plans to announce the outcome of management's strategic review of NiSource's portfolio in November. This could include selling some of NiSource's six gas distribution companies, most likely its smaller gas utilities in Kentucky, Pennsylvania, and Maryland. Yates suggested they are receiving interest from private market infrastructure investors.

We expect NiSource to file a critical rate review proposal at its Indiana electric utility late this year with new rates effective in late 2023. The outcome of this proceeding will largely determine whether NiSource hits the high end or low end of management's 7%-9% annual average earnings growth range through 2024. With customer bills up as much as 20% this year due to higher energy costs, regulators might be hesitant to approve a large base rate increase that we expect NiSource will request.

MORNINGSTAR®

Research Methodology for Valuing Companies

Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, indepth competitive advantage analysis, and a variety of other analytical tools to augment this process. Moreover, we think analyzing valuation through discounted cash flows presents a better lens for viewing cyclical companies, high-growth firms, businesses with finite lives (e.g., mines), or companies expected to generate negative earnings over the next few years. That said, we don't dismiss multiples altogether but rather use them as supporting cross-checks for our DCF-based fair value estimates. We also acknowledge that DCF models offer their own challenges (including a potential proliferation of estimated inputs and the possibility that the method may miss shortterm market-price movements), but we believe these negatives are mitigated by deep analysis and our longterm approach.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk adjusted discount to their fair values, whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our singlepoint star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.

Our model is divided into three distinct stages:

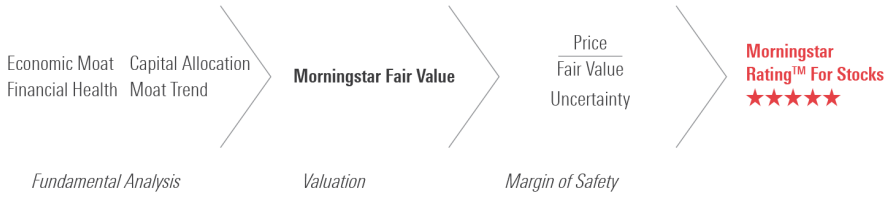
Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in workingcapital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes (EBI) and the net new investment (NNI) to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital (RONIC), and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until a perpetuity value is calculated. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity



Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term, market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating is designed to capture the range of potential outcomes for a company's intrinsic value. This rating is used to assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating is

MORNINGSTAR®

Research Methodology for Valuing Companies

aimed at identifying the confidence we should have in assigning a fair value estimate for a given stock.

Our Uncertainty Rating is meant to take into account anything that can increase the potential dispersion of future outcomes for the intrinsic value of a company, and anything that can affect our ability to accurately predict these outcomes. The rating begins with a suggested rating produced by a quantitative process based on the trailing 12-month standard deviation of daily stock returns. An analyst overlay is then applied, with analysts using the suggested rating, historical rating data, and their own knowledge of the company to inform them as they make the final Uncertainty Rating decision. Ultimately, the rating decision rests with the analyst. Analysts take into account many characteristics when making their final decision, including cyclical factors, operational and financial factors such as leverage, company-specific events, ESG risks, and anything else that might increase the potential dispersion of future outcomes and our ability to estimate those outcomes.

Our recommended margin of safety—the discount to fair value demanded before we'd recommend buying or selling the stock—widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the potential dispersion of outcomes, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the Uncertainty Rating provides guidance in portfolio construction based on risk tolerance.

Our Uncertainty Ratings are: Low, Medium, High, Very High, and Extreme.

	Margin of Safety	
Qualitative Analysis Uncertainty Ratings	★★★★★Rating	★Rating
Low	20% Discount	25% Premium
Medium	30% Discount	35% Premium
High	40% Discount	55% Premium
Very High	50% Discount	75% Premium
Extreme	75% Discount	300% Premium

Our uncertainty rating is based on the interquartile range, or the middle 50% of potential outcomes, covering the 25th percentile–75th percentile. This means that when a stock hits 5 stars, we expect there is a 75% chance that the intrinsic value of that stock lies above the current market price. Similarly, when a stock hits 1 star, we expect there is a 75% chance that the intrinsic value of that stock lies below the current market price.

4. Market Price

The market prices used in this analysis and noted in the report come from exchange on which the stock is listed which we believe is a reliable source.

Morningstar Equity Research Star Rating Methodology

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open. Our analysts keep close tabs on the companies they follow, and, based on thorough and ongoing analysis, raise or lower their fair value estimates as warranted.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk adjusted return is highly likely over a multiyear time frame. Scenario analysis developed by our analysts indicates that the current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. Scenario analysis by our analysts indicates that the market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

MORNINGSTAR®

Research Methodology for Valuing Companies

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environment, social and governance (ESG) factors. Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

General Disclosure

Unless otherwise provided in a separate agreement, recipients accessing this report may only use it in the country in which the Morningstar distributor is based. Unless stated otherwise, the original distributor of the report is Morningstar Research Services LLC, a U.S.A. domiciled financial institution.

This report is for informational purposes only and has no regard to the specific investment objectives, financial situation or particular needs of any specific recipient. This publication is intended to provide information to assist institutional investors in making their own investment decisions, not to provide investment advice to any specific investor. Therefore, investments discussed and recommendations made herein may not be suitable for all investors: recipients must exercise their own independent judgment as to the suitability of such investments and recommendations in the light of their own investment objectives, experience, taxation status and financial position.

The information, data, analyses and opinions presented herein are not warranted to be accurate, correct, complete or timely. Unless otherwise provided in a separate agreement, neither Morningstar, Inc. or the Equity Research Group represents that the report contents meet all of the presentation and/or disclosure standards applicable in the jurisdiction the recipient is located.

Except as otherwise required by law or provided for in a separate agreement, the analyst, Morningstar, Inc. and the Equity Research Group and their officers, directors and employees shall not be responsible or liable for any trading decisions, damages or other losses resulting from, or related to, the information, data, analyses or opinions within the report. The Equity Research Group encourages recipients recipients of this report to read all relevant issue documents (e.g., prospectus) pertaining to the security concerned, including without limitation, information relevant to its investment objectives, risks, and costs before making an in vestment decision and when deemed necessary, to seek the advice of a legal, tax, and/or accounting professional.

The Report and its contents are not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Morningstar, Inc. or its affiliates to any registration or licensing requirements in such jurisdiction.

Where this report is made available in a language other than English and in the case of inconsistencies between the English and translated versions of the report, the English version will control and supersede any ambiguities associated with any part or section of a report that has been issued in a foreign language. Neither the analyst, Morningstar, Inc., or the Equity Research Group guarantees the accuracy of the translations.

This report may be distributed in certain localities, countries and/or jurisdictions ("Territories") by independent third parties or independent intermediaries and/or distributors ("Distributors"). Such Distributors are not acting as agents or representatives of the analyst, Morningstar,
