***Re: Completed Restoration of Momentary and Sustained Interruptions –
FirstEnergy Pennsylvania Electric Company; Docket No. M-2021-3023564***

Dear Secretary Chiavetta:

Pursuant to 52 Pa. Code § 67.1, FirstEnergy Pennsylvania Electric Company on behalf of West Penn Rate District (“West Penn”) submits written notification of completed restoration efforts following storm conditions that began on June 26, 2024 that caused multiple service interruptions in the West Penn service territory.

Attached please find the details relative to the impact of this recent outage event and the restoration activities that took place. It should be noted that the review and approval process of this outage information is still in progress at the time of filing this report and as such, all outage information contained in this report should be considered preliminary.

If you have any questions, please contact me at (610) 212-8331.

Sincerely,

Darsh Singh

ELECTRIC UTILITY REPORT OF OUTAGE TO
PENNSYLVANIA PUBLIC UTILITY COMMISSION
SECRETARY'S BUREAU
P O BOX 3265
HARRISBURG, PA 17105-3265

1. Reporting Utility: FirstEnergy Pennsylvania Electric Company ("FE PA")
on behalf of West Penn Rate District ("West Penn")
Address: 800 Cabin Hill Drive
Greensburg, PA 15601

2. Name and title of person making report:
Scott Wyman Vice President, Operations – PA Operations
(Name) *(Title)*

3. Telephone number: (814)-449-9308
(Telephone Number)

4. Date and time report was made to Commission:
June 26, 2024 2100
(Date) *(Time)*

5. Interruption or Outage:
(a) Number of customers affected: 21,649 (Represents 3.0% of West Penn's total customers).
(b) Approximate number of outage cases and trouble cases for each county affected during event: See response to 5(c).

- (c) Approximate number of outages for each county affected during the event:

County	Outages	Outage Cases	Trouble Cases
Adams	13	1	1
Allegheny	1,749	21	31
Armstrong	314	12	10
Bedford	58	3	6
Butler	2,145	29	20
Cameron	40	1	1
Centre	183	9	6
Clarion	208	13	20
Elk	95	2	4
Fayette	225	10	17
Franklin	124	9	11
Greene	716	9	8
Indiana	117	5	2
Lycoming	41	1	2
McKean	263	3	3
Potter	9	1	0
Washington	1,931	19	32
Westmoreland	13,418	173	295
Total	21,649	321	469

- (d) Approximate number of outage cases exceeding 6 or more hours in duration: 193

- (e) A listing of each outage case exceeding 6 or more hours in duration:
See Attachment A.

- (f) Reason for the interruption or outages: Beginning the afternoon of Wednesday, June 26, 2024, storms producing precipitation, lightning, high winds, and multiple tornadoes moved through Pennsylvania including the West Penn service territory. According to the National Weather Service, “on the evening of June 26th, 2024, just before 7:30 PM, a small but intense squall line rapidly developed producing widespread straight-line wind damage and spawning four tornadoes.” Three of the tornadoes, an EF-2 with estimated peak winds of 115 miles per hour, an EF-1 with estimated peak winds of 110 miles per hour, and an EF-0 with estimated peak winds of 75 miles per hour touched down in the West Penn service territory. See Attachment B for the maximum wind gusts and 24-hour total precipitation for June 26, 2024.

Damage as a result of the storms and tornados included downed wires, damaged

and broken poles, and extensive tree damage. The Butler and Jeannette regions were the hardest hit areas. Approximately 68.5% of the total outages that occurred were tree related and an additional 12.5% were related to line and equipment failure.

Preliminary data indicates the reliability impact of the storm was 11.9 minutes of SAIDI, 0.03 of SAIFI, and an overall storm CAIDI of 399.12 minutes.

- (g) Projected time of restoration: It was initially estimated that the majority of customers affected by the storms would be restored by 2300 on Thursday, June 27, 2024. Due to the extensive damage, the estimated time of restoration was extended to 1700 on Friday, June 28, 2024.

See Attachment C for the restoration curve and Attachment D for the order restoration graphs.

- (h) The number of utility workers, contract workers, and workers received as mutual aid assigned specifically to the repair work by general function:

Company	# of Workers	General Function
West Penn	123	Line Workers
Penn Power Rate District	18	Line Workers
Subtotal	141	Line Workers
Asplundh Tree Expert, LLC	64	Forestry Contractors
Davey Tree	15	Forestry Contractors
Penn Line Services, Inc.	45	Forestry Contractors
Townsend	16	Forestry Contractors
Subtotal	140	Forestry Contractors
West Penn	15	Hazard Responders
Subtotal	15	Hazard Responders
West Penn	4	Substation/Network
Subtotal	4	Substation/Network
West Penn	35	Supporting Roles
Penn Power Rate District	1	Supporting Roles
FirstEnergy Service Company	1	Supporting Roles
Subtotal	37	Supporting Roles
Grand Total	337	

- (i) The date and time of the first information of a service interruption: June 26, 2024, at 1533.
- (j) The date and time that repair crews were assembled: June 26, 2024, at 0600.
- (k) The actual time that service was restored to the last affected customer: June 28, 2024, at 1836.
- (l) A general description of the physical damage sustained by the utility facilities as a result of the interruption/outage:

Equipment	Number
Primary Spans	149
Secondary Spans	9
Crossarms Replaced	140
Cutouts Replaced	94
Poles Replaced	40
Transformers Replaced	59
Wire & Cable Replaced (feet)	50,000

- (m) If the interruption/outage event was weather-related, the utility’s weather reports, outlooks, or scenarios for the day before and the day of the interruption/outage event:

See Attachment E for the weather forecast reports.

- (n) If the interruption/outage event caused approximate outages that exceed 10% or more of the number of customers in the utility’s entire service territory, rank the event in terms of the number and duration of outages and provide 2 comparable events, including the number and duration of outages for those comparable events.

The outages that were a result of this event did not exceed 10% or more of customers in the utility’s entire service territory.

Remarks: The storm statistics contained in this report are preliminary. The review and approval of the storm statistics were still in progress as of the time this report was filed.

Attachment A: A listing of each outage case exceeding six or more hours in duration, including the following information¹:

Order #	Approximate Location (County)	Total Number of Customers Affected	Duration of the Outage (minutes)	Initial Date and Time of the Outage	Restoration Date and Time

Attachment C: Restoration Curve

Attachment D: Order Restoration Graphs

Attachment E: Meteorologist Reports

Tuesday, June 25, 2024 @ 0843

New Issuance:

Early Wednesday:

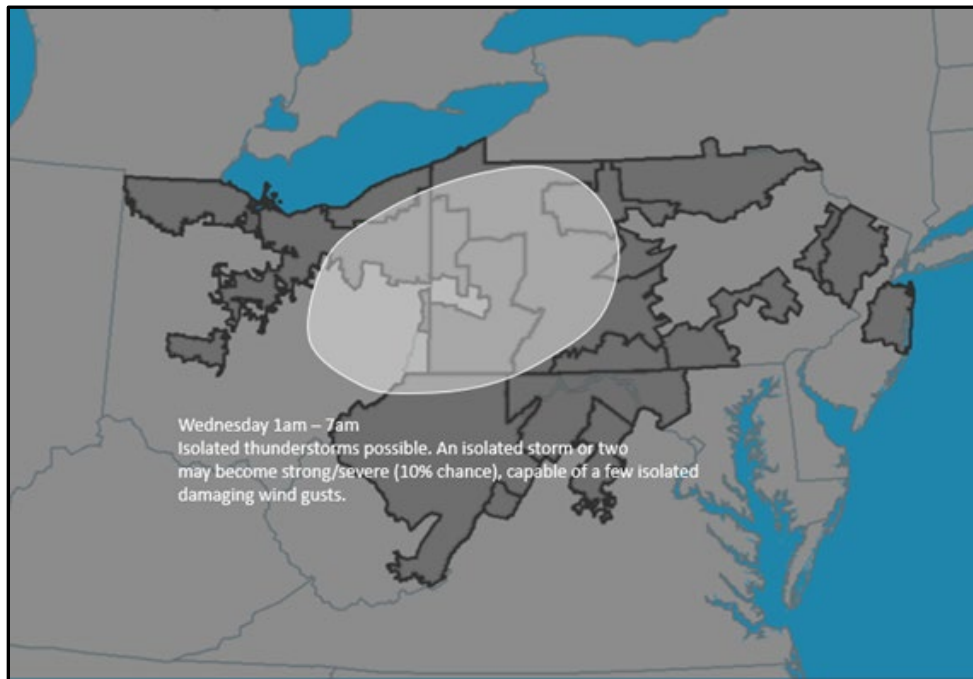

A few isolated strong storms are possible overnight across areas of OH, PA and northern WV. While the general risk is low, a few isolated damaging wind gusts are possible.

Wednesday afternoon/evening:

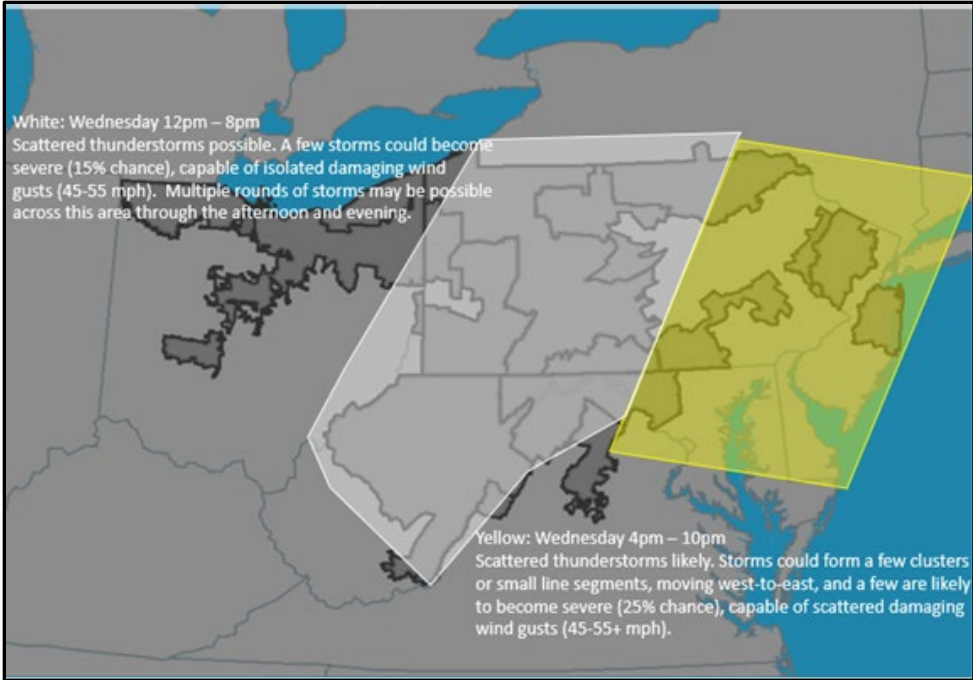

A cold front will work slowly through FE Wednesday. Ahead of/along this front, scattered storm development is expected. Storms look likely develop early in the day Wednesday across portions of eastern OH, western PA and WV and move generally west-to-east, potentially developing a few clusters or small segments as they approach eastern PA, MD and NJ Wednesday evening. Storms will be capable of scattered damaging wind gusts, with a higher wind damage threat in any storms that develop into clusters/lines in the late afternoon/evening.

See graphics below for further information.

Next Update by 11am Wednesday

West Penn Rate District Storm Report

Wednesday, June 26, 2024 @ 0907

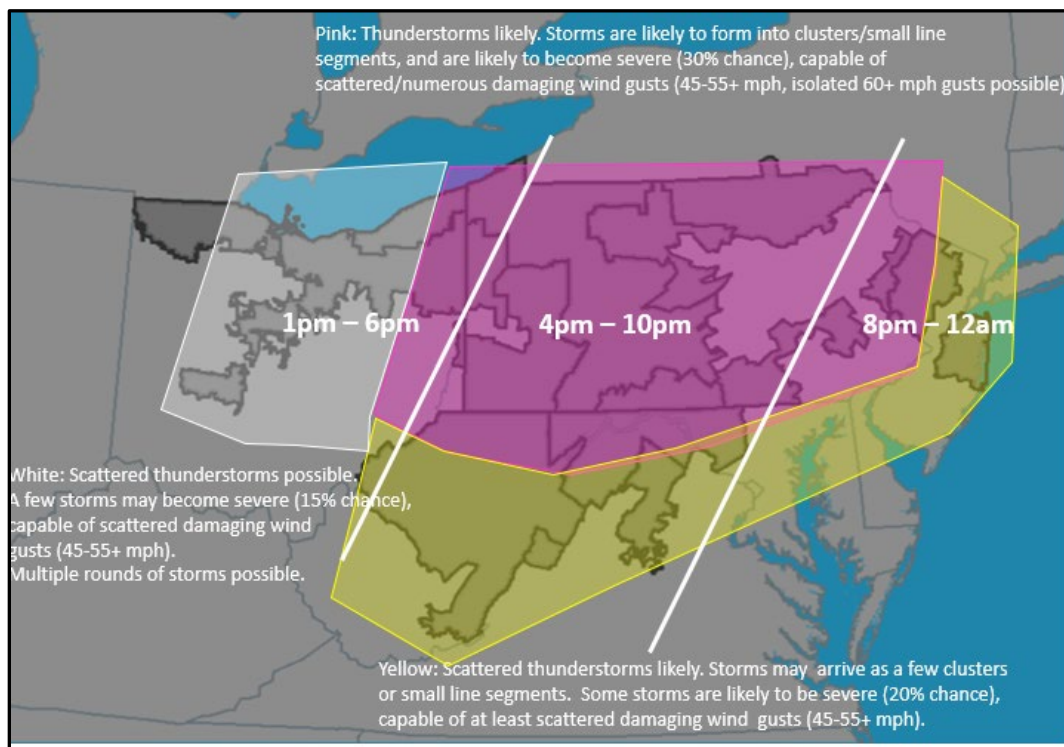

Update:

Notable changes to the forecast this morning. Highlights:

- Highest risk of damaging gusts pulled westward to cover areas of western OH, PA, northern WV and western MD. This is the area currently expected to see (A) greatest storm coverage, and (B) greatest risk for small line segments of storms developing through the afternoon, which increases risk of damaging gusts.
- Added an area of storm/damaging gust risk across OH this afternoon. Multiple rounds of storms may be possible across this area through the early evening.
- Adjusted timing, mainly to delay storm development/progress by a few hours.
- Storms are likely to develop across western FE this afternoon and move generally eastward across the FE footprint through the evening. Areas of eastern PA and NJ carry a higher forecast uncertainty, as the storm risk in these areas will highly depend on the timing and intensity of storms as they approach from the west. If warranted, updates to the forecast for these areas will be updated through additional alerts later today.

See graphic below for further information.

Last Scheduled Update

Wednesday, June 26, 2024 @ 1439

Update:

Adjustments:

- Current trends suggest that the northern 2/3 of PA—and later northern NJ—are the areas most likely to (A) see more widespread thunderstorm coverage, and (B) see small clusters or line segments developing--and therefore are at elevated risk of damaging gusts through the evening hours. Storm coverage is expected to increase and intensify across this area throughout the afternoon.
- Elsewhere across FE, scattered severe thunderstorms remain likely through the evening. An isolated cluster or small line segment may develop into the evening hours—but overall, storm activity is expected to be more scattered in nature across these areas.
- Timing of storm activity has not notably changed, but trends will continue to be monitored and updated as necessary.

See graphic below for further information.
