***Re: Completed Restoration of Momentary and Sustained Interruptions –
FirstEnergy Pennsylvania Electric Company; Docket No. M-2021-3023564***

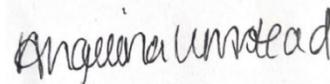

Dear Secretary Chiavetta:

Pursuant to 52 Pa. Code § 67.1, FirstEnergy Pennsylvania Electric Company on behalf of Penelec Rate District (“Penelec”) submits written notification of completed restoration efforts following storm conditions that began on November 21, 2024 that caused multiple service interruptions in the Penelec service territory.

Attached please find the details relative to the impact of this recent outage event and the restoration activities that took place. It should be noted that the review and approval process of this outage information is still in progress at the time of filing this report and as such, all outage information contained in this report should be considered preliminary.

If you have any questions, please contact me at (610) 212-8331.

Sincerely,

Angelina Umstead

- (d) Approximate number of outage cases exceeding 6 or more hours in duration: 590

- (e) A listing of each outage case exceeding 6 or more hours in duration:
See Attachment A.

- (f) Reason for the interruption or outages: Beginning in the early morning hours of Friday, November 22, 2024, a storm system began moving through the Penelec service territory. The storm produced heavy, wet snowfall of up to 24 inches, ice, and wind gusts of approximately 45 miles per hour. See Attachment B for the maximum wind gusts for Thursday, November 21, 2024, and Friday, November 22, 2024, and the 48-hour total snowfall for Thursday, November 21 to Saturday, November 23, 2024.

Damage as a result of the high winds included downed trees and wires, damaged or broken poles and crossarms, and damaged transformers, and cutouts. Challenges to restoration included dangerous conditions such as continuous recloser operations, treacherous roads, road closures, and breaking/falling tree limbs. As a result of these conditions, all trucks in the Montrose District were grounded on November 22, 2024, from 0300 to 1200(noon), and all trucks in the Towanda District were grounded on November 22, 2024, from 0800 to 1200 (noon). In addition, ice and approximately two feet of snowfall made it extremely difficult to access damaged facilities, many of which were in off road areas.

Approximately 44.7% of the total outages that occurred were ice related with an additional 23.7% being tree related. Montrose, Towanda, and Mansfield were the hardest hit areas.

Preliminary data indicates the reliability impact of the storm was 97 minutes of SAIDI, 0.10 of SAIFI, and an overall storm CAIDI of 992.33 minutes.

- (g) Projected time of restoration: It was originally estimated that the majority of customers would be restored by 2300 on Monday, November 25, 2024. Due to the challenges encountered during the restoration efforts, the estimated time of restoration was extended to Tuesday, November 26 at 1500.
See Attachment C for the restoration curve and Attachment D for the order restoration graphs.
