~~I.1.160.~~VII.1.35. An RFP Bidder that submits a Part 2 Proposal will be notified whether it is eligible to submit Bids no later than 6 PM on the Part 2 Notification Date. The Independent Evaluator provides such notification to the RFP Bidder by email.

VII.2. Bids: Submission, Processing, and Evaluation

~~I.1.161.~~VII.2.1. An RFP Bidder must submit its Bids in accordance with the instructions provided in the Part 1 Materials and in accordance with the requirements of Article VI~~Article VI~~. An RFP Bidder's Bids must be received between 10 AM and 12 PM (noon) on the Bid Date. The requirements for Bid submission are the same for all RFP Bidders, regardless of whether they were previously eligible to submit Bids.

~~I.1.162.~~VII.2.2. The Bid Form, as provided to each RFP Bidder with the Part 1 Notification, is the exclusive method for the submission of Bids. A sample of the Bid Form is provided for illustrative purposes as Appendix 10 of these RFP Rules. The Bid Form is prepared specifically for each RFP Bidder. The Bid Form must be filled out completely and transferred according to the instructions provided by the Independent Evaluator in the Part 1 Materials. The RFP Bidder may encrypt the Bid Form using the instructions provided by the Independent Evaluator. Bids on any Bid Form that is incompletely or inconsistently filled out will be considered deficient and will not be evaluated.

~~I.1.163.~~VII.2.3. An RFP Bidder submits its Bids electronically, by transferring its Bid Form through a secure file transfer system. The RFP Bidder must use the username and the password provided by the Independent Evaluator to access the secure file transfer system. The Independent Evaluator supplies a security code that the RFP Bidder may use to encrypt the Bid Form.

~~I.1.164.~~VII.2.4. An RFP Bidder that must resort to an alternate method for submitting its Bid Form by email because of technical difficulties with the secure file transfer system must follow the instructions provided by the Independent Evaluator for this contingency. These instructions will include a representative of the RFP Bidder ~~phoning~~emailing or texting the Independent Evaluator to advise the Independent Evaluator of the use of an alternate method for the submission of the Bid Form ~~and to provide authenticating information~~. The Independent Evaluator will recommend that the Bid Form in this case be encrypted and the Independent Evaluator will note for the RFP Bidder that such transmission may not be secure.

~~I.1.165.~~VII.2.5. All Bid Forms must be received between 10 AM and 12 PM (noon) on the Bid Date. No late Bid Forms will be considered regardless of the method used by the RFP Bidder to submit its Bid Form.

~~I.1.166.~~VII.2.6. If an RFP Bidder submits its Bid Form more than once between 10 AM and 12 PM (noon) on the Bid Date, the last Bid Form submitted in accordance with all requirements of the Bid Form and of Article VI automatically supersedes all previously submitted Bid Form(s).

~~I.1.167.~~VII.2.7. The Independent Evaluator acknowledges receipt of the Bid Form with each RFP Bidder by telephone. The telephone number used is the telephone number provided on the Bid Form. If the Bid Form received by the Independent Evaluator is not encrypted by the RFP Bidder, the Independent Evaluator will require that the RFP Bidder provide the security code to the Independent Evaluator before the Bid Form is acknowledged and evaluated. The Independent Evaluator makes this acknowledgment within ~~fifteen (15~~thirty (30) minutes of receipt of the Bid Form. An RFP Bidder that does not receive an acknowledgment within ~~fifteen (15~~thirty (30) minutes of submitting its Bid Form should assume technical difficulties, should proceed to submitting its Bid Form by ~~and~~an alternate method, and should ~~phone~~email or text the Independent Evaluator immediately. RFP Bidders may email the Independent Evaluator at pecoprocurement@nera.com to ask for confirmation of receipt of the Bid Form.

~~I.1.168.~~VII.2.8. If the Bid Form received by the Independent Evaluator is incomplete or inconsistent with all requirements of the Bid Form and of Article VI, the Independent Evaluator will advise the RFP Bidder of that fact when confirming receipt of the Bid Form. ~~The RFP Bidder may correct and resubmit the Bid Form as long as the Bid Form is received between 10 AM and 12 PM (noon) on the Bid Date. If the corrected Bid Form is not received between 10 AM and 12 PM (noon) on the Bid Date, the Bids on the Bid Form will not be evaluated.~~ In the case where the Independent Evaluator provides the evaluation of a Bid Form with at least ten minutes left in the Bid Window for that Bid Form, if the Bid Form is incomplete or inconsistent with the RFP Rules, or if the Pre-Bid Letter of Credit is insufficient to support the number of tranches bid by the RFP Bidder, then the RFP Bidder may correct and resubmit that Bid Form as long as it is received between 10 AM and 12 PM (noon) on the Bid Date. In the case where the Independent Evaluator provides the evaluation of a Bid Form with less than ten minutes left in the Bid Window, or after the Bid Window has closed, the following will apply. If the Bid Form is incomplete or inconsistent with the RFP Rules, or if the Pre-Bid Letter of Credit is insufficient to support the number of tranches bid by the RFP Bidder, the RFP Bidder will have ten minutes to resubmit the Bid Form strictly for the purpose of addressing the deficiencies identified by the Independent Evaluator. Only one such resubmission will be considered. The Independent Evaluator will reject a resubmitted Bid Form that modifies Bids that were consistent with the RFP Rules as originally submitted.

~~I.1.169.~~VII.2.9. It is the responsibility of the RFP Bidder to ensure that a completely and consistently filled out Bid Form is submitted between 10 AM and 12 PM (noon) on the Bid Date. The Independent Evaluator will hold a training session for RFP Bidders to practice the Bid submission process. RFP Bidders are encouraged to participate to minimize the possibility of technical difficulties with the submission of their Bid Forms.

~~I.1.170.~~VII.2.10. The Independent Evaluator will verify that the Pre-Bid Letter of Credit is in an amount sufficient to support the number of tranches bid by each RFP Bidder. If an RFP Bidder's Pre-Bid Letter of Credit is insufficient to support the number of tranches bid by the RFP Bidder, the Independent Evaluator will contact the RFP Bidder on a best efforts basis. The RFP Bidder may correct and resubmit the Bid Form ~~as long as the Bid Form is received between 10 AM and 12 PM (noon) on the~~

~~Bid Date.~~in accordance with paragraph VII.2.8. If the Independent Evaluator is not able to contact the RFP Bidder in time or if the RFP Bidder has not submitted a revised Bid Form ~~between 10 AM and 12 PM (noon) on the Bid Date,~~in accordance with paragraph VII.2.8, the Independent Evaluator will modify the Bid Form. The Independent Evaluator will determine for such RFP Bidder the greatest number of whole tranches that its Pre-Bid Letter of Credit is sufficient to support. The Independent Evaluator will strike a Bid from a Bid Form for any tranche that is not supported by the Pre-Bid Letter of Credit. The Independent Evaluator will remove a Bid first from the product where there is most competition, as measured by the ratio of the number of tranches bid to the number of tranches needed. For that product, the Independent Evaluator will start with the tranche that has the highest Bid. If more than one RFP Bidder submitted Pre-Bid Letters of Credit that are insufficient to support the number of tranches bid by each such RFP Bidder, the Independent Evaluator will first modify the Bid Form from the RFP Bidder whose Bid Form is received last.

~~I.1.171.~~VII.2.11. By submitting a Proposal in response to an RFP, each RFP Bidder is authorizing the Independent Evaluator to modify the RFP Bidder's Bid Form as specified Paragraph VII.2.10~~VII.2.10~~. Each RFP Bidder acknowledges and accepts that the methodology may result in removal of a Bid that would have been approved by the Commission or the retention of a Bid that was not approved by the Commission.

~~I.1.172.~~VII.2.12. The Bids supported by an adequate Pre-Bid ~~Letters~~Letter of Credit will be evaluated on a price-only basis. The Bids for each product will be ranked from lowest to highest price until all Bids are ranked or until the number of Bids that are ranked equals the number of tranches available for the product.

~~I.1.173.~~VII.2.13. If two or more RFP Bidders submit Bids that are identical for a product, these Bids will be considered "Tied Bids" at that price. The Independent Evaluator will use the tie-breaking procedure described in the next Paragraph if: i) in total, more Bids must be ranked for a product than there are tranches available for that product; ii) the tie among two or more Tied Bids must be broken in order to determine the RFP Bidders that have submitted the lowest Bids on that product.

~~I.1.174.~~VII.2.14. The tie-breaking procedure will award tranches in the following order: (1) to the RFP Bidder which, if awarded the tranche, would hold the fewest tranches for the product for any one month

during the product term; (2) to the RFP Bidder which, if awarded the tranche, would hold the fewest tranches for the Class in question for any one month during the product term, including tranches won for the Class in prior solicitations; and then (3) to the RFP Bidder which, if awarded the tranche, would hold the fewest tranches in aggregate for any one month during the product term., including tranches won for the Class in prior solicitations. If a tie were to remain, it would be broken by random selection.

I.1.175.VII.2.15. An RFP Bidder acting in concert with another RFP Bidder may be disqualified by the Independent Evaluator on behalf of the Company in its sole and exclusive discretion. The RFP Bidder will be considered to have made a material misrepresentation in its Part 2 Proposal and payment under the Pre-Bid Letter of Credit can be demanded by PECO.

I.1.176. For each product in this solicitation, a Default Supplier will be paid a supplier-specific price for each MWh of electric load served as specified in the Transaction Confirmation for that product. The supplier-specific price will be the average of approved Bids for that product.

VII.3. Post-Bid Process

I.1.177. The winning RFP Bidders and PECO must execute the Uniform SMAs and Transaction Confirmations within three (3) days of acceptance of the results by the Commission.

I.1.178. PECO can collect on the Pre-Bid Letter of Credit if a winning RFP Bidder does not execute the Uniform SMA and all Transaction Confirmations, or if the winning RFP Bidder does not fulfill the creditworthiness requirements in the required timeframe.

I.1.179.VII.3.1. The Independent Evaluator phones each RFP Bidder that has submitted Bids by ~~6~~3 PM on the Bid Date and identifies the RFP Bidder's Bids that are provided to the Commission as ~~winning~~lowest-priced Bids. The Independent Evaluator also identifies the RFP Bidder's lowest-priced Bids that the Independent Evaluator will be recommending for approval by the Commission in its confidential report. The Independent Evaluator also provides a notification to the RFP Bidder by email.

I.1.180.VII.3.2. An RFP Bidder that: (i) is not a Default Supplier; and (ii) has Bids that are identified to the Commission as ~~winning~~lowest-priced Bids; and (iii) did not provide the necessary information to prepare the Uniform SMA with the Part 1 Proposal, will receive a notification from the Independent

Evaluator on the Bid Date. This notification will require that such RFP Bidder provide all information needed to prepare the Uniform SMA by 12 PM (noon) on the next day. The Independent Evaluator uses this information to prepare the Uniform SMA for each such RFP Bidder.

~~I.1.181.~~VII.3.3. An RFP Bidder that: (i) relies on the financial standing of an RFP Guarantor; (ii) has Bids that are identified to the Commission as ~~winning~~lowest-priced Bids; and (iii) did not provide the information necessary to prepare the guaranty with the Part 1 Proposal will receive a notification from the Independent Evaluator on the Bid Date. This notification will require that such RFP Bidder provide all information needed to prepare the guaranty by 12 PM (noon) on the next day. The Independent Evaluator uses this information to prepare the guaranty for each such RFP Bidder.

VII.3.4. The Independent Evaluator presents the results of the solicitation to the Commission on the business day after the Bid Date in a confidential report. ~~This confidential report will include the winning Bids identified during the evaluation.~~ This confidential report will include the lowest-priced Bids identified during the evaluation as well as a recommendation from the Independent Evaluator on whether or not the lowest-priced Bids should be approved. The Independent Evaluator will not recommend approval for lowest-priced Bids for a Residential product that cause the average of the lowest-priced Bids to exceed the reserve price for that product. The reserve price is calculated separately for each Residential product on the basis of the best available market data and is provided to the Commission on a confidential basis. Neither the method for calculation of the reserve price or the level of the reserve price is provided to RFP Bidders.

~~I.1.182.~~VII.3.5. The Commission will have one (1) business day to consider the report of the Independent Evaluator and to approve or reject each of the ~~winning~~lowest-priced Bids. The Commission may reject Bids that the Independent Evaluator recommended be approved and the Commission may approve Bids that the Independent Evaluator recommended be rejected. If the Commission does not act within one (1) business day, the ~~winning~~lowest-priced Bids are deemed to be approved.

VII.3.6. For each product, a Default Supplier will be paid a supplier-specific price for each MWh of electric load served as specified in the Transaction Confirmation for that product. The supplier-specific price will be the average of approved Bids for that product and that Default Supplier.

VII.3.7. The winning RFP Bidders and PECO must execute the Transaction Confirmations and Uniform SMAs (if applicable) within five (5) business days of the Bid Date.

VII.3.8. PECO can collect on the Pre-Bid Letter of Credit if a winning RFP Bidder does not execute the Uniform SMA and all Transaction Confirmations, or if the winning RFP Bidder does not fulfill the creditworthiness requirements in the required timeframe.

~~I.1.183.~~VII.3.9. On the day that the Commission approves some or all of the ~~winning~~ lowest-priced Bids, the Independent Evaluator notifies all RFP Bidders that have ~~approved~~lowest-priced Bids. Such RFP Bidders are called Default Suppliers. When referring specifically to RFP Bidders that are not already Default Suppliers, the term New Default Suppliers will be used. When referring specifically to RFP Bidders that are already Default Suppliers, the term Existing Default Suppliers will be used.

~~I.1.184.~~VII.3.10. On the day the Commission approves some or all of the ~~winning~~lowest-priced Bids, the Independent Evaluator provides to PECO the name of each Default Supplier, the number of tranches won by each Default Supplier, and the Default Supplier's price for each product. The price for each such Default Supplier and for a given product is the average of the Default Supplier's approved Bids for that product in this solicitation.

~~I.1.185.~~VII.3.11. On the day the Commission approves some or all of the ~~winning~~lowest-priced Bids, the Independent Evaluator sends to PECO by secure file transfer the Uniform SMA, including all Exhibits, for each New Default Supplier. On the same day, the Independent Evaluator sends to PECO by secure file transfer the guaranty for each New Default Supplier relying on the financial standing of an RFP Guarantor. The Independent Evaluator also sends to PECO by secure file transfer the most current contact information that the Independent Evaluator has for each Default Supplier.

~~I.1.186.~~VII.3.12. On the business day following the Commission approval of some or all of the ~~winning~~lowest-priced Bids, PECO prepares ~~one (1)~~a Transaction Confirmation (Exhibit 1 of the Uniform SMA) for each product and Default Supplier. PECO partially executes ~~two (2) originals of~~ each Transaction Confirmation for each Default Supplier and each product~~.~~ using a digital signature. PECO also partially executes ~~two (2) originals of~~ the Uniform SMA with each New Default Supplier using a digital signature.

~~I.1.187.~~VII.3.13. By 12PM on the second business day following the Commission approval of some or all of the ~~winning~~lowest-priced Bids, PECO sends by email:

- ~~One (1) copy of the signature page~~An electronic version of the Uniform SMA ~~(page 75) and one (1) copy of the signature page of Exhibit 3, the PJM Declaration of Authority (page 9) by email~~, including all Exhibits, to each New Default Supplier;
- ~~One (1) copy~~An electronic version of the partially executed Transaction Confirmation ~~by email~~ to each Default Supplier for each product for which the Default Supplier has won tranches; and
- ~~The~~ An electronic version of the guaranty ~~by email~~ to each New Default Supplier relying on the financial standing of an RFP Guarantor.

PECO also informs each Default Supplier of its specific creditworthiness requirements. No hardcopy versions will be provided by overnight delivery service.

~~I.1.188. By close of the second business day following the Commission approval of some or all of the winning Bids, PECO sends by overnight delivery service:~~

- ~~The two (2) originals of the partially executed Uniform SMA, including all Exhibits, to each New Default Supplier; and~~
- ~~Two (2) original partially executed Transaction Confirmations to each Default Supplier for each product for which such Default Supplier has approved Bids.~~

~~I.1.189.~~VII.3.14. By 2PM on the third business day following Commission approval of some or all of the ~~winning~~lowest-priced Bids:

- Each New Default Supplier partially executes the ~~two (2) originals of the~~ Uniform SMA ~~and the two (2) originals of~~, including signing Exhibit 3~~,~~ and the PJM Declaration of Authority ~~and returns one (1) copy of these~~, using a digital signature ~~pages~~and returns an electronic version to PECO by email;
- Each Default Supplier partially executes the ~~two (2) originals of the~~ Transaction ~~Confirmations and returns one (1) copy of the~~Confirmation(s) using a digital signature ~~page~~and returns an electronic version to PECO by email; and

- Each New Default Supplier relying on the financial standing of an RFP Guarantor executes the guaranty ~~sent by email~~ using a digital signature and returns ~~one (1) copy of the signature page of the guaranty~~an electronic version to PECO by email.

No hardcopy versions should be mailed.

~~I.1.190.~~ By close of the third business day following Commission approval of some or all of the ~~winning~~lowest-priced Bids~~:~~

- ~~Each New Default Supplier returns by overnight delivery service to PECO one (1) original of the Uniform SMA, including all Exhibits;~~
- ~~Each Default Supplier returns by overnight delivery service to PECO one (1) original of the Transaction Confirmation; and~~

VII.3.15. ~~Each~~, each Default Supplier complies with all instructions from PECO to fulfill the creditworthiness requirements under the Uniform SMA.

~~I.1.191.~~VII.3.16. Following receipt of ~~originals~~documents by PECO:

- PECO and each New Default Supplier have ~~one (1)~~a fully executed ~~original of the~~ Uniform SMA ~~and of~~, Exhibit 3, ~~the~~ PJM Declaration of Authority, as well as all other Exhibits; and
- PECO and each Default Supplier have ~~one (1)~~a fully executed ~~original of a~~ Transaction Confirmation for each product for which the Default Supplier has approved Bids~~;~~.

~~I.1.192.~~VII.3.17. As provided in the Commission's directive dated October 12, 2010 (Docket No. M-2009-2082042), the Independent Evaluator will release, within fifteen (15) days of the ~~close of the solicitation~~Bid Date, the weighted average price and the percentage of load represented by each tranche for each product procured through this RFP. The Independent Evaluator will issue an announcement on behalf of PECO with this information and the announcement will also be posted to the RFP website.

~~I.1.193.~~VII.3.18. Within fifteen (15) days of the full execution of the Uniform SMA, the Independent Evaluator provides to PECO a report on the solicitation. This report is based on the confidential report provided to the Commission, except that no losing bid information specific to a particular RFP Bidder is provided and that any information that an RFP Bidder may consider confidential or proprietary is also redacted.

~~I.1.194.~~VII.3.19. As provided in the PaPUC's directive dated October 12, 2010 (Docket No. M-2009-2082042), PECO will continue to provide a default service rate calculation model. The model shows the methodology for translating RFP results into default service rates. ~~This~~A separate tool or illustrative example will be provided for determination of TOU rates. The calculation model is posted to the PECO website:

https://www.peco.com/MyAccount/MyService/Pages/ElectricPricetoCompare.aspx

VII.4. Personnel and Confidentiality

~~I.1.195.~~VII.4.1. Any information provided by an RFP Bidder in its Part 1 Proposal is provided on a confidential basis to the Independent Evaluator and may be provided on a confidential basis to the Commission Staff. PECO representatives will review the information provided to fulfill the requirements of Section IV.2~~IV.2~~, Section IV.3, and Section IV.5 and will participate in the evaluation of the creditworthiness of each RFP Bidder.

~~I.1.196.~~VII.4.2. Any information provided by an RFP Bidder in its Part 2 Proposal is provided on a confidential basis to the Independent Evaluator, and may be provided on a confidential basis to the Commission Staff. PECO representatives will review the Pre-Bid Letter of Credit with the name of the RFP Bidder and the amount redacted and will participate in the evaluation of this Pre-Bid Letter of Credit. PECO representatives will also review the documents provided to fulfill the requirements of Section ~~V.4~~V.4 and Section V.5.

~~I.1.197.~~VII.4.3. The Independent Evaluator and representatives from PECO involved in the evaluation of Proposals will consider all data and information provided by RFP Bidders in response to this RFP to be confidential and will attempt to limit its disclosure to the public in accordance with the provisions of this ~~Section~~section. PECO will also take reasonable action to ensure that its employees, representatives and agents authorized to consider and evaluate all Proposals protect the confidentiality of such data and information. Each representative of the Independent Evaluator and PECO that has access to any portion of the Proposals is required to sign a Confidentiality Statement

in the form of Appendix 12 to these RFP Rules prior to evaluation of any portion of the Proposals. The list of all signatories is available to an RFP Bidder upon request.

~~I.1.198.~~VII.4.4. However, absolute protection from public disclosure of the RFP Bidders' data and information filed in response to this RFP cannot be provided and is not intended. By submitting a Proposal in response to this RFP, each RFP Bidder acknowledges and agrees to the limitations of the confidentiality provisions set forth in this ~~Section~~section.

~~I.1.199.~~VII.4.5. In addition, the RFP Bidders' data and information filed in response to the RFP will be disclosed if required by any federal, state or local agency (including, without limitation, the Commission) or by a court of competent jurisdiction. PECO or the Independent Evaluator will notify the RFP Bidder in advance of such disclosure and cooperate with such RFP Bidder, to the extent deemed reasonable by PECO, and at the expense of the RFP Bidder, to prevent the disclosure of such materials. In any event, PECO, its employees, and agents including the Independent Evaluator will not be responsible to the RFP Bidders or any other party or liable for any disclosure of such designated materials before, during or subsequent to this RFP.

ARTICLE VIII. Reserved Rights

~~I.1.200.~~VIII.1.1. PECO will not be liable to any RFP Bidder or any other party for failure to execute a Uniform SMA or any Transaction Confirmation. Nothing herein may be construed to bind PECO unless and until the Commission has approved ~~winning~~lowest-priced Bids, and the Uniform SMA and each Transaction Confirmation with an approved Default Supplier has been executed and is effective. Once effective, it is the Uniform SMA and not the RFP Rules or any documents relating thereto that will govern the relationship between and the responsibilities of the parties.

~~I.1.201.~~VIII.1.2. The Independent Evaluator reserves the right to reject Proposals submitted in response to this RFP that are incomplete, or do not conform with the requirements of this RFP, or are submitted

beyond the deadline for submission, or are submitted by an RFP Bidder that tries to unduly influence in any way the evaluation process.

~~MARCH 2021 Solicitation~~

~~I.1~~

I.1. Auction Schedule

The schedule for this solicitation is below. All times in this schedule are Eastern Prevailing Time ("EPT") unless specifically noted.

Table 1. Schedule

Event	Timing
Deadline to request consideration of an alternate form of guaranty	Tuesday, January ~~26, 2021~~28, 2025
Bidder Information Webcast	Friday, February ~~5, 2021~~7, 2025
Decision on alternate guaranty forms (if any)	Friday, February ~~12, 2021~~14, 2025
Part 1 Window Opens	Wednesday, February ~~17, 2021~~19, 2025
Part 1 Date (Part 1 Window Closes)	Tuesday, February ~~23, 2021~~25, 2025
Part 1 Notification Date	Thursday, February ~~25, 2021~~27, 2025
Approved modifications to Standard Guaranty posted	Friday, February ~~26, 2021~~28, 2025
Part 2 ~~Proposal~~ Window Opens	Friday, February ~~26, 2021~~28, 2025
Bid Submission training	~~Monday~~Wednesday, March ~~1, 2021~~5, 2025
Part 2 Date (Part 2 Window Closes)	Thursday, March ~~4, 2021~~6, 2025
Part 2 Notification Date	Monday, March ~~8, 2021~~10, 2025
Bid Date (Bids are Due)	Tuesday, March ~~9, 2021~~11, 2025
IE provides its report to the PaPUC	Wednesday, March ~~10 2021~~12, 2025
PaPUC Decision (close of business)	Thursday, March ~~11, 2021~~13, 2025

Event	Timing
If Bids are approved by the PaPUC:	
PECO sends partially executed Uniform SMA and Transaction Confirmation(s) {by ~~overnight delivery service (by close of business~~12PM on the fourth business day after the Bid Date)	Monday, March ~~15, 2021~~17, 2025
Uniform SMA and Transaction Confirmation(s) fully executed (by 2PM on the fifth business day after the Bid Date)	Tuesday, March ~~16, 2021~~18, 2025
Default Service Supplier meets the creditworthiness requirements (by close of the fifth business day after the Bid Date)	Tuesday, March ~~16, 2021~~18, 2025

Inserted Cells

I.2. ~~I.2 Updated~~ Size of a Tranche for Default Load and Products Available

The total number of tranches, Load Caps, and the percentage size of each tranche to be procured under DSP ~~V~~VI are shown in the table below. The Total Peak (MW), Default Peak (MW), and MW-Measure of each tranche have been updated for this solicitation and are also provided in Table 2.

Table 2. Number of Tranches and Size of a Tranche for Default Load.

DSP ~~V~~VI				Updated for March ~~2021~~2025 Solicitation		
Class	**Total Tranches**	**Load Cap**	**% Size of a Tranche**	**Total Peak (MW)**	**Default Peak (MW)**	**MW-Measure of a Tranche**
RES	62	31	1.60%	3,~~777.68~~982.83	~~2,641.22~~3,099.78	~~42.17~~49.50
SC	24	12	4.17%	1,~~086.36~~044.70	~~482.47~~515.16	~~20.10~~21.46
CCI	8	~~4~~6	12.50%	3,~~162.98~~013.90	~~190.54~~206.07	~~23.82~~25.76

The products and number of tranches available in this solicitation are provided in Table 3. A product for purposes of this RFP is defined by three characteristics: a) the Class to which it contributes Default Supply; b) the length of the supply period; and c) the date at which the supply period begins. For example, the RES-12-~~Jun21~~Jun25 product represents Default Supply for the RES Class for the supply period from June 1, ~~2021~~2025 through May 31, ~~2022~~2026.

Table 3. Products and Number of Tranches Available.

Product	Tranches Available
RES-12-~~Jun21~~Jun25	12
RES-24-~~Jun21~~Jun25	11
SC-12-~~Jun21~~Jun25	6
SC-24-~~Jun21~~Jun25	3
CCI-12-~~Jun21~~Jun25	8

~~I.2~~

I.3. Load Caps for Products Available

Each Class has "Load Caps", which are limits on the number of tranches of Default Supply that an RFP Bidder can bid and serve for that Class. The Load Caps ensure that there will be a diversified pool of Default Suppliers for each Class. The Load Caps for ~~a Class~~the RES and SC Classes are set so that the Default Service customers of that Class have no more than a 50% exposure to any one Default Supplier at any given time. The Load Cap for the CCI Class is set so that the Default Service customers of that Class have no more than a 75% exposure to any one Default Supplier at any given time. The Load Caps in this solicitation are provided here:

Table 4. Available Tranches and Load Caps (March ~~2021~~2025 Solicitation; RES Class).

Products	Available Tranches	Load Caps Apply to an RFP Bidder When an RFP Bidder Has:	Load Caps for RES Class
RES-12-~~Jun21~~Jun25	12	Won more than 19 RES-24-~~Dec19~~Dec23, RES-24-~~Jun20~~Jun24, RES-12-~~Dec20~~Dec24, and RES-24-~~Dec20~~Dec24 tranches under DSP ~~IV~~V	31 less RES-24-~~Dec19~~Dec23, RES-24-~~Jun20~~Jun24, RES-12-~~Dec20~~Dec24, and RES-24-~~Dec20~~Dec24 tranches won under DSP ~~IV~~V
RES-24-~~Jun21~~Jun25	11	Won more than 20 RES-24-~~Dec19~~Dec23, RES-24-~~Jun20~~Jun24, RES-12-~~Dec20~~Dec24, and RES-24-~~Dec20~~Dec24 tranches under DSP ~~IV~~V	

Table 5. Available Tranches and Load Caps (March ~~2021~~2025 Solicitation; SC and CCI Classes).

Products	Available Tranches	Load Caps Apply to an RFP Bidder When an RFP Bidder Has:	Load Caps
SC-12-~~Jun21~~Jun25	6	Won more than 6 tranches of SC-24-~~Dec19~~Dec23, SC-24-~~Jun20~~Jun24, SC-12-~~Dec20~~Dec24, and SC-24-~~Dec20~~Dec24 under DSP ~~IV~~V	12 less SC-24-~~Dec19~~Dec23, SC-24-~~Jun20~~Jun24, SC-12-~~Dec20~~Dec24, and SC-24-~~Dec20~~Dec24 tranches won under DSP ~~IV~~V
SC-24-~~Jun21~~Jun25	3	Won more than 9 tranches of SC-24-~~Dec19~~Dec23, SC-24-~~Jun20~~Jun24, SC-12-~~Dec20~~Dec24, and SC-24-~~Dec20~~Dec24 under DSP ~~IV~~V	
CCI-12-~~Jun21~~Jun25	8	Load Caps apply always	~~4~~6

- The Load Cap for the RES Class will apply as follows. An RFP Bidder is limited to 31 tranches of the RES-24-~~Dec19~~Dec23, RES-24-~~Jun20~~Jun24, RES-12-~~Dec20~~Dec24, RES-24-Dec24, RES-12-Jun25, and RES-24-~~Dec20~~Jun25 products combined, including tranches of these products won in previous solicitations and tranches bid for the RES-12-~~Jun21~~Jun25 and RES-24-~~Jun21~~Jun25 products in this solicitation.
- The Load Cap for the SC Class will apply as follows. An RFP Bidder is limited to 12 tranches ~~for~~of the SC-~~12-Dec19, SC-~~24-~~Jun20~~Dec23, SC-24-Jun24, SC-12-~~Dec20~~Dec24, SC-24-~~Dec20~~Dec24, SC-12-Jun25, and SC-24-Jun25 products combined, including tranches of these products won in previous solicitations and tranches bid for the SC-12-~~Jun21~~Jun25 and SC-24-~~Jun21~~Jun25 products in this solicitation.
- The Load Cap for the CCI Class will apply as follows. In this solicitation, an RFP Bidder is limited to ~~4~~6 tranches for the CCI-12-~~Jun21~~Jun25 product.

PECO Exhibit KO-3
Redline of Appendix 0 Addendum to the RFP Rules

Appendix 1
PECO Energy Company
Pennsylvania Default Service Supplier Master Agreement

See PECO Exhibit SD-3

Appendix 2 – Alternate Guaranty Process–

The Alternate Guaranty Process allows a prospective supplier unable to use the standard format of the guaranty provided as Appendix G to the PECO Energy Company Pennsylvania Default Service Supplier Master Agreement ("Uniform SMA") to submit for consideration by PECO Energy Company ("PECO") an alternate guaranty form that the prospective supplier uses in its normal course of business.

Any prospective supplier can apply to use an alternate guaranty form. Any alternate guaranty form, as is the case with the standard format of the guaranty of the Uniform SMA, must be a financial guaranty. While alternate forms of financial guaranty may be acceptable, performance guaranties are not acceptable.

Process and Ground Rules

The process for submitting an alternate guaranty form and the ground rules for PECO's consideration of alternate guaranty forms are as follows:

1. A prospective supplier wishing to have PECO evaluate an alternate guaranty form must initiate the process by making a request for such consideration to the Independent Evaluator no later than fifteen (15) business days prior to the opening of the Part 1 Window. Within three (3) business days of receipt of such a request, the Independent Evaluator will issue a timetable for receipt of the materials from the prospective supplier and for consideration of these materials by PECO.

2. PECO will consider alternate guaranty forms only if the guaranty is for unlimited liability. (A prospective supplier can utilize the safe harbor provided by the Standard Guaranty, which has a liability limit.)

3. PECO has specified a list of minimum requirements that any alternate guaranty form must satisfy. This list is under the heading: "Minimum Requirements for the Alternate Guaranty Form" below.

4. The Independent Evaluator will receive the alternate guaranty form, remove any information identifying the prospective supplier, and forward it to PECO and to outside counsel retained on behalf of PECO. PECO will determine, with the consultation of outside counsel and the Independent Evaluator as necessary, whether the alternate guaranty form provides sufficient assurances of payment, taking into account the following general considerations:

    a. whether the alternate guaranty form conforms to the minimum requirements identified by PECO;

    b. whether the alternate guaranty form, which is not subject to a monetary limit, provides– credit protections comparable to the credit protections provided to PECO by the Standard Guaranty; and

    c. whether the alternate guaranty form includes defenses in favor of the guarantor not found in the Standard Guaranty.

    PECO may also identify specific changes that would permit the alternate guaranty form to be acceptable.

The Independent Evaluator will inform the prospective supplier of PECO's decision. The Independent Evaluator will inform the prospective supplier of any specific changes that may be required for the proposed alternate guaranty form to be acceptable to PECO. Prospective suppliers will be given an opportunity to resubmit the alternate guaranty form if changes are identified by PECO. Alternate guaranty forms that have been resubmitted may be rejected if they do not include the changes identified by PECO.

5. An alternate guaranty form approved through this Guaranty Process will be acceptable to PECO. This alternate guaranty form may be used by the prospective supplier through the end of DSP ~~V~~VI barring changes in the applicable law or changes to the RFP as may be ordered by the Pennsylvania Public Utility Commission.

Minimum Requirements for the Alternate Guaranty Form

Below are the minimum requirements that must be met in order for any alternate guaranty form to be acceptable. As stated above, in determining whether an alternate guaranty form is acceptable and provides sufficient assurances of payment, PECO takes into account several general considerations, including whether the alternate guaranty form fulfills the following minimum requirements:

1. The guaranty must be an unconditional guaranty of payment of all amounts due by the Seller to PECO under the applicable SMA(s), i.e., the Uniform SMA and any previously entered Default Service SMA(s). To clarify the meaning of the term "unconditional guaranty of payment", sample language is provided in the last section of this document. The applicable SMA(s) must be expressly identified and the satisfaction of obligations through performance may not be authorized.

2. The guaranty may be terminated upon no less than thirty (30) calendar days advance written notice to PECO and termination will not discharge liabilities and obligations of the guarantor that have been incurred up to and including the effective date of the termination. The termination of an alternate guaranty will be effective only upon the receipt of substitute security or credit support that is acceptable to PECO.

3. The guaranty must not be subject to any monetary limit.

4. The guaranty must be accompanied by a certification from the guarantor that the alternate guaranty form, subject to changes needed to conform to the minimum requirements specified herein or to the specific changes identified by PECO, has been in general use by the prospective supplier in its ordinary course of business over the past twelve (12) months.

5. The guaranty must be a guaranty of payment and not of collection.

6. Assignment of the guaranty will not be permitted except with the prior written consent of PECO, except in the case of a Successor Guarantor as defined below (see sample assignment language).

7. The prospective supplier must provide an enforceability opinion with respect to the alternate guaranty form from its outside counsel. The enforceability opinion must be from a law firm of national (i.e., United States) standing. The prospective supplier must name the law firm that is offering the enforceability opinion in its submission. The enforceability opinion must not be weaker than would be the industry norm and must contain only those qualifications that would be typical. The opinion will name PECO and explicitly state that PECO is entitled to rely on the opinion.

The enforceability opinion must not be qualified by or conditioned on any of the following:

a. the valid existence and good standing of the parties to the Uniform SMA;

b. the power and authority of the prospective supplier and guarantor to execute, deliver, and perform their respective agreements;

c. due execution of the Uniform SMA and the alternate guaranty form; or

d. that the Uniform SMA is legal, valid, binding, and enforceable against all parties.

At the time that the prospective supplier submits its alternate guaranty form and supporting documentation, the opinion may be unsigned. If the prospective supplier becomes an RFP Bidder, the RFP Bidder will be required to submit, with its Part 2 Proposal, the enforceability opinion exactly as approved, duly signed, and on letterhead of a law firm of national standing.

Sample Language

The process for submission of alternate guaranty forms is designed to give prospective suppliers some flexibility while at the same time assuring adequate credit protection for PECO and its customers. PECO provides sample language below for the purpose of clarifying certain aspects of the minimum requirements for alternate guaranty forms. This language is not required, but would be deemed acceptable to PECO. PECO reserves the right to reject alternate guaranty forms that do not contain language that, in PECO's view, provides substantially comparable protections to the language set forth below.

Subject	**Sample Language**
Unconditional Guaranty	"Guarantor agrees that its obligations hereunder are unconditional and will not be discharged except by complete payment of all amounts due under the Uniform SMA, irrespective of any claim or dispute as to the Uniform SMA's validity, regularity or enforceability, or the lack of authority of the RFP Bidder to enter into the Uniform SMA."
Assignment	"Guarantor may not assign its rights nor delegate its obligations under this Guaranty, in whole or in part, without the prior written consent of PECO, and any purported assignment or delegation absent such consent is void, except for an assignment and delegation of all of Guarantor's rights and obligations hereunder to a Successor Guarantor. For purposes of this paragraph, a "Successor Guarantor" means a partnership, corporation, trust or other organization in whatever form that succeeds to all or substantially all of the Guarantor's assets and business and that assumes all of the Guarantor's obligations hereunder by contract or operation of law; provided, that, such Successor Guarantor will have a long-term unsubordinated debt rating that is not lower than the lesser of (i) A2/A or (ii) the rating of the Guarantor immediately prior to such assumption."

APPENDIX 3 – ILLUSTRATIVE STANDARD PART 1 FORM DEFAULT SERVICE PROGRAM REQUEST FOR PROPOSALS

PECO Energy Company ("Company" or "PECO") is intending to obtain full requirements electric supply to meet a portion of its obligations as Default Service Provider through this Request for Proposals ("RFP").

Before completing this online Part 1 Form, please review the RFP, including the PECO Energy Company Pennsylvania Default Service Supplier Master Agreement ("Uniform SMA"), so that you understand the conditions under which the RFP will be conducted. These documents are posted at www.PECOprocurement.com.

By submitting a Part 1 Proposal in response to this RFP, you are agreeing to all terms and conditions of this RFP.

Any information provided by an RFP Bidder in this Part 1 Proposal is provided on a confidential basis to the Independent Evaluator, and may be provided on a confidential basis to the Staff of the Pennsylvania Public Utility Commission. PECO representatives will review financial information and will participate in the evaluation of the creditworthiness of each RFP Bidder. Information regarding the content or status of any Part 1 Proposal will not be released publicly or to any individual RFP Bidder during the evaluation process.

STANDARD PART 1 FORM

1. Contact Information and Representations

First Item: Name and Address of the RFP Bidder

PLEASE PROVIDE THE RFP BIDDER'S LEGAL NAME AND ADDRESS.

Legal Name of RFP Bidder

Street Address Line 1

Street Address Line 2

City | *State* | *Zip Code*

Second Item: Officer of the RFP Bidder

The Officer of the RFP Bidder must be an officer, a director, or an individual otherwise authorized to undertake contracts (including the Uniform SMA) and bind the RFP Bidder. The Officer of the RFP Bidder whose contact information is provided in this online Part 1 Form must:

- make all representations required by the Part 1 Proposal requirements; and
- make all representations required by the Part 2 Proposal requirements.

PLEASE PROVIDE THE NAME AND CONTACT INFORMATION FOR THE OFFICER OF THE RFP BIDDER.

First Name | *Last Name*

Title

Street Address Line 1

Street Address Line 2

City | *State* | *Zip Code*

Business Phone No. | *Cell Phone No.* | *Email Address*

Inserted Cells

Inserted Cells

Third Item: Representative of the RFP Bidder

The Independent Evaluator uses the Representative as the main point of contact for the RFP Bidder.

PLEASE PROVIDE THE NAME AND CONTACT INFORMATION FOR THE REPRESENTATIVE OF THE RFP BIDDER. The Officer of the RFP Bidder may also serve as the Representative.

First Name *Last Name*

Title

Street Address Line 1

Street Address Line 2

City *State* *Zip Code*

Business Phone No. *Cell Phone No. ~~(optional)~~* *Email Address*

THE OFFICER OF THE RFP BIDDER MUST DESIGNATE THE INDIVIDUAL NAMED ABOVE TO SERVE AS THE REPRESENTATIVE OF THE RFP BIDDER BY COMPLETING THE REPRESENTATIVE INSERT. The Representative Insert is also labelled INSERT #P1-1.

PLEASE REFER TO THE REPRESENTATIVE INSERT (#P1-1) FOR THE ACCEPTABLE METHODS TO COMPLETE AND SUBMIT THIS INSERT. IF THIS INSERT IS NOT COMPLETED WITH A DIGITAL SIGNATURE, IT MUST BE SENT BY EMAIL TO THE INDEPENDENT EVALUATOR AT PECOPROCUREMENT@NERA.COM BY THE SIGNATORY (HERE THE OFFICER OF THE RFP BIDDER) OR WITH THE SIGNATORY ON COPY.

Name of RFP Bidder

REPRESENTATIVE INSERT (#P1-1)

THE INDEPENDENT EVALUATOR IS ACCEPTING A DIGITAL SIGNATURE FOR THIS INSERT. THE INDEPENDENT EVALUATOR IS ALSO ACCEPTING AN ELECTRONIC SIGNATURE OR A SCANNED WET SIGNATURE AS LONG AS THIS INSERT IS SENT BY EMAIL BY THE SIGNATORY OR WITH THE SIGNATORY ON COPY.

This Insert may be completed as follows:

- *Submitted with a digital signature (using commercially available software such as DocuSign) with an accompanying document or information verifying the identity of the signatory.*

If completed with a digital signature, this Insert and accompanying document or information may be uploaded to the online Part 1 Form or may be sent by email to the Independent Evaluator at PECOProcurement@NERA.com.

This Insert may also be completed as follows:

- *Submitted with a scanned wet signature;*

or

- *Submitted with an electronic signature (such as an image of a signature).*

If completed with a scanned or electronic signature, this Insert must be sent by email to the Independent Evaluator at PECOProcurement@NERA.com by the signatory (here the Officer of the RFP Bidder) or with the signatory on copy.

THE OFFICER OF THE RFP BIDDER MUST DESIGNATE THE INDIVIDUAL WHOSE CONTACT INFORMATION IS PROVIDED IN THE ONLINE PART 1 FORM AS THE REPRESENTATIVE.

I, _____ (the Officer of the RFP Bidder), hereby designate _____ (name of the Representative) to serve as the Representative of the RFP Bidder.

_____ _____
Signature of Officer Date

Fourth Item: Nominees

The Independent Evaluator provides notifications to the RFP Bidder by email and provides documents needed for participation by secure file transfer. Any such notification will be deemed received by the RFP Bidder at the time of delivery or transmission, provided that where delivery or transmission occurs after 6 PM on a business day or occurs on a day that is not a business day, receipt will be deemed to occur at 9 AM on the following business day.

The RFP Bidder may designate up to three (3) authorized individuals (each called a "Nominee") to receive communications from the Independent Evaluator in addition to the Representative. The RFP Bidder may make such a designation at any time during the solicitation.

Is the RFP Bidder designating Nominees at this time?
☒ **Yes** ☐ **No**

THE REPRESENTATIVE OF THE RFP BIDDER OR THE OFFICER OF THE RFP BIDDER DESIGNATES NOMINEES BY COMPLETING THE NOMINEE INSERT. The Nominee Insert is also labelled INSERT #P1-2.

PLEASE REFER TO THE NOMINEE INSERT (#P1-2) FOR THE ACCEPTABLE METHODS TO COMPLETE AND SUBMIT THIS INSERT. IF THIS INSERT IS NOT COMPLETED WITH A DIGITAL SIGNATURE, IT MUST BE SENT BY EMAIL TO THE INDEPENDENT EVALUATOR AT PECOPROCUREMENT@NERA.COM BY THE SIGNATORY (HERE THE OFFICER OF THE RFP BIDDER OR THE REPRESENTATIVE OF THE RFP BIDDER) OR WITH THE SIGNATORY ON COPY.

_____
Name of RFP Bidder

~~NOMINEE INSERT (#P1-2)~~ **NOMINEE INSERT (#P1-2)**

THE INDEPENDENT EVALUATOR IS ACCEPTING A DIGITAL SIGNATURE FOR THIS INSERT. THE INDEPENDENT EVALUATOR IS ALSO ACCEPTING AN ELECTRONIC SIGNATURE OR A SCANNED WET SIGNATURE AS LONG AS THIS INSERT IS SENT BY EMAIL BY THE SIGNATORY OR WITH THE SIGNATORY ON COPY.

This Insert may be completed as follows:

- *Submitted with a digital signature (using commercially available software such as DocuSign) with an accompanying document or information verifying the identity of the signatory.*

If completed with a digital signature, this Insert and accompanying document or information may be uploaded to the online Part 1 Form or may be sent by email to the Independent Evaluator at PECOProcurement@NERA.com.

This Insert may also be completed as follows:

- *Submitted with a scanned wet signature;*

or

- *Submitted with an electronic signature (such as an image of a signature).*

If completed with a scanned or electronic signature, this Insert must be sent by email to the Independent Evaluator at PECOProcurement@NERA.com by the signatory (here the Officer of the RFP Bidder or the Representative of the RFP Bidder) or with the signatory on copy.

Please note! **This insert is optional.**

I, _____ (the Officer of the RFP Bidder or the Representative of the RFP Bidder), authorize the individuals whose contact details are immediately below to receive communications from the Independent Evaluator and to act on behalf of the RFP Bidder during the Proposal submission process.

Signature _____ Date _____

Contact Information for Nominee #1

Notes (*optional*)

The RFP Bidder may provide additional information here, such as the period during which a particular individual will act as Nominee or the individual that a Nominee is replacing.

2. Financial Requirements and Agency Agreements

First Item: Agency Agreement

Is the RFP Bidder submitting a Proposal under an Agency Agreement?
☐ **Yes** ☐ **No**

If Yes, the RFP Bidder must elect a Principal as the entity on whose financial standing it is relying in responding to the next item.

Second Item: Election of Entity on Whose Financial Standing the RFP Bidder Is Relying

PLEASE SELECT THE ENTITY UPON WHOSE FINANCIAL STANDING THE RFP BIDDER IS RELYING AS REQUIRED BY PARAGRAPH IV.2.2 OF THE RFP RULES:

☐ **(a)** the RFP Bidder is relying on its own financial standing.
☐ **(b)** the RFP Bidder is relying on the financial standing of a guarantor.
☐ **(c)** the RFP Bidder is submitting a Proposal under an Agency Agreement and the RFP Bidder is relying on the financial standing of a Principal.

2.a. Financial and Credit Requirements

The RFP Bidder is the entity on whose financial standing the RFP Bidder is relying.

First Item: Financial Information

IF AVAILABLE, PLEASE PROVIDE THE MOST RECENT QUARTERLY FINANCIAL INFORMATION FOR THE RFP BIDDER, including a balance sheet, income statement, cash flow statement, and any accompanying notes and schedules:

- **IF AVAILABLE, YOU MUST PROVIDE THE MOST RECENT SECURITIES AND EXCHANGE COMMISSION ("SEC") FORM 10-Q OR 10-K (WHICHEVER IS MORE RECENT) TO FULFILL THIS REQUIREMENT;**
- **IF THE SEC FORM 10-Q OR 10-K IS UNAVAILABLE, PLEASE PROVIDE, IF AVAILABLE, THE RFP BIDDER'S MOST RECENT QUARTERLY, MONTHLY, OR BI-ANNUAL FINANCIAL INFORMATION** accompanied by an attestation by the Chief Financial Officer (or similar position) that the information contained in the financial statements fairly presents in all material respects the financial condition and results of the operations of the RFP Bidder. The requirements for this attestation are provided more specifically in Appendix 5 of the RFP Rules.

	Most recent quarterly financial information (or, if unavailable, most recent monthly or bi-annual financial information accompanied by an attestation by the Chief Financial Officer) **IF THE INFORMATION IS UNAVAILABLE, PLEASE SO STATE IN THE JUSTIFICATION OF OMISSIONS SECTION.**

	Attestation from Chief Financial Officer if necessary.

Second Item: Credit Ratings

PLEASE PROVIDE ALL AVAILABLE CREDIT RATINGS FOR THE RFP BIDDER.

Is the RFP Bidder rated by S&P Global Ratings ("S&P")?

☒ **Yes** ☐ **No**

RFP Bidder's rating: ____
Type of rating (**check one**): ☐ Senior unsecured debt rating ☐ Corporate issuer rating

Is the RFP Bidder rated by Moody's Investors Service, Inc. ("Moody's")?

☒ **Yes** ☐ **No**

RFP Bidder's rating: ____
Type of rating (**check one**): ☐ Senior unsecured debt rating ☐ Corporate issuer rating

Is the RFP Bidder rated by Fitch, Inc. ("Fitch")?

☒ **Yes** ☐ **No**

RFP Bidder's rating: ____
Type of rating (**check one**): ☐ Senior unsecured debt rating ☐ Corporate issuer rating

2.b. Financial and Credit Requirements

The RFP Bidder is relying on the financial standing of an RFP Guarantor.

First Item: Name and Address of RFP Guarantor

PLEASE PROVIDE THE LEGAL NAME AND ADDRESS OF THE RFP GUARANTOR.

Legal Name of RFP Guarantor

Street Address Line 1

~~*City*~~ ~~*State*~~ ~~*Zip Code*~~

Street Address Line 2

Deleted Cells
Deleted Cells
Deleted Cells
Deleted Cells

City	*State*	*Zip Code*
_____	_____	_____

Second Item: Financial Information

Financial information must be available for the RFP Guarantor.

PLEASE PROVIDE THE MOST RECENT QUARTERLY FINANCIAL INFORMATION FOR THE RFP GUARANTOR, including a balance sheet, income statement, cash flow statement, and any accompanying notes and schedules:

- **IF AVAILABLE, YOU MUST PROVIDE THE MOST RECENT SECURITIES AND EXCHANGE COMMISSION ("SEC") FORM 10-Q OR 10-K (WHICHEVER IS MORE RECENT) TO FULFILL THIS REQUIREMENT;**
- **IF THE SEC FORM 10-Q OR 10-K IS UNAVAILABLE, YOU MUST PROVIDE THE RFP GUARANTOR'S MOST RECENT QUARTERLY, MONTHLY, OR BI-ANNUAL FINANCIAL INFORMATION** accompanied by an attestation by the Chief Financial Officer (or similar position) that the information contained in the financial statements fairly presents in all material respects the financial condition and results of the operations of the RFP Bidder. The requirements for this attestation are provided more specifically in Appendix 5 of the RFP Rules.

	Most recent quarterly financial information (or, if unavailable, most recent monthly or bi-annual financial information accompanied by an attestation by the Chief Financial Officer)
	Attestation from Chief Financial Officer (if necessary)

Third Item: Credit Ratings

PLEASE PROVIDE THE CREDIT RATINGS FOR THE RFP GUARANTOR.

Is the RFP Guarantor rated by S&P Global Ratings ("S&P")?
☒ **Yes** ☐ **No**

RFP Guarantor's rating: _____
Type of rating (**check one**): ☐ Senior unsecured debt rating ☐ Corporate issuer rating

Is the RFP Guarantor rated by Moody's Investors Service, Inc. ("Moody's")?
☒ **Yes** ☐ **No**

RFP Guarantor's rating: _____
Type of rating (**check one**): ☐ Senior unsecured debt rating ☐ Corporate issuer rating

Is the RFP Guarantor rated by Fitch, Inc. ("Fitch")?

☒ **Yes** ☐ **No**

RFP Guarantor's rating: ____
Type of rating (**check one**): ☐ Senior unsecured debt rating ☐ Corporate issuer rating

2.c. Financial and Credit Requirements

The RFP Bidder is submitting a Proposal under an Agency Agreement and is relying on the financial standing of a Principal.

First Item: Principals to the Agency Agreement

PLEASE PROVIDE THE LEGAL NAME OF ALL PRINCIPALS UNDER THE AGENCY AGREEMENT.

Legal Name of Principal(s)

Second Item: Agency Agreement

A copy of the Agency Agreement is required. **PLEASE ~~SUBMIT~~PROVIDE ONE (1) COPY OF THE AGENCY AGREEMENT.**

Agency Agreement

Third Item: Principal on Whose Financial Standing the RFP Bidder is Relying

PLEASE ~~IDENTIFY~~PROVIDE THE ~~RFP~~LEGAL NAME AND ADDRESS OF THE PRINCIPAL ON WHOSE FINANCIAL STANDING THE RFP BIDDER IS RELYING.

- If there are several Principals in the Agency Agreement, you must identify the Principal with the lowest credit rating.
- If several Principals have the same lowest credit rating, you must identify the Principal among these that also has the lowest tangible net worth.

The Principal on whose financial standing the RFP Bidder is relying is referred to as the "RFP Principal".

Name of RFP Principal

Street Address Line 1

Street Address Line 2

City	*State*	*Zip Code*

Fourth Item: Financial Information

PLEASE PROVIDE THE MOST RECENT QUARTERLY FINANCIAL INFORMATION FOR THE RFP PRINCIPAL, including a balance sheet, income statement, cash flow statement, and any accompanying notes and schedules:

- **IF AVAILABLE, YOU MUST PROVIDE THE MOST RECENT SECURITIES AND EXCHANGE COMMISSION ("SEC") FORM 10-Q OR 10-K (WHICHEVER IS MORE RECENT) TO FULFILL THIS REQUIREMENT;**
- **IF THE SEC FORM 10-Q OR 10-K IS UNAVAILABLE, YOU MUST PROVIDE THE RFP PRINCIPAL'S MOST RECENT QUARTERLY, MONTHLY, OR BI-ANNUAL FINANCIAL INFORMATION** accompanied by an attestation by the Chief Financial Officer (or similar position) that the information contained in the financial statements fairly presents in all material respects the financial condition and results of the operations of the RFP Bidder. The requirements for this attestation are provided more specifically in Appendix 5 of the RFP Rules.

	Most recent quarterly financial information (or, if unavailable, most recent monthly or bi-annual financial information accompanied by an attestation by the Chief Financial Officer)
	Attestation from Chief Financial Officer (if necessary)

Fifth Item: Credit Ratings

PLEASE PROVIDE THE CREDIT RATINGS FOR THE RFP PRINCIPAL.

Is the RFP Principal rated by S&P Global Ratings ("S&P")?

☒ **Yes** ☐ **No**

RFP Principal's rating: ____
Type of rating (**check one**): ☐ Senior unsecured debt rating ☐ Corporate issuer rating

Is the RFP Principal rated by Moody's Investors Service, Inc. ("Moody's")?

☒ **Yes** ☐ **No**

RFP Principal's rating: ____
Type of rating (**check one**): ☐ Senior unsecured debt rating ☐ Corporate issuer rating

Is the RFP Principal rated by Fitch, Inc. ("Fitch")?

☒ **Yes** ☐ **No**

RFP Principal's rating: _____
Type of rating (**check one**): ☐ Senior unsecured debt rating ☐ Corporate issuer rating

Sixth Item: Agency Certifications

THE OFFICER OF THE RFP BIDDER MUST CERTIFY TO HAVING AUTHORITY TO BIND THE PRINCIPAL(S) AND ACKNOWLEDGE THAT AN OFFICERS' CERTIFICATE MUST BE SIGNED BY COMPLETING THE AGENCY CERTIFICATIONS INSERT. The Agency Certifications Insert is also labelled INSERT #P1-3.

PLEASE REFER TO THE AGENCY CERTIFICATIONS INSERT (#P1-3) FOR THE ACCEPTABLE METHODS TO COMPLETE AND SUBMIT THIS INSERT. IF THIS INSERT IS NOT COMPLETED WITH A DIGITAL SIGNATURE, IT MUST BE SENT BY EMAIL TO THE INDEPENDENT EVALUATOR AT PECOPROCUREMENT@NERA.COM BY THE SIGNATORY (HERE THE OFFICER OF THE RFP BIDDER) OR WITH THE SIGNATORY ON COPY.

_____
Name of RFP Bidder

P1 AGENCY CERTIFICATIONS INSERT (#P1-3)

THE INDEPENDENT EVALUATOR IS ACCEPTING A DIGITAL SIGNATURE FOR THIS INSERT. THE INDEPENDENT EVALUATOR IS ALSO ACCEPTING AN ELECTRONIC SIGNATURE OR A SCANNED WET SIGNATURE AS LONG AS THIS INSERT IS SENT BY EMAIL BY THE SIGNATORY OR WITH THE SIGNATORY ON COPY.

This Insert may be completed as follows:

- *Submitted with a digital signature (using commercially available software such as DocuSign) with an accompanying document or information verifying the identity of the signatory.*

If completed with a digital signature, this Insert and accompanying document or information may be uploaded to the online Part 1 Form or may be sent by email to the Independent Evaluator at PECOProcurement@NERA.com.

This Insert may also be completed as follows:

- *Submitted with a scanned wet signature;*

or

- *Submitted with an electronic signature (such as an image of a signature).*

If completed with a scanned or electronic signature, this Insert must be sent by email to the Independent Evaluator at PECOProcurement@NERA.com by the signatory (here the Officer of the RFP Bidder) or with the signatory on copy.

Please note! Only RFP Bidders submitting a Proposal under an Agency Agreement are required to submit this Insert.

THE OFFICER OF THE RFP BIDDER MUST MAKE THE FOLLOWING REPRESENTATION.

I, _____ (the Officer of the RFP Bidder), certify that I have the authority to bind the Principal(s) under the Agency Agreement provided with this Part 1 Proposal. I acknowledge that with the Part 2 Proposal, the RFP Bidder will be required to submit an Officers' Certificate signed by an officer of each Principal and substantially in the form of Appendix 6 to the RFP Rules.

_____ _____
Signature of Officer Date

Seventh Item: Draft Officers' Certificate

The RFP Bidder may, but is not required to, submit a draft Officers' Certificate for evaluation. If a draft Officers' Certificate is submitted for evaluation, the Independent Evaluator will inform the RFP Bidder of any changes required.

Is the RFP Bidder submitting a draft Officers' Certificate?
☒ **Yes** ☐ **No**

PLEASE PROVIDE THE RFP BIDDER'S DRAFT OFFICERS' CERTIFICATE.

	Draft Officers' Certificate

3. Credit Instruments and Uniform SMA

First Item: Standard Pre-Bid Letter of Credit

An RFP Bidder may request modifications to the Standard Pre-Bid Letter of Credit that are non-material in nature, or that are advantageous to both PECO and the RFP Bidder.

AN RFP BIDDER REQUESTS MODIFICATIONS TO THE STANDARD PRE-BID LETTER OF CREDIT BY SUBMITTING A DRAFT PRE-BID LETTER OF CREDIT SUBSTANTIALLY IN THE FORM OF THE STANDARD PRE-

BID LETTER OF CREDIT INDICATING CLEARLY ANY AND ALL MODIFICATIONS TO THE STANDARD PRE-BID LETTER OF CREDIT USING TRACKED CHANGES IN MICROSOFT WORD.

All approved modifications to the Standard Pre-Bid Letter of Credit are posted to the RFP website. Each RFP Bidder may use any of the approved modifications, regardless of whether the RFP Bidder itself or another RFP Bidder proposed the modification.

Is the RFP Bidder submitting a Draft Pre-Bid Letter of Credit?
☒ **Yes** ☐ **No**

Does the Draft Pre-Bid Letter of Credit contain the same requested modifications as a Draft Pre-Bid Letter of Credit submitted in a prior solicitation?
☐ **Yes** ☐ **No**

☒ **No**
A Draft Pre-Bid Letter of Credit that is not substantially in the form of the Standard Pre-Bid Letter of Credit will not be considered or evaluated. **PLEASE PROVIDE THE DRAFT PRE-BID LETTER OF CREDIT.**

Draft Pre-Bid Letter of Credit

☒ **Yes**
A Draft Pre-Bid Letter of Credit that contains the same requested modifications as a prior submittal will not be reviewed again by PECO. To request the Independent Evaluator to email to you PECO's assessment of the prior submittal, please email such request to pecoprocurement@nera.com.

Second Item: Standard Post-Bid Letter of Credit

An RFP Bidder may request modifications to the Standard Post-Bid Letter of Credit that are non-material in nature, or that are advantageous to both PECO and the RFP Bidder.

AN RFP BIDDER REQUESTS MODIFICATIONS TO THE STANDARD POST-BID LETTER OF CREDIT BY SUBMITTING A DRAFT POST-BID LETTER OF CREDIT SUBSTANTIALLY IN THE FORM OF THE STANDARD POST-BID LETTER OF CREDIT INDICATING CLEARLY ANY AND ALL MODIFICATIONS TO THE STANDARD POST-BID LETTER OF CREDIT USING TRACKED CHANGES IN MICROSOFT WORD.

All approved modifications to the Standard Post-Bid Letter of Credit are posted to the RFP website. Each RFP Bidder may use any of the approved modifications, regardless of whether the RFP Bidder itself or another RFP Bidder proposed the modification.

Is the RFP Bidder submitting a Draft Post-Bid Letter of Credit?
☒ **Yes** ☐ **No**

Does the Draft Post-Bid Letter of Credit contain the same requested modifications as a Draft Post-Bid Letter of Credit submitted in a prior solicitation?

☐ **Yes** ☐ **No**

☒ **No**
A Draft Post-Bid Letter of Credit that is not substantially in the form of the Standard Post-Bid Letter of Credit will not be considered or evaluated. **PLEASE PROVIDE THE DRAFT POST-BID LETTER OF CREDIT.**

Draft Post-Bid Letter of Credit

☒ **Yes**
A Draft Post-Bid Letter of Credit that contains the same requested modifications as a prior submittal will not be reviewed again by PECO. To request the Independent Evaluator to email to you PECO's assessment of the prior submittal, please email such request to pecoprocurement@nera.com.

Third Item: Standard Guaranty

An RFP Bidder may request modifications to the Standard Guaranty that are non-material in nature, or that are advantageous to both PECO and the RFP Bidder.

AN RFP BIDDER REQUESTS MODIFICATIONS TO THE STANDARD GUARANTY BY SUBMITTING A DRAFT GUARANTY SUBSTANTIALLY IN THE FORM OF THE STANDARD GUARANTY INDICATING CLEARLY ANY AND ALL MODIFICATIONS TO THE STANDARD GUARANTY USING TRACKED CHANGES IN MICROSOFT WORD.

All approved modifications to the Standard Guaranty are posted to the RFP website. Each RFP Bidder may use any of the approved modifications, regardless of whether the RFP Bidder itself or another RFP Bidder proposed the modification.

Is the RFP Bidder submitting a Draft Guaranty?

☒ **Yes** ☐ **No**

Does the Draft Guaranty contain the same requested modifications as a Draft Guaranty submitted in a prior solicitation?

☐ **Yes** ☐ **No**

☒ **No**
A Draft Guaranty that is not substantially in the form of the Standard Guaranty will not be considered or evaluated. **PLEASE PROVIDE THE DRAFT GUARANTY.**

Draft Guaranty

☒ **Yes**
A Draft Guaranty that contains the same requested modifications as a prior submittal will not be reviewed again by PECO. To request the Independent Evaluator to email to you PECO's assessment of the prior submittal, please email such request to pecoprocurement@nera.com.

Fourth Item: Information to Prepare the Uniform SMA and Its Exhibits

In accordance with Paragraph IV.3.4 of the RFP Rules, **THE RFP BIDDER IS ASKED TO PROVIDE THE FOLLOWING INFORMATION TO PREPARE THE UNIFORM SMA**:

- any elections to be made in the Uniform SMA;
- contact information required to prepare the Form of Notice, which is included as Exhibit 2 to the Uniform SMA; and
- any additional information required to prepare the Uniform SMA and its Exhibits.

The RFP Bidder must either: (i) provide the requested information to prepare the Uniform SMA at this time; **or**: (ii) submit an acknowledgment signed by the Officer of the RFP Bidder that, if the Independent Evaluator notifies the RFP Bidder that the Independent Evaluator is identifying one or more of the RFP Bidder's Bids to the Commission as winning Bids, the RFP Bidder must provide all required information by 12 PM (noon) EPT on the day after such notification is received.

Is the RFP Bidder providing information to prepare the Uniform SMA at this time?
☐ **Yes** ☐ **No**

☒ **Yes**

THE RFP BIDDER PROVIDES THE INFORMATION TO PREPARE THE UNIFORM SMA BY COMPLETING THE UNIFORM SMA INSERT. The Uniform SMA Insert is also labelled INSERT #P1-4.

_____
Name of RFP Bidder

UNIFORM SMA INSERT (#P1-4)

Please note! RFP Bidders must submit one (but ONLY one) of Insert #P1-4 and Insert #P1-5.

1. Under Section 5.4(a)(1) of the Uniform SMA, the DS Supplier may, in its sole discretion, add the following subsection 5.4(a)(1) by indicating yes or no below.

> 5.4(a)(1) For the purposes of such determination, the DS Supply provided for under this Agreement for the period following the Early Termination Date through the remainder of the term of this Agreement shall be deemed to be those quantity amounts that would have been delivered on an hourly basis, had this Agreement been in effect during the previous calendar year adjusted for such DS Load changes as may have occurred since the previous calendar year.

Do you intend for subsection 5.4(a)(1) to be included as part of the Uniform SMA?
☐ **Yes** ☐ **No**

2. The information that you provide below will be used to complete Exhibit 2 (Form of Notice) to the Uniform SMA. **IF ANY OF THE INFORMATION REQUESTED BELOW IS UNAVAILABLE, PLEASE ENTER N/A IN THE CORRESPONDING FIELDS.**

THE OFFICER OF THE RFP BIDDER PROVIDES THE REQUIRED ACKNOWLEDGMENT BY COMPLETING THE DELAY (SMA) INSERT. The Delay (SMA) Insert is also labelled INSERT #P1-5.

PLEASE REFER TO THE DELAY (SMA) INSERT (#P1-5) FOR THE ACCEPTABLE METHODS TO COMPLETE AND SUBMIT THIS INSERT. IF THIS INSERT IS NOT COMPLETED WITH A DIGITAL SIGNATURE, IT MUST BE SENT BY EMAIL TO THE INDEPENDENT EVALUATOR AT PECOPROCUREMENT@NERA.COM BY THE SIGNATORY (HERE THE OFFICER OF THE RFP BIDDER) OR WITH THE SIGNATORY ON COPY.

_____
Name of RFP Bidder

~~DELAY (SMA) INSERT (#P1-5)~~ DELAY (SMA) INSERT (#P1-5)

THE INDEPENDENT EVALUATOR IS ACCEPTING A DIGITAL SIGNATURE FOR THIS INSERT. THE INDEPENDENT EVALUATOR IS ALSO ACCEPTING AN ELECTRONIC SIGNATURE OR A SCANNED WET SIGNATURE AS LONG AS THIS

INSERT IS SENT BY EMAIL BY THE SIGNATORY OR WITH THE SIGNATORY ON COPY.

This Insert may be completed as follows:

- *Submitted with a digital signature (using commercially available software such as DocuSign) with an accompanying document or information verifying the identity of the signatory.*

If completed with a digital signature, this Insert and accompanying document or information may be uploaded to the online Part 1 Form or may be sent by email to the Independent Evaluator at PECOProcurement@NERA.com.

This Insert may also be completed as follows:

- *Submitted with a scanned wet signature;*

or

- *Submitted with an electronic signature (such as an image of a signature).*

If completed with a scanned or electronic signature, this Insert must be sent by email to the Independent Evaluator at PECOProcurement@NERA.com by the signatory (here the Officer of the RFP Bidder) or with the signatory on copy.

Please note! RFP Bidders must submit one (but ONLY one) of Insert #P1-4 and Insert #P1-5.

I, _____ (the Officer of the RFP Bidder), acknowledge that, if the Independent Evaluator notifies the RFP Bidder that the Independent Evaluator is identifying one or more of the RFP Bidder's Bids to the Commission as winning Bids, the RFP Bidder must provide all information required by the Uniform SMA Insert (#P1-4) by 12 PM (noon) EPT on the day after such notification is received.

_____ _____

Signature of Officer Date

4. Regulatory Representations

First Item: Representations by the Officer of the RFP Bidder

The Officer of the RFP Bidder must make a number of certifications as detailed in the RFP Rules. **THE OFFICER OF THE RFP BIDDER MAKES SUCH CERTIFICATIONS BY COMPLETING THE P1 CERTIFICATIONS A INSERT.** ~~**THE SIGNATURE OF THE OFFICER OF THE RFP BIDDER MUST BE NOTARIZED.**~~ The P1 Certifications A Insert is also labelled INSERT #P1-6.

PLEASE REFER TO THE P1 CERTIFICATIONS A INSERT (#P1-6) FOR THE ACCEPTABLE METHODS TO COMPLETE AND SUBMIT THIS INSERT.

_____
Name of RFP Bidder

P1 CERTIFICATIONS (A) INSERT (#P1-6)

THE INDEPENDENT EVALUATOR IS ACCEPTING A DIGITAL SIGNATURE OR A NOTARIZED SIGNATURE FOR THIS INSERT.

This Insert may be completed as follows:

- *Signed by the Officer of the RFP Bidder with the signature notarized;*

or:

- *Submitted with a digital signature (using commercially available software such as DocuSign) with an accompanying document or information verifying the identity of the signatory. Digital signatures are not required to be notarized.*

This Insert and any accompanying document or information may be submitted as follows:

- *Uploaded to the online Part 1 Form;*

or:

- *Sent by email to the Independent Evaluator at PECOProcurement@nera.com.*

An RFP Bidder found to be acting in concert with another RFP Bidder may be disqualified by the Independent Evaluator.

I certify that:

(1) I am an officer, a director, or an individual otherwise authorized to undertake contracts (including the PECO Energy Company - Pennsylvania Default Service Supplier Master Agreement) and bind the RFP Bidder.
(2) All information provided in this Part 1 Proposal is true and accurate to the best of my knowledge and belief.
(3) If, for any reason or due to any circumstance, any information provided in this Part 1 Proposal changes or any previous certification fails to remain valid before the sixth business day after the

Bid Date, I or the Representative will notify the Independent Evaluator of such changes as soon as practicable but in no event later than one (1) day before the Bid Date.

(4) This Part 1 Proposal will remain valid and remain in full force and effect until six (6) business days after the Bid Date.

(5) The RFP Bidder is not part of a bidding agreement, a joint venture for purposes of participating in any solicitation for this RFP, a bidding consortium, or any other type of agreement related to bidding in any solicitation of this RFP.

Signature of Officer	Date
Printed Name	~~Date~~
Signature and Seal from Notary Public	Date

Second Item: Additional Representations for RFP Bidders that have not previously qualified

The Officer of the RFP Bidder must make a number of certifications as detailed in the RFP Rules. **THE OFFICER OF THE RFP BIDDER MAKES SUCH CERTIFICATIONS BY COMPLETING THE P1 CERTIFICATIONS B INSERT. ~~THE SIGNATURE OF THE OFFICER OF THE RFP BIDDER MUST BE NOTARIZED.~~** The P1 Certifications B Insert is also labelled INSERT #P1-7.

PLEASE REFER TO THE P1 CERTIFICATIONS B INSERT (#P1-7) FOR THE ACCEPTABLE METHODS TO COMPLETE AND SUBMIT THIS INSERT.

Name of RFP Bidder

P1 CERTIFICATIONS (B) INSERT (#P1-7)

THE INDEPENDENT EVALUATOR IS ACCEPTING A DIGITAL SIGNATURE OR A NOTARIZED SIGNATURE FOR THIS INSERT.

This Insert may be completed as follows:

- *Signed by the Officer of the RFP Bidder with the signature notarized;*

or:

- *Submitted with a digital signature (using commercially available software such as DocuSign) with an accompanying document or information verifying the identity of the signatory. Digital signatures are not required to be notarized.*

This Insert and any accompanying document or information may be submitted as follows:

- *Uploaded to the online Part 1 Form;*

or:

- *Sent by email to the Independent Evaluator at PECOProcurement@nera.com.*

An RFP Bidder found to be acting in concert with another RFP Bidder may be disqualified by the Independent Evaluator.

I certify that:

(1) I understand the terms of the Uniform SMA. The RFP Bidder accepts all of the terms of the Uniform SMA without modifications, and the RFP Bidder will execute the Uniform SMA and the Transaction Confirmation(s) for all Bids approved by the Commission.

(2) The submission of this Part 1 Proposal constitutes the RFP Bidder's acknowledgement and acceptance of all the terms and conditions of the RFP, regardless of the outcome of the solicitation or the outcome of such Proposal.

(3) The RFP Bidder has no actions at law, suits in equity, proceedings or claims pending or, to the RFP Bidder's knowledge, threatened against it before any federal, state, foreign or local court, tribunal or governmental agency or authority that might materially delay, prevent or hinder the RFP Bidder's performance of its obligations under the Uniform SMA.

(4) The RFP Bidder is not bankrupt or insolvent and there are no proceedings pending or being contemplated by it or, to its knowledge, threatened against it which would result in it being or becoming bankrupt or insolvent.

Signature of Officer	Date
Printed Name	~~Date~~
Signature and Seal from Notary Public	Date

Third Item: Load Serving Entity

By the time service begins, a Default Supplier must be a Load Serving Entity ("LSE") in good standing in PJM, and must be a signatory of all applicable PJM Agreements, including the Reliability Assurance Agreement ("RAA").

Is the RFP Bidder an LSE in PJM?

☐ **Yes** ☐ **No**

☒ **Yes**

THE RFP BIDDER MUST PROVIDE A COPY OF THE SIGNATURE PAGE OF THE RELIABILITY ASSURANCE AGREEMENT ("RAA").

	Signature Page of RAA

If the name of the signatory is not the same as the RFP Bidder, please provide evidence of a name change.

	Evidence of name change (if necessary)

☒ **No**

THE OFFICER OF THE RFP BIDDER MUST MAKE THE CERTIFICATIONS DETAILED IN THE RFP RULES BY COMPLETING THE LSE REPRESENTATION INSERT. The LSE Representation Insert is also labelled INSERT #P1-9.

PLEASE REFER TO THE LSE REPRESENTATION INSERT (#P1-9) FOR THE ACCEPTABLE METHODS TO COMPLETE AND SUBMIT THIS INSERT. IF THIS INSERT IS NOT COMPLETED WITH A DIGITAL SIGNATURE, IT MUST BE SENT BY EMAIL TO THE INDEPENDENT EVALUATOR AT PECOPROCUREMENT@NERA.COM BY THE SIGNATORY (HERE THE OFFICER OF THE RFP BIDDER) OR WITH THE SIGNATORY ON COPY.

_____

THE INDEPENDENT EVALUATOR IS ACCEPTING A DIGITAL SIGNATURE FOR THIS INSERT. THE INDEPENDENT EVALUATOR IS ALSO ACCEPTING AN ELECTRONIC SIGNATURE OR A SCANNED WET SIGNATURE AS LONG AS THIS INSERT IS SENT BY EMAIL BY THE SIGNATORY OR WITH THE SIGNATORY ON COPY.

This Insert may be completed as follows:

- *Submitted with a digital signature (using commercially available software such as DocuSign) with an accompanying document or information verifying the identity of the signatory.*

If completed with a digital signature, this Insert and accompanying document or information may be uploaded to the online Part 1 Form or may be sent by email to the Independent Evaluator at PECOProcurement@NERA.com.

This Insert may also be completed as follows:

- *Submitted with a scanned wet signature;*

or

- *Submitted with an electronic signature (such as an image of a signature).*

If completed with a scanned or electronic signature, this Insert must be sent by email to the Independent Evaluator at PECOProcurement@NERA.com by the signatory (here the Officer of the RFP Bidder) or with the signatory on copy.

Please note! ONLY Foreign RFP Bidders are required to submit this Insert.

First Item: Evidence of Creditworthiness

In addition to supplying all required information and documents elsewhere in the online Part 1 Form, a Foreign RFP Bidder may provide any additional evidence of creditworthiness for the Foreign RFP Bidder so as to provide PECO with comparable assurances of creditworthiness as is applicable for an entity that has been incorporated or otherwise formed under the laws of a state of the United States or of the District of Columbia.

Are you submitting additional evidence of creditworthiness for the Foreign RFP Bidder?
☐ **Yes** ☐ **No**

PLEASE PROVIDE SUCH ADDITIONAL EVIDENCE OF CREDITWORTHINESS IN THE SPACES RESERVED FOR THAT PURPOSE IN THE ONLINE PART 1 FORM OR BY EMAIL TO PECOPROCUREMENT@NERA.COM.

Second Item: Acknowledgment

THE OFFICER OF THE RFP BIDDER MUST MAKE THE FOLLOWING REPRESENTATION.

I, _____ (the Officer of the RFP Bidder), acknowledge that the following additional documents are required with the Part 2 Proposal: (i) a legal opinion of outside counsel qualified to practice in the foreign jurisdiction in which the Foreign RFP Bidder is incorporated or otherwise formed that the Uniform SMA is, or upon the completion of execution formalities will become, the binding obligation of the Foreign RFP Bidder in the jurisdiction in which it has been incorporated or otherwise formed; (ii) the sworn certificate of the corporate secretary (or similar officer) of such Foreign RFP Bidder that the person executing the Uniform SMA on behalf of the Foreign RFP Bidder has the authority to execute the Uniform SMA and that the governing board of such Foreign RFP Bidder has approved the execution of the Uniform SMA; and (iii) the sworn certificate of the corporate secretary (or similar officer) of such Foreign RFP Bidder that the Foreign RFP Bidder has been authorized by its governing board to enter into agreements of the same type as the Uniform SMA.

_____ _____
Signature of Officer Date

Third Item: Draft Documents

The Officer of the RFP Bidder has acknowledged in the immediately preceding certifications that additional documents are required with the Part 2 Proposal. **THE RFP BIDDER MAY, BUT IS NOT REQUIRED TO, SUBMIT A DRAFT OF THESE DOCUMENTS.**

Are you submitting a draft of any of these additional documents for evaluation?
☐ **Yes** ☐ **No**

PLEASE PROVIDE ANY SUCH DOCUMENTS IN THE SPACES RESERVED FOR THAT PURPOSE IN THE ONLINE PART 1 FORM OR BY EMAIL TO PECOPROCUREMENT@NERA.COM.

_____

THE INDEPENDENT EVALUATOR IS ACCEPTING A DIGITAL SIGNATURE FOR THIS INSERT. THE INDEPENDENT EVALUATOR IS ALSO ACCEPTING AN ELECTRONIC SIGNATURE OR A SCANNED WET SIGNATURE AS LONG AS THIS INSERT IS SENT BY EMAIL BY THE SIGNATORY OR WITH THE SIGNATORY ON COPY.

This Insert may be completed as follows:

- *Submitted with a digital signature (using commercially available software such as DocuSign) with an accompanying document or information verifying the identity of the signatory.*

If completed with a digital signature, this Insert and accompanying document or information may be uploaded to the online Part 1 Form or may be sent by email to the Independent Evaluator at PECOProcurement@NERA.com.

This Insert may also be completed as follows:

- *Submitted with a scanned wet signature;*

or

- *Submitted with an electronic signature (such as an image of a signature).*

If completed with a scanned or electronic signature, this Insert must be sent by email to the Independent Evaluator at PECOProcurement@NERA.com by the signatory (here the Officer of the RFP Bidder) or with the signatory on copy.

Please note! **ONLY RFP Bidders relying on a Foreign RFP Guarantor are required to submit this Insert.**

First Item: Evidence of Creditworthiness

In addition to supplying all required information and documents elsewhere in the online Part 1 Form, an RFP Bidder relying on the financial standing of a Foreign RFP Guarantor may provide any additional evidence of creditworthiness for the Foreign RFP Guarantor so as to provide PECO with comparable assurances of creditworthiness as is applicable for an entity that has been incorporated or otherwise formed under the laws of a state of the United States or of the District of Columbia.

Are you submitting additional evidence of creditworthiness for the Foreign RFP Guarantor?
☐ **Yes** ☐ **No**

PLEASE PROVIDE SUCH ADDITIONAL EVIDENCE OF CREDITWORTHINESS IN THE SPACES RESERVED FOR THAT PURPOSE IN THE ONLINE PART 1 FORM OR BY EMAIL TO PECOPROCUREMENT@NERA.COM.

Second Item: Acknowledgment

THE OFFICER OF THE RFP BIDDER MUST MAKE THE FOLLOWING REPRESENTATION.

I, _____ (the Officer of the RFP Bidder), acknowledge that the following additional documents are required with the Part 2 Proposal for the Foreign Entity as RFP Guarantor to be granted unsecured credit and for the RFP Bidder to rely on the financial standing of the RFP Guarantor under the terms of the Uniform SMA: (i) a legal opinion of outside counsel qualified to practice in the foreign jurisdiction in which the RFP Guarantor is incorporated or otherwise formed that the guaranty pursuant to the Uniform SMA is, or upon the completion of execution formalities will become, the binding obligation of the RFP Guarantor in the jurisdiction in which it has been incorporated or otherwise formed; and (ii) the sworn certificate of the corporate secretary (or similar officer) of such RFP Guarantor that the person executing the guaranty pursuant to the Uniform SMA on behalf of the RFP Guarantor has the authority to execute the guaranty pursuant to the Uniform SMA and that the governing board of such RFP Guarantor has approved the execution of the guaranty pursuant to the Uniform SMA; and (iii) the sworn certificate of the corporate secretary (or similar officer) of such RFP Guarantor that the RFP Guarantor has been authorized by its governing board to enter into agreements of the same type as the guaranty pursuant to the Uniform SMA.

_____ _____
Signature of Officer Date

Third Item: Draft Documents

The Officer of the RFP Bidder has acknowledged in the immediately preceding certifications that additional documents are required with the Part 2 Proposal for unsecured credit to be granted under the terms of the Uniform SMA. **THE RFP BIDDER MAY, BUT IS NOT REQUIRED TO, SUBMIT A DRAFT OF THESE DOCUMENTS.**

Are you submitting a draft of any of these additional documents for evaluation?
☐ **Yes** ☐ **No**

PLEASE PROVIDE ANY SUCH DOCUMENTS IN THE SPACES RESERVED FOR THAT PURPOSE IN THE ONLINE PART 1 FORM OR BY EMAIL TO PECOPROCUREMENT@NERA.COM.

_____
Name of RFP Bidder

P1 FOREIGN PRINCIPAL INSERT (#P1-12)

THE INDEPENDENT EVALUATOR IS ACCEPTING A DIGITAL SIGNATURE FOR THIS INSERT. THE INDEPENDENT EVALUATOR IS ALSO ACCEPTING AN ELECTRONIC SIGNATURE OR A SCANNED WET SIGNATURE AS LONG AS THIS INSERT IS SENT BY EMAIL BY THE SIGNATORY OR WITH THE SIGNATORY ON COPY.

This Insert may be completed as follows:

- *Submitted with a digital signature (using commercially available software such as DocuSign) with an accompanying document or information verifying the identity of the signatory.*

If completed with a digital signature, this Insert and accompanying document or information may be uploaded to the online Part 1 Form or may be sent by email to the Independent Evaluator at PECOProcurement@NERA.com.

This Insert may also be completed as follows:

APPENDIX 4 – ILLUSTRATIVE SHORT PART 1 FORM
DEFAULT SERVICE PROGRAM
REQUEST FOR PROPOSALS

PECO Energy Company ("Company" or "PECO") is intending to obtain full requirements electric supply to meet a portion of its obligations as Default Service Provider through this Request for Proposals ("RFP").

This Short Part 1 Form may only be used by an entity that has submitted a successful Part 1 Proposal in a previous solicitation under PECO's current Default Service Program ("DSP ~~V~~VI"). However, if there was a change in the corporate structure of the RFP Bidder, or if the identity of the entity on whose financial standing the RFP Bidder relies has changed, the RFP Bidder must use the Standard Part 1 Form.

Before completing this online Part 1 Form, please review the RFP, including the PECO Energy Company Pennsylvania Default Service Supplier Master Agreement ("Uniform SMA"), so that you understand the conditions under which the RFP will be conducted. These documents are posted at www.PECOprocurement.com.

By submitting a Part 1 Proposal in response to this RFP, you are agreeing to all terms and conditions of this RFP.

Any information provided by an RFP Bidder in the Part 1 Proposal is provided on a confidential basis to the Independent Evaluator, and may be provided on a confidential basis to the Staff of the Pennsylvania Public Utility Commission. PECO representatives will review financial information and will participate in the evaluation of the creditworthiness of each RFP Bidder. Information regarding the content or status of any Part 1 Proposal will not be released publicly or to any individual RFP Bidder during the evaluation process.

SHORT PART 1 FORM

GENERAL INSTRUCTIONS on the RFP Bidders that can use this form:

- This Short Part 1 Form is for the exclusive use of RFP Bidders that successfully submitted a Part 1 Proposal in a previous solicitation under DSP ~~V~~VI. If you are not eligible under this criterion, **please use the Standard Part 1 Form.**
- If there is a change in the corporate structure of the RFP Bidder (through a merger for example) since you last submitted a successful Part 1 Proposal in a previous solicitation under DSP ~~V~~VI, **please use the Standard Part 1 Form.**
- If the entity on whose financial standing the RFP Bidder relies changed since you last submitted a successful Part 1 Proposal in a previous solicitation under DSP ~~V~~VI, **please use the Standard Part 1 Form.**

~~If the individual who will serve as Representative has changed since you last submitted a successful Part 1 Proposal under DSP V,~~ **THE OFFICER OF THE RFP BIDDER MUST DESIGNATE THE INDIVIDUAL NAMED IN THE ONLINE PART 1 FORM TO SERVE AS THE REPRESENTATIVE OF THE RFP BIDDER BY COMPLETING THE REPRESENTATIVE INSERT.** The Representative Insert is also labelled INSERT #P1-1.

PLEASE REFER TO THE REPRESENTATIVE INSERT (#P1-1) FOR THE ACCEPTABLE METHODS TO COMPLETE AND SUBMIT THIS INSERT. IF THIS INSERT IS NOT COMPLETED WITH A DIGITAL SIGNATURE, IT MUST BE SENT BY EMAIL TO THE INDEPENDENT EVALUATOR AT PECOPROCUREMENT@NERA.COM BY THE SIGNATORY (HERE THE OFFICER OF THE RFP BIDDER) OR WITH THE SIGNATORY ON COPY.

_____
Name of RFP Bidder

~~**REPRESENTATIVE INSERT (#P1-1)**~~ **REPRESENTATIVE INSERT (#P1-1)**

THE INDEPENDENT EVALUATOR IS ACCEPTING A DIGITAL SIGNATURE FOR THIS INSERT. THE INDEPENDENT EVALUATOR IS ALSO ACCEPTING AN ELECTRONIC SIGNATURE OR A SCANNED WET SIGNATURE AS LONG AS THIS INSERT IS SENT BY EMAIL BY THE SIGNATORY OR WITH THE SIGNATORY ON COPY.

This Insert may be completed as follows:

- *Submitted with a digital signature (using commercially available software such as DocuSign) with an accompanying document or information verifying the identity of the signatory.*

If completed with a digital signature, this Insert and accompanying document or information may be uploaded to the online Part 1 Form or may be sent by email to the Independent Evaluator at PECOProcurement@NERA.com.

This Insert may also be completed as follows:

- *Submitted with a scanned wet signature;*

or

- *Submitted with an electronic signature (such as an image of a signature).*

If completed with a scanned or electronic signature, this Insert must be sent by email to the Independent Evaluator at PECOProcurement@NERA.com by the signatory (here the Officer of the RFP Bidder) or with the signatory on copy.

THE OFFICER OF THE RFP BIDDER MUST DESIGNATE THE INDIVIDUAL WHOSE CONTACT INFORMATION IS PROVIDED IN THE ONLINE PART 1 FORM AS THE REPRESENTATIVE.

I, _____ (the Officer of the RFP Bidder) hereby designate _____ (name of the Representative) to serve as the Representative of the RFP Bidder.

_____ _____
Signature of Officer Date

Fourth Item: Nominees

The Independent Evaluator provides notifications to the RFP Bidder by email and provides documents needed for participation by secure file transfer. Any such notification will be deemed received by the RFP Bidder at the time of delivery or transmission, provided that where delivery or transmission occurs after 6 PM on a business day or occurs on a day that is not a business day, receipt will be deemed to occur at 9 AM on the following business day.

The RFP Bidder may designate up to three (3) authorized individuals (each called a "Nominee") to receive communications from the Independent Evaluator in addition to the Representative. The RFP Bidder may make such a designation at any time during the solicitation.

Nominees are designated for a single solicitation and previously submitted designations are not saved for use in subsequent solicitations.

Is the RFP Bidder designating Nominees at this time?

THE REPRESENTATIVE OF THE RFP BIDDER OR THE OFFICER OF THE RFP BIDDER DESIGNATES NOMINEES BY COMPLETING THE NOMINEE INSERT. The Nominee Insert is also labelled INSERT #P1-2.

PLEASE REFER TO THE NOMINEE INSERT (#P1-2) FOR THE ACCEPTABLE METHODS TO COMPLETE AND SUBMIT THIS INSERT. IF THIS INSERT IS NOT COMPLETED WITH A DIGITAL SIGNATURE, IT MUST BE SENT BY EMAIL TO THE INDEPENDENT EVALUATOR AT PECOPROCUREMENT@NERA.COM BY THE SIGNATORY (HERE THE OFFICER OF THE RFP BIDDER OR THE REPRESENTATIVE OF THE RFP BIDDER) OR WITH THE SIGNATORY ON COPY.

_____
Name of RFP Bidder

NOMINEE INSERT (#P1-2)

THE INDEPENDENT EVALUATOR IS ACCEPTING A DIGITAL SIGNATURE FOR THIS INSERT. THE INDEPENDENT EVALUATOR IS ALSO ACCEPTING AN ELECTRONIC SIGNATURE OR A SCANNED WET SIGNATURE AS LONG AS THIS INSERT IS SENT BY EMAIL BY THE SIGNATORY OR WITH THE SIGNATORY ON COPY.

This Insert may be completed as follows:

- *Submitted with a digital signature (using commercially available software such as DocuSign) with an accompanying document or information verifying the identity of the signatory.*

If completed with a digital signature, this Insert and accompanying document or information may be uploaded to the online Part 1 Form or may be sent by email to the Independent Evaluator at PECOProcurement@NERA.com.

This Insert may also be completed as follows:

- *Submitted with a scanned wet signature;*

or

- *Submitted with an electronic signature (such as an image of a signature).*

If completed with a scanned or electronic signature, this Insert must be sent by email to the Independent Evaluator at PECOProcurement@NERA.com by the signatory (here the Officer of the RFP Bidder or the Representative of the RFP Bidder) or with the signatory on copy.

Please note! **This insert is optional.**

I, _____ (the Officer of the RFP Bidder or the Representative of the RFP Bidder) authorize the individuals whose contact details are immediately below to receive communications from the Independent Evaluator and to act on behalf of the RFP Bidder during the Proposal submission process.

The RFP Bidder may provide additional information here, such as the period during which a particular individual will act as Nominee or the individual that a Nominee is replacing.

2.a. Information Required for RFP Bidders Relying on Their Own Financial Standing.

You previously elected the RFP Bidder as the entity on whose financial standing the RFP Bidder is relying. **IF THE ENTITY UPON WHOSE FINANCIAL STANDING THE RFP BIDDER IS RELYING HAS CHANGED, YOU MUST USE THE STANDARD PART 1 FORM. PLEASE CONTACT THE INDEPENDENT EVALUATOR AT PECOPROCUREMENT@NERA.COM TO ~~RECEIVE INSTRUCTIONS ON THE FORM THAT YOU SHOULD~~BE GRANTED ACCESS TO USE THE STANDARD PART 1 FORM.**

First Item: Financial Information

IF AVAILABLE, PLEASE PROVIDE THE MOST RECENT QUARTERLY FINANCIAL INFORMATION FOR THE RFP BIDDER, including a balance sheet, income statement, cash flow statement, and any accompanying notes and schedules:

- **IF AVAILABLE, YOU MUST PROVIDE THE MOST RECENT SECURITIES AND EXCHANGE COMMISSION ("SEC") FORM 10-Q OR 10-K (WHICHEVER IS MORE RECENT) TO FULFILL THIS REQUIREMENT;**
- **IF THE SEC FORM 10-Q OR 10-K IS UNAVAILABLE, PLEASE PROVIDE, IF AVAILABLE, THE RFP BIDDER'S MOST RECENT QUARTERLY, MONTHLY, OR BI-ANNUAL FINANCIAL INFORMATION** accompanied by an attestation by the Chief Financial Officer (or similar position) that the information contained in the financial statements fairly presents in all material respects the financial condition and results of the operations of the RFP Bidder. The requirements for this attestation are provided more specifically in Appendix 5 of the RFP Rules.

	Most recent quarterly financial information (or, if unavailable, most recent monthly or bi-annual financial information accompanied by an attestation by the Chief Financial Officer) **IF THE INFORMATION IS UNAVAILABLE, PLEASE SO STATE IN THE JUSTIFICATION OF OMISSIONS SECTION.**
	Attestation from Chief Financial Officer if necessary.

Second Item: Credit Ratings

~~Below is the information that you previously provided.~~ **PLEASE ~~MAKE ANY UPDATES TO~~PROVIDE THE CREDIT RATINGS FOR THE RFP BIDDER.** ~~By submitting this form without making updates, you will be confirming that the previously provided information remains valid.~~

Is the RFP Bidder rated by S&P Global Ratings ("S&P")?

☒ **Yes** ☐ **No**

RFP Bidder's rating: ____
Type of rating (**check one**): ☐ Senior unsecured debt rating ☐ Corporate issuer rating

Is the RFP Bidder rated by Moody's Investors Service, Inc. ("Moody's")?

☒ **Yes** ☐ **No**

RFP Bidder's rating: ____
Type of rating (**check one**): ☐ Senior unsecured debt rating ☐ Corporate issuer rating

Is the RFP Bidder rated by Fitch, Inc. ("Fitch")?

☒ **Yes** ☐ **No**

RFP Bidder's rating: ____
Type of rating (**check one**): ☐ Senior unsecured debt rating ☐ Corporate issuer rating

2.b. Information Required from RFP Bidders Relying on the Financial Standing of an RFP Guarantor

You previously elected ~~the~~an RFP Guarantor ~~whose information is below~~ as the entity on whose financial standing the RFP Bidder is relying. The Independent Evaluator will provide to you the Legal Name of the RFP Guarantor that you submitted previously upon request. **IF THE ENTITY UPON WHOSE FINANCIAL STANDING THE RFP BIDDER IS RELYING HAS CHANGED, YOU MUST USE THE STANDARD PART 1 FORM. IF THERE WAS A CHANGE IN THE CORPORATE STRUCTURE OF THE RFP GUARANTOR, THROUGH A MERGER FOR EXAMPLE, YOU MUST USE THE STANDARD PART 1 FORM. PLEASE CONTACT THE INDEPENDENT EVALUATOR AT PECOPROCUREMENT@NERA.COM TO RECEIVE INSTRUCTIONS ON THE FORM THAT YOU SHOULD USE.**

First Item: Name and Address of RFP Guarantor

~~Below is the information that you previously provided. PLEASE MAKE ANY UPDATES TO THE ADDRESS FOR THE RFP GUARANTOR. By submitting this form without making updates, you will be confirming that the previously provided information remains valid.~~
PLEASE PROVIDE THE LEGAL NAME AND ADDRESS FOR THE RFP GUARANTOR.

Legal Name of RFP Guarantor
~~[pre-populated]~~

Street Address
~~[pre-populated]~~
~~[pre-populated]~~

City ~~[pre-populated]~~ *State* ~~[pre-populated]~~ *Zip Code* ~~[pre-populated]~~

IF THE LEGAL NAME OF THE RFP GUARANTOR HAS CHANGED SINCE THE RFP BIDDER LAST SUBMITTED A SUCCESSFUL PART 1 PROPOSAL, PLEASE PROVIDE EVIDENCE OF THE CHANGE.

Evidence of name change (if necessary)

Second Item: Financial Information

Financial information must be available for the RFP Guarantor.

PLEASE PROVIDE THE MOST RECENT QUARTERLY FINANCIAL INFORMATION FOR THE RFP GUARANTOR, including a balance sheet, income statement, cash flow statement, and any accompanying notes and schedules:

- **IF AVAILABLE, YOU MUST PROVIDE THE MOST RECENT SECURITIES AND EXCHANGE COMMISSION ("SEC") FORM 10-Q OR 10-K (WHICHEVER IS MORE RECENT) TO FULFILL THIS REQUIREMENT;**

- **IF THE SEC FORM 10-Q OR 10-K IS UNAVAILABLE, YOU MUST PROVIDE THE RFP GUARANTOR'S MOST RECENT QUARTERLY, MONTHLY, OR BI-ANNUAL FINANCIAL INFORMATION** accompanied by an attestation by the Chief Financial Officer (or similar position) that the information contained in the financial statements fairly presents in all material respects the financial condition and results of the operations of the RFP Bidder. The requirements for this attestation are provided more specifically in Appendix 5 of the RFP Rules.

	Most recent quarterly financial information (or, if unavailable, most recent monthly or bi-annual financial information accompanied by an attestation by the Chief Financial Officer)
	Attestation from Chief Financial Officer (if necessary)

Third Item: Credit Ratings

~~Below is the information that you previously provided.~~ **PLEASE ~~MAKE ANY UPDATES TO~~ PROVIDE THE CREDIT RATINGS FOR THE RFP GUARANTOR.** ~~By submitting this form without making updates, you will be confirming that the previously provided information remains valid.~~

Is the RFP Guarantor rated by S&P Global Ratings ("S&P")?
☒ **Yes** ☐ **No**

RFP Guarantor's rating: ____
Type of rating (**check one**): ☐ Senior unsecured debt rating ☐ Corporate issuer rating

Is the RFP Guarantor rated by Moody's Investors Service, Inc. ("Moody's")?
☒ **Yes** ☐ **No**

RFP Guarantor's rating: ____
Type of rating (**check one**): ☐ Senior unsecured debt rating ☐ Corporate issuer rating

Is the RFP Guarantor rated by Fitch, Inc. ("Fitch")?
☒ **Yes** ☐ **No**

RFP Guarantor's rating: ____
Type of rating (**check one**): ☐ Senior unsecured debt rating ☐ Corporate issuer rating

2.c. Information Required from RFP Bidders Relying on the Financial Standing of an RFP Principal

You previously elected a Principal as the entity on whose financial standing the RFP Bidder is relying; the RFP Bidder is submitting a Proposal under an Agency Agreement. **IF THE ENTITY UPON WHOSE FINANCIAL STANDING THE RFP BIDDER IS RELYING HAS CHANGED YOU MUST USE THE STANDARD PART 1 FORM.**

PLEASE CONTACT THE INDEPENDENT EVALUATOR AT PECOPROCUREMENT@NERA.COM TO RECEIVE INSTRUCTIONS ON THE FORM THAT YOU SHOULD USE.

AN RFP BIDDER SUBMITTING A PROPOSAL UNDER AN AGENCY AGREEMENT IS REQUIRED TO PROVIDE FINANCIAL INFORMATION REGARDING THE PRINCIPAL AS WELL AS OTHER INFORMATION REGARDING THE AGENCY AGREEMENT AS SPECIFIED IN THE RFP RULES. ~~The Independent Evaluator provided to you, along with your login credentials, the P1 Agency Certifications Insert (#P1-3) and the Agency Agreement that you submitted previously (if any).~~

First Item: Principals to the Agency Agreement

~~Below is the information that you previously provided. **PLEASE MAKE ANY UPDATES TO THE NAME(S) OF THE PRINCIPAL(S).** By submitting this form without making updates, you will be confirming that the previously provided information remains valid.~~
PLEASE PROVIDE THE LEGAL NAME(S) OF THE PRINCIPAL(S) TO THE AGENCY AGREEMENT.

Legal Name of Principal(s)

~~*[pre-populated]*~~

Second Item: Agency Agreement

The Independent Evaluator will provide to you the Agency Agreement that you submitted previously (if any) upon request.

Has the Agency Agreement changed since the RFP Bidder last submitted a successful Part 1 Proposal?
☒ Yes ☐ No

A copy of the Agency Agreement is required. **PLEASE PROVIDE ONE (1) COPY OF THE AGENCY AGREEMENT.**

	Agency Agreement

Third Item: Principal on Whose Financial Standing the RFP Bidder is Relying

~~Below is~~Please provide the ~~information that you previously provided regarding~~Legal Name and Address of the Principal on whose financial standing the RFP Bidder is relying. The Independent Evaluator will provide to you the Legal Name of the Principal that you submitted previously upon request.

- If there are several Principals in the Agency Agreement, you must identify the Principal with the lowest credit rating.
- If several Principals have the same lowest credit rating, you must identify the Principal among these that also has the lowest tangible net worth.

~~**PLEASE MAKE ANY NECESSARY UPDATES.** By submitting this form without making updates, you will be confirming that~~The Principal on whose financial standing the ~~previously provided information remains valid.~~RFP Bidder is relying is referred to as the "RFP Principal".

Legal Name of RFP Principal

~~[pre-populated]~~

Street Address

~~[pre-populated]~~

~~[pre-populated]~~

City	*State*	*Zip Code*
~~[pre-populated]~~	~~[pre-populated]~~	~~[pre-populated]~~

IF THE LEGAL NAME OF THE PRINCIPAL HAS CHANGED, MORE INFORMATION MAY BE REQUIRED.

Fourth Item: Financial Information

Financial information must be available for the Principal on whose financial standing the RFP Bidder is relying.

PLEASE PROVIDE THE MOST RECENT QUARTERLY FINANCIAL INFORMATION FOR THE PRINCIPAL ON WHOSE FINANCIAL STANDING THE RFP BIDDER IS RELYING, including a balance sheet, income statement, cash flow statement, and any accompanying notes and schedules:

- **IF AVAILABLE, YOU MUST PROVIDE THE MOST RECENT SECURITIES AND EXCHANGE COMMISSION ("SEC") FORM 10-Q OR 10-K (WHICHEVER IS MORE RECENT) TO FULFILL THIS REQUIREMENT;**
- **IF THE SEC FORM 10-Q OR 10-K IS UNAVAILABLE, YOU MUST PROVIDE THE RFP PRINCIPAL'S MOST RECENT QUARTERLY, MONTHLY, OR BI-ANNUAL FINANCIAL INFORMATION** accompanied by an attestation by the Chief Financial Officer (or similar position) that the information contained in the financial statements fairly presents in all material respects the financial condition and results of the operations of the RFP Bidder. The requirements for this attestation are provided more specifically in Appendix 5 of the RFP Rules.

	Most recent quarterly financial information (or, if unavailable, most recent monthly or bi-annual financial information accompanied by an attestation by the Chief Financial Officer)
	Attestation from Chief Financial Officer (if necessary)

Fifth Item: Credit Ratings

~~Below is the information that you previously provided.~~ **PLEASE ~~MAKE ANY UPDATES TO~~ PROVIDE THE CREDIT RATINGS FOR THE RFP PRINCIPAL.** ~~By submitting this form without making updates, you will be confirming that the previously provided information remains valid.~~

Is the Principal rated by S&P Global Ratings ("S&P")?

☒ **Yes** ☐ **No**

Principal's rating: ____

Type of rating (**check one**): ☐ Senior unsecured debt rating ☐ Corporate issuer rating

Is the Principal rated by Moody's Investors Service, Inc. ("Moody's")?

☒ **Yes** ☐ **No**

Principal's rating: ____
Type of rating (**check one**): ☐ Senior unsecured debt rating ☐ Corporate issuer rating

Is the Principal rated by Fitch, Inc. ("Fitch")?

☒ **Yes** ☐ **No**

Principal's rating: ____
Type of rating (**check one**): ☐ Senior unsecured debt rating ☐ Corporate issuer rating

Sixth Item: Certification

THE OFFICER OF THE RFP BIDDER SUBMITTING A PROPOSAL UNDER AN AGENCY AGREEMENT IS REQUIRED TO MAKE A CERTAIN REPRESENTATION BY COMPLETING THE P1 AGENCY CERTIFICATIONS (#P1-3). The P1 Agency Certifications Insert is also labelled INSERT #P1-3.

PLEASE REFER TO THE AGENCY CERTIFICATIONS INSERT (#P1-3) FOR THE ACCEPTABLE METHODS TO COMPLETE AND SUBMIT THIS INSERT. IF THIS INSERT IS NOT COMPLETED WITH A DIGITAL SIGNATURE, IT MUST BE SENT BY EMAIL TO THE INDEPENDENT EVALUATOR AT PECOPROCUREMENT@NERA.COM BY THE SIGNATORY (HERE THE OFFICER OF THE RFP BIDDER) OR WITH THE SIGNATORY ON COPY.

_____
Name of RFP Bidder

P1 AGENCY CERTIFICATIONS ~~(PREV QUAL)~~ INSERT (#P1-3)

THE INDEPENDENT EVALUATOR IS ACCEPTING A DIGITAL SIGNATURE FOR THIS INSERT. THE INDEPENDENT EVALUATOR IS ALSO ACCEPTING AN ELECTRONIC SIGNATURE OR A SCANNED WET SIGNATURE AS LONG AS THIS INSERT IS SENT BY EMAIL BY THE SIGNATORY OR WITH THE SIGNATORY ON COPY.

This Insert may be completed as follows:

- *Submitted with a digital signature (using commercially available software such as DocuSign) with an accompanying document or information verifying the identity of the signatory.*

If completed with a digital signature, this Insert and accompanying document or information may be uploaded to the online Part 1 Form or may be sent by email to the Independent Evaluator at PECOProcurement@NERA.com.

This Insert may also be completed as follows:

- *Submitted with a scanned wet signature;*

or

- *Submitted with an electronic signature (such as an image of a signature).*

If completed with a scanned or electronic signature, this Insert must be sent by email to the Independent Evaluator at PECOProcurement@NERA.com by the signatory (here the Officer of the RFP Bidder) or with the signatory on copy.

Please note! Only RFP Bidders submitting a Proposal under an Agency Agreement are required to complete this Insert.

THE OFFICER OF THE RFP BIDDER MUST MAKE THE FOLLOWING REPRESENTATION.

I, _____ (the Officer of the RFP Bidder), certify that I have the authority to bind the Principal(s) under the Agency Agreement provided with this Part 1 Proposal. I acknowledge that with the Part 2 Proposal, the RFP Bidder will be required to submit an Officers' Certificate signed by an officer of each Principal and substantially in the form of Appendix 6 to the RFP Rules.

_____ _____
Signature of Officer Date

~~RFP Bidders that have submitted a successful Part 1 Proposal for a prior solicitation under DSP V previously acknowledged that, with the Part 2 Proposal, the RFP Bidder will be required to submit an Officers' Certificate signed by an officer of each Principal and substantially in the form of Appendix 6 to the RFP Rules.~~

Seventh Item: Draft Officers' Certificate

The RFP Bidder may, but is not required to, submit a draft Officers' Certificate for evaluation. If a draft Officers' Certificate is submitted for evaluation, the Independent Evaluator will inform the RFP Bidder of any changes required.

Is the RFP Bidder submitting a draft Officers' Certificate?
☒ **Yes** ☐ **No**

PLEASE PROVIDE THE RFP BIDDER'S DRAFT OFFICERS' CERTIFICATE.

	Draft Officers' Certificate

3. Credit Instruments and Uniform SMA

First Item: Standard Pre-Bid Letter of Credit

An RFP Bidder may request modifications to the Standard Pre-Bid Letter of Credit that are non-material in nature, or that are advantageous to both PECO and the RFP Bidder.

AN RFP BIDDER REQUESTS MODIFICATIONS TO THE STANDARD PRE-BID LETTER OF CREDIT BY SUBMITTING A DRAFT PRE-BID LETTER OF CREDIT SUBSTANTIALLY IN THE FORM OF THE STANDARD PRE-BID LETTER OF CREDIT INDICATING CLEARLY ANY AND ALL MODIFICATIONS TO THE STANDARD PRE-BID LETTER OF CREDIT USING TRACKED CHANGES IN MICROSOFT WORD.

All approved modifications to the Standard Pre-Bid Letter of Credit are posted to the RFP website. Each RFP Bidder may use any of the approved modifications, regardless of whether the RFP Bidder itself or another RFP Bidder proposed the modification.

Is the RFP Bidder submitting a Draft Pre-Bid Letter of Credit?
☒ **Yes** ☐ **No**

Does the Draft Pre-Bid Letter of Credit contain the same requested modifications as a Draft Pre-Bid Letter of Credit submitted in a prior solicitation?
☐ **Yes** ☐ **No**

☒ **No**

A Draft Pre-Bid Letter of Credit that is not substantially in the form of the Standard Pre-Bid Letter of Credit will not be considered or evaluated. **PLEASE PROVIDE THE DRAFT PRE-BID LETTER OF CREDIT.**

	Draft Pre-Bid Letter of Credit

☒ **Yes**
A Draft Pre-Bid Letter of Credit that contains the same requested modifications as a prior submittal will not be reviewed again by PECO. To request the Independent Evaluator to email to you PECO's assessment of the prior submittal, please email such request to pecoprocurement@nera.com.

Second Item: Standard Post-Bid Letter of Credit

An RFP Bidder may request modifications to the Standard Post-Bid Letter of Credit that are non-material in nature, or that are advantageous to both PECO and the RFP Bidder.

AN RFP BIDDER REQUESTS MODIFICATIONS TO THE STANDARD POST-BID LETTER OF CREDIT BY SUBMITTING A DRAFT POST-BID LETTER OF CREDIT SUBSTANTIALLY IN THE FORM OF THE STANDARD POST-BID LETTER OF CREDIT INDICATING CLEARLY ANY AND ALL MODIFICATIONS TO THE STANDARD POST-BID LETTER OF CREDIT USING TRACKED CHANGES IN MICROSOFT WORD.

All approved modifications to the Standard Post-Bid Letter of Credit are posted to the RFP website. Each RFP Bidder may use any of the approved modifications, regardless of whether the RFP Bidder itself or another RFP Bidder proposed the modification.

Is the RFP Bidder submitting a Draft Post-Bid Letter of Credit?
☒ **Yes** ☐ **No**

Does the Draft Post-Bid Letter of Credit contain the same requested modifications as a Draft Post-Bid Letter of Credit submitted in a prior solicitation?
☐ **Yes** ☐ **No**

☒ **No**

A Draft Post-Bid Letter of Credit that is not substantially in the form of the Standard Post-Bid Letter of Credit will not be considered or evaluated. **PLEASE PROVIDE THE DRAFT POST-BID LETTER OF CREDIT.**

Draft Post-Bid Letter of Credit

☒ **Yes**
A Draft Post-Bid Letter of Credit that contains the same requested modifications as a prior submittal will not be reviewed again by PECO. To request the Independent Evaluator to email to you PECO's assessment of the prior submittal, please email such request to pecoprocurement@nera.com.

Third Item: Standard Guaranty

An RFP Bidder may request modifications to the Standard Guaranty that are non-material in nature, or that are advantageous to both PECO and the RFP Bidder.

AN RFP BIDDER REQUESTS MODIFICATIONS TO THE STANDARD GUARANTY BY SUBMITTING A DRAFT GUARANTY SUBSTANTIALLY IN THE FORM OF THE STANDARD GUARANTY INDICATING CLEARLY ANY AND ALL MODIFICATIONS TO THE STANDARD GUARANTY USING TRACKED CHANGES IN MICROSOFT WORD.

All approved modifications to the Standard Guaranty are posted to the RFP website. Each RFP Bidder may use any of the approved modifications, regardless of whether the RFP Bidder itself or another RFP Bidder proposed the modification.

Is the RFP Bidder submitting a Draft Guaranty?
☒ **Yes** ☐ **No**

Does the Draft Guaranty contain the same requested modifications as a Draft Guaranty submitted in a prior solicitation?
☐ **Yes** ☐ **No**

☒ **No**

A Draft Guaranty that is not substantially in the form of the Standard Guaranty will not be considered or evaluated. **PLEASE PROVIDE THE DRAFT GUARANTY.**

Draft Guaranty

☒ **Yes**
A Draft Guaranty that contains the same requested modifications as a prior submittal will not be reviewed again by PECO. To request the Independent Evaluator to email to you PECO's assessment of the prior submittal, please email such request to pecoprocurement@nera.com.

Fourth Item: Information to Prepare the Uniform SMA and Its Exhibits

Is the RFP Bidder a Default Supplier serving tranches won in a solicitation under DSP ~~V~~VI?
☐ **Yes** ☐ **No**
If Yes, please proceed to the Section 4.
If No, please provide the information required by this section.

RFP BIDDERS ARE ASKED TO PROVIDE ALL INFORMATION NEEDED TO PREPARE THE UNIFORM SMA AND ITS EXHIBITS. AN RFP BIDDER THAT DOES NOT PROVIDE THIS INFORMATION MUST INSTEAD SUBMIT AN ACKNOWLEDGMENT SIGNED BY THE OFFICER OF THE RFP BIDDER.

Is the RFP Bidder providing information to prepare the Uniform SMA at this time?
☐ **Yes** ☐ **No**

☒ **Yes**
THE RFP BIDDER PROVIDES THE INFORMATION TO PREPARE THE UNIFORM SMA AND ITS EXHIBITS BY COMPLETING THE UNIFORM SMA INSERT. The Uniform SMA Insert is also labelled INSERT #P1-4.

~~The Independent Evaluator provided to you, along with your login credentials, the Uniform SMA Insert that you submitted previously. You may make any updates to this document. By submitting this form of the Uniform SMA Insert (#P1-4) without making updates, you will be confirming that the previously provided information remains valid.~~

_____
Name of RFP Bidder

UNIFORM SMA INSERT (#P1-4)

Please note! RFP Bidders must submit one (but ONLY one) of Insert #P1-4 and Insert #P1-5.

1. Under Section 5.4(a)(i) of the Uniform SMA, the DS Supplier may, in its sole discretion, add the following subsection 5.4(a)(i) by indicating yes or no below.

   5.4(a)(i) For the purposes of such determination, the DS Supply provided for under this Agreement for the period following the Early Termination Date through the remainder of the term of this Agreement shall be deemed to be those quantity amounts that would have been delivered on an hourly basis, had this Agreement been in effect during the previous calendar year adjusted for such DS Load changes as may have occurred since the previous calendar year.

Do you intend for subsection 5.4(a)(i) to be included as part of the Uniform SMA?
☐ **Yes** ☐ **No**

2. The information that you provide below will be used to complete Exhibit 2 (Form of Notice) to the Uniform SMA. **IF ANY OF THE INFORMATION REQUESTED BELOW IS UNAVAILABLE, PLEASE ENTER N/A IN THE CORRESPONDING FIELDS.**

Appendix 5 - Requirements for Chief Financial Officer Attestation

THE INDEPENDENT EVALUATOR IS ACCEPTING A DIGITAL SIGNATURE OR A NOTARIZED SIGNATURE FOR THE ATTESTATION.

The attestation may be completed as follows:

- *Signed by the Chief Financial Officer, (or similar position) with the signature notarized;*

or:

- *Submitted with a digital signature (using commercially available software such as DocuSign) with an accompanying document or information verifying the identity of the signatory. Digital signatures are not required to be notarized.*

The attestation and any accompanying document or information may be submitted as follows:

- *Uploaded to the online Part 1 Form;*

or:

- *Sent by email to the Independent Evaluator at PECOProcurement@nera.com.*

The attestation by the Chief Financial Officer, (or similar position), if required by Article IV, must fulfill the following requirements:

1. the attestation is ~~a notarized~~an affidavit attached to the financial information provided by the entity;
2. the attestation identifies the person making the affidavit as the Chief Financial Officer (or similar position);
3. the Chief Financial Officer (or similar position) attests that "the information contained in the financial statements fairly presents in all material respects the financial condition and results of the operations of _____[name of entity]".

Appendix 6 - Officers' Certificate
(RFP Bidders Under an Agency Agreement)

THE INDEPENDENT EVALUATOR IS ACCEPTING A DIGITAL SIGNATURE FOR THE OFFICERS' CERTIFICATE. THE INDEPENDENT EVALUATOR IS ALSO ACCEPTING AN ELECTRONIC SIGNATURE OR A SCANNED WET SIGNATURE AS LONG AS THE OFFICERS' CERTIFICATE IS SENT BY EMAIL BY THE SIGNATORY OR WITH THE SIGNATORY ON COPY.

The Officers' Certificate may be completed as follows:

- *Submitted with a digital signature (using commercially available software such as DocuSign) with an accompanying document or information verifying the identity of the signatory.*

If completed with a digital signature, the Officers' Certificate and accompanying document or information may be uploaded to the online Part 1 Form or may be sent by email to the Independent Evaluator at PECOProcurement@NERA.com.

The Officers' Certificate may also be completed as follows:

- *Submitted with a scanned wet signature;*

or

- *Submitted with an electronic signature (such as an image of a signature).*

If completed with a scanned or electronic signature, the Officers' Certificate must be sent by email to the Independent Evaluator at PECOProcurement@NERA.com by each signatory or with each signatory on copy.

Sample

The undersigned hereby certify that they are duly elected, qualified and acting officers holding the offices set forth below their respective names of _____ [name of Principal(s)], the "Principal" or together the "Principals". As such, they are familiar with the affairs of the Principal(s) and the Proposal submitted in response to PECO Energy Company's Default Service Program RFP under DSP ~~IV~~VI, including the agency authorization submitted with the Proposal (the "Agency Agreement"). They are authorized to execute and deliver this certificate on behalf of the Principal(s).

They further certify that:

(i) the copy of the Agency Agreement submitted with the Proposal is a true and complete copy of the Agency Agreement as currently in effect;

(ii) the Agency Agreement is in full force and effect and shall remain in full force and effect for a period extending to six (6) business days following the Bid Date;

(iii) there are no proceedings pending for the amendment or termination of the Agency Agreement, contemplated by the RFP Bidder, or contemplated by the Principal(s) to the RFP Bidder's knowledge;

(iv) each individual who has executed this officers' certificate and the Agency Agreement is (or was at the time of the execution of such documents) authorized to execute and deliver such documents on behalf of the Principal(s); and

(v) _____ [insert name], the Officer of the RFP Bidder named in the Part 1 Proposal, is authorized to execute the Uniform SMA as well as any Transaction Confirmation(s) pursuant to the Uniform SMA on behalf of the Principal(s).

Capitalized terms used in this officers' certificate without definition have the meanings assigned to such terms in the RFP Rules.

APPENDIX 7 – ILLUSTRATIVE PART 2 FORM
DEFAULT SERVICE PROGRAM
REQUEST FOR PROPOSALS

STANDARD FORM

PECO Energy Company ("Company" or "PECO") is intending to obtain full requirements electric supply to meet a portion of its obligations as Default Service Provider through this Request for Proposals ("RFP").

Before completing this online Part 2 Form, please review the RFP, including the PECO Energy Company Pennsylvania Default Service Supplier Master Agreement ("Uniform SMA"), so that you understand the conditions under which the RFP will be conducted. These documents are posted at www.pecoprocurement.com.

By having submitted a Part 1 Proposal in response to this RFP, you agreed to all terms and conditions of this RFP.

Any information provided by an RFP Bidder in the Part 2 Proposal is provided on a confidential basis to the Independent Evaluator, and may be provided on a confidential basis to the Staff of the Pennsylvania Public Utility Commission ("Commission"). PECO representatives will review financial information and legal documents provided to fulfill the requirements of the Part 2 Proposal, and will participate in the evaluation of the Pre-Bid Letter of Credit with the name of the RFP Bidder and the amount redacted.

PART 2 FORM

1. Contact Information and Representations

First Item: Name and Address of the RFP Bidder

Below is the information that you previously provided. **PLEASE MAKE ANY NECESSARY UPDATES TO THE RFP BIDDER'S LEGAL NAME AND ADDRESS.** By submitting this form without making updates, you will be confirming that the previously provided information remains valid.

Legal Name of RFP Bidder

Fourth Item: Representations of the Officer of the RFP Bidder

THE OFFICER OF THE RFP BIDDER MUST MAKE A NUMBER OF CERTIFICATIONS TO FULFILL THE REQUIREMENTS OF THE PART 2 PROPOSAL. If the Officer of the RFP Bidder who made the representations and certifications of the Part 1 Form is unavailable to make the representations of the Part 2 Form, the RFP Bidder must name a new individual to serve as Officer of the RFP Bidder and must, in addition to making the representations required in the Part 2 Proposal, re-submit ~~via email~~ the certifications of the Part 1 Form by the Part 2 Date.

THE OFFICER OF THE RFP BIDDER MUST MAKE A NUMBER OF CERTIFICATIONS BY COMPLETING THE P2 CERTIFICATIONS INSERT. ~~THE SIGNATURE MUST BE NOTARIZED OR ATTESTED WITH THE CORPORATE SEAL.~~ The P2 Certifications Insert is also labelled INSERT #P2-1.

PLEASE REFER TO THE P2 CERTIFICATIONS INSERT (#P2-1) FOR THE ACCEPTABLE METHODS TO COMPLETE AND SUBMIT THIS INSERT.

_____
Name of RFP Bidder

P2 CERTIFICATIONS INSERT (#P2-1)

THE INDEPENDENT EVALUATOR IS ACCEPTING A DIGITAL SIGNATURE OR A NOTARIZED SIGNATURE FOR THIS INSERT.

This Insert may be completed as follows:

- *Signed by the Officer of the RFP Bidder with the signature notarized;*

or:

- *Submitted with a digital signature (using commercially available software such as DocuSign) with an accompanying document or information verifying the identity of the signatory. Digital signatures are not required to be notarized.*

This Insert and any accompanying document or information may be submitted as follows:

- *Uploaded to the online Part 1 Form;*

or:

- *Sent by email to the Independent Evaluator at PECOProcurement@nera.com.*

THE OFFICER OF THE RFP BIDDER MUST MAKE THE FOLLOWING CERTIFICATIONS. ~~THE SIGNATURE MUST BE NOTARIZED OR ATTESTED WITH THE CORPORATE SEAL.~~

(1) I certify that this Part 2 Proposal will remain valid and remain in full force and effect until six (6) business days after the Bid Date and if any information provided in the Part 2 Proposal changes or any previous certification fails to remain valid during that time, the RFP Bidder will notify the Independent Evaluator as soon as practicable.

(2) I certify that the RFP Bidder is bidding independently and that it has no knowledge of any information concerning a Proposal by another RFP Bidder in response to this solicitation or any future solicitation under this RFP. Such information includes, but is not limited to: the fact that another RFP Bidder is submitting a Proposal in response to this solicitation or a subsequent solicitation under this RFP; the Bids by another RFP Bidder in this or in a subsequent solicitation under this RFP; the number of tranches bid by another RFP Bidder for any product in this or in a subsequent solicitation under this RFP; the estimation by another RFP Bidder of the value of a tranche of a product; the estimation by another RFP Bidder of the risks associated with providing supply under the Uniform SMA; the preference of another RFP Bidder for bidding on specific products in this or in a subsequent solicitation under the RFP; and the contractual arrangements for power of another RFP Bidder to serve tranches of Default Service Load were that RFP Bidder to become a Default Supplier. This certification must be binding and in effect until the Commission has either approved or rejected each of the winning Bids for this solicitation.

(3) I certify that although the RFP Bidder may disclose aspects of its Proposal in communicating with its financial institution for the purpose of preparing the Pre-Bid Letter of Credit or in communicating with advisors (if any), any such communication is made in a manner that can reasonably be expected to maintain the confidentiality of the RFP Bidder's Proposal.

(4) I certify that, with only the exceptions noted in (3) above, the RFP Bidder has not disclosed, and will not otherwise disclose, publicly or to any other party any information relating to its Proposal, which could have an effect on whether another party submits a Proposal in any solicitation under the RFP, or on the contents of the Proposal that another RFP Bidder would be willing to submit in response to the RFP. Such information includes, but is not limited to: the fact that the RFP

Bidder is submitting a Proposal in response to this RFP; the RFP Bidder's Bids in this or in a subsequent solicitation under this RFP; the RFP Bidder's number of tranches bid for any product in this or in a subsequent solicitation under this RFP; the RFP Bidder's estimation of the value of a tranche of a product; the RFP Bidder's estimation of the risks associated with providing supply under the Uniform SMA; and the RFP Bidder's preference for bidding on specific products in this or in a subsequent solicitation under this RFP. This certification must be binding and in effect until the Commission has either approved or rejected each of the winning Bids for this solicitation.

(5) I certify that any Bid on any product submitted in response to this RFP for this solicitation is binding until six (6) business days after the Bid Date and constitutes a binding and irrevocable offer to provide service under the terms of the Uniform SMA at the price specified in the Bid.

(6) I certify that I will execute (or I will nominate another authorized individual to execute) the Uniform SMA and all Transaction Confirmation(s) for the RFP Bidder's Bids that are approved by the Commission no later than 2PM on the third business day after the Commission has accepted such Bids.

(7) I certify that in each Transaction Confirmation, the RFP Bidder will specify a price for each type of AECs (Tier I, Tier I Solar, and Tier II) that is included in the RFP Bidder's winning Bids and each such price must be greater than $0/AEC.

_____ _____
Signature of Officer Date

_____ _____
Signature and Seal from Notary Public Date

2. Pre-Bid Letter of Credit

THE RFP BIDDER MUST PROVIDE AN EXECUTED PRE-BID LETTER OF CREDIT, drawn for the account of the RFP Bidder and acceptable to PECO, **IN AN AMOUNT OF AT LEAST: $250,000 PER TRANCHE BID ON PRODUCTS OF THE RES AND SC CLASSES FOR FULL REQUIREMENTS ON A FIXED-PRICE BASIS, PLUS, IF APPLICABLE, $125,000 PER TRANCHE BID ON A PRODUCT FOR THE CCI CLASS FOR FULL REQUIREMENTS ON A SPOT-PRICE BASIS.** A single Pre-Bid Letter of Credit is submitted even if the RFP Bidder bids on more than one product or, if applicable, the RFP Bidder bids to supply both full requirements on a fixed-price basis and full requirements on a spot-price basis.

The RFP Bidder must either use the Standard Pre-Bid Letter of Credit, provided on www.pecoprocurement.com, or submit a Pre-Bid Letter of Credit that incorporates only those modifications to the Standard Pre-Bid Letter of Credit accepted as a result of the evaluation of the Part 1 Proposals.

THE ~~HARDCOPY EXECUTED~~ PRE-BID LETTER OF CREDIT MUST BE ~~SENT BY OVERNIGHT DELIVERY SERVICE~~SUBMITTED AS AN ELECTRONIC PDF FILE VIA ELECTRONIC MEANS ONLY to the Independent Evaluator at ~~the address provided to RFP Bidders for this purpose.~~

~~*At the time this form is submitted, has the*~~pecoprocurement@nera.com. A Pre-Bid Letter of Credit ~~*already been sent to the Independent Evaluator?*~~sent in hardcopy cannot be accepted.

~~☒ Yes~~ ~~☐ No~~

~~RFP Bidders may, but are not required to, upload or email to pecoprocurement@nera.com an electronic executed version of the Pre-Bid Letter of Credit for evaluation.~~

~~———~~	~~*Electronic version of Executed Pre-Bid Letter of Credit*~~

PECO and the Independent Evaluator will release the Pre-Bid Letter of Credit no later than six (6) business days after the Bid Date. If the Commission does not approve any of the RFP Bidder's Bids, PECO and the Independent Evaluator will release that RFP Bidder's Pre-Bid Letter of Credit within three (3) business days of the Bid Date.

Would you like to provide special instructions for returning the Pre-Bid Letter of Credit?

☒ **Yes** ☐ **No**

PLEASE PROVIDE ~~ANY~~ SPECIAL INSTRUCTIONS FOR RETURNING THE PRE-BID LETTER OF CREDIT BELOW.

3. Additional Requirements

3a. Requirements for RFP Bidders Relying on Their Own Financial Standing

You previously elected the RFP Bidder as the entity on whose financial standing the RFP Bidder is relying. **YOU HAVE NO ADDITIONAL REQUIREMENTS** under this section and you may proceed to the next section.

3b. Requirements for RFP Bidders Relying on the Financial Standing of an RFP Guarantor

You previously elected ~~to rely on~~ an RFP Guarantor as the entity on whose financial standing ~~of an~~the RFP ~~Guarantor.~~ Bidder is relying. **THE RFP BIDDER MUST PROVIDE THE GUARANTY DOCUMENTS REQUIRED BY THIS SECTION.**

First Item: Intent to Provide a Guaranty

A REPRESENTATIVE OF THE RFP GUARANTOR WHO IS AUTHORIZED TO UNDERTAKE CONTRACTS (INCLUDING THE GUARANTY) AND BIND THAT RFP GUARANTOR MUST MAKE THE CERTIFICATIONS PROVIDED IN THE GUARANTY INTENT INSERT. The Guaranty Intent Insert is also labelled INSERT #P2-2.

PLEASE REFER TO THE GUARANTY INTENT INSERT (#P2-2) FOR THE ACCEPTABLE METHODS TO COMPLETE AND SUBMIT THIS INSERT. IF THIS INSERT IS NOT COMPLETED WITH A DIGITAL SIGNATURE, IT MUST BE SENT BY EMAIL TO THE INDEPENDENT EVALUATOR AT PECOPROCUREMENT@NERA.COM BY THE SIGNATORY (HERE A REPRESENTATIVE OF THE RFP GUARANTOR) OR WITH THE SIGNATORY ON COPY.

_____
Name of RFP Bidder

GUARANTY INTENT INSERT (#P2-2)

THE INDEPENDENT EVALUATOR IS ACCEPTING A DIGITAL SIGNATURE FOR THIS INSERT. THE INDEPENDENT EVALUATOR IS ALSO ACCEPTING AN ELECTRONIC SIGNATURE OR A SCANNED WET SIGNATURE AS LONG AS THIS INSERT IS SENT BY EMAIL BY THE SIGNATORY OR WITH THE SIGNATORY ON COPY.

This Insert may be completed as follows:

- *Submitted with a digital signature (using commercially available software such as DocuSign) with an accompanying document or information verifying the identity of the signatory.*

If completed with a digital signature, this Insert and accompanying document or information may be uploaded to the online Part 1 Form or may be sent by email to the Independent Evaluator at PECOProcurement@NERA.com.

This Insert may also be completed as follows:

- *Submitted with a scanned wet signature;*

or

- *Submitted with an electronic signature (such as an image of a signature).*

If completed with a scanned or electronic signature, this Insert must be sent by email to the Independent Evaluator at PECOProcurement@NERA.com by the signatory (here a Representative of the RFP Guarantor) or with the signatory on copy.

PLEASE PROVIDE THE INDICATIVE AMOUNT OF THE GUARANTY IN THE SPACE PROVIDED. THE INDICATIVE AMOUNT MUST MEET OR EXCEED THE SUM OF: (I) $600,000 TIMES THE NUMBER OF TRANCHES BID ON PRODUCTS FOR THE RES AND SC CLASSES FOR FULL REQUIREMENTS ON A FIXED-PRICE BASIS; AND, IF APPLICABLE, (II) $300,000 TIMES THE NUMBER OF TRANCHES BID ON THE CCI CLASS FOR FULL REQUIREMENTS ON A SPOT-PRICE BASIS.

I acknowledge that _____ ("RFP Guarantor") has been asked to provide a financial guaranty on behalf of _____ ("RFP Bidder") should the RFP Bidder become a Default Supplier pursuant to its response under this RFP for procuring supply under the terms of the Uniform SMA. Our senior unsecured debt rating meets the Minimum Rating as defined in the Uniform SMA.

We would consider providing a financial guaranty on behalf of the RFP Bidder should there be no material change in affairs of at least $ _____ (Indicative Amount). This statement should not and cannot be taken as an indication of financing commitment of any kind whatsoever, or an absolute commitment to provide a financial guaranty.

_____ _____
Signature of a Representative of the RFP Guarantor Date

_____
Printed Name

Second Item: Information to Prepare the Guaranty

In accordance with Paragraph V.3.3 of the RFP Rules, **THE RFP BIDDER IS ASKED TO PROVIDE THE FOLLOWING INFORMATION TO PREPARE THE GUARANTY**:

- the governing laws under which the RFP Guarantor is organized;
- contact information for the RFP Guarantor, including the name and title of the signatory of the guaranty for notices under the guaranty;
- elections to incorporate any or all of the approved modifications to the Standard Guaranty.

THE RFP BIDDER MUST EITHER: (i) provide the requested information to prepare the guaranty at this time; or: (ii) submit an acknowledgment signed by the Officer of the RFP Bidder that, if the Independent Evaluator notifies the RFP Bidder that the Independent Evaluator is identifying one or more of the RFP Bidder's Bids to the Commission as winning Bids, the RFP Bidder must provide all required information by 12 PM (noon) EPT on the day after such notification is received.

Is the RFP Bidder providing information to prepare the guaranty at this time?
☐ **Yes** ☐ **No**

☒ **Yes**

THE RFP BIDDER PROVIDES THE INFORMATION TO PREPARE THE GUARANTY BY COMPLETING THE GUARANTY INSERT. The Guaranty Insert is also labelled INSERT #P2-3.

PLEASE REFER TO THE GUARANTY INSERT (#P2-3) FOR THE ACCEPTABLE METHODS TO COMPLETE AND SUBMIT THIS INSERT. IF THIS INSERT IS NOT COMPLETED WITH A DIGITAL SIGNATURE, IT MUST BE SENT BY EMAIL TO THE INDEPENDENT EVALUATOR AT PECOPROCUREMENT@NERA.COM BY THE SIGNATORY (HERE THE OFFICER OF THE RFP BIDDER OR THE REPRESENTATIVE OF THE RFP BIDDER) OR WITH THE SIGNATORY ON COPY.

_____
Name of RFP Bidder

~~**GUARANTY INSERT (#P2-3)**~~ **GUARANTY INSERT (#P2-3)**

THIS INSERT MAY REQUIRE A SIGNATURE. IF REQUIRED, THE INDEPENDENT EVALUATOR IS ACCEPTING A DIGITAL SIGNATURE FOR THIS INSERT. THE INDEPENDENT EVALUATOR IS ALSO ACCEPTING AN ELECTRONIC SIGNATURE OR A SCANNED WET SIGNATURE AS LONG AS THIS INSERT IS SENT BY EMAIL BY THE SIGNATORY OR WITH THE SIGNATORY ON COPY.

This Insert may be completed as follows:

- *Submitted with a digital signature (using commercially available software such as DocuSign) with an accompanying document or information verifying the identity of the signatory.*

If completed with a digital signature, this Insert and accompanying document or information may be uploaded to the online Part 1 Form or may be sent by email to the Independent Evaluator at PECOProcurement@NERA.com.

This Insert may also be completed as follows:

- *Submitted with a scanned wet signature;*

or

- *Submitted with an electronic signature (such as an image of a signature).*

If completed with a scanned or electronic signature, this Insert must be sent by email to the Independent Evaluator at PECOProcurement@NERA.com by the signatory (here the Officer of the RFP Bidder or the Representative of the RFP Bidder) or with the signatory on copy.

Please note! **RFP Bidders relying on the financial standing of an RFP Guarantor must submit one (but ONLY one) of Insert #P2-3 or Insert #P2-4.**

1. Governing Laws under which the RFP Guarantor is Organized

   Whether the RFP Guarantor is a Corporation, Partnership, etc.

Jurisdiction under whose laws the RFP Guarantor is existing and organized.

Name of relevant and binding corporate organizational document, such as Declaration of Trust, Limited Liability Company Agreement, Articles of Incorporation and by-laws.

2. Governing Laws under which the RFP Bidder is Organized

Whether the RFP Bidder is a Corporation, Partnership, etc.

Jurisdiction under whose laws the RFP Bidder is existing and organized.

3. Contact Information

Please provide the name and contact information for the person to whom notices and other communications will be sent under the guaranty:

24	Paragraph 9	☐ yes ☐ no

(*a*) Optional change #7 is available only to an RFP Bidder that has an outstanding guaranty with PECO.

PLEASE PROVIDE THE FOLLOWING ADDITIONAL INFORMATION IF YOU ELECT OPTIONAL CHANGE #7:

Date of Existing Guaranty _____ *Amount of Existing Guaranty* _____

(*b*) THE REPRESENTATIVE OF THE RFP BIDDER OR THE OFFICER OF THE RFP BIDDER MUST MAKE THE FOLLOWING REPRESENTATION IF YOU ELECT OPTIONAL CHANGE #20:

I, _____ (the Officer of the RFP Bidder or the Representative of the RFP Bidder), certify that the RFP Guarantor, on whose financial standing the RFP Bidder will be relying, is not a trust.

_____ _____
Signature Date

(*c*) PLEASE PROVIDE THE NAME AND TITLE OF THE ADDITIONAL PERSON WHO WILL BE SIGNING THE GUARANTY IF YOU ELECT OPTIONAL CHANGE #21:

First Name | *Last Name*

Title

(*d*) PLEASE PROVIDE THE FOLLOWING ADDITIONAL INFORMATION IF YOU ELECT OPTIONAL CHANGE #22:

Name of Additional Guarantor

Whether the Additional Guarantor is a Corporation, Partnership, etc.

Jurisdiction under whose laws the Additional Guarantor is existing and organized.

(*e*) PLEASE PROVIDE THE FOLLOWING ADDITIONAL INFORMATION IF YOU ELECT OPTIONAL CHANGE #23:

Name of Additional Guarantor

Whether the Additional Guarantor is a Corporation, Partnership, etc.

Jurisdiction under whose laws the Additional Guarantor is existing and organized.

☒ **NO**

THE OFFICER OF THE RFP BIDDER PROVIDES THE REQUIRED ACKNOWLEDGMENT BY COMPLETING THE DELAY (GUARANTY) INSERT. The Delay (Guaranty) Insert is also labelled INSERT #P2-4.

PLEASE REFER TO THE DELAY (GUARANTY) INSERT (#P2-4) FOR THE ACCEPTABLE METHODS TO COMPLETE AND SUBMIT THIS INSERT. IF THIS INSERT IS NOT COMPLETED WITH A DIGITAL SIGNATURE, IT MUST BE SENT BY EMAIL TO THE INDEPENDENT EVALUATOR AT PECOPROCUREMENT@NERA.COM BY THE SIGNATORY (HERE THE OFFICER OF THE RFP BIDDER) OR WITH THE SIGNATORY ON COPY.

_____
Name of RFP Bidder

DELAY (GUARANTY) INSERT (#P2-4)

THE INDEPENDENT EVALUATOR IS ACCEPTING A DIGITAL SIGNATURE FOR THIS INSERT. THE INDEPENDENT EVALUATOR IS ALSO ACCEPTING AN ELECTRONIC SIGNATURE OR A SCANNED WET SIGNATURE AS LONG AS THIS INSERT IS SENT BY EMAIL BY THE SIGNATORY OR WITH THE SIGNATORY ON COPY.

This Insert may be completed as follows:

- *Submitted with a digital signature (using commercially available software such as DocuSign) with an accompanying document or information verifying the identity of the signatory.*

If completed with a digital signature, this Insert and accompanying document or information may be uploaded to the online Part 1 Form or may be sent by email to the Independent Evaluator at PECOProcurement@NERA.com.

This Insert may also be completed as follows:

- *Submitted with a scanned wet signature;*

or

- *Submitted with an electronic signature (such as an image of a signature).*

If completed with a scanned or electronic signature, this Insert must be sent by email to the Independent Evaluator at PECOProcurement@NERA.com by the signatory (here the Officer of the RFP Bidder) or with the signatory on copy.

Please note! **RFP Bidders relying on the financial standing of an RFP Guarantor must submit one (but ONLY one) of Insert #P2-3 or Insert #P2-4.**

I, _____ (the Officer of the RFP Bidder), acknowledge that, if the Independent Evaluator notifies the RFP Bidder that the Independent Evaluator is identifying one or more of the RFP Bidder's Bids to the Commission as winning Bids, the RFP Bidder must provide all information required by the Guaranty Insert (#P2-3) by 12 PM (noon) EPT on the day after such notification is received.

_____ _____
Signature of Officer Date

Third Item: Enforceability Opinion for an Alternate Guaranty

Did you receive approval from PECO to use an alternate guaranty form through the Alternate Guaranty Process?

☐ **Yes** ☐ **No**

☒ **Yes**

EACH RFP BIDDER THAT RELIES ON THE FINANCIAL STANDING OF AN RFP GUARANTOR AND THAT HAS OBTAINED APPROVAL FOR USE OF AN ALTERNATE GUARANTY FORM MUST PROVIDE AN EXECUTED ENFORCEABILITY OPINION for its approved alternate guaranty form on the letterhead of a law firm of national standing**.**

PLEASE PROVIDE THE ENFORCEABILITY OPINION IN THE SPACE PROVIDED BELOW OR BY EMAIL TO PECOPROCUREMENT@NERA.COM.

	Enforceability Opinion

3c. Requirements for RFP Bidders Relying on the Financial Standing of an RFP Principal

AN RFP BIDDER SUBMITTING A PROPOSAL UNDER AN AGENCY AGREEMENT IS REQUIRED TO PROVIDE AN OFFICERS' CERTIFICATE AS WELL AS CONTACT INFORMATION FOR A REPRESENTATIVE OF THE PRINCIPAL as specified in Section V.4 of the RFP Rules.

First Item: Officer's Certificate

PLEASE SUBMIT ONE (1) COPY OF THE REQUIRED OFFICERS' CERTIFICATE, SIGNED BY AN OFFICER OF EACH PRINCIPAL, BY UPLOAD TO THE ONLINE PART 2 FORM OR BY EMAIL TO PECOPROCUREMENT@NERA.COM. The Independent Evaluator and PECO will determine whether the document provided is sufficient, without any liability or obligation to the RFP Bidder or its Principal(s). The Officers' Certificate should be substantially in the form of Appendix 6 to the RFP Rules.

	Officers' Certificate

Second Item: Signatory to the Uniform SMA

Is a representative of the RFP Bidder authorized to execute the Transaction Confirmation(s) and to sign the Uniform SMA (if applicable) on behalf of the Principal(s)?

☐ **Yes** ☐ **No**

☒ **NO**

Please provide the information of the representative of the Principal who will sign the Uniform SMA (if applicable) and any Transaction Confirmation.

4. Foreign RFP Bidders and Foreign Entities

Is the RFP Bidder a Foreign RFP Bidder, or is the RFP Bidder relying on the financial standing of a Foreign Entity as RFP Guarantor or is the RFP Bidder submitting a Proposal under an Agency Agreement with a Foreign Entity as Principal?

☒ ☐ **Yes** ~~*[pre-populated]*~~ ☐ **No** ~~*[pre-populated]*~~

☒ **Yes**

AN RFP BIDDER THAT IS A FOREIGN RFP BIDDER~~,~~ OR THAT IS RELYING ON THE FINANCIAL STANDING OF A FOREIGN ENTITY AS RFP GUARANTOR~~,~~ OR THAT ~~IS SUBMITTING~~SUBMITS A PROPOSAL UNDER AN AGENCY AGREEMENT WITH A FOREIGN ENTITY AS PRINCIPAL IS REQUIRED TO PROVIDE ADDITIONAL INFORMATION AS SPECIFIED IN SECTION V.5 OF THE RFP RULES by completing the P2 Foreign Entity Insert and providing associated documents below. The P2 Foreign Entity Insert is also labelled INSERT #P2-5.

	Insert #P2-5
	Additional Evidence of Creditworthiness
	Additional Evidence of Creditworthiness
	Legal opinion
	Sworn certificate
	Sworn certificate

_____
Name of RFP Bidder

P2 FOREIGN ENTITY INSERT (#P2-5)

Please note! Only RFP Bidders that are Foreign Entities, or that rely on the financial standing of a Foreign Entity as RFP Guarantor, or that submit a Proposal under an Agency Agreement with a Foreign Entity as Principal, are required to complete this Insert. The requirements are provided in Section V.5 of the RFP Rules.

Are you a previously eligible RFP Bidder (i.e., did you successfully complete the Part 2 Proposal on a prior solicitation under DSP ~~V~~VI)?

☐ **Yes** ☐ **No**

If no, please complete Section A below.
If yes, please complete Section B below.

SECTION A. RFP BIDDERS THAT HAVE NOT PREVIOUSLY COMPLETED THE PART 2 PROPOSAL

PLEASE COMPLETE ONLY THE ITEM THAT APPLIES TO YOU:

Circumstances	Item to Complete
The RFP Bidder is a Foreign Entity	First Item
The RFP Bidder relies on the financial standing of a Foreign Entity as RFP Guarantor	Second Item
The RFP Bidder is submitting a Proposal under an Agency Agreement with a Foreign Entity as Principal	Third Item

First Item: Required Documents for Foreign RFP Bidders

A FOREIGN RFP BIDDER MUST PROVIDE THE ADDITIONAL DOCUMENTS LISTED BELOW TO THE ONLINE PART 2 FORM OR BY EMAIL TO PECOPROCUREMENT@NERA.COM FOR THE FOREIGN RFP BIDDER.

(1) **one (1) executed original** legal opinion of outside counsel qualified to practice in the foreign jurisdiction in which the RFP Bidder is incorporated or otherwise formed that the Uniform SMA is, or upon the completion of execution formalities will become, the binding obligation of the RFP Bidder in the jurisdiction in which it has been incorporated or otherwise formed. Exhibit 4 to the Uniform SMA includes a sample of a sufficient legal opinion.

(2) **one (1) executed original** sworn certificate of the corporate secretary (or similar officer) of such RFP Bidder that the person executing the Uniform SMA on behalf of the RFP Bidder has the authority to execute the Uniform SMA and that the governing board of such RFP Bidder has approved the execution of the Uniform SMA.

(3) **one (1) executed original** sworn certificate of the corporate secretary (or similar officer) of such RFP Bidder that the RFP Bidder has been authorized by its governing board to enter into agreements of the same type as the Uniform SMA.

PECO will determine whether such documents are sufficient. If the documents are not sufficient, the RFP Bidder may not be eligible to continue its participation in the RFP.

Second Item: Required Documents for RFP Bidders with a Foreign Entity as RFP Guarantor

AN RFP BIDDER RELYING ON THE FINANCIAL STANDING OF A FOREIGN ENTITY AS RFP GUARANTOR MUST PROVIDE THE ADDITIONAL DOCUMENTS LISTED BELOW TO THE ONLINE PART 2 FORM OR BY EMAIL TO PECOPROCUREMENT@NERA.COM FOR THE RFP GUARANTOR TO BE GRANTED UNSECURED CREDIT UNDER THE TERMS OF THE UNIFORM SMA.

(1) **one (1) executed original** legal opinion of outside counsel qualified to practice in the foreign jurisdiction in which the RFP Guarantor is incorporated or otherwise formed that the guaranty pursuant to the Uniform SMA is, or upon the completion of execution formalities will become, the binding obligation of the RFP Guarantor in the jurisdiction in which it has been incorporated or otherwise formed. Exhibit 4 to the Uniform SMA includes a sample of a sufficient legal opinion.

(2) **one (1) executed original** sworn certificate of the corporate secretary (or similar officer) of such RFP Guarantor that the person executing the guaranty pursuant to the Uniform SMA on behalf of the RFP Guarantor has the authority to execute the guaranty pursuant to the Uniform SMA and that the governing board of such RFP Guarantor has approved the execution of the guaranty pursuant to the Uniform SMA;

(3) **one (1) executed original** sworn certificate of the corporate secretary (or similar officer) of such RFP Guarantor that the RFP Guarantor has been authorized by its governing board to enter into agreements of the same type as the guaranty pursuant to the Uniform SMA.

If the RFP Bidder does not submit these documents, or if these documents are not sufficient, the Foreign Entity as RFP Guarantor is not granted unsecured credit under the terms of the Uniform SMA. In that case, the RFP Bidder may not rely on the financial standing of the RFP Guarantor. The Independent Evaluator may request additional financial or credit information regarding the RFP Bidder.

Third Item: Required Documents for RFP Bidders with a Foreign Entity as Principal

AN RFP BIDDER SUBMITTING A PROPOSAL UNDER AN AGENCY AGREEMENT WITH A FOREIGN ENTITY AS PRINCIPAL MUST PROVIDE THE ADDITIONAL DOCUMENTS LISTED BELOW TO THE ONLINE PART 2 FORM OR BY EMAIL TO PECOPROCUREMENT@NERA.COM.

(1) one (1) executed original legal opinion of outside counsel qualified to practice in the foreign jurisdiction in which the Principal is incorporated or otherwise formed that the Uniform SMA is, or upon the completion of execution formalities will become, the binding obligation of the Principal in the jurisdiction in which it has been incorporated or otherwise formed. Exhibit 4 to the Uniform SMA includes a sample of a sufficient legal opinion.

(2) one (1) executed original sworn certificate of the corporate secretary (or similar officer) of such Principal that the Principal has been authorized by its governing board to enter into agreements of the same type as the Uniform SMA.

PECO will determine whether such documents are sufficient. If the documents are not sufficient, the RFP Bidder may not be eligible to continue its participation in the RFP.

SECTION B. PREVIOUSLY ELIGIBLE RFP BIDDERS (THAT HAVE SUCCESSFULLY COMPLETED THE PART 2 PROPOSAL IN A PRIOR SOLICITATION)

PLEASE COMPLETE ONLY THE ITEM THAT APPLIES TO YOU:

Circumstances	Item to Complete
The RFP Bidder is a Foreign Entity	First Item
The RFP Bidder relies on the financial standing of a Foreign Entity as RFP Guarantor	Second Item
The RFP Bidder is submitting a Proposal under an Agency Agreement with a Foreign Entity as Principal	Third Item

First Item: Required Documents for Foreign RFP Bidders

For each document required of Foreign RFP Bidders, a Foreign RFP Bidder that is previously eligible must either: (i) confirm that the document and submitted in a previous solicitation under DSP ~~V~~VI remains valid; or: (ii) provide the document by upload to the online Part 2 form or email to pecoprocurement@nera.com if it has changed.

PLEASE USE THE TABLE BELOW TO SELECT, FOR EACH DOCUMENT, WHETHER (I) THE DOCUMENT REMAINS VALID OR (II) THE DOCUMENT HAS CHANGED AND IS BEING RESUBMITTED. By clicking the box that a document remains valid, you are confirming that such document continues to meet the requirements of Section V.5 of the RFP Rules.

REQUIRED DOCUMENTS	Remains valid (not submitted)	Has changed (submitted this solicitation)
one (1) executed original legal opinion of outside counsel qualified to practice in the foreign jurisdiction in which the Foreign RFP Bidder is incorporated or otherwise formed that the Uniform SMA is, or upon the completion of execution formalities will become, the binding obligation of the Foreign RFP Bidder in	☐	☐

the jurisdiction in which it has been incorporated or otherwise formed. Exhibit 4 to the Uniform SMA includes a sample of a sufficient legal opinion.		
one (1) executed original sworn certificate of the corporate secretary (or similar officer) of such Foreign RFP Bidder that the person executing the Uniform SMA on behalf of the Foreign RFP Bidder has the authority to execute the Uniform SMA and that the governing board of such Foreign RFP Bidder has approved the execution of the Uniform SMA.	☐	☐
one (1) executed original sworn certificate of the corporate secretary (or similar officer) of such Foreign RFP Bidder that the Foreign RFP Bidder has been authorized by its governing board to enter into agreements of the same type as the Uniform SMA.	☐	☐

PECO will determine whether such documents are sufficient. If the documents are not sufficient, the RFP Bidder may not be eligible to continue its participation in the RFP.

Second Item: Required Documents for RFP Bidders with a Foreign Entity as RFP Guarantor

For each document required of an RFP Bidder relying on the financial standing of a Foreign Entity as RFP Guarantor, an RFP Bidder that is previously eligible must either: (i) confirm that the document and submitted in a previous solicitation under DSP ~~V~~VI remains valid; or (ii) provide the document by upload to the online Part 2 form or email to pecoprocurement@nera.com if it has changed.

PLEASE USE THE TABLE BELOW TO SELECT, FOR EACH DOCUMENT, WHETHER (I) THE DOCUMENT REMAINS VALID OR (II) THE DOCUMENT HAS CHANGED AND IS BEING RESUBMITTED. By clicking the box that a document remains valid, you are confirming that such document continues to meet the requirements of Section V.5 of the RFP Rules.

REQUIRED DOCUMENTS	Remains valid (not submitted)	Has changed (submitted this solicitation)
one (1) executed original legal opinion of outside counsel qualified to practice in the foreign jurisdiction in which the RFP Guarantor is incorporated or otherwise formed that the guaranty pursuant to the Uniform SMA is, or upon the completion of execution formalities will become, the binding obligation of the RFP Guarantor in the jurisdiction in which it has been	☐	☐

incorporated or otherwise formed. Exhibit 4 to the Uniform SMA includes a sample of a sufficient legal opinion.		
one (1) executed original sworn certificate of the corporate secretary (or similar officer) of such RFP Guarantor that the person executing the guaranty pursuant to the Uniform SMA on behalf of the RFP Guarantor has the authority to execute the guaranty pursuant to the Uniform SMA and that the governing board of such RFP Guarantor has approved the execution of the guaranty pursuant to the Uniform SMA	☐	☐
one (1) executed original sworn certificate of the corporate secretary (or similar officer) of such RFP Guarantor that the RFP Guarantor has been authorized by its governing board to enter into agreements of the same type as the guaranty pursuant to the Uniform SMA.	☐	☐

If these documents are not sufficient, the Foreign Entity as RFP Guarantor is not granted unsecured credit under the terms of the Uniform SMA. In that case, the RFP Bidder may not rely on the financial standing of the RFP Guarantor. The Independent Evaluator may request additional financial or credit information regarding the RFP Bidder.

Third Item: Required Documents for RFP Bidders with a Foreign Entity as Principal

For each document required of an RFP Bidder submitting a Proposal under an Agency Agreement with a Principal that is a foreign entity, an RFP Bidder that is previously eligible must either: (i) confirm that the document and submitted in a previous solicitation under DSP ~~V~~VI remains valid; or: (ii) provide the document by upload to the online Part 2 form or email to pecoprocurement@nera.com if it has changed.

PLEASE USE THE TABLE BELOW TO SELECT, FOR EACH DOCUMENT, WHETHER (I) THE DOCUMENT REMAINS VALID OR (II) THE DOCUMENT HAS CHANGED AND IS BEING RESUBMITTED. By clicking the box that a document remains valid, you are confirming that such document continues to meet the requirements of Section V.5 of the RFP Rules.

REQUIRED DOCUMENTS	**Remains valid (not submitted)**	**Has changed (submitted this solicitation)**

one (1) executed original legal opinion of outside counsel qualified to practice in the foreign jurisdiction in which the Principal is incorporated or otherwise formed that the Uniform SMA is, or upon the completion of execution formalities will become, the binding obligation of the Principal in the jurisdiction in which it has been incorporated or otherwise formed. Exhibit 4 to the Uniform SMA includes a sample of a sufficient legal opinion.	☐	☐
one (1) executed original sworn certificate of the corporate secretary (or similar officer) of such Principal that the Principal has been authorized by its governing board to enter into agreements of the same type as the Uniform SMA.	☐	☐

PECO will determine whether such documents are sufficient. If the documents are not sufficient, the RFP Bidder may not be eligible to continue its participation in the RFP.

☒ **No**

The requirements of this section do not apply to you.

5. Bids

Reminder: Each RFP Bidder submits its Bids electronically, by transferring its Bid Form through a secure file transfer system. The Independent Evaluator provides electronically to each RFP Bidder qualified pursuant to a successful Part 1 Proposal the Bid Form as well as a set of instructions. These instructions guide the RFP Bidder for completion of the Bid Form, for optional encryption of the Bid Form, for submission of the completed Bid Form to the Independent Evaluator via secure file transfer interface, as well as instructions for backup methods for the submission of Bids in case of technical difficulties with the electronic transfer.

Important! The Independent Evaluator provides electronically to each RFP Bidder that qualifies pursuant to a successful Part 1 Proposal information required for the submission of Bids, including a username, password, and security code. This information is unique to each RFP Bidder and allows the Independent Evaluator to authenticate the Bids received. The RFP Bidder must acknowledge that the RFP Bidder has received intact the information necessary to submit Bids and that no one but authorized personnel of the RFP Bidder has had access to this information.

Please provide this confirmation below.

☐ I confirm receipt of the Bid Form, instructions, and information necessary to submit Bids. No one but authorized personnel of the RFP Bidder has had access to this information.

☐ I request that such information and documents be re-issued.

6. Justification of Omissions Section

If you are unable to provide all documents or information with this Part 2 Form, please justify fully any omissions in the space provided below.

If you are providing additional documents, such as providing the ~~Part 1 Form certifications~~P1 Certifications Insert if the individual who is serving as Officer of the RFP Bidder has changed, please use the spaces below to upload these documents.

APPENDIX 8 – ILLUSTRATIVE PART 2 FORM
DEFAULT SERVICE PROGRAM
REQUEST FOR PROPOSALS

SHORT FORM

PECO Energy Company ("Company" or "PECO") is intending to obtain full requirements electric supply to meet a portion of its obligations as Default Service Provider through this Request for Proposals ("RFP").

Before completing this online Part 2 Form, please review the RFP, including the PECO Energy Company Pennsylvania Default Service Supplier Master Agreement ("Uniform SMA"), so that you understand the conditions under which the RFP will be conducted. These documents are posted at www.pecoprocurement.com.

By having submitted a Part 1 Proposal in response to this RFP, you agreed to all terms and conditions of this RFP.

Any information provided by an RFP Bidder in the Part 2 Proposal is provided on a confidential basis to the Independent Evaluator, and may be provided on a confidential basis to the Staff of the Pennsylvania Public Utility Commission ("Commission"). PECO representatives will review financial information and legal documents provided to fulfill the requirements of the Part 2 Proposal, and will participate in the evaluation of the Pre-Bid Letter of Credit with the name of the RFP Bidder and the amount redacted.

PART 2 FORM

1. Contact Information and Representations

First Item:- Name and Address of the RFP Bidder

Below is the information that you previously provided. **PLEASE MAKE ANY NECESSARY UPDATES TO THE RFP BIDDER'S LEGAL NAME AND ADDRESS.** By submitting this form without making updates, you will be confirming that the previously provided information remains valid.

Legal Name of RFP Bidder
[pre-populated]

Street Address Line 1

Fourth Item: Representations of the Officer of the RFP Bidder

THE OFFICER OF THE RFP BIDDER MUST MAKE A NUMBER OF CERTIFICATIONS TO FULFILL THE REQUIREMENTS OF THE PART 2 PROPOSAL. If the Officer of the RFP Bidder who made the representations and certifications of the Part 1 Form is unavailable to make the representations of the Part 2 Form, the RFP Bidder must name a new individual to serve as Officer of the RFP Bidder and must, in addition to making the representations required in the Part 2 Proposal, re-submit ~~via email~~ the certifications of the Part 1 Form by the Part 2 Date.

THE OFFICER OF THE RFP BIDDER MUST MAKE A NUMBER OF CERTIFICATIONS BY COMPLETING THE P2 CERTIFICATIONS INSERT. ~~**THE SIGNATURE MUST BE NOTARIZED OR ATTESTED WITH THE CORPORATE SEAL.**~~ The P2 Certifications Insert is also labelled INSERT #P2-1.

PLEASE REFER TO THE P2 CERTIFICATIONS INSERT (#P2-1) FOR THE ACCEPTABLE METHODS TO COMPLETE AND SUBMIT THIS INSERT.

_____
Name of RFP Bidder

P2 CERTIFICATIONS INSERT (#P2-1)

THE INDEPENDENT EVALUATOR IS ACCEPTING A DIGITAL SIGNATURE OR A NOTARIZED SIGNATURE FOR THIS INSERT.

This Insert may be completed as follows:

- *Signed by the Officer of the RFP Bidder with the signature notarized;*

or:

- *Submitted with a digital signature (using commercially available software such as DocuSign) with an accompanying document or information verifying the identity of the signatory. Digital signatures are not required to be notarized.*

This Insert and any accompanying document or information may be submitted as follows:

- *Uploaded to the online Part 1 Form;*

or:

- *Sent by email to the Independent Evaluator at PECOProcurement@nera.com.*

THE OFFICER OF THE RFP BIDDER MUST MAKE THE FOLLOWING CERTIFICATIONS. ~~THE SIGNATURE MUST BE NOTARIZED OR ATTESTED WITH THE CORPORATE SEAL.~~

(1) I certify that this Part 2 Proposal will remain valid and remain in full force and effect until six (6) business days after the Bid Date and if any information provided in the Part 2 Proposal changes or any previous certification fails to remain valid during that time, the RFP Bidder will notify the Independent Evaluator as soon as practicable.

(2) I certify that the RFP Bidder is bidding independently and that it has no knowledge of any information concerning a Proposal by another RFP Bidder in response to this solicitation or any future solicitation under this RFP. Such information includes, but is not limited to: the fact that another RFP Bidder is submitting a Proposal in response to this solicitation or a subsequent solicitation under this RFP; the Bids by another RFP Bidder in this or in a subsequent solicitation under this RFP; the number of tranches bid by another RFP Bidder for any product in this or in a subsequent solicitation under this RFP; the estimation by another RFP Bidder of the value of a tranche of a product; the estimation by another RFP Bidder of the risks associated with providing supply under the Uniform SMA; the preference of another RFP Bidder for bidding on specific products in this or in a subsequent solicitation under the RFP; and the contractual arrangements for power of another RFP Bidder to serve tranches of Default Service Load were that RFP Bidder to become a Default Supplier. This certification must be binding and in effect until the Commission has either approved or rejected each of the winning Bids for this solicitation.

(3) I certify that although the RFP Bidder may disclose aspects of its Proposal in communicating with its financial institution for the purpose of preparing the Pre-Bid Letter of Credit or in communicating with advisors (if any), any such communication is made in a manner that can reasonably be expected to maintain the confidentiality of the RFP Bidder's Proposal.

(4) I certify that, with only the exceptions noted in (3) above, the RFP Bidder has not disclosed, and will not otherwise disclose, publicly or to any other party any information relating to its Proposal, which could have an effect on whether another party submits a Proposal in any solicitation under the RFP, or on the contents of the Proposal that another RFP Bidder would be willing to submit in response to the RFP. Such information includes, but is not limited to: the fact that the RFP Bidder is submitting a Proposal in response to this RFP; the RFP Bidder's Bids in this or in a

subsequent solicitation under this RFP; the RFP Bidder's number of tranches bid for any product in this or in a subsequent solicitation under this RFP; the RFP Bidder's estimation of the value of a tranche of a product; the RFP Bidder's estimation of the risks associated with providing supply under the Uniform SMA; and the RFP Bidder's preference for bidding on specific products in this or in a subsequent solicitation under this RFP. This certification must be binding and in effect until the Commission has either approved or rejected each of the winning Bids for this solicitation.

(5) I certify that any Bid on any product submitted in response to this RFP for this solicitation is binding until six (6) business days after the Bid Date and constitutes a binding and irrevocable offer to provide service under the terms of the Uniform SMA at the price specified in the Bid.

(6) I certify that I will execute (or I will nominate another authorized individual to execute) the Uniform SMA and all Transaction Confirmation(s) for the RFP Bidder's Bids that are approved by the Commission no later than 2PM on the third business day after the Commission has accepted such Bids.

(7) I certify that in each Transaction Confirmation, the RFP Bidder will specify a price for each type of AECs (Tier I, Tier I Solar, and Tier II) that is included in the RFP Bidder's winning Bids and each such price must be greater than $0/AEC.

_____ _____
Signature of Officer Date

_____ _____
Signature and Seal from Notary Public Date

~~2.~~ 2. Pre-Bid Letter of Credit

THE RFP BIDDER MUST PROVIDE AN EXECUTED PRE-BID LETTER OF CREDIT, drawn for the account of the RFP Bidder and acceptable to PECO, **IN AN AMOUNT OF AT LEAST: $250,000 PER TRANCHE BID ON PRODUCTS OF THE RES AND SC CLASSES FOR FULL REQUIREMENTS ON A FIXED-PRICE BASIS, PLUS, IF APPLICABLE, $125,000 PER TRANCHE BID ON A PRODUCT FOR THE CCI CLASS FOR FULL REQUIREMENTS ON A SPOT-PRICE BASIS.** A single Pre-Bid Letter of Credit is submitted even if the RFP Bidder bids on more than one product or, if applicable, the RFP Bidder bids to supply both full requirements on a fixed-price basis and full requirements on a spot-price basis.

The RFP Bidder must either use the Standard Pre-Bid Letter of Credit, provided on www.pecoprocurement.com, or submit a Pre-Bid Letter of Credit that incorporates only those modifications to the Standard Pre-Bid Letter of Credit accepted as a result of the evaluation of the Part 1 Proposals.

THE ~~HARDCOPY EXECUTED~~ PRE-BID LETTER OF CREDIT MUST BE ~~SENT BY OVERNIGHT DELIVERY SERVICE~~SUBMITTED AS AN ELECTRONIC PDF FILE VIA ELECTRONIC MEANS ONLY to the Independent Evaluator at ~~the address provided to RFP Bidders for this purpose.~~

~~*At the time this form is submitted, has the*~~pecoprocurement@nera.com. A Pre-Bid Letter of Credit ~~*already been sent to the Independent Evaluator?*~~sent in hardcopy cannot be accepted.

~~☒ Yes ☐ No~~

~~RFP Bidders may, but are not required to, upload or email to pecoprocurement@nera.com an electronic executed version of the Pre-Bid Letter of Credit for evaluation.~~

~~———~~	~~*Electronic version of Executed Pre-Bid Letter of Credit*~~

PECO and the Independent Evaluator will release the Pre-Bid Letter of Credit no later than six (6) business days after the Bid Date. If the Commission does not approve any of the RFP Bidder's Bids, PECO and the Independent Evaluator will release that RFP Bidder's Pre-Bid Letter of Credit within three (3) business days of the Bid Date.

Would you like to provide special instructions for returning the Pre-Bid Letter of Credit?

☒ **Yes** ☐ **No**

PLEASE PROVIDE ~~ANY~~ SPECIAL INSTRUCTIONS FOR RETURNING THE PRE-BID LETTER OF CREDIT BELOW.

~~3.~~ 3. Additional Requirements

3a. Requirements for RFP Bidders Relying on Their Own Financial Standing

You previously elected the RFP Bidder as the entity on whose financial standing the RFP Bidder is relying. **YOU HAVE NO ADDITIONAL REQUIREMENTS** under this section and you may proceed to the next section.

3b. Requirements for RFP Bidders Relying on the Financial Standing of an RFP Guarantor

Is the RFP Bidder a Default Supplier serving tranches won in a solicitation under DSP ~~I~~VI?

☐ **Yes** ☐ **No**

If Yes, please proceed to the Section 4.

If No, you previously elected an RFP Guarantor as the entity on whose financial standing the RFP Bidder is relying. **THE RFP BIDDER MUST PROVIDE THE GUARANTY DOCUMENTS REQUIRED BY THIS SECTION.**

☒ ~~**Yes**~~No

~~**3a. Requirements for RFP Bidders Relying on Their Own Financial Standing**~~

~~You previously elected the RFP Bidder as the entity on whose financial standing the RFP Bidder is relying. **YOU HAVE NO ADDITIONAL REQUIREMENTS** under this section and you may proceed to the next section.~~

~~**3b. Requirements for RFP Bidders Relying on the Financial Standing of an RFP Guarantor**~~

P2 FOREIGN ENTITY INSERT (#P2-5)

Please note! Only RFP Bidders that are Foreign Entities, or that rely on the financial standing of a Foreign Entity as RFP Guarantor, or that ~~submits~~submit a Proposal under an Agency Agreement with a Foreign Entity as Principal, are required to complete this Insert. The requirements are provided in Section V.5 of the RFP Rules.

Are you a previously eligible RFP Bidder (i.e., did you successfully complete the Part 2 Proposal on a prior solicitation under DSP ~~V~~VI)?

☐ **Yes** ☐ **No**

If no, please complete Section A below.
If yes, please complete Section B below.

SECTION A. RFP BIDDERS THAT HAVE NOT PREVIOUSLY COMPLETED THE PART 2 PROPOSAL

PLEASE COMPLETE ONLY THE ITEM THAT APPLIES TO YOU:

Circumstances	Item to Complete
The RFP Bidder is a Foreign Entity	First Item

The RFP Bidder relies on the financial standing of a Foreign Entity as RFP Guarantor	Second Item
The RFP Bidder is submitting a Proposal under an Agency Agreement with a Foreign Entity as Principal	Third Item

First Item: Required Documents for Foreign RFP Bidders

A FOREIGN RFP BIDDER MUST PROVIDE THE ADDITIONAL DOCUMENTS LISTED BELOW TO THE ONLINE PART 2 FORM OR BY EMAIL TO PECOPROCUREMENT@NERA.COM FOR THE FOREIGN RFP BIDDER.

(1) **one (1) executed original** legal opinion of outside counsel qualified to practice in the foreign jurisdiction in which the ~~Foreign~~ RFP Bidder is incorporated or otherwise formed that the Uniform SMA is, or upon the completion of execution formalities will become, the binding obligation of the ~~Foreign~~ RFP Bidder in the jurisdiction in which it has been incorporated or otherwise formed. Exhibit 4 to the Uniform SMA includes a sample of a sufficient legal opinion.

(2) **one (1) executed original** sworn certificate of the corporate secretary (or similar officer) of such ~~Foreign~~ RFP Bidder that the person executing the Uniform SMA on behalf of the ~~Foreign~~ RFP Bidder has the authority to execute the Uniform SMA and that the governing board of such ~~Foreign~~ RFP Bidder has approved the execution of the Uniform SMA.

(3) **one (1) executed original** sworn certificate of the corporate secretary (or similar officer) of such ~~Foreign~~ RFP Bidder that the ~~Foreign~~ RFP Bidder has been authorized by its governing board to enter into agreements of the same type as the Uniform SMA.

PECO will determine whether such documents are sufficient. If the documents are not sufficient, the RFP Bidder may not be eligible to continue its participation in the RFP.

Second Item: Required Documents for RFP Bidders with a Foreign Entity as RFP Guarantor

AN RFP BIDDER RELYING ON THE FINANCIAL STANDING OF A FOREIGN ENTITY AS RFP GUARANTOR MUST PROVIDE THE ADDITIONAL DOCUMENTS LISTED BELOW TO THE ONLINE PART 2 FORM OR BY EMAIL TO PECOPROCUREMENT@NERA.COM FOR THE RFP GUARANTOR TO BE GRANTED UNSECURED CREDIT UNDER THE TERMS OF THE UNIFORM SMA.

(1) **one (1) executed original** legal opinion of outside counsel qualified to practice in the foreign jurisdiction in which the RFP Guarantor is incorporated or otherwise formed that the guaranty pursuant to the Uniform SMA is, or upon the completion of execution formalities will become, the binding obligation of the RFP Guarantor in the jurisdiction in which it has been incorporated or otherwise formed. Exhibit 4 to the Uniform SMA includes a sample of a sufficient legal opinion.

(2) **one (1) executed original** sworn certificate of the corporate secretary (or similar officer) of such RFP Guarantor that the person executing the guaranty pursuant to the Uniform SMA on behalf of the RFP Guarantor has the authority to execute the guaranty pursuant to the Uniform SMA and that the

governing board of such RFP Guarantor has approved the execution of the guaranty pursuant to the Uniform SMA;

(3) **one (1) executed original** sworn certificate of the corporate secretary (or similar officer) of such RFP Guarantor that the RFP Guarantor has been authorized by its governing board to enter into agreements of the same type as the guaranty pursuant to the Uniform SMA.

If the RFP Bidder does not submit these documents, or if these documents are not sufficient, the Foreign Entity as RFP Guarantor is not granted unsecured credit under the terms of the Uniform SMA. In that case, the RFP Bidder may not rely on the financial standing of the RFP Guarantor. The Independent Evaluator may request additional financial or credit information regarding the RFP Bidder.

Third Item: Required Documents for RFP Bidders with a Foreign Entity as Principal

AN RFP BIDDER SUBMITTING A PROPOSAL UNDER AN AGENCY AGREEMENT WITH A FOREIGN ENTITY AS PRINCIPAL MUST PROVIDE THE ADDITIONAL DOCUMENTS LISTED BELOW TO THE ONLINE PART 2 FORM OR BY EMAIL TO PECOPROCUREMENT@NERA.COM.

(1) one (1) executed original legal opinion of outside counsel qualified to practice in the foreign jurisdiction in which the Principal is incorporated or otherwise formed that the Uniform SMA is, or upon the completion of execution formalities will become, the binding obligation of the Principal in the jurisdiction in which it has been incorporated or otherwise formed. Exhibit 4 to the Uniform SMA includes a sample of a sufficient legal opinion.

(2) one (1) executed original sworn certificate of the corporate secretary (or similar officer) of such Principal that the Principal has been authorized by its governing board to enter into agreements of the same type as the Uniform SMA.

PECO will determine whether such documents are sufficient. If the documents are not sufficient, the RFP Bidder may not be eligible to continue its participation in the RFP.

SECTION B. PREVIOUSLY ELIGIBLE RFP BIDDERS (THAT HAVE SUCCESSFULLY COMPLETED THE PART 2 PROPOSAL IN A PRIOR SOLICITATION)

PLEASE COMPLETE ONLY THE ITEM THAT APPLIES TO YOU:

Circumstances	Item to Complete
The RFP Bidder is a Foreign Entity	First Item

The RFP Bidder relies on the financial standing of a Foreign Entity as RFP Guarantor	Second Item
The RFP Bidder is submitting a Proposal under an Agency Agreement with a Foreign Entity as Principal	Third Item

First Item: Required Documents for Foreign RFP Bidders

For each document required of Foreign RFP Bidders, a Foreign RFP Bidder that is previously eligible must either: (i) confirm that the document and submitted in a previous solicitation under DSP ~~V~~VI remains valid; or: (ii) provide the document by upload to the online Part 2 form or ~~by~~ email to pecoprocurement@nera.com if it has changed.

PLEASE USE THE TABLE BELOW TO SELECT, FOR EACH DOCUMENT, WHETHER (I) THE DOCUMENT REMAINS VALID OR (II) THE DOCUMENT HAS CHANGED AND IS BEING RESUBMITTED. By clicking the box that a document remains valid, you are confirming that such document continues to meet the requirements of Section V.5 of the RFP Rules.

REQUIRED DOCUMENTS	Remains valid (not submitted)	Has changed (submitted this solicitation)
one (1) executed original legal opinion of outside counsel qualified to practice in the foreign jurisdiction in which the Foreign RFP Bidder is incorporated or otherwise formed that the Uniform SMA is, or upon the completion of execution formalities will become, the binding obligation of the Foreign RFP Bidder in the jurisdiction in which it has been incorporated or otherwise formed. Exhibit 4 to the Uniform SMA includes a sample of a sufficient legal opinion.	☐	☐
one (1) executed original sworn certificate of the corporate secretary (or similar officer) of such Foreign RFP Bidder that the person executing the Uniform SMA on behalf of the Foreign RFP Bidder has the authority to execute the Uniform SMA and that the governing board of such Foreign RFP Bidder has approved the execution of the Uniform SMA.	☐	☐

one (1) executed original sworn certificate of the corporate secretary (or similar officer) of such Foreign RFP Bidder that the Foreign RFP Bidder has been authorized by its governing board to enter into agreements of the same type as the Uniform SMA.	☐	☐

PECO will determine whether such documents are sufficient. If the documents are not sufficient, the RFP Bidder may not be eligible to continue its participation in the RFP.

Second Item: Required Documents for RFP Bidders with a Foreign Entity as RFP Guarantor

For each document required of an RFP Bidder relying on the financial standing of a Foreign Entity as RFP Guarantor, an RFP Bidder that is previously eligible must either: (i) confirm that the document and submitted in a previous solicitation under DSP ~~V~~VI remains valid; or (ii) provide the document by upload to the online Part 2 form or ~~by~~ email to pecoprocurement@nera.com if it has changed.

PLEASE USE THE TABLE BELOW TO SELECT, FOR EACH DOCUMENT, WHETHER (I) THE DOCUMENT REMAINS VALID OR (II) THE DOCUMENT HAS CHANGED AND IS BEING RESUBMITTED. By clicking the box that a document remains valid, you are confirming that such document continues to meet the requirements of Section V.5 of the RFP Rules.

REQUIRED DOCUMENTS	Remains valid (not submitted)	Has changed (submitted this solicitation)
one (1) executed original legal opinion of outside counsel qualified to practice in the foreign jurisdiction in which the RFP Guarantor is incorporated or otherwise formed that the guaranty pursuant to the Uniform SMA is, or upon the completion of execution formalities will become, the binding obligation of the RFP Guarantor in the jurisdiction in which it has been incorporated or otherwise formed. Exhibit 4 to the Uniform SMA includes a sample of a sufficient legal opinion.	☐	☐
one (1) executed original sworn certificate of the corporate secretary (or similar officer) of such RFP Guarantor that the person executing the guaranty pursuant to the Uniform SMA on behalf of the RFP Guarantor has the authority to execute the guaranty pursuant to the Uniform SMA and that the governing board of such RFP Guarantor has approved the execution of the guaranty pursuant to the Uniform SMA	☐	☐

one (1) executed original sworn certificate of the corporate secretary (or similar officer) of such RFP Guarantor that the RFP Guarantor has been authorized by its governing board to enter into agreements of the same type as the guaranty pursuant to the Uniform SMA.	☐	☐

If these documents are not sufficient, the Foreign Entity as RFP Guarantor is not granted unsecured credit under the terms of the Uniform SMA. In that case, the RFP Bidder may not rely on the financial standing of the RFP Guarantor. The Independent Evaluator may request additional financial or credit information regarding the RFP Bidder.

Third Item: Required Documents for RFP Bidders with a Foreign Entity as Principal

For each document required of an RFP Bidder submitting a Proposal under an Agency Agreement with a Principal that is a foreign entity, an RFP Bidder that is previously eligible must either: (i) confirm that the document and submitted in a previous solicitation under DSP ~~V~~VI remains valid; or: (ii) provide the document by upload to the online Part 2 form or ~~by~~ email to pecoprocurement@nera.com if it has changed.

PLEASE USE THE TABLE BELOW TO SELECT, FOR EACH DOCUMENT, WHETHER (I) THE DOCUMENT REMAINS VALID OR (II) THE DOCUMENT HAS CHANGED AND IS BEING RESUBMITTED. By clicking the box that a document remains valid, you are confirming that such document continues to meet the requirements of Section V.5 of the RFP Rules.

REQUIRED DOCUMENTS	Remains valid (not submitted)	Has changed (submitted this solicitation)
one (1) executed original legal opinion of outside counsel qualified to practice in the foreign jurisdiction in which the Principal is incorporated or otherwise formed that the Uniform SMA is, or upon the completion of execution formalities will become, the binding obligation of the Principal in the jurisdiction in which it has been incorporated or otherwise formed. Exhibit 4 to the Uniform SMA includes a sample of a sufficient legal opinion.	☐	☐
one (1) executed original sworn certificate of the corporate secretary (or similar officer) of such Principal that the Principal has been authorized by its governing board to enter into agreements of the same type as the Uniform SMA.	☐	☐

PECO will determine whether such documents are sufficient. If the documents are not sufficient, the RFP Bidder may not be eligible to continue its participation in the RFP.

☒ **No**

The requirements of this section do not apply to you.

5. Bids

Reminder: Each RFP Bidder submits its Bids electronically, by transferring its Bid Form through a secure file transfer system. The Independent Evaluator provides electronically to each RFP Bidder qualified pursuant to a successful Part 1 Proposal the Bid Form as well as a set of instructions. These instructions guide the RFP Bidder for completion of the Bid Form, for optional encryption of the Bid Form, for submission of the completed Bid Form to the Independent Evaluator via secure file transfer interface, as well as instructions for backup methods for the submission of Bids in case of technical difficulties with the electronic transfer.

Important! The Independent Evaluator provides electronically to each RFP Bidder that qualifies pursuant to a successful Part 1 Proposal information required for the submission of Bids, including a username, password, and security code. This information is unique to each RFP Bidder and allows the Independent Evaluator to authenticate the Bids received. The RFP Bidder must acknowledge that the RFP Bidder has received intact the information necessary to submit Bids and that no one but authorized personnel of the RFP Bidder has had access to this information.

Please provide this confirmation below.

☐ I confirm receipt of the Bid Form, instructions, and information necessary to submit Bids. No one but authorized personnel of the RFP Bidder has had access to this information.

☐ I request that such information and documents be re-issued.

6. Justification of Omissions Section

If you are unable to provide all documents or information with this Part 2 Form, please justify fully any omissions in the space provided below.

If you are providing additional documents, such as providing the ~~Part 1 Form certifications~~P1 Certifications Insert if the individual who is serving as Officer of the RFP Bidder has changed, please use the spaces below to upload these documents.

Appendix 9 - Standard Pre-Bid Letter of Credit

[On Issuing Bank's Letterhead]

IRREVOCABLE STANDBY LETTER OF CREDIT

_____ ("Date of Issuance")

Letter of Credit No. _____

Beneficiary:
PECO Energy Company ("PECO")
c/o NERA Economic Consulting ("NERA")
Independent Evaluator
PECO Default Service Program
~~[Independent Evaluator Address]~~
PECOProcurement@nera.com

Applicant:
[Name of ~~Bidder~~Applicant]
[Address]

1. We, _____(the "Issuing Bank"), hereby establish this Irrevocable Standby Letter of Credit (this "Letter of Credit") in your favor in the amount of USD $_____, effective immediately and available to you at sight upon demand at our counters at _____[designate Issuing Bank's location for presentments] and expiring at 5:00 PM (New York, NY time[1]) on _____[insert date no earlier than ~~fifteen days following the Bid Date~~March 26, 2025] (the "Expiration Date"), unless terminated earlier in accordance with the provisions of Paragraph 9 hereof.

2. This Letter of Credit is issued at the request and for the account of _____ (including its successors and assigns, the "Bidder"). This Letter of Credit may be drawn by presenting the documents required by ~~paragraph~~Paragraph 3 hereof, including your certificate stating that:

   a) "the Bidder has made a material omission or misrepresentation in the Part 1 Proposal or the Part 2 Proposal submitted in connection with this solicitation"; or

   b) "the Bidder has disclosed information relating to its Proposal publicly or to any other party before the PUC has rendered its decision on the results of the solicitation"; or

   c) "the Bidder has one or more Bids approved by the PUC and the Bidder has failed to execute the Uniform SMA and its Exhibits or has failed to meet the creditworthiness requirements within the timeframe required".

[1] If the issuer of the Letter of Credit is located in an area that is not in the Eastern Time zone, this time and all other times in this Letter of Credit, and the definition of a Business Day should be adjusted accordingly, here and in Paragraphs 5 and 9.

3. We hereby irrevocably authorize you to draw on us, in accordance with the terms and conditions hereof, up to the amount available under this Letter of Credit from time to time, subject to reduction as provided in Paragraph 8. A partial or full drawing hereunder may be presented by you on any Business Day on or prior to the Expiration Date by delivering or transmitting to the Issuing Bank at _____, (a) Annex 1 hereto, appropriately completed and duly signed by an Authorized Officer of PECO, which is your notice, and (b) Annex 2 hereto, appropriately completed and duly signed by an Authorized Officer of PECO, which is your draft.

4. Drafts, document(s) and other communications hereunder may be presented or delivered to us by facsimile transmission~~.~~ or electronic means. Presentation of documents to effect a draw by facsimile must be made to the following facsimile number~~:~~(s): _____, and confirmed by telephone to us at the following number~~:~~ _____(s): _____. Presentation of documents to effect a draw by electronic means must be made by your email address PECOWB&C@peco-energy.com or pecoprocurement@nera.com to the following email address: _____, and confirmed by telephone to us at the following number(s): _____. In the event of a presentation via facsimile transmission or via electronic means, no mail confirmation is necessary and the facsimile transmission or the electronic communication will constitute the operative drawing documents.

5. We will honor a drawing hereunder made in compliance with the terms and provisions of this Letter of Credit by transferring in immediately available funds the amount specified in your draft (or so much thereof as is available hereunder) delivered or transmitted to us in connection with such drawing to the account designated as provided below, by 3:00 PM (New York, NY time) on the date of such drawing, if delivery or transmission of the requisite documents pursuant to Paragraph 3 hereof is made prior to 11:00 AM (New York, NY time) on a Business Day, but at the opening of business on the first Business Day next succeeding the date of such drawing if delivery or transmission of the requisite documents pursuant to Paragraph 3 hereof is made on or after 11:00 AM (New York, NY time) on any Business Day.

6. If a demand for payment made by you hereunder does not, in any instance, conform to the terms and conditions of this Letter of Credit, we shall give you notice not later than the time provided in Paragraph 5 above for honor of a drawing presented to us, that the demand for payment was not effected in accordance with the terms and conditions of this Letter of Credit, stating the reasons why the demand for payment was not so effected, and that we will upon your instructions hold any documents at your disposal or return the same to you. Upon being notified that the demand for payment was not effected in conformity with this Letter of Credit, you may attempt to correct any such non-conforming demand for payment to the extent that you are entitled to do so, provided, however, in such event a conforming demand for payment must be timely made in accordance with the terms of this Letter of Credit.

7. Unless otherwise hereafter designated in writing to us by an Authorized Officer of PECO, all payments made by us under this Letter of Credit shall be transmitted by wire transfer to PECO pursuant to the following instructions:

   PECO Energy Company
   Account No.: _____
   Bank: _____
   Bank's Address: _____
   _____
   ABA Routing No.: _____
   Contact: _____
   ~~Telephone No.:~~Email Address: _____

8. Partial drawings are permitted hereunder and multiple drawings are permitted hereunder. The amount available for drawing by you under this Letter of Credit shall be automatically reduced by the amount of any drawings paid through us referencing this Letter of Credit. Presentation of demands for drawings in amounts that exceed the amount available to be drawn hereunder shall not be deemed a failure to comply with the requirements of Paragraph 3 hereof, provided that the amounts payable on any such demand shall thus be limited to the amount then available to be drawn under this Letter of Credit.

9. This Letter of Credit shall terminate on the earliest of the date (a) you have made drawings which exhaust the amounts available to be drawn under this Letter of Credit, (b) we receive from you a Certificate of Cancellation in the form of Annex 3 ~~hereto together with the original of this Letter of Credit returned for cancellation~~, or (c) 5:00 PM (New York, NY time) on the Expiration Date.

10. This Letter of Credit is not transferable, and except as otherwise expressly stated herein, is subject to the Uniform Customs and Practice for Documentary Credits – 2007 revision, ICC Publication No. 600, or any successor publication thereto (the "UCP"). All banking charges are for the account of the Bidder. This Letter of Credit shall, as to matters not governed by the UCP, be governed and construed in accordance with New York law, without regard to principles of conflicts of law.

11. Article 36 of the UCP as it applies to this Letter of Credit is hereby modified to provide as follows:

    If on the last Business Day for presentation the place for presentation stated in this Letter of Credit is for any reason closed, then the last day for presentation is automatically extended to the day occurring thirty calendar days after the place for presentation re-opens for business.

    Article 36 of the UCP as it applies to this Letter of Credit is hereby further modified by providing that any alternate place for presentation we may designate pursuant to this rule must be in the United States.

12. As used herein:

    "Authorized Officer" shall mean President, Treasurer, any Vice President, any Senior Vice President, any Managing Director, any Director, any Associate Director, or any Assistant Treasurer.

    "Bids" shall mean the price offers submitted by the Bidder in response to PECO Energy Company's Default Service Program RFP.

    "Bid Date" shall mean the day on which the Bidder may submit Bids in the solicitation.

    "Bidder" shall mean an entity that has successfully completed the Part 1 Proposal, and that submits the Part 2 Proposal.

    "Business Day" shall mean any day on which commercial banks are not authorized or required to close in New York, NY and any day on which payments can be effected on the Fedwire system.

    "Uniform SMA" shall mean the PECO Energy Company Pennsylvania Default Service Supplier Master Agreement by which PECO can contract with winners from this solicitation.

    "Independent Evaluator" shall mean the administrator of PECO Energy Company's Default Service Program RFP.

"PUC" shall mean the Pennsylvania Utility Commission.

"Proposal" shall mean a response by the Bidder to PECO Energy Company's Default Service Program RFP in a solicitation, including the Part 1 Proposal and the Part 2 Proposal.

"Transaction Confirmation" shall mean an agreement pursuant to the Uniform SMA that documents certain terms of a transaction between the Bidder and PECO Energy Company.

13. This Letter of Credit sets forth in full our undertaking, and such undertaking shall not in any way be modified, amended, changed, amplified or limited by reference to any document, instrument or agreement referred to herein, except for Annexes 1 through 3 hereto and the notices referred to herein; and any such reference shall not be deemed to incorporate herein by reference any document, instrument or agreement except as set forth above. Except as otherwise expressly stated herein, this Letter of Credit may not be amended or modified by us without the consent of an Authorized Officer of PECO or an Authorized Officer of the Independent Evaluator on behalf of PECO.

14. We, the Issuing Bank, certify that as of the Date of Issuance our senior unsecured debt is rated "A-" or better by S&P Global Ratings, or "A3" or higher from Moody's Investors Service.

15. This original Letter of Credit has been sent to the Independent Evaluator ~~at [address for Independent Evaluator]~~ via electronic means only at PECOProcurement@nera.com (as per Bidder's instructions, the Independent Evaluator holds the Letter of Credit for the benefit of PECO). We confirm that the electronic PDF file of the Letter of Credit (together with subsequent amendments, if any) serves as the operative instrument. PECO Energy Company may use the electronic PDF file of the Letter of Credit (together with subsequent amendments, if any) as it would a hardcopy original. The aggregate amount paid to PECO during the validity of this Letter of Credit will not exceed the amount of this Letter of Credit. Any demands or communications in the form of the attached Annexes or other communications directed to us under this Letter of Credit must be signed by an Authorized Officer of PECO. Acceptance or rejection of any amendments to this Letter of Credit must be signed by an Authorized Officer of PECO or an Authorized Officer of the Independent Evaluator on behalf of PECO.

Very truly yours,
[Issuing Bank]

PECO Energy Company
Default Service Program RFP
March 2025 Solicitation

General Information

Bid Date: Tuesday, March 11, 2025

Template Information:

In addition to this 'General Information' sheet, this Bid Form contains the 'Bids' sheet.
The 'Bids' sheet is for entering Bids for all products.

Bidder Information:

Company Name:	
Contact Name:	
Phone Number:	

Bidder Information is incomplete. All fields are mandatory.

Class & Product Information:

A "Class" is a grouping of PECO's retail customers. PECO will procure full requirements service for the Residential ("RES") and Small Commercial ("SC") Classes on a fixed-price basis. PECO will procure full requirements service with energy priced to the PJM day-ahead spot market for the Consolidated Large Commercial and Industrial ("CCI") Class.

Number of tranches available		
Class (Product)	**Supply Period**	**Available Tranches**
Residential (RES-12-Jun25)	June 2025 - May 2026	12
Residential (RES-24-Jun25)	June 2025 - May 2027	11
Small Commercial (SC-12-Jun25)	June 2025 - May 2026	6
Small Commercial (SC-24-Jun25)	June 2025 - May 2027	3
Consolidated Large Commercial and Industrial (CCI-12-Jun25)	June 2025 - May 2026	8

The Load Caps for the RES and SC Classes are set so that the Default Service customers of that Class have no more than a 50% exposure to any one Default Supplier at any given time. The Load Cap for the CCI Class is set so that the Default Service customers of that Class have no more than a 75% exposure to any one Default Supplier at any given time. The Load Caps apply to the list of products that contribute to Default Supply for a Class at a given point in time. The Load Cap for an RFP Bidder that is a Default Supplier will take into account tranches won in previous solicitations under DSP V and DSP VI.

Maximum Number of Tranches Bid in this Solicitation - RES Class.

Products	Available Tranches	Load Caps Apply to an RFP Bidder When an RFP Bidder Has:	Load Caps for RES Class
RES-12-Jun25	12	Won more than 19 RES-24-Dec23, RES-24-Jun24, RES-12-Dec24, and RES-24-Dec24 tranches under DSP V	31 less RES-24-Dec23, RES-24-Jun24, RES-12-Dec24, and RES-24-Dec24 tranches won under DSP V
RES-24-Jun25	11	Won more than 20 RES-24-Dec23, RES-24-Jun24, RES-12-Dec24, and RES-24-Dec24 tranches under DSP V	

Maximum Number of Tranches Bid in this Solicitation - SC Class.

Products	Available Tranches	Load Caps Apply to an RFP Bidder When an RFP Bidder Has:	Load Cap
SC-12-Jun25	6	Won more than 6 tranches of SC-24-Dec23, SC-24-Jun24, SC-12-Dec24, and SC-24-Dec24 under DSP V	12 less SC-24-Dec23, SC-24-Jun24, SC-12-Dec24, and SC-24-Dec24 tranches won under DSP V
SC-24-Jun25	3	Won more than 9 tranches of SC-24-Dec23, SC-24-Jun24, SC-12-Dec24, and SC-24-Dec24 under DSP V	
CCI-12-Jun25	8	Load Caps apply always	6

Complete and Sign Certification:

I, _____, certify under penalty of perjury that I am authorized to submit these Bids.

By affixing my electronic signature below I understand and agree with the following: Any Bid on any product submitted in response to this RFP for this solicitation is binding until six (6) business days after the Bid Date and constitutes a binding and irrevocable offer to provide service under the terms of the PECO Energy Company Pennsylvania Default Service Supplier Master Agreement at the price specified in the Bid.

IE provides its report to the PaPUC	Wednesday, ~~March 16, 2022~~September 30, 2026
PaPUC Decision (close of business)	Thursday, ~~March 17, 2022~~October 1, 2026
If Bids are approved by the PaPUC:	
PECO sends partially executed Uniform SMA and Transaction Confirmation(s) by overnight delivery service	By close of the fourth business day after the Bid Date
Uniform SMA and Transaction Confirmation(s) fully executed	By 2PM of the fifth business day after the Bid Date
Default Service Supplier meets the creditworthiness requirements	By close of fifth business day after the Bid Date

Activity	Date
~~September 2022~~March 2027 Solicitation	
Deadline to request consideration of an alternate form of guaranty	Tuesday, ~~August 16, 2022~~January 26, 2027
Bidder Information Webcast	Friday, ~~August 26, 2022~~February 5, 2027
Decision on alternate guaranty forms (if any)	Friday, ~~September 2, 2022~~February 12, 2027
Part 1 Window Opens	Wednesday, ~~September 7, 2022~~February 17, 2027
Part 1 Date (Part 1 Window Closes)	Tuesday, ~~September 13, 2022~~February 23, 2027
Part 1 Notification Date	Thursday, ~~September 15, 2022~~February 25, 2027
Approved modifications to Form of Guaranty posted	Friday, ~~September 16, 2022~~February 26, 2027
Part 2 Window Opens	Friday, ~~September 16, 2022~~February 26, 2027
Bid Submission training	Wednesday, ~~September 21, 2022~~March 3, 2027
Part 2 Date (Part 2 Window Closes)	Thursday, ~~September 22, 2022~~March 4, 2027
Part 2 Notification Date	Monday, ~~September 26, 2022~~March 8, 2027
Bid Date (Bids are Due)	Tuesday, ~~September 27, 2022~~March 9, 2027
IE provides its report to the PaPUC	Wednesday, ~~September 28, 2022~~March 10, 2027
PaPUC Decision (close of business)	Thursday, ~~September 29, 2022~~March 11, 2027
If Bids are approved by the PaPUC:	
PECO sends partially executed Uniform SMA and Transaction Confirmation(s) by overnight delivery service	By close of the fourth business day after the Bid Date
Uniform SMA and Transaction Confirmation(s) fully executed	By 2PM of the fifth business day after the Bid Date
Default Service Supplier meets the creditworthiness requirements	By close of fifth business day after the Bid Date

Appendix 12 – Confidentiality Statement

I, _____ **{name of person},** am employed by _____ **{name of employer}.**

I will be considering, reviewing, and evaluating responses from RFP Bidders or I will have access to information submitted by RFP Bidders that is not publicly released. In this capacity, I sign below and hereby acknowledge and understand the Confidentiality Provisions of the RFP Rules and, consistent with those rules, agree to take all reasonable precautions to ensure that all data and information supplied by all RFP Bidders are maintained in confidence and not disclosed to individuals other than those that have signed this Confidentiality Statement. My signature is witnessed by the Independent Evaluator.

A list of signatories of this Confidentiality Statement is maintained by the Independent Evaluator and available to all signatories and to RFP Bidders upon request. I undertake to consult this list of signatories before communicating RFP information to another person.

If any data or information supplied by an RFP Bidder is disclosed publicly by that RFP Bidder itself or by the Pennsylvania Public Utility Commission, such information will cease to be Confidential.

I. Introduction

This RFP Protocol describes the process of administering the Requests for Proposals ("RFP") and specifies how the Independent Evaluator ("IE") will communicate with bidders, with representatives of PECO Energy Company ("Company" or "PECO"), and with the Staff of the Pennsylvania Public Utility Commission ("Commission" or "PaPUC~~") .~~"). The RFP Protocol is focused on specific procedures that the IE and PECO will follow. The following topics will be covered:

- General Principles
- Confidentiality
- Website and Data Room
- Frequently Asked Questions

- Announcements & Communications to Bidders
- Communications to the Press and the Media
- Bidder Information Webcasts
- Guaranty Process
- Processing of Proposals
- Transmitting Confidential Information
- Bid Submission Training
- Market Report
- Bid Processing
- Post-Bid Procedures

II. General Principles

The main guiding principle of this RFP Protocol is that all bidders will be treated equally. This equality means that no bidder will be provided with information that is not available to all other bidders, and all bidders will be subject to the exact same rules and standards for participation. This not only ensures fairness of the process but it also fosters competition and so favors the best final prices possible. Bidders are more willing to participate in the RFP if they know that no other bidder will be granted an advantage over them.

Furthermore, information that is of a sensitive nature, such as information a bidder provides about itself during the ~~proposal~~Proposal process and information about individual bidders' bids, shall be considered confidential and will not be released to the public. As stated in the PaPUC's Policy Statement at §69.1807(8):

> "[t]he public interest would be served by the adoption of uniform rules for the confidentiality of competitive solicitation information. Supplier participation, bid prices, and retail rates may be impacted by protecting certain information, including, the identity of winning and losing bidders, the number of bids submitted, bid prices, the allocation of load among winning bidders, and the like."

PECO and the IE are committed to upholding these principles, and to that end:

Formatted: Space After: 12 pt

- The IE and PECO will nominate particular individuals who will review RFP information. Each nominated individual signs a Confidentiality Statement. The individual may only discuss the RFP information to which it has access with other nominated individuals. Information will be provided to Staff at critical junctures.
- The IE will serve as the sole interface with bidders.
- The IE will set up a public RFP website to disseminate information and data about this RFP efficiently and to which all stakeholders will have access.

III. Confidentiality

This RFP Protocol describes the extent of the communication between the IE and PECO. Information not specifically designated in this protocol for communication between the IE and PECO shall not be communicated, and shall be treated as confidential. All PECO and NERA personnel involved in the administration of a solicitation will sign the Confidentiality Statement provided as Appendix ~~11~~12 of the RFP, ensuring that all information submitted by prospective suppliers through this process will be treated as confidential. This RFP Protocol describes what information can be released, to whom and under what circumstances.

PECO and the IE will each designate specific individuals that will take part in the implementation of DSP ~~V~~VI.

- These individuals will sign the Confidentiality Statement ~~provided as~~ in the form of Appendix ~~11 of~~12 to the RFP Rules and will commit to strictly adhere to the RFP Protocol.

- The IE will maintain a master list of individuals who can have access to confidential information and each individual on that list can only discuss confidential information with another individual on that list.

- Each individual, when communicating RFP information, will consult this list of individuals as needed to ascertain that the recipient has signed the Confidentiality Statement.

PECO will have a supporting role during the implementation of each solicitation, consisting primarily of the following:

- Development of data that the IE then posts to the RFP website and updates as necessary;
- Response to bidder inquiries, particularly on data methodology and the PECO Energy Company - Pennsylvania Default Service Supplier Master Agreement "Uniform SMA", after the IE has redacted the identity of the questioner;
- Review with the IE of financial information provided by bidders with their qualification package to determine the credit line that would prevail under the terms of the Uniform SMA;
- Review additional documents provided by bidders that are qualifying under an agency agreement, or as foreign entities, or relying on the financial standing of a foreign entity;
- Review with the IE of modifications to credit instruments proposed by bidders (once the IE has redacted the identity of the prospective supplier) to determine whether the modifications are non-material in nature;
- Review with the IE of alternate guaranty forms to determine whether the alternate guaranty form provides the same protection as the standard format of the guaranty under the Uniform SMA;
- Review with the IE of bid security (once the IE has redacted the identity of the bidder and the amount) to determine whether the bid security instruments follow the standard formats or only include approved changes;
- Assist in providing data to the IE for purposes of calculating a reserve price for each residential product;

- Review the Uniform SMA documents and the guaranty (if applicable) prepared for Default Suppliers.

In addition, and assuming the Commission approves the results of a solicitation, the IE will provide PECO with the information necessary to administer the winning contracts, namely the identity of the approved suppliers, the amount that they will supply of each product, and the supplier-specific price for each product (which is the average of the supplier's approved bids for that product).

In addition to the information needed to administer the contracts, PECO will have access to certain additional information to assist in assessing whether the products offered could be improved in future procurement plans and to assist ~~it~~ in finalizing its contingency plans should the results of any solicitation be rejected by the Commission. The IE, at the conclusion of each solicitation, will provide PECO with a redacted version of the report it provides to the Commission. The redaction will ensure that PECO does not have access to information concerning losing bids of specific bidders. This redacted report is discussed in more detail in Section XV.C of this Protocol.

The Commission's regulations at §§54.186(c)(5) specifically provide as follows:

> "The bids submitted by a supplier in response to a competitive bid solicitation process shall be treated as confidential pursuant to the confidentiality agreement approved by the Commission pursuant to §§ 54.185(D)(6). The DSP, the Commission, and a third party involved in the administration, review or monitoring of the bid solicitation process shall be subject to this confidentiality provision."

IV. Website and Data Room

A website dedicated specifically to the RFP is the most efficient way for the IE to disseminate information to bidders and other stakeholders. An RFP website (~~www.pecoprocurement.com~~www.pecoprocurement.com) was developed during DSP I. The RFP

website has been maintained since that time and will be maintained during DSP ~~V~~VI. The main pages of the RFP website will contain DSP ~~V~~VI information. Materials from prior Default Service Programs will be accessible through an "archives" section of the RFP website. The RFP website is public, and anyone can access the site at any time and find any information they require simply by searching the RFP website instead of calling or emailing the IE. No password or login information is required to view the RFP website.

The RFP website contains a section where any visitor may register by submitting information such as name, phone number and email address. Any user who submits an email address will be signed up to receive updates via email from the IE. A registrant who elected to receive email updates during previous Default Service Programs will be sent updates about DSP ~~V~~VI unless the registrant opts out, which the registrant can do at any time.

The RFP website allows stakeholders to download all key documents as soon as these become available. Such documents include the RFP Rules, the Uniform SMA, and the qualification materials that bidders will need to submit (e.g., ~~proposal~~Proposal forms and standard templates for pre-bid security). These documents for a given solicitation will continue to be posted well in advance of the qualification deadlines. The RFP website also includes a calendar providing the deadlines for each solicitation. A calendar for the current solicitation is also provided in ~~the RFP,~~Appendix 0 and Appendix 11 to the RFP Rules, and a general calendar applicable to all solicitations under the DSP is provided in Article II of the RFP Rules ~~as well as in Appendix 10 of the RFP~~.

The RFP website includes a data room to assist bidders in assessing the RFP opportunity. This data room includes data that is useful for ~~providers~~bidders in assessing the load associated with each product, such as historical load by class, switching statistics, etc. Data series are updated once a month.

In addition to allowing bidders to assess their ability to serve different products, the provision of data via the RFP website also has the effect of leveling the playing field for all bidders; without the provision of data, some bidders may have a better idea of the load associated with PECO's customers, and this would put bidders without such familiarity at a competitive disadvantage. Therefore, providing data on an equal basis to all bidders equalizes knowledge across prospective suppliers, and spurs competition in areas where some bidders might not

otherwise have the ability to offer competitive bids. This is in keeping with the guiding ~~principle~~principles of equality described at the beginning of this protocol.

It is expected that the same data series that were provided in prior Default Service Programs would continue to be provided during DSP ~~V~~VI. The IE did not receive any requests for additional data series that would improve bidders' ability to submit competitive bids. Confidential data can expand the information provided, but at the cost of setting up a password-protected section of the website or of providing data through mailings only to qualified parties, and at the possible cost of monitoring access to the data. At this point in time, PECO does not anticipate the need to provide data on such a confidential basis~~,~~ but will be able to do so if the need arises.

Data are currently updated on or about the 13th day of each month, on an ongoing basis, and PECO will continue this process without interruption between DSP ~~IV~~V and DSP ~~V~~VI. Initial data series were first provided on March 27, 2009, including historical data dating back to January 2006. The procedure for the monthly updates of the data series on the RFP website is as follows:

1. PECO provides the updated data to the IE at least three days in advance of the scheduled monthly update;
2. The IE checks the data, ensuring that it is accurate and error-free, contacting PECO if necessary to resolve any issues;
3. The IE posts the updated data series to the RFP website.

The following data are available on the RFP website:

- hourly usage data;
- number of retail customers;
- capacity peak load contribution ("PLC");
- historical monthly retention figures;
- estimated loss factors;
- customer size distributions.

Data may be archived so that the more recent five years of data are more immediately available to stakeholders.

The material on the RFP website will be updated when new content becomes available that would be of use to stakeholders. The process for updating the RFP website and adding new material is as follows:

1. PECO and the IE together prepare the material for posting, ensuring that it is accurate and error-free;
2. The IE posts the new documents to the RFP website;
3. The IE sends an announcement (via email) to registrants informing them of the newly available content on the RFP website.

V. Frequently Asked Questions

The RFP website also contains a web-based form that stakeholders can use to submit questions, and a section where the IE would post questions received and the associated responses, in order to ensure equal distribution of information. This FAQ form is available for all stakeholders to ask questions and receive answers, although in times of high demand, priority may be given to answering questions from prospective suppliers. There are four major steps to the process.

In the first step, the question is received and the IE sends an acknowledgement to the questioner. The acknowledgement serves as a bidder's confirmation that its question has been received, and the acknowledgement will also inform the bidder of the expected turnaround time for an answer, expected to be two business days. In the second step, the IE drafts an answer to the question, consulting PECO for expertise as necessary. If PECO is consulted, the identity of the entity who has asked the question is not revealed, and any information in the question itself that could potentially identify the questioner is removed before sending to PECO.

Once an answer has been finalized by the IE (and PECO if necessary), the IE sends the final response directly to the questioner. If there is any delay in answering the question, such that the answer cannot be sent before the end of the expected turnaround period, the IE will send a delay notice to the questioner informing it of the delay and of a revised expected turnaround time for the answer. In the final step, questions and answers that were received during the previous week are posted to the Frequently Asked Questions (FAQ) section of the RFP website by the IE.

Posting the questions to the RFP website ensures an equal distribution of information among stakeholders – any information that is conveyed to one party via an answer to a question submitted through the RFP website is then conveyed to all stakeholders in a public manner through the FAQ section of the RFP website. This practice ensures that all bidders have the same information and can compete on an equal playing field. Any question received by a party other than the IE must be sent to the IE for processing – no party other than the IE will directly answer a question from a stakeholder. Because all questions received about the RFP must go through the IE, bidders know that all questions receive the same treatment; as specified in the guiding principles of this RFP Protocol, the IE is the sole interface with bidders.

The FAQ section of the RFP website is updated once per week, allowing for more frequent posts at times of high volume or less frequent posts due to holidays.

VI. Announcements & Communications to Bidders

As specified in Section IV, postings of new information to the RFP website will be followed by an announcement made to all registrants to the RFP website. (The only exception will be for data postings that have been scheduled to occur on the same day each month.) The IE and PECO may also issue announcements to a list of registrants to the RFP website from time to time to remind prospective suppliers of deadlines for a given solicitation under the RFP or to make them aware of events that may impact the bids. Announcements will include the following milestones:

- Initial documents posted
- Part 1 Proposal Window opening & closing
- Bidder Information Webcast reminders
- Part 2 Proposal Window opening & closing
- Bids due
- PaPUC decision on RFP results

The goal of these announcements is to ensure that all bidders and stakeholders are aware of the ongoing progress of a solicitation, and to minimize the possibility that a potential bidder is unable to bid due to a missed deadline.

The IE will also engage in direct marketing to promote the RFP opportunity. Members of the IE team will compile a list of prospective suppliers using publicly available information and contact representatives of these entities or contract with a professional marketing service to contact the representatives to inform them of key dates in the RFP~~,~~ and opportunities for them to gain more information about participation in the RFP, such as bidder information webcasts and the RFP website. All prospective suppliers reached during these marketing calls will receive the same public information.

VII. Communications to the Press and the Media

The IE and PECO may also issue press releases or advertisements in order to promote the RFP opportunity. Information placed in the trade press has the ability to reach prospective suppliers that might not have been contacted otherwise~~,~~ and might not have registered to the RFP website of their own volition; thus, more parties may be made aware of the RFP website, and more participation may be achieved for the bidder information webcasts. The IE and PECO will work together to draft these communications. If the IE and PECO issue a press release, contact information of a team member of the IE will be included in case additional information is required.

PECO may grant interviews to the press or respond to press inquiries concerning the RFP. The interviews and responses to press inquiries are limited to public information regarding the RFP. PECO may require that the IE, who is to provide support in promotion efforts, participate in interviews and press inquiries. PECO has complete discretion to provide its customers and security analysts with public information regarding the RFP. PECO has complete discretion to provide public information to utilities or regulators from outside Pennsylvania.

The IE will coordinate with PECO's press representatives on all media contacts before the RFP. The IE will coordinate with PECO before granting interviews or commenting on any aspect of the RFP. Notwithstanding this, the IE will answer routine inquiries from the press and will inform PECO of such inquiries (e.g., wanting to know where a document is on the RFP website).

VIII. Bidder Information Webcasts

In addition to the electronic information dissemination methods via the RFP website, email, or through press releases, bidder information webcasts are effective for presenting efficiently and concisely the main elements of the RFP. Such webcasts also have the significant benefit of allowing bidders to ask questions directly of the IE and PECO. The IE and PECO expect that, for each solicitation, there would be a webcast prior to the due date for submission of Part 1 Proposals, and a subsequent training session held for bidders that are qualified to submit a Part 2 Proposal.

Each webcast will be tailored to parties considering participation in the RFP~~,~~ and will cover a broad range of general topics about the opportunity. The aim is to provide a wealth of information quickly, so that potential bidders can evaluate the opportunity. Subject material will consist of the requirements of the RFP, the rules for the submission of ~~proposals~~Proposals, the general structure of the RFP, the definition of the products available, and a summary of the RFP website and communication channels by which interested parties can obtain further information throughout the process.

The IE will prepare and deliver the presentation ~~at~~of the webcast, with representatives of PECO on hand to answer questions if necessary. The IE will take down all questions asked and answered at the bidder information webcast and post them to the RFP website as Frequently Asked Questions, so that bidders that are unable to attend the bidder information webcast have access to the same information as bidders able to attend. Similarly, the presentation will be available on the RFP website after the bidder information webcast, both as a pdf and as a recording of ~~both~~ the audio ~~and the slides~~. No information about the parties in attendance at the bidder information webcast will be made public.

Shortly before the Bid Date, the IE will hold a training session on the mechanics of submitting bids on the Bid Date. This session will be limited to bidders.

IX. Alternate Guaranty Process

PECO will allow any prospective supplier to submit for consideration an alternate guaranty form that the prospective supplier uses in its normal course of business. A separate and more

detailed document about the Alternate Guaranty Process is included as Appendix 2 ~~of~~to the RFP Rules. This document provides the specific minimum requirements of any alternate guaranty form.

The protocol for the processing of a submission under the Alternate Guaranty Process will occur in the following steps:

1. Parties submit alternate guaranty forms by emailing the form and all relevant documentation to the IE (as specified in the Alternate Guaranty Process document).
2. The IE acknowledges receipt of the package by email. The notice includes an assessment of whether all required materials have been received. If there is time before the deadline, a prospective supplier submitting incomplete documentation will be given an opportunity to complete its submission.
3. The IE redacts all information that could identify the prospective supplier submitting the alternate guaranty form and provides the redacted form and other documentation to PECO electronically.
4. PECO evaluates the alternate guaranty package with the assistance of the IE and of outside counsel as necessary.
    a. If the package is acceptable, the IE sends a notice to the prospective supplier informing it of the form's acceptability for use under the Uniform SMA.
    b. If the package is unacceptable, the IE sends a notice to the prospective supplier informing it of what must be changed in order for the package to be acceptable for use under the Uniform SMA.
5. Prospective suppliers that submit revised alternate guaranty packages do so via email.
6. The IE redacts all information that could identify the parties submitting the revised packages and provides the redacted material to PECO electronically.
7. PECO evaluates with the assistance of the IE and of outside counsel as necessary.
    a. If a revised package is acceptable, the IE sends a notice to the prospective supplier informing it of the form's acceptability for use in the RFP.
    b. If a package is unacceptable, the IE sends a notice to the prospective supplier informing it of the form's final rejection for use in the RFP and the reasons for the rejection.
8. Accepted forms are kept on file by the IE, as they will be acceptable for use in future solicitations under the RFP.

9. A prospective supplier submits the executed alternate guaranty form and the signed enforceability opinion with the Part 2 Proposal.

An alternate guaranty form approved through this process will be acceptable to PECO. This alternate guaranty form may be used for purposes of the solicitation during which it is approved and may be used for the course of DSP ~~V~~VI barring changes in the applicable law or changes to the RFP process as may be ordered by the PaPUC. Suppliers that had alternate forms of guaranty approved during a prior Default Service Program will be required to resubmit their materials.

X. Processing of Proposals

A ~~proposal~~Proposal consists of three (3) parts. The Part 1 Proposal is the bidder's response to the qualification standards described in Article IV of the RFP Rules. Bidders that qualify pursuant to a successful Part 1 Proposal may submit the second part, the Part 2 Proposal. The Part 2 Proposal, described in detail in Article V of the RFP Rules, includes financial support for the bidder's ~~offers~~bids. Bidders that present a successful Part 1 Proposal and Part 2 Proposal may submit the third part of the Proposal, which consists of the bidder's bids.

Part 1 and Part 2 Proposals are received and processed by the IE, with certain specified decisions and evaluations made by PECO with the assistance of the IE. The IE is the main party responsible for processing the ~~proposals~~Proposals and bids. This section lays out the step-by-step procedures to be followed and time periods for each action to be taken.

Prospective suppliers submit Part 1 ~~proposals~~Proposals during the Part 1 Window. Any information provided by a bidder in its Part 1 Proposal is provided on a confidential basis to the IE~~,~~ and may be provided on a confidential basis to PaPUC Staff. PECO representatives and the IE will review the information provided to fulfill the financial requirements under the Uniform SMA. PECO representatives and the IE will review draft documents provided to comply with specific requirements for bidders submitting a ~~proposal~~Proposal under an agency agreement, and draft documents provided to comply with specific requirements for foreign bidders or for bidders relying on the financial standing of a foreign entity.

Bidders submit Part 2 ~~proposals~~Proposals during the Part 2 Window. Bidders may also provide the representations and certifications required by the online Part 2 Form during the Part 1 Window for early processing. Any information provided by a bidder in its Part 2 Proposal is

provided on a confidential basis to the IE~~,~~ and may be provided on a confidential basis to ~~the~~ PaPUC Staff. PECO representatives review the pre-bid letter of credit with the name of the bidder and the amount redacted and will participate in the evaluation of ~~this~~the pre-bid letter of credit. PECO representatives and the IE determine the sufficiency of documents provided to comply with specific requirements for bidders applying under an agency agreement, and documents provided to comply with specific ~~requirement~~requirements for foreign bidders or for bidders relying on the financial standing of a foreign entity.

The IE provides all notifications by email and documents by secure file transfer to the bidder's designated representative and up to three (3) additional individuals. The IE may also communicate with the named officer.

X.A. Part 1 Proposals

In the Part 1 Proposal, applicants submit basic information, such as the name of the prospective supplier and contact information. The officer of the bidder named in the Part 1 Proposal will designate a representative as a point of contact for purposes of the RFP and will make a number of certifications regarding its participation in the RFP as well as provide information required by the Part 1 Proposal. A bidder may designate up to three (3) additional individuals who are authorized to act on behalf of the bidder and who receive all correspondence from the IE.

X.A.1. Receipt and Processing of Part 1 Proposals

- All materials for the Part 1 Proposals must be received by 12 PM (noon EPT) on the Part 1 Date.

- The Part 1 Proposal includes the completed Part 1 Form as well as one (1) copy of all documents required by the Part 1 Form. The Part 1 Form will be available online for bidders to complete through an online ~~proposal~~Proposal website. The online ~~proposal~~Proposal website will only be accessible to suppliers that have requested an online account and have been provided login credentials by the IE.

- Any documents required by the Part 1 Proposal other than the Part 1 Form must be submitted electronically either by email to the IE at pecoprocurement@nera.com or by upload to the online Part 1 Form.

- When a bidder submits the online Part 1 Form, the IE receives an email from the online ~~proposal~~Proposal website that indicates that a submission has been received. The email provides the ~~company name~~username associated with the submission. The IE will lock the bidder out of the form so that no further changes are possible to the submitted information while such information is under review. The IE will access the submission through the administrative interface of the online ~~proposal~~Proposal website. The submission will be downloaded and saved on a secure network accessible only by the IE. ~~–~~The submission will also be saved to a portable medium such as an encrypted USB flash drive and stored off-site for at least four years after the conclusion of the current default service program.

- If the Part 1 Proposal is received by the IE before noon on any business day during the Part 1 Window, the IE will send an acknowledgment confirming receipt on the day the Part 1 Proposal is received with the results of an initial review. If a Part 1 Proposal arrives after noon on any business day during the Part 1 Window prior to the Part 1 Date, the IE will send the acknowledgment along with the initial review by noon of the next business day.

- The IE's initial review will include a determination of the completeness of the ~~proposal~~Proposal. The initial review will state either that the Part 1 Proposal is complete and is being considered, or the initial review will list items of the Part 1 Proposal that are deficient or require clarification. ~~When~~If the Proposal is deficient or requires clarification, once a review is sent, the IE will restore access ~~for the bidder~~ to the online Part 1 Form for the bidder.

- If the ~~proposal~~Proposal is missing information, or requires clarification, a communication listing all information and documents required to complete the ~~proposal~~Proposal will be prepared by the IE and sent to the bidder.

- The bidder has until noon on the Part 1 Date, or until 6 PM on the business day following the business day during which such a notice is sent to the bidder, whichever comes later, to respond.
- If the information and documents required to remedy deficiencies are submitted within the time allowed, the IE reconsiders the ~~proposal~~Proposal.
- If the required information is not submitted within the time allowed, the ~~proposal~~Proposal is incomplete. The Part 1 Proposal will be rejected and the IE will send a rejection notice to the bidder by email.

- The Part 1 Proposal allows the bidder to submit non-material modifications to the credit instruments, namely the standard form of the pre-bid letter of credit, the standard form of the letter of credit appended to the Uniform SMA, and the standard format of the guaranty. If such a submission is received:
  - The IE will redact identifying information from the document and provide the redacted version to PECO for review.
  - PECO and the IE will evaluate the submission.
  - The IE will communicate the results of the review to the bidders in the specified timeframe.
  - All such modifications related to a particular credit instrument will be posted in a single document on the RFP website.
  - To the extent that they remain applicable, modifications that were acceptable in previous Default Service Programs will remain acceptable during DSP ~~V~~VI. A document containing all such modifications will be posted to the RFP website in advance of the first solicitation under DSP ~~V~~VI.

- Bidders submitting a ~~proposal~~Proposal under a number of specific special circumstances are requested to submit additional documents with their Part 2 Proposals. Any such bidder can submit draft documents with its Part 1 Proposal. These include bidders submitting a ~~proposal~~Proposal under an agency agreement, foreign bidders, and bidders relying on the financial standing of a foreign entity. The IE will take the following steps for the evaluation of any such documents.
    - The IE will redact identifying information from the document and provide the redacted version to PECO for review.
    - PECO will review the document with the assistance of the IE and the IE will communicate the results of the review to the bidder with the Part 1 Notification.
- The financial documents submitted by all bidders that accompany the Part 1 Proposals will be provided to PECO. PECO representatives will be provided with the information they need to make the creditworthiness evaluation on the Part 1 Date. It is expected that the creditworthiness evaluation will take no more than a day. The following steps will occur:
    - The IE will provide to PECO a spreadsheet that contains the names of the applicants and their guarantors;
    - PECO will make a determination of the creditworthiness of the applicants and their guarantors, with the ~~IE~~IE's assistance;
    - The credit assessment of the applicants and their guarantors is entered into the spreadsheet.

X.A.2. Notification for Part 1 Results

- For each prospective supplier that qualifies under the requirements of the Part 1 Proposal, the IE will send a Part 1 Notification regarding their qualification status. This letter also details the creditworthiness assessment.

- With the initial notification, the IE sends by secure file transfer the Part 1 Materials: (i) the Bid Form and instructions for submission of bids; ~~————~~(ii) instructions for filling out and encrypting the Bid Form; (iii) instructions for the electronic transfer of the completed Bid Form from the bidder to the IE; (iv) instructions for submission of the bids in case of technical difficulties with the electronic transfer; (v) invitation to a training session on the bid submission process; and, (vi) a username, a password, and security codes to be used for bid submission uniquely by that bidder.

X.B. Part 2 Proposals

In the Part 2 Proposal, bidders fulfill the requirements specified in Article V of the RFP Rules, including providing financial support for the bidder's ~~offers~~bids.

X.B.1. Receipt and Processing of Part 2 Proposals

- All materials for the Part 2 Proposals must be received by 12 PM (noon EPT) on the Part 2 Date. Bidders also have the option to submit the certifications required with the Part 2 Proposal during the Part 1 Window for early processing.

- The Part 2 ~~form~~Form is submitted online through an online ~~proposal~~Proposal website. The Part 2 Proposal includes the completed Part 2 Form submitted online and an executed Pre-Bid Letter of Credit submitted ~~in hardcopy at the IE's offices~~as an electronic PDF file via electronic means to the IE.

- Bidders submitting a ~~proposal~~Proposal under an agency agreement, foreign bidders, and bidders relying on the financial standing of a foreign entity submit additional documents as specified in Article V of the RFP Rules. Any additional documents required by the Part 2 Proposal must be submitted electronically either by email or by upload to the online Part 2 Form.

- When a bidder submits the online Part 2 Form, the IE receives an email from the online ~~proposal~~Proposal website that indicates that a submission has been received. The email provides the ~~company name~~username associated with the submission.

The IE will lock the bidder out of the form so that no further changes are possible to the submitted information while such information is under review. The IE will access the submission through the administrative interface of the online ~~proposal~~Proposal website. The submission is downloaded and saved on a secure network accessible only by the IE. The submission will also be saved to a portable medium such as an encrypted USB flash drive and stored off-site for at least four years after the conclusion of the current default service program.

- If the Part 2 Proposal is received by the IE before noon on any business day during the Part 2 Window, the IE sends the acknowledgment confirming receipt on the day the Part 2 Proposal is received with the results of an initial review. If a Part 2 Proposal arrives after noon on any business day during the Part 2 Window prior to the Part 2 Date, the IE sends the acknowledgment along with the initial review by noon of the next business day.

- ~~A copy~~The electronic PDF file of ~~all security documents~~the executed Pre-Bid Letter of Credit is ~~made. Original security documents are stored in~~saved on a ~~safe in~~secure network accessible only by the IE~~ office~~.

- The IE's initial review of the ~~proposal~~Proposal makes a determination on the completeness of the ~~proposal~~Proposal. The initial review states either that the Part 2 Proposal is complete and is being considered, or the initial review lists items of the Part 2 Proposal that are deficient or require clarification.

- Review of the pre-bid letter of credit as well as documents provided for bidders submitting a ~~proposal~~Proposal under an agency agreement, as foreign bidders, or while relying on the financial standing a guarantor may be part of an initial review or may be provided separately the next business day.

- If the ~~proposal~~Proposal is missing required information, or requires clarification, a communication listing all information and documents required to complete the ~~proposal~~Proposal is prepared by the IE and sent to the bidder:

- With the exceptions noted below, the bidder has until noon on the Part 2 Date, or until 6 PM on the business day following the business day during which such a notice is sent to the bidder, whichever comes later, to respond.

- For deficiencies related to the pre-bid letter of credit ~~or~~, documents provided to comply with specific requirements for bidders applying under an agency agreement, ~~and~~or documents provided to comply with specific ~~requirement~~requirements for foreign bidders or for bidders relying on the financial standing of a foreign entity, the bidder will have until noon on the Part 2 Date, or until 6 PM ~~of~~on the second business day following the business day during which the bidder is notified, whichever comes later, to respond.

- The IE will restore the bidder's access to the online Part 2 Form to allow the bidder to remedy the deficiencies to the submitted information.

- If the information and documents required to remedy deficiencies are submitted within the time allowed, the IE reconsiders the ~~proposal~~Proposal.

- If the required information and documents are not submitted within the time allowed, the ~~proposal~~Proposal is incomplete. If the Part 2 Proposal is rejected, the IE sends a rejection notice to the bidder by email.

- All bidders submit an executed pre-bid letter of credit with their Part 2 Proposals. PECO ~~review~~reviews the pre-bid letter of credit to ensure that it either uses the standard form or that it includes only approved modifications. The following steps will occur:

  - IE redacts all information that could identify the applicant and the amount ~~of the LC from the pre-bid letter of credit~~ prior to providing it electronically to PECO for review.

- PECO will check that the forms of the pre-bid letters of credit are acceptable with the assistance of the IE. The IE and PECO undertake a daily review, and conference call if necessary, during the Part 2 Proposal Window to review the pre-bid letters ~~or~~of credit as they arrive.

- If the pre-bid letter of credit requires revision, the IE prepares a deficiency notice informing the bidder of how its pre-bid letter of credit is deficient and what it must do to remedy the deficiencies. This notice to the bidder is sent by via email.

- If a new/amended pre-bid letter of credit is submitted, the IE confirms whether the new pre-bid letter of credit follows the instructions of the deficiency notice. The IE consults PECO as needed by conference call. If the new pre-bid letter of credit does not follow the requirements, the bidder will receive an additional deficiency notice as long as time remains for the bidder to remedy the deficiencies. If no time remains, the bidder will not be allowed to submit bids.

- Bidders in special circumstances provide additional documents with the Part 2 Proposal. This is the case for bidders applying under an agency agreement, documents provided to comply with specific requirements for foreign bidders, and for bidders relying on the financial standing of a foreign entity. The sufficiency of these documents is evaluated by PECO and the IE. For each of these documents submitted:

  - The IE and PECO meet daily as needed via conference call during the Part 2 Proposal Window to evaluate these documents as they arrive. PECO and IE determine the sufficiency of the documents provided.

  - If ~~the~~a document~~(s)~~ requires revision, the IE prepares a deficiency notice informing the bidder of how ~~its~~such document~~(s)~~ is deficient and what it must do to remedy the deficiencies. This letter is sent by email to the bidder.

- If a bidder had submitted a draft of these documents with its Part 1 Proposal for review and if the bidder conforms these documents submitted with the Part 2 Proposal to the review provided during the assessment of the Part 1 Proposal, then these documents will automatically be considered sufficient.

- If a new/amended document~~(s)~~ is submitted, the IE confirms whether the new document~~(s)~~ follows the requirements of the deficiency notice. The IE consults PECO as needed by conference call. If the new document~~(s)~~ does not follow the requirements, the bidder is not allowed to submit bids, or is not ~~be~~ granted unsecured credit under the terms of the Uniform SMA, or is not allowed to rely on the financial standing of the guarantor.

X.B.2. Notification for Part 2 Results

A bidder that submits a Part 2 Proposal will be notified whether it has qualified to submit bids no later than 6 PM on the Part 2 Notification Date. This Part 2 Notification letter will be sent to the bidder by ~~email~~secure file transfer.

XI. Transmitting Confidential Information

At various times throughout the RFP process, it will be necessary for the IE to communicate certain highly confidential information to RFP Bidders. This section specifies the methods by which such information will be transferred. These protocols are used when information designated as highly confidential information must be transmitted; they are not used in the course of standard Proposal-related communication such as deficiency and complete notices. Any communication containing any of the following items is designated as highly confidential:

- Bidding results
- Login information for the secure file transfer system
- Bidder-specific load caps
- Part 1 and Part 2 Notifications

XI.A. Email & Secure File Transfer

When sending highly confidential communications to bidders, the IE will observe the following protocols:

- Communications with information regarding a bidder's participation in the RFP will only be sent to the representatives designated in the Proposal forms.

- ~~Confidential~~If confidential information is sent as an attachment via email, the email will ~~be contained in pdf documents, with~~include a note in the text of the communication informing the recipient of the purpose of the email and instructing the recipient to destroy the email and its attachment without reading or retaining them if the email has been received in error.

- Communications with confidential information will be checked by at least two members of the IE Team before being sent to ensure that the ~~recipients' email addresses~~recipients are correct and that the correct file ~~attachment~~ for that bidder has been attached or transmitted via the secure file transfer system.

XII. Bid Submission Training

The IE will hold a training session for bidders to practice the bid submission process prior to the submission of bids. The principle of the training is to familiarize all bidders with the step-by-step procedure to submit bids so that they can be sure they understand the process in advance of the actual Bid Date, allowing them to submit their actual bids without being hampered by technical difficulties or procedural questions. The training session is scheduled to occur early during the Part 2 Proposal Window~~,~~ and will allow only potential bidders that have submitted successful Part 1 Proposals to familiarize themselves with the process by which they will be allowed to submit bids pursuant to successful Part 2 Proposals.

The IE will conduct the training exactly as it would on the Bid Date, except that bids submitted through the training exercise will not be binding in any way. PaPUC Staff may monitor the training exercise. PECO is not involved in the bidder training~~,~~ but may participate in a separate mock trial with the IE so as to understand the bid submission process.

The training exercise will occur as follows:

1. Bidders will be provided with information on how to participate in the training with their Part 1 Notifications, including information for the electronic transfer of the Bid Form specific to the training;

2. Bidders will fill out, encrypt[1], and transfer electronically their Bid Forms to the IE using the system that will be employed on the actual Bid Date, and during a specific timeframe set aside for the training;

3. The IE will receive, decrypt and evaluate the submitted forms for completeness~~;~~ as it would on the actual Bid Date;

4. The IE will contact the bidders to inform them of the receipt of their practice Bid Forms, and whether or not the forms were filled out properly;

5. Bidders wishing to practice submitting bids using a backup method will be afforded the opportunity to do so.

XIII. Market Report

The market report will be provided one week to ten days in advance of the Bid Date to the PaPUC on a confidential basis. This report would provide visible market prices for components of the full-requirements product and provide the PaPUC with any changes in broad trends in the wholesale markets since the previous solicitation. If appropriate, the market report could also report the results of similar solicitations held in the State or in a comparable region. This report would also include a reserve price for each of the products available for the residential class. The reserve price will be calculated on the basis of the best available market data relevant to the PECO zone and supply period and will be updated on the bid date and provided to the PaPUC in the IE's confidential report.

[1] Encryption is optional, but bidders will be encouraged to practice the encryption method and to use it on the Bid Date. The Independent Evaluator will verify the identity of bidders that submit unencrypted bid forms using the bidder-specific confidential information provided with the Part 1 Notification.

- ~~If desired, the IE will prepare a confidential report to the PaPUC detailing current market conditions affecting the products of the RFP.~~

- ~~This report would be provided one week to ten days in advance of the Bid Date to the PaPUC on a confidential basis.~~

XIV. Bid Processing

A bidder's bids must be received between 10 AM and 12 PM (noon) on the Bid Date. The Bid Form, as provided to each bidder along with its Part 1 Notification, is the exclusive method for the submission of bids. The RFP Rules are the governing document regarding the processing of bids on the Bid Date. The steps of the process are as follows:

- The Bid Form must be filled out completely, encrypted (optional), and transferred according to the instructions provided by the IE.

- A bidder submits its bids electronically, by transferring a Bid Form through a secure file transfer ~~interface~~system. The bidder must use a username and a password ~~provided by the IE~~ to access the secure ~~interface.~~file transfer system. The bidder must either use ~~a~~the security code provided by the IE to encrypt ~~the file,~~its Bid Form or provide the security code over the phone if the ~~file~~Bid Form is not encrypted. A bidder can email the IE to ask for confirmation of the IE's receipt of the Bid Form.

- The primary backup method for submitting the Bid Form is by email. A bidder that submits the Bid Form by email will be informed that the IE recommends that the Bid Form ~~by~~be encrypted. A bidder that must resort to submitting its Bid Form by email because of technical difficulties must follow the instructions provided by the IE for this contingency. These instructions will include a representative of the bidder ~~phoning~~emailing or texting the IE to advise the IE of technical difficulties. If a Bid Form submitted via the ~~use of an email transmission to submit bids and to~~backup method is not encrypted with the security code, the bidder must provide ~~authenticating information~~the security code over the phone to the IE.

- The IE checks the Bid Form received for completeness and consistency with the requirements of the RFP, including a verification that the pre-bid letter of credit is sufficient to cover the bids of each bidder. The IE contacts each bidder with the evaluation of the Bid Form within ~~15~~30 minutes of receipt of the Bid Form.

    - If the Bid Form is complete and consistently filled out, the IE acknowledges receipt of the Bid Form and states to the bidder that the Bid Form is complete and consistent with the ~~requirements of the~~ RFP Rules.

    - If the Bid Form received by the IE is incomplete or inconsistent, the IE acknowledges receipt of the Bid Form but advises the bidder of the information that must be added or modified. ~~The bidder may correct~~If a complete and ~~resubmit the Bid Form as long as the Bid Form~~consistently filled out bid form is not received ~~between 10 AM and noon on the Bid Date. Otherwise~~by the deadline, the bids ~~are~~will not be evaluated.

        - ~~If the pre-bid letter~~In the case where the IE provides the evaluation of ~~credit~~a Bid Form with at least ten minutes left in the Bid Window, if the Bid Form is incomplete or inconsistent with the RFP Rules, or if the Pre-Bid Letter of Credit is insufficient to support the ~~bids, the IE states that fact to~~ number of tranches bid by the bidder~~. The~~, then the bidder may correct and resubmit ~~the~~that Bid Form as long as ~~the Bid Form~~it is received between 10 AM and 12 PM (noon) on the Bid Date. ~~Otherwise,~~

        - In the case where the IE provides the evaluation of a Bid Form with less than ten minutes left in the Bid Window, or after the Bid Window has closed, the following will apply. If the Bid Form is incomplete or inconsistent with the RFP Rules, or if the Pre-Bid Letter of Credit is insufficient to support the number of tranches bid by the bidder, the bidder will have ten minutes to resubmit the Bid Form strictly for the purpose of addressing the deficiencies

identified by the IE. Only one such resubmission will be considered. The IE will reject a resubmitted Bid Form that modifies bids that were consistent with the RFP Rules as originally submitted.

- If the Pre-Bid Letter of Credit is insufficient to support the number of tranches bid by the bidder and the bidder does not correct for this by the deadline, the IE will modify the Bid Form as specified in the RFP Rules.

Formatted

- Members of the IE communicating with bidders during the submission procedures use a script so as to minimize any disparity of information provided to bidders.

- The bids supported by an adequate ~~financial guarantees~~Pre-Bid Letter of Credit will be evaluated on a price-only basis. The bids for each product will be ranked from lowest to highest price until all bids are ranked or until the number of bids that are ranked equals the number of tranches available for the product.

- The IE phones each bidder that has submitted bids by ~~6~~3 PM on the Bid Date and identifies the bidder's bids that are being identified to the PaPUC as ~~winning~~lowest-priced bids. The IE also identifies the bidder's lowest-priced bids that the IE will be recommending for approval by the Commission in its confidential report.

- If two or more bidders submit bids that are identical for a product, these bids will be considered "Tied Bids" at that price. The IE will use the tie-breaking procedure described in the RFP Rules.

The IE communicates with PECO and provides the average winning price for each product ~~and~~, whether the solicitation has purchased all available tranches~~.~~, and whether the IE has recommended approval for the lowest-priced bids. PECO will not have information regarding any bidder's specific bids.

XV. Post-Bid Procedures

XV.A. Post-Bid Meeting with PECO

To facilitate the timeline for the execution of contracts, the IE will provide to PECO certain information about the results of bidding prior to the PaPUC decision on a confidential basis. All recipients of this information will have signed the Confidentiality Statement and will treat such information as highly confidential. All recipients of the information will be advised of its confidential nature and that it is preliminary, subject to approval by the PaPUC.

The information provided to PECO will include:

- The number of tranches of each product that were filled;
- The weighted average winning bid price of each product;
- The names of bidders that submitted Part 1 and Part 2 Proposals~~.~~;
- Whether the IE recommended approval of the lowest-priced bids.

XV.B. PaPUC Decision

The IE will present the results of each solicitation to the PaPUC by 8 AM on the day immediately following the Bid Date in a confidential report. This confidential report will include the ~~winning~~lowest-priced bids determined during the evaluation as well as a recommendation from the IE on whether or not the lowest-priced bids should be approved. Following the submission of the report by the IE:

- The PaPUC will have one (1) business day to consider the report of the IE and to approve or reject each of the winning bids. If the PaPUC does not act within one (1) business day, the winning bids are deemed to be approved.

- The IE will notify all bidders that ~~have approved~~had lowest-priced bids. The IE provides to PECO the name of each approved supplier, and for each such supplier, the number of tranches won by the supplier and the supplier-specific price for each product. The supplier-specific price for a given product is the average of the supplier's approved bids for that product.

- PECO is not provided with information concerning losing bids.

XV.C. Provision of Redacted Final Report to PECO

To assist PECO in assessing whether the products offered could be improved in future procurement plans and to assist it in finalizing its contingency plans should the results of any solicitation be rejected by the Commission, ~~PECO~~the IE will ~~be provided~~provide PECO with certain additional information. Namely, PECO will be provided with a redacted version of the factual report provided to the Commission on the results of the solicitation. The report will be redacted so that PECO will not receive information about bids that is bidder-specific or ~~proposal~~Proposal information that a bidder may consider confidential or proprietary. The report will be provided at the conclusion of the solicitation, namely when all contracts with winning suppliers that are approved by the Commission have been executed.

Any bidder-specific information that is not relevant to PECO's assessment of the products offered or to its contingency plan will be redacted to the extent that the bidder could reasonably believe such information to be confidential. Analysis of the bidding data that provides an overview of the competition or summary statistics for the entire pool of bidders will not be redacted. The IE expects items that will be redacted to include:

- The identities of losing bidders that submitted bids and the particular products for which losing bidders submitted bids;
- The bid prices of individual tranches won by each bidder;
- Information concerning specific losing bids;
- The identities of bidders that did or did not participate in the bidder training session to practice the online submission of bids; and
- Deficiencies in the Proposals of certain bidders or difficulties with the submission ~~or~~of practice or actual bids, to the extent that such deficiencies were cured and or such difficulties did not materially impact the results of the solicitation.

Formatted: Space After: 0 pt

XV.D. Preparation of Uniform SMA Documents by the IE

The IE will prepare the Uniform SMA for each New Default Supplier and the guaranty for each Default Supplier that is relying on the financial standing of an RFP Guarantor in accordance to the timeline provided below.

- On the Bid Date, the IE will contact ~~RFP Bidders~~bidders that have ~~Bids~~bids that are identified to the PaPUC as ~~winning Bids~~lowest-priced bids and did not provide the necessary information to prepare the Uniform SMA with the Part 1 Proposal. These ~~RFP Bidders~~bidders are instructed to provide the required information by ~~12PM~~12 PM (noon) on the following business day.
- On the day the Commission approves some or all of the ~~winning Bids~~lowest-priced bids, the IE sends to PECO by secure file transfer the Uniform SMA, including all exhibits, for each New Default Supplier, the guaranty for each New Default Supplier relying on the financial standing of a Guarantor, transaction confirmations for each product and Default Supplier, and the most current contact information that the IE has for each Default Supplier.

XV.E. Execution of Uniform SMA Documents and Transaction Confirmations

PECO and each Default Supplier will execute the Uniform SMA documents and transaction confirmations in accordance with the schedule provided below~~:~~

- ~~By 12PM~~12 PM on the second business day following the Commission approval of some or all of the ~~winning Bids, PECO:~~
  - ~~Partially executes two (2) originals of each Transaction Confirmation for each Default Supplier and each product.~~
  - ~~Partially executes two (2) originals of the Uniform SMA with each New Default Supplier.~~
  - ~~Informs each Default Supplier of its specific creditworthiness requirements.~~

- ~~By 12PM on the second business day following the Commission approval of some or all of the winning Bids~~lowest-priced bids, PECO sends~~:~~

  - ~~One (1) copy of the signature page of the Uniform SMA (page 75)~~ by email ~~to each New Default Supplier;~~ :

    - ~~One (1) copy~~An electronic version of the partially executed Uniform SMA, including all Exhibits, to each New Default Supplier;

    - An electronic version of the partially executed Transaction Confirmation ~~by email~~ to each Default Supplier for each product for which the Default Supplier has won tranches; and

    - ~~The guaranty or an amendment to the current~~ An electronic version of the guaranty (if necessary) ~~by email for~~to each New Default Supplier relying on the financial standing of an RFP Guarantor.

- ~~By close of the second business day following the Commission approval of some or all of the winning Bids,~~ PECO ~~sends by overnight delivery service:~~

  - ~~The two (2) originals of the partially executed Uniform SMA, including all exhibits, to~~also informs each ~~New~~ Default Supplier~~; and~~ of its specific creditworthiness requirements.

  - ~~The two (2) original partially executed Transaction Confirmations to each Default Supplier.~~

- By ~~2PM~~2 PM on the third business day following Commission approval of some or all of the ~~winning Bids~~lowest-priced bids:

  - Each New Default Supplier partially executes the ~~two (2) originals of the~~ Uniform SMA using an acceptable signature and returns ~~one (1) copy of these signature pages to PECO by email. Additionally, each New Default~~

XV.F. Return of Pre-Bid Security

The IE plans to release the pre-bid letters of credit for all bidders no later than six (6) business days after the Bid Date. To ensure that the signed certificates of cancellation are returned to the bidder's bank as quickly as possible, the certificates of cancellation will be signed by PECO in advance of when the pre-bid letter of credit must be released and held by the IE. The time of release will depend on whether or not the bidder has won any products at the RFP and on the PaPUC's decision:

- If the Commission does not approve any of a particular bidder's bids, the IE will release that bidder's pre-bid letter of credit within three (3) business days after the Bid Date.

- If the Commission approves any of a particular bidder's bids, the IE will release that bidder's pre-bid letter of credit as soon as practical and no later than six (6) business days after the Bid Date.

    - PECO will notify the IE as soon as an approved supplier has returned the executed Uniform SMA and Transaction Confirmation.

    - The prompt return of bid security will also be conditioned upon the bidder not having violated any undertakings agreed to as part of the RFP.

PECO ENERGY COMPANY
STATEMENT NO. 4-R

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

PETITION OF PECO ENERGY COMPANY
FOR APPROVAL OF ITS
DEFAULT SERVICE PROGRAM
FOR THE PERIOD FROM
JUNE 1, 2025 THROUGH MAY 31, 2029

DOCKET NO. P-2024-3046008

REBUTTAL TESTIMONY

PUBLIC VERSION

WITNESS: KATIE ORLANDI

SUBJECTS: RESERVE PRICE, CONTINGENCY PLAN,
CAPACITY PROXY PRICE

II. RESERVE PRICE 2
III. CONTINGENCY PLAN 10
IV. CAPACITY PROXY PRICE 18
V. CONCLUSION 24

REBUTTAL TESTIMONY
OF
KATIE ORLANDI

I. INTRODUCTION AND PURPOSE OF TESTIMONY

1. Q. Please state your full name and business address.

A. My name is Katie Orlandi. My business address is 633 West 5th Street, Suite 1200, Los Angeles, CA, 90071.

2. Q. Have you previously submitted testimony on behalf of PECO Energy Company ("PECO" or the "Company") in this proceeding?

A. Yes. I submitted direct testimony that is marked as PECO Statement No. 4. My background and qualifications are set forth in that statement.

3. Q. What is the purpose of your rebuttal testimony?

A. The purpose of my rebuttal testimony is to address the direct testimony of Dr. Serhan Ogur on behalf of the Office of Consumer Advocate ("OCA") who is recommending that PECO's reserve price proposal for its sixth default service program ("DSP VI") be rejected along with modifications to PECO's long-standing contingency plan for the residential portfolio. I also address the direct testimony of Frank Caliva III on behalf of the Retail Energy Supply Association ("RESA") who is recommending that PECO's capacity proxy price ("CPP") proposal be rejected.

II. RESERVE PRICE

4. Q. What is the purpose of the reserve price proposal and how would it be used?

A. As more fully described in my direct testimony, the purpose of PECO's reserve price proposal is to protect residential customers from the risk of paying rates that may exceed the value to residential customers of the benefits of the all-in, fixed-price full requirements product. The reserve price would be used to guide the recommendation to the Pennsylvania Public Utility Commission ("Commission") from NERA Economic Consulting ("NERA") in its capacity as the Independent Evaluator.

On the bid date, for each product, NERA selects the lowest-priced bids to fill the available tranches of that product and identifies these bids to the Commission. In addition, NERA would determine, separately for each residential product, whether any of the lowest-priced bids cause the average winning bid price to exceed the reserve price for that product. If so, NERA would recommend as part of the Final Report to the Commission that those bids be rejected. The Final Report is the full factual report on the results of the solicitation, which is provided to the Commission by 8 AM on the day after bids are due.

5. Q. When would NERA communicate the reserve prices to the Commission?

A. One week to ten days before bids are due, NERA provides a "Market Report" to the Commission. Under PECO's current default service program ("DSP V"), this report summarizes the then-current market conditions and provides visible market prices for components of the full requirements products. If approved for DSP VI, NERA would also calculate a reserve price for each residential product. The

Market Report would provide these reserve prices to the Commission and would also explain the methodology used for the calculations.

Then, on the bid date, the reserve prices would be updated with the most recent market data and provided to the Commission as part of the Final Report.

6. Q. If the average winning bid price for a product exceeds the reserve price for that product, does the failure to meet the reserve price automatically lead to the rejection of some or all of the bids for that product?

A. No. Under the proposed approach, NERA would recommend that any of the lowest-priced bids for a residential product that cause the average winning bid price to exceed the reserve price for that product be rejected on this basis. However, this is merely an additional analysis that NERA would provide to the Commission for residential products as part of the Final Report. There is no plan to replace any of the current analyses that NERA provides to the Commission to assist the Commission in its evaluation of the results and to support NERA's recommendation on whether each winning bid should be accepted or rejected.

The Commission alone decides whether to accept or reject each of the lowest-priced bids. NERA's recommendations are purely advisory. All lowest-priced bids are presented to the Commission and NERA's recommendations regarding these bids are not (and could not be) binding in any way on the Commission.

[BEGIN CONFIDENTIAL]

[END CONFIDENTIAL] The proposed

addition of reserve prices for residential products does not alter the situation in any way.

7. Q. Why is Dr. Ogur recommending that the reserve price proposal be rejected?

A. Dr. Ogur identifies two drawbacks to reserve prices. First, if the reserve price for a product is set "too low," meaning the reserve price is set lower than the expected results from a competitive bidding process because not all of the costs and risks related to the supplier's obligations are accounted for in the reserve price for that product, customers could be deprived of the benefits of a stable all-in price that would have been provided by the full requirements product. This is because PECO would serve any unfilled tranches from the spot market operated by PJM Interconnection, L.L.C. ("PJM") until the tranches could be re-bid in the next solicitation. Second, if the reserve price for a product is set "too low," competitively priced bids could be rejected. This could result in bidders losing confidence in the process and becoming hesitant to participate in future solicitations.

8. Q. Do you agree with Dr. Ogur's position that the reserve price proposal could lead to customers being deprived of the benefits of a stable all-in price?

A. If NERA were to recommend rejecting bids for a residential product because those bids cause the average winning bid price to exceed the reserve price for that product, *and* the Commission agreed and rejected those bids, *and* with hindsight, it turns out that future market conditions were such that customer rates would have been lower if the bids had not been rejected, then customers would have been deprived of the benefits of a full requirements product at a lower and stable

price. But this hypothetical is highly unlikely. In practice, the reserve price for a product will account for all of the known costs and risks on the bid date. The very purpose of the reserve price proposal is to identify bids above market. It would entirely defeat this purpose for NERA to set the reserve price for a product too low, intentionally, or otherwise.

9. Q. Do you agree with Dr. Ogur that the reserve price proposal could affect supplier participation?

A. Dr. Ogur states that "rejecting competitively priced bids because of incorrect determination of the reserve price even in one solicitation could have catastrophic and irreversible effects on participation in future procurements."[1] In making this observation, Dr. Ogur implicitly assumes first, that the reserve prices would be set too low and second, that the average winning bid price not meeting the reserve price for a residential product would lead to the rejection of such bids. Both assumptions are incorrect. I have already explained that the reserve price for each residential product would include all costs and risks related to the supplier's obligations and would use the best market data available. I have also already explained that the Commission accepts or rejects each lowest-priced bid and that the Commission may or may not agree with NERA's recommendation in view of all information available.

[1] OCA St. 1, p. 22, lines 1-4.

10. Q. Does Dr. Ogur believe there are potential benefits to using reserve prices?

A. Dr. Ogur states that reserve prices can serve "as an effective tool for mitigating the market power of bidders in an imperfectly competitive bidding process, and for preventing bidders from exercising their unilateral market power or attempting to raise prices through collusion."[2] For this purpose, Dr. Ogur conducted an analysis of participation and of market concentration trends to determine whether the reserve price proposal was justified because of increasing market concentration.

11. Q. How do you respond to Dr. Ogur?

A. I agree with Dr. Ogur that there is no need for reserve prices to address market concentration issues in PECO's solicitations at this time. However, I must emphasize that the reserve price proposal was not developed to address concerns relating to market concentration. There are controls in place, including load caps and required certifications during the qualification process, to protect customers from issues relating to market power of bidders.

When the Commission has rejected bids in PECO's default service solicitations or in other default service procurements held in Pennsylvania, the Commission typically points to a lack of sufficient competition as the reason for

[2] OCA St. 1, p. 20, lines 18-22.

rejection. For example, in the January 2014 solicitation, the Commission stated as follows when rejecting the bid results for the 24-month residential product:

> The RFP for the 24-month residential product was non-competitive. Therefore, we approve the bid results for the 12-month residential, 12-month small commercial, 6-month medium commercial, and 12-month large commercial and industrial bid results, but reject the 24-month residential bid results submitted for the January 2014 Full Requirements RFP process.[3]

12. Q. Does Dr. Ogur believe there are potential benefits to using reserve prices when the solicitations are competitive and there are no concerns about market power?

A. No. Dr. Ogur states that "a reserve price would not provide any consumer protection benefits in a truly competitive market because any bidder that would attempt to bid above the competitive market price would be undercut by other bidders."[4]

13. Q. How do you respond to Dr. Ogur?

A. I agree with Dr. Ogur that in a "truly competitive market," which I take to mean a market that approaches the economist's ideal of perfect competition, any attempt to bid above "the" competitive price by a supplier is doomed to failure as there will always be many other suppliers stepping in, ready to bid at "the" competitive price. PECO's solicitations under DSP V have attracted healthy interest (between six and thirteen suppliers qualified to bid) and the resulting prices have been generally consistent with market conditions. However, I see a difference between

[3] *Re: PECO Energy Company Results of January 2014 Request for Proposals Process*, Docket No. P-2012-2283641 (Secretarial Letter issued Jan. 30, 2014).

[4] OCA St. 1, p. 21, lines 2-5.

this practical level of healthy competition in PECO's solicitations and the idealized competitive scenario that Dr. Ogur appears to have in mind.

In the more practical competitive environment of PECO's solicitations, it is straightforward to envision circumstances where a reserve price would serve to protect residential customers. In a typical solicitation, there are twenty-one residential tranches available to bid (twelve 12-month tranches and nine 24-month tranches) and nine small commercial tranches available to bid (six 12-month tranches and three 24-month tranches). Every other solicitation also offers eight tranches for the consolidated large commercial and industrial class, all of which are 12-month tranches. Each supplier will have preferences among those products. A supplier, based on its expertise and the portfolio of resources it brings to assemble the full requirements products, could be better suited to serving the residential class versus other classes, or could prefer to bid on longer term products, such as the 24-month residential or commercial tranches. Some bidders may be limited in how much they bid for a particular class by the load cap. Other bidders, planning to participate in other default service procurements in Pennsylvania and elsewhere, may limit the number of tranches they bid to fit their overall business plan. At the confluence of these supplier preferences, hypothetically, the subset of suppliers that end up bidding on, say, the 24-month residential product could happen to be those suppliers that have a higher assessment of market risks.[5] (I am not saying that this hypothetical is at all likely,

[5] Unlike during a descending clock auction, bidders are not able to switch their bids between products during bidding.

just that it is possible.) In these circumstances, as unlikely as they may be, the average winning bid price could be inconsistent with competitive market conditions and exceed the reserve price. NERA would recommend rejection of some of the lowest-priced bids for the 24-month residential product (in this hypothetical) as a protection for residential customers. The Commission would have this additional information in evaluating the bid results.

14. Q. Dr. Ogur states that he cannot assess whether the reserve prices will be determined accurately. Do you believe that additional information on the methodology to calculate reserve prices should be released to Dr. Ogur or to any other party in this proceeding?

A. The information already provided in my direct testimony regarding the calculation of reserve prices is meant to assure bidders that the reserve prices will not be set lower than what would prevail in a competitive bidding process. The components of the full requirements products are well known as are the costs and risks associated with supplying full requirements products. The current costs and risks are described by Company witness Scott G. Fisher in his direct testimony (PECO Statement No. 3).[6] The available market prices for these components are not a secret. As I have already confirmed, the reserve price for a residential product will account for the costs and risks of serving that product, it will be specific to the terms of the contract, and it will be based on the most current market information available on the bid date.

[6] The reserve prices will account for the costs and risks discussed in Mr. Fisher's direct testimony and address new uncertainties as they arise.

There is a danger to providing specific information about the methodology to calculate the reserve prices, as this information could affect bidding strategy. In future solicitations, instead of submitting their most competitive offers, bidders could use the description of the methodology to construct and submit their bids at the highest possible level that they expect will not result in the average winning bid price exceeding the applicable reserve price for each residential product.

15. Q. How would you summarize your rebuttal testimony in regard to the reserve price proposal?

A. The purpose of the reserve price proposal is not to address market power, but rather to protect residential customers from paying rates that may be out of line with underlying market conditions. Reserve prices will not be set "too low." The reserve prices will be based on the best data available to account for all of the costs and risks of serving full requirements products. Reserve prices can serve to protect residential customers even if the bidding process is competitive.

III. CONTINGENCY PLAN

16. Q. Please describe the contingency plan for residential products as proposed by PECO for DSP VI.

A. PECO proposes to employ the same contingency plan in DSP VI that has been approved by the Commission for every default service program beginning with DSP I. The contingency plan is invoked if the number of approved bids is insufficient to fill all available tranches for residential products.[7] In that case, the

[7] The number of approved bids may be insufficient to fill all available tranches because an insufficient number of bids were offered on the bid date and/or because the Commission rejects some or all of the lowest-priced bids.

unfilled tranches will be included in PECO's next scheduled solicitation (in roughly six months, with a supply period that starts six months later). In the interim, as described in the RFP Rules (PECO Exhibit KO-1)[8], PECO will assume responsibility for the unfilled tranches as a PJM Load Serving Entity ("LSE"), acquiring the necessary supply through PJM-administered markets and obtaining sufficient AECs at market prices.

In the event of a supplier default under PECO's Supplier Master Agreement ("SMA"), if the supplier default occurs within a reasonable time before a scheduled solicitation, the tranches served by the defaulting supplier will be incorporated into PECO's next scheduled solicitation. PECO will assume responsibility as a PJM LSE for these tranches in the interim. Otherwise, if PECO would have to serve the defaulted tranches for more than six months, PECO will file a plan with the Commission proposing alternative procurement options and a request for approval on an expedited basis.[9]

17. Q. Why does Dr. Ogur find it necessary to modify PECO's long-standing contingency plan at this time?

A. Dr. Ogur is concerned that the contingency plan would expose residential customers to volatility because PECO would be making more purchases in the spot market. Dr. Ogur makes his proposal at this time because he is concerned that, if the Commission were to approve the reserve price proposal for DSP VI,

[8] PECO Ex. KO-1, p. 12.

[9] *Petition of PECO Energy Co. for Approval of its Default Serv. Program for the Period from June 1, 2021 through May 31, 2025*, Docket No. P-2020-3019290 (Opinion and Order entered Dec. 3, 2020).

bids for a residential product could be rejected because of not meeting the reserve price, which would lead PECO to invoke its contingency plan more often than in the past when there were no reserve prices.[10]

18. Q. What does Dr. Ogur recommend as an alternative contingency plan for residential products, and why?

A. Dr. Ogur recommends that PECO purchase a portfolio of energy blocks and then transact on the spot market to balance hourly load differences to the block energy portfolio. He makes this recommendation because making some block energy purchases would reduce (but, as he acknowledges, not eliminate) spot-market exposure and thus would reduce volatility for residential customers.

19. Q. Do you agree with Dr. Ogur's reasons for proposing an alternative contingency plan at this time?

A. I do agree with Dr. Ogur that a portfolio of products that includes purchases from the spot market could result in volatility for residential rates and that more exposure to the spot market will, everything else equal, result in more volatility. I also agree with Dr. Ogur that rate stability is an important objective for residential customers.

However, I would like to put Dr. Ogur's concern about rate volatility for residential customers from the contingency plan into context. First, since the first solicitation for fixed-price, full requirements residential products in June 2009, the contingency plan has been invoked exactly once. Following the January 2014

[10] OCA St. 1, p. 18, lines 23-25 and p. 19, line 1.

solicitation, in the thick of the polar vortex, the Commission rejected the bid results for seven 24-month residential tranches.[11] In his direct testimony, Mr. Fisher explains that the events leading up to the January 2014 solicitation were nothing short of exceptional. The market conditions were extreme and there were valid exogenous reasons for the low bidder participation.[12] Second, in this single instance of the contingency plan being used, PECO took responsibility for 12% of the residential portfolio in total,[13] acquiring the necessary supply through PJM-administered markets, from June 1, 2014 through November 30, 2014. As a result of the laddering of residential contracts, the rest of the residential portfolio consisted almost exclusively of fixed-price, full requirements tranches procured in the previous three solicitations.[14]

I provide this context first to make the point that the contingency plan has been rarely used and I do not see this situation changing for DSP VI. As I have already testified, the reserve prices are another analytical tool available to the Commission in its consideration of the bid results. The average winning bid price for a product could fail to meet the reserve price, but the Commission could decide to accept all of the lowest-priced bids when considering the competitiveness of the solicitation and then-current market conditions.

[11] *See* footnote 16 in PECO Statement No. 3, "To date, 981 FPFR default service supply product tranches have been solicited by PECO. The Commission has approved the bid results for all but seven of these tranches."

[12] PECO St. 3, p. 30, n.40.

[13] 12% includes 0.8% of residential load always served by PECO and 11.2% of residential load from the tranches for which bids were rejected.

[14] The previous solicitations for full requirements products were held in November 2012, January 2013, and September 2013. The portfolio also included 120 MW of baseload from the block energy procurement under DSP I.

Conversely, the average winning bid price for a product could meet the reserve price for that product, but the Commission could decide to reject some or all of the lowest-priced bids when considering the competitiveness of the solicitation and then-current market conditions. I do not see the Commission accepting the reserve price proposal as leading to a greater probability that bids for residential products would be rejected and that the contingency plan would be invoked.

I provide this context also to make the point that the laddering of residential contracts provides a buffer against volatility in the residential bill. I noted above that a portfolio of products that includes purchases from the spot market "could" result in volatility for residential rates. However, it is unclear to me how much volatility would actually result in the residential bill from the contingency plan. The contingency plan would likely affect only a small percentage of the commodity portion of the residential bill, which also includes transmission, distribution, and various other non-bypassable charges and adjustments. Without a quantification of the impact of PECO's proposed contingency plan on the residential bill, it is difficult for me to agree that an alternative contingency plan would provide appreciable rate stability benefits.

20. Q. Do you have other concerns about Dr. Ogur's alternative contingency plan?

A. Yes, I do. I note that Dr. Ogur presents his alternative contingency plan as reducing *volatility* of rates compared to PECO's proposed contingency plan, but Dr. Ogur does not discuss or analyze the impact of his alternative contingency plan on the *level* of the rates paid by residential customers. Ideally, residential customers pay rates that are both low (consistent with the market) and

comparatively stable. If, as Dr. Ogur believes, residential rates under his alternative contingency plan will be less variable but, at the same time, rates can be expected to be higher than under PECO's proposed contingency plan, then more analysis is required to assess whether Dr. Ogur's alternative is advantageous to residential customers.

I am concerned about the residential rate level because I see features of Dr. Ogur's alternative contingency plan that will put upward pressure on the level of residential rates. First, I would foresee significant costs to implementing Dr. Ogur's alternative contingency plan. Dr. Ogur recommends that PECO be ready to "acquire standard fixed-quantity (on-peak, off-peak, or around-the-clock) energy blocks **within days of procurement shortfall or supplier default**" [emphasis added]. This means that PECO will have to complete all necessary preparation to construct its block energy portfolio and have in place a procurement process in advance of a procurement shortfall or supplier default so that it is ready to proceed "within days." The cost of such preparation would be borne by residential customers, putting upward pressure on rates. This stands in contrast to PECO's proposed contingency plan. PECO already serves a portion of the residential load so that there is minimal or no cost to serving additional tranches of residential load if the contingency plan is invoked.

Second, Dr. Ogur's alternative contingency plan may weaken bidders' incentives to submit their best offers in the full requirements solicitations compared to PECO's proposed contingency plan. If this is the case, Dr. Ogur's alternative

contingency plan could lead to higher average winning bid prices in the full requirements solicitations, putting further upward pressure on rates.

21. Q. How does PECO's long-standing contingency plan incentivize bidders to submit their best offers in the full requirements solicitations?

A. Under PECO's long-standing contingency plan, if any tranches for residential products are unfilled in a full requirements solicitation, PECO will serve those tranches for six months. Thus, bidders are not provided a second bite at the apple to serve residential default load. Bidders do not have an immediate opportunity to bid again for full requirements tranches, nor do bidders have an opportunity to win a contract with PECO for individual components of default supply, such as energy blocks. Their single opportunity to bid to serve residential default load is through the single solicitation for full requirements products, which incentivizes bidders to offer their best, most competitive bids across the residential products in that solicitation.

22. Q. Why does Dr. Ogur's alternative contingency plan potentially compromise the incentive for bidders to submit their best bids in the full requirements solicitations?

A. Under Dr. Ogur's alternative proposal, bidders have a second bite at the apple to serve residential default load, because if tranches are unfilled, bidders have an immediate opportunity to win a contract with PECO to supply energy blocks, which is the main component of default supply. Bidders that submit higher bid prices in the full requirements solicitation now face less risk to do so. It could be that their bids are approved at a higher level than would otherwise be the case, to

the bidders' advantage and to the detriment of customers. Or it could be that their bids are rejected and not all tranches are filled, in which case these bidders will have a further opportunity to bid to supply energy blocks instead. Bidders that face less risk submitting higher bid prices are more likely to do so. This could imply that bidders that participate in the full requirements solicitations are now less likely to submit their lowest, most competitive, offers for full requirements products.

23. Q. Can you elaborate on the costs that you foresee would be involved in PECO standing ready to implement Dr. Ogur's alternative contingency plan?

A. Certainly. First, I would foresee that PECO would need to develop a methodology to construct the block energy portfolio that it would procure. In my experience, utilities facing this task develop principles based on load forecasting to determine the most appropriate number of on-peak, off-peak, or around-the-clock energy blocks that should be procured. In PECO's case, such principles would need to be flexible enough to be applied at any time in case of a supplier default and for any procurement shortfall that could occur. There would be time and costs involved in the development of such a methodology.

Second, I would foresee that PECO would need to design a competitive procurement process to solicit bids for energy blocks, including bidding rules, protocols, and a supplier agreement specific to the purchase of the energy blocks. This would lead to incremental costs, not just to design the process and finalize documents, but also to communicate this opportunity to suppliers to ensure healthy participation in the bidding process.

24. Q. Please summarize your concerns with Dr. Ogur's modification to the contingency plan for residential products.

A. My first concern is that Dr. Ogur has not fully demonstrated that his alternative contingency plan would be beneficial to customers. Dr. Ogur's alternative contingency plan could negatively affect residential rates because of the costs of implementation and the potential effect on bidding in the full requirements solicitations. Benefits from reduced volatility, if any, have not been measured against any negative effects on the level of residential rates.

IV. CAPACITY PROXY PRICE

25. Q. Why is PECO proposing to use a Capacity Proxy Price in DSP VI?

A. As described by PECO witness Sulma Dalessio, PECO is proposing the use of a CPP and true-up mechanism to address potential delays to the capacity auctions held by PJM under its Reliability Pricing Model ("RPM") during the DSP VI term.[15] The result of the capacity auctions held under PJM's RPM for the PECO zone is the capacity price that suppliers are required to pay PJM for their capacity obligations related to serving PECO's default load.[16] If the result of a Base Residual Auction ("BRA"), which is the first in a series of capacity auctions held by PJM for a delivery year, is not available in time for bidders to incorporate the capacity price into their bids due to a delay in PJM's schedule, then bidders face additional uncertainty. If bidders underestimate the capacity price in formulating

[15] PECO St. 1, pp. 21-22.

[16] The applicable zone within PJM is the PECO_RESID_AGG zone.

their bids, the payment they receive from PECO for capacity will be less than their required payment to PJM.

Bidders could respond in a number of ways to this uncertainty. Bidders that choose to participate in PECO's solicitations will include a premium that lessens the likelihood that they are underestimating the capacity price that is not yet available from PJM. Such a premium will increase bid prices. Bidders could choose to participate but bid on a lower number of tranches to lessen the amount of default load they serve that is subject to capacity price uncertainty. Bidders could choose not to bid at all on products for which the capacity price is unknown for part of the supply period, especially if bidders have the opportunity to bid on shorter-term products for which there is no capacity price uncertainty. Any and all of these responses would put upward pressure on average winning bid prices, to the detriment of rates paid by default service customers.

26. Q. How will the use of a CPP limit the impact of capacity price uncertainty for default service customers?

A. PECO is proposing that, if PJM does not conduct its BRA in time for bidders to incorporate a known capacity price into the formulation of their bids, then a CPP would be put in place. Bidders would use the CPP to formulate their bids. Suppliers would then be made whole under the SMA for any differences between the CPP and the ultimate capacity price that they pay to PJM. Suppliers would be paid (or would pay) the difference between the actual capacity price due to PJM and the CPP for the applicable delivery year. The true-up mechanism provides certainty to bidders that they will be fully compensated for their costs to PJM for

capacity. This certainty eliminates the need for bidders to add premiums into their bids. This certainty should also counteract any negative impact in participation that we would otherwise expect from the capacity price uncertainty.

27. Q. Why does RESA witness Caliva object to the inclusion of the CPP?

A. Mr. Caliva objects to the inclusion of the CPP on the following grounds. First, Mr. Caliva states that the CPP creates a distortion in the retail market because only default service suppliers have an option of a true up on the capacity price, leading to a result that is "negative for all supply customers." Second, Mr. Caliva states that the CPP is unnecessary because other options exist for default suppliers to deal with the lack of a known capacity price.

28. Q. Why does Mr. Caliva believe the CPP would distort the retail market?

A. Mr. Caliva notes that the "lack of a capacity price affects all LSEs." He then claims that the CPP provides a solution for "default suppliers to mitigate their risk" but that no such solution is available to electric generation suppliers ("EGSs").

29. Q. Do you agree that the CPP would distort the retail market ?

A. No, the use of a CPP would not lead to a distortion in retail markets. This would only be the case if EGSs and default service suppliers were in identical circumstances, but they are not.

Default service suppliers must serve customers under the terms of the SMA. This means they are required to serve at a fixed-price for the entirety of the term of the contract, either 12- or 24-months. Also, default service suppliers have no control

over how rates to customers are determined on the basis of the auction results and they have no relationship with customers.

This is far from the situation faced by EGSs. EGSs can enter into fixed or variable price contracts. EGSs have the flexibility to enter into contracts of various lengths, as short as three billing cycles. EGSs have relationships with customers and can set up terms that are tailored to specific customers or to specific market conditions. EGSs have the option to include in their contracts "regulatory-out" provisions, which allow EGSs to reformulate terms of the contract for customer approval. None of these options are available to default suppliers.

Thus, EGSs have a wide range of flexibility in how they formulate their contracts with customers and this flexibility allows them to fashion a solution to mitigate their risk from an uncertain capacity price. For example, an EGS can use contract terms only as long as capacity prices are known, which entirely eliminates the need to deal with the capacity price uncertainty.

30. Q. Do you agree that the CPP is unnecessary because other options exist for default suppliers to deal with the lack of a known capacity price?

A. No. Mr. Caliva states that there is a secondary market for capacity where generators can sell capacity directly to LSEs. Mr. Caliva describes the purpose of PJM's BRA as providing a "price signal" and states that "physical generation resources are in fact selling capacity to LSEs for delivery years that are not known." [17] Mr. Caliva then argues that this secondary market provides a fixed

[17] RESA St. 1, p. 29, lines 11 and 14, p. 30, lines 20-21, and p. 31, lines 1-2.

price at which suppliers can buy capacity and thus suppliers can then incorporate that fixed price from the secondary capacity market into their bids. However, Mr. Caliva ignores the fact that all LSEs must pay the price established in PJM's capacity auctions for their capacity obligation. The price at which such LSEs may or may not have entered into an agreement in a secondary market to buy capacity is not the price that is relevant to their bids. The capacity price resulting from PJM's RPM is not solely a price signal as Mr. Caliva implies, but a charge that suppliers participating in PJM cannot avoid.

It may be that Mr. Caliva believes that there are products available to bidders in a secondary market to hedge the results of PJM's capacity auctions. Even if this is the case, a hedge may help to reduce supplier risk, but would not fully mitigate the uncertainty of an unknown capacity price prior to the bid date. As I stated, this uncertainty is what might cause unnecessarily high prices for default service customers.

31. Q. Were other witnesses supportive of PECO's CPP proposal?

A. Yes. Dr. Ogur discusses the alternatives to PECO's CPP proposal in his testimony and concludes that PECO's CPP proposal is the best option.[18] Specifically, in contrast to the alternatives discussed, Dr. Ogur finds that PECO's proposal avoids putting the price risk on bidders and therefore avoids bidders incorporating large premiums into their bids. Also, by using a CPP approach, PECO avoids an alternative of procuring shorter contract terms that do not overlap with a delivery

[18] OCA St. 1, p. 16, line 14.

period for which the BRA price is not yet known, which would expose customers to additional rate volatility. Under the CPP approach, PECO is thus able to continue procuring both the 12- and 24-month products. Additionally, Dr. Ogur notes that the CPP approach is used by other default service providers in Pennsylvania and in other retail choice states.

32. Q. Has the Commission already approved the use of a CPP in default service procurements in Pennsylvania?

A. Yes. The Commission has approved a CPP in the default service procurements for FirstEnergy Pennsylvania Electric Company ("FE-PA")[19] and for Duquesne Light Company ("DLC").[20]

In regard to the use of CPPs for FE-PA and DLC, the Commission approved the approach because it would maintain the diversity of their default service contracts while mitigating risk premiums from default suppliers in bids.

33. Q. Will PECO's CPP and true-up approach enable PECO to maintain the current diversity of products while also mitigating risk premiums?

A. Yes.

[19] *See Joint Petition of Metropolitan Edison Co., Pennsylvania Electric Co., Pennsylvania Power Co., and West Penn Power Co. for Approval to Modify their Supplier Master Agreement*, Order at Docket Nos. P-2020-3021424, P-2020-3021425, P-2020-3021426, and P-2020-3021427 (Order entered Oct. 13, 2020), p. 9; *Petition of Metropolitan Edison Co., Pennsylvania Electric Co., Pennsylvania Power Co., and West Penn Power Co. for Approval of their Default Service Plan for the Period from June 1, 2023 through May 31*, 2027, Docket Nos. P-2021-3030012 et al. (Recommended Decision issued June 29, 2022), pp. 59-60. The FE-PA DSP VI Recommended Decision was adopted without modification by the Commission in its Order entered August 4, 2022 at Docket Nos. P-2021-3030012 et al.

[20] *See Petition of Duquesne Light Co. for Approval to Modify its Supplier Master Agreement*, Docket No. P-2020-3023149 (Order entered Jan. 14, 2021), p. 4.

34. Q. How would you summarize your rebuttal testimony in regard to PECO's CPP proposal?

A. PECO's CPP proposal provides certainty to bidders that they will be made whole for their costs to PJM for capacity. This proposal eliminates the need for bidders to include premiums into their bids and may also lead to increased participation and competition in PECO's solicitations to the benefit of default service customers. The inclusion of a CPP has already been approved for use by the Commission for other default service providers in Pennsylvania.

V. CONCLUSION

35. Q. Ms. Orlandi, does this conclude your rebuttal testimony?

A. Yes.

STATEMENT NO. 1

BEFORE THE

PENNSYLVANIA PUBLIC UTILITY COMMISSION

PETITION OF PECO ENERGY COMPANY FOR APPROVAL OF ITS DEFAULT SERVICE PROGRAM FOR THE PERIOD FROM JUNE 1, 2025 THROUGH MAY 31, 2029	**)**	**DOCKET NO. P-2024-3046008**

APPENDIX A……..……Statement of Qualifications

I. QUALIFICATIONS

Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A. My name is Serhan Ogur. I am a Principal and Senior Economist at Exeter Associates, Inc. ("Exeter"). My office is located at 10480 Little Patuxent Parkway, Suite 300, Columbia, Maryland, 21044. Exeter is a consulting firm specializing in issues pertaining to public utilities.

Q. PLEASE STATE YOUR EDUCATIONAL BACKGROUND.

A. I received a B.A. degree in Economics from Bogazici University (Istanbul, Turkey) in 1996 and a Ph.D. in Economics from Northwestern University (Evanston, IL) in 2007.

Q. WHAT IS YOUR PROFESSIONAL EXPERIENCE?

A. I have 23 years of experience in the energy industry specializing in organized wholesale and retail electricity markets. My diverse background comprises energy management and consulting; analysis, design, and reporting of Regional Transmission Organization ("RTO") electricity markets and products; and state and federal regulation of electric utilities. I was employed as Economic Analyst at the Illinois Commerce Commission ("ICC") between 2001 and 2005; Senior Economist at PJM Interconnection, LLC ("PJM") between 2005 and 2014; and Senior System Operator at Fellon-McCord & Associates, LLC ("Fellon-McCord") between 2014 and 2015. I joined Exeter as Senior Analyst in 2015 and became a Principal of the firm in 2020. A complete description of my professional background is provided in Appendix A.

Q. HAVE YOU PREVIOUSLY TESTIFIED BEFORE THIS COMMISSION?

A. Yes. I testified in Docket No. P-2016-2534980 in PECO Energy Company's Default Service Program IV proceeding; Docket Nos. P-2020-3019383 and P-2020-3019384

in the joint Default Service Plan VI of Citizens' Electric Company of Lewisburg, Pennsylvania and Wellsboro Electric Company; Docket No. P-2020-3019522 in Duquesne Light Company's Default Service Plan IX proceeding; Docket No. P-2020-3019907 in UGI Utilities, Inc. – Electric Division's Default Service Plan IV proceeding; Docket No. P-2020-3022988 in Pike County Light & Power Company's Default Service Plan; Docket Nos. A-2021-3025659 and A-2021-3025662 in the case concerning the acquisition of Pike County Light & Power Company and Leatherstocking Gas Company, LLC; Docket Nos. P-2021-3030012, P-2021-3030013, P-2021-3030014 and P-2021-3030021 in the joint Default Service Plan of Metropolitan Edison Company, Pennsylvania Electric Company, Pennsylvania Power Company, and West Penn Power Company; Docket No. A-2023-3038771 *et al* in the merger of Metropolitan Edison Company, Pennsylvania Electric Company, Pennsylvania Power Company, and West Penn Power Company; and Docket No. P-2023-3039927 in Pike County Light & Power Company's Default Service Plan. All of my prior testimony before the Commission was on behalf of the Pennsylvania Office of Consumer Advocate ("OCA").

Q. ON WHOSE BEHALF ARE YOU OFFERING THIS TESTIMONY?

A. I am offering this testimony on behalf of the OCA.

Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS PROCEEDING?

A. My testimony addresses certain elements of PECO Energy Company's ("PECO's" or the "Company's") proposed Default Service Plan VI ("DSP VI") for providing default service to its residential and non-residential customers for the four-year period from June 1, 2025 through May 31, 2029. The specific issues I address are related to the procurement of wholesale default service supply products, including the

contingency plan and the proposed Capacity Proxy Price ("CPP") mechanism; PECO's reserve price proposal; the frequency of Residential Generation Supply Adjustment ("GSA-1") rate adjustments and the reconciliation adjustment proposed by PECO; the Company's proposed voluntary time-of-use ("TOU") rate program; PECO's plan for compliance with the Alternative Energy Portfolio Standards Act ("AEPS Act"); and load caps. Issues related to consumer protection, as well as some issues related to the TOU program, are addressed by OCA witness Ms. Barbara Alexander. Our testimony is meant to be complimentary.

II. SUMMARY AND RECOMMENDATIONS

A. Overview of the PECO Petition

Q. WHAT IS PECO REQUESTING IN THIS CASE?

A. PECO, a subsidiary of Exelon Corporation, provides regulated electric delivery service to 1.7 million customers in Southeastern Pennsylvania, making it the largest electric distribution company ("EDC") in the state.[1] On February 2, 2024, PECO filed a petition for the approval of its DSP VI filing, which includes supporting testimony and exhibits, including draft supplier contracts and its proposed revised tariffs, by the Pennsylvania Public Utility Commission ("Commission").

I have been asked by the OCA to review the proposed plan as it pertains to the Company's residential customers and to develop recommendations that would provide improvements if those recommendations were adopted by the Commission.

[1] https://www.peco.com/about-us/company-information.

Q. WHAT ARE THE PRIMARY ELEMENTS OF PECO'S PETITION AS IT RELATES TO RESIDENTIAL CUSTOMERS?

A. The primary elements of the proposed DSP VI that affect PECO's residential customers are: (1) the structure of the wholesale supply portfolio for default service, including scheduling of the purchases and the wholesale products purchased to supply residential default service customers; (2) the Company's proposed method of meeting the requirements of the AEPS Act; (3) PECO's proposal to implement a reserve price for the residential fixed-price full requirements ("FPFR") contracts; (4) the frequency of GSA-1 rate adjustments and the Company's proposed method of reconciling Default Service Plan revenues and costs; (5) PECO's voluntary TOU program that is available to residential default service customers; and (6) load caps applicable to the residential customer class.

The residential default service load is proposed to be supplied from four sources: 24-month FPFR contracts; 12-month FPFR contracts; spot market purchases; and a small allocation of New York Power Administration ("NYPA") hydropower that is assigned to the residential class. The FPFR contracts make up the bulk of the power supply, with laddered contracts procured every six months to replace prior contracts set to expire. The spot market purchases represent 0.8 percent of the residential default service supply and the NYPA purchases represent approximately 0.2 percent. Thus, these two together total 1 percent. The remaining 99 percent of residential default service load requirement is met from 62 tranches of FPFR contracts, of which 38 (61 percent) are 24-month products and 24 (38 percent) are 12-month products.[2] Each residential tranche represents 1.6 percent of the residential default service load after it is offset by the NYPA purchases. If the default service

[2] Petition of PECO Energy Company, paragraph 15.

load shrinks or increases (e.g., shrinks due to customers migrating to competitive retail supply or increases due to customers returning to default service), the size of the tranches measured in kilowatt-hours ("kWh") would correspondingly change in size. Thus, for 99 percent of the load the wholesale suppliers assume the "volumetric risk" of an uncertain load obligation.

The FPFR contracts would be procured through a competitive request for proposals ("RFP") process, which is consistent PECO's procurement approach taken in DSP IV and DSP V. Procurements would be conducted every six months and would be held in April and October of each year, which is approximately two months prior to the start of deliveries.

The Company proposes to meet the requirements of the AEPS Act by having the default service wholesale suppliers transfer the appropriate number and category of Alternative Energy Credits ("AECs") to PECO, except for a portion of the solar Tier 1 AECs, which the Company proposes to procure through 10-year contracts. The Company has contracts in place for purchasing 16,000 solar Tier I AECs annually (through May 31, 2032 for 8,000 solar Tier I AECs annually, and through May 31, 2033 for 8,000 solar Tier I AECs annually). PECO proposes to acquire an additional 16,000 solar Tier I AECs annually, which will bring the total to 32,000 solar Tier 1 AECs per year.[3] Half of the solar Tier 1 AECs to be procured would be required to come from resources located within the PECO service area.[4]

For Residential FPFR products only, PECO makes a new proposal to implement a reserve price which will be determined by the Independent Evaluator to account for the costs and risks of each residential FPFR product obligation.[5] The role

[3] PECO Energy Company Statement No. 1, page 15, lines 17-21.
[4] Petition of PECO Energy Company, paragraph 30.
[5] Petition of PECO Energy Company, paragraph 30.

of the Independent Evaluator is to conduct, manage, and monitor the default service RFPs, and to report the RFP results the Commission.[6] PECO selected NERA as the Independent Evaluator for DSP VI. NERA also served as the Independent Evaluator for PECO's previous DSPs.[7] According to PECO, the Independent Evaluator would determine the reserve price before each auction on a double-blind basis – meaning that neither PECO nor the bidders would know the price.[8] The reserve price would incorporate an average bid price above which the Independent Evaluator would recommend that the Commission reject the lowest-priced bids that caused the average bid price to exceed the reserve price.[9]

The Company is proposing to continue offering a voluntary TOU rate to residential and small commercial default service customers, which includes peak, off-peak, and super off-peak prices.[10] PECO's TOU proposal for DSP VI is essentially identical to the TOU program currently in place in DSP V.

PECO proposes to continue its practice of using a reconciliation mechanism based on accumulated deviations between default service revenues and costs over a six-month period, which are amortized and collected over the subsequent six-month period, with a two-month lag.[11] The Company is also proposing to maintain the status quo from DSP V with regard to quarterly GSA-1 rate adjustments,[12] and a 50 percent supplier load cap applicable to the residential customer class.[13]

B. Review of Findings and Recommendations

Q. WHAT ARE THE SPECIFIC TOPICS THAT YOU ADDRESS IN YOUR DIRECT TESTIMONY?

A. I address the residential default service supply portfolio and its implications for rate volatility; PECO's proposal to enter into long-term solar Tier 1 AEC purchase contracts; contingency plans; the reserve price proposal; GSA-1 rate adjustment frequency and the reconciliation mechanism; the TOU rate construct; and load caps.

Q. WHAT ARE YOUR PRINCIPAL CONCERNS WITH RESPECT TO PECO'S PROPOSED DEFAULT SERVICE PLAN?

A. My principal concerns include the following: (1) the reserve price proposal cannot be supported based on the information provided (and not provided) by the Company; (2) GSA-1 rates and the residential Price-to-Compare ("PTC") is being adjusted more frequently than necessary; (3) PECO's proposed reconciliation method can be modified to result in greater rate stability and potentially smaller E-Factor rates for residential customers; and (4) the TOU rate structure needs more detailed analysis of customer response and alternative TOU rate periods. My recommendations should be read to complement those of OCA Witness Barbara Alexander who makes suggestions about other pilot proposals the Company should consider.

Q. WHAT ARE YOUR RECOMMENDED MODIFICATIONS TO THE FILED PLAN?

A. My principal recommendations are that: (1) the reserve price proposal be rejected; (2) PECO's GSA-1 rate and residential PTC be adjusted semiannually rather than quarterly; (3) the reconciliation amounts calculated for each six-month period be amortized over twelve months rather than the six months proposed by the Company; (4) the Company analyze, for informing PECO's TOU rate design in DSP VII,

whether TOU customers saved money by reducing usage during high-price TOU periods or because customers whose typical usage would allow them to save money under the TOU rates switched to the TOU rates; and (5) PECO consider, for implementation in DSP VII, whether alternative (e.g., seasonally-differentiated) TOU periods would incentivize more efficient TOU customer response. These recommendations should be read in concert with those of Ms. Alexander.

C. Testimony Organization

Q. HOW IS THE REMAINDER OF YOUR TESTIMONY ORGANIZED?

A. Section III of my testimony addresses the default service supply portfolio, including the proposed CPP mechanism, the contingency plan, AEPS Act compliance, and long-term solar Tier 1 AEC contracts. Section IV addresses the Company's reserve price implementation proposal. Section V addresses PECO's GSA-1 rate adjustment frequency and proposed reconciliation mechanism. Section VI addresses the Company's voluntary residential TOU program. Section VII addresses the residential class supplier load caps.

III. DEFAULT SERVICE SUPPLY PORTFOLIO

Q. ARE THERE PENNSYLVANIA STATUTES THAT GOVERN AN EDC's PROVISION OF DEFAULT SERVICE?

A. Yes. The provision of default service is required under Pennsylvania's Electricity Generation Customer Choice and Competition Act, which was amended by Act 129 in 2008. Act 129 requires that the default generation supply for customers reflect a prudent mix of spot, short- and long-term supply resources to ensure adequate and reliable service to customers at least cost over time. Default service also must comply with the AEPS Act. PECO states that its filed plan complies with these requirements.

Q. HOW DOES PECO PROPOSE TO PROVIDE DEFAULT SERVICE TO RESIDENTIAL CUSTOMERS DURING THE DSP VI TERM?

A. PECO will use a competitive RFP process to acquire a series of FPFR contracts to provide generation service for the default service load. Contracts will have terms of either 12 or 24 months and will cover the four-year DSP period with some overlap into the subsequent program period. The FPFR contracts would be procured using a sealed bid/RFP approach, consistent with the approach used by PECO in the past. Procurements are proposed to be conducted every six months so that the FPFR contracts are laddered, that is, the contracts will expire at different times so that only a portion of the overall residential supply is procured at any single point in time.

Wholesale suppliers will bid to supply load "tranches," with each tranche representing 1.6 percent of the residential default service load after that load is offset by the NYPA purchases. Approximately 0.2 percent would be provided from a NYPA hydropower allocation and 0.8 percent of the energy would be procured at PJM spot market prices. The final price specified in the awarded bid (dollars per megawatt-hour, or $/MWh) is fixed for the duration of the contract term (either 12 or 24 months) and includes all generation products (with a few exceptions) required to serve load (e.g., capacity, energy, ancillary services, and AECs).

Q. PLEASE EXPLAIN THE TRANCHE STRUCTURE.

A. PECO has divided the residential default service load into 62 tranches. Each tranche is a "slice" of load, meaning that each tranche incorporates the same residential load "shape," i.e., the hourly residential default service load profile over the course of the year. In other words, each tranche represents 1.6 percent of the residential load (after the NYPA purchases offset) in each hour.

Q. DO YOU AGREE WITH PECO'S PROPOSAL FOR A FOUR-YEAR DSP VI TERM?

A. Yes. The four-year default service plan period reduces administrative costs relative to the shorter default service plan periods that have been relied on historically. It is also consistent with the default service plan terms for other EDCs in Pennsylvania.

Q. DO YOU OBJECT TO THE USE OF THE SEALED BID/RFP APPROACH PROPOSED BY PECO TO PROCURE PECO'S RESIDENTIAL WHOLESALE DEFAULT SERVICE SUPPLY?

A. No. This process has generally worked as proposed and implemented by PECO and the Company has successfully procured default service supplies with this procurement method in the past. In the absence of clear cost or administrative benefits to changing the procurement method, I do not see a compelling reason to change the existing RFP approach.

Q. WHAT IS YOUR ASSESSMENT OF PECO'S PROPOSED RESIDENTIAL DEFAULT SERVICE SUPPLY PORTFOLIO?

A. In general, I view the composition of the proposed residential default service supply portfolio favorably. The mix of 12- and 24-month FPFR contracts procured two months prior to delivery represents a reasonable balance between rate stability, which is extremely important to residential customers, and reflectiveness of competitive market conditions. Table 1 and Figure 1 below show that PECO's proposed residential default service portfolio, which is identical to its residential portfolio in DSP V, performed well, relative to other EDCs in Pennsylvania, in terms of default service rate (PTC) stability during the recent wholesale power and natural gas market volatility. Table 1 presents the relative standard deviation (the ratio of standard deviation to average) of Pennsylvania EDCs' quarterly PTC, sorted in descending

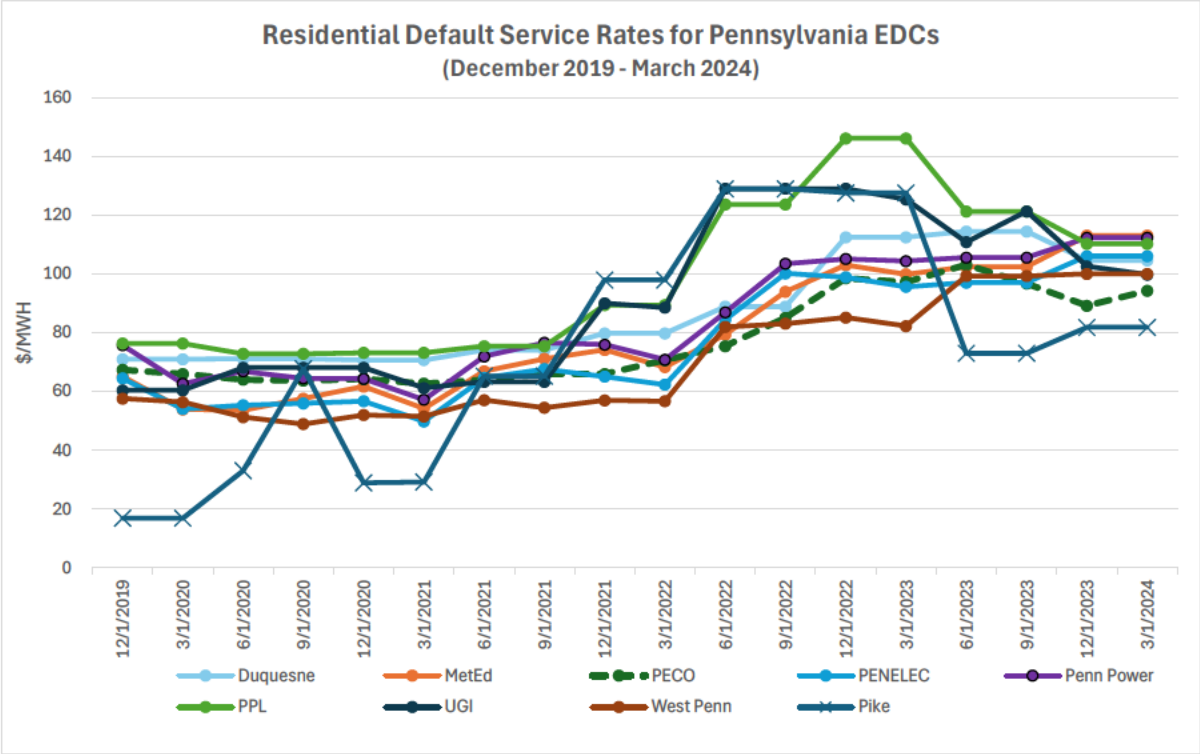
order, from December 2019 to date. Figure 1 is a visual representation of the trend of PTCs of Pennsylvania EDCs. PECO had the lowest PTC volatility among Pennsylvania EDCs over the last four years, followed closely by Duquesne Light Company ("Duquesne"), which also procures residential default service supplies in the form of 12-month (50 percent of supplies) and 24-month (50 percent of supplies) FPFR contracts.

I have a concern regarding the Company's inclusion of a small (0.8 percent of the residential default service load) spot market component in the portfolio. In principle, reliance in part or in whole on spot market purchases is likely to have the effect of increasing the magnitude of the reconciliation adjustment (the E-Factor) compared to exclusive reliance on FPFR contracts. However, given the very small share of the proposed spot component in the residential default service portfolio and the administrative cost and burden which PECO would incur, at the expense of ratepayers, to eliminate it, I am not opposed to maintaining the status quo and leaving the 0.8 percent spot component in the residential portfolio.

Table 1

Volatility of Residential Default Service Rates of Pennsylvania EDCs			
EDC	**Standard Deviation**	**Average**	**Relative Standard Deviation**
PECO	$15.02/MWh	$77.45/MWh	19%
Duquesne	17.85	87.46	20%
Penn Power	19.58	84.57	23%
PPL	26.49	98.72	27%
PENELEC	20.66	76.74	27%
Met-Ed	21.47	79.65	27%
West Penn	19.94	70.77	28%
UGI	27.56	91.03	30%
Pike	38.72	74.55	52%

Figure 1



Q. PLEASE DESCRIBE PECO'S PROPOSAL TO PURCHASE SOLAR TIER 1 AECS TO PARTIALLY MEET THE AEPS ACT REQUIREMENTS FOR THE DEFAULT SERVICE LOAD.

A. The Company proposes to satisfy a portion of the AEPS Act requirement for default service supply through the purchase of long-term (10-year) contracts of solar Tier 1 AECs. In DSP V, PECO entered into 10-year solar Tier 1 AEC purchase contracts for a total of 16,000 solar Tier 1 AECs annually (half of which expires on May 31, 2032, and the other half on May 31, 2033). Half of the contracted amount is sourced from solar generating facilities located within PECO's service territory. During the term of DSP VI, PECO proposes to procure an additional 16,000 solar Tier 1 AECs annually (half of which amount to be sourced from within PECO's service territory), bringing the total to 32,000 solar Tier 1 AECs per year, which PECO expects that it

would satisfy 45 percent of the Company's solar Tier 1 AEPS requirements under DSP VI.[14] The long-term solar Tier 1 AEC contracts would be for a fixed number of solar Tier 1 AECs per year regardless of the default service load. These solar Tier 1 AECs would be used by PECO in partial satisfaction of the AEPS Act obligations, which in turn would reduce the FPFR suppliers' solar Tier 1 AEC obligations.

Q. HOW WOULD THE SOLICITATION FOR THE LOCAL SOLAR AECs BE CONDUCTED?

A. PECO proposes to use a two-stage process. Stage 1 will entail a competitive procurement for AEPS Act-compliant solar Tier 1 AECs (not necessarily sourced from with PECO's service area), with the winning bids based on lowest price. Stage 2 will be a Standard Offer to Purchase ("SOTP") solar Tier 1 AECs at the Stage 1 weighted-average price, but the resources to be acquired in Stage 2 will be required to be located within the PECO service area. The Company utilized this same two-stage procurement approach in DSP V.

Q. DO YOU SUPPORT THE COMPANY'S RELIANCE ON LONG-TERM CONTRACTS FOR SOLAR AECs FOR THE SATISFACTION OF A PORTION OF THE AEPS ACT OBLIGATION FOR RESIDENTIAL DEFAULT SERVICE?

A. Yes. Solar Renewable Energy Certificates ("solar RECs"), which are the equivalent of solar Tier 1 AECs in other PJM states having Renewable Energy Portfolio Standards ("RPSs"), have exhibited prices that can rise significantly in response to tight market conditions. These market conditions can arise from either supply constraints or from increases in demand resulting from changes in the underlying legislative requirements. Non-RPS-related demand, such as voluntary corporate

[14] PECO Energy Company Statement No. 1, page 26, lines 11-15.

renewable energy procurements and the federal government's carbon-free electricity targets, has also started to play a role in the demand/supply fundamentals of REC and solar REC markets. Long-term contracts for the provision of solar Tier 1 AECs can help stabilize prices for what would otherwise be a volatile component of the overall portfolio. Solar AECs (or solar RECs) typically exhibit higher price volatility (and price levels) than Tier 1 AECs (or Tier 1 RECs) because the in-state requirement associated with solar AECs dramatically reduces the size of the supply pool in comparison to non-solar Tier 1 AECs (or RECs), which can be sourced from resources located across a larger footprint (typically the PJM region).

Q. PLEASE DESCRIBE THE COMPANY'S CPP PROPOSAL.

A. The CPP is meant to serve as a placeholder if the PJM Base Residual Auction ("BRA") clearing price is not known for all months of the delivery period for an FPFR product offered at least five business days prior to the bid date. If this occurs bidders would use the CPP as the proxy for the final zonal PJM capacity rate (expressed in dollars per megawatt of PJM capacity obligation per day) to formulate their bids. The CPP would be calculated as the average of the most recent results under PJM's reliability Pricing Model ("RPM") from the two most recent delivery years for which PJM has held a capacity auction. Winning bidders would then be made whole through a reconciliation mechanism. For each month for which the capacity price was not known at the time of the FPFR auction, a true-up for a given day would be calculated as the difference between the final zonal PJM capacity rate and the CPP, multiplied by the winning bidder's daily capacity obligation. If the CPP is less than the actual capacity price, the winning bidder would receive an additional payment to ensure that it is fully compensated for its capacity cost to serve the FPFR contract. Conversely, if the CPP is greater than the actual capacity price from PJM,

PECO's payment to the winning bidder under the contract would be reduced based on the same calculation.[15]

Q. WHAT ARE SOME OTHER OPTIONS FOR HANDLING DELAYS IN PJM'S CAPACITY AUCTIONS?

A. There are three alternatives to the Company's CPP proposal. First, the bidders could be asked to include capacity costs in their bids, without subsequent true-up, even if PJM has not conducted a capacity auction for part or all of the delivery period of the FPFR contract. Second, the Company could assign PJM capacity charges to itself (and not to the FPFR suppliers) and recover those costs from customers through a Commission-approved rate. Third, PECO could shorten the term of the FPFR products (likely from 24 to 12 months) for which capacity price is unknown for at least a part of the delivery period.

Q. DO YOU AGREE WITH PECO'S CPP PROPOSAL?

A. Yes. It is preferable to the other alternatives. The first option is not preferable because it puts the price risk of an unhedgeable, large, and highly variable component on the FPFR suppliers, which in turn would result in the incorporation of large risk premiums into the bids. This would have the effect of increasing costs to consumers. The second option is not preferable because it appears to be administratively cumbersome both for the Company and for the Commission, without a clear corresponding benefit. The third option is particularly unattractive because it would adversely affect GSA-1 rate stability by forcing PECO to procure shorter term hedges and exposing the overall portfolio to wholesale market volatility through more frequent repricing of the portfolio than necessary. Therefore, the CPP approach proposed by the Company is the best option among available alternatives. I also note

[15] PECO Energy Company Statement No. 4, page 19, lines 5-14.

that the CPP approach is utilized by other EDCs in Pennsylvania,[16] as well as EDCs in other retail choice states.

Q. DOES PECO HAVE CONTINGENCY PLANS? IF SO, PLEASE DESCRIBE PECO'S CONTINGENCY PLANS.

A. Yes. PECO has proposed a contingency plan that would need to be implemented if PECO does not obtain sufficient supply through its procurement or experiences a supplier default under the Supplier Master Agreement ("SMA"). PECO proposes to include the unfilled tranches in PECO's next scheduled solicitation for that product if PECO fails to obtain approved bids for all offered tranches in a solicitation. If necessary, PECO would supply any unserved portion of its default service load from the PJM-administered markets for energy, capacity, and ancillary services. PECO is proposing a similar approach if a supplier defaults on its obligations under the SMA. PECO would file a plan with the Commission proposing alternative procurement options and request the Commission's approval on an expedited basis.

Q. ARE YOU RECOMMENDING ANY MODIFICATIONS TO THE CONTINGENCY PLANS PROPOSED BY PECO?

A. Yes, I am recommending a modification applicable to the residential portfolio. In addition to agreeing with the contingency plans proposed by PECO, I also recommend that PECO be prepared to solicit and acquire standard fixed-quantity (on-peak, off-peak, or around-the-clock) energy blocks within days of procurement shortfall or supplier default. This would entail either having counterparty arrangements in place to be able to make block purchases or being prepared to execute such agreements with a few sellers of block products in short order.

[16] For example, Met-Ed, Penelec, Penn Power, and West Penn (approved by the Commission in Docket Nos. P-2021-3030012, P-2021-3030013, P-2021-3030014, and P-2021-3030021), and Duquesne (approved by the Commission in Docket No. P-2020-3023149).

Q. WHY IS PECO'S CONTINGENCY PLAN INSUFFICIENT?

A. PECO's contingency plan is insufficient because if PECO is unable to include any unfilled tranches in the Company's next scheduled solicitation (due to the timing of the next solicitation), PECO is proposing to serve the unfilled tranches from the spot market, which in turn would expose the residential customers to unnecessary volatility. Including block purchases in the contingency plan in these situations would reduce the spot market exposure and the rate volatility associated with it.

Q. WHAT ARE THE ADVANTAGES AND DISADVANTAGES OF BLOCK PURCHASES?

A. Since blocks are for a fixed quantity of energy (i.e., number of megawatts) for on-peak, off-peak, or all hours in a month, they would need to be supplemented with spot market purchases (and sales) to meet the hourly load profile of the residential default service load. This exposure to the spot market would increase the volatility of the residential default service rate compared to serving the same load exclusively through FPFR contracts. Therefore, from a rate stability and cost predictability perspective, it would not be preferable to serve residential default service load via a block-and-spot approach when FPFR contracts are available as an alternative.

However, if PECO is unable to serve some residential tranches through FPFR contracts due to inability to obtain sufficient supply through its planned procurement or due to supplier default, a block-and-spot approach is preferable to relying exclusively on spot purchases for that tranche. Buying blocks reduces (but does not eliminate) exposure to spot market volatility by locking in a price for some portion of the projected energy requirements of that tranche. I am particularly concerned that if the Commission approved PECO's reserve price proposal, then the Company may need to invoke its contingency plans, which in turn would expose residential default

service customers to the volatility of the spot market. I address the Company's reserve price proposal in the subsequent section. Regardless of whether the Commission accepts or rejects PECO's reserve price proposal, however, the Commission should require PECO to have a contingency plan that meets the overall requirements of the statue that is designed to procure energy at least cost over time and should, thus, require PECO to adopt a contingency plan which incorporates block energy purchases into its contingency plan to complement its spot purchases.

IV. RESERVE PRICE

Q. PLEASE DESCRIBE THE COMPANY'S RESERVE PRICE PROPOSAL.

A. PECO proposes to implement a reserve price for the residential FPFR contracts, with the stated intention to "protect customers from paying high prices for FPFR products that could be considered outside of a reasonable market range."[17] The reserve price for a residential FPFR product would be "the average bid price above which the Independent Evaluator would recommend that the Commission reject the lowest-priced bids that caused the average bid price to exceed the reserve price."[18] The Independent Evaluator would not announce the reserve price for a product to bidders, but the reserve price will be reported to the Commission by the Independent Evaluator along with the RFP results.[19] The Commission makes the final decision on whether to accept the bids or not regardless of the reserve price or the recommendation of the Independent Evaluator. The reserve price would account for the costs and risks of serving the residential FPFR contracts.[20] PECO is proposing to incorporate a reserve price for residential FPFR products, but not for any commercial or industrial products.

[17] Petition of PECO Energy Company, paragraph 8.
[18] PECO Energy Company Statement No. 1, page 23, lines 8-10.
[19] PECO Energy Company Statement No. 1, page 23, lines 16-20.
[20] PECO Energy Company Statement No. 4, page 14, lines 10-11.

Q. HOW WOULD THE RESERVE PRICE FOR EACH RESIDENTIAL FPFR PRODUCT BE COMMUNICATED TO THE COMMISSION?

A. NERA, in its capacity as Independent Evaluator, would calculate a reserve price for each residential (12-month and 24-month) FPFR product as part of the Market Report. NERA would recommend that any lowest-priced bids for a residential product that cause the average bid price to exceed the reserve price would be rejected as part of its Final Report.[21]

The Market Report and the Final Report are confidential reports provided by NERA to the Commission. The Market Report is provided to the Commission one week to ten days before bids are due and it summarizes the then-current market conditions and provides visible market prices for components of the FPFR products. The Final Report is provided to the Commission by 8 am on the day after the bids are due; it summarizes the results of the evaluation of the bids, provides an updated reserve price, and includes a recommendation from the Independent Evaluator on whether the lowest-priced bids should be approved.[22]

Q. WHAT ARE THE POTENTIAL BENEFITS OF A RESERVE PRICE IN THE CONTEXT OF PECO's FPFR SOLICITATIONS?

A. A potential benefit of a reserve price is that, if it is determined accurately and implemented properly, it can serve as an effective tool for mitigating the market power of bidders in an imperfectly competitive bidding process, and for preventing bidders from exercising their unilateral market power or attempting to raise prices through collusion. In other words, even if a bidder possesses market power in the bidding process,[23] knowing that it needs to undercut both other bidders and the

[21] PECO Energy Company Statement No. 4, page 14, lines 3-7.
[22] PECO Energy Company Statement No. 4, page 13, lines 5-18.
[23] Market power is the ability to profitably raise prices above those that would prevail in a competitive market.

reserve price could prevent that bidder from successfully raising the average procurement price above the level that would prevail in a competitive market. I note that a reserve price would not provide any consumer protection benefits in a truly competitive market because any bidder that would attempt to bid above the competitive market price would be undercut by other bidders.

Q. PLEASE EXPLAIN THE POTENTIAL DRAWBACKS OF A RESERVE PRICE.

A. There are at least two potential drawbacks of a reserve price. First, if the reserve price is erroneously (or purposefully) set lower than what would prevail in a competitive bidding process, which in turn should account for the costs and risks of the residential FPFR obligations, residential default service customers would unnecessarily be deprived of the price stability and predictability and risk avoidance benefits of competitively priced FPFR products. If PECO ends up serving unawarded tranches from the PJM spot market, this would increase the price risk borne by residential customers and could increase rate volatility. In order to avoid this undesirable outcome, all costs and risks associated with supplying FPFR products need to be included in the reserve price determination and they should be estimated accurately.

Second, if an intervention (such as a reserve price) in the functioning of a bidding process is perceived by market participants as an attempt to distort competitive market conditions or prices, this perception (even if it is not true) can have a detrimental effect on participation. Given the fact that between six and 13 suppliers participated in each of the FPFR product solicitations in DSP I, DSP II, DSP III, DSP IV, and DSP V,[24] losing even a small number of suppliers could negatively

[24] PECO Energy Company Statement No. 3, page 10, line 22 through page 11, line 1.

affect the competitiveness of the bidding process. Furthermore, rejecting competitively priced bids because of incorrect determination of the reserve price even in one solicitation could have catastrophic and irreversible effects on participation in future procurements. Some suppliers could decide not to incur the administrative and time costs to participate in a procurement process which they believe is likely to reject their competitively priced bids because of erroneous determination or application of the reserve price.

Q. WERE YOU ABLE TO REVIEW SOME OR ALL MARKET REPORTS OR FINAL REPORTS SUBMITTED TO THE COMMISSION BY NERA?

A. No. Copies of either report were not provided in the Company's filing. I requested them in an interrogatory (OCA-II-38),[25] but PECO objected to this request on the basis of confidentiality.[26] Since the reserve price, and the Independent Evaluator's recommendation to the Commission based on that reserve price, would be communicated to the Commission in these reports, it is essential to understand the format and contents of these reports (even if it can only be made available in redacted form by removing any "information provided by bidders, including the bidder identity and the amount of awarded supply").[27]

Q. ARE YOU CONVINCED THAT NERA WILL DETERMINE THE RESERVE PRICE ACCURATELY AND THAT THE POTENTIAL DRAWBACKS YOU IDENTIFIED ABOVE WILL BE AVOIDED?

A. No. The Company's filing does not provide sufficient details, the review of which could provide me with that conviction. I attempted to gather that information from

[25] Interrogatories of the Office of Consumer Advocate, Set 2 to PECO, No. 38.
[26] Objections of PECO Energy Company to the Interrogatories (Set II) of the Office of Consumer Advocate, Paragraph Nos. 4 and 11.
[27] Objections of PECO Energy Company to the Interrogatories (Set II) of the Office of Consumer Advocate, Paragraph Nos. 4 and 11.

the Company by way of interrogatories (OCA-II-40), but I was not provided with the level of detail which would allow me to be comfortable with the methodology based on which the reserve price would be calculated. For example, instead of providing more detailed information regarding, or an example of, the reserve price calculation methodology, PECO witness Ms. Katie Orlandi stated in her response that: "The methodology for calculation of the reserve price and the level of the reserve price proposed for DSP VI will be provided in the Independent Evaluator's confidential reports to the Commission."[28] In response to my interrogatory to "explain how all other costs identified on pages 15 through 17 of Mr. Fisher's direct testimony, as well as additional categories of other costs that may be included in the reserve price determination, will be estimated,"[29] Ms. Orlandi repeated her response above.[30] Either the Company and/or its witnesses are not being forthcoming with the information I am requesting due to confidentiality concerns, or the information and details which I am seeking have not yet been developed by the Company. If it is the former, I have no option other than recommending that the Commission reject PECO's reserve price proposal because neither I nor any other party (including the Commission) has sufficient information which would allow anyone to be able to recommend the adoption of the reserve price proposal. If it is the latter, then I strongly recommend that the Commission reject PECO's reserve price proposal because it would be too risky to approve such a critical design element without more specificity and transparency.

[28] Response of PECO Energy Company to OCA-II-40(c).
[29] OCA-II-40(d).
[30] Response of PECO Energy Company to OCA-II-40(d).

Q. IS PECO PROPOSING A RESERVE PRICE BECAUSE PECO HAS OBSERVED CONTRACT PRICES WHICH ARE INCONSISTENT WITH UNDERLYING MARKET CONDITIONS IN ITS RESIDENTIAL FPFR SOLICITATIONS?

A. No. PECO witness Mr. Scott G. Fisher states that the contract prices (i.e., winning bid prices) obtained by PECO have been consistent with underlying market conditions.[31]

Q. HAVE YOU REVIEWED PARTICIPATION AND MARKET CONCENTRATION TRENDS IN PECO'S RESIDENTIAL FPFR SOLICITATIONS?

A. Yes. I conducted such analysis using the data provided by the Company in the "Confidential Attachment OCA-II-37(a)" in Response of PECO Energy Company to OCA-II-37. The reason I conducted this analysis is that I wanted to review whether supplier concentration in the provision of residential FPFR contracts has been increasing over the course of DSP IV and DSP V. A rising supplier concentration could indicate that the bidding process is getting less competitive, which in turn could justify the introduction of a reserve price in FPFR product solicitations. I note that I am not opining on whether the residential FPFR solicitation process is concentrated or not concentrated, nor am I attempting to assess the competitiveness of the bidding process, in an absolute sense. My goal is to discern whether supplier concentration has generally been rising, falling, or staying the same.

Q. PLEASE DESCRIBE YOUR ANALYSIS AND FINDINGS.

A. In the "Confidential Attachment OCA-II-37(a)" PECO provided the number of residential tranches supplied by each supplier (with supplier names masked) for each

[31] PECO Energy Company Statement No. 3, page 28, lines 5-7.

six-month period in DSP IV and so far in DSP V. I calculated supplier market shares for each six-month period and the following measures of market concentration from those supplier shares: (i) share of the largest supplier; (ii) cumulative share of the two largest suppliers; (iii) cumulative share of the three largest suppliers; and (iv) the Herfindahl-Hirschman Index (HHI).[32] The results of my analysis are presented in Figure 2. **BEGIN CONFIDENTIAL** [redacted] **END CONFIDENTIAL**

Figure 2

BEGIN CONFIDENTIAL

END CONFIDENTIAL

[32] The HHI is defined as the sum of the squares of the market shares; it is small when there are many small firms and grows larger as the market becomes more concentrated, reaching 10,000 in a market with a single firm. For illustration, the HHI for a market of five equal firms is 2,000 ($5 \times 20^2 = 2,000$) and for six equal firms is 1,667 ($6 \times 16.67^2 = 1,667$). The HHI ranges from 10,000 (in the case of a pure monopoly) to a number approaching zero (in the case of an atomistic market). Source: Merger Guidelines, U.S. Department of Justice and the Federal Trade Commission (Issued: December 18, 2023), page 5.

Q. BASED ON THE FOREGOING ANALYSIS, WOULD YOU RECOMMEND THE IMPLEMENTATION OF A RESERVE PRICE FOR RESIDENTIAL FPFR SOLICITATIONS?

A. No, I would not recommend the implementation of a reserve price for residential FPFR solicitations based exclusively on the foregoing analysis. **BEGIN CONFIDENTIAL** [redacted] **END CONFIDENTIAL** While I am not necessarily opposed to a reserve price in principle, I cannot support the Company's reserve price proposal as described in its filing due to lack of clarity on how it would be determined. As I explained in detail above, a reserve price can do more harm than good for customers if it is not executed properly.

Q. IS THERE ANY ADDITIONAL INFORMATION WHICH YOU RECOMMEND THAT PECO OR THE INDEPENDENT EVALUATOR PRESENT TO THE COMMISSION TO AID THE COMMISSION ASSESSING THE BIDS RECEIVED?

A. Yes. I recommend that the Commission be provided with the data and information presented in the exhibit on page 18 of Mr. Fisher's direct testimony. Based on the implied residual compensation (either in percentage or $/MWh terms) of the average winning bid price and the implied residual compensation in historical procurements, the Commission can make an informed decision on whether to approve the bids based on the foregoing information as well as its qualitative consideration of market volatility and residential customers' preference for rate stability and certainty. I note that it is possible that this information or even more detailed information is already being provided to the Commission. Since the Company refused to provide at least

redacted versions of these reports, I have no way of knowing the nature and extent of the information being provided to the Commission as part of the Market Report and the Final Report.

V. GSA-1 RATE ADJUSTMENT FREQUENCY AND RECONCILIATION

Q. PLEASE DESCRIBE HOW THE GSA-1 RATE IS DETERMINED AND HOW FREQUENTLY IT IS ADJUSTED.

A. PECO projects the cost of generation supply for the residential class on a quarterly basis, corresponding to the quarters of June-August, September-November, December-February, March-May. The projected cost of supply and the GSA-1 rate, which is adjusted quarterly, is determined by projected procurement costs under PECO's generation supply contracts and the projected default service sales. The PTC is determined by summing the GSA-1 rate and the Transmission Service Charge ("TSC") rate.[33] The TSC rate is adjusted semiannually, in June and December of each year.

Q. PLEASE DESCRIBE PECO'S GENERATION SUPPLY CONTRACTS AS THEY RELATE TO THE DETERMINATION OF THE GSA-1 RATE.

A. As described in more detail in Section III of my direct testimony, PECO procures 99 percent of its residential default service supplies in the form of 12-month and 24-month FPFR contracts. These contracts terminate only on May 31 and November 30 of each year, and delivery under new contracts commences only on June 1 and December 1 of each year. Since only one percent of the residential supply portfolio (and the E-Factor rate) changes on March 1 and September 1, I do not see a compelling reason to continue adjusting the GSA-1 rate and the PTC on March 1 and September 1.

[33] PECO Energy Company Statement No. 2, p. 4, lines 7-20.

Q. PLEASE STATE YOUR RECOMMENDATION RELATED TO THE FREQUENCY OF ADJUSTMENT IN THE GSA-1 RATE AND YOUR RATIONALE FOR THIS RECOMMENDATIONS.

A. I recommend that PECO adjust its GSA-1 rate semiannually, on June 1 and December 1 of each year. As I discuss and recommend later in this section, if PECO also aligns its over/undercollection amortization periods (whether they are six months in duration as PECO proposes or 12 months in duration as I recommend below) to begin on June 1 and December 1 of each year, then all major components of the residential PTC (GSA-1, TSC, and E-Factor rates), and thus the PTC itself, would be adjusted on June 1 and December 1 of each year. This would provide greater rate stability and certainty for residential default service customers, reduce PECO's administrative cost and burden associated with GSA-1 and E-Factor rate adjustments, and align PECO with the rest of the Pennsylvania EDCs in terms of residential generation rate and PTC adjustment frequency. After Metropolitan Edison Company ("Met-Ed"), Pennsylvania Electric Company ("Penelec"), Pennsylvania Power Company ("Penn Power"), and West Penn Power Company ("West Penn") switched from quarterly to semiannual PTC adjustments as of June 2023, PECO and UGI Utilities, Inc. – Electric Division are now the only large Pennsylvania EDCs which adjust their residential PTCs quarterly. Duquesne, Met-Ed, Penelec, Penn Power, Pike County Light & Power Company, PPL Electric Utilities Corporation, and West Penn currently adjust their respective residential PTCs semiannually.

Q. HOW IS PECO PROPOSING TO RECONCILE RESIDENTIAL DEFAULT SERVICE REVENUES WITH COSTS?

A. PECO is proposing to retain the same reconciliation mechanism used in DSP V for DSP VI, that is, a reconciliation balance is calculated over a six-month period and

collected (or refunded), with interest, over the following six-month period, with a lag of two months. More specifically, PECO proposes to continue to refund/collect the over/undercollection balance incurred between January 1 and June 30 during the six-month period starting on September 1; and to refund/collect the over/undercollection balance incurred between July 1 and December 31 during the six-month period starting on March 1.

Q. HAVE THE RESIDENTIAL E-FACTOR RATES UNDER DSP V BEEN LARGE?

A. The residential E-Factor rates so far during DSP V have tended to represent less than three percent of residential PTC. However, they increased more recently, reaching above four percent during the three-month periods starting on September 1, 2023 and December 1, 2023.[34] These adjustments tend not to be large because 99 percent of the residential default service power supply is provided under FPFR contracts, for which the per-kWh price is known in advance of establishing the GSA-1 rate. Additionally, the price includes the major cost elements related to the provision of power to retail customers, such as capacity costs, congestion costs to the PECO zone, ancillary services, and AEPS Act compliance.

Q. CAN WE EXPECT THAT THE RECONCILIATION ADJUSTMENTS WILL REMAIN RELATIVELY SMALL UNDER DSP V?

A. If residential TOU rate participation remains low at current levels and PECO is able to award all residential FPFR tranches in every auction, E-Factor rates are likely to remain low. However, with the availability of voluntary TOU rates to residential default service customers and the proposed implementation of a reserve price in residential FPFR contract procurements, two additional elements requiring

[34] Calculated from the Response of PECO Energy Company to OCA-II-14(c), Attachment OCA II-14(c).

reconciliation are introduced. Higher levels of participation in TOU rates could, and likely would, result in higher reconciliation adjustments. Similarly, if the Commission awards less than 62 residential FPFR tranches for certain months or delivery periods, then the share of spot purchases in the residential default service supply mix for those periods could increase and result in higher E-Factor rates in the subsequent periods.

Q. ARE YOU RECOMMENDING ANY CHANGES TO THE RECONCILIATION ADJUSTMENT TO ADDRESS THE POTENTIAL FOR HIGHER E-FACTOR RATES?

A. Yes. I recommend that the six-month reconciliation approach used by the Company under DSP V (and proposed by PECO to be retained under DSP VI) be modified slightly such that the cumulative amount to be collected (or refunded) be amortized over the subsequent 12 months, with a two-month lag. This would reduce the size and variability of the E-Factor rate and make the PTC more stable and market reflective. More specifically, I recommend that PECO amortize the over/undercollection balance incurred between April 1 and September 30 during the 12-month period starting on December 1; and amortize the over/undercollection balance incurred between October 1 and March 31 during the 12-month period starting on June 1. As I noted above, if this recommendation is implemented alongside my recommendation to adjust the GSA-1 rate semiannually (on June 1 and December 1 of each year), PECO could provide to residential customers PTCs with six-month durations, rather than three-month durations under PECO's practice in DSP V and proposal for DSP VI.

Switching from the current January 1 – June 30 and July 1 – December 31 reconciliation periods to the April 1 – September 30 and October 1 – March 31

reconciliation periods which I am recommending would require a transition. There are multiple ways to achieve this transition. For example, the Company could amortize the over/undercollection balance incurred between July 1, 2025 and March 31, 2026 during the 12-month period starting on June 1, 2026; and from that point on move forward with the six-month reconciliation and 12-month amortization periods which I described above.

Q. DO YOU HAVE ADDITIONAL OBSERVATIONS RELATED TO YOUR RECONCILIATION PROPOSAL?

A. Yes, I have two additional observations. First, my recommendation has potential upside without material downside. If the residential reconciliation balances would remain small, then the effect of implementing my recommendation would be negligible since amortizing a small reconciliation balance over six months or 12 months would not have a material difference on the E-Factor rate. However, if the residential reconciliation balances increase in one or more reconciliation periods, then a 12-month amortization period would result in more stable E-Factor rates and PTCs, and more market-reflective PTCs, compared to a six-month amortization period. Second, the Commission already approved a 12-month amortization period for reconciliation balances for some Pennsylvania EDCs.[35]

[35] For example, PPL (approved by the Commission in Docket No. P-2020-3019356), and Pike (approved by the Commission in Docket No. P-2023-30399).

VI. TIME-OF-USE RATES

Q. PLEASE EXPLAIN THE COMPANY'S PROPOSAL TO OFFER VOLUNTARY TIME-OF-USE RATES TO RESIDENTIAL DEFAULT SERVICE CUSTOMERS.

A. In DSP VI PECO proposes to continue without modification the TOU rate program that is currently in place in DSP V. The Company proposes to offer a residential TOU rate on a voluntary, opt-in basis. Generation supply for both standard and TOU residential default service customers would be sourced from the same supply portfolio. The Company offers three TOU periods: peak, off-peak, and super off-peak. The prices for the peak and off-peak periods would be calculated as the super off-peak price times a multiplier derived from energy and capacity price data for the PECO zone over the most recent five years (currently, 2019-2023). The TOU pricing multipliers are reviewed annually using an updated rolling five-year energy and capacity pricing, and they get revised to the updated multipliers if the change is less than 10 percent, and by 10 percent if the implied change would exceed 10 percent. The current (June 1, 2023 through May 31, 2024) peak period price for the residential class is 7.21 times the super off-peak period price, and the off-peak period is 1.46 times the super off-peak period price. These price multipliers and the TOU peak period allocators (the percentage of kWh usage) for each of the three relevant time periods, are used in conjunction with the GSA-1 price, which changes quarterly, to compute the quarterly TOU prices for the residential class.[36] Residential customers could opt into the TOU rate at any time and exit at any time, though once they leave, they must wait 12 months before being able to return to the rate. This restricted entry is designed to minimize the opportunity for residential customers to game the rate.

[36] PECO Energy Company Statement No. 2, p. 15, lines 1-15.

Q. HAS PECO'S TOU RATE PROGRAM BEEN SUCCESSFUL SO FAR IN DSP V?

A. No. I agree with Ms. Alexander's analysis that the TOU rate program currently in place does not appear to serve the needs of PECO's customers given its low enrollment.

Q. ARE YOU RECOMMENDING THAT PECO'S TOU RATE PROGRAM BE DISCONTINUED IN DSP VI?

A. No. While, as Ms. Alexander explains, the program did not deliver much, if any, value to the overall residential customer base, discontinuation of the program will not result in significant cost savings, either. That is because the implementation cost of the program, which exceeded $5 million to date,[37] is a sunk cost. The only savings from discontinuing the program would be approximately $177,000 annually, which is the additional cost PECO incurs to administer and bill the time of use rate options.[38]

Q. DO YOU CONCUR WITH MS. MEGAN A. MCDEVITT'S ASSERTION THAT "MOST CUSTOMERS WHO ENROLLED IN PECO'S TOU RATES DURING THAT PERIOD TOOK ACTION TO SHIFT CONSUMPTION AWAY FROM PEAK HOURS?"[39]

A. No. Ms. McDevitt appears to base that assertion on the fact that "69% of billed DSP-TOU charges from June 2022 through May 2023 corresponded to usage consumed outside of peak hours," and that "[t]he monthly average savings for a DSP-TOU customer is $11 spanning from $3 to $23 a month."[40] This reasoning is not correct because residential default service customers on the TOU rate offering either already use a greater proportion of energy in off-peak and super off-peak hours than the

[37] Response of PECO Energy Company to EJA-I-22, Attachment EJA-I-22(a), Table DSP V, lines 3 and 4.
[38] Response of PECO Energy Company to EJA-I-23.
[39] PECO Energy Company Statement No. 2, p. 10, lines 14-16.
[40] Response of PECO Energy Company to OCA-II-15(a).

average residential default service customer, or they plan on modifying usage patterns to achieve that result. Without a more focused analysis of usage patterns of TOU rate customers, it could not be determined due to which of these two factors TOU rate customers saved money compared to the standard GSA-1 rate.

Q. ARE YOU RECOMMENDING ANY CHANGES TO THE COMPANY'S PROPOSED TOU RATE PROGRAM?

A. No, not at this time. However, I recommend that PECO examine whether certain modifications would improve the efficiency and fairness of the TOU rates. First, I recommend that the Company analyze whether TOU customers saved money by reducing usage during high-price TOU periods, or simply because customers whose typical usage would allow them to save money under the TOU rates switched to the TOU rates. Second, I recommend that PECO consider, for implementation in DSP VII, whether alternative (e.g., seasonally-differentiated) TOU periods would incentivize more efficient TOU customer response. PECO would then report its findings in its DSP VII filing and discuss in its DSP VII TOU rate proposal how the Company took this research into consideration.

Q. IS THERE A SPECIFIC TOU RATE CONSTRUCT WHICH YOU RECOMMEND THAT PECO CONSIDER FOR ITS DSP VII FILING?

A. Yes. I recommend that PECO consider whether it would be appropriate to determine the TOU pricing multipliers seasonally, with one set of multipliers for the summer season and another set for the non-summer season. Typically, summer season would consist of the four calendar months of June through September. However, to avoid adjusting GSA-1 TOU rates more frequently than semiannually based on TOU pricing multipliers and the standard (non-TOU) GSA-1 rate, the summer season could also be defined as June through November (and the non-summer season as December

through May). I also recommend that PECO study the benefits and drawbacks of assigning all annual capacity costs to the summer season peak TOU period while calculating the TOU pricing multipliers. I also agree with Ms. Alexander's recommendations that PECO should explore incentive and reward programs to determine customer interest in peak load reductions, in addition to or in lieu of more traditional TOU rates.

Q. PLEASE PROVIDE YOUR BASIS FOR RECOMMENDING THAT PECO CONSIDER SEASONALLY DIFFERENTIATED TOU PRICING MULTIPLIERS FOR DSP VII.

A. Similar to most EDCs in retail choice Mid-Atlantic states, PECO allocates PJM capacity responsibility to the suppliers of individual customers based on the "Five PJM Coincident Peaks" ("5CP") construct. The 5CP days are limited to the period from June 1 through September 30. Since capacity costs are incurred based exclusively on usage during certain summer period hours, setting TOU pricing multipliers by season and assigning all capacity costs to the summer season provides the appropriate incentive for customers on TOU rates to reduce usage during those critical hours in the summer season.

Q. PLEASE EXPLAIN YOUR REASONING FOR RECOMMENDING THAT PECO CONSIDER ASSIGNMENT OF ALL ANNUAL CAPACITY COSTS TO THE SUMMER SEASON PEAK TOU PERIOD.

A. An analysis of the hours, days, and months during which 5CPs occurred in the last five years (2019-2023) reveals that,[41] of the 25 hours comprising the 5CPs in the last five years, 11 occurred at hour-ending ("HE") 17 (between 4 pm and 5 pm), 11 at HE 18, two at HE 16, and one at HE 15. Of those 25 hours, 16 occurred in the calendar

[41] https://www.pjm.com/planning/resource-adequacy-planning/load-forecast-dev-process.aspx

month of July, six in August, two in September, and one in June. Of the PJM-wide single-hour system peaks, which have particular significance in PJM's zonal capacity requirement determination, four of them occurred at HE 18 and one at HE 17, while four of them occurred in July and one in August, in the last five years. This analysis demonstrates that all the hours which determine annual capacity allocation between PJM zones and within the PECO zone fall within the summer season peak TOU pricing period (non-holiday weekday afternoons from 2 p.m. to 6 p.m.). Therefore, assigning all capacity costs to the summer season peak TOU pricing period is compelling in terms of sending the appropriate price signal to customers on the GSA-1 TOU rate to shift usage away from the peak period. This action could lower the participating customers' electric supply costs while potentially lowering energy costs (in the short term) and capacity costs (in the medium and long term) for all customers. It is also important to examine whether TOU customers would save money under the TOU multipliers to be calculated according to this construct, and whether the TOU multipliers (particularly the summer season peak period TOU multiplier) under this construct would lead to a large change from the existing TOU multipliers.

VII. LOAD CAPS

Q. PLEASE DESCRIBE PECO'S PROPOSAL PERTAINING TO THE LOAD CAPS APPLICABLE TO THE RESIDENTIAL CUSTOMER CLASS.

A. Residential load caps are limitations on the amount of load which a residential FPFR supplier can serve. PECO proposes a 50 percent load cap for the residential class in DSP VI, which is the same load cap in effect in DSP V. This means that on any given day a supplier may supply up to but not more than 50 percent of the required default service supply for the residential customer class.[42]

[42] PECO Energy Company Statement No. 4, p. 6, lines 4-15.

Q. DID YOU ANALYZE WHETHER ANY SUPPLIER REACHED OR NEARED THE 50 PERCENT RESIDENTIAL LOAD CAP AT ANY POINT DURING DSP IV OR DSP V?

A. Yes. I used the data provided by PECO in Confidential Attachment OCA-II-37(a) to conduct this analysis. **BEGIN CONFIDENTIAL** [redacted] **END CONFIDENTIAL** Figure 2 in Section IV shows the trend of the share of residential default service load supplied by the largest supplier during this period.

Q. WHAT IS YOUR RECOMMENDATION REGARDING THE RESIDENTIAL CLASS LOAD CAP?

A. Based on the foregoing analysis, I recommend maintaining the 50 percent load cap applicable to the residential class as proposed by PECO. **BEGIN CONFIDENTIAL** [redacted] **END CONFIDENTIAL**

Q. DOES THIS CONCLUDE YOUR TESTIMONY?

A. Yes, it does.

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

PETITION OF PECO ENERGY COMPANY FOR APPROVAL OF ITS DEFAULT SERVICE PROGRAM FOR THE PERIOD OF JUNE 1, 2025, THROUGH MAY 31, 2029	:	**DOCKET NO. P-2024-3046008**

OBJECTIONS OF PECO ENERGY COMPANY TO THE INTERROGATORIES (SET II) OF THE OFFICE OF CONSUMER ADVOCATE

Pursuant to 66 Pa. C.S. § 333(d) and 52 Pa. Code § 5.342, PECO Energy Company ("PECO") hereby objects to Second Set of Interrogatories ("Set II") Nos. 23, subparts (c) and (e), and 38 propounded by the Office of Consumer Advocate ("OCA") on March 26, 2024. A copy of the Interrogatories is attached as Appendix A and incorporated herein by reference.

1. OCA Set II Interrogatory No. 23, states as follows:

> Referencing page 11 [of the Direct Testimony of PECO witness Scott G. Fisher], footnote 16. Please provide:
>
> a. The dates on which the Commission has declined to authorize the bid results for these seven tranches.
>
> b. The procurement class (e.g., residential, small commercial) for each such tranche.
>
> c. The recommendation (whether to approve or not) provided by PECO or its independent evaluator to the Commission.
>
> d. The Commission's stated reasons for not approving these tranches (state the relevant reasons separately for each unapproved tranche).
>
> e. All public and non-public documentation for (c) and (d) above.

2. PECO objects to OCA Set II Interrogatory No. 23, subparts (c) and (e), because they seek information and documents regarding bid data submitted in the Company's past default service solicitations that PECO may not disclose under the rules and protocol (the "RFP Rules" and "RFP Protocol") governing its competitive requests for proposals process for the

procurement of default service supply conducted by National Economic Consulting, Inc. d/b/a NERA Economic Consulting ("NERA"), the Independent Evaluator appointed by the Pennsylvania Public Utility Commission (the "Commission") for PECO's current (and fifth) default service program ("DSP V").[1]

3. The RFP Rules and RFP Protocol were approved by the Commission for use in PECO's current default supply procurements in the *DSP V Order*. A copy of both the RFP Rules and the RFP Protocol is included in PECO's initial filing in this proceeding, with blacklines to the RFP Rules and RFP Protocol approved by the Commission for DSP V. *See* PECO Statement No. 4 & Exhibits KO-1 through KO-4.

4. In accordance with the Commission's Policy Statement at 52 Pa. Code § 69.1807(7), the RFP Rules and RFP Protocol developed with and administered by NERA contain extensive confidentiality provisions that prevent PECO and NERA from releasing information provided by bidders, including the bidder identity and the amount of awarded supply. *See* PECO Exhibit KO-1, §§ VI.1.2, VII.4 & Appendix 12; PECO Exhibit KO-2, §§ II, III, XI, XIII, XIV, XV. Bidder data and information submitted in response to a request for proposal ("RFP") may be disclosed only if required by a federal, state, or local agency (including the Commission) or a court of competent jurisdiction. *See* PECO Exhibit KO-1, § VII.4.5. In accordance with the Commission's October 12, 2010 Secretarial Letter[2] governing disclosure of default service solicitation results and the RFP Protocol approved by the Commission in the *PECO DSP V Order*, NERA does release certain specific information about the results of a procurement, including the average weighted price of winning bids, but other information is not made publicly

---

1 *See Petition of PECO Energy Co. for Approval of Its Default Serv. Program for the Period from June 1, 2021 through May 31, 2025*, Docket No. P-2020-3019290 (Opinion and Order entered December 3, 2020) ("*PECO DSP V Order*").

2 *See Re: Disclosure of Default Serv. Solicitation Results and Creation of a Default Serv.Rate Calculation Model*, Docket No. M-2009-2082042 (Secretarial Letter issued Oct. 12, 2010).

available.[3]

5. OCA Set II Interrogatory No. 23, subparts (c) and (e), request information about PECO's default service solicitations that cannot be released under the RFP Rules and, in some cases, is not even provided to PECO. Specifically, these interrogatories ask for: (1) the recommendation (whether to approve or not) provided to the Commission for the seven fixed-price full requirements tranches for which the bid results were not approved (2) all public and non-public documentation for the recommendation and the Commission's stated reasons for not approving those tranches. PECO does not provide recommendations for bid approvals or rejections; that is solely the responsibility of the Independent Evaluator. Those recommendations are provided in NERA's post-solicitation report which discloses the names of winning and losing bidders, the percentage of the available load that each supplier was awarded, and other information submitted by bidders in response to the RFP. Given the confidential provisions of the RFP Rules and the RFP Protocol, PECO cannot produce this information even under the "Confidential Information" or "Highly Confidential Information" provisions of the Protective Order in this proceeding[4] and therefore objects to OCA Set II Interrogatory No. 23, subparts (c) and (e).

6. Moreover, in FirstEnergy Pennsylvania Electric Company's ("FE-PA's") second default service proceeding, the presiding Administrative Law Judge granted FE-PA's objection and dismissed the Retail Energy Supply Association's Motion to Compel with respect to an interrogatory that would have required FE-PA to produce information about the results of historical default service auctions, including disaggregated bid information with fictitious labels.

---

[3] *See* PECO Exhibit KO-2, §§ XIII and XV.B. The information released for PECO's default service procurements to date is available at www.pecoprocurement.com (see "Previous Results" in the "Background" section of the website).

[4] Protective Order, *Petition of PECO Energy Co. for Approval of Its Default Serv. Program for the Period from June 1, 2025 through May 31, 2029*, Docket No. P-2024-3046008 (Order entered March 14, 2024) ("Protective Order")

As in this proceeding, FE-PA was prohibited from releasing the requested bid information under the Commission's approved rules governing its default service auctions. In sustaining the objection, the ALJ found that the auction rules impose "a cloak of confidentiality" to prevent disclosure of bid information that would "compromise the integrity of future auction processes."[5] Accordingly, there is clear precedent that the information sought in OCA Set II Interrogatory No. 23, subparts (c) and (e), is not discoverable for the reasons set forth in Paragraph Nos. 4 and 5 above.

7. PECO notes that in response to other discovery requests, PECO (with NERA's assistance) is providing (or has already provided) substantial information about procurement results in a manner that has not compromised the confidentiality of data the OCA now seeks. In particular, the OCA (and all other parties to this proceeding, consistent with the Protective Order) have received the following information:

- The number of suppliers that participated in each residential (fixed-price full requirements, or "FPFR") solicitation since DSP I.
- The number of suppliers that won at least one tranche in each residential FPFR solicitation since DSP I.
- The number of suppliers that participated in each small commercial FPFR solicitation since DSP I.
- The number of suppliers that won at least one tranche in each small commercial FPFR solicitation since DSP I.
- The number of tranches awarded to each bidder in each solicitation since DSP IV.
- The number of tranches provided by each supplier for each default service rate period for each customer class since DSP IV.
- The number of winning bids per solicitation in DSP V.
- The number of bidders eligible to submit bids in each DSP V solicitation.
- The average bid prices used to establish the average weighted price of each product in DSP V that is published by the Commission.
- Average winning bid price and associated number of tranches per product and supplier with supplier name redacted in DSP V.

[5] *See Joint Petition of Metro. Edison Co., Pa. Elec. Co., Pa. Power Co. and West Penn Power Co. For Approval of Their Default Service Programs*, Docket Nos. P-2011-2273650 et al. (Order Denying the Retail Energy Supply Association's Motion to Compel entered Mar. 16, 2012), p. 6; *see also id.*, pp. 3-8.

8. OCA Set II Interrogatory No. 38, states as follows:

> Referencing page 13, lines 5 through 22 [of the Direct Testimony of PECO witness Katie Orlandi]. Please provide:
>
> a. Please provide copies of each "Market Report" provided by NERA to the Commission since [June 1, 2016].
>
> b. Please provide copies of each "Final Report" provided by NERA to the Commission since [June 1, 2016].

9. The Market Report is prepared by NERA prior to each DSP V solicitation for default service supply and provided solely and confidentially to the Commission. The Final Report, which is prepared by NERA after each solicitation, is provided confidentially to the Commission to evaluate the solicitation and thereafter only in redacted form to PECO.

10. The Market Report is described in the RFP Protocol, and the Final Report is described in both the RFP Rules and RFP Protocol. *See* Exhibits KO-1 and KO-3, § VII.3 and Exhibits KO-2 and KO-4, §§ XIII, XV.B & XV.C.

11. PECO objects to OCA Set II Interrogatory No. 38 for the same reasons set forth in Paragraph Nos. 2-7 above and the confidentiality of the Market and Final Reports as described in paragraph 9 and in the RFP Rules and RFP Protocol.

Respectfully submitted,

OCA-II-40

Referencing page 14, lines 8 through 16.

a. **Please state and explain all facts observed by PECO or its consultants in PECO's FPFR solicitations that led PECO to propose this new reserve price approach. Please provide all internal and external reports, correspondence, and documentation which recommended the introduction of a reserve price in DSP VI.**
b. **Does Ms. Orlandi or PECO believe that any bids accepted in any residential FPFR product auction since the beginning of DSP IV would have been rejected under the proposed reserve price approach? If yes, please list all such bids and procurements.**
c. **Please explain how the appropriate level of the risk premium to be included in the reserve price will be determined.**
d. **Please explain how all other costs identified on pages 15 through 17 of Mr. Fisher's direct testimony, as well as additional categories of other costs that may be included in the reserve price determination, will be estimated.**
e. **For each residential FPFR product procurement conducted during the term of DSP V, please calculate the reserve price which would have applied under the reserve price calculation methodology being proposed for DSP VI. Please provide your response with all inputs, assumptions, and calculations in a live Excel spreadsheet with all formulae and references intact.**

RESPONSE:

a) As explained at PECO Statement No. 3, Direct Testimony of Scott G. Fisher, at 18:2-29:12, changes in market conditions in recent years have affected the prices obtained for default service supply. While the contract prices (i.e., winning bid prices) obtained by

PECO have been consistent with underlying market conditions, PECO is attentive to the cost burdens placed on customers, especially at times when the market is especially unpredictable. Given these facts, PECO is proposing to incorporate a reserve price in its residential default service supply solicitations as an additional mechanism intended to help ensure that customer costs are mitigated to the maximum extent possible.

b) PECO is proposing that the Independent Evaluator calculate a reserve price for residential products and that the Independent Evaluator base its recommendation to the Commission regarding the lowest-priced bids in part on whether the average winning bid price exceeds the reserve. As stated by PECO witness Orlandi [6]:

the Independent Evaluator could recommend rejection of lowest-priced bids for other reasons, such as on the basis of competitive measures or if the RFP process was not conducted in accordance with the process approved by the Commission

The reserve price approach does not lead to the rejection of bids. Whether bids are accepted or rejected is the decision of the Commission (not of PECO or of the Independent Evaluator).

c) The methodology for calculation of the reserve price and the level of the reserve price proposed for DSP VI will be provided in the Independent Evaluator's confidential reports to the Commission.

The reserve price would account for the costs and risks of serving the residential products as assessed at the time of the solicitation. It would be calculated separately for each residential product on the basis of the best available market data relevant to the PECO zone and supply period. PECO would assist in providing the most accurate data to the Independent Evaluator.

d) Please see response to c).

e) No reserve price was calculated during the term of DSP V. It is not possible to calculate with any accuracy or integrity the reserve price that would have applied for the solicitations held under DSP V when such calculations would be made in the present moment. The sources of information available today may or may not have been available at the time. The expectations and any judgments about market conditions can only be made contemporaneously and any retrospective analysis will inevitably consider factors that were not known at the time. For these reasons, any retrospective analysis could not reliably be used to draw any conclusion on bid results under DSP V.

Responsible Witness: Katie Orlandi

Pennsylvania Public Utility Commission
v.
PECO Energy Company

Petition of PECO Energy Company for Approval of
Default Service Program

Docket No. P-2024-3046008

Response of PECO Energy Company
To Interrogatories of the
Energy Justice Advocates
EJA Set I

Response Date: March 21, 2024

EJA-I-22

Please see paragraph 37 of PECO's Petition for Approval for DSP VI. Please detail all measures the Company has taken to reduce costs to implement the DSP program and the amount of such cost reductions. Please provide a detailed breakdown of all DSP implementation costs the Company has incurred and recovered from customers over the past 10 years, as well as a similar breakdown of such costs as proposed in DSP VI. Please detail the salaries and bonus structures for all managers and executives whose compensation is based on the performance of duties relating to the implementation of the DSP program, over the past 10 years and as proposed over the term of DSP VI, as well as any performance bonuses paid and the justification for such bonuses. If such data is not available, please explain why it is not.

RESPONSE:

See Attachment EJA-I-22(a) for a detailed breakdown of DSP implementation costs the Company has incurred and recovered from customers over the past 10 years.

Refer to PECO Exhibit MAM-6 for DSP VI Estimated Filing and Program Costs.

The Company does not compensate based on the performance of duties relating to the implementation of the DSP program.

Responsible Witness: Megan A. McDevitt

v.
PECO Energy Company

Petition of PECO Energy Company for Approval of
Default Service Program

Docket No. P-2024-3046008

Response of PECO Energy Company
To Interrogatories of the
Energy Justice Advocates
EJA Set I

Response Date: March 21, 2024

EJA-I-23

Please see Part B - Time of Use Options on page 17 of PECO's Petition for Approval for DSP VI. Please provide details on the number of participating customers in optional time of use rates, by class, and the amount of savings or increased bills experienced by participant customers over each year the options have been available. Please detail all the costs that PECO has incurred to develop, administer, and bill the time of use rate options. If such data is not available, please explain why it is not.

RESPONSE:

Refer to Attachment EJA-I-23(a.1) for the requested TOU customer information.

Refer to Attachment EJA-I-23(a.2) for the requested TOU implementation costs.

PECO incurs an additional cost of approximately $177,000 annually to administer and bill the time of use rate options.

OCA Set II

Response Date: April 05, 2024

OCA-II-15

Referencing page 10, lines 12 through 18.

a. **Please provide your basis for stating that "most customers who enrolled in PECO's TOU rates during that period took action to shift consumption away from peak hours" and provide all analyses conducted by or for PECO supporting this assertion.**
b. **If all of PECO's residential default service customers were on the TOU rates since September 2021, how much would they, as a class, save (or pay more) compared to the entire class being on PECO's standard default service rates? Please provide the data separately for each calendar month through the most recent month available.**

RESPONSE:

a. As shown in the 2022-2023 Default Service Program Time-of-Use Annual Report, PECO assesses customer savings while participating in DSP-TOU by comparing their billed DSP-TOU generation charges with the charges that would have been billed if those **customers had remained on PECO's standard non**-time-varying generation rates. 69% of billed DSP-TOU charges from June 2022 through May 2023 corresponded to usage consumed outside of peak hours. The monthly average savings for a DSP-TOU customer is $11 spanning from $3 to $23 a month.

b. Refer to Attachment OCA-II-15(b).

Statement of Qualifications of
Serhan Ogur

SERHAN OGUR, Ph.D.

Dr. Ogur is a Principal of Exeter Associates, Inc. with 23 years of experience in the energy industry specializing in organized wholesale (Regional Transmission Organization / Independent System Operator) and retail electricity markets. Dr. Ogur's diverse background comprises energy management and consulting; analysis, design, and reporting of RTO electricity markets and products; and state and federal regulation of electric utilities.

Dr. Ogur's coursework in graduate school focused on Microeconomic Theory, Game Theory, and Industrial Organization. His doctoral dissertation investigates imperfect competition in deregulated wholesale electricity markets and oligopolistic competition between private and public generators.

Education

Ph.D. (Economics), 2007
Northwestern University
Evanston, Illinois

B.A. (Economics), 1996
Bogazici University
Istanbul, Turkey

Previous Employment

2014-2015	Senior System Operator Fellon-McCord & Associates, LLC Louisville, KY
2005-2014	Senior Economist PJM Interconnection, LLC Audubon, PA
2001-2005	Economic Analyst Illinois Commerce Commission Springfield, IL

Professional Experience

Dr. Ogur's work at Exeter includes analysis of electricity supply contracts; utility rates and tariffs; energy markets and prices; power procurement; default electric service design; project evaluation; demand response opportunities; congestion hedging strategies; and price forecasting.

Prior to joining Exeter, Dr. Ogur's responsibilities at Fellon-McCord encompassed overseeing and performing the daily tasks of the "24/7" wholesale electricity desk, including all aspects of scheduling, managing, and monitoring direct market participant load and generation assets (mostly in ISO/RTO markets) as well as their settlements and custom reporting. He was also in charge of developing strategies and making recommendations, through

analytical, financial, and market research, for longer-term management of clients' load obligations and generation assets such as Auction Revenue Rights (ARR) nominations; participation in energy, ancillary services, and capacity markets; load forecasting; energy, basis, and capacity price forecasting; hedging; and peak load management. Dr. Ogur also served as the company's lead analyst in various special consulting projects.

In PJM Interconnection's Market Strategy and Market Analysis departments, Dr. Ogur was responsible for analyzing and reporting on all PJM-administered electricity market products, including day-ahead and real-time energy, operating reserve, regulation, synchronized reserve, virtual transactions, financial transmission rights, capacity, demand response, energy efficiency, and renewables. He was part of the team that developed the protocols and business rules for participation of energy efficiency in PJM markets as well as a lead reviewer for energy efficiency plans and post-installation measurement and verification (M&V) reports for PJM's capacity market auctions. He also has training and experience in PJM's stakeholder management process.

Dr. Ogur's responsibilities at the Illinois Commerce Commission (ICC) included monitoring all Illinois-related developments under federal jurisdiction, mostly Federal Energy Regulatory Commission (FERC) filings and rulings concerning major Illinois electric public utilities. In addition, Dr. Ogur reviewed all actions concerning Illinois public utilities at the FERC level (applications to join RTOs, market-based rate authority filings, merger applications, transmission rate cases, etc.), and developed positions and official comments for the consideration of the ICC to file in the related FERC dockets. Dr. Ogur also filed written testimony and served as staff witness (including standing cross-examination) in the ICC dockets establishing auction-based competitive wholesale energy procurement mechanisms for major Illinois electric public utilities.

DIRECT TESTIMONY

OF

BARBARA R. ALEXANDER

Barbara Alexander Consulting LLC

ON BEHALF OF THE

PENNSYLVANIA OFFICE OF CONSUMER ADVOCATE

PUBLIC VERSION

(Confidential Information Redacted)

April 25, 2024

I. INTRODUCTION AND SUMMARY

Q. PLEASE STATE YOUR NAME, ADDRESS AND OCCUPATION.

A. My name is Barbara R. Alexander. I am the sole member of Barbara Alexander Consulting LLC. My address is 44 Beech St., Hallowell, ME 04347. I appear in this case as a witness on behalf of the Office of Consumer Advocate (OCA).

Q. WHAT IS YOUR BACKGROUND AND EXPERIENCE WITH RESPECT TO THE ISSUES ON WHICH YOU ARE PROVIDING TESTIMONY IN THIS PROCEEDING?

A. I opened my consulting practice in March 1996, after nearly ten years as the Director of the Consumer Assistance Division of the Maine Public Utilities Commission. While there, I testified as an expert witness on consumer protection, customer service and low-income issues in rate cases and other investigations before the Commission. My consulting practice is directed to consumer protection, customer service and low-income programs and policies relating to the regulation of the telephone, electric and gas industries. In particular, I have focused on the changes in policies and procedures required by state regulation in the transition to retail competition. Among my areas of expertise are policies and programs related to Default Service and related issues concerning the transition to retail competition for both the electric and natural gas industries. I have appeared in over 30 U.S. and Canadian provinces on these issues and made numerous presentations on this issue before state regulatory commissions and at national conferences.

I am a graduate of the University of Michigan (B.A. 1968) and the University of Maine School of Law (J.D. 1976).

I have been involved in the implementation of retail electric and natural gas competition in Pennsylvania on behalf of the OCA since 1997. I testified on consumer education, consumer protection, supplier licensing, customer enrollment, default service, and Code of Conduct issues for the OCA in the Pennsylvania Public Utility Commission's (Commission) electric restructuring proceedings in 1997 and 1998 and in the natural gas restructuring cases beginning in 1999. I have provided testimony submitted on behalf of the OCA on service quality and low-income program issues associated with recent electric and natural gas distribution company mergers. With respect to issues relating to retail market competition policies, I testified on behalf of the OCA on policies that should govern the planning and acquisition of Default Service for residential customers and on proposals to adopt Purchase of Receivables (POR) programs, Customer Referral Programs, and other "retail market enhancement" programs for electric and natural gas utilities, including FirstEnergy distribution companies, Duquesne Light Co., PECO Energy (both gas and electric service), PPL Electric, UGI Utilities, Columbia Gas of Pennsylvania, T.W. Phillips Gas and Oil Co. and Peoples Natural Gas. I testified on behalf of the OCA in PECO Energy's prior Default Service Program proceedings with regard to retail market programs. My updated CV with the specific identification of these proceedings is attached as Exhibit BA-1.

Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

A. I am testifying on behalf of the OCA with respect to the proposal by PECO Energy (PECO) to continue its current Standard Offer Program (SOP) and the proposal to continue its Time of Use rate option for residential customers.

Q. PLEASE SUMMARIZE YOUR CONCLUSIONS AND RECOMMENDATIONS FOR PECO'S STANDARD OFFER PROGRAM.

A. Regarding PECO's Standard Offer Program, I recommend that PECO terminate this program. Alternatively, the program should be reformed to require customers to be returned to default service at the end of the 12-month Standard Offer program contract. I will explain both recommendations below.

- The Referral Program or Standard Offer Program (SOP) has been in effect for 10 years. The purpose of this program to expose PECO's residential and small commercial customers to the retail energy supply market has been fulfilled. PECO as the Electric Distribution Company should not operate further as the marketing and enrollment arm of the Electric Generation Suppliers (EGS) whose profits and service quality is unregulated and rife with a long history of charging more than the Price to Compare (PTC) or default service. During this decade long program there is substantial evidence as reflected in prior Default Service Proceedings that customers who enroll at the fixed price contract suffer charges in excess of the PTC during periods in which the PTC changes during the quarterly price adjustments. Furthermore, even if the customer does not see a price higher than the PTC during the 12-month contract that PECO and its agents promote, the price that the supplier charges the customer after the end of the contract is a legitimate concern in light of the supplier's ability to retain the customer under the negative option renewal rules currently in effect.

- If the Commission declines to terminate this program, I recommend a substantial reform regarding the customer's rights at the end of the 12-month contract. Specifically, the program's rules should require the supplier to return the customer to PECO's PTC

unless the supplier has obtained an affirmative agreement from the customer to enroll or renew the contract. This feature would require the EGS to either submit a drop order to PECO to return the customer to default service or submit a new enrollment after obtaining the necessary proof of customer authorization. Another approach to achieve this same objective would be for PECO to monitor Referral program contracts (by a code in their system). When the supplier for such contracts submits a change in rate for these customers, such changes should be rejected unless the supplier electronically confirms that the customer has affirmatively enrolled in the new contract.

- I support PECO's proposal to include on their bills a dollars and cents comparison of the customer's EGS costs with the applicable PTC. The statements during the customer's enrollment in the SOP that urges customers to compare their SOP supplier price with the PTC so they can change at any time without fee or penalty rings hollow when such a comparison is not readily available. However, PECO seeks the Commission's approval of this new bill disclosure in this proceeding and states that the implementation of the new disclosure, if approved, will not occur until an unknown time in 2025. PECO does not require the Commission's approval of such a bill disclosure and should implement this disclosure as soon as possible.

Q. PLEASE SUMMARIZE YOUR RECOMMENDATIONS FOR PECO'S TIME OF USE RATE OPTION FOR RESIDENTIAL CUSTOMERS.

A. I acknowledge that PECO has an obligation to offer a rate program that takes advantage of the expensive Advanced Metering Infrastructure, or "smart meters" paid for by ratepayers. However, this program does not meet any criteria for satisfying that need. This program is poorly designed, with poor enrollment, and has not documented value in the form of

peak usage reduction or impact on wholesale market prices. I recommend that PECO develop one or more pilot programs with a properly designed evaluation protocol that targets customers to reduce peak usage with demand response features, such as incentive payments for customers with usage profiles that reflect high usage due to hot water heating, electric home heating, and other appliances that contribute to peak usage.

II. IMPLEMENTATION OF PECO'S STANDARD OFFER PROGRAM

Q. PLEASE DESCRIBE PECO'S SOP.

A. PECO's SOP was approved in its DSP II proceeding and was initiated with enrollments beginning in August 2013. PECO's program has been reviewed and approved in all of the following DSP proceedings with various changes to the scripts used by PECO's customer representatives and PECO's third party agent who actually presents the program, obtains approval to participate in the program, and enrolls customers with a supplier authorized by PECO to participate in this program. PECO requires EGSs to offer a fixed price agreement for 12 billing cycles to participating customers. The fixed price is set at 7% below the PTC in effect at the time of a customer's agreement to participate in the program. However, the actual discount varies during the term of the contract because PECO's PTC is adjusted quarterly. As a result, if the PTC drops during the SOP contract, the customer may pay more than default service as I have documented in prior DSP proceedings for this program.[1] If the PTC increases during the SOP contract, the customer's discount is more than 7% compared to the PTC for those months. Even more confusing for customers, their actual discount can change several times during the 12-month contract because of the quarterly

[1] *See*, Direct Testimony of Barbara Alexander on behalf of the OCA, Docket No. P-2016-2534980 (June 3, 2016).

PTC changes, thus contributing to confusion and a lack of understanding of these risks.

Q. DO PECO'S SCRIPTS EXPLAIN THE PROGRAM WITH THE POTENTIAL CHANGE IN SAVINGS?

A. PECO uses script language ordered by the Commission. The Commission issued an Order in a prior FirstEnergy DSP proceeding that provided guidance on CAP Shopping programs and Referral Program scripts.[2] In this Order the Commission actually set forth specific script language for the EDC customer representatives and their SOP contractors to use with customers. In addition, the Commission issued a Secretarial Letter on January 23, 2020 to give direction to the EDCs about certain aspects of the implementation of Default Service.[3] In this Secretarial Letter the Commission referenced SOP Referral Scripting and directed the EDCs to the scripting language included in the FirstEnergy DSP Order quoted above, stating, "We suggest that EDCs, when preparing their upcoming DSP filings, review the Commission's actions in the above noted FirstEnergy proceeding and to include in their filings analysis of their SOPs, the current scripting, and any proposed scripting that adequately informs customers about the SOPs while maintaining important safeguards and protections."[4]

Q. DOES THIS LANGUAGE PROPERLY EXPLAIN THE RISK TO CUSTOMERS ABOUT THEIR ACTUAL SAVINGS OR LACK THEREOF DURING THE TERM OF THE CONTRACT?

A. No. The EDC and the SOP vendor presents the program to customers with the term "potential savings." The customer is secondarily informed correctly that the contract will

[2] Docket No. P-2017-2637855 et al. Order (February 28, 2019).
[3] Investigation into Default Service and PJM Interconnection, LLC Settlement Reforms, Docket M-2019-3007101 (January 23, 2020).
[4] Ibid., at 10.

provide a 7% discount on the PTC currently in effect. Then the customer is also told that the PTC will change quarterly. The statement that the PTC will change during the 12-month contract period does not plainly inform the customer that the 7% discount is not guaranteed during the term of the contract. The use of the term "potential savings" and a later reference that the PTC will change during the contract is contradictory and confusing. It is also important to remember that when people call their utility, they are often calling for something other than to inquire about retail choice and are then asked about whether they want to be referred to this program. Customers may or may not be readily interested in comparing offers that are available and may simply latch on to the prospect of savings. I remain concerned about what I consider as the contorted and contradictory disclosures that reflects the program design transfers market risk of price volatility to the customer.

Q. THE SCRIPT TELLS THE CUSTOMER TO MONITOR PRICES DURING THE 12-MONTH PERIOD AND AT THE END OF THE CONTRACT. CAN A PECO CUSTOMER ACTUALLY COMPARE THE SUPPLIER PRICE WITH THE APPLICABLE PTC?

A. No. PECO's residential customer bill provides the supplier's total monthly charge and the supplier's cents per kWh in a line item but does not calculate the customer's charges to what the customer would pay had they remained on the PTC. PECO's bill gives the customer the total dollar amount of the EGS charges and includes a statement in the "message center" that gives the current PTC as a cents per kWh rate.[5] The customer would have to manually calculate their PTC charges by multiplying the current usage by the PTC

[5] PECO Response to OCA-III-11(a) The Attachment is labeled CONFIDENTIAL with customer personal information. None of the confidential information is included in this testimony.

rate to compare to the EGS charges. As a result, there is a significant defect or discrepancy in the customer's ability to even understand whether their EGS contract (whether obtained in the SOP or otherwise) provides savings compared to the PTC.

Q. DO YOU AGREE WITH PECO'S PROPOSAL TO ADD A BILL DISCLOSURE THAT WOULD SHOW THE ACTUAL DOLLARS AND CENTS COMPARISON BETWEEN THE EGS CHARGES AND THE PTC?

A. Yes. However, contrary to PECO's recommendation, I do not agree that PECO needs the Commission's permission to add this disclosure to its customer bills.[6] With regard to PECO's actual bill presentation, I question PECO's proposal to label a third column as "Electric Supplier Savings." This title is not necessarily a correct description of the calculation because there will be months labeled "green" for savings and "red" for paying more than the PTC. As a result, the column label is confusing. I recommend that PECO delete this third column and allow the customer to focus on the actual dollar amount charged by the Supplier and what would be charged pursuant to the PTC to decide to take action. That would allow a true dollar to dollar comparison. I recommend that PECO implement this modified disclosure as soon as possible, possibly via a temporary methodology in an email to the customer or in a separate web-based calculation on the customer's account page until the bill reforms are completed.

[6] PECO Response to OCA-I-14.

Q. HAS PECO DONE ANY ANALYSIS OF WHETHER CUSTOMERS PAY MORE OR LESS UNDER THE SOP OR WHAT HAPPENS TO CUSTOMERS AFTER THE END OF THE 12-MONTH SOP CONTRACT?

A. No. PECO does not analyze the experience of any of its customers who are served by an EGS compared to the PTC during or after the 12-month SOP contract.[7] PECO's approach ignores any interest in its customers experience in the retail energy market even though PECO buys the receivables for EGSs and bills and collects those charges subject to termination of service for nonpayment. This "ignorance" of the facts is not responsible for the EDC given its role in enabling the EGS community to enroll its customers using PECO's name and brand.

Q. DOES PECO'S AGENT FOR THIS PROGRAM SUGGEST TO CUSTOMERS THEY CAN RE-ENROLL IN THE PROGRAM AT ANY TIME BY CALLING PECO'S SOP VENDOR?

A. Yes. As a result, PECO's role as the marketing and enrollment arm of the suppliers who agree to participate in the program has been expanded to **BEGIN CONFIDENTIAL** [redacted] **END CONFIDENTIAL**[8] This feature raises a concern about the proper role of the EDC in the retail energy markets and should not be allowed to continue in this manner.

[7] PECO Response to OCA-I-5; PECO Response to OCA-I-7; PECO Response to OCA-I-8.
[8] PECO Response to OCA-I-3(a) CONFIDENTIAL Attachment, page 23 of 42.

Q. HAS PECO UNDERTAKEN ANY ANALYSIS OF WHETHER CUSTOMERS UNDERSTAND THE MATERIAL TERMS AND CONDITIONS FOR THIS PROGRAM OR THEIR ENROLLMENT STATUS AT THE END OF THE SOP CONTRCT?

A. As a result of the prior DSP settlement, PECO did conduct a survey of its Standard Offer customers.[9] Of the 7,454 customers enrolled in Referral Program, 447 customers responded to this email survey (that was the only way the survey was conducted). PECO reported the following summary of this survey results:

a. 28% of those who enrolled in the SOP and was billed by an EGS did not recall signing up or enrolling while 71.8% recalled signing up;
b. 51% selected a "new" EGS after 12-month contract; 20% returned to default; 20% remained with EGS; 8.4% withdrew during the 12-month term;
c. 81% reported a positive experience—savings were emphasized as well as ease of enrolling; 18.7% had negative response—not clear process after the 12-month period; lack of sufficient communication;
d. Several comments reflected the customers experience in making the enrollment and change of supplier easier.

Q. DO YOU HAVE ANY COMMENTS ON THIS SURVEY AND ITS RESULTS?

A. Yes. The survey confirms that a substantial number of the surveyed customers that PECO and its agent personally enrolled with an EGS did not recall enrolling with this program. Furthermore, the fact that the survey did not capture sufficient demographic data to determine the statistical representation of those enrolled is a serious defect in terms of relying on these results. I acknowledge that customers who recently enrolled in this program have seen the savings of 7% or more since the PTC has gradually increased in the last two years during the 12-month SOP contract. However, this survey does not capture what customers actually paid after the 12-month contract or allow for any understanding

[9] PECO Response to TURN/CAUSE I-10.

of the customer's experience with the EGS renewal process.

Q. PLEASE DISCUSS PECO'S POLICIES WITH REGARD TO ALLOWING LOW INCOME CUSTOMERS TO ENROLL IN THE SOP.

A. Customer Assistance Program (CAP) customers are not eligible to enroll with an EGS. These customers benefit from a program funded by ratepayers that reduces their required bill payments based on their household income and the total PECO bill. However, customers who are "confirmed low income" (customers where PECO has evidence of their qualification for CAP but who are not enrolled in CAP) are allowed to enroll with an EGS and are not disqualified from the SOP.[10] As a result, confirmed low-income customers may experience higher bills and collection actions, including termination of service, for nonpayment of a bill that includes EGS charges that are higher than the PTC.

Q. HOW MANY EGSs HAVE PARTICIPATED IN THE SOP WITH PECO?

A. EGSs participate in the SOP when it is in their benefit to take advantage of market conditions.[11] In 2021, EGS participation ranged from 16 in the January-April period but then dropped to 11 to 13 until November when only 8 participated and in December only 4 EGSs participated. Participation dropped dramatically in 2022 with no more than 4 EGSs participating in any month and no EGSs participating for five months. In 2023 no EGSs participated in January-February with a gradual increase in participation during that year ending with 14-15 EGSs participating in the program. Clearly, as the numbers indicate, the EGS community's commitment to the SOP varies significantly over time and through different market conditions. When the EGS sees an opportunity to obtain a new customer

[10] PECO Response to OCA-III-10 CONFIDENTIAL
[11] PECO Response to OCA-I-4(a). CONFIDENTIAL ATTACHMENT

for a $30 payment in the SOP, it is in their business interest to do so but when market conditions indicate significant volatility and increased cost of providing generation supply at a fixed price as occurred in 2022 and early 2023, they exit this market. This history indicates that residential customers bear the risk of leaving the PTC and not suppliers.

Q. ALTHOUGH THERE IS NOT DATA SPECIFIC TO THE SOP, IS THERE EVIDENCE THAT RESIDENTIAL CUSTOMERS RISK HIGHER BILLS BY CHOOSING AN EGS?

A. Yes. There is a long history of documenting higher EGS prices compared to the PTC in Pennsylvania as documented in prior DSP proceedings. PECO provided a chart showing what residential customers paid to suppliers compared to what would have been charged had the customer remained with the PTC for each month in 2018 through 2023.[12] In every year residential customers paid more to suppliers compared to the PTC, and in total, over that six year period, residential customers in aggregate and on net paid in excess of $800 million more to be served by suppliers than they would have paid had all residential customers remained on default service during this period. These are startling sums and are consistent with the findings across the country that residential customers as a whole tend to fare worse economically when served by the retail market then when they remain on the default service that is procured in a competitive bid from the wholesale market. The following summary reflects the annual information derived from PECO's discovery response:

[12] PECO Response to TURN_CAUSE-I-16(a).

Residential		Total	Over PTC
2018	Supplier Revenue ($M)	$464,860,133.72	$132,900,203.41
	Supplier Revenue @ PECO Rate ($M)	$331,959,930.31	
2019	Supplier Revenue ($M)	$427,179,009.88	$137,089,870.20
	Supplier Revenue @ PECO Rate ($M)	$290,089,139.68	
2020	Supplier Revenue ($M)	$402,656,940.90	$135,465,913.34
	Supplier Revenue @ PECO Rate ($M)	$267,191,027.56	
2021	Supplier Revenue ($M)	$387,016,482.67	$138,584,808.32
	Supplier Revenue @ PECO Rate ($M)	$248,431,674.35	
2022	Supplier Revenue ($M)	$417,336,877.58	$154,494,181.01
	Supplier Revenue @ PECO Rate ($M)	$262,842,696.57	
2023	Supplier Revenue ($M)	$394,915,257.43	$103,338,416.29
	Supplier Revenue @ PECO Rate ($M)	$291,576,841.14	
TOTAL			$801,873,392.57

Thus, it is clear that some reforms are needed and that as a result, it is reasonable to assume that SOP customers, whether they saved or not during the term of their 12-month contracts, ended up with an EGS contract that was more expensive than the PTC due to the negative option renewal process or by the selection of another EGS.

III. RECOMMENDATIONS AND REFORMS FOR THE STANDARD OFFER PROGRAM

Q. PLEASE SUMMARIZE YOUR RECOMMENDATIONS WITH REGARD TO PECO'S SOP.

A. My primary recommendation is that the SOP be terminated. This program has been in effect for 10 years. The original purpose of exposing customers to the retail generation market has been accomplished. Residential enrollment with EGSs has shown a marked decrease as reflected in PUC reports and now is 25% or less of eligible residential customers.[13] PECO's residential customer enrollment with EGSs under the SOP has leveled off and is a relatively small percentage of the customers who agree to be transferred to hear about the program. I attach PECO's response to OCA-I-9(a) as Exhibit BA-2 that shows the monthly number of referrals to PECO's agent and the number of customers who agree to enroll with an EGS from June 2021 through December 2023.

Most importantly, however, it is not appropriate for PECO to function as the marketing and enrollment arm for the EGSs, particularly when the fee paid by the EGS of $30 is likely to be far less than the EGS would have to pay to market and enroll these same customers.[14] As a result, there is a substantial subsidy being provided to these retail marketers who are then allowed to use a negative option renewal policy to change contract terms. Furthermore, it is likely that customers who have enrolled by way of a phone call to PECO that was not intended to seek information about retail choice and who agreed to enroll based on "savings," may not understand that suppliers can change their pricing terms

[13] https://www.puc.pa.gov/media/2604/retail-elec-choice-report-2022_-final.pdf

[14] This statement reflects the obvious costs that an EGS has to incur to hire door to door marketers, invest in telemarketing contractors, their own call center marketing, mail promotional marketing materials, as well as the obvious overhead and profit to support their business model.

with some notices that arrive 10-12 months after the phone call with PECO. Even if there are subsequent rule violations or misleading communications by suppliers after the customer's enrollment, the Commission cannot under current law order refunds directly to affected customers,[15] thus shifting the risk of supplier misconduct to the customer who has enrolled via their trusted utility provider. Finally, my recommendation reflects the risk of enrollment allowed for confirmed low-income customers and the lack of available information concerning the residential customer's experience at the end of the SOP contract.

Q. DO YOU HAVE AN ALTERNATIVE RECOMMENDATION?

A. Yes. As a less than perfect alternative to ending the program, I recommend that participating EGSs return customers to default service at the end of the SOP contract unless the EGS has completed a new enrollment with an affirmative customer agreement to new or different contract terms. My recommendation eliminates the EGS's ability to rely on a negative option or silence from the SOP contract customer to change contract terms. This approach would eliminate any obligation by the EDC to track SOP contracts separately from other EGS contracts. However, another option would be to require the EDC to track SOP contracts and return the customer to default service unless the EDC has received the customer's enrollment with a different EGS or a new enrollment with affirmative agreement with the same EGS. In either case, my recommendation would require a change in the SOP agreement between PECO and participating EGSs.

[15] *See Blue Pilot Energy LLC v. Pa. PUC*, 241 A.3d 1254 (Pa. Commw. Ct. 2020), available publicly at: https://law.justia.com/cases/pennsylvania/commonwealth-court/2020/1054-c-d-2019.html

Q. DO YOU AGREE WITH PECO'S PROPOSAL TO ADD A NEW BILL DISCLOSURE THAT SHOWS THE CUSTOMER A COMPARISON OF THE MONTHLY EGS CHARGES TO WHAT WOULD BE CHARGED UNDER THE APPLICABLE PTC?

A. Yes. However, PECO does not need the Commission's approval to make this important and necessary change to its bill disclosures. As I indicated above, I recommend a change in PECO's specific proposal and I recommend that PECO make this reform as soon as possible.

IV. PECO'S RESIDENTIAL TIME OF USE RATE OPTION

Q. PLEASE DESCRIBE PECO'S CURRENT TIME OF USE (TOU) RATE OPTION FOR RESIDENTIAL CUSTOMERS.

A. PECO has marketed a TOU rate option for the generation supply portion of the customer's bill (PTC customers) since 2021. After several years of offering, changing, and promoting a TOU rate option, enrollment is low and customer interest is low. As of May 2023, 1,914 customers enrolled of which 1,902 are residential customers. Of the total, 296 customers are net metering customers with rooftop solar.[16] The average monthly savings is $11 with highest savings in winter months. However, there is no analysis of whether customers changed their usage behavior compared to their usage profile under the default service flat rate. Therefore, "PECO does not have the information necessary to estimate the degree to which DSP-TOU customers are likely to conserve load vs. shift load."[17]

[16] PECO Response to OCA-I-18(a) is PECO's Default Service Program Time of Use Annual Report for period June 2022 through May 2023 (October 20, 2023).
[17] *Ibid*., page 8.

Q. IS THERE EVIDENCE OF CUSTOMER DISSATISFACTION WITH THIS TOU RATE AFTER ENROLLMENT?

A. Yes. Since inception in August 2021, over 500 customers have dropped out of the TOU rate.[18] Given the small level of enrollment, this is a significant indicator that the program is not providing any interest or satisfaction to even those small number of customers willing to explore a TOU rate.

Q. IS A TOU RATE COMPATIBLE WITH BUDGET BILLING OR OTHER INDICIA OF PAYMENT DIFFICULTIES AND PAYMENT ARRANGEMENTS?

A. No. A customer with different prices based on the time of day needs to "see" the price signal to appropriately respond. However, budget billing that calculates an average monthly payment that is stable and payment plans that allow payment of a lump sum plus a current bill are not compatible with a more volatile time-based pricing plan that requires the customer to understand their hourly electric usage and the impact of different prices during the day. Therefore, there are a substantial number of customers for whom a TOU rate option is not particularly helpful or even understandable.

Q. DOES PECO PURCHASE THIS TOU RATE OPTION IN THE WHOLESALE MARKET?

A. No. This rate option is offered without bidding the TOU rates into the market, and instead, PECO reconciles its TOU rates against its default service portfolio. In light of the small level of interest in this program, I agree that pursuing a separate TOU portfolio is neither necessary nor reasonable. However, the low level of interest and enrollment also means that there is no value to default service prices generally from this program.

[18] PECO Response to OCA-I-21.

Q. DOES THIS RATE OPTION RESULT IN A COST SHIFT TO NON-TOU CUSTOMERS?

A. Yes. These TOU customers contribute lower revenues compared to other DSP customers.[19] While the current level of TOU enrollment means that this issue is not significant, the pattern suggests that expanded marketing and enrollment of this program is not reasonable. Nor does this calculation reflect the incremental costs incurred by PECO to market, enroll, bill, and provide account information to these customers with frequent communications and web portal features.

Q. IS THERE ANY EVIDENCE THAT THIS PROGRAM BENEFITS ELECTRIC VEHICLE CUSTOMERS?

A. No. While PECO's web portal for this program advertises the potential benefit of the TOU rate for EV customers,[20] there is no data or evaluation of whether EV customers have enrolled or benefitted from this program. This is not particularly surprising since an EV owner would have to agree to enroll in a whole house TOU rate to see any value for shifting their EV charging usage. This is a barrier to enrollment that is not fully explored or evaluated by PECO.

[19] Annual Report at 8-9.
[20] https://www.peco.com/smart-energy/innovation-technology/time-of-use-pricing

V. RECOMMENDATIONS CONCERNING PECO'S TIME OF USE RATE OPTION

Q. IN LIGHT OF THE POOR ENROLLMENT AND LACK OF DOCUMENTED BENEFITS TO THE VAST MAJORITY OF PECO'S RESIDENTIAL CUSTOMERS, WHAT ARE YOUR RECOMMENDATIONS?

A. First, I acknowledge that PECO has an obligation to offer a TOU rate program that takes advantage of the expensive Advanced Metering Infrastructure, or "smart meters" paid for by ratepayers. I do not, therefore, recommend that this program be terminated at this time. OCA Witness Serhan Ogur recommends that PECO explore modifications to the current TOU rate in the next DSP filing. However, the current rate option does not meet the criteria for a successful program that justifies ratepayer expense, such as adequate customer interest, or resulting peak usage reduction. Such a program should ideally be offered to attract a significant number of customers, result in lower peak usage, and document value by linking the results of the rate option to the lower price for capacity or energy in the wholesale market for all customers. The purpose of the program is not necessarily to provide a benefit only to a small group of customers who enroll but who do not contribute their fair share of revenue to support the customer class.

Q. DO YOU HAVE A RECOMMENDATION FOR THE DEVELOPMENT OF ALTERNATIVE RATE OPTIONS?

A. I recommend that PECO develop one or more pilot programs with a properly designed evaluation protocol that targets customers to reduce peak usage with demand response features, such as incentive payments for customers with usage profiles that reflect high usage due to hot water heating, electric home heating, and other appliances that contribute to peak usage. It is not necessary to offer a program that is suited to all residential

customers, particularly those with low or modest usage whose profile does not suggest any benefit from shifting usage to non-peak periods. Rather, the program should be focused on a well-developed analysis of customers whose usage pattern will benefit from an incentive to either reduce or shift usage during expensive peak hours. There are several examples of such programs, particularly those being implemented by Maryland's electric distribution companies who offer a peak time rebate to all customers during critical peak days and also are accompanied by the installation of smart thermostats to automate reasonable changes in appliance usage in return for rewards in the form of a bill credit.[21] Such programs can be monetized in the wholesale market and, if well designed, can benefit all default service customers with lower prices. Furthermore, such a program is likely to make use of the expensive AMI investment in a manner more effective and wider customer interest and participation compared to the current TOU rate option that is poorly subscribed.

Q. DOES THIS COMPLETE YOUR TESTIMONY AT THIS TIME?

A. Yes.

[21] See, e.g., BGE's savings programs: https://bgesavings.com/#gsc.tab=0 It is noted that BGE is also an Exelon Company and PECO should be able to obtain mutually available assistance in the design and implementation of such a program.

Prior Employment

DIRECTOR

1986-96

Consumer Assistance Division

Maine Public Utilities Commission *Augusta, Maine*

One of five division directors appointed by a three-member regulatory commission and part of commission management team. Direct supervision of 10 employees, oversight of public utility consumer complaint function, appearance as an expert witness on customer services, consumer protection, service quality and low income policy issues before the PUC. Chair, NARUC Staff Subcommittee on Consumer Affairs.

SUPERINTENDENT

1979-83

Bureau of Consumer Credit Protection
Department of Professional and Financial Regulation *Augusta, Maine*

Director of an independent regulatory agency charged with the implementation of Maine Consumer Credit Code and Truth in Lending Act. Investigations and audits of financial institutions and retail creditors, enforcement activities, testimony before Maine Legislature and U.S. Congress.

Education

JURIS DOCTOR

1973-76

University of Maine School of Law *Portland, Maine*

Admitted to the Bar of the State of Maine, September 1976. Currently registered as "inactive."

B.A. (WITH DISTINCTION) IN POLITICAL SCIENCE 1964-68
University of Michigan *Ann Arbor, Michigan*

Boards and Commissions

I. INTRODUCTION 1

II. CAPACITY PROXY PRICE 2

III. LONG-TERM SOLAR AEC CONTRACTS 4

IV. LONG-TERM ZERO-EMISSION RENEWABLE ENERGY CONTRACTS 7

I. INTRODUCTION

Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A. My name is Serhan Ogur. I am a Principal and Senior Economist at Exeter Associates, Inc. ("Exeter"). My office is located at 10480 Little Patuxent Parkway, Suite 300, Columbia, Maryland, 21044.

Q. HAVE YOU PREVIOUSLY TESTIFIED IN THIS PROCEEDING?

A. Yes. I submitted Direct Testimony in this proceeding on April 25, 2024 on behalf of the Pennsylvania Office of Consumer Advocate ("OCA").

Q. WHAT IS THE PURPOSE OF YOUR REBUTTAL TESTIMONY IN THIS PROCEEDING?

A. My Rebuttal Testimony addresses certain issues raised by Mr. Frank Caliva in his Direct Testimony filed on behalf of the Retail Energy Supply Association ("RESA"). These issues relate to PECO Energy Company ("PECO" or the "Company") incorporating a Capacity Proxy Price ("CPP") mechanism in its fixed-price full-requirements ("FPFR") wholesale supply contracts, and PECO's proposal to enter into 10-year contracts for the provision of a portion of the Company's expected solar Alternative Energy Credit ("AEC") requirement. In addition to the issues raised by Mr. Caliva, I also address an issue raised by Mr. Karl R. Rabago, who submitted Direct Testimony on behalf of the Energy Justice Advocates ("EJA"). That issue relates to Mr. Rabago's recommendation that PECO include generation supply from zero-emission renewable resources under long-term power purchase agreements ("PPAs") in its residential default service supply mix.

II. CAPACITY PROXY PRICE

Q. PLEASE DESCRIBE PECO'S CPP PROPOSAL.

A. The CPP is meant to serve as a placeholder if the PJM Base Residual Auction ("BRA") clearing price is not known for all months of the delivery period for an FPFR product offered at least five business days prior to the bid date. If this occurs, bidders would use the CPP as the proxy for the final zonal PJM capacity rate (expressed in dollars per megawatt of PJM capacity obligation per day) to formulate their bids. The CPP would be calculated as the average of the most recent results under PJM's Reliability Pricing Model ("RPM") from the two most recent delivery years for which PJM has held a capacity auction. Winning bidders would then be made whole through a reconciliation mechanism.[1]

Q. DID YOU ADDRESS THIS ISSUE IN YOUR DIRECT TESTIMONY?

A. Yes. I supported the Company's CPP proposal because, as I explained in greater detail in my Direct Testimony, it is preferable to the other three alternatives I identified.[2]

Q. PLEASE SUMMARIZE MR. CALIVA'S POSITION WITH RESPECT TO THE COMPANY'S CPP PROPOSAL.

A. Mr. Caliva recommends that the Pennsylvania Public Utility Commission ("Commission") reject PECO's CPP proposal. He asserts that both wholesale default service suppliers and electric generation suppliers ("EGSs") rely on the forward PJM capacity auction price signals, to develop their bid proposals submitted to the default service auctions in the case of wholesale suppliers, and to develop competitive offers made available to shopping customers in the case of EGSs.[3] According to Mr. Caliva,

[1] PECO Energy Company Statement No. 4, page 19, lines 5-14.
[2] OCA Statement No. 1, page 15, line 10 through page 17, line 2.
[3] RESA Statement No. 1, p. 29, lines 17-20.

providing a solution for default service suppliers to mitigate their risk (in the form of a CPP) will lead to unnecessary distortions in the pricing of generation service offered to all customers because, in the absence of a BRA clearing price, EGSs lose an important input necessary to develop accurate market-based retail prices and have no mechanism for full cost recovery once the actual prices are known.[4]

Q. DO YOU AGREE WITH MR CALIVA'S REASONING AND RECOMMENDATION?

A. No, for two reasons. First, wholesale FPFR suppliers and EGSs face different risks and opportunities in their respective business models. Isolating one aspect of business risk/opportunity and one pricing element and trying to levelize the playing field in that area ignores this basic fact. For example, wholesale suppliers bid on 12-month and 24-month contracts whereas an EGS can offer a contract of any term (e.g., six months, nine months) that would allow it to avoid the business risk stemming from the lack of a PJM capacity market price signal, if it chooses to do so as part of its business model. An additional difference is that wholesale suppliers serve the hourly load profile of an unknown number of customers at a fixed price, while an EGS does not face this risk at all because it is free to sign up, or not sign up, any number of customers that are willing to subscribe to its offers.

Second, if there is an improvement that can be made to the default service procurement process which is likely to improve price stability or affordability for default service customers, it should be approved by the Commission regardless of whether the same accommodation is possible or practical for EGS service. Given that it is likely that the capacity price will not be known ahead of several of PECO's upcoming auctions, using a CPP will create predictability and is more likely to improve price stability than

[4] RESA Statement No. 1, page 29, line 24 to page 30, line 3.

not using a CPP. The goal of retail competition is to increase service and pricing alternatives to customers, not to attempt to increase the market share of EGSs by purposefully designing default service to be less attractive to customers.

Q. DO YOU CONTINUE TO RECOMMEND THAT THE COMMISSION APPROVE PECO'S CPP PROPOSAL AS YOU DID IN YOUR DIRECT TESTIMONY?

A. Yes.

III. LONG-TERM SOLAR AEC CONTRACTS

Q. PLEASE DESCRIBE PECO'S PROPOSAL TO ENTER INTO LONG-TERM SOLAR AEC CONTRACTS.

A. The Company proposes to satisfy a portion of the Alternative Energy Portfolio Standards Act ("AEPS Act") requirement for default service supply through the purchase of long-term (10-year) contracts of solar Tier 1 AECs. In its Default Service Plan ("DSP") V, PECO entered into 10-year solar AEC purchase contracts for a total of 16,000 solar AECs annually (half of which expire on May 31, 2032, and the other half on May 31, 2033). During the term of DSP VI, PECO proposes to procure an additional 16,000 solar AECs annually, bringing the total to 32,000 solar AECs per year, which PECO expects would satisfy 45 percent of the Company's solar AEPS requirements under DSP VI.[5] These solar AECs would be used by PECO in partial satisfaction of the AEPS Act obligations of default service customers, which in turn would reduce the FPFR suppliers' solar AEC obligations.

[5] PECO Energy Company Statement No. 1, page 26, lines 11-15.

Q. DID YOU ADDRESS THIS ISSUE IN YOUR DIRECT TESTIMONY?

A. Yes. I supported the Company's proposal because long-term contracts for the provision of solar Tier 1 AECs can help stabilize prices for what would otherwise be a volatile component of the overall portfolio.[6]

Q. PLEASE SUMMARIZE MR. CALIVA'S POSITION WITH RESPECT TO PECO'S PROPOSAL TO ENTER INTO LONG-TERM SOLAR AEC CONTRACTS.

A. In recognition of the fact that the Commission approved PECO's acquisition of long-term solar AEC contracts in recent DSPs and the policy issues supporting the development of solar generation in Pennsylvania, Mr. Caliva does not appear to object to PECO entering into 10-year contracts for solar AECs.[7] However, Mr. Caliva objects to the Company allocating these solar AECs only to default service load.[8] To address what he perceives to be competitive concerns associated with allocating solar AECs only to default service load, Mr. Caliva proposes that PECO procure the proposed long term contracts for solar AECs, but assign the acquired solar AECs to all load serving entities (wholesale suppliers and EGSs) on a load ratio share basis and recover the costs from all (shopping and default service) distribution customers through a non-bypassable charge.[9]

Q. ARE YOU STILL RECOMMENDING THAT THE COMMISSION APPROVE PECO'S PROPOSAL ENTER INTO 10-YEAR SOLAR AEC CONTRACTS?

A. Yes.

[6] OCA Statement No. 1, page 14, line 15 through page 15, line 9.
[7] RESA Statement No. 1, page 34, lines 9-13.
[8] RESA Statement No. 1, page 33, lines 9-10.
[9] RESA Statement No. 1, page 34, lines 16-19.

Q. PLEASE COMMENT ON MR. CALIVA'S PROPOSAL TO ALLOCATE THE SOLAR AECS ACQUIRED BY PECO TO ALL (SHOPPING AND DEFAULT SERVICE) CUSTOMERS.

A. I do not support the arrangement as proposed by Mr. Caliva because some shopping customers could pay twice for the same solar AECs which are acquired and allocated to all load-serving entities. There will be some fixed-price EGS contracts entered into by shopping customers before EGSs know (and reflect it in their competitive price offers) that they will in effect receive a number of solar AECs from the Company free of charge. In these instances, these shopping customers will pay for the same solar AECs twice; once as part of the price of the EGS contracts they entered into, and again through the non-bypassable PECO charge proposed by Mr. Caliva.

Q. IS THERE A VARIANT OF MR. CALIVA'S PROPOSAL TO WHICH YOU WOULD NOT OBJECT?

A. Yes. While I am not recommending the adoption of this approach in this case, I also would not necessarily object to PECO assuming the responsibility to meet the entire solar Tier 1 AEC obligation for its entire distribution load and recovering the associated cost from all customers through a non-bypassable charge. Under this arrangement, wholesale FPFR suppliers and EGSs would be responsible to meet the AEPS Act's non-solar Tier 1 and Tier 2 AEC obligations, but not the Tier 1 solar carveout requirement.

However, to avoid the issue of double charging some shopping customers I described above, this shift should only be implemented with a lag of two or three years after a Commission order adopting it so that all fixed-price EGS contracts that have already been executed on the date of the Commission's order expire by the time PECO assumes the exclusive solar Tier 1 AEC obligation for all of its distribution customers. Assigning AEPS Act's Tier 1 solar carveout compliance responsibility exclusively to

PECO, with the required transition period, would eliminate uncertainty and confusion on the part of all load-serving entities (wholesale suppliers and EGSs) and customers.

IV. LONG-TERM ZERO-EMISSION RENEWABLE ENERGY CONTRACTS

Q. PLEASE DESCRIBE EJA WITNESS MR. RABAGO'S PROPOSAL THAT PECO PROCURE ZERO-EMISSION RENEWABLE ENERGY CONTRACTS AS PART OF THE COMPANY'S RESIDENTIAL DEFAULT SERVICE WHOLESALE SUPPLY PRODUCT MIX.

A. Mr. Rabago is proposing that PECO undertake a Renewable Energy Supply Procurement ("RESP") program which would aim to procure at least seven percent of generation supply for residential customers from 100% zero-emission renewable resources under 10-year PPAs at fixed or reasonably fixed prices. For solar PPAs, Mr. Rabago's proposal for seven percent of residential default service load corresponds to approximately 525 megawatts ("MW") of nameplate capacity. The Company would contract for the energy, AEC, capacity, and ancillary services attributes from the generation resource. Mr. Rabago recommends that PECO build this 525-MW zero-emission renewable portfolio progressively over the term of DSP VI by acquiring 150 MW for commencement of delivery in the second year of DSP VI, 175 MW for commencement of delivery in the third year of DSP VI, and 200 MW for commencement of delivery in the fourth year of DSP VI. Mr. Rabago's proposal entails the inclusion of a bid pricing threshold limit to ensure that PECO is not required to secure zero emission renewables contracts that cause DSP rates to increase above those reasonably expected over the same term. Mr. Rabago recommends that the RESP express a preference, but not a requirement, for new renewable energy generation sited in Pennsylvania.[10]

[10] Energy Justice Advocates Statement No. 1, page 72, line 20 through page 73, line 17.

Q. WHAT IS THE BASIS FOR MR. RABAGO'S RECOMMENDATION THAT PECO SHOULD PROCURE AT LEAST SEVEN PERCENT OF RESIDENTIAL DEFAULT SERVICE SUPPLIES IN THE FORM OF LONG-TERM RENEWABLE ENERGY CONTRACTS?

A. I did not see any discussion of or justification for Mr. Rabago's selection of seven percent as the minimum threshold for the share of renewable energy from long-term PPAs in the residential default service supply mix proposed in the Direct Testimony of Mr. Rabago, or in the other EJA witness Mr. Ben Kujala's Direct Testimony (Energy Justice Advocates Statement No. 2).

Q. DO YOU SUPPORT MR. RABAGO'S PROPOSAL THAT PECO PROCURE RENEWABLE ENERGY UNDER LONG-TERM PPAs FOR THE RESIDENTIAL DEFAULT SERVICE PORTFOLIO?

A. As I noted in my Direct Testimony, PECO's proposed approach is broadly consistent with the applicable standards for default service, and I did not object to it in my direct testimony. That said, with the addition of two conditions that I outline below, I could support Mr. Rabago's proposal because procuring a portion of the residential default service load requirements under long-term PPAs would increase rate stability and certainty for residential default service customers, and rate stability is a very important element for residential customers. My first condition is that the long-term renewable energy PPAs be incorporated into PECO's residential default service portfolio in a way that does not raise the cost of procuring the remaining (approximately 93 percent under Mr. Rabago's proposal) portion of the residential default service product portfolio. Second, the RESP should be designed to minimize the generation supply and administrative costs of the renewable energy PPA procurements. This would include

exploring PPA durations longer than the 10 years proposed by Mr. Rabago (e.g., 15 years, 20 years).

Q. HOW DOES MR. RABAGO PROPOSE THAT RENEWABLE ENERGY FROM PPAs INTERACT WITH PECO'S EXISTING PROCUREMENT PROCESSES FOR RESIDENTIAL DEFAULT SERVICE CUSTOMERS?

A. PECO currently procures approximately 99 percent of residential default service supplies in the form of 12-month and 24-month FPFR contracts, which are described in greater detail in my Direct Testimony.[11] Mr. Rabago suggests that PECO incorporate renewable energy deliveries from the PPAs into the residential portfolio the same way as it does the allocation of hydropower it receives from the New York Power Authority ("NYPA").[12] That is, PECO would continue to procure 99 percent of the residential default service load requirements under FPFR contracts, but each "tranche" of the residential default service energy requirement in each hour would be a fixed share (currently 1.6 percent) of the gross usage of the residential default service customers, *less* the NYPA allocation and the energy from renewable PPAs.

Q. DO YOU AGREE WITH THIS WAY OF TREATING LONG-TERM PPAs THAT IS SUGGESTED BY MR. RABAGO?

A. No. Wholesale FPFR suppliers already assume the "volumetric risk" of an uncertain load obligation, including customers switching into and out of default service. Under Mr. Rabago's proposal, FPFR suppliers would assume two additional sources of risk. First, if a PPA is projected to commence energy deliveries during the term of a 12-month or 24-month FPFR contract, the wholesale suppliers do not know whether and when such deliveries will begin during the contract term, yet they are asked to provide the same

[11] OCA Statement No. 1, page 10.
[12] Energy Justice Advocates Statement No. 1, page 75, lines 1-4.

fixed price regardless of whether or when PPA energy deliveries commence. This would complicate wholesale suppliers' hedging arrangements, or make them more costly, or both. Second, the wholesale suppliers would assume the risk of the availability (e.g., maintenance and forced outages) and production profile of the renewable generation assets underlying the long-term PPAs. The hourly generation profile is more predictable for certain technologies (e.g., solar) than others (e.g., wind), but in the end they are variable and intermittent. Putting these additional risks on the FPFR suppliers would increase the risk premiums they would build into their offers, or cause some of them to avoid bidding in the Company's FPFR solicitations, or both. This in turn would increase the cost of procuring the remaining (approximately 93 percent under Mr. Rabago's proposal) portion of the residential default service product portfolio.

Q. ARE THERE WAYS OF INCORPORATING RENEWABLE ENERGY PPAs INTO THE RESIDENTIAL DEFAULT SERVICE PORTFOLIO WITHOUT PUTTING THESE ADDITIONAL RISKS ON THE FPFR SUPPLIERS?

A. Yes, there are at least two ways to do so. First, PECO could continue procuring the same number of FPFR contracts (i.e., 62 tranches of residential default service load with each tranche representing 1.6 percent of the load, corresponding to 99.2 percent of the load after the gross usage is offset by the NYPA allocation) the same way it is doing currently. Under this approach, the residential default service load to be served each hour by FPFR suppliers would be defined as the gross usage offset by the NYPA allocation, but not offset by the renewable PPA deliveries, and PECO would sell the energy acquired under the renewable energy PPAs into the PJM real-time market. The revenue earned from the sale of energy received under the PPAs into the PJM real-time market would be credited to the default service customers. Under this approach, FPFR suppliers are not affected by the presence, absence, variability, or profile of renewable energy deliveries under the

PPAs so the cost of procuring the remaining (approximately 93 percent under Mr. Rabago's proposal) portion of the residential default service product portfolio would not increase. This is the approach that was proposed by Duquesne Light Company ("Duquesne") and approved by the Commission in Duquesne's current default service plan.[13]

Second, a residential FPFR tranche would be defined the same way as it is today, but the Company could procure fewer tranches (e.g., 58 tranches for a total of 92.8 of the post-NYPA residential default service load) in recognition of the energy to be delivered to the residential default service portfolio from the long-term renewable energy PPAs. The FPFR suppliers are not affected by the presence, absence, variability, or profile of renewable energy deliveries under the PPAs under this approach, either. Therefore, the cost of procuring the remaining (approximately 93 percent under Mr. Rabago's proposal) portion of the residential default service product portfolio would not increase, either. Under this approach, PECO would be a net seller of energy into the PJM real-time market in some hours and a net buyer of energy from the PJM real-time market in other hours, depending on the amount of energy delivered by the PPAs in any specific hour.

While I would prefer the first (Duquesne) approach because it is more straightforward to implement, I would not be opposed to the second approach described above.

Q. HOW WOULD RESIDENTIAL DEFAULT SERVICE CUSTOMERS BENEFIT FROM THE AECs DELIVERED UNDER THE PPAs?

[13] *Petition of Duquesne Light Company for Approval of its Default Service Plan for the Period from June 1, 2021 through May 31, 2025,* 2021 PA. PUC Lexis 4, *61 (Order and Opinion Jan. 14, 2021)

A. PECO would use the AECs from the renewable energy PPAs to offset the AEPS Act obligations of default service customers, similar to the way solar AECs obtained by PECO from the long-term solar AEC contracts are currently utilized.

Q. HOW WOULD RESIDENTIAL DEFAULT SERVICE CUSTOMERS BENEFIT FROM THE CAPACITY ATTRIBUTES OBTAINED UNDER THE PPAs?

A. In PJM's capacity market construct (known as the Reliability Pricing Model, or RPM), there is no way to directly offset a load-serving entity's PJM capacity obligations by specific generation resources.[14] All generation capacity sellers bid their capacity resources into PJM's capacity auctions and, if a resource clears the auction, the resource owner is paid the auction clearing price for each unit of capacity from the resource, that is, for each megawatt of unforced capacity. PECO would bid the capacity value of the generation resources underlying the PPAs into PJM's capacity auctions and, if cleared, credit the revenues to the residential default service customers. PJM capacity obligations for the residential default service customers would continue to be purchased from the wholesale suppliers as part of the FPFR contracts.

Q. IF PECO SELLS THE ENERGY IT RECEIVES UNDER THE RENEWABLE PPAs INTO THE PJM REAL-TIME MARKET, WOULD PECO'S RESIDENTIAL DEFAULT SERVICE CUSTOMERS STILL BENEFIT FROM THE ZERO-EMISSION ATTRIBUTES OF THESE PPAs?

A. Yes. In a regional transmission grid such as the one operated by PJM, there is no way to ensure the flow of energy from a specific source to a specific customer. PJM dispatches all available generation resources in economic merit order to meet the usage by all loads connected to its grid by respecting capacities of all transmission lines and elements (e.g.,

[14] The only exception is for Fixed Resource Requirement ("FRR") entities. PECO is not an FRR entity in PJM, nor am I recommending that PECO become one for this purpose.

transformers). In other words, electrons follow the path of least resistance on the grid (known as the Kirchhoff's Laws), and not the contract path. Therefore, regardless of how PECO incorporates the energy it is delivered under long-term renewable PPAs into its residential default service, customers benefit from them the same way by having such zero-emission renewable generation displace other, possibly carbon-emitting and pollution-producing, generation that would have been dispatched absent the PPA.

Q. PLEASE SUMMARIZE YOUR RECOMMENDATION RELATED TO MR. RABAGO'S SUGGESTION TO INCLUDE ZERO-EMISSION RENEWABLE ENERGY CONTRACTS IN THE RESIDENTIAL DEFAULT SERVICE PORTFOLIO.

A. If the Commission is inclined to approve the recommendation of EJA in this proceeding as opposed to PECO's proposed procurement model, my recommendation is two-fold. First, as a matter of policy and principle, I support including long-term (up to 20 years) fixed-price renewable energy contracts in PECO's residential default service wholesale supply portfolio because of the rate stability benefits they would bring to the residential default service customers. Second, I recommend that this energy delivered under the PPAs be incorporated into the residential portfolio without changing the definition of residential default service load for the purpose of FPFR contracts from what it currently is so that FPFR suppliers do not assume additional risk and the cost of procuring the remaining (approximately 93 percent under Mr. Rabago's proposal) portion of the residential default service product portfolio does not increase owing to wholesale suppliers incurring added risk elements.

Q. DOES THIS CONCLUDE YOUR REBUTTAL TESTIMONY?

A. Yes, it does.

REBUTTAL TESTIMONY

OF

BARBARA R. ALEXANDER

Barbara Alexander Consulting LLC

ON BEHALF OF THE

PENNSYLVANIA OFFICE OF CONSUMER ADVOCATE

May 15, 2024

Q. PLEASE STATE YOUR NAME, ADDRESS AND OCCUPATION.

A. My name is Barbara R. Alexander. I am the sole member of Barbara Alexander Consulting LLC. My address is 44 Beech St., Hallowell, ME 04347. I appear in this case as a witness on behalf of the Office of Consumer Advocate (OCA).

Q. HAVE YOU PREVIOUSLY TESTIFIED IN THIS PROCEEDING?

A. Yes. I filed Direct Testimony on behalf of the OCA on April 25, 2024.

Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

A. I am submitting Rebuttal Testimony in response to the Direct Testimony of Mr. Frank Caliva III on behalf of the Retail Energy Supply Association (RESA).[1]

Q. PLEASE SUMMARIZE YOUR OVERALL RESPONSE TO MR. CALIVA'S TESTIMONY ON BEHALF OF RESA.

A. Mr. Caliva's testimony consists of unsubstantiated claims of benefits associated with the retail energy market and proposals that conflict with the statutory and regulatory policies governing default service in Pennsylvania. Most importantly, his citations to the 2013 End State Order[2] do not reflect the subsequent legislative reforms and Commission proceedings and directives that have occurred as the market has matured and developed over time. Specifically, Mr. Caliva ignores the statutory requirement that electric power "shall be procured through competitive procurement processes" (including auctions, requests for proposals and/or competitively procured bilateral agreements procured at no greater than the cost of obtaining generation under comparable terms in the wholesale market), and such procurement must be a "prudent mix" of spot market purchases, short-term contracts and

[1] RESA St. No. 1.
[2] *Investigation of Pennsylvania's Retail Electricity Market: End State of Default Service*, Docket No. I-2011-2237952 (Order entered February 15, 2013) (*End State Final Order*)

long-term purchase contracts.[3] Further PECO and other Pennsylvania electric utilities are required to recover their actual costs incurred to procure and administer this portfolio in a fully reconcilable Section 1307(e) cost recovery mechanisms for each class.[4] Mr. Caliva's complaints about these policies or attempts to make radical changes may reflect RESA's policy preferences, but they are ill suited to this proceeding.

Q. DOES MR. CALIVA PROVIDE ANY INFORMATION ON PRICES CHARGED BY RESA MEMBERS OR ANY OTHER SUPPLIER OR DESCRIBE ANY PRODUCT OR SERVICE PROVIDED BY RESA MEMBERS?

A. No. In fact, Mr. Caliva relies on anecdotal stories[5] and explicitly states that his testimony may not reflect the views of all RESA members[6] and his testimony does not reflect any analysis or presentation of prices charged by RESA members or the products and services they offer or plan to offer. He offers no evidence to support his claims or recommendations.

Q. MR. CALIVA STATES THAT RETAIL SUPPLIERS ARE "EAGER FOR THE OPPORTUNITY TO DEVELOP AND OFFER THE INNOVATIVE AND CREATIVE PRODUCTS THAT CONSUMERS WANT…."[7] PLEASE RESPOND.

A. RESA's members have had the ability to offer "innovative and creative products that consumers want" since the onset of retail competition in Pennsylvania. Mr. Caliva offers no description of what these "innovative and creative products" are, why consumers would want them, or why these suppliers have not actually offered such products to date. RESA's position that the structure of the default service market is the barrier that prevents such

[3] 66 Pa. C.S. § 2807(e)(3.1)-(3.2).
[4] 66 Pa. C.S. §§ 1307(e), 2807(e)(3.9).
[5] RESA St. No. 1, page 2, line 19. Mr. Cavila states that his proposals reflect "anecdotal information from members…."
[6] RESA St. No. 1, fn. 1.
[7] Ibid., page 7, lines 16-17.

innovation and demonstration of what consumers want has been an ongoing and repeated claim without any evidence to support what products or services would be offered or documentation that most consumers want anything other than a least cost electricity supply to maintain essential electric service. Mr. Caliva ignores the subsidies currently provided to RESA and suppliers generally in their access to the customer bill through PECO's Purchase of Receivables (POR) program that shifts the risk of nonpayment to the utility and its ratepayers. Additionally, the Standard Offer Program converts the electric utility into the marketing and enrollment arm for the participating suppliers, at a modest expense to the suppliers.

Q. DOES THE RECORD IN THIS PROCEEDING DOCUMENT THAT SUPPLIERS CHARGE MORE THAN THE PRICE TO COMPARE (PTC) AND THAT SUCH PRICES RESULT IN HIGHER TERMINATIONS OF SERVICE AND ADVERSE BILL PAYMENT ABILITY FOR MANY KNOWN LOW INCOME CUSTOMERS OF PECO?

A. Yes. The Direct Testimony of Elizabeth Marx on behalf of CAUSE/TURN[8] and my Direct Testimony on behalf of OCA document the actual adverse impacts of higher supplier charges compared to the PTC on PECO's residential customers generally and low income customers specifically. It is unreasonable for Mr. Caliva to suggest or opine about the "value" of RESA's member products and services without any evidence about what that value is and without confronting the reality of the impact of the retail market on PECO's residential customers and their ability to pay for essential service when supplier prices are in excess of the PTC. This concern is particularly important given the supplier's right to use a negative option renewal practice to change the customer's price after an introductory

[8] CAUSE/TURN St. No. 1.

rate that might be temporarily lower than the PTC or to change a fixed rate contract to a variable rate contract.[9]

Q. TURNING TO MR. CALIVA'S SPECIFIC RECOMMENDATIONS, PLEASE COMMENT ON THE PROPOSAL THAT THE COMMISSION OPEN A STATEWIDE INVESTIGATION ON DEFAULT SERVICE MESSAGING. [10]

A. I oppose this recommendation. Mr. Caliva seeks to question the label of "price to compare" (PTC) and change this term to "default service rate" and reform the messaging to promote the potential benefits of "competitive offers." The use of the term Price to Compare permeates the Commission's educational messaging about the retail energy market, appears on all EDC customer bills, and is the basis for comparing offers among suppliers and with default service on the Commission's shopping web portal. The suggestion that the costs incurred, and years of customer education should be wiped away in favor of a different term for the same service and to promote customer confusion about how to shop and compare is not reasonable.

Q. MR. CALIVA PROPOSES ADDITIONAL MESSAGING ASSOCIATED WITH PECO'S PROPOSED BILL DISCLOSURE THAT WILL COMPARE THE CUSTOMER'S MONTHLY SUPPLIER COST WITH THE PTC.[11] DO YOU AGREE?

A. No. First, the simple dollars and cents comparison proposed by PECO does not determine whether the consumer will take action based on this information. Instead, this information would serve as a crucial alert to the consumer to communicate with their supplier to

[9] See, e.g., the Statement of Vice Chair Kimberly Barrow in the resolution of the formal complaint *Kevin Brabank vs. PECO Energy Company—Electric and Tomorrow Energy Corp*., Docket No. F-2023-3042345 (April 25, 2024). I attach Commissioner Barrow's Statement as Exhibit BA-3.
[10] RESA St. No. 1 at 16-18.
[11] RESA St. No. 1 at 4-5,18-23.

determine if this product does reflect any additional value other than the electrons that power her appliances. Mr. Caliva's opposition to PECO's proposed bill modification as unnecessary or anti-competitive is not reasonable. Second, Mr. Caliva's alternative position is that PECO should engage in a collaborative regarding bill disclosures, with the end result that PECO provide "more space on the utility consolidated bill" for supplier messaging. RESA's proposed 'remedy' to PECO's bill modification would require PECO bills to go beyond education about PTC and the customer's selected supply price into allowing suppliers to use PECO's bill to market their products.

Furthermore, the existence of the Purchase of Receivable program provides a significant benefit and subsidy to suppliers that Mr. Caliva does not seem to account for in his analysis. While I do not support the initiation of the investigation that Mr. Caliva proposes, if the Commission is inclined to grant this request, it should include, among other things, the consideration of eliminating this subsidy or requiring significantly more consumer protections to eliminate the obligation of the EDC to threaten termination of service for these unregulated charges, treating these supplier charges similar to "non-basic" charges. Moreover, suppliers who find that the use of the EDC bill to collect their charges is not productive and in the supplier's best interests can always opt to offer dual bills to customers to directly collect for supply service, which allow for a more direct communication with customers and a fuller explanation of their billed products and services. Additionally, there is nothing that is preventing a supplier from communicating directly with their customers and offering whatever so called value added goods and services they believe the customer would be interested in purchasing directly from the supplier.

Q. IS THERE ANOTHER ASPECT OF HOW SUPPLIERS PRESENT THEIR CHARGES ON THE EDC BILL THAT SUPPORTS PECO'S PROPOSAL AND JUSTIFIES YOUR OPPOSITION TO RESA'S RECOMMENDED LANGUAGE?

A. Yes. When a supplier charges a cents per kWh ***and*** a fixed monthly charge, the resulting dollar amount is the proper comparison because relying solely on the cents per kWh charge and comparing that to the PTC (which is what occurs under the current bill design) fails to provide an "apples to apples" comparison. The proper comparison in these situations, which appears frequently as a supplier offer on the Commission's shopping web portal[12], is to compare the actual dollar amount for the supplier's generation supply to what the customer would pay with the applicable PTC.

Q. DO YOU AGREE WITH MR. CALIVA'S PROPOSAL TO GAIN ADDITIONAL ACCESS TO PECO'S BILL TO "EXPLAIN HOW THE SUPPLIER PRODUCT IS DIFFERENT FROM THE DEFAULT SERVICE RATE?"[13]

Q. No. Suppliers already are being subsidized by being able to sell their receivables to PECO and require PECO to pay 100% of those receivables and transfer the risk of additional collection costs, higher bills, and termination of service from the supplier to PECO's ratepayers. It is up to the supplier to differentiate its product in marketing and selling its product and justifying its higher price or other contract terms.

Q. DOES THIS COMPLETE YOUR TESTIMONY AT THIS TIME?

A. Yes.

[12] Of the offers provided to residential customers in zipcode 19128 in PECO's service territory, at least 20 charge a monthly fee. PAPowerSwitch accessed May 2, 2024.

PENNSYLVANIA PUBLIC UTILITY COMMISSION
Harrisburg, Pennsylvania 17120

Kevin Brabank vs.
PECO Energy Company – Electric
and Tomorrow Energy Corp.

Public Meeting held April 25, 2024
3042345-ALJ
Docket No. F-2023-3042345

STATEMENT OF VICE CHAIR KIMBERLY BARROW

On August 21, 2023, Mr. Kevin Brabank filed a Formal Complaint against PECO Energy Company (PECO) and Tomorrow Energy Corporation (Tomorrow Energy) averring various allegations relating to his enrollment in PECO's Standard Offer Program (SOP), and the high variable rate which took effect after the SOP ended. Tomorrow Energy and Mr. Brabank settled the Complaint and PECO filed a Certificate of Satisfaction. An Initial Decision was issued on February 23, 2024, dismissing the Formal Complaint against PECO.

While I agree with the Administrative Law Judge's dismissal of the Formal Complaint, I want to take this opportunity to discuss shopping awareness and the issues that arise after an individual's contract or participation in a SOP ends. First and foremost, customers who choose to shop or utilize SOPs need to be aware of their contract terms and review all documentation provided by the Electric Generation Supplier (EGS). Notably, when the EGS contract is near its expiration, the EGS is required to provide an Initial Notice 45-60 days prior to the expiration date of the fixed duration contract or the effective date of the proposed change in terms.[1] An Options Notice is then provided 30 days prior to the expiration date of the fixed-duration contract or the effective date of the proposed change in terms.[2] If the customer does not respond to either the Initial Notice or the Options Notice, the EGS contract will be converted automatically to either a month-to-month contract or another fixed-duration contract, as explained in the notices.[3] Shopping for a supplier is not a passive act, and customers must remain vigilant and be aware of contract terms and rates.

Additionally, while the Commission's Regulations permit an EGS to convert a non-responsive customer to a month-to-month or fixed-duration contract, I caution the EGS industry to exercise good faith and reasonableness when offering the new contract terms and prices. I am concerned with the fact pattern often seen in shopping complaints. Customers complain that any savings experienced during the initial contract term are more than wiped out once they are moved to a month-to-month or new fixed-duration contract. It is important that shopping customers pay attention to the notices sent near the end of the contract, but it is also important for EGSs to be good ambassadors for their industry to retain customer confidence in the competitive market.

April 25, 2024

Kimberly Barrow, Vice Chair

I. INTRODUCTION

Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A. My name is Serhan Ogur. I am a Principal and Senior Economist at Exeter Associates, Inc. ("Exeter"). My office is located at 10480 Little Patuxent Parkway, Suite 300, Columbia, Maryland, 21044.

Q. HAVE YOU PREVIOUSLY TESTIFIED IN THIS PROCEEDING?

A. Yes. I submitted Direct Testimony and Rebuttal Testimony in this proceeding on April 25, 2024 and on May 15, 2024, respectively, on behalf of the Pennsylvania Office of Consumer Advocate ("OCA").

Q. WHAT IS THE PURPOSE OF YOUR SURREBUTTAL TESTIMONY IN THIS PROCEEDING?

A. My Surrebuttal Testimony responds to certain issues raised by PECO Energy Company ("PECO" or the "Company") witnesses Ms. Megan A. McDevitt, Mr. Scott G. Fisher, and Ms. Katie Orlandi in their respective Rebuttal Testimonies; and by the Retail Energy Supply Association ("RESA") witness Mr. Frank Caliva in his Rebuttal Testimony. These issues relate to (i) the adjustment and reconciliation of residential default service rates; (ii) PECO's reserve price proposal; (iii) PECO's proposed contingency plan; (iv) time-of-use ("TOU") rates; and (v) inclusion of generation supply from zero-emission renewable resources under long-term power purchase agreements ("PPAs") in the Company's residential default service supply mix proposed in the Direct Testimony of Energy Justice Advocates ("EJA") witness Mr. Karl R. Rabago. Each of these issues is addressed in turn in the following sections of my Surrebuttal Testimony.

II. ADJUSTMENT AND RECONCILIATION OF DEFAULT SERVICE RATES

Q. PLEASE SUMMARIZE YOUR RECOMMENDATION REGARDING THE COMPANY'S PROPOSED RESIDENTIAL DEFAULT SERVICE RATE ADJUSTMENT FREQUENCY.

A. In my Direct testimony, I recommended that the Company adjust residential default service rates semi-annually (on June 1 and December 1 of each year) instead of on a quarterly basis. As I explained in my Direct Testimony, PECO procures 99 percent of its residential default service supplies in the form of 12-month and 24-month fixed-price full-requirements ("FPFR") contracts. These contracts terminate only on May 31 and November 30 of each year, and delivery under new contracts commences only on June 1 and December 1 of each year. Since only one percent of the residential supply portfolio (and the E-Factor rate) changes on March 1 and September 1, there is no compelling reason to continue adjusting the Residential Generation Supply Adjustment ("GSA-1") rate and the price-to-compare ("PTC") on March 1 and September 1. Adopting my recommendation would provide greater rate stability and certainty for residential default service customers, reduce PECO's administrative cost and burden associated with GSA-1 and E-Factor rate adjustments, and align PECO with the rest of the Pennsylvania electric distribution companies ("EDCs") in terms of residential generation rate and PTC adjustment frequency.[1]

Q. HOW DID MS. MCDEVITT RESPOND TO YOUR RECOMMENDATION?

A. Ms. McDevitt acknowledged that implementing my recommendation and adjusting the GSA-1 rate semi-annually would offer less administrative complexity for the Company, yet she opposed the adoption of my recommendation on the basis that using a quarterly

[1] OCA Statement No. 1, pp. 27-28.

default supply price projection period provides additional opportunities for PECO to update forecasted procurement costs and usage data.[2]

Q. WHAT IS YOUR RESPONSE TO MS. MCDEVITT'S EXPLANATION FOR THE COMPANY PREFERRING ITS RECOMMENDED APPROACH?

A. I disagree with Ms. McDevitt's reasoning for opposing my recommendation. As I explained above, the Company procures 99 percent of its residential default service supplies in the form of FPFR contracts, and those contracts are replaced only semiannually. The Company has near perfect foresight into the unit residential default supply costs for six months at a time, which obviates the need for PECO to have additional opportunities to update forecasted procurement costs and usage data. Therefore, the Pennsylvania Public Utility Commission ("Commission") should adopt my recommendation and direct PECO to begin adjusting the GSA-1 rate and the PTC semi-annually to provide greater rate stability and predictability for residential customers. I note that semi-annual PTC adjustments would also make shopping comparisons more relevant for customers since a customer would have visibility into the rate differential and cost savings between an Electric Generation Supplier ("EGS") offer and the PTC for a longer period of time under semi-annual PTC adjustments than under quarterly PTC adjustments.

Q. PLEASE SUMMARIZE YOUR RECOMMENDATION REGARDING THE COMPANY'S PROPOSED AMORTIZATION OF THE RESIDENTIAL OVER/UNDER COLLECTION RECONCILIATION.

A. In my Direct Testimony, I recommended a modification to the Company's method of recovering (or refunding) the revenue under-collections (or over-collections) associated with the provision of residential default service. The Company's current method, which

[2] PECO Energy Company Statement No. 2-R, page 3, lines 1-7.

PECO proposes to continue in Default Service Plan VI ("DSP VI"), is to calculate the total reconciliation amount over a six-month period and to collect (or disburse) that amount over a subsequent six-month period. My recommendation is for the Company to continue to calculate the reconciliation amount over a six-month period but recover or refund that amount over a subsequent 12-month period. That approach would reduce the variability in the E-Factor levels and at the same time allow the Company to fully cover its costs for the provision of default service. Additionally, the future reconciliation amounts may be larger than what has been the Company's experience in the past if PECO experiences growth in the number of customers enrolling in the TOU rate options or if PECO's reserve price proposal, if adopted by the Commission, results in the rejection of some winning in the FPFR auctions and the corresponding amount of residential default service energy requirements are subjected to the volatile spot market.

Q. HOW DID MS. MCDEVITT RESPOND TO YOUR RECOMMENDATION?

A. Ms. McDevitt offered several reasons why PECO should continue to conduct the reconciliation under DSP VI just as it does in DSP V and why the Commission should not adopt my recommendation. One of her stated reasons is that the Commission rejected PECO's DSP II proposal to reconcile annual over-collections/under-collections over a 12-month amortization period.[3] Ms. McDevitt explains that in the past three default service plan proceedings, i.e., those related to DSP III, DSP IV, and DSP V, PECO proposed the current six-month amortization period to collect the reconciliation amount calculated over a prior six-month period. The Commission approved that approach, which Ms. McDevitt characterizes as balancing the goals of price volatility mitigation and maintaining the PTC as a price signal.[4] Additionally, Ms. McDevitt notes that I did

[3] PECO Energy Company Statement No. 2-R, page 3, line 22 through page 4, line 3.
[4] PECO Energy Company Statement No. 2-R, page 4, lines 9-17.

not provide any analysis or other evidence supporting my contention that the collection or refund of the reconciliation amounts over 12 months could provide more stable rates than collection or disbursement over six months.[5]

Q. WHAT IS YOUR RESPONSE TO MS. MCDEVITT'S REASONING FOR OPPOSING YOUR RECOMMENDED APPROACH?

A. First, I agree that the Commission has, in the past, rejected the use of a 12-month accumulated reconciliation amount amortized over a subsequent 12-month period. However, that is not what I have proposed. My proposal is based on a reconciliation level that is the same as proposed by PECO, i.e., over a six-month period. The difference between PECO's proposal and my recommendation is simply that my recommendation is for the reconciliation level to be amortized over 12 months rather than the six months proposed by PECO. Similarly, my recommendation differs from what the Commission rejected as part of PECO's DSP II proposal in that my recommendation is not based on a 12-month period over which the reconciliation amount is calculated, but rather over a six-month period. Therefore, my recommendation is not wholly consistent with what the Commission has rejected in past PECO DSP proceedings.

Another reason for the adoption of the six-month amortization period, as explained by Ms. McDevitt, is that the six-month amortization period would maintain the PTC as a market price signal for customers and EGSs. However, the residential default service generation portfolio is assembled with consideration of the balancing of rate stability and market responsiveness with the obligation to provide default service customers with a supply that is least cost over time. It would be most beneficial for the E-Factor rate to be small and stable so as not to distort the price stability built into the default service supply portfolio. Adopting PECO's proposal does not in any way provide

[5] PECO Energy Company Statement No. 2-R, page 4, line 17 through page 5, line 3.

a greater alignment with market conditions since the market conditions are inherently reflected in the portfolio itself, which is competitively procured in the wholesale market. Larger and more variable E-Factor rates do not foster greater reflection of market conditions, but rather work in the opposite direction.

Q. PLEASE RESPOND TO MS. MCDEVITT'S ASSERTION THAT YOU DID NOT PROVIDE ANY ANALYSIS SUPPORTING YOUR CONTENTION THAT THE ANNUAL AMORTIZATION PERIOD WOULD PROVIDE MORE STABLE RATES THAN THE SEMIANNUAL AMORTIZATION.

A. No analysis is required since that result is an arithmetic certainty. Amortizing a given reconciliation dollar amount over 12 months results in a lower E-Factor rate than amortizing the same sum over six months.

Q. DID YOU CHANGE YOUR RECOMMENDATIONS ON THE ADJUSTMENT AND RECONCILIATION OF RESIDENTIAL DEFAULT SERVICE RATES AFTER REVIEWING THE COMPANY'S REBUTTAL TESTIMONY?

A. No. For the reasons I explained above, I continue to recommend that the residential GSA-1 rate and the PTC be adjusted semi-annually. I also continue to recommend that the total reconciliation amount calculated over a six-month period be collected (or disbursed) over a subsequent 12-month period.

III. RESERVE PRICE

Q. PLEASE DESCRIBE THE COMPANY'S RESERVE PRICE PROPOSAL.

A. PECO proposed to implement a reserve price for the residential (but not commercial) FPFR contract solicitations, with the stated intention to "protect customers from paying high prices for FPFR products that could be considered outside of a reasonable market range."[6] The reserve price for a residential FPFR product would be "the average bid

[6] Petition of PECO Energy Company, paragraph 8.

price above which the Independent Evaluator would recommend that the Commission reject the lowest-priced bids that caused the average bid price to exceed the reserve price."[7] The Independent Evaluator would not announce the reserve price for a product to bidders, but the reserve price would be reported to the Commission by the Independent Evaluator along with the RFP results.[8] The Commission would make the final decision on whether to accept the bids or not regardless of the reserve price or the recommendation of the Independent Evaluator. The reserve price would account for the costs and risks of serving the residential FPFR contracts.[9]

Q. PLEASE SUMMARIZE YOUR RECOMMENDATION RELATED TO THE COMPANY'S PROPOSED RESERVE PRICE PROPOSAL.

A. In my Direct Testimony, I concluded that the reserve price proposal cannot be supported based on the information provided (and not provided) by the Company and recommended that the Commission reject PECO's reserve price proposal.[10] I explained that a potential benefit of a reserve price is that, if it is determined accurately and implemented properly, it can serve as an effective tool for mitigating the market power of bidders in an imperfectly competitive bidding process, and for preventing bidders from exercising their unilateral market power or attempting to raise prices through collusion.[11] I also highlighted two potential drawbacks of a reserve price. First, if the reserve price is erroneously (or purposefully) set lower than what would prevail in a competitive bidding process, which in turn should account for the costs and risks of the residential FPFR obligations, residential default service customers would unnecessarily be deprived of the price stability and predictability and risk avoidance benefits of competitively priced

[7] PECO Energy Company Statement No. 1, page 23, lines 8-10.
[8] PECO Energy Company Statement No. 1, page 23, lines 16-20.
[9] PECO Energy Company Statement No. 4, page 14, lines 10-11.
[10] OCA Statement No. 1, page 8, lines 10-11 and 21.
[11] OCA Statement No. 1, page 20, lines 18-22.

FPFR products. Second, if an intervention (such as a reserve price) in the functioning of a bidding process is perceived by market participants as an attempt to distort competitive market conditions or prices, this perception (even if it is not true) can have a detrimental effect on participation[12] Finally, I highlighted the fact that a reserve price can do more harm than good for customers if it is not executed properly, and that the filing lacked clarity which would allow me or the Commission to determine whether the reserve price would be executed properly in the way contemplated by the Company.[13]

Q. HOW DOES MS. ORLANDI RESPOND TO YOUR CONCERNS AND RECOMMENDATION?

A. Ms. Orlandi states that I am implicitly assuming that the reserve prices would be set too low and that the average winning bid price not meeting the reserve price for a residential product would lead to the rejection of such bids, and that both of those assumptions are incorrect.[14] Ms. Orlandi goes on to emphasize that the reserve price proposal was not developed to address concerns relating to market concentration or to protect customers from issues relating to market power of bidders.[15] Ms. Orlandi further claims that the costs and risks associated with supplying full requirements products are well known, and that the available market prices for these components are not a secret.[16] Finally, Ms. Orlandi appears to suggest that additional information on the methodology to calculate reserve prices should not be released to me or to any other party in this proceeding on the basis that there is a danger to providing specific information about the methodology to calculate the reserve prices because this information could affect bidding strategy.[17]

[12] OCA Statement No. 1, page 21, lines 8-22.
[13] OCA Statement No. 1, page 26, lines 8-12.
[14] PECO Energy Company Statement No. 4-R, page 5, lines 10-14.
[15] PECO Energy Company Statement No. 4-R, page 6, lines 11-15.
[16] PECO Energy Company Statement No. 4-R, page 9, lines 13-18.
[17] PECO Energy Company Statement No. 4-R, page 9, line 7 through page 10, line 6.

Q. HOW DO YOU RESPOND TO MS. ORLANDI'S REASONING FOR OPPOSING YOUR RECOMMENDATION?

A. First, while Ms. Orlandi states a few concerns which the reserve price proposal was not developed to address, she does not state which concerns the reserve price proposal was developed to address, either in her Direct Testimony or in her Rebuttal Testimony. As such, the reserve price proposal appears to be a solution to a problem or a concern that either does not exist or is not stated or substantiated in the Company's filing or testimony. Second, Ms. Orlandi states multiple times that I am incorrect to assume that there is a risk that the reserve price could be set too low, but she does not substantiate this claim. Nor does she explain how I, the bidders, the Commission, or any other party can be assured that NERA will determine the reserve price just right each time. Stating the same claim repeatedly without providing any basis or justification for it does not make that statement any more convincing. Third, while the components of FPFR products may be known, available market prices for those components need to be adjusted to account for load profile and load risk uncertainty, and that adjustment would vary from one supplier to another supplier to NERA. If that were not the case, all suppliers would submit identical or near-identical bids. More importantly, even if approximate costs of the components were known, there are no market prices for risks associated with each component or with serving the FPFR contracts. Therefore, there are subjective elements related to the determination of the costs and risks associated with providing FPFR products, and determination of the reserve price is not as straightforward as Ms. Orlandi wants us to believe. Finally, Ms. Orlandi acknowledges that she did not provide any additional information about the methodology to calculate the reserve prices in her Rebuttal Testimony by opposing the provision of that important information to at least the

statutory advocates (such as the OCA), which, as I explained in my Direct Testimony, is critical to understanding and evaluating with the Company's reserve price proposal.

Q. ARE YOU STILL RECOMMENDING THAT THE COMMISSION REJECT PECO'S RESERVE PRICE PROPOSAL?

A. Yes. I expressed certain concerns related to PECO's reserve price proposal in my Direct Testimony. Ms. Orlandi did not provide any additional information or substantial assurances which would mitigate those concerns in her Rebuttal Testimony. Therefore, I continue to recommend that the Commission reject the Company's reserve price proposal.

Q. DO YOU HAVE ANOTHER REASON TO RECOMMEND THAT THE COMMISSION REJECT PECO'S RESERVE PRICE PROPOSAL?

A. Yes, I also have a broader reason to recommend the rejection of the reserve price proposal. The Commission requires that DSP proceedings be conducted periodically (every four years in PECO's case) for a reason. That reason is to allow all interested parties to gather information on the performance of the current DSP, and to review and vet any changes proposed by the Company for the upcoming DSP period. If the Company were to be secretive about certain key elements of the DSP, then stakeholders could not properly review the performance of the existing DSP or vet the changes proposed by the Company for the upcoming DSP. In other words, the entire purpose of conducting these periodic proceedings would be defeated. It is particularly concerning that the Company is non-forthcoming with essential and relevant information even to the statutory advocates (such as the OCA) and even under strict confidentiality provisions. EDCs, such as PECO, should not be permitted a veil of secrecy regarding the processes of fulfillment of their statutory obligation to provide default service. Thus, the Commission should deliver the strong message to PECO and all other jurisdictional

EDCs that attempting to conduct hearings for the statutory procurement of default service under an unreasonable level of secrecy is unacceptable. Therefore, in addition to the other reasons stated above, the Commission should reject the Company's reserve price proposal on the basis that the information provided (and more importantly, not provided) by PECO does not allow the parties to properly understand and vet this specific proposed element.

IV. CONTINGENCY PLAN

Q. PLEASE SUMMARIZE YOUR RECOMMENDATION REGARDING THE COMPANY'S PROPOSED CONTINGENCY PLAN.

A. In my Direct Testimony, in addition to agreeing with the elements of the contingency plan proposed by the Company, I also recommended that PECO be prepared to solicit and acquire standard fixed-quantity (on-peak, off-peak, or around-the-clock) energy blocks within days of procurement shortfall or supplier default.[18] My particular concern is that if the Commission approves PECO's reserve price proposal, then the Company may need to invoke its contingency plans, which in turn would expose residential default service customers to the volatility of the spot market. I explained that if PECO is unable to serve some residential tranches through FPFR contracts due to inability to obtain sufficient supply through its planned procurement or due to supplier default, a block-and-spot approach would be preferable to relying exclusively on spot purchases for that tranche because buying blocks reduces (though not entirely eliminates) exposure to spot market volatility by locking in a price for some portion of the projected energy requirements of that tranche.[19]

[18] OCA Statement No. 1, page 17, lines 17-21.
[19] OCA Statement No. 1, page 18, lines 18-23.

Q. HOW DOES MS. ORLANDI RESPOND TO YOUR RECOMMENDATION?

A. Ms. Orlandi concurs that my proposal would reduce residential rate volatility but expresses certain concerns regarding my proposal, though she does not appear to recommend the rejection of my proposal explicitly. First, she questions the need for my proposal to expand the contingency plan by observing that the contingency plan has been rarely used, and extrapolating the recent history to the future, to claim that she does not see this situation changing for DSP VI, though she does not substantiate the latter part of this assertion.[20] Second, Ms. Orlandi suggests that my proposal would increase costs to residential customers by claiming that she would foresee significant costs to implementing my alternative contingency plan.[21] Third, she posits that my alternative contingency plan may weaken bidders' incentives to submit their best offers in the FPFR solicitations compared to PECO's proposed contingency plan. According to Ms. Orlandi, this could happen because bidders could submit higher bid prices in the FPFR solicitations knowing that if tranches are unfilled, they have an immediate opportunity to win a contract with PECO to supply energy blocks.[22] She refers to this opportunity as having a second bite at the apple.

Q. HOW DO YOU RESPOND TO MS. ORLANDI'S CONCERNS?

A. I respond to each concern in turn. First, blindly extrapolating the recent past to the future could provide false comfort. Just because a contingency did not occur recently does not mean that it cannot happen in the next four years. Further, as I discussed in the previous section, if the Commission adopts the Company's reserve price proposal despite my reasoned objections, the possibility of the contingency plan being invoked increases materially. After all, the reserve price proposal is designed to recommend to the

[20] PECO Energy Company Statement No. 4-R, page 13, lines 12-13.
[21] PECO Energy Company Statement No. 4-R, page 15, lines 8-12.
[22] PECO Energy Company Statement No. 4-R, page 16.

Commission that the Commission reject some winning bids under certain circumstances; otherwise, the Company would not have proposed to add this additional tool to the arsenal which the Commission already has at its disposal.

Second, while I do not disagree that expanding the contingency plan along the lines which I am recommending would entail incremental cost, Ms. Orlandi does not substantiate her claim that those costs would be "significant." Neither does she define what level of cost she would consider "significant." As a witness of the Company, she could easily have obtained an estimate from the Company, determined the rate impact, and used that information to substantiate her assertion. She chose not to do that. Therefore, the Commission should dismiss this concern based on an abstract and unsubstantiated claim of significant cost incurrence.

Third, Ms. Orlandi contradicts herself by stating that bidders could raise their bids and cause the contingency plan to be invoked. In Section II of her Rebuttal Testimony, she states: "There are controls in place, including load caps and required certifications during the qualification process, to protect customers from issues relating to market power of bidders."[23] Ms. Orlandi cannot have it both ways. Bidders either can exercise market power or they cannot. Ms. Orlandi seems to imply that bidders can exercise market power when it comes to the contingency plan issue, but they cannot when it comes to the reserve price issue.

Further, FPFR contracts and energy blocks are very different products with distinct risk profiles, market liquidity for resale, profit margins, and competitiveness. PECO's own witness Mr. Fisher states in his Rebuttal Testimony that "shorter-term forward block energy prices are relatively transparent, with market price quotations

[23] PECO Energy Company Statement No. 4-R, page 6, lines 13-15.

generally available from multiple sources."[24] With such transparent index pricing available, profit margin for shorter-term forward energy blocks would be expected to be small, particularly in a large and liquid market such as PJM Interconnection, LLC. Ms. Orlandi's scenario assumes that an FPFR bidder (which, according to Ms. Orlandi, cannot exercise its market power, if it has any, anyway, because of the controls in place) would raise its bid in an FPFR auction so that the Commission decides to leave some tranches unfilled and cause the contingency plan to be invoked, just so that bidder can sell shorter-term forward energy blocks to PECO under the Company's contingency plan. This highly unlikely scenario, on which Ms. Orlandi's concern relies, should be dismissed by the Commission as unrealistic.

Therefore, Ms. Orlandi's concerns regarding my recommendation to modestly expand PECO's proposed contingency plans should be dismissed and the Commission should adopt my alternative contingency plan.

V. TIME-OF-USE RATES

Q. PLEASE SUMMARIZE YOUR RECOMMENDATION ON THE COMPANY'S TOU RATE PROPOSAL.

A. I made two modest recommendations on this issue in my Direct Testimony, neither of which would necessitate the modification of the Company's proposal for DSP VI. First, I recommended that the Company analyze whether TOU customers saved money by reducing usage during high-price TOU periods, or simply because customers whose typical usage would allow them to save money under the TOU rates switched to the TOU rates. Second, I recommended that PECO consider, for implementation in DSP VII, whether alternative (e.g., seasonally differentiated) TOU periods would incentivize more efficient TOU customer response. PECO would then report its findings in its DSP VII

[24] PECO Energy Company Statement No. 3-R, page 50, lines 14-16.

filing and discuss in its DSP VII TOU rate proposal how the Company took this research into consideration.[25]

Q. HOW DID MR. CALIVA RESPOND TO YOUR RECOMMENDATIONS?

A. Mr. Caliva makes a blanket statement and claims that both Ms. Barbara Alexander's and my recommendations on the Company's TOU rate program proposal should be rejected because, according to Mr. Caliva, the EDC should avoid expending ratepayer money on creating products that can more appropriately and effectively be delivered by the competitive market. He cautions against any efforts here to enhance the PECO TOU rate offering and to instead rely on EGSs in the competitive market to develop the innovative products that are tailored to the needs of a variety of customers.[26]

Q. PLEASE COMMENT ON MR. CALIVA'S RESPONSE TO YOUR RECOMMENDATIONS.

A. As Mr. Caliva also acknowledges, the EDC has a statutory requirement to offer a TOU rate. Mr. Caliva fails to explain how PECO can fulfill this requirement without expending ratepayer money, or what kinds of products PECO can create which cannot be delivered by the competitive market. PECO should strive to create the best TOU rate products it can so that the more than $5 million (mostly residential) ratepayer money it already spent on the TOU program can be leveraged to its fullest extent to meet the Commission's TOU rate program goals. This should entail considering the recommendations in Ms. Alexander's and my respective direct testimonies.

Q. HOW DOES MS. MCDEVITT RESPOND TO YOUR RECOMMENDATIONS?

A. Ms. McDevitt disagrees with my recommendation that the Company should conduct additional analyses. The only argument she seems to put forth for opposing my

[25] OCA Statement No. 1, page 34, lines 5-16.
[26] RESA Statement No. 1-R, pp. 14-15.

recommendation is that the Commission approved the current voluntary TOU default service rates for PECO and the FirstEnergy EDCs without requiring the evaluation that Ms. Alexander and I proposed.[27]

Q. PLEASE COMMENT ON MS. MCDEVITT'S RESPONSE.

A. If the Commission's approval of a DSP element in one DSP proceeding were to be sufficient to preclude the consideration of alternatives in a subsequent DSP proceeding, then it would be unnecessary to conduct periodic DSP proceedings. Since the Commission requires quadrennial DSP proceedings, the Commission does not concur with Ms. McDevitt's reasoning. Additionally, both Ms. Alexander and I opined that the TOU rate program currently in place does not appear to serve the needs of PECO's customers given its low enrollment.[28] Four PECO witnesses filed rebuttal testimony and none of them contested our conclusion. Under these circumstances, PECO's TOU rate program clearly needs additional analysis and consideration.

VI. LONG-TERM ZERO-EMISSION RENEWABLE ENERGY CONTRACTS

Q. PLEASE SUMMARIZE EJA WITNESS MR. KARL R. RABAGO'S PROPOSAL THAT PECO PROCURE LONG-TERM ZERO-EMISSION RENEWABLE ENERGY CONTRACTS AS PART OF THE COMPANY'S RESIDENTIAL DEFAULT SERVICE WHOLESALE SUPPLY PRODUCT MIX.

A. In his Direct Testimony, Mr. Rabago proposed that PECO initiate a Renewable Energy Supply Procurement ("RESP") program which would aim to procure at least seven percent of generation supply for residential customers from 100% zero-emission renewable resources under 10-year PPAs at fixed or reasonably fixed prices. For solar

[27] PECO Energy Company Statement No. 2-R, pp. 7-8.
[28] OCA Statement No. 1, page 33, lines 1-5.

PPAs, Mr. Rabago's proposal for seven percent of residential default service load corresponds to approximately 525 megawatts ("MW") of nameplate capacity. The Company would contract for the energy, AEC, capacity, and ancillary services attributes from the generation resource. Mr. Rabago recommends that PECO build this 525-MW zero-emission renewable portfolio progressively over the term of DSP VI by acquiring 150 MW for commencement of delivery in the second year of DSP VI, 175 MW for commencement of delivery in the third year of DSP VI, and 200 MW for commencement of delivery in the fourth year of DSP VI. Mr. Rabago's proposal entails the inclusion of a bid pricing threshold limit to ensure that PECO is not required to secure zero emission renewables contracts that cause DSP rates to increase above those reasonably expected over the same term.[29]

Q. DID YOU ADDRESS THIS PROPOSAL IN YOUR REBUTTAL TESTIMONY?

A. Yes. I stated in my Rebuttal Testimony that I could support the inclusion of long-term PPAs in the residential default service wholesale supply portfolio due to their price stability benefits for residential customers subject to certain conditions.[30] The most important such condition is that energy delivered under the PPAs be incorporated into the residential portfolio without changing the definition of residential default service load for the purpose of FPFR contracts from what it currently is so that FPFR suppliers do not assume additional risk and the cost of procuring the remaining (approximately 93 percent under Mr. Rabago's proposal) portion of the residential default service product portfolio does not increase owing to wholesale suppliers incurring added risk elements.[31]

[29] Energy Justice Advocates Statement No. 1, page 72, line 20 through page 73, line 17.
[30] OCA Statement No. 1R, page 8, lines 15-19.
[31] OCA Statement No. 1R, page 13, lines 13-19.

Q. HOW DOES MR. FISHER RESPOND TO MR. RABAGO'S LONG-TERM RENEWABLE ENERGY PPA PROPOSAL?

A. Mr. Fisher criticizes Mr. Rabago's analysis and recommendations on multiple grounds. I address two of those in my Surrebuttal Testimony. First, Mr. Fisher disagrees with Mr. Rabago's contention that implementing the proposed RESP would be lower cost for customers because,[32] according to Mr. Fisher, there is strong reason to believe that, all else equal, the price of energy purchased via long-term contracts would be comparable to the price of the same energy purchased via solicitations for shorter-term products.[33] Second, Mr. Fisher criticizes the analysis on which Mr. Rabago relies, which in turn is conducted by the other EJA witness Mr. Ben Kujala, for ignoring the fact that changing the FPFR products solicited to accommodate the proposed long-term solar generation contracts (such that the FPFR product obligation is net of an uncertain and significant amount of energy) as well as the online date uncertainty of these projects would increase the uncertainty that the FPFR product suppliers would bear. According to Mr. Fisher, it is reasonable to assume that the FPFR product suppliers would require additional compensation and incorporate it into their bid prices.[34]

Q. PLEASE COMMENT ON MR. FISHER'S FIRST CRITICISM OF MR. RABAGO'S ANALYSIS YOU DESCRIBEF ABOVE.

A. Mr. Fisher suggests that it would be unrealistic and unreasonable to expect that, over the long term, the price of energy purchased via long-term contracts would be lower than the price of the same energy purchased via solicitations for shorter-term products because traders would arbitrage the difference away until the two prices are comparable. Then, based on the same argument, it must also be true that, over the long term, the price of the

[32] PECO Energy Company Statement No. 3-R, page 22, lines 6-15.
[33] PECO Energy Company Statement No. 3-R, page 23, lines 12-14.
[34] PECO Energy Company Statement No. 3-R, page 35, line 7 through page 36, line 3.

energy purchased via solicitations for shorter-term products cannot be higher than the price of same energy purchased via long-term contracts, since Mr. Fisher expects the two procurement approaches to result in comparable average prices. If the long-term average price of the energy purchased via long-term contracts can be expected to be roughly equal to the long-term average price of the energy purchased via solicitations for shorter-term products, then long-term contracts should be included to some extent in the residential default service supply portfolio because of their price stability benefits. I note that my argument differs from Mr. Rabago's reasoning. Mr. Rabago finds long-term contracts to be preferable over shorter-term contracts because he believes long-term contracts deliver energy at a lower cost than shorter-term contracts do. On the other hand, I find the inclusion of longer-term contracts in the portfolio beneficial for residential customers in terms of price stability as long as they do not raise costs to customers over time in the long term.

Q. PLEASE COMMENT ON MR. FISHER'S SECOND CRITICISM OF MR. RABAGO'S ANALYSIS YOU DESCRIBEF ABOVE.

A. Mr. Fisher states that changing the FPFR products solicited to accommodate the proposed long-term solar generation contracts in the way proposed by Mr. Rabago would raise costs to customers by prompting the FPFR product suppliers to require additional compensation for this assuming this additional risk and incorporate it into their bid prices. This is the same concern I highlighted in my Rebuttal Testimony and I agree with Mr. Fisher's assessment on this issue. As I also stated in my Rebuttal Testimony, if the Commission is inclined to approve the long-term renewable energy PPA proposal of EJA in this proceeding, I recommend that the energy delivered under the PPAs be incorporated into the residential portfolio without changing the definition of residential

default service load for the purpose of FPFR contracts from what it currently is. I proposed two approaches which would accomplish this in my Rebuttal Testimony.[35]

Q. DOES THIS CONCLUDE YOUR SURREBUTTAL TESTIMONY?

A. Yes, it does.

[35] OCA Statement No. 1R, pp. 10-11.

SURREBUTTAL TESTIMONY

OF

BARBARA R. ALEXANDER

Barbara Alexander Consulting LLC

ON BEHALF OF THE

PENNSYLVANIA OFFICE OF CONSUMER ADVOCATE

May 29, 2024

Q. PLEASE STATE YOUR NAME, ADDRESS AND OCCUPATION.

A. My name is Barbara R. Alexander. I am the sole member of Barbara Alexander Consulting LLC. My address is 44 Beech St., Hallowell, ME 04347. I appear in this case as a witness on behalf of the Office of Consumer Advocate (OCA).

Q. HAVE YOU PREVIOUSLY TESTIFIED IN THIS PROCEEDING?

A. Yes. I filed Direct Testimony on behalf of the OCA on April 25, 2024, and Rebuttal Testimony on behalf of the OCA on May 15, 2024.

Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

A. I am submitting Surrebuttal Testimony in response to the Rebuttal Testimony of Ms. Sulma Dalessio[1] and Ms. Megan McDevitt[2] on behalf of PECO Energy Co. (PECO) and Rebuttal Testimony of Mr. Frank Caliva III on behalf of the Retail Energy Supply Association (RESA).[3]

Q. TURNING FIRST TO THE REBUTTAL TESTIMONY OF MS. DALESSIO ON BEHALF OF PECO, WHAT WAS HER RESPONSE TO YOUR RECOMMENDATIONS FOR THE STANDARD OFFER PROGRAM (SOP)?

A. Ms. Dalessio rejects my recommendation that the SOP should be terminated. The basis for her Rebuttal testimony is to quote prior Commission orders and to repeat the history of the implementation of this program. I agree that she has quoted prior Commission decisions on this matter. However, with every passing year and review of this program there continues to be significant issues that warrant its termination as I set forth in my Direct Testimony. It is long past time for a reconsideration of the value of this program to

[1] PECO St. No. 1-R.
[2] PECO St. No. 2-R.
[3] RESA St. No. 1-R.

consumers as opposed to the benefits to the EGS community, as well as a consideration of the proper role of the EDC in acting as a surrogate for participating EGSs that come and go based on their own profit-making considerations. Ms. Dalessio does not respond to any of these considerations in her Rebuttal. Moreover, the fact that this program was approved in the past is not indicative of its ongoing value. PECO has proposed to continue the program and the Commission must evaluate, based on the evidence, whether the program should continue. There is no substantial basis to conclude that it should continue in light of the evidence in this proceeding.

Ms. Dalessio also rejects my recommendation to return residential customers to default service at the end of their 12-month SOP contract, reciting current regulations that govern the EGS ability to renew a customer contract under a negative option notice policy and the Commission's rejection of this same recommendation made by PPL Electric in a prior proceeding. Again, it is entirely appropriate to urge the Commission to review and reform its approach to the implementation of the SOP, should it be allowed to continue, for the reasons I stated in my Direct Testimony.

Ms. Dalessio does not provide any evidence to support her recommendations. She provides no information that relies on any review conducted by PECO of this program and whether PECO should continue to use its name and brand to enlist customers with an EGS in light of the clear evidence that I included in my Direct Testimony that PECO's residential customers are paying higher prices and incurring more adverse collection experiences when enlisted with an EGS compared to default service.

Q. PLEASE RESPOND TO MS. MCDEVITT'S REBUTTAL TESTIMONY CONCERNING YOUR RECOMMENDATIONS FOR THE TIME OF USE RATE PROGRAM.

A. Ms. McDevitt rejects my recommendation to evaluate other potentially more effective and consumer friendly incentive rate programs on the basis that the Commission has approved PECO's TOU rate program. Her Rebuttal testimony does not respond to the evidence that I presented in my Direct Testimony concerning the low participation rate and lack of any system-wide benefits with the current TOU rate option. It is not reasonable to continue to expend ratepayer funds for a program that is clearly not achieving the intended benefits of the reliance on a traditional TOU rate option without recognizing that it is time to reconsider that approach and evaluate and propose alternative approaches in the next DSP.

Q. DOES MS. MCDEVITT RESPOND TO THE PROPOSAL THAT PECO EVALUATE INCENTIVE RATE OPTIONS?

A. The rejection of even consideration of alternative demand response or incentive programs is based on Ms. McDevitt's erroneous conclusion. She states, "PECO does not believe it is appropriate to consider offering peak time rebates in addition to or in lieu of its TOU rates until the Commission determines that a rebate may be incorporated in a TOU rate for purposes of Section 2807(f)(5)."[4] There is no prohibition in any statute she has cited that would prevent PECO from evaluating and potentially designing an incentive type program in addition to the statutory obligation to offer a TOU rate option. It is unfortunate that the statute only mentions an obligation to offer a TOU rate option and it is reasonable for the Commission to consider this obligation as having been met but also to conclude that

[4] PECO St. No. 2-R, page 8, lines 15-18.

alternative approaches should be evaluated and potentially implemented to achieve a higher degree of customer interest and results.

Q. TURNING TO MR. CALIVA'S REBUTTAL TESTIMONY ON BEHALF OF RESA, DOES HE PROVIDE ANY EVIDENCE TO SUPPORT HIS REJECTION OF YOUR FINDINGS AND RECOMMENDATIONS CONCERNING THE SOP AND PECO'S BILLING DISCLOSURES?

Q. No. Mr. Caliva's Rebuttal Testimony, like his Direct, continues to rely on unsubstantiated claims of benefits associated with the retail energy market and to recommend proposals that conflict with the statutory and regulatory policies governing default service in Pennsylvania. I will not repeat my Rebuttal Testimony regarding the legislative and regulatory policies that govern default service procurement policy, bill presentation, and pricing comparisons based on the PTC.

Q. PLEASE RESPOND TO MR. CALIVA'S CLAIM OF "SPURIOUS PRICE COMPARISONS."

A. Mr. Caliva characterizes the summary of PECO's actual billing data for EGSs compared with the applicable PTC as presented in my and CAUSE-PA's testimony as "spurious price comparisons." The term "spurious" means, "false," or "of a deceitful nature or quality."[5] When asked to provide any evidence of the "spurious" nature of the PECO billing data, Mr. Caliva admits he did not conduct any fact check of this billing data, but argues about whether it is dispositive to the conclusions I reached concerning this data. I attach RESA Response to OCA-I-8 as Exhibit BA-4. The data presented in my testimony was derived from PECO's own billing data on behalf of EGSs. There is nothing spurious about it as it

[5] https://www.merriam-webster.com/dictionary/spurious#:~:text=a,spurious%20excuses

presents a plain comparison between what customers were billed on their supplier rate versus what they would have been billed on the applicable default service rate. Merely because Mr. Caliva doesn't like the evidence about higher prices charged by EGSs and the resulting impact on higher collection costs imposed on PECO's ratepayers is not a sufficient reason to suggest that there is any question about the validity of the data. Mr. Caliva offers no evidence to support this claim and his testimony and recommendations should be rejected primarily for this improper and unsupported characterization.

Q. DID MR. CALIVA PROVIDE ANY BILLING DATA IN HIS REBUTTAL TESTIMONY?

A. No. Mr. Caliva's attempt to denigrate the actual billing data from PECO's billing system by presenting EGS prepared summaries of current monthly offers by EGSs to Pennsylvania customers is a comparison of advertised prices versus actual prices charged under the current EGS contracts in effect for PECO's residential customers. Mr. Caliva's attempt to rely on advertised prices is not persuasive. He doesn't provide any information on how many customers enrolled with these offers or provide any facts about what specific rates or prices were charged by the supplier over the term of the customer's enrollment with the supplier.

Q. PLEASE RESPOND TO MR. CALIVA'S DISCUSSION OF THE BARRIERS HE CLAIMS EXIST FOR SUPPLIERS TO COMPETE WITH DEFAULT SERVICE.

A. Mr. Caliva's identification of what he considers barriers to retail suppliers compared to the implementation of default service fails to acknowledge and account for the most important facts that belie his conclusions:

- Suppliers purchase generation supply service from the PJM wholesale market, the

very same market in which the EDCs solicit bids for default service;

- The winning bidders for default service have included their acquisition costs and profits in their bids so that the fact that the EDC does not make a profit on providing default service is not relevant;
- Retail suppliers are subsidized in their marketing and enrollment costs by participating in the Standard Offer Program;
- Suppliers are subsidized in their billing and collection costs by selling their receivables to the EDCs;
- Once the EDC purchases the EGS receivables, the EDC and its ratepayers bear the risks and costs in collecting the unregulated EGS charges; and
- Default service contracts reflect "competitive market prices" for the contract terms for which bids are solicited.

Q. MR. CALIVA ASSERTS THAT DEFAULT SERVICE "DIVORCE[S] THE END USE RATE FROM MARKET REFLECTIVE PRICING IMPACTING THE PRICING OF COMPETITIVE PRODUCTS."[6] DO YOU AGREE?

A. No. Default service contracts are awarded based on competitive bids for contracts that are purchased in the same wholesale market in which the EGSs purchase the electrons they propose to resell to Pennsylvania customers. The winning bids reflect a competitive market price for those contract terms. Mr. Caliva apparently believes that only short-term market prices are the only market prices that he considers legitimate, which is of course a reflection of his failure to understand that the market in question offers generation supply to many buyers based on a variety of contract terms because that is what buyers in this market want.

[6] RESA ST. NO. 1-R, Page 2, Lines 19-20.

The market reflects what consumers want, whether residential, commercial, or industrial customers. Default service contract terms are what consumers want and what the law requires the Commission and the EDCs to provide—a stable and fixed price product that reduces pricing volatility. Mr. Caliva opposes the law and policy in Pennsylvania governing the design and pricing for default service for residential customers[7], but that policy view does not justify any of his complaints about PECO's default service billing disclosures or resulting default service prices. Those contracts are no less competitive than the advertised offers made by EGSs to consumers. The failure of EGSs to compete with default service is a matter entirely within their control to offer and consistently bill stable and fixed price service that eliminates pricing volatility. To the extent that consumers want or choose to buy more volatile pricing options, the EGS is also able to offer those options.

Q. WHEN ASKED TO CONFIRM THE SUBSIDY ASSOCIATED WITH THE POR PROGRAM, MR. CALIVA STATES THAT THE COMMISSION HAS NOT APPROVED A MEANS FOR EGSs TO TERMINATE SERVICE FOR NONPAYMENT. DO YOU AGREE?

A. No. I attach RESA's Response to OCA-I-19 as Exhibit BA-5 in which he claims that the Commission has not approved the ability of the EGS to terminate service and so his clients have to rely on the POR program for this purpose. Mr. Caliva appears not to understand that in the competitive market that he seeks to implement merchants must collect their unpaid bills by means other than preventing the consumer from doing business with other

[7] In RESA's Response to OCA-I-13, Mr. Caliva makes clear that he opposes the Commission's default service procurement policies and orders, "In Mr. Caliva's opinion, at a minimum, a truly competitive market eliminates this inherent competitive advantage of monopoly utilities." Once again, Mr. Caliva appears to incorrectly characterize default service as a product of "monopoly utilities," as opposed to acknowledging that default service is a product of the same wholesale market in which his clients purchase electrons to resell to customers.

merchants. EGSs can "terminate service," by terminating the contract and seeking to collect unpaid debt with the same legal options available to other competitive businesses. EGSs can also conduct credit checks and serve customers with good credit history. Mr. Caliva apparently wants to be treated as a "utility" whose rates and terms of service are regulated and for which there is no alternative available to customers. He can't have it both ways.

Q. WHAT OPTIONS DO RETAIL SUPPLIERS CURRENTLY HAVE TO EXPLAIN THEIR PRODUCTS AND SERVICES?

A. While EGSs routinely take advantage of the significant subsidy associated with the POR program, suppliers can include text on the PECO bill to explain their product or differentiate it from the PTC.[8] Furthermore, suppliers can design contracts that require the customer as a condition of accepting the contract to receive a separate bill from the EGS for the EGS's services, including not only generation supply but other "non-basic" services that reflect Mr. Caliva's statements about the desire of EGSs to offer products and services other than or in addition to generation supply service, thus allowing the supplier to directly communicate and engage with the customer for billing and collection as well as marketing purposes. Furthermore, there is nothing preventing an EGS from sending mail, texts, email or otherwise communicating with their customer, after receiving appropriate consent from the customer, at any time during the course of their agreement.

Q. DOES THIS COMPLETE YOUR TESTIMONY AT THIS TIME?

A. Yes.

[8] As explained by Ms. Dalessio at PECO St. No. 2-R, page 26, lines 21-23 and page 27, lines 1-3.

**Response of the Retail Energy Supply Association ("RESA")
to the Interrogatories of the Office of Consumer Advocate ("OCA"). Set I in
Docket No. P-2024-3046008**

Request: OCA-I-8: Does Mr. Caliva have any evidence that the prices charged by suppliers reflected in Ms. Alexander's testimony derived from PECO's billing system are not correct or accurate? If so, please provide such evidence. If not, please confirm that under the Purchase of Receivables program, the EGS charges billed by PECO and included in her testimony are accurate.

Response: Mr. Caliva has not fact checked the information provided in Ms. Alexander's testimony but has addressed his concerns regarding the basis for her data and the conclusions she draws from it in his Rebuttal Testimony at 3-19.

Response provided by: Frank Caliva,
President P.R. Quinlan Associates, Inc.
RESA National Spokesperson

Date Response provided: May 28, 2024

**Response of the Retail Energy Supply Association ("RESA")
to the Interrogatories of the Office of Consumer Advocate ("OCA"). Set I in
Docket No. P-2024-3046008**

Request: OCA-I-19: Please identify Mr. Caliva's opinion and knowledge of the value of the Purchase of Receivables (POR) program to RESA's members in billing and collecting their charges from customers. In your response compare the costs of the POR program with the typical costs that an EGS would incur to issue bills and collect charges for its customers without POR.

Response: The Commission has approved the current form and program requirements of the Purchase of Receivables program which recognize that: (1) EGSs must place all residential customers into the POR program in order to have their charges appear on the EDC's consolidated bill; (2) if EGSs elect not to use the EDC's consolidated bill, there is no Commission approved process in place for the EGSs to terminate service for non-payment; (3) the Commission does not permit EGSs to issue a consolidated bill to customers with the utility's charges included. Mr. Caliva understands that the Commission recognized the need for the POR program to permit a realistic opportunity for EGSs to offer service to residential and mass market customers given the lack of ability to terminate service for non-payment and to issue supplier consolidated bills. RESA does not collect information about the "typical costs" incurred by EGSs nor would he expect such information to be available as EGSs are not permitted to issue supplier consolidated bills nor to pursue termination of service for non-payment.

Direct Testimony of

MARK D. EWEN

On Behalf of the

Pennsylvania Office of Small Business Advocate (OSBA)

Date Served: April 25, 2024

Date Submitted for the Record: _____

DIRECT TESTIMONY OF MARK D. EWEN

Q. Mr. Ewen, please state your name and briefly describe your qualifications.

A. My name is Mark D. Ewen. I am a Principal and President of Industrial Economics, Incorporated ("IEc"), a consultancy of 165 professionals headquartered at 2067 Massachusetts Avenue, Cambridge, MA 02140. My consulting practice focuses on regulatory and environmental economics, expert case management and economic damages estimation in a variety of litigation contexts, and financial analysis. I obtained a B.A degree in Economics and Political Science from the University of North Dakota, and a Master of Public Policy degree from the University of Michigan. I have participated and provided testimony in a variety of proceedings before the PA Public Utilities Commission, including electric and gas base rates cases, 1307(f) purchased gas cost filings; energy efficiency and conservation cases, merger and acquisition cases, and default service provider ("DSP") petitions. My résumé and a listing of the expert testimony that I have filed in various litigation and utility regulatory proceedings are attached in Exhibit IEc-1.

Q. Please describe your assignment in this matter.

A. OSBA requested that I review the petition of PECO Energy Company ("PECO" or "the Company") for approval of its DSP for the period from June 1 2025 through May 31, 2029 ("DSP VI Petition"), to determine whether the proposal is consistent with sound economics and regulatory policy, and fairly treats small business customers.

Q. Please provide an overview of the salient features of the Company's proposed DSP VI.

A. In its petition and accompanying testimony, PECO seeks to generally maintain the structure and features of the current DSP V. The Company further proposes four material changes to the default service program and related products: (1) double the amount of solar AECs procured through 10-year purchase agreements during the DSP VI term; (2) incorporate into the Supplier Master Agreement ("SMA") a capacity proxy price (CPP) mechanism, applicable in the event the PJM Interconnection does not conduct its Base Residual Auction in timely fashion; (3) implement a reserve price for FPFR contracts; and (4) increase the limit on the amount of default supply that a bidder can secure for the Large C&I procurement class.

Q. Q. Please generally describe your approach to reviewing PECO's DSP petition.

A. Important considerations in the review of a DSP plan include the following:

- Shopping history and stability of shopping rates. This component includes the assessment of trends in default service usage among customer classes and movement between the default provider and electric generation suppliers ("EGSs"). In particular, when shopping rates vary over time, more risk is associated with longer-term procurements of electricity supply. Currently, 52 percent of PECO total customer load is being served by EGSs, including 22 percent of residential load, 50 percent of small commercial load, and 93 percent of consolidated large commercial and industrial load (PECO St. No. 3, p. 31)

- Alternative approaches to electricity supply procurement. Except in unusual circumstances, distribution entities in Pennsylvania employ fixed price, full requirements (FPFR) contracts for residential and small commercial customers. PECO proposes to continue with the approach employed in DSP V, namely procuring nearly 100 percent of supply for these two classes using FPFR vehicles. The Consolidated Large Commercial and Industrial procurement class supply would be procured with 100 percent spot price, full requirements, products, given the large percentage of those customers who shop (PECO St. No. 3, p. 33).

- Procurement approach by rate class group. The DSP VI proposes to maintain the same procurement groups as those used under the prior plan. These include: Residential customers; Small Commercial customers with up to and including 100kW of annual peak demand and lighting customers; and consolidated Large C&I customers whose annual peak demand is greater than 100 kW (PECO St. No. 1, p. 10). Procurement approaches, including contract types, purchase timing, and layering and laddering of supply contracts, endeavor to accommodate the varying electricity usage and shopping behavior across these groupings.

- Timing, layering, and laddering of procurements. For this component, more temporal diversity (and more frequent procurements) along with aligning procurements close to when supply begins to flow tempers the risk of default prices varying significantly

relative to market prices. Purchasing strategies should endeavor to optimize price stability. With longer-term purchasing strategies, overlapping contract periods generally reduce the magnitude of rate changes as individual contracts turn over. The trade-off with respect to higher procurement frequency is higher administrative costs.

For DSP VI, the Company proposes to continue the same procurement approach as implemented under DSP V. For the Residential and Small Commercial procurement classes, FPFR products are to be procured approximately two months prior to delivery of energy. These procurements also include a layered blend of one-year and two-year FPFR products, which are laddered across a number of tranches throughout the procurement cycle (PECO Ex. SD-1). For the Large C&I class, spot priced products would be procured annually in March for delivery starting June 1 of each year (St. No. 1, p. 16-18).

- Frequency of rate changes. Under DSP VI. the Company proposes to continue to project the cost of generation supply for Residential and Small Commercial classes on a quarterly basis, and then reconcile over- or under-collections for default rates on a semi-annual basis (PECO St. No. 2, p. 8).

- Time of use (TOU) rates. Under DSP V, and proposed to continue under DSP VI, the Company's optional TOU rate is available to all Residential and Small Commercial default service customers with smart meters (virtual net metered customers and customer assistance program (CAP) customers are excluded). Default service energy prices for TOU customers vary by three periods each day (peak, super off-peak, and off-peak), with no seasonal variation. Prices for each period vary by each procurement class.

  Only 12 Small Commercial default service customers were enrolled in this option as of May 2023 (PECO St. No. 2, p. 10). However, it is important that TOU rates are designed to be revenue neutral with respect to regular default service rates, and that TOU supply is included in the contracts used to supply non-TOU customers.

- Performance of electric generation suppliers ("EGSs"). PECO represents that 98 EGSs currently serve customers in its service territory (PECO St. No. 3, p. 31). Of relevance

to the DSP, it is important to consider how the DSP structures its standard offer referral program to EGSs, treatment of customers when a plan term with an EGS ends, and CAP customer participation in the standard offer program. The Company generally proposes to maintain the structure of its standard offer program for shopping customers.

- Procurement of alternative energy credits (AECs). To comply with the Alternative Energy Portfolio Standards Act ("AEPS"), DSPs must procure a certain proportion of supply from alternative energy sources. The structure and implementation of the DSP must comply with alternative energy targets and ensure that the EDC is not benefiting from any competitive advantage relative to EGSs. In PECO's case, compliance is facilitated by requiring that default service suppliers transfer AECs to PECO such that most of the Company's AEPS obligations are satisfied. In addition, the Company is proposing to separately procure of portion of its solar AEPS requirements (PECO St. No. 1, p. 26).

- Treatment of transmission costs. PECO recovers Network Integration Transmission Service (NITS) and other transmission costs (together, the Transmission Service charge, or TSC) for transmission service that the Company procures on behalf of default service customers. The Company proposes to continue this approach in the current DSP.

Q. Do have any concerns regarding the proposed DSP VI?

A. In the prior proceeding for DSP V, the Commission approved the terms by which administrative costs incurred to implement PECO's TOU rate options were allocated among residential and small commercial procurement classes. Specifically, 70 percent of these costs were to be allocated based on the total number of residential and small commercial default service customers, with the remaining 30 percent to be allocated based on the default service kWh consumed by these respective classes.[1] This approach is in contrast to the Company's original proposal for DSP V, which was to allocate administrative costs entirely on a kWh basis.

Q. What is your recommendation for addressing this concern?

[1] See Docket No. P-2020-3019290, DSP V Settlement.

A. The allocation approach using 70/30 weighting between customer count and kWh usage should be continued as part of DSP VI, which appears consistent with the Company's proposal.

Q. Do have any other concerns regarding the proposed DSP VI?

A. At this time, I have no specific concerns based upon my review of the aforementioned list of general considerations and review of the four primary changes to the plan. However, I reserve the right to address additional specific issues should they arise through my review of forthcoming intervening party testimony, Company testimony, and related discovery.

Q. Does this conclude your direct testimony?

A. Yes, it does.

EXHIBIT IEc-1

RÉSUMÉ AND EXPERT TESTIMONY LIST

FOR

MARK D. EWEN

IEc

MARK D. EWEN **PRINCIPAL AND PRESIDENT**

Overview

Mr. Ewen has a strong background in applied economics, empirical methodologies, and financial analysis. As a Principal at Industrial Economics, Incorporated (IEc), he focuses on expert case management and economic damages estimation in a variety of litigation contexts, regulatory and environmental economics, and financial analysis. Within his areas of expertise, Mr. Ewen has been qualified as an expert witness before judicial and regulatory bodies (see schedule of testimony and appearances). He has also served as a Managing Director of the firm.

Education

Master of Public Policy, University of Michigan

Bachelor of Arts, summa cum laude in Economics and Political Science, University of North Dakota

Project Experience

Examples of his project work include the following:

Mr. Ewen has participated in various proceedings concerning energy markets and regulated utilities. These efforts, which focus on issues related to cost allocation and rate design, include working on behalf of industry and consumer intervenor groups in rate-making cases before the public utility commissions in Pennsylvania and Alberta, Canada, and the U.S. Postal Rate Commission. For example, for the **PENNSYLVANIA OFFICE OF SMALL BUSINESS ADVOCATE**, he has provided consulting and analytic support relating to electricity and natural gas tariff design, revenue requirements, and other regulatory initiatives concerning electrical and natural gas distribution utilities. For the **RHODE ISLAND ATTORNEY GENERAL,** Mr. Ewen conducted a due diligence review of PPL's proposed acquisition of Narragansett Electric Company and its potential impacts on the state's ratepayers.

For the **NEW YORK STATE ENERGY RESEARCH AND DEVELOPMENT AUTHORITY (NYSERDA) AND DEPARTMENT OF PUBLIC SERVICE (DPS)**, Mr. Ewen provided expert services assessing the economic impacts to municipal governments of extended electricity outages related to Tropical Storm Isaias. As part of this work, he constructed a model to estimate various costs of incremental staffing requirements for over 500 localities, including excess overtime, surge time (i.e., bringing on extra staff for outage response coordination and logistics), and idle time (e.g., crews waiting extended periods for downed lines to be de-energized). The review also included consideration of other direct costs, including, among others: effects to water systems; delivery of bottled water; operation of generators; and other constraints on the provision of essential governmental services. The litigation was settled to the satisfaction of the involved parties.

For the **NYSERDA AND NEW YORK DPS,** Mr. Ewen directed the development of a Generic Environmental Impact Statement (GEIS), pursuant to the requirement of the State Environmental Quality Review Act (SEQRA) that assessed the environmental and economic impacts of the "Reforming the Energy Vision" and "Clean Energy

Fund" initiatives within the state. He also directed the preparation of a Supplemental EIS to assess the environmental and economic impacts of the newly proposed Clean Energy Standard (CES). The CES is being developed to support the state's goal of supplying 50 percent of electricity demand with renewable generation resources by the year 2030. More recently, he directed the development of a model to assess the financial viability of various waste-to-energy technologies, and related social welfare benefits. This model uses detailed capital budgeting scenarios for specific facilities to generate forecast scenarios.

For the **U.S. DEPARTMENT OF THE INTERIOR, BUREAU OF OCEAN ENERGY MANAGEMENT (BOEM)**, directing an assessment of the Bureau's approach to calculating and presenting the operating fee included in offshore wind leases under BOEM's jurisdiction. As part of this engagement, IEc provided a number of recommendations for simplifying the implementation of the operating fee formula and identified available data sources and approaches to estimating individual components of the fee formula. The review also addressed the structure and levels of fees associated with operations of renewable wind energy projects in the U.S. and worldwide. More recently, IEc has been supporting the development of Standard Operating Procedures for the fee calculation and lease management process. The overall goal is to provide information resources and a methodological approach that will allow lessees to derive accurate data for fee equation variables efficiently and consistently, and for BOEM to present the fee calculation clearly in the lease.

For **NYSERDA,** conducting a market analysis examining the potential economic development opportunities that could accrue in New York from hydrogen playing a role in achieving components of its Climate Leadership and Community Protection Act.

For the **U.S. DEPARTMENT OF THE INTERIOR, BUREAU OF OCEAN ENERGY MANAGEMENT**, managed the development of a model to assess the economic and fiscal impacts of offshore oil and gas activity in the Gulf of Mexico and other BOEM OCS regions. This model, the Lifecycle Impacts Model (LCIM), assesses the economic and fiscal impacts associated with a specific lease or group of leases, over the time horizon of the lease(s). IEc's framework for the model was to build a capital budgeting forecasting tool for lease development, yielding estimates of industry expenditures, OCS revenues, industry profits, and employment impacts for a single lease or a set of leases. A key component of model development was to dynamically simulate the complex and unique timing parameters of lease development, incorporating the influence of critical exogenous factors like market prices and lease geology.

For the **U.S. COAST GUARD, NATIONAL POLLUTION FUNDS CENTER**, Mr. Ewen provides ongoing support to the NPFC in adjudicating damages claims resulting from oil spills. These claims include damages for business interruption, lost profits, property damage or value diminution, increased costs, and lost wages or employment, among other categories. Cases have also included damages for contract delays to construction projects and shipping demurrage. Industry sectors that Mr. Ewen has evaluated include: *electricity generation (nuclear and coal); railroads; cruise ships; oil ship transport; lodging and tourism; food and beverage; gambling; fisheries; marinas; real estate development, oil and gas development; and oil refining.*

Mr. Ewen's analytic work includes expert financial analysis and economic damages estimation in the context of general litigation and environmental enforcement actions. These efforts include assessing damages in breach of contract, nuisance, and cost recovery actions, and assessing the financial capabilities and economic benefit of noncompliance of firms accused of environmental violations. Clients in this area of his practice include the **U.S. DEPARTMENT OF JUSTICE**, **U.S. COAST GUARD**, **U.S. ENVIRONMENTAL PROTECTION AGENCY, STATES,** and private parties.

Testimony and Appearances

Mr. Ewen has provided testimony or appeared in the following cases and regulatory proceedings.

On behalf of Pennsylvania's Office of Small Business Advocate, submitting testimony before the Pennsylvania Public Utility Commission, concerning recovery of purchased gas costs and revenue sharing for National Fuel Gas Distribution Corporation (Docket No R-2024-3045177, March 2024).

On behalf of Pennsylvania's Office of Small Business Advocate, submitting testimony before the Pennsylvania Public Utility Commission, concerning the Default Service Plan for Pike County Light and Power Company (Docket No. P-2023-3039927, July 2023).

On behalf of Pennsylvania's Office of Small Business Advocate, submitting testimony before the Pennsylvania Public Utility Commission, concerning cost allocation, revenue allocation, and rate design in the base rates case for Columbia Gas of Pennsylvania (Docket No. R-2022-3031211, June 2022).

On behalf of Attorney General of the State of Rhode Island, submitted testimony before the Rhode Island Division of Public Utilities and Carriers concerning due diligence and related reviews of PPL Corporation's proposed acquisition of Narragansett Electric Company from National Grid USA (Docket No. D-21-09, November 2021).

Expert report and deposition testimony concerning economic damages and related financial matters, *Seaplane Adventures, LLC, vs. County of Marin, California*; expert report filed September 2021, deposition testimony given September 2021.

Expert reports and deposition testimony on bankruptcy reorganization plan feasibility and related financial matters, *in re: First Energy Solutions Corp., et al., Debtors, Case No. 18-50757*; expert reports filed July 2019, deposition testimony given August 9, 2019.

Expert declaration concerning economic damages and related financial matters, *in re: Outer Banks Power Outage Litigation, all actions, No. 4:17-CV-141-D*, March 2018.

Expert report and deposition testimony on Economic Damages in *State of Alaska v. Williams Alaska Petroleum, Inc., et al.*, *Case No. 4FA-14-01544 CI;* expert report filed December 2016, deposition testimony given February 15, 2017.

Expert reports and deposition testimony on Economic Benefit in *Sierra Club v. Energy Future Holdings Corp. et al.*, *Case No. 5:10-cv-156 (E.D. Tex.)* and *Sierra Club v. Energy Future Holdings Corp. et al.*, *Case No. 6:12-cv-108 (W.D. Tex.)*; expert reports filed in June and July 2013, deposition testimony given August 2013. Trial testimony given in Case No. *6:12-cv-108 (W.D. Tex.) in March 2014*.

Expert testimony on ability-to-pay provided, in the matter of Mercury Vapor Processing Technologies, Inc., et al. (No. RCRA-05-2010-0015), July 2011.

Expert Declaration in a patent case concerning economic and financial matters in the context of environmental credits valuation -- In re Patent Application of: Jeff Andrilenas et al., Application No.: 12/328,219, For: VALUING ENVIRONMENTAL CREDITS, submitted June 2011.

Export report and deposition testimony on financial matters in Evansville Greenway and Remediation Trust v. Southern Indiana Gas and Electric Company, Inc., et al. (03:07-cv-0066-SEB-WGH); expert report filed July 2009, deposition testimony given January 2010.

Expert testimony on ability-to-pay provided, in the matter of Robert J. Heser, Andrew J. Heser, and Heser Farms (No. CWA-05-2006-0002), May 2007.

On behalf of Pennsylvania's Office of Small Business Advocate, submitting testimony before the Pennsylvania Public Utility Commission, concerning tariff design issues for Columbia Gas of Pennsylvania (Docket No. R-00049783, May 2005).

On behalf of Pennsylvania's Office of Small Business Advocate, submitting testimony before the Pennsylvania Public Utility Commission, concerning cost allocation, revenue assignment, and rate design for Pennsylvania Power and Light (Docket No. R-00049255, August 2004).

Expert report on economic damages in United States v. Southern California Edison No. CIV. F-01-5167 OWW DLB (E.D. Cal)., July 2004; deposition testimony provided September 2004.

Expert testimony on ability-to-pay provided in U.S. v. Peter Thorson, Managed Investments, Inc., Construction Management, Inc., and Gerke Excavating, Inc. (No. 03-C-0074), May 2004.

Expert testimony on ability-to-pay provided in U.S. v. Paul A. Heinrich and Charles Vogel Enterprises, Inc. (No. 03-C-0075-S), October 2003.

Expert testimony on ability-to-pay provided in the matter of Dearborn Refining Company (No. RCRA-05-2001-0019), February 2003.

On behalf of Pennsylvania's Office of Small Business Advocate, submitting testimony before the Pennsylvania Public Utility Commission, concerning recovery of purchased gas costs and revenue sharing for PFG Gas and Northern Penn Gas (Docket No. R-00027389, July 2002).

Expert report and testimony on economic damages in Carol Marmo et al. v. IBP, Inc.; expert report filed March 2002, deposition testimony given June 2002, September 2004, and testimony at trial given February 2005.

On behalf of Pennsylvania's Office of Small Business Advocate, submitting testimony before the Pennsylvania Public Utility Commission, concerning recovery of purchased gas costs and revenue sharing for National Fuel Gas Distribution Corporation (Docket No. R-00016789, March 2002).

On behalf of the Office of the Consumer Advocate, providing testimony before the United States Postal Rate Commission regarding cost allocation of city carrier street time costs. Docket No. R2000-1, July 11, 2000.

Expert report and declaration on ability-to-pay in re Indspec Chemical Corporation and Associated Thermal Services, Inc., and related testimony in U.S. EPA administrative court on February 24, 1998 (No. CAA-III-086).

Expert report on ability-to-pay in re Harrisburg Hospital and First Capital Insulation, Inc. and related testimony in U.S. EPA administrative court on October 8, 1997 (No. CAA-III-076).

Re: Petition of PECO Energy Company for Approval of Its Default Service Plan for the Period from June 1, 2025 through May 31, 2029 ("DSP VI Petition") / Docket Number: P-2024-3046008

Dear Judge Vero and Judge Ashton:

Enclosed please find the Rebuttal Testimony of Mark D. Ewen, labelled **OSBA Statement No. 1-R,** on behalf of the Office of Small Business Advocate ("OSBA"), in the above-captioned proceeding.

Copies will be served on all known parties in this proceeding, as indicated on the attached Certificate of Service.

If you have any questions, please do not hesitate to contact me.

Sincerely,

/s/ Rebecca Lyttle

Rebuttal Testimony of

MARK D. EWEN

On Behalf of the

Commonwealth of Pennsylvania

Office of Small Business Advocate ("OSBA")

Date Served: May 15, 2024

Date Submitted for the Record: _____

REBUTTAL TESTIMONY OF MARK D. EWEN

Q. Mr. Ewen, please state your name and briefly describe your qualifications.

A. My name is Mark D. Ewen. I submitted direct testimony earlier in this proceeding, and my qualifications were detailed therein.

Q. Please state the purpose of this rebuttal testimony.

A. This rebuttal testimony responds to certain portions of the direct testimony submitted by the following witness:

> Karl Rábago representing the Energy Justice Advocates ("EJA"), with respect to procurement of zero emission renewable energy for default supply customers.

Q. Please summarize Witness Rábago's proposal.

A. The proposal recommends the Commission direct PECO to alter its proposed default supply procurement plans to ultimately secure seven percent of its required generation supply from zero emission renewables under long-term purchase power agreements ("PPAs") by the end of the proposed DSP VI term through a "Renewable Energy Supply Procurement" program (EJA St. No. 1, p.6).

Q. Do you have any concerns with this proposal?

A. My main concern is that the testimony is unclear whether the seven percent target only applies to default service supply for residential customers or includes supply for all default customers. For example, page six of the testimony states: "PECO should use the first year of DSP VI to develop a solicitation process aimed at securing seven percent of its *required DSP generation supply* (emphasis added) from zero emission renewables…." Later, at pages 72-73, the text reads: "…I recommend that the Commission grant the Company approval to take action to secure at least 7% of generation supply for *residential customers* (emphasis added) from 100% zero-emission renewable resources…." The testimony appears inconsistent concerning to which customer classes the proposal applies.

Q. What is your recommendation for addressing this concern?

A. First, the apparent inconsistency should be clarified. I surmise, however, that the proposal is meant to apply to only residential customers. If this is the case, I offer no opinion concerning the overall appropriateness or efficacy of the proposal, at this time. If the witness indeed intends for the proposal to cover all default supply, I recommend that consideration of the proposal focus exclusively on its application to the residential class of customers.

Q. Why do you make this recommendation?

A. For two reasons. First, the procurement program represents a material departure from past and proposed practice. In this circumstance, it strikes me as more prudent to focus on one customer class, particularly the residential class where current shopping rates are both relatively stable and relatively low (at approximately 22 percent of residential load).

Second, procuring any type of default supply under long-term contracts presents materially higher risks when it involves classes with a higher shopping propensity. As noted in my direct testimony, 50 percent of small commercial load and 93 percent of large commercial and industrial load are being served by EGSs. As a group, these entities have greater resources to assess and track supplier alternatives, secure the supply product that is to their liking (including considerations like price, service, and the mix of generation sources, including available renewable resources), and switch suppliers as market circumstances change.

In the event the pricing dynamics under long term contracts for default supply turn unfavorable, commercial customers are most certainly going to shop, potentially creating a cascade effect. For example, in the case where the long-term contracts contribute to out-of-market high prices for electricity, existing default customers would be incentivized to seek alternative suppliers. In turn, the higher-priced renewables would be spread over fewer kilowatt hours, further increasing the price, and further encouraging shopping. Such an outcome leaves remaining default service customers holding the proverbial bag.[1]

[1] Note that the scenarios cited by Witness Rábago contemplate the potential for higher and lower costs relative to the baseline under the zero emissions procurement strategy (EJA St. No. 1, p. 51).

Q. What is your final conclusion given these considerations?

A. To the extent the procurement strategy for zero emissions renewables proffered by Witness Rábago is contemplated in this proceeding, it should be applicable only to residential customers.

Q. Does this conclude your rebuttal testimony?

A. Yes, it does.

APPENDIX A: Resume of Elizabeth R. Marx

APPENDIX B: Discovery Responses

I. WITNESS BACKGROUND

Q. Please state your name, occupation, and business address.

A. Elizabeth R. Marx. I am an attorney, and currently serve as Executive Director of the Pennsylvania Utility Law Project, with offices at 118 Locust Street, Harrisburg, PA 17101.

Q. Briefly outline your education and professional background.

A. I received a BA in Political Science from Temple University, with a minor in Economics, and a JD from Widener University Commonwealth School of Law. I also hold a Certificate in the Fundamentals of Regulatory Studies from Michigan State University's Institute of Public Utilities.

Upon graduation from law school, I worked as a Staff Attorney at the Pennsylvania Coalition Against Domestic Violence (PCADV). There, I provided education, consultation, and legal support services to attorneys, advocates, and judges on legal matters impacting the health, safety, and stability of survivors of domestic violence. While at PCADV, I helped to launch PCADV's economic justice initiative, which works to address intersectional economic issues that impact the ability of survivors to establish a safe, healthy home. Through that work, I served as legal counsel for PCADV on matters before the Public Utility Commission impacting survivors' right to privacy and their ability to establish and maintain safe, affordable utility services.

In 2014, I was hired as a Staff Attorney at the Pennsylvania Utility Law Project (PULP), a statewide specialty legal services program dedicated to advancing the rights of low-income utility customers. I was promoted to PULP's Supervising Attorney in 2017. In 2020, I was appointed to serve as PULP's Executive Director. Since joining PULP in 2014, I have provided direct legal representation, education, and support services to thousands of low income

Pennsylvanians and organizations across the state on utility and energy matters. In my current role as PULP's Executive Director, I am responsible for overseeing PULP's policy, litigation, advocacy, support services, and special projects in furtherance of its mission to ensure Pennsylvanians of limited economic means can access and maintain safe and affordable utility services.

I also currently serve on a number of advisory councils and committees to Pennsylvania state agencies on matters impacting the rights of low income Pennsylvanians and their ability to access safe and affordable water and energy services. Since 2020, I have served as Chairperson of the LIHEAP Advisory Committee to the Department of Human Services. In 2023, I assumed the role of Chairperson of the Weatherization Assistance Program Policy Advisory Council to the Department of Community and Economic Development. I am also an appointed member of the Consumer Advisory Council to the Public Utility Commission and the Climate Change Advisory Committee to the Department of Environmental Protection.

As illustrated more thoroughly in my resume, I have well over a decade of experience providing direct legal services, education, and support services to resolve utility and energy issues affecting low-income consumers. My resume is attached as Appendix A.

Q. Please describe the focus of your work, including relevant work experience on issues of low-income families' ability to afford essential goods and services such as utilities?

A: Over the last 14 years, I have represented low-income individuals and organizations serving low income populations in a wide variety of legal matters, including family law, public benefits, utility shut-offs, debtor/creditor, and housing related disputes. In all of these legal matters, I have worked almost exclusively on behalf of very low income individuals and other uniquely vulnerable groups. Through this work, I have become intimately familiar with the daily

lives of Pennsylvania families who are experiencing poverty and utility insecurity, and the ways in which applicable laws, policies, and programs serve to help or hinder their ability to connect and maintain safe and affordable services to their home.

In addition to extensive experience representing individuals facing utility insecurity, I have an extensive knowledge of the array of state, federal, and utility-run programs designed to ensure low-income families can afford essential utility services. I have been involved in countless proceedings evaluating the effectiveness of required Universal Service Programs to assist low-income families, and I have spent thousands of hours identifying program issues in Universal Services and making recommendations for changes to Universal Service programming to better serve low-income consumers. As indicated in my resume, I have provided testimony before state agencies and the legislature on these matters.

Q: Have you previously served as an expert witness in proceedings before the Public Utility Commission?

A: In 2018, I provided formal testimony on behalf of PULP in an *en banc* hearing before the PUC regarding Supplier Consolidated Billing, at Docket No. M-2018-2645254. While I have served as legal counsel for groups and individuals in countless other matters, I have not otherwise sponsored formal expert testimony in any other PUC proceedings.

Q. For whom are you testifying in this proceeding?

A. I am testifying on behalf of the Tenant Union Representative Network (TURN) and the Coalition for Affordable Utility Services and Energy Efficiency in Pennsylvania (CAUSE-PA).

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to explain my observations regarding residential shopping for electricity supply in PECO's service territory, in particular, the significant risks that higher priced electricity presents to low-income PECO residential customers. Based on my review, I support PECO's continued protections for Customer Assistance Program (CAP) customers from higher priced electricity charged by Electric Generation Suppliers (EGSs) in the competitive market. However, I recommend PECO implement additional procedural reforms to ensure economically vulnerable households are able to enroll in CAP without delay. Specifically, I recommend that PECO allow CAP applicants to elect to return to default service at the time of application, without incurring financial penalty. This process is similar to the process approved in FirstEnergy Pennsylvania's most recent Default Service Plan proceeding. I also support PECO's proposed bill changes that depict monthly charges from suppliers, indicating whether the customer is being charged more or less than PECO's Price to Compare (PTC). Finally, I recommend PECO include prompts in its Time of Use (TOU) Customer Service Representative (CSR) script scenarios to direct customers having difficulty affording bills to PECO's Universal Services department to identify appropriate non-TOU alternatives, such as CAP and hardship funds.

While my testimony is focused on these discrete issues identified in PECO's initial filing, my silence with respect to any specific PECO proposal should not be construed as support or endorsement of those proposals. I reserve the right to comment on other issues in response to the direct testimony of other parties in this proceeding which may amend, augment, or otherwise change the nature of PECO's initial filing.

I note here my general concern for PECO's proposal to continue operation of its Standard Offer Program (SOP) in light of the residential shopping data discussed below. The SOP entices participation in the competitive energy market with a "guarantee" of energy savings. However, achievable savings are often short-lived, and are highly dependent on future pricing and active consumer engagement to ensure initial offers remain competitive with the changing PTC and do not lapse into higher priced variable rates. I am concerned PECO's SOP may be contributing to excessive pricing for residential shopping customers, discussed below, as it provides a passive "on-ramp" into the market – without providing an equally passive "off-ramp" for unengaged consumers. Unfortunately, time and resource constraints in this proceeding did not permit me to perform a more thorough analysis of shopping data associated with PECO's SOP. However, I am continuing to review this issue, and reserve the right to respond to proposals of other parties in this proceeding related to PECO's SOP which may help to address my concerns.

II. RESIDENTIAL CUSTOMERS ARE EXPOSED TO SIGNIFICANTLY HIGHER PRICES BY SHOPPING FOR ELECTRICITY

Q. Please describe your review of customer electricity shopping data.

A. I reviewed the data PECO provided in response to TURN/CAUSE-PA I-3(a)-(x) to compare the revenues billed by suppliers to shopping customers on a monthly or annual basis with the prices PECO would have charged for default service and/or the Price to Compare (PTC). Through this comparison, I was able to distill the following information from the period January 2018 through December 2023 on a monthly basis:

(a) the average amounts billed for EGS supply to residential shopping customers compared to the average amounts billed to residential default service customers;

(b) the average usage of all residential customers, compared to the average usage of residential shopping and residential default service customers;

(c) the average per kWh price for EGS supply charged to residential shopping customers compared to the average per kWh charged to residential default service customers;

(d) the average per kWh price for EGS supply charged to confirmed low income (CLI)[1] and non-CLI customers residential shopping customers; and,

(e) the rate of residential shopping, comparing the percentage of PECO residential customers and CLI customers choosing to enroll with an EGS.

The data provided by PECO in response to TURN/CAUSE-PA-I-16 was used to contextualize the additional costs paid for electricity due to residential shopping with an EGS, compared to the costs paid by Small Commercial & Industrial and Large Commercial & Industrial customers.[2]

Q. In the previous discussion you referred to prices charged for default service and the PTC. Is there a difference?

A. Yes, as PECO explained in response to TURN/CAUSE-PA-I-4, the PTC changes quarterly (every three months), unless there is a rate increase in which case PECO updates the PTC. In analyzing the data PECO provided in TURN/CAUSE-PA-I-3, I utilized the actual aggregate default service charges to calculate the actual default service price per kWh. In some months, the actual default service price per kWh varies by a fraction of a cent per kWh from the

[1] Note that "confirmed low income customers" include those for whom a utility has information which makes it reasonably likely the household has income which is at or below 150% of the federal poverty level. 52 Pa. Code § 54.75. PECO includes in its definition all customers who "in the last two years have provided verified financial information at or below 150% of the Federal Poverty level, and/or enrolled in PECO's Customer assistance Program, and/or received a Low Income Home Energy Assistance Program Grant." See TURN/CAUSE-PA-I-1. Customers retain this designation for two years. TURN/CAUSE-PA-I-2.

[2] TURN/CAUSE-PA Exhibit I.

applicable PTC. This small variance does not have any appreciable bearing on my overarching analysis. Whether one uses the actual average default service charges or the PTC for comparison with EGS prices, the significant cost differences experienced by residential customers choosing to shop for electricity are alarming.

Q. Please describe your analysis of the costs paid by residential customers shopping with an EGS.

A. Applying PECO's usage and billing information described above, I was able to calculate the average bill amounts and average generation charges per month for shopping customers, which I compared with the average bill amounts and average generation charges per month for non-shopping customers. The Exhibits to my testimony depict my calculations, using PECO data provided in response to discovery requests, and support my findings herein.

Q. What did you find from this analysis?

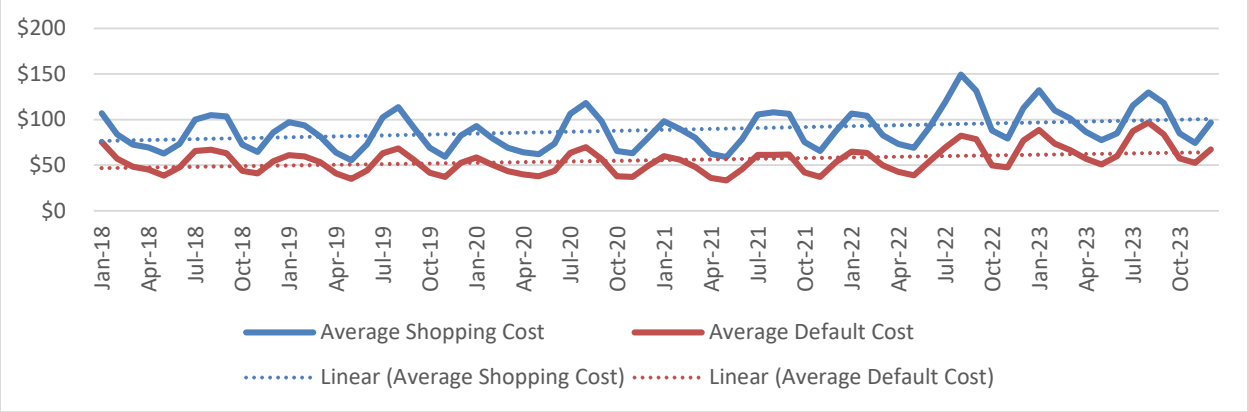
A. Over the six-year period, January 2018 through December 2023, residential PECO customers who shopped for electricity were charged significantly higher prices each month than customers who remained on default service. On a percentage basis, residential shopping customers were charged between 32 and 81% more for supply per month than residential default service customers. Across the entire six-year period, residential shopping customers were charged, on average, 57% more per month for supply than default service residential customers.[3] In total, over this six-year period, residential shopping customers were charged approximately $801,873,392.57 more than they would have been charged at PECO's PTC.[4]

[3] TURN/CAUSE-PA Exhibit II.

[4] TURN/CAUSE-PA Exhibit I.

Chart 1 below depicts the average monthly supply charges for residential customers shopping with an EGS compared to those who chose to remain on default service, as shown in TURN/CAUSE-PA Exhibit II. With incredible consistency, residential customers who shopped for electricity were charged, on average, significantly more than default service customers.

Chart 1: Average Monthly Generation and Supply Charges – Shopping vs. Default

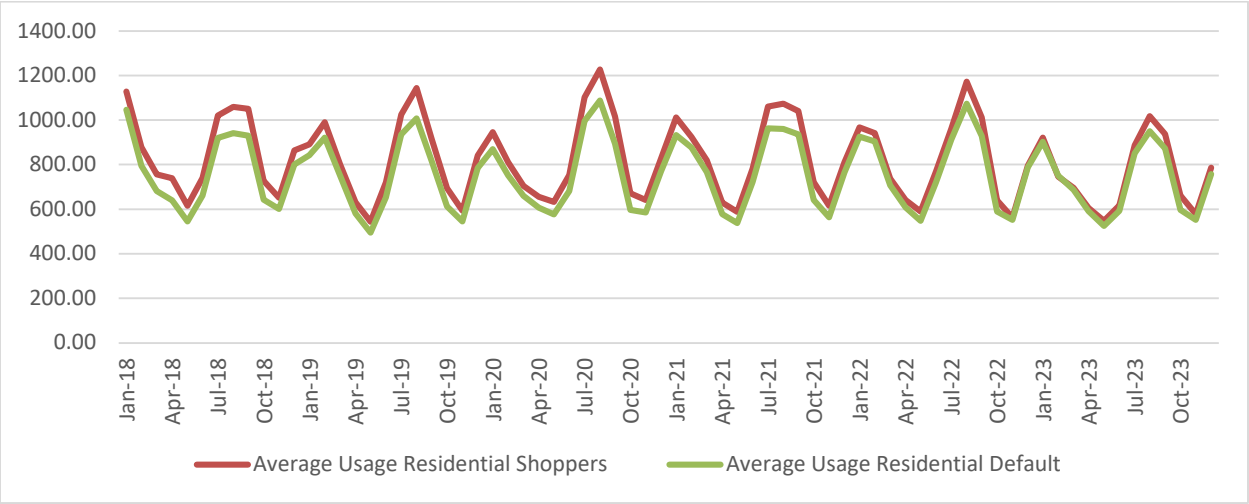


Q. Are the increased monthly charges you identify above attributable to higher usage by customers choosing to shop?

A. No. As demonstrated in Chart 2 below, residential shopping customers used, on average, slightly more electricity compared to default service customers in most months over the period studied.[5] However, the significantly higher costs for shopping customers cannot be attributed to higher usage. As discussed below, my analysis compared the average cost per kWh, allowing for an apples-to-apples comparison of the average price charged for shopping compared to default service irrespective of individualized usage.

[5] See TURN/CAUSE-PA Exhibit III.

Chart 2: Average Residential Monthly Usage – Shopping vs. Default



Q. Why do you believe residential shopping customers have slightly higher average usage than residential default service customers?

A. Based on my experience, residential customers with higher usage, and correspondingly higher bills, are more likely than customers with lower usage to seek out savings on electric bills. This is particularly true for economically vulnerable households. Unfortunately, promises of savings for residential customers in the competitive market are frequently associated with short term offers (so-called "teaser" rates), which quickly expire – giving way to significantly higher variable rates that may fluctuate based on any number of unknown or undisclosed circumstances.[6] This serves to compound payment trouble for many lower income households, which often have higher usage rates caused by inefficient housing, appliances, and heating systems.

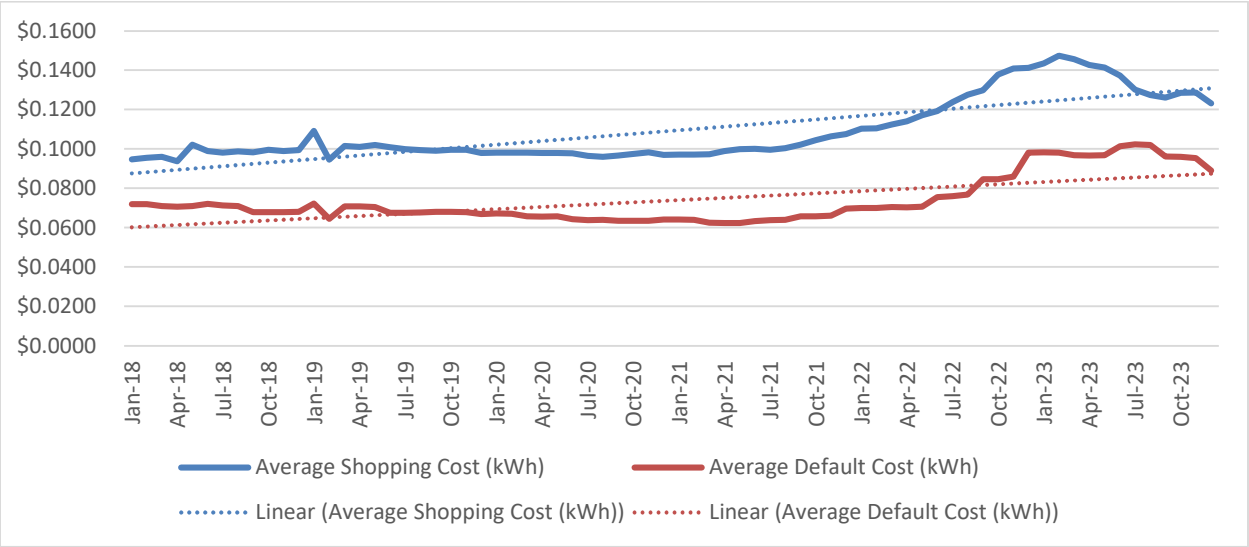
[6] See Karen Lusson, Competitive Energy Supply: A Legacy of Deception, Fraud and Consumer Rip-Offs (Feb. 25, 2020) *available at:* https://www.nclc.org/wp-content/uploads/2022/08/NCLC-competitive-energy-supply-1-1.pdf.

Q. Can you determine how much, on average, supply charges for residential shopping customers exceed PECO's default service prices?

A. Yes. Using the data described above, I was able to determine the average monthly prices per kWh associated with residential competitive supply and residential default service. On average over the six-year period analyzed, residential shopping customers were charged $0.0328 per kWh more than residential customers choosing to remain on default service. The average per kWh charges imposed by EGSs in excess of the default service price ranged from $0.023 to $0.055 during the six-year period reviewed.[7]

As shown below in Chart 3, the average prices paid per kWh for residential shopping customers exceeded the default price by a significant margin in each month examined.

Chart 3: Average / kWh Residential Generation and Supply Charges, Shopping vs. Default



[7] TURN/CAUSE-PA Exhibit IV.

Q. How does the data on PECO residential customer shopping compare to the data on non-residential customer shopping?

A. The data supplied by PECO shows that the harm to residential customers associated with higher priced electricity in the competitive market is more pronounced but is not distinct to the residential class. As explained above, and illustrated in TURN/CAUSE-PA Exhibit I, PECO residential shopping customers paid more than $800 million more for EGS supply over the six-year period from 2018 through 2023. In comparison, Small Commercial and Industrial (SCI) customers paid nearly $134 million more than the default service price, and Large Commercial and Industrial (SCI) customers paid roughly $72 million more than the default service price. However, this tells only part of the picture. EGS billed revenues to residential shopping customers were nearly 150% of the revenues that would have been billed at PECO's PTC over the six-year period. In comparison, for SCI and LCI shopping customers, EGS billed revenues were approximately 108% and 104%, respectively, of the revenues that would have been billed at PECO's PTC over the six-year period. Additionally, on average, SCI and LCI customers were able to attain savings in at least some months of the six-year period reviewed, whereas residential shopping customers did not achieve savings, on average, in any month over the 72-month period analyzed.[8]

[8] TURN/CAUSE-PA Exhibit I.

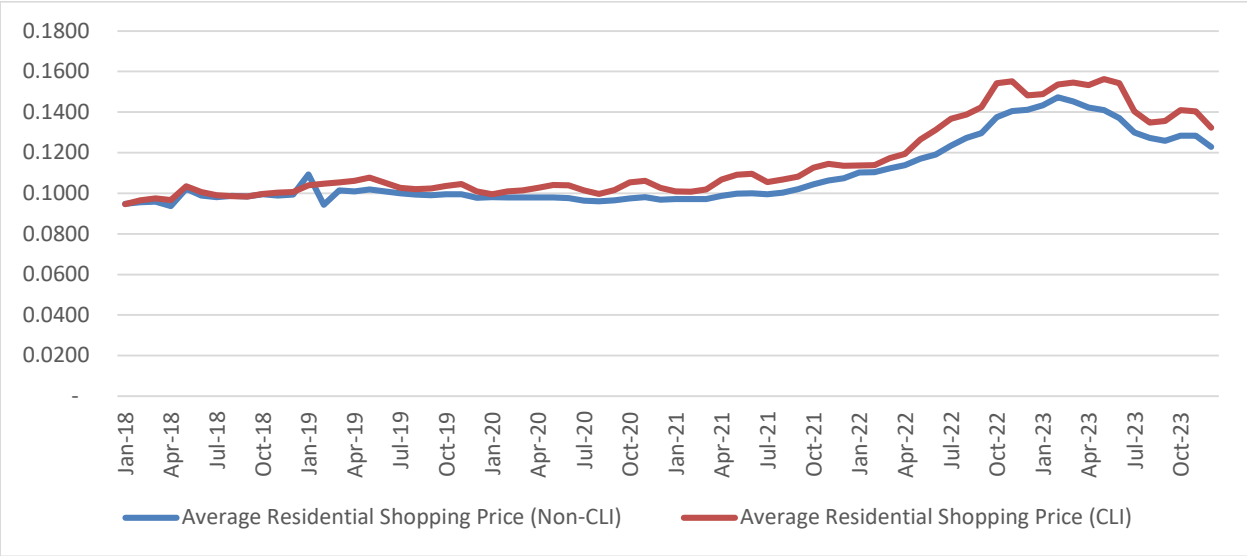
III. CONFIRMED LOW INCOME (CLI) RESIDENTIAL CUSTOMERS ARE SUBJECTED TO THE HIGHEST PRICED EGS PRODUCTS

Q. Please describe the impact of EGS pricing on CLI customers.

A. CLI customers have faced even higher prices for EGS service, on average, than non-CLI residential customers. PECO's data included the total usage and generation supply charges of residential customers, CLI customers, non-CAP CLI customers, CAP customers, and residential Non-CAP CLI shopping customers. Utilizing this disaggregated data, I was able to compare average prices charged to non-CLI shopping customers with the average prices charged to CLI shopping customers. As shown in TURN/CAUSE-PA Exhibit V, the data demonstrates that PECO's CLI residential shopping customers face the highest charges for EGS generation and supply. Indeed, CLI residential shopping customers have, on average, faced charges higher than non-CLI residential shopping customers every month since February 2019.[9] The chart below shows the average prices charged to CLI and non-CLI residential customers who shopped for EGS supply from 2018 through 2023.

[9] See TURN/CAUSE-PA Exhibit V.

Chart 4: Average Per kWh Shopping Charges – CLI and Non-CLI Residential Customers

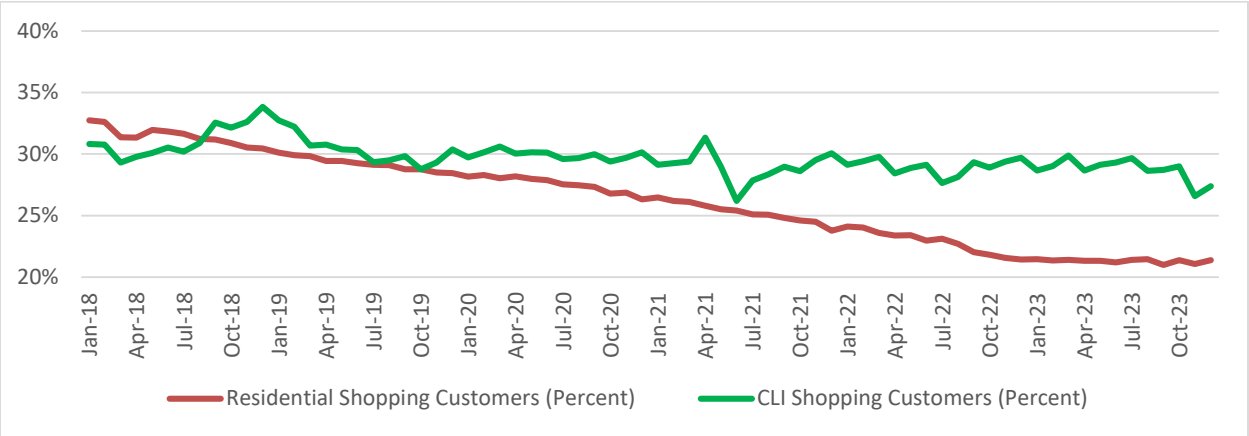


Q. Please describe residential and CLI customer shopping trends.

A. Residential customers, as a group, appear to be choosing default service at increasingly greater rates. I believe this is a direct consequence of the pricing information discussed above. Over the period 2018 through 2023, the rate of residential shopping has declined significantly. However, the rate of CLI customer shopping, as a subset of the residential customer class, has remained relatively constant.[10] As shown in the chart below, the rate of residential customer shopping (as a whole) has declined from 33% to 21% over the period from 2018 through 2023. The rate of CLI customer shopping (among eligible CLI customers, limited to those not enrolled in CAP, as discussed below) has fluctuated between a high of 34% and a low of 27%.

[10] See TURN/CAUSE-PA Exhibit VI.

Chart 5: Rate of Residential Shopping - All Residential versus CLI



Q. What do you conclude from the information regarding CLI customer shopping?

A. Based on the data provided by PECO, CLI residential customers experience the worst outcomes from shopping for EGS supply. They are consistently charged, on average, the highest prices imposed on any identified group of customers served by EGSs. Although the downward trend of residential shopping indicates increasing awareness of the prevalence of higher priced electricity resulting from a choice of EGS supply, this trend is not as clearly reflected in the CLI residential shopping data. Unfortunately, the consequences of excessive supply costs are more severe for CLI customers who are more likely to be payment troubled – and, in turn, face a greater risk of involuntary termination if they are unable to pay associated higher bills.

CLI customers already experience energy insecurity (the inability to afford basic energy services), and its concomitant threats to housing stability, employment and educational continuity, and serious health, safety and family unity risks.[11] Faced with higher priced

[11] See, e.g., Diana Hernandez, Understanding Energy Insecurity and Why It Matters to Health, 167 Soc. Science Medicine (Oct. 2016), https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5114037/; see also Diana Hernandez, Yumiko Aratani, and Yang Jiang, Energy Insecurity Among Families with Children (Jan. 2014), http://www.nccp.org/publications/pub_1086.html.

electricity, CLI shopping customers are at even greater risk of involuntary termination, forcing many households to forgo other critical necessities including housing, food, water, heat and medicine in order to afford life-essential energy services to their home.[12]

As shown below in Table 1, PECO's termination numbers reveal that, on average, CLI customers who shop for electricity are extremely vulnerable to loss of service.[13]

TABLE 1: Confirmed Low Income (CLI) Shopping Terminations

	Average # of CLI Shopping Customers	CLI Shopping Terminations	CLI Shopping Termination Rate
2018	8,115	4,268	53%
2019	8,038	5,058	63%
2021[14]	7,533	3,950	52%
2022	8,312	6,518	78%

According to the United States Census Bureau's Household Pulse Survey, roughly 25% of Pennsylvania households were unable to afford their home energy bills in 2023. US Census Bureau, Household Pulse Survey: Pennsylvania, Unable to Pay Energy Bill (January 9-February 5, 2024), https://www.census.gov/data-tools/demo/hhp/#/?measures=ENERGYBILL&s_state=00042.

(2022) available at: https://www.ncbi.nlm.nih.gov/pmc/articles/PMC9647589/; National Consumer Law Center, Protecting Seriously Ill Consumers from Utility Disconnections, (2022), available at: https://www.nclc.org/resources/report-protecting-seriously-ill-consumers-from-utility-disconnections-what-states-can-do-to-save-lives-now/.

[12] The Energy Information Administration (EIA) Residential Energy Consumption Survey (RECS) released in 2022 further illustrates the profound impact of energy insecurity on low income families, with 19.9% of households reporting that they reduce or forgo food or medicine to pay for energy costs; and while 10% report leaving their homes at unhealthy temperatures because they could not afford to pay for energy. US EIA, 2020 Residential Energy Consumptions Survey, Table HC11.1 Household energy insecurity, 2020 available at: https://www.eia.gov/consumption/residential/data/2020/hc/pdf/HC%2011.1.pdf. Importantly, energy insecurity is more pronounced for low income Black families. EIA's RECS data revealed that 52% of Black and African American households experience energy insecurity, compared to 23.2% of white households; and nearly 40.2% of Black and African American households report foregoing food or medicine to pay energy costs, compared to 16.8% of white households. Id.

[13] See TURN/CAUSE-PA Exhibit VII.

[14] Note that termination rates were lower in 2021 following the end of the emergency COVID 19 moratorium, given the availability of substantial emergency financial relief through the American Rescue Plan Act to resolve utility debt accrued as a result of COVID-19.

As the Table demonstrates, from 2018-2022,[15] the CLI shopping customer termination rate ranged between 52% to 78%. In comparison, involuntary termination rates for PECO's CLI (non-CAP) customers as a whole (shopping and default) ranged between 30% and 55% during this same timeframe.[16]

TABLE 2: Non-CAP Confirmed Low Income (CLI) Terminations (Shopping & Default)

	CLI (Non-CAP) Customers	CLI (Non-CAP) Terminations	CLI (Non-CAP) Termination Rate
2018	26,170	7,957	30%
2019	26,489	9,882	37%
2021	26,031	8,886	34%
2022	28,722	15,764	55%

Isolating termination rates for CLI (non-CAP) default service customers reveals that CLI customers who choose to remain in default service are far less likely than shopping customers to experience an involuntary termination.[17]

TABLE 3: Non-CAP Confirmed Low Income Default Service Terminations

	Average # of CLI (Non-CAP) Default	CLI (Non-CAP) Default	CLI (Non-CAP) Default Termination Rate
2018	18,055	3,689	20%
2019	18,450	4,824	26%
2021	18,499	4,936	27%
2022	20,410	9,246	45%

[15] Data from 2020 was omitted due to the COVID-19 related moratorium on utility terminations.

[16] See TURN/CAUSE-PA Exhibit VII.

[17] See TURN/CAUSE-PA Exhibit VII.

Notably, the involuntary termination rate for PECO's Customer Assistance Program (CAP) participants, who are insulated from excessive supplier prices, is far lower than CLI shopping and default service customers – ranging between 9% and 20% of the average number of CAP customers during the same time period.[18]

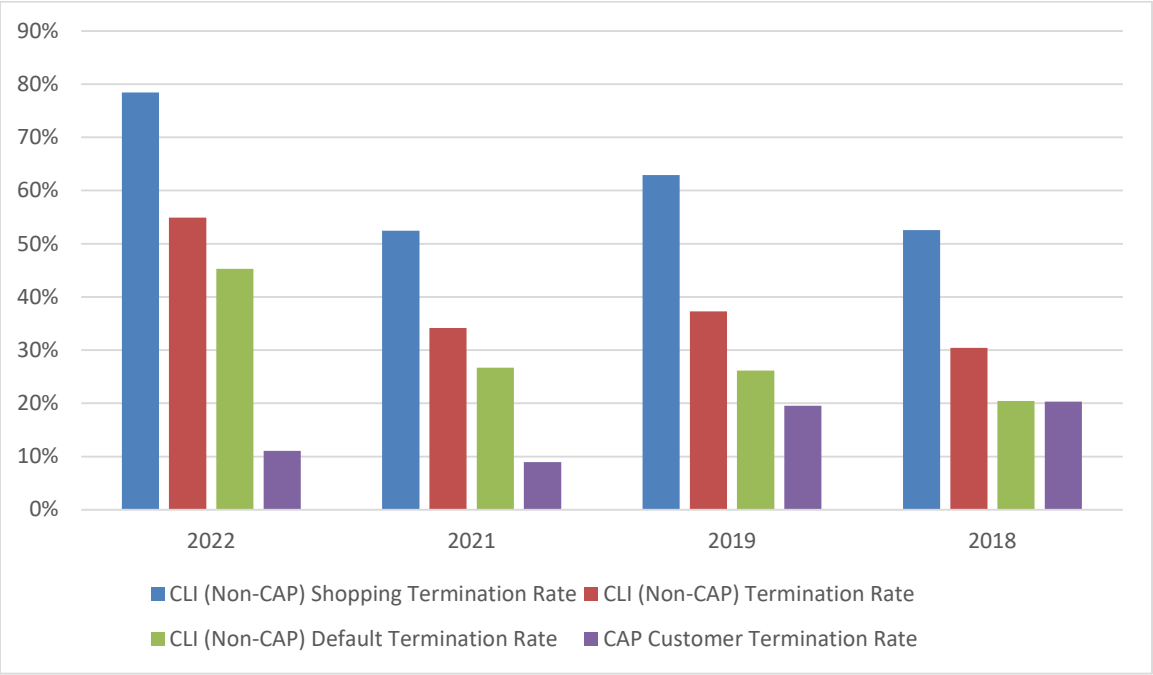
TABLE 4: CAP Terminations

	Average # of CAP Participants	CAP Terminations	CAP Termination Rate
2018	117,114	23,806	20%
2019	112,196	21.928	20%
2021	118,697	10,622	9%
2022	120,298	13,290	11%

The below chart compares the relative termination rates for all four CLI customer groups – shopping (non-CAP) customers, non-CAP default service customers, non-CAP customers (shopping and default), and CAP customers.

[18] See TURN/CAUSE-PA Exhibit VII.

CHART 6: Comparison – Low Income Termination Rates



As discussed in the next section of my testimony, the pronounced disparities in relative termination rates for shopping customers clearly demonstrate that excessive pricing in the competitive energy market exacerbates utility insecurity for PECO's low income customers. High termination rates drive higher collections costs and uncollectible expenses borne by other ratepayers – along with a host of consequences to short- and long-term health, safety, and stability of individuals and communities.[19] In contrast, CAP enrollment demonstrably reduces utility insecurity and improves resulting outcomes for the participant and other ratepayers who support universal service programs through rates.

[19] The consequences of an involuntary termination include increased risk of eviction, fire, inability to use electric medical devices, exposure to unsafe temperatures, lack of refrigeration/food spoilage, inability to cook or clean, impacts to personal hygiene, the loss of child custody, and disqualification from public and private housing options in the future. I have personally represented clients facing each and every one of these stark consequences following an involuntary utility termination.

IV. PECO SHOULD IMPROVE ACCESS TO CAP FOR APPLICANTS WITH EGS SUPPLY

Q. Please discuss the limitation on CAP shopping for EGS generation and supply.

A. For those CLI customers who qualify for and enroll in CAP, PECO's current Commission-approved Universal Services and Energy Conservation Plan does not permit participants to obtain EGS generation and supply.[20] This is an important protection to CAP participants and all other residential customers who contribute to the cost of CAP. Indeed, based on the data PECO has provided, allowing CAP customers to shop for electricity generation and supply would have drastic negative economic impacts on CAP customers and other consumers who support CAP through rates. For example, if we were to assume that 25% of CAP customers shopped and were charged just $0.01 more per kWh than the default service price for generation and supply over the period from 2018 through 2023, that would create additional CAP costs of more than $16 million.[21] Based on actual CLI shopping data, we know the real impact of permitting CAP shopping in PECO's service territory would be far greater than that this illustrative example. Indeed, the average residential shopping price per kWh ranged between $0.0228 and $0.0550 higher than the default service price in each and every month between January 2018 and December 2023 – exponentially increasing the likely financial harm of CAP shopping to CAP participants and other ratepayers.

[20] See PECO Universal Service and Energy Conservation Plan (2019-2028) at 6, available at: https://www.puc.pa.gov/media/2011/peco_2019-2014_usecp_revised_08182022.pdf

[21] See TURN/CAUSE-PA Exhibit V. Note that this illustrative example does not take into account the impact of PECO's current maximum CAP credits

Q. Please explain what happens when a customer who is enrolled with an EGS applies for CAP.

A. Under PECO's current program rules, a customer who is receiving EGS supply is unable to enroll in CAP. If a residential shopping customer submits a CAP application while receiving EGS supply, PECO will send the applicant a CAP Follow-up Letter.[22] This Letter includes a checkbox requesting additional information, next to which appears the following language: "Agreement to drop generation supplier to enroll in the CAP program. Please call 1-800-774-7040." PECO states that this letter is its manner of advising customers they cannot participate in CAP and must drop their EGS to enroll in CAP. PECO further states that "when a CAP applicant does not take action to remove their EGS suppler," they are sent a CAP Refuse to Drop Supplier Letter.[23]

While I strongly support PECO's CAP rules prohibiting CAP shopping, given the substantial cost impacts discussed above, I am concerned PECO's CAP enrollment process creates unnecessary barriers for economically vulnerable customers to timely enroll in CAP.

Q. Do you have a recommendation regarding CLI customer protections from EGS pricing?

A. Yes. I recommend that PECO include a clear statement on its CAP application informing customers that, by submitting the application, they consent to returning to default service at the time of CAP enrollment. Inclusion of this acknowledgement would allow PECO to timely process CAP applications for all income eligible households, without adding time and

[22] See TURN/CAUSE-I-12(a).

[23] See TURN/CAUSE-I-12(a).

administrative burden. PECO should be ordered, in turn, to institute CAP rules that prohibit suppliers from charging early cancellation or termination fees to any shopping customer who enrolls in PECO's CAP. This recommendation is consistent with the CAP shopping restrictions approved in FirstEnergy's service territory in the context of its recent Default Service Plan proceeding.[24]

PECO's current process is administratively cumbersome and relies on the CAP applicant to infer from PECO's written request for additional information that the applicant must separately contact an EGS to cancel their supply agreement or follow up with a call to PECO's customer service staff to get more information. By the time the customer receives a CAP Refuse to Drop Supplier Letter, their application has been denied and, if they desire to enroll in CAP, they must reapply – weeks or months after the customer first completed an application to enroll in CAP. This creates an unnecessary obstacle to enrollment in CAP, leaving the low income customer enrolled with an EGS and exponentially increasing the likelihood the low income household will experience an involuntary termination of service.

In my experience, low income customers are most likely to seek enrollment in CAP when they are in active crisis – often following receipt of a 10-day or 3-day termination notice. In these instances, time is of the essence to prevent the loss of electricity to the home – as well as a host of negative consequences to the health, safety, and stability of the household that follows. For economically vulnerable households, any time spent outside of the program is likely to contribute to payment trouble – causing arrears to grow unnecessarily, and ultimately contributing to the cost of the program. This is especially true for low income shopping

[24] See Petition of Met Ed., Penelec, Penn Power, and West Penn Power for Approval of Its Default Service Plan for the Period From June 1, 2023 through May 31, 2027, Recommended Decision, Docket Nos. P-2021-3030012, -13, -14, -21, at 86-91 (RD entered June 29, 2022).

customers who may be paying significantly higher rates than the applicable default service price, further exacerbating payment issues.

V. PECO'S PROPOSED BILL REVISION SHOULD BE APPROVED

Q. Please describe PECO's proposed bill revision.

A. As shown on PECO Exhibit SD-6, PECO proposes to include, in a simple tabular format, the amount of charges for competitive supply included on a shopping customer's bill, together with PECO's PTC and the calculated difference between the two. As shown on SD-6, any savings would appear in green typeface, whereas charges in excess of the PTC would appear in red typeface.

Q. What are your recommendations regarding PECO's proposed bill revision?

A. Based on the extensive data discussed above regarding PECO residential and CLI customer EGS pricing, I wholeheartedly support PECO's proposed bill revision. Customers should be given clear and obvious information regarding the prices they are paying for EGS supply and advising them through PECO billing is sensible, practicable, and consumer friendly. The Commission should approve PECO's proposed bill revision.

VI. TIME OF USE RATES (TOU)

Q. Is PECO proposing customer protections as part of its TOU proposal?

A: Yes. In its TOU rate proposal, PECO indicates that it intends to exclude customers enrolled in its Customer Assistance Program (CAP) from participating in the TOU Rate, consistent with PECO's current DSP.

Q: Why is PECO proposing to continue to exclude CAP customers from the TOU rate?

A: As PECO notes in its testimony, time varying rates such as the proposed TOU rate may adversely impact CAP customer benefits. PECO explains: "CAP customers may not have the flexibility to shift usage outside of the higher-priced peak period. Of the fourteen confirmed low income customers who were enrolled in PECO's TOU rate between June 1, 2022, and May 31, 2023, nine ended up with higher bills than they would have under standard rates."[25]

Q: Do you agree with PECO's decision to exclude CAP customers from its proposed TOU rate?

A: Yes. I agree with PECO's conclusion that TOU rates are inappropriate for CAP customers with inflexible usage and are incompatible with PECO's CAP design. The purpose of CAP is to provide low income households with an affordable bill based on the participant's household income. If CAP customers were permitted to subscribe to TOU rates and were charged higher prices as a result, there would be three possible outcomes: (1) the CAP customer will be charged an unaffordable bill, and may exceed the maximum annual CAP benefits prematurely; (2) residential consumers who finance CAP through rates will pay more for the program; or (3) the increased cost will be shared by both CAP participants and residential consumers. In short, if a CAP customer is unable to shift their usage during peak hours, they will be faced with substantial levels of unaffordability, while residential consumers who pay for CAP will face increased costs. Each of these potential outcomes would cause harm and undermine the explicit affordability goals that are intrinsic to CAP.

[25] PECO Statement No. 2 at 11.

PECO's assessment regarding the inability of most low income households to reasonably shift usage during off peak hours is also correct. Economically vulnerable households often have very little discretionary energy usage, such as washing machines, dish washers, and other large appliances, and are more likely to live in smaller homes with less efficient heating and cooling spaces – all factors which make it difficult to shift load during peak periods. Consumers who are home during the day or are reliant on electric-powered medical devices are at even greater risk, as usage curtailment during peak hours can have an immediate and substantial impact on health outcomes. This includes seniors, individuals with disabilities, and families with young children all of whom are generally more likely to be low income or income constrained. For vulnerable households, usage patterns are often fixed or otherwise inflexible. Indeed, a household cannot shift their laundry routine to the late evening hours if they do not have a washer or dryer in their home, nor can they turn off their air conditioner during the hottest hours of the day if they are home during those hours. Imposing time-varying pricing on consumers with fixed or inflexible usage patterns could disproportionately increase the cost of energy for Pennsylvania's most vulnerable consumers. Thus, I agree with PECO that TOU is an inappropriate rate structure for CAP customers. Nevertheless, I am concerned that this protection is insufficient to prevent excessive pricing for other vulnerable groups with inflexible usage – including tens of thousands of low income households that are not enrolled in CAP.

Q: Does PECO have a lot of income customers that are not enrolled in CAP?

A: Yes. In 2022, utilizing the census-based methodology developed by the Commission's Bureau of Consumer Services, PECO estimated that it had approximately 370,514 low income

households.[26] Yet as of December 31, 2022, PECO had just 121,487 customers enrolled in CAP.[27] On average, over the period 2018 through 2023, PECO had 118,333 CAP customers.[28] By either measure, approximately 33% of PECO's estimated eligible customers participate in PECO's CAP.

Q: Have you reviewed PECO's TOU call center scripts?

A: Yes. PECO provided a copy of a series of call center prompts regarding TOU rates subject to confidential treatment under the approved Protective Order. I reviewed these scripts. In addition, TURN/CAUSE-PA asked through discovery whether PECO had call center scripts for the specific circumstance when a CLI customer expresses an interest in, or seeks to enroll in, TOU rates. PECO responded that it did not have any unique scripting for customers enrolled in CAP who may request to be enrolled in the TOU rate.[29]

Q: Do you have a recommendation?

A: Yes. I recommend that PECO include, as the first prompt in its TOU call center scripts, the following language: "If your household is having trouble affording your electricity, PECO has low income assistance programs that may be able to assist you. Would you like more information about assistance programs?" This will enable PECO to provide targeted and personalized outreach about available universal service programs – including CAP, hardship fund grants, and energy efficiency and usage reduction programs – to help resolve affordability concerns, without exposing vulnerable customers to potentially higher rates.

[26] PUC, BCS, 2022 Report on Universal Service and Collections Performance, at 58 (Sept. 2023), https://www.puc.pa.gov/filing-resources/reports/universal-service-programs-and-collections-performance-reports/

[27] Id.

[28] TURN/CAUSE-PA Exhibit III.

[29] TURN/CAUSE-PA-I-20.

In addition to this protection, PECO should be required to perform affirmative outreach to CLI TOU participants who are exceeding the applicable default service price and should encourage those households to return to default service and enroll in available universal service programs. Enhancing outreach to customers in this category will help to prevent disparities in the impact of TOU rates on participants.

VII. CONCLUSION

Q. Does that conclude your testimony?

A. Yes.

April 25, 2024

Pennsylvania Public Utility Commission
v.
PECO Energy Company

Petition of PECO Energy Company for Approval of
Default Service Program

Docket No. P-2024-3046008

Response of PECO Energy Company
To Interrogatories of the
Tenant Union Representative Network and the Coalition for Affordable Utility Services and Energy Conservation in Pennsylvania
TURN-CAUSE-PA Set I

Response Date: March 22, 2024

TURN-CAUSE-PA-I-1

Please explain how PECO defines the term "confirmed low income customers" and identify the criteria to be considered a confirmed low income (CLI) customer.

RESPONSE:

The definition/criteria for confirmed low income customers is customers who in the last two years have provided verified financial information at or below 150% of the Federal Poverty Level, and/or enrolled in PECO's Customer Assistance Program, and/or received a Low Income Home Energy Assistance Program grant.

TURN-CAUSE-PA Set I

Response Date: March 22, 2024

TURN-CAUSE-PA-I-12

Please describe PECO's current process for addressing a customer's prior selection of electric supply from an EGS when the customer enrolls in CAP. Please provide a sample of PECO correspondence issued to the customer in this circumstance.

RESPONSE:

When a PECO customer receiving electric supply from an EGS attempts to enroll in CAP, the customer is notified via a CAP Follow-up Letter ("Attachment TURN-CAUSE-PA-I-12(a.1)") that they cannot participate in CAP. The letter states, among other things, that the customer must drop their EGS to enroll in CAP. Further, when a CAP applicant does not take action to remove their EGS supplier, a CAP Refuse To Drop Supplier Letter ("Attachment TURN-CAUSE-PA-I-12(a.2)") is sent to the customer.

Dear Customer Name,

As long as you purchase the electric or natural gas you use from a competitive supplier, your account will not be eligible for PECO's Customer Assistance Program (CAP). You can apply for CAP at any time in the future by purchasing the electric or natural gas you use from PECO and submitting a complete CAP application to PECO.

Use your PECO Price to Compare to evaluate offers from competitive suppliers. Your individual Price to Compare is listed in the Message Center section on your monthly bill. You also can calculate your individual Price to Compare with PECO's Price to Compare calculator at peco.com.

No matter what supplier you choose, PECO will continue to deliver your utility service and provide billing and customer support. To learn more about shopping with a competitive supplier visit papowerswitch.com.

You must continue to pay your bills on time. If you do not pay your bill, your service may be shut off. To pay your balance by credit/debit card or e-check, please call 1-877-432-9384 or visit online at peco.com. You may be charged a convenience fee by the payment vendor for each payment you make.

You can take the worry out of paying your energy bills on time by enrolling for automatic payment.

If you have any questions about CAP, please call us at 1-800-774-7040.

Sincerely,

PECO

REBUTTAL TESTIMONY OF ELIZABETH R. MARX

On Behalf of
Tenant Union Representative Network
and
Coalition for Affordable Utility Services and Energy Efficiency in Pennsylvania

May 15, 2024

TABLE OF CONTENTS

I. INTRODUCTION 1

II. REBUTTAL TO RESA 2

III. REBUTTAL TO OCA 10

I. INTRODUCTION

Q. Please state your name, occupation, and business address.

A. My name is Elizabeth R. Marx. I am an attorney, and currently serve as Executive Director of the Pennsylvania Utility Law Project, with offices at 118 Locust Street, Harrisburg, PA 17101.

Q. Have you previously submitted testimony in this proceeding?

A. Yes, I submitted Direct Testimony on behalf of the Tenant Union Representative Network (TURN) and the Coalition for Affordable Utility Services and Energy Efficiency in Pennsylvania (CAUSE-PA) in Pennsylvania on April 25, 2024.

Q. What is the purpose of your rebuttal testimony?

A. I am submitting this testimony primarily to respond to the recommendations of Frank Caliva, III, on behalf of the Retail Energy Supply Association (RESA). I conclude that each of the recommendations of Mr. Caliva, discussed below, should be rejected. In addition, my rebuttal responds to two recommendations of the Office of Consumer Advocate's (OCA) witness, Barbara Alexander. As discussed below, I agree with Ms. Alexander's testimony that the Standard Offer Program should be ended or that significant changes should be made. However, I do not agree with Ms. Alexander's proposed amendment to PECO's bill presentment proposal to exclude the calculated difference between PECO's Price to Compare (PTC) and charges imposed by alternative suppliers.

I note that my silence with respect to any other issues raised in the direct testimony of these witnesses or any other witness in this proceeding should not be taken as an endorsement of or agreement with their positions or recommendations. I stand by the analysis, conclusions, and

recommendations in my direct testimony, and nothing stated in the other parties' direct testimony has changed or revised my positions as stated therein.

II. REBUTTAL TO RESA

Q. Please describe the recommendations of Mr. Caliva you will respond to.

A. Mr. Caliva makes two recommendations to which I respond in the subsections of my testimony, below. First, Mr. Caliva recommends the Commission commence a statewide investigation to examine the messaging associated with Electric Distribution Companies' (EDCs) PTCs and to add messaging to electricity bills to provide more explanation of the characteristics of EGS supply. Next, Mr. Caliva recommends that PECO's proposed bill comparison showing PTC and EGS charges should be rejected or, alternatively, that the Commission require PECO to add messaging to the bill and provide more space for supplier messaging.

Q. What is the basis for Mr. Caliva's recommendations regarding a statewide investigation and opposition to PECO's bill revision?

A. Both of Mr. Caliva's recommendations are rooted in his dissatisfaction with the number of consumers who choose to shop for a competitive residential energy offer.[1]

Q. Why is Mr. Caliva's dissatisfied with the rate of customer shopping?

A. Mr. Caliva submits that EGSs are "completely reliant" on EDCs to enroll and disenroll customers in EGS service and that, as a consequence, EDCs "control the ability of EGSs to serve customers."[2] Mr. Caliva criticizes Pennsylvania's default service option, which is statutorily required to be available to consumers at the least cost over time. He argues that default service

[1] RESA St. 1 at 16.

[2] RESA St. 1 at 8.

undermines what, in his view, would constitute a "truly competitive marketplace."[3] He complains that the vast majority of residential customers are not shopping for EGS supply, an observation he attributes to a supposed "stagnant market."[4] Mr. Caliva believes the declining rate of residential shopping is attributable to the fact that consumers are educated to compare competitive supply offers against the EDC's PTC, and laments that such education does not include disclaimers about how the PTC is set pursuant to the regulatory guidance of the Commission in the context of a Default Service Plan (DSP).[5] In his view, default service has competitive advantages, benefitting from the EDC's name recognition and being the service that is provided to new customers who have not yet been exposed to EGS offers.[6] Finally, he submits that the mere existence of the PTC, and consumer education regarding how to compare offers, disincentivizes suppliers from developing innovative products and services.[7]

Q. Please comment on the bases for Mr. Caliva's recommendation.

A. The premise behind Mr. Caliva's position is fundamentally flawed. For starters, the Electricity Generation Customer Choice and Competition Act (Choice Act)[8] was explicitly intended to encourage competition for the purpose of "controlling the cost of generating electricity," recognizing the central importance of electricity costs.[9]

Furthermore, the concept of default service – and the resulting PTC – is not a competitive product and is not intended to be so. It is intended to provide a stable option for energy services

[3] RESA St. 1 at 9.

[4] RESA St. 1 at 12.

[5] RESA St. 1 at 13.

[6] RESA St. 1 at 13-14.

[7] RESA St. 1 at 15.

[8] 66 Pa. C.S. §§2801-2815.

[9] 66 Pa. C.S. §§2802(5)-(6).

that provides the least cost over time and is not subject to frequent, even daily, adjustments based on market forces. Simply put, the PTC is the "sum of all unbundled generation and transmission related charges to a default service customer for that month of service."[10] Default service offers consumers an alternative *choice* – ensuring Pennsylvanians who do not wish to actively participate in the energy markets will have a safe, stable price to fall back on. The PTC does not benefit from any competitive advantages because PECO does not "produce" the energy supplied to default service customers; rather, it procures that energy from EGSs who are free to bid to serve customers via that opportunity. The PTC is simply the price associated with PECO's fulfillment of the regulatory obligation as the default service provider.

In addition, it is important to recognize that nothing in PECO's DSP (neither its current, nor its proposed DSP), prohibits EGSs from seeking to educate customers about the supposed "innovative" services and options they can provide to customers. Certainly, as described by numerous individuals who attended the public input hearings, customers desiring to pay more for green products, for example, can seek those products from EGSs. Indeed, that the PTC solely includes "price" data, does not preclude consumers from considering other non-price data and information, nor is it the only consumer education information supplied to customers. The Commission's own website for those interested in shopping for electricity currently includes the following two sentences as the introductory statement on its page regarding residential shopping:

> You may be able to save money on your home's electric bill by switching to a supplier that can offer a lower price. You can also find suppliers who provide specific services, such as renewable energy.[11]

It is simply not true that consumers are educated to compare EGS products based on price alone.

[10] 52 Pa. Code §54.182 (definitions).

[11] See www.papowerswitch.com/shop-for-home (as of May 15, 2024).

Ultimately, I strongly disagree with the premise that consumer education regarding price comparisons between the PTC and EGS offers is harmful to consumers. To the contrary, it is critically important for consumers to understand the price they are paying for energy services and how to compare that price against different offers in the market. In my estimation, consumers should be empowered with the tools necessary to make a fully informed choice about the price they are pay for electricity.

Of critical importance, I strongly disagree that consumer education regarding the PTC is the *cause* of declining shopping rates among residential customers. My office has assisted thousands of Pennsylvanians who have learned, unfortunately at high cost, of the financial risk of shopping with EGSs. Many of the clients we serve day in and day out report receiving targeted marketing, often through high pressure door-to-door sales practices, where they were advised that they will save money, only to end up responsible for much higher electric bills. As my direct testimony showed, on average, residential customers were not able to save money by shopping for electricity with EGSs in any months of the 72-month period from January 2018 through December 2023. Shockingly, the data indicates that the highest EGS prices are heaped upon the lowest income customers, for whom unaffordable electricity bills present enhanced risk of loss of service and concomitant health, safety, and financial harms. Declining rates of residential shopping clearly correspond to the growing knowledge among the consumer base that EGS offers very rarely present opportunities for significant savings.

Mr. Caliva fails to recognize that the decision not to shop, increasingly made by residential customers in PECO service territory, is a perfectly valid economic decision and a *choice* in and of itself, reflecting the reality that residential EGS pricing consistently exceeds

PECO's PTC. Customers have not been educated that default service is superior, they are returning to default service because they are not saving with EGS supply.

Q. If the PTC doesn't place EGSs at competitive disadvantage, then why are EGS contracts consistently exposing customers to higher pricing?

A. Recent studies suggest that EGSs' higher pricing may be attributable to markups on green-power products and/or price discrimination – not higher overhead costs. For example, an analysis of residential retail electricity competition in Pennsylvania suggested that EGSs "incorporate significant markups on green-power products, on the order of 1.3x or greater, depending on the renewable energy product penetration and environmental attribute type."[12] Another study, utilizing data from Baltimore's residential electricity market, "uncovered evidence that suppliers price discriminate on consumer inattention and search barriers" through marketing practices and price updating after the initial contract term.[13]

Q. What is Mr. Caliva's recommendation regarding a statewide investigation?

A. Mr. Caliva recommends as follows:

> A statewide investigation should be opened to investigate Commission approved messaging of default service as the "Price-to-Compare" to include discontinuing use of that term by replacing it with "default service rate" and how the messaging can be improved to support the ability of customers to make more informed decisions when they evaluate competitive offers.

Q. Do you agree with Mr. Caliva's recommendation that the Commission open a Statewide Investigation into Default Service Messaging?

A. No, I do not.

---

[12] Christina E. Simeone, *et al.*, *Pass-through in residential retail electricity competition: Evidence from Pennsylvania*, Utilities Policy 80, available at https://doi.org/10.1016/j.jup.2022.101479.

[13] Jenya Kahn-Lang, *Competing for (In)attention: Price Discrimination in Residential Electricity Markets*, (Working Paper) Energy Institute at Haas, available at https://haas.berkeley.edu/energy-institute/research/abstracts/wp-333/.

Q. Please explain.

A. As a threshold matter, PECO's DSP proceeding is not the proper forum to advocate for a statewide investigation into default service. This proceeding is not a referendum on the market for EGS supply across the entire Commonwealth, nor would it be appropriate to consider a state-wide process as an offshoot or in connection with the examination of issues solely affecting PECO customers. Even if this were an appropriate forum to debate statewide policy, which it is not, I do not believe Mr. Caliva's recommendation is supported by the declining rate of residential shopping. As discussed above, I believe the decline in shopping rates is an outgrowth of excessive pricing in the competitive market.

Q. Please describe Mr. Caliva's concerns regarding PECO's proposed bill changes.

A. Mr. Caliva contends that PECO's proposal to calculate the default service charges that would have applied for shopping customers, and depict whether the EGS charges are higher or lower, "does not provide clear and transparent information to residential customers."[14] He submits that PECO's choice to show a lower priced EGS comparison in green, compared to a higher priced EGS comparison in red, sends a message that one outcome is good and the other is bad.[15] He contends that the depiction of pricing information fails to identify characteristics of the EGS product, such as its duration, fixed/variable price, or green power features.[16] He concludes that highlighting variances in the cost of energy is a "disservice to customers who have placed a value on these other options."[17]

Q. What does Mr. Caliva recommend?

[14] RESA St. 1 at 19.

[15] RESA St. 1 at 19.

[16] RESA St. 1 at 20-21.

[17] RESA St. 1 at 21.

A. Mr. Caliva recommends that PECO's proposed bill changes be rejected. If the Commission allows the bill changes to proceed, he submits that PECO's bill should include "disclosures regarding PECO's lack of knowledge of the characteristics of the EGS price and the nature of PECO's default service rate" on the bill. Furthermore, he recommends PECO be "directed to consider the availability of adding more space on the utility consolidated bill for suppliers, with the ability to do customer-specific messaging, to explain how the supplier product is different from the default service rate."[18]

Q. Do you agree with Mr. Caliva's recommendation regarding bill presentment?

A. No, I do not.

Q. Please explain.

A. Contrary to Mr. Caliva's assertion, highlighting the difference in cost does not devalue other non-cost considerations, it ensures consumers who seek to pay more for other services are able to make a fully informed decision. Rather than trick consumers into paying more for energy, it enables consumers to make a rational decision, in turn promoting transparency and consumer confidence in the market. As stated in my direct testimony, I support the inclusion of PECO's proposal to include clear and obvious information regarding the prices they are paying for EGS supply. I believe the presentation is sensible, practicable and consumer friendly.

Furthermore, I find Mr. Caliva's outright opposition to including this information odd, given the Commission-approved Joint Petition for Partial Settlement in PECO's DSP V specifically committed as follows:

> Within sixty days of the entry of a final, non-appealable Opinion and Order in this proceeding, PECO will convene a stakeholder process to discuss mechanisms to collect EGS pricing information compatible with PECO's "bill-ready" billing system and to develop bill improvements to ensure that shopping information is clear and transparent to

[18] RESA St. 1 at 23.

residential customers. This process will also address EGS recommendations to improve the presentation of shopping information on residential customer bills.[19]

PECO's proposal is the product of the stakeholder process approved in DSP V which included certain EGSs as well as a coalition of EGSs. PECO's proposal will make it easy for customers to evaluate EGS offers and EGS supply based on cost, consistent with the legislative purposes of the Choice Act.

Regarding Mr. Caliva's secondary proposals for additional disclosures and messaging on PECO bills, I strongly disagree. The proposals to include statements regarding default service (reflecting a single point in time) and disclaim knowledge of EGS products are unnecessary and unwarranted. PECO's bills are not the appropriate vehicle for customer specific marketing. Rather, as Mr. Caliva is no doubt aware, EGSs are heavily engaged in marketing outside of the billing context and can continue to communicate with their customers on a direct basis without the need to add clutter to PECO bills.

Finally, I do not agree with Mr. Caliva's apparent underlying concern that customers who choose to shop for non-price related reasons will have difficulty differentiating EGS products from default service based on PECO's proposed bill change. For example, a consumer who was choosing to shop for a green energy product with the knowledge that they would pay higher prices for such an offering would not be dissuaded by information that they are, in fact, paying a higher price. Indeed, customers participating in public input hearings readily acknowledged they chose to pay more for certain types of energy, belying RESA's arguments. Likewise, customers who enter into long term contracts with suppliers will not be alarmed to find that their EGS charges are, at least in some months, higher than PECO's default service prices. Nonetheless,

[19] Petition of PECO Energy Company for Approval of Its Default Service Program for the Period from June 1, 2021 through May 31, 2025 Docket No. P-2020-3019290, Joint Petition for Partial Settlement, ¶69 (August 13, 2020) available at: https://www.puc.pa.gov/pcdocs/1673271.pdf.

these groups of customers will benefit by having easy access to the pricing information provided in the chart, particularly if they are evaluating alternatives to current EGS supply. It is critical that consumers are well educated about the price they are paying for energy so they can make a truly informed decision about whether they want to willingly pay more.

III. REBUTTAL TO OCA

Q. Do you agree with Ms. Alexander's recommendation to terminate the Standard Offer Program?

A. Yes, I agree with Ms. Alexander. As she explains, the Standard Offer Program (SOP) has been in existence for a decade and there is substantial evidence that customers who have enrolled with EGSs through this program face charges in excess of the PTC both during the initial one-year contract, and after the end of the contract.[20]

As Ms. Alexander states, the Standard Offer Program (SOP) has been in place for ten years and has fulfilled its goal of exposing consumers to the residential energy supply market.[21] Many people who enroll in the SOP seek savings, but the savings they actually achieve are not transparent and are extremely limited. Furthermore, as stated in my direct testimony, customers who entered the retail supply market via the standard offer program often end up paying dramatically higher prices, which cancel out all the potential savings they may have achieved during their enrollment in the SOP. PECO should not be in the business of steering customers to EGS supply.

I also agree with Ms. Alexander that if the SOP continues to exist, it requires significant reform. Namely, I endorse her recommendation that at the end of the one-year contract, SOP

[20] OCA St. 2 at 3.

[21] OCA St. 2 at 14.

participants should be returned to default service unless they have affirmatively selected and/or signed a new agreement with an EGS.[22] This will eliminate the harmful practice of rolling over SOP customers into contracts with new pricing terms without the consumers' affirmative and fully informed consent.

Q. Do you agree with Ms. Alexander's recommendation to delete PECO's proposed "Electric Supplier Savings" column from its proposed changes to the bill disclosure?

A. No, I do not. However, I acknowledge that in Ms. Alexander's testimony, the issue she raises is with the label, *Electric Supplier Savings*, and not with the depiction of the calculated difference between EGS and default service, shown in green or red.[23] To address Ms. Alexander's expressed concern, I suggest this column be relabeled *Supply Charge Difference* or *Electric Supplier Pricing*.

Q. Please explain why PECO should retain the columns showing the Supply Charge Difference.

A. The color-coded presentation of how much more or less a consumer is being charged than if they were receiving default service is an important element of the chart. It will instantly tell consumers who may want to save money whether or not they are doing so without having to spend time calculating their savings or losses. Indeed, because of the color coding, the presence of savings or losses will be easier for consumers to gauge and can be a benefit to those who may otherwise struggle to understand all the details included in the bill.

Q. Does this conclude your rebuttal testimony?

A. Yes.

SURREBUTTAL TESTIMONY OF ELIZABETH R. MARX

On Behalf of
Tenant Union Representative Network
and
Coalition for Affordable Utility Services and Energy Efficiency in Pennsylvania

May 29, 2024

TABLE OF CONTENTS

I. INTRODUCTION 1

II. SURREBUTTAL TO RESA 2

III. SURREBUTAL TO PECO 7

I. INTRODUCTION

Q. Please state your name, occupation, and business address.

A. My name is Elizabeth R. Marx. I am an attorney, and currently serve as Executive Director of the Pennsylvania Utility Law Project, with offices at 118 Locust Street, Harrisburg, PA 17101.

Q. Have you previously submitted testimony in this proceeding?

A. Yes, I sponsored Direct Testimony and Rebuttal Testimony on behalf of the Tenant Union Representative Network (TURN) and the Coalition for Affordable Utility Services and Energy Efficiency in Pennsylvania (CAUSE-PA) on April 25, 2024 and May 15, 2024, respectively.

Q. What is the purpose of your surrebuttal testimony?

A. I am submitting this testimony in response to the Rebuttal Testimony of Frank Caliva, III, on behalf of the Retail Energy Supply Association (RESA), and the Rebuttal Testimony of Sulma Dalessio and the Rebuttal Testimony of Megan A. McDevitt on behalf of PECO Energy Company (PECO). I maintain my opposition to Mr. Caliva's recommendations, as discussed in my Rebuttal Testimony, and discuss why Mr. Caliva's Rebuttal Testimony is unsupported by factual evidence and unpersuasive. Likewise, in response to Ms. Dalessio and Ms. McDevitt, I continue to support my recommendations regarding PECO's bill presentment of Electric Generation Supply (EGS) pricing, as well as my proposed protections for Customer Assistance Program (CAP) applicants who have previously selected EGS supply and confirmed low income (CLI) customers who may seek savings via Time of Use (TOU) rates.

II. SURREBUTTAL TO RESA

Q. Please describe the aspects of Mr. Caliva's Rebuttal Testimony to which you will respond.

A. Mr. Caliva contends that a comparison between average EGS pricing and default service pricing is "spurious" and speculates as to the reason for why I perform such an analysis in my direct testimony.[1] He complains that my comparison between EGS pricing and default service is problematic because it represents "a snapshot of a given point in time" yet, ironically, he identifies purported savings utilizing monthly snapshots of per kWh prices purportedly depicted on papowerswitch.com.[2] Mr. Caliva then presents his disingenuous contention that, contrary to what is demonstrated in six years of monthly billing data, residential customers could save money by selecting an EGS product but simply choose not to do so.[3] He repeats his assertion that the Commission should open a statewide investigation regarding use of the term "Price-to-Compare" to describe default service.[4]

Q. What are the problems with Mr. Caliva's Rebuttal Testimony, described above?

A. There are numerous problems. Primarily, although he dismisses the relevance of the historical supplier pricing data included in my Direct Testimony, he has not rebutted its accuracy in any way. In other words, he expresses no disagreement with my conclusion that, in the aggregate, PECO's residential shopping customers did not obtain bill savings by shopping for EGS supply in any one of the 72 months reviewed.[5] Likewise, he expresses no disagreement

[1] RESA St. 1-R at 3.

[2] RESA St. 1-R at 4-7.

[3] RESA St. 1-R at 7.

[4] RESA St. 1-R at 9.

[5] TURN/CAUSE-PA St. 1 at 11.

with the fact that, over a six-year period, residential customers choosing to shop for EGS supply were charged nearly 150% of the price of default service, in excess of $800 million more than they would have paid if they had chosen to remain on default service.[6] In short, Mr. Caliva doesn't actually ***rebut*** any of the facts set forth in my testimony.

Instead, Mr. Caliva continues to blame default service, arguing that default service – a statutorily mandated option for all consumers – has created a barrier to competition. He contends that my testimony, and that of OCA witness Barbara Alexander, simply show "that the majority of residential customers continue to remain with default service despite the availability of 'lower priced' products in the competitive market."[7] However, he fails to observe, as I point out in my Direct Testimony, that residential customers are increasingly ***choosing*** to remain with default service based on their experience with higher priced EGS supply.[8] If EGSs could actually deliver " 'lower priced' "[9] products that appealed to residential customers, the data would not show the declining rate of residential customers choosing to contract for EGS supply. The fact is, consumers have lost trust in the competitive market because it has repeatedly failed to deliver on the promise of bill savings.

Importantly, the price data compiled in RESA's Energy Market Savings Reports, appended to Mr. Caliva's testimony,[10] appear to be misleading and incomplete. It appears as though RESA has identified only the per kWh charge associated with the applicable offers, omitting any other fees and charges that may apply. Indeed, in response to a discovery request

[7] RESA St. 1-R at 8.

[8] TURN/CAUSE-PA St. 1 at 13.

[9] Id.

[10] RESA Exh. FC-7; RESA Exh. FC-8; RESA Exh. FC-9.

regarding RESA's Energy Market Savings Report, Mr. Caliva claims not to have any information about actual supplier charges over time.[11] As a result, he has failed to support his claim as to the availability of " 'lower priced' " products in the competitive market.

In fact, the lowest price per kWh offers published on papowerswitch.com typically include other fees. To help illustrate this issue, I have attached as TURN/CAUSE-PA Exhibit VIII an export of the CSV data regarding EGS offers available in PECO's service territory on May 18, 2024.[12] I have sorted this data by per kWh charge (from low to high). These EGS offers also appear in TURN/CAUSE-PA Exhibit IX, which is a printout of this information from papowerswitch.com on the same date.

Utilizing RESA's approach, one would assume that SFE Energy's offer at $0.0469 per kWh shown in TURN/CAUSE-PA Exhibit VIII[13] presents a substantial savings opportunity and that a customer could calculate their anticipated savings by multiplying their usage by $0.0474 per kWh (the difference between PECO's PTC of $0.943 and SFE Energy's offer of $0.0469). However, this would be wrong because this particular offer includes a $20.99 monthly service fee. This offer also includes the following confusing statement (identified under "More Info" in TURN/CAUSE-PA Exhibit VIII):

> You may pay a daily customer charge in the amount of $0.69 per commodity, which includes commodity related charges to provide you with your electricity supply service.

Assuming "may" means "will," this EGS offer would impose an additional $20.70 in a typical month. Accordingly, whether and to what extent choosing this EGS offer will result in savings is

[11] Response to OCA-I-15.

[12] Note the American Power & Gas and Santanna Energy Services offers (shown in the first two rows) do not utilize per kWh pricing.

[13] TURN/CAUSE-PA Exhibit VIII at 2. TURN/CAUSE-PA Exhibits I through VII are attached to my Direct Testimony, served on April 25, 2024.

not as simple as comparing the per kWh pricing. Instead, this EGS offer requires a customer to evaluate whether the fixed charges are more or less than the per kWh "savings" based on the amount of electricity they use in a given month and then make a determination as to whether reward dollars and/or carbon reduction features included in this offer are sufficient to warrant any higher price.

I note here my deep concern about the framing of the carbon reduction features of this example offer, which only further complicates the ability of consumers to make an informed decision about the price they pay for energy services. The offer is listed as including 0% renewable energy; however, it claims that the supplier "will purchase carbon emissions credits to offset 100% of the electricity carbon footprint from your household usage."[14] It is unclear how the supplier will deliver on this promise, as the only tangible (yet still unverifiable) carbon-related component in this offer is the supplier's stated commitment to planting a single "complimentary tree per customer."[15] While I acknowledge that the opportunity to erase your carbon footprint is appealing to many consumers who may choose to pay a little more for that opportunity, voluntary carbon emission and carbon offset markets have proven to fall far short of delivering carbon emission reductions here in Pennsylvania. While I am not suggesting that the Commission should address the greenwashing issues with this particular offer in the context of this proceeding, I do think it highlights the critical importance of ensuring consumers are able to make an informed decision about the bottom-line price they are willing to pay for energy – inclusive of all billed costs.

[14] TURN/CAUSE-PA Exhibit VIII at 2; TURN/CAUSE-PA Exhibit IX at 1.

[15] TURN/CAUSE-PA Exhibit VIII at 2; TURN/CAUSE-PA Exhibit IX at 1.

Q. Why is this example important?

A. The example I identified demonstrates precisely why PECO should include EGS pricing data in its bill presentment. When a customer relies solely on the per kWh charges to evaluate EGS offers, as RESA appears to have done in its Market Savings Reports, they are reasonably led to expect savings that will likely never materialize. Indeed, as shown in TURN/CAUSE-PA Exhibit IX, the Commission's own website calculates the estimated monthly cost of accepting SFE Energy's offer, described above, simply by multiplying the per kWh rate by 700 kWh ($0.0469 x 700 = $32.83).[16] In reality, SFE Energy's offer would result in monthly supply charges of $74.52 for 700 kWh of usage ($0.0469 x 700 + $20.99 + $20.70). Notably, this exceeds the charges PECO would impose based on the price to compare by more than $8.00 ($65.98) – a roughly 13% increase in supply rates.

As I stated in my Direct Testimony, "customers should be given clear and obvious information regarding the prices they are paying for EGS supply and advising them through PECO billing is sensible, practicable, and consumer friendly."[17] The SFE Energy example proves this point. The offer terms are confusing and the Commission's website, like RESA's Energy Market Savings Report, fails to give detailed, accurate, and complete information to determine what a customer will be charged for electricity if they choose this offer. For this reason, PECO's proposed bill presentment changes are vital to helping customers understand and evaluate, on an ongoing basis, whether their EGS prices are consistent with their expectations.

[16] TURN/CAUSE-PA Exhibit IX at 1.

[17] TURN/CAUSE-PA St. 1 at 22.

III. SURREBUTAL TO PECO

Q. Please describe the aspects of Ms. Dalessio's Rebuttal Testimony to which you will respond.

A. There are three issues in Ms. Dalessio's Rebuttal Testimony that warrant response. First, I address Ms. Dalessio's acceptance of OCA witness Alexander's proposal to remove the third column from its proposed bill design change entitled "Electric Supplier Savings." Second, I address her contention that PECO's CAP terms and conditions cannot prohibit imposition of supplier fees and penalties. Finally, I respond to her objection to facilitating access to CAP by enabling a customer to drop EGS supply via the PECO CAP application. I address each of these issues in order.

Q. Please discuss PECO's proposal to accept OCA witness Alexander's removal of the third column from PECO's proposed bill design change.

A. As I discussed in my Rebuttal Testimony,[18] OCA witness Alexander raised an issue with PECO's proposed "Electric Supplier Savings" column heading shown in PECO's proposed bill design.[19] She recommended this column, which shows the calculated difference between the amount of the bill attributable to EGS supply, if any, and default service, be removed. I supported PECO's proposal in my Direct Testimony, but recognized Ms. Alexander's concern that customers choosing EGS supply would not always attain savings, potentially leading to confusion. As a result, I recommended that, instead of discarding the third column entirely, PECO simply relabel the column *Supply Charge Difference* or *Electric Supplier Pricing*.[20]

[18] TURN/CAUSE-PA St. 1 at 22.

[19] PECO Exhibit SD-6.

[20] TURN/CAUSE-PA St. 1-R at 11.

Q. What do you recommend?

A. For the reasons stated in my Rebuttal Testimony, I maintain that PECO should retain the third column and relabel it as I previously advised.

Q. How do you respond to Ms. Dalessio's statement that PECO's CAP cannot prohibit supplier fees and charges?

A. I believe Ms. Dalessio is incorrect. I am advised by counsel for TURN and CAUSE-PA that the legal aspects of this issue will be fully addressed in briefing. Nevertheless, I note that PECO has an express obligation to "administer CAP in a manner that is cost-effective for both CAP participants and the non-CAP participants," and the Commission has a corresponding duty to oversee PECO's cost-effective administration of CAP.[21] In fact, the Commonwealth Court has previously concluded that a prohibition on EGS termination and cancellation fees "would provide an added layer of protection to CAP participants consistent with the affordability goals of the Choice Act" – and subsequently approved limits on EGS offers, including CAP rules which would prohibit early termination and cancellation fees.[22]

Allowing EGS's to charge termination or cancellation fees to customers seeking access to CAP results in three completely avoidable, negative outcomes.

First, the CAP applicant is presented with a bad economic outcome; a disincentive to enroll in CAP. As I previously explained at length in my direct testimony, CAP enrollment is critically important to help stabilize access to service for low income customers – most often

[21] Coal. for Affordable Util. Servs. & Energy Efficiency in Pennsylvania v. Pa. PUC, 120 A.3d 1087, 1103 (Pa. Commw. Ct. 2015).

[22] Coal. for Affordable Util. Servs. & Energy Efficiency in Pennsylvania v. Pa. PUC, 120 A.3d at 1107; see also Retail Energy Supply Ass'n v. Pa. PUC, 185 A.3d 1206, 1217 (Pa. Commw. Ct. 2018).

during times of acute economic instability. A low income customer seeking to access rate relief should not be advised that they will face additional EGS charges as a condition of receiving affordable bills from PECO's CAP.

Second, the imposition of a termination or cancellation fee on a CAP participant who previously shopped for EGS supply would impose an economic burden that could threaten the CAP participants' ability to pay CAP bills – potentially undermining their success in the program after they enroll. Any additional charges associated with electric service (such as termination or cancellation fees), even if not imposed by PECO, would increase the payment demands to the customer, creating the likelihood that the CAP households' monthly resources would be insufficient.

Third, and finally, I note that failure to prohibit early cancellation or termination fees has the practical effect of delaying enrollment in CAP, thereby unnecessarily increasing the accrual of pre-program arrears. This has the corresponding effect of increasing the overall cost of CAP, which is ultimately recovered from other residential ratepayers.

For each of these reasons, and as explained more thoroughly in my Direct Testimony,[23] PECO's CAP should include a prohibition on EGS early cancellation or termination fees to ensure that the low income household enrolling in CAP does not face unaffordable monthly expenses associated with a prior EGS supply contract and, in turn, to help reduce programmatic costs borne by other residential customers who support the program through rates.

[23] TURN/CAUSE-PA St. 1 at 20-22.

Q. Has any other EDC adopted CAP rules consistent with your recommendation?

A. Yes, the First Energy Companies (now FE PA),[24] through their currently-effective DSPs, protect new CAP enrollees by prohibiting early cancellation or termination fees. As set forth in the Recommended Decision of Administrative Law (ALJ) Judge Jeffrey A. Watson,[25] "No EGSs will be permitted to charge early cancellation, termination or other fees to any shopping customer transitioning into one of the Companies' CAP programs."[26] PECO should follow the First Energy Companies' lead and adopt an identical protection for CAP enrollees in its DSP.

Q. Why does Ms. Dalessio object to facilitating the removal of EGS supply in connection with application for CAP?

A. Ms. Dalessio states that "[t]he decision to cancel an EGS contract should be made by the customer as they may be subject to early termination or other fees which PECO is not aware of at the time of CAP enrollment."[27] She contends that PECO's existing process ensures customers are receiving default service before entering CAP.[28]

Q. How do you respond?

A. First, I agree with Ms. Dalessio that the option to return to default service can and should continue to rest with the consumer. My proposal is consistent with this process, enabling consumers to elect to return to default service as part of the CAP application process.

---

[24] Metropolitan Edison Company, Pennsylvania Electric Company, Pennsylvania Power Company and West Penn Power Company recently merged, and are referred to herein as FirstEnergy Pennsylvania (FE PA).

[25] The Commission adopted the Recommended Decision of ALJ Watson by Order entered August 4, 2022.

[26] Petition of Met Ed., Penelec, Penn Power, and West Penn Power for Approval of Its Default Service Plan for the Period From June 1, 2023 through May 31, 2027, Recommended Decision, Docket Nos. P-2021-3030012, -13, -14, -21, at ¶72 (June 29, 2022).

[27] PECO St. 1-R at 28.

[28] Id.

Importantly, the Commission's switching regulations are explicit that a consumer may elect to return to default service by contacting the utility, without requiring direct communication with the supplier, to participate in a Commission-approved program.[29]

Moreover, my proposal for PECO's DSP to prohibit EGS early termination or cancellation fees addresses Ms. Dalessio's primary concern. By prohibiting such fees, PECO's CAP can ensure that new participants do not face unaffordable demands associated with prior EGS supply. In addition, as set forth in my Direct Testimony, PECO's current process is administratively cumbersome and imposes additional steps beyond submitting a CAP application and supporting documentation.[30] While Ms. Dalessio is correct that PECO's process ensures the customer returns to default service, it does so at the expense of PECO and the applicant's time and labor, likely when the applicant is most in need of expedient access to CAP. As I noted above, this delay unnecessarily adds to the financial burden on the CAP applicant and drives unnecessarily higher programmatic costs to retire pre-program arrears. Prompt enrollment in CAP is critical to helping reduce overall costs for both CAP participants and other residential ratepayers. For these reasons, I maintain that PECO should facilitate removal of EGS supply in connection with the approval of a CAP application, with an appropriate statement advising the customer that, by completing the application, they are agreeing that they will be returned to default service at the time of CAP enrollment.[31]

[31] TURN/CAUSE-PA St. 1 at 20.

Q. Please describe the aspects of Ms. McDevitt's Rebuttal Testimony that you will respond to.

A. Ms. McDevitt disagrees with my recommendations to conduct affirmative outreach to confirmed low-income (CLI) customers enrolled in TOU rates and to adopt a call center script to identify whether a caller inquiring about TOU rates may be low income. Ms. McDevitt recognizes my concerns, but nonetheless opposes both of my recommendations. However, Ms. McDevitt states that PECO will add a disclosure to its TOU webpage substantially the same as the call center script I recommended.

Q. How do you respond?

A. While I appreciate PECO's incorporation of language on its TOU website advising customers having difficulty affording electric service of programs and services that can help, I stand by my recommendations. Although PECO contends it should not influence a customer's decision on whether to enroll in PECO's CAP or TOU rates, I believe that the imposition of higher TOU charges for a CLI customer is inconsistent with the mandates in the Public Utility Code. The legal aspects of this argument will be addressed through briefing. I nevertheless note here that the Public Utility Code requires utilities to "compute bills under the rate most advantageous to the patron."[32] For most CLI customers, PECO's CAP rates are more advantageous than other rates, including TOU rates. As a consequence, PECO should conduct affirmative outreach to CLI customers enrolled in higher TOU rates – those customers are not receiving the most advantageous rates. Furthermore, my call center script should be adopted as a reasonable, non-intrusive service improvement that will help identify more customers for whom

[32] 66 Pa. C.S. §1303.

CAP, rather than TOU, is the most advantageous rate. If a customer is inquiring about an alternative rate, such as the TOU, I believe it is perfectly reasonable to ask the customer whether they are interested in learning about income-qualified programs to help reduce rates.

Q. Does this conclude your surrebuttal testimony?

A. Yes.

May 29, 2024

Price	Supplier	Type	Cancellation Fee	Discounts available?	Introductory price?	More info	Service Type	Rate type	Term Length	PA wind	Renewable Energy	Term End Date	Enrollment Fee	Monthly service fee amount	Contact Phone Number
0	American Power & Gas of Pennsylvania LLC	Unlimited	50	No	No	Flat Rate supply plans start at $11 per month, quotes are custom and based on historical usage for the previous year plus eligibility and approval. $11 may not be indicative of the actual price quote. The flat rate covers the supply cost only and does not include utility fees or taxes. Restrictions apply. Eligibility will be determined by American Power & Gas of PA with the right to reject any ineligible enrollment requests. Accepted accounts whose usage increased by more than 25% of their average usage will be reevaluated and may be required to change plans. Cancel fee applies to first twelve months only. Flat rate plans are only available for qualifying customers with use of 34,000 kWh or less annually.	Residential	R - Regular Residential Service	48	No	No	No	No		800-380-9261
0	Santanna Energy Services	Unlimited	$120.00	No	No	Use all the natural gas and electricity you need.* Pay the same amount every month! Plans start as low as $53.00 per month, but every customer receives a unique price quote based on their historical energy usage and other factors. The $53.00 per month estimate may not be indicative of your actual price quote. *Restrictions apply. Enrollment based upon program eligibility. Customers using more than 125% of normal monthly usage as determined by Santanna may be required to switch plans. Santanna's fixed monthly price is only for Santanna's supply costs. Utility fees and taxes are separate and in addition to this fixed price offer. Customers that use more than 30,000 kWh per year are not eligible for any Santanna Unlimited Energy plan. Santanna reserves the right to reject any Unlimited Energy enrollment requests that do not comply with program requirements.	Residential	R - Regular Residential Service	12	No	No	No	No		866-752-1907

0.0469	SFE Energy Pennsylvania, Inc.	Fixed	$7.50	No	Yes	Online offer only and this offer is exclusively available to new customers. To enroll, please visit our sign-up page at https://signup.sfeenergy.com/. Experience peace of mind with our fixed-price plan, and unlock additional benefits by earning $50 in reward dollars every month. Enjoy exclusive access to a world of possibilities: local deals, restaurants, movies, online shopping, gift cards, and more. Plus, the best part? Your reward dollars never expire! SFE Energy will also plant 1 complimentary tree per customer. SFE Energy will purchase carbon emissions credits to offset 100% of the electricity carbon footprint from your household usage. An early cancellation fee of $7.50 plus applicable taxes for each month or partial month remaining on the electricity supply service Agreement Term will apply if the Agreement is terminated prior to the end of the Term selected. You may pay a daily customer charge in the amount of $0.69 per commodity, which includes commodity related charges to provide you with your electricity supply service. SFE Energy Pennsylvania, Inc.

1-877-316-6344

Online offer only and this offer is exclusively available to new customers. To enroll, please visit our sign-up page at https://signup.sfeenergy.com/. Experience peace of mind with our fixed-price plan, and unlock additional benefits by earning $50 in reward dollars every month. Enjoy exclusive access to a world of possibilities: local deals, restaurants, movies, online shopping, gift cards, and more. Plus, the best part? Your reward dollars never expire! SFE Energy will also plant 1 complimentary tree per customer. SFE Energy will purchase carbon emissions credits to offset 100% of the electricity carbon footprint from your household usage. An early cancellation fee of $7.50 plus applicable taxes for each month or partial month remaining on the electricity supply service Agreement Term will apply if the Agreement is terminated prior to the end of the Term selected. You may pay a daily customer charge in the amount of $0.69 per commodity, which includes commodity related charges to provide you with your electricity supply service.

The price you will pay for electricity supply under this Agreement will be based on the following factors: The PJM Day Ahead Locational Marginal Price of wholesale electricity, plus the following, which will be reflected as separate line items on your bill: (i) estimated Capacity charges, (ii) estimated Network Integration Transmission Service charges (iii) estimated gross receipts tax recovery charge, and (iv) an adder to cover EcoPlus’s margin, renewable portfolio standards costs, line losses and other costs and expenses. The amount of the charges may vary from month to month. Your electricity supply price may be higher or lower than the utility’s price in any particular month and there is no guarantee of savings. There is no limit on how much the price may change from one billing cycle to the next. Experience the future of energy with our 100% Renewable Energy product. Plus, enjoy added peace of mind with a complimentary Norton LifeLock Personal Identity Theft Protection Subscription (Valued over $300 annually). We value your loyalty, which is why we're thrilled to reward you with an Amazon Gift Card every six months of uninterrupted service. It's more than just a service; it's a commitment to your security, savings, and satisfaction

Major Energy
1-888-625-6760

A great time for new customers to lock in a fixed rate. With this energy plan, your commodity rate stays put for 12 months, guaranteed. Enjoy peace of mind with a fixed rate. With this energy plan, there is no monthly service fee and no early termination fee. For the $100 rebate, redeem the first $50 after one month of service and the second $50 after 6 months of service from Major. Valid for new residential and new small commercial enrollments only.

PART I: INTRODUCTION AND SUMMARY

Q. PLEASE STATE YOUR NAME, EMPLOYER AND TITLE.

A. My name is Frank Caliva, and I am the President of P.R. Quinlan Associates Inc. ("P.R. Quinlan").

Q. PLEASE DESCRIBE P.R. QUINLAN ASSOCIATES.

A. I founded P.R. Quinlan in July of 2014 which is a business-to-business consulting firm focused on retail energy policy that represents retail electricity and natural gas suppliers, brokers and a consumer education coalition for competitive suppliers. We provide clients with intelligence, analysis and insight that enhances their ability to navigate change, clarify opportunities and accelerate growth.

Q. ON WHOSE BEHALF IS THIS DIRECT TESTIMONY OFFERED?

A. This direct testimony is offered on behalf of the Retail Energy Supply Association ("RESA").[1]

Q. PLEASE DESCRIBE RESA.

A. RESA is an association of diverse competitive energy suppliers devoted to promoting vibrant and sustainable competitive retail energy markets for residential and business customers. Members of RESA include electric generation suppliers ("EGSs" or "competitive suppliers") licensed by the Commission, pursuant to the Electricity Generation Customer Choice and Competition Act ("Competition Act"),[2] to sell electric generation services to retail customers throughout Pennsylvania and in PECO's service

[1] The comments expressed in this filing represent the position of the Retail Energy Supply Association (RESA) as an organization but may not represent the views of any particular member of the Association. Founded in 1990, RESA is a broad and diverse group of retail energy suppliers dedicated to promoting efficient, sustainable and customer-oriented competitive retail energy markets. RESA members operate throughout the United States delivering value-added electricity and natural gas service at retail to residential, commercial and industrial energy customers. More information on RESA can be found at www.resausa.org.

[2] 66 Pa.C.S. §§ 2801 et seq.

territory. EGSs accomplish these sales pursuant to electric supply contracts entered into with retail customers and, for residential and small business customers, are required to follow the Commission's detailed regulations regarding language to be included in the contracts as well as the timing and content of notices to be provided to customers upon pending expiration of the contract or notice of material changes.[3]

Q. WHAT IS YOUR ROLE WITH RESA?

A. Effective March 13, 2023, I became RESA's national spokesperson. In this role, I am responsible for being RESA's media spokesperson, developing content on retail energy market developments, testifying before state legislatures and public utility commissions, and participating in strategic planning and initiatives for the organization.

Q. IN YOUR ROLE WITH RESA, DO YOU HAVE ACCESS TO ANY MEMBER'S SPECIFIC PRICING, MARKETING OR BUSINESS OPERATIONS?

A. No. RESA is a trade member organization which focuses on regulatory and political strategies to advance the development of competitive retail energy markets. Members do not discuss specific customers, pricing or markets as they pertain to competitive activity among one another, nor does the RESA organization itself maintain this type of information. My testimony about problems faced by competitive suppliers as a result of the current market structure, the design of PECO's default service plan and the proposals I will discuss below is informed by anecdotal information from members as well as their learned experience about how competitive markets operate in Pennsylvania and across the country.

[3] 52 Pa Code §§ 54.5 and 54.10.

Q. PLEASE DESCRIBE YOUR PROFESSIONAL EXPERIENCE PRIOR TO JOINING RESA AS ITS NATIONAL SPOKESPERSON AS WELL AS YOUR EDUCATIONAL EXPERIENCE.

A. I have worked nearly exclusively in the retail energy space since 2011 serving as a public affairs and policy consultant for retail energy suppliers and a state lobbyist for supplier coalitions in Maryland, New York and Pennsylvania. Prior to starting P.R. Quinlan in 2014, I managed the public affairs practice at Strategic Communications, LLC. In that role, I helped to identify and influence legislative and regulatory issues facing clients in both the traditional fossil fuel energy sector and the growing renewable energy area. I provided strategic planning facilitation to clients in multiple sectors – including energy, education, healthcare, financial services, engineering, manufacturing and more. Prior to joining Strategic Communications, LLC, I worked as a senior international trade specialist at the U.S. Department of Commerce. My experience includes identifying trade and policy barriers to the competitiveness of clean energy firms and developing effective strategies to overcome those obstacles.

I earned a Master of Arts in German and European Studies, concentrating in international business-government relations, from the School of Foreign Service at Georgetown University and a Bachelor of Arts in political science from Providence College.

My Curriculum Vitae and Selected Testimony and Comments is attached as RESA Exh. FC-1.

Q. HAVE YOU EVER PROVIDED TESTIMONY BEFORE THIS COMMISSION?

A. No.

Q. PLEASE SUMMARIZE HOW YOUR TESTIMONY IS STRUCTURED.

A. In Part II, I discuss the competitive market structure in Pennsylvania, the current status of shopping, and the role of these default service proceedings in support of fostering the development of a well-functioning competitive market.

In Part III, I discuss the specifics of PECO's proposals of interest to RESA members, why they are problematic from a competitive market standpoint and offer recommendations for improvement.

Q. PLEASE SUMMARIZE RESA'S RECOMMENDATIONS.

A. For the reasons I will discuss more fully below, RESA makes the following recommendations regarding PECO's DSP VI plan:

<u>Open a Statewide Investigation Regarding Default Service Messaging</u>

- A statewide investigation should be opened to investigate Commission approved messaging of default service as the "Price-to-Compare" to include discontinuing use of that term by replacing it with "default service rate" and how the messaging can be improved to support the ability of customers to make more informed decisions when they evaluate competitive offers.

<u>Reject Proposal to Add Calculated Default Service Supply Charge and Evaluation to EGS Charges on Residential Utility Bill</u>

- PECO's proposal to add a comparison chart to residential shopping customers' bills purporting to show what the customer would have paid if the default service rate had been applicable and including a comparison of the two charges should be rejected for the reasons to be discussed in this testimony.
    - If the Commission is not inclined to outright reject the proposal (which RESA strongly views as the only responsible outcome to avoid further entrenching in consumers' minds the supposed superiority of EDC provided default service), the Commission should require PECO to include disclosures about the price comparison as developed through a collaborative process and submitted to the Commission for final approval.
    - Disclosures must include the following concepts:
        1. a statement that PECO has no knowledge about the characteristics of the customer's chosen retail supply product or the value it provides to the customer and that the customer should be directed to review its contract with the supplier or contact it directly; and,

2. a statement that the default service rate reflects a single point in time and is the result of a Commission regulated procurement process that establishes the future rate with the guarantee of full cost recovery by the EDC from customers when the actual market rate turns out to be higher or lower.

- In addition, PECO should be directed to consider the availability of more space on the utility consolidated bill for suppliers, with the ability to do customer-specific messaging, to explain how the supplier product is different from the default service rate.

Addressing Supplier Issues During Customer Information System Upgrade

- As PECO continues with its Customer Information System upgrade, it should be directed to include specific processes whereby it collaboratively works with competitive suppliers to ensure their ability provide service and make offers to customers. Specifically, PECO should be directed to:

1. provide daily updates to competitive suppliers and weekly updates to Commission staff for at least the first 90 days of any system upgrade/transition which includes reporting on the number of issues identified by suppliers, the number of customers impacted, an explanation of PECO's efforts to resolve those issues without placing undue burden on suppliers, and an estimated timeline for resolution;

2. assign each supplier operating in the market a consistent point of contact for addressing customer system information upgrade issues experienced by that supplier; and,

3. exercise flexibility regarding troubleshooting supplier specific issues with the ultimate goal of offering realistic workarounds and solutions that do not place unnecessary burden on the supplier and ensure the best customer experience possible.

Recommended Revisions to Default Service Supply Procurement Processes

- Reject PECO's proposal to include a Capacity Proxy Price as part of its wholesale default service supply procurement process.
- To the extent the Commission is inclined to accept PECO's proposal to double the amount of its solar AEC procurement for default service, require PECO to allocate any solar alternative energy credits acquired through its long-term contract procurement process to the supply load for all distribution customers and not just default service customers.

Q. ARE YOU SPONSORING ANY EXHIBITS?

A. Yes, the exhibits I am sponsoring are described in the table of exhibits on the table of contents page of this testimony.

PART II: COMPETITIVE MARKET STRUCTURE

I. BACKGROUND REGARDING RETAIL COMPETITION IN PENNSYLVANIA

Q. PLEASE DESCRIBE THE FOUNDATION FOR ELECTRIC COMPETITION IN PENNSYLVANIA.

A. Although I am not an attorney, counsel has informed me about the statutory framework for competition which is useful information in support of RESA's recommendations. I understand that in 1996, Pennsylvania enacted the Electricity Generation Customer Choice and Competition Act ("Competition Act") to allow retail customers to choose the entity from whom they purchase electricity or electric generation services.[4] In enacting the Competition Act, the General Assembly determined that it is "in the public interest to permit retail customers to obtain direct access to a competitive generation market."[5] I am informed by counsel that this policy determination was based on the legislature's conclusion that "[c]ompetitive market forces are more effective than economic regulation in controlling the cost of generating electricity."[6] To enable electric choice, the Competition Act required electric utilities, like PECO, "to unbundle their rates and services and provide open access over their transmission and distribution systems to allow competitive suppliers to generate and sell electricity directly to consumers in this Commonwealth."[7] As a result of this law, the generation of electricity is no longer

4 66 Pa.C.S. §§ 2801 et seq.
5 66 Pa.C.S. § 2802(3).
6 66 Pa.C.S. § 2802(5).
7 66 Pa.C.S. § 2802(14).

regulated as a monopoly function.[8] However, the transmission and distribution services performed by EDCs continue to be regulated by the Commission as monopoly services.[9]

Q. WHAT ROLE DO RESA MEMBERS PLAY IN THE COMPETITIVE MARKET?

A. The Competition Act created electric generation suppliers ("EGSs"), which include companies like RESA members, that are licensed by the Commission to sell electricity or provide electric generation services to retail electric customers, using the transmission and distribution systems of the EDCs.[10] To provide these services, EGSs enter into private contracts with retail electric customers, which are required by the Commission to set forth the terms and conditions of service.[11] Counsel also informs me that while the Commission no longer regulates the generation of electricity as a monopoly function and does not regulate the supply prices charged by EGSs (although the Commission does prohibit customers participating in a low income customer assistance program from shopping),[12] the Commission has implemented a host of regulatory requirements for EGSs to follow that are intended to protect customers.[13]

Q. DO RESA MEMBERS SUPPORT RETAIL COMPETITION?

A. Yes, absolutely. RESA members are eager for the opportunity to develop and offer the innovative and creative products that consumers want but, to do so, the appropriate checks and regulatory systems need to be in place that balance the continuing dominance of EDC provided default service, the regulatory components included in determining the

12 66 Pa.C.S. § 2802(5) ("Competitive market forces are more effective than economic regulation in controlling the cost of generating electricity."); *Coalition for Affordable Utility Services and Energy Efficiency in Pennsylvania v. PUC*, 120 A.3d 1087, 1094 (Pa. Cmwlth, 2015); *HIKO Energy, LLC v. PUC*, 163 A.3d 1079, 1100 (Pa. Cmwlth. 2017), *aff'd on appeal*, 2019 Pa LEXIS 3139.

13 52 Pa. Code, Chapter 54; 52 Pa. Code §§ 57.171-57.180; 52 Pa. Code, Chapter 111.

default service rate, and to ensure that the EDC is working cooperatively with suppliers to provide reasonable and nondiscriminatory access to all the systems and information necessary to offer and provide competitive service.

Q. HOW DO EGSs INTERACT WITH EDCs TO PROVIDE SERVICE TO CUSTOMERS?

A. Stated simply, EGSs would not be able to offer or provide competitive services to retail customers without interfacing and having access to important EDC systems that have been developed and paid for by ratepayers during the time the EDCs operated as the monopoly provider for all electricity services. EDCs maintain all the customer information systems for specific customers, which includes important account information such as a customer's rate class, current and historical usage information, customer assistance program participation, and whether the customer has agreed to receive offers from competitive suppliers. EGSs are completely reliant on the utility systems to enroll and disenroll customers from competitive service. In sum, EGSs' largest competitor for supply service, the monopoly EDCs, control every aspect of the ability of EGSs to serve customers. I am informed by counsel that the Competition Act recognized the importance of ensuring that EGSs had reasonable and nondiscriminatory access to this information and the systems of the EDCs, so that they would have a full and fair opportunity to offer competitive services to customers.

Q. ALTHOUGH BOTH THE EDC, THROUGH THE DEFAULT SERVICE PRODUCT, AND EGSs, THROUGH THEIR CONTRACTS, OFFER SUPPLY SERVICE TO CUSTOMERS, DO EGSs AND EDCs PRICE SUPPLY PRODUCTS IN THE SAME WAY?

A. No. The EDCs develop the rate for their default service through the regulated processes approved by the Commission in these default service proceedings. The wholesale electricity purchased by the EDCs for default customers must be contracted for ahead of

the time of delivery at then-current market prices to create a "prudent mix" of long- and short-term supply contracts to achieve "the least cost to customers over time."[14] This nearly always guarantees a mismatch between the default rate and the actual wholesale market price when the supply is later delivered. As such, the default rate does not reflect the current market price but instead an average of the varied-term supply contract prices procured in earlier periods. The result is that the earlier obtained prices may be higher or lower than the wholesale price when the supply is delivered. I am informed by counsel that the Commission has been aware of the harmful effect of this mismatch for some time.[15]

In contrast and in a truly competitive marketplace, the manner in which EGSs set the price offered to a customer is based on a variety of market driven forces which include the actual market price of the commodity as well as other business and operating costs. However, because of the current role of EDC provided default service, instead of suppliers pricing their products based on market forces and in competition solely with one another, they must consider the default service rate (misleadingly called the "Price to Compare" or "PTC") which, as I just noted, includes non-wholesale electricity market components which is continually promoted as the benchmark.

[14] Section 2807(e)(3.4)(ii); *see also* §§ 2807(e)(3.3), (3.6) & (3.7).

[15] *End State Final Order* at 12 ("[D]ue to reconciliation and the mix of contracts that EDCs use to establish the PTC, EGSs must compete with a PTC that often is not correlated to wholesale energy markets and may move in directions opposite that of wholesale energy markets trends. This can inhibit consumers' ability to make informed decisions due to the receipt of false or misleading price signals.").

II. STATUS OF RETAIL COMPETITION

Q. HAS THE COMMISSION UNDERTAKEN REVIEWS OF THE STATUS OF RETAIL COMPETITION?

A. Yes, I am informed by counsel that the Commission thoroughly examined the state of electric competition as it existed between 2011 and 2013. In its *End State Final Order*,[16] the Commission summarized its findings and recommendations as follows:

> While shopping statistics alone are not indicative of the success of a competitive market, we note that, as of February 13, 2013, nearly two-thirds of Pennsylvania's electric customers still received electric generation supply from their EDCs. Despite a large number of EGSs in the market, many offers are only slightly below each EDC's PTC and few innovative product offerings have emerged to date that attract residential and small commercial customers into the competitive retail market.[17]
>
> * * *
>
> Therefore, the Commission, through this Final Order, recommends fundamentally changing the default service product so that it more closely resembles market conditions. Through the changes proposed herein, the Commission hopes to create a structure where the market drives prices charged by EGSs, where EGSs expand their investment in Pennsylvania due to certainty and a more level playing field, and where consumers enjoy competitive prices and a wide variety of innovative product offerings. In this manner, the Commission expects Pennsylvania to achieve and sustain the robust competitive market that was envisioned in 1996 by the General Assembly.[18]

Q. IN YOUR OPINION, HAS THE VISION ESPOUSED BY THE COMMISSION AT THAT TIME COME TO PASS?

A. No. Recent trends regarding shopping statistics underscore this point. Residential shopping peaked in April 2014 when 1,863,828 residential customers were served by an

---

[16] *Investigation of Pennsylvania's Retail Electricity Market: End State of Default Service*, Docket No. I-2011-2237952 (Order entered February 15, 2013) (*End State Final Order*), available at https://www.puc.pa.gov/pcdocs/1214105.docx.

[17] *Id.* at 11-12 (footnote omitted).

[18] *Id.* at 15.

EGS. As of January 1, 2023, that number had steadily declined to 1,207,224, a difference of 656,604 customers who returned to their EDC's default service. During the same period, shopping commercial customers decreased from 306,699 to 274,852, and, not surprisingly because of their sophisticated understanding of the benefits of competition, shopping industrial customers increased from 8,752 to 15,460.

In its October 2023 Retail Electricity Choice Report dated October 2023 for calendar year 2022,[19] the Commission states the following about shopping trends:

> In summary the total number of customer accounts served by EGSs in 2022 was down slightly from 27% to 30%, in 2021 and 2020 respectively, to 25%. The amount of load served by EGSs decreased from 89 million MWhs in 2021 to 86 MWhs in 2022.
> . . .
> The total percentage of all customer accounts served by EGSs decreased by 2% compared to 2021, **marking the sixth straight year of decreasing customer accounts.**
>
> EGS sales in Pennsylvania totaled 85,675,047 MWhs during calendar year 2022. This represents a **decrease** of 3,252,400 (4%) compared to . . . the previous calendar year. **During the same period, total EDC sales increased 6%.**

Q. WHAT DO THE MOST RECENT SHOPPING STATISTICS FROM THE COMMISSION REVEAL?

A. As of March 2024, the number of customers shopping is largely consistent with past trends. For residential customers 1,279,573 or 24.2% of all customers are shopping. For commercial customers, 295,169 or 40.3% of all customers are shopping. For industrial customers, 15,074 or 81.8% of all customers are shopping.[20] The Commission's website notes that the percentages are "based on the total number of customers of regulated

[19] *See* RESA Exh. FC-2 PaPUC Retail Electricity Choice Activity Report 2022 dated October 2023 at 2,3,and 8 (emphasis added).
[20] *See* RESA Exh. FC-3 PA PowerSwitch Monthly Update as of March 2024.

electric utilities in Pennsylvania as of March 31, 2024 (5,278,230 Residential + 733,218 Commercial + 18,416 Industrial = 6,029,864 Total Customers)." Also tracked by the Commission is the percentage of shopping customers relative to the percentage of load served. On a statewide basis, only 26% of the total residential load is being served by competitive suppliers.

Thus, as of March 2024. approximately 4 million of Pennsylvania's 5.3 million residential customers and approximately 440,000 of its 733,000 customers are **not** shopping for their electricity, while only approximately 3,300 of Pennsylvania's 18,000 industrial customers are not shopping.

While I agree with the prior Commission statement that shopping alone is not indicative of the status of competition, the current numbers and the trends over the years since the Commission's Retail Markets Investigation support the view that the market has become stagnant. At the most fundamental level, EDCs continue to be the providers of "first resort" default service with widespread brand recognition and elevation of their supply product as the Price to Compare – resulting in default service having an inherent competitive advantage over all competitive EGSs collectively.

Q. PLEASE EXPLAIN MORE FULLY HOW PROMOTION OF THE DEFAULT SERVICE RATE AS THE PRICE TO COMPARE AGAINST ALL COMPETITIVE EGS OFFERS PRESENTS COMPETITIVE MARKET CONCERNS.

A. The reality of today's retail marketplace for electricity is one in which consumers have been educated to elevate the default service supply product as the superior supply product when considering any and all of the competitive supply options in the marketplace. While consumers may compare one supplier product to another supplier product, they are educated to compare all supplier products to the default service supply product on the

basis of price and price alone.

This has been the result of years of education by the Commission, the EDCs and consumer advocates counselling consumers to judge competitive offers relative to the default service PTC without any disclaimers about that the nature of this product or the competitive advantages EDC-provided default service enjoys as the monopoly "provider of first resort." The justification for this education has been, in part, that the price of the default supply service of the EDC is determined through procurement processes developed and approved in these default service proceedings. This, in turn, permits the EDCs to claim that there is a measure of "regulatory" control over default service pricing that purportedly "protects" consumers – even though that price may be higher or lower than actual competitive market prices at any point in time. Customers do not need to make an affirmative choice to be served by the default service provider, nor do they need to make a choice to remain with the default service provided when a default service procurement period ends. In contrast, when exercising their right to shop, customers are free to select or deselect a competitive supplier offer at any time, based on their own unique needs and desires from suppliers who actively compete to attract customers to their products and services.

In addition, the default supply product has name and brand recognition due to the historical monopoly status of EDCs, the fact that EDCs provide distribution service to all customers in their service territory and that they continue to have an exclusive right to bill all customers (even those served by competitive suppliers). Further advantaging the default service supply product is that all distribution customers start with the EDC's supply service and now "default" back to the EDC's supply service when cancelling a

supplier contract or if they decide to enroll in a utility's low-income customer assistance program. EGS competitive supply products lack all of these inherent advantages, and, moreover, all EGSs are required to work with EDCs in order to serve any customer because the EDCs retain all the account data and control the entire process of enrolling and dropping customers for suppliers.

Q. WHY DOES THE ELEVATION OF THE DEFAULT SERVICE SUPPLY PRODUCT CREATE A BARRIER TO ENTRY FOR COMPETITIVE SUPPLIERS?

A. The presence of default service provided by the monopoly EDC as it is structured in Pennsylvania today does not foster a robust competitive environment for suppliers where innovation can flourish. Instead, the current market structure incentivizes suppliers to focus their efforts on attracting customers away from the monopoly utility that is offering a highly regulated default service product that, while rooted in market-based dynamics, does not reflect all of the risks and costs associated with providing competitive retail supply service. In short, default service and the current "Price to Compare" represent an entirely unlevel playing field that is unfair to consumers and the suppliers endeavoring to serve them. In addition, the default service product lacks product features provided by competitive market suppliers like fixed prices that do not fluctuate throughout the year or renewable content above the state required minimums.

Q. HOW DOES THE PRESENCE OF DEFAULT SERVICE AS IT IS STRUCTURED TODAY IMPACT THE DESIGN OF AN EDC'S DEFAULT SERVICE PROCUREMENT PLAN?

A. Because the default service product is the dominant generation supplier for residential customers and is subject to a regulatory review process in these default service proceedings, EDCs are incentivized to make proposals regarding the default service product to "fix" issues that do not appear to be functioning properly. In this proceeding,

for example, PECO is proposing to add a "comparison" chart to residential bills under the guise of "educating" customers about what they could have paid with the default service rate. PECO is also proposing the use of a Capacity Proxy Price and expansion of the use of long-term contracts to secure solar alternative energy credits for the default service load. The concerns PECO is seeking to redress, though, would likely not be present in a healthier market where a robust number of suppliers are making long term investments in the market, focusing on customer education and designing the most favorable products and services available through competitive market forces, rather than developed through a reverse engineering of the default service product.

Q. HOW DOES THE CURRENT STATE OF COMPETITION AS YOU HAVE DESCRIBED IT NEGATIVELY AFFECT CONSUMERS?

A. These structural barriers, which further entrench and continue the dominance of EDC provided default service, inhibit the full development of innovation and efficiencies which can be provided by EGSs. With the EDC default service supply dominating the market and consumers being educated to judge all competitive offers based on the price of the EDC provided default service, suppliers will have less incentive and ability to effectively offer innovative services, such as carbon free products or electric supply bundled with distributed energy or demand response, innovative billing and/or payment options, as well as a host of other innovations that have been shown to be available in other states or countries where suppliers have been able to compete without these barriers and which have benefitted customers by resulting in enhanced services, and in some cases, lower prices than they otherwise would have experienced.

Q. HOW ARE RESA'S PROPOSALS IN THIS PROCEEDING INTENDED TO ADDRESS THE CURRENT REALITY OF TODAY'S COMPETITIVE MARKET?

A. RESA members continue to believe, as the Commission stated in 2013, that "fundamentally changing the default service product so that it more closely resembles market conditions" is warranted and necessary to deliver true competitive offerings to customers. However, and in consideration of the on-going messaging surrounding the EDC's default service product as the barometer to judge all EGS competitive products, a good first step for the Commission would be to open a statewide investigation regarding the permissible messaging around the default service product to better educate customers about the how the default service product is developed to enable them to make more informed choices about competitive supplier options. I will discuss this recommendation further in the next section.

In addition, and notwithstanding the outcome of the suggested statewide investigation, there are specific aspects about PECO's proposals which must be rejected or revised because, if they are adopted as presented, they will only serve to further exacerbate the already existing inherent advantages enjoyed by the default service product. This will harm customers by creating more obstacles for competitive suppliers to innovate and offer the products and services customers want causing them to simply remain with the EDC's default service product. Quite simply, a competitive market cannot be fully realized if consumers do not participate in adequate numbers. Competition not only needs competing suppliers, but it also needs robust consumer activity. The Commission must reject proposals made in these default service proceedings which will result in a default service product that only continues to further suppress consumer activity by making it more difficult for suppliers to compete.

Q. IS THIS THE APPROPRIATE PROCEEDING FOR THE COMMISSION TO CONSIDER RESA'S PROPOSALS?

A. Yes. I am advised by counsel that the Commission and appellate courts have clearly determined that a default service proceeding is the opportunity for competitive suppliers to raise issues related to the EDC's proposed default structure and other mechanisms which have a direct impact on the ability of competitive suppliers to operate.[21]

PART III: SPECIFIC ISSUES AND RECOMMENDATIONS

I. STATEWIDE INVESTIGATION REGARDING DEFAULT SERVICE MESSAGING

Q. HOW DOES RESA RECOMMEND THE COMMISSION BEGIN TO ADDRESS THE CONCERNS YOU IDENTIFIED ABOVE REGARDING THE CURRENT MESSAGING OF THE DEFAULT SERVICE RATE?

A. As discussed in the previous section, a good first step to begin to address the current competitive market deficiencies would be for a statewide investigation to be opened to investigate Commission approved messaging of the default service as the "Price-to-Compare" to include discontinuing use of that term and replacing it with "Default Service Rate" and how the messaging can be improved to support the ability of customers to make more informed decisions when they evaluate competitive offers. At a minimum, changing the customer-facing "name" of the default service rate and better educating customers about the nature of the default service product would be an improvement over the current messaging which encourages customers to only consider the price of the default service rate when judging competitive market offers.

[21] *See Respond Power, LLC v. Pa. Public Utility Commission*, 250 A.3d 547 (Pa. Cmwlth. 2021).

Q. WHY DO YOU SEE THIS AS ONLY A FIRST STEP?

A. The reality is that as long as the historical monopoly provider continues to dominate the market supported by less than transparent messaging as sanctioned by regulators and advocates, EGSs will be reluctant to make longer term investments in the market. Despite the Commission's acknowledgment back in 2013 of the need to "fundamentally change" the default service product, I recognize that the Commission has been hesitant to pursue such change in subsequent years. A statewide investigation focused on the messaging of the default service product, however, would be a beneficial path for the Commission to pursue at this time and, because of the focus on messaging, is one that should not be objectionable to any party in this proceeding. Simply put, EGSs are reluctant to make longer term investments in the market so long as the messaging reinforcing the purported superiority of the default service product rate continues. Rather EGSs will continue to be primarily focused on short-term arrangements that undercut the DSP. This hampers the ability of EGSs to develop more innovative and a greater variety of competitive products and services for consumers. As discussed previously, this is a disappointing result for consumers which, based on the information I reviewed earlier, show no hope of reversing without decisive Commission action in this proceeding.

II. COMPETITIVE MARKET OPERATIONAL ISSUES

(A) Revisions to Residential Bill Format

Q. WHAT IS THE REVISION PECO IS PROPOSING FOR THE RESIDENTIAL CUSTOMER'S UTILITY BILL?

A. According to PECO Witness Dalessio, PECO proposes to add a chart to the first page of the bills of shopping residential customers purporting to compare the customer's total supplier charges for the billing period and "what the dollar amount of the charges would

be under PECO's applicable PTC based on the customer's usage during the billing period." (PECO St. No. 1 at 29, PECO Exh. SD-6). According to Ms. Dalessio, this revision will enable customers "to evaluate competitive generation service offerings." (PECO St. No. 1 at 29). In discovery, PECO explained that the purpose of the initiative was to "ensure that shopping information is clear and transparent to Residential Customers" and the process of considering "bill improvements" was to "address EGS recommendations to improve the presentation of shopping information on Residential Customer bills."[22]

Q. DOES PECO'S PROPOSAL SATISFY THE STATED OBJECTIVES?

A. No. Calculating the default service charges that would have applied and then providing a chart evaluating whether it is higher or lower and using red and green text based on the outcome does not provide clear and transparent information to residential customers. As I discussed previously, the default service product and an EGS's contractual retail product are priced very differently, and nothing in the proposed presentation explains that. Moreover, including a calculated default service supply rate and a chart showing whether it is above or below the contracted supplier's actual charges on a customer's bill after they have elected to enter into a contract with a supplier sends judgmental messaging to the customer. If the calculated default service supply charges are higher, that amount is identified in "green" text clearly signaling that the shopping choice was good. Conversely, if the calculated default service rate is lower then the competitive supplier charge, the amount is stated in "red" conveying an "alert" message to the consumer about their shopping choice. As explained more below, there are many reasons

[22] *See* RESA Exh. FC-4 PECO Response to RESA I-4, PECO Bill Presentation January 26, 2021.

why a straight comparison of the calculated default service rate and the actual EGS price may be vastly different.

Q. PLEASE PROVIDE EXAMPLES OF HOW THE DEFAULT SERVICE RATE AND THE EGS PRICE MAY BE DIVERGENT IN A PARTICULAR BILLING MONTH.

A. Including a visual graph to portray the difference between the supplier price and the default service rate in effect during a particular month's billing period does not consider the nature of the supplier contract, the length of the contract (which could be anywhere from one month to multiple years), or any other reason why the price in a particular month may be higher than the PTC. According to the Commission's most recent Activity Report, EGSs are offering the following types of products to customer as of December 31, 2022:[23]

1. Flat and Time-Varying Rates with residential customers comprising 85% of flat rate accounts and 76% of time-varying accounts.
2. Fixed-Term Contract Lengths comprising 94% of customers on a one-year, fixed-term contract.
3. Curtailable Contracts.
4. Green Power contracts.

Q. PLEASE EXPLAIN WHY COMPARING THESE TYPES OF RETAIL CONTRACTS TO THE DEFAULT SERVICE RATE IS MISLEADING.

A. Examples include a choice to select a product that includes renewable energy[24] or a product that provides long term price stability, or a product that includes any number of

[23] *See* RESA Exh. FC-2 at 21.

[24] According to data collected by the Commission in its Annual Retail Electric Choice Reports, the percent of EGS accounts with "Green Power" continues to be noteworthy. The reports are available at: https://www.puc.pa.gov/filing-resources/reports/retail-choice-activity-reports/. According to the Report for 2022 (published in October 2023), EGS accounts with "Green Power" accounted for a quarter of all EGS accounts. *See* RESA Exh. FC-2. In the Report published in January 2023 for 2021, "Green Power" EGS accounts accounted for nearly 40% of all EGS accounts. *See* https://www.puc.pa.gov/media/2203/retail-elec-choice-report-21draft11622-communications-edits-with-covers-011323.pdf.

benefits or superior customer service – any of which could result in a price that is higher than PTC at any point in time. A simple example is a customer electing to enter into a longer-term contract to provide price stability over a period of years. Providing a point in time snapshot of the comparison of the two does not portray an accurate long term view of the value to the customer of negotiating a longer term product. Similarly, a customer may be on a product that incentivizes them to shift usage to a lower cost period (such as an electric vehicle or other time of use supply contract). The customer may decide for whatever reason not to shift usage in a particular period which could result in the customer paying more in one billing period but much less in another. Portraying a comparison in one month between the default service rate and the EGS price does not provide meaningful information to the customer who is making usage decisions on a month by month basis.

In sum, highlighting variances between the default service rate and the EGS contract price for consumers who have elected to shop for reasons beyond such a price comparison is truly a disservice to customers who have placed a value on these other options. It is also wholly unnecessary as the PTC is printed on the bill, and customers always have the ability to compare the price they are paying a supplier to the price they would get if they stayed with the regulated utility. Adding a visual graph to highlight the variance only serves to further reinforce the wrong message to customers that they should be judging all competitive offers by the default service rate.

Q. IS THE COMPARISON OF THE DEFAULT SERVICE RATE TO THE EGS PRICE A COMPARISON OF SIMILARLY DEVELOPED PRICES?

A. No. As discussed previously, PECO's default service rate is the product of a highly regulated procurement process through a Commission approved default service plan that

is backward-looking where the default service provider is guaranteed full cost recovery for the provision of that service. Competitive retail supply products are priced based on current market forces and include the retail costs associated with providing service going forward and an associated risk premium to account for future changes in the costs to service customers. The proposed comparison chart creates the misleading impression that the pricing developed for the default service products is the same and comparable to the retail supply product, which it is not.

Q. GIVEN ALL OF THESE CONCERNS, WHAT DO YOU RECOMMEND REGARDING PECO'S PROPOSED RESIDENTIAL BILL COMPARISON?

A. I strongly recommend that the proposal be rejected as anti-competitive, misleading and serving no significant purpose beyond further entrenching the view that default service supply is the superior supply product for customers based solely on price. I believe a Commission rejection of this proposal in this proceeding is of the utmost importance both because of the likely long term damaging effects to the competitive market and because PECO is the first utility to propose this type of comparison. If the Commission does not take action now to reject it, I expect other EDCs will make similar proposals.

Q. IF THE COMMISSION IS UNWILLING TO REJECT THE PROPOSAL DO YOU HAVE ALTERNATE RECOMMENDATIONS ON WAYS TO POTENTIALLY BLUNT THE ANTI-COMPETITIVE IMPACTS OF INCLUDING SUCH BILL COMPARISON?

A. Yes. While I wish to be clear that RESA does not support PECO's proposal nor any similar proposal purporting to provide a straight price comparison of the default service rate and the EGS contract price, I realize the value to be gained from better consumer education. I do not believe this proposal achieves that goal, which is why RESA's primary recommendation is to reject the proposal and focus on consumer messaging in a statewide forum.

However, and only to the extent the Commission is not inclined to adopt RESA's preferred recommendations, I do have an alternate recommendation. At a minimum, disclosures regarding PECO's lack of knowledge of the characteristics of the EGS price and the nature of PECO's default service rate must be included with any type of comparison chart. Since PECO is not proposing to implement the bill design change until two years after the start of the default service plan period, there is time to collaboratively craft appropriate disclosure language for the Commission's consideration and final approval. I would note, too, that while PECO may take the view that it has already satisfied this with its prior collaborative, RESA does not share that opinion with the resulting proposal and, therefore, strongly supports more clear direction from the Commission that the scope of the disclosures discussed here must be included on any bill redesign with the collaborative focusing solely on the specific required disclosure language.

In addition to determining the text for the required disclosures, RESA recommends PECO also be directed to consider the availability of adding more space on the utility consolidated bill for suppliers, with the ability to do customer-specific messaging, to explain how the supplier product is different from the default service rate. Again, the purpose of this recommendation is to provide the opportunity for EGSs to detail the product their customer as selected on the bill which, pursuant to Commission requirements, can only be issued by the utility.

(B) Customer System Information Upgrade

Q. WHY IS PECO'S PROPOSAL TO ADD A COMPARISON CHART TO THE RESIDENTIAL BILL NOT EXPECTED TO GO LIVE UNTIL TWO YEARS AFTER THE START OF THE DSP VI PLAN PERIOD?

A. According to PECO Witness Dalessio, the implementation date is tied to anticipated completion of its customer information system upgrade. (PECO St. No. 1 at 29).

Q. PLEASE EXPLAIN HOW A UTILITY'S CUSTOMER INFORMATION SYSTEM UPGRADE IMPACTS COMPETITIVE SUPPLIERS?

A. Nearly all aspects of the ability of a competitive supplier to provide retail service to an end user customer is dependent on interactions with a utility's customer information system because this system houses all the account, billing and usage data for customers in the service territory and it is controlled entirely by PECO. Competitive suppliers are at the mercy of PECO to operate this system fairly and without errors. EGSs largely interface with the utilities through electronic data interchange ("EDI") processes to enroll a customer, to ensure the customer is properly billed and to drop a customer. The customer information system also supports the availability of data on the Eligible Customer List ("ECL") upon which competitive suppliers rely to gain information about a potential customer's billing and usage history and whether the customer has agreed to have information shared with competitive suppliers.

Q. DOES PECO PROVIDE ANY INFORMATION IN ITS FILING ABOUT EXPECTED IMPACTS ON SUPPLIERS AS A RESULT OF ITS ON-GOING CUSTOMER INFORMATION SYSTEM UPGRADE?

A. No. In response to a discovery question from RESA seeking information about expected supplier impacts, Ms. Dalessio referenced supplier webinars held in 2023 and early 2024 as well as information posted to its supplier website.[25]

[25] *See* RESA Exh. FC-5, PECO Response to RESA-I-3 Customer Information Supplier Communications.

Q. HAVE PECO'S COMMUNICATIONS TO SUPPLIERS REGARDING THE UPGRADE OF ITS CUSTOMER INFORMATION SYSTEM BEEN SUFFICIENT?

A. No. I want to be clear that RESA members appreciate the efforts to date and the information that has been shared. However, based on the anecdotal information I have received from suppliers about how the process has functioned so far, there is significant room for improvement in terms of establishing a more collaborative partnership regarding those processes that specifically touch competitive supplier operations. I also understand that PECO's sister utility, BGE, is undergoing the same systemwide customer information system upgrade and that the implicated supplier processes have been handled much more smoothly than what suppliers are experiencing in Pennsylvania.

Q. PLEASE PROVIDE SOME EXAMPLES OF THE DIFFICULTIES EXPERIENCED BY SUPPLIERS TO DATE REGARDING THE UPGRADE OF PECO'S CUSTOMER INFORMATION SYSTEM.

A. As one example, PECO notified suppliers that it was converting to use of a "Choice ID" instead of an account number that a customer would have to provide to permit a change of supplier. At the same time, PECO assigned brand new utility account numbers to customers. Both the Choice ID and the utility account numbers contain the same number of digits. There have been significant problems related to this transition to Choice ID, a data piece that is absolutely crucial to enable customers to switch service to a competitive supplier.

First, customers had not received any bills with the new Choice IDs on them so they could not provide the number for enrollment. Second, the ECLs had not been updated to include the new Choice IDs, so suppliers had no access to look up those numbers. Third, when customers called PECO's call center asking for their new Choice IDs, they were instead provided with the new *account numbers*, which, because they

contained the same number of digits as the Choice IDs, made them indistinguishable. Customers then proceeded to provide the new account numbers to EGSs which they had to manually obtain from PECO's call center agents to suppliers to be able to enroll for supply service. When suppliers included the new account numbers in their enrollment transactions, the enrollments were rejected with a notation that they were not the Choice ID. Suppliers had no knowledge that they needed to ensure that the customer had provided them a Choice ID and not a new account number for purposes of enrolling the account. To exacerbate a difficult situation further, when suppliers attempted to work with PECO to match the new account numbers with the correct Choice ID, PECO declined to do so – impacting thousands of customers who were denied the ability to enroll with their chosen supplier.

Q. HAVE OTHER COMPETITIVE SUPPLIER ISSUES BEEN IDENTIFIED AS PART OF PECO'S ONGOING CUSTOMER INFORMATION SYSTEM UPGRADE?

A. Yes. Another issue experienced by RESA members is the rejection of invoices for supplier customer accounts that have been closed by the utility. Although the supplier charges were sent consistent with existing required processes, PECO's customer information system upgrade rejected payment to suppliers for these charges. While PECO has indicated that it is working to resolve this error, in the meantime suppliers have been advised to **dual bill** the customer for these charges. This is not a resolution or even possible. Suppliers have no choice but to use Utility Consolidated Billing to receive payments from customers remitted by the utility to the suppliers based on the tariff provisions governing PECO's Purchase of Receivables (POR) program. Also, I am advised by counsel that the Competition Act gives customers the option to choose their

billing method, meaning that suppliers must honor that choice and cannot unilaterally use a dual billing process without customer consent.

Q. WHAT DOES RESA RECOMMEND?

A. RESA members certainly understand the challenges and unexpected issues that arise when such an integral part of a company's operations undergoes a system upgrade. However, given the significant impacts of these changes on the ability of competitive suppliers to offer and provide service to customers and the experiences of members to date, more than a few webinars and written information bulletins are needed. Therefore, I recommend that, going forward, PECO be directed to include specific processes whereby it collaboratively works with competitive suppliers to reasonably support their ability provide service and make offers to customers. Specifically, PECO should be directed to do the following.

First, PECO should be directed to provide daily updates to competitive suppliers and weekly updates to Commission staff for at least the first 90 days of any system upgrade/transition, including reporting on the number of issues identified by suppliers, the estimated number of customers impacted, an explanation of PECO's efforts to resolve those issues without placing undue burden on suppliers, and an estimated timeline for resolution.

Second, PECO should be directed to assign each supplier operating in the market a consistent point of contact for addressing customer system information upgrade issues experienced by that supplier.

Finally, PECO should be directed to exercise flexibility regarding troubleshooting supplier specific issues with the ultimate goal of offering realistic workarounds and solutions that do not place unnecessary burdens on the supplier.

Q. HOW WOULD CUSTOMERS BENEFIT FROM THE REQUIRED IMPLEMENTATION OF THESE PROCESSES?

A. As discussed in the provided examples, customers desiring to shop for competitive supply have been inconvenienced and frustrated in their ability to do so because of PECO's implementation process for the new Choice IDs. Not only is placing customers in this position completely unreasonable, it further frustrates the ability of competitive suppliers to provide competitive products and services in PECO's service territory. As I discussed previously, there are already inherent structural issues with the way default service is structured in Pennsylvania today that are exacerbated by many other processes in control of the EDC as the default service provider. Implementation of a customer system information, which is being paid for by all PECO's customers, in a way which frustrates the ability of those customers to shop is unacceptable. Measures must be put in place to satisfactorily address supplier operational issues as they arise and, where necessary, to enable to Commission Staff to lead a forum whereby such problems can be addressed in real time without further frustrating the ability of customers to elect to shop for a competitive supplier.

III. DEFAULT SERVICE SUPPLY PROCUREMENT ISSUES

(A) Use of a Capacity Proxy Price

Q. PLEASE DESCRIBE PECO'S PROPOSAL TO INTRODUCE A CAPACITY PROXY PRICE ("CPP") MECHANISM AS PART OF ITS WHOLESALE DEFAULT SERVICE SUPPLY PROCUREMENT PROCESS.

A. According to PECO Witness Katie Orlandi, PECO is proposing to introduce the use of a Capacity Proxy Price ("CPP") and true-up mechanism when PJM does not conduct its Base Residual Auction ("BRA") under the Reliability Pricing Model ("RPM") in time for wholesale default service supply bidders to formulate their bids for the default service

supply auctions. PECO proposes to permit wholesale default service suppliers to use the CPP if the capacity price is not known for all months of the delivery period for a product offered at least five business days prior to the bid date. Then, when PJM sets the capacity price, winning wholesale default service suppliers would be made whole for the difference between the calculated CPP and the actual capacity price paid to PJM. (PECO St. No. 4 at 18-19.)

Q. WHAT IS THE PURPOSE OF PJM'S BRA?

A. The purpose of PJM's BRA is to procure resource commitments to satisfy the region's unforced capacity obligations for the delivery year and to allocate the costs of those commitments to Load Serving Entities ("LSEs") through a Locational Reliability Charge. The BRA is designed to provide market participants with important price signals necessary for resource investment and retirement decisions and for LSEs to procure capacity on behalf of customers. Historically, PJM has provided a transparent forward price signal three years in advance of a delivery year.

Q. HOW DOES THE CAPACITY PRICE IMPACT THE SUPPLY SERVICES OFFERED BY LOAD SERVICE ENTITIES TO CUSTOMERS?

A. As LSEs, both wholesale default service suppliers and EGSs, rely on the forward capacity auction price signals to either: (1) develop their bid proposal submitted as part of the default service auction; or, (2) develop competitive offers made available to shopping customers.

Q. WHAT ARE RESA'S CONCERNS REGARDING PECO'S PROPOSAL TO ADDRESS THE LACK OF CAPACITY INFORMATION FOR WHOLESALE DEFAULT SERVICE SUPPLIERS?

A. As the lack of a capacity price from PJM affects all LSEs, providing a solution for default service suppliers to mitigate their risk will lead to unnecessary distortions in the pricing

of generation services offered to all customers. Without the BRA, EGSs lose an important input necessary to develop accurate market-based retail prices and have no mechanism for full cost recovery once the actual prices are known. As such, EGSs need to decide whether to: (1) cease developing competitive products and services due to the uncertainty; or, (2) offer retail contracts that may be under or overpriced once the capacity costs are known. Both of these choices are negative for customers because an EGS cannot sustain providing underpriced service for a significant period of time and "overpriced" service can damage the reputation of the EGS as well as result in customer loss especially given the fact that PECO proposes to compare all EGS prices to the PTC.

The result is negative for all supply customers. Insulating wholesale default service suppliers only from the risk associated with unknown capacity prices distorts pricing signals because the default service Price-to-Compare ("PTC") will include a true-up mechanism in a future period while the EGS competitive pricing during that same time period will reflect the result of an EGS's forecasting with no realistic opportunity for the EGS to true-up the actual costs once the BRA is held.[26] Moreover, this generation pricing distortion is confusing for customers who have been educated to compare the PTC to EGS pricing.

Q. DO OTHER OPTIONS EXIST FOR WHOLESALE DEFAULT SERVICE SUPPLIERS TO DEAL WITH THE LACK OF A KNOWN CAPACITY PRICE?

A. Yes. Although the PJM capacity auction clearing prices may not be known, physical generation resources are in fact selling capacity to LSEs for delivery years that are not

[26] For residential and small business customers, EGSs are not permitted to change the pricing of the fixed price contract without first notifying the customer and receiving affirmative consent to change the price pursuant to the Commission's *Fixed Price Label Order. Guidelines for Use of Fixed Price Labels for Products With a Pass-Through Clause*, Docket No. M-2013-2362961 Final Order entered November 14, 2013 at 26.

known. Therefore, wholesale default service supply bidders have other avenues to bid a fixed-rate product for time periods when PJM has not established capacity prices. With a functional secondary market for capacity, it should not be assumed that the only choices available to wholesale default service suppliers are: (1) embed risk premiums into the bid; or, (2) decline to participate in the auction and then embark upon a "fix" intended to mitigate these two concerns. Thus, given the anticompetitive effects of implementing a CPP for default service supply only and the availability to all load serving entities of the secondary market to deal with a lack of information from PJM, RESA recommends that the Commission reject PECO's proposal.

(B) Changes Regarding Procurement of Solar Alternative Energy Credits for Default Service Customers

Q. PLEASE EXPLAIN HOW PECO ENSURES THAT PENNSYLVANIA'S AEPS REQUIREMENTS ARE SATISFIED FOR DEFAULT SERVICE CUSTOMERS.

A. All load serving entities are required to comply with Pennsylvania's AEPS Act and acquire the appropriate amount of alternative energy sources in proportion to the load of their supply customers.[27] For default service customers, PECO satisfies its obligations for default service load in two ways. First, winning wholesale default service suppliers are required, as part of their wholesale bids to PECO to supply default service customers, to transfer Tier I and Tier II AECs to PECO to satisfy PECO's AEPS obligations associated with the amount of default service load served by that supplier. (PECO St. No. 1 at 25). Second, PECO engages in a request for proposal process to procure 16,000 solar AECs that are then used by PECO to satisfy the AEPS requirements of all default service customer classes up to the 16,000 solar AECs acquired through the long-term

[27] 73 P.S. §§ 1648.1-1648.8.

contract. Wholesale default service suppliers are required to include the costs of the remaining default service supply solar AEC requirements as part of their wholesale default supply contracts. In the current default service plan period, 22.6% of the total solar AEC requirement was satisfied through the long-term contract procurements. (PECO St. No. 1 at 25-27).

Q. WHEN PECO SEPARATELY PROCURES A PORTION OF THE REQUIRED SOLAR AECS, ARE WHOLESALE DEFAULT SERVICE SUPPLIERS REQUIRED TO FACTOR IN THE COSTS FOR THOSE REQUIREMENTS IN THEIR BIDS?

A. No. PECO acquires the solar AECs through the contracting process and allocates them across all default customer classes, thereby removing the obligation of the wholesale default service suppliers to factor in those costs in their bids as they must for the other Tier I and Tier II obligations and the remaining portion of the solar AEC requirements.

Q. DOES PECO ALLOCATE ANY OF THE SEPARATELY ACQUIRED SOLAR AECS TO THE LOAD OF COMPETITIVE CUSTOMERS?

A. No. Competitive suppliers serving customers in PECO's service territory are responsible for acquiring 100% of the necessary AECs for their customer load, including all solar AECs.

Q. WHAT CHANGE IS PECO PROPOSING REGARDING ITS PROCUREMENT PROCESS REGARDING THE ACQUISITION OF THE SOLAR AECS FOR DEFAULT SERVICE SUPPLY CUSTOMERS?

A. According to PECO Witness Sulma Dalessio, PECO is seeking approval to procure an additional 16,000 solar AECs through a ten-year fixed priced contract that would be in addition to the 16,000 already procured in the last default service proceeding. (PECO St. No. 1 at 8). The previously acquired solar AECs are projected to account for 0.5% of PECO's total default service retail load in the upcoming default service plan period. The additional 16,000 solar AECs proposed to be acquired in the first two years of the

upcoming default service plan period using the same RFP long-term contract process approved by the Commission would be used to satisfy 45% of the default service load solar AEC requirements. The wholesale default service suppliers would be obligated to include the remaining 55% of the solar AEC requirements for default service customers in their bids. (PECO St. No. 1 at 26). And, as stated earlier, competitive suppliers would continue to remain responsible for ensuring compliance with their AEPS requirements for the entire shopping customer load.

Q. DOES RESA SUPPORT PECO'S PROPOSAL?

A. No, RESA does not support the use of the proposed process of entering into a 10-year contract to obtain solar AECs and allocating them only to default service load. In the context of PECO's solar AEC proposal, PECO will award a 10-year contract to satisfy the solar AEC requirements for default service customers only. The 10-year pricing scheme determined at the formation of the contract may or may not accurately reflect the actual market price in the next ten years. However, the agreed-to contract price will be factored into the resulting default service rate, which is the rate against which consumers have been educated to judge competitive offers (i.e., the Price-to-Compare or PTC).

Competitive energy suppliers have the same AEPS requirement to acquire solar AECs for shopping customers; and, the cost to these competitive energy suppliers to satisfy the solar AEC legal requirement is necessarily factored into the retail price that the competitive suppliers can offer customers. The use of long-term contracts to forecast and set the cost of solar AECs over a 10-year period for default service customers leads to a PTC misaligned with market forces. Again, because consumers have been educated to judge competitive supplier offers based on a comparison with the PTC, there could be a situation where supplier offers reflecting the then-current market price of solar AECs are

priced higher than the PTC because PECO entered into a long-term contract for cheaper solar AECs. In this situation, consumers will likely not consider availing themselves of competitive supplier options. Educating consumers to judge supplier products based on price and then permitting the default service provider to include components in the PTC that are divorced from market signals does not lead to a level playing field in which competitive suppliers have a fair opportunity to develop viable products and services for consumers.

Q. WHAT DO YOU RECOMMEND?

A. I recognize that PECO has been permitted by the Commission to utilize long term contracting for the procurement of solar AECs in prior default service proceedings. I also recognize the policy issues related to supporting the development of solar generation in Pennsylvania and the role long-term contracts such as the ones utilized by PECO can play in incentivizing solar generation. However, to address these competitive market concerns, RESA urges the Commission to consider competitively neutral structures to ensure that the procurement of long-term contracts does not adversely impact the development of retail competition. One such structure is to permit PECO to procure its proposed long term contracts for solar AECs, while assigning the acquired solar AECs to all load serving entities on a load ratio share basis and recovering the costs of the long term procurements through a non-bypassable charge. This approach essentially takes the long-term contract out of the default service rate and helps keep EGSs on equal footing with the EDCs. It should be noted that EGSs do not have the same ability to enter into long-term contracts (for AECs or commodity supply) on a risk-free basis, as the EDCs because EGSs do not have the default service customer base nor do EGSs have a statutory guarantee of cost recovery.

Q. HAS THE COMMISSION ALREADY APPROVED THIS APPROACH FOR ANY OTHER EDC?

A. Yes. For their default service plans effective January 1, 2011, both Met-Ed and Penelec were authorized to conduct a separate request for proposals (RFP) process designed to meet the photovoltaic requirements for the duration of the default service plans, including the solar AECs associated with any customer load served by an EGS.[28] The solar RFP solicited bids to obtain 10,000 solar photovoltaic alternative energy credits over a 10-year period, divided into separate tranches of 500 solar AECs. The costs were recovered through a non-bypassable charge. Thus, given the competitive concerns I have previously described with PECO's specific proposal, the manner in which default service rates are developed and messaged to customers and the historical precedent of the approach I am offering, RESA recommendation is reasonable and should be adopted.

PART IV: SUMMARY OF RECOMMENDATIONS AND CONCLUSIONS

Q. PLEASE SUMMARIZE ALL OF RESA'S RECOMMENDATIONS AS SUPPORTED BY YOUR PREVIOUS DISCUSSION.

A. For the reasons I discussed more fully above, RESA makes the following recommendations regarding PECO's DSP VI plan:

Open a Statewide Investigation Regarding Default Service Messaging

- A statewide investigation should be opened to investigate Commission approved messaging of default service as the "Price-to-Compare" to include discontinuing use of that term by replacing it with "default service rate" and how the messaging can be improved to support the ability of customers to make more informed decisions when they evaluate competitive offers.

[28] *Joint Petition Of Metropolitan Edison Company And Pennsylvania Electric Company For Approval Of Their Default Service Programs*, Docket Nos. P-2009-2093053 and P-2009-2093054, Joint Petition for Settlement dated August 12, 2009 at 12.

Reject Proposal to Add Calculated Default Service Supply Charge and Evaluation to EGS Charges on Residential Utility Bill

- PECO's proposal to add a comparison chart to residential shopping customers' bills purporting to show what the customer would have paid if the default service rate had been applicable, should be rejected for all the reasons previously discussed in this testimony.
    - If the Commission is not inclined to outright reject the proposal (which RESA strongly views as the only responsible outcome to avoid further entrenching in consumers' minds the supposed superiority of EDC provided default service), the Commission should require PECO to include disclosures about the price comparison as developed through a collaborative process and submitted to the Commission for final approval.
    - Disclosures must include the following concepts:
        1. a statement that PECO has no knowledge about the characteristics of the customer's chosen retail supply product or the value it provides to the customer and that the customer should be directed to review its contract with the supplier or contact it directly; and,
        2. a statement that the default service rate reflects a single point in time and is the result of a Commission regulated procurement process that establishes the future rate with the guarantee of full cost recovery by the EDC from customers when the actual market rate turns out to be higher or lower.
    - In addition, PECO should be directed to consider the availability of more space on the utility consolidated bill for suppliers, with the ability to do customer-specific messaging, to explain how the supplier product is different from the default service rate.

Addressing Supplier Issues During Customer Information System Upgrade

- As PECO continues with its Customer Information System upgrade, it should be directed to include specific processes whereby it collaboratively works with competitive suppliers to ensure their ability provide service and make offers to customers. Specifically, PECO should be directed to:
        1. provide daily updates to competitive suppliers and weekly updates to Commission staff for at least the first 90 days of any system upgrade/transition which includes reporting on the number of issues identified by suppliers, the number of customers impacted, an explanation of PECO's efforts to resolve those issues without placing undue burden on suppliers, and an estimated timeline for resolution;
        2. assign each supplier operating in the market a consistent point of contact for addressing customer system information upgrade issues experienced by that supplier; and,

3. exercise flexibility regarding troubleshooting supplier specific issues with the ultimate goal of offering realistic workarounds and solutions that do not place unnecessary burden on the supplier and ensure the best customer experience possible.

Recommended Revisions to Default Service Supply Procurement Processes

- Reject PECO's proposal to include a Capacity Proxy Price as part of its wholesale default service supply procurement process.
- To the extent the Commission is inclined to accept PECO's proposal to double the amount of its solar AEC procurement for default service, require PECO to allocate any solar alternative energy credits acquired through its long-term contract procurement process to the supply load for all distribution customers and not just default service customers.

Q. DOES THAT COMPLETE YOUR DIRECT TESTIMONY?

A. Yes, it does.

Exhibit RESA FC-1

EXPERIENCE

RETAIL ENERGY SUPPLY ASSOCIATION, Harrisburg, PA
National Spokesperson, March 2023 – present

- Serve as the national spokesperson for the leading retail energy supplier industry association.
- Collaborating closely with members, the public relations lead, and the executive leadership of RESA,
  provide oral testimony before state legislature and regulatory commissions, draft written comments for submission in policy proceedings, represent the association in print and broadcast media appearances, advise on public relations and policy matters, and deliver remarks at public events and conferences.

P.R. QUINLAN ASSOCIATES INC., Cumberland, RI
President, July 2014 – president

- Own business advisory firm providing clients with intelligence, analysis, and advocacy services related to state and federal regulations and legislation in the retail and renewable energy sectors.
- Have assisted and advised close to 50 competitive energy suppliers and brokers on regulatory and policy issues related to retail energy.
- Developed a deep expertise in retail energy issues, including through the provision of regulatory and legislative monitoring services to retail suppliers, brokers, trade associations, and energy law firms.
- Testify in front of state legislatures and public utility commissions in markets across the country, including Maryland, New York, Pennsylvania, on behalf of individual retail suppliers as well as coalitions of suppliers.
- Participate in a wide range of state public utility commission stakeholder working groups and collaboratives. A non-exhaustive but representative sample includes:
- File comments, on behalf individual retail suppliers as well as coalitions of suppliers, in regulatory proceedings across the United States.
- Produce white papers and memos on retail energy market developments.
- Managed a national consumer education coalition of competitive energy suppliers (the American Coalition of Competitive Energy Suppliers).

STRATEGIC COMMUNICATIONS, LLC, Washington, DC
Director, January 2013 – June 2014

- Opened and led the Washington, D.C. office of Strategic Communications, LLC.
- Managed team of full-time and part-time staffers to deliver state government relations services.
- Provided strategic planning and business advisory services to clients in manufacturing, defense contracting, and higher education sectors.
- Developed innovative *Strategic Update Service* product, a biweekly regulatory and legislative monitoring service which delivered over $180,000 in new revenue in its first 18 months.

STRATEGIC COMMUNICATIONS, LLC, Syracuse, NY
Senior Consultant, January 2011 – January 2013

- Managed state government relations for clients in the retail electricity and natural gas sectors.
- Drafted and filed formal comments and testimony before state utility commissions and legislatures.
- Represented clients and industry coalitions in industry meetings and public-private working groups.

DEPARTMENT OF COMMERCE, International Trade Administration, Washington, DC
Senior International Trade Specialist, July 2009 – January 2011

- Co-led Civil Nuclear Trade Initiative, which supports U.S. nuclear energy firms through an interagency working group, an industry advisory committee, trade missions and official advocacy.
- Developed and managed innovative resources for U.S. companies, including an online civil nuclear exporters guide and a U.S. industry promotion program at the annual IAEA General Conference.
- Drafted remarks, policy memos, and research reports to support senior Department officials.
- Participated as an ITA staff representative on the U.S. climate change negotiations team in the UN Framework Convention on Climate Change process.

DEPARTMENT OF COMMERCE, International Trade Administration, Washington, DC
Office of Legislative and Intergovernmental Affairs, February 2009-July 2009

- During six-month detail, prepared senior Department officials and Administration political nominees for Congressional hearings, including drafting testimony and developing briefing materials.
- Worked with legislative affairs team to effectively respond to Congressional information requests and to actively engage with Congressional staff in support of agency strategic objectives.

DEPARTMENT OF COMMERCE, International Trade Administration, Washington, DC
Presidential Management Fellow / International Trade Specialist August 2006 – February 2009

- Selected in a highly competitive process as one of two Presidential Management Fellows.
- Responsible for developing research and analysis, industry outreach, and other activities to increase exports by U.S. clean energy companies.
- Completed a capstone project which included organizing and executing the first ever U.S. Clean Energy Trade Mission to India and China, a two-week, 17 company trade mission led by an Assistant Secretary of Commerce that contributed to over $70 million in U.S. exports.

EDUCATION

GEORGETOWN UNIVERSITY, School of Foreign Service, Washington, DC
Master of Arts, German and European Studies (*with distinction*) September 2004 – May 2006

- 3.9 GPA, Concentration in International Business-Government Relations
- Practicum with Royal Phillips Electronics' Washington, D.C. government relations office.
- Internships with Rep. Jim Walsh (New York 25th Congressional District), the Heritage Foundation, and lobbying firm Barbour Griffith and Rogers.

PROVIDENCE COLLEGE, Providence, RI
Bachelor of Arts, Political Science (*summa cum laude*) September 2000 – May 2004

- 3.9 GPA, Minor in German
- Awarded Fulbright Scholarship for study at the Frei-Universität Berlin, May 2004 *(declined for personal reasons)*
- President, Epsilon Chi chapter, Pi Sigma Alpha (national political science honor society)
- Editor-in-Chief, *The Cowl* (weekly student newspaper)

SELECTED COMMENTS & TESTIMONY

On behalf of RESA

- February 2024 – written comments to the Pennsylvania Legislative Budget and Finance Committee (LBFC) on Supplier Consolidated Billing (SCB).
- September 21, 2023 – oral and written testimony before the Joint Committee on Telecommunications, Utilities and Energy in Massachusetts in support of House Bill 3155 and in opposition to House Bill 3196 and Senate Bill 2106
- September 12, 2023 – oral and written testimony before the House Consumer Protection, Technology & Utilities Committee in Pennsylvania in support of House Bill 1578.
- June 5, 2023 – oral and written testimony before the Joint Committee on Telecommunications, Utilities and Energy in Massachusetts in support of House Bill 3155 and in opposition to House Bill 3196 and Senate Bill 2106

On behalf of other clients

- Comments on behalf of the Maryland Energy Marketers Coalition in MDPSC Rulemaking No. RM62, related to changes to the regulator's retail electric and natural gas supplier regulations.
- Comments on behalf of the New York Energy Marketers Coalition in NYPSC Docket No. 18-M-0376, related to data and cybersecurity requirements.
- Comments on behalf of the Pennsylvania Energy Marketers Coalition in PAPUC Docket No. L-2015-2508421, related to delivery of utility notices to third parties.

SELECTED PUBLIC REMARKS

On behalf of RESA

- "Retail Energy 101," panel discussion, Energy Bar Association annual conference, April 2024
- "Navigating Risk in Retail Energy," panel discussion, Energy Marketing Conference, March 2024
- "Educating the Younger Generation on Energy," panel discussion, Energy Marketing Conference, October 2023

On behalf of other clients

- "Retail Energy Regulatory Trends – What's New, What's Coming Soon, and What You Should Do About It," Energy Marketing Conference webinar, July 2019
- "Regional Solar Market Outlook for 2019," panel discussion, MDV-SEIA Solar Focus conference, November 2018
- "Future of Clean Energy Choice" panel discussion on Capitol Hill, sponsored by R Street Institute, November 2017

SELECTED OP-EDS

On behalf of RESA

March 29, 2024 – "Preserve choice, retail competitive electricity suppliers," *CommonWealth Beacon*
September 7, 2023 - "Pennsylvania must do more to protect consumers in shopping for energy," *Penn Live and Patriot-News*

On behalf of other clients

- October 2019 - "Three Policy Trends That are Good News for Energy Marketers," *Energy Marketing Conference Newsletter*

- July 2015 - As part of a campaign on behalf of the American Coalition of Competitive Energy Suppliers, had op-eds published in a number of newspapers, including the Lockport (NY) *Union Sun & Journal*, Delaware County (PA) *Times*, Montclair (NJ) *Dispatch*, Warwick (RI) *Beacon*, Chillicothe (OH) *Gazette*, and Morrow County (OH) *Sentinel*
- April 10, 2012 – "Energy Choice," *Breaking Energy*

SELECTED MEDIA APPEARANCES

On behalf of RESA

- May 8, 2023 – quoted in article for WBUR (Boston NPR) on retail supplier issues in Massachusetts
- May 8, 2023 – quoted in article for WBUR (Boston NPR) on renewable energy offers
- November 22, 2023 – *Arizona Republic*, background interview
- June 30, 2023 - *Baltimore Sun*, informational interview
- June 29, 2023 - *Maryland Matters*, informational interview
- March 27, 2023 - *Green Biz*, informational interview
- March 17, 2023 - *Virginia Mercury*, informational interview

On behalf of myself or other clients

- January 11, 2023 – discussion with ABC affiliate WMTW on energy choice in Maine
- January 18, 2020 – quoted in article in *Utility Dive* on retail choice legislation in Virginia
- June 23, 2019 – quoted in article in the Kennebec *Journal* and *Morning Sentinel* on smart meter deployment in Maine.
- August 1, 2019 – quoted in article in the Boston *Globe* on allegations of suppliers overcharging customers in Massachusetts.
- February 9, 2018 – quoted in article in the Binghamton *Press & Sun Bulletin* on changes to the New York retail energy market.
- August 8, 2018 – discussion with CBS affiliate WPRI on electric supplier offers in Rhode Island.
- May 19, 2017 – quoted in article in the Pensacola *News Journal* on retail choice in Florida.
- February 28, 2014 – quoted in article in the UK's *The Guardian* on shopping for renewable energy

Background Conversations

- *Energy Choice Matters* publisher, confidential client matters, 2014-present
- KMPG South Korea analyst, consultant's report on U.S. electricity market, February 2022
- Akron *Beacon Journal* reporter, confidential client matter, 2020
- *Wall Street Journal* reporter, confidential client matter, 2020
- Washington *Post* reporter related to June 12, 2018 article, "Should you switch electricity suppliers? Maybe — but do your homework first"
- New York *Times* reporter, April 2018

SELECTED WORKING GROUPS

- the AG-X collaborative led by utility Arizona Public Service;
- the Competitive Markets and Customer Choice working group in Maryland;
- the Competitive Suppliers Working Group / DPU Docket No. 19-07 proceedings in Massachusetts;
- the Track II collaborative in New York considering additional value-added products and services that can be offered by retail suppliers; and
- the CHARGE working group in Pennsylvania.

I. Executive Summary

This report has been prepared to provide access to data reported to the Pennsylvania Public Utility Commission (Commission) by electricity market suppliers. The information contained within this report is provided in a manner that does not compromise the confidentiality of company data while also providing it in a useful format. This report illustrates short-term data trends that may appear but does not provide any market analysis beyond what is apparent in the data; additionally, the Commission does not speculate as to the possible reasons for any trends.

Section 54.203 of the Commission's regulations, 52 Pa. Code § 54.203, requires electric distribution companies (EDCs) to file quarterly reports on retail sales activity of electric generation suppliers (EGSs) operating in their service territories. As of Dec. 31, 2022, the EDCs reported a total of 109 active EGSs operating in Pennsylvania.

Section 54.203 also requires active EGSs to file an annual report by April 30 for the previous calendar year. These EGS filings provide aggregate EGS market-share data for the number of customer accounts, megawatt-hour (MWh) sales, and customer participation in various programs including, flat and time-varying rates, fixed-term contracts, green power, and curtailable program offerings, as well as information on which EGSs are providing supplier billing services.

The data contained specifically within Section V of this report is based on information submitted by active EGSs. Of the 109 active EGSs identified by the EDCs as having served load within their service territories, 107 (98%) have filed reports with the Commission. The Bureau of Technical Utility Services (TUS) has made several efforts to contact EGSs who were either tardy or who remain delinquent in filing these required reports. Delinquent EGSs were sent notification that failure to comply with the reporting requirements subjects them to possible loss of their license to serve as an EGS in Pennsylvania. As of August 1, 2023, 2 EGSs are delinquent in their reporting requirements. Those 2 EGSs are identified in Appendix B of this report.

Summary Data for 2022:
Number of Customer Accounts Served by EGSs

- 1,480,056 of 5,932,085total accounts served by EGSs (25%)
  - 1,192,378 residential accounts served by EGSs
  - 23% of all residential accounts served by EGSs
  - 287,678 non-residential accounts served by EGSs
  - 40% of all non-residential accounts served by EGSs
- Note: all values are down slightly from the previous year

MWhs Served by EGSs

- 85,675,047 MWhs of 137,733,574 total MWhs served by EGSs (62%)
  - 13,379,823 MWhs served by EGSs from residential accounts
  - 26% of all residential MWhs served by EGSs
  - 72,295,224 MWhs served by EGSs from non-residential accounts
  - 85% of all non-residential MWhs served by EGSs
- Note: all values are down slightly from the previous year

Total Number of Time-of-Use (TOU) Customer Accounts and MWhs

- 10,328 total TOU customer accounts of 5,932,085 total accounts (0.17%)

Although well less than one percent, this represents a 756% increase over the prior year. Of the total above, 2,745 accounts were reported by the EDCs. 7,583 TOU customer accounts were reported by the EGSs.

EGSs are required to report the number of TOU customer accounts in their annual filings with the Commission, however, because of limited data and confidentiality concerns, prior editions of this report had only included EDC data.

- 24,084 TOU MWhs of 137,733,574 total MWhs (<1%)
  - Despite being less than 1%, this represents a 272% increase from the previous year's total of 6,471 MWh. This total, however, is from only the EDCs, as EGSs are not required to report TOU customer account MWhs.

Total Number of Hourly/Real-Time Priced (RTP) Non-Residential Customer Accounts and MWhs

- 16,035 RTP accounts of 723,785 non-residential accounts (2%)
- 44,704,528 RTP MWhs of 85,316,877 non-residential MWhs (52%)
- These values for RTP metrics are in the same range as the previous year.

In summary, the total number of customer accounts served by EGSs in 2022 was down slightly from 27% and 30%, in 2021 and 2020 respectively, to 25%. The amount of load served by EGSs decreased from 89 million MWhs in 2021 to 86 million MWhs in 2022. The percentage of load being served decreased from 64% in 2021 to 62% in 2022.

Residential TOU customer accounts have increased from 432 in 2020 to 10,328 in 2022. The number of non-residential customers enrolled in hourly or RTP accounts is 16,035 and the associated load from these customers has remained relatively static over the past three years, from 59% in 2020, to 52% in 2022.

Further details of the aggregate data above can be found in the tables and figures throughout this report.

II. Electric Generation Supplier Data and Trends

This section provides information on trends in EGS customer accounts and MWh sales during 2022. In all cases, "Customer Accounts" data is reported as of Dec. 31, 2022; MWh sales is the sum of the quarterly reported data during the year. The data is broken out into residential and non-residential which is further broken out into small, medium, and large non-residential classes.

A. Number of Customer Accounts

1. Residential and Non-Residential

As noted in Table 1, in 2022, the percentage of all customer accounts served by EGSs was 25%. The total percentage of all customer accounts served by EGSs decreased by 2% compared to 2021, marking the sixth straight year of decreasing customer accounts.

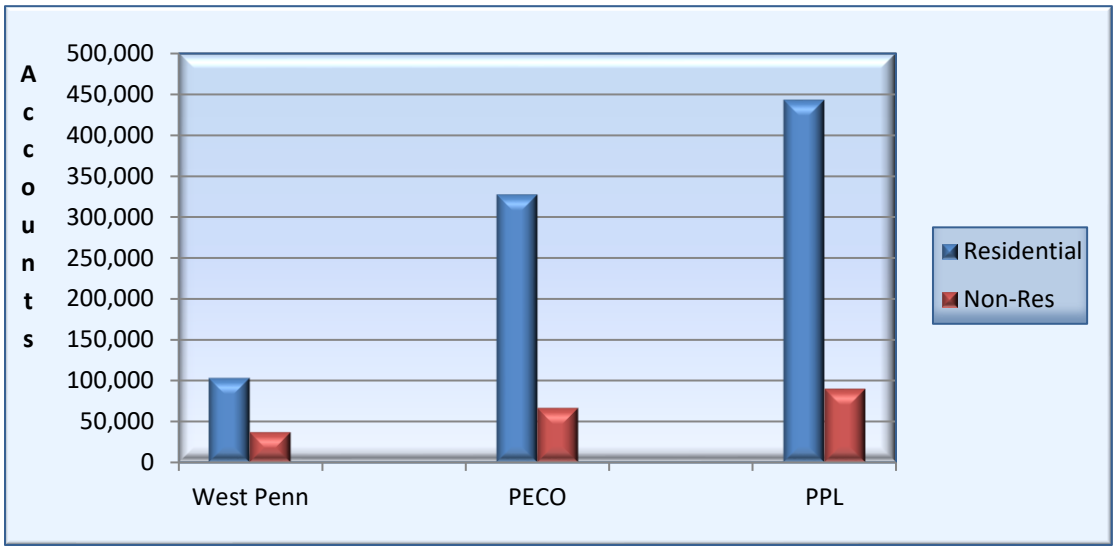
Figure 2. Number of EGS Customer Accounts: 2022
Top Three EDC Territories with EGS Customer Accounts
Residential and Non-Residential



As noted above, in Figure 2, West Penn Power Company (West Penn), PECO Energy Company (PECO), and PPL Electric Utilities (PPL) had the highest number of total EGS customer accounts. The accounts were predominantly in the residential class.

2. Small, Medium, and Large Non-Residential

Data in Table 3 shows that 85% of all large non-residential customers are served by EGSs, corresponding to 93% of the load from this customer class. Extrapolation of the data in Table 3 indicates that while small non-residential accounts comprise 83% of all accounts served by EDCs and EGSs, the large non-residential customers account for 62% of all the load from non-residential customers. Further extrapolation of the data will show that 78% of all non-residential EGS accounts are small non-residential customers but that 68% of all the non-residential load that is served by EGSs is from large non-residential customers.

B. MWh Sales

1. Residential and Non-Residential

As noted in Table 5, EGS sales in Pennsylvania totaled 85,675,047 MWhs during calendar year 2022. This represents a decrease of 3,252,400 (4%) compared to 88,927,447 MWhs during the previous calendar year. During the same period, total EDC sales increased 6%.

Table 5. EGS Sales (MWh): 2020- 2022
Residential and Non-Residential

Year	*Residential*	*Non-Residential*	*Total*
2022	13,379,823	72,295,224	85,675,047

III. Time-Varying Rates

A TOU Rate is defined as follows – A rate that changes at different times of the day or night, or at different times during a 24-hour or 7-day period, but not as frequently as each hour, to reflect the costs of serving the customer during different time periods. See Appendix A.

An Hourly/RTP Rate is defined as follows – A pricing arrangement based on hourly or daily energy prices. See Appendix A.

This section provides information on trends as defined in the Commission's regulations for:

TOU

- Total Number of TOU Customer Accounts Served by EGSs
  - See 52 Pa. Code § 54.203(a)(2)(vi)
- Total Number of TOU Customer Accounts Served by EGSs and EDCs
  - See 52 Pa. Code § 54.203(a)(2)(vii)
- MWh Sales of EGSs; MWh Sales of EGSs and EDCs
  - See 52 Pa. Code § 54.203(a)(2)(viii) and (ix)

Hourly/RTP

- Total Number of Hourly/RTP Customer Accounts Served by EGSs
  - See 52 Pa. Code § 54.203(a)(2)(x)
- Total Number of Hourly/RTP Customer Accounts Served by EGSs and EDCs
  - See 52 Pa. Code § 54.203(a)(2)(xi)
- MWh Sales of EGSs; MWh Sales of EGSs and EDCs
  - See 52 Pa. Code § 54.203(a)(2)(xii) and (xiii)

A. TOU

As noted in Table 8, for calendar year 2022, the number of reported TOU customer accounts, as of the end of the calendar year, saw a dramatic increase to 10,328. This figure includes 7,583 and 2,745 customer accounts reported by EGSs and EDCs respectively. Due to limited data in prior years and confidentiality concerns, this is the first edition of the report to include TOU customer account data filed by EGSs. As a result, the total customer accounts data below is significantly higher than the prior year's data that included only EDC customers. Additionally, EGSs TOU customer account data is only reported in aggregate, not by EDC service territory.

Duquesne Light Company (Duquesne), PECO and PPL are the only EDCs that reported TOU customer accounts. Metropolitan Edison Company (Met-Ed), Penelec, Pennsylvania Power Company (Penn Power), and West Penn have TOU tariffs but did not report any customer accounts on this service.

The EGS columns in Table 9 indicates NA for each EDC service territory. The aggregate number is reported in the "Total" row.

The EDC columns in Tables 9 and 10 report the number and MWhs of EDC TOU customer accounts. As of Dec. 31, 2022, Duquesne, PECO, and PPL are the only EDCs that report TOU customer accounts. Met-Ed, Penelec, Penn Power, and West Penn have TOU tariffs but do not report any customer accounts on this service.

As noted in Table 10, the electric load from EDC TOU customer accounts totaled 24,084 total MWhs in 2022. The EGS columns in Table 10 indicates NA because EGSs are not required to report TOU MWhs.

Table 8. Number of TOU Customer Accounts: 2020-2022

* EGS's are not required to report MWh data.

B. Hourly/RTP

Residential customers participating in Hourly/RTP rates are currently only being served by EGSs, which is further detailed in Table 16 of this report. Tables 11 through 13 provide data on hourly/RTP non-residential customer accounts. From calendar year 2020 through 2022, the number of hourly/RTP customer accounts remained relatively static, while electricity sales (MWh) increased 8%, from a low of 45,672,076 in 2020.

Table 11. Number of Hourly/RTP Customer Accounts and Sales (MWh): 2020 - 2022

IV. Number of Active EGSs in EDC Service Territories

This section summarizes the number of active EGSs serving customer accounts in the respective EDC service territories as of December 31 of the year indicated. An active EGS is defined as "an EGS that is licensed to provide retail electric generation service and is providing that service to one or more customers." The data is presented for residential and non-residential classes which is further broken out by small, medium, and large non-residential classes.

As of Dec. 31, 2022, there was a combined 109 active EGSs serving residential and non-residential sectors. An active EGS may serve more than one rate class. The numbers shown in Tables 14 and 15 reflect EGSs serving multiple service territories and therefore cannot be added in a cumulative fashion. From Dec. 31, 2021, through Dec. 31, 2022, the number of active EGSs in the residential sector increased in the UGI and Pike territories. During this period, the number of active EGSs in the non-residential sector did not increase in any service territory. PPL, PECO, and Met-Ed reported the most active EGSs during this period. The small non-residential class had the highest number of active EGSs.

V. EGS Programs

This section summarizes data submitted to the Commission by 107 of the 109 active EGSs regarding the number of customer accounts that participated in various programs. To maintain confidentiality, the data is reported in aggregate, so as not to disclose individual EGS market share data. EGS program categories include flat and time-varying rates, fixed-term contract lengths, curtailable and green power products, and EGS billing information.

Highlights as of Dec. 31, 2022:

A. Flat and Time-Varying Rates:

Flat rates had the most customer accounts with 1,386,280. The residential class comprised 1,182,855 (85%) of flat-rate accounts. The small non-residential class had the most non-residential, flat-rate customer accounts with 158,738.

Time-Varying rates, including TOU, hourly/RTP, seasonal, hybrid and others had a combined total of 518,580 customer accounts. The residential class comprised 395,522 (76%) of time-varying accounts. The small non-residential class had the most non-residential time-varying rate customer accounts with 105,652.

B. Fixed-Term Contract Lengths:

One-year, fixed-term contracts had the most customer accounts with 637,002. The residential class comprised 599,534 (94%) of these contracts. The small non-residential class had the most non-residential three-year, fixed-term customer accounts with 51,680.

C. Curtailable*:*

Voluntary curtailable programs had the most customer accounts with 1,365. Mandatory curtailable programs had 1 customer account. The non-residential class comprised all of the curtailable programs. The small non-residential class had the most non-residential, voluntary curtailable customer accounts with 744.

D. Green Power:

Green power programs had 508,591 customer accounts. The residential class comprised 487,443 (96%) of these accounts. The small non-residential class had the most non-residential green power customer accounts with 17,240.

E. Billing:

Supplier billing had 57,364 customer accounts with 99% coming from the non-residential class. The small non-residential class had the most non-residential supplier billing customer accounts with 43,316. Auto billing had 3,825 customer accounts with 100% from non-residential.

C. Curtailable Programs

Curtailment is defined by PJM as "A reduction in transmission service or generation as a result of system reliability conditions".[1] As noted in Table 20, in 2022, voluntary curtailable programs had the most customer accounts with 1,365. Mandatory programs had only one customer account. While we don't speculate the reasoning for the change in trends, it appears that many prior Mandatory Curtailable customers have moved to Voluntary Curtailable program offerings and/or have left curtailable program offerings entirely. Table 21 provides additional breakout of this data, by non-residential class.

Table 20. Number of EGS Curtailable Customer Accounts: 2020 Through 2022
Residential and Non-Residential

D. Green Power

Green Power Customer Account is defined as: A retail customer account incorporating electric power supply that has greater-than-required renewable content, as specified in Section 3 of the Alternative Energy Portfolio Standards Act (73 P.S. § 1648.3). From 2020 through 2022, Green Power customer accounts declined by 2% with a 65% decline among non-residential customers, while residential Green Power customer accounts increased by 6%.

Table 22. Number of EGS Green Power Customer Accounts: 2020 Through 202 Residential and Non-Residential

Program	*Residential Customer Accounts*	*Non-Residential Customer Accounts*	*Total Customer Accounts*

VI. Appendix A – Definitions

A. General

Active EGS – An EGS that is licensed to provide retail electric generation service and is providing that service to one or more customers.

Flat-Rate Customer Account – A customer account that is charged a fixed, cents-per-kwh rate that changes no more frequently than monthly, excluding seasonal rates.

Green Power Customer Account – A retail customer account incorporating electric power supply that has greater-than-required renewable content, as specified in section 3 of the Alternative Energy Portfolio Standards Act (73 P.S. § 1648.3).

Fixed-Term Contract – A contract which includes an all-inclusive per kWh price that will remain the same for at least three billing cycles or the term of the contract, whichever is longer.

Hourly/Real-Time-Price – A pricing arrangement based on hourly or daily energy prices.

Hybrid-Rate Customer Account – A retail customer account that is charged via an electric generation pricing arrangement that incorporates hourly and block rates.

Seasonal Rates – Rates which differ in summer/non-summer.

Supplier Billing – Includes all customers who are not billed by the utility for the supplier's services. Also includes customers billed by a billing service other than the utility**.**

Time-of-Use Rate – A rate that changes at different times of the day or night, or at different times during a 24-hour or 7-day period, but not as frequently as each hour, to reflect the costs of serving the customer during different time periods.

B. Small, Medium, and Large Non-Residential Definitions

Citizens' Electric Company

- Small Non-Residential: General light and power service under 50 kW.
- Medium Non-Residential: General light and power service of 50 kW minimum.
- Large Non-Residential: General light and power service greater than 1,000 kW, at primary voltage.

Duquesne Light Company

- Small Non-Residential: Small commercial and industrial customers with maximum registered peak metered demand of less than 25 kW, lighting customers, and unmetered customers.
- Medium Non-Residential: Medium commercial and industrial customers with a maximum registered peak metered demand of 25 kW or greater. This includes customers with demand of 25 kW to 200 kW eligible for fixed-price default supply; and customers with demands of 200 kW or more eligible for hourly-priced service.
- Large Non-Residential: Large commercial and industrial customers with a maximum registered peak metered demand of 300 kW or greater.

UGI Utilities Inc.

- Small Non-Residential: Annual peak load of less than 100 kW.
- Medium Non-Residential: Annual peak load of between 100 kW-500 kW.
- Large Non-Residential: Annual peak load greater than 500 kW. Annual peak load is defined as the highest one-hour usage in a 12-month period.

Metropolitan Edison Company

- Small Non-Residential: Secondary service with monthly usage of 1,500 kWh or less.
- Medium Non-Residential: Secondary service with monthly usage greater than 1,500 kWh and less than 100 kW.
- Large Non-Residential: Secondary, Primary and Transmission service with monthly demand greater than 100 kW.

Pennsylvania Electric Company

- Small Non-Residential: Secondary service with monthly usage of 1,500 kWh or less.
- Medium Non-Residential: Secondary service with monthly usage greater than 1,500 kWh and less than 100 kilowatts.
- Large Non-Residential: Secondary, Primary and Transmission service with monthly demand greater than 100 kW.

Pennsylvania Power Company

- Small Non-Residential: Secondary service with monthly usage of 1,500 kWh or less.
- Medium Non-Residential: Secondary service with monthly usage greater than 1,500 kWh and less than 100 kW.
- Large Non-Residential: Secondary, Primary and Transmission service with monthly demand greater than 100 kW.

PECO Energy Company

- Small Non-Residential: Registered demand of less than 100 kW, GS non-demand metered and, Lighting rate classes.
- Medium Non-Residential: Registered demand of between 100 kW to less than 500 kW.
- Large Non-Residential: Registered demand equal to or greater than 500 kW, rate class EP.

Pike County Light and Power Company

- Small Non-Residential: Small Commercial and Industrial General Service- Secondary Service and Municipal/Private Lighting rate classes.
- Medium Non-Residential: N/A
- Large Non-Residential: Large Commercial/Industrial – Primary Service.

PPL Electric Utilities Corporation

- Small Non-Residential: Secondary voltage-level rate classes: BL, GH-1, GH-2, GS-1, GS-3, IS-1, and Street Lighting.
- Medium Non-Residential: Primary voltage-level rate classes: LP-4, IS-P.
- Large Non-Residential: Transmission voltage-level rate classes: LP-5, LP-6, LPEP.

Wellsboro Electric Company

- Small Non-Residential: Small Commercial rate class with demand under 7 kW.
- Medium Non-Residential: Small Commercial rate class with demand of 7 kW or more.
- Large Non-Residential: Large Commercial rate class with primary voltage of not less than 50 kW.

West Penn Power Company

- Small Non-Residential: Secondary service with monthly usage of 1,500 kWh or less.
- Medium Non-Residential: Secondary service with monthly usage greater than 1,500 kWh and less than 100 kW.
- Large Non-Residential: Secondary service and, Primary and Transmission service with monthly demand greater than 100 kW.

Response of PECO Energy Company
To Interrogatories of the
Retail Energy Supply Association
RESA Set I

Response Date: April 05, 2024

RESA-I-4

Reference PECO St. No. 1 at 29 Did PECO consider other or alternative information to include on the residential customer bills beyond what has been proposed? If so, please describe all options considered and why they were rejected.

RESPONSE:

Yes. On January 26, 2021, PECO held a collaborative session with electric generation suppliers (EGSs) to discuss potential options to improve the billing information related to generation service charges.

During the collaborative session, PECO shared an initial proposal of the billing changes, comparing a calculated rate per kw/hour to PECO's price compare. After receiving input from EGSs, PECO made modifications to the proposal to address EGS feedback, leading to the revised version as presented in Ms. Dalessio's direct testimony, PECO Statement No. 1, Exhibit SD-6 of PECO's initial DSPVI filing.

Please see Attachment RESA-I-4(a) for the presentation that was shared with suppliers during the January 26, 2021 collaborative session.

- PECO Proposal
- EDI Proposed Change
- Stakeholder Feedback
- Next steps

PECO
An Exelon Company

Introductions / Purpose

✓ Welcome and Introductions

✓ Why are we here today?

- PECO filed its four year Default Service Program V in March 2020 and received a PUC Order on Dec 3, 2020
- In the case, the topic of improving billing information related to generation service charges was raised
- Holding this stakeholder process related to residential bills was one commitment item in the PUC-approved Partial Settlement

PECO
An Exelon Company

Settlement Commitment Language

- ✓ As outlined on page 18 of the Joint Petition for Partial Settlement 'Within sixty days of the entry of a final, non-appealable Opinion and Order in this proceeding, PECO will convene a stakeholder process to discuss mechanisms to collect EGS pricing information compatible with PECO's "Bill-Ready" billing system and to develop bill improvements to ensure that shopping information is clear and transparent to Residential Customers. This process will also address EGS recommendations to improve the presentation of shopping information on Residential Customer bills.'

PECO
An Exelon Company

Stakeholder Process

- ✓ Today PECO is presenting concepts for your consideration, discussion, and feedback
- ✓ We will also share this with others who were not able to attend to seek their feedback
- ✓ Based on what we receive, we will determine and share with you, next steps in the process.

From PECO:

New charges contain estimated total state taxes of $2.01, including $2.12 for State Gross Receipts Tax.

Electric

Supplier Charge: $9.58
Estimated Supplier Rate:$0.0388 per kWh
PECO estimated supply charge to compare: **$15.73**
PECO estimated price to compare:$0.0637 per kWh

Gas

Supplier Charge: $11.61
Estimated Supplier Rate:$0.4300 per ccf
PECO estimated supply charge to compare: **$10.94**
PECO estimated price to compare: $0.4052 per ccf

Your estimated electric price to compare is $0.0637 per kWh. This may change in March, June, September and December. For more information and supplier offers visit **PAPowerSwitch.com** and **oca.state.pa.us.**

Your estimated gas price to compare for your rate class is $0.4052 per Ccf. This may change in March, June, September and December. For more information on how to shop for natural gas visit **PaGasSwitch.com** and **oca.state.pa.us.**

RESA Exh. FC-4

PECO
An Exelon Company

EDI Proposed Change

- ✓ Currently PECO uses the SAC15 submitted in the 810 for bill print
- ✓ The SAC15 is a string of text that contains the supplier rate and the kWhr
  - GENERATION: 645 KWH @ $0.05957
- ✓ The SAC15 is not conducive to performing calculations
- ✓ Currently the SAC 08, 09 and 10 elements are optional.
  - SAC08 is the supplier rate.
  - SAC09 is KH which is the unit of measure.
  - SAC10 is the kWh quantity.

PECO
An Exelon Company

EDI Proposed Change (continued)

- ✓ Most suppliers are providing these elements in the 810 but PECO does not validate or use these for bill print purposes
  - SAC*C*D140***3842***0.05957*KH*645***1**GENERATION: 645 KWH @ $0.05957
- ✓ PECO would submit a change control to request these elements become mandatory
- ✓ PECO would then code to pull these elements for the proposed bill print changes

FC-9	RESA Retail Market Savings Report for March 2024

I. INTRODUCTION

Q. PLEASE STATE YOUR NAME, EMPLOYER AND TITLE.

A. My name is Frank Caliva, and I am the President of P.R. Quinlan Associates Inc. ("P.R. Quinlan").

Q. DID YOU PREVIOUSLY SUBMIT TESTIMONY IN THIS PROCEEDING?

A. Yes. I submitted Direct Testimony on behalf of the Retail Energy Supply Association ("RESA")[1] on April 25, 2024.

Q. PLEASE BRIEFLY SUMMARIZE RESA'S RECOMMENDATIONS THAT YOU PREVIOUSLY ADVANCED IN YOUR DIRECT TESTIMONY.

A. In my Direct Testimony, RESA made the following recommendations regarding PECO Energy Company's ("PECO") Petition for Approval of Its Default Service Program For the Period from June 1, 2025 through May 31, 2029 ("DSP VI plan"):

- Open a statewide investigation regarding messaging of default service, to include discontinuing use of that term and improving the messaging so that customers are able to make more informed decisions when they evaluate competitive offers;
- Reject PECO's proposal to add a comparison chart to residential shopping customers' bills purporting to show what the customer would have paid if the default service rate had been applicable;
- Direct PECO, as part of its Customer Information System upgrade, to include specific processes whereby it collaboratively works with competitive suppliers to ensure their ability provide service and make offers to customers;
- Reject PECO's proposal to include a Capacity Proxy Price as part of its wholesale default service supply procurement process; and
- To the extent the Commission is inclined to accept PECO's proposal to double the amount of its solar AEC procurement for default service, require PECO to allocate any solar alternative energy credits acquired through its long-term contract

[1] The comments expressed in this filing represent the position of the Retail Energy Supply Association (RESA) as an organization but may not represent the views of any particular member of the Association. Founded in 1990, RESA is a broad and diverse group of retail energy suppliers dedicated to promoting efficient, sustainable and customer-oriented competitive retail energy markets. RESA members operate throughout the United States delivering value-added electricity and natural gas service at retail to residential, commercial and industrial energy customers. More information on RESA can be found at www.resausa.org.

procurement process to the supply load for all distribution customers and not just default service customers.

Q. ON WHOSE BEHALF IS THIS REBUTTAL TESTIMONY OFFERED?

A. This Rebuttal Testimony is likewise offered on behalf of RESA.

Q. WHAT IS THE PURPOSE OF YOUR REBUTTAL TESTIMONY?

A. Through my Rebuttal Testimony, I am responding to specific statements and assertions set forth in the following: (1) Direct Testimony of Serhan Ogur presented on behalf of the Office of Consumer Advocate ("OCA");[2] (2) Direct Testimony of Barbara Alexander offered on behalf of OCA;[3] and (3) Direct Testimony of Elizabeth R. Marx submitted on behalf of the Tenant Union Representative Network ("TURN") and the Coalition for Affordable Utility Services and Energy Efficiency in Pennsylvania ("CAUSE-PA").[4]

The specific topics addressed by this Rebuttal Testimony include a discussion:

- As to why price comparisons between the default service supply product and EGS contractual supply products available to residential customers are misleading and spurious;
- About why either termination of or completely revising the Standard Offer Program ("SOP") is unreasonable in the current competitive market structure where utility provided default service continues to dominate;
- Explaining that less frequent adjustments to the default service rate further divorce the end user rate from market reflective pricing impacting the pricing of competitive products; and
- Regarding the role of the retail competitive market to develop and offer Time of Use ("TOU") rates.

Q. ARE YOU SPONSORING ANY EXHIBITS?

A. Yes, the exhibits I am sponsoring are described in the table of exhibits on the table of contents page of this testimony.

---

2 OCA St. No. 1.
3 OCA St. No. 2.
4 TURN/CAUSE-PA St. No. 1.

II. SPURIOUS NATURE OF PRICE COMPARISONS

Q. DO WITNESSES ALEXANDER AND MARX PRESENT COMPARISONS OF THE PRICE OF DEFAULT SERVICE WITH COMPETITIVE EGS PRICING?

A. Yes. Witness Marx presents a review of data that compares revenues billed by suppliers to shopping customers on a monthly or annual basis with the prices that PECO would have charged those same customers for default service.[5] While she does not rely on this analysis to support any particular recommendation that she is offering, Ms. Marx clearly seeks to gain traction through this diatribe to oppose any pro-market proposals that are advanced by the parties in this proceeding and likewise to support anti-market recommendations. Ms. Alexander offers a similar analysis comparing the default service rate offered to residential customers with available electric generation supplier ("EGS") contract prices.[6]

Q. DO YOU HAVE A RESPONSE?

A. Yes. At the most fundamental level, a comparison of "price" for these two very different supply products is complicated and not a simply matter of looking at offerings made at a particular point in time. This is the case for a number of reasons, none of which either Ms. Marx or Ms. Alexander factor into their analyses.

Q. DID YOU ADDRESS SOME OF THE REASONS WHY PRICE COMPARISONS BETWEEN THE DEFAULT SERVICE AND EGS CONTRACT PRICES IS MISLEADING IN YOUR DIRECT TESTIMONY?

A. Yes. As I discussed on pages 8-9 of my Direct Testimony, the way the default service rate is developed through the regulatory approval processes of these default service proceedings does not reflect the current market price. In contrast and in a truly

---

5 TURN/CAUSE-PA St. No. 1 at 5-11.
6 OCA St. No. 2 at 12-14.

competitive marketplace, EGSs set contract prices based on a variety of market driven forces which include the actual price of the commodity as well as other business and operating costs. Neither Ms. Marx nor Ms. Alexander take these factors into consideration in developing their analysis. Ms. Alexander acknowledges the fact that EGS contract pricing includes "obvious overhead and profit to support their business model"[7] but she does not consider how those costs are recovered by electric distribution companies ("EDCs") for the default service supply product.[8] Recovering the costs of providing a product is a significant factor in determining how that product can be priced for the customer. While competitive suppliers will each make different decisions about which costs are to be recovered and how through the resulting price, none of the competitive suppliers has the opportunity to seek recovery of those costs through captive ratepayers. Thus, the rate of the EDC's default service product cannot meaningfully be compared with all EGSs products by simply looking at the end rate/price without factoring in these other cost recovery issues (as both Ms. Marx and Ms. Alexander have failed to do).

Q. WHY IS FOCUSING ON A PARTICULAR POINT-IN-TIME TO COMPARE THE DEFAULT SERVICE RATE WITH AN EGS'S CONTRACT RATE PROBLEMATIC?

A. This focus is problematic because a snapshot of a given point in time does not reflect current market conditions or the ability of EDCs to fully reconcile their prices at a later time. Thus, the default service rate may look "lower" at one point in time but, because of the ability to fully recover costs granted to the EDC, the default service rate may be

[7] OCA St. No. 2 at 14, footnote 14.

[8] For an explanation regarding how some utilities recover these costs, see "*Default Service Pricing Has Been Wrong All Along,*" by Frank Lacey, Electric Advisors Consulting, Public Utilities Fortnightly, January 2019, which is attached as RESA Exh. FC-6.

higher at a future point in time. Further, as I explained in my Direct Testimony on pages 20-21, there are a myriad of reasons why the contract price offered by an EGS is different from the default service rate due to the nature of the EGS offering. Examples include a flat and time-varying rates, fixed-term contract lengths, curtailable contracts and green power contracts. These are not just hypotheticals; the Commission's data shows that EGSs are in fact offering such products.[9] The significance of this factor is that a customer has made a choice to enter into a contract for specific reasons which may or may not be related to a price comparison with the default service rate. For example, a customer may elect a three-year contract with a fixed price for the full term of the contract for reasons of predictability and stability. In some periods, that price may be higher than the default service rate and in some periods it will be lower. A point-in-time analysis does not capture this nuance, nor does it factor in the selected benefit of the fixed contract for the customer who is not focused on "beating" the default service rate at any particular point in time but rather seeking a consistent price over a defined period of time.

Q. ARE YOU TESTIFYING THAT PROVIDING CUSTOMERS BENEFITS, TO INCLUDE PRICE SAVINGS, IS NOT IMPORTANT?

A. No, but price savings is just one potential benefit for customers of a truly competitive market which, for reasons already discussed in my Direct Testimony, is not the current market structure in Pennsylvania today. I am advised by counsel that the Competition Act makes it clear that the prices of competitive retail offerings are not regulated by the Commission.[10] While one of the policy declarations of the Competition Act recognizes that "[c]ompetitive market forces are more effective than economic regulation in

[9] *See* RESA Exh. FC-2 at 21.
[10] 66 Pa. C.S. § 2802(14).

controlling the cost of generating electricity,"[11] this concept does not support the notion that retail market supply prices must be lower than the default service rate at all points in time and for all customers. Based on my review of the Competition Act, it makes no such guarantee and, in my opinion, to do so would (i) be contrary to the fundamental principle of competition; (ii) overlook the mismatch in time between the setting of default service rates and market prices; (iii) ignore the legal ability of generators and EGSs to set their own prices for supply; and (iv) disregard the legitimate reasons for EGS supply prices to be higher than default service rates, including but not limited to the offering of green offerings and long-term stability.

Q. SETTING ASIDE YOUR FUNDAMENTAL DISAGREEMENT WITH THE FOCUS OF PRICE COMPARISONS OFFERED BY MS. ALEXANDER AND MS. MARX, DO YOU AGREE WITH THE CONCLUSIONS THEY DRAW FROM THEIR EVALUATIONS?

A. No. Both Ms. Marx and Ms. Alexander conclude that residential customers are not receiving lower prices from the competitive market. Despite all the pitfalls of comparing the default service rate to the EGS contract price, according to RESA Market Savings Reports, numerous offers are available in the Pennsylvania retail market that are below the utilities' default service rate.

- RESA Exh. FC-7 is the Retail Market Savings Report for January 2024, which was compiled using data from www.powerswitch.com and shows that customers as a group had the potential to save over $175 million in one month by choosing an EGS for their supply.

- RESA Exh. FC-8 is the Retail Market Savings Report for February 2024, which shows that customers had the potential to save more than $154 million by purchasing from an EGS.

[11] 66 Pa.C.S. § 2802(5)

- RESA Exh. FC-9 is the Retail Market Savings Report for March 2024, which shows that customers had the potential to save nearly $154 million in one month.

Q. IF THESE PRICE SAVINGS ARE AVAILABLE, THEN WHY ARE THE SAVINGS NOT REFLECTED IN THE PRICE COMPARISONS OFFERED BY MS. MARX AND MS. ALEXANDER?

A. Ms. Marx and Ms. Alexander are only looking at what customers who elected to shop paid in comparison with the default service rate in effect during the same point-in-time. The Retail Market Savings Reports show that there are price savings available in the Pennsylvania market even though the majority Pennsylvania's residential consumers are not availing themselves of these opportunities.

Q. WHY ARE RESIDENTIAL CUSTOMERS NOT AVAILING THEMSELVES OF EGS PRODUCTS WHICH COULD SAVE THEM MONEY IN COMPARISON WITH THE DEFAULT SERVICE PRODUCT?

A. Principal reasons for this hesitation are the treatment of default service as a "first resort" rather than a "last resort" and the perception that consumers have developed of viewing EDCs as "the" electric providers. As I discussed more in my Direct Testimony, the elevation of the default service supply product over the decades has created a barrier to entry for competitive suppliers. Due to a variety of shortcomings in the market, including the inability of EGSs to issue supplier consolidated bills, EGSs face ongoing challenges in showing customers how they can develop and deliver innovative product offerings that are tailored to meet their individual needs.

Former Commissioner James Cawley described the scenario well when he explained that the "fundamental problem with the current default supply structure is that the majority of consumers will not make a proactive decision to choose an energy

supplier when they are provided a default supplier if they do not choose one."[12] He pointed out that this "is especially so when customers are accustomed to receiving complete service from their electric utility."[13] Using the service territory of Duquesne Light Company as example, Commissioner Cawley noted that multiple supplier offers were available that would be more than 20% lower than the utility's prices but that the vast majority of customers were still not shopping. Based on this scenario, he concluded that "mass market customers, including residential and small commercial customers, often will not make affirmative choices for their supplier unless they are required to."[14] I believe the merit of these sentiments is evidenced in this proceeding where the majority of Pennsylvania's residential customers continue to remain with default service and are missing out on the very real opportunities offered by the competitive market - one of which includes price savings. To the contrary, the fact that some consumers are choosing EGS contracts with prices that are higher than the default service rate supports the notion that all consumers are not solely focused on that aspect of the product offering.

Q. BASED ON ALL OF THIS DISCUSSION, WHAT DO YOU CONCLUDE REGARDING THE PRICE COMPARISONS OFFERED BY MS. MARX AND MS. ALEXANDER?

A. I respectfully conclude that they are unhelpful in terms of attempting to analyze the status of the competitive market. They simply show that the majority of residential customers continue to remain with default service despite the availability of "lower priced" products in the competitive market. The analysis fails to consider any other aspect of why the customer electing to shop may have chosen a competitive product that at any particular

[12] *Investigation of Pennsylvania's Retail Electricity Market*, Docket No. I-2011-2237952 (Concurring and Dissenting Statement dated September 27, 2012) at 1.
[13] *Id.*
[14] *Id.* at 2

point in time may be higher than the default service rate. The review also neglects to consider how the current structure of EDC provided default service presents the EDC with full cost recovery opportunities that are not available to EGSs and which, therefore, result in very different pricing considerations between the default service product and the EGS product. For all these reasons, I continue to assert that at a minimum the Commission should open a statewide investigation regarding its messaging of shopping and discontinue use of the term "Price-to-Compare" to describe the EDC's default service product. Adopting this recommendation is a reasonable first step for the Commission to take regarding the root cause structural deficiencies of the current market structure that are leading to the results presented by Ms. Marx and Ms. Alexander.

III. CONTINUING ROLE FOR STANDARD OFFER PROGRAM

Q. PLEASE DESCRIBE THE RECOMMENDATIONS OF OCA WITNESS ALEXANDER REGARDING THE STANDARD OFFER PROGRAM.

A. Witness Alexander describes PECO's SOP, noting the key features, which require EGSs to offer a fixed price agreement for 12 billing cycles to participating customers, at a fixed price that is 7% below the PTC in effect at the time of the customer's voluntary agreement to participate in the program. Despite the Commission's approval for the scripts that PECO uses, witness Alexander opines that they do not properly explain the risk to customers about their actual savings during the term of the contract.[15] Based on her views regarding the SOP, witness Alexander recommends that the program be terminated, claiming that its original purpose has been accomplished. As an alternative recommendation, witness Alexander suggests that "participating EGSs return customers

[15] OCA St. No. 2 at 4-7.

to default service at the end of the SOP contract unless the EGS has completed a new enrollment with an affirmative customer agreement to new or different contract terms."[16]

Q. PLEASE PROVIDE A BRIEF HISTORY OF THE SOP AND ITS PURPOSE.

A. Since as early as 2007, the Commission has recognized the value of a customer referral standard offer program ("SOP") to "enhance customer choice and facilitate the development of retail markets" and specifically codified its view in 52 Pa. Code §69.1815.[17] Following this determination, Commission staff (in collaboration with interested stakeholders) embarked upon a nearly three year process to develop an appropriate structure for SOP to be implemented in Pennsylvania.[18] The final result of this effort is detailed in the *RMI Intermediate Work Plan Final Order.* At its core, the SOP was designed to introduce customers to the competitive market, in part, to address the inertia issue identified by former Commissioner James Cawley.

Q. IN YOUR VIEW HAS THIS PURPOSE BEEN SATISFIED?

A. No. As supported by my Direct Testimony as well as the direct testimony of Ms. Marx and Ms. Alexander, the majority of residential customers continue to remain with the EDC provided default service. And, for those who do shop, their decisions are reviewed through the narrow lens of whether or not they achieved a "price savings" compared to the EDC default service rate at a particular point in time. The "merits" of making such a price evaluation is constantly reinforced by the Commission and advocates. Because OCA appears to support EDC provided default service and is unbothered by the lack of

---

[16] OCA St. No. 2 at 15.

[17] *Default Service and Retail Electric Markets,* Docket No. M-00072009, Final Policy Statement entered February 9, 2007 at 13. 52 Pa. Code §69.1815 states: "The public interest would be served by consideration of customer referral programs in which retail customers are referred to EGSs."

[18] *See Investigation of Pennsylvania's Retail Electricity Market: Intermediate Work Plan*, Docket No. I-2011-2237952, Tentative Order entered December 16, 2011 at 9-15 (*"RMI Intermediate Work Plan Tentative Order*") (details the history of the development of SOP in Pennsylvania).

shopping – despite the availability of "price saving" competitive offers – terminating the SOP is of no consequence to OCA. While I do not disagree about the purpose of SOP, to introduce customers to shopping, I firmly disagree that an evaluation of the pricing of EGS contracts following the initial SOP term is the way to evaluate whether the SOP should be continued. Rather, continuance of the SOP should only be seriously evaluated when significant numbers of residential customers are shopping. Until residential customers are more actively participating in the market, the SOP remains as one of the last programs in Pennsylvania that is at least providing an opportunity for customers to become familiar with EGSs and shopping.

Q. HOW DO YOU RESPOND TO CONCERNS THAT THE SOP CUSTOMER REMAINING WITH THE EGS AFTER THE CONTRACT TERM EXPIRES MAY RECEIVE AN EGS PRICE HIGHER THAN THE DEFAULT SERVICE RATE?

A. Like every other shopping customer, the SOP customer receives full disclosure of the nature of the product and regulatory required notices about options after the expiration of the one-year contract. Terminating the SOP or requiring affirmative consent for the SOP customer to remain with the EGS after the initial one-year term is wholly unnecessary and defeats a core purpose of shopping, i.e. the customer electing to make his or her own decisions. Rather than focus on tearing down the one program that continues to encourage customers to shop, I urge the Commission to consider the recommendation in my Direct Testimony to open a statewide investigation regarding consumer education about shopping and discontinuing the use of the term "Price-to-Compare." While more significant structural measures are likely needed to address the fundamental issues related to shopping, adopting this recommendation would be a good start to more accurately set customer expectations about shopping.

IV. QUARTERLY DEFAULT SERVICE RATE ADJUSTMENTS

Q. HOW DOES OCA WITNESS OGUR PROPOSE TO CHANGE THE FREQUENCY OF DEFAULT SERVICE RATE ADJUSTMENTS?

A. PECO sets the customer facing PTC on a quarterly basis with new rates effective March 1, June 1, September 1 and December 1. The PTC is based on projected cost of supply as well as an "E-factor" which addresses semi-annual reconciliation of any over/undercollection of actual revenues against actual costs for each procurement class.[19] PECO is not proposing any changes to this current process. Mr. Ogur, however, recommends that PECO shift to a semi-annual PTC adjustment.[20] According to Mr. Ogur, less frequent changes and lengthening the period for the reconciliation would provide greater rate stability and certainty for residential default service customers, reduce PECO's administrative costs and better align with the PTC adjustment practices of other EDCs.

Q. DOES RESA AGREE WITH THIS PROPOSAL?

A. No. The ability of the EDC, as the default service provider, to modify its rate for default service in order to reconcile for prior period over and under collections creates a fundamental inequity in the marketplace vis-à-vis default service and competitive offers from EGSs. Although RESA recognizes that the EDC is statutorily guaranteed cost recovery for default service related expenses, the automatic reconciliation process creates an unfair competitive advantage for the EDC and generates customer confusion.

---

[19] PECO St. No. 1 at 4-5.
[20] OCA St. No. 1 at 27-28.

Q. PLEASE EXPLAIN WHY A MORE FREQUENTLY CHANGING PTC BETTER SUPPORTS THE COMPETITIVE MARKET.

A. As RESA has consistently advocated, default service rates must be as market responsive and market reflective as possible to better track the market price of electricity. Several factors influence the ultimate level of market responsiveness of default service rates. These include the frequency of changes to the default service rate, the frequency of any reconciliation adjustment, the length of underlying fixed price wholesale contracts, the procurement lead time embedded in underlying fixed price contracts and the amount of spot market supply that is factored into the procurement portfolio.

RESA believes that a less frequent default service rate adjustment or reconciliation schedule is a step backwards in terms of market responsiveness. Less frequent rate adjustment schedules delay the time when the rate could be adjusted to reflect changes in the spot market pricing component, the expiration or renewal of underlying fixed price contracts, or to account for any variance in projected costs versus actual costs through the reconciliation process. A less frequent default service rate adjustment means that consumers are not seeing the true cost of their default service which leads to a default service rate that bears less of a relationship to the market. Without some rational relationship to the market embedded in the default service rate, EGSs have difficulty establishing competing offers and may not enter that market. For these reasons, revising the default service rate on a more frequent basis, as PECO does now, is a better approach to ensuring accuracy and providing a real time analysis of the costs incurred. Therefore, RESA does not support Mr. Ogur's recommendation.

V. TIME OF USE RATE PROGRAM

Q. PLEASE DESCRIBE THE TESTIMONY OF THE OCA WITNESSES REGARDING THE LACK OF CUSTOMER PARTICIPATION IN PECO'S TOU RATE PROGRAM.

Both Mr. Ogur and Ms. Alexander lament the lack of customer participation in PECO's TOU rate program and offer recommendations for improvements.[21] RESA cautions against any efforts here to enhance the PECO TOU rate offering and to instead rely on EGSs in the competitive market to develop the innovative products that are tailored to the needs of a variety of customers.

EGSs have long advocated for the importance of relying on TOU offers that are available in the retail competitive market. Indeed, the Commission has recognized the important role of EGSs in offering this product to consumers.[22] Although RESA understands the statutory requirement for the EDC to offer a TOU rate, that does not mean the EDC should expend ratepayer money on creating products that can more appropriately and effectively be delivered by the competitive market. To the extent that consumers desire to have particular features incorporated into a TOU rate so that it is an attractive option to them, EGSs are well-positioned to provide these solutions and to facilitate such offerings. While utilities may need to develop a "one size fits all" product due to the confinement of regulatory frameworks, EGSs are spending their own dollars to respond to the demands of the market. As the EGSs are bearing the financial risks since they are not guaranteed cost recovery by captive ratepayers, they are incentivized to

[21] OCA St. No. 1 at 32-36; OCA St. No. 2 at 16-20.

[22] *Investigation of Pennsylvania's Retail Electricity Market: Recommended Directives on Upcoming Default Service Plans*, Docket No. I-2011-2237952 (Tentative Order entered October 14, 2011) at 7.

ensure that the features of their TOU products offer the flexibility that is important to customers. Therefore, the OCA's recommendations should be rejected.

VI. CONCLUSION

Q. DOES THAT COMPLETE YOUR REBUTTAL TESTIMONY?

A. Yes, it does.

RESA EXH. FC-6

Default Service Pricing Has Been Wrong All Along

Allows Utilities to Maintain Dominance in Markets

By Frank Lacey, Electric Advisors Consulting

Default service prices have been wrong for two decades.

Most of the states that have implemented competition in electric and gas sales have employed a Provider of Last Resort, POLR, or default service to supply electricity to customers who do not select an alternative provider. Yet the utilities allocate few to no "costs to serve customers" to default service rates.

This practice has allowed the incumbent utilities to price default service below market rates. And it has allowed them to maintain unregulated monopoly-like power and dominant market positions in the energy markets in their respective service territories.

The failure to allocate costs appropriately to a utility business unit is in direct conflict with cost allocation guidance from the National Association of Regulatory Utility Commissioners, NARUC. Until the default service pricing distortion is corrected, utility default service providers will continue to hold an anti-competitive pricing advantage in the provision of retail electricity service.[1] Regulators should act to correct this major market flaw.

Default Service Rates Artificially Low

Several states have deregulated or restructured their energy markets to allow consumers to choose their own electric and or gas supplier. With few notable exceptions, the deregulation models adopted in these states called for the incumbent utility to become the POLR or default service provider.[2]

While initially envisioned to serve a small number of customers who needed a "last resort" provider, the market rules incorporated into most restructured markets placed all customers on last resort service at the inception of retail competition, making it more of a "default" service.

Because an appropriate amount of costs are not allocated to default service, customers are reluctant to leave their incumbent utility. They are receiving electricity that is subsidized by distribution rates.

The default service pricing subsidy provides the incumbent utilities with what are effectively unregulated monopolies. Default service customers are not being charged an amount that is reflective of the cost to serve them.

The lack of any meaningful cost allocations to default service allows (requires) the incumbent utilities in restructured states to understate the price of retail electricity. This practice effectively eliminates competitive suppliers from functioning in those markets.

This pricing error leads to numerous market flaws. Distribution rates are too high. Default service rates are too low. Customers are receiving incorrect and inappropriate price signals from their host utilities.

The failure to allocate costs appropriately to a utility business unit is in direct conflict with cost allocation guidance from NARUC.

Customers who have switched to competitive suppliers are subsidizing those who stay on default service. And competitive suppliers are at a distinct pricing disadvantage compared to default service providers, allowing the utility market power to proliferate in retail energy markets.

This pricing incongruity allows utilities to maintain a stronghold over customers in their service territory. It also has given rise to claims about overcharging by competitive suppliers.

Freestanding Default Service Business Couldn't Survive

It is easy to prove the anti-competitive pricing in default service. One only needs to contemplate how long a default service business could operate if it was removed from the distribution company but kept its current cost structure intact. The short answer is that it would survive for only a very short period of time – technically, not even a day.

Default service companies need to issue tens of thousands of invoices every day and then need to process revenues as they come in. But because no costs to serve customers are allocated to default service businesses, there would be no money to pay any employees to perform those functions, nor any other function involved in running a default service business.

The current default service businesses would be bankrupt in a matter of days, or even hours, if they were operated outside of the distribution utilities. Clearly, this is a fundamentally flawed

Frank Lacey has worked in competitive energy markets since their inception as a consultant to utilities navigating restructuring and as a direct market participant once the markets opened. After more than twenty years in the industry, he launched Electric Advisors Consulting, in the fall of 2015. His focus is assisting clients with energy market issues – regulatory, strategic and business. His clients include energy market participants and end-use consumers. He can be reached at frank@eacpower.com.

Delaware	Delmarva	9.8	32.2	

system and one that conflicts with all traditional rate-making standards.

Cost allocation is a fundamental tenet of utility ratemaking. The principles of cost allocation are fully endorsed by NARUC and should be applied to default service as they are to all other utility rates.

Allocations are required to appropriately assign fixed costs to multiple products or services that drive the costs. The principles of cost allocation are the foundation for nearly every (if not every) utility rate, aside from default service rates.

The NARUC Cost Accounting Manual states:

"While opinions vary on the appropriate methodologies to be used to perform cost studies, few analysts seriously question the standard that *service should be provided at cost.* Non-cost concepts and principles often modify the cost of service standard, but it remains the primary criterion for the reasonableness of rates. The cost principle applies not only to the overall level of rates, but to *the rates set for individual services, classes of customers, and segments of the utility's business.*" Emphasis added.

NARUC has separately published cost allocation principles. The principles should be applied, according to NARUC "whenever products or services are provided between a regulated utility and its non-regulated affiliate or division." NARUC principles apply to default service, a business segment where many services are provided by the distribution company:

"The allocation methods should apply to the regulated entity's affiliates in order to *prevent subsidization* from and ensure equitable cost sharing among the regulated entity and its affiliates, and vice versa." Emphasis added.

NARUC states that the objective of its guidelines is to "lessen the possibility of subsidization in order to *protect monopoly ratepayers and to help establish and preserve competition* in the electric generation and the electric and gas supply markets." Emphasis added.

In fact, to ensure the competitiveness of markets, NARUC states that generally, "the price for services, products and the use of assets provided by a regulated entity to its non-regulated affiliates should be *at the higher of* fully allocated costs or prevailing market prices." Emphasis added.

NARUC's objectives and guidelines have been ignored in pricing default service.

Market Distortions

The default service pricing anomaly has given rise to many market distortions and has resulted in competitive suppliers being cast in a negative light in many jurisdictions. It has caused competitive suppliers to spend millions of dollars in unnecessary marketing costs, regulatory costs and legal and compliance costs.

Most important, it has resulted in customer harm from being constrained to the utilities' "no service" products and from the

lack of product options that are available in more competitive markets.

Table One details the percentage of customers who have chosen a competitive electric supplier across many of the deregulated electricity markets. Despite two decades of competition and dozens of suppliers vying for customers in every market, the incumbent utility stronghold on the market, especially over residential customers, is painfully clear.

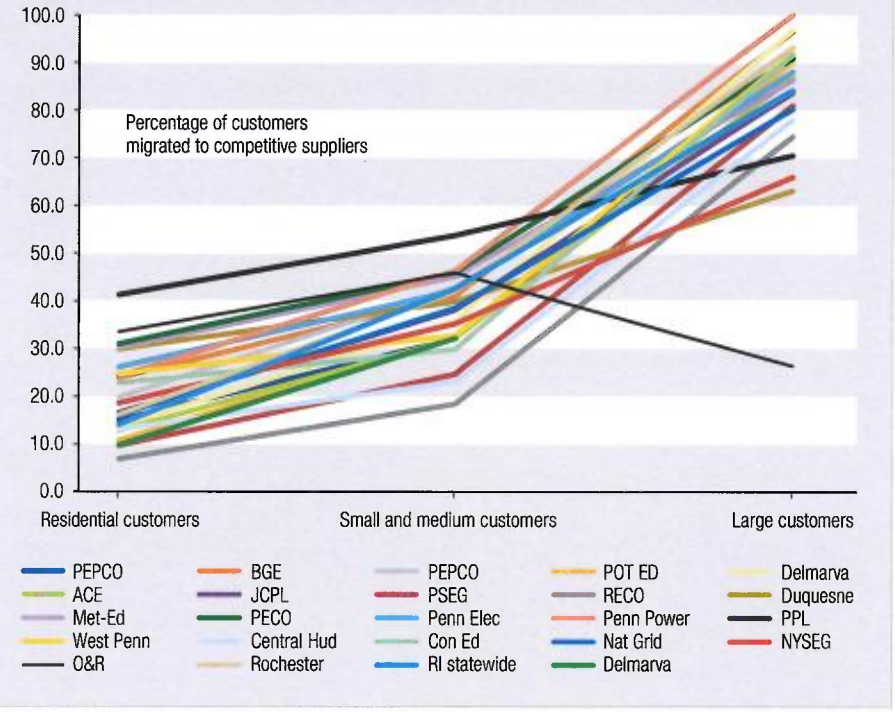
See Figure One.

At the low end, we see single digit migration rates for residential customers to competitive suppliers. The Pennsylvania market shows the most promising residential migration numbers – ranging from the mid-twenty percent range to just over forty percent in PPL's service territory.

States that have deployed municipal aggregations to facilitate customer migration are not included in this chart because aggregations are simply a regulatory fix that masks the pricing problem in the short-term. Municipal aggregations do not solve the pricing problems over time.

Figure Two shows the same data in graphical form. The utilities all show the same migration trends. Small customers do not migrate away from the utilities while the largest customers participate in the competitive markets at very high penetration levels.[3] See Figure Two.

Fig. 2 Customer Migration Trends Are Consistent Across Markets



Artificially Low Default Service Prices Harms Customers

Under an appropriate cost allocation approach, the customers will pay, on net, the same amount every year. Cost allocation does not cause an increase in costs to customers. It only moves costs to different buckets.

Because there is no total cost increase to customers with an appropriate cost allocation, the argument that the customers are better off under the current pricing model is flawed. In fact, because of the inaccurate pricing signal with the current model, customers are harmed in meaningful ways.

Most important, customers are not receiving the appropriate price signal for energy. This results in a potential to over-consume energy provided by default service providers, yielding what could be a higher overall monthly cost to the customer than would otherwise incur if the electricity was priced appropriately.

Customers who have switched to competitive suppliers are subsidizing those who stay on default service.

The distribution subsidy also creates a barrier to evaluating competitive offers. It is impossible for customers to assess fairly a competitive offer when the utility price is artificially low.[4] Because the basic competitive market product would be viewed as uneconomic by the consumers, competitive suppliers are less likely to invest fully in the market, depriving customers of other products and services that the suppliers might be inclined to offer in that market. Foregone products and services include many that might reduce a consumer's consumption overall, benefitting the customers and the environment.

Finally, the distribution subsidy results in a distribution rate that is too high. Customers who have moved away from the utility are forced to pay costs that benefit customers who remain on default service.

Recent Analyses Reveal Subsidies

Substantial analyses seeking to understand the magnitude of the distribution subsidy have been performed in two recent distribution rate cases. The results of those analyses have been presented to utility commissions in Pennsylvania and New

Jersey in the form of expert testimony in those respective cases. These analyses show that the subsidy is significant – a penny or more per kilowatt-hour – as high as fifteen percent of the default service rate.

In PECO's rate proceeding, Pennsylvania Public Utility Commission's docket R-2018-3000164, NRG Energy Company provided an analysis of PECO's distribution rates to determine if any distribution costs were being used to subsidize PECO's default service rates. The analysis showed that the subsidy of PECO's default service by PECO's distribution business amounts to 1.25 cents per kilowatt-hour for residential customers.

If that amount was properly allocated to PECO's default service rates, it would increase those rates by approximately fifteen percent. Of course, if the costs were properly allocated to default service, the corresponding cost components from the distribution rates would decrease by the same amount.

In PSEG's rate proceeding, New Jersey Board of Public Utilities docket ER18010029, I undertook on behalf of Direct Energy, a similar analysis. My analysis showed that the subsidy that PSEG distribution rates were providing to PSEG's default service amounts to 1.0 cents per kilowatt-hour to residential customers. Because PSEG's default service rates are higher than PECO's, an additional 1.0 cents per kWh represents a subsidy of about eight percent to residential default service rates.

In the PSEG rate case, not enough information was provided by the utility to determine the magnitude of costs (working capital, credit, bad debt, etc.) that should be directly assigned to default service. As a matter of conservatism in my analysis, I assumed that those should be only partially allocated.

If direct costs were assigned properly to default service and indirect costs were allocated appropriately, the actual costs to serve default service customers in New Jersey could be in the range of 1.5 cents per kilowatt-hour.

With default service rates ranging from the low single digits to the low teens in cents per kilowatt-hour in markets across the country, and the unallocated funds (or subsidies) ranging from 1.0 to 1.5 cents per kilowatt-hour, this subsidy can be valued anywhere between eight percent and fifty percent of a monthly default service charge. A subsidy of that magnitude, or that scale of utility "discount" severely distorts the market, unfairly advantages the utilities over competitive service providers and harms customers.

Conclusion

Appropriately allocating costs currently paid by distribution customers to default service is a critical next step in creating more competitively neutral energy markets in the United States. This one step will not create the perfect markets, but it will remove a significant anti-competitive pricing advantage held by monopoly utilities.

It will also remove a subsidy that competitive supply customers are forced to pay to benefit default service customers, and it will help create a market that competitive suppliers are more willing to invest in. At the same time, if implemented correctly, it keeps distribution utilities financially whole. It is a win-win-win solution benefitting all market participants. PUF

Endnotes:

1. While this article is focused on electricity markets, the same pricing problems exist in gas markets. The costs to serve customers are not allocated to those customers' rates. Instead, they are charged to distribution customers.
2. Most of the deregulation models deployed in the U.S. are generally very similar. In contrast, Texas electricity customers and Georgia natural gas customers were placed with market participants at the inception of those markets and default service in those markets is truly a "last resort" service, not a "default" or "do nothing" service.
3. The one anomaly revealed in this chart is in the Orange & Rockland Utility in New York. It shows an uncharacteristic low level of customer migration at the large end of the customer spectrum. It is not clear whether this is a data error on the NY PSC website, or if there is a market anomaly in that market that results in the largest customers remaining with the utility.
4. Under no circumstance should any price, including the utilities' default service price, be considered a benchmark price. The default service price is for a specific product with a specific set of parameters associated with it. Additionally, as this article notes, it is heavily subsidized. It comes with a certain level of service and a limited ability for it to be modified in any way to meet customers' needs. Regardless, regulators in many states have mandated rules that require a comparison of all products to the utility default service price. These requirements include for example, a requirement that the default service price be placed on a customer's invoice, even if the customer is being served by another supplier, with a different product. Some have required that all sales interactions include a notice of the utilities' default service price.

FOOTNOTE

1) Massachusetts Lowest Offer Price includes Community Choice as it's our understanding that anyone can sign up for Community Choice
2) Longest Term Lowest Offer does include Green offers with fixed rate terms since the intent is to show the longest term of a non-variable rate.

State	REP	Description
Connecticut	XOOM Energy Connecticut, LLC	Airline reward miles available.
	XOOM Energy Connecticut, LLC	Supplier will make a charitable donation based on customer usage.
D.C.	Major Energy Electric Services	You can be qualified to a $100 total rebate over the course of service.
	WGL Energy Services	$50 in Reward Dollars every month that you can use to save in over 500,000 ways.
Illinois	AEP Energy	Receive up to $60 in Reward Dollars for the AEP Energy Reward Store, an online marketplace filled with a variety of energy-saving products for your home.
	Ambit Northeast	Get 50% off your energy charges on bill cycles beginning November 1st through the end of February.
	EcoPlus Power	Free Subscription to Norton LifeLock Personal Identity Theft Protection and an Amazon Gift Card Loyalty Program every 6 Months.
	Illinois Gas & Electric	$50 in Reward Dollars every month once your account's active.
	Spark Energy	You can be qualified to a $100 total rebate.
	Think Energy	Receive a $100 gift card.
Maryland	AEP Energy, Inc.	Includes access to AEP Energy Reward Store, a one-stop online marketplace filled with a variety of energy-saving products for your home and is exclusively for AEP Energy customers. You can earn Reward Dollars to use in the Reward Store by enrolling in this price plan.
	Agway Energy Services LLC	Includes our EnergyGuard repair program. This valuable coverage provides Peace of Mind repair protection on your central a/c unit and the interior electric lines in your home.
	Ambit Northeast, LLC	Get 50% off your energy charges on bill cycles beginning November 1st through the end of February.
	American Power & Gas of MD LLC	25% Rebate on average monthly supply charges after 12 months.
	Energy Harbor	Ask about how to get $50 in gift cards when you sign up.
	Energy Services Providers, Inc. d/b/a Maryland Gas and Electric	$50 in Reward Dollars every month once your account's active.
	RPA Energy Inc	As a customer you automatically qualify for our Power Perks Rewards Program.
	Shipley Choice LLC d/b/a Shipley Energy	Earn 3% Rewards with Shipley Energy's Reward Program.
	Spring Energy RRH LLC d/b/a Spring Power & Gas	Customers receive $25 in Spring Rewards Dollars each month.
	Spring Energy RRH LLC d/b/a Spring Power & Gas	Includes HVAC coverage up to $750 per year or Surge Protection up to $1500 per year.
	Tomorrow Energy Corporation fka Sperian Energy Corporation	4 trees will be planted in partnership with the Arbor Day foundation over your 12-month term.
	WGL Energy Services, Inc.	$50 in Reward Dollars every month that you can use to save in over 500,000 ways.
	XOOM Energy Maryland, LLC	Cash Back program, you earn a 5% rebate for your everyday energy usage.
	XOOM Energy Maryland, LLC	Enroll on RescueLock 12 and 5% of your monthly energy charges will be donated to PetSmart Charities.
Massachusetts	Alpha Gas and Electric	Cash Back after 12 consecutive months of service.
	CleanChoice Energy	$50 Gift Card, Rewards Programs, Sponsored Promotions.

I. INTRODUCTION

Q. PLEASE STATE YOUR NAME, EMPLOYER AND TITLE.

A. My name is Frank Caliva, and I am the President of P.R. Quinlan Associates Inc. ("P.R. Quinlan").

Q. DID YOU PREVIOUSLY SUBMIT TESTIMONY IN THIS PROCEEDING?

A. Yes. My Direct Testimony on behalf of the Retail Energy Supply Association ("RESA")[1] was preserved on April 25, 2024, and my Rebuttal Testimony on behalf of RESA was preserved on May 15, 2024.

Q. ON WHOSE BEHALF IS THIS SURREBUTTAL TESTIMONY OFFERED?

A. This Surrebuttal Testimony is likewise offered on behalf of RESA.

Q. WHAT IS THE PURPOSE OF YOUR SURREBUTTAL TESTIMONY?

A. The purpose of my Surrebuttal Testimony is two-fold.

First, I will respond to the opposition to RESA's proposals set forth in the rebuttal testimonies of: (1) PECO Energy Company ("PECO") Witnesses Sulma Dalessio, Scott G. Fisher and Katie Orlandi; (2) Office of Consumer Advocate ("OCA") Witness Barbara R. Alexander; and (3) Tenant Union Representative Network and Coalition for Affordable Utility Services and Energy Efficiency in Pennsylvania ("TURN/CAUSE-PA") Witness Elizabeth R. Marx. As I will discuss further below, these witnesses present no compelling reason for the Commission to reject RESA's recommendations: (1) to open a statewide investigation regarding default service messaging; (2) to reject PECO's

[1] The comments expressed in this filing represent the position of the Retail Energy Supply Association (RESA) as an organization but may not represent the views of any particular member of the Association. Founded in 1990, RESA is a broad and diverse group of retail energy suppliers dedicated to promoting efficient, sustainable and customer-oriented competitive retail energy markets. RESA members operate throughout the United States delivering value-added electricity and natural gas service at retail to residential, commercial and industrial energy customers. More information on RESA can be found at www.resausa.org.

proposed residential utility bill comparison chart; (3) related to PECO's Customer Information System upgrade; and (4) to reject PECO's proposed use of a Capacity Proxy Price. Second, I will further discuss issues related to PECO's proposal to secure an additional 16,000 Solar Alternative Energy Credits ("AECs" or "SAECs") through a 10-year fixed priced contract, and OCA Witness Serhan Ogur's alternative proposal, which RESA can support.

Q. ARE YOU SPONSORING ANY EXHIBITS?

A. No.

II. STATEWIDE INVESTIGATION REGARDING DEFAULT SERVICE MESSAGING

Q. PLEASE RESTATE RESA'S RECOMMENDATIONS RELATED TO OPENING A STATEWIDE INVESTIGATION REGARDING DEFAULT SERVICE MESSAGING.

A. For the reasons supported by my Direct Testimony related to the current stagnant state of the retail competitive market for residential consumers and RESA's decision not to recommend more aggressive structural reforms in this proceeding, I recommend the opening of a statewide investigation regarding Commission approved messaging of the default service rate as the "Price-to-Compare" (or "PTC"). This investigation would include discontinuing use of that term and replacing it with "Default Service Rate" and consideration of how messaging can be improved to support the ability of customers to make more informed decisions when they evaluate competitive offers. (RESA St. No. 1 at 17).

Q. HOW DID PECO RESPOND TO THIS PROPOSAL?

A. PECO opposes the proposal. PECO Witness Dalessio states that the Commission has already determined that the electric distribution company ("EDC") should remain the

default service provider, that I did not present any evidence to support the position that changing the messaging will result in EGSs offering more competitive offerings and that "customers have been making shopping decisions based on the PTC since the beginning of electric restructuring without any Commission finding that such framework sends a message to customers that default service is somehow 'superior' to competitive offerings." (PECO St. No. 1-R at 24-25). In addition, PECO Witness Fisher discusses why PECO disagrees with the view that there is stagnation in the residential retail competitive market to warrant further investigation. (PECO St. No. 3-R at 57-59).

Q. ARE YOU CONVINCED BY ANY OF PECO'S REBUTTAL TESTIMONY THAT RESA'S PROPOSAL SHOULD NOT BE ADOPTED?

A. I am not. I understand Ms. Dalessio's testimony to be saying that the Commission has not identified any problems in the past regarding use of the term PTC or the role of the EDC as the default service provider so there is no reason to look at it now. On a fundamental level, I do not agree that there needs to be some past finding of a problem for the Commission to decide to open an investigation in the present. In fact, the purpose of an investigation is to consider current data and then make a determination on how to move forward. Setting this aside, though, the PECO Witnesses offer no information or explanation as to why consumers would not benefit from a Commission investigation focused on evaluating Commission supported messaging regarding the default service rate and the impact of the education on customers shopping decisions.

Q. DOES MR. FISHER'S TESTIMONY DISPUTING THE REASONS YOU OFFER TO SUPPORT THE OPENING OF A STATEWIDE INVESTIGATION GIVE YOU PAUSE?

A. No. Clearly RESA has a fundamental disagreement with PECO and the other advocates in this proceeding about the current state of the competitive market for mass market

customers in Pennsylvania. I would note, though, that the Commission itself recognized that 2022 marked "the sixth straight year of decreasing customer accounts" served by an EGS. (RESA St. No. 1 at 11, referencing RESA Exh. FC-2 at 3). And, as discussed more fully in my Rebuttal Testimony, residential customers continue not to shop despite the presence of numerous offers available in the Pennsylvania retail market below the utilities default service rate between January 2024 and March 2024. (RESA St. No. 1-R at 6-7, referencing RESA Exh. FC-7 through FC-9). Further, the issue of "customer inertia,"[2] as described by former Commission James Cawley, is one that appears not to be even considered by the PECO Witnesses. In my view, these facts undercut the view that customers are simply "choosing not to shop" and, therefore, there is no need to look any further at this issue. Ultimately, none of the PECO witnesses present any reasonable basis to reject RESA's proposal to open a statewide investigation, which would have the benefit of evaluating current data and making recommendations that would ultimately better educate customers about the role of default service and competitive supplier options.

Q. DO OCA AND TURN/CAUSE-PA ALSO OPPOSE RESA'S RECOMMENDATION FOR A STATEWIDE INVESTIGATION?

A. Yes. Ms. Alexander and Ms. Marx oppose RESA's recommendations for reasons similar to those offered by PECO. Ms. Alexander calls RESA's proposal "unreasonable" given

[2] The "fundamental problem with the current default supply structure is that the majority of consumers will not make a proactive decision to choose an energy supplier when they are provided a default supplier if they do not choose one." *Investigation of Pennsylvania's Retail Electricity Market*, Docket No. I-2011-2237952 (Concurring and Dissenting Statement dated September 27, 2012) at 1. He pointed out that this "is especially so when customers are accustomed to receiving complete service from their electric utility." *Id.* Using the service territory of Duquesne Light Company as example, Commissioner Cawley noted that multiple supplier offers were available that would be more than 20% lower than the utility's prices but that the vast majority of customers were still not shopping. Based on this scenario, he concluded that "mass market customers, including residential and small commercial customers, often will not make affirmative choices for their supplier unless they are required to." *Id.* at 2.

"the costs incurred, and years of customer education." (OCA St. No. 2-R at 4). She also explains her view that RESA fails to consider alleged "subsidies" EGSs receive as a result of the Commission approved Purchase of Receivables ("POR") program and the Customer Referral Standard Offer Program ("SOP"). (OCA St. 2-R at 3). Ms. Marx opines that the default service proceeding is not the place to advocate for a statewide proceeding. She also further testifies that EGS pricing is allegedly "excessive" and attributable to mark-ups beyond overhead costs and/or price discrimination and contends this is the "real" reason why customers are "electing" not to shop. (TURN/CAUSE-PA St. No. 1-R at 6-7).

Q. ARE YOU CONVINCED BY MS. ALEXANDER'S CONCERN ABOUT THE COSTS INCURRED AND TIME SPENT ESTABLISHING COMMISSION APPROVED CUSTOMER EDUCATION ABOUT SHOPPING AS A REASON TO NOT OPEN AN INVESTIGATION NOW?

A. No. I recognize her point, but I do not agree that just because something is in place and has been in place over a number of years it should never be evaluated again. The Commission has lots of data acquired over the past few years which would assist it and interested stakeholders in better understanding how consumers view the competitive markets and the drivers of their decision making. I struggle to understand how evaluating current data with the goal of better informing customers is objectionable.

Q. DO MS. ALEXANDER'S VIEWS ABOUT ALLEGED "SUBSIDIES" GRANTED TO EGSs MERIT ANY SERIOUS CONSIDERATION IN THE CONTEXT OF RESA'S RECOMMENDATION?

A. No. By taking this opportunity to air her grievances about the structure and operation of the current Commission-approved POR program and SOP, Ms. Alexander is attempting to shift the focus of attention away from the EDC provided default service product – the issue that is core to this proceeding. None of her points is relevant to consumer

understanding of the differences between the default service supply product and competitive EGSs offers and whether Commission approved messaging can be refined. With that said, I would be remiss if I did not point out that the Commission (along with strong support from OCA) has determined that only the EDC may terminate service for non-payment. The ability to terminate service is a significant tool to collect payment for services rendered, and utilities (with their ratepayer funded billing and collections systems) have strong collections success historically. Despite this tool being available to utilities, EGSs in Pennsylvania and elsewhere have sought supplier consolidated billing, which would likewise permit them to terminate service for non-payment and, therefore, take away the collections risk from the utility, but they have been met with strong opposition.

Thus, with POR, the EDC remains in control of the bill for supplier charges and maintains control of the ratepayer funded billing and collections systems developed over the years. The bill is the most powerful method for communicating with customers, and the EDC exercises total control over how the EGS may communicate with its customers on the bill as well as what products and services can be included on the bill. Dual billing for residential customers, under which EDCs send a bill for distribution charges and EGSs send a bill for supply charges, is completely unrealistic as it causes customer confusion and frustration and prohibits EGSs from having any serious chance of collecting payment for services rendered because they cannot terminate service for non-payment. For all these reasons, and even if it were relevant to the discussion about RESA's recommended statewide investigation, Ms. Alexander's claims EGSs are "subsidized" by EDCs are patently false and unconstructive.

Q. DO YOU AGREE THAT THIS PROCEEDING IS NOT THE "RIGHT" PLACE TO ADVOCATE FOR A STATEWIDE INVESTIGATION AS ARGUED BY MS. MARX?

A. No. Respectfully, Ms. Marx is trying to elevate form over substance. This proceeding is about the default service product. The structure of the default service product impacts the competitive market as I discussed in my testimony. The result impacts consumers. The Commission has the discretion, based on the testimony presented here, to determine that a statewide investigation is a reasonable way to proceed to address the statewide concerns belying the use of the term Price-to-Compare and the impact of Commission approved messaging on the competitive market.

Q. DOES THE MANNER IN WHICH EGSs PRICE PRODUCTS HAVE ANY BEARING ON YOUR RECOMMENDATION?

A. No, it does not. Even if Ms. Marx's statement were supportable, I am informed by counsel that the Commission does not regulate EGS pricing. However, a structurally sound competitive market would take care of any instances of excessive pricing because the EGSs would be in real competition against each other rather than all EGSs just trying to "beat" a default service rate which is established through a Commission approved procurement process and subject to reconciliations to ensure full cost recovery. Any anomalous EGS pricing would be rejected by customers and, therefore, would not be sustainable.

Q. BASED ON ALL OF THIS, DO YOU CONTINUE TO SUPPORT RESA'S RECOMMENDATION FOR A STATEWIDE INVESTIGATION?

A. I do. Neither PECO, OCA nor TURN/CAUSE-PA present sound reasons for rejecting the proposal. Instead, they offer their own views about the current state of the market and recommend that the status quo remain without any further evaluation. I find this to be a disservice to consumers and contrary to what I understand from counsel is the

Commission's statutory obligation to foster the development of a functioning competitive market.

III. RESIDENTIAL UTILITY BILL COMPARISON CHART

Q. WHAT DO YOU RECOMMEND REGARDING PECO'S PROPOSED RESIDENTIAL UTILITY BILL COMPARISON CHART?

A. I recommend that the proposal be rejected on the basis that it creates a misleading impression regarding the default service rate and EGS products. (RESA St. No. 1 at 22). If the Commission is inclined not to outright reject PECO's proposal, then I alternatively proposed that additional disclosures regarding PECO's lack of knowledge about the characteristics of the EGS contract price and the nature of PECO's default service rate be included with any type of comparison chart. (RESA St. No. 1 at 23).

Q. DID PECO AGREE WITH EITHER OF THESE RECOMMENDATIONS?

A. No. PECO Witness Dalessio points to the EDC's 2021 collaborative and notes that there is room on the consolidated utility bill for suppliers to present disclosures. (PECO St. No. 1-R at 26-27). However, PECO does agree to remove its initially proposed "third column" entitled "Electric Supplier Savings." (PECO St. No. 1-R at 26).

Q. DOES THIS RESPONSE SATISFY RESA'S CONCERNS ABOUT THE PROPOSED COMPARISON CHART?

A. No. While I support the removal of the third column, I do not understand how referencing the 2021 collaborative and "participation by several EGSs" addresses the anti-competitive and misleading concerns I detailed in my Direct Testimony. PECO is proposing the chart in this proceeding for the Commission's review and approval. I have presented testimony supporting RESA's concerns with the proposal, and PECO has not rebutted the substance of these concerns. The view that EGSs already have space to include any disclosures they desire fails to acknowledge that EGS explanations are

relegated to a different part of the bill and would not (because they could not) be made on behalf of PECO about PECO's default service rate. Nor, because of the placement of the EGS dedicated lines, would any EGS language be placed near the comparison chart that PECO is placing on the residential bill. As such, PECO's witnesses have not addressed the core of RESA's concerns, nor have they offered any viable solutions or alternatives to address those concerns. Moreover, the attempt to push the "solution" to EGSs to "fix" the concerns I have raised ignores the fact that this is PECO's proposal on PECO's bill for which PECO is seeking Commission approval. As I testified in my Direct Testimony, before any EDC is permitted to provide this type of comparison on the bill, a statewide investigation about messaging of the default service rate should be initiated to devise more accurate and useful messaging for consumers about the differences between the default service rate and EGS contract prices.

Q. DO OTHER PARTIES OPPOSE YOUR RECOMMENDATIONS REGARDING THE REMOVAL OF THE PRICE COMPARISON CHART OR THE INCLUSION OF ADDITIONAL DISCLOSURES?

A. Yes. Both OCA and TURN/CAUSE-PA present opposition similar to that expressed by PECO. Both witnesses further testify that PECO's proposal does not "determine" the action a customer will take in response to the chart and that giving EGSs more lines on the bill will enable them to use PECO's bill to "market their products." (OCA St. No. 2-R at 3-5; TURN/CAUSE-PA at 1-R 8-9).

Q. DO EITHER OF THESE POINTS CHANGE YOUR MIND ABOUT THE PRICE COMPARISON CHART?

A. No, they do not. For the reasons already stated, how a comparison chart like this is factored into a customer shopping decision and the education to consumers about the differences between the default service rate and an EGS contract rate are matters that

should be considered as part of a statewide investigation rather than attempting to "guess" here that no harm will be done. As to marketing of products, the disclosures I discussed in my Direct Testimony necessarily include disclosures to be made by PECO about PECO's default service rate and PECO's decision to include a chart on the consolidated utility bill issued by PECO. I also recommended that the specific language be determined through a collaborative process and submitted to the Commission for final approval. Attempting to characterize this proposal as merely a way for EGSs to "market" their products on the consolidated bill should be completely disregarded as it is far beyond anything I proposed in my Direct Testimony.

IV. PECO CUSTOMER INFORMATION SYSTEM UPGRADE

Q. WHAT DID YOU RECOMMEND REGARDING PECO'S CUSTOMER INFORMATION SYSTEM (CIS) UPGRADE?

A. After discussing the significant challenges faced by EGSs during PECO's CIS upgrade and the lack of accurate information being provided by PECO to EGSs and customers resulting from the upgrade, I propose processes that the Commission should direct PECO to undertake going forward whereby it collaboratively works with competitive suppliers to reasonably support their ability to provide service and make offers to customers. (RESA St. No. 1 at 27-28).

Q. HOW DID PECO RESPOND TO THIS RECOMMENDATION?

A. PECO Witness Dalessio takes the view that the recommendations are moot because the new CIS has been launched and also that the EDI issues have been resolved. (PECO St. No. 1-R at 29).

Q. DOES THIS RESPONSE SATISFY THE CONCERNS RESA RAISED ABOUT THE CIS UPGRADE?

A. No, unfortunately not. RESA's recommendations were intended to offer constructive feedback to better address issues in the future for the benefit of customers. The fact that the issues were addressed by PECO (only after causing significant customer confusion and distress to EGSs) and that the new system is in place does not undercut the need for better communication and assistance in the future as I expect there will continue to be bugs with the new CIS that will have a negative impact on supplier customers. PECO's outright rejection of pathways forward to work collaboratively with suppliers on these issues underscores the need for Commission direction to have processes in place to prevent them from happening in the future. For these reasons, I continue to stand by my initial recommendations regarding the CIS upgrade.

V. CAPACITY PROXY PRICE

Q. PLEASE SUMMARIZE RESA'S RECOMMENDATION REGARDING THE USE OF A CAPACITY PROXY PRICE ("CPP")?

A. As explained in my Direct Testimony, RESA recommends that the proposal be rejected because it insulates only wholesale default service suppliers from the risk associated with unknown capacity prices which further distorts the resulting default service rate. (RESA St. No. 1 at 3). Further, I noted that solutions are available in the secondary market to deal with a lack of information from PJM to all Load Serving Entities ("LSEs"), which include wholesale default service suppliers and competitive EGS.

Q. HOW DID PECO AND OCA RESPOND TO THIS RECOMMENDATION?

A. Both PECO Witness Orlandi and OCA Witness Ogur take the view that EGSs have flexibility to enter into contracts of various lengths and can include "regulatory-out" clauses to reformulate contract terms if necessary. (PECO St. No. 4-R at 21-22). OCA

Witness Ogur further takes the view that approval of this type of mechanism, which can "improve price stability or affordability for default service customers," should occur regardless of whether the same accommodation is possible or practical for EGS service. (OCA St. No. 1-R at 3).

Q. HAVE ANY OF THESE ARGUMENTS CONVINCED YOU TO RESCIND RESA'S RECOMMENDATION TO REJECT USE OF THE CPP?

A. No, none of the witnesses appear to dispute my testimony that use of the CPP distorts price signals and the lack of information from PJM creates difficulties for all LSEs, including competitive suppliers. While I understand from counsel that the Commission's rules prohibit EGSs from "reforming" existing fixed price contracts for mass market customers to pass through unknown costs at a later date,[3] none of the witnesses acknowledge that PECO's ability to true up actual costs at a later period increases the level of distortions of the default service rate which just exacerbates all of the competitive market concerns I have been discussing throughout this proceeding. Thus, RESA cannot support use of the CPP as proposed by PECO.

[3] *See, Guidelines for Use of Fixed Price Labels for Products With a Pass-through Clause, Docket No. M-2011-2362961, Final Order entered November 14, 2013 ("Fixed Price Label Order").* EGSs cannot rely on a "regulatory out" clause in the contract to recover the cost from the fixed price customer because the *Fixed Price Label Order* requires an EGS dealing with an unpredicted increase in costs (that it did not already factor into the fixed price product) to provide the customer prior notice of the EGS's intent to pass on the charge to the customer. If the customer does not affirmatively agree to the price increase, then the EGS must cancel the contract. The likely outcome of this action is for the EGS to lose the customer. *Fixed Price Label Order* at 24 ("a 'fixed price' product must not change in price during the term of the agreement"). Thus, the practical impact of the *Fixed Price Label Order* for the competitive market is that it limits the ability of EGSs to recover the costs of unknown capacity prices from mass market customers.

VI. ACQUISITION OF SOLAR AECS THROUGH 10-YEAR CONTRACT

Q. PLEASE SUMMARIZE RESA'S RECOMMENDATION REGARDING PECO'S PROPOSAL TO INCREASE ITS RELIANCE ON A 10-YEAR CONTRACT TO SECURE SOLAR AECS FOR DEFAULT SERVICE CUSTOMERS ONLY.

A. RESA does not support the use of long-term contracts to forecast and set the cost of Solar AECs over a 10-year period for default service customers because this approach leads to further misalignment of the default service rate with market forces. (RESA St. No. 1 at 33-34). Recognizing that the Commission has already approved these types of contracts in the past, though, I recommend that the Commission consider competitively neutral structures to ensure that the procurement of long-term contracts does not adversely impact the development of the retail competition. I further testified that one such structure could be to assign the acquired Solar AECs to all LSEs so that both default service customers and EGS customers would benefit from the acquisition of the Solar AECs. (RESA St. No. 1 at 34).

Q. DID PECO AGREE WITH THIS RECOMMENDATION?

A. No. PECO Witness Dalessio testified that RESA did not show that PECO's proposal would "lead to an inadequate supply of SAECs" and that EGSs have the ability to hedge their positions. (PECO St. No. 1-R at 18).

Q. HAS THIS RESPONSE LED YOU TO REVISE YOUR INITIAL POSITION?

A. No. My testimony addressed how PECO's proposal adds further distortions to the default service rate which exacerbates the competitive retail market issues I have discussed through this and my previous testimonies. This point is not addressed by PECO and I stand by RESA's initial recommendation as set forth in my Direct Testimony.

Q. HOW DID OCA RESPOND TO RESA'S RECOMMENDATION?

A. OCA Witness Ogur expressed concerns about the timing of any transition to a process whereby PECO would apply the Solar AECs to all LSEs rather than just default service load, noting that it could result in shopping customers paying twice for the same solar AECs. (OCA St. No. 1-R at 6). To address this concern, Mr. Ogur testified that OCA would not object to PECO assuming the responsibility for the entire solar Tier 1 AEC obligation for its entire distribution load and recovering the costs via a non-bypassable chart but that the shift would need to be implemented with a lag of two or three years after final Commission order so that pre-existing fixed price EGS contracts expire before the costs are shifted.

Q. WOULD RESA SUPPORT THE TIMING PROPOSAL OFFERED BY OCA?

A. Yes.

VII. CONCLUSION

Q. DOES THAT COMPLETE YOUR SURREBUTTAL TESTIMONY?

A. Yes, it does.

I. Witness Identification and Qualifications

Q. Please state your name, business name and address, and role in this proceeding.

A. My name is Karl R. Rábago. I am the principal of Rábago Energy LLC, a Colorado limited liability company, located at 1350 Gaylord Street, Denver, Colorado. I appear here in my capacity as an expert witness on behalf of POWER Interfaith ("POWER"), Vote Solar, Clean Air Council, Sierra Club, Physicians for Social Responsibility, and PennEnvironment. Collectively, these organizations are the Energy Justice Advocates or EJA.

Q. Please describe the Energy Justice Advocates.

A. POWER,[1] Vote Solar,[2] Clean Air Council,[3] Sierra Club,[4] Physicians for Social Responsibility,[5] and PennEnvironment[6] have joined together as the Energy Justice Advocates in this proceeding to ensure that PECO's DSP VI contains prudent and reasonable steps towards incorporating affordable zero emission renewable energy as part of default service supply. This engagement is part of and builds on POWER's long-term People's Energy Plan campaign, which advocates a shift away from fossil fuels towards a

[6] PennEnvironment: https://environmentamerica.org/pennsylvania/.

future in which all Southeast Pennsylvanians can meet their energy needs with affordable zero emission renewable energy.[7]

Q. Please summarize your experience and expertise in the field of electric utility regulation and renewable energy.

A. I have worked for more than 33 years in the utility industry and related fields, following my honorable discharge from the U.S. Army, where I served as an Armored Cavalry officer and a Judge Advocate. I am actively involved in a wide range of utility regulatory and ratemaking issues across the United States. My previous employment experience includes Commissioner with the Public Utility Commission of Texas, Deputy Assistant Secretary with the U.S. Department of Energy, Vice President with Austin Energy, Executive Director of the Pace Energy and Climate Center, Managing Director with the Rocky Mountain Institute, and Regulatory Director with AES Corporation, among others. A detailed resume is attached as Exhibit KRR-1.

As a public utility commissioner in Texas, I participated in making hundreds of rate, rulemaking, and planning decisions in cases involving investor-owned, municipal, and cooperative electric and telephone utilities. Those matters ranged widely, from ministerial annual interest rate approvals, for example, to prudence and rate decisions on a $12.4 billion nuclear power plant, to mergers and acquisitions. I have appeared before hundreds of commissioners and board members in formal, informal, and educational proceedings

[7] POWER Interfaith, *The People's Energy Plan for PECO* (2023), https://powerinterfaith.org/wp-content/uploads/2023/07/sodapdf-converted-2.pdf.

in the years since. I have contributed to the writing and passage of laws and rules in many jurisdictions. I remain honored to have served as a utility regulator, and deeply respectful of the public interest obligation that comes with the job.

Q. Have you ever testified before the Commission or other regulatory agencies?

A. Yes. I appeared before the PUC as an expert witness in Docket Nos. 2021-3024601 and 2020-3019290, on behalf of Clean Energy Advocates and Environmental Stakeholders, respectively. In addition, I was a co-presenter on an alternative ratemaking webinar in August 2017 that was part of the Pennsylvania Department of Environmental Protection's "Pennsylvania's Solar Future Plan." In the past twelve years, I have submitted testimony, comments, or presentations in utility proceedings in Alabama, Arkansas, Arizona, California, Colorado, Connecticut, District of Columbia, Florida, Georgia, Guam, Hawaii, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nevada, New Hampshire, New York, North Carolina, Ohio, Pennsylvania, Puerto Rico, Rhode Island, Texas, Vermont, Virginia, Washington, and Wisconsin. I have also testified before the U.S. Congress and have been a participant in comments and briefs filed at several federal agencies and courts. A listing of my previous testimony is attached as Exhibit KRR-2.

Q. What is the purpose of your testimony?

A. In this testimony, I review and offer recommendations to the Commission regarding PECO's petition for approval of its proposed DSP VI covering the period June 1, 2025 through May 31, 2029.

Q. In several places in this testimony, you will refer to "zero emission renewable energy"—what do you mean?

A. I use the term "zero emission renewable energy" to refer to a class of renewable energy generation technologies that produce no marginal emissions as a byproduct of generating electricity or heat. Renewable energy resources naturally replenish on a short-term basis or are not subject to exhaustion through a reasonable level of use. Zero emission renewables include solar, wind, geothermal, and tidal energy resources, for example.

Q. Why do you express a preference for increased use and reliance upon zero emission renewable resources?

A. First, because these resources do not produce emissions when generating, they help avoid climate and local environmental problems, health risks, and environmental justice problems associated with siting. Second, these resources operate with zero or low marginal operating costs, which can reduce system average supply costs. Third, they have risk and operating profiles that are favorable. For example, solar panels perform at higher levels during hot, sunny weather, and increase their operating efficiency in cold weather. Fourth, these technologies have improving cost curves and yet-to-be-realized complementary benefits, such as the way storage can time-shift solar generation and the way that overbuilding solar creates implicit storage value.[8]

[8] *See* M. Perez, R. Perez, M. Putnam & K. Rábago, *Achieving 100% Renewables: Supply-Shaping through Curtailment,* Atmospheric Sciences Research Center – SUNY Albany, Technical Briefing (Feb. 2019), https://research.asrc.albany.edu/people/faculty/perez/2019/PVTECH.pdf.

Q. What information did you review in preparing this testimony?

A. I reviewed relevant pre-filed testimony of Company witnesses and associated exhibits, relevant Pennsylvania laws and regulations, and relevant Company responses to information requests submitted by the Energy Justice Advocates and other parties. I have also reviewed materials from other DSP proceedings.

II. Summary of Conclusions and Recommendations

Q. Please summarize the conclusions you reach in this testimony.

A. With its proposed plan for DSP VI, PECO has presented the Commission and its customers with its preference for four more years of wasted opportunities. As discuss in detail, PECO's proposed plan[9] fails to result in a prudent mix of spot, short-term, and long-term contracts for generation supply and will not ensure service that is adequate, reliable, and least cost over time.

PECO's proposed DSP approach is designed to secure the lowest-priced generation supply over the short term and to result in DSP rates that track closely to prevailing short-term market rates, and as a result imposes unnecessary costs and price volatility on DSP customers and fails to make necessary progress on addressing the impacts of climate change. PECO's DSP proposal fails to consider the economic, environmental, and social benefits of generation supply from zero emission renewables procured through long-term

[9] Petition of PECO Energy Company for Approval of its Default Service Program for the Period from June 1, 2025 Through May 31, 2029, (Feb. 2, 2024).

contracts.

Q. Please summarize your recommendations to the Commission.

A. I recommend that the Commission direct the Company to implement the following requirements:

- PECO should implement its proposed DSP approach for the first year of the plan.
- PECO should use the first year of DSP VI to develop a solicitation process aimed at securing seven percent of its required DSP generation supply from zero emission renewables under long-term purchased power agreements (PPAs) by the end of the proposed DSP VI term through a "Renewable Energy Supply Procurement" program.
- PECO should be required to report on its generation supply source data.

III. Legal, Regulatory, and Policy Considerations Relevant to the Review of the PECO's Proposed Plan for DSP VI

Q. What are the key statutory provisions governing the review of the Company's proposed DSP VI?

A. Pennsylvania law requires the Company, as a default service provider, to:

- Procure electric power supply through a prudent mix of spot, short-term, and long-term contracts.[10]

[10] 66 Pa.C.S.A. § 2807(e)(3.2).

- Configure and acquire a prudent mix of contracts that is designed to ensure adequate and reliable service, least cost to customers over time, and compliance with competitive procurement provisions of the law.[11]
- Propose a plan and provide sufficient and competent evidence to support the Commission's determination that the plan includes prudent steps necessary to negotiate favorable supply contracts and obtain least-cost generation supply contracts on a long-term, short-term, and spot market basis; and that neither the DSP nor its affiliated interest has withheld from the market any generation supply in a manner that violates federal law.[12]
- And ultimately, provide default service electric generation supply service to non-shopping customers pursuant to a commission-approved competitive procurement plan.[13]

Q. How has the Commission reflected these requirements in its rules and policies?

A. The Commission has promulgated rules relating to Default Service[14] and a "Default Service and Retail Electric Markets—Statement of Policy"[15] that track and implement the requirements of the Pennsylvania statute.

Q. How did the Commission articulate the goal of its default service regulations?

[11] 66 Pa.C.S.A. § 2807(e)(3.4).

[12] 66 Pa.C.S.A. § 2807(e)(3.7).

[13] 66 Pa.C.S.A. § 2807(e)(3.1).

[14] 52 Pa. Code § 54.181–.190.

[15] 52 Pa. Code § 69.1801–.1817.

A. The Commission stated that "[t]he goal of the default service regulations is to ensure that each DSP provides default service customers with adequate and reliable service at the least cost to customers over time. This goal can be accomplished by structuring default service in a way that brings competitive market discipline to historically regulated markets and by encouraging the entry of new retail and wholesale suppliers. Greater diversity of suppliers will benefit ratepayers and the Commonwealth."[16]

Q. Did the Commission impose any restrictions on the use of long-term contracts in its Policy Statement?

A. No. Originally, the Commission had proposed that long-term contracts "only be used when necessary and required for DSP compliance with alternative energy requirements, and should be restricted to covering a relatively small portion of the default service load."[17] However, after careful consideration, the Commission determined that the proposed language would limit the use of long-term contracts only to meeting the requirements of Pennsylvania's Alternative Energy Portfolio Standards Act[18] which would have been "too restrictive."[19]

Q. Has the Commission provided additional guidance relevant to the review of the Company's proposed DSP VI?

[16] 52 Pa. Code § 69.1802.

[17] PA PUC, Final Policy Statement, Docket No. M-2009-2140580, at 8–9 (Sept. 22, 2011).

[18] Alternative Energy Portfolio Standards Act of 2004, 73 P.S. §§ 1648.1–.9.

[19] PA PUC, Final Policy Statement, Docket No. M-2009-2140580, at 11 (Sept. 22, 2011).

A. Yes. In a Secretarial Letter issued January 23, 2020, the Commission raised other issues it wanted addressed in proposed default service plans. The Commission urged DSPs to consider how TOU rates specific to electric vehicles ("EVs") could be made available to consumers.[20] The Commission stated that the topic of long-term contracts should be considered further in upcoming DSP proceedings and requested that the electricity distribution companies ("EDCs") submit evidence with DSP proposals showing how the proposal complies with the prudent mix requirements of the law.[21]

Q. In light of these obligations and the Commission's regulations and guidance, what is the status of default service customers compared to customers that choose to shop for their electric supply?

A. Under Pennsylvania law, customers have a choice and a right to shop or not shop for their electric supply; default service suppliers have specific obligations and duties.[22] The term "default supply" therefore describes the service that customers take, whether by choice or inaction. Default service is not second-class service or service that is left over after shopping-eligible customers chose other providers for electric service. Default service the *only* way that customers enrolled in the Customer Assistance Program ("CAP") can obtain electric service. And while customers may receive default service because they did not choose an alternative supplier or could not afford such service, it is doubtless true that

[20] PA PUC, Secretarial Letter- Closing Default Service Investigation, Docket No. M-2019-3007101, at 6–7 (Jan. 23, 2020).

[21] PA PUC, Secretarial Letter- Closing Default Service Investigation, Docket No. M-2019-3007101, at 8 (Jan. 23, 2020).

[22] 66 Pa.C.S.A. § 2807.

many customers who considered shopping simply chose to remain on default service, as is their right.

Q. Why is the fact that default service as a right, and for CAP customers, an obligation, important?

A. A default service provider bears an affirmative obligation[23] to obtain generation supply at the least cost to customers over time.[24] That is, the obligation takes a long-term view and mandates a focus on cost impacts to customers, and not just the default supplier provider. The Commission also has obligations. The default service supplier bears an additional obligation to submit a plan for Commission approval that supports a Commission finding that "includes prudent steps necessary to negotiate favorable generation supply contracts,"[25] so that a procurement plan that is not demonstrated to meet the test of "favorable" to customers does not comply with the law and cannot support a lawful Commission order. Further still, the law requires an additional Commission finding that the proposed default supply plan "includes prudent steps necessary to obtain least cost *generation supply contracts* on a long-term, short-term and spot market basis."[26]

[23] 66 Pa.C.S.A. at § 2807(e). The electric distribution company's duties are contained in a statutory section titled "Obligation to Serve."

[24] 66 Pa.C.S.A. § 2807(e)(3.4), (3.6).

[25] 66 Pa.C.S.A. § 2807(e)(3.7)(i).

[26] 66 Pa.C.S.A. § 2807(e)(3.7)(ii) (emphasis added).

Q. Are there other Commonwealth laws that provide context for the Commission's consideration of PECO's DSP VI proposal?

A. Yes. The Environmental Rights Amendment ("ERA") in the Pennsylvania Constitution provides that "[t]he people have a right to clean air, pure water, and to the preservation of the natural, scenic, historic and esthetic values of the environment,"; that "public natural resources are the common property of all the people, including generations yet to come"; and that "[a]s trustee of these resources, the Commonwealth shall conserve and maintain them for the benefit of all the people."[27]

As the Supreme Court of Pennsylvania has instructed, "The plain meaning of the terms conserve and maintain implicates a duty to prevent and remedy the degradation, diminution, or depletion of our public natural resources. As a fiduciary, the Commonwealth has a duty to act toward the corpus of the trust—the public natural resources—with prudence, loyalty, and impartiality."[28]

As the Court has also explained, the ERA's "explicit inclusion as simultaneous beneficiaries of the future generations of Pennsylvanians creates a cross-generational dimension and reminds the Commonwealth that it may not succumb to 'the inevitable

[27] PA. Const. Art. 1, § 27.

[28] *Pennsylvania Env't Def. Found. v. Commw.*, 161 A.3d 911, 932 (Pa. 2017) (quoting *Robinson Twp. v. Commw.*, 83 A.3d 901, 956–57 (Pa. 2013)).

bias toward present consumption of public resources by the current generation, reinforced by a political process characterized by limited terms of office.'"[29]

Q. Why is the Environmental Rights Amendment relevant to this proceeding?

A. Climate change is an existential environmental, social, and economic threat. It threatens the functioning of natural resource systems—"natural capital"—on which all welfare depends. Climate change and its consequences pose physical, economic, and other threats of harm to all of the citizens of the Commonwealth, today and in the future.

Today, PECO's supply mix is heavily dependent on fossil fuels that are causing and worsening the climate change problem. Shifting from fossil fuels to zero emission renewable energy generation supply helps reduce the greenhouse gas emissions that will drive further climate damage. Addressing the legacy problems of climate change will cost money, and zero emission renewable resources provide an important affordability benefit that can mitigate the costs of climate correction.[30] The Commission's trustee obligations under the Environmental Rights Amendment reasonably include, in my opinion, giving

[29] *Pennsylvania Env't Def. Found. v. Commw.*, 255 A.3d 289, 310 (Pa. 2021) (quoting *Robinson Township*, 83 A.3d at 959 n.46).

[30] For low- or zero-marginal cost resources like terrestrial wind and solar, lifecycle greenhouse gas impacts are significantly lower than for fossil-fuel resources. National Renewable Energy Laboratory ("NREL"), *Life Cycle Greenhouse Gas Emissions from Electricity Generation: Update*, NREL Fact Sheet (2021), https://www.nrel.gov/docs/fy21osti/80580.pdf. Growth in markets for wind and solar leads to reductions in the operations and maintenance for these resources as well. As reported in one paper, "[r]esults indicate O&M cost reductions with each doubling of cumulative experience of 9.2%-12.8% for onshore wind and of 15.7%-18.2% for solar." B. Steffen, et al., *Experience Curves for Operations and Maintenance Costs of Renewable Energy Technologies*, Joule 4, 359–375, at 359 (Feb. 19, 2020), https://www.cell.com/joule/pdf/S2542-4351(19)30579-3.pdf.

due consideration to whether PECO's DSP generation supply mix will worsen or mitigate the threats posed by climate change.

Q. Has PECO considered the Commission's obligations as a trustee under the Environmental Rights Amendment in connection with preparing its procurement approach for DSP VI?

A. PECO asserts that it has considered the Commission's obligations under the Environmental Rights Amendment but stated that it possesses no documents demonstrating or reflecting such consideration.[31]

IV. Procurement of Zero Emission Renewable Energy is in the Public Interest Because it is Increasingly Affordable due to Technology Changes and Market Changes

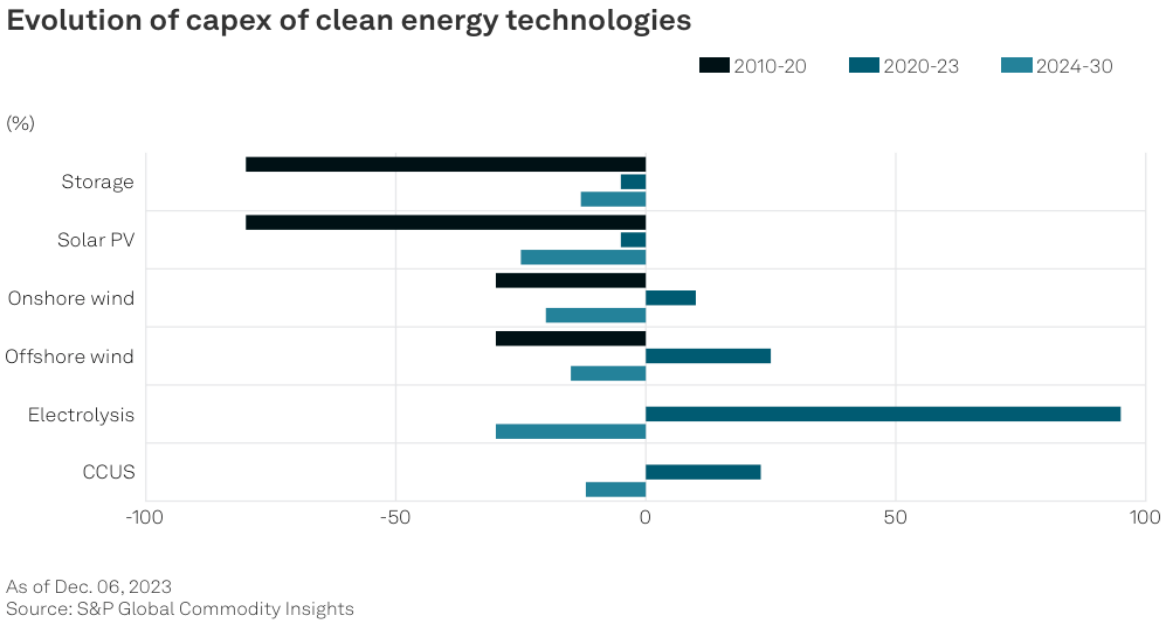
Q. How have market trends in the electricity sector changed in the years since Pennsylvania's electricity choice and default service structures were first implemented?

A. According to S&P Global Commodity Insights, over the decade from 2010 to 2020, the average capital costs of clean energy resources like solar photovoltaic, onshore wind, and offshore wind fell significantly, as illustrated in Figure KRR-1:[32]

[31] Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-III-15.

[32] S&P Global Commodity Insights, *Top Ten Cleantech Trends in 2024* (2024), https://www.spglobal.com/commodityinsights/PlattsContent/_assets/_files/en/specialreports/energy-transition/top-ten-clean-energy-technology-trends-2024.html.

Figure KRR-1: S&P Global Historical and Forecasted Clean Energy Capex Evolution



While the rate of decline in those costs slowed from 2020 to 2023 and actually increased for wind resources during that period, S&P predicts a resumption in declining capital costs for the period 2024 to 2030.[33] Nationwide, a rapid scale-up to an 80% clean energy mix for the continental United States can be achieved as soon as 2030 with no compromise on affordability or reliability.[34]

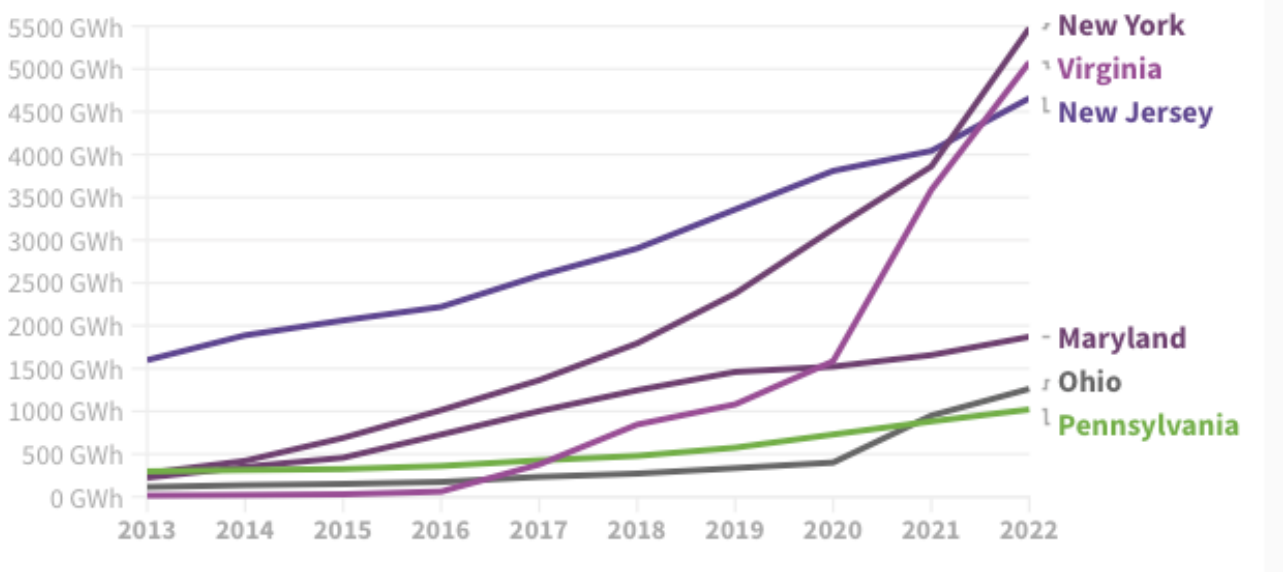
[33] S&P Global Commodity Insights, *Top Ten Cleantech Trends in 2024* (2024), https://www.spglobal.com/commodityinsights/PlattsContent/_assets/_files/en/specialreports/energy-transition/top-ten-clean-energy-technology-trends-2024.html.

[34] N. Abhyankar, et al., *2030 Report: Powering America's Clean Economy – Supplemental Analysis to the 2035 Report*, Goldman School of Public Policy, at 35 (Apr. 2021), https://energyinnovation.org/wp-content/uploads/2021/04/2030-Report-FINAL.pdf.

Q. How is Pennsylvania doing in the race to realize the benefits of a transition to clean energy supply?

A. As Governor Shapiro has recognized, Pennsylvania is falling behind.[35] As shown in Figure KRR-2, and based on a recent report from the PennEnvironment Research & Policy Center, Pennsylvania solar energy development lags states in the region, despite the strong history of declining costs for this emissions-free resource.[36]

Figure KRR-2: Solar Development in Pennsylvania and Neighboring States, 2013-2022[37]



[35] Office of Governor Josh Shapiro, Press Release: Governor Josh Shapiro's Energy Plan Builds on Pennsylvania's Legacy of Energy Leadership by Protecting and Creating Energy Jobs and Lowering Energy Costs for Consumers (Mar. 13, 2024), https://www.governor.pa.gov/newsroom/governor-josh-shapiros-energy-plan-builds-on-pennsylvanias-legacy-of-energy-leadership-by-protecting-and-creating-energy-jobs-and-lowering-electricity-costs-for-consumers/.

[36] J. Neumann & T. Dutzik, *Renewables on the Rise Dashboard*, PennEnvironment Research & Policy Center (Oct. 10, 2023), https://environmentamerica.org/pennsylvania/center/resources/renewables-on-the-rise-dashboard/.

[37] J. Neumann & T. Dutzik, *Renewables on the Rise Dashboard*, PennEnvironment Research & Policy Center (Oct. 10, 2023), https://environmentamerica.org/pennsylvania/center/resources/renewables-on-the-rise-dashboard/. (Figure generated by selecting "Solar Energy 2022" on dashboard and then adding names of states to compare.)

Q. How are these market trends relevant to this proceeding?

A. This proceeding is about the Company procuring extremely large quantities of electric power—about 14 million megawatt-hours of energy per year[38]—to serve about 1.5 million PECO default service customers.[39] The process and terms under which that power is procured must be viewed considering extant market, economic, technology, and policy trends to ensure that the mix of supply is reasonable and prudent, that is, least-cost over time, adequate, and reliable in meeting the needs of default service customers.

Q. In the face of these trends, isn't renewable energy going to become part of the supply procured by PECO for its DSP program through the competitive procurement process that the Company uses?

A. The amount of renewable energy generation supply that appears in the PECO default supply will naturally increase as the percentage of renewables increases in the PJM.

Q. So why shouldn't PECO wait until renewables become a significant part of short-term contract generation supply options?

A. There is a large and growing climate crisis. And default supply customers want more renewables in their generation supply mix. In addition, failing to lead in the energy

[38] Bureau of Technical Utility Services Policy & Planning Section, *Retail Electricity Choice – Activity Report 2022*, PA PUC, at 9, Table 6 (Oct. 2023),https://www.puc.pa.gov/media/2604/retail-elec-choice-report-2022_-final.pdf.

[39] Bureau of Technical Utility Services Policy & Planning Section, *Retail Electricity Choice – Activity Report 2022*, PA PUC, at 4, Table 2 (Oct. 2023),https://www.puc.pa.gov/media/2604/retail-elec-choice-report-2022_-final.pdf.

transition means falling behind, and market opportunities and economic development and risk reduction benefits accrue to suppliers that develop the procurement skills necessary to cost-effectively manage a supply mix with higher percentages of variable renewable resources. More importantly, as the testimony of EJA witness Mr. Ben Kujala shows, procurement of lower-cost renewables under long-term generation supply contracts would have saved residential default supply customers between $67.2 and $89.0 during the term of DSP V, and could still save those customers as much as $85 million over the term of DSP VI and beyond.[40] Finally, increasing the share of renewable energy in PECO's DSP generation supply mix will support and improve its compliance with the obligation to ensure adequate and reliable supply.

V. Procurement of Zero Emission Renewable Energy is in the Public Interest Because it Helps Integrate Long-Term Contracts into PECO's DSP Generation Supply Mix and Helps Ensure Adequate and Reliable Supply

Q. Why should PECO seek to obtain zero emission renewable energy under long-term contracts for DSP generation supply?

A. Zero emission renewable energy has economic attributes that make it an attractive part of a prudent generation supply mix. Zero emission renewables have low environmental and regulatory risk—their impacts are either addressed in siting and construction or are well-known over the life of the facilities. Such renewable facilities can be repowered without extensive site remediation and have no long-term waste disposal issues like coal and

[40] EJA St. No. 2, Direct Testimony of Ben Kujala, Table 2; Y, Table 4 (Apr. 25, 2024).

nuclear. Renewables don't require an atmospheric subsidy or externalized pollution costs to run, like fossil fuels. And zero emission renewables—wind, solar, and certain geothermal generation—have zero marginal operating costs and low and well-understood operating and maintenance costs. That means that these resources price at the most efficient market price—the long-run marginal cost. And because these costs are known over the expected operating life, a PPA with a zero emission renewable energy facility is a significant risk reducer that makes a mix of generation supply more prudent than solely relying on short-term spot market pricing under one- and two-year contracts.

Long-term contracts for zero emission renewable energy also provide protection from global energy insecurity. As noted by public witness Nancy Boxer in the public hearing held on April 16, 2024:

> Continuing threats to supplies of gas from wars in Ukraine and the Middle East, growth of demand around the world, and so on make hedging against short term price jumps sound like the wisest course PECO could take. If PECO increases renewables in its default mix to at least 20 or 25 percent, using long term contracts for better pricing, that will insulate consumers to a great extent from these likely price jumps.41

These are not just theoretical assertions from a former economic regulator, though my experience confirms everything I just said. As explained in greater detail in Section VIII

[41] Public witness Nancy Boxer, Transcript of Public Input Hearing, at 119:17–25 (Apr. 16, 2024).

of this testimony, the analysis performed by EJA witness Mr. Ben Kujala bears these facts out with empirical results.

Q. What supply characteristics of zero emission renewable energy procured pursuant to long-term contracts could help ensure adequate and reliable service?

A. Adequacy and reliability are functions of availability—that a generation or other energy resource will perform as expected and when expected. Solar and wind generation meet the criteria of having high availability—and therefore higher reliability—because they are mechanically simple in design and less subject to breakdown and maintenance downtime than rotating machines that rely on fossil fuel combustion and delivery of fuels. Zero emission renewables, which do not rely on fuel, are less vulnerable to fuel supply disruptions, such as may occur in emergencies and extreme weather events. Evaluation and procurement processes designed to harness these benefits, especially over the long term, are completely missing from the Company's DSP VI proposal, as in prior DSP iterations. The Company's exclusive reliance on short-term FPFR contracts for supply frustrates the obtaining of such benefits. It is true that the Company proposal to obtain some of its minimum requirement of SAECs will indirectly support the operation of solar resources, but AECs provide no generation supply or no direct reliability benefits.

Q. Why is adding renewables to address reliability so important right now?

A. Pennsylvania and many other states only last year experienced a major winter storm event—Winter Storm Elliott—that killed people and led to widespread suffering, severely straining the electric grid due to freezing, gas delivery problems, and storm

damage. Prices, and bills, shot up dramatically, creating a legacy of economic suffering that continued after the severe storm conditions abated. The Federal Energy Regulatory Commission and the North American Electric Reliability Corporation issued a lessons-learned report noting that:

> During the Event, 1,702 individual BES3 generating units in the Eastern Interconnection experienced 3,565 unplanned outages, derates, or failures to start. Each individual unit could, and often did, have multiple outages from the same or different causes. At the worst point of the Event, there were 90,500 MW of coincident unplanned generating unit outages, derates and failures to start (meaning they all occurred at the same time). Including generation that was already out of service, a total of over 127,000 MW of generation was unavailable, representing 18 percent of the U.S. portion of the anticipated resources in the Eastern Interconnection.[42]

The report also that recognized that the storm was the fifth major winter storm event in eleven years.[43] At the heart of several major winter storm-related electricity crises are the problems associated with over-reliance on fossil methane gas, and the brittle nature of a grid dominated by utility-scale resources.[44] In the absence of intentional effort to

[43] FERC, NERC, and Regional Entity Staff, *Inquiry into Bulk-Power System Operations during December 2022 Winter Storm Elliott*, at 5–6 (Oct. 2023), https://www.ferc.gov/news-events/news/ferc-nerc-release-final-report-lessons-winter-storm-elliott.

[44] *See* Naomi Albert, *Reliance on Fossil Fuels was Last Year's Grinch that Stole Christmas—And the Real Cause of Winter Storm Elliott Blackouts*, Appalachian Voices Front Porch Blog (Dec. 21, 2023), https://appvoices.org/2023/12/21/winter-storm-elliot/.

diversify the grid mix and address the growing climate change problem, the suffering and economic damage will only worsen.[45]

Q. How did renewable energy perform during Winter Storm Elliott?

A. According to a spokesperson from the PJM, wind and solar performed as expected,[46] demonstrating the potential for these resources to contributing to adequate and reliable supply.

Q. What do we know about the amount of renewable energy generation supply showing up in PECO's DSP procurements?

A. Very little. Even though PECO now includes a provision in its supplier master agreement ("SMA") that asks generation suppliers to report the sources of their generation.[47] However, consistent with PECO's apparent indifference to the content of default generation supply, the Company allows generation supplies to forego reporting of generation supply sources and instead assert that the PJM mix is representative of their

[45] *See* Robert Zullo, *A Year after Devastating Winter Storm, Power Plant Problems "Still Likely" in Extreme Weather,* Pennsylvania Capital Star (Nov. 28, 2023), https://penncapital-star.com/uncategorized/a-year-after-devastating-winter-storm-power-plant-problems-still-likely-in-extreme-weather/.

[47] Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-IV-15.

mix.[48] For all the years of PECO's service as a default supplier, it can provide source generation supply data for, at best, 4.6% of its default residential load in a given year.[49]

Q. What should the Commission do about this deficit of generation source type data for PECO's default supply mix?

A. The Commission should direct PECO to enforce the plain language of its SMA provision relating to generating supply sources. Good decisions require good data, and PECO needs to start making better decisions about its mix of generation supply. Those better decisions start with basic, reliable information about the sources of the supply it procures for DSP customers.

Q. What conclusions do you draw regarding PECO's compliance with its statutory obligation to obtain least cost generation supply contracts on a long-term, short-term and spot market basis?[50]

A. A fundamental flaw in PECO's approach is its institutionalized focus on the short term. The Company applies its own definition of "least cost over time" to mean only the four-year term of its DSP.[51] PECO has not provided the evidence necessary to support a Commission finding that it has obtained least cost generation supply contracts on a long-

[48] Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-IV-15

[49] *See* Exh. KRR-3, PECO Interrogatory Responses, Attachments EJA-IV-15(a.1-a.3), where the sum of total energy for which suppliers provided source information was 550 GWh in 2022 and 68 GWh in 2023. Residential Default load was 11,897 GWh and 11,179 GWh in 2022 and 2023, respectively, according to data downloaded at https://www.pecoprocurement.com/index.cfm?s=dataRoom&p=monthly.

[50] 66 Pa.C.S.A. § 2807(e)(3.7)(ii).

[51] Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-VI-10.

term basis—least cost over time. Considering the findings of EJA witness Mr. Ben Kujala, discussed in Section VIII of this testimony, the evidence is that PECO's failure to secure generation supply under long-term contracts has resulted in default supply customers being forced to pay more than the least cost for their electricity supply, and for many, many years. PECO has not adjusted its procurement strategy to secure energy from renewable energy resources that will greater reliability benefits. PECO's intransigence in even evaluating the potential economics of long-term generation supply contracting, constitutes a violation of its statutory obligations and is unreasonable and imprudent. Further, PECO's stated positions make it clear that it will not seek to obtain an economically beneficial and prudent mix of supply absent specific direction from the Commission.

Q. How would this intentional procurement of generation supply, and not merely SAECs, from renewable energy facilities impact retail competition in general?

A. PECO seeking, and not ignoring, the cost-savings opportunities from long-term renewable energy PPAs will improve the performance of the competitive market for electricity supply. PECO's 12-month and 24-month contract approach sets almost the lowest possible bar for competition on price. The PECO price to compare sets the bar for competitive supply. By maintaining a price to compare that is unreasonably high by ignoring the savings available through long-term generation supply contracts, competitive prices remain higher than they should be, especially with only about 20% of residential customers shopping.[52] A PECO price to compare that is truly least cost over time, as

[52] Exh. KRR-3, PECO Interrogatory Responses, Attachment EJA-I-6(a).

required by Commonwealth law, sends a more efficient price signal to competitive suppliers and will generate concomitant benefits to DSP and shopping customers alike.

VI. Procurement of Zero Emission Renewable Energy is in the Public Interest Because Reducing the Impacts of Climate Change is in the Public Interest

Q. Are you aware of any findings of the U.S. federal government that reducing the impacts of climate change is in the public interest?

A. Yes. The Fifth National Climate Assessment, released by the U.S. Global Change Research Program on November 14, 2023 summed up the climate crisis for the U.S. as follows:

> The effects of human-caused climate change are already far-reaching and worsening across every region of the United States. Rapidly reducing greenhouse gas emissions can limit future warming and associated increases in many risks. Across the country, efforts to adapt to climate change and reduce emissions have expanded since 2018, and US emissions have fallen since peaking in 2007. However, without deeper cuts in global net greenhouse gas emissions and accelerated adaptation efforts, severe climate risks to the United States will continue to grow.[53]

[53] U.S. Global Change Research Program, *Fifth National Climate Assessment Overview: Understanding Risks, Impacts, and Responses*, at 1-5 (2023), https://nca2023.globalchange.gov/downloads/NCA5_Ch1_Overview.pdf.

Following this release, President Biden described climate change as the "ultimate threat to humanity," and "an existential threat to all of us."[54]

Q. Are you aware of any findings of the Commonwealth of Pennsylvania that reducing the impacts of climate change is in the public interest?

A. Yes. On January 8, 2019, Governor Wolf issued Executive Order No. 2019-01, entitled "Commonwealth Leadership in Addressing Climate Change and Promoting Energy Conservation and Sustainable Governance."[55] EO 2019-01 states that "the Commonwealth is resolved to do its part to address climate change, the most critical environmental threat confronting the world."[56] EO 2019-01 further states that "the Commonwealth is committed to further reducing its net greenhouse gas emissions which, left unchecked, would create a high risk of irreversible, widespread, severe climate impacts in the Commonwealth and beyond . . . "[57] To implement this commitment, EO 2019-01 sets a target of a 26% reduction in net greenhouse gas emissions statewide by 2025 from 2005 levels, and an 80% reduction by 2050.[58] EO 2019-01 instructs that "[a]ll Commonwealth agencies shall work to achieve the Goals set

[58] Pa. Exec. Order No. 2019-01, at 2 (Jan. 8, 2019), https://www.oa.pa.gov/Policies/eo/Documents/2019-01.pdf.

forth in this Order" and that the Commonwealth can take steps to "increase reliance on clean energy . . . "[59]

On October 3, 2019, Governor Wolf issued Executive Order No. 2019-07, entitled "Commonwealth Leadership in Addressing Climate Change through Electric Sector Emissions Reductions."[60] EO 2019-07 stated that "the Commonwealth must take concrete, economically sound and immediate steps to reduce GHG ["Greenhouse Gas"] emissions."[61] EO 2019-07 also directed the Pennsylvania Department of Environmental Protection ("PA DEP") to begin the process of rulemaking necessary for the Commonwealth to join the Regional Greenhouse Gas Initiative ("RGGI"), an emissions trading market operated by ten East Coast states to reduce greenhouse gas emissions from the power sector.[62]

[59] Pa. Exec. Order No. 2019-01, at 1, 3 (Jan. 8, 2019), https://www.oa.pa.gov/Policies/eo/Documents/2019-01.pdf.

[61] Pa. Exec. Order No. 2019-07, at 2 (Oct. 3, 2019), https://www.oa.pa.gov/Policies/eo/Documents/2019-07.pdf.

[62] Pa. Exec. Order No. 2019-07, 2–3 (Oct. 3, 2019), https://www.oa.pa.gov/Policies/eo/Documents/2019-07.pdf. The PA DEP's RGGI rulemaking is currently tied up in litigation, but Governor Josh Shapiro is considering other alternative means for the Commonwealth to take action to reduce the impacts of climate change. Rachel McDevitt, *Josh Shapiro proposes state climate program to replace RGGI, and asks for new renewable energy goals*, WHYY News Climate Desk (Mar. 13, 2024), https://whyy.org/articles/pa-gov-shapiro-proposes-state-climate-program-to-replace-rggi-asks-for-new-renewable-energy-goals/.

On November 13, 2019, the Pennsylvania Auditor General released a report entitled, "Climate Crisis: The Rising Cost of Inaction."[63] The report found that in 2018, "climate-related costs to Pennsylvania totaled at least $261 million," including losses from floods and landslides, and stated that "[y]our tax dollars will increasingly be spent to clean up after such disasters if state government does not step up now and limit our contribution to the climate crisis."[64]

Additionally, the Pennsylvania Climate Change Act of 2008 requires the PA DEP and the Pennsylvania Climate Change Advisory Committee to produce a Climate Action Plan and Climate Impacts Assessment every three years. [65] In May 2021, PA DEP published its most recent Pennsylvania Climate Impacts Assessment.[66] This assessment projected the following impacts by mid-century:

> "• The average annual temperature statewide is rising, and is expected to increase by 5.9°F (3.3°C).
>
> • There will be more frequent and intense extreme heat events. For example, temperatures are expected to reach at least 90°F on 37 days per year, up from the 5 days during the baseline period (see Figure 1). Days reaching temperatures above 95°F and 100°F will become more frequent as well.

[63] Exh. KRR-4, Eugene A. Depasquale, *Climate Crisis: The Rising Cost of Inaction*, Office of the Auditor General (Nov. 13, 2019).

[64] Exh. KRR-4, Eugene A. Depasquale, *Climate Crisis: The Rising Cost of Inaction*, Office of the Auditor General, at 1 (Nov. 13, 2019).

[65] Pennsylvania Climate Change Act of 2008, 71 P.S. §§ 1361.1–.8.

[66] Exh. KRR-5, PA DEP, Pennsylvania Climate Impacts Assessment (Jan. 2021).

• Increasing temperatures will continue to alter the growing season and increase the number of days that people need to cool their homes and workspaces, but will also decrease the number of days that people will need to use heating.

• Pennsylvania could experience more total average rainfall, occurring in less frequent but heavier rain events. Extreme rainfall events are projected to increase in magnitude, frequency, and intensity (see Figure 2) and drought conditions are also expected to occur more frequently.

• Tidally influenced flooding is expected to increase in the Delaware Estuary coastal zone.

• Lake Erie is also expected to undergo significant changes in water level, coastal erosion, and water temperature."[67]

In September 2021, PA DEP published an updated Pennsylvania Climate Action Plan.[68] This plan reaffirmed EO 2019-01's targets of a 26% reduction in net greenhouse gas emissions statewide by 2025 from 2005 levels, and an 80% reduction by 2050.[69] The plan also noted that "[e]lectricity generation is the greatest source of GHG emissions in the Commonwealth, accounting for nearly 30% of total emissions."[70] The plan also identified creating a "carbon emissions-free grid" as a key strategy to reduce greenhouse gas emissions.[71]

[67] Exh. KRR-5, PA DEP, *Pennsylvania Climate Impacts Assessment*, at ix (Jan. 2021).

[68] Exh. KRR-6, PA DEP, *Pennsylvania Climate Action Plan* (Sept. 2021).

[69] Exh. KRR-6, PA DEP, *Pennsylvania Climate Action Plan 2021*, at 1–2 (Sept. 22, 2021).

[70] Exh. KRR-6, PA DEP, *Pennsylvania Climate Action Plan 2021*, at 81 (Sept. 22, 2021).

[71] Exh. KRR-6, PA DEP, *Pennsylvania Climate Action Plan 2021*, at 81 (Sept. 22, 2021).

On March 1, 2024, PA DEP released a Pennsylvania Priority Climate Action Plan in connection with the Commonwealth's participation in the United States Environmental Protection Agency's Climate Pollution Reduction Grant program.[72] The plan discusses a set of "cost-effective, ready-to-implement GHG reduction measures that will significantly lower GHG and provide other benefits to the Commonwealth, especially in low-wealth communities, minoritized communities, and communities impacted by environmental justice concerns."[73] The plan specifically identifies a net-zero electricity grid as a Priority GHG Reduction Measure.[74] The plan emphasizes the need for new clean energy facilities and close coordination between the PA DEP, utilities, and the Commission in transitioning the current grid to net zero,[75] and that "the Commonwealth has a long way to go to reach a reliable and clean electricity generating portfolio."[76]

Q. Has the Commonwealth made any findings regarding the impacts of climate change on environmental justice communities in Pennsylvania?

A. Yes. As the Pennsylvania Priority Climate Action Plan found, "Climate change will not affect all Pennsylvanians equally. Low-wealth and minoritized communities are expected to experience the most severe impacts of climate change, but they are also the least able to prepare for and respond to these impacts due to a lack of resources and socio-political

[72] Exh. KRR-7, PA DEP, *Pennsylvania's Priority Climate Action Plan*, at i (Mar. 1, 2024).

[74] Exh. KRR-7, PA DEP, *Pennsylvania's Priority Climate Action Plan*, at 27, 48 (Mar. 1, 2024).
[75] Exh. KRR-7, PA DEP, *Pennsylvania's Priority Climate Action Plan*, at 49 (Mar. 1, 2024).
[76] Exh. KRR-7, PA DEP, *Pennsylvania's Priority Climate Action Plan*, at 49 (Mar. 1, 2024).

power. Within Pennsylvania, the most prevalent climate hazards are extreme precipitation events, extreme heat, landslides, sea level rise, severe tropical and extra-tropical cyclones, and drought, all of which will disproportionately burden LIDAC communities."[77]

Q. Has Governor Josh Shapiro announced any initiatives related to reducing the impacts of climate change?

A. Yes. On March 13, 2024, Governor Josh Shapiro announced two major initiatives aimed at reducing emissions from fossil fuel use, reducing energy costs, and creating clean energy jobs through increased reliance on renewable energy and advanced energy technologies.[78] Recognizing that Pennsylvania is falling behind other states as well as the pressing need for funding to support clean energy development, the Governor's plan includes a proposal for a cap-and-invest program to address carbon emissions called "Pennsylvania Climate Emissions Reduction Act (PACER)." Further recognizing that Pennsylvania must make a clear commitment to clean and innovative energy resources in order to attract investment and enable the flow of federal funding support, Governor Shapiro also introduced an advanced and expanded version of the Alternative Energy

[77] Exh. KRR-7, PA DEP, *Pennsylvania's Priority Climate Action Plan*, at 15 (Mar. 1, 2024). Note: LIDAC stands for "low-income and disadvantaged community." *Id.* at iv. The report explains that it uses the terms LIDAC community and environmental justice community interchangeably. *Id.* at 15.

[78] Office of Governor Josh Shapiro, Press Release: Governor Josh Shapiro's Energy Plan Builds on Pennsylvania's Legacy of Energy Leadership by Protecting and Creating Energy Jobs and Lowering Energy Costs for Consumers (Mar. 13, 2024), https://www.governor.pa.gov/newsroom/governor-josh-shapiros-energy-plan-builds-on-pennsylvanias-legacy-of-energy-leadership-by-protecting-and-creating-energy-jobs-and-lowering-electricity-costs-for-consumers/.

Portfolio Standard named the "Pennsylvania Reliable Energy Sustainability Standard (PRESS)." PRESS, if enacted, would set a 35% by 2035 standard for clean energy and would diversify Pennsylvania's energy resources base.

Q. Why are Governor Shapiro's initiatives relevant to this proceeding?

A. If PACER is passed, or if the Governor's judicial efforts to keep Pennsylvania in the Regional Greenhouse Gas Initiative ("RGGI") are successful,[79] the price of fossil-fueled energy will rise, and the relative economics of non-emitting renewable energy resources will further improve. As a result, the opportunity costs of PECO's current approach to procuring DSP supply will only be greater, and for the four years that PECO proposes to repeat its short-term, fossil-heavy supply mix under DSP VI, customers will continue to pay unnecessary and unreasonable costs for their electric service. Even as the rest of Pennsylvania's energy economy moves forward into a clean and diverse energy future, PECO's default service customers will continue to lag the trends, and as EJA witness Mr. Ben Kujala explains, will pay premium prices for dirtier than necessary electricity supply.[80]

Finally, the Governor's legislative proposals, and the actions of previous governors and state legislatures signal changes in the policy and market context in which PECO submits its DSP VI proposals. As such, these policy and market changes inform the conditions

[79] Cassie Miller, *Shapiro Says State Will Appeal Commonwealth Court's RGGI Decision,* Pennsylvania Capital-Star (Nov. 21, 2023), https://penncapital-star.com/energy-environment/shapiro-says-state-will-appeal-commonwealth-courts-rggi-decision/.

[80] EJA St. No. 2, Direct Testimony of Ben Kujala, at X, Table 2 (Apr. 25, 2024).

against which reasonableness and prudence must be evaluated. Even if PECO's prior DSP procurement methods were reasonable at the time, the times have changed, as has the urgency with which a transition away from reliance on fossil fuels has increased. Indeed, as Mr. Kujala explains, PECO's approach has in the past cost DSP customers between $67.2 million and $89.0 million in unnecessary costs that could have been avoided with a prudent mix of contracts that included long-term contracts for zero emission renewable energy supply.[81]

Q. Are you aware of any findings of the City of Philadelphia that reducing the impacts of climate change is in the public interest?

A. Yes. On September 26, 2019, the City of Philadelphia passed Resolution No. 190728 committing that "the City of Philadelphia shall take measures to achieve a fair and equitable transition to the use of 100% clean renewable energy for electricity in municipal operations by 2030, for electricity City-wide by 2035, and for all energy (including heat and transportation) city-wide by 2050 or sooner."[82] Resolution No. 190728 also noted that over 130 municipalities around the country have adopted goals to transition to 100% renewable energy, including over 20 Philadelphia suburban towns.[83]

[81] EJA St. No. 2, Direct Testimony of Ben Kujala, at X, Table 2 (Apr. 25, 2024).

[82] City of Philadelphia, *Res. No. 190728*, at 3 (Sept. 26, 2019), https://phila.legistar.com/View.ashx?M=F&ID=7723066&GUID=F6A4036E-95FB-41D4-AAB1-2BE9AAD6BE01.

[83] City of Philadelphia, *Res. No. 190728*, at 2 (Sept. 26, 2019), https://phila.legistar.com/View.ashx?M=F&ID=7723066&GUID=F6A4036E-95FB-41D4-AAB1-2BE9AAD6BE01. Sierra Club maintains a website which hosts many of the resolutions adopted by municipalities in PECO's service territory. Sierra Club Pennsylvania, *RF100 Support: Resolutions* (2024), https://www.sierraclub.org/pennsylvania/southeastern/rf100-support-resolutions#examples.

Resolution No. 190728 built on, widened, and accelerated the goals set by the City in Resolution No. 170706, adopted by the City Council on September 14, 2017.[84] Resolution No. 170706 urged the City to commit to becoming carbon-neutral in city operations by 2050.[85] Resolution No. 170706 also urged the City to "to stimulate the generation of secure, family-supporting, local jobs in the fields of energy efficiency and renewable energy with equitable access to green career pathways for inner-city workers."[86] The City's Legislative Oversight Committee recently convened a hearing investigating the City's progress towards achieving a transition to net-zero carbon emissions and 100% renewable energy supply by 2050, if not sooner.[87]

Additionally, in January 2021, the City of Philadelphia published the Philadelphia Climate Action Playbook, a compilation of policy findings and plans relating to dealing with the climate crisis in the City. The Playbook explains the climate change problem and

[87] *See* Sophia Schmidt, *3 Takeaways from City Council's Hearing on Philly's Efforts to Slash Climate Pollution*, WHYY News Climate Desk (Mar. 5, 2024), https://whyy.org/articles/philadelphia-city-councile-climate-pollution-carbon-neutrality-hearing-takeaways/.

the impacts that climate change will have on the City and outlines actions to reduce contributions to climate change and address the problems climate change creates.[88]

Q. Has Mayor Cherelle L. Parker of Philadelphia indicated where she stands on efforts to reduce fossil energy use and the clean energy transition?

A. Yes. As a candidate, Mayor Parker expressed her intent to continue working on achieving carbon neutrality by 2050.[89] In her 100-Day Action Plan, Mayor Parker reiterated her commitment to the City of Philadelphia's carbon neutrality goal and offered a succinct statement of guidance: "We must simultaneously address current issues and focus on long-term sustainability and carbon reduction goals."[90]

Q. Has PECO expressed any views concerning climate change and its impacts?

A. Yes. In response to discovery questions in this proceeding, PECO has confirmed that it agrees with the scientific consensus that emission of greenhouse gases causes climate change and that combustion of fossil fuels for electricity generation causes the emission of greenhouse gases.[91] PECO also states that climate change "has the potential to impact

[88] Exh. KRR-8, The City of Philadelphia Office of Sustainability, *Philadelphia Climate Action Playbook* (Jan. 14, 2021).

[91] Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-VI-15(c)–(d).

all of us," and that climate change "has the potential to cause harm to Pennsylvania's natural resources."[92]

Q. Do the procurement choices of PECO for DSP VI have any relationship to climate change?

A. Yes. Fossil fuel combustion drives climate change, as PECO acknowledges.[93] Due to about 15% of the PJM system generation supply mix in 2023 coming from coal and 44% coming from the burning of fossil methane gas,[94] each megawatt-hour of PJM electricity used in 2023 caused about 711 pounds of carbon dioxide, plus other pollutants, to be added to the atmosphere.[95] With PECO procuring some fourteen million megawatt-hours of electricity for DSP customers, that means more than 4.5 million metric tonnes of carbon dioxide will be added to the atmosphere each year.[96]

[92] Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-VI-15(f)–(g).

[93] Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-VI-15(b)–(d).

[95] PJM EIS, *PJM System Mix – System Mix By Fuel*, https://gats.pjm-eis.com/GATS2/PublicReports/PJMSystemMix (where data was filtered from 01/2023 to 12/2023) (calculated by summing reported lbs. per MWh values for coal (288.9754, 18.2592), coal waste (18.4675), and gas-natural gas (385.9009)).

[96] Calculated as (710 x 14,000,000) / 2204.62 = 4,508,714.

Q. Are there practical means of improving PECO's procurement plan for DSP VI that reduce its climate impacts?

A. Zero emission renewables, which do not produce marginal emissions as part of generation, reduce climate and local air quality impacts, reduce price volatility, and offer more affordable electricity over the near and long-term. As I discuss above, the Commonwealth has identified lowering greenhouse gas emissions from generation, and ultimately transitioning to a net zero greenhouse gas emissions grid, as an effective and essential means of reducing the impacts of climate change.[97]

VII. Characterization of the DSP Customer Base

Q. Ordinary citizens are not supply procurement professionals. Why should a default service provider invest in understanding their customers?

A. Because customers enjoy a statutory right to take electric service under the default service program, and because today 78.5% of all PECO's residential customers are and a substantial percentage of customers have been default service customers since retail choice began in Pennsylvania,[98] it is necessary for the Company to gain an understanding of customers and their use of electricity to develop and operate a default service program.

Q. Why is it essential that PECO invest in understanding their customers?

[97] Exh. KRR-7, PA DEP, *Pennsylvania's Priority Climate Action Plan*, at 27, 48 (Mar. 1, 2024); Exh. KRR-6, PA DEP, *Pennsylvania Climate Action Plan 2021*, at 81 (Sept. 22, 2021).

[98] Exh. KRR-3, PECO Interrogatory Responses, Attachment OCA-II-32(c), (d).

A. There are several reasons why PECO should understand their customers well. First, an understanding of customers, their economic conditions, and their preferences will support efforts to advance competition for electric service. Second, an understanding of customers enables better design of rate offerings like time-of-use rates and electric vehicle charging rates. Third, understanding customers and their financial situations helps improve customer assistance and bill management programs and program deliverability, while at the same time creating an opportunity to lower overall service and customer management costs. Fourth, understanding customers' financial conditions informs default service program and procurement design, especially around issues of rate volatility. Fifth, because energy use is tied to building energy efficiency and use, the electric service provider can gain useful insights into consumption patterns to better inform energy efficiency, weatherization, retrofit, and other programs aimed at reducing household and business energy burdens. Finally, understanding default customer preferences, especially those of captive CAP customers, will help PECO design procurement to meet customer preferences for low-carbon and clean energy generation supply sources. Taken together, understanding customers and their energy use is fundamental to assembling a prudent mix of energy supply over the near and long term, and to delivery of adequate electric service at just and reasonable rates.[99]

Q. What efforts has the Company made to characterize and understand its DSP customers?

[99] *See* Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-VI-13 (citing Final Rulemaking Order, *Implementation of Act 129 of October 15, 2008*; Default Service and Retail Electric Markets, Docket No. L-2009-2095604, at 38 (Order entered Sept. 23, 2011)).

A. The Company was unable to provide a demographic and statistical description of the customers in each customer class and they confirmed that such information is not used to shape a default supply strategy.[100] In addition, the Company confirmed that no customer polls were taken as a part of the development of the Company's proposals for DSP VI.[101] In sum, the Company has not characterized the customer base they serve through the DSP demographically nor have they evaluated customer preferences as they relate to default service.

Q. How stable is the DSP customer base for residential customers?

A. While the Company has not made efforts to characterize the composition and preferences of the DSP customer base, publicly available data show that this base is quite stable from year to year, especially for residential customers. Since 2017, over two thirds of residential customers rely on default supply rather than selecting competitive supply.[102] In 2022 and 2023, over 78% of residential customers were served as default supply customers.[103] Surprisingly, the Company does not collect data on customers who make an affirmative decision to return to default supply after seeking competitive supply through the Standard Offer Referral Program or their reasons for doing so,[104] despite the value this would have in understanding customer competitive preferences.

[100] Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-II-19.

[101] Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-III-25.

[103] Exh. KRR-3, PECO Interrogatory Responses, Attachment EJA-I-6(a).

[104] Exh. KRR-3, PECO Interrogatory Responses, Response to OCA-I-8 ("PECO has not undertaken any analysis of the frequency in which Standard Offer Referral program customers

Q. What does publicly available information about income, energy use, and demographic show about PECO's customers?

A. The Company has not provided information that characterizes the DSP customer base, but, given the high percentage of customers that rely on default supply, publicly available information can fill these gaps. National trends around issues of energy burden and energy insecurity play out within the Company's service territory. It is no secret that Philadelphia is a city with a large low-income population. In fact, out of the top ten most populated cities in the U.S., Philadelphia bears the highest poverty rate.[105] Lower-income customers across the U.S., on average, use less energy but spend a greater percent of their income on energy costs compared to higher-income customers. According to 2020 U.S. Energy Information Administration ("EIA") data collected in the Residential Energy Consumption Survey ("RECS") there is a clear correlation between income and electricity use, with lowest income customers consuming as little as half as much energy annually compared to their wealthiest counterparts.[106] Pennsylvania is in the Northeast region.

---

return to Default Service during or at the end of their 12-month fixed price contract with the EGS.").

[105] Kenny Cooper, *Philadelphia is 'America's poorest big city.' Here's what that actually means*, WHYY (Jan. 10, 2024), https://whyy.org/articles/philadelphia-americas-poorest-big-city-poverty/.

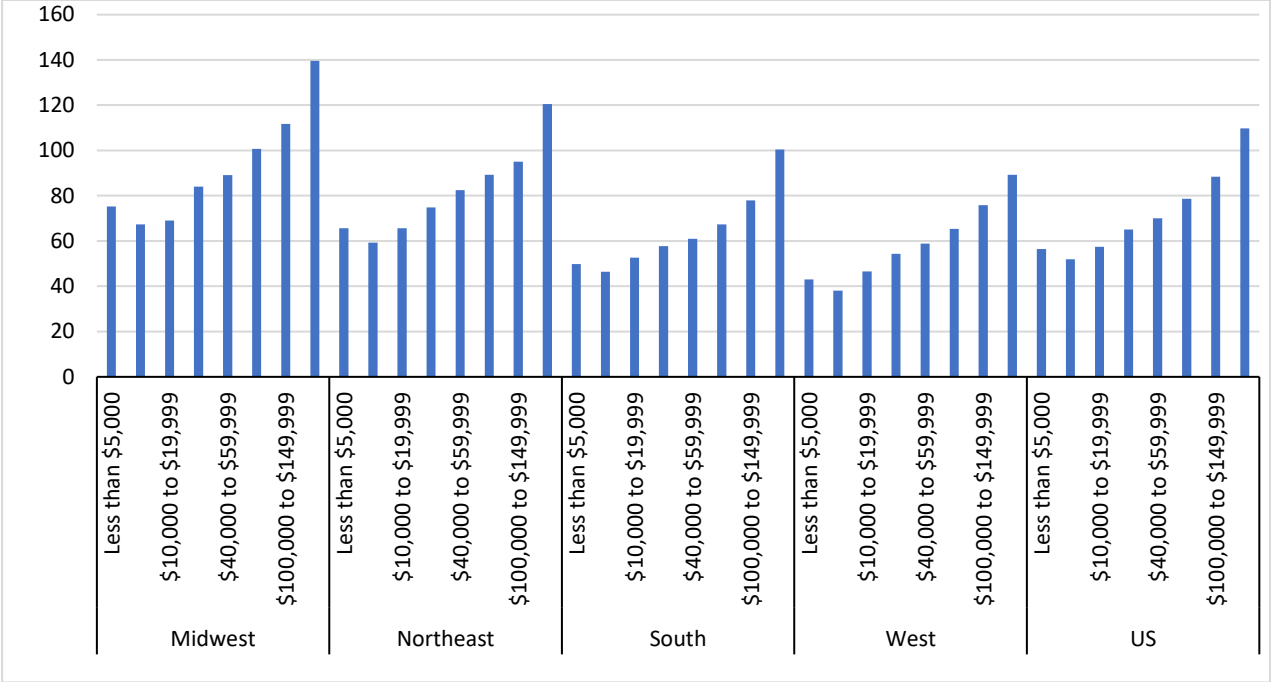
Figure KRR-3: U.S. Mean Annual Household Energy Consumption by Income Category and Region 2020, (million Btu)



Lower income customers, despite using less energy, also suffer from a higher energy burden than higher income customers—meaning energy costs constitute a higher share of their household income.

Q. Why is it important to understand when customers have high energy burdens?

A. Customers with high energy burdens are vulnerable to rate and bill volatility. Month-to-month changes in rates that might not frustrate the household budgets of well-to-do customers can cause rate shock to customers with high energy burdens. Low-income customers often live on the edge of economic or energy insecurity—an inability to meet

basic household energy needs that sometimes referred to as the "heat or eat" dilemma.[107] An unaffordable electric bill can create a long-lived cascade of household economic problems, made worse with pancaking fees and charges from utilities and other businesses. Energy insecurity is not just an economic issue, but a social and public health matter as well.[108] For these and other reasons, understanding customer energy burdens informs the prudence and adequacy of the generation supply mix that a default service provider assembles on behalf of customers.

Q. What does the data tell us about energy burdens?

A. U.S. Department of Energy's LEAD Tool[109] summarizes 2020 census data and calculates energy burdens at the census tract, county, and state levels. The data within the LEAD Tool reveal that within Pennsylvania, households making less than 150% of the federal poverty level (FPL) spend, on average, 14% of their income on energy costs. For the wealthiest households (>400% FPL), the average energy burden is only 1%. In Philadelphia, the average energy burdens for these income groups are similar; the difference is that, in Philadelphia, almost a third of households have an income less than 150% of the federal poverty level and experience average energy burdens of about

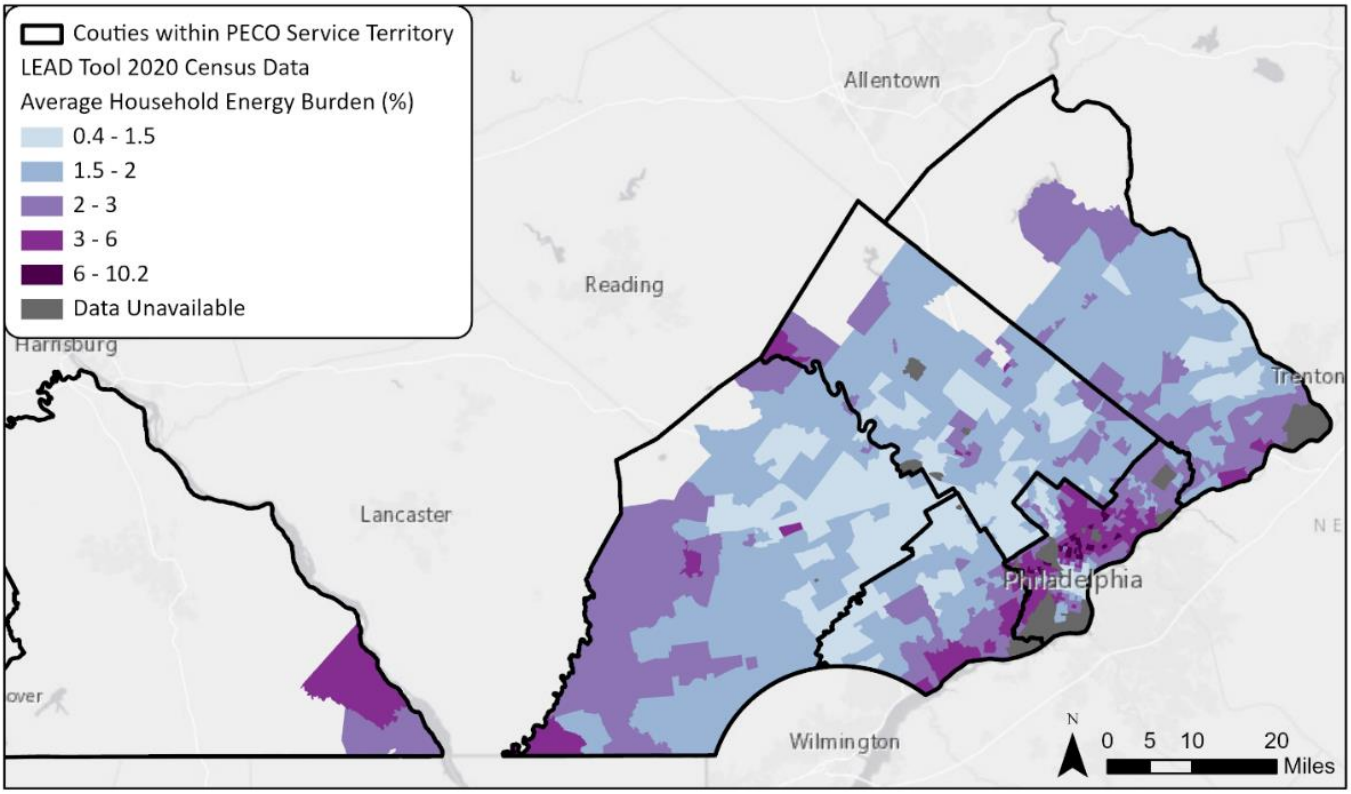
[107] D. Hernández, *Understanding 'Energy Insecurity' and Why It Matters to Health*, 167 Soc. Sci. Med. 1-10, at 2 (2016), https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5114037/.

[108] *See* D. Hernández, *Understanding 'Energy Insecurity' and Why It Matters to Health*, 167 Soc. Sci. Med. 1-10, at 2 (2016), https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5114037/.

[109] U.S. Dept. of Energy, *Low-Income Energy Affordability Data Tool*, DOE/EE 2052 (Apr. 2020), https://www.energy.gov/scep/slsc/lead-tool.

14%.[110] The average energy burden across all households in Philadelphia is 2.5%, but there is considerable variation from one census tract to another. The detailed map of energy burden by census tracts in PECO's service territory below reveals many tracts that have energy burdens that are above the national average of 3%, the vast majority of them within Philadelphia.

Figure KRR-4: Census Tracts Demographics

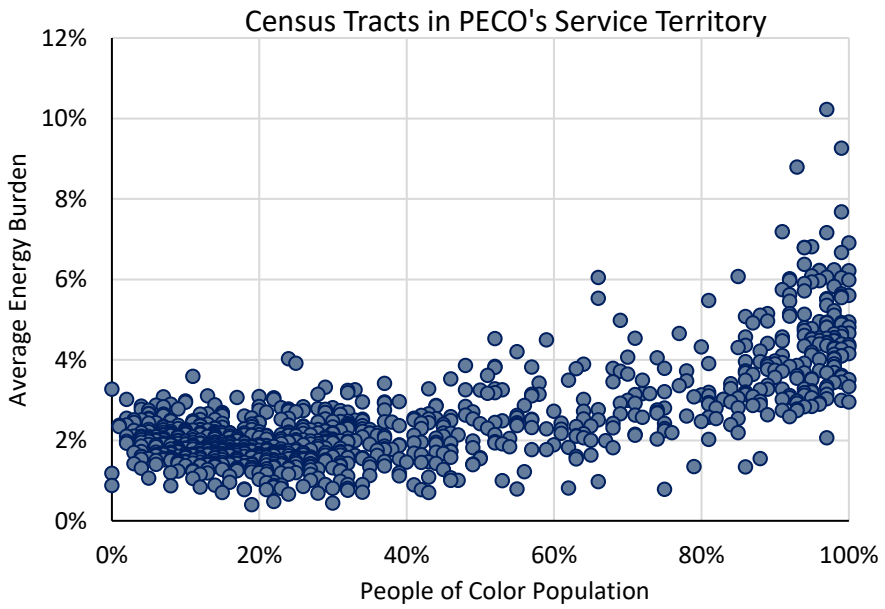


Energy burden is a dynamic characteristic that changes as energy prices and household incomes in an area change. The LEAD Tool summarizes 2020 data, when energy prices were comparatively low; other datasets reveal populations with even higher energy burdens in PECO's service territory. A tool recently developed by NRDC shows there are

[110] According to 2020 census data summarized in the LEAD tool, 183,388 of 613,126 (30%) households in Philadelphia have an income less than 150% of the federal poverty level. This threshold is also the qualification for bill assistance via The Company's CAP.

three census tracts in Philadelphia with energy burdens above 30%.[111] Publicly available data in the LEAD Tool also demonstrate that census tracts with higher energy burden tend to be census tracts with higher populations of color, as is displayed by the graph below, where each point represents a census tract in the Company's service territory. Energy burden is therefore also an energy justice issue, and PECO as default service provider should take that into account in the design of their supply procurement strategy.

Figure KRR-5: Census Tracts in PECO's Service Territory



Energy burden alone does not capture the entirety of how high energy costs impact vulnerable households. EIA's 2020 RECs survey captured information on rates of "energy insecurity," which they defined as households that do any of the following: reduce food or medicine to pay energy costs, leave the home at an unhealthy temperature, receive a disconnect notice, or are unable to repair heating or cooling equipment due to

[111] NRDC, *Energy-Burdened Communities Tool* (Sept. 5, 2023), https://www.nrdc.org/resources/energy-burdened-communities-tool.

cost.[112] Similar to energy burden, energy insecurity displays both socioeconomic and racial correlations. Nationally, 20% of White, non-Hispanic households reported some kind of energy insecurity in 2020 (any one or more of the practices described above), whereas 52% of Black households and 46% of Hispanic or Latino households reported this; only 7% of households with income over $150,000 reported such practices while for households with income less than $20,000, 51% reported these practices.[113] Given the demographics of the most vulnerable customers in the Company's service territory, it is likely that many are facing not only high energy burdens, but also energy insecurity.

Q. How does this data on households with high energy burdens track with PECO's data?

A. Again, PECO has made no meaningful efforts to understand energy burdens or concerns among its default supply customers. PECO does provide CAP services to customers, but that program reaches only about 10.2% of PECO's residential customers today and has never reached even 15% of those customers.[114] Assuming retail shopping customers skew toward higher-than-average household income, it is reasonable to further assume that PECO's CAP program fails to reach more than 67% of highly burdened households.[115]

[115] U.S. Dept. of Energy, *Low-Income Energy Affordability Data Tool*, DOE/EE 2052 (Apr. 2020), https://www.energy.gov/scep/slsc/lead-tool; 2020 RECS Survey Data Table HC11.1 (2024), https://www.eia.gov/consumption/residential/data/2020/index.php?view=characteristics (Calculated using CAP enrollment number for Jan. 2024 (123,008), from the LEAD tool, divided

For these most vulnerable and unassisted customers, the results of PECO's DSP program strategy are all they have.

Q. How does PECO's DSP approach impact the most vulnerable customers within the Company's service territory?

A. PECO's DSP strategy includes an overlapping and staggered procurement of one- and two-year Fixed Price, Full Requirements ("FPFR") products from supplier bidders.[116] However, the use of semi-annual overlapping contract periods for short-term contracts does not mitigate price volatility in the same way that a prudent mix of contracts including long-term generation supply contracts would. As shown in the testimony of EJA witness Mr. Kujala, the short-term contracting approach has cost PECO's DSP customers millions. In addition to these unnecessary and burdensome overall costs, PECO's DSP customers remain exposed to significant price volatility in their rates, as shown in Figure KRR-6, below. Rates change every three months for DSP customers, making budgeting for customers on low- or fixed-incomes extremely difficult.[117]

by 2020 Census tract number of households with income below 150% of Federal Poverty Level, from the RECs Survey Data).

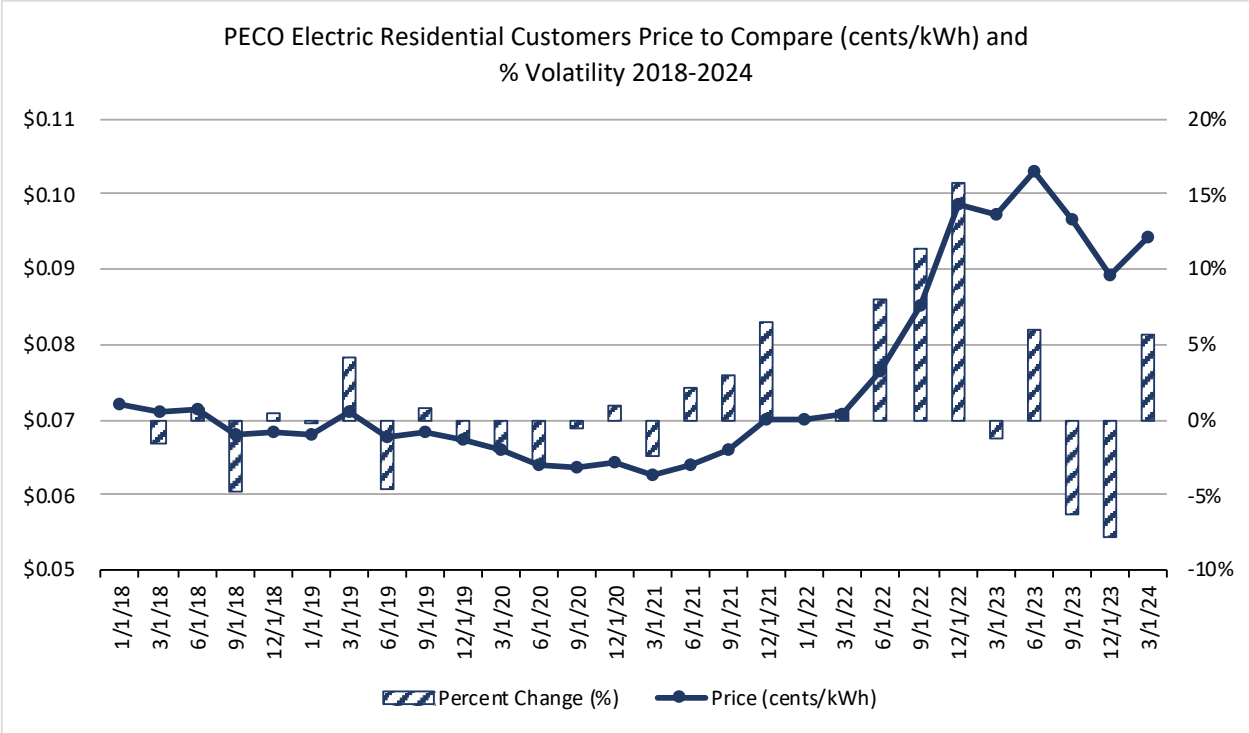
[117] *See* PECO St. 3, Direct Testimony of Scott G. Fisher, at 18 (Feb. 2, 2024) (showing how winning bid prices spiked significantly, with effects flowing through to the volatility graph in Figure KRR-6. PECO's DSP approach also results in additional volatility due to over- and under-collections from customers and an E-Factor rate that changes every quarter). *See* Exh. KRR-3, PECO Interrogatory Responses, Attachments OCA-II-14(a)–(c).

Figure KRR-6: PECO DSP Rates & Percent Changes in Rates, 2018-2023[118]



Q. How does PECO address the volatility that its reliance on short-term contracts creates in DSP rates?

A. PECO asserts that its use of one- and two-year supply contracts with overlapping tenors (which it calls "laddering") "provides Residential and Small Commercial customers with greater assurances of price stability . . . [and] smooths out supply cost fluctuations over time and it mitigates the impacts of adverse circumstances or market conditions at any given time, while still updating prices over time."[119] As such, contract laddering is a patch on the volatility inherent in a short-term contract approach that is primarily designed to maintain DSP rates in line with prevailing market prices. The Company

[118] Exh. KRR-3, PECO Interrogatory Responses, Attachment TURN-CAUSE-PA-I-4(a).

[119] Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-VI-4.

recognizes the Commission's long-standing concern about exposing DSP customers to significant price volatility, and that the Company has an obligation to secure DSP supply at a cost of power that is relatively stable and economical relative to other options.[120] Further, the Company is aware that the Commission specifically detailed how an interpretation of least cost that subjects DSP customers to significant price volatility through general reliance on short term pricing is inconsistent with the objectives of Act 129.[121] But the Company asserts it meets the prudent mix standard by doing basically the same thing it has been doing for more than a decade—putting the best face it can on procuring—albeit efficiently and competitively—only short-term contracts for generation supply.[122] The Company has deployed timing and other adjustments designed to blunt the most extreme volatility impacts of its general reliance on short term pricing, but these adjustments don't fix what's wrong with PECO's approach.[123] The Company has failed to even consider contracting options that would address the fundamental volatility that short-term contracting creates.[124] Beyond doing what it has been doing for more than a

[123] Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-I-13. As the Governor who appointed Mr. Rábago to the Texas Public Utility Commission once exhorted her appointees at a lunch at the Texas Governor's Mansion, "You can put lipstick and earrings on a hog and call it Monique, but it's still a pig."

[124] Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-II-5; III-17.

decade, including ignoring the volatility reduction benefits of long-term contracts, PECO's position is that it has no further obligation to address DSP price volatility.[125]

Q. Hasn't the Commission approved PECO's short-term and spot pricing approach in the past?

A. Yes, and while the evidence provide by EJA now shows that PECO could have taken a more economical approach, it is not necessary to review those prior decisions in order to recognize that: (1) consistency for its own sake is foolish in a world of dynamic markets, rapidly maturing technologies, and a growing climate crisis; and (2) prudence today, and in procurements that will happen over the course of the next four years, requires objectively reasonable analysis of current and likely future market options for generation supply.

Q. Has the Company ever conducted any surveys or other research to determine customer preferences relating to default service?

A. No.[126] As a result, the supply procured by the Company is unrelated to customer preferences and therefore is less likely to support the development of competitive markets. As customers acquire greater familiarity and understanding of a wide array of energy service and technology options, they begin to form more specific consumption

[125] Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-II-11. *See also* Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-II-12, in which the Company refuses to agree that pricing impacts relating to the difference between the cost to supply a load that varies by hour and the cost to supply a constant amount over the same period is a reflection of short-term price volatility.

[126] Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-III-25.

and purchase preferences. These preferences should be tracked and evaluated by the Company in preparing its default service plan to support its claim that the resulting supply mix is adequate and prudent. In addition, increasing reflection of customer preferences in the default service plan will more closely align default service with the kinds of service options customers want from the competitive market, thereby supporting the development of competitive markets that give customers what they want. It is also worth noting that a great many comments delivered by citizens and customers at the public input hearing in this proceeding expressed dissatisfaction with the Company's proposed plan, further indicating the value of asking default customers about what they want in default service.[127]

VIII. Significant Savings are Possible for DSP Residential Customers Using Long-Term PPAs for Zero Emission Renewables

Q. Has EJA commissioned any analysis to support your assertions about the economic benefits of procuring zero emission renewable energy generation supply?

A. Yes. As reported in this testimony, PECO has not produced any economic analysis of the benefits and costs of long-term generation supply contracting, contracting for zero emission renewable energy, or long-term contracting (through PPAs) for zero emission renewable energy. For this reason, EJA engaged the services of Dunsky Energy +

[127] *See, e.g.,* Transcript of Public Input Hearing (Apr. 18, 2024) (testimony of public witnesses Mark Squilla, Nicholas O'Rourke, Nora Elmarzouky, Diane Nissen, John Braxton, Cinthia Ibarra, Richard Cole, Peggy Greenfeld, Flora Cardoni, Emily Petrucci, Nancy Boxer, Elaine Fultz, Ann Dixon, Randy Libros, Susan Shipley, Harvey Chanin, Ken Rosso, Kenneth Beiser, Kaytee Ray-Riek, Lee Smithey, Liz Robinson, Robert Routh, Dr. Julie Becker, Ted Uhlman, Carol Foy, Bruce Birchard, Ivan Vivar, Ron Celentano, and Janet Bernstein).

Climate Advisors ("Dunsky") to perform that analysis. Mr. Ben Kujala, who leads Dunsky's Power Planning practice, has submitted testimony on behalf of EJA documenting the analysis he conducted and the results he observed.[128]

Q. Please summarize the Dunsky analysis methods.

A. At a very high level, the Dunsky Historical Model estimated the cost of PECO securing 7 percent of its DSP energy supply from solar generation, a leading example of zero emission renewable energy technology, and the effects that such procurement would have on the overall DSP portfolio price over the term of PECO's DSP V. Next, Dunsky repeated that analysis in a Future Model to project the economic impacts of PECO procuring 7 percent of its DSP energy supply from solar generation over the term of PECO's DSP VI. For the future scenarios, Dunsky assumed a phased approach that would procure energy from a 150 MW solar PPA by June 2026, 175 MW by June 2027, and 200 MW by June 2028. In both the Historical and Future models, Dunsky alternative portfolios were based on estimate ranges for PPA and energy forward prices.[129]

Q. Please summarize the findings from the Dunsky analysis.

A. According to the Dunsky Historical Model analysis, and under three scenarios for low-, mid-, and high-priced PPAs, PECO could have saved DSP customers between $67 million and $89 million—with a midpoint value of $78 million—over the term of DSP V by procuring solar energy under long-term PPA contract to meet 7 percent of DSP

[128] *See* EJA St. No. 2, Direct Testimony of Ben Kujala (Apr. 25, 2024).

[129] EJA St. No. 2, Direct Testimony of Ben Kujala, at 8, 11, (Apr. 25, 2024).

residential load.[130] Under the Dunsky Future Model analysis, nine different scenarios were evaluated addressing low-, mid-, and high-priced PPAs and low, mid, and high energy forward prices.[131] The Dunsky Future Model projects savings in eight of the nine scenarios, ranging from $5 million to $85 million, and potential higher costs of $15 million under the less likely scenario that the PJM market would be characterized by high PPA prices and low energy forward prices.[132] The midpoint of the Future Model range is $35 million in savings.

Q. What do you conclude based on these modeling results?

A. PECO's failure to procure zero emission renewable energy under long-term PPAs has cost DSP residential customers a great deal of money, and continued failure to do so will most likely cost DSP residential customers even more. In addition to being required to pay more for essential electric service, DSP customers have been required to pay more for less climate friendly energy and have been exposed to higher volatility in DSP prices. PECO's proposal for DSP VI is likely to continue those adverse consequences for customers as well.

[130] EJA St. No. 2, Direct Testimony of Ben Kujala, at 26, Table 2 (Apr. 25, 2024).

[131] EJA St. No. 2, Direct Testimony of Ben Kujala, at 42, Table 4 (Apr. 25, 2024).

IX. It is Not in the Public Interest for PECO to Ignore These Savings and Benefits by Continuing its "Business as Usual" Approach for DSP VI

A. Overview of the Company's DSP VI Proposal

Q. Please summarize the Company's DSP VI proposal.

A. The Company's DSP VI proposal is substantially the same as its DSP V program[133] and the same as its DSP IV program before.[134] The Company intends to conduct competitive solicitations for FPFR supply for residential and small commercial customers with twelve- and twenty-four-month terms, and twelve-month terms for larger commercial and industrial customers receiving hourly-priced supply.[135] The Company proposes to increase its purchase of solar Alternative Energy Credits ("SAECs") via long-term contracts from 16,000 to 32,000 SAECs annually, and to preserve contract terms used in DSP V as well, with some modifications that I do not address in this testimony.[136]

[133] PECO St. No. 1, Direct Testimony of Sulma Dalessio, at 7:10–16 (Feb. 2, 2024).

[134] PECO, Direct Testimony of John J. McCawley, P.E., Docket No. P-2020-3019290, at 8:6–17 (Mar. 13, 2020).

[135] PECO St. No. 1, Direct Testimony of Sulma Dalessio, at 7:10–16 (Feb. 2, 2024).

[136] PECO St. No. 1, Direct Testimony of Sulma Dalessio, at 8:7–9:11 (Feb. 2, 2024).

B. Evaluation of the Company's DSP VI Proposal

Q. PECO asserts it is meeting its long-term contracting obligation through its procurement of SAECs,[137] and that it is procuring "supply" through its long-term contracts for SAECs.[138] Does this behavior provide the evidence the Commission needs to find that PECO has complied with its obligation under Pennsylvania law?

A. No. The law requires a Commission finding that the proposed default supply plan "includes prudent steps necessary to obtain least cost *generation supply contracts* on a long-term, short-term and spot market basis."[139] SAECs are a good thing, but they are not generation supply.[140]

Q. Is PECO's proposed procurement of additional SAECs the result of a least-cost optimization strategy or any analysis of costs and benefits?

A. No. The proposal is untethered to any analysis at all.[141]

[137] Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-II-21.

[138] Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-II-21.

[139] 66 Pa.C.S.A. § 2807(e)(3.7)(ii) (emphasis added).

[140] Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-IV-4. PECO unreasonably conflates the terms "supply" and "generation supply" in an attempt to shoehorn its SAEC purchases into the specific and contrary language of 66 Pa.C.S.A. § 2807(e)(3.7)(ii). The fact that some SAECs are procured with long-term contracts does not make SAEC procurements into "generation supply contracts."

[141] Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-III-4a.

Q. Will PECO's proposed increased procurement of SAECs help grow the market for renewable energy in Pennsylvania?

A. No one, including the Company and the Commission, can tell. Again, PECO's SAEC procurement proposal has no analytical foundation whatsoever.[142] Furthermore, PECO's SAEC purchases will merely offset those that its FPFR suppliers would otherwise be required to make.[143]

Q. Will PECO get its SAECs at a lower price than FPFR suppliers would pay?

A. There is no evidence to support any assertion that PECO's procurement of SAECs would be at lower cost than that paid by FPFR suppliers.[144]

Q. Based on your review of the Company's proposals in this proceeding, do you think the Company has proposed a plan that will secure a prudent mix of contracts for supply to serve default customers?

A. No. I would expect the Company's proposed DSP VI to perform well against the standards the Company has set for itself, but I find that those standards are now no longer well-aligned with Commonwealth policy. Prudence and reasonableness can only be assessed in the light of current *and* projected market and policy conditions. The Company has ignored changes in those conditions in this and previous iterations of its DSP, which

[142] Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-III-4a.

[143] Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-III-4b.

[144] *Cf.* Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-III-4e, "This approach is designed to obtain competitive, fixed-price supply [of SAECs] contracts at least cost . . ." PECO provides no support for this assertion.

has resulted in customers bearing excessive and unnecessary costs and huge complementary opportunity costs in terms of transitioning PECO procured supply away from climate-changing fossil fuels. The Company operates a well-oiled machine when it comes to procuring short-term supply on the cheapest, most commoditized, short-term marginal cost basis, but its methods are unreasonable and imprudent under today's climate and market conditions. As a result, PECO DSP generation supply mix is more expensive, dirtier, and more volatile in price that it should be.

Q. How could procurement of supply at least in part through long-term contracts support development of a prudent mix of contracts as required under Pennsylvania law?

A. Long-term contracts can add price stability to the prices in a supply portfolio. The risk of price volatility is reduced—collared—by procurement of generation supply under long-term contracts. In addition, long-term contracts are particularly well-suited for procurement of supply from renewable energy facilities, which have very small or zero marginal operating costs and are not subject to the kind of fuel price volatility associated with fossil methane gas-fired generation. Creating demand for long-term contract supply will have the effect of inducing innovation in supply provision, which will in turn increase the scope and benefits of competition in the marketplace. Finally, a mix of supply that includes long-term contracts will provide a better reference point and benchmark for competitive supply shopping.

Q. Have other utilities with default supply obligations added long-term contracts to their generation supply mix?

A. Yes. In order to assess the feasibility of procuring long-term energy resources as part of a default service program, we investigated the extent to which this has been done in nearby markets. PPL Electric Utilities, serving much of central Pennsylvania, has been procuring energy in 5-year or 10-year long-term blocks since their first DSP in 2011, when they procured 100 MW of 5-year blocks of power and 50 MW of 10-year blocks.[145] In 2021, in their DSP V, PPL replaced the expiring 10-year block with two 5-year 50 MW blocks of energy-only products.[146] Finally, in their DSP VI application, PPL proposed to procure 10-year contracts totaling 150 MW, which provide for capacity credits in addition to energy.[147]

Q. And is this approach taken outside of Pennsylvania?

A. Yes. Nearby, in New York, utilities have also pursued long-term energy procurement strategies. National Grid, which serves much of upstate New York, has used long-term contracts with durations of at least 5 years to provide electricity supply to their customers

[145] PPL Utilities Corp., Petition of PPL Electric Utilities Corp. for Expedited Approval to Procure a Long-Term, 50 MW Block of Default Supply for Residential Customers Pursuant to the Settlement of the Default Service Procurement Plan, PA PUC Docket No. P-2008-2060309, at 3 (Dec. 2, 2010), https://www.puc.pa.gov/pcdocs/1112912.pdf.

[147] PPL Utilities Corp., Petition of PPL Electric Utilities Corp. for Approval of a Default Service Program and Procurement Plan for the Period Jun. 1, 2025 through May 31, 2029, PA PUC Docket No. P-2024-3047290, at 5–6 (Mar. 12, 2024), https://www.puc.pa.gov/pcdocs/1820000.pdf.

consistently over the past decade. Most of these contracts are between National Grid and small hydropower producers. In total, long-term contracts account for 7-12% of National Grid's total purchased power reported to the PSC annually over the past decade.[148]

Q. Has PECO conducted any analysis of procurement strategies different from its reliance on short-term contracts for generation supply?

A. No. PECO maintains that it has met its DSP obligations to date under prior DSPs and proposes to maintain the same basic procurement strategy it has used in the past.[149]

[148] National Grid reports their annual total purchased power to the New York Public Service Commission in an Annual Report with associated Excel data. The megawatt hours of purchased power can be located in the "326327" tab of the Excel workbooks, where the classification of "LU" represents long-term contracts of five years or longer. Data from 2014, 2017, 2018, 2020, 2021, and 2022 were evaluated, *See* https://documents.dps.ny.gov/public/Common/ViewDoc.aspx?DocRefId={E0109687-0000-CB59-AE61-02A416586A19} (2022); https://documents.dps.ny.gov/public/Common/ViewDoc.aspx?DocRefId={062FC857-1BDD-451F-84FA-7E6E956390EA}(2021); https://documents.dps.ny.gov/public/Common/ViewDoc.aspx?DocRefId={E0733882-D2E9-48A6-A0A8-4716F7D1B248} (2020); https://documents.dps.ny.gov/public/Common/ViewDoc.aspx?DocRefId={4A932D75-FC7C-4869-8D4F-48F444649C2B} (2018); https://documents.dps.ny.gov/public/Common/ViewDoc.aspx?DocRefId={16EFBB14-9AFC-42AE-B962-F0AA70D03A92} (2017); https://documents.dps.ny.gov/public/Common/ViewDoc.aspx?DocRefId={552396B1-71AA-428B-9450-C5F8975D51B7} (2014).

[149] *See* Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-III-17; PECO St. 3, Direct Testimony of Scott G. Fisher, at 5-9, 32-34 (Feb. 2, 2024). Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-III-4(f).

Q. The Company only procures generation supply under one- and two-year contracts. Does it know whether its suppliers have long-term contracts with generation facilities or encourage suppliers to enter into long-term contracts with generation facilities so that their offers are least cost over time?

A. PECO doesn't know where generation suppliers get their supply or the terms under which they secure that generation supply. However, the Company asserts that it is meeting its obligations to ensure least cost in DSP generation supply and to secure a prudent mix that includes long-term supply because it doesn't actually prohibit generation supply bidders from using energy procured under long term contracts in serving PECO's one- and two-year contracts.[150]

Q. Does PECO's position make sense?

A. No. PECO's position is duplicitous at best. First, the obligation to ensure least-cost over time is on PECO, not its suppliers. In choosing to serve DSP customers solely from short-term generation supply contracts, PECO is choosing a procurement method that costs more than if it procured some generation supply through long-term contracts. Second, PECO's bidders' obligations are to provide full requirements at a fixed price for a term of one or two years. They are not required by PECO to provide generation supply that is least cost over time. If PECO had ever bothered to look, they would have seen that long-term contracts with zero emission renewables would result in lower DSP service costs over time. If PECO had ever bothered to ask, they would have learned that generation

[150] Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-VI-1.

supply bidders have no requirement or incentive under PECO's procurement process to secure generation supply under long-term contracts. But PECO has done neither.

Q. The backbone of the Company's plan is competitive procurement of FPFR supply through mixed and overlapping short-term contracts. Do you take issue with that approach?

A. Yes. The Company has committed to FPFR contracting obligations for default suppliers to provide some benefits to customers. However, it appears that the primary beneficiary is the Company. This almost-complete transfer of supply and market risk seems to have been the major driver for reliance on short-term contracts. The Company's approach comes at a great cost to DSP customers. As demonstrated in the analysis reported by EJA Mr. Kujala, and as explained in more detail in Section VIII of this testimony, the Company's approach has cost DSP V customers between $67.2 million and $89.0 million, and will most likely continue to impose additional, unnecessary economic and climate-related and other environmental costs on DSP customers—costs that could be reduced through the procurement of at least some DSP supply through long-term contracts for zero emission renewable energy.

Q. Does procurement based on a competitive request for proposals ensure that PECO's default supply is lowest price and least cost over time?

A. No. PECO's approach ensures that the Company gets the most competitive price for short-term contracts that track current prevailing prices. PECO's approach ensures that default supply rates track current prevailing market prices—the standard in the law before

Act 129 was passed, but not the current standard for least cost over time. The evidence that EJA produced definitively establishes that lowest short-term price is not least cost over time.

Q. Does PECO's approach provide price stability for DSP customers?

A. The PECO approach is based on a fallacy that its FPFR contracting approach provides stability in prices because each supplier that wins a tranche—a small slice of supply—must provide a fixed price over the term of the contract. But those terms are only for one or two years. As the history of PECO's DSP rates shown in Figure KRR-XX [volatility chart] reveals, there is no real stability in PECO's price performance and no evidence that PECO's rates are least cost over time. What PECO continues to refuse to model in any meaningful way is how long-term contracts could offer prices that are stable for four to ten years.

Q. What kinds of supply contracts could offer price stability over longer contract tenors?

A. The best example of supply sources that could provide long-term price stability, as well as other benefits such as the near-total elimination of environmental costs, are zero marginal cost renewables.

Q. What is PECO's view on procuring blocks of energy itself as part of its DSP procurement?

A. PECO used forward energy block purchases in its first DSP but phased those out in DSP II and beyond.[151] The purchases were energy-only purchases with one-year, two-year, five-year, and seasonal terms.[152] The Company procured energy from the spot market to reach a level of 25% of total residential DSP demand. The Company phased out that approach and moved to its current approach of procuring nearly 100% of residential and small commercial supply through short-term contracts.[153] As with long-term contracts, the Company takes the position that its contracted generation suppliers are free to procure their supply under block arrangements, as long as the supply is ultimately shaped into a short-term FPFR.[154]

Q. Does PECO know what kinds of generation supply are in the DSP mix it procures?

A. No. The Company's DSP VI approach to supply procurement abdicates decisions about the generation supply and any contracts with generators to the bidders that win short-term contracts with PECO for default supply.[155] PECO does not even attempt to obtain good data about the sources of supply in the DSP generation supply mix,[156] and does not

[151] PECO St. 3, Direct Testimony of Scott G. Fisher, at 6:4-6.

[152] PECO St. 3, Direct Testimony of Scott G. Fisher, at 5;13 – 6:3.

[153] PECO St. 3, Direct Testimony of Scott G. Fisher, at 6:14-18.

[154] Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-VI-5(c).

[155] Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-IV-17.

[156] PECO knows nothing at all about the sources of generation supply in DSPs I, II, III, and IV. Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-IV-10, 11, 12, 13; While the Company has ostensibly added a provision to its Supply Master Agreement ("SMA") that

account for the carbon emissions associated with supply procurements. As of 2022, PECO had the highest rate of residual emissions rate among any of the utilities owned by its parent, Exelon.[157] PECO significantly lags other Exelon utilities in Green Power Connection participation, has no community solar program, and substantially less installed renewable energy capacity.[158]

Q. In your opinion, does the Company's proposed DSP VI ensure adequate and reliable supply for default service customers?

A. If the standard for "adequate and reliable supply" is that there must be enough supply in kilowatt-hours at the times and places required, but without regard for cost, then my answer is yes. However, I believe that adequate and reliable must also be read in concert with the "prudent mix" and "least cost over time" standards. A supply mix that costs more than it must to meet real time energy and capacity needs is not adequate and frustrates the economics of reliability. PECO's short-term contracting approach is, in my opinion, not reasonably adequate and reliable, even if technically so.

Q. Does the Company propose a plan that would secure a prudent mix of contracts, including short- and long-term contracts?

A. No.

"requires" suppliers to report generation sources in DSP V, it also allows suppliers to ignore the requirement and simply report the system mix of generation for the entire PJM. Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-IV-15.

[157] Exh. KRR-3, PECO Interrogatory Responses, Attachment EJA-VI-15(a), at 60.

[158] Exh. KRR-3, PECO Interrogatory Responses, Attachment EJA-VI-15(a), at 60.

Q. Does the Company plan to take advantage of falling costs and lower emissions from large- and small-scale renewable energy generation?

A. No. These trends are discussed in greater detail earlier in this testimony and are significant. But the Company demonstrates no intention to capture these cost savings and benefits in its DSP VI proposal and places no value on these emerging benefits in its procurement design or bid evaluation processes.

Q. Has the Company evaluated the potential for long-term generation supply contracts for zero emission renewable energy to secure generation supply to lower costs, reduce risk, or improve the climate profile of the supply mix?

A. No.[159]

Q. What did elected officials and PECO's customers have to say about the proposed DSP VI at the public input hearings in this proceeding?

A. A total of 81 people, almost all who are PECO customers, took time from their busy lives to address the important issues raised in this proceeding at the public hearings that occurred on April 16 and 18, 2024. While one witness did not address the DSP, all the others expressed strong opinions about the need for PECO and the Commission to find ways to increase the amount of renewable energy supply procured to serve DSP customers. A small sample of these witnesses' testimony reflects the passion and clarity of their views:

[159] Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-IV-17.

"We have a clear and urgent need to transition how we procure electricity to clean renewable sources and we have an opportunity to invest in the affordable alternatives of solar and wind through this default service plan.[160] PECO can negotiate for the best prices for its customers on the default service plan and enter into stable long-term contracts with renewable energy generators . . . PECO must make a substantial shift to clean affordable energy and we can only get there collectively through updating this default service plan."[161]

"I urge PECO to put in place a default service plan that includes the maximum amount of renewable energy that is possible at affordable times, at affordable rates. Renewables are getting cheaper all the time while gas prices fluctuate and increase."162

"With its proposed default service plan, PECO has an extraordinary opportunity to make a meaningful change in the lives of its 1.6 million electric customers."[163]

"Changing the standards for the DSP is a meaningful action. A better DSP can be part of moving toward a future where our children and grandchildren and great-grandchildren can have a decent life. PECO needs to change the way it contracts for electricity. The current percentages of renewables is unacceptably

[160] Public witness Senator Nikil Saval, Transcript of Public Input Hearing at 244:15–19 (Apr. 18, 2024).

[161] Public witness Senator Nikil Saval, Transcript of Public Input Hearing at 245:8–11; 17–21 (Apr. 18, 2024).

[162] Public witness Phyllis Blumberg, Transcript of Public Input Hearing at 260:13–18 (Apr. 18, 2024).

[163] Public witness Wendy Greenspan, Transcript of Public Input Hearing at 268:19–22 (Apr. 18, 2024).

low and it is shocking to think that this might be locked in place until 2029. This is an opportunity to make a difference. Every decision we make this year will have an impact in the future."[164]

"PECO has enormous resources, has enormous power in the market, and if it wanted to go out and seek the lowest cost renewable energy, it could do it, and it could influence the market because of the size of its purchasing. It can do that better than I, as an individual, even though I had the time and energy to be able to do it. So that's another reason why I urge the PUC to reject the current plan. And require them to have one which produces much more renewable energy."[165]

"And the good news is, is that if you take a longer view when it comes to energy procurement plans and substantially increase the longer-term contracts with renewable suppliers, you can find solutions that are both more affordable and more sustainable. And that's what I urge PECO to do with the default service plan. It's good stewardship financially and environmentally, and that's what we desperately need."[166]

"Four years ago, I submitted testimony at the 2020 DSP public hearing making the same requests I make today, that the Commission insist PECO

[164] Public witness Nancy Sleator, Transcript of Public Input Hearing at 273:2–12 (Apr. 18, 2024).

[165] Public witness Norman Janes, Transcript of Public Input Hearing at 283:9–19 (Apr. 18, 2024).

[166] Public witness Nathaniel Mahlberg, Transcript of Public Input Hearing at 292:15–23 (Apr. 18, 2024).

increase its use of long-term contracts to take advantage of solar power, thereby lowering costs and improving air quality."[167]

"PECO has the opportunity and the responsibility to have a much larger impact. By getting more of its energy from a full renewable sources and less from fossil fuels, PECO can improve the quality of life for tens of thousands and maybe even a couple of million people."[168]

"I'm testifying today to ask the PUC to act to protect the public interest and balance the needs of consumers by requiring PECO to use as much renewable energy as possible in the default service plan. I realize that the DSP needs to strike a balance between renewable energy and fossil fuels. But renewable energy doesn't suffer from the wild price swings we've seen in natural gas the past couple of years."[169]

"Like virtually everyone who's spoken, I want PECO to obtain the largest amount of affordable renewable energy possible for customers across Southeastern PA as part of the next default service plan. . . . I've been watching at the same time big institutions in our state begin to begin buying renewable energy through long-term contracts like the City of Philadelphia, SEPTA, Penn State, and the University of Pennsylvania. You know, tens, hundreds of megawatts of solar through long-term contracts. They're moving in the right direction to protect their

[169] Public witness Richard Posmontier, Transcript of Public Input Hearing at 324:22–325:5 (Apr. 18, 2024).

financial well-being and the climate. Why is PECO not using that obvious tool to do the same thing in this next DSP?"[170]

"I and others around me want and need our energy to be affordable, but we also want it to be responsible, meaning that we want and need PECO, our utility company, to be responsive to the necessity to move away from fossil fuel reliance so that we may all live to see the future. We know that clean, renewable energy is the response [sic] way to address both affordability and sustainability together. And it is a way to do this that will equitably impact the most people, not through individual consumer choice options or programs, but through the default service plan which serves about 75 to 80% percent of PECO customers."[171]

Q. Are you aware of any additional comments from elected officials and PECO customers concerning DSP VI?

A. Yes. Physicians for Social Responsibility has published a blog post that reports on an open letter to PECO in support of increasing the amount of affordable renewable energy in default service supply that is signed by 29 state and local officials.[172] The post also reports on additional public comments on PECO's proposed DSP VI offered by

individuals who were not able to attend either of the public input hearings but who support more affordable renewable energy in the DSP.

X. Conclusions and Recommendations

Q. What then is your overall assessment of the Company's proposed DSP VI?

A. While the Company has developed an efficient and effective method for securing electricity supply through short-term FPFR contracts, the Company has failed to show that its proposed DSP VI will meet the required standard of producing a supply mix that reflects a prudent mix of contracts designed to ensure adequate and reliable supply, least cost over time, and reliance on contracting methods that can meet prudent mix requirements.

Q. Based on the evidence of market conditions, as well as the analysis conducted and presented by EJA witness Mr. Kujala, what conclusions establish the context for the Commission's decisions in this proceeding?

A. I reach the following general conclusions:

- Procurement of zero emission renewable energy is affordable due to technology and market changes; this competitive advantage will only improve.
- Procurement of zero emission renewable energy is in the public interest because it is critically necessary to address the Commonwealth wide adverse consequences of climate change.
- Procurement of zero emission renewable energy is in the public interest because it will help ensure adequate and reliable service.

- Significant bill savings and reduced bill and rate volatility can be obtained through a prudent mix that includes long-term contracts for zero emission renewable energy generation supply.
- It is not prudent, reasonable, or in the public interest for PECO as a default service supplier to ignore these benefits and savings.

Q. Based on your review of the evidence, what conclusions do you reach about PECO's DSP VI proposal?

A. PECO's application and DSP VI proposal:

- Is designed to result in rates that align with short-term prevailing market prices and inadequately protects DSP customers from short-term market price volatility.
- Remains excessively and unreasonably reliant on short-term contracting in a manner that denies DSP customers the benefits of long-term contracts and a cleaner and more climate-friendly supply mix, and therefore fails to comply with the requirement that it result in a prudent mix of contracts.
- Fails to demonstrate that it is least cost over time.
- Is structured to ignore and preclude meaningful opportunities to transition DSP generation supply away from excessive reliance on fossil resources by locking in the existing procurement approach for another four years.
- Fails to present the Commission with evaluations of alternative procurement approaches to support a finding that the DSP VI generation supply will reflect a prudent, least cost mix of spot, short-term, and long-term contracts.

- Is out of step with market economics and energy and climate policy in the Commonwealth.

Q. How do the needs and desires of DSP customers inform your recommendations?

A. PECO's customers spoke eloquently and clearly about what PECO and the Commission must do to address their concerns. A small sampling from the testimony of a few of the many customers who took time to speak to the merits in this case merits careful attention and action:

> "When corporations are continuing the norm or taking neutral stances, nothing changes. Climate change must be addressed now through deliberate changes. There are real solutions available to address the pending climate catastrophe, and it requires listening to the people that will be the most impacted by climate change."[173]

> 'We need a solution that includes everyone and doesn't leave it up to individual choice."[174]

> "I ask that the PUC take the long view, consider the real and increasingly visible costs of the current way that PECO does business, and require PECO to move to a DSP that moves as quickly as possible toward renewable energy, both because it will lead to lower bills and because it will prevent environmental damage, which is priceless."[175]

[173] Public witness Cinthia Ibarra, Transcript of Public Input Hearing at 98:14–20 (Apr. 16, 2024).

[174] Public witness John Braxton, Transcript of Public Input Hearing at 96:5–6 (Apr. 16, 2024).

[175] Public witness John Magee, Transcript of Public Input Hearing at 90:23–91:5 (Apr. 16, 2024).

"And so I urge the PUC to require that PECO commit to securing affordable, clean energy for Southeastern Pennsylvania. Our children and theirs and beyond deserve our best efforts to ensure a livable planet."[176]

"While PECO's focuses on affordability, part of the mission of the Public Utility Commission is to protect the public interest. A sustained long-term investment in renewable energy sources will begin to address the greatest public interest, which is safeguarding our planet and working to quickly address the carbon pollution crisis."[177]

"PECO's default service plan serves three-quarters of PECO customers. Many don't have the time, patience, or the background to weigh their choices. When the PUC approves PECO's default plan, [the PUC is] effectively choosing for them, a great opportunity to balance rates and new technologies in an environmentally sound manner."[178]

"[I]t's obvious that the way that service plan operates today, it's possible to obtain a meaningful amount of electricity from renewable sources only by paying extra to a third-party provider. And this program is - is quite difficult to understand . . . And I would add that it's not available to people on assistance.

So for the families I know who are hard pressed financially in my neighborhood, it pits the desire that they have to avoid dirty energy against their need to buy food and pay rent and secure other basic necessities. So I would say

[176] Public witness Richard Cole, Transcript of Public Input Hearing at 102:7–11 (Apr. 16, 2024).

[177] Public witness Emily Petrucci, Transcript of Public Input Hearing at 113:16–23 (Apr. 16, 2024).

[178] Public witness Nancy Boxer, Transcript of Public Input Hearing at 118:1–7 (Apr. 16, 2024).

that the Customer Choice program amounts to green energy for those who can pay more. And that's regressive. It restricts greener options, mostly to wealthier customers, that is, to the very people who need the least help in obtaining green energy."[179]

Q. What, then, is your recommendation to the Commission regarding the Company's proposed DSP VI?

A. PECO must start modifying its default service program to take advantage of the improved economics of zero emission renewable energy and to provide default supply that better meets the needs of its customers. The Company's historical approach has been incrementally improved over the years, but the basic design is now out of date and demonstrably ineffective at producing a least-cost, prudent mix of generation supply. PECO's work at refining its preferred approach has had huge opportunity costs, bypassing opportunities to procure a less economically and environmentally expensive mix of generation supply. The Company has not provided the Commission with a solid evidentiary basis on which it can approve PECO's DSP VI proposal as designed to secure a prudent mix of resources absent a clear PECO plan to include less expensive and more environmentally responsible generation supply under stable-priced long-term contracts. New long-term contracts for 100% zero emission renewable generation supply can be phased well before the end of the term of the current DSP VI proposed term. Therefore, I recommend that the Commission grant the Company approval to take action to secure at

[179] Public witness Elaine Fultz, Transcript of Public Input Hearing at 122:23–123:15 (Apr. 16, 2024).

least 7% of generation supply for residential customers from 100% zero-emission renewable resources through what I refer to as a "Renewable Energy Supply Procurement" ("RESP") program.

Q. What are the core substantive elements of this RESP proposal?

A. The RESP process that the Commission should direct PECO to undertake should result in ten-year PPA generation supply contracts from zero emission renewable energy generators for the residential customer class totaling about 150 MW in Year 2 of DSP VI, 175 MW in Year 3 of DSP VI, and 200 MW in Year 4 of DSP VI. In addition:

- The RESP should include bid pricing threshold limits, or ceilings, to ensure that PECO is not required to secure zero emission renewables contracts that cause DSP rates to increase above those reasonably expected over the same term.
- The RESP should express a preference, but not a requirement, for new renewable energy generation sited in Pennsylvania.
- The RESP should seek the energy, AECs, capacity value, and ancillary services value that are associated with the energy purchased, and should have fixed or reasonably-fixed prices.
- The Company should determine the best methods for securing any necessary additional capacity, ancillary services, or grid services to provide adequate and reliable service, whether through self-procurement through PJM markets or providing short-term FPFR generation suppliers an opportunity to provide those services.

- The Company should continue to rely on short-term FPFR contracts for the balance of energy and grid services requirements, and, if appropriate and necessary, for contingency supply.
- The Company should use the AECs procured through the PPAs to offset the AEC purchase requirements costs.

Q. How would this interface with PECO's existing procurement processes for the residential customer class?

A. PECO currently serves its residential load with a combination of a hydropower allocation, one- and two-year FPFRs, and spot market purchases. As a first step, PECO applies the allocation of hydropower it receives from the New York Power Authority ("NYPA") to its aggregate residential default service load. This allocation is about 5 MW, or about 0.2% of residential load.[180] I understand that this energy allocation is not "full requirements" in the sense that PECO must purchase additional products and services to fully integrate the supply into its mix. The remaining residential load is divided up into a segment of approximately 99% (which is further divided up into 1.6% tranches served by short-term FPFR contracts) and a segment of approximately 1% which is served by spot market purchases.[181]

[180] Petition of PECO Energy Company for Approval of its Default Service Program for the Period from June 1, 2025 Through May 31, 2029, at 8 (Feb. 2, 2024).

[181] Petition of PECO Energy Company for Approval of its Default Service Program for the Period from June 1, 2025 Through May 31, 2029, at 8 (Feb. 2, 2024).

I recommend that the RESP be incorporated into PECO's supply plan for the residential customer class in a similar fashion as the Company applies the energy from its hydropower allocation. The supply obtained through RESP can be applied after the hydropower allocation is applied, and before calculating the size of FPFR solicitations.

The Company should determine the best methods for securing necessary additional capacity, ancillary services, or grid services to provide adequate and reliable service that are not provided with the PPAs. And the Company should decide whether to secure these products through self-procurement from PJM markets or by providing short-term FPFR generation suppliers an opportunity to provide those products. The remaining residential load can be served by FPFR and spot purchases as the Company has been doing in the past and proposes to do in DSP VI.

Q. Are there any precedents for such an arrangement incorporating zero emission renewable energy in PECO's procurement process?

A. Yes. PECO already defines its residential default service load as the aggregate residential default service load less the hydropower allocation. In PECO's Supply Master Agreement, "DS Load" is defined as "[t]he aggregate load of DS Customers being provided DS Supply, except with respect to the Residential Class, less a fractional percentage of committed energy and capacity obtained under contract with Allegheny Electric Cooperative, Inc. for supply from the New York Power Authority." [182]

[182] *See* Petition of PECO Energy Company for Approval of its Default Service Program for the Period from June 1, 2025 Through May 31, 2029, Exhibit SD-2, at 8. As discussed above, Ms.

I also note that PECO explained in discovery that PECO personnel acquire any products or services needed to meet the full requirements of serving residential load with energy procured through its hydropower allocation.[183] PECO's experience with energy block purchases in the past may be useful, though PPAs for zero emission renewable energy offer additional benefits like AECs, capacity value, and ancillary services.

Q. Do you have recommendations as to the process for developing and executing the RESP?

A. Yes. Following the issuance of a Final Order in this proceeding, PECO should begin work on developing a request for proposals ("RFP") plan to implement the CESP. The RFP must be for long-term, ten-year commitments of energy in the form of PPAs from zero emission renewable sources, along with associated capacity, AECs, and ancillary services. With those and other criteria deemed necessary by the Company met, the proposals should be ranked and accepted based on the lowest net present value price. PECO should submit a proposed RFP to the Commission in this or a successor docket within six months of the issuance of the Final Order. I recommend that PECO use a request for information ("RFI") process to discern best practices for procurement of zero emission renewables, with responses shortly after entry of the Final Order. I recommend

Dalessio's testimony explains that the energy and capacity allocation that PECO receives from NYPA and uses to offset its residential default service load is a hydropower allocation. PECO St. No. 1, Direct Testimony of Sulma Dalessio, 14:19–15:5 (Feb. 2, 2024).

[183] Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-V-1–5. PECO personnel also perform this function with regard to the approximately 1% of spot market purchases that PECO uses to serve residential default service load. Exh. KRR-3, PECO Interrogatory Responses, Response to EJA-I-7; EJA-V-4; EJA-VI-16–17; OCA-II-4.

that the Commission direct PECO to convene, no later than three months after entry of the Final Order, at least one public stakeholder meeting at which stakeholders can share their thoughts on best practices for procurement of zero emission renewables. PECO can incorporate information learned from the RFI and the stakeholder meeting(s) into the development of its proposed RFP.

Once PECO's proposed RFP is filed with the Commission, the public should have an opportunity to file comments on the proposed RFP for a 60-day period. Following this comment period, the public should have an opportunity to file reply comments for a 30-day period. Following the comment periods, the Commission should issue an order approving, modifying, or rejecting PECO's proposed RFP.

I recommend that the proposed RFP include provision for an independent RFP administrator that will manage the bidding process, similar to how the Independent Evaluator ("IE") administers the FPFR bidding process. The RFP administrator should, like the IE, independently evaluate bids and provide recommendations to the Commission regarding approval of bids. The RFP administrator should, like the IE, also provide a market report to the Commission addressing market pricing trends for zero emission renewables PPAs. I recommend that the proposed RFP include a process for establishing bid pricing threshold limits, or ceilings, to ensure that PECO is not required to secure contracts that cause DSP rates to increase beyond that reasonably expected over the same term without supply from PPAs.

I recommend a deadline be set for the Commission to issue an order on PECO's proposed RFP that would enable PECO sufficient time to execute the RFP and procure zero emission renewable energy that can be delivered to residential customers no later than June 1, 2026—the start of Year 2 of DSP VI. The procurement process should be repeated annually to begin constructing a ladder of overlapping long-term zero emission renewables contracts.

Q. What is the primary benefit of an RESP program focused on securing generation supply from zero emission renewable generators under long-term contracts?

A. As I have detailed in this testimony, procurement of generation supply from zero emission renewables is in the public interest because it addresses the climate change crisis. Long-term contracts are well-suited to procuring zero emission renewable supply and provide protection against price volatility and energy security concerns and contribute to reliability of service. Together, long-term contracts for zero emission renewables are key components of a prudent mix of generation supply.

Q. Why do you recommend gradually phasing in such long-term contracts and laddering them?

A. PECO has demonstrated that there are benefits in terms of competition, supplier diversity, reduction of customer exposure to very short-term price fluctuations, and administrative efficiency with staging and laddering supply contracts. Those benefits can be obtained through phasing in and laddering long-term contracts under the RESP as well.

Q. Why do you recommend incorporating zero emission renewable energy into the residential customer class supply mix specifically?

A. Residential customers as a class represent a stable, customer count and reasonably homogenous load that will reduce risks associated with obtaining supply through long-term contracting. As previously noted, residential customers also expressed strong support for incorporating affordable renewable energy into default service supply at the two public input hearings convened in this proceeding.

Q: How will this proposal affect retail competition?

A: Done well, the RESP will improve competition in the electricity sector. Retail energy suppliers compete against the price to compare set by PECO's default service. By incorporating long-term contracts for zero emission renewables in its DSP generation supply mix, PECO can lower long-term costs for the supply mix. Competitive suppliers will follow these reductions once PECO has reflected them in the price to compare.

Q. Are long-term contracts for zero emission renewables a good way to procure AECs for AEPS compliance?

A. Yes. The AECs procured under long-term PPAs will reduce the amount of AECs that FPFR suppliers must acquire. This has several benefits. First, the AECs from zero emission renewables reflect superior renewable energy generating sources that align with customer preferences. Second, purchasing AECs in conjunction with the underlying supply offers better economics and reduces PECO's exposure to AEC price arbitrage resulting from short-term purchases. Fourth, as PECO already knows, procuring AECs on

longer terms is more economical. Finally, procuring AECs in conjunction with generation supply under long-term contracts is more likely to directly induce the development and construction of new zero emission energy facilities, including through improving access to financing for developers.

Q. Why do you recommend that the RESP process include stakeholder consultation?

A. The fossil energy-based electric system has not been just. Environmental costs have not been equitably distributed; communities of color and economically disadvantaged populations have not enjoyed equal participation roles in decisions; and structural inequities persist due to a variety of causes, like urban redlining. Procuring zero emission renewable energy addresses the failure in PECO's prior DSPs to ensure equitable access to truly clean energy. In joining the transition to a fossil-free energy economy, PECO must not repeat or compound the burdens of historical energy injustice. Indeed, the RESP should have an explicit goal of energy justice. Early, inclusive, and meaningful engagement with the community of DSP customers—especially, but not limited to CAP customers—should be a first step in launching the RESP. In simple terms, the transition to a more just energy system must be both substantively based on zero emission renewables and procedurally grounded in energy democracy.

Q. What is the energy justice goal that you recommend PECO adopt for the RESP?

A. PECO's RESP should adopt the goal of energy justice as identified in a report prepared for the State Energy Justice Roundtable hosted by the National Association of Regulatory

Utility Commissioners ("NARUC"), the National Association of State Energy Officials ("NASEO"), and the National Governors Association ("NGA"):[184]

> The goal of achieving equity in both the social and economic participation in the energy system, while also remediating social, economic, and health burdens on those historically harmed by the energy system. Energy justice explicitly centers the concerns of marginalized communities and aims to make energy more accessible, affordable, clean, reliable, resilient, and democratically managed by and for all communities.

Q. Can you offer any guidance to PECO in addressing energy justice?

A. Yes. The NARUC State Energy Justice Roundtable Series has published a series of reports addressing Approaches to Equitable Decision Making, Energy Justice Metrics, and Customer Affordability and Metrics.[185] The Initiative for Energy Justice has developed the Energy Justice Workbook which serves as a primer and handbook that PECO could apply in integrating energy justice into the RESP.[186]

[184] KRR-13, Jasmine McAdams, *State Energy Justice Roundtable Series: Energy Justice Metrics*, NARUC (Feb. 2023).

[185] NARUC, *Core Sector: Energy Resources and the Environment; Energy Equity and Justice* (2024), https://www.naruc.org/core-sectors/energy-resources-and-the-environment/energy-equity-and-justice/.

[186] KRR-14, Shalanda Baker, Subin DeVar & Shiva Prakash, *The Energy Justice Workbook, Initiative for Energy Justice* (Dec. 2019).

Q. Do you have other recommendations?

A. Yes. As referenced earlier in this testimony, PECO has two major data blind spots. First, it does not know nearly enough about its DSP customers. Engagement with customers and with the facts of their lives is essential for creating and maintaining a prudent mix of energy supply for customers. Second, PECO does not know enough about the generation it procures to serve DSP customers. PECO must enforce the provision in its SMA that requires disclosure of the generation supply mix for every one of its contracted suppliers.

Q. Does this conclude your testimony?

A. Yes.

VERIFICATION

I hereby verify that the facts contained in the foregoing testimony are true and accurate to the best of my knowledge and that I am duly authorized to make this verification, and that I expect to be able to prove the same at any hearing held in this matter. I understand that the statements herein are made subject to penalties of 18 Pa. C.S. § 4904 (relating to unsworn falsification to authorities).

Karl R. Rábago Resume

Karl R. Rábago

Rábago Energy LLC

1350 Gaylord Street, Denver, Colorado 80206-2114

c/SMS: +1.512.968.7543 | e: rabago@me.com | rabagoenergy.com

Nationally recognized leader and innovator in electricity and energy law, policy, and regulation. Experienced as a regulatory expert, utility executive, research and development manager, sustainability leader, senior government official, educator, and advocate. Law teaching experience at Pace University Elisabeth Haub School of Law, University of Houston Law Center, and U.S. Military Academy at West Point. Military veteran.

Employment

RÁBAGO ENERGY LLC

Principal: July 2012—Present. Consulting practice dedicated to providing business sustainability, expert witness, and regulatory advice and services to organizations in the clean and advanced energy sectors. Prepared and submitted testimony in more than 35 jurisdictions and 165 electricity and gas regulatory proceedings. Recognized national leader in development and implementation of innovative "Value of Solar" alternative to traditional net metering. Additional information at rabagoenergy.com.

- Director, Colorado Electric Transmission Authority (2022-present).
- Chairman of the Board, Center for Resource Solutions (1997-present). Past chair of the Green-e Governance Board.
- Director, Solar United Neighbors (2018-present).
- Advisor, Commission Shift (2021-present).
- Director, Texas Solar Energy Society (2022-present).

PACE ENERGY AND CLIMATE CENTER, PACE UNIVERSITY ELISABETH HAUB SCHOOL OF LAW

Senior Policy Advisor: September 2019—September 2020. Part-time advisor and staff member. Provided transitional expert witness, project management, and business development support on electric and gas regulatory and policy issues and activities.

Executive Director: May 2014—August 2019. Leader of a team of professional and technical experts and law students in energy and climate law, policy, and regulation. Secured funding for and managed execution of regulatory intervention, research, market development support, and advisory services. Taught Energy Law. Provided learning and development opportunities for law students. Additional activities:

- Director, Alliance for Clean Energy – New York (2018-2019).
- Director, Interstate Renewable Energy Council (IREC) (2012-2018).
- Co-Director and Principal Investigator, Northeast Solar Energy Market Coalition (2015-2017). The NESEMC was a US Department of Energy's SunShot Initiative Solar Market Pathways project. Funded under a cooperative agreement between the US DOE and Pace University, the NESEMC worked to harmonize solar market policy and advance supportive policy and regulatory practices in the northeast United States.

AUSTIN ENERGY – THE CITY OF AUSTIN, TEXAS

Vice President, Distributed Energy Services: April 2009—June 2012. Executive in one of the largest public power electric utilities, serving more than one million people in central Texas. Responsible for management and oversight of energy efficiency, demand response, and conservation programs; low-income weatherization; distributed solar and other renewable energy technologies; green buildings program; key accounts relationships; electric vehicle infrastructure; and market research and product development. Executive sponsor of Austin Energy's participation in an innovative federally funded smart grid demonstration project led by the Pecan Street Project. Led teams that successfully secured over $39 million in federal stimulus funds for energy efficiency, smart grid, and advanced electric transportation initiatives. Additional activities included:

- Director, Renewable Energy Markets Association. REMA is a trade association dedicated to maintaining and strengthening renewable energy markets in the United States.
- Member, Pedernales Electric Cooperative Member Advisory Board. Invited by the Board of Directors to sit on first-ever board to provide formal input and guidance on energy efficiency and renewable energy issues for the nation's largest electric cooperative.

THE AES CORPORATION

Director, Government & Regulatory Affairs: June 2006—December 2008. Director, Global Regulatory Affairs, provided regulatory support and group management to AES's international electric utility operations on five continents. Managing Director, Standards and Practices, for Greenhouse Gas Services, LLC, a GE Energy and AES venture committed to generating and marketing voluntary market greenhouse gas credits. Government and regulatory affairs manager for AES Wind Generation. Managed a portfolio of regulatory and legislative initiatives to support wind energy market development in Texas, across the United States, and in many international markets.

JICARILLA APACHE NATION UTILITY AUTHORITY

Director: 1998—2008. Located in New Mexico, the JANUA was an independent utility developing profitable and autonomous utility services that provided natural gas, water utility services, low-income housing, and energy planning for the Nation. Authored "First Steps" renewable energy and energy efficiency strategic plan with support from U.S. Department of Energy.

HOUSTON ADVANCED RESEARCH CENTER

Group Director, Energy and Buildings Solutions: December 2003—May 2006. Leader of energy and building science staff at a mission-driven not-for-profit contract research organization based in The Woodlands, Texas. Responsible for developing, maintaining, and expanding on technology development, application, and commercialization support programmatic activities, including the Center for Fuel Cell Research and Applications; the Gulf Coast Combined Heat and Power Application Center; and the High-Performance Green Buildings Practice. Secured funding for major new initiative in carbon nanotechnology applications in the energy sector.

- President, Texas Renewable Energy Industries Association. As elected president of the statewide business association, led and managed successful efforts to secure and implement significant expansion of the state's renewable portfolio standard as well as other policy, regulatory, and market development activities.
- Director, Southwest Biofuels Initiative. Established the Initiative as an umbrella structure for multiple biofuels related projects.

- Member, Committee to Study the Environmental Impacts of Wind Power, National Academies of Science National Research Council. The Committee was chartered by Congress and the Council on Environmental Quality to assess the impacts of wind power on the environment.
- Advisory Board Member, Environmental & Energy Law & Policy Journal, University of Houston Law Center.

CARGILL DOW LLC (NOW NATUREWORKS, LLC)

Sustainability Alliances Leader: April 2002—December 2003. Integrated sustainability principles into all aspects of a ground-breaking bio-based polymer manufacturing venture. Responsible for maintaining, enhancing, and building relationships with stakeholders in the worldwide sustainability community, as well as managing corporate and external sustainability initiatives.

- Successfully completed Minnesota Management Institute at University of Minnesota Carlson School of Management, an alternative to an executive MBA program that surveyed fundamentals and new developments in finance, accounting, operations management, strategic planning, and human resource management.

ROCKY MOUNTAIN INSTITUTE

Managing Director/Principal: October 1999–April 2002. Co-authored "Small Is Profitable," a comprehensive analysis of the benefits of distributed energy resources. Provided consulting and advisory services to help business and government clients achieve sustainability through application and incorporation of Natural Capitalism principles.

- President of the Board, Texas Ratepayers Organization to Save Energy. Texas R.O.S.E. is a non-profit organization advocating low-income consumer issues and energy efficiency programs.
- Co-Founder and Chair of the Advisory Board, Renewable Energy Policy Project-Center for Renewable Energy and Sustainable Technology. REPP-CREST was a national non-profit research and internet services organization.

CH2M HILL

Vice President, Energy, Environment and Systems Group: July 1998–August 1999. Responsible for providing consulting services to a wide range of energy-related businesses and organizations, and for creating new business opportunities in the energy industry for an established engineering and consulting firm. Completed comprehensive electric utility restructuring studies for Colorado and Alaska.

PLANERGY

Vice President, New Energy Markets: January 1998–July 1998. Responsible for developing and managing new business opportunities for the energy services market. Provided consulting and advisory services to utility and energy service companies.

ENVIRONMENTAL DEFENSE FUND

Energy Program Manager: March 1996–January 1998. Managed renewable energy, energy efficiency, and electric utility restructuring programs. Led regulatory intervention activities in Texas and California. In Texas, played a key role in crafting Deliberative Polling processes. Participated in national environmental and energy advocacy networks, including the Energy Advocates Network, the National Wind Coordinating Committee, the NCSL Advisory Committee on Energy, and the PV-COMPACT Coordinating Council. Frequently appeared before the Texas Legislature, Austin City Council, and regulatory commissions on electric restructuring issues.

UNITED STATES DEPARTMENT OF ENERGY

Deputy Assistant Secretary, Utility Technologies: January 1995–March 1996. Manager of the Department's programs in renewable energy technologies and systems, electric energy systems, energy efficiency, and integrated resource planning. Supervised technology research, development and deployment activities in photovoltaics, wind energy, geothermal energy, solar thermal energy, biomass energy, high-temperature superconductivity, transmission and distribution, hydrogen, and electric and magnetic fields. Managed, coordinated, and developed international agreements. Supervised development and deployment support activities at national laboratories. Developed, advocated, and managed a Congressional budget appropriation of approximately $300 million.

STATE OF TEXAS

Commissioner, Public Utility Commission of Texas. May 1992–December 1994. Appointed by Governor Ann W. Richards. Regulated electric and telephone utilities in Texas. Co-chair and organizer of the Texas Sustainable Energy Development Council. Vice-Chair of the National Association of Regulatory Utility Commissioners (NARUC) Committee on Energy Conservation. Member and co-creator of the Photovoltaic Collaborative Market Project to Accelerate Commercial Technology (PV-COMPACT).

LAW TEACHING

Professor for a Designated Service: Pace University Elisabeth Haub School of Law, 2014-2019. Non-tenured member of faculty. Taught Energy Law. Supervised a student intern practice.

Associate Professor of Law: University of Houston Law Center, 1990–1992. Full time, tenure track member of faculty. Courses taught: Criminal Law, Environmental Law, Criminal Procedure, Environmental Crimes Seminar, Wildlife Protection Law.

Assistant Professor: United States Military Academy, West Point, New York, 1988–1990. Member of the faculty in the Department of Law. Honorably discharged in August 1990, as Major in the Regular Army. Courses taught: Constitutional Law, Military Law, and Environmental Law Seminar.

LITIGATION

Trial Defense Attorney and Prosecutor, U.S. Army Judge Advocate General's Corps, Fort Polk, Louisiana, January 1985–July 1987. Assigned to Trial Defense Service and Office of the Staff Judge Advocate.

NON-LEGAL MILITARY SERVICE

Armored Cavalry Officer, 2d Squadron 9th Armored Cavalry, Fort Stewart, Georgia, May 1978–August 1981. Served as Logistics Staff Officer (S-4). Managed budget, supplies, fuel, ammunition, and other support for an Armored Cavalry Squadron. Served as Support Platoon Leader for the Squadron (logistical support), and as line Platoon Leader in an Armored Cavalry Troop. Graduate of Airborne and Ranger Schools. Special training in Air Mobilization Planning and Nuclear, Biological and Chemical Warfare.

Formal Education

LL.M., Environmental Law, Pace University School of Law, 1990: Curriculum designed to provide breadth and depth in study of theoretical and practical aspects of environmental law. Courses included: International and Comparative Environmental Law, Conservation Law, Land Use Law, Seminar in Electric Utility Regulation, Scientific and Technical Issues Affecting Environmental Law, Environmental Regulation of Real Estate, Hazardous Wastes Law. Individual research with Hudson Riverkeeper Fund, Garrison, New York, on federal regulation of cooling water intake structures for electric power plants.

LL.M., Military Law, U.S. Army Judge Advocate General's School, 1988: Curriculum designed to prepare Judge Advocates for senior level staff service. Courses included: Administrative Law, Defensive Federal Litigation, Government Information Practices, Advanced Federal Litigation, Federal Tort Claims Act Seminar, Legal Writing and Communications, Comparative International Law.

J.D. with Honors, University of Texas School of Law, 1984: Attended law school under the U.S. Army Funded Legal Education Program, a fully funded scholarship awarded to 25 or fewer officers each year. Served as Editor-in-Chief (1983–84); Articles Editor (1982–83); Member (1982) of the Review of Litigation. Moot Court, Mock Trial, Board of Advocates. Summer internship at Staff Judge Advocate's offices. Prosecuted first cases prior to entering law school.

B.B.A., Business Management, Texas A&M University, 1977: ROTC Scholarship (3–yr). Member: Corps of Cadets, Parson's Mounted Cavalry, Wings & Sabers Scholarship Society, Rudder's Rangers, Town Hall Society, Freshman Honor Society, Alpha Phi Omega service fraternity.

Pennsylvania Public Utility Commission
v.
PECO Energy Company

Petition of PECO Energy Company for Approval of
Default Service Program

Docket No. P-2024-3046008

Response of PECO Energy Company
To Interrogatories of the
Energy Justice Advocates
EJA Set I

Response Date: March 21, 2024

EJA-I-7

Please see paragraph 3 of PECO's Petition for Approval for DSP VI. Please explain in detail why PECO believes that its proposed default service plan contains a "'prudent mix' of default service supply contracts" and provide all data and analysis relied upon by PECO to reach and support this assertion.

RESPONSE:

See PECO Statement No. 3, Direct Testimony of Scott G. Fisher, at 3:6-42:5. See Attachment EJA-I-7(a.1) and EJA-I-7(a.2) for the workpapers supporting Mr. Fisher's testimony.

As noted at 35:1-36:7 of Mr. Fisher's testimony, PECO relied on the Commission's guidance in its Second Default Service Rulemaking Order (Default Serv. and Retail Elec. Mkts., Docket No. L-2009-2095604 (Order entered Oct. 4, 2011)) regarding interpretation of "prudent mix." In light of this guidance, the mix of products proposed by PECO for DSP VI is informed by PECO's experience with the supply product mixes across PECO's five DSPs to date and the positions and analyses presented in the associated Commission dockets. See Attachment EJA-I-7(a.3) for relevant testimony over the past five PECO default service dockets containing data and analysis that informed the evolution of the mix of products to the mix that was determined by the Commission in its DSP V Order (Petition of PECO Energy Company for Approval of Its Default Service Program for the Period from June 1, 2021 through May 31, 2025, Docket No. P-2020-3019290 (Order entered Dec. 3, 2020)) to be a prudent mix designed to provide the least cost to customers over time. PECO has proposed to continue this mix in DSP VI, with the addition of doubling its ten-year fixed priced long-term supply of Pennsylvania and PECO service area-

sourced Solar Alternative Energy Credits. See PECO Statement No. 1, Direct Testimony of Sulma Dalessio, at 8:9-16.

Responsible Witness: Scott G. Fisher

Pennsylvania Public Utility Commission
v.
PECO Energy Company

Petition of PECO Energy Company for Approval of
Default Service Program

Docket No. P-2024-3046008

Response of PECO Energy Company
To Interrogatories of the
Energy Justice Advocates
EJA Set I

Response Date: March 21, 2024

EJA-I-13

Please see paragraph 13 of PECO's Petition for Approval for DSP VI. Please confirm that proposed changes in PECO's procurement strategy, notably the proposals for a reserve price and for a proxy capacity payment represent a departure from prior procurement procedures. Please provide analysis and forecasts of the impacts of the proposed changes on the cost of DSP supply. If such data is not available, please explain why it is not.

RESPONSE:

As noted in paragraph 13 of PECO's Petition for Approval for DSP VI, PECO proposes to maintain the basic procurement strategy established in prior default service programs, which utilizes full requirements, load-following products, and short periods between the solicitation and delivery of supply products. The implementation of the reserve price and the incorporation of a Capacity Proxy Price mechanism into the Company's Supplier Master Agreement are refinements to the basic procurement strategy. PECO has not performed analyses or forecasts of the impacts of these proposed refinements.

Docket No. P-2024-3046008

Response of PECO Energy Company
To Interrogatories of the
Energy Justice Advocates
EJA Set II

Response Date: March 22, 2024

EJA-II-11

Please see the Direct Testimony of Scott G. Fisher at 18:2-19:5. Please detail what steps PECO took to mitigate "residual compensation" volatility in 2022 and 2023, and how successful those steps were.

RESPONSE:

During DSP V, PECO has met its obligations as default service provider to provide adequate and reliable default service to default service customers at least cost over time. During this time, PECO continued to follow the Commission-approved procurement plan for DSP V, which is designed to ensure least cost to customers over time, taking into account the benefits of price stability.

See the direct testimony of Katie Orlandi (PECO Statement No. 4), question 26 (pages 16-18), for additional steps PECO took to mitigate residual compensation volatility in 2022 and 2023.

PECO views these steps as successful, as the Commission approved the results of all DSP V solicitations conducted in 2022 and 2023.

PECO Energy Company

Petition of PECO Energy Company for Approval of
Default Service Program

Docket No. P-2024-3046008

Response of PECO Energy Company
To Interrogatories of the
Energy Justice Advocates
EJA Set II

Response Date: March 22, 2024

EJA-II-12

Please see the Direct Testimony of Scott G. Fisher at 22:15-24:7. Please confirm that "load-weighting gross-ups" are primarily a reflection of short-term price volatility for fossil-gas based electric supply. If not, please explain.

RESPONSE:

As stated at PECO Statement No. 3, Direct Testimony of Scott G. Fisher, at 22:18-19, the load-weighting gross-up refers to the difference between the cost to supply a load that varies by hour and the cost to supply a constant amount over the same period. Load-weighting gross-ups are driven by the variations in hourly prices, the variations in hourly loads, and the correlations between them. Many factors can affect the variations in hourly prices, the variations in hourly loads, and the correlations between them. The specific definition of "a reflection of short-term price volatility for fossil-gas based electric supply" is unclear, but Mr. Fisher has not performed an analysis to determine the extent to which the load-weighting gross-ups are "a reflection of short-term price volatility for fossil-gas based electric supply."

EJA Set II

Response Date: March 22, 2024

EJA-II-19

Please provide a detailed demographic and statistical description of the customers taking default service in each customer service class. Please explain in detail how this information is used by Ms. Dalessio and others within or affiliated with PECO to shape PECO's default supply strategy, actions, and plan. If such information is not available, please explain why not.

RESPONSE:

Consistent with DSP V, PECO is proposing to maintain the three customer procurement classes -- Residential, Small Commercial and Large Commercial and Industrial - based on its review of customer usage patterns and Commission guidance regarding the need for price stability.

Residential and Small Commercial customers have different usage patterns that warrant separating those customers from other customers to avoid cross-subsidization in costs. Demographic and statistical description of the customers in each customer class is not used to shape PECO's default supply strategy.

EJA Set II

Response Date: March 22, 2024

EJA-II-21

Please see the Direct Testimony of Sulma Dalessio at 7:17-8:6 (also 12:3-14).

a. Please confirm that under PECO's proposal, DSP VI will never specifically solicit for any of the following types of supply, and as a result, default supply customers will not directly participate in buying such supply during that term:
    i. supply from solar, wind, hydropower, geothermal, biomass, landfill gas, or tidal generation sources
    ii. supply from zero-carbon generation sources
    iii. supply procured via long-term contracts (as distinct from SAECs)
b. If the answer to any part of the EJA-II-21(a) is negative, please explain why PECO takes the position that default supply customers should not receive any such supply as part of default service.
c. Please provide all analyses and decision documents relating to the development of the DSP VI procurement strategy.

RESPONSE:

a. See the responses below.

    i. Under PECO's DSP VI proposal, PECO is proposing to double its long-term supply contracts for Solar Alternative Energy Credits. See PECO Statement No. 1, Direct Testimony of Sulma Dalessio, at 15:14-21. Furthermore, the full requirements supply products that PECO proposes to

procure do not preclude winning default service suppliers from utilizing solar, wind, hydropower, geothermal, biomass, landfill gas, or tidal generation sources, to fulfill their default service supply obligation.

ii. Under PECO's DSP VI proposal, PECO will specifically solicit supply from zero-carbon generation sources. Specifically, PECO is proposing to double its long-term supply contracts for Solar Alternative Energy Credits. See PECO Statement No. 1, Direct Testimony of Sulma Dalessio, at 15:14-21. Furthermore, the full requirements supply products that PECO proposes to procure do not preclude winning default service suppliers from utilizing zero-carbon generation sources to fulfill their default service supply obligation.

iii. Under PECO's DSP VI proposal, PECO will specifically solicit supply from long-term contracts. Specifically, PECO is proposing to double its long-term supply contracts for Solar Alternative Energy Credits ("SAECs"). See PECO Statement No. 1, Direct Testimony of Sulma Dalessio, at 15:14-21. Furthermore, the full requirements supply products that PECO proposes to procure do not preclude winning default service suppliers from utilizing long-term contracts to fulfill their default service supply obligation.

b. PECO does not take the position that default supply customers should not receive any supply from the types of supply referenced in part (a) as part of default service.

c. See PECO's responses to EJA-I-7 and EJA-II-20.

EJA Set III

Response Date: March 25, 2024

EJA-III-4

Please refer to the Direct Testimony of Sulma Dalessio at 8:7-9:11: PECO proposes to double the number of Solar Alternative Energy Credits (SAECs) that it procures under long-term contracts.

a. Please explain why PECO is making this proposal and provide copies of all documents containing any evaluations performed by PECO or on its behalf relating to the proposal.
b. Please provide a listing and explanation of the factors supporting the specific decision to seek 32,000 SAECs annually under DSP VI.
c. Please explain how the proposal to seek 32,000 SAECs annually under long-term contracts will impact contracting with energy and capacity suppliers under DSP VI. If fewer SAECs are to be procured under fixed price-full requirements contracts with energy and capacity suppliers, how will those reductions be allocated among energy suppliers?
d. Please clarify whether PECO proposes to secure SAECs from in-state solar resources or from facilities located outside the Commonwealth.
e. Please explain whether and why PECO takes the position that procurement of 32,000 SAECs annually under long-term contracts conforms with PECO meeting its least-cost obligations.
f. Please detail whether PECO has performed any evaluation of the relative costs and merits of procuring SAECs in conjunction with energy contracts versus on a stand-alone basis, and with long-term contracts versus spot market procurements.
g. Please explain and provide documents reflecting PECO's overall AEPS compliance strategy. Please explain whether and how PECO's AEC compliance strategy seeks to minimize compliance costs, maximize in-state energy-related benefits, and/or increase the amount of renewable energy

generated in Pennsylvania and in PECO's service territory.

h. Please detail any requirements or preferences PECO applies to the procurement of AECs and SAECs.
i. Please detail and provide the information requested from suppliers by PECO regarding ultimate generation sources for AECs and SAECs.

RESPONSE:

a. – b. PECO is making the proposal to double the number of Solar Alternative Energy Credits (SAECs) (from 16,000 to 32,000) to build on its existing procurement strategy approved by the Commission and endorsed by stakeholders in prior settlements of DSP proceedings. Thus, PECO is proposing to maintain its general AEC procurement strategy to enable AEC aggregators to join solar generator owners as bidders to promote the purchase of AECs from smaller solar units and to promote more local solar purchases without adding costs. PECO has not completed specific analysis on the proposal; rather, PECO is relying on the success of the prior procurement.

c. PECO is proposing to run the 2025 and 2026 SAEC solicitations for the additional annual 16,000 SAEC 10-year contracts and assign SAECs to full requirement tranches. The full requirements suppliers are required to supply the balance of the SAEC requirements associated with their default service supply tranches in accordance with the SMA.

d. PECO proposes to secure SAECs from in-state solar resources. The first stage of each RFP will consist of a competitive procurement RFP for solar from anywhere in Pennsylvania where winning bidders will be determined by the lowest solar AEC prices offered. The second stage will be a Standard Offer to Purchase (SOTP) solar AECs at the quantity-weighted average of the winning competitive prices determined by the first stage RFP, with the requirement that the solar AECs from stage two bidders come from solar generation resources located in the PECO service territory.

e. PECO's proposal to procure 32,000 SAECs annually under long-term contracts is aligned with the Commission's Final Default Service Rulemaking Order. In light of PECO's prior, successful, Commission-approved RFPs for long-term contracts to purchase 16,000 solar AECs annually, PECO is proposing to procure an additional 16,000 solar AECs in the first two years of the DSP VI term using the same RFP process approved by the Commission in DSP V for the prior solar AEC long-term contracts. This approach is designed to obtain competitive, fixed-price supply contracts at least cost using the RFP and SOTP process described in the response to (d). See PECO Statement No. 1, Direct Testimony of Sulma Dalessio, at 25:9-28:13.

f. PECO has not performed further evaluation or analysis on this subject. However, PECO's experience is informed by its five past DSP proceedings. Expanded use of long-term default service supply contracts (to procure additional components of default service supply) could result in risks for customers, especially given the uncertainty about default

service load levels over longer periods of time. This could result in costly scenarios for customers, such as those in which the contract price is ultimately above future market levels and the contracted quantity constitutes an unexpectedly high portion of the default service supply portfolio. Expanded use of long-term default service supply contracts (to procure additional components of default service supply) could also reduce the flexibility to make future changes to the default service supply portfolio if they are warranted.

g. See Statement No. 1, the Direct Testimony of Sulma Dalessio, pages 25-28. Ms. Dalessio explains PECO's strategy to satisfy AEPS obligations.

h. See PECO Exhibit SD-4, PECO Energy Company Requests for Proposals to Supply Solar Alternative Energy Credits.

i. See PECO Exhibit SD-3, PECO Supplier Master Agreement, Appendix E, DS Supplier's Obligations for AEPS Compliance.

Please refer to Part III of the Direct Testimony of Scott G. Fisher, which is entitled, "Evaluation of PECO's Proposed DSP VI."

a. Has PECO or anyone on its behalf created any estimates, modelling, or projections of the costs of default service supply or any component of default service supply either for all customers or for any specific customer class or classes if any different procurement approach than what PECO has proposed in this proceeding were to be implemented following the expiration of DSP V?

    i. If yes, please provide copies of all documents, analyses, or data associated with or containing, in whole or in part, any such estimates, modelling, or projections.
    ii. If no, please explain why not.

RESPONSE:

a. No. No such analysis was performed.
    i. N/A
    ii. PECO has met its obligations to date under prior DSPs, including its fundamental obligation as default service provider to provide adequate and reliable default service to default service customers at least cost over time. As noted in paragraph 13 of PECO's Petition for Approval for DSP VI, PECO proposes to maintain the basic procurement strategy established in prior default service programs, which utilizes full

requirements, load-following products, and short periods between the solicitation and delivery of supply products.

Please refer to PECO Exhibit MAM-7, page 2, wherein when instructed by 52 Pa. Code Section 53.52(a)(9) to provide a statement addressing "Customer polls taken and other documents which indicate customer acceptance and desire for the proposed change," PECO stated "No customer polls were taken."

a. Please confirm that no customer polls were taken as part of the development of PECO's proposals for DSP VI.
b. Please explain why no customer polls were taken as part of the development of PECO's proposals for DSP VI.
c. Please explain whether PECO used any means other than polling to evaluate customer preferences in connection with the development of DSP VI, and please provide all documents associated with any such evaluation.
d. Does PECO have in its possession or access to any documents that "indicate customer acceptance and desire" for PECO's proposals for DSP VI? If yes, please provide copies of the documents.
e. 52 Pa. Code Section 53.52(a)(9) also provides that "If the poll or other documents reveal discernible public opposition, an explanation of why the change is in the public interest shall be provided." Does PECO have in its possession or access to any documents that reveal discernible public opposition to PECO's proposals for DSP VI? If yes, please provide copies of the documents.

RESPONSE:

a. No customer polls were taken as part of the development of PECO's proposals for DSP VI.
b. No customer polls were taken in development of PECO's proposals for DSP VI consistent with prior DSP proceedings. As explained in PECO Statement No. 2, PECO is proposing to maintain its current Commission-approved rate design and the only tariff changes proposed are to update the Generation Supply Adjustment, Non-Bypassable Transmission Charge, and Transmission Service Charge for the DSP VI rates and effective date.
c. PECO did not use any means other than polling to evaluate customer preferences in connection with the development of DSP VI.
d. No, PECO does not have in its possession or access to any documents that "indicate customer acceptance and desire" for PECO's proposals for DSP VI.
e. No, PECO does not have in its possession or access to any documents that reveal discernible public opposition to PECO's proposals for DSP VI.

EJA Set VI

Response Date: April 22, 2024

EJA-VI-1

Please refer to the Company's response to EJA-III-18(c), which states, "For each of subquestion (a)(i)-(vii) for which the answer is no, please explain why not." The Company's response states: "Regarding 'iv. Long-term electricity supply contracts (longer than two years),' no such analysis was performed." Please explain why no such analysis was performed.

RESPONSE:

No such additional analysis was needed for PECO's decision-making or planning purposes. In developing its DSP VI proposal, PECO considered its evaluation regarding the use of long-term contracts from its most recent default service proceeding (DSP V), and it considered the Commission's findings related to PECO's consideration of the use of long-term contracts. See PECO's evaluation regarding the use of long-term contracts at Docket No. P-2020-3019290, PECO Statement No. 4-R, at 27:21-31:9, which can be found at Attachment EJA-I-7(a.3). See Attachment EJA-VI-1(a), which is the Commission's Opinion and Order in Docket No. P-2020-3019290, at 29, 30-32. In developing its DSP VI proposal, PECO also considered its evaluations regarding the use of long-term contracts in previous default service proceedings. See PECO's response to EJA-II-20.

Furthermore, PECO's proposal in the instant proceeding to continue to directly solicit full requirements supply products does not preclude winning default service suppliers from utilizing other types of supply products, such as long-term contracts, to fulfill their default service supply obligation. PECO's reliance on full requirements supply products is especially conducive to

innovation and competition with respect to all aspects of the electricity supply obligation, encouraging a wide range of supply options to be considered by the winning bidders to satisfy their full requirements obligation, as opposed to limiting the supply options by restricting the supply procured by PECO to certain types. Through the procurement of full requirements supply products, PECO's plan is designed to ensure the least cost to customers because bidders compete based on the lowest price to satisfy all aspects of the default service customers' load requirements, including the portfolio management function. Suppliers of the full requirements products that PECO has proposed to solicit are free to procure the products and follow the procurement strategies that they believe will result in the least-cost full requirements supply, and they have the economic incentives to consider any supply opportunity that would allow them to offer a lower-priced bid and to satisfy their default service supply obligation at the lowest cost.

EJA Set VI

Response Date: April 22, 2024

EJA-VI-4

With reference to the Company's proposal for residential customer class procurement in DSP VI:

a. Please identify and explain the function of each specific measure designed to protect residential customers from market price volatility.
b. Please explain in detail why the Company believes these measures will in fact protect residential customers from market price volatility.
c. Please explain when and why the Company initially developed the contract laddering approach contained in DSP VI, including the evidence the Company relied upon in doing so.
d. Does the Company believe contract laddering is a necessary feature in the design of DSP VI? If yes, please explain why. If not, please explain why not.

RESPONSE:

a. See PECO Statement No. 3, Direct Testimony of Scott G. Fisher, at 4:7-9, 10:1-19, 29:13-30:8, 37:14-38:11, 40:7-41:7, 41:12-42:3, and footnote 45.

b. See the responses to a. and c.

c. Laddering of fixed-price full requirements ("FPFR") contracts has been a part of all of PECO's Commission-approved default service plans. In PECO's first Commission-

approved default service plan (Docket No. P-2008-2062739), the laddering entailed annual overlap of FPFR contract delivery periods for the Residential class. In PECO's second Commission-approved default service plan (Docket No. P-2012-2283641), the default service supply portfolios for Residential and Small Commercial customers transitioned to semiannual overlapping of FPFR contract delivery periods. Semiannual overlapping of Residential and Small Commercial FPFR contract delivery periods continued during PECO's third Commission-approved default service plan (Docket No. P-2014-2409362), fourth Commission-approved default service plan (Docket No. P-2016-2534980), and fifth Commission-approved default service plan (Docket No. P-2020-3019290). PECO is proposing to continue this approach in the instant docket for DSP VI.

PECO's laddering of FPFR contracts provides Residential and Small Commercial customers with greater assurances of price stability. By limiting the amount of FPFR supply that is replaced at any given time, the laddering of FPFR contracts smooths out supply cost fluctuations over time and it mitigates the impacts of adverse circumstances or market conditions at any given time, while still updating prices over time. See PECO Statement No. 3, Direct Testimony of Scott G. Fisher, at 29:13-30:8. In addition, by continuing the laddering of FPFR contract delivery periods beyond May 31, 2029 (the end of the DSP VI period), the laddered procurement cycle avoids subjecting Residential and Small Commercial customers to a "hard stop" with regard to their supply products, helping to avoid the magnified risks and rate instability that can accompany a need to replace a large portion of default service supply in a short period at the end of the DSP VI period. See PECO Statement No. 3, Direct Testimony of Scott G. Fisher, at 40:7-41:2.

Furthermore, in its Second Default Service Rulemaking Order, the Commission recognized the importance of laddering default service supply contracts and the benefits that contract laddering provides. The Commission observed, "The majority of responding parties were generally in favor of interpreting the 'prudent mix' as including diversification and accumulation of contracts that incorporates such concepts as laddering and dollar cost averaging." The Commission also stated, "We agree with those parties that utilizing such practices as laddering contracts, with varying procurement periods and contract durations over multiple procurements provide definite benefits in terms of minimizing the impacts of market volatility and decreasing customer risk." See Default Serv. and Retail Elec. Mkts., Docket No. L-2009-2095604 (Order entered Oct. 4, 2011) ("Second Default Service Rulemaking Order").

d. PECO is unaware of an explicit requirement to incorporate the laddering of FPFR contracts in the design of DSP VI. However, the laddering of FPFR contracts clearly is an important and proven feature of the default service supply portfolios of customer classes that rely more heavily on being provided price stability in their default service rates. See the response to c.

Responsible Witness: Scott G. Fisher

PECO Energy Company

Petition of PECO Energy Company for Approval of
Default Service Program

Docket No. P-2024-3046008

Response of PECO Energy Company
To Interrogatories of the
Energy Justice Advocates
EJA Set VI

Response Date: April 22, 2024

EJA-VI-5

Please refer to the Direct Testimony of Scott G. Fisher, at 5:13-6:10.

a. Please explain why PECO decided to phase out the block-and-spot aspect of its supply portfolio for residential customers, and please identify and provide all evidence PECO relied upon in doing so. Please provide any quantitative data in Excel format with cells unlocked, formulae intact, and all referenced data sources.
b. Please explain why PECO used spot market energy purchases "to cover the mismatches between the fixed quantities of block energy supply purchased and the 25% portion of the actual hourly load requirement" instead of purchasing a set amount of block energy and subtracting that from aggregate load of residential customers served by FPFR providers.
c. Please explain the Company's views on the advantages and disadvantages of purchasing a set amount of block energy and subtracting that from aggregate load of residential customers served by FPFR providers.

RESPONSE:

a. See Attachment EJA-VI-5(a.1), which is PECO Statement No. 3 in Docket No. P-2012-2283641. See Attachment EJA-VI-5(a.2), which contains the workpapers for PECO Statement No. 3 in Docket No. P-2012-2283641. See Attachment EJA-VI-5(a.3), which contains PECO Statement No. 3, Exhibit SGF-1R, and Exhibit SGF-2R in Docket No. P-2012-2283641. See Attachment EJA-VI-5(a.4), which contains the workpapers for PECO

Statement No. 3-R, Exhibit SGF-1R, and Exhibit SGF-2R in Docket No. P-2012-2283641. See Attachment EJA-VI-5(a.5), which is PECO Statement No. 3 in Docket No. P-2012-2283641. See Attachment EJA-VI-5(a.6), which contains the workpapers for PECO Statement No. 3 in Docket No. P-2012-2283641.

b. The use of spot market energy purchases to cover the mismatches between the fixed quantities of block energy supply purchased and the 25% portion of the actual hourly load requirement was the result of a Joint Petition for Settlement among multiple parties in Docket No. P-2008-2062739. See Attachment EJA-VI-5(b).

c. The relative merits would depend upon the specifics of the alternative approaches being compared but approaches that obligate FPFR suppliers to supply customers' load-following requirements net of non-load-following quantities of energy (e.g., block supply) could be expected to increase the FPFR suppliers' risks and thereby result in higher bid prices in the FPFR product solicitations. Furthermore, since block energy does not provide a fixed price for a constant share of load-following supply, block products may not provide the same price stability to customers as FPFR products. The injection of block products in a FPFR product portfolio could increase the uncertainty of the all-in default service supply cost on a dollars per megawatt hour (customer load) basis, resulting in unnecessary price risk for default service customers and possibly larger reconciliation amounts to be reflected in customer rates.

Furthermore, PECO's proposal in the instant proceeding to continue to directly solicit full requirements supply products (without the direct procurement of block energy products) does not preclude winning default service suppliers from utilizing other types of supply products, such as block energy products, to fulfill their default service supply obligation. PECO's reliance on full requirements supply products is especially conducive to innovation and competition with respect to all aspects of the electricity supply obligation, encouraging a wide range of supply options to be considered by the winning bidders to satisfy their full requirements obligation, as opposed to limiting the supply options by restricting the supply procured by PECO to certain types, such as block energy products. Through the procurement of full requirements supply products, PECO's plan is designed to ensure the least cost to customers because bidders compete based on the lowest price to satisfy all aspects of the default service customers' load requirements, including the portfolio management function. Suppliers of the full requirements products that PECO has proposed to solicit are free to procure the products and follow the procurement strategies that they believe will result in the least-cost full requirements supply, and they have the economic incentives to consider any supply opportunity that would allow them to offer a lower-priced bid and to satisfy their default service supply obligation at the lowest cost.

Petition of PECO Energy Company for Approval of
Default Service Program

Docket No. P-2024-3046008

Response of PECO Energy Company
To Interrogatories of the
Energy Justice Advocates
EJA Set VI

Response Date: April 22, 2024

EJA-VI-13

With reference to the Company's proposed procurement plan for DSP VI: Please explain whether PECO's "least cost" evaluation includes assessment of costs not directly reflected in fuel costs or prices (e.g., "externalities"), and the Company's rationale for inclusion or exclusion of such analysis.

RESPONSE:

The Commission has stated, "[The] 'least cost over time' standard should not be confused with the presumption that default prices will always equal the lowest cost price for power at any particular point in time. In implementing default service standards, the Commission must be concerned about rate stability as well as other considerations such as ensuring a 'prudent mix' of supply and ensuring safe and reliable service." Final Rulemaking Order, *Implementation of Act 129 of October 15, 2008*; Default Service and Retail Electric Markets, Docket No. L-2009-2095604 (Order entered Sept. 23, 2011), p. 40. The Commission has also attributed consideration of "price volatility, changes in generation supply, customer usage characteristics and the need to assure safe and reliable service" to a "prudent mix" of supply. Final Rulemaking Order, *Implementation of Act 129 of October 15, 2008*; Default Service and Retail Electric Markets, Docket No. L-2009-2095604 (Order entered Sept. 23, 2011), p. 38. PECO's procurement plan is designed to obtain a "prudent mix" of contracts at least cost in compliance with Commission-approved competitive processes. PECO considers all costs that are addressed by the Commission's Default Service Regulations and Policy Statement. See PECO's response to EJA-VI-12.

v.
PECO Energy Company

Petition of PECO Energy Company for Approval of
Default Service Program

Docket No. P-2024-3046008

Response of PECO Energy Company
To Interrogatories of the
Energy Justice Advocates
EJA Set VI

Response Date: April 22, 2024

EJA-VI-15

Please provide a detailed explanation of the Company's views on the following energy policy issues:

a. Does the Company consider climate change in its sustainability planning? If yes, please explain why and how. If not, please explain why not.
b. Does the Company consider its own greenhouse gas emissions in its sustainability planning? If yes, please explain why and how. If not, please explain why not.
c. Does the Company believe that the emission of greenhouse gases contributes to climate change? If yes, please explain why. If not, please explain why not.
d. Does the Company believe that the emission of greenhouse gases from fossil energy use for electricity generation contributes to climate change? If yes, please explain why. If not, please explain why not.
e. Does the Company believe that climate change will cause any harms to its infrastructure? If yes, please explain why. If not, please explain why not.
f. Does the Company believe that climate change will cause any harms to its customers? If yes, please explain why. If not, please explain why not.
g. Does the Company believe that climate change will cause any harms to natural resources in Pennsylvania? If yes, please explain why. If not, please explain why not.
h. Has the Company incorporated its views on climate change into the design of DSP VI? If yes, please explain how. If not, please explain why not.

RESPONSE:

a. Yes. Climate change is central to the Company's business and sustainability planning, including preparing for physical risks, the need to mitigate greenhouse gases, and leveraging opportunities offered by energy transmission. See pages 41-61 of Exelon's Sustainability Report, Attachment EJA-VI-15(a), describing Exelon's Climate Change Transition and Adaptation Plan.
b. Yes, the Company considers its own anthropogenic greenhouse gases (GHG) emissions in its sustainability reporting. Please refer to page 58 of Attachment EJA-VI-15(a) for more details.
c. Yes. PECO affirms the scientific consensus that increasing concentrations of GHG in the atmosphere cause climate change.
d. Yes. Refer to response c. above.
e. Yes. Exelon expects climate change to have both acute and chronic impacts on its infrastructure and is planning for such impacts. See Page 52 of Attachment EJA-VI-15(a). In addition, PECO has implemented initiatives to reduce operations driven emissions; some of these efforts include fleet electrification, increased focus on energy efficiency and clean sources of energy for our service buildings and investing in modernizing our infrastructure to reduce emissions and improve safety and reliability records. PECO's efforts to reduce its greenhouse gas reduction program is in alignment with the 2018 Pennsylvania Climate Action Plan goal of a 26% reduction in greenhouse emissions by 2025. PECO is planning to exceed this goal through the implementation of the 2030 Path to Clean initiative, which aims to reduce Exelon's operational emissions by 50% from 2015 to 2030. See PECO's Path to Clean Attachment, EJA-VI-15(e), with additional detail about the company's emission reduction goals and initiatives to mitigate climate change in support of our customers and communities.
f. Climate change is an urgent issue affecting our operations, customers, communities, shareholders, and other stakeholders. Climate change has the potential to impact all of us.
g. Climate change is an urgent issue affecting our operations, customers, communities, shareholders, and other stakeholders. Climate change has the potential to cause harm to natural resources.
h. Yes. As stated in PECO Statement No. 1, Direct Testimony of Sulma Dalessio, pp. 25-27, PECO's proposed DSP VI incorporates the Alternative Energy Portfolio Standards Act ("AEPS Act"), which establishes the alternative energy portfolio standard for Pennsylvania. (66 Pa.C.S. § 2807(e)(3.5)), and DSP VI has the flexibility to incorporate future changes in the AEPS Act.

Petition of PECO Energy Company for Approval of
Default Service Program

Docket No. P-2024-3046008

Response of PECO Energy Company
To Interrogatories of the
Office of Consumer Advocate
OCA Set I

Response Date: March 25, 2024

OCA-I-8

Has PECO undertaken any analysis of the frequency in which Standard Offer Referral program customers return to Default Service during or at the end of their 12-month fixed price contract with the EGS? If so, provide this information.

RESPONSE:

PECO has not undertaken any analysis of the frequency in which Standard Offer Referral program customers return to Default Service during or at the end of their 12-month fixed price contract with the EGS.

To Interrogatories of the
Office of Consumer Advocate
OCA Set II

Response Date: April 05, 2024

OCA-II-14

Referencing page 6, line 15 through page 7, line 4. Please provide:

a. Monthly over/under collections for the residential class since the start of DSP V through the most recent month available.
b. A breakdown of monthly (if not available, quarterly or semi-annual) over/under collections for the residential class into (i) the difference between actual and projected supply costs, and (ii) billing cycle lag, for the same time period as in (a) above.
c. Residential E-Factor rates since the start of DSP IV.

RESPONSE:

a. Refer to Attachment OCA-II-14(a).

b. Refer to Attachment OCA-II-14(b).

c. Refer to Attachment OCA-II-14(c).

Pennsylvania Public Utility Commission
v.
PECO Energy Company

Petition of PECO Energy Company for Approval of
Default Service Program

Docket No. P-2024-3046008

Response of PECO Energy Company
To Interrogatories of the
Energy Justice Advocates
EJA Set V

Response Date: April 15, 2024

EJA-V-1

Please refer to the Company's response to EJA-III-11. The contract attached as Attachment EJA-III-11(a) states that it will continue until June 30, 2001 unless it is renewed.

a. Please confirm that this contract contains a complete statement of all the terms under which PECO received its hydropower allocation during DSP V. If the answer is no, please provide copies of all documents that contain any information relating to the terms under which PECO received its hydropower allocation during DSP V, including but not limited to price, quantity, and terms of conditions.
b. Has the referenced contract been renewed, otherwise extended, or replaced or superseded by a subsequent agreement?
c. If yes, please explain the terms of any renewal or extension or replacement or supercession, and please provide copies of all documents relating to any renewal or extension or replacement or supersession.
d. If no, please explain.

RESPONSE:

a. The contract attached as EJA-III-11(a) contains a complete statement of all the terms under which PECO received its hydropower allocation during DSP V.
b. No.
c. N/A.
d. PECO has not received a new contract from Allegheny Energy.

Responsible Witness: Sulma Dalessio

Pennsylvania Public Utility Commission
v.
PECO Energy Company

Petition of PECO Energy Company for Approval of
Default Service Program

Docket No. P-2024-3046008

Response of PECO Energy Company
To Interrogatories of the
Energy Justice Advocates
EJA Set V

Response Date: April 17, 2024

EJA-V-2

Please refer to the Company's response to EJA-III-11, which provides: "PECO met the capacity and ancillary services requirements associated with the electricity supply sourced from the hydropower allocation through PJM."

a. Please describe in detail the steps PECO took in order to meet the referenced capacity requirements through PJM for DSP V.
b. Please identify which PJM market PECO obtained the referenced capacity from.
c. Please identify the PECO personnel who had a material role in obtaining the referenced capacity and please explain the tasks accomplished by each person.
d. Please identify the dates on which PECO obtained the capacity used to meet the referenced capacity requirements through PJM for DSP V.
e. Please identify the cost of the referenced capacity obtained by PECO in $/MWh for each month of DSP V.
f. Please provide all documents (including but not limited to contracts or agreements) that contain any information relating to how PECO met the referenced capacity requirements during DSP V, including but not limited to information concerning price, source, or other terms.
g. Since PECO's Supply Master Agreement for DSP V provides that PECO receives both energy and capacity under its contract with Allegheny Electric Cooperative, would it be accurate to say that PECO met the capacity requirements associated with serving load using electricity sourced from the hydropower allocation under the Allegheny Electric Cooperative contract through PJM and also by using capacity obtained under the Allegheny Electric Cooperative contract? If yes, please explain

how much capacity was obtained and at what cost under the contract versus how much was obtained from PJM (on a monthly, yearly, and total to date basis). If not, please explain why not.

RESPONSE:

a. To meet the referenced capacity requirement, PECO calculates and uploads onto PJM Capacity Exchange the daily capacity residential default supply requirement.
b. PECO obtained the referenced capacity from the PJM Capacity Exchange.
c. A PECO Energy Acquisition Analyst uploads the capacity residential default service load into the PJM capacity exchange.
d. This process is completed daily according to PJM business calendar days.
e. See Attachment EJA-V-2(e).
f. There are no contracts or agreements in place to meet the capacity requirement.
g. See PECO's responses to EJA-V-2(a) and EJA-V-2(e).

EJA Set V

Response Date: April 17, 2024

EJA-V-3

Please refer to the Company's response to EJA-III-11, which provides: "PECO met the capacity and ancillary services requirements associated with the electricity supply sourced from the hydropower allocation through PJM."

a. Please describe in detail the steps PECO took in order to meet the referenced ancillary services requirements through PJM for DSP V.
a. Please identify which PJM market PECO obtained the referenced ancillary services from.
b. Please identify the PECO personnel who had a material role in obtaining the referenced ancillary services and please explain the tasks accomplished by each person.
c. Please identify the dates on which PECO obtained the ancillary services used to meet the referenced ancillary services requirements through PJM for DSP V.
d. Please identify the cost of the referenced ancillary services obtained by PECO in $/MWh for each month of DSP V.
e. Please provide all documents (including but not limited to contracts or agreements) that contain any information relating to how PECO met the referenced ancillary services requirements during DSP V, including but not limited to information concerning price, source, or other terms.

RESPONSE:

a. PECO uploads hourly schedules to PJM each day under PECO's NYPA subaccount. PJM computes the ancillary services based on the load obligation, similar to how PJM reconciles load with an Electric Generation Service provider. PECO receives an invoice from PJM each month for credit and payment which includes the cost for ancillary services. No additional steps are needed in order to meet the referenced ancillary services
b. See Attachment EJA-V-3(b) for a sample invoice from February 2024 listing PJM ancillary services for the NYPA subaccount.
c. PECO does not have a material role. PECO pays the bill in the normal course for ancillary services provided by PJM.
d. Refer to PECO's response to part a.
e. See Attachment EJA-V-3(e).
f. There are no additional contracts or agreements.

EJA-V-4

Please refer to the Company's response to EJA-III-11, which provides: "For Tier 1 non-solar and Tier 2 requirements, PECO procured credits on the open market."

a. Please describe in detail the steps PECO took in order to meet the referenced Tier 1 and Tier 2 AEC requirements during DSP V.
b. Please identify which market or markets PECO obtained the referenced Tier 1 and Tier 2 AECs from.
c. Please identify the PECO personnel who had a material role in obtaining the referenced Tier 1 and Tier 2 AECs and please explain the tasks accomplished by each person.
d. Please identify the dates on which PECO obtained the Tier 1 and Tier 2 AECs used to meet the referenced Tier 1 and Tier 2 AEC requirements for DSP V.
e. Please identify the cost of the referenced Tier 1 and Tier 2 AECs obtained by PECO in $/MWh for each month of DSP V.
f. Please provide all documents (including but not limited to contracts or agreements) that contain any information relating to how PECO met the referenced Tier 1 and Tier 2 AEC requirements during DSP V, including but not limited to information concerning price, source, or other terms.

RESPONSE:

a. Please see the steps below describing the process to meet the Tier 1 and Tier 2 requirements:
   - AEC requirements are calculated based on retail load delivered to PECO customers. Yearly AEPS compliance is based on PJM settlements data for all but the last month of the PJM year which uses back cast data.
   - In the July timeframe each year, PECO receives a letter from the PA AEPS state administrator stating PECO's default supply AEPS obligation for the prior PJM year.
   - PECO validates the quantities to confirm that PECO is in agreement with the AEC requirement provided by the PA AEPS Administrator.
   - PECO then allocates each supplier's obligation based on the load by that supplier by month and then notifies each supplier.
   - For the PECO spot portion, and for the NYPA portion, PECO interacts with brokers and aggregators to procure AECs to meet the AEC requirements.
   - PECO maintains a forecast throughout the year and will periodically procure before the end of the PJM year if deemed necessary.

b. PECO purchased qualifying AECs from several brokers and aggregators.

c. An analyst in Energy Acquisition Wholesale Billing and Credit is responsible for performing the above-described functions.

d. PECO purchases its AEC obligations for PECO-NYPA and the PECO spot market portion simultaneously. PECO does not attribute distinct credits to specific load the below dates reflect all AEC spot market purchases. The dates of the purchases were:
   - For PJM reporting year 2022 (June 1, 2021-May 31, 2022) PECO purchased Tier 1 and Tier 2 AECs on 7/7/2022 and on 8/17/2022.
   - For PJM reporting year 2023 (June 1, 2022-May 31, 2023) PECO purchased Tier 1 and Tier 2 AECs on 2/9/2023, 2/10/2023, 2/15/2023, 2/16/2023, 3/10/2023, 3/15/2023, 3/17/2023, 3/28/2023, 4/19/2023, 4/20/2023, 5/02/2023, 5/09/2023, and 5/12/2023.
   - PECO has not procured credits for the 2023/2024 PJM year as of 4/12/2024.

e.

	Weighted Avg Cost AEC purchase for RY 2022/MWh	Weighted Avg Cost AEC purchase for RY 2023/MWh
Tier 1 non-solar	$1.77	$2.19
Tier 1 solar	$0.22	$0.25
Tier 2	$0.98	$2.29

EJA-V-5

Please refer to the Company's response to EJA-III-11, which provides: "PECO met the capacity and ancillary services requirements associated with the electricity supply sourced from the hydropower allocation through PJM." Did PECO obtain any other services or products (other than capacity, ancillary services, and AECs) in connection with meeting the full requirements needed to serve residential default service load using the referenced electricity supply from the hydropower allocation during DSP V? If the answer is yes, please list and describe each service or product, and for each such service or product, please separately answer the below subquestions. If the answer is no, please explain why not.

a. Please describe in detail the steps PECO took in order to obtain the service or product.
a. Please identify which market PECO obtained the service or product from.
b. Please identify the PECO personnel who had a material role in obtaining the service or product and please explain the tasks accomplished by each person.
c. Please identify the dates on which PECO obtained the service or product.
d. Please identify the cost of the service or product obtained by PECO in $/MWh for each month of DSP V.
e. Please provide all documents (including but not limited to contracts or agreements) that contain any information relating to how PECO obtained the service or product during DSP V, including but not limited to information concerning price, source, or other terms.

RESPONSE:

See PECO's responses to EJA-V-2 and EJA-V-3. In addition, PECO does procure some additional products as shown on the PJM invoices included in response to EJA-V-3 and can receive associated credits (including for excess energy received from NYPA) that are passed on to customers. PECO's responses to EJA-V-3(a)-(e), with respect to ancillary services, apply to the additional products procured from PJM.

Docket No. P-2024-3046008

Response of PECO Energy Company
To Interrogatories of the
Energy Justice Advocates
EJA Set VI

Response Date: April 22, 2024

EJA-VI-16

Please refer to the Company's response to OCA-II-4.

a. Please define "energy settlement process with PJM," and please explain in detail each step of that process.
b. Please define "procured automatically," and please explain in detail how such automatic procurement occurs.

RESPONSE:

a. By "energy settlement process with PJM," PECO is referencing the two-step process by which PECO settles hourly load obligations with PJM.
   - **Settlement A** – PECO determines the estimated (delivery day) hourly load responsibility by recreating the load characteristics of the delivery day in question using a combination of available known, preliminary, and historically-based information. PECO then submits the load responsibility to the wholesale default service suppliers serving load on the settled day to PJM in accordance with PJM procedural requirements and energy market schedules.
   - **Settlement B** – PECO determines the final hourly load responsibility 60 days after the end of the energy delivery month by reconciling actual individual customer meter readings and applicable dynamic load profile data with the Settlement A data for that month. PECO then calculates and submits the energy variances from Settlement A

hourly scheduling in aggregate for all Suppliers and PJM Contract Numbers to PJM in accordance with PJM procedural requirements and energy market schedules.

b. Refer to PECO's response to EJA-VI-17 for additional details related to the steps PECO takes to procure the one percent spot market purchases as part of the overall residential default service supply portfolio. The steps associated with this procurement are required to complete the PJM settlement process.

EJA Set VI

Response Date: April 22, 2024

EJA-VI-17

With reference to the Company's use of spot market purchases to meet 1% of residential customer class load in DSP V: Please identify each service or products (including but not limited to energy, capacity, ancillary services, and AECs) the Company obtained in connection with meeting the full requirements needed to serve that residential default service load during DSP V? Please list and describe each service or product, and for each such service or product, please separately answer the below subquestions.

a. Please describe in detail the steps PECO took in order to obtain the service or product.
b. Please identify which market PECO obtained the service or product from.
c. Please identify the PECO personnel who had a material role in obtaining the service or product and please explain the tasks accomplished by each person.
d. Please identify the dates on which PECO obtained the service or product.
e. Please identify the cost of the service or product obtained by PECO in $/MWh for each month of DSP V.
f. Please provide all documents (including but not limited to contracts or agreements) that contain any information relating to how PECO obtained the service or product during DSP V, including but not limited to information concerning price, source, or other terms.

RESPONSE:

Below are the steps taken by to meet the 1% residential customer class load in DSP V. The products and services associated with this customer load include: Energy, Capacity, Ancillary Services, Alternative Energy Credits (AECs), and Auction Revenue Rights (ARRs).

To procure the Energy portion:

a. A PECO Energy Acquisition analyst uploads hourly schedules to PJM each day under a subaccount denominated as PECO's PERESH.
b. Based on the above uploaded data, PECO obtains the referenced Energy from PJM
c. A PECO Energy Acquisition Analyst uploads the scheduled residential default service energy into the PECO PERESH subaccount.
d. Steps a. to c. are completed daily according to PJM business calendar days.
e. Please refer to the Company's response to EJA-I-7(a.2), "PECO A-S vs ATC".
f. See Confidential Attachment EJA-VI-17(f).

To meet the Capacity requirement:

a. A PECO Energy Acquisition Analyst calculates and uploads onto PJM Capacity Exchange the daily capacity residential default supply requirement. PECO obtains the referenced capacity from the PJM Capacity Exchange.
b. PECO obtains the Capacity from the PJM Capacity Exchange.
c. See response to EJA-VI-17 (a).
d. This process is completed daily according to PJM business calendar days.
e. Please refer to the Company's response to EJA-I-7(a.2), "PECO A-S vs ATC".
f. See Confidential Attachment EJA-VI-17(f).

To meet the Ancillary Services requirement:

a. PECO uploads hourly schedules to PJM each day under PECO's PERESH subaccount. PJM computes the ancillary services based on the load obligation.
b. See response to EJA-VI-17 (a).
c. See response to EJA-VI-17 (a).
d. This process is completed daily according to PJM business calendar days.
e. Please refer to the Company's response to EJA-I-7(a.2), "PECO A-S vs ATC".
f. See Confidential Attachment EJA-VI-17(f).

To meet the Alternative Energy Credits requirement, the steps are described in response to EJA-V-4.

To meet the Auction Revenue Rights ("ARRs") requirement:

a. Each spring of the PJM year, PJM performs the Auction Revenue Rights process in which PECO participates.
b. PECO obtains the referenced ARRs from the PJM ARR/FTR Center.
c. A PECO Energy Acquisition Analyst is responsible for submitting the bids on auction day. PECO contracts with a consultant to perform the path analysis and make a recommendation in the auction.
d. Please refer to PJM website for ARR dates.
e. Please refer to the Company's response to EJA-I-7(a.2), "PECO A-S vs ATC".
f. See Attachment Confidential Attachment EJA-VI-17(f).

ATTACHMENTEJA-VI-17(f) IS CONFIDENTIAL AND IS PROVIDED ONLY TO THOSE WHO HAVE EXECUTED NON-DISCLOSURE AGREEMENTS UNDER THE PROTECTIVE ORDER.

PECO Energy Company

Petition of PECO Energy Company for Approval of
Default Service Program

Docket No. P-2024-3046008

Response of PECO Energy Company
To Interrogatories of the
Office of Consumer Advocate
OCA Set II

Response Date: April 05, 2024

OCA-II-4

Referencing page 14, lines 16 through 18. Please explain the rationale underlying the use of one percent spot market purchases as part of the overall residential default service supply portfolio.

RESPONSE:

The one percent of spot energy supply has little effect on the price of default service for residential customers, while the elimination of this spot energy component would actually add significant costs for default service customers.

Under PECO's existing default service program, each full requirements supplier provides supply for a specified percentage of default service for each customer class based on a defined percentage (a "tranche") times the number of tranches won in the competitive procurement process. When PECO initially designed this program in DSP I, the tranche size was set to equal 1.6% of the default service load that must be served with full requirements products for a portion of the residential procurement class, which also received additional "block" and spot energy supply. Over multiple DSP programs, the tranche size has remained the same while the portion of residential default service supply served by full requirements products has increased as agreements for block supply were eliminated. In DSP VI, PECO is proposing to continue to utilize the maximum number of tranches to provide full requirements supply for residential customers (62 tranches x 1.6% = 99.2% of residential default service load). The current minimal spot energy component, which is procured automatically as part of the energy settlement process with PJM without additional administrative expense, ensures that the total energy procured by PECO from wholesale suppliers and delivered to customers "adds up" to one hundred percent.

Changing the tranche size at this time would require PECO to develop and implement a transition in which it operates with two different tranche sizes, one for suppliers with existing contracts under the original tranche size and one for suppliers with new contracts that have a different tranche size. In addition, PECO would incur new information technology expense associated with changes to the IT system it uses to allocate PECO zone energy responsibilities to EGSs and default service procurement group wholesale suppliers. In light of these additional expenses, PECO is proposing to maintain the one percent of spot supply in the residential class products for DSP VI. As part of the settlement of PECO's DSP V proceeding, the OCA's Statement in Support expressed a similar sentiment:

> In the Company's Rebuttal Testimony, Company witness McCawley explained that eliminating the spot purchase would result in significant costs for default service customers due to having to employ two tranche sizes -- the traditional size used in prior DSPs and another reflecting the additional purchases necessary to replace the spot purchase. In addition, there would be added information technology expenses to accommodate moving to two tranche sizes. PECO St. 1-R at 21. In view of these complications and potentially significant additional costs, the OCA is satisfied that it is in the best interest of residential customers to retain the 1% spot purchase within the residential procurement portfolio.

See Petition of PECO Energy Co. for Approval of its Default Service Program for the Period from June 1, 2021 through May 21, 2025, Docket No. P-2020-3019290, Joint Petition for Partial Settlement, Appendix B, Statement in Support of the Office of Consumer Advocate at 4 (Aug. 13, 2020).

Exhibit KR-4:

Eugene A. Depasquale, Climate Crisis: T*he Rising Cost of Inaction, Office of the Auditor General* (Nov. 13, 2019)

CLIMATE CRISIS

The Rising Cost of Inaction

A special report by Pennsylvania Auditor General

EUGENE A. DEPASQUALE

Dear fellow Pennsylvanians,

You have a right to clean air, clean water and preservation of the environment around you.

The state Constitution guarantees these rights, and it establishes the commonwealth as the trustee of those public natural resources.

But protecting natural resources comes at a cost – and, as our climate changes and extreme weather happens more frequently, that cost will continue to climb. In 2018 alone, climate-related costs to Pennsylvania totaled at least $261 million; that number includes the record-breaking floods and landslides that caused over $125.7 million in infrastructure damage. Severe weather has also caused deaths, property damage and loss of livelihood.[1]

Your tax dollars will increasingly be spent to clean up after such disasters if state government does not step up now and limit our contribution to the climate crisis. Instead of reacting only after a weather crisis, Pennsylvania's leaders should be proactively seeking to mitigate the effects of coming storms, prioritizing actions that create family-sustaining jobs in fields such as construction and civil engineering. It is a simple fact that every $1 spent on preventing natural disaster damage saves $6 in recovery costs.[2]

Scientists agree that fossil fuels, which have helped fuel Pennsylvania's economy for more than 200 years, emit harmful greenhouse gases that are changing the climate. Pennsylvania is, in fact, one of the top greenhouse gas emitters, ranking fourth in the nation in 2016.[3]

Other states have taken significant steps to lower their greenhouse gas emissions. Most of our neighbors have taken steps to limit power plant emissions, and others have set ambitious goals for renewable energy production and energy-efficiency measures. Pennsylvania lags behind these efforts.

It is clear that the federal government will not direct action on the climate crisis. It has, in fact, taken steps backward, by gutting the federal Environmental Protection Agency and ignoring air pollution violations.

This special report discusses Pennsylvania's current plans to address climate change and how effectively they are being implemented. My team and I spoke with more than 70 environmental experts, including Department of Environmental Protection (DEP) staff, members of DEP's Climate Change Advisory Committee, county professionals, consultants, respected climate researchers and advocates. We read DEP's publicly released plans. We reviewed Gov. Tom Wolf's January 2019 executive order on the environment, and we looked at the past to understand the laws and actions shaping current policy.

In addition to three observations, this special report offers nine recommendations for how state and local officials can take action to minimize the fiscal impact of extreme weather resulting from climate change.

Without leadership at the state and local levels, the costs from climate change grow catastrophically. We must act now to save lives and money in the future – and to preserve our natural resources for ourselves and for future generations.

Thank you for the opportunity to serve you.

Sincerely,

Eugene A. DePasquale

BACKGROUND

WHAT IS GLOBAL CLIMATE CHANGE?

Heavy, sudden downpours. Extended heat waves. Stretches of warm weather in deep winter.

For Pennsylvania, this is what climate change looks like. These effects are happening now: For example, the 48 months between June 2015 and June 2019 were officially the wettest period in Pennsylvania's history[4], and Pennsylvania's five warmest summers on record have occurred in the last five years.[5]

What's happening in Pennsylvania is only one small piece of the U.S. and worldwide impact:

> "Observations unequivocally show that climate is changing. … These emissions come mainly from burning coal, oil, and gas, with additional contributions from forest clearing and some agricultural practices."[6]

The Intergovernmental Panel on Climate Change (IPCC), the United Nations body that assesses the science related to climate change, said in a policy brief issued in 2018 that "human activities are estimated to have caused approximately 1.0° Celsius of global warming above pre-industrial levels … (which) is likely to reach 1.5° Celsius between 2030 and 2052 if it continues to increase at the current rate."[7]

It is the world's challenge: Work together to slow climate change, and limit the temperature increase to 1.5°C instead of 2°C.

A 1°C change is equivalent to 1.8° Fahrenheit, so limiting the overall temperature increase to roughly 2.7° F instead of 3.6° F might seem like an incremental difference – but that difference would be catastrophic.

The 1.5°C change over pre-industrial levels will bring about challenging changes to global weather, with increases in temperature extremes, heavy precipitation in some regions (such as Pennsylvania) and increased drought in others. Sea levels will increase, natural habitats will shrink, and polar ice caps will melt. But a 1.5°C change is more adaptable than a 2°C change.[8]

Severe thunderstorms. Record-breaking periods of high rainfalls and unseasonable weather.

At a 2°C change, sea levels will rise and swamp coastal cities; biodiversity and ecosystems will face extreme degradation; and decreased food production will create dire conditions for many regions.[9]

Managing climate change means that humans must reduce their greenhouse gas emissions. Greenhouse gases are those gases that absorb infrared radiation, trapping heat in the Earth's atmosphere. According to the federal Environmental Protection Agency (EPA), the top four most abundant greenhouse gases in the atmosphere are:

- carbon dioxide,
- methane,
- nitrous oxide, and
- fluorinated gases such as hydrofluorocarbons (HFCs or HCFCs).[10]

In addition to carbon dioxide, methane is of particular concern in Pennsylvania. It is the product of hydraulic fracturing, also known as fracking, which has led to the natural gas boom in the commonwealth. While methane is the product, it also leaks into the atmosphere throughout the life cycle of fracking extraction and distribution. Methane also is produced by many traditional farming practices.

Broadly speaking, the effects of climate change in Pennsylvania will touch every aspect of the economy and every community in a multitude of ways. For this report, we will look at two categories: public health and safety factors, and economic factors. Some issues, such as flooding, touch both categories but will be discussed here in only one area. Regardless of how the effects are broken down, adapting to climate change will be expensive: from increased health care costs to increased electricity usage for cooling and recovery from severe weather. On the other hand, according to the National Institute of Building Sciences, every $1 in natural disaster mitigation spending saves $6 in recovery costs.

Public Health and Safety

FLOODING

Flooding can be extremely destructive to property, and it can cause death and disease – and Pennsylvania is one of the most flood-prone states in the contiguous United States.

Pennsylvania's many thousands of miles of rivers and streams are part of what makes it so flood-prone. Heavier rains, combined with increased development and overdue upgrades of stormwater systems, have created an extremely high-risk environment for many communities.

Flooding is disastrous for a community's social and economic well-being. Repeated flooding can ruin a community's tax base as property values decrease and businesses close, creating a negative cycle where local governments are less capable of recovering from a flood due to decreasing resources.

Some of the hardest-hit areas already are home to the most vulnerable residents, who are less able to effectively recover. For example, people living in poverty are at increased risk, as they disproportionately reside in flood-prone areas due to lower property values in those areas. Individuals living in poverty are less able to recover from a flood and have higher post-flood impacts.[11] Additionally, renters are particularly vulnerable, as they are less likely to carry flood insurance and can be trapped in a flood-damaged and potentially mold-filled home if their landlords refuse to release them from their leases.[12]

The impact of flooding can disparately affect people with decreased mobility, such as those without personal vehicles and people with disabilities. Older adults are more likely to sustain physical or mental harm due to flooding, including an increased risk of death.[13]

[13] https://19january2017snapshot.epa.gov/sites/production/files/2016-10/documents/older-adults-health-climate-change-large-fonts_0.pdf

The increasing risk of flooding, landslides and land subsidence that heavy rainfall poses to pipelines and natural gas infrastructure led the federal Pipeline and Hazardous Materials Safety Administration to issue a warning to pipeline operators to follow best monitoring practices to reduce the risks of explosions and leaks. For example, in 2016 a pipeline leak caused by flooding in Lycoming County released over 50,000 gallons of gasoline into Loyalsock Creek. While the pipeline operator Sunoco was responsible for repairs and clean up, state agencies and local officials had to provide staff for local support efforts. In 2018, a landslide triggered a natural gas pipeline explosion in Beaver County. The blast destroyed a home and led to the temporary closure of a local school and nearby highway.

Certain kinds of sewer overflow systems in cities such as Pittsburgh, Harrisburg, Johnstown and Philadelphia flush untreated human waste into the rivers along with stormwater during heavy rainfalls, creating dangerous disease risks to residents. These old systems are currently in violation of the federal Clean Water Act, and while they are under consent decrees managing their upgrade plans with the U.S. Environmental Protection Agency, major changes to these systems are expensive and slow. The repairs will be paid for by customers – the homeowners, renters and businesses — of the utilities that operate the sewer systems. But until these systems undergo major upgrades, storms with heavy rainfall will continue to push untreated sewage into local waterways.

A sinking airport

Most flooding in Pennsylvania is occurs along rivers, creeks or streams. However, the Delaware River is affected by both sea level rise and storm surges, which will have costly and potentially dangerous impacts in southeast Pennsylvania, especially in Philadelphia.

Data presented to the Philadelphia Mayor's Office in 2014 suggested that the estimated sea level rise in the Philadelphia area could be as much as 20 inches higher by the 2040s.

Sea level rise, combined with storm surges, could cause between $90 million and $900 million in damages citywide, depending on severity and flood level, according to the City of Philadelphia.

In addition, parts of the Philadelphia International Airport, a major international transportation hub, are situated mere feet above sea level. Much of its infrastructure, including terminals and electric substations, are at risk from flooding.

The City of Philadelphia outlined these risks in its "Growing Stronger Toward a Climate-Ready Philadelphia" report, but the report notes many of the risk-mitigation steps have not yet been taken.

[14] Phillips, Susan. StateImpact PA. *"Federal pipeline safety regulators issue warning on floods and subsidence."* Published May 21, 2019. https://stateimpact.npr.org/pennsylvania/2019/05/21/federal-pipeline-safety-regulators-issue-warning-on-floods-and-subsidence/. Accessed July 25, 2019.

Air Quality

Pollutants from burning fossil fuels and rising temperatures will compound already-worsening air pollution.[15] Infants, children, adults with chronic upper respiratory disease or heart disease, and people who are economically disadvantaged are most at risk of harm from air pollution.[16]

Philadelphia experienced an increasing number of Ozone Action Days between 2014 and 2016, and several Pennsylvania cities suffer from a high level of year-round particulate pollution, which is caused by coal-fired power plants and diesel emissions.[17]

Increased numbers of Ozone Action Days and higher particulate levels are associated with an increase in asthma and other upper respiratory diseases. A recent study found the annual per-person cost of asthma was over $3,000, including prescriptions, emergency room visits and outpatient visits.[18] The American Lung Association reports that there are over 1.2 million individuals with asthma in PA,[19] and the rate of respiratory illnesses may increase by 10-14 percent by 2050 due to climate change.[20] Air quality has improved since the 1970 passage of and 1990 revisions to the Clean Air Act, when the most effective improvements were implemented, dramatically reducing the rates of illness and death caused by particulate pollution and ozone. However, in Pennsylvania, air pollution still leads to preventable illnesses and death, with rates potentially increasing with climate change.

Pennsylvania could have avoided 400 deaths and more than 750 illnesses in 2017 alone if levels of particulate and ozone pollution had been lower, according to New York University's Marron Institute of Urban Management.[21]

Pollen is another cause of air-related illnesses, including asthma, and with higher temperatures and longer growing seasons, the incidences of pollen-related allergic reactions and emergency room visits is expected to rise.[22]

Heat

Prolonged heat can be especially dangerous to people who are old, very young and/or sick, especially for those without access to air conditioning or cooling centers.

In Pennsylvania, heat is the most common cause of death among weather-related fatalities over the last 30 years.[23] Over the past 10 years, Pennsylvania has recorded at least two deaths due to heat per year, except in 2014 and 2017. In four of those years, more than 15 people died because of heat.[24]

Periods of extreme heat can lead to higher utility costs and stress the electrical grid, which can lead to regional or localized brownouts.[25] This can create dangerously hot conditions for those at home, as well as hurting the bottom line for affected businesses which close for the duration of the outage. Residents who can afford to run their air conditioners pay more in their electric bills, while Pennsylvanians who do not have access to a home air conditioner, or who own one but cannot afford the additional expense, face greater risks of harm from high heat. The Philadelphia Department of Health reported that the temperature in its urban areas can be as much as 20 degrees higher than temperatures in rural and suburban areas. Known as the heat island effect, the higher urban temperatures occur because buildings and pavement absorb heat, plus cars and air conditioning units release heat back into the atmosphere, among other factors.

"Climate change undermines the social and environmental determinants of health, including people's access to clean air, safe drinking water, sufficient food and secure shelter."

For the city of Philadelphia, the costs of keeping cool will be high:

- ◊ up to $1 million in increased annual electricity costs from higher demand for air conditioning in municipal buildings, and
- ◊ a potential tripling of the current $20,000 cost of Heatline, a city-run phone service that advises residents how to stay cool and refers those in need to emergency services.[26]

High heat affects children in schools without air conditioning. A 2018 study found that cumulative heat exposure reduces academic achievement, and that air conditioning in schools mitigates that reduction.[27] In Pennsylvania, school officials in buildings lacking air conditioning will dismiss children early on the hottest days, causing education disruptions and challenges for working parents.[28]

Some districts have analyzed the costs to upgrade building infrastructure for air conditioning installation. The costs are higher in lower-income districts and where older buildings have outdated electrical infrastructure:

- ◊ Pittsburgh Public Schools: up to $100 million[29]
- ◊ Philadelphia Schools: $145 million[30]
- ◊ Reading: $11 million to $24 million for one middle school building[31]

Disease

Diseases carried by ticks and mosquitoes are on the rise, and several of these diseases have no known treatments or cures and can lead to lifelong illness or death.

For example, Pennsylvania leads the nation in cases of Lyme disease[32], which is carried by certain ticks. There were 11,900 cases of Lyme reported in Pennsylvania in 2017, which was more than double the number of cases in 2013.[33]

The costs of treating Lyme disease are high, and 10 to 20 percent of people with the disease experience persistent symptoms after initial treatment.[34] In Pennsylvania's 2018-19 budget, $2.5 million was allocated to a program to increase and improve Lyme disease surveillance, outreach and research; in the 2019-20 budget, it was increased to $3 million.[35]

Other tick-borne diseases are also being found in Pennsylvania because of warmer winters.[36] Among the newcomers is the Lone Star tick, which can carry a disease that causes flu-like symptoms and an allergic reaction to red meat.

Mosquito-borne diseases are also creating increased risk. For example, instances of West Nile Virus increased 550 percent in Pennsylvania, from 20 cases in 2017 to 130 in 2018.[37] This virus has no medications to treat it or vaccines to prevent it. The 2018-19 budget included a small increase to the $5.4 million allocated to manage a mosquito control and surveillance program.[38]

Equity Issues

Climate change will exacerbate already existing health and safety disparities, experts said.

For example, almost 33 percent of the state's population is located in Environmental Justice Areas, which DEP's Office of Environmental Justice defines as communities with populations that are 30 percent people of color and/or 20 percent low-income.[39] Climate change will affect this population in disproportionate ways, as these communities are already struggling with decreased access to health care, worse air quality and less-resilient housing options.

Climate action on the state level must take these disparities into account and ensure that any actions help overcome the inequality and resolve environmental injustices.

Individuals in these communities are also less likely to carry flood or renters insurance, meaning recovery from floods will be more difficult and costly, if not impossible.

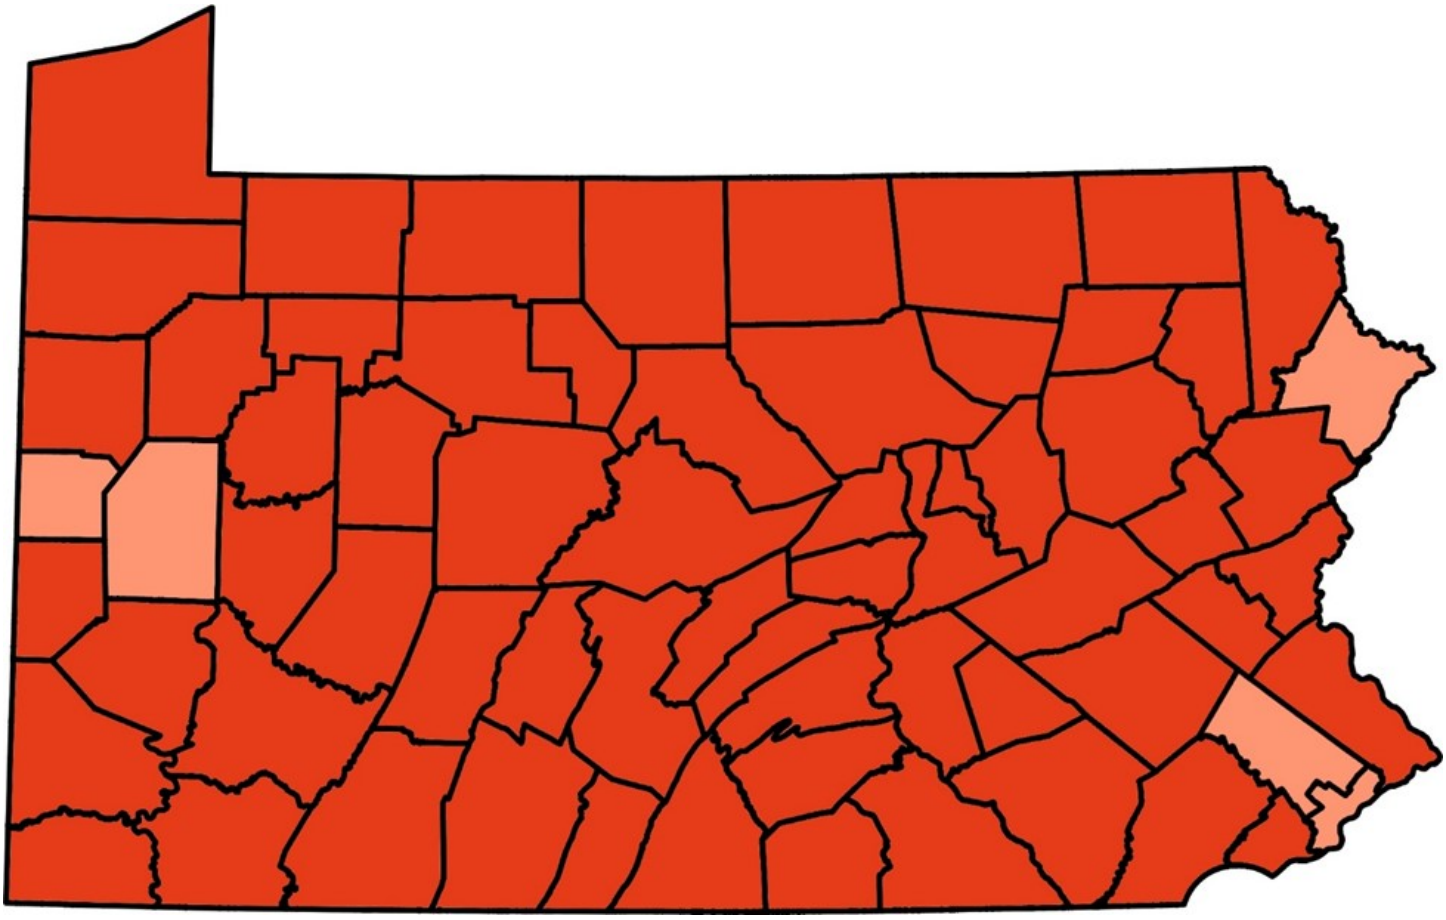
[39] Office of Environmental Justice, Pennsylvania Department of Environmental Protection testimony presented by Allison Acevedo on May 13, 2019, at Widener University.

Agriculture

Pennsylvania has more than 53,000 farms that created nearly $8 billion in goods sold in 2017.[40]

Farms are already enduring climate change effects, including temperature swings, heavy rains, more flooding, and changing and increasing pests.

2018's historic wet season led to the U.S. Department of Agriculture (USDA) designating 62 Pennsylvania counties as having suffered natural disasters, which allowed farmers in those counties to apply for emergency financial assistance to help with disaster recovery[41]:



This designation included major agricultural counties like Lancaster, Chester and York.

[40] U.S. Department of Agriculture. *"2017 Census of Agriculture: Pennsylvania State Profile."* https://www.nass.usda.gov/Publications/AgCensus/2017/Online_Resources/County_Profiles/Pennsylvania/cp99042.pdf. Accessed July 25, 2019.
[41] U.S. Department of Agriculture. *"USDA Designates 33 Pennsylvania Counties as Primary Natural Disaster Areas."* Published March 26, 2019. https://www.fsa.usda.gov/state-offices/Pennsylvania/news-releases/2019/strn_pa_20190326_rel_007?utm_medium=email&utm_source=govdelivery. Accessed July 25, 2019.

DEP's Climate Impact Assessment Update of 2015 analyzed the potential and varying effects of climate change on agriculture in Pennsylvania, while that agency's Climate Action Plan includes ideas for farmers and landowners to reduce their emissions.

Although DEP officials pointed out that DEP is developing an enhanced impacts assessment that will reflect a more comprehensive and detailed evaluation of the impacts of climate change on agriculture as a follow-up to the 2015 Impact Assessment, it is important to note that Pennsylvania Department of Agriculture has no comprehensive plan to address how climate change will affect the state's farm and food industries, although the 2016 Invasive Species Management Plan acknowledges changing temperatures as a root cause of new and increased pest pressure.[42]

During PDA's 2019 budget hearing before the House Appropriations Committee, Secretary Russell Redding said, "There's no separate initiative around" addressing climate change for the state's farmers.[43]

Other jobs directly related to climate change

Tackling the climate crisis by increasing investments in energy-efficiency measures and renewable energy sources will help boost state and local economies by creating family-sustaining jobs for construction and skilled trade workers who are already preparing for the work.

Jobs in and around the natural gas sector have grown exponentially since the early 2000s. As the infrastructure grows to process and transport natural gas and its byproducts, the state has also seen an increase in those types of jobs, too, as seen in pipeline buildouts and the ethane cracker plant in Beaver County, which created over 5,000 jobs during the construction period and will have 600 permanent positions once it is operational.

Energy efficiency, clean vehicles and renewable energy sectors are driving immense growth in employment opportunities in Pennsylvania. Since 2014, the clean tech workforce has grown by nearly 60 percent, to nearly 90,000 total employees in 2018, according to E2, an environment-focused nonprofit.

Leaders of local unions are adapting to the new demands. Officials with the I.B.E.W. Local #5 in Pittsburgh said for this report that "building automation, renewable energies, storage and smart grid technologies all demand special attention, which requires added time and effort in our apprenticeship program."

Building & Construction Trades Council leaders said their workers look forward to helping address climate change by installing energy-efficient chillers, windows and low-flush toilets that in large buildings can add up to substantial water savings. Additionally, projects to separate sewer and storm water conveyance pipes in cities across the state have the potential to improve the environment and put people to work.

State policies to increase renewable energy goals and energy efficiency can further drive job creation. For example, DEP's report "Pennsylvania's Solar Future Plan" estimates that increasing solar energy to 10 percent of in-state energy consumption would result in at least 60,000 new jobs.

ECONOMIC FACTORS

Timber

Pennsylvania has a major timber industry, with more than 80,000 workers and nearly $12 billion in annual sales.[44] The Department of Conservation & Natural Resources' (DCNR) Bureau of Forestry offers for sale more than 70 million board feet of timber per year. Those revenues go into the bureau's operating budget, and from 2008-15, that income averaged more than $22 million.[45]

Climate change also creates new challenges and health risks for employees in state parks and forests because of increased exposure to pest-spread illnesses such as Lyme disease.

Climate change will significantly alter the forests of Pennsylvania.[46] The effects on the state's forests range from changing forest composition, loss of tree species, changes in insect and disease pressures, and invasive plants and animals. Without needed investments and resources, DCNR acknowledges the Bureau of Forestry lacks essential staff, support and capability to manage those changes.[47]

ECONOMIC FACTORS

Tourism

Traveler spending supported 6.6 percent of Pennsylvania jobs in 2017, with travel and tourism generating $4.5 billion in state and local taxes.[48]

2017 was the eighth consecutive year of growth in the sector, much of it coming from outdoor recreation. Outdoor recreation generates $29.1 billion in consumer spending annually in Pennsylvania, supporting 251,000 direct jobs and generating $1.9 billion in state and local tax revenue.[49]

Despite overall growth in this sector, climate change will have a severe, negative impact on winter recreation, as Pennsylvania is expected to experience less snowfall and warmer temperatures.[50] Already, low snowfall caused a 12 percent decrease in skier visits from 1999 to 2010 in Pennsylvania, creating a potential economic loss of over $50 million.[51] And while ski operations can invest in snowmaking machines, temperatures must be low enough to maintain snow. Ski resorts could lose 15-20 percent of the season to warmer winters over the coming decades, and many ski resorts may not exist beyond 2070.[52]

Climate change and severe weather are causing significant damage to manmade structures within Pennsylvania's park and forest systems, which draw 40 million visitors each year. DCNR has identified $1 billion needed for restoration and repairs to infrastructure in state parks and forests — an amount that will only grow as climate change worsens.

Infrastructure

At the same time Pennsylvania's Department of Transportation (PennDOT) is struggling to pay for the maintenance and upkeep of roads and bridges, the agency is spending more money on emergency repairs from flooding and landslides (see "About landslides," page 18).[53] In 2018, for example, PennDOT estimated damage to state-maintained roads and bridges at more than $105 million — the highest price tag in 10 years.

Other state agencies – including PEMA, DCED and DCNR – must be prepared to allocate increasing funding to emergency preparation planning and education and disaster relief and recovery. According to PEMA, increased funding and staffing is necessary to more effectively plan and coordinate disaster mitigation work.

Residences and businesses will become much more vulnerable to flooding and other disasters, and their ability to recover will be hindered if they are not covered by flood insurance.

Municipalities will face unexpected costs due the effects of climate change—flooding especially can cause thousands or tens of thousands dollars in damage to local infrastructure, especially when much of the state's stormwater systems are aging and in need of repairs (see What We Heard 1, page 23).

For example, an estimated $200,000 to $300,000 worth of damage was caused by one instance of flooding in Mount Joy, Lancaster County, in August 2018.[54] In that same storm, another Lancaster County municipality, Rapho Township, incurred about $225,000 in damage to bridges and roads, while the township's budget for emergency road work was only $20,000.[55]

In a more recent example, flooding in late July 2019 in the eastern Pittsburgh suburbs of O'Hara and Penn Hills caused hundreds of thousands of dollars of damage.[56]

About landslides

Landslides are triggered by both human-caused and natural changes in the environment, such as land development and erosion or heavy rainfall. Because increased precipitation is a predicted effect of climate change, certain areas of the state with an already elevated risk of landslides due to topography and development must be prepared for landslide occurrences.

There is very little in the way of reporting requirements or tracking of damages to assess risk.

PEMA tracks landslides based upon county reporting, but officials say they recognize that counties might not report every event.

Helen Delano, senior geological scientist at the Department of Conservation & Natural Resources (DCNR), said in spring 2019 that there is still not enough data to track or attempt to predict landslide risks. She identified several areas that must be addressed:

1. No regulatory structure or requirements exist for reporting landslide occurrences or damage totals (she tracks occurrences via Google alerts);

2. Land-use ordinances do not have requirements to address landslide risk;

3. No insurance is available for landslide risk, partly because little is known about the risk,

4. Landslides are not regulated unless they affect a road, pipeline or waterway (and then DEP and/or PennDOT may get involved).

In fact, PennDOT officials said, the agency has seen a surge in costs associated with cleaning up after landslides. In 2018, PennDOT's District 11 — which comprises Allegheny, Beaver and Lawrence counties in western Pennsylvania — estimated it would cost more than $53 million to repair all of that year's landslides.

Delano said companies and consultants regularly call her hoping to find updated landslide maps, which she does not keep. Callers include representatives from high-risk operations such as pipelines and oil drillers, she said.

PennDOT officials said they do monitor potential slide areas. When slides are repaired, they added, underlying drainage issues are addressed as much as possible.

WHAT HAS PA DONE

TO ADDRESS CLIMATE CHANGE?

Pennsylvania's initial intentional efforts to address climate change began in the early 2000s. During that time, the governor and the General Assembly created the three key acts that serve as the foundation for the state's climate action today:

- **Alternative Energy Portfolio Standards Act (Act 213 of 2004)**: Much of the growth of renewable energy in Pennsylvania can be attributed to the AEPS.

  For example, in 2006, zero percent of electricity sold to utility customers in Pennsylvania was from renewable sources; in 2017, about 6 percent came from renewable sources included in the AEPS program.

  But Pennsylvania has fallen behind other states by not updating this law. For example, other states – including neighboring states with similar environmental conditions – require much higher quantities of renewable energy to be produced. In "Pennsylvania's Solar Future Plan" report,[57] for example, DEP notes that the current target of 0.5 percent solar generation by 2021 is "significantly lower" than New Jersey, whose target is 5.1 percent by 2021; and Maryland, which in 2018 updated its requirements for utilities to source 14.5 percent solar by 2030.

  The AEPS also requires that 18 percent of electricity supplied by state electric distribution companies be generated by alternative sources by 2021, a requirement that the state is on track to meet.[58]

- **Climate Change Act (Act 70 of 2008)**: This law requires that DEP publish greenhouse gas emissions inventories annually and release the Climate Impact Assessment and Climate Action Plan reports every three years. The act also requires DEP to administer a Climate Change Advisory Committee.

- **Energy Efficiency and Conservation Law (Act 129 of 2008):** Act 129 requires electricity distribution companies to spend a pre-determined amount of money per year on energy efficiency measures for their customers to reduce electricity demand and consumption. These investments include high-efficiency appliance and lighting rebates, building retrofits, and smart meter installation.[59]

  However, Act 129 has a financial cap[60] that limits the amount that can be invested in these programs, slowing the effectiveness of the program. Twenty-nine other states have similar mandatory energy efficiency programs, and none has the financial cap on investments. The programs in other states can more heavily invest in energy savings, meaning that they are reducing emissions and lowering electricity bills more effectively and faster than Pennsylvania.

  Act 129 saves electricity customers money while reducing emissions. From June 2017 through May 2018, net statewide savings for customers was estimated at $108 million.[61]

[57] http://www.depgreenport.state.pa.us/elibrary/GetDocument?docId=1413595&DocName=PENNSYLVANIA%26%2339%3bS%20SOLAR%20FUTURE%20PLAN.PDF%20%20%3cspan%20style%3D%22color:blue%3b%22%3e%28NEW%29%3c/span%3e. Accessed July 25, 2019.

[58] Note that "alternative" does not equal "renewable." Sources of electricity accepted into the AEPS include solar, wind, low-impact hydro, geothermal, biomass, biologically derived methane gas, coal-mine methane and fuel cell resources, waste coal, and more. For more, see Pennsylvania's Climate Action Plan, page 27. http://www.depgreenport.state.pa.us/elibrary/GetDocument?docId=1454161&DocName=2018%20PA%20CLIMATE%20ACTION%20PLAN.PDF%20%20%20%3cspan%20style%3D%22color:blue%3b%22%3e%28NEW%29%3c/span%3e.

More recently, legislators have introduced bills with goals related to climate action, but none has made it into law.

The Pennsylvania Attorney General's Office has taken action on climate change. In April 2018, it joined 14 other states and the City of Chicago to sue the EPA for ignoring its responsibilities under the Clean Air Act in delaying methane control standards.[62] In October 2018, the Attorney General's Office again joined with several states and cities, including Philadelphia, to file comments with the EPA regarding its planned rollback of the Clean Power Plan.[63]

After the White House decided to withdraw the U.S. from the Paris Agreement, the Pennsylvania Treasury Department signed the "We're Still In" pledge to signify that the department would adhere by the agreement's goals, saying in a news release: "Climate change represents a catastrophic threat to Pennsylvania if we do not take action."[64]

Additionally, the Treasury Department partnered with the Foundation for Renewable Energy and Environment to create The Pennsylvania Sustainable Energy Finance Program, which provides for a "prudent, market-based investment vehicle that promotes energy and water efficiency, clean energy generation, economic development and environmental improvement" for qualifying organizations in the commonwealth.[65]

In January 2019, Gov. Tom Wolf issued an executive order that established climate goals for the commonwealth, set performance goals for state agencies, and established a GreenGov Council.

The executive order sets specific goals and directs state agencies to incorporate environmentally sustainable practices – actions which should produce appreciable energy-use changes. However, the targets do not match the Intergovernmental Panel on Climate Change's most recent target of 100 percent reduction in greenhouse gases by 2050 from 2010 levels.[66]

Pennsylvanians' views on climate change

According to a 2019 statewide poll conducted by Franklin & Marshall College, the majority of Pennsylvanians support climate change action:

- "Most registered (Pennsylvania) voters believe that climate change is currently causing problems (67%) and most (68%) think the state should do more to address those problems."
- "Two in three (68%) voters believe the state should pursue policies that prioritize renewable energy."

While Pennsylvanians are divided about the cause of climate change, most acknowledge that weather patterns are changing. Pennsylvanians want their communities to be livable, to be resilient and to continue to provide a good quality of life. Addressing the effects of climate change will go a long way in reaching those goals.

[64] https://patreasury.gov/newsroom/archive/2017/07-10-Torsella-Remain-Paris-Accord.html
[65] https://freefutures.org/pennsef/about/
[66] Gov. Wolf's target by 2050 is 80 percent of 2005 levels. According to DEP's 2018 Greenhouse Gas Inventory, emissions had already decreased by 5.44 percent from 2005 to 2010.

Gov. Wolf also had Pennsylvania join the U.S. Climate Alliance, in which states commit to meeting goals of the Paris Agreement, among other aims.

Finally, Gov. Wolf issued an executive order in October 2019 for Pennsylvania to become the final Mid-Atlantic state to join the Regional Greenhouse Gas Initiative (RGGI). RGGI is a cap-and-invest program that sets limits on carbon emissions from power plants, so that plant operators must then purchase emissions "allowances" from an auction. The number of allowances is limited by the cap on emissions.

The program has been operational for 10 years, and the results from multiple analyses have shown that RGGI has helped to lower carbon emissions from power plants in the member states, while bringing other benefits to those states, including job creation and positive economic outcomes.

States receive money through the auction proceeds. Each state can determine how it allocates the funding; these expenditures include energy-efficiency programs, renewable energy projects, utility bill assistance for low-income residents, education and job training, and transportation funding. Jobs are then created to complete these projects.

The Analysis Group found, in a 2018 study, that from 2015-2017, RGGI led to $1.4 billion of positive economic activity in the then-nine-state region.[67] Other benefits of the program include a decrease in particulate pollution, leading to potential savings in healthcare expenditures and fewer missed school/work days due to illness.[68]

Because RGGI states invest in energy-efficiency programs over time, electricity customers have started to save money on their utility bills. From 2015-17, electricity consumers saved $99 million and consumers of natural gas and heating oil saved $121 million.[69]

Critics of joining RGGI argue that it could conversely cause electricity prices to increase, which could disproportionately affect low-income residents' utility bills.

However, recent modeling has shown that joining RGGI would be a net benefit for Pennsylvanians. With the proper policies and investment priorities in place, RGGI would help lower Pennsylvanian's electricity bills as compared to business-as-usual projected increases. Joining RGGI could also bring in additional revenue to help the state reinvest in renewable energy goals, improve energy efficiency measures, and assist with job-training efforts.

The state could see approximate annual revenues of $250 million in the first year, decreasing slightly over time (in real dollars) with a lowered cap, but with about $2 billion cumulatively over the first 10 years of the program.[70]

Local and state leaders are struggling to plan for extreme weather and other climate change effects due to a lack of coordination and inadequate resources.

As its name suggests, the state Department of Environmental Protection (DEP) is the agency tasked with leading the commonwealth's efforts to protect the environment. A months-long review showed a need for major improvements in coordination and resource-sharing among the governor's office, DEP officials and other government offices.

For example, several people said for this report that a major lack of coordination exists between the main DEP office and its six regional offices. One regional office manager said that, as of several days after DEP's Climate Action Plan was released in April 2019, they had not read it and were not sure what "responsibility the regional office would have in implementation efforts."

DEP senior staff acknowledged during an interview in spring 2019 that they have no plans in place to coordinate with counties on the roll-out of the Climate Action Plan. And after a recent Climate Change Advisory Committee meeting, one member admitted that officials in his county were not even aware the plan was being released.

Some other county representatives, such as planners and commissioners, are pursuing their own paths to help reduce greenhouse gas emissions – but the state is not providing enough assistance or guidance for these piecemeal plans.

The legislatively mandated Climate Action Plans outline steps stakeholders could take to reduce their emissions, but it appears DEP is not disseminating that information to interested county officials. Many of those county officials said they do not have the capacity or knowledge in house to know how to effectively reduce their emissions and that more guidance from DEP would be helpful in developing their local plans. For instance, county and local planners said they are lacking data, benchmarking information and reference materials to help them make decisions about best practices to reduce their local emissions.

Often, the push to reduce emissions comes from a grassroots effort in a small area, and no regional or statewide governmental entities exist to share information across communities. Advocacy organizations like the Sierra Club have filled the void by connecting local policymakers and advocates with needed information or education. The Sierra Club has organized local activists to push for clean energy resolutions at the municipal level, and so far, 19 Pennsylvania communities have passed resolutions to work towards 100 percent clean energy by 2050. These communities include State College, Reading, and Conshohocken.[71]

Only a few counties — such as Chester, Montgomery and Philadelphia — have taken county-wide action; most municipal action is done independently. Without organization to facilitate and disseminate these models, time and opportunities are not optimized in duplicative efforts.

Planning for the effects of climate change — flooding especially — suffers from the absence of a coordinated effort. Pennsylvania's aging infrastructure compounds the risks and damages of increased precipitation, as heavier rainfall events overwhelm the current systems and lead to flooding of private and public property. These events are already being seen across the state with regularity, with rainfall totals exceeding expectations and creating flash floods.

The American Society of Civil Engineers (ASCE) has repeatedly sounded the alarm, going so far in its 2018 state report card as to give the state's roads, bridges, stormwater, wastewater and drinking water categories all D grades, meaning they are "in poor to fair condition and mostly below standard, with many elements approaching the end of their service life."[72] Stormwater controls not only help reduce pollution into the waterways, but can also mitigate the risks and severity of flash flooding, improving resiliency in communities.[73] Stormwater systems work by slowing, retaining and diverting stormwater; ideally these systems are sized appropriately and regularly maintained.

Currently, though, these systems in Pennsylvania, as in much of the nation, are old, ill-maintained and often overlooked. There is no statewide assessment of the existing conditions and capacity of Pennsylvania's stormwater systems, ASCE has pointed out,[74] which means no one – in the public or private sector – has any idea how much these systems are at risk of failure during severe weather.

Limited state funding is available for stormwater upgrades and repairs, but none are ongoing or stable sources; they are often competitive, usually one-time grants, bonds or loans. Pennsylvania's PENNVEST program can be used for stormwater system upgrades, but historically this program has had only a small percentage of funding go to stormwater projects.

A lack of reliable funding streams for infrastructure is a perpetual problem in the state. For example, PennDOT Secretary Leslie Richards said in spring 2019 that the agency is "billions of dollars short" for maintenance of roads and bridges. In fact, a recent audit found that $4.2 billion has been diverted from transportation maintenance funds through the state budget process since 2012-13.[75]

The bottom line: The state lacks coordination and specific plans to reduce greenhouse gas emissions to minimize Pennsylvania's impact on climate change and to properly create or implement adequate plans to lessen damage caused by extreme weather. Other states vary in their planning, but some are out in front of these issues.

For example, in 2012, Washington state released "Preparing for a Changing Climate: Washington State's Integrated Climate Response Strategy," a comprehensive framework of steps to protect its economy, natural resources and communities that might potentially serve as a model for Pennsylvania.[76]

About stormwater systems

Stormwater systems are usually owned and operated by local authorities. These systems include both Municipal Separate Storm Sewer Systems (MS4s), which have separated conveyance pipes for stormwater and wastewater, and Combined Sewer Overflows (CSOs), which convey stormwater and wastewater together.

Pennsylvania has the highest number of CSOs of any state, and these systems can release untreated human and industrial waste and other pollutants into the environment when the systems are overwhelmed by rainwater, according to ASCE. Some cities with CSOs – such as Philadelphia, Pittsburgh, Erie, Scranton and Johnstown – remain under orders from the EPA and the state government to significantly reduce their CSO outflows.

Pennsylvania has two large MS4s and 1,059 small MS4s. The vast majority are community-based and managed by a publicly owned authority; the remainders belong to other entities such as universities and prisons.

Performing necessary upgrades to the state's MS4s will be expensive. If state government does not allocate funding, then resources will have to be paid for through local channels such as stormwater fees. No resources could be found that estimate the total price tag for these upgrades.

Pennsylvania is not prepared for the severe impacts of climate change, and a solely reactive approach will lead to millions of dollars spent on recovery and remediation.

FLOODING'S IMPACT

Nearly all the experts consulted for this report agreed that Pennsylvania is not prepared for the damage that future flooding will cause. Almost all of them agreed on a few key points:

- ◊ Communities are flooding that hadn't flooded before;
- ◊ These communities aren't prepared for increased flooding;
- ◊ Information about how to incorporate the effects of climate change into flood planning efforts is not yet widely available; and
- ◊ The state's lawmakers and leaders are not prioritizing funding or programming to proactively mitigate the risks of flooding.

According to PEMA, flooding is by far the most extensive hazard in Pennsylvania,[77] and "more intense precipitation incidents that are localized and not widespread" are becoming more common. This type of flooding — flash flooding — is difficult to predict and is occurring in places that haven't previously flooded. This section examines what is being done to prevent damage from flooding as well as what cost effective measures could be adopted by state and local governments.

[77] https://pahmp.com/wp-content/uploads/2018/10/Chapter-5-Capability-Assessment.pdf

The costs of flood remediation, and the risk of floods, are both much higher than Pennsylvanians expect them to be. Consider, for example, that:

- ◊ Just 1 inch of water on the first floor of a home costs, on average, $25,000 to repair and, generally, standard homeowners insurance does not cover the damage.
- ◊ Total damage to Pennsylvania insured property owners over the past 40 years is just under $1.2 billion.
- ◊ The total flood damage to Pennsylvania's uninsured property owners is unknown.

Although progress is being made, flood management and recovery in the United States – including Pennsylvania – is still primarily reactive. Planning efforts to mitigate the most damaging and dangerous effects of flooding are disjointed across the state. Standardized regulations for counties and municipalities to follow do not exist. The interrelated issues of the floodplain and stormwater are regulated separately. And top-down guidance from state agencies — for local land use and development, or for statewide water resources – has not been released in a timely fashion.

In many cases, the responsibility for repairing flood damage is on the property owner or resident – primarily through the purchase of flood insurance. There are federal programs, administered either by FEMA or HUD, to mitigate the effects of flooding through buyouts and demolition of structures that have flooded repeatedly and to assist in certain types of rebuilding and renovations that occur after a flood if emergency status has been declared; however, qualifying for these programs is time- and labor-intensive, with a median wait time in Pennsylvania of about five years from disaster declaration to case closure.[78]

FLOOD INSURANCE'S ROLE

Flood insurance is expensive, and many premiums are increasing as the federal program undergoes an overhaul to better tie premiums to actual flood risk and remove subsidies for certain types of structures.

Many homeowners, particularly in flood-prone areas, may be shocked to find out their new rates.[79] For example, in Lycoming County, where premiums already cost $1,000 to $3,000 per year, local officials are concerned that premiums may rise to $9,000 or more annually.[80]

If a home with a federally backed mortgage is in a Special Flood Hazard Area (SFHA), then the owners are a required to purchase flood insurance. Property owners who have paid off their mortgages in these areas, have alternative financing, or who are not located in these areas, often choose to forgo flood insurance due to the cost.

[78] https://www.nrdc.org/sites/default/files/going-under-post-flood-buyouts-report.pdf
[79] https://www.fema.gov/nfiptransformation
[80] Hibbard, Katelyn. Williamsport Sun-Gazette. *"National flood insurance rates to see 'scary' increase.'"* Published April 20, 2019. http://www.sungazette.com/news/top-news/2019/04/national-flood-insurance-rate-to-see-scary-increase/. Accessed Oct. 18, 2019.

Flood Insurance Rate Maps (FIRMs) are one of the primary resources used to determine flood risk. The maps identify what are known as the 100-year and the 500-year flood risks, and they impact insurance rates. For example, flood insurance on a $150,000 home in a moderate-risk flood zone in southcentral Pennsylvania cost about $2,500 in 2019. Fifteen years ago, flood insurance for that same house was about $1,200.

While FIRMs are useful, they are often misunderstood or relied upon in less-than-ideal ways. People may falsely believe a home or region is "in" or "out" of flood risk areas because the area is not included on a rate map.[81] The reality is that floods do not adhere to lines on maps. As the Pennsylvania Insurance Department says, much of the flooding that happens in Pennsylvania is outside of these flood hazard areas; in fact, while a property within the SFHA has one in four chance of flooding over a 30-year period, a property outside of that area still has a one in seven chance.[82]

"[F]lood protection MUST be a proactive focus of our federal, state, county and local government. Currently, it is a REACTIVE approach when substantial damage has already occurred, including loss of life in many cases."

SOURCE: TESTIMONY OF MARY ELLEN RAMAGE, MANAGER, BOROUGH OF ETNA IN ALLEGHENY COUNTY, BEFORE A JOINT SENATE HEARING APRIL 25, 2018

Yet Pennsylvania's homes and businesses are under-insured: Just 15 percent of property owners who should have flood insurance obtain it.[83] That number has decreased 24 percent since 2013.[84]

Regular homeowner and commercial insurance policies do not cover damage from flooding. This gap in insurance coverage means that taxpayers may end up picking up the tab when an uninsured property floods.

The combination of heavy downpours and aging stormwater infrastructure means that many more property owners, renters and businesses are at risk of flooding. And the lack of flood insurance policies means that more money will be spent on recovery – if recovery is possible.

Preventing Flood Damage

Communities can take action by taking steps to lower risks. FEMA's Community Rating System is a program that helps communities lower flood insurance prices by putting in place flood mitigation practices. Yet only 28 Pennsylvania municipalities participate in this program (see "PA's CRS communities").

The 28 participating communities are saving policyholders over $450,000 annually on their flood insurance policies.[85] The 2018 state Hazard Mitigation Plan identified 10 communities with the highest potential savings if they were to join the Community Rating System: Philadelphia, Pittsburgh and Johnstown cities; Bristol, Susquehanna, Upper Darby and Abington townships; and Yardley, New Hope and Forty Fort boroughs.

Resource constraints around staffing and funding, low level of institutional support and the burdensome reporting requirements create a high barrier for many Pennsylvania communities to enter the Community Rating System.[86] The other major issue for communities is that CRS must be administered at the municipal rather than county level – and while other states, such as Florida and Virginia, allocate funding for rating system specialists or other ways to assist communities, Pennsylvania does not provide support in that way.

PA's CRS Communities

Allegheny County: Etna Borough, Shaler Township, Upper St. Clair Township

Communities can invest in improving the built environment to lower their risk of devastating flooding. Green infrastructure is a type of stormwater management system that mimics natural processes to slow, absorb and store runoff. Green infrastructure is being used in some Pennsylvania communities to reduce the effects of heavy rainfall. This type of stormwater management has important other benefits: reduce the effects of extreme heat,[87] improve air quality,[88] help remove water pollution to meet EPA requirements, and reduce energy usage.

- In Lancaster, the city's green infrastructure plan was evaluated to reduce capital costs by $120 million while saving $661,000 annually in reduced wastewater treatment costs.[89] The cost of the 25-year, $140 million plan to install these systems are covered by state and federal funding initiatives as well as a fee on property owners.[90]
- Philadelphia has also embarked on a major, 25-year green infrastructure plan. The project, called "Green City, Clean Water," invests approximately $1.2 billion into these projects. A 2016 report, conducted in Year 5 of the project, estimated that the green infrastructure investment will produce a $3.1 billion impact on the Philadelphia economy, including $2 million in local tax revenues annually.[91]
- In the Wyoming Valley, a five-year plan costing approximately $17 million would install 65 projects to reduce erosion, capture runoff and store stormwater.[92]

Because the General Assembly has so far not allocated funding to maintain the commonwealth's infrastructure, utilities and localities are financing stormwater projects with a fee paid by property owners or utility users. While an average homeowner's fees are usually under $200 per year, some institutions such as businesses or school districts are facing fees into the tens of thousands. In Franklin County, Greencastle-Antrim School District is estimating an annual fee of $47,000, and there is concern that the fee will lead to higher property taxes.[93]

Yet when a flooding event occurs, it is taxpayers who are funding clean up and recovery for those who are not properly insured and prepared for floods.

Beyond Federal Disaster Relief

Finally, widespread belief exists that federal disaster relief will be made available to help all communities that have significant damage from natural disasters. Unfortunately this belief is not correct, and it leads to decision-makers, including local elected officials and homeowners, not being proactive enough in their prevention planning.

As the state learned in 2018, significant damage can happen over the course of several storms in a short timeframe, but that does not qualify for federal relief – and such micro-burst-style storms are likely to occur more often because of climate change. PEMA officials said in May 2019, "these precipitation incidents resulted in highly localized areas of significant impact, which has made it very difficult to meet disaster thresholds to qualify for federal disaster assistance."

Moreover, FEMA is underfunded for the current level of need. Large-scale disasters such as hurricanes tend to quickly exhaust federal resources, leaving less funding available to help in areas where severe but smaller-scale weather events have occurred.

Additionally, PEMA officials said, there's increased competition for funding for preparedness and hazard mitigation activities.

And these issues don't just apply to flooding. Allegheny County Emergency Management requested federal assistance after landslides caused $22 million in damage in 2018, and FEMA declined, stating:

> "Based on FEMA's review … it was determined that the damage identified in the request resulted from separate and distinct events, none of which were of the severity and magnitude as to be beyond the capabilities of the Commonwealth and affected local governments. Therefore, it was determined that supplemental federal assistance was not necessary."[94]

In 2018, approximately $63 million in damage to public infrastructure in Pennsylvania was not covered by FEMA disaster assistance.[95]

The bottom line: Every $1 spent on preventing natural disaster damage saves $6 in recovery costs.[96]

Emergency responders

Adding to the lack of preparedness is the strained situation for emergency responders. Emergency medical services (EMS) funding is severely lacking, and other changes have put the ability of EMS to respond to disaster situations in serious question. In Easton, for example, the fire department was not equipped to handle the events of Hurricane Sandy in 2012, which included three simultaneous house fires, among other emergencies.

State agencies' roles are changing based upon increased precipitation events. PEMA's role has "become more flexible" in providing rescue support, including increased usage of helicopter hoist and rescue operations, at additional expense to the state. As these precipitation events become more common, these expenses will continue to increase, especially if the state and local governments do not take more proactive steps to reduce the impacts of flooding.

The State Hazard Mitigation Plan inventories risks to state and critical facilities to determine vulnerability, and the 2018 plan found that the increased precipitation will vastly increase risk to these facilities.

Pennsylvania must join other states in doing more to reduce greenhouse gas emissions, especially carbon dioxide and methane, in the electric power, agricultural, transportation and industrial sectors.

Pennsylvania has historically been a leader in energy innovation and production. It was home to the nation's first commercial oil well in 1859 and, 99 years later, the first commercial nuclear power plant.

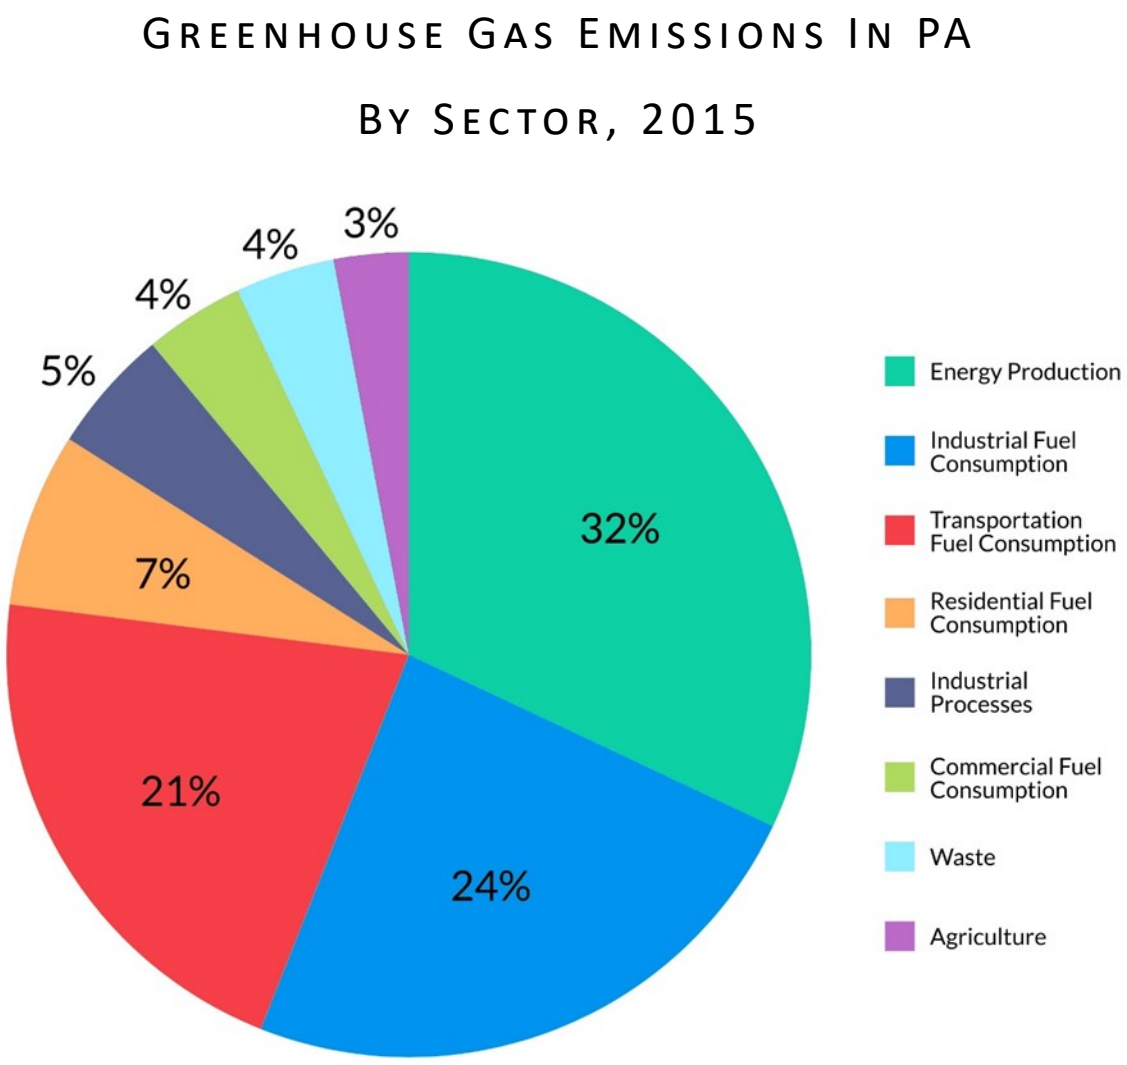
An abundant supply of coal, which has been mined in Pennsylvania since the 1700s, fueled the industrial revolution and fostered the growth of the steel and railroad industries in the state. Today, natural gas from the Marcellus and Utica Shale formations has helped Pennsylvania secure its position as the top exporter of electric power among U.S. states.[97]

Not only did energy production play a vital role in the development of Pennsylvania's economy and sprawling transportation infrastructure, but taxes paid by energy producers and the industries they supported also were – and still are – an important source of revenue for state government.

As of 2017, Pennsylvania ranked behind only Texas in production of natural gas and was the third-largest coal-producing state. It also ranked second in electricity generation from nuclear energy.[98]

[97] U.S. Energy Information Administration. *"California imports the most electricity from other states; Pennsylvania exports the most."* Published April 4, 2019. https://www.eia.gov/todayinenergy/detail.php?id=38912. Accessed July 31, 2019.
[98] U.S. Energy Information Administration. *"Pennsylvania: State Profile and Energy Estimates."* https://www.eia.gov/state/?sid=PA. Accessed July 31, 2019.

In Pennsylvania, greenhouse gas emissions come from these sectors of the economy[99]:



To address its contribution to climate change, Pennsylvania must begin to reduce emissions in its electric power sector — and focus on addressing the high levels of methane pollution in the state from conventional and unconventional drilling and abandoned oil and gas wells.

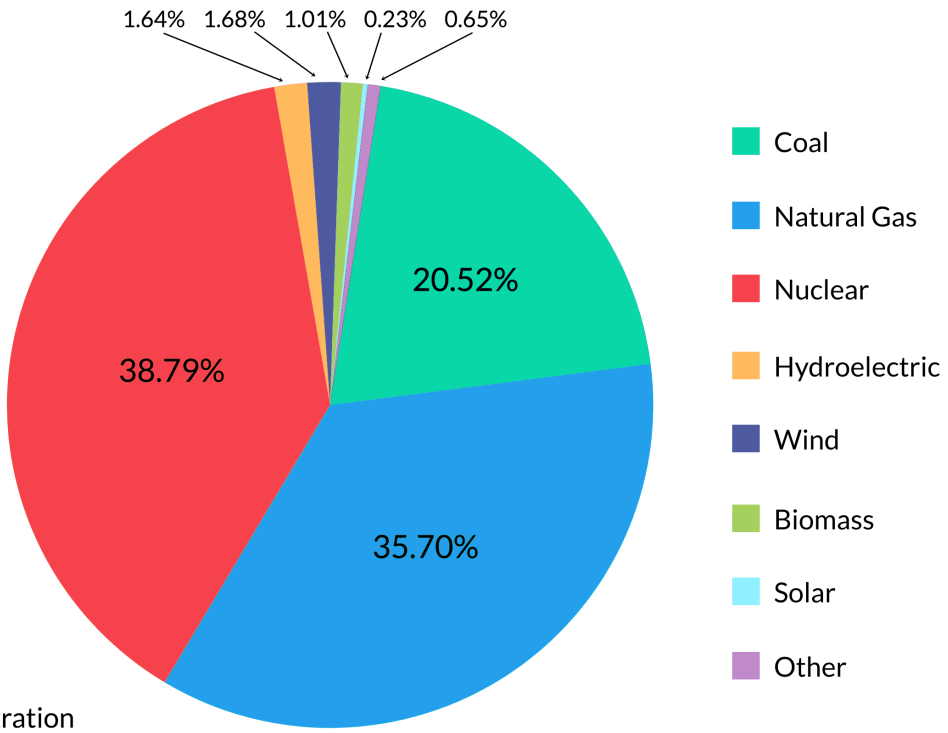
However, even if emissions from methane sources and electricity generation were reduced in the state, the industrial, transportation and agricultural sectors must still take action to broadly reduce emissions.

[99] Pennsylvania Department of Environmental Protection. *"Pennsylvania Climate Action Plan."* Page 33. Published Nov. 20,2018. http://www.depgreenport.state.pa.us/elibrary/GetDocument?docId=1454161&DocName=2018%20PA%20CLIMATE%20ACTION%20PLAN.PDF%20%20%20%3cspan%20style%3D%22color:blue%3b%22%3e%28NEW%29%3c/span%3e. Accessed Oct. 24, 2019.

Electric Power Sector

About 55 percent of the electric power generated in Pennsylvania is produced by coal and natural gas. Nuclear makes up nearly 40 percent, and renewables make up about 5 percent.

Breakdown of PA's Energy Sources, 2018



Source: U.S. Energy Information Administration

The most significant decreases in greenhouse gas emissions in Pennsylvania likely are a result of the natural gas boom, which led to the displacement of many coal-fired power plants. Burning natural gas emits about half as much carbon dioxide as burning coal,[100] and coal emissions from electricity generation have dropped nearly in half since 2005.

Outside of this decrease, the electric power sector in the state has made little progress in reducing emissions and, in fact, emissions from this sector are predicted to increase 27 percent by 2026 without a cap on carbon.[101]

While nuclear remains a controversial energy source due to public perceptions of safety issues, the closure of Three Mile Island means that the state's greenhouse gas emissions from electricity generation will increase, as natural gas – or, less likely, coal – fills that gap in production.

[100] This does not account for the fact that methane leakage is unmeasured. If the methane being released from natural gas extraction and transport is higher than what is currently being estimated, then there may not have been much of a decrease in greenhouse gas emissions.

[101] Burtraw, Dallas, *et al.* Resources for the Future. "Options for Issuing Emissions Allowances in a Pennsylvania Carbon Pricing Policy." Published 2019. https://www.rff.org/publications/issue-briefs/options-issuing-emissions-allowances-pennsylvania-carbon-pricing-policy/. Accessed Nov. 5, 2019.

REGULATING METHANE

Methane is a powerful greenhouse gas with a lifespan of about 20 years. During its time in the atmosphere, its warming capacity is exponentially stronger — at least 28 times stronger — than carbon,[102] which means that methane leakages and releases from the growing natural gas infrastructure in Pennsylvania are contributing to the accelerating pace of climate change.

Comprehensively measuring and regulating methane must be a major component of lowering emissions. Pennsylvania is making progress in this area but still lags behind where it could be if it used the most up-to-date technology available. Meanwhile, Colorado, which developed its regulations with the assistance of the natural gas industry, is measuring and regulating methane much more effectively than Pennsylvania.

In 2016, Gov. Wolf announced the Methane Reduction Strategy. The first part of this strategy introduced new permits to address methane emissions from new natural gas wells and infrastructure. Another component, still in awaiting review by the Environmental Quality Board, would reduce leaks of methane at existing wells, which would address the bulk of these emissions.

In the announcement, the administration acknowledged that the natural gas industry reported "almost 115,000 tons of methane emissions from unconventional wells and mid-stream operations in Pennsylvania in 2014. This is considered a low estimate, since fugitive emissions are difficult to quantify."[103] Several experts consulted for this report confirmed that the methane emissions numbers being reported to DEP by the industry may not be accurate and that actual rates may be much higher.

Moreover, the state does not require companies to report emissions from conventional wells, meaning there is another source of methane pollution going unmeasured and unregulated. A recent estimate totaled just under 270,000 tons of methane emitted annually from conventional oil and gas wells, a number that does not include abandoned wells.[104] Conventional wells may be a large source of emissions, even if the wells have lower production.

Technical and procedural fixes to record and reduce methane leakages are available to Pennsylvania but are not yet being implemented.

[104] https://www.edf.org/pa-oil-gas/#/air-emissions

TRANSPORTATION SECTOR

The transportation sector contributes 21 percent of the state's greenhouse gas emissions. State action on lowering transportation-related emissions is minimal at best. Several minor DEP initiatives have increased access to alternative fuels — which includes electric charging stations, liquid natural gas and biofuels — as well as a rebate for those who buy electric vehicles.

One of these initiatives is Driving PA Forward, formed to disburse funding from the Volkswagen Diesel Settlement. Pennsylvania received the fifth-highest amount of funding in the nation, a total of about $118 million. The state received an "F" grade from two environmental groups for its handling of funds from the Volkswagen Diesel Settlement. The groups found that Pennsylvania is not prioritizing electric vehicles and instead dedicating a major portion of the funding to other fuels, including new diesel vehicles.[105]

In the latest round of funding, a total of $8.5 million was awarded to 34 projects, which included 60 charging stations.[106] In comparison, New Jersey's latest round of funding included $3.2 million dedicated to installing 827 charging outlets.[107] Level 2 chargers typically take several hours to fully charge a car.

Transportation initiatives have the benefit of often being funded through external sources such as federal funds; also available in Pennsylvania are funds from oil and gas impact fees. While there is no evidence yet of any major statewide efforts to lower emissions from the transportation sector, Pennsylvania has committed to working with 12 other jurisdictions to design the Transportation Climate Initiative, a regional approach to decreasing emissions from the transportation sector.

About oil and gas wells

Abandoned oil and gas wells release methane at unknown and varying rates. There is no regulatory requirement to include this methane in measurements of greenhouse gases at a national or state level.

DEP does not have a complete count of how many unplugged, abandoned wells exist in the state. Studies have attempted to estimate the number, with results ranging from 250,000 to a worst-case scenario of 750,000.

In the department's most recent Oil & Gas report, DEP said that it located 11,359 wells and that, "unfortunately, given its current resources, it will likely take DEP many years to locate all" of these wells.

Plugging these wells will be expensive and could cost the state more than $8.6 billion to address them all, according to DEP projections. Currently, however, DEP has just $600,000 allocated annually to plug these wells.

Pennsylvania leaders could look to states like Maryland and New York for examples of how to lower emissions in the transportation sector. Both of those states are members of the Multi-State ZEV Task Force, which has the goal of lowering emissions through increased usage of electric vehicles through consumer outreach, stringent vehicle fuel standards, and market transformation.[108]

Industrial Sector

There is no significant action at the state level to decrease greenhouse gas emissions from the industrial sector. While a major emitter in the nation as well as in Pennsylvania, the industrial sector is not often at the forefront of the climate discussion, perhaps because these emissions are difficult to reduce without the still-costly technology of carbon capture and storage.[109]

Heavy industry's emissions come from both direct fossil consumption and use of electricity. Reducing emissions from the industrial sector will go beyond the standard efficiency measures that are effective for homes and office space. And many Pennsylvania industries are in the highest emitting sectors such as cement, iron and steel, and chemicals/plastics.

Act 30 of 2018, one of the only recent state laws addressing climate action, allows counties to use a financing mechanism to assist commercial and industrial properties in making upgrades that lower energy use.[110] However, the law does not make this program automatically accessible to every facility in the state.

Agricultural Sector

While non-governmental agricultural organizations are working with the farming community to encourage best management practices such as soil carbon sequestration, green technologies – such as methane digesters or using some of their land for solar photovoltaic installations – the Pennsylvania Department of Agriculture has not released any climate action plan for the state's farmers for how best to adapt to changing conditions or best practices to reduce a farm's greenhouse gas emissions.

Other parts of the executive branch have taken some small steps. DEP's Climate Action Plan includes actions that farmers and others in agriculture can take to reduce emissions. The recently passed Pennsylvania Farm Bill incentivizes carbon-sequestering agriculture practices.[111] Overall, however, experts consulted for this report said there is a long way to go to support farmers' efforts to lower their emissions and be prepared for the changing climate. No state has emerged as a leader in this area.

The bottom line: Pennsylvania needs state-level leadership and guidance on reducing greenhouse gas emissions from the various sectors that produce the most of them.

RECOMMENDATIONS

1. **The governor** should expand the GreenGov Council into a climate hub to improve coordination, especially among DEP, state leaders, county leaders and local leaders to encourage and facilitate climate action at all levels of government.

2. **DEP** should improve upon its public awareness campaign that educates citizens on what they can do to reduce greenhouse gas emissions and participate in climate action on the local, county and state levels.

3. **DEP** should develop and follow implementation measures for its Climate Action Plan to help Pennsylvania stakeholders learn how they can effect change.

4. **The governor** should include in his 2020-21 budget an increase for all state agencies – including DEP, PEMA, PennDOT, DCNR and DGS – that are involved in planning for and reacting to severe weather and other climate change effects.

5. **The governor and General Assembly** should prioritize pro-active planning at all levels by:
   - ◊ fully funding applicable state agencies to lead this effort,
   - ◊ harmonizing regulations currently in place,
   - ◊ improving outreach and education to counties; and
   - ◊ implementing statewide planning, including an updated state water plan, a statewide land use plan, and guidance to implement these plans.

6. **The General Assembly** should create a resiliency fund that PennDOT and other state agencies could draw from to pay for natural disaster clean-up that is not funded by federal or other state sources.

7. **The General Assembly and DEP** should take comprehensive and timely steps to measure and regulate methane emissions from the oil and gas sector.

8. **The General Assembly and DEP** should offer incentives to improve electric vehicle usage, sales and infrastructure in the state through targeted investments and consumer education.

9. **The Department of Agriculture** should better engage with the state's agriculture sector to develop and release a plan of action for climate change, including best practices to reduce emissions and to improve resiliency.

ACKNOWLEDGEMENTS AND DISCLAIMER

This material is based on work supported by the United States Department of Energy Office of Energy Efficiency and Renewable Energy, under the State Energy Program Award Number EE0008293. This report and the analysis contained in it were prepared by the Pennsylvania Department of Environmental Protection (DEP) with support from ICF and Pennsylvania State University. The results and discussion in this report reflect the views of DEP.

This report was prepared as an account of work sponsored by an agency of the U.S. Government. Neither the U.S. Government nor any agency thereof, nor any of their employees, makes any warranty, express or implied, or assumes any legal liability or responsibility for the accuracy, completeness, or usefulness of any information, apparatus, product, or process disclosed, or represents that its use would not infringe privately owned rights. Reference herein to any specific commercial product, process, or service by trade name, trademark, manufacturer, or otherwise does not necessarily constitute or imply its endorsement, recommendation, or favoring by the U.S. Government or any agency thereof. The views and opinions of authors expressed herein do not necessarily state or reflect those of the U.S. Government or any agency thereof.

This update is a report that was prepared in response to the Pennsylvania Climate Change Act (Act 70 of 2008), which requires the DEP to prepare a climate change impacts assessment regularly. The Pennsylvania Climate Change Advisory Committee provided input and feedback to the DEP and ICF for the preparation of this assessment. The Climate Change Advisory Committee has 18 members plus 3 ex officio members. The 2021 Impacts Assessment Update is the fifth iteration of the Pennsylvania Climate Impacts Assessment and builds on the previous impacts assessments. Unlike in years past, the 2021 update offers a risk-based approach to assessing risks and prioritizing adaptation needs.

EXECUTIVE SUMMARY

Climate change is already affecting Pennsylvania. From severe heat waves to significant flooding, climate change influences weather events that have economic, health, and other impacts across the Commonwealth. These events can affect some Pennsylvanians more than others.

The Pennsylvania Climate Change Act (Act 70 of 2008) requires the Department of Environmental Protection to update the Impacts Assessment and Climate Action Plan regularly; this report, the 2021 Impacts Assessment, provides this update. It reviews current scientific findings and identifies relative risks to inform priority adaptation needs in the Climate Action Plan, but it is not a comprehensive or prescriptive assessment of all potential climate risks and impacts to Pennsylvania.

Projected Climate Changes

The 2021 Impacts Assessment presents updated climate projections based on the latest available downscaled climate model data. These projections align with projections from previous impacts assessments: Pennsylvania is expected to get warmer and wetter and undergo changes on its coastlines, including those of the Delaware Valley Estuary and Lake Erie.

By mid-century, key expected changes compared to a 1971-2000 baseline include:

- The average annual temperature statewide is rising, and is expected to increase by 5.9°F (3.3°C).
- There will be more frequent and intense extreme heat events. For example, temperatures are expected to reach at least 90°F on 37 days per year, up from the 5 days during the baseline period (see Figure 1). Days reaching temperatures above 95°F and 100°F will become more frequent as well.
- Increasing temperatures will continue to alter the growing season and increase the number of days that people need to cool their homes and workspaces, but will also decrease the number of days that people will need to use heating.
- Pennsylvania could experience more total average rainfall, occurring in less frequent but heavier rain events. Extreme rainfall events are projected to increase in magnitude, frequency, and intensity (see Figure 2) and drought conditions are also expected to occur more frequently.
- Tidally influenced flooding is expected to increase in the Delaware Estuary coastal zone.
- Lake Erie is also expected to undergo significant changes in water level, coastal erosion, and water temperature.

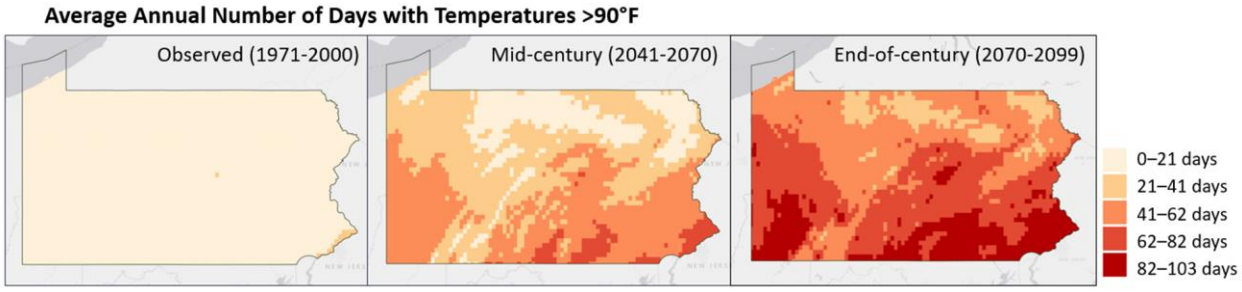

Figure 1. Observed and projected annual days with temperatures above 90°F

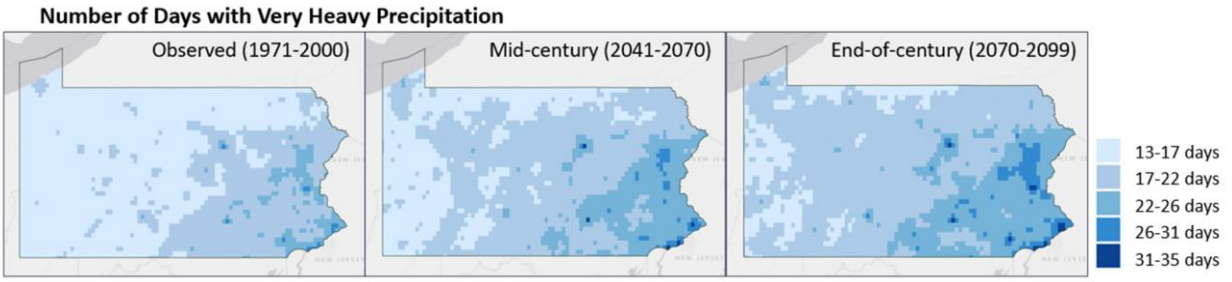

Figure 2. Observed and projected annual days with "very heavy" precipitation

Risk Assessment Approach

This impacts assessment evaluates the likelihood and consequences of six climate hazards:

- Increasing average temperatures
- Heavy precipitation and inland flooding
- Heat waves
- Landslides
- Sea level rise
- Severe tropical and extra-tropical cyclones.

The assessment focuses on risks at mid-century at the state level and also take into consideration regional variations (e.g., urban or rural, proximity to waterways), as well as the populations, industries, and other areas disproportionately affected. The likelihood of a hazard occurring is evaluated on a scale of 1 to 4.

Key Terms

Risk—The chance a climate hazard will cause harm. Risk is a function of the likelihood of an adverse climate impact occurring and the severity of its consequences (e.g., Risk = Likelihood x Consequence).

Climate hazard—Changes or events related to global climate change. Climate hazards can be discrete (e.g., severe storms) or ongoing (e.g., increasing average temperatures)

Impact – The effect of a climate hazard

Likelihood—The probability or expected frequency a climate hazard is expected to occur

Consequence—A measure of the severity of impacts from a climate hazard

EJ areas—PA Environmental Justice Areas. Includes any census block group where 20% or more of individuals live in poverty, and/or 30% or more is minority.

The severity of consequences is also evaluated on a scale of 1 to 4. The assessment examines the severity of consequences in the following categories:

- Human health
- Environmental justice and equity
- Agriculture
- Recreation and tourism
- Energy and other economic activity
- Forests, ecosystems, and wildlife
- Built infrastructure.

The product of the scores for likelihood and for consequence severity creates the overall risk rating for each hazard.

The impacts assessment for 2021 also includes, for the first time, an analysis of environmental justice and equity. The assessment seeks to identify:

- Geographic areas the most exposed to climate hazards
- Populations the most vulnerable to impacts
- The subset of exposed communities with high proportions of already overburdened individuals.

The assessment assumes no adaptation action or policy change to capture the "business as usual" risk. The results therefore indicate where Pennsylvania has an opportunity to reduce risk, recognizing that some hazards or impacts may be easier to address than others.

Climate Risk Assessment Results

The risk assessment revealed several key findings:

- Flooding is currently the highest-risk hazard facing Pennsylvania, and flood risks are projected to increase. At the same time, risks from increasing average temperatures and heat waves could rise to be as high as flooding is today by mid-century (see Table 1).
  - Flooding from heavy rain events affects built infrastructure, human health, and agriculture, with ripple effects throughout the economy.
  - Increasing average temperatures could affect nearly every aspect of life in the Commonwealth, from infrastructure design to energy costs, recreational opportunities, agricultural practices, and the natural environment.
- Heat waves will become increasingly common and will create particular health and economic risks for vulnerable populations, including low-income populations, the elderly, pregnant women, people with certain mental illnesses, outdoor workers, and those with cardiovascular conditions. These risks will be particularly acute in areas subject to the urban heat island effect.
- All hazards—especially heat waves, increasing temperatures, and flooding—could affect public health negatively. For example, higher temperatures mean more days with

hazardous heat conditions or reduced air quality, and increased risk of heat-related illness. Flooding increases the risks of direct injury from flood waters and of illness caused by contaminated water.

- Climate change will not affect all Pennsylvanians equally. Some may be more at risk because of their location, income, housing, health, or other factors. As Pennsylvania works to reduce its climate risks, it should also take care that these inequitable impacts are addressed, and that adaptation efforts do not inadvertently exacerbate inequities.
- Landslides and sea level rise pose relatively low risks statewide but can cause severe impacts in the locations where they occur. For example, sea level rise in the Delaware estuary could drastically change the makeup of the estuary's ecology and also threaten the built infrastructure near the tidal zone. Landslides can have severe consequences if they cut off critical transportation routes, particularly in rural areas.
- Severe tropical storms, flooding, and landslides already pose risks, and these could become more likely or severe in the future. Pennsylvania has an opportunity to build on its existing hazard mitigation practices for these risks.
- For changes that will come on gradually, such as rising temperature, Pennsylvania has an opportunity not only to reduce potential harm, but also to capitalize on potential positive changes. This is particularly true for rising average temperature, which could enable the cultivation of warmer-weather crops, expand warm-weather recreation and tourism, and lower wintertime heating energy demand.

Table 1. Overall Risk Assessment Results

	Climate Hazard	Current Risk Rating	Mid-century Risk Rating
1	**Increasing average temperatures**	Medium	High
2	**Heavy precipitation and inland flooding**	High	High
3	**Heat waves**	Medium	High
4	**Landslides**	Medium	Medium
4	**Sea level rise**	Low	Medium
6	**Severe tropical and extra-tropical cyclones**	Medium	Medium

Conclusions and Recommendations

Increasing average temperatures and heavy precipitation and inland flooding emerged as the two highest-risk hazards by mid-century. Both hazards could affect the entire state and all sectors Figure 3). Increasing temperatures have the highest consequences for human health and environmental justice and equity, especially in urban areas. Heavy precipitation and flooding could also have severe consequences for human health, agriculture, and built infrastructure, with populations, farms, and infrastructure located in or near floodplains at particular risk.

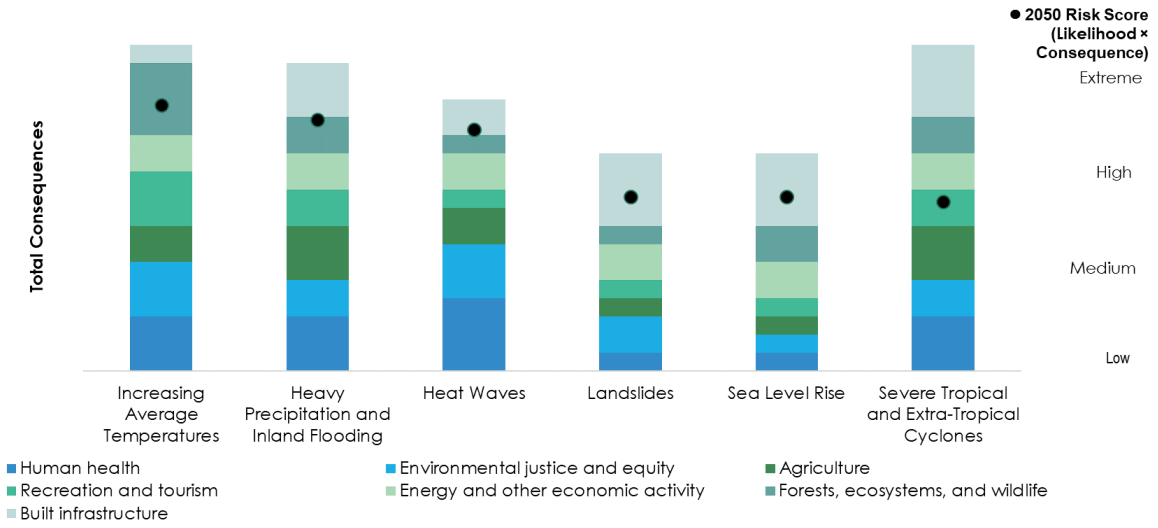

Figure 3. Total consequences by hazard (sorted lowest to highest overall risk)

Throughout this risk assessment the fact that climate change does not affect all Pennsylvanians equally was given particular focus. Some communities may be more vulnerable to impacts because of their location, and some populations may be more at risk because of housing, health, or other factors. Certain populations have greater physical exposure to risks (e.g., construction workers may be more exposed to heat waves) or have limitations on their ability to manage consequences if they occur (e.g., low income or wealth may hinder ability to pay for air conditioning). Consequences of historical discriminatory practices in communities of color (e.g., redlining, disinvestment) remain manifest today, with communities of color disproportionately living in housing that is particularly susceptible to deterioration by heat waves.

As Pennsylvania works to reduce its climate risks, it must address these inequitable impacts and ensure that adaptation efforts do not inadvertently exacerbate inequities. Instead, adaptation actions should reduce impacts on vulnerable populations. This assessment identified the following top priorities for adaptation action:

- Reduce extreme heat risks to human health, particularly for vulnerable populations
- Support the agriculture, recreation, and tourism sectors, as well as forests, ecosystems, and wildlife in the transition to a warmer climate
- Reduce flood risks to infrastructure and communities
- Help low-income households cope with an increased energy burden
- Enhance tropical storm and landslide risk mitigation.

Climate risks and related impacts in Pennsylvania could be severe, potentially causing increased infrastructure disruptions, higher risks to public health, economic impacts, and other changes, unless actions are taken by the Commonwealth to avoid and reduce the consequences of climate change.

Risks will also continue to grow and change beyond mid-century. Although this assessment focuses on the likelihood and consequences of each hazard in the mid-century time horizon, Pennsylvania must also consider risks for infrastructure and other planning processes that require assumptions about conditions in the late 21st century or beyond.

1 INTRODUCTION

1.1 Purpose and objectives

The Pennsylvania Climate Change Act (Act 70 of 2008) requires Pennsylvania to improve its understanding of, and approach to, addressing and adapting to the causes and impacts of climate change. The act requires the Department of Environmental Protection (DEP) to update the Pennsylvania Impacts Assessment and Climate Action Plan (CAP) regularly. Impact assessments provide an understanding of the state of the science concerning the range of significant climate change hazards facing Pennsylvania, such as flood events and increasing temperatures. Figure 4 summarizes the impact assessments completed and in progress.

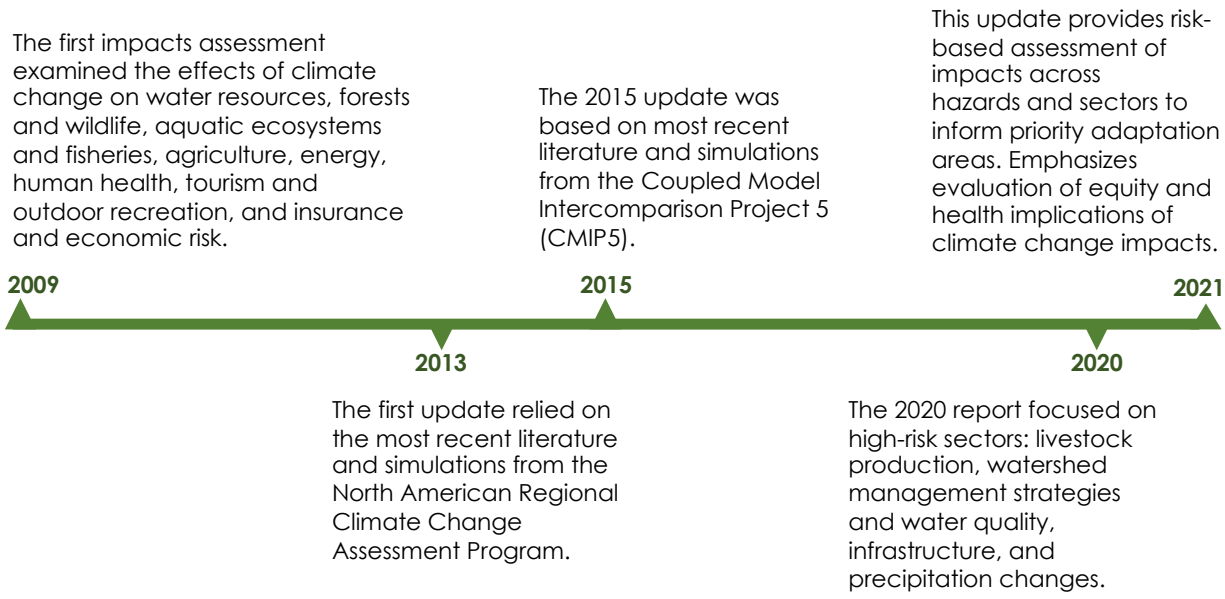

Figure 4. Timeline of Pennsylvania impact assessments

Climate change impacts create a variety of risks across sectors, resources, and populations. The 2021 Impacts Assessment is redesigned as a risk-based assessment to directly inform the CAP by helping decision-makers identify meaningful and prioritized adaptation actions.

This impacts assessment presents impacts by hazard (e.g., increasing average temperatures, sea level rise) rather than by sector, as was done in past IAs. Each hazard is then broken down by consequence category to allow for easier prioritization and comparison between different climate risks. The consequence categories in this assessment align with the sectors specified in Act 70 and key concepts addressed in the CAP:

- Human health
- Environmental justice and equity

- Agriculture
- Recreation and tourism
- Energy and other economic activity
- Forests, ecosystems, and wildlife
- Built infrastructure

Also new to the 2021 impacts assessment are deliberate analysis and consideration of environmental justice and equity and health for each hazard included in the risk assessment. The assessment seeks to answer two key questions:

- What populations may be most vulnerable to climate hazards?
- To what extent are climate changes projected to affect communities that are already overburdened with environmental, economic, health, or other concerns?

This risk-based method produces a prioritized list of risks and impacts. It also identifies the relative timing and severity of expected impacts. These outputs directly inform priority adaptation strategies in the CAP and the lead times needed for adaptation.

1.2 Scope

The impacts assessment and risk assessment ratings focus on mid-century (2050) risks at the state level, with discussion of regional variations (e.g., urban or rural, proximity to waterways), populations, industries, or other areas disproportionately affected. Although risks are evaluated and rated from present-day to mid-century, the assessment also describes potential impacts through the 21st century and provides climate projections for late in the 21st century (2090).

The impact assessment evaluates risks posed by climate change for the following hazards:

- Increasing average temperatures
- Heavy precipitation and inland flooding
- Heat waves
- Landslides
- Sea level rise
- Severe tropical and extra-tropical cyclones

The six selected hazards represent the hazards expected to affect the Commonwealth most significantly. Other hazards noted in previous impact assessments (short-term drought, saltwater intrusion, sinkholes, snowstorms and snow cover, and stormwater management) are acknowledged where appropriate but are not covered in depth.

Appendix A defines the key terms used throughout the report. Appendix B provides more details on the risk assessment process and the approach to analyzing environmental justice and equity impacts. Appendix C provides additional information on the climate data analysis, including detailed methodology and additional data.

2 EXPECTED CLIMATE CHANGES IN PENNSYLVANIA

2.1 Overview of Key Updates

The 2021 Impacts Assessments presents updated climate projections based on the latest available downscaled climate model data. The projections are based on the Localized Constructed Analogs (LOCA) dataset, which includes daily temperature and precipitation projections for 32 model simulations. The 32-model ensemble was used to reduce uncertainty by aggregating the projections from all individual models into one projection.

The latest projections are in line overall with what has been presented in previous impacts assessments: Pennsylvania is expected to get warmer and wetter. Temperature projections indicate that Pennsylvania will see an increase in average annual temperature as well as increasing frequency and intensity of hot, very hot, and extremely hot days. Precipitation projections show that the Commonwealth will see an increase in average annual precipitation, extreme precipitation events, and drought due to more extreme, but less frequent precipitation patterns. The updated climate model analysis shows very similar projections for overall increases in average annual temperature and precipitation (see box).

Impacts Assessment Projections 2015 versus 2021

	2015	2021
Average annual temperature	+5.4°F	+5.9°F
Average annual precipitation	+8%	+8%

Projections are statewide averages for a mid-century time period of 2041–2070 vs. a baseline time period of 1971–2000.

New in the 2021 impacts assessment are projections for more detailed climate variables and thresholds pertaining to key sectors and impacts. For example, projections are provided below for cooling and heating degree-days (measures of energy use), days above extreme heat thresholds relevant for public health and agriculture, growing degree days, extreme precipitation, and more.

Appendix C gives details on the data sources and methods used for projections.

2.2 Temperature and Precipitation Changes

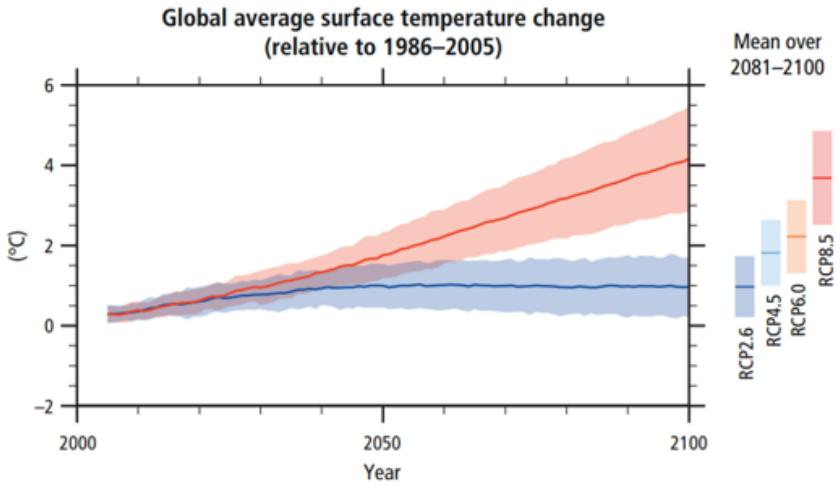
Projected values reported below for temperature and precipitation are presented for up to three future time periods, which represent the average values over 2011-2040 (present context), 2041-2070 (mid-century), and 2070-2099 (end-of-century). All are compared to a baseline period of 1971-2000. Projections are statewide averages of the 50th percentile of the 32 climate models.

Key Term

Representative concentration pathways (RCP)—Scenarios of projected greenhouse gas emissions and atmospheric concentrations used in climate modeling.

The projections reported in the tables and narrative below are based on RCP 8.5 as it represents a global "baseline" scenario without additional efforts to reduce emissions taken. As shown in Figure 5, all emissions scenarios (bookended by RCP 8.5 and RCP 2.6) project similar changes in average temperature through 2050, but temperature changes and other climate change effects vary more by the end of century and beyond depending on global emissions.

Projected temperatures under RCP 4.5 are significantly lower than those under RCP 8.5 by the end of the century. In Pennsylvania, for example, projected average annual temperature is expected to rise 9.3°F (5.2°C) by end-of-century under RCP 8.5, but only 5.5°F (3.1°C) under RCP 4.5—this is similar to the RCP 8.5 projections for mid-century. Projections for all variables under RCP 4.5 are provided in the appendix.



Climate Changes Beyond 2100

Climate change is a dynamic process, and events taking place today can affect the atmosphere for decades into the future. While most readily available climate change projections go through the end of the 21st century, the climate will continue to change well beyond 2100. Exactly how depends on a range of factors, including global greenhouse gas emissions over the next several decades.

Figure 5. Comparison of projected global average surface temperature change

RCP 8.5 (baseline emissions scenario) and RCP 2.6 (lowest emissions scenario). RCP 4.5 is the next-lowest emissions scenario after RCP 2.6. Source: Adapted from IPCC Climate Change 2014 Synthesis Report.

2.2.1 Temperature

Temperatures are projected to increase substantially this century across the Commonwealth. Across global climate models, a consensus exists that as global greenhouse gas emissions rise, average temperatures will increase. The magnitude of increase varies by climate model and depends on how each model captures future concentrations of greenhouse gases in the atmosphere, climate sensitivities, and natural climate variability. These differences account for the uncertainty associated with climate models.

Pennsylvania is projected to see higher average temperatures over the course of the next several decades. Across the state, annual average temperatures are projected to increase by about 5.9°F (3.3°C) by mid-century and 9.4°F (5.2°C) by the end-of-century.[1]

As the climate changes, so will the frequency and severity of extreme temperatures. Extreme heat events are projected to occur more often and become more severe; very hot days, extremely hot days, and heat waves will all increase in frequency. "Very hot" days are days experiencing 95th percentile maximum daily temperatures, or temperatures greater than 95 percent of all days in the baseline period of record. The temperature of very hot days is projected to increase as well as the number of annual occurrences of historical very hot days. Similarly, "extremely hot" days are days with temperatures greater than 99 percent of all days in the baseline period of record. Heat waves are approximated by the annual number of days above 90°F and 95°F as well as the number of consecutive days above 90°F and 95°F.

Key Temperature Findings

Temperatures are already rising and will continue to rise in Pennsylvania. Although temperatures will continue to be variable year-to-year, average annual temperature statewide is expected to increase by 5.9°F (3.3°C) by mid-century and 9.4°F (4.6°C) by end of century from a baseline time period of 1971–2000. Average annual temperature has already risen approximately 1.2°F from 2000 to 2020.

Increasing average temperatures will cause more frequent and intense extreme heat events such as hot days or heat waves. For example, days per year where temperatures reach at least 90°F are expected to increase from 5 days at baseline to 37 days by mid-century and 61 days by end of century. Some parts of the state could experience over 60 days over 90°F by mid-century. Days over 95°F are projected to increase from an average of 0.6 days over 1971-2000 to 11.5 days by mid-century and 30.5 by end of century.

Increasing temperatures will alter the growing season across the Commonwealth and increase cooling degree-days. Heating degree-days will also decrease.

Although the average temperature trends upward, interannual temperature variability will continue; extremely cold temperatures are still possible. For example, though Pennsylvania has been warming the past decade, the 2017–2018 polar vortex created extremely cold conditions for weeks. Pennsylvania will continue to experience temperature fluctuations as the climate warms.

Average Temperatures

Average temperatures are projected to increase from historical levels across the Commonwealth, as shown in Figure 6 and Figure 7. For all months, average daily temperatures are projected to increase by 4.0 to 8.0°F (2.2 to 4.5°C) mid-century and 6.4 to 12.4°F (3.6 to 3.9°C) by the end-of-century, with greatest warming in the summer season. Average monthly high

Temperatures Are Already Warming

Between 2000 and 2020, Pennsylvania's average temperature rose 1.2°F. The months of May, September, and October saw the greatest warming.

[1] The mid-century projection is 0.5°F higher than in the 2015 impacts assessment probably because of small methodological differences in statistical downscaling techniques, the set of global change models used, or in historical baseline datasets. Together, these factors can produce differences of 0.5°F.

temperatures will also increase. The southern corners of the state are projected to experience the highest temperatures in both the near and long terms, while the northwest could see the greatest change.

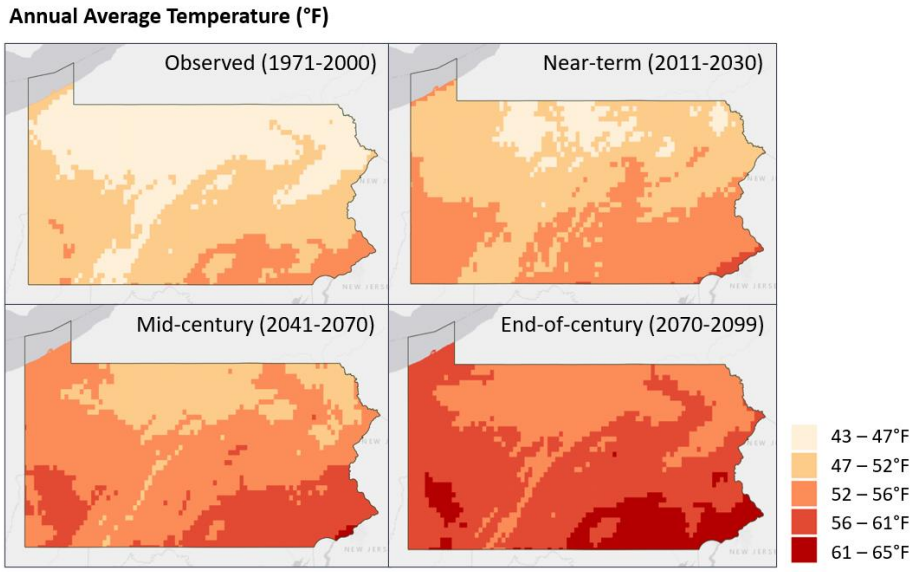


Figure 6. Observed and projected annual average temperatures in Pennsylvania

Based on 50th percentile of 32-model ensemble of LOCA downscaled data, RCP 8.5. The full range of observed and projected values is shown divided into equal increments.

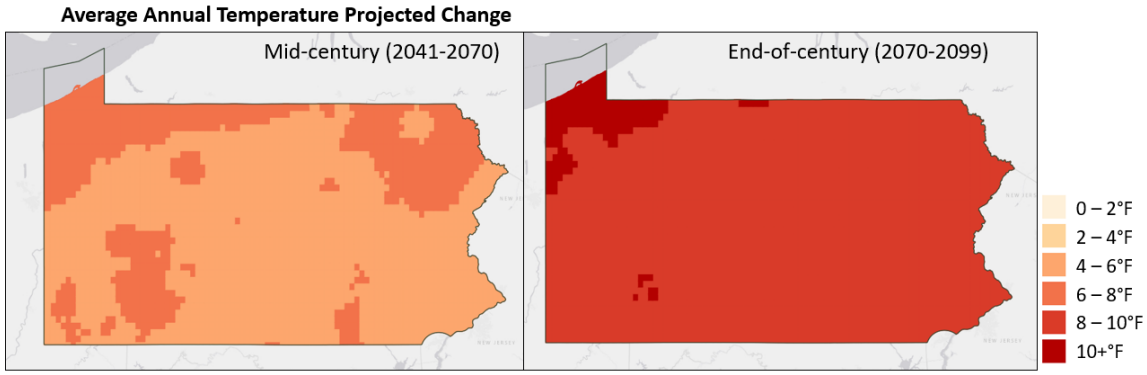

Figure 7. Projected change in average annual temperature from the historic period

Based on 50th percentile of 32-model ensemble of LOCA downscaled data, RCP 8.5

Increased Number and Temperature of Hot Days

The Commonwealth is expected to see an increase in the frequency and intensity of hot days. From 1971 to 2000, on average across the state, there were 5 days above 90°F per year.[2] By mid-century, there are projected to be 37 days with temperatures over 90°F per year on average across the state, and over 60 days in several areas. And by end-of-century, the state is projected to experience an average of 66 days per year with temperatures exceeding 90°F. Compared to

[2] Days above 90, 95, 100, 105°F are when the daily high temperature reaches or exceeds those thresholds.

the baseline, these future projections represent a 630% increase by mid-century and nearly a 1,200% increase by end-of-century.

Pennsylvania is also expected to experience a similar trend in annual numbers of days where temperatures exceed 95°F. While rare historically (less than once per year, on average), days above 95°F are projected to occur about 12 times per year by mid-century and 31 times per year by end-of-century. The warmest parts of the state could experience up to 37 days above 95°F by 2050.

Warming Has Been Greater at Night than During the Day

Average nighttime temperatures have increased faster than average daytime temperatures. From 2000 to 2020, the warming trend was 0.4°F per decade during the day and 0.7°F per decade during the night.[3]

In addition to high daytime temperatures, the Commonwealth could also see more days where nighttime temperatures do not fall below 68°F—a key threshold for infrastructure and human health cooling relief. The number of days with minimum temperatures above 68°F is projected to increase from an average of 3.6 days (baseline) to 25 days by mid-century and 48 days by the end-of-century.

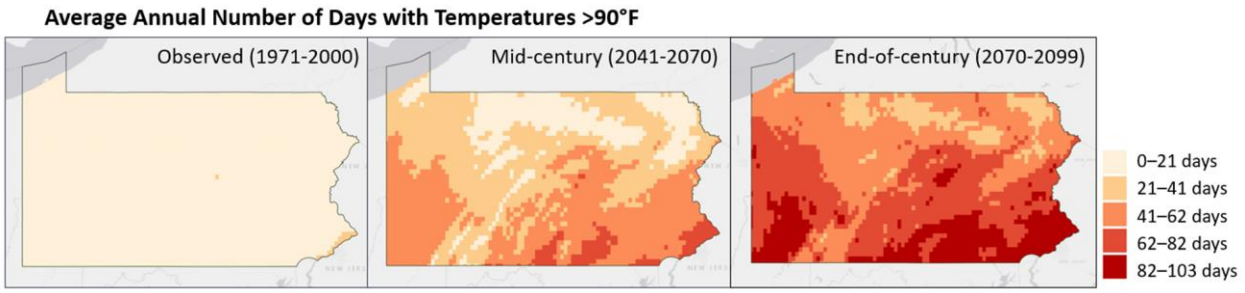

Figure 8. Observed and projected annual days with temperatures above 90°F

Based on 50th percentile of 32-model ensemble of LOCA downscaled data, RCP 8.5. The legend shows the full range of observed and projected values divided into equal increments.

The projected increase in temperature can also be expressed in the temperature ranges that define hot days. In addition to an increase in frequency of hot days shown in the temperature range that defines "very hot" and "extremely hot" days will also rise. Even the interpretation of "very hot" is likely to shift over time. For example, historically, "very hot" days (which are defined as occurring less than 5% of the time) on average in Pennsylvania, have been any temperature above 85.4°F. By mid-century, the "very hot" temperature threshold is projected to be 92.5°F, and by end-of-century, 96.6°F. Similarly, "extremely hot" days (which occur less than 1% of the time) will also be substantially hotter. Historically (1971–2000), "extremely hot" days were, on average across the state, days with temperatures > 90.1°F; "extremely hot" days are projected to be days > 97.6°F by mid-century and days >101.6°F by end-of-century.

[3] National Centers for Environmental Information. Climate at a Glance- Statewide Time Series. NOAA. https://www.ncdc.noaa.gov/cag/statewide/time-series

Besides increasing extreme temperature ("very hot" and "extremely hot") thresholds, the number of days experiencing historical extreme temperature thresholds is projected to increase. Figure 9 highlights the map of observed and projected days with historical "very hot" (95th percentile) temperatures across the Commonwealth. Particularly in the south-western region of the state, by mid-century, the number of days experiencing historical "very hot" temperatures (on average 85.4°F across the state) is projected to be at least 70 days.

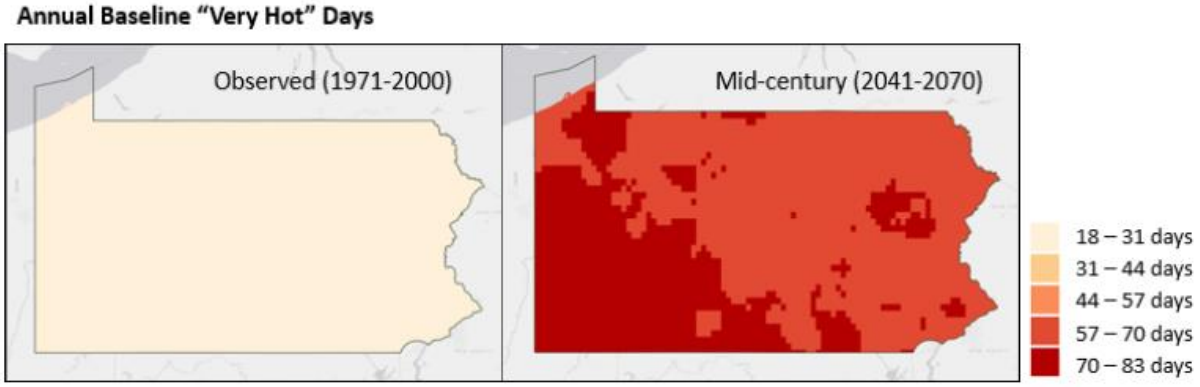

Figure 9. Observed and projected annual days with "very hot" temperatures

Based on 50th percentile of 32-model ensemble of LOCA downscaled data, RCP 8.5. The "very hot" threshold varies by grid cell, based on the 5th percentile of observed days' maximum temperature. The legend shows the full range of observed and projected values divided into equal increments.

Another indicator of Pennsylvania's warming climate is the change in heating degree days, cooling degree days, and growing degree days. Heating and cooling degree days are indicative of energy needed to heat and cool buildings, respectively.[4] As temperatures increase, heating degree days generally go down and cooling degree days go up.

Annual total heating degree days are anticipated to decrease by 22% by mid-century and 33% by end-of-century compared to the baseline. Annual total cooling degree days, however, are projected to increase by almost 150% by mid-century and by 260% by end-of-century. Figure 10 illustrates the shift in heating and cooling degree days in Pennsylvania.

[4] U.S. Energy Information Administration. 2020. "Units and calculators explained: Degree days." https://www.eia.gov/energyexplained/units-and-calculators/degree-days.php.

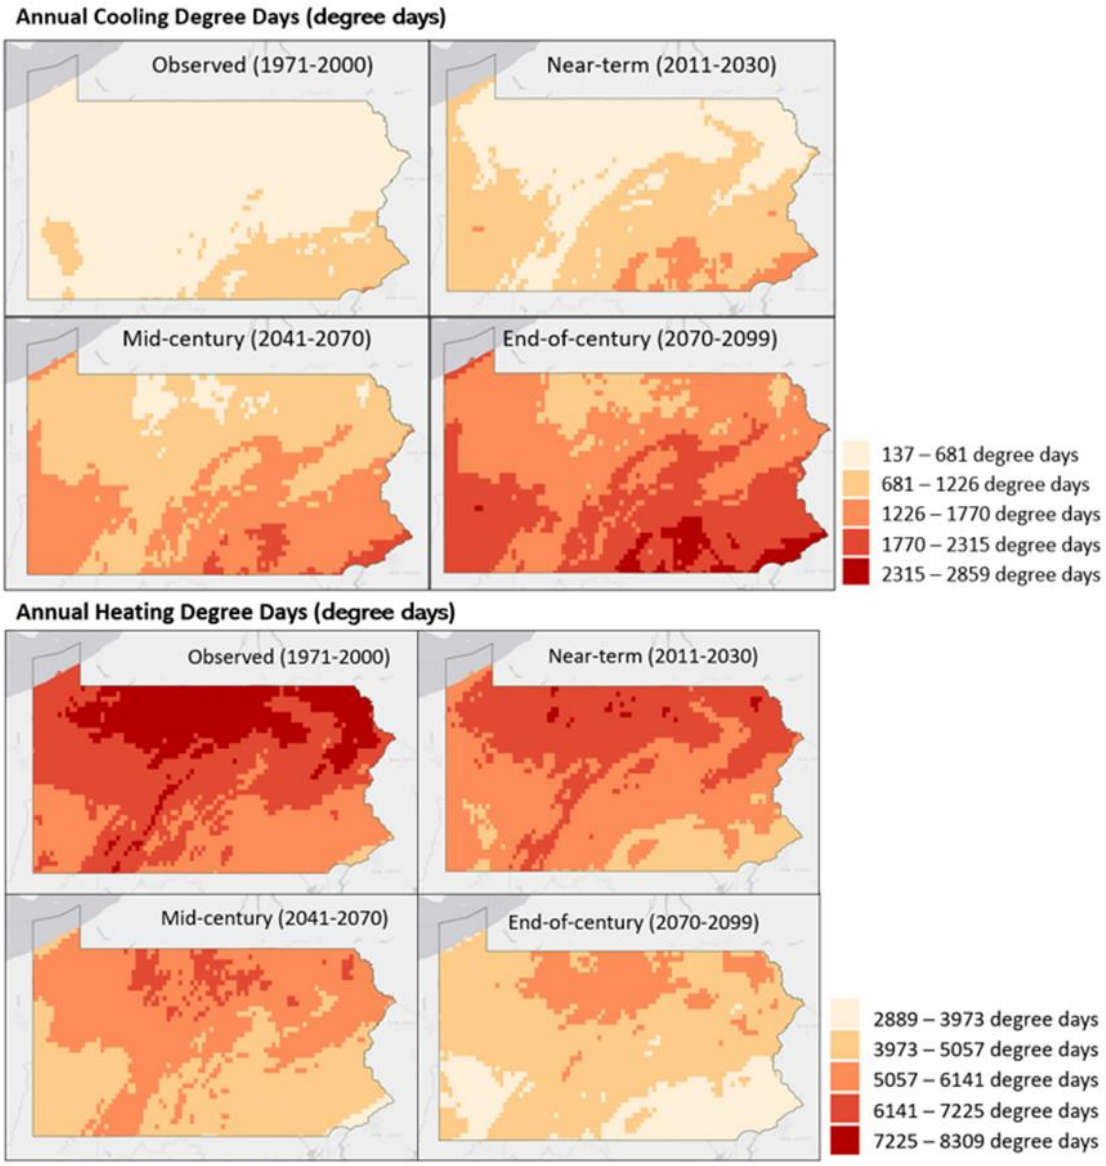

Figure 10. Observed and projected annual cooling and heating degree days

Based on 50th percentile of 32-model ensemble of LOCA downscaled data, RCP 8.5. The legend shows the full range of observed and projected values divided into equal increments

Increasing temperatures will alter the growing season across the Commonwealth. Growing degree days are a heat unit that can help indicate how temperature may impact (e.g., facilitate or impede) different crops and pests' development.[5] Growing degree days are measured here as the annual number of degree days where the average temperature is greater than 50°F. Growing degree days are a good indicator for the length of the growing season, but they are not a direct correlation. Growing degree days are increasing across the state, but the magnitude of growing

[5] PennState Extension. 2020. "Understanding Growing Degree Days." https://extension.psu.edu/understanding-growing-degree-days.

degree days varies by region (see Figure 11). Growing degree days are historically highest in the Southeastern corner of the state, which will continue to experience the highest number of Growing Degree Days by mid-century. On average, the state is projected to see a 50% increase in growing degree days by mid-century (see Figure 11). By end-of-century, growing degree days are projected to increase by 81%. Figure 12 visualizes how monthly cumulative growing degree days are project to increase across all time periods analyzed.

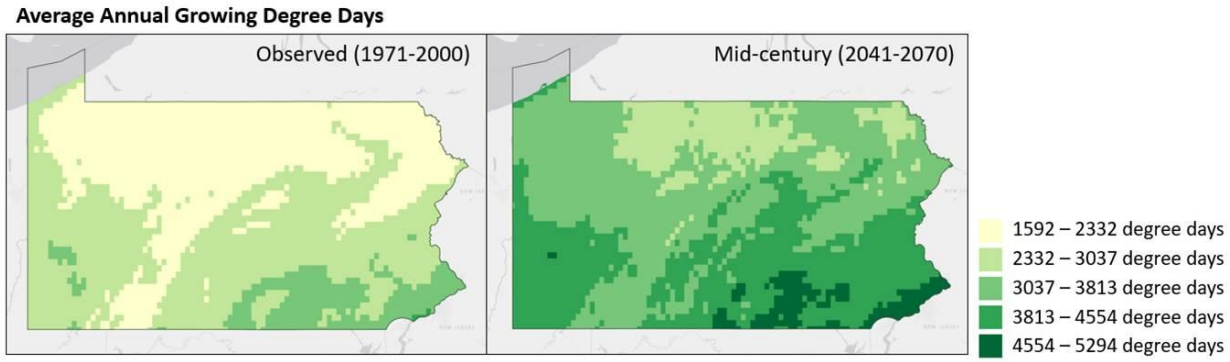

Figure 11. Observed and projected average annual growing degree days

Based on 50th percentile of 32-model ensemble of LOCA downscaled data, RCP 8.5. The full range of observed and projected values is shown divided into equal increments.

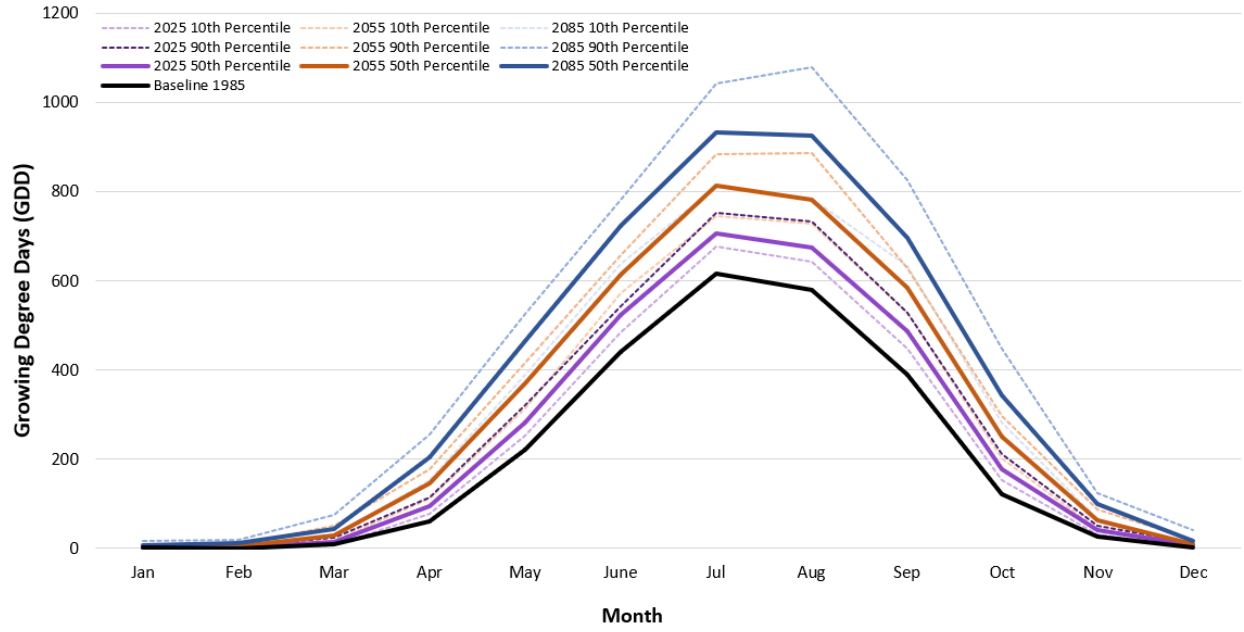

Figure 12. Observed and projected average monthly cumulative growing degree days

Based on 32-model ensemble of LOCA downscaled data, RCP 8.5. Values for 2025 represent all years 2011–2040, those for 2055 represent 2041–2070, and those for 2085 represent 2070–2099. Values are statewide averages.

Observed and Projected Temperature Data

Table 2 summarizes statewide average projections for temperature variables under RCP 8.5. Projections under the lower RCP 4.5 emission scenario are provided in Appendix C. The

statewide average for the 10th to 90th percentile range is included to illustrate the spread in projections and highlight the range of possible outcomes.

Table 2. Statewide average observed and projected temperature variables for mid-century and end-of-century

	Observed Baseline (1971–2000)	Mid-Century (2041–2070)		End-of-Century (2070–2099)	
		Projected Value (10th–90th Percentile)	50th Percentile Absolute Change	Projected Value (10th–90th Percentile)	50th Percentile Absolute Change
Average annual temperature (°F)	48.3	54.1 (52.7–55.9)	5.9	57.6 (54.9–60.0)	9.4
Average annual minimum temperature (°F)	37.6	43.4 (42.1–45.2)	5.9	46.8 (44.5–49.3)	9.2
Average annual maximum temperature (°F)	58.9	64.9 (63.1–66.9)	6.0	68.2 (65.7–71.3)	9.3
Heating degree days (degree days)	6,600	5,165 (4,695 –5,503)	-1,435	4,430 (3,848–4,978)	-2,170
Cooling degree days (degree days)	483	1,185 (959–1,432)	703	1,722 (1,283–2,274)	1239
"Very hot" (95th percentile) temperature (°F)	85.4	92.5 (89.9–96.6)	7.1	96.7 (92.1–103.5)	11.2
Days with temperature above "very hot" baseline temperature (°F)	18.3	69.7 (51.1–80.1)	51.4	98.6 (71.2–114.2)	80.3
"Extremely hot" (99th percentile) temperature(°F)	90.1	97.6 (94.7–103.2)	7.5	101.6 (96.6–107.9)	11.5
Days above baseline "extremely hot" temperature	3.7	35.1 (19.7–50.3)	31.4	65.1 (34.3–87.9)	61.4
Days with temperature >90°F	5.1	37.0 (22.0–51.2)	31.9	65.5 (35.8–89.0)	60.5
Days with temperature >95°F	0.6	12.1 (5.1–26.9)	11.5	31.1 (10.0–62.0)	30.5
Days with temperature >100°F	0.0	2.4 (0.6 - 11.6)	2.4	9.3 (1.5 - 34.8)	9.3
Days with low temperature > 68°F	3.6	25.0 (18.6–36.5)	21.4	47.7 (30.6–72.4)	44.1
Consecutive days above 90°F	1.4	6.2 (1.8–12)	4.8	11.4 (4.6–27.2)	10.0
Consecutive days above 95°F	0.1	2.4 (0.2–5.3)	2.3	4.9 (1.2–13.7)	4.8
Growing degree days (degree days)	2,472	3,698 (3,351–4,033)	1,226	4,482 (3,865–5,145)	2,010

Note: Projections are based a 32-model ensemble of LOCA downscaled data, RCP 8.5. Values reported are the median value of the 32-model ensemble and the 10th and 90th percentile values across models.

2.2.2 Precipitation

In the coming century, precipitation patterns will change across the Commonwealth. While climate models generally agree that temperature will increase over the century, there is less consensus in how precipitation will change because it is more difficult to model. Limitations in statistical downscaling techniques make it difficult to project extreme precipitation values. The LOCA method was developed to improve models' ability to capture extreme rainfall events; however, the LOCA method remains limited in its capacity to project changes in extreme precipitation in variables like rainfall intensity.[6,7] For example, significant differences across datasets (e.g., precipitation observation data taken at different times at different observation stations, leading to temporal misalignment for observations assumed between stations) lead to significant uncertainty in projections based on those observed data—uncertainty that should be taken into account in climate resilience planning.[8]

Key Precipitation Findings

- Extreme rainfall events are projected to increase in magnitude, frequency, and intensity.
- Consecutive dry days are projected to increase.
- Overall, Pennsylvania could see more total rainfall, but occurring in more spaced-out heavy rain events.
- Most increases in precipitation will occur in the winter and spring months.

Like temperature projections, precipitation projections are reported by the 10th, 50th, and 90th percentile of the future precipitation variables' distribution in order to capture the uncertainty associated with the range of potential values. Despite limitations, climate models help to provide insight into the potential changes in precipitation that Pennsylvania may experience in the coming decades.

Climate models project that the Commonwealth will see an increase in average annual precipitation, extreme precipitation events, and drought, as both "very heavy" precipitation events and consecutive dry days increase. Pennsylvania could experience more total average rainfall, occurring in less frequent but heavier rain events.

Finally, precipitation changes could include more precipitation falling as rain rather than snow, as well as increased snowmelt,[9] which could affect flooding and other hazards.[10]

Increased Average Precipitation

Pennsylvania has already been getting wetter. Between 2000 and 2020, Pennsylvania experienced an increase in annual precipitation of approximately 4.6 inches compared to the 1971–2000 period.[11] (see Figure 13).[12] May, June, and October saw the greatest increases in precipitation.

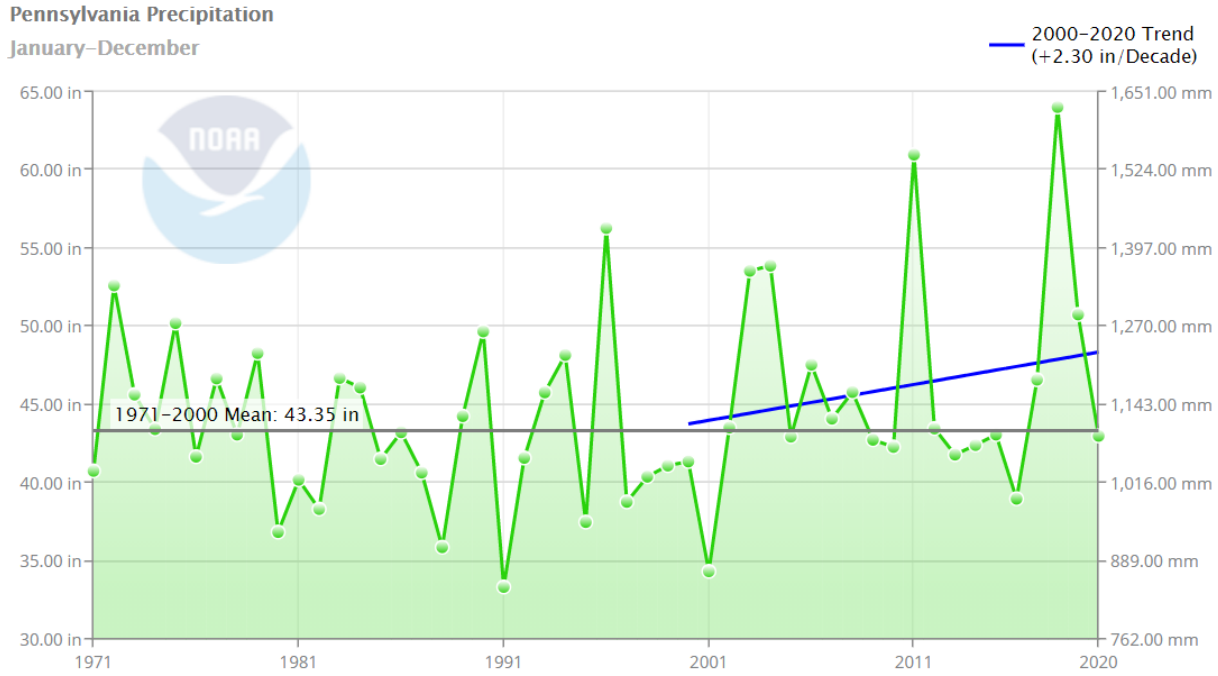

Figure 13. Annual precipitation in Pennsylvania 1971–2020

Source: National Centers for Environmental Information. Climate at a Glance- Statewide Time Series.

Annual average precipitation is projected to continue to increase. Pennsylvania will likely experience a small (8%) increase in annual precipitation by mid-century and slightly greater (12%) increase by end-of-century compared to the observed historical baseline (1971–2000). The mid-century projection is essentially the same as that from the 2015 assessment.[13] Historically, average annual precipitation was 44 inches (1,105 mm). Average annual precipitation is

projected to increase to 47 inches (1,198 mm) by mid-century, and to 49 inches (1,232 mm) by end-of-century.

Monthly precipitation patterns are also projected to shift slightly over the century. Most increases in precipitation will occur in the winter and spring, with future precipitation conditions remaining similar to historic patterns during summer and fall (see Figure 15). This seasonal pattern of projected precipitation change is consistent with numerous past studies for the Commonwealth.[14] The range in monthly total precipitation values shown across models indicates the variability and uncertainty in precipitation projections (see Figure 15).

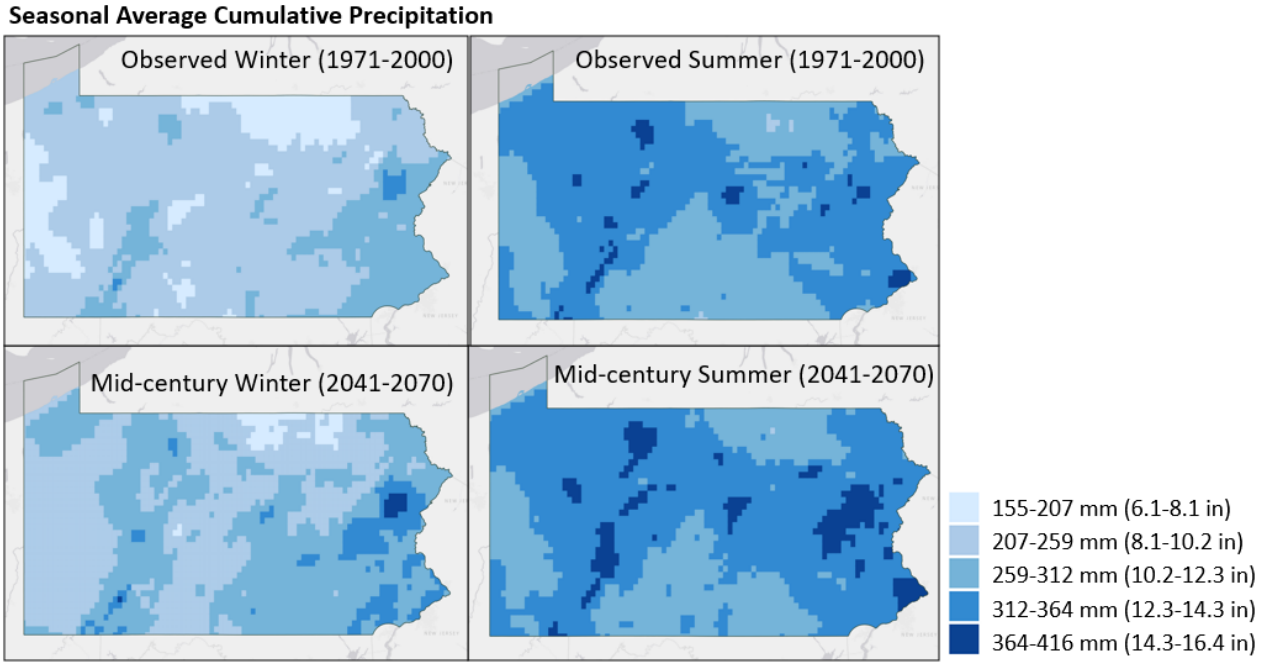

Figure 14. Observed and projected winter and summer seasonal cumulative precipitation

Based on 50th percentile of 32-model ensemble of LOCA downscaled data, RCP 8.5. The legend shows the full range of observed and projected values divided into equal increments.

[14] Shortle et al., 2009 IA; Ross et al., 2013 IA; PSU, 2015 IA.

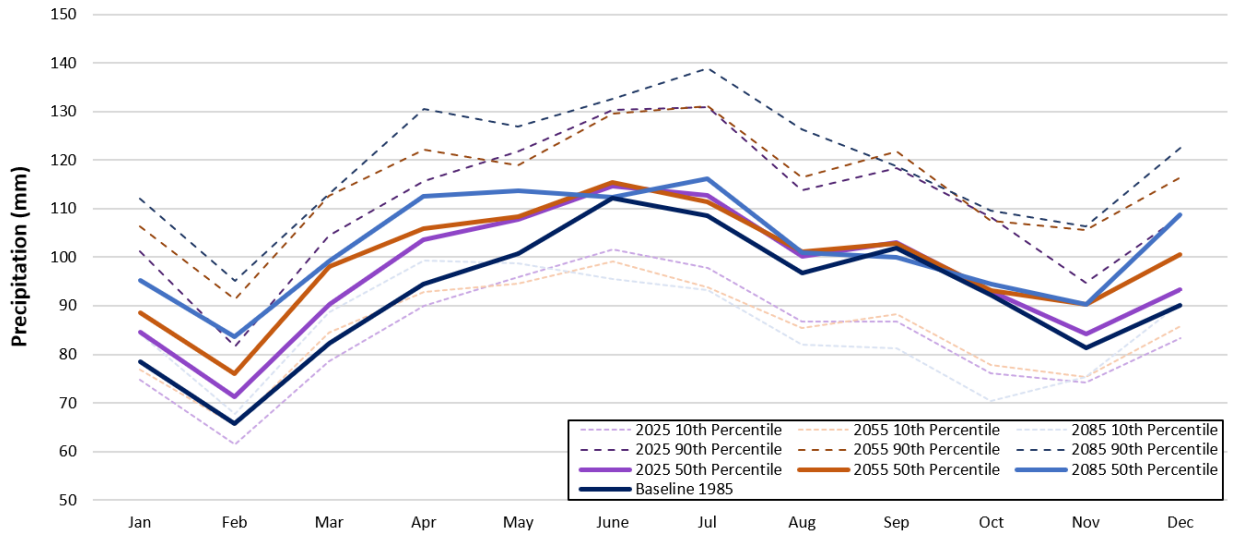

Figure 15. Statewide observed and projected average monthly precipitation

Based on 32-model ensemble of LOCA downscaled data, RCP 8.5. Values for 2025 represent all years 2011–2040, values for 2055 represent all years 2041-2070, and values for 2085 represent all years 2070–2099.

Increased Extreme Precipitation

Consistent with findings from prior assessments,[15],[16] extreme rainfall events are projected to increase in magnitude, frequency, and intensity as the century progresses. The statewide average amount of rainfall that falls during "very heavy" precipitation events (which occur less than 5% of the time) is projected to rise from 0.7 inch (17.2 mm) (historical baseline) to 0.8 inch (19.3 mm) by mid-century and to 0.8 inch (20.3 mm) by end-of-century. These represent 12% and 18% increases respectively. The amount of rainfall during "extremely heavy" precipitation events (which occur less than 1% of the time) is also projected to rise—a 13% increase by mid-century and 20% increase by end-of-century. Rainfall during "extremely heavy" precipitation events will increase from 30.2 mm (1.2 inch) (historical baseline) to 34.1 mm (1.3 inch) and 36.1 mm (1.4 inch) by mid-century and end-of-century respectively. Finally, the magnitude of precipitation during longer rain events will also increase. The annual maximum amount of precipitation during an annual 3-day precipitation event is projected to increase by 11% by mid-century and 16% by end-of-century. Overall, climate projections show a consistent and notable increase in the amount of rainfall during extreme precipitation events.

[15] Shortle, J., Abler, D., Blumsack, S., et al. 2009. "Pennsylvania Climate Impact Assessment." Pennsylvania Department of Environmental Protection. http://files.dep.state.pa.us/Energy/Office%20of%20Energy%20and%20Technology/OETDPortalFiles/Climate%20Change%20Advisory%20Committee/7000-BK-DEP4252%5B1%5D.pdf

[16] Ross, A., Benson, C., Abler, D., et al. 2013. "Pennsylvania Climate Impacts Assessment Update." PA DEP. http://www.depgreenport.state.pa.us/elibrary/GetDocument?docId=6806&DocName=PA%20DEP%20CLIMATE%20IMPACT%20ASSESSMENT%20UPDATE.PDF%20

Extreme rainfall events are also projected to become more frequent; the number of days with historical "very heavy" (17.2 mm on average statewide) and historical "extremely heavy" (30.4 mm) precipitation amounts is projected to rise. Pennsylvania is projected to experience 24% more days with observed baseline "very heavy" precipitation amounts and 42% more days with historical "extremely heavy" precipitation amounts by mid-century (compared to baseline). By end-of-century, the Commonwealth will see 36% more days with observed historical "very heavy" precipitation amounts and 67% more days with observed baseline "extremely heavy" precipitation amounts. The number of days with "very heavy" precipitation will increase across the State (see Figure 16). The Southeastern corner of Pennsylvania will continue to experience the highest number of days with very heavy precipitation throughout the century.

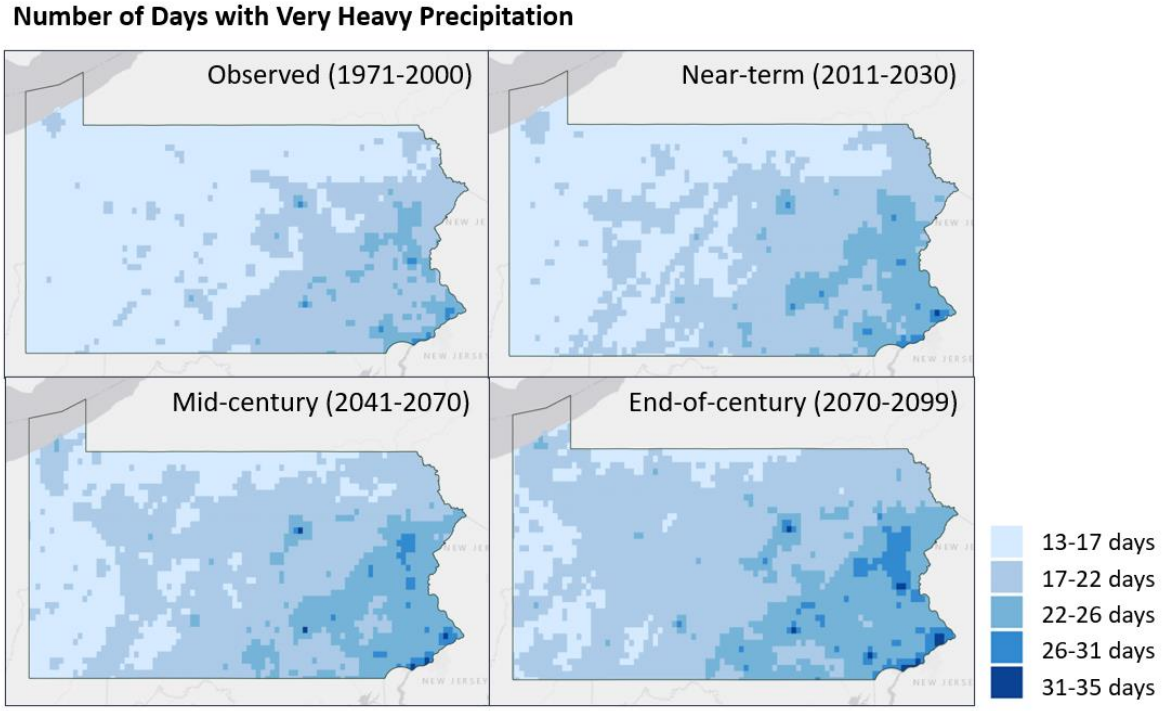

Figure 16. Observed and projected annual days with "very heavy" precipitation

Based on 50th percentile of 32-model ensemble of LOCA downscaled data, RCP 8.5. The "very heavy" threshold varies by grid cell, based on the 95th percentile of observed rainy days. The full range of observed and projected values is shown divided into equal increments.

This change is already occurring. Pennsylvania weather data shows that over 80% of Cooperative Observer Program sites surveyed by the state climatologist are seeing an increase in heavy rain events in the 2010s when compared to the 1980s.[17]

[17] Imhoff, K. Heavy Rain Events in Pennsylvania, Appendix A. Research completed by Kyle Imhoff, Pennsylvania State Climatologist, Penn State University and analyzed by Jeff Jumper, State Meteorologist, Pennsylvania Emergency Management Agency.

Additionally, the number of days with more than 3 inches of rainfall is projected to increase by 52% by mid-century and 93% by end-of-century (compared to baseline). Historically, on average statewide, Pennsylvania has experienced less than one day per year with more than 3 inches of rainfall and the number of days by mid- and end-of-century is projected to remain less than one day per year.

Finally, Pennsylvania will continue to experience an increase in more intense rain events. Sudden, short, and heavy rainfall events, known as cloudbursts, are often responsible for flash flooding. Pennsylvania experiences flash flooding, according to research by Pennsylvania Department of Transportation (PennDOT).[18] Climate change is expected to increase the intensity and frequency of cloudburst events.[19,20,21] These events result in significant impacts (i.e., flooding), but are not well captured in many climate models. The models used here attempt to capture precipitation events at daily resolution rather than hourly or sub-daily resolutions. Greater research on the change in frequency and intensity in cloudbursts over the coming century is needed.[22,23]

Increased Drought Conditions

While average and extreme precipitation is projected to increase, a slight increase in drought conditions is also probable. The extent of drought conditions remains uncertain, but higher temperatures are projected to increase evaporative demand and thus reduce water availability.[24] The number of days without rain will rise over the century. The annual maximum in consecutive dry days is projected to increase from 12.5 days historically to 13.4 days by mid-century and 13.9 days by end-of-century. This increase represents a 7% increase by mid-century and 11% increase by end-of-century. These findings of fewer rainy days and longer periods without rain are consistent with prior assessments.[25] As shown in Figure 17, average monthly consecutive dry days in Pennsylvania are projected to increase in the late summer and fall months. Average monthly consecutive dry days are not projected to change significantly from

historical conditions in the winter and spring. Overall, changes in precipitation events will create wetter winters and springs and drier falls in the Commonwealth.

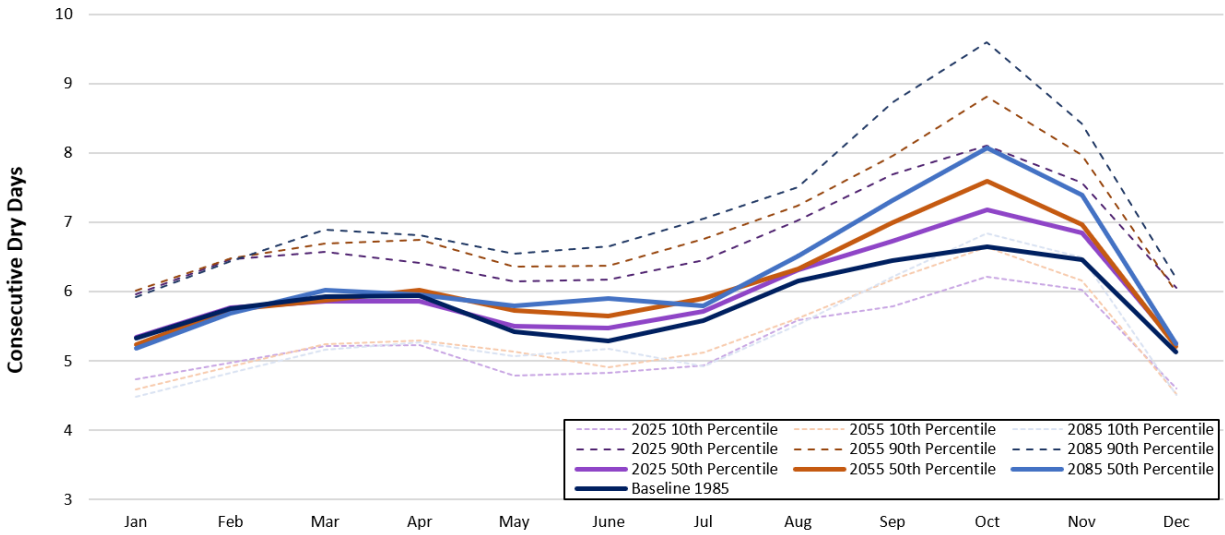

Figure 17. Statewide observed and projected average monthly consecutive dry days

Based on 32-model ensemble of LOCA downscaled data, RCP 8.5. Values for 2025 represent all years 2011–2040, values for 2055 represent all years 2041–2070, and values for 2085 represent all years 2070–2099.

Drought conditions have declined in recent decades but persist despite more overall precipitation, according to measurements using the Palmer Drought Severity Index.[26] This is a standardized index used to understand the intensity and duration of long-term drought conditions.[27] Figure 18 shows Pennsylvania's drought trends from January 1971 to December 2020 and highlights a trend toward increased precipitation. It also highlights that drought conditions continue to occur even with a trend toward greater precipitation.

Observed and Projected Precipitation Data

Table 3 summarizes statewide average projections for precipitation variables under RCP 8.5. Projections under the lower RCP 4.5 emission scenario are provided in Appendix C. The average for the 10th and 90th percentile range is included to illustrate the spread in projections and highlight the range of possible outcomes.

Table 3. Statewide average observed and projected precipitation variables

	Baseline (1971–2000)	Mid-Century (2041–2070)		End-of-Century (2070–2099)	
		Projected Value (10th–90th Percentile Range)	50th Percentile Percent Change	Projected Value (10th–90th Percentile Range)	50th Percentile Percent Change
Annual precipitation (inches)	43.5	47.1 (44.2–49.7)	8.4%	48.5 (44.7–51.4)	11.5%
Days with rainfall > 3 inches (days)	0.1	0.1 (0.0–0.2)	51.6%	0.1 (0.1–0.2)	93.3%
Annual maximum consecutive dry days (days)	12.5	13.4 (12.2–14.8)	7.2%	13.9 (12.6–15.6)	11.3%
"Very heavy" (95th percentile) precipitation (inches)	0.7	0.8 (0.7–0.8)	12.1%	0.8 (0.7–0.9)	17.7%
Days with precipitation above baseline "very heavy" precipitation (days)	12.4	15.4 (13.6–17.4)	24.5%	16.8 (14.5–18.8)	36.2%
"Extremely heavy" (99th percentile) precipitation (inches)	1.2	1.3 (1.2–1.4)	13.1%	1.4 (1.3–1.5)	19.8%

	Baseline (1971–2000)	Mid-Century (2041–2070)		End-of-Century (2070–2099)	
		Projected Value (10th–90th Percentile Range)	50th Percentile Percent Change	Projected Value (10th–90th Percentile Range)	50th Percentile Percent Change
Days with precipitation above baseline "extremely heavy" precipitation (days)	2.5	3.5 (2.9–4.3)	41.9%	4.2 (3.3–5.0)	68.5%
Annual maximum 3-day precipitation event (inches)	2.4	2.6 (2.3–3)	11.2%	2.8 (2.3–3.1)	16.3%

Note: Projections are based a 32-model ensemble of LOCA downscaled data, RCP 8.5. Values reported are the median for the 32-model ensemble, as well as the 10th and 90th percentile values across models.

2.3 Coastal Changes

2.3.1 Coastline along the Delaware Estuary

Pennsylvania has a small 56-mile coastline along the Delaware estuary, as seen in Figure 19. This coastline spans from Morrisville, PA to Marcus Hook, PA.[28] Because of land subsidence in the Mid-Atlantic region, local sea level rise is projected to be approximately 0.06 inch per year greater than the global average.[29] In an intermediate sea level rise scenario, water levels are expected to rise by 2.1 feet by mid-century, and 4.7 feet by the end of the century.[30] Figure 20 highlights sea level rise scenarios in the Delaware Estuary Coastal Zone over the course of the century, including the intermediate scenario.

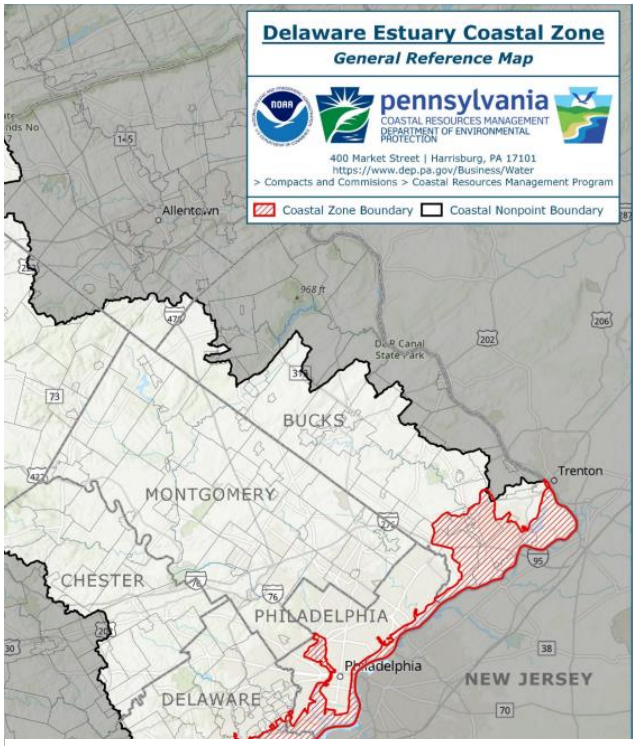

Figure 19. Delaware Estuary Coastal Zone

As the coastline experiences a rise in sea level, the abutting tidal wetlands may be inundated.[31] Already, Pennsylvania's coastline varies with the large tidal fluctuations in the Delaware River and Chesapeake Bay. Sea level rise will exacerbate these fluctuations. While Pennsylvania's coastal area is relatively limited, sea level rise threatens

the ecosystem and low-lying facilities and properties in the Delaware Estuary Coastal Zone. Figure 21 and Figure 22 highlight the change in areas that may be inundated under a 3-foot rise in sea level. Additionally, sea level rise is expected to result in salinity increases throughout the Delaware estuary, which will affect ecosystems and drinking water supplies. The consequences of sea level rise are further discussed in section 4.5.3.

Areas shaded in lime green represent low-lying areas, dark blue areas describe existing water bodies, and light blue areas highlight inundated areas. Source: NOAA Sea Level Rise Viewer. https://coast.noaa.gov/slr/.

2.3.2 Coastline along Lake Erie

Pennsylvania also has a 64-mile coastline along Lake Erie (highlighted in Figure 23). With climate change, Lake Erie is projected to experience significantly higher variability in water levels.[32] Warmer temperatures and increased extreme precipitation events are anticipated to have substantial effect on Lake Erie. Warmer temperatures will increase evapotranspiration, which in turn is projected to lower levels in Lake Erie in some years or months.[33] However, at other points, increased average precipitation and greater extreme precipitation events are projected to raise water levels. [34] For example, as a result of increased rain, Lake Erie hit its highest ever water level in June 2019.[35] Lake Erie's water levels are expected to continue fluctuating in the decades to come.

[32] Gronewold, D., and Rood, R. 2019. "Climate Change Sends Great Lakes Water Levels Seesawing." Scientific American. https://www.scientificamerican.com/article/climate-change-sends-great-lakes-water-levels-seesawing/

[35] Johnston, L. 2020. Lake Erie broke May high water record—again. https://www.cleveland.com/news/2020/06/lake-erie-broke-may-high-water-record-again.html

Climate change is also projected to affect water quality and increase erosion. Climate change will result in higher lake water temperatures and greater runoff from the increased frequency of extreme precipitation events.[36] Combined warmer waters and increased runoff will boost the likelihood of e-coli and algal blooms.[37] In the summer of 2014, Lake Erie experienced a harmful algal bloom in its western basin. Algal bloom such as these are expected to become more frequent with climate change. Increased runoff is also anticipated to cause greater bluff instability as runoff erodes the bluff face.[38] Additionally, as winter temperatures become less severe, Lake Erie will be covered by less ice, and ice dunes that typically protect the Presque Isle's beaches will experience greater erosion.[39] Coastal erosion rates are also expected to increase as the Lake's coastlines are impacted more frequently by severe storms.[40]

Figure 23. Lake Erie watershed

Warmer temperatures will also alter snow patterns. In the winter, warmer water and a lack of surface ice on the lake will likely result in an increase in lake effect snow events in the short term.[41],[42] Lake Erie is anticipated to experience significant overall change from climate change.

2.4 Extreme Weather Events

Extreme weather events will continue to have severe impacts on Pennsylvania as climate change increases the intensity of extreme weather events. In the literature, a consensus highlights that extreme storms are expected to be stronger and lead to heavier rains.

[41] Liberto, T. 2017. The paradox of lake effect snow: global warming could bring the Great Lakes more of it, at least for a while. https://www.climate.gov/news-features/event-tracker/lake-effect-snow-paradox

[42] As air temperatures increase, the cold air that drives the lake-effect will also warm. As a result, in the long-term, lake-effect snow events have the potential to decrease in frequency.

Cumulative precipitation from storms is expected to increase.[43] The literature does not expect that climate change will impact the frequency of tropical cyclones or major winter cyclones.[44]

While severe non-tropical rain events are anticipated to become more likely,[45] snowstorms are projected to decrease in frequency.[46] Smaller storms rather than major storms are forecasted to comprise the majority of this reduction.[47] Figure 24 highlights the projected decrease in days in which snow events can occur. Increasing temperature may also decrease the severity of winter weather and reduce the amount of precipitation that falls as snow.[48] As mentioned in the previously in section 2.3.2(Coastline along Lake Erie), lake-effect snow events are projected to increase in the short-term.[49] In the long-term, however, as winter temperatures warm significantly, lake effect snow events will decrease.[50]

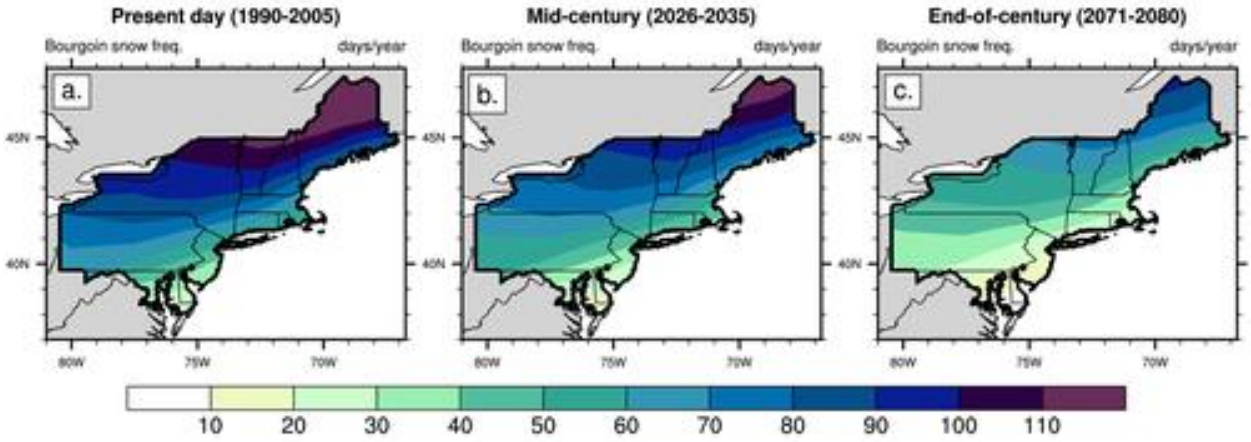

Figure 24. Average number of days per year where snowfall could occur, present-day, mid-century, and end-of-century.

damages from wind are significant driver of damage during these events. Overall, climate change is projected to alter the frequency and intensity of extreme weather events.

Source: NOAA National Centers for Environmental Information. 2020. Billion-Dollar Weather and Climate Disasters: Time Series. https://www.ncdc.noaa.gov/billions/time-series

2.5 Landslides and Sinkholes

Currently, landslides and sinkholes are serious hazards in the Commonwealth that affect transportation networks and buildings and create serious health and safety concerns.[52] The effect of climate change on the location, quantity, frequency, and severity of landslides and sinkholes remains highly uncertain. The role that climate change will play in the highly complex and variate mechanisms that cause these hazards has not yet been established.

In research literature, there is confidence that climate change can affect the stability of slopes and therefore landslides,[53] but the nature of the effect is unclear. Projections indicate that an increase in the frequency and intensity of severe precipitation events could increase landslide risk, because heavy rainfall is a key cause of certain types of landslide events.[54] Significant uncertainty, however, is associated with these projections.

Little research has been conducted on how climate changes affects sinkhole development in the United States. Sinkhole development in the United States is caused by changes in the

[54] Gariano and Guzzetti. 2016. "Landslides in a changing climate."

groundwater table (i.e., water input into or extraction from the ground), soil disturbance, concentrated water flow, erosion, and heavy surface loads.[55],[56] Activities and conditions that may drive these mechanisms include the thawing of frozen ground, groundwater pumping, land use practices, construction, drought, declining water levels, mining, pipe leakage, water impoundments (i.e., basins, ponds, reservoirs), runoff, and drilling.[57],[58] Drought and groundwater table decline have both been linked to climate change, and are significant drivers of sinkhole development.[59],[60] With projected increases in the occurrence of drought and low summer groundwater levels in the coming century, sinkholes could potentially become more frequent as climate change intensifies. More research is needed to understand how climate change's impact on the mechanisms that cause sinkhole development might affect the occurrence of sinkholes in the Commonwealth.

3 RISK ASSESSMENT OVERVIEW

3.1 Approach Overview

The IA applies a risk-based method by evaluating the relative likelihood and consequences of key climate hazards, across sectors. Based on the previous IA, the risk assessment focuses on six primary climate hazards expected to affect the Commonwealth:

- Increasing average temperatures
- Heavy precipitation and inland flooding
- Heat waves
- Landslides
- Sea level rise
- Severe tropical and extra-tropical cyclones

The process for analyzing and evaluating each hazard is shown in Figure 26. The likelihood of each hazard occurring is evaluated on a scale of 1 to 4 and the severity of each consequence category is also evaluated on a scale of 1 to 4 for the following categories:

- Human health
- Environmental justice and equity
- Agriculture
- Recreation and tourism
- Energy and other economic activity
- Forests, ecosystems, and wildlife
- Built infrastructure

Key Terms

Risk—The chance a climate hazard with cause harm. RISK = LIKELIHOOD X CONSEQUENCE.

Climate hazard—Changes or events related to global climate change. Climate hazards can be discrete (e.g., severe storms) or ongoing (e.g., increasing average temperatures)

Likelihood—The probability or expected frequency a climate hazard is expected to occur

Consequence—A measure of the severity of impacts from a climate hazard

EJ areas—PA Environmental Justice Areas. Includes any census block group where 20% or more of individuals live in poverty, and/or 30% or more is minority.

Each hazard then receives an overall risk rating, based on the product of its likelihood and consequence scores, per the matrix in Table 4. Two hazards with similarly high consequence scores could therefore have significantly different overall risk ratings due to differences in the likelihood the hazard will occur. The likelihood and consequence rating scales, among other methodological details, can be found in Appendix B.

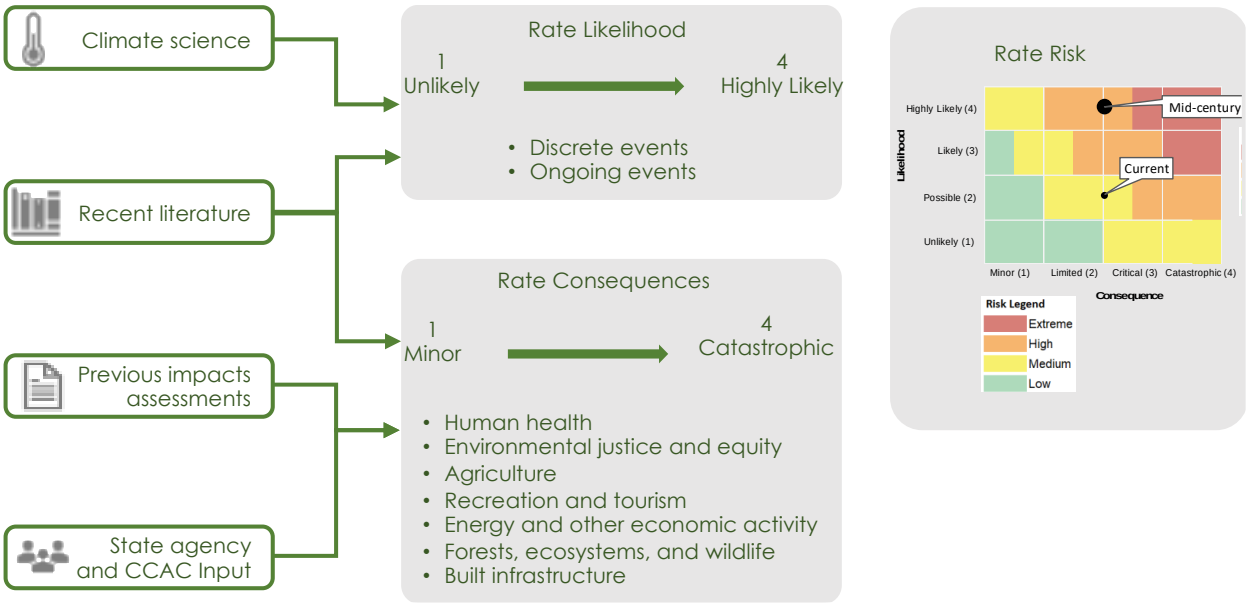

Figure 26. Risk assessment process overview

Table 4. Risk rating matrix and scoring rubric

Likelihood	Consequence				Risk Score (low-end inclusive)	Rating
	Minor	Limited	Critical	Catastrophic		
Highly Likely	4	8	12	16	12+	Extreme
Likely	3	6	9	12	6–11.9	High
Possible	2	4	6	8	3–5.9	Medium
Unlikely	1	2	3	4	1–2.9	Low

This assessment is focused on evaluating the direct impacts in Pennsylvania from each of the six hazards. However, the Commonwealth could be affected by the ripple effects of national or global climate changes beyond its borders, which could increase the severity of impacts. For example, a major hurricane or flood event occurring elsewhere in the U.S. could affect supply chains for key goods and services.

The assessment assumes no adaptation actions or policy changes to capture the "business as usual" risk. The results therefore indicate where Pennsylvania has an opportunity to reduce risk, recognizing that some hazards or specific impacts may be easier to address than others.

To evaluate potential environmental justice and equity consequences, Pennsylvania Environmental Justice Areas are used to represent already disadvantaged populations. An EJ area is any census tract or block group where 20% or more of individuals live in poverty, and/or 30% or more of the population is minority. EJ areas serve as a proxy for already overburdened areas. This indicator does not capture all impacts on overburdened populations (for example, it does not capture impacts on overburdened populations not located in EJ areas). Nonetheless, it

is valuable to begin study of structural disadvantages, and this assessment also draws on other information to supplement it where possible given its limitations.

Figure 27 shows where EJ areas (at the block group level) are located across the Commonwealth, with a zoomed-in focus on Philadelphia and Pittsburgh where higher population density makes block group shading less legible in the state map.

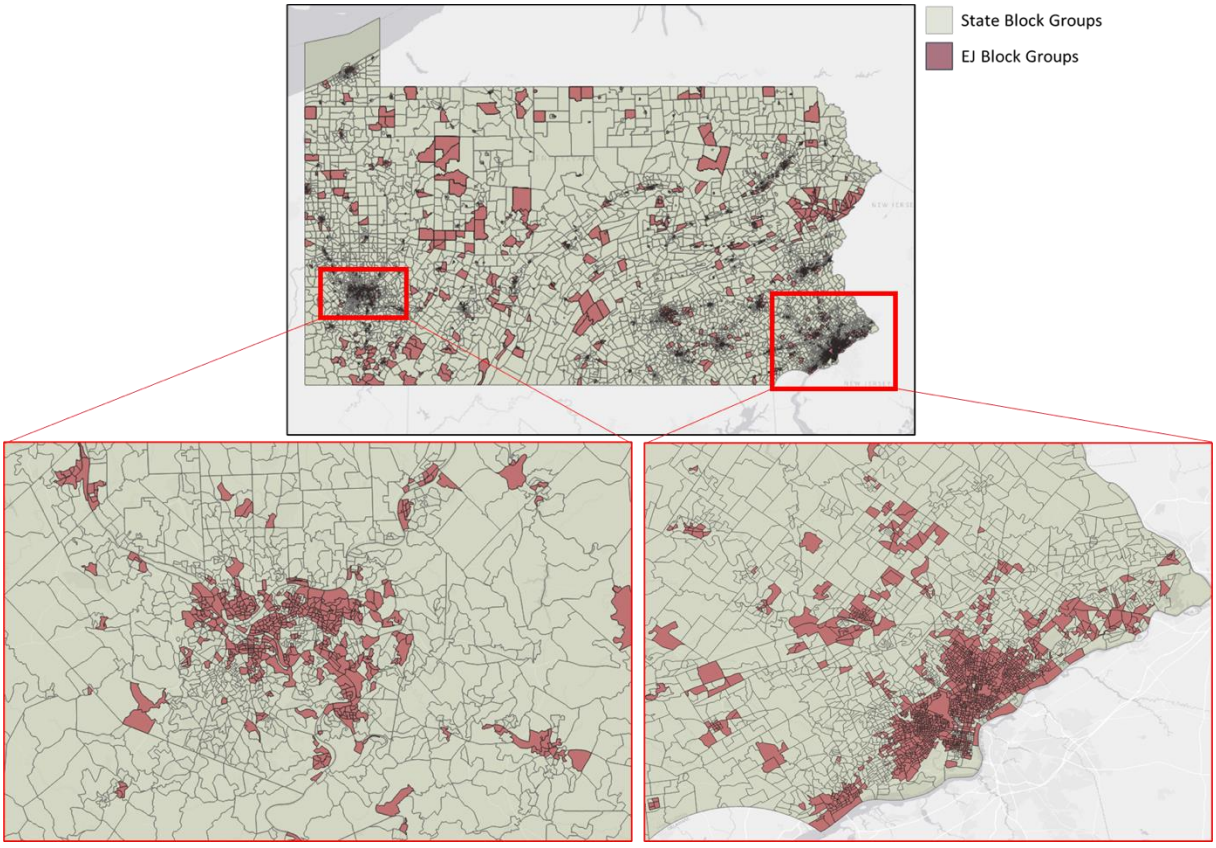

Figure 27. Environmental Justice census block groups in Pennsylvania

This analysis is not a comprehensive bottom-up assessment. While based solidly on evidence from past IAs, recent literature, and updated climate projections,[61] the decision-centered approach recognizes uncertainty and emphasizes practicality. Rather than aiming for a perfect characterization of risk, this approach focuses on gathering information at a sufficient level of detail to facilitate prioritization of adaptation actions that can be taken to reduce risks. Further, it provides the foundation for DEP to easily revisit the results of the assessment as needed as priorities or circumstances change.

[61] Updated climate projections are based on the latest available science.

3.2 Key Findings and Overall Climate Risks

The risk assessment revealed several key findings:

- Flooding is currently the highest-risk hazard facing Pennsylvania, and flood risks are projected to increase. At the same time, risks from increasing average temperatures and heat waves could rise to be as high as flooding is today by mid-century (see Table 1).
  - Flooding from heavy rain events affects built infrastructure, human health, and agriculture, with ripple effects throughout the economy.
  - Increasing average temperatures could affect nearly every aspect of life in the Commonwealth, from infrastructure design to energy costs, recreational opportunities, agricultural practices, and the natural environment.
- Heat waves will become increasingly common and will create particular health and economic risks for vulnerable populations, including low-income populations, the elderly, pregnant women, people with certain mental illnesses, outdoor workers, and those with cardiovascular conditions. These risks will be particularly acute in areas subject to the urban heat island effect.
- All hazards—especially heat waves, increasing temperatures, and flooding—could affect public health negatively. For example, higher temperatures mean more days with hazardous heat conditions or reduced air quality, and increased risk of heat-related illness. Flooding increases the risks of direct injury from flood waters and of illness caused by contaminated water.
- Climate change will not affect all Pennsylvanians equally. Some may be more at risk because of their location, income, housing, health, or other factors. As Pennsylvania works to reduce its climate risks, it should also take care that these inequitable impacts are addressed, and that adaptation efforts do not inadvertently exacerbate inequities.
- Landslides and sea level rise pose relatively low risks statewide but can cause severe impacts in the locations where they occur. For example, sea level rise in the Delaware estuary could drastically change the makeup of the estuary's ecology and also threaten the built infrastructure near the tidal zone. Landslides can have severe consequences if they cut off critical transportation routes, particularly in rural areas.
- Severe tropical storms, flooding, and landslides already pose risks, and these could become more likely or severe in the future. Pennsylvania has an opportunity to build on its existing hazard mitigation practices for these risks.
- For changes that will come on gradually, such as rising temperature, Pennsylvania has an opportunity not only to reduce potential harm, but also to capitalize on potential positive changes. This is particularly true for rising average temperature, which could enable the cultivation of warmer-weather crops, expand warm-weather recreation and tourism, and lower wintertime heating energy demand.

Risks from all of the hazards are expected to increase from present day through 2050 by varying degrees. The Commonwealth subsequently needs to plan for more significant and complex climate risks. These results are intended to help understand relative risk and inform priority adaptation strategies in the CAP. They are not a comprehensive or prescriptive assessment of all potential risks to Pennsylvania.

Key Potential Consequences from Increasing Average Temperatures

- Increase in health and safety risks such as more days with hazardous heat conditions for outdoor workers and reduced air quality from higher ground-level ozone and increased pollen
- Potential increased energy burden for low-income households
- Gradual shifts in growing seasons, suitable habitat range, and ecosystems
- Increase in pests, invasive species, and diseases (e.g., Lyme disease)
- Change in outdoor recreational opportunities (e.g., severe reduction in snow- and ice- based winter recreation and tourism)

Key Potential Consequences from Heavy Precipitation and Flooding

- Flood damage to homes, businesses, and critical energy and transportation infrastructure, particularly those located in floodplains
- Health risks from injury from flood waters or water quality contamination
- Agricultural impacts including increased risk of runoff, erosion, and nutrient leaching, and greater challenges to timing of crop planning
- Wide-ranging economic impacts, from disruptions to recreation and tourism to infrastructure service disruptions
- Disproportionate impacts in vulnerable communities

Table 5 and Figure 28 summarize the overall risks at present and by 2050. **Increasing average temperatures** and **heavy precipitation and inland flooding** emerged as the two highest-risk hazards by mid-century. Both hazards could affect the entire state and all sectors. Increasing temperatures have the highest consequences for human health and environmental justice and equity, especially in urban areas. Heavy precipitation and flooding could also have severe consequences to human health, agriculture, and built infrastructure, with populations, farms, and infrastructure located in or near floodplains at particular risk.

Table 5. Overall risk assessment results

	Climate Hazard	Current Risk Rating (Score)	2050 Risk Rating (Score)
1	Increasing average temperatures	Medium (5.3)	High (10.7)
2	Heavy precipitation and inland flooding	High (9.9)	High (9.9)
3	Heat waves	Medium (4.7)	High (9.3)
4	Landslides	Medium (5.6)	Medium (5.6)
5	Sea level rise	Low (1.9)	Medium (5.6)
6	Severe tropical and extra-tropical cyclones	Medium (5.3)	Medium (5.3)

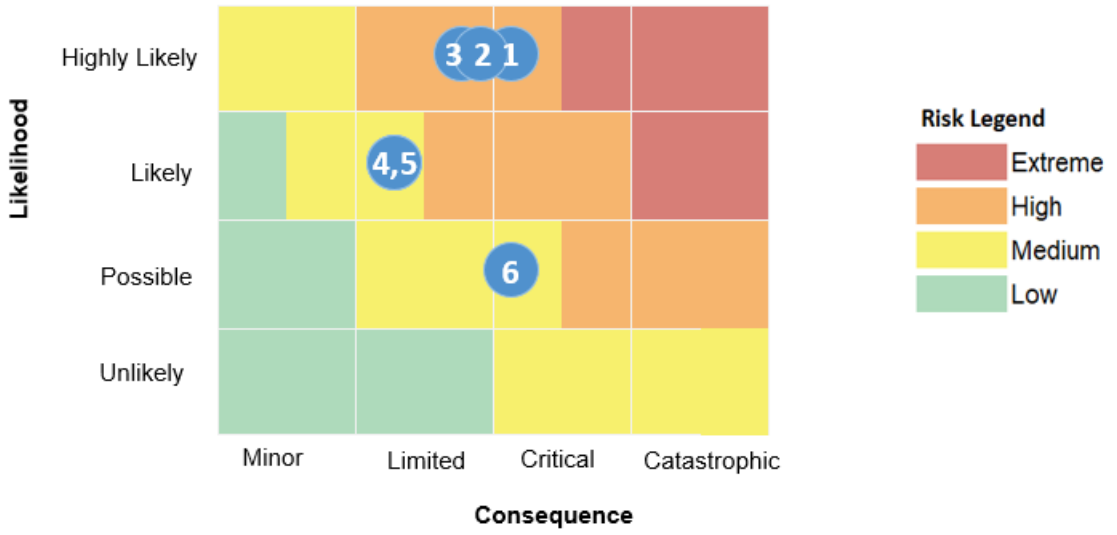

Figure 28. Overall summary risk matrix

1 = Increasing average temperatures, 2 = Heavy precipitation and inland flooding, 3 = Heat waves, 4 = Landslides, 5 = Sea level rise, 6 = Severe tropical and extra-tropical cyclones

Figure 29 breaks down the consequence ratings per category for each of the hazards, which are presented from left to right by descending overall risk score. The size of the color bar corresponds to the severity of the rating per category. Increasing average temperatures and severe tropical and extra-tropical cyclones had the most significant consequences overall. The black dot indicates the overall 2050 risk score, inclusive of both likelihood and consequence. For example, although severe tropical and extra-tropical cyclones had the most significant consequences, the event has a lower likelihood rating indicated by the overall score placement.

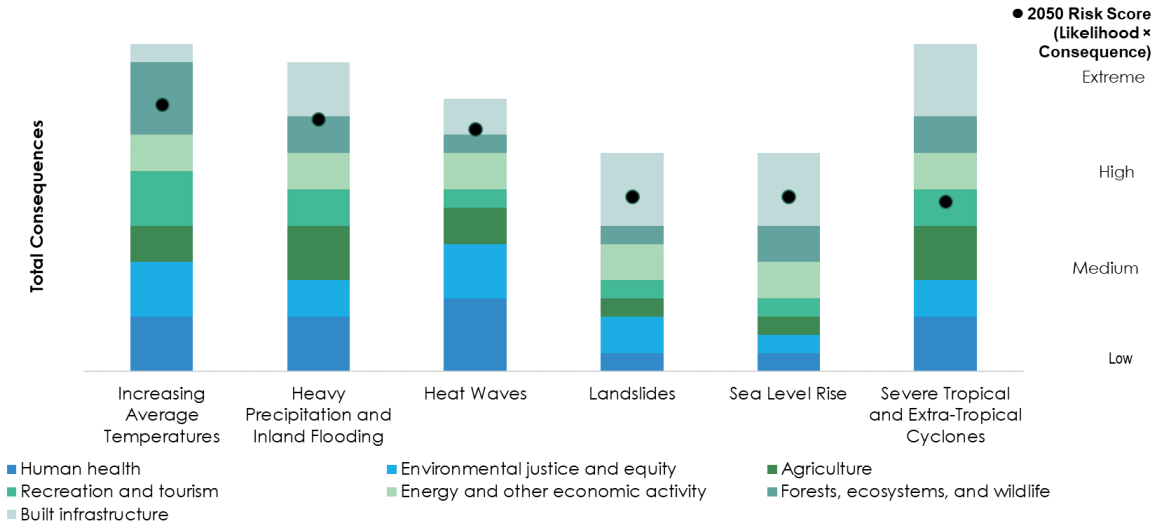

Figure 29. Total consequences and risks by hazard

Finally, Figure 30 illustrates the overall risk for each hazard and consequence category. Priority climate risks per consequence category can help identify adaptation priorities for the CAP per

sector. The values represent the product of the 2050 likelihood rating and the individual consequence score, and reflect the key findings mentioned earlier.

	Human health	Environmental justice and equity	Agriculture	Recreation and tourism	Energy and other economic activity	Forests, ecosystems, and wildlife	Built infrastructure	Overall Risk Rating
Increasing average temperatures	12	12	8	12	8	16	4	10.7
Heavy precipitation and inland flooding	12	8	12	8	8	8	12	9.9
Heat waves	16	12	8	4	8	4	8	9.3
Landslides	3	6	3	3	6	3	12	5.6
Sea level rise	3	3	3	3	6	6	12	5.6
Severe tropical and extra-tropical cyclones	6	4	6	4	4	4	8	5.3

Figure 30. Overall summary risk matrix (2050 likelihood x individual consequences)

Impacts to human health are one of the greatest risks, especially related to extreme heat. Increasing average temperatures and heat waves are projected to increase heat-related illnesses or deaths, allergies, violent crimes, and anxiety and mood disorders. Populations at greater risk from these heat-related hazards include the elderly, low-income communities, pregnant women, individuals with cardio-vascular disease, and outdoor workers. Flooding and severe cyclones can also have severe health impacts as critical services are disrupted and conditions are more hazardous. Figure 31 summarizes the health impacts of climate change.

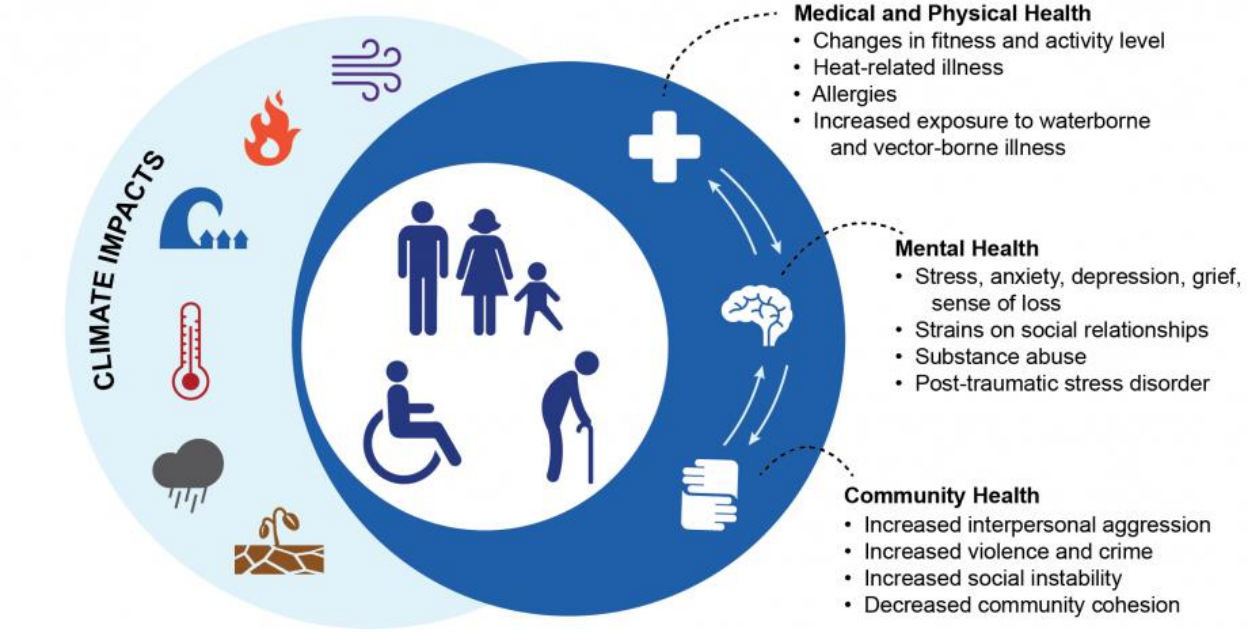

Figure 31. Impacts of climate change on physical, mental, and community health

Source: U.S. Global Change Research Program. 2016. The Impacts of Climate Change on Human Health in the United States: A Scientific Assessment. https://health2016.globalchange.gov/

As reflected in Figure 30, consequence categories face significant and varying risks from different hazards. For example, forests, ecosystems, and wildlife face extreme risk from

increasing temperatures but medium risk from heat waves. Ecosystems are generally more sensitive to long-term changes rather than short-term extreme events. On the other hand, the agricultural sector faces similar risks from increasing temperatures and heat waves. Livestock and crops are susceptible to heat stress from both increasing average temperatures, especially in the summer, and heat waves. For built infrastructure, landslides, sea level rise, and severe tropical and extra-tropical cyclones received catastrophic individual consequence ratings. However, the likelihood of these events differ. When factoring in likelihood, landslides, sea level rise, and heavy precipitation and flooding (which received a critical consequence rating) emerge as extreme risks to built infrastructure.

Risk summaries by hazard are presented in order from the highest to lowest overall risk:

- 4.1 Increasing Average Temperatures
- 4.2 Heavy Precipitation and Inland Flooding
- 4.3 Heat Waves
- 4.4 Landslides
- 4.5 Sea Level Rise
- 4.6 Severe Tropical and Extra-Tropical Cyclones

Each summary includes an overview, a summary risk matrix, a summary table of scores and high-level justifications, followed by a more detailed description of each likelihood and consequence rating. Most of the information presented in the risk summaries is derived from the 2015 and 2020 IAs. These summaries describe the risks to the Commonwealth from each climate hazard. While the likelihoods associated with climate hazards vary, the dangers posed by each are evident. To reduce these impacts on Pennsylvania, the Commonwealth must act to address priority adaptation needs.

4 RISK ASSESSMENT DETAILS

4.1 Increasing Average Temperatures

4.1.1 Overview

On average, the state is expected to experience an increase of 5.9°F (3.3°C) in average annual temperature by mid-century under the RCP8.5 scenario. The effect of these increasing average temperatures will be felt throughout the Commonwealth and across sectors. In particular, human health, winter recreation and tourism, and forests, ecosystems, and wildlife are expected to face higher levels of risk. The occurrence of heat-related illness and death is projected to increase. Outdoor recreation that relies on snow and ice may no longer be possible after mid-century, though would likely be replaced by other forms of recreation. Species may experience range shifts or even local extirpation due to sensitivity to temperature and a decrease in suitable habitat.

Overall, average temperatures will increase from a medium to high risk by mid-century. Table 6 summarizes the likelihood and consequence ratings. Figure 32 illustrates the change in overall risk rating from present-day to 2050 based on the likelihood and consequence ratings. Overall, the likelihood of increasing average annual temperatures is high, particularly after mid-century.

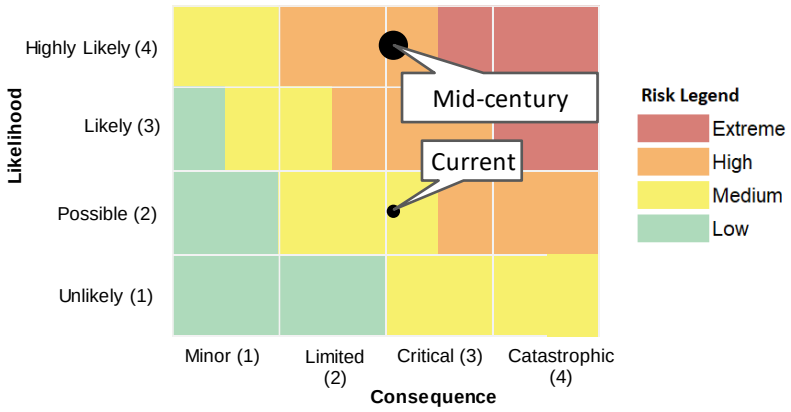

Figure 32. Increasing average temperatures risk matrix

Table 6. Increasing average temperature statewide risk summary

Timeframe or Sector	Rating	Justification Notes	Confidence	Differential Impacts
Likelihood (details in 4.1.2)				
Current	2	The state has experienced long-term change of more than1.8°F (1°C) increase since 1905.	High	Southeastern PA historically experiences the highest temperatures.
Mid-century	4	Climate models project 4.4-7.6°F (2.4-4.2°C) increase by mid-century under the RCP8.5 scenario.	High	Southeastern and Southwestern PA will experience the highest temperatures, while northwestern PA will experience the greatest change in temperature.
Beyond 2050		By the end-of-century under the RCP8.5 scenario, average temperatures in the state are projected to increase by 6.6-11.8°F (3.7-6.5°C). Average temperature will continue to increase beyond 2100 without greenhouse gas (GHG) mitigation.		Same as above
Consequences (details in 4.1.3)				
Human health	3	Increased heat-related mortality Decreased cold-related mortality Increased prevalence of diseases (e.g., Lyme disease)	High	Vulnerable populations (e.g., the elderly, those with cardiovascular disease or respiratory conditions, outdoor workers, and populations with limited access to air conditioning) experience higher risk to heat-related illness and death.
Environmental justice and equity	3	EJ areas are approximately 1.8 times as exposed to high numbers of days >90°F than the state overall	High	See above.

Timeframe or Sector	Rating	Justification Notes	Confidence	Differential Impacts
Economy: Agriculture	2	Increased livestock heat stress Decreased dairy industry productivity Positive and negative impacts to crops	Medium	Animal husbandry is expected to face more severe impacts from increased temperatures than crops.
Economy: Recreation and tourism	3	Severe disruption to snow- and ice-based winter recreation and tourism	High	While winter recreation is expected to suffer, spring and fall recreation and summer water-based recreation may see increased demand.
Economy: Other	2	Increased energy demand Decreased timber supply due to forest die-back	Medium	
Forests, ecosystems, and wildlife	4	Local extirpation for certain species lacking suitable habitat Increase in pests and invasive species Decreased water quality	Medium	Species that require cooler climates are at greater risk than those suited to warmer climates. Specialist species with specific habitat requirements are also more vulnerable to habitat changes.
Built Infrastructure	1	Low infrastructure vulnerability Increased cooling demand More frequent mandatory capacity decreases Reduced efficiency of energy infrastructure	High	Managers should consider increased temperatures in planning and operations for built infrastructure that serves populations at greater risk to heat stress.
Overall Risk				
Current	5.3	Medium	High	
2050s	10.7	High	High	

Timeframe or Sector	Rating	Justification Notes	Confidence	Differential Impacts
Potential Opportunities				
▪ Use of biofuels to reduce reliance on fossil fuels poses an economic opportunity for the agricultural sector in Pennsylvania, with crops such as perennial shrub willow, perennial grasses, and annual sorghum and winter rye as potential biomass crop candidates ▪ Longer growing seasons and higher temperatures may provide opportunities to grow new, warmer-weather crops (e.g., soybeans, peaches) ▪ Increase in use of silvopasture for livestock operations, which reduces heat stress among other benefits ▪ Increase in participation in spring and fall recreation (e.g., biking, golfing) and summer water-based recreation ▪ Increase in suitable habitat for species at the northern extent of their range in Pennsylvania ▪ Decline in wintertime heating energy demand and costs				

4.1.2 Likelihood

Among projections for climate hazards, those for increasing average temperatures have among the highest certainty. Projected increases in average temperatures are statistically significant – meaning that more than half of climate models show a statistically significant change, and more than two-thirds agree on the sign of the change.[62] The National Climate Assessment gives very high confidence[63] to the statement that annual average temperature in the United States is projected to rise, and high confidence[64] to the statement that "recent record-setting years may be "common" in the next few decades."[65] Much larger rises are projected by end-of-century (2071–2100): 3.4°–7.6°F (1.9°–4.2°C) in a lower scenario (RCP4.5) and 6.6°–11.8°F (3.7°–6.5°C) in the higher scenario (RCP8.5). Given such strong confidence in projections and the intensity of the increases, increasing average temperatures merits a likelihood rating of 4.

Note that the projected increases in temperature are similar across emission scenarios (e.g., RCP4.5 and RCP8.5) through mid-century. After 2050, there is more divergence between scenarios, with greater increases in temperature occurring under the RCP 8.5 scenario.

4.1.3 Consequences

Projected increases in average temperatures would mean that recent record-high average temperatures become normal in the next few decades. This carries consequences across sectors, as discussed below. Figure 33 summarizes the overall consequence ratings statewide for

increasing average temperatures – highest consequences are in forests, ecosystems, and wildlife. These consequence ratings are also in Table 6.

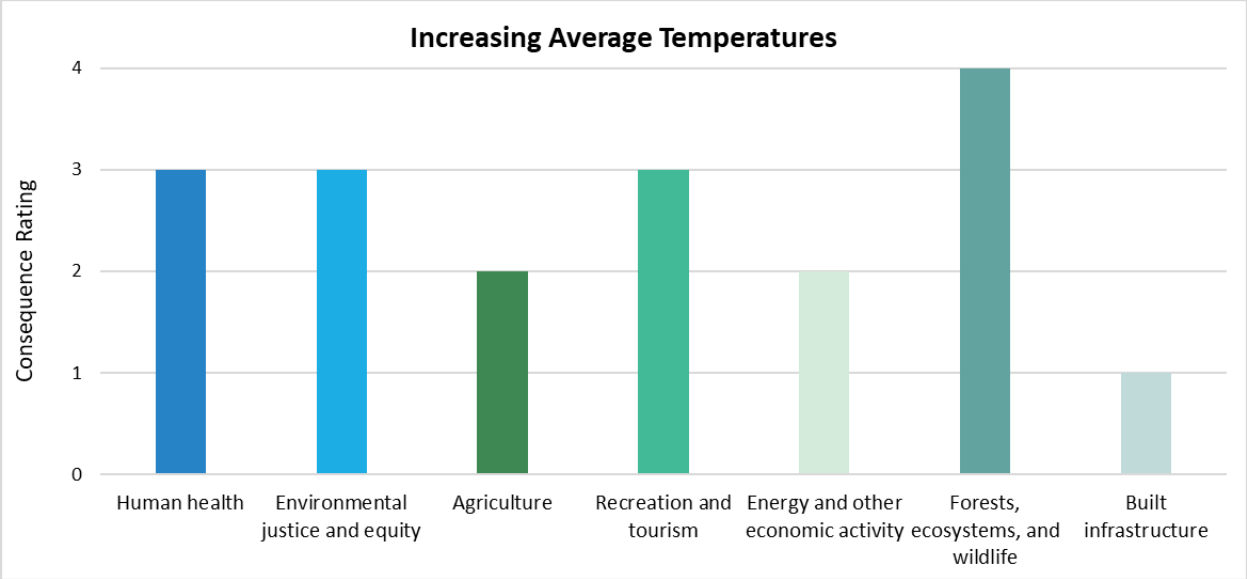

Figure 33. Increasing average temperatures consequences

Human Health

Rating: 3

Increased temperatures will increase heat-related mortality and morbidity but reduce cold-related mortality and morbidity. Currently, cold-related mortality is higher than heat-related mortality. The literature is divided on whether increasing temperatures will cause a net positive or negative effect in the future but is clear that heat-related deaths will increase.[66],[67],[68],[69] Even small increases from seasonal average temperature can result in higher death rates.[70] Dramatic

increases in the heat index in the Northeast,[71] is also projected to make working, walking, and exercising outdoors more difficult certain times a year, and may create hazardous conditions for being outside.[72],[73] However, the risk of mortality from extreme heat events has been decreasing, as more and more households install air conditioning.

The elderly, those with cardiovascular disease, outdoor workers, and populations with limited access to air conditioning experience higher risk to heat-related illness and death.

Increased temperatures also reduce air quality through increased ground-level ozone as well as increased allergen levels.[74] Higher temperatures can increase in the rate at which ozone is formed and increase the prevalence of pollutants that act as precursors to ozone.[75] Warmer temperatures are also projected to raise pollen production, allergenicity, distribution, and seasonal timing. Combined, increased ground level ozone and allergens will decrease air quality. Poor air quality has been linked with medical emergencies, acute respiratory symptoms, and premature deaths.[76] As shown in Figure 34, projected increases in ozone from climate-attributable temperature change are likely to contribute to an increase in premature deaths in Pennsylvania. Additionally, increased allergens will also lead to more individuals experiencing allergies.[77] Higher pollen production and longer pollen season could also increase asthma episodes.[78]

---

[71] The heat index is a measure of temperature and relative humidity. One study projected that days in which the heat index was especially dangerous are projected to quadruple in the Northeast. Dahl, K., et al., 2019. Increased frequency of and population exposure to extreme heat index days in the United States during the 21st century. In *Environmental Research Communications*. https://doi.org/10.1088/2515-7620/ab27cf

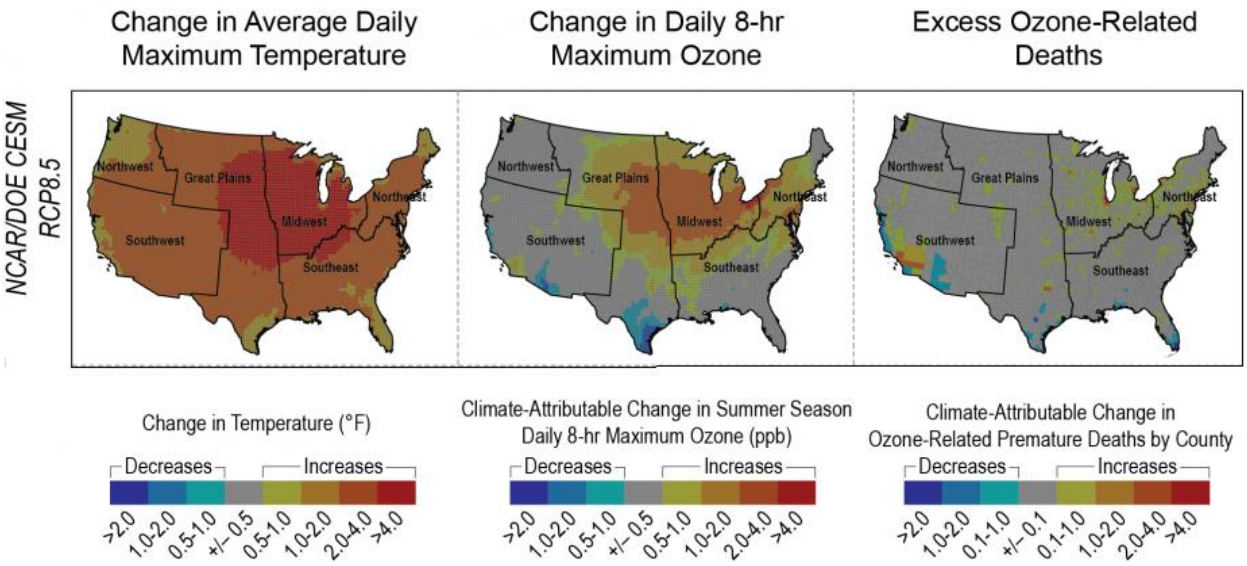

Figure 34. Projected premature deaths from changes in ozone

Projected change in average daily maximum temperature, daily 8-hour maximum ozone, and excess ozone-related premature deaths in the United states in 2030. RCP 8.5 and a downscaled global climate model projection was used. Blue circles highlight the Pennsylvania region.[79]

Increased temperatures may contribute to the development of harmful algal blooms on Lake Erie and other water bodies, which can be a health hazard if people or pets come in contact with or ingest the toxic algae.

Climate change also could affect the distribution and prevalence of vector-borne diseases (e.g., Lyme Disease and West Nile Virus) and air-borne infectious diseases. For example, warmer winters could increase the rates of Lyme disease. Already, Pennsylvania experiences the most Lyme diseases cases in the country as a result of increased winter temperatures and the westward expansion of tick populations that carry Lyme disease.[80] Higher temperatures could also lead to increases in the prevalence of mosquito-borne illnesses.[81] Warm summers and milder winters could lengthen these diseases transmission seasons. Finally, a more temperate Commonwealth may allow for greater movement of southern disease carrying species northward, like the lone start tick and the Asian tiger mosquito.[82]

[79] USGCRP. 2016. Impacts of Climate Change on Human Health in the United States.

[81] Pennsylvania DEP. 2020. Climate Change in Pennsylvania.
[82] Pennsylvania DEP. 2020. Climate Change in Pennsylvania.

Violence is also projected to increase as a result of climate change. Increased temperatures have a significant positive effect on criminal behavior.[83],[84] Violent crimes are projected to increase as a result of warmer temperatures, including murder, rape, and aggravated assault.[85]

Human health impacts may be exacerbated in areas where populations experiencing heat-related impacts have less ability to adapt (e.g., low-income individuals that cannot afford air conditioning or need to take public transportation or walk). Additionally, heat impacts may be more significant in certain urban areas. The urban heat island effect, which can raise local temperatures by 1-7°F and nighttime temperatures by 2-5°F, happens in areas with significant amounts of paved surfaces and buildings which reflect heat and low concentrations of greenery.[86] As a result, urban areas are projected to experience greater rates of mortality from heat events.[87]

Environmental Justice and Equity

Rating: 3

EJ areas are more likely to experience highly frequent days > 90°F compared to the state average. Isolation of the census blocks projected to see the top 20% of numbers of days with temperatures > 90°F in the state indicates that, Proportionately, EJ areas are expected be nearly twice as exposed (1.8x) to those top-20% conditions compared to the Pennsylvania population as a whole. Although populations in EJ areas constitute less than a third of the statewide population, over half of all people in the state exposed to highly frequent heat days are members of EJ areas.

Figure 35 shows the number of days with temperatures >90°F projected to occur across the state by mid-century, overlaid with state EJ areas. This indicator is useful for capturing the general areas where temperatures are projected to most frequently be very hot, and therefore where vulnerable populations may be most at risk. However, the indicator does not capture urban heat island (UHI) effects in cities, where temperatures may be even hotter than the downscaled

averages projected in local areas with fewer trees and less green space[88] that can otherwise absorb heat and provide shade.

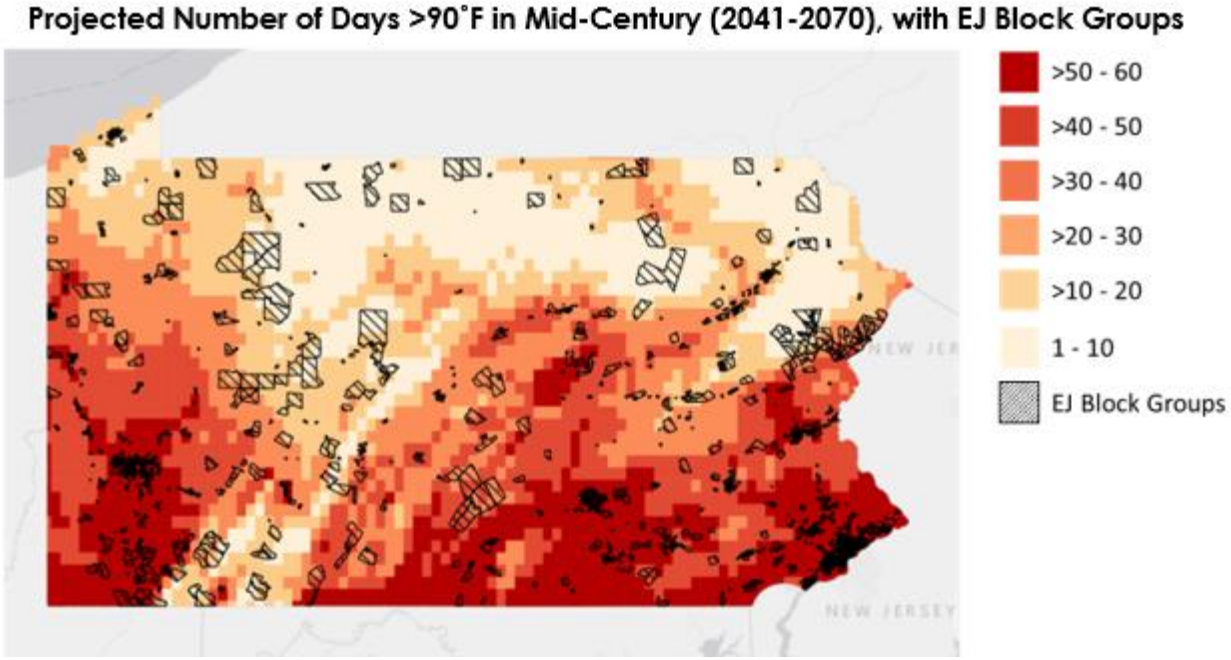

Figure 35. Projected annual number of days with temperatures over 90°F in 2050, with EJ block groups

Population data source: https://www.census.gov/data/developers/data-sets/acs-5year.html.

Risks of heat-related illness and mortality will increase with warmer average temperatures. Populations most at risk will likely be those that disproportionately lack access to the key methods of adapting to this risk – such as using air conditioning indoors (price may be a barrier), staying in the shade outside (outdoor work and financial constraints may be a barrier), and drawing on support networks (seniors living alone may be especially vulnerable).[89]

A City of Philadelphia heat report found that average surface temperatures are up to 22°F hotter in some neighborhoods than others. Low income and minority residents are more likely to live in these neighborhoods.[90] The expected causes of hotter surface temperatures are limited green space and tree canopy, more exposed dark surfaces (e.g., asphalt), and aging housing stock due to a history of redlining and disinvestment. Residents interviewed for the study also

indicated limited access and awareness of City cooling centers and a need for better air conditioning and fans at home to stay cool.

Economy

Agriculture

Rating: 2

Increasing average temperatures will have both positive and negative impacts on crops in Pennsylvania. Warmer temperatures mean longer frost-free and growing seasons (see map of projected Growing Degree Days in Figure 11). For example, soybean crops are expected to experience increased yields due to longer frost-free and growing seasons and higher concentrations of atmospheric carbon dioxide.[91] Other crops such as peaches, could also see an expansion in growing season and yield; Pennsylvania's current peach production has a value of approximately $20 million annually.[92] However, corn, which is Pennsylvania's crop with the highest agricultural sales, is projected to experience decreased yields due to hotter summers. Increased temperatures are also projected to harm corn crops by allowing pests such as corn earworm to increase their populations.[93]

For crops grown indoors, there will be less heating needed during winter but more cooling during summer, and the net effect on annual energy use is currently unclear.

Livestock and dairy farming will be negatively impacted overall due to increased heat stress experienced by the animals (and subsequent decreased milk yields), increased energy and capital expenditures to reduce heat stress, and lower-quality forage material.[94] However, poultry farms are expected to double in size by 2050 as Pennsylvania becomes a better alternative to the climate of southern states.[95]

Increased temperatures may encourage a shift to using silvopasture for livestock operations, which integrates trees, foraging, and grazing on the same plot of land. This practice reduces heat stress, increases forage and reduces feed cost, increases carbon sequestration, captures more runoff/nutrients, and provides alternate income source via nuts or fruits.[96]

Recreation and tourism

Rating: 3

Climate change is expected to greatly impact snow- and ice-based recreation for the worse and may affect the types of recreation that people choose to pursue in each season. The state's downhill ski and snowboard resorts are not expected to be economically viable past mid-century. Particularly in southern Pennsylvania, snow cover to support cross country skiing and snowmobiling has been declining and is projected to decline further by 20-60%.

Finally, due to a longer warm season, water-based recreation may experience increased demand, though the impact is expected to be small. A national study found that climate and participation in water-based recreation do not have a strong relationship. Other outdoor, warm-weather leisure (e.g., biking, golfing) is expected to experience an increase in activity during spring and fall and a decrease during the hottest days of summer.

The types of fishing that are viable in Pennsylvania will also be altered. Cold-water fishing (e.g., trout) may no longer be supported. This impact could be particularly severe in southeastern and northwestern Pennsylvania. However, the Pennsylvania Fish and Boat Commission conducts an extensive annual trout stocking program that may help support trout populations under changing conditions.[97]

Increased temperatures may also contribute to the development of Harmful Algal Blooms on Lake Erie and other inland lakes, which could discourage recreation and fishing due to health concerns to both humans and fish.

Energy and other economic activity *Rating: 2*

Pennsylvania is a major energy-producing state in the US, largely due to natural gas production. Warming is likely to increase demand for cooling during summer months, and this increase is likely to be larger than any decline in wintertime heating energy consumption (i.e., an overall increase in annual energy demand).

The forest products industry might see a reduction in supply as large areas begin to die back due to climate-induced stress and may need to make substantial investments in artificial regeneration. The industry has an estimated direct economic impact of $21.5 billion and employs 10% of Pennsylvania's manufacturing workforce.[98] Example economic impacts of increasing average temperatures are described in Exhibit 1.

---

[97] Pennsylvania Fish and Boat Commission. 2020. Fish Stocking. https://www.fishandboat.com/Fish/Stocking/Pages/default.aspx

[98] Pennsylvania Department of Agriculture. 2020. State of the Forest Products Industry in Pennsylvania.

Exhibit 1. Example of economic impacts: increasing average temperatures

The economic impacts of increasing average temperatures are likely to be felt in tandem to extreme heat. The mean annual temperature in Pennsylvania has increased approximately 2 degrees Fahrenheit over the last century but is increasing at a faster pace.[99]

Agricultural Impacts

The agricultural industry in Pennsylvania generates approximately $135.7 billion in total economic impact each year and supports 579,000 jobs.[100]

Increasing average temperatures may lengthen growing periods, but an increase in the number of hot days will negatively impact yields (see heat waves).

Farmers may also have to deal with costs such as additional frost concerns (cold snaps occurring during an earlier growing season may damage crops). Longer growing seasons may result in more generations of pests, whereas historically farmers only have to be concerned with two generations, a spray of a third round of pesticide would increase costs.[101]

Increasing atmospheric CO2 concentrations may decrease livestock forage productivity, protein content, and digestibility. These, and other, impacts may increase prices of purchased feed, maintenance costs for livestock, and changes in price for meat.[102]

About 58% of Pennsylvania is covered by forests, which face challenges from invasive species and disease.[103] As average temperature increases, the mix of tree species within forests may also change, opening up the way for new diseases and pests. The spread and severity of insect outbreaks, pathogens, and invasive plant species are expected to intensify with continued warming trends.[104]

Recreational Impacts

In Pennsylvania outdoor recreation generates $29.1 billion in consumer spending, $1.9 billion in state and local tax revenue and sustains 251,000 direct jobs.[105]

Increases in average temperature will have different impacts on seasonal recreational activities. Outdoor activities in fall and spring may increase as the weather stays warmer for longer. Summer activities may be curtailed as temperatures approach dangerous levels. Winter activities may suffer in some areas (with a decline in skiing and snowmobiling),[106] however lake effect snowfall in north western PA is likely to increase.[107] There is not yet a clear picture of the aggregate impacts at a state level, but there are likely to be significant changes, and winners and losers in various industries.

Forest, ecosystems, and wildlife

Rating: 4

As temperatures increase, suitable habitat for tree species will shift to higher latitudes and elevations. This will present a decrease in suitable habitat available for species that currently have the southern extent of their range in Pennsylvania or are found primarily at high latitudes (e.g., American beech, bigtooth aspen, chokecherry, eastern hemlock, quaking aspen, yellow birch), and will present an increase in suitable habitat available for species that are currently at the northern extent of their range in Pennsylvania (e.g., shortleaf pine, black hickory, black oak, black walnut, blackgum, flowering dogwood, pignut hickory, scarlet oak).[108],[109] Additionally, longer growing seasons and higher temperatures, among other climate-related factors, may increase overall forest growth rates; however, this may be offset by increased mortality in stressed forest species.

Some plant and animal species will experience increased stress due to changes such as decreases in suitable habitat area and habitat fragmentation, increases in the prevalence of pests and invasive species, and disruptions to the timing of natural cycles such as migration, emergence from dormancy or hibernation, and leaf development and blooming.[110] Species composition is likely to change as a result of these stressors. Specialist species with specific habitat needs may not survive the habitat changes. Generalist species, however, will be better able to adapt to changing climates and habitats.[111]

Winter stream temperatures have shown warming trends, which presents both positive and negative outcomes for fish communities. In the tidal freshwater portion of the Delaware estuary, increased water temperatures decreased the solubility of oxygen while increasing respiration rates, both of which lead to decreased dissolved oxygen concentration and decreased water quality.

Increased temperatures may also contribute to the development of Harmful Algal Blooms on Lake Erie, which exposes many aquatic or coastal dwelling species to toxins, affecting the health of the ecosystem.

Built infrastructure

Rating: 1

The trend of increasing temperatures will require infrastructure managers to undertake adaptation in planning and operations. The "tropicalization" of the climate (i.e., increased heat and moisture) will decrease the service life of building and roofing materials and increase maintenance costs for built infrastructure.[112]

In the energy sector, increased temperatures simultaneously increase demand for cooling and require power grid operators to reduce operable capacity on electric generation facilities and electric transmission lines to avoid heat-related damage. Electrical and electronic equipment in unconditioned or outdoor spaces have shorter service lives and are subject to greater chance of thermal overload or reduced efficiency.[113] Extreme heat will also reduce efficiency of energy generation in solar PV panels, especially when temperatures exceed 77°F.[114],[115] However, rooftop solar can reduce the cooling energy needs of buildings and help reduce peak demand.[116]

In addition, warmer water temperatures could decrease the availability of water that would be used for power plant cooling.

4.2 Heavy Precipitation and Inland Flooding

4.2.1 Overview

Flood events are recognized as the costliest weather hazards in Pennsylvania.[117] From 1996 to 2018, flooding caused approximately $1.025 Billion in property damage, 31 fatalities, and 107 injuries. Flash flooding specifically caused approximately $2.156 Billion in property damage, 58 fatalities, and 52 injuries. These two types of flooding together generated 79% of the property

[117] DEP. 2020 IA.

damage of all weather-related impacts in the state, though they only caused 12% and 7% respectively of all fatalities and injuries related to weather events.[118]

In Pennsylvania's 2018 Hazard Mitigation Plan, the "flood, flash flood, and ice jam" hazard – which considers multiple types of flooding including 1%- and 0.2%-annual chance floodplain risks – received the highest risk factor ranking of all hazards assessed.[119]

Costs associated with infrastructure damage and increased risks to agricultural production and human health are particularly significant.[120] Figure 36 illustrates the change in overall risk rating from present-day to 2050 based on the likelihood and consequence ratings. Table 7 summarizes the statewide likelihood and consequences of heavy precipitation and inland flooding in Pennsylvania.

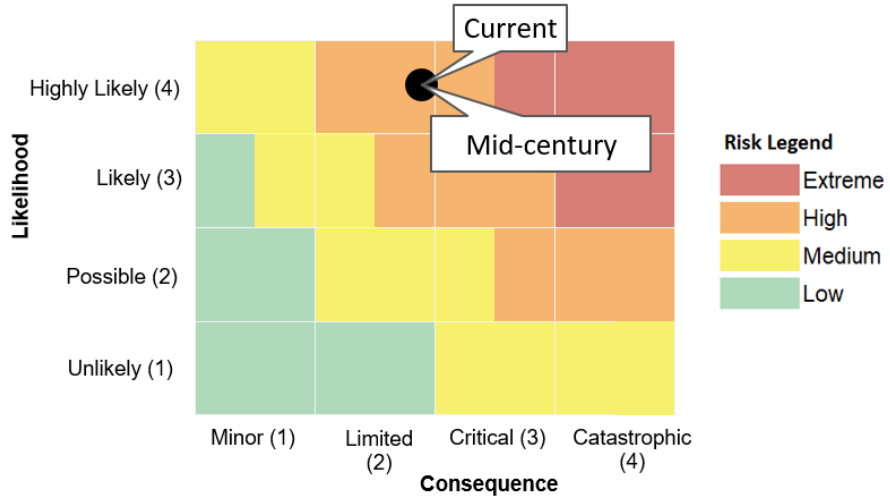

Figure 36. Heavy precipitation and inland flooding risk matrix

		century, potentially increasing the frequency and severity of floods.		
Beyond 2050		Precipitation changes are expected to continue well beyond mid-century.		
Consequences				
Human health	3	Risk of direct injury from flood waters or health impacts from water quality contamination	High	Certain populations may be disproportionately exposed to and have greater barriers to managing flood impacts. For example, homeless and low-income individuals, people who work outside (e.g., agricultural or construction sector), and communities of color that have historically been disinvested in (e.g., older infrastructure) may be more at risk to impacts.
Environmental justice and equity	2	EJ areas slightly overrepresented in high-risk floodplains compared to the state overall	Medium	Vulnerable populations may face greater challenges in managing flood impacts. Also see above.
Economy: Agriculture	3	Increased runoff, erosion, and nutrient leaching Greater challenges in timing of crop planting	High	See above
Economy: Recreation and tourism	2	State parks and forests have experienced significant impacts from flooding and heavy precipitation events (e.g., closure, infrastructure damages, decreased water quality)	Medium	See above
Economy: Other	2	Significant damage to infrastructure, with broad downstream economic impacts Represents the most expensive weather hazard in the state	Medium	See above
Forests, ecosystems, and wildlife	2	Increased hydrological variability may impact wetland and stream ecosystems Increased pathogen loads and eutrophication and algal bloom risks	High	See above

Timeframe or Sector	Rating or Risk Score	Notes	Confidence	Differential Impacts
Built Infrastructure	3	Increasing risk of flood damages to homes, small businesses, and major energy and transportation assets Infrastructure in floodplains is particularly at risk	High	See above
Overall Risk				
Current	9.9	High risk	High	
2050s	9.9	High risk	Medium	
Potential Opportunities				
▪ Invest in more agricultural best management practices to reduce the shock of acute storm events [121] ▪ Invest in healthy soils in agricultural land. One percent of organic matter in the top 6 inches of soil would hold approximately 27,000 gallons of water per acre				

4.2.2 Likelihood

Data on past events indicates that from 1950 to 2017, 24 counties experienced, on average, at least one flood event per year ("flood event" as defined by NOAA/NCEI), and disaster declarations in the state caused by flood events outnumbered those caused by other hazards.[122] And from 1955 to 2018, of the 60 Presidential Disaster and Emergency Declarations that affected the Commonwealth, 26 (43%) were flood events.[123] These flood events have occurred across the state, including in, though not limited to, areas defined as FEMA floodplains (see Figure 37).

Occurrence of heavy precipitation events and associated inland flooding impacts is projected to significantly increase due to climate change. In general, Pennsylvania is expected to see greater precipitation variability, which translates to more frequent and intense occurrence of both heavy precipitation events and very low precipitation conditions. The degree of change is likely to vary across the state; projected variability is also uncertain because of the significant natural variability of precipitation.[124]

Averages of statewide observed and projected precipitation data demonstrate this statewide trend of increased variability (more local information would be needed for local-level nuance). Mid-century (2041–2070) modeled conditions are compared to baseline observed data (1971–2000).

- By mid-century, the number of days with more rainfall than currently occurs on "very heavy" (95th percentile) rainfall days is projected to increase 24%, from 12 days to 15 days. The amount of precipitation falling on those days is also projected to increase 12%.

[121] USDA Natural Resources Conservation Service (NRCS). 2013. "Soil Health: Key Points." https://www.nrcs.usda.gov/Internet/FSE_DOCUMENTS/stelprdb1082147.pdf
[122] PEMA. 2018. "Risk Assessment."
[123] PEMA. 2018. "Risk Assessment."
[124] DEP. 2020 IA.

- The annual number of days with more than 3 inches of precipitation is projected to increase 52%, from 0.07 days to 0.11 days.
- Notably, these numbers speak to events that all happen relatively infrequently but are projected to occur more often in the future.

This Assessment evaluates likelihood of damaging flood events, which are already occurring regularly and incurring significant damages, as detailed in the 2020 Impacts Assessment and 2018 Hazard Mitigation Plan. Notably, as more intense precipitation events become more common, the occurrence of extreme flood events – such as today's 1% annual chance floods (or 1-in-100-year floods) and 0.2% annual chance floods (or 1-in-500-year floods) – may as well. Due to uncertainty around localized projections of future intense precipitation conditions, the likelihood of specific types of future flood events (e.g., 1-in-500 year floods) occurring is difficult to quantify; nonetheless, projections of increased occurrence of intense precipitation events by end-of-century suggest associated intense flood events will likely increase as well. Decision makers will need to work with assumptions of deep uncertainty to manage potential increases in extreme flood events.

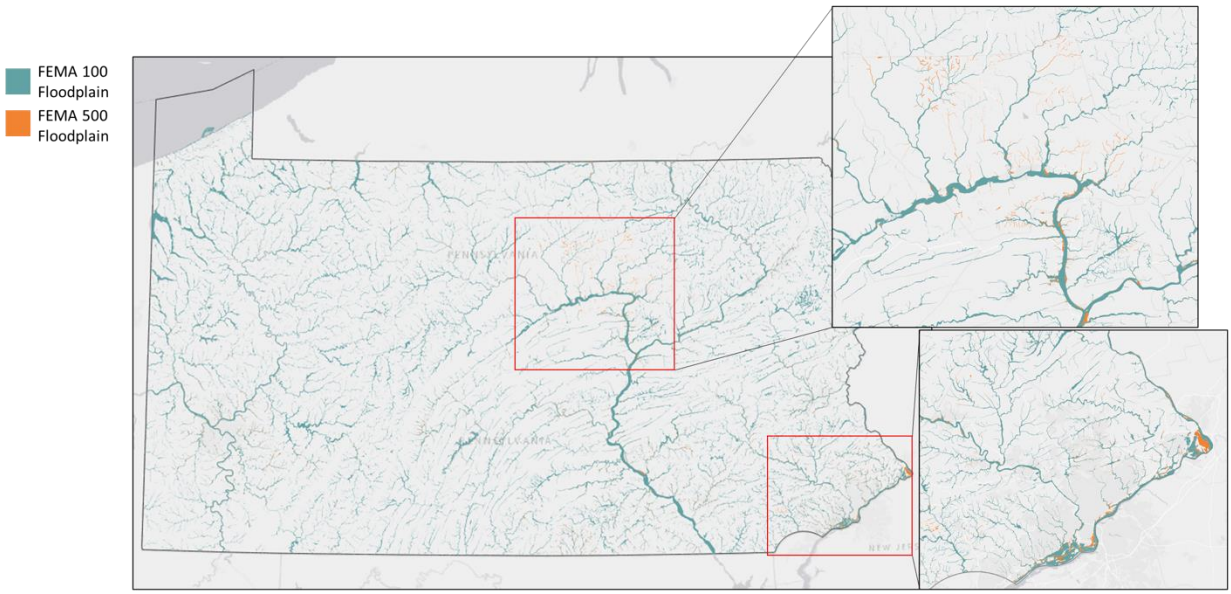

Figure 37. FEMA 100- and 500-year floodplains in Pennsylvania

Data source: FEMA

4.2.3 Consequences

Flood events are recognized as the costliest weather hazards in Pennsylvania. As shown in Figure 38, increased risks to human health and agricultural production and costs associated with infrastructure damage are particularly significant.[125]

[125] PSU. 2020 IA.

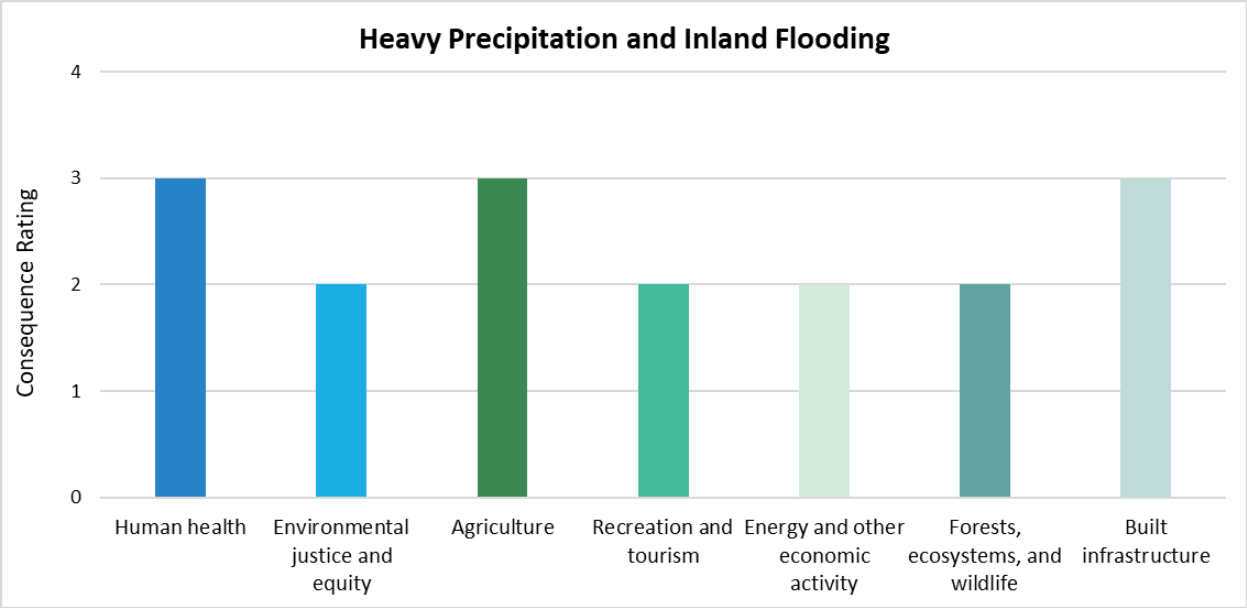

Figure 38. Consequences of heavy precipitation and inland flooding

Human Health

Rating: 3

Intense precipitation and inland flooding can cause significant human health risks, particularly related to flash-flood events and water pollution.

In the historical context, Pennsylvania has experienced extreme floods frequently, and the deadliest among those events have been caused by extreme precipitation.[126] Heavy precipitation can result in hazardous road conditions and reduced visibility, which can cause automobile accidents.[127] Data on births that occurred under flood conditions indicates flood exposure has been linked to hazardous birthing outcomes.[128] For events between 1959 and 2005, "Pennsylvania ranked 2nd, 10th, and 14th in the U.S. in the frequency of flash flood-related fatalities, injuries, and casualties, respectively"; during this period, a flash flood in 1977 and a flood caused by Tropical Storm Agnes in 1972 resulted in more than 50 fatalities.[129]

[129] PSU. 2020 IA.

Additionally, 2 of the 72 deaths directly caused by Superstorm Sandy in 2012 occurred in Pennsylvania.[130]

Climate change can also potentially worsen water quality through a combination of weather changes and pollutant emissions; lower water quality may affect health through contact during outdoor recreation, or if drinking water is affected. Individuals who consume contaminated water may experience gastrointestinal illnesses.[131] Post flood-event health consequences may include physical safety risks related to standing flood water or limited access to critical services (e.g., due to transportation damages),[132] respiratory risks related to reduced indoor air quality (e.g., because of mold),[133] and mental health impacts.[134]

Impacts of flooding, such as redistribution of materials, will vary based on the type of land flooded. For example, flooding of industrial or brownfields areas can distribute hazardous materials widely; storage tanks can float, tip, and rupture, and pipelines and contaminated soils can be scoured out and exposed.[135] Flooding of agricultural lands could spread contaminants from animal waste.

Environmental Justice and Equity

Rating: 2

Spatial analysis of areas located in FEMA 100-year and 500-year floodplains indicates that, in percentage of land cover, EJ areas are slightly overrepresented in high-risk flood zones compared to the state overall.

Nearly 5.5% of Pennsylvania land and 6.5% of Pennsylvania EJ areas are located in FEMA 100-year floodplains. And 5.8% of Pennsylvania land and 7.1% of Pennsylvania EJ areas are located in FEMA 500-year floodplains. These statistics indicate a slightly greater percentage of EJ areas are exposed to 100- and 500-year flooding compared to the state on average (1.18x as exposed and 1.22x as exposed, respectively).

[135] Pennsylvania DCNR. November 2020. Department staff expertise.

This land area-based spatial analysis is limited in its ability to fully capture potential inequities in flooding risk – for example:

- Statistics on individuals who live or work in each floodplain are not captured, such as the number of people, how vulnerable they are to flood impacts, and their base level of adaptive capacity.
- Information about buildings and structures in each area is not considered (e.g., if buildings located in floodplains have flood-proofing measures, making residents less vulnerable).
- Disadvantaged individuals living in Census tracts not classified as EJ areas are not captured by this analysis.
- There are individuals who live in EJ areas but are *not* overburdened.
- Populations known to face greater vulnerabilities to and obstacles in managing flood impacts may not all be captured by the EJ areas indicator because it is based solely on income and racial and ethnic identity (e.g., individuals who are elderly or experiencing homelessness).
- Data on past flood costs is not included. Rural communities in Pennsylvania have seen some of the highest per capita property losses related to flooding, on average, within the state.

Additional considerations are needed to further contextualize potential environmental justice and equity risks, including potential infrastructure underinvestment, flood inequalities often present in urban areas, and existing work to prevent flood inequities.

Riverine and coastal flooding challenges are likely to be exacerbated by existing underinvestment in stormwater management or flood protection infrastructure[136] – a cycle that may leave poorest populations in most at-risk locations due to financial obstacles to leaving for higher ground.

Many factors can increase peoples' vulnerability to flood risk, such as:[137]

- Demographics (e.g., older age, minority race or ethnicity)
- English as a second language
- Low income or wealth
- Food insecurity
- Mobility (e.g., access to vehicles and/or public transportation)

[136] Russek, Karl. The Water Center at Penn. 2020. "Building Community Capacity at the Intersection of Water, Equity, and Climate Change." https://watercenter.sas.upenn.edu/building-community-capacity-at-the-intersection-of-water-equity-and-climate-change/

[137] National Association for the Advancement of Colored People (NAACP). 2016. "Equity in Building Resilience in Adaptation Planning." https://www.naacp.org/wp-content/uploads/2016/04/Equity_in_Resilience_Building_Climate_Adaptation_Indicators_FINAL.pdf

- Having their home or place of business located in a floodplain
- Lack of flood insurance
- Lack of business security
- Proximity to toxic sites or hazardous facilities.

A range of flood consequences may be related to those indicators – such as impacts to employment (e.g., if someone's business is closed), food security (e.g., if crops are lost due to flooding), housing (e.g., if someone's home is damaged by flooding), emergency management (e.g., language and platform accessibility of communications), or access to services (e.g., education, healthcare, emergency management).[138]

Analysis of equity and urban flood risks by the US Water Alliance, informed in part by the Philadelphia Urban Flooding Bootcamp Team, describes how vulnerable or marginalized communities may face barriers to social and economic opportunities, or to living in a healthy environment.[139] The analysis identifies five key types of flooding inequities often experienced in urban environments: "1) Historical development practices placed low-income people and communities of color in flood-prone areas, 2) Infrastructure in economically distressed communities is often in worse condition, 3) Poverty intersects with flood vulnerability, 4) Social and environmental factors also leave some populations more vulnerable, and 5) Climate change is leading to migration that exacerbates existing flooding inequities". It also identifies five priority actions to support equitable resilience to urban flooding: "1) Use data to identify risks, assets, and community vulnerabilities, 2) Commit to ongoing and meaningful community engagement, 3) Set a proactive vision and build strategic alignment, 4) Fully incorporate equity into resilience planning processes, and 5) Target investments in vulnerable communities".[140]

Ongoing work in Philadelphia is highlighted as an example of Priority Action 4 in the Water Alliance analysis. Philadelphia's Flood Risk Management Task Force, in place since 2015, works to coordinate resources and manage flooding across different neighborhoods, and in 2020 has piloted a community-led task force to make community stakeholders and leaders' voices central in the planning, decision-making, and communications processes.[141] Additionally, projects in three low-income neighborhoods—Lancaster, York, and Harrisburg—are currently targeting the issue of polluted urban and suburban runoff, a "leading source of stream pollution in Pennsylvania" known to cause nuisance flooding and threaten drinking water. Community volunteers are working with the projects' sponsors, DEP, and the Chesapeake Bay Foundation

(CBF) to design and implement mitigation measures in their neighborhoods, from planting street trees to putting together rain gardens.[142]

Economy

Agriculture

Rating: 3

The primary impacts to crop and livestock agriculture from extreme precipitation are increased flooding risks including augmented runoff, erosion, and nutrient leaching, as well as challenges in timing of crop planting or harvesting. Crop, equipment, and livestock losses or damage may occur. Though many practices (e.g., no till management and soil conservation) to reduce runoff rates have been successfully implemented in recent years in Pennsylvania, flooding remains a challenge, and will continue to be as heavy precipitation events become more frequent and intense.

Pennsylvania experienced prolific, statewide crop damage due to extended rainfall throughout 2018. Planting delays, repeated damage to planted fields, and an inability to harvest impacted crop and commodity producers, as well as livestock producers who grow their own feed and forage. The Pennsylvania Department of Agriculture estimated that 30% of corn and soybean acres were still unharvested at the beginning of December 2018, and these acres were at risk of rot or severely reduced yield due to disease and mold.[143] The extended rainfall had a variety of other impacts as well; for example, severe flooding in July 2018 triggered a USDA disaster declaration for 33 Pennsylvania counties.[144]

Extreme precipitation events tend to affect entire regions rather than isolated farms, which can cause volatility in local prices due to sudden reductions in commodity or supply availability (e.g., grain, which is critical to the dairy industry).

Crop management practices may be challenged by increased frequency and intensity of extreme precipitation events – in particular, the increased runoff and flow concentration associated with this hazard. These impacts could challenge nutrient management methods by increasing nutrient losses prior to plant growth and uptake and could also create vulnerabilities in structural management practices and traditional crop management strategies such as conservative crop rotations and contour farming. Similarly, pasture management for livestock farming may be impacted by more runoff and intense flows, especially in locations that are already regularly wet, poorly drained, and sloped. Crops commonly used for biofuels such as

miscanthus, shrub willow and switchgrass may benefit from warmer and wetter spring conditions, and can serve as natural riparian buffers for sensitive parts of the landscape.

Indirect effects of heavy precipitation events could also include reducing effectiveness of strategies to manage the spread of pollution, nutrients, and sediments across waterways and agricultural and urban landscapes.

Costs associated with crop impacts from flooding and heavy precipitation are significant. The agricultural sub-sector of crop and animal production generated about $9.2 Billion USD; this figure represents approximately 10% of the total economic output from the agricultural sector, and the crop and animal production sub-sector also provides about 29% of the total direct employment in the agricultural sector.[145]

Recreation and Tourism

Rating: 2

State parks and state forests across Pennsylvania have been experiencing significant impacts from flooding and heavy precipitation events. For example:

- Heavy precipitation in December 2020, falling as rain due to high temperatures, caused flooding and fast river currents in the Delaware River corridor, leading the National Park Service to close travel on and access to the river in the Delaware Water Gap National Recreation Area.[146]
- An extended period of heavy precipitation in July 2018 forced multiple state parks as well as Hersheypark and Knoebels Amusement Park to close for several days due to flooding.[147]
- In August 2013, intense storms in Southwestern Pennsylvania led to flooding that forced a variety of recreation areas including boat launches, beaches, and campgrounds to close; many of the closures restricted recreation spaces over the Labor Day holiday.[148]

[148] Pierce, P. 2013. "Flooding closes recreation areas as holiday weekend under way." https://archive.triblive.com/local/westmoreland/flooding-closes-recreation-areas-as-holiday-weekend-under-way/

- "Torrential" rains and flooding in eastern and central Pennsylvania from Tropical Storm Lee (September 2011) forced closures of several recreation areas including World End State Park, Bald Eagle State Park, and parts of the Canal Towpath, and eight other state parks reported damage from the storm (much of it due to flooding). Several of these areas had also been impacted by flooding in January 2010.[149]

Potential effects of climate change and pollution on water quality may increase risks of outdoor recreation where people could come in contact with dirtier or more polluted water.[150]

Additionally, increased flooding will impact planning and investments, where recreation can occur, and ultimately which projects receive grant funding (for more information, see DCNR Climate Change Adaptation Plan).[151]

Increased frequency and intensity of flooding and stormwater runoff may result in impacts to infrastructure and recreational and ecological resources (High Risk). Infrastructure potentially at risk includes trails and recreational amenities; transportation assets such as bridges and roads; buildings; dams; and cultural and historical resources.[152] If trails or recreational amenities are impacted by severe weather or rain events and need to close down for repair, that could put increased pressure on other recreational resources.[153]

Energy and Other Economic Activity

Rating: 2

Due to the interconnectedness of Pennsylvania's economic sectors, impacts of flooding on assets or infrastructure in one sector may have downstream effects on other sectors. For example, localized flooding of and damage to rail assets could disrupt access to workplaces or recreation spaces. Or, local power blackouts caused by flood damage to energy infrastructure could impact those reliant on that power supply.[154] Depending on the region and asset(s) impacted, consequences may vary significantly. Example economic impacts of flooding are described in Exhibit 2.[155]

[155] Post-Gazette.com. 2019. For farmers in Pa. and beyond, heavy rain has turned planting into erratic waiting game. June 1, 2019. https://www.post-gazette.com/business/pittsburgh-company-news/2019/06/01/As-rains-thrash-the-Midwest-AccuWeather-lowers-expectations-for-corn-and-soybeans/stories/201906010024

Pennsylvania is one of the most flood-prone states, with an estimated 86,000 miles of streams and rivers, the most in the continental U.S. 2018 was Pennsylvania's wettest year on record with 63.97 inches of annual rainfall.[156,157]

Flooding along Rivers

From 1991 to 2012, Pennsylvania saw a 71% increase in heavy rainfall events of 2 or more inches.[158]

A heavy rain event from August 10-15, 2018 led to severe flash flooding in counties along the Delaware and Susquehanna Rivers and their tributaries. This flooding resulted in an estimated nearly $62.8 million in total recovery costs for with the governor requested for disaster relief in 16 counties.[159]

In early 2018 in Western PA, several rainstorms resulted in flash flooding and landslides resulting in closed roads. Landslide and rain damage in April 2018 resulted in $14.6 million in Pittsburgh and Allegheny County.[160,161,162,163]

Wettest Year on Record (2018)

PEMA estimated 2018's severe weather to have caused approximately $125 million in damage to public infrastructure due to flooding and landslides. Nearly half of damages were not covered by federal disaster aid, imposing strain on local, county, and PA's budgets.[164]

Rural Impacts

Roughly 6.5% of PA's population lives in floodplains (roughly 374,000 housing units on 5.6% of PA's land mass). The population living in floodplains tends to be older and less financially well off.

FEMA, under the Biggert-Waters Flood Insurance Reform Act of 2012, requires "actuarial" rates for flood insurance to address budget shortfalls from storm damage, resulting in sharp, short-term premium increases, especially previously subsidized rates. An expected 25% increase in National Flood Insurance Program premiums would yield a 6.6% short-term loss in property value.[165]

Heavy rain and flooding in 2019 were expected to negatively impact PA farmers' corn and soybean yields and record rains continued from 2018 into 2019. In Pennsylvania, rain makes steady planting nearly impossible, making scheduling of pest management and harvest difficult. Nationally, heavy rains and flooding delayed the start of soybean planting by 34% by acreage.[166,167, 168]

Forest, Ecosystems, and Wildlife

Rating: 2

More intense rainfall projections are already beginning to manifest in Pennsylvania. More extreme streamflow associated with intense rainfall is already occurring across much of the state, except for the Southwest quadrant. In 2018, Pennsylvania experienced its wettest year on record, and flash flooding across the state. This risk is projected to continue to increase under climate change, and bank erosion is therefore expected to become an increasingly large concern for the state. More broadly, greater hydrological variability, including more intense and less predictable floods and extreme streamflow, could have significant long-term impacts on wetland and stream communities.[169]

Rainfall and runoff events are the primary weather drivers of nonpoint pollution; increased frequency, intensity, and variability of these events could have negative impacts on both rural and urban ecosystems and wildlife. Increased flooding and runoff associated with heavy rain events may affect water quality through increasing pathogen loads (e.g., through runoff from livestock farms, sewer overflows, and resuspension of pathogens in river sediments due to water turbulence in intense storms) and increasing risks of eutrophication and harmful algal blooms (e.g., due to greater nutrient availability from runoff).[170]

Hydraulic fracturing or "fracking" is currently underway in many parts of Pennsylvania, particularly in southwest and northeast Pennsylvania in the Marcellus Shale.[171] Laws such as Act 13[172] govern safe management of potentially toxic spills and runoff from fracking operations that can occur with heavy flooding.[173] Additionally, there are municipal waste landfills and

other waste facilities located across Pennsylvania,[174] which could potentially leach contaminants during flood events if not properly managed.

Further, wetter soil in mountains could contribute to flash flooding during spring storms that coincide with snowmelt.

Additionally, water levels in the Great Lakes, including Lake Erie, are primarily driven by rainfall. Warmer temperatures and greater precipitation variability may lead to more precipitation falling as rain instead of snow, and warmer winters may lead the Lake to be frozen for less time, which could accelerate erosion and cause more flooding. However, warmer temperatures will also increase evaporation, and precipitation variability will likely cause record lows as well as record highs.[175]

Built Infrastructure

Rating: 3

The greatest impacts that flooding is expected to have in Pennsylvania are on infrastructure systems. Flood-related damages are likely to be localized but intense (e.g., flooding alone may cause a local blackout but is unlikely to bring down a full regional power grid). However, if key infrastructure is damaged that may have broader downstream effects (e.g., damage to transportation infrastructure could lead to broader disruptions to the economy). Costs related to these damages are significant; for example, FEMA paid $953 million to National Flood Insurance Program (NFIP) policyholders in Pennsylvania between 1975 and 2019. NFIP insurance is available to businesses and property owners and renters; in high flood-risk areas, businesses and homes must have flood insurance if they have mortgages from government-backed lenders.[176]

Both rural and urban infrastructure face significant increasing flooding risk, though likely with differential risks and vulnerabilities across regions and demographics. For example, an evaluation of per capita property losses due to flooding found many of the higher losses were experienced in rural counties in Pennsylvania.[177]

Infrastructure at greatest risk of flooding are structures located in flood zones, though structures not in flood zones (e.g., underground pipelines) may be at significant risk as well. Significant portions of transportation and energy infrastructure in Pennsylvania may be susceptible to direct flooding damage, especially in the Southwestern region where heavy

[175] Cosier, Susan. 2019. "Great Lakes Levels Are Rising – a Sign of Things to Come?" *Natural Resources Defense Council (NRDC). https://www.nrdc.org/stories/great-lakes-levels-are-rising-sign-things-come*

[176] FEMA. 2020. "Flood Insurance." https://www.fema.gov/flood-insurance

[177] DEP. 2020 IA.

precipitation events may bring compounding flood and landslide risks. For example, transportation infrastructure (e.g., bridges, roads, railways) may be vulnerable to disruption from flooding, debris or landslides. And extreme rainfall represents one of the largest risks to pipelines—including many underground—carrying various power products (e.g., natural gas, crude oil, petroleum). However, recent severe storms (e.g., Hurricane Irene and Superstorm Sandy) and flooding events indicate that local electricity infrastructure may be more susceptible to heavy rainfall hazards than the regional bulk power grid.[178]

Greater frequency and intensity of intense rainfall events will also challenge urban stormwater and wastewater management systems, which could lead to combined outflows detrimental to water quality. Stormwater retrofits may be somewhat adapted to reduce or withstand impacts to some extent, and nature-based solutions may also increase adaptive capacity (this strategy is currently being implemented in Philadelphia, for example).[179]

Issues such as storm sewer backup may lead to ground-water flooding, which may cause infrastructure damages (e.g., related to water infiltration into building basements) or spring overflow. Many state and local actors are evaluating adaptation measures such as increasing sewers' capacity and developing projections to better estimate future loading and overflow potential, to prevent sewage release events and manage higher flow amounts.[180]

Additionally, a potential increase in area located in the 1% annual chance floodplain by end-of-century would put significantly more infrastructure at risk to flood impacts. A comparison of the number of state-owned or leased facilities located in the current 1% annual chance floodplain to the number located in the projected end-of-century floodplain in Delaware, Allegheny, and Lycoming counties highlights this risk. The comparison identified a nearly 500% increase in the number of vulnerable structures, with replacement value of structures in the future floodplain over $92 Billion.[181]

Notably, increased temperatures affect the Palmer soil index and reduce the moisture absorption of the soil, which can in turn increase the likelihood of flash flooding occurring.[182]

Various flood protection efforts—ranging from monitoring to education to real-time warning plans to policy and strategy revision—are underway, described in detail in the 2019 Update to the Commonwealth of Pennsylvania 2018 State Hazard Mitigation Plan.

4.3 Heat Waves

4.3.1 Overview

Heat waves will increase from a medium to a high risk by mid-century. Table 8 summarizes the likelihood and consequence ratings. Figure 39 illustrates the change in overall risk rating from present-day to 2050 based on the likelihood and consequence ratings.

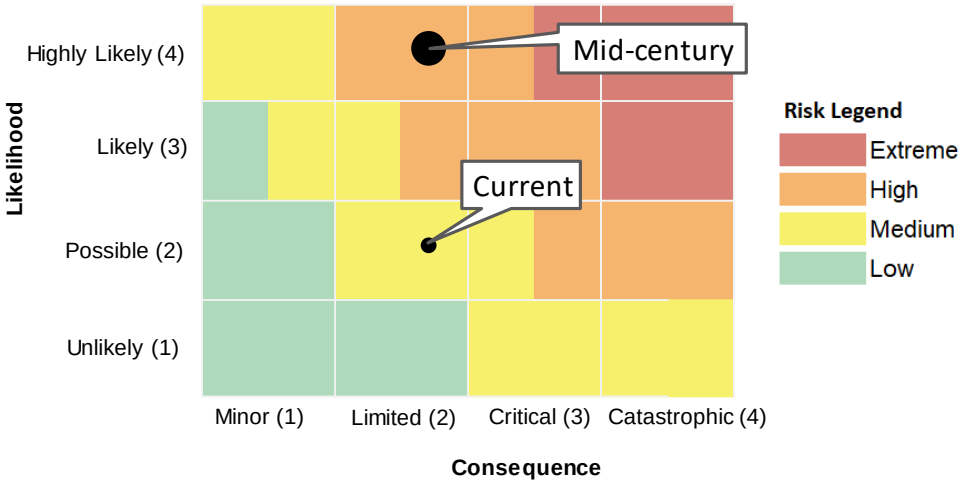

Figure 39. Heat waves risk matrix

Heat waves are a discrete hazard. Currently, cities in Pennsylvania experience roughly 5-6 excessive heat event days per year. The frequency of such days is projected to increase about tenfold by mid-century, leading to over a month's worth of extreme heat events. Across the state, on average the annual number of days experiencing temperatures above 95°F is expected to increase by 5-26 days by the mid-century and 10-61 days by the end-of-century. Similarly, the number of consecutive days experiencing temperatures above 95°F is expected to increase by 0-5 days by the mid-century and 1-14 days by the end-of-century. Additionally, across the state, the number of days above the baseline time-period's 99th percentile temperature (90.1°F on average across the state, though it varies by grid cell) is projected to range from 20-50 days by the mid-century and 34-88 days by the end-of-century.

This will impact the entire state and all sectors, but will have the highest consequences for human health, especially in urban areas. Heat waves create the risk of heat illness and death.

Table 8 summarizes the statewide likelihood and consequences of heat waves in Pennsylvania.

Table 8. Heat waves statewide risk summary

Timeframe or Category	Rating	Notes	Confidence	Differential Impacts
Likelihood (details in 4.3.2)				
Current	2	Currently, Pennsylvania experiences, on average, about 4 days per year that are "extremely hot."	High	No significant geographic differences in observed high temperature days
Mid-century	4	By mid-century, Pennsylvania is expected to experience over 35 "extremely hot" days per year.	High	Southwestern PA will experience more days with high temperatures than other regions of the state
Beyond 2050		Temperature are expected to continue increasing beyond 2050 without significant greenhouse gas reductions. On a business-as-usual emission trajectory (RCP 8.5), Pennsylvania could experience over 65 "extremely hot" days annually		
Consequences (details in 4.3.3)				
Human health	4	Increased heat-related mortality and morbidity	High	The elderly, those with cardiovascular disease, those with certain mental health illnesses, outdoor workers, pregnant women, and populations with limited access to air conditioning experience higher risk to heat-related illness and death.
Environmental justice and equity	3	EJ areas are projected to experience a disproportionate increase in exposure to heat stress compared to the state overall	Medium	▪ Lower-income populations have higher vulnerability to heat stress and less access to adaptive measures such as natural infrastructure (e.g., shade trees around a home), good insulation, and air conditioning. ▪ More broadly, vulnerable populations include those with: outdoor jobs, housing with less insulation/ access to natural infrastructure/ air conditioning, decreased access to quality healthcare, and

Timeframe or Category	Rating	Notes	Confidence	Differential Impacts
				populations living in densely populated urban areas experiencing UHI effects
Economy: Agriculture	2	Decreased production (e.g., of milk) Animal illness/death Decreased crop yields	Medium	
Economy: Recreation and tourism	1	Decreased time spent participating in outdoor leisure	Medium	
Economy: Other	2	Increased demand for cooling Heat-related damage to energy infrastructure	Medium	
Forests, ecosystems, and wildlife	1	Increased stress on species experiencing decreasing habitat suitability	Low	This applies particularly to species that are more suited to colder habitats.
Built Infrastructure	2	Increased energy demand and decreased energy capacity Stress on public water suppliers and utilities Exacerbate negative impacts of the urban heat island effect	Medium	
Overall Risk				
Current	4.7	Medium risk	High	
2050s	9.3	High risk	High	
Potential Opportunities				
Increase in utilization of silvopasture for livestock operations, which reduces heat stress among other benefits				

4.3.2 Likelihood

Additionally, there is high confidence[183] that "recent record-setting years [in terms of high temperatures] may be "common" in the next few decades."[184] While currently, the state experiences about 4 days per year on average that are "extremely hot" (the baseline 99th percentile temperature or approximately 90.1°F), that number will increase to over 35 days by mid-century, with a potential range of about 20 to 50 days.

[183] High confidence denotes "Moderate evidence (several sources, some consistency, methods vary and/or documentation limited, etc.), medium consensus." The full list of models included in this analysis is included in Appendix C.

[184] Vose et al., 2017. "Temperature changes in the United States."

Risks of heat waves are higher in urban areas due to the urban heat island effect. Given the high confidence of such projections and the high projected occurrence of excessive heat event days, heat waves merited a likelihood rating of 4 for the mid-century timeframe. The current timeframe received a likelihood rating of 2, since heat waves do occur currently, but only happen about 5-6 days per year.

4.3.3 Consequences

Figure 40 summarizes the overall consequence ratings statewide for heat waves—highest consequences are in human health and in environmental justice and equity. These consequence ratings are also in Table 8.

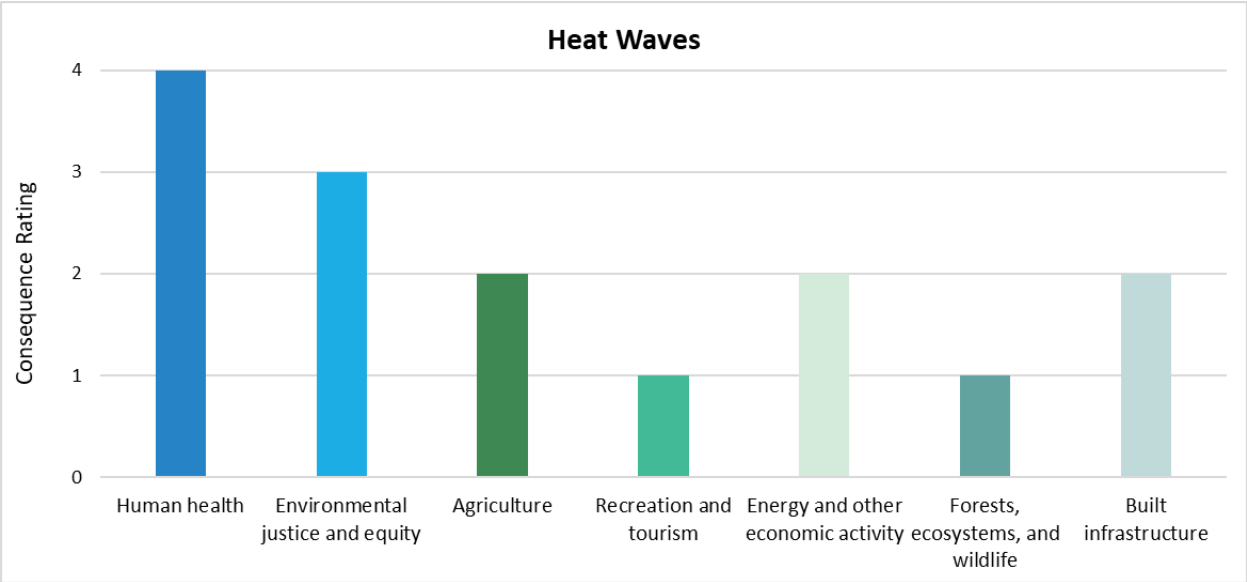

Figure 40. Heat wave consequences

Human Health

Rating: 4

Heat wave events will cause heat-related mortality and morbidity. Extreme heat is responsible for the most weather-related deaths in the United States.[185] By impeding the body's ability to thermoregulate, exposure to high temperatures can cause conditions like heat exhaustion, dehydration, heat rash, heat stroke, and heat cramps, which for more severe conditions can lead to death if left untreated.[186],[187] When heat is a contributing cause of death (rather than the underlying cause), it is most commonly for cardiovascular diseases like ischemic heart disease

[185] Davis et al., 2003. Changing heat-related mortality in the United States. *Environmental Health Perspectives*.111:1712-1718. https://ehp.niehs.nih.gov/doi/pdf/10.1289/ehp.6336

and hypertension, alcohol poisoning, and drug overdoses.[188] However, the risk of mortality from extreme heat events has been decreasing, as more and more households are installing air conditioning.

Underlying health conditions, age, race, limited access to air conditioning, outdoor employment (e.g., farm labor or logging), and living in urban areas can all increase risk to heat-related health conditions.[189],[190],[191] Specifically, young children and the elderly are at heightened risk of morbidity or mortality.[192] Individuals with pre-existing psychiatric illnesses and those who are socially isolated are also at high risk during heat waves.[193],[194] Heat can also contribute to death for individuals suffering from certain mental health conditions that change risk perception and understanding of exposure to extreme heat.[195] Pregnant women and their unborn children are at greater risk from extreme heat as their capacity to thermoregulate is compromised.[196] Exposure to extreme temperatures could affect multiple birth outcomes including length of gestation, birth weight, stillbirth, and neonatal stress.[197]

For outdoor workers, the Occupational Safety and Health Administration (OSHA) cautions that worker heat protection measures should be taken if temperatures exceed 91°F, or if temperatures come near that threshold and people are working outside in direct sunlight

[197] Kueh and McCormick. 2017. Heat Exposure and Maternal Health in the Face of Climate Change.

and/or without wind to cool them down.[198] Beyond work, walking and exercising outdoors will also become more hazardous.[199]

Direct and indirect mental health impacts from climate-related events are not as well documented or studied as physical health impacts. A recent literature review found mood disorders, feelings of anger and frustration, and increased anxiety are all associated with heat stress and discomfort. [200] Heat stress can also affect the ability of children to learn and retain information and adults to be able to work productively.[201] Extreme heat is also associated with increased rates of suicide and contributes to heightened aggression, hostility, and violence.[202] Violent crimes are expected to increase as a result of extreme heat events.[203]

Human health impacts may be exacerbated in areas where disadvantaged populations experiencing heat-related impacts have less ability to adapt (e.g., low-income individuals who cannot afford to purchase A/C or take time off work on high heat days).

Environmental Justice and Equity

Rating: 3

As shown in Figure 35, the number of hot days across the state is projected to increase, and populations in environmental justice areas are projected to disproportionately experience the most days with hot temperatures. Isolation of the census blocks projected to see the top 20% of numbers of days with temperatures > 90°F in the state indicates that, proportionately, EJ areas are expected be nearly twice as exposed (1.8x) to those top-20% conditions compared to the Pennsylvania population as a whole.

Consequences of historical practices of redlining, building substandard housing in communities of color, and intentionally disinvesting in communities of color manifest today as inequities where communities of color are disproportionately in older or substandard housing that is particularly susceptible to deterioration by heat waves.

The elderly, those with cardiovascular disease, and populations with limited access to air conditioning experience higher risk to heat-related illness and death. Other at-risk populations include children playing outside, seniors living alone, construction workers, and athletes.[204]

Access to air conditioning is a key adaptation strategy for decreasing excess heat deaths and illness. Indeed, the rate of heat-related mortality has decreased over the 20th century and largely after 1960 due to air conditioning becoming more available and prevalent. It is therefore important that low-income residents who cannot afford air conditioning have access to publicly available cooling shelters or other assistance installing or accessing air conditioning. A survey of Philadelphia residents found the majority of respondents were not aware of or have limited access to City cooling centers. Although 84% of respondents have air conditioning, 77% indicated a need for better air conditioning and fans at home to stay cool.

Historically, some of the hardest-hit counties with respect to extreme weather events such as extreme heat are also among the poorest counties in the state. The Philadelphia Heat Vulnerability Index, which combines heat data with information on population, age, income, language, educational attainment, race and ethnicity, social isolation, and health, shows that residents of color and low-income residents are more likely to live in the hottest neighborhoods (up to 22°F hotter), making climate change heat risk both a public health issue and "an issue of racial and social equity."[205] The expected causes of hotter temperatures in these neighborhoods are limited green space and tree canopy, more exposed dark surfaces (e.g., asphalt), and aging housing stock due to a history of redlining and disinvestment.

Economy

Agriculture

Rating: 2

As described in the section on increasing average temperatures above, livestock are likely to suffer from heat stress as temperatures rise over the coming decades. This will be exacerbated during extreme heat events, and farmers will have to spend more on energy for cooling or other adaptive measures to reduce livestock stress and mortality.

Increased temperatures may encourage a shift to using silvopasture for livestock operations, which integrates trees, foraging, and grazing on the same plot of land. This practice reduces heat stress, increases forage and reduces feed cost, increases carbon sequestration, captures more runoff/nutrients, and provides alternate income source via nuts or fruits.[206]

[206] Pennsylvania Department of Agriculture. November 2020. Department staff expertise.

Crops can also experience heat stress from a heat wave, which may decrease yields. Depending on the timing of the heat wave, significant life stages or milestones can be disrupted. More irrigation may be necessary during a heat wave to minimize impacts to crops.[207],[208]

Extreme heat also threatens worker safety and health as described under the human health section. Time spent working outdoors generally declines above 85°F for agriculture workers.

Recreation and Tourism

Rating: 1

The amount of time spent participating in outdoor leisure drops when daytime high temperatures exceed 100°F. Such hot days are expected to increase in frequency in Pennsylvania due to climate change. By mid-century, the number of days exceeding 100°F is expected to increase by 1-12 days.

Extreme heat could add additional pressure to natural and man-made water features (e.g., lakes, rivers, city pools) used for recreation and an escape from the heat. Additional water features may be necessary in urban areas to meet demand for cooling spaces.[209]

Energy and Other Economic Activity

Rating: 2

Heat wave events increase demand for cooling, requiring power grid operators to reduce operable capacity on electric generation facilities and electric transmission lines to avoid heat-related damage. Example economic impacts of heat waves are described below.

---

[207] Pennsylvania Emergency Management Agency. November 2020. Department staff expertise.
[208] Pennsylvania Department of Environmental Protection, Office of Water Programs. November 2020. Department staff expertise.
[209] Pennsylvania Department of Conservation and Natural Resources. November 2020. Department staff expertise.

Exhibit 3. Example of economic impacts: heat waves

While the economic impacts of heat waves are hard to monetize, significant impacts are expected.

Vulnerable Populations

Nationally, heat is the leading cause of weather-related deaths over the last 30 years. In Pennsylvania, statistics show that between 2008 and 2018 PA has recorded at least 2 deaths per year except in 2014 and 2017. The high point occurred in 2011 with 36 heat-related deaths.[210]

More than 310,000 people in PA are especially vulnerable to extreme heat (over 65, under 5, or living below the poverty line).[211]

Agricultural Impacts

With rising heat come longer growing seasons, but potentially lower yields. Research suggests negative correlation between maximum daily temperature and corn yield—heat waves could negatively impact corn, and other crop, losses.[212]

Apples, sweet corn, grapes, and dairy production could all see negative impacts, as extreme heat impacts growth and production.[213]

One study suggests that above a critical temperature threshold of 77 degrees Fahrenheit, dairy milk production may drop by up to 22%. This type of decline could inflict as much as $480 million in direct and indirect economic costs.[214]

Forest, Ecosystems, and Wildlife

Rating: 1

Increasing average temperatures represent a greater risk to forests, ecosystems, and wildlife than intermittent heat waves, as the former carries the potential to change the amount and location of suitable habitat. However, extreme heat can lead to heat stress and death, particularly among species that are at the southern end of their range in Pennsylvania (i.e., are more suited to colder, northern habitats).

Built Infrastructure

Rating: 2

Extreme heat can stress infrastructure, including pavements, electrical and mechanical equipment, and energy infrastructure (generation, transmission, and distribution). This stress can lead to increased deterioration rates and maintenance costs and, in severe cases,

[214] University of Maryland, 2008. Economic Impacts of Climate Change on Pennsylvania. http://cier.umd.edu/climateadaptation/Pennsylvania%20Economic%20Impacts%20of%20Climate%20Change%20Full%20Report.pdf

infrastructure failures. For example, roadways will become more pliable, experience greater wear and tear, and be more susceptible to buckling under extreme heat conditions.[215]

Areas with a higher concentration of built infrastructure and hard surfaces (i.e., urban areas) experience higher surface and air temperatures than their rural counterparts—this is known as the urban heat island. This can exacerbate the negative impacts of heat waves and increase the stress on the occupants and infrastructure of cities. The "tropicalization" of the climate (i.e., increased heat and moisture) will decrease the service life of building and roofing materials, increase demand for cooling, and increase maintenance costs for built infrastructure.[216]

In the energy sector, increased temperatures simultaneously increase demand for cooling and require power grid operators to reduce operable capacity on electric generation facilities and electric transmission lines to avoid heat-related damage. Electrical and electronic equipment in unconditioned or outdoor spaces have shorter service lives and are subject to greater chance of thermal overload or reduced efficiency.[217] Power outages are possible is the system is overloaded.

Public water suppliers and utilities could also face increased stress from increased water usage, water intake levels, and salinity concerns near the southeastern and northwestern portions of the state.[218]

4.4 Landslides

4.4.1 Overview

Landslides can occur across Pennsylvania. As shown in Figure 41, they occur most often in the Southwestern region, though other regions may have significant landslide hazards as well—and this region may expand.[219]

[215] Pennsylvania Emergency Management Agency. November 2020. Department staff expertise.

[219] Pennsylvania DCNR. November 2020. Department staff expertise.

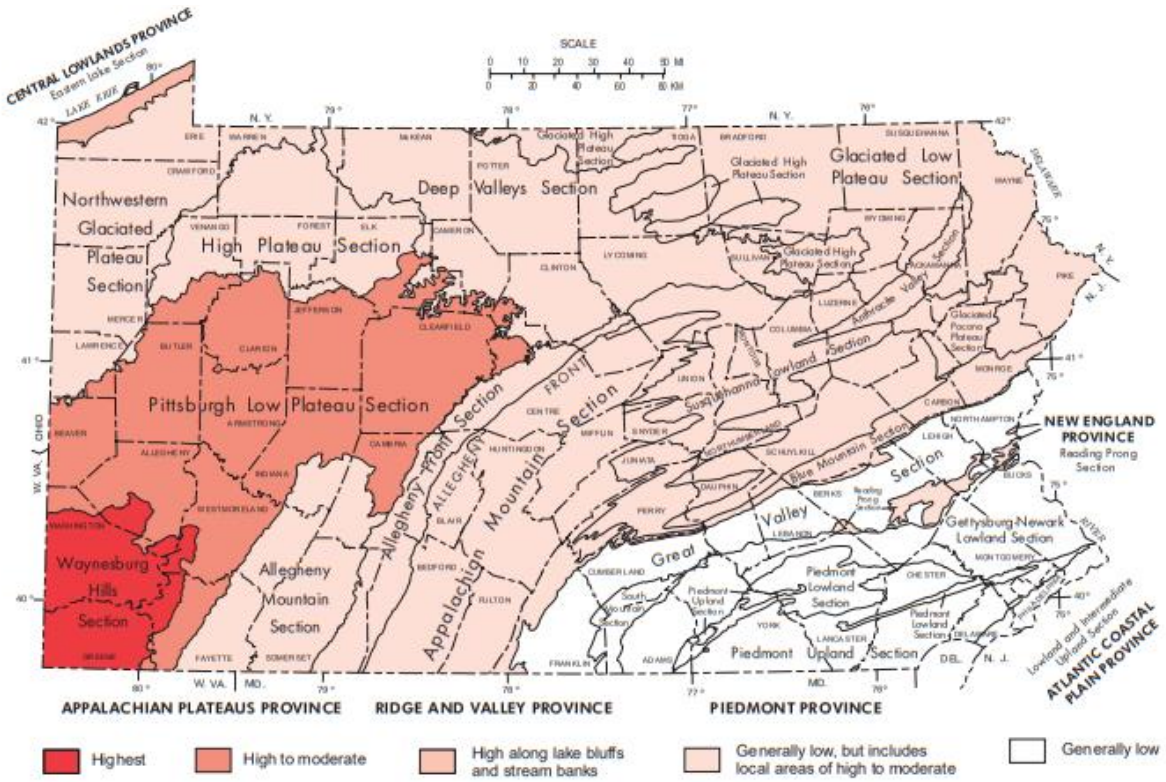

Figure 41. Physiographic information and landslide susceptibility in Pennsylvania

Source: Delano and Wilshusen, 2001.

Higher average and extreme precipitation may increase soil water saturation, which can destabilize soil and increase the risk of landslide occurrence.[220] Seasonal distribution of precipitation is also important; extreme events can trigger landslides at any time of year, while precipitation accumulated over time poses less of an issue if vegetation is incrementally taking up soil moisture to grow.[221]

Temperature is also relevant to landslide risk. For example, one component of the extreme landslide occurrences in 2018 was warm weather. In early 2018, the ground never froze in the Pittsburgh area, leading to more infiltration, and further, most precipitation fell as rain (not snow), and the snow that fell melted rapidly. Historically, most precipitation in February has normally fallen as snow, which melts slowly or sublimates; nearly continuous rain in February 2018 overwhelmed soil moisture capacity.

Under climate change, average annual cumulative precipitation is projected to slightly increase, and precipitation variability is projected to increase as well, which may lead to greater frequency and intensity of heavy rainfall events. Average temperatures are also projected to warm due to climate change, which may increase the amount of precipitation that falls as rain.

---

[220] Gariano, S. L. and F. Guzzetti. 2016. "Landslides in a changing climate." *Earth-Science Reviews*, 162, p. 227-252. https://www.sciencedirect.com/science/article/pii/S0012825216302458.

[221] Pennsylvania DCNR. November 2020. Department staff expertise.

Depending on non-climate variables (e.g., current landslide risk, land use), risks of landslides may increase at some locations corresponding to these precipitation and temperature trends.

The greatest consequences of concern for landslides are damages to built infrastructure and associated economic impacts, as well as human health and safety impacts. Infrastructure damages are often severe after the slide, and the amount of time and spread of consequences vary.

Historically, landslides have tended to have greatest impacts when they disrupt transportation or energy infrastructure; the degree of downstream impacts (e.g., on the agricultural sector, or human health, if a highway is damaged) varies depending on factors such as the type of damage, the criticality of the asset/infrastructure, and the location of the landslide. For example, a landslide that damages a rural section of highway while cars are traveling on it could cause injuries or fatalities, while a landslide that breaks an electric transmission line could impact electricity end-users (e.g., homes, buildings like hospitals, farms with irrigation systems that run on electricity). Figure 42 plots the overall current and mid-century risk ratings for landslides. While landslide likelihood may increase with greater precipitation variability, not enough evidence exists to change the current likelihood (and therefore risk) rating.

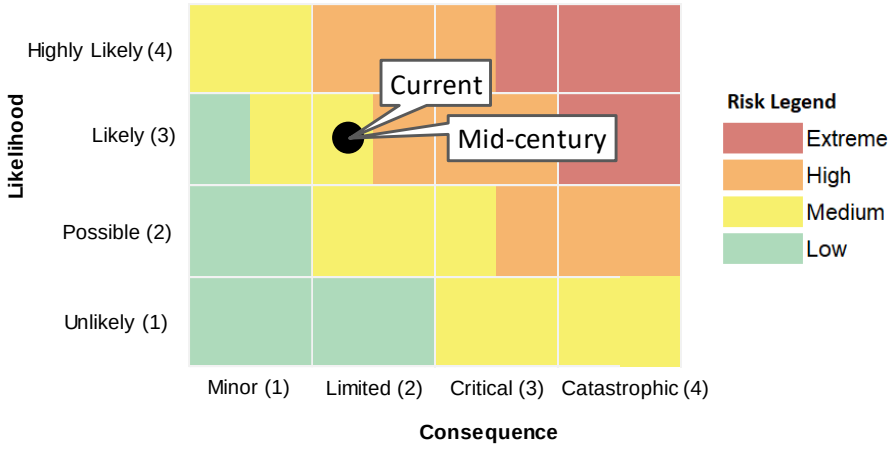

Figure 42. Landslides risk matrix

Table 9 summarizes the statewide likelihood and consequences of landslides in Pennsylvania.

Table 9. Landslides statewide risk summary

Timeframe or Category	Rating or Risk Score	Notes	Confidence	Differential Impacts
Likelihood				
Current	3	The PA HMP222 identifies landslides of any magnitude as "highly likely" (over 90% probability) to occur any given year. More severe landslides like those analyzed in this scenario would be less likely.	High	In general, southwestern locations and populations are more exposed; there are also other localized areas with high vulnerability.
Mid-century	3	Landslide probability may increase with greater precipitation variability, though not enough evidence exists to change current likelihood rating.223	Medium	Same as current.
Beyond 2050		These trends are expected continue as precipitation variability increases beyond 2050.		Same as current.
Consequences				
Human health	1	Limited direct health impacts are expected, with some potential for indirect health impacts (e.g., due to infrastructure disruption)	Medium	Health risks may be particularly significant for low-income individuals with homes in high-risk areas or reliant on infrastructure (e.g., public transit) in high-risk areas to access jobs and income.
Environmental justice and equity	2	EJ areas 1.17x as exposed to high landslide risk compared to the state overall	Medium	Rural townships with low tax base and many miles of roads, which may be severely affected by landslides in some areas, and may not be captured in the EJ areas.
Economy: Agriculture	1	Localized impacts unless critical infrastructure is severely damaged	High	Severe economic disruptions may disproportionately impact low-income populations. Additionally, rural townships may be particularly impacted, and not captured by the EJ areas analysis.
Economy: Recreation and tourism	1	Few consequences expected	Medium	See Economy: Agriculture.

[222] PEMA. 2018. "Risk Assessment."

[223] Gariano and Guzzetti. 2016. "Landslides in a changing climate."

Timeframe or Category	Rating or Risk Score	Notes	Confidence	Differential Impacts
Economy: Other	2	Localized impacts unless critical infrastructure is severely damaged	High	See Economy: Agriculture.
Forests, ecosystems, and wildlife	1	Few consequences expected	Medium	N/A
Built Infrastructure	4	Direct damages to energy or transportation infrastructure with downstream impacts that are relatively localized, but significant	High	See Economy: Agriculture.
Overall Risk				
Current	5.6	Medium risk		High
2050s	5.6	Medium risk		High
Potential Opportunities				
None identified.				

4.4.2 Likelihood

Landslides of any magnitude are currently highly likely (>90% annual probability) to occur in Pennsylvania, and with <6 hours warning time, but are anticipated to have minor impacts, negligible spatial extent, and short duration.[224] However, this assessment focuses on potential occurrence and impacts of more severe landslides, which are relatively less likely to occur. For example, while the Hazard Mitigation Plan analysis is based on any landslide occurring (e.g., even those with minimal impacts to built infrastructure and no human impacts), while this assessment is focused on the subset of more extreme but lower probability events (e.g., a landslide causing significant damages to infrastructure, with potentially significant downstream economic or natural systems impacts, or human injuries or fatalities).

Literature on climate change and landslide risk[225] finds that greater frequency and intensity of heavy rainfall events, which are known to trigger landslide events, may lead to greater landslide risk in Pennsylvania. However, causes of landslides are multivariate and complex, and there is significant uncertainty around how and to what degree landslide risk may change due to climate change.

[224] PEMA. 2018. "Risk Assessment."

[225] Gariano and Guzzetti. 2016. "Landslides in a changing climate."

As shown in Figure 41, approximately 48% of land in Pennsylvania currently has high rates of landslide incidence or susceptibility, with risk primarily concentrated in the Southwestern region. Historical occurrences of landslides in Pennsylvania depict a similar risk region (Figure 43),[226] though slides have occurred in eastern PA.

Though the likelihood of landslides occurring may increase by 2050 due to projected increased frequency and intensity of precipitation, the likelihood of a landslide occurring at any given location, and the change in that likelihood, is uncertain and will vary significantly due to non-climate variables such as land use and physiography. As a result, there is not enough evidence to change the current likelihood rating for 2050.

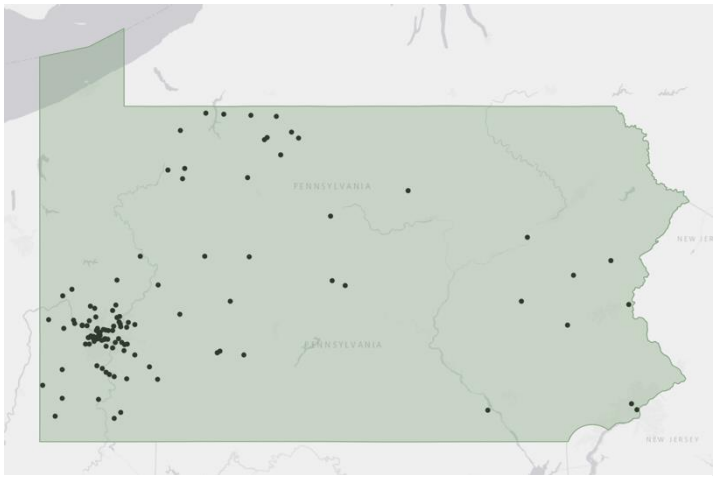

Figure 43. Historical incidence of landslides
Source: U.S. Landslide Inventory (USGS, N.d.).

4.4.3 Consequences

Historically observed landslides have been concentrated primarily in Southwestern Pennsylvania; susceptibility in other regions is limited, and areas with high susceptibility are relatively smaller. Locations of past landslide occurrence of landslides are often indicative of future high-risk areas.[227],[228] Additionally, there are several large landslides that have not been active in recent history but could become active, with major consequences (e.g., damming a large river) if unknown thresholds are reached.[229]

For the most part, human injuries and fatalities have been limited, though they can occur if people are in the debris flow zone when a slide occurs. The greater impacts are damages to infrastructure (e.g., highways, buildings, utility facilities).

Figure 44 summarizes the overall consequence ratings statewide for landslides– highest consequences are in environmental justice and equity and built infrastructure.

[229] Pennsylvania DCNR. November 2020. Department staff expertise.

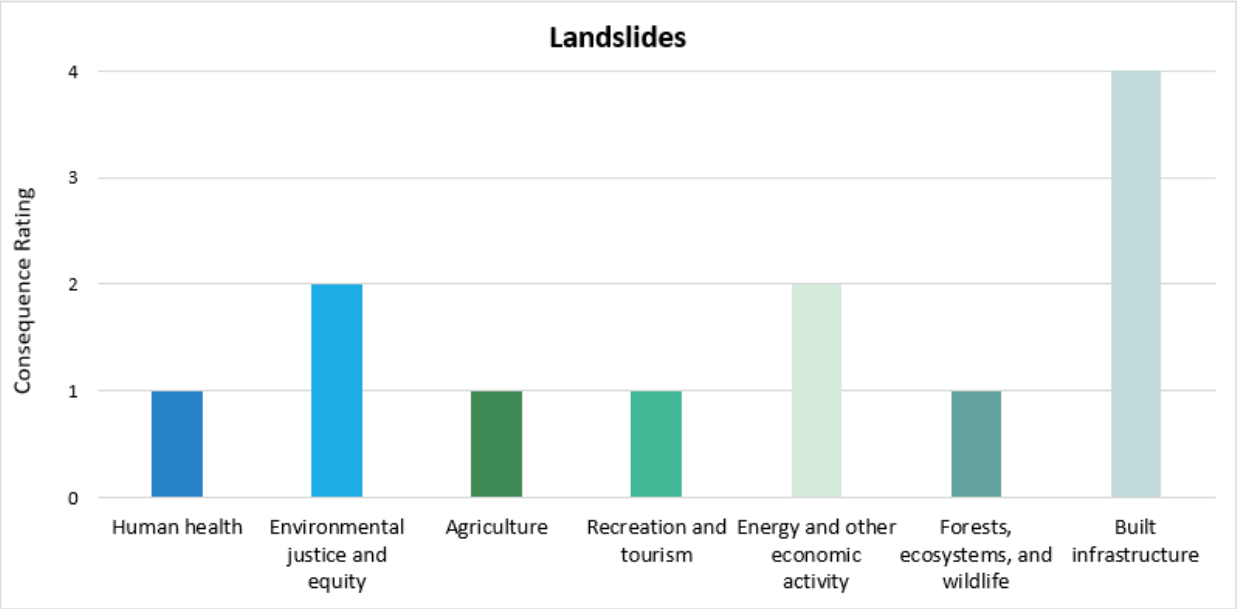

Figure 44. Landslide consequences

Human Health

Rating: 1

Direct human health impacts from historical landslides have been limited, with nearly all of the few injuries and fatalities recorded occurring due to vehicle impacts from landslides along highways. Notably, greater human impacts on land (e.g., cutting into rock to build highways) tend to cause more landslides and cause more humans to be impacted than by naturally occurring events.[230]

Landslides can indirectly affect health if they disrupt infrastructure critical to supplying commodities and services that people rely on (e.g., energy infrastructure, electricity lines, transportation infrastructure needed to deliver medicine or roads critical to fast ambulance travel,[231] or water or wastewater systems and treatment facilities), accessing places of employment (e.g., road or rail infrastructure), or otherwise allowing economic function and revenue generation.[232],[233] Individuals may also lose their homes to landslides, with significant financial and health and safety consequences. Further, rare events such as a pipeline rupture due to landslide can have major consequences, as indicated by several past events with liquid and gas fuels: one polluted drinking water in the Allegheny River for multiple days, and the

other caused an explosion and loss of a house.[234] Finally, landslides have the potential to negatively impact drinking water quality if sediment is introduced into water bodies.[235]

Environmental Justice and Equity

Rating: 2

As shown in Figure 45, spatial analysis of regions with high landslide incidence rates and susceptibility finds 48% of total sq. miles in the state are at risk, while 56% of total sq. miles of all state EJ areas are at risk. Therefore, EJ areas experience approximately 1.17 times the risk that the state experiences on average.

However, communities in EJ areas may nonetheless experience disproportionate impacts of landslides when they occur. For example:[236]

- Lack of homeowners' insurance coverage for landslide damage and low values of homes in EJ areas can increase landslide impacts in these areas.
- Total Loss of home is common when repair cost estimates almost always exceed value of home.
- Low tax base in low-income areas challenges government response for roadway and other infrastructure repair.
- Poor maintenance of drains and roadways can contribute to increasing hazard through ineffective water management.

Other factors that may increase individuals' vulnerability to impacts from landslides may include location and infrastructure needed to access employment. For example, in urban areas, large populations dependent on public transportation could be impacted if it is damaged (though it might be repaired faster with public pressure), while in more rural areas, smaller populations might be more severely impacted by loss of critical roads if there are fewer travel routes to begin with.

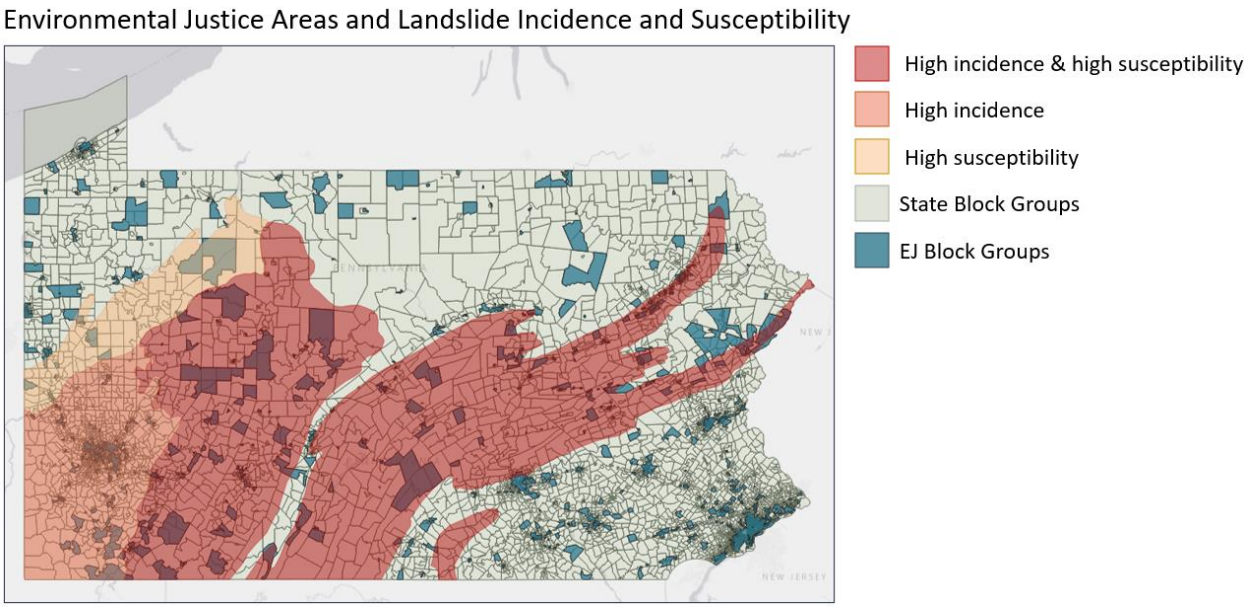

Figure 45. Historically high-risk landslide areas with EJ block groups

Landslide data source: USGS, National Landslide Information Center, Compilation of Landslide Overview Map of the Conterminous United States.

Economy

Agriculture

Rating: 1

Disruptions to commerce and supply chains or physical damage to agricultural land due to landslides could impact the agricultural industry. A landslide occurring on agricultural land would have the most intense and direct impacts, including displacement of or damage to crops, livestock, or materials (e.g., stored feed, equipment).[237]

Additionally, many agricultural services rely on commodities being delivered, and delivery could be disrupted if transportation infrastructure is damaged by landslides. For example, damage to local transportation infrastructure could prevent trucks carrying milk and feed from getting to or from a farm. [238]

[237] Food and Agriculture Organization of the United Nations. 2020. "Landslides." http://www.fao.org/emergencies/emergency-types/landslides/en/?page=3&ipp=10&no_cache=1&tx_dynalist_pi1[par]=YToxOntzOjE6IkwiO3M6MToiMCI7fQ==

[238] Pennsylvania Department of Agriculture. November 2020. Department staff expertise.

Recreation and Tourism

Rating: 1

Minimal research is available on landslide impacts to recreation and tourism. However, it is possible that landslides could temporarily affect recreation and tourism—if, for example, landslide damages to transportation infrastructure hindered access to recreation destinations.

Energy and Other Economic Activity

Rating: 2

Economic sectors reliant on infrastructure (e.g., the energy sector), particularly in Southwest Pennsylvania, may be impacted by infrastructure damages from landslide occurrences. This risk may increase in the future, as heavy precipitation events, which are projected to become more frequent and intense, are associated with increased landslide potential.[239]

Downstream economic impacts

PA Department of Agriculture staff noted that, depending on the location, size and frequency of landslide occurrences, food supply chain disruptions could be significant.

Economic effects of major delays in transportation and commuting time for large areas could be significant. For example, business could be cut off from historic customer traffic, and school busses, commuters, delivery times could be affected by road closures. Short-term delays frequently occur due to landslides along major routes, but they are normally managed within a day or two; long-term road or lane closures could cause delays and loss of access for years.240 Example economic impacts of landslides are described in the Exhibit 4.

[239] DEP. 2020 IA; Gariano and Guzzetti. 2016. "Landslides in a changing climate."
[240] Pennsylvania DCNR. November 2020. Department staff expertise.

Exhibit 4. Example of economic impacts: landslides

Given the geography of Pennsylvania, with both the Appalachian and Allegheny Mountain ranges, landslides cause significant annual impacts and damages to both infrastructure and personal property.

Vulnerable Communities and Infrastructure

Much of Pennsylvania is susceptible to landslides, with 4.48 million people, 6,318 critical facilities, and more than $510 billion in exposed building infrastructure.[241]

Backyard" landslides (landslides on private property), common in western PA are usually repaired incompletely or not at all, costing upwards of several thousand dollars to stabilize and repair a landslide affecting two or three properties. With repair costs exceeding the value of most properties in this area, abandonment is a frequent solution.[242]

Historic Damages

In a typical year, PennDOT budgets about $30 million for flooding and landslide damage. In 2018 alone, PennDOT spent about $127 million fixing damage from flooding and landslides.[243]

Transportation and Natural Gas Infrastructure

Great portions of the Pennsylvania roadway network runs through mountainous terrain, and are continually at risk. In three counties alone (Beaver, Allegheny, and Lawrence), PennDOT crews fix roughly 15 sites of varying size per year, but during that same period, 30-40 new slides occur Beyond cost, repair crews often cannot keep up with the pace of slides.[244]

Many of Pennsylvania's natural gas pipelines also stretch across areas susceptible to landslides. Since between early 2018 and mid-2019, at least six pipeline explosions occurred because of landslides in Appalachia.[245]

Forest, ecosystems, and wildlife

Rating: 1

Landslides have minimal impacts on forests, ecosystems, and wildlife.

Landslides may impact land topography, including forest cover and river, stream, and groundwater flow, as well as physical habitats and the ecosystems and wildlife they support. For example, movement of sediment into a river could reduce water quality and impact fish habitat, or a large land movement could strip vegetation (e.g., from a forested hillside).[246]

Landslide impacts on surface water ecosystems are largely unknown, but in most cases likely short-lived. For example, a landslide could increase sediment in a stream, potentially

---

temporarily damming the stream. Ecosystems impacts could also be a downstream consequence of larger infrastructure failures (e.g., if a pipeline or storage tank were damaged, and contents spilled out).[247]

Built infrastructure

Rating: 4

Greater frequency and intensity of heavy precipitation events may increase landslide potential.[248]

Though records of damage costs are limited, those that exist are significant. In Allegheny County, for example—one of the eight Southwestern counties identified as most at-risk—the costs to remediate landslides continues to increase. Pennsylvania DOT data indicates landslide damage repairs in Allegheny cost between 2016 and 2019, the costs exceeded $45 million in total. During this same time period, based on National Oceanic and Atmospheric Administration data, Pennsylvania experienced the rainiest two‐year, three‐year and four‐year periods on record. High impacts have occurred more recently as well: the Pittsburgh area saw "record" landslides and associated costs in 2018, and the mayor noted the city was "already five times over budget for landslide remediation by mid-April" of that year, with damages to homes, roads, and vehicles.[249]

If landslides impact major highways where federal or state funds become available, repairs can be fast, so that damages are relatively localized and temporary. However, impacts to other roads and homes may be long-lasting, if difficult to enumerate. For most state or local roads, repairs are often deferred for multiple years, or sometimes permanently, due to budget constraints. PennDOT district 11, for example, has a large backlog of landslide repairs. And there are hundreds of locations in Allegheny County where roadway repairs are waiting on funding or have been abandoned because they are not expected to ever be funded. If a municipality loses access to a road that is a link in emergency transportation routes or a significant commuter route, many peoples' daily lives and certain individuals' health may be impacted.[250]

Energy and transportation systems infrastructure (e.g., natural gas pipeline, or highway), particularly in Southwestern Pennsylvania, may be particularly vulnerable to disruption from landslide events. And due to infrastructure interdependencies, if landslides cause service disruptions or transportation and shipping impacts, they could indirectly have many downstream impacts. For example, damage to the transportation system could impact fuel deliveries, which could lead to service interruptions (e.g., electrical blackouts), and these could

in turn impact power supply to other industries (e.g., loss of power for water pumps could lead to stormwater outflow or interruptions at wastewater treatment plants).[251]

Landslide risk maps developed for the 2020 Impact Assessment show natural gas (Figure 46), railway (

Figure 47) and electrical (Figure 48) infrastructure located in landslide hazard zones. Of the infrastructure studied, nearly 50% of miles of electric transmission lines and natural gas pipelines, 41% of electric substations, and 55% of railroad miles are in landslide hazard zones.[252]

4.5 Sea Level Rise

4.5.1 Overview

Sea level rise is expected to increase risks to freshwater tidal wetlands and fauna, and exacerbate flooding. Sea level rise has the potential to add to the existing stresses on Southeastern Pennsylvania's freshwater tidal ecosystems. Additionally, sea level rise is projected to increase water levels and the salinity of inland rivers, including the Delaware and Schuylkill rivers that run through Philadelphia.[253] As a result, storm surges will cause increased flooding in Philadelphia and the surrounding region, and could permanently inundate some low-lying areas.[254] Moreover increased salinity in rivers will mean that water used by municipalities and industries in and near Philadelphia will be too salty for many present-day applications.[255] In Pennsylvania more broadly, sea level rise mainly threatens built infrastructure as well as forest, ecosystems, and wildlife along the state's coastline and tidally-influenced rivers. However, sea level rise will have relatively minor consequences in Pennsylvania overall and will be a low risk for the state. Figure 49 illustrates the overall risk rating in present-day and 2050 based on the likelihood and consequence ratings. Table 10 summarizes the statewide likelihood and consequences of sea level rise in Pennsylvania.

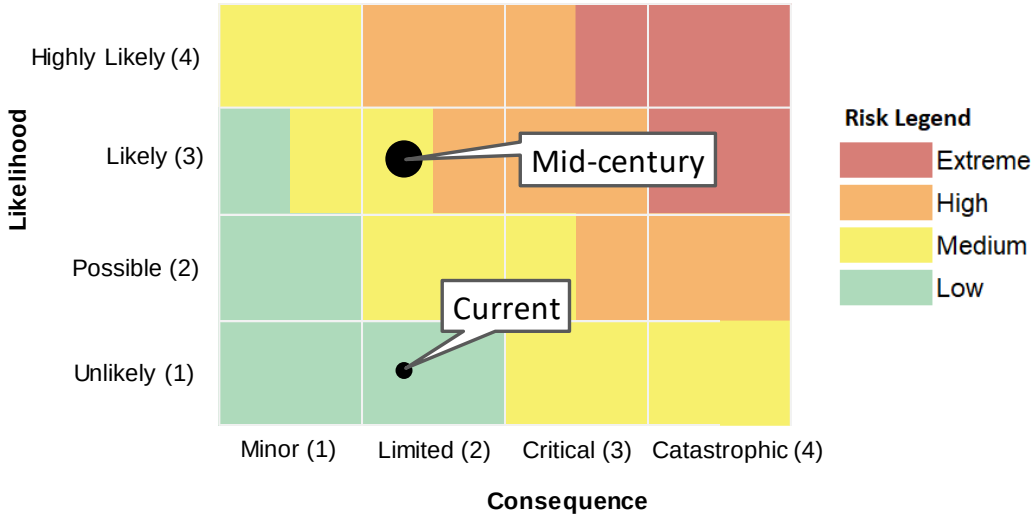

Figure 49. Sea level rise risk matrix

				have to cope with saltier water.
Forests, ecosystems, and wildlife	2	Possible inundation of wetlands Tidal freshwater flora and fauna threatened by rising water levels and increased water salinity	High	The location of the state's small coastline makes Southeastern Pennsylvania near the Delaware estuary vulnerable to sea level rise.
Built Infrastructure	4	Inundated or increased flooding of infrastructure and river-adjacent areas, particularly wastewater treatment plants	High	Southeastern Pennsylvania, particularly Philadelphia, will see greater flooding, as river levels rise.
Overall Risk				
Current	1.9	Low risk	High	
2050s	5.6	Medium risk	High	
Potential Opportunities				
Opportunities for the development of improved water treatment. Higher water levels might also open greater shipping opportunities.				

4.5.2 Likelihood

Global mean sea level is very likely (greater than 90% probability) to rise 0.5-1.2 feet by mid-century.[258] Sea level rise is expected to increase faster along the Mid-Atlantic coast than globally as described in the coastal change section.[259] The range of change varies. The US Army Corps of Engineers predicts that in Philadelphia,[260] water levels will likely rise by 1.5 to 2.7 feet by 2050, and 2.4 to 6.8 feet by 2100.[261],[262] This range represents intermediate low to intermediate high sea level rise scenarios. Even in the low sea level rise scenario, water levels will increase by 1.3 feet by 2050 and 2 feet by the end of the century. In an extreme scenario, sea levels could rise by 3.83 feet by 2050 in the Philadelphia area.

[258] U.S. Global Change Research Program. 2018. Fourth National Climate Assessment, Volume 1 "Chapter 12: Sea Level Rise."

[259] U.S. Global Change Research Program. 2018. Fourth National Climate Assessment, Volume 2 "Chapter 18: Northeast."

[260] Projections were created for the NOAA water level gauge in Philadelphia.

[261] USACE. 2019. Sea Level Change Curve Calculator.

[262] This projection is pulled from the USACE Sea Level Change Curve Calculator. The data is projected for the gauge in Philadelphia using the NOAA et al. 2017 scenarios. The output datum is NAVD88.

4.5.3 Consequences

Figure 50 summarizes the overall consequence ratings statewide for sea level rise—highest consequences are in the other economic activity category and the forests, ecosystems, and wildlife category.

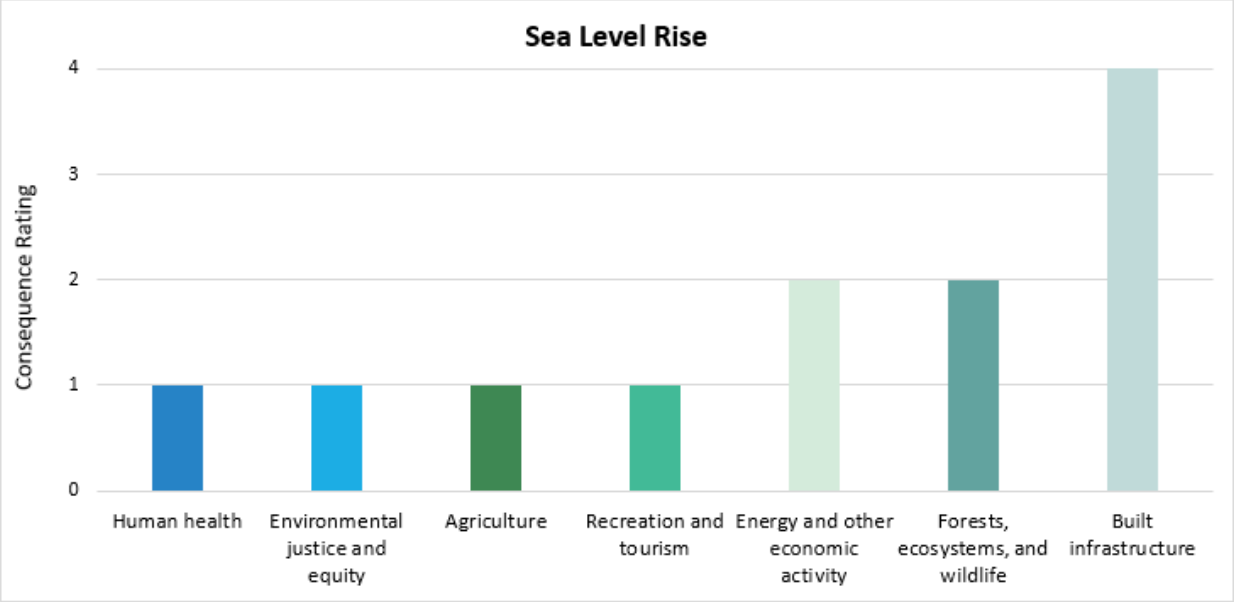

Figure 50. Sea level rise consequences

Human Health

Rating: 1

Sea level rise will have a minimal impact on human health. However, sea level rise has the potential to reduce water quality which could be a threat to long-term public health if not addressed. Given a 2 to 8-foot rise in sea level, the salt level would increase 10 to 25 miles farther upriver in years with high drought.[263] Philadelphia and other municipalities in the region would face impacts to their drinking water supply with only a 2.4-foot rise in sea level, which is possible by mid-century and likely by the end of the century.[264] Additionally, water wells may experience increase salinity if they are near areas where groundwater sources are facing salt water intrusion. Lower water-quality could increase health issues if greater investments in water treatment are not made. Additionally, with sea level rise, coastal storm surges might be greater during cyclone events. Subsequently, health risks outlined in section 4.6.3could be exacerbated by sea level rise.

[263] DVRCP. 2004.
[264] DVRCP. 2004.

Environmental Justice and Equity

Rating: 1

Spatial analysis (see Figure 51) indicates coastal Environmental Justice (EJ) areas are not projected to be disproportionately exposed to 2 feet of sea level rise-driven flooding (2 ft SLR). Figure 51 shows percent inundation from 2 ft SLR across coastal census block groups; black cross-hatching indicates EJ areas. About 20% of coastal "EJ areas" land is projected to experience flooding under 2 ft SLR. This flooding statistic does not differ significantly from the 21% of total area of *all* coastal communities that is projected to experience flooding under 2 ft SLR. Additionally, the total number of people projected to experience inundation under the 2 ft SLR scenario is relatively lower than that exposed to other climate hazards, given the smaller size of coastal populations.

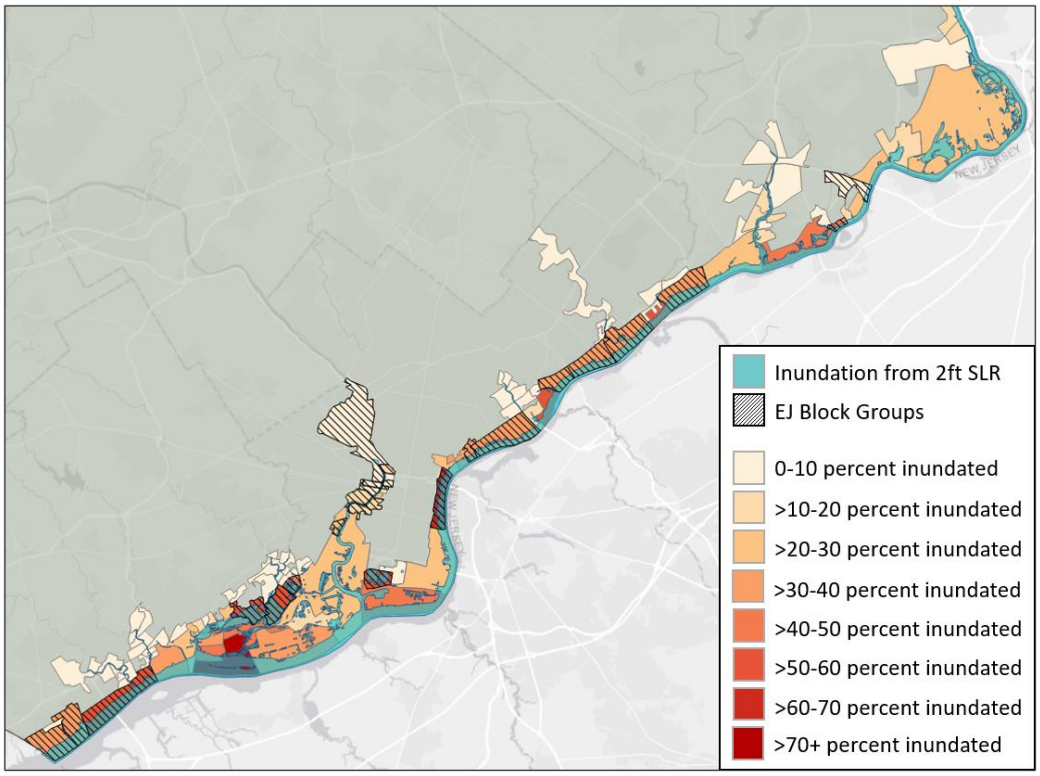

Figure 51. Projected areas inundated by 2 feet of sea level rise in 2050 with EJ block groups

Area-based findings on coastal flood exposure offer limited nuance in regard to population-level flood risk. For example, this analysis does not reflect the distribution of residences within a block group (e.g., proximity to the coast or flooded areas, density of homes in an area). As such, findings from this analysis may not fully capture on-the-ground disparities in flood risk.

Indeed, certain populations may be disproportionately vulnerable to and/or impacted by this hazard. For example, as described in Section 4.5.3(environmental justice and equity analysis for flooding), many flooding inequities prevalent in urban areas often place low-income people and

communities of color at higher risk.[265] Those who live in economically distressed communities or in sub-standard housing may have a greater sensitivity to sea level rise driven from flooding events. They may experience greater impacts from sea level rise related flooding and be less able to recover as a result of limited access to resources.

Economy

Agriculture

Rating: 1

Sea level rise does not appear to threaten Pennsylvania agriculture. As a result, it will have minor impacts on the sector.

Recreation and Tourism

Rating: 1

This hazard will have minor impacts on the sector. The overall impact of sea level rise will be minimal on recreation and tourism. However, sea level rise will increase key tourism infrastructure's vulnerability to flooding: with only two feet of sea level rise, the Philadelphia International Airport would be exposed to flooding.[266] During a category one storm or a 100-year flood, 10 to 11 terminals and hangers (out of 12) and 5 to 18 terminals (out of 20) would be inundated with 2 feet of sea level rise. Repairs from storm damage with 2 feet of sea level rise could be significant. However, overall sea level rise is not expected to have significant consequences for recreation and tourism in Pennsylvania.

Energy and other Economic Activity

Rating: 2

Overall, consequences will be limited in this category. However, changes in the salinity of the freshwaters in rivers surrounding the Delaware Estuary will have significant impacts on the municipalities and industries that rely on those waters. For example, cities and companies that rely on the Schuylkill River near Philadelphia will be forced to adapt as the river's waters become too salty for many applications.[267] Brackish waters would be especially present during dry periods.[268] The use of brackish water threatens to damage equipment, raise water-treatment costs, and force a shift in water supplies.[269] Replacing damaged equipment and water-treatment infrastructure could cost tens of millions of dollars over time, and thus the cost of inaction is moderate. Overall, the consequences will be experienced only in water infrastructure in the Delaware estuary. Sea level rise could have severe economic implications when combined with extra-tropical and tropical cyclones. Flooding associated with coastal storm surges amplified by

[268] DVRPC. 2004.
[269] DVRPC. 2004.

sea level rise is projected to threaten thousands of jobs and properties. Example economic impacts of sea level rise are described in Exhibit 5.

Exhibit 5. Example of economic impacts: sea level rise

Sea level rise has, and will continue, to inundate Pennsylvania with flooding. These damages can cost Pennsylvania billions of dollars but will center around Philadelphia.

Sea Level Rise Implications

Philadelphia's airport is built on what used to be a network of islands in the Delaware River (built with an elevation of just 8.3 feet). The airport's location is one of the city's most vulnerable areas to sea-level rise.[270] The airport's ongoing $6.2 billion expansion, to be completed in phases through 2025 lengthening two of the airport's four runways and building a fifth runway along the Delaware River, includes struggles against sea level rise such as filling 135 acres of floodplain and building 11 acres on storm-water basins.[271],[272]

In the Delaware River Basin, some 147,000 jobs and $20.4 billion in residential property values could be affected by the combined impact of sea level rise, storm surge and flooding.[273] The portion of that damage attributable to sea level rise alone is unknown.

Forest, Ecosystems, and Wildlife

Rating: 2

Sea level rise threatens the ecology of Pennsylvania's portion of the Delaware Estuary. Specifically, the upper Delaware estuary is projected to experience a modest change in salinity as a result of climate change.[274],[275] Increased salinity is projected to cause a change in habitat for the fauna that live in these waters. As the estuary's water levels rise and increase in salinity, marine species will likely advance up the estuary and freshwater species will retreat resulting in a significant shift in the makeup of the estuary's ecology.[276] Fish populations and other marine species that need lower salinity levels may be threatened. Specifically, oysters and mussels may

[270] Philadelphia Inquirer. 2019. As climate changes and seas rise, Philadelphia International Airport is in the crosshairs. Frank Kummer. [274] PSU. 2015 IA.

[275] Ross, A.C., Najjar, R.G., Li, M., Mann, M.E., Ford, S.E., Katz, B., 2015. Sea-level rise and other influences on decadal-scale variations of salinity in a coastal plain estuary. Estuarine Coastal and Shelf Science 157, 79-92.

[276] DVRPC. 2004.

be imperiled.[277],[278] Tidal wetlands may also be damaged by sea level rise and changes in salinity levels as plant species are unable to adapt to higher water levels, saltier water, or frequent inundation.[279]

By mid-century, coastal wetlands are also projected to experience severe, localized damage. Sea level rise may result in the drowning of tidal and nontidal wetlands on Pennsylvania's southeastern coast.[280] Development in Southeastern Pennsylvania may hinder tidal flora and fauna from migrating horizontally to escape ecosystem changes.[281] Ultimately, sea level rise may stress or destroy freshwater tidal ecosystems.[282] Wetlands are a unique resource for Pennsylvania and face significant devastation.

Built Infrastructure

Rating: 4

Though Pennsylvania has a small coastline, sea level rise will increase river levels. As a result, the frequency, exposure, and severity of flooding in Southeastern Pennsylvania is expected to grow. Sea level rise will exacerbate the consequences of extreme precipitation and flooding outlined in the "Precipitation and Inland Flooding" hazard section. While exposure will remain limited in mid-century, the number of facilities and homes at risk at the end-of-century will dramatically increase.[283] With a 4-foot rise in sea level, 2,515 homes worth an estimated $686 million dollars and 63 miles of roads will be at risk in Pennsylvania.[284] These damages will be concentrated in the Philadelphia region. Overall, sea level rise will have a localized impact in Southeastern Pennsylvania, but will result in significant damage when combined with storms.

4.6 Severe Tropical and Extra-Tropical Cyclones

4.6.1 Overview

Tropical cyclones include events such as tropical storms, tropical depressions, and hurricanes, while extra-tropical cyclones encompass events like nor'easters.[285] Severe tropical and extra-tropical cyclones will result in significant flooding and winds that threaten Pennsylvania as well as clusters of landslides and sinkholes. Additionally, tropical cyclones also cause tornadoes,

[285] DEP. 2020 IA.

while extra-tropical cyclones result in winter storms that bring severe weather (i.e., hail, tornadoes). Tropical and extra-tropical cyclones are the main driver of annual extreme precipitation in the Northeastern United States.[286] As a result, the consequences of flooding and extreme rainfall outlined in the "Precipitation and Inland Flooding" hazard section also apply to cyclones.

Tropical and extra-tropical cyclones are projected to have significant consequences for human health, the energy sector, and, built infrastructure. Stronger cyclones are expected to endanger individuals as high winds damage buildings and flooding causes accidents. Significant destruction and harm follow cyclone events as seen with Tropical Storm Sandy, Hurricane Irene, and Tropical Storm Lee. For example, 16,000 homes and businesses were damaged during Tropical Storm Lee, which resulted in over $2 billion dollars in damages.[287]

Figure 52 illustrates the current and 2050 overall risk rating based on the likelihood and consequence ratings.

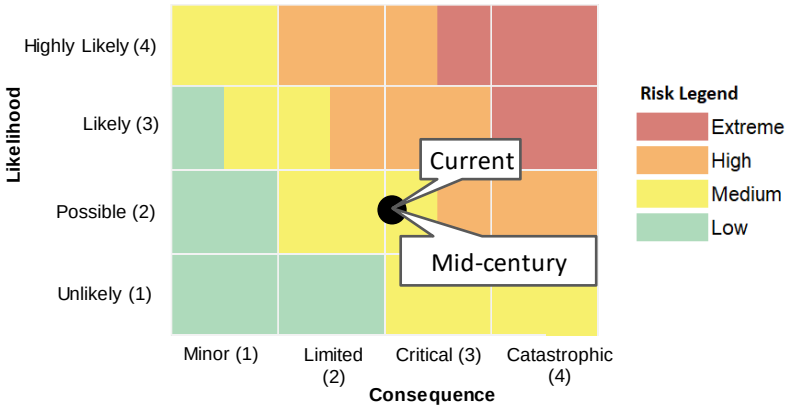

Figure 52. Tropical and extra-tropical cyclones risk matrix

Table 11 summarizes the statewide likelihood and consequences of tropical and extra-tropical cyclones in Pennsylvania.

[287] National Weather Service. 2015. Fourth Anniversary of the Flooding from Tropical Storm Lee. https://www.weather.gov/ctp/TSLeeFlooding#:~:text=In%20Pennsylvania%2C%20over%2016%2C000%20homes,Lee%20are%20over%20%242%20billion.

Table 11. Tropical and extra-tropical cyclones statewide risk summary

Timeframe or Category	Rating or Risk Score	Notes	Confidence	Differential Impacts
Likelihood				
Current	2	Extra-tropical cyclones have become more frequent. Tropical cyclones have not increased in frequency.	High	
Mid-century	2	Extra-tropical cyclones frequency is expected to grow. Tropical cyclones will become more intense, but not necessarily more frequent.	Medium	
Beyond 2050		These trends, including increase in severe tropical cyclone intensity and extra-tropical cyclone frequency, are expected to continue well beyond 2050.	Medium	
Consequence				
Human health	3	Potential for dozens of people severely injured	High	Individuals who live in low-lying areas or who face serious dangers to their health during power outages.
Environmental justice and equity	2	Slight over-representation of EJ areas in the FEMA 500-year floodplain	High	Individuals more sensitive to extreme flooding and with less access to resources to recover from a storm event. This may include individuals with higher social vulnerability such as those who are low-income.
Economy: Agriculture	3	Potential for severe crop damage	Medium	NA
Economy: Recreation and tourism	2	Damage to the Philadelphia International Airport and recreation sites in the state Disruptions to state parks and forests	Medium	Southeastern Pennsylvania may be hit more severely as flooding is exacerbated by sea level rise.
Economy: Other (e.g., energy)	2	Short-term disruptions to energy delivery in the natural gas and petroleum sectors	High	Southeastern Pennsylvania may be hit more severely as flooding is exacerbated by sea level rise.
Forests, ecosystems, and wildlife	2	Damage to state forests and other ecosystems from high winds	Medium	NA

Timeframe or Category	Rating or Risk Score	Notes	Confidence	Differential Impacts
Built Infrastructure	4	Transportation and local electricity infrastructure could be severely hit	High	Southeastern Pennsylvania may be hit severely where flooding is exacerbated because of the region's proximity to the coast.
Overall Risk				
Current	4.8	Medium risk	Medium	
2050s	4.8	Medium risk	Medium	
Potential Opportunities				
▪ Investments in healthy soils in agricultural land and best management practices reduce the shock of an acute storm event. ▪ After tropical and extra-tropical cyclones, communities often experience a boom in construction and car sales as individuals seek to replace lost property.				

4.6.2 Likelihood

Tropical and extra-tropical cyclones are possible each year. For example, eight tropical and extra-tropical cyclones passing through Pennsylvania since 2000.[288] Climate change will have differing effects on cyclones and extra-tropical cyclones events. Overall, a building consensus in the literature anticipates that individual storms' strength and level of precipitation will increase.[289] The literature indicates that an increase in the severity of tropical cyclones is almost certain. However, the impacts of climate change on the frequency of tropical and extra-tropical storms will differ. The frequency of tropical storms is not projected to change.[290] No consensus has been reached on whether there has been a demonstrated trend in a change in tropical cyclones' likelihood.[291] On the other hand, extra-tropical cyclones are expected to increase in frequency. Overall, there is a high degree of uncertainty in how both tropical and extra-tropical cyclones will change in likelihood.

4.6.3 Consequences

Figure 53 summarizes the overall consequence ratings statewide for tropical and extra-tropical cyclones—highest consequences are in human health, environmental justice and equity, agriculture, and built infrastructure. These consequence ratings are also in Table 11.

[288] NOAA National Hurricane Center. 2020. Historical Hurricanes Tracks. https://oceanservice.noaa.gov/news/historical-hurricanes/

[289] PSU. 2015 IA.

[290] U.S. Global Change Research Program. 2018. "Chapter 18: Northeast."

[291] U.S. Global Change Research Program. 2018. "Chapter 18: Northeast."

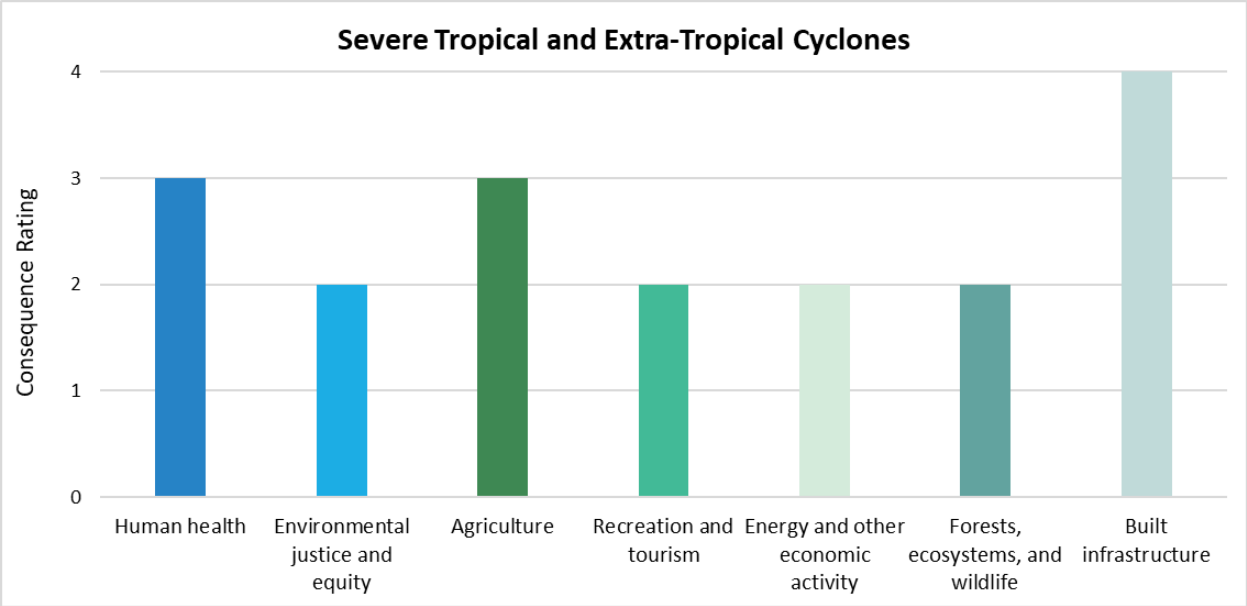

Figure 53. Tropical and extra-tropical cyclones consequences

Human Health

Rating: 3

The health impacts of severe cyclones are limited but can be severe. Flooding during tropical and extra-tropical cyclones poses significant dangers to human health. These extreme storms can result in significant mortality, especially as storms' strength intensifies. Cyclones can directly cause injuries and death from drowning and trauma sustained during the event. Additionally, severe cyclone events can have significant mental health impacts. Trauma of the event, loss of resources, and economic and social consequences can lead to stress and anxiety, post-traumatic stress disorder, and depression.[292]

During cyclone events, risks to human health depend mainly on exposure and vulnerability rather than on changes in storms' intensity. Exposure is driven by living in areas that are low-lying or adjacent to waterbodies and thus more prone to severe flooding. Individuals may also be more vulnerable if they face a serious health risk if the power is shut off, such as those who are elderly or have certain medical conditions.

In addition, cyclones threaten to disrupt critical services to human health such as telecommunications, water, wastewater, emergency services, and transportation infrastructure.

[292] Dodgen, D., D. Donato, N. Kelly, et al., 2016: Ch. 8: Mental Health and Well-Being. The Impacts of Climate Change on Human Health in the United States: A Scientific Assessment. U.S. Global Change Research Program, Washington, DC, 217–246. http://dx.doi.org/10.7930/J0TX3C9H

Loss or interruption of these services can result in serious harm and mortality.[293] Dozens of people in the Commonwealth could face serious risk of harm during or after a cyclone event because of hazardous conditions created by the event. For example, disruption of electricity and inability to refrigerate food can result in foodborne diarrheal illnesses if individuals consume spoiled foods.[294] Death from electrocution from fallen power lines, carbon monoxide poisoning, candle started fires, and car accidents can all also be indirectly caused by severe cyclones.[295] Heavy rain and winds can reduce visibility while driving and cause other hazardous road conditions which can also result in greater car accidents.

Finally, winter extra-tropical cyclones can be dangerous because of snow accumulation, winds, and freezing temperatures.[296] Resulting health risks include frostbite and hypothermia. [297]

Environmental Justice and Equity

Rating: 2

Many of the same environmental justice and equity concerns raised in the "Precipitation and Inland Flooding" hazard section apply to cyclone events. Cyclones will threaten those in low-lying areas, as these extreme storm events exacerbate flooding. EJ areas are slightly over-represented in FEMA 500-year floodplains compared to the state average (1.2x as exposed).

Beyond being slightly over-represented in terms of exposure, communities with a high percentage of low-income individuals are more at-risk of facing serious consequences after an extreme storm. Low-income households are more likely to lack the resources to recover quickly from an extreme cyclone, and to reside in substandard housing, which increases the risk of mold, mildew, poor indoor air quality, and damage after intense rain and wind during

---

[293] Bell, J et al., 2016. Ch. 4: Impacts of Extreme Events on Human Health. The Impacts of Climate Change on Human Health in the United States: A Scientific Assessment. U.S. Global Change Research Program. 99–128. http://dx.doi.org/10.7930/J0BZ63ZV

[294] Lin, S., B. A. Fletcher, M. Luo, R. Chinery, and S. -. A. Hwang, 2011: Health impact in New York City during the Northeastern blackout of 2003. Public Health Reports, 126, 384-93.

[295] McKinney, N., Houser, C., Meyer-Arendt, K. 2011. Direct and indirect mortality in Florida during the 2004 hurricane season. *Int J Biometeorol* 55**,** 533–546. https://doi.org/10.1007/s00484-010-0370-9

[296] Bell, J et al., 2016. Impacts of Extreme Events on Human Health

[297] Bell, J et al., 2016. Impacts of Extreme Events on Human Health

storms.[298],[299] Similarly, areas with a high percentage of low-income individuals are more likely to have less climate-resilient infrastructure.[300]

Economy

Agriculture

Rating: 3

Rainfall during tropical cyclones and extra-tropical cyclones will parallel many of the consequences of extreme precipitation on agriculture discussed in the "Precipitation and Inland Flooding" hazard section. As described in that hazard section, heavy precipitation during extreme weather events will increase risks associated with flooding such as augmented runoff, erosion, and nutrient leaching.

Recreation and Tourism

Rating: 2

Cyclones and extra-cyclones will have limited consequences for recreation and tourism. Though the consequences appear mild, extreme storms could damage the Philadelphia International Airport when combined with other climate stressors like sea level rise, as discussed in the "Sea Level Rise" hazard section. For example, a 2-foot rise in sea level, a Category 1 storm would inundate 25% of the airport's supporting infrastructure and 42% of the airport's terminals and hangars. Like with other infrastructure, cyclones could damage recreation and tourism facilities in the state. For example, in the aftermath of Hurricane Irene, the National Park Service had to remove fallen trees and debris, repair minor road damage, and clear culverts.[301] State parks and forests have also experienced significant disruptions from cyclones that have reduced tourism opportunities and resulted in lost revenue for the state. Overall, cyclone impacts to this sector are limited.

Energy and Other Economic Activity

Rating: 2

Cyclones will likely temporarily disrupt economic activity. Consequences are significant for the energy sector and for small businesses dependent on electricity. Flooding during storms can

[301] Nordeen, D. 2011. Delaware Water Gap News. https://www.nps.gov/dewa/learn/news/storm-damage-assessment-and-cleanup-continue.htm

disrupt fuel delivery services such as natural gas compressor stations, petroleum product pipelines, and pumping stations for crude oil. Refineries are also at risk during extreme flooding and blackout events caused by cyclones. Similarly, extreme rainfall during severe storms is a main cause of pipeline damage.[302] Additionally, high winds and precipitation associated with severe storms disrupts electricity delivery which impacts communities and small businesses. Storms force stores, restaurants, and other business to close. During Hurricane Irene and Superstorm Sandy, electric service was down for 4 to 8 days.[303] Blackouts during Hurricane Irene affected 700,000 people, while outages during Hurricane Sandy affected 1.2 million Pennsylvanians. Extreme storms temporarily disrupt energy delivery services and hurt business revenue. Examples of the economic impacts of severe tropical storms are described in Exhibit 6.

[302] DEP. 2020 IA.
[303] PSU. 2015 IA.

Exhibit 6. Example of economic impacts: severe tropical storms

Tropical storms have inundated Pennsylvania with heavy rains and caused record flooding. These damages have cost the Commonwealth millions of dollars and several deaths.

2018 Hurricane Season: Hurricane Florence and Tropical Storm Gordon

Tropical Storm Gordon dumped rain throughout PA and, on September 9, set the record as the second-wettest day ever recorded at the Pittsburgh airport, yielding 3.73 inches of rain.[304] Allegheny County declared a State of Emergency due to this event. Numerous roads were closed due to high water and localized flooding.[305] September 16-17, 2018, Hurricane Florence dumped 3 to 4 inches of rain along and just east of the Appalachians. Florence made 2018 the wettest year ever for Pennsylvania.[306]

2020 Hurricane Season: Tropical Storm Isaias

In August 2020, Tropical Storm Isaias caused considerable inland flooding in PA. Estimated damage costs associated with the storm total more than $27.6 million and 2 dead.[307, 308]

2011 Hurricane Season: Irene and Tropical Storm Lee

Tropical storm Lee caused considerable damage from record flooding across the northeast. Tropical Storm Lee cost Pennsylvania $67.9 million in flooding and landslide costs and 7 deaths. [309,310] Hurricane Irene also caused torrential rainfall and flooding across the Northeast. Separately, PennDOT estimated that Hurricane Irene cost the department $18.5 million in damages. Combined, $86.4 million in public damages resulted from the 2011 hurricane season in Pennsylvania.[311]

Forest, Ecosystems, and Wildlife

Rating: 2

The evidence exploring severe storms' effect on forests, ecosystems, and wildlife is limited. Pennsylvania's Department of Conservation and Natural Resources (DCNR) reports significant increases in wind damage in the state's forests and other ecosystems in recent years. Both heavy precipitation and high winds can stress trees.[312] These stressors can make trees more susceptible to pests and disease, and ultimately cause a decline in the tree's health and lead to mortality.[313] If this trend continues, it could lead to increasingly significant damage to natural assets that increase the time needed for habitats to recover.

Built Infrastructure

Rating: 4

Cyclones' consequences to the built infrastructure will be severe but limited. Extreme weather will exacerbate many of the consequences of flooding on infrastructure discussed in the "Precipitation and Inland Flooding" hazard section. Coastal storm surges have a massive potential to harm Pennsylvania's infrastructure systems, especially in the Philadelphia region. Storm surge flooding threatens transportation systems and water treatment facilities.

The combined effect of high winds and heavy precipitation during cyclone events also puts local electricity infrastructure at a high risk of failure or damage. High winds alone during hurricane have the potential to damage power plants and transmission infrastructure. As a result, communities may be left in the dark for extended periods of time after storms and may not be able to get the goods they need like natural gas or gasoline. Even if not facing an outage, communities may experience bursts of power outages. Equipment may become unreliable as a result. Additionally, high winds can damage building materials and lower these materials' expected lifetimes.

The consequences of extreme storms will vary as counties' preparedness ranges. In Philadelphia alone, a single more intense hurricane could cost between $20 million and $900 million, depending on the severity of flooding and strength of wind gusts.[314] Cyclones have the potential to result in significant damage and a complete shutdown of critical infrastructure. Overall, cyclones pose a substantial risk to the Commonwealth's built infrastructure.

5 CONCLUSIONS AND RECOMMENDATIONS

5.1 Adaptation Priorities

Climate impacts will be severe in Pennsylvania, unless actions are taken by the Commonwealth to avoid and reduce the consequences of climate change. Based on the risk assessment, the following represent priority considerations for climate adaptation, including consideration of programs, policies, infrastructure, or other changes that may be necessary to reduce risks:

- Reduce extreme heat risks to human health, particularly for vulnerable populations
- Support key sectors in the transition to a warmer climate, including agriculture, recreation and tourism, and forests, ecosystems, and wildlife
- Reduce flood risks to infrastructure and communities
- Help low-income households cope with potential increased energy burden
- Enhance tropical storm and landslide risk mitigation

Notably, implementing adaptation measures should be informed by this list but also consider the lead time needed for effective adaptation to these risks and those identified as lower priorities. For example, though sea level rise impacts to infrastructure may have a relatively lower risk rating than heat waves, they could get significantly worse by end-of-century and beyond, and adaptation and mitigation work needs to begin soon.

5.2 Environmental Justice and Equity Considerations

In addition, a key theme across this risk assessment has been that climate change will not affect all Pennsylvanians equally. Some may be more vulnerable to impacts due to their location, income, housing, or other factors discussed within each hazard profile. For example, certain populations may have greater physical exposure to risks (e.g., construction workers may be more exposed to heat waves), or and limitations to their ability to manage consequences if they occur (e.g., income or wealth may impact ability to pay for air conditioning).

Disproportionate impacts are often not random. Consequences of historical discriminatory practices in communities of color (e.g., redlining, systemic disinvestment) manifest today with communities of color disproportionately in housing that is particularly susceptible to deterioration by heat waves.

As Pennsylvania works to reduce its climate risks, care needs to be taken that these inequitable impacts are addressed, and that adaptation efforts do not inadvertently exacerbate existing inequities.

5.3 Continued Research Needs

This IA Update is the first time Pennsylvania has evaluated its climate change impacts in terms of relative risk ratings to inform adaptation priorities. The risk assessment focused at a high level, and additional detail and quantification of risks could be incorporated over time.

In addition, there remain open research questions around several important risk factors in the state, particularly related to heavy precipitation and flood risk. Remaining open research questions include: what is the main driver of flooding in PA; what are the uncertainties around precipitation projections, which are most decision-relevant, and what changes in observations, data analysis or modeling have the greatest potential to reduce those uncertainties?

Managing deep uncertainty in projections of precipitation extremes in local-level adaptation decision-making is critical. Local-level decisions about adaptation measures (e.g., sewer capacity upgrades to manage flooding and health concerns) made by municipalities, cities, and states can impact urban infrastructure. Those decisions can hinge on estimates of future precipitation extremes, and infrastructure failures are often driven by heavy precipitation. However, there may be significant gaps between the resolution of data (e.g., projections and models) ideally used for stormwater infrastructure management decision-making modeling and the resolution of data available. Additionally, there is deep uncertainty in current flood hazard projections. As such, decision-making must use an approach that accounts for deep and dynamic uncertainties here.

Pennsylvania faces significant climate risks in the coming century. While uncertainties regarding climate projections and opportunities to better understand climate trends exist, overwhelming evidence demonstrates the imperative that Pennsylvania act to reduce the consequences of climate change by mid-century and beyond. The adaptation priorities described above are a starting point for reducing priority risks.

APPENDIX A. KEY TERMS

Term	Definition
Risk	The chance a climate hazard with cause harm. Risk is a function of the likelihood of an adverse climate impact occurring and the severity of its consequences (e.g., Risk = Likelihood x Consequence).
Impact	The effect of a climate hazard.
Critical threshold	A defined tipping point for an ongoing hazard at which significant impacts occur.
Climate hazard	Changes or events related to global climate change. Climate hazards can be discrete (e.g., severe storms) or ongoing (e.g., increasing average temperatures).
Likelihood	The probability or expected frequency a climate hazard is expected to occur
Consequence	A measure of the severity of impacts from a climate hazard
Emission scenario	Used for representative concentration pathway to describe scenarios of projected GHG emissions and atmospheric concentrations used in climate modeling.
Representative concentration pathways (rcp)	Scenarios of projected GHG emissions and atmospheric concentrations used in climate modeling. RCP 8.5 represents a global "baseline" scenario and RCP 4.5 represents a lower emission scenario.
Growing degree days (gdd)	Cumulative degree difference between average daily temperature (Tavg) and 50°F when Tavg > 50°F
Cooling degree days	Cumulative degree difference between average daily temperature (Tavg) and 65°F when Tavg > 65°F
Heating degree days	Cumulative degree difference between average daily temperature (Tavg) and 65°F when Tavg < 65°F
"Very hot" temperature	95th percentile maximum daily temperature reported in degrees
"Extremely hot" temperature	99th percentile maximum daily temperature reported in degrees
Consecutive dry days	Number of days in a row when precipitation is equal to 0 mm
3-day precipitation	Largest 3-day precipitation event in a given time period (e.g., season or year)
Exposed areas	Geographic areas projected to be affected by climate change based on climate change projections.
Vulnerable populations	Populations more likely to experience adverse impacts from exposure to climate hazards because of demographics factors (e.g., race, gender), socio-economic status, and life- or livelihood-sustaining needs (e.g., dependence on electricity for critical medical care).
EJ areas	Environmental Justice census tracts, where 20% or more individuals live in poverty, and/or 30% or more of the population is minority.[315]
Overburdened populations	"Minority, low-income, tribal, or indigenous populations or geographic locations … that potentially experience disproportionate environmental harms and risks."[316] EJ areas are used in this assessment as a proxy for locations where populations are already overburdened by hazards and other structural disadvantages.

APPENDIX B. RISK ASSESSMENT METHODOLOGY

Introduction

The risk assessment methodology is consistent with the International Organization for Standardization (ISO) 31000 Risk Management standard, a framework for managing a broad array of risks including climate risks. This is a risk-based approach to assessing and prioritizing climate impacts. The risk assessment evaluates the likelihood that a climate hazard will occur and the magnitude of its consequences. The risk assessment prioritizes impacts that are reasonably likely to occur within mid-century timeframe, likely to result in potentially major or catastrophic consequences, and have adequate information to evaluate risk. The four major steps included in the standard ISO risk assessment process are included in Figure 54.

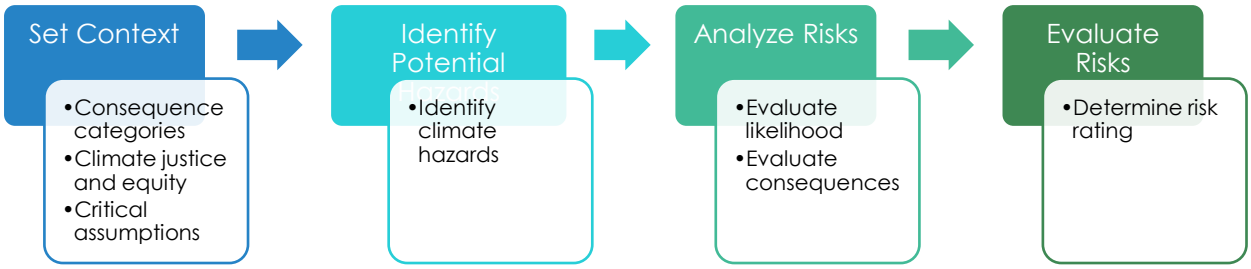

Figure 54. Risk assessment process

Step 1—Set Context

The first step of a risk assessment is to establish the critical context and focus areas for the assessment.

Consequence Categories

The risk assessment will focus on consequences in the following categories. These categories cover all sectors specified in Act 70, with additional attention to impacts to built infrastructure and environmental justice and equity, which are emerging as key potential cross-cutting consequence areas related to the other sectors:

- Human health
- Environmental justice and equity
- Economy
- Agriculture
- Recreation and Tourism
- Other economic activity (e.g., energy sector)
- Forests, ecosystems, and wildlife
- Built infrastructure

Approach to Climate Justice and Equity

The 2021 Impacts Assessment focuses on improving understanding of the equity impacts of climate change in the Commonwealth. The assessment seeks to answer two key questions:

- What populations may be most vulnerable to climate hazards?
- To what extent are climate changes projected to affect communities that are already overburdened?

Key Terms

Exposed areas—Geographic areas projected to be affected by climate change based on climate change projections.

Vulnerable populations—Populations more likely to experience adverse impacts from being exposed to climate hazards, such as due to factors such as demographics (e.g., race, gender), socio-economic status, and life- or livelihood-sustaining needs (e.g., dependence on electricity for critical medical care).

EJ areas—Shorthand for "Environmental Justice census tracts," where 20% or more individuals live in poverty, and/or 30% or more of the population is minority.[317]

Overburdened populations—"Minority, low-income, tribal, or indigenous populations or geographic locations … that potentially experience disproportionate environmental harms and risks."[318] EJ areas are used in this assessment as a proxy for locations where populations are already overburdened by hazards and other structural disadvantages.

Overburdened Populations

The environmental justice and equity consequence ratings for each hazard are based on the degree to which areas most exposed to climate impacts also have a high percentage of overburdened individuals, based on spatial analysis of overlap between exposed areas and EJ areas at the Census block group level.

EJ areas are used as a proxy for locations where populations are already overburdened by hazards and other structural disadvantages. These areas are commonly used by DEP and other state agencies for similar purposes. This approach is also consistent with the approach used in the North Carolina 2020 Climate Risk Assessment and Resilience Plan and is commonly used in similar analysis to capture potentially underserved populations.[319]

EJ areas cannot capture all characteristics of historically disadvantaged, burdened, or underserved populations (e.g., the areas draw defined lines of EJ locations, are based on percentiles, and are based on thresholds from two indicator variables). Nonetheless, they support an approach to identify where climate change impacts could be falling disproportionately to already-disadvantaged communities.

Vulnerable Populations

The environmental justice and equity consequence sections in this assessment also dive deeper into the nuances of what drives risks of each hazard, identifying specific populations that may

[319] North Carolina Department of Environmental Quality. 2020. North Carolina Climate Risk Assessment and Resilience Plan. https://files.nc.gov/ncdeq/climate-change/resilience-plan/2020-Climate-Risk-Assessment-and-Resilience-Plan.pdf.

be more vulnerable to certain climate changes, and noting where additional factors critical to equity analysis come into play. For example:

- In rural areas where there are several critical roads to support the economy (e.g., for individuals to get to work, or for agricultural centers to receive and send supplies), landslide exposure may be particularly key as consequences of a road being damaged would be severe.
- People who do not speak English may face barriers related to accessing social or health services, making those groups more at-risk to climate hazards such as increased frequency of extreme heat conditions.
- Poverty may reduce a person's capacity to handle significant changes (e.g., temporary loss of work or damage to housing) that may be associated with climate risks.

Other Critical Assumptions

Risks were assessed under the assumption that Pennsylvania's makeup would remain similar to its current composition. The assessment assumed today's population, demographics, and economy would continue into 2050 and beyond. Though this assumption does not provide a fully accurate picture of climate change's impacts to Pennsylvania in 2050, the approach allows the assessment to isolate climate change as the variable of interest. For example, expected population growth in Pennsylvania's urban areas could increase the extent to which Pennsylvanians are exposed to the urban heat island effect.[320] Similarly, significant population growth in the southeast region by mid-century could also increase the sensitivity of the region to coastal storm surges as a result of sea level rise and increased cyclone severity.[321] However, the extent to which Pennsylvania's makeup will change is dynamic. The COVID-19 pandemic exemplifies how an exogenous variable could drastically shift population and demographic trends. The post-pandemic era could represent a change social habits, work environments, population distributions, and transportation and travel patterns from pre-pandemic norms. Attempting to predict and control for all future shifts unrelated to climate change is impractical, and as a result was excluded for the risk assessment.

Step 2—Identify Potential Hazards

The second step is to identify and select potential hazards for detailed risk evaluation. Table 12 summarizes expected impacts of climate change by sector in Pennsylvania, as described in previous iterations of the impacts assessment. The six focus hazards identified (increasing average temperatures, heat waves, heavy precipitation and inland flooding, landslides, sea level rise, and severe tropical and extra-tropical cyclones) represent the primary hazards expected to affect the Commonwealth drawn from previous impacts assessments—see Table 12. These hazards cover nearly all impacts in the table. The 2021 Impacts Assessment focuses on updates

to the expected impacts from the selected hazards based on the latest science, with priority given to providing additional information about impacts on equity and human health.

Table 12. Climate impacts and associated hazards identified in previous impact assessments

Sector	Impact	Hazard
Human health	Decreased mortality from cold-related stress	Higher average temperatures or decreased frequency of extreme low temps
Human health	Negative health impacts to agricultural workers; in most agricultural fields, workers will be exposed to more extreme heat.	Higher average temperatures / increased frequency and temperature of extreme high temps
Human health	Increased mortality from heat-related stress (e.g., excessive heat event days). Greatest risk for elderly and those with cardiovascular disease. Air conditioning is key adaptation option. Equity may be an issue here due to costs of air conditioning and impacts felt most by those required to be outside for long periods of time.	Greater frequency of extreme heat/heat waves
Human health	Increased air pollutants and associated increased respiratory and cardiac illness (e.g., increased emergency room visits for childhood asthma) if increased ozone, etc. creation not balanced by emissions reduction	Higher temperatures and increased ground-level ozone Potential change in concentration of small airborne particulates Increase in pollen and mold concentrations (e.g., more pollen with faster plant growth; more thunderstorms = trigger for pollen-induced asthma)
Human health	Reduced water quality and associated impacts on health through drinking water and contact during outdoor recreation	Higher average temperatures, increase in heavy rain events, surface runoff and more growth and potential greater concentration of water-borne pathogens in wastewater and surface water
Human health	Increased pathogen loads from increased surface runoff from livestock farms, sewer overflows (esp. in older cities, which may also have more equity and EJ concerns)	Increase in heavy rain events, surface runoff
Human health	Increased risk of harmful algal blooms in eutrophied lakes and reservoirs (e.g., impacts already experienced on Lake Erie)	Increase in heavy rain events, surface runoff
Human health	Possible injury and death, especially associated with flooding from severe storms (e.g., from driving through floodwaters or structural damage to buildings from high winds).	Increase in extreme weather events
Human health	Change in distribution and prevalence of vector-borne diseases (e.g., Lyme disease, West Nile Virus). Greatest effects may be to those with limited healthcare coverage (e.g., low income and rural populations).	Higher average temperatures
Agriculture	Change in heating/cooling costs for mushroom production	Higher average temperatures

Sector	Impact	Hazard
Agriculture	Change in price of agricultural commodities	Indirect
Agriculture	Mixed effects on field crop and livestock production, including: ▪ movement of livestock industries northward ▪ indoor livestock production (e.g., poultry) ▪ invasive species (e.g., spotted lanternfly) may be able to survive in more northerly climates	▪ Higher average temperatures ▪ Higher average precipitation ▪ More intense precipitation events (e.g., 95th, 99th percentile) ▪ Higher CO2 concentrations
Agriculture	Negative impacts to dairy production, including loss in milk yield, lower levels of forage quality	Higher average temperatures Increased periods of sustained high temperatures
Outdoor recreation	Longer warm season, increase in outdoor recreation (opportunity)	Higher average temperatures (warmer spring and fall temperatures)
Outdoor recreation	Severe, negative impact on snow-based recreation (e.g., skiing)	Higher average temperatures (loss of snow cover)
Outdoor recreation	Change in types of recreational fishing. Certain species such as trout may experience a decline in suitable habitat. However, total participation in recreational fishing may increase due to the longer season	Higher average temperatures (air and stream temperatures)
Outdoor recreation	Negative impact to sport fish populations	Reduced summer stream flows
Outdoor recreation	Increased demand for water-based recreation (likely small)	Higher average temperatures
Outdoor recreation	Shift in types of general outdoor leisure activity and a generally lengthened outdoor recreation season	Higher average temperatures and high-threshold temperatures (days with Tmax between 75 and 100)
Outdoor recreation	Increase need for shaded parks and cooling centers	Higher average temperatures (and urban island effect)
Energy	Increased demand for energy (esp. electricity sector) in summer and fall, and at peak times. Pennsylvania's Alternative Energy Portfolio Standard work may help mitigate impacts, and additionally energy efficiency, demand side management, and more backup power sources could help adapt.	▪ Higher average temperatures (monthly avg temps; heating degree days/cooling degree days) ▪ Higher peak temperatures during the summer (95th or 99th percentile temperatures by month or season)
Energy	Impacts on energy transportation (e.g., decreased air travel in polar vortex; warmer climate could lower infrastructure maintenance costs)	▪ Extreme weather events ▪ Higher average temperatures ▪ Occurrence of freeze-thaw cycles
Energy	Impacts to energy delivery reliability: extreme weather events can damage infrastructure, and increased cooling demand places higher demand on infrastructure at times when it's likely to be stressed already; large impacts may be	▪ Extreme weather events ▪ Higher average temperatures

Sector	Impact	Hazard
	mediated by a more distributed generation system.	
Energy	Potential improved reliability of energy availability in winter months	Decreased occurrence of extreme cold-weather events
Energy	Declines in energy commodity prices, particularly for electricity and natural gas, may present challenges to some technology options that could contribute to mitigation, as well as "stranded gas" issues.	Policy/regulatory transition
Forests	Shift in suitable habitat for tree species and wildlife species to higher latitudes and elevations	Higher average temperatures
Forests	Increased stress for some species inhabiting decreasingly suitable habitat	Higher average temperatures
Forests	Increased overall forest growth due to longer growing seasons, warmer temperatures, higher rainfall, nitrogen deposition, and increased atmospheric CO2, but the increased growth rates for some species may be offset by increased mortality for others	▪ Higher temperatures (longer growing seasons) ▪ Higher rainfall ▪ Increased atmospheric CO2 ▪ Nitrogen deposition
Forests	Associated shift in forest products industry	Higher average temperatures
Forests	Exacerbated impacts/stress from non-climate threats to forest health and diversity (e.g., insect pests, diseases, invasive plants and animals, overabundant deer populations, unsustainable harvest practices, and atmospheric deposition)	Higher average temperatures
Forests	Increase insect metabolic and reproductive rates. Increase in insect range northward and to higher elevations	Higher average temperatures
Forests	Shift in timing of key biological events (e.g., broods hatcher later or earlier than timing of peak food supply)	▪ Higher average temperatures ▪ Change in seasonal temperature and precipitation patterns
Forests	Increased mortality from heat-related stress and increased evapotranspiration rates (e.g., drier soil moisture conditions, high temperatures).	▪ Higher average temperatures ▪ Increased frequency of extreme high temps
Water	▪ Increased flood risks (and associated impacts across sectors) in both urban and rural areas ▪ River/stream bank erosion ▪ Higher sediment output	▪ Higher precipitation ▪ Increased extreme precipitation Storm surge
Water	Low summer flows (magnitude and severity will vary by location/ watershed). The impacts of droughts are likely to be short-term, but risks include wetlands degradation and competition for water resources in low-flow, high-temperature	Short-term drought

Sector	Impact	Hazard
	periods between different sectors, and water availability issues for vulnerable populations may exist due to multidimensional inequalities.	
Water	Decreased water supplied for urban areas and irrigation	Short-term drought
Water	Reduced quality of raw water and increased drinking water risks	▪ Higher average temperatures ▪ Extreme precipitation and flooding (increased sediment, nutrient, and pollutant loadings; disruption of treatment facilities) ▪ Drought (increased concentration of pollutants)
Water	Water pollution from increased stormwater runoff and pollution	Extreme precipitation and flooding
Water	Fish impacts	Higher average temperatures (stream temperatures), including hottest-day temperatures, esp. in summer, and sediment from runoff
Water	Increased potential for eutrophication causing lower dissolved oxygen levels and an increase in the prevalence of harmful algal blooms in Lake Erie or other water bodies	▪ Higher average temperatures (summer) ▪ Drought (reduced stream flows)
Wetlands and aquatic ecosystems	Drying of wetland acreage in Ridge and Valley ecoregion and loss of associated ecosystem services (e.g., water quality)	Higher average temperatures
Wetlands and aquatic ecosystems	Changes in stream flow quantity and quality lead to loss of biodiversity and habitat fragmentation from hydrologic modification and stream-bank erosion	▪ Higher average temperatures ▪ Heavy precipitation and flooding ▪ Drought
Wetlands and aquatic ecosystems	Negative physiological and behavioral changes to macroinvertebrate and fish species	Higher average temperatures (Increase in stream temperatures)
Wetlands and aquatic ecosystems	Decreased survival and reproductive success for fish and macroinvertebrates due to higher rates of sedimentation and increased scouring of stream banks and floodplains	Heavy precipitation and flooding (increased stream flows)
Wetlands and aquatic ecosystems	Impacts to species that have adapted their life cycles to coincide with times of high water (e.g., mismatched timing of life cycle stages, insufficient duration of inundation, lack of sufficient habitat refugia)	Heavy precipitation and flooding (change to seasonal flood patterns and reeducated groundwater recharge)
Coastal resources	Reduced water quality (and associated threats to fauna) in tidal freshwater portion of Delaware estuary and along Lake Erie	▪ Increased water temperature (decreased dissolved oxygen concentration) ▪ Saltwater intrusion / sea level rise
Coastal resources	Potential drowning of wetlands	Sea level rise

Sector	Impact	Hazard
Built infrastructure	"Large portions of multiple energy and transport infrastructures in Pennsylvania are potentially susceptible to direct damage from flooding. Particularly in the Southwestern portion of Pennsylvania, infrastructures face additional risk exposure from landslide potential associated with heavy precipitation events"	▪ Heavy precipitation and flooding ▪ Landslides
Built infrastructure	Flooding and associated infrastructure damage	Coastal storm surge
Built infrastructure	Extreme heat in particular has been associated with public health challenges, and represents an adaptation need for Pennsylvania's infrastructure	Higher average temperatures / increased frequency of extreme high temps

Step 3—Analyze Risks

Risk is a function of the likelihood and consequences of a hazard. The approach to evaluating each of these for the selected hazards is described below.

Likelihood

To assess likelihood, the analysis draws on exposure information available in previous IAs and the latest available projections. Then, the annual probability, or chance of each hazard event occurring in a given year, is evaluated using the scale below. Likelihood is evaluated for a baseline and mid-century (e.g., 2040–2059) time frame. Projected changes beyond mid-century and beyond the end-of-the-century are described qualitatively.

The Pennsylvania All-Hazard Mitigation Planning Standard Operating Guide describes the likelihood of hazard events occurring in terms of their frequency. "Probability of occurrence" estimates can then be used by community officials to inform and assess future development and risks. Table 13 builds on this guide and describes climate hazards' likelihood in terms of their probability of occurring in a given year. Discrete hazards are those related to individual extreme events (e.g., a heat wave) that occur over a relatively short period of time (e.g., days or weeks). Ongoing risks are those related to gradual changes in climate occurring over many years (e.g., higher average temperatures or sea level rise); they may include critical thresholds which, if reached or surpassed, engender particular risks (e.g., X feet of sea level rise). Critical thresholds are defined tipping points at which significant impacts occur.

Table 13. Likelihood rating scale

Rating		Criteria for Discrete Hazards	Criteria for Ongoing Hazards
Highly Likely	4	Greater than 90% annual probability	Risk is very likely (greater than 90%) to cross critical threshold by the 2050s.
Likely	3	Between 50% and 90% annual probability	Risk is likely (greater than 66%) to cross critical threshold by the 2050s. It would be surprising if this did not happen.
Possible	2	Between 1% and 49.9% annual probability	Risk is just as likely as not to cross critical threshold by the 2050s.

The rating scale for discrete hazards (i.e., individual events like heat waves or storms) is consistent with the Pennsylvania All-Hazard Mitigation Planning Standard Operating Guide[322] and the PEMA Hazard Mitigation Plan.[323] To expand the rating scale to accommodate the more gradual or ongoing nature of some hazards (e.g., higher average temperatures, sea level rise), DEP and ICF expanded the rating scale as shown above in the rightmost column, consistent with how the Fourth National Climate Assessment and Intergovernmental Panel on Climate

Change defines likelihood of climate changes.[324],[325] A comparison of the different likelihood scales and terminology are shown in Table 14. The critical thresholds for ongoing hazards (e.g., increasing average temperatures) are based on likely projections for mid-century.

Table 14. Comparison of scales of likelihood: PEMA Hazard Mitigation Plan, NCA4, and IPCC

PEMA Hazard Mitigation Plan		NCA4		IPCC	
Term	**Likelihood**	**Term**	**Likelihood**	**Term**	**Likelihood**
Highly likely	90–100% annual probability	Very likely	≥9 in 10 (90%)	Virtually certain	99–100%
				Very likely	90–100% probability
Likely	50–90% annual probability	Likely	≥9 in 10 {66%)	Likely	66–100% probability
Possible	1–49.9% annual probability	As likely as not	= 1 in 2 (50%)	About as likely as not	33–66% probability
		Unlikely	≤1 in 3 {33%)	Unlikely	0–33% probability
Unlikely	0–1% annual probability	Very unlikely	≤ 1 in 10 (10%)	Very unlikely	0–10% probability
				Exceptionally unlikely	0–1% probability

Consequences

DEP and ICF applied a consequence rating scale to assess the severity of impacts for key consequence categories and indicated the rationale behind the ratings. After updating climate science projections, DEP and ICF sought input from PSU experts and key stakeholders to complement information on the consequences of each climate risk as described in the 2015 and 2018 impacts assessments, and then to rate the consequences using the scale. The proposed consequence rating scale is in Table 15.

This scale was developed through review of the Pennsylvania All-Hazard Mitigation Planning Standard Operating Guide (striving for consistency where possible, such as in the overall 1-4 rating scale and the criteria for several types of impacts) and expanding on this guidance as needed to fit additional consequence categories for the climate impact assessment. The metrics to define each category are intended to ensure consistency and comparability across risk scenarios. The thresholds to indicate different levels of consequence (e.g., critical vs. catastrophic) are not identical for all consequence categories, because the types of priority impacts in each category are different (e.g., impacts to human health vs. infrastructure). The scale was applied to expected consequences from the climate hazards at the state scale by mid-century. It evaluates consequences from individual discrete hazard events, and the cumulative impacts of ongoing hazards.

Using the scale, the overall consequence score is compiled as an average of the five consequence category ratings. The overall risk assessment results also emphasize the disaggregated nine consequence ratings. Finally, while the climate change risk assessment is focused on evaluating negative consequences of the hazards (in order to inform adaptation priorities), the assessment includes information on positive impacts or opportunities that may arise (see Table 6).

Table 15. Consequence rating scale

Scale	Human Health	Environmental Justice & Equity	Economy			Forests, Ecosystems, and Wildlife	Built Infrastructure
			Agriculture	Recreation and Tourism	Energy and Other Economic Activity		
4 Catastrophic	1000+ people potentially affected; high number of deaths or injuries possible; long duration of impact	Percent of population in EJ areas that is exposed is > 2x the average percent of population exposed statewide	▪ Severe, disruption to multiple industries and employment lasting months to years ▪ Over $1 billion in potential annual losses	▪ Severe disruption to multiple seasons or employment ▪ Over $1 billion in potential annual losses	▪ Severe disruption to multiple industries and employment lasting months to years ▪ Over $1 billion in potential annual losses	Irreversible damage to a significant natural asset	Over 50% of infrastructure in the area damaged, destroyed or shut down; long-duration impact for critical facilities (30+ days) or potential for at least impact across >50% of the state
3 Critical	100-1000 people affected; multiple deaths, sicknesses, or injuries possible; moderate to long duration of impact	Percent of population in EJ areas that is exposed is 1.5-2x the average percent of population exposed statewide	▪ Moderate, disruption to multiple industries and employment; or severe impacts to one industry lasting months to years ▪ $100 million to $1 billion in potential annual losses	▪ Severe disruption to one season or employment ▪ $100 million to $1 billion in potential annual losses	▪ Moderate, disruption to multiple industries and employment; or severe impacts to one industry lasting months to years ▪ $100 million to $1 billion in potential annual losses	▪ Widespread damage to a natural asset ▪ Recovery would take years to decades	More than 25% of infrastructure in affected area damaged or destroyed. Complete shutdown of critical facilities for more than one week., or potential for at least moderate impact across > 25% of the state
2 Limited	10-100 people affected; minor injuries only; brief to moderate duration of impact	Percent of population in EJ areas that is exposed is 1-1.5x the average percent of population exposed statewide	▪ Moderate, weeks-to months-long disruption to multiple industries and employment; or severe short-term impacts to one industry ▪ $10 million to $100 million in potential annual losses	▪ Moderate disruption to multiple seasons or employment; or severe weeks-long disruption to one season ▪ $10 million to $100 million in potential annual losses	▪ Moderate, weeks-to months-long disruption to multiple industries and employment; or severe short-term impacts to one industry ▪ $10 million to $100 million in potential annual losses	▪ Localized, significant damage to a natural asset ▪ Recovery would take years to decades	More than 10% of infrastructure in affected area damaged or destroyed. Complete shutdown of critical facilities for more than one day.
1 Minor	Very low potential for health impacts; very few injuries, if any; brief duration of impact	Percent of exposed population in EJ areas is equal to or less than the average percent of population exposed statewide	▪ Moderate-to-minor disruption to industries and employment ▪ Or < $10 million in potential annual losses	▪ Moderate disruption to one season or employment ▪ Less than $10 million in potential annual losses	▪ Moderate-to-minor disruption to industries and employment ▪ Or < $10 million in potential annual losses	▪ Localized, moderate damage to a natural asset ▪ Recovery would take months to years	Only minor property damage. Temporary shutdown of critical facilities.

Confidence ratings

Recognizing that the availability and quality of data sources for evaluating climate hazards varies, each likelihood and consequence rating is assigned a confidence rating. The confidence rating indicates the strength, consistency, and makeup of the knowledge base used to inform the likelihood and consequence ratings:

- **High confidence**—Multiple sources of independent evidence based on reliable analysis and methods, with widespread agreement
- **Medium confidence**—Several sources of high-quality independent evidence, with some degree of agreement
- **Low confidence**—Varying amounts and quality of evidence and/or little agreement between experts; or assessment made only using expert judgment.

Step 4—Evaluate Risks

To compute a total risk score and corresponding risk rating for each climate hazard, the likelihood score and overall consequence score are multiplied together. A risk matrix and scoring rubric are then used to determine total risk as shown in Table 16.

Table 16. Risk rating matrix and rating rubric

Likelihood	Consequence			
	Minor	Limited	Critical	Catastrophic
Highly Likely	4	8	12	16
Likely	3	6	9	12
Possible	2	4	6	8
Unlikely	1	2	3	4

Risk Score (low end inclusive)	Rating
12+	Extreme
6 – 11.9	High
3 – 5.9	Medium
1 – 2.9	Low

APPENDIX C. CLIMATE ANALYSIS

Data and Projection Methods

The updated projections presented in this report are based on temperature and precipitation projections from an ensemble of 32 climate models, downscaled to a 1/16th degree grid (or approximately 6 km square grid) using the Localized Constructed Analogs (LOCA) method.[326] This represents the same underlying dataset used in the most recent National Climate Assessment.[327]

The 32 models included in the ensemble are:

- ACCESS1-0
- ACCESS1-3
- bcc-csm1-1
- bcc-csm1-1-m
- CCSM4
- CESM1-BGC
- CESM1-CAM5

Projected values represent the averages over three time periods: 2011–2040 (present context), 2041–2070 (mid-century), and 2070–2099 (end-of-century).

Projected values reported represent the 50th percentile of the 32 climate models. The report and figures below also provide the 10th and 90th percentile range across models[328]. Projected values

Stewart (eds.)]. U.S. Global Change Research Program, Washington, DC, USA, pp. 1413–1430. doi: 10.7930/NCA4.2018.AP3

[328] To capture the variation and uncertainty across the 32 climate models in the LOCA dataset, the 10th, 50th, and 90th percentiles in the models' projected values are reported. Each model projects different values for daily

are calculated by determining the change between modeled future and modeled baseline values and adding that change to the observed baseline. Future change is presented relative to a 1971–2000 historical baseline. All values and percentiles are calculated for each model and grid cell, then averaged across grid cells where applicable (or presented in map form).

Historical data were drawn from a 1/16th degree gridded reanalysis329 dataset, which uses meteorological station data across Continental United States.[330] Historical conditions represent the average over the 1971–2000 baseline.

Present context and mid-century projections assume a global baseline (i.e., no new emission reduction actions) GHG representative concentration pathway (RCP 8.5). This baseline emissions pathway is relatively similar to the low-emissions pathway (RCP 4.5) through 2050, at which point the difference between the two scenarios becomes greater. Late-century projections are provided for both a low-emissions pathway (RCP 4.5) and high-emissions pathway (RCP 8.5) to capture the potential range of outcomes depending on global greenhouse gas emissions over this century.

Because each value provided in this report is generated by averaging the 10th, 50th, or 90th percentile outputs from 32 models across the geography of Pennsylvania, these values are estimates of future conditions, but are not intended to be used as precise projections. Additionally, the projections may not reflect extreme scenarios that are plausible but projected by a minority of models.

The following figures and tables supplement the findings provided in the main body of the report.

---

minimum and maximum temperature and daily precipitation, making percentiles necessary to capture the range of possible future climate outcomes.

[329] "Reanalysis" is a term-of-art referring to the use of a model to interpolate observations in order to create spatially and temporally continuous information about past weather and climate conditions.

Monthly Average and Maximum Temperature Charts

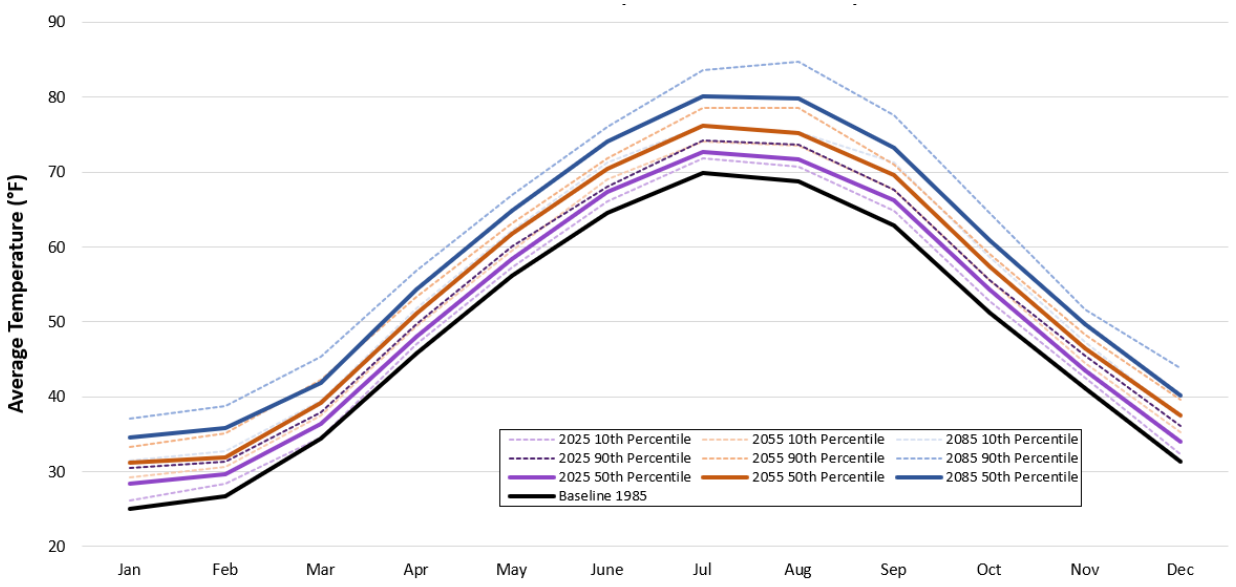

Figure 55. Statewide average observed and projected monthly average temperatures

Based on 32-model ensemble of LOCA downscaled data, RCP 8.5. Values for 2025 represent all years 2011–2040, those for 2055 represent 2041–2070, and those for 2085 represent 2070–2099.

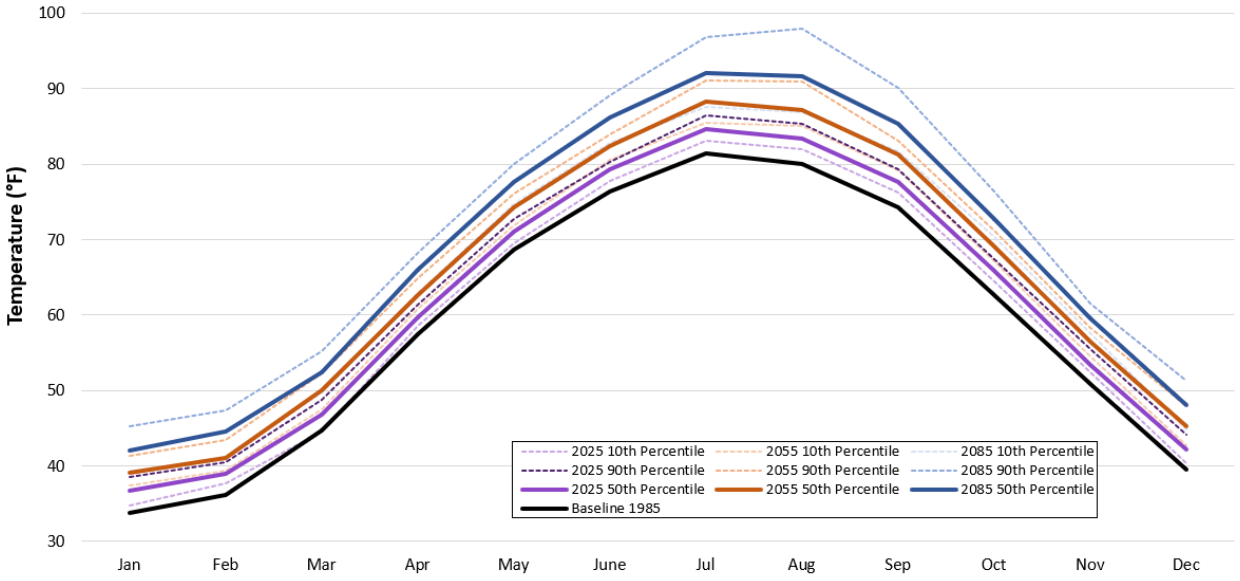

Figure 56. Statewide average observed and projected monthly maximum temperatures

Based on 32-model ensemble of LOCA downscaled data, RCP 8.5. Values for 2025 represent all years 2011–2040, those for 2055 represent 2041–2070, and those for 2085 represent 2070–2099. Values are statewide averages.

End-of-Century Projections under RCP 4.5

Table 17. Statewide average observed and projected temperature variables

	Observed Baseline (1971–2000)	End-of-Century RCP 4.5 (2070–2099)	
		Projected Value (10th–90th Percentile Range)	50th Percentile Absolute Change
Average annual temperature (°F)	48.3	53.8 (51.7–55.9)	5.5
Average annual minimum temperature(°F)	37.6	43 (41.2–45)	5.4
Average annual maximum temperature(°F)	58.9	64.4 (62.4–66.6)	5.5
Heating Degree Days (degree days)	6,600	5,178 (4,772–5,706)	-1,422
Cooling degree days (degree days)	483	1,089 (815–1,484)	606
"Very hot" (95th percentile) temperature (°F)	85.4	91.5 (89–96.4)	6.1
Days with temperature above baseline "very hot" temperature(°F)	18.3	62.8 (41.1–79)	44.5
"Extremely hot" (99th percentile) temperature(°F)	90.1	96.2 (94.5–102.5)	6.1
Days above baseline "extremely hot" temperature	3.7	28.8 (15.3–48.6)	25.1
Days with temperature >90°F	5.1	31.0 (17.4–50.4)	25.9
Days with temperature >95°F	0.6	8.7 (4.4–26.2)	8.1
Days with temperature >100°F	0.0	1.3 (0.6 - 10.4)	1.3
Days with low temperature > 68°F	3.6	20.4 (13.7–39.2)	16.8
Consecutive days above 90°F	1.4	7.4 (2.3–14.1)	6.0
Consecutive days above 95°F	0.1	2.7 (0.3–6.9)	2.6
Growing Degree Days (degree days)	2,472	3,588 (3,116–4,126)	1,116

Note: Projections are based a 32-model ensemble of LOCA downscaled data, RCP 4.5. Values reported are the median value of the 32-model ensemble and the 10th and 90th percentile values across models.

Table 18. Statewide average observed and projected precipitation variables

Variable	Observed Baseline (1971–2000)	End-of-Century RCP 4.5 (2070–2099)	
		Projected Value (10th–90th Percentile Range)	50th Percentile Percent Change
Annual Precipitation (inches)	43.5	46.5 (44.6–49.5)	6.8%
Days with rainfall > 3 inches (days)	0.1	0.1 (0–0.2)	56.5%
Annual Maximum Consecutive Dry Days(days)	12.5	13.2 (12–14.6)	5.5%
"Very heavy" (95th percentile) precipitation (inches)	0.7	0.7 0.7–0.8)	10.2%
Days with precipitation above baseline "very heavy" precipitation (days)	12.4	15.0 (13.4–16.9)	21.2%
"Extremely heavy" (99th percentile) precipitation (inches)	1.2	1.3 (1.2–1.4)	11.5%
