

Docket C-2024-3050204

This is a letter from Dontissa Wilmer for PUC Formal filing against Comcast.

Dear Sir,

I am informing the courts that I am being retaliated against for submitting Formal Filings with the Pennsylvania Utility Commission against PECO C-2024-3050153, Comcast C-2024-3050204, and AT&T C-2024-3050294, Before I filed, I was already subjected to Being Harassed. Beginning in April 2023, I was harassed by my employer. In August 2023, I went out on sick leave from my job. In October 2023, I informed my employer that I would be going out on Short Term Disability. A couple of days later I started to be harassed off the job too. My personal laptop was hacked. Individuals were following me and hacking my phone.

I believe my employer Community College of Philadelphia and their Insurance Company Sun Life has hired a contractor to harass me and to commit Criminal Acts towards me. The PECO and Comcast Powerlines on my property have been tampered with and compromised without authorization. My AT&T and Comcast accounts have been compromised. My personal vehicle computer electronic system has also been tampered with and compromised. Since I filed the formal complaints, the harassment has escalated. Recently my personal vehicle was Vandalized while parked at Holy Redeemer Hospital. Someone put an almond color cream in all four of my door jams locking mechanism, and it caused the inside of my vehicle to get extremely hot. The same cream substance was found underneath my drivers seat when my seat was getting hot. When I inspected my truck to see why my seat was getting hot, I found the same cream

substance on the seat tracking rail. Each time I was pulling my seat up and back the cream would activate causing my seat to heat up.

In the same week as my truck being Vandalized, Something in my vehicle caused my ears to pop, while I was driving. As I mentioned someone has tampered/compromised with my Vehicle computer Electronic system and it is affecting my hearing. I have notice that certain vehicles are purposely driving close to me. I believe to send an Electronicmaganetic Field wave (EMF) signal, because my ear starts to hurt. When they drive away my ear stops hurting.

I am also dealing with the same issue in my home. I have called the police twice about a High pitch Electronic wave coming through the walls from my neighbors home, who I believe is involved and it causes my ears to hurt. Everyday I am followed by over 16 or more vehicles, using intimidation tactics, driving fast past me, driving close beside me, creating traffic jams, hacking my phone, and committing traffic violations to just take a picture of me; its feels like there is a price on my head. What PECO, Comcast, and AT&T has done is a Crime and There are attempts to prevent me from reporting these Criminal Acts that are being carried out against me. There are individuals involved from All walks of Life. I believe there are Conspiracy, Coverups, and Payoffs involved. There also may be attempts to tamper with my PUC account by altering my case filings. I do check my account often.

Thank you,

Dontissa Wilmer
