BEFORE THE PENNSYLVANIA PUBLIC UTILITY COMMISSION

Motion to keep record open and to continue hearings on C-2023-3043427 Geatti V. PPL Electric Utilities

To: Alphonso Arnold Administrative Law Judge at The Pennsylvania PUC

Sir,

Please reopen the record and issue an evidentiary meeting date. How can you close the record without any evidence having been presented by the Defendant PPL. PPL needs to show evidence that they did not do wrongdoing. I have evidence that they did. Why are you closing the record if no decision has been made on the case. Please keep record open so that the merits of all claims can be evaluated. I am filing this under the liberal rules as I do not know the technology to file it online. Please do it for me as you did with the previous filing. I still do need electricity at my property, and these people conspired to do additional harm to me and my property because I filed a complaint with the PUC, and they need to answer to the hearing and investigation process with the PUC. It makes absolutely no sense for the record to be closed in the middle of an investigation hearing process? how else are we going to get to the Bottom of what exactly happened, and why PPL disconnected my electric service, and then conspired with local people in order to destroy my place in order to close this case, and there may be other reasons, but they also need to be investigated but not but closing the record, but rather by leaving the record open to process the evidence. These people did incredible harm to me and my property, and my life, and need to present evidence of what exactly they did and why. If you were to close the record, you would be setting a precedent for PPL as well as other utility companies that if anyone was to file a complaint against them, they can just destroy the persons house, and close the case under false pretenses, and that is not an outcome that is acceptable or lawful to anyone.

Sincerely,

Antonio Geatti,

Complainant
