Pennsylvania-American Water Company
Docket Nos. R-2023-3043189 (Water)
R-2023-3043190 (Wastewater)
Office of Consumer Advocate Set 4

OCA 04-012

Responsible Witness: Connie Heppenstall, Senior Project Manager, Gannett Fleming

Question:

Reference PAWC Statement No. 12 (Heppenstall).

a. Page 13, lines 11-23, Page 14, lines 1-8, first adjustment. Please identify the specific adjustment made to each allocation factor and revenues for this adjustment;
b. Page 14, lines 9-20, second adjustment. Please identify what the extra-capacity factors of interruptible customers would have been if not excluded based on actual/estimated maximum day and maximum hour demands. Also provide a three history of the daily volumes actually curtailed.

Response:

a. The specific adjustments made to allocation Factor 1 and factors that are dependent on Factor 1. The annual consumption of the DIS customers, equaling 8,318,938 100-gallon units, was excluded from the industrial class, and the annual consumption for DRS customers, equaling 9,122,335 100-gallon units, was excluded from the sales for resale class. These volumes were excluded from the cost allocation study as these customers have contract rates, and as such, their usage should not factor into the development of the base tariff rates. Revenues were included in the cost of service study and were not adjusted. The revenues from the DIS and DRS customers are shown in other water revenues as revenues from Contract Sales.

b. Exhibit 12-A, erroneously, did not include the adjustment for interruptible customer usage. Please see OCA 04-012_Attachment1 for the revised cost of service study under proposed rates and OCA 04-012_Attachment2 for the revised cost of service study under present rates. These studies show the extra-capacity factor allocations if the usage of the curtailment industrial customer was excluded in maximum day and maximum hour demands for Factors 2, 3 and 4 in Exhibit 12-A. Exhibit 12-A in the filing shows the extra-capacity functions if the usage was not excluded. The revised cost of service study under proposed rates lowers the cost of service for the Industrial class from $45,115,631 to $44,092,705 or a difference of $1,022,926.

The Company maintains that the usage of the curtailment industrial customer should be excluded from the extra-capacity factors as the customer can be interrupted during peak demands.
The Company has not requested its curtailment customer to curtail its usage during the past three years.

Finally, both adjustments described above are consistent with adjustments made in the Company's cost of service studies in previous rate cases filed with the Commission.

Pennsylvania-American Water Company
Docket Nos. R-2023-3043189 (Water)
R-2023-3043190 (Wastewater)
Office of Small Business Advocate Set 1

OSBA 01-018

Responsible Witness: Charles Rea, Senior Director of Rates and Regulatory

Question:

Reference Table 4, shown on page 47 of PAWC Statement No. 10. Please explain in detail how the Company arrived at its proposed reallocation of wastewater revenue requirements to water customers, by customer class, shown in the referenced table. Include an electronic copy of all associated workpapers.

Response:

Please see OSBA 01-018_Attachment. Where possible, Act 11 reallocations are directly assigned to water customer classes based on wastewater class contributions to Act 11. Where wastewater contributions are not class specific, those amounts are allocated to water customers based on relative levels of water cost of service. Act 11 revenues are calculated in Exhibits 10-B through 10-E.

Pennsylvania-American Water Company
Docket Nos. R-2023-3043189 (Water)
R-2023-3043190 (Wastewater)
Office of Small Business Advocate Set 3

OSBA 03-001

Responsible Witness: Charles Rea, Senior Director of Rates and Regulatory

Question:

Reference the Attachment provided in the Company's response to OSBA-I-018.

a. Please reconcile the totals shown in the Act 11 column of the referenced attachment with the Act 11 subsidies shown in Exhibit 3-A, page A, by wastewater operating division.
b. Please provide a detailed derivation of all figures shown in lines 9-12 of the referenced attachment. Include an electronic copy of all workpapers.

Response:

a-b. Please see OSBA 03-001_Attachment for a corrected calculation of Act 11 revenues shown in Exhibit 3-A, page A, by wastewater operating division and customer class, including the derivation of all figures sourced to the applicable revenue and cost of service exhibits for each operating division. The data originally provided in OSBA-01-018 was not correct and did not tie to Exhibit 3-A, Page A.

PENNSYLVANIA-AMERICAN WATER COMPANY - WATER OPERATIONS

FACTORS FOR ALLOCATING COST OF SERVICE TO CUSTOMER CLASSIFICATIONS, cont.

FACTOR 9. ALLOCATION OF COSTS ASSOCIATED WITH FIRE HYDRANTS.

These costs are assigned directly to Public Fire Protection.

Customer Classification	Allocation Factor
(1)	(2)
Public Fire Protection	1.0000

FACTOR 10. ALLOCATION OF COSTS ASSOCIATED WITH METERS.

Factors are based on the relative cost of meters by size and customer classification, as developed on the following page and summarized below.

Customer Classification	5/8" Dollar Equivalents	Allocation Factor
(1)	(2)	(3)
Residential	648,508	0.77691
Commercial	158,500	0.18989
Industrial	6,532	0.00783
Public	15,322	0.01836
Other Water Utilities A	140	0.00017
Other Water Utilities B	105	0.00013
Private Fire Protection	5,597	0.00671
Total	834,704	1.00000

FACTOR 11. ALLOCATION OF COSTS ASSOCIATED WITH SERVICES.

Factors are based on the relative cost of services by size and customer classification, as developed on the second of the following pages, and summarized below.

Customer Classification	3/4" Dollar Equivalents	Allocation Factor
(1)	(2)	(3)
Residential	614,030	0.88781
Commercial	60,206	0.08705
Industrial	1,478	0.00214
Public	4,232	0.00612

REBUTTAL TESTIMONY OF RICHARD A. BAUDINO

Q. Please state your name and business address.

A. My name is Richard A. Baudino. My business address is J. Kennedy and Associates, Inc. ("Kennedy and Associates"), 570 Colonial Park Drive, Suite 305, Roswell, Georgia 30075.

Q. What is your occupation and by whom are you employed?

A. I am a consultant to Kennedy and Associates.

Q. Did you submit Direct Testimony in this case?

A. Yes. I submitted Direct Testimony on behalf of Cleveland-Cliffs Steel.

Q. What is the purpose of your Rebuttal Testimony?

A. The purpose of my Rebuttal Testimony is to respond to certain issues that were raised in the Direct Testimonies of the following witnesses:

- Ms. Billie LaConte, witness for the Pennsylvania American Water Large Users Group ("PAWLUG")
- Mr. Jerome Mierzwa, witness for the Office of Consumer Advocate ("OCA"); and,
- Mr. Kevin Higgins, witness for the Office of Small Business Advocate ("OSBA").

Response to the Allocation of Wastewater Subsidy

Q. Please briefly describe how witnesses LaConte, Mierzwa, and Higgins approached the proposed allocation of the subsidy from Pennsylvania American Water Company's ("PAWC" or "Company") wastewater operations.

A. These three witnesses proposed versions of allocating PAWC's proposed subsidy from its wastewater operations that are based in part on a direct allocation from wastewater rate classes to the corresponding water service classes.

Mr. Mierzwa simply accepted PAWC's approach to allocating the wastewater subsidy, although he incorrectly described the Company's approach as being "based on the water cost of service".[1] I described PAWC's approach in my Direct Testimony, which is partly based on direct assignment to water service classes and partly based on allocated water cost of service. Mr. Higgins adopted an approach that was similar to the Company's, in which he allocated the wastewater subsidy to water service classes in a manner that corresponds to the wastewater classes that created the revenue shortfall.[2]

Ms. LaConte also assigned the wastewater subsidy to water service classes based on the corresponding wastewater service classes that created the subsidy.[3] Regarding Ms. LaConte's subsidy calculation, I note that her subsidy numbers were taken from PAWC's response to OSBA 01-18, which were incorrect. The Company corrected those numbers in its response to OSBA 03-001 and I provided those corrected numbers in my Exhibit ___(RAB-5). These numbers show a higher

[1] Mierzwa Direct Testimony, page 28, lines 20 through 23.
[2] Higgins Direct Testimony, page 33, line 18 through page 34, line 4.
[3] LaConte Direct Testimony, page 26, lines 7 through 12.

assignment of the wastewater subsidy to the Industrial water service class largely due to the direct assignment of $2,557,322 from the CSS wastewater system. I also mentioned this direct assignment in my Direct Testimony.

Q. Please address the proposed assignment of the wastewater subsidy to water service customers by these three witnesses.

A. Consistent with my position in my Direct Testimony, the direct assignment of wastewater subsidies from wastewater service classes to the corresponding water service classes should be rejected by the Commission. Instead, it is appropriate to allocate any subsidy approved by the Commission based on the underlying water cost of service percentages from PAWC's class cost of services study ("CCOSS").

It is critically important to distinguish the fact that water service customers are in no way responsible for PAWC's costs to serve its wastewater customers. These are two separate and distinct services provided by the Company. As a result, water service customers are not directly responsible for any subsidy that the Company seeks to collect from them. PAWC is requesting the collection of $71.1 million of wastewater subsidies pursuant to Act 11 as it has done in past cases before the Commission. This subsidy is not a cost that can be directly assigned or even allocated using water cost of service principles. In other words, the wastewater subsidy cannot be allocated based on the usual base/extra capacity allocations that one would use to allocate PAWC's water cost of service because there is no cost causation principle that can be applied to that subsidy.

Therefore, the wastewater subsidy should be allocated based on each water service class's percentage of total cost of service as I have done in my Direct

Testimony. A direct assignment approach could skew the final revenue allocation for water service customers. For example, assume that the Residential class's underlying water service cost responsibility is 65%. Further assume that a direct assignment of the wastewater subsidy based on residential wastewater customers would give the Residential water service class a 70% share of that subsidy. This would result in a higher revenue allocation to the Residential class due solely to the direct assignment of the wastewater subsidy. Clearly, this would be unfair to Residential water service customers who had nothing to do with generating the residential wastewater subsidy. This would also be the case of other water service classes.

Q. Mr. Baudino, does Cleveland-Cliffs take a position on whether the Commission should assign any wastewater subsidy to its water service customers?

A. No. Cleveland-Cliffs does not take a position regarding the reasonableness of assigning a subsidy of wastewater service customers to water service customers. However, if the Commission decides to assign such a subsidy, then it should be assigned to water service customers in the manner I have recommended.

Response to Mr. Mierzwa

Q. On page 14 of his Direct Testimony, Mr. Mierzwa recommended that interruptible Industrial customers be included in the extra capacity factor allocations in PAWC's class cost of service study ("CCOSS"). Is this recommendation appropriate?

A. No, it is not appropriate and is inconsistent with PAWC's past practice. Mr. Mierzwa based his recommendation on the grounds that interruptible customers have not been

interrupted in at least three years. However, it is irrelevant whether or not interruptible customers have been interrupted over the last three years. What is relevant is that PAWC may interrupt these customers if system constraints justify a curtailment of service. This is a benefit to all of PAWC's customers, enabling the Company to avoid or postpone the costs of additional capacity investments to serve the system peak or during other events that could constrain the system's capacity to serve customers.

PAWC's Terms and Conditions for the Industrial Curtailment Rate specifies the following with respect to curtailment:

> **Curtailment**. The Company may request the customer to curtail its water usage to assist the Company in addressing a system emergency, including insufficiency, for any reason, of the Company's source of supply, treatment/purification, pumping, transmission, storage or distribution capacity to serve customers' demands. However, the maximum continuous period of each requested curtailment may not exceed six (6) hours and the number of curtailments requested may not exceed three (3) in any one calendar month nor exceed a total of six (6) curtailments in any year, measured in twelve-month intervals commencing on the effective date of the Service Agreement. The customer will be provided not less than one hour's notice before a requested curtailment is expected to begin. Notice may be by telephone to the customer contact identified in the Service Agreement.
>
> **Amount of Curtailment**. When a curtailment is requested, the customer shall curtail all usage of Company-supplied water for industrial purposes. Company-supplied water may continue to be used for sanitary purposes, fire suppression and boiler feed-water make-up, provided, however, that such permitted usage shall not exceed, in aggregate, 15% of the customer's average daily usage during the preceding month, prorated for the period of the requested curtailment.

PAWC obviously saw the value to its system of being able to curtail large Industrial customers when it deems it necessary. Otherwise it would not have agreed to the Interruptible tariff in the first place.

Regarding availability of the Industrial Curtailment Rate, the customer must have "fully operational non-fire protection water storage capability, available for use

during periods of curtailment, equal to ten (10) times the customer's average hourly usage." Unlike customers that take service under the standard service schedules, an interruptible industrial customer must invest in water storage capability in the event of an interruption. This is an additional cost directly borne by the interruptible customer in addition to reduced reliability of service compared to standard tariff customers. The exclusion of Interruptible usage from the extra capacity allocators fairly recognizes the reduced reliability and extra storage costs that interruptible Industrial customers must take on in order to qualify for the Interruptible Industrial Rate.

In conclusion, Mr. Mierzwa's proposal to include the usage of interruptible Industrial customers in extra capacity factor allocations is inappropriate, inconsistent with past practice, and should be rejected by the Commission.

Q. On page 16, line 16 through page 17, line 4 Mr. Mierzwa took issue with the maximum day and maximum hour extra capacity factors used in the Company's CCOSS as filed by Ms. Heppenstall. Please summarize Mr. Mierzwa's recommended extra capacity factors.

A. Mr. Mierzwa disagreed with the maximum day extra capacity factor of 1.4 and the maximum hour extra capacity factor of 2.1 used by Ms. Heppenstall in the Company's CCOSS. His concern with the Company's extra capacity factors is that, in his opinion, they are outdated. Mr. Mierzwa recommended lower maximum day factors based on maximum day and maximum hour demands from York Water Company.

Q. Should the Commission use Mr. Mierzwa's lower recommended extra capacity factors based on data from York Water Company?

A. No, the Commission should not use data from York Water Company as proxies for PAWC's maximum day and maximum hour estimates. Mr. Mierzwa provided no evidence that his lower recommended numbers are correct or otherwise reflective of PAWC's maximum day and maximum hour system demands. One should not assume that the demand data from York Water Company is reflective of PAWC's system and Mr. Mierzwa presented no evidence to support such an assumption. The maximum day and maximum hour numbers used by Ms. Heppenstall are based on PAWC's historical experience and have been consistently used by the Company in past rate cases. I recommend that the Commission reject Mr. Mierzwa's unsupported maximum day and maximum hour demand factors. Such factors merely shifted cost responsibility away from the Residential class to other rate classes.

Q. Should the Commission reject Mr. Mierzwa's proposed class revenue allocation?

A. Yes. Mr. Mierzwa's proposed revenue allocation is based on a deeply flawed CCOSS that improperly allocates costs to customer classes. I recommend that the Commission reject his revenue allocation proposal.

<u>Response to Mr. Higgins</u>

Q. Mr. Higgins presented his recommended revenue allocation for water service customers in Schedule KCH-8, page 1. Please respond to Mr. Higgins' revenue allocation proposal.

A. First, Mr. Higgins used the incorrect CCOSS filed by Ms. Heppenstall in her Direct Testimony. I pointed out that this CCOSS failed to exclude interruptible usage from the extra capacity factors, which had the effect of allocating too much cost

responsibility to the Industrial class. Both the Company and I support the CCOSS that the Company provided in response to OCA 04-012, the results of which are shown in my Exhibit ___(RAB-3).

Second, as I described earlier in my Rebuttal Testimony, Mr. Higgins relied on the Company's assignment of the wastewater subsidy to water service classes. Due to the direct assignment of costs to classes, the Industrial class's portion of the subsidy is $4.256 million in Mr. Higgins' KCH-8, page 1. An allocation of the subsidy based on class water service costs would be $3.4 million as I showed in Table 2 of my Direct Testimony.

Mr. Higgins' proposed revenue allocation should be rejected. His CCOSS failed to exclude interruptible Industrial usage from the extra capacity factors and overstated the wastewater service subsidy that is properly allocable to the Industrial water service class.

Q. Do you agree with Mr. Higgins' proposal to directly assign costs associated with the Company's Arrearage Management Plan ("AMP") and residential low-income programs to the Residential class?

A. Yes. I agree with Mr. Higgins that since these programs benefit residential customers, their costs should be assigned to the Residential class.

<u>Response to Ms. LaConte</u>

Q. Ms. LaConte presented her recommended approach to rate design for the Industrial class beginning on page 28 of her Direct Testimony. Do you agree with Ms. LaConte's recommended approach?

A. Yes. Mr. LaConte's recommended rate design would approximately double the Industrial customer charges and provide for smaller percentage increases to the volumetric charges. I agree with the recommended approach to increasing customer charges, as more of the Company's fixed costs would be collected in a fixed charge. I also recommend as I did in my Direct Testimony that the Industrial volumetric charges be increased at the same percentage rates.

Corrected PAWC Class Cost of Service Study

Q. Did PAWC submit a corrected CCOSS in response to discovery after Direct Testimony was filed on February 1, 2024?

A. Yes. PAWC provided a further corrected CCOSS in response to PAWLUG 05-001. Please refer to Exhibit ___(RAB-R1), which contains the Company's response. In addition to the corrections included in OSBA 03-001 and OCA 04-012, the Company also included a correction to the Public class meter counts and the direct assignment of Arrearage Management Plant costs to the Residential class. I highlighted the change in meter cost responsibility for the Public class in my Direct Testimony. As it turns out, that change was in error and the Company presented corrected allocations in its response to PAWLUG 05-001.

Q. What are the CCOSS results for the water service classes at present rates?

A. Exhibit ___(RAB-R2) presents the water service class rates of return on rate base and relative rates of return ("RROR") at present rates. This presentation came from the CCOSS attachment included in response to PAWLUG 05-001. I chose the option of

showing class CCOSS results at present rates in order to generate Exhibit ___(RAB-R2).

In my Direct Testimony, Exhibit ___(RAB-3), page 1 presented class rates of return and RRORs from the corrected CCOSS included in the Company's response to OCA 04-012. The major changes in RRORs from that CCOSS to the one included in Exhibit ___(RAB-R2) are the results for the Residential and Public classes. The Residential RROR declined from 1.03 to 0.99. This means that the Residential class is near the system average rate of return in the newly corrected CCOSS. The Public class RROR increased from 0.33 to 1.16. This means that the Public class is now above the system average rate of return.

Q. Does this change affect your recommended revenue allocation in this case?

A. Yes. I no longer recommend that the Public class receive a larger than system average increase. Given the large change from the Company's filed case at this stage of the proceeding, I continue to recommend a conservative approach to revenue allocation and would now recommend an equal percentage increase for the Residential, Commercial, Industrial, and Public classes. The Residential, Commercial, and Industrial classes are all within a reasonable range of the system average increase based on the most recently corrected CCOSS. Although the Public class is above the system average rate of return (RROR of 1.16), the very large swing in its CCOSS results warrants some caution in terms of its revenue increase percentage and I believe that a percentage increase equal to the other major rate classes is reasonable for this case.

Q. Does this conclude your Rebuttal Testimony?

A. Yes.

J. KENNEDY AND ASSOCIATES, INC.

FEBRUARY 21, 2024

Pennsylvania-American Water Company
Docket Nos. R-2023-3043189 (Water)
R-2023-3043190 (Wastewater)
Pennsylvania-American Water Large Users Group Set 5

PAWLUG 05-001

Responsible Witness: Connie Heppenstall, Senior Project Manager, Gannett Fleming

Question:

Referring to PAWC's Response to OSBA 3-1 and OCA 4-12, provide a revised Schedule 12-A showing the proposed rate increase for each customer class.

Response:

Please see PAWLUG 05-001_Attachment for the revised Exhibit 12-A which incorporates the changes from OSBA 3-1 and OCA 4-12 as well as other changes that were identified during discovery and in reviewing non-Company direct testimony. These include the following:

1. Correction to the Public Authority meter count due to a linking error.
2. Arrearage Management Plant ("AMP") costs being directly allocated to the Residential class.

	:	**C-2023-3044375**
PENNSYLVANIA-AMERICAN WATER COMPANY	**:**	

SURREBUTTAL TESTIMONY OF RICHARD A. BAUDINO

Q. Please state your name and business address.

A. My name is Richard A. Baudino. My business address is J. Kennedy and Associates, Inc. ("Kennedy and Associates"), 570 Colonial Park Drive, Suite 305, Roswell, Georgia 30075.

Q. What is your occupation and by whom are you employed?

A. I am a consultant to Kennedy and Associates.

Q. Did you submit Direct and Rebuttal Testimony in this case?

A. Yes. I submitted Direct and Rebuttal Testimony on behalf of Cleveland-Cliffs Steel.

Q. What is the purpose of your Surrebuttal Testimony?

A. The purpose of my Rebuttal Testimony is to respond to certain issues that were raised in the Rebuttal Testimonies of the following witnesses:

- Ms. Constance Heppenstall, witness for Pennsylvania American Water Company ("PAWC" or "Company").
- Mr. Jerome Mierzwa, witness for the Office of Consumer Advocate ("OCA"); and,
- Mr. Kevin Higgins, witness for the Office of Small Business Advocate ("OSBA").

Response to Ms. Heppenstall

Q. Did Ms. Heppenstall submit a revised class cost of service study ("CCOSS") with her Rebuttal Testimony?

A. Yes. Ms. Heppenstall filed a revised Exhibit 12-A as part of her Rebuttal Testimony. This CCOSS included the following corrections:

- Adjustment to extra capacity factors to properly exclude interruptible customer usage.
- Correction to Public class meters and services allocations, a concern I noted in my Direct Testimony.
- Reallocation of wastewater revenue requirements.

A summary of CCOSS results at present rates is included in my Exhibit ___(RAB-S1). These results are very close to the CCOSS results I presented in my Rebuttal Testimony. Relative rates of return ("RROR") for the Residential, Commercial, and Industrial classes range from 0.98 to 1.03. The Public class RROR is now at 1.17. Note that these RRORs are before the Company's assignment of the Act 11 wastewater revenue requirement to rate classes.

Based on this revised CCOSS, I continue to recommend the water service class revenue allocation contained in my Rebuttal Testimony.

Q. Did you update your recommended wastewater CCOSS allocations to water service classes based on the revised CCOSS presented in Exhibit 12-A?

A. Yes. Please refer to Table S1 for the revised wastewater CCOSS allocations based on the water CCOSS share for the Residential, Commercial, Industrial, Public, and

Private Fire classes. Table S1 compares my recommendation to the Company's revised wastewater allocations in Exhibit 12-A.

TABLE S1

Revised PAWC Wastewater Allocations to Water Service Classes

	Revised CCOSS Percentages	Cleveland Cliffs Allocation	PAWC Allocation
Residential	66.8%	$ 47,500,965	$ 45,864,399
Commercial	25.2%	$ 17,889,912	$ 17,571,738
Industrial	4.8%	$ 3,391,448	$ 4,547,070
Public (Municipal)	2.6%	$ 1,869,402	$ 2,664,710
Private Fire Protection	0.6%	$ 435,657	$ 439,468
Total	100.0%	$ 71,087,384	$ 71,087,384

PAWC's proposed wastewater allocation assigns far too much of the wastewater subsidy to Industrial and Public customers and too little to the Residential and Commercial customers. As I clearly explained in my Direct and Rebuttal Testimonies, allocation of any wastewater subsidy the Commission may allow should follow the water service class cost of service percentages. PAWC's approach, which relies partly on direct assignment from wastewater customer classes to water service customer classes is inappropriate and unreasonable and should be rejected by the Pennsylvania Public Utility Commission ("PPUC" or "Commission").

Response to Mr. Mierzwa

Q. Beginning on page 19 of his Rebuttal Testimony, Mr. Mierzwa disagreed with your proposal of 1.25 times the system average increase for the Public class of

water customers. Please respond to Mr. Mierzwa's Rebuttal Testimony on this point.

A. I presented a corrected CCOSS provided by the Company in its response to PAWLUG 05-001 in my Rebuttal Testimony. This CCOSS corrected an error in the allocation of services and meters in the originally filed Exhibit 12-A. The OCA CCOSS upon which Mr. Mierzwa relies for his response to me still contains the allocation error, thereby understating the CCOSS responsibility for the Residential class and overstating the CCOSS responsibility for the Public class. Now that the Public class has a RROR of 1.17, Mr. Mierzwa's proposed revenue increase of 34.5%, compared to a system average increase of 17.8%, is inappropriate and would move the Public class further away from its allocated cost to serve. Of course, Mr. Mierzwa's revenue allocation shown in Table 4 of his Direct Testimony fails to adhere to proper cost allocation and should be rejected by the Commission.

Q. On page 18, line 13 through page 19, line 2 Mr. Mierzwa expressed his disagreement with your proposed allocation of the Act 11 wastewater subsidy to customer classes. Please address this section of Mr. Mierzwa's Rebuttal Testimony.

A. Mr. Mierzwa continued to state that PAWC's Act 11 allocation is based on each water class's total cost of service as established in this proceeding. This is plainly incorrect as shown by the Company's response to OSBA 03-001 and included in my Exhibit ___(RAB-5), page 2. This response shows the PAWC's assignment of its Act 11 wastewater subsidy relies on a combination of direct assignments to water service classes and allocations based on class water cost of service. Particularly objectionable

is PAWC's direct assignment of $2,557,322 from the CSS wastewater system to Industrial water service customers. Contrary to Mr. Mierzwa's description of PAWC's approach, this direct assignment has nothing to do with the Industrial class's total water cost of service. This direct assignment inflated the Act 11 subsidy that would have been allocated to the Industrial class using its share of the Company's water CCOSS.

Second, Mr. Mierzwa stated the following in response to my Act 11 allocation proposal:

"Q. DO YOU AGREE WITH MR. BAUDINO'S PROPOSAL?
A. No. The present rates for each customer class are generally based on a cost of service which is now outdated. Therefore, I agree with PAWC's proposal to assign the Act 11 shift based on each water class's total cost of service."[1]

Based on my understanding of this testimony, I believe Mr. Mierzwa has confused "class share of cost of service at present rates" with present rates and revenues. In fact, the percentage class share of total cost of service at present revenues that I showed in Table S1 above is based on each class's allocated share of the Company's total cost of service before the Company included the assignment of its proposed wastewater subsidy in its CCOSS. It is not based on each class's total revenue at present rates. The presentation of class cost of service at present rates enables the presentation of water service class rates of return and RRORs that are

[1] Mierzwa Rebuttal Testimony, page 18, lines 20 through 22.

shown in Exhibit ___(RAB-S1). This shows how close each water service class is to the current system rate of return and may be used to guide revenue allocation. Thus, the use of each water service class's percentage share of total allocated cost of service is the appropriate measure to use to allocate the Act 11 subsidy, assuming the Commission allows it in this case.

Response to Mr. Higgins

Q. Did Mr. Higgins present a revised CCOSS in his Rebuttal Testimony?

A. Yes. Mr. Higgins presented a revised CCOSS that incorporated corrections the Company made in its response to PAWLUG 05-001. Mr. Higgins also decided to change the system maximum day and maximum hour numbers in response to the Direct Testimony recommendations of Mr. Mierzwa. Mr. Higgins recommended lowering PAWC's maximum day ratio to 1.20 and its maximum hour ratio to 1.8. Mr. Higgins also continues to recommend collection of the Act 11 wastewater subsidy based on PAWC's approach.

Q. Do you agree with the adjustments Mr. Higgins recommends to the maximum day and maximum hour ratios in PAWC's CCOSS?

A. No. Ms. Heppenstall addressed Mr. Mierzwa's recommended changes to the maximum day and maximum hour ratios in her Rebuttal Testimony, pages 4 through 8. Ms. Heppenstall's support for the Company's proposed maximum day ratio of 1.4 and maximum hour ratio of 2.1 is reasonable based on PAWC's actual experience and her analysis of the system. I recommend that the Commission adopt the Company's recommended extra capacity ratios in this proceeding and reject Mr. Higgins' recommended CCOSS.

Q. Is Mr. Higgins' proposed allocation of the Act 11 wastewater subsidy reasonable?

A. No, it is not. I have already explained why the Company's approach is unreasonable and this is the approach Mr. Higgins relied on. However, Mr. Higgins provided a CCOSS summary in his Schedule KCH-12, page 2, that shows the allocation of Act 11 revenues at the OSBA proposed revenue requirement. Table S2 below shows the allocated class cost of service percentages and the allocated Act 11 subsidy as a percentage of the total for the Residential, Commercial, Industrial, Public, and Private Fire classes.

TABLE S2

OSBA Water Class CCOSS and Act 11 Percentages

	OSBA Class CCOSS	CCOSS Percentage	Act 11 Allocation	Act 11 Percentage
Residential	$ 570,737,124	66.2%	$ 18,664,876	51.7%
Commercial	$ 216,342,789	25.1%	$ 12,436,411	34.4%
Industrial	$ 44,234,307	5.1%	$ 3,282,317	9.1%
Public (Municipal)	$ 24,198,132	2.8%	$ 1,391,024	3.9%
Private Fire Protection	$ 6,056,678	0.7%	$ 348,167	1.0%
Total	$ 861,569,030	100.0%	$ 36,122,795	100.0%

Table S2 demonstrates the unreasonableness of Mr. Higgins' allocation of the Act 11 subsidy at the OSBA's revenue requirement. In Mr. Higgins' CCOSS, the Industrial class's allocated share of the CCOSS is 5.1%. However, Mr. Higgins proposed allocating 9.1% of the wastewater subsidy to the Industrial water service class. The prime beneficiary of Mr. Higgins' proposed Act 11 allocation is the Residential class, whose Act 11 allocation is only 51.7% while its CCOSS share is

66.2%. There simply is no sound reason to assign the Act 11 subsidy to water classes on the basis Mr. Higgins recommends.

Finally, page 2 of KCH-12 shows a proposed increase to Industrial customers of 26.3%, with a system average increase of 12.9%. This proposal is double the system increase for Industrial customers and violates the principle of gradualism. I strongly recommend that the Commission reject this radical proposal.

Q. Does this conclude your Surrebuttal Testimony?

A. Yes.

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

CITY OF SCRANTON

Docket Nos. R-2023-3043189 and R-2023-3043190

DIRECT TESTIMONY
OF
THE HON. PAIGE G. COGNETTI,
MAYOR OF THE CITY OF SCRANTON

February 1, 2024

Q. PLEASE STATE YOUR NAME AND ADDRESS FOR THE RECORD.

A. My name is Paige G. Cognetti and I reside at 1511 Euclid Avenue, Scranton, PA 18504.

Q. WHERE ARE YOU EMPLOYED?

A. I am the Mayor of the City of Scranton. My office is located at City Hall, 340 N. Washington Ave, Scranton PA, 18503.

Q. IS THE CITY OF SCRANTON A WATER AND/OR WASTEWATER RATEPAYER OF PENNSYLAVNIA AMERICAN WATER COMPANY?

A. Yes, the City of Scranton is both a water and wastewater ratepayer of the Pennsylvania American Water Company, which I will also refer to as "the Water Company" and/or "PAWC."

Q. ARE YOU A WATER AND/OR WASTEWATER RATEPAYER OF PENNSYLVANIA AMERICAN WATER COMPANY?

A. Yes, I am both a water and wastewater ratepayer of the Pennsylvania American Water Company.

Q. ARE YOU TESTIFYING ON BEHALF OF YOURSELF AND/OR OTHERS TODAY?

A. I am testifying on behalf of my constituency, the City of Scranton and its residents, and my own household.

Q. WANT TO ADD BACKGROUND INFORMATION AND PRIOR EXPERIENCES? ANYTHING ABOUT UTILITIES AND/OR MUNICIPAL FINANCE IN PARTICULAR?

A. In addition to government administration, I have a background in investment management.

Q. WHAT IS YOUR UNDERSTANDING OF PAWC'S RATE INCREASE REQUESTS?

A. According to the Company, if the entire rate request is approved as filed, the total bill for a Scranton residential water customer would increase by almost twenty-five percent (24.9%), meaning that a customer who uses approximately 3,201 gallons of water per month would see a price increase of approximately $70.65 to $88.24 on a monthly bill. (Volume I, Notice of Proposed Water and Wastewater Rate Changes).

Q. HOW MANY RESIDENTS, WHO WOULD BE AFFECTED BY THESE RATE INCREASES, ARE WITHIN THE CITY OF SCRANTON?

A. Scranton is the home of roughly 80,000 residents, many of whom are residential customers of the Water Company.

Q. WHY DID THE CITY OF SCRANTON INTERVENE AS AN ACTIVE PARTY IN THIS PROCEEDING?

A. Scranton has a significant interest in the impact that the Water Company's proposed rate increase will have on itself and its residents. These interests are not adequately represented by other participants in this matter. More specifically, it is my understanding that there are only

three other areas/municipalities situated in a combined system like Scranton, and the total number of consumers, including Scranton, is 95,000 ratepayers. Scranton makes up the majority of those ratepayers and has a unique, weighted, and specific interest in this matter. It is imperative that our residents are not charged at the rate proposed for many reasons.

Q. WHY IS THE CITY OF SCRANTON CONCERNED WITH THE PROPOSED WATER RATE INCREASE?

A. Our office has engaged Teri Ooms. Ms. Ooms is the Executive Director of The Institute, an applied social science research and economic consulting organizations formed through a collaborative of higher education and business. Based in NEPA, The Institute produces community-based research and client solutions that provide strategies for growing organizational impact and sustainability. She has a master's degree in finance and a bachelor's degree in public administration, both from the University of Scranton, and she is intimately aware of the demographics and finances of the City of Scranton. She has been engaged by the City of Scranton as an expert in another proceeding and has provided us with information that demonstrates that our current population already struggles to pay their bills without a rate increase. I am seriously concerned that residents of the City will be forced to choose which bills to pay when, and that there will be increased suffering in my City.

Q. WHAT WERE SOME OF THE MOST COMPELLING DATA POINTS THAT HELPED YOU BETTER UNDERSTAND WHY A WATER RATE INCREASE WOULD BE SO DETRIMENTAL TO THE CITY OF SCRANTON?

A. Scranton has a high poverty rate of 19.6%, with one in four households living on less that $25,000. The median household income is $43, 893, compared to the U.S. average of $69,021. One-quarter of Scranton households receive SNAP benefits. A $216 annual rate increase is extremely challenging if not impossible for these households to manage.

Q. WHO ARE THE WATER AND WATSEWATER UTILITY PROVIDERS IN THE CITY OF SCRANTON?

A. All wastewater customers referred to in the Asset Purchase Agreement are residents of the City of Scranton. There are no other water or wastewater providers operating within city limits. The City is at the mercy of the PAWC.

Q. WHY IS THE CITY OF SCRANTON CONCERNED WITH WASTEWATER RATES IF PAWC IS ONLY REQUESTING 2.5% INCREASE ON WASTEWATER RATES AS OF TODAY?

A. Scranton's position is particularly unique in this matter in that the Scranton Sewer Authority, a municipal authority of the City of Scranton incorporated and existing pursuant to the Municipal Authorities Act, as amended, 53 Pa. Cons. Stat. Ann. §§ 5601-5623, sold its combined sewer system to the Water Company on or about March 29, 2016. We are formally entering into this record a true and accurate copy of the Asset Purchase Agreement (also referred to as "the APA" or "APA") as Exhibit 1.

This APA contains reference to and material terms in relation to a Consent Decree issued in the matter of U.S.A. v. Scranton Sewer Authority, Civil Action No. 3:09–cv–1873, (M.D. Pa. December 13, 2012), a copy of which we are also formally entering into the record as Exhibit 2.

While the City of Scranton was not a party to the APA, residents and ratepayers will feel the effects of an increase, particularly if the PUC determines that wastewater rates should increase even more. While the City of Scranton appreciates the majority of the challenges that the Office of the Consumer Advocate, also referred to as "OCA," has articulated and put forward against the PAWC, the City of Scranton (along with the Borough of Dunmore) does not support shifting the burden of a rate hike onto wastewater consumers due to the deleterious and devastating effects it would have on our City's ratepayers.

Q. CAN YOU EXPLAIN WHY THE CITY OF SCRANTON HAS CONCERN ABOUT AN INCREASE OF WASTEWATER RATES IN THE CONTEXT OF THE OCA'S ARGUMENTS?

A. For example, Paragraph J on p. 6 states "However, the OCA submits that shifting so much of its wastewater revenue requirement to water customers is unfair to PAWC water customers, most of whom are not PAWC wastewater customers and receive no benefit from PAWC's wastewater service."

Scranton and its residents are located within the PAWC's service territory and will be directly affected by the outcome of this proceeding. Particularly, this proceeding will impact the price that Scranton and its residents pay for water and wastewater, as well as the reliability and quality of those services.

Scranton will be disproportionately and negatively affected if the PUC is so persuaded by the arguments in line with paragraph J on page 6 of OCA's complaint due to its contractual relationships and positions from the APA Sewer Sale.

Q. HAS PAWC RAISED RATES BEFORE?

A. Yes, just last year the PAWC sought a combined total revenue increase of $173.2 million, for a 20.8% gain, but the PUC curbed it by approving $138 million, or a 16.6% increase, according to the PUC.

Q. WHAT WAS PAWC'S RATIONALE FOR LAST YEAR'S INCREASE?

A. It is my understanding that in April 2022, the PAWC requested a rate increase because they said it was necessary and that the company needed $1 billion in system investments needed to address aging water and wastewater infrastructure.

Q. TO YOUR KNOWLEDGE, HOW DID THIS AFFECT RATEPAYERS IN THE CITY OF SCRANTON?

A. As a result of the settlement, the water bill for the typical residential customer was estimated to increase by $8.76 per month, going from $60.48 to $69.24, which was a 14.5% increase, and instead of the $15.01 increase (a 24.8% hike) that was sought by PAWC at that time. The

wastewater bill for a typical residential customer will increase by $30 a month, from $76.65 to $106.65, a 39.1% rise, instead of the $19.01 increase (a 24.9% rise) that PAWC initially proposed.

Q. BEING THAT THERE WAS AN INCREASE JUST LAST YEAR, WHY IS THE CITY CONCERNED ABOUT ANOTHER INCREASE, PARTICULARLY IN THE CONTEXT OF THE APA?

A. I know that some residents have cited the 1.9% compound annual growth rate (CAGR) figure in their appeals to the PUC and PAWC against the rate increase that is before the commission right now. This figure is from our APA which was signed in March of 2016. It is my understanding that if the PAWC had truly frozen its wastewater rates in accordance with the APA over the last nine years, then an increase in wastewater rates could balloon and occur but within the contemplated ratios of the APA. That 1.9% CAGR is akin to spreading out a larger rate increase over the ten years contemplated in the APA. However, and now, the City is potentially facing a rate increase that would offend the APA, particularly in the event that any portion of the proposed water increase is shifted to the wastewater consumers, as suggested by the OCA, and therefore harm ratepayers outside of the context of the PAWC's contractual agreement and promises made by and through the APA.

Q. WHAT, IF ANYTHING, DOES THE APA BIND THE PAWC TO DO BEFORE INCREASING WASTEWATER RATES AT OR BEFORE THE TEN YEAR TERM IN THE APA?

A. It is my understanding that if the PAWC wanted to increase its wastewater rates, it would have to "show their homework" to justify an increase that would also have to be in conformity with their other ratepayers. All of their obligations in this arena are governed by Section 7.07 of the APA.

Q. HAS THE CITY OF SCRANTON CONFERENCED ABOUT ITS POSITION WITH THE OFFICE OF THE CONSUMER ADVOCATE?

A. Yes.

Q. HOW HAS THE OCA RESPONDED TO THE CITY'S CONCERNS?

A. They have stated that since the City of Scranton is doing better financially, the terms of the APA are negotiable to permit the relief that they are seeking.

Q. WHAT IS THE CITY'S RESPONSE TO THAT POSITION?

While the City as an entity has exited from "financially distressed status" pursuant to Act 47, the City remains reliant on the tax base and economic conditions that are susceptible to fluctuations. While the City is on a better financial trajectory than years past, and we are proud of our upgraded bond rating, we still face significant financial burdens with our $70 million in outstanding debt, unfunded OPEB liabilities exceeding $230 million, and a pension fund designated as "moderately distressed" by the Commonwealth. Furthermore, our health as an entity does not correlate to financial health at the individual household level. The cost of living

continues to rise for our residents and our local businesses have struggled with high inflation for years now. Regardless of the City's financial position, this rate increase is a burden on our residents.

Q. DOES THE CITY HAVE A POSITION AS TO THE PAWC'S PROPOSAL FOR RATE DECOUPLING?

A. Yes, we oppose a surcharge for residents who conserve water and try to minimize their bills.

Q. ARE THERE ANY OTHER MUNICIPALITIES OR PARTIES THAT ARE SIMILARLY SITUATED TO THE CITY OF SCRANTON?

A. Yes, the Borough of Dunmore is also an affected party by and through the APA and it is our understanding and position that we have the same position as the Borough of Dunmore.

Q. HAVE ANY SMALL BUSINESSES RAISED CONCERNS TO YOU REGARDING THE PROPOSED INCREASE?

A. Yes, our local businesses are concerned about this, from hair salons to laundromats to our larger manufacturers for which water is a large input cost. We are working to bring new business to Scranton to help our economy grow, and do not welcome utility rates to add another barrier to adding jobs and opportunity to our City.

Q. HOW WOULD YOU DESCRIBE THE QUALITY OF SERVICE FROM THE PAWC TO DATE?

A. Unfortunately, just recently, PAWC seemingly failed to issue bills to residents for the month of December (2023). As a result, residents recently received a bill that included services for both December 2023 and January 2024, with a late fee. It is our understanding that a resident is only able to ameliorate the "late fee" with PAWC if the resident calls and requests the same. Our residents deserve relief from the "late fee," especially since our residents have also been experiencing "dirty" water that has been discolored and/or chemical in taste on a periodic basis.

Q. DO YOU HAVE ANY IDEAS OR RECOMMENDATIONS AS TO HOW THE PAWC MIGHT BE ABLE TO FIND FUNDING ANOTHER WAY?

A. I was disheartened to learn that PAWC has not taken advantage of programs like Pennvest.

Q. WHAT IS THE CITY OF SCRANTON ASKING OF THE PUC AT THIS TIME?

A. We are asking that the PUC reject the PAWC's proposal for a rate hike for water customers. If the PUC is at all persuaded by the OCA, we then ask that the PUC consider Scranton's unique position and the information that we are providing to avoid a burden shift to wastewater customers. We appreciate the opportunity to participate in these proceedings and advocate for our residents who are already struggling to make ends meet and implore the PUC to regulate with our residents in mind.

ASSET PURCHASE AGREEMENT

THIS ASSET PURCHASE AGREEMENT ("Agreement"), dated as of March 29, 2016 (the "Effective Date"), is made and entered into by and between THE SEWER AUTHORITY OF THE CITY OF SCRANTON (the "Seller"), and PENNSYLVANIA-AMERICAN WATER COMPANY ("Buyer").

WITNESSETH:

WHEREAS, the Seller, acting by and through the Authority Board, owns and operates a wastewater collection and treatment system (the "System"); and

WHEREAS, Buyer owns and operates a public utility water system operating in or near the Seller's wastewater service area (the "Water System") which includes the City of Scranton (the "City") and the Borough of Dunmore (the "Borough") (the City and the Borough, together, the "Service Area"); and

WHEREAS, the Seller issued on March 3, 2015 a Request for Proposals ("RFP") regarding the management and/or sale of the System, as it explored ways to achieve operating efficiencies, to improve customer wastewater service, to keep future customer rates as low as possible and to raise capital to fund important infrastructure needs; and

WHEREAS, Buyer, among other parties, responded to the RFP and, subsequently, to Seller's request for Best and Final Offers ("BAFO"), and engaged in extensive discussions with the Seller including the Seller's response to Buyer's questions related to the RFP, the Seller's requests for clarification related to the BAFO, and Buyer's and the Seller's responses to such correspondence (collectively, the "Clarifying Correspondence"), which resulted in the Seller and Buyer entering into a Memorandum of Understanding, dated December 15, 2015, as modified on March 14, 2016 (the "MOU"), for the sale and transfer of the System; and

WHEREAS, Buyer, in reliance upon the representations, warranties and covenants of the Seller herein, desires to purchase and acquire from the Seller, and the Seller, in reliance upon the representations, warranties and covenants of Buyer herein, desires to sell, transfer, assign, convey and deliver to Buyer all of the assets of the System (other than the Excluded Assets), and in connection therewith, Buyer has agreed to assume certain ongoing obligations and liabilities of the Seller related to the operation of the System (including the Seller's obligations under the Consent Decree subject to the limitations contained herein), all on the terms and subject to the conditions set forth in this Agreement.

NOW, THEREFORE, in consideration of the foregoing and of the mutual representations, warranties, covenants, and agreements herein contained, the receipt and sufficiency of which hereby are acknowledged, intending to be legally bound, the Parties hereto agree as follows:

ARTICLE I.

DEFINITIONS

In addition to the capitalized terms defined elsewhere in this Agreement, the following terms, as used in this Agreement shall have the meanings set forth in this Article I:

"**Abstract Completion Date**" has the meaning specified in Section 6.01(a).

"Abstractor" has the meaning specified in Section 6.01(a).

"Abstractor Search Result Chart" has the meaning specified in Section 6.01(a).

"**Accrued PTO**" has the meaning specified in Section 7.04(c).

"**Accrued Sick Bank**" means the portion of the Accrued PTO comprising the total amount of accrued but unused paid sick days with respect to all Union Personnel as of the Closing Date.

"**Acquired Assets**" has the meaning specified in Section 2.01.

"**Acquired Authorizations**" has the meaning specified in Section 2.01(j).

"**Affiliate**" means, with respect to any Person, any other Person that directly or indirectly, through one or more intermediaries, controls, is controlled by, or is under common control with, such Person. The term "control" (including the terms "controlled by" and "under common control with") means the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of a Person, whether through the ownership of voting securities, by contract or otherwise.

"**Agreement**" has the meaning specified in the Preamble of this Agreement.

"**Allocation Schedule**" has the meaning specified in Section 3.03.

"**Amended CBA**" has the meaning specified in Section 7.04(f).

"**Amended Consent Decree**" has the meaning specified in Section 7.06(d).

"**Approved Revised CSO Control Measures Plan**" means any Revised CSO Control Measures Plan approved in accordance with Subsection XIX of the Consent Decree, or established through Dispute Resolution pursuant to Section XII of the Consent Decree.

"**Assignable Outstanding Indebtedness**" has the meaning specified in Section 7.11(a).

"**Assigned Contracts**" has the meaning specified in Section 2.01(c).

"**Assignment and Assumption Agreement**" has the meaning specified in Section 13.02(b).

"**Assumed Liabilities**" has the meaning specified in Section 2.04(a).

"**Authority Board**" has the meaning set forth in the Municipality Authorities Act of 1945 and the bylaws of the Seller.

"**Average System Rates**" means the "Rates for Rate Zone 1" contained in Buyer's Supplement No. 2 to Tariff Wastewater PA P.U.C. No. 15, 1st Revised Page No. 4 through 1st Revised Page No. 4.1 on file with the PaPUC, as amended.

"**Base Amount**" has the meaning specified in Section 3.01.

"**Borough**" has the meaning specified in the recitals to this Agreement.

"**Business Day**" means any day other than Saturday, Sunday, and any day on which commercial banks in Pennsylvania are authorized by Law to be closed.

"**Buyer**" has the meaning specified in the Preamble of this Agreement.

"**Buyer Fundamental Representations**" has the meaning specified in Section 8.01.

"**Buyer Indemnified Persons**" has the meaning specified in Section 8.02.

"**Buyer Parent**" means American Water Works Company, Inc.

"**Buyer Post-Signing Event**" has the meaning specified in Section 10.04.

"**Buyer Schedule Supplement**" has the meaning specified in Section 10.04.

"**CAGR**" has the meaning specified in Section 7.07(d).

"**CERCLA**" means the Comprehensive Environmental Response Compensation and Liability Act of 1980, 42 U.S.C. §9601 et seq., as amended.

"**City**" has the meaning specified in the recitals to this Agreement.

"**City NPDES Permit**" means the National Pollutant Discharge Elimination System Permit No. PAI132203 issued by PaDEP to the City with respect to the MS4 System which became effective on November 1, 2014 and expires on October 31, 2019, including any revision or modification thereto.

"**City-Owned Real Property**" has the meaning specified in Section 6.02(d).

"**Clarifying Correspondence**" has the meaning specified in the recitals to this Agreement.

"**Closing**" means the consummation of the sale and purchase of the Acquired Assets and assumption of the Assumed Liabilities and the other transactions contemplated hereby, all in accordance with the terms and conditions of this Agreement.

"**Closing Cash Balance**" means the sum of (a) the aggregate amount of cash and cash equivalents in the bank accounts included in the Acquired Assets as of the Closing Effective Time *plus* (b) the lesser of (i) the aggregate amount paid by the Seller to cash-out the Accrued Sick Bank in accordance with Section 7.04(c), and (ii) $450,000.

"**Closing Cash Statement**" has the meaning specified in Section 3.02(b).

"**Closing Date**" has the meaning specified in Section 13.01.

"**Closing Effective Time**" has the meaning specified in Section 13.01.

"**Closing Outstanding Indebtedness Amount**" has the meaning specified in Section 3.01(a).

"**COBRA**" means Title X of the Consolidated Omnibus Budget Reconciliation Act of 1985, as amended, including Sections 2201 through 2208 of the Public Health Service Act and Part 6 of Subtitle B of the Employee Retirement Income Security Act of 1974, as amended.

"**Code**" means the Internal Revenue Code of 1986, as amended.

"**Collective Bargaining Agreement**" means the Agreement between the Seller and the Union dated as of April 1, 2013 for the period April 1, 2013 to March 31, 2017, as may be amended from time to time.

"**Combined Sewer Overflow**" or "**CSO**" means any discharge from the Seller's Combined Sewer System at a CSO Outfall designated in the currently applicable Seller NPDES Permit.

"**Combined Sewer System**" means the portion of the Seller's System designed to convey municipal sewage, wastewaters (domestic, commercial, and industrial) and stormwater runoff in the same system of pipes to the Wastewater Treatment Plant.

"**Combined Sewer System Assets**" means the assets of the System designed and constructed to collect and convey municipal sewage (i.e., domestic, commercial and industrial) and stormwater through a single pipe-system to the Wastewater Treatment Plant or Combined Sewer Overflow structures, including (i) wastewater collection pipes, pumping stations and other assets used for wastewater collection, (ii) stormwater drains, pipes, collection basins, pumping stations and all other stormwater drainage assets used for stormwater collection, and (iii) catch basins, inlets, pipes and all other stormwater lateral facilities, in each case that connect wastewater and surface stormwater drains to the combined sewer mains that discharge to the Wastewater Treatment Plant or combined sewer overflow structures, but excluding the Municipal Separate Storm Sewer System. The term "Combined Sewer System Assets" also includes facilities constructed in accordance with Exhibit A of the Consent Decree.

"**Compliance Schedule**" has the meaning specified in Section 7.06(a).

"**Consent Decree**" means the order of the United States District Court for the Middle District of Pennsylvania dated January 31, 2013, among the EPA, PaDEP and the Seller,

including, among other requirements, the Long-Term Control Plan and Nine Minimum Controls Plan (as defined in the Consent Decree), as modified by the Notice of Non-Material Modification of Consent Decree filed December 18, 2015, and as may be further modified in accordance with the terms of this Agreement and approved in accordance with the terms of the Consent Decree.

"**Consent Decree Required Information**" has the meaning specified in Section 7.03(b).

"**Contract**" means any contract, agreement, purchase order, lease, sublease, license, sublicense, plan, indenture, loan agreement, security agreement, instrument or other document, commitment, arrangement, undertaking, practice or authorization that is binding on any Person or its property under applicable Law.

"**CSO Control Measures**" means the construction, control measures, actions and other activities set forth in Appendix A of the Consent Decree, including the Seller's Long-Term Control Plan, as approved by Federal and State regulatory authorities and as may be amended from time to time in accordance with the terms of the Consent Decree.

"**CSO Outfall**" means an outfall in the Combined Sewer System from which combined sewage and stormwater are discharged and so designated in the currently applicable Seller NPDES Permit.

"**Cured**" has the meaning specified in Section 6.02(a).

"**Damages**" means any and all losses, liabilities, obligations, damages, penalties, interest, Taxes, claims, actions, demands, causes of action, judgments, reasonable attorneys', consultants' and other professional fees, and all other reasonable costs and expenses sustained or incurred in investigating, preparing or defending or otherwise incident to any such claim, action, demand, cause of action or judgment or the enforcement of a Party's rights under Article VIII; *provided, however,* that "**Damages**" shall not include punitive damages, except in the case of fraud or to the extent actually awarded to a Governmental Authority or other third party in respect of a Third Party Claim.

"**Easements**" means all easements, rights of way, licenses, use agreements, occupancy agreements, leases and other agreements and appurtenances for and over the real property of third parties.

"**Effective Date**" has the meaning specified in the Preamble.

"**Eligible Easement**" means any Easement that is either:

(a) a Held Easement which is not subject to any Objection Notice or, if same was subject to an Objection Notice, the applicable Title Objection Items have been Cured pursuant to Section 6.02(a); or

(b) an Easement with respect to which the Seller has instituted condemnation proceedings in order to obtain the necessary right and title to such Easement, the period for making preliminary objections thereto has expired without any preliminary objections being made or, if preliminary objections were made, all such preliminary objections have been resolved and, in

any case, the only remaining issue is the fair value that will be paid to the landowner for the taking of such Easement.

"**Environment**" means any surface water, ground water, soil or subsurface strata, sediments or ambient air.

"**Environmental Claims**" means all notices of investigations, warnings, notice letters, notices of violations, Liens, orders, claims, demands, suits or administrative or judicial actions for any injunctive relief, fines, penalties, third party claims, or other claims asserting violations of Environmental Requirements or responsibility for Environmental Liabilities.

"**Environmental Conditions**" means the Release of Hazardous Materials or the presence of Hazardous Materials on, in, under or within any property (including the presence in the Environment), other than the presence of Hazardous Materials .in locations and at concentrations that are naturally occurring.

"**Environmental Liabilities**" means .any legal obligation or liability arising under Environmental Requirements or related to or arising out of any Environmental Condition, including those consisting of or relating to any (a) duty imposed by, breach of or noncompliance with any Environmental Requirements; (b) environmental, health or safety matters or conditions (including on-site or off-site contamination, occupational safety and health and regulation of Hazardous Materials); (c) Remedial Action undertaken by any Person; (d) bodily injury (including illness, disability and death, and regardless of when any such bodily injury occurred, was incurred or manifested itself), property damage (including trespass, nuisance, wrongful eviction and deprivation of the use of real or personal property), or other losses or damages incurred by any other Person (including any employee or former employee of such Person); (e) any injury to, destruction of, or loss of natural resources, or costs of any natural resource damage assessments; (f) exposure of any Person to any Hazardous Materials; and (g) the presence or Release of any Hazardous Materials.

"**Environmental Requirements**" mean all present Laws (including common law), regulations, legally binding or otherwise enforceable requirements and Licenses and Permits relating to human health, pollution, or protection of the Environment (including ambient air, surface water, ground water, land surface or surface strata), including (i) those relating to emissions, discharges, Releases, or threatened Releases of Hazardous Materials, and (ii) those relating to the identification, generation, manufacture, processing, distribution, use, treatment, storage, disposal, release, recovery, transport or other handling of Hazardous Materials. Without limiting the foregoing, the term "**Environmental Requirements**" includes (1) CERCLA; the Superfund Amendments and Reauthorization Act, Public Law 99-499, 100 Stat. 1613; the Emergency Planning and Community Right to Know Act, 42 U.S.C. Sections 11001-11050; the Resource Conservation and Recovery Act, 42 U.S.C. Sections 6901-6992k ("RCRA"); the Safe Drinking Water Act, 42 U.S.C. Sections 300f to 300j-26; the Toxic Substances Control Act, 15 U.S.C. Sections 2601-2692; the Hazardous Materials Transportation Act, 49 U.S.C. Sections 5101-5127; the Federal Water Pollution Control Act, 33 U.S.C. Sections 1251-1387; the Oil Pollution Act of 1990, 33 U.S.C. Sections 2701--2761; the Clean Air Act, 42 U.S.C. Sections 7401-7671q; the Atomic Energy Act of 1954, as amended, 42 U.S.C. Sections 2011 et seq.; the Low Level Radioactive Waste Policy Act, as amended, 42 U.S.C. Section 2021b et seq.; the

Occupational Safety and Health Act, 29 U.S.C. Sections 651-678, and the regulations promulgated pursuant to the above-listed federal statutes, and (2) counterpart Laws and regulations promulgated or issued by any state or local Governmental Authority.

"**EPA**" means the United States Environmental Protection Agency, or a successor Governmental Authority with substantially similar power and authority thereto.

"**Equipment and Machinery**" means (i) all equipment, tangible personal property, machinery, office furniture and equipment, fixtures, tooling, spare maintenance or replacement parts, environmental testing equipment, and vehicles, (ii) any rights to warranties applicable to the foregoing, and licenses received from manufacturers of any such item, and (iii) any related claims, credits, and rights of recovery with respect thereto.

"**ERISA**" means the Employee Retirement Income Security Act of 1974, as amended.

"**Escrow Account**" has the meaning specified in Section 3.01(b).

"**Escrow Agent**" means Delaware Trust Company.

"**Escrow Agreement**" means the Escrow Agreement, in substantially the form attached hereto as Exhibit C, dated as of the Closing Date, among Buyer, the Seller and the Escrow Agent.

"**Escrow Amount**" has the meaning specified in Section 3.01(b).

"**Escrow Fund**" means, at any given time, the portion of the Escrow Amount (together with any interest or other earnings thereon) then remaining in the Escrow Account.

"**Escrow Release Date**" means the date that is eighteen (18) months following the Closing Date.

"**Essential Easement**" means any Easement that is necessary for or used in connection with the use and operation of any Essential System Asset or to provide continuous and unimpeded rights of way for the Essential System Assets (including access thereto).

"**Essential System Assets**" means (a) the Waste Water Treatment Plant, (b) all pumping stations, outfalls and other "above ground" Combined Sewer System Assets and all appurtenances relating thereto, and (c) easements for all Combined Sewer System Assets which in any way relate to railroad properties and rights-of-way, and collection system mains and laterals and other lines comprising the System, wherever located, which have a diameter of twelve (12) inches or more, including those Essential System Assets at the locations identified on Schedule 6.01.

"**Estimated Closing Cash Balance**" has the meaning specified in Section 3.02(a).

"**Estimated Closing Cash Increase**" has the meaning specified in Section 3.02(a).

"**Estimated Closing Cash Reduction**" has the meaning specified in Section 3.02(a).

"**Estimated Closing Cash Statement**" has the meaning specified in Section 3.02(a).

"**Estimated Withdrawal Liability Amount**" has the meaning specified in Section 2.07(b).

"**Excess Offsets and Credits**" has the meaning specified in Section 7.06(e).

"**Excluded Accounts Receivable**" has the meaning specified in Section 2.02(l).

"**Excluded Assets**" has the meaning specified in Section 2.02.

"**Excluded Liability**" or "**Excluded Liabilities**" means any and all liabilities, debts or obligations of any nature, whether known or unknown, absolute, accrued, contingent, liquidated, unliquidated, due or to become due or otherwise and whether or not required to be reflected on a balance sheet prepared in accordance with GASB, in each case which are not Assumed Liabilities.

"**Executive Officers**" of the Seller are the Executive Director, the Director of Compliance, the Director of Engineering and the Chief Financial Officer.

"**Files and Records**" means all files and records of or relating to the Seller or the System, whether in hard copy or magnetic or other format including customer and supplier records, customer lists (both current and prospective), records of sales calls, manuals, books, files, records, engineering data, procedures, systems, instructions, drawings, blueprints, plans, designs, specifications, equipment lists, parts lists, equipment maintenance records, equipment warranty information, plant plans, specifications and drawings, sales and advertising material, computer software, and records relating to Transferred Personnel, and whether stored on-site or off-site.

"**Final Order**" means a Governmental Approval by a Governmental Authority as to which (a) no request for stay of the action is pending, no such stay is in effect and if any time period is permitted by statute or regulation for filing any request for such stay, such time period has passed, (b) no petition for rehearing of the action is pending and the time for filing any such petition or application has passed, (c) such Governmental Authority does not have the action under reconsideration on its own motion and (d) no appeal to a court or administrative tribunal or a request for stay by a court or administrative tribunal of the Governmental Authority's action is pending or in effect and the deadline for filing any such appeal or request for stay has passed.

"**Financial Statements**" has the meaning specified in Section 4.05.

"**GASB**" means the Government Accounting Standards Board.

"**Governmental Approval**" means any consent, approval, authorization, order, adjudication, award, decision, judgment, writ, decree, ruling, or verdict entered, issued, made, or rendered by any court, administrative agency, or other Governmental Authority of competent jurisdiction.

"**Governmental Authority**" means any government, court, department, commission, board, bureau, municipality, agency or instrumentality of the United States, or of any state,

county, city or political subdivision thereof, or any foreign governmental body, including the PaPUC, the EPA, PaDEP and the Authority Board.

"**Hazardous Materials**" means: (a) any substance that is a "hazardous substance," "hazardous waste," "solid waste," "municipal waste," "industrial waste," "flammable material, " "radioactive material," "hazardous material," "pollutant," or "contaminant" or words of similar meaning and regulatory effect under any applicable Environmental Requirements, (b) petroleum or petroleum product (including crude oil and any fraction thereof) or waste oil, (c) any natural or synthetic gas (whether in liquid or gaseous state), (d) any asbestos or polychlorinated byphenyls, (e) Mold, and (f) any mixture or solution of the foregoing, and all derivatives or synthetic substitutes of the foregoing.

"**Held Easement**" means, as of any particular date, each Easement that has been obtained by the Seller prior such date.

"**Indemnified Party**" means any Buyer Indemnified Person or Seller Indemnified Person, as applicable, entitled to indemnification pursuant to Article VIII.

"**Indemnifying Party**" means a Party which is obligated to indemnify an Indemnified Party pursuant to Article VIII.

"**Independent Third Party**" has the meaning specified in Section 7.05(b).

"**Industrial Pretreatment Program**" means the program for regulation and management of discharges to the System from Industrial Users as defined in 40 C.F.R. §403.3 which is sufficient to satisfy the requirements of the Amended Consent Decree (including the revised Nine Minimum Controls Plan) and the Seller NPDES Permit as transferred to Buyer, including any amendments or revisions thereto.

"**Intellectual Property**" means any and all of the following in any jurisdiction throughout the world: (a) trademarks and service marks, including all applications and registrations and the goodwill connected with the use of and symbolized by the foregoing; (b) copyrights, including all applications and registrations, and works of authorship, whether or not copyrightable; (c) trade secrets and confidential know-how; (d) patents and patent applications; (e) websites and internet domain name registrations; and (f) all other intellectual property and industrial property rights and assets, and all rights, interests and protections that are associated with, similar to, or required for the exercise of, any of the foregoing.

"**Intellectual Property Assets**" has the meaning specified in Section 2.01(g).

"**Knowledge**", "**to the Knowledge of**", and phrases of similar import, means the actual knowledge, after reasonable inquiry, of (A) with respect to Seller, the Executive Officers, or (B), with respect to Buyer, Kathy L. Pape.

"**Law**" means any law, statute, regulation, ordinance, rule, order, judicial, administrative or regulatory decree, judgment, adjudication, consent decree, settlement agreement, governmental requirement or common law doctrine enacted, promulgated, entered into, agreed or imposed by any Governmental Authority.

"**Leased Real Property**" means any parcel of land, building, fixtures or other real property leased, subleased, licensed or occupied pursuant to any leasehold or other real property right or interest.

"**Liability Cap**" has the meaning specified in Section 8.05(c).

"**Licenses and Permits**" mean all licenses, permits, franchises, authorizations, certificates, registrations, consents, orders, adjudications, variances, waivers, privileges, approvals or other Governmental Approvals issued, granted, approved or allowed by or obtained from, or required to be obtained from, any Governmental Authority, including environmental permits, operating permits and approvals.

"**Lien**" means any lien, pledge, mortgage, deed of trust, security interest, charge, claim, option, warrant, lease, sublease, right to possession, hypothecation, easement, right-of-way, encroachment, or other encumbrance, right or restriction which affects, by way of a conflicting ownership interest or otherwise, the right, title or interest in or to any property.

"**Long Term Control Plan**" means the plan submitted and approved by EPA and PaDEP under Section V.B. of the Consent Decree.

"**Material Adverse Effect**" means any event, occurrence, fact, condition or change that, individually or in the aggregate, is materially adverse to (a) the business, condition (financial or otherwise), assets, liabilities or results of operations of the System, taken as a whole, or (b) the ability of the Seller to consummate the transactions contemplated hereby; *provided, however,* that for purposes of the foregoing clause (a), a "Material Adverse Effect" shall not include any event, occurrence, fact, condition or change arising out of or attributable to: (i) general economic or political conditions; (ii) conditions generally affecting the sewer system industry (including sewer system owners, operators and service providers); (iii) any changes in financial, banking or securities markets in general, including any disruption thereof and any decline in the price of any security or any market index or any change in prevailing interest rates; (iv) acts of war (whether or not declared), armed hostilities or terrorism, or the escalation or worsening thereof; (v) any action by the Seller required or permitted by this Agreement or any action taken (or omitted to be taken) by the Seller with the written consent of or at the written request of Buyer; (vi) any changes in applicable Laws or accounting rules or the enforcement, implementation or interpretation thereof; (vii) any natural or man-made disaster or acts of God; or (viii) any failure, in and of itself, by the Seller to meet any internal or published projections, forecasts or revenue or earnings predictions with respect to the System (*provided* that the underlying causes of such failure shall not (subject to the other provisions of this definition) be excluded from the determination of a Material Adverse Effect), except, in the case of the foregoing clauses (i), (ii), (iii), (iv), (vi) and (vii), to the extent such event, occurrence, fact, condition or change has a materially disproportionate effect on the Seller as compared to other similar situated Persons engaged in the industry in which the Seller operates.

"**Material Change**" has the meaning specified in Section 7.05(h).

"**Material Contracts**" has the meaning specified in Section 4.18.

"**Material Terms**" has the meaning specified in Section 7.05(b).

"**Maximum Liability Cap**" has the meaning specified in Section 8.05(c).

"**Missing Easements**" means, as of any particular date, each Easement that is appurtenant to any Combined Sewer System Asset or necessary for access to any Combined Sewer System Asset or for the operation of any Combined Sewer System Asset (including Easements for utilities and power to any Combined Sewer System Asset) or otherwise is necessary for or used in connection with the operation of the System or to provide continuous and unimpeded rights of way for the Combined Sewer System Assets (including access thereto) that either (a) has not been obtained by the Seller prior such date or (b) if such Easement has been obtained by the Seller prior such date, such Easement is unrecorded or such Easement is not sufficient to operate the System as currently conducted.

"**Mold**" means any mold, fungus, bacteria, viral, or microbial matter or pathogenic organisms of a type or quantity that (a) results in or could reasonably result in a significant risk to human health or the Environment or obligations under Environmental Requirements to undertake Remedial Actions, or (b) would materially and negatively impact the value of any of the Acquired Assets.

"**MOU**" has the meaning specified in the recitals to this Agreement.

"**Multiemployer Plan**" has the meaning specified in Section 4.12(c).

"**Municipal Separate Storm Sewer System**" or "**MS4 System**" means the current and any future assets and facilities, built, operated or maintained, or real property ("**MS4 System Real Property**") and Stormwater System Assets owned by the City, the Borough or the Seller, and used for the purpose of capturing, conveying and discharging stormwater separate from any sewage or wastewaters.

"**Nine Minimum Controls Plan**" means the plan set forth in Appendix A of the Consent Decree as may be revised and updated in accordance with the Nine Minimum Controls requirements referenced in Section V.A of the Consent Decree.

"**Non-Union Personnel**" means Personnel who are not members of the Union.

"**Nonassignable Assets**" has the meaning specified in Section 2.06(a).

"**Noticed Proposal**" has the meaning specified in Section 7.05(g).

"**Noticed Proposal Period**" has the meaning specified in Section 7.05(g).

"**Objection Notice**" has the meaning specified in Section 6.02(a).

"**Off-Site Location**" means a location other than property on which the System is located.

"**Outside Date**" means October 15, 2016, as may be extended pursuant to Section 14.01(f).

"**Outstanding Indebtedness**" means the aggregate amount of outstanding indebtedness and other obligations of the Seller (including all principal and accrued but unpaid interest, fees, indemnities, compensation, expenses and other amounts payable, and including any termination fees, prepayment penalties, redemption premium, "breakage" costs or similar payments associated with the payment, prepayment or redemption of such amounts of Outstanding Indebtedness), as of the Closing Effective Time, and all arbitrage rebate amounts and trustee or paying agent fees and expenses payable under or with respect to the following bonds, notes and other debt instruments (including any and all indentures, debentures, mortgages or other Contracts relating to any of the following): (i) Sewer Revenue Bonds, Series of 2011A, (ii) Sewer Revenue Bonds, Series of 2011B, (iii) Sewer Revenue Bonds, Series of 2014, (iv) Sewer Revenue Bonds, Series of 2015, (v) PENNVEST Promissory Note #71192, (vi) PENNVEST Promissory Note #71162, (vii) PENNVEST Promissory Note #71281, (viii) PENNVEST Promissory Note #27682, (ix) PENNVEST Promissory Note #79906, (x) PENNVEST Promissory Note #71375, , (xi) PENNVEST Promissory Note #27881, (xii) $4,000,000 line of credit from First National Commonwealth Bank and (xiii) $2,000,000 line of credit from First National Commonwealth Bank.

"**Owned Real Property**" means all land owned in fee simple, together with all buildings, structures, improvements and fixtures located thereon, and all easements, rights of way, licenses, privileges, air rights and other rights and interests appurtenant thereto.

"**PaDEP**" means the Pennsylvania Department of Environmental Protection.

"**PaPUC**" means the Pennsylvania Public Utility Commission.

"**Party**" means Buyer or the Seller, and the term "**Parties**" means collectively Buyer and the Seller.

"**PCB Equipment**" means PCB equipment as defined in 40 C.F.R. Part 761.

"**Permitted Liens**" means (a) Liens securing the Outstanding Indebtedness which (i) will be will be repaid and fully and unconditionally released, satisfied and discharged of record at the Closing or (ii) secure only that portion of the Outstanding Indebtedness that is assumed by Buyer at Closing, if any, pursuant to and in accordance with Section 3.01 and Section 7.11; (b) statutory Liens for Taxes not yet due and payable or which are being contested in good faith by appropriate procedures and for which appropriate reserves have been recorded in the Interim Financial Statements; (c) Liens in the nature of zoning restrictions, easements, rights-of-way or other restrictions of record on the use of the Real Property that, in the reasonable judgment of Buyer will not materially impair the continued use of the Real Property, the System and the Acquired Assets including the easements and rights-of-way for all wastewater lines and other facilities comprising the System, as the System and other Acquired Assets are currently being and have historically been used; (d) the Liens set forth on Schedule 1.01; and (e) mechanic's, materialman's, carrier's, repairer's and other similar Liens arising or incurred in the ordinary course of business under applicable Law or that are not yet due and payable or are being contested in good faith and by appropriate proceedings, in any case (i) for which reserves have been established on the Interim Financial Statements and (ii) that do not, and would not reasonably be expected to, individually or in the aggregate, materially and adversely affect the

value, or materially impair the continued use, of such Acquired Assets in the same or similar manner as currently being used; *provided, however*, that nothing contained in herein shall be construed as relieving the Seller of its obligation hereunder to deliver the Acquired Assets to Buyer on the Closing Date in the condition required under Article XIII of this Agreement.

"**Person**" means any individual, corporation, partnership, joint venture, association, limited liability company, joint-stock company, trust, or unincorporated organization, or any Governmental Authority or other entity.

"**Personnel**" means the employees of the Seller, and includes Union Personnel and Non-Union Personnel.

"**Policies**" and "**Policy**" have the meanings specified in Section 4.17(a).

"**Post-Closing Withdrawal Liability Payoff Amount**" has the meaning specified in Section 2.07(d).

"**Proposal**" means any written agreement, offer or proposal (including a letter of intent, term sheet, form of definitive agreement or definitive agreement) for a Sale Transaction.

"**Proposal Notice**" has the meaning specified in Section 7.05(b).

"**Purchase Price**" has the meaning specified in Section 3.01.

"**R&W Insurance Policy**" has the meaning specified in Section 10.01.

"**R&W Premium**" has the meaning specified in Section 10.01.

"**Rate Increase(s)**" has the meaning specified in Section 7.07(a).

"**RCRA**" means the Resource Conservation and Recovery Act, as amended.

"**Real Property**" has the meaning specified in Section 4.08(a).

"**Real Property Lease**" has the meaning specified in Section 4.08(b).

"**Regulated Asbestos Containing Material**" means regulated asbestos containing material as defined by 40 C.F.R. § 61.141.

"**Related Agreements**" means all agreements, instruments, ordinances and other documents contemplated by or executed and delivered by Buyer or Seller pursuant to this Agreement or in connection with the transactions contemplated hereby.

"**Release**" means any actual or threatened spilling, leaking, pumping, pouring, injecting, emptying, discharging, emitting, escaping, leaching, dumping, disposal, or release or migration of Hazardous Materials into the Environment, including the abandonment or discarding of barrels, containers and other receptacles containing any Hazardous Materials.

"**Remedial Action**" means any and all actions to (a) investigate, clean up, remediate, remove, treat, contain or in any other way address any Hazardous Materials in the Environment, (b) prevent the Release or threat of Release or minimize the further Release of any Hazardous Materials so it does not migrate or endanger public health or welfare or the indoor or outdoor Environment, and (c) perform pre-remedial studies and investigations and post-remedial monitoring, maintenance and care. The term "**Remedial Action**" includes any action which constitutes (i) a "removal", "remedial action" or "response" as defined by Section 101 of CERCLA, 42 U.S.C. §§ 9601(23), (24), and (25); (ii) a "corrective action" as defined in RCRA, 42 U.S.C. § 6901 et seq.; or (iii) a "response" or "interim response" as defined in the Pennsylvania Hazardous Sites Cleanup Act, 35 P.S. §6020.103.

"**Representative**" means, with respect to any Person, any director, officer, agent, employee, general partner, member, shareholder, advisor or other authorized representative of such Person.

"**Retained Equipment and Machinery**" has the meaning specified in Section 2.02(i).

"**Review Period**" has the meaning specified in Section 3.02(c).

"**Revised CSO Control Measures Plan**" means any revisions, amendments or changes to the CSO Control Measures Plan that is submitted and approved by EPA and PaDEP in accordance with the Consent Decree.

"**RFP**" has the meaning specified in the recitals to this Agreement.

"**ROFR Sale Transaction**" has the meaning specified in Section 7.05(d).

"**ROFR Sale Transaction Negotiation Period**" has the meaning specified in Section 7.05(d).

"**Sale Proposal Review Period**" has the meaning specified in Section 7.05(b).

"**Sale Transaction**" means any proposed sale, lease, liquidation or transfer of all or substantially all of the System or the Acquired Assets by Buyer, and including any other assets of Buyer or its Affiliates included in such proposed transaction; *provided*, that the term "Sale Transaction" excludes any sale or transfer of the equity interests, or all or substantially all the assets, of Buyer, Buyer Parent or any of their respective Affiliates.

"**Schedules**" means the disclosure schedules delivered by the Seller and Buyer respectively, concurrently with the execution and delivery of this Agreement, and as may be updated by a Seller Schedule Supplement or a Buyer Schedule Supplement, respectively.

"**Seller**" has the meaning specified in the Preamble of this Agreement.

"**Seller Indemnified Persons**" has the meaning specified in Section 8.03.

"**Seller NPDES Permit**" means the National Pollutant Discharge Elimination System Permit No. PA0026492 issued by PaDEP to the Seller with respect to the System.

"**Seller Post-Signing Event**" has the meaning specified in Section 9.03.

"**Seller Proposal Notice**" has the meaning specified in Section 7.05(c).

"**Seller Schedule Supplement**" has the meaning specified in Section 9.03.

"**Seller Successor**" has the meaning specified in Section 15.13(c).

"**Seller's Benefit Obligations**" have the meaning specified in Section 4.12.

"**Seller's Plans**" have the meaning specified in Section 4.12.

"**Service Area**" has the meaning specified in the recitals to this Agreement.

"**Stormwater System Assets**" means all assets owned by the Seller, the City or the Borough and used exclusively in the operation or maintenance of the MS4 System, including (i) drains, pipes and collection basins and all other stormwater drainage assets used exclusively for stormwater collection, conveyance and discharge; (ii) catch basins, inlets, pipes and all other stormwater lateral facilities (the "**Stormwater Lateral Facilities**") that connect surface stormwater drains to storm conveyances which discharge to surface waters, and (iii) the City NPDES Permit. Stormwater System Assets shall not include the Combined Sewer System Assets or any other property that is jointly used for (a) the collection, transportation and treatment of stormwater or otherwise in the operation of the stormwater system and (b) the operation of the System, including the Stormwater Lateral Facilities that connect surface stormwater drains to Combined Sewer System Assets mains.

"**Straddle Period**" has the meaning specified in Section 7.01.

"**Substantially Comparable Compensation and Benefits**" means wages, health/welfare, including holidays, vacation time, sick time, bereavement benefits and any personal days, as applicable, and retirement benefits that are, on an actuarial basis, substantially comparable to the aggregate value of Seller's then current wages, health/welfare plans and retirement benefit plans for current employees as of the Closing Date; provided however that any changes to Seller's wages, health/welfare and retirement benefits shall only be as allowed for by Section 9.01.

"**Supplies**" means all lubricants, spare parts, fuel, chemicals, raw materials, and other supplies and inventory, and all rights to warranties received from suppliers with respect to the foregoing, and related claims, credits, and rights of recovery with respect thereto.

"**System**" has the meaning specified in the recitals to this Agreement.

"**Target Cash**" means $38,340,626.

"**Tax**" or "**Taxes**" means all federal, state, local, foreign and other income, gross receipts, sales, use, production, ad valorem, transfer, franchise, registration, profits, license, lease, service, service use, withholding, payroll, employment, unemployment, estimated, excise, severance, environmental, stamp, occupation, premium, property (real or personal), real property gains,

windfall profits, customs, duties or other taxes, fees, assessments or charges of any kind whatsoever, together with any interest, additions or penalties with respect thereto and any interest in respect of such additions or penalties.

"**Tax Return**" means any return, declaration, form, report, claim, informational return (including all Forms 1099), election, disclosure, estimate or statement required to be filed with any Governmental Authority with respect to Taxes, including any schedule or attachment thereto or amendment thereof.

"**Taxing Authority**" means, with respect to any Tax or Tax Return, the Governmental Authority that imposes such Tax or requires a Person to file such Tax Return and the agency (if any) charged with the collection of such Tax or the administration of such Tax Return, in each case, for such Governmental Authority.

"**Threshold Amount**" has the meaning specified in Section 8.05(a).

"**Title Commitment**" has the meaning specified in Section 6.02(a).

"**Title Company**" has the meaning specified in Section 6.02(a).

"**Title Objection Items**" has the meaning specified in Section 6.02(a).

"**Title Policy**" has the meaning specified in Section 2.03.

"**Transaction Expense Amount**" means the sum of (a) the R&W Premium, *plus* (b) the aggregate amount of Transfer Taxes for which the Seller is responsible pursuant to Section 3.04 being paid by Buyer at the Closing, if any.

"**Transfer Taxes**" has the meaning specified in Section 3.04.

"**Transferred Personnel**" has the meaning specified in Section 7.04(a).

"**Transition Plan**" has the meaning specified in Section 7.06(d).

"**Trustees**" has the meaning specified in Section 2.07(a).

"**UCC Search**" has the meaning specified in Section 6.03.

"**Union**" means Teamsters Union Local 229.

"**Union Personnel**" means Personnel who are members of the Union.

"**Variance Adjustment**" has the meaning specified in Section 7.07(d).

"**WARN Act**" has the meaning specified in Section 4.13(d)(i).

"**Wastewater Treatment Plant**" means the wastewater treatment plant owned and operated by the Seller located at Cedar Avenue and Breck Street, Scranton, PA, with a permitted

average flow capacity of 20 million gallons per day, as authorized by PaDEP Water Quality Management Part II Permit No. 3510401.

"**Water System**" has the meaning specified in the Preamble of this Agreement.

"**Withdrawal Liability**" has the meaning specified in Section 2.07(a).

"**Withdrawal Liability Escrow Account**" has the meaning specified in Section 3.01(c).

"**Withdrawal Liability Escrow Amount**" has the meaning specified in Section 2.07(b).

"**Withdrawal Liability Escrow Release Date**" has the meaning specified in Section 2.07(c).

"**Withdrawal Liability Payoff Amount**" has the meaning specified in Section 2.07(a).

Other Defined Terms	**Defined in Section:**
Act 11	Section 7.09(a)(x)
Accounting Referee	Section 3.02(c)(iii)
Disputed Amounts	Section 3.02(c)(iii)
DOJ	Section 7.06(c)
Excluded Intellectual Property	Section 2.02(d)
Interim Financial Statements	Section 4.05
Post-Closing Adjustment	Section 3.02(b)(ii)
Resolution Period	Section 3.02(c)(ii)
Statement of Objections	Section 3.02(c)(ii)

ARTICLE II.

TERMS OF PURCHASE AND ASSUMPTION OF LIABILITIES

Section 2.01. **Purchase and Sale of Acquired Assets.** Subject to the terms and conditions set forth in this Agreement, at the Closing, Buyer shall purchase from the Seller and the Seller shall sell, transfer, assign, convey and deliver to Buyer, free and clear of all Liens other than Permitted Liens, all of the Seller's right, title and interest in and to all assets, properties, business, goodwill and rights of the Seller of every kind and description, whether tangible or intangible, real, personal or mixed, wherever situated, in each case used in, held for use in, or acquired or developed for use in, the System, or otherwise related to, or arising out of, the operation or conduct of the System (whether or not any such assets have any value for accounting purposes or are carried or reflected on the books or financial statements of the Seller), but in all cases other than the Excluded Assets (the foregoing, collectively, the "Acquired Assets"), including:

(a) all real property and appurtenant interests, Easements, rights of way, property rights and privileges owned, licensed or leased by the Seller including the Real Property, leases or licenses or other arrangements by or between the Seller and third Persons of the Real Property or other Acquired Assets (and any guaranties or other credit enhancement in connection therewith), and fixtures;

(b) all cash and cash equivalents, including accounts receivable;

(c) subject to Section 2.06, all rights in, to and under the Contracts listed on Schedule 2.01(c) (including any Contracts which may be added to Schedule 2.01(c) by the Seller following the date hereof and prior to the Closing at the written request or with the prior written consent of Buyer in accordance with Section 2.06(c)) (collectively, the "Assigned Contracts");

(d) all Supplies;

(e) all personal property and fixed assets, including all Equipment and Machinery owned, leased or licensed or otherwise used or usable by the Seller, and all system pipes, auxiliary equipment and plant equipment, other than the Retained Equipment and Machinery;

(f) all prepaid expenses and security deposits (including letters of credit and other noncash deposits);

(g) all Intellectual Property owned, licensed or otherwise used by the Seller, other than the Excluded Intellectual Property (the "Intellectual Property Assets");

(h) all other intangible assets, including, the benefit of third party representations, warranties and guarantees, correspondence and the computer software and programs (whether proprietary or not), including the intangible assets listed on Schedule 2.01(h);

(i) subject to Section 2.02(p), all Files and Records;

(j) subject to Section 2.06, all Licenses and Permits of or held by the Seller (to the extent transferrable to Buyer under applicable Law) (the "Acquired Authorizations"), including all Licenses and Permits which are environmental permits, the Seller NPDES Permit, other operating permits and those items listed or described on Schedule 4.16 hereto;

(k) all rights to any action, suit, claim or proceeding of any nature available to or being pursued by the Seller in respect of the System or any other Acquired Asset, whether arising by way of claim, counterclaim, right of recoupment or otherwise;

(l) the Combined Sewer System Assets; and

(m) all goodwill of the System.

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, THE SELLER MAKES NO EXPRESS OR IMPLIED REPRESENTATION OR WARRANTY OF ANY KIND WHATSOEVER, INCLUDING ANY REPRESENTATION AS TO THE PHYSICAL CONDITION OR VALUE OF ANY OF THE ACQUIRED ASSETS OR THE SYSTEM, OR

THE FUTURE PROFITABILITY OR FUTURE EARNINGS PERFORMANCE OF THE ACQUIRED ASSETS OR THE SYSTEM OR ANY FUTURE RATEMAKING THAT MAY BE ALLOWED BY THE PAPUC FOR ANY OF THE ACQUIRED ASSETS. ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE EXPRESSLY EXCLUDED.

Section 2.02. **Excluded Assets.** Notwithstanding anything herein to the contrary, the Acquired Assets shall not include the following assets, properties and rights of Seller (the "Excluded Assets"):

(a) the Stormwater System Assets;

(b) the Seller's telephone numbers and fax numbers;

(c) all Contracts other than the Assigned Contracts;

(d) all Intellectual Property set forth on Schedule 2.02(d) (the "Excluded Intellectual Property");

(e) the corporate seals, organizational documents, minute books, Tax Returns, books of account or other records having to do with the organization of Seller, all employee-related or employee benefit-related files or records, other than personnel files of Transferred Personnel, and any other books and records which Seller is prohibited from disclosing or transferring to Buyer under applicable Law and is required by applicable Law to retain;

(f) all insurance policies of Seller and rights to applicable claims and proceeds thereunder, except as otherwise provided in Section 7.13 and Section 15.04;

(g) all Seller's Plans and trusts or other assets attributable thereto;

(h) the assets, properties and rights specifically set forth on Schedule 2.02(h);

(i) the Equipment and Machinery specifically set forth on Schedule 2.02(i) (the "Retained Equipment and Machinery");

(j) the City NPDES Permit;

(k) any unamortized debt expenses;

(l) the accounts receivable set forth on Schedule 2.02(l) (the "Excluded Accounts Receivable"), which Schedule shall be delivered by Buyer to the Seller not less than three (3) Business Days prior to the Closing Date, and which Excluded Accounts Receivable shall be written off by the Seller concurrently with the Closing, and all Liens related thereto;

(m) all Liens held by the Seller with respect to accounts of customers of the System which are not transferrable to Buyer under applicable Law, other than Liens relating to the Excluded Accounts Receivable;

(n) the rights which accrue or will accrue to the Seller under this Agreement and the Related Agreements;

(o) the MS4 System Real Property, including the MS4 System Real Property listed on Schedule 2.02(o); and

(p) all privileged materials, documents and records of the Seller related solely to the sale of the System, including all such privileged materials, documents and records related solely to the negotiation, execution, delivery, or performance of this Agreement.

Section 2.03. **Conveyance of Title.** At the Closing, the Seller shall (i) sell, transfer, assign, convey and deliver to Buyer good and valid title to the Acquired Assets (other than Owned Real Property, Leased Real Property and Easements), (ii) grant, bargain, sell, transfer, assign and convey to Buyer all of the Seller's right, title and interest in and to a valid fee simple estate in the Owned Real Property included in the Acquired Assets, (iii) assign, transfer and convey to Buyer all of the Seller's right, title and interest in and to a valid leasehold estate in the Leased Real Property included in the Acquired Assets, and (iv) assign, transfer and convey to Buyer all of the Seller's right, title and interest in and to any and all Easements included in the Acquired Assets, including all Easements that are necessary for or used in connection with the operation of the System or to provide continuous and unimpeded rights of way for the Combined Sewer System Assets (including access thereto), in each case free and clear of all Liens, other than Permitted Liens. The Acquired Assets shall be conveyed by special warranty deeds, bills of sale, assignments and other instruments of transfer or conveyance reasonably satisfactory to Buyer and the Title Company. Title to the Real Property shall be insurable by the Title Company, at regular rates, as a good and marketable title, free and clear of all Liens and exceptions to coverage, except for Permitted Liens and otherwise as provided for in Section 6.02(a) below, pursuant to an owner's policy of title insurance on the American Land Title Association's ("ALTA") Owner's Form 2006 (the "Title Policy").

Section 2.04. **Assumption of Liabilities.**

(a) On the terms and subject to the conditions set forth in this Agreement and excluding the Excluded Liabilities, Buyer shall assume and agrees to pay, perform and discharge when due, only the following liabilities and obligations of the Seller and no others (the "Assumed Liabilities"): (1) liabilities and obligations arising under the Consent Decree (whether arising from, related to, or based on events or circumstances occurring prior to, on or after the Closing Date, and including the Seller's obligations and covenants set forth in the Consent Decree regarding implementation of the CSO Control Measures to be performed on or after the Closing) but excluding any Environmental Liabilities arising from the non-compliance events and conditions described in Schedule 4.14, (2) in the event that Buyer and the Union have agreed prior to the Closing to enter into the Amended CBA effective as of immediately following the Closing, liabilities and obligations under the Amended CBA (*provided*, that for the avoidance of doubt, in no event shall the Assumed Liabilities include any liabilities or obligations with respect to the Accrued PTO, which shall be cashed-out and paid in full to the applicable Union Personnel by the Seller in accordance with Section 7.04(c) (and in any event shall constitute an Excluded Liability)), (3) all liabilities and obligations related to the System or the Acquired Assets to the extent arising from, related to, or based on events or circumstances occurring after

the Closing, (4) all liabilities and obligations of the Seller arising under or to be performed under the executory portions of the Assigned Contracts after the Closing; *provided, however*, that Buyer will not assume or be responsible for any liabilities or obligations that arise from the Seller's breach of or default under any Assigned Contracts on or prior to the Closing Date, all of which liabilities and obligations constitute Excluded Liabilities, and (5) in the event that Buyer elects to assume any portion of the Outstanding Indebtedness at the Closing pursuant to Section 3.01, the Seller's obligations relating to such portion of the Outstanding Indebtedness so assumed by Buyer (but only to the extent of the Outstanding Indebtedness actually assumed by Buyer).

(b) Buyer shall not assume or be liable to pay any liabilities or obligations relating to the Excluded Liabilities or any other liabilities or obligations that are not Assumed Liabilities.

Section 2.05. **Subsequent Documentation; Further Acts.** At any time and from time to time after the Closing Date, the Seller shall, upon the request of Buyer, and Buyer shall, upon the request of the Seller, at the cost of requesting Party, promptly execute, acknowledge and deliver, or cause to be executed, acknowledged and delivered, such other instruments of conveyance and transfer and other documents, and perform or cause to be performed such further acts, as may be reasonably required to evidence or effectuate, or more fully evidence or effectuate, (a) the sale, transfer, assignment, conveyance and delivery hereunder of the Acquired Assets to Buyer, (b) the assumption by Buyer of any of the Assumed Liabilities, and (c) the vesting in Buyer of all right, title and interest in the Acquired Assets and the System as provided herein.

Section 2.06. **Certain Transfers; Assignment of Contracts.**

(a) Notwithstanding anything to the contrary in this Agreement, and subject to the provisions of this Section 2.06(a) and Section 2.06(b), to the extent that the sale, transfer, assignment, conveyance and delivery, or attempted sale, transfer, assignment, conveyance and delivery, to Buyer of any Assigned Contract or other Acquired Asset would result in a violation of applicable Law, or would require the consent, authorization, approval or waiver of any Person (other than the Parties hereto), including any Governmental Authority, and such consent, authorization, approval or waiver shall not have been obtained prior to the Closing, this Agreement shall not constitute a sale, transfer, assignment, conveyance and delivery, or an attempted sale, transfer, assignment, conveyance and delivery, thereof (any such Acquired Asset, a "Nonassignable Asset"). For a period of six (6) months following the Closing, the Seller and Buyer shall use commercially reasonable efforts (at the Seller's cost and expense), and shall cooperate with each other, to obtain any such required consent, authorization, approval or waiver, or any release, substitution, novation or amendment required to sell, transfer, assign, convey and deliver any such Nonassignable Asset to Buyer; *provided, however,* that in no event shall Buyer be required to pay any consideration therefor. Once such consent, authorization, approval, waiver, release, substitution or amendment is obtained, the Seller shall sell, transfer, assign, convey and deliver to Buyer the relevant Nonassignable Asset to which such consent, authorization, approval, waiver, release, substitution or amendment relates for no additional consideration, and such Nonassignable Asset shall thereafter constitute and be deemed an "Acquired Asset" for all purposes hereunder . Any applicable sales, transfer and other similar

Taxes in connection with such sale, transfer, assignment, conveyance and delivery shall be paid by Buyer and Seller pursuant to the provisions of Section 3.04(a).

(b) Until such time as a Nonassignable Asset is transferred to Buyer pursuant to this Section 2.06, Buyer and the Seller shall cooperate in any commercially reasonable and economically feasible arrangements (such as subleasing, sublicensing or subcontracting) to provide to the Parties the economic and, to the extent permitted under applicable Law, operational equivalent of the transfer of such Nonassignable Asset to Buyer at the Closing and the performance by Buyer of its obligations with respect thereto, and to the extent that the Seller transfers and turns over the economic and beneficial rights with respect to each such Nonassignable Asset, Buyer shall, to such extent and to the extent permitted under applicable Law and the terms of any applicable Contract that constitutes a Nonassignable Asset, as agent or subcontractor for the Seller, pay, perform and discharge the liabilities and obligations of the Seller thereunder from and after the Closing Date, but only to the extent that such liabilities and obligations would constitute Assumed Liabilities if the applicable consent or approval had been obtained on or prior to the Closing Date and such Nonassignable Asset had been assigned to Buyer at Closing. To the extent permitted under applicable Law, the Seller shall, at Buyer's expense, hold in trust for and pay to Buyer promptly upon receipt thereof, such Nonassignable Asset and all income, proceeds and other monies received by the Seller with respect to such Nonassignable Asset in connection with the arrangements under this Section 2.06.

(c) If, following the date hereof and prior to the Closing, Buyer identifies any Contract to which the Seller is a party which is not set forth on Schedule 2.01(c) as of the date hereof and Buyer desires for such Contract to be included in the Acquired Assets as an Assigned Contract, and Buyer reasonably determines that such Contract is used in, held for use in, or acquired or developed for use in, the System, or otherwise related to, or arising out of, the operation or conduct of the System, Buyer shall give notice of such determination to the Seller and, unless the Seller disagrees in good faith with Buyer's determination that such Contract is used in, held for use in, or acquired or developed for use in, the System, or otherwise related to, or arising out of, the operation or conduct of the System (in which case the Seller shall give Buyer notice of such disagreement and the Parties shall work together in good faith to resolve such dispute), the Seller shall, promptly following receipt of such notice, deliver to Buyer an updated Schedule 2.01(c) reflecting the addition of such Contract, and such Contract shall thereafter constitute and be deemed an "Assigned Contract" for all purposes hereunder (including, for the avoidance of doubt, the provisions of Section 2.06(a) and Section 2.06(b) to the extent applicable to such Contract from and after the Closing).

(d) In the event that, during the twelve (12) month period following the Closing, Buyer identifies any Contract to which the Seller was a party as of the Closing and which was not set forth on Schedule 2.01(c) (as may be updated pursuant to Section 2.06(c)) and (i) Buyer desires for such Contract to be assigned to Buyer and deemed an Assigned Contract as provided in this Section 2.06(d), and (ii) Buyer reasonably determines such Contract was, prior to the Closing, used in, held for use in, or acquired or developed for use in, the System, or otherwise related to, or arising out of, the operation or conduct of the System, unless the Seller disagrees in good faith with Buyer's determination that such Contract was not, as of or prior to the Closing, used in, held for use in, or acquired or developed for use in, the System, or otherwise related to, or arising out of, the operation or conduct of the System (in which case the Seller shall give

Buyer notice of such disagreement and the Parties shall work together in good faith to resolve such dispute) and Seller has not otherwise terminated such Contract on or after Closing, the Seller shall, promptly following Buyer's written request therefor, execute, acknowledge and deliver, or cause to be executed, acknowledged and delivered, such other instruments of conveyance and transfer and other documents, and perform or cause to be performed such further acts, as may be reasonably required to evidence or effectuate, or more fully evidence or effectuate the assignment of such Contract to Buyer for no additional consideration, and upon such assignment, such Contract shall be deemed an "Assigned Contract" for all purposes hereunder. From the time that Buyer delivers written notice to the Seller in accordance with this Section 2.06(d) requesting that the Seller assign or cause the assignment of such Contract to Buyer until such Contract is assigned to Buyer, the provisions of Section 2.06(a) and Section 2.06(b) shall apply to such Contract as a Nonassignable Asset.

(e) For the avoidance of doubt, nothing contained in this Section 2.06 shall be applicable to the Easements or other matters with respect to the Real Property as of and following the Closing (including the transfer thereof following the Closing), which shall be governed exclusively by the terms of Article VI.

Section 2.07. **Withdrawal Liability.**

(a) Following the date hereof, and except as otherwise provided in Section 2.07(g) below, the Seller shall, and Buyer shall reasonably cooperate with the Seller to, request from the trustees of the Multiemployer Plan (the "Trustees") consent and agreement of the Trustees to the payment of an amount at Closing in full and final satisfaction of the withdrawal liability that would be assessed against the Seller for withdrawal from the Multiemployer Plan as of the Closing (the "Withdrawal Liability"). In the event that the Seller obtains the written consent of the Trustees, on terms reasonably acceptable to Buyer, to the payment at the Closing of an aggregate amount in full and final satisfaction of the Withdrawal Liability and the Seller's obligations with respect to the Multiemployer Plan (the "Withdrawal Liability Payoff Amount"), (i) the Seller shall deliver written evidence of such consent to Buyer prior to the Closing Date, which written evidence include instructions for the payment by Buyer at the Closing on behalf of the Seller, and shall otherwise be in form and substance reasonably acceptable to Buyer, and, (ii) subject to the foregoing clause (i), Buyer shall pay the Withdrawal Liability Payoff Amount on behalf of the Seller out of the proceeds of the sale at the Closing pursuant to Section 3.01(c).

(b) In the event that the Seller is unable to obtain the consent of the Trustees to the payment at Closing of the amount required to fully pay, satisfy and discharge the entire amount of the Withdrawal Liability as described in Section 2.07(a), then (i) the Seller and Buyer shall, each acting reasonably and in good faith (and taking into account the most recent estimate obtained by the Trustees of the amount required to fully and finally satisfy the Withdrawal Liability and the Seller's obligations with respect to the Multiemployer Plan as of a date reasonably proximate to the Closing Date), agree in writing prior to the Closing Date, on an estimate of the amount required to fully pay, satisfy and discharge the entire amount of the Withdrawal Liability (such amount, the "Estimated Withdrawal Liability Amount"), and (ii) Buyer shall, at the Closing, deliver to the Escrow Agent an amount equal to one hundred and ten percent (110%) of the Estimated Withdrawal Liability Amount (the "Withdrawal Liability Escrow Amount") pursuant to Section 3.01(c).

(c) The Escrow Agent shall hold the Withdrawal Liability Escrow Amount in the Withdrawal Liability Escrow Account until the date on which Buyer and the Seller, after having obtained the written consent of the Trustees to the payment of an aggregate amount in full and final satisfaction of the Withdrawal Liability and the Seller's obligations with respect to the Multiemployer Plan, on terms reasonably acceptable to Buyer, jointly instruct the Escrow Agent in writing to disburse the Withdrawal Liability Escrow Amount as provided herein (such date, the "Withdrawal Liability Escrow Release Date").

(d) On the Withdrawal Liability Escrow Release Date, the Seller and Buyer shall jointly instruct the Escrow Agent in writing to make payment by wire transfer of immediately available funds from the Withdrawal Liability Escrow Account directly to the account or accounts specified in the written consent of the Trustees, in the amount (such amount, the "Post-Closing Withdrawal Liability Payoff Amount") equal to the amount set forth in the written consent of the Trustees as described in Section 2.07(c).

(e) If the Post-Closing Withdrawal Liability Payoff Amount is an amount that exceeds the aggregate amount of funds in the Withdrawal Liability Escrow Account on the Withdrawal Liability Escrow Release Date, the Seller shall, concurrently with the disbursement by the Escrow Agent of the entire balance of the Withdrawal Liability Escrow Account, pay (by wire transfer of immediately available funds) to the account or accounts specified in the written consent of the Trustees, the amount of such excess.

(f) If the Post-Closing Withdrawal Liability Payoff Amount is an amount that is less than the aggregate amount of funds in the Withdrawal Liability Escrow Account on the Withdrawal Liability Escrow Release Date, the Seller and Buyer shall jointly instruct the Escrow Agent in writing to make payment, by wire transfer of immediately available funds from the Withdrawal Liability Escrow Account to the Seller in an amount, if any, of the balance of any funds remaining in the Withdrawal Liability Escrow Account immediately following the payment of the Post-Closing Withdrawal Liability Payoff Amount.

(g) Notwithstanding the foregoing provisions of this Section 2.07, following the Effective Date, it is agreed that the Seller and Buyer shall enter into good faith discussions surrounding the possible application of the asset sale exception pursuant to Section 4204 of ERISA as an alternative to the payment of the Withdrawal Liability as provided in the foregoing provisions of this Section 2.07, *provided* that the Parties acknowledge and agree that unless and only in the event that the Seller and Buyer agree in writing prior to the Closing Date to mutually satisfactory terms regarding the implementation of the asset sale exception pursuant to Section 4204 of ERISA in connection with the transactions contemplated by this Agreement, the foregoing provisions of this Section 2.07 shall be applicable.

ARTICLE III.

PURCHASE PRICE

Section 3.01. **Purchase Price.** The purchase price for the sale, transfer, assignment, conveyance and delivery hereunder of the Acquired Assets to Buyer hereunder shall be One Hundred Ninety Five Million Dollars ($195,000,000) (the "Base Amount"), which, subject to

any adjustment pursuant to Section 3.02 (the "Purchase Price") shall be paid as follows at Closing:

(a) Buyer shall (i) pay in full (in the case of Outstanding Indebtedness then subject to prepayment or redemption) or make provision for the payment in full so as to effect a legal defeasance of (in the case of Outstanding Indebtedness not then subject to prepayment or redemption), on behalf of the Seller, the total amount of Outstanding Indebtedness as of the Closing Effective Time (the "Closing Outstanding Indebtedness Amount"), *less* any amount of the Outstanding Indebtedness actually assumed by Buyer pursuant to clause (ii) of this Section 3.01(a), and (ii) subject to Section 7.11 and at Buyer's sole and absolute discretion, assume such portion of the Outstanding Indebtedness (if any) as Buyer, in its sole and absolute discretion, elects to assume and which may be lawfully assigned to and assumed by Buyer pursuant to applicable Law and the terms of the Contracts governing the Outstanding Indebtedness, subject to obtaining the written release of the Seller and the City from all obligations thereunder in such form and terms reasonably acceptable to the Seller.

(b) Buyer shall pay to the Escrow Agent an amount equal to Five Million Dollars ($5,000,000) (the "Escrow Amount"), to be held by the Escrow Agent pursuant to the terms of the Escrow Agreement in a segregated account (the "Escrow Account") for a period of up to the Escrow Release Date, to be utilized to fund any payments required to be made in connection with any claim made pursuant to Article VIII;

(c) subject to Section 2.07, Buyer shall pay (i) to the account or accounts specified in the written consent of the Trustees as described in Section 2.07, on behalf of the Seller, the Withdrawal Liability Payoff Amount, or (ii) to the Escrow Agent, an amount equal to the Withdrawal Liability Escrow Amount, to be held by the Escrow Agent pursuant to the terms of the Escrow Agreement in a segregated account (the "Withdrawal Liability Escrow Account") for a period of up to the Withdrawal Liability Escrow Release Date, to be utilized as provided in Section 2.07; and

(d) Buyer shall pay to the Seller by wire transfer of immediately available funds an amount equal to the Base Amount (i) *plus* the Estimated Closing Cash Increase (if any) or *minus* the Estimated Closing Cash Reduction (if any), (ii) *minus* the Closing Outstanding Indebtedness Amount, (iii) *minus* the Escrow Amount, (iv) *minus* (x) the Withdrawal Liability Payoff Amount or (y) the Withdrawal Liability Escrow Amount, as the case may be, and (v) *minus* the Transaction Expense Amount, to one or more accounts that the Seller designates in writing and provides to Buyer at least three (3) Business Days prior to the Closing Date.

Section 3.02. **Purchase Price Adjustment.**

(a) Estimated Closing Cash. No less than three (3) Business Days prior to the Closing Date, the Seller shall prepare a statement (the "Estimated Closing Cash Statement") setting forth the estimated aggregate amount of the Closing Cash Balance, as determined in good faith by the Seller (the "Estimated Closing Cash Balance") and prepared and calculated accordance with the manner of determination and calculation (as applicable), using the same line items, accounting principles, practices, procedures, policies and methods (with consistent classifications, judgments, elections, inclusions, exclusions and valuation and estimation

methodologies) used and applied in preparing the Interim Financial Statements, and which Estimated Closing Cash Statement shall set forth the actual amount paid by the Seller prior to the Closing to cash-out the Accrued PTO in accordance with Section 7.04(c), and the portion thereof attributable to the cash-out of the Accrued Sick Bank. In the event that the Estimated Closing Cash Balance exceeds the Target Cash, then the Purchase Price will be increased by the amount of such difference and such increase shall be paid to the Seller at Closing in the manner provided in Section 3.01 above (the amount of any such increase, the "Estimated Closing Cash Increase"). In the event that the Target Cash exceeds the Estimated Closing Cash Balance, then the Purchase Price (and the amount payable by Buyer at Closing) will be reduced by the amount of such difference (the amount of any such reduction, the "Estimated Closing Cash Reduction"). The Purchase Price, as adjusted pursuant to this Section 3.02(a), shall be subject to further adjustment following the Closing as provided in Section 3.02(b).

(b) Post-Closing Adjustments.

(i) Within ninety (90) days after the Closing Date, Buyer shall prepare and deliver to the Seller a statement (the "Closing Cash Statement") setting forth Buyer's good faith calculation of the Closing Cash Balance, prepared and calculated accordance with the manner of determination and calculation (as applicable), using the same line items, accounting principles, practices, procedures, policies and methods (with consistent classifications, judgments, elections, inclusions, exclusions and valuation and estimation methodologies) used and applied in preparing the Interim Financial Statements.

(ii) The "Post-Closing Adjustment" shall be an amount equal to the Estimated Closing Cash Balance minus the Closing Cash Balance, as finally determined pursuant to Section 3.02(c). If the Post-Closing Adjustment is a positive number, Buyer shall pay to the Seller an amount equal to the Post-Closing Adjustment in accordance with Section 3.02(c)(vi) below. If the Post-Closing Adjustment is a negative number, the Seller shall pay to Buyer an amount equal to the Post-Closing Adjustment (expressed as a positive number) in accordance with Section 3.02(c)(vi) below.

(c) Examination and Review.

(i) After receipt of the Closing Cash Statement, the Seller shall have forty-five (45) days (the "Review Period") to review the Closing Cash Statement. During the Review Period, the Seller and the Seller's Representatives shall have reasonable access (during normal business hours upon reasonable advance notice) to, including by being furnished copies of, such financial information (to the extent in Buyer's or its Representatives' possession) and documents to the extent used in or directly relating to the preparation of the Closing Cash Statement as the Seller may reasonably request for the purpose of reviewing the Closing Cash Statement and to prepare a Statement of Objections.

(ii) The Seller may object to the Closing Cash Statement by delivering to Buyer, no later than the last day of the Review Period, a written statement setting forth the Seller's objections in reasonable detail, indicating each disputed item or amount and the basis for the Seller's disagreement therewith (the "Statement of Objections");

provided that the Seller's grounds for any such objections shall be limited to fixing manifest errors and omissions, including mathematical errors or omissions, in Buyer's calculations and claims that the items in dispute were not calculated and determined in accordance with the accounting principles and procedures set forth in this Agreement. If the Seller fails to deliver the Statement of Objections before the expiration of the Review Period, the Closing Cash Statement (as prepared by Buyer) and the Post-Closing Adjustment reflected in the Closing Cash Statement shall be deemed to have been accepted by the Seller and shall be deemed final and binding on the Parties for all purposes hereunder. If the Seller delivers the Statement of Objections before the expiration of the Review Period, Buyer and the Seller shall negotiate in good faith to resolve such objections within thirty (30) days after the delivery of the Statement of Objections (the "Resolution Period"), and, if each disputed item properly included in the Statement of Objections is resolved in writing within the Resolution Period, the Post-Closing Adjustment and the Closing Cash Statement, with such changes as are agreed in writing by Buyer and the Seller during the Resolution Period, shall be final and binding upon the Parties for all purposes hereunder.

(iii) If the Seller and Buyer fail to reach an agreement with respect to all of the matters set forth in the Statement of Objections before expiration of the Resolution Period, then any amounts remaining in dispute ("Disputed Amounts") shall be submitted for resolution to RSM US LLP or such other regionally recognized firm of independent certified public accountants mutually agreed upon by the Parties other than the accountants of Buyer or the Seller or their Affiliates (the "Accounting Referee") who, acting as experts and not arbitrators, shall resolve the Disputed Amounts only and make any adjustments to the Closing Cash Statement and the Post-Closing Adjustment to reflect the resolution of such Disputed Amounts. The Accounting Referee shall only decide the specific Disputed Amount, and the scope of the disputes to be resolved by such Accounting Referee shall be limited to fixing mathematical errors and determining whether the items in dispute were calculated and determined in accordance with the accounting principles and procedures set forth in this Agreement, and the Accounting Referee's decision for each Disputed Amount must be within the range of values assigned to each such item in the Closing Cash Statement and the Statement of Objections, respectively.

(iv) All fees and costs of the Accounting Referee will be borne pro rata by Buyer and the Seller in proportion to the difference between the Accounting Referee's determination of Post-Closing Adjustment and the Seller's and Buyer's determination of such Post-Closing Adjustment. For example, if the Seller's determination differs by $20,000 from the Accounting Referee's determination, but Buyer's determination only differs by $5,000, the Seller will bear 20/25 (or 80%) of such fees and costs and Buyer will bear 5/25 (or 20%) of such fees and costs.

(v) The Accounting Referee shall make a determination as soon as practicable within thirty (30) days (or such other time as the Parties shall agree in writing) after their engagement, and their resolution of the Disputed Amounts and their adjustments to the Closing Cash Statement and the Post-Closing Adjustment shall be conclusive and binding upon the Parties.

(vi) Payment of the Post-Closing Adjustment shall (A) be due (x) within five (5) Business Days following the expiration of the Review Period (if the Seller does not timely deliver a Statement of Objections) or (y) if the Seller timely delivers a Statement of Objections, then within five (5) Business Days following the earlier to occur of (1) written agreement of the Parties with respect to the resolution of all items in dispute, or (2) final resolution by the Accounting Referee; and (B) be paid by wire transfer of immediately available funds to such accounts as are directed in writing by Buyer or the Seller, as the case may be.

(d) Any payments made pursuant to this Section 3.02 shall be treated as an adjustment to the Purchase Price by the Parties for Tax purposes, unless otherwise required by applicable Law.

(e) Any payment or distribution to customers of the Variance Adjustment made pursuant to Section 7.07 shall be treated as an adjustment to the Purchase Price by the Parties for Tax purposes and any other purposes under applicable Law, unless otherwise required by applicable Law.

Section 3.03. **Allocation of the Purchase Price.** Buyer and the Seller agree that the Purchase Price (which for purposes of this Section 3.03 shall include any liabilities required to be treated as part of the Purchase Price for U.S. federal income Tax purposes), as may be adjusted pursuant to Section 3.02, shall be allocated among the Acquired Assets in accordance with the allocation reflected in a schedule prepared by Buyer in accordance with this Section 3.03 (the "Allocation Schedule") as required by the Code. Within sixty (60) days following the final determination of the Purchase Price pursuant to Section 3.02, Buyer shall deliver to the Seller a draft of the Allocation Schedule setting forth Buyer's proposed allocation for the Seller's review. The Seller shall have the right to review and reasonably comment upon Buyer's proposed Allocation Schedule, *provided*, that (a) such proposed Allocation Schedule shall be deemed approved by the Seller and shall be final and binding upon the Parties unless the Seller provides written notice of the Seller's comments to one or more items reflected in the proposed Allocation Schedule within twenty (20) Business Days after delivery of the proposed Allocation Schedule to the Seller, and (b) upon receipt of any such written comments from the Seller with respect to the proposed Allocation Schedule, Buyer may make such adjustments or revisions to the proposed Allocation Schedule based on the Seller's comments as Buyer determines in good faith to be necessary and appropriate, *provided further*, that Buyer shall have no obligation to make any such adjustments or revisions absent manifest error. The Parties shall adhere to the Allocation Schedule (as finally determined pursuant to this Section 3.03) for all purposes relevant to the calculation of federal or state Taxes, and will report the transactions contemplated herein in a manner consistent with such Allocation Schedule. Except as required by applicable Law, Buyer and the Seller shall not take any position on their respective Tax Returns that is inconsistent with the Allocation Schedule.

Section 3.04. **Transfer Taxes; Bulk Sales.**

(a) Any and all deed stamps or transfer Taxes which may be due the Commonwealth of Pennsylvania or any political subdivision in connection with the sale, transfer, assignment, conveyance and delivery hereunder of the Acquired Assets to Buyer (collectively, "Transfer

Taxes"), shall, except as otherwise provided below, be borne seventy five percent (75%) by Buyer and twenty five percent (25%) by the Seller, and in the event that Buyer pays the full amount of any such Transfer Taxes following the Closing, the Seller shall promptly, and in any event within five (5) Business Days, following Buyer's request therefor, pay to Buyer an amount equal to twenty five percent (25%) of any such Transfer Taxes so paid by Buyer, *provided, that*, the Seller's obligation to pay such Transfer Taxes hereunder is limited to an aggregate amount of $100,562.28 and in no event shall the Seller be required to pay any Transfer Taxes in excess of such amount. Without limiting the foregoing, in the event that Buyer is required under applicable Law, or elects in its sole discretion, to pay any Transfer Taxes at the Closing, then Buyer shall give written notice to the Seller prior to the Closing Date of such payment, which notice shall include the aggregate amount of such Transfer Taxes being paid at Closing and the portion for which the Seller is responsible (which, for the avoidance of doubt, shall be the lesser of (x) twenty five percent (25%) of such Transfer Taxes being paid at the Closing or (y) $100,562.28), and upon Buyer's delivery of such notice, the Seller's portion of such Transfer Taxes shall be included in the Transaction Expense Amount for purposes of Section 3.01(d). The terms hereof shall survive Closing.

(b) The Parties hereby waive compliance with the provisions of any bulk sales, bulk transfer or similar Laws of any jurisdiction that may otherwise be applicable with respect to the sale of any or all of the Acquired Assets to Buyer.

ARTICLE IV.

REPRESENTATIONS AND WARRANTIES OF THE SELLER

The Seller makes only the representations and warranties which are set forth in this Article IV. Any matter, information or item disclosed on any particular Schedule delivered by the Seller which is numbered to correspond to the representations and warranties contained in this Article IV shall be deemed to have been disclosed in response to such other representations or warranties in this Article IV in respect of which such disclosure is reasonably apparent on its face notwithstanding the omission of an appropriate cross-reference.

As a material inducement to Buyer to enter into this Agreement and to consummate the transactions contemplated hereby, the Seller represents and warrants to Buyer, as of the date hereof and as of the Closing Date, as follows:

Section 4.01. **Existence and Power.** The Seller is a municipal authority under the Municipality Authorities Act, as enacted by the Commonwealth of Pennsylvania, as amended, and in good standing under the Laws of the Commonwealth of Pennsylvania. The Seller has all requisite power and authority to own, lease and operate the Acquired Assets and the System, to sell and transfer in the manner described herein the Acquired Assets to Buyer and to enter into, execute and deliver this Agreement and the Related Agreements and perform its obligations hereunder and thereunder.

Section 4.02. **Authorization and Validity of Agreement.** The execution and delivery of this Agreement and the Related Agreements by the Seller and the consummation by the Seller of the transactions contemplated by this Agreement and the Related Agreements have been duly

and validly authorized by all necessary action on the part of the Seller, and no other proceedings on the part of the Seller are necessary to authorize the execution, delivery and performance of this Agreement or any applicable Related Agreement. This Agreement has been duly executed and delivered by the Seller and constitutes, and the Related Agreements, when executed and delivered, will constitute legal, valid and binding obligations of the Seller, enforceable against the Seller in accordance with their respective terms and conditions, except to the extent that enforceability may be limited by applicable bankruptcy, insolvency, reorganization or other Laws affecting the enforcement of creditors' rights generally. A true, correct and complete copy of the authorizing resolutions duly adopted by the Authority Board is attached hereto as Exhibit D, which resolutions have not been, and as of the Closing will not have been, revoked, rescinded or amended.

Section 4.03. **No Conflict or Violation.** Except as set forth on Schedule 4.03, the execution, delivery and performance of this Agreement and the Related Agreements by the Seller do not and shall not: (a) violate or conflict with, or result in a breach or constitute a default under, any provision of the charter, bylaws or other similar organizational or governing documents of the Seller, (b) violate, conflict with, result in a breach or constitute a default under any provision of, or require any Governmental Approval or any notice, filing, consent, authorization or approval under, any Licenses and Permits held by the Seller or any applicable Law of any Governmental Authority having jurisdiction over the Seller, the System or any of the Acquired Assets, or the City, the Borough, or their respective assets or properties, (c) violate, conflict with, or result in a breach of or constitute (with due notice or lapse of time or both) a default under any provision of, or require any notice, filing, consent, authorization or approval under, or give rise to any rights of termination, amendment, modification, acceleration or cancellation of or loss of any benefit under, or result in the creation of any Lien on any of the Acquired Assets or any other material assets or properties of Seller (other than Permitted Liens) pursuant to, any Contract to which the Seller is a party, or by which any of the Acquired Assets or any other material assets and properties of the Seller are bound or subject, or (d) result in the imposition of any Liens or other restrictions on the System or any of the Acquired Assets, other than Permitted Liens, except, in the case of the foregoing clauses (b), (c) and (d), where such violation, conflict, breach, default, requirement, or resulting Lien or other restriction would not reasonably be expected to have a material and adverse effect on the System or any of the Acquired Assets (or Buyer's ownership or operation thereof following the Closing) or materially impair the Seller's ability to timely consummate the transactions contemplated hereby or perform its obligations hereunder.

Section 4.04. **Consents and Approvals.** Schedule 4.04 sets forth a list of each consent, waiver, authorization or approval of any Governmental Authority, or of any other Person, and each declaration or notice to or filing or registration with any Governmental Authority required to be obtained, given or made by the Seller in connection with the execution and delivery of this Agreement and each Related Agreement by the Seller and the performance by the Seller of its obligations hereunder and thereunder.

Section 4.05. **Financial Statements.**

(a) Schedule 4.05 sets forth the following financial statements of the Seller (collectively, the "Financial Statements"): (i) the audited financial statements of the Seller for

the fiscal years ended March 31, 2015, March 31, 2014 and March 31, 2013, which consist of the statements of net position and statements of revenues, expenses and changes in net position for the fiscal years then ended (the "Audited Financial Statements"), and (ii) the unaudited balance sheet as of January 31, 2016 and the related unaudited income statement for the ten-month period then ended (the "Interim Financial Statements"). Except as set forth on Schedule 4.05, the Financial Statements have been prepared and presented in accordance with the applicable standards for financial reporting of the GASB, consistently applied, and fairly present, in all material respects, the financial condition and results of operations of the Seller as of the respective dates of, and for the periods referred to in, the Financial Statements, subject in the case of the Interim Financial Statements, to the absence of footnote disclosures and normal year-end adjustments which, if presented, would not be material in amount or differ materially from those presented in the Audited Financial Statements.

(b) The Seller has established and maintains, adheres to and enforces a system of internal accounting controls which are, in all material respects, effective in providing assurance regarding the reliability of financial reporting and the preparation of financial statements (including the Financial Statements) in accordance with GASB, including policies and procedures that (i) require the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Seller and the System, (ii) provide assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GASB, and that receipts and expenditures of the Seller and the System are being made only in accordance with appropriate authorizations of management and (iii) provide assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the assets of the Seller and the System.

(c) There are no liabilities, obligations, indebtedness, debts, or commitments of any nature whatsoever, whether asserted or unasserted, known or unknown, absolute or contingent, accrued or unaccrued, matured or unmatured or otherwise, of the Seller or the System, other than liabilities (i) adequately reflected in or reserved against in the Interim Financial Statements, (ii) incurred in the ordinary course of business since the date of the Interim Financial Statements consistent with past practice and which are not, individually or in the aggregate material (in amount or otherwise), (iii) incurred under Contracts to which the Seller is a party on the Effective Date with respect to the performance by the Seller of its obligations thereunder in the ordinary course of business (other than any liabilities or obligations that arise from the Seller's breach of, or default under, any such Contracts), (iv) related to undrawn amounts under Outstanding Indebtedness or (v) disclosed in Schedule 4.05(c).

Section 4.06. **Absence of Certain Changes or Events.** Except as reflected in the Financial Statements, or as set forth on Schedule 4.06, since March 31, 2015, (x) the Seller has operated the System in the ordinary course of business consistent with past practice, and (y) there has not been any:

(a) change, event or condition (whether or not covered by insurance) that has had, or would reasonably be expected to have, a Material Adverse Effect;

(b) (i) increase in the compensation payable or to become payable to any Personnel, except for normal periodic increases in the ordinary course of business consistent with past

practice or obligations of the Seller pursuant to the terms of the Collective Bargaining Agreement, (ii) bonus, incentive compensation, service award or other like benefit granted, made or accrued, contingently or otherwise, for or to the credit of any Personnel, (iii) employee welfare, pension, retirement, profit sharing, or similar payment or arrangement made or agreed to by the Seller for any Personnel, or (iv) entry by the Seller into any employment agreement or similar Contract with any Personnel;

(c) establishment of, addition or amendment to or modification of any employee benefit plan, arrangement, or practice described in Schedules 4.12(b), (c), or (d);

(d) sale, assignment or transfer of any assets or properties of the Seller used in, or necessary or important to, the operation of the System, except for the disposal of obsolete assets in the ordinary course of business;

(e) failure to repay or discharge any material obligation or liability of the Seller;

(f) failure to operate the System in the ordinary course or to preserve the System intact;

(g) material damage, destruction or loss involving or affecting the Acquired Assets or the System, or any material interruption in use of any Acquired Assets, in either case whether or not covered by insurance;

(h) action to incur, increase or modify any indebtedness, obligations or liabilities with respect to the System or the Acquired Assets (including any Assumed Liabilities) or that subject any Acquired Assets to any Liens, other than Permitted Liens;

(i) agreements, waivers, permits, fees, charges, or other burdens of any nature imposed on the System by the Seller, the City or the Borough for the benefit of the Seller, the City or the Borough;

(j) action taken, or failure to take any action, by or on the part of the Seller, the City or the Borough which, had such action been taken or such failure occurred after the date of this Agreement, would have violated the covenants in Section 9.01; or

(k) agreement by the Seller, the City or the Borough to do any of the foregoing.

Section 4.07. **Tax Matters.** Except as set forth in Schedule 4.07, (i) the Seller has timely paid all Taxes that may have been or may be due and payable by the Seller arising from the ownership or operation of the Acquired Assets or the System; (ii) all Tax Returns required to be filed by the Seller or with respect to the System have been timely (within any applicable extension periods) filed, and all such Tax Returns are true, complete and correct in all material respects; (iii) the Seller has established reserves or accruals on the Financial Statements that are adequate for the payment of Taxes, if any, for all periods through the Closing Date; (iv) no Taxing Authority has asserted any claim against the Seller for the assessment of any additional Tax liability or initiated any action or proceeding which could result in such an assertion; and (v) the Seller has made all withholding of Taxes required to be made under all applicable Laws and

regulations, including withholding with respect to compensation paid to employees, and the amounts withheld have been properly paid over to the appropriate Taxing Authorities.

Section 4.08. **Real Property.**

(a) Schedule 4.08 contains a description of (i) each Owned Real Property included in the Acquired Assets and (ii) each Leased Real Property included in the Acquired Assets. Such Owned Real Property and such Leased Real Property, together with the Held Easements are collectively referred to herein as the "Real Property". As of the Effective Date, there are no pending condemnation proceedings relating to any of the Owned Real Property included in the Acquired Assets or any of the Leased Real Property included in the Acquired Assets, nor written threats of any condemnation proceedings with respect to such Owned Real Property or Leased Real Property. As of the Closing, there are no pending condemnation proceedings relating to any of the Real Property nor written threats of any condemnation proceedings with respect to the Real Property. To the Knowledge of the Seller, (1) as of the Effective Date, the Seller is not in violation of any Law, the Seller has not received any written notice from any Governmental Authority that it is in violation of an applicable Law with respect to any of the Owned Real Property included in the Acquired Assets or any of the Leased Real Property included in the Acquired Assets, or its interests thereunder, except for such violation that has been cured in all material respects by the Seller and for which the Seller has received confirmation of cure from the Governmental Authority, and (2) as of the Closing, the Seller is not in violation of any Law, the Seller has not received any written notice from any Governmental Authority that it is in violation of an applicable Law with respect to the Real Property or its interests thereunder, except for such violation that has been cured in all material respects by the Seller and for which the Seller has received confirmation of cure from the Governmental Authority.

(b) The Seller has valid and subsisting leasehold estate in and to each Leased Real Property included in the Acquired Assets, free and clear of all liens, other than Permitted Liens. Schedule 4.08 contains a description of each real property lease or sublease or other similar Contract under which the Seller has a leasehold or subleasehold estate or otherwise uses or occupies or has the right to use or occupy the Leased Real Property included in the Acquired Assets (each such lease, sublease or other Contract including all amendments thereto, a "Real Property Lease"). True and correct copies of each Real Property Lease has been provided by the Seller to Buyer. Neither the Seller nor, to the Knowledge of Seller, the landlord under any Real Property Lease is in default or breach of any obligations under any Real Property Lease, nor is there any condition which, with the passage of time, the giving of notice, or both, would reasonably be expected to result in a default or breach by the Seller or, to the Knowledge of Seller, the landlord of any obligations thereunder.

(c) With respect to each Held Easement, as of the Closing: (i) each such Held Easement is in appropriate form, has been duly recorded, and is sufficient for the right of way and other interests necessary for the operation of the System, or access thereto, at the locations to which it relates, (ii) each such Held Easement is free and clear of any Liens, except for any Permitted Liens, and is assignable by Seller to Buyer without consent of the owner of the land to which the Easement relates or that any such consent has been obtained, (iii) the Seller is not in breach of or in default under such Easement, (iv) no party to such Easement has given the Seller written notice of or made a claim with respect to any breach or default thereunder, and (v) to the

Knowledge of Seller, no condition currently exists and there is no condition which, with the passage of time, the giving of notice, or both, could result in a default or breach by any party (including the Seller) under or with respect to such Easement. True and correct copies of each Held Easement will be provided by Seller to Buyer prior to the Closing.

Section 4.09. **Equipment and Machinery.**

(a) All Equipment and Machinery included in the Acquired Assets that is material to the operation of the System as currently and historically operated and conducted is set forth and otherwise described on Schedule 4.09(a). Except as set forth in Schedule 4.09(a), the Seller (i) has good and marketable title, free and clear of all Liens (other than the Permitted Liens and Liens which will be fully and unconditionally released at or prior to Closing) to the Equipment and Machinery owned by the Seller, and (ii) holds good and transferable leasehold interests in or a valid license to use, all Equipment and Machinery leased or licensed by it or otherwise used by it in the operation of the System, in each case under valid and enforceable leases or other Contracts. Except as set forth on Schedule 4.09(a), the Seller is not required to obtain the approval or consent of the lessor or any other Person in connection with the assignment to Buyer of the Equipment and Machinery leased or licensed by the Seller, and such assignment will not result in any change in terms of the applicable Contract or any increased costs or tax recapture. For the avoidance of doubt, this Section 4.09(a) does not apply to any Retained Equipment and Machinery.

(b) Except for Equipment and Machinery which is obsolete and except as otherwise set forth on Schedule 4.09(a), the Equipment and Machinery and all other tangible assets and properties that are included in the Acquired Assets are in good operating condition and repair (except for ordinary wear and tear) and are usable in the ordinary course of the business and are being operated in conformity in all material respects with all applicable Laws and the terms of any Contracts to which the Seller is a party or by which such Equipment and Machinery is subject or bound.

Section 4.10. **Supplies.** All Supplies included in the Acquired Assets consist of a quality and quantity usable in the ordinary course of business, consistent with past practice. As of the Closing, the levels of Supplies included in the Acquired Assets will be consistent with the levels of Supplies historically maintained by the Seller and will be sufficient for the continued conduct and operation of the System by Buyer immediately following the Closing in substantially the same manner as currently and historically conducted and operated by the Seller.

Section 4.11. **Intellectual Property Assets.** Schedule 4.11 sets a complete and accurate list of all Intellectual Property Assets (whether owned by the Seller or licensed to the Seller by any third party) that are material to the operation of the System as currently and historically operated and conducted. All Intellectual Property Assets are owned by or licensed to the Seller free and clear of all Liens, except for Permitted Liens and Liens which will be fully and unconditionally released at or prior to Closing, and are valid, issued and enforceable, have not been canceled, and, to the Knowledge of Seller, are not the subject of any legal challenge. To the Knowledge of Seller, no facts exist that would invalidate or render unenforceable any Intellectual Property Assets. Except as disclosed on Schedule 4.11, (a) there are no licenses now outstanding or other rights granted to third parties under any Intellectual Property Assets, and (b)

the Seller is not a party to any Contract or other agreement or understanding with respect to any Intellectual Property Assets. There are no unresolved claims made, and no Person or Governmental Authority has communicated to the Seller, the threat of any such claim, that any of the Intellectual Property Assets or activities of the Seller in connection with the Intellectual Property Assets constitutes unfair competition or is in violation or infringement of any patent, trademark, trade name, service mark, trade dress, right of publicity, copyright or registration therefor, of any other Person. To the Knowledge of Seller, (x) the Intellectual Property Assets do not infringe the patent, trademark, copyright, trade secret or other proprietary right of any third party and (y) no Intellectual Property Asset is being infringed or misappropriated by any third party. All filings or recordations necessary or appropriate to protect the interests of the Seller in any Intellectual Property Assets have been duly made and are in full force and effect.

Section 4.12. **Employee Benefit Plans.**

(a) As used in this Agreement, the following terms have the meanings set forth below:

"Seller's Benefit Obligations" means all material obligations, arrangements, or practices, whether or not legally enforceable, to provide benefits, other than salary or wages to present or former directors, employees or agents, (other than obligations, arrangements and practices that are Seller's Plans), that are owed, adopted or followed by the Seller. Seller's Benefit Obligations also include consulting agreements under which the compensation paid does not depend upon the amount of service rendered, sabbatical policies, severance payment policies and fringe benefits within the meaning of Code §132.

"Seller's Plans" means each voluntary employees' beneficiary association under Section 501(c)(9) of the Code whose members include any Personnel and any employee benefit plans or any other retirement, profit sharing, stock option, stock bonus, deferred compensation (including any "nonqualified deferred compensation plan" within the meaning of Section 409A of the Code), severance, sick leave or other material plan or arrangement providing benefits to current or former Personnel, in each case, if either currently in effect or terminated within the last six (6) years, to which the Seller is a plan sponsor or to which the Seller otherwise contributes or has contributed within the last six (6) years, or in which the Seller otherwise participates or has participated within the last six (6) years.

(b) Schedule 4.12(b) contains a true and complete list of all Seller's Plans and the Seller's Benefit Obligations. All such Seller's Plans and Seller's Benefit Obligations are in full force and effect and are in material compliance both as to form and operation, with applicable provisions of the Code, ERISA and any other applicable Laws, and with any applicable collective bargaining agreement. To Seller's Knowledge, no event has occurred which has resulted or could reasonably be expected to result in the imposition of any liability on the Seller under the Code or other applicable Law with respect to any Seller's Plans or Seller's Benefit Obligations.

(c) Except as set forth in Schedule 4.12(c), the Seller does not sponsor, maintain, contribute to, nor is it required to contribute to, any "multiemployer plan" within the meaning of Section 414(f)(1) of the Code, and has no liability of any nature, whether known or unknown,

fixed or contingent, with respect to any such multiemployer plan (the multiemployer plan set forth in Schedule 4.12(c), the "Multiemployer Plan"). Schedule 4.12(c) sets forth an estimate obtained by the trustee of the Multiemployer Plan, based on the most recent valuation of the Multiemployer Plan, of the withdrawal liability that would be assessed against the Seller for withdrawal from the Multiemployer Plan.

(d) Except as set forth on Schedule 4.12(d), the Seller does not sponsor, maintain, contribute to, nor is it required to contribute to, any medical, health, life or other welfare plan or benefits for present or future terminated or retired Personnel or their spouses or dependents, other than as required by COBRA, or any comparable state Law, and has no liability of any nature, whether known or unknown, fixed or contingent, with respect to any such post-termination welfare benefits.

(e) The Seller is and has been in compliance in all material respect with the requirements of COBRA and is not subject to any excise Tax under Code Section 4980B for the current or any prior taxable year.

(f) Except as set forth in Schedule 4.12(f), the Seller has not entered into any severance or similar arrangement with respect to any present or former Personnel that will result in any obligation (absolute or contingent) of Buyer to make any payment to any present or former Personnel following termination of employment, including the termination of employment effected by the transactions contemplated by this Agreement. The consummation of the transactions contemplated by this Agreement will not trigger any severance or other obligation of the Seller for which Buyer shall have any liability.

Section 4.13. **Personnel; Labor Relations**.

(a) Schedule 4.13(a) sets forth all collective bargaining agreements and relationships to which the Seller is a party, including the identification of the parties thereto and the expiration dates. Other than the collective bargaining agreements and relationships set forth in Schedule 4.13(a), there are no commitments, Contracts, agreements, arrangements or understandings (whether written or oral, formal or informal) of the Seller with respect to the Union or the Union Personnel, and the collective bargaining agreements described on Schedule 4.13(a) constitute the entire agreement between the Seller and the other parties thereto, with respect to the subject matter thereof.

(b) With respect to all Personnel:

(i) except as set forth in Schedule 4.13(b)(i), there is no labor strike, lockout, dispute, slowdown or stoppage pending or, to the Knowledge of the Seller threatened against or involving the operation of the System, nor has any such event or labor difficulty occurred within the past five (5) years;

(ii) except as set forth in Schedule 4.13(b)(ii), the Seller is in compliance in all material respects with all applicable Laws respecting employment and employment practices, terms and conditions of employment, wages, hours of work, classification of Personnel and independent contractors, and occupational safety and health;

(iii) except as set forth in Schedule 4.13(b)(iii), there is no unfair labor practice charge or complaint against the Seller with respect to the System pending or, to the Knowledge of the Seller threatened before the Pennsylvania Labor Relations Board or any other Governmental Authority;

(iv) the Seller has no present intention to terminate the employment of any Personnel due to misconduct or unsatisfactory performance and, to the Knowledge of the Seller, no event has occurred or circumstance exists with respect to any Personnel, including any event or circumstance involving misconduct (whether or not involving any actual or potential violation of Law) or other wrongful or improper acts or omissions by any Personnel, which would in any case give the Seller grounds for terminating the employment of any such Personnel; and

(v) the Seller has not received notice of any assertion or allegation of any wrongful employment action or practice, including discrimination and harassment, by any present or former Personnel or any applicant for employment with respect to the System.

(c) Except as set forth on Schedule 4.13(c), the Seller has, and as of the Closing shall have timely paid, or cause to be timely paid, the Personnel as required under its policies and/or by applicable Law for accrued but unused and unpaid vacation, sick leave and other accrued benefits as of the Closing Date.

(d) The Seller has not, in the past five (5) years, effectuated:

(i) a "plant closing" (as defined in the Worker Adjustment and Retraining Notification Act ("WARN Act")) affecting any site of employment or one or more facilities or operating units within any site of employment or facility of the System; or

(ii) a "mass layoff" (as defined in the WARN Act) affecting any site of employment or facility of the System; nor has the System been affected by any transaction or engaged in layoffs or employment terminations sufficient in number to trigger application of any similar state or local Law.

(e) None of the Personnel has suffered an "employment loss" (as defined in the WARN Act) during the previous six months.

Section 4.14. **Environmental Compliance.** Except as set forth in Schedule 4.14:

(a) The System as currently operated by the Seller and all operations and activities conducted by the Seller with respect to the System are in compliance in all material respects with all applicable Environmental Requirements.

(b) The Seller has generated, used, handled, treated, stored and disposed of all Hazardous Materials in (i) compliance in all material respects with all applicable Environmental Requirements and (ii) a manner that has not given, and could not reasonably be anticipated to give, rise to Environmental Liabilities.

(c) The Seller has not received notice of any Environmental Claims related to the System that have not been fully and finally resolved, and to the Knowledge of Seller no claims of Environmental Liabilities have been threatened allegedly arising from or relating to the System that have not been fully and finally resolved.

(d) Hazardous Materials are not present at or on the System or Acquired Assets, there has been no Release of Hazardous Materials at, on or from any part of the System or the Acquired Assets, and there has been no Release of Hazardous Materials for which the Seller is responsible at any Off-Site Location, in each case in a manner that violates any Environmental Requirements or has resulted in, or could reasonably be anticipated to give rise to, Environmental Liabilities.

(e) No Lien or activity use limitation or institutional control has been recorded affecting any Acquired Assets by any Governmental Authority due to either the presence of any Hazardous Material on or off the Acquired Assets or a violation of any Environmental Requirement.

(f) There are no underground storage tanks on or at any of the Acquired Assets. Any underground storage tanks previously located at the Acquired Assets have been removed or otherwise closed, plugged and abandoned in compliance with applicable Environmental Requirements in effect at the time of such closure.

(g) There is no PCB Equipment on or at any of the Acquired Assets. Any PCB Equipment that previously existed at the Acquired Assets has been flushed of polychlorinated byphenyls or has been removed and properly disposed of, in compliance with applicable Environmental Requirements, and any remaining PCB Equipment is labeled to the extent required under applicable Environmental Requirements and being managed in compliance with applicable Environmental Requirements.

(h) No Regulated Asbestos Containing Material exists in or on the Acquired Assets in an aggregate amount that would reasonably be expected to result in an Environmental Liability; and any Regulated Asbestos Containing Material is being managed in compliance with all applicable Environmental Requirements.

(i) The Seller has delivered to Buyer (1) all material environmental site assessments or reasonable and accurate summaries thereof pertaining to the System, (2) all material compliance audits or compliance assurance reviews prepared within the previous five (5) years or reasonable and accurate summaries thereof relating to compliance with Environmental Requirements by the System, and (3) reasonable and accurate summaries of, or all material documents pertaining to, any known and unresolved Environmental Liabilities incurred in relation to the System, to the extent possessed by or under the reasonable control of the Seller.

Section 4.15. **Consent Decree Matters.**

(a) The Seller is in compliance with all terms, conditions and requirements of the Consent Decree and no claims, actions, suits, proceedings, arbitral actions or investigations are pending, or to the Knowledge of the Seller, have been threatened against the Seller with respect to the Consent Decree. The Seller has not incurred or accrued any liabilities for payment of

stipulated penalties under the terms of the Consent Decree with respect to any conditions, events, circumstances, actions or inactions prior to the date hereof or prior to the Closing (whether or not EPA or PaDEP have asserted demands for such stipulated penalties).

(b) The Seller has completed all requirements or undertaken all actions required to be performed by the Seller prior to the date hereof and prior to the Closing Date pursuant to:

(i) the Consent Decree, including all control, operation, maintenance and mitigation requirements and the implementation of the CSO Control Measures and the Approved Revised CSO Control Measures Plan;

(ii) the Compliance Schedule; and

(iii) the Acquired Authorizations.

(c) The CSO Control Measures are being implemented in accordance with the Consent Decree. All work performed by or on behalf of the Seller pursuant to the Consent Decree, including work performed by architects, design professionals, and civil, mechanical or other engineers, whether by contract or pursuant to employment with the Seller or as an agent of the Seller is being performed and has been performed in accordance with the terms and conditions of the Consent Decree and on schedule in a manner sufficient to achieve the completion of the CSO Control Measures by the dates required under the Consent Decree.

(d) As of the Effective Date and as of the Closing, (i) the Seller is in compliance in all material respects with its obligations under the Long Term Control Plan and (ii) all planning, engineering, design, procurement, financing and construction activities on all Phase A and Phase B Projects within the Long Term Control Plan are on schedule with the milestones set forth the Compliance Schedule attached as Schedule 7.06 to this Agreement.

Section 4.16. **Licenses and Permits.** Schedule 4.16 sets forth a complete and accurate list of all Licenses and Permits held by the Seller, all of which are in full force and effect and no appeals or other proceedings are pending or threatened with respect to the issuance, terms or conditions of any such Licenses and Permits. The Seller has provided to Buyer true and complete copies of all Licenses and Permits set forth on Schedule 4.16. Except as set forth on Schedule 4.16, (i) the Seller holds all Licenses and Permits which are necessary or required under applicable Law for the ownership, operation and maintenance of the System and the Acquired Assets as currently or previously operated and maintained, (ii) the Seller is, and for the past five (5) years has been, in compliance in all material respects with all terms, conditions and requirements of all Licenses and Permits held by it (whether or not set forth on Schedule 4.16) and all applicable Laws relating thereto, and (iii) the Seller has not received any written notice or other written communication from any Governmental Authority or other Person regarding (1) any actual or alleged violation or failure to comply with any such Licenses and Permits, or (2) any revocation, withdrawal, non-renewal, suspension, cancellation or termination of any such Licenses and Permits. With respect to any Licenses and Permits held by the Seller that are scheduled to expire within six (6) months following the date of this Agreement, any applications for renewal of such Licenses and Permits have been or will be duly filed by the Seller with the applicable Governmental Authority within the time frame required under applicable Law.

Section 4.17. **Insurance; Bonds.**

(a) (i) Schedule 4.17(a) lists all of the Seller's policies of liability, fire, casualty, business interruption, workers' compensation and other forms of insurance and fidelity bonds insuring the properties, assets or operations of the System or the Acquired Assets (collectively, the "Policies" and individually, a "Policy"); (ii) the Seller has provided true and complete copies of the Policies to Buyer; (iii) the Policies, with respect to their amounts and types of coverage, are reasonably adequate to protect the insured properties against the insured risks, subject to reasonable deductibles, and the risks insured against are normal and customary for the industry. and (iv) all premiums with respect to each Policy are currently paid and such policies are in full force and effect. There are no material claims by the Seller pending under any of the Policies as to which coverage has been questioned, denied or disputed by the underwriters of such Policies or in respect of which such underwriters have reserved their rights, and no notice of cancellation, termination or non-renewal has been received with respect to any Policy.

(b) Except as set forth on Schedule 4.17(b), (i) the Seller has no outstanding surety bonds or other surety arrangements issued or entered into in connection with the Acquired Assets or the System; and (ii) no surety bond is required to satisfy any contractual, statutory, or regulatory requirement applicable to the Seller with respect to the System.

Section 4.18. **Contracts and Commitments.**

(a) Schedule 4.18 lists all of the following Contracts (x) by which any of the Acquired Assets are bound or affected or (y) to which the Seller is a party or by which it is bound in connection with the System or the Acquired Assets (collectively, the "Material Contracts"):

(i) Contracts with any Personnel, consultant or other Person providing services to the Seller or with respect to the System;

(ii) Contracts which are notes, mortgages, agreements, swaps or other derivatives or commitments for the repayment or borrowing of money by the Seller, including those related to the Outstanding Indebtedness, or for a line of credit including borrowings by the Seller in the form of a guarantee of, indemnification for, or agreement to acquire any obligation of others, and all security or pledge agreements related thereto;

(iii) Contracts, including management, operating, engineering, design, or service agreements (including professional services agreements), providing for payments in excess of Ten Thousand Dollars ($10,000) by the Seller in any twelve (12) month period;

(iv) Contracts relating to any joint venture or partnership to which the Seller is a party or is bound;

(v) Contracts containing covenants purporting to limit the freedom of Seller or any Personnel to compete in any business or in any geographic area;

(vi) Contracts relating to ongoing construction, including related to CSO Control Measures, insurance Contracts, surety bonds, management agreement, architect agreement or consultant agreement;

(vii) Contracts for any capital expenditure or leasehold improvements;

(viii) Contracts involving any resolution or settlement of any actual or threatened litigation, arbitration, claim or other dispute involving Seller, the City, the Borough or the System, and any other Person; and

(ix) Contracts, including inter-municipal agreements, between the Seller and any Governmental Authority.

(b) The Seller has provided to Buyer true and complete copies of all the foregoing Material Contracts, together with all amendments, supplements or modifications thereto, and accurate descriptions of all material terms of all oral Contracts, set forth or required to be set forth on Schedule 4.18.

(c) All of the Material Contracts are in full force and effect. Each Material Contract is a legal, valid and binding obligation enforceable against the Seller and, to the Knowledge of Seller, the other party or parties thereto, except to the extent that enforceability may be limited by applicable bankruptcy, insolvency, reorganization or other Laws affecting the enforcement of creditors' rights generally. The Seller is not and, to the Knowledge of Seller, no other party to any Material Contract is, in any material respect, in breach or violation of, or default under, or has delivered a notice of termination of, any Material Contract, nor does any condition exist which, with notice or lapse of time, or both, would cause the Seller, or to the Knowledge of Seller, any other party, to be in default under any Material Contract. The Seller has not received any communication from any Person that is party to a Material Contract indicating that such Person intends to (i) terminate such Material Contract, (ii) allow such Material Contract to expire without renewal, or (iii) seek an amendment or modification to such Material Contract that would increase in any material respect any amounts required to be paid by the Seller thereunder.

Section 4.19. **Compliance with Law.** Except as set forth on Schedule 4.19:

(a) the Seller is, and for the last five (5) years has been, in compliance in all material respects with all Laws applicable to Seller, the System, the Personnel and any of the Acquired Assets, and to the Knowledge of the Seller there are no factual circumstances that are likely to result in any such failure to be in compliance in any material respect;

(b) within the last five (5) years, the Seller has not received any written or, to the Knowledge of the Seller, verbal notices and, to the Knowledge of the Seller, no claims have been filed against the Seller, alleging a violation of any such Laws;

(c) to the Knowledge of Seller, neither Seller nor any Personnel is, or within the last five (5) years was, under investigation with respect to, and has not been threatened to be charged with or given notice of any violation of, any Law applicable to Seller, the System, the Personnel and any of the Acquired Assets; and

(d) except for the Consent Decree, there is no judgment, decree, injunction, rule or order of any arbitrator or Governmental Authority outstanding against the Seller, the System, the Personnel or any of the Acquired Assets.

Section 4.20. **Litigation.** Except as set forth on Schedule 4.20, (a) there are no claims, actions, suits, proceedings, arbitral actions, inquiries or investigations (whether judicial, administrative or otherwise) before or by any Governmental Authority pending or, to the Knowledge of the Seller, threatened against the Seller or with respect to the System or any of the Acquired Assets or which in any manner challenge or seek to prevent, enjoin, alter or materially delay the transactions contemplated by this Agreement, and no event has occurred, and no claim has been asserted, that could reasonably be expected to result in any such claims, actions, suits, proceedings, arbitral actions, inquiries or investigations, and (b) there are no unsatisfied judgments of any kind against the Seller with respect to the System or the Acquired Assets. All pending or threatened claims, actions, suits, proceedings, arbitral actions, inquiries or investigations against the Seller or with respect to the System or the Acquired Assets are fully covered by insurance except to the extent described in Schedule 4.20.

Section 4.21. **Title to the Acquired Assets; Sufficiency.**

(a) Except as set forth on Schedule 4.21(a), the Seller has good and marketable title to, valid leasehold interest in or valid licenses to use, all of the Acquired Assets, free and clear of all Liens, other than Permitted Liens and Liens which will be fully and unconditionally released at or prior to Closing. The use of the Acquired Assets is not subject to any Liens, other than Permitted Liens, and such use does not encroach on the property or the rights of any Person.

(b) The Acquired Assets are sufficient for, and constitute all the assets, properties, business, goodwill and rights of every kind and description, and services required for, the continued conduct and operation of the System by Buyer in substantially the same manner as currently conducted and operated by the Seller. Except for the Excluded Assets, (i) the Acquired Assets, taken as a whole, comprise all the assets, properties, business, goodwill and rights of every kind and description used or held for use in, or useful or necessary to the operation of the System as currently operated by the Seller, and (ii) there are no assets, properties, business, goodwill, rights or services used in the conduct or operation of the System that are owned by any Person other than the Seller that will not be licensed or leased to Buyer under valid, current license arrangements or leases. None of the Excluded Assets are material to the System.

Section 4.22. **Broker's and Finder's Fees.** Except as set forth on Schedule 4.22, no broker, finder, or Person is, or will be, entitled to any commission or broker's or finder's fees from any of the Parties or from any of their Affiliates by reason of any agreement or action of Seller, the City or the Borough (or any Person acting on their behalf) or otherwise in connection with this Agreement or the transactions contemplated by this Agreement. The Seller is solely responsible for the fees and expenses of any Person set forth on Schedule 4.22 and any other financial or technical advisor engaged by or on behalf of Seller, the City or the Borough.

ARTICLE V.

REPRESENTATIONS AND WARRANTIES OF BUYER

Buyer makes only the representations and warranties which are set forth in this Article V. Any matter, information or item disclosed on any particular Schedule delivered by Buyer which is numbered to correspond to the representations and warranties contained in this Article V shall be deemed to have been disclosed in response to such other representations or warranties in this Article V in respect of which such disclosure is reasonably apparent on its face notwithstanding the omission of an appropriate cross-reference.

As a material inducement to the Seller to enter into this Agreement and to consummate the transactions contemplated hereby, Buyer hereby represents and warrants to the Seller, as of the date hereof and as of the Closing Date, as follows:

Section 5.01. **Existence and Power.** Buyer is a corporation duly organized and in good standing under the Laws of the Commonwealth of Pennsylvania. Buyer has all requisite power and authority to execute and deliver this Agreement and all Related Agreements and to perform its obligations hereunder and thereunder.

Section 5.02. **Authorization and Validity of Agreement.** The execution and delivery of this Agreement and the Related Agreements and the performance of the obligations of Buyer hereunder and the consummation by Buyer of the transactions contemplated by this Agreement and the Related Agreements have been duly and validly authorized by all necessary action of Buyer, including Buyer's board of directors and the board of directors of Buyer Parent, and no other proceeding on the part of Buyer is necessary to authorize the execution, delivery and performance of this Agreement or any Related Agreement to which Buyer is or will be a party. This Agreement has been duly executed and delivered by Buyer and constitutes, and the Related Agreements, when executed and delivered, will constitute legal, valid and binding obligations of Buyer, enforceable against Buyer in accordance with their respective terms and conditions, except to the extent that enforceability may be limited by applicable bankruptcy, insolvency, reorganization or other Laws affecting the enforcement of creditors' rights generally. A true, correct and complete copy of the authorizing resolutions duly adopted by the board of directors of Buyer is attached hereto as Exhibit E, which resolutions of the board of directors of Buyer, and the resolutions of the board of directors of Buyer Parent with respect to this Agreement and the transactions contemplated hereby, in each case have not been, and at the Closing will not have been, revoked, rescinded or amended.

Section 5.03. **No Conflict or Violation.** Except as set forth on Schedule 5.03, the execution, delivery and performance of this Agreement and the Related Agreements by Buyer do not and shall not: (a) violate or conflict with, or result in a breach or constitute a default under, any provision of the charter, bylaws or other similar organizational or governing documents of Buyer, (b) violate, conflict with, result in a breach or constitute a default under any provision of, or require any Governmental Approval or any notice, filing, consent, authorization or approval under, any Licenses and Permits held by Buyer or any applicable Law of any Governmental Authority having jurisdiction over Buyer or its assets or properties, or (c) violate, conflict with, or result in a breach of or constitute (with due notice or lapse of time or both) a default under any

provision of, or require any notice, filing, consent, authorization or approval under, or give rise to any rights of termination, amendment, modification, acceleration or cancellation of or loss of any benefit under, or result in the creation of any Lien on any assets or properties of Buyer pursuant to, any Contract to which Buyer is a party, or by which any material assets and properties of Buyer are bound or subject, or (d) result in the imposition of any Liens or other restrictions on the material assets and properties of Buyer, except, in the case of the foregoing clauses (b), (c) and (d), where such violation, conflict, breach, default, requirement, or resulting Lien or other restriction would not reasonably be expected to have a material adverse effect on Buyer, Buyer Parent and their business, or materially impair Buyer's ability to timely consummate the transactions contemplated hereby or perform its obligations hereunder.

Section 5.04. **Consents and Approvals.** Schedule 5.04 sets forth a list of each consent, waiver, authorization or approval of any Governmental Authority, or of any other Person, and each declaration or notice to or filing or registration with any Governmental Authority required to be obtained, given or made by Buyer in connection with the execution and delivery of this Agreement and each Related Agreement by Buyer and the performance by Buyer of its obligations hereunder and thereunder, except for any such consent, waiver, authorization, approval, declaration, notice, filing or registration, which if not obtained, given or made, would not reasonably be expected, individually or in the aggregate, to materially impair Buyer's ability to performs its obligations hereunder or thereunder and to consummate the transactions contemplated hereby or thereby.

Section 5.05. **Broker's and Finder's Fees.** No broker, finder, or Person is, or will be, entitled to any commission or broker's or finder's fees from any of the Parties or from any of their Affiliates by reason of any agreement or action of Buyer or its Affiliates (or any Person acting on Buyer's or Buyer's Affiliates' behalf) or otherwise in connection with this Agreement or the transactions contemplated by this Agreement.

Section 5.06. **Financial Ability.** Immediately after giving effect to the transactions contemplated hereby, Buyer will have the financial ability and will have adequate capital to carry on its business and to operate the System as a certificated public utility system regulated by the PaPUC authorized, among things, to provide wastewater utility services to retail residential, commercial and industrial customers in the Service Area, in each case assuming (i) the accuracy of the Seller's representations and warranties set forth in this Agreement (without regard to any materiality, Material Adverse Effect or other similar qualifiers contained therein) and (ii) material compliance by the Seller with the covenants required to be performed prior to the Closing set forth herein in all material respects.

Section 5.07. **Sufficient Funds.** Buyer will have at the Closing (a) sufficient immediately available funds available and the financial ability to pay the Purchase Price in accordance with Section 3.01 and any fees and expenses incurred by Buyer in connection with the transactions contemplated by this Agreement and (b) the resources and capabilities (financial and otherwise) to perform its obligations hereunder.

Section 5.08. **Independent Decision.** Except as expressly set forth in this Agreement, or any of the Related Agreements, Buyer acknowledges that (a) neither the Seller nor any other Person has made any representation or warranty, express or implied, as to the accuracy or

completeness of any information provided to Buyer regarding the System, and (b) neither the Seller nor any other Person shall have or be subject to any liability to Buyer (except in the case of fraud) or any other Person resulting from the distribution to Buyer, or Buyer's use of, any information regarding the System or Acquired Assets that has been furnished or made available to Buyer and its Representatives. Buyer acknowledges that other than as expressly set forth in this Agreement or any Related Agreement, Buyer is acquiring the Acquired Assets without any other representation or warranty, whether express or implied, including any representation or warranty as to merchantability or fitness for any particular purpose, except as otherwise expressly represented or warranted in Article IV of this Agreement; *provided, however*, that nothing in this Section 5.08 is intended to limit or modify the representations and warranties contained in Article IV.

Section 5.09. **Independent Investigation.** Buyer acknowledges that it has conducted an independent investigation of the financial condition, assets, liabilities, properties and projected capital needs and operations of the System in making its determination as to the propriety of the transactions contemplated by this Agreement and, in entering into this Agreement and Related Agreements, has relied solely on the results of its investigation and on the representations and warranties of the Seller expressly contained in Article IV of this Agreement; *provided*, that nothing in this Section 5.09 will limit, in any way, any rights that Buyer may have to bring, pursue or prosecute a claim or action grounded in or based upon fraud.

Section 5.10. **Litigation**. There are no claims, actions, suits, proceedings, arbitral actions, inquiries or investigations (whether judicial, administrative or otherwise) pending or, to the Knowledge of Buyer, threatened, against Buyer, Buyer Parent or any of their Affiliates which in any manner challenge or seek to prevent, enjoin, alter or materially delay the transactions contemplated by this Agreement.

ARTICLE VI.

COVENANTS REGARDING REAL PROPERTY AND EASEMENTS

Section 6.01. **Title Examination; Missing Easements.**

(a) Prior to the Closing, the Seller will, at its sole cost and expense, cause David Durkovic, or another abstractor selected by the Seller and reasonably acceptable to Buyer and the Title Company (the "Abstractor"), to perform, at the Seller's sole cost and expense, a search of the public land records of Lackawanna County, based on the Seller's and Labella Associates', Seller's outside consulting engineering company, records and plans of the System (and such other sources of information as are reasonably related thereto), by means of searching the grantee index in the names of the City, the Scranton Redevelopment Authority, Seller and the Borough, and such other searches as the Abstractor may reasonably make, to (i) identify and provide Buyer with title information on any and all recorded Held Easements, such information to be provided in the form of the chart attached hereto as Exhibit F (the "Abstractor Search Result Chart"), and (ii) together with the Seller, identify all Missing Easements. During such process, as the Abstractor provides written search results to Seller (including updated versions of the Abstractor Search Result Chart), the Seller will promptly provide the same to Buyer for its review, and, without limiting the foregoing, the Seller shall, or shall cause the Abstractor to, provide Buyer

with periodic updates (which shall occur no less frequently than bi-weekly) on the status of the activities set forth in the previous sentence.

(b) In the event that during the process of Abstractor's review and investigation of the Lackawanna County land records, Seller determines, based on the Abstractor's investigation, that there is a Missing Easement, the Seller shall take any and all actions (including the use of its power of condemnation) to obtain any such Missing Easements so that the same may be sold, assigned, transferred and conveyed to Buyer at the Closing pursuant to the terms and conditions of this Agreement. All costs and expenses incurred in connection with obtaining each Missing Easement (including any consideration payable to the landowner in connection with condemnation, in lieu of condemnation or otherwise to obtain Missing Easements) shall be paid by the Seller. In the event Seller has not obtained all Missing Easements by the date that is sixty (60) days after the date that Abstractor has completed his review of the County land records and delivered the last results of the same to Seller (the "Abstract Completion Date"), then, no later than thirty (30) days after the Abstract Completion Date (but in any event no later than thirty (30) days prior to the Closing), the Seller shall commence and file in the Court of Common Pleas, Lackawanna County, a condemnation or eminent domain proceeding to obtain any and all such Missing Easements. For the purposes of clarity, upon obtaining each Missing Easement (including upon the final resolution of a condemnation proceeding), each Missing Easement that has been acquired or obtained by the Seller shall be considered a Held Easement.

(c) The Seller shall take any and all actions to ensure that, as of the Closing, (i) all Essential Easements are Eligible Easements and (ii) no more than ten (10) other Easements (whether Held Easements or Missing Easements) that are appurtenant to any Combined Sewer System Asset or necessary for access to any Combined Sewer System Asset or for the operation of any Combined Sewer System Asset (including Easements for utilities and power to any Combined Sewer System Asset) or otherwise are necessary for or used in connection with the operation of the System or to provide continuous and unimpeded rights of way for the Combined Sewer System Assets (including access thereto) are not Eligible Easements.

(d) With respect to any Easement that is described in clause (b) of the definition of Eligible Assets that is conveyed to Buyer at the Closing, the Seller shall complete the condemnation proceedings with respect to such Easement at its sole cost and expense following the Closing and pay the fair value to the landowner for the taking of such Easement.

Section 6.02. **Objections to Title; Conveyance by the City.**

(a) Notice of Title Objections. With respect to all Real Property including any title information provided by the Abstractor with respect to any Held Easements, Buyer shall have the right to obtain, at its sole cost and expense, one or more commitments for an owner's policy or policies of title insurance on ALTA's Owner's Form 2006 (each, a "Title Commitment"), issued by a title insurance company selected by Buyer and licensed by the Commonwealth of Pennsylvania (the "Title Company") covering any such Real Property. Within thirty (30) days of Buyer's receipt from the Title Company of any such Title Commitment, Buyer shall deliver to the Seller a complete copy of such Title Commitment and copies of any and all exception documents listed in the same, each as received from the Title Company, along with Buyer's written notice to the Seller of any of the exceptions to title set forth on Schedule B of the Title

Commitment to which Buyer objects (such written notice of Buyer being referred to as the "Objection Notice") provided such exceptions (i) are not Permitted Liens, (ii) are not Schedule B-I exceptions to be satisfied by Buyer prior to Closing, (iii) being matters of record and set forth in the Title Commitment, do not adversely restrict or prevent the use of the Real Property in the operation of the System as currently operated, and (iv) are not the Title Company's pre-printed standard "survey", "unrecorded easement" or "discrepancy in boundary line" exceptions do not adversely restrict or prevent the use of the Real Property in the operation of the System as currently operated (such exceptions objected to in the Objection Notice, provided the same are not any as described in clauses (i) through and including (iv) as aforesaid, being referred to as the "Title Objection Items"). Buyer acknowledges and agrees that for purposes of any Real Property Lease, the term Permitted Lien shall also include (v) any Lien which was created or suffered to exist by the lessor, or any predecessor in title to such lessor, encumbering the title to any real property which is subject to a Real Property Lease. In the event that Buyer provides the Seller with an Objection Notice, the Seller shall use commercially reasonable efforts to have all of the Title Objection Items cured, satisfied or released of record, or insured over, by the Title Company (individually, "Cure" and collectively, "Cured") prior to or as of the Closing. At or prior to the Closing, the Seller shall deliver written evidence to Buyer, in form and substance reasonably satisfactory to Buyer, evidencing that Seller has Cured all such Title Objection Items. For avoidance of doubt, Buyer acknowledges that no item listed in clauses (i) through and including (v) aforesaid, may be objected to by Buyer as a Title Objection Item.

(b) Liens. Without limiting the Seller's obligations pursuant to Section 6.02(a) above, prior to or as of the Closing, the Seller shall be obligated, at its sole cost and expense, to Cure any Lien encumbering the Real Property which can be Cured by the payment of money (other than Permitted Liens).

(c) Title Endorsements/Survey. Any endorsements required by Buyer or any mortgagee of Buyer to Buyer's title insurance policy, except for available endorsements necessary to Cure any Title Objection Items, shall be paid for solely by Buyer. In the event any survey is required by Buyer or its mortgagee, either as a condition to any such endorsement or otherwise, the same shall be obtained solely at Buyer's cost and expense. In the event Buyer obtains a survey of any or all of the Real Property and desires the deed to contain the legal description based on such survey, if the same is not identical to the legal description contained in the Seller's deed of record, the Seller shall not be obligated to include the same in the deed to Buyer unless the survey is certified to the Seller and such description is included in the deed on a "quitclaim" basis only and without warranty of title, so long as such title is insurable by the Title Company.

(d) Conveyance by the City. With respect to the parcels of Real Property described on Schedule 4.08 as being owned by the City as of the Effective Date (such parcels of Real Property, the "City-Owned Real Property"), following the Effective Date the Seller shall take any and all action necessary to cause the conveyance by the City to the Seller of such City-Owned Real Property and to ensure that, as of the Closing, such City-Owned Real Property constitutes Owned Real Property of the Seller included in the Acquired Assets and with respect to which the Seller holds a valid fee simple estate capable of being conveyed to Buyer at Closing pursuant to Section 2.03(ii).

Section 6.03. **UCC Search; Releases.** Not later than sixty (60) days after the Effective Date, Buyer shall obtain, at its sole cost and expense, a Uniform Commercial Code search against the Seller covering any of the personal property or fixtures included among the Acquired Assets from the Office of the Secretary of the Commonwealth of Pennsylvania and the Recorder of Lackawanna County, Pennsylvania (the "UCC Search"). On or prior to the Closing Date, the Seller shall, at its sole cost and expense, obtain releases of any and all security interests in any of the Acquired Assets which are not Permitted Liens. The form of the releases of such security interests shall be provided by the Seller to Buyer on or prior to the Closing Date and the form and substance thereof shall be reasonably satisfactory to Buyer.

Section 6.04. **Consents**. The Seller shall, prior to the Closing, at the Seller's sole cost and expense, obtain any required consents or satisfy any preconditions necessary to assign or transfer a Real Property Lease or an Easement to Buyer at the Closing and, at or prior to the Closing, the Seller shall deliver written evidence to Buyer, in form and substance reasonably satisfactory to Buyer, evidencing that the Seller has obtained all such consents and satisfied all such preconditions. If, prior to the Closing, Buyer identifies any consents required to be obtained or preconditions necessary to assign or transfer a Real Property Lease or an Easement to Buyer at the Closing and Buyer delivers written notice to the Seller of such consent or precondition, the Seller shall use good faith efforts to obtain any such consent or satisfy any such precondition, as the case may be, and, so long as the Seller in good faith seeks to obtain any such consents or satisfy such preconditions as may be identified by Buyer and with respect to which Buyer delivers notice to the Seller prior to the Closing, the Parties acknowledge and agree that the Seller shall not be deemed to have intentionally or willfully breached this Section 6.04 as a result of the Seller's failure, prior to the Closing, to (x) obtain any such consent or satisfy any such condition so identified by Buyer, or (y) to seek to obtain any other required consent or satisfy any other necessary precondition with respect to which Buyer does not identify or deliver written notice to the Seller prior to the Closing. If after the Closing Date, Buyer determines that a third-party consent or precondition must be satisfied in order to assign or transfer a Real Property Lease or an Easement, the Seller shall obtain such third-party consent or satisfy such precondition and execute any documents necessary to effectuate such transfer pursuant to the Seller's obligations in Section 2.03.

ARTICLE VII.

OTHER AGREEMENTS

Section 7.01. **Taxes.** The Seller shall prepare and file or cause to be filed all Tax Returns arising out of the ownership of the Acquired Assets and out of the operation of the System before the Closing for all taxable periods ending on or before the Closing Date whether filed before or after the Closing Date. The Seller shall pay all Taxes arising out of the ownership of the Acquired Assets and out of the operation of the System before the Closing for all taxable periods ending on or before the Closing Date. Buyer shall prepare or cause to be prepared and file or cause to be filed any Tax Returns arising out of the ownership of the Acquired Assets and out of the operation of the System for periods which begin before the Closing Date and end after the Closing Date (a "Straddle Period"). In the case of Taxes arising in a Straddle Period, the allocation of such Taxes between the pre-Closing taxable period portion and the post-Closing taxable period portion of the Straddle Period shall be made on the basis of an interim closing of

the books as of the end of the Closing Date based on a schedule prepared by Buyer and provided to the Seller. The Seller shall pay to Buyer its allocable share of the Straddle Period Taxes as reasonably determined by Buyer within ten (10) days of the delivery of a notice requiring such payment.

Section 7.02. **Cooperation on Tax Matters.** The Seller shall furnish or cause to be furnished to Buyer, as promptly as practicable, whether before or after the Closing Date, such information and assistance relating to the System as is reasonably necessary for the preparation and filing by Buyer of any filings relating to any Tax matters.

Section 7.03. **Files and Records.**

(a) During the seven (7) year period following the Closing Date (or such longer period as may be required under applicable Law), the Seller shall preserve and keep any and all files, documents and records held by the Seller relating to the System (including any copies of any Files and Records in the possession of the Seller and not otherwise delivered or required to be delivered to Buyer at the Closing), and the Seller shall, upon reasonable notice and during normal business hours, make all such files, documents and records available to Buyer as may be reasonably requested or required by Buyer to enable Buyer or its Affiliates to prepare for, file, prove, answer, prosecute, or defend any return, filing, audit, protest, claim, suit, inquiry or other proceeding against or involving Buyer or any of its Affiliates (including any matter pertaining to Taxes), or any governmental investigation of or involving Buyer or any of its Affiliates, or in order to enable Buyer to comply with its obligations under this Agreement and any Related Agreement or other agreement, document or instrument contemplated hereby or thereby. In the event the Seller desires to destroy such records after such seven (7) year period, the Seller shall first give sixty (60) days prior written notice to Buyer and Buyer shall have the right, at its option and expense, upon prior written notice given to Seller within such sixty (60) day period, to take possession of the records within ninety (90) days after the date of such notice.

(b) Without limiting anything contained in Section 7.03(a), on the Closing Date, the Seller shall transfer to Buyer all Files and Records relating to operation of the System, including all documents, records, electronically stored data and other information referenced in Sections 77 and 78 of the Consent Decree ("Consent Decree Required Information"). To the extent that the Seller retains any such Consent Decree Required Information following the Closing (including any copies of any Files and Records in the possession of the Seller and not otherwise delivered or required to be delivered to Buyer at the Closing), at the conclusion of the record retention period specified in Section 79 of the Consent Decree, the Seller or its successor shall notify Buyer, EPA and PaDEP at least ninety (90) days prior to the destruction of any such Consent Decree Required Information, and upon the request of Buyer, EPA or PaDEP (or other applicable Governmental Authority), the Seller shall deliver such Consent Decree Required Information to Buyer, EPA or PaDEP, subject to the provisions set forth in Section 80 of the Consent Decree relating to privileged information.

(c) For the avoidance of doubt, nothing contained in this Section 7.03 shall be deemed to (i) limit the Seller's obligation to deliver all Files and Records to Buyer at the Closing as provided in Section 13.02 or (ii) permit the Seller, the City or the Borough to refuse to deliver

to Buyer, upon Buyer's reasonable request therefor, any Files and Records that are or remain in the possession of the Seller, the City or the Borough as of or following the Closing.

Section 7.04. **Personnel Matters.**

(a) Subject to the obligations of Seller under the Collective Bargaining Agreement and applicable Law and Buyer's obligations set forth in Section 7.04(h) with respect to Union Personnel, Buyer shall, or shall cause an Affiliate of Buyer to, offer employment effective on the Closing Date, to all active Union and Non-Union Personnel employed by the Seller as of the Closing Date, subject to Buyer's existing standard hiring policies and procedures applicable to new employees, which shall be limited to a criminal background check and drug screening of all Union and Non-Union Personnel, except with respect to benefits as otherwise provided in Section 7.04(c). The active Union and Non-Union Personnel who accept such offer of employment and commence employment with Buyer (or its Affiliate) on the Closing Date, shall be referred to in this Agreement as the "Transferred Personnel." For purposes of clarity, nothing contained in this Section 7.04 shall be deemed to limit, restrict or prohibit Buyer from interviewing the applicable Union and Non-Union Personnel for informational purposes only in connection with the transfer of employment of the Union and Non-Union Personnel to Buyer as provided in this Section 7.04.

(b) Subject to the obligations of Seller under the Collective Bargaining Agreement and applicable Law and Buyer's obligations set forth in Section 7.04(h) with respect to Union Personnel, Transferred Personnel who are Non-Union Personnel shall be employees-at-will of Buyer. Buyer shall provide each of the Transferred Personnel who are Non-Union Personnel compensation and benefits which are substantially comparable to (i) in the aggregate to Seller's compensation and benefits as of the Effective Date and (ii) the compensation and benefits then provided to similarly situated employees of Buyer. Nothing in this Agreement shall require Buyer to provide any particular form or type of employee benefit program, plan or policy to any Transferred Personnel who are Non-Union Personnel as a result of the transactions contemplated by this Agreement.

(c) The Seller shall make a payment to each Union Personnel equal to such Union Personnel's accrued but unused paid sick days and paid vacation days as of the Closing Date (collectively, the "Accrued PTO"). The Accrued PTO shall be paid to the applicable Union Personnel through the Seller's payroll system and shall be included in the last payroll period that ends prior to the Closing Date. Subject to the obligations of Seller under the Collective Bargaining Agreement and Law and Buyer's obligations set forth in Section 7.04(h) with respect to Union Personnel, with respect to any employee benefit plan maintained by Buyer or an Affiliate of Buyer for the benefit of any Transferred Personnel, effective as of the Closing, Buyer shall, or shall cause its Affiliate to, recognize all service of the Transferred Personnel with Seller, as if such service were with Buyer for eligibility and vesting under Buyer's employee benefit plans and programs.

(d) Subject to the obligations of Seller under the Collective Bargaining Agreement and applicable Law and Buyer's obligations set forth in Section 7.04(h) with respect to Union Personnel, effective as of the Closing, the Transferred Personnel who are Non-Union Personnel shall cease active participation in the Seller's Plans. The Seller shall remain liable for all eligible

claims for benefits under the Seller's Plans that are incurred by the Non-Union Personnel prior to the Closing Date. Subject to the obligations of Seller under the Collective Bargaining Agreement and applicable Law and Buyer's obligations set forth in Section 7.04(h) with respect to Union Personnel, the Seller shall remain liable to make any contributions to Seller's Plans related to, and/or to fund any retirement benefits accrued by, the Transferred Personnel prior to Closing. For purposes of this Agreement, the following claims shall be deemed to be incurred as follows: (i) life, accidental death and dismemberment, short-term disability, and workers' compensation insurance benefits, on the event giving rise to such benefits; (ii) medical, vision, dental, and prescription drug benefits, on the date the applicable services, materials or supplies were provided; and (iii) long-term disability benefits, on the eligibility date determined by the long-term disability insurance carrier for the plan in which the applicable Personnel participates.

(e) This Section 7.04 shall be binding upon and inure solely to the benefit of each of the Parties to this Agreement, and nothing in this Section 7.04, express or implied, shall confer upon any other Person any rights or remedies of any nature whatsoever under or by reason of this Section 7.04. The Parties acknowledge and agree that the terms set forth in this Section 7.04 shall not create any right in any Transferred Personnel or any other Person to any continued employment with Buyer or any of its Affiliates or compensation or benefits of any nature or kind whatsoever, and shall not be deemed to restrict Buyer in the exercise of its independent business judgment in establishing or modifying any of the terms or conditions of the employment of the Transferred Personnel. Nothing contained in this Section 7.04 shall constitute an amendment of, or an undertaking to amend, any employee benefit plan, program or arrangement maintained by Buyer or its Affiliates or is intended to prevent Buyer or its Affiliates from amending or terminating any such employee benefit plan, program or arrangement in accordance with its terms.

(f) Subject to applicable Law and Buyer's obligations set forth in Section 7.04(h) with respect to Union Personnel, it is expressly understood that Buyer will not acquire any asset, or assume any liability or obligation in connection with the transactions contemplated by this Agreement relating to any of the Seller's Benefit Plans, Seller's Benefit Obligations or Contracts described in Section 4.18(a)(i) of this Agreement. Subject to Buyer's obligations set forth in Section 8.03(c), the Seller shall be solely responsible for any liability, funding obligation, claim or expense arising from the Seller's Plans, Seller's Benefit Obligations or Contracts described in Section 4.18(a)(i) of this Agreement, both prior to, and after, the Closing Date, except as provided in Section 7.04(c).

(g) No later than the Closing Date, the Seller shall transfer all records pertaining to the employment of the Transferred Personnel to Buyer including all personnel and human resources Files and Records.

(h) Prior to the Closing, Buyer shall bargain in good faith with the Union regarding amendments to the Collective Bargaining Agreement that are intended to allow Buyer and the Union to enter into an amended Collective Bargaining Agreement in a form that is consistent with Buyer's existing compensation and benefits strategy (the "Amended CBA"). Buyer shall offer to provide Union Personnel Substantially Comparable Compensation and Benefits. In the event that Buyer and the Union do not reach an agreement on the terms of an Amended CBA prior to the Closing Date, Buyer shall have the right to set the initial terms and conditions of

employment of the Union Personnel, and Buyer shall recognize and bargain with the Union in good faith to reach agreement on the terms of a successor agreement to the Collective Bargaining Agreement.

Section 7.05. **Restrictions on Sale or Lease of System; Right of First Refusal.**

(a) Buyer hereby acknowledges and agrees that for a period of twenty (20) years following the Closing Date (the "ROFR Period"), the Seller (or any Person to which the Seller assigns its rights under this Section 7.05) shall have a right of first refusal with respect to a Sale Transaction, as set forth in this Section 7.05.

(b) Buyer agrees that, during the ROFR Period, it shall not enter into any legally binding written agreement or consummate a Sale Transaction, except in compliance with the terms and conditions of this Section 7.05. Upon Buyer's or any Affiliate of Buyer's receipt of a bona fide Proposal from a Person that is not a direct or indirect Affiliate of Buyer (such Person, the "Independent Third Party") which Buyer desires to accept, Buyer shall, within five (5) Business Days of Buyer's determination of its desire to accept such Proposal, deliver to the Seller written notice of such Proposal (the "Proposal Notice"), which Proposal Notice shall include (i) a true and correct copy of the Proposal, including all schedules, exhibits and ancillary documents related thereto, if any, (ii) identify or describe any other assets of Buyer or its Affiliates, in addition to the System, to be included in such Sale Transaction, and (iii) the expected date of consummation of the Sale Transaction contemplated by such Proposal (such date, together with any other dates or deadlines reflected in the Proposal and the financial and other material terms and conditions of such Proposal, collectively the "Material Terms"). During the twenty (20) Business Day period following the Seller's receipt of the Proposal Notice (such twenty (20) Business Day period, the "Sale Proposal Review Period") (x) Buyer and Buyer's Affiliates shall, and shall direct their Representatives to, cease any and all discussions and communications with the Independent Third Party and its Representatives, and (y) the Seller shall have the exclusive right to determine whether to elect to pursue the Sale Transaction; *provided* that the Seller, in making such determination, shall act reasonably and in good faith and take into account the Seller's capability (financial or otherwise) to purchase the System and any other assets to be included in the Sale Transaction on terms substantially the same as (and in any event no less favorable to Buyer than) the Material Terms and within a time period reasonably proximate to the anticipated date of consummation set forth in the Proposal Notice; and *provided further*, that the Seller shall only be permitted to exercise its right of first refusal pursuant to this Section 7.05(b) with respect to all (and not less than all) of the assets of Buyer or its Affiliates identified or described in the Proposal Notice (including, for the avoidance of doubt, any assets of Buyer or its Affiliates in addition to the System identified or described in such Proposal Notice). During the Sale Proposal Review Period, Buyer shall, reasonably promptly following the Seller's reasonable written request and subject to the Seller's execution of a customary confidentiality agreement containing commercially reasonable terms, provide the Seller and its authorized Representatives access to, and, if requested, copies of, such documents and other written materials that were supplied by or on behalf of Buyer to the Independent Third Party and its Representatives, if any, prior to delivery of the Proposal Notice.

(c) If the Seller elects to exercise its right of first refusal hereunder pursuant to Section 7.05(b) with respect to the Proposal Notice and all assets described therein (including

any assets in addition to the System), the Seller shall deliver a written notice (the "Seller Proposal Notice") to Buyer of such election no later than 5:00 p.m. (Eastern time) on the last Business Day of the Sale Proposal Review Period. The Seller's failure to provide a Seller Proposal Notice prior to the expiration of the Sale Proposal Review Period shall be deemed to constitute a decision not to exercise its right of first refusal hereunder pursuant to Section 7.05(b) with respect to the Proposal Notice, and the Seller shall be deemed to have waived its rights with respect to the Sale Transaction contemplated by the Proposal, but not with respect to any future Proposal, subject to the other restrictions contained herein.

(d) If the Seller timely delivers a Seller Proposal Notice, then following such delivery and until expiration of the ROFR Sale Transaction Negotiation Period (as defined below), the Seller and Buyer shall, acting reasonably and in good faith, engage in exclusive discussions and negotiations regarding the term and conditions of a Sale Transaction between Buyer and the Seller (a "ROFR Sale Transaction") which terms and conditions (financial and otherwise) shall be substantially the same as (and in any event no less favorable to Buyer than) the Material Terms as set forth in the Proposal Notice, unless otherwise agreed by Buyer in its sole and absolute discretion and set forth in a definitive binding agreement duly executed by Buyer. The ROFR Sale Transaction shall be conditioned upon obtaining required approvals from the PaPUC. The "ROFR Sale Transaction Negotiation Period" means the period commencing on the date of delivery of the Seller Proposal Notice and ending on the date that is the earlier of (i) ninety (90) days following delivery of the Seller Proposal Notice, (ii) such date as the Seller notifies Buyer that the Seller is unwilling, unable or no longer interested in pursuing discussions and negotiations concerning a ROFR Sale Transaction, or (iii) such date as the Seller ceases to engage in good faith negotiations concerning a ROFR Sale Transaction, as determined by Buyer acting reasonably and in good faith.

(e) If Buyer and the Seller have not entered into a definitive agreement (containing terms and conditions (financial and otherwise) substantially the same as (and in any event no less favorable to Buyer than) the Material Terms as set forth in the Proposal Notice (unless otherwise agreed by Buyer in its sole and absolute discretion and set forth in a definitive binding agreement duly executed by Buyer) and such other terms as are reasonably acceptable to each of Buyer and the Seller in their respective reasonable, good faith discretion) with respect to the ROFR Sale Transaction prior to expiration of the ROFR Sale Transaction Negotiation Period, the Seller shall be deemed to have waived its rights with respect to the Sale Transaction contemplated by the Proposal, but not with respect to any future Proposal, subject to the other restrictions contained herein.

(f) For the avoidance of doubt, unless and until Buyer and the Seller duly execute and deliver a definitive agreement in respect of a ROFR Sale Transaction, Buyer shall (1) have the right, in its sole and absolute discretion, to terminate negotiations and discussions with the Seller concerning a ROFR Sale Transaction at any time and retain ownership of the System, and (2) not be obligated or required to enter into any definitive agreement with the Seller or consummate a ROFR Sale Transaction, *provided, that*, in the event that Buyer exercises its right to terminate negotiations and discussions with the Seller concerning a ROFR Sale Transaction by giving notice of such termination to the Seller prior to expiration of the ROFR Sale Transaction Negotiation Period, the Seller shall not be deemed to have waived its rights with respect to the Sale Transaction contemplated by the Proposal giving rise to such negotiations and discussions

concerning a ROFR Sale Transaction, nor with respect to any future Proposal, and subject to the other restrictions contained herein.

(g) With respect to each Proposal for which Buyer delivered a Proposal Notice and otherwise complied in all material respects with all of the applicable procedures and requirements of this Section 7.05 (the "Noticed Proposal"), in the event that (i) the Seller does not deliver a Seller Proposal Notice to Buyer prior to the expiration of the applicable Sale Proposal Review Period or (ii) Buyer and the Seller, acting reasonably and in good faith, have not executed and delivered a definitive agreement with respect to the ROFR Sale Transaction prior to the expiration of the ROFR Sale Transaction Negotiation Period, then, and only then, Buyer and Buyer's Affiliates, as applicable, shall be free, for a period of one hundred twenty (120) days following expiration of the Sale Proposal Review Period or the ROFR Sale Transaction Negotiation Period, as applicable (the "Noticed Proposal Period"), to enter into a definitive agreement with respect to the Sale Transaction contemplated by the Proposal Notice with respect to such Noticed Proposal with Independent Third Party on terms and conditions substantially similar to, and in any event not more favorable in any material respect to the Independent Third Party than, the terms and conditions described in the Proposal Notice; *provided, however*, that no such definitive agreement shall impose limitations or restrictions on the ability of Buyer or any of its Affiliates to comply with the terms of this Section 7.05 in the event of a Material Change with respect thereto.

(h) If, during a Sale Proposal Review Period or a Noticed Proposal Period, the Independent Third Party proposes in writing to any changes or amendments to the applicable Proposal or Noticed Proposal which (i) individually or in the aggregate are more favorable in any material respect to the Independent Third Party than the original Material Terms as set forth in the Proposal Notice, and (ii) Buyer desires to accept (such changes or amendments, collectively a "Material Change"), then such Proposal or Noticed Proposal, as changed or amended, shall constitute a new Proposal which shall be subject to the terms and conditions of this Section 7.05.

(i) Buyer acknowledges and agrees that irreparable damage would occur and Seller would not have an adequate remedy at law in the event that any of the provisions of this Section 7.05 were not performed by it in accordance with their specific terms or were otherwise breached, and that monetary damages would not be an adequate remedy therefor, and therefore fully intend for specific performance to be the principal remedy for breaches of this Section 7.05. It is accordingly agreed that the Seller shall be entitled to an injunction or injunctions to prevent breaches of this Section 7.05 and to enforce specifically the performance of terms and provisions of this Section 7.05 in any action instituted in any court having jurisdiction over the Parties and the matter, without proof of actual damages, in addition to any other remedy to which the Seller is entitled at law or in equity. Buyer further agrees not to assert that a remedy of specific performance is unenforceable, invalid, contrary to applicable Law or inequitable for any reason, nor to object to a remedy of specific performance on a basis that a remedy of monetary damages would provide an adequate remedy for any such breach.

(j) The Seller's rights and obligations under this Section 7.05 may be assigned (in whole, but not in part) by the Seller at any time prior to the earlier of the expiration of the ROFR Period or the consummation of a Sale Transaction with any Person other than the Seller (subject to Buyer's compliance with the terms of this Section 7.05); *provided* that the Seller shall deliver

to Buyer written notice of any such assignment prior to the effectiveness of such assignment. For the avoidance of doubt, each reference to "the Seller" in this Section 7.05 shall mean the Seller or any Person to which the Seller assigns its rights under this Section 7.05 in compliance with this Section 7.05(j).

Section 7.06. **Consent Decree.**

(a) Consent Decree Obligations; Compliance Schedule. Between the Effective Date and the Closing, (i) the Seller shall diligently perform and implement the CSO Controls, the Nine Minimum Control Plan, and the Long Term Control Plan in accordance with the requirements of the Consent Decree, and (ii) the Seller shall continue to implement activities relating to the Consent Decree and Long Term Control Plan projects in accordance with, and shall comply with, the schedule set forth in Schedule 7.06 (the "Compliance Schedule"), which Compliance Schedule sets out and requires the Seller to continue to perform certain activities during the period between the Effective Date and the Closing Date relating to the Seller's obligations under the Consent Decree and the Long Term Control Plan. The Seller shall confer with Buyer prior to proposing any revisions to the deadlines or projects contained in Appendix B of the Consent Decree proposed by the Seller, which require approval by parties to the Consent Decree; and the Seller shall not agree to the expansion or acceleration of any such project without the prior written approval of Buyer. Any change to the deadlines or projects contained in Appendix B of the Consent Decree following the Effective Date that has been agreed to by Buyer and has been separately approved by the parties to the Consent Decree before the Closing Date shall be included in the Amended Consent Decree.

(b) Acknowledgment of Seller Notice to Buyer the Consent Decree. Buyer acknowledges that it has received from the Seller a true, correct and complete copy of the Consent Decree and that Buyer understands and agrees to assume, as of the Closing Date, all obligations set forth in the Consent Decree, as amended in accordance with Section 7.06(d).

(c) Notice to the United States, EPA and PaDEP. Buyer and the Seller shall, on the Effective Date, cause notice of execution of this Agreement and Buyer's agreement to assume the Seller's obligations under the Consent Decree, which shall become effective as of the Closing Date, to be sent to the United States Department of Justice ("DOJ"), EPA and PaDEP as required under Section II and Section XVI of the Consent Decree.

(d) Transition Plan and Amended Consent Decree. Buyer, in consultation with the Seller, shall prepare a transition plan ("Transition Plan") setting forth (i) Buyer's financial and technical ability to assume the Seller's obligations and liabilities under the Consent Decree, (ii) Buyer's plans for implementation of the obligations under the Consent Decree after Closing (including plans for organization and management of the CSO Controls and implementation of the Long Term Control Plan). The Seller and Buyer shall jointly seek the agreement of the DOJ, EPA and PaDEP to an amendment to the Consent Decree that contains the following elements: (1) any necessary updates to the factual recitals of the Consent Decree; (2) substitution of Buyer for the Seller as the "Defendant" under the Consent Decree; (3) release of the Seller in accordance with Article II, Section 5 of the Consent Decree; (4) recognition that the System will continue to be governed by the provisions of the Consent Decree, implementing the EPA CSO Policy; (5) modification of the Nine Minimum Controls Plan to reflect the manner and methods

by which Buyer, as a public utility, would implement the Nine Minimum Controls Plan, including identification of those activities (such as street sweeping and enforcement of ordinances) that would continue to be performed by the City; (6) incorporation of the element previously agreed to pursuant to the Notice of Non-Material Modification of Consent Decree dated December 18, 2015; (7) updates to the notice provisions in Sections 83-84 of the Consent Decree; and (8) such other amendments as agreed to by the Parties to the Consent Decree (the "Amended Consent Decree"). Assuming the accuracy of the Seller's representations set forth in Section 4.15 and the Seller's compliance with and performance of its obligations under Section 7.06(a), the Seller and Buyer, in seeking approval to the Amended Consent Decree, do not anticipate requesting any material modification to the substantive obligations set forth in the Consent Decree, including the schedule for implementation of the Long Term Control Plan; *provided, however*, that in the event that Buyer, reasonably and in good faith, determines that the Seller has breached any of its representations and warranties set forth in Section 4.15 or that the Seller has failed to comply with and perform its obligations under Section 7.06(a)Section 7.06(a), Buyer shall have the right to negotiate with the DOJ, EPA and PaDEP an adjustment to the schedules for the Long Term Control Plan and Nine Minimum Controls Plan so as to allow Buyer sufficient time to complete such work after the Closing Date without incurring fines or penalties. The Parties acknowledge and agree that the release of the Seller pursuant to the provisions of Article II, Section 5 of the Consent Decree shall require approval by the United States District Court for the Middle District of Pennsylvania of the substitution of Buyer as a Defendant and the Amended Consent Decree. For the avoidance of doubt, in no event shall any release of the Seller under or with respect to the Consent Decree constitute, or be deemed to constitute a release or waiver, or in any way affect the Seller's obligations under this Agreement with respect to the Consent Decree and the performance of the Seller's obligations with respect to the Consent Decree prior to the Closing.

(e) Cooperation. The Seller and Buyer shall cooperate and act in good faith in negotiating and securing agreements with the City, the Borough and municipalities served by intermunicipal agreements under which the City, the Borough, and such other municipalities commit to undertake and perform those actions required to implement obligations under the revised Nine Minimum Control Plan to be approved by EPA and PaDEP and the Industrial Pretreatment Program, including activities relating to street sweeping, and the adoption, maintenance and enforcement of ordinances relating to prohibited or regulated discharges to the System. The Seller and Buyer shall also cooperate and act in good faith in evaluating the feasibility of transferring and allowing the City and the Borough to utilize, in relation to operation of their MS4 System, nutrient and sediment reduction offsets or credits generated through operation of the existing wastewater treatment plant at loadings less than the sediment and nutrient cap loads established in the NPDES Permit in excess of those offsets or credits required by Buyer in relation to operation of the System ("Excess Offsets and Credits"), and if determined to be feasible, negotiating in good faith arrangements on reasonable terms for transferring to the City and the Borough such Excess Offsets and Credits to the extent required to meet the nutrient and sediment loading limitations applicable to the MS4 System.

Section 7.07. **Current and Future Rates.**

(a) The Parties acknowledge that following the Closing, (i) the initial customer charge and consumption charge applicable to wastewater customers in the Service Area shall be

the customer charge and consumption charge being paid by those customers for wastewater service being provided by the Seller immediately prior to the Closing Date and said charges shall continue in full force and effect until changed in accordance with this Agreement and applicable Law, (ii) Buyer may, subject to PaPUC approval and applicable Law, bill wastewater customers in the Service Area a monthly customer charge, provided that the aggregate amount of the customer charge does not change until changed in accordance with this Agreement and applicable Law, and (iii) the base rate and non-base rate increases (collectively, "Rate Increase(s)") for Service Area wastewater customers, subject to PaPUC approval and applicable Law, will likely vary each year or more frequently and, in some years, there may be no Rate Increase. The Parties further acknowledge that tariffed rates, as set by the PaPUC, are subject to applicable Law and binding upon the Parties. The Parties agree, subject to PaPUC approval and applicable Law, that wastewater customers in the Service Area will immediately following the Closing be subject to Buyer's prevailing wastewater tariff on file with and as approved by the PaPUC with respect to all rates other than the customer charge (known under Buyer's current tariff as "monthly service charge") and consumption charge, including but not limited to capacity reservation fees, tapping fees and the like, as well as non-rate related terms and conditions of service, including but not limited to billing frequency, termination procedures and the like.

(b) Notwithstanding anything to the contrary in Section 7.07(a), Buyer shall not implement a Rate Increase for the Service Area wastewater customers that would be effective prior to January 1, 2018. Buyer shall not propose or implement a distribution improvement system charge for the Service Area wastewater customers before January 1, 2019.

(c) In the first base rate case filed by Buyer after the Effective Date of this Agreement, subject to PaPUC approval and applicable Law, Buyer shall not propose or request any rate increase to the base rates or change in rate design to be applicable to wastewater customers in the Service Area. However, the Parties acknowledge that Buyer shall have the reasonable discretion to address and agree to base rate increases and changes in rate design for wastewater customers in the Service Area in the context of settlement of the base rate case, subject to PaPUC approval and applicable Law.

(d) Not later than ninety (90) days after the end of year ten (10) following the Closing Date, Buyer shall provide to Seller a written statement and calculation showing as accurately as possible the cumulative positive difference, if any, over that ten-year period between (i) the annual revenues associated with the provision of wastewater service to customers in the Service Area calculated at PaPUC rates in accordance with Schedule 7.07(d) and (ii) a 1.9% Compound Annual Growth Rate ("CAGR") rate increase in annual revenues associated with the provision of wastewater service to customers in the Service Area over that ten-year period relative to the starting amount of annual revenues calculated in accordance with Schedule 7.07(d) ("Variance Adjustment"). Seller shall review and advise Buyer within 30 days of Seller's receipt of such statement of any problems or suggested modifications to the calculation of the Variance Adjustment and written statement. The Parties shall timely and in good faith, resolve any problems or suggested modifications to the Variance Adjustment identified by Seller or Buyer. Any dispute regarding the calculation of the Variance Adjustment shall be timely submitted for resolution to the office of a mutually acceptable nationally recognized firm specializing in utility ratemaking, other than consultants of Buyer or Seller or their Affiliates who, acting as experts and not arbitrators, shall resolve the dispute. The dispute shall be resolved within thirty (30)

days and the costs of retaining the firm and resolving the dispute shall be shared equally by Buyer and Seller. Buyer shall make an adjustment, without interest or other penalty, to the Purchase Price in the amount of the Variance Adjustment, if any, in accordance with the procedures and timing set forth in Section 7.07(e).

(e) Within thirty (30) days of final resolution of the calculation of the Variance Adjustment, Seller shall notify Buyer whether the adjustment to the Purchase Price in the amount of the Variance Adjustment shall be paid directly to Seller or distributed to Buyer's then-current wastewater customers in the Service Area. If Seller elects direct payment to itself, Buyer shall make such payment within thirty (30) days without further obligation. If Seller elects distribution of the adjustment of the Purchase Price for the Variance Adjustment to Buyer's then-current wastewater customers in the Service Area, Buyer shall at its sole cost and expense, subject to PaPUC approval and applicable Law, timely implement procedures and protocols reasonably acceptable to Seller and then make a one-time equal, flat-rate distribution to all customers then being served by Buyer in the Service Area their proportionate share of the Variance Adjustment as mutually agreed-upon by Buyer and Seller. Buyer shall timely certify in writing to Seller when the distribution of the Variance Adjustment has commenced and been completed. In the event the PaPUC fails to allow Buyer to timely implement procedures and protocols and make distributions to customers in the Service Area as aforesaid, Buyer shall pay the Variance Adjustment as an adjustment to the Purchase Price directly to Seller within thirty (30) days of final resolution of the calculation of the Variance Adjustment. If Buyer fails to pay the Variance Adjustment as an adjustment to the Purchase Price within thirty (30) days of the final resolution of the calculation of the Variance Adjustment (whether where Seller initially requests direct payment or the PaPUC fails to allow distribution to customers), Buyer shall pay Seller an amount of $2,500.00 per day for each day that all or any portion of the Variance Adjustment has been unpaid after 30 days following resolution of the calculation of the Variance Adjustment. The Parties intend that such damages constitute compensation, and not a penalty, and acknowledge and agree that the harm caused by the Buyer's breach of its obligations under this Section would be impossible or very difficult to accurately estimate, and that such damages are a reasonable estimate of the anticipated or actual harm that might arise from Buyer's breach of its obligations under this Section. In the event the PaPUC fails to allow distribution by Buyer to then-current Service area wastewater customers, Buyer shall also timely pay Seller the reasonable costs of (i) hiring a third party to administer and pay the Variance Adjustment to wastewater customers in the Service Area and (ii) establishing the processes and protocols to make such payment as described herein. Notwithstanding anything in this subparagraph to the contrary, Buyer shall have the right to reasonably approve the third party selected by Seller to administer and pay any Variance Adjustment to wastewater customers in the Service Area, but in no event shall such approval be unreasonably delayed, conditioned, withheld or denied.

(f) The Variance Adjustment shall be calculated in accordance with Schedule 7.07(d).

(g) If requested by the Seller (not more than once per year), no later than (60) days after such request, Buyer shall provide to the Seller a written statement showing (i) for the 12 month period ending on the most recently completed anniversary of the Closing Date, the projected Variance Adjustment calculated in accordance with Schedule 7.07(d) and (ii) the then-current Annual Variance (as defined in Schedule 7.07(d)). The written statement shall be

provided for informational purposes only and shall not trigger an affirmative duty of Buyer to take a specific action, or be deemed to be any agreement or acquiescence of Seller to any of the data and information contained therein. The written statement referenced herein shall be substantially in the form of the Hypothetical Example contained in Schedule 7.07(d), along with reasonable supporting workpapers.

(h) At the end of year ten (10) following the Closing Date, if the wastewater base rates for the Service Area are lower by customer class than the Average System Rates for wastewater service charged to Buyer's non-Service Area wastewater customers, Buyer may seek from the PaPUC base rate increases for Service Area wastewater customers that would be effective during years eleven (11) through thirteen (13) following the Closing that would equalize the base rates charged by Buyer to Service Area wastewater customers with Average System Rates effective for Buyer's non-Service Area wastewater customers throughout Pennsylvania. Buyer will attempt to implement the base rate increases over the three-year period in approximately one-third (1/3) increments each year, subject to PaPUC approval and applicable Law. However, the Parties acknowledge that Buyer shall have the reasonable discretion to address and agree to base rate increases for wastewater customers in the Service Area in the context of settlement of a base rate case, subject to PaPUC approval and applicable Law.

(i) If during years eleven (11) through thirteen (13) wastewater base rates in the Service Area are higher by customer class than the Average System Rates for wastewater service charged to Buyer's other wastewater customers, Buyer shall not seek a base rate increase for the Service Area wastewater customers during this period. However, the Parties acknowledge that Buyer shall have the reasonable discretion to address and agree to base rate increases for wastewater customers in the Service Area in the context of settlement of a base rate case, subject to PaPUC approval and applicable Law.

(j) If at the end of year ten (10) following the Closing Buyer's wastewater customers in the Service Area are not paying the same non-base rates (including the distribution system improvement charge) as Buyer's other customers being served under Average System Rates, Buyer will attempt to bring the non-base rates of customers in the Service Area into conformity with the non-base rates of the other customers being served under Average System Rates by the end of year thirteen (13) following the Closing, subject to PaPUC approval and applicable Law.

(k) After year thirteen (13) following the Closing, the Parties acknowledge that Buyer may, subject to PaPUC restrictions and applicable Law, propose rate adjustments reasonably necessary to make the total rates (inclusive of base rates and non-base rates such as the distribution system improvement charge) for wastewater customers of the Service Area consistent with the total rates (inclusive of base rates and non-base rates such as the distribution system improvement charge) of Buyer's customers who are subject to Average System Rates.

(l) Solely for the purposes of any calculation of the projected or actual Variance Adjustment and the provisions of written statements related thereto pursuant to this Section 7.07, the "Closing Date" shall be deemed to have occurred on the date that is the last day of the month in which the Closing actually occurs.

Section 7.08. **Operation and Maintenance of the MS4 System.**

(a) General operation and maintenance obligations. Subject to applicable Law, the Seller, the City and the Borough, as the case may be, shall at all times maintain ownership of the MS4 System, the Stormwater System Assets and the City's NPDES Permit.

(b) Community-based Public-Private Partnership Approach for Integration of the MS4 System and the System. Following the Closing, Buyer shall cooperate with the City and the Borough, and use commercially reasonable good faith efforts to evaluate the feasibility of and develop a mutually-acceptable plan for financing, management and operation of the MS4 System in a manner that is consistent with the community-based public-private partnership approach described in Section 6 of Buyer's response to the Request for Best and Final Offers for the Purchase of the Seller's Sewer System and Sewage Treatment Works dated as of October 5, 2015, and in compliance with applicable Law.

Section 7.09. **Additional Agreements.**

(a) From and after the Closing Date and for a period of no less than ten (10) years following the Closing (except, in the case of clause (xi) of this Section 7.09(a), for such shorter period set forth therein), Buyer shall comply with the following covenants and agreements, subject to applicable Law and subject in all cases to Section 7.09(b):

(i) Buyer will establish, in consultation with the Seller, within a reasonable period of time following the Closing, and maintain, a public outreach program, pursuant to which Buyer will, in good faith, use commercially reasonable efforts to explore and consider the formation of a citizens' advisory council comprising representatives from the communities served by the System and the adoption of other public outreach practices established in the Service Area;

(ii) Buyer shall, within a reasonable period of time following Closing, establish and maintain or caused to be maintained (either directly by Buyer, by Buyer's Affiliates or by a third party engaged by Buyer, in any case at Buyer's sole discretion) a local, publicly accessible facility that accepts bill payment from the System's customers;

(iii) Buyer shall, within a reasonable period of time following Closing, establish and maintain or caused to be maintained a 24-hour toll-free customer service telephone number for emergencies with respect to the System, and will use commercially reasonable efforts to dispatch service requests for the efficient provision of customer services;

(iv) Buyer shall, within a reasonable period of time following Closing, establish policies, procedures and systems designed to (1) ensure that billing, account and service questions with respect to the System will be answered by live customer service representatives between the hours of 7:00 am to 7:00 pm (ET) and (2) enable customers of the System to pay their bills by mail, direct debit, online or at a local payment station;

(v) Buyer shall, within a reasonable period of time following Closing, establish policies, procedures and systems designed to provide (1) that each customer of the System that receives both water and sewer services from Buyer will receive a single bill that incorporates such customer's charges for both water and sewer utilities and (2) a

single point of contact for customer service requests for both water and sewer utilities provided by Buyer within the Service Area;

(vi) Buyer will maintain a website or similar service for customers to access for information related to the System, provided that the content and scope of such information shall be determined by Buyer in its sole discretion;

(vii) Buyer and Buyer's Affiliates shall, after the Closing Date and no later than the end of the calendar year 2020, hire or offer to hire in the City or otherwise in connection with the System no less than one hundred (100) individuals (expressly excluding Transferred Personnel) for positions with Buyer or Buyer's Affiliates that do not exist on, and are created by Buyer and its Affiliates following, the Closing Date, and the compensation and benefits of such newly-created positions will be substantially comparable in the aggregate to the compensation and benefits of Buyer's water system employees in similar positions as of the date hereof, and Buyer and Buyer's Affiliates shall continue to offer to hire such individuals for such positions until the earlier of (x) such time as Buyer and Buyer's Affiliates hire one hundred (100) individuals for such positions or (y) the end of the calendar year 2020;

(viii) Buyer will ensure its Building Better Communities program, building trails, parks and playgrounds within the community, its H2O – Help to Others Program for low-income customers, fire fighter grant program and other charitable programs (or substantially similar equivalents) will be either continued within or expanded into, as applicable, the communities served by the System;

(ix) to the extent consistent with policies and initiatives of Buyer in effect as of the date hereof and otherwise permitted under applicable Law, Buyer will, within a reasonable period of time following the Closing, establish policies and procedures designed to provide minority business enterprises, women-owned business enterprises, veteran-owned business enterprises and locally-based businesses the opportunity to compete for work related to the System and contract with Buyer;

(x) in Buyer's first base rate proceeding with respect to the System following the Closing, Buyer shall include a request in such proceeding to combine partially, under Pennsylvania's System Improvement Charges Act 11 of 2012 ("Act 11"), Buyer's water and wastewater revenue requirements for ratemaking purposes to ensure the System's customers benefit from Act 11 in the same manner as its other customers throughout Pennsylvania and to the extent permitted by the PaPUC and applicable Law; *provided*, that Buyer shall nonetheless have the reasonable discretion to address and agree to base rate increases for wastewater customers in the Service Area in the context of settlement of a base rate case, and nothing contained in this clause (x) shall be deemed to restrict or limit Buyer in the context of any such settlement, subject to PaPUC approval and applicable Law; and

(xi) subject to applicable Law, during the one (1) year period following the Closing Date, Buyer's collection standards and practices with respect to customers of the System will be consistent in all material respects with the collection standards and

practices utilized by Buyer as of the date hereof with respect to customers of the Water System.

(b) Notwithstanding anything in this Section 7.09 to the contrary, neither Buyer nor any of Buyer's Affiliates shall be liable or responsible to the Seller or any other Person, nor be deemed to have defaulted under or breached this Section 7.09, for any failure or delay by Buyer or its Affiliates in fulfilling or performing any obligation under any provision of Section 7.09(a), when and to the extent such failure or delay is directly or reasonably proximately caused by, or a direct or reasonably proximate result of, any of the following events, states of facts, occurrences, non-occurrences, circumstances, developments or changes, in each case beyond the reasonable control of Buyer (but not including, for the avoidance of doubt, any such event, state of facts, occurrence, non-occurrence, circumstance, development or change which results from any intentional or willful act by Buyer or Buyer's Affiliates or their respective Representatives (in their capacities as such) designed or intended to result in Buyer being relieved of its obligations under Section 7.09(a)): (i) flood, earthquake, hurricane, tornado, fire, explosion, landslide, natural disaster or other "acts of God", (ii) war, invasion, hostilities (whether war is declared or not), sabotage, terrorist threats or acts, riot or other civil unrest, (iii) enactment of or changes in applicable Law or the interpretation or enforcement thereof, (iv) action by any Governmental Authority, (v) national or regional emergency, (vi) strikes, labor stoppages or slowdowns or other industrial disturbances, (vii) shortage of adequate power or transportation facilities, (viii) breakage or accidents to machinery, pipelines, dams or canals or partial or entire failure or contamination of water supply, and (ix) other similar events and circumstances beyond the reasonable control of Buyer. In the event of a failure or delay by Buyer in fulfilling or performing any term of this Section 7.09 due to any such event, state of facts, occurrence, non-occurrence, circumstance, development or change beyond Buyer's reasonable control, Buyer shall use commercially reasonable efforts to end the failure or delay and commence or resume the performance of its obligations as soon as reasonably practicable after the end of such event, state of facts, occurrence, non-occurrence, circumstance, development or change (including through the use of alternate sources, workaround plans or other commercially reasonable means to permit Buyer to perform such obligations), and Buyer and its Affiliates shall use commercially reasonable efforts and act in good faith in the performance of their obligations under this Section 7.09; *provided* that (1) Buyer's commercially reasonable efforts under this Section 7.09(b) shall in no event require Buyer to incur any extraordinary costs or expend resources which are not reasonably proportional to the costs that would be incurred or resources that would be expended in Buyer's performance of the applicable obligation Section 7.09(a), and (2) in the event that Buyer's performance of any obligation under this this Section 7.09 is prevented, delayed or otherwise adversely impacted by the enactment of or change in applicable Law or the interpretation or enforcement thereof or an action by any Governmental Authority, in no event shall this Section 7.09(b) be deemed to require Buyer to violate any such Law or take any action with respect to a Governmental Authority (including requesting any unique or extraordinary concession or other Governmental Approval) which Buyer, acting reasonably and in good faith and based on the advice of counsel, determines would reasonably be expected to adversely affect Buyer's or its Affiliates' standing or relationship with such Governmental Authority.

(c) Buyer acknowledges that, upon conveyance of the Acquired Assets to Buyer, Buyer will be subject to, among other Taxes, real estate Taxes, which shall be paid by Buyer. During the two (2) year period following the Closing Date, in the event of any real property Tax

assessment of the Real Property owned in fee by Buyer that would result in Buyer being required to pay an aggregate amount of real estate Taxes equal to or less than $400,000 for such year, Buyer shall not appeal any such assessment during such two (2) year period.

Section 7.10. **Exclusivity.** From and after the Effective Date and until the earlier of the Closing Date or the termination of this Agreement in accordance with its terms, except for the transactions contemplated by this Agreement, (a) without the prior written consent of Buyer, the Seller, the City and the Borough and their respective Affiliates will not, and will cause their respective Representatives and other advisors not to, directly or indirectly, (i) solicit, initiate or encourage submission of any inquiry, proposal or offer from any Person relating to any transaction involving any sale or transfer of any of the Acquired Assets or the System, (ii) enter into or participate in any discussions or negotiations regarding, or furnish any information to or cooperate with any Person with respect to, any transaction involving any of the Acquired Assets or the System, or (iii) enter into any negotiation, discussion, Contract, agreement, instrument, arrangement or understanding with any Person relating in any manner to any transaction involving any sale, transfer or other disposition of any of the Acquired Assets or the System; and (b) in the event that the Seller, the City, the Borough, their respective Affiliates or any of their respective Representatives or other advisors receives any proposal with respect to any of the matters described in the foregoing clause (a), the Seller shall promptly (but in no event later than two (2) Business Days after receipt thereof) communicate to Buyer the existence of any such proposal.

Section 7.11. **Outstanding Indebtedness.**

(a) As provided in Section 3.01(a), Buyer has the option, upon reasonable advance written notice to the Seller, in lieu of paying (on behalf of the Seller) in full the total amount of Outstanding Indebtedness at the Closing, to assume any of the Seller's and the City's obligations under the Outstanding Indebtedness which may be lawfully assigned to and assumed by Buyer pursuant to applicable Law and the terms of the Contracts governing the Outstanding Indebtedness (such portion of the Outstanding Indebtedness, the "Assignable Outstanding Indebtedness").

(b) Not less than forty five (45) days prior to the Closing Date, Buyer shall notify the Seller in writing which items of the Outstanding Indebtedness Buyer desires to assume as Assignable Outstanding Indebtedness. Recognizing that it may be necessary for Buyer and the Seller to obtain consents and approvals from third parties and take other actions in order for Buyer to assume Assignable Outstanding Indebtedness, the Seller and Buyer shall cooperate with respect to the giving of all notices and the making of all requests and the furnishing of all information and documents as Buyer shall reasonably determine to be necessary or appropriate in order to qualify any portions of Outstanding Indebtedness as Assignable Outstanding Indebtedness. Notwithstanding anything herein contained to the contrary, in connection with any Assignable Outstanding Indebtedness which Buyer elects to assume, in no event may such Assignable Outstanding Indebtedness be assumed by Buyer unless in connection with such assignment and assumption, the Seller and the City are released from any and all obligations under such Assignable Outstanding Indebtedness.

(c) With respect to all Outstanding Indebtedness other than Assignable Outstanding Indebtedness (if any), the Seller shall take all such action as shall be required under the terms of such Outstanding Indebtedness (including any indentures and loan agreements relating thereto) to call such Outstanding Indebtedness for prepayment or redemption on the Closing Date (if such Outstanding Indebtedness is then subject to prepayment or redemption) and to terminate and cancel all commitments to lend as of the Closing Date (in the case of lines of credit under which the Seller is the borrower) or to arrange for the legal defeasance of such Outstanding Indebtedness (if such Outstanding Indebtedness is not then subject to prepayment or redemption) as of the Closing Date, which arrangements may be required to include the creation of a defeasance escrow, the subscription for investment securities for the defeasance escrow, the obtaining of an accountant's verification report and the delivery of legal opinions. All such action of the Seller shall be subject to the reasonable review and approval of Buyer.

Section 7.12. **PaPUC Approval.** Commencing on the Effective Date, Buyer covenants and agrees to timely initiate and faithfully prosecute, along with Seller as co-applicant, the necessary proceedings to obtain from the PaPUC (i) the issuance of certificates of public convenience to Buyer to provide wastewater services in the Service Area and the acquisition of the System by Buyer, (ii) approval of this Agreement and any other contractual arrangements between Buyer and municipalities for the provision of wastewater services in the Service Area in accordance with Section 507 of the Public Utility Code, 66 Pa. C.S. § 507, (iii) approval to allow Buyer to implement procedures and protocols and then distribute the Variance Adjustment to wastewater customers being served by Buyer in the Service Area as provided in and limited by Section 7.07(e), (iv) approval of Buyer's initial pro forma tariff applicable to Service Area customers, and (v) approval of a tariff supplement incorporating Buyer's Industrial Pretreatment Program applicable to the System into Buyer's tariff to be filed by Buyer during the course of the PaPUC proceeding. The Seller shall assist and cooperate with Buyer in connection with Buyer's performance of its obligations under this Section 7.12(a) in accordance with the Seller's obligations pursuant to Section 9.02 and Section 9.04.

(b) The Parties acknowledge and agree that Buyer shall be primarily responsible for prosecuting the PaPUC proceedings referenced in Section 7.12(a), that Buyer may establish reasonable processes and procedures for prosecuting the PaPUC proceedings to which Seller and its representatives shall be required to comply, and that Seller shall act with due diligence and dispatch in addressing all matters pertinent to the prosecution of the PaPUC proceedings so as to not prejudice the Parties' participation in that proceeding or the potential outcome thereof. Notwithstanding the foregoing, the Parties shall in good faith timely cooperate with each other in developing and implementing procedures and protocols for addressing all aspects of the PaPUC proceedings referenced in Section 7.12(a) including developing case strategy, pre-filing meetings with regulators and stakeholders, preparing all pleadings, responding to discovery, developing testimony, conducting evidentiary hearings, preparing briefs and other pleadings, etc. In the event of a good faith dispute between the Parties regarding strategy, tactics or other aspects of the PaPUC proceeding that cannot in the exercise of good faith and due diligence be resolved timely, Buyer shall have the right in such circumstances to take such action as it reasonably deems necessary consistent with this Agreement.

(c) Nothing contained herein shall preclude, consistent with Section 7.12(b), the filing for reconsideration of or appealing a PaPUC Final Order if the order contains terms or conditions that are not reasonably satisfactory.

(d) Notwithstanding anything to the contrary in this Agreement, in the event the PaPUC issues an order approving the transaction as contemplated by this Section 7.12 and if all other conditions precedent to Closing have been fully satisfied in accordance with the terms of this Agreement, the Parties may elect in their discretion and by mutual agreement to close on the transaction (i) notwithstanding a pending appeal or request for reconsideration with respect to such order or (ii) during the otherwise applicable appeal/reconsideration periods if no party has been aggrieved by the PaPUC order and the Parties reasonably believe there is little likelihood of a successful legal or other challenge to said PaPUC order.

Section 7.13. **Insurance**. To the extent that the Seller (with respect to the System or any Acquired Assets), the System or any Acquired Assets were insured under any occurrence-based insurance policies of the City or the Borough (or with respect to any Acquired Assets, any occurrence-based insurance policies of the Seller) prior to the Closing Date, following the Closing, at Buyer's written request, the Seller shall, and shall cause the City or the Borough, as applicable, to, make claims under such policies with respect to occurrences, events, conditions, or circumstances to the extent relating to the System or any Acquired Asset that occurred or existed prior to the Closing. The Seller does not represent, warrant or covenant that (i) such insurance policies will provide coverage for any claims reported after the Closing that Buyer may elect to make, (ii) issuers of such policies will not wrongfully refuse to honor any such claims, or (iii) it, the City or the Borough will maintain any such insurance policies following the Closing Date. The Seller, the City or the Borough, as the case may be, shall provide reasonable assistance to Buyer (at Buyer's sole cost and expense) in connection with the tendering of such claims to the applicable insurers under such insurance policies, including providing Buyer with a copy of the applicable policy following the request of Buyer. The Seller, the City or the Borough, as the case may be, shall remit any recoveries with respect to any claims asserted by Buyer under any such insurance policies in excess of reasonable costs of recovery of the Seller, the City or the Borough, as the case may be, including deductibles and the amount of any increased premiums retroactively applied as a result of the payment by the applicable insurers of such claims, or any increases in premiums for the year following the year in which any such claims were paid by the applicable insurers, in either case to the extent the Seller, the City or the Borough, as the case may be, can demonstrate to Buyer that the amount of any such increased premiums was attributable to such claims. In the event of any dispute regarding the date of any loss or occurrence, the terms of the applicable policies shall govern.

ARTICLE VIII.

INDEMNIFICATION

Section 8.01. **Survival.** All representations and warranties contained in this Agreement shall survive until the Escrow Release Date, except that (a) the representations and warranties of the Seller set forth in Section 4.01 (Existence and Power), Section 4.02 (Authorization and Validity of Agreement), Section 4.14 (Environmental Compliance), Section 4.15 (Consent Decree Matters), Section 4.21 (Title to the Acquired Assets; Sufficiency) and Section 4.22

(Brokers' and Finders' Fees) (collectively, the "Seller Fundamental Representations") shall survive the Closing indefinitely or until the latest date permitted by applicable Law, and (b) the representations and warranties of Buyer set forth in Section 5.01 (Existence and Power), Section 5.02 (Authorization and Validity of Agreement), and Section 5.05 (Brokers' and Finders' Fees) (collectively, the "Buyer Fundamental Representations") shall survive the Closing indefinitely or until the latest date permitted by applicable Law. The covenants and agreements of the Parties contained herein shall survive the Closing indefinitely or for the shorter period explicitly specified therein, except that for such covenants and agreements that survive for such shorter period, breaches thereof shall survive indefinitely or until the latest date permitted by applicable Law. Notwithstanding the preceding sentences, (x) any breach of representation, warranty, covenant or agreement in respect of which indemnity may be sought under this Agreement shall survive the time at which it would otherwise terminate pursuant to the preceding sentences, if notice of the inaccuracy or breach thereof giving rise to such right of indemnity shall have been given to the party against whom such indemnity may be sought prior to such time, and (y) nothing contained in this Section 8.01 shall limit in any way any rights a Party may have to bring claims grounded in fraud, intentional misrepresentation or willful misconduct, which rights shall survive the Closing indefinitely.

Section 8.02. **Indemnification by the Seller.** Subject to the terms and conditions of this Article VIII, the Seller shall indemnify, defend and hold harmless, Buyer and its successors and Affiliates and their respective employees, officers, directors, trustees and agents (the "Buyer Indemnified Persons"), from and against any and all Damages arising from or relating to: (a) any misrepresentation as to, or any inaccuracy in, any of the representations and warranties of the Seller contained in this Agreement, in any of the Related Agreements or in any exhibit, schedule, certificate or other instrument or document furnished by or on behalf of the Seller pursuant to this Agreement (*provided*, that for purposes of determining the existence of any inaccuracy in or breach of any representation or warranty and calculating the amount of any Damages with respect thereto under this Article VIII, any materiality, Material Adverse Effect or similar qualifications shall be disregarded and deemed deleted therefrom for such purposes (except with respect to (i) the representations and warranties contained in Section 4.06(a) and (ii) where such provision requires disclosure of lists of items of a material nature or above a specified threshold)); (b) any breach or nonfulfillment of any of the covenants or agreements of the Seller contained in this Agreement, in any of the Related Agreements or in any exhibit, schedule, certificate or other instrument or document furnished by or on behalf of the Seller pursuant to this Agreement; or (c) any Excluded Liability (regardless of whether or not the Seller disclosed any such Excluded Liability in any Schedule or otherwise, including any Excluded Liability imposed on Buyer as a result of transferee, successor or similar liability (including bulk sales, bulk transfer or similar Laws) or otherwise, and including any Taxes arising out of the ownership of the Acquired Assets and out of the operation of the System before the Closing and the Seller's portion of any Straddle Period Taxes, and including the matters set forth on Schedule 4.14) or any Excluded Asset.

Section 8.03. **Indemnification by Buyer.** Subject to the terms and conditions of this Article VIII, Buyer shall defend, indemnify and hold harmless the Seller and its successors and Affiliates and each of their respective employees, officers, directors and agents (the "Seller Indemnified Persons") from and against any and all Damages arising from or relating to: (a) any misrepresentation as to, or any inaccuracy in, any of the representations and warranties of Buyer

contained in this Agreement, in any of the Related Agreements or in any exhibit, schedule, certificate or other instrument or document furnished by or on behalf of Buyer pursuant to this Agreement (*provided*, that for purposes of determining the existence of any inaccuracy in or breach of any representation or warranty and calculating the amount of any Damages with respect thereto under this Article VIII, any materiality, material adverse effect or similar qualifications shall be disregarded and deemed deleted therefrom for such purposes (except where such provision requires disclosure of lists of items of a material nature or above a specified threshold)); (b) any breach or nonfulfillment of any of the covenants or agreements of Buyer contained in this Agreement, any of the Related Agreements or in any exhibit, schedule certificate or other instrument or document furnished by or on behalf of Buyer pursuant to this Agreement; (c) any unfair labor practice charges or other claims that Seller violated Article 16, *Transfer of Authority*, of the Collective Bargaining Agreement, or failed to condition the sale of the Acquired Assets on Buyer's assumption of the Collective Bargaining Agreement, including any and all awards of lost contractual wages or benefits against the Seller which Union Personnel would have received had the Buyer adopted all complete terms and conditions of the Collective Bargaining Agreement; provided, however that no Seller Indemnified Person have the right to assert a claim seeking indemnification pursuant to this Section 8.03(c) (and Buyer shall have no obligation to indemnify any Seller Indemnified Person pursuant to this Section 8.03(c)) unless and only in the event that Buyer, in bargaining with the Union, fails to offer to provide Substantially Comparable Compensation and Benefits in breach of Buyer's obligation pursuant to Section 7.04(h); (d) any Assumed Liability as and when payment and performance is due, including any liability related to any CSO Control Measures to the extent arising after the Closing and any claims by any Governmental Authority for any events, circumstances or liabilities arising after the Closing; (e) Buyer's violation of Environmental Requirements with respect to the System after the Closing Date; (f) Buyer's management of Hazardous Materials in connection with the System after the Closing Date; (g) any Environmental Claims resulting from Buyer's operation of the System after the Closing Date; or (h) the ownership, operation or control of the Acquired Assets or the System after the Closing Date.

Section 8.04. **Indemnification Procedure.**

(a) Third Party Claims. If any Indemnified Party receives notice of the assertion or commencement of any action, suit, claim or other legal proceeding made or brought by any Person who is not a party to this Agreement (or a successor to a Party to this Agreement) (a "Third Party Claim") against such Indemnified Party with respect to which the Indemnifying Party may be obligated to provide indemnification under this Agreement, the Indemnified Party shall give the Indemnifying Party prompt written notice thereof. The failure to give such prompt written notice shall not, however, relieve the Indemnifying Party of its indemnification obligations, except and only to the extent that the Indemnifying Party forfeits material rights or material defenses by reason of such failure. Such notice by the Indemnified Party shall describe the Third Party Claim in reasonable detail and shall indicate the estimated amount, if reasonably practicable, of the Damage that has been or may be sustained by the Indemnified Party. The Indemnifying Party shall have the right to participate in, or by giving written notice to the Indemnified Party (and subject to the other requirements contained herein) to assume the defense of any Third Party Claim at the Indemnifying Party's expense and by the Indemnifying Party's own counsel (which counsel shall be reasonably acceptable to the Indemnified Party), so long as (i) the Indemnifying Party notifies the Indemnified Party, within ten (10) Business Days after the

Indemnified Party has given notice of the Third Party Claim to the Indemnifying Party (or by such earlier date as may be necessary under applicable procedural rules in order to file a timely appearance and response) that the Indemnifying Party is assuming the defense of such Third Party Claim, *provided*, that if the Indemnifying Party assumes control of such defense it must first agree and acknowledge in such notice that the Indemnifying Party is fully responsible (with no reservation of any rights other than the right to be subrogated to the rights of the Indemnified Party) for all Damages relating to such Third Party Claim, (ii) the Indemnifying Party conducts the defense of the Third Party Claim actively and diligently and at its own cost and expense, and (iii) the Third Party Claim (A) does not involve injunctive relief, specific performance or other similar equitable relief, any claim in respect of Taxes, any Governmental Authority, any criminal allegations or any potential damage to the goodwill or reputation of Buyer, (B) is not one in which the Indemnifying Party is also a party and joint representation would be inappropriate or there may be legal defenses available to the Indemnified Party which are different from or additional to those available to the Indemnifying Party, or (C) does not involve a claim which, upon petition by the Indemnified Party, the appropriate court rules that the Indemnifying Party failed or is failing to vigorously prosecute or defend, and *provided further*, that notwithstanding anything to the contrary contained herein, if the Seller is the Indemnifying Party with respect to a Third Party Claim and (i) Buyer or any insurer under the R&W Insurance Policy is required to assume such defense pursuant to the terms thereof or (ii) the Seller's assumption of the defense could cause a Buyer Indemnified Person to lose coverage under the R&W Insurance Policy, the Seller shall not be permitted to assume the defense of such Third Party Claim. The Indemnified Party shall reasonably cooperate in good faith in such defense. In the event that the Indemnifying Party assumes the defense of any Third Party Claim, subject to Section 8.04(b), it shall have the right to take such action as it deems necessary to avoid, dispute, defend, appeal or make counterclaims pertaining to any such Third Party Claim in the name and on behalf of the Indemnified Party. The Indemnified Party shall have the right, at its own cost and expense, to participate in the defense of any Third Party Claim with counsel selected by it subject to the Indemnifying Party's right to control the defense thereof. If the Indemnifying Party elects not to compromise or defend such Third Party Claim or fails to promptly notify the Indemnified Party in writing of its election to defend as provided in this Agreement, the Indemnified Party may, subject to Section 8.04(b), pay, compromise, defend such Third Party Claim and seek indemnification for any and all Damages based upon, arising from or relating to such Third Party Claim. The Seller and Buyer shall reasonably and in good faith cooperate with each other in all reasonable respects in connection with the defense of any Third Party Claim, including making available records relating to such Third Party Claim and furnishing, without expense (other than reimbursement of actual out-of-pocket expenses) to the defending party, management employees of the non-defending party as may be reasonably necessary for the preparation of the defense of such Third Party Claim.

(b) Settlement of Third Party Claims. Notwithstanding any other provision of this Agreement, the Indemnifying Party shall not enter into or agree to settlement of any Third Party Claim without the prior written consent of the Indemnified Party (which consent shall not be unreasonably withheld or delayed), except as provided in this Section 8.04(b). If a firm offer is made to settle a Third Party Claim without leading to liability or the creation of a financial or other obligation on the part of the Indemnified Party and provides for the unconditional release of each Indemnified Party from all liabilities and obligations in connection with such Third Party Claim, and the Indemnifying Party desires to accept and agree to such offer, the Indemnifying

Party shall give prompt written notice to that effect to the Indemnified Party. If the Indemnified Party fails to consent to such firm offer within fifteen (15) days after its receipt of such notice, the Indemnified Party may continue to contest or defend such Third Party Claim and in such event, provided that the Indemnifying Party continues to diligently contest or defend such Third Party Claim in good faith and otherwise complies with its obligations hereunder, the maximum liability of the Indemnifying Party as to such Third Party Claim shall not exceed the amount of such settlement offer. If the Indemnified Party fails to consent to such firm offer and also fails to assume defense of such Third Party Claim, the Indemnifying Party may settle the Third Party Claim upon the terms set forth in such firm offer to settle such Third Party Claim. If the Indemnified Party has assumed the defense of a Third Party Claim pursuant to Section 8.04(a), it shall not agree to any settlement without the written consent of the Indemnifying Party (which consent shall not be unreasonably withheld or delayed).

(c) Direct Claims. Any claim by an Indemnified Party with respect to any Damages which do not arise or result from a Third Party Claim (a "Direct Claim") shall be asserted by the Indemnified Party giving the Indemnifying Party prompt written notice thereof. The failure to give such prompt written notice shall not, however, relieve the Indemnifying Party of its indemnification obligations, except and only to the extent that the Indemnifying Party forfeits material rights or material defenses by reason of such failure. Such notice by the Indemnified Party shall describe the Direct Claim in reasonable detail and shall indicate the estimated amount, if reasonably practicable, of the Damage that has been or may be sustained by the Indemnified Party. The Indemnifying Party shall have thirty (30) days after its receipt of such notice to respond in writing to such Direct Claim. During such thirty (30) day period, the Indemnified Party shall reasonably cooperate and assist the Indemnifying Party and its Representatives with respect to Indemnifying Party's investigation of such Direct Claim including determining the validity and amount of such Direct Claim. If the Indemnifying Party does not so respond within such thirty (30) day period by delivery of written notice disputing the basis or amount of the Direct Claim, the Indemnifying Party shall be deemed to have rejected such claim, in which case the Indemnified Party shall be free to pursue such remedies as may be available to the Indemnified Party on the terms and subject to the provisions of this Agreement. If the Indemnifying Party has timely disputed its indemnity obligation for any Damages with respect to such Direct Claim, the Parties shall proceed in good faith to negotiate a resolution of such dispute and, if not resolved through negotiations, such dispute shall be resolved by litigation in an appropriate court of jurisdiction determined pursuant to this Agreement.

Section 8.05. **Limitations on Indemnification Obligations.**

(a) Subject to the other limitations contained in this Section 8.05, neither Buyer nor any other Buyer Indemnified Persons shall be entitled to indemnification pursuant to Section 8.02(a) unless the aggregate amount of Damages incurred by Buyer and any other Buyer Indemnified Persons that would otherwise be subject to indemnification pursuant to Section 8.02(a) exceeds One Million Two Hundred Fifty Dollars ($1,250,000) in the aggregate (the "Threshold Amount"), in which case the Seller shall then be liable for Damages in respect thereof in excess of the Threshold Amount; *provided, however*, that the foregoing limitations contained in this Section 8.05(a) shall not apply to any claims for indemnification based on (x) a breach of any of the Seller Fundamental Representations or (y) fraud, intentional misrepresentation or willful misconduct.

(b) Subject to the other limitations contained in this Section 8.05, neither Seller nor the Seller Indemnified Persons shall be entitled to indemnification pursuant to Section 8.03(a) unless the aggregate amount of Damages incurred by the Seller and any other Seller Indemnified Persons that would otherwise be subject to indemnification pursuant to Section 8.03(a) exceeds the Threshold Amount, in which case Buyer shall then be liable for Damages in excess of the Threshold Amount; *provided, however*, that the foregoing limitations contained in this Section 8.05(b) shall not apply to any claims for indemnification based on (x) a breach of any of the Buyer Fundamental Representations or (y) fraud, intentional misrepresentation or willful misconduct.

(c) Except in the case of fraud, intentional misrepresentation or willful misconduct (for which all applicable legal and equitable remedies will be available to Buyer), the Buyer Indemnified Persons shall only be entitled to assert (i) claims under Section 8.02(a) (other than claims with respect to breaches of any of the Seller Fundamental Representations, which shall not be limited by this Section 8.05(c)(i) but shall be limited by Section 8.05(c)(ii)) against the Escrow Funds up to the aggregate amount of the Escrow Amount (the "Liability Cap"), which shall represent the sole and exclusive remedy of Buyer and the other Buyer Indemnified Persons for any such claims under Section 8.02(a) (other than claims with respect to breaches of any of the Seller Fundamental Representations or in the case of fraud, intentional misrepresentation or willful misconduct which shall not be subject to the Liability Cap, and subject to recourse to the R&W Insurance Policy), and (ii) claims under Section 8.02(a) with respect to breaches of any of the Seller Fundamental Representations and claims under Sections 8.02(b) or 8.02(c) up to the aggregate amount equal to the Purchase Price (the "Maximum Liability Cap"), which shall represent the maximum aggregate liability of the Seller for all claims under Section 8.02 (other than claims in the case of fraud, intentional misrepresentation or willful misconduct, which shall not be subject to the Maximum Liability Cap). Following the release of the Escrow Funds, the R&W Insurance Policy shall be the sole recourse for any Damages to which a Buyer Indemnified Person is entitled pursuant to Section 8.02(a), other than claims with respect to breaches of any of the Seller Fundamental Representations or in the case of fraud, intentional misrepresentation or willful misconduct; *provided*, that Buyer shall first seek recovery from the R&W Insurance Policy, if coverage is available, with respect to any Damages in respect of breaches of the Seller Fundamental Representations, prior to seeking recovery from the Seller in respect of such Damages. In the case of Damages to which a Buyer Indemnified Person is entitled (x) pursuant to Section 8.02(a) with respect to breaches of any Seller Fundamental Representations (provided that Buyer has first sought recovery from the R&W Insurance Policy to the extent available in accordance with the proviso of the immediately preceding sentence, or to the extent of any Damages for which recovery is not available under the R&W Insurance Policy for any reason in respect of any such breaches of any Seller Fundamental Representations), (y) pursuant to any clause of Section 8.02(b) or Section 8.02(c), or (z) in the event of fraud, intentional misrepresentation or willful misconduct, Buyer may seek recourse for such Damages from the Escrow Funds or from the Seller directly pursuant to this Article VIII, at Buyer's sole and absolute discretion.

(d) Payments by an Indemnifying Party pursuant to Section 8.02 or Section 8.03 in respect of any Damage shall be limited to the amount of any liability or damage that remains after deducting therefrom any insurance proceeds actually received and any indemnity, contribution or other similar payment actually received by the Indemnified Party in respect of

any such claim (other than the R&W Insurance Policy) (in any case, net of expenses incurred in collecting such amount, including any deductible amount paid by such Indemnified Party or increased cost of insurance in connection with such insurance recovery).

(e) Payments by an Indemnifying Party pursuant to Section 8.02 or Section 8.03 in respect of any Damages shall be reduced by an amount equal to any net Tax benefit actually realized by the Indemnified Party in the year such Damages were incurred to the extent attributable to such Damages.

(f) Except with respect to claims (i) relating to the adjustments to the Purchase Price pursuant to Section 3.02, (ii) for equitable relief or specific performance pursuant to Section 7.05 or Section 15.15, and (iii) grounded in fraud, intentional misrepresentation or willful misconduct, the Parties acknowledge and agree that their sole and exclusive remedy with respect to any and all claims for any breach of any representation, warranty, covenant, agreement or obligation set forth herein or otherwise relating to the subject matter of this Agreement and the Related Agreements, shall be pursuant to the indemnification provisions set forth in this Article VIII. For the avoidance of doubt, nothing in this Section 8.05(f) shall limit any Person's right to seek and obtain any equitable relief or specific performance to which any Person shall be entitled pursuant to this Agreement.

(g) Each Indemnified Party shall use, and cause its Affiliates to use, commercially reasonable efforts to mitigate any Damages which form the basis of an indemnification claim hereunder.

(h) Notwithstanding anything to the contrary in this Agreement, including anything this Article VIII, with respect to any claims for indemnity by Buyer for or with respect to any Real Property, Buyer shall, to the extent available, first proceed to recover under the Title Policy of the Title Company for any Damages prior to seeking indemnification under this Article VIII. Buyer acknowledges and agrees that it shall not have a claim under the warranty of title of any deed, assignment or other instrument of transfer or conveyance, which is separate and apart from the provisions and limitations of this Article VIII.

Section 8.06. **Insurance Policy.** The Seller acknowledges that Buyer will, effective as of the Closing, enter into the R&W Insurance Policy and that, in connection therewith, a Buyer Indemnified Person may, subject to the provisions of this Article VIII, make claims for the same Damages or series of related Damages under both this Article VIII and the R&W Insurance Policy. The Seller further acknowledges and agrees that the denial of any claim by any Buyer Indemnified Person under the R&W Insurance Policy shall not be construed as, or used as evidence that, such Buyer Indemnified Person is not entitled to indemnification under this Article VIII.

ARTICLE IX.

PRE-CLOSING COVENANTS OF THE SELLER

Section 9.01. **Operation of the System Prior to Closing.**

(a) Except as otherwise expressly contemplated by this Agreement, as required by applicable Law or with the prior written consent of Buyer (which consent shall not be unreasonably withheld, delayed or conditioned), from the Effective Date until the Closing, the Seller shall (i) operate and manage the System only in the ordinary course of business in accordance with past practices and procedures, (ii) comply in all material respects with all applicable Laws and all Licenses and Permits, (iii) comply in all respects on a timely basis with the Seller's obligations under the Consent Decree and the Compliance Schedule, (iv) in the event of any loss, damage, impairment, confiscation or condemnation of any Acquired Assets, including any of the Real Property (and regardless of whether any such any loss, damage, impairment, confiscation or condemnation is of the type or magnitude contemplated by Section 15.04), apply the proceeds of any insurance policy, judgment or award with respect thereto to repair, replace or restore such Acquired Assets as soon as possible to their prior condition, and (v) use commercially reasonable efforts to maintain and preserve intact the business and assets of the System and to preserve the rights, franchises, goodwill and relationships of the Seller and the System and their customers, lenders, suppliers, regulators and others having business relationships with the Seller and the System.

(b) Without limiting anything contained in Section 9.01(a), except as expressly permitted by the terms of this Agreement or a Related Agreement, from the Effective Date and until the Closing, the Seller shall not, without the prior written consent of Buyer:

(i) amend its charter, bylaws or other similar organizational documents;

(ii) sell, rent, lease or otherwise dispose of any of the Acquired Assets, other than in the ordinary course of business consistent with past practice with respect to assets which are not, individually or in the aggregate, material to the business or operations of the Seller;

(iii) incur, create or assume any Lien with respect to the System or any Acquired Asset, other than Permitted Liens, or give or agree to give or become a party to or bound by any guarantee, surety or indemnity in respect of indebtedness or other obligations or liabilities of any other Person;

(iv) hire any new employees (including as a result of the retirement, resignation, or other termination of any Personnel employed by the Seller prior to or as of the Effective Date), or increase the number of System employees or the base compensation of any employee of the System or grant any bonuses, benefits or other forms of direct or indirect compensation to any employee, officer, director or consultant of the System, except (x) as required by the Collective Bargaining Agreement, (y) as required under the terms of any Seller's Plan in existence as of the date hereof, or (z) as required by applicable Law; *provided* that in the event of a vacancy following the date

hereof in a non-administrative position of employment with the Seller which is critical to the operation and maintenance of the System, the Seller shall be permitted to hire individuals on a temporary basis to perform such critical functions;

(v) enter into, amend or modify any employment or severance agreement, plan or arrangement or increase, terminate, amend or otherwise modify in any material respect any plan or arrangement for the benefit of employees of the System, except as required by the Collective Bargaining Agreement;

(vi) amend, waive, terminate, otherwise modify the Collective Bargaining Agreement or any term or condition thereof, or enter into any agreement, arrangement or understanding, whether oral or in writing, formal or informal, or otherwise, with the Union or any other Person with respect to the foregoing, except as to settle any forthcoming grievances in accordance with the Seller's obligations under the Collective Bargaining Agreement;

(vii) incur any or increase any of the Assumed Liabilities, or the other liabilities or obligations of the System other than (1) as expressly required to comply with the Compliance Schedule, (2) obligations or liabilities in respect of capital expenditures expressly contemplated by the capital expenditure budget provided to Buyer prior to the date hereof and attached to Schedule 9.01(b)(vii) or (3) undrawn amounts under Outstanding Indebtedness;

(viii) make any changes to its method of accounting, except as required by GASB or applicable Law;

(ix) pay, settle or offer to settle or dismiss any litigation or other claim involving or against the Seller or the System, except such claims related to grievances and arbitrations under the Collective Bargaining Agreement and any such claims (or series of related claims) seeking solely monetary damages; *provided*, that in no event shall the Seller, the City, the Borough or any of their respective Affiliates make any agreement in connection with the foregoing which would, or would reasonably be expected to, limit the conduct of Buyer's or its Affiliates' business on or after the Closing Date;

(x) amend, modify or waive performance in any material respect or terminate any Material Contract (other than the expiration of such Material Contract in accordance with its terms) or enter into any Contract that, had such Contract been entered into prior to the date hereof, would have been a Material Contract;

(xi) make any material change in the manner of billing of any customers of the System;

(xii) cancel or fail to renew any insurance policy or fail to give all notices and present all claims (if any) under all such policies in a timely fashion;

(xiii) cause or permit any material change in cash management practices of the System and the Seller's and the System's policies, practices and procedures with respect

to collection of accounts receivable, establishment of reserves for uncollectible accounts, accrual of accounts receivable, inventory control, prepayment of expenses, payment of trade accounts payable, accrual of other expenses, deferral of revenue and acceptance of customer deposits (including any such changes intended to or having the effect of, accelerating the collection of accounts receivable or postponing payments of accounts payable);

(xiv) enter into any commitment or transaction that would constitute a breach of the representations, warranties or agreements contained in this Agreement, or take any action or fail to take any action or, to the extent within the Seller's control, permit to occur any event that, individually or in the aggregate, would reasonably be expected to result in a Material Adverse Effect; or

(xv) agree, resolve or commit to do any of the foregoing.

Section 9.02. **Cooperation.** The Seller shall reasonably cooperate with Buyer and its employees, attorneys, accountants and other agents and, generally, act in reasonably good faith to timely effectuate the purposes of this Agreement and the consummation of the transactions contemplated by this Agreement.

Section 9.03. **Updates to Seller's Schedules.** Following the date hereof and prior to the Closing, the Seller shall promptly deliver written notice (any such notice, a "Seller Schedule Supplement") to Buyer (i) if any of the representations and warranties contained in Article IV of this Agreement was inaccurate or untrue when made, or (ii) of any event, condition or circumstance first occurring after the date of this Agreement that would cause or constitute a breach of any of the representations and warranties of the Seller contained in Article IV if any such representation or warranty had been made at the time of such event, condition or circumstance (any such event, condition or circumstance referenced in this clause (ii), a "Seller Post-Signing Event"). Without limiting the foregoing, at least three (3) Business Days prior to the Closing Date, the Seller shall advise Buyer of any facts which would constitute a breach of a representation or warranty as of the date made or a default under any covenant contained herein. Any disclosure in any Seller Schedule Supplement shall be for informational purposes only and shall not be deemed to have cured any inaccuracy in or breach of any representation or warranty contained in this Agreement, including for purposes of the indemnification or termination rights contained in this Agreement or for purposes of determining whether or not the conditions set forth in Article XII have been satisfied; *provided, however,* that in the event that the Seller delivers a Seller Schedule Supplement with respect to a Seller Post-Signing Event and such Seller Post-Signing Event would give Buyer the right to terminate this Agreement pursuant to Section 14.01(b), and Buyer does not deliver notice of termination of this Agreement pursuant to Section 14.01(b) (i) within five (5) Business Days of the later of (x) Buyer's receipt of such Seller Schedule Supplement and (y) the expiration of any applicable cure period a provided in Section 14.01(b) or (ii) prior to Closing if such Seller Schedule Supplement is delivered less than five (5) Business Days prior to the Closing Date, then Buyer shall be deemed to have irrevocably waived any right to terminate this Agreement with respect to such Seller Post-Signing Event and, further, Buyer shall have irrevocably waived its right to indemnification under Section 8.02(a) with respect to such Seller Post-Signing Event.

Section 9.04. **Governmental Approvals.** Promptly after the execution of this Agreement, upon the terms and subject to the conditions set forth in this Agreement, the Seller shall file all applications and reports that are required to be filed by the Seller with any Governmental Authority, and shall use commercially reasonable efforts to take, or cause to be taken, all actions and to do, or cause to be done, all things necessary or desirable under applicable Law to consummate the transactions contemplated hereby and by the Related Agreement, including (a) preparing and filing as promptly as practicable with any Governmental Authority all documentation to effect all necessary, proper or advisable filings, notices, petitions, statements, registrations, submissions of information, applications and other documents and (b) obtaining and maintaining as promptly as practicable all consents, approvals, registrations, permits, authorizations and other confirmations required to be obtained from any Governmental Authority or other Person that are necessary, proper or advisable to consummate the transactions contemplated by this Agreement or the other Related Agreements. In furtherance and not in limitation of the foregoing, the Seller shall (x) provide or cause to be provided to any Governmental Authority information and documents requested by any such Governmental Authority or necessary, proper or advisable to permit consummation of the transactions contemplated by this Agreement or the other Related Agreement as promptly as possible after the execution of this Agreement, including by supplying as promptly as practicable any additional information and documentary material that may be requested by the DOJ, the EPA, the PaDEP or any other Governmental Authorities, and (y) assist, consult with and cooperate with Buyer in doing all things necessary, proper or advisable to consummate and make effective, in the most expeditious manner practicable, the transactions contemplated by this Agreement, including by (1) furnishing to Buyer all information required or reasonably necessary for any filing to be made with any Governmental Authority (including Buyer's filing with PaPUC), (2) promptly informing Buyer of any communication with any such Governmental Authority regarding any such filings, (3) cooperating with Buyer in the filing and prosecution of any applications required for any Governmental Approvals, and (4) at the request of Buyer, executing such application forms and other documents as necessary to apply for the transfer and/or reissuance of any necessary Governmental Approvals.

ARTICLE X.

PRE-CLOSING COVENANTS OF BUYER

Section 10.01. **R&W Insurance Policy.** Buyer shall use commercially reasonable efforts to procure and cause to be bound as promptly as practicable following the date hereof, a representations and warranties insurance policy containing customary terms consistent with transactions of the size and type contemplated by this Agreement, with a base liability limit of no more than $12,500,000 and an initial retention equal to the Escrow Amount (subject to reduction to a retention amount equal to the Threshold Amount at the Escrow Release Date, and containing such other customary terms, conditions and exclusions as are reasonably acceptable to Buyer (the "R&W Insurance Policy"). The R&W Insurance Policy shall provide that the insurer shall waive and not pursue any subrogation rights against the Seller. The Seller and its Representatives shall reasonably cooperate with Buyer in connection with Buyer's procurement of the R&W Insurance Policy and, subject to the provision of such cooperation, Buyer shall in good faith seek to minimize the number and scope of any exclusions from coverage under the R&W Insurance Policy. Buyer shall not intentionally take any actions to cause the R&W Insurance Policy to not

be effective as of the Closing. The aggregate cost of the premium for the R&W Insurance Policy (including, for the avoidance of doubt, any underwriting fees and any portion of the premium cost for the R&W Insurance Policy paid by Buyer prior to the Closing, to the extent such fees or payments are credited against the aggregate premium cost pursuant to the terms of the R&W Insurance Policy) (the "R&W Premium") shall be borne by the Seller, and the R&W Premium shall be included in the Transaction Expense Amount (with the effect that the net payment to the Seller at Closing shall be reduced by the R&W Premium (and any other amounts included in the Transaction Expense Amount), as provided in Section 3.01(d)). Notwithstanding the foregoing, the R&W Premium required to be paid by Seller hereunder shall not exceed $550,000.

Section 10.02. **Governmental Approvals.** Promptly after the execution of this Agreement, upon the terms and subject to the conditions set forth in this Agreement (including the PaPUC approvals in Article VII), Buyer shall file all applications and reports that are required to be filed by Buyer with any Governmental Authority, and shall use commercially reasonable efforts to take, or cause to be taken, all actions and to do, or cause to be done, all things necessary or desirable under applicable Law to consummate the transactions contemplated hereby and by the Related Agreement, including (a) preparing and filing as promptly as practicable with any Governmental Authority all documentation to effect all necessary, proper or advisable filings, notices, petitions, statements, registrations, submissions of information, applications and other documents and (b) obtaining and maintaining as promptly as practicable all consents, approvals, registrations, permits, authorizations and other confirmations required to be obtained from any Governmental Authority or other Person that are necessary, proper or advisable to consummate the transactions contemplated by this Agreement or the other Related Agreements. In furtherance and not in limitation of the foregoing, Buyer shall (x) provide or cause to be provided to any Governmental Authority information and documents requested by any such Governmental Authority or necessary, proper or advisable to permit consummation of the transactions contemplated by this Agreement or the other Related Agreement as promptly as possible after the execution of this Agreement, including by supplying as promptly as practicable any additional information and documentary material that may be requested by the DOJ, the EPA, the PaDEP or any other Governmental Authorities, and (y) assist, consult with and cooperate with the Seller in doing all things necessary, proper or advisable to consummate and make effective, in the most expeditious manner practicable, the transactions contemplated by this Agreement, including by (1) furnishing to the Seller all information required or reasonably necessary for any filing to be made with any Governmental Authority (including the filing with PaPUC), (2) promptly informing the Seller of any communication with any such Governmental Authority regarding any such filings, (3) cooperating with the Seller in the filing and prosecution of any applications required for any Governmental Approvals, and (4) at the reasonable request of the Seller and subject to Buyer's reasonable approval thereof, executing such application forms and other documents as necessary to apply for the transfer or reissuance of any Governmental Approvals to Buyer which are necessary for Buyer's ownership or operation of the System from and after the Closing.

Section 10.03. **Cooperation.** Buyer shall reasonably cooperate with the Seller and its employees, attorneys, accountants and other agents and, generally, do such other acts and things in good faith as may be reasonable to timely effectuate the purposes of this Agreement and the consummation of the transactions contemplated in accordance with the provisions of this Agreement.

Section 10.04. **Updates to Buyer's Schedules.** Following the date hereof and prior to the Closing, Buyer shall promptly deliver written notice (any such notice, a "Buyer Schedule Supplement") to the Seller (i) if any of the representations and warranties contained in Article V of this Agreement was inaccurate or untrue when made, or (ii) of any event, condition or circumstance first occurring after the date of this Agreement that would cause or constitute a breach of any of the representations and warranties of the Seller contained in Article V if any such representation or warranty had been made at the time of such event, condition or circumstance (any such event, condition or circumstance referenced in this clause (ii), a "Buyer Post-Signing Event"). Without limiting the foregoing, at least three (3) Business Days prior to the Closing Date, Buyer shall advise the Seller of any facts which would constitute a breach of a representation or warranty as of the date made or a default under any covenant contained herein. Any disclosure in any Buyer Schedule Supplement shall be for informational purposes only and shall not be deemed to have cured any inaccuracy in or breach of any representation or warranty contained in this Agreement, including for purposes of the indemnification or termination rights contained in this Agreement or for purposes of determining whether or not the conditions set forth in Article XI have been satisfied; *provided, however,* that in the event that Buyer delivers a Buyer Schedule Supplement with respect to a Buyer Post-Signing Event and such Buyer Post-Signing Event would give the Seller the right to terminate this Agreement pursuant to Section 14.01(a), and the Seller does not deliver notice of termination of this Agreement pursuant to Section 14.01(a) (i) within five (5) Business Days of the later of (x) the Seller's receipt of such Buyer Schedule Supplement and (y the expiration of any applicable cure period as provided in Section 14.01(a) or (ii) prior to Closing if such Buyer Schedule Supplement is delivered less than five (5) Business Days prior to the Closing Date, then the Seller shall be deemed to have irrevocably waived any right to terminate this Agreement with respect to such Buyer Post-Signing Event and, further, the Seller shall have irrevocably waived its right to indemnification under Section 8.03(a) with respect to such Buyer Post-Signing Event.

ARTICLE XI.

CONDITIONS PRECEDENT TO OBLIGATIONS OF THE SELLER

The obligation of the Seller to consummate the transactions provided for in this Agreement is subject to the satisfaction, at or before the Closing, of the following conditions, any one or more of which may be waived in writing by the Seller in its sole discretion:

Section 11.01. **Consents and Approvals.**

(a) The PaPUC shall have issued a Final Order approving the transactions contemplated hereby without a material modification to the rate-related provisions of Section 7.07.

(b) The DOJ, EPA and PaDEP shall have agreed to the lodging of the Amended Consent Decree, and the United States District Court for the Middle District of Pennsylvania shall have issued a Final Order approving the Amended Consent Decree, to be effective as of the Closing; *provided* that subject to the issuance of each such Final Order, this condition shall be satisfied so long as the Amended Consent Decree contains the complete release of the Seller and

sole substitution of Buyer in Seller's place as described in clause (3) of the definition of Amended Consent Decree set forth in Section 7.06(d).

Section 11.02. **Representations and Warranties of Buyer.** The representations and warranties made by Buyer in Article V which are (a) not qualified by materiality shall be true and correct in all material respects on and as of the Closing Date (except for representations or warranties that speak of a specific date or time other than the Closing Date which shall be true and correct in all material respects as of such specified date) and (b) qualified by materiality shall be true and correct in all respects on and as of the Closing Date (except for representations or warranties that speak of a specific date or time other than the Closing Date which shall be true and correct in all respects as of such specified date), and the Seller shall have received a certificate to the effect of the foregoing from a duly authorized officer of Buyer dated as of the Closing Date.

Section 11.03. **No Injunctions.** Neither the Seller nor Buyer shall be subject to any injunction, writ, temporary or preliminary restraining order or other similar decree of a court of competent jurisdiction restraining or prohibiting the consummation of the transactions contemplated by this Agreement, and no action or proceeding (or any investigation or other inquiry that would reasonably be expected to result in such action or proceeding) shall have been instituted or shall be pending which seeks to restrain or prohibit, the transactions contemplated by this Agreement.

Section 11.04. **Performance of the Obligations of Buyer.** Buyer shall have complied with and performed in all material respects all covenants and obligations required under this Agreement to be complied with and performed by Buyer on or before the Closing Date, and the Seller shall have received a certificate from Buyer dated as of the Closing Date certifying that the conditions set forth in this Section 11.04 have been satisfied.

Section 11.05. **Deliveries by Buyer.** Buyer shall have made delivery to the Seller of the documents and items specified in Section 13.03 herein.

ARTICLE XII.

CONDITIONS PRECEDENT TO OBLIGATIONS OF BUYER

The obligation of Buyer to consummate the transactions provided for in this Agreement is subject to the satisfaction, at or before the Closing, of the following conditions, any one or more of which may be waived in writing by Buyer in its sole discretion:

Section 12.01. **Consents and Approvals.**

(a) Buyer shall have received all of the third party consents and other approvals set forth in Schedule 12.01(a), each of which shall (i) be in form and substance and contain terms and conditions reasonably satisfactory to Buyer, (ii) not be subject to the satisfaction of any condition that has not been satisfied or waived, and (iii) be in full force and effect.

(b) The PaPUC shall have issued a Final Order approving the transactions contemplated hereby on terms and conditions reasonably satisfactory to Buyer.

(c) The PaPUC shall have issued a Final Order approving a tariff supplement incorporating Buyer's Industrial Pretreatment Program applicable to the System into Buyer's tariff, and Buyer's Industrial Pretreatment Program shall have been approved, to the extent required, by PaDEP and EPA.

(d) The DOJ, EPA and PaDEP shall have agreed to the lodging of the Amended Consent Decree and the United States District Court for the Middle District of Pennsylvania shall have issued a Final Order approving the Amended Consent Decree, to be effective as of the Closing, on terms and conditions reasonably satisfactory to Buyer.

(e) All Governmental Approvals and other actions of, filings with and notices to any Governmental Authority (other than the Governmental Approvals set forth in Section 12.01(b), Section 12.01(c) and Section 12.01(d)) necessary to permit Buyer and the Seller to perform their respective obligations under this Agreement and the Related Agreements and to consummate the transactions contemplated hereby and thereby (including with respect to the transfer of any Licenses and Permits by the Seller to Buyer) (i) shall have been duly obtained, made or given, (ii) shall be in substance reasonably satisfactory to Buyer, (iii) shall not be subject to the satisfaction of any condition that has not been satisfied or waived, (iv) shall be in full force and effect, and all terminations or expirations of waiting periods imposed by any Governmental Authority necessary for the consummation of the transactions shall have occurred, and (v) to the extent permitted by applicable Laws and Environmental Laws, all Licenses and Permits, including Environmental Requirements, shall have been transferred or issued to Buyer, as applicable, effective from and after the Closing Date, in form and substance and containing terms and conditions reasonably satisfactory to Buyer.

(f) The Authority Board shall have approved: (i)(A) defeasance and redemption of any outstanding bonds issued by the Seller on the System included in the Outstanding Indebtedness and (B) discharge of any other outstanding debt issued to the Seller and payable to any current lender and (ii) the transfer to Buyer or for its benefit of related funds held in any construction fund or account under any indenture(s) being held by the Seller or any lender to the Seller on any outstanding debt (it being understood that any debt service funds or debt service reserve funds will be applied to the defeasance, redemption and discharge of outstanding debt).

Section 12.02. **Representations and Warranties of Seller.** The representations and warranties made by Seller in Article IV which are (a) not qualified by materiality shall be true and correct in all material respects on and as of the Closing Date (except for representations or warranties that speak of a specific date or time other than the Closing Date which shall be true and correct in all material respects as of such specified date) and (b) qualified by materiality shall be true and correct in all respects on and as of the Closing Date (except for representations or warranties that speak of a specific date or time other than the Closing Date which shall be true and correct in all respects as of such specified date), and Buyer shall have received a certificate to the effect of the foregoing from a duly authorized officer of the Seller dated as of the Closing Date.

Section 12.03. **No Injunctions.** Neither the Seller nor Buyer shall be subject to any injunction, writ, temporary or preliminary restraining order or other similar decree of a court of competent jurisdiction restraining or prohibiting the consummation of the transactions

contemplated by this Agreement, and no action or proceeding (or any investigation or other inquiry that would reasonably be expected to result in such action or proceeding) shall have been instituted or shall be pending which seeks to restrain or prohibit, the transactions contemplated by this Agreement.

Section 12.04. **No Material Adverse Effect.** There shall not have occurred any event, development or condition which has had, or would reasonably be expected to have, a Material Adverse Effect, the effect of which has not been cured by the Seller.

Section 12.05. **Deliveries by Seller.** The Seller shall have made delivery to Buyer of the documents and items specified in Section 13.02 herein.

Section 12.06. **Performance of the Obligations of Seller.** The Seller shall have complied with and performed in all material respects all covenants and obligations required under this Agreement to be complied with and performed by the Seller on or before the Closing Date, other than the covenants and obligations contained in Article VI and Section 9.01(a)(iii), with respect to which the Seller shall have complied with and performed in all respects on or prior to the Closing Date, and Buyer shall have received a certificate from the Seller dated as of the Closing Date certifying that the conditions set forth in this Section 12.06 have been satisfied.

Section 12.07. **R&W Insurance Policy**. The R&W Insurance Policy shall be in full force and effect; *provided*, that this condition shall be deemed satisfied if Buyer shall have breached its obligations in Section 10.01 and such breach shall have proximately caused the R&W Insurance Policy to not have been bound prior to, and issued effective as of, the Closing.

Section 12.08. **Assignment of Easements**. As to Easements: (i) All Essential Easements shall be Eligible Easements and (ii) there are to be no more than ten (10) other Easements (whether Held Easements or Missing Easements) that are appurtenant to any Combined Sewer System Asset or necessary for access to any Combined Sewer System Asset or for the operation of any Combined Sewer System Asset (including Easements for utilities and power to any Combined Sewer System Asset) or otherwise which are necessary for or used in connection with the operation of the System or to provide continuous and unimpeded rights of way for the Combined Sewer System Assets (including access thereto) which are not Eligible Easements.

ARTICLE XIII.

CLOSING

Section 13.01. **Closing Date.**The Closing shall take place at the offices of Reed Smith LLP, 1717 Arch Street, Suite 3100, Philadelphia, PA 19103, at 10:00 a.m. Eastern time on the earliest agreed upon date or within five (5) Business Days after the date upon which all the conditions precedent to Closing described in this Agreement have been fulfilled or waived, or at such other place and time, by such other method, or on such other date, as may be mutually agreed to by the Parties (the "Closing Date"). The Closing shall be effective at 12:01 a.m., Eastern time, on the Closing Date (the "Closing Effective Time").

Section 13.02. **Deliveries by the Seller.** At or prior to the Closing, the Seller shall have delivered or cause to be delivered to Buyer executed copies of the following:

(a) a duly executed Bill of Sale transferring all of the Acquired Assets comprising tangible personal property, in substantially the form attached hereto as Exhibit A;

(b) a duly executed counterpart to an Assignment and Assumption Agreement with respect to the Assumed Liabilities and the Acquired Assets (other the Acquired Assets comprising tangible personal property to be conveyed pursuant to the Bill of Sale) (the "Assignment and Assumption Agreement"), in substantially the form attached hereto as Exhibit B;

(c) a duly executed counterpart to the Escrow Agreement;

(d) the consents to transfer all of the Assigned Contracts, Intellectual Property Assets and all Licenses and Permits held by the Seller (including environmental Licenses and Permits) which are set forth on Schedule 12.01(a), each of which shall (i) be in form and substance and contain terms and conditions reasonably satisfactory to Buyer, (ii) not be subject to the satisfaction of any condition that has not been satisfied or waived, and (iii) be in full force and effect;

(e) title certificates to any motor vehicles included in the Acquired Assets, duly executed by the Seller (together with any transfer forms necessary to transfer title to such vehicles);

(f) all such special warranty deeds, bills of sale, realty transfer tax statements of value, assignments and other instruments of transfer or conveyance in order to sell, transfer, assign, convey and deliver title to the Real Property and the other Acquired Assets duly executed by Seller pursuant to the terms and provisions of Section 2.03;

(g) to the extent requested by Buyer prior to the Closing to be delivered by the Seller to Buyer at or prior to the Closing, copies or originals of all Files and Records, materials, documents and records in possession of the Seller relating to the System, the Acquired Assets or the Assumed Liabilities, including the Real Property and the Assigned Contracts;

(h) any documents duly executed by the Seller required by the Title Company to issue final owner's title policies in accordance with the procedures set forth in Article VI;

(i) such documents, instruments and information, in each case in form and substance reasonably acceptable to Buyer, evidencing the Seller's compliance with its obligations pursuant to Section 7.11(c) and the Seller's performance of its other obligations under this Agreement with respect to the prepayment, redemption, cancellation, termination or legal defeasance, as applicable, of all Outstanding Indebtedness at the Closing (other than any such Outstanding Indebtedness being lawfully assumed by Buyer as provided in this Agreement), including any and all such documents, instruments or information (i) necessary to enable Buyer to effect the payment in full (in the case of Outstanding Indebtedness then subject to prepayment or redemption) or make provision for the payment in full so as to effect a legal defeasance (in the case of Outstanding Indebtedness not then subject to prepayment or redemption), on behalf of the Seller, of such Outstanding Indebtedness at the Closing, pursuant to Section 3.01(a), (ii) evidencing the full and unconditional release, satisfaction and discharge of any Liens in

connection therewith, or (iii) that are otherwise reasonably requested by Buyer in connection with any of the foregoing; and

(j) all such other instruments of conveyance or other documents as shall, in the reasonable opinion of Buyer and its counsel, be necessary to transfer to Buyer the Acquired Assets in accordance with this Agreement or to carry out the terms of this Agreement, duly executed and acknowledged by the Seller, if necessary, and in a recordable form.

Section 13.03. **Deliveries by Buyer.** At the Closing, Buyer shall have delivered or caused to be delivered to the Seller the following:

(a) payment in full of the Purchase Price pursuant to Section 3.01 (including delivery to the Escrow Agent and the other payees thereof);

(b) a duly executed counterpart to the Assignment and Assumption Agreement;

(c) the Escrow Agreement, duly executed by each of Buyer and the Escrow Agent; and

(d) such other instruments of assumption as shall, in the reasonable opinion of Seller and its counsel, be necessary for Buyer to assume the Assumed Liabilities in accordance with this Agreement.

ARTICLE XIV.

TERMINATION

Section 14.01. **Events of Termination.** This Agreement may be terminated at any time prior to the Closing:

(a) subject to Section 10.04, by the Seller (if the Seller is not then in material breach of any of its representations, warranties, covenants or agreements under this Agreement so as to cause any of the conditions set forth in Article XII not to be satisfied), upon written notice to Buyer, if there has been a material violation, breach or inaccuracy of any representation, warranty, covenant or agreement of Buyer contained in this Agreement, which violation, breach or inaccuracy would cause any of the conditions set forth in Article XI not to be satisfied, and such violation, breach or inaccuracy has not been waived by the Seller or cured by Buyer, as applicable, within thirty (30) days after receipt by Buyer of written notice thereof from the Seller or is not reasonably capable of being cured prior to the Outside Date;

(b) subject to Section 9.03, by Buyer (if Buyer is not then in material breach of any of its representations, warranties, covenants or agreements under this Agreement so as to cause any of the conditions set forth in Article XI not to be satisfied), upon written notice to the Seller, if there has been a material violation, breach or inaccuracy of any representation, warranty, covenant or agreement of the Seller contained in this Agreement, which violation, breach or inaccuracy would cause any of the conditions set forth in Article XII not to be satisfied, and such violation, breach or inaccuracy has not been waived by Buyer or cured by the Seller, as

applicable, within thirty (30) days after receipt by the Seller of written notice thereof from Buyer or is not reasonably capable of being cured prior to the Outside Date;

(c) by Buyer if, in the reasonable judgment of Buyer, a Material Adverse Effect has occurred since the Effective Date, and (x) such Material Adverse Effect is not reasonably capable of being cured prior to the Outside Date or (y) the effect of such Material Adverse Effect, if capable of being cured, has not been cured by the Seller within thirty (30) days after receipt by the Seller of notice specifying with particularity such Material Adverse Effect;

(d) by Buyer, as provided in Section 15.04(a) or Section 15.04(b), as applicable;

(e) by Buyer, as provided in Article VI;

(f) by the Seller or Buyer at any time after the Outside Date, if the Closing has not occurred and the Party seeking to terminate this Agreement is not in breach or default of any provisions of this Agreement; *provided* that the right to terminate this Agreement pursuant to this Section 14.01(f) shall not be available to any Party whose breach of any provision of this Agreement results in the failure of the Closing to be consummated by such time; and *provided further*, that if (i) on October 15, 2016, any of the conditions set forth in Article XI or Article XII have not been satisfied or waived (other than those conditions which, by their terms, are to be satisfied or waived at the Closing), then either Party shall have the right (which right pursuant to this clause (i) may only be exercised on one (1) occasion by Buyer and on one (1) occasion by the Seller) to extend the Outside Date to a date that is not later than December 31, 2016, and which right shall be exercised by written notice to the other Party on or before October 15, 2016 (and which written notice shall specify the new Outside Date as extended pursuant to this Section 14.01(f)(i)), and (ii) the Outside Date has been extended by either Party pursuant to Section 14.01(f)(i), and on such new Outside Date, any of the conditions set forth in Section 11.01(a), Section 11.01(b), Section 12.01(b), Section 12.01(c) or Section 12.01(d) have not been satisfied, and all of the other conditions to Closing set forth in Article XI or Article XII (other than those conditions which, by their terms, are to be satisfied or waived at the Closing), then either Party shall have the right (which right pursuant to this clause (ii) may only be exercised on one (1) occasion by Buyer and on one (1) occasion by the Seller) to extend the Outside Date to a date that is not later than March 31, 2017, and which right shall be exercised by written notice to the other Party on or before the then-current Outside Date (and which written notice shall specify the new Outside Date as extended pursuant to this Section 14.01(f)(ii));

(g) by the Seller or Buyer if (i) any Governmental Authority, the consent from or approval by which is a condition to the obligations of the Parties to consummate the transactions contemplated hereby shall have determined not to grant its consent or approval (or conditioned its consent or approval in such manner that is not reasonably acceptable to the Parties or constitutes a material deviation from the consent or approval contemplated hereunder) as applicable and all appeals of or other legal challenges to such determination have been taken and have been unsuccessful; or (ii) any court of competent jurisdiction shall have issued an order, judgment or decree (other than a temporary restraining order) restraining, enjoining or otherwise prohibiting the transactions contemplated hereby and such order, judgment or decree shall have become final and non-appealable; or

(h) by mutual agreement of the Seller and Buyer.

For the avoidance of doubt, this Agreement may not be terminated after completion of the Closing.

Section 14.02. **Effect of Termination.** In the event of termination of this Agreement as expressly permitted under Section 14.01, this Agreement shall forthwith become void and of no further force and effect and there shall be no liability on the part of any Party hereto (or any of its Affiliates) except that:

(a) the provisions of this Article XIV and Section 15.01 (Confidentiality), Section 15.02 (Public Announcements), Section 15.03 (Expenses; Brokers) Section 15.13 (Successors and Assigns), Section 15.14 (Governing Law), Section 15.15 (Specific Performance) and Section 15.16 (Limitations of Liability) shall continue in full force and effect; and

(b) notwithstanding anything to the contrary herein, no Party shall be relieved from liability for (i) fraud or (ii) any intentional or willful breach of any of its representations, warranties covenants or agreement set forth in this Agreement prior to such termination, all of which claims will survive and remain actionable, and such Party shall be fully liable for any and all Damages incurred or suffered by the other Party as a result of such fraud or intentional or willful breach.

ARTICLE XV.

MISCELLANEOUS

Section 15.01. **Confidentiality.** Except as and to the extent required by applicable Law (including the Pennsylvania Right-To-Know Act at 65 Pa § 67.101) or pursuant to an order of a court of competent jurisdiction and as required hereunder to obtain any and all required Governmental Approvals, neither Party hereto shall, directly or indirectly, disclose or use (and no party shall permit its Representatives to disclose or use) any Confidential Information (as defined below) with respect to the other Party furnished by such other Party hereto or its shareholders, directors, officers, agents, or other Representatives to the other Party hereto or its employees, directors, officers, agents or other Representatives in connection herewith at any time or in any manner other than in connection with the completion of the transactions contemplated by this Agreement and the Related Agreements. For purposes of this paragraph, the term "Confidential Information" means all information of a confidential or proprietary nature (whether or not specifically labeled or identified as "confidential"), in any form or medium, that relates to Buyer or its Affiliates or their respective business, products, services or research or development, or to the Seller or the System; *provided, however*, that Confidential Information of a Party does not include information which the receiving Party can demonstrate (a) is generally available to or known by the public other than as a result of improper disclosure by the receiving Party, (b) is obtained by the receiving Party from a source other than the disclosing Party, provided that such source was not bound by a duty of confidentiality to the disclosing Party with respect to such information, or (c) is legally in the public domain. After the execution of this Agreement, the Parties shall timely and in good faith execute a common interest agreement applicable to the

transactions contemplated by this Agreement, in form and substance and containing terms and conditions reasonably acceptable to each Party in its reasonable and good faith discretion.

Section 15.02. **Public Announcements.** Subject to applicable Law or listing rules of an exchange on which Buyer Parent's stock is listed, the initial public announcement relating to the transactions contemplated herein shall be mutually agreed upon and jointly made by the Parties; *provided*, that for the avoidance of doubt, the foregoing shall not be deemed to restrict or prohibit Buyer or its Affiliates from issuing or causing publication of any press release or public announcement regarding this Agreement to the extent that Buyer or its Affiliates reasonably determine that such disclosure is required by applicable Law (including securities Laws) or listing rules of an exchange on which Buyer Parent's stock is listed, in which case Buyer will, if practicable in the circumstances, use commercially reasonable efforts to allow the Seller reasonable time to comment on such release or announcement in advance of its issuance. The Seller shall cause the City and the Borough to provide to Buyer and the Seller contact information for a designated individual who will receive prior notice of any subsequent public announcement relating to the transactions contemplated herein. Subject to applicable Law or listing rules of an exchange on which Buyer Parent's stock is listed, following the initial public announcement relating to the transactions contemplated hereby as provided in the first sentence of this Section 15.02, and until the Closing, neither Buyer nor the Seller, nor any of their respective Affiliates or Representatives (or any Representative of the City or the Borough), shall make or issue any press release regarding this Agreement, the contents hereof, or the transactions contemplated hereby, without the prior written consent of Buyer (in the case of announcements by the Seller, the City, the Borough or their respective Affiliates or Representatives) or the Seller (in the case of announcements by Buyer or its Affiliates or their respective Representatives), which consent shall not be unreasonably withheld, conditioned or delayed.

Section 15.03. **Expenses; Brokers.**

(a) Except as otherwise provided in this Section 15.03, Buyer and the Seller shall be responsible for and bear all of their respective costs and expenses incurred in connection with this Agreement, including any legal, accounting or other representative or advisor costs and expenses.

(b) Each Party will be responsible for and shall defend and indemnify the other Party against any claims relating to, any fees or expenses of any financial advisor, broker or finder retained by such Party payable upon consummation of the transactions contemplated by this Agreement.

(c) Except as otherwise expressly provided herein, the Parties agree that the prevailing party in any action brought with respect to or to enforce any right or remedy under this Agreement shall be entitled to recover from the other Party all reasonable costs and expenses of any nature whatsoever incurred by the prevailing party in connection with such action, including attorneys' fees and expert fees.

Section 15.04. **Casualty and Condemnation**.

(a) Condemnation. If, prior to the Closing Date, there occurs any condemnation with respect to any material portion of the Real Property, or any Real Property that is material to the operation of the System, the Seller shall give Buyer prompt written notice thereof, and Buyer shall have the right, exercisable by delivering written notice to Seller within ten (10) Business Days after the later of the final determination of the scope of such taking or Buyer's receipt of written notice from the Seller of such condemnation, to either (i) terminate this Agreement in accordance with Section 14.01(d), in which case neither Party shall have any further rights or obligations hereunder except as otherwise provided in Section 14.02, or (ii) accept that portion of the Real Property which has not been taken by, or is not subject to taking by, a condemnation action in their then-existing condition and proceed with the Closing, subject to the final sentence of this Section 15.04(a). Buyer's failure to deliver such notice within the ten (10) Business Day period specified above shall be deemed to constitute a waiver of Buyer's right to terminate this Agreement as provided in this Section 15.04(a) with respect to such condemnation (but not any subsequent condemnation). In the event that Buyer elects to proceed with the Closing as provided in clause (ii) of the foregoing sentence, or in the event of any condemnation of any of the Real Property not covered by the first sentence of this Section 15.04(a), the Seller shall assign to Buyer any and all rights of the Seller to any condemnation award received as a result of such event, and to the extent the Seller receives such condemnation award (x) prior to the Closing, then the amount of such condemnation award, less the aggregate amount thereof expended by the Seller prior to the Closing in compliance with its obligations under Section 9.01(a)(iv), shall not be included as part of the calculation of the Closing Cash Balance, or (y) following the Closing, the Seller shall (but in no event later than ten (10) days after receipt thereof) deliver such amount to Buyer.

(b) Casualty. If, prior to the Closing Date, there occurs any destruction of, or damage or loss to any of the Acquired Assets from any cause whatsoever and the cost to repair or replace such destruction, damage or loss exceeds by at least One Million Dollars ($1,000,000.00) the insurance coverage covering such destruction, damage or loss, then, except as hereinafter provided, Buyer shall have the right, exercisable by delivering written notice to the Seller within ten (10) Business Days after the final determination of the scope of such casualty event and completion of an appraisal and insurance coverage determination of such casualty event by the Seller's insurance provider and delivery of written copies of such final appraisal and insurance coverage determination to Buyer, to terminate this Agreement in accordance with Section 14.01(d), in which case neither Party shall have any further rights or obligations hereunder except as otherwise provided in Section 14.02; *provided, however*, that Buyer shall have the option, but not the obligation, to consummate the Closing of the transactions contemplated in this Agreement and acquire the Acquired Assets in their then-existing condition, with an equitable adjustment of the Purchase Price to compensate Buyer for such destruction, damage or loss, as agreed to by the Parties acting reasonably and in good faith, and in which case the Seller shall assign to Buyer any and all rights of the Seller to any insurance proceeds received as a result of such casualty event, and to the extent the Seller receives such insurance proceeds (x) prior to the Closing, then the amount of such insurance proceeds, less the aggregate amount thereof expended by the Seller prior to the Closing in compliance with its obligations under Section 9.01(a)(iv), shall not be included as part of the calculation of the Closing Cash Balance, or (y) following the Closing, the Seller shall (but in no event later than ten (10) days after receipt

thereof) deliver such amount to Buyer. Buyer's failure to deliver such notice within such ten (10) Business Day period following Buyer's receipt of written copies of such final appraisal and insurance coverage determination with respect to such casualty event shall be deemed to constitute a waiver of Buyer's right to terminate this Agreement as provided in this Section 15.04(b) with respect to such casualty event (but not any subsequent casualty event).

Section 15.05. **Reasonable Efforts; Cooperation.** Subject to the terms and conditions of this Agreement, each Party will use its commercially reasonable efforts to take, or cause to be taken, all actions and to do, or cause to be done, all things necessary or desirable to consummate the transactions contemplated by this Agreement and the Related Agreements. The Parties each agree to execute and deliver such other documents, certificates, agreements and other writings and to take such other actions as may be necessary or desirable in order to consummate or implement expeditiously the transactions contemplated by this Agreement and the Related Agreements, and from time to time, upon the request of the other Parties to this Agreement and without further consideration, to execute, acknowledge and deliver in proper form any further instruments, and take such other action as the other Parties may reasonably require, in order to effectively carry out the intent of this Agreement and the Related Agreements.

Section 15.06. **Notices.** All notices, requests, demands and other communications that are required or may be given pursuant to the terms of this Agreement or any of the Related Agreements shall be in writing, and delivery shall be deemed effective in all respects and to have been duly given as follows: (a) when delivered by hand (with written confirmation of receipt); (b) when received by the addressee if sent by a nationally recognized overnight courier (receipt requested); (c) on the date sent by facsimile (with confirmation of transmission) if sent during normal business hours of the recipient, and on the next Business Day if sent after normal business hours of the recipient or (d) on the third day after the date mailed, by certified or registered mail, return receipt requested, postage prepaid. Such communications must be sent to the respective Parties at the following addresses (or at such other address for a party as shall be specified in a notice given in accordance with this Section):

Any Party may change its address and preferred recipient or other contact information for notice by giving notice to each other Party in accordance with the terms of this Section 15.06. In no event will delivery to a copied Person alone constitute delivery to the Party represented by such copied Person.

Section 15.07. **Headings.** The article, section and paragraph headings in this Agreement are for reference purposes only and shall not affect the meaning or interpretation of this Agreement.

Section 15.08. **Construction.**

(a) The Parties have participated jointly in the negotiation and drafting of this Agreement, and, in the event of an ambiguity or a question of intent or a need for interpretation arises, this Agreement shall be construed as if drafted jointly by the Parties and no presumption or burden of proof shall arise favoring or disfavoring any Party by virtue of the authorship of any of the provisions of this Agreement.

(b) Words of any gender used in this Agreement shall be held and construed to include any other gender; words in the singular shall be held to include the plural; and words in the plural shall be held to include the singular; unless and only to the extent the context indicates otherwise.

(c) Reference to any Law means such Law as amended, modified, codified, replaced or reenacted, in whole or in part, and in effect from time to time, including rules and regulations promulgated thereunder, and reference to any section or other provision of any Law means that provision of such Law from time to time in effect and constituting the substantive amendment, modification, codification, replacement or reenactment of such section or other provision.

(d) Wherever the word "include," "includes," or "including" is used in this Agreement, it shall be deemed to be followed by the words "without limitation".

(e) References in this Agreement to documents, instruments or agreements shall be deemed to refer as well to all addenda, appendices, exhibits, schedules or amendments thereto.

(f) The words "hereof," "herein," and "hereunder" and words of similar import, when used in this Agreement, shall refer to this Agreement as a whole and not to any particular provision of this Agreement.

(g) References in this Agreement to a specific Section, Subsection, recital, Schedule or Exhibit shall refer, respectively, to Sections, Subsections, recitals, Schedules or Exhibits of this Agreement.

(h) As used in this Agreement, the term "or" has the inclusive meaning represented by the phrase "and/or".

(i) When calculating the period of time before which, within which or following which any act is to be done or step taken pursuant to this Agreement, if the last day of such period is not a Business Day, the period shall end on the next succeeding Business Day.

Section 15.09. **Severability.** If any term, provision, covenant or restriction contained in this Agreement is held by a court of competent jurisdiction or the PaPUC to be invalid, void or unenforceable, the remainder of the terms, provisions, covenants and restrictions contained in this Agreement shall remain in full force and effect and shall in no way be affected, impaired or invalidated.

Section 15.10. **Entire Agreement.** This Agreement and the Related Agreements represent the entire agreement among the Parties with respect to the subject matter hereof thereof

and supersede all prior or contemporaneous written or oral agreements or understandings of any kind among the Parties hereto and thereto with respect to the subject matter hereof and thereof, including the MOU, the RFP, the BAFO and the Clarifying Correspondence. All Exhibits and Schedules hereto are expressly made a part of this Agreement as fully as though completely set forth herein.

Section 15.11. **Amendments; Waivers.** Except as hereinafter provided or allowed by statute, this Agreement may be amended or modified, and any of the terms, covenants, representations, warranties or conditions hereof may be waived, only by a written instrument executed by the Parties hereto, or in the case of a waiver, by the Party waiving compliance. Any waiver by any Party of any condition, or of the breach of any provision, term, covenant, representation or warranty contained in this Agreement, in any one or more instances, shall not be deemed to be or construed as a further or continuing waiver of any condition or of the breach of any other provision, term, covenant, representation or warranty of this Agreement.

Section 15.12. **Parties in Interest; Third Party Beneficiary.** Except as hereinafter provided, this Agreement is not intended to and shall not be construed to create upon any Person other than the Parties any rights or remedies hereunder. Notwithstanding the prior sentence, the City and the Borough are intended third party beneficiaries, with rights, among others, to enforce the covenants and agreements of Buyer contained in Article VII of this Agreement and to provide any notices on behalf of Seller, subject to Section 15.13(c).

Section 15.13. **Successors and Assigns.**

(a) Except as otherwise set forth herein and subject to Sections 15.13(b) and (c), neither Party hereto shall assign or delegate this Agreement or any rights or obligations hereunder without the prior written consent of the other Parties hereto, and any attempted assignment or delegation without prior written consent shall be void and of no force or effect. Subject to Section 15.13(b), this Agreement shall inure to the benefit of and shall be binding upon the successors and permitted assigns of the Parties hereto.

(b) With respect to any assignment or delegation permitted pursuant to Section 15.13(a) or in connection with any proposed sale, lease, liquidation or transfer of all or substantially all of the System or the Acquired Assets by Buyer, Buyer shall cause such assignee or successor to acknowledge and agree in writing for the benefit of Buyer and the Seller, to fully perform and be liable for all of Buyer's obligations set forth in Article VII, which obligations shall continue to be subject to the Seller's rights and remedies hereunder. In the event of any assignment or delegation by Buyer of its rights and obligations under this Agreement to any Person, Buyer shall be fully liable to the Seller to the extent that such Person fails to pay or assist Seller in distributing to customers the Variance Adjustment as provided under this Agreement, and such assignment or delegation by Buyer to such Person shall in no event relieve Buyer of its obligations pursuant to this Section 15.13(b) in the event of any failure by such Person to pay or assist Seller in distributing to customers the Variance Adjustment in breach of this Agreement.

(c) The Parties hereto acknowledge and agree that the limitation on assignment or delegation contained in Section 15.13(a) in no way limits the rights or obligations of the City and the Borough, as the municipalities creating the Seller, under the Municipality Authorities Act. In

the event of the termination of the Seller in accordance with the Municipality Authorities Act and other applicable Law following the Closing:

(i) the City and the Borough shall (x) obtain all property of the Seller and succeed to all of the Seller's rights under this Agreement, and (y) assume and be jointly and severally liable for all of the Seller's obligations under this Agreement (including with respect to the System), in each case as if the City and the Borough were originally direct parties hereto;

(ii) the City, or such other Person as may be designated by mutual written agreement of the City and the Borough (the City or such other Person, the "Seller Successor"), is hereby appointed to act as agent for and on behalf of the City and the Borough in connection with, and to facilitate, any and all transactions arising from, in connection with and incident to this Agreement;

(iii) a decision, act, consent or instruction of the Seller Successor shall constitute a decision of the Seller and shall be final, binding and conclusive upon each of the City and the Borough, and Buyer and the Escrow Agent may rely upon any decision, act, consent or instruction of the Seller Successor as being the decision, act, consent or instruction of the Seller, the City and the Borough;

(iv) Buyer and the Escrow Agent are hereby irrevocably relieved from any liability to any Person for any acts done by them in accordance with such decision, act, consent or instruction of the Seller Successor; and

(v) the Seller or the Seller Successor, as the case may be, shall constitute the sole point of contact for purposes of any notices to be given, consents to be obtained or other communications, by Buyer or Buyer's Affiliates pursuant to or in connection with this Agreement or any matters arising out of or relating hereto, and in no event shall Buyer be required or obligated in any way to give notice to, obtain the consent of or otherwise communicate with any Person other than the Seller or the Seller Successor.

Section 15.14. **Governing Law; Jurisdiction.** This Agreement shall be construed and enforced in accordance with, and governed by, the Laws of the Commonwealth of Pennsylvania (without giving effect to the principles of conflicts of laws thereof). The Parties hereto irrevocably agree and consent to the jurisdiction of the United States District Court for the Middle District of Pennsylvania, the Court of Common Pleas of Lackawanna County, Pennsylvania, and the PaPUC for the adjudication of any matters arising under or in connection with this Agreement. Any action initiated shall be filed and litigated (including all discovery proceedings) exclusively in the United States District Court for the Middle District of Pennsylvania, the Court of Common Pleas of Lackawanna County, Pennsylvania and the PaPUC, and each Party irrevocably submits to the jurisdiction of such courts and the PaPUC in any such suit, action or proceeding. Service of process, summons, notice or other document by mail to such Party's address set forth herein shall be effective service of process for any suit, action or other proceeding brought in any such court. EACH PARTY ACKNOWLEDGES AND AGREES THAT ANY CONTROVERSY WHICH MAY ARISE UNDER THIS AGREEMENT OR THE OTHER TRANSACTION DOCUMENTS IS LIKELY TO INVOLVE

COMPLICATED AND DIFFICULT ISSUES AND, THEREFORE, EACH SUCH PARTY IRREVOCABLY AND UNCONDITIONALLY WAIVES ANY RIGHT IT MAY HAVE TO A TRIAL BY JURY IN RESPECT OF ANY LEGAL ACTION ARISING OUT OF OR RELATING TO THIS AGREEMENT, THE OTHER TRANSACTION DOCUMENTS OR THE TRANSACTIONS CONTEMPLATED HEREBY OR THEREBY. EACH PARTY TO THIS AGREEMENT CERTIFIES AND ACKNOWLEDGES THAT (A) NO REPRESENTATIVE OF ANY OTHER PARTY HAS REPRESENTED, EXPRESSLY OR OTHERWISE, THAT SUCH OTHER PARTY WOULD NOT SEEK TO ENFORCE THE FOREGOING WAIVER IN THE EVENT OF A LEGAL ACTION, (B) SUCH PARTY HAS CONSIDERED THE IMPLICATIONS OF THIS WAIVER, (C) SUCH PARTY MAKES THIS WAIVER VOLUNTARILY, AND (D) SUCH PARTY HAS BEEN INDUCED TO ENTER INTO THIS AGREEMENT BY, AMONG OTHER THINGS, THE MUTUAL WAIVERS AND CERTIFICATIONS IN THIS SECTION. Notwithstanding the foregoing, this Section 15.14 shall not apply to the dispute resolution procedures set forth in (i) Section 3.02, which shall be the exclusive manner to resolve any dispute surrounding the determination of the Post-Closing Adjustment, *provided*, that, any dispute arising out of a breach of any of the provisions of Section 3.02 or a Party's failure to pay an amount determined to be due under Section 3.02 (and not out of a disagreement relating to the determination of such amounts) shall be resolved pursuant to this Section 15.14 or (ii) Section 7.07(d), which shall be the exclusive manner to resolve any dispute regarding the calculation of the Variance Adjustment as set forth in Section 7.07(d), *provided*, that, any dispute arising out of a breach of any of the provisions of Section 7.07(d) (other than a disagreement relating to the calculation of the Variance Adjustment) shall be resolved pursuant to this Section 15.14.

Section 15.15. **Specific Performance**. The Parties agree that irreparable damage would occur in the event that any of the provisions of this Agreement were not performed by them in accordance with the terms hereof or were otherwise breached and that each Party shall be entitled to an injunction or injunctions to prevent breaches of the provisions hereof and to specific performance of the terms hereof, in addition to any other remedy at law or in equity.

Section 15.16. **Limitations of Liability**.

(a) No present or future officer, director, manager, employee, advisor, agent or attorney of or in the Seller or Buyer shall have any personal liability, directly or indirectly, under or in connection with this Agreement or the Related Agreements, or any amendments thereto, and the Parties and their successors and assigns and all other Persons shall look solely to the Parties for the payment of any claim or for any performance, and the Parties hereby waive any and all such personal liability.

(b) No officer, director, employee, agent or other Representative of the Seller or Buyer shall have any personal liability or obligation whatsoever with respect to any of the matters set forth in this Agreement, the Related Agreements and any other documents, agreements, or instruments related thereto or any of the representations made by the Seller or Buyer being or becoming untrue, inaccurate or incomplete in any respect.

(c) The limitations on liability contained in this Section 15.16 are in addition to, and not in limitation of, any limitation on liability applicable to Seller or Buyer provided in any other provisions of this Agreement or by Law or by any other contract.

Section 15.17. **Attorney-Client Privilege.** Buyer understands and agrees that the Seller will be entitled to retain the services of Buchanan Ingersoll & Rooney PC as its attorney even in the event of any dispute of Buyer with the Seller concerning this Agreement or any of the Related Agreements or any of the transactions contemplated hereby and thereby notwithstanding any result of prior representation of Seller. Notwithstanding the sale of the Acquired Assets to Buyer, Buyer agrees that Buyer shall not have the right to assert the attorney/client privilege as to pre-Closing and post-Closing communications between Seller, on one hand, and its counsel, Buchanan Ingersoll & Rooney PC, on the other hand, to the extent that the privileged communications relate to this Agreement or any of the Related Agreements or to the transactions contemplated hereby and thereby. The Parties agree that only the Seller shall be entitled to assert such attorney/client privilege in connection with such communications following the Closing. The files generated and maintained by Buchanan Ingersoll & Rooney PC as a result of their representation of the Seller in connection with this Agreement or any of the Related Agreements or any of the transactions contemplated hereby are and will remain the exclusive property of the Seller.

Section 15.18. **Counterparts.** This Agreement may be executed in multiple counterparts, each of which shall be deemed an original, but all of which shall together constitute the same instrument. A signed copy of this Agreement delivered by facsimile, e-mail or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signed copy of this Agreement.

WHEREAS, Plaintiff, the United States of America ("United States"), on behalf of the United States Environmental Protection Agency (the "EPA"), filed a Complaint in this matter against Defendant Scranton Sewer Authority, (the "Defendant" or the "SSA") seeking injunctive relief and civil penalties, and alleging, *inter alia*, that the SSA violated the Clean Water Act (the "CWA"), 33 U.S.C. §§ 1251-1387, and certain terms and conditions of the National Pollutant Discharge Elimination System (NPDES) permit issued to the SSA pursuant to the CWA relating to the municipal wastewater treatment plant and collection system owned and operated by the SSA;

WHEREAS, Plaintiff-Intervenor, the Commonwealth of Pennsylvania Department of Environmental Protection ("PADEP") filed a Complaint in Intervention against the SSA seeking injunctive relief and civil penalties, and alleging, *inter alia*, that the SSA violated the Clean Water Act, 33 U.S.C. §§ 1251-1387, Sections 201, 202 and 401 of the Clean Streams Law, 35 Pa. Stat. Ann. §§ 691.201, 691.202 and 695.401, and certain terms and conditions of the NPDES Permit issued to the SSA pursuant to the CWA relating to the municipal wastewater treatment plant and collection system owned and operated by the SSA;

WHEREAS, the SSA is a municipal authority organized under the Municipal Authorities Act, as amended, 53 Pa. Cons. Stat. Ann. §§ 5601-5623, that owns, operates, and maintains a publicly owned treatment works ("POTW"), which includes a wastewater treatment plant known as the Scranton Sewer Authority Wastewater Treatment Plant ("WWTP") and a collection system ("Collection System") which collects stormwater and wastewater from residential, commercial and industrial sources for the purpose of transporting that wastewater to the WWTP. Certain portions of the Collection System are a Combined Sewer System and other portions are a Sanitary Sewer System. The WWTP and Collection System are authorized to discharge

pollutants in accordance with the SSA's NPDES permit into the Lackawanna River, Roaring Brook, Stafford Meadow Brook, Little Roaring Brook, Keyser Creek, Leggetts Creek, and Meadow Brook; all of which are located within the jurisdiction of the U.S. District Court for the Middle District of Pennsylvania;

WHEREAS, the United States and the PADEP allege the SSA has violated and continues to violate Sections 301 and 402 of the Clean Water Act, 33 U.S.C. §§ 1311 and 1342, Sections 3, 201, 202 and 401 of the Clean Streams Law, 35 Pa. Stat. Ann. §§ 691.3, 691.201, 691.202 and 691.401, by impermissibly discharging untreated sewage from the Collection System to the Lackawanna River and several smaller water tributaries to the Lackawanna;

WHEREAS, the United States brings its claims pursuant to Section 309 of the CWA, 33 U.S.C. § 1319. In its complaint, the United States seeks the imposition of civil penalties and injunctive relief against the SSA for alleged violations of Section 301(a) of the CWA, 33 U.S.C. § 1311(a), and terms and conditions of the NPDES permit last issued by the PADEP as NPDES Permit No. PA-0026492, effective on October 1, 2009 and amended on May 13, 2011;

WHEREAS, the SSA has demonstrated through disclosure of its financial records to Plaintiffs that it has, and will likely continue to have for the foreseeable future, limited ability to pay civil or stipulated penalties and simultaneously meet the compliance requirements of this Consent Decree;

WHEREAS, nothing in this Consent Decree will be construed as an admission by the SSA of violations of any provisions of the CWA, or of the SSA's current or past NPDES permits, or of the Clean Streams Law; and

WHEREAS, the United States, the PADEP, and the SSA ("Parties") recognize, and this Court by entering this Consent Decree finds, that this Consent Decree has been negotiated in

good faith and will avoid prolonged and complicated litigation between the Parties, and that this Consent Decree is fair, reasonable, and in the public interest;

NOW, THEREFORE, before the taking of any testimony, without the adjudication or admission of any issue of fact or law except as provided in Section I (Jurisdiction and Venue) below, and with the consent of the Parties, it is hereby ORDERED, ADJUDGED and DECREED as follows:

I. JURISDICTION AND VENUE

1. This Court has jurisdiction over the Parties and the subject matter of this action pursuant to Section 309(b) of the CWA, 33 U.S.C. § 1319(b), and 28 U.S.C. §§ 1331, 1345, 1355, and 1367. Venue is proper in this District pursuant to Section 309(b) of the CWA, 33 U.S.C. § 1319(b), and 28 U.S.C. §§ 1391(b) and 1395(a). For purposes of this Consent Decree, or any action to enforce this Consent Decree, Defendant consents to the Court's jurisdiction over this Decree and any such action and over Defendant and consents to venue in this judicial district.

2. For purposes of this Consent Decree, Defendant agrees that the Complaint and the Complaint in Intervention state claims upon which relief may be granted pursuant to Sections 301 and 402 of the Clean Water Act, 33 U.S.C. §§ 1311 and 1342, and Sections 3, 201, 202, 401, 601, and 605 of the Clean Streams Law, 35 Pa. Stat. Ann. §§ 691.3, 691.201, 691.202, 691.401, 691.601, and 691.605.

II. APPLICABILITY AND BINDING EFFECT

3. This Consent Decree will apply to and be binding upon the United States, on behalf of the EPA, the PADEP, and upon Defendant and its successors, assigns, and all other entities and persons provided for in Fed. R. Civ. P. 65(d).

4. Defendant shall notify the following of the existence of this Consent Decree and make a copy available to them: all officers, employees, and agents whose duties might reasonably include compliance with any provision of this Consent Decree, as well as to any contractor retained to perform work required under this Consent Decree.

5. Effective from the Date of Lodging of this Consent Decree until its termination, in the event that the SSA transfers any ownership or operation of its WWTP, the Collection System, or any portion of the WWTP or Collection System, and includes in such transfer, the transfer of any obligations under this Consent Decree, the SSA will give written notice and a copy of this Consent Decree to any successors in interest at least 30 Days prior to such transfer. The SSA will condition any transfer, in whole or in part, of ownership, operation, or other interest in its WWTP, the Collection System, or any other portion of the SSA WWTP and/or Collection System upon the successful execution of the terms and conditions of this Consent Decree. Simultaneously with notice to any successor in interest, the SSA will provide written notice of such transfer to the United States and the PADEP as provided in Section XVI (Notices and Submissions). In the event of any such transfer of ownership or other interest, the SSA will not be released from the obligations or liabilities of this Consent Decree unless: (i) the transferee has the financial and technical ability to assume these obligations and liabilities; (ii) the United States and the PADEP have agreed to release the SSA from the obligations and liabilities; (iii) the United States, the PADEP, and the transferee have jointly moved to substitute the transferee as Defendant to this Consent Decree; and (iv) the Court has approved the substitution.

6. In any action to enforce this Consent Decree, Defendant will not raise as a defense the failure of its officers, directors, agents, contractors, employees, successors, assigns or any other persons or entities provided for in Fed. R. Civ. P. 65(d) to take any actions necessary to

comply with the provisions hereof. Nothing in this Paragraph prevents the Defendant from invoking Section XI of this Decree (Force Majeure), provided that the event meets the definition of a Force Majeure provided in Paragraph 53.

III. OBJECTIVES

7. The objectives of this Consent Decree are for the Defendant to take the steps necessary to achieve full compliance with the CWA, the regulations promulgated thereunder, including, but not limited to, 33 U.S.C. § 1342(q) and the regulations promulgated thereunder, and the Clean Streams Law and the regulations promulgated thereunder. All plans, reports, construction, remedial maintenance, and other obligations in this Consent Decree or resulting from the activities required by this Consent Decree shall have the objective of causing Defendant to come into and remain in full compliance with the terms and conditions of Defendant's NPDES Permit, the Clean Water Act, and the Clean Streams Law, as these terms are defined in Section IV (Definitions).

IV. DEFINITIONS

8. Unless otherwise defined herein, terms used in this Consent Decree shall have the meaning given to those terms in the CWA, 33 U.S.C. § 1251-1387 the regulations promulgated thereunder, or, if not defined in the Clean Water Act or its regulations, then as defined in the Pennsylvania Clean Streams Law, 35 Pa. Stat. Ann. §§ 691.1-691.1001 and the regulations promulgated thereunder. The following definitions shall apply to the terms used in the Consent Decree:

a. "BNR Project" shall mean the wastewater treatment plant upgrades that the SSA is constructing pursuant to requirements in the NPDES Permit, which, as of the Effective Date, are described in Part C § SEVEN.

b. "Building/Private Property Backup" shall mean a wastewater release or backup into a building or private property that is caused by blockages, flow conditions, or other malfunctions of the Collection System. A wastewater backup or release that is caused by blockages, flow conditions, or other malfunctions of a Private Lateral is not a Building/Private Property Backup.

c. "Clean Water Act" or "CWA" shall mean the Federal Water Pollution Control Act found at 33 U.S.C. §§ 1251-1387, and the regulations promulgated thereunder.

d. "Collection System" shall mean the current and future municipal wastewater collection and transmission system owned or operated by the SSA, including all pipes, interceptors, force mains, gravity sewer lines, lift stations, pumping stations, manholes and appurtenances thereto designed to collect and convey municipal sewage and wastewaters (domestic, commercial, and industrial) to the SSA's WWTP or to a CSO Outfall. "Collection System" includes both the "Combined Sewer System" and the "Sanitary Sewer System."

e. "Combined Sewer Overflow Control Policy" or "CSO Policy" shall mean the policy issued by the EPA regarding combined sewer overflows, entitled "Combined Sewer Overflow (CSO) Control Policy," 59 Fed. Reg. 18688 (April 19, 1994) and as identified in Section 402(q) of the Clean Water Act, 33 U.S.C. § 1342(q).

f. "Combined Sewer Overflow" or "CSO" shall mean any discharge from the SSA's Combined Sewer System at a CSO Outfall designated in the currently applicable NPDES Permit.

g. "Combined Sewer System" shall mean the portion of the SSA's Collection System designed to convey municipal sewage and wastewaters (domestic,

commercial, and industrial) and stormwater in the same system of pipes to the WWTP or to a CSO Outfall.

h. "Consent Decree" shall mean this Consent Decree, all Appendices hereto, and all plans, schedules, reports, memoranda, or other submittals approved by the Plaintiffs pursuant to the requirements of this Consent Decree or any Appendix hereto. In the event of any conflict between the Consent Decree and any Appendix, this Consent Decree shall control.

i. "CSO Outfall" shall mean an outfall in the Combined Sewer System from which combined sewage and stormwater are discharged and so designated in the currently applicable NPDES Permit.

j. "Date of Lodging" shall mean the date that this Consent Decree is lodged with the Clerk of the Court for the United States District Court for the Middle District of Pennsylvania.

k. "Day" shall mean a calendar day unless expressly stated to be a working day. When the day a report or other deliverable is due under this Consent Decree falls on a Saturday, Sunday, federal holiday, or legal holiday for the SSA, the SSA shall have until the next calendar day that is not one of the aforementioned days for submission of such report or other deliverable.

l. "Dry Weather Overflow" shall mean a discharge that occurs at a permitted CSO Outfall that is not caused by precipitation-related Inflow or Infiltration.

m. "Effective Date" shall mean the date set forth in Section XVII (Effective Date) of this Consent Decree.

n. "EPA" shall mean the United States Environmental Protection Agency and any successor departments or agencies of the United States.

o. "Green Infrastructure Measures" shall mean the range of stormwater control measures that use plant systems, soil systems, permeable pavement, or stormwater management, harvest and reuse, to store, infiltrate, evapotranspirate, or reuse stormwater and reduce flows to the Combined Sewer System. Green Infrastructure Measures may include, but shall not be limited to, extended detention wetland areas, green roofs, and cisterns.

p. "Infiltration" shall mean water entering the Collection System and service connections from the ground through means that include, but are not limited to, defective pipes and sewer walls, pipe and sewer joints, connections, and manhole walls.

q. "Inflow" shall mean water introduced into the Collection System, including service connections, from sources including, but not limited to, roof leaders, cellars, basement sump pumps, area drains in yards and driveways, foundation drains, cooling water discharges, drains from springs and other wet areas, cracked or broken manhole covers, cross connections from separate storm sewers, catch basins, stormwater, surface run-off, street wash waters, and drainage.

r. "Long Term Control Plan" or "LTCP" shall mean the currently applicable plan that the SSA develops pursuant to Section V.B.

s. "MGD" shall mean million gallons per day.

t. "Nine Minimum Controls" or "NMCs" shall mean those controls identified in Section II.B. of the EPA's April 19, 1994, Combined Sewer Overflow (CSO) Control Policy.

u. "Nine Minimum Controls Plan" or "NMC Plan" shall mean the plan attached hereto as Appendix A, as the same may be revised and updated in accordance with

Section V.A. (Nine Minimum Controls) of this Consent Decree and in accordance with the CSO Policy.

v. "NPDES Permit" shall mean the currently effective NPDES Permit No. PA-0026492, effective on October 1, 2009 and amended on May 13, 2011, issued to the SSA by the PADEP. This definition includes any subsequent modification or reissuance of the Permit in accordance with 40 C.F.R Part 123.

w. "Operating Protocols" shall mean the procedures described, as of the Effective Date, in Part C, § TWELVE of the NPDES Permit.

x. "PADEP" shall mean the Pennsylvania Department of Environmental Protection and any successor departments or agencies of the Commonwealth of Pennsylvania.

y. "Paragraph" shall mean a provision of this Consent Decree identified by an Arabic number.

z. "Parties" shall mean the United States, the PADEP, and the SSA.

aa. "Plaintiffs" shall mean the United States and the PADEP.

bb. "Private Lateral" shall mean that portion of the Collection System not owned by the SSA and used to convey wastewater from a building(s) to a portion of the Collection System owned by the SSA.

cc. "Sanitary Sewer System" shall mean the current and future portion of the Collection System Sewer designed to convey municipal sewage and wastewaters (domestic, commercial, and industrial) to the WWTP in one system and stormwater in a separate system.

dd. "Sanitary Sewer Overflow" or "SSO" shall mean an overflow, spill, diversion, or release of wastewater from or caused by the Sanitary Sewer System. This term shall include: (i) discharges to waters of the Commonwealth of Pennsylvania or United States from the

Sanitary Sewer System and (ii) any release of wastewater from the Sanitary Sewer System to public or private property that does not reach waters of the United States or the Commonwealth of Pennsylvania, including Building/Private Property Backups.

ee. "Section" shall mean a portion of this Consent Decree identified by an uppercase Roman Number.

ff. "Semi-annual Progress Report" shall mean the reports due on a semi-annual basis under Section VII (Reporting).

gg. "Six-month Period" shall mean a six month period ending on June 30 and December 31.

hh. "SSA" shall mean Defendant Scranton Sewer Authority, a municipal corporation located in Scranton, Pennsylvania.

ii. "Subparagraph" shall mean a provision of this Consent Decree identified by one or two lowercase letters followed immediately by a period. All Subparagraphs are incorporated into and a part of the Paragraph immediately preceding the Subparagraph.

jj. "Unpermitted Discharge" shall mean a Dry Weather Overflow or any discharge to waters of the United States or the Commonwealth of Pennsylvania from the Collection System at a location other than an Outfall designated in the NPDES Permit.

kk. "Waste Water Treatment Plant" or "WWTP" shall mean the waste water treatment plant owned and operated by the SSA located in Scranton, Pennsylvania.

V. COMPLIANCE MEASURES

A. NINE MINIMUM CONTROLS

9. The SSA shall implement the NMC Plan attached hereto as Appendix A in accordance with the provisions and schedules set forth therein.

10. Ongoing Review of the Nine Minimum Control Plan. The SSA shall, on at least an annual basis, evaluate the efficacy of the measures implemented under its Nine Minimum Controls Plan, as well as other measures undertaken by the SSA pursuant to this Consent Decree, in reducing the impacts of Combined Sewer Overflows on receiving waters. Based on such evaluation, the SSA shall submit to Plaintiffs for review and approval additional proposed changes to its NMC Plan, to the extent any are necessary, which the SSA shall implement, upon approval by Plaintiffs, in accordance with the provisions and schedules set forth therein.

B. LONG-TERM CONTROL PLAN

11. The SSA shall complete and submit a Long Term Control Plan ("LTCP") to both the EPA and the PADEP by December 1, 2012 for review and approval. This LTCP must:

a. Meet the requirements of the EPA's CSO Policy, including but not limited to those requirements set forth in Section II.C. of the CSO Policy;

b. Select a remedy for CSOs that will result in no more than 4 overflows in a typical year to non-channelized tributaries of the Lackawanna River and no more than 9 overflows in a typical year to the Lackawanna River and its channelized tributaries;

c. Include a schedule for implementation with appropriate interim milestones that concludes no later than December 1, 2037;

d. Include a deadline for substantial completion (plant fully operational) of the BNR Project that concludes no later than August 1, 2014;

e. Include a schedule for constructing CSO controls such as box culverts and storage tanks that is consistent with Appendix B; and

f. Include a post construction monitoring plan ("PCMP"), which must also meet the requirements of the CSO Policy, including the Policy's requirements that it be "adequate to verify compliance with water quality standards and protection of designated uses as

well as to ascertain the effectiveness of the CSO controls" and that it "details the monitoring protocols to be followed, including the necessary effluent and ambient monitoring and, where appropriate, other monitoring protocols such as biological assessments, whole effluent toxicity testing, and sediment sampling."

12. The SSA shall complete implementation of the LTCP as soon as practicable, but no later than December 1, 2037.

13. The SSA shall undertake a study (the "GI Study") to evaluate the feasibility of implementing Green Infrastructure Measures as part of its long term controls for reducing CSOs from the Collection System. The evaluation in the GI Study must address at least the following criteria: GI site selection, identification and resolution of institutional issues and obstacles, public outreach, design and construction, and monitoring and evaluation. No later than December 1, 2017, the SSA shall submit the completed GI Study to the EPA and to the PADEP.

14. Following completion of the GI Study, Defendant may submit to the EPA and the PADEP for review and approval pursuant to Section VI (Review and Approval of Submittals) a modification of the LTCP that alters the CSO controls in the LTCP by incorporating Green Infrastructure Measures. Defendant shall include the following information with any such submission: (1) a description of the specific technology to be applied; (2) the locations where the technology will be used; (3) the design limits of the proposed use of the technology; and (4) the costs of installation and maintenance and who will bear those costs. If the proposed modification seeks to alter the size of any CSO control in the LTCP, the proposed modification must also include reliable computer modeling and other evidence sufficient to demonstrate that (1) the proposed Green Infrastructure Measures will result in a reduction of wet weather flows into the Combined Sewer System; (2) during future wet weather events the SSA will continue to achieve

such flow reductions; and (3) as a result of the flow reductions achieved as a result of the proposed Green Infrastructure Measures, the proposed modification of the LTCP will achieve the same or better performance, in terms of gallons controlled and the number of CSO activations in a typical year, as the unmodified LTCP.

C. GENERAL COMPLIANCE

15. Effluent Limits.

a. Commencing on the Day that Defendant signs this Consent Decree, the SSA shall comply with all final effluent limits set forth in the NPDES Permit.

b. If, on October 1, 2014, the SSA is not in compliance with its annual effluent limitation for the compliance period ending on September 30, 2014, it shall, on or before November 28, 2014, purchase nutrient credits to the extent required in the NPDES Permit in a quantity costing up to the amount of $100,000. The SSA shall use reasonable diligence in obtaining the best value for any money it spends purchasing credits.

16. Dry Weather Overflows.

a. All Dry Weather Overflows from the Collection System are prohibited.

b. The SSA must report all Dry Weather Overflows to the PADEP by telephone at 570-826-2511 within twenty-four hours of when the SSA becomes aware of the Dry Weather Overflow and must provide written notification to the PADEP and the EPA within five Days of when the SSA becomes aware of the Dry Weather Overflow.

c. Should the SSA detect a Dry Weather Overflow, the SSA shall begin corrective action immediately. The SSA shall inspect the outfall(s) from which the Dry Weather Overflow occurred each subsequent Day until the overflow has been eliminated.

d. The SSA shall summarize all such Dry Weather Overflows in the Semi-Annual Progress Report required under Section VII (Reporting). Nothing in this Section shall eliminate or minimize any additional notification or reporting required by the NPDES Permit.

17. Compliance with Operating Protocols.

a. Commencing on the Day Defendant signs this Consent Decree, the SSA shall comply with the Operating Protocols regarding flows to the WWTP, which, as of the Effective Date, are described in Part C, § TWELVE of the NPDES Permit.

b. Should the SSA fail to comply with the Operating Protocols described in Subparagraph a. above for more than ten minutes in any 24-hour period, it shall report such failure within 10 Days in writing in accordance with Section XVI (Notices and Submissions).

c. The SSA shall, within 14 Days of a request by the EPA or the PADEP, provide a report in comma-delimited format of the measurements of influent to the WWTP and discharges from Outfall 003 recorded by its supervisory control and data acquisition (SCADA) system in increments of no more than five minutes. To the extent practicable, the data shall be provided in a single table with each measurement being taken simultaneously. The SSA may not limit its production of SCADA data to the data available from one server or storage location, unless that server or storage location contains all of data available to the SSA for the time period covered by the request.

d. Nothing in this Paragraph shall limit the United States' or the PADEP's authority to request other information or information in other formats.

18. Identification of Outfalls.

a. Prior to the Date of Lodging, the SSA identified the following outfalls that are not currently included in its NPDES Permit:

(i) McNichols (#083);

(ii) 600 Elm East (#084);

(iii) 600 Elm West (#085);

(iv) Cedar/Maple (#086);

(v) Leggetts/Kelly (#087); and

(vi) Prospect/Locust (#088).

b. The SSA plugged the Prospect/Locust outfall (#088) and submitted an application to the PADEP on November 28, 2011 requesting an amendment to the NPDES Permit to authorize discharges from the remaining outfalls and to permanently remove the following outfalls from the NPDES Permit: #010, #039, #041, #042, #046, #054, and #064.

c. The SSA hereby affirms that it has conducted a thorough study of its collection system and has identified to the United States and the PADEP, to the best of its knowledge, all of the outfalls from which pollutants may enter waters of the United States or the Commonwealth of Pennsylvania.

d. The SSA shall not discharge pollutants into waters of the United States or the Commonwealth of Pennsylvania from any outfall not identified in its NPDES Permit or in Subparagraph 18.a. above.

e. Should the SSA discover an outfall that is not identified in Subparagraph 18.a or in its NPDES Permit, it shall notify the United States and the PADEP in writing in accordance with Section XVI (Notices and Submissions) within five Days of the discovery of the outfall. The notice shall include a description of the outfall, its location, the portion of the collection system that drains to the outfall, the description of any pathway by which discharges from the outfall might reach waters of the United States or the Commonwealth of Pennsylvania,

any information as to whether stormwater is included in the discharges from the outfall, and any information that might indicate whether pollutants have been discharged from the outfall. Within 60 Days of the discovery of the outfall, Defendant shall submit to the EPA and the PADEP for review and approval pursuant to Section VI (Review and Approval of Submittals) a plan that addresses how the newly discovered outfall(s) will be addressed consistent with SSA's applicable NPDES Permit.

19. Elimination of Sanitary Sewer Overflows. SSOs are prohibited.

20. Reporting Planned Changes and Non-Compliance.

a. The SSA shall comply with the provisions of the NPDES Permit requiring the reporting of anticipated and unanticipated non-compliance with the NPDES Permit, which, as of the Effective Date, are described in Part A, § III.C of the NPDES Permit.

b. Whenever written notice of non-compliance is required to be given to the PADEP pursuant to the NPDES Permit, the SSA shall simultaneously notify the EPA in accordance with Section XVI (Notices and Submissions).

VI. REVIEW AND APPROVAL OF SUBMITTALS

21. For each plan, report, schedule or other document submitted by the SSA for EPA and PADEP approval (other than a request to modify this Consent Decree submitted pursuant to Section XIX (Modification)) the EPA, after consultation with the PADEP, may (a) approve the submittal, in whole or in part; (b) disapprove the submittal, in whole or in part; (c) approve the submittal upon specified conditions, directing the SSA to modify its submission; or (d) any combination of the above. If the EPA approves the submittal, the EPA shall notify the SSA in writing. If the submittal is disapproved in whole or in part, or approved with conditions, the EPA shall describe the deficiencies or conditions in writing so that the SSA can make the required modifications and provide the EPA with a modified submittal. The SSA may request a meeting

and/or conference call with the EPA to discuss the deficiencies, but no such request or meeting shall extend any deadlines set forth in this Section.

22. Within 60 Days following receipt of any notice from the EPA disapproving a submittal or directing modification of a submittal pursuant to the preceding Paragraph (or within such longer time set forth in the notice or agreed to by the parties), the SSA shall submit a modified submittal to the EPA and the PADEP for approval, subject only to the SSA's right to invoke the dispute resolution procedures set forth in Section XII (Dispute Resolution). The modified submittal shall correct any deficiencies identified by the EPA, and conform to any directions set forth in the notice provided pursuant to the preceding Paragraph. If the SSA fails to submit a modified document to the EPA within the 60-Day period, the EPA retains the right to modify or develop any disapproved or conditionally approved portion of the submittal. The SSA shall implement any such plan, report, schedule or other submittal as modified or developed by the EPA, subject only to the SSA's right to invoke the dispute resolution procedures set forth in Section XII (Dispute Resolution).

23. In the event that a resubmitted plan, report, schedule or other document or portion thereof is disapproved in whole or in part or approved with conditions by the EPA, the EPA shall provide the SSA with a written notice describing the remaining deficiencies or conditions for approval. The EPA may require the SSA to correct the deficiencies or satisfy the conditions for approval of the submittal within a specified time frame, or the EPA may modify or develop any disapproved or conditionally approved portion of the submittal. The SSA may request a meeting and/or conference call with the EPA to discuss the deficiencies, but no such request or meeting shall extend any deadlines set forth in this Section. Following receipt of a notice requiring the SSA to correct deficiencies or satisfy conditions for approval, the SSA shall submit a modified

document in accordance with the EPA's directions, subject only to the SSA's right to invoke the dispute resolution procedures set forth in Section XII (Dispute Resolution).

24. Notwithstanding the receipt of a notice of disapproval pursuant to Paragraph 21 or 23, above, the SSA shall proceed, if directed by the EPA, to take any action required by any non-deficient portion of the SSA's submission, if such action can be undertaken independent of the deficient portion of the SSA's submission. Implementation of any non-deficient portion of a submission shall not relieve the SSA of any liability for stipulated penalties under Section X (Stipulated Penalties) for the deficient portion(s).

25. Other than a modification of the LTCP, all plans and studies submitted pursuant to this Consent Decree shall be incorporated herein as part of this Consent Decree upon approval by the EPA. A modification of the LTCP shall be incorporated into this Consent Decree only if the Parties enter into a written agreement pursuant to Paragraph 88.

26. The SSA shall take all lawful and appropriate actions to facilitate the implementation of this Consent Decree, including prompt review and approval of any appropriate and responsive bids, contracts, or other documents, and, if applicable, prompt review and approval of any appropriate schedule of work necessary to maintain compliance with this Consent Decree.

27. If the EPA fails to take action under Paragraph 21 with respect to a submittal or modified submittal, other than the LTCP or a proposal to modify this Consent Decree, within 90 Days of receiving the submittal or modified submittal, the EPA shall extend any subsequent deadlines dependent upon approval of the submittal by the number of Days in excess of 90 that elapsed between: (i) the date that the EPA and the PADEP received the submittal or modified submittal; and (ii) the date that the EPA took action under Paragraph 21. Such extension will not

be effective unless the EPA grants it in writing. Defendant may invoke dispute resolution under Section XII (Dispute Resolution) with respect to any disputes under this Paragraph.

VII. REPORTING

A. REPORTS

28. The SSA will provide to the EPA copies of all written notifications and reports that the SSA is required to submit to the PADEP relevant to this Consent Decree.

29. On January 31 and July 31 of every year commencing with the first full Six-month Period after Entry of this Consent Decree and continuing until termination of this Consent Decree, the SSA will submit to the EPA and the PADEP a progress report ("Semi-annual Progress Report") regarding the implementation of the requirements of this Consent Decree in the previous Six-month Period. The Semi-Annual Progress Report will include at a minimum:

a. A statement setting forth the deadlines and other terms that the SSA was required by this Consent Decree to meet since the date of the last Semi-annual Progress Report, whether and to what extent the SSA has met these requirements, and the reasons for any noncompliance;

b. A general description of the work completed within the prior Six-month Period, and a projection of work to be performed pursuant to this Consent Decree during the next or succeeding Six-month Period;

c. A summary of all contacts with the EPA and the PADEP during the reporting period relating to CSOs, SSOs, or implementation of the BNR Project;

d. A statement of any exceedances of NPDES Permit limitations; and,

e. A summary of all CSOs, SSOs and Unpermitted Discharges occurring within the Six-month Period including the actual or estimated frequency, duration, and volume of each CSO, SSO, and Unpermitted Discharge.

B. CERTIFICATION AND ADMISSIBILITY

30. Any report or plan relating to monitoring data or any representation made by the SSA as to its compliance with this Consent Decree that the SSA is required by this Consent Decree to submit, including reports or plans, shall be signed by an official or authorized agent of the SSA and shall include the following certification:

> I certify under penalty of law that the document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

31. The SSA shall not object to the authenticity of any report, plan, or other submission prepared in accordance with Paragraph 30 or the information contained in said report, plan or submission in any proceeding to enforce this Consent Decree.

VIII. FUNDING

32. Compliance with the terms of this Consent Decree by the SSA is not conditioned on the receipt of federal or state grant or loan funds or upon the SSA's financial capabilities. In addition, the SSA's failure to comply is not excused by the lack of federal or state grant or loan funds, or by the processing of any applications for the same, or by the SSA's financial capabilities.

IX. CIVIL PENALTY

33. The SSA shall pay the sum of $170,000 plus an additional sum for interest as explained below, to the United States as a civil penalty. Payment shall be made in two installments. The first installment of $70,000 shall be made within 30 Days after the Effective Date. The second installment of $100,000 plus interest shall be made within six months of the

Effective Date. Interest shall accrue from the Date of Lodging at the rate specified in 28 U.S.C. § 1961 as of the Date of Lodging.

34. Defendant shall pay the civil penalty due to the United States by FedWire Electronic Funds Transfer ("EFT") to the U.S. Department of Justice in accordance with written instruction to be provided to the SSA, following lodging of the Consent Decree, by the Financial Litigation Unit of the U.S. Attorney's Office for the Middle District of Pennsylvania, 235 N. Washington Ave., Suite 311, Scranton, PA 18503, Phone: 570-348-2800. At the time of payment, Defendant shall send a copy of the EFT authorization form and the EFT transaction record, together with a transmittal letter, which shall state that the payment is for the civil penalty owed pursuant to the Consent Decree in *United States v. Scranton Sewer Authority*, and shall reference the civil action number 3:09-cv-1873 and DOJ case number 90-5-1-1-08778, to the United States in accordance with Section XVI (Notices and Submissions) and to:

EPA Region III Docket Clerk
Office of Enforcement and Compliance Assistance (3EC00)
1650 Arch Street
Philadelphia, PA 19103.

35. The SSA shall pay the sum of $170,000, plus an additional sum for interest as explained below, to the PADEP as a civil penalty. Payment shall be made in two installments. The first installment of $70,000 shall be made within 30 Days after the Effective Date. The second installment of $100,000 plus interest shall be made within six months of the Effective Date. Interest shall accrue from the Date of Lodging at the rate specified in 28 U.S.C. § 1961 as of the Date of Lodging. The payment shall be made by corporate check or the like made payable to "Commonwealth of Pennsylvania, Clean Water Fund" and sent to Program Manager, Clean Water Program, Department of Environmental Protection, Northeast Regional Office, 2 Public Square, Wilkes-Barre, Pennsylvania 18701-1915.

X. STIPULATED PENALTIES

36. The SSA shall be liable for stipulated penalties to the United States and the PADEP for violations of this Consent Decree specified below. A violation includes failing to perform any obligation required by the terms of this Consent Decree, including any work plan or schedule approved under this Consent Decree, according to all applicable requirements of this Consent Decree, and within the specified time schedules established by or approved under this Consent Decree.

37. Late Payment of Civil Penalty. If Defendant fails to pay the civil penalty required to be paid under Section IX of this Decree (Civil Penalty) when due, Defendant shall pay a stipulated penalty of $500 per Day for each Day that the payment is late.

38. Reporting Requirements. For each failure to submit a timely and adequate plan, report, schedule, written notice, or other submission required by this Decree, the SSA shall pay the following stipulated penalties to Plaintiffs per violation per Day:

Period of Noncompliance	Penalty per Day per Violation
Days 1-30	$500
Days 31-60	$750
Days 61-90	$1,000
Days 91 and over	$1,500

39. Compliance Milestones.

a. For each failure to comply with any deadline for completion of construction or for achievement of full operation set forth in the implementation schedule developed and approved pursuant to Paragraph(s) 11 and 12, the SSA shall pay the following stipulated penalties to Plaintiffs per violation per Day:

Period of Noncompliance	Penalty per Day per Violation
Days 1-30	$500
Days 31-60	$750
Days 61-90	$1,000
Days 91 and over	$2,000

b. For each failure to comply with a requirement of, or meet a deadline in, the Nine Minimum Controls Plan pursuant to Paragraph 9 of Section V.A (Nine Minimum Controls), the SSA shall pay the following stipulated penalties to Plaintiffs per violation per Day:

Period of Noncompliance	Penalty per Day per Violation
Days 1-30	$500
Days 31-60	$750
Days 61-90	$1,000
Days 91 and over	$2,000

40. General Compliance.

a. For each discharge in violation of Subparagraph 16.a or for each discharge in violation of Paragraph 19 that reaches waters of the United States or the Commonwealth of Pennsylvania, the SSA shall pay the following stipulated penalties based on the volume of the discharge:

Volume:	The penalty shall be:
Less than 100 gallons	$100
100 to 2,499 gallons	$750
2,500 to 9,999 gallons	$1,250
10,000 to 99,999 gallons	$3,000
100,000 to 999,999 gallons	$5,000
1 million gallons or greater	$10,000

b. For each discharge in violation of Subparagraph 17.a, the SSA shall pay the following stipulated penalties based on the difference between the volume of combined sewage that the SSA would have taken into the WWTP while it was discharging from Outfall 003 if it had complied with Paragraph 17.a., and the volume of combined sewage that it actually took into the WWTP while it was discharging from Outfall 003:

Difference in Volume:	The penalty shall be:
Up to two million gallons	$2,500
More than two million gallons, but not more than four million gallons	$5,000
More than four million gallons, but not more than six million gallons	$7,500
More than six million gallons	$10,000

c. For each failure to comply with Subparagraph 18.d., the SSA shall pay the following stipulated penalties to Plaintiffs per violation per Day:

Period of Noncompliance	Penalty per Day per Violation
Days 1-30	$500
Days 31-60	$1,000
Days 61-90	$2,000
Days 91 and over	$3,000

d. For failure to comply with Subparagraph 15.b, the SSA shall pay to the Plaintiffs a stipulated penalty equal to the difference between $100,000 and the amount paid for nutrient credits. The unavailability of credits is not a defense to liability for penalties under this Subparagraph. Thus, if the SSA were to need 10,000 pounds of credits and were to purchase that amount for $50,000 in accordance with Subparagraph 15.b, then this Subparagraph would have no effect. However, if the SSA were to need 10,000 pounds of credits and were to purchase only 5,000 pounds at a cost of $25,000, it would have to pay a stipulated penalty equal to $100,000 minus the $25,000 it actually spent, or $75,000.

e. For each failure to comply with Paragraph 15, other than a failure to comply with an annual effluent limit, the SSA shall pay the following stipulated penalties to Plaintiffs:

Type of Permit Limit:	Penalty per violation:
Daily or Instantaneous	$500
Weekly	$1,500
Monthly	$3,000

f. For each failure to provide telephonic notification in compliance with Paragraph 16.b, the SSA shall pay a stipulated penalty of $1,000 per occurrence.

g. For each failure to comply with Subparagraphs 16.c or 17.c, the SSA shall pay the following stipulated penalties to Plaintiffs per violation per Day:

Period of Noncompliance	Penalty per Day per Violation
Days 1-30	$500
Days 31-60	$750
Days 61-90	$1,000
Days 91 and over	$2,000

41. If any person discovers an outfall that existed as of the Effective Date, but that is not included in the SSA's NPDES Permit or identified in Subparagraph 18. a, the SSA shall pay a stipulated penalty of $2,500.

42. Access Requirements. For each failure to allow access to the WWTP in accordance with Section XV (Information Collection and Retention), below, the SSA shall pay stipulated penalties of $1,000 to Plaintiffs per Day.

43. Stipulated penalties under this Section shall begin to accrue on the Day after performance is due or on the Day a violation occurs, whichever is applicable, and shall continue to accrue until performance is satisfactorily completed or until the violation ceases. Stipulated penalties shall accrue simultaneously for separate violations of this Consent Decree.

44. For stipulated penalties incurred more than one year after the Effective Date, the amount of penalties for which Defendant is liable shall be multiplied by the quotient of: (i) the maximum penalty under 33 U.S.C. § 1319(d) as adjusted pursuant to the Federal Civil Penalties Inflation Adjustment Act of 1990, Pub. L. 101-410, 104 Stat. 890, as amended; and (ii) $37,500

45. Defendant shall pay stipulated penalties to the United States and the PADEP within 30 Days of a written demand by either Plaintiff. Defendant shall pay 50% of the total stipulated penalty amount due to the United States and 50% percent to the PADEP. The Plaintiff making a demand for payment of a stipulated penalty shall simultaneously send a copy of the demand to the other Plaintiff.

46. Each Plaintiff may, in the unreviewable exercise of its discretion, reduce or waive stipulated penalties otherwise due it under this Consent Decree.

47. Stipulated penalties shall continue to accrue as provided in Paragraph 43, during any Dispute Resolution, but need not be paid until the following:

a. If the dispute is resolved by agreement or by a decision of the EPA that is not appealed to the Court, Defendant shall pay accrued penalties determined to be owing, together with interest, to the United States within 30 Days of the effective date of the agreement or the receipt of the EPA's decision or order.

b. If the dispute is appealed to the Court and the United States prevails in whole or in part, Defendant shall pay all accrued penalties determined by the Court to be owing, together with interest, within 60 Days of receiving the Court's decision or order, except as provided in Subparagraph c, below.

c. If any Party appeals the District Court's decision, Defendant shall pay all accrued penalties determined to be owing, together with interest, within 15 Days of receiving the final appellate court decision.

48. Obligations Prior to the Effective Date. Upon the Effective Date, the stipulated penalty provisions of this Decree shall be retroactively enforceable to the date the SSA signed this Decree, with regard to any and all violations that have occurred after the SSA signed, provided that stipulated penalties that may have accrued prior to the Effective Date may not be collected unless and until this Consent Decree is entered by the Court.

49. Defendant shall pay stipulated penalties owing to the United States in the manner set forth and with the confirmation notices required by Paragraph 34, except that the transmittal letter shall state that the payment is for stipulated penalties and shall state for which violation(s) the penalties are being paid.

50. Defendant shall pay stipulated penalties owing to the PADEP by corporate check or the like made payable to "Commonwealth of Pennsylvania, Clean Water Fund" and sent to Program Manager, Clean Water Program, Department of Environmental Protection, Northeast Regional Office, 2 Public Square, Wilkes-Barre, Pennsylvania 18701-1915. The check shall be accompanied by a transmittal letter which shall state that the payment is for stipulated penalties and for which violation(s) the penalties are being paid.

51. If Defendant fails to pay stipulated penalties according to the terms of this Consent Decree, Defendant shall be liable for interest on such penalties, as provided for in 28 U.S.C. § 1961, accruing as of the date payment became due. Nothing in this Paragraph shall be construed to limit the United States or the PADEP from seeking any remedy otherwise provided by law for Defendant's failure to pay any stipulated penalties.

52. Subject to the provisions of Section XIII (Effect of Settlement), the stipulated penalties provided for in this Consent Decree shall be in addition to any other rights, remedies, or sanctions available to the United States or the PADEP for Defendant's violation of this Consent Decree or applicable law. Where a violation of this Consent Decree is also a violation of the Clean Water Act, 33 U.S.C. §§ 1251-1387, or the Pennsylvania Clean Streams Law, 35 Pa. Stat. Ann. §§ 691.1-691.1001, Defendant shall be allowed a credit, for any stipulated penalties paid, against any statutory penalties imposed for such violation.

XI. FORCE MAJEURE

53. "Force Majeure," for purposes of this Consent Decree, is defined as any event arising from causes beyond the control of Defendant; its agents, consultants, or contractors; or any entity controlled by Defendant; that delays or prevents the performance of any obligation under this Consent Decree despite Defendant's best efforts to fulfill the obligation. The requirement that Defendant exercise "best efforts to fulfill the obligation" includes using best

efforts to anticipate any potential Force Majeure and best efforts to address the effects of any such event (a) as it is occurring and (b) after it has occurred to prevent or minimize any resulting delay to the greatest extent possible. "Force Majeure" does not include Defendant's financial inability to perform any obligation under this Consent Decree.

54. Any delays in implementation of this Consent Decree shall not be excused merely because the SSA notified the EPA and/or the PADEP of the anticipated delay, regardless of whether such notification is contained in a report required under Section VII (Reporting) or any other communication.

55. When the SSA knows, or should have known by the exercise of reasonable diligence, of an event that might delay completion of any requirement of this Consent Decree, whether or not the event is a Force Majeure, the SSA will notify the EPA and the PADEP, in writing, within 14 Days after the SSA first knew, or in the exercise of reasonable diligence under the circumstances, should have known of such event. The notice will indicate whether the SSA claims that the delay should be excused due to a Force Majeure. The notice shall describe in detail the basis for the SSA's contention that it experienced a Force Majeure delay, the anticipated duration of the delay, the cause or causes of the delay, all actions taken or to be taken to prevent or minimize the delay, and the timetable by which those measures will be implemented. Failure to timely notify the EPA and the PADEP may, at the EPA's option, in consultation with the PADEP, preclude SSA from asserting Force Majeure for the period beyond 14 Days it took SSA to provide the required notice.

56. If, after consultation with the PADEP, the EPA finds that a delay in performance is, or was, caused by a Force Majeure, it will extend the time for performance, in writing, for a period to compensate for the delay resulting from such event and stipulated penalties will not be

due to the United States or the PADEP for such period. If the EPA does not grant such an extension within 30 days of receiving the SSA's written notice of the Force Majeure, the SSA may consider the request for an extended time for performance to have been denied, and the SSA may invoke dispute resolution.

57. In proceedings on any dispute regarding a delay in performance, the dispute resolution provisions of Section XII (Dispute Resolution) will apply, and the SSA will have the burden of proving that the delay is, or was, caused by a Force Majeure and that the amount of additional time requested is necessary to compensate for that event.

58. Compliance with a requirement of this Consent Decree shall not by itself constitute compliance with any other requirement. An extension of one compliance date based on a particular event will not extend any other compliance date. The SSA will make an individual showing of proof regarding the cause of each delayed incremental step or other requirement for which an extension is sought. The SSA may petition for the extension of more than one compliance date in a single request.

XII. DISPUTE RESOLUTION

59. Unless otherwise expressly provided for in this Consent Decree, the dispute resolution procedures of this Section shall be the exclusive mechanism to resolve disputes arising under or with respect to this Consent Decree.

60. Informal Dispute Resolution. Any dispute subject to Dispute Resolution under this Consent Decree shall first be the subject of informal negotiations. The dispute shall be considered to have arisen when Defendant sends the United States and the PADEP a written "Notice of Dispute." Such Notice of Dispute shall state clearly the matter in dispute. The period of informal negotiations shall not exceed 30 Days from the date the dispute arises, unless that period is modified by written agreement. If the Parties cannot resolve a dispute by informal

negotiations, then the position advanced by the United States, in consultation with the PADEP, shall be considered binding unless, within 30 Days after the conclusion of the informal negotiation period, Defendant invokes formal dispute resolution procedures as set forth below.

61. Formal Dispute Resolution. Defendant shall invoke formal dispute resolution procedures, within the time period provided in the preceding Paragraph, by serving on the United States and the PADEP a written "Statement of Position" regarding the matter in dispute. The Statement of Position shall include, but need not be limited to, any factual data, analysis, or opinion supporting Defendant's position and any supporting documentation relied upon by Defendant.

62. The United States, in consultation with the PADEP, shall serve its Statement of Position within 30 Days of receipt of Defendant's Statement of Position. The United States' Statement of Position shall include, but need not be limited to, any factual data, analysis, or opinion supporting that position and any supporting documentation relied upon by the United States. The United States' Statement of Position shall be binding on Defendant, unless Defendant files a motion for judicial review of the dispute in accordance with the following Paragraph.

63. Defendant may seek judicial review of the dispute by filing with the Court and serving on the United States and the PADEP, in accordance with Section XVI (Notices and Submissions), a motion requesting judicial resolution of the dispute. The motion must be filed within 30 Days of receipt of the United States' Statement of Position pursuant to the preceding Paragraph. The motion shall contain a written statement of Defendant's position on the matter in dispute, including any supporting factual data, analysis, opinion, or documentation, and shall set forth the relief requested and any schedule within which the dispute must be resolved for orderly implementation of the Consent Decree.

64. The United States, in consultation with the PADEP, shall respond to Defendant's motion within the time period allowed by the Local Rules of this Court. Defendant may file a reply memorandum, to the extent permitted by the Local Rules.

65. Standard of Review.

a. Disputes Concerning Matters Accorded Record Review. Except as otherwise provided in this Consent Decree, in any dispute brought under Paragraph 63 pertaining to the adequacy or appropriateness of plans, procedures to implement plans, schedules or any other items requiring approval by the EPA and/or the PADEP under this Consent Decree; the adequacy of the performance of work undertaken pursuant to this Consent Decree; and all other disputes that are accorded review on the administrative record under applicable principles of administrative law, Defendant shall have the burden of demonstrating, based on the administrative record, that the position of the United States and/or the PADEP is arbitrary and capricious or otherwise not in accordance with law.

b. Other Disputes. Except as otherwise provided in this Consent Decree, in any other dispute brought under Paragraph 63, Defendant shall bear the burden of demonstrating by a preponderance of the evidence that its position complies with this Consent Decree and that Defendant is entitled to relief under applicable law.

66. The invocation of dispute resolution procedures under this Section shall not, by itself, extend, postpone, or affect in any way any obligation of Defendant under this Consent Decree, unless and until final resolution of the dispute so provides. Stipulated penalties with respect to the disputed matter shall continue to accrue from the first Day of noncompliance, but payment shall be stayed pending resolution of the dispute as provided in Paragraph 47. If

Defendant does not prevail on the disputed issue, stipulated penalties shall be assessed and paid as provided in Section X (Stipulated Penalties).

XIII. EFFECT OF SETTLEMENT

67. SSA hereby knowingly waives its right to appeal or challenge the validity of Part C.I.SEVEN.I.B.(5) (Compliance with effluent limitations) of the NPDES Permit, including rights that may be available under Section 4 of the Pennsylvania Environmental Hearing Board Act, Act of July 13, 1988, P.L. 530, 35 P.S. Section 7514; the Pennsylvania Administrative Agency Law, 2 Pa. C.S. Section 103(a) and Chapters 5A and 7A; or any other provision of law. This Paragraph, and the SSA's waiver hereunder, shall expire at midnight on September 30, 2014.

68. This Consent Decree resolves the civil claims of the United States for the violations alleged in the United States' Complaint through the Date of Lodging of this Consent Decree and the civil claims of the PADEP for the violations alleged in the PADEP's Complaint in Intervention through the Date of Lodging of this Consent Decree.

69. The United States and the PADEP reserve any and all legal and equitable remedies available to enforce the provisions of this Consent Decree, except as expressly stated in Paragraph 68. This Consent Decree shall not be construed to limit the rights of the United States or the PADEP to obtain penalties or injunctive relief under the Act or implementing regulations, or under other federal or state laws, regulations, or permit conditions, except as expressly specified in Paragraph 68. The United States and the PADEP further reserve all legal and equitable remedies to address any imminent and substantial endangerment to the public health or welfare or the environment arising at, or posed by, the POTW, whether related to the violations addressed in this Consent Decree or otherwise.

70. In any subsequent administrative or judicial proceeding initiated by the United States or the PADEP for injunctive relief, civil penalties, or other appropriate relief relating to

the Facility, Defendant shall not assert, and may not maintain, any defense or claim against Plaintiffs based upon the principles of waiver, res judicata, collateral estoppel, issue preclusion, claim preclusion, claim-splitting, or other defenses based upon any contention that the claims raised by the United States or the PADEP in the subsequent proceeding were or should have been brought in the instant case, except with respect to claims that have been specifically resolved pursuant to Paragraph 67 of this Section.

71. This Consent Decree does not limit or affect the rights of Defendant or of the United States or the PADEP against any third parties, not party to this Consent Decree, nor does it limit the rights of third parties, not party to this Consent Decree, against Defendant, except as otherwise provided by law.

72. This Consent Decree does not create rights in, or grant any cause of action to, any third party not party to this Consent Decree.

XIV. NOT A PERMIT

73. This Consent Decree is not a permit, or a modification of any permit, under any federal, state, or local laws or regulations. Defendant is responsible for achieving and maintaining complete compliance with all applicable federal, state, and local laws, regulations, and permits; and Defendant's compliance with this Consent Decree shall be no defense to any action commenced by the United States or the PADEP pursuant to any such laws, regulations, or permits, except as set forth herein. The United States and the PADEP do not, by their consent to the entry of this Consent Decree, warrant or aver in any manner that Defendant's compliance with any aspect of this Consent Decree will result in compliance with provisions of the Act, 33 U.S.C. §§ 1251-1387, or with any other provisions of federal, state, or local laws, regulations, or permits.

74. This Consent Decree does not authorize or approve the construction of any physical structure or facilities, or the modification of any existing treatment works or sewer system.

XV. INFORMATION COLLECTION AND RETENTION

75. The United States and the PADEP, and their representatives, contractors, consultants, and attorneys shall have the right of entry into and upon the SSA's WWTP and Sewer System, at all reasonable times, upon proper presentation of credentials, to:

a. monitor the progress of activities required under this Consent Decree;

b. verify any data or information submitted to the United States or the PADEP in accordance the terms of to this Consent Decree;

c. obtain samples and, upon request, splits of any samples taken by the SSA or its representatives, contractors or consultants;

d. obtain documentary evidence, including photographs and similar data;

e. inspect and evaluate any portion or portions of the POTW;

f. inspect and review any records required to be kept under the terms and conditions of the Consent Decree, the SSA's NPDES Permit, any future modifications or renewals thereof, and the CWA; and

g. assess the SSA's compliance with this Consent Decree.

76. Upon request, Defendant shall provide the EPA and the PADEP or their authorized representatives splits of any samples taken by Defendant. Upon request, the EPA and the PADEP shall provide Defendant splits of any sample taken by the EPA or the PADEP.

77. Defendant shall retain the following documents and electronically stored data for at least five years from the date they are created:

a. All complaints received by Defendant or its contractors or agents from any person or entity pertaining to the matters addressed by this Consent Decree;

b. All documents required to be created, submitted, or maintained pursuant to Appendix A (Nine Minimum Controls Plan);

c. Documentation of all measures undertaken by Defendant to comply with the terms of this Consent Decree; and

d. SCADA data or other data regarding compliance with Paragraph 17 (Compliance with Operating Protocols).

78. Defendant shall retain the following documents and electronically stored data for at least five years after termination of this Consent Decree:

a. All reports, plans, permits, and documents submitted to the EPA or the PADEP pursuant to this Consent Decree, including all underlying research and data;

b. All data developed by, or on behalf of, Defendant pursuant to any post-construction monitoring activities; and

c. All reports and data regarding water quality;

79. The information-retention requirements in this Section establish minimum retention periods that shall apply regardless of any contrary corporate or institutional policies or procedures but do not excuse Defendant from any legal requirement to retain documents or data for longer periods of time. At any time during this information-retention period, upon request by the United States or the PADEP, Defendant shall provide copies of any documents, records, or other information required to be maintained under this Paragraph.

80. At the conclusion of the information-retention period provided in Paragraph 79, Defendant shall notify the United States and the PADEP at least 90 Days prior to the destruction

of any documents, records, or other information subject to the requirements of the preceding Paragraph and, upon request by the United States or the PADEP, Defendant shall deliver any such documents, records, or other information to the EPA or the PADEP. Defendant may assert that certain documents, records, or other information is privileged under the attorney-client privilege or any other privilege recognized by federal law. If Defendant asserts such a privilege, it shall provide the following: (1) the title of the document, record, or information; (2) the date of the document, record, or information; (3) the name and title of each author of the document, record, or information; (4) the name and title of each addressee and recipient; (5) a description of the subject of the document, record, or information; and (6) the privilege asserted by Defendant. However, no final documents, records, or other information created or generated pursuant to the requirements of this Consent Decree shall be withheld on grounds of privilege.

81. Defendant may also assert that information required to be provided under this Section is protected as Confidential Business Information ("CBI") under 40 C.F.R. Part 2. As to any information that Defendant seeks to protect as CBI, Defendant shall follow the procedures set forth in 40 C.F.R. Part 2.

82. This Consent Decree in no way limits or affects any right of entry and inspection, or any right to obtain information, held by the United States or the PADEP pursuant to applicable federal or state laws, regulations, or permits, nor does it limit or affect any duty or obligation of Defendant to maintain documents, records, or other information imposed by applicable federal or state laws, regulations, or permits.

XVI. NOTICES AND SUBMISSIONS

83. Unless otherwise specified herein, whenever notifications, submissions, or communications are required by this Consent Decree, they shall be made in writing and addressed as follows:

As to the United States:

Chief, Environmental Enforcement Section
Environment and Natural Resources Division
U.S. Department of Justice
P.O. Box 7611, Ben Franklin Station
Washington, D.C. 20044-7611
Re: DOJ No. 90-5-1-1-08778

As to the EPA:

Chief
NPDES Enforcement Branch (3WP42)
Water Protection Division
U.S. Environmental Protection Agency, Region 3
1650 Arch St.
Philadelphia, PA 19103-2029

And

Christopher A. Day
Office of Regional Counsel (3RC20)
U.S. Environmental Protection Agency, Region 3
1650 Arch St.
Philadelphia, PA 19103-2029

As to the PADEP:

Program Manager – Clean Water Program
Department of Environmental Protection
Northeast Regional Office
2 Public Square
Wilkes-Barre, PA 18701-1915

As to the SSA:

Executive Director
Scranton Sewer Authority
312-314 North Adams Avenue
Scranton, PA 18503-1501

Jeffrey Belardi
Belardi Law Offices
410 Spruce Street, 4th Floor
Scranton, PA 18503

84. Any Party may, by written notice to the other Parties, change its designated notice recipient or notice address provided above.

85. Notices submitted pursuant to this Section shall be deemed submitted upon mailing, unless otherwise provided in this Consent Decree or by mutual agreement of the Parties in writing.

XVII. EFFECTIVE DATE

86. The Effective Date of this Consent Decree shall be the date upon which this Consent Decree is entered by the Court; provided, however, that Defendant hereby agrees that it shall be bound to perform duties scheduled to occur prior to the Effective Date. In the event the United States withdraws or withholds consent to this Consent Decree before entry, or the Court declines to enter the Consent Decree, then the preceding requirement to perform duties scheduled to occur before the Effective Date shall be void.

XVIII. RETENTION OF JURISDICTION

87. The Court shall retain jurisdiction over this case until termination of this Consent Decree, for the purpose of resolving disputes arising under this Decree or entering orders modifying this Decree, pursuant to Sections XII (Dispute Resolution) and XIX (Modification), or effectuating or enforcing compliance with the terms of this Decree.

XIX. MODIFICATION

88. Except as otherwise expressly set forth in this Consent Decree, the terms of this Consent Decree, including the attached appendices and the LTCP approved pursuant to this Consent Decree, may be modified only by a subsequent written agreement signed by all of the Parties or their successors in interest. Where the modification constitutes a material change to this Consent Decree, it shall be effective only upon approval by the Court.

89. Any disputes concerning modification of this Consent Decree shall be resolved pursuant to Section XII (Dispute Resolution), provided, however, that, instead of the burden of proof provided by Paragraph 65, the Party seeking the modification bears the burden of demonstrating that it is entitled to the requested modification in accordance with Federal Rule of Civil Procedure 60(b).

XX. TERMINATION

90. After Defendant has: (i) completed implementation of the requirements of Section V (Compliance Measures); (ii) certified that all construction required by the Long-Term Control Plan is complete and that the Long-Term Control Plan has been fully implemented; (iii) completed post construction monitoring as required by the Long-Term Control Plan; (iv) submitted a PCMP report to the EPA and the PADEP; (v) demonstrated in the PCMP report that any remaining CSOs will not cause the SSA to violate the CSO Policy or its NPDES Permit; (vi) satisfactorily complied, as determined by the EPA, with its NPDES Permit for a period of 12 months; and (vii) paid the civil penalty and any accrued stipulated penalties as required by this Consent Decree; Defendant may serve upon the United States and the PADEP a "Request for Termination" stating that Defendant has satisfied those requirements, together with all necessary supporting documentation.

91. Following receipt by the United States and the PADEP of Defendant's Request for Termination, the Parties shall confer informally concerning the request and any disagreement that the Parties may have as to whether Defendant has satisfactorily complied with the requirements for termination of this Consent Decree. If the United States after consultation with the PADEP agrees that the Consent Decree may be terminated, the Parties shall submit, for the Court's approval, a joint stipulation terminating the Consent Decree.

92. If the United States after consultation with the PADEP does not agree that the Consent Decree may be terminated, Defendant may invoke Dispute Resolution under Section XII (Dispute Resolution). However, Defendant shall not seek formal dispute resolution under Paragraph 61 of any dispute regarding termination until at least 90 Days after service of its Request for Termination.

XXI. LODGING AND OPPORTUNITY FOR PUBLIC COMMENT

93. This Consent Decree will be lodged with the Court for a period of not less than 30 Days for public notice and comment in accordance with 28 C.F.R. § 50.7. The United States reserves the right to withdraw or withhold its consent if the public comments regarding this Consent Decree disclose facts or considerations which indicate that this Consent Decree is inappropriate, improper, or inadequate. Defendant consents to entry of this Consent Decree without further notice and agrees not to withdraw from or oppose entry of this Consent Decree by the Court or to challenge any provision of the Consent Decree, unless the United States has notified Defendant in writing that it no longer supports entry of the Consent Decree.

XXII. SIGNATORIES/SERVICE

94. Each undersigned representative of Defendant and the PADEP and the Assistant Attorney General for the Environment and Natural Resources Division of the Department of Justice certifies that he or she is fully authorized to enter into the terms and conditions of this Consent Decree and to execute and legally bind the Party he or she represents to this document.

95. This Consent Decree may be signed in counterparts, and its validity shall not be challenged on that basis. Defendant agrees to accept service of process by mail with respect to all matters arising under or relating to this Consent Decree and to waive the formal service requirements set forth in Rules 4 and 5 of the Federal Rules of Civil Procedure and any applicable Local Rules of this Court including, but not limited to, service of a summons.

XXIII. COSTS OF SUIT

96. The Parties shall bear their own costs of this action, including attorneys' fees, except that the United States and the PADEP shall be entitled to collect the costs (including attorneys' fees) incurred in any action necessary to collect any portion of the civil penalty or any stipulated penalties due but not paid by Defendant.

XXIV. INTEGRATION

97. This Consent Decree constitutes the final, complete, and exclusive agreement and understanding among the Parties with respect to the settlement embodied in the Decree and supersedes all prior agreements and understandings, whether oral or written, concerning the settlement embodied herein. Other than deliverables that are subsequently submitted and approved pursuant to this Decree, no other document, nor any representation, inducement, agreement, understanding, or promise, constitutes any part of this Consent Decree or the settlement it represents, nor shall it be used in construing the terms of this Consent Decree.

XXV. APPENDICES

98. The following Appendices are attached to, and a part of, this Consent Decree:

"Appendix A" is the Nine Minimum Controls Plan; and

"Appendix B" is the SSA's schedule for constructing CSO controls.

XXVI. FINAL JUDGMENT

99. Upon approval and entry of this Consent Decree by the Court, this Consent Decree shall constitute a final judgment of the Court as to the United States, the PADEP and Defendant. The Court finds that there is no just reason for delay and, therefore, enters this judgment as a final judgment under Federal Rules of Civil Procedure 54 and 58.

SO ORDERED THIS _____ DAY OF _____, 2012

APPENDIX A

Background

The City of Scranton owns the wastewater collection, conveyance and treatment system serving the City of Scranton and the Borough of Dunmore. The Scranton Sewer Authority (SSA or the Authority) was appointed by the City of Scranton to act as the City's agent to maintain the wastewater system.

The wastewater system consists of over 275 miles of collection sewers and large interceptors, 80 combined sewer overflows (CSOs), 7 pumping stations and a wastewater treatment plant (WWTP). Approximately 63% (172 miles) of the collection sewers are combined sewers, which convey the combined storm water and sanitary sewage flow to regulator chambers prior to connection with an interceptor sewer. Under high wet-weather flow conditions that exceed the capacities of downstream facilities, the regulators direct combined sanitary sewage and storm water to the receiving streams. The SSA's NPDES Permit, No 0026492, lists permitted discharge points including: Treatment Plant Outfall – 001, Treatment Plant Headworks Bypass – 003 and CSOs – 004 through 082, totaling 80 CSO regulators. An additional five outfalls (numbers 83-87) have been requested to be added to the permit. Accordingly, there are 85 total designated CSO outfalls in the sewer system. SSA is currently working to permanently seal a number of these outfalls and will provide an update in the next annual report.

This document summarizes SSA's program to implement the Nine Minimum Controls pursuant to our discharge permit and the National CSO Policy.

1.0 Proper Operation and Regular Maintenance Program – NMC No. 1

1.1 Introduction

The first minimum control, proper operation and regular maintenance of the Combined Sewer System (CSS) and CSO outfalls consists of a program that establishes operation, maintenance and inspection procedures to ensure that a CSS and treatment facility will function in a way to maximize treatment of combined sewage and still comply with NPDES Permit Limitations. Implementation of this control is intended to ensure that the collection and treatment systems perform effectively. The essential elements of a proper operation and maintenance (O&M) program include maintenance of suitable records and identification of O&M as a high management priority.

The steps involved in implementing this minimum control are:

1. Assess how well the O&M program is implemented.

2. Determine if the O&M program needs to be improved to satisfy the intent of the CSO control policy.

3. Develop and implement the improvements to address CSOs.

4. Document any actions and report them to the PADEP.

1.2 Organizational Structure

The combined sewer system of the City of Scranton is owned and operated by the SSA. The SSA is a municipal Authority established by the City of Scranton and the Borough of Dunmore. Its Board consists of four members from the City of Scranton which are appointed by the Mayor and confirmed by City Council, and a fifth member who is appointed by the Borough Council of Dunmore. The Authority sewer system serves the City of Scranton and the Borough of Dunmore. The Authority has also entered into agreements with other adjoining municipalities and their sewer authorities for the treatment of additional municipal wastewaters. The Authority provides conveyance and treatment of wastewater from portions of the Boroughs of Taylor, Dickson City, and Moosic. The Authority holds an NPDES permit to discharge treated effluent and CSOs into the Lackawanna River and its tributaries. The organizational structure of the Authority is shown in Figure 1.

Scranton is a Class 2A City with a Home Rule/Mayor-Council form of municipal government. The elected mayor has the power and responsibility to administer government operations. The elected SSA Board of Directors has the power and responsibility to enact legislation, approve agreements, and adopt an annual budget. Typically the budget is prepared by the SSA staff and submitted to SSA Board of Directors for approval. The City director of public works, appointed by the mayor and confirmed by council, is responsible for the O&M of the public streets and the public storm water drainage system in the City. The Manager of the Borough of Dunmore is responsible for the O&M of the public streets and the public storm water drainage system in the Borough. The SSA maintains the responsibility to set user rates that are sufficient to meet the obligations of the Authority, operating and capital wise.

SSA is the permittee for the Combined Sewer System and is responsible for routine O&M. Figure 1 shows the current SSA organization chart.

1.3 Budget

Normal O&M expenses for the facilities are the responsibility of SSA. Non-routine and extraordinary maintenance expenses, as well as capital improvements are also the responsibility of the SSA.

SSA prepares an annual operating budget of revenues and expenses. The budget for the fiscal year beginning each April 1 will include the funds budgeted for resources and staff for the O&M program. The Authority sets rates for customers in the City of Scranton and the Borough of Dunmore and outside municipalities for bulk treatment of sewage. These various revenues support operation of facilities and the debt service. The Authority has the power, to float tax-exempt bonds or otherwise obtain funds for the design and construction of facilities.

The City is responsible for highway operations including streets maintenance. Highway operations are supported through the City general and the liquid fuels fund. The general fund obtains revenue through property taxes, other taxes, state grants, and various fees. The liquid fuels fund obtains revenue from proceeds of the state motor vehicle liquid fuels tax.

The Authority as owner and operator of the sewer system provides long-term planning and day-to-day operation of the facilities. The Authority operates, maintains, and repairs facilities, conducts measurements and testing, and provides reports to comply with environmental requirements. The Authority retains a consulting engineer and legal counsel.

1.4 Critical Facilities

The critical elements of the combined sewer system are listed in general order of priority below. These facilities and their roles in the operation of the combined sewer system were previously characterized in the 1970 “Design Report” and the October 1994 “Combined Sewer Overflow Minimization Final Plan of Action” reports.

PRIORITY	CRITICAL ELEMENTS OF THE COMBINED SEWER SYSTEM
1	Wastewater Treatment Plant
2	NPDES Outfall 003
3	Pump Stations
4	Diversion Chambers and CSO Outfalls
5	Sanitary Sewer Collection System
6	Combined Sewer Collection System

The operation, maintenance, inspection, and reporting requirements for the above-identified facilities (except the Treatment Plant) are outlined in the Collection System Operation and Maintenance Manual. This manual is to receive annual review to determine if revisions are needed. Requirements for the Treatment plant are listed in Wet Weather Operating Plan.

A list of the CSO regulators and their locations is included in the Collection System Operation and Maintenance Manual.

Trained SSA personnel will use the National Association of Sewer Service Companies (NASCO) ratings (numeric grades from 1-5, where 5 is the most significant defect) to rank its major trunk sewers, interceptors and each pump station by December 31, 2013.

1.5 Procedures for Routine Maintenance

The procedures for routine O&M are included in the Collection System Operation and Maintenance Manual. Typical O&M procedures that are part of the SSA manual include inspection with a CCTV camera, flow measurement, cleaning and removal of foreign materials, chemical treatment of roots, repair/rehabilitation of defects, and maintaining adequate records of inspections and findings.

SSA will use its JOBPLUS/CATS electronic work order management systems to identify and track all collection system routine maintenance. The JOBPLUS database contains all of SSA's Standard Operating Procedures for performing system maintenance. SSA inputs work orders from O & M manuals for new equipment in the JOBPLUS system, making modification as necessary to best fit SSA's process and applications. The JOBPLUS database generates work orders every Monday for each department, which complete tasks as they are able, depending upon the demands of the tasks, task priorities and available staffing. Consequently, tasks are not always completed within a given week, although SSA makes best efforts to perform assigned tasks within a weeks' time. All completed collection system inspection and cleaning is recorded in the CATS system. SSA managers use a map at the plant to direct crews' proactive maintenance through different areas of the collection system, generally working from north to south, and east to west, since the CATS system cannot generate work orders. CATS data is annually provided to SSA's regulators as part of its CSO Report. Although SSA currently cleans its system from north to south, SSA will evaluate cleaning from south to north, starting at the plant and working upstream.

In 2011, SSA rededicated itself to maximizing the utility and use of the JOBPLUS database to memorialize SOPs and to schedule/track maintenance required and performed. SSA presently schedules and prioritizes maintenance in JOBPLUS. When SSA acquires new equipment for the plant, the manufacturer's recommendations contained in the accompanying O& M manuals are entered into the JOBPLUS database and adjusted to meet SSA's application of the equipment. Every Monday, managers print out preventive maintenance work orders from JOBSPLUS and distribute the work orders to each department, as appropriate. Work crews proceed with work based on these work orders. In addition, as needed, corrective action work orders are delivered to managers and distributed to work crews.

1.6 Non-Routine Maintenance and Emergency Situations

A call out list of private contractors is maintained for both the plant and the collection system to insure that repairs can be arranged outside of normal working hours to the extent outside assistance is necessary.

The Authority recognizes that the operation of the sewer utility may require the expenditure of funds that have not been budgeted. The Authority has secured a $2 million revolving line of credit for extraordinary problems and expenditures for emergencies that can be accessed upon authorization by the Executive Director.

Management of emergencies in the collection system is also critical. Pipe failures can result in dry weather overflows. Upon notification by outside parties or upon discovery, the Authority takes immediate and appropriate steps to respond to the collection system problem, repair the problem and maintain or restore service to the customers. SSA's target response time for complaints and emergencies relating to collection system releases is as soon as possible. Typical response times are within an hour or two, depending upon the circumstances. Procedures are in place for arranging for bypass pumping between manholes if required to perform the work and SSA maintains a variety of pumps on hand, in addition to its call out list of private contractors, and is well equipped to respond to pump stations as necessary.

1.7 Inspections

Manual onsite inspections of all CSO discharge points will occur at least monthly; however, most outfalls are inspected several times each month in response to significant rain events and SSA will continue its practice of reviewing rainfall data and its correlation to activations at certain "problem" regulators. The result is that most outfalls are visited frequently each month whether due to (1) routinely scheduled inspections, (2) inspection following rain events, (3) in connection with outfall flow meter inspections, or (4) in connection with other visits/inspections. SSA will also regularly deploy a Vactor truck dedicated to CSOs, which it acquired and put into service in 2011.

Inspections include the following: (1) recording time of arrival and departure, (2) noting the inspection type (biweekly or rain event), (3) noting the condition of the outfall, (4) noting infiltration from the river, (5) nothing it the gate was moving freely, (6) noting the weather

conditions, (7) noting whether the wooden block was in or out, (8) noting whether discharge is present, and if so, (9) estimating rainfall, (10) noting the receiving waters, (11) estimating flow, (12) determining the cause of the discharge, (13) noting whether the discharge is wet weather or dry weather related, (14) estimating the duration of the discharge, (15) noting any erosion, (16) dispatching necessary equipment, (17) noting if solids and floatables being discharged, (18) noting whether a plume is present, and (19) performing sampling, noting any other maintenance needs for the regulator. Inspection forms will be completed for each CSO inspection. SSA will continue to employ a wooden block system to assist in verifying CSO activations.

These frequent physical inspections are supported by 1 permanent Sigma 950 flow meter, 4 permanent Sigma 940 flow meters, and 17 portable Sigma 910 flow meters thus providing monitoring at approximately one-third of the regulators in the system. Normal O&M of the wastewater facility occurs with records of operation maintained daily. A Computerized Managed Maintenance Program (CMMP) for preventative maintenance was initiated in January 2003. SSA is utilizing JOBPLUS. This program generates work orders and maintains inventory records. The program also tracks orders for parts and equipment. Historical records are stored in the CMMP database.

Pump stations will be inspected five days per week with logbooks and log sheets maintaining the O&M activities. This includes observations of blocks of wood placed in the emergency overflows and recording of storm pump operation.

Beginning in 2011, SSA undertook a grit cleaning program (televise, clean, re-televise). On a three-year, rolling basis, SSA will clean and inspect 150,000 feet of sewer lines per year, which effectively puts SSA on a 10-year cleaning schedule. SSA will conduct more frequent inspections for areas which warrant them. As appropriate, inspections will be digitally recorded and log sheets and digital recordings of the work will be maintained at the Treatment Plant and the SSA Board of Directors will be updated monthly on the progress of the program.

SSA inspects and cleans catch basins, manhole structures, and sewer lines each year. In our annual reports we will identify the following:

- Catch basins inspected – three-year rolling average of at least 2,000 per year. Catch basins will be inspected: (1) for the presence of a hood or trap (to retain floatables); (2) to determine the rate of solids accumulation (to facilitate a targeted cleanup schedule); and (3) to determine the physical condition of the basin (e.g., cracked, broken outlet pipe, adjacent street collapse) and to assign it a rating based on a consistent rating system.
- Catch basins cleaned – three-year rolling average of at least 2,000 per year.
- Catch basins repaired – as necessary consistent with the rating assigned to each catch basin, as follows: 1 – Excellent; Minor defects; 2 – Good; Defects that have not begun to deteriorate; 3 – Fair; Moderate defects that will continue to deteriorate; 4 – Poor; Severe defects that will become Grade 5 defects within the foreseeable future; or 5 – Attention required; Defects requiring a high priority for repair or attention to be made consistent with NASSCO standards, to return the catch basin to Good (2) or Excellent (1) condition, including the installation/replacement of hoods or traps.

- Manhole structures inspected – SSA's manholes are not labeled; however, SSA will assign identifiers to its manholes by January 1, 2013, and will update this section by March 1, 2013. In the meantime, SSA will inspect and clean all manhole structures at the same time it inspects and cleans the corresponding sewer segments.
- Manhole structures cleaned – see above.
- Manhole structures repaired/replaced – as necessary, consistent with the NASSCO rating assigned to each manhole; repairs to be consistent with NASSCO standards to return the manhole to Good (2) or Excellent (1) condition
- New manholes installed – as necessary.
- Sewer lines inspected – three-year rolling average of at least 150,000 feet per year.
- Sewer lines televised – three-year rolling average of at least 150,000 feet per year.
- Sewer line cleaned/jetted – three-year rolling average of at least 150,000 feet per year.
- Sewer lines replaced/repaired – as necessary, consistent with the NASSCO rating assigned to each sewer segment; repairs to be consistent with NASSCO standards to return the sewer line to Good (2) or Excellent (1) condition.

SSA maintains a network of rain gauges, which are inspected at least monthly, with many being inspected twice a month. The SSA rain gauges are supplemented by other area rain gauges, such as the Wilkes-Barre-Scranton Airport. These other rain gauges are maintained by the gauge owners (such as the Airport Authority).

1.8 Training

The Authority provides and promotes training of operators and maintenance personnel. The Authority supports operator certification for all personnel. At present the SSA has 6 certified "A" Wastewater Operators. The Authority provides direct training in various aspects of sewer operations on an as needed basis. The State operator certification Act as well as other training requirements such as those needed for PENNVEST loan compliance will be accomplished.

1.9 Periodic Review of O&M Plans

The operations manual and other operational instructions will be reviewed annually, during the 4th quarter of each calendar year. SSA is scanning all key O&M Manuals into a central electronic database, searchable by title, and anticipates completion of this effort in FY 2012. During the annual review of O&M manuals, a summary report will be developed which will identify any modifications to the previous O&M plans and document the benefits realized from the specific revisions. SSA will also make best efforts to obtain electronic versions of O&M manuals and will incorporate them into the database.

In particular, SSA now requires that all O&M activities be logged in the JOBPLUS database. This will facilitate our recording and reporting of the extensive collection system O&M that is performed annually.

SSA has developed a wet weather operations plan for the WWTP (April 2011), and will develop plans that identify pre-event, during-event-, and post-event/recovery actions for the

collection system components during the first quarter of 2012. The collection system component plans will present the necessary activities in two ways: (i) organized by event stage (pre-, during-, and post-event), and (ii) organized by collection system component. Upon completion of their development, those plans are incorporated herein by reference.

2.0 Maximum Use of the Collection System for Storage – NMC No. 2

2.1 Introduction

The second of the nine minimum controls is to maximize the use of the collection system for storage of wet weather flows. The goal of this control is to enable the sewer system to store wet weather flows, as much as possible, until downstream sewers and treatment facilities can handle them. Control measures to obtain the goal include: inspection and removal of obstructions; tide and control gate maintenance and repair; regulator adjustment (including float mechanisms); reduction or retardation of inflows and infiltration; upgrade and adjustment of pumps; raising existing weirs and installation of new weirs. Any attempt to implement the typical measures to maximize the use of the collection system for storage must be tempered with the prevention of upstream basement and street flooding.

SSA has developed a hydraulic model and has worked extensively with Gannett Fleming and EPA/PADEP to evaluate and take full advantage of available collection system storage. This has included a number of weir height adjustments and modeling runs looking to fine-tune collection system performance. These evaluations will continue with the ongoing development of the LTCP.

By way of additional background, following the completion of the hydraulic model calibration in 2010, an evaluation of the CSO regulator settings, including pump station settings, was completed by Gannett Fleming using the calibrated model. The evaluation identified a number of CSO regulators that could be adjusted to reduce the number of CSO activations and improve capture of wet weather flows. The CSO regulators that were identified include the following:

- #004 Wells Street – The regulator sluice gate was removed in 2010. The intercepting capacity was increased from 1.0 MGD to 3.25 MGD.

- #006 Gardner Street – Recommendations include removal of the sluice gate and increasing the opening in the side of the regulator chamber. The intercepting capacity would increase from 2.28 MGD to 4.40 MGD.

- #016 Pettibone Street - Recommendations include removal of the sluice gate and increase the opening in the side of the regulator chamber. The intercepting capacity would increase from 1.94 MGD to 5.02 MGD.

- #034 East Parker Street – The regulator weir height was increased from 3.5 inches to 7 inches in 2010. The intercepting capacity was increased from 0.25 MGD to 0.89 MGD

Gannett Fleming has used the hydraulic model to evaluate other locations where SSA can increase weir heights without causing in-system problems and these adjustments have been made. SSA will continue to work with Gannett Fleming to identify opportunities to safely and appropriately raise weirs throughout the system.

The weir at the Outfall 003 bypass has been analyzed by Gannett Fleming extensively. The existing weir elevation at Outfall 003 results in significant surcharging along the main interceptor and interceptor backflow at a number of other CSOs during heavy precipitation events. This weir is raised to the greatest extent possible.

2.2 Procedures in Place

2.2.1 O&M Manual

The SSA has existing procedures to maximize the available storage in the collection system. A Collection System O&M Manual is in place to provide procedures for the O&M of the regulator chambers and pumping stations by SSA employees.

SSA is scanning all O&M manuals for both the treatment plant and collection system into a central database so all manuals will be available to all staff. SSA will finish scanning the manuals and saving them to a dedicated location on SSA's server by April 1, 2013, where they will be accessible on SSA's network.

The JOBPLUS database (includes all permitted CSOs, but not pump stations, which will be added April 1, 2013) provides the appropriate instructions for each required collection system O&M task.

2.2.2 Pumping Stations

Pumping stations will be inspected by a dedicated inspection team five days each week. In order to monitor overflows, each pumping station has a block of wood or other suitable indicator device placed in the overflow pipe. During the inspection, the operators will record if the block is present or absent. Rainfall data from rain gauges will also be recorded. Correlation between precipitation and the presence/absence of the wood blocks, or other suitable indicator device, will be reported monthly as part of the Discharge Monitoring Reports (DMRs) and annually in the SSA Chapter 94 Wasteload Management Report. Anomalous information will be investigated and appropriate follow-up measures are implemented. Two pumping stations (Middle Street and Shawnee) are equipped with storm overflow pumps. Runtime meters are installed on the storm water pumps to monitor the quantity of flow pumped into the Lackawanna River. The Myrtle Street pumping station has two main pumps plus a larger capacity storm pump that conveys flow to the force main, maintaining flow in the system.

2.2.3 Main Interceptor

The current configuration of the influent structure maximizes storage in the main interceptor. The flow that is allowed forward into the WWTP is 25-million-gallons-per-day (MGD) and a peak hourly flow of 39 MGD. The Bypass 003 elevation is set at approximately the crown of the 6.5-foot-diameter interceptor. The invert elevation of the interceptor is 644.86 feet and the invert elevation of the bypass is 650.68 feet. Therefore, the main interceptor must be flowing at nearly full capacity into the plant headworks before any discharge backs up to the point of overflow.

SSA is presently cleaning several major sections of the main interceptor and will report on removed volumes in the FY 2012 annual report. Reports of future scheduled cleaning activities will be integrated into annual budgetary forecasts of extraordinary maintenance & repairs. In the Annual CSO Report a Sediment and Debris Report will be included and submitted to the agencies.

Modeling of the main interceptor for hydraulic capacity and storage capability has been conducted as a part of the LTCP and is an ongoing effort toward optimizing wet weather storage in the interceptor. Weir height adjustments and other system refinements will be made in accordance with the modeling results and associated engineering evaluations.

2.2.4 Sewer Condition Assessment

A television inspection program is necessary to determine lines that are damaged, have root intrusion or silt build-up and may be limiting the upstream storage in the line. A television inspection program, which consists of a goal of inspecting sewers at a rate of 150,000 feet each year, has been established. SSA owns two television camera trucks. The cameras have been typically used to support maintenance activities. The length of lines to be televised will be a combination of those televised in support of normal maintenance activities and those of exploratory nature. Exploratory work will focus on priority areas tributary and those where CSOs have been identified for possible elimination.

2.2.5 Inlets and Catch Basins

Routine maintenance activities including inlet and catch basin cleaning and sewer flushing are performed by SSA. SSA has Vactor and clam trucks available for cleaning. All inlets and catch basins in the system will be cleaned on a maximum 3-year cycle. In priority areas cleaning will be scheduled as needed at a greater frequency interval with priority areas being cleaned twice annually. SSA will identify priority areas and inform EPA and PaDEP of the same by January 15, 2013. Additional cleaning will occur when problems are reported. As defects are observed, they will be reported to the City, Borough or State (PennDOT) for corrective action. Copies of daily work reports and monthly Board reports are maintained.

2.3 Control Measures

SSA will televise and utilize the equipment for routine scheduled inspections. Where it is documented that sediment or other obstructions in non-major sewer lines are present, SSA will flush and/or schedule repair of the sewer. The removal of obstructions increases the storage capacity of the system and can reduce the volume of overflows. Where televising documents excessive clear water flow during dry weather, investigations will be performed to discover/identify the source of the inflow and/or infiltration, since the removal of extraneous flow increases the capacity of the system. Depending on the magnitude and severity, the SSA will schedule the repair/rehabilitation as a part of major capital or extraordinary repair under its annual budgetary program. In the case of storm sewer separation, projects may be referred to the appropriate party (City or Borough) for action. SSA enjoys acceptable levels of cooperation from the City and the Borough, and all known locations of clear water addition have been cooperatively addressed.

SSA personnel generally inspect flap tide gates monthly from topside and specific gates will be inspected as required from the interior. Certain gates, based on experience, are also inspected at least twice a year from the riverside to clean debris. Inspection of the downstream side of the tide gates will be completed monthly. The Collection System Operation and Maintenance Manual contains more specifics on regulator/gate inspection protocol. The function of tide gates is to minimize the receiving stream from flowing back into the sewer system during high river water levels. Proper maintenance is required to ensure that leaks and cracks are not present and that the gate is operating as designed. Leaks and cracks permit water to pass into the overflow and reduce the available downstream storage capacity of the system.

Per discussions with USEPA and PADEP, SSA is evaluating five outfalls where the hydraulic model suggests the possibility of inflows to the combined system. If any material inflow is confirmed to be occurring, SSA will evaluate the need and appropriateness of the installation of a gate or duckbill to prevent river water intrusion. SSA will report on its findings in the next annual report.

SSA continues to work with Red Valve, Inc. to identify a solution to the duckbill regulator for outfall 003. This regulator has allowed some river water intrusion into the treatment plant. Red Valve has already replaced the initial valve twice at SSA's request. As of the date of this plan, a third valve had been installed and appeared to be working properly.

Regulator settings will be adjusted and overflow weirs will be raised as practicable. Regulators are an important component of the CSO system as they regulate the amount of flow permitted into the downstream sewer and provide an outlet for excessive flows. Adjusting the regulator settings and increasing the overflow weirs may permit an additional amount of flow into the downstream sewer and will control the amount of flow discharged into the overflow line. Evaluation of the settings of the regulators was completed as part of the hydraulic modeling of the Lackawanna Watershed 2000 program. Further evaluation is ongoing as part of the CSO LTCP efforts and in response to evaluation requests from PADEP and USEPA.

Catch basins in the City of Scranton and Borough of Dunmore will be evaluated. The design standards including the hood structure, sump and capacity of storm water discharge to the collection system will be investigated. The use of the hood and sump accomplish isolation of sewer odors, prevention of solids and floatables from entering the sewers, enable an effective means of capture of solids, and provide a reservoir for extracting the solids using non-labor-intensive equipment. The City of Scranton and Borough of Dunmore bear the responsibility to ensure that adequate storm water management is provided under their respective NPDES permits for the EPA Storm Water Phase II program, through a prescribed implementation of Best Management Practice (BMPs) and regulatory reporting. The SSA attempts to limit the amount of storm water discharging into the combined sewer system through a storm water policy. For new connections, the SSA adopted a "Policy on the Connection of Stormwater Discharges into the Combined Sewer System" on November 25, 2003, which includes requirements for effective inlet and catch basin design. This policy sets limits on peak storm water flow into the combined system by requiring storm water management at new developments, as well as requiring developers to look for storm water separation if existing storm conveyance systems or streams are nearby. The policy was provided to the City of Scranton, Borough of Dunmore and adjoining municipalities for incorporation into their storm water management policies and for enforcement. This activity is dependent upon the cooperative adoption of design standards by the municipalities. SSA estimates there are between 10,000 and 14,000 catch basins in its system, of which approximately 75% to 80% contain solids and floatables controls.

Wet wells at all pump stations will be cleaned once per year or more frequently if identified to be necessary by SSA staff through the every weekday pump station inspections. SSA has a pump station SCADA system in place which assists in evaluating dry and wet weather flows to each station. In-line flow meters will document flow, real-time recording rain gauges will document rainfall information (which can be used to correlate pump station flow), wet well levels will be continuously recorded (providing for monitoring of overflows) and storm pump operation will be documented.

Comprehensive CSO regulator and tide gate inspections are performed each year. Detailed assessment of all regulators and appropriate remedial measures are recorded and will be summarized in our annual reports.

Based on the urban setting and the lack of unused facilities, it is not feasible to provide additional in-system storage without significant capital additions to the system, which will be further evaluated in the LTCP.

SSA is working cooperatively with PADEP and USEPA to identify distributed storage solutions along the main interceptor and in other strategic locations as part of the LTCP effort.

2.4 Additional Measures

The LTCP will include evaluation of additional measures for maximum use of the collection system for storage.

The pumping stations will be evaluated based on the monitoring being performed. Improvements required at the pumping stations will be determined.

3.0 Review and Modification of Pretreatment Requirements – NMC No. 3

3.1 Introduction

The third minimum control is the review and assessment of non-domestic source discharges on CSO impacts. The objective of this control is to minimize the impacts of discharges into combined sewer systems from non-domestic sources during wet weather events.

SSA has relatively few industrial users which collectively contribute an insignificant amount of flow to the collection system.

3.2 Pretreatment Requirements

SSA has worked closely with USEPA to maintain an updated pretreatment program. In 2011, SSA has issued new discharge permits to each of our significant industrial users. These permits reflect updated headworks analysis associated with our newly reissued NPDES discharge permit.

SSA's pretreatment program includes the identification and location of all possible industries, which may be subject to the program.

All permits will be enforced and industries that are in significant noncompliance with the pretreatment requirements will be published in the local paper as required by federal regulations.

The largest non-domestic user is the local landfill, which has already cooperatively agreed to hold waste within their lagoons during periods of wet weather. This will avoid potential non-domestic discharge through a permitted CSO. The SSA on-site inspections will support determination of compliance of industrial users.

Appropriate enforcement action will be taken to bring industrial users into compliance and the Enforcement Response Guide shall be fully implemented. The SSA will prepare quarterly reports and an annual report in accordance with NPDES permitting requirements. In addition, an educational letter concerning the impacts of wet weather discharges will be developed and sent to industries in the service area. The educational letter is being developed in an attempt to encourage industries to voluntarily act to reduce flows during wet weather periods.

During inspections of sewers, if oil and grease build-up is observed SSA will attempt to determine where it is originating and contact the source for resolution. All inspections and follow-up investigations will be documented. SSA does not have any chronic Food, Oils and Grease (FOG) areas that have not been addressed.

4.0 Maximization of Flow to the WWTP for Treatment – NMC No. 4

4.1 Introduction

The fourth minimum control is to maximize the volume of combined wastewater that is processed at the municipal WWTP. The objective of this control is to minimize the amount of combined wastewater that is discharged untreated into receiving waters. The discussion below pertains to the WWTP as it is currently constructed and will have to be amended before completion of the expansion of the WWTP.

4.2 Measures to Increase Treated Flow Volumes

4.2.1 Collection and Conveyance Facilities

SSA has developed an O&M Program and has implemented the program. SSA will implement simple modifications to the collection and conveyance facilities based upon the results of the flow monitoring and modeling tasks being undertaken. CSOs in the system will be inspected on at least a monthly basis. The main interceptor will be probed at manholes to determine the depth of sediment, which will be documented. The main interceptor was cleaned in 2011.

SSA is maximizing flow to the WWTP. The current configuration of the influent structure maximizes storage in the main interceptor. The flow that is allowed forward into the WWTP is approximately 25 mgd with short-term peak flows of 39 mgd in accordance with the Wet Weather Operating Plan. The Bypass 003 elevation is set at approximately the crown of the 6.5-foot-diameter interceptor. The invert elevation of the interceptor is 644.86 feet and the invert elevation of the bypass is 650.68 feet. Therefore, the main interceptor must be flowing at nearly full capacity into the plant headworks before any discharge backs up to the point of overflow.

Based on staff comments, O&M experience and engineering observations, the existing system has no inoperative or unused facilities in the service area. Retaining flow, during wet weather events by utilizing unused facilities, is not applicable and the construction of additional facilities to retain flow is not feasible in this system, unless otherwise determined through the development of the LTCP. Hydraulic modeling of the collection and conveyance system to determine the hydraulic capacities is ongoing and will be included in the LTCP.

4.2.2 Pumping Stations

SSA will conduct and document draw down tests at each pumping station annually in conjunction with the PADEP Chapter 94 Report. The tests will be used to determine if adequate capacity is available at each of the stations. The results of the draw down tests will be utilized to further calibrate and adjust the sewer system model. Simple modifications (*i.e.*, wet well pump operation level adjustments) will be performed and more complex modifications will be evaluated. Pumping stations with storm water pumps are equipped with run hour meters. During inspection of these pumping stations, storm water pumps frequency and quantity of flow is recorded.

The LTCP will include modeling of wet weather events to determine required capacity and complex modifications that are required to pumping stations based on achieving and maintaining the necessary capacity.

4.2.3 WWTP

A peak flow hydraulic capacity study of the WWTP has been performed to determine the capacity and capabilities of the WWTP under high-flow conditions. The analysis identified that the WWTP should be capable of properly treating a peak hourly flow of 34 to 39 mgd. After the peak hourly flow, the WWTP should be able to properly treat a flow between 25 to 30 mgd for the next 23 hours. The flows should then be sustained between 20 to 30 mgd with a maximum monthly WWTP flow of 20 mgd. SSA will not divert flow, unless an emergency situation occurs, less than what can be properly treated as documented by the Peak Flow Hydraulic Capacity Study. If flow is diverted before the WWTP peak and sustained capacities are reached, the reason why the flow could not be treated and the quantity of flow bypassed will be documented.

SSA has a Wet Weather Operating Plan, which consists of an operating protocol for the use of the Outfalls 001 (main plant outfall), and 003 (upstream of headworks). The WWTP hydraulic capacity goals and guidelines through the secondary treatment system were established as follows:

Permit Flow Parameter	Goal (mgd)	Guidelines for Acceptable Performance (mgd)
Annual Average Flow/ Average Monthly Flow	20	Up to 20
Maximum Average 24 hr Flow	25	23 to 30
Peak Hourly Flow	39	34 to 42

The WWTP Wet Weather SOP, including proposed protocols for accepting peak flows, remains under development. The plans will reflect SSA's experience, which has strongly indicated the need for flexibility in implementing the peak flow goals. These goals must be viewed in the context of tradeoffs between overall plant maintenance parameters and total amounts of wastewater required to be bypassed. When the flows entering the treatment plant exceed 25 mgd, the headworks are negatively impacted by heavy loadings of grit. SSA continues to address influent flow measurement and is working with its consultants, as well as its state and federal regulators, to address this issue.

The plant headworks has been a continuing limitation on our ability to process peak wet weather flows. After years of grit-related problems, we upgraded the grit removal systems using a Eutek/Hydro International system of grit snails. This new grit system has been unsuccessful in handling the grit which we are experiencing. This has led to major operational problems and the need to use Outfall 003 while the grit systems have been chronically down for cleaning. As a result, SSA is currently in litigation with Eutek/Hydro International, as well as the design engineering firm. In the meantime, SSA is evaluating other grit removal options in conjunction

with the LTCP effort. Notwithstanding the ongoing litigation, in 2011, SSA cleaned the main interceptor and the branch interceptors.

We have worked daily to try to find a solution to the inability of the new grit system to handle incoming grit. Based upon performance testing, it was established that the grit snails could not handle the specified capacity of grit. SSA is in settlement negotiations with the grit snail manufacturer over this performance deficiency. In the interim, SSA has implemented a grit box system that is working well and will continue to be used in the indefinite future. PADEP has been notified of this situation.

In some instances, such as successive peak flow events, the operator has an obligation to exercise engineering judgment to reduce wet weather flows in order to protect the mechanical integrity of the system and to prevent the need for even more extensive bypasses. Such engineering judgment cannot be replaced by an inflexible peak flow requirement of 39 mgd. Thus, it may be necessary from time to time to discharge to outfall 003 during peak flows of less than 39 mgd, in order to protect the biological or mechanical integrity or general operating capability of the plant. Such decision must rest in the sole discretion of the plant operator and will be meticulously documented. In the event of such discharges, the reporting requirements of the NPDES permit will be followed, and where an SSA operator exercises professional judgment in managing flows inconsistent with flow thresholds in the NPDES permit, SSA will provide appropriate notifications to PaDEP per applicable permit requirements.

The SSA will implement the following operating and monitoring protocols:

- Operating mechanisms will be set to convey a peak flow of 39 mgd to the treatment plant for one hour and 25 mgd thereafter;
- Outfall 003 may discharge if the combined sewage flows to the WWTP exceed 39 mgd for more than one hour in a twenty-four hour period and the SSA is in compliance with the EPA Notice of Compliance Order and all permit conditions. The discharge from Outfall 003 may continue for as long as the combined sewage flows to the WWTP equal or exceed 25 mgd.
- If flow is discharged from Outfall 003 when combined flows have not exceeded 39 mgd for more than one hour in a twenty-four hour period, or have not sustained 25 mgd thereafter, SSA will notify DEP and EPA within 24 hours of the discharge.
- SSA will collect data from Outfall 003 using the flow chart meter.
- SSA will collect data on the flow through the WWTP measured in Mgal on an hourly basis.
- SSA will submit monitoring information on a monthly basis to DEP for each instance in which there is a discharge through Outfall 003.

The grit system has been a major source of frustration for SSA. Despite the daily challenges to keep this system operating, SSA has redoubled its efforts and dedicates plant personnel to directly monitor the system during wet weather events. SSA is evaluating options for a long-term solution as part of the LTCP.

5.0 Elimination of CSOs During Dry Weather – NMC No. 5

5.1 Introduction

The fifth minimum control is to minimize CSOs during dry weather periods when the sewer system is not conveying significant quantities of storm water. The collection, conveyance and treatment facilities must have sufficient capacity to be able to handle peak dry weather flow. In addition, the facilities are operated and maintained to minimize the potential for overflows during dry weather (i.e. blockages, pump malfunctions, etc.).

5.2 Measures Necessary

SSA will inspect all CSOs at least on a monthly basis. See Section 1.7, above. These inspections coupled with SSA's extensive metering program allow the detection – usually at an early stage – of any dry weather overflows.

SSA will document all overflow inspections conducted and maintenance performed. SSA will document all overflows on the CSO Discharge Monitoring Reports and submit the reports to the Pennsylvania Department of Environmental Protection.

Dry weather overflows are identified by SSA's practice of chalking or placing a block of wood in the overflow pipe at the pumping stations and CSO Regulators. Generally, historic dry weather overflows have been due to blockages. Any lines that experience chronic blockages will be televised, cleaned and repaired or replaced as necessary to attempt to eliminate the occurrence of future blockages in these lines. Evaluation of other potential modifications to eliminate DWOs will be performed on a case-by-case basis as potential future chronic locations are identified.

Comprehensive CSO regulator and tide gate inspections were performed during September/October 2004, October/November 2009 and re-inspections are ongoing as part of SSA's daily inspection program and CSO LTCP effort.

The permanent signage located at each CSO was revised to the following language, "NOTICE Scranton Sewer Authority Combined Sewer Outfall Untreated Sewage CSO # _____. This site is at or downstream of a Combined Sewer Overflow. Avoid water-related activities during discharges or heavy rains. To report a discharge call 570-348-5337." The signage will enable the general public to report malfunctions.

CSO signs will be maintained and replaced promptly in the event a sign is missing or damaged.

6.0 Control of Solids and Floatable Material – NMC No. 6

6.1 Introduction

The sixth minimum control is intended to reduce visible floatables and solids from CSO discharges and receiving waters. Controls such as baffles, screens or racks can be included in the combined system to remove solids and floatables before reaching the receiving water. Floatables can be removed from larger receiving water with the use of booms and skimmer vessels. In addition, pollution prevention measures can be utilized to reduce the amount of extraneous floatables and solids entering the combined system.

6.2 Study

SSA performed a study of available controls for solids and floatables and determined that baffles in certain outfalls, coupled with pipe hoods in system catch basins would be the most effective approach for SSA to control solids and floatables. Baffles in CSOs continue to be evaluated and implemented.

6.3 Combined Sewage Control Methods

6.3.1 Collection System Control

The catch basin design will be evaluated to ensure adequate storm water control while attempting to reduce the amount of storm water and debris entering the combined system. Catch basins can be modified to prevent floatables from entering the combined system. Inlet grates can be installed at the top of the catch basins to reduce the street debris that can enter. Trash buckets can be installed in the basin below the grate to retain floatables while letting the stormwater pass to the combined system. Hoods are vertical cast iron baffles that are installed in basins. Hoods are effective for retaining debris within catch basins. A basin can be modified with a vortex valve, which is a throttling device to reduce the frequency and volume of a CSO event and control floatables.

Due to the fact that there are thousands of catch basins in the contributing municipalities, the plan of action to modify the basins will be limited to hoods. It would be cost prohibitive to the contributing municipalities to enact a more elaborate retrofit program. On November 25, 2003, the SSA adopted an updated policy for storm water discharges into the combined sewer system, which included requirements for effective inlet and catch basin design. This policy sets limits on peak storm water flow into the combined system by requiring storm water management at new developments, as well as requiring developers to look for storm water separation if existing storm conveyance systems or streams are nearby. The policy will be provided to the City of Scranton, Borough of Dunmore and adjoining municipalities for incorporation into their storm water management policies and for enforcement. This activity is dependent upon the cooperative adoption of design standards by the municipalities.

The effectiveness of a catch basin in controlling floatables is dependent on regular maintenance and cleaning. All inlets and catch basins in the system will be cleaned on a maximum six-year cycle. In priority areas, cleaning will be scheduled generally twice annually. Additional cleaning will occur when problems are reported. SSA will document cleaning and input information onto a map and into a database. Through marking/updating inlet and catch basin locations, the map data will be retained for later incorporation into electronic mapping of the sewer system. As defects are observed, they will be reported to the City, Borough or State for corrective action.

SSA has an extensive catch basin hood program. The hoods (bent pipe elbows) are reported to be quite effective at catching solids and floatables. Based upon the experience of SSA's collection system crews in direct response to queries from SSA's Deputy Director for Compliance, SSA believes that 75-80% of all SSA catch basins have some form of hood in place. SSA is currently installing PVC hoods in all remaining catch basins as it performs maintenance on catch basins.

6.3.2 CSO Control

Screens and trash racks are a series of vertical and horizontal bars or wires designed to remove coarse and floating debris from CSOs. The efficiency of this control is based on the design size and typically ranges from 25-90 percent of the total solids. Fine screens are more effective at removing smaller particles but they are also more susceptible to clogging and require additional maintenance. The effectiveness of screening units is reduced significantly by the presence of oil and grease. In order for trash racks or screens to be utilized, the outfall pipe must be an adequate length or land space available for a small structure and outfall must be high enough above the receiving water to permit regular maintenance. Trash racks and screens require regular inspection and maintenance. Application of any of these devices is capital intensive and would be further considered in the floatable control study and the LTCP.

Baffles are floatable control devices that can be installed in a discharge chamber in front of the overflow weir. Baffles are simpler than many of the other control methods and they have lower operating and maintenance costs. The design of the diversion chamber flow regulator and overflow weir determines the effectiveness of the baffles. The discharge chamber and overflow weir must be designed to provide reasonably uniform flow at a low velocity to ensure that floatables are not entrained.

Baffles have been installed at five diversion chambers on a pilot basis. The basic design of the baffle is the same for all of the regulators in the pilot project, but each baffle was customized to fit to the specific regulator such that they are not interchangeable among regulators. The baffles will continue to be monitored during and after storm events. SSA is evaluating the installation of baffles at approximately 10 more sites for FY 2012 and will report on those installations during the next annual report. These sites will be drawn from sites identified by EPA and will include outfalls where SSA staff can perform the installation (which means it will definitely occur in FY 2012) along with other installations that will require an engineering analysis and outside resources to implement (which means a longer schedule may be necessary than FY 2012).

Regulator and diversion chambers will be inspected monthly and cleaned as required. The inspection and cleaning will be documented in a form similar to the one located in the Collection System O&M Manual.

6.3.3 End-of-Pipe Controls

End-of-Pipe Controls are not currently in place in the SSA system. We have not found these controls to be effective for the SSA system.

6.4 Receiving Water Removal Methods

Receiving water removal methods are not currently utilized in the SSA receiving waters.

6.5 Source Control Methods

Street sweeping can be effective method to control the amount of street debris entering the combined system. SSA has obtained documentation from the City and Borough regarding the schedules for street sweeping. SSA has purchased its own street sweeper to facilitate effective street sweeping.

SSA will enforce the industrial pretreatment program to reduce the amount of extraneous material entering the combined system.

SSA has developed a website to inform the public about the combined sewer system. The website will include educational information addressing street litter. SSA will endeavor to support the City and Borough relative to disseminating educational messages that will advise residents of the importance of proper trash disposal related to the sewer system.

Labeling of specific catch basins is being implemented to identify that the combined sewer system interconnects directly to the receiving streams and that no dumping is allowed. Note that labeling within our GIS has been implemented and documented, but the physical labeling of each basin is still ongoing and is subject to availability of resources.

SSA has also approved a proposal from the Lackawanna River Corridor Association (LRCA) to develop a Public Education and Outreach Program. Among the tasks of the proposed program, SSA is working with LRCA to develop educational materials, identify target audiences and stakeholders, and utilize communication channels to reach and involve target audiences. SSA will conduct educational events for schools and community groups, develop volunteer opportunities for public involvement, and conduct public education meetings. A Household Hazardous Waste program will also be evaluated under the LRCA proposal.

Pollution Prevention Programs – NMC No. 7

7.1 Introduction

The seventh minimum control is the implementation of pollution prevention programs to reduce contaminants in CSOs. The objective of this control is to reduce to the greatest extent possible, the amount of contaminants that enter the combined sewer system.

7.2 Measures Necessary

SSA will provide information regarding pollution prevention on the website. In addition, pollution prevention information is included in sewer bill mailings.

SSA is evaluating continuation of a marking program to further raise public awareness of the connection between urban impervious area runoff and local water quality.

SSA has developed a website that will be used to provide educational information regarding recycling, proper disposal of waste, proper fertilizer and lawn care products application, and spent oil drop-off programs. The stakeholders involved with the LTCP development will be involved in determining the educational material to be placed on the website and any additional programs to inform residents.

SSA contacted the Lackawanna County Solid Waste Management Authority and determined that there is no collection of household hazardous waste in the area.

SSA is utilizing a clam truck for cleaning. All inlets and catch basins in the system will be cleaned within six years. Additional cleaning will occur when problems are reported.

Street sweeping can be effective method to control the amount of street debris entering the combined system. In concert with NMC No. 6, SSA will obtain documentation from the City and Borough when streets were swept. SSA has purchased its own street sweeper to facilitate street sweeping.

A Household Hazardous Waste program will also be evaluated under the LRCA Public Education and Outreach Program. SSA would like to have such a program, but it must be prioritized in light of all other regulatory commitments.

8.0 Public Notification – NMC No. 8

8.1 Introduction

The eighth minimum control is public notification to inform the public of the location of CSO outfalls, the actual occurrences of CSOs, and the potential health and environmental effects of CSOs.

8.2 Communications Strategy

SSA currently provides educational materials in sewer bill mailings. SSA will continue to provide educational material to residents.

The permanent signage located at each CSO was revised to the following language, "NOTICE Scranton Sewer Authority Combined Sewer Outfall Untreated Sewage CSO # ____. This site is at or downstream of a Combined Sewer Overflow. Avoid water-related activities during discharges or heavy rains. To report a discharge call 570-348-5337." The signage will enable the general public to report malfunctions.

SSA has developed a website to inform residents about the about the sewer system and proper operation of the system. Also, the site includes appropriate precautions, risks, potential health hazards, locations of the CSO discharges and incidents of DWOs.

SSA is also working with the Lackawanna River Corridor Association (LRCA) to develop and implement a Public Education and Outreach Program. Among the tasks of the proposed program, SSA will coordinate with LRCA to develop educational materials, identify target audiences and stakeholders, and utilize communication channels to reach and involve target audiences. SSA will conduct educational events for schools and community groups, develop volunteer opportunities for public involvement, and conduct public education meetings. A Household Hazardous Waste program will also be evaluated under the LRCA proposal.

SSA has also implemented additional controls at selected outfalls to prevent public access to CSO facilities (such as large diameter outfalls) and to ensure public safety. Recent fencing at Outfall 023 is a good example of these activities.

9.0 Monitoring to Characterize CSO Impacts – NMC No. 9

9.1 Introduction

The ninth minimum control is monitoring through visual inspections and other simple methods to determine the occurrence and apparent impacts of CSOs.

9.2 Characterization Measures

9.2.1 Mapping

The SSA has a comprehensive set of sewer system index drawings. Additionally, the details of most sewers are contained in original "spur books" obtained from the City Engineer's office for sewers constructed generally prior to 1960, "ward book" sewer mapping for expanded information on all sewers, and engineer's design or record drawings for construction since 1970. GIS mapping was performed as part of the Lackawanna Watershed 2000 program and has been updated by SSA during 2010 and 2011. The SSA has purchased a GPS grade survey unit to continually update this GIS system, as was done through 2010 into 2011.

9.2.2 Water Quality and Uses

SSA has compiled existing water quality data for the following receiving waters: Lackawanna River, Leggetts Creek, Roaring Brook, Stafford Meadow Brook and Keyser Creek.

As discussed below, using Hawk Mountain Labs, SSA has obtained ambient water quality data at key locations in our CSO receiving waters during the past several years.

The designated uses of some of the local waters in the Scranton area that receive CSO discharges include (as well as the universal designated uses of: Public Water Supply, Boating, Fishing, Water Contact Sports and Esthetics):

- Lackawanna River Warm Water Fishes
- Meadow Brook Cold Water Fishes
- Leggetts Creek Trout Stocking
- Roaring Brook Cold Water Fishes
- Keyser Creek Cold Water Fishes

However, actual uses of these water bodies may be different, which will be inventoried as part of the LTCP.

SSA has developed a comprehensive 3-year water quality monitoring program built upon previously performed water quality studies conducted by SSA as presented in the December 2006 Draft LTCP Report. The Water Quality Monitoring Program began in 2009 and is intended to establish baseline conditions and includes both dry weather and wet weather characterization:

- Dry weather river and stream characterization is intended to provide a baseline water quality description of the existing conditions of the SSA receiving waters to characterize water quality without inputs from CSO or stormwater discharges from the SSA service area. Dry weather monitoring occurs at 14 locations along the Lackawanna River and its six (6) tributaries (Leggetts Creek, Meadow Brook, Roaring Brook, Little Roaring Brook, Stafford Meadow Brook, and Keyser Creek), as well as the SSA WWTP Effluent Outfall No. 001.

- Wet weather river and stream characterization is intended to provide information, that when analyzed in conjunction with the other characterizations, will define the CSO contribution to, and stormwater impact on, water quality of the SSA receiving waters. Wet weather monitoring is conducted at the 14 dry weather monitoring locations, as well as five (5) CSOs (CSO Outfall Nos. 003, 004, 016, 023, and 029), and two (2) stormwater outfalls. Wet weather samples are taken on an hourly basis to depict changes in water quality during and following a wet weather event.

Laboratory analysis of the river and stream samples includes biochemical oxygen demand (BOD), total suspended solids (TSS), total dissolved solids (TDS), oil and grease,

dissolved oxygen (DO), pH, temperature, microbiological parameters (fecal coliform and E. coli), metals (total chromium, total copper, total lead, total mercury, total nickel, and total zinc), and nutrients (ammonia nitrogen, total nitrogen, and total phosphorus). The initial 3 year program includes approximately 20 dry weather sampling events and 2 wet weather sampling events. A benthic macro-invertebrate characterization was also conducted in 2011 to supplement the water quality data in assessing the effects of CSO discharges on receiving water quality in the SSA service area, and to serve as a benchmark for measuring improvements through long-term monitoring. The biota characterization analysis includes EPT Index (%), Hilsenhoff Biotic Index (HBI), Taxa Evenness, and Taxa Richness determinations. The results of this study will be used to assess and quantify the general aquatic health of the ecosystems and compared with previous and future studies to identify trends in the biotic community.

The planning incorporated into the initial 3-year Water Quality Monitoring Program has established the groundwork for on-going water quality monitoring throughout the SSA service area. At the completion of the initial monitoring program in summer 2012, a comprehensive report will be developed detailing the findings of the program and outlining recommendations for future water quality monitoring activities. This information will be included in the LTCP.

9.2.3 System Monitoring

SSA employs flow meters and its updated and calibrated hydraulic model to monitor CSO activations and volumes. SSA has rotated the meters and believes the model is adequately calibrated. SSA will continue to evaluate appropriate locations for in-system meters

SSA visually inspects CSO discharges and documents apparent impacts. This activity will continue in the future. Observations of debris discharged from the CSOs is recorded on inspection forms and inputted into the Authority's electronic database. Also in 2010 the SSA has put their CSO and flowmeter teams on a wireless system allowing direct communication with the Authority's JOBPLUS database. This approach allows more a more efficient and productive CSO inspection program.

SSA is evaluating several outfalls for the potential installation of baffles in an effort to minimize post-activation accumulation of debris.

SSA characterizes the frequency, duration and volume of CSO discharges on a monthly basis in the DMRs. Meters and wooden blocks are used to determine whether regulators have been active. Inspections document the dates the regulators were checked and presence/absence of previous overflows. This information is provided with the monthly DMR.

SSA will monitor flow with permanent and portable flow metering equipment at 15 CSO regulators. SSA installed flow-monitoring devices at the pumping stations as part of the improvements under Phase III of the Capital Improvements Program. Continuous flow monitoring at these select sites will provide information and documented data on frequency, duration and volumes of wet weather overflows. Rain gauges have been installed throughout the sewer system.

Dry weather overflows will be recorded when observed or when determined from public calls to the SSA office. SSA will document and track public complaints after receiving them.

9.2.4 Impact Data and Trends

SSA will compile trends on an annual basis of:

- frequency of measured overflow volumes where monitored
- rainfall data
- observations of debris discharged
- incidents of DWOs
- reports of water quality problems attributed to CSO discharges
- public complaints
- weir adjustments – dates, previous elevation, new adjusted elevation

These data are being evaluated as part of the development of the LTCP.

IMPLEMENTATION OF APPENDIX B PROJECTS

The projects in Appendix B shall be implemented in accordance with the following schedule:

All of the projects in Phase A shall be complete by December 1, 2016.

All of the projects in Phase B shall be complete by December 1, 2021. Moreover, as interim milestones:

- at least 5 of the projects in this phase will be complete by December 1, 2017;
- at least 7 of the projects in this phase will be complete by December 1, 2018;
- at least 9 of the projects in this phase will be complete by December 1, 2019; and
- at least 12 of the projects in this phase will be complete by December 1, 2020.

All of the projects in Phase C shall be complete by December 1, 2026. Moreover, as interim milestones:

- at least 4 of the projects in this phase will be complete by December 1, 2022;
- at least 7 of the projects in this phase will be complete by December 1, 2023;
- at least 9 of the projects in this phase will be complete by December 1, 2024; and
- at least 11 of the projects in this phase will be complete by December 1, 2025.

All of the projects in Phase D shall be complete by December 1, 2029. Moreover, as interim milestones:

- at least 1 of the projects in this phase will be complete by December 1, 2027; and
- at least 2 of the projects in this phase will be complete by December 1, 2028.

All of the projects in Phase E shall be complete by December 1, 2037. Moreover, as an interim milestone, at least 13 of the projects in this phase will be complete by December 1, 2033.

Scranton, Pennsylvania; General Obligation

Credit Profile		
Scranton gtd lse rev bnds ser 2016AA due 05/15/2036		
Long Term Rating	BBB-/Positive	Upgraded, Removed from CreditWatch
Scranton gtd lse rev bnds ser 2016 A due 12/01/2026		
Long Term Rating	BBB-/Positive	Upgraded, Removed from CreditWatch

Credit Highlights

- S&P Global Ratings raised its rating to 'BBB-' from 'BB+' on Scranton, Pa.'s general obligation (GO) debt and removed the rating from CreditWatch with negative implications, where it was placed on March 13, 2023, following our receipt and review of financial information, including 2021 audited financial statements.
- The outlook is positive.
- The upgrade to 'BBB-' reflects the city's continued improvement in its liquidity position and balanced financial operations, without reliance on federal stimulus.
- The positive outlook reflects our expectation that we could raise the rating in the next two years if the city's reserve and liquidity position continues to improve, decreasing the need for cash flow borrowing, while maintaining structural balance.

Security

The city's series 2016 and 2017 GO debt is secured by its full-faith-and-credit pledge. The city's series 2016A and AA (taxable) guaranteed lease revenue bonds, issued by the Redevelopment Authority of the City of Scranton, are secured by a pledge of payments from the city pursuant to the sublease and guaranty agreement between the authority and the city. The sublease constitutes a GO of the city and the full-faith-and-credit and taxing power is pledged for debt service. The city may levy ad valorem tax without limit to rate or amount on all taxable property within its borders.

Credit overview

The upgrade reflects the city's improved cash position and ability to maintain balanced operations without federal stimulus. The city allocated a small portion of the $68 million in American Rescue Plan Act (ARPA) funding toward revenue replacement in 2022, but due to stronger than budgeted revenue growth, the city did not use any ARPA funds for operations, and most of the funds will go toward one-time projects. Management estimates 2022 closed with a $4.1 million (3.8%) general fund surplus. The 2023 budget is break-even, and again includes a small amount of ARPA funding, but management expects it will not need to utilize the ARPA funds for revenue replacement as revenue continues to outpace budget.

Scranton exited the Commonwealth's Act 47 program in January 2022, after having adopted measures to address

legacy costs related to pensions, health care, wages, and debt service, putting it on a path toward fiscal stability. While the city's financial and debt profiles have improved significantly, we believe Scranton's lower wealth and income ratios, coupled with high fixed costs, will remain credit pressures. If, over the next two years, the city continues to demonstrate structural balance and improve its liquidity position, eliminating the need for cash flow borrowing, we would likely raise the rating. Over the longer term, further upward rating potential is possible if the city's pension and other postemployment benefits (OPEB) liability improves and it addresses its high fixed costs.

The rating further reflects our opinion of the city's:

- Very low wealth and income levels, which have made it difficult for the city to generate revenue and have spurred high delinquency rates during past recessions;
- Standard financial policies and practices and a strong institutional framework score, but overall weak management score due to the city's very high fixed costs;
- Structurally balanced financial performance and improving reserve and liquidity position; and
- Very weak debt and liability profile, with a large overall net debt burden relative to its tax base and very high fixed costs related to pensions and OPEB.
- The city has engaged a new auditor for its 2022 financial statements, and expects these statements to be released on a timelier basis, with a target of early fall 2023. Upward rating potential may be limited, if audited financial statements continue to be delayed.

Environmental, social, and governance

We view social capital risks as a negative consideration in our credit analysis because the city's weak sociodemographic profile has inhibited its ability to collect revenue and may cause greater demand for services in the future. We view the city's governance and environmental risks as neutral in our credit analysis, though we note that the city is addressing environmental risks and is working toward adopting a sustainability and climate action plan.

Outlook

The positive outlook reflects there is a one-in-three chance that we could raise the city's rating over the next two years.

Downside scenario

If the city's general fund operations become imbalanced or if our understanding of the city's financial position is limited because of material delays in providing audited information, we could revise the outlook to stable or take downward rating action.

Upside scenario

If the city can continue to improve its liquidity position, decrease its reliance on cash flow borrowing, maintain structural balance without reliance on one-time revenue, and provide timely audited financial information, we could raise the rating.

Credit Opinion

Very weak economic base has posed challenges to revenue generation but shows signs of improvement

Scranton, the county seat for Lackawanna County, has experienced very little assessed value (AV) growth over the last 20 years, due to both a stagnant economy and the absence of reevaluations of properties. Lackawanna County recently embarked on its first comprehensive reassessment since 1968, but the county does not expect new valuations to go into effect until Jan. 1, 2026. Pennsylvania requires revenue neutrality following a reassessment, so we do not expect the city's property tax revenue to change materially; however, it will likely need to plan for a higher level of appeals. The city has very weak wealth and income metrics, which has resulted in a high level of tax delinquencies in the past. Favorably, management reports that tax collections are improving, as Scranton has changed some of its collection methods and economic conditions improve. Current-year property tax collections are around 89%.

The county's primary industries include manufacturing, education, and health care. While manufacturing has been waning over the last 20 years, the local services sector has remained steady. The metro area has above-average concentrations of employment in hospitals, nursing homes, and social services organizations. The city has seen some momentum in new residents moving to the city in search of greater affordability. Officials report continued development in downtown, bolstered by state and local investments and small business loans. There is also some longer-term upside potential as Amtrak and the Pennsylvania Northeast Regional Railroad Authority explore potential rail service between Scranton and New York City. Despite recent developments, given the city's weak wealth and income levels, we expect our assessment of the local economy to remain very weak.

Standard policies and practices, but weak management assessment due to its very high debt, pension, and OPEB burden

We view the city's management as weak because of its sizable fixed costs (debt, pensions, and retiree health care), which represented 35.8% of total governmental expenditures in 2021. Should these costs come down as the city debt is retired and pension reforms improve annual required costs, our assessment could also improve.

Key financial policies and practices include:

- Monthly budget-to-actual reports presented to the city council and regular budget adjustments;
- A five-year, rolling capital projects list that identifies projects, costs, and funding sources;
- An investment policy that aligns with state statutes and Government Finance Officers Association (GFOA) best practices and requires monthly reports on investments, but the city has not begun its monthly reporting because it does not have investments beyond cash in checking accounts;
- A policy that sets a target unassigned general fund balance of 8% of the upcoming year's expenditures and a minimum of 3%, with a replenishment mechanism;
- A debt policy, adopted in September 2022, that includes affordability metrics such as limiting general fund-supported debt service to 10% of expenditures, targets no less than 60% of par amortized in 10 years, limits variable-rate debt to 15% of debt outstanding, and prohibits derivatives; and
- No long-term financial planning.

Surplus projected for 2022, break-even budget in 2023, and improving reserve and liquidity position

After adjustments for significant one-time expenditures and transfers related to the sale of the Scranton Sewer Authority and funding its pension plans, the city achieved general fund surpluses of 1% to 6% in the last three audited fiscal years (2019-2021) due to conservative budgeting and to cost reductions put in place as part of the city's Act 47 Exit Plan. Preliminary 2022 results indicate the year closed with a 3.8% surplus. The original 2022 budget included $4 million of ARPA funds to be used for revenue replacement; however, due to stronger than budgeted tax revenue, the city did not use any ARPA funds toward general operating expenses, which we view as a credit positive. Still, these stimulus funds may offset some capital spending that might have come out of the general fund or would have been deferred.

The 2023 general fund budget is break-even, inclusive of $2.3 million of ARPA for revenue replacement; however, management expects it will not need to use any ARPA funds for operations as revenues are trending better than budget. The 2023 budget assumes a 5% increase in total general fund revenue over the 2022 budget, mostly due to increases in earned income tax revenue and intergovernmental reimbursements related to grants. We view the city's revenue assumptions as reasonable, and the city's year-to-date estimates show the city meeting their estimates in their largest revenue streams, which include Act 511 taxes (37.5% of budgeted revenue), real estate taxes (33%), and landfill fees (7%). Budgeted 2023 expenditures also increased by 5% over the 2022 budget, with the largest increase in public works administration. The city recently settled its firefighters' union contract through 2026, with annual increases that we believe the city can absorb into its budget. Its clerical and public works unions are under active contract, but the city's police contract is in the arbitration process. We will be watching how the city is able to contain costs, given the pressures of inflation and a tight labor market. Additionally, we believe that the city's capacity to cut spending is somewhat limited due to its high fixed costs.

With a $4 million surplus in 2022, the city expects its total general fund balance to increase to $26.2 million (24% of estimated expenditures). However, the city still has a high level of general fund receivables, which, in our opinion, overstates reserves. In 2021, the general fund reported receivables of $16.7 million for real estate taxes and $7 million for garbage fees. These receivables are offset by $13.3 million of unavailable revenue; however, $10.4 million of receivables have no offset on the balance sheet. We adjusted our 2021 available general fund reserves by this amount, as we believe this more accurately reflects the city's available reserve position.

Scranton typically issues tax revenue anticipation notes (TRANs) each year for cash flow purposes. It issued $4.9 million in January 2023, which was $5.1 million less than in 2022, reflecting continued improvement in the city's cash position. The city pays down its TRANs monthly, and is projected to pay down the 2023 notes by June or July this year, well before the final maturity date of Dec. 31, 2023. Due to the city's improved financial performance, we now view its liquidity position as very strong.

Very weak but improving debt and contingent liability profile

Although Scranton's debt and contingent liability profile remains very weak, it continues to improve from previous years, due largely to management reducing debt and refinancing variable-rate debt into fixed-rate. Still, the city's overall liability remains very high relative to its tax base, at 20.3% of market value. Amortization of its approximately $76.4 million of net direct debt is rapid, with 100% of par scheduled to be retired in the next 10 years. Due to above-average amortization and limited additional debt plans, we expect annual debt costs will likely continue to

decrease and contribute to an improving debt profile.

Scranton's series 2021 GO bonds were privately placed with M&T Bank, but we do not view this as a contingent liquidity risk. The city no longer has any variable-rate debt outstanding.

Pension and other postemployment benefits:

As part of its Act 47 Exit Plan, the city implemented corrective measures to reduce its unfunded pension liabilities, including freezing pension cost of living adjustments (COLAs) and increasing employee contributions, resulting in improved funded ratios and lower actuarially determined contributions; however, the unfunded liabilities remain large, and contributions still make up a significant portion of the budget.

OPEB liabilities are very high and are funded on a pay-as-you-go basis, which, given claims volatility as well as medical cost and demographic trends, is likely to lead to escalating costs.

Scranton participated in the following plans as of Dec. 31, 2021:

- Scranton Fireman Pension Plan: 61.6% funded, with a net pension liability (NPL) of $34.6 million;
- Scranton Police Pension Plan: 83.4% funded, with an NPL of $14.4 million;
- Scranton Non-Uniformed Pension Plan: 84.4% funded, with an NPL of $1.7 million;
- Scranton Fireman OPEB Plan: 0% funded, with a net OPEB liability of $72.9 million;
- Scranton Police OPEB Plan: 0% funded, with a net OPEB liability of $90.6 million; and
- Scranton Non-Uniformed OPEB Plan: 0% funded, with a net OPEB liability of $31.9 million.

Funded ratios of each of the city's pension plans improved in 2021 as the plans built off prior-year reforms and contributions were well above both our static and minimum funding progress thresholds. The plans updated their mortality tables with this most recent actuarial valuation, which we view as favorable. However, we still view some of the plans' assumptions to be optimistic, such as 4.5% salary growth. We also view the plans' 7.25% assumed rate of return as aggressive relative to S&P Global Ratings' guideline of 6.0%, which could lead to contribution volatility. Additionally, a lawsuit was filed against the city and police pension fund in 2021 to retroactively reinstate the COLAs because of the improved funded levels. The matter is pending, but could weaken plan funding if the court rules in favor of the plaintiffs.

Under the terms of collective bargaining agreements with its police and firefighters and clerical and public works employees, the city is required to provide health insurance to retiring employees who meet the criteria specified in each contract. Scranton funds this OPEB obligation on a pay-as-you-go basis, but did recently deposit $2 million into a newly created OPEB trust fund. The city does not have a set amount it will add to the trust at this time, but plans to make contributions the budget allows. Given the size of these liabilities ($195.4 million across the three OPEB plans) relative to the trust, we believe future costs will likely be a budgetary stress for the city.

Scranton--Key credit metrics

	Most recent	Historical information		
		2021	2020	2019

BEFORE THE

PENNSYLVANIA PUBLIC UTILITY COMMISSION

CITY OF SCRANTON

Docket Nos. R-2023-3043189 and R-2023-3043190

DIRECT TESTIMONY

OF

TERI OOMS, President & CEO

OF THE INSTITUTE [FOR PUBLIC POLICY & ECONOMIC DEVELOPMENT]

February 1, 2024

Q. PLEASE STATE YOUR NAME AND ADDRESS FOR THE RECORD.

A. Teri Ooms

Q. WHERE ARE YOU EMPLOYED?

A. The Institute

Q. PLEASE SUMMARIZE YOUR EDUCATIONAL BACKGROUND AND PROFESSIONAL EXPERIENCE.

A. I have a BS in Public Administration and an MBA in Finance. I have served as the President & CEO of The Institute, a nonprofit collaborative data and analytics organization. Prior to that I served as the President & CEO of the Inland Empire Economic Partnership, a regional, economic development corporation in Southern California.

Q. HAVE YOU EVER TESTIFIED AS AN EXPERT BEFORE?

A. Yes.

Q. IN WHAT CAPACITY?

A. As a subject matter expert in regional socio-economic data.

Q. HOW MANY TIMES?

A. Twice (2).

Q. IN WHAT VENUES?

A. City of Scranton policy and fire binding arbitration.

Q. ON WHOSE BEHALF ARE YOU TESTIFYING IN THIS PROCEEDING?

A. I am testifying on behalf of the City of Scranton.

Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS PROCEEDING?

A. To educate and inform the PUC about the City of Scranton residents from a socio-economic perspective.

Q. WHAT IS YOUR UNDERSTANDING OF THE PURPOSE OF THIS PROCEEDING?

A. The purpose of this proceeding is to present data to the PUC regarding the economic vulnerability of the residents of Scranton in hopes of avoiding another rate hike.

Q. WHAT CAN YOU TELL US ABOUT THE OVERALL POPULATION WITHIN THE CITY OF SCRANTON?

A. The City of Scranton is the county seat of Lackawanna County. It has the largest urban core, it is a government center, and home to many higher education institutions and health systems. The City has very distinct neighborhoods surrounding the downtown. Despite this, the City has an older and poorer population. In the 1970s and 1980s major housing development in the City's

first tier suburbs saw much of the wealth leave the City and move elsewhere. As a result, much of the housing became rental and a community where those with low incomes remained.

Q. HOW MANY FAMILIES REQUIRE FOOD ASSISTANCE?

A. 24.5 percent of the households are SNAP recipients. This is much higher than the Commonwealth and National averages. Nearly 1:4 households are SNAP recipients.

Q. WHAT IS THE MEDIAN OR AVERAGE – YOU CAN ANSWER BOTH – HOUSEHOLD INCOME FOR THE CITY?

A. Median household income is $45,893 and per capita income is $25,540. Both are significantly less than state and national averages, which explain why so many social supports are needed for families in the City. A total of 26.2 percent of households in the City of Scranton earn less than $25,000 per year.

Q. HOW MANY SCRANTONIANS ARE ELDERLY?

A. 17.8 percent of City residents are 65 and older and 15.4 percent of them live in poverty.

Q. HOW MANY SCRANTONIANS LIVE ON A FIXED INCOME?

A. The following data identifies the number and percentage of people on various social programs. This data came from the US Census Bureau.

	Estimate	Percent
With Social Security	12070	37.7
With retirement income	7126	22.3
With Supplemental Security Income	2116	6.6
With cash public assistance income	1632	5.1

Q. HOW MANY SCRANTONIANS ARE DISABLED?

A. 15.1 percent of the population has some sort of disability.

Q. HOW MANY FEMALE-LED SINGLE FAMILY HOMES EXIST IN THE CITY OF SCRANTON?

A. 45.6 percent of children in the City live in single parent homes.

Q. WHY DOES THAT DATA POINT MATTER?

A. Single parent households face more challenges than two parent households. Incomes are generally less, especially in single parent households headed by women. They are generally employed in lower wage careers. The cost of child care as well as availability is also an issue.

Q. HOW MANY SCRANTONIANS RENT VERSUS OWN THEIR HOMES?

A. Nearly 50 percent (49.6%) are renters.

Q. WHY DOES THAT DATA POINT MATTER?

A. Home ownership is a sign of generational wealth building and financial security. Further, renters face ongoing rent increases that historically are higher than increases in wages. This is especially true in the COVID years as both rents and purchase prices have increased dramatically across the country.

Q. HOW MANY SCRANTONIANS LIVE IN POVERTY?

A. 19.6 percent of all Scranton residents live in poverty. This is nearly 1:5 residents.

Q. HOW WOULD YOU DESCRIBE DIVERSITY IN THE CONTEXT OF SCRANTON'S POPULATION?

A. Current US Census data demonstrate the City is more racially and ethnically diverse than other communities in the County and disaggregated data shows these individuals are economically challenged.

Q. WHERE/HOW DID YOU OBTAIN YOUR DATA AND METRICS?

A. All the data is pulled from various surveys from the U.S. Census Bureau.

Q. HOW WOULD YOU DESCRIBE THE COST OF LIVING IN SCRANTON?

A. The cost of living may appear to be less than other communities, however when you compare the cost of living with current income levels, you will see there is a challenge to meet basic needs.

Q. HOW DOES THE COST OF LIVING COMPARE TO THE COMMONWEALTH AVERAGE AND WHY, IF AT ALL, DOES THIS MATTER?

A. In real dollars, the cost of living shows up as being a little less than the Commonwealth. However, that savings does not mean much when income levels are more than $10,000 less than average Commonwealth income.

Q. ARE YOU ABLE TO INFORM US AS TO WHAT THE LIVING WAGE WOULD HAVE TO BE FOR AN AVERAGE FAMILY OF FOUR TO AFFORD A WATER BILL OF OVER $100 PER MONTH?

A. Without considering the increase in water bills, a family of four with one working adult need would need to earn $71,614 to meet their basic needs. The same family with two working adults would need $90,605. The difference includes increased costs for transportation and childcare.

Q. ARE YOU ABLE TO DISCUSS IF THE PROPOSED RATE INCREASE IS REASONABLE?

A. I believe any rate increase will be a challenge for residents who are already making difficult choices to meet basic needs.

Q. WOULD UTILITY REIMBURSEMENT COVER THE RATES AT ISSUE HERE?

A. Not unless it covers the entire increase in perpetuity. A short-term fix is merely a band aid and does not address a person's long term income challenges.

Q. ARE YOU ABLE TO DISCUSS THE NEGATIVE EFFECTS OF PEOPLE TRYING TO KEEP THEIR UTILITY BILLS LOWER, SPECIFICALLY AS TO THE WATER AND/OR WASTEWATER BILL?

A. I do not have specific medical or environmental experience. However, logic dictates if people use less water there is an increased risk of illnesses whether they be food borne, bacterial, or viral due to cleaning less. Even drinking less water could lead to dehydration and this is a considerable risk to senior citizens.

Q. WHY, IF AT ALL, WOULD A RATE INCREASE BE SO DETRIMENTAL TO RESIDENTS WITHIN THE CITY OF SCRANTON?

A. The data tells the story. There are a large number of people living in poverty. This means that they are having challenges meeting basic needs. Increased costs further exacerbate the situation.

Q. ARE YOU ABLE TO SPEAK TO INFORMATION ABOUT AREAS SURROUNDING THE CITY OF SCRANTON, LIKE DUNMORE AND MOOSIC?

A. Dunmore has some similar statistics to Scranton. 19 percent of the population is 65 and over. Median household income is more than $11,000 less than the state and median per capita income is about $7,000 less than the state average. A total of 9.3 percent of all Dunmore residents live in poverty and nearly 14 percent are SNAP recipients. A total of 37 percent of children live in single parent households and over 17 percent have a disability. 13.1 percent of all households earn less than $25,000 per year.

Q. ARE YOU ABLE TO SPEAK TO HOW RATE INCREASES WOULD AFFECT SMALL BUSINESSES IN THE SCRANTON AREA?

A. I do not have specific data on small businesses or their challenges, however I can tell you that many small businesses are in retail and hospitality. These sectors were strongly affected by the pandemic. Many have already closed.

Q. HOW HAS THE PANDEMIC AFFECTED THE CITY OF SCRANTON RESIDENTS' ECONOMY/ABILITY TO PAY, IF AT ALL?

A. Yes, many people left the workforce or worked in industries that were closed during the pandemic. People who had young children or elderly family members were unlikely to work because of care demands. People with disabilities were unlikely to be able to work because of the higher risk. Seniors themselves, at high risk for the disease, were likely unable to work.

Q. DOES THIS COMPLETE YOUR DIRECT TESTIMONY?

A. Yes

BEFORE THE

PENNSYLVANIA PUBLIC UTILITY COMMISSION

Pennsylvania Public Utility Commission v. Pennsylvania-American Water Company	Docket Nos. R-2023-3043189 (Water) R-2023-3043190 (Wastewater)

VERIFICATION

I, Teri Ooms, Executive Director of the Institute, hereby state that the facts set forth in my Direct Testimony, C.O.S. St. 2, in the above-captioned proceedings are true and correct to the best of my knowledge, information and belief. I understand that the statements herein are made subject to the penalties of 18 Pa.C.S. § 4904 (relating to sworn falsification to authorities).

PROFESSIONAL PROFILE

Results-oriented senior executive leader with proven ability to manage organizations in different phases of its life cycle and leverage data and information into executable strategies with measurable results.

Senior leadership experience in a variety of types and sizes of non-profit organizations. Produced successes in growth organizations, startups, and turnaround situations. In all organizations responsibilities included board and staff engagement, operations, financial management, planning and reporting, marketing and community relations.

Exceptional project/program development and management with a track record of on-time and on-budget delivery. In-depth management experience including organizational and regional strategic planning, budgeting, staffing, performance management, mentoring and professional development of staff.

Extensive board of director and executive committee member in a number of organizations including Chairperson of the grants committee in a regional health care foundation.

PROFESSIONAL ACCOMPLISHMENTS

Driving High Performance

Started a research center within a higher education collaborative that includes 13 academic partners and the business community. Mentored over 350 students in practicums since 2004. Developed methodology, project management and research for over 175 community based and client driven studies, plans and reports. These studies have influenced state public policy, increased a variety of organizations capacity and outcomes, and educated the community at-large on how leveraging data can improve decision making.

Responsible for a corporate turnaround of a multi-million dollar regional non-profit. Achieved solvency in 12 months.

Strategic Vision

Created the strategic vision for a health care foundation grant program using funds from the sale of a hospital. Managed the process as Chairperson of the grants committee for the last six years.

Created the strategic vision for The Institute from inception to present. Also, led the development and implementation of organizational strategic plans in two organizations, attaining all stated goals ahead of schedule. Also led the development and implementation of a region-wide economic development strategic plans involving extensive stakeholder engagement and key constituency groups.

Success Through Collaboration
Strong working relationships with board members, staff, and committee members are indicative of positive outcomes and success. These relationships have been the cornerstone of all my work in the non-profit sector.

Developed relationships with a number of non-profit, public, and private organizations and representatives in northeastern Pennsylvania to assist them in their data, information and decision making needs not only for their own organization outcomes, but also to change community and systems outcomes to improve the quality of life and standard of living for residents of Northeast Pennsylvania.

Fostered and maintained professional working partnerships with all local governments in the California's Inland Empire region, state and federal departments and agencies, elected officials at federal, state, and local levels, and with business and community leaders due to commitment of trust, honesty and transparency in all interactions.

Professional Experience

The Institute for Public Policy & Economic Development
President & CEO – January 2022 - President
Executive Director – March 2004 to December 2021

- Reporting directly to the President of the University, developed and implemented the long-term strategic plan, goals, structure, and budget; defines measurable results for the successful achievement of the strategy; and works effectively with the regional, volunteer Advisory Board.

- Coordinates and develop high quality research, analysis, planning and consulting capabilities that are being implemented by various public, private, and non-profit groups in several states.

- Developed and implements a grant and program evaluation service center within The Institute that provides services using an integrated approach that includes site visits, stakeholder interviews, and analytics on multiple datasets and report metrics.

- Establishes effective relationships with a broad range of constituents engaged in improving health outcomes and the revitalization of communities, economic, workforce, and community development.

- Works to develop effective public private partnership to implement programs and initiatives and encourage resource sharing and collaboration.

- Responsible for fundraising, business development, and financial management of the organization.

- Establishes and markets a portfolio of consulting and technical assistance services for business, government, non-profits, and institutional clients.

- Plans and executes public relations and marketing efforts to promote The Institute as a visible, respected, and self-sustaining source of expertise.

- Conducts annual regional indicators initiative complete with research. Coordinates seven issue task forces comprised of volunteers to address regional issues through research, policy, and advocacy.

Inland Empire Economic Partnership
President & CEO – June 1997 to June 2004

- Responsible company management and planning including fiscal, personnel, and programming.
- Responsible for business attraction and expansion activities nationally and internationally resulting in company locations/expansions and the creation of new direct jobs and investment for the Inland Empire.
- Led organization's legislative advocacy division which included active missions to Washington, D.C. and Sacramento, California.
- Developed and oversaw the implementation of marketing and public relations activities designed to promote the attributes of the Inland Empire nationally and internationally.
- Established and built relationships with Inland Empire community and business leaders to encourage involvement in business attraction and expansion efforts and investment in the organization.
- Responsible for company's eight operating divisions, several corporate entities, multiple contracts, grants, and financial administration.
- Executed an organization restructuring from bankruptcy through solvency.
- Developed and implemented a strategy that created over 10,000 jobs in seven years through business attraction.
- Served as a voting member of the Executive Committee and Board of Directors.

Inland Empire Economic Partnership
Small Business Development Center Program
Executive Director – September 1991 to September 1997

- Established SBDC program in 1991 with one staff person and $100,000 budget which grew to and 21 staff and $1.2 million in budget by 1997.
- Responsible for all program operations, management, marketing, grant/contractual obligations and financial/fundraising.

- Managed staff of 21 in four full time and five part time locations operating under four federal grants, one state grant, and nine local public/private grants and contracts.
- Provided business consulting assistance to clients in all stages of business including start up entrepreneurs.
- Conducted business workshops and training events.
- Responsible for all public and media relations and marketing.

Murray Insurance
Corporate Controller – December 1989 – July 1991

- Responsible for all accounting and finance functions and staff for company's operations in two states
- Provided pro forma financials and analysis for business lines and acquisitions
- Organization strategic planning

PREPARED DIRECT TESTIMONY OF HARRY S. GELLER

I. INTRODUCTION

Q: Please state your name, occupation, and business address.

A: My name is Harry S. Geller. I am an attorney. I am retired from my former position as the Executive Director of the Pennsylvania Utility Law Project (PULP), but have maintained an office at 118 Locust St., Harrisburg, PA, 17101, for the purpose of providing consulting services and assistance to low income individuals and the organizations which represent them in utility and energy matters.

Q: Briefly outline your education and professional background.

A: I received my B.A. degree from Harpur College, State University of New York at Binghamton in 1966, and a J.D. degree from Washington College of Law, American University in 1969. Upon graduation from law school, I entered the Volunteers in Service to America (VISTA) program, where I was assigned to the New York University Law School. I took courses in the Law School's Urban Affairs and Poverty Law program and worked with the Community In Action Program on the West Side of Manhattan in New York City from 1969-1971. In 1971, I started as a Staff Attorney for the New York City Legal Aid Society, Criminal Court, and Supreme Court Branches in New York County. In 1974, I moved to Pennsylvania and began working for Legal Services, Incorporated (LSI). LSI was a civil legal aid program serving Adams, Cumberland, Franklin, and Fulton Counties. I worked at LSI from 1974-1987 first as a Staff Attorney, then as Managing Attorney, and ultimately became Executive Director. Through a restructuring with other legal services programs, LSI became part of what is now known as MidPenn Legal Services and Franklin County Legal Services.

In 1988, I was hired to be the Executive Director of PULP, a statewide legal aid project dedicated to protecting the rights of low income utility customers. At PULP, I represented low income individuals with utility and energy concerns and supported organizations advocating for low income households in utility and energy matters. As the Executive Director, I consulted and co-counseled on a wide variety of individual utility consumer cases, and I participated in task forces, work groups and advisory panels, including serving as chair of the Department of Human Services' LIHEAP Advisory Committee and the Pennsylvania Public Utility Commissions' Consumer Advisory Committee. I frequently trained communities, legal aid staff, and advocacy groups across Pennsylvania about the various utility and energy matters affecting Pennsylvania's low income population. I retired from PULP on June 30, 2015. Since that time, I have continued to provide consulting services for PULP and its clients, as well as other organizations serving the low income community.

In sum, I have 50 years of experience working on behalf of households in poverty, including the past 30 years focusing specifically on utility and energy issues affecting low income consumers. My resume is attached as Appendix A.

Q: Please describe the focus of your work over the past fifty years, including relevant work experience on issues of low income families' ability to afford essential services such as utilities?

A: I have represented low income individuals and organizations serving low income populations in a wide variety of legal matters, including family law, public benefits, unemployment compensation, utility shut-offs, debtor/creditor, and housing-related disputes. Over the past 30 years, my focus has been to ensure that low income households can connect to, afford, and maintain utility and energy services.

In all of these legal matters, I worked almost exclusively on behalf of individuals and households that subsist on incomes at or below 150% of the Federal Poverty Level (FPL). Through this work, I have had a close view of the daily lives of countless of our poorest citizens. I have spent hundreds, if not thousands, of hours assisting clients, combing through their budgets to see whether it is even possible to make ends meet. Over the years, I have consistently seen the near total absence of the ability of low income families to afford the most basic monthly necessities with the incomes they have, even assuming heroic self-control and conscientious budgeting and spending. Almost every month, my clients faced the stark reality of having to choose which bills they can forgo with the least drastic consequences.

In addition to my deep understanding of the daily monetary struggles facing poor families, I have an extensive knowledge of the array of programs designed to allow low income individuals to afford utility service. While at PULP, I was involved in hundreds of proceedings evaluating the effectiveness of programs that are intended to reduce low income households' utility burdens and help them conserve energy and water through efficiency and weatherization– thereby reducing utility costs and improving bill affordability. I have spent thousands of hours identifying the problems in Universal Service programs and making recommendations for changes to these programs to better serve low income consumers. This advocacy ultimately led to the recognition of the need to develop integrated and coordinated programs for low income consumers.

Over my decades of service, I played an instrumental role in the development, oversight, and monitoring of the initial pilot and then the statutorily required low income Universal Service Programs, each of which is structured to provide a different form of complimentary assistance – working in tandem to enable low income customers to afford and maintain basic service. For example, the Customer Assistance Program (CAP) provides alternatives to traditional collection

methods for low income, payment troubled utility customers, allowing participants to receive a more affordable bill and earn forgiveness on arrears in exchange for making in-full payments on their discounted bill. In turn, the Low Income Usage Reduction Program (LIURP) is a targeted weatherization program designed to assist low income households with the highest energy consumption, payment problems, and arrearages to reduce their overall energy consumption. CAP and LIURP work in tandem and are designed to assist low income households in maintaining affordable utility services and safe living environments while reducing utility collection, thereby benefitting other ratepayers and the communities in which they live and work.

Q: Have you testified in any proceeding before the Pennsylvania PUC?

A: Yes. I have presented testimony in many proceedings before the PUC. A complete list is attached to my resume, which is attached as Appendix A.

Q: For whom are you testifying in this proceeding?

A: I am testifying on behalf of the Coalition for Affordable Utility Services and Energy Efficiency in Pennsylvania (CAUSE-PA).

Q: What is the purpose of your testimony?

A: CAUSE-PA intervened in this proceeding to ensure that the rates proposed by Pennsylvania American Water Company (PAWC or the Company), together with all attendant policies, programs, and procedures governing the provision of water and wastewater services, will not adversely affect the ability of PAWC's low income customers to connect to, maintain, and afford water and wastewater services, which is a critical component to a safe and healthy home. The bulk of my testimony will discuss the impact of PAWC's proposals on low income customers.

Q: How is your testimony organized?

A: My testimony is divided into nine sections. In Section I, I have provided an introduction to this direct testimony. In Section II, I discuss PAWC's residential rate increase proposal, PAWC's existing and proposed rate design, and the financial challenges that PAWC's proposed rates will pose to low income customers and residential customers as a whole. In Section III, I analyze PAWC's rate proposals, including proposed alternative rate mechanisms, and discuss impacts on residential customers already struggling to afford services, and provide recommendations related to these proposals. In Section IV, I will provide an overview of PAWC's low income customers and their households. In Section V, I will analyze the affordability of PAWC's current rates for its low income customers, and resulting unaffordability if PAWC is permitted to implement its rate increase proposal. In Section VI, I will discuss concerns raised by PAWC's Affordability Analyses described in PAWC's expert witness, Charles Rea. In Section VII, I will assess the effectiveness and accessibility of PAWC's low income assistance programs, and provide recommendations related to these programs. In Section VIII, I will assess PAWC's compliance with certain aspects of the Discontinuance of Service to Leased Premises Act (DSLPA) and Water Services Act. Finally, I will conclude my direct testimony in Section IX, and will provide a summary of recommendations offered throughout my direct testimony.

II. PAWC'S RATE INCREASE PROPOSAL

Q: Please summarize PAWC's requested rate increase as it applies to residential customers.

A: On November 8, 2023, PAWC submitted a rate filing, Supplement No. 45 to Tariff Water-PA P.U.C. No. 5 and Supplement No. 47 to Tariff Wastewater-PA P.U.C. No. 16, which proposes to increase rates by approximately $203.9 million, or approximately 20.2%, based on a fully projected future test year ending June 30, 2025.[1] PAWC indicates that $130,938,997 of its proposed rate increases will be allocated to the residential class.[2] According to the Company, if the entire rate request is approved as filed, the total bill for a residential water customer in Rate Zone 1 - Water who uses approximately 3,201 gallons per month would increase from $70.65 to $88.24 per month, or by 24.9%, while the total bill for a residential wastewater customer in Rate Zone 1 – Wastewater using approximately 3,122 gallons per month would decrease from $105.18 to $100.08 per month, or by 4.8%.[3] However, the proposed decrease in projected wastewater bills is as a result of PAWC's proposal to reallocate a portion of its wastewater revenue to water operations, increasing residential water bills by approximately $6.08.[4]

Q: As a preliminary matter, do you support the Company's proposal to increase rates?

A: No, I do not support the Company's proposal to dramatically increase the cost of basic services, and I recommend substantial revision and mitigation of PAWC's proposals. I do not believe that it is appropriate to raise rates for water and wastewater service without first ensuring that low income customers are able to access affordable service under just and reasonable terms.

[1] Volume I, Statement of Specific Reasons.
[2] CAUSE-PA I-1.
[3] Volume I, Notice of Proposed Water and Wastewater Rate Changes.
[4] PAWC St. 1 at 20-21.

This is especially true as Pennsylvania's consumers have struggled profoundly in recent years with the impacts of the COVID-19 pandemic, and more recent economic harms as a result of steep inflation in the cost of basic goods.[5] Most significantly, as my testimony will demonstrate, recent, multiple PAWC rate increases have resulted in the inability of its low income customers to reasonably afford existing rates. Continued access to affordable water and wastewater service is vital to the health and safety of consumers in PAWC's service territory to staying in their homes. Without access to running water, basic tasks of living – including brushing your teeth, cooking, cleaning, etc. – become impossible. Lack of stable water/wastewater services to a home creates significant threats to customers, their families, and their communities. It is imperative that rates – and attendant policies and procedures – are designed to address the disparities in water and wastewater burdens, and the ability of low income families to maintain services.

As discussed below, PAWC customers have shouldered a series of steep rate increases in their monthly bills for basic water/wastewater services in recent years, with PAWC's most recent approved rate increase taking effect on January 28, 2023.[6] As a result, PAWC's water and wastewater services are already unaffordable for its residential customers, particularly its low income customers. Regardless of whether PAWC is approved to increase rates through the context of this proceeding, the Commission should require PAWC to take necessary steps to ensure that all households in its service territory are able to afford service under just and reasonable terms. Throughout my direct testimony, I provide a number of recommendations for how PAWC can better structure its services and assistance programs so that its low income customers can

[5] Rob Wile and J.J. McCorvey, Inflation ticked up to 3.4% in December thanks in part to outsized housing costs, NBC News (Jan. 11, 2024), available at: https://www.nbcnews.com/business/economy/inflation-rate-december-2023-falling-prices-impacting-consumers-rcna133050.Paul Davidson, Another record month for inflation: New level driven by gas, grocery prices and high rent, USA Today (June 10, 2022), available at: https://www.usatoday.com/story/money/2022/06/10/inflation-rate-cpi-may-consumer-price-index/7577577001/.

[6] Pa. PUC v. PAWC, Opinion and Order, Docket Nos. R-2020-3019369, et al (Opinion and Order, Feb. 25, 2021). Pa. PUC v. PAWC, Order, Docket Nos. R-2022-3031672, et al. (Order, Dec. 8, 2022).

reasonably afford to maintain water and wastewater services to their home. While these recommendations are designed to address rate unaffordability at *existing* rates, they are also vital to mitigate financial harm for PAWC's low income customers if the Commission allows PAWC to increase its rates.

Q: What is the estimated economic impact of PAWC's proposed rate increase on residential water customers?

A: The impact of PAWC's proposed residential water rate increases depends on usage and varies between rate zones. Table 1 shows the dollar and percentage impact:

Table 1: Residential Water Bill Impact by Rate Zone at 4,000K[7]

Zone	Currently Monthly	Proposed Monthly	Dollar Increase	% Increase
Rate Zone 1 – Most Areas	$81.93	$105.28	$23.35	28.50%
Rate Zone 2 – Valley*	$33.16	$105.28	$72.12	217.49%
Rate Zone 3 – SLIBCO*	$139.31	$105.28	($34.03)	-24.43%
Rate Zone 4 – Turbotville*	$81.93	$105.28	$23.35	28.50%
Rate Zone 5 – Steelton*	$81.93	$105.28	$23.35	28.50%
Rate Zone XX – Audubon	$51.28	$62.44	$11.16	21.76%
Rate Zone XX – Farmington	$67.50	$105.28	$37.78	55.97%

* To move to Rate Zone 1 rates

(assuming 5/8 meter)

As shown by Table 1, the impact of PAWC's proposed rate increases will vary by rate zone. For example, a typical water customer using 4,000 gallons/month and located in Zone 2 (water) will experience a monthly rate increase of more than 217% for their water service. I note that, while I have used 4,000 gallons/month for illustrative purposes, the impacts of PAWC's rate

[7] PAWC St. 10 at 31-35.

proposal will also vary by a customer's usage which, in turn, varies substantially by household size and condition of the home. These factors drive disproportionate bill impacts for larger families and low income households. I will discuss PAWC residential customer usage, and the corresponding impact on monthly bills, in detail below.

Q: What is the estimated financial impact of PAWC's proposed rate increase on residential wastewater customers?

A: The residential monthly bill impact for PAWC's wastewater customers varies widely between rate zones, as shown by Table 2:

Table 2: Residential Wastewater Bill Impact by Rate Zone (4,000 gal/month)

Zone	Currently Monthly[8]	Proposed Monthly[9]	Dollar Increase	Percent Increase
Rate Zone 1 – Statewide	$129.30	$122.60	($6.70)	-5.20%
Rate Zone 2 - New Cumberland	$112.30	$122.60	$10.30	9.20%
Rate Zone 3 – Scranton	$113.54	$114.77	$1.23	1.10%
Rate Zone 4 – Kane	$124.00	$135.00	$11.00	8.90%
Rate Zone 5 – Valley	$129.30	$122.60	($6.70)	-5.20%
Rate Zone 6 – McKeesport	$129.30	$135.00	$5.70	4.40%
Rate Zone 7 – York	$36.74	$86.30[10]	$49.56	134.89%
Rate Zone 8 – Foster Twp.	$85.00[11]	$100.00[12]	$15.00	17.60%
Rate Zone 9 – Royersford	$57.40	$76.60	$19.20	33.45%
Farmington	--	$74.00	--	--
Sadsbury Twp - unmetered		$128.33[13]		
Brentwood Acquisition	--	$40.21[14]	--	--
BASA Acquisition	$45.50	$92.32	$46.82	102.90%

[8] PAWC St. 10 at 36:19 – 40:16.

[9] Supplement No. 47 to Tariff Wastewater PA PUC No. 16 Eighteenth Revised Page 8 – Fourth Revised Page 13.
[10] Effective 5/27/2025 - Supplement No. 47 to Tariff Wastewater PA PUC No. 16 Fifth Revised Page 11.4.
[11] Effective 1/1/2025, Flat rate bill will increase to $106 per EDU as of May 27, 2025 – PAWC St. 10 at 38: 17-19 and Supplement No. 47 to Tariff Wastewater PA PUC No. 16 Fifth Revised Page 11.5.
[12] Per EDU, effective 1/1/2025 - Supplement No. 47 to Tariff Wastewater PA PUC No. 16 Fourth Revised Page 11.5
[13] Per EDU - Supplement No. 47 to Tariff Wastewater PA PUC No. 16 Fifth Revised Page 11.8.
[14] Bill at 4,000 gallons of usage will be $49.24 as of 2nd anniversary of acquisition date – Supplement No. 47 to Tariff Wastewater PA PUC No. 16 Fourth Revised Page 13.

As with its water rate impacts, the impacts of PAWC's wastewater proposal vary by rate zone, as illustrated in Table 2 – though the variations between rate zone are far more pronounced. As this Table shows, customers in Rate Zone 7 (York) will see an increase of more than 134% - while customers in Zones 1 and 5 will see a decrease of 5.2%. Like water, the impact of PAWC's wastewater rate proposal will also vary by usage, falling disproportionately on larger families and low income households. I note that I am using PAWC's current rate zones for the sake of simplicity in illustrating the percent changes related to PAWC's proposal. However, PAWC has proposed several rate zone designation changes pursuant to this proceeding, which is reflected in the proposed monthly rates.

III. RATE DESIGN AND ALTERNATIVE RATE MECHANISM PROPOSALS

Q: Please briefly describe PAWC's current rate structure for water and wastewater service for residential customers.

A: The Company currently offers water service in five different rate zones. [15] The largest of these rate zones is Rate Zone 1, with over 99% of the Company's total water revenue.[16] Rate Zone 1 offers service to residential and non-residential customer classes through a monthly fixed charge that varies by meter size and a volumetric charge that varies by customer class and rate zone.[17] While a great majority of the Company's customers are now being billed under the same set of rates for metered service, the following water rate zones continue to have separate rate schedules:

[15] PAWC St. 10 at 31.
[16] Id.
[17] Supplement No. 45 to Tariff Water – PA PUC No. 5 (Redline); Supplement No. 47 to Tariff Wastewater – PA PUC No. 16 (Redline). PAWC St. 10 at 31.

Water Rate Zone 2 (Valley), Rate Zone 3 (SLIBSCO), Rate Zone 4 (Turbotville), and Rate Zone 5 (Steelton).[18]

For its wastewater rates, PAWC provides service under a variety of different rate schedules and for a variety of different rate zones – including 9 different Sanitary Sewer System rate zones and 3 different combined sewer system rate zones.[19] While PAWC operates Rate Zone 1 as a statewide rate zone for wastewater, the following wastewater rate zones continue to have separate rate schedules: Wastewater Rate Zone 2 (New Cumberland), Rate Zone 3 (Scranton), Rate Zone 4 (Kane), Rate Zone 5 (Valley) Rate Zone 6 (McKeesport), Rate Zone 7 (York), Rate Zone 8 (Foster), and Rate Zone 9 (Royersford).[20] Since the last rate proceeding, no new PAWC rate zones have been created.[21] However, upon completion of several planned acquisitions, PAWC plans to add two water rate zones and four additional wastewater rate zones.[22]

PAWC is also proposing, through the present proceeding, to reallocate a portion of its wastewater revenue requirements to its water service customers, citing Act 11 of 2012 to support this cross-service subsidization proposal.[23] Specifically, PAWC proposes a revenue requirement for wastewater of $263,574,897, and to recover $192,487,503 (or 73% of the total amount) of that revenue requirement from wastewater customers.[24]

While I will not take a position at this time related to the proposed Act 11 modifications, counsel for CAUSE-PA has advised me that, pursuant to 66 Pa. C.S. 1311(c), certain equity

[18] PAWC St. 10 at 31, 38.

[22] Id.
[23] PAWC St. 10 at 36.
[24] Id. at 46: 16-22.

considerations are inherent in PAWC's proposal to reallocate portions of its wastewater revenue requirements. I therefore reserve the right to respond to other parties' positions related to PAWC's Act 11 proposal, and to provide further analyses related to whether this proposal or any proposed modifications thereto is reasonable and in the public interest.

A. Winter Averaging Proposal

Q: Please summarize the Company's proposed winter averaging methodology.

A: PAWC is proposing to change its current methodology of determining volumetric components of wastewater customer bills – whereby volumetric charges are based on total metered usage – to a "winter averaging" methodology.[25] This method is alleged to be an attempt to separate metered water usage that is likely to go through wastewater systems from outdoor water usage – like landscaping and swimming pools - that is not passed through wastewater systems.[26] Under PAWC's proposed winter averaging method, a customer's wastewater bill in the winter averaging months (January-March) would be determined by actual metered water usage for the month.[27] In non-winter months, a customer's wastewater bill would be based on the lesser of actual metered water usage for the month or the average water consumption for that customer in the winter months.[28] For new customers or those without winter billing history, PAWC proposes to assume a standard usage level of 3,000 gallons/month for comparison purposes to billed non-winter usage.[29] PAWC, through its expert witness, acknowledges that the effect of winter averaging on

[25] Id. at 42: 19-23.
[26] Id. at 43.
[27] Id. at 43, 44: 3-6.
[28] Id. at 43.
[29] Id. at 44: 13-17.

wastewater volumetric rates is that rates would be slightly higher than they otherwise would have been for the same revenue requirement.[30]

Q: Do you have any concerns about the rate design proposals that you have described above?

A: Yes. I am concerned that PAWC's proposed winter averaging methodology improperly favors customers residing in single family homes with higher incomes. As proposed, the winter averaging methodology will benefit residential customers who use significant amounts of water in non-winter months over and above their winter average.[31] During non-winter months, outdoor water usage for activities such as landscape irrigation and swimming pools makes up a sizable share of residential water use.[32] Similarly, higher income families who have the sufficient funds to practice outdoor discretionary water usage during non-winter months will use more water compared to lower income families, and those who live in apartments or smaller properties.[33] As proposed, I am concerned that the winter averaging methodology improperly shifts the revenue burden from higher income customers who reside in single-family homes to customers with lower income, and those that live in apartments or smaller properties.

Q: Do you have any recommendations related to the rate design proposals that you have described above?

A: Yes. I recommend that the ALJ and the Commission reject PAWC's proposed winter averaging methodology. As discussed, PAWC's proposed winter averaging methodology

[30] Id. at 45: 3-10.
[31] OCA 16-1.
[32] NRDC, Water Affordability Advocacy Toolkit - Equitable Water Rates, at p. 97, available at, https://www.nrdc.org/sites/default/files/water-affordability-toolkit-section-9.pdf.
[33] Id.

improperly shifts the revenue burden from higher income customers who reside in single-family homes and have the luxury of discretionary water use to customers with lower income, and those that live in smaller homes. This is inequitable, unjust, and unreasonable. Lower income customers who cannot afford to engage in higher discretionary water use in non-winter months, and customers residing in smaller homes, should not be penalized for lower water use in non-winter months compared to their higher income counterparts. As such, PAWC's winter averaging proposal should be rejected in its entirety.

B. Revenue Decoupling Mechanism (RDM)

Q: Please describe PAWC's proposal to implement a Revenue Decoupling Mechanism.

A: PAWC is proposing to implement a Revenue Decoupling Mechanism (RDM) as an alternative rate mechanism pursuant to 66 Pa. C.S. § 1330.[34] PAWC cites concerns related to recovery of fixed costs, and argues that the RDM will provide a better opportunity to recover revenue requirements and account for any differences between revenue requirements and actual revenues.[35] PAWC indicates that the two primary factors of revenue volatility are seasonal weather conditions and the ongoing trend of declining usage across certain customer segments.[36] The Company's projections show that water service revenues, at proposed rates, are expected to decline by approximately $5.8 million/year.[37] Based on these projections, PAWC asserts that gaps in revenues will amount to an estimated $6.5 million/year for residential water service.[38]

[34] Volume I, Notice of Proposed Water and Wastewater Rate Changes.
[35] PAWC St. 10 at 87.
[36] Id.
[37] Id. at 98.
[38] Id. at 99.

The proposed RDM compares actual revenues collected under Commission-approved rates to revenue that would have been recovered pursuant to certain set rate designs on a forward-looking basis.[39] Differences in these amounts would either be credited to customers or collected from customers at a later time.[40] The proposed RDM would apply to both water and wastewater services.[41] Recoveries and credits under the proposed RDM would to apply to volumetric rates for each customer class.[42] The RDM will apply to all customers in the following classes: residential; commercial; industrial; municipal; and sales for resale classes, except for those customers with service under contract rates.[43]

PAWC argues that customers who practice conservation or install water-efficiency measures will still see corresponding bill reductions, though the Company appears to acknowledge through provided examples that the amount of achievable bill savings will be reduced by the RDM.[44] PAWC also argues several other customer benefits, including that the RDM would reduce the Company's throughput incentive – whereby the Company has a financial incentive to sell more water through volumetric customer use.[45]

Q: Do you have concerns related to the proposed RDM?

A: Yes. Counsel for CAUSE-PA has advised me that there are certain legal issues related to whether the RDM is proper pursuant to statute, regulation, and Commission policy that Counsel for CAUSE-PA reserves for briefing.

[39] Id. at 90.
[40] Id.
[41] Id. at 93-94.
[42] Id.
[43] Id. at 94.
[44] See PAWC St. 10 at 99-100.
[45] Id. at 102, 105-106.

I am concerned that the RDM, as proposed, unreasonably prejudices and disadvantages residential customers who practice conservation to lower their monthly bills. As discussed, the RDM is projected to account for revenue shortfalls in part because of continued reduction in customer usage. While PAWC argues that savings through conservation can outpace increases in monthly bills as a result of the RDM, it appears that the RDM will detract from savings that may be achieved through customers' conservation efforts. I am concerned that the proposed RDM improperly affects customer consumption and demand level so that customers are disincentivized to practice conservation. PAWC's customers should not be punished for practicing conservation by lowering their consumption levels. This is particularly problematic for low income customers who already face steep water/wastewater burdens. Low income customers have very little, if any, expendable income to invest in efficiency upgrades, and should not be penalized for any conservation they are able to achieve. It is unreasonable and inequitable to detract from conservation efforts and resulting bill savings by imposing an RDM over and above any rate increase ultimately granted through this proceeding.

I am also concerned that the proposed RDM does not contain appropriate consumer protections. As discussed, the proposed RDM is designed to apply to both water and wastewater services[46] – and to all customers in the residential, commercial, industrial, municipal, and sales for resale classes (except for those customers with service under contract rates) classes.[47] Low income customers will have to bear the additional costs of the RDM, if implemented, without any specified mitigation set forth in the RDM proposal. This only exacerbates any increases in unaffordability if PAWC is permitted to increase its base rates, or implement its additional ECIC proposal. The

[46] Id. at 93-94.
[47] Id. at 94.

RDM, as proposed, does not insulate low income customers from this additional and inequitable unaffordability. Instead, low income customers will be placed in greater risk of arrears and termination as a result of this increased unaffordability, jeopardizing their ability to access consistent and reliable services.

I am also concerned that the proposed RDM will not be understandable to individual residential customers, if implemented. The proposed RDM is a highly complex design and formula underpinned by rate design principles.[48] It is unclear what consumer education efforts PAWC intends to make, if any, related to the RDM, if approved. Without a plan and successful delivery of meaningful education, it is unclear whether customers will have the ability to dispute any portion of RDM charges.

Finally, as discussed below in the context of the proposed Environmental Compliance Investment Charge (ECIC), it is unclear to me whether implementation of the RDM will lessen the severity or frequency of rate increases submitted by the Company. As discussed by PAWC's expert witnesses, PAWC's justification for its instant rate increase proposal stems from various factors.[49] With these multiple alleged drivers for raising rates, it is unclear whether implementation of the RDM will ultimately reduce the level or pace at which PAWC's customer bills are raised.

Q: What is your recommendation related to the proposed RDM?

A: For the forgoing reasons, I recommend that the Commission reject the proposed RDM in its entirety. If the Commission ultimately approves PAWC to implement an RDM, I recommend that PAWC exempt Bill Discount Program (BDP) participants from RDM charges. As discussed,

[48] Supplement No. 45 to Tariff Water-PA P.U.C. No. 5 Seventh Revised Page 40.
[49] PAWC St. 1 at 7-8.

it is imperative that low income customers are insulated from additional rate unaffordability that would result if an RDM were implemented so that they can realize bill savings achieved through assistance programming and conservation efforts.

C. ***Environmental Compliance Investment Charge (ECIC) Proposal***

Q: Please summarize PAWC's Environmental Compliance Investment Charge (ECIC).

A: In addition to an RDM, PAWC is also proposing to implement an Environmental Compliance Investment Charge (ECIC) as an alternative rate mechanism pursuant to 66 Pa. C.S. § 1330.[50] PAWC alleges its proposed ECIC is designed to reflect and recover capital costs and expenses related to compliance with federal and state environmental mandates between rate proceedings.[51] Specifically, PAWC cites to several new and adjusted requirements related to acceptable limits of polyfluoroalkyl substances (PFAS).[52] PAWC expert witness Ashley Everette argues that that proposed ECIC would provide a mechanism for adjusting PAWC's rates to comply with new environmental mandates while mitigating exposure to less frequent but more significant general base rate increases by producing smaller increases to customer bills.[53]

PAWC proposes that recoverable costs under the ECIC would be consistent with set projects and activities approved by the Commission through an annual environmental compliance plan.[54] PAWC proposes a process for plan submission that would include the filing of answers and comments, but no ability to conduct discovery or otherwise assess the prudency of PAWC's compliance plan or the reasonableness and justness of the expenditures necessitated by the plan.[55]

[50] Volume I, Notice of Proposed Water and Wastewater Rate Changes.
[51] PAWC St. 1 at 26.
[52] PAWC St. 8 at 24.
[53] PAWC St. 1 at 27.
[54] Id. at 26.
[55] PAWC St. 8 at 25-26.

PAWC proposes to apply the ECIC "equally" to all customer classes.[56] However, until PAWC files its proposed ECIC plan, most details about how PAWC will allocate its ECIC remain unclear – including whether application of PAWC's ECIC will be *equitable*. PAWC's ECIC proposal does provide that, for low income residential customers enrolled in PAWC's Bill Discount Program (BDP), PAWC intends to apply the ECIC *after* the BDP rate discount has been applied to the bill.[57] In other words, the BDP rate discount would be applied to all base charges (service charge per month and consumption charge) before the ECIC is calculated.[58] PAWC argues that this will result in a reduced ECIC charge for BDP participants.[59]

Q: Do you have any concerns about PAWC's proposed ECIC?

A: Yes. I am concerned that the proposed ECIC would improperly increase PAWC's customers rates outside of the context of base rates approved through this proceeding. Environmental remediation costs are part of PAWC's cost of doing business and should be included for consideration and analysis within base rate proceedings.

I am also concerned that the ECIC will improperly and unjustly shift the burden of mitigating PFAS and meeting other environmental standards to low income customers and their communities. While PAWC's proposal to apply the ECIC for BDP participants after application of the bill discount will modestly reduce the cost impact to low income customers enrolled in the program, its proposal nevertheless falls woefully short of remediating the negative financial impacts on the vast majority of non-BDP participating low income households across PAWC's

[56] PAWC St. 8 at 29. CAUSE-PA III-29.
[57] OCA 11-21.
[58] Id.
[59] Id.

service territory – as well as those enrolled in the BDP, who would still shoulder a significant additional fee.

The design of rate recovery for environmental mitigation should account for broad disparities and impacts that low income communities have experienced from exposures to environmental toxins. Low income communities are disproportionately impacted by PFAS contaminant. Low income communities and communities of color disproportionately live near PFAS contamination sites due to historical racial discrimination in housing and occupational sectors, and inequitable enforcement of environmental regulations that concentrates sources of PFAS pollution within close proximity of these communities.[60]

In 2019, the Center for Science Democracy observed that low income households and people of color had high prevalence of living within a five (5) mile radius of contaminated sites.[61] While PFAS contamination does not remain within five (5) miles of a site, households will face higher PFAS concentrations the closer they are located to the primary source - usually an industrial site, mining or other fossil fuel extraction, or a military base where firefighting foam is used with some frequency. Low income communities and communities of color therefore find themselves subject to disproportionate PFAS levels compared to other communities and suffer the costliest

Jha G, Kankarla V, McLennon E, Pal S, Sihi D, Dari B, Diaz D, Nocco M., Per- and Polyfluoroalkyl Substances (PFAS) in Integrated Crop-Livestock Systems: Environmental Exposure and Human Health Risks, Int J Environ Res Public Health (2021 Nov 28),18(23):12550. doi: 10.3390/ijerph182312550. PMID: 34886275; PMCID: PMC8657007, available at: https://www.ncbi.nlm.nih.gov/pmc/articles/PMC8657007/#B154-ijerph-18-12550; Harvard T.H. Chan School of Public Health, Communities of color disproportionately exposed to PFAS pollution in drinking water, (May 15, 2023), available at: https://www.hsph.harvard.edu/news/press-releases/communities-of-color-disproportionately-exposed-to-pfas-pollution-in-drinking-water/.

health consequences as result of these contaminants. They should not, at the same time, shoulder disproportionate and/or unaffordable financial burden for remediation through their water and wastewater bills. As discussed throughout, PAWC's low income customers and their households already face disproportionately high water/wastewater burdens. On top of this existing unaffordability, PAWC proposes to raise base rates and require these households to devote additional funds through its proposed ECIC. PAWC's low income customers should not have to make the untenable choice between accessing safe drinking water and being able to afford basic water/wastewater services. If the ECIC is approved, it would be the sanctioned equivalent of "adding insult to injury." Instead, it is imperative that low income customers who have already been most impacted by PFAS contamination are not further negatively impacted.

Q: What is your recommendation related to the proposed ECIC?

A: Counsel for CAUSE-PA has advised me that there are certain legal issues related to whether the proposed ECIC is ultimately proper under Commission regulation and policy that Counsel for CAUSE-PA reserves for briefing.

Based on the concerns outlined above, I recommend that the ECIC is rejected in its entirety.

Ultimately, in order to holistically alleviate PFAS contamination and its significant impacts on the health and wellbeing of communities, I believe the responsibility for PFAS mitigation should rest with the source – chemical manufacturers; paint, paper, plastics, electrical components, textiles, leather tanning, metal finishing, electroplating companies; and any other designated site that discharges PFAS.[62] Residential customers – especially low income customers – already bear

[62] Environmental Health News, available at: https://www.ehn.org/what-are-pfas-2656619391/what-can-you-do-to-avoid-pfas, describes industries listed in the proposed Clean Water Standards for PFAS Act.

the harsh consequences of PFAS contamination caused by these commercial and industrial uses, and it is inequitable, unjust, and unreasonable to shift the financial burden of PFAS mitigation and compliance to residential customers.

If PAWC is permitted to implement an ECIC, I recommend that BDP participants are exempt from ECIC charges. As discussed, low income customers and their communities have suffered disproportionate environmental and health impacts as a result of PFAS contamination, and other environmental inequities. Low income households should not be penalized again through imposition of an ECIC that further exacerbates unaffordability of their basic water/wastewater services at both present and proposed rates.

IV. LOW INCOME CONSUMERS IN PAWC SERVICE TERRITORY

Q: How many low income customers reside in PAWC's service territory?

A: That is a difficult question to answer with specificity, especially in light of the last several years during which the pandemic and related financial pressures – including rapid inflation in the cost of basic goods and services – not only fell disproportionately on low income families and other uniquely vulnerable households, but also negatively affected working families on the margin. Nevertheless, there are a number of metrics to assess poverty levels in PAWC's service territory and, in turn, the likely impact of PAWC's proposed rate increase. Based on these metrics, there are likely well over 100,000 low income households that receive water and wastewater services from PAWC.

Pennsylvania's large public utilities track and classify their low income customer populations in two ways – estimated low income customers and confirmed low income.[63] A household must have income at or below 150% of the federal poverty level (FPL) to be considered low income.[64] PAWC defines confirmed low income customers to mean a customer for which the Company has received income information indicating that the customer has an annual income at or below 150% FPL.[65] PAWC identifies confirmed low income customers through (1) weekly reports of BDP enrollment; (2) LIHWAP grant remittance lists (though the program has been closed to new applicants since August 2023, with no certain pathway to reopen[66]); (3) its Ability to Pay (ATP) process[67]; and (4) through information provided to the Commission related to informal complaints and Commission-issued payment arrangement requests.[68] As of December 2023 (the most recent data provided), PAWC indicates that it has 64,803 confirmed low income customers.[69]

When asked through discovery to identify its "estimated low income customer count," PAWC points to analysis of its expert witness, Charles B. Rea, estimating the number of customers served by household income in PAWC's service territory, as provided in Exhibits CBR-1 and CBR-2.[70] While it does appear that a portion of the CBR-1 (water) calculates customers in owned and rented units under 150% as 109,463 and CBR-2 (wastewater) calculates customers in owned and rented units under 150% as 12,916 – for a total of 122,379 for water and wastewater customers,

[63] See Pa. PUC, BCS, 2022 Report on Universal Service Programs & Collections Performance, at 3,4 (Sep. 2023).
[64] 52 Pa. Code § 54.72.
[65] CAUSE-PA I-4.

[67] CAUSE-PA I-4.
[68] CAUSE-PA I-5.
[69] CAUSE-PA I-3, Attachment.
[70] CAUSE-PA I-6.

it is unclear whether these figures were derived from U.S. census data, or from other sources. Previously, in its 2022 rate proceeding, PAWC estimated that it had approximately 100,000 low income water customers and 14,343 wastewater customers according to data from the U.S. Census Bureau.[71] PAWC has therefore indicated that, in the past year, its estimated number of low income customers increased by 8,036. While I do not question the conclusion of an increase in the past year, I am unable to rely on PAWC numbers. As the sources of the calculations provided in CBR-1 and CBR-2 are unclear, I will instead rely on 114,343 as the estimated count for low income customers. As discussed below, it appears that PAWC's estimated low income count requires further adjustment and clarification. However, the census-based estimates provided in the 2022 rate proceeding likely provide the most accurate available accounting of PAWC's low income customers.

As discussed in detail below, I recommend that PAWC improve its screening and tracking of its low income customers, including through updating its estimated low income customer count to more appropriately assess estimated needs across its service territory. However, regardless of the measure, there are a substantial number of low income customers in PAWC's service territory who need to be considered in any decision regarding just, reasonable, and affordable rates.

Q: How much income must a household earn each month to be considered low income?

A: The Commission considers a "low income" customer to be any customer whose income is at or below 150% of the federal poverty level (FPL).[72] The FPL is a measure of poverty based exclusively on the size of the household, but not the household composition (i.e., whether the

[71] 2022 PAWC Rate Proceeding, Pa. PUC v. PAWC, Docket Nos. R-2022-3031672, et. al, CAUSE-PA St.1 (Geller), p. 11, fn 19 (Direct Testimony Dated July 29, 2022).
[72] See 52 Pa. Code §§ 54.72, 62.2.

household consists of adults or children) or geographic location. The Table below provides a breakdown of the maximum income threshold for various income tiers under the Federal Poverty Guidelines:

Table 3: 2024 Annual Income by FPL and Household Size[73]

Household/ Family Size	50%	100%	150%	200%
1	7,530	15,060	22,590	30,120
2	10,220	20,440	30,660	40,880
3	12,910	25,820	38,730	51,640
4	15,600	31,200	46,800	62,400
5	18,290	36,580	54,870	73,160

As the above Table shows, a family of four with household income at or below 150% FPL has a maximum gross annual income of $46,800 ($3,900 per month) – while a family of four with income at or below 50% FPL has a maximum gross annual income of just $15,600 ($1,300 per month).[74] For comparison, a full time (40 hour/week) Pennsylvania worker making minimum wage ($7.25/hour) has a gross annual income of $15,080, assuming no time off. These income levels are much less than a household needs to meet their basic expenses in any of the counties in PAWC's expansive service territory.[75]

The Self Sufficiency Standard is a benchmark often used to assess how much income a household needs to live without assistance in Pennsylvania. This tool measures the income that a family must earn to meet their basic needs and consists of the combined cost of 6 basic needs –

[73] US Dept. of Health & Human Services, HHS Poverty Guidelines for 2024, available at: https://aspe.hhs.gov/topics/poverty-economic-mobility/poverty-guidelines.
[74] See US Dept. of Health & Human Services, HHS Poverty Guidelines for 2024, available at: https://aspe.hhs.gov/topics/poverty-economic-mobility/poverty-guidelines.
[75] Self Sufficiency Standard, http://www.selfsufficiencystandard.org/Pennsylvania.

housing, child care, food, health care, transportation, and taxes – without the help of public subsidies.[76] Unlike the federal poverty level, which does not change based on geographic location or family composition, the Self Sufficiency Standard accounts for the varied costs of these six basic needs in different geographical areas and for differently aged household members.[77] In 2021 (the last year of the datasets provided under the Self-Sufficiency Standard), the Self Sufficiency Standard for a family of four in Pennsylvania -- consisting of 2 adults, 1 school age child, and 1 preschooler – ranges across PAWC's service territory from a low of $52,666 in McKean County to a high of $84,976 in Chester County. [78]

PAWC's identified low income customers and H2O participants do not have income that is even close to either of these figures. The average annual household income for the Company's currently identified H2O participants is just $19,585.47,[79] while the average annual income of confirmed low income customers is only $9,247.20.[80]

Q: What is the income threshold for PAWC's residential customers to receive assistance?

A: PAWC's Help to Others (H2O) Bill Discount Program (BDP) is currently available to customers at or below 150% FPL, while its H2O hardship grants are available to customers at or below 200% FPL.[81]

V. ANALYSIS OF RATE AFFORDABILITY, LOW INCOME HOUSEHOLDS

Q: How is water and wastewater affordability measured?

A: The accepted metric used to determine the affordability of utility service is referred to as the household's utility bill burden - meaning the percentage of household income required to cover the cost of the bill.[82] In the context of water and wastewater affordability, the household utility bill burden is referred to as the household water and wastewater burden. While Pennsylvania has not adopted statewide water and wastewater burden standards, it is generally accepted that the combined cost for water and wastewater service should not exceed 4% of household income.[83] As I will explain in more detail below, PAWC's proposed rates exceed these levels of affordability for many customers, especially those at the lowest levels of income. It is therefore critical that PAWC take necessary steps to address this affordability gap. I will discuss recommended improvements to its low income programing later in my testimony.

Q: What are the current water and wastewater burdens for PAWC's low income customers?

A: Even at current rates, PAWC's lowest income customers are subject to excessive and unaffordable water and wastewater burdens. CAUSE-PA Exhibit 1, attached to my testimony, provides a snapshot of the applicable water and wastewater burdens for low income customers,

[82] Roger Colton, The Affordability of Water and Wastewater Service in Twelve U.S. Cities: A Social, Business and Environmental Concern, The Guardian, (May 2020), available at: https://www.theguardian.com/environment/2020/jun/23/full-report-read-in-depth-water-poverty-investigation.

[83] NRDC, Water Affordability Toolkit: Affordability and Assistance Programs, at 73, available at: https://www.nrdc.org/sites/default/files/water-affordability-toolkit-section-8.pdf; Roger Colton, The Affordability of Water and Wastewater Service in Twelve US Cities, The Guardian (May 2020), available at: https://www.theguardian.com/environment/2020/jun/23/full-report-read-in-depth-water-poverty-investigation; NAACP Legal Defense and Educational Fund, Inc., Water/Color: A Study of Race & The Water Affordability Crisis in America's Cities (2019), available at: https://www.naacpldf.org/wp-content/uploads/Water_Report_FULL_5_31_19_FINAL_OPT.pdf.

both at present and proposed rates in Water Rate Zone 1 and Wastewater Rate Zone 1. CAUSE-PA Exhibit 1 breaks down the relative water and wastewater burden for households at different income and usage levels. For example, at current rates in Rate Zone 1, a four-person household at 50% FPL using 4,000 gallons of water each month has a combined water and wastewater burden of 16%. If PAWC's rate increase proposal is approved, this same household will face a combined water and wastewater burden of 17%. Low income customers devote large portions of their incomes each month to afford basic water/wastewater services – leaving insufficient funds to pay for housing, energy, food, medicine, childcare, and other basic needs.

As discussed more fully below, these excessive water/wastewater burdens pose significant obstacles for low income families to afford their monthly bills and stay connected to essential and life-sustaining water and wastewater services in their homes – creating a cascade of consequences to the health, safety, and stability of Pennsylvania's economically vulnerable families.

Q: In addition to high water and wastewater burdens, is there other evidence that PAWC's low income customers already struggle to afford water and wastewater services at existing rates – even before any rate increase is approved?

A: Yes. In addition to facing demonstrably unaffordable water and wastewater burdens, PAWC's low income customers also carry a disproportionate amount of residential customer debt and are far more likely than general residential customers to have their service involuntarily terminated for nonpayment. These indicators demonstrate that PAWC's low income customers already struggle to afford water/wastewater services under existing rates. If PAWC's proposed rate increase is approved, low income consumers will likely experience even greater rates of payment trouble and involuntary termination, ultimately increasing the risk of consequences to the

health and safety of low income customers and the corresponding level of uncollectible expenses recovered from other ratepayers.

First, PAWC's confirmed low income customers have markedly higher rates of termination for nonpayment compared to residential customers as a whole:

Table 4: Involuntary Terminations for Nonpayment (Confirmed Low Income (CLI) v. Residential Customers) (2020-2023)[84]

	Res.	Res. Term.	Res. Term. Rate	CLI	CLI Term.	CLI Term. Rate.
2020	632,429	2,261	0.36%	62,888	1,304	2.07%
2021	637,269	20,426	3.21%	65,548	12,202	18.62%
2022	653,016	23,185	3.55%	69,495	14,562	20.95%
2023 (thru Nov.)	655,959	15,156	2.31%	71,352	9,658	13.54%

In 2023, the termination rate amongst confirmed low income customers was more than *six times higher* than the termination rate for residential customers as a whole. This disparity in termination rates for low income customers, as Table 4 illustrates, underscores the vital need to address rate affordability to ensure all Pennsylvanians can afford to maintain running water in their home.

PAWC's confirmed low income customers also carry substantially higher level of arrears compared to residential customers as a whole:

Table 5: Average Arrearage: Residential, Confirmed Low Income, H2O (2020-2023)[85]

	All Res.	CLI	H2O
Dec. 2020	$305.20	$572.27	$617.06
Dec. 2021	$256.46	$497.65	$553.02
Dec. 2022	$185.02	$316.89	$310.49
Nov. 2023	$186.94	$262.18	$252.29

[84] CAUSE-PA I-22, Attachment; CAUSE-PA I-24, Attachment; CAUSE-PA I-2, Attachment; CAUSE-PA I-3, Attachment.
[85] CAUSE-PA I-28, Attachment.

In November 2023 (the last reported month), confirmed low income customers carried an average arrearage level of $262.18, and H2O program participants carried an average arrearage level of $252.29. By comparison, residential customers as a whole (inclusive of low income customers) carried an average arrearage level of $186.94. These disproportionate arrearage levels further underscore the existing hardship that PAWC's confirmed low income and H2O customers face to afford basic water/wastewater services – even before any rate increase is approved.

I am advised by counsel that, on December 7, 2023, the Commission approved a Settlement related to PAWC's Petition for approval for an Arrearage Management Program (AMP).[86] I understand that CAUSE-PA was a party to the approved Settlement, which requires PAWC to implement an AMP for its low income customers. I am highly supportive of comprehensive AMPs, as they are an integral component to an effective low income assistance program design. Nevertheless, PAWC's approved AMP has yet to be implemented. Meanwhile, low income customers continue to accrue disproportionately high levels of arrears – without the availability of comprehensive debt management programming. If PAWC's rates increase even further, these debt levels will increase at even greater rates and may weaken the effectiveness of PAWC's recently-approved AMP before the program is even launched. It is essential that the underlying unaffordability of PAWC's rates is addressed in a comprehensive manner to prevent the unreasonable accrual of arrears, and to help low income customers to reasonably afford their monthly payments.

Q: Above, you explained that PAWC's low income customers face unaffordable water and wastewater burdens at <u>existing</u> rates. What would the applicable water and wastewater burdens be for low income customers at PAWC's <u>proposed</u> rates?

[86] Petition of Pennsylvania-American Water Company for Approval of an Arrearage Management Plan, <u>Order</u>, Docket No. P-2021-3028195 (Order, Dec. 7, 2023).

A: PAWC's proposed rate increases would exacerbate existing levels of unaffordability for PAWC's low income customers. The impact of the proposed increase on low income water and wastewater rates varies not only between rate zone and across income levels, but also according to customer usage. In addition to showing residential water and wastewater burdens at existing rates, CAUSE-PA Exhibit 1 also provides a snapshot of residential water and wastewater burdens at proposed rates for Rate Zone 1 Water and Rate Zone 1 Wastewater – broken down by income tier and at various usage levels, ranging from 2,000 to 5,000 gallons. As shown by CAUSE-PA Exhibit 1, low income customers will face exorbitant combined water/wastewater burdens at proposed rates. For example, at proposed rates, a family of three at 50% FPL using 4,000 gallons/month would have a combined water/wastewater burden of 21%, and a family of four at 50% FPL using 4,000 gallons/per month would have a combined water/wastewater burden of 17%.

The varied rate impacts by usage levels detailed in CAUSE-PA Exhibit 1 are particularly important in the context of examining rate impact for low income households, as low income households are more likely to live in aging housing stock with leaky pipes and fixtures, and are less able to afford repairs and efficiency upgrades to control usage levels.[87] Overall, the detailed water and wastewater burden charts in CAUSE-PA Exhibit 1 reveal the significant water/wastewater burdens that many low income customers will bear at proposed rates.

Q: How would PAWC's proposed rate increase impact vulnerable households?

A: As I noted above, the substantial rate increase proposed by PAWC is likely to cause increased terminations of economically vulnerable consumers or, in the alternative, will cause economically vulnerable households to go without other critical life necessities such as housing,

[87] See US Dep't of Health, Office of Disease Prevention & Health Promotion, Social Determinants of Health: Quality of Housing (2020), available at: https://health.gov/healthypeople/priority-areas/social-determinants-health/literature-summaries/quality-housing.

energy, food, medicine, childcare, and other essential services to afford water and wastewater services to their home.

Water terminations pose a serious threat to public health and human dignity. Without access to running water, families are unable to cook, bathe, clean, or flush the toilet.[88] Access to water service is tied directly to the health and well-being of the household, and the habitability of the home.[89] Water terminations are akin to eviction from a home, as the home may be deemed uninhabitable or even condemned following termination of water service, forcing families to vacate with little to no notice.[90] Termination of service to the home can also jeopardize a parent's custody of their children, can result in the loss of housing assistance, and is often cited as a catalyst for homelessness.[91] Even before COVID-19 and recent historically high levels of inflation, approximately one-third of households experienced income volatility.[92] Analysis of material hardship for low and moderate income consumers experiencing income volatility found much higher rates of inability to afford bills, medical care, housing payments and food,[93] and a higher

likelihood to resort to expensive payday loans to pay for basic living expenses.[94] Even at PAWC's current rates, many families already must make difficult choices between paying for utility services and other basic necessities – raising rates for such consumers will make their ability to afford and/or obtain and retain such necessities more difficult.

Q: Are low income customers enrolled in PAWC's Bill Discount Program (BDP) protected from the financial impact of the proposed rate increase?

A: PAWC's BDP will reduce (though not eliminate) the financial impact of PAWC's proposed rate increases for BDP participants. Unlike a Percentage of Income Program, which ties rates directly to each participant's household income, PAWC's BDP is designed as a tiered rate discount program which provides an aggregated group of participants a percentage discount on rates. When rates increase, without a corresponding increase in the BDP discount, the resulting BDP charges necessarily increase. The effectiveness of PAWC's BDP at offsetting the impact of an approved rate increase is dependent on approval of robust enhancements to the structure and discounts provided under the BDP, and the ability of customers to enroll.

As it stands, PAWC's BDP enrollment remains very low – reaching just 25% of PAWC's estimated low income customers and 40% of PAWC's confirmed low income customers (those *already known* by the Company to be income eligible for BDP) as of November 2023. [95] Low income customers that are not enrolled in the BDP will shoulder the full, unmitigated financial burden of the rate increase – compounding existing high levels of rate unaffordability.

[95] CAUSE-PA I-3, Attachment. CAUSE-PA I-11, Attachment.

Q: What is your overarching conclusion about the impact of PAWC's proposed rate increase on low income water and wastewater customers?

A: PAWC's current rates are already unaffordable for its low income customers, especially for those at the lowest end of the poverty scale (at or below 50% FPL) and those with higher usage and/or larger family sizes. Increasing rates at the rapid pace proposed by PAWC will not only push rates further out of reach of customers who currently cannot afford service, it will also push service out of reach for many customers who already struggle to make ends meet.

VI. PAWC'S AFFORDABILITY ANALYSES

Q: Has PAWC conducted any analysis of the affordability of its rates for residential customers?

A: Yes. However, PAWC's analysis is flawed, especially regarding its low income customers. In his direct testimony, PAWC expert witness Charles Rea explained that PAWC conducted two types of affordability analyses for its water and wastewater services.[96] First, an Enterprise-Level analysis considered affordability of service at high level over a muti-year period.[97] This analysis was a historical comparison of average monthly bills of PAWC residential customers, based on household income.[98] The metric used in this analysis was called a Bill-to-Income (BTI) Ratio – defined as annual water bills divided by estimated annual income.[99] This analysis looked at average residential monthly bills for all customers over time, compared to the median household

[96] PAWC St. 10 at 5.
[97] Id.
[98] Id. at 6: 1-9.
[99] Id.

income (MHI) for residential customers.[100] The Enterprise-Level Analysis also allegedly examined customer bills, rates, and household income over time.[101]

In his direct testimony, Mr. Rea described the results of PAWC's Enterprise-Level Analysis. According to Mr. Rea, the BTI ratios for water service for PAWC have allegedly held steady from 2012 through 2023 between 0.8%-1.0% of MHI.[102] Mr. Rea similarly alleged that the monthly bills for PAWC wastewater services between 2012 and 2022 have held steady between 0.9% and 1.2% for MHI and rose to 1.55% in 2023.[103]

Second, PAWC's Community-Level analysis allegedly considered affordability at the individual customer level under current and proposed rates, and current economic conditions.[104] PAWC's Community-Level analysis allegedly considered a number of factors impacting the ability of a household to access "basic water service" at current and proposed rates.[105] Basic water service, as used in this analysis, is "a water usage level that reflects the level of water consumption for basic human services" – which PAWC sets at 40 gallons per household member per day.[106] Despite the assertion that their analysis is reliant on a metric that varies by household size, PAWC's analysis then goes on to apply a static usage threshold of 3,000 gallons/month or less..[107] If PAWC's analysis were utilizing a 40 gallon/household member threshold for basic service as claimed, usage would be closer to 5,000 (4,960) gallons/month for a family of 4.

According to Mr. Rea, 71% of PAWC residential water customers and 65% of PAWC residential wastewater customers can expect bills for basic water and wastewater service to be less

[100] Id.
[101] Id. at 6: 10-20.
[102] Id. at 7: 8-17.
[103] PAWC St. 10 at 9.
[104] Id. at 5, 11: 7-17, CBR-1; CBR-2.
[105] PAWC St. 10 at 12-13.
[106] Id. at 13: 12-14: 5.
[107] Id. at 14: 15-21.

than 4% of their household income, combined.[108] Approximately 176,900 (29%) of water customers and 38,400 (35%) of wastewater customers will face combined water and wastewater burdens exceeding 4%.[109] In other words, based on PAWC's own analysis, roughly one-third of its residential customers will receive rates that exceed widely accepted water and wastewater affordability standards.

Mr. Rea also provides the Affordability Index (the percent of customers for whom basic water service is expected to be less than 2% of annual household income) for customers by various income brackets.[110] Mr. Rea describes how the following percent of the lowest tiered households meet the affordability index threshold:

Table 6 (partially reproduced): PAWC Affordability Index[111]

	Water Affordability Index	**Wastewater Affordability Index**
$0k - $5k	0%	0%
$5k - $10k	0%	0%
$10k - $15k	0%	1%
$15k - $20k	0%	5%
$20k - $25k	0%	14%

As this Table shows, Mr. Rea's Affordability Index assessment reveals that the Affordability index for customers between $0-$10,000 household annual income is 0%. While the Affordability Index for wastewater for customers between $10,000-$25,000 household annual income is slightly higher, the water Affordability Index for these customers remains at 0%. As this assessment reveals, the affordability of PAWC's rates is extremely low for customers with the lowest incomes, who experience the most profound need.

[108] Id. at 16-17.
[109] Id. at 17: 1-6.
[110] Id. at 20: Table 1.
[111] Id.

As a whole, Mr. Rea concludes that (1) affordability of PAWC's water/wastewater service from 2012 through the forecast test period indicates that PAWC has managed its systems for long-term customer benefits; (2) PAWC's water/wastewater services has been – and is projected to continue to be – affordable for the majority of residential customers; and (3) there are groups of customers for whom affordability of service remains a challenge.[112]

Q: Do you have any concerns about this needs assessment?

A: Yes, very much so. I disagree strongly with Mr. Rea's methodology and conclusions related to the Enterprise-Level and Community-Level Analyses (collectively, affordability analyses).

First, Mr. Rea's affordability analyses rely heavily on the use of MHI, which relies on the median income of all households. MHI is not an appropriate standard for which to assess affordability for all customers. By definition, half of all households have income at or below the median. Low income families have significantly lower incomes than MHI. PAWC's reliance on MHI masks the extreme levels of unaffordability experienced by the lowest income households.

While I acknowledge that the Community-Level Analysis attempts to conduct an analysis of individualized water and wastewater burdens, I am concerned the metrics applied in PAWC's Affordability Index conceal the true depth and breadth of need amongst PAWC's low income customers. For example, PAWC's analysis indicates that 0% of water customers and 20% of wastewater customers with household income between $0-$25K meet PAWC's Affordability Index, but it does not quantify the number of households facing acute unaffordability or the level of unaffordability experienced by each household. These non-quantified metrics are key to assessing both the depth and breadth of unaffordability.

[112] PAWC St. 10 at 22: 8-19.

I note here that, even with PAWC's flawed Community-Level Analysis masking the true extent of PAWC's affordability gap, Mr. Rea concludes that roughly one-third of PAWC's customers will receive bills that exceed broadly accepted affordability standards. He inexplicably declares that this identified affordability gap is acceptable, and that PAWC's rates are affordable. I strongly disagree.

As discussed above and illustrated in CAUSE-PA Exhibit 1, the water and wastewater burden levels and the relative depth and breadth of unaffordability for PAWC's low income customers are excessive at both existing and proposed rates, particularly when different usage levels are factored into the analysis. Mr. Rea's conclusion that the majority of PAWC customers have and will continue to have affordable water/wastewater service improperly ignores the critical affordability challenges of PAWC's low income customers. It is neither just, reasonable, nor in the public interest to obscure the underlying affordability for PAWC's low income customers – as PAWC's affordability analyses appear to do. It is essential that the needs of low income customers for greatly improved affordability are reasonably and specifically considered and addressed.

Mr. Rea's definition of basic water service also fails to properly account for varied usage levels of PAWC's low income customers. As illustrated by the Tables below, the *average* usage rate for confirmed low income customers regularly exceeds the 3,000 gallon/mo. usage rate for "basic water service" in PAWC's affordability analyses:

Table 7: Mean Usage by Customer Segment - Water only[113]

Year-Month	All residential customers	Confirmed low income customers	H2O participants
Dec. 2020	3,507	4,036	3,861
Dec. 2021	3,493	3,991	3,835
Dec. 2022	3,385	3,911	3,889
Nov. 2023 (last reported date)	3,262	3,759	3,776

[113] CAUSE-PA I-30, Attachment.

Table 8: Mean Usage by Customer Segment - Wastewater only[114]

Year-Month	All residential customers	Confirmed low income customers	H2O participants
Dec. 2020	3,603	4,456	4,326
Dec. 2021	3,534	4,353	4,054
Dec. 2022	4,037	4,342	4,339
Nov. 2023 (last reported date)	3,163	3,823	3,702

Table 9: Mean Usage by Customer Segment - Combined[115]

Year-Month	All residential customers	Confirmed low income customers	H2O participants
Dec. 2020	3,442	4,000	3,977
Dec. 2021	3,534	4,077	4,201
Dec. 2022	3,344	3,948	4,070
Nov. 2023 (last reported date)	3,179	3,764	4,162

Even on an average basis, low income customer usage rates far exceed the 3,000 gallon usage rate PAWC utilizes in its analysis. In reality, many low income customers have far greater usage, either because they have a larger family or system inefficiencies. PAWC's definition of basic water service is improperly restrictive and not reflective of actual usage rates amongst residential customers. PAWC's definition of basic water services does not account for variations in household size and, in turn, consumption. PAWC's definition also fails to account for households with higher usage resulting from inefficiencies or leaks in their systems. This is particularly concerning for low income families who may not be able to afford repairs and upgrades to remediate these conditions, and stem higher usage levels. It is imperative that an affordability analysis of PAWC's customers account for these realities.

[114] Id.
[115] Id.

I also firmly contest Mr. Rea's proposition that PAWC's rates have remained consistently low over time. CAUSE-PA was a party to PAWC's rate proceedings in 2020 and 2022. During these proceedings, numerous experts (myself included) described in extensive detail how PAWC's rate proposals – and subsequent rate increases – have come in quick succession over the last several years. In 2020, PAWC was approved to increase rates by $70.5 million (inclusive of a $10.5 million rate EADIT credit).[116] In 2022, the Commission approved a rate increase of $138 million.[117] These rate increases have represented fast-paced surges in the costs of life-sustaining services, without any corresponding increase in incomes to accommodate these increases. Contrary to Mr. Rea's position, PAWC's rate unaffordability has increased both in depth and breadth in recent years, causing significant hardship for low income customers.

VII. PAWC LOW INCOME ASSISTANCE PROGRAMS

Q: Please summarize PAWC's current low income assistance programs.

A: PAWC offers customer assistance through its Help to Others (H2O) programs, which are administered by the Dollar Energy Fund (DEF).[118] Through its H2O programs, PAWC currently offers three forms of assistance to low income customers: (1) grant assistance of up to $500 per year for customers with temporary hardship, conditional on the availability of funds; (2) monthly bill discounts (through the Bill Discount Program – or BDP) for water and wastewater services; and (3) usage reduction assistance through the availability of water-saving devices and education available to BDP customers.[119] To qualify for a hardship grant, a customer's total household

[116] Pa. PUC v. PAWC, Opinion and Order, Pa. PUC v. PAWC, Docket Nos. R-2020-3019369, et al. (Opinion and Order, Feb. 25, 2021).
[117] Pa. PUC v. PAWC, Order, Docket Nos. R-2022-3031672, et al. (Order, Dec. 8, 2022). See also, Joint Statement of Chairman DeFrank and Commissioner Yanora (Dec. 21, 2023).
[118] CAUSE-PA I-7, Attachment.
[119] Id. OCA 11-18, E.

income must be at or below 200% FPL.[120] To qualify for the BDP, a customer must have income at or below 150% FPL.[121] PAWC's Petition to implement an Arrearage Management Plan (AMP) was approved by the Commission on December 7, 2023, and as a result, it is anticipated that PAWC will implement an AMP within 12 months of the date of the Commission's Order.[122]

A. H2O Bill Discount Program

Q: Is PAWC's BDP producing an affordable bill for program participants?

A: No. As currently structured, PAWC's BDP includes the following tiered discount structure for water and wastewater customers:

Table 10: Existing BDP Discounts[123]

Eligible Customers	Water Service Charge Discount	Water Volumetric Discount	Wastewater Total Bill Discount
0-50% FPL	80%	80%	80%
51-100% FPL	65%	50%	55%
101-150% FPL	40%	25%	30%

As illustrated in CAUSE-PA Exhibit 1, the existing BDP discount rates do not produce consistent levels of affordability – especially for BDP participants with the lowest income and the highest usage. Analysis provided by PAWC similarly shows that average bills for BDP customers continue to be high. For example, PAWC reports the following ranges for average bills for BDP

[120] CAUSE-PA I-7, Attachment.
[121] Id.
[122] Petition of Pennsylvania-American Water Company for Approval of an Arrearage Management Plan, Docket No. P-2021-3028195 (Further Amended AMP Settlement at ¶ 45; Order Dec. 7, 2023).
[123] PAWC St. 10 at 23: 9-10.

participants between October 2022 and November 2023, assuming usage between 4,000 and 5,000 gallons:

Table 11: Average BDP Bill Ranges, 4,000-5,000 gal./month (Oct. 2022-Nov. 2023)[124]

	Average BDP Bill Ranges
0-50% FPL	$29.45 to $74.96
51-100% FPL	$55.55 to $71.66
101-150%	$66.46 to $87.24
Unknown FPIG	$69.80 to $91.86

As Table 11 illustrates, average bills of BDP participants span a considerable range – and reached an averaged high of $91.86 between October 2022 and November 2023. These figures represent average monthly bills, so many H2O participants' monthly bills would have exceeded these average amounts. These ranges underscore that (1) many customers continue to receive unaffordable bills even while enrolled in the BDP; and (2) the affordability of BDP participants' bills varies greatly, even within FPL ranges.

As currently structured, the BDP is not providing affordable bills or precise levels of affordability for its participants. As discussed, the continued unaffordability of the BDP is particularly pronounced for higher usage customers. This is extremely problematic, as low income households often have higher usage as a result of plumbing and fixture leaks from living in older homes – yet most often lack the discretionary income to invest in repairs themselves and/or are unable to force their landlord to make such repairs.[125]

[124] CAUSE-PA II-12, Attachment.
[125] Water/Color Report at 28.

It is imperative that additional improvements are made so that these customers can achieve affordable water and wastewater burdens. Utility assistance programs are most successful at achieving programmatic goals (improved affordability and bill payment and reducing uncollectible expenses) when they are designed to deliver consistent and targeted levels of affordability across income and usage levels in tandem with meaningful arrearage management.[126]

Q: Is PAWC proposing any changes to its BDP?

A: Yes. The Company is proposing to amend its BDP to include a fourth tier of eligibility to the current BDP and expand the program to customers whose household incomes are between 150-200% FPL.[127] For water customers in this fourth tier, PAWC proposes a 30% discount on its fixed charge, and a 15% discount on the volumetric rate.[128] For wastewater customers in this expanded income tier, PAWC proposes to offer a discount of 20% on the total wastewater bill.[129] PAWC does not propose any changes to the discount tiers for existing income tiers.[130] Mr. Rea estimates that if this proposal were approved, approximately 51,252 residential water customers and 10,353 residential wastewater customers with income between 151-200% FPL would become eligible for the BDP.[131]

Q: Do you support PAWC's proposed BDP changes?

A: Yes and no. While I recognize the need amongst customers with household incomes between 150%-200% FPL, I am concerned that neither PAWC's current nor proposed BDP is

[126] See e.g., Water Research Foundation, Best Practices in Customer Assistance Programs, at 78-80, (2010), available at https://www.waterrf.org/research/projects/best-practices-customer-payment-assistance-programs; see also, American Water Works Association, Thinking Outside the Bill: A Utility Manager's Guide to Assisting Low income Water Customers, at 8 (2d ed. 2014), available at: https://www.awwa.org/Portals/0/AWWA/ETS/Resources/Technical%20Reports/ThinkingOutsidetheBill-2Ed.pdf?ver=2021-05-21-125045-420.
[127] PAWC St. 10 at 24.
[128] Id.
[129] Id.
[130] Id.
[131] Id. at 26.

adequately meeting the affordability needs of low income customers currently eligible for the program. PAWC's proposed rate increase will impact all customers, *including current BDP participants*, yet PAWC is not proposing to improve the affordability or accessibility of the program for existing program participants. Customers who fall lower on the poverty scale experience the most pronounced need and struggle most profoundly with unaffordability, both at current and proposed rates. As discussed above, even with BDP enrollment, BDP participants will be faced with unaffordable monthly bills – especially those customers with higher usage levels that correspond to larger family sizes and/or low quality housing stock. I submit that the BDP must be correctly structured to provide consistent levels of affordability for its currently eligible population and active participants. PAWC's BDP should adequately focus on and address current goals of affordability for its participants before expanding to an additional customer segment. Thus, my support of expansion of BDP eligibility to 200% FPL is conditioned on PAWC being required to first make improvements to the affordability and accessibility of its BDP for customers between 0-150% FPL, as outlined below.

Q: What further reforms do you recommend to the structure and discount levels of the BDP, and why?

A: As discussed above, PAWC's current discount levels for customers between 0-150% FPL do not provide adequate or equitable discounts levels, particularly for customers with higher usage levels. Additional improvements are necessary to ensure that BDP participants are receiving consistent and equitable levels of affordability.

In the context of past rate proceedings, I have recommended that PAWC implement a tiered percentage of income payment (PIP) structure – as have other experts for CAUSE-PA and OCA.[132]

[132] Pa. PUC v. PAWC, CAUSE-PA St. 1, Docket No. R-2022-3031672, at al (Direct Testimony Dated July 29, 2022). Pa. PUC v. PAWC, OCA St. 5, Docket No. R-2022-3031672, at al (July 29, 2022).

I stand by past analyses which determined that implementing a PIP structure would, in the long term, ensure that those with the lowest levels of FPL and/or with larger families are not paying a disproportionate level of their incomes for critical and life-sustaining water/wastewater services. This is particularly true as rates for basic water and wastewater services are likely to continue to rise in the short term, further increasing the exigency that PAWC's program structure deliver accessible, consistent, and equitable levels of affordability to economically vulnerable households. While I continue to support adoption of a PIP structure as the preferred method of targeting and achieving affordability for low income customers, I recognize there are current system constraints that complicate adoption of a PIP at this time. Thus, in the context of the present case, I recommend that PAWC adopt shorter-term revisions to the BDP discount levels. Nevertheless, I continue to believe that PAWC should ultimately transition to a PIP. Should PAWC undergo any systems upgrades, it should be required to ensure the upgrades will support implementation of a PIP structure in the future.

In the interim, prior to PAWC transition to a PIP or to expansion to 200% FPL eligibility, I recommend the following BDP structure and discount levels to better ensure the program produces affordable water/wastewater burdens and participants stay connected to services:

Table 12: Recommended BDP Levels and Discounts

	Water		Wastewater	
	Fixed Charge	**Volumetric Charge**	**Fixed Charge**	**Volumetric Charge**
Tier 1 (0-50% FPL)	90%	80%	85%	85%
Tier 2 (51-100% FPL)	75%	65%	73%	73%
Tier 3 (101-150% FPL)	60%	40%	55%	55%

Pursuant to this proposal, customers between 0%-150% would see marked improvements to affordability and reductions in water/wastewater burdens. Under PAWC's BDP proposal, a family of four at 150% FPL and using 40 gallons per person/day, or approximately 5,000

gallons/month (PAWC's estimated usage, discussed above), will see combined water/wastewater burdens of 5%. This burden level exceeds the 4% affordability burden standard discussed above. By comparison, the same BDP participant – with the same household size, usage, and FPL – will see a 3% combined water/wastewater burden under the above-described BDP proposal. CAUSE-PA Exhibit 1 provides additional information related to the resulting burdens under the proposed BDP structure I have recommended above.

At the proposed discount levels I have outlined above, low income customers will be able to realize more consistent levels of affordability, regardless of income level, household size, and usage levels.

I note that my recommendations within the context of this proceeding should not be read as preclusive of the need for longer term improvements, including transition to a PIP, to ensure that PAWC's BDP provides consistent affordability to its participants.

Q: Do you have any concerns about the accessibility of the BDP?

A: Yes. I am concerned that only a very small portion of PAWC customers are currently enrolled in the BDP – far fewer than those who PAWC has already identified in its system as income eligible for the program. Specifically, in November 2023 (the last reported period), PAWC reports that 28,844 customers were enrolled in the BDP, representing just 4.40% of total residential customers (28,844 out of 655,959 residential customers).[133] During that same period, PAWC reported having 71,352 confirmed low income customers identified in its system – or 10.88% of total residential customers.[134]

[133] CAUSE-PA I-2, Attachment; CAUSE-PA I-11, Attachment.
[134] CAUSE-PA I-2, Attachment; CAUSE-PA I-3, Attachment.

Table 13: BDP Enrollment v. Confirmed & Estimated Low Income Customers[135]

	CLI Customers	ELI Customers	BDP Participants	CLI % Enrollment	ELI % Enrollment
Dec. 2020	62,888	114,343	22,185	35%	19%
Dec. 2021	65,548	114,343	23,555	36%	21%
Dec. 2022	69,495	114,343	29,460	42%	26%
Nov. 2023	71,352	114,343	28,844	40%	25%

As the above Table shows, BDP enrollment remains low, even amongst customers who PAWC has confirmed to be low income. Indeed, roughly 60% of households *known* to be eligible for PAWC's BDP are not enrolled. Tens of thousands of other low income consumers, not previously identified by the Company, remain unenrolled. Based on PAWC's estimated low income customer count in its 2022 rate case of 114,343, PAWC's BDP reached only between 19-25% of its estimated eligible households since 2020. Critical improvements are needed to ensure the program is accessible to all eligible households.

Q: Do you have recommendations to improve accessibility of the BDP for PAWC's low income customers?

A: Yes. As discussed, PAWC's low rates of enrollment in the BDP evidence a need for more systematic solutions to ensure that eligible low income customers can enroll in the BDP.

First, as discussed above, it is unclear whether PAWC has updated its estimated low income customer count since its 2022 rate proceeding utilizing appropriate data from the U.S. Census Bureau.[136] An accurate count of estimated low income customers is essential to determining existing need in PAWC's service territory. I therefore recommend that PAWC be required to update its estimated low income customer count on an annual basis, and work with BCS to identify an appropriate method for updating this count based on U.S. Census data.

[135] CAUSE-PA I-3, Attachment. CAUSE-PA I-11, Attachment.
[136] CAUSE-PA I-6.

Second, I recommend that PAWC set target enrollment benchmarks for the BDP. I recommend enrollment targets set at 20% per year of PAWC's estimated low income customer counts until the Company reaches at least 75% enrollment of this estimated group.

Third, PAWC should be required to establish quantitative goals related to affirmative customer outreach for the purpose of enrolling low income customers in the BDP. This affirmative outreach should include telephone contacts, mailings, and forms of electronic communication (with customer consent). PAWC should also be required to track and report relevant data regarding its progress to its Customer Assistance Advisory Group – known as the CAAG – to help refine outreach efforts based on CAAG feedback. PAWC should in turn expand membership of its CAAG to include a broader array of community voices from all corners of PAWC's expansive service territory.

In addition, as detailed below, I will discuss several recommended enhancements to improve the accessibility of the H2O program.

B. Hardship Fund Analysis and Recommendations

Q: Is PAWC proposing any changes to its Hardship Fund in the context of this proceeding?

A: No. As currently structured, PAWC customers at or below 200% FPL may receive a Hardship Fund grant of up to $500 annually toward their water bill and $500 annually toward their wastewater bill.[137] PAWC's Hardship Fund is administered by Dollar Energy Fund (DEF).[138] Currently, PAWC contributes $750,000/annually to its Hardship Fund.[139] PAWC's Hardship Fund

[137] PAWC St. 1 at 12: 18-23.
[138] Id.
[139] PAWC St. 1 at 12: 18-23.

is funded through annual corporate donations (currently $625,000 for water and $125,000 for wastewater) as well as customer and employee donations.[140]

Pursuant to its acquisition proceeding of the BASA wastewater system, PAWC and other settling parties submitted a Joint Petition for Unanimous Settlement of All Issues on August 14, 20023 (hereinafter, BASA Settlement).[141] In the BASA Settlement, the Company agreed to increase shareholder donations to its Hardship Fund by $700,000 per year for five years, for a total of $3.5 million.[142] The BASA Settlement also provides that Hardship Fund eligibility will be increased from 200% to 250% FPL.[143] Counsel for CAUSE-PA has advised me that, subsequent to the filing of PAWC's current rate increase proposal, the BASA Settlement was approved by Commission Order.[144] While PAWC committed in the context of the approved Settlement in the last proceeding to increase its hardship funding on an ongoing basis by $150,000/annually,[145] there is no commitment that PAWC maintain this level of contributions, plus the increase from the BASA case, on an ongoing basis. PAWC does not propose any additional changes to its Hardship Fund, separate and apart from its obligations under the BASA Settlement.

Q: Do you have any concerns related to PAWC's Hardship Fund?

A: Yes. First, I am concerned about the low number of customers who have been awarded a grant through PAWC's Hardship Fund. The following number of customers received a Hardship Fund grant, by year and across PAWC's divisions: 1,065 in 2020; 2,016 in 2021; 1,441 in 2022;

[140] PAWC St. 9 at 13.
[141] PAWC St. 1 at 23: 6-13.
[142] Id. at 23: 6-13.
[143] Id.
[144] Id. See Application of Pennsylvania-American Water Company-Wastewater Section 1329 of the Pennsylvania Public Utility Code, 66 Pa. C.S.§ 1329, for the Acquisition of Butler Area Sewer Authority's Wastewater System Assets, Joint Petition for Settlement, Docket No. A-2022-3037047 (Joint Petition for Settlement filed Aug. 14, 2023, pp. 26-27).
[145] Pa. PUC v. PAWC, Order, Docket Nos. Docket Nos. R-2022-3031672, et al. (Order entered Dec. 8, 2022).

and 3,443 between January and November 2023 (the last period reported). [146] Despite the low number of customers awarded PAWC's Hardship Fund grants, the need for grant assistance for low income customers remains significant. The following Table compares the number of PAWC Hardship Fund grants issued, by year and across service types, compared to the termination rate for nonpayment for confirmed low income customers:

Table 14: Hardship Fund Grants issued v CLI Termination for Nonpayment, By Year

	Hardship Fund Grants[147]	**CLI Termination for Non-Payment[148]**
2020	1,065	1,304
2021	2,016	12,202
2022	1,441	14,562
2023 (Jan.-Nov.)	3,443	9,658

As shown in the above Table, a substantial number of confirmed low income customers have been terminated for nonpayment in recent years, compared to the number of Hardship Fund grants that have been issued – with the exception of 2020, which coincided with the Commission's moratorium on terminations as a result of the COVID-19 emergency.

Notably, the average arrearage amount held by Hardship Fund grant recipients regularly exceeds the maximum Hardship Fund grant limit of $500. For example, between January 2020 and November 2023, the average arrearage amount held by Hardship Fund grant recipients reached a high of approximately $1,216 in September 2021, and is – as of the most recent date of November 2023 – reported as $587.47.[149] As discussed, low income customers carry substantial levels of arrears that are disproportionate to the average arrears carried by residential customers as a whole.

[146] CAUSE-PA I-13, Attachment.
[147] Id.
[148] CAUSE-PA I-24, Attachment.
[149] CAUSE-PA II-6, Attachment.

As of November 2023, the average arrearage level of confirmed low income customers was $262.18 and the average arrearage level of H2O participants was $252.29—compared to the residential average arrearage level during this same period of $186.94.[150] By definition, a significant portion of low income customers in these segments will have arrearage levels exceeding these averages, which places these customers at risk of termination of life-sustaining water/wastewater services.

The consistent underspending of PAWC's Hardship Fund, coupled with the clear and substantial unmet need for grant assistance amongst PAWC's low income customers, underscores the need for PAWC to improve it accessibility and benefits provided under its Hardship Fund program.

While PAWC projects certain improvements to the funding and expansion of eligibility to its Hardship Fund, it appears that these commitments are in the context of its BASA Settlement. However, the BASA Settlement was predicated on the need for Hardship Fund improvements at current rates. PAWC has not committed to increasing its hardship funding in the context of the present case, separate and apart from its obligations under the BASA Settlement and to address the increased unaffordability that will result if PAWC is permitted to implement any rate increases.

Finally, I am concerned that PAWC's Hardship Fund continues to require an upfront payment requirement of $50.[151] Upfront payment requirements, imposed as a condition precedent to receipt of emergency assistance, pose insurmountable barriers to receiving Hardship Fund assistance for those customers facing the most acute financial distress. Customers unable to make payments for several months due to an acute financial hardship are essentially disqualified from

[150] CAUSE-PA I-28, Attachment.
[151] Pennsylvania American Water's H20 – Help to Others Program - Dollar Energy Fund, available at: https://www.dollarenergy.org/program/pennsylvania-american-water-h20-help-to-others-program/; CAUSE-PA II-7, Attachment.

receiving critical grant assistance – precisely when Hardship Fund grant assistance is most needed. In my experience working with low income families, most have already exhausted their resources, including obtaining support from family and friends, before applying for grant assistance programs. I have personally assisted clients facing similar up-front payment requirements, who have resorted to borrowing from predatory payday lenders to make them eligible to receive grant assistance to prevent termination – compounding financial strain.

Ultimately, up-front payment requirements are not a reasonable test of a customer's good faith, but instead pose a significant obstacle to assistance. Families experiencing an acute financial hardship should not be required to make an up-front financial payment to secure financial assistance.

Q: Do you have any recommendations related to PAWC's Hardship Fund?

A: Yes. In light of the underutilization of PAWC's Hardship Fund, coupled with the substantial need for Hardship Fund grants to prevent the loss of water and wastewater service, I recommend that PAWC be required to take several immediate steps to improve the accessibility and funding of its Hardship Fund.

First, I recommend the Company increase annual hardship funding by an additional $1 million, over existing funding levels. Any unspent funds should be rolled over and added to the budget for the following year. As discussed, the BASA Settlement was agreed to *before* PAWC's rate increase proposals at issue in the present proceeding and does not account for increased unaffordability that may result if PAWC is permitted to implement rate increases through the present proceeding. PAWC should be required to increase funding for its Hardship Fund to help offset increased unaffordability driven by its proposed rate increase irrespective of the BASA Settlement.

I also recommend that PAWC eliminate any upfront or "good faith" payment requirements for its Hardship Fund. PAWC should be required to work with its program administrator to update customer-facing materials to reflect this change in policy without delay. If a customer meets all required eligibility criteria for PAWC's Hardship Fund, they should be able to receive a Hardship Fund grant without the requirement of an upfront payment.

Finally, I recommend that PAWC increase the maximum amount of its Hardship Fund grant from $500 for water and wastewater, respectively. As discussed, the average arrearage held by Hardship Fund recipients far outpaced the maximum Hardship Fund grant – reaching a high of approximately $1,216 in September 2021, and is – as of the most recent date of November 2023 – reported as $587.47. [152] To better address the high levels of arrears carried by PAWC's low income customers, I recommend an increase of the maximum Hardship Fund grant to $600 for water and $600 for wastewater. PAWC indicates that it is currently working with DEF to develop IT enhancements to process multiple Hardship Fund grants per year, up to the maximum grant amount.[153] I therefore recommend that PAWC be required to allow income-qualified water and wastewater customers to receive multiple Hardship Fund grants per year, up to the maximum $600 for water and wastewater, respectively. This is similar to how the LIHEAP Crisis Grant has functioned in Pennsylvania for decades.

C. Consumer Education and Outreach, and Customer Screening

Q: Do you have any other concerns related to PAWC's low income assistance programs in the context of this testimony?

[152] CAUSE-PA II-6, Attachment.
[153] PAWC St. 1 at 30.

A: Yes. As discussed, I am concerned that PAWC's low income assistance programs remain woefully undersubscribed - reaching just a fraction of PAWC's low income customers. Again, as of November 2023, only approximately 25% of estimated low income customers and 40% of customers known to be income eligible for the BDP were actually enrolled in the BDP. [154] Further, as described above, between January and November 2023, while 9,658 confirmed low income customers were terminated for nonpayment, only 3,443 Hardship Fund grants were issued during that period. [155] I anticipate that the true level of need amongst PAWC's low income customers may be shown to be higher, based upon PAWC assessment of its estimated low income count consistent with the method utilized by the Bureau of Consumer Services, as discussed above. However, since the currently available customer data evidences wide discrepancies between need and actual assistance provided, additional systematic solutions are imperative to ensure that PAWC's low income customers can enroll in assistance programs.

I am similarly concerned that PAWC's low income customers are not being referred to the BDP and Hardship Fund in a timely manner to prevent the buildup of unmanageable arrears that lead to termination of services. Between November 2021 and October 2023, approximately 87% (11,912 out of 13,699) of BDP enrollees had unpaid arrears at the time of enrollment.[156] It does not appear that PAWC has systems in place to reasonably ensure that customers are being timely matched to available rate assistance through the BDP, and other H2O assistance programming, prior to the accrual of arrears. PAWC's policies, procedures, and training materials for its frontline customer service staff do not ensure that payment troubled customers are given the opportunity to enroll in the BDP and access hardship funding prior to being placed in potentially unaffordable

[154] CAUSE-PA I-3, Attachment. CAUSE-PA I-11, Attachment.
[155] CAUSE-PA I-13, Attachment.
[156] OCA 5-8, Attachment.

payment arrangements. This apparent deficiency inappropriately prevents low income customers from enrolling in available assistance programs *before* debts are accrued.

PAWC appears to have conducted certain consumer outreach and education efforts related to its low income assistance programs in recent years. PAWC expert witness Deborah A. Degillio described in her direct testimony how PAWC engages in such outreach and education through a variety of methods, including direct customer communications, Commission events, local community events, and certain DEF outreach.[157] Moreover, it appears that PAWC has targeted several specific communities identified by percentages of customer at or below 150% FPL throughout 2022 and 2023.[158] PAWC also reports on its efforts to use U.S. Census data to identify certain zip codes and districts which have high percentages of low income consumers, including consumers at/below 50% FPL, and to conduct targeted outreach campaigns to in these areas.[159]

While I acknowledge that PAWC appears on its face to have improved efforts to conduct outreach and engagement related to its low income assistance programs, I am concerned that PAWC's low income assistance programs nevertheless remain severely undersubscribed. The test of success must rest on measurable results. It is essential that additional systematic approaches are implemented so that eligible low income customers can learn about and ultimately enroll in assistance to combat unaffordability, both at existing and proposed rates. To address the continued low enrollment rates of PAWC's assistance programs, I therefore recommend that PAWC implement several overarching and systematic enhancements concerning its consumer outreach and education efforts related to its low income assistance programs.

[157] PAWC St. 9 at 14-16. See also CAUSE-PA II-1, Attachment.
[158] CAUSE-PA II-2.
[159] CAUSE-PA I-5.

Q: Do you have any recommendations related to the undersubscription of PAWC's low income assistance programs you outline above?

A: Yes. As an overarching matter, I recommend that the Commission require PAWC to develop and submit a comprehensive Universal Service Plan for periodic Commission review and approval. Currently, as a jurisdictional water/wastewater utility, PAWC is not required to submit periodic plans related to their low income assistance programming for Commission review and approval. This leaves a substantial gap for consumers and utility advocates, who must rely on PAWC's tariffs and the information that can be pieced together from websites and outreach materials, to determine important program rules, polices, and procedures for the Company's low income assistance programs. This is a customer service issue, and it both engenders consumer confusion and hampers consumers' ability to learn about and ultimately enroll in assistance. I therefore recommend that the Commission require PAWC to file a Universal Service Plan and an accompanying Petition for Commission review and approval within one year of the final Order in this case, and every five years thereafter, in line with the requirements of regulated EDCs and NGDCs in the Commonwealth.

I similarly recommend that PAWC be directed to develop a detailed consumer education and outreach plan (CEOP) for inclusion in the Universal Service Plan I recommend above. I note that this CEOP would be an outgrowth of PAWC's previous efforts related to LIHWAP outreach, where PAWC developed a consumer communication and outreach plan to help maximize LIHWAP for eligible customers.[160] The continued undersubscription of PAWC's low income assistance programs, as described, evidences a need for a more coordinated and comprehensive approach to consumer outreach and education related to PAWC's low income assistance programs.

[160] PAWC St. 1 at 35.

PAWC's CEOP should be developed with input from parties and stakeholders through PAWC's CAAG and should set forth how PAWC will specifically promote and coordinate each of its low income programs. This Plan should be tailored to the demographics of the Company's service territories; should include how PAWC will perform targeted outreach to specific at-need consumers and communities, and consumers who have historically faced pervasive unaffordability and barriers to accessing and maintaining utility services, including customers with Limited English Proficiency; should identify efforts to educate and enroll customers at or below 50% FPL in assistance programming; and should include measurable goals and associated metrics to assess those goals.

Additionally, I recommend that PAWC begin screening all new and moving customers for income level and eligibility for assistance at the time their service is established. Currently, PAWC obtains information for a residential customer through the Ability to Pay process. Through this process, income information is voluntarily provided by customers under certain circumstances, including (1) when a residential customer expresses an inability to pay their bill; (2) when a customer requests an extension of their current bill; (3) when a customer requests an installment plan on a high current bill; (4) when a customer requests an installment plan on a past due balance; (5) when a customer does not pay their past due balance over the phone at the end of a call addressing a balance; (6) when a customer has received a disconnection notice; and (7) when a customer requests information about hardship grants.[161] In addition, PAWC has identified low income customers by reviewing LIHWAP grant remittance lists, and enrolled accounts identified through this process in its BDP.[162]

[161] CAUSE-PA I-9.
[162] CAUSE-PA I-5.

While I am supportive of identification of low income customers through PAWC's Ability to Pay Process, I believe that given the broad disparities in access to service for low income families across PAWC's service territory, documented throughout, more systematic approaches must be taken to affirmatively identify households eligible for assistance through the BDP or other programs. I recommend that PAWC implement regular income screening for all new or moving customers, so that low income customers are more routinely identified so that they may enroll in available assistance programming. For existing customers, PAWC should routinely screen for income on any non-emergency calls, and/or should inquire whether there has been updates to any income information already noted on accounts. Customers should be able to opt out of disclosing their income if they choose, but should first be informed that they may be eligible for a lower rate, debt forgiveness, or energy efficiency measures. When establishing an account, all applicants for new service should be informed of the availability of low income assistance programming and requested to voluntarily self-disclose any changes to income information.

I recommend that PAWC develop call scripting and checklists for its Customer Service Representatives (CSRs) to assist in screening customers for eligibility in its low income assistance programs, in line with my above recommendation. Developing call scripting and checklists that require CSRs to routinely screen for eligibility for low income assistance programming will help to systematize PAWC's enrollment efforts for these programs. All customers identified as low income through this process should be referred for enrollment in PAWC's low income assistance programs through a warm referral process that does not require the customer to provide duplicative information.

As discussed, I am also concerned that low income customers are not directed to the BDP and Hardship Fund *prior to* being required to enter into payment arrangements. While payment

arrangements can be an important tool to manage accrued arrears, they can also serve to exacerbate unaffordability when the terms do not establish a reasonably affordable monthly bill. For low income customers, unaffordable payment arrangements can exacerbate payment trouble – causing them to fall further into utility debt. The BDP and H20 programs have been specifically developed in recognition of the limitations of the traditional payment arrangements. Low income customers should be directed *first* to low income assistance programming, prior to being placed in a payment arrangement.

I therefore recommend that PAWC be required to revise its policies, procedures, and training materials to reflect that customers who provide information related to payment troubles, inability to pay, or low income status should be assisted to apply for PAWC's H2O program *before* they are provided with the option to enroll in payment arrangements. Similarly, PAWC should be required to review its policies, procedures, and training materials to ensure that entrance into a payment arrangement is not required prior to qualifying for assistance through any PAWC assistance program. PAWC should not enter into any payment arrangements with a potential income-eligible customer unless and until they have received that customer's explicit confirmation that they are declining to enroll in the BDP, the AMP (once approved), and Hardship Fund program. Similarly, PAWC should ensure that DEF's policies, procedures, and training materials related to its administration of PAWC's assistance programming reflect these policy and procedural revisions.

D. Water Conservation and Line Repair/Replacement Assistance

Q: Please describe PAWC's current water efficiency assistance programming?

A: PAWC's H2O program offers certain water conservation assistance to H2O participants.[163] Specifically, the water conservation component of the H2O program includes water conservation kits containing basic, self-installed water-saving devices (low-flow showerhead, sink aerator, and toilet fill cycle diverter), leak detection kit, conservation tips and materials, and a water use calculator for qualifying customers.[164] Between, 2020 and 2023, PAWC reports 5,942 customers received water conservation assistance through this program component.[165]

Q: Does PAWC currently operate a low income line replacement and/or repair program?

A: Apart from its lead service line replacement program,[166] the Company currently does not provide service line and/or leak repair assistance to any customers.[167] PAWC also notes in response to discovery that the Company is currently in the process of developing an inventory of lead service lines, with the target to have all lead service lines replaced over the next 10 years.[168]

Q: Do you have any concerns about PAWC's water efficiency programming?

A: Yes. I am concerned that PAWC does not have a comprehensive conservation assistance program that includes line repairs and replacement assistance for its low income customers to help control high usage.

As shown the Tables 7-9 (Mean Usage by Customer Segment), *supra*, PAWC's low income customers have higher average usage levels compared to residential customers as a whole.

[165] CAUSE-PA I-16, Attachment.
[166] CAUSE-PA II-25.
[167] CAUSE-PA I-15.
[168] CAUSE-PA II-25.

For example, in November 2023, PAWC reported that – for combined services – the mean usage level for confirmed low income customers was 3,764 gallons and the mean usage level for H2O participants was 4,162 gallons – compared to the mean usage level for residential customers generally of 3,179 gallons during this same period.[169]

The higher usage levels amongst low income customers compared to residential customers as a whole is likely due to a number of factors. First, low income customers with higher usage levels may enroll in the BDP at higher rates – or report their income to seek a payment arrangement – thus resulting in higher average usage rates for these groups.

Second, as I have referenced throughout, low income households are more likely to live in older homes with inadequate, damaged, or leaky plumbing/ fixtures – and may experience higher usage levels as a result. [170] These households are less likely to be able to afford to fix leaks, damaged plumbing or customer-side service lines, or purchase and install water efficiency devices.[171] The amount of water necessary to meet basic needs therefore varies significantly for each family – based not only on household composition and income, but also on the quality and condition of their home.

---

[169] Table 7-9, *supra*.

Public Health 238-245 (2016), https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3222513/ (finding that low income households have a higher likelihood of inside water leaks, which in turn leads to increased mold and moisture in the home that can cause or complicate the health of family members); see also US Dep't of Health, Office of Disease Prevention & Health Promotion, Social Determinants of Health: Quality of Housing (2020), available at: https://health.gov/healthypeople/priority-areas/social-determinants-health/literature-summaries/quality-housing.

[171] Gary Adamkiwicz et al., Moving Environmental Justice Indoors: Understanding Structural Influences on Residential Exposure Patterns in Low Income Communities, 101 Am. J. Public Health 238-245 (2016), available at: https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3222513/ (finding that low income households have a higher likelihood of inside water leaks, which in turn leads to increased mold and moisture in the home that can cause or complicate the health of family members); see also US Dep't of Health, Office of Disease Prevention & Health Promotion, Social Determinants of Health: Quality of Housing (2020), available at: https://health.gov/healthypeople/priority-areas/social-determinants-health/literature-summaries/quality-housing.

Low income customers most often lack any discretionary income, and cannot reasonably afford the high costs of necessary repairs – including to customer-side service lines. When faced with a high-cost repair, many low income households, unable to make repairs, see their bills increase and soon face involuntary termination. According to PAWC policies, customers with a damaged customer-side service line can access no cost repairs if the customer-side line is determined to be a lead service line. [172] However, if the customer-side service line does not contain lead, no such cost assistance is available – even though the leak (and the correspondingly high bills) remain. [173] Customers must either rely on their own funding sources, or third-party protection plans that come at additional monthly costs,[174] to afford the costs of needed repairs. This is particularly concerning as PAWC has a policy to terminate service to customers who do not make repairs to leaking customer-side service lines, or do not make arrangements with the Company for needed repairs, after notices are provided to customers. [175] Between 2020 and December 2023, 1,037 customers had their service disconnected as a result of damaged customer-side service line leaks, underscoring the need for more comprehensive efficiency and service line repair programs. [176]

I am also concerned that it does not appear that PAWC tracks water savings as a result of the provision of its water conservation kits to BDP customers.[177] While PAWC's outreach materials indicate that replacing a showerhead with a water-saving model can save 2,900 gallons/year, and a fill cycle diverter can save 0.5-1.5 gallons/flush, there is no indication whether

[172] CAUSE-PA II-26.
[173] Id.
[174] CAUSE-PA II-30.
[175] CAUSE-PA II-27; CAUSE-PA II-26.
[176] CAUSE-PA II-29.
[177] OCA 11-18.

provision of conservation kits results in these savings, or even if customers have installed these measures.[178]

Q: Do you have any recommendations related to the need for line repair and additional conservation assistance amongst PAWC's low income customers?

A: Yes. I recommend that PAWC develop and implement a comprehensive conservation and line repair/replacement program available all customers at or below 200% FPL. A comprehensive conservation and line repair/replacement assistance program will help to reduce inefficiencies in low income participants' homes and control H2O program costs. With the substantial rate increase that PAWC is proposing, and the preexisting unaffordability at existing rates, a comprehensive water efficiency and line repair program is essential to mitigate the costs of unaffordability both at existing and proposed rates for low income customers with higher usage levels.

I further recommend that PAWC be required to work with its CAAG to develop this comprehensive assistance program no later than 6 months after the final order in this proceeding. This program should include conservation measures, including provision of water conservation kits, but also include deeper savings measures – including line repair and replacement. Low income customers most often lack the discretionary income to participate in a rebate program, so the program should – at a minimum – be designed to deliver line repair and efficiency measures with no out-of-pocket or up-front costs – either for the measures or for installation. Services should be coordinated with energy reduction programs provided through the local electric and gas utilities to ensure coordinated program delivery. The proposed program should also include proposed annual reporting parameters of water savings achieved and any associated reduction in low income assistance program costs as a result of these programs. This program should be available to all low

[178] See OCA 11-18.

income customers with income at or below 200% FPL, but should target high usage low income customers enrolled in PAWC's BDP. This targeting will have the added benefit of helping to reduce the cost of PAWC's BDP.

Finally, PAWC should be required to coordinate its service delivery with other utilities in its service territories that operate energy efficiency and conservation programs, such as Low Income Usage Reduction Programs (LIURP) and Act 129 programs. Many utility conservation programs already provide a number of measures that increase water efficiency in customer's households, such as low flow faucets and shower heads.[179] Partnering with other energy efficiency programs will not only allow PAWC to leverage other utility conservation programs, it will also ensure that customers can obtain comprehensive conservation measures to reduce their overall water and energy usage.

E. Administration of PAWC's Low Income Assistance Programs

Q: Do you have any concerns about PAWC's administration and oversight of its low income assistance programs?

A: Yes. I am concerned that PAWC does not exercise appropriate levels of oversight over PAWC's low income assistance program administrator, DEF. It appears that PAWC has access to DEF's grant management system so that it can review information regarding fund balances, application processing, application status, and standard reports.[180] Additionally, information related to applications and grant activities is available through a standard set of reports, and PAWC has the authority to request additional reports.[181]

[179] See 52 Pa. Code § 58.14.
[180] CAUSE-PA II-19.
[181] CAUSE-PA II-19.

Despite these available tools, it appears PAWC does not have systems in place to regularly monitor program administration to ensure that standards are being met and customers can easily enroll in assistance programming. Indeed, it appears PAWC does not have any formal policies, assessments, or audits related to DEF's administration of PAWC's low income assistance programs.[182]

PAWC's failure to regularly assess administration of its low income assistance programs on a systematic and regular basis is a deficiency in oversight. Without systematic and regular assessments to ensure sound administration of PAWC's programs, it is impossible to accurately assess whether PAWC's low income assistance programs are administered in a manner that is compliant with the program rules and parameters developed by PAWC and required by Commission Orders – and that allows low income customers to enroll in assistance without facing unnecessarily restrictive barriers.

Similarly, while PAWC provides certain data related to DEF's call centers, including data related to hold times and hours/days of call center operations,[183] it is impossible to accurately assess the extent to which low income customers may be experiencing call-in related barriers without more regular monitoring. This is particularly concerning as DEF only assigns a small number of employees to PAWC's program – 2.5 full-time equivalents for PAWC's BDP, and 5 full-time equivalents for PAWC's Hardship Fund.[184] By comparison, as of December 2023, PAWC indicates that it has 64,803 confirmed low income customers.[185] DEF's low staffing numbers dedicated to PAWC's programs raise additional questions and concerns related to whether PAWC's low income customers are facing access barriers to program enrollment.

[182] CAUSE-PA II-19-20.
[183] CAUSE-PA II-21; CAUSE-PA II-23; OCA 8-10.
[184] CAUSE-PA II-23, Attachment.
[185] CAUSE-PA I-3, Attachment.

Finally, I note that PAWC does not have adequate tracking mechanisms in place to facilitate cross program referrals and enrollment. In response to discovery, DEF conducts cross-program referrals, whereby at the end of calls with DEF, customers are asked about their other utilities. If the customer indicates a utility DEF manages, they are transferred to a different person at DEF and permitted to use the same income verification documents for enrollment across programs – though they must complete a separate application for the other utility.[186] PAWC describes how its MyApp portal was launched in October 2022 for Hardship Fund grant applications, which allows customers to apply online for programs offered by partnering utility rather than by calling DEF or a Community Based Organization.[187] However, PAWC does not track cross-program referrals and enrollment.[188] Without regular and accurate tracking of cross-program enrollment, it is impossible to determine the success of cross program enrollment efforts – or the extent to which cross enrollments are actually occurring.

Q: Do you have any recommendations related to DEF's administration of PAWC's low income assistance programs?

A: Yes. PAWC should be required to implement systematic and regular processes for monitoring and oversight of DEF's administration of its low income assistance programming. First, PAWC should establish and implement clear metrics for auditing DEF-handled accounts. I recommend that these performance metrics are implemented within 6 months of the final order in this proceeding, and are developed through a special meeting of PAWC's CAAG, where CAAG members and all parties to this proceeding are given the opportunity to attend and provide feedback. These metrics should include, but certainly not be limited to, requirements that DEF

[186] CAUSE-PA II-14.
[187] CAUSE-PA II-16.
[188] CAUSE-PA II-15.

track and regularly report its efforts related to cross enrollments and referrals related to PAWC's assistance programs. Metric data and auditing reports should be reviewed on a monthly basis by PAWC to ensure that DEF is meeting or exceeding prescribed standards of performance and benchmarks for program enrollment and/or recertification. Regular training and remedial action should be taken to correct errors or assess issues as those issues are discovered.

I also recommend that the Commission require PAWC to conduct and submit periodic third-party evaluations to the Commission on its low income assistance programs in line with the 6-year program evaluation period required of Electric Distribution Companies (EDCs) and Natural Gas Distribution Companies (NGDCs),[189] with the first evaluation due a year from the date of the final order in this proceeding. PAWC should work with BCS to identify an appropriately qualified third party universal service program evaluator to conduct the evaluation. This evaluation should include – at minimum – analysis of data from the specific metrics implemented by PAWC for monitoring of DEF's program administration, relevant enrollment, collections and bill payment data, and all other relevant program metrics maintained by PAWC and DEF - together with participant surveys and other proven evaluative tools. PAWC I should be required to present the findings from these periodic evaluations to its CAAG and other interested parties to this proceeding.

VIII. POLICIES AND PROCEDURES: DSLPA AND WATER SERVICES ACT

Q: Please summarize tenants' rights to service under the Public Utility Code.

A: The Discontinuance of Services to Leased Premises Act ("DSLPA") sets forth the rights of tenants who receive services by a regulated utility for which service is listed in a landlord's

[189] 52 Pa. Code § 54.76 (Electric); 52 Pa. Code § 62.6 (Natural Gas).

name.[190] DSLPA protects a tenant's right to continued utility service where: (1) the utility terminates service to a leased premises due to nonpayment by the landlord ratepayer;[191] or, (2) the landlord ratepayer seeks to voluntarily disconnect service to a leased premises and tenants are still residing at the property.[192] Tenants have the right to enforce DSLPA rights through the Commission's informal and formal complaint process.[193] Thus, DSLPA ensures that tenants are notified of a pending termination and allows them to maintain service.

The provisions set forth in DSLPA are designed to protect tenants from both involuntary termination of service to an occupied leased premises as a result of landlord nonpayment and voluntary disconnection to an occupied leased premise without consent of the tenant.

First, DSLPA requires utilities to provide specific notices to landlord ratepayers and their tenants prior to termination of service for non-payment. Utilities must serve landlords with written notice no less than thirty-seven days prior to the termination of utility service to a leased premise.[194] This thirty-seven day landlord notice is meant to notify the property owner or manager of the pending termination, obtain contact information to be used to notify affected tenants, and inform landlords that they are subject to fines and penalties for failure to provide contact information for tenants.[195] The notice also must inform landlords of their right to formally dispute the debt, and that – if a dispute is filed – the utility will hold off on notifying tenants until the dispute is resolved.[196]

[190] 66 Pa. C.S. Ch. 15 Subch. B.
[191] 66 Pa. C.S. § 1527.
[192] 66 Pa. C.S. § 1523(b).
[193] 66 Pa. C.S. § 1523(a)(3).
[194] See 66 Pa. C.S. § 1523(a)(1); see also 66 Pa. C.S. § 1525 (both prescribing the means and content of the required landlord notice.).
[195] 66 Pa. C.S. § 1525.
[196] 66 Pa. C.S. § 1525(a)(5).

Additionally, notice to tenants under the DSLPA is required no less than seven days after the landlord notice, and at least thirty days before service to the premises is terminated.[197] Utilities are required to provide notice to any dwelling units that are "reasonably likely" to be tenant occupied.[198] The notice to tenants must be mailed or hand-delivered to tenants and conspicuously posted at the premises in common areas.[199]

The 30-day notice provided to affected tenants must inform them of their rights to continue service by paying an amount equal to the bill for the thirty-day period preceding the notice or the billing month preceding the notice.[200] A tenant may then continue to keep service on at the residence if they pay for each 30-day period of service thereafter.[201] The tenant may then deduct the amount of their payments from their rental payments,[202] and are protected from retribution by the landlord.[203] Under DSLPA, the utility must return any partial payments if service is subsequently terminated due to the tenant's inability to pay the full 30-day bill.[204] The notice must inform tenants that they may, but cannot be required to, apply for service in their own name without being held responsible for the landlord's debt.[205]

As discussed, DSLPA also provides protections to tenants if a landlord ratepayer elects to voluntarily discontinue service.[206] Before a utility may disconnect service at the request of a landlord ratepayer: (1) the landlord must submit a form bearing a notarized signature and swearing under penalty of law that the unit is unoccupied;[207] (2) the utility must obtain consent from all of

[197] 66 Pa. C.S. § 1523(a)(3).

[205] 66 Pa. C.S. § 1527(a).
[206] 66 Pa. C.S. § 1523(b).
[207] 66 Pa. C.S. § 1523(b)(1).

the affected tenants;[208] or (3) the utility must obtain the names and addresses of the affected tenants and provide notice to each dwelling unit.[209] Under the third scenario, the utility must provide any affected tenants with the same rights they would have if their service were being terminated due to nonpayment by a landlord ratepayer as detailed above.[210]

DSLPA allows affected tenants to pay the ongoing charges and deduct that amount from their rent or other money owed to the landlord ratepayer,[211] and provides anti-retaliatory provisions meant to prevent the landlord ratepayer from acting against the affected tenants.[212] DSLPA provides that any waivers of a tenant's rights granted by the statute are void and unenforceable.[213]

Q: Do you have any concerns about PAWC's policies or practices regarding DSLPA?

A: Yes. I am concerned that PAWC does not have adequate policies and processes in place to monitor its compliance with DSLPA requirements, and to ensure appropriate service to tenants.

First, it is unclear whether PAWC is complying with notice requirements in the DSLPA because the Company does not properly track notices provided to tenants. As discussed, the DSLPA requires that specific notices be provided to landlord ratepayers and their tenants prior to termination of service for a landlord's non-payment, or where a landlord seeks to voluntarily discontinue services. In response to discovery, PAWC indicates that the Company does not track and cannot report on the number of tenant-occupied accounts that received a notice pursuant to DSLPA related to voluntary requests for disconnection or involuntary termination because of

[208] 66 Pa. C.S. § 1523(b)(2).
[209] 66 Pa. C.S. § 1523(b)(3).
[210] 66 Pa. C.S. § 1523(c).
[211] 66 Pa. C.S. § 1529.
[212] 66 Pa. C.S. § 1531.
[213] 66 Pa. C.S. § 1530.

nonpayment.[214] This is particularly concerning as PAWC reports a large number of accounts between 2020 and 2023 which were coded as tenant-occupied and were terminated for non-payment (1,011) or had services terminated at the request of a landlord or property owner (13,222).[215] Without accurate tracking, it is impossible to determine whether notices and attendant procedures required by the DSLPA were observed—and to what extent.

It is also unclear whether PAWC is properly coding tenant accounts because the Company does not track issues related to identification and coding of tenant accounts. In response to discovery, PAWC indicates that it has a process to update an account status from a non-tenant to tenant account.[216] However, PAWC does not track finer details related to coding of tenant accounts, and does not track accounts that were miscoded as non-tenant despite PAWC having received information that the account and/or property was tenant occupied.[217] Again, given the significant number of tenant-occupied accounts that had their service involuntarily terminated or disconnected at the request of a landlord/property owner in the last several years, it is concerning that PAWC does not have processes in place to determine whether tenant accounts are being accurately and precisely coded, and to remediate issues related to tenant-coding to ensure all accounts that are reasonably likely to be tenant occupied are receiving appropriate notices under DSLPA prior to termination. It is also impossible to determine whether PAWC is consistently and accurately coding tenant-occupied accounts, in a manner that comports with its stated policies and procedures and DSLPA requirements.

[214] CAUSE-PA III-13.
[215] CAUSE-PA III-13, Attachment.
[216] CAUSE-PA III-14.
[217] Id.

Further, it is unclear whether PAWC is properly managing partial payments made by tenants seeking to exert their rights under the DSLPA. When asked through discovery about partial payments by tenants seeking to exert their rights under the DSLPA, PAWC indicates that they are not aware of any such payments.[218] It is unclear based on this response whether no partial payments were made by the approximately 14,000 tenants terminated or voluntarily disconnected at the request of a landlord/property owner between 2020 and 2023 – or whether PAWC does not regularly track these partial payments. This is concerning because, without this data, it is impossible to determine whether certain tenants are attempting to submit partial payments to continue services pursuant to the DSLPA – and whether PAWC is returning partial payments if they do not form sufficient grounds for tenants continuing services.

Q: Do you have any recommendations related to PAWC's policies and procedures pursuant to the DSLPA?

A: Yes. Under DSLPA, PAWC has a duty to determine what service addresses are "reasonably likely" to be occupied by tenants and a corresponding duty to notify those tenants of their rights.[219] It is imperative that PAWC has adequate processes in place to monitor its compliance with requirements under the DSLPA.

To better monitor its compliance related to DSLPA requirements, I recommend that PAWC be required to implement tracking, and be able to report on the following metrics:

- What notices are provided to each tenant-occupied account prior to termination for nonpayment by a landlord/property owner, or voluntary disconnection at the request of a landlord/property owner.

[218] CAUSE-PA III-21.
[219] 66 Pa. C.S. §§ 1523(a)(3), 1524(a).

- When these notices are provided, and how the notices are provided.
- Whether – and how many – tenants exerted their rights to continued services pursuant to the DSLPA.
- The number of accounts improperly coded as non-tenant accounts, despite PAWC receiving information that the property is reasonably likely to be tenant occupied.
- Notices of termination/disconnection provided to any accounts improperly coded as non-tenant, and if the account was terminated for nonpayment or voluntarily disconnected while coded as a non-tenant account. I also recommend that PAWC be required to track what remediation is taken on affected accounts.
- Partial payments made by tenants seeking to continue services pursuant to the DSLPA. Specifically, PAWC should be required to track (1) the number of partial payments made by tenants seeking to continue services pursuant to the DSLPA; (2) the amounts of these partial payments; (3) whether these partial payments were sufficient so that tenants could maintain services pursuant to the DSLPA; and (4) if insufficient to maintain services, whether and to what extent these payments were returned to tenants.

I recommend that data from the additional tracking I have recommended above be reported to the CAAG on a quarterly basis and included in PAWC's next rate filing.

Q: Do you have concerns about PAWC's policies and procedures for water customers who are facing loss of service as a result of a request by a sewer authority?

A: Yes. PAWC provides water service to a number of households that receive wastewater from separate wastewater utilities, such as a local municipal authority. For these customers, I am concerned that PAWC's process for terminating water service to residential units at the request of a sewer authority does not adequately protect tenant occupants and customers.

Under Pennsylvania's Water Services Act,[220] a water utility is required to terminate service to a water customer at the request of the wastewater utility due to an overdue balance on the

[220] 53 P.S. § 3102.101 et seq.

wastewater bill.[221] However, prior to terminating water service at the request of a sewer utility, certain steps are required to protect customers and tenant occupants. Specifically, PAWC may not shut off service to the property until at least ten days after written notice has been mailed to the billing address and posted at the main entrance of the service address.[222]

Whether PAWC serves notices to properties prior to terminating water services at the request of a sewer utility depends on whether the account is coded as landlord ratepayer.[223] If a sewer utility (referred to by PAWC as a "non-Company" entity) requests to disconnect water services, the sewer utility is responsible for providing termination notices to all non-landlord/ratepayer customers for termination for nonpayment of wastewater services, pursuant to a Shut Off Agreement.[224] The sewer utility must confirm that they have complied with notice requirements set forth in the Water Service Act, including the requirements to mail and post written notices of termination to premises.[225] For landlord/ratepayer customers, PAWC sets forth a process under its Shut Off Agreement, whereby PAWC will post a 37-day notice and a 30-day notice on the municipality's letterhead for each customer for which shut-off of service is being requested.[226]

I am concerned that PAWC does not actually confirm that notices were properly provided before services are terminated pursuant to the Water Services Act. Section 501 of the Water Services Act (53 P.S. § 3102.501 et seq.) prohibits termination of water supply to premises prior to 10 days after written notice is posted at a main entrance and maintained to a person liable for payment of the rentals and charges, and the owner of the property or property manager. PAWC

[221] 53 P.S. § 3102.502(a)(1).
[222] 53 P.S. § 3102.502(b)(1).
[223] OCA 8-38, Attachment.
[224] Id.
[225] CAUSE-PA III-25, Attachment.
[226] OCA 8-38, Attachment, at p.2

has an affirmative duty to confirm that the law has been followed prior to terminating service. As the entity performing the actual termination of service, the Company should not be relying on the sewer utility to monitor their own compliance with the provisions of the Water Services Act. PAWC should require actual proof of notice before terminating service in these situations, including proof of mailing and proof of posting.

I am also concerned that it is unclear whether a tenant can assert their rights to continued service pursuant to the Water Services Act and the Utility Service Tenants Rights Act (USTRA) when faced with a PAWC water termination as a result of a request by a sewer authority. According to the Water Services Act, prior to discontinuing service in any residential building, PAWC must comply with USTRA.[227] USTRA is very similar to DSLPA, but applies to municipal corporations and municipal authorities rather than regulated utilities.[228] It applies to the same situations, provides for the same right to notice and right to continued service, and provides the same protections against voluntary disconnection and landlord retaliation.[229]

When asked for its process if informed that a property is tenant occupied and termination is due to nonpayment by landlord/account holder on a sewage account, PAWC indicates that if the municipality/municipal authority informs PAWC of improper coding, termination will be cancelled.[230] It is unclear whether tenants who face PAWC water termination as a result of a landlord's nonpayment to a sewage utility can inform PAWC that they are tenants and exercise their rights under USTRA to prevent shut-off by PAWC. Instead, under current PAWC policies, tenants may be required to rely on the municipal authority to contact PAWC on behalf of the

[227] See 53 P.S. § 502(c).
[228] 68 Pa. C.S. § 399.1, et seq.
[229] 68 Pa. C.S. § 399.3-7.
[230] CAUSE-PA III-23.

tenant. This creates unnecessary barriers to tenants asserting their rights to continued service and does not constitute acceptable compliance with these statutory mandates.

Q: Do you have any recommendations related to PAWC's policies and procedures pursuant to the Water Services Act?

A: Yes. As discussed, it is improper for PAWC to rely on sewer utilities to monitor their own compliance with the Water Service Act. I recommend that PAWC revise its policies and procedures regarding termination of service at the request of a sewer utility to ensure compliance under the Water Service Act. PAWC should be required to consult with its CAAG related to its recommended revisions, and to consider members' feedback in good faith. I similarly recommend that PAWC update any training materials and agreements to reflect updates in these policies and procedures.

I also recommend that PAWC undertake review of its policies and procedures for discontinuance of water service at the request of a sewer utility. As discussed, it is unclear whether tenants facing loss of PAWC water services because of landlord nonpayment to a sewer utility can assert their rights under the Water Services Act and USTRA. These tenants should not have to rely on the municipal authority to act on their behalf to maintain services. Instead, if a tenant informs PAWC that their residence is tenant occupied, and termination of PAWC water services is scheduled at the request of a sewer utility, PAWC should be required to immediately suspend the termination, and follow requirements set forth under the Water Services Act and USTRA. PAWC should be required to amend its polices, procedures, training materials, and forms and agreement used for municipal sewer utilities to reflect these important changes. PAWC should be required to consult with its CAAG related to its recommended revisions, and to consider members' feedback in good faith.

IX. SUMMARY OF RECOMMENDATIONS

Q: Please summarize the recommendations you have made throughout your direct testimony.

A: In my direct testimony, I have made several recommendations to address unaffordability of PAWC's rates for water/wastewater services at both present and proposed rates for low income customers. I recommend that the Commission order the following:

- Reject PAWC's proposed winter averaging methodology.
- Reject the proposed RDM in its entirety. If the Commission ultimately approves PAWC to implement an RDM, BDP participants should be exempt from RDM charges.
- Reject the proposed ECIC in its entirety. If PAWC is permitted to implement an ECIC, BDP participants should be exempt from ECIC charges.
- Implement changes to the BDP structure and discount levels, as I have outlined above.
- Update PAWC's estimated low income customer count on an annual basis, and work with BCS to identify an appropriate method for updating this count based on available U.S. Census data.
- Set target enrollment benchmarks for the BDP, so that enrollment targets are set at 20% per year of PAWC's estimated low income customer counts until the Company reaches at least 75% enrollment of this estimated group.
- Establish quantitative goals related to affirmative customer outreach for the purpose of enrolling low income customers in the BDP, as outlined above.
- Increase annual hardship funding by an additional $1 million over existing funding levels.
- Eliminate upfront payment requirements for PAWC's Hardship Fund.
- Increase of the maximum Hardship Fund grant to $600 for water and $600 for wastewater.
- Allow income-qualified water and wastewater customers to receive multiple Hardship Fund grants per year, up to the maximum $600 for water and wastewater, respectively.

- Develop and submit a comprehensive Universal Service Plan for periodic Commission review and approval, as outlined above.

- Develop and submit a detailed consumer education and outreach plan (CEOP) for inclusion in the Universal Service Plan.

- Screen all new and moving customers for income level and eligibility for assistance at the time their service is established.

- Develop call scripting and checklists for its Customer Service Representatives (CSRs) to assist in screening customers for eligibility in its low income assistance programs, in line with my above recommendations.

- Revise PAWC policies, procedures, and training materials to reflect that customers who provide information related to payment troubles, inability to pay, or low income status should be assisted to apply for PAWC's H2O program *before* they are provided with the option to enroll in payment arrangements, as outlined above.

- Develop and implement a comprehensive conservation and line repair/replacement program available to all customers at or below 200% FPL, as outlined above, no later than 6 months after the final order in this proceeding.

- Implement systematic and regular processes for monitoring and oversight of DEF's administration of its low income assistance programming.

    - Establish and implement clear metrics for auditing DEF-handled accounts, within 6 months of the final order in this proceeding, to be developed through a special meeting of PAWC's CAAG.

    - Conduct and submit periodic third-party program evaluations to the Commission on administration of its low income assistance programs in line with the 6-year evaluation period required of Electric Distribution Companies (EDCs) and Natural Gas Distribution Companies (NGDCs).

- Implement additional tracking and reporting related to tenants, including notices provided to tenants, and PAWC's policies and procedures related to DSLPA compliance, as outlined above. Recommended data should be reported to the CAAG on a quarterly basis and included in PAWC's next rate filing.

- Review and revise PAWC policies and procedures for customers facing termination of service at the request of a sewer utility to ensure compliance under the Water Service Act, in consultation with PAWC's CAAG.

Q: Does that conclude your direct testimony?

A: Yes; however, I reserve the right to submit rebuttal and surrebuttal testimony in response to testimony submitted by other parties in this proceeding.

CAUSE-PA St. 1, Geller

Appendix A

Resume - Harry S. Geller, Esq.

RESUME OF HARRY S. GELLER

EDUCATIONAL BACKGROUND:
Harpur College, State University of New York at Binghamton, B.A. 1966
Washington College of Law, American University, J.D. 1969
New York University Law School, courses in Urban Affairs and Poverty Law, as part of Volunteers in Service to America (VISTA) Program 1969-1971

EMPLOYMENT:
1988 – 2015 Executive Director, Pennsylvania Utility Law Project (PULP), a project of the civil non-profit Pennsylvania Legal Aid Network. PULP is dedicated to providing technical support, information sharing, and representation to low-income individuals and organizations, assisting and advocating for the low income in utility and energy matters. Responsibilities include project oversight, case consultation, co-counseling, and participation on task forces, work groups and advisory panels, community education and training in utility and energy matters affecting the low income.

While at PULP, served in the following capacities:

- Chairman, Low-Income Home Energy Assistance Program (LIHEAP) Advisory Committee to the Secretary, Pennsylvania Department of Human Services
- Member, Pennsylvania Public Utility Commission, Consumer Advisory Council Coordinator, Pennsylvania Legal Services Utility/Energy Work Groups
- Member, Weatherization Policy Advisory Committee to the Department of Community and Economic Development
- Member, PECO Universal Service Advisory Committee and LIURP Subcommittee

1974-1987 Staff Attorney, Managing Attorney and ultimately, Executive Director of Legal Services, Incorporated (LSI), a civil legal services program serving Adams, Cumberland, Franklin and Fulton Counties. Through a restructuring with other legal services programs, LSI became part of what is now known as MidPenn Legal Services and Franklin County Legal Services.

1971-1972 Staff Attorney, New York City Legal Aid Society, Criminal Court and Supreme Court Branches, New York County.

1969-1971 Volunteer in Service to America (VISTA) assigned to the New York University Law School Project on Urban Affairs and Poverty Law.

BAR ADMISSIONS
New York State
Commonwealth of Pennsylvania
United States District Court, Middle District of Pennsylvania

Cases in which Harry S. Geller has participated as a witness before the Pennsylvania Public Utility Commission since July 1, 2015

- Pennsylvania Public Utility Commission v. Philadelphia Gas Works, R-2022-3034229, P- 2022-3034264
- Pennsylvania Public Utility Commission v. National Fuel Gas Distribution Corporation, R-2022-3035730
- Pennsylvania Public Utility Commission v. Columbia Gas of Pa., Docket No.
- R-2022-3031211
- Pennsylvania Public Utility Commission v. Pa. American Water Co., Docket Nos.
- R-2022-3031672 & -3031673
- Pennsylvania Public Utility Commission v. UGI Utilities, Inc. – Gas Division, R-2021- 3030218.
- Joint Petition of MetEd, Penelec, Penn Power, and West Penn Power for Approval of their Default Service Programs for the Period Commencing June 1, 2023 through May 31, 2027, Docket Nos. P-2021-3030012, -13, -14, -21
- Pennsylvania Public Utility Commission v. Aqua Pennsylvania, Inc. and Aqua Pennsylvania Wastewater, Inc., Docket Nos. R-2021-3027385, R- 2021-3027386.
- Pennsylvania Public Utility Commission v. Pittsburgh Water and Sewer Authority, R-2021-3024773, R-2021-3024774, R-2021-3024779.
- Pennsylvania Public Utility Commission v. Duquesne Light Company, R-2021- 3024750.
- Pennsylvania Public Utility Commission v. PECO Energy – Electric Division, R-2021-3024601.
- Pennsylvania Public Utility Commission v. Columbia Gas of Pennsylvania, Inc., R-2021-3024296.
- Tenant Union Representative Network v. PECO Energy Company, C-2020-3021557
- Pennsylvania Public Utility Commission v. Philadelphia Gas Works, R-2020-3017206.
- Petition of PPL Electric Utilities Corporation for Approval of a Default Service Program for the Period of June 1, 2021 through May 31 , 2025, Docket No. P-2020-3019356.
- Petition of PECO Energy Company for Approval of Its Default Service Program for the Period from June 1, 2021 through May 31, 2025, Docket No. P-2020-3019290.
- Petition of Duquesne Light Company For Approval of Default Service Plan For The Period June 1, 2021 Through May 31, 2025, Docket No. P-2020-3019522.
- Joint Application of Aqua America, Inc., Aqua Pennsylvania, Inc., Aqua Pennsylvania Wastewater, Inc., Peoples Natural Gas Company LLC and Peoples Gas Company LLC for all of the Authority and Necessary Certificates of Public Convenience to Approve a Change in Control of Peoples Natural Gas Company LLC, and Peoples Gas Company LLC by way of the Purchase of all of LDC Funding LLC's Membership Interests by Aqua America, Inc., Docket Nos. A-2018-3006061, A-2018-3006062, A-2018-3006063.
- Pennsylvania Public Utility Commission v. Aqua Pennsylvania, Inc. et al. Docket Nos. R2018-3003558 et seq.

- Pennsylvania Public Utility Commission v. Duquesne Light Company, Docket No. R-2018-3000124.
- Pennsylvania Public Utility Commission v. PECO Energy Company- Electric Division, Docket No. R-2018-3000164.
- Joint Petition of MetEd, Penelec, Penn Power, and West Penn Power for Approval of their Default Service Programs for the period commencing June 1, 2019 through May 31, 2023, Docket Nos. P-2017-2637855, P-2017-2637857, P-2017-2637858; P-2017-2637866.
- Pennsylvania Public Utility Commission et al. v. Philadelphia Gas Works, Docket No. R-2017-2586783.
- PECO Energy Company's Pilot Plan for an Advance Payments Program and Petition for Temporary Waiver of Portions of the Commission's Regulations with Respect to that Plan, Docket No. P-2016-2573023.
- Petition of PECO Energy Company for Approval of a Default Service Program for the Period of June 1, 2017 through May 31, 2019, Docket No. P-2016-2534980.

R-2023-3043190 (Wastewater)
CAUSE-PA Set 1

CAUSE-PA 01-001

Responsible Witness: Charles Rea, Senior Director of Rates and Regulatory

Question:

How much of PAWC's proposed $203.9 million total proposed increase will be allocated to an increase in residential rates? Please disaggregate between water and wastewater divisions.

Response:

The Company's proposed residential increase is as follows:

Water	SSS	CSS	Brentwood	BASA	Total
$ 128,795,188	$ (1,784,057)	$ 172,192	$ 278,998	$ 3,476,676	$ 130,938,997

Pennsylvania-American Water Company
Docket Nos. R-2023-3043189 (Water)
R-2023-3043190 (Wastewater)
CAUSE-PA Set 1

CAUSE-PA 01-002

Responsible Witness: Charles Rea, Senior Director of Rates and Regulatory

Question:

From January 2018 to present, how many residential customers does/ did PAWC serve? Please disaggregate this data by service type (i.e. water only, wastewater only, combined), month, and year as of the last day of the month.

If this data is unavailable as of the last day of the month/ year, please provide this data, disaggregated as requested, and specify at which point in the month/year these customer counts were calculated.

Please provide this data in a live Excel spreadsheet.

Response:

Please see CAUSE-PA 01-002_Attachment for the count of residential customers from January 2020 through November 2023. As discussed with CAUSE-PA on December 13, 2023, the Company is limiting the time frame of the data requests back to January 2020.

CAUSE-PA Set 1

CAUSE-PA 01-003

Responsible Witness: Tawana Dean, Senior Manager, Customer Compliance

Question:

From January 2018 to present, how many confirmed low-income customers did PAWC serve? Please disaggregate this data by month and year, as of the last day of the month, and by the following Federal Poverty Level (FPL) ranges:

A. 0-50% FPL;
B. 51-100% FPL;
C. 101-150% FPL; and
D. 151-200% FPL.

If this data is unavailable as of the last day of the month/ year, please provide this data, disaggregated as requested, and specify at which point in the month/ year these customer counts were calculated.

Please provide this data in a live Excel spreadsheet.

Response:

As discussed with CAUSE-PA on December 13, 2023, the Company is limiting the time frame of the data requests back to January 2020. Please refer to CAUSE-PA 01-003_Attachment. The Company did not capture FPL ranges in the system prior to October 2022, and therefore, total confirmed low-income customer counts have been provided for the period January 2020 through September 2022. For part D, the Company does not define 151%-200% as confirmed low income.

R-2023-3043190 (Wastewater)
CAUSE-PA Set 1

CAUSE-PA 01-004

Responsible Witness: Tawana Dean, Senior Manager, Customer Compliance

Question:

How does PAWC define the term "confirmed low income customer"? Please also indicate what customer segments are included in PAWC's designation of "confirmed low income customers."

Response:

The Company defines "confirmed low income customer" to mean a customer for which the Company has received income information indicating that the customer has an annual income at or below 150 percent of the Federal Poverty guidelines. The customer segments included in the designation of confirmed low income customers are the same as the tier levels in the tariff: 0-50%, 51%-100%, and 101%-150%.

Docket Nos. R-2023-3043189 (Water)
R-2023-3043190 (Wastewater)
CAUSE-PA Set 1

CAUSE-PA 01-005

Responsible Witness: Tawana Dean, Senior Manager, Customer Compliance

Question:

Please indicate what steps PAWC has taken to identify low income customers as confirmed low income customers, and what information and/or documentation PAWC relied on to identify such customers.

Response:

PAWC identifies confirmed low income customers by examining weekly reports of customers who are enrolled in the Company's bill discount program. When these customers are enrolled into the discount program, their account is flagged in the Company's MyWater customer platform as low-income. Additionally, the Company reviews LIHWAP grantee remittance lists to identify customers who have been awarded a LIHWAP grant but are not enrolled in the company's H2O discount. The company enrolls these customers into the H2O discount program and as a result, these accounts are flagged as low-income in the Company's MyWater customer platform.

PAWC identifies confirmed low income customers by the income information customers provided to the Company through the Ability to Pay process, as well as through information provided to the Pennsylvania Public Utility Commission when an informal complaint is filed with the Bureau of Consumer Services or when a payment arrangement is requested through the Commission. Please refer to the Company's response to CAUSE-PA-I-9 for additional information.

Furthermore, consistent with the targeted low-income community outreach plan presented to the Customer Assistance Advisory Group during its February 22, 2022, and August 21, 2023 meetings, the Company analyzed U.S. Census Bureau household income data to evaluate which areas have the highest percentages of customers at or below 50% of FPIG. Through this evaluation, which was conducted by the Company's external affairs and customer advocacy teams in Q2 2023 (similar to the analysis conducted in 2022), the Company identified target zip codes and districts in which to further amplify its community outreach efforts in Q3 and Q4. These efforts included social media campaigns, direct mail, and in-person events working directly with local nonprofits, elected officials and other external stakeholders to promote all of the various assistance programs currently available to customers.

Responsible Witness: Charles Rea, Senior Director of Rates and Regulatory

Question:

As of the most recent date available, how many estimated low income customers does PAWC serve? Please explain how PAWC arrived at these estimates, and provide a copy of any supporting documentation used to determine these estimates.

Response:

The number of customers served by levels of household income stated in terms of multiples of Federal Poverty Level are provided in the Summary tabs of PAWC Exhibit CBR-1 and Exhibit CBR-2.

Level 3	250.00%	$3,037.51	$4,108.34	$5,179.18	$6,250.01	$7,320.84	$8,391.68	$9,462.51	$10,533.34	$1,070.83
	300%	$3,645.00	$4,930.00	$6,215.00	$7,500.00	$8,785.00	$10,070.00	$11,355.00	$12,640.00	$1,285.00
Level 4	300.00% and above	$3,645.01	$4,930.01	$6,215.01	$7,500.01	$8,785.01	$10,070.01	$11,355.01	$12,640.01	$1,285.00
LIHEAP eligibility for the 2022 - 2023 heating season	150% FPIG	$1,698.75	$2,288.75	$2,878.75	$3,468.75	$4,058.75	$4,648.75	$5,238.75	$5,828.75	$590.00

1. These levels apply to all Chapter 14 requirements that are dependant on a customer/applicant's income level.
2. PGW reinstatement requirement in accordance with 66 Pa.C.S.A. § 1407(c)(2).
3. 150% is the maximum income for CAP eligibility with the exception of Peoples Natural Gas Company and Peoples Gas LLC (formerly Peoples TWP).
The maximum income for hardship fund and LIURP eligibility can range from 150%-250%. NOTE: Duquesne Light has temporarily increased the maximum income for its hardship fund to 300% FPIG through 2023.
4. 200% is the maximum income for CAP eligibility for Peoples Natural Gas Company and Peoples Gas LLC (formerly Peoples TWP).

Effective: 01/17/2023

At the first CAAG meeting after the final order in this proceeding (Q1 2023), PAWC agrees to provide a written description of its Hardship Fund application process, including its eligibility rules, grant calculation steps, and the grant issuance process.

Pennsylvania American Water (PAW) Hardship Grant Fund

PAW hardship program is administered by the Dollar Energy Fund (DEF).

Hardship Fund Application Process:

To apply for a hardship grant:

- Visit a participating Community Based Organization (CBO) - to locate a CBO near you visit DollarEnergy.org and select Agency Finder or call DEF at 1-888-282-6816

- Apply online using the MyApp customer portal which is accessible through Dollar Energy's Website: https://www.dollarenergy.org/myapp/

- If unable to visit a CBO and cannot access the online application, MyApp, call Dollar Energy Fund at 1-888-282-6816 to apply

Basic Information captured during the application process:

- Account holder name, phone number, address, and email
- Social Security number of ratepayer (required in MyAPP/can be waived at CBO or DEF CSR)
- Utility Company and Account Number (copy of bill/shut off notice)
- Household size (name and date of birth of each occupant
- Monthly household income total (before taxes for everyone in household)
- Proof of Sincere Effort of Payment

- Proof of Household Income

Proof of Household Income/Supporting documents:

- Program applicants applying at a CBO are asked to bring proof of income and supporting documents, at the time the appointment is made
- Applicants applying via MyApp will receive an email indicating the next steps in the application process. The applicant can provide proof of income and supporting documents via DEF website upload, email, or fax to DEF
- Applicants applying via DEF customer service representative are advised at the time of application of the required documents for income verification. The applicant can provide documents via DEF website upload, email or fax

Incomplete Applications:

- The CBO works directly with the grant applicant and will submit the application when it is complete
- Reminders are sent to applicants who apply through MyApp or a DEF representative weekly, subject to application volume.

Eligibility Rules:

To be eligible for a grant the account must be:

- Residential
- Single home or apartment
- No "cooking only," commercial, industrial, or apartments with shared utility service.
- The name on the account must be that of an adult who is currently living in the home.
- The customer must be at or below 200% of the Federal Poverty Level to qualify for a hardship grant.
- Customers must have also made a payment or payments totaling **$50** in the previous 3 months (Good Faith Effort/Sincere Effort of Payment).

Grant Calculation Steps:

Effective January 28, 2023, PAW provides a grant amount of $500 if the customer's account balance is equal to or exceeds $500. If the customer's account balance is less than $500, PAW provides a grant amount equal to the account balance. The amount granted will not exceed the total account balance.

Approval process:

- Applications are processed through DEF iPartner system
- Typical process timeframe is 1-2 business days
- If there is no pending term, the application is reviewed and processed by DEF
- If applicant has a pending termination or if the service is off, the application is forwarded to PAWC for review and processing.
- PAW will stop the pending termination or restore service where the grant amount is sufficient to stop termination or restore service.

Grant Issuance:

- Weekly, DEF, remits payment via EFT to Pennsylvania American Water for the grants approved the prior week (Monday-Sunday)
- A list of grant recipients is emailed to Pennsylvania American Water and the cash management team applies the funds directly to the customers' accounts.
- The customer will see the grant award on their next billing statement.

Denial process

- Customers who are denied can rectify the denial reason and can be reconsidered without applying again

- If a customer is denied, they will be notified by text message and/or email, based on contact information they provided in their application.
- If the text message or email is not opened in 2 weeks, a letter is sent to the customer with the denial reason
- To be reconsidered, the customer must contact the CBO where they applied, or they can contact Dollar Energy Fund
- Customers who provided an email address can simply reply to their grant decision email from granthelp@dollarenergy.org
- Once the updated information is received, DEF or the CBO will add to the existing application, which will be sent for review again.

R-2023-3043190 (Wastewater)
CAUSE-PA Set 1

CAUSE-PA 01-009

Responsible Witness: Tawana Dean, Senior Manager, Customer Compliance

Question:

Please provide a detailed description of all circumstances under which (1) the Company would obtain the income information of a residential customer; and (2) the Company screens for income information from residential customers.

Response:

The Company obtains income information of a residential customer through the Ability to Pay Process. Any income information the Company receives is voluntarily provided by the customer. This can occur during the following circumstances:

- When a residential customer expresses an inability to pay their bill, whether their account is current or past due.
- The customer requests more time to pay their current bill (extension).
- The customer requests an arrangement on a high current bill (installment plan).
- The customer requests an arrangement on a past due balance (installment plan).
- At the end of the call when addressing the balance, the customer is not paying their past due balance over the phone.
- Customer has received a disconnection notice.
- The customer requests information about hardship grants

The Company also obtains residential customer income information from the Pennsylvania Public Utility Commission's Bureau of Consumer Services, when a customer requests a payment arrangement through the Commission or when an informal complaint is filed.

CAUSE-PA Set 1

CAUSE-PA 01-011

Responsible Witness: Tawana Dean, Senior Manager, Customer Compliance

Question:

From January 2018 to present, how many customers were enrolled in PAWC's BDP? Please disaggregate this data by service type (i.e. water only, wastewater only, combined), month, and year as of the last day of the month/year.

If this data is unavailable as of the last day of the month/ year, please provide this data, disaggregated as requested, and specify at which point in the month/ year these customer counts were calculated.

Please provide this data in a live Excel spreadsheet.

Response:

Please refer to CAUSE-PA 01-011_Attachment. As discussed with CAUSE-PA on December 13, 2023, the Company is limiting the time frame of the data requests back to January 2020 through November 2023.

R-2023-3043190 (Wastewater)
CAUSE-PA Set 1

CAUSE-PA 01-013

Responsible Witness: Tawana Dean, Senior Manager, Customer Compliance

Question:

From January 2018 to present, how many customers received a hardship grant through PAWC's H2O program? Please disaggregate this data by service type (i.e. water only, wastewater only, combined), month, and year as of the last day of the month/year.

If this data is unavailable as of the last day of the month/ year, please provide this data, disaggregated as requested, and specify at which point in the month/year these customer counts were calculated.

Please provide this data in a live Excel spreadsheet.

Response:

Please refer to CAUSE-PA 01-013_Attachment. As discussed with CAUSE-PA on December 13, 2023, the Company is limiting the time frame of the data requests back to January 2020.

R-2023-3043190 (Wastewater)
CAUSE-PA Set 1

CAUSE-PA 01-015

Responsible Witness: Tawana Dean, Senior Manager, Customer Compliance

Question:

Please describe in detail what water conservation, service line, and/or leak repair assistance, if any, is provided to each of the following customer segments:

A. Residential customers;
B. Confirmed low income customers; and
C. H2O program participants.

Response:

The company does not provide service line and/or leak repair assistance to any customers. The company provides water conservation kits and conservation education materials to H2O program participants who affirm they want to receive a kit. Refer to the Company's response to OCA 11-018 for kit and conservation information provided.

CAUSE-PA Set 1

CAUSE-PA 01-016

Responsible Witness: Tawana Dean, Senior Manager, Customer Compliance

Question:

From January 2018 to present, how many customers received each of the following assistance types, disaggregated by year, as of the last day of the year:

A. Water conservation assistance;
B. Service line assistance; and
C. leak repair assistance.

If this data is unavailable as of the last day of the year, please provide this data, disaggregated as requested, and specify at which point in the year these customer counts were calculated.

Please provide this data in a live Excel spreadsheet.

Response:

A. Please refer to the Company's response to OCA 11-018, part F and CAUSE-PA 01-016_Attachment for the data in Excel format. As discussed with CAUSE-PA on December 13, 2023, the Company is limiting the time frame of the data requests back to January 2020.
B. PAWC does not provide service line assistance.
C. PAWC does not provide leak repair assistance.

CAUSE-PA Set 1

CAUSE-PA 01-028

Responsible Witness: Tawana Dean, Senior Manager, Customer Compliance

Question:

From January 2018 to present, please provide the median and mean arrearages, disaggregated by month and year, as of the last day of the month, for each of the following groups:

A. All residential customers;

B. Residential customers, excluding confirmed low income customers;

C. Confirmed low income customers;

D. Confirmed low income customers, excluding H2O program participants; and

E. H2O program participants.

If this data is unavailable as of the last day of the month/ year, please provide this data, disaggregated as requested, and specify at which point in the month/year these customer counts were calculated.

Please provide this data in a live Excel spreadsheet.

Response:

Please refer to CAUSE-PA 01-028_Attachment, which for part D excludes BDP participants and for part E provides the requested information for BDP participants. The BDP is the bill discount component of the overall H20 program. As discussed with CAUSE-PA on December 13, 2023, the Company is limiting the time frame of the data requests back to January 2020.

	A. All residential customers		B. Residential customers, excluding confirmed low income customers;		C. Confirmed low income customers;		D. Confirmed low income customers, excluding H2O program participants;		E. H2O program participants.

Pennsylvania-American Water Company
Docket Nos. R-2023-3043189 (Water)
R-2023-3043190 (Wastewater)
CAUSE-PA Set 1

CAUSE-PA 01-030

Responsible Witness: Tawana Dean, Senior Manager, Customer Compliance

Question:

From January 2018 to present, please provide the median and mean residential customer usage, disaggregated by service type (i.e. water only, wastewater only, combined), month, and year, as of the last day of the month/year, for each of the following groups:

A. All residential customers;

B. Residential customers, excluding confirmed low income customers;

C. Confirmed low income customers;

D. Confirmed low income customers, excluding H2O program participants; and

E. H2O program participants.

If this data is unavailable as of the last day of the month/ year, please provide this data, disaggregated as requested, and specify at which point in the month/year these customer counts were calculated.

Please provide this data in a live Excel spreadsheet.

Response:

A-E. Please refer to CAUSE-PA 01-030_Attachment. As discussed with CAUSE-PA on December 13, 2023, the Company is limiting the time frame of the data requests back to January 2020.

Docket Nos. R-2023-3043189 (Water)
R-2023-3043190 (Wastewater)
CAUSE-PA Set 2

CAUSE-PA 02-001

Responsible Witness: Tawana Dean, Senior Manager, Customer Compliance

Question:

Please describe all outreach events that PAWC has participated in from 2020 to present to promote its low-income assistance programs, and provide the date, location, and audience for each event.

Response:

The Company's external affairs team and Compliance staff maintain a robust program of outreach events throughout the year in support of promoting its low-income customer assistance programs. These events were not tracked and recorded in a consistent, statewide fashion until 2021. See attachment CAUSE-PA 02-001_Attachment for a list and details about these events by year.

Docket Nos. R-2023-3043189 (Water)
R-2023-3043190 (Wastewater)
CAUSE-PA Set 2

CAUSE-PA 02-002

Responsible Witness: Tawana Dean, Senior Manager, Customer Compliance

Question:

Has PAWC targeted any specific communities in its outreach related to its low income assistance programs since 2020? If the answer to this question is yes or in the affirmative, please indicate which specific communities PAWC has targeted, and how PAWC determined it would target such communities.

Response:

Yes. In 2022, following an analysis of customer household income data by district and municipality, the Company selected eight communities to target low-income program outreach throughout the year. The analysis utilized publicly available data from the U.S. Census Bureau, and the communities selected reflected communities with higher percentages of customers at or below 150% of FPL. The Company's 2022 low-income program outreach communities were Brownsville, Coatesville, Indiana, New Castle/Ellwood, Steelton, Uniontown/Connell, Warren and Wilkes-Barre/Scranton. In all target communities, the Company conducted outreach to offices of elected officials and their staff, with a focus on sharing customer assistance program information that elected officials could share with and promote to their constituents.

While not one of the originally identified target communities, the Company also focused on communicating low-income program information in Spanish to several of its communities with higher concentrations of Spanish-speaking customers.

In 2023, the Company reviewed an updated analysis of customer household income data by district and municipality utilizing publicly available data from the U.S. Census Bureau. The Company determined it would target its 2023 low-income program outreach to communities with higher percentages of customers at or below 50% of FPL as well as at or below 150% of FPL, which included Berwick, Brownsville, Clarion, Coatesville, Foster, Frackville, Kane, Koppel, Lehman Pike, McKeesport, portions of McMurray, Milton, New Castle/Ellwood, Nittany, portions of Pittsburgh, Pocono, Punxsutawney, Shippenville, Steelton, Uniontown/Connellsville, Warren, portions of Wilkes Barre/Scranton, and York.

The Company launched a targeted social media campaign promoting its assistance programs in these areas in Q3, promoting the outreach in more than 120 zip codes representing areas covering approximately 230K customers.

CAUSE-PA 02-006

Responsible Witness: Tawana Dean, Senior Manager, Customer Compliance

Question:

From January 2020 to present, disaggregated by month and year, as of the last day of the month/year, for customers who received a Hardship Fund grant, please indicate the average amount of arrears customers had at the time they received a Hardship Fund grant.

If this data is unavailable as of the last day of the month/ year, please provide this data, disaggregated as requested, and specify at which point in the month/ year these customer counts were calculated.

Please provide this data in a live Excel spreadsheet.

Response:

Please refer to CAUSE-PA 02-006_Attachment.

CAUSE-PA 02-006_Attachment

Month	Average amount of arrears
202001	$393.42

R-2023-3043190 (Wastewater)
CAUSE-PA Set 2

CAUSE-PA 02-007

Responsible Witness: Tawana Dean, Senior Manager, Customer Compliance

Question:

Please specifically describe all program requirements for a customer to receive a Hardship Fund grant through the H2O program, including, (1) what income information and documentation a customers must provide to qualify for a Hardship Fund grant through the H2O program; and (2) the amount of any good faith payment requirements a customer must make to qualify for a Hardship Fund grant.

Response:

To receive a Hardship Fund grant through the H2O program, a customer must complete a Hardship Grant application, which requires income documentation. Refer to CAUSE-PA 02-007_Attachment for Income Documentation Guidelines effective January 2024. Additionally, a copy of the utility bill or termination notice is required. Refer to CAUSE-PA 01-007 for eligibility requirements, benefits, program rules and enrollment options. Refer to CAUSE-PA 01-007 for the good faith payment requirement.

Revised DEF Income Guide – 6-8-23

Income Type	Acceptable Proof of Income	Grant Exceptions	IS Clarifications
Family member: Include as a household member. Include their gross income they receive. **Non-family member**: Include boarders and roomers, including friends or romantic partners residing at the location, as a household member. DO NOT include their gross income. Use 50% of the amount they pay for room/board. List that amount as *Rental Income* under the RP.	Non-family members can send: • Copy of the lease or rental agreement • Copy of a receipt for the rent • Other income form (last resort)		Divide amount on lease, rental agreement or receipt by 2 Put the rental income under the ratepayer.
Black Lung Benefits	Coal mine worker's compensation of expected benefit statement Bank statement from the last 30 days		
Cash Assistance *Public Assistance*	Benefits statement (both sides) Printout from DPW website Email or letter (on letterhead) from caseworker		CRM verification is good for up to 6 months SNAP benefits/Food Stamps are not counted as income
Spousal Support	Court order (only if receiving amount ordered) Domestic relations printout (last 30 days) –www.humanservices.state.pa.us Eppicard/Way2Go card printout (last 30 days) www.GoProgam.com Bank Statement (last 30 days) Passthrough Welfare: Benefits statement from welfare both sides Voluntary spousal support: Use other income form Child support payments are excluded from income calculation		It is ok to accept PACES screenshots that show "Payee" as long as you can make a reasonable determination for both CAP and grant. The Eppicard system has made some changes, so you may see some new documentation labeled Eppicard or way2go card.

Revised DEF Income Guide – 6-8-23

Investment Income *Interest*	Dividend Statement Bank Statement showing payment	.	This is typically a payment they receive for investments (dividends) Do not count small amounts of checking/savings account interest on bank statements.
Long Term or Short-Term Disability *Disability*	Benefits statement Copy of disability checks/check stubs (last 30 days) Bank statement (last 30 days)		

Other Income (includes long-term and recurring (as opposed to short-term or one-time) cash contributions)	Other Income Form		If CSR forgot to verify, verify it. If you complete the other income form, verify the income.
Pension	Pension board letter Copy of 1099 Copy of pension check with stub attached Bank statement from current year		Pension Board letter is typically only received once. We can accept pension board letters from previous years. 1099's must be from the previous year at the time of application or recertification (e.g., 2022 1099 will be accepted in 2023). Checks stubs can be from the current year, or the last 30 days.
Rental Income	Copy of the lease or rental agreement Copy of a receipt for the rent Verify as rental income. We have a confirmed signed statement from a renter stating they pay RP rental income. This is a verifiable document.		Nonfamily member
Retirement Savings *Pension*	Copy of 1099 Copy of Form 5498 for Roth IRA		
Royalties	Monthly Royalty Statement Copy of royalty check (last 30 days) Bank Statement (last 30 days) Other Income Form (last resort)		

Revised DEF Income Guide – 6-8-23

Salary & Wages *(Employment)*	Paystubs for the last 30 days Letter from employer Handwritten Paystubs? Complete other income form School teachers for CAP: Advise to send last paystubs received Other seasonal workers, laid off, for CAP: If not receiving UEC, treat as 0 income Uber/Lyft/DoorDash/Instacart/ETC: Last 30 days of payment summary	Seasonal/school employee: Only request income received in last 30 days if applying for only a grant 1099 is not acceptable	If missing one paystub from the last 30 days, try to use the missing paycheck method. Acceptable for CAP and Grants. If customer does not send a full 30 days or is a seasonal employee, calculate using YTD. Acceptable POI for CAP only. There is no need to do YTD if customer sends Paystubs covering the last 30 days, even if one is for $0.
	Military Pay: Military LES (Leave & Earnings Statement) from last 30 days **17-year-old and younger/18-year-old still in high school: Wages are not counted as income for any program including Hardship. Do not verify salary/wages for minors, enter as Zero Income.**	YTD calculation is not acceptable for grant- the last 30 days POI is required.	Verify as usual. $0 paystubs are acceptable for CAP/WARM and Hardship. Checks stubs can be from the current year, or the last 30 days. If review the CSR states we are expecting to see less than 30 days' worth of paystubs for a documentation aligns, verify it. Acceptable POI for grant only. Put in note additional paystub Military Pay: On LES, take YTD Entitle field subtract YTD Deduct field divide by week of the year multiply by 4.

Revised DEF Income Guide – 6-8-23

Self-Employment (Includes *subcontractors*)	Quarterly statement from accountant QuickBooks or other type of online ledger Statement from Accountant on letterhead stating the income from the last 30 days Tax Return 1040 and schedule C Copy of 1099 If in partnership, Schedule K1 & Schedule E Other Income Form (last resort) Subcontractor: 1099 for previous tax year is acceptable if they don't have paystubs	1040 and Schedule C can only be accepted up to 30 days after filing 1099 can only be accepted up to 30 days after filing	For CAP, deduct the following lines on the Schedule C: Start with Line 7 8. advertising 10 commissions and fees 11 contract labor 12 Depletion 14 employee benefit programs 17 legal and professional fees 18 office expense 22 supplies 25 utilities 26 wages Divide by 12 For grant (if received during tax season) , start with line 7 and divide by 12 for the amount to verify. No deductions taken. 1040 and 1099 are acceptable when it is outside of the tax filing season. Follow guidance in Teams Knowledgebase on other Schedules.
Social Security *Social Security* *SS Disability*	Social Security Benefit Statement (also called award letter) Current year or previous year w/increase factored in.		CRM verification is good for the rest of the year.
SSI Survivor Benefits list under *Social Security*	www.socialsecurity.gov/myaccount or call 1-800-772-1213 Bank Statement Letter from bank on letterhead confirming direct deposits Copy of 1099 from previous year NOTE: Medicare is deducted for seniors.		Bank Statement can be from the CURRENT year for SS and SSD. It does not have to be from the last 30 days. As long as bank statement shows all deposits for that month, it is verifiable. We cannot accept a previous

	SSI State Supplement of $22.10 or less- No verification needed		year's letter or a 1099 for SSI only for SS/SSD. SSI received for children is excluded from the income calculation. You can verify the net amount after all deductions (except tax withholdings) **SSI State Supplement of $22.10 or less:** received, it needs to be verified. If POI is Verify in CRM *Public Assistance* Add to SSI total in SCAR and/or
Stipends	1099/W2/Letter stating the pay frequency and amount of payment We do not consider loans and scholarships paid to the institution as income. If a student receives the loan or scholarship amount and then pays it directly to the institution, this amount is also excluded from the income calculation.		DO NOT complete an "Other Income" Form. Proof of Income is needed. For now, Stipends must be entered as "Salary and Wages" until further notice. Take the amount of the stipend received for the semester and divide by 5 to get the monthly amount. We consider any stipend for living expenses received as income.
Unemployment Compensation	Notice of financial determination Unemployment printout – www.uc.pa.gov Bank statement from last 30 days		

Utility Checks	Copy of utility check If reimbursed on a card, printout from the card (last 30 days) Document from housing that lists the utility reimbursement

Workman's Compensation	Letter of determination		
Worker's Comp	Benefits statement from last 30 days Copy of checks (last 30 days) Bank statement from last 30 days		
Zero Income	Zero Income Form	Hardship always looks at last 30 days. If income has been received in last 30 days and customer is applying for a grant document/request POI.	A new zero income form is requested every six months.
Public Housing Benefit	■ Lease or lease addendum issued by a housing authority OR ■ Oral or written verification by a landlord or housing authority that the individual or household is receiving public housing		
Public Benefits	■ receipt of LIHEAP letter, printout, or verification by receiving utility ■ letter or communication (electronic or print) by government agency of receipt of TANF or Cash Assistance funds		• Initially, customer shall be placed in BDP/AMP at the lowest discount amount. DEF will subsequently request sufficient information from the customer to determine the appropriate discount level. If the customer does not provide such information, the customer will remain on the lowest discount amount.

Revised DEF Income Guide – 6-8-23

Proof of Enrollment in BDP	■ Confirmation by DEF's system or utility system that customer is enrolled in BDP.		Customer will be enrolled in AMP upon request if already enrolled in BDP.

NOTES:

- Emailed receipts confirming deposits to a bank account are unacceptable as POI
- Pre-paid debit/credit card statements showing direct deposits from valid sources (Social Security, Department of Public Assistance, etc.) are acceptable in lieu of a bank statement
- **Proof of loss of income for wages, social security, unemployment, etc. is NOT required for any program. If a customer contacts us and says they are now Zero Income, we can proceed with a CAP application immediately. Grants do require the last 30 days POI.**

CAUSE-PA Set 2

CAUSE-PA 02-012

Responsible Witness: Tawana Dean, Senior Manager, Customer Compliance

Question:

As of the most current date available, please provide the average monthly bill amounts of H2O BDP participants, disaggregated by usage levels (i.e. 1,000; 2,000; 3,000; 4,000; and 5,000 gallons) and Federal Poverty Level (FPL) range (i.e. 0-50%; 51-100%; 101-150%).

Please provide this data in a live Excel spreadsheet.

Response:

Please refer to CAUSE-PA 02-012_Attachment. Please note that the Company did not capture FPL ranges in the system prior to October 2022, and therefore, the average monthly bill amounts have been provided for the period October 2022 – November 2023.

CAUSE-PA Set 2

CAUSE-PA 02-014

Responsible Witness: Tawana Dean, Senior Manager, Customer Compliance

Question:

Does Dollar Energy Fund (DEF), as PAWC's low-income assistance program administrator, currently conduct cross-program referrals between PAWC's programs and other utility assistance programs which DEF administers? If the answer to this question is yes or in the affirmative, please describe in detail to what extent DEF currently conducts cross-program referrals and enrollments related to PAWC's programs.

Response:

Yes, Dollar Energy Fund, PAWC's program administrator, conducts cross-program referrals and/or enrollment in other utility assistance programs it administers.

Dollar Energy Fund administers customer assistance programs for First Energy, Columbia Gas, Peoples Gas, National Fuel Gas, ALCOSAN and Verizon.

<u>Process for cross referrals/enrollments:</u>

1. Customers calling Dollar Energy Fund's main call center phone number select a program from its interactive voice response system and speak with a DEF customer service representative for that program.
2. Customer contact records are created within Dollar Energy's customer relationship management ("CRM") system, which enables a single customer record for multiple programs.
3. At the end of every call, customers are asked about their other utilities.
4. If the program for the customer's other utilities are managed within Dollar Energy's call center, they are transferred to a DEF CSR for that program and an application is completed.
5. Any documents required as part of an application process for a program are scanned into Dollar Energy's document imaging system with a notation in its CRM system. This enables a customer to use the same income verification documents for enrollment into multiple programs.*

*PAWC currently accepts verbal income information for enrollment into the discount program, therefore no documents would be requested, and enrollment is completed on the initial phone call with the customer.

Question:

Does PAWC, or DEF as PAWC's low income assistance program administrator, track the number of cross-program referrals and/or enrollments it conducts? If so, please indicate the number of cross-program referrals and enrollments, respectively, conducted by PAWC, or by DEF as PAWC's program administrator, from January 2020 to date, disaggregated by month and year, as of the last day of the month/year.

If this data is unavailable as of the last day of the month/ year, please provide this data, disaggregated as requested, and specify at which point in the month/ year this data was calculated.

Please provide this data in a live Excel spreadsheet.

Response:

No. PAWC and DEF systems do not track the number of cross-program referrals and enrollments conducted.

CAUSE-PA 02-016

Responsible Witness: Tawana Dean, Senior Manager, Customer Compliance

Question:

Please specifically describe what steps, if any, PAWC has taken to conduct joint outreach efforts with other utilities through DEF.

Response:

In October 2022, the MyApp portal was launched for hardship grant applications. MyApp is DEF's online application which allows customers to apply online for programs offered by partnering utilities rather than by calling DEF or through a Community Based Organization. MyApp will facilitate joint outreach efforts, cross-enrollments and enhance the customer experience. Since the beginning of the current program year, October 1, 2023 through December 27, 2023, 61% of completed grant applications for a water grant were submitted through MyApp. Additionally, during the same timeframe, 64% of completed applications for a wastewater grant were submitted through MyApp.

Please refer to the Company's response to CAUSE-PA 02-001 for joint outreach efforts conducted with Dollar Energy Fund.

Question:

Please describe in detail PAWC's policies and procedures for monitoring DEF's administration of PAWC's low-income assistance programs, and provide a copy of the most recent assessment, report, or other document related to PAWC's monitoring of DEF's administration of PAWC's low income assistance program, and indicate when the assessment, report, or other document is dated.

Response:

PAWC is granted access to DEF *iPartner*© Grant Management System to review information regarding fund balances, application processing, application status and standard reports. Reports are available on all application and grant activities through a standard set of reports. PAWC can request DEF provide reports other than the standard iPartner© reports.

PAWC does not have any formal policies or assessments related to DEF's administration of PAWC's low-income program.

Question:

Please indicate as of the most recent date available:

A. On what days and within what hours are PAWC's call center(s) available to residential consumers;

B. On what days and within what hours are calls to PAWC's call center(s) handled by a live representative or an automated system recording, respectively;

C. On what days and within what hours can a consumer call DEF related to PAWC's low-income assistance programs;

D. On what days and within what hours are calls to DEF related to PAWC's low-income assistance programs handled by a live representative or an automated system recording, respectively.

Response:

A. Call center operations are open every day, 24-hours a day, 365 days a year for all customers, including residential customers, who have an emergency. Normal hours of operation for PAWC customers for calls for all non-emergencies are Monday through Friday from 7 am to 7 pm.

B. PAWC customers can utilize the automated system (IVR) every day, 24-hours a day, 365 days a year. Live representatives are available per the times provided in A above.

C. Customers can contact Dollar Energy Fund representatives Monday – Friday 8AM – 5PM ET. Dollar Energy Fund's interactive voice response (IVR) can be reached 24 hours a day.

Consumers seeking a hardship grant can begin the application process 24 hours a day/7 days a week using the MyApp portal. Consumers can upload eligibility documentation 24 hours a day/7 days a week**.**

D. Refer to the response to part C.

Responsible Witness: Tawana Dean, Senior Manager, Customer Compliance

Question:

Please provide the following data related to Dollar Energy Fund's administration of PAWC's low-income assistance programs:

A. The number of DEF full time and part time staff, respectively, available to answer consumer calls related to PAWC's low-income assistance programs, as of the most current date available;

B. Average speed of answer by DEF for calls related to PAWC's low-income assistance programs directed to a customer service representative from 2020 to present, disaggregated by month and year, as of the last day of the month/ year;

C. The mean and median hold time for consumer to speak to a live DEF customer service representative related to PAWC's low-income assistance programs from 2020 to present, disaggregated by month and year, as of the last day of the month/ year;

D. Abandonment rate for calls directed to a DEF customer service representative related to PAWC's programs from 2020 to present, disaggregated by month and year, as of the last day of the month/ year.

If this data is unavailable as of the last day of the month/ year, please provide this data, disaggregated as requested, and specify at which point in the month/ year this data was calculated.

Please provide this data in a live Excel spreadsheet.

Response:

A. PAWC's bill discount program is staffed by DEF with 2.5 full-time equivalents. These 2.5 full-time equivalents are responsible for all aspects of PAWC's bill discount program.

PAWC's grant program is staffed by DEF with 5 full-time equivalents. These individuals are responsible for all activity related to PAWC's grant program including, but not limited to, processing applications from MyApp and verifying income/eligibility, processing applications in iPartner, answering questions from consumers/utility company representatives, answering questions from partnering community-based organizations.

B-D. Please refer to CAUSE-PA 02-023 Attachment. Please note that Dollar Energy fund does not maintain median data.

Docket Nos. R-2023-3043189 (Water)
R-2023-3043190 (Wastewater)
CAUSE-PA Set 2

CAUSE-PA 02-025

Responsible Witness: Bruce W. Aiton, Vice President of Engineering for PAWC

Question:

Has PAWC taken any steps to evaluate the need for a service repair line and/or replacement assistance program? If so, please describe what steps PAWC has taken to evaluate this need, and provide a copy of any needs assessment, written documents, work papers, contracts, or memoranda used in this evaluation.

Response:
There are three scenarios. First: a standard non-lead water service line. Second: a "lead" service line, which may also include a galvanized service line. And third: a wastewater service lateral.

For the non-lead water service line: No, due to limitations in the Company's ability to spend capital or operational money on assets not owned by the Company, no specific efforts or evaluation of the need for service line repair has taken place.

For the "lead" containing service line: the Company has petitioned and been approved by the PUC a lead service line replacement program. The Company is now in process of developing an inventory of customer and company side lead service lines. Consistent with recent EPA guidance, the target is to have all lead service lines replaced over the next ten years. Documentation for the ruling is available on the PUC website.

For the third, wastewater service laterals: the PUC has provided guidance through regulation as to when a utility may seek PUC approval of a sewer lateral replacement program. The Company is evaluating whether it is able to seek such permission in conformance with the regulations. No papers, needs assessment or other documentation exist at this time.

CAUSE-PA Set 2

CAUSE-PA 02-026

Responsible Witness: Bruce W. Aiton, Vice President of Engineering for PAWC

Question:

As of the most recent data available, what is the average cost for a PAWC customer to have a damaged customer-side service line repaired?

Response:

There are two scenarios. If a customer service line is determined to be a lead service line, which may be lead or possibly galvanized that had been connected to lead historically, then there is no cost to the customer for the Company to replace that lead service line. Alternatively, if the service line is not lead or lead containing, then the Company is not allowed to repair the customer-side, customer owned service line. The Company employees may dig to find the leak, then depending on if the damage is on the customer side or Company side, the Company will either show the customer or if on the Company side, the Company will complete repairs at no direct cost to the customer.

Docket Nos. R-2023-3043189 (Water)
R-2023-3043190 (Wastewater)
CAUSE-PA Set 2

CAUSE-PA 02-027

Responsible Witness: Jim Runzer, Vice President of Operations for PAWC

Question:

Please describe any and all steps that PAWC takes prior to disconnection of water service to a property or unit with a damaged customer-side service line.

Response:

PAWC will send the customer a letter advising the customer of the damaged service line and notifying them they have 10 days to repair the damaged line. PAWC will send a field service representative on the 11th day or after to verify the leak has been repaired. If not repaired, PAWC will send a 10-day termination notice with a potential shut off date. 3 days prior to shut off date, PAWC will send a field service representative to leave a 3-day door hanger notice. A Company termination shut off order is issued on the shut off date and service is disconnected if the leak is still not repaired and shut off notice is left.

R-2023-3043190 (Wastewater)
CAUSE-PA Set 2

CAUSE-PA 02-029

Responsible Witness: Jim Runzer, Vice President of Operations for PAWC

Question:

Between 2020 and present, disaggregated by year, please indicate how many PAWC customers had their service disconnected as a result of a damaged customer-side service line. If possible, please additionally disaggregate by the following:

A. All residential customers;

B. Confirmed low income customers; and

C. Customers enrolled in the H2O program.

If this data is unavailable as of the last day of the year, please provide this data, disaggregated as requested, and specify at which point in the year these customer counts were calculated.

Please provide this data in a live Excel spreadsheet.

Response:

Below are the totals of the number of customers that had their service disconnected as a result of a damaged customer-side service line leak. The company does not track this information by confirmed low-income or customers enrolled in the H2O program.

Year	Non-Residential	Residential
2020	23	156
2021	33	258
2022	49	373
2023 (as of 12/21/2023)	24	250
Grand Total	**129**	**1037**

R-2023-3043190 (Wastewater)
CAUSE-PA Set 2

CAUSE-PA 02-030

Responsible Witness: Deb Degillio, VP, Customer Service

Question:

Does PAWC or its affiliates offer insurance for customer side service lines? If so:

A. How much does the insurance cost?

B. Please provide a copy of any applications, agreements, and marketing materials used in relation to this insurance.

Response:

PAWC and its affiliates do not offer insurance and/or protection plans for customer side service lines. However, Oncourse Home Solutions (marketed as American Water Resources) offers protection plans for PAWC customers and for the convenience of customers, charges for these services can be included in PAWC bills. This is voluntary and at the discretion of customers.

A. Protection plans, including pricing of products/services is determined by Oncourse. Please refer to the response to OCA-08-022 for payments collected by PAWC from its customers on behalf of Oncourse.

B. PAWC does not create, pay for, or send any marketing materials for non-basic services to Pennsylvania customers. Please refer to the response to OCA-20-017 for the contractual arrangement with Oncourse.

CAUSE-PA Set 3

CAUSE-PA 03-013

Responsible Witness: Jim Runzer, Vice President of Operations for PAWC

Question:

From 2020 to present, disaggregated by year, as of the last day of the year, please indicate:

a. The number of PAWC residential accounts coded as tenant-occupied;

b. The number of PAWC residential accounts coded as tenant-occupied that received a notice pursuant to the DSLPA for voluntary requests for disconnection;

c. The number of PAWC residential accounts coded as tenant-occupied that received a notice pursuant to the DSLPA for involuntary termination for nonpayment;

d. The number of PAWC residential accounts coded as tenant-occupied that were terminated for nonpayment;

e. The number of PAWC residential accounts coded as tenant-occupied that had service voluntarily disconnected at the request of a landlord and/or property owner.

If this data is unavailable as of the last day of the year, please provide this data, disaggregated as requested, and specify at which point in the year this data was calculated.

Response:

Please see CAUSE-PA 03-013_Attachment for a. d. and e. The company does not track the information requested in b. and c.

Year	a. The number of PAWC residential accounts coded as tenant-occupied;	d. The number of PAWC residential accounts coded as tenant-occupied that were terminated for non payment	e. The number of PAWC residential accounts coded as tenant-occupied that had service voluntarily disconnected at the request of a landlord and/or property owner.
2020	18,621	23	2,873

CAUSE-PA Set 3

CAUSE-PA 03-014

Responsible Witness: Jim Runzer, Vice President of Operations for PAWC

Question:

From 2020 to present, has PAWC identified any accounts that were coded as non-tenant accounts, despite having received information that the account and/or property was tenant-occupied? If so, please indicate, disaggregated by year, as of the last day of the year:

a. The number of accounts coded as non-tenant accounts, despite having received information that the account and/or property was tenant-occupied;

b. The number of accounts set forth in response to CAUSE-PA III-14a. who had services voluntarily disconnected;

c. The number of accounts set forth in response to CAUSE-PA III-14a. who had services involuntarily terminated for nonpayment;

If this data is unavailable as of the last day of the year, please provide this data, disaggregated as requested, and specify at which point in the year this data was calculated.

Please provide this data in a live Excel spreadsheet.

Response:
PAWC has a process in place to update an account status from non-tenant to tenant upon receipt of appropriate information. The Company does not track the accounts that have been updated from non-tenant to tenant.

R-2023-3043190 (Wastewater)
CAUSE-PA Set 3

CAUSE-PA 03-023

Responsible Witness: Deb Degillio, VP, Customer Service

Question:

When PAWC receives a request to terminate water service from a municipality or municipal authority, as defined by the Pennsylvania Water Services Act (53 P.S. § 3102.101 et seq.) because the owner or occupant of the premises neglected or failed to pay, for a period of 30 days from the due date, a rental, rate or charge for sewer, sewerage or sewage treatment service imposed by that municipality or municipal authority:

a. What notice(s) does PAWC serve on the property and how are these notice(s) served?

b. What process does PAWC follow when informed that the customer has formally disputed the sewer charges?

c. What process does PAWC follow if informed that the property is tenant occupied and the termination is due to nonpayment by a landlord/ account holder?

Please provide copies of any and all notices, policies, procedures, or other documents utilized regarding such termination requests under the Water Services Act.

Response:

a. Please refer to OCA 08-038.
b. If a municipality or municipal authority informs the Company of a dispute, the termination would be canceled.
c. If a municipality or municipal authority informs the company of an improper coding, the Company would cancel the termination and code the customer's account accordingly.

Pennsylvania-American Water Company
Docket Nos. R-2023-3043189 (Water)
R-2023-3043190 (Wastewater)
CAUSE-PA Set 3

CAUSE-PA 03-025

Responsible Witness: Tawana Dean, Senior Manager, Customer Compliance

Question:

What is PAWC's process for confirming with a municipality or municipal authority that the municipality or municipal authority complied with the requirements of the Pa. Water Services Act? Please provide a copy of any current policies, procedures, SOPs, training materials, or other documents which describe PAWC's process for confirming these requirements.

Response:

When the municipality or municipal authority has a request for shut off, they utilize a managed file transfer site. They must indicate by marking an "x" in the template to confirm that every element of the following statement is true and correct regarding the requested shut-off of water service to this premise:
"A responsible officer of the municipality is hereby requesting the termination of water service to the premise for unpaid and overdue wastewater charges. I hereby also confirm that the account for the premise is not a tenant occupied property where the landlord is the ratepayer. I hereby confirm that the municipality has lawfully complied with all notice requirements required by The Pennsylvania Water Services Act (P.L. 85) 53 P.S. 3102.501 et seq. prior to requesting termination of water services to this premise including the requirements to mail and post written notices of termination to this premise within the applicable time frames. Additionally in accordance with its agreement with PA American Water the municipality hereby affirms that it has not received a written statement from the person(s) liable for the payment of such wastewater charges stating that there is a "just defense" to the claim for wastewater charges or any part thereof for this premise. The municipality agrees to immediately notify PA American Water if such a statement of "just defense" is received prior to shut off."

Please see CAUSE-PA 03-025_Attachment 1 for training materials provided to municipalities and municipal authorities.

Uploading Disconnects (DMS)/ Delinquency Letters

Uploading Disconnect DMS Orders

To upload a disconnect request, use the template provided in this welcome packet communication.

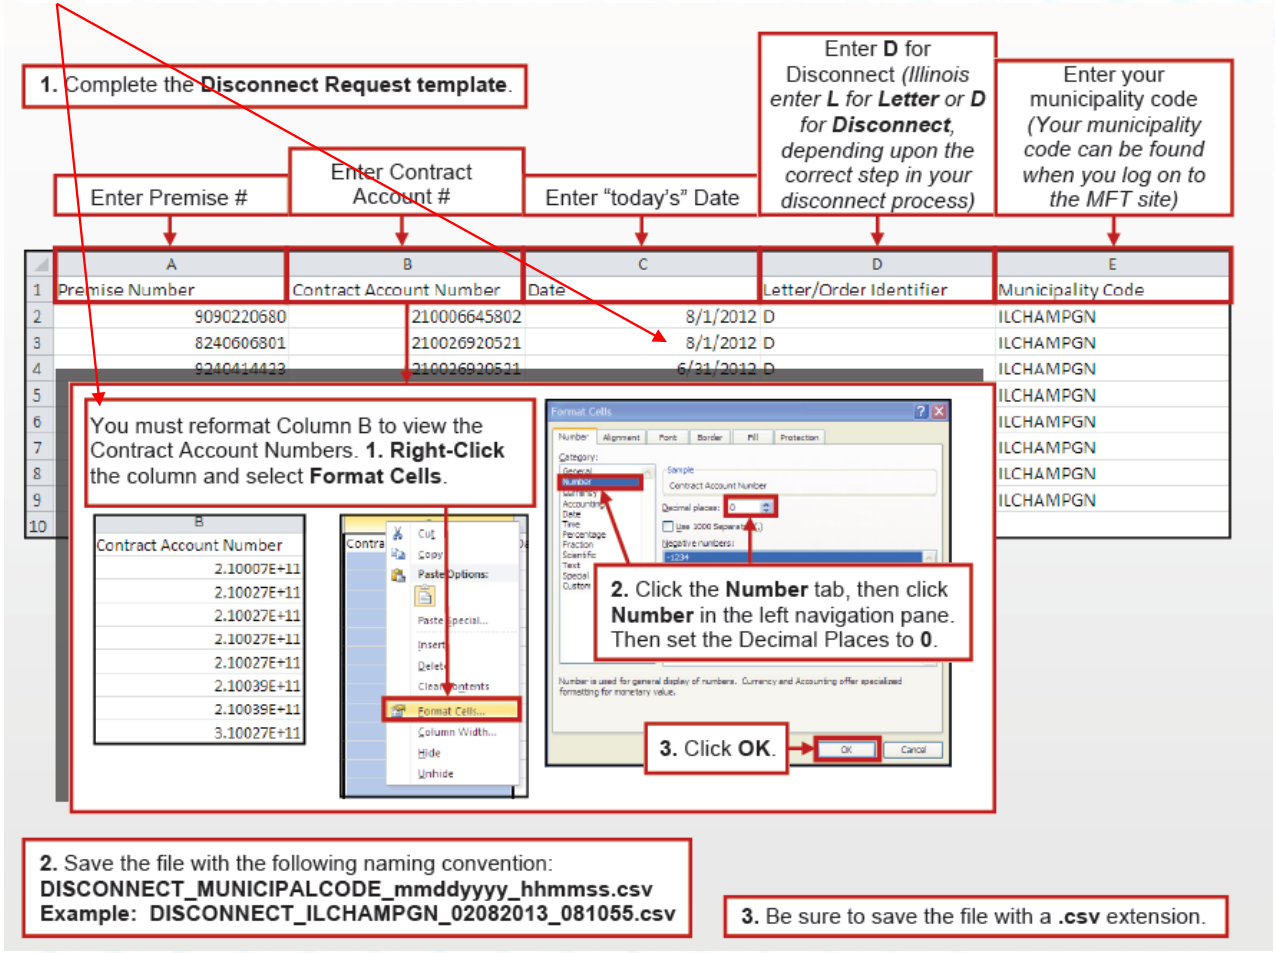
Pennsylvania municipalities have their own template entitled "*Disconnect_Upload_Template_PA Only_2023*".

NOTE: PA municipalities are required to populate column I with an "x".
All other states do not.

All other states use "*Disconnect_Upload_Template 2023*".

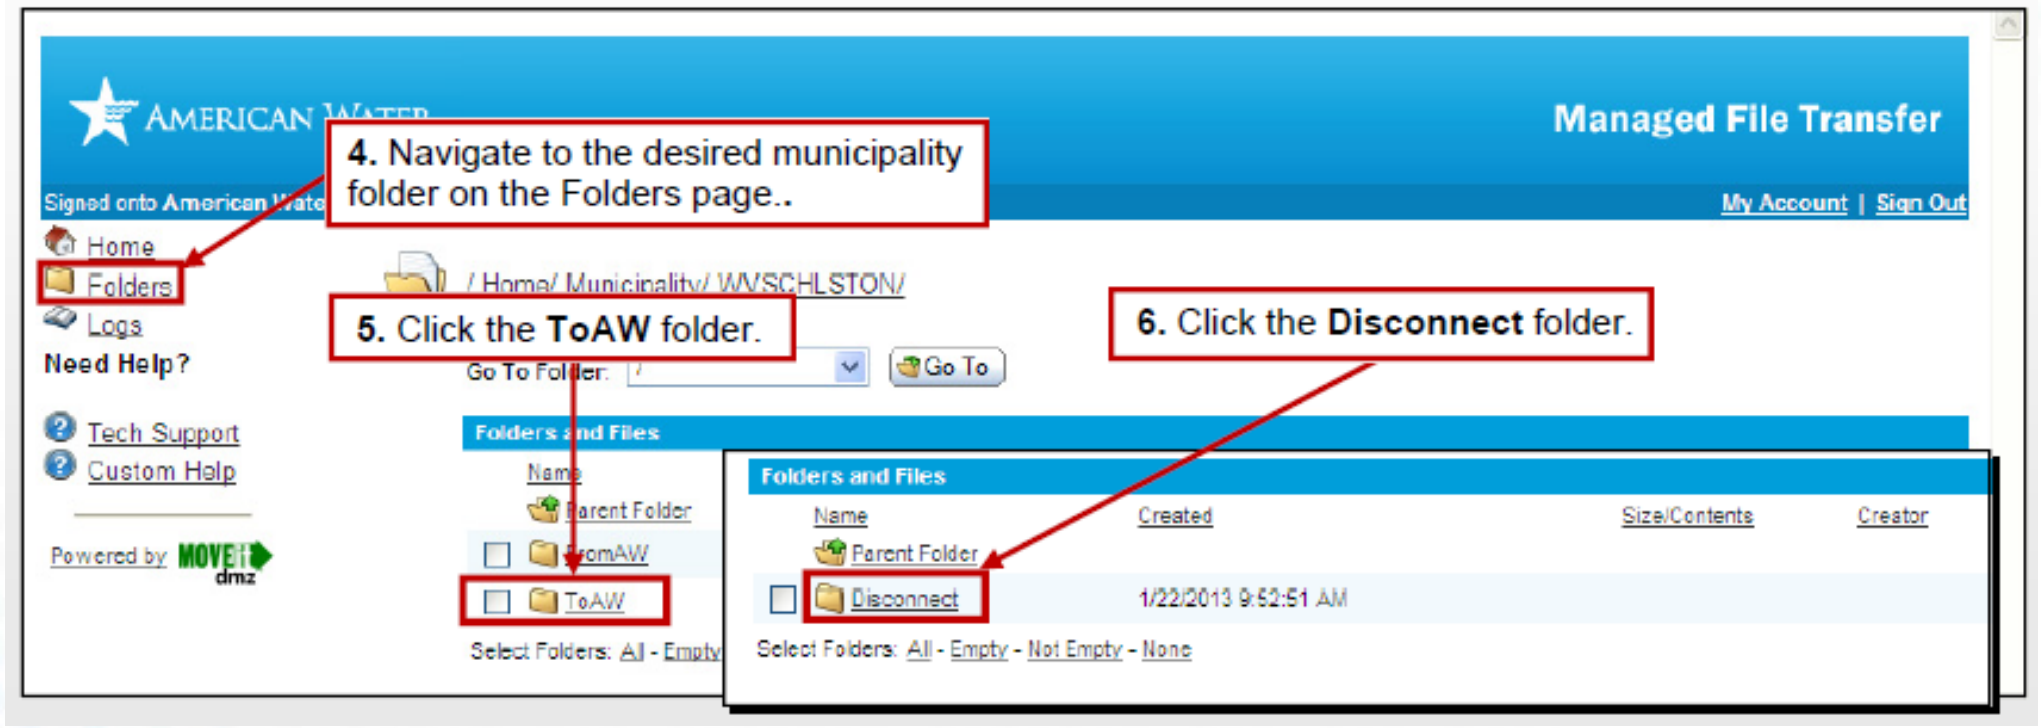
Delinquent letters are also uploaded through this process. **(IL only)**

Following formatting and naming convention instructions (below) is imperative to a successful upload.

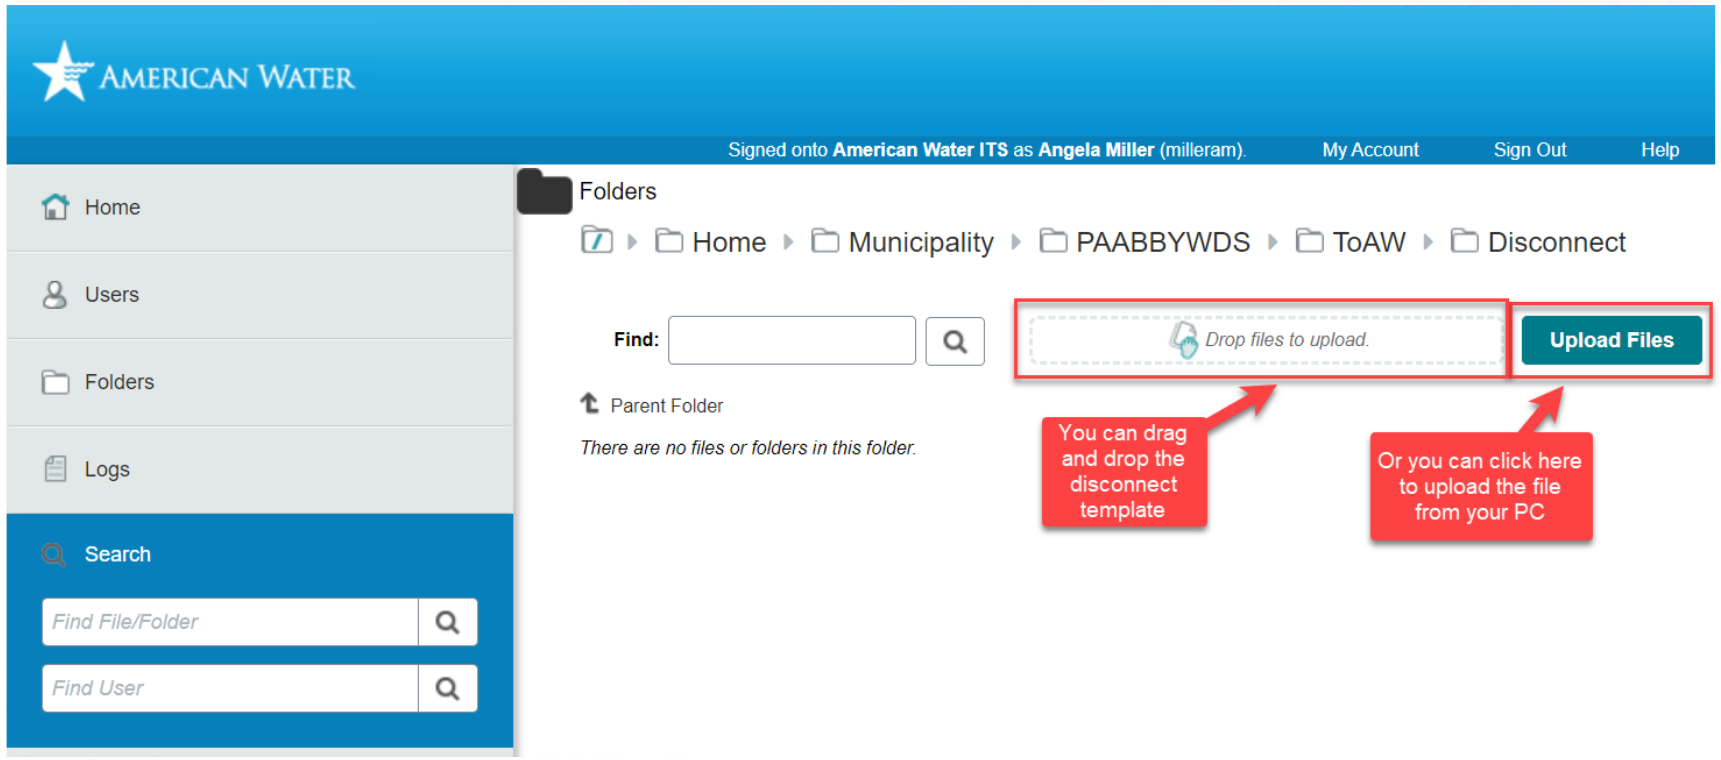


AMERICAN WATER

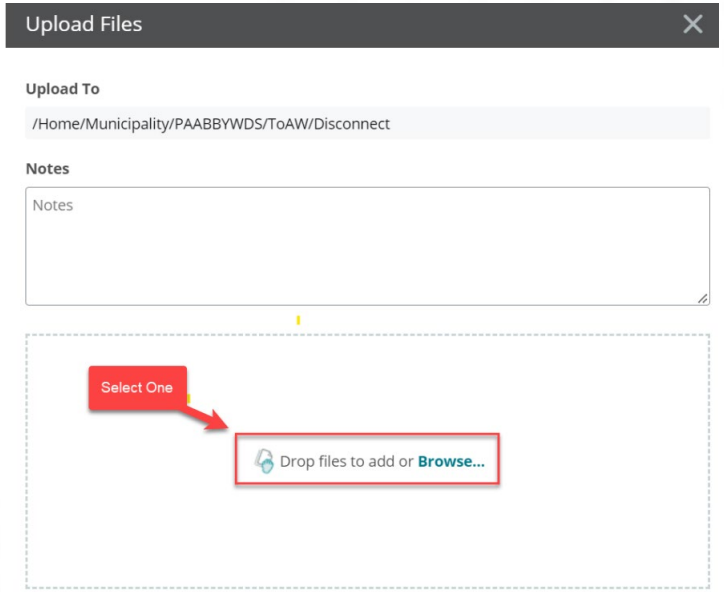
Uploading Disconnect DMS Orders (cont'd)

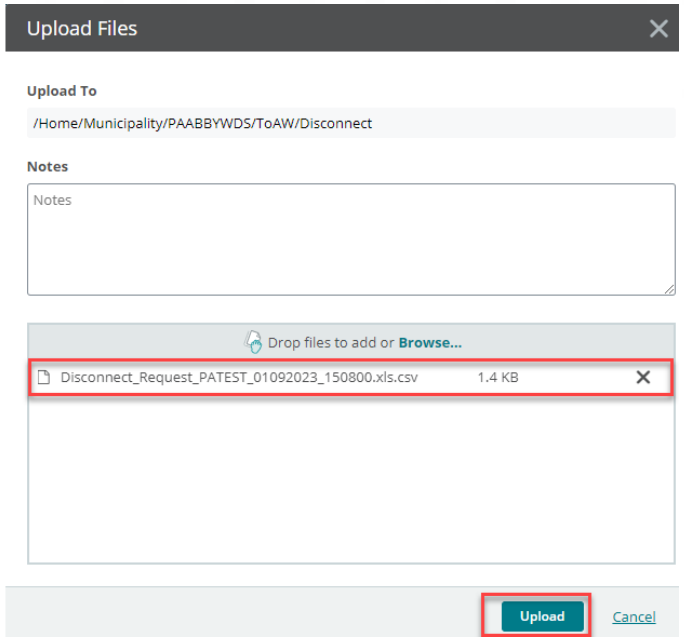


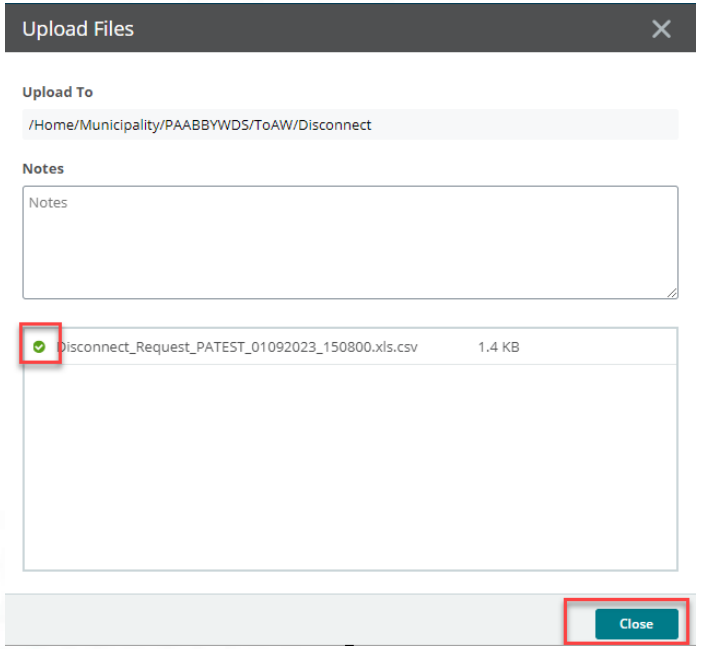
Uploading Disconnect DMS Orders (cont'd)



Uploading Disconnect DMS Orders (cont'd)







As you progress through the drop file or upload file process, you will receive the success icon.

NOTE – always check response files to ensure successful upload.

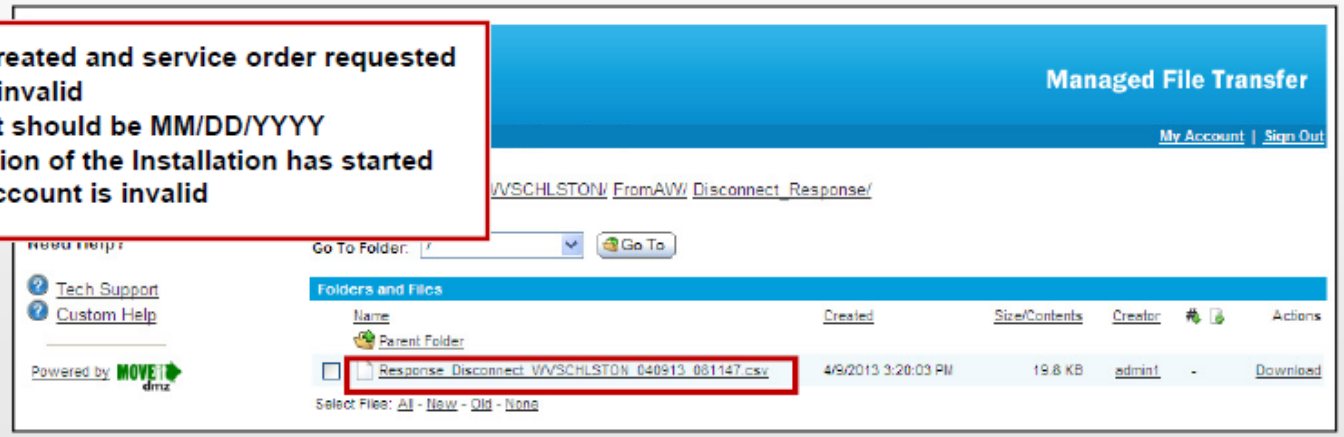
AMERICAN WATER

Response Files

Disconnect Requests (Cont'd)

After you upload a disconnect request file, you will automatically receive a **Disconnect Response** file .The disconnect response file will be housed in the **Disconnect Response** folder within the **FromAW** folder. You will receive one of the following responses for the Disconnect file you have uploaded. The comments will be found in the last column of the response spreadsheet.

- **No Letter created and service order requested**
- **Premise is invalid**
- **Date format should be MM/DD/YYYY**
- **Disconnection of the Installation has started**
- **Contract Account is invalid**



Note: Response files can take up to 60 minutes to post. Please do not re-upload disconnects, as this could result in duplicate service order creation. If you do not see a response file after 60 minutes, please email Special Accounts to review.

A complete list of disconnect responses can be found in the **Welcome Packet Materials 2023** file.

AMERICAN WATER

Uploading Reconnects (OMS)

Uploading Reconnect OMS Orders

To upload a reconnect request, use the template provided in this welcome packet communication.

The template is entitled "*Reconnect_Upload_Template 2023*".

NOTE: If it has been 10 days or more since the DMS (disconnect) was completed, the account will be finaled in our billing system. When this occurs, reconnect orders cannot be processed through MFT so you will need to email Special Accounts at specialaccts@amwater.com to request the premise release and reconnect, if applicable.

Following formatting and naming convention instructions (below) is imperative to a successful upload.

1. If you need to cancel a disconnect request that you have already uploaded or you need to request a restoration, complete the **Reconnect Request template**.

Enter Premise # | Enter Contract Account # | Enter "today's" Date | Enter **R** for Reconnect/Release | Enter your municipality code *(Your municipality code can be found when you log on to the MFT site)* | Enter **X** after you have read the liability scripting to the customer.

	A	B	C	D	E	F
1	Premise Number	Account Number	Date	Reconnection Identifier	Municipality Code	Liability Acceptance Flag
2	6000000001	210000000000	5/7/2012	R	ILALTON	X
3	5000000002	210000000000	5/7/2012	R	ILALTON	X
			2012	R	ILALTON	X
			2012	R	ILALTON	X

Follow the instructions for reformatting Column B in the **Disconnect Requests** section.

If you are requesting a restoration and the customer will not be home, the following statement will need to be read to the customer and an **X** will need to placed in the file in the "Liability Acceptance Flag" column. If there is not an **X** in the spot, the customer's water may not get restored. If the customer will be home, there is no need to put an **X** in the field.

Liability Scripting:

"(Customer's Name), to proceed I would like to make you aware of your liability in the unlikely event of any property damage associated with service activation without you being present."

Do you agree to shut off your main water valve and accept full responsibility for any possible damage that may occur due to any uncontrolled water flow inside the premise – such as a faucet being left on, a leak with plumbing, fixtures, or appliances, etc.?"

"Please respond by stating YES if you agree to this statement."

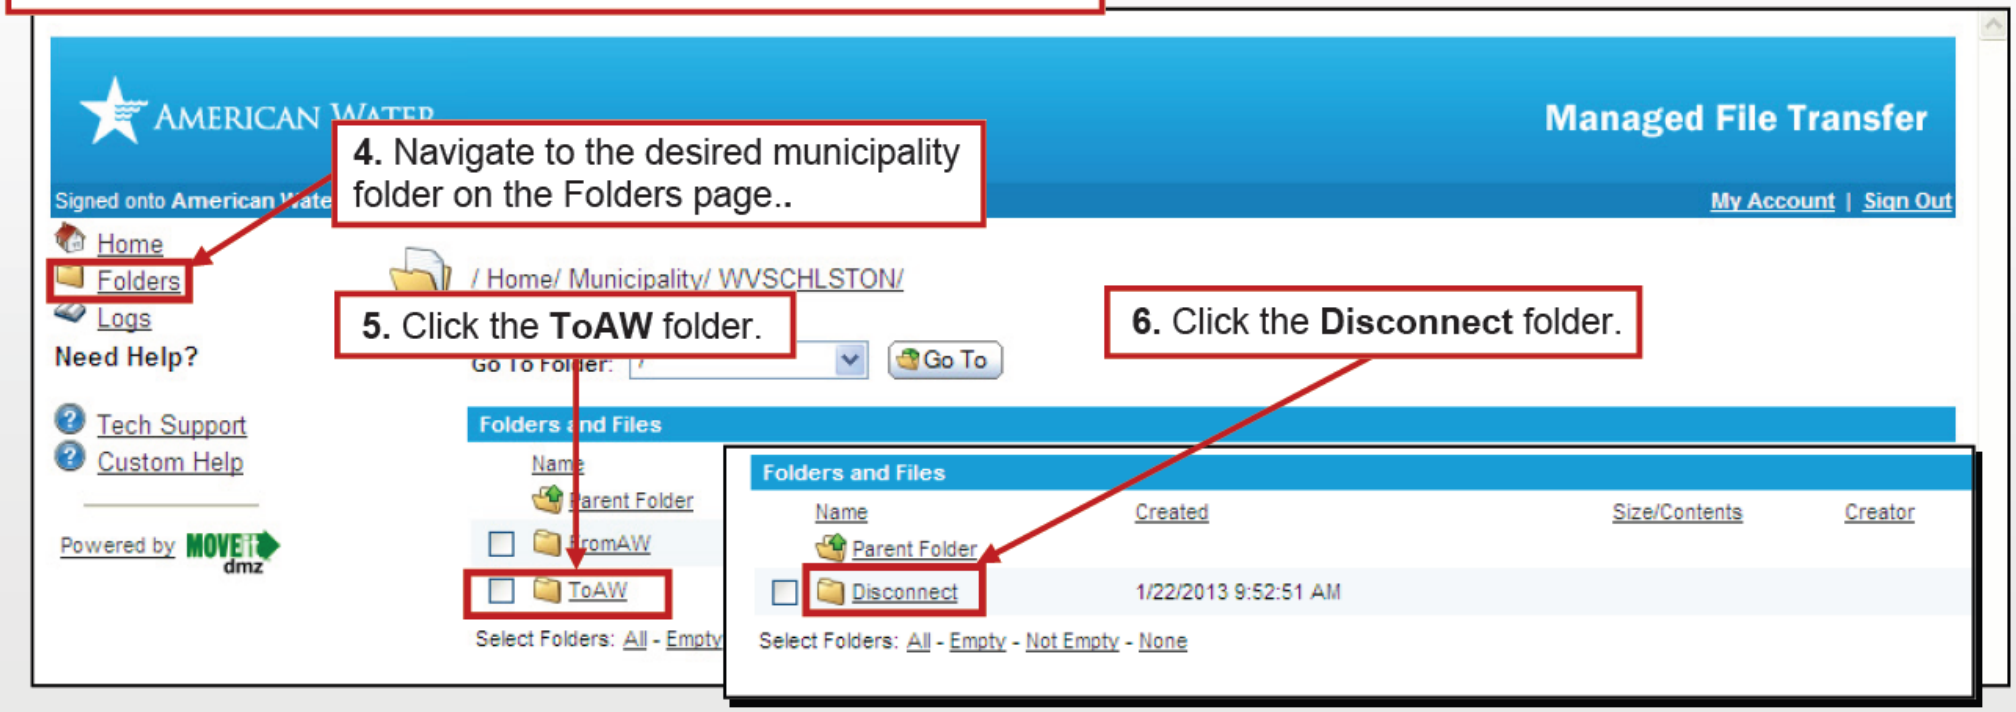
Reminder: Please alter your collection notices accordingly. Remove reference to American Water's toll free number. Note in your collection notice that once payment is made, an order will be auto-generated for restoration and there is no need to contact American Water's Customer Service Center.

AMERICAN WATER

Uploading Reconnect OMS Orders (cont'd)

2. Save the file with the following naming convention:
RECONNECT_MUNICIPALCODE_mmddyyyy_hhmmss.csv
Example: RECONNECT_ILCHAMPGN_02082013_081055.csv

3. Be sure to save the file with a **.csv** extension.



AMERICAN WATER

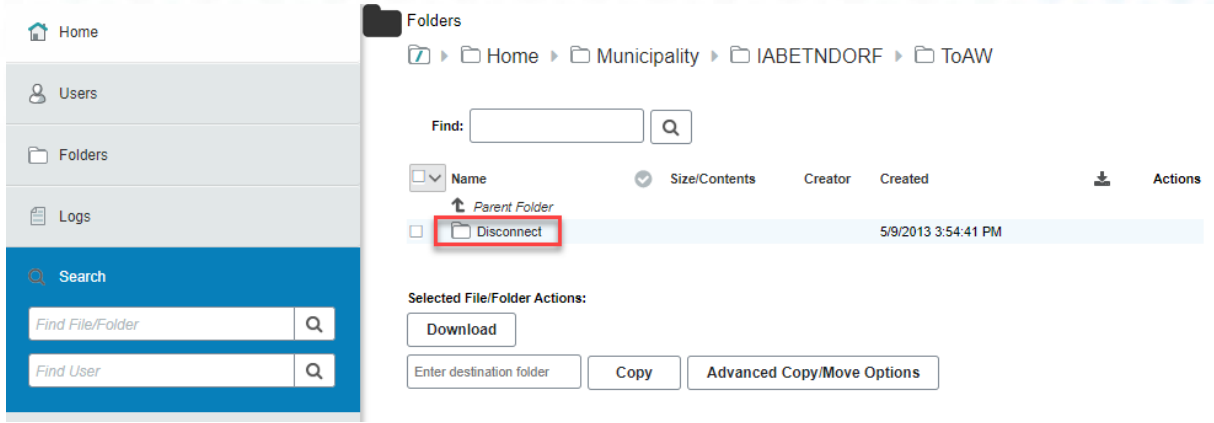
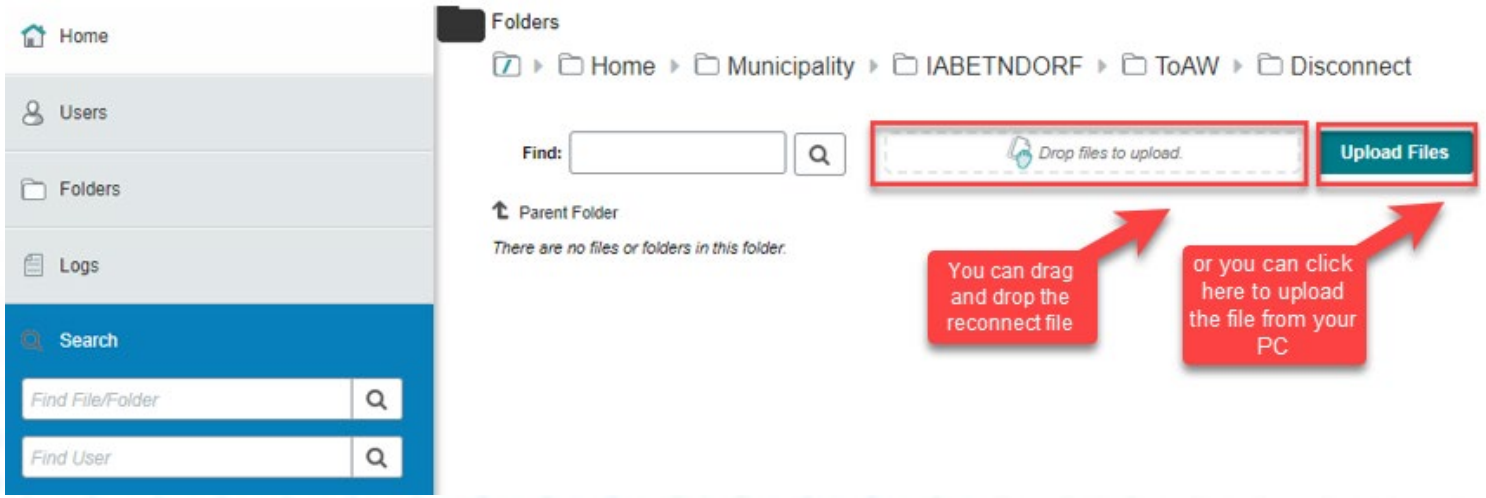
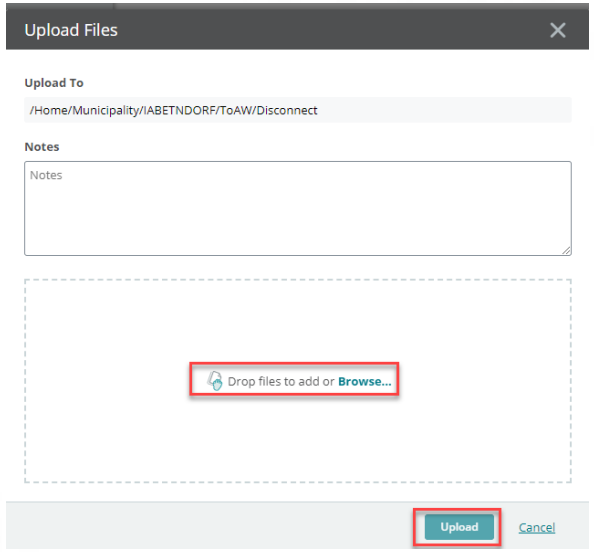
Select the **Disconnect** folder to upload a reconnect file.

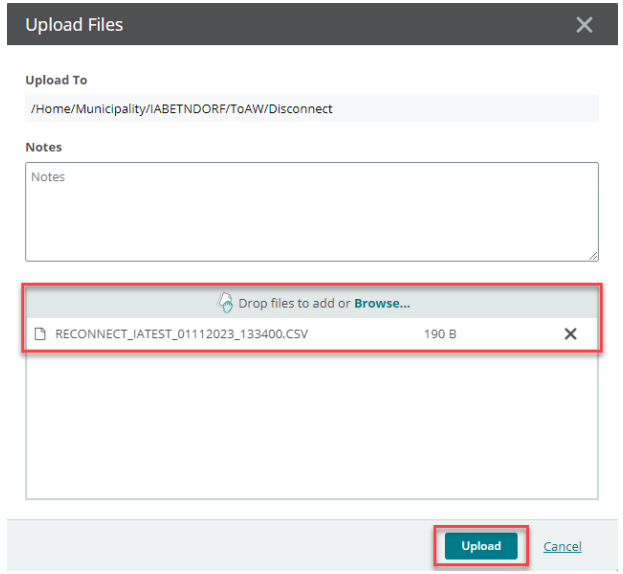




AMERICAN WATER

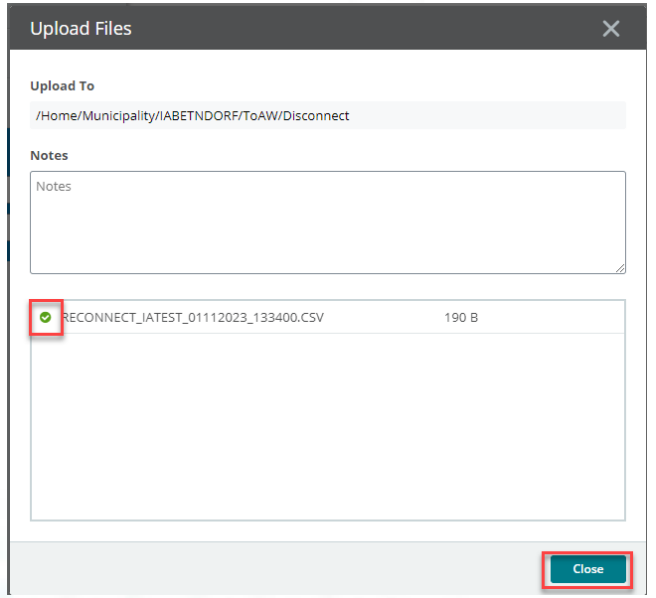
Uploading Reconnect OMS Orders (cont'd)





As you progress through the drop file or upload file process, you will receive the success icon.

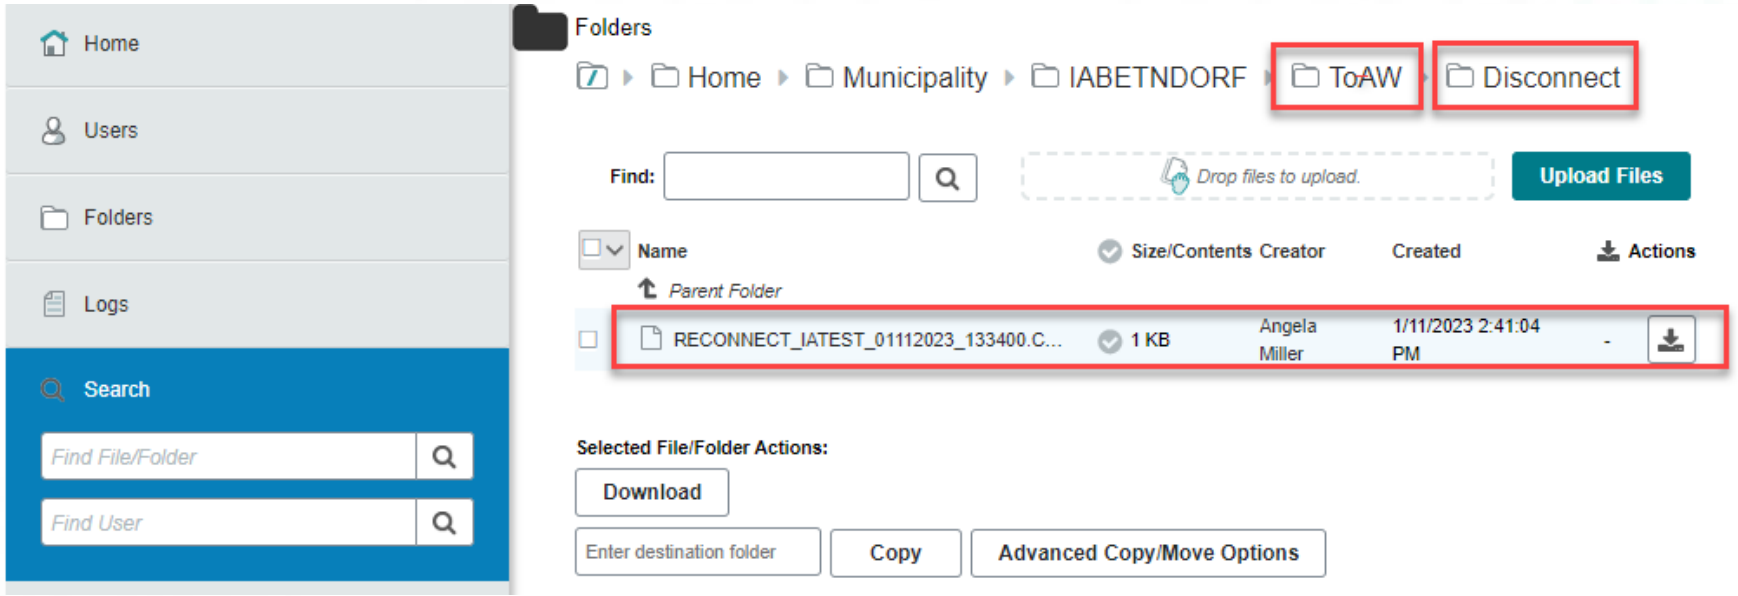
NOTE – always check response files to ensure successful upload.



AMERICAN WATER

Uploading Reconnect OMS Orders (cont'd)

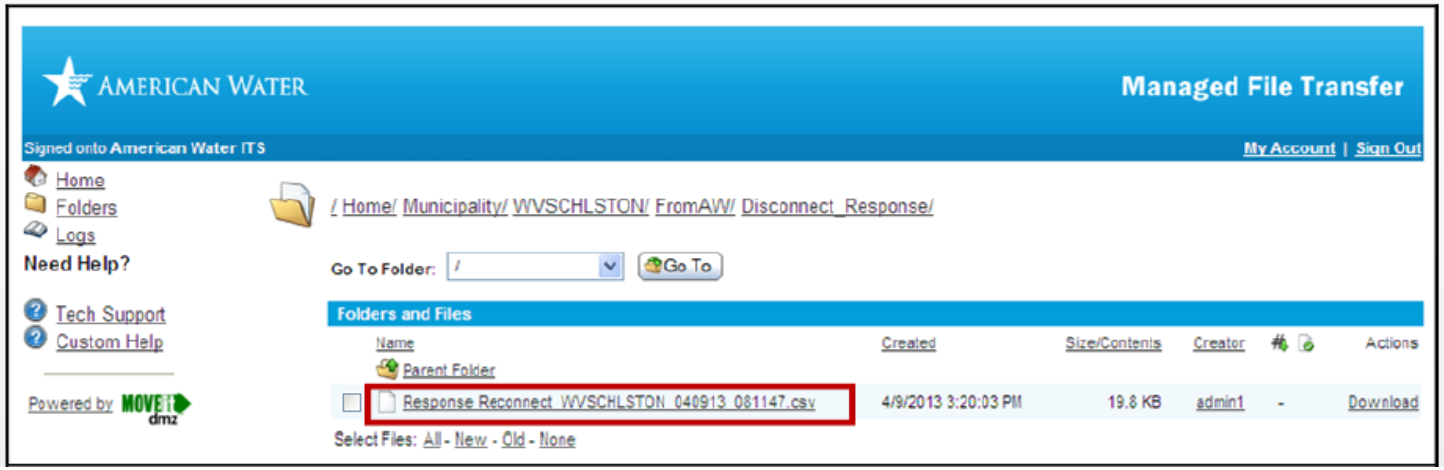
Once uploaded, you will see the reconnect file in the **ToAW>Disconnect** folder



AMERICAN WATER

Response Files

After you upload a reconnect request file, you will automatically receive a **Reconnect Response** file .The reconnect response file will be housed in the **Disconnect Response** folder within the **FromAW** folder. You will receive one of the following responses for the Disconnect file you have uploaded. The comments will be found in the last column of the response spreadsheet.



Note: Response files can take up to 60 minutes to post. Please do not re-upload reconnects, as this could result in duplicate service order creation. If you do not see a response file after 60 minutes, please email Special Accounts to review.

A complete list of reconnect responses can be found in the **Welcome Packet Materials 2023** file.

AMERICAN WATER

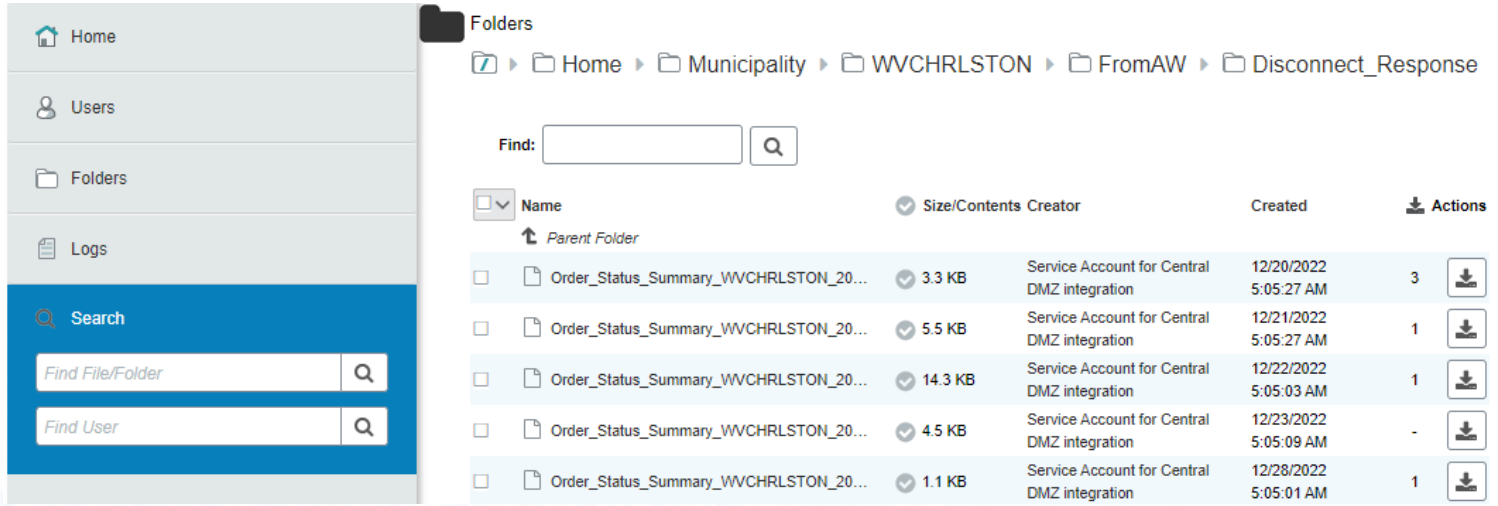
Service Order Status Files and Order Summary Status Files

You will also receive a "Service Order Status" Report on an hourly basis which will be in the **From AW** folder. The order status report will provide any change in the service order status of those service orders entered for your municipality. For example, you will be able to identify which premises have been shut off. **NOTE: If a service order expires, you must re-submit.**

Column E, Service Order Number
Column F, Service Order Status
- Complete (shut off)
- Cancelled

Column G, Service Order Comments
- Order was completed in selected date range
- Order was cancelled due to reason XXXXXX (ex., Expired)

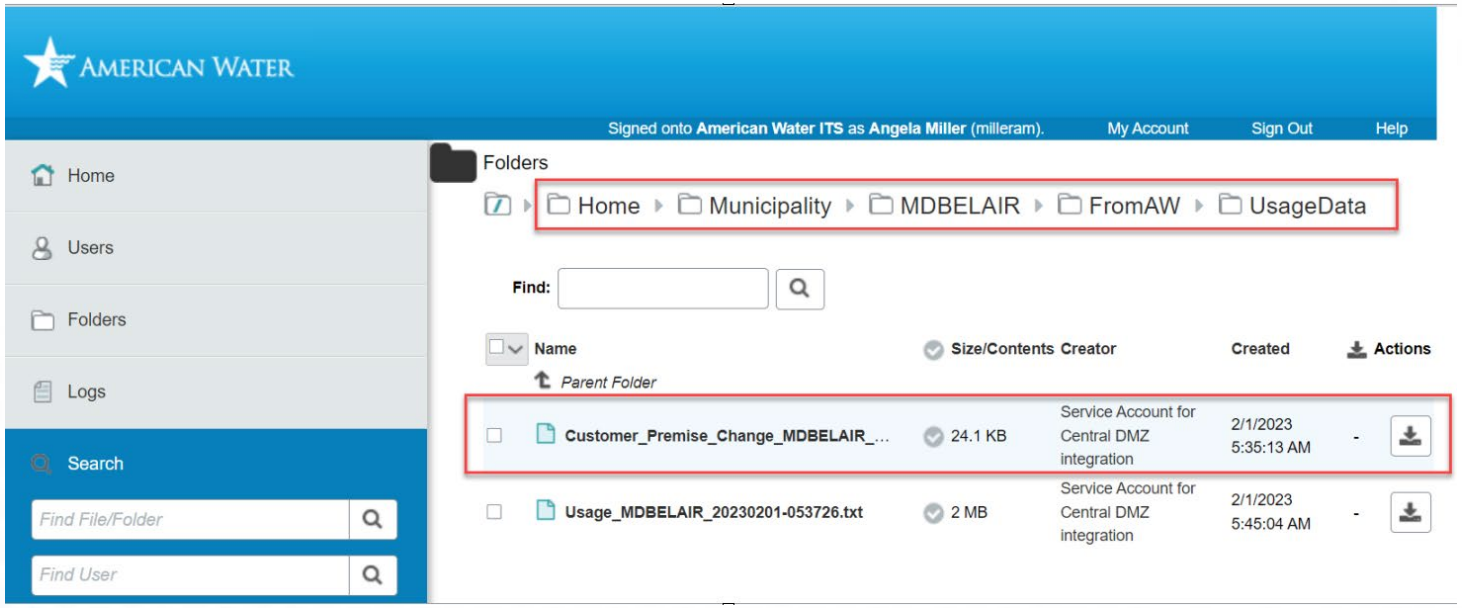
A daily order status summary file will post each morning and summarizes the status of all disconnect/reconnect orders issued from the previous day.



AMERICAN WATER

Customer Premise Change Files

The customer premise change file displays changes made to a customer or premise that may impact your records. These changes include mailing address, name spelling corrections, phone number, or changes to the technical master data of the premise, itself. This is informational only and is located in the UsageData folder in MFT.



Download the file and save it to your desktop. Using the macro formatting instructions on page 14, save an excel version of the data to your desktop for better comprehension.

Reference the Welcome Packet Materials 2023 document for a list of change codes and what they represent.

Pennsylvania-American Water Company
Docket Nos. R-2023-3043189 (Water)
R-2023-3043190 (Wastewater)
CAUSE-PA Set 3

CAUSE-PA 03-029

Responsible Witness: Cas Swiz, Senior Director of Rates and Regulatory

Question:

Will the projected amounts billed to residential customers as a result of the Environmental Compliance Investment Charge (ECIC), if approved, vary by rate zone? If so, please provide a detailed explanation how and to what extent the projected amounts billed to residential customers as a result of the proposed ECIC would vary by rate zone.

Response:

No, the ECIC will not vary by rate zone. Please reference the ECIC Tariff, which states (1) the ECIC shall be applied equally to all customer classes, and (2) the ECIC will be applied to the total amount billed to each customer for service under the Company's otherwise applicable rates and charges, excluding amounts billed for public fire protection services, the STAS, and the DSIC.

Office of Consumer Advocate Set 8

OCA 08-038

Responsible Witness: Jim Runzer, Vice President of Operations for PAWC

Question:

Reference PAWC Statement No. 4 (Gress):

Provide the termination notice issued to a PAWC customer for disconnection of water service as a result of nonpayment of wastewater service to a "non-Company" entity.

Response:

PAWC only issues termination notices to "non-Company" Landlord/Ratepayer customers as outlined in the company's Commission-approved form of shut off agreement (Please refer to OCA 08-038_Attachment). Refer to Exhibit A for a copy of said termination notice. The "non-Company" entity is responsible for providing termination notices to all non-Landlord/Ratepayer customers for disconnection of water service as a result of nonpayment of wastewater services, pursuant to the attached shut off agreement.

SHUT-OFF AGREEMENT

THIS AGREEMENT, made this day of , 20___, by and between the _____, a municipal _____ of the Commonwealth of Pennsylvania, having an office for the transaction of business at _____ (hereinafter called the "Municipality") and PENNSYLVANIA-AMERICAN WATER COMPANY, a public utility corporation of the Commonwealth of Pennsylvania, with its principal place of business at 852 Wesley Drive, Mechanicsburg, Pennsylvania 17055, (hereinafter called the "Water Company").

W I T N E S S E T H

THAT WHEREAS, the Municipality is engaged in supplying sewage service to the citizens and residents of the _____, _____ County, Pennsylvania; and

WHEREAS, the Water Company, a corporation as aforesaid, is the owner and operator of a water distribution system serving the customers in the aforesaid area, under the applicable Rules and Regulations of the Pennsylvania Public Utility Commission; and

WHEREAS, the Water Company is authorized and required at the request and direction of the Municipality pursuant to the provisions of the Act of April 14, 2006, P.L. 85, 53 P.S. Sections 3102.501 et. seq., to shut-off the supply of water from its system to any premises in which the rentals, rates and charges for sewer, sewage or sewage treatment service supplied by the Municipality are unpaid and the claim or lien for such service has been assigned to the Municipality.

WHEREAS, certain notice requirements relating to the shut-off of the supply of water are set forth therein and the Utility Service Tenants Rights Act of November 26, 1978, P.L. 1255, No. 299, 68 P.S. Sections 399.1 et seq. ("USTRA"); and

WHEREAS, both parties believe that they should enter into a written agreement specifically setting forth the duties, obligations, responsibilities and liabilities of each party to each other and such agreement is specifically authorized by the Act of April 14, 2006, P.L. 85, 53 P.S. Section 3102.501 et seq.

NOW THEREFORE, in consideration of the sum of ONE DOLLAR ($1.00) and other good and valuable consideration, and the covenants hereinafter expressed, the parties hereto do mutually agree as follows:

1. Upon written request by the Municipality specifying a premises in the Municipality's service area with regard to which the rentals, rates and charges for sewer, sewage or sewage treatment service shall not have been paid for a period of at least thirty days from the due date thereof, the Water Company shall proceed to shut-off the supply of water to such premises until it is advised in writing by the Municipality that all such overdue rentals, rates and charges, together with any interest thereon, have been paid or the Municipality directs otherwise; PROVIDED HOWEVER:

A. For any premises other than a residential building for which the landlord is the party responsible for the payment of sewer service, said written request must be accompanied by a statement in writing by a responsible officer of the Municipality setting forth:

i. that the Municipality has given ten (10) days' written notice of its intention to request the Water Company to shut-off the supply of water from its system to such premises has been mailed to the person liable for the payment of such rentals and charges and the owner of the property or property manager,

ii. that the Municipality has posted, at least ten days, a written notice to this effect at the main entrance to the premises, and

iii. that the Municipality has not received, during the ten day period, a written statement under oath or affirmation from the person liable for the payment of the said rentals and charges stating that the said owner has a just defense to the claim or part thereof;

B. For any residential building for which the landlord is responsible for the payment of sewer service, said written request must:

i. Be provided to an agent of the Water Company at least 45 days in advance of the proposed date for service to be shut-off;

ii. Be accompanied by a 37-day notice and 30-day notice in the form attached hereto as Exhibit A on the Municipality's letterhead for each customer for which shut-off of service is being requested to be posted by the Water Company;

iii. Be accompanied by a copy of the bill for the prior billing period for each customer for which shut-off of service is being requested; and

iv. Provide the agency names, addresses and phone numbers for: (i) the Department of Licenses and Inspections of any city of the first class; (ii) the Department of Public Safety of any city of the second class, second class A, or third class; and (iii) the city or county Public Health Department or in the event that such a department does not exist, the Department of Health office responsible for that county.

AND FURTHER PROVIDED that no occupant of said premises has produced a medical certification by a physician to be seriously ill or affected with a medical condition which will be aggravated by a cessation of water service or failure to restore water service, as provided for in 52 Pa. Code §§56.111-56.118, as amended.

2. The Water Company shall invoice the Municipality on a monthly basis for each of the premises for which shut-off was requested in the previous month and the Municipality shall pay to the Water Company the invoiced amount within thirty (30) days of receipt. Shut-off of service to any premises other than a residential building for which the landlord is the party responsible for the payment of sewer service under Section 1.A, above, shall be charged the sum

of Thirty Dollars ($30.00). Shut-off of service to a residential building for which the landlord is responsible for the payment of sewer service under Section 1.B, above, shall be charged the sum of One Hundred and Twenty Dollars ($120.00) each for multi-dwellings and Seventy- Five Dollars ($75.00) for single dwellings, provided that such request for shut-off of service is completed. For shut-off requests that are not able to be completed because the 37-day notice sent by certified mail is unclaimed, the sum of Seventy-Five Dollars ($75.00) will be charged. All of the aforementioned amounts are intended to cover the Water Company's cost of providing required notice, where applicable, and shutting off the water supply to each premises listed in such request. The Municipality shall also pay to the Water Company, upon its request therefore, the further sum of Thirty Dollars ($30.00) to cover the Water Company's cost of restoring water service to each such premises. In the event that the actual cost incurred by the Water Company in discontinuing and restoring water service to any such premises is more than the charges described above, the Municipality shall remit the actual cost thereof to the Water Company based on time, material, transportation and other fixed charges. The fees fixed hereunder may be amended from time to time as agreed by the parties hereto.

3. The Water Company shall not be liable for any loss, damage or other claim asserted by the owner, person or corporation based on or arising out of the shutting off of such supply of water. The Municipality shall indemnify and save harmless the Water Company, its agents, officers, servants or employees from any such loss, damage or other claim arising out of said activity pursuant to the terms of the Agreement. Notwithstanding the aforementioned language, the Municipality shall not be responsible for any loss, damage or claim asserted by said owner, person or corporation due to negligence on the part of the Water Company, its agents, officers, servants or employees, while performing any services for the Municipality pursuant to this agreement.

4. If a dispute shall arise between the parties hereto regarding any of the provisions of this Agreement, such dispute may be submitted by either of the parties to the Pennsylvania Public Utility Commission whose decision, unless reversed on appeal, shall be final.

5. This Agreement may be terminated by either of the parties hereto by ten (10) days' written notice given to the other party at its principal place of business.

6. This Agreement shall become effective thirty (30) days after the Water Company has filed a copy thereof with the Pennsylvania Public Utility Commission or, in the event that the said Commission institutes an investigation, at such time as the said Commission grants its approval thereof.

7. The Water Company shall have the right to increase the charged amounts in Section 2, above, from time to time, in the event that the cost to the Water Company for performing the service hereunder increases, upon sixty (60) days' written notice to the Municipality. It is further understood and agreed that the aforesaid amount of Thirty Dollars ($30.00) for the shutting off and restoring of water service under the provisions of this Agreement shall be automatically increased to coincide with the charges for shutting off water service and restoring water service contained in the Company's tariff as on file with and approved by the Pennsylvania Public Utility Commission from time to time.

8. Notwithstanding the provisions of this Agreement, it is understood and agreed by the parties hereto that the Water Company shall be required to comply with any existing regulations of the Pennsylvania Public Utility Commission, including but not limited to those

relating to notice before termination, and in addition to providing any notice that might otherwise be required under this contract or any applicable law or ordinance.

9. This Agreement supersedes and repeals any prior agreement, contracts, and understanding, written or oral, by or among the parties hereto with respect to the subject matter contained herein. This Agreement contains the entire agreement among the parties hereto, and no oral statements or representations or prior written matter not contained in this instrument shall have any force and effect.

IN WITNESS WHEREOF, the parties hereto have caused these presents to be signed and attested by their proper officers and their respective seals to be hereto affixed the day and year first above written.

This Agreement will be effective on the _____ day of _____, 20__.

For Service to Property Located at:

_____

Sewer Account Number _____

Pay Before _____ (PAWC to fill in)

Pay This Amount: $_____

IMPORTANT: 37 DAY SHUT OFF NOTICE

Please read and take the steps needed to prevent your water service from being shut off. Payment on your sewer account is overdue. If payment is not received, your water service may be shut off on or after _____ (PAWC to fill in). You can prevent discontinuation of water service by paying the amount printed above.

TO STOP THE SHUT OFF, YOU MUST PAY THE AMOUNT OVERDUE OR YOU MUST CALL US AT _____. You may also contact us for payment options.

YOUR TENANTS WILL BE NOTIFIED. We will notify your tenants on or after _____ (PAWC to fill in) that service will be shut off. At that time, we will also inform them of their rights under the Utility Service Tenants Rights Act ("USTRA"). USTRA states that within seven (7) days of the date you receive this notice, you must give us the names and addresses of the affected tenants, unless you pay the total past due amount or make satisfactory payment arrangements with us. You may have to pay liquidated damages of not less than $500 for each day you do not give us this tenant information. To provide the names and addresses of the affected tenants, call us at _____ or write to us at _____. To avoid the notification of your tenants, you may file a petition in court to dispute the right to discontinue service.

If we shut off your tenants' service, you will have to pay the past due amount and a Turn-On Charge of $_____.

Please Note: We may not be able to restore your service until 5:00 p.m. the next business day after receiving payment. If you have questions about this notice or your bill, please call us at the number listed above.

Sincerely,
Sewer Municipal Entity's Name

30 DAY SHUT OFF NOTICE TO OCCUPANT

Please read and take the steps needed to prevent your water service from being shut off.

IMPORTANT NOTICE TO TENANTS WARNING: YOUR WATER SERVICE MAY BE SHUT OFF ON OR AFTER _____ (PAWC to fill in) BECAUSE OF NON-PAYMENT OF SEWER CHARGES.

TO STOP THE SHUTOFF OF YOUR UTILITY SERVICE, YOU MUST DO ONE OF THE FOLLOWING THINGS:

1. You can join with the other tenants to apply to have service continued or resumed. Service will not be discontinued or will be resumed if the tenants pay the amount equal to your landlord's sewer bill for the 30-day period preceding this notice. A copy of that bill is enclosed. Payments may be made only by check or money order payable to: _____.

2. By law, you may deduct the amount that you made for the sewer bill from your rent due now or in the future. We will tell your landlord how much you paid for the utility service. Your landlord may not retaliate against you for exercising your right to make payment to prevent the shut-off. You have the right to recover monetary damages from the landlord for any retaliation that the landlord takes against you for exercising your rights as a result of this notice.

ADDITIONAL INFORMATION:

1. The amount of the bill which must be paid to continue service is $_____.
2. Your landlord cannot punish you if you pay the utility bill. Your landlord cannot raise your rent, cannot evict you and cannot retaliate against you in any other way for paying the utility bill and deducting it from your rent.
3. You have the right to dispute the accuracy of the bill and have certain other rights.

FOR MORE INFORMATION

If you have any questions about this notice or bill, please call us at _____.

Sincerely,

Question:

Reference: Everette, p. 25: By year for the most recent four years, please provide:

a. The total gallons of water usage reduced through the implementation of PAWC residential water conservation investments;
b. The average gallons of water usage per household reduced through the implementation of PAWC residential water conservation investments;
c. The total gallons of water usage reduced through the implementation of PAWC income-qualified water conservation investments;
d. The average gallons of usage reduced per household through the implementation of PAWC income-qualified water conservation investments;
e. The number of residential customers served through a PAWC water conservation program;
f. The number of Bill Discount Program customers served through a PAWC water conservation program;
g. The average water conservation investment in a residential customer's home;
h. The average water conservation investment in a Bill Discount Program participant's home.

Response:

A-D. The Company does not have the requested information; however, please refer to OCA 11-018_Attachment for the booklet (also available in Spanish) which is sent with the water conservation kit, which states that replacing a showerhead with a water-saving model can save 2,900 gallons of water per year and a fill cycle diverter can save 0.5 to 1.5 gallons of water per flush.

E. The water conservation program is only offered to Bill Discount customers. Please refer to the response to Part F.

F. Number of Low-Income Customers Receiving Conservation Kits

As you know, you are currently enrolled in Pennsylvania American Water's monthly Service Charge Discount Program based on your financial qualifications. The discount is part of the company's **H2O Help to Others Program®** , designed to lend a hand of support to customers in need during difficult times.

We are pleased to introduce you to another benefit of Pennsylvania American Water's program provided to eligible customers—a wise water use kit.

This kit helps you to control the cost of your water bill through conservation. Your kit has valuable products to save hot and cold water in showers and sinks, to conserve water with every flush and to find silent and costly toilet leaks. These products, along with wise water use tips, can help you save gallons of water every month.

If you are a renter and have plumbing leaks, contact your landlord immediately.

Your monthly water bills can be affordable when you know how to use water wisely, because the more water you save, the lower your bills will be.

Steps to saving water and money

- **Read this booklet and find out how the H2O Help to Others Program® can help you save money on your water bills.**
- **Install the water-saving products supplied in this kit.** Complete instructions are printed in this pamphlet.
- **Kit installation assistance:** If you are having difficulty with installing any of the products in the conservation kit, a local Pennsylvania American Water team member can provide assistance by phone. Please call (717) 550-1606 between the hours of 9 a.m. and 5 p.m., Monday through Friday. If unavailable, please leave a message.
- **Include the whole family in changing water-wasting habits into daily water-saving habits** by using the tips provided in this booklet.
- **Pay your Pennsylvania American Water bill every month.**

STEP 1: INSTALL THE WATER-SAVER KIT

WHAT YOUR WATER-SAVER KIT INCLUDES

- WaterSense showerhead and Teflon thread sealing tape
- Two water-saving faucet aerators (one kitchen; one bath)
- Fill cycle diverter
- Leak-detecting, non-toxic dye tablets for the toilet

HOW TO INSTALL YOUR WATER-SAVING DEVICES

WaterSense Showerhead

1. Unscrew old showerhead (turn counter-clockwise).
2. Clean shower arm threads.
3. Apply Teflon thread-sealing tape, wrapping clockwise.
4. Screw on showerhead. Do not over-tighten.
5. Run water to test for leaks. If needed, gently tighten with wrench.
6. Turn face of showerhead to select preferred spray option.

According to the EPA, replacing one showerhead with a WaterSense model can save the average family as much as **2,900 gallons** of water a year — or **more than $70 in energy and water costs every year.**

Water-Saving Faucet Aerators

This kit features two aerators: a 2.2 size for the kitchen and a 1.5 size for the bath. Read the numbers on the side before installing.

1. Unscrew old faucet attachment. For an inside-threaded faucet, install aerator as is. For an outside-threaded faucet, first remove the top washer to expose inside threads and then install.
2. Hand tighten, but do not over-tighten. If a wrench is used, protect finish with a cloth.

Fill Cycle Diverter

The Fill Master Fill Cycle Diverter saves 0.5 to 1.5 gallons of water per flush, by diverting the majority of water that would normally flow down the toilet overflow tube back into your toilet tank during the toilet's filling cycle.

1. Pull hose loose from overflow tube.
2. Remove clip or holder from hose.
3. Insert Fill Master into end of hose.
4. Push Fill Master onto overflow tube with nozzle #1 inside the tube and nozzle #2 and #3 outside the tube. NOTE: Hose may need to be cut shorter for proper fit.
5. Position nozzle #2 or #3 into the tube as needed if the bowl does not fill to its normal level when flushed.

Leak Detecting Non-Toxic Dye Tablets for the Toilet

1. Remove lid from toilet tank.
2. Drop one dye tablet into water in tank.
3. Wait 15 minutes. If blue color appears in the bowl, your toilet has a silent leak and repairs need to be made.

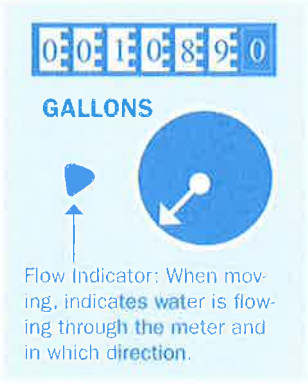
STEP 2: FINDING WATER LEAKS

Your meter can be a great tool to check for household leaks

Not fixing a leaky toilet or faucet is like throwing money down the drain. If your water meter is in your home, you can use it to check for leaks. Start by making sure that no one is using water and that all water-using appliances are turned off, including automatic ice makers. Then, check to see what type of water meter you have (dial or digital), and follow these simple steps.

Dial Meter: Check the flow indicator on your meter. If it is moving, it means that water is passing through the meter and there is a leak(s). If your meter does not have a low flow indicator, write down the meter reading shown on the dial and take note of the sweep hand's position. Check the meter in an hour. If the reading or the position of the sweep hand has changed, it may indicate that you have a leak(s).

DIAL METER



Digital Meter: First, activate the screen on the digital meter by shining a light on the face of the meter. If the flow arrow appears on the screen or if the meter reading calculates, and the number is increases, that means water is moving through the meter. NOTE: The direction of the flow arrow should match the direction of the arrow that appears on the base of the meter itself. If it does not, this means water is flowing in the opposite direction. This should be addressed immediately by installing a dual check valve on your service line or having your current dual check valve serviced.

10% of homes have leaks that waste 90 gallons or more per day.
Check and fix all household plumbing leaks or you could be throwing money down the drain (literally).

Check for faucet leaks

Faucet leaks are easy to detect. If your faucet drips, or worse, continues to keep running after you shut it off, it needs to be fixed. If the dripping water is hot, it is also costing you money to heat the water. Water dripping from the showerhead when the shower is off, or running out of the spout when the shower is on, is usually caused by bad washers or seats which need to be replaced.

Check for toilet leaks

Toilet leaks, which can often go unnoticed, are often caused by worn or damaged parts in the toilet flush tank, such as a bad flapper valve, flapper valve seat, ballcock valve, float arm or overflow tube. Use the dye tablets included with this kit to check for toilet leaks. Once you have used the tablets in the kit, you can continue to regularly check for leaks by pouring a cup of weak tea or coffee into your toilet tank. Using food coloring may permanently discolor your toilet bowl, if it has scratches or cracks.

STEP 3: PRACTICE WISE WATER USE

In the Bathroom

- The toilet is the biggest water waster in your house. By inserting the enclosed Fill Master Fill Cycle Diverter, you can prevent excess water from needlessly flowing down the drain. The fill cycle diverter saves water and money by making your toilet more efficient.
- Install water-saving showerheads and faucet aerators in your sinks.
- Shorten your shower to 7-10 minutes. Even shortening your shower by one or two minutes can save up to 150 gallons a month.
- Turn off the water when brushing your teeth. Saves one to two gallons each day.
- Rinse your razor with short blasts of water or by swishing it in a partially filled sink instead of running the water while you shave.
- Put bathroom trash and feminine hygiene products in the waste basket instead of flushing them down the toilet.

(More tips on the back panel)

In the Kitchen

- Run only full loads in the dishwasher.
- Before washing dishes by hand or in the dishwasher, scrape them; don't rinse first.
- If you wash dishes by hand, use two basins: one for washing and one for rinsing. Don't let the water run.
- Keep a bottle of drinking water in the refrigerator instead of running the tap for a cold glass.
- Rinse vegetables and fruit in a basin rather than under running water.
- Defrost frozen foods without running water over the packages. Plan ahead and place frozen items in the refrigerator overnight or defrost them in the microwave.

In the Laundry

- Washing machines use 15-40 gallons of water per load. If you have a machine with adjustable load controls, always adjust the water level to match the size of each load. If your machine doesn't adjust to different size loads, always wash full loads.
- The major cost in washing clothes is the hot water used. The more you wash and rinse with cold water, the more energy you will save.

Outside the Home

- Wash your car at a car wash that recycles its water. If washing at home, don't let the hose run continuously. Use a sprayer attachment on the hose that can easily be shut off.
- Drive your car onto the lawn before washing so that the rinse water can help water the lawn.
- Water the lawn only when it needs it, in the early morning or evening when there is less evaporation. Don't water on windy days. If the grass springs up when you walk on it, it doesn't need watering.
- Sweep driveways, patios and sidewalks with a broom instead of using the hose.

11-2021

Pennsylvania American Water is a proud member of the US EPA's WaterSense Program. We are committed to conserving our most precious natural resource – water, so it is available to meet the needs of future generations.

EPA WaterSense PARTNER

Pennsylvania-American Water Company
Docket Nos. R-2023-3043189 (Water)
R-2023-3043190 (Wastewater)
Office of Consumer Advocate Set 11

OCA 11-021

Responsible Witness: Charles Rea, Senior Director of Rates and Regulatory and
Cas Swiz, Senior Director of Rates and Regulatory

Question:

Reference: Swiz, p. 29: Please provide a detailed explanation of whether the proposed Environmental Compliance Investment Charge (ECIC) will be applied before or after the bill or a Bill Discount Program participant's discount has been applied to the bill.

Response:

The ECIC will be applied after the Bill Discount Program ("BDP") discount has been applied to the bill. In other words, a customer eligible for the BDP will have the discount applied to all base charges (Service Charge per Month and Consumption Charge) before the ECIC would be applied. This will result in a reduced ECIC charge (in dollars) compared to the ECIC absent the BDP. This is consistent with how the current DSIC and BDP operates.

Pennsylvania-American Water Company
Docket Nos. R-2023-3043189 (Water)
R-2023-3043190 (Wastewater)
Office of Consumer Advocate Set 16

OCA 16-001

Responsible Witness: Charles Rea, Senior Director of Rates and Regulatory

Question:

Reference PAWC Statement No. 10 (Rea), page 42, line 20 through page 45, line 10, and Table 5 on page 47.

a. Please separately identify the extent to which the Company expects (a) confirmed low-income customers (as that term was defined in response to OCA-05-001), (b) Bill Discount Program participants, (c) high-income customers, and (d) residential customers generally, to benefit, if at all, from winter averaging;

b. Please separately identify the extent to which the Company expects (a) tenants, and (b) homeowners, to benefit, if at all, from winter averaging;

c. Page 44, lines 4-5. Please explain why the Company selected these three months to determine a customer's average winter consumption. Please identify all other alternatives evaluated and provided copies of the Company's analysis evaluating each alternative;

d. Page 44, lines 4-5: Please provide in active Excel format, all empirical data used by the Company to reach the conclusion that these three months are the appropriate months to use to determine a customer's average winter consumption; and

e. Please explain in detail how the wastewater reallocation to water service presented in Table 5 would change if the Company's proposal for winter averaging is not approved by the Commission. Provide a revised Table 5 for the wastewater reallocation in the event that winter averaging is not approved and the supporting calculations and workpapers.

Response:

a. The Company does not expect winter averaging to specifically affect confirmed low-income customers or Bill Discount Program participants. The Company expects that winter averaging will benefit any residential customer that uses significant amounts of water in non-winter months over and above their winter average, which may include both higher and lower income customers.

b. Regardless of whether the PAWC customer is a tenant or homeowner, the customer will benefit to the extent they use significant amounts of water in non-winter months over and above their winter average and are directly billed by the Company.

c. The Company's three-month winter average period was proposed to more closely align wastewater bills in the summertime with cost-causation rate design principles. Under the

Company's current rate structure, customers are charged for wastewater service based on metered water usage. During summer months, there is a greater likelihood that water may be used for outdoor purposes that does not go through the Company's wastewater system. The Company selected January, February and March since these winter months are not generally subject to seasonal use. In addition, as noted in PAWC Statement No. 10 (pp. 43:17– 44:2) this methodology is aligned with approaches taken by other wastewater utilities.

d. See response to c). The Company did not evaluate alternative definitions for winter averaging periods, but the months selected were used because they're not generally subject to seasonal use.

e. The reallocation amounts in Table 5 at p. 47 of PAWC Statement No. 10 are not related to the Company's proposed winter averaging rate design and will not be affected if the Company's proposal is rejected by the Commission.

REBUTTAL TESTIMONY OF HARRY S. GELLER, ESQ.

ON BEHALF OF

THE COALITION FOR AFFORDABLE UTILITY SERVICES AND ENERGY EFFICIENCY IN PENNSYLVANIA ("CAUSE-PA")

February 21, 2024

Topics Addressed:

Recovery of Low Income Assistance Program Costs

PREPARED REBUTTAL TESTIMONY OF HARRY S. GELLER, ESQ.

I. INTRODUCTION

Q: Please state your name, occupation, and business address.

A: My name is Harry Geller. I am an attorney. I am the former Director of the Pennsylvania Utility Law Project. I am currently retired but serve as Senior Counsel to the Pennsylvania Utility Law Project (PULP) and as a consultant to legal aid programs and their clients. I maintain an office at 118 Locust St., Harrisburg, PA 17101.

Q: Did you previously submit testimony in this proceeding?

A: Yes. I submitted direct testimony that is pre-marked as CAUSE-PA Statement 1.

Q: What is the purpose of your rebuttal testimony?

A: My rebuttal testimony responds to the direct testimony of Office of Small Business Advocate (OSBA) Expert Witness, Kevin Higgins (OSBA St. 1). Specifically, my rebuttal will respond to Mr. Higgins recommendation that all costs associated with PAWC's proposed residential Arrearage Management Plan/Program (AMP) and certain costs associated with PAWC's low income assistance programs are assigned solely to the residential class.[1]

This rebuttal testimony is not intended to address every issue raised or otherwise discussed by other parties' witnesses in direct testimony. Absence of a response to any specific recommendation or position of any witness does not indicate my agreement. Unless required for context in providing a further response to direct testimony, I will not reiterate the extensive arguments and evidence that I provided in my direct testimony. To the extent an argument raised

[1] OSBA St. 1 at 30.

by any party in direct testimony is already sufficiently addressed in my direct testimony, I do not intend to respond, and stand on the evaluation, analysis, and recommendations contained in my direct testimony.

II. RESPONSE TO OSBA EXPERT WITNESS

Q: Please summarize how costs associated with PAWC's low income assistance programs are currently recovered.

A: Currently, PAWC recovers costs for bill discounts offered under its Help to Others (H2O) Bill Discount Program (BDP) from its residential customers.[2] However, PAWC allocates approximately $3,180,090 in AMP costs, as well as administrative costs associated with its H2O Hardship Fund grants, the BDP, and Dollar Energy Fund (DEF), among both residential and nonresidential customer classes in its cost-of-service studies.[3]

Q: Please summarize Mr. Higgins's direct testimony related to the allocation of low income assistance program costs to which you wish to respond.

A: Mr. Higgins recommends that costs associated with PAWC's AMP and low income assistance program costs – including administrative costs – are assigned solely to the residential class.[4] In support of this recommendation, Mr. Higgins argues that these programs are designed to benefit residential customers.[5]

I note that Mr. Higgins argues in his direct testimony that, in PAWC's last base rate proceeding, PAWC accepted OSBA's recommendation that AMP expenses should be directly assigned to the residential class.[6] However, as Mr. Higgins correctly points out, the Settlement

[2] OSBA St. 1 at 31: 1-5.
[3] OSBA St. 1 at 31: 1-18.
[4] OSBA St. 1 at 32: 3-6.
[5] OSBA St. 1 at 32: 3-6.
[6] OSBA St. 1 at 32: 15-20.

approved by the Commission in that matter did not adopt OSBA's recommendation that these costs are allocated solely to the residential class.[7]

Q: Has the Commission given any directives on this issue?

A: Yes. In its recent Final CAP Policy Statement and Order, the Commission addressed recovery of universal service program costs.[8] The Commission did not specifically order utilities to propose a specific allocation, but indicated that it is appropriate to consider recovery of the costs of customer assistance programs from all ratepayer classes because "poverty, poor housing stock, and other factors that contribute to households struggling to afford utility service are not just 'residential class' problems." The Commission explained that the provision of universal services to help low income families maintain service to their homes is "a benefit to the economic climate of a community."[9] The Commission directed that utilities and stakeholders should be prepared to address CAP cost recovery in utility-specific rate cases and stated that "the Commission will no longer routinely exempt non-residential classes from universal service obligations."[10]

To be clear, in noting the policy guidance set forth in the Commission's recent Final CAP Policy Statement and Order, I am not arguing a legal position on universal service cost recovery or the applicability of the Commission's CAP Policy Statement to PAWC – though I am advised by counsel that these legal aspects of the issue will be thoroughly addressed in briefing. Rather, my testimony on this issue is focused on the policy reasons why cross-class recovery of universal service programs is appropriate, as I will explain in further detail below.

Q: How do you respond to Mr. Higgin's assertion that PAWC's low income assistance program costs should be recovered solely from the residential customer class?

---

[7] OSBA St. 1 at 32: 15-20.
[8] Final CAP Policy Statement and Order at 97; see also 52 Pa. Code §§ 69.625(1), 69.266(b).
[9] Final CAP Policy Statement and Order at 7, 94-96, 107.
[10] Id; see also 66 Pa. C.S. § 69.266(b).

A: I disagree. It is inappropriate to require the residential class to solely shoulder the burden of universal service programs meant to remediate the impacts of utility insecurity, the effects of which impact all customer classes. Utility insecurity is a broad social problem, affecting all customers and requiring holistic societal solutions. Utility insecurity is a pervasive problem with long-term and far-ranging consequences for low income households and the surrounding communities in which they live and work.[11] Families who are unable to afford critical utility services are more prone to a variety of adverse consequences, including increased rates of health complications and hospitalization, eviction, and food insecurity.[12] For children in low income households, utility insecurity has been linked to long-term health consequences and developmental delays.[13] Moreover, communities of color continue to experience utility insecurity at disproportionately higher levels.[14]

While universal service program participants may derive the most direct and easily quantifiable benefits from universal service programs, these programs provide important societal benefits that are also enjoyed by non-residential ratepayers which should not be ignored. Many universal service program participants are employed – yet do not receive a wage that is adequate to afford basic household needs.[15] Many others are retired Seniors or individuals with a disability that do not receive enough in Social Security, disability, or retirement benefits to afford basic life necessities, such as utility services. Moreover, low income customers faced with utility insecurity often struggle to cope with heightened levels of stress, anxiety, and depression, and must take time away from work to arrange payments, locate or apply for assistance programs, and arrange for reconnections[16] – all of which significantly undermine worker productivity, impacting businesses, non-profits, government entities, schools, and other non-residential customer groups. Universal service programs also help utility companies to control uncollectible expenses, helping to bridge the gap in these circumstances, which benefits all customers. Thus, each of us, regardless of rate class, receives the benefits derived by a healthy and productive community – making it sound

policy for all customers to share in the cost of providing universal access to our most vulnerable residents.

Universal service programs provide not only a safety net for at-need residential customers but also broad societal benefits for all customer classes (industry, business, commerce, educational institutions, hospitals, local and state governments, and other residential customers) in specific and identifiable ways. In turn, the responsibility to provide universal access to life-sustaining utility services should be shared by all utility consumers – not simply residential customers.

Q: Do practices in other states provide any guidance related to the recovery of low income assistance program costs across classes?

A: Yes. Cross-class recovery for universal service costs is the "norm" across much of the country, where state utility commissions and legislatures have expressly recognized that universally available utility services benefit the community as a whole. To my knowledge, Pennsylvania is the only state with a history of generally limiting cost recovery of universal service programming to the residential class. As noted above, the Commission has recently indicated that it will no longer routinely exempt non-residential classes from universal service obligations. Other states which operate universal service programming, including, for example, Colorado, New Jersey, Maine, New Hampshire, New York, Washington, Oregon, Illinois, and California, recover the costs of that programming from every rate class. [17]

[17] Roger D. Colton, Best Practices: Low Income Rate Affordability Programs (Nov. 2007), available at: http://www.fsconline.com/downloads/Papers/2007%2011%20BestPractice_RateAffordability.pdf ("With the exception of Pennsylvania, whose utility commission has chosen to limit cost recovery exclusively to the residential class, low-income rate affordability programs recover their costs from all customer classes."); see, e.g., 4 CCR 723-3, § 3412(g) (Colorado); Amendments to Consumer Protections Standards for Electric and Gas Transmission and Distribution Utilities (Chapter 815) and Statewide Low Income Assistance Plan (Chapter 314), No. 2013-00228, Order (Me P.U.C. July 17, 2013); Re Statewide Low-Income Electric Assistance Program, 87 NH PUC 349, 218 P.U.R.4th 442 (N.H. PUC 2002); Order Adopting Low Income Program Modifications and Directing Utility Filings, NY Pub. Service Comm'n Docket No. 14-M-0565 (May 20, 2016); 2015 ORS § 757.612(7); Or. Admin. R. 860-100-0100; Illinois Energy Assistance Act (the "IEAA"), 305 ILCS 20/18; Cal. Pub. Util. Code § 382. I note that,

Q: What is your recommendation regarding the cost allocation of PAWC's low income assistance programs?

A: I recommend that PAWC continue its current practice of recovering costs associated with PAWC's AMP, and administrative costs associated with the H2O program and DEF, amongst both residential and nonresidential customers, as outlined above.

Q: Does this conclude your rebuttal testimony?

A: Yes.

while most other states use a statewide line-item charge to fund their respective universal service and energy conservation programming, Pennsylvania's legislature has chosen to fund these programs on an individual utility basis. This does not negate the need for cross-class recovery of low income assistance programming costs, but rather highlights the need to address equitable recovery of these program costs within the context of proceedings such as the present rate filing.

SURREBUTTAL TESTIMONY OF HARRY S. GELLER, ESQ.

ON BEHALF OF

THE COALITION FOR AFFORDABLE UTILITY SERVICES AND ENERGY EFFICIENCY IN PENNSYLVANIA ("CAUSE-PA")

March 4, 2024

Topics Addressed:

Rate Affordability / Rate Impact on Low Income Consumers

Low Income Programming

DSLPA/USTRA Policies and Procedures

Recovery of Low Income Assistance Program Costs

PREPARED SURREBUTTAL TESTIMONY OF HARRY S. GELLER, ESQ.

I. INTRODUCTION

Q: Please state your name, occupation, and business address.

A: My name is Harry Geller. I am an attorney. I am the former Director of the Pennsylvania Utility Law Project. I am currently retired but serve as Senior Counsel to the Pennsylvania Utility Law Project (PULP) and as a consultant to legal aid programs and their clients. I maintain an office at 118 Locust St., Harrisburg, PA 17101.

Q: Did you previously submit testimony in this proceeding?

A: Yes. I submitted direct testimony that is pre-marked as CAUSE-PA Statement 1, and rebuttal testimony that is pre-marked as CAUSE-PA Statement 1-R.

Q: What is the purpose of your surrebuttal testimony?

A: My surrebuttal testimony responds to the rebuttal testimonies provided by expert witnesses for the Pennsylvania-American Water Company (PAWC or the Company) and Bureau of Investigation and Enforcement (I&E).

This surrebuttal testimony is not intended to address every issue raised or otherwise discussed by other parties' witnesses in rebuttal testimony. Absence of a response to any specific recommendation or position of any witness does not indicate my agreement. Unless required for context in providing a further response to rebuttal testimony, I will not reiterate the extensive arguments and evidence that I provided in my direct and rebuttal testimonies. To the extent an argument raised by any party in rebuttal testimony is already sufficiently addressed in my direct and/or rebuttal testimony, I do not intend to respond, and stand on the evaluation, analysis, and recommendations contained in my direct and rebuttal testimonies.

Q: How is your surrebuttal testimony organized?

A: My surrebuttal testimony is divided into 5 sections as follows:

In Section I, I introduce my surrebuttal testimony. In Section II, I respond to rebuttal testimony of the exert witness for the Commission's Bureau of Investigation and Enforcement, Vanessa Okum (I&E St. 1-R), related to my recommended improvements to hardship funding and my recommendation that PAWC implement a comprehensive conservation and line repair/replacement program. In Section III, I respond to the rebuttal testimony of PAWC's expert witnesses regarding areas of agreement between CAUSE-PA and PAWC.

In Section IV, I respond to areas of disagreement between myself and other parties' expert witnesses in the following order:

- PAWC St. 1-R, Ashley E. Everette, related to my recommended funding improvements to PAWC's Hardship Fund.
- PAWC St. 9-R, Deborah A. Degillio, related to my recommended enhancements to customer screening protocols for low income assistance programs.
- PAWC St. 10-R, Charles B. Rea, related to my concerns that PAWC's Affordability Analyses did not adequately assess low income customer needs or widespread rate unaffordability for these customers across its service territory.
- PAWC St. 14-R, Tawana Dean, related to my recommended improvements to PAWC's customer outreach and enrollment in assistance programs; submission of a universal service plan; administration of its low income assistance programs; Hardship Fund; and policies and procedures pursuant to the Discontinuance of Service to Leased Premises Act (DSLPA) and Utility Service Tenants Rights Act (USTRA).

In Section V, I conclude my surrebuttal testimony.

II. RESPONSE TO I&E EXPERT WITNESS VANESSA OKUM (I&E ST. 1-R)

Q: Please summarize the rebuttal testimony of I&E's expert witness, Ms. Vanessa Okum (I&E St. 1-R), related to your recommended expansions to PAWC's Hardship Fund to which you wish to respond.

A: In my direct testimony, I explained that PAWC's Hardship Fund is extremely undersubscribed compared to the need amongst PAWC's low income customers for grant assistance.[1]

Ms. Okum raises concerns with my recommended expansion of funding for PAWC's Hardship Fund.[2] Ms. Okum argues that I do not explicitly state how this proposed increase is to be funded.[3] She notes that PAWC's current Hardship Fund is entirely funded by shareholders and not recovered by ratepayers.[4] As a result, Ms. Okum recommends that this practice should continue and that any increase to funding of hardship grants continue to be funded entirely through shareholders rather than recovered from ratepayers.[5]

Q: What is your response to Ms. Okum's rebuttal testimony related to how your recommended increases to PAWC's Hardship Fund should be funded?

A: I support Ms. Okum's recommendation that the $1,000,000 increase to PAWC's Hardship Fund be funded through shareholders rather than recovered through rates.

Q: Please summarize Ms. Okum's testimony related to your recommendation that PAWC implement a comprehensive conservation and line repair program to which you wish to respond.

---

[2] I&E St. 1-R at 3: 7-14.
[3] Id.
[4] Id.
[5] Id.

A: In my direct testimony, I recommend that PAWC develop and implement a comprehensive conservation and line repair/replacement program available to all customers at or below 200% FPL within 6 months of the final order in this proceeding.[6]

Ms. Okum argues in her rebuttal testimony that I do not indicate how this proposed program should be funded, or present any budget or cap for this proposals.[7] Ms. Okum recommends that, if ultimately approved, this program should be funded entirely by shareholders and not recovered from ratepayers.[8] As the program focuses on water conservation efforts and repair assistance, Ms. Okum argues that it would be inappropriate to add this expense to customer rates who do not participate in this program – particularly given PAWC's ever-increasing utility bills.[9]

Q: What is your response to Ms. Okum's concerns related to your proposal that PAWC implement a comprehensive conservation and line repair/replacement program?

A: I disagree to the extent that Ms. Okum's testimony relies on the implicit premise that it is inappropriate to fund water conservation and line repair assistance programs through rates because these programs benefit individual consumers. As I discussed extensively in my rebuttal testimony, low income assistance programs have tangible benefits for all ratepayers and the communities in which they live and work.[10] Importantly, water conservation and line repair programs help to control usage levels and corresponding high monthly bills resulting from homes in need of repairs and enhancements. Assisting low income customers to better control high usage ultimately helps to reduce universal service program costs. Similarly, assisting low income customers to control high usage levels through conservation and line repair/replacement assistance will help to lower

[6] CAUSE-PA St. 1 at 63-64.

[9] Id.
[10] CAUSE-PA St. 1-R.

bills inflated as a result of these issues and keep participating customers connected to services – thus reducing uncollectible expenses and termination costs that affect all ratepayers.

III. AREAS OF AGREEMENT WITH PAWC'S EXPERT WITNESSES

Q: Are there areas in which PAWC witness Rebuttal provides the basis for agreement?

A: Yes. There are specific areas of PAWC's expert witness rebuttal regarding low income water and wastewater burdens for its Bill Discount Program (BDP), Percentage of Income Payment (PIP) structure, program oversight, education, and outreach which indicate the basis for agreement.

Q: Please describe PAWC's expert witness rebuttal testimony which indicates agreement regarding implementation of BDP affordability burdens.

A: In my direct testimony, I pointed out that PAWC's proposed discount tiers failed to produce consistent, equitable levels of affordability – falling hardest on households with the lowest income and larger households, with correspondingly higher usage.[11] I proposed adjustments to PAWC's proposed discount tiers to improve the distribution of assistance and affordability achieved for those most in need.[12] In his rebuttal testimony, PAWC expert witness Charles Rea indicates that the Company does not oppose either my proposal or that of the Office of Consumer Advocate (OCA) witness Roger Colton to provide greater levels of affordability at lower income levels.[13] He indicates, ultimate approval rests with the Commission.[14]

Q: Does Mr. Rea's rebuttal testimony provide support for application of a maximum 2% water and wastewater burden, respectively, and therefore reason for Commission approval?

[11] CAUSE-PA St. 1 at 43-44.
[12] Id. at 45.
[13] PAWC St. 10- R at 30: 1-5.
[14] Id.

A: Yes. Mr. Rea indicates support for water and wastewater burdens not exceeding 2% of income, respectively, for low income customers. He indicates that the 2% standard is the generally accepted burden level for household affordability and is supported by the United States Environmental Protection Agency and the Teodoro study cited to in his testimony.[15] Further, he explains that affordability depends on whether a robust sustainable tariff program such as BDP is in place to provide affordable rates such as at 2% individual household income.[16]

Q: Is there a basis in the rebuttal testimony of PAWC's expert witnesses to indicate that the conditions allow for implementation of a Percentage of Income (PIP) BDP structure?

A: Yes. In my direct testimony, I indicated that a PIP structure is the optimal way to structure BDP toward the goal of achieving consistent, equitable, and targeted levels of affordability for low income households.[17] In response, PAWC witness Ms. Tawana Dean stated that PAWC is unable to implement a PIP at this time because PAWC does not have a verification of income process in place.[18] However, she also states that the BDP will not be implemented in isolation and that the Company's Arrearage Management Program (AMP) will be implemented by the end of the year.[19] She further states that the Company will be requiring income verification for AMP and BDP.[20] Since PAWC is presently acting to implement AMP, to coordinate AMP and BDP, and to implement a low income customer income verification process, the impediment it cites to a PIP will be removed. It would appear that PIP implementation planning may now take place concurrently with the AMP rollout, verification implementation, and AMP/BDP coordination.

[15] PAWC St. 10-R at 8: 1-7; PAWC St 10 at 10.
[16] PAWC St. 10-R at 9: 14-17.
[17] CAUSE-PA St. 1 at 44-45.
[18] PAWC St. 14-R at 5.
[19] Id. at 5: 2-4.
[20] Id. at 10: 1-3.

Q: What is your recommendation based on this analysis related to the structure and discounts under PAWC's BDP?

A: Based on the foregoing analysis, I modify my initial recommended improvements to the structure and discount levels provided under the BDP.[21] The improved BDP structure and discounts I recommend in my direct testimony should be viewed as a floor – or minimum – to necessary improvements to the BDP. I further recommend that the Commission require PAWC to transition its BDP to a percentage of income program (PIP), which targets affordability based on an individual's income level. I recommend that PAWC be required to submit a Petition no later than 6 months of the date of the final order in this proceeding seeking approval of a PIP-structure for its BDP, and in line with the affordability discussion I have set forth in my testimony in this proceeding.

Transitioning PAWC's BDP to a PIP-structure would ensure that those at the lowest levels of the Federal Poverty Level (FPL) and/or with larger families are not paying a disproportionate level of their income for critical water and wastewater services and would improve the ability of low income families to stay connected to water and wastewater services in their homes. As discussed in my direct testimony, rates for water and wastewater services are likely to continue to rise in the coming years, and are already unaffordable for PAWC's low income customers.[22] It is important that PAWC have a program structure in place capable of delivering accessible, consistent, and equitable levels of affordability to economically vulnerable households.

[21] CAUSE-PA St. 1 at 45, Table 12.
[22] Id. at 45: 1-17.

IV. AREAS OF DISAGREEMENT WITH PAWC'S EXPERT WITNESSES

A. *Response to PAWC expert witness Ashley E. Everette (PAWC St. 1-R)*

Q: Please summarize the rebuttal testimony of PAWC expert witness Ms. Everette (PAWC St. 1-R) to which you wish to respond.

A: Ms. Everette disagrees with the recommendation set forth in my direct testimony that PAWC increase annual funding for its Hardship Fund by $1,000,000 over and above existing funding levels.[23] Ms. Everette argues that utility payments to PAWC's Dollar Energy Hardship Fund are voluntary shareholder contributions, and that the Commission has previously held that it cannot order a utility to increase its contributions.[24]

Q: What is your response to Ms. Everette's rebuttal testimony related to Hardship Fund contributions you outline above?

A: As a threshold matter, counsel for CAUSE-PA has advised me that issues related to the precedence and weight of past Commission orders as they related to increasing funding of PAWC's Hardship Fund are legal issues that counsel for CAUSE-PA reserves for briefing.

That said, I have outlined the extensive need for increased hardship funding in my direct testimony.[25] The costs of acquisitions and related system costs have served to exacerbate rate unaffordability and rate increases. While PAWC's ratepayers have borne these costs, the underlying transactions that result in these acquisitions have resulted in present gains for the acquired entities. [26] It is just, reasonable, and in the public interest to require PAWC to invest and

[23] PAWC St. 1-R at 24; CAUSE-PA St. 1 at 52.
[24] Id. at 25: 1-3.
[25] CAUSE-PA St. 1 at 49-52.
[26] For example, it was reported that, in May 2016, PAWC's purchase of the New Cumberland Wastewater System was for approximately $23 million. Reuters, Pennsylvania American Water to buy New Cumberland Wastewater System (May 5, 2016), available at: https://www.reuters.com/article/idCNASC08NCN/. At the Harrisburg public input hearing, two residents from New Cumberland celebrated the sale, noting New Cumberland still has over $7 million to spend on local initiatives. Ratepayers across the service territory – including in New Cumberland – are paying for that windfall through rates.

provide sufficient assistance for its own financially vulnerable customers who are impacted from these transactions and resulting system costs. Thus, I stand by the analyses contained in my direct testimony.

B. ***Response to PAWC expert witness Deborah A. Degillio's Rebuttal Testimony (PAWC St. 9-R)***

Q: Please summarize Ms. Degillio's rebuttal testimony regarding screening for eligibility for PAWC's Help to Others (H2O) program to which you wish to respond.

A: Ms. Degillio disagrees with the recommendations set forth in my direct testimony that PAWC implement screening at the time of move-in and during non-emergency calls for eligibility in PAWC's low income assistance programs.[27] Ms. Degillio argues that customers often consider their income information to be confidential and may not want to share this information when discussing issues other than billing.[28]

Ms. Degillio also disagrees with my recommendation that eligible payment troubled customers should be assessed for enrollment in PAWC's BDP prior to being placed in a Company payment arrangement.[29] In my direct testimony, I raised concerns that PAWC was not directing potentially-qualified low income customers to its BDP and Hardship Fund prior to being placed in payment arrangements.[30] As I explained, while payment arrangements can be an important tool to manage arrears, they can also serve to exacerbate unaffordability when terms do not result in affordable monthly bills.[31] It is essential that low income customers are provided with the most

[27] PAWC St. 9-R at 10-11.
[28] Id. at 11: 14-22.
[29] PAWC St. 9-R at 10-11.
[30] CAUSE-PA St. 1 at 58-59.
[31] Id.

affordable options available so that they can stay afford and stay connected to water/wastewater services.

Ms. Degillio agrees that eligible payment-troubled customers should be enrolled in PAWC's H2O as early as possible.[32] However, Ms. Degillio argues that PAWC should not decide on behalf of customers whether to apply for the H2O program or enter into a payment arrangement.[33] She alleges that PAWC's customer service representatives offer both options so that customers can make a decision themselves.[34]

Q: What is your response to Ms. Degillio's rebuttal testimony related to your recommendation to implement regular screening for eligibility in PAWC's low income assistance programs?

A: I continue to assert that it is both necessary and appropriate to enhance screening of low income assistance programs, as I recommend in my direct testimony.

As discussed in my direct testimony, PAWC's enrollment rates for its low income assistance programs are inadequate. PAWC must be more proactive in identifying and enrolling low income customers to actively prevent the unnecessary accrual of arrears, and help low income customers qualify for assistance programs. Being more proactive in enrolling customers in available assistance programs will help reduce the number of arrearages held by low income customers. I firmly disagree that regularly screening for eligibility in low income assistance programs will lead to customer offense – so long as PAWC makes clear the purpose of the inquiry (i.e. to determine if customers are eligible for assistance) and that customers may choose not to disclose this information. There is a significant difference in a customer's perception when they are informed

[32] PAWC St. 9-R at 11: 3-13.
[33] Id.
[34] Id.

they may be eligible for a discount on their bill if they provide household income information – as opposed to when they are coldly asked their income without further context for why information is being requested. Thus, I stand by my recommendation set forth more fully in my direct testimony that PAWC should be required to routinely screen for eligibility in its low income assistance programs.

Q: What is your response to Ms. Degillio's testimony related to screening for eligibility in the H2O program prior to placing customers in payment arrangements?

A: First, Ms. Degillio does not contradict my concern that low income customers are unable to access hardship funding prior to being placed in potentially unaffordable payment arrangements that exacerbate arrearage levels and termination issues.

As discussed more fully in my direct testimony, low income assistance programs are designed in recognition of the fact that payment arrangements may exacerbate payment troubles for low income customers.[35] It is essential that eligibility in PAWC's low income assistance programs are assessed before low income customers are placed in potentially unaffordable payment arrangements.

While I agree with Ms. Degillio that low income customers should have the choice whether to enroll in the H2O or accept a payment arrangement, customers should be given the opportunity to make a fully informed choice, with clear information about the option that will provide the greatest level of affordability. In turn, consumers must be given the option to enroll in low income assistance programs prior to being placed in potentially-unaffordable payment arrangements. This is not only my opinion, such requirements are also enshrined in statute – a fact which counsel for CAUSE-PA will explore further in briefing.[36] I therefore stand by the recommendations in my

[35] CAUSE-PA St. 1 at 58-59.
[36] 66 Pa. C.S. § 1410.1 (Public Utility Duties).

direct testimony related to screening for low income customers and related to eligibility in PAWC's H2O.

C. ***Response to PAWC expert witness Charles B. Rea (PAWC St. 10-R)***

Q: Please describe Mr. Rea's rebuttal testimony related to PAWC's Affordability Analyses to which you wish to respond.

A: Mr. Rea raises several criticisms of my investigation of PAWC's Affordability Analyses. I continue to rely on my prior testimony regarding my analysis and respond here only to those of greatest concern to PAWC's lowest income customers.

First, in response to my arguments that Median Household Income (MHI) is not an appropriate standard and masks unaffordability amongst low income customers, Mr. Rea argues that MHI was utilized in the Enterprise-Level Analysis to provide a high-level historical perspective on affordability – while the Company's Community Level Analysis (which does not rely on MHI) was used to address the debt and breadth of low income affordability.[37]

Second, in response to my concerns that PAWC's Affordability Index does not address the extent of affordability for low income customers, Mr. Rea argues that PAWC's Affordability Index was meant to show the percent of customers for whom basic water service is less than 2% of household income. He notes that PAWC's provided analyses provides "bill to income" (BTI) ratios at various household income levels.[38]

Finally, Mr. Rea takes issue with my concerns that PAWC's Affordability Analyses found roughly one-third of PAWC's customers will receive water bills that exceed accepted affordability standards under its BDP proposal, and his conclusion that this is an acceptable outcome.[39] Mr. Rea

[37] PAWC St. 10-R at 23: 1-12.
[38] Id. at 23: 12-23.
[39] Id. at 24-25.

argues that he did not say or imply the number of customers whose bills are expected to be more than 2% of household income is an acceptable level of unaffordability.[40]

As a whole Mr. Rea argues that, despite the criticisms of PAWC's analyses lodged by myself and OCA's expert witness, Roger Colton, we nevertheless rely on information provided through these analyses – an alleged testament to the robustness and usefulness of the analyses.[41]

Q: What is your response to Mr. Rea's criticism of your scrutiny of his Affordability Analyses?

A: I continue to have serious concerns that PAWC's Affordability Analyses do not appropriately account for PAWC's low income customers – and their need for improved affordability. In particular, PAWC's analyses do not include an assessment of its estimated low income customer base to determine the scope of likely need. Further, as discussed in detail in my direct testimony, it appears that PAWC's current estimates of its low income customers do not provide sufficient level of detail as to the methodology or sources of calculation.[42] Indeed, Mr. Rea implicitly acknowledges that PAWC's Analyses was not specific to PAWC's low income customers. In defending his analyses, Mr. Rea indicates that "[n]owhere in my direct testimony did I say or otherwise imply that the number of customers whose bills are expected to be more than 2% of household income is an acceptable level of unaffordability."[43] Taken together, these deficiencies beg for more detailed analyses related to the extent of unaffordability faced by low income customers – including updates to PAWC's estimated low income customer count, which I recommend in my direct testimony.[44]

[40] Id. at 25: 1-5.
[41] PAWC St. 10-R at 27: 17-23.
[42] CAUSE-PA St. 1 at 47.
[43] PAWC St. 10-R at 25: 1-5.
[44] CAUSE-PA St. 1 at 47.

I also note that any limited use in my direct testimony of PAWC's Affordability Analyses should not lead to the conclusion related to the efficacy or appropriateness of these analyses. Rather, my reliance on PAWC's Affordability Analyses stands testament to the scant data provided by PAWC related to its low income customers in response to discovery. Again, these deficiencies beg for additional analyses and reporting related to PAWC's low income customers, as I have outlined throughout my direct testimony.

D. ***Response to PAWC expert witness Tawana Dean (PAWC St. 14-R).***

1. Outreach and Enrollment in Low Income Assistance Programs

Q: Please summarize Ms. Dean's testimony related to low income assistance program outreach and enrollment to which you wish to respond.

A: Ms. Dean disagrees with several of my recommendations to enhance outreach and enrollment related to PAWC's low income assistance programs. In my direct testimony, I explained that PAWC's low income assistance programs were woefully undersubscribed, and recommended that the Commission require PAWC to establish quantitative outreach goals and set enrollment benchmarks for the BDP at 20% per year of its estimated low income customer count until 75% of enrollment is reached.[45]

Ms. Dean disagrees with these recommendations, and alleges that the Company is making significant progress in reaching out to customers without formalizing benchmarks or quantitative goals.[46] Ms. Dean argues that PAWC engages in outreach events related to its low income assistance programs.[47] Ms. Dean also argues that PAWC has increased its BDP enrollment – including between December 2020 and November 2023, when PAWC increased its BDP

[45] Id. at 54; 48: 1-5.
[46] PAWC 14-R at 8-9.
[47] Id. at 7: 18-21.

participation by over 30%.[48] Ms. Dean also explains that the Company will be adding three new full-time employees whose primary job responsibilities will be low income customer outreach and to assist customers with accessing PAWC's low income assistance programs.[49] Ms. Dean also describes certain expansions to PAWC's myWater portal to highlight availability of low income assistance programs, and expanded outreach to communities based on updates to analytic processes.[50]

Ms. Dean similarly argues that establishing the enrollment benchmarks and quantitative goals which I recommend are inappropriate because the number of PAWC's confirmed low income customers is likely to fluctuate with the launch of the AMP and implementation of income verification for AMP and BDP customers.[51] Ms. Dean argues that it is unreasonable to establish enrollment benchmarks when enrollment levels are expected to fluctuate over the next year.[52]

Q: What is your response to Ms. Dean's rebuttal testimony concerning your recommendations to improve PAWC's low income assistance program outreach and enrollment?

A: I appreciate PAWC's efforts in recent years to improve its outreach efforts and enrollment in its BDP. I also support PAWC's plans to add three new full-time staff whose primary job responsibilities are related to customer outreach and assistance for PAWC's low income assistance program. As discussed in my direct testimony, PAWC's low income assistance programs only have a small number of dedicated staff.[53] This limits PAWC's ability to provide robust outreach, education, and enrollment assistance related to these programs.[54]

---

[48] Id. at 8: 1-11.
[49] Id. at 8: 1-11.
[50] Id. at 8.
[51] Id. at 9: 14-23.
[52] Id. at 9-10.
[53] CAUSE-PA St. 1 at 65: 13-21.
[54] Id.

Notwithstanding PAWC's recent efforts, I stand by my recommendations in my direct testimony that the Commission must require PAWC to meet certain quantitative goals and benchmarks related to enrollment in its low income assistance programs. These goals and benchmarks complement PAWC's efforts related to outreach and program enrollment for its low income assistance programs, and provide important metrics by which to gauge success in expanding access to these programs. Without these quantitative goals and benchmarks, it is difficult to determine which activities are most successful and whether PAWC's efforts have improved the ability of low income customers to maintain affordable service across its vast service territory.

While I recommend that PAWC establish certain quantitative goals related to affirmative customer outreach for the purposes of BDP enrollment, I also do not believe that changes to PAWC's income verification procedures preclude establishing benchmarks related to outreach and enrollment in low income assistance programs. [55] Many of the benchmarks that I recommend in my direct testimony are not dependent on PAWC's confirmed low income count.[56] In conjunction with my recommendations that PAWC update its estimated low income count in coordination with BCS,[57] I recommended that PAWC set target enrollment levels for its BDP which increase by 20% per year of PAWC's *estimated* low income customer count, until 75% enrollment of this estimated group is met.[58]

I further recommend that PAWC work with its Customer Assistance Advisory Group (CAAG) to design benchmarks that account for any changes in processes related to PAWC's tracking of its low income customers. PAWC should be required to implement the quantitative

[56] CAUSE-PA St. 1 at 47-48.
[57] Id. at 54.
[58] Id. at 48: 1-13.

goals related to affirmative customer outreach for the purposes of BDP enrollment in coordination with implementation of its AMP later this year. This will allow PAWC to better tailor these quantitative goals to account for changes in income qualification occurring in conjunction with AMP implementation.

2. Submission of a Universal Service Plan.

Q: Please summarize Ms. Dean's rebuttal testimony regarding your recommendation that PAWC be required to adopt a universal service plan to which you wish to respond.

A: Ms. Dean disagrees with my recommendation that PAWC develop a comprehensive universal service plan, filed with the Commission, to improve program transparency and Commission oversight.[59]

In my direct testimony, I recommended that PAWC be required to file a universal service plan and accompanying petition within one year of the final order in this proceeding.[60] Similarly, OCA expert witness, Mr. Colton, recommended that PAWC develop a written universal service plan to be filed with BCS.[61]

Ms. Dean argues that PAWC should not be required to adopt a universal service plan unless Pennsylvania law is modified to expand this requirement to water/wastewater utilities in the Commonwealth.[62] Ms. Dean argues that maintaining a universal service plan requires significant time, resources, and costs, and often requires establishing a new department focused on these plans.[63] Ms. Dean notes that EDCs and NGDCs staff 10 or more full-time employees, compared to PAWC who has 1.5 full-time employees to support its low income assistance programs.[64]

[59] PAWC St. 14-R at 11-12.
[60] CAUSE-PA St. 1 at 56.
[61] PAWC St. 14-R at 11-12.
[62] PAWC St. 14-R at 12: 4-19.
[63] Id.
[64] PAWC St. 14-R at 12-13.

Q: What is your response to Ms. Dean's rebuttal testimony related to PAWC establishing a universal service plan.

A: I do not believe that Ms. Dean's stated concerns preclude the need for PAWC to submit a Universal Service Plan for the Commission's review and approval. As discussed in my direct testimony, PAWC is not currently required to submit plans related to its low income assistance programs.[65] This leaves substantial gaps for the Commission, consumers, and utility advocates who must rely on PAWC's tariffs, settlements, orders, discovery requests, and information pieced together from websites and outreach materials to determine the full scope of rules, polices, and procedures related to these programs.[66] While I understand that submitting a Universal Service Plan may require additional time and resource commitments, it is essential that Commission staff, consumers and advocates can learn about the details underlying PAWC's low income assistance programs through a transparent Universal Service Plan. Indeed, while Ms. Dean touts PAWC's oversight of the administration of its low income assistance programs, it becomes difficult – if not impossible – to assess whether these programs are being administered in accordance with PAWC's and the Commission's requirements without a base understanding of the rules, policies, and procedures for these programs.

Ms. Dean's argument that PAWC currently only has 1.5 full-time employees dedicated to its low income assistance programs supports the need for PAWC to develop and submit a Universal Service Plan. The current small number of PAWC employees dedicated to these programs – as compared to the vast unmet need for assistance - limits the ability to provide robust outreach and services related to these programs. With these limitations, it is all the more essential that the Commission, consumers, and advocates are not required to unearth information related to these

[65] CAUSE-PA St. 1 at 56.
[66] Id.

low income assistance programs. Further, if Ms. Dean is serious that PAWC intends to add three additional dedicated full time staff to USECP, these staff may be treated as a resource to bring together the currently separate USECP information into one plan.

Finally, I question the validity of Ms. Dean's assertion that other EDCs and NGDCs often have more than 10 universal service program staff. It appears that many regulated utilities in Pennsylvania operate with fewer dedicated universal staff. For example, Duquesne indicates that it has 3 dedicated staff for its universal service programs.[67] While it appears that PECO maintains 10 full time employees in its Universal Service Department,[68] it does not appear that it is the norm for NGDCs and EDCs who maintain universal service programs to maintain 10 staff dedicated to universal service programming.

3. Administration of PAWC's low income assistance programs.

Q: Please summarize Ms. Dean's rebuttal testimony discussing your recommendations related to administration of PAWC's low income assistance programs to which you wish to respond.

A: In my direct testimony, I recommend that the Commission require PAWC to establish performance metrics and routinely audit applications handled or otherwise processed by Dollar Energy Fund (DEF), PAWC's low income assistance program administrator.[69] I recommend in my direct testimony that these performance metrics are implemented within 6 months of the final order in this proceeding, and that metric data and auditing reports are reviewed by PAWC on a monthly basis. I also recommend through my direct testimony that PAWC conduct and submit 6-year

[67] DLC Universal Services and Energy Conservation Plan, 2020-2025 at 23 (June 28, 2022).
[68] PECO Energy Company Universal Service and Energy Conservation Plan, 2019 to 2028, at 61 (Oct. 20, 2023).
[69] CAUSE-PA St. 1 at 66-67.

program evaluations related to its low income assistance programs, in line with the 6-year evaluations conducted by EDCs and NGDCs.[70]

Ms. Dean disagrees with these recommendations, which she classifies as costly.[71] Ms. Dean argues that PAWC has an excellent working relationship with DEF as its program administrator.[72] Ms. Dean argues that PAWC regularly meets with DEF, and addresses issues as they arise.[73] Ms. Dean also describes how PAWC has access to certain information related to DEF's administration of its low income assistance programs, including standard reports through DEF's Grant Management System – including standard reports of applications and grant activities.[74] Ms. Dean argues that the Company does not believe that a formal auditing process is needed, which would allegedly require PAWC to adopt a rider recovery mechanism to collected increased costs related to overseeing performance of its program administrator.[75]

Q: What is your response to Ms. Dean's testimony related to administration of PAWC's low income assistance programs you outline above?

A: I strongly disagree that the availability of reports and meetings "as issues arise", as described by Ms. Dean, are a reasonable substitute for routinized auditing and oversight that I have recommended in my direct testimony. As described in my direct testimony, it does not appear that PAWC has procedures in place to appropriately monitor DEF's administration of its low income assistance programs.[76] DEF providing certain standard reports and maintaining open channels of communication when issues arise or when PAWC raises questions is not equivalent to PAWC conducting regular evaluations of DEF's administration based on developed metrics. As discussed

[70] Id.
[71] PAWC St. 14-R at 14: 1-13.
[72] Id.
[73] Id.
[74] Id.
[75] Id.
[76] CAUSE-PA St. 1 at 65.

in detail in my direct testimony, without this systematic and regular assessment, it is impossible to accurately determine whether PAWC's low income assistance programs are being administered in a manner that is compliant with program rules and parameters developed by PAWC and approved by the Commission.[77]

I note that if DEF is performing at the level claimed by Ms. Dean, then routinized oversight should be easily incorporated into existing work flow and should not pose a significant cost. As previously mentioned, PAWC intends to add three new employees to its universal service program staff. Reviewing reports on a monthly basis to identify and resolve issues should necessarily be part of the job duties of PAWC's expanded universal service program staff.

I also disagree with Ms. Dean that any increase in costs as a result of these important enhancements to PAWC's oversight of DEF's administration will necessarily require a rider recovery mechanism to recover any increased costs related to this auditing. DEF's administration of PAWC's low income assistance programs are already recovered through rates.[78] Any costs associated with appropriate oversight of DEF's administration should be recovered in the same manner as other program costs and does not require a separate rider recovery mechanism.

4. Hardship Fund Improvements

Q: Please summarize Ms. Dean's rebuttal testimony related to your recommended improvements to PAWC's Hardship Fund to which you wish to respond.

A: In her rebuttal testimony, Ms. Dean disagrees with my recommendations that PAWC increase the maximum grant amount for its Hardship Fund to $600 for water and wastewater customers, respectively.[79] Ms. Dean argues that DEF is developing enhancements expected to deploy at the start of the 2024-2025 program year so that customers will be able to apply for multiple Hardship Fund grants per program year.[80] In light of this expansion, implementation of its Arrearage Management Program (AMP), and its proposed expansion of its BDP, Ms. Dean argues that it is premature to consider increasing the Hardship Fund maximums to $600.[81]

Ms. Dean also disagrees with my recommendation that PAWC eliminate its upfront payment requirement for its Hardship Fund.[82] As discussed in fuller detail in my direct testimony, I recommend that PAWC eliminate its upfront (or good faith) payment requirements for its Hardship Fund - so that, if a customer meets all required eligibility criteria for the Hardship Fund, they should be able to access a Hardship Fund grant without upfront payment.[83] Ms. Dean argues that PAWC's Hardship Fund includes this upfront payment requirement to ensure that eligible customers are making a "sincere" effort to pay their utility bills.[84]

Q: What is your response to Ms. Dean's arguments against expanding the maximum grant amounts of PAWC's Hardship Fund to $600?

[79] PAWC St. 14-R at 16: 1-18.
[80] Id.
[81] Id.
[82] PAWC St. 14-R at 15-16.
[83] CAUSE-PA St. 1 at 53.
[84] PAWC St. 14-R at 15-16.

A: It is in no way premature to increase the maximum Hardship Fund grant amounts for water and wastewater customers to $600, respectively, especially in light of PAWC's proposal to exponentially increase rates. As described in my direct testimony, PAWC's low income customers already consistently carry average arrearage levels higher than PAWC's current maximum for its Hardship Fund grants of $500.[85] This current unmet need must be more adequately addressed through increased availability of a meaningful level of Hardship Fund grants. PAWC's projected enhancements to its low income assistance programs may result in more low income customers coming forward to access needed assistance. However, this increased identification of need, should not detract from customers receiving adequate Hardship Fund grant assistance to address high arrearages accrued as a result of unaffordable monthly bills.

It is certainly true that PAWC's Hardship Fund may have increased uptake, especially if PAWC's staggering proposed rate increase is approved. My recommendation that PAWC increase its hardship funding to more appropriately proportionate levels will help to account for the increased need. Thus, I stand by my recommendation set forth more fully in my direct testimony that PAWC be required to increase its maximum grant amounts to $600 for its water and wastewater customers, respectively.

Q: What is your response to Ms. Dean's rebuttal testimony regarding your recommendation that PAWC eliminate the upfront payment requirement for its Hardship Fund?

A: I continue to stand by my recommendation that the Commission require PAWC to eliminate its upfront payment requirements to access assistance through its Hardship Fund. From my experience working with low income utility consumers, these subjective and arbitrary

[85] CAUSE-PA St. 1 at 53.

preconditions pose an insurmountable barrier to receiving grant assistance for the most at-need low income customers. With such requirements, if customers are not able to make payments for a number of months due to financial hardships, they would be categorically disqualified from receiving critical grant assistance – precisely when grant assistance is most needed. Hardship funding should neither be delayed nor denied due to imposition of a subjective, burdensome, and unproven values system. In my experience working with low income families, most have exhausted their meager resources, including obtaining support from family and friends, before applying for grant assistance programs. This is especially true of uniquely vulnerable households, such as victims of domestic violence and families with medical needs or disabilities, as well as Seniors and others with low fixed income. A single crisis or unexpected event can destabilize the precarious financial stability of a vulnerable household. Indeed, I have personally assisted clients facing similar up-front payment requirements, who have resorted to borrowing from predatory payday lenders to make them eligible to receive grant assistance to prevent termination – compounding financial insecurity and further destabilizing the household. A customer facing a financial hardship should not need to turn to high-cost lenders as a condition to obtaining grant assistance.

Ultimately, up-front payment requirements are not a test of how sincere a customer is in paying their bills, but rather are significant obstacles and barriers which penalize low income families who are most unable to afford their monthly bills. These requirements push families closer to bankruptcy – which only serves to further increase uncollectible expenses. PAWC's current and proposed rates of service are unaffordable for low income families. Demanding a showing of "good faith" payments fails to account for this continued unaffordability and the realities that low

income families face on a daily basis. Families experiencing an acute financial hardship should not be required to make an up-front financial payment in order to secure financial assistance.

5. PAWC's Policies and Procedures related to the DSLPA/USTRA

Q: Please summarize Ms. Dean's direct testimony related to your recommended enhancements to PAWC's polices and procedures pursuant to the DSLPA and USTRA?

A: Ms. Dean disagrees with my recommendation to improve PAWC's policies and procedures related to the DSLPA and USTRA.[86] In my direct testimony, I raised concerns that PAWC does not have adequate policies, procedures, and processes to monitor its compliance with the DSLPA and USTRA.[87] I recommend through my direct testimony that PAWC track and report on the number of notices, dates of notices, numbers of tenants contacted, and payments made in response to notices for service termination conducted pursuant to the DSLPA.[88]

Ms. Dean argues that PAWC fully complies with the DSLPA and USTRA, where a municipal wastewater utility requests water service termination.[89] Ms. Dean argues that my recommendations are not required by the DSLPA or USTRA.[90] Ms. Dean notes that the DSLPA does not require a utility to investigate each property in its service territory to determine if a landlord ratepayer property is tenant occupied.[91] Ms. Dean describes how PAWC relies on information from tenants, landlords, and tenant/field representatives to determine if a property is reasonably likely to be tenant occupied – and provides required notices pursuant to the DSLPA.[92]

[86] PAWC St. 14-R at 17-18.
[87] CAUSE-PA St. 1 at 70-72.
[88] Id. at 71-73.
[89] PAWC St. 14-R at 18.
[90] Id.
[91] PAWC St. 14-R at 18: 1-9.
[92] Id. at 18.

Ms. Dean argues that there is no indication that PAWC's steps to determine whether service addresses are coded as landlord-ratepayer/tenant occupied are deficient.[93]

Q: What is your response to Ms. Dean's criticisms related to your recommended improvements to PAWC's policies and procedures pursuant to the DSLPA and USTRA?

A: I disagree with Ms. Dean's responses that my recommended enhancements to PAWC's policies and procedures pursuant to the DSLPA/USTRA are unnecessary. In my direct testimony, I outline significant concerns that PAWC is not adequately tracking its compliance with a number of crucial aspects of the DSLPA/USTRA. [94] These deficiencies include: (1) the number of DSLPA notices provided to tenant-occupied accounts related to voluntary discontinuance of services or involuntary terminations for nonpayment; (2) issues related to coding of tenant-occupied accounts; and (3) management of partial payment by tenants seeking to exercise rights pursuant to the DSLPA.[95]

While Ms. Dean argues that there is no evidence that impingement of DSLPA/USTRA requirements is occurring, it is impossible to determine whether, or the extent to which, DSLPA/USTRA compliance issues are occurring without the additional data tracking and reporting I have outlined in my direct testimony. Indeed, lack of data tracking and reporting related to PAWC's compliance with the DSLPA/USTRA may mask significant compliance issues that require review and remediation. As I previously explained, there are strong data indicators suggesting this is likely the case. I therefore stand by the recommendations set forth more fully in my direct testimony that PAWC improve its data tracking and reporting related to DSLPA/USTRA.[96]

DIRECT TESTIMONY OF CHAIR JOHN "JACK" PIHO ON BEHALF OF EXETER TOWNSHIP, INTERVENOR

January 31, 2024

. DIRECT TESTIMONY OF JOHN "JACK" PIHO

INTRODUCTION

Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A. My name is Jack Piho. I am the Chair of the Board of Supervisors ("Board") of Exeter Township ("Township"), a township of the second class located within Berks County with an address of 4975 DeMoss Road, Reading, PA 19606.

Q. PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND AND EXPERIENCE.

A. I graduated from John Hopkins University with a Bachelor of Science in Mechanical Engineering. I also have a degree in Engineering Management and have taken numerous master-level courses in finance, human relations, labor management and business practices. I am the owner of Piho Engineering, an engineering and construction firm doing business in the food and beverage industry worldwide and locally with Sweet Street, Lehigh Dairy and Wawa. I am a registered Professional Engineer in multiple states and have been recognized as an expert for engineering design, code issues and construction review.

I was previously appointed as a member of the Exeter Township Board of Supervisors in March of 2021 and served until the end of that year. In the 2023 General Election, I was elected as a member of the Exeter Township Board of Supervisors and began serving on the Board earlier this month. On January 2, 2024, I was appointed as the Chair of the Exeter Township Board of Supervisors.

Q. HAVE YOU PREVIOUSLY TESTIFIED IN REGULATORY PROCEEDINGS ON UTILITY RATES?

A. No.

Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

A. The Township, on behalf of itself and its residents, is extremely concerned about the impact of the water and wastewater rate increases proposed by Pennsylvania-American Water Company ("PAWC"). PAWC's rate proposal would substantially increase residential rates for residential customers and for the Township as a municipality.

The Township is home to over 25,000 residents, and approximately 17.1% of Township residents are at least 65 years of age or older. Many elderly residents survive on fixed incomes, and, especially given recent rampant inflation across all sectors of the economy, the rate increase imposed by PAWC will only serve to further strain the limited resources of Township residents.

With respect to residential water, my understanding is that PAWC's proposals would generally increase a residential water bill for a typical customer using approximately 3,201 gallons per month from $70.65 to $88.24 per month, or by 24.9%. (Volume I, Notice of Proposed Water and Wastewater Rate Changes).

With respect to Township residents, I understand that PAWC's proposal would increase the per 100 gallon water charge for residential customers in Exeter Township from $1.6108 to $2.1319, an increase of 32.4%. *Compare* Supplement No. 45 to Tariff Water-PA P.U.C. No. 5, Fourth Revised Page 16 (setting forth a residential usage charge per 100 gallons of $1.7276 in Rate Zone 1), with Supplement No. 40 to Tariff Water-PA P.U.C. No. 5, Third Revised Page 16 (setting forth a residential usage charge per 100 gallons of $1.6108 in Rate Zone 1).

It is my further understanding that PAWC's proposal would increase the per 100 gallon water charge for municipal customers (including Exeter Township) from $1.6700 (for

the first 16,000 gallons) to $1.9984, an increase of nearly 19.7%. *Compare* Supplement No. 45 to Tariff Water-PA P.U.C. No. 5, Sixth Revised Page 16.1 (setting forth a municipal consumption charge per 100 gallons of $1.9984), *with* Supplement No. 40 to Tariff Water-PA P.U.C. No. 5, Fifth Revised Page 16.1 (setting forth a municipal consumption charge of $1.6700 per 100 gallons for the first 16,000 gallons).

. The steep increases in rates for water as proposed by PAWC will have a disproportionate harmful impact on the Township's elderly residents on fixed incomes. By increasing municipal water rates, Township residents face a "double-whammy," as the Township derives tax revenue from residents and may have to increase its mileage in order to accommodate PAWC's proposed increase.

Q. DOES THE TOWNSHIP SUPPORT PAWC'S PROPOSED RATE INCREASE?

A. No. For the reasons previously stated, the rate increases will disproportionally impact Township residents and dramatically increase rates applied to the Township itself.

Q. DOES THIS CONCLUDE YOUR TESTIMONY AT THIS TIME?

A. Yes.

SUPPLEMENTAL TESTIMONY AND EXHIBITS OF ROBERT J. MAY ON BEHALF OF THE BOROUGH OF ST. LAWRENCE, BERKS COUNTY, PENNSYLVANIA

KOZLOFF STOUDT
Professional Corporation
By: Joan E. London, Esquire
Attorney I.D. #67934
2640 Westview Drive
Wyomissing, PA 19610
(610) 670-2552
Solicitors for the Borough of
St. Lawrence, Berks County

DIRECT TESTIMONY OF ROBERT J. MAY

Q. Please state your full name.

A. Robert J May

Q. Do you currently hold any offices in the Borough of St. Lawrence?

A. I am the current Borough of St. Lawrence Council President.

Q. How long have you served on Borough Council?

A. I've served on Borough Council since 1991.

Q. Do you hold any professional licenses or certifications?

A. Yes. I am a Professional Engineer in Pennsylvania (#043392R), and a Pennsylvania Department of Environment Protection (PADEP) Wastewater Operator (#S12382, A, E, 1, 2, 3,). I am also a licensed wastewater operator in New Jersey, Maryland, and Texas.

Q. Are you aware of a public hearing held on February 5, 2024 in Exeter Township?

A. Yes.

Q. And are you aware that there was resident opposition to the proposed wastewater rates increase for public sewer?

A. Yes.

Q. Is Borough Council taking a position on the proposed rate increase?

A. Yes.

Q. Could you explain the reasoning for that?

A. The Borough owns the collection system in the Borough conveys the wastewater to the PA American wastewater treatment plant, which also was formerly owned by Exeter Township. Since the 1960s until the time of the sale of the system, the Borough had agreements in place with Exeter Township for the manner of billing and formula for charges, based upon the Borough's contributions to the plant's and system's construction and expansion over time, and we now have an agreement with PA-American. The Borough is classified as a bulk user of the PA American wastewater system and plant. The Borough is billed monthly and directly pays PA-American. The Borough then, in turn, invoices Borough property owners connected to the system.

The Borough collection system has a length of approximately 45,566 linear feet. A portion of the Borough collection system, approximately 2,463 linear feet, also conveys a portion of the PA-American wastewater from a section of Exeter Township and a portion of Alsace Township.

Q. I have what we will mark as Borough of St. Lawrence Exhibit 1. Could you please identify this for us?

A. Borough of St. Lawrence Exhibit 1 is a map which shows the collection system, including sewer lines and mains, and manhole locations. It shows that nearly all of the properties in the Borough are connected to the public sanitary sewer system, so nearly all of the properties would be impacted by a rate increase. It also shows areas where the Borough has performed recent maintenance work on the collection system.

Q. Does PA American use any part of the collection system of the Borough?

A. Yes, approximately 2,463 linear feet.

Q. Does the Borough charge PA-American for the use of the 2,463 linear feet in the Borough's collection system.

A. No. The Borough does not charge any fee to PA American for their wastewater that is conveyed by the Borough collection system.

Q. I would like to discuss further with you the maintenance work that the Borough has performed, that is shown in Borough Exhibit 1. Could you tell us what was done, and the reasons for this work?

A. Since 2009, the Borough has a performed an extensive program to identify and rectify infiltration and inflow, which I will refer to as "I&I." This program was developed to prevent stormwater or groundwater from entering the Borough collection system. The program utilized portable wastewater flow meters. The meters were used to calculate wastewater flows in sectionalized portions of the collection system, especially during rain events. Any I&I wastewater is additional wastewater that is not measured as the wastewater quantity calculated by water meter readings on the buildings in the Borough. The Borough paid an additional fee for the I&I wastewater entering the Exeter system, as it would do now if I & I entered the PA American wastewater system. The Borough has a fiduciary responsibility to minimize I&I since this a controllable cost which also reduces the wastewater quantity processed by the wastewater treatment plan. The Borough wastewater I&I program was

developed in response to historic concerns of I&I within the Borough wastewater system and the previous Exeter Township wastewater system. The program was developed as a 20 year plan where the Borough wastewater collection system would be televised and any defective collection pipes or manholes would be repaired. Work was performed in 2010 where the entire system was televised and corrections such as new pipe epoxy liner installations were performed. The system was televised a second time in 2021 and additional repairs, including new piping epoxy liner installations, were performed. It should be noted that any piping repairs in 2010 were not in need of repair in 2021. This program will be repeated in 2030, where it is anticipated that the televising will present any piping segments that were not repaired in 2010 and 2021, may be in need of repair. In 2030, it is anticipated the entire Borough wastewater collection system will have been relined.

Q. What do you believe will be the result of the Borough's program to reduce I & I in its collection system?

A. The Borough's I&I program will have rehabilitated the entire wastewater collection system, essentially presenting a completely rehabilitated collection system in 2030. The rehabilitation program in 2030 will have extended the wastewater collection system life by a minimum of 30 years.

Q. On behalf of the Borough, what is the Borough's position on the fairness of this rate increase for Borough rate payers?

A. The current PA American rate increase is presented as a requirement for the collection system upgrades due to I&I issues and wastewater plant upgrades. From the perspective of the Borough, this rate increase incorporates costs for the PA American collection system for PA American I&I, formerly Exeter I & I, that is not the burden of the Borough. The Borough wastewater flows through one main PA American collection pipe from the Borough collection system endpoint to the wastewater treatment plant. The total length of travel is estimated at 26,100 linear feet which is approximately 3.75% of the entire approximate 660,000 linear feet and 3,108 manholes of the PA American collection system. **Borough citizens should not have to contribute to the maintenance and upgrade of the entire PA American collection system that was the previous Exeter Township wastewater collection system. The Borough requests the PUC to intervene and advocate for proper fees that reflects the information presented.**

Q. I have what we will mark as Borough Exhibit 2. Could you identify that for us?

A. This is a summary of the composition of the Borough's collection system, including the types of pipe, and the work we have done on the system, and the three phases of lining projects that the Borough has done for both manholes and lines. The Borough has lined nearly half of the manholes and pipe in the system.

Q. Why do you believe that the Borough's history of system maintenance should bear on the rate increase impacting Borough residents.

A. The rate increase does not differentiate any charges for the costs of upgrades to the PA American wastewater plant that was previously owned by Exeter Township. The Borough and Exeter Township, since 1961, had a wastewater plant operation agreement, where the Borough was a minority financing partner. The Borough contributed 6% of all capital costs for the wastewater treatment plant, including the initial build and subsequent upgrades. This agreement also incorporated wastewater treatment plant operational costs, where the Borough paid a proportion fee, based on a percentage of wastewater treated. This agreement became moot when Exeter Township sold the wastewater collection system and wastewater treatment plant to PA American in 2019.

Q. Is there a course of action that you are requesting from the PUC on behalf of St. Lawrence residents?

A. The Borough requests the PUC to require PA American to disclose the individual items that comprise the rate increase so that the items specific to the maintenance and upgrade to the wastewater treatment can be presented. Borough citizens should contribute only a proportional amount of the wastewater plant upgrade costs referencing the quantity of Borough wastewater treated compared to the total quantity of wastewater treatment. Specifically, the Borough requests the PUC to intervene and advocate for proper fees that reflects the information presented.

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

ELECTED OFFICIAL KYLE T DONAHUE

Docket Nos. R-2023-3043189 and R-2023-3043190

DIRECT TESTIMONY
OF
KYLE T DONAHUE
STATE REPRESENTATIVE
113TH DISTRICT

January 31, 2024

Q. PLEASE STATE YOUR NAME AND ADDRESS FOR THE RECORD.

A. Kyle Donahue 621 Gibbons St. Scranton, Pa 18505

Q. WHERE ARE YOU EMPLOYED?

A. I am a State Representative in the Pennsylvania General Assembly.

Q. ARE YOU A WATER AND/OR WASTEWATER RATEPAYER OF PENNSYLAVNIA AMERICAN WATER COMPANY?

A. Both

Q. ARE YOU TESTIFYING ON BEHALF OF YOURSELF AND/OR OTHERS TODAY?

A. I am testifying on behalf of my constituents and myself.

Q. WANT TO ADD BACKGROUND INFORMATION AND PRIOR EXPERIENCES? ANYTHING ABOUT UTILITIES AND/OR MUNICIPAL FINANCE IN PARTICULAR?

A. This will be a repetitive answer throughout this questionnaire that PAWC ratepayers received a 70% increase in their sewer/water bills last year.

Q. WHAT IS YOUR UNDERSTANDING OF PAWC'S RATE INCREASE REQUESTS?

A. The 28% increase proposed by the company right now is outrageous for water customers and my constituents. Again, we received a 70% increase last year. Our seniors and working families are on a fixed income and can't afford it. This will have an adverse effect on small business.

Q. HOW MANY RESIDENTS, WHO WOULD BE AFFECTED BY THESE RATE INCREASES, ARE WITHIN YOUR CONSTITUENCY?

A. Sixty-Five Thousand

Q. WHY DID YOU INTERVENE AS AN ACTIVE PARTY IN THIS PROCEEDING?

A. As a State Representative my office was flooded with calls regarding last year's 70 percent increase. My constituents which consist of mostly seniors and blue-collar workers just can't afford it.

Q. WHY ARE YOU CONCERNED WITH WATER RATE HIKES FOR YOUR CONSTIUTENTS?

A. The average ratepayer age is 62 and most are on fixed incomes. Twenty percent of my district is rated below the poverty level.

Q. WHY, IF AT ALL, WOULD THE RATE INCREASE BE SO DETRIMENTAL TO YOUR CONSTITUENTS IN THE CITY OF SCRANTON?

A. My answer to this question is the same as the two previous questions.

(See Lines 22 thru 29)

Q. WHO ARE THE WATER AND WATSEWATER UTILITY PROVIDERS IN THE CITY OF SCRANTON?

A. All wastewater customers referred to in the Asset Purchase Agreement are residents of the City of Scranton. There are no other water or wastewater providers operating within city limits. The City is at the mercy of the PAWC.

Q. WHY IS THE CITY OF SCRANTON CONCERNED WITH WASTEWATER RATES IF PAWC IS ONLY REQUESTING 2.5% INCREASE ON WASTEWATER RATES AS OF TODAY?

A. Scranton's position is particularly unique in this matter in that the Scranton Sewer Authority, a municipal authority of the City of Scranton incorporated and existing pursuant to the Municipal Authorities Act, as amended, 53 Pa. Cons. Stat. Ann. §§ 5601-5623, sold its combined sewer system to the Water Company on or about March 29, 2016. We are formally entering into this record a true and accurate copy of the Asset Purchase Agreement (also referred to as "the APA" or "APA") as Exhibit A.

This APA contains reference to and material terms in relation to a Consent Decree issued in the matter of U.S.A. v. Scranton Sewer Authority, Civil Action No. 3:09–cv–1873, (M.D. Pa. December 13, 2012), a copy of which we are also formally entering into the record as Exhibit B.

While the City of Scranton and Dunmore were not a party to the APA, residents and ratepayers will feel the effects of an increase, particularly if the PUC determines that wastewater rates should increase even more.

While the City of Scranton appreciates the majority of the challenges that the Office of the Consumer Advocate has articulated and put forward against the PAWC, the City of Scranton (along with the Borough of Dunmore) does not support shifting the burden of a rate hike onto wastewater consumers due to the deleterious and devastating effects it would have on our City's ratepayers.

Q. CAN YOU EXPLAIN WHY THE CITY OF SCRANTON HAS CONCERN ABOUT AN INCREASE OF WASTEWATER RATES IN THE CONTEXT OF THE OCA'S ARGUMENTS?

For example, paragraph J on p. 6 states "However, the OCA submits that shifting so much of its wastewater revenue requirement to water customers is unfair to PAWC water customers, most of whom are not PAWC wastewater customers and receive no benefit from PAWC's wastewater service."

Scranton and its residents are located within the PAWC's service territory and will be directly affected by the outcome of this proceeding. Particularly, this proceeding will impact the price that Scranton and its residents pay for water and wastewater, as well as the reliability and quality of those services.

Scranton will be disproportionately and negatively affected if the PUC is so persuaded by the arguments in line with paragraph J on page 6 of OCA's complaint due to its contractual relationships and positions from the APA Sewer Sale. [Also applies to Dunmore]

Q. HAS PAWC RAISED RATES BEFORE?

Yes, last year the PAWC shocked the ratepayers of Dunmore and Scranton with a 70% increase for the water and sewer with no advanced notice. The City of Scranton and Borough of Dunmore were not even informed by PAWC or the PUC of this horrible settlement agreement which disproportionately hurt our ratepayers.

Q. WHAT WAS PAWC'S RATIONALE FOR LAST YEAR'S INCREASE?

It is my understanding that in April 2022, the PAWC requested a rate increase because they said was necessary and that the company needed $1 billion in system investments needed to address aging water and wastewater infrastructure.

Q. TO YOUR KNOWLEDGE, HOW DID THIS AFFECT RATEPAYERS IN THE CITY OF SCRANTON/YOUR CONSTITUENCY?

A. The massive 70% water-sewer rate increase was devasting not only to my residents but to my small businesses.

Q. HOW DOES LAST YEAR'S RATE INCREASE FACTOR INTO YOUR POSITION ON THE PENDING REQUEST FOR INCREASE BEFORE THE PUC TODAY?

A. It is ridiculous. My constituents are barely getting by day to day with their expenses. Ratepayers currently pay more to dispose of their wastewater then they do for their water. Last year's 70% increase had a devasting effect on my constituents. They simply cannot afford to pay PWAC's request to increase rates to appease their shareholders and provide bonuses to corporate executives. PAWC has monopoly on water and sewer in my district it's time the 30-billion-dollar company invest some of their profits into the infrastructure work and stop burdening the ratepayers.

Q. DO YOU HAVE A POSITION AS TO THE PAWC'S PROPOSAL FOR RATE DECOUPLING?

A. Yes, I strongly oppose a surcharge for residents who conserve water and try to minimize their bills. **THIS IS PURE INSANTIY**. Shame on the PAWC for even asking for such surcharge. In essence PAWC wants to collect ratepayer money for conserving water. How does this help our environment? It doesn't.

Q. ARE THERE ANY OTHER MUNICIPALITIES OR PARTIES THAT YOU AGREE WITH IN THIS CASE?

Yes, I join with the City of Scranton and the Borough of Dunmore in their positions, evidence, exhibits and testimony that was presented at the January 30th public hearing. I also believe that the Borough of Dunmore is also an affected party by and through the APA and it is our understanding and position that we have the same position as the Borough of Dunmore.

Q. HAVE ANY SMALL BUSINESSES RAISED CONCERNS TO YOU REGARDING THE PROPOSED INCREASE?

A. Numerous restaurants, gas stations, car washes and landlords etc. were outraged by the purposed increase. Furthermore, they believed that they had no right to speak at the January 30th meeting in Scranton because the PUC complaint form states if a business owner wants to testify at the public meeting, they would need to hire a lawyer to represent them at the proceeding. The PUC needs to address the concerns of small business owners without forcing them to hire an attorney.

Q. HOW WOULD YOU DESCRIBE THE QUALITY OF SERVICE FROM THE PAWC TO DATE?

A. **TERRIBLE!** It's obvious that dirty water is a problem in my district. Ratepayers constantly flood our office with complaints regarding the quality of water. The testimony at the public hearing by several residents confirms the problem. Ratepayers with (protection plans) are billed by PAWC but they sub-contract to repair service to a third party. The sub-contractors take days to respond to customer complaints. This is unacceptable. Finally, billing issues are constantly brought up in discussions with my constituents. As related by the testimony at the hearing billing issues and late fees are a major concern.

Q. DO YOU HAVE ANY IDEAS OR RECOMMENDATIONS AS TO HOW THE PAWC MIGHT BE ABLE TO FIND FUNDING ANOTHER WAY?

A. I am by no means a municipal finance expert, but I was disheartened to learn that PAWC chose to seek revenue from its ratepayers instead of taking advantage of programs like Pennvest. The fact that they can add 10.8% to all infrastructure work is a huge revenue source for PAWC. They would lose revenue if they took advantage of Pennvest. The fact is the PUC never informs ratepayers that they receive this additional revenue from infrastructure work. Its time for the shareholders in the company to re-invest their own money into infrastructure work.

Q. WHAT ARE YOU ASKING OF THE PUC AT THIS TIME?

A. As a ratepayer and State Representative serving over 65 thousand constituents, I am imploring the Public Utility Commission **NOT** to approve this rate increase after the 70% increase last year. My constituents have had it.

ENOUGH IS ENOUGH!

DIRECT TESTIMONY OF BILLIE S. LACONTE

Introduction and Qualifications

Q PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A Billie S. LaConte; 14323 South Outer 40 Dr., Suite 206N, St. Louis, MO 63017.

Q WHAT IS YOUR OCCUPATION AND WHERE ARE YOU EMPLOYED?

A I am an energy advisor and Associate Consultant at J. Pollock, Incorporated.

Q PLEASE DESCRIBE YOUR EDUCATION AND EXPERIENCE.

A I have a Bachelor of Arts degree in Mathematics from Boston University and a Master's degree in Business Administration from Washington University. Since graduating in 1995, I have been engaged in a variety of consulting assignments, including energy procurement and regulatory matters in both the United States and several Canadian provinces. **Exhibit___(BSL-1)** to this testimony provides more details regarding my education and experience. **Exhibit___(BSL-2)** to this testimony contains a list of my appearances.

Q FOR WHOM DO YOU TESTIFY IN THIS PROCEEDING?

A I am testifying on behalf of Pennsylvania-American Water Large Users Group (PAWLUG). PAWLUG is an ad hoc association of large volume customers receiving water utility service from Pennsylvania-American Water Company (PAWC).

Q WHAT ISSUES ARE YOU ADDRESSING IN YOUR TESTIMONY?

A I am addressing the following:

- Return on equity (ROE);
- Incentive compensation;
- Adjustment clauses and deferral mechanisms;

- Class cost-of-service study;
- The wastewater subsidy and allocation of the subsidy;
- Rate design; and
- Revenue requirement scale back.

Q DO YOU ACCEPT PAWC'S POSITIONS ON THE ISSUES NOT ADDRESSED IN YOUR DIRECT TESTIMONY?

A No. One should not interpret the fact that I do not address every issue raised by PAWC as an endorsement of PAWC's proposals.

Q YOU USE PAWC'S PROPOSED REVENUE REQUIREMENT IN YOUR TESTIMONY. SHOULD THAT BE INTERPRETED AS AN ENDORSEMENT OF PAWC'S PROPOSALS?

A No. Throughout my testimony I use PAWC's proposed revenue requirement to illustrate various concepts. This should not be interpreted as an endorsement of PAWC's proposed revenue requirement. The findings and recommendations in my testimony also apply if the Commission approves a lower revenue requirement.

Q ARE YOU SPONSORING ANY EXHIBITS WITH YOUR TESTIMONY?

A Yes. I am sponsoring **Exhibit___(BSL-1)** through **Exhibit__(BSL-4).**[1]

Water Utility Revenue Requirement Issues

Q WHAT IS PAWC'S PROPOSED REVENUE REQUIREMENT INCREASE?

A PAWC is requesting a $203.9 million increase in annual revenues (20.2%) for its water

[1] **Exhibit___(BSL-4)** contains the relevant portion of each document cited herein, excluding documents which were provided by PAWC and are included in this record.

and wastewater operations.[2] According to PAWC, the increase is driven by capital investments, increasing production expenses, employee-related expenses, and costs of providing service to additional customers *via* acquisitions. The increase for the water utility is $199.2 million (24.2%), of which $71.1 million is attributed to the re-allocation of the wastewater revenue shortfall.[3] The re-allocation of the wastewater revenue requirement increases the water utility's revenue requirement by 8.6%, thus accounting for nearly 1/3 of the total 24.2% proposed increase for water customers. Without the re-allocation, the water utility's revenue requirement would increase by 15.5%.

Q DO YOU HAVE ANY GENERAL CONCERNS WITH PAWC'S PROPOSED INCREASE?

A Yes. PAWC filed another substantial rate increase on November 8, 2023, less than 12 months after the effective date of the rate increase from its prior filing.[4] The pace and amount of PAWC's rate increases are a burden to customers and outpace inflation. As discussed below, PAWC's customers have experienced significant rate increases since 2017, with rates increasing by 41% from 2017 to 2023.

Q WHAT ARE PAWC'S HISTORICAL REVENUE INCREASES FOR THE PAST THREE RATE CASES?

A From 2017 until the conclusion of PAWC's last rate case on December 8, 2022, PAWC's revenue requirement increased by $269.9 million (or 41%), total utility. If

[2] PAWC Statement No.1, Testimony of Ashley E. Everette at 7.

[3] Exhibit 3-A Combined Water and Wastewater Revenue Requirement – Summary.

[4] *Pennsylvania Public Utility Commission v. Pennsylvania-American Water Company*; Docket Nos. R-2022-3031672 and R-2022-3031673, Supplement No. 40, effective Jan. 28, 2023. (Jan. 26, 2023).

PAWC's current proposed increase is approved, its revenue requirement will have increased by $473.8 million ($269.9 million plus $203.9 million), or 72%. Table 1 shows the approved rate increase for each of PAWC's last three rate cases, as well as the current proposed increase.

Table 1
Historical and Proposed Rate Increases
($Millions)

Description	R-2017-2595853	R-2020-3019369	R-2022-3031672	R-2023-3043190 (Proposed)
Base Revenues	$657.7	$716.3	$831.6	$1,011.9
Increase	$61.9	$70.0	$138.0	$203.9
% Increase	9.4%	9.8%	16.6%	20.2%
Cumulative Increase $	$61.9	$131.9	$269.9	$473.8
Cumulative Increase %		20.0%	41.0%	72.0%

The rate of inflation between 2017 and 2023 was 24%, compared to PAWC's 41% increase.[5] PAWC's proposed increase in the current rate case is also significantly above the current inflation rate (3.4% for December 2023).[6] The pace of PAWC's rate filings, as well as the current proposed increase, is excessive and puts additional financial pressure on customers at time when they are, and have been, experiencing significant inflation (and will continue to do so for the foreseeable future).

Return on Equity

Q WHAT RETURN ON EQUITY IS PAWC REQUESTING?

A PAWC calculated a range of ROE from 10.00% to 11.25% and is seeking an ROE of 10.95%.[7]

[5] CoinNews Media Group Company, Inflation Calculator, *Average Inflation Rates in the United States*: **https://www.usinflationcalculator.com/inflation/annual-averages-for-rate-of-inflation/**

[6] *Id.*

[7] PAWC Statement No. 13, Testimony of Ann E. Bulkley at 8.

Q IS PAWC'S REQUESTED RETURN ON EQUITY EXCESSIVE?

A Yes. First, PAWC's requested ROE is significantly higher than the average authorized ROE for water utilities. As of October 9, 2023, the average authorized ROE for a domestic water utility was 9.45%, or 150 basis points lower than PAWC's requested ROE.[8] Similarly, the most recent ROE determined by this Commission in a water and sewer utility rate case was a 10% ROE approved for Aqua Pennsylvania Inc. and Aqua Pennsylvania Wastewater, Inc. in 2022.[9] Second, PAWC is requesting two alternative ratemaking mechanism adjustment clauses, a Revenue Decoupling Mechanism (RDM) and an Environmental Compliance Investment Charge (ECIC), in addition to its proposal for two deferral mechanisms. Adjustment clauses reduce regulatory lag and PAWC's financial volatility, ensuring PAWC will recover its projected revenues. PAWC's proposed RDM combined with its ECIC create a low risk profile for PAWC, which lowers its financial risk. In addition, PAWC's two proposed deferral mechanisms, described in more detail below, further reduce its financial risk.

Q IS THERE ANOTHER REASON PAWC'S REQUESTED RETURN ON EQUITY IS OVERSTATED?

A Yes. The Commission recently approved a proxy ROE of 9.65%.[10] This proxy ROE, which is 130 basis points lower than PAWC's requested ROE, is used by jurisdictional utilities, including PAWC, for calculating the quarterly adjustments for Distribution

[8] S&P Capital IQ, RRA Regulatory Focus, Decision in California, North Carolina Drive 2023 Water Utility ROE Average

[9] *Pennsylvania Public Utility Commission v. Aqua Pennsylvania, Inc., et al*., R-2021-3027385, Opinion and Order at 173 (May 12, 2022).

[10] Bureau of Technical Utility Services Report on Quarterly Earnings of Jurisdictional Utility for the Year Ended Sept. 30, 2023, Docket No. M-2023-3044811, Attachment D for Quarters 1, 2 and 3 of 2023.

System Improvement Charges (DSIC).[11] While calculated for DSIC purposes, it provides another indicator that PAWC's proposed ROE is excessive.

Q DO CREDIT RATING AGENCIES LOOK FAVORABLY UPON ALTERNATIVE RATEMAKING MECHANISMS SUCH AS DECOUPLING AND ADJUSTMENT CLAUSES, AS WELL AS DEFERRAL MECHANISMS?

A Yes. Moody's favorably considers a utility's ability to recover costs and earn returns when assigning a credit rating. Specifically, Moody's states:

> The criteria we consider include provisions and cost recovery mechanisms for operating costs, mechanisms that allow actual operating and/or capital expenditures to be true-up periodically into rates without having to file a rate case (this may include formula rates, rider[s] and trackers, or the ability to periodically adjust rates for construction work in progress)…[12]

PAWC's proposed adjustment clauses and deferral mechanisms, if approved, would improve PAWC's timeliness in recovering costs, thus reducing its financial risk. Therefore, if the Commission accepts PAWC's proposals, a downward adjustment to PAWC's requested 10.95% ROE would be appropriate and necessary to reflect the resulting further reduced risk.

Q PLEASE SUMMARIZE YOUR CONCERNS REGARDING PAWC'S REQUESTED RETURN ON EQUITY.

A PAWC's requested 10.95% ROE is overstated. First, it is significantly above the recently authorized 9.65% ROE for its DSIC. Second, it is significantly above the

[11] *Pennsylvania Public Utility Commission v. Pennsylvania-American Water Company*, Docket Nos. R-2022-3031672, R-2022-3031673, Joint Petition for Settlement of Rate Investigation at 6 (Oct. 11, 2022); along with Order Approving Settlement (Dec. 8, 2022).

[12] Moody's Investor Service, Rating Methodology, *Regulated Electric and Gas Utilities* at 12-13 (Jun. 23, 2017).

9.45% average authorized ROE for water utilities in 2023 and the 10% ROE authorized by the Commission in 2022. Finally, PAWC makes no adjustment to recognize its reduced financial risk from the implementation of its proposed RDM, ECIC, Pension/Other Post-Employment Benefits (OPEB) deferral mechanism and production expense deferral. At minimum, consideration of the extraordinary timing of this rate increase, as well as the proposed RDM, ECIC, and deferral mechanisms, warrants approval of an ROE at the lower end of the Commission's deemed range of reasonableness.

Incentive Compensation

Q WHAT IS INCENTIVE COMPENSATION?

A Incentive compensation is the additional payment to employees to reward certain behavior and/or results. The reward is contingent upon achieving pre-established goals and objectives. PAWC is seeking recovery of $4.1 million of incentive compensation costs.[13]

Q WHY IS INCENTIVE COMPENSATION AN ISSUE WHEN SETTING RATES?

A Not all incentive compensation benefits customers. Incentive compensation based on achieving certain operational goals may be a reasonable expense that may benefit customers. However, incentive compensation targeted to achieve certain financial goals is for the benefit of shareholders and provides little, if any, benefit to customers. Thus, this type of incentive compensation should not be charged to customers. Recovering some incentive compensation from ratepayers may be reasonable; however, the amount PAWC is requesting is too high due to inclusion of inappropriate portions of the expense as discussed below.

[13] PAWC Response to OCA 09-010, Attachment.

Q WHY IS THE AMOUNT OF INCENTIVE COMPENSATION PROPOSED FOR RECOVERY THROUGH BASE RATES TOO HIGH?

A The amount is too high because PAWC seeks to recover a portion of its incentive compensation that is based on meeting financial targets, as well as operational targets. Specifically, approximately **[Begin Confidential]** [redacted] **[End Confidential]** of PAWC's incentive compensation is based on meeting an **[Begin Confidential]** [redacted] **[End Confidential]** target range.[14] In fact, **[Begin Confidential]** [redacted] **[End Confidential]** of the target range, no incentive compensation would be paid out to its employees.[15] The remaining **[Begin Confidential]** [redacted] **[End Confidential]** is based on operational goals, such as **[Begin Confidential]** [redacted] **[End Confidential]**.[16]

Q DOES PAWC'S [BEGIN CONFIDENTIAL] EARNINGS PER SHARE [END CONFIDENTIAL] TARGET INCENT EMPLOYEES TO ACHIEVE FINANCIAL TARGETS FOR THE COMPANY?

A Yes. Before employees are awarded any incentive compensation for performance targets that benefit the company's operating goals, the company must achieve its **[Begin Confidential]** [redacted] **[End Confidential]** target. Thus, employees are incented to first achieve **[Begin Confidential]** [redacted] **[End Confidential]** targets since meeting **[Begin Confidential]** [redacted] **[End Confidential]** is required before receiving any incentive compensation. The financial target benefits shareholders, not customers.

[14] FR III. 22 Attachment Confidential and Proprietary at 106.

[15] *Id.* at 107.

[16] *Id.* at 106.

Q SHOULD PAWC RECOVER INCENTIVE COMPENSATION COSTS THAT ARE BASED ON MEETING FINANCIAL TARGETS?

A No. It is reasonable to allow recovery of expenses associated with the operational goals of customer satisfaction, safety, and other operational metrics since cost containment provides a customer benefit and is properly recovered through rates. However, the portion of annual incentive payouts associated with meeting financial goals in the test year should be disallowed. Disallowing the financial portion of these expenses properly places the costs of these incentives with the beneficiaries of these programs, namely the shareholders. To be clear, I am not opining on PAWC's decision to award incentive compensation based on financial targets or the merit of the applicable employees, which are matters within PAWC's managerial discretion. I am only testifying that these expenses should be borne by shareholders rather than recovered through base rates.

Q WHAT DO YOU RECOMMEND REGARDING RECOVERY OF INCENTIVE COMPENSATION COSTS?

A I recommend that the Commission disallow 100% of the proposed incentive compensation costs tied to meeting financial targets. These costs account for $2 million of expenses in the proposed test year. Disallowing these expenses properly places the costs of these incentives with the beneficiaries of these programs, namely the shareholders.

Alternative Ratemaking Mechanisms

Q PLEASE DESCRIBE PAWC'S PROPOSED ALTERNATIVE RATEMAKING MECHANISMS.

A As previously stated, PAWC is requesting two alternative ratemaking mechanisms, an RDM and an ECIC. These adjustment mechanisms would allow PAWC to contemporaneously adjust rates outside of a general rate case to recover changes in revenues or targeted costs.

Q DO YOU HAVE ANY GENERAL COMMENTS REGARDING PAWC'S PROPOSED ALTERNATIVE RATEMAKING MECHANISMS?

A Yes. While, I oppose both of the proposed mechanisms, I want to clarify that my testimony should not be perceived as general opposition to alternative ratemaking mechanisms. Rather, I am opposing the specific measures proposed by PAWC under the present circumstances. It is important to remember that PAWC already has numerous alternative ratemaking mechanisms at its disposal to manage regulatory lag and rate stability, including its water and wastewater DSICs, use of a Fully Projected Future Test Year, and authority to re-allocate a portion of its wastewater revenue requirement to the water customers. Water customers are particularly burdened by PAWC's current use of alternative ratemaking mechanisms, as they are required to pay for substantial portions of the wastewater revenue requirement, despite the vast majority (92%) of these customers receiving no services for the service they are required to pay, as discussed more later. In addition to my more specific observations below, I think the present availability of multiple alternative ratemaking mechanisms and PAWC's substantial use of the wastewater re-allocation mechanism warrant rejection of PAWC's additional proposals at this time.

Revenue Decoupling Mechanism

Q PLEASE DESCRIBE THE PROPOSED REVENUE DECOUPLING MECHANISM.

A The RDM would track changes in net revenues (water revenues less production costs) between the authorized revenues for all customers in the residential, commercial, industrial, municipal, and sales for resale classes, excluding customers taking service under contract rates. Production costs, which include power, chemicals, purchased water and waste disposal, would be removed. Any positive (negative) difference would be refunded (surcharged) to customers. The RDM would apply to water operations and wastewater operations.

Q WILL THE REVENUE DECOUPLING MECHANISM COMPARE PAWC'S ACTUAL REVENUES TO THOSE APPROVED IN THE RATE CASE?

A No. The RDM would use straight-fixed variable rates that are applied to actual sales to determine the revenues it should have recovered. The straight-fixed variable method is a form of revenue decoupling.

Q WHY WOULD PAWC'S REVENUE VARY FROM THE AMOUNT CALCULATED USING THE STRAIGHT-FIXED VARIABLE RATE?

A Actual revenues may vary as a result of variations in weather-sensitive water usage, participation in energy efficiency programs, deviations in economic activity, or customer rate migrations. The RDM may remove the disincentive for utilities to promote energy efficiency programs.

Q HOW DOES PAWC PROPOSE TO ACCOUNT FOR THE VARIANCE IN REVENUES?

A PAWC will track the variance in its revenues accrued over a year. If PAWC over-collects revenues, it will issue a volumetric credit. If PAWC under-collects revenues, it will implement a volumetric surcharge for each rate class. The credit/surcharge will be refunded/charged in the following year.

Q DOES THE REVENUE DECOUPLING MECHANISM IMPOSE ANY ADMINISTRATIVE BURDENS ON PAWC'S CUSTOMERS?

A Yes. PAWC proposes to adjust the RDM on an annual basis through a filing made by the 31st of January each year. The filing would be subject to a 60-day review period, which creates a new administrative burden for PAWC's customers.

Q HAS PAWC APPLIED THE FACTORS DEVELOPED BY THE COMMISSION TO EVALUATE ALTERNATIVE RATEMAKING MEASURES TO THE REVENUE DECOUPLING MECHANISM?

A Yes. PAWC Exhibit CBR-10 contains PAWC's assessment of the Commission's alternative ratemaking factors for the RDM.

Q DO YOU AGREE WITH PAWC'S ASSESSMENT?

A No. I am particularly concerned with PAWC's comments regarding interclass cost shifting and efficiency measures. PAWC represents that the proposed RDM will not affect interclass or intraclass cost shifting between residential and non-residential customer classes.[17] However, by treating all nonresidential customers uniformly, the

[17] PAWC Statement No. 10, Direct Testimony of Charles Rea, Exhibit CBR-10 at 1-2.

RDM will impact interclass cost shifting between the various non-residential customer classes, including commercial, industrial and municipal water customers. This is not a reasonable outcome.

With regard to efficiency, PAWC claims that the proposed RDM encourages water efficiency by reducing PAWC's throughput incentive.[18] The consumer is impacted quite differently as the RDM can result in additional collections from consumers following declines in usage. Even if the additional surcharge collected through the RDM amounts to a fraction of the consumers' monthly savings from reduced usage, it still erodes the benefit of conservation and sends a weaker signal to the customers.

Q SHOULD THE REVENUE DECOUPLING MECHANISM BE APPROVED?

A No. The RDM should be rejected. This decoupling mechanism shifts PAWC's risk of recovering its costs and meeting earnings targets onto customers.

Q HOW DOES THE REVENUE DECOUPLING MECHANISM SHIFT RISK ONTO CUSTOMERS?

A The RDM shifts risk onto customers because it "constrains" PAWC's revenues to the straight-fixed variable revenues. PAWC's business and weather risk conveyed in rates for fixed costs is eliminated entirely. By guaranteeing revenue recovery, PAWC is reducing its risk by ensuring that its revenues and return on investment remain stable. Implementing a decoupling mechanism provides PAWC with the guarantee of

[18] *Id*. at 2.

cost recovery and a significant advantage of achieving its earnings targets for shareholders. Customers should not be required to ensure shareholder earnings.

Q DO YOU HAVE ANY RECOMMENDATION IF THE COMMISSION APPROVES PAWC'S REVENUE DECOUPLING MECHANISM?

A Yes. If the RDM is approved, notwithstanding my prior objections, I recommend that an earnings test should apply. Specifically, if earnings that reflect actual decoupled revenues result in PAWC earning above its authorized rate of return by more than 50 basis points, then 50% of the excess earnings should be returned to customers through adjustments to the decoupling surcharge or refund balance. In addition, any increase in the surcharge should be limited to a 3% cap on an annual basis, with any remaining balance carried forward. Capping the RDM is a critical customer protection because the cap provides customers with a range of impacts for their own annual budgeting. While I believe the RDM should be denied entirely, conditional approval on implementation of these recommendations would provide a measure of revenue decoupling while offering reasonable consumer protections.

Q IS THE PROPOSED CAP SYMMETRICAL?

A No. Because PAWC reserves the authority to file a base rate case, it is not necessary to implement a symmetrical cap. If PAWC's actual earnings are significantly below its authorized rate of return, then the company may file a base rate case and request a rate increase.

Q ARE YOU AWARE OF ANY OTHER UTILITIES THAT USE AN EARNINGS TEST?

A Yes. Avista Utilities has a revenue decoupling mechanism that includes an earnings test and a 3% adjustment cap for both its electric and gas operations.[19] Furthermore, a report by the Regulatory Assistance Project notes:

> Some commissions have imposed an earnings cap, or an earnings collar, as part of a decoupling mechanism. These ensure that, if earnings are too high above a baseline (or too low below the baseline), the decoupling mechanism is automatically subject to review. Because decoupling reduces earnings volatility, it should be unlikely for earnings to vary outside a range of reasonableness. Therefore such a cap or collar, while unlikely to be triggered, may provide greater comfort with the change represented by decoupling.[20]

Environmental Compliance Investment Charge

Q PLEASE DESCRIBE PAWC'S PROPOSED ENVIRONMENTAL COMPLIANCE INVESTMENT CHARGE.

A PAWC's proposed ECIC is a rate adjustment clause that will recover costs, between rate cases, related to government-mandated environmental standards. PAWC proposes to set forth an environmental compliance plan that is subject to Commission review which determines the environmental costs that would be recovered in the ECIC. The ECIC would be updated quarterly and subject to an earnings evaluation.

[19] Avista Corporation dba Avista Utilities, Schedule 75E, Decoupling Mechanism – Electric, Substitute Second Revision Sheet 75E (Issued 3-26-2020) and Schedule 175E, Decoupling Mechanism – Natural Gas, Substitute Second Revision Sheet 175E (Issued 3-26-2020).

[20] The Regulatory Assistance Project, *Revenue Regulation and Decoupling: A Guide to Theory and Application* at 40 (Jun. 2011).

Q ARE YOU AWARE OF ANY OTHER WATER UTILITIES IN PENNSYLVANIA THAT HAVE AN ENVIRONMENTAL COMPLIANCE INVESTMENT CHARGE?

A No. Further, although PAWC witness, Ms. Bulkley, claims that the proposed DSIC and ECIC "…have become quite commonplace in utility regulation" none of the water utilities in her proxy group have an environmental cost recovery mechanism.[21]

Q DO YOU HAVE ANY CONCERNS WITH PAWC'S PROPOSED ENVIRONMENTAL COMPLIANCE INVESTMENT CHARGE?

A Yes. First, PAWC has not incurred, nor has it included, any pending environmental costs that would apply to the ECIC. The cost projections referenced by PAWC are largely speculative estimates based on proposed Environmental Protection Agency regulations that have yet to be finalized.[22] Therefore, because the environmental costs are speculative and unknown, the ECIC is premature. Second, the proposed ECIC is another example of single-issue or piecemeal ratemaking, which removes PAWC's incentive to control costs and shifts the risk of cost recovery from shareholders to ratepayers.

Q HAS PAWC APPLIED THE FACTORS DEVELOPED BY THE COMMISSION TO EVALUATE ALTERNATIVE RATEMAKING MEASURES TO THE ECIC?

A Yes. Exhibit JCS-1 contains PAWC's assessment of the Commission's alternative ratemaking factors for the ECIC.

[21] PAWC Statement No. 13, Direct Testimony of Ann E. Bulkley at 51.

[22] PAWC Statement No. 8, Direct Testimony of J. Cas Swiz at 24-25.

Q DO YOU AGREE WITH PAWC'S ASSESSMENT?

A No. I am most concerned with PAWC's comments regarding rate stability. PAWC addresses the rate stability impact by suggesting that the quarterly adjustments to the ECIC allow for more gradual rate changes than the more significant increases that result from base rate cases.[23] I find this to be misleading because the ECIC would increase the frequency of rate adjustments by implementing quarterly rate adjustments for recovery of capital costs that PAWC would have otherwise rolled into its next base rate case. Rate stability would be better preserved by avoiding multiple surcharges so customers can rely on steady base rates between rate cases.

Q WHAT DO YOU RECOMMEND?

A I recommend that the proposed ECIC be rejected. If it is approved, I recommend that the Commission implement a 3% cap on annual ECIC revenue that would operate as a cap on *total* annual revenue recovered through the ECIC.

Deferral Mechanisms

Q WHAT IS A DEFERRAL MECHANISM?

A A deferral mechanism is a cost recovery mechanism that allows a utility to track the difference between the actual cost incurred and the amount allowed in base rates. Deferral mechanisms, thus, provide guaranteed dollar-for-dollar cost recovery and could allow a utility to earn in excess of its authorized return. Guaranteed cost recovery reduces both regulatory and financial risks. Thus, deferral mechanisms are an especially pernicious form of piecemeal ratemaking.

[23] *Id*., JCS-1 at 2.

Q HOW IS A DEFERRAL MECHANISM PIECEMEAL RATEMAKING?

A A deferral mechanism is piecemeal or single-issue ratemaking because it tracks one cost separately from all of PAWC's other costs. This ignores the impact of any offsetting over recovery for other costs, which, thereby, negates the need for the deferral mechanism.

Q IS PAWC REQUESTING ANY DEFERRAL MECHANISMS?

A Yes. PAWC is requesting new deferral mechanisms for:

- Pension/OPEB expense; and
- Production expense.

Q PLEASE DESCRIBE THE PENSION/OPEB EXPENSE DEFERRAL MECHANISM.

A The pension/OPEB expense mechanism would allow PAWC to defer the difference between pension/OPEB expense recovered in base rates versus the actual expense recorded by the company. Any deferred amounts would be recovered or refunded in a future rate case.

Q WHY IS PAWC REQUESTING A DEFERRAL MECHANISM FOR ITS PENSION/OPEB EXPENSE?

A PAWC states that its actual pension/OPEB expenses may fluctuate and exhibit volatility and are difficult to forecast.[24]

[24] *Id.,* Direct Testimony of J. Cas Swiz at 13.

Q PLEASE DESCRIBE PAWC'S REQUESTED PRODUCTION EXPENSE DEFERRAL MECHANISM.

A PAWC has requested an additional deferral mechanism for its production expenses. The deferral account would track production expenses and create separate regulatory liability/asset accounts for each production expense. Each month, PAWC would track the actual production expenses and compare them to the amount included in base rates. The difference would accumulate in a regulatory asset or liability, and be recovered or refunded to customers in a future base rate case.

Q WHY IS PAWC REQUESTING A DEFERRAL MECHANISM FOR ITS PRODUCTION EXPENSES?

A PAWC claims that production expenses do not vary solely due to changes in usage and may also vary due to changes in costs charged by suppliers.[25]

Q SHOULD THE COMMISSION APPROVE A DEFERRAL MECHANISM FOR PAWC'S PENSION/OPEB AND PRODUCTION EXPENSES?

A No. Creating a separate tracking mechanism for these expenses is single-issue or piecemeal ratemaking. A deferral mechanism is piecemeal ratemaking because it tracks one cost separately from all PAWC's other costs. This ignores the impact of any offsetting over recovery for other costs, which, thereby, negates the need for the deferral mechanism.

[25] *Id.* at 18.

Q DOES A DEFERRAL MECHANISM AFFECT PAWC'S FINANCIAL RISK?

A Yes. A deferral mechanism eliminates utility risk and guarantees full cost recovery. This defies the regulatory compact. A utility should have an *opportunity*, not a *guarantee*, to earn a reasonable return on its used and useful investments and to recover reasonable and necessary operating expenses. In addition, the guarantee of cost recovery removes any incentive for PAWC to control its costs and shifts all risk of over-spending onto customers. For these reasons, the pension/OPEB and the production expense deferral mechanisms should be rejected.

Q WHAT DO YOU RECOMMEND IF THE COMMISSION APPROVES THE PROPOSED DEFERRAL MECHANISMS?

A If, notwithstanding my objections herein, the Commission approves the proposed mechanisms, I recommend that the Commission account for the shift of risk onto customers when considering an appropriate ROE for PAWC. Such consideration is necessary to counter the piecemeal recovery of these deferral mechanisms and properly reflect PAWC's lower financial risk.

Class Cost-of-Service Study

Q DO YOU HAVE ANY CONCERNS WITH PAWC'S CLASS COST-OF-SERVICE STUDY FOR THE WATER UTILITY?

A Yes. While I do not disagree with PAWC's class cost-of-service methodology, which uses the base extra capacity methodology, I disagree with the demand statistics used to allocate certain costs in the study.

Q WHY DO YOU DISAGREE WITH THE DEMAND STATISTICS?

A I disagree for two reasons. First, the demand study statistics are based on data that is almost a decade old. Water customers' consumption patterns may have changed since the last demand study; for example, post pandemic, residential demand has increased due to more people working remotely. This change in usage and demand affects how costs are incurred on PAWC's system. Second, as explained more in-depth later, PAWC used the incorrect maximum demand hour ratio for the residential customer class, resulting in less costs being allocated to residential customers and overstating the costs to other customer classes.

Q WHAT DOES A DEMAND STUDY MEASURE?

A A demand study measures each customer class's usage on the system, including their maximum day demand and maximum hour demand. The maximum day demand and maximum hour demand are used to allocate costs between the customer classes. If the residential class has a higher maximum hour demand ratio, then the costs that are incurred due to maximum hour demand should be allocated to that class.

Q HOW HAVE USAGE PATTERNS CHANGED?

A Prior to the pandemic, residential customers' share of the total usage on the system was lower. Post pandemic, however, there is a significant increase in remote work which results in an on-gong increase in residential usage affecting their demands on the system.[26]

[26] *Survey: Remote Work Isn't Going Anywhere – And Executives Know It*, Harvard Business Journal, Bloom, Barreo, Davis, Meyer and Mihaylov (Aug 28,2023).

Q WHY IS THE MAXIMUM DAY DEMAND RATIO FOR THE RESIDENTIAL CLASS INCORRECT?

A PAWC provided the results of its demand study that was conducted over the period 2013-2015.[27] Although the maximum hour demand ratio during the study was 6 for the residential class, PAWC opted to use 5, as it claimed that there were certain anomalies in the hourly monitoring data for the residential class. PAWC should use the actual data, which reflects actual usage of the system. Modifying the data results in distorted rates which causes certain customers to pay more than the cost to serve them.

Q HAVE YOU REVISED THE WATER UTILITY'S CLASS COST-OF-SERVICE STUDY TO REFLECT THE REVISED MAXIMUM HOUR DEMAND RATIO FOR THE RESIDENTIAL CLASS?

A Yes. **Exhibit__(BSL-3)** shows the revised cost of service for each customer class using the actual maximum hour demand ratio. This change appropriately increases the cost of service to the residential class by $7.6 million, or 1.3% and decreases the increase to the other classes by between 0.7% and 6%.

Q WHAT DO YOU RECOMMEND?

A For the current case, I recommend that PAWC modify its class cost-of-service to reflect the actual maximum hour demand ratio for the residential class. After the conclusion of this rate case, and prior to its next base rate case, PAWC should conduct a new demand study to properly reflect current usage and demand patterns.

[27] PAWC Response to PAWLUG 01-002 Attachment at 10.

Wastewater Subsidy and Allocation of the Subsidy

Q WHAT IS PAWC'S PROPOSED WASTEWATER SUBSIDY?

A PAWC's wastewater subsidy is approximately $71.1 million.[28] It represents the portion of its wastewater operations cost of service that is allocated to the water utility.

Q WHAT IS THE BASIS FOR PAWC'S REVENUE ALLOCATION PROPOSAL?

A PAWC cites Act 11 of 2012 and Pennsylvania Code Section 1311(c), which states "The commission, when setting base rates, after notice and an opportunity to be heard, may allocate a portion of the wastewater revenue requirement to the combined water and wastewater customer base if in the public interest."[29]

Q WHY IS PAWC PROPOSING TO ALLOCATE A PORTION OF THE WASTEWATER OPERATIONS COST OF SERVICE TO THE WATER OPERATIONS?

A PAWC states it is seeking to recover a portion of its wastewater operations cost of service from its water operations to:

> …mitigate the increases that wastewater customers in certain service areas would experience if their rates were established on a stand-alone basis. The Company's proposed rates would also make meaningful progress in moving the rates of its separate wastewater rate zones closer to a single consolidated wastewater rate design for all of the Company's wastewater operations.[30]

Q DO YOU HAVE ANY CONCERNS WITH THE WASTEWATER SUBSIDY?

A Yes, for two reasons. First, the amount of the subsidy, $71.1 million, is overstated and should be reduced. Second, the allocation of the subsidy among the water customer classes is incorrect.

---

[28] PAWC Statement No. 1, Testimony of Ashley E. Everette at 20.

[29] *Id.* at 21.

[30] *Id*. at 20.

Q WHAT IS THE TOTAL INCREASE FOR WATER OPERATIONS?

A The total increase for water operations is $199.2 million or 24.2%.[31] The wastewater subsidy is $71.1 million, which accounts for 36% of the total increase to water operations. Excluding the wastewater subsidy, the increase to water customers rates would decrease by 8.7%, resulting in an increase of 15.5%.[32]

Q DO ALL OF PAWC'S WATER CUSTOMERS USE PAWC FOR WASTEWATER SERVICE?

A No. PAWC indicated that out of its 780,000 water customers, only 66,103 are also Zone 1 wastewater customers.[33]

Q SHOULD WATER CUSTOMERS SUBSIDIZE ALL OF THE ALLOCATED $71.1 MILLION WASTEWATER REVENUE REQUIREMENT AS PROPOSED BY PAWC?

A No. The re-allocation of the wastewater subsidy is inequitable. PAWC is requesting that 92% of its water customers (1 – (66,103/780,000)) pay $71.1 million of the wastewater revenue requirement, despite the fact that these customers receive no benefit from the additional costs. The wastewater subsidy requires customers who do not receive wastewater service from PAWC to pay for a service they do not receive from PAWC. The water customers' cost of service is being increased by 8.6% solely for the benefit of wastewater customers. Because these water customers would not benefit from the increased cost, the subsidy should be reduced.

[31] Exhibit 3-A Combined Water and Wastewater Revenue Requirement – Summary.

[32] *Id.* ($1,023,354,270 – 71,087,394) / 824,117,186.

[33] PAWC Response to OCA 04-004; PAWC Statement No. 1, Testimony of Ashley E. Everette at 21-22.

Furthermore, PAWC chose to acquire several wastewater utilities and agreed to set rates at a certain level for those utilities. The wastewater subsidy should be reduced because water customers should not shoulder all of the burden of insufficient rates due to these acquisitions. While the Pennsylvania General Assembly authorized the re-allocation of some portion of wastewater revenue requirements to water customers for combined water and sewer utilities, it is not inevitable that water customers should offset all of PAWC's revenue requirement shortfall due to its acquisitions.

Q DO YOU HAVE ANY OTHER CONCERNS WITH THE WASTEWATER SUBSIDY?

A Yes. The allocation of the wastewater subsidy is incorrect because it assigns a portion of the wastewater water subsidy based on the total cost of service for each of the water utility's customer classes, rather than by the class that caused the subsidy. For example, if the wastewater residential customers are responsible for $50 million of the subsidy, then that amount should be allocated to residential water customers. By allocating more of the subsidy to customers that do not cause the subsidy, PAWC is further adding to inequitable rates.

Q HAS THE COMMISSION COMMENTED ON THE REASONABLENESS OF WATER CUSTOMERS PAYING FOR WASTEWATER SERVICES FROM WHICH THEY RECEIVE NO BENEFIT?

A Yes. In PAWC's last base rate case, the Commission noted that the provision of the settlement that reduced the wastewater subsidy to the water customers:

> …is in the public interest because it helps to ensure that customers more accurately bear the burden of the cost of the service provided to them. PAWC's water customers should not be required to bear the burden of the cost to provide service to PAWC's wastewater customers.[34]

Q WHAT DO YOU PROPOSE?

A I propose that any reduction in the wastewater cost of service be applied solely to the wastewater subsidy paid by water customers. I anticipate that this adjustment will significantly reduce the burden of the subsidy on water customers. Water customers are already facing a significant increase absent the subsidy. I also propose that water customer classes should pay their share of the subsidy based on the wastewater class that causes the subsidy.

Q PLEASE DESCRIBE PAWC'S METHODOLOGY FOR ALLOCATING THE WASTEWATER SUBSIDY TO THE WATER UTILITY'S CUSTOMER CLASSES.

A PAWC directly assigned the combined sewer system's wastewater subsidy to the residential, commercial, industrial and municipal customer classes. For the portion of the subsidy attributable to the sanitary sewer system, Butler and Brentwood, PAWC allocated the non-residential subsidy to the commercial, industrial, municipal and fire service customer classes based on their total water cost of service. The portion of the subsidy caused by other customer classes (such as bulk customers) is allocated to all customer classes, including the residential class, based on their total water cost of service.

[34] Docket No. R-2022-3031672, *Recommended Decision* at 78 (Nov. 8, 2022).

Q DO YOU HAVE AN EXAMPLE OF HOW THE WASTEWATER SUBSIDY SHOULD BE ALLOCATED TO THE WATER UTILITY CUSTOMER CLASSES?

A Yes. Table 2 provides the recommended re-allocation of the wastewater subsidy.

Table 2
Proposed Re-allocation of Wastewater Subsidy
($Millions)

	PAWC Proposed Re-allocation		PAWLUG Proposed Re-allocation	
Customer Class	**$**	**%**	**$**	**%**
Residential	$46.5	65.7%	$46.5	65.7%
Commercial	$18.3	25.9%	$19.9	28.1%
Large Industrial	$3.9	5.6%	$3.1	4.4%
Municipal	$1.6	2.3%	$1.1	1.6%
Fire	$0.3	0.5%	$0.09	0.1%
Total	$70.7	100.0%	$70.7	100.0%

My re-allocation uses a combination of PAWC's directly assigned portion of the combined sewer system subsidy, the allocation of the subsidy caused by the "Other" wastewater customer classes, and a re-allocation of the non-residential portion of the subsidy. The non-residential re-allocation is based on the present revenues for the non-residential wastewater customers (commercial, industrial and municipal), as identified by PAWC, to the corresponding water customer classes. My re-allocation more closely aligns with assigning the subsidy to the water customer classes based on the wastewater customer classes who caused the subsidy.

Rate Design

Q DO YOU HAVE ANY RECOMMENDATIONS REGARDING PAWC'S RATE DESIGN FOR THE INDUSTRIAL CLASS?

A Yes. I recommend that PAWC decrease the volumetric rate and increase the customer charge for industrial customers. A higher customer charge will reduce revenue volatility. Similar to straight-fixed variable pricing, which has higher fixed charges and lower volumetric charges, a higher customer charge for the industrial class will provide "a stable and reliable revenue stream for the utility..."[35] Furthermore, the proposed industrial customer charge in this proceeding is unchanged from that approved by the Commission in the company's last base rate case.[36] Therefore, the industrial customer charge should be increased and the volumetric increase lowered. Shifting a portion of the rate increase for the industrial class from the volumetric rate to the customer charge is reasonable and reduces revenue volatility for PAWC.

Q PLEASE PROVIDE AN EXAMPLE OF YOUR RECOMMENDED ADJUSTMENTS TO THE INDUSTRIAL CUSTOMER CLASS RATE DESIGN.

A Table 3 shows an example of the revised rate design for the industrial customers.

Table 3
Revised Industrial Rate Design

Description	Current	PAWC	PAWLUG
Customer Charge			
6" Meter	$1,401	$1,401	$2,802
8" Meter	$2,243	$2,243	$4,486
10" Meter	$3,223	$3,223	$6,446

[35] PAWC Statement No. 10, Direct Testimony of Charles Rea at 90.

[36] PAWC Response to PAWLUG 01-006(a).

Table 3 Revised Industrial Rate Design			
Description	**Current**	**PAWC**	**PAWLUG**
Volumetric Charge			
First 16,000 Gal	$1.4200	$1.9128	$2.8565
Next 584,000 Gal	$1.0804	$1.4824	$1.4083
All Over 600,000 Gal	$0.8499	$1.1477	$1.0329
Above 15,000,000*	$0.5110	$0.6852	$0.6167
*Curtailment rate **Source**: Exhibit 10-A Water Operations.			

PAWLUG's proposed rate design doubles the customer charge and reduces the volumetric rate to industrial customers. As noted by PAWC witness Charles Rea, approximately 95% of PAWC's costs are fixed.[37] Under PAWC's proposal, only 8% percent of fixed costs are recovered by customer charges. The redesigned rates will recover 17% of fixed costs through the customer charges. Recovering more of its costs through a fixed charge provides a more stable revenue stream for PAWC and reduces the possibility of the industrial class paying more than its cost to serve if sales are higher than projected.

Revenue Requirement Scale Back

Q WHAT DO YOU RECOMMEND IF PAWC'S REQUESTED REVENUE REQUIRMENT IS REDUCED?

A If the requested revenue requirement is reduced, the reduction should apply to the wastewater subsidy first. In addition, I recommend that any decrease allocated to industrial and municipal customers apply to volumetric rates only and PAWLUG's

[37] PAWC Statement No.10, Direct Testimony of Charles Rea at 86-87.

proposed increase to the fixed monthly charges for these rate classes remain the same (after allowing for the adjustment described above).

Q WHY DO YOU RECOMMEND A SCALEBACK OF VOLUMETRIC RATES FOR THESE CUSTOMER CLASSES?

A For both the industrial and municipal classes, scaling back the volumetric rates recognizes that a higher proportion of total class revenues is derived from volumetric rates for these classes as compared to the residential customer class.[38] Furthermore, recovering more of the revenue requirement from fixed costs rather than volumetric costs reduces PAWC's risk because it is more likely that PAWC will recover its revenues *via* higher fixed charge. Similar to PAWC's straight-fixed variable rates, a higher fixed charge reduces variability in income because volumes sold tend to be more volatile over time than the number of meters billed.

Conclusion

Q PLEASE SUMMARIZE YOUR FINDINGS AND RECOMMENDATIONS.

A My findings and recommendations are as follows:

- PAWC's requested ROE is overstated and should be reduced to reflect recently authorized ROEs by the Commission and in other jurisdictions.
- PAWC's ROE should be reduced further if its proposed alternative ratemaking mechanisms and deferral mechanisms are approved.
- Incentive compensation should be reduced by $2 million.
- The RDM, ECIC and proposed deferral mechanisms should be rejected.
- If approved, the RDM and/or ECIC should be conditioned on the customer protections described above.

J. POLLOCK
INCORPORATED

Qualifications of Billie S. LaConte

Q PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A Billie S. LaConte. My business mailing address is 14323 South Outer 40 Rd., Suite 206N, St. Louis, Missouri 63017.

Q WHAT IS YOUR OCCUPATION AND BY WHOM ARE YOU EMPLOYED?

A I am an energy advisor and am currently employed by J. Pollock, Incorporated as Associate Consultant.

Q PLEASE STATE YOUR EDUCATIONAL BACKGROUND AND EXPERIENCE.

A I have a Bachelor of Arts Degree in Mathematics from Boston University and a Master's degree in Business Administration from Washington University.

Upon graduation in May 1995, I joined Drazen Consulting Group, Inc. (DCGI). DCGI was incorporated in 1995 assuming the utility rate and economic consulting activities of Drazen Associates, Inc., active since 1937. I joined J.Pollock in May 2015.

During my tenure at DCGI and J.Pollock my work has focused on revenue requirement issues, cost of capital (return on equity and capital structure), cost allocation, rate design, sales and price forecasts, power cost forecasting, electric restructuring issues, integrated resource plans, formula rate plans, asset management agreements and contract interpretation.

I have been engaged in a wide range of consulting assignments including energy and regulatory matters in both the United States and several Canadian provinces. This has included advising clients on economic and strategic issues concerning the natural gas pipeline, oil pipeline, electric, wastewater and water utilities. I have testified on cost of capital issues, including return on equity, cost of debt, and capital structure, as well as revenue requirement issues. I have prepared

cost allocation and rate design studies to provide timely support to clients engaged in settlement negotiations in electric and gas utilities, provided power cost forecasting studies to assist clients in project planning and negotiated contracts with electric utilities for standby services and interruptible rates. I have also prepared studies on electric and gas utilities' performance-based rates (PBR) and benchmarking programs to evaluate their success and to provide recommendations on methods to be used. I worked on contract interpretation to resolve contract disputes for several clients. I have provided financial and cost of service analysis for natural gas pipelines certificate approval from the Federal Energy and Regulatory Commission (FERC) and the Canadian National Energy Board (NEB). Additionally, I completed the Corporate Credit Rating Analysis course presented by Moody's Analytics.

I have worked on various projects located in many states and several Canadian provinces including Alberta, British Columbia, Saskatchewan, Nova Scotia and Quebec. I have testified before the state regulatory commissions of Arkansas, Florida, Georgia, Iowa, Louisiana, Michigan, Minnesota, Missouri, New Mexico, Pennsylvania, Texas and South Carolina, and the provincial regulatory boards of Alberta and Nova Scotia. I similarly have appeared before the St. Louis Metropolitan Sewer District Commission and the City of Philadelphia Water, Sewer and Storm Water Rate Board.

Q PLEASE DESCRIBE J. POLLOCK, INCORPORATED.

A J. Pollock assists clients to procure and manage energy in both regulated and competitive markets. The J. Pollock team also advises clients on energy and regulatory issues. Our clients include commercial, industrial and institutional energy consumers. J. Pollock is a registered Class I aggregator in the State of Texas.

Re: Pennsylvania Public Utility Commission v.
Pennsylvania-American Water Company
Docket Nos. R-2022-3031672 and R-2022-3031673

Dear Secretary Chiavetta:

Attached please find Supplement No. 40 to Tariff Water-PA P.U.C. No. 5. This supplement replaces and supersedes all pages filed in Supplement No. 35 to Tariff Water-PA P.U.C. No. 5. By Order entered December 8, 2022 in the above-captioned proceeding, the Commission approved the Joint Petition for Settlement ("Joint Petition"). The tariff changes contained in Supplement No. 40 conform to the tariff supplement provided as Appendix A to the Joint Petition. The proof of revenues for the water rates was provided as Appendix C to the Joint Petition.

Copy of Supplement No. 40 to Tariff Water-PA P.U.C. No. 5 is being served as evidenced in the attached Certificate of Service.

If you have any questions, please contact me.

Sincerely,

Elizabeth Rose Triscari

US INFLATION CALCULATOR
a CoinNews Media Group Company

Average Inflation Rates

The chart and table display the average rates of inflation in the United States on a yearly basis from 2012 to 2023. This information is provided by the U.S. Bureau of Labor Statistics and is published every month in the Consumer Price Index. The chart and table were last updated on Jan. 11 with BLS data for December. The next update is scheduled for Feb. 13, which will offer the first reading for 2024.

Generally, more interest is directed toward current inflation rates, at least in terms of what you hear or read from news media, rather than these average rates.

MULTI-JURISDICTIONAL

US energy utilities seek almost $24B in pending rate cases

by Lisa Fontanella

Spurred on by inflation, rising interest rates and expanding capital spending plans, the pace of state-level rate case activity remains robust across the US.

There were 63 electric and 52 gas rate cases, as well as one steam rate proceeding, pending in 37 states and the District of Columbia as of Sept. 28. Continuing the recent dramatic rise in the level of requested rate increases across the country, the rate increases sought in these proceedings aggregate to $23.7 billion, excluding the later-year steps of multiyear rate requests.

The returns on equity (ROE) requested in the pending electric, gas and steam rate cases range from 9.30% to 12.95%, averaging 10.32% in the vertically integrated electric rate cases, 10.40% in the electric distribution rate cases, 9.63% in the electric limited-issue rate proceedings where an ROE is specified, 10.32% for gas base rate cases and 9.68% in the gas limited-issue rate proceedings where an ROE is specified.

Over the last several weeks, Regulatory Research Associates surveyed large electric and gas companies and state utility commissions concerning pending rate cases. An overview of key trends and statistics observed in the pending proceedings is provided below. The related spreadsheet provides a tabular listing of state-level, company-specific rate cases that were pending for companies included in RRA's coverage universe as of Sept. 28. Detailed profiles of these cases can be found on RRA's Pending Rate Cases page. In addition, the related spreadsheet contains a tabular listing of the next major event in each pending major rate case, for which an agenda was available, as listed on the RRA Events page.

September filings volume highest in 5 years for month, reaching $334M

by Brian Collins

September utility rate case initial filings were at their highest level in the last five years for that month, with 10 submissions, compared with the September average tracked from 2019 through 2023 of 7.4 filings. September 2023 filings registered aggregate rate increase requests of about $334 million, with no rate reduction requests noted. While there were four notices of intent to advise of pending rate increase requests, none included a projected rate change amount.

The Take

➤ Rate case filings in September were at their highest volume for that month in five years. September applications and notices of intent rose by one case to 10 compared with August, in which nine initial proceedings were logged. September filings equaled $334 million in potential rate increases compared with approximately $295 million of rate increase requests in August.

➤ Four of the 10 initial filings from September disclosed return on equity (ROE) data, with those utilities requesting ROEs ranging from 9.65% to 10.5%.

Wildfire-driven insurance premium hike focus of new PacifiCorp deferral requests

by Jason Lehmann

PacifiCorp is seeking authorization in several jurisdictions to defer, for later ratemaking treatment, estimated costs associated with higher commercial insurance premiums that the utility says result from elevated wildfire liability risk. The deferral applications were filed with the Public Service Commission of Utah (Docket No. 23-035-40), Washington Utilities and Transportation Commission (Docket No. UE-230673), Oregon Public Utility Commission (Docket No. UM 2301) and the Idaho Public Utilities Commission (Case No. PAC-E-23-18).

CONTINUED ON NEXT PAGE

STATE JURISDICTION NEWS *continued*

The company's five-year capital spending plan shows investment of over $590 million during the period, with spending peaking at $148.1 million in 2025. The years 2023 and 2024 were included in the company's five-year forecast for the previous rate proceeding Dec. 30, 2020. Investments for both of these years in the current plan are at higher levels than were budgeted in 2020. The 2023 budget increased from $70.9 million to $87.4 million, and the 2024 budget increased from $63.2 million to $93.4 million. Given comments from the chair in AWC-CT's rate proceeding, this could be an area of contention.

The company attributed inflation associated with rising operating expenses as the largest driver of the rate proceeding. The largest operating expense increases stemmed from employee expenses, purchased power, purchased water, increased chemical costs and expenses associated with the rate case proceeding.

Acknowledging the impact of inflation on its customers, the company stated that it "realizes our customers are also facing economic challenges related to inflation and increased interest rates. ... [A]lthough inflation from the test year in the Company's last case to the test year in this case has gone up 13.5%, the Company was able to manage Operating and Maintenance expenses so they only rose by 6%, less than half of the overall average because of our constant pursuit of operating efficiencies, notwithstanding the variability of the impacts of inflation on certain costs."

Additionally, to mitigate the impact of the proposed increase, the company is proposing to expand its Water Rate Assistance Program through expanded income-eligibility levels and tiered discounts.

The company's rate design proposal further consolidates the basic service charges across 11 operating divisions. Additionally, the rate case includes a proposed third residential usage price tier, building upon the inclining block residential rates introduced in the company's most recent proceeding.

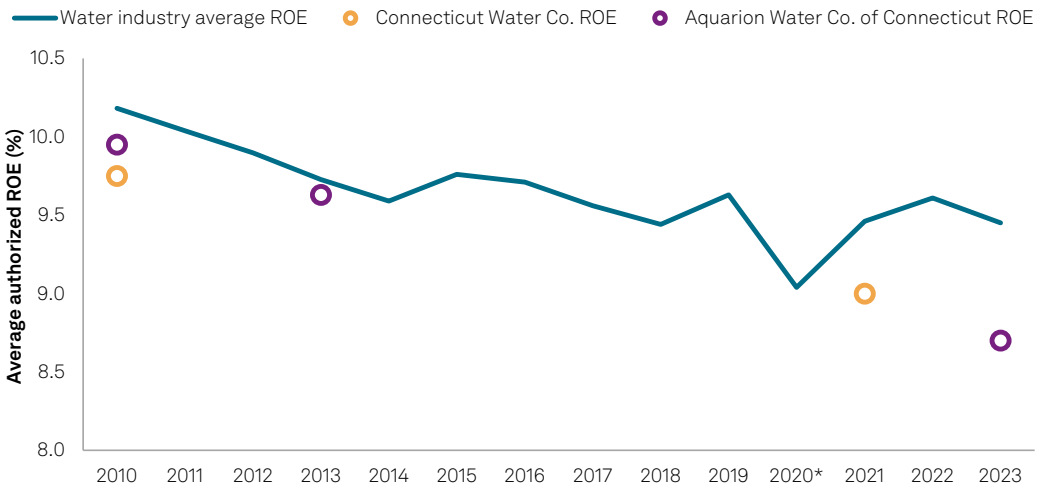
Comparing Conn. ROEs to national averages

The ROEs approved in water utility rate decisions in Connecticut historically have been below the national average at the time established, even more so in the most recent decision. The 8.70% ROE authorized for AWC-CT is the lowest nonpunitive return authorized for a water utility since 2010, as tracked by RRA.

In a dissenting opinion, Commissioner John "Jack" Betkoski stated, "ROE calculations are not an exact science ... but an over 80 basis point reduction is substantially lower than the OCC's, and I think it should be higher as interest rates are projected to continue their increase. By reducing the ROE below usual standards — a massive signal to discourage vital investment in water infrastructure and protection for public health, environment, and safety." Betkoski is former president of the National Association of Regulatory Utility Commissioners and former chair of its water committee.

Year to date, 12 water utility rate proceedings have been completed across seven states, with cost-of-capital parameters provided in 10 proceedings. The authorized ROEs averaged 9.45%, compared to an average of 9.61% in 2022, when 10 water utility rate cases were completed nationwide.

Water utility authorized ROE comparison: Connecticut water utilities vs. national average



As of Oct. 4, 2023.
ROE = return on equity.
* 2020 national average ROE includes a punitive ROE in a South Carolina proceeding. Excluding this case, the national average would be 9.36%.

v.

Aqua Pennsylvania Wastewater, Inc.

OPINION AND ORDER

utilities exhaust employees or financial resources because of emergencies occasioned by others.

Section 523 of Code, *supra,* permits the Commission to award a management performance adjustment based on "[a]ny other relevant and material evidence of efficiency, effectiveness and adequacy of service." 66 Pa. C.S. § 523(b)(7). Aqua's consistent willingness to answer calls for aid to other water and wastewater providers shows it is doing more than required under Section 1501 of the Code. The examples discussed above indicate that Aqua carries a roster of large and complex emergency aid matters unlike any other Pennsylvania utility. As stated in its direct testimony, operating troubled systems requires significant time, commitment, and involvement from many departments within Aqua. Aqua St. 1 at 20. As such, Aqua management is exceeding the expectations placed upon it not only by its existing customers, but also the Commonwealth. For this reason, we find that Aqua should receive a management efficiency award commensurate with the emergency service described herein. Therefore, to reflect the extraordinary effort exhibited by Aqua to aid and protect Pennsylvania water and wastewater customers and the environment, we shall award Aqua an additional twenty-five basis points to its ROE for management performance. As discussed in Section X.D.3, *infra,* this will result in a total ROE for the Company of 10.00%.[65] Accordingly, we shall grant Aqua's Exception No. 1.6.

[65] As previously noted, in the *2008 Aqua Order,* the Commission awarded Aqua a management performance adjustment of twenty-two basis points for a total ROE of 11.00%.

Attachment D

Distribution System Improvement Charge (DSIC) Eligible Utilities
Return on Equity (ROE) Summary

	Utility Adjusted ROE[3] (%)	Commission Approved ROE[4] (%)
ELECTRIC		
PECO Energy – Electric Operations	5.48	9.75
PPL Electric Utilities Corp.	8.12	9.75
Duquesne Light Company	8.89	9.75
West Penn Power Company	5.96	9.75
Pennsylvania Power Company	5.76	9.75
Pennsylvania Electric Company	7.79	9.75
Metropolitan Edison Company	8.60	9.75
UGI Utilities, Inc.- Electric Division*		9.75
Pike County Light & Power Co.	9.16	9.75
GAS		
Columbia Gas of PA, Inc.	10.72	10.15
Peoples Natural Gas Company LLC	8.17	10.15
PECO Energy – Gas Operations	6.01	10.15
Peoples Gas Company, LLC	14.22	10.15
UGI Utilities, Inc. – Gas Division	8.27	10.15
Pike County Light & Power Co.	-7.69	10.15
WATER		
PA American Water Company	8.93	9.65
PA American – Wastewater	8.93	9.65
AQUA Pennsylvania[5]	8.39	10.00
AQUA Pennsylvania – Wastewater[6]	8.39	10.00
York Water Company	12.23	9.65
Veolia Water Pennsylvania, Inc.	8.42	9.65
Columbia Water Company	1.64	9.65
Newtown Artesian Water	7.13	9.65

* UGI Utilities, Inc. – Electric Division has a rate filing at Docket No. R-2022-3037368 and filed a letter with the Secretary in place of a report in accordance with 52 Pa. Code § 71.4.

3 Each utility lists adjustments on Schedule B of their quarterly financial report.
4 The ROE is approved in a utility's most recent fully litigated base rate proceeding for which a final order was entered not more than two years prior to the effective date of the DSIC. If more than two years have elapsed between the entry of a final order and the DSIC effective date, the ROE is from this report. If the base rate proceeding is settled, without a stipulated ROE, the ROE is from this report.
5 The Commission approved ROE of Aqua Pennsylvania, Inc. includes an additional adjustment of 0.25% for management effectiveness.
6 The Commission approved ROE of Aqua Pennsylvania Wastewater, Inc. includes an additional adjustment of 0.25% for management effectiveness.

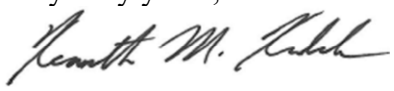
Re: Pennsylvania Public Utility Commission v.
Pennsylvania-American Water Company
Docket Nos. R-2022-3031672 and R-2022-3031673

Dear Secretary Chiavetta:

Enclosed for filing is the **Joint Petition for Settlement of Rate Investigation** ("Joint Petition"), in the above-captioned proceedings. As evidenced by the Certificate of Service, copies of the Joint Petition are being served upon Deputy Chief Administrative Law Judge Joel H. Cheskis and all parties of record.

If you have any questions, please do not hesitate to contact me at 215.963.5384.

Very truly yours,



Kenneth M. Kulak

and February 2024. The baseline of gross plant balances that must be achieved to restart charges under the Company's DSIC rider are reflected in Appendix E.

20. The Joint Petitioners agree and hereby stipulate that the Company shall use the rate of return on equity ("ROE") as calculated for water utilities and published in the "Bureau of Technical Utilities Services Report on the Quarterly Earnings of Jurisdictional Utilities" for the most recent quarter for purposes of calculating the ROE component of the Company's DSIC.

21. Within 90 days after entry of a final order in this proceeding, PAWC will file an amendment to its wastewater Long Term Infrastructure Improvement Plan ("LTIIP") to include systems acquired under Section 1329 of the Public Utility Code,[1] which does not re-prioritize other existing commitments in other service areas. The Company agrees to reevaluate the timeline for future water and wastewater LTIIP revisions as part of future base rate filings based on the number of water and/or wastewater customers acquired since the prior base rate case and the period since the Company's last LTIIP amendment. No later than the next quarterly DSIC filing following the Commission's approval of the amended LTIIP, as may be modified within the discretion of the Commission, PAWC will file a compliance tariff supplement that incorporates the acquired systems into PAWC's DSIC tariff, including all customer safeguards applicable thereto.

22. For systems not acquired under Section 1329, PAWC will apply the DSIC to those customers no later than in the first base rate case in which the system is included.

23. As shown in Appendices A and B, water customers acquired from the Creekside Homeowners Association and SLIBCO and wastewater customers acquired from Foster Township ("Foster") and Turbotville Borough are not exempt from the Company's DSIC.

[1] 66 Pa.C.S. § 1329. Hereafter all references to a "Section" are to the Pennsylvania Public Utility Code ("Code"), 66 Pa.C.S. §§ 101 *et seq*., unless indicated otherwise

ORDER

BY THE COMMISSION:

We adopt as our action the Recommended Decision of Deputy Chief Administrative Law Judge Joel H. Cheskis dated November 8, 2022;

THEREFORE,

IT IS ORDERED:

1. That Pennsylvania-American Water Company and Pennsylvania-American Water Company (Wastewater) shall not place into effect the rates, rules, and regulations contained in Water Tariff Supplement No. 35 and Wastewater Tariff Supplement No. 34 regarding its cost recovery base rates for water and wastewater service revenues within its service territory filed on April 29, 2022 at the above referenced docket.

2. That the Joint Petition for Settlement of Rate Investigation filed on October 11, 2022 at the above referenced docket is granted and the Settlement is approved, without modification.

3. That Pennsylvania-American Water Company and Pennsylvania-American Water Company (Wastewater) are authorized to file tariffs or tariff supplements containing rates, rules and regulations, consistent with the findings herein, and Appendices attached to the Joint Petition for Settlement, to produce, on a total Company basis, an annual increase in revenues of $138 million for service rendered on and after January 28, 2023.

This rating methodology replaces "Regulated Electric and Gas Utilities" last revised on December 23, 2013. We have updated some outdated links and removed certain issuer-specific information.

Summary

This rating methodology explains our approach to assessing credit risk for regulated electric and gas utilities globally. This document does not include an exhaustive treatment of all factors that are reflected in our ratings but should enable the reader to understand the qualitative considerations and financial information and ratios that are usually most important for ratings in this sector.[1]

This report includes a detailed scorecard which is a reference tool that can be used to approximate credit profiles within the regulated electric and gas utility sector in most cases. The scorecard provides summarized guidance for the factors that are generally most important in assigning ratings to companies in the regulated electric and gas utility industry. However, the scorecard is a summary that does not include every rating consideration. The weights shown for each factor in the scorecard represent an approximation of their importance for rating decisions but actual importance may vary substantially. In addition, the scorecard uses historical results while ratings are based on our forward-looking expectations. As a result, the scorecard-indicated outcome is not expected to match the actual rating of each company.

THIS METHODOLOGY WAS UPDATED ON THE DATES LISTED AS NOTED: ON SEPTEMBER 10, 2020, WE REMOVED POINT-IN-TIME REFERENCES AND ALSO MADE MINOR FORMATTING CHANGES; ON NOVEMBER 4, 2019, WE UPDATED SOME OUTDATED REFERENCES AND ALSO MADE MINOR FORMATTING CHANGES; ON FEBRUARY 22, 2019, WE AMENDED A REFERENCE TO A METHODOLOGY IN APPENDIX E AND REMOVED OUTDATED TEXT; ON AUGUST 2, 2018, WE MADE MINOR FORMATTING CHANGES THROUGHOUT THE METHODOLOGY; ON FEBRUARY 15, 2018, WE CORRECTED THE FORMATTING OF THE FACTOR 4: FINANCIAL STRENGTH TABLE ON PAGE 34; AND ON SEPTEMBER 27, 2017, WE REMOVED A DUPLICATE FOOTNOTE THAT WAS PLACED IN THE MIDDLE OF THE TEXT ON PAGE 7.

[1] This update may not be effective in some jurisdictions until certain requirements are met.

Factor 2: Ability to Recover Costs and Earn Returns (25%)

Why It Matters

This scorecard factor examines the ability of a utility to recover its costs and earn a return over a period of time, including during differing market and economic conditions. While the Regulatory Framework looks at the transparency and predictability of the rules that govern the decision-making process with respect to utilities, the Ability to Recover Costs and Earn Returns evaluates the regulatory elements that directly impact the ability of the utility to generate cash flow and service its debt over time. The ability to recover prudently incurred costs on a timely basis and to attract debt and equity capital are crucial credit considerations. The inability to recover costs, for instance if fuel or purchased power costs ballooned during a rate freeze period, has been one of the greatest drivers of financial stress in this sector, as well as the cause of some utility defaults. In a sector that is typically free cash flow negative (due to large capital expenditures and dividends) and that routinely needs to refinance very large maturities of long-term debt, investor concerns about a lack of timely cost recovery or the sufficiency of rates can, in an extreme scenario, strain access to capital markets and potentially lead to insolvency of the utility. While our scoring for the Ability to Recover Costs and Earn Returns may primarily be influenced by our assessment of the regulatory relationship, it can also be highly impacted by the management and business decisions of the utility.

How We Assess Ability to Recover Costs and Earn Returns

The timeliness and sufficiency of rates are scored as separate sub-factors; however, they are interrelated. Timeliness can have an impact on our view of what constitutes sufficient returns, because a strong assurance of timely cost recovery reduces risk. Conversely, utilities may have a strong assurance that they will earn a full return on certain deferred costs until they are able to collect them, or their generally strong returns may allow them to weather some rate lag on recovery of construction-related capital expenditures. The timeliness of cost recovery is particularly important in a period of rapidly rising costs. Utilities have benefitted from low interest rates and generally decreasing fuel costs and purchased power costs, but these market conditions could easily reverse. For example, fuel is a large component of total costs for vertically integrated utilities and for natural gas utilities, and fuel prices are highly volatile, so the timeliness of fuel and purchased power cost recovery is especially important.

While Factors 1 and 2 are closely inter-related, scoring of these factors will not necessarily be the same. We have observed jurisdictions where the Regulatory Framework caused considerable credit concerns – perhaps it was untested or going through a transition to de-regulation, but where the track record of rate case outcomes was quite positive, leading to a higher score in the Ability to Recover Costs and Earn Returns. Conversely, there have been instances of strong Legislative and Judicial Underpinnings of the Regulatory Framework where the commission has ignored the framework (which would affect Consistency and Predictability of Regulation as well as Ability to Recover Costs and Earn Returns) or has used extraordinary measures to prevent or defer an increase that might have been justifiable from a cost perspective but would have caused rate shock.

One might surmise that Factors 2 and 4 should be strongly correlated, since a good Ability to Recover Costs and Earn Returns would normally lead to good financial metrics. However, the scoring for the Ability to Recover Costs and Earn Returns sub-factor places more emphasis on our expectation of timeliness and sufficiency of rates over time; whereas financial metrics may be impacted by one-time events, market conditions or construction cycles - trends that we believe could normalize or even reverse.

How We Assess Timeliness of Recovery of Operating and Capital Costs for the Scorecard

The criteria we consider include provisions and cost recovery mechanisms for operating costs, mechanisms that allow actual operating and/or capital expenditures to be trued-up periodically into rates without having to file a rate case (this may include formula rates, rider and trackers, or the ability to periodically adjust rates

for construction work in progress) as well as the process and timeframe of general tariff/base rate cases – those that are fully reviewed by the regulator, generally in a public format that includes testimony of the utility and other stakeholders and interest groups. We also look at the track record of the utility and regulator for timeliness. For instance, having a formula rate plan is positive, but if the actual process has included reviews that are delayed for long periods, it may dampen the benefit to the utility. In addition, we seek to estimate the lag between the time that a utility incurs a major construction expenditures and the time that the utility will start to recover and/or earn a return on that expenditure.

How We Assess Sufficiency of Rates and Returns for the Scorecard

The criteria we consider include statutory protections that assure full cost recovery and a reasonable return for the utility on its investments, the regulatory mechanisms used to determine what a reasonable return should be, and the track record of the utility in actually recovering costs and earning returns. We examine outcomes of rate cases/tariff reviews and compare them to the request submitted by the utility, to prior rate cases/tariff reviews for the same utility and to recent rate/tariff decisions for a peer group of comparable utilities. In this context, comparable utilities are typically utilities in the same or similar jurisdiction. In cases where the utility is unique or nearly unique in its jurisdiction, comparison will be made to other peers with an adjustment for local differences, including prevailing rates of interest and returns on capital, as well as the timeliness of rate-setting. We look at regulatory disallowances of costs or investments, with a focus on their financial severity and also on the reasons given by the regulator, in order to assess the likelihood that such disallowances will be repeated in the future.

SCHEDULE 75E

DECOUPLING MECHANISM – ELECTRIC (continued)

3% ANNUAL RATE INCREASE LIMITATION:

Following the application of the Earnings Test described above, the amount of the incremental proposed rate adjustment under this Schedule cannot reflect more than a 3% rate increase. This will be determined by dividing the incremental annual revenue to be collected (proposed surcharge revenue less present surcharge revenue) under this Schedule by the total "normalized" revenue for the two Rate Groups for the most recent January through December time period. Normalized revenue is determined by multiplying the weather-corrected usage for the period by the present rates in effect. If the incremental amount of the proposed surcharge exceeds 3%, only a 3% incremental rate increase will be proposed and any remaining deferred revenue will be carried over to the following year. There is no limit to the level of the decoupling rebate, and the reversal of any rebate rate would not be included in the 3% incremental surcharge test.

OTHER CONDITIONS:

The Decoupling Mechanism will last until March 31, 2025, unless otherwise extended by the Commission. (C) (C)

(D) (D)

Issued March 26, 2020 Effective April 1, 2020

10.4 Consumer-Owned Utilities

Consumer-owned utilities (COUs) do not pay cash dividends, but they do need to maintain a sound bond rating to support future investments. The rating agencies look at the TIER (times interest earned ratio) of COUs.[32] Typical bond covenants for COUs obligate the utility to maintain its TIER above a minimum defined level, so they might be required to raise rates if they suffered severe earnings attrition (from any cause).

A loss of revenue due to conservation, weather, or other factors can impair the TIER, and therefore the borrowing capacity of a COU. A decoupling mechanism will provide the same stability of earnings for a COU as for an investor-owned utility (IOU). However, there is a smaller body of research on whether decoupling will actually have a meaningful effect on the borrowing costs of COUs, assuming that their TIER remains within a range in which they are able to borrow.

Without decoupling, COUs tend to set rates at levels that provide 75%-90% assurance that the TIER will remain at an acceptable level. It is clear that a decoupling mechanism will ensure that the TIER remains in an acceptable range, and that the COU will be able to borrow. A decoupling mechanism may thus allow a COU to set rates at a slightly lower level, without fear that a variation in weather or sales will cause it to fall to a level that would trigger a larger rate adjustment.

10.5 Earnings Caps or Collars

Some commissions have imposed an earnings cap, or an earnings collar, as part of a decoupling mechanism. These ensure that, if earnings are too high above a baseline (or too low below the baseline), the decoupling mechanism is automatically subject to review. Because decoupling reduces earnings volatility, it should be unlikely for earnings to vary outside a range of reasonableness. Therefore such a cap or collar, while unlikely to be triggered, may provide greater comfort with the change represented by decoupling.

Even so, in practical application, it is simpler to impose a cap on the variability in prices than in earnings, because the calculation of earnings for regulatory purposes can be significantly different than earnings reporting under generally accepted accounting principles and may invite disputes over methodology.

attempt to measure the change in probability that a utility would exhaust its ability to pay dividends from cash earnings, which is reduced if the utility is protected from variations in earnings driven by weather and economic cycles. These are factors that lead RAP to believe that adjusting the capital structure is more appropriate than adjusting the allowed return on equity when decoupling is implemented on a permanent basis. See Brattle Group, The Impact of Decoupling on the Cost of Capital, March, 2011.

32 TIER is a measure of the extent of which earnings are available to meet interest payments. Mathematically it is defined by this formula: TIER = (net income + interest) / (interest).

Harvard Business Review

Hybrid Work

Survey: Remote Work Isn't Going Away — and Executives Know It

by Nicholas Bloom, Jose Maria Barrero, Steven Davis, Brent Meyer, and Emil Mihaylov

August 28, 2023

ER Productions Limited/Getty Images

Summary. Many CEOs are publicly gearing up for yet another return-to-office push. Privately, though, executives expect remote work to keep on growing, according to a new survey. That makes sense: Employees like it, the technology is improving, and — at least for hybrid... **more**

Remote work spiked during the pandemic, from about 6% of full workdays in the U.S. to more than 50% in the spring of 2020. Since then, it's steadily decreased and since early 2023 has hovered

around 28%. Many executives believe it's time to come back to the office: Jamie Dimon, CEO of JPMorgan, has declared himself a remote-work skeptic; Mark Zuckerberg has declared that engineers "get more done" in the office; and Google's chief people officer recently told employees that office attendance would factor into performance reviews. Even Zoom's leadership wants employees back in person two days a week.

The only problem? Not even senior management expects this return-to-office push to work.

The Survey of Business Uncertainty is jointly run by the Atlanta Federal Reserve Bank, the University of Chicago, and Stanford. It surveys senior executives at roughly 500 U.S. businesses across industries and regions each month.

The most recent iteration of the survey, conducted in July 2023, asks:

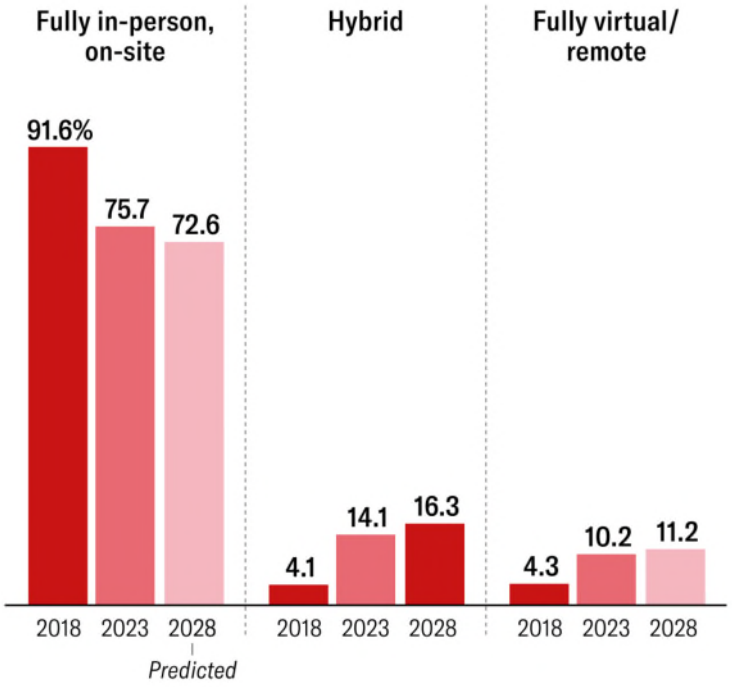
> "Looking forward to five years from now, what share of your firm's full-time employees do you expect to be in each category [fully in person, hybrid, fully remote] in 2028?"

As the chart below illustrates, executives expect both fully remote and hybrid work to continue to grow.

U.S. Executives Expect Remote Work to Keep Increasing

Management doesn't expect a return to pre-pandemic office life.

What share of your firm's full-time employees are in each category?



Source: Survey of Business Uncertainty

HBR

See more HBR charts in Data & Visuals >

They're right to expect remote and hybrid work to increase, for four reasons.

First, as remote-working technology improves, the share of people working remotely increases. In the 1960s, offices were entirely paper-based, and working from home was very inconvenient. By the 1980s, personal computers began to become more widespread and remote work became easier. By the 2000s, the internet and nascent video calls made it easier still. The response followed basic economic logic: As the "costs" of remote work fell (lower inconvenience, for example), more people chose to do it. Work-from-home rates grew steadily over the half-century leading up to

the pandemic, albeit from a very low starting point. And this trend will continue: The pandemic significantly increased the amount of research and patenting happening in technologies that support remote interactions.

Second, remote work will increase because startups born since the pandemic are more likely to use it. As these younger firms grow, the share of jobs offering remote work will increase.

Third, and perhaps least obvious, the U.S. is well positioned for remote work. Already, the U.S. has one of the highest rates of remote work of any country, behind only New Zealand and Canada among the 34 countries we surveyed. That makes sense. Remote work is a form of decentralization and personal autonomy: It gives employees more discretion over how and when they work. Management researchers have long known that for decentralized decision making to succeed, a company must be especially well managed. Separate research by our colleagues consistently finds that U.S. firms have better management practices, on average, than firms in other countries. Those better practices enable U.S. firms to more effectively manage remote work. It also helps that Americans have larger residences, which makes it easier to create a dedicated workspace at home.

Finally, remote work will increase because employees like it. The evidence suggests that working from home is valued by employees about the same as an 8% pay increase, on average. It's a huge amenity and helps reduce turnover — in one recent, large study, by as much as 35%.

What about worries that remote work lowers productivity? Research suggests that fully remote work is up to 10% less productive than onsite work, on average. But it's also much cheaper, because it cuts space needs and enables hiring from anywhere. Productivity in hybrid mode differs across jobs and

people and with management practices. On average, however, hybrid work seems to have little net effect on productivity and may increase it. Hybrid arrangements also save on the costs — in time and money — of commuting. If employees accomplish the same amount of work whether they commute into the office two or five days a week, they're actually spending their time more efficiently in the hybrid arrangement.

Companies and their leaders should seriously consider the merits of working from home, at least a couple of days a week. Managed hybrid, where teams all gather in the office the same day or two each week, may well be the best of both worlds. It can be profitable for companies, popular with employees, and better for the planet due to less energy consumption.

While the future extent of remote work remains uncertain, there's little chance we will see a big return to the office. Remote technologies will only get better, and employees will gravitate to firms with more flexible policies. The biggest clue that the return-to-office push won't work, though, is the fact that executives themselves privately predict that remote work will keep increasing.

v.	:	
	:	
Pennsylvania-American Water Company – (Wastewater)	:	

RECOMMENDED DECISION

Before
Joel H. Cheskis
Deputy Chief Administrative Law Judge

like revenue requirement and related issues, cost allocation, revenue allocation and rate design determine the specific portion of the overall revenue increase any given party will be required to bear. That is, to the extent the overall revenue requirement, for example, is set at a certain level, if a party is paying a reasonable share, or less, of the ultimate dollar value, the overall revenue requirement may be less significant to that party. In this case, the parties are commended for reaching agreement on a contentious issue contested by multiple parties.

As an initial matter, and as noted above regarding revenue requirement, the agreement in the settlement reduces the subsidy that PAWC's water customers provide to PAWC's wastewater customers. For the reasons discussed above regarding revenue requirement, this provision of the settlement is in the public interest because it helps to ensure that customers more accurately bear the burden of the cost of the service provided to them. PAWC's water customers should not be required to bear the burden of the cost to provide service to PAWC's wastewater customers.

In that vein, the provisions in the settlement that, for example, require the submission of a cost of service study in the next base rate proceeding, are in the public interest because they will also help ensure that customers more accurately bear the burden of the cost of the service provided to them and do not undertake the cost of service provided to other customers. This also includes the agreement in the settlement that PAWC agrees to create a separate tariff group for current and future CSS customers in its next base rate proceeding. These provisions help ensure accurate rates and are therefore in the public interest going forward. As I&E noted, customers should be moved either to or towards their full cost of service. As the Commonwealth Court has noted, cost of service is the "polestar" of ratemaking. Lloyd v. Pa. Pub. Util. Comm'n, 904 A.2d 1010 (Pa. Cmwth 2006).

Similarly, the provisions in the settlement adjusting the service charges for varying customer classes also is in the public interest because it helps to ensure that customers pay for the cost to provide them with the services they use.

- The actual maximum hour demand ratio for the residential class from PAWC's most recent demand study should be used.

- PAWC should conduct a new demand study upon conclusion of this proceeding and prior to filing its next rate case.

- Any scale back of the wastewater revenue requirement should be applied first to the wastewater subsidy.

- The wastewater subsidy should be re-allocated to the water customers based on the wastewater class that is responsible for the subsidy.

- Industrial class customer charges should be increased and volumetric rates decreased.

- Volumetric rates for industrial and municipal customers should be further reduced if the Commission approves a lower revenue requirement for PAWC.

Q DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?

A Yes.

ROE	Return on Equity

SURREBUTTAL TESTIMONY OF BILLIE S. LACONTE

Introduction and Qualifications

Q PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A Billie S. LaConte; 14323 South Outer 40 Dr., Suite 206N, St. Louis, MO 63017.

Q ARE YOU THE SAME BILLIE S. LACONTE WHO PREVIOUSLY SUBMITTED DIRECT AND REBUTTAL TESTIMONY IN THIS PROCEEDING ON BEHALF OF THE PENNSYLVANIA-AMERICAN WATER LARGE USERS GROUP (PAWLUG)?

A Yes.

Q WHAT IS THE PURPOSE OF YOUR SURREBUTTAL TESTIMONY?

A I am addressing certain issues raised in the rebuttal testimonies of Pennsylvania-American Water Company (PAWC), Office of Consumer Advocate (OCA), Cleveland-Cliffs Steel (Clevland-Cliffs), and The Coalition for Affordable Utility Services and Energy Efficiency in Pennsylvania (CAUSE-PA) witnesses as follows:

- Class Cost-of-Service Study (CCOSS): PAWC witness, Constance E. Heppenstall, and OCA witness, Jerome D. Mierzwa;
- Allocation of Wastewater Subsidy: OCA witness, Jerome D. Mierzwa, and Cleveland Cliffs witness, Richard A. Baudino;
- Environmental Compliance Investment Charge (ECIC): PAWC witness, J. Cas Swiz;
- Revenue Decoupling Mechanism (RDM) and Return on Equity (ROE): PAWC witnesses Charles Rea and Ann E. Bulkley, and OCA witness, Jerome D. Mierzwa;
- Industrial Rate Design: PAWC witness, Charles Rea;
- Deferral Mechanisms: PAWC witness, J. Cas Swiz;
- Scale back of rates: PAWC witness, Charles Rea; and
- Arrearage Management Plan (AMP): CAUSE-PA witness, Harry S. Geller, Esq.

Q DOES THE FACT THAT YOU ARE NOT ADDRESSING EVERY ISSUE RAISED BY THESE AND OTHER PARTIES CONSTITUTE AN ENDORSEMENT OF THEIR RECOMMENDATIONS?

A No.

Water Class Cost-of Service Study

Q HAS PAWC CHANGED ITS POSITION REGARDING THE WATER CLASS COST-OF-SERVICE STUDY?

A No. PAWC continues to support the 5.0 maximum hour demand statistic for the Residential class. Ms. Heppenstall maintains that because data for a certain area was not available for one year of the survey and the peak hour demand for another area (Shire Oaks) occurred in the winter, that the results should not be used.[1] However, Shire Oaks' maximum hour demand in 2013 occurred in November, not in the summer, and Ridge Road Booster's maximum hour demand in 2014 occurred in February, indicating winter peaks are not anomalous, as PAWC claims.[2] PAWC included those results in determining the maximum peak hour demand for those years. As a result, PAWC's support for which data should be included is inconsistent. Rather than selectively excluding one winter peak while including others, the results for Shire Oaks in 2015 should be included, which supports a 6.0 maximum hour demand ratio for the Residential class, as recommended in my direct testimony.

[1] PAWC Statement No. 12-R, Rebuttal Testimony of Constance E. Heppenstall at 8-9.

[2] *Id*., Exhibit CEH-3R at 1-2.

Q WILL PAWC'S PROPOSED MAXIMUM HOUR DEMAND RATIO FOR THE RESIDENTIAL CLASS RESULT IN JUST AND REASONABLE RATES FOR THE WATER UTILITY CUSTOMERS?

A No. As discussed in my direct testimony, using the incorrect maximum hour demand ratio for the Residential class would result in distorted rates causing certain customers to pay more than their cost to serve them. Cost-based rates send proper price signals which promotes efficiency as well as just and reasonable rates.

Q DOES OCA WITNESS, MR. MIERZWA, ALSO DISAGREE WITH YOUR PROPOSAL TO SET THE PEAK MAXIMUM HOUR DEMAND FOR THE RESIDENTIAL CLASS AT 6.0?

A Yes. Mr. Mierzwa agrees with PAWC's claim that because some of the high readings from PAWC's demand study were anomalous, they should be disregarded. However, the higher readings were consistent for the location. For example, in 2013, the maximum hour demand for Sandy Ridge was 11.14 and in 2015 it was 11.98.[3] Therefore, including these readings when determining the maximum hour demand ratio for the Residential class is appropriate.

Q DOES MR. MIERZWA SUPPORT YOUR RECOMMENDATION THAT PAWC SHOULD CONDUCT A NEW SYSTEM DEMAND STUDY PRIOR TO ITS NEXT BASE RATE PROCEEDING?

A Yes. However, Mr. Mierzwa disagrees with my observation that residential usage has increased due to more customers working from home, claiming that "the days and

[3] *Id.* at 3.

number of hours that water can be used increases significantly."[4] Therefore, Mr. Mierzwa speculates that "the maximum day and maximum hour demands of Residential customers are likely to decrease."[5] Mr. Mierzwa's observation is conjecture and he provides no support for his claim. Therefore, it is even more important that the Commission direct PAWC to conduct a feasibility study prior to its next base rate case as discussed more later.

Q DOES PAWC AGREE THAT IT SHOULD CONDUCT A NEW CUSTOMER CLASS DEMAND STUDY PRIOR TO ITS NEXT BASE RATE PROCEEDING?

A No. PAWC witness, Ms. Heppenstall, states that a demand study is:

> …a substantial undertaking and would require significant Company and outside consultant resources…[and] would require the Company to incur unnecessary expense.[6]

A new demand study should be undertaken to ensure that PAWC's costs are allocated correctly to each customer class. PAWC has completed these studies in the past and should do so now, to ensure accurate rates. To deny a study because of the time and expense required is short-sighted because a proper demand study would ensure that PAWC is properly recovering its costs from each customer class.

Q DID PAWC PROPOSE AN ALTERNATIVE IF THE COMMISSION DIRECTS IT TO CONDUCT A DEMAND STUDY?

A Yes. PAWC proposes a feasibility study for conducting a demand study be done first.[7] The proposed feasibility study is a positive incremental step. However, rather than

[4] OCA Statement No. 4R, Rebuttal Testimony of Jerome D. Mierzwa at 15.

[5] *Id*.

[6] PAWC Statement No. 12-R, Rebuttal Testimony of Constance E. Heppenstall at 9.

[7] *Id.*

create an additional proceeding between base rate cases, the feasibility study should be completed and filed with PAWC's next base rate case. This would unfortunately push introduction of a demand study to the subsequent base rate case, but I think this is necessary to avoid tying up the resources of PAWC's stakeholders with successive regulatory proceedings.

Q DOES PAWC SUPPORT A SYSTEM WIDE MAXIMUM DEMAND ANALYSIS?

A No. PAWC states that a system demand study is a large, multi-year undertaking and that the Company faces challenges in accurately measuring maximum hour demand in districts with multiple groundwater sources due to several factors.[8] However, as with the customer class demand study, the intensity of the study and possible challenges should not deter the Company from undertaking the study. The benefits of using accurate data to allocate costs outweigh any purported challenges of the study. PAWC should attempt to correct the issues regarding the potential for inaccurate measurements of water. In fact, the inaccurate measurements should encourage PAWC to undertake another study to obtain accurate measurements.

Q WHAT DO YOU RECOMMEND?

A I recommend that PAWC modify its CCOSS to incorporate my revised maximum demand hour ratio (6.0) for the Residential class. Prior to its next base rate case, I recommend that PAWC be required to conduct a feasibility study.

[8] *Id.* at 10.

Q DO YOU HAVE ANY ADDITIONAL COMMENTS ABOUT MR. MIERZWA'S PROPOSED CLASS COST-OF-SERVICE STUDY?

A Yes. In discovery response to PAWLUG, PAWC revised its CCOSS correcting the Municipal class's cost of service, as well as removing the interruptible class's usage from the Industrial class.[9] Therefore, Mr. Mierzwa's proposed CCOSS is dated and inaccurate and should not be relied upon.

Allocation of Wastewater Subsidy

Q DOES MR. MIERZWA OBJECT TO YOUR POSITION REGARDING THE ALLOCATION OF THE WASTEWATER SUBSIDY?

A Yes. Mr. Mierzwa states that the allocation of the wastewater subsidy is a public policy determination and not a cost causation determination.[10] While it is true that water customers do not "cause" the wastewater revenue requirement, as many PAWC water customers do not receive wastewater service from PAWC, the allocation of the Act 11 subsidy costs to each class should be based as much as possible on the class that caused the subsidy. For the Residential customer class, customers' water usage profile determines the wastewater cost allocation, therefore, the subsidized wastewater costs caused by Residential customers should be allocated to the Residential water customer class, as closely as possible. For wastewater costs that are not directly assignable, I recommend that those costs be allocated using the total cost of service for each customer class based on PAWC's corrected CCOSS results, including the removal of Industrial curtailment usage from the Industrial class.

[9] PAWC Response to PAWLUG 5-1, the relevant portion of which is provided in **Exhibit ___(BSL-1S)**.

[10] OCA Statement No. 4R, Rebuttal Testimony of Jerome D. Mierzwa at 10.

Q PLEASE RESPOND TO MR. BAUDINO'S COMMENTS REGARDING THE ALLOCATION OF THE WASTEWATER SUBSIDY.

A Mr. Baudino notes my proposed allocation of the wastewater subsidy as set forth in my direct testimony was incorrect because I relied on incorrect information provided by PAWC. However, prior to filing rebuttal testimony, in a discovery response PAWC partially corrected the error by modifying the directly assigned portion of the wastewater subsidy, which I addressed in my rebuttal testimony.[11] I am now revising my proposed re-allocation based on additional corrected information which has been provided by PAWC in discovery. The results are shown in Table 1.

Table 1
Revised Re-allocation of Wastewater Subsidy
($Millions)[12]

	PAWC Proposed Re-allocation		PAWLUG Proposed Re-allocation	
Customer Class	**$**	**%**	**$**	**%**
Residential	$45.9	64.5%	$46.0	64.8%
Commercial	$17.6	24.7%	$19.6	27.6%
Large Industrial	$4.5	6.4%	$4.3	6.0%
Municipal	$2.7	3.8%	$1.1	1.5%
Fire	$0.4	0.6%	$0.07	0.1%
Total	$71.1	100.0%	$71.1	100.0%

My revisions update the direct allocation, as well as reflect my recommended changes to the water residential maximum demand hour ratio and reflect the removal of the interruptible usage from the Industrial class.

Environmental Compliance Investment Charge

Q WHAT IS THE POSITION OF PAWC WITNESS, J. CAS SWIZ, REGARDING A CAP ON THE ENVIRONMENTAL COMPLIANCE INVESTMENT CHARGE?

A Mr. Swiz rejects my proposal to assign a cap to the ECIC if it is approved. Mr. Swiz claims that the costs related to the ECIC may be large and incurred over a short time period. Mr. Swiz offers an alternative proposal stating:

> An option that could be considered is a limitation on the Environmental Plan and ECIC recovery that requires a base rate proceeding to be filed within a certain time period.[13]

Q IS MR. SWIZ'S ALTERNATE PROPOSAL REASONABLE?

A No. Mr. Swiz's proposal demonstrates that the ECIC is not necessary. Environmental policy is developed through a deliberative process that may take years to finalize. PAWC would have adequate time to plan for potential environmental expenses and seek approval for these costs through a base rate case prior to incurring the costs.

Q WHAT DO YOU RECOMMEND?

A My recommendation remains that the proposed ECIC should be rejected. However, as discussed in my direct testimony, if the ECIC is approved by the Commission, limiting the cost of the ECIC to 3% of the total annual revenues and requiring a base rate proceeding would serve to protect customers from excessive and frequent rate changes. Furthermore, I continue to recommend that PAWC's ROE should be set at the lower end of the Commission's deemed range of reasonableness if the ECIC is approved.

[13] PAWC Statement No. 8-R, Rebuttal Testimony of J. Cas Swiz at 15.

Revenue Decoupling Mechanism and Return on Equity

Q DOES PAWC CONTINUE TO ADVOCATE FOR THE REVENUE DECOUPLING MECHANISM?

A Yes. Mr. Rea states "Adoption of the Company's proposed RDM is in the long-term best interest of the Company and its customers.[14]

Q WOULD THE REVENUE DECOUPLING MECHANISM BENEFIT BOTH PAWC AND ITS CUSTOMERS?

A No. The RDM would benefit only PAWC because it shifts PAWC's risk of recovering its costs and meeting earnings targets to customers. The increased risk to customers is not a benefit.

Q DOES THE PROPOSED REVENUE DECOUPLING MECHANISM REDUCE PAWC'S RISK?

A Yes. As discussed in my direct testimony, because the RDM shifts the risk of recovery of the revenue requirement to customers, PAWC's financial risk is reduced. Therefore, to recognize the reduction in risk, if the RDM is approved, PAWC's ROE should be reduced.

Q PAWC WITNESS, MS. BULKLEY, CLAIMS IF PAWC RECEIVES APPROVAL FOR ITS PROPOSED RDM AND ECIC, THAT PAWC WOULD NOT HAVE REDUCED RISK IN COMPARISON TO THE COMPARABLE COMPANIES IN HER RETURN ON EQUITY ANALYSIS. DO YOU AGREE?

A No. As shown in Exhibit 13-A, Schedule 9, of Ms. Bulkley's direct testimony, of the 23 *water* utility subsidiaries included in her proxy group, only five have revenue

[14] PAWC Statement No. 10-R, Charles Rea at 77.

decoupling mechanisms. Ms. Bulkley notes that 59% of the utility companies in her proxy group have some form of revenue stabilization mechanism. However, this includes gas utilities, which are not comparable to water utilities, as well as weather normalization adjustment mechanisms, which are limited in scope and not comparable to the broader revenue decoupling mechanism proposed by PAWC.[15] For example, weather normalization adjustment mechanisms are generally limited to Residential customers and only adjust revenue for weather variation. Further, Ms. Bulkley did not identify any water utilities that had an ECIC. Therefore, if the RDM and ECIC are approved, PAWC's ROE should be set at the lower end of the Commission's deemed range of reasonableness.

Q WHAT IS THE POSITION OF OCA WITNESS, MR. MIERZWA, REGARDING THE REVENUE DECOUPLING MECHANISM?

A Mr. Mierzwa agrees that the RDM should be rejected.[16] However, he disagrees with the recommendation that, if approved, the RDM should be applied to only to the Residential and Commercial classes, and not to the Industrial class. Mr. Mierzwa claims the Industrial rate class is weather sensitive and, therefore, PAWC risks base rate recovery from the Industrial class due to the variation in revenues.[17]

[15] See OCA Set 3, No. 1, Attachment 5 showing that the majority of revenue decoupling mechanisms classified as "partial" in Ms. Bulkley's Exhibit 13-A, Schedule 9 (including the "revenue decoupling" mechanism associated with NiSource's PA subsidiary, Columbia Gas of Pennsylvania) are weather normalization adjustment mechanisms.

[16] OCA Statement 4R, Rebuttal Testimony of Jerome D. Mierzwa at 14-15.

[17] *Id*. at 21.

Q DO YOU AGREE THAT THE INDUSTRIAL CLASS'S LOAD IS WEATHER SENSITIVE?

A No. When PAWC forecasts the load for Industrial customers it does not use the same methodology as it uses for Commercial and Municipal classes. For those classes PAWC uses statistical modeling which takes into account the effects of weather when forecasting usage. For the Industrial class usage, PAWC developed a "simple multi-year average."[18]

Q SHOULD THE RDM APPLY TO THE MUNICIPAL CLASS?

A No. Although PAWC forecasts the Municipal class's usage using weather-sensitive metrics, the Municipal class, as explained by PAWC, is characterized by the concentration of consumption among a small number of very large customers.[19] Therefore, the usage profile for the Municipal class is very similar to the Industrial class and the RDM should not apply to this class.

Q WHAT DO YOU RECOMMEND?

A As set forth more fully in my direct testimony, I recommend the RDM be rejected. However, if the RDM is approved, I recommend:

- PAWC's authorized ROE be reduced to the lower end of the Commission's deemed range of reasonableness for all customer classes;
- A 3% revenue cap should apply to the RDM; and
- The RDM should not apply to Industrial or Municipal classes.

[18] PAWC Statement No. 10, Direct Testimony of Charles Rea at 63.

[19] PAWC Response to PAWLUG 1-2, Attachment at 6, a copy of which is provided in my rebuttal testimony as **Exhibit ___(BSL-3R)**.

Industrial Rate Design

Q DOES PAWC OBJECT TO YOUR PROPOSAL TO INCREASE THE FIXED CHARGE FOR THE INDUSTRIAL CLASS?

A Yes. PAWC witness, Mr. Rea, claims that my proposal artificially doubles the meter charges for Industrial customers with meters that are 6" or above. Further, he claims that the Industrial meter charges would be more than four times the Residential and Commercial charges with "no apparent basis in cost."[20] However, Mr. Rea ignores the fact that increasing the fixed charge for the Industrial class would be beneficial to PAWC by increasing its fixed revenue stream. Further, PAWC admits that 95% of its costs are fixed. Therefore, recovering more costs in a fixed charge rather than a volumetric charge more closely follows cost causation and reduces fluctuations in Industrial class revenues.

Q WHAT DO YOU RECOMMEND?

A I recommend that PAWC double the fixed monthly charge for Industrial customers with meters that are 6" or larger and reduce the increase to the volumetric charge for these customers.

Deferral Mechanisms

Q WHAT IS PAWC'S POSITION REGARDING ITS PROPOSED DEFERRAL MECHANISMS FOR PENSION AND OTHER POST-EMPLOYMENT BENEFIT (OPEB) EXPENSE AND PRODUCTION EXPENSE?

A PAWC witness, Mr. Swiz, continues to advocate for both deferral mechanisms, claiming "[t]he Commission regularly authorizes utilities to defer costs for accounting

[20] PAWC Statement No. 10-R, Rebuttal Testimony of Charles Rea at 45.

purposes arising from events that are unanticipated and outside the utility's control…"[21] Mr. Swiz further claims that the deferral mechanisms will not remove PAWC's incentive to control costs and denies that they are single-issue ratemaking.[22]

Q DO THE PROPOSED DEFERRAL MECHANISMS REMOVE INCENTIVES FOR PAWC TO CONTROL COSTS AND AFFECT PAWC'S FINANCIAL RISK?

A Yes. If PAWC is guaranteed recovery of these costs, it has no incentive to reduce them, as it will pass the costs through to customers. As stated in my direct testimony, a utility should have an opportunity, not a guarantee, to earn a reasonable return on its used and useful investments, and to recover reasonable and necessary operating expenses. By guaranteeing recovery, PAWC's risk of recovering these costs is removed.

Q ARE THE PROPOSED DEFERRAL MECHANISMS EXAMPLES OF SINGLE-ISSUE RATEMAKING?

A Yes. As stated in my direct testimony, each of the proposed deferral mechanisms is single-issue or piecemeal ratemaking because it tracks one cost separately from all of PAWC's other costs, thereby, ignoring offsetting over recovery for other costs. The offsetting over recovery negates the need for a deferral mechanism.

Q WHAT DO YOU RECOMMEND?

A I recommend that the Commission reject PAWC's proposed deferral mechanisms. If the Commission approves the proposed deferral mechanisms, PAWC's ROE should be at the lower end of the Commission's deemed range of reasonableness.

[21] PAWC Statement No. 8-R, Rebuttal Testimony of J. Cas Swiz at 4.

[22] *Id. at 5.*

Scale Back

Q DOES MR. REA DISAGREE WITH YOUR PROPOSAL REGARDING THE SCALE BACK OF RATES?

A Yes. Mr. Rea objects to my position that any reduction in the revenue requirement should be applied to the Act 11 subsidy first. Mr. Rea states:

> …the same relative percentages to the total of water service revenue requirement, wastewater service revenue requirement, and Act 11 reallocation amounts be maintained at proposed levels and that the levels of rates for water service and wastewater service relative to each other should be maintained as proposed in the event that a lower revenue requirement is approved by the Commission...[23]

If a lower revenue requirement is approved, water customers should benefit first by reducing the Act 11 subsidy. While Act 11 allows for some degree of cost shifting, the subsidy is an exception to the general cost-based ratemaking and, therefore, it should be reduced as much as possible before applying any scale back reduction to wastewater rates. Wastewater customers should not benefit from a reduction if water customers are still paying a subsidy for the wastewater customers.

Q WHAT DO YOU RECOMMEND?

A. For the reasons set forth in my direct testimony, I recommend that the Commission approve my recommendation to scale back the Act 11 subsidy first before reducing wastewater rates. In addition, I continue to support a reduction in the volumetric rates for Industrial and Municipal customers if the Commission authorizes a lower revenue requirement for PAWC.

[23] PAWC Statement No. 10-R, Rebuttal Testimony of Charles Rea at 41.

Arrearage Management Plan Cost Allocation

Q WHAT IS MR. GELLER'S POSITION REGARDING THE ALLOCATION OF THE ARREARAGE MANAGEMENT PLAN COSTS?

A Mr. Geller opposes the recommendation of OSBA witness, Mr. Higgins, that the AMP costs be allocated to only the Residential class. Instead, Mr. Geller recommends that PAWC recover the AMP costs from both Residential and non-residential customers. He refers to the Commission's Final Policy Statement and Order regarding the Customer Assistance Program (CAP) which amended the CAP policy, whereupon the Commission discusses the recovery of universal service program costs from utility ratepayers, both Residential and non-residential.

Q DO YOU AGREE WITH MR. GELLER'S RECOMMENDATION?

A No. First, I am advised by Counsel that the Commission's Final Policy Statement and Order regarding CAP is applicable to only electric and gas utilities, where customer assistance programs are mandated. If the Commission intended for any findings or directives in the Final CAP Policy Statement and Order to apply to a broader group of utilities, it would have said so. Second, PAWC witness, Ms. Heppenstall, agrees with Mr. Higgins' proposal to allocate the AMP costs to only the Residential class.[24] Third, Mr. Geller's proposal is contrary to the principles of cost causation. Under this long-standing and widely accepted regulatory principle, costs should be allocated to the customer classes in a manner that reflects the degree in which each class causes the utility to incur each cost. There is no dispute that the Residential class causes PAWC to incur the AMP expense.

[24] PAWC Statement No. 12-R Rebuttal Testimony of Constance E. Heppenstall at 10-11.

Q WHAT DO YOU RECOMMEND?

A The Commission should reject Mr. Geller's proposal to allocate AMP expense to Residential and non-residential classes and approve PAWC's proposal to recover these expenses from the Residential class.

Q DOES THIS CONCLUDE YOUR SURREBUTTAL TESTIMONY?

A Yes.

Pennsylvania-American Water Large Users Group Set 5

PAWLUG 05-001

Responsible Witness: Connie Heppenstall, Senior Project Manager, Gannett Fleming

Question:

Referring to PAWC's Response to OSBA 3-1 and OCA 4-12, provide a revised Schedule 12-A showing the proposed rate increase for each customer class.

Response:

Please see PAWLUG 05-001_Attachment for the revised Exhibit 12-A which incorporates the changes from OSBA 3-1 and OCA 4-12 as well as other changes that were identified during discovery and in reviewing non-Company direct testimony. These include the following:

1. Correction to the Public Authority meter count due to a linking error.
2. Arrearage Management Plant ("AMP") costs being directly allocated to the Residential class.
