R-2023-3043190 (WASTEWATER)

DATE: NOVEMBER 8, 2023

PENNSYLVANIA-AMERICAN WATER COMPANY

DIRECT TESTIMONY OF ASHLEY E. EVERETTE

INTRODUCTION

Q. Please state your name and business address.

A. My name is Ashley E. Everette, and my business address is 852 Wesley Drive, Mechanicsburg, Pennsylvania 17055.

Q. By whom are you employed and in what capacity?

A. I am employed by American Water Works Service Company, Inc. ("Service Company" or "AWWSC") as the Senior Director of Rates and Regulatory. The Service Company is a wholly owned subsidiary of American Water Works Company, Inc. that provides services to Pennsylvania-American Water Company ("PAWC" or "Company") and its affiliates. I work in the Mechanicsburg office of PAWC.

Q. Please describe your educational background and business experience.

A. I hold a Bachelor's degree in Economics and a Master's degree in Business Administration, both from the University of Illinois. I have been employed by the Service Company since September 2019, first as the Director of Rates and Regulatory and now in my current role as Senior Director of Rates and Regulatory for PAWC. In these positions, I am responsible for preparing and presenting rate applications as well as certain aspects of the financial, budgeting and regulatory functions of the Company.

Prior to my employment at the Service Company, I was employed by the Pennsylvania Office of Consumer Advocate ("OCA") as a Regulatory Analyst from September 2012 to September 2019.

Q. Have you previously testified before regulatory agencies?

A. Yes. I have testified on behalf of PAWC before the Pennsylvania Public Utility Commission ("Commission") in several cases. Additionally, I submitted testimony to the West Virginia Public Service Commission on behalf of West Virginia American Water in 2021. Prior to my employment by the Service Company, I testified on behalf of the OCA in approximately 35 proceedings.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to explain the overall structure of PAWC's case and to address certain specific claims being made by the Company to support its proposed rates. My testimony is divided into several parts.

First, I will provide general information about the Company and this rate filing. Next, I discuss the major drivers of the Company's request for rate relief in this proceeding, which is primarily the significant capital investments that the Company has made and plans to make through June 30, 2025. Second, as part of this discussion, I address the affordability of water and wastewater service under present and proposed rates and proposals the Company is making to improve affordability for its customers; explain the sources of the accounting data that were the starting point for the Company's rate case presentation; identify the test years the Company is employing in this case; and give an overview of PAWC's Exhibit No. 3-A.

Third, I will discuss and, together with other PAWC witnesses, support the following specific parts of the Company's case:

(1) The Company's use of authority conferred by Act 11 of 2012 ("Act 11") and Section 1311(c) of the Pennsylvania Public Utility Code ("Code") to mitigate the impact of

revenue increases on wastewater customers by recovering a portion of the Company's wastewater revenue requirement from its total water and wastewater customer base;

(2) The Company's proposal to implement alternative ratemaking mechanisms under Section 1330 of the Code consisting of a Revenue Decoupling Mechanism and an Environmental Compliance Investment Charge;

(3) The Company's request for regulatory and accounting treatment for the deferral of pension, other post-employment benefits ("OPEB") and production expenses;

(4) The Company's compliance with Section 1301.1(b) of the Code by calculating the "differential" in tax costs recognized for ratemaking purposes before and after the enactment of Act 40 of 2016 and identifying how 50% of that differential will be invested in water and wastewater infrastructure.

Fourth, I will discuss, or identify other witnesses who discuss, the Company's compliance with commitments it made in the Joint Petition for Settlement of Rate Investigation ("Joint Petition for Settlement") approved by the Commission in the Company's last base rate case at Docket Nos. R-2022-3031671 and R-2022-3031672.

Finally, I will discuss the Company's overall management performance in relation to the factors identified in Section 523 of the Code and the Commission's Policy Statement at 52 Pa. Code § 69.711 and explain why the Company's superior management performance supports a rate of return on equity at the upper end of the range determined by PAWC's rate of return witness, Ms. Ann E. Bulkley, in PAWC Statement No. 13.

Q. Please identify the other witnesses who are providing direct testimony on behalf of PAWC in this proceeding.

A. In addition to me, the following witnesses will be responsible for presenting PAWC's direct case:

- **PAWC Statement No. 2 - Jim Runzer** is the Vice President of Operations for PAWC. Mr. Runzer discusses the general operations of the Company; PAWC's commitment to supplying high quality water and wastewater service; initiatives taken to increase efficiency, enhance service and control costs, including efforts to control non-revenue water; employee and customer safety and employee training and development; PAWC's commitment to advanced metering infrastructure ("AMI") technology; support for employee levels and compensation; and the Company's implementation of operations-related settlement commitments from the last base rate case.
- **PAWC Statement No. 3 - Bruce W. Aiton** is the Vice President of Engineering for PAWC. Mr. Aiton's testimony discusses the Company's capital investment planning process and the challenges posed by new and changed environmental mandates between rate cases; PAWC's plant additions to be placed in service during the future test year ("FTY") ending June 30, 2024 and fully projected future test year ("FPFTY") ending June 30, 2025; operational and regulatory risks associated with maintaining safe and adequate water quantity and water quality and complying with applicable drinking water and environmental regulations associated with owning and operating facilities for supplying water and wastewater services to the public, complying with environmental regulations applicable to owning and operating facilities for furnishing wastewater service to the public, and the challenges climate change could create for water and wastewater utilities; and the bulk treatment service provided to municipal and utility wastewater systems adjacent to the Company's York wastewater treatment plant.

- **PAWC Statement No. 4 - Stacey D. Gress** is Director of Rates and Regulatory for PAWC. Her testimony discusses the Company's claims for rate base, depreciation and amortization, taxes other than income and acquisitions since its last rate case that the Company has reflected in its proposed rate base in this case, the Company's claim for rate case and regulatory expense, proposed tariff changes, the allocation of expenses between water and wastewater operations, and PAWC's rate structure and rate design proposals.
- **PAWC Statement No. 5 - Lori O'Malley** is Senior Manager Regulatory Services for AWWSC. Her testimony addresses the Company's claim for labor and labor-related expenses, Service Company expenses, other operation and maintenance ("O&M") expenses, and miscellaneous expenses.
- **PAWC Statement No. 6 - E. Christopher Abruzzo** is Senior Director of Business Development for PAWC. His testimony describes various acquisitions that PAWC has included in this base rate case and provides support for the Company's request for acquisition adjustments pursuant to 66 Pa. C.S. § 1327 (relating to acquisition of water and sewer utilities) and 52 Pa. Code § 69.711 (statement of policy regarding small nonviable water and wastewater systems).
- **PAWC Statement No. 7 - Melissa Ciullo** is Vice President of Tax for AWWSC. Her testimony addresses the Company's computation of income tax expense in compliance with Act 40 of 2016, the Pennsylvania state tax rate change, and the Corporate Alternative Minimum Tax.
- **PAWC Statement No. 8 - J. Cas Swiz** is Senior Director, Enterprise-Wide Regulatory Strategy of AWWSC. His testimony discusses PAWC's claim for uncollectible accounts expense and amortization of the deferred amounts recorded to the regulatory asset for

incremental COVID-19 related financial impacts authorized in the Company's last base rate case. His testimony also discusses PAWC's proposed deferred accounting treatment for pension, OPEB, and production expenses, as well as the Company's proposed Environmental Compliance Investment Charge.

- **PAWC Statement No. 9 – Deborah A. Degillio** is Vice President and Chief Customer Officer of AWWSC. Her testimony provides an overview of PAWC's customer service function and addresses how the Customer Service Organization ("CSO") uses customer feedback to drive customer satisfaction, the CSO's efforts to improve customer service and achieve customer service performance objectives, and PAWC's customer assistance programs and proposed enhancements to those programs in this base rate case.
- **PAWC Statement No. 10 - Charles B. Rea** is Senior Director, Enterprise-Wide Regulatory Pricing & Affordability of AWWSC. His testimony explains the design of current and proposed tariff rates, presents the Company's affordability analyses for water and wastewater service, describes the Company's analysis of residential, commercial, and municipal water consumption, discusses the Company's claimed revenues, and supports the Company's proposed Revenue Decoupling Mechanism.
- **PAWC Statement No. 11 - John J. Spanos** is President of Gannett Fleming Valuation and Rate Consultants LLC. Mr. Spanos' testimony explains the development of the depreciated original cost of the Company's utility plant in service and its claims for annual depreciation expense.
- **PAWC Statement No. 12 - Constance E. Heppenstall** is Senior Project Manager for rate studies of Gannet Fleming Valuation and Rate Consultants LLC. Ms. Heppenstall's

testimony explains the allocation of the cost of service to customer classifications and the identification of stormwater-related costs of service of combined sewer systems ("CSSs").

- **PAWC Statement No. 13 - Ann E. Bulkley** is a Principal with The Brattle Group. Ms. Bulkley's testimony provides a recommendation regarding PAWC's authorized return on equity and assesses the reasonableness of its proposed capital structure for ratemaking purposes.

OVERVIEW: GENERAL INFORMATION ABOUT THE COMPANY AND THIS CASE REASONS FOR RATE RELIEF REQUESTED

Q. Please summarize the rate increase sought by PAWC in this proceeding.

A. The Company is seeking an increase in the rates of its water and wastewater operations that will produce additional annual operating revenues of $203.9 million, or 20.2%, over PAWC's annualized total revenues at present rates including Distribution System Improvement Charge revenue. The key elements of the Company's rate request are summarized on Schedule AEE-1 to this statement. Schedule AEE-2 to this statement is a more detailed summary that provides an overview of revenue requirements and revenues at existing and proposed rates on a total-Company basis.

Q. What are the major drivers of the Company's request for rate relief?

A. The most significant driver of this request for rate relief is PAWC's ongoing infrastructure investment. As explained in Mr. Aiton's direct testimony (PAWC Statement No. 3), maintaining PAWC's facilities requires substantial capital investment. PAWC has made, and must continue to make, substantial investments in new and replacement plant and equipment to replace aging infrastructure, comply with mandates imposed by the Safe Drinking Water Act, the Clean Water Act and the Clean Streams Law and their associated regulations, and

meet customers' demands for water and wastewater service. From the end of the FPFTY in the Company's last base rate case (December 31, 2023) through the end of the FPFTY in this case (June 30, 2025), the Company will have invested over $1 billion in new or replacement plant and equipment, and the overwhelming majority of this investment is and will be in source of supply, treatment, distribution and collection assets. Part of this investment is also being used to improve service to small, troubled water and wastewater systems that PAWC has acquired. While the acquisition of smaller systems will result in increased economies of scale over time, the Company is currently incurring increased capital investment and an increase in operating costs.

Although PAWC is requesting a rate increase in this case, the Company has been generally successful in controlling O&M expense over the last decade. Comparing operating expense levels in 2013 with historic test year ("HTY") operating expenses, a period of 10 years, annual operating costs per customer have increased moderately from an estimated $300 to $336 per customer, a $36.00 annual increase over the 10-year period. This equates to an overall increase since 2013 of 11.91%, representing a compound annual growth rate of 1.13%. In comparison, the Gross Domestic Price Deflator,[1] an index measuring inflation, increased from 101.77 in 2013 to 121.80 for 2023. This equates to a 19.68% increase, representing a compound annual growth rate of 1.81%. This demonstrates that the Company has been successful in controlling its O&M costs per customer over the past decade. The Company's ability to mitigate O&M increases is attributable to the Company's prudent management of operating costs. Our management initiatives, as explained by Mr. Runzer (PAWC Statement No. 2), and our prudent capital investments described by Mr. Aiton have

[1] The GDP deflator, also called implicit price deflator, is a measure of inflation. It is the ratio of the value of goods and services an economy produces in a particular year at current prices to that of prices that prevailed during the HTY.

enabled us to work more efficiently and effectively in managing O&M expenses. However, like others, the Company is not immune to inflationary pressures. PAWC's requested increase in O&M expense is driven by increases in production costs, employee-related expenses and the cost of bringing high quality and reliable water service to additional communities in the Commonwealth and supports the Company's efforts to continue providing high quality water and wastewater service in the most cost-effective way to our customers in the long-term.

In addition, to address the Company's diverse capital needs, PAWC must raise substantial amounts of debt and equity capital and, in the process, must demonstrate its ability to provide a reasonable return for investors to commit their funds to the Company for its use. On an annual basis, PAWC's capital investment program is greater than its allowance for depreciation, which results in negative free cash flow. Therefore, the Company needs to seek financing for its capital investments beyond any internally generated cash flow. As shown in Schedule AEE-2 and explained in the Statement of Specific Reasons for Proposed Increase in Rates that accompanies the Company's filing, absent rate relief, the Company's overall rate of return on an original cost basis will be only 5.78% as of June 30, 2025. More significantly, the indicated return on common equity is anticipated to be 6.63% as of June 30, 2025, which is clearly far less than is required.

AFFORDABILITY OF WATER AND WASTEWATER SERVICE

Q. In general, why is PAWC's proposed rate increase reasonable and appropriate?

A. PAWC's proposed rate increase is reasonable and appropriate because, as I previously discussed, it is driven primarily by investments that keep our water and wastewater service safe and reliable. Such investments cannot be avoided and are in the long-term best interests of our customers. If such investment is not made, our customers will be adversely impacted

in the long run as costs will increase even more. For example, when mains are not replaced in a timely fashion, or equipment is neglected, our costs rise, as unanticipated main breaks create water quality issues, unexpected expenses, and disruption to our customers and communities. Similarly, equipment in need of replacement makes workers less efficient and can create safety issues.

Q. Has PAWC evaluated the impact of the proposed rate increases on its customers?

A. Yes, we have. We know our water and wastewater service is critical, and we know how important it is for that service to remain affordable. A Zone 1 residential customer using 105 gallons of water per day would pay approximately $2.90 per day for water under our rate proposal. Therefore, for about $2.90 per day an average residential customer has all the water they and their family need to drink, cook, wash, and maintain their general health and well-being.

Q. Has the Company performed an analysis of the affordability of its water and wastewater service under the proposed rates?

A. Yes. Mr. Rea (PAWC Statement No. 10) has conducted a detailed analysis of the affordability of our historical and proposed residential rates and relates the median household income ("MHI") for customers in our service territory to our utility bills over time. Mr. Rea's analysis demonstrates that our water and wastewater service, overall, has been affordable over time and will remain affordable for the majority of residential customers under the proposed rates. His testimony compares historical average monthly water bills to monthly household income for PAWC customers from 2012 through 2023, both in absolute terms and in terms of bill to income ("BTI") ratios. Mr. Rea then analyzed the Company's proposed bills in this case and estimated MHI for PAWC customers during the FPFTY. His analysis shows that BTI Ratios

for PAWC's residential customer base have held steady from 2012 to 2023 at levels between 0.8% and 1.0% of MHI and are expected to be 1.12% under the Company's proposed rates in this case during the FPFTY. Mr. Rea shows that BTI Ratios for wastewater service have similarly held steady from 2012 through 2022 at levels between 0.9% and 1.2% of MHI but rose in 2023 to 1.55% and are expected to be 1.37% under the Company's proposed wastewater rates in this case. This is a tangible demonstration that our customer bills will remain affordable for the majority of customers even with PAWC's requested rate increase.

Q. How does PAWC maintain the affordability of its water service?

A. As I noted previously, an important way that we maintain affordability is by continuously seeking to improve our business processes and make investments that improve operational efficiencies, and we have been very successful in doing so. As Mr. Aiton and Mr. Runzer explain, we use targeted and proactive investments to permit us to work smarter and more efficiently as well as leveraging the power of our organization to purchase equipment and supplies at advantageous terms. All of these help us better manage our cost structure and mitigate cost increases.

Q. Notwithstanding the overall affordability of PAWC's rates, are there customers who might face affordability issues?

A. Yes, some of our customers face challenging economic circumstances. Thus, Mr. Rea also examined the affordability of our rates for customers at different MHI levels. His assessment compares annualized bills for "basic water and/or wastewater service" (i.e., service that is necessary and reasonable to meet basic household needs for drinking, cooking, sanitation, and general health service that does not include seasonal discretionary water use) to measures of household income for lower income groups. The Company estimates that there are

approximately 108,000 residential water customers in its service areas with household incomes at or below 150% of Federal Poverty Level ("FPL"), or approximately 17% of the Company's residential water customer base. For these customers, the Company continues to offer various assistance programs, which I describe below. The Company is also proposing in this case to expand its income-based tariff discount program to include customers between 150% and 200% of FPL in order to further address the affordability of water or wastewater service, as explained in more detail by Mr. Rea.

Q. What customer assistance programs does PAWC offer its low-income customers to maintain the affordability of its service?

A. PAWC offers several customer assistance programs to help our low-income customers. The Company supports low-income customers through PAWC's H2O Help to Others Program™ ("H2O"). The H2O program currently offers a three-fold approach, including bill discounts for water and wastewater service, hardship grants, and water conservation assistance. The Company also anticipates offering an Arrearage Management Program ("AMP").

The bill discount program currently includes a three-tier discount with discounts on the total bill ranging from 30% to 80%. I discuss the proposed expansion of the low-income discount below.

The hardship grant assistance program is a bill-paying assistance program funded by PAWC shareholders and donations from customers and others who want to help our customers in need. Customers who qualify may receive grants of up to $500 annually toward their water bill and $500 annually toward their wastewater bill. The hardship grant assistance program is administered by Dollar Energy Fund, an independent, non-profit organization. The Company currently contributes $750,000 annually to the hardship fund and anticipates increasing this

contribution by $700,000 annually for the next five years, or a total annual donation of $1,450,000.[2] This donation is funded by PAWC's shareholders and is not recovered from customers.

The water conservation assistance program offers tools and tips to help customers save water and money. The program includes a leak detection kit to help identify household leaks, conservation tips and water use calculator.

The AMP is a program that will assist low-income customers with arrearages. This program is described in more detail below. A Settlement of the AMP is currently pending approval before the Commission. If the Company receives approval of the AMP in 2023, the Company anticipates the AMP being available to customers in late 2024.

In addition, the Company offers its customers who qualify flexible payment arrangements through installment agreements if they are financially unable to pay a water and/or wastewater service bill when due. The Company also offers residential customers the option of paying bills under its budget billing plan. For customers electing budget-billing, the Company estimates the customer's total billed amount for service during a succeeding twelve-month period and, for that period, issues monthly bills based on one-twelfth of the twelve-month estimate. The Company recently undertook a statewide promotional effort through emails and bill inserts to educate customers on budget billing and preferred due date options.

Q. Has the Company been able to use American Rescue Plan Act funding to assist customers?

[2] The increased annual donation is a provision of the proposed settlement of the Company's application to acquire the Butler Area Sewer Authority ("BASA") wastewater system, which is currently pending at Docket No. A-2022-3037047. If the settlement is approved by the Commission, the increased annual donation will commence upon closing of the BASA acquisition.

A. Yes. The Low-Income Household Water Assistance Program ("LIHWAP"), which was authorized by the federal government pursuant to the American Rescue Plan Act of 2021 and the Consolidated Appropriations Act, 2021, has provided bill assistance for our qualifying customers. At the state level, this program was administered by the Pennsylvania Department of Human Services ("DHS"). PAWC had a vendor agreement with the DHS. Customers could apply online at www.compass.state.pa.us, call DHS and request an application or apply in person at a local county assistance office.

Prior to the program ceasing in October 2022 due to funds being depleted, PAWC customers received nearly 13,000 grants totaling over $7.5 million. When additional funds were made available in 2023, PAWC customers received over 2,400 additional grants totaling over $1.1 million. As explained in more detail later in my testimony, the Company went above and beyond to promote the availability of these funds to low-income customers to help them to pay their bills and also undertook efforts to help ensure that additional funds were allocated to Pennsylvania to be made available to our customers.

Q. Has the Company been able to use other state and federal funding to assist customers?

A. Yes. The Pennsylvania Homeowner Assistance Fund, or PAHAF, is a housing-related program funded by the U.S. Treasury to assist Pennsylvania homeowners facing financial hardship as a result of the COVID-19 pandemic. The program provides financial assistance to homeowners for qualified mortgage and housing-related expenses to address delinquency and avoid default, foreclosure, or displacement. The Pennsylvania Housing Finance Authority was allocated $350 million under the American Rescue Plan Act of 2021 to develop the PAHAF program to help Pennsylvania homeowners avoid mortgage delinquency, foreclosure, or displacement. As of October 12, 2023, PAWC has received approximately $261,000 under

the PAHAF program. At this time, the program is not accepting new applications but is continuing to process applications already received.

Q. You mentioned PAWC is proposing an expanded low-income discount to assist its low-income customers. What is PAWC's proposal?

A. The Company's current discount tariff rates are based on the customers' percentage of federal poverty level, with three tiers from 0% to 150% of the FPL. The Company is proposing to expand this tariff to include customers with household incomes between 150% and 200% of the FPL. As explained by Mr. Rea, the Company's proposed expansion to the low-income discount program will improve the affordability of water and wastewater service for this group of customers.

The proposed modification to this tariff would reduce the typical basic water service ("BWS") bill as shown in the chart below:

Proposed Low Income Discount Program

Income Group	**BWS Bill Pre-Discount**	**Pre-Discount BTI Ratio**	**BWS Bill Post-Discount**	**Post-Discount BTI Ratio**
0% - 50% FPL	$75.43	16.17%	$16.45	3.53%
51% - 100% FPL	$80.29	5.73%	$38.09	2.72%
101% - 150% FPL	$81.46	3.55%	$58.65	2.56%
151%-200% FPL	$84.69	2.70%	$71.59	2.28%

Q. Please summarize the Company's Arrearage Management Plan ("AMP") that is pending Commission review and approval.

A. In accordance with a stipulation between the Company and the Commission on Economic Opportunity in the Company's 2020 base rate case, on August 25, 2021, PAWC filed with the Commission a Petition of Pennsylvania-American Water Company for Approval of an Arrearage Management Plan at Docket No. P-2021-3028195. Under this program, qualifying

customers will receive $25 of arrearage forgiveness per month. A Settlement of this proceeding was filed with the Commission on May 13, 2022 and an amended settlement was filed on July 27, 2022. On December 28, 2022, the Commission entered an Order remanding the proceeding to the Office of Administrative Law Judge for further proceedings. The purpose of the remand was to require income verification for customers seeking to enroll in the AMP. A further amended settlement was filed on September 11, 2023. Consistent with the Commission's Order, the further amended settlement establishes a framework for income verification and periodic income recertification. On October 12, 2023, a Recommended Decision was entered recommending approval of the further amended settlement without modification.

Q. When will the Company implement its AMP?

A. The proposed settlement of the AMP proceeding provides that the Company will implement the plan no later than twelve months after the Commission issues a Final Order in the AMP proceeding. The Company anticipates implementing the AMP as close to the effective date of new rates as possible, dependent on when Commission approval of the settlement is received. The Company has included $2,864,700 in its expense claims in this case to fund the AMP, which is consistent with the settlement.

Q. Is the Company's AMP a pilot program?

A. Yes, from a cost recovery standpoint, the AMP is being implemented as a pilot program. The settlement also provides that during the period that the AMP is considered a pilot program, the Company will record a regulatory asset or liability for amounts over or under the amount included in rates for recovery or refund in the next base rate case.

SOURCE OF ACCOUNTING DATA AND THE TEST YEARS EMPLOYED BY THE COMPANY

Q. What is PAWC's principal accounting exhibit in this case?

A. PAWC Exhibit No. 3-A is PAWC's principal accounting exhibit in this case. PAWC Exhibit No. 3-A includes five separate revenue requirement studies, one of which relates to the Company's water operations and four that relate to its wastewater operations.

Q. What is the source of the accounting data used in PAWC Exhibit No. 3-A?

A. The starting point for each of the revenue requirement studies in PAWC Exhibit No. 3-A is the accounting information recorded in the Company's books and records for the twelve months ended June 30, 2023. The Company's books and records are maintained in conformity with the National Association of Regulatory Utility Commissioners ("NARUC") Uniform System of Accounts for Water Companies, the NARUC Uniform System of Accounts for Wastewater Companies and generally accepted accounting principles. Because the purpose of ratemaking is to establish rates to be applied in the future, per-book data were adjusted on a pro forma basis, as appropriate, to reflect changes in operating conditions that are not fully reflected in the book data for the HTY, the FTY or the FPFTY.

Q. Why is the Company presenting five separate revenue requirement studies in PAWC Exhibit No. 3-A?

A. The Company is presenting five separate revenue requirement studies in its Exhibit No. 3-A to comply with the terms set forth in the Joint Petition for Settlement and the terms and conditions of the anticipated Commission's approvals of PAWC's acquisitions of certain wastewater systems that are included in this case.

Paragraph 14 of the Joint Petition for Settlement provides that "in future rate filings, PAWC will submit one or more separate stormwater and wastewater cost-of-service studies

for each of its [CSSs]" [3] and further provides that "the Company is not required to provide a separate study for each combined sewer system." Accordingly, PAWC Exhibit No. 3-A includes a separate revenue requirement study, in aggregate, for the CSSs it currently owns, which consist of the Scranton, McKeesport, and Kane systems.

The Company is also submitting separate cost of service studies for the wastewater systems that PAWC expects to acquire from the Butler Areas Sewer Authority ("BASA") and the Borough of Brentwood, pursuant to the proposed settlement agreement for the BASA acquisition pending before the Commission and consistent with past practice for systems acquired pursuant to Section 1329.

Q. In the Company's last base rate case, it submitted separate revenue requirement studies for Royersford Wastewater Sanitary Sewer System ("SSS") Operations, Upper Pottsgrove Wastewater SSS Operations, and York Wastewater SSS Operations. Please identify where the information with respect to these systems is included in the Company's filing in this case.

A. Each of these systems are included in the Wastewater SSS General Operations revenue requirement.

Q. Briefly explain what is set forth in Exhibit No. 3-A.

A. As previously explained, PAWC Exhibit No. 3-A contains five separate revenue requirement studies, each of which is set forth at a separate tab within the exhibit, consisting of the following:

Tab 1	Water Operations
Tab 2	Wastewater Sanitary Sewer Systems General Operations

[3] The cost-of-service studies that separately identify and quantify storm water costs are sponsored by Ms. Heppenstall and are explained in her direct testimony (PAWC Statement No. 12).

Tab 3 Butler Wastewater ("WW") Operations
Tab 4 Brentwood WW Operations
Tab 5 Wastewater Combined Sewer Systems Operations

A summary page at the beginning of PAWC Exhibit No. 3-A shows the Company's rate request on a consolidated (total Company) basis. Applicable workpapers and supporting documentation for PAWC Exhibit No. 3-A are set forth in PAWC Exhibit Nos. 3-B and 3-C. I am responsible for portions of each of these exhibits. Other witnesses are responsible for other portions of these exhibits as explained in their respective statements. Each page of PAWC Exhibit No. 3-A identifies the witness responsible for that portion of the exhibit.

In order to reflect data for the FPFTY, PAWC Exhibit No. 3-A presents PAWC's rate base, revenues, expenses and tax information on the basis of an HTY ended June 30, 2023, a FTY ending June 30, 2024, and a FPFTY ending June 30, 2025. The support for the Company's requested revenue increase is based principally upon the data presented for the FPFTY. Within PAWC Exhibit No. 3-A, HTY data are generally identified by the title or heading "Present Rates at June 30, 2023" and FTY data are generally identified by the title or heading "Present Rates at June 30, 2024." Data for the FPFTY are generally identified by the title or heading "Present Rates at June 30, 2025."

SUPPORT FOR SPECIFIC ELEMENTS OF THE COMPANY'S FILING

Development of Water and Wastewater Revenue Requirements and the Application of Section 1311(c) of the Code

Q. Has the Company relied upon provisions of Act 11 in developing its proposed rates in this case?

A. Yes, it has. As authorized by Section 1311(c) of the Code, PAWC is proposing to allocate in the FPFTY approximately $71 million of its wastewater cost of service to its water operations,

which is approximately 7% of total proposed water revenue. Thus, the authority granted by Act 11 would be used to mitigate the increases that wastewater customers in certain service areas would experience if their rates were established on a stand-alone basis. The Company's proposed rates would also make meaningful progress in moving the rates of its separate wastewater rate zones closer to a single consolidated wastewater rate design for all of the Company's wastewater operations.

The following table shows the effect on each wastewater operation of allocating a portion of wastewater revenue requirement to water operations and developing rates in the manner discussed above in summary form for the FPFTY:

Revenue Requirement Allocated from Wastewater to Water Customer Base	
Wastewater Operations	**FPFTY June 30, 2025**
Wastewater Sanitary Sewer Systems General Operations	$31,962,411
Butler Wastewater ("WW") Operations	$21,552,699
Brentwood WW Operations	$1,565,232
Wastewater Combined Sewer Systems Operations	$16,007,052
Total	**$71,087,394**

Q. What is the impact on the Company's proposed revenue requirement for water and wastewater customers of allocating a portion of wastewater revenue requirement to water operations, as shown above?

A. Based on the Company's cost of service and proposed customer class revenue allocation in this case, the allocation would increase the monthly water bill of a residential water customer by approximately $6.08 per month at proposed rates. The allocation would decrease the

monthly wastewater bill of a residential wastewater customer by approximately $10 to $90 per month at proposed rates depending on the rate and location of the customer.

Q. What does Section 1311(c) of the Code state concerning the allocation of wastewater revenue requirement to water customers?

A. Section 1311(c) of the Code states: "The commission, when setting base rates, after notice and an opportunity to be heard, may allocate a portion of the wastewater revenue requirement to the combined water and wastewater customer base if in the public interest."

Q. What is your understanding of the phrase "in the public interest" in Section 1311(c) of the Code?

A. The phrase is not specifically defined in Section 1311(c). However, I am advised by counsel that the Commission provided guidance on the meaning of "in the public interest" in the Company's 2020 base rate proceeding with respect to acquisitions that were approved under Section 1329 of the Public Utility Code.[4] The Commission held that it is in the public interest for a utility to recover a portion of the wastewater revenue requirement associated with an acquired wastewater system from the combined water and wastewater customer base, "because otherwise, large viable public utilities would be discouraged from acquiring municipal and wastewater systems and contravene legislative intent and the Commission's policy of encouraging consolidation and regionalization."[5]

Q. Is the public interest served by distributing a portion of the revenue requirement of the Company's wastewater operations across PAWC's approximately 780,000 water customers?

[4] *Pa. Pub. Util. Comm'n v. Pennsylvania-American Water Co.*, Docket Nos. R-2020-3019369 and R-2010-3019371 (Opinion and Order entered Feb. 25, 2021), p. 82.
[5] *Id.*

A. Yes, it is. As indicated by the Commission in the Company's 2020 rate case, it is in the public interest for the Company to recover a portion of its wastewater revenue requirement associated with its acquired wastewater systems from its combined water and wastewater customer base.[6] Distributing a portion of the revenue requirement of the Company's wastewater operations across all of the Company's approximately 780,000 water customers is consistent with legislative intent and the important policy considerations underlying Sections 1311(c) and Section 1329, including ameliorating rate impacts on wastewater customers while imposing only a modest increase on the water bills of the much larger base of water customers, and promoting the Commission's policy of encouraging consolidation and regionalization.

The amendment Act 11 made to Section 1311(c) has extended to combined water and wastewater utilities a policy similar to the concept of single tariff pricing, which this Commission has approved and encouraged water utilities to adopt for nearly forty years. Like single tariff pricing, allocating a portion of wastewater revenue requirement to the entire customer base recognizes that: (1) PAWC is an integrated water and wastewater company; (2) a multitude of functions needed to provide water and wastewater service are performed on a consolidated basis by PAWC employees and by the Service Company; (3) providing both water and wastewater service creates opportunities, over time, to capture additional economies of scale and scope; (4) the need for capital additions in different parts of the Company's water and wastewater systems will be higher in some areas and lower in others at any given point in time, but will average out over time ; (5) "averaging" water and wastewater costs is very much like the cost averaging that single tariff pricing is explicitly designed to accomplish and stabilizes rates and mitigates rate impacts for all customers over the long run. Consistent with

[6] *Id.*

these factors, PAWC's proposal represents a reasonable approach to allocating revenue requirement that supports economies of scale over the long term.

Q. You described the pending acquisition of the BASA wastewater system above. Please discuss the hardship fund contribution that will benefit PAWC's water and wastewater customers.

A. In February 2023, PAWC filed with the Commission an application to acquire the BASA wastewater assets. On August 14, 2023, PAWC filed with the Commission a Joint Petition for Unanimous Settlement of All Issues.[7] In this Settlement, the Company agreed to increase its shareholder donation to its hardship fund by $700,000 per year for five years, or a total of $3.5 million. The first donation will be made following closing, which is expected before the end of 2023. This additional shareholder contribution will nearly double the funds available for low-income hardship grants, and eligibility will be expanded to include customers between 200%-250% of the federal poverty level.

Of this $700,000 annual donation, the Company anticipates that in 2023, nearly 80%, or $555,000, will be made available to the Company's water customers. In this way, the Company's acquisition of the BASA system will provide an immediate benefit to the Company's low-income water and wastewater customers.

Proposed Revenue Decoupling Mechanism

Q. Is the Company proposing a Revenue Decoupling Mechanism in this proceeding?

A. Yes. As outlined in the testimony of Mr. Rea, the Company requests approval of a Revenue Decoupling Mechanism ("RDM") for both water and wastewater service as part of this

[7] This settlement is currently pending before the Commission, as discussed in more detail by Mr. Abruzzo in Statement No. 6.

proceeding. The RDM is an alternative rate design mechanism designed to provide the Company with the opportunity to more reliably recover its authorized revenue requirement and the fixed costs authorized in this proceeding. As explained by Mr. Rea, the RDM will compare the difference between actual revenue collected from eligible customers under the Commission-approved rates in this case against cost components calculated to recover the Company's fixed costs of providing service. If actual revenues are higher than would have been collected under the RDM formula, the difference will be credited to customers in the subsequent year through the mechanism. If actual revenues are lower than would have been collected under the RDM formula, the difference will be collected from customers in the subsequent year through the mechanism.

Q. Does Pennsylvania law allow the Commission to approve a Revenue Decoupling Mechanism as PAWC requests?

A. Yes. 66 Pa. Code C.S. § 1330(b) was added to the Public Utility Code in a 2018 amendment. I am advised by counsel that Section 1330 allows the Commission to approve an application by PAWC to establish various forms of alternative ratemaking. One such form of alternative ratemaking, as identified in Section 1330(b)(i), is a decoupling mechanism.

Q. Does Section 1330 state the policy goals of this alternative ratemaking treatment?

A. Yes. Section 1330(a)(2) states as follows:

> It is the policy of the Commonwealth that utility ratemaking should encourage and sustain investment through appropriate cost-recovery mechanisms to enhance the safety, security, reliability or availability of utility infrastructure and be consistent with the efficient consumption of utility service.

The Commission policy objectives state that the utility's alternative ratemaking proposals: "should encourage and sustain investment" through mechanisms that (1) "enhance safety,

security, reliability or availability of utility infrastructure", and (2) are "consistent with the efficient consumption of utility service."

Q. How does the Company's proposed RDM meet these policy objectives?

A. The authorized water and wastewater revenue requirements approved by the Commission represent the amount of revenue the Commission determines that the Company needs to operate, maintain, and invest in its water and wastewater system in a prudent and efficient manner. The Company's investment priorities continue to focus on non-revenue producing investments (e.g., water efficiency investments, aging infrastructure replacement and compliance with environmental regulations) (PAWC Statement No. 3). A rate design that relies heavily on sales volumes means that the Company's revenues are driven by factors which are largely outside of its control. The need to recover these significant investments, including an opportunity to earn a return on those investments, however, does not vary with usage. The ability to reliably recover the Company's approved revenue requirement improves the Company's ability to plan, manage, maintain, and invest in the facilities necessary to continue providing safe, reliable, and high-quality water and wastewater service at a reasonable cost to customers (PAWC Statement No. 3).

Further, the volumetric components of the Company's current rate structure can create a "throughput incentive": the more water customers use, the more revenue the Company collects and, to the extent this revenue exceeds variable costs, the better its financial performance. Rather than implicitly encouraging water use and penalizing a water utility for encouraging conservation, an RDM removes a disincentive for utilities to promote end-use efficiency. Removing the disincentive to improving end-use efficiency is consistent with the policy objective of "the efficient consumption of utility service."

Just as prudent energy efficiency investments can be the least-cost investments in energy resources, improving water efficiency reduces operating costs (e.g., energy, treatment and residuals handling/storage costs) and reduces the need to develop new supplies and expand our water infrastructure. Thus, both the Company and customers ultimately benefit from the RDM because it provides a consistent regulatory framework to support long-term capital investment, properly matches cost incurrence with cost recovery, and facilitates more consistent and efficient planning and deployment of resources.

Proposed Environmental Compliance Investment Charge

Q. Is the Company proposing an Environmental Compliance Investment Charge in this proceeding?

A. Yes. As outlined in the testimony of PAWC witness Cas Swiz, the Company requests approval of an Environmental Compliance Investment Charge ("ECIC") as part of this proceeding. The ECIC is a rate adjustment clause designed to reflect and recover, between rate cases, the capital costs and expenses imposed on the Company to address and comply with new or changed federal and state environmental mandates. Costs that are recoverable through the ECIC must be consistent with the set of projects and activities set forth in an annual environmental compliance plan to be filed by the Company and approved by the Commission.

Q. Does Pennsylvania law allow the Commission to approve an Environmental Compliance Investment Charge as PAWC requests?

A. Yes, the Commission has the express authority to approve the ECIC pursuant to 66 Pa. Code C.S. § 1330(b)(2), which expressly authorizes automatic adjustment clauses like the ECIC as a form of alternative ratemaking.

Q. How does the Company's proposed ECIC meet the policy objectives of Section 1330 alternative ratemaking treatment?

A. The Company's environmental compliance requirements are continuously evolving and this is one of the drivers that increases the costs of water and wastewater service and the need for rate relief. As discussed in more detail by PAWC witnesses Aiton and Swiz, the need for and timing of measures to comply with new or changed government mandates under applicable environmental laws are outside of the Company's control. The Company's proposed ECIC will provide a reasonable mechanism for adjusting the Company's rates between base rate cases to support full and timely rate recognition of PAWC's costs to comply with new and updated environmental regulatory mandates in a prudent and efficient manner as they emerge. The ECIC will also mitigate customer exposure to less frequent but more significant rate increases in a general base rate case by producing much smaller, gradual increases to customer bills.

Request for Regulatory and Accounting Treatment

Q. Please describe PAWC's request for deferral accounting treatment for pension and OPEB expenses and why it is appropriate.

A. PAWC is requesting Commission authorization to establish regulatory accounts for its pension and OPEB expenses. These expenses are difficult to predict and can materially increase or decrease from year-to-year because pension and OPEB costs are based on actuarial forecasts that take into account a number of economic and demographic factors described by Mr. Swiz. When the actual outcomes differ from the predicted values for those factors, pension and OPEB costs can be materially higher or lower than forecasted for recovery in rates, resulting in under- or over-recovery by the Company and corresponding under- or

overpayment by customers. The Company's proposal would compare its actual pension and OPEB expenses incurred to the amount included within base rates. The differences between the two would be deferred to a regulatory asset or liability, and the net balance would be addressed in PAWC's next base rate case.

Q. Please describe PAWC's request for deferred accounting treatment for production expenses and why it is appropriate.

A. The Company's production expenses can materially increase or decrease based on the prices charged by suppliers from whom the Company purchases water, fuel and power, wastewater treatment service, and waste disposal services needed to provide safe and reliable water and wastewater service to customers. As discussed in Mr. Swiz's testimony, the chemical market has been extremely volatile and fuel and power pricing has experienced significant increases in recent years. The Company actively manages its chemical and energy use, but external market forces are outside of the Company's and many of its suppliers' control. The Company requests deferral in order to protect both the Company's customers and PAWC against this volatility and ensure that neither customers nor the Company would be required to bear more than the Company's actual costs incurred for production costs.

Q. Have you reviewed Ms. Ciullo's direct testimony regarding Section 1301.1(b)(1) of the Code and the Company's plan to invest 50% of the "differential" resulting from the implementation of Act 40?

A. Yes, I have. As Ms. Ciullo noted, I will address that issue.

Q. How does the Company plan to invest 50% of the "differential" (approximately $2.3 million per year) that Ms. Ciullo calculated?

A. The Company plans to invest in projects that will enhance the reliability of the Company's systems and may include projects to extend the Company's mains to address health and safety issues pursuant to Rule 27.1(F) of its tariff or for infrastructure enhancement projects that will improve the quality and reliability of service.

2022 RATE CASE SETTLEMENT COMMITMENTS

Q. Has the Company complied with the terms and conditions of the Joint Petition for Settlement approved by the Commission in its 2022 base rate case?

A. Yes, it has. The Joint Petition for Settlement, together with its attachments and accompanying exhibits, is a lengthy document setting forth a number of terms and conditions. I will briefly explain PAWC's compliance with major commitments in the Joint Petition for Settlement directly affecting customer rates, customer service and assistance to low-income customers, which I will reference by the applicable paragraph of the Joint Petition for Settlement.

Paragraph No. 21. PAWC filed an amendment to its second wastewater Long Term Infrastructure Improvement Plan for 2024 through 2028 ("Second LTIIP") at Docket No. P-2023-3038874 to include systems acquired under Section 1329 of the Public Utility Code, which did not re-prioritize other existing commitments in other service areas. Following Commission approval of the Second LTIIP on June 15, 2023, the Company filed a compliance tariff supplement that incorporates the acquired systems into PAWC's DSIC tariff.

Paragraph No. 25. On March 31, 2023, PAWC filed updates to PAWC Exhibit 3-A, pp. 26, 90, 136, 177, 207, and 243 at the dockets for its last base rate case, including actual plant additions and retirements for the twelve months ending December 31, 2022. PAWC also committed to provide the actual plant additions and retirements, by account, for the twelve months ending December 31, 2023, no later than April 1, 2024. Given the timing of

the filing of this base rate case, Mr. Aiton's Direct Testimony, PAWC Statement No. 3 provides an update reflecting plant in service through September 30, 2023.

Paragraph No. 33. PAWC has proposed to eliminate minimum usage allowances for all systems.

Paragraph Nos. 40 and 41. PAWC has proposed in this filing to create a separate tariff group for current and future CSS customers and submitted a wastewater cost-of-service study that includes a separate customer class for bulk customers in the York system whose rates are set by contract.

Paragraph Nos. 43 through 46. With respect to PAWC's Bill Discount Program ("BDP"), the three tier structure was implemented, a system for tracking and reporting on the subject data has been developed and BDP participation has been made portable for customers when changing residences.[8]

Paragraph Nos. 47 through 56. With respect to PAWC's Hardship Fund and community outreach, all settlement commitments have been accomplished, including increasing the annual contribution, reducing the good faith payment requirement, working to develop a solution so that customers can receive more than one grant each year (up to the maximum grant amount),[9] and undertaking targeted community outreach efforts in geographic areas with a higher percentage of low-income customers.

Paragraph Nos. 57 to 58. PAWC committed to three main extension projects. Applications for extension of service territory to serve in Project Area 1 (Campbell Road and Old Steubenville Pike, Robinson and Smith Townships) and Project Area 2 (Donaldson Road,

[8] The settlement commitments in Paragraph Nos. 45 and 46 with respect to the Company's Arrearage Management Plan are not applicable as approval is still pending before the Commission.

[9] Customers cannot currently get more than one grant each year, but Dollar Energy is developing the technology and anticipates having this capability for the 2024-2025 program year.

Robinson Township) are currently pending at the Commission and construction will commence soon after certificates of public convenience are issued. Construction is underway with respect to Project Area 3.

Paragraph Nos. 59 through 61. Commitments regarding inspecting storage tanks over 15 years old, exercising isolation valves on a 5-years cycle and inspecting critical valves annually,[10] and marking fire hydrants that cannot provide minimum fire flow have all been met.

Paragraph No. 62. PAWC has the ability to provide a Complaint Log as agreed upon, including the final disposition of disputes.

Paragraph Nos. 63 through 69. PAWC implemented the requirements with respect to customer service, including training for representatives handling Pennsylvania customer calls, tariff amendments regarding the process for how prior unpaid debt is handled, reports to the Customer Assistance Advisory Group ("CAAG") on the progress of reaching certain performance objectives, updates to termination notices to inform customers of the right to make a verbal declaration of a medical emergency, revisions to bills and the Company's interactive voice response system to clarify that convenience fees are not charged for payments by phone and tariff changes to clarify that security deposits will not be charged to customers who are eligible for the BDP.

PERFORMANCE FACTORS: SECTION 523 OF THE CODE AND 52 PA. CODE § 69.711

Q. Does the Code authorize the Commission to consider performance factors in arriving at a utility's allowable revenue requirement in a base rate case?

[10] A small number of valves have yet to be inspected as of the date this testimony was finalized, but the Company anticipates inspection will be complete soon thereafter.

A. Yes. Section 523 of the Public Utility Code provides that the Commission "shall consider" the "efficiency, effectiveness and adequacy of service" of a utility when determining just and reasonable rates.

Q. What does Section 523 provide regarding performance factors to be considered by the Commission?

A. Section 523(a) requires the Commission to consider performance factors, while Section 523(b) identifies the kinds of factors that are relevant in assessing a utility's performance. Section 523(a) and the portions of 523(b) that are relevant to a water and wastewater utility are set forth below:

> (a) Considerations. – The Commission shall consider, in addition to all other relevant evidence of record, the efficiency, effectiveness and adequacy of service of each utility when determining just and reasonable rates under this title. On the basis of the commission's consideration of such evidence, it shall give effect to this section by making such adjustments to specific components of the utility's claimed cost of service as it may determine to be proper and appropriate. Any adjustment made under this section shall be made on the basis of the specific findings upon evidence of record, which findings shall be set forth explicitly, together with their underlying rationale, in the final order of the commission.
>
> (b) Fixed Utilities. – As part of its duties pursuant to subsection (a), the commission shall set forth criteria by which it will evaluate future fixed utility performance and in assessing the performance of a fixed utility pursuant to subsection (a), the commission shall consider specifically the following:
>
> (1) Management effectiveness and operating efficiency as measured by an audit pursuant to Section 516 (relating to audits of certain utilities) to the extent that the audit or portions of the audit have been properly introduced with applicable rules of evidence and procedure.
> * * *
> (5) Action or failure to act to encourage cost-effective conservation by customers of water utilities
> * * *

(7) Any other relevant and material evidence of efficiency, effectiveness and adequacy of service.

Q. Is the Company proposing that performance factors relating to its "efficiency, effectiveness and adequacy of service" be considered by the Commission in this case?

A. Yes, it is. For the reasons I will discuss later in my direct testimony, the Company strongly believes, and proposes, that the Commission should implement the terms of Section 523 in determining the Company's allowed rate of return on equity in this case. Specifically, Ms. Bulkley has recommended a range of reasonable rates of return on equity from 10.0% to 11.00%. Both Ms. Bulkley and I recommend that the Commission adopt a rate of return on equity of 10.95% – at the upper end of Ms. Bulkley's range – in recognition of PAWC's superior management performance based on the factors that apply to water utilities in Section 523 of the Code. In addition, and for the same reason, if the Commission were to approve a rate of return on equity that is lower than the upper end of Ms. Bulkley's recommended range, it should add no less than 25 basis points to its market-determined rate of return.[11]

Q. Please summarize the factors demonstrating the Company's exemplary management performance.

A. I am addressing eight areas: (1) the Company's industry-leading programs to assist low-income and payment-troubled customers; (2) the Company's environmental record and commitment to water quality; (3) the Company's strong safety performance; (4) the Company's commitment to operational and water efficiency for the benefit of customers; (5) the Company's significant infrastructure investment; (6) the Company's community

[11] Of course, if the Commission's market-determined rate of return on equity is greater than 10.70%, then the performance-based increment could be less than 25 basis points to achieve a final equity return rate of 10.95%.

engagement and consumer education initiatives; (7) the Company's efforts to support the Commission's and the Pennsylvania Department of Environmental Protection's ("DEP") long-standing policy to eliminate the problems of small, troubled and nonviable water and wastewater systems by acquiring those systems and making the improvements needed to assure safe and reliable service; and (8) the Company's efforts to extend service to meet the needs of customers without access to safe and reliable water service.

Q. Please discuss the Company's industry-leading efforts assisting low-income customers.

A. For more than 30 years, PAWC's H2O program has assisted customers in need. In fact, the H2O program ranks at the top of Pennsylvania water utility customer assistance programs for the benefits it provides. To support the H2O hardship grant program, PAWC contributes more of its shareholders' money, $750,000 annually, than any other water utility in the Commonwealth to help customers in need. As discussed above, PAWC anticipates increasing this donation by $700,000 in late 2023.

The H2O program also includes a low-income bill discount program. In this proceeding, the Company is proposing to further enhance this program. Specifically, as further discussed in Mr. Rea's direct testimony (PAWC Statement No. 10), the Company is proposing to expand the eligibility for the program to include a fourth tier to assist households with incomes from 150% to 200% of the federal poverty level. It is PAWC's understanding that no other utility in Pennsylvania has extended bill discounts to customers at this income level.

Moreover, as discussed earlier in my testimony, PAWC is expanding its H2O program to assist low-income customers by offering arrearage forgiveness through its AMP. Under this program, qualifying customers will receive $25 of arrearage forgiveness per month.

In addition, in the past two years, PAWC successfully participated in LIHWAP where, as previously noted, customers have received over $8 million in relief to assist with unpaid bills. As of August 2023, all LIHWAP funds have been depleted but PAWC continues advocacy efforts to support the establishment of a permanent program. For example, the Company worked to build a coalition of stakeholders who advocated for a state-funded LIHWAP-like program through a coalition letter signed by 13 supporting organizations, which was sent to the State Senate and Governor Shapiro in June 2023. When SB 767 was introduced by Senator Lisa Boscola, the Company continued to ask lawmakers and the Governor's office to include funding in the 2023-2024 state budget. The successful implementation of LIHWAP for PAWC customers is due to PAWC's proactive engagement and collaboration with DHS and extensive customer outreach. PAWC attended stakeholder meetings, webinars and briefings prior to the LIHWAP launch. Additionally, prior to the LIHWAP launch, PAWC developed a customer communications and outreach plan to help maximize the impact of the program for customers facing challenges paying their bills. The Company published a LIHWAP-specific page on its website, prepared talking points and a one-pager about the program for its customer service, customer advocacy and external and government affairs teams, included LIHWAP information in a statewide customer email campaign, and sent information to municipal, county and state elected officials across PAWC's service territory. From mid-January to mid-February 2022, the Company sent a bill enclosure about LIHWAP to all customers statewide, with a second bill image about LIHWAP running statewide the following month. PAWC continued to actively promote the LIHWAP program approximately once per week through its various social media channels, reaching tens of thousands of customers.

In addition to these widespread education and outreach efforts, PAWC launched a targeted LIHWAP email campaign on January 25, 2022 to approximately 10,000 customers with past-due balances, notifying them that they may qualify for grant assistance. On March 18, 2022 in advance of the end of the winter moratorium, PAWC launched a targeted LIHWAP direct mail letter campaign to approximately 31,000 customers with past-due balances. Additionally, for customers contacting the Company seeking payment arrangements or assistance to avoid shutoff, PAWC's scripting referred the customer to LIHWAP. When additional funds were reallocated in July 2023, the Company conducted additional targeted outreach to customers with past-due balances through a direct mail campaign to approximately 37,000 customers in July 2023 and two customer email campaigns in July and August 2023 to 28,000 and 11,000 customers, respectively. PAWC also continued to promote this LIHWAP grant re-opening on its social media channels until funding was again depleted.

The Company also created customer assistance cards containing information about all available water/wastewater utility assistance programs for field employees to distribute during customer interactions in the field. To further assist customers who received bill payment assistance through LIHWAP, the Company established a process to review each LIHWAP grant recipient's account and enroll all customers in PAWC's H2O bill discount program, which optimizes the level of assistance provided to those customers. The established process also includes sending a letter to each customer informing them of enrollment in the Company's H2O bill discount program. Over the course of the LIHWAP program, PAWC enrolled over 8,100 LIHWAP grantees in the Company's bill discount program, meaning they continue to receive financial relief on their bills every month going forward.

Q. Does the Company's environmental record and commitment to water quality demonstrate excellent management performance?

A. Yes, it does. The Company has met and continues to meet all federal and state drinking water regulations. As described in more detail in the testimony of PAWC witness Jim Runzer (PAWC Statement No. 2), PAWC treatment plants are nationally recognized for optimization and performance above and beyond regulatory standards. PAWC is a leader in the Environmental Protection Agency's ("EPA") Partnership for Safe Water Treatment Program, which means the Company treats water to a standard that surpasses the requirements imposed by EPA and DEP. Part of providing water of the highest quality is starting with quality water in the first place. As Mr. Runzer shares in his testimony, PAWC is proud of our efforts in source water protection. Through our participation in these programs and our internal practices and policies, the Company consistently meets our goal of providing high quality drinking water to customers.

PAWC is also committed to ongoing water quality improvement. To monitor water quality and improve our processes, the Company relies on its central laboratory in Bellville, Illinois to process hundreds of process samples in addition to compliance samples. These process samples contribute to the Company's ability to continually improve water treatment and optimize our facilities. As regulatory standards continue to shift, PAWC continues to remain a leader. For example, the Company often monitors for potential pollutants where such monitoring is not yet required by regulation. Where issues are identified, treatment technology is put in place to continue to provide the Company's customers safe and reliable service. Finally, to help ensure that water is safe all the way to the tap, PAWC has worked with the Commission and OCA to develop and institute a lead service line replacement

program, which allows the Company to address lead service line concerns ahead of regulatory changes and remove this health risk for customers as soon as possible.

As the Company continues to grow in its provision of wastewater treatment services, so grows the Company's commitment to ensuring that discharges leaving our plants are not impacting water quality in streams. Perhaps just as importantly, the Company has undertaken significant efforts to reduce the inflow of stormwater into our collection systems, thus keeping clean water clean and reducing treatment costs for customers. As described in more detail in the testimony of PAWC witnesses Mr. Runzer (PAWC Statement No. 2) and Mr. Aiton (PAWC Statement No. 3), it is the Company's commitment to water quality, environmental protection, and our customers that drive our investment in highly effective water treatment and the attention to detail at all levels of the organization to meet or exceed regulatory requirements. We are proud of the quality of water and wastewater service that we provide to our customers and the quality of water that we release back into our streams.

Q. Does the Company's safety record exhibit exemplary management performance?

A. Yes. The health and safety of our customers, communities and employees continues to be our top priority. In fact, safety is a defined core value and strategy for the Company. The effectiveness of our commitment to safety is illustrated by our year-over-year safety performance. The Company's OSHA recordable incident rate ("ORIR") improved from 2.62 in 2018 to 0.85 in 2022. At this point in 2023, PAWC is having its best safety record in its operational history. Mr. Runzer, in his direct testimony (PAWC Statement No. 2), further describes the Company's safety initiatives and programs that benefit our customers.

Q. Does the Company's dedication to operational and water efficiency exhibit exemplary management performance?

A. Yes. In PAWC Statement No. 2, Mr. Runzer highlights the Company's operational and water efficiency initiatives to mitigate capital and operating costs, while also helping to protect and preserve our natural resources. Such initiatives include supply-side practices, such as increased pump efficiency, more accurate meter reading and leak detection, and main replacement and repair programs, as well as demand-side strategies, such as customer efficiency and public education programs to support water and energy efficiency. Mr. Runzer further describes the Company's (1) use of technology to enhance employee effectiveness and benefit customers; (2) robust program to reduce non-revenue water; (3) improvements in energy efficiency and resulting reductions in energy costs; 4) improvements in operational efficiency including successful efforts to control waste disposal, purchased water and vehicle fleet expenses; and (5) the Company's procedures related to the Underground Damage Prevention Program, which resulted in 99.99% of tickets being responded to timely in 2022.

Q. Do the Company's significant infrastructure investments in the Commonwealth demonstrate superior management performance?

A. Yes. PAWC has invested, over the past 17 years, more than $5 billion in PAWC infrastructure. The Company's capital investments have resulted in infrastructure reliability and resilience, which are important priorities for PAWC's leadership. Resilient infrastructure allows the Company to avoid or minimize service disruptions during extraordinary events, such as extreme weather events. As explained in Mr. Aiton's testimony, the Company uses its High Risk Asset Management ("HRAM") process to formulate its Strategic Capital Expenditure Plan (PAWC Statement No. 3). Through the HRAM process, the Company identifies facilities or assets that may pose a high risk to the Company's system and evaluates facilities and critical assets against risk and consequence of failure. The Company then

prioritizes capital investment programs and projects using the HRAM process, leading to accelerated investments in high risk assets or facilities before problems arise. Mr. Aiton's testimony also includes several projects that will continue to improve the safety, reliability, and resilience of PAWC's systems (PAWC Statement No. 3).

Q. Has PAWC taken a leadership role in community engagement and consumer education?

A. Yes. Investing in and giving back to the communities we serve is very important to us. In 2022, we donated more than $560,000 to 330 organizations throughout the communities we serve through general charitable contributions, grants, sponsorships and programming support. The Company primarily directs its giving to community sustainability, food insecurity, environmental programs, fire departments, health and wellness, education and workforce development, and Inclusion, Diversity & Equity initiatives. Through the American Water Charitable Foundation, an additional $373,000 was donated to non-profit organizations in PAWC's service territory as part of the Foundation's "Keep Communities Flowing" grant programs as well as its employee matching gift program. In 2022, PAWC representatives engaged with customers and community leaders through participation in 210 volunteer projects, speaking engagements, educational programs and community events, and our employees spent 2,431 hours volunteering their time at local non-profits. PAWC offers a robust public education program focused especially on educating the youth of the Commonwealth. Not only do we conduct water camps for children ages 7-11 during the summer and teach classes on watershed protection, water treatment, the water cycle and water conservation in the classroom during the school year, we also conduct treatment plant tours for students and adults alike, judge "Envirothon" competitions, and participate in Earth Day activities. PAWC's annual "Protect Our Watershed Art Contest" for 4th, 5th and 6th graders

throughout the Commonwealth attracted more than 300 applications this year and serves as an educational tool about the short- and long-term benefits of protecting the environment and our critical water resources.

The Company also plays a leadership role in educating the workforce of tomorrow. PAWC offers paid summer internships in its operations, water quality, and engineering departments to build a future talent pipeline, increase diversity, and bring new perspectives to the Company while providing important real-life work experience to college students in local communities. Likewise, the American Water Inclusion and Diversity Scholarship Program offers 10 renewable scholarships of $10,000 each to students residing in or attending college in one of the states where American Water operates, including Pennsylvania.

Q. Is there any other reason why you believe PAWC is entitled to an equity allowance that recognizes exemplary management performance?

A. Yes. The Commission adopted a Policy Statement on Small Nonviable Water and Wastewater Systems at 69 Pa. Code § 69.711 stating that it will consider regulatory incentives including "rate of return premiums," to encourage and reward the continued acquisition of troubled water and wastewater systems by large, viable utilities.

Q. What does the Commission's Policy Statement at 52 Pa. Code § 69.711 provide regarding performance-based incentives?

A. Section 69.711 states in relevant part as follows:

> *(a) Acquisition incentives.* In its efforts to foster acquisition of suitable water and wastewater systems by viable utilities when the acquisitions are in the public interest, the Commission seeks to assist these acquisitions by permitting the use of a number of regulatory incentives. Accordingly, the Commission will consider the following acquisition incentives:
>
> (1) *Rate of return premiums*. Under 66 Pa.C.S. § 523 (relating to performance factor considerations),

> additional rate of return basis points may be awarded for certain acquisitions and for certain associated improvement costs, based on sufficient supporting data submitted by the acquiring utility within its rate case filing. The rate of return premium as an acquisition incentive may be the most straightforward and its use is encouraged.

Q. Has PAWC acted as receiver for and acquired troubled water and wastewater systems?

A. Yes. For more than 25 years, PAWC has been an industry leader in helping resolve the significant challenges faced by troubled water and wastewater systems. In the last ten years alone, the Company has completed sixteen acquisitions of very small, less-viable water and wastewater systems – systems with less than 1,000 customer connections each. Four additional small water and wastewater acquisitions are contemplated as part of this base rate filing: Sadsbury Township Municipal Authority wastewater system, Farmington Township water system, Farmington Township wastewater system, and Audubon Water Company. None of these were acquired under 66 Pa. Code C.S. § 1329 for fair market value although Sadsbury and Farmington, as municipal sellers, are eligible. In addition to these small acquisitions with applications pending before the Commission and included in this base rate case, PAWC has also executed agreements to acquire several other small non- or less-viable systems including: Manwalamink (water and wastewater), East Dunkard Water Authority (water), and Appalachian Utilities, Inc. (water). Similarly, none of these systems are being acquired under 66 Pa. Code C.S. § 1329 for fair market value, although East Dunkard Water Authority would be eligible.

Over the last few years, the Company has also completed the acquisitions of systems that were not, at the time of acquisition, providing adequate, efficient, safe and reasonable service. These systems, which were acquired pursuant to 66 Pa. C.S. § 529, include Delaware Sewer Company ("Delaware Sewer") and Winola Water Company. Prior to acquisition, the

Company also acted as the receiver for Winola Water Company. The Company has made capital investments to improve service to customers of these systems and increase environmental compliance. The Company also acted as the receiver for Indian Springs Water Company ("Indian Springs") during the pendency of the Commission's proceeding under 66 Pa.C.S. § 529. As a resolution for the Commission's Section 529 investigation into Indian Springs, the Company coordinated a plan for all customers to have an adequate alternative supply of water from private wells. PAWC offset all of its receivership costs and a significant portion of the costs that customers had to pay for private wells by negotiating a sale of land owned by Indian Springs, to the benefit of PAWC and Indian Springs customers. The land was sold back to the community to be preserved for the recreation and enjoyment of the residents.

In addition to providing solutions for small, troubled systems, PAWC has also had a positive impact on communities through acquisitions of larger systems such as in McKeesport, Scranton and York where significant investment has and continues to address environmental challenges and aging infrastructure.

Q. Please explain PAWC's recent willingness and efforts to provide an emergency solution for the customers of the East Dunkard Water Authority.

A. The East Dunkard Water Authority ("EDWA") is a municipal water authority which owns, operates and maintains a municipal drinking water system that serves approximately 1,800 households, businesses and schools and a population of approximately 4,200 in the following municipalities in Greene County: Dunkard Township, Greene Township, and portions of Monongahela, Cumberland, Perry and Whiteley Townships ("EDWA System"). Although PAWC has a signed agreement to acquire the EDWA System and is currently conducting due

diligence and preparing an application pursuant to Section 1102 of the Public Utility Code for approval from the Commission for that acquisition, EDWA is facing current and dire challenges that are in need of a more immediate solution. Since July 2021, DEP has conducted numerous inspections and issued multiple Orders to EDWA for violations of the Safe Drinking Water Act and Regulations. Since September 2023, the EDWA System has been without a certified water operator and on October 23, 2023, DEP issued a boil water order due to elevated levels of turbidity above the regulatory limits. On October 24, 2023, the EDWA System experienced a major upset resulting from operational failure of the filters at the water treatment plant and the clarifier system at the water treatment plant ceased proper operation. The EDWA System's water treatment plant ceased producing water and all customers were without even non-potable water for several days for basic sanitary and hygienic purposes, including bathing, dishwashing, and toilet flushing. Water service was eventually restored but all customers remained under a boil water advisory and had to continue to boil their water before consumption. Because EDWA has made representations to DEP that it does not have the financial resources to effectively and properly operate the EDWA System, comply with DEP Orders and a Commonwealth Court Order, and employ a Certified Operator and because EDWA's actions threaten immediate harm to public health and safety, DEP prepared an application to be filed in the Commonwealth Court to seek the appointment of a receiver for the EDWA System. When DEP reached out to the Company regarding its intention to seek appointment of a receiver for EDWA by the Commonwealth Court and asked that PAWC agree to be appointed as such receiver the Company was willing to provide a solution for the approximately 4,200 residents who were without adequate service, provided that it had the Commission's approval as it is not customary for a jurisdictional utility to be appointed

receiver of a municipal authority. Shortly before this base rate case was filed, DEP and PAWC jointly requested that the Commission take emergency action to permit PAWC to be appointed as receiver of EDWA by the Commonwealth Court and the Commission entered an Order providing PAWC with the necessary authorization.[12] If appointed as receiver of EDWA by the Commonwealth Court, PAWC will take the steps necessary for EDWA to provide water that complies with relevant safe drinking water standards.

The Company remains committed to helping DEP and the Commission resolve the issues posed by the many troubled water and wastewater systems that still exist across the state. Consistent with 52 Pa. Code § 69.711, a rate of return premium is appropriate to recognize the Company's efforts with respect to troubled systems.

Q. In addition to acquisitions of troubled systems and acting as a receiver for troubled systems, how else has PAWC provided a solution for customers in need of safe and reliable service?

A. PAWC routinely extends service to customers who are in need of water and/or wastewater service. For example, the Company recently broke ground on a $21 million water main extension project that will bring high-quality, reliable drinking water and fire service to the Avella School District and portions of surrounding communities in Washington County.

The Company has also filed an application to extend its service territory for a public groundwater project in Dimock, Pennsylvania. In late 2021, the Office of then Attorney General Josh Shapiro reached out to PAWC to ask if the Company would assist in helping to find a drinking water solution for a community of approximately 21 Dimock properties that

[12] *Joint Petition of Pennsylvania-American Water Company and the Pennsylvania Department of Environmental Protection Requesting an Ex Parte Emergency Order in Regard to Receivership of East Dunkard Water Authority*, Docket No. P-2023-3043950 (Order entered November 1, 2023).

have not had access to safe well water due to unsafe levels of methane and other contaminants for approximately 15 years. In recognition of the severe water quality problems facing this community, the Company worked to develop a plan for the most effective public drinking water system for Dimock residents. In November 2022, the Company and the Office of Attorney General presented the proposed system design to Dimock residents who expressed strong support for the project. Subsequently, the Office of Attorney General and Coterra Energy entered into a Plea Agreement under which PAWC's construction of this project is fully funded, and thus provides the benefit of public water to these residents without a cost to other PAWC customers. PAWC projects that the new drinking water system in Dimock will be in service by the end of 2026. The Company remains committed to being a community partner throughout the Commonwealth and providing solutions for those in need of safe and reliable water and wastewater service.

Q. What should the Commission conclude from all of the evidence PAWC has presented on its performance factors?

A. The well-documented exemplary performance of the Company's management discussed above fully justifies approving a rate of return at the upper end of Ms. Bulkley's recommended range – namely, 10.95% – and, in any event, an increment of at least 25 basis points to a lesser market-determined rate of return on equity approved by the Commission, up to 10.95%.

CONCLUSION

Q. Does this conclude your direct testimony at this time?

A. Yes, it does. However, I reserve the right to supplement my testimony as additional issues and facts arise during the course of the proceeding. Thank you.

Penalties

The following adjustment reflects the annualization of revenues associated with changes imposed during twelve months ending June 30, 2023 and projected to be imposed during twelve months ending June 30, 2024 and twelve months ending June 30, 2025. Additionally, annualized late payment charges are calculated based on revenues at the proposed rate level.

Contributions in Aid of Construction (CIAC)

The Company receives Contributions in Aid of Construction (CIAC) on an annual basis. The Commission's Order dated April 21, 1993, at Docket No. R-922428 approved the use of a three year average to calculate the future test year additions to CIAC. The following adjustment reflects the projected CIAC to be received during the twelve months ended June 30, 2024 and June 30, 2025.

LINE NO.	DESCRIPTION	PRESENT RATES 6/30/2024 AMOUNT	PRESENT RATES 6/30/2025 AMOUNT

Calculation of Cash Working Capital Requirements

Charges for water service are billed in arrears on a monthly basis. The calculation set forth below reflects summarized operating revenues billed for the twelve months ended June 30, 2023 and as annualized under present rates for the twelve months ending June 30, 2024 and June 30, 2025.

The calculation further reflects the average lag in receipt of revenues less the lag in payment of operating expenses to determine cash working capital requirements.

Calculation of Cash Working Capital Requirements

The payment of interest on the Company's long term debt is made six months in arrears. Payment of interest on the Company's short term debt is made monthly in arrears. The payment of dividends on the Company's preferred stock is made quarterly in arrears. The average lag days of interest and dividend payments and the deduction of the average lag days for the receipt of revenue is calculated below to determine cash working capital requirements.

Tax Cuts and Jobs Act Stub Period and Negative Surcharge for Deferred Tax Credit

The following adjustment reflects the amortization of the federal income tax savings associated with the 2017 Tax Cuts and Jobs Act ("TCJA") for January 1, 2018 through June 30, 2018 (the "Stub Period"), as authorized in the settlement at Docket No. R-2020-3019369. The adjustment reflects a true-up to the accrual of interest at the residential mortgage lending rate specified by the Secretary of Banking in accordance with the Loan Interest and Protection Law (41. P.S. §§ 101, et seq.), which was lower than the amount projected in 2020, as well as the reconciliation amounts shown in the Company's 2021 and 2022 TCJA Surcharge Reconciliation filings are included as part of this adjustment, including the over/(under) collection plus interest, all approved at Docket No. R-2022-3019369. The Company is also proposing to amortize the balance at 06/30/2024 over a two-year period. In addition, the Company has included the reconciliation for the over/(under) collection of the Negative Surcharge for Deferred Tax Credit ("EADIT") as required by Tariff Water- PA P.U.C. No. 5 page 40. This amount includes the under collected surcharge, plus applicable interest, for the period from January 1, 2022 through January 27, 2023 to be amortized over a two-year period.

Notes to Rate Base Elements

Extension Deposits in Suspense

The Company requires customer advances for construction to extend its mains to serve new developments based upon an estimate of construction costs. At the completion of the project, entries are made to adjust estimated costs of construction to actual cost of construction. The difference is charged to the extension deposit in suspense account until it is refunded to the customer. The Commission's Order at Docket No. R-891208 approved an adjustment to rate base of an average of extension deposits in suspense. The following reflects the adjustment to rate base for such an average.

LINE NO.	MONTH	DETAIL	06/30/2024 and 06/30/2025 AMOUNT

Citizens Utilities Water Company Acquisition

Customer Advances for Construction (CAC) and Contributions in Aid of Construction (CIAC) Adjustment

Paragraph 8.d of the Joint Petition for Settlement at Docket No. R-2009-2097323, which was approved by the Commission in its final order entered November 7, 2009, provides that: "for ratemaking purposes: (i) $14,147,208, or 40%, of the December 31, 2009 balance of the net customer advances for which Citizens Utilities Water Company of Pennsylvania ("Citizens") retained the refund liability upon the Company's acquisition of Citizens' water utility assets will be deemed deducted from the Company's rate base; (ii) $8,895,830 (100%) of the December 31, 2009 balance of the net contributions in aid of construction the OCA proposed to attribute to PAWC from its acquisition of Citizens' water assets will be deducted from PAWC's rate base; (iii) in future base rate cases, the foregoing balances, adjusted to reflect accumulated amortization, will be deducted for ratemaking purposes until such balances are fully amortized; and (iv) the applicable depreciation rate for PAWC's transmission and distribution mains will be used to calculate the amortization of such balances for ratemaking purposes to offset the portion of depreciation expense on gross plant in service that is related to these advances and contributions." Shown below are the adjustments that are called for by the settlement at Docket No. R-2009-2097323.

Notes to Rate Base Elements

Deferred Income Tax

The following calculation is being made to reflect the federal tax difference between using accelerated and straight-line depreciation, the effects of the Tax Cuts and Jobs Act, taxable contributions and advances and normalizing the effect of the repairs and maintenance deduction for state and federal tax. This adjustment is carried as a rate base reduction.

Compensation

The following adjustment sets forth a summary of the Company's annualization of labor expense. The pro forma payroll for the future test years were developed by applying pay rates and associated performance pay that will become effective by June 30, 2024 and June 30, 2025 to the Company's full complement of employees.

Group Insurance

The adjustment of the group insurance cost is based on the January 2024 premiums annualized for the future test year number of employees, less the annualized employee contribution, and adjusted for the portion not charged to operations. The fully projected future test year was developed by adjusting the annualized 2024 amount by a 3 year average of 3.03%.

Insurance Other Than Group

The annualizations of Insurance Other Than Group (IOTG) costs were based on the actual IOTG premiums for the twelve months ending June 30, 2023, adjusted for the 5 year average of retroactive adjustments. The present rates 6/30/2024 amounts are based on twelve months ending June 30, 2023 increased by a 5 year average of 6.53%, except for claims amounts which were held at twelve months ended June 30, 2023 levels. Amounts for present rates 6/30/2025 were increased by a 5 year average of 6.53%, except for claims amounts which were held at present rates 6/30/2024 levels. Present rates have been allocated to other cost of service areas based on depreciated utility plant in service as of 6/30/23.

Change in Number of Customers

The following historic revenue adjustment reflects the change in revenues due to the average change in number of customers during the twelve months ended June 30,2023. The following future and fully forecasted revenue adjustment reflects the change in revenues due to the projected change in number of customers during the twelve months ending June 30,2024 through June 30, 2025. Projections were based on a two year historical growth average exclusive of acquisitions.

Calculation of Cash Working Capital Requirements

Charges for wastewater service are billed in arrears on a monthly basis. The calculation set forth below reflects summarized operating revenues billed for the twelve months ended June 30, 2023 and as annualized under present rates for the twelve months ending June 30, 2024 and June 30, 2025.

The calculation further reflects the average lag in receipt of revenues less the lag in payment of operating expenses to determine cash working capital requirements.

Calculation of Cash Working Capital Requirements

The payment of interest on the Company's long term debt is made six months in arrears. Payment of interest on the Company's short term debt is made monthly in arrears. The payment of dividends on the Company's preferred stock is made quarterly in arrears. The average lag days of interest and dividend payments and the deduction of the average lag days for the receipt of revenue is calculated below to determine cash working capital requirements.

Tax Cuts and Jobs Act Stub Period

The following adjustment reflects the amortization of the federal income tax savings associated with the 2017 Tax Cuts and Jobs Act ("TCJA") for January 1, 2018 through June 30, 2018 (the "Stub Period"), as authorized in the settlement at Docket No. R-2020-3019369. The adjustment reflects a true-up to the accrual of interest at the residential mortgage lending rate specified by the Secretary of Banking in accordance with the Loan Interest and Protection Law (41. P.S. §§ 101, et seq.), which was lower than the amount projected in 2020, as well as the reconciliation amounts shown in the Company's 2021 and 2022 TCJA Surcharge Reconciliation filings are included as part of this adjustment, including the over/(under) collection plus interest, all approved at Docket No. R-2022-3019369. The Company is also proposing to amortize the balance at 06/30/2024 over a two-year period.

Insurance Other Than Group

The annualizations of Insurance Other Than Group (IOTG) costs were based on the actual IOTG premiums for the twelve months ending June 30, 2023, adjusted for the 5 year average of retroactive adjustments. The present rates 6/30/2024 amounts are based on twelve months ending June 30, 2023 increased by a 5 year average of 6.53%, except for claims amounts which were held at twelve months ended June 30, 2023 levels. Amounts for present rates 6/30/2025 were increased by a 5 year average of 6.53%, except for claims amounts which were held at present rates 6/30/2024 levels. Present rates have been allocated to other cost of service areas based on depreciated utility plant in service as of 6/30/23.

LINE NO.	DESCRIPTION		PRESENT RATES 6/30/2024 AMOUNT	PRESENT RATES 6/30/2025 AMOUNT

Operating Revenues

Penalties

The following adjustment reflects the annualization of revenues associated with changes imposed during twelve months ending June 30, 2023 and projected to be imposed during twelve months ending June 30, 2024 and twelve months ending June 30, 2025. Additionally, annualized late payment charges are calculated based on revenues at the proposed rate level.

Materials And Supplies

The Company's claim for materials and supplies at June 30, 2024 and June 30, 2025 is calculated on the basis of the average monthly balances in the material and supplies accounts for PAWC's other wastewater districts for the period of June 2022 to July 2023. This balance was divided by the total number of customers in the other wastewater districts in order to calculate the amount of materials and supplies per customer. This per customer number was then multiplied by the total number of BASA Wastewater customers to calculate the Company's claim.

LINE NO.	DETAIL	06/30/2024 and 06/30/2025 AMOUNT
1	13-Month average of M&S for PAWC's 22 other WW SSS districts	$439,941
2	Number of customers in PAWC's 22 other WW SSS districts	55,222
3	Amount of M&S per customer	$7.97
4	Total number of BASA WW customers	14,755
5	Allowance for Materials and Supplies	
6	At 06/30/2024 and 06/30/2025	$117,597

Calculation of Cash Working Capital Requirements

Charges for wastewater service are billed in arrears on a monthly basis. The calculation set forth below reflects summarized operating revenues billed for the twelve months ended June 30, 2023 and as annualized under present rates for the twelve months ending June 30, 2024 and June 30, 2023.

The calculation further reflects the average lag in receipt of revenues less the lag in payment of operating expenses to determine cash working capital requirements.

Calculation of Cash Working Capital Requirements

The payment of interest on the Company's long term debt is made six months in arrears. Payment of interest on the Company's short term debt is made monthly in arrears. The payment of dividends on the Company's preferred stock is made quarterly in arrears. The average lag days of interest and dividend payments and the deduction of the average lag days for the receipt of revenue is calculated below to determine cash working capital requirements.

Materials And Supplies

The Company's claim for materials and supplies at June 30, 2024 and June 30, 2025 is calculated on the basis of the average monthly balances in the material and supplies accounts for PAWC's other wastewater districts for the period of June 2022 to July 2023. This balance was divided by the total number of customers in the other wastewater districts in order to calculate the amount of materials and supplies per customer. This per customer number was then multiplied by the total number of Brentwood Wastewater customers to calculate the Company's claim.

LINE NO.	DETAIL	06/30/2024 and 06/30/2025 AMOUNT
1	13-Month average of M&S for PAWC's 22 other WW SSS districts	$439,941
2	Number of customers in PAWC's 22 other WW SSS districts	55,222
3	Amount of M&S per customer	$7.97
4	Total number of Brentwood WW customers	3,974
5	Allowance for Materials and Supplies	
6	At 06/30/2024 and 06/30/2025	$31,673

Calculation of Cash Working Capital Requirements

Charges for wastewater service are billed in arrears on a monthly basis. The calculation set forth below reflects summarized operating revenues billed for the twelve months ended June 30, 2023 and as annualized under present rates for the twelve months ending June 30, 2024 and June 30, 2025.

The calculation further reflects the average lag in receipt of revenues less the lag in payment of operating expenses to determine cash working capital requirements.

Calculation of Cash Working Capital Requirements

The payment of interest on the Company's long term debt is made six months in arrears. Payment of interest on the Company's short term debt is made monthly in arrears. The payment of dividends on the Company's preferred stock is made quarterly in arrears. The average lag days of interest and dividend payments and the deduction of the average lag days for the receipt of revenue is calculated below to determine cash working capital requirements.

Change in Number of Customers

The following historic revenue adjustment reflects the change in revenues due to the average change in number of customers during the twelve months ended June 30,2023. The following future and fully forecasted revenue adjustment reflects the change in revenues due to the projected change in number of customers during the twelve months ending June 30,2024 through June 30, 2025. Projections were based on a two year historical growth average exclusive of acquisitions.

Contributions in Aid of Construction (CIAC)

The Company receives Contributions in Aid of Construction (CIAC) on an annual basis. The Commission's Order dated April 21, 1993, at Docket No. R-922428 approved the use of a three year average to calculate the future test year additions to CIAC. The following adjustment reflects the projected CIAC to be received during the twelve months ended June 30, 2024 and June 30, 2025.

LINE NO.	DESCRIPTION	PRESENT RATES 6/30/2024 AMOUNT	PRESENT RATES 6/30/2025 AMOUNT

Calculation of Cash Working Capital Requirements

Charges for wastewater service are billed in arrears on a monthly basis. The calculation set forth below reflects summarized operating revenues billed for the twelve months ended June 30, 2023 and as annualized under present rates for the twelve months ending June 30, 2024 and June 30, 2025.

The calculation further reflects the average lag in receipt of revenues less the lag in payment of operating expenses to determine cash working capital requirements.

Calculation of Cash Working Capital Requirements

The payment of interest on the Company's long term debt is made six months in arrears. Payment of interest on the Company's short term debt is made monthly in arrears. The payment of dividends on the Company's preferred stock is made quarterly in arrears. The average lag days of interest and dividend payments and the deduction of the average lag days for the receipt of revenue is calculated below to determine cash working capital requirements.

Tax Cuts and Jobs Act Stub Period

The following adjustment reflects the amortization of the federal income tax savings associated with the 2017 Tax Cuts and Jobs Act ("TCJA") for January 1, 2018 through June 30, 2018 (the "Stub Period"), as authorized in the settlement at Docket No. R-2020-3019369. The adjustment reflects a true-up to the accrual of interest at the residential mortgage lending rate specified by the Secretary of Banking in accordance with the Loan Interest and Protection Law (41. P.S. §§ 101, et seq.), which was lower than the amount projected in 2020, as well as the reconciliation amounts shown in the Company's 2021 and 2022 TCJA Surcharge Reconciliation filings are included as part of this adjustment, including the over/(under) collection plus interest, all approved at Docket No. R-2022-3019369. The Company is also proposing to amortize the balance at 06/30/2024 over a two-year period.

Notes to Rate Base Elements

Deferred Income Tax

The following calculation is being made to reflect the federal tax difference between using accelerated and straight-line depreciation, the effects of the Tax Cuts and Jobs Act, taxable contributions and advances and normalizing the effect of the repairs and maintenance deduction for state and federal tax. This adjustment is carried as a rate base reduction.

LINE NO.	DESCRIPTION	PRESENT RATES 6/30/2023 AMOUNT	PRESENT RATES 6/30/2024 AMOUNT	PRESENT RATES 6/30/2025 AMOUNT
1	Deferred Tax	($60,218,570)	($70,480,141)	($73,821,198)
2	Less: Prior Year		(60,218,570)	(70,480,141)
3	Effect to Rate Base Element	($60,218,570)	($10,261,571)	($3,341,057)

Insurance Other Than Group

The annualizations of Insurance Other Than Group (IOTG) costs were based on the actual IOTG premiums for the twelve months ending June 30, 2023, adjusted for the 5 year average of retroactive adjustments. The present rates 6/30/2024 amounts are based on twelve months ending June 30, 2023 increased by a 5 year average of 6.53%, except for claims amounts which were held at twelve months ended June 30, 2023 levels. Amounts for present rates 6/30/2025 were increased by a 5 year average of 6.53%, except for claims amounts which were held at present rates 6/30/2024 levels. Present rates have been allocated to other cost of service areas based on depreciated utility plant in service as of 6/30/23.

American Water
Allocation Percentages for 2023 Pension Expense (Before Purchase Accounting)
Based on census data collected as of January 1, 2023

Company	Company Code	Active Participants	2022 Valuation Earnings	Allocation Percentage [1]	Plan Expense Allocation	2023 PBO Service Cost [2]
[redacted]						
Pennsylvania - AM	1024	311	30,196,596	18.56%	3,222,468	3,139,905
[redacted]						
Total		1,633	$162,704,845	100.00%	$17,362,434	$16,330,767

[1] The allocation percentage for each company is equal to the ratio of valuation earnings for that company to total valuation earnings for the entire American Water system.
[2] Allocations of Target Normal Cost and PBO Service Cost represent the sum of the individual amounts for each participant in that company. The 2023 Service Cost is

NOTE
Per Dan Hufton, this is an emergency connection with North Fayette that typically won't have regular use, but we want to keep active in case of emergency.

CONSULTING AGREEMENT between
Pennsylvania American Water and The Brattle Group, Inc.

This Consulting Agreement ("Agreement") is entered into as of this date 8/4/2023 ("Effective Date") by and between **Pennsylvania American Water Company**, a Pennsylvania corporation ("Company"), with its principal office located at 852 Wesley Drive Mechanicsburg PA 17055, and **The Brattle Group, Inc.** ("Consultant"), with its principal office located at One Beacon Street, Suite 2600, Boston, MA 02108 (sometimes individually referred to herein as a "Party," and collectively as the "Parties").

1. **Consultation Services**. The Company hereby retains the Consultant to provide services for the Company as described in **Attachment A** and such other related duties as discussed by the parties during the term of the Agreement. The Consultant will provide such services and related work product to the Company in accordance with the terms and provisions of this Agreement.

2. **Term of Agreement**. This Agreement shall remain in effect until an order is issued in the Company's next general base rate case or through **December 31, 2026**, whichever comes first (the "Term'), but may be extended by mutual, written Agreement of the parties. Notwithstanding the preceding sentence, the obligation of each party to maintain confidentiality shall be unlimited in duration.

3. **Relationship of the Parties**.

   A. Consultant is an independent contractor and not an agent or employee of the Company. Consultant shall not be or represent himself as being an agent of the Company, and shall not be, nor represent himself as being authorized to bind the Company to any liability or undertaking with any third party, nor shall the Company be liable for any liability, contractual representation, or warranty of the Consultant to any third party.

   B. As an independent contractor, Consultant will not be eligible for any benefits provided by the Company to its employees. Specifically, performance of services under this Agreement does not entitle Consultant to participate in or accrue benefits under any employee welfare or pension benefit plan. The Company shall not provide social security, unemployment compensation, disability insurance or worker's compensation or similar coverage, nor any other statutory benefits to Consultant. Consultant shall be solely responsible for all taxes, withholdings, insurance, business licensing fees and any other similar statutory obligations.

   C. Consultant shall be under no obligation to work any set or particular hours, except that Consultant will be expected to coordinate with the Company's designated contact(s), to the extent necessary for the performance of Consultant's services under this Agreement. Notwithstanding the foregoing, Consultant will be required to meet deadlines for filing testimony and responding to discovery, and be available for hearings, as necessary.

   D. Consultant shall meet such deadlines in the performance of services under this Agreement as the parties shall mutually agree, and Consultant shall make periodic reports related to the status of services being performed as the Company shall request upon reasonable notice.

DocuSign Envelope ID: 7078441D-0049-404F-B916-D6C931CBC045

E. Consultant will be expected to furnish tools, materials, and other equipment necessary for the performance of Consultant's services provided under this Agreement.

4. **Compensation**. In consideration for the services rendered under this Agreement, the Company agrees to pay the Consultant for the services identified and, in the amount, stated in **Attachment B.** The Consultant will provide an invoice for payment at the completion of the services identified in **Attachment A** or, at a minimum, on a monthly basis. Payment will be approved and paid through the Company's normal payment processes. Detailed invoicing requirements can be found at:

   http://www.amwater.com/working-with-us/vendors-and-suppliers/index.html

   under the heading "American Water Invoicing Requirements", as may be revised from time to time by the Company, which terms are hereby incorporated by reference herein.

   All undisputed invoices shall be due and payable within sixty (60) days of receipt by Company. If Company disputes any invoice or a portion thereof, Company shall pay any portion not disputed and the disputed portion of such invoice shall be retained pending resolution of the dispute.

5. **Expenses**. Consultant agrees to be responsible for the cost of all expenses incurred in the performance of Consultant's services under the Agreement unless such expenses are authorized in advance by the Company. Expenses authorized in advance will be charged to the Company at cost without mark-up, overhead, or similar charges.

6. **Employment Taxes**. Consultant shall be solely responsible for the preparation and filing of all of Consultant's tax returns and the withholding and payment of all income tax withholding, FICA, FUTA and all other applicable federal, state, or local employment taxes. Consultant agrees to indemnify and hold harmless the Company for any employment, withholding or other tax obligations that the Company may incur with respect to any amounts paid to Consultant under this Agreement.

7. **RESERVED.**

8. **PAYMENT/INVOICING. American Water (Owner) asks that all Contractors / Suppliers / and Vendors promptly invoice Owner through the Taulia Portal until further notice.**

   A. All acceptable invoices shall be due and payable within thirty (30) days net calendar days of receipt by Owner. Owner agrees to make payment to Contractor in lawful money of the United States of America.

   B. Owner has an established method of submitting invoices, E-Invoicing via Owner's Supplier Portal:

      1. The Taulia portal for suppliers to upload invoices can be found at http://supplierinfo.taulia.com/americanwater .

      2. Invoices submitted via the Supplier Portal shall be submitted electronically in the portal using one of the following forms most appropriate for you:

DocuSign Envelope ID: 7078441D-0049-404F-B916-D6C931CBC045

- E-Form - Web-form standard template invoices completed by Contractor.
- E-Flip - A flip of Owner's Order into an Invoice by Contractor.
- E-File - Invoices sent directly from Contractor's billing system or accounting software known as "Integrated eInvoicing." eFile transmission protocols can include AS2, sFTP or FTPs. Taulia's standard eFile formats can include (but are not limited to) EDI 810 ANSI X12, EDIFACT/INVOIC, cXML Invoice, UBL Invoice or CSV invoice file formats.
- E-Send - Submission of metadata PDF (not scanned .tiff PDF) invoices via email and cloud-based data capture with subsequent Contractor verification.

3. Invoices must contain the Purchase Order number and plainly identify the invoice number on the invoice. Only one Purchase Order number may be billed on each invoice. If you need to bill against multiple Order numbers, you MUST issue separate invoices.

4. The Invoice MUST contain Vendor's name and "Remit to" address. Payments shall be remitted to:

   The Brattle Group, Inc.
   1 Beacon Street
   Suite 2600
   Boston, MA 02108

5. Contractor must include the approver's email address on each invoice as follows:

   Pennsylvania American Water
   AP Department 1024
   1 Water Street
   Camden, NJ 08102-1658
   Fname.Lname@amwater.com (Person Authorizing Work)

6. If American Water disputes any invoice or a portion thereof, American Water shall not pay the disputed portion of such invoice until the parties have resolved such dispute in accordance with the dispute resolution process delineated in Section 23 of this Agreement. The undisputed portion of any invoice shall be paid as set forth herein.

7. If any undisputed fees remain unpaid sixty (60) calendar days after American Water's receipt of an invoice, Contractor will notify American Water in writing of the late payments and, in Contractor's discretion, the dispute resolution procedures delineated in Section 23 shall begin to resolve payment of such fees. If such matter remains unresolved following completion of the dispute resolution process delineated in Section 23, then the parties may resolve such dispute through litigation, the losing party bearing all costs of such litigation.

9. Licenses/Permits. Consultant represents and warrants to the Company that during the term of the Agreement Consultant will maintain all necessary licenses and/or permits, if any, to perform Consultant's services.

DocuSign Envelope ID: 7078441D-0049-404F-B916-D6C931CBC045

10. **Confidentiality**. Consultant agrees that any information provided to the Consultant by the Company in connection with the Consultant's performance under this Agreement which concerns financial or other confidential or proprietary matters of the Company or any of its affiliated companies will be treated by the Consultant in full confidence and will not be revealed to any other persons, firms or organizations without the prior written consent of the President of the Company and its legal counsel. Consultant agrees to keep confidential all information discovered in connection with services provided under this Agreement and not to disclose the information to any third party without the prior written consent of the Company. This obligation shall survive the termination of this Agreement. The nondisclosure obligations herein shall not apply to information that: (i) is or becomes publicly known through no fault or breach of this Agreement by the receiving Party; (ii) is independently developed by the receiving Party without using the disclosing Party's Confidential Information; (iii) is rightfully obtained from a third party without restriction on use or disclosure; or (iv) is already in the possession of the receiving Party at the time of the disclosure without the obligation of confidentiality.

    Except as may be required by law or regulatory process, if either Party receives a summons, subpoena, regulatory order, court order or other demand to disclose any information referred to in this Agreement, each Party agrees to first notify the other Party of such demand in writing, and shall provide an opportunity for such other Party to lawfully object and defend any rights it may have to the information. No rights or licenses under patents, trademarks, or copyrights are granted or implied by any disclosure of Confidential Information. Each Party's Confidential Information shall remain the property of that Party and shall be destroyed or returned to that Party following the completion of the Services, unless otherwise agreed to in writing by the Parties.

11. **Work Product**. Upon payment to the Consultant for the same, all work product generated pursuant to this Agreement ("Work Product") shall become the sole and exclusive property of the Company, which may use such work product for any purpose without additional compensation to the Consultant. For the purposes of this Agreement, "Work Product" includes all reports, drawings, plans, specifications, calculations, submittals, and any other documents or records related to the Project and this Agreement. Work Product does not include Consultant's working notes and internal documents. Notwithstanding the foregoing, each Party retains all right, title and interest (including all patents, copyrights, trade secrets, trademarks or other intellectual property rights) in their respective pre-existing materials (and any materials developed by such party) that it provides to the other Party, and this Agreement does not grant any rights or licenses except as expressly set forth herein, and no other right or license is to be implied by or inferred from any provision of this Agreement or by the conduct of the Parties.

12. **Performance Standard**. All work will be performed by appropriately skilled and qualified personnel in a timely, professional, work person-like manner using the degree of care and skill ordinarily exercised by reputable professionals practicing in the same field of service.

13. **Code of Ethics**. Subject to the limitations in this Section, Consultant represents and warrants that it will conform its business dealings with the Company in accordance with the underlying principles of the Company's Code of Ethics, a copy of which is available on the Company website: http://ir.amwater.com/governance-documents. For

DocuSign Envelope ID: 7078441D-0049-404F-B916-D6C931CBC045

the avoidance of doubt, nothing in the Code of Ethics shall preclude Consultant from providing similar services for a broad range of other clients, or from performing services for other clients outside the specific proceeding or matter for which Consultant is engaged by Company. Notwithstanding the foregoing, the Consultant agrees it will not provide any services in the proceeding listed in Exhibit A for any other client whose interests are averse to the Company in the proceeding.

14. **Compliance with Laws**. Consultant shall perform all of the services provided under this Agreement in accordance with federal, state, and local laws, regulations, or ordinances, including but not limited laws, regulations and ordinances related to lobbying. Without limiting the generality of the foregoing, Consultant covenants that Consultant is in full compliance with the immigration laws of the United States relating to Consultant's employees assigned by Consultant to perform services for the Company. Consultant further certifies that all of Consultant's employees are authorized by law to work in the United States, and that Consultant's employees have presented documentation to Consultant that establishes both identity and work authorization in accordance with applicable immigration regulations. Consultant certifies that to the best of its knowledge, information, and belief, after due inquiry, the documentation presented to Consultant is genuine and accurate. Consultant further certifies that Consultant complies with all federal, state, and local labor and employment laws, and wage and hour laws, as these laws may relate to Consultant's employees performing services for the Company. Consultant also agrees to comply with applicable laws concerning Consultant registration, including the timely submission of all necessary Consultant filings required under such laws. Consultant shall inform the Company if Consultant is required to make such Consultant filings. Consultant shall notify the Company if any filing requirements are applicable to the Company itself as a result of Consultant's representation of the Company under this Agreement and shall assist the Company in satisfying such requirements.

15. **Indemnification**. The parties each shall give prompt notice to the other of any claims made against either or both of them arising out of or related to the performance of the terms of this Agreement and shall cooperate fully with each other and with any insurance and/or self-insurance program to the end that all such claims will be properly investigated, defended, and adjusted. Consultant shall protect, defend, pay, indemnify and hold harmless the Company and its directors, officers, employees, agents, and successors from any and all claims, actions, judgments, damages, costs and expenses, including reasonable attorney's fees, of any kind or nature relating to or in connection with (a) any loss of life, bodily or personal injury or property damage to the pro rata extent arising, directly or indirectly out of or relating to any of Consultant's actions, or (b) any claim relating to a failure of Consultant to comply with federal, state, or local laws or regulations. Consultant's duty to indemnify and hold harmless shall not include any claims or liability arising from the established negligence or willful misconduct of Company, its agents, officers, or employees. Company may, at its own election, conduct its defense or participate in the defense of any claim related in any way to this Agreement. Section shall survive the expiration or termination of this Agreement.

16. **Termination**.

A. This Agreement shall terminate at the end of its term or upon completion of the services identified in **Attachment A** or at any time upon thirty (30) days written

DocuSign Envelope ID: 7078441D-0049-404F-B916-D6C931CBC045

notice to the other party, whichever is earlier. The parties may extend the Agreement upon mutual written consent. Consultant shall be entitled to fair and reasonable compensation for services performed by Consultant prior to the effective date of termination.

B. Either party may terminate the Agreement, at any time, upon a material breach of this Agreement by the other party, and upon written notice to the other party.

C. The Company may terminate the Agreement, at any time, for cause. As used herein, "cause" with respect to the Consultant, means that, in the good faith determination of the Company, the Consultant or its employees or its members: (i) has engaged in misconduct which is injurious to the Company including conduct that is injurious or likely to injure the reputation of the Company; or (ii) has been convicted of or pleaded guilty or *nolo contendere* to any felony, or to any misdemeanor relating to the affairs of the Company or impacting Consultant's ability to perform under this Agreement.

17. Waivers. No waiver by either party hereto or any failure by the other party to keep or perform any covenant or condition of this Agreement shall be deemed to be a waiver of any preceding or succeeding breach of the same or other covenant or condition. No failure to enforce any provision hereof shall operate as a waiver thereof or be deemed to be a release of any rights granted hereunder.

18. Conflict of Terms. Except as otherwise provided in this Agreement, if any provision contained in this Agreement conflicts with any provision in Appendix A or Consultant's proposal, this Agreement shall govern and control**.**

19. Severability. If any provision of this Agreement shall be held or made invalid or unenforceable by a court decision, statute, rule or otherwise, the remaining provisions of this Agreement shall not be affected thereby and shall continue in full force and effect.

20. Assignment. The Company specifically contracts for services of the Consultant, and the Consultant may not assign, subcontract, or delegate the performance of the services contemplated by this Agreement without the express written consent of the Company.

21. Governing Law. This Agreement shall be construed, interpreted, and enforced in accordance with, and governed by, the laws of the State of New Jersey without regard to conflicts of law principles.

22. DIVERSITY SUBCONTRACTORS AND SUPPLIERS.
It is the Owner's desire that qualified Diversity Subcontractors be utilized as part of the Contract, where the Diversity Subcontractor meets the form, fit, and function of the Goods and Services, and is commercially competitive. The Owner's goal is that at least 20% of the Contract Price be directed to qualified Diversity.

A. Subcontractors (the "Diversity Spend"), including 10% of the Contract Price be directed to qualified Minority Business Enterprise (MBE) Subcontractors:
   - African American
   - Asian Pacific
   - Hispanic
   - Native American

DocuSign Envelope ID: 7078441D-0049-404F-B916-D6C931CBC045

B. Contractor agrees to use best efforts to award subcontracts to qualified Diversity Subcontractors, and in connection therewith Contractor shall complete and submit the "Supplier Diversity Questionnaire", Attachment C.

C. If Contractor utilizes Diversity Subcontractors to fulfill any portion of this Contract, including freight, Contractor shall report the following to Owner's representative:
   - Contractor's name
   - Contact person, including email and phone number.
   - Contractor's Diversity classification and copy of certificate.
   - Value of subcontract provided to Diversity Subcontractor.

D. Contractor shall provide such report (Attachment C) on January 15, April 15, July 15, and October 15 for the previous quarter during the contract period and/or not later 30 days prior to Contractor's application for final payment. Contractor shall also report if no Diversity Subcontractors are used in fulfillment of the Contractor's obligations under the Contract.

E. Definition of a Diversity Subcontractor: A business that provides services or materials to Contractor in fulfillment of this Contract which is at least 51% owned, operated and controlled on a daily basis by a person of one or more of the following characteristics: American citizens of ethnic minority classifications, women, veteran, disabled veteran owned businesses, and disabled owned businesses.

F. Report to be provided to:
   American Water Service Company
   Attn: Diversity Reporting
   Online: https://amwater.diversitycompliance.com/

23. DISPUTE RESOLUTION.

A. The intent of the parties is to identify and resolve disputes promptly after any dispute arises. Before attempting to exercise any legal or equitable remedy, each party agrees to follow the dispute resolution procedure described below. Except as provided otherwise elsewhere in this Agreement, in the event that either party determines that following the procedure described below in this section could potentially be harmful or damaging to their respective businesses or third-party suppliers, that party may elect to forego the dispute resolution process and pursue injunctive relief.

B. Escalation of Dispute. If there is a dispute between the parties arising out of this Agreement, each party agrees to engage in good faith negotiations between progressively more senior representatives of each party, as follows:

DocuSign Envelope ID: 7078441D-0049-404F-B916-D6C931CBC045

Level	Representatives of the Parties	Maximum Duration of Negotiations Prior to Escalation to Next Level
One	PAWC: Mary Ann Royer, Procurement Specialist, 717-550-1541 Mary.royer@amwater.com Supplier: Ann Bulkley, Principal 508-981-0866, Ann.bulkley@brattle.com	5 business days
Two	PAWC: Stacey Gress, Director Rates, 856-955-4479 Stacey.Gress@amwater.com Supplier: Ann Bulkley, Principal 508-981-0866, Ann.bulkley@brattle.com	5 business days
Three	PAWC: Ashley Everette, Director Rates, 717-550-1536 Ashley.everette@amwater.com Supplier: Barbara Levine, General Counsel, 617-234-5712 generalcounsel@brattle.com	5 business days

C. Either party may at any time change its representative party designated above by providing written notice to the other party.

D. If such matter remains unresolved following the negotiations and the expiration of the periods specified above in this section each party may immediately exercise or pursue any other rights or remedies available hereunder or at law or in equity, and it is acknowledged by the parties that nothing herein shall preclude, limit, or otherwise restrict any legal or equitable remedies available to either party for failure of the other party to perform its obligations under this Agreement.

DocuSign Envelope ID: 7078441D-0049-404F-B916-D6C931CBC045

IN WITNESS WHEREOF, the parties have caused this Agreement to be executed by their respective duly authorized representatives as of the day and year last set forth below.

AMERICAN WATER

NATIONAL SUPPLIER DIVERSITY

OUR PRIME SUPPLIER DIVERSITY PROGRAM

Firms interested in doing business with American Water should register on the https://supplierone.co/ to use the database to search for diverse suppliers and to report diverse spend quarterly once a project is awarded.

OVERVIEW OF HOW IT WORKS

American Water is focused on opportunities for minority suppliers who provide a wide array of utility products and services In our efforts to ensure we are consistent in what we define as diverse businesses enterprises, the determination is that small business is not defined as a diverse business category. American Water continues to support and engage small business in all that we do in addition to creating opportunity for both social and economically disadvantaged business (Diverse). The business units within American Water are aware of the importance of supplier diversity when making their decisions.

BID/AWARD PROCESS

Qualified firms invited to bid on specific contracts are sent a Request for Proposal (RFP). Some RFPs require the bidder to attend pre-bid meetings to review procedures and specifications. Bidders are strongly encouraged, and sometimes required, to attend these meetings and submit proposals by the due date to be considered for a contract. On occasion, purchase orders are used to test and evaluate the product and services of new and promising firms and can often lead to larger bidding opportunities. Bids and proposals that meet specified requirements are thoroughly evaluated, and awards are made to the firms offering the best value to American Water.

2ND TIER PROGRAM

American Water's 2nd Tier Spend Program increases the opportunities available to diverse certified suppliers in our business and ensures a diverse certified supplier pool across the supply chain. We believe these efforts will stimulate the local economy by creating jobs. 2nd Tier spend consists of payments made from a prime supplier to a diverse certified supplier for the purchase of products or services used directly in support of a contract with American Water. Direct and Indirect expenditures with Minority Business Enterprise (MBE), Women Business Enterprise (WBE), Veteran Business Enterprise (VBE), Service-Disabled Veteran Business Enterprise (SDVBE), Disabled Veteran Business Enterprise (DVBE), Lesbian, Gay, Bisexual, Transgender Business Enterprise (LGBTBE), Disability Owned Business Enterprise (DOBE), Disadvantaged Business Enterprise (DBE) or Historically Underutilized Business (HUB) as subcontractors, distributors, value added resellers are counted towards the contractual supplier diversity goal.

NATIONAL SUPPLIER DIVERSITY

For more information on our program, visit https://www.amwater.com/corp/About-Us/Supplier-Diversity/supplier-diversity-strategy

Contact Us: For more information about American Water's National Supplier Diversity Strategy, please contact our team through email at supplierdiversity@amwater.com or work with your state procurement buyer or national category lead.

DISCLAIMER AND SIGNATURE

Prime Supplier agrees that it will maintain all necessary documents and records to support its efforts to achieve its MBE/WBE/VBE/DBE participation goal(s). Prime Supplier also acknowledges the fact that it is responsible for identifying, soliciting, and qualifying MBE/WBE/VBE/DBE subcontractors, distributors and value-added resellers.

The following individual, acting in the capacity of MBE/WBE/VBE/DBE coordinator for Prime Supplier will administer the MBE/WBE/VBE/DBE participation plan, submit summary reports quarterly through the Supplier Portal found at https://www.unifiedtier2.com/amwater.html and cooperate in any studies or surveys as may be required to determine the extent of compliance by the Prime Supplier with the participation plan.

AMENDMENT No. 1
TO
Agreement for Depreciation and Cost of Service Allocation Studies between **Pennsylvania American Water Company** AND **Gannett Fleming Valuation and Rate Consultants LLC** DATED **January 20, 2022.**

This **Amendment No. 1** (Amendment) to the Agreement is entered into this date 6/27/2023 (Effective Date) by and between **Gannett Fleming Valuation and Rate Consultants LLC** (Contractor) and **Pennsylvania American Water Company** (Owner).

RECITALS

A. Contractor and Owner entered into an Agreement dated as of **January 20, 2022** (the Original Agreement);

B. Contractor and Owner desire to set forth in this **Amendment No. 1** certain modifications to the Original Agreement; and,

C. In all other respects, the Original Agreement shall control the relationship between the parties and all references to the Agreement in the Original Agreement and this Amendment shall mean the Original Agreement as amended hereby.

NOW, THEREFORE, in consideration of the Recitals and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the parties agree as follows:

1. **Term.** The parties agree that the date **January 31, 2024,** listed in Original Agreement will be deleted and replaced with **January 31, 2026.**

2. **Price/Scope.** The scope of services performed or furnished by Consultant under the terms of this Agreement is defined in **Attachment A-1** which will authorize Consultant to perform specific services. Unless modified in writing by both parties, duties of Consultant shall not be construed to exceed those services specifically established in **Attachment A-1**. **Any additional fees associated with services not included in Attachment A-1 must be defined and agreed to by Owner in writing prior to initiation of those services.**

3. **Diversity Reporting.** Contractor commits to actively seek and contract with diverse suppliers. The Contractor agrees to provide opportunities for suppliers identified and Certified in accordance, at a minimum, with the terms and conditions of **Attachment E-1**

DocuSign Envelope ID: ABFACEB5-E427-4DF6-BFE6-AEAF66296A75

4. **Other Provisions.** All terms and conditions of the Agreement as previously amended shall remain unchanged and in full force and effect to the extent not modified by this Amendment.

This Amendment may be executed in any number of original counterparts. All such counterparts shall constitute one and the same Amendment.

DocuSign Envelope ID: ABFACEB5-E427-4DF6-BFE6-AEAF66296A75

IN WITNESS WHEREOF, Contractor and Owner have signed this Amendment in duplicate. One counterpart each has been delivered to both Contractor and Owner.

Via email to Stacey.Gress@amwater.com

Stacey Gress
Director, Rates and Regulation
Pennsylvania American Water Company
1 Water Street
Camden, NJ 08102

Dear Stacey:

Proposal for Depreciation and
Cost of Service Allocation Studies – Water and Wastewater

In response to your request, Gannett Fleming Valuation and Rate Consultants, LLC (Gannett Fleming) is pleased to submit this proposal to conduct depreciation and cost of service allocation studies for Pennsylvania American's 2023 water and wastewater rate filing. We understand that the filing is projected to be based on the combined revenue requirements for the twelve months ended June 30, 2023, a future test year ending June 30, 2024, and a fully projected future test year ending June 30, 2025. The filing date is planned for October 2023.

The depreciation studies will be conducted under the direction of John J. Spanos. Mr. Spanos will provide a separate depreciation study for each test year for water assets. The wastewater depreciation studies will have separate rates determined for each test year, as well as results for each of the areas for which separate depreciation rates are required.

The cost of service allocation studies will be conducted under the direction of Constance E. Heppenstall. Gannett Fleming will provide a total of six (6) separate water and wastewater cost of service studies.

The studies and direct testimony will be prepared in a manner similar to the prior rate case and will be suitable for filing with the Pennsylvania Public Utility Commission (Pa PUC). Responses to filing requirements and standard data requests that are not included in the studies also will be prepared. We understand that we will be provided covers for the copies of our reports by the Company, and Gannett Fleming will make sufficient copies (approximately 25) for the filing with the Pa PUC, if needed.

DocuSign Envelope ID: ABFACEB5-E427-4DF6-BFE6-AEAF66296A75

GANNETT FLEMING

Gannett Fleming will perform these services based on hourly billing rates for our personnel in effect when the work is performed. A copy of our billing rates is attached. Invoices will be rendered monthly for services performed during the previous month including reimbursement of direct expenses. Inasmuch as we have little control over the amount of time required to respond to interrogatories and prepare for formal litigation, the following estimates of costs include only those services required to the date of filing. Estimated additional, post-filing services, are listed below for budgeting purposes and will be provided on an hourly basis. Based on our experience in conducting similar assignments, we estimate that the cost of the studies will be as follows:

	Water and Wastewater Rate Filing	
Description	Up to Filing Date	Estimated Post-Filing
Depreciation Studies	$90,000	$20,000
Cost of Service Allocation Studies	$50,000	$35,000
Combined Sewer Systems COS Study	$35,000	$20,000
Total	$175,000	$75,000

Thank you for the opportunity to submit this proposal. If you have any questions, please don't hesitate to contact John Spanos at either 717-886-5721 or jspanos@gfnet.com, or Connie Heppenstall at 610-783-3675 or cheppenstall@gfnet.com.

AMERICAN WATER

NATIONAL SUPPLIER DIVERSITY

OUR PRIME SUPPLIER DIVERSITY PROGRAM

Firms interested in doing business with American Water should register on the https://supplierone.co/ to use the database to search for diverse suppliers and to report diverse spend quarterly once a project is awarded.

OVERVIEW OF HOW IT WORKS

American Water is focused on opportunities for minority suppliers who provide a wide array of utility products and services In our efforts to ensure we are consistent in what we define as diverse businesses enterprises, the determination is that small business is not defined as a diverse business category. American Water continues to support and engage small business in all that we do in addition to creating opportunity for both social and economically disadvantaged business (Diverse). The business units within American Water are aware of the importance of supplier diversity when making their decisions.

BID/AWARD PROCESS

Qualified firms invited to bid on specific contracts are sent a Request for Proposal (RFP). Some RFPs require the bidder to attend pre-bid meetings to review procedures and specifications. Bidders are strongly encouraged, and sometimes required, to attend these meetings and submit proposals by the due date to be considered for a contract. On occasion, purchase orders are used to test and evaluate the product and services of new and promising firms and can often lead to larger bidding opportunities. Bids and proposals that meet specified requirements are thoroughly evaluated, and awards are made to the firms offering the best value to American Water.

2ND TIER PROGRAM

American Water's 2nd Tier Spend Program increases the opportunities available to diverse certified suppliers in our business and ensures a diverse certified supplier pool across the supply chain. We believe these efforts will stimulate the local economy by creating jobs. 2nd Tier spend consists of payments made from a prime supplier to a diverse certified supplier for the purchase of products or services used directly in support of a contract with American Water. Direct and Indirect expenditures with Minority Business Enterprise (MBE), Women Business Enterprise (WBE), Veteran Business Enterprise (VBE), Service-Disabled Veteran Business Enterprise (SDVBE), Disabled Veteran Business Enterprise (DVBE), Lesbian, Gay, Bisexual, Transgender Business Enterprise (LGBTBE), Disability Owned Business Enterprise (DOBE), Disadvantaged Business Enterprise (DBE) or Historically Underutilized Business (HUB) as subcontractors, distributors, value added resellers are counted towards the contractual supplier diversity goal.

NATIONAL SUPPLIER DIVERSITY

For more information on our program, visit https://www.amwater.com/corp/About-Us/Supplier-Diversity/supplier-diversity-strategy

Contact Us: For more information about American Water's National Supplier Diversity Strategy, please contact our team through email at supplierdiversity@amwater.com or work with your state procurement buyer or national category lead.

DISCLAIMER AND SIGNATURE

Prime Supplier agrees that it will maintain all necessary documents and records to support its efforts to achieve its MBE/WBE/VBE/DBE participation goal(s). Prime Supplier also acknowledges the fact that it is responsible for identifying, soliciting, and qualifying MBE/WBE/VBE/DBE subcontractors, distributors and value-added resellers.

The following individual, acting in the capacity of MBE/WBE/VBE/DBE coordinator for Prime Supplier will administer the MBE/WBE/VBE/DBE participation plan, submit summary reports quarterly through the Supplier Portal found at https://www.unifiedtier2.com/amwater.html and cooperate in any studies or surveys as may be required to determine the extent of compliance by the Prime Supplier with the participation plan.
