2. **Lack of cost of equity analysis.** I disagree with Mr. Hails' decision to not conduct his own cost of equity analysis in preparation of his direct testimony. Mr. Hails offered no sound reasoning to assume that Mr. Moul's cost of equity models provide reliable results. As discussed in my direct testimony, Mr. Moul's cost of equity models have numerous flaws and produce results that are significantly higher than Aqua's market-based cost of equity. As discussed above, applying Mr. Hails' recommendations to Mr. Moul's DCF method, as explained in his answers to OCA interrogatories, results in an 8.51% cost of equity.
3. **Capital Structure.** Mr. Hails' recommended capital structure, which is equal to Aqua's request, contains an unjustified amount of equity and would therefore result in

[8] Capital market conditions have changed such that there no longer any reason for the Commission to deviate from its stated preference to rely on the DCF model, as it did in Aqua's last rate case.
[9] As explained in my direct testimony, my COE analysis demonstrates that Aqua's COE is between 7.27% and 8.03%. I recommended an 8.70% ROE (8.03% to 9.38%) based on the OCA's position that it would be sufficient to allow Aqua to raise the capital it needs to provide safe and reliable service and ensure that rates are more affordable/less unaffordable than if Mr. Moul's 10.95% ROE recommendation is used to set rates.

excessive rates. As discussed in my direct testimony, Aqua's requested capital structure is not appropriate for setting rates in this proceeding since it has a significantly higher common equity ratios (53.95%) than the average common equity ratio used by other water utility companies in the country (50.7%)[10] and the consolidated capital structure being used by Aqua's parent Essential Utilities, Inc. (about 47.5%).[11]

Q. CAN YOU PROVIDE SOME ADDITIONAL EVIDENCE THAT MR. HAILS' 10.37% ROE RECOMMENDATION IS EXCESSIVE?

A. Yes. In my direct testimony, I showed that the equity return expectations of major financial institutions are between 6.2% to 7.9% for the overall stock market,[12, 13] which includes most *unregulated* companies that operate in highly competitive markets as opposed to Aqua which operates in a rate regulated environment where returns are set by regulators and collected from a captive customer base. I encourage the Commission to consider why Mr. Hails' 10.37% ROE is significantly higher than the expectations of investors in the financial mainstream in highly competitive markets. If there is a good reason for Aqua's cost of equity to be over a hundred basis points higher than the equity return expectations of major financial institutions, I have not seen it and Mr. Hails has not explained it.

As stated in my direct testimony, investors expect to be compensated for the risk of their investment, with riskier investments requiring greater expected returns and higher

[10] Exhibit ALR-5, page 5.
[11] Essential Utilities Value Line Report, January 5, 2024.
[12] OCA Statement 3, p. 14, Table 4.
[13] Duff & Phelps / Kroll, as mentioned in Table 4, is not mentioned here as they are a financial risk and advisory firm, not a major financial institution like J.P. Morgan Asset Management or Charles Schwab.

costs of equity.[14] However, Aqua is a regulated monopoly with relatively low investment risks, and therefore it is implausible that its cost of equity is so much higher than the equity return expectations of major financial institutional for companies that face significantly more investment risk than Aqua.

Q. YOU STATED ABOVE THAT APPLYING MR. HAILS' RECOMMENDATIONS PROVIDED IN RESPONSE TO OCA'S DISCOVERY REQUEST RESULTS IN A DCF INDICATED COST OF EQUITY OF 8.51%. PLEASE EXPLAIN MORE ABOUT MR. HAILS' RECOMMENDATIONS.

A. Mr. Hails explained that he did not perform a cost of equity analysis of his own. However, he reviewed various inputs within Mr. Moul's cost of equity analysis and proposed various changes. First, he does not support Mr. Moul's leverage adjustment, which he notes is consistent with the findings from Opinion and Order from Docket No. R-2021-3027385 which stated the following:

> We likewise find no merit in Aqua's arguments in which it seeks to support a leverage adjustment that is more than 100 basis points higher than that requested by either PPL or UGI Electric. Rather, we find, as we did in those base rate proceedings, that awarding the Company a leverage adjustment would run contrary to the public interest.

As discussed above, removing the leverage adjustment from Mr. Moul's DCF method results in a 9.38% cost of equity.

Second, in response to OCA-I-3, Mr. Hails questions the reasonableness of the 6.75% growth rate component in Mr. Moul's DCF, stating "the pace and regionality of continued infrastructure spending is speculative and there are numerous other factors that may constrain growth…" Applying Mr. Hails' recommended growth rate of 5.88% results

[14] OCA Statement 3, p. 62.

in a DCF-based cost of equity of 8.51%, which is lower than my recommended ROE of 8.70%.

II. RESPONSE TO I&E WITNESS KELLER

Q. PLEASE SUMMARIZE THE RECOMMENDATIONS IN MR. KELLER'S DIRECT TESTIMONY THAT YOU ARE ADDRESSING IN YOUR REBUTTAL TESTIMONY.

A. In his direct testimony, Mr. Keller recommended an authorized return on equity ("ROE") of 9.37% and a capital structure of 53.95% common equity and 46.05% long-term debt.[15] I oppose each of those recommendations, and I will explain why below.

Q. DOES THE ANALYSIS PROVIDED IN YOUR DIRECT TESTIMONY DEMONSTRATE THAT AQUA'S AUTHORIZED ROE SHOULD BE LOWER THAN 9.37% AND ITS AUTHORIZED CAPITAL STRUCTURE SHOULD HAVE A LOWER COMMON EQUTIY RATIO THAN 53.95%?

A. Yes. Regarding Aqua's authorized ROE, I determined that Aqua's cost of equity is between 7.27% and 8.03% based on my cost of equity Model results. However, I recommend that the Commission set Aqua's return on equity at 8.70%, or the midpoint of my market-based cost of equity recommendation (8.03%) and the unlevered, DCF results (9.38%) of Aqua's rate of return witness, Mr. Moul, based on the OCA's position that it would be sufficient to allow Aqua to raise the capital it needs to provide safe and reliable

[15] I&E Statement No. 2, p. 6.

service and ensure that rates are more affordable/less unaffordable than if Mr. Moul's 10.95% ROE recommendation is used to set rates.[16]

Regarding capital structure, I recommended using a capital structure consisting of 50.53% equity and 49.47% debt, based on the average common equity ratios of the companies in my proxy group.[17] A common equity ratio of 50.53% is on the high side of reasonableness because it is above the mean (50.7%) and median (41.3%) common equity ratio of the 6 water distribution companies in the RFC Water Proxy Group. I believe, absent evidence from Aqua in support of the need for a different capital structure, using the capital structure that more closely aligns with that of the proxy group is consistent the Commission's duty to set just and reasonable rates that consider both the utility and its investor's needs as well as the needs of ratepayers.

Q. WHAT IS YOUR OVERARCHING CRITICISM OF MR. KELLER'S ROE RECOMMENDATION OF 9.37%?

A. Mr. Keller's recommended 9.37% ROE for Aqua is higher than warranted given the data and proxy group applicable to this case. I provided significant evidence in my direct testimony (OCA Statement 3) that Aqua's cost of equity is significantly lower than 9.37%.[18] As indicated above, my cost of equity model results show that Aqua's cost of equity is between 7.27% to 8.03%. As discussed above, I recommended an ROE of 8.70%, which is above the high end of my cost of equity model results. Although Mr. Keller's 9.37% ROE recommendation is certainly far more reasonable than Mr. Moul's 10.95% ROE recommendation, it is still too high and would lead to unnecessarily high rates.

[16] OCA Statement 3, p.104.
[17] OCA Statement 3, p.80.
[18] OCA Statement 3, pp. 48-79.

Mr. Keller's recommendation is based exclusively on his Discounted Cash Flow ("DCF") result of 9.37%. He provides a Capital Asset Pricing Model ("CAPM") analysis for comparative purposes, but not as a check on his DCF results.[19] Below I explain why Mr. Keller's DCF is flawed and produces unreasonably high cost of equity results.

Q. DID MR. KELLER'S DCF MODEL PRODUCE A RELIABLE COST OF EQUITY ESTIMATE FOR AQUA?

A. No. Mr. Keller's DCF result of 9.37% is excessive because his growth rate of 6.61%[20] is unreasonably high. His growth rate component is excessive because it is based on analysts' five-year earnings per share growth rate forecasts for the companies in his proxy group without accounting for how much of these earnings investors expect will be retained in the business and how much they will pay out as dividends. As explained in my direct testimony, these analyst growth rate forecasts are not indicative of future sustainable growth rates in part because the sources of cash flow to an investor are dividends and stock price appreciation.[21] While both stock price and dividends are impacted in the long run by the level of earnings a company is capable of achieving, earnings growth over a period as short as five years is rarely in synchronization with the cash flow growth from increases in dividends and stock prices.

[19] I&E Statement No. 2, p. 25.
[20] I&E Statement No. 2, p. 30.
[21] OCA Statement 3 at 59-60, 85.

Q. CAN YOU PROVIDE AN EXAMPLE THAT EXPLAINS WHY USING ONLY ANALYST EARNINGS PER SHARE GROWTH RATES CAN PRODUCE AN EXCESSIVE DCF RESULT?

A. Yes. Mechanically using analyst earnings per share growth rates as a growth rate in a DCF model is like calculating how much money someone will have in the bank at retirement by counting only income and ignoring expenses. The estimate will not be accurate unless you also account for how much money is taken out along the way. A DCF model that does not account for the percentage of earnings that will be paid out to investors as a dividend is not a reliable way to calculate the cost of equity. In this case, Mr. Keller's 9.37% DCF result should not be the basis for Aqua's authorized ROE because it is higher than Aqua's cost of equity. Should Mr. Keller's ROE recommendation be adopted it would result in Aqua's consumers paying inappropriate (i.e., beyond what is necessary for Aqua to raise equity capital on reasonable terms) and unreasonable profits to investors that would be unnecessarily and unfairly burdensome to those consumers by making essential utility service more expensive and less accessible. Regulated monopolies like Aqua "have no constitutional right to profits such as are realized or anticipated in highly profitable enterprises or speculative ventures." Rather "[t]he return should be reasonably sufficient to assure confidence in the financial soundness of the utility and should be adequate, under efficient and economical management, to maintain and support its credit and enable it to raise the money necessary for the proper discharge of its public duties."[22] The analysis presented in my direct testimony demonstrates that a 9.37% return is in line with anticipated returns on investments in highly profitable unregulated companies.

[22] *Bluefield Water Works & Improvement Co. v. Pub. Serv. Comm'n of the State of W. Va.* 262 U.S. 679, 692-693 (1923).

Q. DO MAJOR FINANCIAL INSTITUTIONS IMPLEMENT A DCF MODEL WITH A GROWTH RATE BASED ON ANALYSTS' PROJECTED GROWTH RATE IN EARINGS PER SHARE, AS MR. KELLER HAS DONE?

A. As far as I am aware, major financial institutions understand that it is not appropriate to mechanically add analyst earnings per share (EPS) growth rates to a dividend yield to calculate the cost of equity. J.P. Morgan Chase uses the sustainable growth form of the DCF method, as I do, in its 2019 Long-Term Capital Market Assumptions publication.[23]

Q. YOUR SUSTAINABLE GROWTH DCF MODEL PRODUCED A COST OF EQUITY RESULT OF BETWEEN 7.76% AND 7.99%. WHY IS THIS RANGE OF RESULTS A BETTER MEASURE OF AQUA'S MARKET-BASED COST OF EQUITY THAN THE DCF METHOD USED BY MR. KELLER?

A. As discussed in my direct testimony, my results[24] are not as influenced by overly optimistic analysts' forecasts as would have been the case had I merely used analysts' five-year earnings growth rate forecasts, as Mr. Keller did,[25] as a proxy for long-term growth. This is because the DCF methods I use compute sustainable growth rates, rather than growth rates that can exaggerate the growth rate due to assuming that a relatively short-term forecast (5 years) will remain indefinitely.

Q. DOES THIS CONCLUDE YOUR REBUTTAL TESTIMONY?

A. Yes.

IX. CAPITAL STRUCTURE....37
X. RESPONSE TO MR. PACKER'S REBUTTAL....39
XI. CONCLUSION....42

I. INTRODUCTION AND SUMMARY OF MR. MOUL'S COMMENTS

Q. ARE YOU THE SAME AARON ROTHSCHILD WHO SUBMITTED DIRECT TESTIMONY IN THIS PROCEEDING ON AUGUST 16, 2024, AND REBUTTAL TESTIMONY ON SEPTEMBER 12, 2024?

A. Yes.

Q. WHAT IS THE PURPOSE OF YOUR SURREBUTTAL TESTIMONY?

A. The purpose of my Surrebuttal Testimony is to respond to the following issues addressed in Aqua Pennsylvania, Inc. and Aqua Pennsylvania Wastewater, Inc. (collectively "Aqua" or the "company") witness Mr. Paul Moul's Rebuttal Testimony, specifically, his inaccurate assertions that:

- I make inconsistent statements regarding the use of analyst forecasts, historical data, and forward-looking market data;
- Application and reasonableness of my Constant Growth DCF Model;
- My application of the CAPM is defective;
- My conclusions regarding Mr. Moul's leverage adjustment are erroneous;
- I have not shown that Aqua is not entitled to some form of management performance recognition by the Commission; and
- The appropriate capital structure for Aqua should be more equity-rich.

As addressed below, Mr. Moul's criticisms are invalid and should be rejected. If I do not address an issue raised in the company's rebuttal, it does not mean I agree with the testimony.

I will also be addressing the response of Aqua witness Packer in his rebuttal testimony to issues regarding how full market valuation and affordability impact Aqua's cost of equity.[1]

[1] Mr. Packer's rebuttal testimony at page 22.

Q. ON PAGE 4, LINES 12-24 OF HIS REBUTTAL TESTIMONY MR. MOUL CLAIMS THAT YOUR 8.70% ROE RECOMMENDATION, WHICH IS ABOVE THE MIDPOINT OF YOUR COST OF EQUITY MODEL RESULTS (7.65%), SEEMS TO INDICATE THAT YOUR ANALYSIS IS "WOEFULLY INADEQUATE" AND "CANNOT BE RELIED UPON IN ANY MEANINGFUL WAY." PLEASE RESPOND.

A. I strongly disagree. In my direct testimony I provide a thorough technical analysis that demonstrates that Aqua's cost of equity is between 7.27% and 8.03% based on the cost of equity models I employed. In other words, an authorized ROE of between 7.27% and 8.03% would allow Aqua to raise the capital it needs to provide safe and reliable service on reasonable terms.

It is the OCA's position that a range of reasonable costs of equity for Aqua exist between the results of my cost of equity models and the unlevered DCF results of Mr. Moul which are sufficient to provide Aqua with the capital it needs to provide safe and reliable service and ensure that rates are more affordable/less unaffordable than if Mr. Moul's 10.95% ROE recommendation is used to set rates. The ultimate recommendation of 8.70% is the midpoint of that range, which fully utilizes the results of my cost of equity analysis to not only demonstrate that Mr. Moul's recommendation of 10.95% is excessive, but also to establish the OCA's range of reasonable cost of equity results for Aqua.

As discussed on page 18 of my direct testimony, major financial institutions are informing their clients to expect returns on the overall market (S&P 500) of 6.2% to 8.5%. These return expectations include companies that are far riskier than regulated utility

companies like Aqua (e.g., Tesla, Amazon), and, therefore, these expectations of 6.2% to 8.5% would be expected to be higher than Aqua's cost of equity.

Q. ON PAGE 17 OF HIS REBUTTAL TESTIMONY, MR. MOUL CLAIMS THAT YOU MAKE INCONSISTENT CLAIMS REGARDING THE USE OF ANALYST FORECASTS, HISTORICAL DATA, AND FORWARD-LOOKING MARKET DATA. PLEASE RESPOND.

A. Below I respond to the following 6 claims made my Mr. Moul:

1. On page 17, lines 1-3 of Mr. Moul's rebuttal testimony, he claims that my recommendation that the return on equity (ROE) should be "market-based" and "forward-looking" contradicts my criticisms of using forecasts.

My response: Mr. Moul misconstrues my testimony. The main point I make throughout my direct testimony, is that there is a difference between expert forecasts (e.g., analyst 5-year EPS growth rate forecasts) and investors' expectations (e.g., option-implied growth). Expert forecasts are based on the opinions of a relatively small group of people and publications. On the other hand, investor expectations are based on the market behavior of millions of people around the world. When faced with the choice between these two, investors' expectations should be given priority over expert forecasts because they are based on more extensive data and, after all, investors are the ones providing the capital to utility companies.

2. On page 17, lines 4-12 of Mr. Moul's rebuttal testimony, he states that I use historical data despite simultaneously claiming that I use primarily forward-looking market data.

My response: I do use historical data, as does every rate of return witness that I know of; however, it is preferable to measure a utility's cost of equity (COE) by measuring investors' expectations directly using current capital market data (e.g., stock prices, stock option prices). My COE calculations also incorporated historical data, which is something that all rate of return witnesses/financial modelers have to do to some degree, including me, because of the inevitable limitations of capital market data.

3. On page 17, lines 13-17 of Mr. Moul's rebuttal testimony, he implies that my stated preference for forward-looking data contradicts my conclusion that using analyst's forecasts would be speculative. Additionally, he implies that I am contradicting myself by claiming that my market-based method is forward-looking on the one hand, and on the other hand I believe capital markets are unpredictable.

My response: As discussed in response to claim 1 above, my forward-looking market-based COE is based on investors' expectations. Measuring investor expectations directly using capital market data, such as stock options, is different from using analyst forecasts. To what degree investors are influenced by analyst forecasts is difficult to determine and likely continually changes. After all, not all analyst forecasts are the same. I would also note that Mr. Moul did not present

evidence regarding to what extent investors do, in fact, rely exclusively on analyst forecasts, as he claims. Leaving aside the appropriateness of using analyst forecasts in cost of equity calculations, calculating the cost of equity should be an interpretive approach (e.g., using market data to measure investors' expectations as Mr. Moul did in some parts of his testimony) rather than a speculative one (e.g., trying to predict what the market will do in the future better than other investors to make a profit as a trader would do). Also, investors have forward-looking expectations that we can investigate despite the unpredictable nature of capital markets. There is nothing inconsistent or contradictory in my statements.

4. On page 17, lines 18-19 of Mr. Moul's rebuttal testimony, he claims that I contradict myself by relying on historical data in my DCF model, yet I criticize his use of historical data.

My response: Please see my response to Mr. Moul's claim 2 above.

5. On page 17, lines 20-23 of Mr. Moul's rebuttal testimony, he claims that I contradict myself by criticizing his use of non-market data when I use non-market data (*i.e.*, book value data in my analysis and historical data for my CAPM risk-free rate).

My response: First, regarding the risk-free rate components of my CAPM, Mr. Moul's claim that I use historical data is misleading. As explained on page 64, lines 19-21 of my direct testimony, I use both the spot market yields of U.S. treasury

bond/bills as of June 30, 2024, and a weighted average over the 3-month ending on that date. The spot data that I use, by any standard, is not historical. I also use 3 month "historical" averages because the value of a particular input on a specific day can lead to COE results that can vary over short periods of time. Therefore, using data over a recent period, such as 3 months, is a process of smoothing capital market data, which is often turbulent. I also use historical book value returns in my DCF analysis for "smoothing" purposes to make sure current future expected returns on book equity are sustainable.

6. On page 17, lines 24-25 and page 18, lines 1-2 of Mr. Moul's rebuttal testimony, he claims that I use analyst forecasts despite criticizing him for using them.

My response: Please see my response to claim 1 above.

II. APPLICATION OF CONSTANT GROWTH DCF

Q. PLEASE SUMMARIZE MR. MOUL'S CRITICISM OF YOUR APPLICATION OF THE DCF METHOD.

A. Mr. Moul makes the following criticisms of my constant growth DCF method:

1. My constant growth DCF model produces unreliable results;
2. Growth rate component should be based on analyst Earnings Per Share (EPS) growth rates;
3. My approach is inferior to his because it relies on non-market-based data.

Q. MR. MOUL CLAIMS THE RESULTS OF YOUR CONSTANT GROWTH DCF MODEL ARE NOT REASONABLE. DO YOU AGREE?

A. No. Mr. Moul claims that the results of my Constant Growth DCF Model are not reasonable because, among reasons, they are not higher than the cost of debt by a reasonable margin.[2] He does not explain how much higher the cost of equity should be than the cost of debt or what metrics his criticism is based on. The cost of equity expectations of major financial institutions indicate that the margin between my 8.70% cost of equity recommendation and the cost of debt is reasonable.

My 8.70% cost of equity recommendation is 413 basis points[3] higher than the market yield on the 30-year U.S. Treasury bond. The margin between my 8.70% recommendation and the cost of debt (e.g., market yield on U.S. Treasury bonds) is considerably higher than the cost of equity recommendations of major financial institutions and published research, including publications relied on extensively by Mr. Moul. He uses data from the SBBI Yearbook (owned by Kroll) to determine the appropriate equity risk premium for public utilities starting on page 41 of his direct testimony. As shown on page 19, Table 4 of my direct testimony, Kroll determined the cost of equity for the overall market is 8.5%, which is 399 basis points higher than the market yield on the 30-year U.S. Treasury bond. However, as explained on page 19 of my direct testimony, Kroll's 8.5% cost of equity is for the overall stock market (e.g., US Large Cap, S&P 500),[4] which should be higher than the return expectations for buying utility stocks because regulated monopoly

[2] Mr. Moul's rebuttal testimony, page 2, line 15-19.
[3] 8.70% - 4.51% (yield on 30-year U.S. Treasury bond as of February 29, 2024).
[4] The S&P 500 is a stock market index that includes 500 of the largest U.S. companies, including 11 sectors to show the health of the U.S. stock market and broader economy. The Dow Jones Industrial Average, 30 of the largest U.S. companies, is another commonly used measure of equity markets in general.

utilities are lower risk than most, if not all, unregulated companies in the S&P 500, like Tesla and Amazon. The Value Line betas used by Mr. Moul in his CAPM analysis, prior to any leverage adjustment, support this conclusion as well, considering that the average Value Line beta for the proxy group used by Mr. Moul is 0.82, which indicates that his proxy group is, on average, less risky than the overall market.[5]

Q. STARTING ON PAGE 18, LINES 21-22 OF HIS REBUTTAL TESTIMONY, MR. MOUL CLAIMS THAT IT IS MORE APPROPRIATE TO USE EPS GROWTH RATES AS THE GROWTH COMPONENT OF A DCF MODEL THAN RETENTION GROWTH RATES. HOW DO YOU RESPOND?

A. I disagree. It does not make mathematical sense to use analyst five-year EPS growth rate forecasts without attempting to investigate what percentage of earnings companies are likely to pay out as dividends and what percentage they are likely to retain in the business (i.e., the retention rate). This is analogous to failing to reconcile the money you are taking out of your checking account with your future balance, i.e., the basic balancing of a checkbook. In neither Mr. Moul's direct nor rebuttal statements did he provide that his analysis included balancing EPS growth rates with paid-out dividends or retained earnings.

J.P. Morgan explained that its equity assumptions methodology considers five return drivers (including earnings growth and dividends). Pertinently, J.P. Morgan explained that its equity return assumptions methodology:

> ties together complex interrelationships among these factors to ensure that retained earnings and gross dilution imply a future book value that is consistent with projected return on equity and future earnings. This framework – analogous to Robert Higgins' sustainable growth rate (SGR) concept – ensures that higher shareholder payouts, for instance, would come at the expense of slower earnings growth, all else the same. Our

[5] Mr. Moul's direct testimony, page 40, line 20.

methodology uses trailing, not forward, earnings, which tend to be more stable.[6]

Thus, exclusive reliance on analysts' 5-year EPS growth rates, as Mr. Moul has done, without considering multiple factors that ensure sustainable growth, is inappropriate. As reflected in my Exhibit ALR-3, page 1, consistent with the multi-factor approach relied upon by J.P. Morgan in its 2019 Long-Term Capital Market report, I have also used a sustainable growth rate method to compute my DCF results.

Q. ON PAGE 20, LINES 12-15 AND PAGE 21, LINES 1-9 OF HIS REBUTTAL TESITMONY, MR. MOUL CLAIMS THAT YOU SHOULD HAVE DIRECTLY USED THE EARNINGS PER SHARE GROWTH RATE FORECAST OF 6.90% BY ZACKS IN YOUR DCF APPROACH. PLEASE RESPOND.

A. I strongly disagree. As discussed above, it is not appropriate to mechanically use analyst EPS growth rate forecasts in a constant growth DCF model because it does not ensure that the mathematical relationship between earnings, dividends, book value and stock price are respected. If a utility company is experiencing a short-term period of high earnings growth because they are recovering from a period of low earnings, for example, using analyst 5-year EPS growth rate forecasts in a DCF model will overstate the COE because these growth rates are not sustainable. In other words, the company's relatively high short-term growth rate will not continue indefinitely. Investors know that short-term growth rates that result from a recovery will eventually slow.

[6] J.P. Morgan contributes to the Blue Chip Economic Forecasts relied on by Mr. Moul in his rebuttal and direct testimonies.

Q. ON PAGE 20, LINES 2-4 OF HIS REBUTTAL TESTIMONY, MR. MOUL CLAIMS THAT THE COMMISSION HAS NOT PREVIOUSLY ADOPTED A RETENTION GROWTH APPROACH IN THE DCF ANALYSIS. PLEASE RESPOND.

A. If Mr. Moul is correct that the Commission has never adopted a retention growth approach, I urge the Commission to consider the evidence that I present in my direct testimony that shows that my DCF approach is a more reasonable approach than mechanically using analyst EPS growth rates as a proxy for growth, as Mr. Moul has done. Simply claiming that an approach has not previously been adopted is an insufficient basis of dispute, because under that rationale, the Commission would be constrained in establishing just and reasonable rates and only stagnant decisions would be possible. Importantly, Mr. Moul provided little discussion of the efficacy of my retention growth approach and, instead, chose to merely disagree with it, in lieu of providing data to support how the retention growth approach may not be appropriate for the Commission to consider.

Q. ON PAGE 21, LINES 6-9 OF HIS REBUTTAL TESTIMONY, MR. MOUL STATES THAT ANALYSTS' PROJECTIONS OF FUTURE GROWTH ARE THE ONLY VALID MEASURE OF GROWTH FOR DCF PURPOSES.

A. I disagree. As discussed above there are numerous mathematical issues with relying solely on analysts' projections of future growth as the growth component of a DCF model. It is unlikely that investors consider the basic mathematical relationship between dividends, retaining earnings and capital available to a company to grow future earnings. Additionally, as discussed above, J.P. Morgan understands that relying only on analysts' projections is not reasonable as they have considered retention rates as I have done. Regarding this Commission's past decisions on the DCF growth rate, my job is to provide

an independent cost of capital analysis that it can use to determine the appropriate ROE and capital structure for Aqua. It is not appropriate to confine my independent analysis to only that which Mr. Moul claims has previously been adopted, especially when Mr. Moul provides little support for his assertion which demonstrates that the models I used to support my recommendation are, in some way, unable to provide an accurate estimate of Aqua's cost of equity.

Q. ARE THERE ADDITIONAL REASONS WHY IT IS NOT APPROPRIATE TO USE ANALYST 5-YEAR EPS GROWTH RATE FORECASTS AS THE GROWTH COMPONENT IN A DCF MODEL?

A. Yes. A study conducted by McKinsey & Company in 2010 found that "analysts have been persistently over optimistic for the past 25 years with estimates ranging from 10 to 12 percent a year, compared with actual earnings growth."[7]

On average, analysts' forecasts have been almost 100 percent too high.[8] Additionally, the further a projection predicts into the future, the likelihood of the projection being correct decreases. Capital markets, on the other hand, are notably less giddy in their predictions. Except during the market bubble of 1999-2001, actual price-to-earnings ratios have been 25 percent lower than implied P/E ratios based on analyst forecasts.

To my knowledge, financial publications do not recommend using EPS growth rates to calculate the cost of equity in a DCF model. McKinsey & Company continues to advise its clients to be cautious about the reliability of analysts' forecasts. On May 16,

[7] Marc H. Goedhart, Rishi Raj and Abhishek Saxena, *Equity Analysts: Still too bullish*, Spring 2010.
[8] Ibid.

2022, McKinsey stated that "analysts' near-term forecasts are often overly optimistic and don't always correctly reflect operating performance."[9]

Even if equity analysts' forecasts were not upwardly biased, as discussed in my Direct Testimony, adding earnings per share growth forecasts to a dividend yield without considering the retention rate produces a flawed result. Using an earnings per share growth forecast as the growth component in a DCF model is like measuring how much money you will have in your bank account by simply adding up your paychecks. If you do not consider what percentage of your paycheck you will retain in your account and what percentage you will spend, your calculations will not be accurate. Mr. Moul presented little to no analysis to rebut this argument.

Q. ARE YOU SAYING THAT ANALYSTS' CONSENSUS EARNINGS PER SHARE GROWTH RATES ARE USELESS AS AN AID TO PROJECTING THE FUTURE?

A. No. Analysts' EPS growth rates are, however, very dangerous if used in a simplified DCF which does not consider factors such as dividend per-share growth and book value per share growth as it could result in unsustainable growth rates. For example, if a company has a slow earnings year followed by a strong recovery, this potentially high earnings growth rate is unlikely to be maintained in the long-term, and therefore results in an unrealistic and/or unsustainable projection. Analysts' five-year earnings-per-share growth rates forecasts are not useful if used without considering other sensitivities. However, if used as part of a holistic analysis that considers other factors, the analysts' five-year earnings-per-share growth rates forecasts can be useful in computing estimates of what

[9] David Kohn, Vartika Gupta, Tim Koller, Werner Rehm, *Do consensus estimates accurately reflect operating performance?*, May 16, 2022.

earned return on equity investors expect will be sustained in the future, and as such, are useful in developing long-term sustainable growth rates.

Q. MR. MOUL STATES ON PAGE 20, LINES 5-8 OF HIS REBUTTAL TESTIMONY THAT YOU DO NOT AND CANNOT EXPLAIN WHY AN INVESTOR EXPECTED RETURN OF 10.40% SHOULD BE REDUCED TO 7.76% OR 7.99% IN THIS CASE, PARTICULARLY SINCE RATES ARE SET ON BOOK VALUE (NET ORIGINAL COST). PLEASE RESPOND.

A. Mr. Moul is conflating accounting returns and market-based returns. The 10.40% Mr. Moul is referring to is the future expected return on book equity published by Value Line and implied by Zack's forecasts. In other words, this 10.40% is an accounting figure (based on expected return on the book value of equity), not investors' expected returns (based on expected return on the market value of equity). I provided an explanation of the difference between expected return on book equity (accounting returns) and expected return on the market price of a stock on page 106, and page 107 of my direct testimony. If Pennsylvania consumers' rates are set based on expected accounting returns instead of market returns, they will be significantly overcharged. An authorized ROE should be commensurate with the returns the investors expect to earn when investing in other enterprises having corresponding risks. This investment is made at the market price of a utility's stock, not the accounting value.[10] The average market price of the water utility stocks in my proxy group is between 2.31- and 3.59-times book value. If investors are willing to pay considerably higher than two times the book value for an expected 10.40% return on book

[10] For example, if you were to log in to your brokerage account you would not be able to purchase American States Water's stock for $19.45 (it's current book value according to Value Line). Instead, you would have to pay $87.76 (the closing price of its on August 1, 2022, according to Yahoo Finance).

value for water utilities, they are expecting to earn a return significantly less than 10.40% on market value. Therefore, it makes sense that my Constant Growth DCF indicates a cost of equity of between 7.76% and 7.99%.[11]

If Mr. Moul were correct that we should use investors' expected *accounting* returns to determine Aqua' authorized ROE, there would be no purpose in producing rate of return testimonies and conducting hearings. Using Mr. Moul's logic, setting Aqua' authorized ROE would be a mechanical exercise of looking up published accounting returns. In other words, stock prices, interest rates, and other capital market data would be irrelevant.

Q. MR. MOUL STATES ON PAGE 19, LINES 21-23 OF HIS REBUTTAL TESTIMONY THAT RETENTION GROWTH SHOULD NOT BE CONSIDERED WHEN SELECTING A DCF GROWTH RATE. PLEASE RESPOND.

A. I disagree. As discussed earlier in this testimony, it does not make mathematical sense to use analyst five-year EPS growth rate forecasts without attempting to investigate what percentage of earnings companies are likely to pay out as dividends and what percentage they are likely to retain in the business (i.e., the retention rate). Mr. Moul's use of analysts' 5-year EPS growth rate as a proxy for growth is like a money manager telling you that you will have enough money to retire in 20 years by only estimating your income for the next 5 years. In order to determine if you will have enough money to retire in 30 years you must consider how much money you are saving (retaining) and how much money you are spending (paying out as dividends). Also, you must consider if your current income is sustainable over the next 30 years, not just the next 5 years, as Mr. Moul has done in his DCF method. The growth rate component of my sustainable growth DCF method

[11] Mr. Rothschild's direct testimony, Exhibit ALR-3, page 1.

appropriately accounts for the retention rate, which makes mathematical/logical sense because it recognizes the mathematical interrelationship between book value, dividends, and earnings. However, the validity of my DCF method does not hinge on investors and or utility executives being logical about calculating growth rates. For example, if investors expected utility executives to persistently waste retained earnings on unprofitable projects, we would see a discrepancy between the results of DCF model and the results of other COE models that are not being distorted by the effects of wasted retained earnings. The results of my sustainable growth DCF model are between 8.06% and 8.09%, which is within the range of my CAPMs', a method that is not impacted by my DCF growth rate, results of between 7.50% and 8.22%.[12]

Q. PLEASE EXPLAIN WHY A MARKET TO BOOK RATIO OF BETWEEN 2.31 AND 2.59 INDICATES THAT THE COST OF EQUITY FOR WATER UTILITY COMPANIES IS LOWER THAN THE EXPECTED RETURN ON BOOK EQUITY.

A. Calculating the cost of equity (investors' equity return expectations) is more complicated than calculating the return on a rental property, but the same concept applies regarding the relationship between market returns and book returns. If an investor purchases an apartment for $100,000 and expects to receive $500 per month ($500 X 12 = $6,000 per year) in rent, he or she will expect an annual return of 6% ($6,000/$100,000) on their investment. When the investor purchases the apartment, he would record the book value as $100,000 and the market value as $100,000 unless he determined that the purchase price was higher or lower than the market value. If the value of the apartment increases to $250,000, for example, the market to book ratio would increase to 2.5, and therefore, his

[12] Exhibit ALR-2.

return on book value would remain at about 6% while his return on the market value of the apartment would decrease to about 2.4%.

In this rental property example, an increasing market value results in a lower expected return on market (2.0%) compared to expected return on book (6%) if the rent price remains constant. Rent prices do not increase to maintain an expected 6% return on book value; they are set by what the rental market reasonably can bear. The same is true of utility stocks. You do not establish an ROE based on a constant return on book (accounting) returns, it is set based on what investors in the market expect that market to return. In the case of a utility stock, an increasing market value results in a lower return on market for the same expected return on book. As this rental property example demonstrates, there is nothing inconsistent about investors expecting a lower return on the market price of an investment than on the book value of an investment. In fact, with market to book ratios of water utility companies significantly above one it would be surprising if investors expected a return on market equal, or anywhere close, to return on book.

Q. ON PAGE 21, LINES 10-24 AND PAGE 22, LINES 1-8 OF HIS REBUTTAL TESTIMONY, MR. MOUL CLAIMS THAT YOU ARE MISTAKEN THAT MARKET-TO-BOOK RATIOS ABOVE 1 INDICATES THAT THE COE FOR WATER UTILITY COMPANIES IS LOWER THAN THE EXPECTED RETURN ON BOOK EQUITY. PLEASE RESPOND.

A. I strongly disagree. Mr. Moul tries to demonstrate that my position on the relationship between market-to-book ratios, authorized ROEs, and the market-based COE is false by pointing to historical data. He claims that if investors expected to receive a lower market return than book return then utility stock prices would have reverted to their book value

over time. I would agree with Mr. Moul that the market-to-book ratios of water utility stocks have not reverted to their book value. However, the fact that market-to-book ratios for utility companies have remained above 1 persistently for many decades indicates that authorized ROEs for water utility companies have been higher than their market-based COE and therefore, consumers have been overpaying for a long time. The average market to book ratios of the 5 companies in the RFC Water Proxy group is about is about 2.5.[13] Please see Appendix A of my direct testimony regarding why market-to-book ratios for water utility companies indicates that their COE is lower than their authorized ROEs.

Q. MR. MOUL CLAIMS ON PAGE 12, LINES 1-7 OF HIS REBUTTAL TESTIMONY THAT THE CAPM AND RISK PREMIUM (RP) METHODS ARE MORE RESPONSIVE TO INFLATION THAN THE DCF MODEL. PLEASE RESPOND.

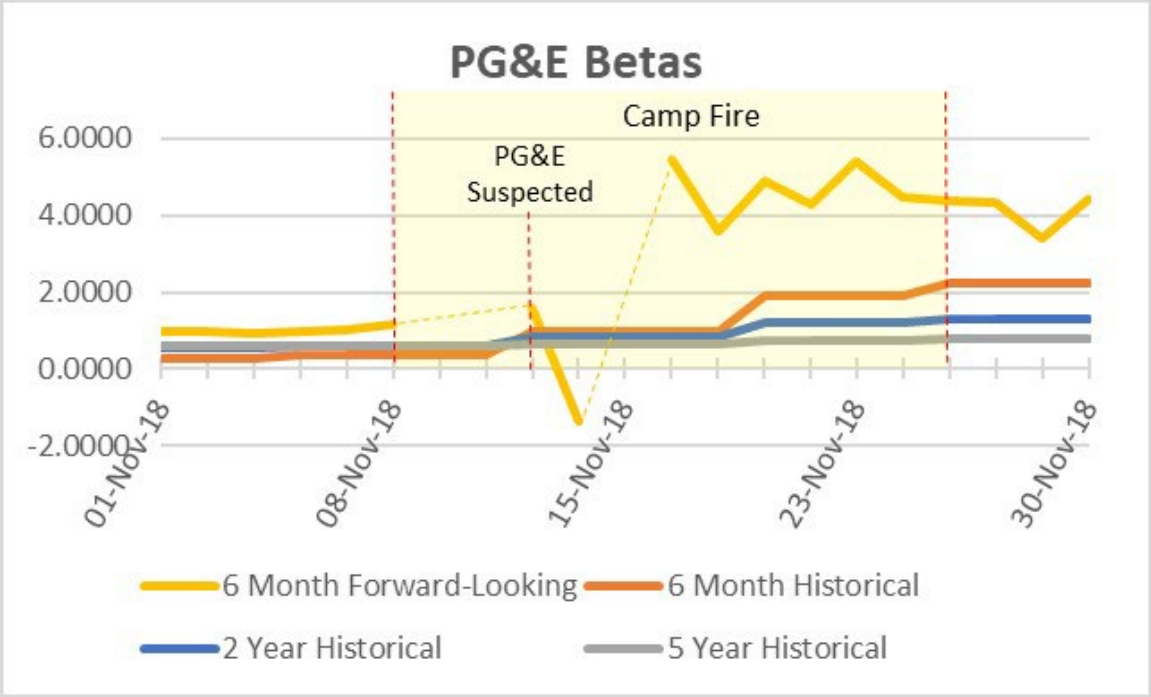
A. I believe that all three of these cost of equity models (DCF, CAPM, RP) can take time to react to changes in bond yields and capital markets in general if the analyst uses only historical data and/or analyst forecasts. Analyst forecasts, even if they reflect investors' expectations, can take time to change if for no other reason than many publications do not publish their projections every day. For example, Value Line publishes their company reports every 3 months. A COE model that uses only historical data can take time to adjust because it takes time for changes in bond yields to impact model inputs, such as 5-year historical betas used in the CAPM, because the influence of the most recent capital market data on these betas will be overwhelmed by the influence of the hundreds of thousands of capital market data points that stretch back many years. In summary, I do not believe that

[13] Exhibit ALR-3, page 1. The market to book ratio for the year ending 6/30/2024 and as of 6/30/2024 is 2.59 and 2.31 respectively.

the DCF model is any more or less able to reflect changes in capital market conditions compared to the CAPM and Risk Premium analyses. It depends on the way the model is implemented. I use stock option prices in my CAPM and DCF methodologies, so they are better able to measure changes in the cost of equity. Although I do not use a risk premium method myself, I would also say that there are appropriate ways to implement such a methodology and inappropriate ways.

Q. CAN YOU GIVE AN EXAMPLE THAT DEMONSTRATES YOUR COE METHODS THAT USE STOCK OPTION PRICES CAN MEASURE WHEN INVESTORS'S EXPECTATIONS CHANGE?

A. Yes. As shown in the chart below, shortly after investors started to understand that PG&E was exposed to potential wildfire liabilities as a result of the 2018 forecast fire referred to as the Camp Fire, option-implied betas immediately reflected investors' changing expectations and PG&E's higher cost of equity. After initially falling negative for a day during the initial market turmoil caused by the fire, option-implied betas jumped up from near 1.0 to mostly over 4.0. On the other hand, 5-year historical betas hardly reacted.



This chart shows that my COE models are able to measure when the cost of equity changes, whether it is because of changing bond yields or potential wildfire liabilities. On the other hand, Mr. Moul's CAPM, which is based on 5-year historical betas can take months or even years to adjust to capital market changes.

Q. ON PAGE 5 OF HIS REBUTTAL TESTIMONY MR. MOUL CLAIMS THAT THE COMMISSION SHOULD CONSIDER THE HIGH LEVEL OF CAPITAL COSTS WHEN DECIDING THE RETURN ON EQUITY IN THIS CASE. PLEASE RESPOND.

A. I agree that the Commission should consider the level of capital borrowing costs in this proceeding. However, it is important to recognize that a 1% increase in interest rates/cost of debt does not necessarily mean that the cost of equity will also increase by 1%. In fact, capital market data shows that the cost of equity for most water utility companies declined in 2023 as interest rates increased. As shown on page 131 of my direct testimony, the

CAPM indicated cost of equity for water utility companies peaked at 9.65% in November 2022 and has fallen to under 8% as of June 2024. Over that period, the yield on the 30-year U.S. Treasury bond has increased from about 4.25% to 4.5%[14] which demonstrates that the cost of equity and interest rates do not always move in the same direction, as Mr. Moul implies.

III. CAPM ANALYSIS

Q. PLEASE SUMMARIZE MR. MOUL'S CRITICISMS OF YOUR CAPM METHODOLOGY.

A. Regarding my CAPM results (7.06% - 8.03%), Mr. Moul states "[by] any reasonable standard, such low returns are simply not credible."[15] The only evidence he provides for this conclusion is by referring to the results of his and Mr. Keller's CAPM, of 10.48% and 11.05% respectively.[16]

Mr. Moul spends considerable time claiming that my CAPM is not reliable because it is "unconventional."[17] He criticizes many of the specific components of my CAPM, including using stock options to calculate forward betas.

[14] See Chart 1 on page 24 of my direct testimony. This chart shows that the yield on the 30-year U.S. Treasury Bond was about 4.25% in November 2022 and about 4.5% by June 2024. As of mid-September 2024, the yield on the 30-year U.S. Treasury bond has fallen to about 4%, but Aqua's cost of equity may or may not have fallen by as much as 50 basis points since I calculated Aqua's cost of equity for my direct testimony.
[15] Mr. Moul's rebuttal testimony, page 34, line 14-15.
[16] Mr. Moul's Rebuttal Testimony, Page 35, lines 13-16.
[17] Mr. Moul's Rebuttal Testimony, Page 35, lines 4-16.

Q. WHAT IS YOUR GENERAL RESPONSE TO MR. MOUL'S CRTICISMS OF YOUR CAPM METHODOLOGY?

A. Throughout his testimony, Mr. Moul changes his criteria for determining the appropriate ROE for Aqua, continues to use COE models that have been proven to be flawed, and criticizes my approach in ways that are illogical and inconsistent with the facts. As stated on page 16, lines 4-10 of my direct testimony, on April 9, 2020, the South Carolina Public Service Commission stated the following regarding my CAPM methodology:

> Amongst the three witnesses, Consumer Affairs Rothschild's approach was unique in that he included the use of both historical and forward-looking, market-based data in his analysis. Based on the testimony and facts presented, the Commission therefore adopts the recommended ROE of 7.46% proposed by witness Rothschild.

In a 2024 decision, California Commissioner John Reynolds found merit in my analysis and used my cost of equity methodology, including the CAPM and DCF methods I use in this proceeding, to determine the authorized ROEs for California's ten Independent Small Telephone Companies (ILECs).[18] Mr. Moul ignores these decisions in an attempt to discredit my CAPM models instead of providing analysis which would suggest that they are somehow inadequate or inaccurate.

Mr. Moul claims that my CAPM should not be relied upon because it is "unconventional" among other reasons.[19] According to Mr. Moul, the Commission should only rely on common models that he claims are used by Rate of Return witnesses and investors, despite their obvious flaws (e.g., Value Line's 5-year historical betas that vary based on arbitrary data choice). On the other hand, I have been testing models for years

[18] Alternative Proposed Decision of, p.19, California Public Utility Commissioner John Reynolds of California, Application No. 22-09-003 (August 5, 2024).
[19] Mr. Moul's Rebuttal Testimony, Page 35, lines 22-25

and continually eliminate the ones that prove to be flawed. My work to continually improve the accuracy of COE models led to the development of my CAPM methodology, which includes measuring investors' expectations directly using stock option prices. My improved methods have been empirically tested using capital market data, applied for many years, and as stated above, have been adopted in previous cases. Continuous improvement of COE models is required to ensure that regulated utility companies have access to the capital they need while also protecting consumers.

Mr. Moul's criticisms of my CAPM are based on his disagreement with the manner in which I have applied the CAPM model to better conform to contemporary scholarship and changing investor expectations. This is at the expense of not adjusting to changing capital market conditions, including the massive, expanded use of stock options by investors[20] and the continuing results of research focusing on improving statistical techniques to best measure complex systems with power law distributions, including stock markets.

The Federal Energy Regulatory Commission (FERC) has recognized that it is important to evaluate and revise COE models. FERC concluded that it may not be appropriate to use Value Line betas in a CAPM analysis because the beta component should be based on the same exchange as the risk premium component of the model. Value Line is based on the New York Stock exchange.[21] According to FERC's application of the CAPM, Mr. Moul's model is not appropriate because it is not based on the S&P 500.

[20] https://www.investors.com/research/options/options-trading-today-after-50-years-of-growth/
[21] 174 FERC ¶ 63,024 UNITED STATES OF AMERICA FEDERAL ENERGY REGULATORY COMMISSION, Docket Nos EL17-41-001 at 196

Q. ON PAGE 35, LINES 4-5, OF HIS REBUTTAL TESTIMONY MR. MOUL SAYS THAT HE DOES NOT KNOW OF ANY OTHER WITNESS IN PUBLIC UTILITY RATE CASES THAT USES 'HISTORICAL BLENDED' BETAS AND YOU HAVE NOT SHOWN, NOR COULD SHOW, THAT INVESTORS USE YOUR BETAS. PLEASE RESPOND.

A. As discussed below, it is not possible to determine what models investors use. It is also not possible to determine what data they use. If it were, perhaps Mr. Moul would have provided some evidence to support his claims regarding the models or data relied upon by investors; however, he did not. Therefore, I must evaluate and decide on the appropriate models and data to use based on their merits. Starting on page 66 of my direct testimony I explain why I use a historical blended beta in my CAPM analysis that includes periods of 6 months, 2 years, and 5 years, as opposed to relying exclusively on the 5-year period used by Value Line. Using shorter periods for the return regression analysis portion of the historical beta calculation allows me to see if the correlation between the returns of each of the companies in my RFC Water Proxy Group and those of the S&P 500 Index has changed in the last 2 years or 6 months. Using a 5-year period exclusively tends to make recent changes in the correlation more difficult to identify because of the weight of 5 years of data in comparison to the weight of 2 years' or six months' worth.

Financial markets are constantly in flux due to the influence of countless factors. So-called "market dislocations," are just some of the numerous factors that are constantly affecting markets. To attempt to separate any one specific factor from "real" underlying market dynamics would be an exercise in futility.

Furthermore, predicting the duration and impact of any single influencing factor on financial markets is extremely challenging, if not impossible. In 2008, when interest rates

plummeted to unprecedented lows, numerous analysts deemed this a temporary anomaly. Contrary to these expectations, rates not only persisted at these low levels for more than ten years but dropped even further in response to the unforeseen COVID-19 pandemic, which significantly affected the global economy and financial markets.

The use of historical blended betas, including 6-month historical betas, is logical because historical blended betas can better measure recent and current market dynamics than just using the 5-year historical betas used exclusively by Mr. Moul. Yet, Mr. Moul provided little evidence to support why the betas he used are more accurate and little analysis to demonstrate why using a historical blended beta would produce an anomalous result. I believe my historical blended betas in conjunction with forward-looking, option-implied betas are logical and appropriate.

Q. ON PAGE 34, LINES 17-21, MR. MOUL CLAIMS THAT YOU USE DATA THAT IS NOT AVAILABLE TO INVESTORS. PLEASE RESPOND.

A. This is simply false. The data I have used is available to any investor that has access to the internet. This means the data I use is more widely available than the data Mr. Moul has used. The betas used by Mr. Moul (Value Line's published 5-year historical betas)[22] are based on the past and therefore it is unlikely they measure current investors' expectations regarding utility betas in particular, and risk and return in general. It is inappropriate to use backward looking measures when data regarding current investor expectations is

[22] Notably, Mr. Moul also applies a leverage adjustment to his betas using the Hamada formula which artificially inflates the Value Line betas Mr. Moul initially considered. Aqua St. 7 at 41. In other words, the betas relied upon by Mr. Moul in his CAPM analysis are not directly from Value Line and Mr. Moul has not shown that investors use his modified betas instead of Value Line's published betas. It is unclear why Mr. Moul believes the option-implied and historical blend betas I used in my CAPM analysis are not credible while the betas he relies upon are deficient under his own criteria.

available. The purpose of this proceeding is to determine the current, market-based cost of equity. Relying exclusively on historical betas, as Mr. Moul has done, is inconsistent with the purpose of this proceeding because, among other reasons, research discussed below shows that CAPM results based on historical betas are not consistent with CAPM theory. In other words, Mr. Moul is criticizing me for not implementing the CAPM in a way that has been falsified.

Q. MR. MOUL CLAIMS THAT IT IS UNUSUAL FOR A RATE OF RETURN WITNESS TO CONSIDER THE YIELD ON THE 3-MONTH TREASURY BILL AS A PROXY FOR THE RISK FREE RATE COMPONENT OF A CAPM ANALYSIS IN RATE CASES. PLEASE RESPOND.

A. I would agree that most rate of return witnesses use the yields on long-term bonds (e.g., 30-year U.S. Treasuries) as a proxy for the risk-free rate, as I do. However, just because this is the practice used by most rate of return witnesses does not mean it is appropriate. Decisions made by rate of return witnesses should be based on the merits of the analytical approach used and should consider recent developments within the field. The problem with using the yield on long-term U.S. Treasury bonds as a proxy for a risk-free rate is that they are not risk free due to opportunity cost. On the other hand, short-term U.S. Treasury bonds are basically risk free. For example, the yield on 3-month U.S. Treasury bills increased from 0.08% to 4.53% between January 3, 2022, and January 3, 2023. The owner of a 3-month U.S. Treasury bill with a $1 million face value would have lost only $11,000 if this change in yield happened on a single day. In comparison, the value for a zero coupon 30-year U.S. Treasury bond would have fallen by over $700,000. Clearly 30-year U.S. Treasury bonds are not risk free and 3-month U.S. Treasury bills are nearly risk free.

Silicon Valley Bank's collapse in 2023 was possible because of billions of dollars of losses associated with their holding of "risk free" long-term U.S. Treasury bonds that lost their value as interest rates increased.

Q. PLEASE RESPOND TO MR. MOUL'S CLAIM THAT YOUR METHOD IS UNUSUAL AND NON-STANDARD.

A. As explained in my direct testimony, my CAPM is based on methodologies used by Value Line, the Chicago Board of Options Exchange (CBOE), and published in peer-reviewed academic journals (e.g., The Review of Financial Studies). Additionally, it is far from unusual to use stock options to measure investor expectations. For example, the Federal Reserve Bank of Minneapolis uses stock options to measure implied probability distributions on the S&P 500. The Federal Reserve Bank of Atlanta uses options and futures contracts to measure investors' expectations regarding the federal funds rate.

There are thousands of papers published every year regarding the use of stock options. Google scholar reports over 12,000 papers were published in 2023 alone which related to the following search term: "using stock options to measure investors' expectations regarding stock returns."[23] Additionally, Microsoft recently released an analytical tool called Projection that shows the expected change in equity prices based on stock option prices. Regarding Projection, Microsoft states the following:

> Projection democratizes advanced methods for visualizing the sentiment of options market participants that were formerly restricted to academics and institutional investors and makes them free for anyone to use. This type of tool is commonly used by professionals to:
>
> - Assess the market implied risk involved in owning an asset

[23] https://scholar.google.com/scholar?hl=en&as_sdt=0%2C7&as_ylo=2023&q=using+stock+options+to+measure+investors%27+expectations+regarding+stock+returns&btnG=

- Estimate the market implied range of possible outcomes for an asset's future performance.

- Compare against other sources of market opinion, such as Wall Street analysts' ratings.[24]

Q. PLEASE RESPOND TO MR. MOUL'S CLAIM ON PAGE 34, LINES 13-15 OF HIS REBUTTAL TESTIMONY THAT YOUR CAPM RESULTS ARE NOT CREDIBLE BY ANY REASONBLE STANDARD.

A. My CAPM results (7.06% - 8.03%) are in the middle to upper part of the range of the expectations published by major banks and brokerage houses (6.20% to 8.5%). These equity return expectations are for the overall stock market (e.g., US Large Cap, S&P 500), which should be higher than the return expectations for buying utility stocks because regulated monopoly utilities are lower risk than most, if not all, unregulated companies in the S&P 500, like Tesla and Amazon. Mr. Moul's conclusion is merely results-based analysis and is unsupported by any data in this proceeding.

Q. ON PAGE 34 LINE 15-16 OF HIS REBUTTAL TESTIMONY, MR. MOUL CLAIMS THAT ALL OF YOUR CAPM RESULTS ARE BELOW YOUR DCF RETURN. PLEASE RESPOND.

A. This is false. As show on Table 2, page 11, of my direct testimony, two of my CAPM results are above my sustainable growth DCF results.

[24] https://www.msn.com/en-us/money/chart?id=a1nwgh&timeFrame=Max&chartType=line&projection=true

Q. ON PAGE 34 AND 35 OF HIS REBUTTAL TESTIMONY, MR. MOUL CLAIMS THAT YOU SHOULD HAVE USED BETAS THAT ARE WIDELY USED BY INVESTORS INSTEAD OF CALCULATING YOUR OWN "PHANTOM" BETAS. PLEASE RESPOND.

A. Implementing a COE model, including the CAPM, does not require an analyst to know what model(s) or beta coefficients investors use. Some investors buy stocks because of a friend's recommendation, a comment made on cable news or a late-night tweet. The number of models used by investors is unknowable and arguably as numerous as individual investors and constantly changing over time. Mr. Moul's claim that a CAPM methodology should be implemented mechanically with Value Line's published 5-year historical betas because "it is well known" that investors use Value Line betas ignores the complexity of how billions of human beings make decisions. There is a distinction that Mr. Moul ignores between Value Line's approach to calculate betas and Value Line's published betas. Simply because a beta is published by Value Line does not mean that investors use, or are even aware of, the ever-changing Value Line beta. Additionally, Value Line publishes many different betas for the same company, not just the 5-year historical betas used by Mr. Moul. Regardless of what models investors use, or how they make their investment decisions, their return expectations, and the appropriate cost of equity for Aqua, are represented in the prices investors are willing to pay for stocks, bonds, and options. Further, the data which I use to formulate my historical blended and option-implied betas is available to investors, who could – and often do – similarly use that data to weigh how risky a particular investment is in comparison to the overall market. Mr. Moul does not show that investors cannot or do not use the data underlying the betas I employed in my

CAPM analyses, nor does he draw a line in the sand to show at what point market data no longer becomes credible in a proceeding such as this. Instead, he merely points to the results and deems it not credible with little underlying explanation or analysis. As such, Mr. Moul's criticisms are without merit.

Q. PLEASE RESPOND TO MR. MOUL'S CLAIM THAT IT IS "WELL KNOWN" THAT INVESTORS RELY ON VALUE LINE DATA AND I SHOULD HAVE USED VALUE LINE BETAS IN MY CAPM.

A. Mr. Moul provides no source of his assertion that it is well known that investors rely on Value Line data to measure the cost of equity. In my experience, this is not the case and I am highly skeptical of the assertion that the average investor uses Value Line betas to determine the cost of equity or determine what stock to purchase. Notably, Value Line's publications are only accessible through a subscription and, therefore, are inherently limited in the number of investors that can be said to rely on them.

Q. ARE YOU AWARE OF RESEARCH THAT PUTS INTO QUESTION THE USEFULNESS OF VALUE LINE'S PROJECTIONS?

A. Yes. A research report published by the Journal of Banking & Finance found that "Value Line's long-term stock return projects are extremely overoptimistic and have no predictive power…"[25] The results of this report provide additional evidence that investors are unlikely to blindly rely on Value Line's data as Mr. Moul suggests.

[25] Andrew C. Szakmary, C. Mitchell Conover & Carol Lancaster. An examination of Value Line's long-term projections. Journal of Banking & Finance, August 2007.

IV. LEVERAGE ADJUSTMENT

A. DO YOU HAVE ANY ADDITIONAL COMMENTS REGARDING MR. MOUL'S LEVERAGE ADJUSTMENT?

A. No. As stated on pages 88 and 89 of my Direct Testimony, Mr. Moul's leverage adjustment goes against original cost rate making and should be rejected. Further, the Commission has denied Mr. Moul's leverage adjustment in past cases, including Aqua's most recent rate case.[26] I think it is also important to acknowledge that Mr. Moul has, seemingly as a course of business, consistently recommended leverage adjustments for every Pennsylvania public utility company for which he has served as an expert witness since 2018. I am including Mr. Moul's responses to OCA's discovery as Exhibit ALR-1-SR, and they demonstrate that in the 21 cases that Mr. Moul has identified, he has recommended a leverage adjustment in every single one of them.

Q. STARTING ON PAGE 26 OF MR. MOUL'S REBUTTAL TESTIMONY HE CONTINUES TO DEFEND HIS LEVERAGE ADJUSTMENT BY CLAIMING THAT FOR DCF RESULTS TO BE RELEVANT IN THE RATE-SETTING CONTEXT, THE MARKET-DERIVED COST RATE CANNOT BE USED WITHOUT MODIFICATION. PLEASE RESPOND.

A. As stated in my direct testimony, I do not agree with Mr. Moul's use of a leverage adjustment. Mr. Moul explains that the "the leverage adjustment is necessary to make the market-derived DCF results applicable in the rate-setting [context]."[27] Investors understand that authorized ROEs are applied to book value and almost certainly take this

[26] Docket No. R-2021-3027385, Opinion and Order, Page 166.
[27] Mr. Moul's Rebuttal Testimony, Page 34, lines 2-4.

into account when making investment decisions. Additionally, as explained in Appendix A of my direct testimony, market-to-book ratio ratios above one indicate that the cost of equity for water utility companies is lower than the expected return on book equity. The way Mr. Moul's leverage adjustment works, the higher the market-to-book ratio is, the greater the adjustment. Therefore, the more authorized ROEs become out of line with actual market-based costs of equity, the higher the leverage adjustment. In does not make sense to charge consumers more because they are already overpaying.

V. SMALL SIZE EFFECT

Q. ON PAGE 36, LINES 9-10 OF HIS REBUTTAL TESTIOMNY, MR. MOUL STATES THAT THE SBBI/MORNINGSTAR YEARBOOK CLEARLY DEMONSTRATES THAT THE SIMPLE CAPM DOES NOT REFLECT THE RETURN THAT IS ASSOCIATED WITH SMALL SIZE. PLEASE RESPOND.

A. As discussed in my direct testimony, Mr. Moul's premium adder for the relatively small size of Aqua is unjustifiable. First, with a requested rate base of over $ 4 billion[28], Aqua is not a small company by any standard. Nevertheless, a proper analysis of the data from Ibbotson SBBI/Morningstar shows that size is a diversifiable risk and therefore does not impact the cost of equity. Professor Aswath Damodaran said the following regarding the supposed "small cap premium": "Even if you believe that small cap companies are more exposed to market risk than large cap ones, this is an extremely sloppy and lazy way of

[28] Mr. William C. Packer's Direct Testimony, Schedule A-3, Mr. William C. Packer's Direct Testimony, Schedule E-1

dealing with that risk, since risk ultimately has to come from something fundamental (and size is not a fundamental factor)."[29]

Additionally, a 2018 study conducted by scholars at AQR Capital Management and Yale University found that "the size effect diminished shortly after its discovery and publication."[30] The authors of this research found that data errors plagued the early studies regarding the relationship between firm size and return. They found that the data in the earlier studies did not include delisted companies and since smaller firms are delisted more often than larger stocks, the biased data (referred as a "delisting bias") made the returns of smaller stocks look higher than reality.[31]

Mr. Moul's CAPM is inflated because he takes additional steps to increase his results for a so-called small firm effect that has been put into serious question by recent research. Therefore, his CAPM overstates Aqua' cost of equity because the risk premium potion of this method is impacted by these exaggerated returns.

VI. RISK PREMIUM METHOD

Q. ON PAGE 37, LINES 25-26 AND PAGE 38, LINES 1-6 OF HIS REBUTTAL TESTIMONY, MR. MOUL CLAIMS THAT YOUR RISK PREMIUM, BASED ON THE KROLL SUPPLY-SIDE RISK PREMIUM (4.39%), IS LOWER THAN THE RISK PREMIUM PORITON OF HIS MARKET RISK PREMIUM APPROACH

[29] Aswath Damodaran, Equity Risk Premiums (ERP): Determinates, Estimation and Implications – The 2014 Edition (paper updated, March 2015) page 42.
[30] Ron Alquist, Ronen Israel, and Tobias Moskowitz, Fact, Fiction, and the Size Effect, *The Journal of Portfolio Management*, Fall 2018, page 3.
[31] Ron Alquist, Ronen Israel, and Tobias Moskowitz, Fact, Fiction, and the Size Effect, *The Journal of Portfolio Management*, Fall 2018, page 5.

(6.5%) AND IS UNSUPPORTED BECAUSE IT IS NOT BASED ON ACTUAL MEASURABLE RETURNS. PLEASE RESPOND.

A. First, I do not use the Kroll supply-side equity risk premium analysis in any of my COE models as claimed by Mr. Moul. Nevertheless, I continue to believe that Kroll's equity risk premium analyses, including a resent finding that the equity risk premium is 5.5% shows that Mr. Moul's 6.5% equity risk premium portion of his Market Risk Premium Method is excessive. It should be further noted that Kroll's 4.39% and 5.50% equity risk premium calculations are in comparison to U.S. Treasury bonds, not the corporate bond yields used in Mr. Moul's analysis. Since corporate bond yields are higher than U.S. Treasury bonds, Mr. Moul's equity risk premium would be expected to be lower than those calculated by Kroll. Instead, his 6.50% is significantly higher. Therefore, the results of his own source indicate that his 11.50% COE result is excessive.

Finally, his claim that Kroll's equity risk premium analysis does not rely on "actual measurable returns" revealed by historical data is incorrect. Kroll's supply-side equity risk premium analysis is based on capital market data between 1926 and 2022.[32]

[32] Kroll 2023 SBBI Yearbook, Page 198.

VII. COMPARABALE EARNINGS APPROACH

Q. ON PAGES 38-39 OF HIS REBUTTAL TESTIMONY, MR. MOUL CONTINUES TO DEFEND HIS COMPARABLE EARINGS APPROACH BY CLAIMING THAT IT SATISFIES THE COMPARABILITY STANDARD ESTABLISHED IN THE HOPE CASE. DO YOU AGREE WITH MR. MOUL?

A. No. Mr. Moul's comparable earnings approach does not satisfy the comparability standard established in Hope Nat. Gas Co., 320 U.S. 591, 603 (1944) as he claims, because investors are not able to earn the return on book equity figures used in this method. As discussed on page 5 of my direct testimony, the legal standards set by the United State Supreme Court require that "The return to the equity owner should be commensurate with returns on investments in other enterprises having corresponding risks."[33] Investors are not able to earn the return on book equity unless the market-to-book ratios of these companies are the same. Mr. Moul has not demonstrated that the market-to-book rations of the companies that he uses in his analysis are anywhere near 1. Therefore, I continue to support my recommendation that the results of Mr. Moul's Comparable Earnings Approach should be disregarded.

VIII. MANAGEMENT PERFORMANCE RECOGNITION

Q. DID MR. MOUL PROVIDE ANY ADDITIONAL EVIDENCE IN HIS REBUTTAL TESTIMONY THAT LEADS YOU TO CHANGE YOUR RECOMMENDATION

[33] Fed. Power Comm'n v. Hope Nat. Gas Co., 320 U.S. 591, 603 (1944).

THAT AQUA' ROE SHOULD NOT RECEIVE AN ADDER FOR MANAGEMENT PERFORMANCE?

A. No. As stated on page 96 of my direct testimony, if the Commission decides to authorize Aqua an ROE that is higher than Aqua' market-based COE for its claimed superior management performance, I strongly encourage the Commission use my ROE recommendation of 8.70% (8.03% - 9.38%) without any adjustment for management performance. In addition to the reasons that I identified in my direct testimony, and which other OCA witnesses have indicated in their testimonies, it is also important to note that Mr. Moul consistently recommends adjustments for management performance seemingly as a course of business, noting that since 2018, he recommended management performance adders for 18 of the 21 Pennsylvania public utility cases in which he provided expert testimony. Exhibit ALR-1-SR. Thus, Mr. Moul's recommendation should be considered in the context of how frequently he recommends it.

IX. CAPITAL STRUCTURE

Q. ON PAGE 3, LINES 15-17 OF HIS REBUTTAL TESIMONY, MR. MOUL CLAIMS THAT YOUR RECOMMENDED CAPITAL STRUCTURE IS FACTUALLY WRONG AND CONTRARY TO LONG-STANDING COMMISSION PRACTICE AND PRECEDENT. PLEASE RESPOND.

A. I disagree with Mr. Moul that my capital structure recommendation is contrary to Commission practice and precedent. On page 7, lines 2-3 of his rebuttal testimony, Mr. Moul explains that "The Company's actual capital structure ratios are entirely reasonable and acceptable." I don't disagree that the Commission should authorize a reasonable

capital structure, but the problem in this case is that Aqua's capital structure, as proposed by Mr. Moul, is unreasonable and unfairly prejudices ratepayers. In fact, in her Statement issued regarding the recent Commission Order in the Peoples' Natural Gas rate case, a case in which I provided testimony on behalf of the OCA, Vice Chair Kimberly Barrow agreed with my recommendation that Peoples should receive a capital structure of 50% debt and 50% equity.[34] Vice Chair Barrow stated not only did my proposal comport with Commission precedent, but also that the Commission views capital structures to be more reasonable as they approach 50% debt and 50% equity.

Further, as shown on Exhibit ALR-5 and page 5 of my direct testimony, the average common equity ratio used by the 6 companies in my proxy group is 50.53%, significantly less than the 53.95% common equity ratio recommended by Mr. Moul. Mr. Moul's recommended capital structure is not reasonable because it is fundamentally inconsistent with the capital structure ratios used by water utility companies to raise capital. Therefore, I continue to recommend that Aqua' regulatory capital structure should have a common equity ratio of 50.53%.

Q. ON PAGE 3, LINE 16 OF HIS REBUTTAL TESTIMONY, MR. MOUL DESCRIBES HIS RECOMMENDED CAPITAL STRUCTURE AS AQUA'S PROJECTED ACTUAL CAPITAL STRUCTURE FOR THE FPFTY. IS MR. MOUL REFERRING TO A HYPOTHETICAL CAPITAL STRUCTURE HERE?

A. Yes. A regulated utility's use of a fully projected future test year to set its capital structure inherently means that the capital structure used by the utility is projected, or hypothetically what the capital structure will be after one year of effective rates. I see no reason based on

[34] R-2023-3044549, Statement of Vice Chair Kimberly Barrow at page 2.

the analysis presented by Mr. Moul why Aqua's projected actual capital structure is materially different from the hypothetical capital structure that I proposed for ratemaking purposes with respect to the hypothetical nature of both recommendations. Both my recommendation and that of Mr. Moul would be employed for the purposes of ratemaking, not to dictate how Aqua must set its actual capital structure. As set forth above and in my direct testimony, a hypothetical capital structure which is more in line with the average capital structure of the proxy group is more reasonable than the hypothetical capital structure proposed by Mr. Moul.

X. RESPONSE TO MR. PACKER'S REBUTTAL

Q. PLEASE SUMMARIZE THE RECOMMENDATIONS YOU MADE REGARDING AQUA'S FULL MARKET VALUE ("FMV") ACQUISITIONS AND THEIR IMPACT ON AQUA'S COST OF EQUITY.

A. The Commission should consider how FMV acquisitions impact Aqua's cost of equity and specifically find that Aqua's growth by acquisition strategy using the tools of FMV result in lower overall risk for investment in Aqua and, therefore, Aqua should be awarded a cost of equity towards the lower end of what the Commission considers to be a reasonable range. This discussion is set forth fully on pages 97-100 of my direct testimony.

Q. WHAT DID MR. PACKER SAY IN RESPONSE TO YOUR RECOMMENDATION?

A. Mr. Packer, on page 22 of his rebuttal testimony, states that FMV acquisitions allow Aqua a guaranteed rate base of what it actually pays to acquire a system under the FMV system.

He concludes that there is no reason that Aqua should get a lowered return on its actual investment.

Q. DO YOU AGREE WITH MR. PACKER'S STATEMENT?

A. No. Mr. Packer's testimony overlooks the fact that, under a FMV system, there is less risk associated with a guaranteed addition to rate base of the lower of the purchase or FMV. As I stated in my direct testimony, this guarantee provides substantial benefits to Aqua and its investors by reducing the risk associated with investing in a new acquisition. Aqua's parent company, Essential Utilities, even describes the FMV enabling statute as a "competitive advantage." I have been informed by counsel that, prior to the passage of the FMV enabling statute, Aqua would not have been guaranteed its investment in acquiring a water or wastewater system and would have faced greater risks associated with recovering its return on those systems. Because reduced risk corresponds with a lower cost of equity, Aqua's cost of equity authorized in this proceeding should take into consideration the lower risk associated with acquisitions under a FMV system. Mr. Packer nor Mr. Moul provide analysis which would go against this fundamental tenet of determining an appropriate cost of equity.

Q. PLEASE SUMMARIZE THE RECOMMENDATIONS YOU MADE REGARDING HOW THE AFFORDABILITY OF AQUA'S RATES IMPACTS AQUA'S COST OF EQUITY.

A. The Commission should consider the impact of affordability of rates when establishing Aqua's cost of equity in this proceeding. Major financial institutions, such as credit rating agencies, and Essential Utilities provide that when customer rates become unaffordable, a regulated utility's ability to earn its revenue requirement diminishes, placing the utility and

its investors at greater risk. Specifically, I recommend that the Commission should determine Aqua's cost of equity to be towards the lower end of the range of reasonableness to mitigate this risk to Aqua and its investors as well as to reduce the risk to consumers of Aqua's rates being set at an unaffordable level due to a higher authorized return on equity. This discussion is set forth fully on pages 101-103 of my direct testimony.

Q. WHAT DID MR. PACKER SAY IN RESPONSE TO YOUR RECOMMENDATION?

A. Mr. Packer, on pages 22 and 23 of his rebuttal testimony, disagrees with my recommendation. He states that Aqua is entitled to a fair and reasonable rate of return and that Aqua's requested rate increase does so at a level which balances affordability and rate gradualism concerns. Mr. Packer also relies on Aqua's low-income customer assistance program to support the idea that Aqua's rates will be set at an affordable level.

Q. DO YOU AGREE WITH MR. PACKER'S STATEMENT?

A. No. While I agree that Aqua is entitled to a fair and reasonable rate of return and the purpose of my role in this proceeding is to ensure that Aqua's authorized return on equity is actually set within a reasonable range. However, I disagree that Mr. Moul's recommendations would result in a fair and reasonable rate of return because his recommendations are higher than a market-based cost of equity would indicate is reasonable. My recommendation is that when the Commission sets Aqua's ultimate authorized rate of return, within the zone of reasonableness, that affordability be taken into consideration by setting the rate of return within the lower end of the zone of reasonableness, not below the zone of reasonableness as Mr. Packer seems to think. My

recommended cost of equity, if accepted by the Commission, would ensure that Aqua has the capital sufficient to provide safe and reliable service to all of its customers.

Q. DO YOU TAKE A POSITION ON WHETHER AQUA'S CUSTOMER ASSISTANCE PROGRAM IS ABLE TO MITIGATE RATE IMPACT TO AQUA'S LOW-INCOME CUSTOMERS?

A. No. I am not an expert on low-income customer assistance program issues. However, my colleague, OCA witness Roger Colton, fully discusses that Aqua's customer assistance program is not sufficient to mitigate the entirety of Aqua's rate impact on low-income customers, especially those who are not enrolled in Aqua's customer assistance program.

XI. CONCLUSION

Q. PLEASE SUMMARIZE YOUR REACTION TO MR. MOUL'S REBUTTAL TESTIMONY.

A. Mr. Moul's criticisms of my Direct Testimony should be rejected. Mr. Moul consistently employed results-based analysis to attack the credibility of my recommendations. Mr. Moul did not supplement his discussion by providing facts, analysis, or data which showed that my recommendations are not credible, other than the fact that they are lower than his. In my view, an argument which is not supported by evidence should not be accepted. If adopted, my cost recommendations would allow Aqua to raise the capital it needs to provide safe and reliable service because my recommendations are consistent with investors' return expectations.

Q. DOES THIS CONCLUDE YOUR SURREBUTTAL TESTIMONY?

A. Yes.

OCA 1-17

Direct Testimony of Brian C. Andrews

Q PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A Brian C. Andrews. My business address is 16690 Swingley Ridge Road, Suite 140, Chesterfield, MO 63017.

Q WHAT IS YOUR OCCUPATION?

A I am a consultant in the field of public utility regulation and a Principal with the firm of Brubaker & Associates, Inc. ("BAI"), energy, economic and regulatory consultants.

Q PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND AND EXPERIENCE.

A This information is included in Appendix A to my testimony.

Q ON WHOSE BEHALF ARE YOU APPEARING IN THIS PROCEEDING?

A I am appearing on behalf of the Pennsylvania Office of Consumer Advocate ("OCA").

Q HAVE YOU TESTIFIED BEFORE THE PENNSYLVANIA PUBLIC UTILITY COMMISSION IN PRIOR PROCEEDINGS?

A Yes, I have previously testified before the Pennsylvania Public Utility Commission ("PUC" or "Commission") in the recent Columbia Gas of Pennsylvania rate case (R-2024-3046519, C-2024-3047905, C-2024-3047675, C-2024-3048339). Additionally, I have testified on this issue at the subject of this testimony in over 40 proceedings before the public utility commissions in Arizona, Arkansas, California, Colorado, Florida, Illinois, Indiana, Kansas, Kentucky, Louisiana, Michigan, Missouri, Montana, New Mexico, Nevada, Oklahoma, South Carolina, and Washington, DC.

Q PLEASE GIVE A BRIEF OVERVIEW OF YOUR TESTIMONY.

A My testimony addresses Aqua Pennsylvania, Inc. and Aqua Pennsylvania Wastewater, Inc.'s (collectively "Aqua PA" or "Company") proposed depreciation rates. I show that Aqua PA has greatly overstated its proposed depreciation rates and recommend adjusting the proposed depreciation rates and test year depreciation expense downward by more than $14 million combined in all five of Aqua PA's service areas' revenue requirements. The reduction is the result of using the Average Life Group ("ALG") (also known as the Broad Group) procedure rather than the Equal Life Group ("ELG") procedure.

My silence in regard to any issue should not be construed as an endorsement of or acquiescence to Aqua PA's position.

SUMMARY OF RECOMMENDATIONS

Q PLEASE SUMMARIZE YOUR CONCLUSIONS AND RECOMMENDATIONS.

A My conclusions and recommendations are as follows:

1. Aqua PA has filed a depreciation study based on plant balances for its Fully Projected Future Test Year ("FPFTY") as of December 31, 2025 using the ELG procedure. These depreciation rates would result in excessive and burdensome depreciation expense for Aqua PA's customers.

2. Aqua PA's total proposed 2025 depreciation expense of $161.1 million represents 20% of its proposed total revenue requirement.

3. Aqua PA is in an accelerated investment period that will substantially drive an increase to rate base and revenue requirement.

4. The use of the ALG procedure can be used to mitigate the rate increases associated with Aqua PA's accelerated investment to upgrade its infrastructure. The ALG equitably spreads the annual depreciation expense on rate base investment over the generations of customers that receive service from the investments. Conversely, the ELG method assigns more depreciation expense to customers that take service early in the asset's service life and reduces the expense to customers toward the end of the asset's service life.

5. The PUC should order Aqua PA to use depreciation rates that are based on the ALG procedure.

6. The proposed test year depreciation expense would be reduced by $14.1 million if the ALG depreciation rates are utilized.

7. The PUC should approve the depreciation rates that are presented in Exhibit BCA-3, Exhibit BCA-6, Exhibit BCA-9, Exhibit BCA-12, and Exhibit BCA-15 for Aqua PA's Water Base Operations, Shenandoah Operations, Wastewater Base Operations, Lower Makefield Operations, and East Whiteland Operations, respectively.

DEPRECIATION OVERVIEW

Q PLEASE PROVIDE A GENERAL OVERVIEW OF DEPRECIATION.

A Depreciation expense and accumulated depreciation are both accounting entries on a utility's books that refer to the gradual reduction of an asset's value over time. The

main difference between the two is where they are reported on financial statements and how they are recognized and used for purposes of setting a utility's overall revenue requirement for ratemaking purposes:

- Depreciation expense is reported in a utility's income statement and shows the use of the assets to provide utility service over an annual period and is included in the calculation of the utility's overall revenue requirement.

- Accumulated depreciation is the total depreciation expense recorded to date, less recorded retirements and cost of removal, plus recorded gross salvage. Accumulated depreciation is reported on a utility's balance sheet as a contra asset, meaning it is paired with the fixed asset account for allowed utility plant-in-service (*i.e.*, rate base) and functions to reduce the value of allowed utility plant-in-service to determine the net book value of plant-in-service. The net book value of rate base is multiplied by the utility's authorized rate of return and the product is included in the calculation of the utility's overall revenue requirement.

Generally speaking, depreciation expense accounting provides for the recovery of the original cost of the utility's assets that are currently providing service – this capital recovery generally occurs over the remaining service life of the investment or assets.

BOOK DEPRECIATION CONCEPTS

Q PLEASE EXPLAIN THE PURPOSE OF BOOK DEPRECIATION ACCOUNTING.

A Book depreciation is the recognition in a utility's income statement of the consumption or use of assets to provide utility service. Book depreciation is recorded as an expense and is included in the ratemaking formula to calculate the utility's overall revenue requirement.

The basic underlying principle of utility depreciation accounting is intergenerational equity, where the customers/ratepayers who benefit from the service of assets pay all the costs for those assets during the benefit period, which is over the

life of those assets.[1] This concept of intergenerational equity can be achieved through depreciation by allocating costs to customers in a systematic and rational manner that is consistent with the period of time in which customers receive the service value.[2]

Book depreciation provides for the recovery of the original cost of the utility's assets that are currently providing service. Book depreciation expense is not intended to provide for replacement of the current assets, but provides for capital recovery or return of current investment. Generally, this capital recovery occurs over the average service life of the investment or assets. As a result, it is critical that appropriate average service lives be used to develop the depreciation rates so no generation of ratepayers is disadvantaged.

In addition to capital recovery, depreciation rates also contain a provision for net salvage. Net salvage is simply the scrap or reuse value less the removal cost of the asset being depreciated. Accordingly, a utility will also recover the net salvage costs over the useful life of the asset. However, in Pennsylvania, net salvage is not included in the calculation of depreciation rates.

Q PLEASE FURTHER EXPLAIN NET SALVAGE.

A Net salvage is simply the value received from the sale or reuse of retired property (salvage value), less the cost of retiring such property (cost of removal). Net salvage can be either positive or negative. If the salvage value exceeds the cost of removal, the net salvage is positive. If the cost of removal is greater than the salvage value received

[1]Edison Electric Institute, Introduction to Depreciation for Public Utilities and Other Industries, April 2013, page viii.

[2]*Id.* at 22.

as a result of retirement, the resulting net salvage is negative. For most utilities, negative net salvage is a significant component of its depreciation rates and expense.

Q ARE THERE ANY DEFINITIONS OF DEPRECIATION ACCOUNTING THAT ARE UTILIZED FOR RATEMAKING PURPOSES?

A Yes. One of the most quoted definitions of depreciation accounting is the one contained in the Code of Federal Regulations ("CFR"):

> "Depreciation, as applied to depreciable gas plant, means the loss in service value not restored by current maintenance, incurred in connection with the consumption or prospective retirement of gas plant in the course of service from causes which are known to be in current operation and against which the utility is not protected by insurance. Among the causes to be given consideration are wear and tear, decay, action of the elements, inadequacy, obsolescence, changes in the art, changes in demand and requirements of public authorities, and, in the case of natural gas companies, the exhaustion of natural resources."

18 CFR, Chapter I, Subchapter F, Part 201(12)(B).

Effectively, depreciation accounting provides for the recovery of the original cost of an asset over its useful life.

Q HOW DO DEPRECIATION RATES AFFECT A UTILITY'S REVENUE REQUIREMENT?

A Depreciation expense is typically one of the largest single line items in a utility's overall revenue requirement that is ultimately recovered through tariff rates. When a utility updates its depreciation rates, it is effectively updating the amount of capital that is returned to it each year for investments that have been made to provide utility service. The depreciation rates are calculated in a depreciation study. The resulting depreciation

rates are then applied to test year plant balances to determine the depreciation expense component of the utility revenue requirement.

Q HOW ARE DEPRECIATION RATES DETERMINED?

A Depreciation rates are determined in a depreciation study using a depreciation system. There are three components, each with a number of variations, used to determine a depreciation system, which is then used to estimate depreciation rates. The three basic components are: (1) methods, (2) procedures, and (3) techniques. The choice of a depreciation system can significantly affect the resulting depreciation rates, thus, the revenue requirement.

Q PLEASE FURTHER DESCRIBE THE METHODS THAT ARE USED IN A DEPRECIATION SYSTEM.

A There generally are three types of methods of spreading depreciation expense over the life of property. These are the Straight-Line Method, accelerated methods, and deferred methods. The Straight-Line Method is the method most widely used by utility companies for accounting and ratemaking purposes as it is easy to apply and does not create intergenerational inequities because it spreads an equal portion of the plant cost across each accounting period. Accelerated methods result in higher depreciation rates earlier in an asset's life, and lower depreciation rates later. Deferred methods have increasing rates over an asset's life.

Q PLEASE DESCRIBE THE GROUPING PROCEDURES THAT ARE USED IN A DEPRECIATION SYSTEM.

A There are four main grouping procedures used in a depreciation system. These four procedures are the Individual procedure, the Broad Group (more commonly known as the ALG), the Vintage Group, and the ELG.

In the ALG procedure, all units within a particular account or category are assumed to be part of a single group that exhibits the same life and retirement characteristics. This is the most commonly utilized procedure nationwide.

The Vintage Group and the ELG procedure assume that sub-groups within a particular account or category may exhibit unique life characteristics. As an example of the Vintage Group procedure, it may assume that all services installed in 1985 have a 50-year life, while all services installed in year 1995 have a 45-year life. The ELG procedure may assume that all services that will attain a life of 50 years should have one depreciation rate while services that only attain life spans of 45 years would have a different depreciation rate. The overall group depreciation rate for the account would be a composite of the ELG and vintage depreciation rates.

Q PLEASE FURTHER DESCRIBE THE TECHNIQUES THAT ARE USED IN A DEPRECIATION SYSTEM.

A There are two techniques used to calculate depreciation rates: Whole Life and Remaining Life. The Whole Life Technique spreads the original cost plus net salvage of the account over the average life of the account. This technique requires that separate

amortizations be made to correct for over- and under-accumulations due to changes in an account's average service life.

The Remaining Life Technique spreads the unrecovered cost plus net salvage over the remaining life of the account. The Remaining Life Technique is the most common technique used and it has a self-correcting nature that spreads any over- or under-accumulations over the remaining life.

Q IN YOUR EXPERIENCE, WHAT DEPRECIATION SYSTEM IS MOST COMMONLY UTILIZED TO DETERMINE UTILITY DEPRECIATION RATES FOR RATEMAKING PURPOSES?

A The most common depreciation system is one that consists of the Straight-Line Method, the ALG procedure, and the Remaining Life Technique.

Q WHAT ARE SURVIVOR CURVES AND HOW ARE THEY USED IN DEVELOPING DEPRECIATION RATES?

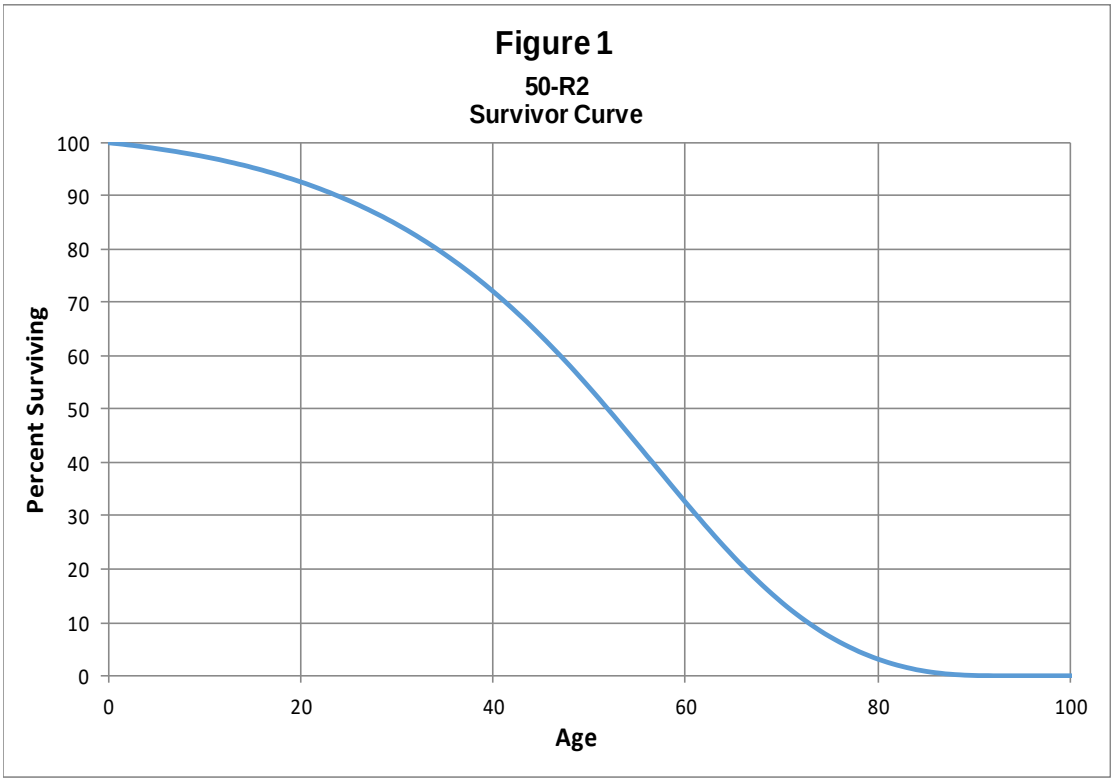
A The selection of the survivor curve is one of the most important decisions in conducting a depreciation study. A survivor curve is a graphical representation of the amount of property existing at each age interval throughout the life of a group of property. From the survivor curve, parameters required to calculate depreciation rates can be determined, such as the average service life of the group of property and the composite remaining life. For assets with an assumed lifespan or retirement date, the survivor curve is used to estimate the interim retirements that will occur between the study date and the estimated year of final retirement. These parameters directly affect the

depreciation rate calculations; therefore, informed judgment should be used in their selection.

In this proceeding, as well as the majority of utility regulatory rate case proceedings throughout the U.S. and Canada, the Iowa Curves are the general survivor curves utilized to describe the mortality characteristics of a group of property. There are four types of Iowa Curves: right-moded, left-moded, symmetrical-moded, and origin-moded. Each type describes where the greatest frequency of retirements occur relative to the average service life.

A survivor curve consists of an average service life and Iowa Curve type combination. For example, when describing property with a 50-year average service life that has mortality characteristics of the R2 Iowa Curve, the survivor curve would simply be notated as "50-R2." I present the 50-R2 survivor curve in Figure 1 below.

Figure 1



AQUA PA'S DEPRECIATION STUDY

Q HAS AQUA PA PROPOSED NEW DEPRECIATION RATES IN THIS PROCEEDING?

A Yes. Aqua PA retained Mr. John Spanos, of Gannett Fleming, to conduct a depreciation study on Aqua PA's property as of December 31, 2023 for each of the five water and wastewater service areas' revenue requirements. The 2023 Depreciation Study for each service areas' revenue requirement has been filed as Exhibit Nos. 6-A, Part 1 through 6-E, Part 1. The depreciation rates for the FPFTY, based on 2025 plant balances, are filed as Exhibit Nos. 6-A, Part 3 through 6-E, Part 3.

Q WHAT DEPRECIATION SYSTEM DOES AQUA PA UTILIZE IN THE CALCULATION OF ITS PROPOSED DEPRECIATION RATES?

A Aqua PA used a depreciation system consisting of the Straight-Line Method, the ELG procedure, and the Remaining Life Technique[3] to calculate its proposed depreciation rates.

Q HOW DOES AQUA PA'S PROPOSED DEPRECIATION RATES IMPACT THE REVENUE REQUIREMENT IN THIS PROCEEDING?

A Aqua PA's proposed depreciation rates significantly impact the revenue requirement in this proceeding. As is shown on Aqua PA's Exhibit Nos. 1-A through 1-E, Schedules A-1, Aqua PA's total depreciation expense is $161.1 million for the 2025 projected test year, representing 20% of Aqua PA's proposed revenue

[3]Aqua PA Statement No. 6 at page 4, line 15 through page 5, line 5.

requirement. For the Water Base, Aqua PA shows that the 2023 depreciation and amortization expense was $122.2 million and increases to $142.3 million in 2025, meaning a 16.4% increase in depreciation expense over a two-year period. For Wastewater Base, the 2023 depreciation expense was $12.7 million, increasing to $14.1 million, an increase of 11.8%. As I will discuss later, Aqua PA's use of the ELG procedure is exacerbating this increase. I summarize the increase by functional group in Table 1 and Table 2 for the Water Base Operations and Wastewater Base Operations, respectively. As this is the first filing for Shenandoah, East Whiteland, and Lower Makefield, no comparison has been created for those service areas' revenue requirements.

TABLE 1

Aqua PA Annual Depreciation Expense - Water Base Operations
($ Millions)

Group	Current 3/31/2023	Proposed 12/31/2025	Delta Amount	Delta Percent
Water Plant in Service	$ 122.41	$ 144.18	$ 21.78	17.8%
Customers' Advances and CIAC	$ (3.43)	$ (4.83)	$ (1.40)	40.9%
Amortization of Net Salvage	$ 3.19	$ 2.91	$ (0.28)	-8.7%

Amortization of Net Salvage	$ 0.28	$ 0.08	$ (0.20)	-72.8%
Total Water Plant	**$ 12.64**	**$ 14.13**	**$ 1.50**	**11.8%**

Sources: Filing Requirement FR VI.5, pages 32 - 40, and Exhibit 6-C, Part 3

Q WHAT IS THE PRIMARY FACTOR DRIVING THE INCREASE TO AQUA PA'S DEPRECIATION EXPENSE?

A Aqua PA is in an accelerated investment cycle. Mr. Packer states, "Since the end of its last base rate case, the Company's average capital expenditure program for water and wastewater operations has been approximately $300 million annually. Indeed, the Company has been investing in new and replacement infrastructure for many years at an accelerated rate to proactively address aging infrastructure and evolving regulatory requirements. The accelerated levels of investment, particularly since the establishment of the Distribution System Improvement Charge ("DSIC"), have enabled significant enhancements to the Company's utility infrastructure."[4] In Table 3 and Table 4, I show the increase in Aqua PA's Water Base and Wastewater Base plant-in-service and depreciation expense from 2021-2025.

[4]Aqua Statement No. 1 at page 3, line 21 through page 4, line 4.

TABLE 3

Aqua PA Annual Plant in Service and Depreciation Expense - Water Base Operations
($ Millions)

Description	Currently Approved 2021	2022	2023	Proposed Parameters 2024	2025	2021 to 2025 Increase	Percent Increase
Total Plant in Service	$ 4,676.00	$ 5,041.76	$ 5,327.11	$ 5,722.93	$ 6,013.47	$ 1,337.47	28.60%
Total Depreciation Expense	$ 103.59	$ 114.34	$ 122.17	$ 138.42	$ 142.26	$ 38.67	37.33%

TABLE 4

Aqua PA Annual Plant in Service and Depreciation Expense - Wastewater Base Operations
($ Millions)

Description	Currently Approved 2021	2022	2023	Proposed Parameters 2024	2025	2021 to 2025 Increase	Percent Increase
Total Plant in Service	$ 471.39	$ 499.90	$ 535.37	$ 568.54	$ 602.45	$ 131.06	27.80%
Total Depreciation Expense	$ 10.61	$ 11.67	$ 12.64	$ 13.50	$ 14.13	$ 3.52	33.22%

Sources: Filing Requirement FR VI.5 and Exhibit 6-C, Part 2 & Part 3

As can be seen, the Water Base depreciation expense has increased over 37% over a 5-year period, largely coinciding with a 29% increase to plant-in-service. Similarly, Wastewater Base depreciation expense has increased over 33% with a 28% increase to plant-in-service. I would also note that for the 6-10 inch cast iron water mains, which is the largest account, Aqua PA proposes to shorten the life from 80 years to 65 years. This largely explains why the increase in water base depreciation expense is larger than the growth of plant-in-service.

Q DO YOU TAKE ISSUE WITH AQUA PA'S DEPRECIATION STUDIES?

A Yes. Aqua PA's proposed depreciation rates are overstated and burden Aqua PA's customers with unnecessary and excessive depreciation expense and unnecessarily inflate the revenue requirement. In particular, Aqua PA's reliance on the ELG

procedure results in depreciation rates that are front-loaded and forces unnecessary depreciation expense on current customers. This compounds the cost of the infrastructure asset in the early years of the asset's service life by increasing both the return on the asset (because undepreciated net plant cost is highest in the early years) and the annual recovery of the asset or depreciation expense. Like most other regulatory commissions, the ELG procedure should be rejected by the PUC in favor of the ALG procedure.

Q WHY SHOULD THE PUC REJECT AQUA PA'S USE OF ELG DEPRECIATION RATES?

A As I will demonstrate, the ELG procedure results in front-loaded depreciation rates that burden customers with unnecessarily high depreciation expense. The vast majority of utilities in the country calculate depreciation rates using the ALG procedure. As far as I am aware, only some Pennsylvania utilities and a few utilities in Texas and Colorado rely on the ELG procedure presently. Utilities in Indiana recently have made the switch to ALG rates due to the Indiana Utility Regulation Commission's ("IURC") finding that "the use of ELG in a higher than average investment cycle has the effect of unnecessarily increasing the near term depreciation expense as compared to the use of ALG."[5] Accordingly, the PUC should reject Aqua PA's proposed use of the ELG procedure to calculate depreciation rates and instead order the use of the ALG procedure to mitigate the rate impact of substantial rate base increases.

[5] *Petition of Duke Energy Indiana, LLC Pursuant to Ind. Code § 8-1-2-42.7 and § 8-1-2-61,* Indiana Utility Regulatory Commission ("IURC"), June 29, 2020, IURC Final Order in Docket No. 45253 at page 90, file:///C:/Users/ef1/Downloads/45253%20ORDER%20062920.pdf. See Exhibit BCA-18.

ELG VS. ALG DEPRECIATION RATES

Q WHAT DEPRECIATION GROUPING PROCEDURE DOES AQUA PA PROPOSE?

A Aqua PA has used the ELG procedure to calculate its proposed depreciation rates.

Q WHAT IS THE MOST COMMONLY UTILIZED GROUPING PROCEDURE?

A The most commonly utilized depreciation grouping procedure throughout the nation is the ALG procedure. I have addressed in testimony, or reviewed depreciation studies conducted in approximately half of the states in the USA. In all states where I have experience, except for a few utilities in Texas, Colorado, and Pennsylvania, depreciation rates are routinely calculated using the ALG procedure.

Q HOW ARE DEPRECIATION RATES COMPUTED IN THE ELG PROCEDURE?

A When depreciation rates are computed using the ELG procedure, an attempt is made to precisely identify the exact year in which all property will retire and create a depreciation rate that ensures recovery of the property over the computed remaining life. Accordingly, property that will only have a 1-year life (according to a survivor curve) should have 100% depreciation rate; property that will have a 2-year life would have a 50% depreciation rate, property that has a 3-year life would have a 33% depreciation rate and so on. These are the ELGs, each with a unique depreciation rate to ensure recovery over the life of the ELG.

To be more specific, the Aqua PA's Depreciation Study was conducted based on 2025 plant balances (the FPFTY in use in this proceeding). Because Aqua PA is relying on the ELG procedure, it is essentially claiming it knows exactly how much property will retire in 2026, and established a depreciation rate for that property that ensures all unrecovered investment is recovered in 2026. Similarly, it must know exactly how much property will retire in 2027, 2028, 2029, and every single year in the future. Each ELG for each account will have a unique depreciation rate, in an attempt to recover the cost of those groups over the remaining life. The annual accruals for each ELG are summed to determine the total annual accrual for each account. The depreciation rate would then be equal to the sum of annual accruals divided by the total account balance. The selection of the survivor curve has a significant impact on the amount of property assumed to be in each ELG.

Q HOW ARE DEPRECIATION RATES COMPUTED IN THE ALG PROCEDURE?

A With the ALG procedure, all assets in an account are assumed to have an average life equal to that of the proposed survivor curve. While some property will be retired before the average service life, and some will be retired after the average service life, on average, the property will exhibit life characteristics according to the survivor curve. For each vintage of property within an account, the remaining life is determined based on the age of the property and the survivor curve selected for the account. The unrecovered cost for each vintage is spread over the remaining life of that vintage, yielding an annual accrual for each vintage. The vintage annual accruals are summed

for the entire account, and the total of annual accruals is divided by the account balance to determine the depreciation rate.

Q HAVE YOU CREATED AN EXAMPLE THAT COMPARES THE ELG AND THE ALG PROCEDURES?

A Yes. I have created an example that will demonstrate the differences between the ALG and ELG procedures. It will demonstrate how the rates are calculated under each procedure and will show that the ELG is front-loaded and requires annual updates.

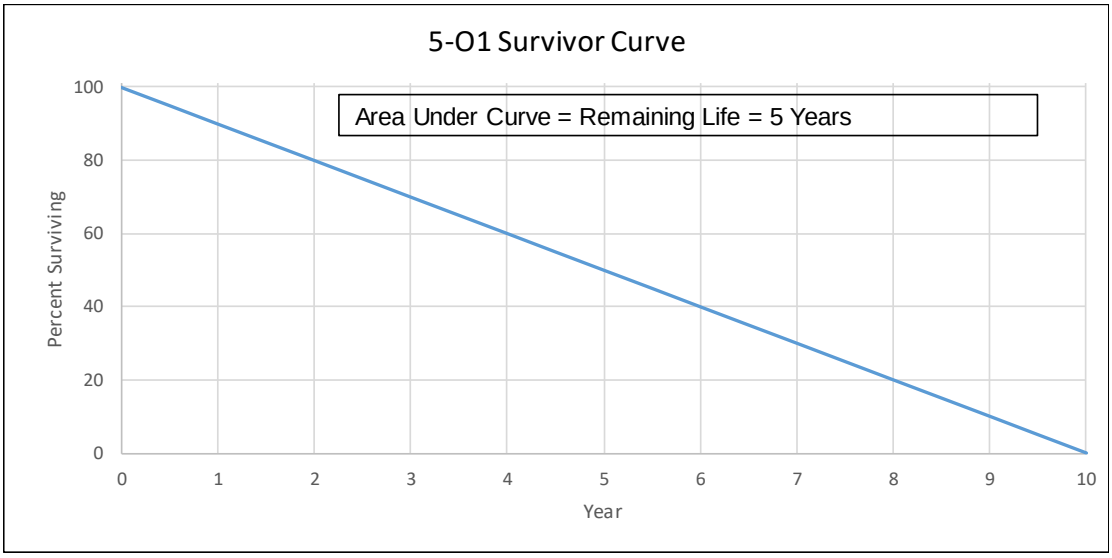
Q WHAT ASSUMPTIONS ARE YOU MAKING IN YOUR EXAMPLE?

A This example assumes that $100,000 of property is placed in-service into an account. It is the first and only property to exist in the account, and it will not be replaced as the initial $100,000 investment retires. The property will retire consistent with the 5-O1 survivor curve and has a 0% net salvage rate. This example will demonstrate how $100,000 will be recovered over the life of the property.

Q PLEASE DESCRIBE THE 5-O1 SURVIVOR CURVE.

A The 5-O1 survivor curve is presented in Figure 2.

FIGURE 2



The 5-O1 survivor curve has a 5-year average service life and assumes that all property is retired by year 10. This survivor curve assumes that 10% retires each year, therefore, in this example, it is assumed that $10,000 retires each year.

Q HOW WOULD THE ALG DEPRECIATION RATE BE CALCULATED FROM THE 5-O1 SURVIVOR CURVE?

A In the ALG procedure, the depreciation rate is calculated by ensuring recovery of the investment less net salvage over the remaining service life of the property. In this example, the net salvage rate is 0%, therefore, 100% of the investment needs to be recovered over the average service life, which in this example is 5 years. 100% divided by 5 years equals 20%. 20% is the depreciation rate that needs to be in place for 10 years to ensure the recovery of the $100,000 investment and $0 for net salvage over the life of the property.

Q HOW WOULD THE ELG DEPRECIATION RATE BE CALCULATED FROM THE 5-O1 SURVIVOR CURVE?

A With the ELG procedure, a different depreciation rate is needed for each year. The 5-O1 survivor curve in this example yields 10 different ELGs. The first group will have a 1-year life, the second group will have a 2-year life, and so on until the last group, which would have a 10-year life. In the first year, the total depreciation rate would allow for recovery of a portion of all 10 of the ELGs. In the second year, the depreciation rate would recover a portion of all of the ELGs except for the 1-year ELG, which according to the survivor curve is retired. The last year's depreciation rate would only provide for the last annual accrual of the 10-year ELG.

Q CAN YOU PROVIDE A COMPARISON OF THE ANNUAL DEPRECIATION EXPENSE IN YOUR EXAMPLE?

A Yes. In Table 5 I provide a comparison of the annual depreciation rates and expense needed to recover the $100,000 investment over its service life, assuming it retires according to the 5-O1 survivor curve and has a 0% net salvage rate.

TABLE 5

Comparison of ALG Procedure and ELG Procedure
Recovery of $100,000 Investment with 0% Net Salvage and 5-O1 Survivor Curve

Year	First of Year Surviving Original Cost	ALG Rate	ALG Expense	ELG Rate	ELG Expense	Delta
1	$ 100,000	20.00%	$ 19,000	34.38%	$ 32,665	$13,665
2	90,000	20.00%	17,000	22.74%	19,332	2,332
3	80,000	20.00%	15,000	18.66%	13,998	(1,002)
4	70,000	20.00%	13,000	16.26%	10,570	(2,430)
5	60,000	20.00%	11,000	14.60%	8,030	(2,970)
6	50,000	20.00%	9,000	13.36%	6,010	(2,990)
7	40,000	20.00%	7,000	12.38%	4,332	(2,668)
8	30,000	20.00%	5,000	11.58%	2,896	(2,104)
9	20,000	20.00%	3,000	10.94%	1,641	(1,359)
10	10,000	20.00%	1,000	10.53%	526	(474)
	Total Recovered Investment:		**$ 100,000**		**$ 100,000**	**$ (0)**

Source: BCA WP-2

Q WHAT DOES YOUR EXAMPLE DEMONSTRATE?

A Table 5 above demonstrates how both the ALG and ELG procedures allow for capital recovery of the $100,000 investment over the same 10-year period. The ALG depreciation rate is 20% and held constant through the 10-year period in which this property provides service. The ELG procedure requires a 34.38% depreciation rate in year 1, a 22.74% depreciation rate in year 2, declining until there is a 10.53% depreciation rate in year 10. This example shows how the ELG depreciation rates must be adjusted every year, otherwise significant intergenerational inequities will exist, and more cost will be recovered than is necessary in the first two years. However, in ratemaking, depreciation expense that is included in customer base rates are only updated when the Commission approves new base rates, which means that the year 1 depreciation expense would essentially be fixed in place and utilized as the test year expense until new depreciation rates are approved in a future rate case. In my example

above, this would effectively "lock in" depreciation expense based on a 34.38% depreciation rate until new rates are established in a future rate case as opposed to the 20% depreciation rate calculated by the ALG method.

Q PLEASE EXPAND ON LAST STATEMENT.

A Utilities typically only update their depreciation expense recovered from customers in the context of a base rate case, which is often not an every year occurrence. When depreciation rates for new assets are proposed using the ELG procedure, the rates put forward for approval would be analogous to the year 1 depreciation rate in this example. Therefore, if the ELG method were approved in a depreciation study, given this example and left in place for 10 years, the effective depreciation rate would be 34.38% every year. To be just to consumers and to produce reasonable rates, ELG depreciation rates should be updated each year and the corresponding depreciation expense adjusted in base rates; however, the ELG depreciation rates are not properly implemented and create intergenerational inequities, significantly overcharging customers in base rates based on the higher depreciation rates in the earlier years. Between rate cases, the depreciation expense component of a utility's revenue requirement remains at the level approved in the rate case, so while Aqua PA may routinely update its depreciation rates for accounting purposes, the depreciation expense for rate purposes provided by customers remains at the level approved in the most recent rate case. Table 6 shows an example of improperly implemented ELG depreciation rates. This table shows that if the year 1 ELG rates were left unchanged for the entire 10-year period, the utility would actually recover $71,922, or 72%, more than it is entitled to recover.

TABLE 6

Comparison of ALG Procedure and Improperly Implemented ELG Procedure
Recovery of $100,000 Investment with 0% Net Salvage and 5-O1 Survivor Curve

Year	First of Year Surviving Original Cost	ALG Rate	ALG Expense	ELG Rate	ELG Expense	Delta
1	$ 100,000	20.00%	$ 19,000	34.38%	$ 32,665	$13,665
2	90,000	20.00%	17,000	34.38%	29,227	12,227
3	80,000	20.00%	15,000	34.38%	25,788	10,788
4	70,000	20.00%	13,000	34.38%	22,350	9,350
5	60,000	20.00%	11,000	34.38%	18,911	7,911
6	50,000	20.00%	9,000	34.38%	15,473	6,473
7	40,000	20.00%	7,000	34.38%	12,035	5,035
8	30,000	20.00%	5,000	34.38%	8,596	3,596
9	20,000	20.00%	3,000	34.38%	5,158	2,158
10	10,000	20.00%	1,000	34.38%	1,719	719
	Total Recovered Investment:		**$ 100,000**		**$ 171,922**	**$71,922**

Source: BCA WP-2

Q WHY IS IT IMPORTANT TO AVOID INTERGENERATIONAL INEQUITIES?

A As I discussed earlier in my testimony, the underlying principal for determining depreciation rates is to achieve intergenerational equity. Given that traditional ratemaking sets rates on a forward-looking basis based on test year expense and remain in effect until a future rate case, the use of a depreciation system that utilizes the ELG procedure in the test year is at odds with this principle. As my example has clearly demonstrated, the ELG procedure is an accelerated form of depreciation, which causes current customers to pay greater depreciation expense than future customers for the same level of utility service.

Q SHOULD DEPRECIATION RATES THAT ARE CALCULATED USING THE ELG PROCEDURE BE UPDATED ANNUALLY?

A Yes. The only way for depreciation expense to "accurately" charge customers under the ELG procedure is for the depreciation expense component of base rates to be

updated annually. Otherwise, the depreciation expense that is left in effect will be the high year 1 depreciation rate, as demonstrated in this example. The depreciation expense is also only accurate if the utility property retires in exactly the manner dictated by the survivor curves used to calculate the ELG rates. This precision does not exist in the traditional rate setting paradigm as it would amount to impermissible single-issue ratemaking, which I understand is disfavored in Pennsylvania.

Q WHAT DEPRECIATION GROUPING PROCEDURES DO THE OTHER AQUA COMPANIES UTILIZE?

A Based on recent depreciation studies filed by Mr. Spanos in six of the other states Aqua serves, Aqua PA is the only Aqua company that utilizes the ELG procedure to calculate depreciation rates. Every other Aqua company uses the ALG procedure. See Exhibit BCA-1 and Table 7.

TABLE 7

Comparison of Aqua Company Depreciation Grouping Procedures

Study Year	Company	Grouping Procedure	Jursidiction	Docket No.
2010	Aqua Texas, Inc.	ALG	TX PUC	TX PUC Docket No. 53428
2015	Aqua Ohio, Inc.	ALG	OH PUC	Case No. 16-0907-WW-AIR

2023 & 2024	Aqua New Jersey, Inc.	ALG	NJ BPU	Docket No. WR24010057

Source: Exhibit BCA-1

Q CAN THE RATE IMPACT OF SUBSTANTIAL INCREASES TO RATE BASE BE MITIGATED WITHOUT UNREASONABLE ADVERSE IMPACT ON THE UTILITY?

A Yes. The rate impact of substantial increases to rate base can be mitigated by depreciating these assets using depreciation rates that are determined using the ALG procedure. The ALG procedure is the most commonly used deprecation procedure in use in the country and is used by the other Aqua companies operating around the country. The ALG procedure will properly allow Aqua PA to recover the full cost of investments over the life of the assets; however, it will be at a more reasonable rate and, therefore, reduces the expense in the interest of consumers and allows for more just and affordable rates.

Q. DOES THE USE OF THE ELG PROCEDURE IMPACT THE REMAINING LIFE OF PROPERTY?

A. Yes. Aqua PA's use of ELG significantly understates the remaining life, and thus, the recovery period for its assets.

Q HOW DOES THE ELG UNDERSTATE THE REMAINING LIFE OF AQUA PA'S ASSETS?

A I will provide a discussion related to Water Base Operations. According to the depreciation study data as of December 31, 2025, the largest single sub-account in the Water Base Operations is Account 331.02 (Cast Iron 6, 8, and 10 inch mains). Account 331.02 is $2.45 billion, or approximately 39%, of Aqua PA's $6.28 billion

water plant-in-service. This sub-account represents 31% of Aqua PA's proposed 2025 water plant depreciation expense. By analyzing the 2025 study data, the average age of investment for Account 331.02 is 12.3 years. According to Aqua PA, Account 331.02 has an average service life of 65 years. One would expect that something with a lifespan of 65 years and an age of 12 years would have a remaining life close to 53 years. The use of the ELG procedure significantly shortens the recovery period for this account. Table 8 below shows the composite remaining life for Account 331.02 under the ELG and ALG procedures.

TABLE 8

Remaining Life of Water Base Account 331.02 with ELG vs. ALG
Depreciation Study as of 12/31/2025

Account	Remaining Life ELG	Remaining Life ALG	Delta
Account 331.02 - 6,8, and 10 Inch Mains	46.7	52.5	5.9

Sources: Exhibit 6-A Part 3 and Exhibit BCA-3

As can be seen, with the ELG procedure, the remaining life of Account 331.02 is 46.7 years. With the more commonly used ALG procedure, the remaining life, or recovery period for the investment is 52.5 years. Aqua PA's use of the ELG procedure recovers its investment almost 6 years faster than under the ALG. Even though Aqua PA supports a 65-year life for these assets, the use of the ELG procedure only gives it an expected life of 59 years.[6] This significantly overstates the depreciation rates,

[6] 12.3 year average age + 46.7 year remaining life = 59 year life expectancy.

and thus, the depreciation expense. This issue exists for all of Aqua PA's depreciable accounts, due to the use of the ELG procedure.

Q HOW DOES THE RATIO OF THE AVERAGE LIFE AND REMAINING LIFE OF THE NEWEST VINTAGES IN OTHER AQUA WATER COMPANIES COMPARE FOR ACCOUNT 331 – MAINS?

A For Aqua PA's Water Base Operations, the remaining life of the newest vintage for Account 331.02 is 90% of the average life. For the other Aqua water companies, which rely on the ALG procedure, the ratio of remaining life to average life for the newest vintage is over 99%. See Table 9 below. The other Aqua companies correctly recover their investment over a period nearly identical to the average life of the assets. With Aqua PA's use of ELG, that recovery period is shorted, thus, inflating the depreciation rates and expense and burdening Aqua PA's customers with front-loaded depreciation expense.

TABLE 9

Comparison of Average Life and Remaining Life of Account 331 - Mains for Aqua Water Companies

Study Year	Company	Account	Newest Vintage	Average Life	Remaining Life	Ratio of Rem Life to Avg Life
2010	Aqua Texas, Inc.	331.00	2010	75	74.5	99.33%
2015	Aqua Ohio, Inc.	331.00	2015	90	89.51	99.46%
2017	Aqua North Carolina, Inc.	331.00	2017	65	64.72	99.57%
2020	Aqua Virginia, Inc.	331.00	2020	60	59.88	99.80%
2022	Aqua Illinois, Inc.	331.00	2022	80	79.51	99.39%
2023 & 2024	Aqua New Jersey, Inc.	331.40	2024	65	64.83	99.74%
2024 & 2025	Aqua Pennsylvania, Inc.	331.02	2025	65	58.32	89.72%

Source: Exhibit BCA-1 and Exhibit 6-A Part 3

Q ARE YOU AWARE OF PUBLIC UTILITY COMMISSIONS THAT HAVE REJECTED THE USE OF THE ELG?

A Yes. I can provide two examples of public utility commissions that have rejected the use of the ELG, due to the excessive depreciation expense that results from its use.

The Kentucky Public Service Commission ("Kentucky PSC") found that the ELG procedure front-loads depreciation expense in earlier years and decreases it in the later years of an asset's depreciation life, creating a mismatch of revenues and expenses. The Kentucky PSC states reasoning for rejecting the ELG is as follows:

> Duke Kentucky proposes, as part of developing its depreciation rates, the continued use of the ELG procedure. The Attorney General recommends the Commission adopt the ALG procedure in developing Duke Kentucky's depreciation rates. The Attorney General contends that the ALG methodology is the predominant method that is used in the electric industry for developing depreciation rates. The Attorney General contends that, under the ELG methodology, the capital recovery periods are accelerated and shortened and, thus, the depreciation rates are greater than if the ALG procedure was used. The Attorney General argues that the ALG procedure is as accurate as the ELG procedure and the ALG procedure smooths the data so that the depreciation rates for the group of assets tend to remain constant. Use of the ALG procedure will result in a decrease in Duke Kentucky's depreciation expense of $6.920 million.
>
> Duke Kentucky requested an increase in depreciation expense of $6.920 million, based on its request to utilize the ELG procedure for computing depreciation rates. As was discussed in the rate base section of this Order, this Commission has found that the ELG procedure does not accurately match revenues and expenses, is front-loaded, and Duke Kentucky is the only Kentucky based utility that utilizes the ELG procedure for computing depreciation rates.
>
> Regulatory accounting requires the proper matching of revenues and expense in order to produce fair, just and reasonable rates. The Commission finds Duke Kentucky's proposed ELG procedure does not meet that criteria and that Duke Kentucky's depreciation expense should be reduced by $6.920 million.

In the Matter of: Electronic Application of Duke Energy Kentucky, Inc., Kentucky PSC, Order at pages 26-27, Case No. 2017-00321.[7]

I have included the relevant pages of the Kentucky PSC Final Order as my Exhibit BCA-17.

More recently, the IURC rejected the use of ELG in Duke Energy Indiana's rate case, stating:

> First, with respect to the question of whether the ELG or ALG method should be used, we find the evidence presented by OUCC witness Mr. Garrett and Industrial Group witness Mr. Andrews persuasive, as both witnesses showed that the **ELG method results in unreasonably high depreciation rates. ALG depreciation rates result in systematical and rational cost recovery with near term customer rate relief and full cost recovery of utility investments**. While we have determined in the past that the ELG methodology was appropriate and acknowledge the weight given to precedent in many prior decisions, we always evaluate each case as it comes before us and do not need to approve the same methodology based on prior decisions, especially in light of a changed landscape. **The use of ELG in a higher than average investment cycle has the effect of unnecessarily increasing the near term depreciation expense as compared to the use of ALG**. A review and comparison of Mr. Andrew's exhibits reflecting only the ALG verses the ELG modifications applied to Mr. Spanos' results indicate that the impact of the methodology change on a percentage basis is markedly more significant for the distribution and transmission components than the production, or generation, component. This evidence is not surprising given the increased investment cycle in these categories as highlighted by the relatively recent statutory support for such investment codified at Indiana Code ch. 8-1-39. A changed and encouraged investment cycle is a material landscape change through which we consider our previous proclamations on methodology. Furthermore, the consideration of service affordability in the near term provides sufficient weight to temper our historical preference for ELG. Again, a recently enacted statute, Indiana Code § 8-1-2-0.5, directing the commission to consider "all practical means and measures" to balance necessary investment with service affordability enhances the regulatory landscape.

[7]https://psc.ky.gov/pscscf/2017%20Cases/2017-00321//20180413_PSC_ORDER.pdf.

IURC Final Order at page 90 (emphasis added).[8]

I have included the relevant pages of the IURC Final Order as my Exhibit BCA-18.

Q WHY IS IT APPROPRIATE FOR THE PUC TO REJECT AQUA PA'S PROPOSED USE OF THE ELG PROCEDURE AND TO REQUIRE THE USE OF THE ALG PROCEDURE AT THIS TIME?

A Just as in the 2020 Duke Electric rate case in which the IURC found that "the use of ELG in a higher-than-average investment cycle has the effect of unnecessarily increasing the near term depreciation expense as compared to the use of ALG,"[9] Aqua PA is in an accelerated investment cycle. As I have demonstrated above, depreciation rates calculated using the ELG procedure result in the front-loading of depreciation rates, and when the resulting depreciation rates are not updated annually, customers pay substantially more depreciation expense than is necessary for the utility to recover its investments.

OCA'S PROPOSED DEPRECIATION RATES

Q HAVE YOU CALCULATED 2025 DEPRECIATION RATES USING THE ALG PROCEDURE FOR AQUA PA?

A Yes. In Exhibits BCA-3, BCA-6, BCA-9, BCA-12, and BCA-15, I present depreciation rates that were calculated using all of Aqua PA's proposed life and net salvage

[8]https://iurc.portal.in.gov/_entity/sharepointdocumentlocation/7b316e6f-1bba-ea11-a812-001dd8018831/bb9c6bba-fd52-45ad-8e64-a444aef13c39?file=45253%20ORDER%20062920.pdf.

[9]*See n.* 8.

parameters but applying the ALG procedure for Aqua PA's Water Base Operations, Shenandoah, Wastewater Base Operations, Lower Makefield, and East Whiteland service areas, respectively. The PUC should approve the depreciation rates contained in these exhibits.

Q IF ALG DEPRECIATION RATES ARE ADOPTED TO DETERMINE DEPRECIATION EXPENSE, WILL THE ACCUMULATED DEPRECIATION BALANCE REFLECT THIS CHANGE?

A Yes. If the Commission adopts my recommendation to switch to the ALG procedure to calculate Aqua PA's depreciation rates and expense going forward, the accumulated depreciation balances will automatically reflect this change on a going forward basis. I am advised by counsel that under Pennsylvania law, both annual depreciation expense and accrued or accumulated depreciation should be calculated on a reasonably consistent basis.[10]

Q WHEN CALCULATING THE DEPRECIATION RATES USING THE ALG PROCEDURE FOR EACH SERVICE AREAS' REVENUE REQUIREMENT, DID YOU ACCOUNT FOR THE CHANGE TO THE ACCUMULATED DEPRECIATION?

A Yes, I did. In Exhibits BCA-2, BCA-5, BCA-8, BCA-11, and BCA-14, I present the bring forward of accumulated depreciation reserves from December 31, 2023 to

[10] *Pa. Power & Light Co. v. Pa. Pub. Util. Com.*, 311 A.2d 151, 158 (Pa. Cmwlth. 1973) (*Pa. Power*).

December 31, 2025 based on the ALG procedure for Aqua PA's Water Base Operations, Shenandoah, Wastewater Base Operations, Lower Makefield, and East Whiteland service areas, respectively. As a result, my recommended annual depreciation expense and accumulate depreciation are calculated on a reasonably consistent basis in each service areas' presented revenue requirement.

Q HOW DO THE ALG DEPRECIATION RATES CHANGE THE DEPRECIATION EXPENSE BASED ON PLANT BALANCES AS OF DECEMBER 31, 2025?

A I present this comparison for the Water Base Operations in Exhibit BCA-4, for Shenandoah in Exhibit BCA-7, for Wastewater Base Operations in Exhibit BCA-10, for Lower Makefield in Exhibit BCA-13, and for East Whiteland in Exhibit BCA-16. The ALG depreciation rates would reduce the depreciation expense, on plant balances as of December 31, 2025, by $14.48 million combined in all five service areas' revenue requirements. I summarize these changes by functional group in Tables 10 - 14.

Q HOW DO YOUR PROPOSED DEPRECIATION RATES FOR EAST WHITELAND FIT INTO THE OCA'S POSITION THAT THE EAST WHITELAND ACQUISITION BE EXCLUDED FROM RECOVERY IN THIS CASE?

A It is the OCA's position that the East Whiteland acquisition be excluded from recovery in this proceeding. Due to this position, the depreciation rates that I present for East Whiteland are illustrative; however, if the Commission elects to reject the OCA's position, the depreciation rates that I have calculated can and should be used for the East Whiteland service territory

Q DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?

A Yes, it does.

QUALIFICATIONS OF BRIAN C. ANDREWS

Q PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A Brian C. Andrews. My business address is 16690 Swingley Ridge Road, Suite 140, Chesterfield, MO 63017.

Q PLEASE STATE YOUR OCCUPATION.

A I am a consultant in the field of public utility regulation and a Principal with the firm of Brubaker & Associates, Inc. ("BAI"), energy, economic and regulatory consultants.

Q PLEASE STATE YOUR EDUCATIONAL BACKGROUND AND PROFESSIONAL EMPLOYMENT EXPERIENCE.

A I received a Bachelor of Science Degree in Electrical Engineering from the Washington University in St. Louis/University of Missouri - St. Louis Joint Engineering Program. I have also received a Master of Science Degree in Applied Economics from Georgia Southern University.

I have attended training seminars on multiple topics including class cost of service, depreciation, power risk analysis, production cost modeling, cost-estimation for transmission projects, transmission line routing, MISO load serving entity fundamentals and more.

I am a member and a former President of the Society of Depreciation Professionals. I have been awarded the designation of Certified Depreciation Professional ("CDP") by the Society of Depreciation Professionals. I am also a certified Engineer Intern in the State of Missouri.

As an Associate at BAI, and as a Senior Consultant, Consultant, Associate Consultant and Assistant Engineer before that, I have been involved with several regulated and competitive electric service issues. These have included book depreciation, fuel and purchased power cost, transmission planning, transmission line routing, resource planning including renewable portfolio standards compliance, electric price forecasting, class cost of service, power procurement, and rate design. This has involved use of power flow, production cost, cost of service, and various other analyses and models to address these issues, utilizing, but not limited to, various programs such as Strategist, RealTime, PSS/E, MatLab, R Studio, ArcGIS, Excel, and the United States Department of Energy/Bonneville Power Administration's Corona and Field Effects ("CAFÉ") Program. In addition, I have received extensive training on the PLEXOS Integrated Energy Model and the EnCompass Power Planning Software. I have provided testimony on many of these issues before the Public Service Commissions in Arizona, Arkansas, California, Colorado, Florida, Illinois, Indiana, Kansas, Kentucky, Louisiana, Michigan, Minnesota, Missouri, Montana, New Mexico, Oklahoma, South Carolina, Texas, and Washington DC.

BAI was formed in April 1995. BAI provides consulting services in the economic, technical, accounting, and financial aspects of public utility rates and in the acquisition of utility and energy services through RFPs and negotiations, in both regulated and unregulated markets. Our clients include large industrial and institutional customers, some utilities and, on occasion, state regulatory agencies. We also prepare special studies and reports, forecasts, surveys and siting studies, and present seminars on utility-related issues.

In general, we are engaged in energy and regulatory consulting, economic analysis and contract negotiation. In addition to our main office in St. Louis, the firm also has branch offices in Corpus Christi, Texas; Louisville, Kentucky and Phoenix, Arizona.

APPLICATION OF AQUA TEXAS, INC. FOR SYSTEM IMPROVEMENT CHARGES PURSUANT TO 16 TAC § 24.76	**§**	**BEFORE THE PUBLIC UTILITY COMMISSION OF TEXAS**

DIRECT TESTIMONY

OF

JOHN J. SPANOS

ON BEHALF OF

AQUA TEXAS, INC.

DECEMBER 15, 2022

I have over 36 years of depreciation experience, which includes giving expert testimony in over 400 cases before 41 regulatory commissions, including this Commission. These cases have included depreciation studies in the electric, gas, water, wastewater and pipeline industries. In addition to cases where I have submitted testimony, I have also supervised over 800 other depreciation or valuation assignments. Please refer to **JJS-1** for my qualifications statement, which includes further information with respect to my work history, case experience, and leadership in the Society of Depreciation Professionals.

Q. DO YOU HOLD ANY SPECIAL CERTIFICATION AS A DEPRECIATION EXPERT?

A. Yes. The Society of Depreciation Professionals has established national standards for depreciation professionals. The Society administers an examination to become certified in this field. I passed the certification exam in September 1997 and was re-certified in August 2003, February 2008, January 2013 and February 2018.

II. PURPOSE OF TESTIMONY

Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS PROCEEDING?

A. My testimony will support and explain the depreciation studies conducted under my direction and supervision for the water and wastewater utility assets of Aqua Texas, Inc., Aqua Development, Inc., Aqua Utilities, Inc., Harper Water Company, Inc., and Kerrville South Water Company, Inc. d/b/a Aqua Texas (collectively, "Aqua Texas"). The study represents all depreciable Aqua Texas water and wastewater plant assets as of December 31, 2010. My testimony will explain how the depreciation rates in the studies are

appropriate for calculating Aqua Texas' accumulated depreciation and current annual depreciation expense.

Q. IS KAS-2 A TRUE AND ACCURATE COPY OF THE WATER PLANT DEPRECIATION STUDY YOU PREPARED FOR USE BY AQUA TEXAS IN ITS MOST RECENT COMPREHENSIVE WATER AND SEWER RATE CASE PROCEEDINGS?

A. Yes.

Q. DOES KAS-2 ACCURATELY PORTRAY THE RESULTS OF YOUR WATER PLANT DEPRECIATION STUDY AS OF DECEMBER 31, 2010?

A. Yes.

Q. IS KAS-3 A TRUE AND ACCURATE COPY OF THE WASTEWATER PLANT DEPRECIATION STUDY YOU PREPARED FOR USE BY AQUA TEXAS IN ITS MOST RECENT COMPREHENSIVE WATER AND SEWER RATE CASE PROCEEDINGS?

A. Yes.

Q. DOES KAS-3 ACCURATELY PORTRAY THE RESULTS OF YOUR WASTEWATER PLANT DEPRECIATION STUDY AS OF DECEMBER 31, 2010?

A. Yes.

Q. WERE KAS-2 AND KAS-3 PREPARED UNDER YOUR DIRECTION AND CONTROL?

A. Yes.

III. OVERVIEW OF DEPRECIATION STUDIES

Q. WHAT IS THE PURPOSE OF YOUR DIRECT TESTIMONY IN THIS PROCEEDING?

A. The June 16, 2022 supplemental direct testimony filed by Aqua Texas, Inc. witness Kurt Scheibelhut discusses how he calculated current depreciation expense, which also relates to accumulated depreciation, for the system improvement charge ("SIC") application that initiated this docket. Mr. Scheibelhut's testimony is that Aqua Texas used group depreciation rates established in the depreciation studies included with his testimony as **KAS-2** and **KAS-3** for the depreciation expense calculation. In my capacity with Gannett Fleming Valuation and Rate Consultants, LLC, I prepared those deprecation studies for use in Aqua Texas's most recent comprehensive water and sewer rate case proceedings filed with the Texas Commission on Environmental Quality ("TCEQ"). I also previously testified in this case via an affidavit filed with Aqua Texas, Inc.'s Response to Order No. 9 filed on July 26, 2022 and attached here as **JJS-2**. My testimony here reenforces why using group deprecation rates from those studies to calculate current depreciation expense and accumulated depreciation in this proceeding is proper.

Q. WHY DID YOU PREPARE THE DEPRECIATION STUDIES INCLUDED WITH MR. SCHEIBELHUT'S TESTIMONY AS KAS-2 AND KAS-3?

RELATED TO UTILITY PLANT

AS OF DECEMBER 31, 2010

GANNETT FLEMING, INC. - VALUATION AND RATE DIVISION

Harrisburg, Pennsylvania

Attachment
KAS-2

BASIS OF STUDY

Depreciation

For most accounts, the annual depreciation was calculated by the straight line method, using the average service life procedure and the remaining life basis. For certain General Plant accounts, the annual depreciation was based on amortization accounting. The calculated remaining lives and annual depreciation accrual rates were based on attained ages of plant in service and the estimated service life and salvage characteristics of each depreciable group.

Survivor Curve Estimates

The procedure for estimating survivor curves, which define service lives and remaining lives, consisted of compiling historical service life data for the plant accounts or other depreciable groups, analyzing the historical data base through the use of accepted techniques, and forecasting the survivor characteristics for each depreciable account or group. These forecasts were based on interpretations of the historical data analyses and the probable future. The combination of the historical data and the estimated future trend yields a complete pattern of life characteristics, i.e., a survivor curve, from which the average service life and remaining service life are derived.

The historical data analyzed for life estimation purposes were compiled through 2010 from the Company's plant accounting records. Such data included plant additions, retirements, transfers and other activity recorded by the Company for each of its plant accounts and subaccounts.

The estimates of net salvage incorporated a review of experienced costs of removal and salvage related to plant retirements, and considerations of trends exhibited by the historical data. Each component of net salvage, i.e., cost of removal and salvage was

stated in dollars and as a percent of retirement for purposes of estimating average future levels of the components, as well as of net salvage.

An understanding of the function of the plant and information with respect to the reasons for past retirements and the expected causes of future retirements was obtained through field trips and discussions with operating and management personnel. The supplemental information obtained in this manner was considered in the interpretation and extrapolation of the statistical analyses.

Calculation of Depreciation

The depreciation accrual rates were calculated using the straight line method, the remaining life basis, and the average service life depreciation procedure. The change to amortization accounting for certain accounts is recommended because of the disproportionate plant accounting effort required when compared to the minimal original cost of the large number of items in these accounts. An explanation of the calculation of annual and accrued amortization is presented on page II-28 of the report.

Q10. Did you prepare the depreciation study filed by Aqua in this proceeding?

A. Yes. I prepared the depreciation study submitted by Aqua with its filing in this proceeding. My report is entitled: "2015 Depreciation Study - Calculated Annual Depreciation Accruals Related to Water Plant as of December 31, 2015." This report sets forth the results of my depreciation study for Aqua.

Q11. In preparing the depreciation study, did you follow generally accepted practices in the field of depreciation valuation?

A. Yes.

Q12. Are the methods and procedures of this depreciation study consistent with past practices?

A. The methods and procedures of this study are the same as those utilized in the last study for this company as well as others before PUCO. Depreciation rates are determined based on the average service life procedure and the whole life method.

III. OUTLINE OF REPORT

Q13. Please describe the contents of your report.

A. My report is presented in nine parts. Part I, Introduction, presents the scope and basis for the depreciation study. Part II, Estimation of Survivor Curves, includes descriptions of the methodology of estimating survivor curves. Parts III and IV set forth the analysis for determining life and net salvage estimation. Part V, Calculation of Annual and Accrued Depreciation includes the concepts of depreciation and amortization using the whole life. Part VI, Results of Study, presents a description of the results and a summary of the depreciation calculations. Parts VII, VIII and IX include graphs and tables that relate to the service life and net salvage analyses, and the detailed depreciation calculations.

The table on pages VI-4 through VI-8 presents the estimated survivor curve, the net salvage percent, the original cost as of December 31, 2015, the calculated

inspections and discussions with management with regard to plans and outlook of assets.

IV. SUMMARY OF CONCLUSIONS

Q. What is the composite depreciation rate resulting from the Studies?

A. The composite rate for water assets is 3.10 percent as shown on page VI-8 of Aqua NC Exhibit JJS-1. The composite rate for wastewater assets is 2.52 percent set forth on page VI-7 of Aqua NC Exhibit JJS-2.

Q. What is your professional opinion with regard to the results of the Studies that you performed?

A. In my opinion, the proposed depreciation rates resulting from the completed Depreciation Studies are reasonable and appropriate given that they incorporate the service life and net salvage parameters currently anticipated for each of the Company's property group investments over their average remaining lives.

V. DEPRECIATION STUDY

Q. Please summarize how you performed your Studies.

A. In the studies that I performed and that are the basis for my testimony, I used the straight line remaining life method of depreciation, with the average service life procedure to develop recommended depreciation

VIRGINIA STATE CORPORATION COMMISSION

DIRECT TESTIMONY OF JOHN J. SPANOS

ON BEHALF OF AQUA VIRGINIA, INC.

CONCERNING

DEPRECIATION

JULY 30, 2020

20090741

A. The purpose of the depreciation studies was to estimate the annual depreciation accruals related to water and wastewater plant in service for ratemaking purposes and determine appropriate average service lives and net salvage percentages for each plant account.

12. Q. Please explain how you performed your depreciation studies.

A. I used the straight line remaining life method of depreciation, with the average service life procedure for all plant assets except some general plant accounts. The annual depreciation is based on a method of depreciation accounting that seeks to distribute the unrecovered cost of fixed capital assets over the estimated remaining useful life of each unit, or group of assets, in a systematic and rational manner.

For General Plant Accounts 340, 342, 343, 344, 346, 347, and 348 for water assets and Accounts 390, 392, 393, 394, 396 and 397 for wastewater assets; I used the straight line remaining life method of amortization. The annual amortization is based on amortization accounting that distributes the unrecovered cost of fixed capital assets over the remaining amortization period selected for each account and vintage.

13. Q. How did you determine the recommended annual depreciation accrual rates?

A. The determination of annual depreciation accrual rates consists of two phases. In the first phase, service life and net salvage characteristics are estimated for each depreciable group, that is, each plant account or subaccount identified as having similar characteristics. In the second phase,

Proposed General Increase in Water and Sewer Rates for the Consolidated Water Divisions and Consolidated Sewer Divisions.	)	Docket No. 24-_____

Direct Testimony of

JOHN J. SPANOS

President
Gannett Fleming Valuation and Rate Consultants, LLC

Submitted on behalf of
Aqua Illinois, Inc.

January 2, 2024

Q. Are the methods and procedures of this depreciation study consistent with Aqua Illinois' past practices?

A. Yes. The methods and procedures of both depreciation studies are consistent with Aqua Illinois' past practice and those currently utilized by Aqua Illinois.

Q. Please summarize how you performed your Studies.

A. In the studies that I performed and that are the basis for my testimony, I used the straight line remaining life method of depreciation, with the average service life procedure to develop recommended depreciation accrual rates. The total annual depreciation is based on a system of depreciation accounting which aims to distribute the cost of fixed capital assets over the estimated useful life of the unit, or group of assets, in a systematic and rational manner.

For General Plant Accounts 340.5, 340.55, 340.56, 342, 343, 344, 346, and 347 for water assets, and Accounts 390.7, 390.75, 393, 394, 396, 397 and 398 for wastewater assets, I used the straight line method of amortization. The annual amortization is based on amortization accounting which distributes the unrecovered cost of fixed capital assets over the remaining amortization period selected for each account and vintage.

Q. How did you determine the recommended annual depreciation accrual rates?

A. The determination of annual depreciation accrual rates consists of two phases. In the first phase, service life and net salvage characteristics are estimated for each depreciable group, that is, each plant account or subaccount identified as having similar characteristics. In the second phase, the annual depreciation accrual rates are calculated based on the service life and net salvage estimates determined in the first phase.

AQUA NEW JERSEY, INC.

BPU DOCKET NO. WR2401____

DIRECT TESTIMONY OF JOHN J. SPANOS

With regard to Depreciation

January 19, 2024

calculations by account. Specifically, the results of the retirement rate analyses prepared as the historical bases for the service life estimates are found beginning on page VII-2; the results of the analyses of historical net salvage data can be found on beginning on page VIII-2; and the depreciation calculations related to surviving original cost as of June 30, 2023 are found beginning on page IX-2.

Q. Please identify the depreciation method that you used.

A. I used the straight line remaining life method of depreciation, utilizing the average service life procedure. This is the same method Aqua used in its most recent base rate proceedings. This method of depreciation aims to distribute the unrecovered cost of fixed capital assets over the estimated remaining useful life of each unit or group of assets in a systematic and rational manner.

For General Plant Accounts 340.50, 340.55, 340.60, 342.50, 343.50, 344.50, 346.50, 347.50 and 348.50, I used the straight line remaining life method of amortization, which is consistent with current practices for Aqua. The annual amortization is based on amortization accounting that distributes the unrecovered cost of fixed capital assets over the remaining amortization period selected for each account and vintage. Amortization accounting for certain accounts is recommended because of the disproportionate plant accounting effort required when compared to the minimal original cost of the large number of items in these accounts. An explanation of the calculation of annual and accrued amortization is presented on pages V-4 and V-5 of Exhibit JJS-2.

Q. What are your recommended annual depreciation accrual rates for Aqua?

A. My recommended annual depreciation accrual rates as of April 30, 2024 for Aqua are set forth on pages i and ii of Exhibit JJS-3. These rates are developed based on the methods and procedures consistent with the calculations presented in Exhibit JJS-2.

COMMONWEALTH OF KENTUCKY

BEFORE THE PUBLIC SERVICE COMMISSION

In the Matter of:

ELECTRONIC APPLICATION OF DUKE ENERGY KENTUCKY, INC. FOR: 1) AN ADJUSTMENT OF THE ELECTRIC RATES; 2) APPROVAL OF AN ENVIRONMENTAL COMPLIANCE PLAN AND SURCHARGE MECHANISM; 3) APPROVAL OF NEW TARIFFS; 4) APPROVAL OF ACCOUNTING PRACTICES TO ESTABLISH REGULATORY ASSETS AND LIABILITIES; AND 5) ALL OTHER REQUIRED APPROVALS AND RELIEF	)	CASE NO. 2017-00321

ORDER

Duke Energy Kentucky, Inc. ("Duke Kentucky") is a jurisdictional electric utility that generates, transmits, distributes, and sells electricity to approximately 140,600 consumers in Boone, Campbell, Grant, Kenton, and Pendleton counties.[1] Duke Kentucky also is a utility engaged in purchasing, selling, storing, and transporting natural gas to approximately 98,200 customers in Boone, Bracken, Campbell, Gallatin, Grant, Kenton, and Pendleton counties.[2] Its most recent general rate increase for its electric operations was granted in Case No. 2006-00172.[3]

[3] Application at 4. Case No. 2006-00172, *Application of the Union Light, Heat and Power Company D/B/A Duke Energy Kentucky for an Adjustment of Electric Rates* (Ky. PSC Dec. 21, 2006).

extraordinary. In using this forecasted test period, the Commission has given full consideration to appropriate known and measurable changes.

Jurisdictional Rate Base Ratio

Duke Kentucky proposed a test-year-end Kentucky jurisdictional rate base of $700,204,561.[22] The Kentucky jurisdictional electric rate base is divided by Duke Kentucky's test-year-end total company electric rate base to derive the Kentucky jurisdictional electric rate base ratio ("Jurisdictional Ratio") for Duke Kentucky. This Jurisdictional Ratio is then applied to Duke Kentucky's total company electric capitalization to derive its Kentucky jurisdictional electric capitalization. The Jurisdictional Ratio uses the test-year-end rate base before any ratemaking adjustments applicable to either Kentucky jurisdictional operations or other jurisdictional operations. Duke Kentucky used a Jurisdictional Ratio of 100 percent.[23] The Commission has reviewed and agrees with the calculation of Duke Kentucky's test-year electric rate base for purposes of establishing the Jurisdictional Ratio.

Pro Forma Jurisdictional Rate Base

Duke Kentucky calculated a pro forma jurisdictional rate base of $700,204,561,[24] which reflects the types of adjustments made by the Commission in prior rate cases to determine the pro forma rate base. The Attorney General provided testimony and several adjustments to Duke Kentucky's proposed rate base as discussed below. The Commission finds seven adjustments are warranted to Duke Kentucky's rate base. The

---

[22] Application, Schedule B-1.

[23] *Id.*, Schedule B-7.

[24] *Id.*, Schedule B.1. Duke Kentucky is not requesting to include recovery of Construction Work in Progress in base rates.

Commission finds that the excess amortization of the Carbon Management Research Group regulatory asset in the test year and the amortization of excess accumulated deferred income tax ("ADIT") should be added to the rate base. The Commission also finds that the East Bend Operations and Maintenance Expense ("East Bend O&M") regulatory asset, the East Bend Ash Pond Asset Retirement Obligation ("East Bend Ash Pond ARO") regulatory asset, the reduction in cash working capital ("CWC"), and the reduction in depreciation expense as discussed herein due to the Commission's decision to deny use of the Equal Life Group ("ELG") procedure and require use of the Average Life Group ("ALG") procedure for computing depreciation rates, net of the related ADIT as found reasonable herein, should be removed from rate base.

The Commission accepts Duke Kentucky's proposed amortization of the protected excess ADIT. The amortization for the protected excess ADIT is based upon the Average Rate Assumption Method ("ARAM"). For the unprotected excess ADIT, the Attorney General initially proposed a 20-year amortization period.[25] Subsequently, the Attorney General proposed a five-year amortization period for the unprotected excess ADIT but did not amend his testimony to reflect the change in the amortization period.[26] The Commission finds that a reasonable amortization period for the excess ADIT for Duke Kentucky's unprotected assets should be 10 years. A 10-year amortization period for the unprotected excess ADIT will balance the impact to Duke Kentucky's cash flow and provide ratepayers the full benefit of the reduction in the federal corporate income tax in a timely manner. As a result of the foregoing adjustments, the Commission finds the total

---

[25] *Id.*

[26] March 8, 2018, Video Transcript of Evidence at 3:35:00.

test-year amortization for the total excess ADIT to be $4,471,984, which is an increase of $1,651,639 over the amount proposed by Duke Kentucky. The Commission finds that the amortization of the excess ADIT related to protected and unprotected excess ADIT found reasonable herein should be removed from Duke Kentucky's ADIT, which increases its rate base. Therefore, Duke Kentucky's rate base should be increased by $4,471,984 for this adjustment.

Duke Kentucky deferred $2 million it incurred to fund carbon management research by the Carbon Management Research Group ("CMRG"). In Case No. 2008-00308, Duke Kentucky sought and obtained authorization from the Commission to defer these costs for accounting purposes.[27] The regulatory asset, net of ADIT, is included in the capitalization in this proceeding. In the instant matter, Duke Kentucky sought to recover the amortization of the deferred asset over a five-year period at $400,000 per year. In the Commission's Order in Case No. 2008-00308, it stated that the CMRG regulatory asset will be amortized over a 10-year period or $200,000 per year. Therefore, the Commission finds that the Duke Kentucky's capitalization should be increased by $200,000 to reflect the proper amount of the regulatory asset in the rate base.

The Commission finds that the ADIT arising from its requirement to change Duke Kentucky's procedure for computing depreciation rates from the ELG to the ALG procedure should reduce Duke Kentucky's rate base. As discussed in the testimony of the Attorney General, the ELG procedure front-loads depreciation expense in earlier

---

[27] Case No. 2008-00308, *Joint Application of Duke Energy Kentucky, Kentucky Utilities Company and Louisville Gas and Electric Company for an Order Approving Accounting Practices to Establish Regulatory Assets* (Ky. PSC Oct. 30, 2008).

years and decreases it in the later years of an asset's depreciable life, creating a mismatch of revenues and expenses.[28] The Attorney General states that the ALG procedure is the dominant procedure for other electric utilities, including all other electric utilities in Kentucky.[29] Therefore, the Commission finds that the Attorney General's position on this issue is reasonable and that Duke Kentucky should use the ALG procedure for computing depreciation rates, and that its rate base should be reduced by $2,733,299 to reflect the increase in ADIT.

The East Bend O&M regulatory asset was approved by the Commission in Case No. 2014-00201.[30] In addition, in that proceeding, the Commission authorized Duke Kentucky to defer carrying charges on the O&M expense at its cost of debt. The Attorney General disputed the amount of the regulatory asset and made a recommendation of the amount of amortization assuming that the regulatory asset was included in rate base.[31]

The Commission finds that the East Bend O&M regulatory asset should be removed from rate base and Duke Kentucky's request to amortize the East Bend O&M regulatory asset over a 10-year period is reasonable and should be approved. The Commission also finds that carrying charges should be based on the cost of debt approved herein. This adjustment reduces Duke Kentucky's rate base by $36,540,123.

[30] Case No. 2014-00201, *Application of Duke Energy Kentucky, Inc. for (1) a Certificate of Public Convenience and Necessity Authorizing the Acquisition of the Dayton Power & Light Company's 31% Interest in the East Bend Generating Station; (2) Approval of Duke Energy Kentucky, Inc.'s Assumption of Certain Liabilities in Connection with the Acquisition; (3) Deferral of Costs Incurred as part of the Acquisition; and (4) All Other Necessary Waivers, Approvals and Relief* (Ky. PSC Dec. 4, 2014).

[31] Kollen Testimony at 31.

The East Bend Ash Pond ARO was approved by the Commission in Case No. 2015-00187.[32] Duke Kentucky proposed that the East Bend Ash Pond ARO amortization be recovered through the Environmental Surcharge Mechanism ("ESM") in its application. In addition, Duke Kentucky requested a 10-year amortization period. The Attorney General proposed that the East Bend Ash Pond ARO be removed from capitalization, as it was erroneous for Duke Kentucky to include it in both its ESM rider rate base and in base rates. The Commission finds the East Bend Ash Pond ARO should not be included in base rates because that amount is proposed to be recovered through Duke Kentucky's ESM. The Commission also finds that a 10-year amortization period is reasonable and should be approved. The parties have agreed upon this issue. This adjustment reduces Duke Kentucky's rate base by $18,509,346.

The CWC allowance included in rate base shown below is based on the adjusted operation and maintenance expenses discussed in this Order, as approved by the Commission. This adjustment reduces Duke Kentucky's rate base by $2,008,320.

Based on the Commission's finding herein where it denied Duke Kentucky's proposal to use ELG procedure rather than the ALG procedure for computing depreciation rates, the Commission finds that Duke Kentucky's accumulated depreciation in its rate base should be increased by $6,919,475.

We have determined Duke Kentucky's pro forma jurisdictional rate base for rate-making purposes for the test year to be as follows:

---

[32] Case No. 2015-00187, *Application of Duke Energy Kentucky, Inc. for an Order Approving the Establishment of a Regulatory Asset for the Liabilities Associated with Ash Pond Asset Retirement Obligations* (Ky. PSC Dec. 15, 2015).

Depreciation Expense

Duke Kentucky proposes, as part of developing its depreciation rates, the continued use of the ELG procedure. The Attorney General recommends the Commission adopt the ALG procedure in developing Duke Kentucky's depreciation rates. The Attorney General contends that the ALG methodology is the predominant method that is used in the electric industry for developing depreciation rates. The Attorney General contends that, under the ELG methodology, the capital recovery periods are accelerated and shortened and, thus, the depreciation rates are greater than if the ALG procedure was used.[76] The Attorney General argues that the ALG procedure is as accurate as the ELG procedure and the ALG procedure smooths the data so that the depreciation rates for the group of assets tend to remain constant.[77] Use of the ALG procedure will result in a decrease in Duke Kentucky's depreciation expense of $6.920 million.

Duke Kentucky requested an increase in depreciation expense of $6.920 million, based on its request to utilize the ELG procedure for computing depreciation rates. As was discussed in the rate base section of this Order, this Commission has found that the ELG procedure does not accurately match revenues and expenses, is front-loaded, and Duke Kentucky is the only Kentucky based utility that utilizes the ELG procedure for computing depreciation rates.

Regulatory accounting requires the proper matching of revenues and expense in order to produce fair, just and reasonable rates. The Commission finds Duke Kentucky's

[76] *Id.* at 33.

[77] *Id.* at 35

proposed ELG procedure does not meet that criteria and that Duke Kentucky's depreciation expense should be reduced by $6.920 million.

Terminal Net Salvage – Generation Units

Duke Kentucky included an adjustment of its depreciation expense of $4.506 million to reflect the impact of terminal net salvage value.[78] Duke Kentucky's proposed depreciation rates reflect terminal net salvage, which the company contends is required under the Federal Energy Regulatory Commissions' Uniform System of Accounts.[79] Duke Kentucky further contends that, to avoid intergenerational inequity, these costs should be borne by those ratepayers who receive the benefit from the production assets.[80]

The Attorney General recommends reducing the proposed depreciation rates by removing terminal net salvage from production plant depreciation rates. The Attorney General argues that Duke Kentucky's proposed recovery of future terminal net negative salvage for production plant is unreasonable because those costs are not known with reasonable certainty today.[81] The Attorney General's recommendation is to reduce Duke Kentucky's depreciation expense by $4.506 million.[82]

The Commission finds Dukes Kentucky's recommendation on the treatment of terminal net salvage value in the computing the depreciation rates for generating units is reasonable in order to avoid intergenerational inequity and should be approved.

process. Sierra Club and Joint Intervenors took issue with the retirement dates of Edwardsport IGCC and other coal units, finding that DEI should consider an earlier retirement of these units. In considering Edwardsport first, we find Mr. Gurganus' testimony persuasive. Edwardsport is the newest coal unit on the DEI system and continues to be a valuable asset for the Company's generating system, especially as the Company moves, as many utilities are, to retire older and less efficient coal plants. We also understand the many complexities and issues associated with primarily operating the plant on natural gas pointed out by Mr. Gurganus, not least of which is the requirement for new air permitting, elimination of tax incentives, and losing the optionality and diversity that operation primarily on coal provides. In contrast to the cross answering testimony of Mr. Schlissel, and based on the testimony provided by Mr. Gurganus, we find that Edwardsport has showed steadily increasing gasifier availability and capacity factor in line with expectations, and we note that the Company has invested in improvements at the plant, often at shareholder expense, to achieve these improvements, which Mr. Gurganus expects to continue.

As to the Company's other coal units, Sierra Club and Joint Intervenors criticize the Company's modeling that does not allow these units to retire prior to 2024. However, we find Mr. Pike's testimony on this point persuasive. There are clearly practical constraints and considerations to retiring units that should not be ignored by IRP modeling, such as labor force, community impacts, transmission constraints, and not least of all rate impact to customers. We also agree with Mr. Pike and Wabash Valley witnesses that it is reasonable to swap the retirement dates of Gibson Units 4 and 5, to accommodate the wishes of the joint owners of Gibson 5 and save the expense associated with the planned flue gas work for the units. Overall, we find that this moderate transition approach is reasonable and results in reasonable depreciation rates that, while increased compared to previous depreciation studies, are moderated to that which would accompany a more expedited transition.

Regarding the other Joint Intervenors' criticism of the IRP process, we find that the IRP is at issue in this proceeding only to the extent it helps support the proposed depreciation rates. We find Mr. Park's response to the various IRP issues reasonable and thorough. Further, we agree with Mr. Pike that models only inform us and do not themselves make reasoned recommendations or decisions. Rather, the Company does that through a review of various scenarios, sensitivities, and portfolios.

In sum, we find that DEI's proposed retirement dates, as revised in its rebuttal testimony for the Gibson 4/5 retirement date switch, are reasonable and prudent and will result in fair and reasonable rates for customers who benefit from the Company's rate base.

(C) <u>Depreciation Rates and Expense</u>. Mr. Spanos presented and supported a depreciation study related to DEI's electric plant as of December 31, 2018, as well as a fair value study. He testified that depreciation refers to the loss in service value not restored by current maintenance, incurred in connection with the consumption or prospective retirement of utility plant in the course of service from causes which are known to be in current operation, against which the Company is not protected by insurance. He stated that among the causes to be given consideration are wear and tear, decay, action of the elements, obsolescence, changes in the art, changes in demand and the requirements of public authorities. He testified that in preparation of his study, he followed generally accepted practices in the field of depreciation and valuation. He

testified that his recommended depreciation rates appropriately reflect the rates at which the costs of DEI's assets are being consumed over their useful lives, and that the rates are an appropriate basis for setting electric rates in this matter and for the Company to use for booking depreciation and amortization expense going forward.

He testified the purpose of the depreciation study was to estimate the annual depreciation accruals related to electric plant in service for ratemaking purposes and determine appropriate average service lives and net salvage percentages for each plant account. He stated that in preparing his study, he used the straight line remaining life method of depreciation, with the equal life group procedure for all plant assets except some general plant accounts. He stated the annual depreciation is based on a method of depreciation accounting that seeks to distribute the unrecovered cost of fixed capital assets over the estimated remaining useful life of each unit, or group of assets, in a systematic and rational manner. He testified that for certain General Plant Accounts, he used the straight line remaining life method of amortization. He explained that the annual amortization is based on amortization accounting that distributes the unrecovered cost of fixed capital assets over the remaining amortization period selected for each account and vintage.

To determine his recommended annual depreciation accrual rates, in the first phase of his study, he estimated the service life and net salvage characteristics for each depreciable group -- each plant account or subaccount identified as having similar characteristics. Then in the second phase of his study, he calculated the composite remaining lives and annual depreciation accrual rates based on the service life and net salvage estimates determined in the first phase.

He explained that in the first phase of the study he compiled historic data through 2018 from records related to DEI's plant; analyzed these data to obtain historic trends of survivor and net salvage characteristics; obtained supplementary information from DEI's management, and operating personnel concerning practices and plans as they relate to plant operations; and interpreted the above data and the estimates used by other electric utilities to form judgments regarding average service life and net salvage characteristics. To analyze the service life data, he used the retirement rate method and applied the retirement rate method to each different group of property in the study. He explained that the retirement rate method produces an original survivor curve for that property group, and that interpretation of the original survivor curves is required in order to use them as valid considerations in estimating service life. He explained that widely used Iowa-type survivor curves were used to perform the interpretations. He further testified that he used the life span technique, which has been used previously for DEI, to estimate the lives of significant facilities for which concurrent retirement of the entire facility is anticipated.

He testified that DEI provided the production facility life span estimates based on informed judgment that incorporates factors for each facility such as the age, use, size, nature of construction, and technology of the facility; management plans and outlook for the facility; the estimates for similar facilities for other utilities; and the results of the Company's 2018 IRP. DEI witness Mr. Keith Pike discusses the life span estimates in detail, as is discussed below. Mr. Spanos also stated that he made a field review of DEI's property during November 2018 to observe representative portions of plant and that he also made field visits during prior studies since 1999. He explained that field reviews are conducted to become familiar with Company operations and

obtain an understanding of the function of the plant and information with respect to the reasons for past retirements and the expected future causes of retirements.

He next discussed net salvage -- a component of the service value of capital assets that is recovered through depreciation rates. He explained that the service value of an asset is its original cost less its net salvage, and net salvage is the salvage value received for the asset upon retirement less the cost to retire the asset. He stated that when the cost to retire exceeds the salvage value, the result is negative net salvage.

He testified that inasmuch as depreciation expense is the loss in service value of an asset during a defined period, (*e.g*. one year), it must include a ratable portion of both the original cost and the net salvage. That is, he stated, the net salvage related to an asset should be incorporated in the cost of service during the same period as its original cost so that customers receiving service from the asset pay rates that include a portion of both elements of the asset's service value, the original cost and the net salvage value.

He testified that the net salvage percentages estimated in the depreciation study were based on informed judgment that incorporated factors such as the statistical analyses of historical net salvage data; information provided by the Company's operating personnel; general knowledge and experience of industry practices; and trends in the industry in general. He stated that the statistical net salvage analyses incorporate the Company's actual historical data for the period 1989 through 2018 and consider the cost of removal and gross salvage ratios to the associated retirements during the 30-year period. He explained that the net salvage percentages for generating facilities were based on two components: the interim net salvage percentage, and the final net salvage percentage. He stated that the interim net salvage percentage was determined based on the historical indications from the period 1989 to 2018 of the cost of removal and gross salvage amounts as a percentage of the associated plant retired. He stated that the final net salvage, or decommissioning and dismantlement component, was determined based on the retirement activities associated with the assets anticipated to be retired at the concurrent date of final retirement. He testified that the decommissioning or dismantlement component has been included in the net salvage percentage for steam, hydro and other production facilities; the decommissioning and dismantlement component is part of the overall net salvage for each location within the production assets. He stated that based on studies for other utilities and the cost estimates of DEI, it was determined that the decommissioning or dismantlement component for steam, hydro, and other production facilities is best calculated by dividing the decommissioning or dismantlement cost by the surviving plant at final retirement. He explained that these amounts at a location basis are added to the interim net salvage percentage of the assets anticipated to be retired on an interim basis to produce the weighted net salvage percentage for each location.

He testified that the decommissioning or dismantlement cost estimates are based on the decommissioning study of each generating site performed by Burns and McDonnell (discussed below). He explained that these estimates are based on the current cost (year 2018 dollars) to decommission the facilities. He noted, however, that the costs to decommission power plants have tended to increase over time (as have construction costs in general). For this reason, he testified, in order to recover the full decommissioning costs for each site, these costs need to be escalated to the time of retirement.

After Mr. Spanos estimated the service life and net salvage characteristics for each depreciable property group, he then calculated the annual depreciation accrual rates for each depreciable group based on the straight line remaining life method, using remaining lives weighted consistent with the equal life group procedure. He stated that the calculations of annual depreciation accrual rates were developed as of December 31, 2018. He explained that the straight line remaining life method of depreciation allocates the original cost of the property, less accumulated depreciation, less future net salvage, in equal amounts to each year of remaining service life.

He testified that in the equal life group procedure, the property group is subdivided according to service life -- that is, each equal life group includes that portion of the property which experiences the life of that specific group. He stated that the relative size of each equal life group is determined from the property's life dispersion curve. He explained that this procedure eliminates the need to base depreciation on average lives, inasmuch as each group is equivalent to a unit having a single life. The full costs of short-lived units are accrued during their lives, he stated, leaving no deferral of accruals required to be added to the annual costs associated with long-lived units. The calculated depreciation for the property group is the summation of the calculated depreciation based on the service life of each equal life group, according to Mr. Spanos.

Mr. Spanos testified that the equal life group procedure allocates the capital cost of a group property to annual expense in accordance with the consumption of the service value of the group.

He added that the more timely return of plant investment accomplished by fully accruing each item's cost during its service life not only reduces the risk of incomplete capital recovery, but also results in less investment-related cost over the life span of a depreciable group. He explained that under the equal life group procedure, the future book accruals (original cost less book reserve) for each vintage are divided by the composite remaining life for the surviving original cost of that vintage, and the vintage composite remaining life is derived by summing the original cost less the calculated reserve for each equal life group and dividing by the sum of the whole life annual accruals.

Mr. Spanos stated that amortization accounting is used for accounts with a large number of units, but small asset values. In amortization accounting, he explained, units of property are capitalized in the same manner as they are in depreciation accounting; however, depreciation accounting is difficult for these assets because periodic inventories are required to properly reflect plant in service. Consequently, he stated, retirements are recorded when a vintage is fully amortized rather than as the units are removed from service -- that is, there is no dispersion of retirement; all units are retired for depreciation purposes when the age of the vintage reaches the amortization period. He emphasized that amortization accounting is only appropriate for certain Common and General Plant accounts – in this case, for plant accounts which represent approximately one percent of depreciable plant.

Mr. Spanos testified that the development of the book reserve for each location has been established based on a composite rate for a group of locations within an account; thus, the actual book reserve at the location level was determined by applying a composite rate to the plant balance.

He explained that when dealing with group depreciation there are multiple parameters that affect the rate, such as interim survivor curve, probable retirement date and net salvage percent among the key factors. He further explained that in conducting a depreciation study, a more defined manner of determining the individual location rates should be established. He testified that these key factors or parameters establish the theoretical reserve which is utilized to appropriately assign the book reserve at the location and vintage level. He noted that updating retirement dates adjusts the weighting between the locations; therefore, a changed retirement date, survivor curve or net salvage percent for one location affects all the locations in the account.

Mr. Spanos next addressed depreciation rates for DEI's new solar generation assets planned by year-end 2019. He explained that the rates for these assets will be based on interim survivor curves for each account, a negative net salvage percent for some of the accounts, and a 25- year life span for all assets at the location. He stated that an estimated rate for new battery storage assets in Account 363 was also prepared.

Mr. Spanos testified concerning his fair value study. He explained that his study segregated the property by plant account consistent with the depreciation study and Company accounting system. More specifically, he first determined the Reproduction Cost New ("RCN") for the property in service at December 31, 2018, by trending the original cost and then deducting depreciation to arrive at the Reproduction Cost New Less Depreciation ("RCNLD"). He explained that for the property for which he determined the trended original cost, he used cost indexes. He calculated the RCN of the Company's electric plant in service as of December 31, 2018, to be $27,218,507,545; and he calculated the RCNLD of the Company's electric utility plant in service as of December 31, 2018 to be $11,633,493,162, which is 43% of the Reproduction Cost New. Mr. Spanos also provided the same fair value study information using the Company's forecasted electric utility plant in service as of December 31, 2020. He testified that it was calculated using the same methodology as his 2018 study and that the RCN of the Company's electric plant in service as of December 31, 2020, is $28,967,368,703 and the RCNLD is $12,054,723,694.

Company witness Mr. Jeffery Kopp sponsored the decommissioning study prepared by Burns & McDonnell for this proceeding. Mr. Kopp explained why it is necessary to demolish a generating station at the end of useful life, citing reuse of land, public safety, and environmental remediation of potential health hazards. The decommissioning study provided an estimated total cost, in 2018 dollars, of decommissioning and dismantling each Company-owned generation unit at the end of its useful life, as well as the total cost of decommissioning and dismantling the common facilities at these generating plants. The total decommissioning and dismantlement cost as determined by Burns and McDonnell and reflected in the Decommissioning Study, was net of salvage value for scrap materials at each plant. In general, the study assumed that each generating site would be restored to a condition appropriate for industrial use. This means that all sites will have above grade buildings and equipment removed, foundations removed to two feet below grade, be rough graded, and seeded. Sites also will have small diameter underground pipes capped and abandoned in place. Mr. Kopp explained that each of DEI's electric generating plants was evaluated, including steam, hydro and other facilities, including solar and that the Burns & McDonnell team visited all plants for which site-specific decommissioning and dismantlement cost estimates were prepared. Mr. Kopp described the types of costs included in the decommissioning study and how the estimates for the direct costs were developed using a bottoms-

up cost estimating approach. He explained how scrap values were determined and the necessity of including project indirect costs in the estimate, as well as the determination of the indirect costs included. He further explained that contingency costs had been included in the estimate, and that a contingency cost accounts for unspecified but reasonably expected additional costs to be incurred by the Company during the execution of decommissioning and dismantlement activities and contingency. He explained that these costs are in addition to the direct costs associated with the base decommissioning and dismantlement known scope items and that application of contingency is not only appropriate, but also standard industry practice. He further explained that DEI provided estimated remaining M&S inventory balances for inclusion in the Decommissioning Study, with a portion of the inventory given a salvage credit to reflect potential reuse or resale of remaining M&S. The estimated total net decommissioning and dismantlement cost for DEI's generation facilities included in the study is $420,569,400 in 2018 dollars. Mr. Kopp stated that the estimates used in the study were carefully prepared using standard and accepted estimating techniques and the best information available, and are consistent with Burns & McDonnell's industry experience. He stated that assumptions used were reasonable and that the inclusion of remaining M&S balance in the decommissioning and dismantlement costs is also reasonable, as maintaining an adequate inventory of M&S for the operation and maintenance of the generating units up to their end of life represents a prudently incurred cost for providing service to customers.

OUCC witness Garrett testified that he employed a depreciation system using actuarial plant analysis to statistically analyze the Company's depreciable assets and develop reasonable depreciation rates and annual accruals. In contrast to Mr. Spanos' use of the Equal Life Group ("ELG") procedure, Mr. Garrett recommends the calculation of depreciation rates under the Average Life Group ("ALG") procedure. He also proposed adjustments to the Company's proposed terminal net salvage rates. More specifically, Mr. Garrett testified that the OUCC's proposed depreciation adjustments comprise several key issues: (1) calculating rates under the ALG method; (2) removing contingency costs from DEI's decommissioning cost estimates; (3) removing inventory costs from DEI's decommissioning cost estimates; (4) removing escalation factors from DEI's terminal net salvage calculations; and (5) adjusting the Company's proposed service lives for several of its transmission and distribution accounts. During cross-examination, Mr. Garrett testified that he did not make a field visit prior to completing his depreciation recommendations.

Mr. Garrett testified that depreciation rates calculated under the ELG procedure for a particular vintage group of property will be higher in earlier years relative to later years, citing to [Wolf] and the National Association of Regulatory Utility Commissions ("NARUC") as support for his testimony. In contrast, he stated, depreciation rates calculated under the ALG procedure for a particular vintage group of property will be the same each year. Further, he testified that in order for depreciation rates calculated under the ELG procedure to be accurately applied, a utility's depreciation rates would need to be adjusted each year to reflect the decreasing depreciation rates for applicable account. He stated that under the ELG procedure, as proposed by DEI, the Company's depreciation rates would simply be applied each year until the next depreciation study is filed, regardless of the fact that depreciation rates should decrease annually during that time under the ELG procedure. He testified that this arrangement does not result in a systematic and rational cost recovery mechanism, and, by proposing depreciation rates under this scheme, DEI

has failed to meet its burden to make a convincing showing that its proposed depreciation rates are not excessive.

He stated that, in theory, the ELG could be part of a systematic and rational cost recovery system. In practice, however, it would be difficult to come to the same conclusion, because in order for the ELG procedure to be properly applied, a utility would need to revise depreciation each year. However, he stated, given the logistical realities involved with prosecuting rate cases, this would be impractical and inefficient.

He further testified that when a utility has made substantial, recent capital investments, depreciation expense calculated under the ELG method will always be higher than the expense calculated under the ALG method; the larger the amount of the investments, the larger the discrepancy will be between the two procedures. He attributed utilities' use of the ELG method to a desire by utility finance managers to increase cash flow and a desire by utility investors to reduce risk through accelerated capital recovery. He emphasized that the rules and standards governing capital recovery through depreciation require that public utilities recover their capital investments in a systematic and rational manner, accomplished by estimating service life through actuarial analysis and other objective techniques.

He noted that in the pending I&M rate case, the utility proposed depreciation rates using the ALG procedure; no party opposed the utility's use of the ALG procedure and no party proposed using the ELG procedure. He stated that, in his experience, the ALG procedure is the most commonly used procedure by analysts in depreciation proceedings. Thus, he concluded, the majority of depreciation rates approved by regulators around the country are calculated under the ALG procedure.

Mr. Garrett testified that if the IURC accepted all of DEI's substantive depreciation positions, but simply adopted the ALG procedure, it would result in depreciation rates that are much more fair and reasonable than those proposed by the Company. He further testified that it could be reasonable to use the ELG procedure if DEI was also proposing to have its depreciation rates adjusted every year in order to reflect a mathematically proper application of the ELG procedure, but that was not a part of the Company's filing. Instead, he claimed, to the extent the Company's ELG-derived rates are adopted, the Company will receive arbitrarily higher cash flows for its investors each subsequent year after this proceeding until its next depreciation study is filed. Under these circumstances, he concluded, the Company has not made a convincing showing that its proposed rates are not excessive.

Mr. Garrett next addressed the issue of contingency costs. He testified that the Company's terminal net salvage costs are estimated through demolition studies for most of its generating units. He stated that the demolition studies include contingency costs that purportedly reflect uncertainties in future demolition estimates. However, he claimed that contingency costs are unknown by definition, and therefore are not known and measurable. He stated that charging current ratepayers for speculative costs that may not even occur up to decades in the future is inherently problematic from a ratemaking perspective. Mr. Garrett stated that Duke identified no legal obligation in its testimony that requires it to demolish its power plants consistent with the activities described in the decommissioning cost estimates. He opined that in the absence of such

a legal requirement being imposed in the foreseeable future, actually incurring these costs is speculative. He also suggested that if and when Duke actually demolishes the power plants and requires more funding to do so, it can request additional funds from ratepayers when actual costs are known.

With regard to the issue of inventory costs, Mr. Garrett noted that DEI included $185 million of inventory costs as part of its decommissioning cost estimates. However, he stated, inventory costs are not typically included as part of decommissioning cost estimates, and he testified that he could not recall ever seeing such costs proposed in a decommissioning study, including those filed by Burns & McDonnell in prior cases. He noted that decommissioning studies estimate the terminal salvage and cost of removal of generating facilities, and he testified that DEI has not shown how the inclusion of inventory relates to that process. Furthermore, he stated that Burns & McDonnell has not conducted an analysis supporting the level of inventory included in the decommissioning costs.

Mr. Garrett next addressed the Company's use of escalation factors to escalate its demolition cost estimates from present-day dollars to the future retirement date of each generating unit by applying an annual cost inflation factor. According to Mr. Garrett, the problem with this approach is that current ratepayers are forced to pay for a future-value cost with present-day dollars. He claims that this "scheme" violates basic time-value-of-money principles. He testified that if future, escalated costs are allowed, they should then be discounted back to present-day dollars by the Company's weighted average cost of capital, noting that a similar approach is used to account for asset retirement obligations. He concluded, however, that it would be more straight-forward and reasonable to simply disallow the escalation factors and base the Company's decommissioning costs on present value.

Brian Andrews testified on behalf of the Industrial Group with respect to depreciation issues. His stated that DEI's proposed depreciation expense increase is excessive and unduly burdens customers.

He testified that DEI's continued reliance on the ELG procedure for calculating depreciation rates is burdensome to customers. He claimed that ELG depreciation rates are front-loaded and must be updated annually for proper implementation. He further claimed that DEI is the only Duke electric company that utilizes the ELG procedure to calculate depreciation rates, and it has the highest depreciation rate of any of the Duke electric companies. He stated that all other Duke electric companies use the ALG procedure, the most commonly utilized procedure for calculating depreciation rates.

He argued that, by rejecting ELG in favor of ALG, the Commission has an excellent opportunity to achieve the following: (1) allow Duke to retire its coal plants early according to its preferred portfolio, helping achieve significant carbon reductions in Indiana, (2) significantly reduce the rate increase while allowing those early retirements and the resources that will eventually replace them, and (3) utilize the depreciation procedure that is most commonly used in the country.

Mr. Andrews also argued that DEI is attempting to recover through depreciation rates an excessive amount of costs for the demolition of its production plants. He noted that in the decommissioning cost estimates, Duke has included net inventory costs, which is the level of inventory that existed at the plants as of June 2018. He took the position that, as Duke knows the precise retirement dates of these facilities, Duke should effectively manage this inventory and strive to eliminate these balances over the remaining life of the plants. He argued that these costs should be removed from the decommissioning costs estimates that are included in the net salvage rate and depreciation rate calculations.

He also noted that, in the decommissioning cost estimates, Duke has included contingency costs. He characterized these costs as simply a 20% adder to the demolition costs and unnecessary depreciation expense. He recommended that these contingency costs be removed from the decommissioning costs estimates that are included in the net salvage rate and depreciation rate calculations.

Mr. Andrews observed that in the net salvage rate calculations, Duke has included cost escalation. He testified that these costs were determined with an excessive and unsupported 2.5% annual inflation rate and burden current customers with unnecessary depreciation expense. He recommended that these escalation costs should be based on 2.0% inflation before being included in the net salvage rate and depreciation rate calculations.

Mr. Andrews stated that the IURC should reject Duke's ELG depreciation rates and approve the depreciation rates presented in his testimony. He testified that this will reduce the test year depreciation expense by $120 million, or by 83% of Duke's proposed increase, while still allowing coal plant retirements at Duke's proposed time schedule.

Mr. Spanos testified in rebuttal, noting that while each party proposes a fairly significant change in depreciation expense compared to the Company's proposal, the vast majority of the dollar impact of their changes is due to their deviation from Commission precedent. That is, most of their proposed reduction in depreciation expense is based on issues that the Commission has already decided. He stated that the issue with the single largest impact is the Company's use of the Equal Life Group ("ELG") procedure instead of the Average Life Group ("ALG") procedure. He noted that the Commission has clearly stated that "[w]e consider the debate between ELG and ALG to have already been resolved. This Commission has frequently and consistently expressed its preference for the use of the ELG procedure."[5] The Commission has similarly ruled that it is appropriate to include contingency in decommissioning estimates and that decommissioning estimates should be escalated to the date of retirement (for example, see NIPSCO Cause No. 43526). Accordingly, the only issues raised by OUCC and IG that have not been resolved by the Commission relate to the inclusion of inventory costs in decommissioning (which is addressed by DEI rebuttal witnesses Kopp and Mosley), Mr. Andrews' use of a lower escalation rate, and Mr. Garrett's life estimates for a few accounts.

[5] IURC 8/25/2010 Final Order in Cause No. 43526 at 51.

Mr. Spanos stated that the OUCC proposes a reduction in depreciation expense of $107 million, however, $93 million of this amount is due to the use of the ALG procedure, the removal of contingency and the removal of escalation. Similarly, he stated, the Industrial Group proposes a $120 million reduction in depreciation expense, however, $88.7 million of this is due to the use of the ALG procedure. An additional amount is the result of the parties' proposal to remove contingency.

With regard to Mr. Garrett's and Mr. Andrews' argument that ELG depreciation requires annual updates, Mr. Spanos testified the simple examples they provide to support their opinions are not reflective of real-world operations. He stated that this argument is unpersuasive for multiple reasons. First, he noted this Commission has used ELG for many years and has not required companies to update depreciation rates annually. Second, he stated that both Mr. Garrett and Mr. Andrews are incorrect that annual updates would be required. He pointed out that both examples shown to support their opinions are simplistic examples based on only a single vintage of plant. Thus, their examples do not match real-world experience. For most utility plant accounts, he stated, assets are added and retired every year. Due to this continual activity, he testified, ELG depreciation rates do not actually change as much as Mr. Garrett and Mr. Andrews claim. Third, he testified that annual updates are quite common in Pennsylvania. He stated that his firm performs depreciation studies – and annual updates – for most utilities in Pennsylvania. As a result, he has the opportunity to review changes to depreciation rates that occur each year that result from annual updates to depreciation calculations. In actual practice, he testified, ELG depreciation rates are much more stable than Mr. Garrett and Mr. Andrews claim. He stated that in aggregate, the ELG depreciation rates typically do not change dramatically from year to year and would not warrant annual updating as Mr. Garrett and Mr. Andrews assume.[6] Mr. Spanos testified that, in reality, there is little need to update depreciation rates annually when using the ELG procedure. He noted that the Commission has not been concerned enough with this issue to require annual updates in the many decades since the ELG procedure was first adopted. Accordingly, he concluded, Mr. Garrett's and Mr. Andrews' arguments to this effect are not a persuasive reason to abandon its use in Indiana.

Mr. Spanos also testified about the downsides of moving to an ALG methodology. He testified that a switch from ELG to ALG depreciation rates will result in artificially low depreciation rates due to the higher accumulated depreciation currently on the Company's books due to the historical use of ELG depreciation rates. He stated that this in turn will result in a short-term benefit that will be paid for by future customers who will also pay a return on the higher rate

[6] Mr. Spanos noted there are other aspects of depreciation that have the potential to change each year. For example, any additions to life span property result in a change to the depreciation rate (since the new asset will have a shorter life than the existing assets at the life span facility). Remaining life depreciation rates also change each year. He pointed out that Mr. Garrett proposes a change in approach from Commission precedent for terminal net salvage that would require annual updates, proposing to only include decommissioning costs at today's cost levels, which would mean the decommissioning costs would need to change each year due to changes in cost levels that occur from year to year. However, Mr. Spanos stated, for Mr. Garrett's terminal net salvage proposal (as well as other aspects of depreciation that change each year), he appears unconcerned with the potential for annual updates to depreciation rates. This gives less merit to Mr. Garrett's concerns regarding ELG, in Mr. Spanos' view.

base that will result from the proposed ALG depreciation rates. He characterized this approach as inequitable both because it will artificially reduce rates at the expense of future customers and because those customers will have to pay for the costs of generation that replaces the Company's coal-fired generation that will be retired. He concluded that Mr. Andrews' proposal would unfairly shift the costs of power plants that will soon be retired to future customers, who will receive no service from these plants. Additionally, Mr. Spanos noted, the historical use of ELG depreciation rates, as well as the inclusion of contingency and escalation in decommissioning estimates, already provides a benefit to customers as the Company transitions from coal-fired generation. While the retirement of coal-fired generation at earlier ages than previously expected does result in an increase in depreciation expense in this case, he stated that the Company has recovered more depreciation to date due to the historic use of ELG depreciation rates and more adequate levels of decommissioning (due to the inclusion of contingency and escalation) means that accumulated depreciation is higher than had Mr. Andrews' and Mr. Garrett's preferred approaches been adopted. The result, he noted, is that there is less to recover for the plants that will be retired. To put this a different way, he explained, had ALG been used in the past and no contingency or escalation included, the increase in depreciation resulting from earlier coal-fired generation would be higher than it is in the current case.

Mr. Spanos testified that Mr. Garrett is incorrect to argue that "it is preferable for regulators to ensure that assets are not depreciated before the end of their economic useful lives." While the goal is to estimate depreciation as accurately as possible, it is important to remember that depreciation is a forecast of events many years in the future and as a result estimates do not always match the actual experienced lives and net salvage of a Company's assets. Given this reality, Mr. Spanos opined, erring on the higher side for depreciation rates is preferable than the lower side because the likelihood and the risks of adverse effects on both the utility and customers are greater if depreciation is underestimated. He also added that too low of depreciation rates increases rate base, which results in customers paying higher total rates due to the return on rate base.

Mr. Spanos also took issue with Mr. Garrett's and Mr. Andrews' use of the word "accelerated" to describe the ELG methodology. He testified that ELG is a straight line method; ELG recovers costs on a straight line basis over the expected life of each equal life group.

Mr. Spanos reiterated that there are sound reasons to use the ELG procedure. He noted that this Commission has addressed this issue multiple times in the past and ruled in favor of ELG. And he noted that ELG is also discussed and supported in authoritative depreciation texts and academic literature. One such authority – and a very significant one – is Robley Winfrey, who, as a professor at Iowa State University, developed the Iowa survivor curves that are universally used in estimating service lives based on historical retirement data and is generally regarded as the father of utility depreciation practices, referred to the ELG procedure as "the only mathematically correct procedure."[7]

[7] Robley Winfrey, Depreciation of Group Properties, Bulletin 155 (Ames, IA: Iowa State University Press, 1942, reprinted 1969); p. 71.

Additionally, he emphasized that it is also important to understand that the change in depreciation resulting from the OUCC and Industrial Group's proposed change to ALG rates is not simply due to the difference between the two procedures. Rather, a portion of this change results from the fact that accumulated depreciation is higher today due to the historical use of ELG depreciation rates than it would have been had ALG depreciation rates been used. A change to ALG rates today will, therefore, result in a greater benefit to today's customers than to other generations of customers. This occurs both because depreciation rates are lower due to the historical use of ELG depreciation rates and because rate base is lower due to the higher accumulated depreciation resulting from the historical use of ELG depreciation rates. If Mr. Andrews' proposal were adopted, it will be future customers that pay the cost for this benefit given to current customers. Future customers will have to pay higher ALG depreciation rates than current customers as remaining life depreciation rates result in accumulated depreciation that will eventually revert to a lower level from the use of the ALG procedure. Future customers will also have to pay a return on the higher rate base that results from the lower ALG depreciation rates. In summary, he testified, Mr. Andrews' proposal will result in shifting costs from today's customers to future generations of customers.

Mr. Spanos next addressed the three adjustments proposed by the OUCC and Industrial Group to the decommissioning cost estimates used in the depreciation study. The first type of adjustment is related to the escalation of decommissioning costs to the time of retirement. The OUCC proposes to remove the escalation component entirely. The Industrial Group recommends the escalation of decommissioning costs, but uses a 2.0% escalation rate instead of the 2.5% escalation rate proposed by Mr. Spanos. The second proposed adjustment is that both the OUCC and Industrial Group advocate removing contingency from the decommissioning estimates. Mr. Spanos noted that both of these issues have been previously addressed by the Commission, which has ruled in favor of the Company's proposals to include escalation and contingency. The third proposed adjustment is that both parties propose the removal of inventory costs from the Company's terminal net salvage estimates. Mr. Spanos noted that he does not address this issue, which is instead addressed by rebuttal witnesses Mr. Kopp and Mr. Mosley. He also noted that Mr. Kopp also addresses the contingency issue, although Mr. Spanos briefly discussed Commission precedent regarding this issue.

With regard to the issue of including escalation in the calculation of decommissioning costs, Mr. Spanos stated that escalation is necessary in order to recover the full net salvage costs of these facilities over their service lives and has previously been accepted by the Commission. He noted that Mr. Andrews recognizes that escalation should be included in the terminal net salvage estimates, but proposes a lower escalation rate of 2.0%. Mr. Spanos testified that, in order to equitably recover the full costs of the Company's assets, including net salvage, net salvage must be based on future costs because decommissioning is going to occur in the future. He emphasized that net salvage must include the effects of future increases in costs, as recognized on multiple occasions by this Commission.

Mr. Spanos noted that Mr. Garrett makes one main argument in support of his proposal to eliminate escalation from the terminal net salvage estimates. He states that "[i]t is not proper to charge current ratepayers for a future cost that has not been discounted to present value." He supports this assertion by stating that "[t]he 'time value of money' concept is a cornerstone of

finance and valuation." Mr. Spanos testified, his opinion on this concept with regard to depreciation is incorrect. Mr. Spanos reiterated that depreciation is based on the actual cost at the time of installation or retirement. While the "time value of money" may be a cornerstone of finance and valuation, it is not a concept used in depreciation as widely practiced in the industry. Indeed, Mr. Spanos testified, failing to incorporate escalation, as Mr. Garrett proposes, will result in understating future net salvage costs, resulting in intergenerational inequity by forcing future customers to pay too much for the facilities.

Mr. Spanos next noted that, unlike Mr. Garrett, Mr. Andrews includes an escalation component in his terminal net salvage estimates. However, he uses a 2.0% escalation rate instead of the 2.5% escalation rate used by the Company which he says "has no support and is excessive." Mr. Spanos testified that his estimate of 2.5% is reasonable for a long term rate of cost increases for power plant decommissioning. He stated that his estimate is consistent with escalation rates used previously, as well as other sources including long-term averages of Consumer Price Index ("CPI") inflation and long-term inflation forecasts; the latter is compiled by the Federal Reserve in the Livingston Survey. He noted that CPI inflation has typically been lower than long-term construction cost increases and so, if anything, his estimate is conservative.

Mr. Spanos testified that Mr. Andrews only provided an analysis based on comparing the Livingston Survey to actual CPI inflation since 1991. From this analysis, he concludes that the "average forecast error is 0.6 percentage points" for this survey since 1991. Since the current 10-year median forecast is 2.26%, he subtracts 0.6 from 2.26% to get a value a 1.66%. He concludes that 1.66% is a more realistic forecast, although he proposes an escalation rate of 2.0% "to be conservative." Mr. Spanos testified that there are multiple issues with Mr. Andrews' analysis. First, he stated that the Livingston Survey is not the only support for Mr. Spanos' estimate. Second, Mr. Andrews' calculation of the forecast error is entirely the result of two periods of time. The first is from the early 1990s and the second from the late 2000s. The forecast error in the early 1990s resulted because these years followed the high inflation of the 1970s and 1980s. That is, forecasters not unreasonably expected that higher inflation to continue, but it did not. The second period is comprised of years that encompassed the Great Recession. The Great Recession resulted in very low inflation and even deflation, but was an abnormal event. Accordingly, Mr. Spanos testified, the period of time reviewed by Mr. Andrews' likely overstates any forecast error, particularly downside errors. Indeed, the last two decades have experienced low inflation by historical standards. It should be at least as likely that current forecasts would be too low rather than too high. However, he testified, Mr. Andrews only anticipates that forecasters could be estimating too high of inflation.

Mr. Spanos testified that these concepts are illustrated if we look at longer term inflation. He stated that looking at longer term inflation rates shows that there have been many years with higher inflation. As a result, he explained, simply assuming that a 2.0% inflation rate will continue into the future is not necessarily a reasonable assumption. Mr. Spanos provided data going back to 1960 and noted that the inflation that occurred over 10-year periods was greater than 2.5% in many years. Additionally, Mr. Spanos testified that while the CPI provides a good indication of changes in prices in the overall economy, it is not necessarily a good indicator of changes in decommissioning costs. A price index that serves as a better proxy for changes in decommissioning costs is the Handy Whitman construction cost index. Mr. Spanos provided a comparison of the

changes in the Handy Whitman Index for Steam Production Plant to CPI over the past 20 years; the data shows that construction costs have increased faster than CPI over this time period. Further, he stated, the data indicates that for every single long-term period ending in 1960 through 2018, the Handy Whitman index increased at an average rate that was greater than the 2.5% escalation rate he proposed. Thus, he concluded, the Handy Whitman index supports a higher escalation rate than he proposed. In summary, he testified that multiple sources support the 2.5% escalation rate he used, and, if anything, his estimate is conservative. He concluded that Mr. Andrews' estimate is, in his judgment, too low and will not fully recover the costs to retire the Company's power plants over their service lives.

Mr. Spanos next discussed the issue of contingency. He stated that Mr. Garrett and Mr. Andrews also both propose the removal of the contingency component from the decommissioning cost estimates. Mr. Spanos noted that the use of contingency has also been previously addressed by the Commission. For example, he noted the following excerpt from a NIPSCO case, in which the Commission held that the inclusion of contingency was appropriate and also noted that Commission precedent supported the inclusion of contingency:

> Mr. Selecky argued either the post-remediation value of the land in industrial condition should be an offset to the dismantlement costs or the contingency should be eliminated as a trade-off for the value of the land. Mr. Selecky did not identify the dollar value of the land after dismantlement. As a result, there is no evidence in the record to guide us in determining whether this would produce a material difference in the depreciation rates or be a reasonable trade-off for the contingency, assuming for the sake of argument it would even be proper to treat a non- depreciable asset like land as salvage. Further, we find it noteworthy that Mr. Selecky is not a licensed real estate appraiser. As a result, the record is devoid of any evidence to judge whether his proposal to equate the value of the land with the contingency is reasonable. (42356 Order at 53-54.) We also give weight to the fact that the 20% contingency factor used in the BMcD demolition cost studies is conservative compared to the 25% contingency factor we accepted in PSI Energy, Inc., Cause No. 42359, at 70-71. Also, the assumption that the sites will be remediated to industrial condition, rather than greenfield condition, is also conservative. Id. at 70. No evidence was presented that this Commission has ever used the value of land as an offset to an asset's cost of removal. In fact, Mr. Selecky did not identify to us any decision of any regulatory commission accepting his position regarding land and the contingency. Petitioner's JJS-R5; Petitioner's Ex. JJS-R6. Given that Mr. Selecky's recommendation would be such a departure from our past practice and that we have scant evidence to guide us in this exercise, we reject Mr. Selecky's proposal.

Mr. Kopp also provided rebuttal testimony regarding the appropriateness of including contingency in the decommissioning study for this proceeding. Specifically, he noted that the application of contingency is a common and prudent practice in the construction industry, and it is included in order to recognize the probability of increases in cost over the base estimated costs due to unknowns. Mr. Kopp explained that some of these costs cannot be determined until the dismantlement process has begun. Therefore, contingency is applied on top of the base estimated cost in order to formulate a reasonable estimate to dismantle the generating facilities.

Mr. Kopp explained that the 20% contingency amount he included in this decommissioning study is the same percentage as the contingencies he has prepared for decommissioning studies for other electric utilities that have been approved by regulatory agencies in other states.

Contingency is added to account for unknown, but reasonably expected to be incurred costs. These costs are related to weather delays, unknown environmental contamination, discovering equipment or materials not shown on drawings, additional dewatering requirements and changes in the manner the work is performed.

Mr. Kopp responded to Mr. Andrews' contention that DEI has no legal obligation to demolish its retired power plants by expanding on the explanation in his direct testimony of the necessity for demolition of power plants. He explained that although there may be no legal obligation to demolish a power plant, there are legal obligations to comply with environmental regulations. He also explained that the alternative to full demolition is to retire a plant in place. He explained that retiring a plant in place requires carrying costs that are necessary to maintain a safe site and be in compliance with applicable regulations. Mr. Kopp stated in his experience he has found that retiring in place is not a cost-effective long-term scenario when the carrying costs are taken into account.

Mr. Kopp concluded by stating that excluding these reasonably expected to be incurred costs by not including contingency costs will not give the full picture of decommissioning costs. If these costs are not accounted for in planning for future decommissioning, the costs will be passed on from the current ratepayers to future ratepayers.

Company witness, Mr. Mosley, provided rebuttal testimony addressing the inclusion of inventory in the decommissioning study. He explained Duke Energy has experience managing generating stations as they near the end of their useful lives and consistently attempts to deplete remaining inventory and/or transfer it to another generating facility where it can still be used. However, there are risks associated with premature depletion of inventory due to limited availability and long lead time of parts required to sustain reliable operation that must be considered.

In addition, Mr. Mosley stated that there are often limitations on the compatibility of inventoried parts that could be transferred from one station to another. For example, most spare parts that fit Gallagher's coal mills do not fit the mills at Gibson or Cayuga. Most steam turbine and generator parts are model specific and cannot be used at other facilities. Combustion turbine and generator parts have some capability with like-in-kind models, but circa-2000 machine parts would rarely be compatible with future gas-fired generators.

Mr. Mosley also explained that as the existing coal and gas-fired generators are retired, there are increasingly less remaining opportunities to transfer useful inventory. Therefore, reflecting leftover inventory in the cost of decommissioning is a reasonable means of addressing a future where increasing numbers of generating units are retired and replaced.

Mr. Kopp also provided rebuttal testimony regarding the inclusion of obsolete inventory remaining at the end of a generating station's useful life in this decommissioning study. He explained that disposing of remaining inventory is just as much a part of decommissioning a station as disposing of other equipment and plant components. It must be safely sold, moved to other locations, or scrapped. In fact, the warehouse or other portions of the plant where the supplies are held cannot be demolished until the inventory is safely removed.

Mr. Kopp then rebutted Mr. Andrews' contention that if this equipment is not placed in service, then it is not used and useful. Mr. Kopp stated that Andrews' argument ignores that inventory is required to be maintained in order to achieve appropriate reliability of the plants and to facilitate routine maintenance on the facilities. Furthermore, Mr. Kopp stated that it is necessary to purchase this inventory before it is needed, in order to reduce outage time, and even if it is not installed, it has still served a useful purpose in maintaining plant reliability.

Mr. Kopp's testimony also stated that the value of this inventory that cannot be reclaimed through sale or scrap of the inventory is directly related to the retirement of the facility. If the facility were to remain in service, this inventory would retain its value to the plant. However, when the plant is retired, the value of this inventory is reduced to the value it has as salvage or scrap. This reduction in value of the inventory is a cost associated with net salvage rates associated with retirement and demolition of the facility. In response to Mr. Garrett's contention that Mr. Kopp had never proposed including inventory in decommissioning studies before, Mr. Kopp also cited to approval of the inclusion of inventory in a decommissioning study prepared for FPL by the Florida Public Service Commission.

Company witness Ms. Douglas also responded to the recommendations of Mr. Garrett and Mr. Andrews regarding the inclusion of end-of-life generating plant M&S inventory costs as a cost of decommissioning and dismantlement. She explained that unlike other plant, property and equipment used at a generating station, which is depreciated over its useful life and the cost of which is recovered from customers served by and benefitting from the electricity generated at the station during its useful life, under the current ratemaking construct, recovery of the cost of M&S maintained in inventory occurs only once the parts and equipment in inventory are installed in the plant. She explained that when base rates are set, under traditional Indiana ratemaking practice, inventory is included in rate base for return purposes, but is not depreciated over its life like plant. Further, the current construct assumes the M&S inventory can be used up before retirement occurs and whatever amount is left can be reused elsewhere or sold, with no current ratemaking means for recovering the cost of the remaining end-of-life inventory from the customers for whose benefit the inventory held for reliability purposes at the station was maintained. As also discussed in the rebuttal testimony of Company witness Ms. Melissa B. Abernathy, without assurance of regulatory recovery of any remaining inventory costs that have now become obsolete due to the retirement, the Company must write the inventory off as an additional, one-time expense. Ms. Douglas further

explained that the Company's proposal is reasonable because it enables the forecasted costs of the end-of-life M&S inventory to be recovered in a rational and systematic way over the remaining life of the plant from the customers who are being served by the plant and benefitting from the reliability that the inventory brings to the plant. Ms. Douglas opined that this approach is a fair and balanced way to address this issue to prevent large negative financial impacts at a plant's end of life for companies who have purchased and managed their M&S reasonably for the benefit of customers. Ms. Douglas noted that the rebuttal testimony of Company witness Mr. John Sullivan addresses the negative impacts on credit quality and financing costs that may result from write-offs such as this. Ms. Douglas concluded by noting that an alternative to recovery over the life of the plant via decommissioning costs would be the pre-approval by the Commission of the use of a regulatory asset at the end of the plant's life, with the remaining value to be recovered from customers over time in a future rate case.

(1) Commission Discussion and Findings. The depreciation-related issues in this case relate to: (1) the ELG versus ALG methodology; (2) the appropriate calculation of terminal net salvage estimates; and (3) estimated useful lives for certain mass property accounts and coal generating units. We address each of these issues in turn.

First, with respect to the question of whether the ELG or ALG method should be used, we find the evidence presented by OUCC witness Mr. Garrett and Industrial Group witness Mr. Andrews persuasive, as both witnesses showed that the ELG method results in unreasonably high depreciation rates. ALG depreciation rates result in systematical and rational cost recovery with near term customer rate relief and full cost recovery of utility investments. While we have determined in the past that the ELG methodology was appropriate and acknowledge the weight given to precedent in many prior decisions, we always evaluate each case as it comes before us and do not need to approve the same methodology based on prior decisions, especially in light of a changed landscape. The use of ELG in a higher than average investment cycle has the effect of unnecessarily increasing the near term depreciation expense as compared to the use of ALG. A review and comparison of Mr. Andrew's exhibits reflecting only the ALG verses the ELG modifications applied to Mr. Spanos' results indicate that the impact of the methodology change on a percentage basis is markedly more significant for the distribution and transmission components than the production, or generation, component. This evidence is not surprising given the increased investment cycle in these categories as highlighted by the relatively recent statutory support for such investment codified at Indiana Code ch. 8-1-39. A changed and encouraged investment cycle is a material landscape change through which we consider our previous proclamations on methodology. Furthermore, the consideration of service affordability in the near term provides sufficient weight to temper our historical preference for ELG. Again, a recently enacted statute, Indiana Code § 8-1-2-0.5, directing the commission to consider "all practical means and measures" to balance necessary investment with service affordability enhances the regulatory landscape. In response to a Docket Entry question DEI confirmed that it had not identified investments that would not be recovered with the ALG methodology as described. Therefore, we find that the application of ALG serves as a reasonable regulatory mechanism to provide rate impact moderation while not limiting DEI's reasonable recovery of its investment.

With regard to the issues surrounding the calculation of terminal net salvage estimates, we note that no party has proposed depreciation rates without terminal net salvage estimates, and,

accordingly, no party appears to disagree with the concept of including terminal net salvage in depreciation rates. Instead, the differences are related to components of the estimated costs that are included. Based on the evidence presented in this case, we find that Mr. Spanos' 2.5% inflation estimate is more realistic and should be used. Mr. Spanos supported his estimate with CPI data going back to the 1960s, as well as more relevant Handy-Whitman index data, while Mr. Andrews' supported his inflation estimate with arguably selective time periods that are not representative of future conditions.

Next we address the parties' contention that contingency be removed from the decommissioning study. We disagree with the parties that the circumstances here warrant such removal. Commission precedent supports the inclusion of contingency and we find it reasonable and appropriate again here. Similar to our previous holdings, we give weight to the fact that the 20% contingency factor used in the demolition cost studies is conservative compared to the 25% contingency factor we approved in the Company's most recent rate case. Furthermore, the assumption that the sites will be remediated to industrial condition, rather than greenfield condition, is also conservative. We therefore decline to depart from our previous practice.

Regarding the parties' arguments concerning inclusion of the cost to address end-of-life inventory at retired generating plants, these type of inventory costs are not typically included as part of decommissioning cost estimates. Normally any unrecovered amount would be expensed at the time of retirement. In rebuttal, Ms. Douglas suggested an alternative in which the Commission pre-approves a regulatory asset at end of life rather than a write-off. As presented in the Industrial Group's February 6 filing this alternative would materially lower the impact of Duke Energy Indiana's rate request. In addition, the alternative affords DEI an opportunity to undertake any and all reasonable actions to minimize the end-of-life inventories as any station retirement draws nearer. Thus, we approve the use of a regulatory asset at the end of life with the understanding that any recoverable amount will be subject to a review of actions taken in advance of any associated retirement.

Based on and incorporating the findings above, we approve for use by DEI the depreciation rates presented in the revised attachment to the Industrial Group's February 6 filing.

iii. O&M Expenses (Other than Depreciation and Taxes).

(A) Production O&M Expense. Petitioner's witness Mosley testified that DEI's 2020 power production O&M forecast is $407 million, as follows:

Category	O&M ($ in millions)
Edwardsport IGCC	$139
Coal Combustion Products	$12
New Generation Resources	$0
Power Production	$229
Other Miscellaneous Power Production	$27
Total	**$407**

Surrebuttal Testimony of Brian C. Andrews

Q PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A Brian C. Andrews. My business address is 16690 Swingley Ridge Road, Suite 140, Chesterfield, MO 63017.

Q ARE YOU THE SAME BRIAN C. ANDREWS WHO PREVIOUSLY FILED DIRECT TESTIMONY IN THIS PROCEEDING ON BEHALF OF THE PENNSYLVANIA OFFICE OF CONSUMER ADVOCATE ("OCA")?

A Yes, I am.

Q WHAT IS THE PURPOSE OF YOUR SURREBUTTAL TESTIMONY?

A The purpose of my surrebuttal testimony is to reiterate my support and recommendation to use the Average Life Group ("ALG") procedure to calculate depreciation rates by responding to the rebuttal testimony of Aqua Pennsylvania's ("Aqua PA" or "Company") witness John Spanos.

My silence in regard to any issue should not be construed as an endorsement of or acquiescence to any parties' positions raised in their direct or rebuttal testimonies.

SUMMARY OF RECOMMENDATIONS

Q PLEASE SUMMARIZE YOUR CONCLUSIONS AND RECOMMENDATIONS.

A My conclusions and recommendations are as follows:

1. I continue to recommend that the depreciation rates for Aqua PA be calculated using the ALG procedure. It is the most commonly used depreciation procedure in the country and provides Aqua PA with full recovery of its investment, while resulting in more reasonable depreciation rates.

2. The precision associated with the Equal Life Group ("ELG") procedure does not exist in real life, nor did Mr. Spanos select survivor curves that best reflect the life of Aqua PA's assets.

3. Aqua PA is in an elevated investment environment and has drastically increased its plant-in-service over the past 10 years. Aqua PA is approximately 140 years old, yet its water plant-in-service has an average age of just 13.6 years.

4. Mr. Spanos shows estimates that the use of the ALG procedure will result in a lower revenue requirement for Aqua PA through 2035. The ALG procedure would help alleviate the burden of excessive utility bills.

5. The affordability of utility rates is an important factor for credit rating agencies in supporting strong credit standings for utility companies, and the use of ALG depreciation rates will make Aqua PA's rates more affordable for customers.

6. The depreciation rates for Aqua PA calculated with the ALG procedure are not low, as Mr. Spanos claims. In Pennsylvania, net salvage is not included in depreciation expense; this is the primary reason the OCA's proposed depreciation rates are lower than the small sample of gas utility depreciation rates that Mr. Spanos provides in his Exhibit No. JJS-3-R.

7. The Pennsylvania Public Utility Commission ("PUC" or "Commission") should order Aqua PA to use depreciation rates that are based on the ALG procedure.

8. The proposed test year depreciation expense would be reduced by $14.1 million if the ALG depreciation rates are utilized.

9. The PUC should approve the depreciation rates that are presented in Exhibit BCA-3, Exhibit BCA-6, Exhibit BCA-9, Exhibit BCA-12, and Exhibit BCA-15 for

Aqua PA's Water Base Operations, Shenandoah Operations, Wastewater Base Operations, Lower Makefield Operations, and East Whiteland Operations, respectively.

RESPONSE TO THE REBUTTAL TESTIMONY OF JOHN J. SPANOS

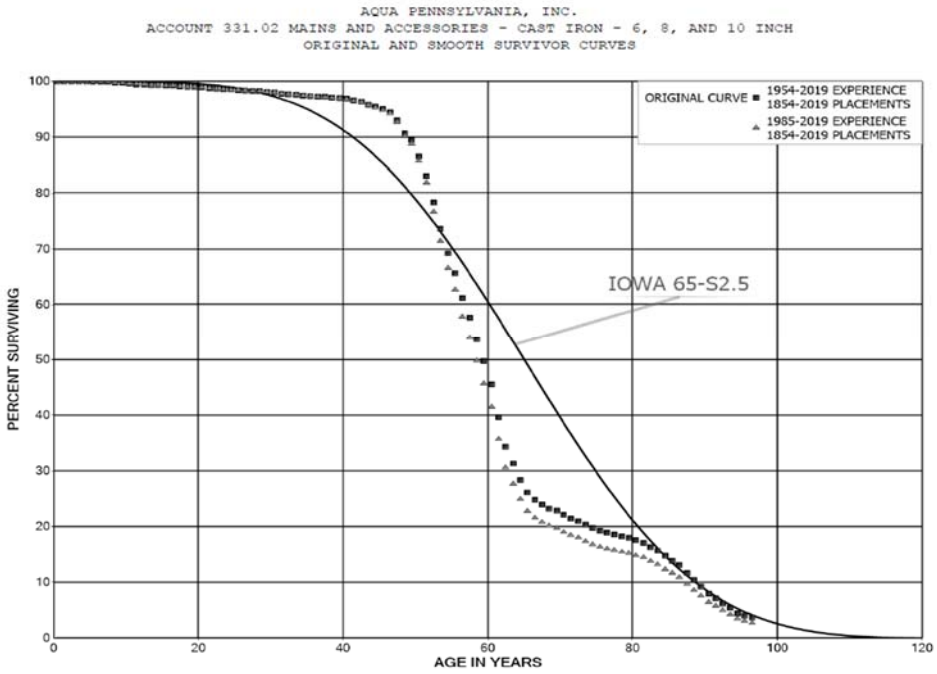
Q MR. SPANOS PROVIDES CITATIONS TO AUTHORITATIVE DEPRECIATION TEXTS BY ROBLEY WINFREY AND WOLF & FITCH, WHICH REFERS TO THE ELG PROCEDURE AS THE ONLY MATHEMATICALLY CORRECT PROCEDURE, AND THAT ELG IS CONSIDERED TO BETTER MATCH THE CONSUMPTION OF CAPITAL WITH SERVICE PROVIDED THAN THE ALG PROCEDURE.[1] PLEASE RESPOND.

A I do not disagree that these statements are made within these authoritative texts. While the ELG method may be more precise mathematically, it is not a precision that exists in reality as it is extremely sensitive to the survivor curve that is used to determine the depreciation rates. The depreciation expense is also only accurate if the utility property retires in exactly the manner dictated by the survivor curves used to calculate the ELG rates. This precision does not exist in real life and certainly does not exist within a regulated ratemaking environment. For example, Mr. Spanos has selected the 65-S2.5 survivor curve for the 6-10 inch cast iron Distribution Mains, Account 331.02. While I do not challenge this proposal, it is clear from the chart that Mr. Spanos includes in his depreciation study that it is not a good fit. In Figure 1, I show Aqua PA's

[1]Aqua Statement No. 6-R at page 4, lines 6-14.

retirement data compared to the 65-S2.5 survivor curve, as portrayed in Aqua PA's Exhibit 6-A, Part 2.

FIGURE 1



Q WHAT IS THE SIGNIFICANCE OF THIS FIGURE?

A Mr. Spanos claims that ELG is more accurate, but this is true if and only if the property retires exactly as dictated by the survivor curve. Figure 1 clearly demonstrates that the 65-S2.5 survivor curve that Aqua PA uses for its largest account is a terrible match of Aqua PA's retirement data. In discussing how an analyst should approach selecting a survivor curve, Wolf & Fitch state in "Depreciation Systems," "Often the middle section of the curve (that section ranging from approximately 80% to 20% surviving) is given more weight than the first and last sections. This middle section is relatively straight

and is the portion of the curve that often best characterizes the survivor curve."[2] Mr. Spanos seems to have clearly ignored the most important section of the survivor curve when he conducted the life analysis for this account. The 65-S2.5 is not a good fit for Aqua PA's data; therefore, the ELG procedure will not produce an accurate depreciation rate. While I am not challenging the service life selection made by Mr. Spanos, the precision that mathematically exists with the ELG procedure can only be achieved if assets retire in the exact manner indicated by the survivor curve. Again, this precision does not exist in reality, which is why the ELG procedure was primarily of academic interest until the 1970s.

Q MR. SPANOS CLAIMS THAT OTHER COMMISSIONS ARE STARTING TO IMPLEMENT THE ELG PROCEDURE. PLEASE RESPOND.

A Mr. Spanos states that the ELG procedure is used in Texas for gas utilities, some jurisdictions in Canada, and for one utility in Colorado.[3] Including Pennsylvania, this is three total states. ALG is by far more commonly used. There are 47 other states that use ALG. As I discussed in my direct testimony, Indiana recently made the switch from ELG to ALG. I have been involved in depreciation cases in 17 other states, plus Washington D.C. These jurisdictions all use the ALG procedure. Mr. Spanos states that he has been in 460 cases before approximately 46 regulatory commissions;[4] based on my inspection of his Appendix A, this leaves 43 regulatory commissions that have approved the use of ALG where Mr. Spanos has testified. The ALG procedure is the

[2]Frank K. Wolf and W. Chester Fitch, *Depreciation Systems* at pages 46-47.
[3]Aqua Statement No. 6-R at page 10, lines 12-19.
[4]Aqua Statement No. 6 at page 2, lines 7-9.

predominant depreciation procedure in use in the United States and should be approved for Aqua PA.

Q MR. SPANOS CLAIMS THAT AQUA PA IS NEITHER IN A "CHANGED LANDSCAPE" NOR IN A "HIGHER THAN AVERAGE INVESTMENT CYCLE"[5]; THEREFORE, THE INDIANA AND KENTUCKY DECISIONS THAT I PROVIDED IN MY DIRECT TESTIMONY THAT SUPPORT THE REJECTION OF ELG AND APPROVAL OF ALG ARE NOT APPLICABLE. PLEASE RESPOND.

A I completely disagree. A changed landscape certainly exists. The affordability of utility rates is of significant concern of regulators, credit agencies, and especially customers themselves. A recent poll by the Commonwealth Foundation found that rising energy costs are a top voter concern, claiming that "Eight in 10 voters say their household energy bills have increased over the past two years, and more than two-thirds (70 percent) say they're concerned about affording their family's energy needs. Rising energy costs (63 percent) top the list as the most prominent environmental issue in Pennsylvania."[6] While this is not an energy case, the same concerns are reasonably projected to any regulated utility where customers' bills are increasing. The high inflationary environment that has existed over the past few years is taking its toll on Pennsylvanians. OCA witness Aaron Rothschild stated in his direct testimony, "The impact of customers' ability to afford their utility bills, especially during times with high

[5]Aqua Statement No. 6-R at page 24, lines 13-23.
[6]https://www.commonwealthfoundation.org/2024/03/19/pa-voters-energy-costs-2024/.

levels of inflation, is a concern that is raised by analysts and utility holding companies when determining the risks that a utility faces. Even though inflation has decreased recently and is expected to decline further in coming months, high inflation in recent years remains a significant impact on affordability for many consumers."[7] The switch to ALG depreciation rates will help alleviate water bill burden for Aqua PA's customers.

Q HAS MR. SPANOS CONFIRMED THAT ALG DEPRECIATION RATES WOULD REDUCE AQUA PA'S REVENUE REQUIREMENT?

A Yes. Mr. Spanos has conducted an analysis, which he provides in Exhibit No. JJS-1-R and is summarized on Figure 3 on page 16 of his rebuttal testimony. This analysis compares the revenue requirements for the period of 2024-2050 for Aqua PA under two scenarios, one that assumes ALG depreciation and the other with ELG. This analysis clearly shows that the ALG procedure results in lower revenue requirements through 2035. Eleven years of lower utility bills will certainly help with affordability. Utility customers do not plan for future utility bills, they pay and plan for bills on a monthly basis not on decennial basis; most people prefer the next bill to be as low as possible. With the affordability of utility bills of significant concern, the Indiana Utility Regulation Commission's ("IURC") decision in the Duke Energy Indiana case is certainly applicable, it states, "the consideration of service affordability in the near term provides sufficient weight to temper our historical preference for ELG."[8]

[7]OCA Statement 3 at page 101, lines 3-7.
[8]See Exhibit BCA-18 at page 18.

Q PLEASE COMMENT ON THE HIGHER THAN AVERAGE INVESTMENT CYCLE.

A I discuss this issue in my direct testimony. As discussed, Aqua PA is in an accelerated investment cycle, coinciding with a 29% increase in plant-in-service over the past five-years. The oldest assets still in-service are from 1882. The Company has been providing water service in Pennsylvania since 1886,[9] approximately 140 years. Contrast this to the average age of utility plant, which is just 13.6 years old. A 140-year-old company with assets with an average age of just 13.6 years old certainly suggests that Aqua PA has been in a higher-than-average investment cycle.

Q MR. SPANOS CLAIMS THAT THE OCA'S PROPOSED DEPRECIATION RATES ARE UNREASONABLY LOW DUE TO THE ALG PROCEDURE. PLEASE RESPOND.

A Mr. Spanos has provided a list of 14 water utilities in his Exhibit No. JJS-3-R, which purports to show an average depreciation rate of 2.62%. From this, he concludes that the composite 2.17% depreciation rate that I have recommended is unreasonably low. I disagree. Mr. Spanos has provided no information demonstrating that these other companies are comparable to Aqua PA, nor are any of the other Aqua PA companies included. Further, Pennsylvania is unique in that net salvage is not included in depreciation expense, but rather recovered through a five-year amortization of actual costs of removal. This drastically reduces depreciation rates. For the other Aqua PA companies, the net salvage rate for mains that Mr. Spanos has proposed range

[9] https://www.aquawater.com/about/states-we-serve/pennsylvania/index.php.

from -15% to -45%. Meaning that for every dollar invested in mains, the utility would recover $1.15 to $1.45 through depreciation expense related to net salvage. In ALG depreciation, all assets are assumed to have the average life of the group. For Aqua PA, the 6-10 inch cast iron mains accounts, which represents 39% of the plant-in-service has a life of 65 years. With the ALG procedure, a 65-year life and 0% net salvage would yield a depreciation rate of 1.54%.[10] If net salvage were to be included at an average level of -20%, then the depreciation rate would be 1.84%. Since Aqua PA does not include net salvage in depreciation, a 2.17% composite depreciation rate, which I recommend, is perfectly reasonable.

Q MR. SPANOS HAS PROVIDED A DIFFERENT LEVEL OF ACCUMULATED DEPRECIATION AS OF DECEMBER 31, 2025, ASSUMING ALG DEPRECIATION RATES WERE IN PLACE. PLEASE DISCUSS.

A I find this criticism of the level of accumulated depreciation that I have used to be frivolous and trivial. Mr. Spanos states that the combined water and waste water book reserve I am using is $356,191 too high, and that the rate base should be increased by $356,191.[11] This needs to be put into context. First, this difference is simply due to rounding differences between the model that I use and the one that Mr. Spanos uses. Second, this difference of $356 thousand is in relation to a $1.4 billion book reserve. This is a 0.02% difference, less than a rounding error. We also need to remember that the difference in book reserve would be recovered over the remaining life of the assets,

[10] 1/65 = 1.54%.
[11] Aqua Statement No. 6-R at pages 22-23.

so for water rate base, Mr. Spanos states my level of book reserve is $356 thousand too high and the impact on depreciation expense will not be the $14.1 million that I presented (*i.e.*, the reduction to depreciation expense would be an amount less than $14.1 million).[12] However, the $356 thousand would be spread over the remaining life of the assets, which according to my study is 36.4 years. The impact on depreciation expense is less than $10,000 annually. On depreciation rates, which are rounded to two decimal points, it would have no impact as it is compared to a $6.3 billion plant-in-service. $10,000 divided by $6.3 billion equals 0.00016%, an inconsequential amount. This would be the impact on depreciation rates, due to book reserves being changed by $356 thousand.

The depreciation rates that I have presented in Exhibits BCA-3, BCA-6, BCA-9, BCA-12, and BCA-15 are accurate, reasonable, and should be approved by the Commission.

Q DOES THIS CONCLUDE YOUR SURREBUTTAL TESTIMONY?

A Yes, it does.

I. INTRODUCTION

Q. WOULD YOU PLEASE STATE YOUR NAME AND BUSINESS ADDRESS?

A. My name is Jerome D. Mierzwa. I am a Principal and the President of Exeter Associates, Inc. ("Exeter"). My business address is 10480 Little Patuxent Parkway, Suite 300, Columbia, Maryland 21044. Exeter specializes in providing public utility-related consulting services.

Q. PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND AND EXPERIENCE.

A. I graduated from Canisius College in Buffalo, New York, in 1981 with a Bachelor of Science Degree in Marketing.[1] In 1985, I received a Master's Degree in Business Administration with a concentration in finance, also from Canisius College. In July 1986, I joined National Fuel Gas Distribution Corporation ("NFG Distribution") as a Management Trainee in the Research and Statistical Services Department ("RSS"). I was promoted to Supervisor RSS in January 1987. While employed with NFG Distribution, I conducted various financial and statistical analyses related to the Company's market research activity and state regulatory affairs. In April 1987, as part of a corporate reorganization, I was transferred to National Fuel Gas Supply Corporation's ("NFG Supply") rate department where my responsibilities included utility cost of service and rate design analysis, expense and revenue requirement forecasting, and activities related to federal regulation. I was also responsible for preparing NFG Supply's Federal Energy Regulatory Commission ("FERC") Purchase Gas Adjustment ("PGA") filings and developing interstate pipeline and spot market

[1] Effective August 1, 2023, Canisius College became Canisius University.

supply gas price projections. These forecasts were utilized for internal planning purposes as well as in NFG Distribution's Pennsylvania purchased gas cost proceedings under Section 1307(f) of the Public Utility Code.

In April 1990, I accepted a position as a Utility Analyst with Exeter. In December 1992, I was promoted to Senior Regulatory Analyst. Effective April 1, 1996, I became a principal of Exeter. Since joining Exeter, my assignments have included water and wastewater utility class cost of service and rate design analysis, evaluating the gas purchasing practices and policies of natural gas utilities, sales and rate forecasting, performance-based incentive regulation, revenue requirement analysis, the unbundling of utility services and the evaluation of customer choice natural gas transportation programs.

Q. HAVE YOU PREVIOUSLY TESTIFIED IN REGULATORY PROCEEDINGS ON UTILITY RATES?

A. Yes. I have provided testimony on more than 450 occasions in proceedings before FERC, utility regulatory Commissions in Arkansas, Connecticut, Delaware, Georgia, Illinois, Indiana, Louisiana, Maine, Maryland, Massachusetts, Montana, Nevada, New Jersey, Ohio, Pennsylvania, Rhode Island, South Carolina, Texas, and Virginia, as well as before the Pennsylvania Public Utility Commission ("Commission").

Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

A. On May 23, 2024, Aqua Pennsylvania, Inc. ("Aqua" or the "Company") on its own behalf and on behalf of its wholly-owned subsidiary Aqua Pennsylvania Wastewater, Inc. filed an application to increase its current rates for water and wastewater service by $126.7 million, or 18.9%. The increase proposed for water service is $112.0 million,

or 18.7%, and the increase proposed for wastewater service is $14.6 million, or 20.1%.[2] Exeter was retained by the Pennsylvania Office of Consumer Advocate ("OCA") to review and analyze the water and wastewater class cost of service ("CCOS") studies and the rate design proposals included in Aqua's application. My testimony addresses the Company's water and wastewater CCOS studies, its revenue allocations, and rate design proposals.

Q. HAVE YOU PREPARED EXHIBITS TO ACCOMPANY YOUR TESTIMONY?

A. Yes, I have. Exhibits JDM-1 and JDM-2 are attached to my testimony.

Q. PLEASE DESCRIBE THE REVENUE REQUIREMENT PRESENTATION BY AQUA IN THIS CASE.

A. As discussed in the direct testimony of OCA witness Ralph Smith (OCA St. 2), Aqua has presented separate revenue increases for what the Company refers to as Water Base Operations and for Shenandoah Water Operations. Shenandoah Water is a recent acquisition by Aqua. Water Base Operations includes all of Aqua's water utility operations except Shenandoah Water.

Aqua presents separate revenue increases for what the Company refers to as Wastewater Base Operations, Lower Makefield Operations, and East Whiteland Operations. Lower Makefield and East Whiteland are recent acquisitions by Aqua. Wastewater Base Operations include all of Aqua's water utility operations except Lower Makefield and East Whiteland. Consistent with the direct testimonies of OCA witnesses Christine M. Hoover (OCA St. 1) and Ralph Smith, and for the reasons they explain, my testimony recommends that the costs and revenues related to East

[2] As discussed later in my testimony, this $14.6 million is after Aqua's proposed $21.9 million shift of wastewater revenue requirement to water customers pursuant to 66 Pa. C.S. § 1311(c).

Whiteland Operations be excluded from this case. Therefore, for purposes of my testimony, I will exclude East Whiteland from all cost of service and rate design considerations.

Q. PLEASE DESCRIBE THE WATER AND WASTEWATER RATES ZONES CURRENTLY SERVED BY AQUA?

A. Aqua currently provides water utility service to in eight different rate zones. Those rate zones are as follows:

- Rate Zone 1 – Main Division
- Rate Zone 2
- Rate Zone 3
- Rate Zone – Bunker Hill
- Rate Zone – Sun Valley Division
- Rate Zone – Phoenixville Division
- Rate Zone – Belle Aire Acres Division
- Rate Zone – Shenandoah Division

The largest of these rate zones by far is Rate Zone 1 – Main Division, with over 97% of the Company's total water revenues at current rates.[3]

Aqua currently provides wastewater service in fifteen different rate zones, Rate Zones 1 through 14, and Rate Zone 1A. The largest of these rate zones are Rate Zones 9 and 12, each representing approximately 17% of current revenue.

Q. HOW MANY CCOS STUDIES DID AQUA FILE IN ITS APPLICATION?

A. Aqua has presented separate CCOS studies for Water Base Operations (Aqua Exhibit No. 5-A, Part I), and for Shenandoah Water Operations (Aqua Exhibit No. 5-A, Part II). Aqua presents separate wastewater CCOS studies for Wastewater Base Operations (Aqua Exhibit No. 5-B, Part I), Lower Makefield Operations (Aqua Exhibit No. 5-B,

[3] Exhibit No. 5-A, Part II, Schedule 4, page 1.

Part II), and East Whiteland Operations (Aqua Exhibit No. 5-B, Part III). Currently, Lower Makefield is Rate Zone 12, and East Whiteland is Rate Zone 13. The Company's CCOS studies are sponsored by Constance E. Heppenstall of Gannett Fleming Valuation and Rate Consultants, LLC.

Q. IS AQUA PROPOSING TO RECOVER ANY PORTION OF ITS WASTEWATER REVENUE REQUIREMENT FROM WATER CUSTOMERS IN THIS PROCEEDING?

A. Yes. Aqua is proposing to recover $21.9 million, or 20.0%, of its total proposed wastewater revenue requirement through the rates for water service, subject to Commission approval under Section 1311(c) of the Public Utility Code, which was amended to provide for the recovery of a portion of a wastewater utility's revenue requirement from the utility's water customers by Act 11 of 2012. (Aqua Vol. 2, Exh. 1-A et al., Sch. Act 11, p. 1). The $21.9 million represents 60% of its total revenue requirement increase for wastewater that Aqua claims is necessary in this case.

Q. PLEASE SUMMARIZE YOUR FINDINGS AND RECOMMENDATIONS.

A. A summary of my findings and recommendations are as follows, and consistent with the OCA's position discussed above, are based on excluding the East Whiteland acquisition from this proceeding:

- The water and wastewater CCOS studies presented by Aqua reasonably reflect class cost responsibility at the revenue requirements reflected in the Company's initial application;

- If the Commission determines in this proceeding that it is appropriate to assign a portion of the wastewater revenue requirement to water customers pursuant to Act 11 and Section 1311 (c) of the Public Utility Code, I recommend several modifications and adjustments to Aqua's proposal:

- Consistent with the OCA's recommendation that the costs and revenues related to East Whiteland Operations – totaling approximately $7 million -- should be excluded from this case, of this amount, the East Whiteland Act 11 shift of $3.14 million of the $7 million should be eliminated;

- Any decrease in the wastewater revenue requirement required by the Commission in this proceeding from the revenue requirement requested by Aqua should first be applied to reducing the Act 11 shift, and;

- Wastewater customers in Rate Zones 1 and 1A should be assigned a rate increase rather than a rate decrease as proposed by Aqua, and the additional revenues generated by the Rate Zone 1 and 1A rate increases should be utilized to reduce the Act 11 shift.

- At a reduced revenue requirement authorized by the Commission, the Act 11 shift should be no higher than 10% of the wastewater cost of service, which would be a 50% decrease from that approved by the Commission in the Company's last base rate proceeding. This decrease should be assigned to Aqua's water customer classes by proportionately reducing the Act 11 assignment initially proposed by Aqua for each customer class.

- I have accepted the proposed Shenandoah Contribution (as described further below) to provide for gradualism. I recommend that Aqua's proposed revenue allocation assignments be proportionately adjusted to reflect the Shenandoah Contribution authorized by the Commission in this proceeding.

- The water service rate increases proposed by Aqua for Rate Zones Bunker Hill, Sun Valley, and Phoenixville should be mitigated to provide for gradualism;

- The existing Rate Zone 1, 2, and 3 monthly water customer charges for Residential customers with a 5/8-inch meter should be maintained. The current Rate Zone 1 monthly customer charge for a Residential customer with

a 5/8-inch meter should be adopted for Rate Zones Bunker Hill and Sun Valley;

- The Rate Zone 1 and 2 monthly wastewater customer charges proposed by Aqua for Residential customers with a 5/8-inch meter, or one Equivalent Dwelling Unit ("EDU") should be adopted;

- Aqua should be required to comply with the Commission's directive in its last base rate proceeding in Docket No. R-2021-3027386 which required Aqua to prepare and submit in its next base rate proceeding a report evaluating whether different methods of calculating flat rate charges would be more reasonable than its current method. A rate increase in this proceeding should be denied until Aqua complies with this directive; and

- The majority of Aqua's wastewater customers are assessed volumetric usage charges based on water usage. Certain wastewater customers served by Aqua which are provided water service by the Chester Water Authority ("CWA") are currently billed flat rates for wastewater service.[4] Aqua should immediately pursue obtaining water usage data for its wastewater customers that are currently provided water service by the CWA in Thompson Tract, the Bancroft Subdivision, and Honeycroft Village, and report to the Commission in this proceeding the results of its efforts and the costs it would occur to obtain water meter read data from CWA. The Commission should then determine whether Aqua should obtain this meter read data to convert these flat rate customers to water usage based billing.

Q. HOW IS THE REMAINDER OF YOUR TESTIMONY ORGANIZED?

A. The remainder of my testimony is divided into seven additional sections. The second section of my testimony describes and evaluates the Company's water CCOS studies. The third section describes and evaluates the Company's wastewater CCOS studies. The fourth section addresses Aqua's proposal to recover a portion of the costs associated with providing wastewater service through the rates for water utility service pursuant to Section 1311(c) of the Public Utility Code. The next section presents my

[4] Response to data request OCA-XIII-14.

recommended distribution of the revenue increase authorized by the Commission for water service in this proceeding and rate design for water service. The sixth section of my testimony addresses wastewater service rate design. The final section of my testimony addresses the metering of currently unmetered wastewater customers.

II. WATER CLASS COST OF SERVICE STUDIES

Q. WHAT IS THE OBJECTIVE OF A CCOS STUDY?

A. A CCOS study is conducted to assist a utility or Commission in determining the level of costs properly recoverable from each of the various classes of customers to which the utility provides service. Allocation of recoverable costs to each class of service is generally based on cost causation principles.

Q. HOW MANY WATER CCOS STUDIES DID AQUA PRESENT IN ITS APPLICATION?

A. As indicated previously in this testimony, Aqua presented two water CCOS studies in its application. Aqua has presented separate water CCOS studies for Water Base Operations and Shenandoah Waer Operations.

Q. WHAT ARE THE PRIMARY CCOS STUDY METHODOLOGIES UTILIZED FOR WATER UTILITIES?

A. The two most commonly used and widely recognized methods of allocating costs to customer classes for water utilities are the base-extra capacity method and the commodity-demand method. Both methods are set forth in the American Water Works Association's ("AWWA") Manual, M1, *Principles of Water Rates, Fees, and Charges* ("AWWA M1 Manual").

Q. WHAT METHODOLOGY HAS THE COMPANY UTILIZED FOR ITS WATER CCOS STUDIES?

A. Aqua has utilized the base-extra capacity method in preparing its water CCOS studies. (Aqua St. 5 at 4). Under the base-extra capacity method, investment and costs are first classified into four primary functional cost categories: base or average capacity, extra capacity, customer, and fire protection. Once investment and costs are classified to these functional categories, they are allocated to the various customer classes.

Q. PLEASE DESCRIBE IN GREATER DETAIL THE FOUR PRIMARY FUNCTIONAL COST CATEGORIES AND HOW THEY ARE ALLOCATED TO THE VARIOUS CUSTOMER CLASSES UNDER THE BASE-EXTRA CAPACITY METHOD.

A. **Base Costs** are costs that tend to vary with the quantity of water used, plus costs associated with supplying, treating, pumping, and distributing water to customers under average load conditions. Base costs were allocated to customer classes on the basis of average daily usage in Aqua's CCOS studies.

Extra Capacity Costs are costs associated with meeting usage requirements in excess of average usage. This includes operating and capital costs for additional plant and system capacity beyond that required for average usage. Extra capacity costs in the Company's studies have been subdivided into costs necessary to meet maximum day extra demand and maximum hour extra demand. These extra capacity costs were allocated to customer classes on the basis of each class's maximum day and maximum hour usage in excess of average usage.

Customer Costs are costs associated with serving customers regardless of their usage or demand characteristics. Customer costs include the operating costs related to meters and services, meter reading costs, and billing and collection costs. Customer

costs were allocated on the basis of capital cost of meters and services and the number of customer bills.

Fire Protection Costs are costs associated with providing the facilities to meet the potential peak demand of fire protection service. In the Company's studies, fire protection costs have been subdivided into the costs associated with meeting Public Fire Protection and Private Fire Protection demands. The extra capacity costs assigned to fire protection were allocated to Public and Private Fire Protection on the basis of the total relative demands of hydrants and fire service lines. In accordance with Section 1328 of the Public Utility Code, public fire costs exceeding 25% of the public fire cost of service were reallocated to other customer classes.

Q. PLEASE IDENTIFY THE CUSTOMER CLASSES THAT THE COMPANY HAS INCLUDED IN ITS WATER CCOS STUDIES.

A. The Company has separately identified the cost of serving seven customer classes in its Water Base Operations CCOS study: Residential; Commercial; Industrial; Public, Other Water Utilities, Private Fire Protection; and Public Fire Protection. The same customer classes are included in the Shenandoah Water Operations CCOS study with the exception of the Other Water Utilities customer class.

Q. ARE YOU PROPOSING ANY CHANGES TO THE COMPANY'S WATER CCOS STUDIES?

A. No. I generally find the results of the Company's water CCOS studies to reasonably reflect class cost responsibility at the revenue requirement reflected in the Company's initial application.

Q. PLEASE SUMMARIZE THE RESULTS OF THE COMPANY'S WATER CCOS STUDIES AND PROVIDE A COMPARISON OF THE REVENUES AQUA IS PROPOSING TO RECOVER FROM EACH CUSTOMER CLASS.

A. Table 1 summarizes the results of the Company's water CCOS studies and presents a comparison of the revenues Aqua is proposing to recover from each customer class. As previously indicated, Aqua is proposing to recover $21.9 million of the wastewater revenue requirement from water customers. This proposal is reflected in Table 1 below. Aqua is also proposing to recover $1.5 million of the revenue requirement of Shenandoah Water Operations from Water Base Operation customers. This proposal is also reflected in Table 1 as the "Shenandoah Contribution." I would note that contract sales and other revenues are not reflected in Table 1 since they were not included in Aqua's water CCOS studies. Aqua's proposed distribution of its requested revenue increase in discussed in greater detail in Section V of my testimony.

Table 1. Comparison of Company Water Cost of Service Study Results and Proposed Revenues

WATER BASE OPERATIONS

Customer Class	Direct Cost of Service	Act 11 Revenues	Shenandoah Contribution	Total Costs	Proposed Revenues	Variation	Percent Increase
Residential	$449,755,095	$13,116,320	$749,673	$463,621,088	$462,791,353	$(829,735)	19.9%
Commercial	161,916,231	8,245,608	267,782	170,429,621	169,163,248	(1,266,373)	18.2%
Industrial	25,338,810	340,775	319,052	25,998,637	24,431,574	(1,567,063)	20.6%
Public Authority	9,930,693	147,926	128,879	10,207,498	11,148,842	941,344	19.2%
Other Water Utilities	5,692	0	0	5,692	19,862	14,170	11.3%
Private Fire Protection	17,617,148	0	155	17,617,303	20,322,361	2,705,058	6.3%
Public Fire Protection	8,187,042	0	0	8,187,042	8,187,042	0	12.8%
Total	$672,750,711	$21,850,629	$1,465,541	$696,066,881	$696,064,282	$(2,599)	18.9%

SHENANDOAH WATER OPERATIONS

Customer Class	Direct Cost of Service	Act 11 Revenues	Shenandoah Contribution	Total Costs	Proposed Revenues	Variation	
Residential	$2,819,285	$0	$(749,673)	$2,069,612	$2,069,612	$0	42.7%
Commercial	571,472	0	(267,782)	303,691	303,691	0	38.3%
Industrial	421,234	0	(319,052)	102,182	102,182	0	59.9%
Public Authority	219,869	0	(128,879)	90,991	90,991	0	59.7%
Private Fire Protection	23,251	0	(155)	23,096	23,096	0	0.0%
Public Fire Protection	34,717	0	-	34,717	34,820	103	326.2%
Total	$4,089,828	$0	$(1,465,541)	$2,624,288	$2,624,391	$103	44.0%

Q. HOW SHOULD THE RESULTS OF AQUA'S WATER CCOS STUDIES BE ADJUSTED TO REFLECT A LOWER THAN REQUESTED WATER REVENUE REQUIREMENT INCREASE AUTHORIZED BY THE COMMISSION IN THIS PROCEEDING?

A. I recommend that the direct cost of service, which would exclude the Act 11 shift and Shenandoah Contribution, indicated by Aqua's water CCOS studies for each customer class be proportionately scaled-back to reflect the actual water revenue increase authorized by the Commission in this proceeding.

III. WASTEWATER COST OF SERVICE STUDIES

Q. HOW MANY WASTEWATER CCOS STUDIES DID AQUA PRESENT IN ITS APPLICATION?

A. As previously discussed, Aqua presented three wastewater CCOS studies in its application. Aqua has presented separate wastewater CCOS studies for Wastewater Base Operations. Lower Makefield Operations, and East Whiteland Operations.

Q. WHAT METHODOLOGY DID THE COMPANY UTILIZE IN PREPARING ITS THREE WASTEWATER CCOS STUDIES?

A. Ms. Heppenstall used the functional cost allocation methodology described in *Financing and Charges for Wastewater Systems; Manual of Practice No. 27* published by the Water Environment Federation ("WEF Manual of Practice No. 27"). This method allocates the cost of providing wastewater service to customer classifications in proportion to each classification's use of the service provider's facilities and services. Costs are assigned to cost components using predominant operational purposes as cost-causative factors. The functional cost allocation method is generally accepted as a sound method for allocating the cost of wastewater service.

Q. PLEASE IDENTIFY THE CUSTOMER CLASSES INCLUDED IN AQUA'S WASTEWATER CCOS STUDIES.

A. Each wastewater CCOS study presented by Aqua includes two customer classes: Residential and Non-Residential.

Q. ARE YOU PROPOSING ANY CHANGES TO THE COMPANY'S WASTEWATER CCOS STUDIES?

A. No. I generally find the results of the Company's wastewater CCOS studies to reasonably reflect class cost responsibility at the revenue requirement reflected in the Company's initial application. I would note that as previously explained, it is the

OCA's position that East Whiteland should be removed from Aqua's revenue requirement claim in this proceeding. Therefore, the wastewater CCOS study for East Whiteland should not be considered in this proceeding. To determine the direct cost of service for each customer class included in the Company's wastewater CCOS studies based on the revenue requirement authorized by the Commission in this proceeding, the cost of service for each customer class should be proportionately reduced to reflect the Commission's authorized revenue requirement.

Q. PLEASE SUMMARIZE THE RESULTS OF THE COMPANY'S WASTEWATER CCOS STUDIES AND PROVIDE A COMPARISON OF THE REVENUES AQUA IS PROPOSING TO RECOVER FROM EACH CUSTOMER CLASS.

A. Table 2 summarizes the results of the Company's wastewater CCOS studies and presents a comparison of the revenue Aqua is proposing to recover from each customer class. Although it is the OCA's position that East Whiteland should be excluded from Aqua's revenue requirement claim in this proceeding, I have included East Whiteland in Table 2 for informational and comparison purposes only and to provide a summary with totals that match the Company's initial application.

Table 2. Comparison of Company Wastewater Cost of Service Study Results and Proposed Revenues

WATER BASE OPERATIONS						
Customer Class	**Direct Cost of Service**	**Act 11 Revenues**	**Total Costs**	**Proposed Revenues**	**Variation**	**Percent Increase**
Residential	$55,467,974	$(10,991,786)	$44,476,188	$44,476,187	$0	12.9%
Non-Residential	26,560,948	(6,756,087)	19,804,861	19,804,861	0	18.7%
Subtotal	$82,028,922	$(17,747,873)	$64,281,049	$64,281,048	$0	14.6%
LOWER MAKEFIELD OPERATIONS						
Customer Class	**Direct Cost of Service**	**Act 11 Revenues**	**Total Costs**	**Proposed Revenues**	**Variation**	**Percent Increase**
Residential	$13,587,321	$(793,692)	$12,793,629	$12,793,629	$0	31.1%
Non-Residential	1,495,074	(164,472)	1,330,602	1,330,602	0	-25.9%
Subtotal	$15,082,395	$(958,164)	$14,124,230	$14,124,230	$0	22.2%
EAST WHITELAND OPERATIONS						
Customer Class	**Direct Cost of Service**	**Act 11 Revenues**	**Total Costs**	**Proposed Revenues**	**Variation**	
Residential	$4,339,173	$(1,330,842)	$3,008,331	$3,008,331	$0	108.5%
Non-Residential	6,171,394	(1,813,750)	4,357,644	4,357,644	0	110.0%
Subtotal	$10,510,567	$(3,144,592)	$7,365,974	$7,365,974	$0	109.4%
Total	$107,621,884	$(21,850,629)	$85,771,253	$85,771,252	$0	20.6%

Q. HOW SHOULD THE RESULTS OF AQUA'S WASTEWATER CCOS STUDIES BE ADJUSTED TO REFLECT A LOWER THAN REQUESTED WASTEWATER REVENUE REQUIREMENT INCREASE AUTHORIZED BY THE COMMISSION IN THIS PROCEEDING?

A. I recommend that the direct cost of service, which would exclude the Act 11 shift, indicated by Aqua's wastewater CCOS studies for each customer class be proportionately scaled-back to reflect the actual wastewater revenue increase authorized by the Commission in this proceeding.

IV. ASSIGNMENT OF THE WASTEWATER COST OF SERVICE TO WATER CUSTOMERS

Q. PLEASE DESCRIBE AQUA'S PROPOSAL IN THIS PROCEEDING WITH RESPECT TO THE RECOVERY OF ITS WASTEWATER REVENUE REQUIREMENT FROM WATER CUSTOMERS.

A. Aqua is proposing to recover a portion of its wastewater revenue requirement from water customers pursuant to Section 1311(c) of the Public Utility Code. Aqua is proposing to increase wastewater rates – after its shift – by 20.1%, or $14.6 million. Exclusive of East Whiteland, the increase is 15.6%, or $10.8 million. The total unrecovered wastewater revenue requirement proposed to be allocated to water service is $21.9 million, and exclusive of East Whiteland, the allocation to water service is $18.7 million. Absent an allocation of any portion of the wastewater revenue requirement to Aqua's water service, on average, rates to wastewater customers would need to increase by 50.1%. Exclusive of East Whiteland, on average, rates to wastewater customers would need to be increased by 42.5%.

Q. WHAT DOES SECTION 1311(c) PROVIDE?

A. Section 1311 reads as follows:

> § 1311 Valuation of and return on the property of a public utility.
>
> * * *
>
> (c) Segregation of property. When any public utility furnishes more than one of the different types of utility service, the Commission shall segregate the property used and useful in furnishing each type of such service, and shall not consider the property of such public utility as a unit in determining the value of the rate base of such public utility for the purpose of fixing base rates. A utility that provides water and wastewater service shall be exempt from this subsection upon petition of a utility to combine water

> and wastewater revenue requirements. The Commission, when setting base rates, after notice and an opportunity to be heard, may allocate a portion of the wastewater revenue requirement to the combined water and wastewater customer base **if in the public interest**.
>
> * * *
>
> (e) Definition. As used in this section, the term "utility that provides both water and wastewater service" shall include separate Companies that individually provide water and wastewater service so long as the Companies are wholly owned by a common parent company.

66 Pa. C.S. § 1311 (effective April 16, 2012) (emphasis added).

Q. SPECIFICALLY, HOW MUCH OF THE WASTEWATER REVENUE REQUIREMENT OF EACH OF THE COMPANY'S SERVICE AREAS DOES AQUA PROPOSE TO ASSIGN TO WATER CUSTOMERS?

A. As shown in Table 3, 20.0% of the total wastewater cost of service is being assigned to water customers. Exclusive of East Whiteland, 18.9% of the wastewater cost of service is being assigned to water customers.

Table 3. Aqua Wastewater and Stormwater Cost of Service and Allocation to Water Service

Service Operations	Cost of Service	Act 11 Allocation	Net Revenue Requirement
Wastewater Base	$83,640,154	$17,747,873	$65,892,281
Lower Makefield	15,140,538	958,164	14,182,374
East Whiteland	10,517,800	3,144,592	7,373,208
Total	**$109,298,492**	**$21,850,629**	**$87,447,863**
Percent	**100.0%**	**20.0%**	**80.0%**
Total less East Whiteland	**$98,780,692**	**$18,706,037**	**$80,074,655**
Percent	**100%**	**18.9%**	**81.1%**

Q. HOW HAS AQUA ALLOCATED THE WASTEWATER COSTS ASSIGNED TO WATER CUSTOMERS TO EACH OF THE CUSTOMER CLASSES INCLUDED IN THE COMPANY'S WATER CCOS STUDIES?

A. Aqua has assigned 100% of the wastewater costs assigned to water customers to Water Base Operations. No wastewater costs have been assigned to Shenandoah Water Operations.[5] Within Water Base Operations wastewater costs have been assigned to the Residential, Commercial, Industrial, and Public customer classes.[6] None of the costs have been assigned to Other Water Utilities or the Private or Public Fire Protection classes. For Public Fire Protection, this is consistent with the requirement of Section 1328 of the Public Utility Code which limits Public Fire Protection charges to 25% of the indicated cost of service.

Q. BASED ON YOUR EXPERIENCE AS EXPERT WITNESS ON RATE DESIGN AND COST ALLOCATION, DO YOU HAVE ANY RECOMMENDATIONS TO THE COMMISSION FOR HOW TO DETERMINE WHETHER SUCH AN ALLOCATION IS IN THE PUBLIC INTEREST?

A. Yes. At the outset, I recognize that defining the "public interest" can be difficult. There can be more than one aspect of "the public" that is interested in, and affected by, any public policy issue including recent rate increases approved by the Commission for Aqua and allocated to wastewater customers. Furthermore, there are at least two distinct elements of the affected public: the utility's wastewater customers and the utility's water customers that must be considered. So, the "public interest" should remain a flexible concept but could include a consideration of policies that promote the

[5] Exhibit No. 5-A, Part I, Schedule A-S, page 1.
[6] Exhibit No. 5-A, Part I, Schedule A, page 1.

cost-effective provision of safe and reliable water and wastewater service throughout the Commonwealth as well as questions about rate shock and affordability.

Q. IS THERE A RANGE OF OPTIONS THAT THE COMMISSION COULD CHOOSE TO IMPLEMENT SECTION 1311(c)?

A. Yes, the Commission can choose from a wide variety of options that would be consistent with the language in Section 1311(c), but that might not be consistent with well-established regulatory principles. At one extreme, the Commission could do nothing. As I understand it, Section 1311(c) is discretionary, not mandatory. So the Commission could choose to allocate none of the wastewater revenue requirement to water customers. Such a decision would be lawful, but would not accomplish an important purpose of Act 11, which is to provide some relief to wastewater customers in relatively small or overburdened service areas.

At the other extreme, the Commission could allocate the wastewater revenue requirement to water customers as proposed by Aqua. This subsidy would benefit Aqua's wastewater customers, but it would come at the expense of Aqua's water customers who would be required to pay not only for their own wastewater service but that of others because of the Act 11 shift.

Q. DID AQUA PROPOSE TO RECOVER A PORTION OF ITS WASTEWATER REVENUE REQUIREMENTS FROM WATER CUSTOMERS IN ITS LAST BASE RATE PROCEEDING, AND DID THE COMMISSION APPROVE AQUA'S PROPOSAL?

A. In Aqua's most recent base prior rate case at Docket No. R-2021-3027385, the Company proposed to recover approximately 30% of its wastewater revenue requirement from water customers.[7] In its Order in that proceeding, the Commission

[7] Order entered May 16, 2022, at 225-226.

found Aqua's proposal to assign 30% of its wastewater revenue requirement to water customers not to be in the public interest.[8] In that proceeding, the Commission adopted a proposal presented by the Bureau of Investigation and Enforcement ("I&E") that assigned approximately 20% of the proposed wastewater revenue requirement to water customers.

Q. BEFORE ASSESSING WHETHER AQUA'S PROPOSAL TO ALLOCATE A PORTION OF THE WASTWATER REVENUE REQUIREMENT TO WATER CUSTOMERS IS REASONABLE, ARE THERE ASPECTS OF THE COMPANY'S WASTEWATER RATE DESIGN PROPOSAL THAT IT WOULD BE HELPFUL TO REVIEW?

A. Yes. As previously indicated, Aqua currently has 15 wastewater rate zones – Rate Zone 1 through Rate Zone 14, and Rate Zone 1A. In this proceeding, Aqua is proposing to continue its historic practice of consolidating rate zones and moving towards single tariff pricing. Aqua is proposing to consolidate its current 15 rate zones into 7 rate zones. More specifically, Aqua is proposing to consolidate Rate Zones 1A, 7, 9, 10, 12, and 14 with Rate Zone 1. The Company is proposing to consolidate Rate Zones 8 and 11 with Rate Zone 2. Rate Zone 3, 4, 5, 6 and 13 would continue to be standalone rate zones.

Q. IS AQUA'S PROPOSAL TO ALLOCATE A PORTION OF THE WASTEWATER REVENUE REQUIREMENT TO WATER CUSTOMERS REASONABLE, AND IS THE PROPOSED AMOUNT ALLOCATED TO THE WATER CUSTOMER CLASSES REASONABLE?

A. I believe that over time, the percentage of Aqua's wastewater revenue requirement assigned to water customers should decline. This will advance the adoption of cost-

[8] Id., at 227.

based rates for wastewater service. In Aqua's last base rate proceeding the Commission approved recovery of approximately 20% of the wastewater cost of service from water customers. As shown in Table 3, Aqua is proposing to recover 20% of the wastewater cost of service from water customer in this proceeding. Excluding the Lower Makefield and East Whiteland acquisitions, approximately 19% of the wastewater cost of service would be recovered from water customers.

Q. IN YOUR OPINION, WHAT MODIFICATIONS AND ADJUSTMENTS DO YOU BELIEVE ARE APPROPRIATE TO AQUA'S PROPOSED ALLOCATION OF THE WASTEWATER COST OF SERVICE TO WATER CUSTOMERS?

A. First, as previously explained, it is the OCA position that the costs and revenues related to East Whiteland Operations should be excluded from this case. Therefore, the East Whiteland Act 11 shift of $3.14 million to water customers should be eliminated.

Second, Aqua is requesting a total revenue requirement increase of $29.5 million for Wastewater Base Operations and Lower Makefield Operations. (Aqua Vol. 2, Exh. 1-A et al., Sch. Act 11, p. 1) The actual revenue increase authorized by the Commission in this proceeding for Wastewater Base Operations and Lower Makefield Operations will certainly be less than the increase requested by Aqua. At the OCA's calculated revenue requirement, the increase authorized for Wastewater Base Operations and Lower Makefield Operations would be (pre-Act 11 shift) $17,152,637, or $12,331,619, or 41.8%, less than the increase requested by Aqua. Any decrease in the wastewater revenue requirement authorized by the Commission in this proceeding from that requested by Aqua should first be applied to reducing the Act 11 shift. For example, if Aqua is authorized a wastewater revenue requirement which is 75% of its request increase, the Act 11 shift would be reduced by $7.4 million.

Finally, as previously discussed, Aqua is proposing to consolidate Rate Zones 1A, 7, 9, 10, 12, and 14 with Rate Zone 1. Under Aqua's proposal, Rate Zones 7, 9, 10, 12, and 14 would receive moderate rate increases, but Rate Zones 1 and 1A would actually receive, albeit very small, rate decreases. I don't believe it's reasonable to assign no increase to Rate Zone 1 and 1A, and then to assign a portion of the costs associated with serving Rate Zone 1 and 1A wastewater customers to water customers. I recommend that customers in Rate Zones 1 and 1A be assigned an increase of 20% which is comparable to the overall increase Aqua has proposed for water customers. As shown on Exhibit No. 5-B, Part II, Schedule 4-WW, page 1, present rate revenues for Rate Zones 1 and 1A are $10.3 million. A 20% increase for these rate zones would generate $2.1 million which would then reduce the Act 11 shift. With respect to Rate Zones 7, 9, 10, 12, and 14, which Aqua has proposed to consolidate with Rate Zone 1 in this proceeding, I am recommending no changes to the rates proposed by Aqua, and consolidation with Rate Zone 1 could potentially occur in the next or a future base rate proceeding.

In summary, under my recommended modifications and adjustments, assuming Aqua is granted 75% of its wastewater revenue requirement increase, the Act 11 shift would be reduced from $21.8 million to $9.4 million, or by $12.4 million. At the reduced revenue requirement authorized by the Commission, the Act 11 shift would reflect 10% of the wastewater cost of service, a 50% decrease from that approved by the Commission in the Company's last base rate proceeding. This decrease should be assigned to Aqua's water customer classes by proportionately reducing the Act 11 assignment initially proposed by Aqua for each customer class.

V. WATER SERVICE REVENUE DISTRIBUTION AND RATE DESIGN

Q. WHAT ARE SOME OF THE PRINCIPLES OF A SOUND REVENUE ALLOCATION?

A. A sound revenue allocation should:

- Utilize class cost-of-service study results as a guide;
- Provide stability and predictability of the rates themselves, with a minimum of unexpected changes that are seriously adverse to ratepayers or the utility (gradualism);
- Yield the total revenue requirement;
- Provide for simplicity, certainty, convenience of payment, understandability, public acceptability, and feasibility of application; and
- Reflect fairness in the apportionment of the total cost of service among the various customer classes.[9]

Q. PLEASE DESCRIBE AQUA'S PROPOSAL IN THIS PROCEEDING WITH RESPECT TO WATER RATE CONSOLIDATION AND MOVEMENT TO SINGLE TARIFF PRICING.

A. As previously explained, Aqua currently provides water service to eight different rate zones, and Aqua is proposing to reduce the number of rate zones to seven. Of the eight rate zones currently served by Aqua, Rate Zone 3 has a significant number of seasonal customers and Aqua is proposing to maintain Rate Zone 3 as a standalone rate zone and not move toward single tariff pricing for this rate zone.[10] Aqua is proposing to consolidate Rate Zone 2 with Rate Zone 1 - Main Division.[11] Aqua is proposing to consolidate the monthly customer charges for the Shenandoah and Belle Aire rate zones with Rate Zone 1, and move the volumetric charges for these rates zones toward the

[9] *Principles of Public Utility Rates*, Second Edition, James C. Bonbright; Albert L. Danielsen; David R. Kamerschen; Public Utility Reports, Inc., 1988, pages 383-384.
[10] Direct Testimony of Constance E. Heppenstall, Statement No. 5, page 13, lines 6-7.
[11] Id., page 12, line 17.

Rate Zone 1 charges.[12] The rates for the Bunker Hill and Phoenixville Rate Zones were increased to move toward Rate Zone 1, subject to a capped increase of 75%. Aqua has proposed to maintain the Sun Valley Rate zone as a standalone rate zone.[13]

Q. PREVIOUSLY, IN TABLE 1, YOU SUMMARIZED THE RESULTS OF THE COMPANY'S WATER CCOS STUDIES AND THE TOTAL WATER REVENUE INCREASES PROPOSED BY AQUA FOR EACH CUSTOMER CLASS. PLEASE SUMMARIZE THE INCREASES PROPOSED BY AQUA FOR EACH CUSTOMER CLASS IN EACH WATER RATE ZONE.

A. Table 5 presents a summary of the rate increases proposed by Aqua for water service by rate zone and customer class.

[12] Id., page 11, lines 22-23, page 12, line 17.
[13] Id., page 12, lines 20-22.

Q. OVERALL, ARE THE WATER SERVICE REVENUE ALLOCATIONS PROPOSED BY AQUA FOR EACH CUSTOMER CLASS REASONABLE?

A. Yes. As shown on Table 1, overall, Aqua's proposed revenue allocations for each customer class result in the recovery of revenues from each customer class that closely match the cost-of-service indicated by the Company's water CCOS studies, the Act 11 allocation, and Shenandoah Contribution.

Q. ARE THE REVENUE ALLOCATIONS PROPOSED BY AQUA FOR THE CUSTOMER CLASSES IN EACH WATER RATE ZONE SHOWN IN TABLE 5 REASONABLE?

A. The revenue allocations for Rate Zones 1, 2, 3, Shenandoah, and Belle Aire are generally reasonable, but some adjustment is warranted. Specifically, I believe the proposed 75% revenue increases for Rate Zones Bunker Hill, Sun Valley, and Phoenixville require mitigation to provide for gradualism. While there is not a hard and fast rule with respect to applying the concept of gradualism in developing a revenue distribution, typically an increase of 1.5 to 2.0 times the system average increase is considered consistent with the concept of gradualism. As shown on Table 5, the system average increase proposed by Aqua is 28.1%, or approximately 30%. Therefore, to provide for gradualism, I believe it would be appropriate to limit the increase to Rate Zones Bunker Hill, Sun Valley, and Phoenixville to 2.0 times the system average increase, or 60% based on Aqua's revenue requirement claim, and assign the revenue deficiency to consolidated Rate Zone 1. As shown on Table 5, the Bunker Hill, Sun Valley, and Phoenixville Rate Zones are relatively small, representing approximately 0.06% of present revenue, and providing mitigation to these rate zones will not have a material impact on consolidated Rate Zone 1.

Q. HOW SHOULD THE REVENUE ALLOCATIONS PROPOSED BY AQUA FOR THE CUSTOMER CLASSES IN EACH WATER RATE ZONE SHOWN IN TABLE 5 BE ADJUSTED TO REFLECT A LOWER THAN REQUESTED WATER REVENUE REQUIREMENT INCREASE IF RECOMMENDED BY THE COMMISSION IN THIS PROCEEDING?

A. The revenue allocations presented in Table 5 reflect an assignment of the direct cost of service, the Act 11 shift, and the Shenandoah Contribution for each customer class in each rate zone. With respect to the direct cost of service, the revenue assignments in Table 5 should first be adjusted to reflect the gradualism adjustment for the Bunker Hill, Sun Valley, and Phoenixville Rate Zones just discussed, and the resulting assignments should be proportionally adjusted to reflect the direct cost of service approved by the Commission in this proceeding. With respect to the Act 11 shift and Shenandoah Contribution, I recommend that Aqua's proposed assignments be proportionately adjusted to reflect the Act 11 shift and Shenandoah Contribution authorized by the Commission in this proceeding.

Q. PLEASE IDENTIFY THE MONTHLY RESIDENTIAL CUSTOMER CHARGES PROPOSED BY AQUA IN THIS PROCEEDING.

A. The vast majority of Aqua's Residential water customers are served by a 5/8-inch meter. As previously explained, Aqua is proposing to consolidate Rate Zone 2 with Rate Zone 1, and maintain Rate Zone 3 as a standalone rate zone. Aqua is proposing to consolidate the monthly customer charges for the Shenandoah and Belle Aire Rate zones with Rate Zone 1. For the Bunker Hill and Phoenixville Rate zones, monthly customer charges were increased to move toward Rate Zone 1. A summary of Aqua's

present and proposed 5/8-inch meter Residential monthly customer charges are presented in Table 6.

Table 6. Comparison of Company Present and Proposed Monthly Customer Charges for a 5/8-inch Meter

Rate Zone	Present	Proposed	Increase
1	$20.51	$23.90	$3.39
2	$20.51	$23.90	$3.39
3	$30.51	$33.90	$3.39
Bunker Hill	$11.80	$20.65	$8.85
Sun Valley	$18.00	$31.50	$13.50
Phoenixville	$4.90	$8.58	$3.68
Shenandoah	$20.49	$23.90	$3.41
Belle Aire	$50.00	$23.90	($26.10)

Q. ARE AQUA'S PROPOSED MONTHLY 5/8-INCH METER CUSTOMER CHARGES REASONABLE?

A. With the exception of the proposed Phoenixville monthly 5/8-inch meter customer charge, Aqua's proposed 5/8-inch meter monthly customer charges are not reasonable. Only those costs that vary directly with the addition or subtraction of a customer should be included in the calculation of a customer charge.

Q. DOES AQUA PRESENT A CUSTOMER COST ANALYSIS BASED ON DIRECT COSTS?

A. Not directly. On page 12 of her direct testimony, Aqua witness Ms. Heppenstall only states that she increased the (Rate Zone 1) Main Division 5/8-inch meter customer charge to $23.90, with no explanation as to how she arrived at this recommendation. Furthermore, her water cost of service study provided in Exhibit 5-A, Part I does not provide any indication of "customer" costs or support for any change in Residential

customer charges. However, in examining her water cost of service study Excel spreadsheet, there is a tab that indicates a "direct customer cost" for a 5/8-inch meter of $23.98 per month. I present Ms. Heppenstall's direct customer cost analyses in Exhibit JDM-1.

Q. DOES THIS ANALYSIS JUSTIFY INCREASING THE MONTHLY CUSTOMER CHARGE FOR A 5/8-INCH METER TO $23.90?

A. No. Aqua's direct customer cost analysis includes costs that are not direct customer costs and do not change with the addition or subtraction of a customer. For example, Aqua's direct customer cost analysis includes office building and furniture expenses. In addition, the calculated direct cost of $23.98 is based on the Company's requested revenue requirement increase. Under the revenue increase authorized by the Commission in this proceeding, a cost-based charge would certainly be further reduced. For example, adjusting Aqua's overall requested pre-tax rate of return to reflect the OCA's recommended pre-tax return of 7.28% would further reduce the calculated customer charge. A calculation adjusting the Company's calculated direct customer charge to remove the improperly included office building and furniture costs and to reflect the OCA's recommended rate of return is presented on Exhibit JDM-2. As shown there, these adjustments reduce the calculated charge to $19.26. Other Commission-approved adjustments to Aqua's revenue requirement claim are likely to further reduce the calculated direct customer charge. Therefore, I recommend that the existing Rate Zone 1 and Rate Zone 2 monthly charge for Residential customers with a 5/8-inch meter of $20.81 be maintained for Rate Zones 1 and 2 and adopted for Rate Zone Shenandoah and Belle Aire. For Rate Zone 3, I recommend that the current 5/8-inch customer charge also be maintained, and that the current Rate Zone 1 5/8-inch

meter customer charge of $20.51 be adopted for Rate Zones Bunker Hill and Sun Valley. For the Phoenixville Rate Zone, the $8.58 monthly charge proposed by Aqua appears reasonable.

Q. HOW SHOULD THE RATES FOR EACH CUSTOMER CLASS AND RATE ZONE BE DETERMINED TO REFLECT YOUR CUSTOMER CHARGE RECOMMENDATIONS, THE DIRECT COST OF SERVICE, THE ACT 11 SHIFT, AND THE SHENANDOAH CONTRIBUTION?

A. The total cost of service for each customer class in each rate zone should be determined based on the results of the Company's CCOS study, the Company's Act 11 allocations, and the Company's proposed Shenandoah Contribution allocations. Each of these cost of service components must be proportionately adjusted to reflect the Commission's revenue requirement determinations in this proceeding using the same approach used by the Company to determine the total cost of service for each customer class in each rate zone based on the Company's proposed direct cost of service, Act 11, and Shenandoah Contribution revenue requirements. Rates for each customer class in each rate zone should then be designed to recover the total cost of service for each customer class in each rate zone utilizing my recommended monthly customer charges, with the volumetric usage charges for the Bunker Hill, Sun Valley, and Phoenixville Rate Zones adjusted to limit the increase for these rate zones to 2.0 times the system average increase.

VI. WASTEWATER SERVICE REVENUE DISTRIBUTION AND RATE DESIGN

Q. PREVIOUSLY IN TABLE 2 YOU SUMMARIZED THE RESULTS OF THE COMPANY'S WASTEWATER CCOS STUDIES AND THE TOTAL WASTEWATER REVENUE INCREASES PROPOSED BY AQUA FOR EACH CUSTOMER CLASS. PLEASE SUMMARIZE THE INCREASES PROPOSED BY AQUA FOR EACH CUSTOMER CLASS IN EACH WASTEWATER RATE ZONE.

A. Table 7 presents a summary of the rate increases proposed by Aqua for wastewater service by rate zone and customer class.

Table 7. Summary of Company Proposed Wastewater Rate Increases by Rate Zone and Customer Class

Q. ARE THE WASTEWATER SERVICE REVENUE ALLOCATIONS PROPOSED BY AQUA FOR EACH CUSTOMER CLASS IN EACH RATE ZONE REASONABLE?

A. No. First, as previously discussed and shown on Table 3 of my testimony, Aqua's revenue allocations are based on an Act 11 assignment of $21.9 million of the wastewater revenue requirement to water customers. As previously discussed in Section IV of my testimony, the wastewater revenue requirement assignment to water customers should be reduced. In addition, Aqua has unreasonably proposed no increase in rates to wastewater customers in Rate Zones 1 and 1A.

Q. PLEASE IDENTIFY YOUR RECOMMENDED MODIFICATIONS TO AQUA'S PROPOSED WASTEWATER REVENUE ALLOCATIONS BY RATE ZONE AND CUSTOMER CLASS.

A. First, my recommendation rejects Aqua's position that no revenue increases should be assigned to Rate Zones 1 and 1A. As previously explained in Section IV, I recommend that at the revenue requirement proposed by Aqua, that each customer class in Rate Zones 1 and 1A receive a rate increase of 20%, and these increases, which I determined

to be $2.1 million, should be included in Aqua's revenue allocations that I have summarized in Table 7. As also explained in Section IV, I have proposed to reduce the assignment of the wastewater revenue requirement to water customers from $20.9 million to $9.4 million to reflect the elimination of the East Whiteland Act 11 shift to water customers, and to reflect the estimated reduction to the total wastewater revenue requirement that is appropriate as determined by the Commission. Under these proposed modifications, Aqua's proposed revenue allocations reflected in Table 7 would be increased to reflect the additional revenues to be collected from Rate Zone 1 and 1A customers.

It is also my recommendation that any reduction to the wastewater revenue requirement in this proceeding first be utilized to reduce the Act 11 shift to water customers. As discussed in greater detail in Section IV of my testimony, based on my estimate of the $7.4 million reduction to the wastewater revenue requirement, $9.4 million of the wastewater revenue requested would still be assigned to water customers. Therefore, if my estimate of the reduction in the wastewater revenue requirement is too high, the revenue adjustments for Rate Zone 1 and 1A and Lower Makefield would continue to be reflected in Table 7, but the wastewater revenue requirement assigned to water customers would increase to account for the difference between my estimated wastewater revenue requirement adjustment and the actual adjustment determined by the Commission. If my estimate of the reduction in the wastewater revenue requirement is too low, the revenue adjustment for Rate Zone 1 and 1A and Lower Makefield would continue to be reflected in Table 7, but the wastewater revenue requirement assigned to water customers would decrease to account for the difference between my estimated wastewater revenue requirement adjustment and the actual adjustment determined by

the Commission. Of course, the possibility exists that the wastewater revenue requirement determined by the Commission in this proceeding could result in the total elimination of the Act 11 shift under my recommendation. If this occurs, I recommend a proportionate scale-back of the revenue increases reflected on Table 7, inclusive of the adjustments for Rate Zone 1 and 1A and Lower Makefield.

Q. PLEASE IDENTIFY THE GUIDELINES MS. HEPPENSTALL FOLLOWED IN DESIGNING RATES FOR WASTEWATER SERVICE.

A. The guidelines followed by Ms. Heppenstall in designing rates for wastewater service were:

- Move toward additional consolidation of rates across rates zones;
- For metered areas, develop a rate structure that include a customer charge or Equivalent Dwelling Unit ("EDU") charge and a single block usage charge;[14]
- For unmetered areas, develop a flat rate to equal 3,870 gallons priced out at the respective rate zone[15]; and
- Where possible, eliminate usage allowances.[16]

As previously explained, Aqua currently serves 15 rate zones, and is proposing to consolidate those 15 rate zones into 8 rate zones. More specifically, Aqua has proposed to consolidate Rate Zones 1, 1A, 7, 9, 10, and 12. Aqua is proposing to consolidate Rate Zone 8 and 11 with Rate Zone 2. Rate Zone 3, 4, 5, 6, and 13 remain standalone rate zones. No rate increases have been proposed for Rate zones 2, 3, 4, and 5 as those rate zones produce an average charge to customers in those rate zones that is currently higher than the proposed Rate Zone 1 – Main Division rates.

[14] One EDU is a single-family Residential household.
[15] 3,870 gallons is the average monthly usage of a Residential customer.
[16] Direct Testimony of Constance E. Heppenstall, Statement No. 5, page 18, line 20 – page 19, line 3.

Q. PLEASE DESCRIBE AQUA'S WASTEWATER CUSTOMER CHARGE RATE DESIGN PROPOSAL FOR THE RESIDENTIAL CLASS IN THIS PROCEEDING.

A. As a result of recent and prior acquisitions of wastewater systems, Aqua's wastewater rates are comprised of several different rate structures including fixed monthly customer or EDU charges plus usage charges, unmetered flat rates, and structures with minimum usage allowances. Generally speaking, Aqua proposes to begin (or continue) movement to unify customer charges for metered customers.

Q. WHAT ARE THE CURRENT AND PROPOSED FIXED MONTHLY CUSTOMER CHARGES FOR THE TYPICAL RESIDENTIAL CUSTOMER IN RATE ZONES 1 AND 2 WHICH AQUA IS PROPOSING TO CONSOLIDATE WITH OTHER RATE ZONES?

A. The typical fixed monthly customer charge for a Residential customer in Rate Zone 1 served by a 5/8- inch meter is $48.20, and $55.93 for a typical Residential customer in Rate Zone 2.[17] Aqua is proposing to reduce the Rate Zone 1 fixed monthly customer charge for a Residential customer served by a 5/8- inch meter to $47.64, and maintain the current Rate Zone 2 fixed monthly customer charge of $55.93.[18]

Q. WHAT IS YOUR RECOMMENDATION CONCERNING THE PROPOSED RATE ZONE 1 AND 2 FIXED MONTHLY CUSTOMER CHARGES?

A. I recommend that the Rate Zone 1 and 2 fixed monthly customer charges proposed by Aqua be adopted.

[17] Exhibit No. 5-B, Part II, Schedule 5-WW, pages 1 and 6.
[18] Id.

Q. IS IT YOUR RECOMMENDATION THAT ANY CHANGES TO THE COMMISSION APPROVED REVENUE TO BE RECOVERED FROM EACH RATE ZONE AND CUSTOMER CLASS THAT RESULT FROM YOUR CUSTOMER CHARGE RECOMMENDATIONS BE ACCOUNTED FOR THROUGH THE ADJUSTMENT OF USAGE CHARGES?

A. Yes.

Q. IN THIS SECTION OF YOUR TESTIMONY, YOU DISCUSS WASTEWATER RATE DESIGN AND IN SECTION V YOU DISCUSS WATER RATE DESIGN. DO ANY OTHER OCA WITNESSES DISCUSS RATE DESIGN IN THEIR DIRECT TESTIMONY?

A. Yes. OCA witness Roger Colton (OCA Statement 6) addresses Aqua's: (1) low-income water bill discount, and (2) explains how the Company's proposed increases in water customer charges harms low-income customers.

VII. METERING OF CURRENTLY UNMETERED WASTEWATER CUSTOMERS

Q. ARE ALL CUSTOMERS THAT AQUA PROVIDES WASTEWATER SERVICE BILLED MONTHLY USAGE CHARGES, IN ADDITION TO A MONTHLY CUSTOMER CHARGE?

A. No. Generally, wastewater customers are billed wastewater usage charges based on their Aqua water usage. However, not all Aqua wastewater customers are currently also water customers, as Aqua indicates that less than half, or only 47.8%, of its wastewater customers are Aqua water customers.[19] For some wastewater customers that are not currently also water customers, Aqua obtains water usage data from the customer's water service provider and bills customers wastewater usage charges based on this data.

[19] Response to data request I&E-RE-17.

For some current wastewater customers, usage data from the customer's water service provider is not currently provided or available to Aqua. In addition, some wastewater customers obtain their water supplies from privately-owned wells. Water usage by these customers is also not currently available to Aqua and, therefore, cannot be utilized for wastewater billing purposes. Customers for whom water usage data is not available for wastewater billing purposes are assessed a monthly fixed flat rate charge. These flat rate charges are generally based on the monthly charges that would be assessed to an average customer for whom usage data is available.

Q. WERE THE FLAT WASTEWATER RATE CHARGES ASSESSED BY AQUA AN ISSUE IN THE COMPANY'S MOST RECENT PRIOR BASE RATE PROCEEDING, DOCKET NO. R-2021-3027386?

A. Yes. The Commission's Order in Aqua's prior wastewater rate case noted that unmetered, flat-rate wastewater customers receive service in the communities of Tobyhanna, Pennsylvania (730 customer) and Lake Harmony, Pennsylvania (995 customers).[20] Aqua bills the customers in these communities a flat rate charge based on the charges that would be assessed to the average 5/8-inch Residential customer using 4,000 gallons per month. This usage level was based on the average system-wide usage of Aqua's water customers.

In Aqua's last base rate proceeding the OCA noted a disparity in the wastewater rates charged to metered and unmetered water customers in certain rate zones where Aqua served both metered and unmetered customers.[21] In its Order in the last proceeding, the Commission adopted the ALJ's recommendation that directed Aqua to prepare and submit its next base rate proceeding a report evaluating whether different

[20] Docket R-2021-3027385 et al., Order at 272.
[21] *Id*. at 273.

methods of calculating a flat rate would be more reasonable for some rate zones rather than applying a system-wide usage average to each rate zone.[22]

Q. DID THE COMPANY PREPARE AND SUBMIT THE REQUIRED EVALUATION IN THIS PROCEEDING AS DIRECTED BY THE COMMISSION?

A. No.

Q. WHAT DO YOU RECOMMEND?

A. I recommend that Aqua be denied any rate increase in this proceeding until it prepares and submits the report it was directed to provide in its prior base rate proceeding evaluating whether different methods of calculating a flat rate would be more reasonable for some rate zones. Aqua failed to comply and due to its noncompliance, critical information necessary to evaluate Aqua's rates is unavailable for consideration in this case. At the very least, this failure by the Company should reflect negatively on whether the Company should be provided a management performance adder. Combined with the failure of Aqua to comply with other provisions of the Commission's order as noted by OCA witness Alexander, it is difficult to see how a company can be considered exemplary in its management performance if it ignores Commission order.

[22] *Id.*

Q. ARE THERE OTHER CONCERNS OR ISSUES RELATED TO AQUA'S ASSESSING FLAT RATES TO WASTEWATER CUSTOMER FOR WHOM THE COMPANY CURRENTLY DOES NOT HAVE WATER USAGE DATA?

A. Yes. Aqua currently provides wastewater service in a number of areas where the Chester Water Authority ("CWA") is the water service provider. In most areas that Aqua provides wastewater service and CWA is the water service provider, Aqua obtains water meter read data from CWA, and then bills its customers for wastewater service based on those meter reads. However, based on the response to OCA-XIII-14, there are two areas – Thomason Tract and the Bancroft Subdivision – where CWA is the water service provider but there is no agreement in place for Aqua to receive meter reads from CWA for the customers that are provided wastewater service by Aqua. In addition, it is my understanding that CWA provides water service to Honeycroft Village, a 55+ community with approximately 250 customers. The customers in Honeycroft Village are currently assessed Aqua's flat rate for wastewater service. I recommend that Aqua immediately pursue obtaining water usage data for the customers served by CWA in Thompson Tract, the Bancroft Subdivision, and Honeycroft Village, and report the results of its efforts and the costs it would incur to obtain meter read data from CWA in this proceeding. The Commission should then determine whether Aqua should obtain and use this meter read data to convert its flat rate wastewater customers served by CWA to water usage based billing. In Aqua's prior rate proceeding the Commission found that there is no question that volumetric billing is preferable to flat rate billing, as it provides better price signals and promotes conservation, as well as

resulting in a more equitable distribution of the variable costs of wastewater service among rate payers.[23]

Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?

A. Yes, it does. I reserve the right to update my testimony based on additional information received in the course of discovery. Additionally, I reserve the right to supplement my recommendations in supplemental direct testimony on September 12, 2024 if public input testimony gathered in this case informs my recommendations.

[23] Order at 272.

IV. SCH USA, LLC 7

I. INTRODUCTION

Q. WOULD YOU PLEASE STATE YOUR NAME AND BUSINESS ADDRESS?

A. My name is Jerome D. Mierzwa. I am a Principal and the President of Exeter Associates, Inc. ("Exeter"). My business address is 10480 Little Patuxent Parkway, Suite 300, Columbia, Maryland 21044. Exeter specializes in providing public utility-related consulting services.

Q. HAVE YOU PREVIOUSLY SUBMITTED TESTIMONY IN THIS PROCEEDING?

A. Yes, my direct testimony was submitted as OCA Statement 5 on August 16, 2024.

Q. WHAT IS THE PURPOSE OF YOUR REBUTTAL TESTIMONY?

A. The purpose of my rebuttal testimony is to respond to the revised direct testimony of Roger Cathcart submitted on behalf of the Office of Small Business Advocate ("OSBA"); the direct testimony of Ethan H. Cline submitted on behalf of the Bureau of Investigation and Enforcement ("I&E"); and the direct testimony of Frank Lacey submitted on behalf of SCH USA, LLC.

II. OFFICE OF SMALL BUSINESS ADVOCATE

Witness: Roger Cathcart

Q. IN YOUR DIRECT TESTIMONY DID YOU FIND THE WATER SERVICE CUSTOMER CLASS REVENUE ALLOCATIONS PROPOSED BY AQUA PENNSYLVANIA, INC. ("AQUA") FOR EACH CUSTOMER TO BE REASONABLE?

A. Yes. Overall, I found that Aqua's proposed revenue allocations for each customer class were consistent with the cost-of-service indicated by the Company's water class cost-

of-service ("CCOS") studies. Although I disagreed with the total amount of Aqua's proposed Act 11 assignment to water service, I found the Company's proposed allocation of the Act 11 assignment to the various customer classes to be reasonable. OCA St. 5, p. 6.

Q. DOES MR. CATHCART AGREE WITH THE COMPANY'S PROPOSED WATER SERVICE CUSTOMER CLASS REVENUE ALLOCATIONS IN THIS PROCEEDING?

A. Yes. Mr. Cathcart is in agreement with the Company's revenue allocation proposal, exclusive of the Act 11 assignment and allocations. OSBA St. No. 2, p. 8.

Q. HAS MR. CATHCART PROPOPSED AN ALTERNATIVE ACT 11 ASSIGNMENT TO WATER SERVICE AND ALLOCATION OF THAT ASSIGNMENT TO AQUA'S VARIOUS WATER CUSTOMER CLASSES?

A. Yes. Mr. Cathcart has proposed reducing the Act 11 assignment from $21.9 million to $19.7 million, or by $2.2 million, and has presented an alternative allocation of that assignment to the various water customer classes. The Act 11 assignments and allocations are presented on Schedule Q-5W of the revised direct testimony of Mr. Cathcart. OSBA St. No. 2, p. 8.

The $2.2 million reduction in the Act 11 assignment to water service proposed by Mr. Cathcart is the net result of a recommended additional $4.6 million increase in the Water Base Operations revenue increase initially proposed by Aqua, and a $2.4 million decrease in the East Whiteland Operations revenue increase initially proposed by Aqua.

Q. HOW DOES THE ACT 11 ASSIGNMENT PROPOSAL PRESENTED BY MR. CATHCART COMPARE TO THE PROPOSAL YOU PRESENTED IN YOUR DIRECT TESTIMONY?

A. In my direct testimony, I presented an Act 11 assignment proposal that would reduce the assignment from the $21.9 million proposed by Aqua to an estimated $9.4 million, or by $12.4 million. OCA St. 5, p.. 22. My proposed Act 11 reduction consists of three components. First, it is the OCA's position that the costs and revenue related to East Whiteland Operations should be excluded from this case and, therefore, I eliminated Aqua's proposed East Whiteland Act 11 shift of $3.1 million to water customers. Second, I recommended that any decrease in the wastewater revenue requirement authorized by the Commission in this proceeding from that requested by Aqua should first be applied to reducing the Act 11 shift. In my direct testimony, I estimated that this could reduce the Act 11 assignment by $7.4 million. Finally, I noted that in this proceeding, Aqua is proposing to consolidate Rate Zones 1A, 7, 9, 10, 12, and 14 with Rate Zone 1, and that Aqua had proposed rate decreases for Rate Zones 1 and 1A. I found it unreasonable to assign no increase to Rate Zone 1 and 1A, and then to assign a portion of the costs associated with serving Rate Zones 1 and 1A wastewater customers to water customers. I recommended that Rate Zone 1 and 1A customers be assigned an increase of 20%. This increase reduced the Act 11 shift by $2.1 million.

Q. DO YOU AGREE WITH THE ACT 11 SHIFT MODIFICATIONS PROPOSED BY MR. CATHCART?

A. Not entirely, as we have several areas of disagreement. Both Mr. Cathcart and I have recommended that any decrease in the wastewater revenue requirement authorized by the Commission in this proceeding from that requested by Aqua should first be applied to reducing the Act 11 shift. Therefore, Mr. Cathcart and I are in agreement with this

adjustment to the amount of the Act 11 shift. However, I would note that my Act 11 recommendation included an estimate of the impact of this recommendation, but the $19.6 million Act 11 shift proposed by Mr. Cathcart did not reflect an estimate of the impact of this recommendation.

The Act 11 shift proposed by Mr. Cathcart included an Act 11 shift for East Whiteland Operations. As previously explained, the costs and revenues related to East Whiteland Operations should be excluded from this case. Therefore, the Act 11 adjustment proposed by Mr. Cathcart for East Whiteland Operations should not be adopted.

Finally, Mr. Cathcart is proposing to increase the overall revenue increase of Wastewater Base Operations from the 14.3% proposed by Aqua to 22.4%. I have proposed an increase of 20% to Rate Zone 1 and 1A Wastewater Base Operations revenues. Mr. Cathcart has not identified how his proposed increase to Wastewater Base Operations revenues would be assigned to the various Wastewater Base Operations rate zones, and his proposed increase could potentially result in significant rate increases for some rate zones which are inconsistent with the concept of gradualism. Therefore, I recommend that my proposal to increase revenues for Rate Zones 1 and 1A by 20% be approved, and the proposal of Mr. Cathcart to increase Wastewater Base Operations revenues by an average of 22% be rejected. In summary, I continue to support the adjustments I proposed to the amount of the Act 11 shift I presented in my direct testimony.

Q. MR. CATHCART HAS PROPOSED AN ALTERNATIVE TO AQUA'S PROPOSED ALLOCATION OF THE ACT 11 SHIFT TO THE VARIOUS WATER CUSTOMER CLASSES. IS THIS ALTERNATIVE REASONABLE?

A. I do not oppose the alternative Act 11 customer class allocation proposal presented by Mr. Cathcart.

III. BUREAU OF INVESTIGATION AND ENFORCEMENT

Witness: Ethan H. Cline

Q. PURSUANT TO ACT 11, AQUA IS PROPOSING TO RECOVER $21.9 MILLION OF THE REVENUE REQUIREMENT OF ITS WASTEWATER OPERATIONS FROM ITS WATER OPERATIONS. DOES MR. CLINE AGEE WITH THIS PROPOSAL?

A. No. Mr. Cline is recommending a reduction in the Act 11 shift of $18.3 million from $21.9 million to $3.5 million. I&E St. No. 3, p. 13. This reduction is summarized on I&E Exhibit No. 3, Schedule 1. Mr. Cline's proposed reduction is largely attributable to increases in the proposed revenues to be collected from certain wastewater rate zones beyond those proposed by Aqua which reduce the wastewater revenue requirement to be collected from water service. Mr. Cline's proposed reduction also includes elimination of the Act 11 shift for East Whiteland wastewater operations.

Q. IS THE REDUCTION IN THE ACT 11 SHIFT PROPOSED BY MR. CLINE REASONABLE?

A. Mr. Cline's proposal to eliminate the Act 11 shift for East Whiteland wastewater operations is consistent with the adjustment to the Act 11 shift I presented in my direct testimony and is reasonable for the reasons presented in my direct testimony. However, several of the rate zone increases proposed by Mr. Cline are inconsistent with the

concept of gradualism and will likely cause rate shock. For example, Mr. Cline has proposed the following wastewater rate zone revenue increases:

Table 1-SR

Summary of I&E Proposed Wastewater Rate Zone Revenue Increases

Rate Zone	Increases
7	52.4%
9	75.1%
10	72.7%
12	41.7%
14	67.0%

Therefore, I recommend that the wastewater revenue increases proposed by Mr. Cline and the resulting decline in the Act 11 shift not be approved in this proceeding, and I continue to support the adjustments to the Act 11 shift presented in my direct testimony.

Q. PLEASE DESCRIBE THE RATE CHANGES THE COMPANY IS PROPOSING FOR SHENANDOAH WATER CUSTOMERS.

A. The Company is proposing to set the customer charges of Shenandoah customers equal to those of Rate Zone 1, eliminate the water allowance, merge the Residential usage rates into two consumption blocks, and create the same four consumption blocks for the Commercial, Industrial, and Public rate classes as shown on Aqua Exhibit 5-B, Part I, Schedule I, pages 10-12.

Q. DOES MR. CLINE AGREE WITH THE COMPANY'S PROPOSED RATE CHANGES FOR SHENANDOAH WATER CUSTOMERS?

A. Mr. Cline agrees with each the Company's rate proposals for Shenandoah water customers with the exception of the Company's proposed usage rates for the

Residential class. Mr. Cline recommends that the usage rates for the Residential class be increased to equal the Residential usage rates for Rate Zone 1.

Q. DO YOU AGREE WITH MR. CLINE'S CHANGE TO THE USAGE RATES FOR SHENANDOAH RESIDENTIAL WATER CUSTOMERS TO BE EQUAL TO THE RATE ZONE 1 RESIDENTIAL USAGE RATES?

A. No. Under Mr. Cline's proposal, the bill for an average Shenandoah Residential customer would increase from $56.14 to $97.01 per month, or by 72.80%. I&E St. No. 3, p. 48. An increase of this magnitude is inconsistent with the concept of gradualism, will likely cause rate shock, and should not be approved.

IV. SCH USA, LLC

Witness: Frank Lacey

Q. HOW IS SCH USA, LLC CURRENTLY BILLED BY AQUA FOR WASTEWATER SERVICE?

A. Most customers served by Aqua are billed for wastewater service based on water consumption. According to Mr. Lacey, Aqua is currently billing SCH USA, LLC for wastewater service on a metric called equivalent dwelling units ("EDUs"). SCH USA St. No. 3, pp. 3-4. SCH USA, LLC and other customers are generally billed based on EDUs when water consumption data for a customer is not available to Aqua. For example, water consumption data for a customer served by a private water well would generally not be available to Aqua for wastewater billing purposes.

Q. HOW DOES AQUA'S TARIFF CURRENTLY DEFINE AN EDU?

A. Aqua's current tariff defines an EDU as follows:

> Equivalent Dwelling Unit or "EDU": The EDU is a measure based upon the estimated average daily wastewater flow for the type of business, as calculated by the Pennsylvania Department of Environmental Protection regulation at 25 Pa. Code § 73.17 divided

by the typical estimated average daily wastewater flow from a current single-family unit. In the Company's sole discretion, the Company may assign more than one (1) EDU for a residential Property.

Q. IS AQUA PROPOSING TO MODIFY THE CURRENT DEFINITION OF EDU IN ITS TARIFF?

A. Yes, Aqua is proposing to modify the definition of EDU in its tariff to state as follows:

> Equivalent Dwelling Unit or "EDU": Except for existing customers acquired by the Company through a purchase or acquisition and for billing purposes only, the EDU is a measure assigned by the Company based upon the estimated average daily wastewater flow for the type of business, as calculated by the PaDEP regulation at 25 Pa. Code § 73.17(b) divided by the Company's typical estimated average daily wastewater flow from a current single-family unit. Residential Customers are designated as one (1) EDU; however, in the Company's sole discretion, the Company may assign more than one (1) EDU for a residential Property.
>
> For existing customers without a predetermined EDU allocation , the EDU is a measure based upon the estimated average daily wastewater flow for the type of business based on water usage, divided by the typical estimated average daily wastewater flow from a current single-family unit. For other existing customers acquired by the Company through a purchase acquisition, the number of equivalent dwelling units is available at https://www.aquawater.com/about/states-we-serve/pennsylvania/index.php.
>
> Any Customer who modifies their properties in a manner that impacts the EDU calculation, including in areas previously acquired by the Company, will be subject to the EDU definition described above. The Company will consider a Customer's request for a change in the number of assigned EDU's upon presentation of substantial evidence, satisfactory to the Company in its sole discretion. The Customer shall bear the burden of proof for all such requests.

Q. DOES MR. LACEY EXPRESS ANY SPECIFIC CONCERNS WITH THE NEW DEFINITION OF EDU PROPOSED BY AQUA?

A. Yes. Mr. Lacey opines that within this new definition, Aqua sets itself up as the judge and jury when it comes to evaluating requests for changes to EDU calculations. SCH

USA St. No. 3, p. 10. Mr. Lacey specifically raises this issue with regard to the context of the following portion of Aqua's proposed definition: "Aqua will consider a Customer's request for a change in the number of assigned EDU's upon presentation of substantial evidence, satisfactory to the Company in its sole discretion." Mr. Lacey finds that it is neither just nor reasonable that Aqua set itself up in this manner.

Q. DO YOU AGREE WITH THE CONCERNS EXPRESSED BY MR. LACEY CONCERNING A CHANGE IN THE NUMBER OF EDU ASSIGNED TO A CUSTOMER?

A. Yes. I am concerned about the use of the phrase "sole discretion" in the language Aqua proposes: "Aqua will consider a Customer's request for a change in the number of assigned EDU's upon presentation of substantial evidence satisfactory to the Company in its sole discretion." Specifically, by reserving the determination of a customer's EDU change to Aqua's sole discretion, there is no objective criteria that Aqua must adhere to in making a determination, and this could result in arbitrary or inequitable outcomes.

Q. WHAT DO YOU RECOMMEND?

A. I recommend that Aqua be required to identify the specific factors that it will consider when making a decision about EDU changes. Requiring Aqua to do this will ensure that there are clear parameters around its discretion and it will also ensure that customers can clearly identify what factors they will need to satisfy to facilitate an EDU change. Another benefit is that if customers believe they are not treated equitably within the tariff, they can file a complaint with the Commission and the Commission will be able to determine whether Aqua's determination was appropriate under the identified factors.

Q. DOES THIS CONCLUDE YOUR REBUTTAL TESTIMONY?

A. Yes. It does at this time.

Q. WOULD YOU PLEASE STATE YOUR NAME AND BUSINESS ADDRESS?

A. My name is Jerome D. Mierzwa. I am a Principal and the President of Exeter Associates, Inc. ("Exeter"). My business address is 10480 Little Patuxent Parkway, Suite 300, Columbia, Maryland 21044. Exeter specializes in providing public utility-related consulting services.

Q. HAVE YOU PREVIOUSLY SUBMITTED TESTIMONY IN THIS PROCEEDING?

A. Yes, my direct testimony was submitted as OCA Statement 5 on August 16, 2024, and my surrebuttal testimony was submitted as OCA Statement and 5R on September 12, 2024.

Q. WHAT IS THE PURPOSE OF YOUR REBUTTAL TESTIMONY?

A. The purpose of my surrebuttal testimony is to respond to the rebuttal testimony of Constance E. Heppenstall and William C. Packer submitted on behalf of Aqua Pennsylvania, Inc. ("Aqua" or "Company"), and the rebuttal testimony of Roger Cathcart submitted on behalf of the Office of Small Business Advocate ("OSBA").

II. AQUA Witness: Constance E. Heppenstall

Q. WHAT DID YOU RECOMMEND IN YOUR DIRECT TESTIMONY WITH RESPECT TO THE RATE INCREASES FOR THE BUNKER HILL, SUN VALLEY, AND PHOENIXVILLE AREAS?

A. As discussed on page 26 of my direct testimony, I recommended that the rate increases for the Bunker Hill, Sun Valley, and Phoenixville service areas be limited to 60% rather

than the 75% increases recommended by the Company to provide for gradualism. OCA St. 5, p. 29.

Q. DOES MS. HEPPENSTALL AGREE WITH THIS RECOMMENDATION?

A. No. Ms. Heppenstall claims that the present rates of the customers in these service areas are very low compared to the current rates of Rate Zone 1 customers and, therefore, a larger increase is warranted to move their rates closer to Rate Zone 1 rates. Aqua St. 5-R, p 3.

Q. WHAT IS YOUR RESPONSE TO MS. HEPPENSTALL'S CLAIM THAT A LARGER INCREASE FOR BUNKER HILL, SUN VALLEY, AND PHOENIXVILLE IS WARRANTED?

A. As explained in my direct testimony, a sound revenue allocation should utilize class cost-of service study results as a guide and provide for gradualism. OCA St. 5, p 23. I recognize that in this proceeding that Aqua is proposing to move toward additional consolidation of rates across rate zones (service areas) in this proceeding, and the rates proposed by Aqua in this proceeding generally result in revenue allocations that closely match the results indicated by its water cost-of-service studies. OCA St. 5, p. 35 and 26. However, as just explained, a sound revenue allocation should also provide for gradualism. As explained in my direct testimony, typically an increase of 1.5 to 2.0 times the system average increase is considered consistent with the concept of gradualism. OCA St. 5, p. 26. I have proposed an increase for the Bunker Hill, Sun Valley, and Phoenixville service areas which is 2.0 times the system average increase versus the 2.7 times the system average increase proposed by Aqua in this proceeding. As such my proposed revenue increases for the Bunker Hill, Sun Valley, and Phoenixville service areas is balanced in that it provides for movement toward cost of service rates, and provides for increases which are consistent with the concept of

gradualism and reduce potential rate shock. In addition, as indicated in my direct testimony, the Bunker Hill, Sun Valley, and Phoenixville service areas are relatively small, representing approximately 0.06% of present revenue. OCA St. 5, page 26. Therefore, providing for additional gradualism for these service territories as I have recommended will not have a material impact on the rates of other customers.

Q. IN YOUR DIRECT TESTIMONY, DID YOU AGREE WITH THE COMPANY'S PROPOSED CUSTOMER CHARGES?

A. No. As I explained on page 29 of my direct testimony, I did not agree with the Company's proposed customer charges because the charges proposed by Aqua were based on an analysis that included costs that are not direct customer costs and do not change with the addition or subtraction of a customer to the rate base.

Q. WHAT IS MS. HEPPENSTALL'S RESPONSE TO YOUR RECOMMENDATION?

A. Ms. Heppenstall claims that the Commission's order in the most recent Pennsylvania American Water Company ("PAWC") rate case (Docket No. R-2023-3043189) rejected my proposal regarding water customer charges and, therefore, my recommendation in this proceeding should also be rejected. Aqua St. 5-R, p. 4.

Q. WHAT IS YOUR RESPONSE TO MS. HEPPENSTALL'S RECOMMENDATION THAT YOUR WATER CUSTOMER CHARGE PROPOSAL BE REJECTED IN THIS PROCEEDING?

A. I continue to support my initial recommendation that only those direct costs that change with the addition or subtraction of a customer should be included in a customer charge. The customer charges proposed by Ms. Heppenstall include office building and furniture expenses, which are not direct customer costs and, therefore, the customer charges proposed by Ms. Heppenstall are not reasonable and should not be adopted. I

would note that Ms. Heppenstall provides no academic support for including indirect and overhead costs, such as office building and furniture expenses, in determining customer charges. However, in his well-known treatise Principles of Public Utility Rates, Professor James C. Bonbright states:

> But fully-distributed cost analysts dare not avail themselves of this solution, since they are the prisoners of their own assumption that "the sum of the parts equals the whole." They are therefore under impelling pressure to fudge their cost apportionments by using the category of customers costs as a dumping ground for costs that they cannot plausibly impute to any of their other cost categories. (Second Edition, page 492).

Clearly, Professor Bonbright agrees that costs that are not customer costs should not be included in customer charges.

Q. ON PAGE 5 OF HER REBUTTAL TESTIMONY, MS. HEPPENSTALL NOTES THAT IN YOUR DIRECT TESTIMONY, FOR WASTEWATER RATE DESIGN, YOU RECOMMENDED A 20% INCREASE FOR RATE ZONE 1 AND 1A, AND MAINTAINING THE COMPANY'S RECOMMENDED RATE DESIGN FOR RATE ZONES 7, 9, 10, 12, AND 14. WHAT WAS THE BASIS FOR YOUR WASTEWATER RATE DESIGN RECOMMENDATION?

A. In this proceeding, Aqua is proposing to consolidate wastewater Rate Zones 1A, 7, 9, 10, 12 and 14 with Rate Zone 1, and Rate Zones 7, 9, 10, 11, 12, and 14 would receive moderate rate increases, but Rate Zone 1 and 1A would receive rate decreases. OCA St. 5, p. 22. Under Aqua's proposal, Rate Zones 1 and 1A would be assigned no rate increase, and a portion of the costs associated with serving Rate Zone 1 and 1A wastewater customers would be assigned to water customers. *Id*. I found this unreasonable and, therefore, recommended a rate increase of 20% for Rate Zone 1 and 1A wastewater customers. *Id.*

Q. DOES MS. HEPPENSTALL AGREE WITH YOUR RECOMMENDATION TO INCREASE THE RATES OF RATE ZONE 1 AND 1A WASTEWATER CUSTOMERS?

A. No. Ms. Heppenstall claims that it is the Company's goal to consolidate wastewater rates as quickly as possible. Aqua St. 5-R, p.5. She claims that my recommendation would further delay rate consolidation and just "[k]icks the can down the road" to future rate cases. *Id.*

Q. WHAT IS OUR RESPONSE TO MS. HEPPENSTALL'S DISAGREEMENT WITH YOUR RECOMMENDATION?

A. Under the Company's proposed rate design, Rate Zones 1 and 1A are assigned no rate increase, and a portion of the costs associated with serving Rate Zone 1 and 1A are assigned to water customers. As a result, the Act 11 shift is increased under the Company's proposal and would be decreased under my proposal by $2.1 million. I don't believe it is in the public interest to increase the Act 11 shift, and that it is in the public interest to minimize the Act 11 shift. Minimization of the Act 11 shift results in a better match between the cost of providing water service with the revenues collected from water customers, and a better match between the cost of providing wastewater service with the revenues collected for wastewater customers which I believe is consistent with the public interest. Under the Company's proposed revenue requirement and my recommendation, Rate Zone 1 and 1A wastewater customers and water customers would each receive an increase of approximately 20%.

Q. ON PAGE 38-39 OF YOUR DIRECT TESTIMONY, YOU NOTED THAT IN THE COMPANY'S LAST BASE RATE PROCEEDING, THE COMMISSION'S ORDER DIRECTED AQUA TO PREPARE AND SUBMIT IN IT'S NEXT BASE RATE PROCEEDING A REPORT EVALUATING WHETHER DIFFERENT METHODS OF CALCULATING A FLAT RATE FOR WASTEWATER SERVICE WOULD BE MORE REASONABLE FOR SOME RATE ZONES RATHER THAN APPLYING A SYSTEM-WIDE USAGE AVERAGE TO EACH RATE ZONE, AND THAT THE COMPANY DID NOT PREPARE AND SUBMIT THE REQUIRED EVALUATION IN THIS PROCEEDING. DOES MS. HEPPENSTALL AGREE THAT THE COMPANY DID NOT SUBMIT THE REQUIRED EVALUATION?

A. No. Ms. Heppenstall claims that the required evaluation was provided in response to data request OCA-XIII-16 which she includes as Exhibit CEH-2-R to her rebuttal testimony.

Q. DO YOU FIND THAT EXHIBIT CEH-2-R SATISFIES THE REQUIREMENTS OF THE COMMISSION'S ORDER IN AQUA'S PRIOR CASE?

A. No. Exhibit CEH-2-R is a two page document and analysis which includes no discussion of the details of the analysis prepared by the Company. This two page document does not qualify as a study or report, and presenting the document as a data request does not meet the Commission's directive of presenting a study or report in this proceeding.

III. AQUA Witness: William C. Packer

Q. ON PAGES 17 AND 18 OF HIS REBUTTAL TESTIMONY, MR. PACKER CLAIMS THAT YOU RECOMMENDED THAT THE ACT 11 SHIFT SHOULD BE NO HIGHER THAN 10% OF THE WASTEWATER COST OF SERVICE, AND YOU HAVE PRESENTED NO SUPPORT FOR WHY 10% IS A REASONABLE SHIFT. WHAT IS OUR RESPONSE TO MR. PACKERS CLAIMS?

A. Support for my recommendation is presented on pages 21 and 22 of my direct testimony. As explained on pages 21 and 22, the 10% shift I have recommended is an estimate, and it is based on three adjustments to the Act 11 shift proposed by Aqua. The first adjustment is elimination of the $3.14 million East Whiteland Act 11 shift. This adjustment is supported by OCA Witness Christine Hoover and Ralph Smith. The second adjustment applies any decrease in the wastewater revenue requirement authorized by the Commission in this proceeding from that requested by Aqua to first reducing the Act 11 shift. Based on an estimate wastewater revenue requirement which is 75% of its requested increase, the Act 11 shift would be reduced by $7.4 million. Mr. Packer has not claimed that adjusting the Act 11 shift to reflect the wastewater revenue requirement to be unreasonable. The final adjustment I have proposed to the Act 11 shift relates to the revenue increase I have proposed for wastewater Rate Zones 1 and 1A. I previously discussed the reasonableness of this adjustment earlier in my surrebuttal testimony responding to Ms. Heppenstall.

IV. OSBA Witness: Roger Cathcart

Q. AS INDICATED PREVIOUSLY IN YOUR SURREBUTTAL TESTIMONY, IN YOUR DIRECT TESTIMONY YOU PROPOSED REDUCING THE 75% INCREASES AQUA PROPOSED FOR THE BUNKER HILL, SUN VALLEY, AND PHOENIXVILLE SERVICE AREAS TO 60%. IN HIS DIRECT TESTIMONY, DID MR. CATHCART PROPOSE ANY CHANGES TO THE COMPANY'S PROPOSED INCREASES OF 75% FOR THESE THREE SERVICE AREAS?

A. No. He did not.

Q. HAS MR. CATHCART PROPOSED ANY MODIFICATIONS TO YOUR PROPOSAL TO LIMIT THE INCREASE TO THE BUNKER HILL, SUN VALLEY, AND PHOENIXVILLE SERVICE AREAS TO 60%?

A. Yes. To mitigate rate shock Mr. Cathcart has proposed to limit the increase to these three service areas to 1.25 times the system average increase rather than 2.0 times the system average increase I have proposed. OSBA St. 3, p. 5.

Q. DO YOU AGREE WITH MR. CATHCART'S PROPOSED MODIFICATION?

A. No. As noted previously in my surrebuttal testimony, Ms. Heppenstall disagreed with my proposal to limit the increase to the Bunker Hill, Sun Vally, and Phoenixville service territories to 60% because the current rates for these three service territories are significantly below the rates for Rate Zone 1. Mr. Cathcart's modification will result in a more significant difference in the proposed rates for these three service territories and Rate Zone 1 than I have proposed. I believe my proposal to limit the rate increase for these three service territories to 2.0 times the system increase provides an appropriate

balance between avoiding rate shock while moving the rates for these three service territories toward the rates for Rate Zone 1.

Q. IN YOUR DIRECT TESTIMONY DID YOU FIND THE WATER SERVICE CUSTOMER CLASS REVENUE ALLOCATIONS PROPOSED BY AQUA PENNSYLVANIA, INC. ("AQUA") FOR EACH CUSTOMER TO BE REASONABLE?

A. Yes. Overall, I found that Aqua's proposed revenue allocations for each customer class were consistent with the cost-of-service indicated by the Company's water class cost-of-service ("CCOS") studies. Although I disagreed with the total amount of Aqua's proposed Act 11 assignment to water service, I found the Company's proposed allocation of the Act 11 assignment to the various customer classes to be reasonable. OCA St. 5, p. 6.

Q. DOES MR. CATHCART AGREE WITH THE COMPANY'S PROPOSED WATER SERVICE CUSTOMER CLASS REVENUE ALLOCATIONS IN THIS PROCEEDING?

A. Yes. Mr. Cathcart is in agreement with the Company's revenue allocation proposal, exclusive of the Act 11 assignment and allocations. OSBA St. No. 2, p. 8.

Q. HAS MR. CATHCART PROPOSED AN ALTERNATIVE ACT 11 ASSIGNMENT TO WATER SERVICE AND ALLOCATION OF THAT ASSIGNMENT TO AQUA'S VARIOUS WATER CUSTOMER CLASSES?

A. Yes. Mr. Cathcart has proposed reducing the Act 11 assignment from $21.9 million to $19.7 million, or by $2.2 million, and has presented an alternative allocation of that assignment to the various water customer classes. The Act 11 assignments and allocations are presented on Schedule Q-5W of the revised direct testimony of Mr. Cathcart. OSBA St. No. 2, p. 8.

The $2.2 million reduction in the Act 11 assignment to water service proposed by Mr. Cathcart is the net result of a recommended additional $4.6 million increase in the Water Base Operations revenue increase initially proposed by Aqua, and a $2.4 million decrease in the East Whiteland Operations revenue increase initially proposed by Aqua.

Q. HOW DOES THE ACT 11 ASSIGNMENT PROPOSAL PRESENTED BY MR. CATHCART COMPARE TO THE PROPOSAL YOU PRESENTED IN YOUR DIRECT TESTIMONY?

A. In my direct testimony, I presented an Act 11 assignment proposal that would reduce the assignment from the $21.9 million proposed by Aqua to an estimated $9.4 million, or by $12.4 million. OCA St. 5, p. 22. My proposed Act 11 reduction consists of three components. First, it is the OCA's position that the costs and revenue related to East Whiteland Operations should be excluded from this case and, therefore, I eliminated Aqua's proposed East Whiteland Act 11 shift of $3.1 million to water customers. Second, I recommended that any decrease in the wastewater revenue requirement authorized by the Commission in this proceeding from that requested by Aqua should first be applied to reducing the Act 11 shift. In my direct testimony, I estimated that this could reduce the Act 11 assignment by $7.4 million. Finally, I noted that in this proceeding, Aqua is proposing to consolidate Rate Zones 1A, 7, 9, 10, 12, and 14 with Rate Zone 1, and that Aqua had proposed rate decreases for Rate Zones 1 and 1A. I found it unreasonable to assign no increase to Rate Zone 1 and 1A, and then to assign a portion of the costs associated with serving Rate Zones 1 and 1A wastewater customers to water customers. I recommended that Rate Zone 1 and 1A customers be assigned an increase of 20%. This increase reduced the Act 11 shift by $2.1 million.

Q. DO YOU AGREE WITH THE ACT 11 SHIFT MODIFICATIONS PROPOSED BY MR. CATHCART?

A. Not entirely, as we have several areas of disagreement. Both Mr. Cathcart and I have recommended that any decrease in the wastewater revenue requirement authorized by the Commission in this proceeding from that requested by Aqua should first be applied to reducing the Act 11 shift. Therefore, Mr. Cathcart and I are in agreement with this adjustment to the amount of the Act 11 shift. However, I would note that my Act 11 recommendation included an estimate of the impact of this recommendation, but the $19.6 million Act 11 shift proposed by Mr. Cathcart does not reflect an estimate of the impact of this recommendation.

The Act 11 shift proposed by Mr. Cathcart included an Act 11 shift for East Whiteland Operations. As previously explained, the costs and revenues related to East Whiteland Operations should be excluded from this case. Therefore, the Act 11 adjustment proposed by Mr. Cathcart for East Whiteland Operations should not be adopted.

Finally, Mr. Cathcart is proposing to increase the overall revenue increase of Wastewater Base Operations from the 14.3% proposed by Aqua to 22.4%. I have proposed an increase of 20% to Rate Zone 1 and 1A Wastewater Base Operations revenues. Mr. Cathcart has not identified how his proposed increase to Wastewater Base Operations revenues would be assigned to the various Wastewater Base Operations rate zones, and his proposed increase could potentially result in significant rate increases for some rate zones which may be inconsistent with the concept of gradualism. Therefore, I recommend that my proposal to increase revenues for Rate Zones 1 and 1A by 20% be approved, and the proposal of Mr. Cathcart to increase Wastewater Base Operations revenues by an average of 22% be rejected. In summary,

I continue to support the adjustments I proposed to the amount of the Act 11 shift I presented in my direct testimony.

Q. MR. CATHCART HAS PROPOSED AN ALTERNATIVE TO AQUA'S PROPOSED ALLOCATION OF THE ACT 11 SHIFT TO THE VARIOUS WATER CUSTOMER CLASSES. IS MR. CATHCARD'S PROPOSED ALTERNATIVE ALLOCATION REASONABLE?

A. Yes, and I do not oppose the alternative Act 11 customer class allocation proposal presented by Mr. Cathcart.

Q. DOES THIS CONCLUDE YOUR SURREBUTTAL TESTIMONY?

A. Yes. It does at this time.

Summary of Recommendations		76

Q. PLEASE STATE YOUR NAME AND ADDRESS.

A. My name is Roger D. Colton. My business address is 34 Warwick Road, Belmont, MA.

Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT POSITION?

A. I am owner of the firm of Fisher Sheehan & Colton, Public Finance and General Economics of Belmont, Massachusetts. In that capacity, I provide technical assistance to a variety of federal and state agencies, consumer organizations and public utilities on rate and customer service issues involving water/sewer, natural gas and electric utilities.

Q. ON WHOSE BEHALF ARE YOU TESTIFYING IN THIS PROCEEDING?

A. I am testifying on behalf of the Office of Consumer Advocate.

Q. PLEASE DESCRIBE YOUR PROFESSIONAL BACKGROUND.

A. I work primarily on low-income utility issues. This involves regulatory work on rate and customer service issues, as well as research into low-income usage, payment patterns, and affordability programs. At present, I am working on various projects in the states of Massachusetts, Connecticut, Maryland, Pennsylvania, Ohio, Michigan, Wisconsin, Illinois, Missouri, Oregon, and Washington, as well as in the Canadian provinces of Nova Scotia and British Columbia. My clients include state agencies (e.g., Pennsylvania Office of Consumer Advocate, Maryland Office of People's Counsel, Connecticut Office of Consumers Counsel), federal agencies (e.g., the U.S. Department of Health and Human Services), community-based organizations (e.g., Cleveland Legal Aid Society, Legal Action of Chicago, Sierra Club), and private utilities (e.g., Toledo Water, BC Hydro). In addition to state-specific and utility-specific work, I engage in national work throughout the United States. For example, in 2020, I represented a coalition of major national

consumer organizations to comment on the Environmental Protection Agency's proposed framework by which to judge community financial capability. I have recently completed a project with the Natural Resources Defense Council to develop a tool by which to assess the financial impact of differing types of low-income bill assistance. In 2020, I completed a study of water affordability in twelve U.S. cities for the London-based newspaper, The Guardian. I continue to be of counsel to the National Coalition for Legislation on Affordable Water (NCLA-Water). A brief description of my professional background is provided in Exhibit RDC-1.

Q. PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND.

A. After receiving my undergraduate degree in 1975 (Iowa State University), I obtained further training in both law and economics. I received my law degree in 1981 (University of Florida). I received my Master's Degree (Regulatory Economics) from the MacGregor School (Antioch University) in 1993.

Q. HAVE YOU EVER PUBLISHED ON PUBLIC UTILITY REGULATORY ISSUES?

A. Yes. I have authored three books and more than 80 articles in scholarly and trade journals, primarily on low-income utility and housing issues. I have authored more than 200 technical reports for various clients on energy, water, telecommunications and other associated low-income utility issues. A summary of my publications is included in Exhibit RDC-1.

Q. HAVE YOU EVER TESTIFIED BEFORE THIS OR OTHER UTILITY COMMISSIONS?

A. Yes. I have testified before the Pennsylvania Public Utility Commission ("PUC" or "Commission") on numerous occasions regarding utility issues affecting low-income customers and customer service. My testimony has specifically included testimony in various proceedings involving low-income issues relating to Pennsylvania American Water Company (PAWC), Pittsburgh Water and Sewer Authority (Aqua), and Aqua Pennsylvania, Inc. (Aqua PA). In addition to this PUC testimony, I have testified on issues related to customer service and low-income bill affordability for the City of Philadelphia's Public Advocate in each rate case involving the Philadelphia Water Department since 1990. I have also testified in more than 340 judicial and regulatory proceedings in 43 states and various Canadian provinces on a wide range of utility issues. A list of the jurisdictions in which I have testified is listed in Exhibit RDC-1.

Q. PLEASE EXPLAIN THE PURPOSE OF YOUR DIRECT TESTIMONY.

A. The purpose of my Direct Testimony is to review the impact of Aqua PA rates on low-income customers. I will further review the reasonableness of the design and implementation of the low-income bill payment assistance programs offered by Aqua PA. More specifically, I will examine:

- The affordability of Aqua bills, at existing and proposed rates, to low-income and moderate income customers;
- The particular adverse impacts which inflation has had on low-income household;
- Necessary improvements to the Aqua Customer Assistance Program (CAP);

- The need to offer CAP and Arrearage Forgiveness at the time of Aqua's collection activities;
- Necessary improvements to Aqua's Arrearage Forgiveness Program;
- The need for cost offsets to Aqua's claimed cost recovery for its bill discount credits and arrearage forgiveness credits;
- The reasonableness of expanding Aqua's low-income water conservation program; and
- The particular adverse impacts to low-income customers from increasing Aqua's residential customer charge.

Part 1. The Affordability of Aqua PA Rates.

Q. PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR TESTIMONY.

A. In this section of my testimony, I examine the affordability of Aqua rates. First, I will track the escalation of Aqua rates over time. I will then compare the impact which the rate increases proposed in this proceeding affect affordability. I finally will assess the impact of Aqua's proposed rates on the working poor, represented by Pennsylvania's ALICE (Asset Limited, Income Constrained, Employed) population.

Q. PLEASE EXPLAIN WHY PAYING PARTICULAR ATTENTION TO THE AFFORDABILITY OF SERVICE IS IMPORTANT IN THIS RATE PROCEEDING.

A. While Pennsylvania statutes do not impose the same universal service obligations on Aqua that they impose on the state's energy utilities, low-income customers are the households who are financially least capable of responding to the harms arising from the

unaffordability of water service. This is important given that water service in today's world is an essential human need. Water is needed not only for drinking, but also for cooking and sewer needs. A 2022 White Paper by the U.S. Water Alliance states that "for every community in our country, the availability of safe drinking water and wastewater services is a precondition for public health and prosperity."[1] Water is vital to maintaining hygiene and health. The lack of water has particularly negative impacts on children, the elderly, women, and persons suffering from an illness or chronic health concern. As one recent study noted:

> Dehydration can create threatening chemical imbalances for elderly people. Women who are menstruating need water to properly cleanse themselves, and mothers who are nursing need water to maintain their milk supply and their health. Some people with chronic illness need clean water in order to run and wash personal medical equipment.[2]

A recent study published in the American Journal of Preventative Medicine concluded that "Water shutoffs pose a real threat to human health because the lack of adequate sanitation can cause diseases to spread and allow people to become sick."[3] A 2010 report for the Water Research Foundation (the research arm of the American Water Works Association, AWWA) concluded that "A final consideration of importance to water utilities is the relationship of payment problems to health issues. . . Potential impacts

relate to many of the same public health endpoints targeted by Safe Drinking Water Act standards such as effects on children and the unborn."[4]

The fundamental need for affordable water is recognized by not only laws relating to the protection of children, but also by laws relating to the habitability of homes. In 21 states, a parent's inability to provide running water in the home can be considered "child neglect."[5] The lack of running water and sanitation is generally considered by public health inspectors to make a home uninhabitable.[6]

A. The Increase in Aqua Rates Over Time.

Q. HAVE YOU EXAMINED THE MOVEMENT IN AQUA PRICES OVER TIME RELATIVE TO THE MOVEMENT IN INCOMES FOR A LOW-INCOME HOUSEHOLD?

A. Yes. Using data from Aqua's annual reports to the Pennsylvania PUC, I have tracked the price of Aqua water service from 2015 through 2022. I compare these rate increases to the increase in incomes for households in the First Quintile (Q1) of Income (i.e., the bottom 20% of households based on income) for Pennsylvania as a whole.[7] I set Aqua rates and income levels equal to 100 in 2015. Subsequent changes are seen relative to this

[4] Cromwell, et al. (2010). Best Practices in Customer Payment Assistance Programs, at xxii, Water Research Foundation: Washington D.C. (hereafter "Best Practices").

[5] Id., at 34.

[6] Id., at 32 – 33.

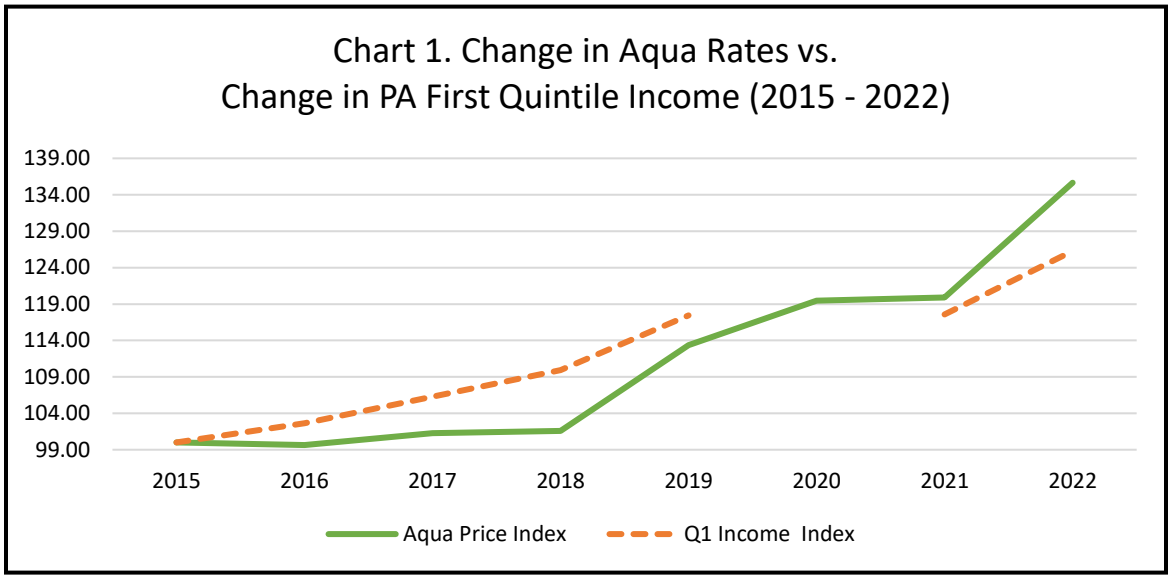
[7] For each geographic area, the Census Bureau rank orders incomes from lowest to highest. It then divides that ranking into five equal parts, each part of which is called a "quintile." The "First Quintile" (sometimes known as the "bottom Quintile" or "lowest Quintile"), therefore, is the one-fifth of households with the lowest incomes.

base. An increase in rates or income means the index will increase to more than 100, while a decrease would see the index go below 100.

The data shows that while Aqua's water rates were relatively constant from 2015 through 2018, beginning in 2019, rates sharply increased. From 2018 to 2019, the Aqua price index increased from 101.57 to 113.38, while by 2020, the index had increased further to 119.45. By 2022, the Aqua price had increased to 135.65, indicating that prices had increased by more than 35% from a 2105 baseline. By 2021 and 2022, the increase in Aqua prices had outstripped increases in the Q1 incomes.[8] In comparison to the 2022 price index of 135.65, the 2022 index for Q1 incomes was only 126.68. The data shows, in other words, that while Aqua prices increased by 36% in this time period, incomes had increased by only 27%.

Beyond this data, Aqua was granted a further rate increase in May 2022 and is now seeking another rate increase in 2024.

[8] The Census Bureau did not report 2020 data because of its inability to collect data in 2020 due to restrictions associated with the novel Coronavirus health pandemic.



The gap in data for 2020 in the Chart above is an effect of COVID-19. The Census Bureau did not report 2020 data because of its inability to collect data in 2020 due to restrictions associated with the health pandemic.

The data shows the increasing unaffordability of Aqua bills to the utility's lowest income households as income is not keeping pace with rates. One aspect of high energy burdens that is of concern is the extent to which the unaffordability of bills affects the payment patterns of populations of concern. The inability to pay bills affects those populations in multiple ways. It forces customers to make choices between paying and not paying competing household necessities. It forces customers to make household sacrifices. In addition, it imposes additional costs on them (e.g., late charges, disconnect / reconnect charges, interest on borrowing to pay utility bills).

B. The Impact of Aqua's Proposed Rate Increase on Low-Income Customers.

Q. HAVE YOU EXAMINED THE AFFORDABILITY OF AQUA BILLS AT EXISTING AND PROPOSED RATES?

A. Yes. I assess the affordability of Aqua rates by calculating a Bill-to-Income ratio for each zip code comprising the utility's service territory.[9] Using the Company's identification of the bill impact of its proposed rate increase, I then determine a Bill-to-Income ratio at selected ranges of Federal Poverty Level given existing rates and again at the Company's proposed rates. Defining an affordable water Bill-to-Income ratio as one not exceeding 2% of income,[10] I examine the affordability of Aqua rates at both existing and proposed rates. The data is set forth in Table 1 below. The data shows that at proposed rates, Aqua bills are substantially less affordable than at existing rates. At the lowest income range, Aqua bills result in a Bill-to-Income ratio more than six times higher than the affordable 2% demarcation of affordability. For households with income between 125% and 150% of FPL, Aqua bills result in bill burdens[11] two times higher than that which is affordable. Even households with incomes between 150% and 200% of Poverty, face unaffordable bill burdens at both existing and proposed rates, with proposed rates yielding bill burdens 50% higher than the affordable 2% of income.

[9] Aqua identified the zip codes comprising its service territory in response to discovery. (OCA-VI-1).

[10] See, Raucher, et al. (2019). Developing a New Framework for Household Affordability and Financial Capability Assessment in the Water Sector, at 3-20 (4.5% reasonable definition for combined water/wastewater). I allocate that 4.5% as 2.0% to water and 2.5% for wastewater. See also, Craley et al. (2019). Pittsburgh Water and Sewer Authority, Household Affordability Analysis, Final Report, at 17 ("By the EPA affordability standard, which looks specifically at this "typical" customer, service is affordable because the burden is less than 4.5%").

[11] Throughout my testimony, a number of terms are used interchangeably. "Bill Burdens" and "Bill-to-Income ratios" should be considered synonymous. They both refer to bills as a percentage of income.

Table 1. Bill-to-Income Ratios: Aqua Water Bills at Existing and Proposed Rates		
Federal Poverty Level	Existing Rates	Proposed Rates
<50% FPL	10.0%	12.9%
50 – 75% FPL	6.4%	8.3%
75 – 100% FPL	4.6%	5.9%
100 – 125% FPL	3.6%	4.6%
125 – 150% FPL	2.9%	3.8%
150 – 200% FPL	2.3%	2.9%

The unaffordable bills I identify affect large numbers of people. In the Aqua zip codes with which I have matched Census data, there are more than 690,000 people with income below 200% of FPL, 21% of the total population in the service territory.[12] Applying that 21% against the 380,291 water customers which Aqua reports (by zip code),[13] Aqua has an estimated 78,161 customers with income below 200% FPL.

C. The Impact of Aqua's Proposed Rate Increase on Moderate Income Customers.

Q. DO YOU HAVE CONCERNS ABOUT THE IMPACT OF THIS AQUA RATE REQUEST OUTSIDE OF THE IMPACT ON LOW-INCOME CUSTOMERS?

A. Yes. The PUC must consider both the impacts of rate changes on low-income customers, but also the impacts of consumer interests generally. To consider the impacts of Aqua's rate case on consumers generally, I use county-wide data provided by United for ALICE[14] through the ALICE (Asset Limited, Income Constrained, Employed) Report for Pennsylvania. The ALICE data discusses the ability of households to afford the basics required for self-sufficiency.

[12] American Community Survey (5-year data). Table C17002 (2022).

[13] OCA-VI-02.

[14] An overview of United for Alice is available at https://unitedforalice.org/overview.

Q. BRIEFLY SUMMARIZE WHAT THE ALICE DATA SHOWS.

A. The ALICE data shows that the unaffordability of Aqua bills is not exclusively a concern of low-income households. The lack of sufficient resources to pay household necessities extends upward, well into the "working poor" population. The number of households in Aqua's service territory that would struggle to pay increased Aqua bills associated with this rate case because they have income lower than the ALICE income is more than two times higher than the number of households below Poverty.

Q. WHAT ALICE DATA HAVE YOU EXAMINED?

A. In the 2024 ALICE report for Pennsylvania, using data from 2023, in Pennsylvania, a family of four would need an annual income of $83,700 to cover essentials needed to live and work, pay rent, and pay utilities.[15] ALICE household survival budgets are calculated by county for a family of four in Pennsylvania, I have reviewed the median household income (MHI) for the 32 counties which Aqua serves in Pennsylvania. I separately considered MHIs for the total population, and MHIs for the Black population.[16] Here is a summary of the data:

- Of the 32 Aqua counties, the MHI-ALL is below the ALICE survival income in only two counties.
- However, the MHI-Black is below the ALICE survival income in 17 counties; and the MHI-Hispanic is below the ALICE survival income in 13 counties.
- The 32 counties served by Aqua have a total population with incomes below the ALICE threshold of 673,012, while having a population below Poverty of only 240,415.
- The percentage of population living below the ALICE threshold (28.7%) in the Aqua counties is nearly three times higher than the percentage of population living below Poverty (10.2%).

[15] The complete ALICE data for Pennsylvania is available at https://unitedforalice.org/state-overview/Pennsylvania

[16] I will refer to the MHI for the total population as "MHI-ALL." I will refer to the MHI for the Black population as "MHI-Black."

Q. DO YOU HAVE OTHER CONCERNS ABOUT THE IMPACTS OF THE AQUA RATE REQUEST ON CONSUMERS GENERALLY?

A. Yes. The adverse impacts to consumers arise not exclusively because of what burdens the Aqua rates are imposing, but also because of the cumulative impacts of the group of utilities serving the same customers. In 2024, it is not merely Aqua that is seeking higher rates. Multiple utilities serving overlapping service territories are also seeking substantial rate hikes. In 2024:

- PECO (gas) has filed a rate case that would increase typical residential bills by $16.15 per month ($193.80 per year).
- PECO (Electric) has filed a rate case that will increase residential bills by $16.67 per month or $200.04 per year.

These requested rate increases are in addition to the Aqua rate case that would increase typical residential water bills from $78.21 to $97.61 per month ($20.50), $246 per year. Additional rate hikes were sought for Aqua's sewer bills.

When layered one on top of the others, the cumulative impacts of the rate cases of multiple utilities impose far more harm than any single one of these rate cases standing alone. The PECO electric and gas rate increases, on top of the Aqua requested rate increase would, for example, would increase *total* utility bills for the customers by $640 per year to customers in overlapping service territories.

Q. HAVE YOU IDENTIFIED THE EXTENT OF THE OVERLAP?

A. Yes. Each utility has provided a list of the zip codes which comprise its respective service territory. By matching those lists, I identified the zip codes that are served by all three utilities. Of the 258 zip codes in which Aqua has matching Census data, 125 are also served by PECO (Gas) and PECO (electric). The zip codes in which all three utilities overlap have nearly 940,000 households, with nearly 102,000 of those households having income less than $25,000.

Q. HAVE YOU BEEN ABLE TO ASSESS WHAT THE IMPACT ON RESIDENTIAL CUSTOMERS WILL BE FROM THIS CUMULATIVE SET OF RATE INCREASES?

A. Yes. Given the combined rate increases sought by PECO (electric), PECO (gas), and Aqua in 2024, in other words, residents seeking rental units in Aqua's counties which overlap with PECO (gas) and PECO (electric) would need an additional income of $2,133 each year simply to pay their utility bill hikes if all of the rate increases are approved as requested.

Q. HOW DID YOU REACH THIS CONCLUSION?

A. The National Low-Income Housing Coalition (NLIHC) publishes an annual reported titled "Out of Reach: The High Cost of Housing" (OOR).[17] I examine the results of the most recent OOR (2024) for four Aqua counties which overlap with PECO (electric) and PECO (gas) (Bucks, Chester, Delaware, Montgomery). I began with the 2 bedroom Fair Market Rent (FMR) in each county, and recalculated that FMR after adding the increased utility bills attributable to the combined rate hikes ($640) as I explained above. I calculated the annual income that would be needed to be able to afford this housing at the median renter wage in each county. In three of these four counties (all but Delaware) would the median renter income in the county would be sufficient to afford the 2 bedroom FMR before any increased utility costs were taken into account (and in Bucks County, the income is less than $600 more). In only two of the four counties would the median renter income in the county be sufficient to afford the 2 bedroom FMR after the increased utility costs.

Throughout the four counties, the average renter would need to work between a low of 81 to a high of 125 additional hours a year at the mean renter wage simply to pay their increased utility costs. The data is set forth in the Table below. As the Table shows, the overlapping utility rate requests facing Aqua's service territory would require the Company's renters to find three or more

[17] https://reports.nlihc.org/oor/pennsylvania

additional weeks of work (120+ hours) at mean renter wage in two of the four counties. In only two of the four counties (Chester, Montgomery) could renters at the mean renter wage pay the higher utility bills with fewer than 100 additional hours of work each year.

Table 2. Impact of Combined Rate Increases Sought in Utility Service Territories Overlapping with Aqua

County	Income Needed for 2 BR FMR + Utility	Income Needed for 2BR FMR w/o Utility	Additional Income Needed	Mean Renter Wage	Additional Annual Hours at Mean Renter Wage Needed to Pay Utility Costs
Bucks	$60,933	$58,800	$2,133	$17.07	125
Chester	$60,933	$58,800	$2,133	$24.70	86
Delaware	$60,933	$58,800	$2,133	$20.13	106
Montgomery	$60,933	$58,800	$2,133	$26.34	81

In addition to the data presented above, workers at minimum wage would, of course, need to work more additional hours than the hours set forth at mean renter wage. As of August 2024, Pennsylvania continues to use the federal minimum wage of $7.25 per hour.

Part 2. Impact of Inflation on Low-Income Customers.

Q. PLEASE DESCRIBE THE PURPOSE OF THIS SECTION OF YOUR TESTIMONY.

A. In this section of my testimony, I examine the disproportionate adverse impact that inflation has on low-income customers. I examine this impact because Aqua has requested a specific Inflation Factor to be approved for its Future Test Year and Fully Projected Future Test Year.[18] Approving such a request is unreasonable in light of the adverse impacts which inflation is imposing on low-income households in particular.

[18] Aqua St. 3, at 3.

The process of setting reasonable rates does not exclusively consider the interests of the utility and its investors. The courts, for example, have noted that setting a reasonable return on equity must involve a balancing of the interests of investors and ratepayers. In addition, under Pennsylvania law, in setting rates, the Public Utility Commission must give "due consideration to the interests of consumers."[19] To the extent that the impacts of inflation on investor interests are considered, therefore, the impacts of inflation on ratepayer interests must be considered as well.

In summary, as I will explain below, the testimony of Aqua's witness Manning does not present a complete story about the stress which inflation has placed on utility ratepayers, especially low-income customers. Inflation is disproportionately affecting lower-income households. The 10.95% ROE sought by Aqua in this proceeding, which would have the impact of driving up rates, will exacerbate this problem. Given the PUC's obligation to balance the interests of investors and ratepayers in setting a reasonable ROE, the PUC should consider the greater adverse impacts that inflation has imposed on low-income ratepayers when setting rates.

[19] 71 Pa. Stat. Ann. §309-5(2).

Q. DOES INFLATION HAVE A PARTICULARLY ADVERSE IMPACT ON LOWER INCOME HOUSEHOLDS?

A. The impact of inflation is felt most severely by low-income households. Research by the U.S. Department of Labor's Bureau of Labor Statistics,[20] reports that "consumers with different incomes experience inflation quite differently."[21] According to this research, the lowest earning households spend a disproportionately higher share of their household budget on household necessities such as rent, food and medical care.

Table 3. Household budget shares of expenditure items for lowest and highest income quartiles, 2017–2018[22]

Expenditure	Lowest Income Quartile	Highest Income Quartile
Rent (including owner's equivalent rent	34.93%	27.93%
Food at home	9.44%	6.58%
Medical care	8.36%	8.09%
Household utilities	4.36%	2.73%
Motor fuels	3.46%	3.42%
Motor vehicle operation	3.44%	3.40%
Telephone service	2.32%	2.00%

While low-income households pay more of their budgeted income for this basket of essential goods, it is also important to note that the BLS researchers found that, "prices for motor fuel, medical care, fuel and utilities, and shelter rose faster than the overall average. . ." Thus, "[b]ecause the lowest income households dedicate more of their spending on

[20] BLS is the agency that calculates and reports the "rate of inflation" (i.e., the Consumer Price Index [CPI]) each month.

[21] Klick and Stockburger (December 2022). Spotlight on Statistics: Inflation Experiences for Lower and Higher Income Households, U.S. Department of Labor, Bureau of Labor Statistics, available at https://www.bls.gov/spotlight/2022/inflation-experiences-for-lower-and-higher-income-households/home.htm

[22] Klick and Stockburger, supra.

these categories," the BLS researchers found, "their overall inflation rates grew faster than highest income households. [23]

Q. WHAT IMPACT DOES INFLATION HAVE ON HOUSEHOLDS?

A. The Federal Reserve researchers found that the "stress" being placed on households by high inflation is much greater for low-income households as low-income households have less resources and fewer options to mitigate the impact of inflation. They explained:

> Prior research suggests that inflation hits low-income households hardest for several reasons. They spend more of their income on necessities such as food, gas and rent—categories with greater-than-average inflation rates—leaving few ways to reduce spending. When prices rise, middle-income households may react by consuming cheaper goods and buying more generic brands. Low-income households do not have the same flexibility; in many cases, they are already consuming the cheapest products.
>
> Additionally, many low-income households lack the ability of higher-income households to stock up when prices are discounted, buy in bulk and save, delay purchases if there is an opportunity to save in the future or buy more cheaply online. Low-income households are also likely to have smaller cash buffers to tide them over a period of high inflation.
>
> The recent Household Pulse Survey data confirm these tendencies. Households with incomes ranging from $25,000 to $35,000 in 2021 were about 19.3 percentage points more likely to be "very stressed" by inflation than households with incomes in the $75,000 to $100,000 range.[24]

The data is clear and consistent. Lower income families expend a greater share of their income on necessities (which as a whole tend to have higher inflation rates); have smaller financial cushions to mitigate the impact of inflation; and may have less of an ability to

[23]Klick and Stockburger, supra.

[24] Jayashankar and Murphy (January 2023). High inflation disproportionately hurts low-income households, Federal Reserve Bank of Dallas, available at https://www.dallasfed.org/research/economics/2023/0110#:~:text=Low%2Dincome%20households%20most%20stressed,few%20ways%20to%20reduce%20spending%20.

switch to lower-priced alternatives. As Lael Brainard, a member of the Board of Governors of the Federal Reserve System, concluded, "All Americans are confronting higher prices, but the burden is particularly great for households with more limited resources."[25]

Q. WHAT DO YOU CONCLUDE?

A. The testimony of witness Manning presents only part of the story and focuses only on the stress which inflation has placed on utility stakeholders. Just as inflation may have placed stress on the utility, it has also placed stress on utility ratepayers. However, the inflation experienced in recent years has placed far more stress on lower income ratepayers than it has placed on others. Given that inflation is disproportionately affecting lower income households, the Commission must consider the fact that the higher ROE sought by Aqua in this proceeding will only exacerbate the problem by unnecessarily driving up rates. The PUC is obligated to balance the interests of investors and ratepayers in setting a reasonable ROE. In conducting this balance, the PUC should consider the greater adverse impacts that inflation has imposed on low-income ratepayers when setting rates.

Accordingly, I find that the recommendation of OCA witness Ralph Smith regarding the Company's proposed inflation adjustment should be adopted.

[25] Brainard (April 2022). Variations in the inflation experiences of households, available at https://www.federalreserve.gov/newsevents/speech/brainard20220405a.htm

Part 3. Improving the Aqua Customer Assistance Program (CAP).

Q. PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR TESTIMONY?

A. In this section of my testimony, I consider the basis for offering low-income assistance to Aqua's low-income customers. The policy in Pennsylvania has been long-established for the State's natural gas and electric industries. That policy should also be brought forward to Pennsylvania's water and wastewater utilities such as Aqua as well. Pennsylvania's natural gas and electric distribution utilities operate what are known as "universal service programs." The PUC's Bureau of Consumer Services (BCS) explains "universal service programs" by noting that in the Electricity Generation Customer Choice and competition Act and the Natural Gas Choice and Competition Act:

> the General Assembly wanted to ensure that electric and natural gas service remain universally available to all customers in the state. Consequently, both Acts contain provisions relating to universal electric and gas service, and require the Commission to maintain, at a minimum, the protections, policies and services that assist low-income customers with affording electric and gas service. The Acts also require the Commission to ensure that universal service and energy conservation policies are appropriately funded and available in each electric and natural gas distribution territory.[26]

BCS goes on to explain the objective of universal service programs:

> Universal Service is a collective name applied to the policies, protections and services that help low-income customers maintain electric and natural gas service and includes payment assistance programs, termination of service protections, energy reduction programs and consumer education. The Commission has made the Bureau of Consumer Services (BCS) responsible for monitoring and evaluating public utilities' universal service programs. The goal in monitoring these programs is to ensure they increase the

[26] BCS (December 2022). Universal Service Programs and Collections Performance, 2021, at 1 (internal citations omitted). Available at: https://www.puc.pa.gov/filing-resources/reports/universal-service-programs-and-collections-performance-reports/

effectiveness of EDC and NGDC collections while protecting the public's health and safety.[27]

Clearly, Aqua does not operate pursuant to the same statutory directive as the state's gas and electric distribution utilities do. However, the statutory objectives for the energy industries are equally clearly applicable to water and wastewater utilities such as Aqua. The objective is to help low-income customers maintain service. The further goal is to ensure that the low-income programs "increase the effectiveness of. . .collections while protecting the public's health and safety." In applying these goals, it is important to define a "low-income customer." The PUC defines a "low-income customer" to include any customer with an annual household income at or below 150% of the Federal Poverty Level (FPL).[28]

Q. WHAT IS THE FIRST STEP IN REVIEWING THE DESIGN AND OPERATION OF AQUA'S LOW-INCOME PROGRAMS?

A. The first step in reviewing the design and operation of Aqua's low-income programs involves assessing the extent of Aqua's low-income population and the degree to which Aqua has identified its low-income customers. Aqua estimates that it has 23,123 low-income water customers on its system, with an additional 2,180 low-income customers receiving combined water/sewer service.[29] Given that Aqua reports that it serves 383,376

[27] Id., at 2 (internal citations omitted).

[28] There are some nuances to this definition. For example, "household income" is defined consistent with Chapter 14, which excludes the income of minors in the household. "Annual" income includes either a 12-month income or an income for a shorter period of time annualized to 12-months (e.g., 90-day income annualized to 12-month income).

[29] OCA-VI-02 with attachment and OCA-VI-19 with attachment.

residential water customers, and 50,808 residential wastewater customers,[30] the Company estimates that only 6.0% of its water customers,[31] and 4.3% of its wastewater customers[32] are low-income.

These percentages appear to substantially under-estimate the number of low-income customers on the Company's system. According to the U.S. Census Bureau,[33] 14.0% of the total population living in Aqua's zip codes have income of less than 150% of Federal Poverty Level. The Census Bureau reports that 12.3% of the total population age 18 and older in Aqua's zip codes live with income below 150% of FPL.[34] I apply the percentage of persons with income below 150% FPL, and the percentage of persons age 18 and older with these incomes, to the number of Aqua customers by zip code. Using this method, I estimate that Aqua has between 43,514 and 49,044 water customers with income less than 150% of FPL, substantially more than estimated by the Company.

[30] Id.

[31] 23,123 / 383,376 = 0.060.

[32] 2,180 / 50,808 = 0.043.

[33] American Community Survey (5-year data), Table C17002.

[34] American Community Survey (5-year data), Table B17024.

Q. WHAT IS THE SECOND STEP IN REVIEWING THE DESIGN AND OPERATION OF AQUA'S BILL DISCOUNT PROGRAM?

A. The second step in my review of Aqua's Customer Assistance Program (CAP) involves an examination of the extent to which Aqua succeeds in enrolling its low-income customers in its CAP. It would be inappropriate to examine only the *total* number of low-income customers on the Aqua system. There is a considerable distribution of income-eligible (i.e., at or below 150% FPL) customer on the Aqua system. Of the 244 zip codes comprising the Aqua system:

- 23 have fewer than 5% of their customers (1,676 total) with income at or below 150% FPL;
- 98 have fewer than 10% of their customers (14,066 total) with income at or below 150% FPL;
- 34 have more than 25% of their customers (13,419 total) with income at or below 150% FPL.

Q. HOW WELL DOES AQUA ENROLL LOW-INCOME CUSTOMERS INTO ITS BILL DISCOUNT PROGRAM?

A. Even using Aqua's estimate of its number of low-income customers, the Company enrolls only a fraction of its estimated total. The Company reports that it has enrolled fewer than one-in-four of its estimated numbers of low-income water customers (5,588 of 22,990) in its CAP, and only 22% of its estimated number of low-income combination water/sewer customers (491 of 2,186). Using the more reasonable estimates of low-income customers reveals that Aqua has enrolled between 11% (5,588 of 43,514) and 13% (5,588 of 49,044) of its low-income water customers in its CAP.

Q. PLEASE EXPLAIN THE THIRD STEP OF YOUR REVIEW.

A. In the third step of my review of the Aqua CAP, I examine the impact which the proposed discounts have on the Bill-to-Income Ratio (i.e., bill burden) imposed on low-income customers both before and after applying Aqua's proposed discounts. Aqua proposes to continue the discounts which it currently offers to low-income customers. The Aqua discounts are set forth in the Table below.

Table 4. Aqua PA's Proposed Low-Income Discounts (Water and Wastewater)[35]

Water	Up to 100% FPL	100-150% FPL[36]	151 to 200% FPL
Fixed base facility customer charge	100%	100%	100%
Consumption charge (first 2,000 gallons)	100%	50%	0%
Wastewater	**Up to 100% FPL**	**100-150% FPL[37]**	**151 to 200% FPL**
Fixed base facility customer charge	75%	65%	50%
Consumption charge (first 2,000 gallons)	100%	50%	0%

The discounts proposed by Aqua are unreasonable in that they are not reasonably designed to deliver adequate assistance to customers most in need.

[35] Aqua St. 13, at 3 – 4.

[36] Aqua Statement 13 contains what is assumed to be a typographical error. It lists the second discount as applying to customers with income of 100% to 101% of FPL. It is assumed to mean that the second tier is applicable to customers with income of 100% to 150% of FPL. This is the discount reflected in the Aqua tariffs.

[37] The same assumption is made with respect to what appears to be a typographical error. It lists the second discount as applying to customers with income of 100% to 101% of FPL. It is assumed to mean that the second tier is applicable to customers with income of 100% to 150% of FPL. This is the discount reflected in the Aqua tariffs.

Q. HAVE YOU HAD THE OPPORTUNITY TO ASSESS THE IMPACT OF AQUA'S PROPOSED DISCOUNTS ON THE BILL BURDENS EXPERIENCED BY LOW-INCOME CUSTOMERS?

A. Yes. While Aqua's discounts provide close-to-adequate affordability relief for customers in the third income tier (150% - 200% of FPL), it provides severely inadequate affordability relief in the lower three income tiers. The data in the Table below shows that Aqua's proposed use of a flat discount for the lower income tiers leaves bill burdens remaining at unaffordable levels. Table 5 shows that even after receiving the Aqua discounts, customers with income less than 50% FPL have bill burdens more than 2.5 times higher than the affordable level of 2%. Customers with income between 50% and 75% of FPL have bill burdens more than 1.5 times higher than the affordable level. Customers with income between 75% and 125% of FPL have bill burdens roughly 25% higher than that which is commonly deemed affordable.

Table 5. Bill Burdens by FPL Range with and without Aqua Discounts (Proposed Rates)

Federal Poverty Level	Without Discounts	With Discounts
< 50% FPL	12.9%	5.2%
50 – 75% FPL	8.3%	3.4%
75 – 100% FPL	5.9%	2.4%
100 – 125% FPL	4.6%	2.7%
125 – 150% FPL	3.8%	2.2%
150 – 200% FPL	2.9%	2.2%

Q. WHY DO THE LOWEST INCOME CUSTOMERS CONTINUE TO HAVE UNAFFORDABLE BILL BURDENS EVEN AFTER RECEIVING THE AQUA DISCOUNT?

A. Aqua's lowest income customers continue to receive unaffordable bills because Aqua offers the same flat discount for the entire customer base with income at or below 100% of FPL. The result of this proposed discount is to leave customers with the lowest incomes receiving unaffordable bills. There are a substantial number of these customers. With 4% of all households in the Aqua service territory having income less than 50% of FPL, I estimate that Aqua has 15,347 customers with income that low. Roughly 17,500 customers are estimated to have income between 50% and 100% of FPL, with these income tiers also facing unaffordable bills even after receiving the Aqua bill discounts.

Q. WHAT DO YOU RECOMMEND?

A. I recommend three modifications to the Aqua tiered discount. First, I recommend that the first income tier (0 – 100% FPL) be subdivided into two separate tiers (0 – 50% FPL; 50 – 100% FPL). Through this modification, Aqua can offer a better targeted discount based on the particular income level. The existing tier is simply too broad to allow a single flat discount applicable to all customers in the tier to result in bills that are affordable for customers in that tier. If Aqua were to set discounts in order to make bills affordable at the lower ranges within that tier, Aqua would need to substantially over-pay customers at the upper ranges. If Aqua were to set discounts in order to make bills affordable at the upper ranges within that tier, it would need to substantially under-pay customers at the lower ranges. As it is, Aqua targets neither range very effectively.

Second, I recommend that, having modified the income ranges, the discounts within each range be modified in order to target an affordable burden for each tier. It would not be reasonable to modify the tiers, but to then leave the discounts in each tier unchanged.

Finally, to better reflect actual average consumption, I recommend expanding the usage underlying the first block of discounts from 2,000 gallons per month to 3,200 gallons per month for water service. The existing discount on the first block reaches barely 50% of the consumption charge. Increasing the first block to 3,200 moves the discount toward the principle of offering a discount on the entire bill, while still not discounting higher usage amounts. In the Table below, I show the percentage of median usage covered by: (1) a first block of 2,000 gallons, and (2) a block of 3,200 gallons.

Table 6. Proposed Discounted Blocks as Percent of Median Monthly Usage

	Median Monthly Usage (hundred gallons)	Aqua Discounted First Block Usage	Aqua Discounted Usage as Percent of Median	Modified Discounted First Block Usage	Modified Discounted Usage as Percent of Median
Jan	39.848	2,000	50%	3,200	80%
Feb	36.571	2,000	55%	3,200	88%
Mar	33.709	2,000	59%	3,200	95%
Apr	39.289	2,000	51%	3,200	81%
May	37.114	2,000	54%	3,200	86%
Jun	47.075	2,000	42%	3,200	68%
Jul	43.072	2,000	46%	3,200	74%
Aug	39.201	2,000	51%	3,200	82%
Sep	44.251	2,000	45%	3,200	72%
Oct	37.548	2,000	53%	3,200	85%
Nov	38.634	2,000	52%	3,200	83%
Dec	38.082	2,000	53%	3,200	84%

Combining those three recommendations, the discounts which I propose for water service and for wastewater service are those set forth in the Table below.

Table 7. Proposed Modifications to Aqua Tiered Discounts			
		Water	
Income Ranges	Fixed Charge	First 3,200 Gallons (0 – 100% FPL) / First 2,000 Gallons (100% FPL+)	Exceeding 3,200 Gallons (0 – 100% FPL) / Exceeding 2,000 Gallons (100% FPL+)
0-50% FPL***	100%	100%	0%
50-100% FPL***	100%	75%	0%
100-150% FPL	100%	50%	0%
151-200 % FPL	100%	25%	0%
		Wastewater	
Income Ranges	Fixed Charge	First 2,000 Gallons	Exceeding 2,000 Gallons
0-50% FPL	100%	100%	0%
50-100% FPL	100%	75%	0%
100-150% FPL	65%	50%	0%
151-200 % FPL	50%	0%	0%
***Expanding first discounted block to 3,200 gallons.			

The impact of adopting my three recommendations is to align the proposed Aqua discounts more closely with affordability objectives. The bill burdens at selected ranges of Federal Poverty Level resulting from my recommended discounts are set forth in the Table below.

Table 8. Bill Burdens at Modified Aqua Water and Wastewater Discount		
	Water Burden at Modified Discount	Wastewater Burden at Modified Discount
<50 FPL	2.0%	3.0%
50 – 75% FPL	2.5%	2.4%
75 – 100% FPL	1.8%	1.7%
100 – 125% FPL	2.7%	2.4%
125 – 150% FPL	2.2%	1.9%
150 – 200% FPL	2.0%	2.1%

Making the modifications I recommend above will generate improvements to both water and wastewater burdens. These modifications will better achieve an affordable bill-to-income ratio.

Q.- ARE YOU CONCERNED AT ALL THAT UNDER YOUR PROPOSAL, HOUSEHOLDS WITH INCOME AT OR BELOW 50% OF POVERTY WILL NOT PAY ANYTHING FOR THEIR FIRST 3,200 GALLONS OF WATER AND/OR WASTEWATER?

A. No, I am not concerned about that for several reasons. First, I would note that the same is true for Aqua's proposal for households at or below 100% of poverty for water. My recommendation merely sets a higher threshold of 3,200 gallons for households who simply do not have sufficient income to survive and experience what is known as deep poverty – those at 50% of the FPL or below. My recommendation is simply targeted to be more granular to ensure greater affordability. Second, households using more than 3,200 gallons would have to pay the full cost for every gallon above that amount. Accordingly, my design still maintains payment for usage that is above average.

Q. HAS THE ISSUE OF AQUA'S RATE DESIGN CHOICE OF THE SAME RATES FOR THE CUSTOMER POPULATION WITH INCOME BELOW 100% OF POVERTY BEEN PRESENTED TO THE COMMISSION BEFORE?

A. Yes. In its last base rate case, I also recommended that Aqua divide its bottom tier (0 – 100% of Poverty) into two separate tiers and to offer bigger discounts to the lowest income customers. At that time, the Commission did not accept the proposal. However, the *reason* used by the Commission is critical. In its Final Order in that proceeding, the Commission noted:

> Aqua further submitted that the OCA and CAUSE-PA's other suggestions regarding discount structure and adjusted income tiers, which would require programmatic changes to the existing system, were unreasonable and not feasible at this time, because Aqua will be converting its billing system to SAP in 2023 and development of the system is in the early stages.[38]
>
> The Commission said:
>
> [W]e agree with the ALJ that the structural changes the OCA and CAUSE-PA proposed to the CAP design regarding bill discount and arrearage forgiveness benefits should be more fully considered at a later time, particularly because Aqua explained that many of these recommendations cannot be efficiently implemented until the Company converts its current CIS to SAP in 2023.[39]

Contrary to the last base rate case, I am ***not*** recommending that Aqua convert its rate discount to a percentage of income at this time, although the eventual conversion of the Aqua program to a PIP is the preferable outcome.

My recommendation considers both the Company's testimony in its last rate proceeding and the resulting Commission decision. I understand the Company's prior testimony that the "adjusted income tiers" were not feasible "***because*** Aqua will be converting its billing system to SAP in 2021." (emphasis added). The Commission further found that the recommendations "cannot be efficiently implemented ***until*** the Company converts its current CIS to SAP. . ." (emphasis added). However, the Commission said that the proposed changes to Aqua's bill discount "should be more fully considered at a later time." Now is that "later time." The Company should thus be directed to make the modifications to its bill discount tiers upon the conversion of its CIS to SAP. The decision of Aqua to "pause" its conversion of its current CIS to SAP in 2023 should not

[38] Pennsylvania Public Utility Commission vs. Aqua Pennsylvania, Docket No. R-2021-3027385, Opinion and Order, at 323 (May 16, 2022).

[39] Id., at 331.

result in the Company's lowest income customers being indefinitely denied the help they need. And, more importantly, the decision of the Company to "pause" the conversion of its system should not be used as an excuse to find that the Company's current unreasonable bill discount tiers have become "reasonable" over time due to factors unrelated to the any consideration of reasonableness of the tiers.

As I discuss in detail below, in 2021, the Company committed to incorporating recommended changes to its arrearage forgiveness program upon the conversion of its CIS to SAP. That same commitment should be made in this proceeding regarding changes to the bill discount tiers.

Q. WHAT IS THE FINAL STEP IN ASSESSING THE REASONABLENESS OF AQUA'S CUSTOMER ASSISTANCE PROGRAM?

A. The final step in assessing the reasonableness of Aqua's CAP is to assess the relationship between the high bill burdens experienced by low-income customers and the payment difficulties experienced by those customers. To the extent that low-income customers have demonstrably greater payment difficulties, offering an affordable discount will not only generate benefits to the customers, but will also generate benefits to the utility and its nonparticipating ratepayers. Continuing to render unaffordable bills to low-income customers will have the impact of increasing the costs which Aqua incurs attributable to those unaffordable bills. Those increased costs, in turn, result in increased rates to nonparticipating Aqua customers.

Q. DO YOU FIND ANY RELATIONSHIP BETWEEN LOW-INCOME STATUS ON A GEOGRAPHIC BASIS AND PAYMENT DIFFICULTIES?

A. Yes. Aqua provided data on late payment charges for the zip codes which comprise its service territory. Of all zip codes with 10 or more customers, I examined data for the 25 zip codes with the highest penetration of households with income at or below 100% FPL. These zip codes had an average penetration of households with income below 100% of FPL of 19.9%, compared to the system average penetration of 8.9%. Those low-income zip codes, standing alone, had 12.8% of all Aqua customers. (49,200 of 383,376).[40] These zip codes, however, experienced a far higher rate of late payment charges imposed for past-due balances. In the 12 months ending May 2024 they represented 18.2% of the accounts having late fees imposed and 20.6% of the dollars of late fees imposed.[41] Although OCA requested data, by zip code, on other collection activities, including the numbers of disconnection notices issued and the numbers of nonpayment disconnections, Aqua either could not, or simply did not, provide such information.[42]

Q. DID AQUA PROVIDE DATA THAT ALLOWS INSIGHTS INTO THE PAYMENT DIFFICULTIES OF LOW-INCOME (NON-BILL DISCOUNT PROGRAM) CUSTOMERS RELATIVE TO RESIDENTIAL CUSTOMERS AS A WHOLE?

A. Yes. Data provided by Aqua shows that the Company's low-income customers have substantially greater payment difficulties than do its residential customers in general.[43]

[40] OCA-VI-02 with attachment and OCA-VI-19 with attachment.

[41] OCA-VI-08.

[42] OCA-VI-08(a) and OCA-VI-08(b).

[43] OCA-VI-05.

The Aqua data show, for example, that, for the 41 months ending May 2024 (January 2021 – May 2024), the residential payment-to-bill ratio was 0.90, compared to the low-income payment-to-bill ratio was only 0.65. This means that for each 100 bills which the Company issued to residential customers, it received 90 payments, but for each 100 bills it issued to low-income customers, it only received 65 payments. Moreover, the Aqua data shows that the residential Payment Coverage Ratio (payments, in dollars, as a percentage of bills in dollars) for residential customers was noticeably higher. While the residential Payment Coverage Ratio for the same 4 months was 0.99 (i.e., payments represented 99% of the bills issued), the low-income Payment Coverage Ratio was only 0.93 (93%). It should be remembered, too, that this high Payment Coverage Ratio for low-income customers occurred during a time when the federal government devoted substantial funding to helping low-income customers retire their arrears.

Aside from the outcomes I identify above, the Company performs nonpayment disconnections for low-income accounts at a rate far greater than the rate of nonpayment disconnections for residential customers generally. I compare the sum of nonpayment disconnections for the most recent twelve-month period[44] to the number of current residential and low-income residential customers identified by Aqua. I find that while Aqua has a residential disconnection rate of 2.33 disconnections for each 100 residential customers, it has a low-income disconnection rate of 16.01 for low-income customers. Finally, Aqua is much more likely to terminate service to a low-income customer account after issuing a notice of nonpayment disconnection. While for each 100 disconnection

[44] OCA-VI-05.

notices Aqua issues to residential customers, it actually disconnects service to 5.4 accounts, for each 100 disconnection notices Aqua issues to its low-income customers, it disconnects service to 7.5 low-income accounts.

Q. DID YOU EXAMINE ANY FINAL RELATIONSHIP BETWEEN LOW-INCOME UNAFFORDABILITY AND GREATER PAYMENT DIFFICULTIES FOR THESE LOW-INCOME CUSTOMERS?

A. Yes. I have compared the existence and age of arrears for low-income customers to the existence and age of arrears for residential customers as a whole. My examination is based on data provided by Aqua.[45] I find not only that low-income customers are more deeply in arrears, but that they also have older arrears. Here is a summary:

- According to the Company's data for the 41 months ending May 2024, residential customers have had an average arrears of $281.[46]
- In the most recent twelve months (June 2023- May 2024), the average residential arrears was $273.[47]
- In contrast, the average low-income arrearages during the 41 months ending May 2024 were $707 which is nearly 250% higher than residential arrears overall.[48]
- In the last twelve months (June 2023 – May 2024), the average low-income arrearage was $635.[49]

[45] OCA-VI-11, OCA-VI-12, OCA-VI-13, OCA-VI-14..

[46] OCA-VI-21.

[47] Id.

[48] OCA-VI-22.

[49] Id.

The arrears of low-income customers are not only higher than residential arrears generally, they are also much older. While 10.3% of residential accounts are 180 days or more old, 13.1% of low-income accounts have arrears that old.[50] The difference in the age of arrears, by *dollars* rather than numbers of accounts, is even more pronounced. While 47.0% of residential arrears are 180 days old (or older), 55.4% of low-income arrears are that old.[51]

Q. WHAT DO YOU CONCLUDE?

A. I conclude that the low-income status of Aqua residential customers, and payment difficulties experienced by low-income customers, are frequently closely related in the Aqua service territory. For purposes of my discussion below, the significance of this conclusion is that developing an appropriately designed, targeted, and funded low-income assistance program (including both bill discounts and arrearage forgiveness) (collectively referred to as CAP herein) not only addresses the social problems faced by Aqua's low-income customers, but also addresses the business problems faced by Aqua when it finds that it cannot collect in a complete, regular, and timely fashion the bills which it renders to customers who cannot afford to pay them.

[51] OCA-VI-12, OCA-VI-14.

Part 4. Promoting CAP and Arrearage Forgiveness Enrollment at the Time of Collection Activities.

Q. PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR TESTIMONY.

A. In this section of my testimony, I recommend modifications to Aqua's credit and collection practices to ensure that the Company is offering access to its CAP (including both the bill discount and the arrearage forgiveness) as an alternative to the disconnection of service for nonpayment as well as an alternative to entering into a low-income payment arrangement. Making personal contact to explain the CAP (including both the bill discount and arrearage forgiveness) is not only sound business policy, it would appear to be a practice that is needed to be in compliance with state statute.

Q. WHAT IS THE STATUTORY BASIS FOR YOUR RECOMMENDATION?

A. Pennsylvania statutes provide that:

> No public utility shall, directly or indirectly, by any device whatsoever, or in anywise, demand or receive from any person, corporation, or municipal corporation a greater or less rate for any service rendered or to be rendered by such public utility than that specified in the tariffs of such public utility applicable thereto. The rates specified in such tariffs shall be the lawful rates of such public utility until changed, as provided in this part. *Any public utility, having more than one rate applicable to service rendered to a patron, shall, after notice of service conditions, compute bills under the rate most advantageous to the patron*.[52]

(emphasis added). Aqua should not, in other words, require a customer, known to be a known low-income customer, to pay off arrears through a payment arrangement which arrears would be subject to forgiveness under the Company's CAP. Nor should Aqua disconnect service for nonpayment to a known low-income customer without first offering

[52] 66 Pa. Stat. and Cons. Stat. Ann. § 1303 (West).

enrollment in CAP through which the customer may earn forgiveness of their arrearage balance over time.

Q. WHAT GIVES RISE FOR YOUR CONCERN?

A. Despite the existence of its CAP, Aqua continues to disconnect service for nonpayment to a substantial number of known low-income customers, or those customers from whom Aqua had previously received sufficient information to reasonably establish their low-income status. Moreover, it continues to enter into payment arrangements with known low-income customers even though those payment arrangements are shown to default at a high rate. From January 2021 through May 2024, Aqua disconnected service to 11,097 known low-income customers that were not participating in its CAP.[53] During that same time period, it issued 172,156 shutoff notices to known low-income customers not participating in the CAP.[54] It had a Nonpayment Disconnection Rate of nearly 16.8 nonpayment disconnections for each 100 known low-income customers not participating in the CAP in the most recent twelve month period.

Aqua's use of payment arrangements does not substantively assist low-income customers retire their arrears. According to the Company's data,[55] from January 2021 through May 2024, Aqua entered into 82,728 payment arrangements with known low-income customers not participating in the CAP. During that same time period, 72,593 of those payment arrangements (88.2%) defaulted.[56]

[53] OCA-VI-05.

[54] Id.

[55] OCA-VI-05.

[56] Id.

Q. WHAT DO YOU RECOMMEND?

A. I recommend first that known low-income customers who are negotiating a deferred payment agreement (DPA) with the Company, as well as customers from whom the Company receives information placing them in an income tier of 0% to 150% FPL, should be provided a stand-alone written Plain Language notice informing those customers of their right, in the alternative, to enroll in the Company's CAP (along with an explanation of the advantages of CAP's arrearage forgiveness provisions). Through that opportunity, rather than needing to agree to retire their arrears over an extended period of time, the Confirmed Low-Income customer would be allowed to enroll in CAP and, upon making appropriate payments, receive a forgiveness of their underlying arrearages. This written communication would be provided to known low-income customers. Any agreement to a payment arrangement by a known low-income customer should be accompanied by a written acknowledgement by that customer that the payment arrangement being offered is in lieu of arrearage forgiveness.

In addition, I further recommend that Aqua adopt a procedure under which, prior to the disconnection of a known low-income customer, it will make personal contact with the customer subject to disconnection. In that personal contact, the Company shall offer the known low-income customer the opportunity to apply for the Company's CAP and arrearage forgiveness program. If the customer expresses a desire to make an application for the CAP, Aqua will postpone the disconnection for 30 days to allow the application process to be completed.

Part 5. Modifications to the Aqua Arrearage Forgiveness Program.

Q. PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR TESTIMONY.

A. In this section of my testimony, I explain why Aqua should adopt certain modifications to its arrearage forgiveness program. As with the structuring the rate discount tiers, it is now appropriate to consider the reasonableness of modifications to the Aqua arrearage forgiveness program. In its decision regarding the 2021 rate proceeding, the Commission declined to consider recommended modifications to arrearage forgiveness. However, the reason why the Commission declined to consider such changes is important to remember. In its final rate order, the Commission said: "we agree with the ALJ that the structural changes the OCA and CAUSE-PA proposed to the CAP design regarding. . .*arrearage forgiveness benefits should be more fully considered at a later time*, particularly *because* Aqua explained that many of these recommendations cannot be efficiently implemented *until the Company converts its current CIS to SAP in 2023*."[57] This proceeding is now that "later time." While the Company's conversion of its CIS to SAP was to occur last year, the Company now states that "In early 2023, Aqua made the decision to pause on the CIS platform change; this project remains on hold *for the time being*." (emphasis added)[58]

In its 2021 rate proceeding, Aqua agreed that it would make changes to its arrearage forgiveness program upon the conversion of its CIS to SAP. The Company stated in 2021 that "*Upon conversion to SAP, Aqua PA's program will provide arrearage forgiveness*

[57] 2021 Final Order, at 331.

[58] OCA-VII-044.

benefits for each full CAP payment made, regardless of timeliness."[59] That commitment should be extended to this proceeding as well.

Q. PLEASE DESCRIBE AQUA'S CURRENT ARREARAGE FORGIVENESS PROGRAM.

A. Aqua PA currently grants participants in its CAP program monthly bill credits of $25 toward pre-existing arrears for each timely payment made by a program participant.[60] Arrearage forgiveness credits are the same irrespective of which bill discount tier a customer falls into.

Q. WHAT MODIFICATIONS DO YOU PROPOSE TO THE AQUA ARREARAGE FORGIVENESS PROGRAM?

A. I recommend the following modifications to the Aqua PA arrearage forgiveness program.

- First, the current level of bill credits results in an unreasonably long period over which low-income customers would earn sufficient credits to reduce their pre-existing credits to $0. Aqua PA should increase its arrearage forgiveness credits so that program participants will reduce their pre-existing arrears to $0 over a three-year period. The level of arrearage forgiveness credits should be tiered based on the bill discount tier into which the customer falls. I recommend a tiered arrearage forgiveness credit of: (1) Tier 1 (0 – 50% FPL): $50/month; (2) Tier 2 (50 – 100% FPL): $45/month; (3) Tier 3 (100 – 150% FPL): $40/month; and (4) Tier 4 (150 – 200% FPL): $35/month.

[59] Rebuttal Testimony of Rita F. Black, Aqua Statement 10-R, Docket Nos.. R-2021-3027385, R-2021-3027386, at 9 – 10.

[60] Aqua St. 13 at 6.

- Second, Aqua PA proposes to grant arrearage forgiveness credits only to the extent that program participants make "timely" payments on their bills for current service. The Aqua PA arrearage forgiveness program should be modified such that arrearage forgiveness credits will be granted for full payments as those payments are made, even if those payments have not been paid in a timely fashion.

I will explain below why the need for these modifications is even more pressing now that Aqua has had two years of experience with how its program is not working as intended.

Q. PLEASE EXPLAIN YOUR CONCERN ABOUT WHETHER AQUA IS GRANTING ARREARAGE FORGIVENESS FOR FULL PAYMENTS, INCLUDING RETROACTIVE FORGIVENESS FOR PAYMENTS THAT ARE COMPLETED EVEN IF LATE.

A. In Aqua's last base rate case, the recommendation to have Aqua provide arrearage forgiveness at the completion of a full payment, even if that payment was not "timely," was made by both me and CAUSE-PA witness Harry Geller. In her rebuttal testimony, Aqua Witness Black responded by stating:

> CAUSE-PA witness Geller and OCA witness Colton recommend that arrearage forgiveness benefits should be granted when a full CAP payment is made, regardless of timeliness. *I agree that providing this benefit when a full payment is made is more beneficial to the customer, particularly in the cases of customers that may miss their due date on a regular basis due to the timing of their income or irregular income.* The difficulty Aqua PA currently faces is related to its current customer information system. The current system is programmed to provide the $25 benefit when a timely payment is made. Aqua PA will convert to the Peoples Companies' SAP system in the near future. At that time, Aqua PA will benefit from the programming developed to support the Peoples Companies' CAP which provides an arrearage forgiveness benefit for each full CAP payment made. *Upon conversion to*

SAP, Aqua PA's program will provide arrearage forgiveness benefits for each full CAP payment made, regardless of timeliness.[61]

Q. GIVEN THAT COMMITMENT, WHY DO YOU AGAIN RAISE THE ISSUE OF ARREARAGE FORGIVENESS BEING GRANTED UPON RECEIPT OF A FULL PAYMENT, "REGARDLESS OF TIMELINESS"?

A. The commitment that was made in Ms. Black's rebuttal testimony in the 2021 rate proceeding does not appear to have been fulfilled yet. In her explanation of Aqua's arrearage forgiveness program in *this* proceeding, Ms. Black explained the arrearage forgiveness program as follows: "At the time of enrollment, any balance owed to Aqua PA is frozen as a pre-CAP balance, eligible for Arrearage Forgiveness. Each month, when the CAP participants pay their discounted monthly bill *on time*, a $25 Arrearage Forgiveness credit towards the pre-CAP balance is applied to the account, until the pre-CAP balance has been fully exhausted."[62] The reason for this failure appears to be that the conversion of the Aqua CIS system to SAP has been put "on hold." The Company states that "In early 2023, Aqua made the decision to pause on the CIS platform change; this project remains on hold *for the time being*." (emphasis added)[63]

Consistent with her prior commitment to the Commission (and to parties proposing a change to arrearage forgiveness), Aqua should reaffirm its commitment in this proceeding to fulfill its intention, previously expressed, with respect to the design and operation of its arrearage forgiveness program. As soon as its information system is updated from its

[61] Rebuttal Testimony of Rita F. Black, Aqua Statement 10-R, Docket Nos.. R-2021-3027385, R-2021-3027386, at 9 – 10.

[62] Aqua St. 13, at 4.

[63] OCA-VII-044.

CIS, arrearage forgiveness should be granted based on full payments irrespective of whether "regardless of timeliness."

Q. PLEASE EXPLAIN THE BASIS FOR RECOMMENDING AN INCREASE IN THE MONTHLY CREDIT PROVIDED AS PART OF THE AQUA ARREARAGE FORGIVENESS PROGRAM.

A. Aqua PA's arrearage forgiveness program, to which the Company proposes no changes, provides for a bill credit toward pre-existing arrears (i.e., arrears at the time of program enrollment) of $25 per month for each timely payment made by a program participant.[64] This level of bill credit results in an unreasonably long period over which a low-income customer would reduce their level of pre-existing arrears to a $0 balance.

Q. PLEASE EXPLAIN THE BASIS FOR YOUR RECOMMENDATION.

A. Since July 2023, Aqua has enrolled 5,708 new participants in its CAP.[65] Of those, 5,340 (93.6%) have entered the CAP with a pre-program arrearage balance. As Table 9 shows, the average pre-program arrearage over all three CAP tiers was $680. As the Table further documents, however, the average pre-program arrearage balance differs by income tier. The average for Tier 1 (0 – 100% FPL) for the 12-month period (July 2023 – June 2024) was $728.48, while the average for Tier 2 (100 – 150% FPL) was $601.80. Tier 3 had an even smaller arrearage balance (although still substantial) of $557.34. The percentage of new CAP enrollees with a pre-program arrearage balance declined as incomes increased, although for all three tiers, the proportion of new enrollees with balances exceeded 90%.

[64] Aqua St. No. 13 at 4.

[65] OCA-VII-10(a).

The data shows that it generally takes an unreasonable period of time for CAP enrollees to be able to retire their pre-program arrears given a $25 monthly bill credit. While, *on average*, a $25 bill credit allows CAP participants to retire their pre-program arrearages in 27 months, that "average" is misleading. It would not be appropriate to use an average in the first place. If Customer A requires 20 months to retire their pre-program arrearage, and Customer B requires 46 months, the lower number of months for Customer A does not translate over to reducing the time required by Customer B. In this instance, the "average" of 33 months is representative of no-one.

Table 9. CAP Enrollment, Pre-Program Arrearages (sum, average)

2024_05	21	$20,676.03	$984.57	3	24	
2024_06	17	$20,751.12	$1,220.65	3	20	
Sub-total	592	$329,947.77	$557.34	63	655	90.4%
Total	5340	$3,629,286.13	$679.64	368	5708	93.6%

Moreover, as Table 10 demonstrates, in most months of enrollment, the pre-program arrearage balance for new enrollees in that month requires more than the "average." For both Tier 1 and tier 2 customers, the months required to retire their pre-program balances given a $25 monthly credit is greater than the average in eight of the 12 months examined. For Tier 3 customers, the months required to retire their pre-program balances given a $25 monthly credit is greater than the average in 10 of the 12 months examined.

Table 10. Number of Months to Retire Pre-Program Arrears by Income Tier and Month of Enrollment

Month of Enrollment	Tier 1	Tier 2	Tier 3
2023_07	44	56	43
2023_08	34	52	43
2023_09	33	29	35
2023_10	36	38	25
2023_11	25	16	25
2023_12	24	21	16
2024_01	22	20	18
2024_02	25	21	23
2024_03	26	18	11
2024_04	43	25	37
2024_05	46	43	39
2024_06	38	53	49
Sub-total	29	24	22

Finally, the months required to retire a pre-program balance at a $25 credit set forth in Table 10 assumes that CAP participants make their "timely" payment in *every* month. In contrast, the Table below demonstrates that simply does not occur. In the most recent 12 months for which data is available (July 2023 through June 2024), only 36.1% of CAP bills were paid on a full and timely basis. This means that the time required to earn complete arrearage forgiveness is even higher than identified above.

Table 11. CAP Bill Counts by Month Compared to Full and On-Time Payments by Month (OCA-VII-10)

Month	T1 Bill Count	T2 Bill Count	T3 Bill Count	Total Bill Count	Full & On-time Payments	Pct Full and On-Time Payments
2023_07	658	121	38	817	492	60.2%
2023_08	833	142	48	1023	378	37.0%
2023_09	1002	162	53	1217	541	44.5%
2023_10	1114	212	73	1399	529	37.8%
2023_11	1283	350	116	1749	651	37.2%
2023_12	1579	465	182	2226	854	38.4%
2024_01	2102	675	278	3055	1,199	39.2%

Sum	25,184	8,282	3,500	36,966	13,352	36.1%

High arrearages are common amongst new enrollees in the arrearage-forgiveness program. According to data provided by Aqua, since January 2023, more than 30% of new enrollees in the CAP have entered the program with pre-program arrearage balances of more than $600.

Q. WHAT DO YOU RECOMMEND?

A. The ideal solution would be for Aqua to adopt the same arrearage forgiveness provisions that its affiliated utility, Peoples Gas has adopted. Through that approach, arrears would be forgiven on a pro-rate basis for each complete payment that has been made over a 24-month period. In its 2021 rate case proceeding, however, Aqua testified that converting

its information technology program to provide for a pro rata forgiveness would not be a cost-effective action to take given the Company's plan to convert its CIS to SAP in 2023. As I noted above, however, in this proceeding, Aqua has reported that the conversion of its CIS to SAP in 2023 was postponed. Given that postponement, the solution I recommend is for Aqua to expand its monthly arrearage forgiveness credits and to convert those credits to a tiered program reflecting the four tiers in the tiered discount I recommend above. I recommend that arrears be forgiven through the following credits: (1) Tier 1 (0 – 50% FPL): $50/month; (2) Tier 2 (50 – 100% FPL): $45/month; (3) Tier 3 (100 – 150% FPL): $40/month; and (4) Tier 4 (150 – 200% FPL): $35/month. This increase in the credit will allow AFP participants to retire their arrears over a reasonable time, while still controlling costs to non-participants.

Part 6. Cost Offsets to Aqua's Bill Discounts and Arrearage Forgiveness.

Q. PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR TESTIMONY.

A. In this section of my testimony, I recommend that the Commission adopt reasonable offsets to the recovery of Aqua's costs for its bill discount credits and arrearage forgiveness credits both to reflect the cost savings generated by the programs and to ensure that the Company is not double-recovering its costs.

Q. PLEASE EXPLAIN WHY AN OFFSET FOR CAP COST RECOVERY IS APPROPRIATE AND HAS BEEN IMPLEMENTED BY OTHER UTILITIES WHICH OFFER CAP?

A. By asking for rate recovery of the credit which Aqua provides to CAP program participants through its bill discount and arrearage forgiveness CAP program

components, Aqua is treating those bill credits as if they were *new* costs. In fact, that is precisely what Aqua is doing when it Aqua includes a specific adjustment to increase its rates to reflect the bill discount credits and arrearage forgiveness credits for both water and wastewater service.[66] For example, Aqua includes its arrearage forgiveness credits as an addition to its uncollectibles. However, it does not adjust either the arrearage forgiveness credits, or the underlying uncollectibles, for the dollars that appear in *both* places.[67] Instead, the underlying uncollectibles are "based on three years of history."[68]

In fact, however, the bill discount and arrearage forgiveness credits are not, or at least not entirely, new costs. When Aqua provides credits for its low-income bill discounts and arrearage forgiveness, it is simply *moving* costs from its historic cost of service to a new categorization of those costs. While the categorization is new, the costs are not. Accordingly, when Aqua includes a claim for cost recover for those credits, unless the Company removes those credits from the other elements of its cost of service, it is collecting at least some of those costs twice.

Q. IS THIS A DIFFERENT QUESTION FROM WHETHER THE BAD DEBT EXPENSE DECREASES DUE TO BETTER PAYMENT PATTERNS ATTRIBUTABLE TO THE MORE AFFORDABLE LOW-INCOME RATES?

A. Yes. The question of whether there is a double recovery of costs is an entirely separate question from whether there is a cost reduction due to the more affordable bills being issued to low-income customers. The available research shows that improving the

[66] OCA-VII-20.

[67] Aqua Exh. 1-A, Schedule C-4.2; Exh. 1-C, Schedule C-4.2.

[68] Aqua Exh. 1-A, Schedule C-4.2.i; Exh. 1-C, Schedule C-4.2.i.

affordability of bills to low-income customers will improve their payment patterns. Even Company witness Black agrees this will occur.[69] While acknowledging that these cost reductions occur, Aqua did not previously attempt to quantify or dollarize them. It is that cost reduction, however, which Aqua sets forth in its response to OCA discovery.[70] OCA would have been both able and willing to explain to Aqua the difference had Aqua engaged in the consultation which the PUC had directed that it undertake (but which it did not).

A. The Backdrop of OCA's Proposed Offset for CAP Cost Recovery.

Q. CAN YOU PROVIDE SOME CONTEXT FOR THE OFFSETS WHICH YOU PROPOSE?

A. Yes. In Aqua's last rate case, I recommended that the Commission adopt an offset to prevent the double recovery of costs. The Commission disallowed that offset. However, the Commission's decision in not approving my proposed adjustment is critical to remember in this proceeding. The Commission said:

> In our opinion, the OCA's proposed 28% offset is arbitrary; and it would not be prudent to adopt it as a realistic offset to reflect actual collections savings. Nevertheless, we agree with the OCA that there is a potential that the Company's CAP may result in a double recovery of low-income rates. Inasmuch as the Company acknowledged that any offset should be based on actual collections experienced gained after the implementation of the CAP to ensure it is an accurate representation of actual collections savings, we shall deny the OCA's Exception concerning its recommended offset and, instead, direct Aqua to take the necessary actions within its Company to monitor and maintain the necessary information that could be used in its next base rate proceeding to determine whether a double-recovery is occurring, and if so, to determine an appropriate offset that should be applied to prevent any double recovery. The Company is further directed to consult with the

[69] OCA-VII-16 (attached as OCA Exh. RDC-4).

[70] OCA-XII-1.

> OCA and I&E to determine the necessary data needed to accomplish this directive.
>
> Accordingly, consistent with the discussion above, we shall reverse the ALJ's recommendation and adopt the OCA's Exception No. 16, in part, by rejecting the Company's proposed reconcilable USR and requiring that the Company continue to recover its low-income program costs through base rates. However, the OCA's Exception No. 16, with regard to its requests that the Company be directed to collect only the net costs of its low-income program in this proceeding is denied because an appropriate offset has not been determined in this proceeding and needs further review.
>
> Therefore, consistent with the above discussion, the Company is directed to begin monitoring and reviewing the appropriate billing data for purposes of determining, in its next base rate proceeding, if, and to what extent, any offset to its low-income program cost recovery is necessary to avoid any double recovery the Company may receive through actual collections after the implementation of its CAP. The Company is further directed to consult with the OCA and I&E to determine the necessary data needed to accomplish this directive.[71]

Q. AFTER BEING "DIRECTED" TO DO SO, DID AQUA BEGIN "MONITORING AND REVIEWING THE APPROPRIATE BILLING DATA FOR PURPOSES OF DETERMINING, IN ITS NEXT BASE RATE PROCEEDING, IF, AND TO WHAT EXTENT, ANY OFFSET TO ITS LOW-INCOME PROGRAM COST RECOVERY IS NECESSARY TO AVOID ANY DOUBLE RECOVERY"?

A. No, and neither was an offset recommended when Aqua filed its rate request.[72]

[71] Pennsylvania PUC v. Aqua Pennsylvania, Opinion and Order, Docket R-2021-3027385, Opinion and Order, at 319 – 320 (May 12, 2022).

[72] OCA-XII-1.

Q. AFTER BEING DIRECTED TO DO SO, DID AQUA IDENTIFY THE "NECESSARY ACTIONS" IT NEEDED TO TAKE TO BEGIN MONITORING AND REVIEWING THE APPROPRIATE BILLING DATA"?

A. No.[73]

Q. AFTER BEING DIRECTED TO DO SO, DID AQUA CONSULT WITH THE OCA TO "DETERMINE THE NECESSARY DATA NEED TO ACCOMPLISH [THE COMMISSION'S] DIRECTIVE?

A. No.[74]

Q. AFTER BEING DIRECTED TO DO SO, DID AQUA SHARE ANY DATA THAT IT PROPOSED TO "MONITOR AND COLLECT" IN COMPLIANCE WITH THE PUC DIRECTIVE TO "CONSULT WITH THE OCA. . .TO DETERMINE THE NECESSARY DATA NEEDED TO ACCOMPLISH THIS DIRECTIVE"?

A. No. [75]

Q. AFTER BEING DIRECTED TO DO SO, DID AQUA "MONITOR AND MAINTAIN THE NECESSARY INFORMATION THAT COULD BE USED TO DETERMINE WHETHER A DOUBLE-RECOVERY IS OCCURRING"?

A. No.[76]

[73] OCA-XII-1

[74] OCA-XII-2

[75] OCA-XII-2.

[76] OCA-XII-3.

Q. AFTER BEING DIRECTED TO DO SO, DID AQUA IDENTIFY TO OCA ANY OF THE "APPROPRIATE BILLING DATA" THAT IT DEEMED TO BE THE "NECESSARY DATA" TO ACCOMPLISH THE PUC DIRECTIVES?

A. No.[77]

Q. BEFORE FILING THE PRESENT RATE CASE, DID AQUA DEVELOP ANY ANALYSIS OF "AN APPROPRIATE OFFSET THAT SHOULD BE APPLIED TO PREVENT ANY DOUBLE RECOVERY"?

A. No. [78]

Q. SINCE THE TIME THE COMMISSION "DIRECTED" AQUA TO "BEGIN MONITORING AND REVIEWING THE APPROPRIATE BILLING DATA FOR PURPOSES OF DETERMINING. . .IF, AND TO WHAT EXTENT, ANY OFFSET TO ITS LOW-INCOME PROGRAM IS NECESSARY TO AVOID ANY DOUBLE RECOVERY," HAS AQUA ENGAGED IN SUCH MONITORING AND REVIEW OF ITS BILL DISCOUNT AND/OR ARREARAGE FORGIVENESS PARTICIPANTS?

A. No. When asked for "copies of all internal data reports routinely periodically (e.g., weekly, monthly, bi-monthly) generated regarding the operation of the Bill Discount Program since its inception," the Company could provide no reports that involved "monitoring and reviewing the appropriate billing data. . ."[79] Indeed, it provided no reports that monitored *any* billing data, deemed appropriate or not, that were generated

[77] OCA-XII-5.

[78] OCA-XII-6, OCA-XII-7.

[79] OCA-VII-9.

"for purposes of determining if, and to what extent, any offset to its low-income program is necessary to avoid any double recovery."

Q. SINCE THE TIME THE COMMISSION "DIRECTED" AQUA TO "BEGIN MONITORING AND REVIEWING THE APPROPRIATE BILLING DATA FOR PURPOSES OF DETERMINING. . .IF, AND TO WHAT EXTENT, ANY OFFSET TO ITS LOW-INCOME PROGRAM IS NECESSARY TO AVOID ANY DOUBLE RECOVERY," HAS AQUA ENGAGED IN SUCH MONITORING AND REVIEW OF ITS ARREARAGE FORGIVENESS PROGRAM PARTICIPANTS?

A. No. When asked for all monthly tracking reports (or tracking reports for other periods if a period other than a month is used), since January 2021, whether or not filed with the Commission, which track: (a) Payments by participants enrolled in the arrearage forgiveness program; and (b) Arrears incurred by participants in the arrearage forgiveness program subsequent to enrollment in the program, the Company could provide no such reports for arrearage forgiveness participants.[80]

Q. DID AQUA ENGAGE IN ANY MONITORING AND REVIEW OF THE SOURCE OF ITS UNCOLLECTIBLES?

A. No. OCA specifically asked Aqua for any "studies, analyses, memos, workpapers, or written documents of any nature" that "disaggregate the source of *bad debt* to the Company by. . .socio-economic status of the customer (for residential bad debt)," the Company said it had no such documents.[81]

[80] OCA-VII-12.

[81] OCA-VII-6.

Q. DID AQUA ENGAGE IN ANY MONITORING AND REVIEW OF THE SOURCE OF ITS ARREARS?

A. No. OCA specifically asked Aqua for any "studies, analyses, memos, workpapers, or written documents of any nature" that "disaggregate the source of *arrears* to the Company by socio-economic status of the customer (for residential arrears)." The Company said it had no such documents.[82]

Q. DID AQUA ENGAGE IN ANY MONITORING AND REVIEW OF THE RELATIONSHIP BETWEEN PAYMENT TROUBLED AND LOW-INCOME STATUS?

A. No. OCA specifically asked Aqua for any "studies, analyses, memos, workpapers, or written documents of any nature" that "considers, evaluates or discusses the relationship between residential payment-troubles and low-income status." The Company said it had no such documents.[83]

Q. WHAT DO YOU CONCLUDE?

A. Based on its lack of information, I conclude that the Company simply failed to comply with the Commission directive as it failed to produce *any* tracking reports, despite the Commission's directive to begin "monitoring and reviewing" such data.

[82] OCA-VII-7.

[83] OCA-VII-8.

Q. DOES AQUA CLAIM THAT IT HAS COMPLIED WITH THE COMMISSION DIRECTIVE TO "CONSULT WITH THE OCA AND I&E TO DETERMINE THE NECESSARY DATA NEEDED TO ACCOMPLISH THIS DIRECTIVE?

A. It is not clear whether Aqua is really claiming that its actions were intended to comply with the Commission directive to "consult with OCA[84]. . .to determine the necessary data needed to accomplish this directive."[85] Nonetheless, in response to questions about the dates and nature of any consultation with OCA "to determine the necessary data needed to accomplish this directive," Aqua states that it "has taken the necessary steps to implement the program and enroll participants." The Company continues to state that it "has met with the various stakeholders to review and update participants on its progress in implementing its Universal Service Programs through its Aqua Assistance Collaborative." It lists six dates on which the Collaborative met between September 12, 2022 and May 15, 2024.[86] Aqua does not even attempt to explain what relevance that has to whether Aqua complied with the clear and unambiguous "directive" that Aqua was "to consult with the OCA and I&E to determine the necessary data needed to accomplish this directive."

The meetings cited by Aqua in its discussion of the Aqua Assistance Collaborative had nothing to do with consulting with the OCA (or anyone else) about the "necessary data needed to accomplish" the Commission's directive. Attached as Exhibit RDC-2 is the

[84] Exclusion of I&E from my observation should not be construed as a concession that Aqua consulted with I&E as directed by the PUC. My scope of testimony is simply limited to the interactions, or lack of interactions, with OCA.

[85] OCA-XII-2. It could be that Aqua simply seeks to make these statements in mitigation of it failure to comply with the unambiguous PUC "directive" in Aqua's last rate case.

[86] OCA-XII-2.

documentary history of the Aqua Assistance Collaborative meetings cited by the Company.[87] In addition to the discovery response citing these Aqua Assistance Collaborative meetings as the consultation which the Commission directed Aqua to undertake, Exhibit RDC-2 includes Aqua's responses to OCA-XXI-1[88] through OCA-XXI-5. OCA-XXI-1 demonstrates that no minutes were maintained of the meetings cited by the Company. This response does, however, when asked for any "written document provided by any Collaborative member in response to a discussion of the data that needed to be tracked in order to calculate a CAP offset in Aqua's next base rate case," state that "*this topic was not specifically discussed during the AAC meetings*."[89] The Company further concedes that "the corresponding data and spreadsheet referenced in OCA-XII-1 was not presented during the AAC or prior to the end of the HTY."[90] Indeed, rather than being the result of any consultation with OCA (or I&E), the Company admits that "the material was first presented on June 26, 2024 in response to OCA-XII-1."[91]

[87] Exhibit RDC-2 includes the following documents: (1) Aqua response to OCA-XXI-2; (2) Aqua response to OCA-XXI-1 (without attachments); (3) Aqua response to OCA-XXI-2; (4) Aqua response to OCA-XII-3; (5) Aqua response to OCA-XXI-4; and (6) Aqua response to OCA-XII-5.

[88] I do not include the Attachments to OCA-XXI-1 with this Exhibit.

[89] OCA-XXI-1(g) (emphasis added), attached as part of Exhibit RDC-2.

[90] OCA-XXI-3 (attached as part of Exhibit RDC-2). Evidence of the fact that neither the data nor the calculations were presented to the Collaborative is the fact that when Aqua submitted its data in this rate case, it did so only with the data being identified as "confidential." (OCA-XII-1). However, no member of the Collaborative was asked to sign a confidentiality agreement for materials presented at any of the Collaborative meetings cited by the Company. (OCA-XXI-2) (attached as part of Exhibit RDC-2).

[91] OCA-XXI-4 (attached as part of Exhibit RDC-2). Even this data request response is untrue. While this response asserts that the Company presented the information to OCA-XII-1 on "June 26, 2024," in fact, the Company did not provide its narrative response to OCA-XII-1 until *July* 26, 2024, and did not provide the accompanying worksheet until August 1, 2024.

Q. IS THERE ANY OTHER REASON TO BELIEVE THAT THESE AQUA ASSISTANCE COLLABORATIVE MEETINGS WERE NEVER INTENDED TO BE, AND COULD NOT HAVE BEEN, THE CONSULTATION WITH THE OCA THAT THE COMMISSION DIRECTED TO OCCUR?

A. Yes. The meetings of the Collaborative referenced above were under the direction of Company witness Black.[92] However, Ms. Black explicitly disclaims any knowledge of: (1) "working capital and other financial topic" associated with the bill discount or arrearage forgiveness programs; and (2) "collection topics" associated with the low-income programs.[93] Moreover, Ms. Black disclaims the ability to comment on the working capital implications of the low-income program; the impact of the programs on uncollectibles the impact of the programs on Company sales and revenues; and the impact of the program on collection costs.[94]

Q. IS THERE AN ISSUE PRESENTED BY THE COMPANY'S FAILURE TO COMPLY WITH THE COMMISSION DIRECTIVE THAT IS IN ADDITION TO THE OFFSET THAT SHOULD BE APPLIED TO AQUA'S BILL DISCOUNT AND ARREARAGE FORGIVENESS CREDITS?

A. Yes. The Commission and other parties to a rate case have an interest in protecting the Commission's authority. It issued a clear and unambiguous, in mandatory language ("direct Aqua to take", "direct Aqua to take the necessary actions," "the Company is further directed to consult with the OCA"). A utility should not be allowed to act in

[92] See, OCA Exh. RDC-2.

[93] OCA-VII-13 (attached as OCA Exh. RDC-5).

[94] OCA-VII-18 (attached as OCA Exh. RDC-6).

defiance of those orders simply because they may disagree with them. Second, the Commission and all parties have an interest in enforcing the conditions which the Commission places on the approval of increased rates. In its last rate case, the Commission clearly approved Aqua's recovery of universal service costs given certain preconditions. After all, the Commission explicitly stated that "*we agree with the OCA* that there is a potential that the Company's CAP may result in a double recovery of low-income rates." The Commission finally made clear that its failure to order an offset was based on compliance with its directive. The Commission said: "we shall deny the OCA's Exception concerning its recommended offset and, *instead*, direct Aqua to take the necessary actions. . ." (emphasis added).

B. Calculating an Appropriate Offset to Aqua's CAP Cost Recovery Claim.

Q. HAVE YOU CALCULATED A BAD DEBT OFFSET FOR AQUA?

A. Yes. Aqua reports that it calculates its reserves for write-offs based on the age of the unpaid balance. According to Aqua, its reserve is calculated as follows: (1) 0% for current accounts receivable; (2) 3% for unpaid balances 31 – 60 days past due; (3) 8% for unpaid balances 61 – 90 days past due; (4) 15% for unpaid balances 91 – 120 days past due; (5) 40% for accounts 121 – 180 days past due; and (6) 100% for accounts greater than 180 days past due.[95] Since there is no reserve for uncollectibles for "current accounts receivable," I do not further consider dollars in that aging bucket. Aqua then provided an aging report for both known low-income accounts and for participants in the Company's CAP program.[96] For each of these customer populations, I determined the percentage of

[95] OCA-VII-31 (attached as Exh. RDC-7).

[96] OCA-VI-11.

(and thus the sum of) average monthly dollars in arrears in each aging bucket. As is shown in the Table below, the arrears for customers before they enter CAP are much older than they are after entering the program.

Table 12. Percentage of Arrears by Age of Arrears
(Confirmed Low-Income [CLI] vs. CAP) (June 2023 – May 2024) (OCA-VI-11)

	31 – 60 days	61 – 90 days	91 – 120 days	120 – 180 days	180+ days	Total
Pct of CAP total by age	31.8%	21.3%	15.5%	18.1%	13.4%	100.0%
Pct of CLI total by age	13.6%	10.8%	9.1%	13.8%	52.7%	100.0%

After applying the percentage which Aqua, itself, identified as using to determine its reserve for uncollectibles, I determined the amount which would be reserved for uncollectibles at the aging of Confirmed Low-Income arrears and the amount reserved at the aging of CAP arrears. Aqua claims $9,451,309.90 in bill discount credits for water and $1,357,034 in bill discount credits for wastewater.[97] I recommend a reduction in the bill discount cost recovery of $2,455,931.82 for water. The appropriate offset is $352,626.60 for wastewater bill discount credits.

Q. HAVE YOU CALCULATED AN OFFSET FOR THE ARREARAGE FORGIVENESS CREDITS AS WELL?

A. Yes. Aqua claims an arrearage forgiveness adjustment of $2,063,988 for the year ending December 31, 2025 for water.[98] It claims an arrearage forgiveness adjustment of $228,018 for wastewater.[99]As is evident from the Company schedules, it adds the arrearage forgiveness credits to its uncollectibles while making no adjustment to subtract

[97] OCA-VII-20.

[98] Aqua Exhibit 1-A, Schedule C-4.2.

[99] Aqua Exhibit 1-C, Schedule C-4.2.

those uncollectibles that would already be included in rates in its total uncollectibles. For both water and wastewater, Aqua applies its three-year average uncollectibles factor to "sales to general customers excluding forfeited discounts and miscellaneous revenue." Those sales do not exclude sales to Confirmed Low-Income customers or to CAP participants. Using the same aging of arrears I used for the bill discount credits, I find that the appropriate offset for the Company's water arrearage forgiveness credits is $812,620. The appropriate offset for the Company's wastewater arrearage forgiveness credits is $89,774.

Q. HAVE YOU INCLUDED AN INCREASED COST, ALONG WITH THE ACCOMPANYING OFFSET, TO BE INCLUDED IN RATES TO REFLECT THE CHANGES YOU RECOMMEND FOR THE TIERED DISCOUNTS?

A. No. It is important to remember that I have not recommended an *immediate* change in the tiered bill discount for Aqua. I acknowledge in my testimony above that the Company has previously testified, and the Commission has agreed, that the feasibility of moving to divide the bottom tier into two separate tiers is dependent upon the timing of the Company's conversion of its CIS to SAP. Had that conversion occurred in 2023, as Aqua had said it would in the Company's last base rate case, my recommendation in this case would have been to make the change immediately. However, Aqua has said that its conversion has been placed "on hold" for the time-being. My recommendation, therefore, is that Aqua should be directed to make the change in its bill discount tiers at the time of that conversion. This is no different from Aqua's commitment in its 2021 rate case, as I discuss elsewhere, to make changes to its arrearage forgiveness program, which changes depend on the conversion, at the time of the conversion. When the conversion

occurs, it will be time to determine the rate impact of the move to add an additional tier to the bill discount.

Q. HAVE YOU INCLUDED AN INCREMENTAL COST TO THE ARREARAGE FORGIVENESS PROGRAM FOR YOUR RECOMMENDATION TO INCREASE THE MONTHLY ARREARAGE FORGIVENESS CREDITS?

A. No. My reason for not including an additional cost here, however, is a different reason than my reason for not including an additional cost of adding an additional bill discount tier. My recommended modification to the level of arrearage forgiveness credits should not increase the total cost of the arrearage forgiveness program. The total cost of the arrearage forgiveness program is not driven by the rate at which pre-program arrears are forgiven on a monthly basis. The total cost of the arrearage forgiveness program is instead driven by the amount of arrears that program participants bring into the program with which to begin.

As I discuss above, and demonstrate in Table 9, the average pre-program arrears brought into the arrearage forgiveness program is $680. Expanding the monthly discount for the lowest income tier does not increase that $680 to $900 (or to any other dollar figure). Expanding the discount for the lowest tier would simply accelerate the rate at which the pre-program arrears is forgiven. Given Aqua's current credit of $25 per month, a program participant would retire their arrears in 27.2 months ($680 pre-program arrears / $25 credit per month = 27.2 months). Expanding the credit to $50/month would mean the pre-program arrears would instead be retired in 13.6 months. If Aqua were allowed to increase its cost recovery to reflect an expansion of the forgiveness credit to $50/month rather than $25/month, it would over-recover total costs. Increasing the costs to reflect

the months of the expanded credit does not take into account that there are also an increased number of months in which the credit would be $0 (since the total pre-program arrears would have been retired). The program cost should thus not be increased because the program cost is driven by the original pre-program arrears of $680, not by whether the forgiveness credit is $50/month or $25/month. Under the current rate of credits, the program cost would be 27 months times $25/month, or $675. Under my recommendation, the program cost would be (13 months times $50/month) *plus* (14 months times $0/month), or $650 (setting aside the rounding resulting in a partial credit in the final month).

To summarize, increasing the arrearage forgiveness monthly credit does not expand the cost of the program because the cost of the program is driven by the initial pre-program arrears brought into the program by the program participant, *not* by the rate at which those pre-program arrears are forgiven on a monthly basis.

Part 7. Expanding Aqua's Low-Income Water Conservation Program.

Q. PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR TESTIMONY.

A. In this section of my testimony, I examine Aqua's low-income water conservation expenditures. I conclude that Aqua devotes an unreasonably small amount of funding to low-income water conservation. Reasonable opportunities exist to allow the Company to expand its conservation investments.

Q. PLEASE EXPLAIN YOUR UNDERSTANDING OF AQUA'S CURRENT CONSERVATION INVESTMENTS IN LOW-INCOME CUSTOMERS.

A. According to the Company, "Aqua's water conservation budget is limited to the purchase, processing and shipping costs of conservation kits which are self-installed by customers. These costs are part of the Leak Repair and Conservation annual funding that was approved at $100,000 in the prior base rate proceeding. Approximately $22,000 is expected to be used annually for conservation kits, based on currently effective pricing."[100] Aqua states that its "conservation work is limited to conservation kits which are self-installed by the customer."[101] The projected $22,000 expenditure is expected to fund 1,000 conservation kits.[102] While Aqua proposes an increase in its budget for its leak repair program,[103] it has not proposed a corresponding increase in the funding of its conservation kits. This failure to increase conservation funding occurs despite the fact that, according to Company witness Black, in just the first three months of 2024, Aqua has experienced a more than doubling of requests for leak repair assistance.[104]

Q. PLEASE EXPLAIN THE ADVANTAGES TO THE COMPANY AND THE CUSTOMER THAT ARISE FROM RECEIPT OF A CONSERVATION KIT.

A. As I explain in detail below, unaffordable bills have a dramatic adverse impact on low-income households. When low-income households cannot afford to pay their bills, they frequently resort to extreme measures. These measures include reducing expenditures on

[100] Aqua St. 13, at 15; see also, OCA-VII-25.

[101] OCA-VII-26, OCA-VII-27, OCA-VII-28, OCA-VII-29..

[102] Aqua St. 13, at 13.

[103] Id.

[104] Id., at 13.

food for their households, reducing expenditures on medical and dental services and medicines, and engaging in extreme usage reduction measures such as not bathing or flushing their toilets.

In addition, however, the unaffordability of bills results in a significant deterioration in low-income bill payment patterns as I have described in detail above. These nonpayment practices not only lead to even further increased bills through charges such as late payment charges (for those not participating in the CAP), but lead to increased bills due to charges associated with the disconnection of service for nonpayment (and subsequent reconnections, if any).

It is clear that increasing usage has a substantive impact on the bills facing low-income customers. According to the Company, the residential bills are present rates given different increments of usage are those set forth in the Table below (Rate Zone 1 – Main Division).

Table 13. Residential Bills at Different Increments of Usage (Present Rates—Rate Zone 1 – Main Division)		
Usage Increment	Consumption (gallons)	Bills at Present Rates
50% median	1,430	$41.98
75% median	2,145	$52.35
Median usage	2,860	$64.19
125% median	3,575	$76.30
150% median	4,290	$87.86

Q. IS THERE AN OPPORTUNITY FOR AQUA TO TIE ITS DISTRIBUTION OF CONSERVATION KITS MORE CLOSELY TO ITS BILL DISCOUNT PROGRAM?

A. Yes. At a cost of $22 per kit ($22,000 total expenditures for 1,000 kits), it would quickly become cost-effective for Aqua to distribute its conservation kits to low-income customers at the time they enroll in the CAP. A reduction of CAP credits of $2/month per participant would, in a single year, more than repay the Company for its investment in conservation kits distributed to CAP participants. This sets aside any other avoided costs generated by the reduced water consumption. As with any conservation investment, of course, the savings should be calculated over the life of the investment. The usage reduction measures in conservation kits would have a life well beyond a single year. Aqua, therefore, could expect to receive a payback of well more than the cost of the kit over the life of the measures.

Q. IS THERE A SECOND DISTRIBUTION NETWORK THAT AQUA SHOULD BE USING FOR ITS CONSERVATION KITS?

A. Yes. Given that the conservation kits involve only self-installed measures provided to the recipient low-income customers, Aqua would benefit, also, from distributing its kits through contractors that are delivering energy efficiency services through the Low-Income Usage Reduction Program (LIURP) operated by natural gas and electricity providers with overlapping service territories.

Q. WHAT DO YOU RECOMMEND?

A. I recommend that Aqua increase the budget for its conservation kits to match its proposed budget for its leak repair program. A budget of $132,000[105] would allow Aqua to deliver conservation kits to all new participants in its CAP while also providing the Company with sufficient kits to be delivered when the energy companies with overlapping service territories deliver their existing LIURP services.

Q. IS THERE A NEED FOR SEPARATE COST RECOVERY FOR THESE ADDITIONAL CONSERVATION KITS?

A. No. The conservation kits are relatively inexpensive ($22/kit). There would be no administrative costs associated with the use of such kits given that the kits simply involve customer-installed measures. Moreover, as I discuss above, one advantage of the delivery of conservation kits is that they will reasonably be expected to reduce the costs of the Company's CAP on a multi-year basis. There should, therefore, be no incremental cost that requires separate cost recovery by the Company. However, to reflect the fact that my recommendation is occurring before Aqua or its customers are realizing the

[105] Aqua St. 13, at 14.

benefit of increased conservation kit distribution, OCA witness Smith recommends inclusion of an expense of $110,000 in Aqua's overall revenue requirement for this proceeding. I maintain that, in the long-term, the Company and ratepayers, alike, will see much more substantial a benefit than the initial expense increase authorized in this proceeding.

Part 8. Adverse Impact of Increased Customer Charge on Low-Income Customers.

Q. PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR TESTIMONY.

A. In this section of my testimony, I explain the adverse impacts on low-income customers in particular that will arise from Aqua's proposal to increase its fixed monthly customer charge from $20.51 per month to $23.90 per month (an increase of more than $40 per year). Such an increase in the unavoidable charges included on a low-income customer's bill simply exacerbates the sacrifices that such customers must make when their bills become due and they have insufficient money to pay them.

Q. CAN YOU EXPLAIN WHAT SACRIFICES LOW-INCOME HOUSEHOLDS MAKE WHEN THEY CANNOT AFFORD TO PAY THEIR WATER BILLS?

A. Yes. A report for the University of Michigan's School for Environment and Sustainability identifies the sacrifices people make when they cannot afford to pay for their water service.[106] I have attached the results of this study to this Testimony as Exhibit RDC-3. According to that University of Michigan study, "residents are making trade-offs to pay their bills." The study found that 51% of the residents reported switching between

[106] School for Environment and Sustainability, University of Michigan, "Household Water Security in Metropolitan Detroit: Measuring the Affordability Gap."

paying their energy bills and paying their water bills. Moreover, the study found that 84% of residents reported cutting back on monthly expenses in order to pay their water bills. Examples of those household expense reductions included 68% who reduced transportation expenses, 38% who reported reducing expenditures on medicines, 47% who reported reducing expenditures on medical or dental care, and 60% who reported reducing expenditures on school supplies.

This study of the impact of unaffordable water bills in Detroit closely reflects similar findings that I made in preparing a water affordability plan for the City of Toledo (OH).[107] My study in Toledo found that of those customers whose water bill became overdue before they could find money to pay for it (either "often" or "always"): (1) 33% skipped or reduced payments on needed purchases or repairs, and (2) 29% used other methods to obtain necessary items such as food, shelter, other utilities, etc. I found in Toledo that the fact that the water bill got paid did not detract from the sacrifices that low-income customers were making. Of those customers who reported having their water bill become due before they had money to pay for it ("often" or "always'), but who "found a way to make a payment,": (1) 63% skipped or reduced payments on needed purchases or repairs; and (2) 44% borrowed money from friends, bank, payday loan, or other entity. Of those low-income customers who said having their water bill become due before they had money to pay for it, and did *not* make a payment (either "often" or "always"), 67% reported that they borrowed money from friends, bank, payday loan, or some other entity.

[107] Colton (2021). Water Affordability Plan: City of Toledo (OH), prepared for City of Toledo.

Q. HOW DO THESE HOUSEHOLD ACTIONS RELATE TO AQUA'S PROPOSED INCREASE IN ITS RESIDENTIAL CUSTOMER CHARGE?

A. Taking dramatic actions to reduce home energy consumption is not at all uncommon within the low-income population when those customers do not have sufficient money to pay their home water bills. The households who are forced into engaging in these unsafe and unhealthy activities in their struggle to keep their home water bills affordable are impeded in their efforts by the Company's proposal to increase its fixed monthly customer. Aqua's proposal makes a higher part of the customer's monthly bill unavoidable through reduced consumption. Those low-income customers taking such actions, in other words, will face a smaller bill reduction as a result of their action should the Aqua proposed increase in the fixed monthly customer charge be approved, potentially incentivizing more dangerous usage-reduction measures.

Q. WHAT DO YOU RECOMMEND?

A. I recommend that the residential customer charge found to be reasonable by OCA witness Jerome Mierzwa should be adopted.

Part 9. The Company's Requested Equity Adder for Management Performance.

Q. PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR TESTIMONY.

A. In this section of my testimony, I review the Company's actions with respect to its customer service and universal service performance to assess whether it has exhibited sufficiently superior or exemplary management performance to justify the "equity allowance" which was requested by Company witness Packer.[108]

[108] Aqua St. 1, at 26; see also, Direct Testimony of Todd Duerr, Aqua St. 11.

Q. HAVE YOU HAD AN OPPORTUNITY TO REVIEW ANY SPECIFIC ASPECT OF AQUA'S CUSTOMER SERVICE PERFORMANCE?

A. Yes. I first reviewed Aqua's history of complaints and payment arrangement reviews by the Commission. The Company's performance does not justify being rewarded for exemplary performance. In the four quarters ending December 2023, 30% of the complaints filed with the Commission were found to have been "justified." This justified rate is nearly two times higher than Pennsylvania American Water Company (PAWC), which had the next highest rate (19). Similarly, in this same time period, the PUC found that Aqua customers had "justified" reviews of payment arrangements 30% of the time, again nearly two times higher than PAWC's justified rate, which was the next highest (17%).[109] Both of these indicators of 2023 performance represented a deterioration from Aqua's performance in the four quarters ending December 2022, during which period the Company had a justified complaint rate of 20% and a justified payment arrangement review rate of 28%.[110]

A high "justified" complaint rate, or "justified" payment arrangement review does not simply indicate a difference of opinion between the Company and the Commission. The Bureau of Consumer Services BCS) defines a "justified consumer complaint" as a "consumer complaint where, prior to BCS intervention, *the company did not comply with Commission Orders, policies, regulations, reports, Secretarial Letters, tariffs or guidelines* when the consumer brought the complaint to the company's attention."

[109] Pennsylvania PUC, "Quarterly Update to UCARE Report, January – December 2023," at 12, available at https://www.puc.pa.gov/filing-resources/reports/consumer-activities-report-evaluation/

[110] Pennsylvania PUC, "Quarterly Update to UCARE Report, January – December 2022," at 12.

(emphasis added)[111] BCS defines a "justified PAR" (payment arrangement review) as a "Payment Arrangement Request where, *prior to BCS intervention, the company did not comply with Commission regulations, reports, Secretarial Letters, tariffs or guidelines*." (emphasis added)[112] Aqua's high rate of non-compliance in these customer service areas should disqualify Aqua from receiving its requested equity allowance.

Q. DOES AQUA HAVE ANY ADDITIONAL HISTORY OF NON-COMPLIANCE WITH COMMISSION REGULATIONS?

A. Yes. For the four quarters ending December 2023, BCA reported that Aqua had 174 "verified infractions" (167 of Chapter 56 regulations; 7 of Chapter 66 regulations).[113] According to BCS, an "infraction" is "A misapplication or infringement of a Commission regulation, particularly the standards and billing practices for residential utility service."[114] On nearly every other day of the year, in other words, Aqua was found to have violated a Commission regulation regarding the standards and billing practices for residential service. The number of 2023 verified infractions by Aqua PA (174) represented a substantial increase relative to 2022 (141) and an even more substantial increase over 2021 (52). The increase in Aqua non-compliance cannot be attributed to restrictions placed on collection activities and other customer interactions during the COVID health pandemic. Looking at Aqua performance *before* COVID reveals that

[111] 2023 Quarterly Update, at 20.

[112] Id.

[113] 2023 UCARES Report, at 19.

[114] Id.

Aqua had 87 verified infractions in 2019 and only 26 in 2018. Its recent history is a real deterioration in compliance with consumer regulations.

Q. IS THERE OTHER REASON WHY THIS HISTORY OF NON-COMPLIANCE WITH COMMISSION REGULATIONS, COMMISSION ORDERS, SECRETARIAL LETTERS, AND THE LIKE GIVE RISE FOR CONCERN IN THIS PROCEEDING?

A. Yes. Aqua's frequent failure to comply with Commission regulations, orders, Secretarial Letters, and the like (as described by BCS) is consistent with the Company's failure to comply with the Commission's order in Aqua's last rate case regarding the development of an offset for its CAP cost recovery. Despite being explicitly directed to consult with OCA (and I&E), as well as taking other specific actions to develop that offset, the Company failed to do so. While, unto itself, this non-compliance would seem to disqualify Aqua from receiving an "equity allowance" for superior management, the Company's history of non-compliance is even more notable given the data reported by BCS as discussed above.

Q. HAVE YOU EXAMINED ANY OTHER ASPECT OF AQUA'S PERFORMANCE?

A. Yes. I have examined Aqua's performance in undertaking basic management actions to assess the effectiveness of its collection processes. Consider, for example, payment arrangements. From January 2021 through December 2023, Aqua entered into 96,466 payment arrangements with residential customers. During that same time period, however, 89,067 of those payment arrangements (92.3%) defaulted. Similarly, from January 2021 through December 2024, Aqua entered into 71,171 payment arrangements with its low-income customers (excluding CAP participants. During the same time

period, 66,031 of those payment arrangements (92.8%) defaulted.[115] Despite this payment arrangement failure rate of 90% or more, when asked to provide any written assessment of "*why* residential customers do not successfully complete deferred payment plans (sometimes known as payment agreements or other similar terms)," Aqua replied that "The Company does not have any reports, evaluations or studies."[116] The Company seems content simply to continue to enter into payment arrangements which yield defaults in more than nine-out-of-ten cases.

Similarly, the Company has never considered or examined why its notices of an impending nonpayment disconnection are so ineffective. According to Aqua, in 2021, it issued an average of 14,444 notices of nonpayment disconnections to residential customers each month (173,324 total for the year); in 2022, it issued an average of 14,598 notices to residential customers each month (175,172 total for the year), while in 2023, it issued an average of 14,310 notices of residential nonpayment disconnection each month (171,715 total for the year).[117] Nonetheless, during those same years, Aqua had an average of 33,375 residential customers with arrears older than 90 days each month in 2021; an average of 33,924 residential customers with arrears older than 90 days in each month of 2022; and 37,525 residential customers with arrears older than 90 days in each month of 2023.[118] Moreover, during those years, Aqua had an average of 17,111 residential customers older than 120 days in 2021, 16,916 residential customers with

[115] OCA-VI-5.

[116] OCA-VI-33.

[117] OCA-VI-5.

[118] OCA-VI-11.

arrears older than 120 days in 2022, and 18,718 residential customers with arrears older than 120 days in 2023.[119] The continuing high rate of very old arrears –whether one defines "very old" as 90+ days or as 120+ days—is an indication that the Company's threat of shutoff is not effective as a collection strategy. Nonetheless, when the Company was asked to provide any assessment of why customers do not make contact with the utility, when in response to nonpayment, they receive a notice to do so to avoid service disconnection, the Company responded it had no such documents.

In fact, when Aqua was asked for any assessment that it has undertaken to explicitly assess whether either notices or nonpayment disconnections or the actual disconnection of service help to reduce residential bad debt, it conceded that it no such documents.[120] Nor has it ever considered the extent to which, if at all, either notices or nonpayment disconnections or the actual disconnection of service help to reduce residential arrears.[121] The Company simply continues to do what it has historically done with no consideration of why those actions do not generate the desired results. The age of the arrears I identify above demonstrates that these customers are not being disconnected, but are not making payments either.

Q. WHAT DO YOU CONCLUDE?

A. The Company's management actions with respect to the efficacy and effectiveness of its collections strategies demonstrate that Aqua does not merit an equity allowance for superior management.

[119] Id.

[120] OCA-VI-30.

[121] OCA-VI-31.

Q. WHAT DO YOU RECOMMEND?

A. Based on the discussion above, I recommend that the return on equity found to be reasonable by OCA witness Aaron Rothschild should be adopted, including the recommendation that there be no adder for management performance.

Summary of Recommendations.

Q. PLEASE SUMMARIZE THE RECOMMENDATIONS YOU MAKE FOR AQUA PA.

A. Based on the data and discussion presented throughout my Direct Testimony, I make the following findings and recommendations:

- That the first income tier (0 – 100% FPL) be subdivided into two separate tiers (0 – 50% FPL; 50 – 100% FPL).
- That, having modified the income ranges, the discounts within each range be modified in order to target an affordable burden for each tier. It would not be reasonable to modify the tiers, but to then leave the discounts in each tier unchanged.
- That if and to the extent that Aqua cannot adopt multiple tiers pending the conversion of its CIS to SAP, the Company should adopt the same commitment that it provided in its 2021 rate case with respect to incorporating recommended changes to its arrearage forgiveness program upon the conversion of its CIS to SAP. That same commitment (i.e., the modification will be made at the time of the conversion of CIS to SAP) should be made in this proceeding regarding changes to the bill discount tiers.
- That, to better reflect actual average consumption, Aqua should expand the usage underlying the first block of discounts from 2,000 gallons per month to 3,200 gallons per month for water service.
- That known low-income customers who are negotiating a deferred payment agreement (DPA) with the Company, as well as customers from whom the Company receives information placing them in an income tier of 0% to 150% FPL, should be provided a stand-alone written Plain Language notice informing those customers of their right, in the alternative, to enroll in the Company's CAP

(along with an explanation of the advantages of CAP's arrearage forgiveness provisions).

- that Aqua adopt a procedure under which, prior to the disconnection of a known low-income customer, it will make personal contact with the customer subject to disconnection. In that personal contact, the Company shall offer the known low-income customer the opportunity to apply for the Company's CAP and arrearage forgiveness program. If the customer expresses a desire to make an application for the CAP, Aqua will postpone the disconnection for 30 days to allow the application process to be completed.

- That the following modifications to the Aqua PA arrearage forgiveness program be adopted

    - First, that Aqua increase its arrearage forgiveness credits so that program participants will reduce their pre-existing arrears to $0 over a three-year period. The level of arrearage forgiveness credits should be tiered based on the bill discount tier into which the customer falls. I recommend a tiered arrearage forgiveness credit of: (1) Tier 1 (0 – 50% FPL): $50/month; (2) Tier 2 (50 – 100% FPL): $45/month; (3) Tier 3 (100 – 150% FPL): $40/month; and (4) Tier 4 (150 – 200% FPL): $35/month.

    - Second, that arrearage forgiveness credits will be granted for full payments as those payments are made, even if those payments have not been paid in a timely fashion.

- That the Commission adopt reasonable offsets to the recovery of Aqua's costs for its bill discount credits and arrearage forgiveness credits both to reflect the cost savings generated by the programs and to ensure that the Company is not double-recovering its costs. Aqua claims $9,451,309.90 in bill discount credits for water and $1,357,034 in bill discount credits for wastewater. I recommend a reduction in the bill discount cost recovery of $2,455,931.82 for water. The appropriate offset is $352,626.60 for wastewater bill discount credits. The appropriate offset for the Company's water arrearage forgiveness credits is $812,620. The appropriate offset for the Company's wastewater arrearage forgiveness credits is $89,774.

- That Aqua increase the budget for its conservation kits to match its proposed budget of $132,000 for its leak repair program.

- That the recommendation of OCA witness Ralph Smith regarding the Company's proposed inflation adjustment should be adopted.

- That the residential customer charge found to be reasonable by OCA witness Jerome Mierzwa should be adopted.

- That the return on equity found to be reasonable by OCA witness Aaron Rothschild should be adopted, including the recommendation that there be no adder for management performance.

Q. DOES THIS COMPLETE YOUR DIRECT TESTIMONY?

A. Yes, it does.

OFFICE OF CONSUMER ADVOCATE

SET XII INTERROGATORIES

OCA-XII-2 Reference the passage of the Commission's 2021 base rate case Order identified in OCA-12-1. Recognizing that the PUC order "directed [Aqua] to consult with the OCA and I&E to determine the necessary data needed to accomplish this directive," please provide a comprehensive list of the following information:

a. The dates of each consultation with OCA to determine the "necessary data needed to accomplish this directive."
b. The dates of each consultation with I&E to determine the "necessary data needed to accomplish this directive."
c. Each set of data proposed or recommended by OCA as being "necessary data needed to accomplish this directive."
d. Each set of data proposed or recommended by I&E as being "necessary data needed to accomplish this directive."
e. Each proposed set of data recommended by OCA that Aqua began to "monitor and maintain" that "could be used in the next base rate proceeding to determine whether a double recovery is occurring."
f. Each proposed set of data recommended by OCA that Aqua declined or fail to begin to "monitor and maintain" that "could be used in the next base rate proceeding to determine whether a double recovery is occurring."
g. Each proposed set of data recommended by I&E that Aqua began to "monitor and maintain" that "could be used in the next base rate proceeding to determine whether a double recovery is occurring."
h. Each proposed set of data recommended by OCA that Aqua declined or fail to begin to "monitor and maintain" that "could be used in the next base rate proceeding to determine whether a double recovery is occurring."

RESPONSE

Regarding a. through h., please refer to the Company's comprehensive response to OCA-XII-1. Additionally, As noted by Ms. Black since the approval of the Company's CAP program in the Commission's 2021 base rate case Order the Company has taken the necessary steps to implement the programs and enroll participants. The Company has

met with the various stakeholders to review and update participants on its progress in implementing its Universal Service programs through its Aqua Assistance Collaborative. The Aqua Assistance Collaborative met on the following dates:

9/12/22
10/17/22
6/28/23
8/30/23
2/21/24
5/15/24

DOCKET NO. R-2024-3047822 & R-2024-3047824

OFFICE OF CONSUMER ADVOCATE

SET XII INTERROGATORIES

OCA-XII-1 Given the PUC's Order to "direct Aqua to take the necessary actions within its Company to monitor and maintain the necessary information that could be used in its next base rate proceeding to determine whether a double-recovery is occurring," please provide the following information:

a. Identify the actions that the Company identified as "necessary" to "monitor and maintain the necessary information that could be used in its next rate proceeding to determine whether a double recovery is occurring."
b. could be used in its next rate proceeding to determine whether a double recovery is occurring."
c. What "necessary information" was "monitor[e]d and maintain[ed] that could be used in its next rate proceeding to determine whether a double recovery is occurring?"
d. Identify each calculation, including all workpapers in an active Excel spreadsheet, using this "necessary information" and used in this rate proceeding to determine whether a double recovery is occurring.
e. What "necessary information" was "monitor[ed] and maintain[ed] to "determine an appropriate offset that should be applied to prevent any double recovery?"

RESPONSE

Regarding parts a. through e., the Company submits the following:

The Company's existing customer information system has the necessary customer tracking data for customers who are CAP eligible, and those who are not. As such and to the extent the CAP program implementation has resulted in Bad Debt Expense impacts, the Company has quantified those in the following Table for the historic test (2023) year in this proceeding, as shown below:

Aqua Pennsylvania, Inc. - Water/Wastewater Operations				
Data to support response to OCA - Set XII - Qs 1 through 7				
Test Year Bad Debt Expe				
Service Type	**Cust Type**	**Adjustment Type**	**Total**	
WATER	**Not CAP Enrolled**	Water Bad Debt Expense - Customer	-$4,476,504	
		Water Bad Debt Recovery - Customer	$427,477	
		Water Arrearage Forgiveness - Customer	-$2,065	
	Not CAP Enrolled Total		**-$4,051,091**	
	CAP Enrolled	Water Bad Debt Expense - Customer	$1,348	
		Water Bad Debt Recovery - Customer	$10,889	
		Water Arrearage Forgiveness - Customer	-$60,911	
	CAP Enrolled Total		**-$48,674**	
WATER Total			**-$4,099,765**	
SEWER	**Not CAP Enrolled**	Sewer Arrearage Forgiveness - Customer	-$26	
		Sewer Bad Debt Expense - Customer	-$273,935	
		Sewer Bad Debt Recovery - Customer	$35,341	
		Water Bad Debt Expense - Customer	-$2,473	
		Water Bad Debt Recovery - Customer	$261	
	Not CAP Enrolled Total		**-$240,832**	
	CAP Enrolled	Sewer Arrearage Forgiveness - Customer	-$3,335	
		Sewer Bad Debt Expense - Customer	-$1,091	
		Sewer Bad Debt Recovery - Customer	$658	
		Water Arrearage Forgiveness - Customer	-$215	
	CAP Enrolled Total		**-$3,982**	
SEWER Total			**-$244,814**	
Grand Total			**-$4,344,579**	
		Test Year CAP Customer Enrolled % of Water Bad Debt Expense/Recovery =>	1.19%	
		Test Year CAP Customer Enrolled $$$ of Water Bad Debt Expense/Recovery =>	-$48,674	*Adjustment to Bad Debt Expense*
		Test Year CAP Customer Enrolled % of Sewer Bad Debt Expense/Recovery =>	1.63%	
		Test Year CAP Customer Enrolled $$$ of Sewer Bad Debt Expense/Recovery =>	-$3,982	*Adjustment to Bad Debt Expense*

The above table (see OCA-XII-1 Attachment A – HIGHLY CONFIDENTIAL) is the summary presentation of all billing adjustments for the write off and collection of bad debts expense in the historic test year. Customers who are part of the CAP program are segregated from the Non-CAP eligible customers. The summary above shows that, out of the 2023 net bad debt expense activity recorded totaling $4,344,579, there was $52,656 in increased bad debt expense incurred for customers who are part of the CAP program.

No adjustment was made to the Company's as filed Bad Debt Expense claims in this proceeding. However, the above analysis would suggest that reducing the Company's claim in the amount of $48,674 for water and $3,982 for wastewater would be appropriate and the Company will concede to doing so as it submits its update to its exhibits in the rebuttal phase.

OFFICE OF CONSUMER ADVOCATE

SET XII INTERROGATORIES

OCA-XII-2 Reference the passage of the Commission's 2021 base rate case Order identified in OCA-12-1. Recognizing that the PUC order "directed [Aqua] to consult with the OCA and I&E to determine the necessary data needed to accomplish this directive," please provide a comprehensive list of the following information:

a. The dates of each consultation with OCA to determine the "necessary data needed to accomplish this directive."
b. The dates of each consultation with I&E to determine the "necessary data needed to accomplish this directive."
c. Each set of data proposed or recommended by OCA as being "necessary data needed to accomplish this directive."
d. Each set of data proposed or recommended by I&E as being "necessary data needed to accomplish this directive."
e. Each proposed set of data recommended by OCA that Aqua began to "monitor and maintain" that "could be used in the next base rate proceeding to determine whether a double recovery is occurring."
f. Each proposed set of data recommended by OCA that Aqua declined or fail to begin to "monitor and maintain" that "could be used in the next base rate proceeding to determine whether a double recovery is occurring."
g. Each proposed set of data recommended by I&E that Aqua began to "monitor and maintain" that "could be used in the next base rate proceeding to determine whether a double recovery is occurring."
h. Each proposed set of data recommended by OCA that Aqua declined or fail to begin to "monitor and maintain" that "could be used in the next base rate proceeding to determine whether a double recovery is occurring."

RESPONSE

Regarding a. through h., please refer to the Company's comprehensive response to OCA-XII-1. Additionally, As noted by Ms. Black since the approval of the Company's CAP program in the Commission's 2021 base rate case Order the Company has taken the necessary steps to implement the programs and enroll participants. The Company has

met with the various stakeholders to review and update participants on its progress in implementing its Universal Service programs through its Aqua Assistance Collaborative. The Aqua Assistance Collaborative met on the following dates:

9/12/22
10/17/22
6/28/23
8/30/23
2/21/24
5/15/24

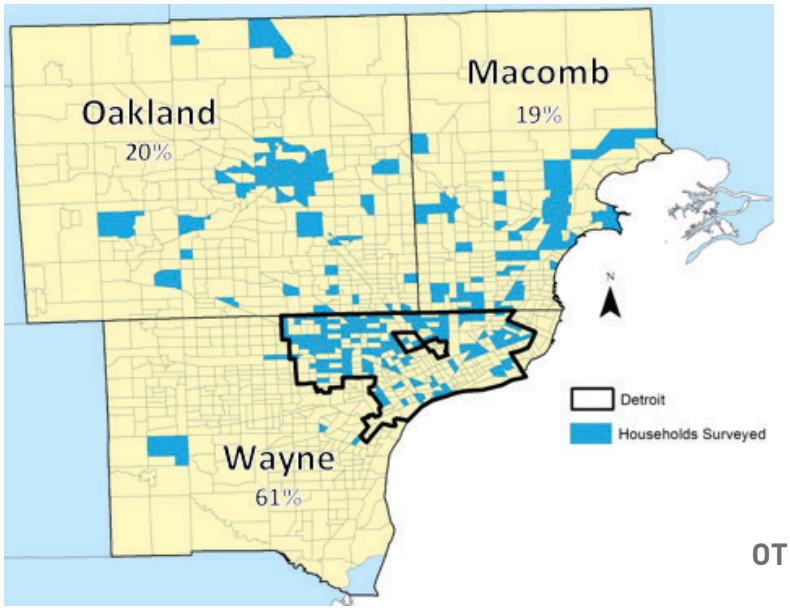
SCHOOL FOR ENVIRONMENT AND SUSTAINABILITY
UNIVERSITY OF MICHIGAN

HOUSEHOLD WATER SECURITY IN METROPOLITAN DETROIT:

MEASURING THE AFFORDABILITY GAP

A research team from The University of Michigan's School for Environment and Sustainability did a study on low-income residents' experiences with water in Wayne, Oakland and Macomb Counties to give a regional picture of water access and affordability.

WHO PARTICIPATED

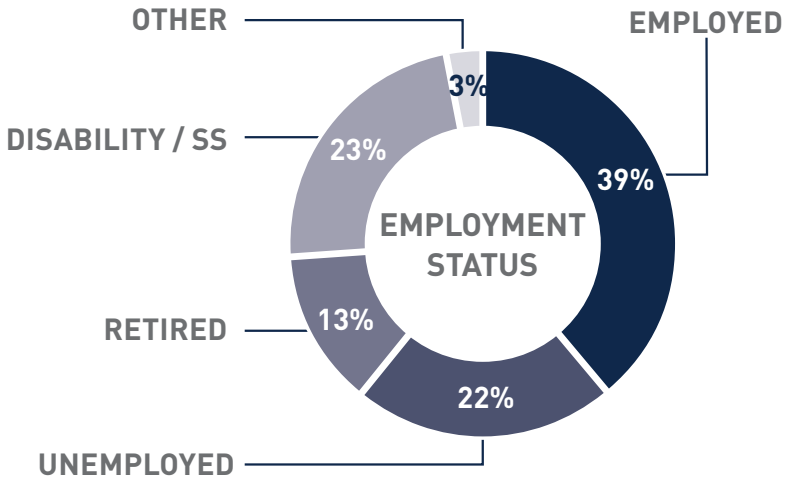


Data Source: Michigan GIS Open Data & U.S. Census Bureau

413 HOUSEHOLDS
2.6 PEOPLE/HOUSEHOLD ON AVG

39%
of households surveyed had children under the age of 18

11%
were home to seniors over the age of 65



$98.61
AVERAGE WATER BILL
Surveyed households are paying on-average 10% of their monthly income for water and sewer service.

74 of the households surveyed have had their water shut-off in the past two years.

For questions and additional information, please visit:
https://urbanenergyjusticelab.com/watersecurity/ or contact: roadmap.watersecure@gmail.com

WHAT WE FOUND

WATER AND WASTEWATER BILLS ARE UNAFFORDABLE ACROSS THE REGION.

10%: Percentage of income on-average that goes to water and sewer service at surveyed households.

4.5%: Percentage of income the U.S. Environmental Protection Agency considers an affordable water bill.

PEOPLE VALUE WATER AND ARE WILLING TO PAY WHAT THEY CAN AFFORD.

$98.61 reported average monthly water and wastewater bill → **$53.53** amount respondents said they could afford to pay = **$45.08 AFFORDABILITY GAP**

between what people are paying and what they can afford each month. It adds up to $540.96 a year.

That extra $45.08/month could pay for any one of the following:

- 22 bus rides
- 1 month of antibiotics
- 4 weeks of diapers
- 1 backpack with a pencil case full of markers, crayons & pencils
- 19 meals for the average low income family

Only 1.4% of residents said they expected free water.

RESIDENTS ARE MAKING TRADE-OFFS TO PAY THEIR BILLS.

51% of residents reported switching between paying their energy and water bill.

84% of residents reported cutting back on monthly expenses to pay their water bill.

Where people cut back on monthly expenses

RENT OR PROPERTY TAX	TRANSPORTATION	MEDICINE	MEDICAL OR DENTAL CARE	FRESH PRODUCE	CLOTHES	SCHOOL SUPPLIES
84%	68%	38%	47%	63%	82%	60%

ASSISTANCE IS HELPING, BUT IS NOT CLOSING THE AFFORDABILITY GAP.

79.1% of residents enrolled in assistance programs are still paying more than 4.5% of their income.

94.3% of residents receiving assistance are still cutting back on monthly expenses.

Residents enrolled in assistance programs reported that they were 13% less likely to struggle to pay their bills at least some of the time.

OCA-VII-13 Please indicate whether Aqua witness Ms. Rita F. Black agrees or disagrees with each of the following statements. If she disagrees, provide a detailed explanation of the basis for the disagreement:

a. Reducing the dollar level of arrears to a customer will, all else equal, have the effect of reducing the working capital needed by a utility;

b. Reducing the time (in days or months) that an arrearage remains outstanding will, all else equal, have the effect of reducing the capital needed by a utility;

c. Working capital is a cost component that has equity return associated with it.

d. To the extent that working capital has equity return associated with it, it will have a tax component associated with it.

e. A higher dollar level of arrearages poses a greater risk of loss due to uncollectibles than a lower dollar level of arrearages.

f. Reducing the number of customers who are off-system due to a disconnection of service will, all else equal, reduce lost sales to a utility.

g. Reducing the number of customers receiving final bills with an unpaid balance will, all else equal, have the effect of reducing costs to a utility.

RESPONSE

a. As working capital and other financial topics are not within my purview, I am unable to comment on this statement.
b. As working capital and other financial topics are not within my purview, I am unable to comment on this statement.

c. As working capital and other financial topics are not within my purview, I am unable to comment on this statement.
d. As working capital and other financial topics are not within my purview, I am unable to comment on this statement.

OFFICE OF CONSUMER ADVOCATE

SET VII INTERROGATORIES

OCA-VII-18 Please indicate whether Aqua witness Ms. Rita F. Black agrees or disagrees with each of the following statements. If Ms. Black disagrees with the statement, provide a detailed explanation of the basis for the disagreement:

a. Low-income customers pay a smaller percentage of their bills than do residential customers as a whole;
b. Low-income customers make less regular payments toward their bills than do residential customers as a whole;
c. Aqua PA issues more disconnect notices for each $1,000 of revenue it collects from its low-income population than it issues to residential customers as a whole;
d. Aqua PA engages in more nonpayment service disconnections for each $1,000 of revenue it collects from its low-income population than it engages in for residential customers as a whole.
e. Aqua PA experiences a higher "roll rate" for its low-income customers than it experiences for its residential customers as a whole.

RESPONSE

a. Disagree. This is a broad generalization, stereotyping low-income customers, and implying that due to their low-income status, they do not pay bills as well as other non-low-income households.
b. Disagree. This is a generalization. In my experience, I have encountered both low-income customers who never miss a utility bill payment, apply for all assistance for which they are eligible, and ensure their bills are paid and, alternatively, customers with significant income that do not make regular bill payments.
c. As collections are not under my purview, I am unable to comment on this statement.
d. As collections are not under my purview, I am unable to comment on this statement.

e. As collections are not under my purview, I am unable to comment on this statement.

OFFICE OF CONSUMER ADVOCATE

SET VII INTERROGATORIES

OCA-VII-31 Please provide a copy of any and all internal Company policies regarding the percentage of bill, or dollar amount, that will be reserved for write-offs or uncollectibles based on:

a. The size of arrears in dollars;
b. The age of arrears in months.

RESPONSE

The Company's long standing policy is to reserve the following percentages of accounts receivable:

0% of current accounts receivable
3% of 31-60 days past due
8% of 61-90 days past due
15% of 91-120 days past due
40% of 121-180 days past due
100% of greater than 180 days past due

In addition to this, the Company monitors the reserve to ensure that actual write offs are not in excess of the accounts receivable reserve.

Table of Contents

Part 1.	Response to Aqua Rebuttal Witness Heather Doyle-Conley	1
Part 2.	Response to Aqua Rebuttal Witness Rita Black	3
Part 3.	Response to I&E Rebuttal Witness Zachari Walker	18

Q. PLEASE STATE YOUR NAME AND ADDRESS.

A. My name is Roger D. Colton. My business address is 34 Warwick Road, Belmont, MA.

Q. ARE YOU THE SAME ROGER COLTON WHO PREVIOUSLY PREPARED DIRECT TESTIMONY ON BEHALF OF THE OFFICE OF CONSUMER ADVOCATE?

A. Yes, I am.

Q. PLEASE EXPLAIN THE PURPOSE OF YOUR SURREBUTTAL TESTIMONY.

A. The purpose of my Surrebuttal Testimony is to respond to the Rebuttal Testimony of Aqua witnesses Heather Doyle-Conley and Rita Black and I&E witness Zachari Walker.

Part 1. Response to Aqua Rebuttal Witness Heather Doyle-Conley.

Q. PLEASE EXPLAIN THE ASPECT OF THE REBUTTAL TESTIMONY OF AQUA WITNESS HEATHER DOYLE-CONLEY TO WHICH YOU WISH TO REPOND.

A. In this section of my testimony, I address Ms. Doyle-Conley's rebuttal testimony regarding customer service. She responds to my testimony regarding the extent to which Aqua has been found by the Commission's Bureau of Consumer Services (BCS) to have "verified infractions" (167 of Chapter 56 regulations; 7 of Chapter 66 regulations).[1] According to BCS, an "infraction" is "A misapplication or infringement of a Commission regulation, particularly the standards and billing practices for residential utility service."[2]

[1] 2023 UCARES Report, at 19.

[2] Id.

Ms. Doyle-Conley does not dispute any of the observations I make in my Direct Testimony. Her response is simply that "all utilities have similar issues."[3] She offers no data to support that conclusory statement. Even if true, however, that testimony does not support Aqua's equity adder. Aqua is seeking an equity adder for *superior* performance. Ms. Doyle-Conley's testimony that Aqua has problems that are no greater than anyone else hardly supports a claim of superior performance.

Moreover, Aqua does not perform at the same level as other water utilities. In 2023, 30% of the Aqua complaints considered by BCS, and 30% of the Payment Arrangement Requests (PAR) considered by the Commission were found to be "justified." The next closest water utility was Pennsylvania American Water Company (PAWC), which had only 19% of its complaints justified and only 17% of its PARs justified. As I noted in my Direct Testimony, BCS defines a "justified consumer complaint" as a "consumer complaint where, prior to BCS intervention, *the company did not comply with Commission Orders, policies, regulations, reports, Secretarial Letters, tariffs or guidelines* when the consumer brought the complaint to the company's attention." (emphasis added) BCS defines a "justified PAR" (payment arrangement review) as a "Payment Arrangement Request where, *prior to BCS intervention, the company did not comply with Commission regulations, reports, Secretarial Letters, tariffs or guidelines*." (emphasis added).

Ms. Doyle-Conley's reference to Aqua's training and "coaching" in response to infractions does not respond to the data. Notwithstanding the training and coaching she

[33] Aqua St. 14-R, at 5 – 6.

cites, she does not deny that Aqua's number of verified infractions in 2023 (174) was two times higher than the number in 2019 (87) and seven times higher than the number in 2018 (26).

Finally, Ms. Doyle-Conley's assertion that she "does not agree that the Company has frequently failed to comply with Commission regulations, Orders and/or Secretarial Letters, does not comport with the data. As I observed in my Direct Testimony, and Ms. Doyle-Conley did not dispute, both of the "justified" rates I cite above are two times higher than the rates of Pennsylvania American Water Company (PAWC), the water company with the next highest rate.

Part 2. Response to Aqua Rebuttal Witness Rita Black.

Q. PLEASE DESCRIBE THE PURPOSE OF THIS SECTION OF YOUR TESTIMONY.

A. In this section of my testimony, I respond to the Rebuttal Testimony of Rita Black regarding certain aspects of the Company's Customer Assistance Program (CAP). Witness Black addresses outreach for CAP, the structure of the Company's Arrearage Forgiveness Program, the structure of the Company's Bill Discount Program (BDP),and the distribution of water conservation kits. The BDP, arrearage forgiveness, and water conservation are all components which comprise the Company's CAP.

Q. WHAT IS THE FIRST ASPECT OF MS. BLACK'S REBUTTAL TESTIMONY TO WHICH YOU WISH TO RESPOND?

A. Aqua witness Black responds to the affordability analysis presented in my Direct Testimony by asserting that "these challenges impact all low-income consumers and are

not exclusive to Aqua PA's customers."[4] She observes that low-income customers "are more likely to experience payment difficulties than the general residential customer base" and that these difficulties are "regardless of utility." The fact that the low-income customers of ***all*** utilities are more likely to experience payment difficulties than the general residential customer base does not detract from the needs of Aqua PA customers in particular. Indeed, Aqua's response to the needs of its lowest income customers differs from the response by other Pennsylvania utilities –water/wastewater, natural gas, and electricity —to the extent that Aqua does ***not*** provide the greater benefits to those with the lowest incomes (and thus with the highest needs).

I disagree with Ms. Black's Rebuttal Testimony on this issue to the extent that she suggests that the "risk of missed payments" is associated only with "unexpected expenses, such as a car repair, for example."[5] As I document in my Direct Testimony, and as Ms. Black's Rebuttal Testimony does not dispute, the unaffordability of Aqua PA bills is both widespread (i.e., what I refer to as the "breadth" of unaffordability) and extensive (i.e., what I refer to as the "depth" of unaffordability). The risk of missed payments by low-income customers is associated with their unaffordable Aqua PA bill burdens (i.e., bills as a percentage of income), not merely with "unexpected expenses."

[4] Aqua St. 13-R, at 4.
[5] Id.

Q. HOW DOES MS. BLACK RESPOND TO THE FACT THAT AQUA PA IS MORE LIKELY TO TERMINATE SERVICE TO A LOW-INCOME CUSTOMER AFTER ISSUING A NOTICE OF NONPAYMENT DISCONNECTION?

A. Ms. Black asserts that the statement that Aqua PA is more likely to terminate service to a low-income customer after issuing a notice of nonpayment disconnection "could be interpreted" as meaning that Aqua PA is pursuing the termination of low-income households more often than other residential customers."[6] She disputes that characterization, arguing that "Aqua PA does not seek out terminations for a particular income class. Rather, termination notices and, ultimately, terminations, are a product of a customer failing to pay their bill(s)."[7]

Ms. Black's testimony presents a red herring that she then disputes. My Direct Testimony did not assert that Aqua PA targets low-income households because they are low-income (i.e., "seek out terminations for a particular income class"). As my testimony established, and Ms. Black does not dispute, the disproportionate rate of terminations for low-income customers can more reasonably be attributed to the fact that when a low-income customer receives a disconnect notice, that customer has inadequate resources to respond by paying their bill and avoiding the disconnection. This observation supports each of the remedies I present in my Direct Testimony: (1) to increase outreach for the Customer Assistance Program (CAP) so that low-income customers can receive Aqua PA's low-income discount and arrearage forgiveness; and (2) to increase the CAP discount for the lowest income customers.

[6] Id., at 4 – 5.
[7] Id., at 5.

Q. PLEASE RESPOND TO MS. BLACK'S REBUTTAL TESTIMONY REGARDING THE IMPACT OF PAYMENT ARRANGEMENTS ON RETIRING LOW-INCOME ARREARS.

A. The rebuttal testimony of witness Black mis-characterizes my testimony regarding the use of payment arrangements as a means for low-income customers to avoid the disconnection of service. She states that I point to payment arrangements "as a contributor to the problem."[8] In fact, I did not assert that payment arrangements "contribute" to the problem of low-income inability-to-pay and the resulting high rate of disconnections. What I stated was that Aqua PA's use of payment arrangements cannot be relied upon as a *solution* to the problem of low-income inability-to-pay.

Even Ms. Black's testimony supports this observation. She acknowledges that low-income customers "often choose the verbal agreement over enrollment in CAP as it is the easiest path to a quick resolution of the current situation" (with "the situation" referring to a pending disconnection). She further acknowledges that while it may be the "easiest path to a quick resolution," that quick and easy path is pursued even though "maintaining a payment arrangement may be difficult or in some cases unlikely. . ."[9]

As can be seen, Ms. Black's Rebuttal Testimony supports the recommendations I make in my Direct Testimony more than they undermine them. Contrary to Ms. Black's suggestion that Aqua PA need do no more, her Rebuttal Testimony, in fact, counsels the contrary. Experience in multiple programs documents that more effective program outreach is associated with making multiple "touches" with the potential participant

[8] Id., at 5.
[9] Id., at 5.

population. Through adoption of the recommendations I advance in my Direct Testimony, Aqua PA increases the number of touches with its customers known to be low-income, and does so in different, yet interdependent, circumstances. The recommendations involve Aqua PA telling its low-income customers: (1) enrollment in CAP is an alternative to having service disconnected for nonpayment; (2) enrollment in CAP is an alternative to entering into an unaffordable deferred payment arrangement; (3) enrollment in CAP is an alternative to entering the winter heating season without heating service; and (4) enrollment in CAP is an alternative to continuing to carry arrears (with the costs and stresses that those arrears impose). The multiple touches through adoption of these recommendations can reasonably be expected to increase CAP enrollment without need to adopt modifications to the Company's underlying universal service program. As I have discussed throughout my testimony, this improved enrollment not only benefits the low-income customers who choose to enroll in CAP but will also benefit the Company and all remaining ratepayers by reducing costs and enhancing revenues.

Ms. Black's testimony supports her assertion that any ***single*** touch may be ineffective ***at that time***. The multiple touches I recommend addresses the very problem that she identifies (*i.e.*, that agreeing to a payment arrangement may be the quickest and easiest response ***at the time***, even though "likely" to be unaffordable and ineffective).

Q. HOW DO YOU RESPOND TO MS. BLACK'S TESTIMONY REGARDING THE PROVISION OF STAND-ALONE NOTICES INFORMING CUSTOMERS OF CAP PRIOR TO THE DISCONNECTION OF SERVICE?

A. Ms. Black's Rebuttal Testimony regarding the provision of stand-alone notices about CAP prior to the disconnection of service suffers from the same short-comings as her discussion of payment arrangements. She argues that she does not "believe that mailing a customer another document, in the hopes that they will read the document and respond, is the best way to engage customers," and argues that "customers in arrears or struggling to pay utility bills often do not open envelopes with the utility logo."[10]

Q. DOES MS. BLACK OFFER AN "ALTERNATIVE" TO A STAND-ALONE NOTICE?

A. Yes. In her Rebuttal Testimony, Ms. Black offers the following as an alternative not merely to my recommendation for a stand-alone notice prior the disconnection of service, but also to my discussion of enrollment in CAP as an alternative to the "quick and easy" agreement to a payment arrangement that is "likely" to be ineffective. She testifies:

> I believe we should take a close look at the Aqua PA termination notice and identify ways to incorporate information regarding CAP into that particular mailing. As this is the correspondence most likely to be read by the customer facing payment difficulties, it would be the logical place to start to increase awareness of CAP as an alternative to a payment arrangement or termination of service. I also believe it would be advantageous to consider modifications to the call scripting and reference tools used by Customer Service Representatives ("CSR") when engaging customers calling in regard to collections, to ensure that CAP is emphasized as an alternative in lieu of a payment arrangement.[11]

[10] Id., at 7.
[11] Id., at 8.

She recommends that Aqua PA "engage" the Company's Aqua Assistance Collaborative in this endeavor.[12] While I appreciate Ms. Black's expressed openness to seeking effective alternative solutions to problems that she and I appear to have jointly identified and acknowledged, a commitment to "take a close look at" modifications to correspondence, to "consider" modifications to call scripting and "reference tools" used by Aqua's CSRs, and to "engage" the Aqua Assistance Collaborative, are insufficient to address those problems. I would find Ms. Black's proposed "alternative" to be reasonable if there were additional elements added to it.

- First, there should be more specificity in the outcomes of Ms. Black's recommended alternative. Aqua PA should commit to incorporating ways to include information regarding CAP in its termination notice. Aqua should commit to incorporating modifications to call scripting and reference tools used by CSRs when engaging customers calling in regard to collections.

- Second, the communications that are adopted pursuant to Step 1 should be data-based. Decision-making should not be based on "one person's opinion" which even Ms. Black acknowledges "is anecdotal in nature."[13] When the Company was asked in this proceeding to "provide a single copy of any report, evaluation, study or other written document of any nature, within the custody or control of the Company, whether or not prepared by or for the Company, dated within the past five years, identifying, evaluating or otherwise discussing why nonpaying residential customers do not make contact with the utility when, in response to bill nonpayment, those nonpaying customers receive a request or notice to contact a utility to avoid the disconnection of service," it responded that "The Company does not have any reports, evaluations or studies."[14] Seeking to improve response rates without first inquiring why customers do not respond seems to be an inefficient, if not ineffective, commitment. Aqua PA should pursue a study of its low-income customers to inquire why nonpaying customers do not make contact with the utility when, in response to bill nonpayment, those nonpaying customers receive a request to contact the utility.

- Third, in addition to "engaging" the Aqua Assistance Collaborative, Aqua should commit to engaging the services of an adult education professional to help craft the

[12] Id.
[13] Id., at 7 – 8.
[14] OCA-VI-32 (attached as Exh. RDC-1SR).

changes in communications. The "Plain Language" aspect of the communications I recommended in my Direct Testimony is critical to the success of this initiative. This need not be an expensive consultant. In my work in Iowa with respect to utility shutoff communications, for example, we worked with the adult education specialists from the U.S. Department of Agriculture's (USDA) Cooperative Extension Services. The Extension Service has at least nine offices in Pennsylvania.

- Fourth, there should be a timeline adopted for the work proposed by Ms. Black. I recommend that the actions proposed be completed within twelve (12) months after a final order in this proceeding. This timeline should allow Aqua adequate time to engage in the data development and consultation that would be part of this process.

- Finally, there should be an element of reporting and accountability included in this process. Aqua should commit to reporting to the BCS the results of the process identified above within 18 months, or as part of the Company's next rate case, whichever comes first.

Q. PLEASE RESPOND TO MS. BLACK'S REBUTTAL TESTIMONY REGARDING THE POLICIES UNDERLYING AQUA'S CAP?

A. Ms. Black argues in her Rebuttal Testimony that an "individual base rate proceeding for one water and wastewater entity within the Commonwealth is not the forum under which regulations regarding BCS's oversight of low income water programs should be established."[15] It is not quite clear what Ms. Black is objecting to here in that neither CAUSE-PA witness Geller nor myself recommended establishing "regulations regarding BCS's oversight of low income water programs" in this proceeding.

Nonetheless, Aqua ***has*** adopted a low income water (and wastewater program) consisting of both a discount rate and an arrearage forgiveness program component. Having established that program, it is reasonable to inquire of Aqua what the Company is seeking to accomplish through those programs. Aqua has never articulated the policy basis for its

[15] Id., at 9.

low-income programs. That failure to articulate the basis for its program leaves the Company free to change the policy foundation for its program to fit its needs at a particular point in time. It also leaves the Company free from any accountability regarding whether it is, or is not, fulfilling the reasons why it has adopted the low-income program with which to begin.

While Ms. Black objects to having the Commission tell Aqua what the policy basis for its low-income CAP should be, she does not object to the specific foundations which I recommend be articulated for the Company's program. I recommend that the policy foundations for Aqua's CAP be articulated to include the following:

1. To help low-income customers maintain service, and
2. To increase the effectiveness of. . .collections while protecting the public's health and safety.

These two objectives would be applicable to the Aqua low-income programs irrespective of what objectives might apply to the low-income programs of any other utility (gas, electric, or water/wastewater) in Pennsylvania. Ms. Black did not object to either of these two objectives, nor did she offer alternative program objectives that the Company has identified for its low-income program. The only unreasonable result from this discussion is for the Company to offer a low-income CAP without knowing, or articulating, what objectives it is seeking to accomplish.

Q. PLEASE RESPOND TO MS. BLACK'S TESTIMONY REGARDING DIVIDING THE LOWEST INCOME TIER INTO TWO TIERS IN ORDER TO PROVIDE THE HIGHEST LEVEL OF ASSISTANCE TO THE LOWEST INCOME CUSTOMERS.

A. Aqua witness Black seriously mis-characterizes the approvals which Aqua PA has received for its existing program. She states that "Aqua PA proposed *and received approval for* a multi-tiered approach that reflected higher discounts that were needed for those with lower income." (emphasis added).[16] That statement is a mis-representation of the "approvals" that were provided. In its last rate case, I recommended that the income tier placing customers at or below 100% of Federal Poverty Level (FPL) into a single tier be split into two tiers: (1) at or below 50% FPL; and (2) from 50% to 100% FPL. As I noted in my Direct Testimony, and not disputed by Ms. Black, in agreeing that the single tier should remain, the Commission stated: "Aqua further submitted that the OCA and CAUSE-PA's other suggestions regarding discount structure and adjusted income tiers, which would require programmatic changes to the existing system, were unreasonable and not feasible *at this time*, because Aqua will be converting its billing system to SAP in 2023 and development of the system is in the early stages." (emphasis added). The Commission found that the recommendations "cannot be efficiently implemented *until* the Company converts its current CIS to SAP. . ." (emphasis added). The Commission finally said that the proposed changes to Aqua's bill discount "should be more fully considered at a later time." As I noted in my Direct Testimony, *now* is that "later time."

[16] Id., at 13.

The Company can hardly be said to have "received approval of" the multi-tiered discount as currently exists.

Q. DOES MS. BLACK OFFER ANY SUBSTANTIVE ARGUMENT IN OPPOSITION TO DIVIDING ITS BOTTOM INCOME TIER INTO TWO INCOME TIERS?

A. Yes. Ms. Black argues that "aspects of these proposals would increase benefits for those 50% FPL and below by decreasing benefits for some between 51 to 100% FPL."[17] She makes this summary assertion without providing any documentation of, or analysis of, how or why "some aspects" of my recommendation would "decrease benefits for some [customers] between 51 to 100% FPL." In fact, that assertion is in error. In my Direct Testimony, I compared the bill burdens that would result from the Company's existing single tier for customers at or below 100% FPL to my two-tiered approach. Ms. Black did not dispute these results. The Table below shows that my analysis found that bill burdens would decrease at each income tier below 100% FPL given the discounts I recommend. Ms. Black's statement to the contrary is inaccurate.

Table 1. Water and Wastewater Burdens given Aqua Discounts and Recommended Modifications to Aqua Discounts (OCA St. 6, at Tables 5 and 8)

	Burdens at Aqua Discounts	Burdens at Modified Aqua Discounts
<50% FPL	5.2%	2.0%
50-75% FPL	3.4%	2.5%
75 – 100% FPL	2.4%	1.8%

[17] Id., at 14.

Q. PLEASE RESPOND TO MS. BLACK'S REBUTTAL TESTIMONY REGARDING ARREARAGE FORGIVENESS?

A. Ms. Black responded to both of the proposals I made with respect to arrearage forgiveness. First, Ms. Black responded to whether arrearage forgiveness should be provided for complete payments that were not received by the due date. As I noted in my Direct Testimony, in its last rate case, Aqua had committed to making this change to its arrearage forgiveness program when the Company converted its information technology. That conversion, which had been expected to be completed in 2023, has since been "paused." Ms. Black states in her Rebuttal Testimony, however, that:

> regarding payments received after the due date, I agree that this is an important aspect of the program for us to take a close look at within the current CIS. As conversion plans are currently in a paused state, it would be appropriate for us to work with our information technology ("IT") professionals to determine if there are any options, including the potential for manual interventions using reports, to apply arrearage forgiveness benefits for customers who pay beyond their due date, thereby missing the automated posting of the arrearage forgiveness benefit.[18]

I accept Ms. Black's commitment to work with her IT professionals to develop options to make this modification happen for the arrearage forgiveness program. The commitment to make the modification was made in Aqua's last rate case, but was simply delayed when the conversion of the Company's IT system was "paused." The Company should now be directed to fulfill its prior commitment given that it is unclear when, if at all, that "pause" in the information technology conversion would end.

Second, Ms. Black argues that "acceleration of arrearage forgiveness based on income tiers" is "a more involved change" to the Company's CAP. She offers a two-part

[18] Id., at 14 – 15.

alternative to the acceleration which I propose. Part 1 would involve an "enhancement of CAP engagement." Part 2 would involve identifying and mitigating "causes of quickly accumulating balances through leak repair and/or Aqua Aid intervention. . ."[19] The "causes of accumulating balances" identified by Ms. Black include "water leaks [which] are a principal challenge to affordability, particularly for vulnerable, low-income households that are unable to afford a plumber to make often simply repairs to reduce the level of water consumption in the household."[20]

While not specifically referencing the communications process she recommended earlier in her Rebuttal Testimony, and which I discussed above, Ms. Black's Rebuttal Testimony that "we want to see customers enroll in CAP before they have grown very large arrears" appears to be consistent with that process. Moreover, while not specifically referencing the Company's leak repair and conservation kit programs to reduce usage, Ms. Black's reference to controlling usage as a way to prevent increases in arrears before they become subject to forgiveness is consistent with that program.

Contingent upon the approval of the communications process I discuss above, and expansion of the distribution of conservation kits as I discuss below, I find Ms. Black's recommendation to be a reasonable accommodation of the concerns which I raised in my Direct Testimony. In the absence of the approval of these proposals regarding CAP communication and the expansion of the distribution of water conservation kits, the recommendations I made in my Direct Testimony, which have not been substantively disputed by Ms. Black, should be adopted.

[19] Id., at 16.
[20] Id., at 15.

Q. DO YOU HAVE ANY RESPONSE TO MS. BLACK'S REBUTTAL TESTIMONY REGARDING THE INCREASED DISTRIBUTION OF CONSERVATION KITS?

A. Yes. Ms. Black does not object to increasing the number of conservation kits distributed to low-income customers. Rather, she objects to "the idea of using contractors to implement conservation kits into a customer's home."[21] She argues that through her work with Peoples, she understands "how costly it is to install even minor measures, such as carbon dioxide detectors, in customer homes."[22]

Ms. Black's objection does not address my recommendation. I never recommended that LIURP contractors be used to ***install*** the measures included in Aqua's water conservation kits. I recommended that rather than simply mailing conservation kits to low-income customers, those kits be ***distributed*** through LIURP contractors (who are in a low-income customer's home in any event). As I noted in my Direct Testimony, the conservation kits "are self-installed by the customer." The fact that the customer receives such a kit through something other than the mail does not change the nature of the kit. The kits remain packages of measures that "are self-installed by the customer."

Elsewhere in her Rebuttal Testimony, Ms. Black relies on the ability of Aqua PA to facilitate usage control as a means by which to prevent low-income households from incurring higher arrears that would ultimately be subject to forgiveness (with the ensuing cost to all ratepayers). Given that Ms. Black's concerns about how "costly it is to install even minor measures" are not applicable to my recommendation, her opposition to the

[21] Id., at 18.
[22] Id.

increased distribution of conservation kits should not be accepted. My recommendation should be adopted.

Q. DO YOU HAVE ANY FINAL RESPONSE TO MS. BLACK'S REBUTTAL TESTIMONY?

A. Ms. Black presents her objection to the conversion of Aqua PA's low-income discount to a Percentage of Income Program (PIP). She asserts that I recommended that "this change should be incorporated in any future conversion or system upgrade that would support this CAP design."[23] Irrespective of whether I believe that Aqua PA, its low-income customers, and all of its other customers, would ultimately benefit from having Aqua PA convert its low-income program to a PIP, that recommendation has not been made in this proceeding. Indeed, my Direct Testimony explicitly states: "Contrary to the last base rate case, I am *not* recommending that Aqua convert its rate discount to a percentage of income at this time, although the eventual conversion of the Aqua program to a PIP is the preferable outcome." (emphasis in original)[24] Ms. Black's discussion of her views on the merits and demerits of a PIP are premature. Her discussion of a PIP should be reserved for a proceeding in which a PIP has been presented for decision. That has not occurred in this proceeding.

[23] Id., at 21.
[24] OCA St. 6, at 30.

Part 3. Response to I&E Rebuttal Witness Zachari Walker.

Q. PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR SURREBUTTAL TESTIMONY.

A. In this section of my testimony, I respond to the Rebuttal Testimony of I&E witness Zachari Walker regarding my recommended increase to Aqua's budget for low-income conservation kits. Mr. Walker opposes my recommendation on the following grounds: (1) that I did not provide proof that the Company has been capable of utilizing its current Leak Repair Program budget nor that Aqua's proposed $32,000 increase will not be sufficient to cover the benefits provided by the Leak Repair program; (2) that increasing the budget for this program at Aqua for the purpose of augmenting the programs of other energy companies with overlapping territories unnecessarily increases customer costs at Aqua for the only utility type deemed necessary to sustain life; and (3) since this program funding is not reconciled by a rider, additional funding should not be placed into base rates beyond what Aqua has itself proposed that it can spend. None of these arguments present a reasonable basis for denying my proposal.

Q. PLEASE RESPOND TO MR. WALKER'S COMMENT ABOUT WHETHER AQUA HAS BEEN CAPABLE OF UTILIZING ITS CURRENT LEAK REPAIR PROGRAM BUDGET?

A. Whether Aqua has been "capable of utilizing its current Leak Repair Program budget" has no relationship to whether the Company should expand its distribution of conservation kits. The conservation kits are a different initiative than the Leak Repair Program is. My testimony does not address the Leak Repair Program. It proposes no expansion of the budget for the Leak Repair Program. Mr. Walker's Rebuttal Testimony

is based on his confusion of the distribution of conservation kits and the Aqua Leak Repair Program. The testimony does not serve as a basis to deny my recommendation.

Q. PLEASE RESPOND TO MR. WALKER'S COMMENT ABOUT USING THE AQUA PROGRAM TO "AUGMENT THE PROGRAMS OF OTHER ENERGY COMPANIES."

A. Mr. Walker's characterization of my proposal to distribute Aqua conservation kits through the LIURP programs of the energy utilities which serve the same territory as a recommendation to "augment the programs of other energy companies" is in error. My recommendation is not to "augment" the LIURP programs. My recommendation is to enter into a partnership with those energy utilities such that when those utilities are delivering energy usage reduction services to households known to be low-income, they can also deliver Aqua's conservation kit. As I document in my Direct Testimony, and as Mr. Walker does not acknowledge, entering into such a partnership provides benefits to Aqua in its capacity as the water utility. If the distribution of water conservation kits can be made a part of LIURP services, Aqua would know that it is reaching an additional population of low-income water customers each year. Aqua would benefit from such an additional distribution by not having to independently, and separately, income-qualify households to receive the conservation kits Aqua would further benefit because for every $100 of reduced bill experienced through the installation of such kits, Aqua would avoid the need to provide $50 in bill discounts (assuming the conservation kits low-income recipient falls into the 50% discount range). To assert, as Mr. Walker does, that my recommendation is made to somehow "augment" the delivery of LIURP services is to misunderstand LIURP, to misunderstand the conservation kits, and to misunderstand how

the reduction of water/sewer bills results in a reduction in the amount of low-income discount paid by all other ratepayers.

Q. PLEASE RESPOND TO MR. WALKER'S COMMENT ABOUT DENYING MY RECOMMENDATION BECAUSE AQUA WOULD RECOVER THE COSTS IN BASE RATES.

A. Mr. Walker opposes my recommendation on the basis that the existing cost of the water conservation kits, as proposed by Aqua, would be included in base rates. He does not explain *why* his observation makes any difference in whether my recommendation should be adopted. The expansion of the conservation kit budget that I recommend would also be included in base rates. The only difference between my recommendation and the Company's recommendation is that given the Aqua's proposed limited distribution of conservation kits through the mail, all other ratepayers will experience *higher* rates than would need to exist under that existing mail distribution process.

As I note in my Direct Testimony, Aqua states that its $22,000 budget would fund 1,000 conservation kits.[25] The cost per kit, therefore, is $22 per kit. As I note in my Direct Testimony, therefore, a reduction of bill discount of only $2/month would result in the conservation kit paying itself off in reduced rates in less than one year ($2/month x 12 months = $24 in reduced discount). However, the conservation kit would *also* deliver $24 in benefits in Year 2, and $24 in benefits in Year 3, and $24 in benefits in Year 4, and so forth, *with no further investment*. For Mr. Walker to assert that expanding the distribution of conservation kits would "unnecessarily increase[] customer costs at Aqua"

[25] Aqua St. 13, at 13.

fundamentally misunderstands not merely the immediate flow of cost reductions, but the long-term flow of cost reductions as well. And for each additional conservation kit that is distributed, both the annual and cumulative flow of reductions in bill discounts expands.

Reduced Discounts from a $4/Month Bill Savings (per conservation kit) (50% discount participant)							
Year	Cost per Kit	Cumulative Annual Reduction in Discounts					
		Year 1	Year 2	Year 3	Year 4	Year 5	Cum Total
1	$22	$24	$24	$24	$24	$24	$120
2	$22	---	$24	$24	$24	$24	$96
3	$22	---	---	$24	$24	$24	$72
4	$22	---	---	---	$24	$24	$48
5	$22	---	---	---		$24	$24

Q. DO YOU HAVE ANY FINAL RESPONSE TO MR. WALKER'S OPPOSITION TO EXPANDING THE DISTRIBUTION OF CONSERVATION KITS?

A. Yes. Mr. Walker's opposition to any expansion of the distribution of water conservation kits is contrary to the testimony of Aqua PA witness Black who notes that the reduction in water consumption is a primary way through which Aqua can control any increase in low-income arrears that would ultimately be paid by other ratepayers through the arrearage forgiveness program.[26] Ms. Black's Rebuttal Testimony is evidence of how Mr. Walker's opposition is short-sighted from a cost-control perspective. Rather than increasing costs to ratepayers, an expanded distribution of conservation assistance would help reduce those costs by reducing the costs of arrearage forgiveness.

[26] See, Aqua St. 13-R, at 15 – 16.

Q. DOES THIS COMPLETE YOUR SURREBUTTAL TESTIMONY?

A. Yes, it does.

BEFORE THE

DIRECT TESTIMONY

OF

BARBARA R. ALEXANDER

Barbara Alexander Consulting LLC

ON BEHALF OF THE

PENNSYLVANIA OFFICE OF CONSUMER ADVOCATE

OCA Statement 7

PUBLIC VERSION

Date Served: August 16, 2024

I. INTRODUCTION AND SUMMARY OF RECOMMENDATIONS

Q. PLEASE STATE YOUR NAME, ADDRESS AND OCCUPATION.

A. My name is Barbara R. Alexander. I am the sole member/owner of Barbara Alexander Consulting LLC. I am a consultant on consumer protection and customer service issues associated with utility regulation. My address is 44 Beech St, Hallowell, ME 04347. I appear in this case as a witness on behalf of the Office of Consumer Advocate (OCA).

Q. PLEASE DESCRIBE YOUR BACKGROUND AND QUALIFICATIONS.

A. I opened my consulting practice in March 1996, after nearly ten years as the Director of the Consumer Assistance Division of the Maine Public Utilities Commission. While there, I managed the resolution of informal customer complaints for electric, gas, telephone, and water utility service, and testified as an expert witness on consumer protection, customer service, and low-income issues in rate cases and other investigations before the Commission. My current consulting practice is directed to consumer protection, customer service, and low-income issues associated with both regulated utilities and retail competition markets. I have testified on behalf of national and state consumer and public advocate representatives in over 30 states and Canadian jurisdictions. I have published widely on consumer protection, service quality, universal service, and retail competition policies and programs. I have assisted the Pennsylvania OCA in its restructuring activities concerning electricity and natural gas since 1997, numerous rulemaking proceedings relating to customer service, reliability of service, and consumer protection regulations. I have assisted the OCA as an expert witness in numerous merger and sale proceedings involving Pennsylvania electric, natural gas, and water and sewer utilities, including the

application of Aqua America, Inc. to purchase the Peoples Natural Gas distribution companies in Pennsylvania in Docket Nos. A-2018-3006062 and A-2018-3006063 and Aqua Pennsylvania, Inc. and Aqua Pennsylvania Wastewater, Inc.'s (Aqua) previous base rate case filed in 2021 and resolved in the Commission's Opinion and Order on May 16, 2022 in Docket No. R-2021-3027385.

I am a graduate of the University of Michigan (1968) and the University of Maine School of Law (1976). I do not practice law at this time.

I attach my C.V. as Exhibit BA-1.

Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

A. I am filing Direct Testimony in response to the Application by Aqua to increase its rates for water and wastewater service for Pennsylvania customers. The Company proposes to increase rates to produce additional overall revenues of $126.7 million per year, an 18.9% increase in overall distribution revenue requirement. Aqua provides water distribution service to approximately 445,000 residential, commercial, and industrial customers in portions of 31 counties across Pennsylvania. Aqua also provides wastewater service to approximately 56,000 residential, commercial, and industrial customers in portions of 17 counties across Pennsylvania. My testimony addresses the consumer protection and service quality performance of Aqua, critical aspects of a public utility's justification for base rate increases. This relationship is particularly important in this case due to the magnitude and percentage of bill increases proposed by Aqua for its residential customers, as well as considering Aqua's compliance with prior Commission Orders and approved settlement commitments. I also examine Aqua's limitation on liability tariff

and its tariff language authorizing termination of water service provided by Aqua for nonpayment of wastewater service by municipal authorities pursuant to the Water Services Act.

Q. PLEASE IDENTIFY THE EXHIBITS ATTACHED TO YOUR TESTIMONY.

A. The following Exhibits are attached to my testimony:

- Exhibit BA-1: Barbara Alexander C.V.
- Exhibit BA-2: 2023 call center performance data from Aqua Response to OCA-III-1 and 2024 data from Aqua Response to OCA-XVI-18 that corrected previously provided data.
- Exhibit BA-3: Aqua Response to OCA-XVI-12 and attachment
- Exhibit BA-4: Aqua Response to OCA-XVI-1 and attachment
- Exhibit BA-5: Summary of Key Attributes of a Root Cause Analysis
- Exhibit BA-6: Aqua Response to OCA-XVI-9.
- Exhibit BA-7: Aqua Response to OCA-XVI-21.
- Exhibit BA-8: Aqua Response to OCA-III-10-B.
- Exhibit BA-9: Aqua Response to OCA-XVI-5 and attachment
- Exhibit BA-10: Proposed Tariff Language Re: Water Services Act

Q. PLEASE SUMMARIZE YOUR RECOMMENDATIONS.

A. Based on my review of Aqua's prior settlement commitments in the Aqua-Peoples Merger Settlement[1] and prior Commission orders, including the Commission's final rate

[1] A-2018-3006061, A-2018-3006062, A-2018-3006063, available at https://www.puc.pa.gov/pcdocs/1625488.pdf .

order in Aqua's 2021 base rate case,[2] as well as a review of recent service quality and customer service performance, I recommend the following as conditions that should accompany any consideration of a rate increase:

- Aqua should not be awarded additional profits or revenues for "exemplary management performance" due to its failure to properly consider customer service performance in its justification and for other failures associated with prior commitments as identified in my testimony.
- Call Center Performance: I recommend that Aqua be required to meet its 2024 call center performance as a condition of any rate increase in this proceeding. Aqua should not be allowed to deteriorate its performance once rates are increased since the prior Aqua-Peoples Merger Settlement commitment does not extend beyond 2024. Second, I recommend that Aqua focus on improving the call answering performance for customers who enter the queue to speak to a customer service representative in light of the evidence presented in my testimony that those customers experience a significantly lower level of customer services when the IVR calls are eliminated from these calculations. I recommend that Aqua commit or be directed by the Commission to achieve to a reasonable level of improvement on an annual basis as a condition of this rate increase.
- Root Cause Analysis of Customer Complaints: In light of the history of Aqua's inability or refusal to conduct a reasonable root cause analysis as required by the Aqua-Peoples Merger Settlement, I recommend that the Commission take this failure

[2] See Pa. PUC v. Aqua PA, Inc., Docket Nos. R-2021-3027385, R-2021-3027386 (Opinion and Order entered May 16, 2022), pages 364-380, available at https://www.puc.pa.gov/pcdocs/1744354.pdf

into account in denying any request for "exemplary management performance."

- Oversight of Call Center Compliance: I recommend that Aqua be required to conduct an annual audit and document its investigation and review of compliance with Pennsylvania's Chapter 56 and Chapter 14 rights and responsibilities by its call center personnel. It is not appropriate to rely on reviewing individual complaints, counseling agents, without a regular documentation of the oversight review and its findings.
- Compliance with Personal Contact Requirements: In light of my prior documentation of lack of proper training on this same issue in the last base rate case, I recommend that Aqua be required to develop and file a compliance document that properly describes the full range of consumer protections associated with attempting contact with residential customers prior to termination of service and documents as well the actual training and oversight, with reasonable reporting requirements that are reviewed by management. In addition, the Commission should consider this evidence to deny Aqua's request for higher profits due to exemplary management performance.
- Payment Processing Fees: I recommend that Aqua offer no-fee payment options to its customers and include reasonable or necessary payment processing fees in its revenue requirement, like the costs of handling payments via mail. The level of reasonable fees to include in the revenue requirement should reflect a competitive bid process to achieve the lowest cost to ratepayers for processing credit and debit card transactions. Whether or not this recommendation is adopted, Aqua should revise its termination notices, bills, and IVR script to inform the customer of the ways to pay

without fees rather than emphasizing the fee-based pay options as currently done.

- Limitation on Liability Tariff: I recommend that Aqua update its dollar amount of limitation of liability to reflect a more reasonable dollar amount to $6,000 to reflect inflation and Aqua's actual data showing that it had paid out well in excess of $2,000 where it has determined to pay out claims. Aqua should clarify that its "act of God" language does not eliminate liability for claims in which the Company is found to have been negligent or not in compliance with its Section 1501 duties under the Public Utility Code.
- Termination of Water Service for Nonpayment of Wastewater Service provided by a Municipal Authority: I recommend that Aqua adopt changes to its Tariff that authorizes termination of Aqua's water service for nonpayment of wastewater service by a municipal authority that reflect the consumer protections approved by the Commission in it recent order on Pennsylvania American Water Co.'s base rate case.

II. AQUA'S CUSTOMER SERVICE PERFORMANCE DOES NOT SUPPORT ADDITIONAL PROFITS FOR EXEMPLARY MANAGEMENT PERFORMANCE

Q. DID AQUA INCLUDE A DETAILED DISCUSSION OF ITS CUSTOMER SERVICE PERFORMANCE AND CONSUMER PROTECTION POLICIES AS PART OF ITS FILING FOR THIS RATE INCREASE?

A. No. Aqua Witness Packer provides testimony as to why he believes Aqua PA is "entitled" to an authorized return on equity "that recognizes exemplary managerial

performance."[3] As part of Mr. Packer's discussion, he addresses customer service.[4] He states that since Aqua's 2021 base rate case, Aqua PA has implemented mobile application access to customers through an ePortal, which enables customers to view their account, manage it, and access their consumption data, and that gives customers real-time updates on service outages and visibility into service orders. Additionally, he discussed that Aqua PA's external website has been updated with an interactive map-based solution for displaying disruptions to service that involves an external Geographical Information System Disruption Map that allows customers to see activity in their service area by entering an address or by using their smart phone's location.[5] Thus, Mr. Packer's testimony on "customer service" is limited to discussion of Aqua's new customer notification systems for outages.[6] He does not discuss customer call center performance. Aqua Witness Duerr's testimony with regard to "exemplary management performance" focuses strictly on operational system performance, acquisition of smaller water/wastewater systems, and various technology-related investments, but he does not discuss or identify any customer service performance indicators that reflect this "excellence" or that impacts managerial payment incentives.[7] Likewise, Mr. Duerr does not discuss customer call center performance. I note that Aqua Witness Duerr's list of "topics" includes "Management Performance Indicators," but there are no measurable "indicators" identified in this document. I acknowledge that Aqua's filing includes a

[3] Aqua St. No. 1, page 25.
[4] Ibid., page 31, lines 6-17.
[5] Ibid.
[6] Ibid.,
[7] Aqua St. No. 11. I note that Aqua Witness Duerr's list of "topics" includes "Management Performance Indicators," but there are no measurable "indicators" identified in this document.

review of its Universal Service Programs[8] and that OCA Witness Colton will address Aqua's low-income customer assistance programs in his testimony at OCA Statement 6.

Q. WHAT WERE AQUA'S COMMITMENTS IN THE AQUA-PEOPLES MERGER SETTLEMENT AS IT RELATES TO CALL CENTER PERFORMANCE?

A. In paragraph 83 of the Aqua-Peoples Merger Settlement, Aqua committed "to improve Aqua's call center performance to meet or exceed" the performance standards using "the following three metrics in each of the five calendar years (2020-2024)" following the closing of the Aqua-Peoples Merger:

> i. percent of calls answered within 30 seconds of at least 82%,
>
> ii. busy-out rate of no more than 0.25%,
>
> iii. average call abandonment rate that is no higher than 4% for 2020-2021, no higher than 3% for 2022-2023, and no higher than 2.5% for 2024.
>
> Aqua-Peoples Merger Settlement ¶ 83.

Q. HOW DOES AQUA INCLUDE CUSTOMER SERVICE PERFORMANCE IN ITS MANAGEMENT INCENTIVE PAY?

A. The only indicator relating to interactions with customers reflected in its managerial pay incentives is [**BEGIN CONFIDENTIAL]** [redacted]

[8] Aqua St. No. 13.

[redacted] [**END CONFIDENTIAL]**[9] Based on this policy, the actual performance requirements of the Aqua-Peoples Merger Settlement (¶ 83) are not reflected in this management incentive pay scheme since it appears that **[BEGIN CONFIDENTIAL]** [redacted] [redacted] **[END CONFIDENTIAL]** The Aqua-Peoples Merger Settlement (¶ 83) requires annual average performance standards in three areas that can be measured to reflect the performance provided to Pennsylvania customers.[10] Specifically, as indicated above, Aqua agreed to annual average performance in three areas: answer at least 82% of the customer calls within 30 seconds at its call center, maintain a busy-out rate of no more than 0.25%, and meet an abandonment call rate (measured by customers who hang up after entering the queue to speak to a representative) no higher than 4% for 2020-2021, no higher than 3% for 2022-2023, and no higher than 2.5% for 2024.

Q. WHAT IS YOUR RECOMMENDATION IN LIGHT OF THIS EVIDENCE THAT CUSTOMER SERVICE PERFORMANCE WAS IGNORED IN THE COMPANY'S FILING AND NOT OTHERWISE PROPERLY REFLECTED IN MANAGEMENT INCENTIVE PAYMENT POLICIES?

A. Customer call center performance was ignored by the Company in its initial filing and **[BEGIN CONFIDENTIAL]** [redacted] [redacted] **[END CONFIDENTIAL]** This lack of attention in the Company's filing and

[9] Aqua Response to OCA-XVI-25 (CONFIDENTIAL).
[10] Joint Petition for Approval of Non-Unanimous, Complete Settlement Among Most Parties**,** Docket Nos. A-2018-3006061, A-2018-3006062, and A-2018-3006063 (June 26, 2019) (Aqua Peoples Merger)

failure to include "indicators" of customer service provided to Aqua's PA's customers, leads me to conclude that Aqua's rates should not be increased to reflect the Company's alleged "exemplary management performance." In this regard, my testimony supports the recommendations of OCA Witness Aaron Rothchild, OCA Statement 3.

Q. ARE THERE ADDITIONAL REASONS TO DENY THE REQUEST FOR HIGHER PROFITS?

A. Yes. Throughout my testimony I identify several issues that support my recommendation to deny the request for higher profits and rates for Pennsylvania customers.

III. AQUA'S CUSTOMER CALL CENTER PERFORMANCE MEETS ONLY MINIMUM REQUIREMENTS AND FAILS TO MEASURE CUSTOMER EXPERIENCE.

Q. WHY IS AQUA'S CALL CENTER PERFORMANCE CRUCIAL TO PROVIDING ADEQUATE CUSTOMER SERVICE TO PENNSYLVANIA CUSTOMERS?

A. Aqua does not maintain an office in Pennsylvania in which its customers can interact with a customer service representative or conduct routine business to engage in negotiating a payment plan or discuss payment options or service quality concerns.[11] Aqua's two call centers that handle Pennsylvania customer calls are located out of state, in Illinois and North Carolina.[12] As a result, Pennsylvania customers interact with Aqua remotely via the call center or its web portal. Therefore, the quality of these remote interaction options is crucial to evaluating Aqua's customer service performance.

Q. PLEASE DESCRIBE AQUA'S CALL CENTER PERFORMANCE.

[11] Aqua Response to OCA-III-7.
[12] Aqua Response to OCA-III-6.

A. I attach Exhibit BA-2 that presents and 2023 and 2024 monthly and annual average results for each of the performance standards.[13] This Exhibit shows that Aqua has met the call center performance commitments from the Aqua-Peoples Merger Settlement. This performance is measured in a manner that does not reflect the actual customer experience since it includes all customer calls received by the IVR. As measured by the calls in which the customer selects the option to speak with a customer service representative (CSR), the annual average percentage of call answered within 30 seconds for 2023 is 67% and in 2024 to date the average is 67.2%.[14] I attach this data response as Exhibit BA-3. Aqua's measurement of call answering performance relies on including all customers who call the interactive voice response system as the denominator for this calculation. I understand that this calculation methodology is reflected in the call answering performance data included in the BCS reports and that Aqua had successfully argued in the 2021 rate case that its calculation methodology should be relied upon to measure compliance with the Aqua-Peoples Merger Settlement. However, it is important for the Commission to see the dramatic difference between the calculations in terms of actual customer experience. In my opinion, an individual customer who calls the IVR and handles an automated transaction should not be viewed as part of the calculation for those customers who call the IVR and select the option to enter the queue to speak to a customer service representative.

Q. WHAT IS YOUR RECOMMENDATION IN LIGHT OF THIS CONCERN?

A. First, I recommend that Aqua be required to meet its 2024 call center performance as a

[13] As noted on this Exhibit, the 2023 data is from Aqua Response to OCA-III-1 and the 2024 data is from Aqua Response to OCA-XVI-18.
[14] Aqua Response to OCA-XVI-12 and attachment.

condition of any rate increase in this proceeding. Aqua should not be allowed to deteriorate its performance once rates are increased since the prior Aqua-Peoples Merger Settlement commitment does not extend beyond 2024. Second, I recommend that Aqua focus on improving the call answering performance for customers who enter the queue to speak to a customer service representative in light of the evidence presented in my testimony that those customers experience a significantly lower level of customer services when the IVR calls are eliminated from these calculations. I recommend that Aqua commit or be directed by the Commission to achieve to a reasonable level of improvement on an annual basis as a condition of this rate increase.

IV. AQUA'S ANALYSIS OF CUSTOMER COMPLAINT AND COMPLIANCE DATA IS INADEQUATE AND CONTRIBUTES TO ITS LACK OF EXEMPLARY MANAGEMENT PERFORMANCE

Q. PLEASE PRESENT AQUA'S CUSTOMER COMPLAINT COMPLIANCE DATA.

A. The Commission's Bureau of Consumer Services (BCS) publishes a quarterly and annual report on customer complaints made to the BCS, payment arrangement requests (PARs) and Inquiry statistics for major water utilities, including Aqua.[15] The 2023 data indicates that Aqua had a 14% reduction in residential customer complaints compared to 2022, but a 41% increase in PARs. More importantly, BCS found that 30% of the complaints were "justified," and 30% of its PARs were "justified." These are complaints that BCS determined that the company did not comply with the Commission's regulations. In addition, BCS found that Aqua had 174 "infractions," 167 of which were due to Chapter

[15] https://www.puc.pa.gov/media/2754/ucare_2023_q4.pdf

56 potential violations.[16]

Q. PLEASE COMMENT ON THE IMPORTANCE OF A UTILITY TRACKING AND EVALUATING CUSTOMER COMPLAINTS.

A. Every Pennsylvania public utility is required to educate customers about how to register informal and formal complaints, the former resolved by the Commission's Bureau of Consumer Services because of a customer's dissatisfaction with the utility's response and the latter handled as a formal matter by the Commission because of a formal filing by the customer or group of customers. Utilities also receive "disputes" directly from customers and are obligated to investigate and respond to those issues or indications of dissatisfaction. Customer complaints typically form a hierarchy or pyramid from a large volume of disputes to a smaller group of informal complaints to the BCS and a relatively small number of formal complaints filed with the Commission. Tracking and evaluating disputes and informal or formal complaints are key to ensuring ongoing improvements in customer service because that evaluation is likely to spot the "red flag" that indicates a systemic issue or concern that requires management's attention and, in some cases, a change in policy or procedure. In addition, of course, this type of evaluation may also identify violations of the Commission's regulations.

Q. AQUA WAS REQUIRED TO TRACK ITS CUSTOMER COMPLAINTS AND CONDUCT AN ANNUAL ROOT CAUSE ANALYSIS OF ITS COMPLAINTS IN THE AQUA-PEOPLES MERGER SETTLEMENT. PLEASE COMMENT ON AQUA'S

[16] Aqua Response to OCA-III-19 (not marked as confidential) describes the Company's response to BCS "verified infractions." This response indicates that in 2023, 114 infractions findings by the BCS were "accepted and 10 were "contested," with two BCS infractions removed.

COMPLIANCE WITH THIS REQUIREMENT.

A. Aqua submitted its purported compliance with the root cause analysis in its response to OCA-XVI-1. I attach this response as Exhibit BA-4. This three-page document entitled "Aqua Root Cause Analysis 2023," states that Aqua is "currently conducting their internal root cause analysis," and that "based on our initial review we have discovered that majority of 2023 cases resulted from payment arrangements, high bill disputes and billing disputes." Also, "Aqua is still actively reviewing complaints from 2023 to identify more trends in the customer data and opportunities for improvement." This document was created on July 29, 2024, according to the "properties" of this PDF document. Therefore, it is not clear whether Aqua created any "root cause analysis" prior to the onset of this proceeding or the data request issued by the OCA. Rather, the creation date suggests that the document was created in response to the OCA's discovery requests. Aqua does not explain why an analysis of 2023 complaint data has not yet been completed by mid-year 2024. As I documented in the 2021 rate case, Aqua did not produce any "root cause analysis" of its complaint data at the time of that proceeding in 2021.[17]

Q. WHAT IS YOUR OPINION OF THIS ROOT CAUSE ANALYSIS?

A. This document correctly seeks to identify customer complaint trends and identify one or more potential solutions. However, there are significant defects in terms of a proper root cause analysis:

- The document does not identify the complaint data base used to provide the information

[17] Direct Testimony of Barbara R. Alexander, OCA St. No. 6, at 12-13. Docket No. R-2021-3027385. The Commission's Opinion and Order in this proceeding (Order Entered, May 16, 2022), pages 372-376, confirmed that Aqua's compliance with the prior Aqua-Peoples Settlement commitment in this area was not complete.

about complaint trends or why only the "termination notices" and "billing disputes" were identified as a significant complaint areas;

- The document does not reflect any effort to determine the scope and scale of similar trends that are not reflected in the complaint data base. In other words, while the document states that there were 374 complaints about Aqua's termination notices, there is no information on the total number of complaints, how Aqua categorized its complaints, or how this analysis related to BCS findings on infractions and justified complaints. The discussion of "billing complaints" does not identify the number of such complaints.
- The discussed solutions have not yet been implemented and the analysis does not identify the metrics or indicators that will be measured to determine their effectiveness.
- The document does not identify any other complaint categories. It is obviously a preliminary analysis and not a comprehensive one.

I attach a description of a proper root cause analysis as Exhibit BA-5.

Q. IS THERE OTHER EVIDENCE THAT CONFIRMS THAT AQUA DOES NOT ROUTINELY CONDUCT ROUTINE ROOT CAUSE ANALYSES OR TAKE PROACTIVE STEPS TO RESPOND TO COMPLAINT DATA?

A. Yes. Aqua has not completed a trend analysis with respect to disputes.[18] Aqua has not conducted a root cause analysis of "justified" or "verified infractions" since January 2022.[19] Aqua's root cause analysis undertaken in response to the specific requirement of the Aqua-Peoples Merger Settlement is woefully inadequate as I have identified and the

[18] Aqua Response to OCA-XVI-15.
[19] Aqua Response to OCA-XVI-20.

concept of evaluating other complaint and compliance data is not yet an integrated approach by management.

Q. WHAT IS YOUR RECOMMENDATION IN LIGHT OF THIS EVIDENCE?

A. In light of the history of Aqua's inability or refusal to conduct a reasonable root cause analysis as required by the Aqua-Peoples Merger Settlement, I recommend that the Commission take this failure into account in denying any request for "exemplary management performance."

V. AQUA'S COMPLIANCE WITH CERTAIN CONSUMER PROTECTION REGULATIONS AND BEST PRACTICES NEEDS REFORM

Q. DO YOU HAVE ANY CONCERNS WITH RESPECT TO AQUA'S COMPLIANCE WITH CHAPTER 56 AND OTHER BEST PRACTICES IN THE IMPLEMENTATION OF APPLICABLE CONSUMER PROTECTION REGULATIONS?

A. Yes. I will discuss the following issues in this section of my testimony:

- Oversight of the call center compliance with Pennsylvania consumer protection rules and policies.
- Termination of service: obligation to attempt personal contact with a responsible adult immediately prior to termination of service.

Q. HAS AQUA DOCUMENTED HOW IT ENSURES THAT THESE CALL CENTER EMPLOYEES LOCATED IN ILLINOIS AND NORTH CAROLINA AND WHO ALSO SERVE AQUA CUSTOMERS IN MANY STATES COMPLY WITH PENNSYLVANIA'S CHAPTER 56 CONSUMER PROTECTION REQUIREMENTS?

A. No. Aqua has provided the internal training documents that reflect Pennsylvania-specific

consumer protection policies and requirements;[20] however, when asked to provide any audit or investigation of compliance with Pennsylvania specific regulations and policies at its call centers since January 2022, Aqua's response merely described generically that training is done and new agents are supervised and coached and the extensive software-based materials are available to all agents.[21] I attach this response as Exhibit BA-6. No evidence of any compliance audit or investigation was provided. This high-level statement and lack of any documentation as to actual monitoring, internal reports of coaching, or any other indicia of audits or oversight is troubling. Furthermore, this concern is highlighted by the justified complaints and verified infractions described above. This approach relies on external forces to find "problems" or lack of compliance. My concern about the lack of proactive oversight and routine audits or results of any audits or compliance related investigations is particularly important due to the location of these call centers being out-of-state and the multiple states beyond Pennsylvania in which Aqua's call center provides customer service.

Q. WHAT IS YOUR RECOMMENDATION WITH RESPECT TO THE LACK OF EVIDENCE DOCUMENTING REASONABLE OVERSIGHT AND COMPLIANCE AUDITS OF AQUA'S CALL LCENTERS?

A. I recommend that Aqua be required to conduct an annual audit and document its investigation and review of compliance with Pennsylvania's Chapter 56 and Chapter 14 rights and responsibilities by its call center personnel. It is not appropriate to rely on reviewing individual complaints, counseling agents, without a regular documentation of

[20] Aqua Response to OCA-III-4 and III-8 and attachments provided the requested training documents.
[21] Aqua Response to OCA-XVI-9.

the oversight review and its findings.

Q. PLEASE DESCRIBE YOUR CONCERN WITH RESPECT TO AQUA'S OBLIGATION TO ATTEMPT PERSONAL CONTACT IMMEDIATELY PRIOR TO TERMINATION OF SERVICE.

Q. Aqua is obligated to attempt personal contact with a responsible adult immediately prior to termination of service.[22] Aqua's training materials on this topic consist of a one-page description of the obligation to attempt personal contact prior to termination of service. This page correctly states that the intent is to "confirm that they do not have a serious illness or medical condition, have made payment, or have an active PUC complaint."[23] However, this material is not comprehensive. This interaction, should it occur, is explicitly required to ensure that the customer's rights are recognized and responded to in the event of (1) allegation of payment; (2) presence of medical emergency; (3) assertion of rights pursuant to victims of domestic violence or abuse; and (4) availability of universal service programs.

Q. DOES AQUA TRACK ANY DATA CONCERNING ITS OBLIGATION TO ATTEMPT PERSONAL CONTACT PRIOR TO TERMINATION OF SERVICE OR THE RESULTS OF SUCH CONTACTS IF THEY OCCUR?

A. No. Aqua does not track any data concerning its obligation to attempt personal contact prior to termination of service of the results of such contacts if they occur. I attach Aqua's response to OCA-XVI-21 as Exhibit BA-7. When asked to provide information about the obligation to attempt personal contact such as the attempts made, contacts obtained,

[22] Chapter 56. 52 Pa. Code §§ 56.94, 56.334.
[23] Aqua Response to OCA-III-8, Attachment. The document is not paginated bu the title of the page is "termination of service."

reasons for avoiding termination based on the contact, or even when termination is avoided based on the field agent's discretion, the Company stated that none of this level of detail is tracked on termination orders. As a result, the lack of tracking data means that the Company has no idea of the impact or results of termination orders in the field or whether the customer's rights have been properly implemented. Nor has Aqua undertaken any audit or investigation to ensure that its field agents are complying with these personal contact requirements and properly engaging with knowledgeable information on Pennsylvania's customer rights and responsibilities.[24]

Q. WHAT IS YOUR RECOMMENDATION IN LIGHT OF THIS EVIDENCE?

A. In light of my prior documentation of lack of proper training on this same issue in the last base rate case, I recommend that Aqua be required to develop and file a compliance document that properly describes the full range of consumer protections associated with attempting contact with residential customers prior to termination of service and documents as well the actual training and oversight, with reasonable reporting requirements that are reviewed by management. In addition, the Commission should consider this evidence to deny Aqua's request for higher profits due to exemplary management performance.

VI. AQUA'S PAYMENT PROCESSING FEES SHOULD BE ELIMINATED

Q. DOES AQUA PROMOTE PAYMENT METHODS ON ITS WEB PORTAL, BILLS, TERMINATION NOTICES, AND IVR THAT REQUIRE THE CUSTOMER TO PAY A FEE TO A THIRD-PARTY VENDOR FOR CERTAIN PAYMENT METHODS?

A. Yes. Aqua's website and IVR conspicuously promote an option for a customer payment

[24] Aqua Response to OCA-XVI-20.

via credit/debit card or check.[25] In addition, Aqua's termination notices explicitly promote payment by this method with a separate toll-free number printed in bold that connects the customer to "our toll free number" or see payment options on the back of the notice. The back of the notice directs the customer to either mail a check to the Aqua address or call ACI Speedpay with the same toll free number that appears on the front of the notice that was identified as "our toll free number." The Speedpay options enable a customer to pay by credit or debit card and also requires the customer to pay a $1.25 "processing fee."[26] I attach this termination notice as Exhibit BA-8. This fee is charged pursuant to Aqua's contract with Speedpay and is paid directly to Speedpay. Aqua's web portal also offers payment at a variety of retail locations via Western Union for a fee that is not identified on its web portal. The only payment methods that can be done without fee is to pay by check by mail or pay via ACH out of the customer's banking account after signing up on the Aqua web portal.

Q. HOW MANY CUSTOMERS USE THIS PAYMENT METHOD VIA SPEEDPAY AND WHAT AMOUNT OF FEES ARE INCURRED?

A. During the period February through June 2024, 832,913 transactions were processed by Speedpay at a total cost to customers in fees of $91,620.43.[27] I attach this response as Exhibit BA-9. The volume of transactions that incurs these fees is growing. In June 2024, 174,581 transactions incurred the Speedpay fee of $19,203, an amount that is 25,000 less

[25] https://www.aquaamerica.com/customer-service-center/ways-to-pay-your-water-bill.aspx

[26] Aqua Response to OCA-III-10-B is the current versions of Aqua's 10-day termination notice. The first option listed under "to stop the shut off," is "Pay the total amount overdue. To pay by phone, call out toll free number at **866-269-2906** or see the back of the payment stub for all payment options." This is not an Aqua customer service number, but rather connects the customer to Speedpay.

[27] Aqua Response to OCA-XVI-5, attachment. It is not clear based on the response from Aqua how the total cost was determined based on the number of transactions listed and the cost per transaction.

than the 205,816 no-fee bill payments by check received by Aqua in that month.[28]

Q. WHAT IS THE IMPACT OF SUCH FEES ON CUSTOMERS?

A. These fees increase the payment required to maintain essential water and wastewater service. Since Aqua promotes this payment method, Aqua has a responsibility to consider the impact of this policy on those who are forced by their personal circumstances to pay a bill (current or overdue) to avoid further collection actions that may result in termination of service. Eliminating additional payment processing fees is likely to generate a higher volume of customer payments via the web portal or IVR and could also reduce the costs of handling payments and checks via the U.S Mail system which is notoriously slower than in the past. In fact, Pittsburgh Water and Sewer Authority (PWSA) recently agreed to eliminate the imposition of fees on customers if they elect to make payments via their Interactive Voice Response System and payments via their e-billing web portal.[29] In its most recent base rate case, PWSA proposed to stimulate enrollment in its e-billing web portal with a one-time $5 credit on the grounds that such enrollment would result in significant cost reductions associated with mailing bills and manually processing payments.[30] Pennsylvania American Water Company (PAWC) has eliminated its credit card fees for bill payment.[31] In a time of significant impacts on lower and fixed income consumers due to Aqua's significant rate increases in 2022 and as proposed in this rate case, my recommendation could increase Aqua's ability to recover overdue bills as well as ongoing payment of current bills. At the very least, my recommendation would not have

[28] Aqua Response to OCA-XVI-6 provided the monthly data on payment by checks.
[29] Joint Petition for Settlement, Docket Nos. R-2020-3017951et al., Section G (2) (September 30, 2020).
[30] Direct Testimony of Julie Quigley on behalf of PWSA, at 20, Docket Nos. R-2021-3024773 et al. (April 13, 2021).
[31] https://www.amwater.com/paaw/customer-service-billing/Billing-Payment-Info/

the impact of imposing an additional charge on customers to pay for regulated water and wastewater service, a charge that is promoted by and within the control of Aqua as to what to charge or whether to charge a fee at all.

Q. WHAT IS YOUR RECOMMENDATION WITH RESPECT TO THESE PAYMENT PROCESSING FEES?

A. I recommend that Aqua offer no-fee payment options to its customers and include reasonable or necessary payment processing fees in its revenue requirement, like the costs of handling payments via mail. The level of reasonable fees to include in the revenue requirement should reflect a competitive bid process to achieve the lowest cost to ratepayers for processing credit and debit card transactions. Whether or not this recommendation is adopted, Aqua should revise its termination notices, bills, and IVR script to inform the customer of the ways to pay without fees rather than emphasizing the fee-based pay options as currently done.

VII. AQUA SHOULD REVISE ITS TARIFF PROVISION ON LIMITATION OF LIABILTY

Q. PLEASE EXPLAIN AQUA'S TARIFF PROVISIONS TO LIMIT ITS LIABILITY FOR CUSTOMER DAMAGES AND INJURIES.

A. Aqua's Water and Wastewater Tariffs contain the same provision.[32] This provision limits the liability of Aqua to $2,000 "in any legal action brought against the Company for damages in connection with: (1) a service interruption or delay or cessation or lack of adequate, efficient, safe and reasonable service and facilities, and/or (2) a failure of

[32] Rules and Regulations (Sewer), Section E, Service Continuity and Liability (Original Page 40); Rules and Regulations (Water), Responsibility for Service, 5.1 Liability of Company (Original Page 61).

equipment, including, but not limited to, a break of lead in a Main, service line or Meter owned by the Company." Another section eliminates liability for "act of God or does not involve a duty of the Company, including breaks or leaks on facilities that are not owned by the Company…." The Company also disclaims liability due to lack of "actual notice, whether written or oral, that a Company facility….is in need of repair that is not proven to have been in that condition at the time of installation or that is caused by a plumber, developer, or the person or event."

Q. WHAT IS THE HISTORY OF THIS PROVISION?

A. Aqua's tariffs added this provision as a result of the 2021 base rate case, effective May 19, 2022. However, this provision may predate that addition since it was present in the 2000 version of the tariff.[33] The Company cannot determine the information on how the $2,000 limitation of liability was determined.[34] The Company stated: "The Company does not have information on how the $2,000 limitation of liability was determined in approximately the year 2000 for the Water Tariff. The provision was added to the Wastewater Tariff to match the Water Tariff."[35]

Q. WHAT IS YOUR CONCERN?

A. First, the $2,000 limit on liability appears too low in light of the actual damages that might occur to a customer due to the Company's fault or negligence. If $2,000 was deemed reasonable in the year 2000, the Consumer Price Index (CPI) Inflation Calculator[36] shows that $2,000 in January 2000 is equal to $3,722.45 in June 2024.

[33] Aqua Response to OCA-XX-1.
[34] Aqua Response to OCA-XX-2.
[35] Aqua Response to OCA-XX-2.
[36] Available at https://data.bls.gov/cgi-bin/cpicalc.pl.

Moreover, the $2,000 limitation on liability being too low is demonstrated by **[BEGIN CONFIDENTIAL]** [redacted] **[END CONFIDENTIAL]** Second, the "act of God" exemption should not be read to exclude situations in which the Company is negligent or fails to meet its Section 1501 service obligations.

Q. WHAT IS YOUR RECOMMENDATION WITH RESPECT TO THE TARIFF PROVISIONS ON LIMITATION OF LIABILITY?

A. I recommend that Aqua update its dollar amount of limitation of liability to reflect a more reasonable dollar amount to $6,000 to reflect inflation and Aqua's actual data showing that it had paid out well in excess of $2,000 where it has determined to pay out claims. Aqua should clarify that its "act of God" language does not eliminate liability for claims in which the Company is found to have been negligent or not in compliance with its

[redacted]

Section 1501 duties under the Public Utility Code.

VIII. AQUA'S TARIFF AND TERMINATIONS OF SERVICE PERFORMED IN ACCORDANCE WITH THE WATER SERVICES ACT.

Q. PLEASE DESCRIBE WHY AQUA DISCONNECTS ITS WATER CUSTOMERS FOR NONPAYMENT OF "NON-COMPANY" WASTEWATER SERVICE PROVIDERS.

A. I understand there is a Pennsylvania law referred to as the Water Services Act or Act of April 14, 2006, codified at 53 P.S. §§ 3102.501 – 3102.507, that authorizes water public utilities, like Aqua, to enter into long-term agreements with municipalities, municipal authorities, cities, boroughs, or townships (non-utility sewer providers) for shut-off services for sewer services. This law obligates water public utilities, including Aqua, to terminate water service to a customer at the request and direction of non-utility sewer provider until all overdue amounts owed to the non-utility sewer provider are paid. I understand based on advice of OCA counsel that the shut-off services that Aqua provides on behalf of non-utility sewer providers are governed by the provisions of the Water Services Act, and not by Chapter 56 of the Commission's regulations or Chapter 14 of the Public Utility Code.

Q. HAS THE COMMISSION ADDRESSED THESE TYPES OF TERMINATIONS?

A. Yes. In the Commission's final order in the recent 2023 base rate case of Pennsylvania-American Water Company[39], the Commission approved tariff language recommended by the presiding Administrative Law Judge to provide greater clarity to customers about

[39] *See Pa. PUC v. Pennsylvania-American Water Co.*, Docket Nos. R-2023-3043189, R-2023-3043190 (Opinion and Order entered July 22, 2024), *available at* https://www.puc.pa.gov/pcdocs/1838564.pdf.

these types of terminations and increase customer practice.[40] The Commission found that inclusion of the non-company wastewater utility contact information on termination notices to not be onerous and as providing greater clarity to customers.

Q. BASED ON THE COMMISSION'S DECISION ABOVE, DO YOU HAVE A RECOMMENDATION FOR AQUA'S TARIFF IN THIS CASE?

A. Yes. The issues and rationale raised, discussed and ultimately addressed by the Commission in the PAWC 2023 rate case equally apply to Aqua's tariff and its termination of service to water customers for non-payment of sewer services rendered by a non-company sewer provider. Customers should be entitled to the same protections as afforded to them in the PAWC tariff. Accordingly, Exhibit BA-10 contains the relevant pages of Aqua's water tariff and it contains the OCA's proposed revisions to the tariff utilizing language consistent with the language that that the Commission approved in the 2023 PAWC rate case order.

Q. DOES THIS CONCLUDE YOUR TESTIMONY AT THIS TIME?

A. Yes.

[40] Ibid. at pages 377-379.

SET XV INTERROGATORIES

OCA-XVI-1 Provide the root cause analysis referenced in response to OCA-III-20 for "all Aqua PA customer complaints."

RESPONSE

Please see OCA-XVI-1 – Attachment for the 2023 Aqua Root Cause Analysis.

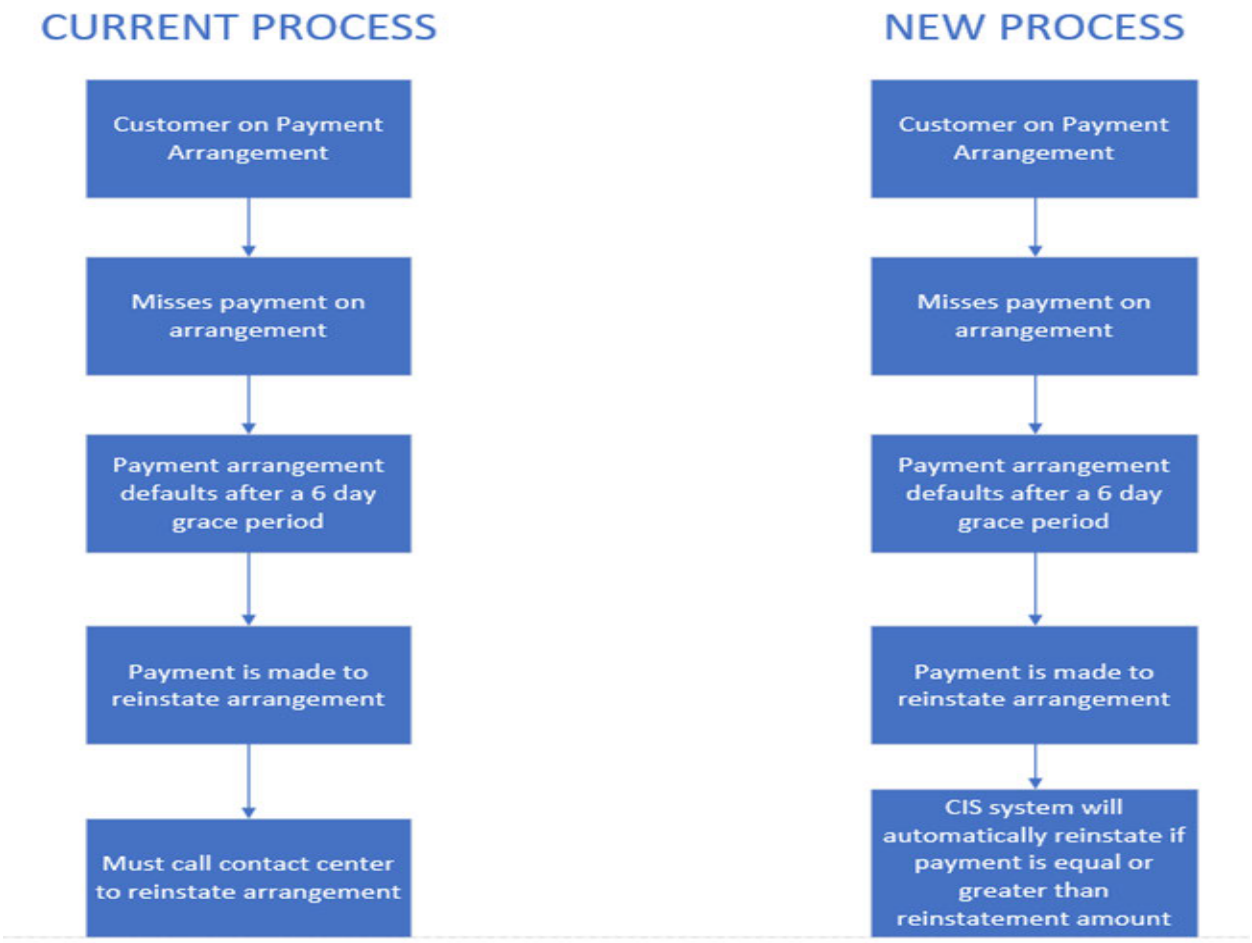
Aqua Root Cause Analysis 2023

Aqua is currently conducting their internal root cause analysis. Based off our initial review we have discovered that majority of the 2023 cases resulted from payment arrangements, high bill disputes and billing disputes.

Termination Notices:

In 2023 one of our higher complaints were in termination notices at 374 complaints. Our root cause analysis determined a high number of customers that we are making payments to satisfy their reinstatement amount, but it still led to them receiving a shut off notice. As a short-term solution to this Aqua has implemented a weekly report to reinstatement any payment arrangement that has received a payment equal to or greater than the reinstatement amount.

A long-term solution Aqua is working on a change to their CIS system that will reinstatement payment arrangements automatically after a payment is received to avoid unnecessary terminations. This change is scheduled to implemented by August 2024.



In our analysis, majority of the termination notice complaints came from low-income residential customers located in the below cities across PA.

City	Termination Notice Count
SHARON	29
UPPER DARBY	28
FARRELL	22
MOUNT CARMEL	19
SHAMOKIN	16
DARBY	14
COAL TOWNSHIP	14
COLLINGDALE	8

Through deeper research, most of the customers contact the PUC after multiple defaults on payment arrangements and are looking for an additional PUC payment arrangement.

Billing Disputes: Majority of Aqua billing disputes are due to a high bill complaint, especially after a cancel and rebill or back billing. In the below analysis broken down by city, our highest number of complaints are due to an area in Gilbertsville that has an unmetered fire service that were never moved in when the water service started, this required those customers to be back billed for this service.

City	Billing Dispute Count
GILBERTSVILLE	18
YARDLEY	7
SHARON	7
WEST CHESTER	7
HERMITAGE	6
COLLINGDALE	6

This has identified opportunity to improve communication to customers when a back billing occurs for a customer. Will continue to work through improvements to drive down theses type of complaints in 2023 and recommendations to approve.

17 of our complaints in 2023 were for sewer only

Aqua is still actively reviewing complaints from 2023 to identify more trends in the customer data and opportunities for improvement.

Exhibit BA-5

A SUMMARY OF A PROPER ROOT CAUSE ANALYSIS

Barbara R. Alexander
Barbara Alexander Consulting LLC

A root cause analysis is a fact-based exercise in which the underlying cause or causes of an undesirable outcome(s) is identified and specific remedial steps are identified and determined to result in systematically correcting or improving the previously identified undesirable result. A list of customer complaints by category is not a root cause analysis.

While there may be differences in approach about what a root cause analysis entails, the following summary by the American Society for Quality (ASQ) provides a helpful overview:

> A root cause is defined as a factor that caused a nonconformance and should be permanently eliminated through process improvement. The root cause is the core issue—the highest-level cause—that sets in motion the entire cause-and-effect reaction that ultimately leads to the problem(s).

A "Root Cause Analysis" is defined as a collective term that describes a wide range of approaches, tools, and techniques used to uncover causes of problems. Some RCA approaches are geared more toward identifying true root causes than others, some are more general problem-solving techniques, and others simply offer support for the core activity of root cause analysis.

There are many methodologies, approaches, and techniques for conducting root cause analysis, including:

1. **Events and causal factor analysis:** Widely used for major, single-event problems, such as a refinery explosion, this process uses evidence gathered quickly and methodically to establish a timeline for the activities leading up to the accident. Once the timeline has been established, the causal and contributing factors can be identified.
2. **Change analysis:** This approach is applicable to situations where a system's performance has shifted significantly. It explores changes made in people, equipment, information, and more that may have contributed to the change in performance.
3. **Barrier analysis:** This technique focuses on what controls are in place in the process to either prevent or detect a problem, and which might have failed.
4. **Management oversight and risk tree analysis:** One aspect of this approach is the use of a tree diagram to look at what occurred and why it might have occurred.
5. **Kepner-Tregoe Problem Solving and Decision Making:** This model provides four distinct phases for resolving problems:
    a) Situation analysis
    b) Problem analysis
    c) Solution analysis

d) Potential problem analysis[43]

According to the publications developed by the American Society for Quality, and other comparable publications[44], a proper analysis of any "root cause" requires the identification of "symptoms," which are not actual causes but signs of existing problems, and first level causes," which are the causes that directly lead to a problem; and "higher level causes," which are links in the chain of cause-and-effect relationships that ultimately create the problem.[45]

---

43 See American Society for Quality website for more general information: https://asq.org/quality-resources/root-cause-analysis

44 There is an extensive body of literature used in the medical community to conduct root cause analysis and develop plans to prevent adverse events. See, e.g., https://www.cms.gov/medicare/provider-enrollment-and-certification/qapi/downloads/guidanceforrca.pdf

45 See American Society for Quality website for more general information: https://asq.org/quality-resources/root-cause-analysis

OFFICE OF CONSUMER ADVOCATE

SET XV INTERROGATORIES

OCA-XVI-9 Provide any audit or evaluation of compliance with Pennsylvania specific regulatory requirements for the Aqua call centers conducted since January 2022.

RESPONSE The Company has ongoing call center training for staff and all Customer Service Representatives ("CSRs') are trained on the PA regulations. See the Company's response to OCA-XVI-10 for the initial training conducted for CSRs. In addition to initial training, CSR calls are monitored and individual CSRs are reviewed and coached on an ongoing basis. For specific regulations, many compliance related matters are built into the billing system and are contained in the Company's Knowledge Base System.

SET XV INTERROGATORIES

OCA-XVI-21 Please provide the following monthly information with respect to attempts by Aqua's field representatives to obtain personal contact with a responsible adult at the premises immediately prior to termination of service for the period January 2022 through the current month:

a. Attempts to achieve personal contact;
b. Personal contact achieved with responsible adult;
c. Personal contact but not with responsible adult;
d. Termination avoided after contact achieved (and reasons if such data is available);
e. Termination implemented after contact achieved;
f. Termination avoided based on discretion of field representative based on conditions encountered at the premises.

RESPONSE

This level of detail is not tracked on termination orders. Field employees are trained to attempt personal contact prior to any termination of service and it is expected to happen on every termination.

10 Day Shut Off Notice

COLLECTION DEPARTMENT OFFICE HOURS ARE 8:00 AM - 5:00 PM WEEKDAYS

Date of Notice	Shut Off Date	Total Amount Due
June 04, 2024	**June 18, 2024**	**$ 198.87**

Your bill for $ 198.87 is overdue. Because your bill is overdue, we will SHUT OFF service to:
[redacted] **EVANS AVE after 8:00 AM on or after June 18, 2024.**
Aqua may act on this notice for up to 60 days.

To stop the shut off, you must do the following immediately:

1. Pay the total amount overdue. To pay by phone, call our toll free number at **866.269.2906** or see the back of the payment stub for all payment options.
2. Contact Aqua during normal business hours at **877.987.2782** (Select Collections) to let us know that you made a payment, to make a payment arrangement, or to dispute the overdue bill. You can also contact Aqua at our address above.
3. Call **877.987.2782** during normal business hours (Select Collections) if you or someone in your home has a serious illness or a medical condition.

Important Notice: Payments will not be accepted by Aqua representatives visiting the property. To avoid service termination due to unpaid bill(s), you must make payments at an authorized payment location. For the nearest location, please call 877.987.2782 (Select Collections). If we shut off your service, you may have to pay the following charges to have service restored:

Overdue amount:	$ 198.87
Reconnect Fee:	50.00
Total if we shut off your service:	$ 248.87

If your service is shut off for non-payment, after making the required payment you must contact Aqua at 877-987-2782 and schedule to have your service reconnected. Your service will be reconnected in accordance with your state approved utility regulations. In most cases service will not be restored until the next business day after your required payment amount has been confirmed.

- Comunicarse con Aqua al 877.987.2782 (elija "Bobranzas" o "Collectiones" en inglés para hacernos saber que realizó el, pago, o para disputar el balance altrasado. También puede communicarse con Aqua a la dirección que aparece arriba.
- Attencion! Este es en mensaje muy importante. Si usted no lo entiende, favor de llama a 877.987.2782.

If you have questions or need more information, please call us. If you are not satisfied after you talk to us, you may file a complaint with the Pennsylvania Public Utility Commission by calling 1(800) 692-7380 toll free, or by writing to P.O. Box 3265, Harrisburg, PA 17105-3265. The Pennsylvania Public Utility Commission will delay the shut off if you file the complaint before the shut off date.

IMPORTANT TO KNOW - BEFORE WE SHUT OFF YOUR UTILITY SERVICE

- **If we shut off your service during the winter months (between Dec. 1 – Mar. 31)** we will restore your service within 24 hours of your meeting all requirements/conditions to have service reconnected. Where street digging is required it may take up 7 to days.
- If you are a victim of domestic violence and have a Protection From Abuse Order or other court order that shows clear evidence of domestic violence, there are special protections available. **Call us immediately at 877.987.2782.** (You will be required to provide us with a copy of the order.)
- You may be eligible for a payment agreement or special assistance programs. Call **877.987.2782 right away** to provide us with household income and occupant information. Documentation of your income may be required, such as pay stubs or tax documents.
- If your landlord pays your utility bill: You have certain legal protections. Please call us at 877.987.2782.
- If you have trouble understanding or speaking English or have a disability please call us at 877.987.2782 for free interpretation.
- If your service is shut off, you may be required to pay more than the amount listed on the front of this notice to have your service turned back on. You may have to pay any additional bills that have become past due.
- All adult occupants of the premise whose name appears on the mortgage, deed, or lease are considered "customers" and are responsible for payment of this bill.
- If service is shut off, ANY adult occupant who has been living at the premise may have to pay all or portions of this bill to have service restored.
- If your service is shut off, you must contact us after your payment has been made to be sure you have met all conditions to have the service turned back on and to arrange access to your premise.
- After all conditions have been met to have the service turned back on, it may take up to 7 days to have your service restored. Please contact us to discuss the details.
- If you need water to heat your property, please contact Aqua immediately at 877.987.2782 (and choose Collections) so we can arrange a service visit to verify that need. The company will act in accordance with the public utility laws with respect to water service shut offs.

MEDICAL EMERGENCY NOTICE

Let us know if someone living in your home is seriously ill or has a medical condition. **WE WILL NOT SHUT OFF YOUR SERVICE provided you:**

A. Provide a medical certification by a licensed physician, nurse practitioner or physician's assistant. Medical certifications must be in writing and signed by your physician, nurse practitioner or physician's assistant by fax, email or mail within three days.

AND

B. Make some equitable arrangements to pay your current bills for service.

Call **Aqua at 877-987-2782** to let us know about your medical emergency.

FAX: 610.520.2168 or toll-free at 866.780.8301

OFFICE OF CONSUMER ADVOCATE

SET XV INTERROGATORIES

OCA-XVI-5 With regard to the option to pay by credit card or check via the Speedpay option presented on Aqua's customer bills and web portal, please provide the following information for each month from January 2022 through the current month:

a. The number of residential customers that paid Aqua bills or bill amounts via Speedpay.
b. The dollar amount of payments to Speedpay.
c. The dollar amount of fees charged to Aqua's residential customers for using the Speedpay system.
d. The dollar amount of fees paid to Speedpay by Aqua.
e. The revenue requirement associated with the Speedpay contract included in this rate case proceeding and the identification of where such costs and/or revenues appear in this filing.

RESPONSE

a. Please see OCA-XVI-5 – Attachment for the number of residential customers by month that paid Aqua bills or bill amounts via Speedpay.
b. Please see OCA-XVI-5 – Attachment for the dollar amount of payments by month via Speedpay.
c. Aqua PA does not charge fees to customers for using the Speedpay system. Speedpay charges customers a processing fee of $1.95 per payment. However, customers using Aqua ePortal that are registered users making ACH payments are not charged the $1.95 processing fee.
d-e. The Company began using Speedway as our portal payment vendor in February 2024. The fees in the table below encompass the fees charged to the Company in 2024.

GOVERNING THE DISTRIBUTION AND SALE OF

WATER SERVICE

IN PORTIONS OF

ADAMS, BERKS, BRADFORD, BUCKS, CARBON, CHESTER, CLARION, CLEARFIELD, COLUMBIA, CRAWFORD, CUMBERLAND, DELAWARE, FOREST, JUNIATA, LACKAWANNA, LAWRENCE, LEHIGH, LUZERNE, MERCER, MCKEAN, MONROE, MONTGOMERY, NORTHHAMPTON, NORTHUMBERLAND, PIKE, SCHUYLKILL, SUSQUEHANNA, SNYDER, VENANGO, WARREN, WAYNE, AND WYOMING COUNTIES

IN THE COMMONWEALTH OF PENNSYLVANIA

ISSUED: May 23, 2024

EFFECTIVE: July 22, 2024

By:
Marc Lucca, President
Aqua Pennsylvania, Inc.
762 Lancaster Avenue
Bryn Mawr, Pennsylvania 19010

NOTICE

THIS TARIFF PROPOSES INCREASES IN RATES AND CHANGES IN RULES AND REGULATIONS OF SERVICE.

TERMINATION OF SERVICE

56. By Company: Service may be terminated for any of the following reasons which shall constitute a violation of the Rules and Regulations of the Company:

a. For the use of water for any other Property or purpose other than that described in the application.

b. For willful waste of water through improper or imperfect pipes, fixtures or otherwise, including failure to promptly repair a leak on the Customer Service Line.

c. For molesting any service pipe, Meter, Meter interface unit, Curb Stop or seal, or any other appliance of the Company.

d. For non-payment of any charge accruing under the Company's tariff or Rules and Regulations.

e. For refusal of reasonable access to Property for purposes of inspecting or for reading, caring for, removing, or installing Meters, including remote and automatic Meters and the associated wiring and connections to the Customer's telephone line.

f. For making, or refusing to sever, any cross-connection between a pipe or fixture carrying water furnished by the Company, and a pipe or fixture carrying water or other substances from any other source.

g. For failing to comply with the inspection, installation, maintenance or testing requirements of the Company under its back-flow prevention and cross-connection control program instituted for the purpose of protecting the public water supply.

h. For vacancy of a Premises.

i. For failure to make payments under the Company's Water System Connection Loan Program, as described in Rule 66.

j. For violation of any other Rules or Regulations of the Company.

k. For violation of Pennsylvania law (Criminal Code 18 PA C.S.A. Section 3926) which prohibits the activation of a public utility service line without a measuring device (water Meter).

l. For any other reasons set forth in the Commission's regulations.

m. In accordance with the terms of any agreement with a non-Company wastewater provider for non-payment of wastewater service when due.

Service termination will be performed in the manner prescribed by the Commission's regulations.

56A. In addition, service may be terminated for nonpayment of a sewer bill upon proper request of the municipality or municipal authority and receipt of a fifty dollar ($50.00) fee per account. The terms and conditions for termination of water for non-payment of sewer are found in Attachment A and conform to the Water Services Act 53 P.S. §3102.201 et seq. **[See attachment for OCA proposed revisions to this paragraph.]**

56B. If you are a victim of domestic violence and have a Protection From Abuse Order or other court order that shows clear evidence of domestic violence, there are special protections available.

56A. In addition, service may be terminated for nonpayment of a sewer bill upon proper request of the municipality or municipal authority **("municipal sewer provider")** and receipt of a fifty dollar ($50.00) fee per account. The terms and conditions for termination of water for non-payment of sewer are found in Attachment A and conform to the Water Services Act 53 P.S. §3102.201 et seq.**, which governs the relationship between Aqua and the municipal sewer provider.**

The Company may terminate a customer's water service due to the customer's non-payment of charges owed to a municipal sewer provider, provided that: (1) the Company has an effective agreement with the a municipal sewer provider pursuant to the Water Services Act or Act of April 14, 2006, codified at 53 P.S. §§ 3102.501 – 3102.507; and (2) the customer received prior notice from the municipal sewer provider of the past due amounts owed to the municipal sewer provider.

Following the issuance of termination notice by the municipal sewer provider, the Company will not terminate the customer's water service upon notification to the Company by the municipal sewer provider that the customer does either of the following: (1) disputes the termination for non-payment; or (2) produces a medical certification.

Upon termination, the Company will post the termination notice at the customer's premises. The Company's termination notice shall provide the following information in conspicuous format and plain language: (1) a statement that Aqua terminated the customer's water service due to the customer's non-payment of municipal sewer provider charges; (2) a statement that the termination of service is not the result of customer's non-payment of water charges owed to Aqua; (3) the name and contact number of the municipal sewer provider; (4) the contact information for the Company; and (5) a citation to Section 56A of Aqua's Water Tariff and the weblink for accessing the Company's tariff webpage.

RULES AND REGULATIONS

TERMINATION OF SERVICE (cont'd)

57. Turn-Off Without Authority: The Customer shall not turn the water on or off at any corporation stop or Curb Stop, or disconnect or remove the Meter, or permit its disconnection or removal, without the consent of the Company.

58. Due to Emergency: As necessity may arise in case of breakdown, emergency, or for any other unavoidable cause, the Company shall have the right to suspend services temporarily, in order to make necessary repairs, connections, etc.; but, the Company will use all reasonable and practical measures to notify the Customer of such discontinuance of service. The Company shall not be liable for any damage or inconvenience suffered by the Customer or any claim against it at any time for interruption in service, or for any causes beyond its control. When a supply of water is to be temporarily cut off, notice will be given, when practicable, to all Customers affected by the shutting off, stating the probable duration of the interruption of service, and also the purpose for which the shut-off is made.

59. Restoration of Service: After termination of service it will not be reconnected until all amounts due to the Company have been paid plus the cost of a fifty dollar ($50.00) turn-on charge prior to service reconnection (with the exception of the Masthope Division) subject to the provisions of Section 1407(c)(2) of the Public Utility Code, 66 Pa.C.S. § 1407(c)(2) (regarding payment to restore service) unless otherwise directed by the Commission.

ATTACHMENT A

WATER SERVICE TERMINATION

TERMS AND CONDITIONS

NOW, THEREFORE, in consideration of the terms and conditions herein stated, the parties hereto, intending to be legally bound, agree as follows:

1. In order to initiate water service termination to a customer of the Water Company, by reason of that customer's delinquent sewer charges payable to the Authority, an authorized and responsible officer of the Authority shall cause to be delivered to the Water Company a written request for such termination, together with the following information:

    a. The name and address of the sewer service customer; if premises is tenant occupied, the name and address of the landlord and the name and address of the tenant;

    b. The address and lot number of the premises for which water service termination is sought;

    c. A statement that the sewer charges for such premises remain unpaid for a period of at least thirty days from the due date thereof;

    d. A statement setting forth: (i) that the Authority has fulfilled all applicable notice and procedural steps required of it by law, statute, regulations ordinances and other authorities, including, without limitation those mandated by the Water Services Act (53 P.S. §3102.501 et seq) and (ii) that the Authority has not received written or other information the effect of which would be to make water service termination unlawful.

2. Upon receipt of the information specified under Paragraph 1 hereof, the Water Company will promptly initiate water service termination procedures, in accordance with

the procedures outlined in this Agreement, unless it should decline to do so, in which event the Water Company shall notify the Authority of the reasons therefore.

3. The Water Company may decline to initiate water service termination in the following instances:

a. The involved premises is not receiving water service from the Water Company;

b. The Water Company's customer at the involved premises is a different person or entity than the Authority's sewer customer;

c. The water service to be terminated will adversely affect service to other Water Company customers, other premises served by the Water Company or the Water Company's delivery system;

d. The Water Company has received verbal or written notice prohibiting or requiring deferral of water service termination;

e. The nature of the facilities at the involved premises makes service termination impracticable;

f. The Water Company receives advice from its legal counsel that water service should not be terminated under the particular circumstances;

g. The termination of water service under the particular circumstances would be a violation of law or of applicable regulations;

h. Other reasons mutually agreed between the Authority and the Water Company.

In the event that the Water Company so declines to initiate water service termination procedures for any reason, the Water Company shall, upon request from the Authority, supply the Authority with a written statement of the reasons why the Water Company has declined to terminate water service at the particular premises. If the Authority should desire to contest the reasons offered by the Water Company, then such dispute shall be

resolved pursuant to the provisions of the Public Utility Code and/or the regulations of the Commission.

4. Under circumstances where the Authority initiates a request for water service termination procedures, it is understood and agreed that the Authority will comply with all applicable notice and procedural requirements relative to water service termination contained in the Water Services Act, the Utility Services Tenants Rights Act, the Pennsylvania Public Utility Code, the rules and regulations of the Commission, and the Water Company's rules and regulations contained in its tariff on file with the Commission

5. Exclusive of contact between the Water Company and its customer required to effect termination, it is understood that the Authority shall conduct all interaction and negotiations with the involved sewer customer, including without limitation, negotiations for payment of arrearages and all contact regarding pre-termination through post-termination procedures for dispute resolution. In addition, the Authority shall prepare and deliver to the Water Company a copy of the notice to the involved sewer customer, notifying such customer that inquiries as to the arrearage or any dispute relative thereto should be directed to a named representative or department of the Authority at a given telephone number and that no contact should be made to the Water Company. Furthermore, the Authority shall, at the request of the Water Company, cause an authorized representative to be present at the involved premises at the time of water service termination and at any time when the premises must be visited to effectuate required notices or perform service termination procedures. Such representative of the Authority will be the participant exclusively in any discussions with the involved customer. The final decision whether to terminate water service shall be made by the Authority representative in attendance, and the Water Company employee may rely exclusively upon that decision.

6. Concurrent with the delivery of the written request required under Paragraph 1 hereof, the Authority shall pay to the Water Company the fee as set forth in the Water Company's Tariff (see Termination of Service), as amended from time to time, per involved premises, which shall not be refundable unless the Water Company should decline to initiate water service termination. It is understood that the fee described above shall be automatically increased to coincide with the charges for shutting off water service contained in the Company's tariff as on file with and approved by the Commission. Except as otherwise provided herein, said sum shall constitute payment in full to the Water Company for its services hereunder, including conducting service termination and restoration visits to the involved premises and completing water service termination procedures. In addition, the Authority shall pay to the Water Company the fee as set forth in Rule 56 in Aqua's Water Tariff on file with the Commission, as amended from time to time, for each visit beyond the two visits per premises, which are required to effectuate water service termination at a particular premises. Furthermore, in the event that more than one hour is required to perform either the termination or restoration of water service to any involved premises, including travel time and time actually spent at the premises, the Authority shall pay the Water Company's actual costs of such visit, including labor, material, transportation and other fixed charges to the extent that such actual costs exceed the fee as set forth Rule 56 in Aqua's Water Tariff on file with the Commission, unless such additional costs are the result of error or lack of effort on the part of the Water Company or Water Company personnel.

7. As to each premises for which water service is terminated hereunder, the Authority shall pay to the Water Company the estimated loss of water revenues resulting therefrom which shall be calculated in the same manner that the Water Company uses in the ordinary course of business to calculate estimated monthly water bills. The estimated monthly consumption per premises shall be applied to the Water Company's tariff rates in effect

during the estimation period, including all minimum charges and surcharges. The total monthly estimated bill, so calculated, will be divided by 30 to determine the estimated daily rate. Estimated lost revenues shall be equal to the product of the estimated daily rate and the number of days water service was actually terminated at the involved premises. Estimated lost revenues shall be billed by the Water Company to the Authority, periodically, and at approximately the same time as the Water Company would have billed the involved customer if water service had not been terminated. The Authority shall pay each such bill within 30 days of receipt thereof. Upon request the Water Company will provide to the Authority the estimated daily rate of lost revenue for specific premises for which service termination is contemplated. The Authority's liability for the estimated loss of water revenues resulting from such shut off shall terminate when the Authority authorizes the Water Company to restore water service or when water service is actually restored, whichever is earlier.

8. The Authority agrees to hold the Water Company harmless from any liability that the Water Company may incur in performing or attempting to perform water service termination and the procedures therefore in accordance with the terms of this Agreement. The Authority further agrees that it will, at its sole expense, legally defend and prosecute any action arising out of such performance or attempted performance, brought against the Authority, the Water Company or their respective agents or employees as a result of which the Water Company may incur any such liability. The Water Company reserves the right to retain its own counsel and participate independently in such proceedings.

9. If a dispute shall arise between the Authority and the Water Company regarding the cost of the Water Company's services hereunder, the amount of revenues lost, or the interpretation of the provisions of this or any subsequent agreement between the Water Company and the Authority concerning payment for such services and lost revenues, such

dispute shall be submitted by either party to the Commission, pursuant to the Water Services Act (53 P.S. §3102.505(d)).

10. This Agreement shall continue until terminated by either party on not less than 30 days written notice to the other party.

11. The Water Company complies with the Commission's heat-related moratorium that runs from December 1 to April 1. The Authority may request that the Water Company discontinue water service for non-payment of sewer charges for non-heat related accounts between December 1 to April 1.

v. Aqua Pennsylvania, Inc. and Aqua Pennsylvania Wastewater, Inc.	

SUPPLEMENTAL DIRECT TESTIMONY

OF

BARBARA R. ALEXANDER

Barbara Alexander Consulting LLC

ON BEHALF OF THE

PENNSYLVANIA OFFICE OF CONSUMER ADVOCATE

OCA Statement 7 Supp

PUBLIC VERSION

September 12, 2024

Q. PLEASE STATE YOUR NAME, ADDRESS AND OCCUPATION.

A. My name is Barbara R. Alexander. I am the sole member/owner of Barbara Alexander Consulting LLC. I am a consultant on consumer protection and customer service issues associated with utility regulation. My address is 44 Beech St, Hallowell, ME 04347. I appear in this case as a witness on behalf of the Office of Consumer Advocate (OCA).

Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

A. I am submitting Supplemental Direct Testimony with respect to the public testimony of Enrico Guiliante at the hearing held in Landenberg, PA on August 8, 2024, at 1:40 p.m.[1] Mr. Guiliante testified he lives on a fixed income and in testifying in opposition to Aqua's proposed rate increase, he stated:

> In addition to this current bill, my wife and I received a notice from Aqua PA stating, quote, this is a quote, we are writing to provide you with an opportunity to accept protection against the cost of covered repairs as these lines break down. The exterior water service and sewer septic lines on your property are primarily affected by aging and normal wear and tear. If these lines require replacement, it may cost you thousands of dollars. So of course, not knowing if the $35 million in grants and low interest loan capital Aqua PA has acquired or the additional $85 million in pending requested grants helps to cover the cost of the water sewer septic lines in my community that may or may not be repaired and/or replaced. According to the almost $1 billion project they have initiated, we bought the insurance coverage at almost a hundred dollars a year.[2]

Q. AS A RESULT OF THIS TESTIMONY, DID YOU EXPLORE HOW AQUA COMMUNICATES, MARKETS, OR SUPPORTS COMMUNICATIONS FOR NON-BASIC SERVICES?

A. Yes. I had previously sought to determine if Aqua engaged in billing for non-basic services on its Aqua customer bill and the Company stated that it did not bill for such services.[3]

[1] Transcript, pages 524-536.
[2] Ibid, page 526, lines 11-20 and page 527, lines 1-4.
[3] Aqua Response to OCA-XVI-22, 23, and 24.

However, in light of Mr. Guiliante's testimony about receiving marketing materials from Aqua for the sale of non-basic services, I explored this matter further.

Q. DOES AQUA USE ITS CALL CENTER TO MARKET HOMESERVE NON-BASIC SERVICES TO ITS CUSTOMERS?

A. Yes. When a customer calls for new service the Aqua customer service representative promotes HomeServe non-basic services "to help protect them against costly repair bills."[4] An indication of interest results in the transfer of the customer by the Aqua representative to HomeServe.

Q. DOES AQUA MARKET HOMESERVE'S NON-BASIC PRODUCTS AND SERVICES WITH ITS CORPORATE NAME AND LOGO?

A. Yes. Aqua's name and logo is used by HomeServe to market its products and services to Aqua's customers.[5] I attach a sample communication authorized by Aqua pursuant to its contractual arrangement with HomeServe as Exhibit BA-11.[6] This marketing communication reflects both the Aqua and HomeServe logos. It is reasonable for any recipient, similar to Mr. Guiliante's assumption, to assume that this communication was issued by Aqua, his public utility. There are many aspects of this communication that deserve further investigation and raise serious consumer protection concerns. For example:

- The envelope states that the communication is from "Aqua" as the only identification on the envelope for the source of the communication. The envelope states, "Important information enclosed."
- The communication uses the customer's name and states, "Many homeowners are not

[4] Aqua Response to OCA-XXIV-1.
[5] Aqua states that its customer name and addresses are not provided to HomeServe but that it does provide a "general listing of zip codes which covers the Aqua service territory." Aqua Response to OCA-XXIV-4.
[6] Aqua Response to OCA-XXIV-2, Attachment 1.

aware that the repairs to the exterior sewer/septic lines that runs on their property may be the responsibility of the homeowner." And, "Your property at [customer's address] is not covered with optional Exterior Sewer/Septic Line Plus Coverage from HomeServe." The envelope and manner of addressing the customer's name and address suggests that the entire communication has been issued by Aqua.

- However, the "Important Questions and Answers" in fine print states an opinion about whether the customer's homeowner's insurance covers "this" by stating, "Most basic homeowners insurance policies do not cover repair or replacement to normal wear and tear of the exterior sewer/septic line." The clear intent of this communication is to suggest that the customer may not have homeowner's insurance, may not have warranty coverage, and would be left without any recourse unless he/she purchases the HomeServe plan at $6.24/month. These marketing messages raise significant consumer protection concerns that should be further evaluated in light of Aqua's endorsement and approval and suggested support for these non-basic services.
- Aqua's endorsement and imprimatur for these communications does not inform the customer that optional protection or insurance programs might be available from competitors of HomeServe. As a result, it would be natural and intended that the customer assumes that this program is related to Aqua's position as a regulated public utility.
- There is a fine print statement in this marketing communication that HomeServe is an "independent company" and that Aqua "reviewed companies that provide home protection solutions," and that HomeServe was selected in 2003 "to offer Aqua customers option, yet affordable, programs that provide protection against costly and

inconvenient repairs to systems throughout their home and properties."

Q. PLEASE EXPLAIN THE REFERENCE TO "2003" IN THE MARKETING MATERIALS ISSUED BY AQUA AND HOMESERVE.

A. This date refers to a contract that I attach as Exhibit BA-12 Confidential.[7] This contract is an agreement between **BEGIN CONFIDENTIAL** [redacted] **END CONFIDENTIAL.** I presume this entity is a former corporate identity of Aqua Pennsylvania, Inc. or its parent, Essential Utilities. The agreement sets forth the terms for the exchange of **BEGIN CONFIDENTIAL** [redacted] **END CONFIDENTIAL.** Finally, the agreement sets forth the revenues that Home Service will provide for these services. According to Aqua, it is compensated $0.40 is paid by HomeServe to Aqua on each attempted call transfer[9] and "the regulatory offset fees paid by HomeServe are subsequently credited back to Aqua's utility customers and offsets the customer service charges assigned to the utility from the call center.[10] However,

[7] Aqua Response to OCA-XXIV-3, attachment 1, CONFIDENTIAL
[8] Please note that this is the name used by HomeServe at that time.
[9] Aqua Response to OCA-XXIV-1.
[10] Aqua Response to OCA-XXIV-6.

when asked about the revenues concerning marketing activities for non-basic services, Aqua stated that revenues are booked to Aqua Resources, Inc. in the amount of $5,061,510 from HomeServe for the marketing attributes and services provided to HomeServe presumably pursuant to the contract.[11] It is not clear that these significant revenue amounts are credited to Aqua's regulated rates and Pennsylvania ratepayers.

Q. WHAT IS YOUR RECOMMENDATION?

A. As a result of this additional evidence, I recommend that the Commission initiate an investigation of Aqua's contractual relationship with HomeServe to determine the proprietary of allowing HomeServe to issue marketing materials that are designed to imply that Aqua has mailed these marketing materials, the use of Aqua's logo on HomeServe's marketing materials, the reasonableness of Aqua's expenses and revenues associated with these promotional activities, and the lack of any regulatory review of this contractual arrangement since 2003, particularly in light of the corporate reorganization and restructuring that has occurred since that date and the significant growth in the Aqua's customer base since the prior entity's contract and service territory as it existed in 2003. While the current mailer attached as Exhibit BA-11 states that Aqua has reviewed companies that provide these services and selected HomeServe, there is a legitimate concern that no such evaluation or review has occurred for more than 20 years since 2003.

Q. ARE THERE ADDITIONAL RECOMMENDATIONS IN LIGHT OF YOUR REVIEW OF THESE MATERIALS?

A. Yes. Whether or not a formal investigation is initiated, I recommend a significant revision of the marketing materials issued by HomeServe to eliminate any appearance of issuance

[11] Aqua Response to OCA-XXIV-5.

by or approval by Aqua of these products, as well as clarifications to these materials to more accurately explain the customer's options to pay for damage to these facilities on their property, that other competitive providers may also provide such services, and that the customer should conspicuously and specifically be advised to consult with their homeowner's insurance to determine the circumstances under which damages or failures would be covered.

Q. DOES THIS CONCLUDE YOUR TESTIMONY AT THIS TIME?

A. Yes.

— Information Regarding Your Exterior Sewer/Septic Line —

Dear [redacted],

Many homeowners are not aware that repairs to the exterior sewer/septic line that runs on their property may be the responsibility of the homeowner. Your property at [redacted] is not covered with *optional* Exterior Sewer/Septic Line Plus Coverage from HomeServe.

This sewer/septic line buried underground is subjected to changing soil conditions, ground shifting and corrosion, which may cause a sudden breakdown, leaving you responsible for the cost of repair or replacement. Replacement of this line can be expensive—potentially costing you thousands of dollars in unforeseen expenses.

Aqua has partnered with HomeServe,* an independent company, to offer its eligible customers protection for repairs to their sewer/septic line. This program provides repair coverage for your sewer/septic line with no deductible and a 24-hour hotline available 365 days a year to schedule a repair.

This protection is available for eligible [redacted] Township homeowners.

Benefit Amount:	Up to $10,000 annually with multiple service calls for covered repairs Up to $1,000 per covered repair to restore your landscaping disturbed by a covered repair, including resetting bricks and stones, replacing sod, mulch, shrubs and trees, and repairing asphalt and concrete surfaces 30-day wait period includes a money-back guarantee
Monthly Rate:	~~$12.48~~ $6.24
Property Address:	[redacted]
City:	[redacted]

— Important —

As an Aqua customer, your rate is only $6.24 per month—a savings of 50% off the first year.† Take action to help protect your exterior sewer/septic line. Complete and return the enclosed form—remember to affix your address label—or call HomeServe at 1-888-666-7711 to accept this coverage. For fastest processing, please visit www.AQRepairPlan.com.

Please respond before September 9, 2024.

*HomeServe USA Repair Management Corp. ("HomeServe"), with corporate offices located at 601 Merritt 7, 6th Floor, Norwalk, CT 06851, is an *independent company separate from Essential Utilities and Aqua Pennsylvania* and offers this optional service plan as an authorized representative of the service contract provider, CNA Warranty Services, Inc., 151 N Franklin St., Chicago, IL 60606. Your choice of whether to purchase this service plan will not affect the price, availability or terms of utility service from Aqua. Aqua and HomeServe entered into an agreement to introduce these plans to Aqua's customers. *See eligibility requirements and coverage limitations in this package.*

†Savings compared to renewal price.

Important Questions & Answers

What am I responsible for?
As a homeowner, you may be responsible for the exterior sewer/septic line on your property.

Does my homeowners insurance cover this?
Most basic homeowners insurance policies do not cover repair or replacement due to normal wear and tear of the exterior sewer/septic line.

Who is eligible for coverage?
To be eligible, you must own both the residential single structure and the land it is located on. You are not eligible if your home is a recreational vehicle or otherwise intended to be moved; your property is used for commercial purposes; you know of any current problems with your exterior sewer/septic line before enrollment; your entire exterior sewer/septic line is shared with a 3rd party or covered by a homeowners' association or the like; your exterior sewer/septic line previously had roots removed or failed a smoke or dye test, camera inspection or any other proactive test without resolution. In IA, properties with more than 4 dwelling units are not eligible.

What should I know about this coverage?
What's covered: Coverage provides, up to the applicable benefit limit, to repair or replace a sewer line that has experienced an operational failure, for which you have sole responsibility, from the external wall of your home up to your utility's responsibility, or septic line from the external wall of your home up to the point of connection to the septic tank on your property, including branch drains from the point they exit the home to the point they re-enter the home, that is damaged due to normal wear and tear, not accident or negligence. Repair or replacement of non-functioning grinder pumps and backflow prevention devices is also included. Restoration to your pavement, yard or landscaping disturbed as part of a covered repair is included, up to the benefit limit. *Not covered:* Non-conforming drain lines, septic/collection tanks, leaching fields, branch lines, replacement of any artificial grass or plants, restoration to water structures, pastures or wooded areas, and damage from accidents, negligence or otherwise caused by you, others or unusual circumstances. Costs on covered repairs may exceed the benefit limit, in which case you pay the difference between the cost and the benefit limit. Additional exclusions apply. See full Terms and Conditions with complete coverage and exclusion details prior to enrolling by calling 1-888-666-7711 or going to www.AQRepairPlan.com. Disputes resolved by arbitration, without class action or jury trial, unless otherwise stated in your full Terms and Conditions.

When can I make a service call?
Your plan starts the day your enrollment is processed. There is an initial 30-day waiting period before you can make a service call, giving you 11 months of coverage during the first year. Upon renewal/reactivation (if applicable), there is no waiting period.

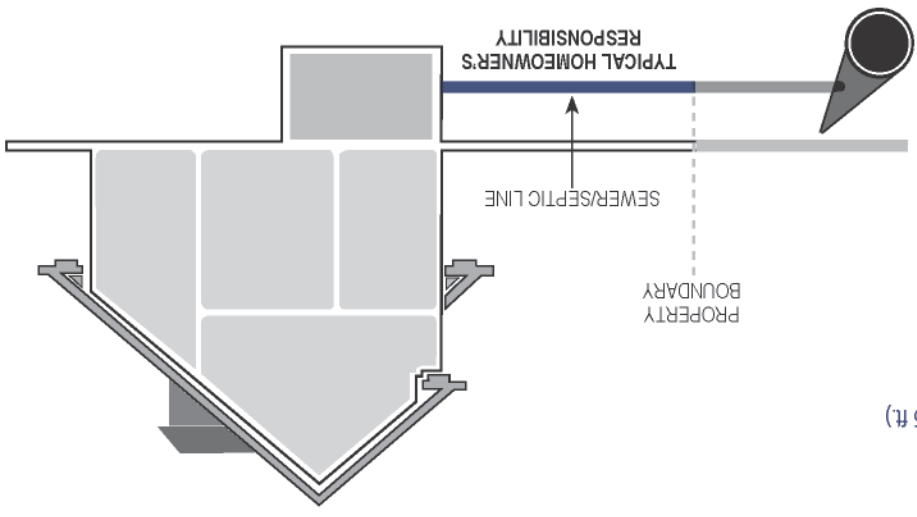
What is the cancellation policy?
Cancel any time by calling HomeServe at 1-888-666-7711 or visiting www.homeserve.com. If you cancel within 30 days of your start date, you will get a full refund (less claims paid, where applicable). Cancellations after the first 30 days will result in a pro-rata refund (less claims paid, where applicable).

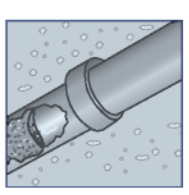
What is the term of my service agreement?
The plan is annual. Unless you cancel, your plan automatically renews annually at the then-current renewal price with your same payment terms.

What is E-Z Pay?
E-Z Pay is a paperless and stress-free way to pay for your coverage. Payments are automatically debited from the bank/checking account of your choice as your payment becomes due, at no additional cost.

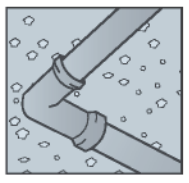
Who is HomeServe?
HomeServe is an independent company, separate from Aqua. If you would prefer not to receive solicitations from HomeServe, please call 1-888-666-7711.

What is Aqua's role in the program?
Aqua reviewed companies that provide home protection solutions. HomeServe was selected by Aqua in 2003 to offer Aqua customers optional, yet affordable, programs that provide protection against costly and inconvenient repairs to systems throughout their homes and properties.





Plan Members: No Charge‡
Unblock sewer/septic line
$268



Plan Members: No Charge‡
Replace sewer/septic line (26-75 ft.)
$5,754

Now it's easy to avoid the frustration and cost of unexpected repairs

‡National average repair costs as of January 2023. No charge for covered repairs up to your annual benefit amount.

The service line beyond the property boundary may be an additional responsibility of the homeowner and is included in this coverage.
Septic/collection tanks and leaching fields are not covered.

SURREBUTTAL TESTIMONY

OF

BARBARA R. ALEXANDER

Barbara Alexander Consulting LLC

ON BEHALF OF THE

PENNSYLVANIA OFFICE OF CONSUMER ADVOCATE

OCA Statement 7SR

Date Served: September 26, 2024

I. INTRODUCTION AND SUMMARY OF RECOMMENDATIONS

Q. PLEASE STATE YOUR NAME, ADDRESS AND OCCUPATION.

A. My name is Barbara R. Alexander. I am the sole member/owner of Barbara Alexander Consulting LLC. I am a consultant on consumer protection and customer service issues associated with utility regulation. My address is 44 Beech St, Hallowell, ME 04347. I appear in this case as a witness on behalf of the Office of Consumer Advocate (OCA).

Q. HAVE YOU PREVIOUSLY TESTIFIED IN THIS PROCEEDING?

A. Yes. I submitted Direct Testimony on behalf of the OCA on August 16, 2024, and Supplemental Direct Testimony on behalf of the OCA on September 12, 2024.

A. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

Q. I am filing Surrebuttal Testimony in response to the Rebuttal Testimony by Aqua witnesses William C. Packer[1] and Heather Doyle-Conley[2] filed on September 12, 2024. Specifically, I will address Mr. Packer's Rebuttal to my conclusions and recommendations with respect to Aqua's claim for higher profits due to its claim for exemplary management performance and his response to my recommendation concerning the liability provisions in the Company's tariff. I will address Ms. Doyle-Conley's Rebuttal to my testimony on Aqua's customer service performance and compliance with certain settlement provisions in prior proceedings.

Q. PLEASE IDENTIFY THE EXHIBITS ATTACHED TO YOUR TESTIMONY.

A. The following additional Exhibit is attached to my testimony:

[1] Aqua Statement No. 1-R.
[2] Aqua Statement No. 14-R.

- Exhibit BA-13: Aqua Response to OCA-XXV-1.

Q. DO YOU HAVE ANY CHANGES TO YOUR RECOMMENDATIONS AS SET FORTH IN YOUR DIRECT TESTIMONY?

A. No. I repeat those recommendations here:

- Aqua should not be awarded additional profits or revenues for "exemplary management performance" due to its failure to properly consider customer service performance in its justification and for other failures associated with prior commitments as identified in my testimony.
- Call Center Performance: I recommend that Aqua be required to meet its 2024 call center performance as a condition of any rate increase in this proceeding. Aqua should not be allowed to deteriorate its performance once rates are increased since the prior Aqua-Peoples Merger Settlement commitment does not extend beyond 2024. Second, I recommend that Aqua focus on improving the call answering performance for customers who enter the queue to speak to a customer service representative in light of the evidence presented in my testimony that those customers experience a significantly lower level of customer services when the IVR calls are eliminated from these calculations. I recommend that Aqua commit or be directed by the Commission to achieve to a reasonable level of improvement on an annual basis as a condition of this rate increase.
- Root Cause Analysis of Customer Complaints: In light of the history of Aqua's inability or refusal to conduct a reasonable root cause analysis as required by the Aqua-Peoples Merger Settlement, I recommend that the Commission take this failure

into account in denying any request for "exemplary management performance."

- Oversight of Call Center Compliance: I recommend that Aqua be required to conduct an annual audit and document its investigation and review of compliance with Pennsylvania's Chapter 56 and Chapter 14 rights and responsibilities by its call center personnel. It is not appropriate to rely on reviewing individual complaints, counseling agents, without a regular documentation of the oversight review and its findings.
- Compliance with Personal Contact Requirements: In light of my prior documentation of lack of proper training on this same issue in the last base rate case, I recommend that Aqua be required to develop and file a compliance document that properly describes the full range of consumer protections associated with attempting contact with residential customers prior to termination of service and documents as well the actual training and oversight, with reasonable reporting requirements that are reviewed by management. In addition, the Commission should consider this evidence to deny Aqua's request for higher profits due to exemplary management performance.
- Payment Processing Fees: I recommend that Aqua offer no-fee payment options to its customers and include reasonable or necessary payment processing fees in its revenue requirement, like the costs of handling payments via mail. The level of reasonable fees to include in the revenue requirement should reflect a competitive bid process to achieve the lowest cost to ratepayers for processing credit and debit card transactions. Whether or not this recommendation is adopted, Aqua should revise its termination notices, bills, and IVR script to inform the customer of the ways to pay

without fees rather than emphasizing the fee-based pay options as currently done.

- Limitation on Liability Tariff: I recommend that Aqua update its dollar amount of limitation of liability to reflect a more reasonable dollar amount to $6,000 to reflect inflation and Aqua's actual data showing that it had paid out well in excess of $2,000 where it has determined to pay out claims. Aqua should clarify that its "act of God" language does not eliminate liability for claims in which the Company is found to have been negligent or not in compliance with its Section 1501 duties under the Public Utility Code.
- Termination of Water Service for Nonpayment of Wastewater Service provided by a Municipal Authority: I recommend that Aqua adopt changes to its Tariff that authorizes termination of Aqua's water service for nonpayment of wastewater service by a municipal authority that reflect the consumer protections approved by the Commission in it recent order on Pennsylvania American Water Co.'s base rate case.

II. THE RELATIONSHIP, REVENUES, AND COMMUNICATIONS TO AQUA PA'S CUSTOMERS FOR HOMESERVE'S NON-BASIC SERVICES REQUIRES FURTHER INVESTIGATION AND IMPUTED REVENUES FOR AQUA PA'S CUSTOMERS.

Q. DO YOU HAVE ANY CHANGES TO YOUR RECOMMENDATIONS RELATING TO THE ISSUE YOU IDENTIFIED IN YOUR SUPPLEMENTAL DIRECT TESTIMONY?

A. Yes. In my Supplemental Direct Testimony, I raised an issue concerning Aqua PA's relationship with the marketing of non-basic services by HomeServe based on the consumer testimony at the public input hearings. Based on that consumer testimony, the

OCA conducted additional discovery in OCA Set XXIV and XXV. The OCA received the responses to OCA Set XXV after I submitted my Supplemental Direct Testimony. Based on my review of the responses, there is additional support for my recommendations set forth in my Supplemental Direct Testimony as stated below:

- I recommend that the Commission initiate an investigation of Aqua's contractual relationship with HomeServe to determine the proprietary of allowing HomeServe to issue marketing materials that are designed to imply that Aqua has mailed these marketing materials, the use of Aqua's logo on HomeServe's marketing materials, the reasonableness of Aqua's expenses and revenues associated with these promotional activities, and the lack of any regulatory review of this contractual arrangement since 2003, particularly in light of the corporate reorganization and restructuring that has occurred since that date and the significant growth in the Aqua's customer base since the prior entity's contract and service territory as it existed in 2003.
- Whether or not a formal investigation is initiated, I recommend a significant revision of the marketing materials issued by HomeServe to eliminate any appearance of issuance by or approval by Aqua of these products, as well as clarifications to these materials to more accurately explain the customer's options to pay for damage to these facilities on their property, that other competitive providers may also provide such services, and that the customer should conspicuously and specifically be advised to consult with their homeowner's insurance to determine the circumstances under which damages or failures would be covered.

- Furthermore, an affiliate of Aqua PA, called Aqua Resources, collected $5.062 million in revenue from HomeServe based on a per customer contract fee times the number of customers that HomeServe has in Aqua PA territory. Thus, despite the fact that HomeServe gets its business via Aqua PA's promotion of it under Aqua PA's contractual obligations to do so, such revenues did not benefit Aqua PA customers as an offset to the costs for the overall revue requirement. This should be corrected, and these revenues should benefit ratepayers. Reflecting the new information provided in response to OCA-XXV-1, based on the significant revenues received by Aqua Resources from HomeServe and the lack of any allocation of that revenue to Aqua PA, I support OCA Witness Ralph Smith's revenue adjustment. I attach Aqua's Response to OCA-XXV-1 as Exhibit BA-13.
- Finally, the lack of any allocation of revenues to Aqua PA in light of the clear intent to link Aqua PA's support and endorsement of HomeServe to market HomeServe's products to Aqua PA's customers also supports my recommendation for a full investigation of this relationship and implementation of my recommended consumer protection reforms.

III. RESPONSE TO MR. PACKER'S REBUTTAL TESTIMONY ON AQUA'S REQUEST FOR ADDITIONAL PROFITS FOR EXEMPLARY MANAGEMENT PERFORMANCE AND THE LIABILITY PROVISIONS OF ITS TARIFF

Q. HOW DID MR. PACKER RESPOND TO YOUR TESTIMONY ABOUT THE LACK OF CUSTOMER SERVICE PERFORMANCE AND CONSUMER PROTECTION POLICIES IN HIS SUPPORT FOR HIGHER PROFITS FOR MANAGEMENT PERFORMANCE?

A. Mr. Packer's testimony did not dispute any of my concerns in that his proposal for higher profits for exemplary management performance does not include any specific measurement of or reliance on customer service performance. I find this defect crucial to whether the Company's rates should be higher than otherwise required. As I documented in my Direct, the Company's internal performance measurements of customer service do not impact management's incentive payments for performance. Mr. Packer does not dispute this conclusion, but only states that the call center performance is "tracked and measured."[3] That is, of course, not the point. In addition, I documented in my Direct that none of the prior commitments concerning customer service were evaluated or relied upon to justify this proposal for higher profits. The fact that any prior proceeding did not explicitly require Aqua to link this performance to its claim for a reward for management performance is not an excuse from my recommendation. It is simply not reasonable for a publicly regulated utility to be granted higher profits without the evidence showing that it has delivered "exemplary" customer service at its call center, in handling and evaluating complaints, avoiding infractions, and taking a proactive approach to monitoring and

[3] Aqua St. No. 1-R, page 31, line 8.

auditing its internal call centers for compliance with Pennsylvania's consumer protection requirements.

Q. MR. PACKER REJECTS YOUR RECOMMENDATIONS CONCERNING ITS LIABILITY PROVISIONS IN ITS TARIFF. DO YOU AGREE?

A. No. Mr. Packer's response to my specific recommendations for this tariff provision on how Aqua handles claims of damages and narrows its liability is based on an unsupported assumption that such language change might result in higher insurance costs.[4] It is within Mr. Packer and Aqua's control to evaluate that potential result and he did not do so. I documented that the Company routinely makes payments in excess of the amount identified in its Tariff and that needs to be updated. Claiming that I could realistically evaluate that impact is clearly not a proper response. Finally, his claim that the "Act of God" exemption does not include situations where the Company was negligent or failed to satisfy Section 1501 of the Public Utility Code[5] should be viewed as support for my recommendation that this assumption should be made explicit without any potential harm to the Company.

[4] Ibid., page 23, lines 13-17.
[5] Ibid., page 23-24.

IV. RESPONSE TO AQUA WITNESS DOYLE-CONLEY ON CUSTOMER SERVICE PERFORMANCE AND COMPLIANCE ISSUES

Q. MS. DOYLE-CONLEY OBJECTS TO YOUR PRESENTATION OF CALL CENTER PERFORMANCE DATA THAT EXEMPTS THE CUSTOMER CALLS MADE AND HANDLED BY THE IVR.[6] PLEASE RESPOND.

A. First, I acknowledge that the Commission's reporting requirements for call center performance allows utilities to include IVR calls in its calculations. As a result, calls answered by and handled by the IVR are included in the measurement of the customer calls that select the option to speak to a live customer service representative. Whether this is reasonable or not is unlikely to be resolved in this proceeding. However, it is entirely appropriate to identify the difference in customer service between a customer whose transaction is handled on the IVR with the customer who enters the queue to speak to a customer service representative.[7] The latter option is required to negotiate a payment plan, respond to a termination notice, seek to reconnect following a termination, and file a dispute. These essential rights and remedies typically require a personal interaction with an authorized employee. I make no claim that the IVR is not important. I do, however, continue to observe and make the important conclusion that the customer who selects the option on the IVR to speak with a customer service representative enters a queue. The measurement of that performance shows a significant deterioration in performance compared to performance that is measured when all the IVR calls are included whether or

[6] Aqua St. No. 14-R, page 3.

[7] As I documented in my Direct Testimony (OCA St. No. 7), as measured by the calls in which the customer selects the option to speak with a customer service representative (CSR), the annual average percentage of call answered within 30 seconds for 2023 is 67% and in 2024 to date the average is 67.2%, far below the 80+% call answering result when the denominator includes all the IVR calls.

not those calls relate to the option to speak with a representative. The actual customer experience in seeking to speak to a customer service representative is a factual matter that I identified and continue to call on Aqua to improve whether it is a formal compliance issue relating to the Merger Settlement.

Q. EVEN USING THE MORE LIBERAL CALCULATION, DOES AQUA AGREE WITH YOUR RECOMMENDATION TO MEET ITS 2024 CUSTOMER CALL CENTER PERFORMANCE AS A CONDITION OF ANY RATE INCREASE?

A. No. Ms. Doyle-Conley states that Aqua is committed to meet its Merger Settlement call center performance standards but does not agree that rate relief should be contingent on meeting these goals.[8] She fails to consider, however, that the prior Merger Settlement provisions for its call center do not extend beyond 2024. As a result, unless there is a continuation of some explicit commitment about call center performance beyond 2024 and in the rate effective year for this proceeding, there is no "commitment" that can be relied upon. Aqua would be free to allow deterioration on service once the new rate increases are approved.

Q. HAS AQUA IDENTIFIED ITS COMMITMENTS TO ITS CALL CENTER PERFORMANCE FOR 2024 AND BEYOND?

A. Yes. When asked to identify any Pennsylvania specific commitments applicable to its call center performance for 2025 and beyond, the Company replied: (1) Service Level 82% within 30 seconds; (2) Percent of Calls abandoned at 2%; and (3) Busy Out Rate of 0%.[9] I continue to urge the Commission to require Agua to meet these service quality

[8] Aqua St. No. 14-R, page 4, lines 5-12.
[9] Aqua Response to OCA-XXVI-2.

performance standards as a condition of any rate increase in this proceeding.

Q. HOW DID MS. DOYLE-CONLEY RESPOND TO THE PRESENTATION OF THE COMPLIANCE DATA IN THE COMMISSION'S UCARE REPORTS?

A. Ms. Doyle-Conley's response is to identify her observation that a high number of complaints related to payment arrangements and that a solution has been implemented manually and "is in the process of automating the process."[10] This response may be appropriate, but the Company provides no evidence that this "fix" has resulted in far fewer complaints generally or relating specifically to payment arrangements in 2024, a trend that only the Company would be able to provide since there is no published data by the Commission for 2024 to date. Aqua has never provided any documentation that it has explored the scope, scale or frequency of payment arrangement infractions as documented in these complaints and taken any action to assist customers who did NOT complain to the PUC. Nor has Aqua documented how this defect in its policies and procedures occurred so as to take steps to prevent it or similar infractions from occurring in the future.

Q. HOW DID THE COMPANY RESPOND TO YOUR DOCUMENTATION OF THE HIGH LEVEL OF VERIFIED COMPLAINTS AND INFRACTIONS?

A. As I documented in my Direct, BCS found that Aqua had 174 "infractions," 167 of which were due to Chapter 56 potential violations.[11] Ms. Doyle-Conley's response to this data is to describe an internal process of investigating individual infractions and focusing on the

[10] Aqua St. No. 14-R, page 5, lines 11-16.

[11] Aqua Response to OCA-III-19 (not marked as confidential) describes the Company's response to BCS "verified infractions." This response indicates that in 2023, 114 infractions findings by the BCS were "accepted and 10 were "contested," with two BCS infractions removed.

individual customer service representative for additional training or coaching.[12] This type of response is inadequate. As I documented in my Direct, Aqua has not completed a trend analysis with respect to disputes.[13] Aqua has not conducted a root cause analysis of "justified" or "verified infractions" since January 2022.[14] This evidence should be taken into account in evaluating Aqua's management performance. Ms. Doyle-Conley did not respond to this evidence.

Q. PLEASE RESPOND TO AQUA'S RESPONSE TO YOUR TESTIMONY WITH RESPECT TO AQUA'S OBLIGATION UNDER THE MERGER SETTLEMENT TO CONDUCT AN ANNUAL ROOT CAUSE ANALYSIS OF ITS COMPLAINTS.

A. Aqua provided a "2020-2022 PUC Analysis" provided to a meeting in October 2023 as support for its compliance with the obligation to conduct a Root Cause Analysis in compliance with its Merger Settlement obligation.[15] This document identifies the number of specific complaints by categories without any analysis of or identification of a "root cause." When asked to provide the "updated" 2023 Root Cause Analysis referenced by Ms. Doyle-Conley in her Rebuttal, the Company provided a document entitled "2020-2023 PUC Analysis"[16] that again identified complaint numbers by category without any analysis or identification of a "root cause." These documents do not comply with the Merger Settlement provision based on my experience and as described in my Direct Testimony in Exhibit BA-5. In fact, Aqua confirms that it was provided with examples of a proper Root

[12] Aqua St. No. 14-R, page 6, lines 6-27.
[13] Aqua Response to OCA-XVI-15.
[14] Aqua Response to OCA-XVI-20.

[16] Aqua Response to OCA-XXVI-4, Attachment 1 (Confidential)

Cause Analysis in its October 2023 meeting with the OCA that it has ignored.[17]

Q. WHAT IS YOUR RECOMMENDATION IN LIGHT OF THIS EVIDENCE?

A. My original recommendation has not changed: In light of the history of Aqua's inability or refusal to conduct a reasonable root cause analysis as required by the Aqua-Peoples Merger Settlement, I recommend that the Commission take this failure into account in denying any request for what Aqua describes as "exemplary management performance."

Q. MS. DOYLE-CONLEY REJECTS YOUR RECOMMENDATION THAT AQUA CONDUCT ROUTINE AUDITS AND DOCUMENT COMPLIANCE WITH PENNSYLVANIA'S CONSUMER PROTECTION STATUTES AND REGULATIONS. PLEASE RESPOND.

A. In the Company's Rebuttal, the Company states that it "does routine quality monitoring through its QA teams" and new hires are "trained for compliance." [18] The QA process is described as call monitoring and the "feedback is shared weekly within the Company."[19] This is the same information provided in discovery, which I reviewed to prepare my Direct Testimony. This high-level description does not show compliance with consumer protection statutes and regulations. No showing of any compliance audit or investigation was provided. This high-level statement and lack of any documentation as to actual monitoring, internal reports of coaching, or any other indicia of audits or oversight supports my recommendation. Furthermore, this concern is highlighted by the justified complaints and verified infractions described above. I continue to recommend that Aqua

[17] Aqua Response to OCA-XXVI-3, Attachment 2 (ASQ Pocket Guide to Root Cause Analysis) and Attachment 3 (an excerpt from a description of a Root Cause Analysis Report done by Pittsburgh Water and Sewer Authority).
[18] Aqua St. No. 14-R, page 10, lines 6-14.
[19] Aqua St. No. 14-R, page 10, lines 6-14.

be required to conduct an annual audit for compliance, a recommendation that is particularly important in light of the out of state locations for these call centers and the use of at-home employees.

Q. PLEASE RESPOND TO MS. DOYLE-CONLEY'S REBUTTAL TESTIMONY IN RESPONSE TO YOUR DOCUMENTATION OF THE LACK OF EVIDENCE WITH RESPECT TO AQUA'S OBLIGATION TO ATTEMPT PERSONAL CONTACT IMMEDIATELY PRIOR TO TERMINATION OF SERVICE.

A. Ms. Doyle-Conley states that all Aqua's field personnel comply with its "collections manual."[20] She acknowledges that the results of actual field interactions or attempts at contact are not documented, but then claims that "FSRs follow the manual."[21] Once again, Aqua's response is without support. My documentation of the defects in these training materials was ignored. As a result, the lack of tracking data means that the Company has no idea of the impact or results of termination orders in the field or whether the customer's rights have been properly implemented. Nor has Aqua undertaken any audit or investigation to ensure that its field agents are complying with these personal contact requirements and properly engaging with knowledgeable information on Pennsylvania's customer rights and responsibilities.[22] I continue to recommend that Aqua be required to develop and file a compliance document that properly describes the full range of consumer protections associated with attempting contact with residential customers prior to termination of service and documents as well the actual training and oversight, with

[20] Ibid., page 10, lines 21-22.
[21] Ibid., page 11, lines 6-9.
[22] Aqua Response to OCA-XVI-20.

reasonable reporting requirements that are reviewed by management. In addition, the Commission should consider this evidence to deny Aqua's request for higher profits due to exemplary management performance.

Q. THE COMPANY REJECTS YOUR RECOMMENDATION TO ELIMINATE PAYMENT FEES. PLEASE RESPOND.

A. Ms. Doyle-Conley raises the misleading claim that the Speedpay fees for payment via debit or credit card is "not an Aqua PA charge."[23] That is not correct. This is a payment authorized by Aqua pursuant to its contract with Speedpay, a form of payment that is advertised on Aqua's website, IVR, and termination notices. It is an extra fee charged to Aqua's customers for the payment of an Aqua bill via Speedpay. While Aqua agrees to make changes to its termination notices, bills, and IVR scripts, the actual changes are not identified by Ms. Doyle-Conley. More importantly, her testimony does not explain the fact that all consumers who pay by debit card or credit card do not pay a separate fee at the time of payment. Unlike Speedpay, the costs to process the debit and credit card payment options are included by the seller in the price of their goods and services. It is a growing trend to eliminate such fees and support the wide range of payment options for Aqua's customers as I documented in my Direct. Aqua should do the same.

[23] Aqua St. No. 14-R, page 12, line 3.

Q. PLEASE RESPOND TO MS. DOYLE-CONLEY'S REBUTTAL TESTIMONY THAT APPEARS TO ACCEPT IN PART YOUR RECOMMENDATIONS WITH RESPECT TO AQUA'S TERMINATION OF WATER SERVICE FOR NONPAYMENT OF WASTEWATER SERVICE BY A NON-COMPANY PROVIDER.

A. The Company agrees to provide additional language in its tariff but seeks to modify it by eliminating what it characterizes as "redundant" language.[24] I appreciate the proposal to address this issue in its tariff, but I do not agree with the elimination of the second paragraph. The language in the second paragraph is not redundant. The first paragraph allows Aqua to terminate service for nonpayment of "sewer" service. However, the second paragraph then makes clear that Aqua is going to terminate the customer's "water service" due to the nonpayment of charges to a municipal or non-Company wastewater provider. I continue to recommend that the language previously approved in Pennsylvania American Water Company's most recent rate case.

Q. DOES THIS CONCLUDE YOUR TESTIMONY AT THIS TIME?

A. Yes.

OFFICE OF CONSUMER ADVOCATE

SET XXV INTERROGATORIES

OCA-XXV-1 Refer to the responses to OCA XXIV-5 and XXIV-6, and provide the following information:

a. Identify how much of the $5,061,510 was recorded in each account.
b. Identify how much of the $5,061,510 is for Aqua's water utility.
c. Identify how much of the $5,061,510 is for Aqua's wastewater utility.
d. Were any of the $5,061,510 in revenues booked from utility systems acquired by Aqua in 2023 or 2024? If so, identify how much of that revenue relates to each utility system that was or is being acquired by Aqua in 2023 or 2024?
e. Identify and provide the Aqua Resources accounting records for 2023 and to-date in 2024 showing in detail how the revenues paid by HomeServe are recorded.
f. Are the "regulatory offset fees paid by HomeServe" mentioned in the response to OCA XXIV-6 the exact same thing as the $5,061,510 amount that was identified in the response to OCA XXIV-5? If not, identify the amount of the "regulatory offset fees paid by HomeServe" mentioned in the response to OCA XXIV-6 and explain fully and in detail how those are credited to Aqua's utility customers.
g. For the 2023 HTY, 2024 FTY and 2025 FPFTY, identify all amounts related to the "regulatory offset fees paid by HomeServe" that were reflected by Aqua as offsets to the customer service charges assigned to each Aqua PA utility by the call center.
h. For the 2023 HTY, 2024 FTY and 2025 FPFTY, identify all amounts were reflected by Aqua as customer service charges assigned to each Aqua PA utility by the call center.
i. Please provide comparable information on the revenues in each year 2020, 2021 and 2022 that are comparable to the $5,061,510 amount noted in the response to OCA-XXIV-5.

RESPONSE

a. The amount of $5,061,510 was recorded into Aqua Resources. All revenues from HomeServe are recorded into Aqua Resources. On Aqua Resources, our GL account number is 6104090 and it is called Nonutil Inc. – Home Services.
b. None.
c. None.
d. No.
e. The revenues paid by HomeServe are recorded to GL account number is 6104090 and it is called Nonutil Inc. – Home Services as non-utility revenue and booked into the unregulated affiliate Aqua Resources.
f. No, the regulatory offset fees paid by HomeServe are part of the $5,061,510 amount. The 2023 offset fee total is $2,618.00; the YTD June 2024 total is $5,205. The Company receives $0.40 per call from HomeServe which offsets the Service Company charges which are allocated to the Aqua states.
g. None. No amounts are reflected by Aqua PA water or wastewater utilities as offsets because no costs for services are being charged to Aqua PA initially. No charges associated with HomeServe are billed to Aqua PA or any regulated utility.
h. The total ACO costs billed to Aqua PA for 2023 are $6,058,548.20. The projected ACO costs for 2024 and 2025 are $6,228,779.95 and $6,404,544.24, respectively. None of these charges include any amounts related to HomeServe. As noted above, the ACO time is offset by the $0.40 per call received by HomeServe, which is moved from ACO to Aqua Resources.
i. The revenues are as follows: 2020 - $2,659,932; 2021 - $3,799,757; 2022 - $4,831,632.

INTRODUCTION

Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A. My name is Zachari Walker, and my business address is Pennsylvania Public Utility Commission, Commonwealth Keystone Building, 400 North Street, Harrisburg, PA 17120.

Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?

A. I am employed by the Pennsylvania Public Utility Commission (Commission or PUC) in the Bureau of Investigation & Enforcement (I&E) as a Fixed Utility Financial Analyst.

Q. WHAT IS YOUR EDUCATION AND EMPLOYMENT BACKGROUND?

A. My education and employment background is attached as Appendix A.

Q. PLEASE DESCRIBE THE ROLE OF I&E IN RATE PROCEEDINGS.

A. I&E is responsible for representing the public interest in rate and other proceedings before the Commission. I&E's analysis in the proceeding is based on its responsibility to represent the public interest. This responsibility requires the balancing of the interests of the ratepayers, the regulated utility, and the regulated community as a whole.

Q. WHAT IS THE PURPOSE OF YOUR DIRECT TESTIMONY?

A. The purpose of my testimony is to review the base rate filing of Aqua Pennsylvania, Inc. and Aqua Pennsylvania Wastewater, Inc. (collectively Aqua or Company), and recommend adjustments to Aqua's proposed operating and maintenance (O&M) expenses, taxes, and cash working capital (CWC) for the fully projected future test year (FPFTY) ending December 31, 2025. Additionally, I will address Aqua's request to defer incremental costs related to per- and poly-fluoroalkyl (PFAS) remediation.

Q. DOES YOUR DIRECT TESTIMONY INCLUDE AN EXHIBIT?

A. Yes. I&E Exhibit No. 1 contains schedules that support my direct testimony.

Q. WHAT ARE THE TEST YEARS USED BY THE COMPANY IN THIS PROCEEDING?

A. Aqua is using the twelve months ended December 31, 2023, as the historic test year (HTY), the twelve months ending December 31, 2024, as the future test year (FTY), and the twelve months ending December 31, 2025, as the FPFTY.[1]

[1] Aqua Statement No. 1, p. 8.

Q. PLEASE SUMMARIZE THE COMPANY'S REQUESTED REVENUE INCREASE.

A. Aqua's base rate case was filed on May 23, 2024, with a total requested increase of $126,675,472 to the claimed present rate revenues of $670,994,640 resulting in an overall revenue requirement of $797,670,111,[2] representing a combined claim for water and wastewater operations. The total requested revenue increase represents respective net revenue increases as follows: (1) Water Base Operations (Water Base) of $111,246,656; (2) the Municipal Authority of the Borough of Shenandoah water system (Shenandoah) of $802,470; (3) Wastewater Base Operations (WW Base) of $8,209,676; (4) Lower Makefield Township wastewater system (Lower Makefield) of $2,568,544; and (5) East Whiteland Township wastewater system (East Whiteland) of $3,848,126. In my testimony, I refer to the Water Base and Shenandoah collectively as Water Operations, and the WW Base and Lower Makefield collectively as WW Operations – noting the East Whiteland system is addressed separately. The overall requested increase for the Water Base includes (1) a revenue allocation of $1,465,438 for Shenandoah based on the cost of service (COS)and (2) an additional revenue increase of $21,850,629 allocated from the wastewater systems per the Act 11 provision.

[2] Aqua Volume No. 2, Schedule Act 11.

Q. PLEASE SUMMARIZE YOUR RECOMMENDED ADJUSTMENTS.

A. The following table summarize my recommended adjustments for each operating system:

Water Base Operations:

	AQUA FPFTY Claim	I&E Recommended Allowance	I&E Adjustment
O&M Expenses:			
Labor Expense	$37,871,393	$36,258,072	($1,613,321)
Employee Benefits	$7,791,885	$7,459,951	($331,934)
Membership Dues	$907,966	$533,620	($374,346)
Rate Case Expense	$1,149,461	$574,731	($574,730)
COVID-19 Related Expenses	$2,511,175	$1,255,588	($1,255,587)
General Price Level Adjustment	$1,298,221	$0	($1,298,221)
Total O&M Adjustments			**($5,448,139)**
Taxes:			
Payroll Taxes	$3,323,126	$3,181,561	($141,565)
Total Tax Adjustments			**($141,565)**
Rate Base Adjustments:			
Cash Working Capital	$7,707,000	$7,414,000	($293,000)
Total Rate Base Adjustments			**($293,000)**

Shenandoah Operations:

	AQUA FPFTY Claim	I&E Recommended Allowance	I&E Adjustment
O&M Expenses:			
Labor Expense	$350,852	$335,906	($14,946)
Employee Benefits	$210,511	$201,543	($8,968)
Rate Case Expense	$7,668	$3,834	($3,834)
General Price Level Adjustment	$27,857	$0	($27,857)
Total O&M Adjustments			**($55,605)**

WW Base Operations:

	AQUA FPFTY Claim	I&E Recommended Allowance	I&E Adjustment
O&M Expenses:			
Labor Expense	$3,523,869	$3,373,752	($150,117)
Employee Benefits	$2,114,321	$2,024,251	($90,070)
Membership Dues	$332	$0	($332)
Rate Case Expense	$107,648	$53,824	($53,824)
COVID-19 Related Expenses	$419,962	$209,981	($209,981)
General Price Level Adjustment	$377,538	$0	($377,538)
Total O&M Adjustments			**($881,862)**

Lower Makefield Operations:

	AQUA FPFTY Claim	I&E Recommended Allowance	I&E Adjustment
O&M Expenses:			
Labor Expense	$160,932	$154,076	($6,856)
Employee Benefits	$96,559	$92,446	($4,113)
Rate Case Expense	$29,760	$14,880	($14,880)
General Price Level Adjustment	$22,660	$0	($22,660)
Total O&M Adjustments			**($48,509)**

SUMMARY OF I&E OVERALL POSITION

Q. IN THE INSTANT PROCEEDING, AQUA HAS INCLUDED A SEPARATE REVENUE REQUIREMENT FOR THE EAST WHITELAND SYSTEM. PLEASE STATE I&E'S POSITION ON THE INCLUSION OF THE EAST WHITELAND WASTEWATER SYSTEM.

A. As described in I&E witness Ethan Cline's testimony, due to the circumstances surrounding the appeal of the Company's acquisition of the East Whiteland system, I&E is recommending removal of any rate base, acquisition costs, expenses, taxes, and any revenue shortfall, including the proposed Act 11 allocation of $3,144,592[3] from consideration in the instant proceeding for ratemaking purposes.

Q. DOES THIS TESTIMONY REPRESENT A COMPLETE ELIMINATION OF ALL EXPENSE CLAIMS RELATED TO THE EAST WHITELAND SYSTEM?

A. No. Due to the nature of expense categorization and reporting, my direct testimony represents a best effort to eliminate expenses related to the East Whiteland system from the rest of the Company's expenses. Lack of response to any topic should not be interpreted as agreement with the inclusion of any items related to Aqua's acquisition or operation of the East Whiteland system for ratemaking purposes.

[3] I&E Statement No. 3, pp. 8-10.

Q. WHAT ARE THE REVENUE REQUIREMENT RECOMMENDATIONS FOR EACH SYSTEM?

A. I&E's recommended revenue requirements are presented separately for each system prior to the COS and Act 11 allocations for Water Base operations, Shenandoah operations, WW Base operations, and Lower Makefield operations as shown below:

Q. SUMMARIZE I&E'S COMBINED RECOMMENDED REVENUE REQUIREMENT INCLUDING THE I&E RECOMMENDED ACT 11 ALLOCATION.

A. I&E's total recommended revenue requirement for all Aqua revenue requirements combined is $724,179,443**.** This recommended revenue requirement represents an increase of $56,709,885 to the present rates revenues of $667,469,558.[4] This total recommended allowance incorporates my adjustments made in this testimony to O&M expenses, taxes, and cash working capital, and those recommended

[4] *See Table II below.*

adjustments made in the testimony of I&E witnesses Christopher Keller[5] and Ethan Cline.[6]

Q. PLEASE SHOW THE COMPUTATION FOR I&E'S PROPOSED ACT 11 REVENUE ALLOCATION AS SUPPORTED BY I&E WITNESS ETHAN CLINE IN I&E STATEMENT NO. 3.

A. The I&E proposed Act 11 allocation as recommended by I&E witness Ethan Cline[7] is summarized below in Table II:

Aqua Pennsylvania, Inc.
Water & Wastewater Revenue Requirement Summary
R-2024-3047822 and R-2024-3047824

	Total Company	Water Base Operations	Water - Shenandoah	WW Base Operations	WW Lower Makefield
I&E Recommended Present Rate Revenue	$667,469,558	$596,344,820	$1,828,304	$57,682,604	$11,613,830

[7] I&E Statement No. 3.

LABOR EXPENSE

Q. WHAT IS INCLUDED IN THE COMPANY'S CLAIM FOR LABOR EXPENSE?

A. The Company's expense claim includes payroll for non-union full-time, union full-time, regular part-time, seasonal, and co-op employees.[8]

Q. WHAT ARE THE COMPANY'S CLAIMS FOR LABOR EXPENSE?

A. The Company's claims for labor expense are $37,871,393 for Water Base,[9] $350,852 for Shenandoah,[10] $3,523,869 for WW Base,[11] and $160,932 for Lower Makefield.[12]

Q. WHAT IS THE BASIS FOR THE COMPANY'S CLAIMS?

A. The Company started with historical amounts and reflected "known and anticipated changes."[13]

Q. DO YOU AGREE WITH THE COMPANY'S CLAIMS?

A. No.

---

8 I&E Exhibit No. 1, Schedule 1, pp. 1-2.
9 Aqua Exhibit 1-A, Schedule C-2, line 1.
10 Aqua Exhibit 1-B, Schedule C-2, line 1.
11 Aqua Exhibit 1-C, Schedule C-2, line 1.
12 Aqua Exhibit 1-D, Schedule C-2, line 1.
13 Aqua Statement No. 3, p. 4.

Q. WHAT DO YOU RECOMMEND FOR LABOR EXPENSE?

A. I recommend the following allowances for labor expense:

Water Base: $36,258,072, or a reduction of $1,613,321 ($37,871,393 - $36,258,072) to the Company's claim.

Shenandoah: $335,906 or a reduction of $14,916 ($350,852 - $335,906) to the Company's claim.

WW Base: $3,373,752, or a reduction of $150,117 ($3,523,869 - $3,373,752) to the Company's claim.

Lower Makefield: $154,076, or a reduction of $6,856 ($160,932 - $154,076) to the Company's claim.

Q. WHAT IS THE BASIS FOR YOUR RECOMMENDATIONS?

A. My recommendations are based on an employee vacancy adjustment. Normally, companies have a certain level of employee vacancies on a day-to-day operating basis due to retirements, resignations, transfers, layoffs, etc., that are unpredictable. Such vacancies will yield annual savings in the Company's payroll and benefit costs that need to be reflected for ratemaking.

Q. EXPLAIN HOW YOU CALCULATED THE NORMAL EMPLOYEE VACANCY RATE AND THE CORRESPONDING ADJUSTMENTS TO LABOR EXPENSE.

A. My recommended labor expense is based on a calculated vacancy percentage of

4.26%. First, I calculated the annual average of actual regular full-time employees based on the data provided in response to I&E-RE-3 I calculated the annual average of non-union full-time employees for 2021 of 206 [(208 + 206 + 205 + 204) ÷ 4], for 2022 of 197 [(197 + 195 + 203 + 191) ÷ 4], and for the HTY of 196 [(196 + 195 + 195 + 197) ÷ 4]. [14] Next, I calculated the annual average of union full-time employees based on the data provided in response to I&E-RE-35 for 2021 of 354 [(352 + 352 + 350 + 362) ÷ 4], for 2022 of 363 [(364 + 361 + 362 + 363) ÷ 4], and for the HTY of 368 [(356 + 366 + 373 + 376) ÷ 4].[15]

Next, to calculate the total full-time employee count, I combined the non-union full-time and union full-time actual employee counts from above yielding total counts for 2021 of 560 (206 + 354), for 2022 of 560 (197 + 363), and for the HTY of 564 (196 + 368). In order to determine the total full-time budgeted positions, I combined the regular full-time and union full-time budgeted employee counts from the responses to I&E-RE-3, Part B, and I&E-RE-35, Part B totaling 588 (224 + 364) for 2021, 583 (216 + 367) for 2022, and 590 (211 + 379) for the HTY.[16]

Then I calculated the annual vacant positions for full-time employees by subtracting the calculated actual annual average from the budgeted full-time positions. The result is 28 (588 – 560) vacant positions for 2021, 23 (583 – 560)

[14] I&E Exhibit No. 1, Schedule 1, pp. 1-2.
[15] Id.
[16] Id., Schedule 1, p. 2 and Schedule 2, p. 1.

for 2022, and 26 (590 – 564) for the HTY. Using these calculations, I determined the three-year historic average vacant positions of 26 [(28 + 23 + 26) ÷ 3].

Lastly, I calculated the FPFTY vacancy rate of 4.26% by dividing the three-year historic average vacant positions of 26 by the claimed FPFTY budgeted full-time positions of 610 (222[17] + 388)[18] (i.e., 26 ÷ 610 = 4.26%). Subsequently, I multiplied 4.26% by the claims for labor expense for each system to calculate my recommended adjustment.

Q. PLEASE SHOW THE CALCULATIONS FOR YOUR RECOMMENDED ADJUSTMENTS.

A. I multiplied the vacancy rate of 4.26% by the individual labor expense claims produces the following recommended adjustments:

Water Base: $37,871,393 x 0.0426 = $1,613,321

Shenandoah: $350,852 x 0.0426 = $14,946

WW Base: $3,523,869 x 0.0426 = $150,117

Lower Makefield: $160,932 x 0.0426 = $6,856

[17] I&E Exhibit No. 1, Schedule 1, p. 2.
[18] Id., Schedule 2, p. 1.

EMPLOYEE BENEFITS EXPENSE

Q. WHAT IS TYPICALLY INCLUDED IN EMPLOYEE BENEFITS EXPENSE?

A. Employee benefits expense typically includes medical, dental, vision, life insurance, long term disability insurance, and 401K plans. In this instance, the Company states that payroll taxes,[19] healthcare coverage,[20] employee benefits, and other general overheads are included in employee benefits expense for the Shenandoah, WW Base, and the Lower Makefield system claims.[21]

Q. WHAT ARE THE COMPANY'S CLAIMS FOR EMPLOYEE BENEFITS EXPENSE?

A. The Company's claims for employee benefits expense are $7,791,885 for Water Base,[22] $210,511 for Shenandoah,[23] $2,114,321 for WW Base,[24] and $96,559 for Lower Makefield.[25]

Q. WHAT IS THE BASIS FOR THE COMPANY'S CLAIMS?

A. The Company has based its FPFTY claims on its projected employee benefits costs and allocated benefits from Water Base to Shenandoah, WW Base, and

[19] Aqua Exhibits 1-B through 1-D, Schedule D-2.5.
[20] Aqua Statement No. 1, p 13.
[21] Id., pp. 14-15.
[22] Aqua Exhibit 1-A, Schedule C-2, line 2.
[23] Aqua Exhibit 1-B, Schedule C-2, line 2.
[24] Aqua Exhibit 1-C, Schedule C-2, line 2.
[25] Aqua Exhibit 1-D, Schedule C-2, line 2.

Lower Makefield.[26]

Q. DO YOU AGREE WITH THE COMPANY'S CLAIMS?

A. No.

Q. WHAT DO YOU RECOMMEND?

A. I recommend the following amounts for employee benefits expense:

Water: $7,459,951, or a reduction of $331,934 ($7,791,885 - $7,459,951) to the Company's claim.

Shenandoah: $201,543, or a reduction of $8,968 ($210,511 - $201,543) to the Company's claim.

WW Base: $2,024,251, or a reduction of $90,070 ($2,114,321 - $2,024,251) to the Company's claim.

Lower Makefield: $92,446 or a reduction of $4,113 ($96,559 - $92,446) to the Company's claim.

Q. WHAT IS THE BASIS FOR YOUR RECOMMENDATION?

A. My recommendation is based on the employee vacancy adjustment as noted in the labor expense section above. Likewise, I applied the vacancy rate of 4.26% to the Company's claims for employee benefits expense for each revenue requirement

[26] Aqua Statement No. 1, p. 15.

except East Whiteland, as explained above, to calculate my adjustment to employee benefits expense.

Q. PLEASE SHOW THE CALCULATIONS FOR YOUR RECOMMENDED ADJUSTMENTS.

A. I multiplied the vacancy rate of 4.26% by the individual employee benefits expense claims which produces the following recommended adjustments:

Water: $7,791,885 x 0.0426 = $331,934

Shenandoah: $210,511 x 0.0426 = $8,968

WW Base: $2,114,321 x 0.0426 = $90,070

Lower Makefield: $96,559 x 0.0426 = $4,113

FEDERAL AND STATE PAYROLL TAX EXPENSE

Q. WHAT IS THE COMPANY'S CLAIM FOR FEDERAL AND STATE PAYROLL TAX EXPENSE?

A. The Company's claim is $3,323,126 for Water Base.[27]

Q. WHAT IS THE BASIS OF THE COMPANY'S CLAIM?

A. The Company's claim is based on the FPFTY labor expense claim and the applicable federal and state payroll tax rates and was reduced by the capitalized

[27] Aqua Exhibit 1-A, Schedules A-1 and D-2.5.

amount.[28] The payroll taxes for Shenandoah, WW Base, and Lower Makefield are allocated from the Water Base expense as a component of the allocated employee benefits expense and are addressed in that section of my direct testimony above.

Q. DO YOU AGREE WITH THE COMPANY'S CLAIM?

A. No. While I am not disputing the Company's calculation method, it is necessary to make an adjustment to the Company's federal and state payroll tax expense claim that corresponds to my vacancy adjustment to labor expense as discussed above.

Q. WHAT IS YOUR RECOMMENDATION FOR FEDERAL AND STATE PAYROLL TAX EXPENSE?

A. I recommend a federal and state payroll tax expense allowance of $3,181,561, or a reduction of $141,565 ($3,323,126 - $3,181,561) to the Company's claim.

Q. WHAT IS THE BASIS FOR YOUR RECOMMENDATION?

A. My recommendation is based on the employee vacancy adjustment as noted in the labor expense and employee benefits expense sections above. Likewise, I applied the vacancy rate of 4.26% to the Company's Water claim for federal and state payroll tax of $3,323,126 for a recommended adjustment of $141,565 ($3,323,126 x 0.0426).

[28] Aqua Statement No. 3, p. 13.

MEMBERSHIP DUES

Q. WHAT ARE THE COMPANY'S CLAIMS FOR MEMBERSHIP DUES?

A. Aqua is claiming FPFTY membership dues of $907,966 for Water Operations and $332 for WW Operations.[29]

Q. WHAT IS THE BASIS FOR THE COMPANY'S CLAIMS FOR MEMBERSHIP DUES?

A. As stated in response to I&E-RE-15, Part G, membership dues are found in the Company's response to Minimum Filing Requirement OE24 which shows that the claims include payments to industry organizations and service or social organizations.[30] Additionally in response to I&E-RE-15, Part G, the Company states its FPFTY claims are based on the HTY payment amounts totaling $866,539 for Water Operations and $317 for WW Operations,[31] grossed up to the FPFTY claims using the Company's calculated FTY and FPFTY inflation factors of 2.425% and 2.300% respectively.[32]

Q. HOW DID YOU DETERMINE THE COMPANY'S FPFTY CLAIMS?

A. As stated above, I applied the Company's inflation factors for the FTY and FPFTY to each HTY industry organization as shown on Minimum Filing Requirement

[29] I&E Exhibit No. 1, Schedules 3 and 4.
[30] Id., Schedule 4, p. 2.
[31] Id.
[32] Id., Schedule 3.

OE24, resulting in a total Water Operations FPFTY claim of $907,966 and WW Operations FPFTY claim of $332.[33]

Q. DO YOU AGREE WITH THE COMPANY'S CLAIMS?

A. No.

Q. WHAT IS YOUR RECOMMENDATION FOR MEMBERSHIP DUES?

A. I recommend an allowance of $533,620 for Water Operations, or a decrease of $374,346 ($907,966 - $533,620) to the Water Operations' membership dues claim. For WW Operations, I recommend the entire FPFTY claim of $332 be disallowed for ratemaking purposes.

Q. WHAT IS THE BASIS FOR YOUR RECOMMENDATION?

A. My recommendation for Water Operations represents removing the calculated FPFTY payments made by the Water Operations systems to the Chamber of Commerce of $279,411 and the calculated FPFTY claim for Service/Social – Other organizations of $94,936, totaling $374,346 ($279,411 + $94,936).

As stated above, my recommendation for WW Operations represents removing the entire $332 calculated FPFTY claim for Service/Social – Other organizations.[34]

[33] Id.
[34] I&E Exhibit No. 1, Schedule 3.

Q. PLEASE CONTINUE.

A. The Chamber of Commerce payment of $279,411 is not necessary to provide safe and reliable water service.

Additionally, my recommendations to remove the Service/Social – Other organizations' payments for Water Operations and WW Operations is necessary because, as I have been advised by counsel, "No public utility may charge to its customers as a permissible operating expense for ratemaking purposes membership fees, dues or charges to fraternal, social or sports clubs or organizations."[35] Therefore, I recommend that the calculated FPFTY payments of $94,936 for Water Operations and $332 for WW Operations be disallowed for ratemaking purposes as they represent membership dues to social organizations.

Q. WHY DOES YOUR RECOMMENDATION ONLY ALLOCATE THE MEMBERSHIP DUES ADJUSTMENTS TO THE WATER BASE AND WASTEWATER BASE SYSTEMS?

A. Based on the information provided in the Company's responses to Minimum Filing Requirement OE24 and I&E-RE-15,[36] it is unclear how the membership dues are allocated outside of the overall Water Operations and Wastewater Operations. Therefore, the recommended adjustments are applied solely to the larger respective systems.

[35] *66 Pa. Code § 1316.1.*
[36] I&E Exhibit No. 1, Schedule 4, pp. 1-2.

RATE CASE EXPENSE

Q. DESCRIBE THE NATURE AND TYPES OF EXPENDITURES TYPICALLY ALLOWED AS PART OF A REGULATED UTILITY'S OVERALL RATE CASE EXPENSE.

A. The nature and types of individual expenditures that comprise a utility's allowable claim for rate case expense are those directly incurred to compile, present, and defend a utility's request for a base rate increase before the Commission. The actual expenditures and estimated costs typically found in an allowable rate case expense claim include legal fees for outside counsel, fees to outside consultants, and the cost of printing, document assembly, and postage.

Q. HOW HAS THE COMMISSION TRADITIONALLY TREATED RATE CASE EXPENSE FOR RATEMAKING PURPOSES?

A. The Commission has historically stated that it considers prudently incurred rate case expense as an ongoing expense, occurring at irregular intervals, related to the rendering of utility service. Thus, it is necessary to normalize rate case expense for ratemaking purposes. The Commission has also cited the importance of considering the involved utility's history regarding the frequency of rate case filings as an essential element in determining the normalized level of rate case expense for ratemaking purposes.

Q. HOW IS THE FREQUENCY OF RATE CASE FILINGS DETERMINED?

A. The frequency is determined by calculating the average number of months between the filing dates of a utility's recently filed base rate cases.

Q. WHAT IS AQUA'S CLAIM FOR RATE CASE EXPENSE?

A. Aqua is proposing a 24-month normalization of its projected rate case expense for each system. The rate case expense claim for each system is: (1) Water Base $1,149,461; (2) Shenandoah $7,668; (3) WW Base $107,648; (4) Lower Makefield $29,760.[37]

Q. WHAT IS THE BASIS FOR AQUA'S CLAIM?

A. Aqua's rate claimed normalization period is based on the Company's anticipated future filing of its next base rate case. The Company's rate case expense claim is based on normalizing the total rate case expense claim for each system over Aqua's proposed 24-month normalization period.[38] The total rate case expense for each system is: (1) Water Base of $2,298,922; (2) Shenandoah of $15,336; (3) Wastewater Base of 215,295; and (4) Lower Makefield of $59,520.[39]

Q. DO YOU AGREE WITH AQUA'S CLAIM?

A. No.

---

[37] Aqua Exhibit Nos. 1-A through 1-D, Schedule C-4.4.
[38] Aqua Statement No. 4, p. 2.
[39] Aqua Exhibit Nos. 1-A through 1-D, Schedule C-4.4.

Q. WHAT IS YOUR RECOMMENDATION FOR RATE CASE EXPENSE?

A. I recommend normalizing the total claims over the average historic filing frequency of 48 months, yielding my recommended FPFTY allowance amounts for rate case expense for each system below:

Water: $574,731, or a reduction of $574,730 ($1,149,461 - $574,731) to the Company's claim.

Shenandoah: $3,834, or a reduction of $3,834 ($7,668 - $3,834) to the Company's claim.

WW Base: $53,824, or a reduction of $53,824 ($107,648 - $53,824) to the Company's claim.

Lower Makefield: $14,880 or a reduction of $14,880 ($29,760 - $14,880) to the Company's claim.

Q. WHAT IS THE BASIS FOR YOUR RECOMMENDATION?

A. My recommendation is based on adjusting the normalization period to match the historic average base rate case filing frequency of 48 months as detailed below.

Q. PLEASE EXPLAIN YOUR RECOMMENDED ADJUSTMENT TO THE NORMALIZATION PERIOD.

A. I recommend normalizing the total rate case expense allowance over a period of 48 months, rather than the claimed 24 months, consistent with the Company's historic average base rate case filing frequency. In response to I&E-RE-4, the

Company stated its most recent rate cases were filed on June 8, 2012; May 24, 2019; and May 19, 2022.[40] Including the current rate case, filed on May 23, 2024, the average historic filing frequency is 48 months [(84 months + 36 months + 24 months) ÷ 3]. My recommendation to use the historic filing frequency of 48 months for normalization treatment, rather than the claimed 24-month period, agrees with the Commission's consistent emphasis on the importance of considering the utility's history of rate case filings when determining the interval to account for rate case expenses for ratemaking purposes as demonstrated below.

Q. HAVE OTHER UTILITIES BEEN GRANTED A NORMALIZATION PERIOD BASED ON SPECULATION OF FUTURE RATE CASE FILINGS?

A. Yes. In 2012, the Commission granted PPL Electric Utilities Corporation (PPL) permission to normalize its rate case expense over a 24-month period based on the expected timing of future base rate case filings.[41] That base rate case was filed on March 30, 2012; however, PPL did not file its next rate case until March 31, 2015, which was 36 months after the 2012 rate case filing. I&E's recommended normalization period in the 2012 PPL proceeding was a 32-month interval based on the Company's historic filing frequency.[42] I&E's recommendation in that

[40] I&E Exhibit No. 1, Schedule 5, pp. 1-2.
[41] *PA. PUC v. PPL Electric Utilities Corporation*, Docket No. R-2012-2290597, pp. 47-48 (Order Entered December 28, 2012).
[42] I&E Statement No. 2, pp. 13-14 at Docket No. R-2012-2290597.

instance produced a much more accurate result than the Company's stated future intention to file a rate case.

Q. ARE THERE ANY RECENT COMMISSION DECISIONS THAT SUPPORT YOUR RECOMMENDATION FOR A RATE CASE FILING INTERVAL BASED ON HISTORIC FILING FREQUENCY?

A. Yes. The following six cases resulted in the Commission using each utility's historic average filing frequency.

First, in a base rate case filed by Emporium Water Company, the Commission adopted the I&E's recommended historic filing frequency finding in favor of I&E's recommended five-year normalization based on historic average filing frequency that was rounded down from 64 months.[43]

Second, in a 2016 base rate case filed by the City of DuBois the Commission agreed with I&E's recommendation to use an historic filing frequency finding in favor of I&E's recommended 64-month normalization which matched the actual historic filing frequency.[44]

Third, in Columbia Gas of Pennsylvania, Inc.'s (Columbia) 2020 base rate case filing, the Commission held that the normalization period should align with

[43] *PA PUC v. Emporium Water Company*, Docket No. R-2014-2402324, p. 50 (Order Entered January 28, 2015).
[44] *PA PUC v. City of DuBois - Bureau of Water*, Docket No. R-2016-2554150, pp. 65-66 (Order Entered March 28, 2017); *PA PUC v. City of DuBois - Bureau of Water*, Docket No. R-2016-2554150, p. 13 (Order Entered May 18, 2017).

the frequency of historic filings rather than Columbia's stated intent to file its subsequent rate case.[45]

Fourth, in PECO Energy Company – Gas Division's (PECO Gas) 2020 base rate filing, the Commission granted I&E's recommended five-year normalization period rather than PECO Gas' claimed based on a three-year period because the Commission determined a normalization period based on actual historic filing frequency is more reliable than future speculation.[46]

Fifth, in a base rate case filed by Philadelphia Gas Works' (PGW) in 2023, the Commission agreed with I&E's recommended 53-month normalization period rather than PGW's claim based on a three-year period because the Commission granted a normalization period based on actual historic filing frequency and not based on PGW's future intention to file a rate case.[47]

Finally, in the most recent base rate case filed by the Columbia Water Company in 2023, the Commission held that the normalization period should align with the historic filing frequency rather than that company's intent to file its next rate case, and that the intent to file a base rate case does not justify deviating from the Commission's practice of relying on historic filing frequency.[48]

---

45 *PA PUC v. Columbia Gas,* Docket No. R-2020-3018835, Opinion and Order, pp. 78-79 (Order Entered February 19, 2021).

46 *PA PUC v. PECO Energy Company (Gas Division)*, Docket No. R-2020-3018929, Opinion and Order, p. 119 (Order Entered June 22, 2021).

47 *PA PUC v. Philadelphia Gas Works*, Docket No. R-2023-3037933, Opinion and Order, pp. 65-66 (Order Entered November 9, 2023).

48 *PA PUC v. Columbia Water Company*, Docket No. R-2023-3040258, Opinion and Order, p. 34 (Order Entered January 18, 2024).

Q. GIVEN THESE COMMISSION ORDERS AND THE COMPANY'S FILING HISTORY, IS THE CLAIMED 24-MONTH RECOVERY PERIOD REASONABLE?

A. No. The Company has not demonstrated that it will file its next base rate case within 24 months of the instant filing. My recommended 48-month normalization period is in the public interest as it aligns with the Company's historic filing intervals between rate cases while being long enough to protect customers from paying an unreasonable rate case expense amount in rates.

COVID-19 RELATED EXPENSES

Q. WHAT EXPENSES ARE INCLUDED IN AQUA'S COVID-19 RELATED EXPENSE CLAIM?

A. Aqua's total claim consists of deferred costs for an excess uncollectible accounts expense above the historic experienced uncollectible accounts expense levels.[49]

Q. WHAT IS UNCOLLECTIBLE ACCOUNTS EXPENSE?

A. Uncollectible accounts expense consists of specific receivables that are determined to be uncollectible, in whole or in part, either because the debtors do not pay or because the creditor finds it impracticable to enforce payment. Those accounts deemed uncollectible are charged against income as uncollectible accounts expense.

[49] Aqua Statement No. 1, pp. 17-19.

Q. HOW DO UTILITIES RECOGNIZE UNCOLLECTIBLE EXPENSE FOR RATEMAKING PURPOSES?

A. Generally, for ratemaking purposes, utilities compute their uncollectible expense on an annual prospective basis. While the uncollectible expense is a prospective claim, the proper calculation begins with a historic analysis of actual net write-offs to gross revenues to develop a historic write-off ratio. Thus, net write-offs are gross write-offs less recoveries of amounts previously written off. This ratio is applied to projected revenues to determine the proper prospective allowance. Normally, the historic analysis is based on several years of data.

Q. WHAT IS AQUA'S CLAIM FOR COVID-19 RELATED EXPENSES?

A. The Company is claiming COVID-19 related incremental expenses that it ceased recording one quarter prior to the end of the FPFTY in Aqua's 2021 base rate case on December 31, 2022. Aqua is proposing to recover $2,931,137 ($2,511,175[50] + $419,962)[51] in the FPFTY for COVID-19 related expenses for Water Base operations and WW Base operations respectively. This claim represents a proposed recovery, via a two-year amortization period, of its total deferred incremental uncollectible accounts expenses of $5,862,274.[52]

[50] Aqua Exhibit 1-A, Schedule C-4.9.
[51] Aqua Exhibit 1-C, Schedule C-4.9.
[52] Aqua Statement No. 1, p. 19.

Q. WHAT IS THE BASIS FOR AQUA'S CLAIM FOR COVID-19 RELATED EXPENSES?

A. Aqua's proposes amortization for COVID-19 related deferred incremental uncollectible accounts expense followed the Commission's guidance in the May 13, 2020 Secretarial Letter regarding *COVID-19 Cost Tracking and Creation of Regulatory Asset, Docket No. M-2020-3019775* (May 13, 2020 Secretarial Letter), calculating the incremental uncollectible accounts expense based on experienced expense levels going back to 2018.[53]

Q. DO YOU AGREE WITH AQUA'S CLAIM?

A. No.

Q. WHAT ALLOWANCE DO YOU RECOMMEND FOR COVID-19 RELATED EXPENSES?

A. I recommend an allowance of $1,465,569, or a reduction of $1,465,568 ($2,931,137 - $1,465,569) to the Company's claim.

My recommendation represents a recommended allowance for Water Base operations of $1,255,588, or a reduction of $1,255,587 ($2,511,175 - $1,255,588) to the FPFTY expense claim for Aqua's Water Base operations.

[53] Aqua Statement No. 1, pp. 18-19.

Additionally, my recommendation represents a recommended allowance for WW Base operations of $209,981, or a reduction of $209,981 ($419,962 - $209,981) to the FPFTY expense claim for Aqua's WW Base operations.

Q. WHAT IS THE BASIS FOR YOUR RECOMMENDATION?

A. My recommendation for COVID-19 related expenses is based on adjusting the amortization period in line with the Company's experienced average historic base rate filing frequency of 48 months, as described above in the Rate Case Expense section above. Aligning the recovery of the total amount of $5,862,274 with Aqua's average historic filing frequency provides a more accurate FPFTY COVID-19 related allowance.

Applying a 48-month amortization period produces an annual allowance of $1,465,569 [($5,862,274 ÷ 48 months) x 12]. To determine the proper allocation for the Water Base and WW Base systems, I used the original percentage for each system's expense to the total COVID-19 related expense claim: Water Base – 85.67% ($2,511,175 ÷ $2,931,137) and WW Base – 14.33% ($419,962 ÷ $2,931,137). Applying this ratio to my recommended adjustment of $1,465,568 yields my recommended FPFTY expense claim reductions of $1,255,587 for Water Base operations, and $209,981 for WW Base operations.

GENERAL PRICE LEVEL ADJUSTMENT

Q. BRIEFLY EXPLAIN THE NATURE OF A GENERAL PRICE LEVEL ADJUSTMENT.

A. A general price level adjustment is an attempt to project an estimated increase in expenses that are inflation-sensitive, for which known and measurable changes are not determined. The effect is the blanket inflation adjustment brings the inflation-sensitive expenses, not otherwise adjusted by known and measurable changes, up to a projected level for ratemaking purposes.

Q. WHAT GENERAL PRICE LEVEL ADJUSTMENT HAS AQUA APPLIED TO UNADJUSTED O&M EXPENSES?

A. The Company is proposing specific expense adjustments for the known and measurable changes in certain categories of FTY and FPFTY expense claims for ratemaking. However, Aqua applied a general price level adjustment to FTY and FPFTY O&M expenses that have not been specifically adjusted otherwise to determine the FTY and FPFTY adjustment levels.[54] The result is the Company's total general price level adjustment claims of $874,179 for the FTY, and $852,097 for the FPFTY, representing the combined claims for the Water Base, Shenandoah, WW Base, and Lower Makefield systems as shown below:[55]

[54] Aqua Statement No. 3, pp. 2-3.
[55] Aqua Exhibits 1-A through 1-D, Schedule C-4.1.

System	FTY Price Level Adjustment	FPFTY Price Level Adjustment	Total Price Level Adjustments
Water Base	$658,553	$639,668	$1,298,221
Shenandoah	$14,130	$13,727	$27,857
WW Base	$190,002	$187,536	$377,538
Lower Makefield	$11,494	$11,166	$22,660
Total	$874,179	$852,097	$1,726,276

Q. WHAT IS THE BASIS FOR AQUA'S CLAIM?

A. Aqua witness Christopher Manning states the anticipated effect of price increases on operating expenses that were not specifically adjusted otherwise was determined by applying the calculated the average gross domestic product chained price index forecast (GDP Forecast) for the four quarters of 2024, of 2.425%, to the HTY unadjusted expenses to determine FTY adjustment. The price level adjustment for the FPFTY was calculated by applying the GDP Forecast for the four quarters of 2025, of 2.300%, to the FTY unadjusted operating expenses – yielding Aqua's general price level adjustment claims.[56]

Q. DO YOU AGREE WITH AQUA'S CLAIMED GENERAL PRICE LEVEL INCREASE ADJUSTMENT TO THE UNADJUSTED O&M EXPENSES?

A. No.

[56] Aqua Statement No. 3, pp. 2-3.

Q. WHAT DO YOU RECOMMEND FOR AQUA'S GENERAL PRICE LEVEL ADJUSTMENT?

A. I recommend a disallowance of the entire general price level adjustment of $1,726,276 ($874,179 + $852,097) claimed in the FTY and FPFTY unadjusted O&M expense claims. My recommendation represents disallowance of the combined total general price level adjustment for Water Base of $1,298,221; Shenandoah of $27,857; WW Base of $377,538; and Lower Makefield of $22,660.

Q. WHAT IS THE BASIS FOR YOUR RECOMMENDATION?

A. My recommendation is based on Aqua's failure to support its claim by relying on an unsupported general price level, or blanket inflation, adjustment. Applying a blanket inflation adjustment to the total unadjusted O&M expense claims is unreasonable and unsupported when there are several categories of expenses (that may include sub-categories of expenses) within the main expense category. Additionally, applying blanket inflation factors of 2.425% and 2.300% to the unadjusted HTY and FTY expenses to develop an FPFTY claim for all unadjusted total O&M expenses is unreasonable and inappropriately impacts customers' rates. Each cost element is a separate expense claim, and therefore, each expense item should be evaluated and budgeted based on its individual merit and future known and measurable changes. I calculated my recommended allowance by removing Aqua's general price level adjustments applied to the unadjusted total O&M expense claim.

Q. DO YOU HAVE ANY ADDITIONAL SUPPORT FOR REMOVAL OF THE BLANKET INFLATION ADJUSTMENT?

A. Yes. Recently, the Commission denied a blanket increase in the 2019 Wellsboro Electric Company base rate case, in which Wellsboro applied a 3% blanket inflation adjustment (general price level adjustment) to the FTY expenses to estimate the FPFTY expenses claim, and the Commission stated that,

> [T]he Company did not demonstrate that making this blanket adjustment to each expense claim directly relates to the actual costs expected to be incurred in each expense account in the FPFTY. [57]

Additionally, in Aqua Pennsylvania's 2021 base rate case, the Commission denied a General Price Level Adjustment to expenses, which was neither targeted nor specific. Specifically, in its Order, which adopted the portion of the Administrative Law Judge's Recommended Decision that recommended denial of a general inflation adjustment, the Commission stated,

> …that allowing Aqua to apply a general inflation adjustment to a block of expenses could incentivize less accurate tracking of expenses and a less rigorous approach to controlling costs for those expenses.[58]

Finally, the Commission also denied Philadelphia Gas Works' (PGW) use of a general inflation adjustment, in PGW's 2023 base rate case, to determine FPFTY levels of expenses when separate and specific costs could not be determined, stating,

---

[57] *Pa. PUC v. Wellsboro Electric Company*, Docket No. R-2019-3008208, Opinion and Order, p. 40 (Order Entered April 29, 2020).

[58] Pa. PUC v. Aqua Pennsylvania, Inc., Docket No. R-2021-3027385, Opinion and Order, pp. 116-117 (Order Entered May 16, 2022).

> …an inflation adjustment cannot be applied broadly and does not meet the "known and reasonable" standard for increasing each FTY expense claim in the FPFTY.[59]

Considering these Commission Orders, Aqua did not meet its burden of proof in demonstrating that its proposed general price level adjustment to all affected line items of expenses would meet the "known and reasonable" standard for increasing each expense line item in the FTY and FPFTY expense claims.

CASH WORKING CAPITAL

Q. WHAT IS A CASH WORKING CAPITAL (CWC) ALLOWANCE FOR RATEMAKING PURPOSES?

A. CWC includes the amount of funds necessary to operate a utility during the interim period between the rendition of service, including the payment of related expenses, and the receipt of revenue in payment for services rendered by the utility.

Q. HOW HAS THE COMPANY CALCULATED ITS CWC CLAIM?

A. The Company calculated its CWC claim using a lead/lag study. A lead/lag study measures the differences in time between: (1) the time services are rendered until payment of those services is received; and (2) the time between the point when a utility has incurred an expense and the actual payment of the expense. Stated a

[59] Pa. PUC v. Philadelphia Gas Works, Docket No. R-2023-3037933, Opinion and Order, p. 72 (Order Entered November 9, 2023).

different way, the lead/lag study measures how many days exist on average between the midpoint of the service period and the date the payment is made.

Q. DO YOU AGREE WITH THE COMPANY'S USE OF THE LEAD/LAG METHOD?

A. Yes. I agree with the Company's use of the lead/lag method for its CWC calculation.

Q. WHAT IS THE COMPANY'S CWC CLAIM?

A. The Company's FPFTY claim for CWC is $7,707,000.[60] This claim applies only to Water Base Operations.

Q. DO YOU AGREE WITH THE COMPANY'S CLAIM?

A. No.

Q. WHAT IS YOUR RECOMMENDED ALLOWANCE FOR CWC?

A. I recommend an allowance of **[BEGIN CONFIDENTIAL]** [redacted] **[END CONFIDENTIAL]**

[60] Aqua Exhibit 1-A, Schedule G-5.
[61] I&E Exhibit No. 1, Schedule 6, p. 1 - PROPRIETARY.

Q. WHAT IS THE BASIS FOR YOUR RECOMMENDATION?

A. My recommendation includes modification of the Company's claim based on my recommended adjustments to O&M expenses and taxes as discussed previously in this testimony for the Water Base system. I do not make recommendations for Shenandoah, WW Base, and Lower Makefield because incorporating my O&M expense and tax adjustments discussed above does not yield a material change to the respective CWC claims.

Q. HOW DO YOUR PROPOSED ADJUSTMENTS, DISCUSSED ABOVE, IMPACT YOUR RECOMMENDATION FOR CWC?

A. All O&M adjustments that are cash-based expense claims are included in determining the Company's Water Base CWC requirement. Therefore, CWC was calculated to reflect these recommended adjustments. To reflect the I&E recommended adjustments, I modified the Company's electronic files, Exhibit 1-A, Schedules A-1 and C-2[62] which flowed through to the CWC files, Exhibit 1-A, Schedules G-5 and G-5.2.[63] Specifically, Schedule G-5 contains the CWC Summary with my recommendation.[64]

[62] Id., pp. 3-4 - PROPRIETARY.
[63] I&E Exhibit No. 1, Schedule 6, pp. 1-2 – PROPRIETARY.
[64] Id. – PROPRIETARY.

Q. SUMMARIZE WHERE EACH OF THE I&E RECOMMENDED O&M EXPENSE ADJUSTMENTS ARE REFLECTED IN THE CWC COMPUTATION.

A. **Schedule A-1:**

In Schedule A-1, I reduced Line 10, Column 10 for Federal and State Payroll Tax by **[BEGIN CONFIDENTIAL]** [redacted] **[END CONFIDENTIAL]** as discussed above. These adjustments flowed through the rest of Schedule A-1 as highlighted[65] and ultimately through the CWC Schedules of G-5 and G-5.2.[66]

Schedule C-2:

In Schedule C-2, I reduced Column 8 for the remaining adjustments as discussed earlier in my testimony and highlighted in my exhibit.[67] The adjustments are as follows: [**BEGIN CONFIDENTIAL]** [redacted] **[END CONFIDENTIAL]** These adjustments flowed through the rest of Schedule C-2 and ultimately into CWC Schedules G-5 and G-5.2.[68]

Q. DOES YOUR RECOMMENDED ALLOWANCE REPRESENT A FINAL RECOMMENDED ALLOWANCE FOR CWC?

A. No. All adjustments to the Company's claims for revenues, expenses, taxes, and

[65] Id., p. 3 - PROPRIETARY.
[66] Id., pp. 1-2 – PROPRIETARY.
[67] Id., p. 3 - PROPRIETARY.
[68] Id., pp. 1-2 - PROPRIETARY.

rate base must be consistently brought together in the Administrative Law Judge's Recommended Decision and again in the Commission's Final Order. This process, which is known as iteration, effectively prevents the determination of a precise calculation until such time as all adjustments have been made to the Company's claim.

PFAS TREATMENT COSTS DEFERRAL

Q. WHAT IS PFAS?

A. PFAS stands for per- and polyfluoroalkyl substances. These substances, which are widely used, long lasting chemicals that may be linked to harmful health effects, have been found in the environment, including the water supply.[69]

Q. PLEASE SUMMARIZE THE COMPANY'S REQUEST REGARDING PFAS TREATMENT COSTS.

A. Aqua is requesting Commission approval to defer costs that will be incurred but are not reflected in the instant filing and are expected to occur during or after the calendar year 2026. The Company's request includes costs associated with deferred depreciation on new assets placed into service, incremental O&M expenses incurred over the FPFTY levels established in this base rate filing, and a

[69] PFAS Explained | US EPA, accessed August 9, 2024.

carrying cost of capital while these deferred amounts are not reflected in base rates charged to customers.[70]

Q. WHAT IS THE BASIS FOR AQUA'S REQUEST TO DEFER PFAS TREATMENT COSTS?

A. Aqua witness William Packer opines the estimates for capital investments related to PFAS treatment are approximately $300,000,000 with an additional $1,500,000 ($300,000,000 x 0.05) in incremental O&M expenses forecasted to be incurred. The incremental PFAS treatment costs are related to the newly adopted EPA regulations related to PFAS treatment which are more stringent than previous standards.[71]

Q. WHAT IS YOUR RECOMMENDATION FOR PFAS TREATMENT COSTS?

A. I recommend the Commission disallow the Company's request for deferral of PFAS-related costs for ratemaking purposes.

Q. WHAT IS THE BASIS FOR YOUR RECOMMENDATION?

A. Aqua has been treating for PFAS since its first treatment system was commissioned in 2017,[72] and since then claims for PFAS treatment have been built

[70] Aqua Statement No. 1, pp. 19-20.
[71] Aqua Statement No. 11, pp. 16-17.
[72] Aqua Statement No. 11, p. 17.

into routine rate base and O&M expenses. As has been the case in previous base rate filings, the Company is able to continue to request recovery of reasonably and prudently incurred expenses related to PFAS treatment in future base rate filings that are subject to scrutiny by other parties.

Q. WHAT ARE THE GENERAL REQUIREMENTS THAT NEED TO BE MET FOR REGULATORY ASSET/LIABILITY AND RELATED COST DEFERRAL TREATMENT?

A. Specifically, the Commission has previously ruled that deferred accounting treatment may be granted if the expense is: (1) extraordinary; (2) unanticipated; (3) nonrecurring; and (4) substantial.[73] However, in this instance Aqua has clearly demonstrated that PFAS-related costs are not unanticipated or nonrecurring. These increased costs are fully anticipated and estimated as explained by Mr. Packer and summarized above. Additionally, since the Company has been expending funds every year since 2017, PFAS-related costs are clearly recurring.

Q. WHAT OTHER CONCERNS DO YOU HAVE CONCERNING DEFERRAL OF PFAS-RELATED COSTS?

A. As mentioned above, the Company has been addressing this issue since 2017. Addressing this issue over time might cause decreases in other expenses when the

[73] *Petition of Columbia Gas of Pa., Inc. for Authority to Defer for Accounting and Financial Purposes Certain Start Up Expenses Assoc. with the Redesign and Upgrade of Financial Processes and Info. Systems*, Docket No. P-2012-2319920 (Order Entered December 5, 2012).

overall filtration process to the system is improved, for example, certain chemical costs and usage might decrease. Thus, I believe the most appropriate method for addressing PFAS-related issues is through a normal budgeting and ratemaking process where the impact can be fully evaluated and addressed when it comes to all related increases and decreases to affected rate base and expense items. Thus, it would be best to address this issue in base rate proceedings via routine channels so that all changes are addressed and reviewed simultaneously. Allowing the deferral of these requested costs would improperly constitute single-issue ratemaking, because it would not capture decreases in other costs as mentioned above. Another concern is any potential awards that may be received by the Company where it may be a party in a class action lawsuit. Regardless of whether this deferral request is approved or denied, the Company should be required to share any potential class action awards with ratepayers.

Finally, it is unclear whether any net cost incurred by the Company by year from 2024 through 2029 would have a significant impact on Aqua's net earnings, given that the estimated $300 million incurred over five future years (roughly $60 million per year for rate base items) and $1.5 million over five future years ($300,000 per year for incremental O&M items) does not likely reflect other corresponding savings via expense reductions, government grants, or money received related to class action lawsuits. This is of particular concern given Aqua stated it intends to file another base rate case in two years where these changes could be addressed in a comprehensive manner.

Q. IF THE COMMISSION DECIDES TO ALLOW DEFERRAL TREATMENT FOR PFAS-RELATED COSTS, HOW SHOULD THIS BE HANDLED?

A. Rather than addressing this issue on a case by case basis, I recommend the Commission address the issue on a statewide basis. If the Commission were to determine that deferral treatment for related PFAS costs is appropriate, the update to the maximum PFAS levels will affect the operations of all water utilities throughout Pennsylvania, and, therefore, this issue should be addressed by the Commission on a statewide basis similar to how guidance was issued for changes to the federal income tax rate via the Tax Cuts and Jobs Act of 2017.

Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?

A. Yes.

INTRODUCTION OF WITNESS

Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A. My name is Zachari Walker, and my business address is Pennsylvania Public Utility Commission, Commonwealth Keystone Building, 400 North Street, Harrisburg, PA 17120.

Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?

A. I am employed by the Pennsylvania Public Utility Commission (Commission) in the Bureau of Investigation & Enforcement (I&E) as a Fixed Utility Financial Analyst.

Q. ARE YOU THE SAME ZACHARI WALKER WHO IS RESPONSIBLE FOR THE DIRECT TESTIMONY CONTAINED IN I&E STATEMENT NO. 1 AND THE SCHEDULES IN I&E EXHIBIT NO. 1?

A. Yes.

Q. DOES YOUR REBUTTAL TESTIMONY INCLUDE AN ACCOMPANYING EXHIBIT?

A. No.

Q. WHAT IS THE PURPOSE OF YOUR REBUTTAL TESTIMONY?

A. The purpose of my rebuttal testimony is to address the following direct testimony

in the Aqua Pennsylvania, Inc. and Aqua Pennsylvania Wastewater, Inc. (collectively Aqua or Company) base rate proceeding: (1) Coalition for Affordable Utility Services and Energy Efficiency in Pennsylvania (CAUSE-PA) witness Harry S. Geller, Esq.'s recommendations to increase to the Company's Leak Repair and Conservation Program (Leak Repair Program) by $268,000 ($400,000 - $132,000)[1] and that the Commission require Aqua to develop and submit a Universal Service Plan (USP) for Commission approval;[2] and (2) the Office of Consumer Advocate (OCA) witness Roger Colton's recommendation to increase the Company's Leak Repair Program budget, specifically for conservations kits by $110,000 ($132,000 - $22,000).[3]

RESPONSE TO CAUSE-PA WITNESS HARRY S. GELLER, ESQ.

Q. SUMMARIZE CAUSE-PA WITNESS GELLER'S TESTIMONY REGARDING AQUA'S LEAK REPAIR PROGRAM AND PROPOSED UNIVERSAL SERVICE PLAN REQUIREMENT.

A. In direct testimony, Witness Geller opines that the Company's annual $132,000 budget is not adequate to scale up the program across Aqua's service territory[4] and, as such, should increase its Leak Repair Program budget by $268,000 to an annual total of $400,000.[5] Additionally, Witness Geller recommends that the

1 CAUSE-PA Statement No. 1, p. 35.
2 *Id*., p. 31.
3 OCA Statement No. 6, p. 67.
4 CAUSE PA Statement No. 1, p. 34.
5 CAUSE-PA Statement No. 1, p. 35.

Commission require Aqua to submit a comprehensive USP for periodic review and approval.[6]

Leak Repair Program Budget

Q. PROVIDE A SUMMARY OF THE COMPANY'S LEAK REPAIR PROGRAM.

A. The Leak Repair Program was historically included in the Company's Helping Hand program,[7] which was replaced by the Customer Assistance Program (CAP).[8] Under the Company's CAP, the Leak Repair Program provides funding for low-income homeowners facing leak repairs they cannot afford to fix. More specifically, the annual $100,000 Leak Repair Program budget provides funds for conservation kits, in addition to the aforementioned leak repairs.[9] In the instant proceeding, Aqua Witness Rita Black is proposing to increase the Leak Repair Program annual budget by $32,000 ($132,000 - $100,000) to $132,000 based on anticipated increased awareness of the Leak Repair Program.[10]

Q. WHAT IS THE BASIS FOR WITNESS GELLER'S RECOMMENDED INCREASE TO THE LEAK REPAIR PROGRAM BUDGET?

A. Witness Geller asserts the recommended $268,000 ($400,000 - $132,000) increase

---

6 *Id*., p. 31.
7 *Joint Petition for Approval of Non-Unanimous, Complete Settlement Among Most Parties*, Docket Nos. A-2018-3006061 et al, p. 138 (Order Entered January 24, 2020).
8 Aqua Statement No. 13, p. 5.
9 *Id*., pp. 12-13.
10 *Id*., p. 14.

to the annual Leak Repair Program budget will help to mitigate the effects of the proposed rate increase for those customers that will be most affected and could provide Aqua flexibility to provide usage reduction services, especially for high usage customers enrolled in the Customer Assistance Program (CAP).[11]

Q. DO YOU HAVE ANY CONCERNS REGARDING WITNESS GELLER'S RECOMMENDATION TO INCREASE THE LEAK REPAIR PROGRAM BUDGET?

A. Yes. Witness Geller has not provided proof that the Company has been capable of utilizing its current Leak Repair Program budget nor that Aqua's proposed $32,000 increase would not be sufficient to cover the costs associated with the Leak Repair Program. Further, as Aqua's program costs are embedded in base rates and not recovered through a reconcilable rider, this recommendation simply represents an additional rate increase to ratepayers with no certainty that funds can or will be spent and no provision to ensure that ratepayers are not contributing to the Company's income in the event that funds cannot be spent. Therefore, I recommend the entire increase proposed by Witness Geller be disallowed.

[11] CAUSE-PA Statement No. 1, p. 35.

USP Requirement

Q. WHAT IS THE BASIS FOR WITNESS GELLER'S RECOMMENDATION THAT THE COMMISSION REQUIRE AQUA TO PROVIDE A COMPREHENSIVE USP?

A. CAUSE-PA Witness Geller acknowledges that water and wastewater utilities are not required to submit periodic plans related to low-income assistance programs by statute. However, Witness Geller argues that the lack of a USP does not allow for a central place for the Commission, consumers, and utility advocates to determine key information about Aqua's low-income assistance programs. Witness Geller claims that this creates confusion and thus makes it harder for customers learn about and potentially participate in these programs.[12]

Q. DO YOU HAVE ANY CONCERNS WITH WITNESS GELLER'S RECOMMENDATION?

A. Yes. Currently, other water/wastewater utilities are not required to file USPs and Aqua should not be treated differently.

Commission regulations requiring utilities to develop universal service plans currently only apply to electric and natural gas utilities.[13] In my opinion, a requirement for water and wastewater utilities to file comprehensive USPs should

[12] CAUSE-PA Statement No. 1, p. 31.
[13] 52 Pa. Code § 69.261.

only follow Commission-issued, statewide guidance rather than directing any individual water/wastewater utility to do so on a piecemeal basis.

Ratepayers should not be required to bear the costs of an official filing, especially when the targeted programs are voluntarily developed, and the potential for a less costly solution exists, such as modifying the current Customer Assistance Programs page on the Company's website[14] to include additional pertinent information. Therefore, I recommend the Commission reject Witness Geller's recommendation requiring Aqua to file a comprehensive USP.

Q. ARE THERE ANY RECENT COMMISSION DECISIONS THAT SUPPORT YOUR ARGUMENT?

A. Yes. Most recently the Commission stated the following related to its decision to reject recommendations that Pennsylvania-American Water Company (PAWC) be directed to develop conservation programs in that base rate case,

> In the absence of a regulation that mandates a [Low-Income Usage Reduction Program] LIURP for water companies, similar to the regulation that exists for electric distribution companies and natural gas distribution companies, we find it inappropriate for the Commission to impose such an obligation on PAWC alone.[15]

Considering the statement above, and without prior Commission-issued statewide guidance, Witness Geller's recommendation is inappropriate. In short, I

[14] Aqua | Customer Assistance Programs (aquawater.com), (https://www.aquawater.com/customers/customer-assistance-programs/index.php) accessed September 4, 2024.

[15] *PA Public Utility Commission et al v. PA American Water Company*, Docket Nos. R-2023-3043189 et al, p. 346 (Order Entered July 22, 2024).

recommend the Commission reject Mr. Geller's recommendation to require Aqua to develop a comprehensive USP.

RESPONSE TO OCA WITNESS ROGER COLTON

Q. SUMMARIZE OCA WITNESS COLTON'S TESTIMONY REGARDING AQUA'S LEAK REPAIR PROGRAM.

A. Witness Colton recommends that Aqua increase its annual funding for conservation kits from $22,000 to $132,000 to match the Company's proposed budget for the entire Leak Repair Program.[16]

Q. WHAT IS THE BASIS FOR WITNESS COLTON'S RECOMMENDATION?

A. By increasing the conservation kit budget portion of the Leak Repair Program by $110,000 ($132,000 - $22,000), OCA Witness Colton suggests Aqua would be able to provide conservation kits to all new CAP participants while still having a sufficient stockpile of kits to distribute to energy companies with overlapping service territories to augment the delivery of their existing LIURP services.[17]

[16] OCA Statement No. 6, p. 67.
[17] *Id.*, pp. 67-68.

Q. DO YOU HAVE CONCERNS REGARDING WITNESS COLTON'S RECOMMENDED INCREASE TO THE LEAK REPAIR PROGRAM?

A. Yes. Witness Colton has not provided proof that the Company has been capable of utilizing its current Leak Repair Program budget nor that Aqua's proposed $32,000 increase will not be sufficient to cover the benefits provided by the Leak Repair program. Furthermore, increasing the budget for this program at Aqua for the purpose of augmenting the programs of other energy companies with overlapping territories unnecessarily increases customer costs at Aqua for the only utility type deemed necessary to sustain life, which is inappropriate. Additionally, as mentioned above, since this program funding is not reconciled by a rider, additional funding should not be placed into base rates beyond what Aqua has itself proposed that it can spend. Therefore, I recommend the entire increase proposed by Witness Colton be disallowed.

Q. DOES YOUR REBUTTAL TESTIMONY REPRESENT A COMPREHENSIVE REVIEW OF ALL USP-RELATED MATTERS?

A. No. My rebuttal testimony addresses the USP-related recommendations of the other parties that would potentially impact residential customer costs as a result. Due to the length, depth, and number of issues addressed in their direct testimony, lack of response to any specific topic or recommendation should not be interpreted as agreement with the other parties' recommendations.

Q. DOES THIS CONCLUDE YOUR REBUTTAL TESTIMONY?

A. Yes.

Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?

A. I am employed by the Pennsylvania Public Utility Commission (Commission) in the Bureau of Investigation & Enforcement (I&E) as a Fixed Utility Financial Analyst.

Q. ARE YOU THE SAME ZACHARI WALKER WHO SUBMITTED I&E STATEMENT NO. 1, I&E EXHIBIT NO. 1, AND I&E STATEMENT NO. 1-R?

A. Yes.

Q. WHAT IS THE PURPOSE OF YOUR SURREBUTTAL TESTIMONY?

A. The purpose of my surrebuttal testimony is to respond to the rebuttal testimony of Aqua Pennsylvania, Inc. and Aqua Pennsylvania Wastewater, Inc. (collectively Aqua or Company) witnesses William Packer,[1] Christopher Manning,[2] and Harold

[1] Aqua Statement No. 1-R.
[2] Aqua Statement No. 3-R.

Walker.[3] I also present the updated overall I&E recommended revenue requirement based on my updated adjustments and the updated adjustments of the other I&E witnesses.

Q. DOES YOUR SURREBUTTAL TESTIMONY INCLUDE AN EXHIBIT?

A. Yes. I&E Exhibit No. 1-SR contains schedules that support my surrebuttal testimony.

SUMMARY OF COMPANY'S REQUEST

Q. PLEASE SUMMARIZE THE COMPANY'S UPDATED REQUESTED REVENUE INCREASE.

A. In rebuttal testimony, Aqua updated its total requested increase to $126,575,271 to the updated claimed present rate revenues of $671,008,440 resulting in an updated overall revenue requirement of $797,583,710,[4] representing a combined claim for water and wastewater operations. The updated total requested revenue increase represents respective net revenue increases as follows: (1) Water Base Operations (Water Base) of $111,175,193; (2) the Municipal Authority of the Borough of Shenandoah water system (Shenandoah) of $788,630; (3) Wastewater Base Operations (WW Base) of $8,194,777; (4) Lower Makefield Township wastewater system (Lower Makefield) of $2,568,544; and (5) East Whiteland Township

[3] Aqua Statement No. 9-R.
[4] Aqua Exhibit WCP-1-R, Schedule Act 11.

wastewater system (East Whiteland) of $3,848,126.[5] In my surrebuttal testimony, I continue to refer to the Water Base and Shenandoah collectively as Water Operations, the WW Base and Lower Makefield collectively as WW Operations, and the East Whiteland system is addressed separately. The updated overall requested increase includes: (1) a revenue allocation of $1,465,416 for the Water Base from Shenandoah based on a cost of service revenue allocation (COS allocation); and (2) an additional revenue increase of $21,846,907 allocated from the wastewater systems to the Water Base per the Act 11 provision.[6]

Q. PLEASE SUMMARIZE YOUR RECOMMENDED ADJUSTMENTS.

A. The following table summarize my recommended adjustments as updated herein for each operating system:

Water Base Operations:

	Aqua FPFTY Claim	I&E Recommended Allowance	I&E Adjustment
O&M Expenses:			
Labor Expense	$37,871,393	$34,705,345	($3,166,048)
Employee Benefits	$7,791,885	$7,140,486	($651,399)
Membership Dues	$907,966	$533,620	($374,346)
Rate Case Expense	$1,149,461	$551,741	($597,720)
COVID-19 Related Expenses	$2,511,175	$1,205,364	($1,305,811)
General Price Level Adjustment	$1,298,221	$0	($1,298,221)
Total O&M Adjustments			**($7,393,545)**

[5] Aqua Exhibit WCP-1-R, Schedule Act 11.
[6] *Id.*

Taxes:			
Payroll Taxes	$3,323,126	$3,045,313	($277,813)
Total Tax Adjustments			**($277,813)**
Rate Base Adjustments:			
Cash Working Capital	$7,704,000	$7,289,000	($415,000)
Total Rate Base Adjustments			**($415,000)**

Shenandoah Operations:

	Aqua FPFTY Claim	I&E Recommended Allowance	I&E Adjustment
O&M Expenses:			
Labor Expense	$350,852	$321,521	($29,331)
Employee Benefits	$210,511	$192,912	($17,599)
Rate Case Expense	$7,668	$3,681	($3,987)
General Price Level Adjustment	$27,857	$0	($27,857)
Total O&M Adjustments			**($78,774)**

WW Base Operations:

	Aqua FPFTY Claim	I&E Recommended Allowance	I&E Adjustment
O&M Expenses:			
Labor Expense	$3,523,869	$3,229,274	($294,595)
Employee Benefits	$2,114,321	$1,937,564	($176,757)
Membership Dues	$332	$0	($332)
Rate Case Expense	$107,648	$51,671	($55,977)
COVID-19 Related Expenses	$419,962	$201,582	($218,380)
General Price Level Adjustment	$377,538	$0	($377,538)
Total O&M Adjustments			**($1,123,579)**

Lower Makefield Operations:

	Aqua FPFTY Claim	I&E Recommended Allowance	I&E Adjustment
O&M Expenses:			
Labor Expense	$160,932	$147,478	($13,454)
Employee Benefits	$96,559	$88,487	($8,072)
Rate Case Expense	$29,760	$14,285	($15,475)
General Price Level Adjustment	$22,660	$0	($22,660)
Total O&M Adjustments			**($59,661)**

SUMMARY OF I&E OVERALL UPDATED POSITION

Q. IN THE INSTANT PROCEEDING, AQUA HAS INCLUDED A SEPARATE REVENUE REQUIREMENT FOR THE EAST WHITELAND SYSTEM. HAS I&E'S POSITION ON THE INCLUSION OF THE EAST WHITELAND WASTEWATER SYSTEM CHANGED?

A. No. As restated in I&E Witness Ethan Cline's surrebuttal testimony,[7] and described in I&E Witness Ethan Cline's direct testimony, due to the circumstances surrounding the legitimacy of the Company's acquisition of the East Whiteland system for ratemaking purposes, I&E is recommending removal of any rate base, acquisition costs, expenses, taxes, and any revenue shortfall, including the proposed Act 11 allocation of $3,144,592 from consideration in the instant proceeding for ratemaking purposes.[8]

[7] I&E Statement No. 3-SR, p. 3.
[8] I&E Statement No. 3, pp. 8-10.

Q. DOES THIS TESTIMONY REPRESENT A COMPLETE ELIMINATION OF ALL EXPENSE CLAIMS RELATED TO THE EAST WHITELAND SYSTEM?

A. No. Similar to my direct testimony,[9] due to the nature of expense categorization and reporting, my surrebuttal testimony represents a best effort to untie expenses related to the East Whiteland system from the rest of the Company's expenses. A lack of response to any topic should not be interpreted as agreement with the inclusion of any items related to Aqua's acquisition or operation of the East Whiteland system for ratemaking purposes.

Q. PLEASE SHOW THE I&E UPDATED RECOMMENDATION FOR EACH INDIVIDUAL REVENUE REQUIREMENT.

A. I&E's updated recommended revenue requirements are presented separately for each system prior to the COS and Act 11 allocations for Water Base operations, Shenandoah operations, WW Base operations, and Lower Makefield operations as shown below:

Q. SUMMARIZE I&E'S UPDATED COMBINED RECOMMENDED REVENUE REQUIREMENT INCLUDING THE I&E RECOMMENDED ACT 11 ALLOCATION.

A. I&E's updated total recommended revenue requirement for all Aqua revenue requirements combined is $721,697,187. This recommended revenue requirement represents an increase of $54,213,829 to the present rates revenues of $667,483,358.[10] This updated total recommended allowance incorporates my adjustments made in this testimony to O&M expenses, taxes, and cash working capital, and those recommended adjustments made in the testimony of I&E witnesses Christopher Keller[11] and Ethan Cline.[12]

Q. PLEASE SHOW THE COMPUTATION FOR I&E'S UPDATED PROPOSED ACT 11 REVENUE ALLOCATION AS SUPPORTED BY I&E WITNESS ETHAN CLINE IN I&E STATEMENT NO. 3-SR.

A. The I&E updated proposed Act 11 allocation as recommended by I&E witness Ethan Cline[13] is summarized below in Table II:

[10] *See Table II below.*
[11] I&E Statement No. 2.
[12] I&E Statement No. 3.
[13] *Id*.

*Per I&E witness Ethan Cline, I&E Statement No. 3-SR.

LABOR EXPENSE

Q. SUMMARIZE YOUR RECOMMENDATION FOR LABOR EXPENSE AS PRESENTED IN YOUR DIRECT TESTIMONY.

A. I recommended the following allowances for labor expense:

Water Base: $36,258,072, or a reduction of $1,613,321 ($37,871,393 - $36,258,072) to the Company's claim.

Shenandoah: $335,906 or a reduction of $14,916 ($350,852 - $335,906) to the Company's claim.

WW Base: $3,373,752, or a reduction of $150,117 ($3,523,869 - $3,373,752) to the Company's claim.

Lower Makefield: $154,076, or a reduction of $6,856 ($160,932 - $154,076) to the Company's claim.

My recommended labor expense adjustments were based on applying a vacancy percentage for full-time employees of 4.26% to each of the Company's respective systems' labor expense claims.[14]

Q. DID ANY WITNESS ADDRESS YOUR RECOMMENDATION?

A. Yes. Aqua Witness Christopher Manning disagrees with my recommendation.[15]

Q. SUMMARIZE MR. MANNING'S RESPONSE.

A. Mr. Manning opines my vacancy rate adjustment is inaccurate for three main reasons: (1) my recommended adjustment double counts a vacancy credit built into the Company's expense claim; (2) my calculated vacancy rate only considers the vacancy rate of full-time employees and applies that vacancy rate to the whole labor expense claim for each system; and (3) my vacancy rate calculation does not account for the seven additional union employees resulting from the acquisition of the Shenandoah system in July 2023.[16]

Q. WHAT IS YOUR RESPONSE TO MR. MANNING'S ASSERTIONS?

A. Presumably the Company would have factored in the seven additional union employees when determining the budget for union full-time employees. Second, the intent of calculating the average vacant positions is to flatten the variability of

[14] I&E Statement No. 1, pp. 12-14.
[15] Aqua Statement No. 3-R, p. 4.
[16] Aqua Statement No. 3-R, pp. 4-5.

vacant positions. To these points, Mr. Manning's statement that my recommended vacancy rate adjustment disregards the additional seven union employees as a result of the Shenandoah system acquisition suggests Aqua may not have calculated its budgeted headcount properly as I relied on the data provided by the Company.

Mr. Manning's argument that my calculated vacancy rate should be applied to the Company's labor expense representative to the specific employee groups used to calculate the vacancy rate is compelling. In light of this suggestion, I am updating my recommendation to include the part-time, seasonal, and co-op employee vacancies in my calculation.

Q. WHAT ARE YOUR UPDATED RECOMMENDED ALLOWANCES FOR LABOR EXPENSE?

A. The updated adjustments result in the following updated recommended allowances for labor expense:

Water Base: $34,705,345, or a reduction of $3,166,048 ($37,871,393 - $34,705,345) to the Company's claim.

Shenandoah: $321,521 or a reduction of $29,331 ($350,852 - $321,521) to the Company's claim.

WW Base: $3,229,274, or a reduction of $294,595 ($3,523,869 - $3,229,274) to the Company's claim.

Lower Makefield: $147,478, or a reduction of $13,454 ($160,932 - $147,478) to the Company's claim.

Q. SHOW HOW YOU CALCULATED YOUR UPDATED RECOMMENDATIONS.

A. Using the data provided in the responses to I&E-RE-3[17] and I&E-RE-35,[18] my updated recommended vacancy rate is 8.36%. The calculation for this vacancy rate is as follows:

Average Part-Time Employee Count Calculation					
Year	Quarter 1	Quarter 2	Quarter 3	Quarter 4	Annual Average
2021	4	4	4	4	4
2022	5	5	4	3	4
HTY	2	4	4	4	4

Average Seasonal Employee Count Calculation					
Year	Quarter 1	Quarter 2	Quarter 3	Quarter 4	Annual Average
2021	0	17	17	0	9
2022	0	20	21	0	10
HTY	0	20	23	1	11

Average Co-op Employee Count Calculation					
Year	Quarter 1	Quarter 2	Quarter 3	Quarter 4	Annual Average
2021	2	2	2	2	2
2022	2	2	1	2	2
HTY	1	2	1	2	2

[17] I&E Exhibit No. 1-SR, Schedule 1, pp. 1-2.
[18] *Id.*, Schedule 2, pp. 1-2.

	Total Employee Vacancy Rate Calculation					
		2021	2022	HTY	FTY	FPFTY
1	Average Employee Count[19]	575	576	577		
2	Budgeted Employee Count[20]	627	628	631	630	630
3	Vacant Positions (Line 2 – Line 1)	52	52	54		
4	Average Vacancy (Line 3 ÷ 3)	53				
5	Vacancy Rate (Line 5 ÷ Line 2 FPFTY)	8.36%				

Applying the updated calculated average vacancy rate of 8.36% to the individual labor expense claims produces the following recommended adjustments:

Water Base: $37,871,393 x 0.0836 = $3,166,048

Shenandoah: $350,852 x 0.0836 = $29,331

WW Base: $3,523,869 x 0.0836 = $294,595

Lower Makefield: $160,932 x 0.0836 = $13,454

EMPLOYEE BENEFITS EXPENSE

Q. SUMMARIZE YOUR RECOMMENDATION FOR EMPLOYEE BENEFITS EXPENSE AS PRESENTED IN YOUR DIRECT TESTIMONY.

A. I recommended the following amounts for employee benefits expense:

Water: $7,459,951, or a reduction of $331,934 ($7,791,885 - $7,459,951) to the Company's claim.

[19] Average Employee Count represents the sum of the actual average annual employee count for all employees.
[20] Budgeted Employee Count represents the sum of the annual budgeted employee count for all employees.

Shenandoah: $201,543, or a reduction of $8,968 ($210,511 - $201,543) to the Company's claim.

WW Base: $2,024,251, or a reduction of $90,070 ($2,114,321 - $2,024,251) to the Company's claim.

Lower Makefield: $92,446 or a reduction of $4,113 ($96,559 - $92,446) to the Company's claim.

My recommended employee benefits expense adjustments were based on the employee vacancy rate of 4.26% applied to the Company's respective systems' labor expense claim as noted in the labor expense section above. A detailed explanation of my calculation can be found in my direct testimony.[21]

Q. DID ANY WITNESS ADDRESS YOUR RECOMMENDATION?

A. Yes. Witness Manning disagrees with my recommended adjustment to employee benefits based on his disagreement with my recommended vacancy adjustment for labor expense.[22]

Q. WHAT IS YOUR RESPONSE TO WITNESS MANNING'S ASSERTION?

A. In line with my recommended update to the vacancy rate and subsequent updated labor expense recommendation, I recommend a further reduction to employee

[21] I&E Statement No. 1, pp. 16-17.
[22] Aqua Statement No. 3-R, p. 10.

benefits expense using the recommended vacancy rate described in the labor expense section above.

Q. WHAT IS YOUR UPDATED RECOMMENDATION FOR EMPLOYEE BENEFITS EXPENSE?

A. My updated recommendation for employee benefits expense for each system are as follows:

Water: $7,140,486, or a reduction of $651,399 ($7,791,885 - $7,140,486) to the Company's claim.

Shenandoah: $192,912, or a reduction of $17,599 ($210,511 - $192,912) to the Company's claim.

WW Base: $1,937,564, or a reduction of $176,757 ($2,114,321 - $1,937,564) to the Company's claim.

Lower Makefield: $88,487, or a reduction of $8,072 ($96,559 - $88,487) to the Company's claim.

Q. PLEASE SHOW THE CALCULATIONS FOR YOUR UPDATED RECOMMENDED ADJUSTMENTS.

A. I multiplied the vacancy rate of 8.36% by the individual employee benefits expense claims which produces the following recommended adjustments:

Water: $7,791,885 x 0.0836 = $651,399

Shenandoah: $210,511 x 0.0836 = $17,599

WW Base: $2,114,321 x 0.0836 = $176,757

Lower Makefield: $96,559 x 0.0836 = $8,072

FEDERAL AND STATE PAYROLL TAX EXPENSE

Q. SUMMARIZE YOUR RECOMMENDATION FOR FEDERAL AND STATE PAYROLL TAX EXPENSE AS PRESENTED IN YOUR DIRECT TESTIMONY.

A. I recommended a federal and state payroll tax expense allowance of $3,181,561, or a reduction of $141,565 ($3,323,126 - $3,181,561) to the Company's claim for Water Base. My recommendation in my direct testimony was based on applying the vacancy rate of 4.26%, as described in the labor expense section above, to the Company's Water Base system claim.[23] Because Aqua allocates the Water Base expense to the other systems as a component of the allocated employee benefits expense,[24] my recommendation above accounted for the remaining systems' adjustments.

Q. DID ANY WITNESS ADDRESS YOUR RECOMMENDATION?

A. Yes. Aqua Witness Christopher Manning disagrees with my recommended federal and state payroll tax adjustment based on his disagreement with my recommendation for Aqua's labor expense.[25]

[23] I&E Statement No. 1, p. 18.
[24] Aqua Statement No. 1, p. 15.
[25] Aqua Statement No. 3-R, p. 8.

Q. DO YOU HAVE ANY UPDATES TO YOUR FEDERAL AND STATE PAYROLL TAX EXPENSE RECOMMENDATION?

A. My updated recommended allowance for federal and state payroll tax expense is $3,045,313, or a reduction of $277,813 ($3,323,126 - $3,045,313) to the Company's claim. This updated recommendation is based on my updated recommended vacancy rate, as described in the labor expense section above, applied to the Company's Water claim for federal and state payroll tax of $3,323,126 for a recommended adjustment of $277,813 ($3,323,126 x 0.0836).

As explained in my direct testimony, I have no corresponding adjustments to federal and state payroll tax expense for the other revenue requirements as those adjustments are contained in the benefits allocation.[26]

MEMBERSHIP DUES

Q. SUMMARIZE YOUR RECOMMENDATION FOR MEMBERSHIP DUES AS PRESENTED IN YOUR DIRECT TESTIMONY.

A. I recommended disallowing the entire WW Operations membership dues claim of $332, and I recommended an allowance of $533,620 for Water Operations, or a decrease of $374,346 ($907,966 - $533,620) to the Water Operations' membership dues claim based on the following: (1) removal of the payment made to the Chamber of Commerce for Water Operations; and (2) on advice of counsel, "No

[26] I&E Statement No. 1, pp. 17-18.

public utility may charge to its customers as a permissible operating expense for ratemaking purposes membership fees, dues or charges to fraternal, social or sports clubs or organizations."[27] Because it is unclear how the membership dues are allocated outside of the overall Water Operations and Wastewater Operations, the recommended adjustments were applied solely to the larger respective systems.[28]

Q. DID ANY WITNESS ADDRESS YOUR RECOMMENDATION?

A. Yes. Aqua Witness Christopher Manning opposes my recommendation.[29]

Q. SUMMARIZE MR. MANNING'S RESPONSE.

A. Mr. Manning states that the dues paid to the Chamber of Commerce allow for partnerships in the areas the Company serves and provides the opportunity to interact with business leaders across Pennsylvania to promote a strong business climate, subsequently promoting jobs, increase in state population, and supporting the areas the Company serves. Mr. Manning does not offer support for the inclusion of the dues paid to the Service/Social – Other organizations.[30]

---

[27] *66 Pa. Code § 1316.1*.
[28] I&E Statement No. 1, pp. 20-21.
[29] Aqua Statement No. 3-R, pp. 14-15.
[30] *Id*.

Q. WHAT IS YOUR RESPONSE TO MR. MANNING'S REBUTTAL TESTIMONY REGARDING MEMBERSHIP DUES?

A. Since the information was not provided, I have not reviewed the data that supports Mr. Manning's claims that the interactions and partnerships have a notable impact on the communities served by the Company, the job market, or the state population. Regardless, Mr. Manning has not provided relevant information supporting the assertion that the costs incurred from paying membership dues to the Chamber of Commerce are necessary to provide safe and reliable water service.

Additionally, Mr. Manning did not contest my recommendation to remove the payments made to the Service/Social – Other organizations for ratemaking purposes. Therefore, I have no changes to my recommendation to disallow these expenses from the Company's membership dues expense claim for ratemaking purposes.

<u>RATE CASE EXPENSE</u>

Q. SUMMARIZE YOUR RECOMMENDATION FOR RATE CASE EXPENSE AS PRESENTED IN YOUR DIRECT TESTIMONY.

A. I recommended normalizing the total claims over the historic average filing frequency of 48 months, yielding my recommended FPFTY allowance amounts for rate case expense for each system below:

Water: $574,731, or a reduction of $574,730 ($1,149,461 - $574,731) to the Company's claim.

Shenandoah: $3,834, or a reduction of $3,834 ($7,668 - $3,834) to the Company's claim.

WW Base: $53,824, or a reduction of $53,824 ($107,648 - $53,824) to the Company's claim.

Lower Makefield: $14,880 or a reduction of $14,880 ($29,760 - $14,880) to the Company's claim.

My recommendation is based on adjusting the normalization for the total rate case expense allowance over a period of 48 months consistent with the Company's historic average base rate case filing frequency and the Commission's emphasis on the importance of considering the utility's history of rate case filings when determining the interval to account for rate case expenses for ratemaking purposes.[31]

Q. DID ANY WITNESS ADDRESS YOUR RECOMMENDATION?

A. Yes. Aqua Witness Christopher Manning disagrees with my recommendation.[32]

Q. SUMMARIZE MR. MANNING'S RESPONSE.

A. Mr. Manning states that my recommended 48-month normalization period ignores

[31] I&E Statement No. 1, pp. 24-25.
[32] Aqua Statement No. 3-R, p. 13.

the reason for the gap between the rate case filings in 2011 and 2018 which was due to the use of a tax repair deduction for income tax purposes. Additionally, Mr. Manning contends that Company had requested normalization periods of 36 months in the two most recent rate case filings and that the actual period of time between filings, 36 and 33 months respectively, demonstrated the Company's ability to stick to the normalization periods it requested.[33] Lastly, Witness Manning asserts that my recommendation in direct testimony only concerns the normalization period for the expense and does not dispute the Company's total rate case expense claim.[34]

Q. WHAT IS YOUR RESPONSE TO MR. MANNING'S ASSERTIONS?

A. First, Mr. Manning's claim that my recommendation does not dispute the Company's total rate case expense claim is a mischaracterization of my direct testimony. As stated in my direct testimony[35] and in the summary of I&E overall updated position section above, I&E's recommendation to remove the East Whiteland system from consideration in the instant proceeding for ratemaking purposes inherently disputes Aqua's total rate case expense claim. Since my recommendations are separate adjustments to each of the Company's individual systems' rate case expense claims, excluding the East Whiteland system, that flow through to the respective revenue requirement of each system and to I&E's overall

[33] *Id.*
[34] *Id.*, pp. 12-13.
[35] I&E Statement No. 1, pp. 5-6.

recommended base rates revenue increase exclusive of the East Whiteland system, my recommendation intrinsically disputes any allowance for rate case expense for the Company's East Whiteland system.

Next, the Commission rulings on six base rate cases referenced in my direct testimony[36] support my recommendation to use the Company's average historic filing frequency to determine a normalization period, rather than speculation of future intent to file a rate case. The Company's proposed normalization period is not reliable, is unjustified, and has the potential of unfairly burdening ratepayers with over-recovery of rate case expense should the Company not file as intended.

Finally, Mr. Manning's comment about the 36-month and 33-month respective intervals between Aqua's base rate filings caused me to realize that the base rate case filing dates provided by the Company in response to I&E-RE-4[37] are incorrect. The accurate filing dates for the Company's three previous base rate case filings are as follows: November 18, 2011;[38] August 17, 2018;[39] and August 20, 2021.[40] Including the current rate case, which was filed on May 23, 2024, the average historic filing frequency, when using the correct filing dates, is 50 months [(81 months + 36 months + 33 months) ÷ 3].

[36] *Id.*, pp. 26-27.
[37] I&E Exhibit No. 1-SR, Schedule 3, pp. 1-2.
[38] *Id.*, Schedule 4.
[39] *Id.*, Schedule 5.
[40] *Id.*, Schedule 6.

Q. DO YOU HAVE ANY CHANGES TO YOUR RECOMMENDATION FOR RATE CASE EXPENSE?

A. Yes. Given the actual average historic filing frequency is 50 months, rather than the 48 months calculated from the erroneous filing dates provided, I am updating my recommendation to the following FPFTY allowance amounts for rate case expense for each system below:

Water Base: $551,741, or a reduction of $597,720 ($1,149,461 - $551,741) to the Company's claim.

Shenandoah: $3,681, or a reduction of $3,987 ($7,668 - $3,681) to the Company's claim.

WW Base: $51,671, or a reduction of $55,977 ($107,648 - $51,671) to the Company's claim.

Lower Makefield: $14,285 or a reduction of $15,475 ($29,760 - $14,285) to the Company's claim.

The basis for my recommendation has not changed: (1) consistent Commission emphasis on the importance of considering the utility's history of rate case filings when determining the interval to account for rate case expenses for ratemaking purposes as demonstrated in the cases outlined in my direct testimony;[41] (2) demonstrated concerns when the normalization period is based on

[41] I&E Statement No. 1, pp. 26-27.

speculative intent to file future cases;[42] and (3) protecting ratepayers from paying an unreasonable rate case expense amount in rates.

COVID-19 RELATED EXPENSES

Q. SUMMARIZE YOUR RECOMMENDED ALLOWANCE FOR COVID-19 RELATED EXPENSES AS PRESENTED IN DIRECT TESTIMONY.

A. My recommended allowance of $1,465,569, or a reduction of $1,465,568 ($2,931,137 - $1,465,569) to the Company's claim, represented a recommended allowance for Water Base operations of $1,255,588, or a reduction of $1,255,587 ($2,511,175 - $1,255,588) to the FPFTY expense claim for Aqua's Water Base operations and a recommended allowance for WW Base operations of $209,981, or a reduction of $209,981 ($419,962 - $209,981) to the FPFTY expense claim for Aqua's WW Base operations.

My recommendation was based on aligning the recovery of the total amount of $5,862,274 with Aqua's average historic filing frequency and allocated to the Water Base and WW Base systems using the original percentage for each system's expense to the total COVID-19 related expense claim: Water Base – 85.67% and WW Base – 14.33%.[43]

[42] *Id.,* p. 25.
[43] I&E Statement No. 1, pp. 30-31.

Q. DID ANY WITNESS ADDRESS YOUR RECOMMENDATION?

A. Yes. Aqua Witness William Packer disagrees with my recommendation.[44]

Q. SUMMARIZE MR. PACKER'S RESPONSE.

A. Mr. Packer states that my recommendation relies on a simple historical average which is allegedly no longer appropriate going forward as it includes the 81-month interval between the 2011 and 2018 base rate case filings, which was due to a historic tax repair provision. He contends that, at the very least, this long stay out should be excluded from the calculation of the historic average filing frequency calculation. Mr. Packer also states that the Company bears the carrying cost since the deferred amounts are not being requested as a component of rate base.[45]

Q. WHAT IS YOUR RESPONSE TO MR. PACKER'S ASSERTION?

A. By using the Company's average historic filing frequency rather that the Company's two-year amortization period to determine the annual amortization for the COVID-19 related expenses, the recovery of these expenses embedded in rates does not impact ratepayers as drastically. Additionally, if the Company does not file its next base rate case in two years, the Company would continue to recover the entire FPFTY COVID-19 related expense claim embedded in rates and would over-recover COVID-19 related expenses. Counter to that, if my recommendation

[44] Aqua Statement No. 1-R, p. 10.
[45] *Id.*

is adopted and the Company files its next base rate case prior to full recovery of the COVID-19 related expenses, Aqua would continue to amortize the remaining balances until the full amount is recovered. If my recommendation is not adopted, Aqua's ratepayers could be unjustly burdened with overpayment of accrued COVID-19 related expenses, which would totally discount Mr. Packer's argument about no recovery of carrying costs. Thus, I continue to recommend that Aqua's average historic filing frequency be used to determine the amortization period for the COVID-19 related expenses.

Q. DO YOU HAVE ANY CHANGES TO YOUR RECOMMENDATION FOR COVID-19 RELATED EXPENSES?

A. Yes. As described above in the rate case expense section, my calculation for the Company's average historic filing frequency has been corrected to 50 months. Applying a 50-month amortization period for amortization of COVID-19 related expenses produces an annual allowance of $1,406,946 [($5,862,274 ÷ 50 months) x 12]. Again, I used the original percentage for each system's expense to the total COVID-19 related expense claim: Water Base – 85.67% ($2,511,175 ÷ $2,931,137) and WW Base – 14.33% ($419,962 ÷ $2,931,137) to determine the proper allocation to each system. Applying this ratio to my recommended adjustment of $1,406,946 yields my recommended FPFTY expense reductions of $1,305,811 for Water Base operations, and $218,380 for WW Base operations.

The adjustments above represent a recommended allowance of $1,205,364, or a reduction of $1,305,811 ($2,511,175 - $1,205,364) to the FPFTY expense claim for Aqua's Water Base operations.

Additionally, my recommendation represents a recommended allowance for WW Base operations of $201,582, or a reduction of $218,380 ($419,962 - $201,582) to the FPFTY expense claim for Aqua's WW Base operations.

Q. ARE THERE RECENT COMMISSION DECISIONS THAT SUPPORT YOUR RECOMMENDATION FOR AMORTIZING COVID-19 RELATED EXPENSES BASED ON AVERAGE HISTORICAL FILING FREQUENCY?

A. Yes. In the 2023 Philadelphia Gas Works (PGW) base rate case, the Commission adopted I&E's recommendation to amortize PGW's COVID-19 expense over a 53-month period, aligning with PGW's average historical filing frequency.[46]

GENERAL PRICE LEVEL ADJUSTMENT

Q. SUMMARIZE YOUR RECOMMENDATION FOR AQUA'S GENERAL PRICE LEVEL ADJUSTMENT AS PRESENTED IN YOUR DIRECT TESTIMONY.

A. I recommended a disallowance of the entire general price level adjustment of

[46] *PA PUC v. Philadelphia Gas Works*, Docket No. R-2023-3037933, Opinion and Order, p. 68 (Order Entered November 9, 2023).

$1,726,276 ($874,179 + $852,097) claimed in the FTY and FPFTY unadjusted O&M expense claims. My recommendation represented a disallowance of the combined total general price level adjustment for Water Base of $1,298,221; Shenandoah of $27,857; WW Base of $377,538; and Lower Makefield of $22,660 based on Aqua's failure to support its claim by relying on an unsupported general price level, or blanket inflation, adjustment. Applying a blanket inflation adjustment to the FPFTY total unadjusted O&M expense claims is unreasonable and unsupported when there are several categories of expenses (that may include sub-categories of expenses) within the main expense category. Additionally, applying blanket inflation factors of 2.425% and 2.300% respectively across the unadjusted FTY and FPFTY expenses in all cost elements of unadjusted total O&M expenses is unreasonable and inappropriately impacts customers' rates. Each cost element is a separate expense claim, and therefore, each expense item should be evaluated and budgeted based on its individual merit and future known and measurable changes. I calculated my recommended allowance by removing Aqua's FTY and FPFTY general price level adjustment applied to the unadjusted total O&M expense claim.[47] My recommendation was also supported by recent Commission decisions that denied inflation adjustments similar to Aqua's general price level adjustment as described in my direct testimony.[48]

[47] I&E Statement No. 1, pp. 33-34.
[48] *Id.*, pp. 35-36.

Q. DID ANY WITNESS ADDRESS YOUR RECOMMENDATION?

A. Yes. Aqua Witness Christopher Manning disagrees with my recommendation.[49]

Q. SUMMARIZE WITNESS MANNING'S RESPONSE.

A. Mr. Manning maintains that the general price level adjustment does not represent a blanket generalized inflation adjustment. Explaining further, Mr. Manning contends that the Company's adjustment reflects the anticipated effect of inflation only on operating expenses that were not specifically adjusted in this case and that it is appropriate to use such an adjustment given the current economic conditions and the Company's analysis of the historical costs. Additionally, he refers to the Office of Consumer Advocate (OCA) Witness Ralph Smith's direct testimony in which Mr. Smith references the Commission's ruling, in the 2020 PECO – Gas base rate case, in favor of a targeted inflation adjustment.[50] Finally, Mr. Manning proposes my recommendation should be rejected based on a lack of consideration of historical expense increases or current and anticipated economic conditions.[51]

Q. WHAT IS YOUR RESPONSE TO WITNESS MANNING'S ASSERTION?

A. As stated in my direct testimony, applying a blanket inflation adjustment to the FPFTY total unadjusted O&M expense claims is unreasonable and unsupported when there are several categories of expenses (that may include sub-categories of

[49] Aqua Statement No. 3-R, p. 11.
[50] Aqua Statement No. 3-R, p. 11; OCA Statement No. 2, pp. 39-40.
[51] Aqua Statement No. 3-R, pp. 11-12.

expenses) within the main expense category.[52] As noted in Mr. Manning's rebuttal testimony, OCA Witness Smith's direct testimony referring to the 2020 PECO – Gas Division's case and the Commission's ruling in favor of an inflation adjustment was based on a more targeted approach. Mr. Manning has not offered any novel support or more targeted basis for the Company's general price level adjustment. Moreover, using historic cost level increases in certain expense categories as justification for inflating a group of expenses by the Consumer Price Index factor does not support a claim for the broad brush increase to multiple unadjusted expenses. Therefore, the argument to use an inflation factor to determine future expense levels is unsubstantiated; thus, I recommend the Commission disallow the general price level, blanket inflation, adjustment for ratemaking purposes.

Q. DO YOU HAVE ANY CHANGES TO YOUR RECOMMENDATION FOR THE COMPANY'S GENERAL PRICE LEVEL ADJUSTMENT?

A. No. For the reasons stated above, I continue to recommend the entire general price level adjustment for the unadjusted expenses be disallowed in its entirety.

[52] I&E Statement No. 1, p. 34.

CASH WORKING CAPITAL

Q. SUMMARIZE YOUR RECOMMENDATION IN DIRECT TESTIMONY FOR CASH WORKING CAPITAL (CWC).

A. I recommended an allowance of $7,414,000, or a reduction of $293,000 ($7,707,000 - $7,414,000) to the Water Base CWC claim.[53] My recommendation included modification of the Company's claim based on my recommended adjustments to O&M expenses and taxes as discussed previously in my direct testimony for the Water Base system. Additionally, I did not make adjustments for Shenandoah, WW Base, and Lower Makefield because incorporating my O&M expense and tax adjustments did not yield a material change to the respective CWC claims.[54]

Q. DID ANY WITNESS RESPOND TO YOUR RECOMMENDATION?

A. Yes. Aqua Witness Harold Walker disagrees with my recommended CWC adjustments in as much as Aqua's witnesses disagree with my recommended adjustments.[55]

Q. DID THE COMPANY UPDATE ITS CWC CLAIM?

A. Yes. The Company's FPFTY CWC claim has been updated to $7,704,000.[56] This

[53] I&E Statement No. 1, p. 38.
[54] *Id.*, pp. 38-40.
[55] Aqua Statement No. 9-R, p. 3.
[56] Aqua Statement No.1-R, Exhibit 1-A, Schedule G-5.

claim only applies to Water Base operations.

Q. DO YOU AGREE WITH THE COMPANY'S CWC CLAIM?

A. No. However, I have an update to my recommendation for CWC based on the changes described above to my O&M expense recommendations. As stated in my direct testimony, all O&M adjustments that are cash-based expense claims are included in determining the Company's Water Base CWC requirement. To reflect the I&E recommended adjustments for the calculated CWC, I modified the Company's electronic CWC file,[57] Exhibit 1-A, Schedules A-1 and C-2[58] which flowed through to the CWC file, Exhibit 1-A, Schedules G-5 and G-5.2.[59] Specifically, Schedule G-5 contains the CWC summary with my recommendation.[60]

Q. SUMMARIZE WHERE EACH OF THE I&E RECOMMENDED O&M EXPENSE ADJUSMENTS ARE REFLECTED IN THE CWC COMPUTATION.

A. **<u>Schedule A-1</u>:**

In Schedule A-1, I reduced Line 10, Column 10 for Federal and State Payroll Tax by $277,813 as discussed above. These adjustments flowed through the rest of

[57] The Company's electronic file is labeled Confidential; however, the data itself is included in Aqua Witness Packer's non-proprietary rebuttal testimony, Aqua Statement No. 1-R, and attached as Aqua Exhibit WCP-1-R.
[58] I&E Exhibit No. 1-SR, Schedule 7, pp. 3-4 – PROPRIETARY.
[59] *Id.*, pp. 1-2 – PROPRIETARY.
[60] I&E Exhibit No. 1-SR, Schedule 7, p. 1 – PROPRIETARY.

Schedule A-1 as highlighted[61] and ultimately through the CWC Schedules of G-5 and G-5.2.[62]

Schedule C-2:

In Schedule C-2, I reduced Column 8 for the remaining adjustments as discussed earlier in my testimony and highlighted in my exhibit.[63] The adjustments are as follows: Labor - $3,166,048, Employee Benefits - $651,399, and Other - $3,576,098. These adjustments flowed through the rest of Schedule C-2 and ultimately into CWC Schedules G-5 and G-5.2.[64]

Q. BASED ON THE ABOVE TESTIMONY, WHAT IS YOUR UPDATED RECOMMENDED ALLOWANCE FOR CWC?

A. Based on reflecting all of I&E's recommended adjustments as discussed above, my updated recommendation for CWC is an allowance of $7,289,000[65] for Water Base, or a reduction of $415,000 ($7,704,000 - $7,289,000).

Q. DOES YOUR RECOMMENDED ALLOWANCE REPRESENT A FINAL RECOMMENDED ALLOWANCE FOR CWC?

A. No. All adjustments to the Company's claims for revenues, expenses, taxes, and rate base must be consistently brought together in the Administrative Law Judge's

[61] *Id.*, p. 3 - PROPRIETARY.
[62] *Id.*, pp. 1-2 – PROPRIETARY.
[63] *Id.*, p. 3 - PROPRIETARY.
[64] *Id.*, pp. 1-2 - PROPRIETARY.
[65] I&E Exhibit No. 1, Schedule 7, p. 1 - PROPRIETARY.

Recommended Decision and again in the Commission's Final Order. This process, which is known as iteration, effectively prevents the determination of a precise calculation until such time as all adjustments have been made to the Company's claim.

PFAS TREATMENT COST DEFERRAL

Q. SUMMARIZE YOUR RECOMMENDATION FOR PER- AND POLYFLUOROALKYL SUBSTANCE (PFAS) TREATMENT COSTS AS CONTAINED IN YOUR DIRECT TESTIMONY.

A. I recommended the Company should continue to address PFAS-related issues through the normal budgeting and ratemaking process[66] and that the Commission disallow the Company's request for deferral of PFAS-related costs for ratemaking purposes based on the following: (1) Aqua has built PFAS treatment costs into routine rate base and O&M expenses since 2017; (2) Aqua is able to continue to request recovery of reasonably and prudently incurred expenses related to PFAS treatment in future base rate filings as has been the case in previous base rate filings; and (3) the increased PFAS-related costs are fully anticipated, estimated, and recurring which contradicts the Commission's previous ruling regarding deferred accounting treatment as described in my direct testimony. Also, I stated concerns that: (1) other expenses may be decreased due to overall improved

[66] I&E Statement No. 1, p. 43.

filtration; and (2) the potential for awards from a pending class action lawsuit that may not be properly applied to the PFAS-related treatment costs if the Commission was to allow deferral treatment for these costs.[67]

Additionally, I recommended that if the Commission decides to make any determination for deferral treatment for PFAS-related costs that it should be done on a statewide basis for all water utilities similar to how guidance was issued for changes to the federal income tax rate via the Tax Cuts and Jobs Act of 2017.[68]

Q. DID ANY WITNESS ADDRESS YOUR RECOMMENDATION?

A. Yes. Aqua Witness William Packer disagrees with my recommendation.[69]

Q. SUMMARIZE WITNESS PACKER'S RESPONSE.

A. Mr. Packer states the Company's request is the ideal place for a request for such deferred accounting treatment of PFAS treatment costs. Asserting that the Company is on a very tight timeline, he states that the stakes have never been higher for the Company. Furthermore, Mr. Packer states that I am misguided in referencing the Commission's ruling regarding the conditions under which

[67] *Id.,* pp. 42-43.
[68] *Id.*, p. 44.
[69] Aqua Statement No. 1-R, p. 4.

expenses may be granted deferred accounting treatment,[70] that the expenses are: (1) extraordinary; (2) unanticipated; (3) nonrecurring; and (4) substantial.[71]

Witness Packer presents an itemized rebuttal of my explanation for why the expenses did not meet the conditions for deferral treatment, claiming the PFAS-related costs are: (1) extraordinary because the EPA compliance is based on the running annual average of the four quarters prior to the "fast-tracked" deadline of April 26, 2029; (2) unanticipated due to the compliance deadline being closer than the Company anticipated, indicating that Aqua was not aware that the EPA would set such a strict level for PFAS contamination equating to what he describes as a non-detection standard; (3) nonrecurring since the initial outlay of $300 million is not recurring, yet regular expenses will recur for new equipment operations; and (4) substantial in that the EPA compliance standard creates a large capital need for the Company.[72]

Specifically on the argument of Aqua's prior experience with treating PFAS since 2017, he opines the standard change will involve novel treatment methods to now include some surface water treatment plants which make up roughly 90% of the Company's annual water production. By using the historic treatment experience as a basis for rejecting deferral treatment, Witness Packer alleges this

---

[70] *Id.*, pp. 4-5.

[71] *Petition of Columbia Gas of Pa., Inc. for Authority to Defer for Accounting and Financial Purposes Certain Start Up Expenses Assoc. with the Redesign and Upgrade of Financial Processes and Info. Systems*, Docket No. P-2012-2319920 (Order Entered December 5, 2012).

[72] Aqua Statement No. 1-R, pp. 5-6.

constitutes a penalty for the Company being proactive in addressing water quality.[73]

As to my concern that the expenses for other categories, such as chemical expenses, will be reduced by the treatment of PFAS, Mr. Packer states that the PFAS-related treatment will not change out other costs, but will simply increase costs.[74]

Addressing the last of my concerns, Mr. Packer states that there is no time for a separate statewide Commission docketed proceeding to determine proper deferral treatment of PFAS costs on a statewide basis and that if the Commission rejects the Company's request for deferral of PFAS treatment costs, Aqua will incur additional rate case expense as it will have to seek relief in rapid succession.[75]

Q. WHAT IS YOUR RESPONSE TO MR. PACKER'S ASSERTIONS?

A. I continue to disagree with his contention that deferral treatment is appropriate for PFAS-related costs. I disagree with Mr. Packer's assertions that these costs are not anticipated or recurring, and the issue of whether the costs are substantial is also subjective. PFAS has been on Aqua's radar for a number of years, and the Company has not delayed in beginning to address this issue.[76]

---

[73] *Id.*, p. 7.
[74] *Id.*, p. 8.
[75] *Id.*, pp. 8-9.
[76] Aqua Statement No. 11, p. 17.

I disagree with Mr. Packer's assertion that capital equipment expenditures are one-time events,[77] since unless PFAS-related pollution goes to zero, capital equipment will eventually wear out and need replacing, along with ongoing corresponding maintenance expenses continuing to be incurred. While I accept that overall costs will increase due to addressing any new PFAS rules, Mr. Packer has not effectively responded to my concern that other costs may go down, like chemicals or other related expenses, when new types of filtration devices are installed to address PFAS.

With respect to substantiality, the Company indicated in its filing that approximately $300,000,000 would be necessary for related capital investments to meet the anticipated 2029 deadline and that $15[78] million in incremental operating expenses ($300 million x 0.05) is expected to be incurred.[79] However, keeping this in perspective, that $300 million in capital investments would not all be incurred in a single year, and even if it was, that equates to 6% of the Company's FPFTY rate base claim in this proceeding.[80] If the Company invests that $300 million in capital investments equally between 2025 and 2028 over a four-year period, that equates to 1.5% of rate base per year. Also, one would presume that the Company included its necessary FPFTY PFAS investments in its rate base

---

77 Aqua Statement No. 1-R, p. 5.

78 The incremental O&M expenses associated with PFAS treatment were originally miscalculated as $1,500,000 in I&E Statement No. 1, p. 41 lines 7-8.

79 I&E Statement No. 1, p. 41 and Aqua Statement No. 1, pp. 19-21.

80 Water Base, $4,318,244,039 + Water Shenandoah, $16,013,341 + WW Base, $392, 798,320 + WW Lower Makefield, $50,447,179 = $4,777,502,933 which excludes consideration of East Whiteland. Total PFAS capital investments of $300 million divided by $4,778 million in total rate base = 6%.

claim in this proceeding. Since the Company claims additions of ~$322M to plant in the FPFTY, which is only ~$9M greater than its claimed FTY additions of ~$313M,[81] it would seem to indicate that the Company is able to include PFAS capital costs in its plant claims without causing substantial year-over-year anomalies in its capital investment budget, which further supports my position that rate case treatment is adequate to address this ongoing issue. Thus, while the total dollar amount is compelling, one needs to look at the total picture before drawing a conclusion. Aside from that and further supporting my position that separate deferred asset treatment is unnecessary, Aqua insists that it will file its next rate case in two years.

Even if the Commission disagrees with my recommendation to address related costs in base rate proceedings via routine channels, I disagree that the Commission is out of time to address this issue via a statewide determination. Any decision to allow deferral treatment of PFAS-related costs should not be determined in a base rate proceeding for a single utility. Mr. Packer's contention that a docketed proceeding and subsequent Commission Order authorizing affected public utilities to track and defer specific issue-related costs cannot occur with efficiency is not supported by recent history. The May 13, 2020 Secretarial Letter regarding *COVID-19 Cost Tracking and Creation of Regulatory Asset, Docket No. M-2020-3019775* (May 13, 2020 Secretarial Letter), was entered less

[81] Aqua Exhibit 1-A, Schedule G-2, p. 1.

than two months after the March 13, 2020 Emergency Order was ratified.[82] At the very worst interpretation, the May 13, 2020 Secretarial Letter was delivered just shy of four months after the first known case of COVID-19 in the United States.[83] The May 13, 2020 Secretarial Letter set the framework for public utilities to track costs and create a regulatory asset to be assessed for recovery in a future rate case, refuting the Company's contention that the Commission does not have time to act on a state-wide basis to address this issue.

Q. DO YOU HAVE ANY CHANGES TO YOUR RECOMMENDATION FOR THE COMPANY'S PFAS TREATMENT COSTS DEFERRAL?

A. No. First, Aqua should be building these costs into its FPFTY budget, and by Aqua's standards will be filing relatively frequent rate cases where FPFTY budgets can continue to be updated in each base rate proceeding. PFAS related costs are seemingly indefinite and recurring, and, therefore, should be considered routine as we move forward, and should be built into each utility's budget in a rate proceeding. However, if the Commission deems that deferral treatment is necessary, I recommend that be determined outside of this rate case in a separate proceeding that addresses all affected water and wastewater utilities since Aqua is not the only water/wastewater utility affected by the more stringent standard.

OVERALL RATE OF RETURN RECOMMENDATION **69**

INTRODUCTION

Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A. My name is Christopher Keller. My business address is Pennsylvania Public Utility Commission, Commonwealth Keystone Building, 400 North Street, Harrisburg, PA 17120.

Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?

A. I am employed by the Pennsylvania Public Utility Commission (Commission) in the Bureau of Investigation & Enforcement (I&E) as a Fixed Utility Financial Analyst.

Q. SUMMARIZE YOUR EDUCATION AND EMPLOYMENT HISTORY.

A. An outline of my education and employment history is attached as Appendix A.

Q. PLEASE DESCRIBE THE ROLE OF I&E IN RATE PROCEEDINGS.

A. I&E is responsible for protecting the public interest in proceedings before the Commission. I&E's analysis in this proceeding is based on its responsibility to represent the public interest. This responsibility requires balancing the interests of ratepayers, the regulated utility, and the regulated community as a whole.

Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

A. The purpose of my testimony is to review the base rate filing of Aqua

Pennsylvania, Inc. and Aqua Pennsylvania Wastewater, Inc., (referred to collectively as Aqua or Company) and make recommendations regarding the Company's rate of return, including capital structure, cost of long-term debt, the cost of equity, and the overall fair rate of return for the fully projected future test year (FPFTY) ending December 31, 2025.

Q. DOES YOUR TESTIMONY INCLUDE AN EXHIBIT?

A. Yes. I&E Exhibit No. 2 contains schedules that support my direct testimony.

BACKGROUND

Q. WHAT IS THE GENERAL DEFINITION OF RATE OF RETURN IN THE CONTEXT OF A BASE RATE CASE?

A. Rate of return is one of the components of the revenue requirement formula. Rate of return is the amount of revenue an investment generates in the form of net income. It is typically expressed as a percentage of the amount of an asset base at a particular point in time, which in base rate proceedings, is the projected rate base balance at the end of the FPFTY.

Q. WHAT IS THE REVENUE REQUIREMENT FORMULA?

A. The revenue requirement formula used in base rate cases is as follows:

$$RR = E + D + T + (RB \times ROR)$$

Where:

RR = Revenue Requirement

E = Operating Expenses

D = Depreciation Expense

T = Taxes

RB = Rate Base

ROR = Overall Rate of Return

In the above formula, the rate of return is expressed as a percentage. The calculation of that percentage is independent of the determination of the appropriate rate base value for ratemaking purposes. As such, the appropriate total dollar return is dependent upon the proper computation of the rate of return and the proper valuation of the Company's rate base.

Q. WHAT CONSTITUTES A FAIR AND REASONABLE OVERALL RATE OF RETURN?

A. A fair and reasonable overall rate of return is one that will allow the utility an *opportunity* to recover those costs prudently incurred by all classes of capital used to finance the rate base during the prospective period in which its rates will be in effect.

The *Bluefield Water Works & Improvements Co. v. Public Service Comm. of West Virginia,* 262 U.S. 679, 692-93 (1923), and the *FPC v. Hope Natural Gas Co.,* 320 U.S. 591, 603 (1944) cases set forth the principles that are generally accepted by regulators throughout the country as the appropriate criteria for measuring a fair rate of return:

1. A utility is entitled to a return similar to that being earned by other enterprises with corresponding risks and uncertainties, but not as high as those earned by highly profitable or speculative ventures.
2. A utility is entitled to a return level reasonably sufficient to assure financial soundness.
3. A utility is entitled to a return sufficient to maintain and support its credit and raise necessary capital.
4. A fair return can change (increase or decrease) along with economic conditions and capital markets.

Q. EXPLAIN HOW THE OVERALL RATE OF RETURN IS TRADITIONALLY CALCULATED IN BASE RATE PROCEEDINGS.

A. In base rate proceedings, the overall rate of return is traditionally calculated using the weighted average cost of capital method. To calculate the weighted average cost of capital, a company's capital structure must first be determined by comparing the percentage of each capitalization component, which has financed rate base, to total capital. Next, the effective cost rate of each capital structure component must be determined. The historical component of the cost rate of debt can be computed accurately, and any future debt issuances are based on estimates. The cost rate of common equity is not fixed and is more difficult to measure. Because of this difficulty, a proxy group is used as discussed later in this testimony. Next, each capital structure component percentage is multiplied by its

corresponding effective cost rate to determine the weighted capital component cost rate. The I&E table in the *"I&E Position"* section below demonstrates the interaction of each capital structure component and its corresponding effective cost rate. Finally, the sum of the weighted cost rates produces the overall rate of return. This overall rate of return is multiplied by the rate base to determine the return portion of a company's revenue requirement.

COMPANY'S RATE OF RETURN CLAIM

Q. WHO IS THE COMPANY'S RATE OF RETURN WITNESS?

A. Aqua witness Paul R. Moul is the primary witness addressing rate of return.[1] Mr. Moul provided analysis for the claimed capital structures, long-term debt, and cost of common equity for Aqua. Additionally, Aqua witnesses William C. Packer[2] and Todd M. Duerr[3] provide testimony regarding the Company's "Management Performance" claims.

Q. PLEASE SUMMARIZE THE COMPANY'S RATE OF RETURN CLAIM.

A. Mr. Moul recommends the following rate of return for the Company for water and wastewater based on its FPFTY ending December 31, 2025:[4]

[1] Aqua Statement No. 7.
[2] Aqua Statement No. 1.
[3] Aqua Statement No. 11.
[4] Aqua Exhibit 4-A, Schedule 1, p. 1.

Summary of Cost of Capital			
Type of Capital	**Ratio**	**Cost Rate**	**Weighted Cost**
	Aqua Pennsylvania, Inc.		
Long-Term Debt	46.05%	4.32%	1.99%
Common Equity	53.95%	10.95%	5.91%
Total	100.00%		7.90%

I&E POSITION

Q. PLEASE SUMMARIZE YOUR RATE OF RETURN RECOMMENDATION.

A. I recommend the following rate of return for the Company for water and wastewater:[5]

Summary of Cost of Capital			
Type of Capital	**Ratio**	**Cost Rate**	**Weighted Cost**
	Aqua Pennsylvania, Inc.		
Long-Term Debt	46.05%	4.32%	1.99%
Common Equity	53.95%	9.37%	5.06%
Total	100.00%		7.05%

PROXY GROUP

Q. WHAT IS A PROXY GROUP AS USED IN BASE RATE CASES?

A. A proxy group is a set of companies that have similar traits in comparison to the subject utility. This group of companies acts as a benchmark for determining the subject utility's rate of return in a base rate case.

[5] I&E Exhibit No. 2, Schedule 1.

Q. WHAT ARE THE REASONS FOR USING A PROXY GROUP?

A. A proxy group's cost of equity is used as a benchmark to satisfy the long-established guideline of utility regulation that seeks to provide the subject utility with the opportunity to earn a return similar to that of enterprises with corresponding risks and uncertainties.

A proxy group is typically utilized since the use of data exclusively from one company may be less reliable. The lower reliability occurs because the data for one company may be subject to events that can cause short-term anomalies in the marketplace. The rate of return on common equity for a single company could become distorted in these circumstances and would therefore not be representative of similarly situated companies. Therefore, a proxy group has the effect of smoothing out potential anomalies associated with a single company.

Q. DO ANY OF THE CRITERIA YOU USE IN SELECTING YOUR PROXY GROUP REQUIRE THAT THE COMPANIES SELECTED ARE WASTEWATER UTILITIES?

A. No. Few, if any, publicly held 'wastewater only' utilities exist because most water companies have diversified their business to include wastewater operations. Accordingly, this type of criterion would produce an insufficient sample of companies for my proxy group, adversely affecting the calculation of a fair cost of equity for the subject utility. Additionally, as listed as one of my criteria below, Value Line does not specifically cover the wastewater industry. Therefore, as is

common practice for wastewater utility cost of equity analyses, my proxy group consists of regulated water utility companies.

Q. WHAT CRITERIA DID YOU USE IN SELECTING YOUR WATER INDUSTRY PROXY GROUP?

A. The criteria for my proxy group was designed to select companies that are representative of Aqua. I applied the following criteria to Value Line's Water Utility company group:

1. Fifty percent or more of the company's revenues must be generated from the regulated water utility industry.
2. The company's stock must be publicly traded.
3. Investment information for the company must be available from more than one source, which includes Value Line.
4. The company must not be currently involved/targeted in an announced material merger or acquisition.
5. The company must have four consecutive years of historic earnings data.

Q. WHAT CRITERIA DID MR. MOUL USE IN SELECTING HIS WATER PROXY GROUP COMPANIES?

A. Mr. Moul determined his proxy group of eight water companies by using the

following criteria:[6]

1. The company must be listed in the 'Water Utility Industry' section (basic and expanded) of the Value Line Investment Survey; and
2. The company's stock must be publicly traded.

Q. WHAT PROXY GROUP DID YOU USE IN YOUR ANALYSIS?

A. I include the following six companies in my proxy group:[7]

American Water Works	AWK
American States Water Co	AWR
California Water Service Group	CWT
Middlesex Water Co	MSEX
SJW Group	SJW
Essential Utilities	WTRG

Q. WHAT PROXY GROUP DID MR. MOUL USE IN HIS ANALYSIS?

A. Mr. Moul has included the following eight companies in his Water Group:[8]

American Water Works	AWK
American States Water Co	AWR
Artesian Resources Corp.	ARTNA
California Water Service Group	CWT
Middlesex Water Co	MSEX
SJW Group	SJW
Essential Utilities	WTRG
York Water Company	YORW

[6] Aqua Statement No. 7, p. 14, lines 11-13.
[7] I&E Exhibit No. 2, Schedule 2.
[8] Aqua Exhibit 4-A, Schedule 3, p. 2.

Q. DO YOU AGREE WITH MR. MOUL'S WATER PROXY GROUP?

A. Not entirely. While we do have six companies that match, he uses two companies that I do not.

Q. PLEASE LIST THE COMPANIES MR. MOUL HAS INCLUDED THAT YOU DO NOT AND EXPLAIN WHY YOU HAVE EXCLUDED THEM FROM YOU PROXY GROUP.

A. The companies Mr. Moul included in his Water Group that I have excluded from my proxy group are Artesian Resources Corporation and York Water Company. I excluded these companies because no Value Line reports were available for these companies; therefore, I could not measure its growth forecast and projected dividend yield.

CAPITAL STRUCTURE

Q. WHAT IS A CAPITAL STRUCTURE?

A. A capital structure represents how a firm has financed its rate base with different sources of funds. The primary funding sources are long-term debt and common equity. A capital structure may also include preferred stock and/or short-term debt, which is not the case for Aqua.

Q. WHAT IS THE COMPANY'S CLAIMED CAPITAL STRUCTURE?

A. The Company's claimed capital structure is summarized in the table below:[9]

Type of Capital	Ratio
Long-Term Debt	46.05%
Common Equity	53.95%
Total	**100.00%**

Q. WHAT IS THE BASIS FOR THE COMPANY'S CLAIMED CAPITAL STRUCTURE?

A. Mr. Moul stated that because Aqua raises its own debt directly in the capital markets, the actual capital structure for the Company should be used in determining the overall rate of return.[10]

Q. WHAT IS YOUR RECOMMENDATION REGARDING THE COMPANY'S CAPITAL STRUCTURE?

A. I recommend using the Company's claimed capital structure as presented in the table above.

Q. WHAT IS THE BASIS FOR YOUR CAPITAL STRUCTURE RECOMMENDATION?

A. Although I believe a capital structure of 50% long-term debt and 50% common

[9] Aqua Statement No. 7, p. 20, lines 19-21 and Aqua Exhibit 4-A, Schedule 1, p. 1.
[10] Aqua Statement No. 7, p. 19, lines 19-25.

equity is optimal when trying to balance the financial integrity of a utility as well as trying to control costs to ratepayers, in this proceeding, I recommend using the Company's claimed capital structure as it falls within the range of my proxy group's 2023 (most recent available) capital structures. The average capital structure of my proxy group for the past five years consists of long-term debt ratios ranging from 44.06% to 58.08% and equity ratios ranging from 41.92% to 55.63%, with a five-year average of 50.76% for long-term debt and 49.19% for common equity.[11]

It should be noted that the Company's equity ratio is well above the average and near the higher end of the proxy group's equity ratios. It should also be noted that three of the six companies in my proxy group have a capital structure where the equity ratio is less than 50% for the most recent five-year average, and four of the six are below 50% equity in the most recently published year (2023). This equity heavy capital structure must be recognized when considering Aqua's financial risk, as higher equity ratios generally correspond with lower financial risk as acknowledged by Mr. Moul.[12]

[11] I&E Exhibit No. 2, Schedule 2.
[12] Aqua Statement No. 7, p. 16, lines 11-14.

Q. WHAT IS THE COST SAVINGS TO RATEPAYERS IF THE COMPANY WERE TO EMPLOY A 50/50 CAPITAL STRUCTURE COMPARED TO THE COMPANY'S FILED CAPITAL STRUCTURE?

A. The example below shows the cost savings to ratepayers if the Company were to employ a 50% long-term debt and 50% common equity capital structure in its cost of capital while maintaining its claimed return on equity and rate base:

Aqua Pennsylvania, Inc. - Water Operations			
AS FILED CAPITAL STRUCTURE			
Type of Capital	**Ratio**	**Cost Rate**	**Weighted Cost Rate**
Long-Term Debt	46.05%	4.32%	1.99%
Common Equity	53.95%	10.95%	5.91%
Total	100.00%		7.90%
50/50 HYPOTHETICAL CAPITAL STRUCTURE			
Type of Capital	**Ratio**	**Cost Rate**	**Weighted Cost Rate**
Long-Term Debt	50.00%	4.32%	2.16%
Common Equity	50.00%	10.95%	5.48%
Total	100.00%		7.64%
Difference In the Overall Rate of Return (7.90% - 7.64% = 0.26%)			0.26%
Claimed Rate Base*			$4,318,247,093
Impact Prior to Gross Revenue Conversion Factor (.0026 x $4,318,247,093)			**$11,227,442**
Gross Revenue Conversion Factor**			1.39073
Total Impact ($11,227,442 x 1.39073)			**$15,614,340**
*Aqua Exhibit 1-A, Schedule G-1, Line 15. **Aqua Exhibit No. 1-A, Schedule A-5, Line 14.			

Aqua Pennsylvania, Inc. - Wastewater Operations			
AS FILED CAPITAL STRUCTURE			
Type of Capital	**Ratio**	**Cost Rate**	**Weighted Cost Rate**
Long-Term Debt	46.05%	4.32%	1.99%
Common Equity	53.95%	10.95%	5.91%
Total	100.00%		7.90%
50/50 HYPOTHETICAL CAPITAL STRUCTURE			
Type of Capital	**Ratio**	**Cost Rate**	**Weighted Cost Rate**
Long-Term Debt	50.00%	4.32%	2.16%
Common Equity	50.00%	10.95%	5.48%
Total	100.00%		7.64%
Difference In the Overall Rate of Return (7.90% - 7.64% = 0.26%)			0.26%
Claimed Rate Base*			$392,798,320
Impact Prior to Gross Revenue Conversion Factor (.0026 x $392,798,320)			**$1,021,276**
Gross Revenue Conversion Factor**			1.39937
Total Impact ($1,021,276 x 1.39937)			**$1,429,143**
*Aqua Exhibit 1-C, Schedule G-1, Line 15. **Aqua Exhibit No. 1-C, Schedule A-5, Line 14.			

In this example, if the Company were to employ a 50/50 capital structure with no change to the requested return on equity (with which I do not agree and will discuss later in my testimony), the cost savings to ratepayers would be $15,614,340 and $1,429,143 annually for water and wastewater customers, respectively. While I understand achieving and maintaining an exact 50/50 capital structure is not always feasible, this example demonstrates Aqua's financial

security as compared to its peers and illustrates that Mr. Moul's "add-ons" to his cost of equity calculations are unnecessary.

COST OF LONG-TERM DEBT

Q. WHAT IS THE COMPANY'S CLAIMED COST RATE OF LONG-TERM DEBT?

A. The Company's claimed long-term debt cost rate is 4.32% for the FPFTY.[13]

Q. WHAT IS YOUR RECOMMENDATION REGARDING THE COMPANY'S COST RATE OF LONG-TERM DEBT?

A. I recommend using the Company's long-term debt cost rate of 4.32%.

Q. WHAT IS THE BASIS FOR YOUR RECOMMENDATION TO USE THE COMPANY'S COST RATE OF LONG-TERM DEBT?

A. The Company's claimed cost rate for long-term debt of 4.32% is representative of the industry as it falls within my proxy group's 2023 implied long-term debt cost range of 3.64% to 4.96%, with an average implied long-term debt cost of 4.37%. Additionally, the Mergent Bond Record shows an average yield of 5.68% for the period June 2023 through May 2024 for A-rated public utility bonds.[14] Therefore, I

[13] Aqua Statement No. 7, p. 22, lines 8-9 and Exhibit 4-A, Schedule 6, p. 3.
[14] I&E Exhibit No. 2, Schedule 3.

believe that the Company's claim is representative of the utility industry and recommend it be used in this proceeding.

COST OF COMMON EQUITY

Common Methods

Q. WHAT METHODS ARE COMMONLY PRESENTED BY UTILITIES IN DETERMINING THE COST OF COMMON EQUITY?

A. Four methods commonly presented to estimate the cost of common equity are the Discounted Cash Flow (DCF) Method, the Capital Asset Pricing Model (CAPM), the Risk Premium (RP) Method, and the Comparable Earnings (CE) Method.

Q. WHAT IS THE THEORETICAL BASIS FOR THE DCF METHOD?

A. The DCF method is the "dividend discount model" of financial theory, which maintains that the value (price) of any security or commodity is the discounted present value of all future cash flows. The DCF method assumes that investors value of a financial asset is determined by its earning power, or its ability to generate future cash flows.

Q. WHAT IS THE THEORETICAL BASIS FOR THE CAPM?

A. The CAPM describes the relationship of a stock's investment risk and its market rate of return. It identifies the rate of return investors expect so that it is comparable with returns of other stocks of similar risk. This method hypothesizes

that the investor-required return on a company's stock is equal to the return on a "risk free" asset plus an equity premium reflecting the company's investment risk. In the CAPM, two types of risk are associated with a stock: (1) firm-specific risk (unsystematic risk); and (2) market risk (systematic risk), which is measured by a firm's beta. The CAPM allows for investors to receive a return only for bearing systematic risk. Unsystematic risk is assumed to be diversified away, and therefore, does not earn a return.

Q. WHAT IS THE THEORETICAL BASIS FOR THE RP METHOD?

A. The theoretical basis for the RP method is a simplified version of the CAPM. The RP method's theory is that common stock is riskier than debt, thus, investors require a higher expected return on stocks than bonds. In the RP approach, the cost of equity is made up of the cost of debt and a risk premium. While the CAPM uses the market risk premium, it also directly measures the systematic risk of a company group through the use of beta. The RP method does not measure the specific risk of a company.

Q. WHAT IS THE THEORETICAL BASIS FOR THE CE METHOD?

A. The CE method utilizes the concept of "opportunity cost." This means that investors will likely dedicate their capital to the investment offering the highest return with similar risk to alternative investments. Unlike the DCF, CAPM, and the RP methods, the CE method is not market-based and relies upon historic

accounting data. Similar to the RP method, CE method does not measure the specific risk of a company. The most problematic issue with the CE method is determining what constitutes comparable companies.

Q. WHAT METHOD DO YOU RECOMMEND USING TO DETERMINE AN APPROPRIATE COST OF COMMON EQUITY FOR AQUA?

A. I recommend using the DCF method as the primary method to determine the cost of common equity. I provide the results of my CAPM as a comparison, and not as a check, to the DCF results. The Commission has historically relied primarily upon the DCF results in base rate proceedings, including as recently as 2017, 2018, 2020, and 2021.[15]

Q. PLEASE EXPLAIN WHY YOU CHOSE TO USE THE DCF AS THE PRIMARY METHOD IN YOUR ANALYSIS.

A. I have used the DCF for a variety of reasons. First, the DCF is appealing to investors as it is based upon the concept that the receipt of dividends in addition to the expected appreciation is the total return requirement determined by the

[15] *Pa. PUC v. City of DuBois – Bureau of Water*; Docket No. R-2016-2554150 (Order Entered March 28, 2017). *See generally* Disposition of Cost Rate Models, pp. 96-97; *Pa. PUC v. UGI Utilities, Inc. – Electric Division;* Docket No. R-2017-2640058 (Order Entered October 25, 2018). *See generally* Disposition of Cost of Common Equity, p. 119; *Pa. PUC v. Wellsboro Electric Company;* Docket No. R-2019-3008208 (Order Entered April 29, 2020). *See generally* Disposition of Primary Methodology to Determine ROE, pp. 80-81; *Pa. PUC v. Citizens Electric Company of Lewisburg, PA;* Docket No. R-2019-3008212 (Order Entered April 29, 2020). *See generally* Disposition of Cost of Common Equity, pp. 91-92. *Pa. PUC v. Columbia Gas of Pennsylvania, Inc.;* Docket No. R-2020-3018835 (Order Entered February 19, 2021). *See generally* Disposition of Cost of Common Equity, p. 131. Pa. PUC v. PECO Energy Company – Gas Division; Docket No. R-2020-3018929 (Order Entered June 22, 2021). See generally Disposition of Return of Rate on Common Equity, p. 171.

market.[16] Second, the use of a growth rate and expected dividend yield are also strengths of the DCF, as this recognizes the time value of money and is forward-looking. Third, the use of the utilities' own, or in this case, the proxy group's stock prices and growth rates directly in the calculation also causes the DCF to be industry and company specific. Finally, the current inflationary and economic trends are most certainly reflected in a stock's price, which is used in determining the dividend yield, and considered by independent professional analysts who generate forecasted earnings growth rates. Therefore, the DCF contains the most up-to-date projected information of any model and is the superior method for determining the rate of return for the current economic market because it measures the cost of equity directly.

Q. PLEASE EXPLAIN WHY YOU CHOSE TO USE THE CAPM AS A COMPARISON TO THE DCF IN YOUR ANALYSIS.

A. I have included a CAPM analysis only as a comparison, and not as a basis, for my recommendation because both the CAPM and the DCF include inputs that allow the results to be specific to the utility industry. However, the CAPM is based on the performance of U.S. Treasury bonds and the performance of the market as measured through the S&P 500 and is company-specific only through the use of beta. Beta reflects a stock's volatility relative to the overall market, thereby

[16] David C. Parcell, "The Cost of Capital – A Practitioner's Guide," 2020 Edition, p. 153.

incorporating an industry-specific aspect to the CAPM, but only as a measure of how reactive the industry is compared to the market as a whole. Although changes in the utility industry are more likely to be accurately reflected in the DCF, which uses the companies' actual prices, dividends, and growth rates, I have included the results of my CAPM analysis because changes in the market, whether as a whole or specific to the utility industry, affect the outcome of each method in different ways. Although I have provided the results of the CAPM as a comparison and not as a check, it does have several disadvantages and should not be given comparable weight to the DCF method.

Q. EXPLAIN THE DISADVANTAGES OF THE CAPM.

A. Beta, which is the only company-specific variable in the CAPM model, measures the *historical* volatility of a stock compared to the *historical* overall market return. Reliance on historical values is especially problematic now given the recent impacts of the COVID-19 pandemic and subsequent interest rate environment on economic conditions. Therefore, the DCF method is the superior method for determining the rate of return for the current economic market and measuring the cost of equity directly. The CAPM, and similarly the RP method, are less reliable indicators because they measure the cost of equity indirectly and risk premiums vary depending on the debt and equity being compared.

Q. IS THERE ANY ACADEMIC EVIDENCE THAT QUESTIONS THE CREDIBILITY OF THE CAPM MODEL?

A. Yes. An article, "Market Place; A Study Shakes Confidence in the Volatile-Stock Theory," which appeared in the *New York Times* on February 18, 1992, summarized a CAPM study conducted by professors Eugene F. Fama and Kenneth R. French.[17] Their study examined the importance of beta, CAPM's risk factor, in explaining returns on common stock. In CAPM theory a stock with a higher beta should have a higher expected return. However, they found that the model did not do well in predicting actual returns and suggested the use of more elaborate multi-factor models.

A more recent article, "The Capital Asset Pricing Model: Theory and Evidence," which appeared in the *Journal of Economic Perspectives,* states that "the attraction of the CAPM is that it offers powerful and intuitively pleasing predictions about how to measure risk and the relation between expected return and risk. Unfortunately, the empirical record of the model is poor - poor enough to invalidate the way it is used in applications."[18] As a result, I conclude that the CAPM's relevance to the investment decision making process does not carry over into the regulatory rate setting process.

[17] Berg, Eric N. "Market Place; A Study Shakes Confidence in the Volatile-Stock Theory" *The New York Times*, 18 Feb 1992: *nytimes.com* Web. 23 Mar 2016.

[18] Fama, Eugene F. and French, Kenneth R., "The Capital Asset Pricing Model: Theory and Evidence." *Journal of Economic Perspectives* (2004): Volume 18, Number 3, pp. 25-46.

Q. PLEASE EXPLAIN WHY YOU HAVE CHOSEN TO EXCLUDE THE RP METHOD FROM YOUR ANALYSIS.

A. The RP method is excluded because it is a simplified version of the CAPM and is subject to the same faults listed above. Additionally, unlike the CAPM, the RP method does not recognize company-specific risk through beta.

Q. EXPLAIN WHY YOU HAVE CHOSEN TO EXCLUDE THE CE METHOD IN YOUR ANALYSIS.

A. The CE method is excluded because the choice of which companies are comparable is highly subjective, and it is debatable whether historic accounting values are representative of the future. Moreover, its historical usage in this regulatory forum has been minimal.

Q. ARE THERE ANY RECENT COMMISSION ORDERS THAT DEVIATE FROM THE USE OF THE DCF AS THE PRIMARY METHOD IN DETERMINING A COMPANY'S RETURN ON EQUITY?

A. Yes. The Commission indicated in Aqua's 2021 base rate case order that its method "for determining Aqua's ROE shall utilize both I&E's DCF and CAPM methodologies"[19] and that "I&E's DCF and CAPM produce a range of reasonableness for the ROE…",[20] which deviates from the historical Commission

[19] *Pa. PUC v. Aqua Pennsylvania, Inc.,* Docket Nos. R-2021-3027385 & R-2021-3027386, pp. 154 (Order entered May 16, 2022).

[20] *Pa. PUC v. Aqua Pennsylvania, Inc.,* Docket Nos. R-2021-3027385 & R-2021-3027386, pp. 178 (Order entered May 16, 2022).

practice of primarily relying on the DCF. Additionally, the Commission's Columbia Water Company (Columbia Water) base rate case order relied on the results of I&E's DCF and CAPM analyses for determining Columbia Water's ROE.[21] Finally, in the most recent Pennsylvania-American Water Company (PAWC) case, the Commission agreed with the ALJ's recommended ROE which was based on the average of I&E's DCF and CAPM analyses.

Q. SHOULD THE COMMISSION'S USE OF THE CAPM AS A CEILING FOR A "RANGE OF REASONABLENESS" APPLY IN THIS PROCEEDING?

A. No. In a report issued by Regulatory Research Associates, a group within S&P Global Market Intelligence,[22] Aqua's ROE of 10.00% was stated as being above the national average for water utility base rate cases and above the Distribution System Improvement Charge (DSIC) rate authorized by the Commission of 9.80%[23] for water and wastewater utilities for the year ended December 31, 2021. This DSIC rate for water and wastewater utilities has since decreased by 15 basis points to 9.65% for the year ended March 31, 2023[24] and has remained at 9.65%

[21] *Pa. PUC v. Columbia Water Company,* Docket No. R-2023-3040258, p. 105 (Order entered January 18, 2024).

[22] Regulatory Research Associates, "Commission Authorizes Management Performance Bonus for Aqua Pennsylvania," *S&P Global Market Intelligence*, May 16, 2022.

[23] PA Public Utility Commission, Bureau of Technical Utility Services Report on the Quarterly Earnings of Jurisdictional Utilities for the Year Ended December 31, 2021, p. 27, approved at Public Meeting on June 16, 2022, at Docket No. M-2022-3032405.

[24] PA Public Utility Commission, Bureau of Technical Utility Services Report on the Quarterly Earnings of Jurisdictional Utilities for the Year Ended March 31, 2023, p. 27, approved at Public Meeting on July 13, 2023 at Docket No. M-2023-3041106.

for the years ended June 30, 2023,[25] September 30, 2023,[26] December 31, 2023,[27] and March 31, 2024.[28] The above referenced S&P report, which directly reviews Aqua's ROE of 10.00% on the very date the Commission entered its order in Aqua's rate case demonstrated that the ROE awarded to Aqua was higher than average. Specifically, the S&P report determined that the average ROE for water utility base rate cases that have been completed during the first four months of 2022 was 9.63% and for the twelve months ended April 30, 2022 was 9.53%, each of which were well below the 10.00% ROE authorized by the Commission for Aqua. This demonstrates the unreasonable skewing of results associated with using the CAPM as a ceiling for determining a utility's ROE.

In the Columbia Water order, the Commission noted that I&E's DCF and CAPM produced a range of reasonableness for the ROE from 7.84% to 11.09% and approved an ROE of 9.75% as reasonable and appropriate for that company, which is based upon consideration of a variety of factors such as increasing inflation leading to increases in interest rates and capital costs.[29] I respectfully

---

[25] PA Public Utility Commission, Bureau of Technical Utility Services Report on the Quarterly Earnings of Jurisdictional Utilities for the Year Ended June 30, 2023, p. 27, approved at Public Meeting on October 19, 2023 at Docket No. M-2023-3042679.

[26] PA Public Utility Commission, Bureau of Technical Utility Services Report on the Quarterly Earnings of Jurisdictional Utilities for the Year Ended September 30, 2023, p. 27, approved at Public Meeting on January 18, 2024 at Docket No. M-2023-3044811.

[27] PA Public Utility Commission, Bureau of Technical Utility Services Report on the Quarterly Earnings of Jurisdictional Utilities for the Year Ended December 31, 2023, p. 27, approved at Public Meeting on May 9, 2024 at Docket No. M-2024-3048688.

[28] PA Public Utility Commission, Bureau of Technical Utility Services Report on the Quarterly Earnings of Jurisdictional Utilities for the Year Ended March 31, 2024, p. 27, approved at Public Meeting on August 1, 2024 at Docket No. M-2024-3049527.

[29] *Pa. PUC v. Columbia Water Company,* Docket Nos. R-2023-3040258, pp. 108-109 (Order entered January 18, 2024).

disagree with the Commission's basis (current inflation and interest rates) for determining Columbia Water's ROE of 9.75%. I have presented and discussed below the forecasted lower-level inflation rates, and the Federal Reserve's intention to cut interest rates in 2024-2025, which would have the effect of reducing potential inflation and interest rate risks in the capital costs in 2025, when Aqua's new rates will be in effect.

Additionally, in the PAWC case, the Commission stated, "…we do not strictly endorse averaging the DCF and CAPM in other proceedings where it is determined that methodologies other than the DCF are necessary to determine the utility's ROE."[30]

Finally, as I explained above, the CAPM should not be used as a primary method, and it should only be used as a comparison and not as a check of the DCF.

Q. PLEASE COMMENT ON CURRENT INFLATION AND INTEREST RATE CONCERNS.

A. First, I cannot dispute the current economic conditions with respect to increased interest rates and government bond yields, however, it is important to note that all companies, including regulated utilities, are impacted by high interest rates. Per the most recent monthly Blue Chip Financial Forecasts,[31] the 2024-2025 inflation

[30] *Pa. PUC v. Pennsylvania-American Water Company*, Docket Nos. R-2023-3043189 and R-2023-3043190, pp. 194 195 (Order Entered July 22, 2024).

[31] Blue Chip Financial Forecasts, Vol. 43, No. 6, May 31, 2024, p. 2.

rates by two measures are forecasted to be slightly over 2% as shown in the table below:

	Q2 2024	**Q3 2024**	**Q4 2024**	**Q1 2025**	**Q2 2025**	**Q3 2025**
Consumer Price Index	3.5%	2.7%	2.5%	2.4%	2.4%	2.4%
PCE Price Index	2.9%	2.3%	2.2%	2.3%	2.2%	2.2%

It is my understanding that the Federal Reserve intends to cut interest rates toward the end of 2024 through 2025. This coupled with the forecasted lower-inflation rates would have the effect of reducing potential inflation and interest rate risks in capital costs during the FPFTY, when Aqua's rates will be in effect.

It is important to note that unlike unregulated companies, public utilities may file rate cases to address unforeseen or increased expenses and/or revenue shortfalls due to changes in market conditions.

Lastly, as discussed above, I reiterate that the current inflationary and economic trends are most certainly reflected in DCF results because it uses the stock's price and projected dividend rate, which are used in determining the forecasted dividend yield, and the forecasted five-year earnings growth rates of independent professional analysts. Therefore, the DCF with the most up-to-date projected information is the superior forward-looking method for determining the rate of return for the current economic market.

SUMMARY OF THE COMPANY'S RESULTS

Q. WHAT ARE THE RESULTS OF THE COMPANY'S COST OF EQUITY ANALYSES?

A. Mr. Moul used the DCF, CAPM, RP, and CE methods in analyzing the Company's cost of equity. He made several adjustments to his results, which include consideration for size, various claimed risk factors, and leverage.[32] Ultimately, Mr. Moul opined that a cost of equity of 10.95% is warranted due to Aqua's risk characteristics, the general condition of the capital markers, and strong management performance.[33]

I&E RECOMMENDATION

Q. WHAT IS YOUR RECOMMENDED COST OF COMMON EQUITY FOR AQUA?

A. Based upon my analysis, I recommend a cost of common equity of 9.37%.[34]

Q. WHAT IS THE BASIS FOR YOUR RECOMMENDATION?

A. My recommendation is based on the use of the DCF method. As explained above, I used my CAPM result only to present to the Commission a comparison and not as a check to my DCF results. My DCF analysis uses a spot dividend yield, a 52-week dividend yield, and earnings growth forecasts.

---

[32] Aqua Statement No. 7, p. 6, line 9 through p. 8, line 3 and Aqua Exhibit 4-A, Schedule 1, p. 2.
[33] Aqua Statement No. 7, p. 48, lines 1-11.
[34] I&E Exhibit No. 2, Schedule 1.

Discounted Cash Flow

Q. PLEASE EXPLAIN YOUR DCF ANALYSIS.

A. My analysis employs the constant growth DCF model as portrayed in the following formula:

$$K = D_1/P_0 + g$$

Where:

K	=	Cost of equity
D_1	=	Dividend expected during the year
P_0	=	Current price of the stock
g	=	Expected growth rate

When a forecast of D_1 is not available, D_0 (the current dividend) must be adjusted by one half of the expected growth rate to account for changes in the dividend paid in period one. As forecasts for each company in my proxy group were available from Value Line, no dividends were adjusted for the purpose of my analysis.

Q. PLEASE EXPLAIN HOW YOU DEVELOPED THE DIVIDEND YIELDS USED IN YOUR DCF ANALYSIS.

A. A representative dividend yield must be calculated over a time frame that avoids the problems of both short-term anomalies and stale data series. For my DCF analysis, the dividend yield calculation places equal emphasis on the most recent spot and the 52-week average dividend yields. The following table summarizes

my dividend yield computations for the proxy group:[35]

Six-Company Proxy Group	Dividend Yield
Spot	2.88%
52-week Average	2.63%
Average	2.76%

Q. WHAT INFORMATION DID YOU RELY UPON TO DETERMINE YOUR EXPECTED GROWTH RATE?

A. I have used five-year projected growth rate estimates from Value Line, Yahoo! Finance, and Zacks.

Q. WHAT WERE THE RESULTS OF YOUR FORECASTED EARNINGS GROWTH RATES?

A. The expected average growth rates for my proxy group ranged from 2.70% to 10.80% with an overall average of 6.61%.[36]

Q. WHAT IS THE RESULT OF YOUR DCF ANALYSIS BASED ON YOUR RECOMMENDED DIVIDEND YIELD AND GROWTH RATE?

A. The results of my DCF analysis is calculated as follows:[37]

[35] I&E Exhibit No. 2, Schedule 4.
[36] I&E Exhibit No. 2, Schedule 5.
[37] I&E Exhibit No. 2, Schedule 6.

K	=	D_1/P_0	+	g
9.37%	=	2.76%	+	6.61%

Capital Asset Pricing Model

Q. PLEASE EXPLAIN YOUR CAPM ANALYSIS.

A. My analysis employs the traditional CAPM as portrayed in the following formula:

$$K = R_f + \beta(R_m - R_f)$$

Where:

K	=	Cost of equity
R_f	=	Risk-free rate of return
R_m	=	Expected rate of return on the overall stock market
β	=	Beta measures the systematic risk of an asset
$R_m - R_f$	=	Equity Risk Premium (ERP)

Q. WHAT IS BETA AS EMPLOYED IN YOUR CAPM ANALYSIS?

A. Beta is a measure of the systematic risk of a stock in relation to the rest of the stock market. A stock's beta is estimated by calculating the linear regression of a stock's return against the return on the overall stock market. The beta of a stock with a price pattern identical to that of the overall stock market will equal one. A stock with a price movement that is greater than the overall stock market will have a beta that is greater than one and would be described as having more investment risk than the market. Conversely, a stock with a price movement that is less than

the overall stock market will have a beta of less than one and would be described as having less investment risk than the market.

Q. HOW DID YOU DETERMINE BETA FOR YOUR CAPM ANALYSIS?

A. In estimating an equity cost rate for my proxy group of six water companies, I used the average of the betas for the companies as provided in the Value Line Investment Survey. The average beta for my proxy group is 0.83.[38]

Q. WHAT RISK-FREE RATE OF RETURN HAVE YOU USED FOR YOUR FORECASTED CAPM ANALYSIS?

A. I used the risk-free rate of return (R_f) from the projected yield on 10-year Treasury Notes. While the yield on the short-term T-Bill is a more theoretically correct parameter to represent a risk-free rate of return, it can be extremely volatile. The volatility of short-term T-Bills is directly influenced by Federal Reserve policy. At the other extreme, the 30-year Treasury Bond exhibits more stability but is not risk-free. Long-term Treasury Bonds have substantial maturity risk associated with market risk and the risk of unexpected inflation. Long-term treasuries normally offer higher yields to compensate investors for these risks. As a result, I used the yield on the 10-year Treasury Note because it mitigates the shortcomings of the other two alternatives. Additionally, the Commission has historically agreed

[38] I&E Exhibit No. 2, Schedule 7.

with I&E and recognized the 10-year Treasury Note as the superior measure of the risk-free rate of return.[39]

The forecasted yield on the 10-year Treasury Note, as can be seen in Blue Chip Financial Forecasts, is expected to be between 4.00% and 4.40% from the third quarter of 2024 through the third quarter of 2025, and it is forecasted to be 4.10% from 2026-2030. For my forecasted CAPM analysis, I used 4.18%, which is the average of all the yield forecasts I observed.[40]

Q. HOW DID YOU DETERMINE THE RETURN ON THE OVERALL STOCK MARKET IN YOUR FORECASTED CAPM ANALYSIS?

A. To arrive at a representative expected return on the overall stock market, I observed Value Line's 1700 stocks and the S&P 500 market returns. Value Line expects its universe of 1700 stocks to have an average yearly return of 12.77% over the next three to five years based on a forecasted dividend yield of 2.10% and a yearly index appreciation of 50%. The S&P 500 Index has an average return of 12.16% over the past 98 years.[41] I have averaged these two figures which results in an estimated market return of 12.46%.[42]

---

[39] *Pa. PUC v. UGI Utilities, Inc. – Electric Division;* Docket No. R-2017-2640058 (Order Entered October 25, 2018). *See generally* Disposition of Capital Asset Pricing Model (CAPM), p. 99; *Pa. Columbia Water Company*; Docket No. R-2023-3040258 (Order Entered January 18, 2024). See generally Disposition of Cost of Common Equity, pp. 107-108. *Pa. PUC v. Pennsylvania-American Water Company;* Docket Nos. R-2023-3043189 and R-2023-3043190 (Order Entered July 22, 2024). *See generally* Disposition of Capital Asset Pricing Model (CAPM), pp. 171-172.

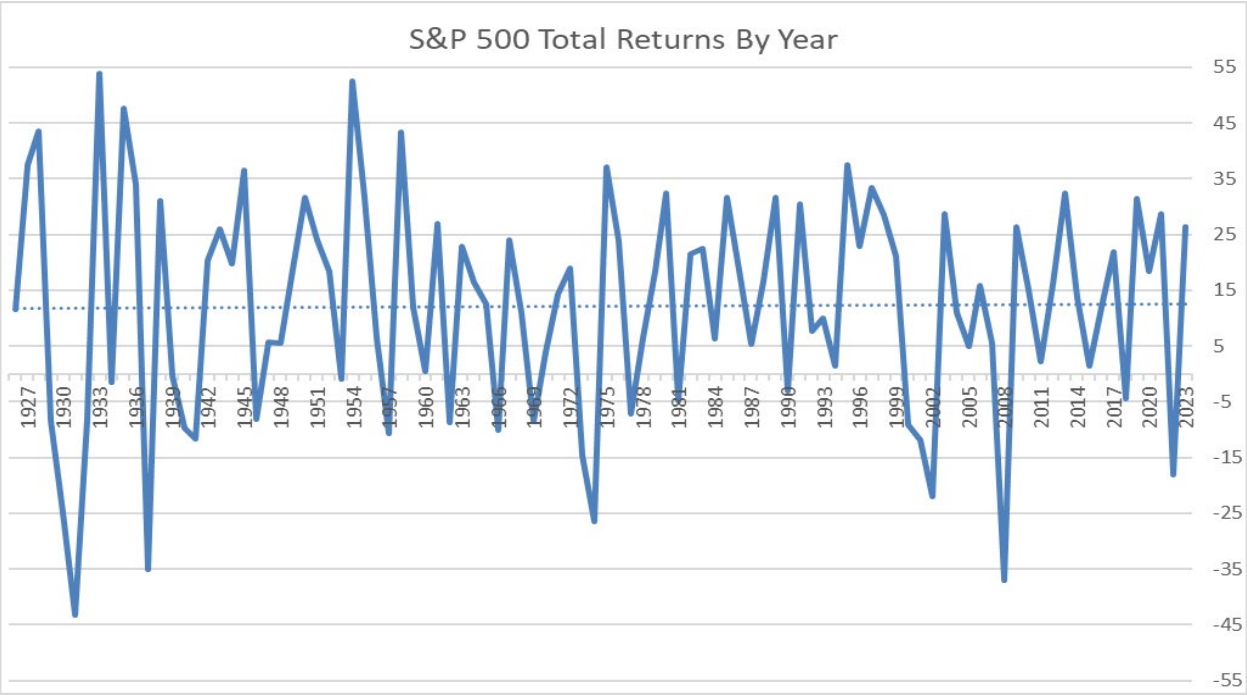
[40] I&E Exhibit No. 2, Schedule 8.

[41] I&E Exhibit No. 2, Schedule 9.

[42] I&E Exhibit No. 2, Schedule 10.

Q. DID I&E RECENTLY CHANGE ITS APPROACH TO ESTIMATE A RETURN ON THE OVERALL STOCK MARKET COMPARED TO PRIOR PROCEEDINGS?

A. Yes. It is important to note that I have recently incorporated the historical returns of the S&P 500 into my estimated overall market return calculation for a few reasons. First, the sources I have historically employed such as Yahoo! Finance and Morningstar no longer offer projected growth rates for the S&P 500 to pair with projected dividend yields as they have in the recent past. Additionally, the trendline for the returns over the past 98 years has been relatively flat and stable as shown below:



Therefore, I believe it is reasonable to utilize this data in my calculation of the expected overall market return. Notably, Mr. Moul similarly employs the historical S&P 500 returns in his analysis.[43]

Q. WHAT IS THE COST OF EQUITY RESULT FROM YOUR CAPM ANALYSIS USING A FORECASTED OVERALL MARKET RETURN?

A. The result of my analysis is as follows:[44]

K	=	R_f	+	$\beta(R_m - R_f)$
11.05%	=	4.18%	+	0.83 (12.46% - 4.18%)

Q. HAVE YOU PROVIDED AN ADDITIONAL CAPM ANALYSIS?

A. Yes. I have provided an additional CAPM analysis using Kroll's (formerly Duff & Phelps) recommended U.S. Equity Risk Premium (ERP). Kroll is a trusted and publicly available source that bases their recommended ERP on current and forecasted economic and financial market conditions.

Q. WHAT IS KROLL'S CURRENT RECOMMENDED ERP?

A. As of June 5, 2024, Kroll recommends an ERP of 5.0%.

[43] Aqua Exhibit 4-A, Schedule 12.
[44] I&E Exhibit No. 2, Schedule 11.

Q. WHAT IS THE COST OF EQUITY RESULT FROM YOUR CAPM ANALYSIS USING KROLL'S RECOMMENDED ERP?

A. The result of my analysis is as follows:[45]

K	=	R_f	+	β(ERP)
8.33%	=	4.18%	+	0.83 (5.0%)

Q. WHAT IS THE RESULT OF YOUR CAPM ANALYSIS BASED ON THE AVERAGE OF USING A FORECASTED OVERALL MARKET RETURN AND USING KROLL'S RECOMMENDED ERP?

A. The average of my CAPM analyses is 9.69% ((11.05% + 8.33%) ÷ 2).[46]

Q. DO YOU HAVE ANY ADDITIONAL COMMENTS REGARDING YOUR CAPM ANALYSIS?

A. Yes. As discussed earlier in my testimony, and as I&E has historically reasoned, my recommended cost of equity is based upon my DCF analysis. My CAPM analyses are only presented to the Commission as a comparison and not for recommendation purposes as the inputs are highly subjective, and other than beta, not company or industry specific.

[45] I&E Exhibit No. 2, Schedule 11.
[46] I&E Exhibit No. 2, Schedule 11.

Q. IS IT NECESSARY OR APPROPRIATE TO APPLY THE CAPM WITH SIMILAR WEIGHT TO THE DCF WHEN DETERMINING A SPECIFIC RETURN ON EQUITY DUE TO RECENT INFLATIONARY TRENDS?

A. No. My use of the DCF as a primary method in determining an appropriate return on equity already sufficiently takes inflationary trends into consideration. As mentioned above, the DCF includes a spot stock price in the dividend yield calculation and analysts who generate forecasted earnings growth almost certainly take inflation into consideration as well, so it contains the most up-to-date projected information of any model. In other words, the inputs of the DCF capture all known economic factors, including inflation.

CRITIQUE OF MR. MOUL'S PROPOSED COST OF EQUITY

Q. DO YOU AGREE WITH MR. MOUL'S CLAIMED COST OF EQUITY?

A. No. I disagree with Mr. Moul's proposed cost of equity analysis for several reasons. First, I disagree with the weights given to the results of Mr. Moul's CAPM, RP, and CE analyses in his claimed cost of equity. Second, I take issue with certain aspects of Mr. Moul's risk analysis of Aqua. Third, I disagree with his application of the DCF including the forecasted growth rate and leverage adjustment he uses. Fourth, I do not agree with his use of the 30-year Treasury Bond in place of the 10-year Treasury Note and use of an inflated beta in his CAPM analysis. Finally, I disagree with Mr. Moul's inclusion of a size adjustment and for the Commission to consider recognition of exemplary management

performance when determining the Company's cost of equity.

Weights Give to the CAPM, RP, and CE Methods

Q. DO YOU AGREE WITH MR. MOUL'S RELIANCE ON THE CAPM AND RP MODELS?

A. No. While I am not opposed to providing the Commission with the results of the CAPM methodology for a point of comparison to the results of the DCF calculation, I am opposed to giving the CAPM and RP considerable weight. For the reasons previously discussed in this testimony, including my reference to recent Commission orders, it is inappropriate to give the CAPM, RP, and CE models similar weight to the DCF as Mr. Moul has done in creating his recommended cost of equity. As discussed above, the CAPM measures the cost of equity indirectly and can be manipulated by the time period chosen. Since the RP is a simplified version of the CAPM, it suffers from these same flaws.

Q. DO YOU AGREE WITH MR. MOUL'S USE OF THE CE METHOD?

A. No. The companies in Mr. Moul's analysis are not utilities, and, therefore, they are too dissimilar to be used in a CE analysis. The companies in Mr. Moul's CE proxy group are comprised of unregulated industries like Chemicals, Retail Stores, Telecom, Food, IT Services, Industrials, Electronics, Machinery, Trucking,

Diversified Business, Banking, etc.[47] These non-utility companies with unrelated or entirely dissimilar business segments are simply not comparable to water utilities in terms of the business risk and financial risk profiles. Regulated water utility companies are monopolies, which are subject to very little competition, if any at all. Due to this minimal competition, utilities in general have very low business risk and can maintain higher financial risk profiles by employing more leverage. Conversely, since the companies in Mr. Moul's CE proxy group operate in an unregulated competitive environment with a higher level of business risk, they must maintain lower financial risk profiles by employing a smaller amount of leverage.

Further, in his CE analysis, Mr. Moul stated, "I used 20% as the point where those returns could be viewed as highly profitable and should be excluded from the Comparable Earnings approach."[48] I do not believe this arbitrary use of 20% is justified, as I am unaware of any water utility company that has been awarded or regularly earns a 20% return.

Risk Analysis

Q. SUMMARIZE MR. MOUL'S CLAIMS REGARDING RISK FACTORS THE COMPANY FACES.

A. Mr. Moul describes the Company's claimed risk factors in two different sub-

[47] Aqua Exhibit 4-A, Schedule 14, pp. 1-2.
[48] Aqua Statement No. 7, p. 47, lines 16-18.

sections. In the first section, labeled "Water Utility Risk Factors," he describes the *qualitative* risk factors. In this section, Mr. Moul discusses the business risks associated with regulatory policies along with capital intensity and Aqua's capital expenditure program.[49] In the second section of his risk analysis, labeled "Fundamental Risk Analysis," he describes the *quantitative* risk factors. In this section, Mr. Moul discusses the Company's credit quality, as well as many different financial metrics including size, market ratios, common equity ratio, return on book equity, operating ratios, interest coverage, quality of earnings, internally generated funds, and betas.[50]

Q. WHAT RISKS DOES AQUA FACE THAT MR. MOUL CLAIMS ARE ASSOCIATED WITH REGULATORY POLICIES?

A. Mr. Moul explains that the Safe Drinking Water Act (SDWA) Amendments of 1996 that re-authorized the SDWA for the second time since its original passage in 1974, institutes policies and procedures governing water quality. The 1996 amendments empower the Environmental Protection Agency (EPA), along with other interested parties, to develop a list of contaminants for possible regulation, which must be updated every five years. From that list, the EPA must select at least five contaminants and determine whether to regulate them. The EPA can

[49] Aqua Statement No. 7, p. 8, line 17 through p. 13, line 12.
[50] Aqua Statement No. 7, p. 13, line 13 through p. 19, line 15.

bypass the process and develop interim regulations for contaminants posing an urgent health threat.[51]

Q. WHAT IS YOUR OBSERVATION REGARDING MR. MOUL'S CLAIMED RISKS RESULTING FROM REGULATORY POLICIES?

A. Aqua faces the same regulatory risk as its peers contained in both my proxy group and Mr. Moul's Water Group. In fact, Mr. Moul even states that "most of these regulations affect the entire water industry in contrast with the disparate impact on water utilities of regulations issued under the Clean Air Act, which may affect only a subset of the individual companies in that industry."[52] Additionally, the legislation Mr. Moul references was passed in 1996, so even though the legislation carries provisions that may change regulatory requirements every five years, by now, analysts and investors following the regulated water utility industry must certainly be well aware of this type of risk.

Q. WHAT ADDITIONAL BUSINESS RISKS DOES MR. MOUL CLAIM AFFECT THE COMPANY?

A. Mr. Moul indicates lead contamination has risen to prominence as a national concern because of the drinking water crisis that garnered news media attention in Flint, Michigan.[53] Mr. Moul references the EPA's regulatory measures to address

[51] Aqua Statement No. 7, p. 8, line 20 through p. 9, line 4.
[52] Aqua Statement No. 7, p. 9, lines 11-14.
[53] Aqua Statement No. 7, p. 9, lines 21-25.

Pre- and Polyfluoroalkyl Substances (PFAS) and the additional capital expenditures needed to comply with the new regulations to treat the Company's drinking water for PFAS.[54] He continues, enumerating additional environmental and regulatory issues such as the integrity of water supply sources, threats from terrorists, changing land use, and permissible levels of discharged contaminants established by state and federal agencies.[55] Further, Mr. Moul claims the high fixed costs of water utilities make earnings vulnerable to variation due to fluctuation with water usage in accordance with the weather, the economy, and conservation efforts.[56]

Q. WHAT IS YOUR RESPONSE TO THE ISSUES CITED BY MR. MOUL IN TERMS OF HOW THEY AFFECT THE COMPANY'S BUSINESS RISK?

A. The issues referenced by Mr. Moul affect the entire water utility industry, therefore, Aqua faces the same exposure to these issues as do all the other companies in our respective proxy groups. Investors voluntarily buy and hold shares of stocks in water utility companies, indicating they are aware of these risks and the returns. The cost of equity I present for Aqua in this proceeding is adequately measured by my proxy group, and therefore, adequately compensates investors for these risks.

[54] Aqua Statement No. 7, p. 10, line 19 through p. 11, line 3.
[55] Aqua Statement No. 7, p. 11, lines 9-13.
[56] Aqua Statement No. 7, p. 12, lines 7-9.

Q. WHAT DOES MR. MOUL CLAIM REGARDING THE COMPANY'S CAPITAL EXPENDITURES?

A. According to Mr. Moul, the Company's net plant investment to revenue is 7.85x, compared with his Water Group, which is 4.27x.[57] Additionally, Mr. Moul outlines Aqua's projected capital expenditure plan for 2024-2028, which is expected to total $1,954,212,797. The anticipated capital expenditures for the FPFTY are $362,690,497.[58]

Q. WHAT IS YOUR RESPONSE TO MR. MOUL'S CLAIM REGARDING RISK CREATED BY THE COMPANY'S PROJECTED CAPITAL EXPENDITURES?

A. High levels of capital expenditures and high capital intensity are typical of the water utility industry, as every water utility faces the same issues of upgrading or replacing its aging infrastructure. Also, while Aqua may have a higher net plant to revenue ratio than the Water Group as Mr. Moul suggests, it must be recognized that capital expenditures which are used to fund plant investment are passed on to ratepayers via base rates such as those claimed in the instant proceeding. So, as costs for replacing infrastructure increase, Aqua, as well as any other company, has the option to file a base rate case at any time to address revenue inadequacy due to increasing costs, infrastructure replacement, or any associated issues. Base rate

[57] Aqua Statement No. 7, p. 12, lines 1-4.
[58] Aqua Statement No. 7, p. 12, lines 18-20.

cases allow a utility to recover its costs and provide it the *opportunity* to earn a reasonable return on capital investments. The Commission also offers risk reducing mechanisms such as the Distribution System Improvement Charge (DSIC) and the FPFTY to help reduce any lag in recovery of infrastructure investment or other unforeseen expenditures. It is worth mentioning that these mechanisms were not designed to eliminate the need for base rate cases, but only to mitigate regulatory lag and support increasing infrastructure replacement needs.

Q. WHAT HAS MR. MOUL CLAIMED REGARDING QUANTITATIVE RISK FACTORS IN THE SECTION LABELED "FUNDAMENTAL RISK ANALYSIS?"

A. Mr. Moul stated that it is necessary to establish a company's relative risk position within its industry through an analysis of quantitative and qualitative factors. Mr. Moul uses various financial metrics to compare Aqua to the S&P Public Utilities Index and his Water Group.[59]

Q. WHAT IS YOUR RESPONSE TO MR. MOUL'S "FUNDAMENTAL RISK ANALYSIS?"

A. One of the points he discusses, size risk, is discussed and disputed elsewhere in my direct testimony, so this section will concentrate on his various other areas

[59] Aqua Statement No. 7, p. 13, line 17 through p. 14, line 3.

regarding this topic. Throughout his "fundamental risk analysis," Mr. Moul makes several statements to indicate that Aqua has no more of a risk than any other company in his Water Group. First, Mr. Moul identifies the Company's long-term bond rating from Standard and Poor's (S&P) to be A, which categorizes Aqua to be investment grade with a strong capacity to meet its financial obligations. By comparison, the average S&P ratings of Mr. Moul's Water Group and the S&P Public Utilities Index are A and BBB+, respectively.[60] These ratings indicate that Aqua has the same credit risk as Mr. Moul's Water Group and a lower credit risk than the S&P Public Utilities Index.

Second, regarding common equity ratios, Mr. Moul stated, "The five-year average common equity ratios, based on permanent capital, were 53.3% for the Company, 51.1% for the Water Group, and 40.5% for the S&P Public Utilities." He concluded that the financial risk of Aqua and the Water Group was similar.[61]

Third, regarding operating ratios, Mr. Moul stated, "The five-year average operating ratios were 50.1% for the Company, 71.1% for the Water Group, and 81.0% for the S&P Public Utilities. As Mr. Moul explains, the operating ratio illustrates the percentage of revenue required to cover operating expenses. The lower the operating ratio is, the higher the operating margin becomes.[62] In this case, Aqua's lower operating ratio implies less risk than the Water Group and the S&P Public Utilities.

[60] Aqua Statement No. 7, p. 15, lines 2-11.
[61] Aqua Statement No. 7, p. 16, lines 14-17.
[62] Aqua Statement No. 7, p. 17, lines 1-3 and Footnote 3.

Fourth, regarding quality of earnings, Mr. Moul opines, "On balance, AP, the Water Group and the S&P Public Utilities all have similar quality of earnings."[63]

Fifth, concerning internally generated funds, he stated, "Historically, the five-year average percentage of IGF to capital expenditures was 75.3% for the Company, 49.4% for the Water Group and 62.3% for the S&P Utilities."[64] Mr. Moul continues by stating, "Historically, the Company's cash flow to construction has been better than the Water Group and the S&P Public Utilities."[65]

In summary, Mr. Moul stated, "The Company's size and financial risk are fairly similar to the Water Group"[66] and "the Water Group provides a reasonable basis for measuring the Company's cost of equity."[67] Through his own analysis and testimony, Mr. Moul proves and acknowledges that Aqua has very similar risk to that of his Water Group, therefore, any additional consideration for the Company's risk profile is unnecessary.

[67] Aqua Statement No. 7, p. 19, lines 14-15.

Cost of Equity Adjustments

Inflated Growth Rate Used in DCF Analysis

Q. WHAT GROWTH RATE HAS MR. MOUL USED IN HIS DCF ANALYSIS?

A. Mr. Moul used a growth rate of 6.75%.[68]

Q. WHAT IS THE BASIS FOR MR. MOUL'S GROWTH RATE?

A. Mr. Moul stated, "Schedule 9 shows the prospective five-year earnings per share growth rates projected for the Water Group by IBES/First Call (5.88%), Zacks (6.80%), and Value Line (6.58%).[69] The average of the growth rates from Mr. Moul's sources resulted in an average growth rate of 6.42% (5.88% + 6.80% + 6.58%) ÷ 3), yet Mr. Moul used a 6.75% in his DCF analysis. Mr. Moul stated that growth rates should not be established by mathematical formulation and that the reasonableness of his chosen growth rate is supported by the investor-expected growth for the Water Group and the expected continuation of infrastructure spending.[70]

Q. DO YOU AGREE WITH MR. MOUL'S GROWTH RATE ANALYSIS?

A. No. Contrary to Mr. Moul's belief that DCF growth rates *should not* be established by mathematical formulation, I believe that any alternative is subjective and introduces additional and unnecessary bias and should be avoided

[68] Aqua Statement No. 7, p. 30, lines 22-23.
[69] Aqua Statement No. 7, p. 29, lines 23-25.
[70] Aqua Statement No. 7, p. 30, line 19 through p. 31, line 2.

when possible. The use of a higher growth rate than the average of his proxy group ignores the fact that analysts making earnings per share growth forecasts would already be aware of the economic conditions and the state of the water utility industry. The reasons Mr. Moul has given for choosing a 6.75% rate are factors that are already included in the earnings per share growth forecasts; thus, choosing a growth rate higher than the average of his proxy group would account for the same factors twice.

Q. DO YOU HAVE ANY ADDITIONAL COMMENTS REGARDING THE RESULTS OF MR. MOUL'S PROJECTED GROWTH RATES?

A. Yes. While the five-year projected growth rates can be used in analyses, one must be aware that analysts' estimates may be biased. This bias has been observed in literature. An article authored by Professors Ciciretti, Dwyer, and Hasan in 2009 observed strong support of earnings forecast being higher than actual earnings.[71] In spring of 2010, McKinsey on Finance presented an article reporting that after a decade of stricter regulation analysts' forecasts are still overly optimistic.[72]

Analysts' estimates are an attempt to forecast future cash flows and thus expected earnings growth. However, it should be kept in mind that prudent judgment must be exercised as to the sustainability of forecasted growth rates with

[71] Ciciretti, Rocco; Dwyer, Gerald R; and Iftekhan Hasan. "Investment Analysts' Forecasts of Earnings" Federal Reserve Bank of St. Louis *Review*, September/October 2009, 91 (5, part 2) pp. 545-67.

[72] Goedhart, Marc J; Raj, Rishi; and Abhishek Saxena. "Equity analyst: Still too bullish" McKinsey on Finance Number 35 Spring 2010, pp. 14-17.

respect to the base earnings. If the base year earnings are abnormally high, the growth rates from which they are calculated will be biased downward. Similarly, if the base year earnings are abnormally low, the growth rates from which they are calculated will be biased upward. As a result, it is typically necessary to employ a methodology to smooth out the abnormally high or low base year earnings.

In summary, since analysts' projected growth forecasts are most often overly optimistic, there is no need to arbitrarily and non-formulaically increase the estimates over the average growth value as is done by Mr. Moul in his DCF analysis.

Leverage Adjustment Applied to DCF Analysis

Q. HAS MR. MOUL MADE ANY ADDITIONAL ADJUSTMENTS TO THE RESULT OF HIS DCF ANALYSIS?

A. Yes. Mr. Moul proposed a 120-basis point "leverage" adjustment to the results of his DCF analysis to account for applying a market-determined cost of equity to a book value capital structure.[73]

Q. WHAT IS FINANCIAL LEVERAGE?

A. Financial leverage is the use of debt capital to supplement equity capital. A firm with significantly more debt than equity is considered to be highly leveraged.

[73] Aqua Statement No. 7, p. 35, lines 9-12.

Q. WHAT IS A MARKET-TO-BOOK (M/B) RATIO?

A. A market-to-book ratio is used to evaluate a public firm's equity value by comparing the market value and book value of a company's equity. One way of doing this is to divide the current price per share of stock by the book value per share. A M/B ratio of above one (1) is desired.

Q. HAS MR. MOUL PROPOSED TO ADJUST THE RESULT OF HIS DCF ANALYSIS TO RECOGNIZE HOW THE COMPANY IS LEVERAGED?

A. No. Mr. Moul does not propose to change the capital structure of the utility (a leverage adjustment), nor does he propose to apply the market-to-book ratio to the DCF model (a market-to-book adjustment). Instead, Mr. Moul has proposed making an adjustment to account for applying the market value cost rate of equity to the book value of the utility's equity. I am not aware of any term in academic journals, textbooks, or other literature that describes this type of adjustment.

Q. WHAT IS THE BASIS FOR MR. MOUL'S PROPOSED LEVERAGE ADJUSTMENT?

A. Mr. Moul stated that in order to make the DCF results relevant to a book value capital structure, the market-derived cost of equity needs to be adjusted to take into consideration the difference in financial risk.[74] Mr. Moul opined this is

[74] Aqua Statement No. 7, p. 31, lines 21-24.

because market valuations of equity are based on market value capital structures, which in general have more equity, less debt, and, therefore, less risk than book value capital structures.[75]

Q. HOW DOES MR. MOUL CALCULATE THE LEVERAGE ADJUSTMENT USED IN HIS ANALYSIS?

A. Mr. Moul simply stated:

> I know of no means to mathematically solve for the 1.20% leverage adjustment by expressing it in the terms of any particular relationship of market price to book value. The 1.20% adjustment is merely a convenient way to compare the 10.58% return computed using the Modigliani & Miller formulas to the 9.38% return generated by the DCF model based on a market-value capital structure.[76]

Q. DO YOU AGREE WITH MR. MOUL'S "LEVERAGE ADJUSTMENT?"

A. No. Mr. Moul's adjustment is inappropriate for a couple of reasons, including the characterization of financial risk and its inconsistency with Commission precedent.

Q. EXPLAIN HOW RATING AGENCIES ASSESS FINANCIAL RISK.

A. Rating agencies assess financial risk based upon a company's booked debt obligations and the ability of its cash flow to cover the interest payments on those obligations. The agencies use a company's financial statements for their analysis,

[75] Aqua Statement No. 7, p. 31, lines 14-20.
[76] Aqua Statement No. 7, p. 35, lines 1-7.

not the market valued capital structure. Financial statements reflect the financial risk of a company because they represent the performance of the company over a certain period of time. A change in the market value of the stock is not reflected in the financial statements nor is a change in market value capital structure reflected in the book value capital structure unless treasury stock is purchased. It is a company's financial statements that affect the market value of the stock, and therefore, the financial statements and the book value capital structure are relied upon in an analysis such as that done by rating agencies. Additionally, investors are aware of the difference in the return on book value and market value of a stock while making the investment decision.

Q. HAS THE COMMISSION REJECTED THE USE OF A LEVERAGE ADJUSTMENT?

A. Yes. The following eight cases are the most recent instances where the Commission has rejected the use of a "leverage adjustment."

First, in *Pennsylvania Public Utility Commission v. Aqua Pennsylvania, Inc.*, at Docket No. R-00072711 (Order Entered July 31, 2008), p. 38, the Commission rejected the ALJ's recommendation for a leverage adjustment stating, "[t]he fact that we have granted leverage adjustments in the past does not mean that such adjustments are indicated in all cases."

Second, in *Pennsylvania Public Utility Commission, et al v. City of Lancaster – Bureau of Water*, at Docket No. R-2010-2179103 (Order Entered

July 14, 2011), p. 79, the Commission agreed with the I&E position and stated, "any adjustment to the results of the market based DCF are unnecessary and will harm ratepayers. Consistent with our determination in *Aqua 2008* there is no need to add a leverage adjustment."

Third, in *Pennsylvania Public Utility Commission, et al v. UGI Utilities, Inc. – Electric Division*, at Docket No. R-2017-2640058 (Order Entered October 25, 2018), pp. 93-94, the Commission agreed with the I&E position and stated, "we conclude that an artificial adjustment in this proceeding is unnecessary and contrary to the public interest. Accordingly, we decline to include a leverage adjustment in our calculation of the DCF cost of equity."

Fourth, in *Pennsylvania Public Utility Commission, et. al v. Columbia Gas of Pennsylvania, Inc*., at Docket R-2020-3018835 (Order Entered February 19, 2021), pp. 137-141, the Commission adopted the ALJ's recommendation to use I&E's DCF methodology, which excludes the use of a leverage adjustment.

Fifth, in *Pennsylvania Public Utility Commission, et. al v. PECO Energy Company – Gas Division*, at Docket R-2020-3018929 (Order Entered June 22, 2021, Public Version), pp. 172-173, the Commission adopted the ALJ's recommendation to use I&E's DCF methodology, which excluded PECO's application of a leverage adjustment.

Sixth, in *Pennsylvania Public Utility Commission, et. al v. Aqua Pennsylvania, Inc.*, at Docket R-2021-3027385 (Order Entered June 22, 2021), pp. 154-155, the Commission adopted the ALJ's recommendation to use I&E's DCF

methodology, which excluded Aqua's application of a leverage adjustment.

Seventh, in *Pennsylvania Public Utility Commission, et. al v. Columbia Water Company*, at Docket R-2023-3040258 (Order Entered January 18, 2024), p. 108, the Commission again agreed with I&E's methodologies which did not include a leverage adjustment to the cost of equity.

Finally, in the most recent case, *Pennsylvania Public Utility Commission, et. al v. Pennsylvania-American Water Company*, at Docket Nos. R-2023-3043189 (Water) and R-2023-3043190 (Wastewater) (Order Entered July 22, 2024), p. 172, the Commission again agreed with I&E's methodologies which did not include a leverage adjustment to the cost of equity.

Q. BASED ON THE COMPANY'S FILED RATE BASE AND CLAIMED CAPITAL STRUCTURE, WHAT IS THE VALUE OF AN ADDITIONAL 120 BASIS POINTS FOR THE LEVERAGE ADJUSTMENT TO THE COST OF EQUITY?

A. The example below illustrates the impact of 120 additional basis points to the Company's cost of equity:

Aqua Pennsylvania, Inc. - Water Operations	
Claimed Equity Percentage of Capital Structure	53.95%
Additional Basis Points to the Calculated Cost of Equity	1.20%
Claimed Rate Base*	$4,318,247,093
Impact Prior to Gross Up (0.5395 x 0.0120 x $4,318,247,093)	$27,956,332
Gross Revenue Conversion Factor***	1.39073
Total Impact ($27,956,332 x 1.39073)	**$38,879,710**
*Aqua Exhibit 1-A, Schedule G-1, Line 15 **Aqua Exhibit 1-A, Schedule A-5, Line 14	

Aqua Pennsylvania, Inc. - Wastewater Operations	
Claimed Equity Percentage of Capital Structure	53.95%
Additional Basis Points to the Calculated Cost of Equity	1.20%
Claimed Rate Base*	$392,798,320
Impact Prior to Gross Up (0.5395 x 0.0120 x $392,798,320)	$2,542,976
Gross Revenue Conversion Factor***	1.39937
Total Impact ($2,542,976 x 1.39937)	**$3,558,564**
*Aqua Exhibit 1-C, Schedule G-1, Line 15 **Aqua Exhibit 1-C, Schedule A-5, Line 14	

In this example, an addition of 120 basis points to the cost of equity would burden ratepayers to fund an additional amount of $38,879,710 and $3,558,564 annually

for water and wastewater customers, respectively, to cover the increase of the inflated rate of return along with the associated impact resulting from increases to income taxes, uncollectibles, and assessments.

Q. SUMMARIZE YOUR RECOMMENDATION REGARDING THE LEVERAGE ADJUSTMENT.

A. I recommend that Mr. Moul's proposed 120-basis point leverage adjustment be rejected because true financial risk is a function of the amount of interest expense, and capital structure information provided to investors through Value Line is that of book values, not market values. This demonstrates that investors base their decisions on book value debt and equity ratios for the regulated utilities, and therefore, no adjustment is needed. Mr. Moul's proposed adjustment serves only to manipulate the DCF's market-based methodology and causes substantial harm to ratepayers as illustrated above.

Q. DO YOU HAVE ANY FURTHER COMMENTS REGARDING MR. MOUL'S DCF CALCULATION?

A. Yes. While I am not directly disputing Mr. Moul's adjusted dividend yields, it is important to recognize, as cited above, that the Commission has recently agreed with I&E's DCF methodology which includes the appropriate calculation of dividend yields. Although it is acceptable to adjust historical dividend yields as Mr. Moul has done, it is preferable to use forecasted dividends to calculate the

dividend yields when available, such as the ones offered by Value Line that I have employed.

Q. WHAT WOULD MR. MOUL'S DCF BE WITHOUT ANY ADJUSTMENTS?

A. Without Mr. Moul's use of inflated growth rates and a leverage adjustment, his DCF would consist of his calculated dividend yield of 2.63% and an average growth rate of 6.42% as shown above results in a 9.05% cost of equity which is well below his claimed cost of equity of 10.95% and much closer to my recommended cost of equity of 9.37%.

Risk-Free Rate of Return

Q. HOW HAS MR. MOUL CALCULATED HIS RISK-FREE RATE FOR USE IN HIS CAPM MODEL?

A. Mr. Moul considers Treasury yield estimates published by Blue Chip Financial Forecasts over the next six quarters, from the time of his analysis, as well as long-range, five-year averages. However, he used the 30-year Treasury Bond while I employed the 10-year Treasury Note. Also, where I used a long-range five-year average, future data point accounting for years 2026-2030 predictions, Mr. Moul used two future data points accounting for not only years 2025-2029, but also

included an estimate for years 2030-2034. His analysis results a 3.75% risk-free rate,[77] while I used 4.18% in my CAPM analysis.[78]

Q. WHAT COMMENTS DO YOU HAVE REGARDING MR. MOUL'S CALCULATION OF THE RISK-FREE RATE?

A. Although Mr. Moul and I disagree on the inputs to determine the risk-free rate, I will not dispute his result since it is lower, yet comparable to my own. However, I must reiterate my earlier statements that long-term Treasury Bonds have substantial maturity risk associated with the market risk and the risk of unexpected inflation and normally offer higher yields to compensate investors for these risks. Using the 10-year Treasury Note is more appropriate to balance the short-term volatility risk and the long-term inflation risk.

The Commission has recognized the 10-year Treasury Note as the superior measure for the risk-free rate by stating the following,[79]

> We agree with I&E and the ALJs that using the yield on the 10-year Treasury Note provides a better measure of the risk-free rate of return than using the yield on the 30-year Treasury Bond, as recommended by UGI. In our view, using the 10-year Treasury Note balances the shortcomings of the short-term T-Bill and the 30-year Treasury Bond. Although long-term Treasury Bonds have less risk of being influenced by federal policies, they have substantial maturity risk associated with the market risk. In addition, long-term Treasury Bonds bear the risk of unexpected inflation.

---

[77] Aqua Statement No. 7, p. 43, lines 2-4.
[78] I&E Exhibit No. 2, Schedule 8.
[79] *Pa. PUC v. UGI Utilities, Inc. – Electric Division;* Docket No. R-2017-2640058 (Order entered October 25, 2018), p. 99. (Disposition of Capital Asset Pricing Model (CAPM)).

Additionally, the Commission recognized:[80]

> I&E's CAPM model uses forecasted yields on ten-year Treasury bonds, and accordingly, its methodology captures forward looking changes in interest rates.

Additionally, the further out into the future one projects, the less reliable the information becomes. Using the projection for 2030-2034 is an unreliable measure and thus, should not be included in the risk-free rate. The Company's FPFTY ends December 31, 2025, and in my opinion using an estimated risk-free rate that is up to nine years beyond the FPFTY is unreasonable and unnecessary.

Inflated Betas Used in CAPM Analysis

Q. HOW HAS MR. MOUL INFLATED THE BETAS EMPLOYED IN HIS CAPM ANALYSIS?

A. Mr. Moul uses the same logic for inflating the Value Line average betas from 0.82 to 1.10 in the CAPM analysis that he uses to enhance his DCF results, through a financial risk adjustment or "leverage" adjustment.[81]

Q. DO YOU AGREE WITH MR. MOUL'S USE OF LEVERAGED OR ADJUSTED BETAS?

A. No. Such enhancements are unwarranted for beta in the CAPM analysis for the same reasons that the "leverage" adjustment is unwarranted in the DCF results.

---

[80] *Pa. PUC v. Aqua Pennsylvania, Inc.,* Docket Nos. R-2021-3027385 & R-2021-3027386, pp. 154 (Order entered May 16, 2022).

[81] Aqua Statement No. 7, p. 40, line 18 through p. 42, line 2.

Additionally, if the *Value Line* betas do not reflect an accurate investment risk as Mr. Moul contends, the question naturally arises as to why *Value Line* does not publish betas that are adjusted for leverage. Until this type of adjustment is demonstrated in academic literature to be valid, such leverage adjusted betas in a CAPM model should be rejected.

Finally, as described in my CAPM analysis above, a stock with a price movement that is greater than the overall stock market will have a beta that is greater than one and would be described as having more investment risk than the market. Due to being regulated and the monopolistic nature of utilities, very rarely do they have a beta greater than one. Therefore, in this case, to apply an adjusted or leveraged beta of 1.10 of the water group in the CAPM analysis to inflate the CAPM results is irrational. Thus, I recommend rejecting Mr. Moul's application of an adjusted beta of 1.10 in the CAPM analysis.

Q. WHAT WOULD MR. MOUL'S CAPM RESULT BE WITHOUT HIS INFLATED BETAS?

A. By applying his non-inflated betas, Mr. Moul's CAPM result would be 11.50%. This is 230 basis points (2.30%) lower than his originally calculated CAPM result of 13.80% and is more comparable to my CAPM result of 9.69%. The calculation is repeated below with Mr. Moul's unadjusted betas of 0.82:

K	=	R_f	+	$\beta(R_m - R_f)$	+	Size
11.50%	=	3.75%	+	0.82 (11.96% - 3.75%)	+	1.02%

Q. BASED ON THE COMPANY'S FILED RATE BASE AND CLAIMED CAPITAL STRUCTURE, WHAT IS THE VALUE OF AN ADDITIONAL 230 BASIS POINTS TO THE COST OF EQUITY BASED ON THE DIFFERENCE IN MR. MOUL'S CAPM RESULTS WITH ADJUSTED BETA OF 1.10 AND UNADJUSTED BETA OF 0.82?

A. The example below illustrates the impact of 230 additional basis points (2.30% = CAPM Results with adjusted beta 13.80% - CAPM Result with unadjusted beta 11.50%) to the Company's cost of equity capital:

Aqua Pennsylvania, Inc. - Water Operations	
Claimed Equity Percentage of Capital Structure	53.95%
Difference in CAPM Results (13.80% - 11.50% = 2.30%)	2.30%
Claimed Rate Base*	$4,318,247,093
Impact Prior to Gross Up (0.5395 x 0.0230 x $4,318,247,093)	$53,582,969
Gross Revenue Conversion Factor**	1.39073
Total Impact ($53,582,969 x 1.39073)	**$74,519,442**
*Aqua Exhibit 1-A, Schedule G-1, Line 15. **Aqua Exhibit No. 1-A, Schedule A-5, Line 14.	

Aqua Pennsylvania, Inc. - Wastewater Operations	
Claimed Equity Percentage of Capital Structure	53.95%
Difference in CAPM Results (13.80% - 11.50% = 2.30%)	2.30%
Claimed Rate Base*	$392,798,320
Impact Prior to Gross Up (0.5395 x 0.0230 x $392,798,320)	$4,874,038
Gross Revenue Conversion Factor**	1.39937
Total Impact ($4,874,038 x 1.39937)	**$6,820,583**
*Aqua Exhibit 1-C, Schedule G-1, Line 15. **Aqua Exhibit No. 1-C, Schedule A-5, Line 14.	

In this example, an addition of 230 basis points to the cost of equity would burden ratepayers to fund an additional amount of $74,519,442 and $6,820,583 annually for water and wastewater customers, respectively, to cover the increase of the inflated rate of return along with the associated impact resulting from increases to income taxes, uncollectibles, and assessments.

Size Adjustment Applied to CAPM Analysis

Q. PLEASE EXPLAIN MR. MOUL'S PROPOSED SIZE ADJUSTMENT.

A. Mr. Moul adds 102 basis points to his CAPM indicated cost of common equity because he believes that as the size of a firm decreases, its risk and required return

increases. Mr. Moul relies upon technical literature including a Fama and French study entitled "The Cross-Section of Expected Stock Returns," an article published in Public Utilities Fortnightly entitled "Equity and the Small-Stock Effect," and the Stocks, Bonds, Bills, and Inflation Yearbook.[82]

Q. DO YOU AGREE WITH MR. MOUL'S SIZE ADJUSTMENT?

A. No. Mr. Moul's proposed size adjustment is unnecessary because the technical literature he cites supporting investment adjustments relating to the size of a company is not specific to the utility industry, and, therefore, has no relevance in this proceeding. Further, Mr. Moul states, "In terms of capitalization, the Company is fairly similar to the average size of the Water Group."[83] With this admission alone, I believe his proposed size adjustment is unnecessary and inappropriate.

Q. IS THERE ACADEMIC EVIDENCE THAT SUPPORTS YOUR CONCLUSION THAT THE SIZE ADJUSTMENT FOR RISK IS NOT APPLICABLE TO UTILITY COMPANIES?

A. Yes. In the article "Utility Stocks and the Size Effect: An Empirical Analysis," Dr. Annie Wong concludes,

> The objective of this study is to examine if the size effect exists in the utility industry. After controlling for equity values, there is some weak evidence that firm size is a missing factor from

[82] Aqua Statement No. 7, p. 43, line 20 through p. 44, line 10 and Aqua Exhibit 4-A, Schedule 1, p. 2.
[83] Aqua Statement No. 7, p. 15, lines 17-18.

> the CAPM for the industrial but not for utility stocks. This implies that although the size phenomenon has been strongly documented for the industriales, the findings suggest that there is no need to adjust for the firm size in utility rate regulation.[84]

presents no evidence to support application of a non-utility study regarding a size adjustment for risk to a utility setting. Absent any credible article to refute Dr. Wong's findings, Mr. Moul's size adjustment to his CAPM results should be rejected.

Additionally, the Commission has recently rejected the application of a size adjustment to the CAPM cost of equity calculation where it agreed that the same literature the Company cites is not specific to the utility industry.[85]

Q. BASED ON THE COMPANY'S CLAIMED RATE BASE AND CAPITAL STRUCTURE, WHAT IS THE VALUE OF AN ADDITIONAL 102 BASIS POINTS FOR MR. MOUL'S SIZE ADJUSTMENT TO THE COST OF EQUITY?

A. The example below illustrates the impact of 102 additional basis points for the size adjustment to the Company's cost of equity:

[84] Dr. Annie Wong, "Utility Stocks and the Size Effect: An Empirical Analysis," *Journal of Midwest Finance Association* 1993, pp. 95-101.

2

In this example, an addition of 102 basis points for the size adjustment to the cost of equity would force ratepayers to fund an unwarranted additional amount of $33,047,753 and $3,024,780 annually for water and wastewater customers, respectively, to cover the increase of the overstated rate of return along with the associated impact resulting from increases to income taxes, uncollectibles, and assessments.

Q. WHAT WOULD MR. MOUL'S CAPM RESULT BE WITHOUT HIS SIZE ADJUSTMENT AND INFLATED BETAS?

A. Mr. Moul's CAPM result would be 10.48%. This is 332 basis points lower than his originally calculated 13.80% result and is comparable to my CAPM result of 9.69%. The calculation is repeated below without Mr. Moul's unnecessary adjustments:

K	=	R_f	+	$\beta(R_m - R_f)$	+	Size
10.48%	=	3.75%	+	0.82 (11.96% - 3.75%)	+	0%

<u>Management Performance</u>

Q. WHAT IS THE COMPANY'S CLAIM REGARDING MANAGEMENT PERFORMANCE?

A. Mr. Moul does not propose a specific basis point adjustment to be added to the calculated cost of equity in recognition of the Company's strong management performance. Mr. Moul stated that the Company's performance should be

considered when the Commission determines the Company's rate of return. Mr. Moul primarily relied upon the direct testimony of Company witnesses William C. Packer[86] and Todd M. Duerr[87] to support the consideration of additional basis points for Aqua's management performance. Although he declined to quantify what he believes to be an appropriate level of additional basis points, he noted that the Commission granted the Company 25 basis points for superior management performance in its 2021 base rate case.[88]

Q. WHAT INFORMATION DO MR. PACKER AND MR. DUERR PROVIDE TO SUPPORT THE COMPANY'S MANAGEMENT PERFORMANCE CLAIMS?

A. Mr. Packer claims that Aqua's exemplary management performance is demonstrated through among other things, providing excellent water quality, wastewater treatment compliance, system reliability and infrastructure rehabilitation, high level customer service, acquisition of troubled water and wastewater systems, its 'A Helping Hand' low-income customer assistance program, and various awards the Company received since its last filing.[89]

Mr. Duerr claims that Aqua's exemplary management performance is demonstrated through among other things, its cost saving measures, its

replacement of lead service lines, meeting or exceeding Pennsylvania's Department of Environmental Protection's standards for PFAS, and the acquisition of troubled water and wastewater systems.[90]

Q. DO YOU AGREE THAT THE COMPANY'S MANAGEMENT PERFORMANCE SHOULD BE CONSIDERED WHEN DETERMINING THE COMPANY'S RETURN ON EQUITY?

A. No. First, many of the topics presented by the Company fall within the categories of reliability, customer satisfaction, and safety that are required of every public utility company under 66 Pa C.S.A. §1501. Additionally, the Company passes capital expenditures to its ratepayers via base rates, or it can utilize a DSIC for capital expenditure recovery. Further, if the Company is effective at controlling operating and maintenance costs, those savings should flow through to ratepayers and/or investors. These savings would likely be offset by any consideration of additional basis points for management performance as ratepayers would have to fund the additional costs. This defeats the purpose of any cost cutting measures to benefit ratepayers.

[90] Aqua Statement No. 11, p. 8, line. 3 through p. 33, line 10.

Q. DID AQUA RECENTLY RECEIVE ADDITIONAL BASIS POINTS IN RECOGNITION OF MANAGEMENT PERFORMANCE?

A. Yes. The Commission awarded Aqua an addition of 25 basis points for its management performance efforts.[91] However, it is important to recognize that this addition was based specifically on Aqua rescuing troubled water and wastewater systems at the Commission's request. The Commission stated: [92]

> We specifically recognize Aqua's efforts and willingness to quickly provide emergency aid to various water and wastewater systems that needed substantial improvement. Aqua has often provided this emergency aid on short notice and at the request of the Commission or other parties to protect the public from egregious health and safety threats and to protect the Commonwealth's drinking water resources from catastrophic damage.

Q. DOES THE COMMISSION'S PAST ISSUANCE OF ADDITIONAL EQUITY POINTS TO RECOGNIZE MANAGEMENT PERFORMANCE MEAN THAT AQUA SHOULD ALSO RECEIVE AN ADJUSTED RETURN ON EQUITY IN THIS PROCEEDING?

A. No. The issuance of equity points to recognize management performance should be done on a case-by-case basis.

---

[92] *Pa. PUC v. Aqua Pennsylvania, Inc.,* Docket Nos. R-2021-3027385 & R-2021-3027386, p. 169 (Order entered May 16, 2022).

Q. WHAT IS YOUR RECOMMENDATION REGARDING THE CONSIDERATION OF THE COMPANY'S MANAGEMENT PERFORMANCE IN DETERMINING THE COMPANY'S RETURN ON EQUITY?

A. I am aware that under 66 Pa C.S.A. §523 the Commission has authority to *consider* a utility's performance, however, it is not mandatory that the Commission grant additional basis points to the ROE. Ultimately, as alluded to above, true strong management performance is earning a higher return through efficient use of resources and cost cutting measures. The greater net income resulting from cost savings and true efficiency in management and operations is available to be passed on to both ratepayers and shareholders. I do not believe that Aqua, or any utility should be gifted additional basis points for doing what they are required to do to provide adequate, efficient, safe, and reasonable service under 66 Pa C.S.A. §1501. For these reasons, I recommend that any addition of basis points to the cost of equity for management performance be disallowed.

OVERALL RATE OF RETURN RECOMMENDATION

Q. WHAT IS THE COMPANY'S PROPOSED COST OF EQUITY AND OVERALL RATE OF RETURN?

A. The Company recommends a cost of equity of 10.95% and an overall rate of

return of 7.90%.[93]

Q. WHAT IS I&E'S RECOMMENDED COST OF EQUITY AND OVERALL RATE OF RETURN?

A. I&E Exhibit No. 2, Schedule 1, shows the calculation of an appropriate cost of equity to be 9.37% with an overall rate of return for the Company to be 7.05%.

Q. DO YOU HAVE ANY FINAL COMMENTS REGARDING THE COMPANY'S PROPOSED RETURN ON EQUITY?

A. Yes. First, a report issued by Regulatory Research Associates, a group within S&P Global Market Intelligence,[94] illustrates that while the return on equity for water utilities may have trended upward in 2023, Aqua's 10.95% requested return on equity is a significant 131 basis points higher than the average return on equity of 9.64% of nationwide water utility rate cases for 2023.

Second, when asked, Mr. Moul indicated he was unaware if any water utilities throughout the United States were granted a Commission authorized return of 10.95% or higher cost of common equity in the past two years.[95]

Third, as discussed earlier in my testimony, Aqua's requested return on common equity is 130 basis points higher than the Commission's approved DSIC

[93] Aqua Exhibit 4-A, Schedule 1, p. 1.
[94] Regulatory Research Associates, "Water utility national ROE average trends up slightly in 2023," *S&P Global Market Intelligence*, February 20, 2024.
[95] I&E Exhibit No. 2, Schedule 12.

rate of 9.65%[96] for water and wastewater companies. My understanding is that the DSIC rate is designed to encourage its use and to incentivize accelerated pipeline replacement and infrastructure upgrades to bring the existing aging infrastructure closer to meeting safety and reliability requirements in between base rate filings. Additionally, the DSIC rate establishes a benchmark above which a utility company is considered "overearning." To recommend a cost of equity that is above the DSIC rate in this base rate proceeding is inappropriate and not in the public interest.

Finally, I believe it is important to consider the impact of what Aqua's extraordinary return on equity request of 10.95%, paired with its equity heavy capital structure and expanding rate base, would have on rates. As illustrated in the various charts above, any additional basis points beyond the I&E recommended ROE of 9.37% based on a DCF (market-determined) result are unnecessary and will put an enormous burden on ratepayers. The impact to ratepayers of each of the disputed adjustments is summarized as follows:

[96] PA Public Utility Commission, Bureau of Technical Utility Services Report on the Quarterly Earnings of Jurisdictional Utilities for the Year Ended March 31, 2024, p. 27, approved at Public Meeting on August 1, 2024 at Docket No. M-2024-3049527.

Aqua Pennsylvania, Inc. - Water Operations	
Adjustment	**Total Impact**
Leverage Adjustment to DCF	$38,879,710
CAPM Difference between Adjusted and Unadjusted Beta	$74,519,442
Size Adjustment to CAPM	$33,047,753

Aqua Pennsylvania, Inc. - Wastewater Operations	
Adjustment	**Total Impact**
Leverage Adjustment to DCF	$3,558,564
CAPM Difference between Adjusted and Unadjusted Beta	$6,820,583
Size Adjustment to CAPM	$3,024,780

Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?

TABLE OF CONTENTS

INTRODUCTION OF WITNESS 1

RETURN ON EQUITY..... 2

INTRODUCTION OF WITNESS

Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A. My name is Christopher Keller. My business address is Pennsylvania Public Utility Commission, Commonwealth Keystone Building, 400 North Street, Harrisburg, PA 17120.

Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?

A. I am employed by the Pennsylvania Public Utility Commission (Commission) in the Bureau of Investigation & Enforcement (I&E) as a Fixed Utility Financial Analyst.

Q. ARE YOU THE SAME CHRISTOPHER KELLER WHO IS RESPONSIBLE FOR THE DIRECT TESTIMONY CONTAINED IN I&E STATEMENT NO. 2 AND THE SCHEDULES IN I&E EXHIBIT NO. 2?

A. Yes.

Q. WHAT IS THE PURPOSE OF YOUR REBUTTAL TESTIMONY?

A. The purpose of my rebuttal testimony is to address statements made by the Office of Small Business Advocate (OSBA) witness Jason Hails[1] concerning his recommended return on equity of 10.37%[2] applied to the revenue requirement

[1] OSBA Statement No. 1 REVISED.
[2] OSBA Statement No. 1 REVISED, p. 6.

calculation for Aqua Pennsylvania, Inc. and Aqua Pennsylvania Wastewater, Inc. (referred to collectively as Aqua or Company).

Q. DOES YOUR REBUTTAL TESTIMONY INCLUDE AN EXHIBIT?

A. No. However, I will make references to my direct testimony.[3]

RETURN ON EQUITY

Q. WHAT IS AQUA'S RETURN ON EQUITY RECOMMENDATION?

A. Aqua witness Paul R. Moul recommended a return on equity of 10.95%.[4]

Q. SUMMARIZE MR. HAILS' RECOMMENDATION IN DIRECT TESTIMONY FOR RETURN ON EQUITY?

A. In direct testimony, Mr. Hails recommends a return on equity of 10.37%. Mr. Hails' recommendation is based on the Company's Discounted Cash Flow (DCF) Method result of 10.58% which he reduces by 21 basis points to remove an implied management performance adjustment based on an average of Mr. Moul's quantified management performance adjustments in prior base rate cases. This results in a recommended cost of equity of 10.37% (10.58% - 0.21%).[5]

[3] I&E Statement No. 2.
[4] Aqua Exhibit 4-A, Schedule 1, p. 1.
[5] OSBA Statement No. 1 REVISED, pp. 3-6.

Q. WHAT ARE THE RETURN ON EQUITY RECOMMENDATIONS MADE BY I&E AND OCA?

A. In direct testimony, I recommended a return on equity of 9.37% which is based on the use of the DCF method where I used my Capital Assets Pricing Method (CAPM) results only to present to the Commission a comparison and not as a check to my DCF results.[6] The Office of Consumer Advocate (OCA) recommended a return on equity of 8.70% based on the average of the high end of their market-based cost of equity recommendation of 8.03% and Aqua's unlevered DCF results of 9.38%. Alternatively, OCA recommended a return on equity of 8.56% if the Commission accepts the Company's claimed capital structure.[7]

Q. DO YOU AGREE WITH MR. HAILS' USE OF MR. MOUL'S DCF RESULTS WITH A REDUCTION TO THOSE RESULTS BASED ON AN IMPLIED MANAGEMENT PERFORMANCE ADJUSTMENT IN THIS BASE RATE PROCEEDING?

A. I agree with Mr. Hails as well as OCA witnesses Roger Colton[8] and Barbara R. Alexander[9] that the Company should not receive additional basis points for management performance. However, I disagree with Mr. Hails' use of Mr. Moul's DCF results in determining Aqua's cost of equity.

6 I&E Statement No. 2, p. 27.
7 OCA Statement No. 3, pp. 9-10.
8 OCA Statement No. 6, pp. 6-19.
9 OCA Statement No. 7, pp. 70-76.

Q. DID MR. HAILS CONDUCT HIS OWN ANALYSIS?

A. No. As discussed above, Mr. Hails simply uses the Company's DCF results, which I disagree with, and reduces these results based on the average of Mr. Moul's quantified management performance adjustments in prior base rate cases.

Q. WHAT IS THE BASIS FOR YOUR DISAGREEMENT WITH MR. HAILS' USE OF MR. MOUL'S DCF RESULTS IN HIS RETURN ON EQUITY RECOMMENDATION?

A. As I stated in my direct testimony, I disagree with Mr. Moul's inflated growth rate in his DCF analysis as he used a growth rate that was above the average of his proxy group.[10] I also disagree with the use of a leverage adjustment in his DCF analysis as it was inappropriate because true financial risk is a function of the amount of interest expense, and capital structure information provided to investors through Value Line is that of book values, not market values. Additionally, the Commission has consistently rejected the use of a leverage adjustment.[11] Finally, if the inflated growth rate and leverage adjustment were removed from Mr. Moul's DCF analysis, the result would be 9.05% which is much closer to my recommended cost of equity of 9.37%.[12]

Q. DO YOU HAVE ANY CHANGES TO YOUR RECOMMENDATION?

A. No. For the reasons stated above and in my direct testimony, I continue to

[10] I&E Statement No. 2, pp. 46-48.
[11] I&E Statement No. 2, pp. 48-55.
[12] I&E Statement No. 2, p. 56.

recommend a return on equity of 9.37%.

Q. DOES THIS CONCLUDE YOUR REBUTTAL TESTIMONY?

A. Yes.

INTRODUCTION

Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A. My name is Christopher Keller. My business address is Pennsylvania Public Utility Commission, Commonwealth Keystone Building, 400 North Street, Harrisburg, PA 17120.

Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?

A. I am employed by the Pennsylvania Public Utility Commission (Commission) in the Bureau of Investigation & Enforcement (I&E) as a Fixed Utility Financial Analyst.

Q. ARE YOU THE SAME CHRISTOPHER KELLER WHO IS RESPONSIBLE FOR THE DIRECT TESTIMONY CONTAINED IN I&E STATEMENT NO. 2 AND THE SCHEDULES IN I&E EXHIBIT NO. 2?

A. Yes.

Q. WHAT IS THE PURPOSE OF YOUR SURREBUTTAL TESTIMONY?

A. The purpose of my surrebuttal testimony is to respond to the rebuttal testimony of Aqua Pennsylvania, Inc. and Aqua Pennsylvania Wastewater, Inc., (referred to collectively as Aqua or Company) witness Paul R. Moul[1] and Office of Consumer

[1] Aqua Statement No. 7-R.

Advocate (OCA) witness Aaron L. Rothschild[2] regarding rate of return topics including the cost of common equity and the overall fair rate of return, which will be applied to the Company's rate base. I will also address the Company's management performance claim discussed by Mr. Moul and Company witness William C. Packer.[3]

Q. DOES YOUR SURREBUTTAL TESTIMONY INCLUDE AN ACCOMPANYING EXHIBIT.

A. Yes. I&E Exhibit No. 2-SR contains schedules that support my surrebuttal testimony. In this surrebuttal testimony, I will also make references to my direct testimony[4] and its accompanying exhibit.[5]

SUMMARY OF MR. ROTHSCHILD'S REBUTTAL TESTIMONY

Q. SUMMARIZE MR. ROTHSCHILD'S RESPONSE IN REBUTTAL TESTIMONY TO YOUR RECOMMENDATIONS MADE IN DIRECT TESTIMONY.

A. Mr. Rothschild takes issue with my overall return on equity recommendation including certain aspects of my Discounted Cash Flow (DCF) analysis.

[2] OCA Statement No. 3R.
[3] Aqua Statement No. 1-R.
[4] I&E Statement No. 2.
[5] I&E Exhibit No. 2.

Additionally, he disagrees with my acceptance and use of the Company's actual capital structure.[6]

Q. WHAT IS MR. ROTHSCHILD'S SPECIFIC CRITICISM REGARDING YOUR DCF ANALYSIS?

A. Mr. Rothschild opines that the result of my DCF analysis is unreasonably high because I rely on five-year earnings per share growth rate forecasts, which are not indicative of future sustainable growth rates.[7]

Q. HOW DO YOU RESPOND TO MR. ROTHSCHILD'S CRITICISMS OF YOUR DCF ANALYSIS?

A. First, it should be noted, in the context of recommending an appropriate return on equity and overall rate of return, I&E's role is to perform an unbiased analysis using current and reputable sources. In determining an appropriate growth rate for my DCF analysis, I relied upon the forecasted earnings estimates from Value Line, Yahoo! Finance, and Zacks.[8] These resources are trusted and used industry wide, including by most Company, advocate, and Commission witnesses who submit rate of return testimony. Mr. Rothschild, Mr. Moul, and I all utilize these sources in our respective DCF analyses.

---

6 OCA Statement 3R, p. 7, lines 7-9.
7 OCA Statement 3R, p. 9, lines 7-17.
8 I&E Exhibit No. 2, Schedule 5.

Next, the estimates I use from the sources listed above are five-year growth forecasts which are not short-term, nor are they intended to be viewed as sustainable indefinitely as Mr. Rothschild seems to suggest is my intention.[9] I believe the five-year growth estimates are reasonable as they cover the time period of the Fully Projected Future Test Year (FPFTY) and rate case filing frequency of many utilities. In this proceeding, I&E witness Zachari Walker determined the Company's historical rate case filing frequency to be 48 months[10] or four years (48 months ÷ 12 months = 4 years).

Additionally, the Commission has repeatedly confirmed I&E's DCF methodology for determining a fair return on common equity. Specifically, in the 2020 Columbia Gas rate case, the 2023 Columbia Water rate case, and mostly recently, the 2023 Pennsylvania-American Water Company rate case, the Commission agreed with the ALJ's recommendation to use I&E's cost of equity methodology, which included using five-year growth estimates in the DCF analysis.[11]

Finally, and perhaps most importantly, an article by S&P Capital IQ dated June 5, 2024 illustrates the reasonableness of my 9.37% DCF result. The article reveals that three rate case proceedings concluded in the first quarter of 2024

---

9 OCA Statement No. 3R, p. 11, lines 12-17.

10 I&E Statement No. 1, p. 25, lines 2-4.

11 *Pa. PUC v. Columbia Gas of Pennsylvania, Inc.;* Docket No. R-2020-3018835, p. 141 (Order Entered February 19, 2021), *Pa. PUC v. Columbia Water Company,* Docket No. R-2023-3040258, p. 105 (Order entered January 18, 2024), and *Pa. PUC v. Pennsylvania-American Water Company*, Docket Nos. R-2023-3043189 and R-2023-3043190, pp. 194 195 (Order Entered July 22, 2024).

averaged a 9.65% authorized return on equity, which is comparable to the nationwide authorized average of 9.64% for 2023 for water utilities.[12]

Q. SUMMARIZE MR. ROTHSCHILD'S RESPONSE CONCERNING YOUR RECOMMENDED CAPITAL STRUCTURE.

A. Mr. Rothschild disagrees with my acceptance of the Company's capital structure asserts that his capital structure of 50.53% common equity and 49.47% long-term debt should be used as it was the average common equity ratios of his proxy group. Mr. Rothschild opines that his recommended capital structure more closely aligns with the capital structure of his proxy group which he believes is consistent with the Commission's duty to set just and reasonable rates which considers both the utility and its investors as well as the ratepayers.[13]

Q. WHAT IS YOUR RESPONSE TO MR. ROTHSCHILD'S REBUTTAL TESTIMONY REGARDING YOUR RECOMMENDED CAPITAL STRUCTURE?

A. Generally, with few exceptions such as municipalities and smaller investor-owned utilities with largely contributed capital, the actual and FPFTY capital structure of a company and/or the parent company should be reviewed and applied in the cost of equity analysis to truly reflect the utility's financing structure (capitalization

[12] I&E Exhibit No. 2-SR, Schedule 1.
[13] OCA Statement No. 3R, p. 8, lines 3-11.

ratio) that will be used to finance the utility's rate base. Based on this fundamental procedure and comparing the Company's actual capital structure with the proxy group's capital structure range, the Company's claimed capital structure is reasonable in this case. It is difficult to assess the reasonableness of a company's capitalization ratio because there are pros and cons of higher debt or higher equity in the capital structure ratio. For example, a higher debt ratio may result in higher financial risk and borrowing costs which negatively impacts ratepayers. Conversely, an excessively high equity ratio results in ratepayers having to fund an unnecessarily high return.

As stated in my direct testimony, although not always feasible to maintain, I believe a capital structure of 50% common equity and 50% long-term debt is ideal and optimal when trying to balance the financial risks of a company as well as controlling costs to ratepayers.[14] However, applying a 50/50 capital structure may not motivate a company to make the best financing decisions possible. For example, it would be financially beneficial for a utility to have an actual debt ratio greater than 50% and an equity ratio lower than 50% when the company knew it would be brought to 50/50 during a rate case. In this example, the utility would unnecessarily be collecting the more expensive calculated cost of equity on part of its long-term debt portion, and the greater long-term debt percentage could possibly lead to a credit rating downgrade and higher debt costs. Using company specific information that is known, measurable, and reasonable, whenever

[14] I&E Statement No. 2, p. 11, line 16 through p. 15, line 2.

possible, is preferable when the actual results are in the range of the corresponding proxy group, which is precisely the reason we review the capital structure information of a proxy group.

Further, my recognition that a 50/50 capital structure is theoretically optimal is intended to illustrate that Mr. Moul's various other adjustments to his calculated cost of equity are unnecessary. Since the Company is benefiting from a more equity heavy capital structure, I believe any further consideration regarding financial risk or management performance adders is unwarranted.

Finally, other than in the 2023 Columbia Water rate case, I&E has historically been very consistent in adopting a company's claimed/actual capital structure in rate proceedings, especially when it falls within the range of capital structures of the proxy group derived from information provided by S&P Global Market Intelligence – Data Management Solutions. Notably, in this single instance, where I&E strayed from this methodology and in fact recommended a 50/50 capital structure, the Commission rejected the positions of both I&E and OCA, stating:[15]

> On consideration of the record evidence, we are persuaded by Columbia's argument that an actual capital structure should be utilized in setting an overall rate of return in this proceeding….At the outset, we reinforce that an actual capital structure represents the Company's decision, in which it has full discretion, on how to capitalize its rate base. This actual capitalization forms the basis upon which Columbia attracts capital.

[15] *Pa. PUC v. Columbia Water Company,* Docket No. R-2023-3040258, p. 83 (Order entered January 18, 2024).

For comparison, in that proceeding, Columbia's actual claimed equity ratio that led to I&E's 50/50 recommendation was 63.34%, much higher than Aqua's claim of 53.95% in this proceeding. While I do not believe equity ratios can continue to increase indefinitely, as that would be overly and unnecessarily burdensome to ratepayers, I do believe Aqua's claimed capital structure in this proceeding is appropriate.

SUMMARY OF MR. MOUL'S REBUTTAL TESTIMONY

Q. SUMMARIZE MR. MOUL'S RESPONSE TO YOUR RECOMMENDATIONS MADE IN DIRECT TESTIMONY.

A. Mr. Moul acknowledges, but does not oppose my exclusion of two companies from my proxy group that are included in his Water Group. Mr. Moul disputes my recommendations regarding the use of methods other than the DCF, the DCF growth rate, disallowance of his leverage adjustment to the DCF, the Capital Asset Pricing Model (CAPM) risk-free rate, the use of Kroll's (formally Duff & Phelps) recommended U.S. Equity Risk Premium (ERP), rejection of his leverage adjusted betas, disallowance of his size adjustment, my disagreement with his use of the Risk Premium (RP) and Comparable Earnings (CE) methods, and my recommended disallowance of additional basis points for management performance. Finally, Mr. Moul suggests that the Commission-determined Distribution System Improvement Charge (DSIC) rates should serve as a baseline cost of equity in this proceeding.

PROXY GROUP

Q. SUMMARIZE MR. MOUL'S RESPONSE REGARDING YOUR PROXY GROUP.

A. Mr. Moul simply states "I do not oppose these adjustments to the Water Group."[16] Because the remaining six companies in his Water Group are the same as my proxy group, he takes no further issue.

Q. PLEASE REITERATE WHY YOU ELIMINATED ARTESIAN RESOURCES CORPORATION AND YORK WATER COMPANY FROM YOUR PROXY GROUP.

A. As stated in my direct testimony, I have excluded Artesian Resources and York Water Company from my proxy group because it violates my third proxy group criterion which dictates that investment information for the company must be available from more than one source, which includes Value Line.[17] Artesian Resources Corporation and York Water Company do not have a Value Line report, and therefore, do not have the projected dividend per share or projected earnings growth rate information necessary to perform my analysis.

Q. DO YOU HAVE ANY CHANGES TO YOUR PROXY GROUP?

A. No.

[16] Aqua Statement No. 7-R, p. 2, lines 12-14.

DISCOUNTED CASH FLOW

Q. SUMMARIZE MR. MOUL'S REBUTTAL TESTIMONY REGARDING YOUR DCF ANALYSIS.

A. Mr. Moul agrees that the results of a DCF analysis should be given weight but disagrees with my approach. Mr. Moul also disagrees with my results based on the outcomes of certain individual companies and my recommendation to reject his leverage adjustment.[18]

Exclusive Use of the DCF

Q. SUMMARIZE MR. MOUL'S REBUTTAL TESTIMONY REGARDING YOUR USE OF THE DCF.

A. Mr. Moul explains that the use of more than one method provides a superior foundation for the cost of equity determination and will capture the multiplicity of factors that motivate investors to commit their capital to a particular enterprise.[19]

Q. WERE ANY METHODS OTHER THAN THE DCF EMPLOYED IN YOUR ANALYSIS?

A. Yes. Although my recommendation was based on the results of my DCF analysis, I also employed the CAPM as a comparison. For the reasons discussed in my direct testimony, the DCF method is the most reliable.[20] Although no one method

[18] Aqua Statement No. 7-R, pp. 9-27.
[19] Aqua Statement No. 7-R, pp. 9-16.
[20] I&E Statement No. 2, p. 18, line 5 through p. 19, line 11.

can capture every factor that influences an investor, including the results of methods less reliable than the DCF does not make the end result more reliable or more accurate. As a result, I stand by my method of using the DCF with a CAPM comparison, which is consistent with the methodology historically used by the Commission in base rate proceedings, even as recently as 2017, 2018, 2020, and 2021.[21]

However, as indicated in my direct testimony,[22] the Commission recently deviated from prior Commission practice when it indicated in the 2022 Aqua rate case order that its method "for determining Aqua's ROE shall utilize both I&E's DCF and CAPM methodologies"[23] and that "I&E's DCF and CAPM produce a range of reasonableness for the ROE … ."[24] Similarly, most recently, the Commission's 2023 Columbia Water rate case order[25] and 2023 PAWC rate case order[26] relied on the results of I&E's DCF and CAPM analyses for determining its ROE. In my direct testimony, I fully explain why the CAPM should not be used

as a primary method and continue to express those concerns in this proceeding as to why it should only be used as a comparison to, not a check of, the DCF.[27] Thus, I disagree with a method that provides the CAPM comparable weight to the DCF method.

Additionally, I believe the differences in our applications of the CAPM illustrate just how subjective the inputs of this cost of equity model can be. The results of the CAPM analyses from Mr. Rothschild, Mr. Moul, and myself vary wildly. For example, Mr. Rothschild presents a CAPM result ranging from 7.06% to 8.03%[28] which is between 577 basis points (13.80% - 8.03%) and 674 basis points (13.80% - 7.06%) lower than Mr. Moul's CAPM result of 13.80%[29] while my CAPM results are between Mr. Rothschild's and Mr. Moul's CAPM results at 9.69%.[30] This extreme variation in results achieved by the CAPM analyses between Mr. Rothschild and Mr. Moul only highlights the unreliability and subjectivity of the CAPM method, further invalidating its use for establishing an appropriate ROE for ratemaking.

Q. DOES THE DCF ADEQUATELY FACTOR IN RECENT INFLATIONARY TRENDS?

A. Yes. As stated in my direct testimony, my DCF calculation includes a spot stock

[27] I&E Statement No. 2, p. 20, line 11 through p. 21, line 18.
[28] OCA Exhibit ALR-2.
[29] Aqua Exhibit 4-A, Schedule 1, p. 2.
[30] I&E Exhibit No. 2, Schedule 11.

price when determining the dividend yield and analysts who generate forecasted earnings growth rates almost certainly take inflation into consideration as well; therefore, it contains the most up-to-date projected information of any model. In other words, the inputs of the DCF capture all known economic factors, including inflation.[31] Thus, Mr. Moul's concerns of inflation[32] are adequately covered by use of the DCF as a primary model for determining an appropriate return on equity.

DSIC Rate

Q. SHOULD THE COMMISSION CONSIDER THE AUTHORIZED DSIC RATE ESTABLISHED IN THE QUARTERLY EARNINGS SUMMARY REPORTS AS AN APPROPRIATE MEASURE TO DETERMINE THE COST OF EQUITY IN THIS PROCEEDING?

A. No. Mr. Moul's comparison between the I&E recommended return on equity in this proceeding and the Commission's DSIC rate is misguided. My understanding is that the DSIC rate is designed to encourage its use and to incentivize accelerated pipeline replacement and infrastructure upgrades to bring aging infrastructure closer to meeting safety and reliability requirements in between base rate filings. To suggest the cost of equity must be at or above the DSIC rate in this base rate proceeding is inappropriate and not in the public interest. Additionally, the DSIC

[31] I&E Statement No. 2, p. 36, lines 1-10.
[32] Aqua Statement No. 7-R, p. 12, lines 1-7.

rate establishes a benchmark above which a utility company is considered "overearning" for use of the DSIC mechanism. As such, the DSIC rate should not serve as a proper measurement of a subject utility's cost of equity in a base rate proceeding since the DSIC rate is routinely higher than any return on equity approved in such base rate proceedings. In fact, 66 Pa. C.S. § 1358(b)(3) states the following:

> The distribution system improvement charge shall be reset at zero if, in any quarter, data filed with the commission in the utility's most recent annual or quarterly earnings report show that the utility will earn a rate of return that would exceed the allowable rate of return used to calculate its fixed costs under the distribution system improvement charge.

Finally, the DSIC mechanism serves to lower a utility's risk because it reduces the lag time in the recovery of a company's capital outlays. DSIC spending requires preapproval of eligible plant via a Long-Term Infrastructure Improvement Plan so there is little question as to the prudence of those expenditures.

Q. HAS THE COMMISSION RECENTLY MADE A STATEMENT CONCERNING THE USE OF THE AUTHORIZED DSIC RATE ESTABLISHED IN THE QUARTERLY EARNINGS SUMMARY REPORTS AS AN APPROPRIATE MEASURE TO DETERMINE THE COST OF EQUITY?

A. Yes. In *Pennsylvania Public Utility Commission v. Peoples Natural Gas*

Company LLC, at Docket No. R-2023-3044549 (Order Entered September 12, 2024), Vice Chairman Kimberly Barrow expressed concern of using the DSIC rate in determining the cost of equity by stating:

> First, I believe that the original litigation position of I&E with regard to return on equity (ROE) was reasonable and supported by record evidence. In contrast to the Company's recommended ROE of 11.75%, I&E proposed a discounted cash flow analysis that resulted in a recommended return on equity of 9.96%. Additionally, I caution all parties to not co-mingle or misuse the quarterly earnings ROE figures for distribution system improvement charge (DSIC) released by the Commission as evidence to support their base rate ROE positions. The quarterly DSIC calculations are for the targeted and discrete purpose of the DSIC investment, not setting an overall return on equity for a company. The DSIC quarterly numbers are a solid proxy utilized to incent DSIC investment; however, they were not designed or meant to substitute the myriad of inputs submitted to the record during a litigated base rate proceeding. Notably, as highlighted by I&E, the DSIC rate establishes a benchmark that is meant to cap or curb utility overearnings. It is not meant to serve as a measurement for the cost of equity in a base rate case proceeding.

Q. ARE THERE ANY POTENTIAL PROBLEMS WITH AWARDING A RETURN ON EQUITY THAT IS EQUAL TO OR HIGHER THAN THE DSIC RATE?

A. Yes. First, if a company achieves the awarded return that is above the DSIC rate, it eliminates the possibility for the utility to utilize the DSIC mechanism until its earnings fall below the DSIC rate. Further, if a company believes it will receive a return higher than the DSIC rate in a litigated base rate proceeding, it will remove the incentive to use the DSIC mechanism between rate filings and may encourage

the more frequent filing of base rate cases. Additionally, it may encourage litigation as opposed to settlement of cases, since companies may improperly believe this is the new norm, which will increase rate case costs to customers.

Therefore, in my opinion, the DSIC rate should generally be an incentive rate that is higher than a return on equity percentage granted in a rate proceeding.

Evaluating the DCF Based on Individual Results

Q. SUMMARIZE MR. MOUL'S RESPONSE IN REBUTTAL TESTIMONY REGARDING THE RESULTS OF YOUR DCF.

A. Mr. Moul explains that when some results are unreasonable on their face, the reliability of, or the witness' application of, that method must be questioned. He points to the results of Middlesex Water Company in my proxy group and claims that it falls into the category of unreasonableness. Mr. Moul attempts to support his theory by arguing that the return on equity for Middlesex Water Company fails to provide a sufficient spread over the current 5.38% yield on A-rated public utility bonds.[33] It should be noted that on September 18, 2024, the Federal Open Market Committee (FOMC) lowered the federal funds rate by 50 basis points.[34]

[33] Aqua Statement No. 7-R, p. 14, line 20 through p. 15, line 6.

[34] https://www.federalreserve.gov/newsevents/pressreleases/monetary20240918a.htm, accessed on September 23, 2024.

Q. WHAT IS YOUR RESPONSE TO MR. MOUL'S ATTEMPT TO DISAGGREGATE YOUR RESULTS?

A. The 9.37% result of my DCF analysis offers a 5.05% margin over the undisputed 4.32% cost of debt (9.37% - 4.32% = 5.05%). My recommended cost of equity is well more than double the Company's claimed cost of debt and provides a 3.99% margin (9.37% - 5.38% = 3.99%) over Mr. Moul's claimed 5.38% yield on A-rated public utility bonds. I certainly believe these measures satisfy Mr. Moul's statement that, "It is a fundamental tenet of finance that the cost of equity must be higher than the cost of debt by a meaningful margin to compensate for the higher risk associated with a common equity investment."[35]

Growth Rate

Q. SUMMARIZE MR. MOUL'S REBUTTAL TESTIMONY REGARDING YOUR GROWTH RATES.

A. Mr. Moul argues that my growth rate analysis has a small downward bias as I averaged the results by source rather than by each company in my proxy group which would have increased my average growth rates from 6.61% to 6.68%. Mr. Moul also argues that I did not rely on the most recently published data regarding growth rates for American Water Works and California Water Service to calculate my DCF results, which would have resulted in an average growth rate of 6.78%.[36]

[35] Aqua Statement No. 7-R, p. 15, lines 2-4.
[36] Aqua Statement No. 7-R, p. 15, line 7 through p. 16, line 6.

Q. DO YOU AGREE WITH MR. MOUL'S CONCERNS REGARDING YOUR GROWTH RATES?

A. Partially. Financial information from respected and commonly used sources such as Value Line, Yahoo! Finance, Morningstar, Zacks, etc. is updated regularly (monthly, weekly, daily, hourly, etc. depending on the source). At the time of my analysis, I utilized the most recent financial information accessible to me and I am sure Mr. Moul has done the same. It should be recognized that it is not prudent in the scope of a rate case to continuously change one's position. I would not dispute Mr. Moul's use of updated information, however, I do question if he would have done the same had the more recent data decreased the results of the DCF analysis.

<u>Leverage Adjustment</u>

Q. SUMMARIZE MR. MOUL'S REBUTTAL TESTIMONY REGARDING HIS RECOMMENDED LEVERAGE ADJUSTMENT.

A. First, Mr. Moul clarifies that his "leverage adjustment" is not a traditional "market-to-book" ratio adjustment. Next, he states that credit rating agencies do not measure the market-required cost of equity for a company, nor are they concerned with how it is applied in the rate-setting context. Instead, credit rating agencies are only concerned with the interests of lenders and the timely payment of interest and principal by utilities. Mr. Moul then questions six of the eight prior Commission Orders that I reference in my direct testimony. Finally, Mr. Moul

disagrees with my assertion that investors base their decisions on the book value of a company's debt and equity.[37]

Q. HAVE YOU CLAIMED THAT MR. MOUL'S ADJUSTMENT IS A MARKET-TO-BOOK RATIO ADJUSTMENT?

A. No. As I stated in my direct testimony, Mr. Moul does not propose to change the capital structure of the utility (a leverage adjustment), nor does he propose to apply the market-to-book ratio to the DCF model (a market-to-book adjustment).[38]

Q. WHAT IS YOUR RESPONSE TO MR. MOUL'S REBUTTAL TESTIMONY CONCERNING CREDIT RATING AGENCIES?

A. Mr. Moul has supported my argument that his proposed leverage adjustment is not needed by stating that the credit rating agencies are only concerned with the timely payment of interest and principal by utilities.[39] Mr. Moul's stated need for the leverage adjustment is based on his assertion that the difference between the book value capital structure and his market value capital structure causes a financial risk difference.[40]

Financial risk does relate to the capital structure of a company, but it is created by the financing decisions (the use of debt or equity) and the amount of

[37] Aqua Statement No. 7-R, pp. 23-26.
[38] I&E Statement No. 2, p. 49, lines 7-14.
[39] Aqua Statement No. 7-R, p. 24, lines 5-7.
[40] Aqua Statement No. 7-R, p. 25, line 25 through p. 26, line 6.

leverage or debt a company chooses to finance its assets. Financial risk and the book value capital structure of a company are represented in the income statement, part of what is evaluated by rating agencies. Mr. Moul agrees with me that credit rating agencies use a company's financial statements in their analysis to assess financial risk and determine creditworthiness.[41]

Q. SUMMARIZE MR. MOUL'S RESPONSE TO YOUR REFERENCING PRIOR COMMISSION ORDERS.

A. Mr. Moul refers to the discussion in my direct testimony where I point to eight recent cases (Aqua Pennsylvania, Inc.'s 2007 base rate case, City of Lancaster – Bureau of Water's 2010 base rate case, UGI Utilities, Inc. – Electric Division's 2017 base rate case, Columbia Gas' 2020 base rate case, PECO Energy Company – Gas Division's 2020 base rate case, Aqua Pennsylvania, Inc.'s 2021 base rate case, Columbia Water Company's 2023 base rate case, and the 2023 Pennsylvania-American Water base rate case) where the Commission has rejected a "leverage adjustment." Mr. Moul addresses six of the eight recent cases I discussed in my direct testimony. Mr. Moul explains that even though the Commission declined to make a "leverage adjustment" in the 2007 Aqua Pennsylvania case, it does not invalidate its use. Further, Mr. Moul states, "Notably, the Commission did not repudiate the leverage adjustment in the Aqua case, but instead arrived at an 11.00% return on equity for Aqua by including a

[41] Aqua Statement No. 7-R, p. 23, line 26 through p. 24, line 3.

separate return increment for management performance."[42] Then, he claims that the adjustment proposed in the City of Lancaster case was much different than what he is proposing in this proceeding. Additionally, regarding UGI Electric Utilities, Inc. – Electric Division (UGI Electric), Mr. Moul acknowledges the Commission granted a "management performance increment," not a leverage adjustment when arriving at the allowed equity return. As for the Columbia Gas case, Mr. Moul concedes that the Company accepted I&E's return on equity recommendation, which did not include a leverage adjustment or addition of points for management performance. Additionally, in the 2020 PECO Gas case, he argues that the Commission arrived at an equity return on the higher side without a leverage adjustment, therefore no adjustment was warranted. Finally, in the 2021 Aqua case, Mr. Moul acknowledges that the Commission set the cost of equity without a leverage adjustment.[43]

Q. WHAT IS YOUR RESPONSE TO MR. MOUL'S REBUTTAL TESTIMONY REGARDING THE REFERENCED PRIOR COMMISSION ORDERS IN YOUR DIRECT TESTIMONY?

A. In this proceeding, Mr. Moul is recommending a 120-basis point "leverage adjustment." To be clear, the Commission did in fact refuse to accept the leverage adjustment in the 2007 Aqua base rate case by stating "…we reject the ALJ's

[42] Aqua Statement No. 7-R, p. 24, lines 15-18.
[43] Aqua Statement No. 7-R, p. 24, line 20 through p. 25, line 13.

recommendation to allow a 65 basis point leverage adjustment."[44] The management performance points awarded to Aqua in the 2007 base rate case were case-specific and in no way related to the proposed leverage adjustment. Regarding the City of Lancaster case, the Commission did not reject the leverage adjustment based on the manner in which it was calculated, but rather, the Commission stated, "…the ALJ's recommendation is in error as any adjustment to the results of the market based DCF as we have previously adopted are unnecessary and will harm ratepayers."[45] Regarding the UGI Electric case, the Commission concluded that "…an artificial adjustment in this proceeding is unnecessary and contrary to the public interest. Accordingly, we decline to include a leverage adjustment in our calculation of the DCF cost of equity."[46] Regarding the most recent Columbia Gas case, the Commission stated,

> … we have adopted the ALJ's recommendation to use I&E's DCF methodology utilizing I&E's dividend yield of 3.34% and growth rate of 6.52%. As noted above, the ALJ did not specify a recommended cost of equity for Columbia in their Recommended Decision. However, we note that I&E's methodology results in an ROE of 9.86%.[47]

The ALJ's Recommended Decision stated the following:

> The ALJ agrees with BIE's reasoning that Columbia Gas' calculated return on equity was flawed for five reasons: (1) the weights given to the results of the Company's CAPM, RP, and CE analyses; (2) certain aspects of Columbia's discussion of

[44] *Pa. PUC v. Aqua Pennsylvania, Inc.*; Docket No. R-00072711, pp. 38-39 (Order entered July 31, 2008).
[45] *Pa. PUC v. City of Lancaster – Bureau of Water*; Docket No. R-2010-2179103, p. 79 (Order entered July 14, 2011).
[46] *Pa. PUC v. UGI Utilities, Inc. – Electric Division;* Docket No. R-2017-2640058, pp. 93-94 (Order entered October 25, 2018).
[47] *Pa. PUC v. Columbia Gas of Pennsylvania*; Inc. Docket No. R-2020-3018835, p. 141 (Order entered February 19, 2021).

> risk; (3) Columbia Gas' application of the DCF including the forecasted growth rate and leverage adjustment used; (4) Columbia's inclusion of a size adjustment, reliance on the 30-year Treasury Bond for the risk- free rate, and the use of a double-adjusted *beta* in the CAPM analysis; and (5) the Company's request for an additional 20 basis points for "strong management performance" is unjustified.[48]

While the Company accepted I&E's DCF return without regard to the leverage adjustment or management performance in the last base rate case, in the Recommended Decision, the ALJ clearly rejected the Company's proposed leverage adjustment and the Commission agreed with the ALJ's Recommended Decision.

In the PECO Energy – Gas Division case, the Commission stated,

> … we have adopted the ALJ's recommendation to use I&E's DCF methodology and to use I&E's CAPM calculation as a check on the reasonableness of the DCF determined cost of equity. Therefore, we shall adopt the ALJ's recommended 10.24% cost of equity. In our view, this is an appropriate cost of equity for PECO given the record developed in this proceeding.[49]

In the Recommended Decision, the ALJ agreed with I&E's recommended cost of equity which did not include a leverage adjustment.[50]

Finally, regarding the 2021 Aqua base rate case, the Commission did in fact reject the Company's proposed leverage adjustment as follows,

> We find I&E's arguments in opposition to the Company's position to be persuasive. For example, as I&E observed, credit

---

[48] *Pa. PUC v. Columbia Gas of Pennsylvania*; Inc. Docket No. R-2020-3018835, Recommended Decision, pp. 184-185.

[49] *Pa. PUC v. PECO Energy Company – Gas Division*. Docket No. R-2020-3018929, p. 171 (Order entered June 22, 2021).

[50] *Pa. PUC v. PECO Energy Company – Gas Division*. Docket No. R-2020-3018929, Recommended Decision, p. 215.

> rating agencies assess financial risk based upon a company's booked debt obligations and the ability of its cash flow to cover the interest payments on those obligations. The agencies use a company's financial statements, and not the company's market capital structure, in conducting their analysis. It is a company's financial statements that affect the market value of the stock, and, therefore, the financial statements and the book value capital structure are relied upon in an analysis such as that done by rating agencies. I&E St. 2 at 40; I&E St. 2-SR at 10. Accordingly, we find that the record in this proceeding supports rejecting the Company's requested leverage adjustment.[51]

Q. WHAT IS YOUR RESPONSE TO MR. MOUL'S ASSERTION THAT INVESTORS DO NOT BASE THEIR DECISIONS ON BOOK VALUE, BUT RATHER THE RETURN THEY EXPECT TO EARN ON THE DOLLARS THEY INVEST?

A. Investors purchase securities such as stocks at market value as opposed to book value. In doing so, they accept the returns and associated risks implied by market prices. However, financial statements, which are based on book values, show the entire true financial position of a company, providing the foundation for investment and financing decisions. For example, financial institutions such as banks lend money based on actual book values and not the current price of a stock. Further, almost all financial ratios used in financial analysis utilize at least one book value variable from either the income statement or the balance sheet.

[51] *Pa. PUC v. Aqua Pennsylvania, Inc*. Docket No. R-2021-3027385, pp. 166-167 (Order entered June 22, 2021).

Mr. Moul's assertion that an investor is concerned with the return earned on dollars invested and "not some accounting value of little relevance to them,"[52] is unsupported. Clearly an investor takes financial risk into consideration when determining a required return. In addition, the market capitalization information included in Value Line's reports and discussed by Mr. Moul is not the same as market value capital structure. Market capitalization refers to the number of shares outstanding multiplied by the current price. A market value capital structure refers to the ratio of market debt to market equity, which is not included in Value Line's reports. Therefore, Mr. Moul's contention that Value Line includes market capitalization data does not offer any support for his leverage adjustment.

Q. HAS MR. MOUL'S RESPONSE IN REBUTTAL TESTIMONY CONCERNING HIS PROPOSED LEVERAGE ADJUSTMENT CAUSED YOU TO CHANGE YOUR RECOMMENDATION?

A. No. For the reasons discussed above, I continue to recommend that Mr. Moul's leverage adjustment be rejected.

[52] Aqua Statement No. 7-R, p. 25, line 25 through p. 26, line 1.

CAPITAL ASSET PRICING MODEL

Q. SUMMARIZE MR. MOUL'S REBUTTAL TESTIMONY REGARDING YOUR APPLICATION OF THE CAPM.

A. Mr. Moul opines that my CAPM analysis understates the cost of equity for several reasons, including my use of the yield on 10-year Treasury Notes for my risk-free rate, use of Kroll's Equity Risk Premium (ERP), failure to use leverage adjusted betas, and rejection of his size adjustment.[53] Each of these topics are discussed in more detail below.

Risk-Free Rate

Q. SUMMARIZE MR. MOUL'S REBUTTAL TESTIMONY REGARDING YOUR USE OF THE YIELD ON THE 10-YEAR U.S. TREASURY NOTE.

A. Mr. Moul claims that by using the 10-year Treasury Note, I introduced a systematic understatement of CAPM returns. He opines that his use of the yield on a 30-year U.S. Treasury Bond is more appropriate than my use of the yield on a 10-year Treasury Note because 30-year bonds are "more a reflection of investor sentiment of their required returns…" and are also less susceptible to "policy initiatives of monetary officials…". Additionally, he provides a recalculation of my risk-free rate to use in the CAPM formula.[54]

[53] Aqua Statement No. 7-R, p. 29, lines 5-7.
[54] Aqua Statement No. 7-R, p. 29, line 12 through p. 30, line 12.

Q. DO YOU AGREE WITH MR. MOUL THAT USING THE YIELD OF A 30-YEAR U.S. TREASURY BOND IS MORE APPROPRIATE DUE TO A LONGER-TERM BOND BEING LESS SUSCEPTIBLE TO FEDERAL POLICY ACTIONS?

A. No. As stated in my direct testimony, I chose the 10-year Treasury Note which balances the shortcomings of the short-term T-Bill and the 30-year Treasury Bond. Although long-term Treasury Bonds have less risk of being influenced by federal policies, they have substantial maturity risk associated with the market risk. In addition, long-term Treasury Bonds bear the risk of unexpected inflation. As such, my choice of a 10-year Treasury Note is more appropriate.[55] Further, as also pointed out in my direct testimony, the Commission has agreed with I&E and recognized the 10-year Treasury Note as the superior measure of the risk-free rate of return.[56]

Q. SUMMARIZE MR. MOUL'S REBUTTAL TESTIMONY REGARDING YOUR RISK-FREE RATE USED IN THE CAPM FORMULA.

A. Mr. Moul opines that I have incorrectly given weight to the yield on the 10-year Treasury Note for the third quarter of 2024 as I do for the entire five-year period

[55] I&E Statement No. 2, p. 31, line 9 through p. 32, line 7.

[56] *Pa. PUC v. UGI Utilities, Inc. – Electric Division;* Docket No. R-2017-2640058 p. 99 (Order entered October 25, 2018). *See generally* Disposition of Capital Asset Pricing Model (CAPM), p. 99; *Pa. PUC v. Aqua Pennsylvania, Inc.,* Docket Nos. R-2021-3027385 & R-2021-3027386, p. 154 (Order entered May 16, 2022); *Pa. PUC v. Columbia Water Company*; Docket No. R-2023-3040258 (Order Entered January 18, 2024). See g*enerally* Disposition of Cost of Common Equity, pp. 107-108. *Pa. PUC v. Pennsylvania-American Water Company;* Docket Nos. R-2023-3043189 and R-2023-3043190 (Order Entered July 22, 2024). *See generally* Disposition of Capital Asset Pricing Model (CAPM), pp. 171-172.

encompassing 2026 to 2030. Then, Mr. Moul incorrectly recalculates the risk-free rate by averaging the 10-year treasury yield forecasts by year from 2025 through 2030 in an attempt to increase my calculated risk-free rate.[57]

Q. DO YOU AGREE WITH MR. MOUL'S ANALYSIS OF YOUR RISK-FREE RATE?

A. No. Mr. Moul's new calculation proposes to give equal weight to each separate year from 2025 to 2030. The flaw with this approach is that the further out into the future one forecasts, the less reliable and more speculative the estimates become; therefore, to give the less reliable estimates equal weight would not be prudent. It is more appropriate to weight the quarters and years as I have done in my direct testimony.[58] My calculation provides a more accurate estimation of the risk-free rate during the FPFTY, as the further out one forecasts, the less reliable the information becomes.

More importantly, what Mr. Moul fails to recognize is that my risk-free rate of 4.18% is higher than the 3.75%[59] risk-free rate he uses in his own CAPM analysis. Therefore, his criticisms of my risk-free rate are pointless and carry no weight.

[57] Aqua Statement No. 7-R, p. 29, line 23 through p. 30, line 5.
[58] I&E Exhibit No. 2, Schedule No. 8.
[59] Aqua Statement No. 7, p. 43, lines 2-3.

Kroll ERP

Q. SUMMARIZE MR. MOUL'S REBUTTAL TESTIMONY REGARDING YOUR USE OF THE KROLL ERP IN YOUR CAPM ANALYSIS.

A. Mr. Moul opines that my use of the Kroll ERP in my CAPM analysis is flawed for three reasons. First Mr. Moul asserts that the total market return using the Kroll ERP of 9.18% is not in line with investor expectations. Second, Mr. Moul states that the total market return must be higher than my DCF results as the total market return has a beta of 1.0. Third, Mr. Moul states that Kroll's analysis is qualitative rather than quantitative as it provides no empirical data to support its ERP. Additionally, Mr. Moul notes that the Kroll ERP is applied to a spot yield on 20-year Treasury Bonds although I use 10-year Treasury Notes in my CAPM analysis and that Kroll's ERP are inputs in the CAPM and other models to develop discount rates which he asserts is not relevant in determining a cost of equity.[60]

Q. WHAT IS YOUR RESPONSE TO MR. MOUL'S REBUTTAL TESTIMONY CONCERNING THE KROLL ERP?

A. As discussed in my direct testimony, my recommendation is based on the DCF method as the primary method to determine the cost of common equity. I am providing the results of my CAPM analysis as a comparison, and not as a check, to my DCF results.[61]

[60] Aqua Statement No. 7-R, p. 30, line 13 through p. 32, line 16.
[61] I&E Statement No. 2, p. 18, lines 5-11.

My inclusion of the Kroll ERP in my CAPM analysis is to provide more information to the Commission as they have recently expressed increasing interest in the CAPM model. Kroll is a trusted and publicly available source that bases their recommended ERP on current and forecasted economic and financial conditions.[62] Mr. Moul, himself, uses Kroll (formerly Duff & Phelps) in his analysis for a size adjustment.[63]

Mr. Moul's opposition to my use of Kroll's ERP further demonstrates that the inputs to the CAPM are highly subjective and can lead to wildly different results. This is not the case for the DCF model.

Leveraged Betas

Q. SUMMARIZE MR. MOUL'S REBUTTAL TESTIMONY REGARDING THE USE OF LEVERAGE-ADJUSTED BETAS.

A. Mr. Moul simply mentions my "failure to use leverage adjusted betas…"[64] He does not offer an explanation beyond what he argued in his direct testimony.

Q. IS THE USE OF LEVERAGE-ADJUSTED BETAS IN CAPM ANALYSES APPROPRIATE?

A. No. As stated in my direct testimony, Mr. Moul's adjustment only serves to

[62] I&E Statement No. 2, p. 34, lines 10-14.
[63] I&E Exhibit No. 2-SR, Schedule 2.
[64] Aqua Statement No. 7-R, p. 29, lines 5-7.

inflate the result of his CAPM analysis. Value Line is a well-known and trusted source that both investors and the Commission rely upon, therefore, it is not necessary to make any type of adjustment to the Value Line betas. Enhancements such as leverage adjusted betas are unwarranted in CAPM analyses for the same reasons that enhancements are unwarranted for DCF results. Until this type of adjustment is demonstrated in academic literature to be valid, such leverage-adjusted betas in a CAPM should be rejected. Furthermore, the Commission found no basis to add leverage adjusted betas in Aqua's last base rate case which was litigated.[65] Finally, a stock with a price movement that is greater than the overall stock market will have a beta that is greater than one and would be described as having more investment risk than the market. Due to being regulated and the monopolistic nature of utilities, very rarely do they have a beta equal to or greater than one. Therefore, in this case, to apply an adjusted beta of 1.10 to the entire industry or water proxy group is irrational.[66]

Size Adjustment

Q. SUMMARIZE YOUR DIRECT TESTIMONY REGARDING A SIZE ADJUSTMENT.

A. In direct testimony, I stated that Mr. Moul's 102 basis point CAPM size adjustment is unnecessary because none of the technical literature he cited in his

[65] *Pa. PUC v. Aqua Pennsylvania, Inc.;* Docket No. R-2021-3027385 (Order Entered May 16, 2022). *See generally* Disposition of Leverage Adjustment and Management Performance, pp. 166-167.

[66] I&E Statement No. 2, pp. 58-61.

direct testimony supporting investment adjustments related to the size of a company is specific to the utility industry. I also presented an article by Dr. Annie Wong that demonstrated there is no need to make an adjustment for the size of a company in utility rate regulation. Finally, I noted that the Commission has rejected the application of a size adjustment to the CAPM cost of equity calculation where it agreed that the same literature the Company cites is not specific to the utility industry.[67]

Q. SUMMARIZE MR. MOUL'S RESPONSE IN REBUTTAL TESTIMONY REGARDING A SIZE ADJUSTMENT.

A. Mr. Moul states that enormous changes have occurred in the industry since the article "Utility Stocks and the Size Effect: An Empirical Analysis" by Dr. Annie Wong was published. He also references the Fama/French study, "The Cross-Section of Expected Stock Returns," to illustrate that his size adjustment is a separate factor from beta that helps explain systematic risk and returns. Additionally, Mr. Moul opines that external factors, such as loss of larger customers and unexpected changes in expenses, can affect the financial performance of a small company.[68]

[67] I&E Statement No. 2, pp. 61-65.
[68] Aqua Statement No. 7-R, p. 32, line 17 through p. 34, line 3.

Q. DOES THE FAMA/FRENCH STUDY REFUTE DR. WONG'S ARTICLE?

A. No. As stated in my direct testimony, Dr. Wong's article presents evidence that although a size effect may exist for industrial stocks, it does not exist for utility stocks.[69] As the Fama/French study is not specific to utility stocks, it does not adequately demonstrate that a size effect exists in the utility industry. In addition, the size effect that exists for industrial stocks varies to such an extent that it is difficult to predict. The difficulty in predicting the effect of size is demonstrated in the variance from year to year of the measurement of difference between the annual returns on the large and small-capitalization stocks of the NYSE/AMEX/NASDAQ in the Ibbotson *Stocks, Bonds, Bills & Inflation: 2015 Yearbook*. As stated on page 100 of the SBBI Yearbook,

> While the largest stocks actually declined in 2001, the smallest stocks rose more than 30%. A more extreme case occurred in the depression-recovery year of 1933, when the difference between the first and 10th decile returns was far more substantial. The divergence in the performance of small- and large- cap stocks is evident. In 30 of the 89 years since 1926, the difference between the total returns of the largest stocks (decile 1) and the smallest stocks (decile 10) has been greater than 25 percentage points.

Page 109 states,

> In four of the last 10 years, large-capitalization stocks (deciles 1-2 of NYSE/AMEX/NASDAQ) have outperformed small-capitalization stocks (deciles 9-10). This has led some market observers to speculate that there is no size premium. But statistical evidence suggests that periods of underperformance should be expected.

[69] I&E Statement No. 2, pp. 62-63.

Page 112 states,

> Because investors cannot predict when small-cap returns will be higher than large-cap returns, it has been argued that they do not expect higher rates of return for small stocks.

Q. DOES THE TIME WHICH HAS ELAPSED SINCE AN ARTICLE WAS WRITTEN NECESSARILY INVALIDATE ITS RESULTS?

A. No. Although Mr. Moul states that enormous changes have occurred in the industry since the 1960s, he presents no evidence that these "changes" have caused the need for a size adjustment. To the contrary, Dr. Wong's study demonstrated that one does *not* need to be made in the regulated utility industry. As stated in my direct testimony, absent any credible article to refute Dr. Wong's findings, Mr. Moul's size adjustment to his CAPM results should be rejected.[70]

Q. ARE MR. MOUL'S CONCERNS REGARDING THE IMPACT OF LOSING LARGE CUSTOMERS OR UNEXPECTED INCREASES IN EXPENSES VALID?

A. No. Regulated utility companies have the option to file a base rate case to address declining revenues and to recover the increasing costs of doing business in addition to emergency rate relief provisions for large unforeseen impacts. In contrast, non-utility businesses that may be significantly impacted by events of this nature due to small operating size do not have these opportunities.

[70] I&E Statement No. 2, p. 63, lines 6-8.

Additionally, while a smaller utility may pay higher prices for services and materials just due to volume buying power, the actual costs are part of the revenue requirement presented by that company, so to increase the return to account for the potential size disadvantage would only further unfairly burden ratepayers who are already likely paying higher utility bills to recover the higher operating costs.

Q. MR. MOUL HAS RECALCULATED YOUR CAPM RESULTS.[71] DO YOU AGREE WITH HIS RECALCULATION?

A. No. Mr. Moul's recalculation is incorrect for a couple of reasons. He used an inaccurate risk-free rate and an unnecessary size adjustment, as stated in both my direct testimony and above. Because of these factors, a recalculation of my CAPM results is imprudent and any recalculation provided by Mr. Moul of my CAPM results is unreliable and unnecessary.

Q. WHAT IS YOUR RECOMMENDATION REGARDING MR. MOUL'S SIZE ADJUSTMENT?

A. I continue to recommend that his use of the 1.02% size adjustment be disallowed in calculating the CAPM.

[71] Aqua Statement No. 7-R, p. 30, lines 6-12.

Q. DO YOU HAVE ANY ADDITIONAL COMMENTS REGARDING YOUR CAPM ANALYSIS?

A. Yes. My recommended cost of equity is primarily based upon my DCF analysis for the reasons explain above and in my direct testimony. I present a CAPM analysis to the Commission for comparison, not recommendation purposes as the inputs are highly subjective, and other than beta, not company or industry specific.

RISK PREMIUM

Q. SUMMARIZE MR. MOUL'S REBUTTAL TESTIMONY REGARDING THE RISK PREMIUM METHOD.

A. Mr. Moul opines that the RP approach should be given serious consideration because it is straight-forward, understandable, and uses a company's own borrowing rate. He claims it provides a direct and complete reflection of a utility's risk and return. Mr. Moul also states that I make an unfounded assertion that the RP method does not measure the current cost of equity as directly as the DCF.[72]

Q. DO YOU AGREE WITH MR. MOUL THAT THE RP METHOD PROVIDES A DIRECT AND COMPLETE REFLECTION OF A UTILITY'S RISK AND RETURN?

A. No. The RP method produces an indirect measure when compared to the DCF

[72] Aqua Statement No. 7-R, pp. 36-37.

method.

Q. PLEASE COMMENT ON THE INDIRECT MEASURE OF THE RP METHOD VERSUS THE MORE DIRECT MEASURE OF THE DCF METHOD.

A. Mr. Moul claims that my statement that the RP method does not measure the current cost of equity as directly as the DCF is without foundation. In my direct testimony, I have clearly illustrated how the two measures are different.[73] The main reason is that the RP method determines the rate of return on common equity indirectly by observing the cost of debt and adding to it an equity risk premium. The DCF measures equity more directly through the stock information (using equity information), whereas the RP method measures equity indirectly using debt information.

<u>COMPARABLE EARNINGS</u>

Q. SUMMARIZE MR. MOUL'S REBUTTAL TESTIMONY REGARDING THE CE METHOD.

A. Mr. Moul claims that using the CE method satisfies the comparability standard established in the *Hope* case.[74] Additionally, he states, "…the financial community has expressed the view that the regulatory process must consider the

[73] I&E Statement No. 2, p. 16, line 4 through p. 26, line 17.
[74] Aqua Statement No. 7-R, p. 38, lines 21-22.

returns that are being achieved in the non-regulated sector to ensure that regulated companies can compete effectively in the capital markets."[75]

Q. DO YOU AGREE THAT COMPANIES USED BY MR. MOUL IN HIS CE METHOD ARE COMPARABLE TO AQUA?

A. No. As stated in my direct testimony, the companies in Mr. Moul's analysis are not utilities, and therefore, are too disparate to use in a CE analysis.[76] For example, the criteria Mr. Moul uses to choose the companies in his CE group results in the selection of companies such as Altria Group Inc. (Tobacco), Kimberly Clark Corp. (Household Products), Motorola Solutions Inc. (Telecommunications), Quest Diagnostics (Medical Services), and Toro Company (Machinery). All these companies operate in industries very different from a utility company and operate under varying degrees of regulation. Also, most, if not all, of the companies Mr. Moul uses in his analysis are not monopolies in the sense that utilities are. This means that they have significantly more competition and would require a higher return for the added risk. Further, the CE method should be excluded because it is entirely subjective as to which companies are comparable and it is debatable whether historic accounting returns are representative of the future.

[75] Aqua Statement No. 7-R, p. 33, lines 22-25.
[76] I&E Statement No. 2, pp. 37-38.

MANAGEMENT PERFORMANCE POINTS

Q. SUMMARIZE MR. MOUL'S AND MR. PACKER'S REBUTTAL TESTIMONY REGARDING MANAGEMENT PERFORMANCE POINTS.

A. Mr. Moul simply mentions that the Company "has performed in an exemplary manner, as explained by AP witness Packer, and that performance should be recognized in this case."[77] He does not offer an explanation beyond what he argued in his direct testimony.

Mr. Packer acknowledges my position that Aqua should not be rewarded for doing what the Company is legally required to do, and that the savings resulting from true management effectiveness are available to be passed on to shareholders. As he did in direct testimony, he lists a variety of Aqua's performance indicators such as optimization of water quality and system reliability, wastewater treatment compliance, system reliability and infrastructure rehabilitation, customer service focus and upgrades, acting to assist the Commission, OCA, and Department of Environmental Protection to address issues of small systems and acting as a receiver, and recognition of excellence of operations including the Partnership of Safe Water. In addition to the Company's 2021 rate case, Mr. Packer also provides the Company's 2008 rate case, PPL Electric's 2012 rate case, and UGI Electric's 2017 rate case as examples of when the Commission granted increases for management performance. Mr. Packer insists that an "increment for exemplary management effectiveness" should be

[77] Aqua Statement No. 7-R, p. 41, lines 5-7.

adopted if the Commission were to consider approving an ROE of less than 10.95%.[78]

Q. WHAT IS YOUR RESPONSE TO THE COMPANY'S REBUTTAL TESTIMONY REGARDING THE CONSIDERATION OF ADDITIONAL BASIS POINTS FOR MANAGEMENT PERFORMANCE?

A. As discussed in my direct testimony, many of the topics presented by the Company fall within the categories of reliability, customer satisfaction, and safety that are required of every public utility company under 66 Pa C.S.A. §1501. Additionally, the Company passes capital expenditures to its ratepayers via base rates, or it can utilize a DSIC for capital expenditure recovery. Further, if the Company is effective at controlling operating and maintenance costs, those savings should flow through to ratepayers and/or investors. These savings would likely be offset by any consideration of additional basis points for management performance as ratepayers would have to fund the additional costs. This defeats the purpose of any cost cutting measures to benefit ratepayers. I maintain that Aqua, or any utility company for that matter, should not reap additional rewards for programs funded by ratepayers or for meeting their obligations under 66 Pa C.S.A. §1501.[79] Finally, I am aware that under 66 Pa C.S.A. §523 the Commission shall consider a utility's performance, however, it is not mandatory

[78] Aqua Statement No. 1-R, p. 28, line 3 through p. 32, line 9.
[79] I&E Statement No. 2, p. 65, line 16 through p. 69, line 15.

that the Commission grant additional points. Therefore, I continue to recommend that any addition of basis points to the cost of equity for management performance be disallowed.

Q. DOES THE COMMISSION'S PAST ACCEPTANCE OF ADDITIONAL EQUITY POINTS TO RECOGNIZE MANAGEMENT PERFORMANCE MEAN THAT AQUA SHOULD ALSO RECEIVE AN ADJUSTED RETURN ON EQUITY?

A. No. Aqua's 2008 rate case was approximately 16 years ago, and obviously should have no bearing on the current proceeding. The 2017 UGI Electric and 2012 PPL Electric rate cases are irrelevant to the determination of whether Aqua should be granted additional basis points to its cost of equity for management performance. Management performance is something that is very specific to each individual utility. Therefore, what the Commission has historically decided in this regard, and the management performance of other utilities (all in a period prior to the pandemic), has no bearing on whether Aqua should receive a higher return on equity to recognize its management performance. Notably however, in the 2017 UGI Electric case, which was decided in a pre-pandemic climate, the Commission awarded the Company a nominal five additional basis points for management effectiveness. Finally, as for the Aqua 2021, as I stated in my direct testimony, the

issuance of equity points to recognize management performance should be done on a case-by-case basis.[80]

Q. HAS YOUR RECOMMENDATION REGARDING THE COMPANY'S REQUEST FOR ADDITIONAL BASIS POINTS REGARDING ITS MANAGEMENT PERFORMANCE CHANGED?

A. No. I continue to recommend that any additional basis points for management performance be rejected.

OVERALL RATE OF RETURN

Q. HAS YOUR OVERALL RATE OF RETURN RECOMMENDATION CHANGED FROM YOUR DIRECT TESTIMONY?

A. No. I continue to support each recommendation made in I&E Statement No. 2.

Q. WHAT IS YOUR OVERALL RATE OF RETURN RECOMMENDATION?

A. I recommend the following rate of return for Aqua:

Type of Capital	Summary of Cost of Capital Ratio	Cost Rate	Weighted Cost
	Aqua Pennsylvania, Inc.		
Long-Term Debt	46.05%	4.32%	1.99%
Common Equity	53.95%	9.37%	5.06%
Total	100.00%		7.05%

[80] I&E Statement No. 2, p. 68, lines 16-21.

Q. DOES THIS CONCLUDE YOUR SURREBUTTAL TESTIMONY?

A. Yes.

Rate of Return

RRA REGULATORY FOCUS

NJ regulators approve Veolia Water rate increase

Wednesday, June 5, 2024 3:14 PM ET

By Heike Doerr
Market Intelligence

The New Jersey Board of Public Utilities recently voted to authorize a settlement for Veolia Water New Jersey Inc. to increase base water and wastewater rates. New rates become effective Aug. 8.

The Take

➤ The settlement increases the company's rates by $40.0 million, compared to the $63.9 million initially requested in November 2023.

➤ The order is based on a 9.6% return on equity (ROE), which is consistent with what the Board of Public Utilities (BPU) has been authorizing across water, electric and gas utilities in recent decisions. The ROE is identical to that authorized in the previous rate case for Veolia Water New Jersey (VWNJ) and is largely in line with equity returns recently authorized nationwide for water utilities.

➤ Regulatory Research Associates considers the regulatory climate in New Jersey for water utilities to be somewhat more restrictive than average from an investor viewpoint, and recent turnover at the BPU contributes to this assessment. While equity return authorizations have generally been equivalent to the prevailing industry averages when established, the BPU relies on historic test years, making it challenging for the utilities to earn the authorized returns.

RRA evaluates water utility regulation in over 20 state jurisdictions and monitors rate proceedings involving rate change requests of at least $1.0 million for the 12 largest investor-owned and privately held water utilities.

Formerly known as SUEZ Water New Jersey Inc., VWNJ is wholly owned by Veolia Utility Resources LLC. The utility is the second-largest private water utility in New Jersey, serving approximately 262,000 retail water customers in 76 municipalities. The company also serves approximately 6,300 sewer customers in four municipalities.

ROE discussion

The May 22 order approves a $37.1 million (11.6%) water and $2.9 million wastewater (12.33%) rate increase, reflecting a 9.60% return on equity (54.00% capital) and a 7.11% return on an average rate base valued at $1.586 billion for a test year ended March 30, 2024, with adjustments for known and measurable changes through Sept. 30, 2024.

The 9.6% ROE in the approved rate case settlement is the same as VWNJ's previous authorized ROE in the state and is largely in line with equity returns recently authorized nationwide.

The largest investor-owned water utilities regulated by the BPU have all been authorized the same ROE, as have electric and gas utilities in recent cases before the board. Most recently, the BPU authorized Middlesex Water Co. a $15.4 million rate increase in February 2024 with a 9.60% authorized ROE.

During the first quarter, three rate proceedings in Indiana, Maine and West Virginia were completed across the water utility sector, averaging 9.65%, largely in line with the 9.64% average ROE approved for water utilities nationwide in 2023. The 2023 average comprised 10 base rate proceedings, cost-of-capital proceedings for California's four largest investor-owned water utilities, and subsequent increases to those four California utilities' ROEs based on a mechanism tied to fluctuations of a bond index. The base rate proceedings spanned nine states, with cost-of-capital parameters provided in seven proceedings, ranging from 8.70% in Connecticut to 9.8% in North Carolina. The California ROEs authorized in June 2023 ranged from 9.31% to 9.57%, and the water cost-of-capital mechanism increased them by 70 basis points, effective Jan. 1, 2024, bringing the authorized returns in California above the national average.

Rate case history

On Nov. 9, VWNJ requested a $63.9 million (19.57%) increase to base rates, reflecting a 10.3% return on equity (54.00% capital) and a 7.49% return on a $1.611 billion rate base.

This rate case includes the acquisition and subsequent investment in the Borough of Allendale, a transaction VWNJ completed in November 2022 for $18 million. The company has operated the borough's water system since 2013. Recent changes to environmental regulations required the construction of treatment facilities for most of the borough wells. Recognizing that it "had neither the expertise or the resources to implement the required treatment projects," the borough decided to sell the system.

The BPU twice suspended implementation of the company's proposed rates, first until April 9, 2024, and then until Aug. 9, 2024.

On April 5, the company submitted its filing with actual test year data for the 12-month period ending March 31, 2024, with an updated revenue requirement of approximately $65 million.

The parties reached a settlement April 15.

Previous rate proceeding

The company's most recent rate proceeding was completed in May 2021, when it was authorized a $16.4 million (5.5%) rate increase.

In that proceeding, VWNJ filed for a $35.5 million rate increase based on a 10.2% return on equity (54.00% of capital) and a 7.46% return on a year-end rate base valued at $1.257 billion for a test year ended March 31, 2021.

During the company's 2018 rate proceeding, it was authorized to consolidate its smaller subsidiaries into SUEZ Water New Jersey. The consolidated entities included SUEZ Water Toms River, SUEZ Water West Milford, SUEZ Water Princeton Meadows, SUEZ Water Arlington Hills and SUEZ Water Matchaponic Inc.

Water utility regulation somewhat more restrictive than average in New Jersey

RRA considers the regulatory climate in New Jersey as it pertains to water utilities to be somewhat more restrictive than average from an investor viewpoint. Equity return authorizations by the BPU have generally been at or above the prevailing industry averages when established. However, the commission relies on test years that are historical by the time a decision is rendered, exacerbating regulatory lag and rendering it challenging for the utilities to earn the authorized returns.

With the death of then-President Joseph Fiordaliso in September 2023 and the departure of three seasoned commissioners who had been serving beyond the end of their terms in the past year, the BPU's makeup has changed considerably. A new commissioner with water utility experience joined the BPU in January; however, one vacancy on the five-member panel remains. While some of the new commissioners have experience in utility issues, they largely lack experience as regulators, which causes some regulatory uncertainty.

On a more constructive note, the BPU allows infrastructure replacement surcharges for water utilities and recently expanded them to include wastewater utilities. However, the cap on the percentage of revenue that can flow through the charge is lower than in many other states. The BPU now permits interim increases to be implemented during the pendency of a rate case, but no water utility has done so. Legislation enacted in 2015 facilitates the acquisition of municipal water systems in the state. Similar legislation on wastewater systems has not successfully been enacted in recent years.

The BPU has historically taken an extended period of time to rule on large mergers. Recent, smaller acquisition proposals have met with little resistance. The state's consumer advocacy group is vocal and strongly influences regulatory outcomes.

RRA accords New Jersey water utility regulation an Average/3 ranking.

2 NJ water utility rate cases pending

The largest investor-owned water utility in New Jersey, New Jersey-American Water Co. Inc., filed for a $161.7 million rate increase in January, reflecting a 10.75% return on equity (56.30% capital) and a 7.90% return on an average rate base valued at $5.067 billion for a test year ending June 30, 2024. The company proposes that the BPU consider additions in capital expenditures through Dec. 31, 2024, and changes in certain revenues and expenses through March 31, 2025. New Jersey-American Water is a subsidiary of American Water Works Co. Inc.

Also in January, Aqua New Jersey Inc. requested a $8.3 million (8.3%) increase to base rates reflecting an 11.15% return on equity (53.00% capital) and a 7.91% return on rate base valued at $279 million for a test year ended April 30, 2024. The rate request includes $10.4 million of post-test-year plant additions. Aqua New Jersey is a subsidiary of Essential Utilities Inc.

8	1.30	16.14%	11.12%	9.04%	2.08%
9	1.34	16.97%	11.96%	9.28%	2.68%
10-Smallest	1.39	20.27%	15.25%	9.66%	5.59%

Betas are estimated from monthly returns in excess of the 30-day U.S. Treasury bill total return, January 1926–December 2016. Historical riskless rate measured by the 91-year arithmetic mean income return component of 20-year government bonds (5.02%). Calculated in the context of the CAPM by multiplying the equity risk premium by beta. The equity risk premium is estimated by the arithmetic mean total return of the S&P 500 (11.95%) minus the arithmetic mean income return component of 20-year government bonds (5.02%) from 1926–2016. INTRODUCTION

Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A. My name is Ethan H. Cline. My business address is Pennsylvania Public Utility Commission, 400 North Street, Harrisburg, PA 17120.

Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?

A. I am employed by the Pennsylvania Public Utility Commission in the Bureau of Investigation and Enforcement ("I&E") as a Fixed Utility Valuation Engineer.

Q. WHAT IS YOUR EDUCATIONAL AND EMPLOYMENT EXPERIENCE?

A. An outline of my education and employment experience is attached as Appendix A.

Q. PLEASE DESCRIBE THE ROLE OF I&E IN RATE PROCEEDINGS.

A. I&E is responsible for representing the public interest in rate and other proceedings before the Commission. I&E's analysis in this proceeding is based on its responsibility to represent the public interest. This responsibility requires the balancing of the interests of ratepayers, the utility company, and the regulated community as a whole.

Q. WHAT IS THE PURPOSE OF YOUR DIRECT TESTIMONY?

A. The purpose of my testimony is to evaluate Aqua Pennsylvania Water, Inc. and

Aqua Pennsylvania Wastewater, Inc.'s ("Aqua" or "Company") request for a total annual increase in operating revenue of $126,675,472 million in the year ending December 31, 2025. My testimony will address issues related to the rate base, present and proposed revenue, cost allocation, and rate design for the water and wastewater operations.

Q. DOES YOUR TESTIMONY INCLUDE AN EXHIBIT?

A. Yes. I&E Exhibit No. 3 contains schedules relating to my testimony.

Q. PLEASE DESCRIBE THE FILING.

A. On May 23, 2024, Aqua filed a combined water and wastewater base rate case. Using the Fully Projected Future Test Year ("FPFTY") ending December 31, 2025; this net increase of $126,675,472 is comprised of an increase in water revenue of $111,246,656 for water base operations and $802,470 for the Shenandoah Water Division. Additionally, the Company is requesting an increase in wastewater revenue allocated across several wastewater systems as follows: $8,209,676 to Wastewater Base Operations, $2,568,544 to Lower Makefield Wastewater Operations, and $3,848,126 to East Whiteland Wastewater Operations. (Aqua Sch. Act-11, p. 1).

RATE BASE

Q. WHAT IS RATE BASE?

A. Rate base is the depreciated original cost of a utility's investment in plant that is in place to serve customers plus other additions and deductions that the Commission deems necessary in order to keep the utility operating and providing safe and reliable service to its customers.

Q. HOW IS RATE BASE USED IN THE RATEMAKING FORMULA?

A. Rate base is one part of the financial equation used by the Commission to determine the appropriate revenue that a utility is granted in a rate proceeding. The revenue determination allows the utility to meet its expense obligations and gives it the opportunity to earn the rate of return established by the Commission in a rate proceeding. The equation used to determine the proper revenue requirement is:

Revenue Requirement = (Rate Base x Rate of Return) + Operating Expenses + Depreciation Expense + Taxes

Q. HOW DOES THE COMPANY CALCULATE ITS RATE BASE CLAIM?

A. The Company's rate base claim calculation includes depreciated original cost plant in service plus additions of materials and supplies and cash working capital as well as deductions of contributions in aid of construction ("CIAC") and customer advances for construction ("CAC"), deferred income taxes, and Investment Tax

Credit as shown on Schedule G-1 on Aqua Exhibits 1-A through 1-, Schedule G-1.

Q. HOW IS DEPRECIATED ORIGINAL COST PLANT IN SERVICE CALCULATED?

A. The depreciated original cost plant in service is determined by subtracting the book reserve, which is the accumulation of all prior annual depreciation expense, and other items such as salvage value from the original cost of the plant in service that is projected to be used and useful in the public service. The depreciated original cost of the plant in service is determined by taking a "snapshot" look at the depreciated original cost value of used and useful utility plant expected to be in service at the end of the FPFTY.

Q. IS I&E RECOMMENDING ANY ADJUSTMENTS TO THE ADDITIONS AND DEDUCTIONS LISTED ABOVE?

A. No.

FTY AND FPFTY REPORTING

Q. DO YOU HAVE ANY RECOMMENDATIONS REGARDING PLANT ADDITIONS THAT AQUA PROJECTS TO BE IN SERVICE DURING THE FTY ENDING DECEMBER 31, 2024, AND THE FPFTY ENDING DECEMBER 31, 2025?

A. Yes. I recommend that the Company provide I&E and the Office of Consumer

Advocate with an update to Schedule G-2 of Aqua Exhibits 1-A, 1-B, 1-C, 1-D, and 1-E, no later than April 1, 2025, which should include actual capital expenditures, plant additions, and retirements by month for the twelve months ending December 31, 2024, and an additional update for actuals for the year ending December 31, 2025, no later than April 1, 2025.

Q. WHY DO YOU RECOMMEND THAT AQUA PROVIDE THESE UPDATES?

A. I&E continues to believe that there is value in determining how closely Aqua's projected investments in future facilities comport with the actual investments that are made by the end of the FTY and FPFTY. Determining the correlation between the Company's projected and actual results will help inform the Commission and the parties in Aqua's future rate cases as to the validity of the Company's projections.

Using an FPFTY, Aqua is requesting ratepayers pre-pay a return on its projected investment in future facilities that are not in place and providing service at the time the new rates take effect, but also are not subject to any guarantee of being completed and placed into service. While the FPFTY provides for such projections, there should be verification of the projections. Therefore, requiring the Company to provide updates demonstrating that actual investments comport with projections used in setting rates provides the Commission with actual data to gauge the accuracy of Aqua's projected investments in future proceedings.

EAST WHITELAND TOWNSHIP SYSTEM ACQUISITION

Q. WHEN WAS THE EAST WHITELAND TOWNSHIP WASTEWATER SYSTEM ACQUIRED BY AQUA?

A. Aqua acquired the Easte Whiteland Township ("East Whiteland") wastewater system on August 12, 2022 (Aqua St. No. 11, p. 23).

Q. ARE YOU AWARE OF ANY EXISTING LEGAL ISSUES REGARDING AQUA'S ACQUISITION OF THE EAST WHITELAND SYSTEM?

A. Yes. It is my understanding that the Company's acquisition of the East Whiteland system was initially approved by the Commission in an Order entered July 29, 2022[1]. I am advised by counsel that parties have 30 days to appeal Commission Orders to the Pennsylvania Commonwealth Court. Despite this 30-day appeal period, the Company decided to close on the acquisition 14 days after the Commission Order. However, after a series of appeals, as I understand, the East Whiteland acquisition case now sits with the Pennsylvania Supreme Court.[2]

Q. WHAT EFFECT DOES THE APPEAL OF THE EAST WHITELAND ACQUISITION CASE HAVE ON THE PRESENT PROCEEDING?

A. I have been advised by counsel that, until the appeal to the Pennsylvania Supreme Court has been resolved, the question of whether Aqua is legally permitted to

[1] Aqua Acquisition of East Whiteland Docket No. A-2021-3026132, p. 122, Order entered July 29, 2022.
[2] Cicero v. Pa. P.U.C., Docket No. 49 MAP 2024

include this system in its rate base remains unresolved.

Q. DID THE COMMISSION RECENTLY REJECT THE INCLUSION OF WATER OR WASTEWATER ACQUISITIONS FOR SYSTEMS THAT WERE INCLUDED IN A BASE RATE CASE PRIOR TO THE CLOSE OF THE ACQUISITION?

A. Yes. In the Order for the Pennsylvania-American Water Company's ("PAWC") recent water and wastewater base rate increase, the Commission excluded the Butler Area Sewer Authority system from and ruled that "the Commission cannot assume that PAWC correctly knows with any certainty how the Commonwealth Court will rule on this matter. Therefore, accepting such assumptions is not in the public interest."[3] Applying this same logic to the Pa. Supreme Court appeal of the East Whiteland system would similarly require that system to be removed from the present proceeding because it is uncertain how the Pa. Supreme Court will rule on the East Whiteland case.

Q. DOES THE CLOSING OF THE EAST WHITELAND ACQUISITION NEGATE THE SIMILARITY TO THE RULING ON THE BASA ACQUISITION IN THE PAWC CASE?

A. No. As I described above, the East Whiteland Acquisition was approved by the

[3] PAWC Base Rate Case Docket Nos. R-2023-3043189 and R-2023-3043190, pp. 38-39, Order entered July 22, 2024.

Commission on July 29, 2022, and Aqua decided to Close the acquisition on August 12, 2022, a mere 14 days into the 30-day appeal period. Aqua's attempt to circumvent the appeals process does not remove the uncertainty surrounding what the Pa. Supreme Court's decision will be and, therefore, including the East Whiteland acquisition in this base rate case is unjust and unreasonable. The legal considerations surrounding the East Whiteland acquisition will be discussed by the I&E prosecutor in the Main and Reply briefs.

Q. WHAT DO YOU RECOMMEND REGARDING THE EAST WHITELAND ACQUISITION?

A. I recommend that any rate base, acquisition costs, expenses, taxes, and any revenue shortfall, including the proposed Act 11 allocation of $3,144,592 (Aqua Ex. 1-A, Sch. Act 11), be excluded from this case as premature.

WASTEWATER RATE ZONES

Q. HOW MANY DIFFERENT WASTEWATER RATE ZONES DOES AQUA HAVE, AND DO THE RATES VARY BY RATE ZONE?

A. Aqua has 15 different wastewater rate zones and 7 different third-party customers (Aqua Ex. 5-B, Part II, Sch. 2-WW). While a few Rate Zones have the same rates, most rates are different. Since the last case, the Company acquired the Lower Makefield system and the East Whiteland system through separate Section 1329 proceedings as well as the North Heidelberg Sewer Company ("NHSC"). These

three systems became Rate Zones 12, 13, and 14 respectively, and the rates and revenues for Rate Zones 12, 13, and 14 are shown in Aqua Exhibit 5-B, Part II, Schedule 5-WW, pp. 24-29.

Q. IS AQUA PROPOSING TO CONSOLIDATE ANY WASTEWATER RATE ZONES?

A. Yes. As described on Aqua Statement No. 5, p. 19, the Company is proposing to consolidate Rate Zones 1A, 7, 9, 10, and 12 into Rate Zone 1, consolidate Rate Zones 8 and 11 into Rate Zone 2, and leave Rate Zones 3, 4, 5, 6, and 13 as standalone rate zones with Rate Zones 2, 3, 4, and 5 receiving no increase.

Q. ARE YOU RECOMMENDING ANY CHANGES TO AQUA'S PROPOSED RATE ZONE CONSOLIDATIONS?

A. Yes, my recommended adjustments to Aqua's proposed rate zone consolidations are discussed further below and summarized in the following table.

Present Rate Zone	I&E Proposed Rate Zone
Rate Zone 1	Merge with Rate Zone 1
Rate Zone 7	
Rate Zone 8	
Rate Zone 1A	Move customer charge towards RZ 1
Rate Zone 2	Merge into one Rate Zone
Rate Zone 3	
Rate Zone 4	Merge into one Rate Zone
Rate Zone 5	
Rate Zone 9	Merge into one Rate Zone
Rate Zone 10	
Rate Zone 12	Merge into one Rate Zone
Rate Zone 14	
Rate Zone 6	Move usage Rates toward RZ 1
Rate Zone 11	Set EDU charges equal to RZ 1
Rate Zone 13	No change

Q. WHAT IS ACT 11?

A. On February 14, 2012, Governor Corbett signed into law Act 11 of 2012 (Act 11), which amends Chapters 3, 13 and 33 of the Pennsylvania Public Utility (Code). Act 11 amends Chapters 3 and 13 to allow jurisdictional utilities to make rate case claims based on a fully-projected future test year, to allow wastewater utilities to allocate a portion of their revenue requirement to the combined wastewater and water utility customer base and to allow water and wastewater utilities, electric distribution companies (EDCs), and natural gas distribution companies (NGDCs) or a city natural gas distribution operation to petition for a distribution system improvement charge (DSIC). (Docket No. M-2012-2293611, Final

Implementation Order entered August 2, 2012)

Q. DOES ACT 11 SPECIFY HOW RATES SHOULD BE DETERMINED OR WHAT PORTION OF A COMPANY'S WASTEWATER REVENUE REQUIREMENT SHOULD BE ALLOCATED TO ITS COMBINED WATER AND WASTEWATER CUSTOMERS?

A. No. Act 11 does not specify how the Commission should determine rates or dictate the amount of revenue that should be allocated or shifted, leaving the Commission wide latitude in applying this provision of Act 11. However, it is important to remember that Section 1311(c) states that it must be in the public interest for the utility to allocate a portion of the wastewater revenue requirement to the combined water and wastewater customer base.

Q. IS AQUA PROPOSING TO SHIFT SOME OF THE WASTEWATER REVENUE REQUIREMENT FROM WASTEWATER CUSTOMERS TO WATER CUSTOMERS IN THIS FILING?

A. Yes. In its filing, the Company proposes that its wastewater operations receive a $21,850,629 subsidy from its water operations. This amount consists of $17,747,873 for Wastewater Base Operations, $958,164 for the Lower Makefield system, and $3,144,592 for the East Whiteland system (Aqua Ex. 1-A, Sch. Act 11, p. 1).

Q. WHY IS AQUA PROPOSING TO SHIFT SOME OF THE WASTEWATER REVENUE REQUIREMENT FROM WASTEWATER CUSTOMERS TO WATER CUSTOMERS IN THIS FILING?

A. After increasing and consolidating various wastewater rates, to the level Aqua believes is reasonable, the remaining total proposed wastewater revenue shortfall is $21,850,629; therefore, Aqua has proposed to recover this amount from its water customers.

Q. DO YOU AGREE THAT AQUA'S PROPOSAL TO SHIFT $21,850,629 FROM WASTEWATER CUSTOMERS TO WATER CUSTOMERS IS IN THE PUBLIC INTEREST?

A. No. I do not agree that Aqua's proposal to shift $21,850,629 of the revenue requirement from wastewater customers to water customers is in the public interest. Generally speaking, it is unreasonable to require water customers to subsidize wastewater customers to this degree when only 27,167[4] of the total 442,058[5] water customers, or 6.15%, are also wastewater customers. While I understand Act 11 allows for a shifting of a portion of wastewater revenue requirement to water ratepayers, I believe each type of utility service should recover as much of the cost of providing that service as possible. More specifically, as shown on Aqua Exhibit 5-B, Part II, Schedule 7-WW, pp. 1-24,

[4] See response to OCA-II-22, attached as I&E Exhibit No. 3, Schedule 22.
[5] Aqua Exhibit 1-A, Schedule A-2, column 3, line 15.

Aqua is proposing a rate *decrease* for a large portion of its wastewater customer base. It is not in the public interest for Aqua's water customers to subsidize rate decreases for its wastewater customers. Finally, as I discussed above, it is not in the public interest for Aqua's water customers to be allocated any cost generated from the East Whiteland acquisition unless and until the ruling from the Pa. Supreme Court, if found in Aqua's favor, is final.

RATE STRUCTURE AND REVENUE SUMMARY

Q. DID YOU COMPILE A SUMMARY THAT SHOWS THE REVENUE IMPACT OF BOTH THE COMPANY'S AND I&E'S RATE STRUCTURE RECOMMENDATIONS?

A. Yes. A summary of the Company's and the I&E wastewater revenue recommendations described below are provided on I&E Exhibit No. 3, Schedule 1. As a result of the changes in proposed rates that I discuss below, I am recommending a reduction in the Act 11 subsidy of $18,303,535 from $21,850,629 to $3,547,094.

RATE ZONES SUMMARY

Q. DID THE COMPANY PROVIDE A COST OF SERVICE STUDY (COSS) TO DETERMINE THE COSTS OF PROVIDING SERVICE FOR ITS WASTEWATER BASE OPERATIONS?

A. Yes. The Company provided one COSS for its wastewater base operations, which

includes Rate Zones 1-11 and 14. The Company also provided separate COSS' for the Lower Makefield (Rate Zone 12) and East Whiteland (Rate Zone 13) operations (Aqua Ex. 5-B, Parts I and II).

Q. IN SOME OF THE RATE ZONES, CUSTOMERS ARE BILLED ON AN EQUIVALENT DWELLING UNIT (EDU) BASIS. PLEASE EXPLAIN WHAT AN EDU IS.

A. According to page 26 of the proposed tariff and EDU is defined as:

> Equivalent Dwelling Unit or "EDU"**:** Except for existing Customers acquired by the Company through a purchase or acquisition and for billing purposes only, the EDU is a measure assigned by the Company based upon the estimated average daily wastewater flow for the type of business, as calculated by the PaDEP regulation at 25 Pa. Code § 73.17(b) divided by the Company's typical estimated average daily wastewater flow from a current single-family unit. Residential Customers are designated as one (1) EDU; however, in the Company's sole discretion, the Company may assign more than one (1) EDU for a residential Property. (Aqua Pennsylvania, Inc. Tariff Sewer-PA P.U.C. No. 4, Original Page 26).

Q. WHY IS AN EDU USED FOR BILLING?

A. An EDU is used for billing flat rate customers and is based upon expected usage compared to an average residential customer or "dwelling unit." For example, the bill for an apartment building with 8 units would be based on 8 EDUs, or 8 times the charge for an average residential customer. For commercial customers, the nature of the commercial customer's business typically dictates the number of applicable EDUs.

Q. HOW DID AQUA DETERMINE THE FLAT RATE IF THE CUSTOMER HAS NO WATER USAGE DATA AVAILABLE?

A. Based upon the rates proposed by Aqua, the flat rate for a customer with no usage data available is based upon the bill of a customer in that Rate Zone that uses 3,870 gallons of water. This 3,870-gallons per month is the usage of an average residential usage customer. For example, in Rate Zone 1, the proposed bill for a customer that uses 3,870 gallons of water is $92.85 per month, which is the same as the proposed unmetered rate of $92.85 per month. (Aqua Volume 5, Ex. 5-B, Part II, Sch. 5-WW, p. 3, and 7-WW, p. 2). I continue this reasonable methodology in the Rate Zones that have flat rate residential customers where I adjust the Company's proposed rates. However, I am recommending that the nonresidential flat rate customers be calculated using 4,660 gallons per month.

Q. WHY ARE YOU RECOMMENDING THAT NONRESIDENTIAL UNMETERED FLAT RATE BE CALCULATED USING 4,660 GALLONS?

A. Generally, nonresidential customers have more usage per month than residential customers. Therefore, it is not reasonable to calculate the unmetered flat rate for nonresidential customers using the same average usage per month as residential customers.

Q. WHAT IS THE BASIS FOR THE 4,660 GALLONS PER MONTH THAT YOU RECOMMEND BE USED TO CALCULATE THE NONRESIDENTIAL UNMETERED FLAT RATE?

A. In its response to I&E-RS-7, attached as I&E Exhibit No. 3, Schedule 2, the Company provided a schedule showing the average usage for each customer class in each Rate Zone as well as the average usage for nonresidential customers. That schedule shows that the average Rate Zone 1 commercial customer uses 22,700 gallons per month, the average industrial customer uses 4,660 gallons per month, the average public customer uses 24,500 gallons per month, and the average usage for all nonresidential customers is 22,770 gallons per month. I selected the average usage of industrial customers of 4,660 gallons per month to calculate the nonresidential unmetered flat rate because selecting the average usage of any of the other customer groups would have resulted in an unreasonable increase compared to the existing rates, which are calculated based upon the residential average usage of 3,870 gallons per month. Therefore, calculating the nonresidential unmetered flat rate based on 4,660 gallons per month is reasonable because it represents the higher usage level of nonresidential customers compared to residential customers but does not increase rates unreasonably.

RATE ZONE 1

Q. WHAT PRESENT RATES DO CUSTOMERS IN RATE ZONE 1 CURRENTLY PAY?

A. Aqua's present Rate Zone 1 rates and revenues are shown on Aqua Exhibit 5-B, Part II, Sch. 5-WW, pp. 1-3).

Q. IS THE COMPANY PROPOSING TO CHANGE THE PRESENT CUSTOMER CHARGES, FLAT RATES, AND USAGE RATES IN ZONE 1?

A. Yes. Aqua is proposing to decrease its residential customer charges, set its nonresidential customer charges equal to the residential customer charges, and increase its usage rates for all Rate Zone 1 customers (Aqua Ex. 5-B, Part II, Sch. 5-WW, pp. 1-3).

Q. WHAT IS THE CHANGE TO A RESIDENTIAL CUSTOMER IN ZONE 1 UNDER THE COMPANY'S PROPOSED RATES?

A. The bill for an average Residential customer using 3,870 gallons per month in Rate Zone 1 will decrease from $95.19 per month to $92.85 per month, which is a decrease of $2.35 per month or 2.46% (Aqua Ex. 5-B, Part II, Sch. 7-WW, p. 1).

Q. WHAT RATES DO YOU RECOMMEND FOR RATE ZONE 1 CUSTOMERS?

A. My recommended rates for Rate Zone 1 customers are shown on I&E Exhibit No. 3, Schedule 4, column I.

Q. PLEASE SUMMARIZE YOUR RATE PROPOSAL.

A. First, rather than decreasing the monthly customer charge, I am recommending that it be set equal to the current customer charge plus the existing 1.34% DSIC, or $48.85 for 5/8-inch residential customers. In order to be consistent, I am recommending the same treatment for the EDU charges and residential customer charges for the remaining meter sizes and for the nonresidential customer charges be set equal to the residential customer charges. I am recommending an increase to the residential usage rate of $0.6183 per hundred gallons from $1.1817 per hundred gallons to $1.80 per hundred gallons, or 52.3%. I am also recommending an increase to the nonresidential usage rate of $0.4892 per hundred gallons from $1.1608 per hundred gallons to $1.65 per hundred gallons, or 42.1% (I&E Ex. No. 3, Sch. 4, col. I).

Q. WHAT IS A CUSTOMER COST ANALYSIS AND HOW IS IT USED?

A. A customer cost analysis is a part of a COSS that is used to determine the appropriate fixed customer charges for the various classes and meter sizes.

Q. WHY IS IT NECESSARY TO PERFORM A CUSTOMER COST ANALYSIS?

A. A fixed customer charge represents the revenue that the Company is guaranteed to receive each month, regardless of the level of usage. As acknowledged in the seventh edition of the American Water Works Association M1 Manual, there is a tradeoff between revenue stability from a high customer charge, and affordability and conservation from a low customer charge and higher usage rates.[6]

Q. WHY ARE YOU RECOMMENDING TO NOT INCREASE AQUA'S EXISTING RATE ZONE 1 CUSTOMER CHARGES?

A. I am recommending to not increase Aqua's existing Rate Zone 1 customer charges, including the DSIC, because an increase is not supported by the total customer cost of $47.26 shown on Company's customer cost analysis shown on Aqua Exhibit 5-B, Part I, Appendix A, RS1j, p. A-12. While a customer charge decrease is supported by the customer cost analysis, any revenue shortfall from the decreased customer charge would need to be recovered from either the wastewater usage rates or Aqua's water customers through an Act 11 allocation. Allocating that shortfall to the usage rates would reduce the effectiveness of increasing the usage rates in order reduce the Act 11 allocation, which is functionally the same as allocating that revenue to the water customers because too much of an increase to

[6] AWWA Manual of Water Supply Practices M1 Principles of Water Rates, Fees, Charges, Seventh Edition. pp. 154-155.

the usage charge would have a detrimental effect on the average customer bill. As I stated above, it is not reasonable for Aqua's water customers to be allocated the cost of a rate decrease for its wastewater customers. Therefore, the most reasonable solution is to not increase rates above the existing customer charge plus the DSIC.

Q. WHAT INCREASE WILL THE AVERAGE RESIDENTIAL CUSTOMER IN RATE ZONE 1 EXPERIENCE UNDER YOUR PROPOSAL?

A. The bill for an average Residential customer in Rate Zone 1 using 3,870 per month will increase by $23.73 per month from $92.85 per month to $116.58 per month, or 25.6% (I&E Ex. No. 3, Sch. 3, line 1).

Q. HOW DID YOU DETERMINE THESE RATES?

A. Once I determined that the customer charges would not change, I adjusted the residential and nonresidential usage rates to increase revenue and reduce the Act 11 subsidy while maintaining a reasonable increase to the average bills and maintaining the approximate proportion of the residential and nonresidential class to total cost of service established by the COSS as shown on I&E Exhibit No. 3, Schedule 1, col. B and I.

RATE ZONE 1-A

Q. WHAT PRESENT RATES DO CUSTOMERS IN RATE ZONE 1-A CURRENTLY PAY?

A. The present Rate Zone 1-A rates are shown on Aqua Exhibit 5-B, Part II, Schedule 5-WW-5, pp. 4-5. Under present rates, Rate Zone 1-A usage rates and 5/8-inch customer charges are equal to that of Rate Zone 1, but the larger meter size customer charges are different than Rate Zone 1.

Q. IS THE COMPANY PROPOSING TO CHANGE THE PRESENT CUSTOMER CHARGES AND USAGE RATES IN RATE ZONE 1-A?

A. Yes. The proposed Rate Zone 1-A rates are shown on Aqua Exhibit 5-B, Part II, Schedule 5-WW, pp. 4-5. The Company is proposing to continue to set the 5/8-inch residential and nonresidential customer charges and usage rate equal to Rate Zone 1. The Company is proposing to decrease the higher residential meter size customer charges at the same 1.2% as the 5/8-inch residential customer and increase the higher nonresidential customer charges at the same 0.6% as the 5/8-inch nonresidential customer charge.

Q. WHAT IS THE AVERAGE CHANGE TO A RESIDENTIAL CUSTOMER IN RATE ZONE 1-A UNDER THE COMPANY'S PROPOSED RATES?

A. The bill for an average Residential customer in Rate Zone 1-A will decrease from $95.19 per month to $92.85 per month, which is a decrease of $2.35 per month or

2.46% (Aqua Ex. 5-B, Part II, Sch. 7-WW, p. 3).

Q. WHAT RATES DO YOU RECOMMEND FOR THE RATE ZONE 1-A CUSTOMERS?

A. I recommend that Rate Zone 1-A residential and nonresidential 5/8-inch customer charges and usage rates be set equal to those I recommended in Rate Zone 1 (I&E Ex. No. 3, Sch. 5, col. I).

Q. WHAT INCREASE WILL THE AVERAGE RESIDENTIAL CUSTOMER IN RATE ZONE 1-A EXPERIENCE UNDER YOUR PROPOSAL?

A. The bill for an average Residential customer in Rate Zone 1-A will increase from $95.19 per month to $116.58 per month, which is an increase of $21.38 per month or 22.5% (I&E Ex. No. 3, Sch. 3, line 5).

RATE ZONE 2

Q. WHAT PRESENT RATES DO CUSTOMERS IN RATE ZONE 2 CURRENTLY PAY?

A. The present Rate Zone 2 rates are shown on Aqua Exhibit 5-B, Part II, Schedule 5-WW, pp. 6-7.

Q. IS THE COMPANY PROPOSING TO INCREASE THE PRESENT CUSTOMER CHARGE FLAT RATES, AND USAGE RATES IN RATE ZONE 2 - MAIN?

A. No. As shown on Aqua Exhibit 5-B, Part II, Schedule 5-WW, pp. 6-7, the Company is proposing no increase for Rate Zone 2.

Q. WHAT RATES DO YOU RECOMMEND FOR THE RATE ZONE 2 CUSTOMERS?

A. My recommended rates for Rate Zone 2 customers are listed on I&E Exhibit No. 3, Schedule 6, column I. I recommend no change for any residential and nonresidential customer charges, the residential and nonresidential usage rates be set equal to those of Rate Zone 1, and calculate the residential unmetered flat rates based on those charges using the average usage as described above.

Q. WHAT INCREASE WILL THE AVERAGE RESIDENTIAL CUSTOMER IN RATE ZONE 2 EXPERIENCE UNDER YOUR PROPOSAL?

A. The bill for an average Residential customer in Rate Zone 2 will increase from $106.04 per month to $123.66 per month, which is an increase of $17.62 per month or 16.6% (I&E Ex. No. 3, Sch. 3, line 7).

Q. HOW DID YOU DETERMINE THESE RATES?

A. As discussed above, an increase in customer charges is not supported by the

customer cost analysis. Additionally, setting the usage rates equal to those of Rate Zone 1 results in a reasonable increase for the average customers of Rate Zone 2 that produces additional revenue to reduce the Act 11 subsidy and moves Rate Zone 2 closer to merging with Rate Zone 1 in a future base rate case.

RATE ZONE 3

Q. WHAT PRESENT RATES DO CUSTOMERS IN RATE ZONE 3 CURRENTLY PAY?

A. The present Rate Zone 3 rates are shown on Aqua Exhibit 5-B, Part II, Schedule 5-WW, pp. 8-9.

Q. IS THE COMPANY PROPOSING TO CHANGE THE PRESENT RATES IN RATE ZONE 3?

A. No. As shown on Aqua Exhibit 5-B, Part II, Schedule 5-WW, pp. 8-9, the Company is proposing no increase for Rate Zone 3.

Q. WHAT RATES DO YOU RECOMMEND FOR THE RATE ZONE 3 CUSTOMERS?

A. I recommend that Rate Zone 3 rates be set equal to Rate Zone 2 rates as shown on I&E Exhibit No. 3, Schedule 7, column I.

Q. PLEASE SUMMARIZE YOUR RATE PROPOSAL.

A. I reduced the Rate Zone 3 customer charges to be equal to Rate Zone 2, then increase the usage rates to be equal to Rate Zone 1.

Q. WHAT INCREASE WILL THE AVERAGE RESIDENTIAL CUSTOMER IN RATE ZONE 3 EXPERIENCE UNDER YOUR PROPOSAL?

A. The bill for an average Residential customer in Rate Zone 3 will increase from $115.36 per month to $123.66 per month, which is an increase of $8.30 per month or 7.2% (I&E Ex. No. 3. Sch. 3, line 10).

Q. HOW DID YOU DETERMINE THESE RATES?

A. First, I determined that the Rate Zone 3 customer charges were much higher than those of Rate Zone 1 and, therefore, merging Rate Zone 3 with Rate Zone 1 would not be possible in the next several rate cases without a reduction in the Rate Zone 3 rates. Rather than closing that gap with a very large rate reduction in this case, my solution is a slight reduction which sets the Rate Zone 3 customer charges equal to Rate Zone 2. This has the effect of moving rates towards Rate Zone 1 while further consolidating rate zones. Setting the usage rates equal to those of Rate Zone 1 results in a reasonable increase for the average customers of Rate Zone 3 that produces additional revenue to reduce the Act 11 subsidy and moves Rate Zone 3 closer to merging with Rate Zone 1 in a future base rate case.

RATE ZONE 4

Q. WHAT PRESENT RATES DO CUSTOMERS IN RATE ZONE 4 CURRENTLY PAY?

A. The present Rate Zone 4 rates are shown on Aqua Exhibit 5-B, Part II, Schedule 5-WW, p. 10.

Q. IS THE COMPANY PROPOSING TO CHANGE THE PRESENT RATES IN RATE ZONE 4?

A. No. As shown on Aqua Exhibit 5-B, Part II, Schedule 5-WW, p. 10, the Company is proposing no increase for Rate Zone 4.

Q. WHAT RATES DO YOU RECOMMEND FOR RATE ZONE 4 CUSTOMERS?

A. My recommended rates for Zone 4 customers are shown on I&E Exhibit No. 3, Schedule 8, column I. I am recommending a slight decrease for the residential and nonresidential customer charges, that the usage rates be set equal to Rate Zone 1, and the unmetered flat rates be calculated based on my proposed rates based on the average usage as discussed above.

Q. WHAT INCREASE WILL THE AVERAGE RESIDENTIAL CUSTOMER IN RATE ZONE 4 EXPERIENCE UNDER YOUR PROPOSAL?

A. The bill for an average Residential customer in Rate Zone 4 will increase from

$137.01 per month to $147.73 per month, which is an increase of $10.72 per month or 7.8% (I&E Ex. No. 3, Sch. 3, line 12).

Q. HOW DID YOU DETERMINE THESE RATES?

A. First, I determined that the Rate Zone 4 customer charges were much higher than those of Rate Zone 1 and, therefore, merging Rate Zone 4 with Rate Zone 1 would not be possible in the next several rate cases without a reduction in the Rate Zone 4 rates. Rather than closing that gap with a very large rate reduction in this case, my solution is a slight reduction to the Rate Zone 4 customer charges, which sets the Rate Zone 4 customer charges equal to Rate Zone 5. This has the effect of moving rates towards Rate Zone 1 while further consolidating rate zones. Setting the usage rates equal to those of Rate Zone 1 results in a reasonable increase for the average customers of Rate Zone 4 that produces additional revenue to reduce the Act 11 subsidy and moves Rate Zone 4 closer to merging with Rate Zone 1 in a future base rate case.

RATE ZONE 5

Q. WHAT PRESENT RATES DO CUSTOMERS IN RATE ZONE 5 CURRENTLY PAY?

A. The present Rate Zone 5 rates are shown on Aqua Exhibit 5-B, Part II, Schedule 5-WW, pp. 11-12.

Q. IS THE COMPANY PROPOSING TO CHANGE THE PRESENT RATES IN RATE ZONE 5?

A. No. As shown on Aqua Exhibit 5-B, Part II, Schedule 5-WW, pp. 11-12, the Company is proposing no increase for Rate Zone 5.

Q. WHAT RATES DO YOU RECOMMEND FOR RATE ZONE 5 CUSTOMERS?

A. My recommended rates for Rate Zone 5 customers are shown on I&E Exhibit No. 3, Schedule 9, column I. I am recommending a slight decrease for the residential and nonresidential customer charges, that the usage rates be set equal to Rate Zone 1, and that the unmetered flat rates be calculated based on my proposed rates based on the average usage as discussed above.

Q. WHAT CHANGE WILL THE AVERAGE RESIDENTIAL CUSTOMER IN RATE ZONE 5 EXPERIENCE UNDER YOUR PROPOSAL?

A. The bill for an average Residential customer in Rate Zone 5 will decrease from $150.62 per month to $147.73 per month, which is a decrease of $2.90 per month or a decrease of 1.9% (I&E Ex. No. 3, Sch. 3, line 15).

Q. HOW DID YOU DETERMINE THESE RATES?

A. First, I determined that the Rate Zone 5 customer charges were much higher than those of Rate Zone 1 and, therefore, merging Rate Zone 5 with Rate Zone 1 would

not be possible in the next several rate cases without a reduction in the Rate Zone 5 rates. Rather than closing that gap with a very large rate reduction in this case, my solution is a slight reduction which sets the Rate Zone 5 customer charges equal to Rate Zone 4. This has the effect of moving rates towards Rate Zone 1 while further consolidating rate zones. Setting the usage rates equal to those of Rate Zone 1 results in a slight decrease for the average customers of Rate Zone 5. While this does not advance revenues toward the goal of reducing the Act 11 subsidy, Rate Zone 5 customer charges are so much higher than those of Rate Zone 1 that a conservative decrease is reasonable.

Q. ARE THERE ANY OTHER RATE ZONE 5 RATES YOU WOULD LIKE TO ADDRESS?

A. Yes. As shown on Aqua Exhibit 5-B, Part II, Schedule 5-WW, p. 12, Aqua is showing a 1.2% decrease in the Avon Grove School unmetered flat rate. This reduction is because Aqua is proposing no increase to the existing rate despite this customer's bill increasing due to the DSIC.

Q. WHAT DO YOU RECOMMEND REGARDING THE AVON GROVE SCHOOL DISTRICT RATE?

A. I recommend the Avon Grove School District rate be increased to the existing rate plus the DSIC as shown on I&E Exhibit No. 3, Schedule 9, p. 2 so that the rates for this customer actually remain the same rather than a receive a decrease.

RATE ZONE 6

Q. WHAT PRESENT RATES DO CUSTOMERS IN RATE ZONE 6 CURRENTLY PAY?

A. The present Rate Zone 6 rates are shown Aqua Exhibit 5-B, Part II, Schedule 5-WW, p. 13.

Q. IS THE COMPANY PROPOSING TO CHANGE THE PRESENT RATES IN RATE ZONE 6?

A. Yes. As shown on Aqua Exhibit 5-B, Part II, Schedule 5-WW, p. 10, the Company is proposing to decrease Rate Zone 6 rates in line with Rate Zone 1.

Q. WHAT RATES DO YOU RECOMMEND FOR RATE ZONE 6 CUSTOMERS?

A. My recommended rates for Rate Zone 6 customers are shown on I&E Exhibit No. 3, Schedule 10, column I. I am recommending that the customer charges and EDU charges not change and that the usage rates be increased towards Rate Zone 1 rates.

Q. WHAT INCREASE WILL THE AVERAGE RESIDENTIAL CUSTOMER IN RATE ZONE 6 EXPERIENCE UNDER YOUR PROPOSAL?

A. The bill for an average Residential customer in Rate Zone 6 will increase from $71.17 per month to $93.41 per month, which is an increase of $22.24 per month

or 31.13% (I&E Ex. No. 3, Sch. 3, line 22).

Q. HOW DID YOU DETERMINE THESE RATES?

A. First, I determined that the Rate Zone 6 usage rates were much lower than those of Rate Zone 1 and, therefore, merging Rate Zone 6 with Rate Zone 1 would not be possible in this base rate case without an excessively large increase to Rate Zone 6 customers. In order to move Rate Zone 6 towards Rate Zone 1 while mitigating an excessively large increase, I recommend the usage rates be increased to 50% of my proposed Rate Zone 1 usage rates and assign no increase or decrease to the customer charge or EDU charge.

RATE ZONE 7

Q. WHAT PRESENT RATES DO CUSTOMERS IN RATE ZONE 7 CURRENTLY PAY?

A. The present Rate Zone 7 rates are shown Aqua Exhibit 5-B, Part II, Schedule 5-WW, pp. 14-15.

Q. IS THE COMPANY PROPOSING TO CHANGE THE PRESENT RATES IN RATE ZONE 7?

A. Yes. As shown on Aqua Exhibit 5-B, Part II, Schedule 5-WW, pp. 14-15, the Company is proposing to merge Rate Zone 7 rates with Rate Zone 1 as shown on I&E Exhibit No. 3, Schedule 11, column I.

Q. DO YOU AGREE WITH THE COMPANY'S PROPOSAL TO MERGE RATE ZONE 7 WITH RATE ZONE 1?

A. Yes. My recommendation is also to merge Rate Zone 7 with my proposed Rate Zone 1 rates.

Q. WHAT INCREASE WILL THE AVERAGE RESIDENTIAL CUSTOMER IN RATE ZONE 7 EXPERIENCE UNDER YOUR PROPOSAL?

A. The bill for an average Residential customer in Rate Zone 7 will increase from $78.39 per month to $116.58 per month, which is an increase of $38.19 per month or 48.7% (I&E Ex. No. 3, Sch. 3, line 24).

Q. HOW DID YOU DETERMINE THESE RATES?

A. While I acknowledge that my recommendation results in a large increase for Rate Zone 7 customers, I believe the increase is reasonable as the result of the increase is that Rate Zone 7 will be consolidated with Rate Zone 1 while reducing the Act 11 subsidy.

<u>RATE ZONE 8</u>

Q. WHAT PRESENT RATES DO CUSTOMERS IN RATE ZONE 8 CURRENTLY PAY?

A. The present Rate Zone 8 rates are shown Aqua Exhibit 5-B, Part II, Schedule 5-WW, pp. 16-17.

Q. IS THE COMPANY PROPOSING TO CHANGE THE PRESENT RATES IN RATE ZONE 8?

A. Yes. As shown on Aqua Exhibit 5-B, Part II, Schedule 5-WW, pp. 16-17, the Company is proposing to merge Rate Zone 8 rates with Rate Zone 2.

Q. WHAT DO YOU RECOMMEND REGARDING RATE ZONE 8?

A. I recommend that Rate Zone 8 rates be merged with Rate Zone 1 as shown on I&E Exhibit No. 3, Schedule 12, column I.

Q. WHAT INCREASE WILL THE AVERAGE RESIDENTIAL CUSTOMER IN RATE ZONE 8 EXPERIENCE UNDER YOUR PROPOSAL?

A. The bill for an average Residential customer in Rate Zone 8 will increase from $104.41 per month to $116.58 per month, which is an increase of $12.16 per month or 11.6% (I&E Ex. No. 3, Sch. 3, line 27).

Q. HOW DID YOU DETERMINE THESE RATES?

A. The increase required to merge Rate Zone 8 with Rate Zone 1increase is reasonable as the result will consolidate an additional rate zone with Rate Zone 1 while reducing the Act 11 subsidy.

RATE ZONE 9

Q. WHAT PRESENT RATES DO CUSTOMERS IN RATE ZONE 9 CURRENTLY PAY?

A. The present Rate Zone 9 rates are shown on Aqua Exhibit 5-B, Part II, Schedule 5-WW, pp. 18-19.

Q. IS THE COMPANY PROPOSING TO INCREASE THE PRESENT CUSTOMER CHARGE AND USAGE RATES IN RATE ZONE 9?

A. Yes. The Company is proposing to merge Rate Zone 9 with Rate Zone 1 as shown on Aqua Exhibit 5-B, Part II, Schedule 5-WW, pp. 18-19.

Q. WHAT IS THE AVERAGE INCREASE TO A RESIDENTIAL CUSTOMER IN RATE ZONE 9 UNDER THE COMPANY'S PROPOSED RATES?

A. The bill for an average Residential customer in Rate Zone 9 will increase from $35.36 per month to $47.76 per month, which is an increase of $12.40 per month or 35.1% (Aqua Volume 5, Ex. 5-B, Part II, Sch. 5-WW, p. 19).

Q. WHAT RATES DO YOU RECOMMEND FOR THE RATE ZONE 9 CUSTOMERS?

A. My recommended rates for Rate Zone 9 customers are listed on I&E Exhibit No. 3, Schedule 13 column I. I recommend an increase for the customer charge and EDU rates and that the usage rates be set equal to Rate Zone 1.

Q. WHAT INCREASE WILL THE AVERAGE RESIDENTIAL CUSTOMER IN RATE ZONE 9 EXPERIENCE UNDER YOUR PROPOSAL?

A. The bill for an average Residential customer in Rate Zone 9 will increase from $61.68 per month to $110.79 per month, which is an increase of $49.11 per month or 79.6% (I&E Ex. No. 3, Sch. 3, line 30).

Q. HOW DID YOU DETERMINE THESE RATES?

A. While I acknowledge that my recommendation results in a large increase for Rate Zone 9 customers, I believe that a large increase is necessary because present Rate Zone 9 rates are so far below Rate Zone 1 rates. This means that the other wastewater rate zones are providing a subsidy to Rate Zone 9 in addition to any Act 11 subsidy being allocated to water customers. Therefore, large increases will be required over the next several base rate cases in order to merge Rate Zone 9 with Rate Zone 1 and eliminate these subsidies.

<u>RATE ZONE 10</u>

Q. WHAT PRESENT RATES DO CUSTOMERS IN RATE ZONE 10 CURRENTLY PAY?

A. The present Rate Zone 10 rates are shown on Aqua Exhibit 5-B, Part II, Schedule 5-WW, pp. 20-21.

Q. IS THE COMPANY PROPOSING TO INCREASE THE PRESENT CUSTOMER CHARGE AND USAGE RATES IN RATE ZONE 10

A. Yes. The Company is proposing to merge Rate Zone 10 with Rate Zone 1 as shown on Aqua Exhibit 5-B, Part II, Schedule 5-WW, pp. 20-21.

Q. WHAT RATES DO YOU RECOMMEND FOR THE RATE ZONE 10 CUSTOMERS?

A. My recommended rates for Rate Zone 10 customers are listed on I&E Ex. No. 3, Schedule 14, column I. I recommend an increase for the customer charge and EDU rates and that the usage rates be set equal to Rate Zone 1 so that Rate Zone 10 is merged with Rate Zone 9.

Q. WHAT INCREASE WILL THE AVERAGE RESIDENTIAL CUSTOMER IN RATE ZONE 10 EXPERIENCE UNDER YOUR PROPOSAL?

A. The bill for an average Residential customer in Rate Zone 10 will increase from $66.35 per month to $110.79 per month, which is an increase of $44.44 per month or 67.0% (I&E Ex. No. 3, Sch. 3, line 34).

Q. HOW DID YOU DETERMINE THESE RATES?

A. While I acknowledge that my recommendation results in a large increase for Rate Zone 10 customers, I believe that a large increase is necessary because present Rate Zone 10 rates are so far below Rate Zone 1 rates. This means that the other

wastewater rate zones are providing a subsidy to Rate Zone 10 in addition to any Act 11 subsidy being allocated to water customers. Therefore, large increases will be required over the next several base rate cases in order to merge Rate Zone 10 with Rate Zone 1 and eliminate these subsidies.

RATE ZONE 11

Q. WHAT PRESENT RATES DO CUSTOMERS IN RATE ZONE 11 CURRENTLY PAY?

A. The present Rate Zone 11 rates are shown on Aqua Exhibit 5-B, Part II, Schedule 5-WW, pp. 22-23.

Q. IS THE COMPANY PROPOSING TO CHANGE THE PRESENT CUSTOMER CHARGE AND USAGE RATES IN RATE ZONE 11?

A. Yes. The proposed Rate Zone 11 rates are shown on Aqua Volume 5, Exhibit 5-B, Part II, Schedule 5-WW, pp. 22-23. The Company is proposing to reduce its rates to merge Rate Zone 11 with Rate Zone 2. This would reduce the average residential Rate Zone 11 bill from $137.29 to $104.63, which is a reduction of $32.65, or 23.78% (I&E Ex. No. 3, Sch. 15). It should be noted that the average bills shown on Aqua Exhibit 5-B, Part II, Schedule 7-WW, p. 17 are incorrect due to an error in the calculation of the 3,870 bills in which 1,700 in usage was calculated using the second block usage rate instead of the first block usage rate. The calculation shown above is correct.

Q. WHAT RATES DO YOU RECOMMEND FOR RATE ZONE 11 CUSTOMERS?

A. My recommended rates for Rate Zone 11 customers are listed on I&E Exhibit No. 3, Schedule 16, column I. I recommend that the Rate Zone 11 customer charge and EDU charges be set equal to Rate Zone 1 charges. I also recommend no change to the first block usage rates and that the second block usage rates be set equal to the first block usage rate for each respective customer class.

Q. WHAT INCREASE WILL THE AVERAGE RESIDENTIAL CUSTOMER IN RATE ZONE 11 EXPERIENCE UNDER YOUR PROPOSAL?

A. The bill for an average Residential customer in Rate Zone 11 will increase from $137.29 per month to $138.86 per month, which is an increase of $1.57 per month or 1.1% (I&E Ex. No. 3, Sch. 3, line 36).

Q. HOW DID YOU DETERMINE THESE RATES?

A. Instead of a rate reduction as proposed by the Company, my recommendation moves the Rate Zone 11 rates towards Rate Zone 1 while providing positive revenue and thus reducing the Act 11 subsidy.

RATE ZONE 12

Q. WHAT PRESENT RATES DO CUSTOMERS IN RATE ZONE 12 CURRENTLY PAY?

A. The present Rate Zone 12 rates are shown on Aqua Exhibit 5-B, Part II, Schedule 5-WW, pp. 24-25.

Q. IS THE COMPANY PROPOSING TO INCREASE THE PRESENT CUSTOMER CHARGE AND USAGE RATES IN RATE ZONE 12?

A. Yes. The Company is proposing to merge Rate Zone 12 with Rate Zone 1 as shown on Aqua Exhibit 5-B, Part II, Schedule 5-WW, pp. 24-25.

Q. ARE YOU RECOMMENDING RATE ZONE 12 BE MERGED WITH RATE ZONE 1 UNDER YOUR PROPOSED RATES?

A. No. Fully merging Rate Zone 12 with Rate Zone 1 under my proposed rates would cause too large of an increase for Rate Zone 12 customers (I&E Ex. No. 3, Sch. 17, col. I). Instead, I recommend the customer charge and EDU rates be set equal to Rate Zone 1 and that the usage rates be set equal to $1.50 per hundred gallons, which is less than my recommended Rate Zone 1 usage charge.

Q. WHAT INCREASE WILL THE AVERAGE RESIDENTIAL CUSTOMER IN RATE ZONE 12 EXPERIENCE UNDER YOUR PROPOSAL?

A. The bill for an average Residential customer in Rate Zone 12 will increase from

$70.51 per month to $106.90 per month, which is an increase of $36.39 per month or 51.6% (I&E Ex. No. 3, Sch. 3, line 39).

Q. HOW DID YOU DETERMINE THESE RATES?

A. While I acknowledge that my recommendation results in a large increase for Rate Zone 12 customers, I believe that a large increase is necessary because present Rate Zone 12 rates are so far below Rate Zone 1 rates. This means that the other wastewater rate zones are providing a subsidy to Rate Zone 12 in addition to any Act 11 subsidy being allocated to water customers. My recommendation moves Rate Zone 12 closer to Rate Zone 1 so that these rate zones can be consolidated in the next base rate case.

RATE ZONE 14

Q. WHAT PRESENT RATES DO CUSTOMERS IN RATE ZONE 14 CURRENTLY PAY?

A. The present Rate Zone 14 rates are shown on Aqua Exhibit 5-B, Part II, Schedule 5-WW, pp. 29.30.

Q. IS THE COMPANY PROPOSING TO INCREASE THE PRESENT CUSTOMER CHARGE AND USAGE RATES IN RATE ZONE 14?

A. Yes. The Company is proposing to merge Rate Zone 14 with Rate Zone 1 as shown on Aqua Exhibit 5-B, Part II, Schedule 5-WW, pp. 29-30.

Q. ARE YOU RECOMMENDING RATE ZONE 14 BE MERGED WITH RATE ZONE 1 UNDER YOUR PROPOSED RATES?

A. No. Similar to Rate Zone 12, fully merging Rate Zone 14 with Rate Zone 1 under my proposed rates would cause too large of an increase for Rate Zone 14 customers. Instead, I recommend the customer charge and EDU rates be set equal to Rate Zone 1 and that the usage rates be set equal to $1.50 per hundred gallons, which would merge Rate Zone 14 with Rate Zone 12. (I&E Ex. No. 3, Sch.18, col. I).

Q. WHAT INCREASE WILL THE AVERAGE RESIDENTIAL CUSTOMER IN RATE ZONE 14 EXPERIENCE UNDER YOUR PROPOSAL?

A. The bill for an average Residential customer in Rate Zone 14 will increase from $65.48 per month to $106.90 per month, which is an increase of $41.42 per month or 63.3% (I&E Ex. No. 3, Sch. 3, line 41).

Q. HOW DID YOU DETERMINE THESE RATES?

A. While I acknowledge that my recommendation results in a large increase for Rate Zone 14 customers, I believe that a large increase is necessary because present Rate Zone 14 rates are so far below Rate Zone 1 rates. This means that the other wastewater rate zones are providing a subsidy to Rate Zone 14 in addition to any Act 11 subsidy being allocated to water customers. My recommendation moves

Rate Zone 14 closer to Rate Zone 1 so that these rate zones can be consolidated in the next base rate case.

Q. WHY IS IT REASONABLE FOR CUSTOMERS IN RATE ZONES 9, 10, 12, AND 14 TO RECEIVE SUCH LARGE RATE INCREASES?

A. There are two reasons that the increases for Rate Zone 9 – Cheltenham, Rate Zone 10 – East Norriton, Whitpain, Rate Zone 12 – Lower Makefield, and Rate Zone 14 – North Heidelberg to receive such large increases. First, as discussed above, larger rate increases are required to move these rate zones towards the rates of Rate Zone 1, so that all of the wastewater rate zones can be consolidated into Rate Zone 1 in future base rate cases. Second, Rate Zones 9, 10, 12, and 14 were acquired under Section 1329, which among other things, provided benefits to the municipalities that sold their systems to Aqua including such things as debt relief, the municipality's financial outlook, and other improvements and investments to municipal properties in addition to Aqua's claimed improved service to their customers. Therefore, since the municipalities and presumably the customers benefited from being acquired by Aqua through Section 1329 it is reasonable to assign a greater than average increase in rates to customers acquired under Section 1329.

FORFEITED DISCOUNTS

Q. HOW MUCH LATE PAYMENT REVENUE DOES THE COMPANY PROJECT IT WILL RECEIVE UNDER PRESENT RATES FOR THE FPFTY?

A. The total claim for forfeited discounts under present rates for the FPFTY ending December 31, 2025, for Wastewater Base Operations, Wastewater East Whiteland, and Wastewater Lower Makefield are shown on Schedule B-1 of Aqua Exhibits 1-C, 1-D. and 1-E, respectively, and are summarized in the table below. I have not included the East Whiteland Operations in the table below because, as discussed above, I am recommending East Whiteland not be included in the present base rate case.

Aqua Operations	Total Billed Revenue Under Present Rates	Forfeited Discounts Under Present Rates	Percent of Total
Wastewater Base	$57,606,382	$95,385	0.1656%
Wastewater Lower Makefield	$11,555,687	$47,145	0.4080%
Total	$69,162,069	$142,530	0.2061%

Q. HOW MUCH LATE PAYMENT REVENUE DOES THE COMPANY PROJECT IT WILL RECEIVE UNDER PROPOSED RATES FOR THE FPFTY?

A. The total claim for forfeited discounts under proposed rates for the FPFTY ending December 31, 2025, for Wastewater Base Operations, Wastewater East Whiteland, and Wastewater Lower Makefield are shown on Schedule B-1 of Aqua Exhibits 1-C, 1-D. and 1-E, respectively, and are summarized in the table below. As noted above, I have not included the East Whiteland Operations in the table below because, as discussed above, I am recommending East Whiteland not be included in the present base rate case.

Aqua Operations	Total Billed Revenue Under Proposed Rates	Forfeited Discounts Under Proposed Rates	Percent of Total
Wastewater Base	$83,563,931	$95,385	0.1141%
Wastewater Lower Makefield	$15,082,395	$47,145	0.3126%
Total	$98,646,326	$142,530	0.1416%

Q. WHAT DO YOU RECOMMEND CONCERNING THE FORFEITED DISCOUNTS IN WASTEWATER BASE OPERATIONS AND WASTEWATER LOWER MAKEFIELD UNDER PROPOSED RATES?

A. I recommended that the forfeited discounts under proposed rates be calculated at

the same percentage of total billed revenue as they are under present rates. The table below shows an example of my recommendation based on the Company's requested increase.

Aqua Operations	Total Billed Revenue Under Proposed Rates	Percent of Total under Present Rates	Adjusted Forfeited Discounts Under Proposed Rates
Wastewater Base	$83,563,931	0.1696%	$141,694
Wastewater Lower Makefield	$15,082,395	0.4080%	$61,536
Total	$98,646,326		$203,230

Q. IF THE TOTAL BILLED REVENUE UNDER THE PROPOSED RATES IS ADJUSTED, SHOULD THE FORFEITED DISCOUNTS UNDER PROPOSED RATES BE ADJUSTED AS WELL?

A. Yes. The forfeited discounts claim under proposed rates should be adjusted respective to the final billed revenue amount ultimately approved by the Commission.

Q. WHY DO YOU RECOMMEND FORFEITED DISCOUNTS BE INCREASED UNDER PROPOSED RATES?

A. I believe it is reasonable to expect that forfeited discounts will increase when a utility's base rates are increased as a result of a base rate proceeding. Since forfeited discounts are generally a percentage of a customer's bill, increasing

wastewater service revenue through a rate increase will cause revenues from forfeited discounts to increase over time.

WATER - SHENANDOAH ADJUSTMENTS

Q. DID THE COMPANY PROVIDE A SUMMARY OF THE PRESENT AND PROPOSED REVENUE FOR THE SHENANDOAH WATER SYSTEM?

A. Yes. The Company provided Aqua Exhibit No. 5-A, Part II, Schedule 1-S showing present and proposed rate revenue for Shenandoah Water.

Q. DID YOU PREPARE A SIMILAR SCHEDULE THAT SHOWS THE PRESENT AND PROPOSED RATE REVENUE YOU RECOMMEND FOR SHENANDOAH WATER?

A. Yes. I&E Exhibit No. 3, Schedule 20 incorporates my recommendations. I recommend the increase to Public Fire be reduced by $26,145 from $26,650 to $505. I also recommend that the allocation between the Main Water Division and Shenandoah Water shown on Aqua Exhibit 1-A, Schedule Act 11 be reduced by $457,103 from 1,465,540 to $1,008,437.

Q. WHY DID YOU REDUCE THE $26,650 INCREASE TO PUBLIC FIRE SERVICE TO $505?

A. As shown on Aqua Exhibit 5-A, Part I, Schedule A-S, the cost incurred to provide service to the Public Fire class is $34,717, and the present rate revenue from

Public Fire Service is $8,170. 66 Pa. Code § 1328(b) limits Public Fire Service revenue to 25% of its cost of service. Therefore, the limit to the Shenandoah Public Fire Service is $8,679 ($34,717 x 0.25). I recommend the 1,721 public fire hydrants, as shown on Aqua, Exhibit No. 5-A, Part II, Schedule 7B, be multiplied by my recommended Shenandoah Public Fire rate of $5.04, which results in the proposed rate revenue of $8,675 ($5.04 x 1,721) (I&E Ex. No. 3, Sch. 20, col. 11).

WATER - SHENANDOAH RATES

Q. WHAT PRESENT RATES DO SHENANDOAH CUSTOMERS CURRENTLY PAY?

A. The present rates for Shenandoah customers are shown on Aqua Exhibit 5-A, Part I, Schedule I, pp. 10-12. It should be noted that Shenandoah customers currently have a water allowance built into their present rates.

Q. IS THE COMPANY PROPOSING TO INCREASE THE PRESENT CUSTOMER CHARGE AND USAGE RATES FOR SHENANDOAH CUSTOMERS?

A. Yes. The Company is proposing to set the customer charges of the Shenandoah customers equal to those of Rate Zone 1, eliminate the water allowance, merge the residential usage rates into two consumption blocks, and create the same four consumption blocks for the commercial, industrial, and public rate classes as shown on Aqua Exhibit 5-B, Part I, Schedule I, pp. 10-12.

Q. DO YOU AGREE WITH THE COMPANY'S RATE PROPOSAL FOR SHENANDOAH'S RATE CLASSES?

A. Partially. I agree with the Company's proposal to set the customer charges for the Shenandoah rate classes equal to those of Rate Zone 1, the Company's proposal to remove the water allowance from its usage rates, and with the Company's rate proposal for the commercial, industrial, and public usage rates. However, I do not agree with the Company's proposed usage rates for the residential class.

Q. WHAT USAGE RATES DO YOU RECOMMEND FOR THE SHENANDOAH RESIDENTIAL CLASS?

A. I recommend the residential usage rates proposed by the Company be increased to be equal to the residential usage rates in Rate Zone 1, or $1.7349 per hundred gallons for the first block and $2.0540 per hundred gallons for the second block.

Q. WHAT INCREASE WILL THE AVERAGE SHENANDOAH RESIDENTIAL CUSTOMER USING A 5/8-INCH METER EXPERIENCE UNDER YOUR PROPOSAL?

A. The bill for an average Shenandoah Residential customer using a 5/8-inch meter will increase from $56.14 per month to $97.01 per month, which is an increase of $40.87 per month or 72.80% (I&E Ex. No. 3, Sch. 21).

Q. WHY DO YOU RECOMMEND SHENANDOAH RESIDENTIAL RATES BE SET EQUAL TO RESIDENTIAL RATE ZONE 1 RATES?

A. While I acknowledge that my recommendation results in a large increase for Shenandoah residential customers, I believe that this increase is reasonable for three reasons. First, because it fulfills the goal of setting the residential rates equal to Rate Zone 1, which is the ultimate goal of all of Aqua's rate zones. Second, increasing the proposed rates for the Shenandoah residential class reduces the subsidy being applied from the Shenandoah customers to Aqua's other water customers and mitigates the necessary rate increase for those customers. Finally, my recommendation, while admittedly a large percent increase, remains comparable to the rate increases proposed by Aqua for the other Shenandoah rate classes as shown on Aqua Exhibit 5-A, Part II, pp. 21-22, and is less than the largest percentage increase I have recommended for wastewater customers. As is the case for those wastewater systems acquired under the Section 1329 criteria introduced as part of Act 12, the affirmative public benefits that Aqua claimed for Shenandoah customers in its acquisition of that system justifies a larger increase for these customers.

SCALE BACK OF RATES

Q. DID THE COMPANY PROVIDE ITS SCALE BACK METHODOLOGY?

A. Yes. In its response to OSBA-I-16, attached as I&E Exhibit No. 3, Schedule 19, the Company indicated that, if the Commission grants 90% of its total revenue

requirement request, it would first scale back Act 11 contributions to each of its wastewater divisions, then it would scale back the contribution from water base operations to the Shenandoah water operations while maintaining customer charges at the Rate Zone 1 level. Finally, the Company stated that, after calculating the revised Act 11 contributions, the revised contribution to Shenandoah, and after reviewing the decrease to the revenue requirement, the Company would scale back the rates by customer class to continue to move revenues under proposed rates toward the cost of service by customer class.

Q. DO YOU AGREE WITH THE COMPANY'S STATED SCALE BACK METHODOLOGY?

A. Yes, on the condition that any rates, whether under my recommendations or the Company's proposals, that either receive no increase, are being decreased prior to the scale back, or are below their respective Rate Zone 1 rates should be excluded from any scale back of rates.

Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?

A. Yes.

ETHAN H. CLINE

PROFESSIONAL EXPERIENCE AND EDUCATION

EXPERIENCE:

03/2009 - Present
Bureau of Investigation and Enforcement, Pennsylvania Public Utility Commission - Harrisburg, Pennsylvania

Fixed Utility Valuation Engineer – Assists in the performance of studies and analyses of the engineering-related areas including valuation, depreciation, cost of service, quality and reliability of service as they apply to fixed utilities. Assists in reviewing, comparing and performing analyses in specific areas of valuation engineering and rate structure including valuation concepts, original cost, rate base, fixed capital costs, inventory processing, excess capacity, cost of service, and rate design.

06/2008 – 09/2008
Akens Engineering, Inc. - Shiremanstown, Pennsylvania

Civil Engineer – Responsible, primarily, for assisting engineers and surveyors in the planning and design of residential development projects.

10/2007 – 05/2008
J. Michael Brill and Associates - Mechanicsburg, Pennsylvania

Design Technician – Responsible, primarily, for assisting engineers in the permit application process for commercial development projects.

01/2006 – 10/2007
CABE Associates, Inc. - Dover, Delaware

Civil Engineer – Responsible, primarily, for assisting engineers in performing technical reviews of the sewer and sanitary sewer systems of Sussex County, Delaware residential development projects.

EDUCATION:

Pennsylvania State University, State College, Pennsylvania
Bachelor of Science; Major in Civil Engineering, 2005

- Attended NARUC Rate School, Clearwater, FL
- Attended Society of Depreciation Professionals Annual Conference and Training

TESTIMONY SUBMITTED:

I have testified and/or submitted testimony in the following proceedings:

1. Clean Treatment Sewage Company, Docket No. R-2009-2121928
2. Pennsylvania Utility Company – Water Division, Docket No. R-2009-2103937
3. Pennsylvania Utility Company – Sewer Division, Docket No. R-2009-2103980
4. UGI Central Penn Gas, Inc., 1307(f) proceeding, Docket No. R-2010-2172922
5. PAWC Clarion Wastewater Operations, Docket No. R-2010-2166208
6. PAWC Claysville Wastewater Operations, Docket No. R-2010-2166210
7. Citizens' Electric Company of Lewisburg, Pa, Docket No. R-2010-2172665
8. City of Lancaster – Bureau of Water, Docket No. R-2010-2179103
9. Peoples Natural Gas Company LLC, Docket No. R-2010-2201702
10. UGI Central Penn Gas, Inc., Docket No. R-2010-2214415
11. Pennsylvania-American Water Company, Docket No. R-2011-2232243
12. Pentex Pipeline Company, Docket No. A-2011-2230314
13. Peregrine Keystone Gas Pipeline, LLC, Docket No. A-2010-2200201
14. Philadelphia Gas Works 1307(f), Docket No. R-2012-2286447
15. Peoples Natural Gas Company LLC, Docket No. R-2012-2285985
16. Equitable Gas Company, Docket Nos. R-2012-2312577, G-2012-2312597
17. City of Lancaster – Sewer Fund, Docket No. R-2012-2310366
18. Peoples TWP, LLC 1307(f), Docket No. R-2013-2341604
19. UGI Penn Natural Gas, Inc. 1307(f), Docket No. R-2013-2361763
20. UGI Central Penn Gas, Inc. 1307(f), Docket No. R-2013-2361764
21. Joint Application, Docket Nos. A-2013-2353647, A-2013-2353649, A-2013-2353651

OFFICE OF SMALL BUSINESS ADVOCATE

SET I INTERROGATORIES

OSBA-I-16 Reference Schedule Act 11, page 1 of 1, of Exhibit 1-A Water Base. Assume that the Commission awards the Company 90% of its total requested revenue requirement in each of its water and wastewater divisions.

a. Given the above hypothetical, please explain how/if the Company would propose to scale back its proposed revenues in each of its *wastewater* divisions.

b. Given the above hypothetical, please explain how/if the Company would propose to scale back its proposed revenues in its Shenandoah water division.

c. Given the Company's response to parts (a) and (b), please explain in detail the Company would propose to scale back its proposed Water Base Operations *class* revenues shown in Schedule A, page 1 of 1, column 9, of Exhibit No. 5-A, Part I.

RESPONSE

a. For Wastewater Base Operations and Lower Makefield, the Company would scale back Act 11 contributions to each of its wastewater divisions. For East Whiteland, the Company would first scale back Act 11 contributions and then scale back rates commensurate with the revenue requirement.

b. For Shenandoah Water Operations, the Company would ideally scale back the contribution from the Water Base Operations but would maintain that the proposed Shenandoah customer charges continue to equal the proposed Zone 1 customer charges as originally proposed.

c. After calculating the revised Act 11 contributions, the revised contribution to Shenandoah, and after reviewing the decrease to the revenue requirement, the Company would scale back the rates by customer class to continue to move revenues under proposed rates toward the cost of service by customer class.

INTRODUCTION

Q. ARE YOU THE SAME ETHAN CLINE THAT SUBMITTED DIRECT TESTIMONY IN THIS CASE ON AUGUST 16, 2024?

A. Yes. I submitted I&E Statement No. 3 and I&E Exhibit No. 3 on August 16, 2024.

Q. WHAT IS THE PURPOSE OF YOUR SURREBUTTAL TESTIMONY?

A. The purpose of my surrebuttal testimony is to respond to the rebuttal testimony submitted by witnesses on behalf of Aqua Pennsylvania Water, Inc. and Aqua Pennsylvania Wastewater, Inc. ("Aqua" or "Company"): William C. Packer (Aqua St. No. 1-R), Christopher E. Manning (Aqua St. No. 3-R), and Constance E. Heppenstall (Aqua St. No. 5-R). I will also address the rebuttal testimony submitted on behalf of the Office of Consumer Advocate ("OCA") by witness Jerome D. Mierzwa (OCA St. No. 5R) and Office of Small Business Advocate ("OSBA") by witness Roger Cathcart (OSBA St. No. 3).

Q. DOES YOUR SURREBUTTAL TESTIMONY INCLUDE AN EXHIBIT?

A. Yes. I&E Exhibit No. 3-SR contains schedules relating to my testimony.

RATE BASE

FTY AND FPFTY REPORTING

Q. DID YOU HAVE ANY RECOMMENDATIONS REGARDING PLANT ADDITIONS THAT AQUA PROJECTS TO BE IN SERVICE DURING THE FTY ENDING DECEMBER 31, 2024, AND THE FPFTY ENDING DECEMBER 31, 2025?

A. Yes. I recommended that the Company provide I&E and the OCA with an update to Schedule G-2 of Aqua Exhibits 1-A, 1-B, 1-C, 1-D, and 1-E, no later than April 1, 2025, which should include actual capital expenditures, plant additions, and retirements by month for the twelve months ending December 31, 2024, and an additional update for actuals for the year ending December 31, 2025, no later than April 1, 2025. (I&E St. No 3, pp. 4-5).

Q. DID THE COMPANY AGREE WITH YOUR RECOMMENDATION?

A. Yes. On pages 27-28 of Aqua Statement No. 1-R, the Company agreed with my recommendation and stated that it will provide the requested updates.

EAST WHITELAND TOWNSHIP SYSTEM ACQUISITION

Q. WHAT DID YOU RECOMMEND REGARDING THE EAST WHITELAND ACQUISITION?

A. I recommended that any rate base, acquisition costs, expenses, taxes, and any revenue shortfall, including the proposed Act 11 allocation of $3,144,592, be

excluded from this case as premature. (I&E St. No. 3, p. 8).

Q. DID THE COMPANY RESPOND TO YOUR RECOMMENDATION?

A. Yes. The Company disagreed with my recommendation. Specifically, Aqua witness Packer claimed that the Commission supported the Company's purchase, certificates of public convenience were issued, Aqua closed on the transaction on August 12, 2022, and Aqua is currently operating the East Whiteland system as support for the Company's position that it be permitted to increase the rates of the East Whiteland customers as supported by the cost of service. (Aqua St. No. 1-R, pp. 19-20).

Q. DOES MR. PACKER'S EXPOSITION OF THE TIMELINE FOR THE EAST WHITELAND ACQUISITION CHANGE YOUR RECOMMENDATION?

A. No. As I detailed on pages 7-8 of I&E Statement No. 3, Aqua decided to close on the East Whiteland acquisition just 14 days into the 30-day appeal period. The acquisition went through a series of appeals and now sits with the Pennsylvania Supreme Court. Therefore, despite Aqua taking ownership of the East Whiteland system, this acquisition may yet be overturned and the Company's attempt to circumvent the appeals process does not remove the uncertainty surrounding what the Pa. Supreme Court's decision will be and, therefore, including the East Whiteland acquisition in this base rate case is unjust and unreasonable.

WASTEWATER RATE ZONES

Q. DID YOU RECOMMEND ANY CHANGES TO AQUA'S PROPOSED RATE ZONE CONSOLIDATIONS?

A. Yes, my recommended adjustments to Aqua's proposed rate zone consolidations are discussed on pages 9-42 of I&E Statement No. 3 and summarized in the following table:

Present Rate Zone	I&E Proposed Rate Zone
Rate Zone 1	Merge with Rate Zone 1
Rate Zone 7	
Rate Zone 8	
Rate Zone 1A	Move customer charge towards RZ 1
Rate Zone 2	Merge into one Rate Zone
Rate Zone 3	
Rate Zone 4	Merge into one Rate Zone
Rate Zone 5	
Rate Zone 9	Merge into one Rate Zone
Rate Zone 10	
Rate Zone 12	Merge into one Rate Zone
Rate Zone 14	
Rate Zone 6	Move usage Rates toward RZ 1
Rate Zone 11	Set EDU charges equal to RZ 1
Rate Zone 13	No change

Q. DID ANY PARTIES DISAGREE WITH YOUR WASTEWATER RATE ZONE RECOMMENDATIONS?

A. Yes. Aqua witnesses Heppenstall and Packer, OCA witness Mierzwa, and OSBA witness Cathcart each disagreed with my Rate Zone recommendations.

Q. WHY DID MS. HEPPENSTALL DISAGREE WITH YOUR RATE ZONE RECOMMENDATIONS?

A. Ms. Heppenstall disagreed with my rate recommendations for several reasons. First, she opposed my recommendation because it resulted in monthly bills larger than $100 where the Company's proposal does not. Second, she compared the overall increases to the wastewater customers as a result of each proposal and stated that the Company's Act 11 allocation is equivalent to approximately $2.90 per month. Third, she disagreed with my position that higher increases for Rate Zones 9, 10, 12, and 14 are justified because they were acquired under Section 1329. (Aqua St. No. 5-R, pp. 8-10).

Q. WHAT BASIS DID MS. HEPPENSTALL PROVIDE FOR THE COMPANY'S ATTEMPT TO LIMIT MONTHLY RESIDENTIAL BILLS TO A LEVEL LESS THAN $100 PER MONTH?

A. Ms. Heppenstall provided no basis or support for the Company's goal to limit monthly residential bills to a level less than $100 per month.

Q. DO YOU AGREE WITH THE COMPANY'S $100 MONTHLY BILL LIMIT?

A. No. The proposed $100 monthly bill limit only serves to increase the Act 11 subsidy allocated to water customers as the costs of the wastewater systems are quickly outpacing the $100 per month revenue. Furthermore, as shown on the

summary of wastewater Rate Zone 1 residential increase schedule, attached as I&E Exhibit No. 3-SR, Schedule 1, it is not consistent with the $133.16 monthly bill for a residential wastewater customer using 4,000 gallons per month recently approved by the Commission for Pennsylvania-American Water Company ("PAWC") wastewater customers. Therefore, this proposed $100 monthly bill limit is without merit and should be rejected.

Q. WHAT OVERALL INCREASE TO THE WASTEWATER CUSTOMERS DID MS. HEPPENSTALL CLAIM IS A RESULT OF YOUR RATE DESIGN?

A. Ms. Heppenstall claimed that my rate design creates an overall increase to wastewater customers of 45.22% as compared to the Company proposed increase of 20.09%

Q. IS MS. HEPPENSTALL'S DESCRIPTION OF YOUR POSITION ACCURATE?

A. No. As shown in the exhibit to accompany my direct testimony I&E Exhibit No. 3-SR, Schedule 8, the total wastewater revenue under present rates, including East Whiteland and Lower Makefield is $72,821,516 ($57,682,604 + $11,613,830 + $3,525,082) and I&E's proposed increase is $25,937,164 ($21,116,507 + $4,820,657 + $0). This results in a proposed total increase to wastewater customers of 35.6% and not the 45.22% as described by Ms. Heppenstall.

Q. PLEASE DISCUSS THE ACTUAL IMPACT OF THE ACT 11 SUBSIDY.

A. No. Ms. Heppenstall's representation of the impact of the Act 11 subsidy leaves out the important distinction. This $2.90 per month is *in addition to* the rate increase already being allocated to water customers. I believe it is a reasonable goal to make this addition to water customer bills as small as reasonably possible so that wastewater customers can be assisted while water customers are minimally impacted.

Q. WHY DOES MS. HEPPENSTALL DISAGREE WITH YOUR POSITION THAT HIGHER INCREASES FOR RATE ZONES 9, 10, 12, AND 14 ARE JUSTIFIED?

A. Ms. Heppenstall pointed to several rate zones acquired under Section 1329 that have had their rates increased in prior rate cases and pointed to Rate Zones 9 and 10 that received increases of 68% and 75%, respectively, which were higher than the Rate Zone 1 average residential increase of 48% in Aqua's last base rate case. She further stated that at some point these customers should be treated as any other customer group and not be treated as outliers. (Aqua St No. 5-R, p. 10).

Q. PLEASE RESPOND TO MS. HEPPENSTALL.

A. Generally, though not in every case, systems acquired through the Section 1329 process are being charged rates at the time of acquisition that are far below Aqua's Rate Zone 1 rates and far below the systems cost to serve. Therefore, until the

rates of those rate zones are set equal to Rate Zone 1, those customers are receiving subsidies both from wastewater customers and water customers through Act 11 allocations. Additionally, the only way to move these rate zones towards Rate Zone 1 rates is to allocate increases higher than those of Rate Zone 1. Until these rates are closer to Rate Zone 1, and the subsidy is reduced, these customer groups are outliers and should receive higher rate increases than Rate Zone 1 in order to continue movement towards Rate Zone 1.

Q. WHY DID MR. PACKER DISAGREE WITH YOUR RATE ZONE RECOMMENDATIONS?

A. Mr. Packer disagreed with my rate zone recommendations because the Company is only requesting a 20% shift of wastewater revenue to water customers, which he believes is a reasonable allocation because it is less than what the Company has requested in previous cases. (Aqua St. No. 1-R, p. 18).

Q. PLEASE RESPOND TO MR. PACKER.

A. First, on page 18 of Aqua Statement No. No. 1-R, Mr. Packer stated the Commission approved a 16.83% Act 11 allocation in Aqua's last base rate case and an 11.2% Act 11 allocation in PAWC's last base rate case. This shows that the Company is requesting a higher level of Act 11 allocation than what the Commission has permitted in recent cases. Second, I do not believe that the Act 11 allocation should be determined on the percentage of water or wastewater

revenue. Instead, the allocation amount should be based first on determining the appropriate rates for wastewater customers based on cost of service and ratemaking principles and then allocating any remaining revenue shortfall, which should be kept to a minimum, to water customers.

Q. WHY DID THE OCA AND OSBA DISAGREE WITH YOUR WASTEWATER RATE RECOMMENDATIONS?

A. The OCA and OSBA disagreed with my wastewater rate recommendations for similar reasons. Specifically, the OCA indicated that the increases I proposed for Rate Zone 7, 9, 10, 12, and 14 were too large and could cause rate shock. (OCA St. No. 5R, pp. 5-6). The OSBA raised similar concerns of rate shock for commercial customers in Rate Zones 9, 10, 12, and 14, expressed doubt regarding the benefit Section 1329 customers receive from such acquisitions, and recommended setting a cap equal to 1.25 times the proposed average increase to Rate Zone 1's respective customer classes. (OSBA St. No. 3, pp. 7).

Q. DO YOU WISH TO CHANGE YOUR RATE ZONE RECOMMENDATIONS?

A. Yes. I acknowledge that the rate proposals I made in my direct testimony were aggressive. Therefore, I am recommending a slight adjustment to the usage rates I recommended in direct testimony as shown in I&E Exhibit No. 3-SR, Schedules 2-5 and the updated customer class increases are shown on I&E Exhibit No. 3-SR,

Schedule 6. These schedules are summarized in the table below (the rates shown are per hundred gallons).

	I&E Direct		I&E Surrebuttal	
Rate Zone and Class	Usage Rates	Increase	Usage Rates	Increase
Rate Zone 9 Residential	$1.700	79.6%	$1.200	48.2%
Rate Zone 9 Commercial	$1.500	66.0%	$1.200	48.5%
Rate Zone 9 Industrial	$1.500	64.2%	$1.200	47.8%
Rate Zone 9 Public	$1.500	78.8%	$1.200	53.6%
Rate Zone 10 Residential	$1.700	67.0%	$1.200	37.8%
Rate Zone 10 Commercial	$1.500	87.4%	$1.200	52.6%
Rate Zone 12 Residential	$1.500	51.6%	$1.2918	40.2%
Rate Zone 12 Commercial	$1.500	22.6%	$1.2918	11.3%
Rate Zone 12 Public	$1.500	86.6%	$1.2918	63.5%
Rate Zone 14 Residential	$1.500	63.3%	$1.306	47.1%
Rate Zone 14 Commercial	$1.500	81.3%	$1.200	77.5%

Q. DO YOU BELIEVE YOUR UPDATED RATE RECOMMENDATIONS HAVE MITIGATED THE CONCERNS REGARDING RATE SHOCK?

A. Yes. As discussed above, Aqua witness Heppenstall pointed to the Company's last base rate case in Rate Zones 9 and 10 that received increases of 68% and 75% (Aqua St. No. 5-R, p. 10). Therefore, my updated recommendations are within the range that the Commission deemed acceptable in the last base rate case. While my updated recommendations result in fewer consolidated rate zones, I believe they succeed in moving all rate classes closer to Rate Zone 1 while limiting the revenue shortfall needed to be allocated to the water customers through Act 11.

Q. WHAT IS THE ACT 11 ALLOCATION THAT RESULTS FROM YOUR UPDATED RATE RECOMMENDATIONS?

A. As shown on I&E Exhibit No. 3-SR, Schedule 7, my recommended adjustment to certain rate zones results in an increase of $5,955,675 to the Act 11 allocation from my direct position of $3,547,092 to my updated recommendation of $9,502,767.

Q. ARE THERE ANY OTHER STATEMENTS FROM THE PARTIES YOU WISH TO ADDRESS?

A. Yes. On page 8 of OSBA Statement No. 3, Mr. Cathcart stated "Aqua should provide a multi-year plan to implement rate consolidation to the acquired communities' systems."

Q. PLEASE RESPOND TO THE OSBA'S STATEMENT.

A. Mr. Cathcart's statement regarding a multi-year plan to implement rate consolidation is vague and unsupported. Based on this one sentence, it is not possible to determine whether the OSBA is requesting a plan to be implemented as part of the present base rate case, whether the plan should take place over several base rate cases, or whether the OSBA is requesting Aqua submit a multi-year rate plan as part of its next base rate case. Therefore, based on the lack of detail, support, or any information at all for the OSBA's statement, it should be disregarded.

FORFEITED DISCOUNTS

Q. WHAT DID YOU RECOMMEND CONCERNING THE FORFEITED DISCOUNTS IN WASTEWATER BASE OPERATIONS AND WASTEWATER LOWER MAKEFIELD UNDER PROPOSED RATES?

A. I recommended that the forfeited discounts under proposed rates be calculated at the same percentage of total billed revenue as they are under present rates. I also recommended that the forfeited discounts claim under proposed rates should be adjusted respective to the final billed revenue amount ultimately approved by the Commission. (I&E St. No. 3, pp. 44-45).

Q. DID THE COMPANY RESPOND TO YOUR RECOMMENDATION?

A. Yes. Aqua witness Heppenstall agreed with my recommendations. (Aqua St. No. 5-R, pp. 10-11).

WATER - SHENANDOAH ADJUSTMENTS

Q. WHAT PRESENT AND PROPOSED RATE REVENUE DID YOU RECOMMEND FOR SHENANDOAH WATER?

A. I recommended the increase to Public Fire be reduced by $26,145 from $26,650 to $505. I also recommended that the allocation between the Main Water Division and Shenandoah Water shown on Aqua Exhibit 1-A, Schedule Act 11 be reduced by $457,103 from 1,465,540 to $1,008,437. (I&E St. No. 3, p. 46).

Q. WHAT USAGE RATES DID YOU RECOMMEND FOR THE SHENANDOAH RESIDENTIAL CLASS?

A. I recommended the residential usage rates proposed by the Company be increased to be equal to the residential usage rates in Rate Zone 1, or $1.7349 per hundred gallons for the first block and $2.0540 per hundred gallons for the second block. (I&E St. No. 3, p. 48).

Q. WHAT INCREASE WILL THE AVERAGE SHENANDOAH RESIDENTIAL CUSTOMER USING A 5/8-INCH METER EXPERIENCE UNDER YOUR PROPOSAL?

A. The bill for an average Shenandoah Residential customer using a 5/8-inch meter will increase from $56.14 per month to $97.01 per month, which is an increase of $40.87 per month or 72.79% (I&E Ex. No. 3, Sch. 21).

Q. DID THE COMPANY RESPOND TO YOUR RECOMMENDATION?

A. Yes. Although Ms. Heppenstall stated that she has no argument with my recommendation regarding the Shenandoah Public Fire, she disagreed with my recommendation regarding the Shenandoah residential rate increase for several reasons. Ms. Heppenstall bases her opposition on the Company's cost of service study for the Shenandoah operations which shows that the Company's recommendation slightly reduces the percentage of costs paid by the residential

class while my recommendation slightly increases the percentage of costs paid by the residential class. (OCA St. No. 5-R, pp. 7-8).

Q. DO YOU AGREE THAT THE RESULTS OF THE SHENANDOAH COST OF SERVICE STUDY MEANS YOUR RECOMMENDATION SHOULD BE REJECTED?

A. No. While I did not oppose the Company's cost of service study and acknowledge that my recommendation does slight move away from the cost of service determined by that study, I also recognize that the guidance provided by the Shenandoah cost of service study is limited. Shenandoah's cost of service study does not supersede the main water cost of service study or the goal of consolidating rate classes. As I stated on page 48 of I&E Statement No. 3, my recommendation is to set the residential usage rates equal to the residential usage rates in Rate Zone 1, which functionally merges the Shenandoah residential class with that of Rate Zone 1. I believe this consolidation is sufficient reason to allow a slight deviation for the Shenandoah cost of service study and, as such, I continue to recommend the Shenandoah residential rates be set equal to the water Rate Zone 1 rates.

Q. DID ANY OTHER PARTY OBJECT TO YOUR RECOMMENDATION REGARDING THE SHENANDOAH RATES?

A. Yes. OCA witness Mierzwa objected to my recommendation based on the

concept of gradualism and the possibility of rate shock. (OCA St. No. 5R, p. 7).

Q. DO YOU AGREE WITH THE OCA'S OBJECTION?

A. No. As I stated on page 49 of I&E Statement No. 3, I believe that this increase is reasonable for three reasons. First, because it fulfills the goal of setting the residential rates equal to Rate Zone 1, which is the ultimate goal for all of Aqua's rate zones. Second, increasing the proposed rates for the Shenandoah residential class reduces the subsidy being applied from the Shenandoah customers to Aqua's other water customers and mitigates the necessary rate increase for those customers. Finally, my recommendation, while admittedly a large percent increase, remains comparable to the rate increases proposed by Aqua for the other Shenandoah rate classes as shown on Aqua Exhibit 5-A, Part II, pp. 21-22. It is for these reasons that I continue to recommend the Shenandoah residential rates be set equal to the water Rate Zone 1 rates.

SCALE BACK OF RATES

Q. DID YOU RECOMMEND ANY CONDITIONS BE APPLIED TO THE COMPANY'S STATED SCALE BACK METHODOLOGY?

A. Yes, I recommended the condition that any rates, whether under my recommendations or the Company's proposals, that either receive no increase, are being decreased prior to the scale back, or are below their respective Rate Zone 1 rates should be excluded from any scale back of rates. (I&E St. No. 3, p. 50).

Q. DID THE COMPANY RESPOND TO YOUR RECOMMENDATION?

A. Yes. The Company agreed with my recommendation. (Aqua St. No. 5-R, pp. 13-14).

Q. DOES THIS CONCLUDE YOUR SURREBUTTAL TESTIMONY?

A. Yes.

REVISED Direct Testimony & Exhibits
of
Jason Hails
of
Quantiv Advisory, LLC

on behalf of

Pennsylvania Office of Small Business Advocate

August 23, 2024

Topics:
Rate of Return

Date Served: August 16, 2024 / August 23, 2024 (REVISED)

Date Submitted for the Record: _____

REVISED DIRECT TESTIMONY OF JASON HAILS

Q. Please state your name and business address.

A. My name is Jason Hails, and my business address is 925 Wappoo Rd., Suite A, Charleston, South Carolina 29407.

Q. By whom are you employed and in what capacity?

A. I am the Co-Founder and a Member of Quantiv Advisory, LLC. Quantiv is a private consulting firm specializing in the provision of financial and operational analysis and regulatory expertise in the Energy and Utility sector.

Q. On whose behalf are you testifying in this hearing?

A. Our testimony is sponsored by the Pennsylvania Office of Small Business Advocate ("OSBA").

Q. Please describe your professional experience and qualifications.

A. My education and employment background is attached as Exhibit QA-2JH.

Q. Have you previously testified before this Commission?

A. I have testified recently before the Commission in Docket No. A-2023-3041695, the proposed Acquisition by Aqua of the wastewater system Assets of the Greenville Sanitary Authority.

Q. What is the subject of your testimony?

A. I am evaluating Aqua's proposed rate of return, specifically the cost rate of equity in the determination of Aqua's revenue requirement.

Q. Please summarize your recommendations.

A. Based on our examination of the Company's filings and discovery answers, we recommend that the Commission:

- Reduce the cost rate of equity in Aqua's rate of return proposal.

Cost Rate of Equity

Q. How is Aqua calculating its proposed rate of return?

A. In Schedule A-4 of Aqua's application[1], Aqua is proposing a 7.90% Rate of Return. This rate of return is based on Mr. Moul's cost of equity determination of 10.95% as follows[2]:

Aqua Proposed Rate of Return Calculation			
Type of Capital	Ratios	Cost Rate	Weighted Cost Rate
Long-Term Debt	46.05%	4.32%	1.99%
Common Equity	53.95%	10.95%	5.91%
	100.00%		7.90%

Q. Do you have any comments on Aqua's proposed rate of return?

[1] Aqua Application, Exhibit 1-A, Schedule A-4, Line 4.
[2] AP Exhibit 4-A, Page 36 of 85, Line 14.

A. Yes. Having reviewed the Application and Mr. Moul's evidence, and given Aqua's proposed overall rate increase of 18.88%, we believe Aqua's proposed rate of return is based on a cost of equity rate that is unreasonably high.

Q. What is your recommendation for the establishment of the cost rate of equity?

A. Mr. Moul proposes a range of indicated cost of equity from 10.58% using a DCF approach to 13.80% using a CAPM approach. Cost rates within that range are shown to be 11.50% and 12.90% for Risk Premium and Comparable Earnings approaches, respectively. While Aqua is proposing to use a 10.95% cost of equity rate, which is at the lower end of the range, it is our position that with such a large one-time increase in overall rates, Aqua's approved cost of equity rate should be no more than the 10.58% or the low end of the range.

Further, we propose that the Commission consider, at a minimum, reducing 10.58% cost rate by Mr. Moul's implied upward adjustment for management performance. While Mr. Moul stated that he has not quantified the increment for management performance[3], we assume the range proposed by Mr. Moul embed an implied increment for management performance. This assumption is supported by Mr. Moul's prior record of case recommendations[4], whereby his management adjustments for the 26 cases (from January 2018 to March 2024) show adjustments in the categories of: a positive percentage; zero percent; or "not defined". It is also noteworthy that Mr. Moul applied a

[3] AP Exhibit 4-A, Page 41 of 85, Lines 16-17.
[4] IR OCA 1-17, Attachment 1.

management performance increment for 23 of the 26 cases, including 18 cases with management performance increments from 0.12% to 0.25%, and 5 cases with increments "not defined". With our review and Mr. Moul's statement, we interpret that Mr. Moul has applied a management performance adjustment "not defined" in this case.

We object to the application of a management performance adjustment, as it is our expectation that management effectiveness in running a large utility is a fundamental expectation of its customers and other stakeholders. Rewarding the company for achievement of a standard expectation for performance does not strike an appropriate balance between customer needs (including public acceptability and rate stability) and Bonbright's fair return standard[5], particularly in light of the large increase in rates proposed by Aqua in this case.

Our recommendation is that the cost of equity rate is further reduced from 10.58% by (at a minimum) an implied management performance adjustment rate that was added by Mr. Moul. In an effort to calculate this reduction, we calculated the average of Mr. Moul's 18 quantified management performance adjustments from his prior cases, which is 0.21% (rounded)[6]. This figure was then subtracted from the 10.58% starting point, resulting in a cost rate of equity of 10.37%. The comprehensive results of our analysis, including the impact on Net Utility Operating Income, is shown below:

[5] Bonbright, James C., Principles of Public Utility Rates, Columbia University Press, New York, NY, page 291.
[6] Cumulative total management performance adjustments of 18 cases = 382 basis points. 382/18 = 21.22 or 0.2122%.

Aqua Rate of Return Calculation - OSBA Analysis					
Aqua Proposed Rate of Return Calculation					
Type of Capital	Ratios	Cost Rate	Weighted Cost Rate	Net Utility Operating Income	Difference from Aqua Proposed
Long-Term Debt	46.05%	4.32%	1.99%		
Common Equity	53.95%	10.95%	5.91%		
	100.00%		7.90%	$ 340,996,224	$ -
Using Moul DCF Cost Rate for Common Equity					
Type of Capital	Ratios	Cost Rate	Weighted Cost Rate		
Long-Term Debt	46.05%	4.32%	1.99%		
Common Equity	53.95%	10.58%	5.71%		
	100.00%		7.70%	$ 332,387,138	$ (8,609,086)
Using Moul DCF Rate minus Implied Management Performance Adjustment (using 21.22 basis points)*					
Type of Capital	Ratios	Cost Rate	Weighted Cost Rate		
Long-Term Debt	46.05%	4.32%	1.99%		
Common Equity	53.95%	10.37%	5.59%		
	100.00%		7.58%	$ 327,443,527	$ (13,552,697)
* Average of Mr. Moul's Quantified Management Performance Adj. Amounts in Prior Cases					

Q. If the recommendation to reduce the cost rate of equity is adopted, resulting in a reduction in the revenue requirement, how should the reduction in revenue requirement be allocated?

A. In the event that revenue requirement is reduced for the cost rate of equity or any other factor, we recommend that the class increases shown in OSBA Schedule Q-4 (W) Column 2 (excluding Public Fire Protection and Contract Sales), be scaled back proportionately based on each class' proportion of the total "OSBA Recommended Increase".

Q. Does this conclude your testimony?

A. Yes.

Resume and Expert Testimony List

of

Jason Hails

QUANTIV ADVISORY, LLC
STRATEGY. OPERATIONS. VALUATION.

Jason Hails, MBA
Co-Founder and Director

Consulting Executive Profile

Quantiv Advisory, LLC

- Jason is a Co-Founder and Director of Quantiv Advisory, LLC, a boutique Consulting firm. established in 2021, providing professional services to support our clients' growth, efficiency and compliance mandates.
- Quantiv is focused primarily on strategy, financial and operational advisory services and business quantification to small, medium and large enterprise and energy/utility companies and market participants.
- With offices in Charleston, SC, Nashville, TN, and the Toronto region, Quantiv serves clients across North America.
- Quantiv utilizes a network of close-knit subcontract professionals to ensure we bring the right people with the right skills to provide quality client service and value for money.
- Quantiv's delivery model is based on collaboration, discipline and objectivity. Quantiv works with its clients to bring business and technical insight to mission-critical initiatives and decision-making.

MNP LLP and Prior

- In May 2021 Jason retired as a 13-year direct-admit Partner with MNP LLP, located first in Calgary, AB and then for 10 years in the Greater Toronto Area. Led MNP's national Energy & Utilities practice.
- Industry executive with 30 years of progressively responsible experience and over 20 years in the Energy, Utilities and Natural Resource sectors.
- MNP LLP, a member of the Praxity global network of Firms, is a Canadian audit, tax and consulting services Firm with over 8,000 Staff and Partners across Canada, generating over $1.5 Billion (Cdn) in gross revenue – a seven-fold increase in revenue since joining the Firm in 2008.
- For the last 22 years with professional service firms, led the development and execution of business unit and practice strategy; business development and sales; and led client engagements primarily in Consulting, Enterprise Risk and Transaction Services.
- In addition to Energy & Utility clients, worked extensively within other sectors, including all levels of Government, Mining, Oil & Gas, Pipelines, Software, Manufacturing, Transportation, Retail, Software/Digital and Not-for-Profit.
- Prior to MNP, worked in a Big-4 environment for 5 years, and previously with several Energy companies, including ENMAX Corporation (Alberta-based integrated utility) and Superior Propane. Early career experience included various sales and operations roles.

Clients

- Government clients have included numerous Departments and Agencies at the Federal, Provincial/State and Municipal levels, and over 40 Energy/Resource/Utility companies in Canada and the US and several dozen companies outside the Energy sector; all ranging in size from small Technology startups to resource companies with $80 billion in Assets.
- In the Energy Sector, worked with electric/gas utilities and oil & gas companies, independent power producers, electricity system operators and energy regulators, providing analysis and advice to leverage growth opportunities, mitigate risk and assess/improve efficiency and effectiveness.
    - Larger Energy and Utility sector clients have included Duke Energy, PG&E, Kinder Morgan, Enbridge Inc., Enbridge Gas, BC Hydro, Hydro One, Hydro Ottawa, ENMAX, EPCOR, Manitoba Hydro, Fortis, SaskPower, Boralex, SNC-Lavalin T&D, Water Security Agency of Saskatchewan, City of Markham Water Department.

Leadership

- Developed and led MNP's Energy & Utilities cross-service-line Niche team of 25 across the country.
- For 3 years led MNP's Eastern Canada Consulting growth efforts with a team of 40 Consultants in 2017. Jason has been an integral part of MNP's leadership team to build these practices from the ground up over the past 12 years, with group revenues in the current range of $60M.
- Success can be attributed to Jason's ability to expertly develop fit-for-purpose strategy and analytics, identify and refine critical paths for execution of strategy, and influence all Stakeholders (Clients, Peers and Staff) to drive towards common, timely and favorable outcomes.
- Credibility has grown in the industry by delivering consistently high-quality client solutions; solidifying his reputation among Board and Senior Executive teams and by maintaining a strong cross-industry community presence through industry associations and events.

Employment History

Quantiv Advisory, LLC – Co-Founder and Director - 2021 to current
Nashville, TN and Charleston, SC

Within a boutique Advisory firm environment with a small team, delivering financial and operational solutions to support our Clients' growth, efficiency and compliance mandates. First year engagements having included developing growth strategies, internal audit, performance improvement and regulatory services in the Energy, Transportation and Technology sectors.

Employment History

MNP LLP – Partner – 2008 to 2021
(Calgary, Alberta to 2011 and Toronto, Ontario from 2011 to 2021)

Jason's leadership of MNP's Energy & Utilities niche is a cross-service line role, selling and delivering engagements across all lines of MNP business. Over the past 12+ years with MNP, Jason's work has been primarily comprised of:

- Enterprise Risk Services (ERS) – Enterprise Risk Management, Internal Audit, Internal Controls.
- Consulting – Financial Advisory, Regulatory, Governance Technology Services, Capital Projects, Procurement and Operations Strategy.
- Transaction Services – Financial and Commercial Due Diligence, Business Development, Valuations.

Jason led or assumed an otherwise significant role in over 300 engagements with MNP. Roles within these engagements included Business Development Lead, Engagement Partner, Quality Assurance Partner or Subject Matter Expert. Given this diverse involvement, representative experience at MNP is highlighted functionally below.

<u>Enterprise Risk Services</u>

- Coordinating joint delivery teams (consisting of Energy Consulting and ERS staff) for risk-related projects in many sectors.
- Development, implementation and evaluation of revenue, financial and system controls (ICFR, ITGCs) for numerous large entities across a variety of sectors.
- Conducted internal audits/reviews of system implementation projects (including SAP CRB, Oracle Cloud).
- Presented audit findings numerous times to Senior Executive, Audit Committee and Board of Directors.
- Conducted Enterprise Risk Management assessments for many companies. Advise on cybersecurity, business resilience, emerging risks and mitigation strategies.

<u>Consulting</u>

- Led numerous engagements to enhance the efficiency and effectiveness client operating environments, across many business disciplines. Undertaken numerous process improvement projects targeting efficiency and effectiveness in areas such as finance function, procurement, and vendor management (procure-to-pay), supply chain, capital project delivery, field services/customer connections, financial operations, billing and customer service (order to cash), etc.
- Participated in numerous Technology Implementations, including Enterprise, Billing and Customer Interface and Analytics. Roles have included Project Lead, Quality Assurance Lead, Internal Auditor and other support functions throughout the implementation lifecycle.

Employment History

- Worked extensively in the regulatory environment and has appeared as an acknowledged expert witness in four jurisdictions. Regulatory expertise includes all manner of cost of service, cost allocation, benchmarking and complex financial analysis/modeling.
- Assessments of operations and shared services costs have included exhaustive research, comparative analysis and benchmarking across sectors and jurisdictions. Analysis has required a strong understanding and normalization of localized market factors and the drivers of industry-specific performance/results.

Transaction Services

- Extensive experience with the evaluation of business expansion or divestiture opportunities.
- Transactions services have included:
    - Financial and commercial due diligence for the acquisition of projects, assets, businesses.
    - Asset valuation and impairment tests.
    - Business planning (feasibility, development economics, financial modeling and discounted cashflow analysis, business case, executive presentation) to justify corporate investments.
- Also worked with numerous early-stage companies, assessing market opportunities, positioning for growth and securing funding.
- Post-merger integration planning and execution.

Leadership

- Completed MNP's multi-year Partner leadership development program.
- In a practice and people leadership role since joining MNP, leading MNP's Energy & Utilities niche, and having until recently led MNP's Consulting team in Ontario/Quebec, including Administrative staff, Consultants and Partners.
- Worked successfully across regions and service lines to build relationships and influence decision making to achieve corporate/Firm goals. Strong advocate for his staff, and able to inspire alignment between the Firm and the individual's professional interests.

Employment History

KPMG – Senior Manager, Advisory Services – 2007 to 2008 – Calgary, Alberta

- Senior Manager primarily within Enterprise Risk group, focused in the Energy sector and specifically Energy & Resources sectors in Western Canada. Role include the coaching and mentoring of staff, and contribution to the development of the go-to-market strategy for KPMG's Operational Advisory group.
- Conducted an ERM assessment for a large Energy company and developed/implemented a risk-based approach to internal controls for a National Railway and for a leading Telco.

- Conducted an audit (Specified Procedures) to review and implement upgrades to a large client's internal control (ICFR) program, including governance and oversight.
- Review and recommendations to improve accountability and transparency with the Alberta Royalty Regime.

PwC – Director, Advisory Services – 2005 to 2007 – Calgary, Alberta

- Worked within PwC's Advisory group in Consulting and Deals, inclusive of risk, consulting and corporate finance.
- Developed, managed and executed internal control compliance and optimization programs for a number of large integrated utilities, including ENMAX, EPCOR (including Capital Power), Fortis BC, Duke Energy, Pacific Gas & Electric. Similar work conducted for an upgrader and a downhole tools manufacturer.
- Conducted detailed financial due diligence for approximately 10 deals in the Energy and other sectors, including upstream oil and gas, oilfield services and technology companies.

- **BearingPoint** – Manager, Advisory Services – 2003 to 2005 – Calgary, AB
- **ENMAX Corporation** – Manager, Business Development – 2001 to 2003 – Calgary, AB
- **Superior Propane** – Financial Analyst, Merger Integration Team – 1999 to 2001 – Calgary, AB
- **Ernst & Young** – Staff Accountant – 1994 – Calgary, AB
- Various Industry Business Development and Operational Roles – 1993, 1995 to 1999 – Calgary

Regulatory Experience

Support

- Currently engaged as a Board Financial Expert Witness in the review of New Brunswick Power's 2025 and 2026 General Rate Application.
- Conducted numerous reviews and filed evidence for various cost of service and regulatory asset matters for ENMAX, EPCOR, Enbridge Gas, Gazifere and very recently Liberty Gas New Brunswick (2023) as an Acknowledged Expert (detailed assessment of Inter-affiliate costs).
- Quality Review Partner for MNP's Macro Environmental Expert Report on behalf of the Manitoba Public Utility Board for the NFAT hearing in 2014 (Keeyask and Conawapa).

Testimony

- Testified before the Nova Scotia Utility and Review Board as a Board Financial Expert for the 2023 General Rate Application proceeding for Eastward Energy (formerly Heritage Gas).
- Testified before the Nova Scotia Utility and Review Board as a Board Financial Expert in the review of the Halifax-Dartmouth Bridge Commission Rate Hearing in 2021.
- Testified before the Regie de l'energie on behalf of Gazifere (Enbridge Inc.) regarding cost allocation (2016).
- I testified before the AUC, with ENMAX regarding Affiliate Transactions, Cost Allocation and Inter-affiliate costs (2014).
- Testified as part of Commission staff with the BCUC on two occasions:

  - One regarding the establishment of a regulatory deferral account to account for hedging long-term debt (2016).
  - One regarding exemptive relief for FortisBC (2015) with information management requirements.
- Also testified as a financial expert representing an intervenor group regarding the Heartland Transmission project (2011), a joint project between EPCOR and AltaLink.

Education and Certification

- B.A. (Hons.) – Economics and Political Science – York University (Toronto) – 1991
- M.B.A. – University of British Columbia – Sauder School of Business (Vancouver) – 1993
- Course - Electric System Operation for the Non-Engineer – Northwest Public Power Association – 2003

Volunteer and Board Involvement

- Treasurer and a Board Member of the Distress Centre in Calgary from 2008 to 2010. The Distress Centre operates 24/7 Crisis Lines, including Counselling, and operates the 211 public service system in Calgary.
- Treasurer and Board Member of the Ontario Sustainable Energy Association from 2013 to 2016.
- Formerly on the Infrastructure Committee, and currently on the Energy Committee of the Toronto Board of Trade up to 2021.

CORRECTED REVISED Direct Testimony
of
Roger Cathcart
of
Quantiv Advisory, LLC

on behalf of

Pennsylvania Office of Small Business Advocate

~~August 23~~September 25, 2024

Topics:
Class Revenue Allocation

Date Served: August 16, 2024 / August 23, 2024 (REVISED) / September 25, 2024 (REVISED)-CORRECTED

Date Submitted for the Record: _____

Q. Please state your name and business address.

A. My name is Roger Cathcart, and my business address is 925 Wappoo Rd., Suite A, Charleston, South Carolina 29407.

Q. By whom are you employed and in what capacity?

A. I am a Senior Regulatory Advisor of Quantiv Advisory, LLC and Principal of Cathcart Advisors, Inc. Quantiv is a private consulting firm specializing in the provision of financial and operational analysis and regulatory expertise in the Energy and Utility sector.

Q. On whose behalf are you testifying in this hearing?

A. Our testimony is being sponsored by the Pennsylvania Office of Small Business Advocate ("OSBA").

Q. Please describe your professional experience and qualifications.

A. My education and employment background is attached as Exhibit QA-4RC.

Q. Have you previously testified before this Commission?

A. Yes, I testified recently before the Commission in Docket No. A-2023-3041695, the proposed Acquisition by Aqua of the wastewater system Assets of the Greenville Sanitary Authority.

Q. What is the subject of your testimony?

A. I am evaluating the propriety of the Company's class revenue allocation proposals for water and wastewater service, and to sponsor changes to such proposals, where appropriate. In doing so, we will also examine the propriety of Aqua's proposed Act 11 revenue requirement.

Q. Please summarize your recommendations.

A. Based on our examination of the Company's filings and discovery answers, we recommend that the Commission:

- Adopt the OSBA's recommended class revenue allocation and associated scale back proposal for water service;
- Adopt the OSBA's recommended adjustments to the Company's proposed wastewater service increases, which increase wastewater revenues in select operating areas;
- Adopt the OSBA's recommended Act 11 revenue requirement of $19.7 million, and its recommended allocation to water service classes.

Class Revenue Allocation

Water Service

Q. Mr. Cathcart, how does Aqua propose to recover its requested increase in water revenues this case?

A. We have attached Schedule Q-1W, which summarizes the Company's proposed class revenue revenues of 18.7% (on Line 11). The proposed increases for each customer class

(on Lines 1-7) range from a low of 6.3% (Private Fire Protection) to 20.6% (Industrial).

Q. How did the Company determine the level of the increase to its contract customers shown on line 9 of Schedule Q-1W?

A. The Company currently serves industrial, public, and reseller consumers through specific contracts with negotiated pricing for water service. Contracts may include annual fee increases for customers over the agreement's term. The Company expects contract customers to receive an average increase of $365,159, or 3.6%, as shown on line 9 of Schedule Q-1W. Aqua has indicated that there are corrections to its contract revenue that will be filed in its rebuttal evidence.[1]

Q. Do the class water increases in column 2 of Schedule Q-1W represent a portion of Aqua's suggested wastewater revenue recovery?

A. Yes. Aqua plans to recover $2~~10.8~~ 9 million in wastewater revenue from water service customers under Act 11 (discussed later in testimony).

Q. What is the Company's proposed revenue, by customer category excluding its proposed allocation of Act 11 revenues?

A. The Company's proposed revenue allocation for water service, excluding Act 11 revenues, is illustrated in Schedule Q-2W. The adjusted system average increase in total water revenues is 15.0% (Line 11), and the individual customer class increases vary

[1] Response to OSBA I-9 (a) and (b), which requested a reconciliation of contract revenue reflected in the Application. Aqua referred to OSBA I-17 Aqua provide Exhibit 5-A Part 2 Water Base and Shandoah.xls schedule RS2 which indicates present contract revenue to be $7,395,339 and proposed revenue at $9,042,462. In response to OSBA-II-9(b) Aqua subsequently corrected the contract revenue amount to $9,841,264.

from a low of 6.3% (Private Fire Protection) to a high of 18.9% (Industrial).

Q. What rate structure guidelines did Aqua rely on to arrive at the proposed revenue allocation for water service shown in Schedule Q-2W?

A. Aqua's representative Ms. Heppenstall, states that the Company's proposed water rate structure should consider the allocated costs of service, the impact of radical changes from the present rate structure, the understandability and ease of application of the rate structure, community and social influences, and the value of service, particularly competitive concerns.[2] However, Ms. Heppenstall also discusses several specific rate design guidelines that were developed through consultation with Company Management:

1) Maintain separate rate divisions for those areas with year-round usage and those areas with seasonal usage;
2) Maintain a low-use block for the residential class at 2,000 gallons per month in each division, and a sixth block for the industrial classification for usage over 10 million gallons per month;
3) Continue movement of those areas with year-round usage toward the Main Division rates;
4) Increase existing Main Division private fire service line rates 14% and private hydrant charges by 0%
5) Increase the existing Public Fire Hydrant rate up to the 25% of cost of service level; and

[2] Statement No. 5 Direct Testimony of Constance E. Heppenstall pg. 11.

6) Move the Shenandoah rate structure to the Main Division rate structure. For those rate divisions with a public fire hydrant rate below $34 per month, propose an increase so that achieving the State-wide rate can be accomplished in two or more rate cases.

Q. Does Ms. Heppenstall indicate that the Company's proposed rate design for water service customers complies with the above guidelines?

A. Yes, she does.

Q. Have you evaluated whether Aqua's proposed class revenue allocation, which excludes Act 11 considerations, effectively moves all rate classes closer to cost in terms of class cost-of-service?

A. Yes, we have examined changes in the levels of water revenue subsidies, by customer class, at present and Company proposed rates.

Q. Why is information about class subsidies relevant here?

A. The Cost Allocation study's findings reveal the extent to which the costs assigned to each rate class are being recouped through the revenues obtained from that class. This is measured in terms of a revenue to cost coverage ratio (RCC).

If a class is not paying the exact amount required for the service, it is either: a) receiving a subsidy (paying less than required, an RCC of less than 1.0); or b) providing a subsidy (paying more than required an RCC of greater than 1.0).

To determine if a class is moving towards a cost of service ratio of 1.0, one must assess

whether the class's current subsidy is increasing or decreasing with the proposed rates. If the current subsidy is increasing, it indicates that the class is heading away from the cost of service, which is not desirable. On the other hand, if the current subsidy is decreasing with proposed rates, the class is approaching the cost of service. The most accurate way to gauge progress towards cost of service is by comparing class subsidies and related RCCs to the current and proposed rates.

Q. Have you calculated the class subsidies and related RCCs associated with Aqua's present and proposed water rates, using the Company's cost-of-service study for its water operations ("WCOSS")?

A. Yes, in Schedule Q-3W.

Q. Please discuss Schedule Q-3W and provide your interpretation of the results.

A. The subsidies set out on Page 1 of Schedule Q-3W are calculated by deducting the cost-of-service-based revenue requirement of each class, excluding the unrecovered cost of wastewater service and Shenandoah subsidy, as measured by the Company's WCOSS, from the total revenue contribution of that class (after accounting for any proposed Act 11 contributions towards wastewater service and Shenandoah subsidy) at the current and proposed rates set by the Company. These calculations provide both a dollar and RCC measure of the discrepancy between the current actual water revenues for a particular class and the revenue levels that would need to be achieved to have equalized class rates of return (RCC of 1.0) based on both the current rates and the rates proposed by the Company.

Page 1 of Schedule Q-3W indicates all classes except Public have moved toward the cost of service under the Company's proposed revenue allocation. The subsidy and RCC calculations are detailed on page 2 of Schedule Q-3W. Aqua's proposal have moved the Public class marginally further away from cost of service.

Q. Are you in agreement with the Company's proposed revenue allocation for water service, exclusive of Act 11 considerations?

A. Yes, since Aqua's revenue allocation proposal has in the main move customer classes closer to their respective cost-based revenue levels. Aqua should consider in a subsequent proceeding an updated Cost Allocation Study, with further movements of the Public (RCC of 1.09), Other Water Utilities (RCC of 3.49) and Private Fire Protection (RCC of 1.154) to cost sufficiency.

Q. Have you prepared a schedule with the OSBA's recommended revenue allocation, including Aqua's proposal to recover $21.9 million in wastewater revenue from water service customers under Act 11?

A. Yes. Schedule Q-4W updates Column 3 to reflect the Company's proposed allocation of $21.9 million in Act 11 revenue responsibility by customer class. The class increases in Columns 4 and 5 can be compared to Aqua's plan, as indicated in Schedule Q-1W. As previously mentioned, if the Commission decides to scale back the requested revenue requirement increase, it should be handled as described in our evidence.

Q. Should the Act 11 revenues assigned to water classes also be subject to scale back at the conclusion of this proceeding?

A. Yes. However, the amount of any such scale back will be dependent upon (i) the level of the Company's awarded wastewater revenue requirement and (ii) the overall level of wastewater rates. Our wastewater related recommendations are discussed in the next section of my testimony.

Wastewater Service

Q. How does Aqua propose to adjust its wastewater service revenues in this proceeding by customer class?

A. Schedule Q-1WW outlines the Company's proposed increases in wastewater revenues by customer class. Aqua plans to increase its existing wastewater income by $14.6 million, or 20.09%.

Q. How do the Company's proposed wastewater increases vary, by wastewater division?

A. Schedule Q-2WW displays Aqua's anticipated wastewater increases per division. The projected increases for each division vary from 14.3% (Base Operations) to 109.4% (East Whiteland Operations).

Q. What portion of Aqua's total claimed wastewater revenue requirement does it propose to recover from its water service customers?

A. Q-3WW indicates that the Company expects to recover $21.851 million in wastewater revenue from water service consumers. The $210.851 million is the shortfall between the Company's claimed wastewater revenue requirement of $109.298 million and planned revenues of $87.448 million. The subsidy represents 20% of wastewater revenue requirement.

Q. How did Aqua calculate that $21.851 million of its claimed wastewater revenue should be recovered from water utility customers?

A. The subsidy is dependent on the level of revenue requested related to each wastewater division relative to its cost to serve that division. In response to OSBA-I-8, Aqua states that it chose to adjust Wastewater Base Operations as a derivative of the proposed increases to Rate Zone 1-12 that were designed achieve consolidation and gradualism. The proposed increase for Lower Makefield was established to consolidate it into Rate Zone 1.

The proposed increase of 109 % to the East Whiteland division toward its cost of service and plans to complete this over two rate cases. Overall Aqua has targeted an overall increase for wastewater operations of 20%. This appears to be a departure from the prior 2023 Base Rate Case where a 40% overall limit to wastewater rate increase was used as a guide in establishing the Act 11[3] adjustments.

Q. Does the OSBA oppose shifting Aqua's wastewater revenue responsibility to water

[3] OSBA-I-7(a) 2023 Aqua Base Rate Case.

customers?

A. We understand tht Act 11 permits the recovery of a portion of the Company's wastewater revenue requirement from water customers in a given rate proceeding, in order to mitigate the rate increases that wastewater service customers might otherwise experience. We further note that Act 11 does not authorize a permanent shift in revenue responsibility from wastewater to water customers. In other words, Act 11 does not supersede the cost-of-service principles established by the Commonwealth Court's decision in Lloyd.[4]

Q. How do the Company's Act 11 revenue credits vary, by operating division?

A. Schedule Q-3WW displays, by operational division, Aqua's suggested Act 11 revenue credits. With individual credits ranging from 6.3% (Lower Makefield) to 29.9% (East Whiteland), such credits average 20.0% of the entire wastewater revenue need (line 4).

Q. Does the OSBA agree with the Company's suggested wastewater increases and related Act 11 revenue credits?

A. No. We oppose Aqua's proposed increases to its Base and East Whiteland divisions. We also consider it is unreasonable to limit the total increase in the Base Division, which includes Rate Zone 1 (or Main Division), to 14.3%. This is less than the 18.7% increase in water rates that is expected for the water system.[5] Due to Aqua's structural under-

[4] The Commonwealth Court has unambiguously decided that cost of service should be the "polestar" criterion for rate-setting. In Lloyd v. Pa. PUC, the Court held that other rate-making concerns could not trump cost of providing service. Lloyd v. Pa. PUC, 904 A.2d 1010, 1020 (Pa. Cmwlth. 2006). – Direct testimony of Brian Kalcic OSBA Statement No. 1 Docket No. R-2021-3027385/R-2021-3027386 pg. 14.

[5] Please refer to Schedule Q-2WW line 1 and Schedule Q-1W line 11 for the respective figures.

recovery of wastewater cost of service, wastewater customers should be expected to receive greater rate increases than water customers until the shortfall is addressed. We propose a $12.8 million (22.4%) increase for the Base Division, which is 20% larger than the Aqua proposed increase in water revenues.[6] With respect to the East Whiteland division, we consider the proposal to increase wastewater rates by 109.4% to be rate shock. Aqua has indicated that it will increase the East Whiteland division rates to achieve rate sufficiency over two rate applications. This appears to reflect an approximate 200% increase. We believe that gradualism should be considered in phasing in rate increases and therefore recommend that the East Whiteland division rate increase be limited to 40% in this application.

Q. What are the OSBA's recommendations for increasing wastewater revenue by division?

A. Schedule Q-4WW displays the OSBA's suggested increases by wastewater division. According to line ~~10~~ 7 of Schedule QBK -4WW, the OSBA's recommended wastewater increase is $16.8 million, or 23.1%.

Q. How do the OSBA's wastewater increases impact the Act 11 revenue credits earned by each operating division?

A. Schedule Q-5WW outlines the Act 11 revenue credit distribution based on the OSBA's proposal. The suggested wastewater increase exceeds Aqua's proposal by $2.259 million, resulting in a reduction in the Company's proposed Act 11 water revenue

[6] Please refer to Schedule Q-4WW~~%w~~ which is discussed in the wastewater section.

requirement. The OSBA's suggested Act 11 revenue shortage is $19.7 million, or 17.9% of the Company's stated wastewater revenue demand (see line 7 of Schedule Q-5WW).

Q. Have you prepared a summary of the OSBA's recommended wastewater increases, by customer class?

A. Yes, in Schedule Q-6WW which reflects recommended wastewater rate increases that range from 15% for Public Authority to 47% for Industrial customers.

Q. Is the OSBA in agreement with the Company's proposed method of allocating its Act 11 revenue requirement to its water service classes?

A. Yes, it is. Act 11 aims to reduce class increases for wastewater customers. Therefore, temporary subsidies for wastewater classes shall be recovered from the utility's respective corresponding water service classes. Aqua has determined the amount of Act 11 recovery by subtracting the proposed level of wastewater revenue after various increases from the pro forma cost of wastewater service for the twelve months ended December 31, 2025, from the revenue requirement for each area. The Act 11 allocation by class is equal to the wastewater cost of service by class less proposed revenues. Aqua's Act 11 allocation approach recovers wastewater subsidies from water users in a revenue-neutral manner and by customer class.

Q. How should the OSBA's recommended Act 11 revenue requirement of $19.651million be allocated to water service classes?

A. The OSBA's recommended allocation is shown in the table below.

	Class	Total WW Cost of Service	OSBA Recommended WW Revenues	OSBA Act 11 Allocation
		(a)	(b)	[c = b-a]
1	Residential	$ 73,394,468	63,200,502	10,193,966
2	Commercial	32,442,467	23,749,021	8,693,447
3	Industrial	1,159,115	548,607	610,508
4	Public Authority	625,833	472,465	153,368

Source: Aqua Exhibit No. 5-B, Part I and Schedule Q-6WW

Q. Have you updated the OSBA's recommended water service revenue allocation ~~shown in Schedule BK-4W~~ to reflect the OSBA's recommended Act 11 allocation shown in Table 1?

A. Schedule Q-5W shows the OSBA's proposed revenue distribution for water service, which includes an Act 11 revenue requirement of $198.651 million.

Q. Do you have a recommendation for modifying your recommended Act 11 allocation proposal in the event the Commission awards the Company a wastewater revenue requirement that is less than its requested revenue requirement of $89.4 million in this proceeding?

A. Yes. We recommend that the Commission direct the Company to (i) maintain the OSBA's proposed wastewater class increases and (ii) reduce the Act 11 revenue

allocation shown in column 3 of Schedule Q-5W by proportionally scaling back the class revenue requirements in column 1 of Table 1.

Q. Does this conclude your testimony?

A. Yes.

Rebuttal Testimony of Roger Cathcart of Quantiv Advisory, LLC

on behalf of

Pennsylvania Office of Small Business Advocate

September 12, 2024

Topics:

Class Revenue Allocation

Date Served: September 12, 2024

Date Submitted for the Record: _____

Introduction

Q. Please state your name and business address.

A. My name is Roger Cathcart, and our business address is 925 Wappoo Rd., Suite A, Charleston, South Carolina 29407.

Q. By whom are you employed and in what capacity?

A. I am a Senior Regulatory Advisor of Quantiv Advisory, LLC and the Owner and Principal of Cathcart Advisors, Inc. Quantiv is a private consulting firm specializing in the provision of financial and operational analysis and regulatory expertise in the Energy and Utility sector.

Q. On whose behalf are you testifying in this hearing?

A. Our testimony is being sponsored by the Pennsylvania Office of Small Business Advocate ("OSBA").

Q. Please describe your professional experience and qualifications.

A. I have been in public practice for 35 years as a Chartered Public Accountant (CPA, CA) and Chartered Business Valuator (CBV). For the last 25 years, I have consulted in the field of public utility rate regulation being engaged as a Senior Advisor to The Public Utilities Board of Manitoba and a Consultant to various other Boards and Commissions as they adjudicate Utility applications and other regulatory matters. Working with an interdisciplinary team, Mr. Cathcart analyses complex financial

filings and identifies issues. In this capacity, I am responsible for the interpretation of accounting standards, preparation of financial analysis, briefings and reports related to the Board's review of franchise applications, rate base, rate of return applications, cost of service applications and rate change applications. I have provided oral testimony before the Nova Scotia Energy and Review Board, and have supported the development of evidence for dozens of cases before various Boards.

Q. Have you previously testified before this Commission?

A. I have testified recently before the Commission in Docket No. A-2023-3041695, the proposed Acquisition by Aqua of the wastewater system Assets of the Greenville Sanitary Authority.

Q. What is the subject of your testimony?

A. I am commenting on aspects of the direct testimony of Jerome D. Mierzwa on behalf of the Pennsylvania Office of Consumer Advocate and Ethan H. Cline on behalf of the Bureau of Investigation and Enforcement related to the rate design proposals put forward in the respective expert evidence.

Direct Testimony of Jerome D. Mierzwa

Q. Mr. Cathcart, do you have any comments on Mr. Mierzwa's rate proposal?

A. Yes, I do. Mr. Mierzwa states that:

"The water service rate increases proposed by Aqua for Rate Zones Bunker Hill, Sun Valley, and Phoenixville should be mitigated to provide for gradualism."[1]

Mr. Mierzwa further states that:

"Specifically, I believe the proposed 75% revenue increases for Rate Zones Bunker Hill, Sun Valley, and Phoenixville require mitigation to provide for gradualism. While there is not a hard and fast rule with respect to applying the concept of gradualism in developing a revenue distribution, typically an increase of 1.5 to 2.0 times the system average increase is considered consistent with the concept of gradualism. As shown on Table 5, the system average increase proposed by Aqua is 28.1%, or approximately 30%. Therefore, to provide for gradualism, I believe it would be appropriate to limit the increase to Rate Zones Bunker Hill, Sun Valley, and Phoenixville to 2.0 times the system average increase, or 60% based on Aqua's revenue requirement claim, and assign the revenue deficiency to consolidated Rate Zone 1."[2]

[1] Direct Testimony of Jerome D. Mierzwa on behalf of the Pennsylvania Office of Consumer Advocate, Page 6, Lines 26-28.
[2] Direct Testimony of Jerome D. Mierzwa on behalf of the Pennsylvania Office of Consumer Advocate, Page 26, Lines 10-21.

The rate increases proposed for Rate Zones Bunker Hill, Sun Valley, and Phoenixville at 75% would represent rate shock. Gradualism should be considered in establishing just and reasonable rates for these communities. However, gradualism goes hand in hand with meeting the goal of avoiding rate shock. Mr. Mierzwa proposes to increase rate in the respective zones by 60%. Based on the overall system average increase of 28.1% this represents increasing the respective zones rates by 2.1 times the system average.

Q. Do you propose any changes to what Mr. Mierzwa proposes related to the Bunker Hill, Sun Vally and Phoenixville rate zones?

A. I agree with Mr. Mierzwa that gradualism should be considered in establishing the rate increases for the respective communities. I also agree that there is no hard and fast rule for applying gradualism, but it should always consider avoiding rate shock while making meaningful movements toward full cost recovery. In light of this consideration, I would adhere to multiples below the lower bound noted (1.5 times system average) and propose that a 1.25 times system average be utilized to mitigate rate shock. It would be more appropriate to increase the rates at between 1.25 the system average increase of 28.1% rather than the 2.1 times proposed by Mr. Mierzwa. That would increase the respective zones by 35.1% rather than the 60% increase proposed by Mr. Mierzwa.

Q. How would you propose the revenue deficiency be addressed?

A. The revenue deficiency should continue to be recovered from consolidated Rate Zone

1 as recommended by Mr. Mierzwa. Given the relatively small percentage of total
2 revenues related to these three zones, the proposed further rate mitigation will not
3 have a material impact on consolidated Rate Zone 1.
4
5 **Q: Do you have any further comments on Mr. Mierzwa's evidence?**
6 A: No, I do not.
7
8 **Direct Testimony of Ethan H. Cline**
9
10 **Q: Mr. Cathcart, do you have any comments on Mr. Cline's rate proposal?**
11 A: Yes, I do. Mr. Cline provides detailed proposals to change wastewater zone rates,
12 with the goal of zone consolidation and moving rates charged to customers to full
13 cost recovery, reducing the subsidy provided by Act 11 from water customers. In his
14 proposal, Mr. Cline recommends large increases to rate zones 9, 10, 12, and 14,
15 which would, in my view, constitute rate shock.
16
17 **Q: Can you explain what you mean by rate shock?**
18 A: Yes, in rate zones 9, 10, 12, and 14, Mr. Cline is recommending rate increases to
19 commercial customers' bills in the respective communities, ranging from 66% in rate
20 zone 9 to 81.3% in rate zone 14.[3] Increases of this magnitude represent rate shock for
21 commercial customers.

[3] Exhibit to Accompany the Direct Testimony of Ethan H. Cline Bureau of Investigation and Enforcement Aqua Pennsylvania, Inc R-2024-3047822 and R-2024-3047824, Present and Proposed BILLS By Class Schedule 3.

Q: Do you have any comments on Mr. Cline's justification for proposing large rate increase in the respective zones?

A: Yes. Mr. Cline provided two reasons justifying the proposed rate increases, the first being a requirement to move rates zone rates toward rates of rate zone 1 rates to consolidate into rate zone 1 in future base rate cases. The second rationale is that for each of the rate zones noted, results of acquisitions under section 1329 provided benefits to the municipalities that sold their systems to Aqua including such things as debt relief, the municipal financial outlook and other improvements and investments to municipal properties; in addition to Aqua's claimed in approved service to their customers.[4]

I agree that the municipalities that sold their systems to Aqua benefited. However, it is not clear whether or how that benefit, on the face of it, applied to the ratepayers of these communities. Any rate increases post Section 1329 acquisition should, over time, attempt to achieve a goal of rate zone consolidation. Gradualism should be taken into consideration to avoid rate shock.

Q: How would you revise Mr. Cline's rate proposal for Zones 9, 10, 12, and 14?

A: I propose moderating the rate increases, setting a cap equal to 1.25 times the proposed average increase to Rate Zone 1's respective customer classes. This would avoid rate

[4] Direct Testimony of Ethan H. Cline on behalf of the Bureau of Investigation and Enforcement, Page 42, Lines 6-19.

shock for the customers. Aqua should provide a multi-year plan to implement rate consolidation to the acquired communities' systems.

Q: How would you propose the shortfall be addressed.

A: The rate proposal changes would lower the rate increase sought from Zones 9, 10, 12, and 14. The relative shortfall would increase the Act 11 subsidy from water customers.

Q: Have you prepared an alternative calculation reflecting your recommended changes?

A: No, the relative changes could be made to Mr. Cline's proposed rate changes.

Q: Do you have any further comments on Mr. Cline's evidence?

A: No I do not.

Surrebuttal Testimony of Jason Hails of Quantiv Advisory, LLC

on behalf of

Pennsylvania Office of Small Business Advocate

September 26, 2024

Topics:
Rate of Return

Date Served: September 26, 2024

Date Submitted for the Record: _____

SURREBUTTAL TESTIMONY OF JASON HAILS

Q. Please state your name and business address.

A. My name is Jason Hails, and my business address is 925 Wappoo Rd., Suite A, Charleston, South Carolina 29407.

Q. By whom are you employed and in what capacity?

A. I am the Co-Founder and a Member of Quantiv Advisory, LLC. Quantiv is a private consulting firm specializing in the provision of financial and operational analysis and regulatory expertise in the Energy and Utility sector.

Q. On whose behalf are you testifying in this hearing?

A. Our testimony is sponsored by the Pennsylvania Office of Small Business Advocate ("OSBA").

Q. Are you the same Jason Hails who pre-filed testimony in this proceeding on behalf of the Pennsylvania Office of Small Business Advocate (OSBA)?

A. Yes.

Q. WHAT IS THE PURPOSE OF YOUR SURREBUTTAL TESTIMONY?

A. My surrebuttal testimony responds to portions of rebuttal testimony of Mr. Packer and Mr. Moul on behalf of Aqua Pennsylvania, Inc. ("Aqua PA"), and Mr. Keller on behalf of the Bureau of Investigation & Enforcement.

SURREBUTTAL TESTIMONY

Q. Please comment on Mr. Packer's assertion on Page 20 of his rebuttal testimony[1], and Mr. Moul's comments on Page 40 of his rebuttal testimony[2], regarding the computation of an implied management performance adder in Mr. Moul's testimony.

A. Mr. Packer contends that it is inappropriate to infer that Mr. Moul's recommendation includes something not specified[3]. As noted in my prior testimony, Mr. Moul in his prior cases applied a management performance increment for 23 of the 26 cases, including 18 cases with management performance increments from 0.12% to 0.25%, and 5 cases with increments "not defined"[4]. I support a reduction in the cost of equity by the management performance increment for three reasons:

1. In this case, Mr. Moul specifically noted in his direct testimony "I have not quantified the increment to recognize the Company's superior management performance"[5]. Based on Mr. Moul's prior cases, I interpret his statement to mean that the management performance increment in this case falls in the "not defined" category, and I therefore quantified a reasonable and appropriate proxy of a reduction based on his prior case work.
2. Mr. Moul did not deny inclusion of a management performance increment in his rebuttal testimony[6], only stating that there is no justification for making the

[1] Aqua Statement No. 1-R, Mr. Packer's Rebuttal Testimony, Page 31.
[2] Aqua Statement No. 7-R, Mr. Moul's Rebuttal Testimony, Page 40.
[3] Aqua Statement No. 1-R, Mr. Packer's Rebuttal Testimony, Page 31, Lines 17-18.
[4] IR OCA 1-17, Attachment 1.
[5] AP Exhibit 4-A, Page 41 of 85, Lines 16-17.
[6] Aqua Statement No. 7-R, Mr. Moul's Rebuttal Testimony, Page 40.

downward adjustment. If Mr. Moul did not include a specific management performance increment, I expect that he would explicitly state this in his testimony. If Mr. Moul articulated the amount of management performance included in his workup, that would be the amount I recommend be removed.

3. Mr. Moul in his rebuttal testimony suggests a condition for the Commission to include a specific provision for a management performance increment, the condition being that a management performance increment be applied by the Commission if the Commission selects an equity return lower than Mr. Moul's proposed 10.95%[7]. Mr. Moul claiming that a satisfactory result is achieved if his proposed equity return is adopted by the Commission implies that an increment is warranted and embedded in Mr. Moul's overall buildup calculations, particularly given that he implies with his testimony that if his equity return proposal of 10.95% is adopted, a management performance increment is not necessary.

Q. Do you have any clarifying comments regarding Mr. Keller's rebuttal evidence suggesting that you use the Company's DCF results[8].

A. I suggested the use of the low end of Mr. Moul's range for cost of equity as an initial starting point for the Commission to consider, subject to other factors for consideration. I clarified my position relative to some of these other factors, including the proposed leverage adjustment and growth rate embedded within the DCF calculation in my response to Interrogatories of the Office of Consumer Advocate Set 1 to Office of Small

[7] AP Exhibit 4-A, Page 41 of 85, Lines 21-24.
[8] I&E Statement No. 2-R, Mr. Keller's Rebuttal Testimony, Page 4, Lines 1-4.

Business Advocate.

Q. Does this conclude your testimony?

A. Yes.

Re: Pennsylvania Public Utility Commission v. Aqua Pennsylvania, Inc. and Aqua Pennsylvania Wastewater, Inc. / Docket Nos. R-2024-3047822 & R-2024-3047824

Dear Presiding Judges:

Enclosed please find the Surrebuttal Testimony of Roger Cathcart, labelled OSBA Statement No. 2-S, on behalf of the Office of Small Business Advocate ("OSBA"), in the above-referenced proceedings.

As evidenced by the enclosed Certificate of Service, all known parties will be served, as indicated.

If you have any questions, please do not hesitate to contact me.

Sincerely,

/s/ Steven C. Gray

Surrebuttal Testimony of Roger Cathcart of Quantiv Advisory, LLC

on behalf of

Pennsylvania Office of Small Business Advocate

September 26, 2024

Topics:

Cost of Service Allocation

Date Served: September 26, 2024

Date Submitted for the Record: _____

SURREBUTTAL TESTIMONY OF ROGER CATHCART

Q. Please state your name and business address.

A. My name is Roger Cathcart, and our business address is 925 Wappoo Rd., Suite A, Charleston, South Carolina 29407.

Q. By whom are you employed and in what capacity?

A. I am a Senior Regulatory Advisor of Quantiv Advisory, LLC and Principal of Cathcart Advisors, Inc. Quantiv is a private consulting firm specializing in the provision of financial and operational analysis and regulatory expertise in the Energy and Utility sector.

Q. On whose behalf are you testifying in this hearing?

A. Our testimony is being sponsored by the Pennsylvania Office of Small Business Advocate ("OSBA").

Q. Are you the same Roger Cathcart who pre-filed testimony in this proceeding on behalf of the Pennsylvania Office of Small Business Advocate (OSBA)?

A. Yes.

Q. What is the subject of your testimony?

A. I am commenting on aspects of the rebuttal testimony of Aqua Pennsylvania Wastewater Inc. witness Constance E. Heppenstall on behalf of the Pennsylvania

Office of Consumer Advocate and Ethan H. Cline on behalf of the Bureau of Investigation and Enforcement related to the rate design proposals put forward in the respective expert evidence.

Q. Mr. Cathcart, do you have any comments on Ms. Heppenstall's rebuttal?

A. Yes, I do. Ms. Heppenstall assumes that based on a review of my evidence states:

> *"…it appears, by comparing Schedule Q-1 (W) to Schedule Q-4 (W), Mr. Cathcart's recommended water revenue allocation is the same as the Company's proposed recommendation."*[1]

Q. Did you adopt Aqua's recommended water revenue allocation?

A. Yes. The water revenue allocation was not the primary focus of my direct testimony. I had focused on the wastewater allocation and the Act 11 subsidy. I did note that there were movements towards revenue cost coverage of 1.0 or unity in the case of all but the Public rate class. In my direct evidence, I had indicated that Aqua's revenue allocation proposal in the main moves customer classes closer to the respective cost-based revenue levels. However, Mr. Meirzwa's evidence on behalf of the Pennsylvania Office of Consumer Advocate provided proposed rate changes that merited consideration, subject to concerns raise in my rebuttal related to certain Rate Zones[2]. I had recommended gradualism be considered in hand with rate shock and had proposed revisions to the rate changes proposed. I note that Ms. Heppenstall took

[1] Aqua Statement No. 5-R, Ms. Heppenstall's Rebuttal Testimony, Page 11, Lines 21-23.
[2] Bunker Hill, Sun Valley and Phoenixville.

issue with the proposal of Mr. Meirzwa to limit rate increases to 60% which in my view represents rate shock. I will not repeat my position previously stated other than a movement to Rate Zone 1 should be done within a bound that considers rate shock in setting just and reasonable rates.

Q. Do you have any comments on Ms. Heppenstall's comments on your recommended changes to wastewater rate design?

A: Yes I do. Ms. Heppenstall recommended that given the overall adjustment to wastewater increased the revenue from wastewater customers from 20% to 23.3% and no specific rate direction provided to accomplish it, the recommendations should be ignored.

Q. Do you have any issues with Ms. Heppenstall logical basis for her recommendation?

A. Yes I do. My evidence recommended principle-based adjustments to wastewater revenue. The adjustments proposed addressed rate shock for East Whiteland ratepayers which were being exposed to a 109% rate increase based on Aqua's proposal. I had recommended that rate increase be limited to 40%. In addition I had proposed an increase to Zone 1 wastewater customers to ensure it was in line with the average water revenue increase. The overall increase in these adjustments were to increase wastewater revenue by 3.3% on an overall basis and lower the Act 11 subsidy. It is my view that principle-based adjustments should be made, regardless of the outcome of the revenue requirement. I am confident that Ms. Heppenstall and her

team could adjust proposed rates to accomplish what was recommended. The adjustments should be made to Zone 1 in proportion to what has been proposed by Aqua for the respective Rate Classes. The reduction proposed to East Whiteland RZ should be applied to lower the overall revenue request.

Q. Do you have any further comments on Ms. Heppenstall's wastewater rebuttal.

A. Yes I do. I note that Ethan H. Cline on behalf of the Bureau of Investigation and Enforcement had provide detailed recommendations on rate zone consolidation and moving rates charged to customers to full cost recovery, reducing the subsidy provided by Act 11 from water customers. I had recommended changes to the proposed rate zones 9, 10, 12, and 14 from Mr. Cline's proposal to address rate shock. I note that Ms. Heppenstall also took issue with the larger rate increases proposed for the respective zones and disagreed that rate increases in these areas should be higher because they were all acquired under Section 1329. I agree with Mrs. Heppenstall, the Section 1329 acquisition communities should not be subject to the large increases as proposed by Mr. Cline. I believe that rate increases for these rate zones should, over time, attempt to achieve a goal of rate zone consolidation. Gradualism should be taken into consideration to avoid rate shock. I further note that Mr. Cline had proposed no increase to East Whiteland, nor participation in Act 11 Allocation. Ms. Heppenstall does not appear to address this in her rebuttal. One could assume that this proposal is acceptable to Aqua.

Q: Do you have any further comments on Ms. Heppenstall or Mr. Cline's rebuttal

evidence?

A: No, I do not.

CAUSE-PA Appendix B – Cited Discovery Responses

PREPARED DIRECT TESTIMONY OF HARRY S. GELLER

I. INTRODUCTION

Q: Please state your name, occupation, and business address.

A: My name is Harry S. Geller. I am retired from my former position as the Executive Director of the Pennsylvania Utility Law Project (PULP) and am currently a retired attorney with emeritus status. I have maintained an office at 118 Locust St., Harrisburg, PA, 17101, for the purpose of providing consulting services and assistance to low income individuals and the organizations which represent them in utility and energy matters.

Q: Briefly outline your education and professional background.

A: I received my B.A. degree from Harpur College, State University of New York at Binghamton in 1966, and a J.D. degree from Washington College of Law, American University in 1969. Upon graduation from law school, I entered the Volunteers in Service to America (VISTA) program, where I was assigned to the New York University Law School. I took courses in the Law School's Urban Affairs and Poverty Law program and worked with the Community In Action Program on the West Side of Manhattan in New York City from 1969-1971. In 1971, I started as a Staff Attorney for the New York City Legal Aid Society, Criminal Court, and Supreme Court Branches in New York County. In 1974, I moved to Pennsylvania and began working for Legal Services, Incorporated (LSI). LSI was a civil legal aid program serving Adams, Cumberland, Franklin, and Fulton Counties. I worked at LSI from 1974-1987 first as a Staff Attorney, then as Managing Attorney, and ultimately became Executive Director. Through a restructuring with other legal services programs, LSI became part of what is now known as MidPenn Legal Services and Franklin County Legal Services.

In 1988, I was hired to be the Executive Director of the Pennsylvania Utility Law Project (PULP), a statewide legal aid project dedicated to protecting the rights of low income utility customers. At PULP, I represented low income individuals and supported organizations advocating for low income households in utility and energy matters. As Executive Director, I consulted and co-counseled on a wide variety of individual utility consumer cases, and I participated in task forces, work groups and advisory panels, including serving as chair of the Department of Human Services' LIHEAP Advisory Committee and the Pennsylvania Public Utility Commission's Consumer Advisory Committee. I frequently trained communities, legal aid staff, and advocacy groups across Pennsylvania about the various utility and energy matters affecting Pennsylvania's low income population. I retired from PULP on June 30, 2015. Since that time, I have continued to provide consulting services for PULP and its clients, as well as other organizations serving the low income community.

In sum, I have 50 years of experience working on behalf of households in poverty, including the past 30 years focusing specifically on utility and energy issues affecting low income consumers. My resume is attached as Appendix A.

Q: Please describe the focus of your work over the past fifty years, including relevant work experience regarding issues of low income families' ability to afford essential services such as utilities.

A: I have represented low income individuals and organizations serving low income populations in a wide variety of legal matters, including family law, public benefits, unemployment compensation, utility shut-offs, debtor/creditor, and housing-related disputes. Over the past 30 years, my focus has been to ensure that low income households can connect to, afford, and maintain utility and energy services to their home.

In all of these legal matters, I worked almost exclusively on behalf of individuals and households that subsist on incomes at or below 150% of the Federal Poverty Level (FPL). Through this work, I have had a close view of the daily lives of countless of our poorest citizens. I have spent hundreds, if not thousands, of hours assisting clients, combing through their budgets to see whether it is even possible to make ends meet. Over the years, I have consistently seen the near total absence of the ability of low income families to afford the most basic monthly necessities with the incomes they have, even assuming heroic self-control and conscientious budgeting and spending. Almost every month, my clients faced the stark reality of having to choose which bills they can forgo with the least drastic consequences.

In addition to having a deep understanding of the daily monetary struggles facing economically vulnerable families, I have an extensive knowledge of the array of programs designed to allow low income individuals to afford utility service. While at PULP, I was involved in hundreds of proceedings evaluating the effectiveness of programs that are intended to reduce low income households' utility burdens and help them conserve energy and water through efficiency and weatherization – thereby reducing utility costs and improving bill affordability. I have spent thousands of hours identifying the problems in Universal Service programs and making recommendations for changes to these programs to better serve low income consumers. This advocacy ultimately led to the recognition of the need to develop integrated and coordinated programs for low income consumers.

Over my decades of service, I played an instrumental role in the development, oversight, and monitoring of the initial pilot and then the statutorily required low income Universal Service Programs, each of which is structured to provide a different form of complimentary assistance – working in tandem to enable low income customers to afford and maintain basic service. For

example, the Customer Assistance Program (CAP) provides alternatives to traditional collection methods for low income, payment troubled utility customers, allowing participants to receive a more affordable bill and earn forgiveness on arrears in exchange for making in-full payments on their discounted bill. In turn, the Low Income Usage Reduction Program (LIURP) is a targeted weatherization program designed to assist low income households with the highest energy consumption, payment problems, and arrearages to reduce their overall energy consumption. CAP and LIURP work in tandem and are designed to assist low income households in maintaining affordable utility services and safe living environments while reducing utility collection, thereby benefitting other ratepayers and the communities in which they live and work.

Q: Have you testified in any proceeding before the Pennsylvania PUC?

A: Yes. I have presented testimony in many proceedings before the PUC. A complete list is attached to my resume, which is attached as Appendix A.

Q: For whom are you testifying in this proceeding?

A: I am testifying on behalf of the Coalition for Affordable Utility Services and Energy Efficiency in Pennsylvania (CAUSE-PA).

Q: What is the purpose of your testimony?

A: CAUSE-PA intervened in this proceeding to ensure that the rates proposed by Aqua Pennsylvania, Inc. and Aqua Pennsylvania Wastewater, Inc. (Aqua or the Company), together with all attendant policies, programs, and procedures governing the provision of water and wastewater services, will not adversely affect the ability of Aqua's low income customers to connect to, maintain, and afford water and wastewater services, which is a critical component to a safe and healthy home. My testimony is focused on the impact of Aqua's rate proposals on low income customers.

Q: How is your testimony organized?

A: My testimony is divided into six sections. Following this initial introduction section, Section II discusses Aqua's residential rate increase proposal, Aqua's existing and proposed rate design, and the financial challenges that Aqua's proposed rates will pose to its low income customers and residential customers as a whole. In Section III, I provide an overview of Aqua's low income customers and their households. In Section IV, I analyze Aqua's rate proposals and discuss the impacts on its residential customers already struggling to afford services and provide recommendations to remedy these issues. In Section V, I assess the effectiveness and accessibility of Aqua's low income assistance programs, and provide recommendations related to these programs. Finally, I conclude my direct testimony in Section VI, and provide a summary of recommendations offered throughout my direct testimony.

II. AQUA'S RATE INCREASE PROPOSAL

Q: Please summarize Aqua's requested rate increase as it applies to residential customers.

A: On May 23, 2024, Aqua Pennsylvania, Inc. and Aqua Pennsylvania Wastewater, Inc. submitted the rate filings Original Tariff Water – PA P.U.C. No. 4 ("Tariff Water No. 4") and Original Tariff Sewer – PA P.U.C. No. 4 ("Tariff Sewer No. 4"), which propose to increase rates by approximately $127 million, or 18.88%, based on the fully projected future test year ending December 31, 2025. [1] According to the Company, if the entire rate request is approved as filed, the total bill for a residential customer using 3,870 gallons per month would increase from $80.91 to $97.01, an increase of about $16.10 per month, or nearly 20%.[2]

[1] Volume I, Statement of Specific Reasons.
[2] Volume I, Notice of Proposed Water and Wastewater Rate Changes.

Q: As a preliminary matter, do you support the Company's proposal to increase rates?

A: No, I do not support the Company's proposal to significantly increase the cost of basic water and wastewater services, and I recommend substantial revision and mitigation of Aqua's proposal. I do not believe that it is appropriate to raise rates for water and wastewater service without first ensuring that its low income customers are able to access affordable service under just and reasonable terms. As my testimony will demonstrate, Aqua's 2022 rate increase – which is still pending appeal before the Commonwealth Court of Pennsylvania – has already created substantial strain on the ability of its low income customers to reasonably afford water and wastewater services. Access to affordable water and wastewater service is vital to the safety and health of families and communities across Aqua's broad and diverse service territory. As discussed more fully below in section IV, basic life functions are impossible without access to running water. Lack of stable and affordable water/wastewater services to a home creates a significant threat to the health, safety, and wellbeing of customers, their families, and the surrounding community. It is imperative that rates – and attendant policies and procedures – are designed to address the disparities in water and wastewater burdens, and the ability of Aqua's low income families to maintain service.

Regardless of whether Aqua is approved to increase rates through the context of this proceeding, the data I present shows that at current rates Aqua's low income customers are accruing arrears and being subject to involuntary service termination at disproportionate rates. The Commission should require Aqua to take necessary steps to ensure that all households in its service territory are able to access and afford service under just and reasonable terms. Throughout my direct testimony, I provide a number of recommendations for how Aqua can better structure its rates, services, and assistance programs so that its low income customers can reasonably afford to

maintain water and wastewater services to their home. While these recommendations are designed to address rate unaffordability at *existing* rates, they are also vital to mitigate financial harm for Aqua's low income customers if the Commission allows Aqua to increase its rates.

Q: What is the estimated economic impact of Aqua's proposed rate increase on residential water customers?

A: The impact of Aqua's proposed residential water rate increases depends on usage and varies between rate zones. Table 1 below shows the dollar and percentage impact on residential customers using an average of 4,000 gallons of water/month in each of Aqua's rate zones and divisions:

Table 1: Residential Water Bill Impact by Rate Zone at 4,000K[3]

Zone	Currently Monthly	Proposed Monthly	Dollar Increase	% Increase
Rate Zone 1	$82.31	$106.06	$23.75	29%
Rate Zone 2	$82.31	$106.06	$23.75	29%
Rate Zone 3	$79.43	$99.13	$19.70	25%
Bunker Hill Division	$38.44	$67.27	$28.83	75%
Sun Valley Division	$38.00	$66.50	$28.50	75%
Phoenixville Division	$22.66	$39.66	$17.00	75%

As shown by Table 1, the impact of Aqua's proposed rate increases will vary by rate zone. A water customer using 4,000 gallons/month located in Zone 1 or 2 will experience a monthly rate increase of 29% for their water service; those located in Zone 3 will experience an increase of 25%; and those located in the Bunker Hill, Sun Valley and Phoenixville rate divisions will experience an increase of 75%. There are two additional rate zones not reflected in Table 1, Belle

[3] Tariff-Water PA P.U.C. No. 4, Original Pages 12.1, 12.2.

Aire and Shenandoah, both recently acquired systems[4] which Aqua is proposing to move to Rate Zone 1 in this case.[5] Notably, Shenandoah Borough, within Aqua's Shenandoah rate zone has a poverty rate of over 30.6%.[6] As stated in Aqua's Shenandoah Customer Notice, residential rates will increase approximately 38% when consolidated into Aqua's Rate Zone 1.[7]

While I have used 4,000 gallons/month for illustrative purposes in the Table above, the impacts of Aqua's rate proposal will also vary by a customer's usage which, in turn, varies substantially by household size and the condition of the home.[8] These factors drive disproportionate bill impacts for larger families as well as low income households, which are more likely to live in older homes with older plumbing, older fixtures, and less efficient appliances and are less able to afford basic plumbing and leak repair services.[9] I will discuss Aqua's residential customer usage, and the corresponding impact on monthly bills, in detail below.

Q: Please briefly describe Aqua's current rate structure for water and wastewater service for residential customers.

A: The Company currently offers water service in eight different rate zones. [10] The largest of these rate zones is Rate Zone 1, accounting for over 97% of the Company's total water revenue.[11] Accordingly, I will focus the bulk of my analysis on Rate Zone 1. Rate Zone 1 offers service to residential and non-residential customer classes through a monthly fixed charge that varies by

[8] See NRDC, Water Affordability Toolkit: Affordability and Assistance Programs, at 104, available at: https://www.nrdc.org/sites/default/files/water-affordability-toolkit-section-8.pdf; See Patrick Sisson, *America's Aging Housing Stock Takes Toll on Public Health*, Bloomberg, Nov. 27, 2023, https://www.bloomberg.com/news/features/2023-11-27/america-s-aging-housing-stock-takes-toll-on-public-health.
[9] Id.
[10] CAUSE-PA I-1.
[11] Id.

meter size and a volumetric charge that varies by customer class and rate zone.[12] While a great majority of the Company's customers are now being billed under the same set of rates for metered service, the following water rate zones and districts continue to have separate rate schedules: Rate Zone 3, Bunker Hill, Sun Valley, Phoenixville, Shenandoah, and Belle Aire.[13]

Aqua uses an inclining block rate structure for its volumetric charges, meaning there is one rate for usage up to 2,000 gallons, and a rate that is nearly 20% higher for any usage over 2,000 gallons.[14] Aqua is not proposing any changes to its rate structure in its filing. As I discuss in greater detail below, Aqua's inclining block rate structure disadvantages low income households and renters who have less control over their household water usage due to the condition of their homes and are less able to adopt water efficiency upgrades.

For its wastewater rates, Aqua provides service to 14 separate rate zones.[15] Aqua operates Rate Zone 1 as a statewide rate zone for wastewater and that Rate Zone accounts for approximately 85% of Aqua's total wastewater revenue.[16] Aqua's wastewater rate structure consists of a fixed and volumetric charge, although, unlike the water rate structure, the volumetric charge for wastewater does not vary by usage level.[17]

III. LOW INCOME CONSUMERS IN AQUA'S SERVICE TERRITORY

Q: How much income must a household earn each month to be considered low income?

A: The Commission's regulations for gas and electric utilities define a "low income" customer generally as any customer whose income is at or below 150% of the federal poverty level (FPL).[18]

---

[15] CAUSE-PA I-1.
[16] Id.
[17] Tariff Sewer – PA P.U.C. No. 3 Original Page 10.1.1.
[18] See 52 Pa. Code §§ 54.72, 62.2.

Winter termination protections, which apply to heat-related water services, are set at 250% FPL.[19] In my testimony, I will primarily focus on customers up to 200% FPL, as Aqua uses 200% FPL as the income eligibility threshold for its Customer Assistance Program (CAP), and other low income assistance programs.[20]

The FPL is a measure of poverty based exclusively on the size of the household, and does not account for household composition (i.e., whether the household consists of adults or children) or geographic location. The Table below provides a breakdown of the maximum income threshold for various income tiers under the Federal Poverty Guidelines:

Table 2: 2024 Annual Income by FPL and Household Size[21]

Household/ Family Size	50%	100%	150%	200%
1	$7,530	$15,060	$22,590	$30,120
2	$10,220	$20,440	$30,660	$40,880
3	$12,910	$25,820	$38,730	$51,640
4	$15,600	$31,200	$46,800	$62,400
5	$18,290	$36,580	$54,870	$73,160

As the above Table shows, a family of four with household income at or below 200% FPL has a maximum gross annual income of $62,400 ($5,200 per month) – while a family of four with income at or below 50% FPL has a maximum gross annual income of just $15,600 ($1,300 per month).[22] For comparison, a full time (40 hours/week) Pennsylvania worker making minimum wage ($7.25/hour) has a gross annual income of $15,080, assuming no time off. These income

levels are much less than a household needs to meet their basic expenses in any of the counties in Aqua's expansive service territory.[23]

Because the Commission's definition of "low income customer" is correlated to the national FPL and is employed statewide, it does not capture all customers residing in Aqua's specific service territory whose income is inadequate to afford basic needs. To assess actual levels of economic hardship across a given region, poverty experts often use the Self Sufficiency Standard - a benchmark developed to determine how much income a household needs to afford life's basic necessities (food, rent, clothing, medicine/medical care, childcare, utilities, transportation, and taxes) without assistance.[24] Unlike FPL, the Self Sufficiency Standard accounts for the varied costs of these six basic needs in different geographical areas and household composition.[25] In 2024, the Self Sufficiency Standard for a family of four in Pennsylvania – consisting of 2 adults, 1 school age child, and 1 preschooler – ranges across Aqua's service territory from a low of $71,599 in Clarion County to a high of $110,533 in Bucks County.[26]

Aqua's identified low income customers do not have an income amount that is close to either of these figures. The average annual household income for the Company's currently identified CAP customers is just $18,926,[27] while the average annual income of Aqua's confirmed low income customers is only $20,627.[28]

---

[25] See PathWays PA, Overlooked and Undercounted 2019 Brief: Struggling to Make Ends Meet in Pennsylvania, available at: https://selfsufficiencystandard.org/wp-content/uploads/2021/10/PA2019_Demographic.pdf
[26] Average Self Sufficiency Standard of all counties served by Aqua. See Sufficiency Standard – PA, available at: https://selfsufficiencystandard.org/pennsylvania/.
[27] CAUSE-PA I-13.
[28] See CAUSE-PA I-6. Information was requested as annual income and was provided as a monthly income number, $1,718.95.

Q: How many low income customers reside in Aqua's service territory?

A: Aqua only recently started identifying its low income customers, and does not perform routinized income screening, so we cannot identify the exact number of low income customers served by Aqua. However, there are several metrics to approximate Aqua's low income customer base.

Pennsylvania's large public utility companies generally track and classify their low income customer populations in two ways – estimated low income customers (ELI) and confirmed low income customers (CLI). Aqua defines confirmed low income customers as a customer for which the Company has received income information indicating that the customer has an annual income at or below 150% FPL.[29] Aqua gathers that information "on a voluntary and verbal basis."[30] As of June 2024 (the most recent data provided), Aqua indicates that it has 28,918 confirmed low income customers.[31]

Based on the above, it appears that Aqua's internal definition of confirmed low income customers counts only those customers that Aqua has had direct contact with who have personally shared income information with the Company. Using only this direct contact and question/answer method to determine the full number of customers who can be determined as confirmed low income within its service territory is quite restrictive and does not capture the many customers who can be confirmed as low income by alternate methods. This potential undercounting makes it more difficult to analyze Aqua's low income assistance program performance, specifically being able to more specifically assess the apparent severe under-subscription of its CAP.

[29] CAUSE-PA I-3.
[30] CAUSE-PA II-1.
[31] CAUSE-PA I-4, Attachment.

I recommend that Aqua adopt a broader definition of confirmed low income customers, including other information or indicators that reasonably places the customer in a low income designation. Such information should include, at a minimum, collection of customer information through the income and CAP screening process that I recommend later in my discussion about CAP enrollment,[32] as well as:

- Enrollment or participation in a low income assistance or conservation program (CAP, Aqua Aid, or Aqua's leak repair and conservation program).
- Receipt of a federal, state, or local utility assistance, such as LIHWAP or LIHEAP.[33]
- Receipt of other emergency utility assistance.
- Indication by the customer of inability to pay current bill and/or requests for income based payment arrangements.
- Contact immediately prior to termination.
- Other referrals to low income programs.
- Self-certification by the customer.
- Income information received based on request for a medical certificate.

Using its estimated low income customer count, Aqua estimates that 98,285 water customers and 10,858 wastewater customers have income at or below 200% FPL.[34] This is approximately 26% of its total residential customer base.[35] These are a substantial number of low

[32] See infra p. 28-33.
[33] I am advised by Counsel that Aqua has a data sharing agreement in place with DHS to obtain information about LIHWAP recipients. While LIHWAP is not currently funded, it is possible the program could be funded in the future. Moreover, I note that DHS is set to launch a data sharing program for its Low Income Home Energy Assistance Program (LIHEAP). While DHS is not currently contemplating sharing LIHEAP data with water and wastewater utilities, it is a distinct possibility that LIHEAP data sharing may expand to water and wastewater utilities in the future.
[34] CAUSE-PA I-5, Attachment.
[35] CAUSE-PA I-2, Attachment.

income customers in Aqua's service territory who need to be considered in any decision regarding just, reasonable, and affordable rates.

Q: What is the income threshold for Aqua's residential customers to receive assistance?

A: Aqua's Customer Assistance Program (CAP) is currently available to customers at or below 200% FPL. [36] Aqua's hardship grants, Aqua Aid, are available to customers at or below 200% FPL, with up to 250% FPL allowed in extenuating circumstances or for 'special needs' households, including seniors and people with a disability.[37] Aqua also initiated a leak repair and conservation program that uses 200% FPL as its income threshold, but also allows some flexibility in extenuating circumstances.[38]

IV. LOW INCOME RATE AFFORDABILITY ANALYSIS

Q: How is water and wastewater affordability measured?

A: The accepted metric used to determine the affordability of utility service is referred to as the household's utility bill burden - meaning the percentage of household income required to cover the cost of the bill.[39] In the context of water and wastewater affordability, the household utility bill burden is referred to as the household water and wastewater burden. While Pennsylvania has not adopted statewide water and wastewater burden standards, it is generally accepted that the combined cost for water and wastewater service should not exceed between 4-4.5% of household

[37] CAUSE-PA I-9, Attachment.
[38] Aqua St. 13 at 4:18-19.
[39] Roger Colton, The Affordability of Water and Wastewater Service in Twelve U.S. Cities: A Social, Business and Environmental Concern, The Guardian, (May 2020), available at: https://www.theguardian.com/environment/2020/jun/23/full-report-read-in-depth-water-poverty-investigation.

income – 2-2.5% for water, and 2% for wastewater.[40] As I will explain in further detail below, Aqua's current rates exceed these levels of affordability for many customers, especially those at the lowest levels of income. The affordability gap will increase even further if Aqua's proposal to increase water rates is approved. It is therefore critical that Aqua take the necessary steps to address this affordability gap. I will discuss recommended improvements to Aqua's low income programing later in my testimony.

Q: What are the current water and wastewater burdens for Aqua's low income customers?

A: At current rates, Aqua's lowest income customers are subject to excessive and unaffordable water and wastewater burdens. CAUSE-PA Exhibit 1, attached to my testimony, provides a snapshot of the applicable water and wastewater burdens for low income customers at various usage levels, household size, and household income levels, both at present and proposed rates, in Water Rate Zone 1 and Wastewater Rate Zone 1. For example, at *current* rates in Rate Zone 1, a single parent with three children at 50% FPL using 6,000 gallons of water each month has a combined water and wastewater burden of 17%. If Aqua's rate increase proposal is approved, this same household will face a combined water and wastewater burden of 20%.[41] Low income customers devote large portions of their incomes each month to afford basic water/wastewater

[40] See NRDC, Water Affordability Toolkit: Affordability and Assistance Programs, at 73, available at: https://www.nrdc.org/sites/default/files/water-affordability-toolkit-section-8.pdf; Roger Colton, The Affordability of Water and Wastewater Service in Twelve US Cities, The Guardian (May 2020), available at: https://www.theguardian.com/environment/2020/jun/23/full-report-read-in-depth-water-poverty-investigation; NAACP Legal Defense and Educational Fund, Inc., Water/Color: A Study of Race & The Water Affordability Crisis in America's Cities (2019), available at: https://www.naacpldf.org/wp-content/uploads/Water_Report_FULL_5_31_19_FINAL_OPT.pdf; Lauren Patterson et al., Affordability of Household Water Services Across the United States, PLOS (May 10, 2023), https://journals.plos.org/water/article?id=10.1371/journal.pwat.0000123#:~:text=The%20average%20indoor%20per%20capita,labor%20for%20minimum%20wage%20earners;

[41] CAUSE-PA Exhibit 1.

services – leaving insufficient funds to pay for housing, energy, food, medicine, childcare, and other basic needs.

As discussed in more detail below, unaffordable water/wastewater burdens pose significant obstacles for low income families to afford their monthly bills and stay connected to essential and life-sustaining water and wastewater services in their homes – creating a cascade of consequences to the health, safety, and stability of Pennsylvania's economically vulnerable families.

Q: In addition to high water and wastewater burdens, is there other evidence that Aqua's low income customers currently struggle to afford water and wastewater services at existing rates – even before any rate increase is approved?

A: Yes. Aqua's low income customers also carry a disproportionate amount of residential customer debt and are far more likely than general residential customers to have their service involuntarily terminated for nonpayment. These indicators demonstrate that Aqua's low income customers already struggle to afford water/wastewater services under existing rates. If Aqua's proposed rate increase is approved, low income consumers will likely experience even greater rates of payment trouble and involuntary termination, ultimately increasing the risk of consequences to the health and safety of low income customers and the corresponding level of uncollectible expenses recovered from other ratepayers.

First, Aqua's confirmed low income customers have markedly higher rates of involuntary termination for nonpayment compared to residential customers as a whole:

Table 3: Involuntary Terminations for Nonpayment (Confirmed Low Income (CLI) v. Residential Customers) (2020-2024)

	Residential Customers[42]	Residential Terminations[43]	Residential Termination Rate	CLI Customers[44]	CLI Terminations[45]	CLI Termination Rate
2020[46]	**418,661**	**1,345**	**.32%**	**21,840**	**448**	**2.1%**
2021	**409,224**	**7,378**	**1.80%**	**24,154**	**3,566**	**14.8%**
2022	**423,704**	**6,503**	**1.53%**	**26,041**	**3,665**	**14.1%**
2023	**403,149**	**7,666**	**1.90%**	**27,446**	**4,179**	**15.2%**

As shown in Table 4 above, in 2023, the termination rate among confirmed low income customers was *eight times higher* than the termination rate for residential customers as a whole. This significant disparity in termination rates of Aqua's low income customers as compared to those of its general residential customer base, at current rates, highlights the need to modify the present structure of low income support and underscores the vital need to address rate affordability for Aqua's low income customers prior to approving any proposed rate increase.

Aqua's confirmed non-CAP low income customers also carry significantly higher level of arrears compared to residential customers as a whole:

Table 4: Average Arrearage: Residential, Confirmed Low Income, CAP (2021-2024)[47]

	All Res.	CLI (excluding CAP)	CAP
Dec. 2021	$132.52	$222.69	--
Dec. 2022	$103.25	$196.87	$78.17
Dec. 2023	$122.07	$194.39	$88.85
May 2024	$124.52	$159.22	$84.84

[42] CAUSE-PA I-2, Attachment.
[43] CAUSE-PA I-18.
[44] CAUSE-PA I-4, Attachment.
[45] CAUSE-PA I-18.
[46] Data is as of December of the year indicated.
[47] OCA VI-11.

In May 2024 (the last reported month), confirmed low income customers with arrears carried average arrearages of $159.22, and CAP program participants with arrears carried an average arrearage level of $84.84. By comparison, residential customers with arrears (inclusive of low income customers) carried an average arrearage level of $124.52. As of May 2024, confirmed low income customers were carrying nearly 30% higher arrears per household than residential customers as a whole. These disproportionate arrearage levels further underscore the existing hardship that Aqua's confirmed low income customers who have not been able to enroll in CAP face to afford basic water/wastewater services – even before any rate increase is approved. It appears from this data that CAP enrollment is helping to reduce average debt levels – an indication that CAP enrollment leads to an amelioration of the burden of Aqua's rates. However, as I'll discuss below, fewer than 6% of Aqua's estimated eligible households have been enrolled. Finally, although confirmed low income customers account for 24% of residential customers carrying arrears, they account for 61% of the total amount of debt. [48]

It is essential that the underlying unaffordability of Aqua's rates is addressed in a comprehensive manner to prevent the unreasonable accrual of arrears, and to help low income customers to reasonably afford their monthly payments.

Q: Above, you explained that Aqua's low income customers face unaffordable water and wastewater burdens at <u>existing</u> rates. What would the applicable water and wastewater burdens be for low income customers at Aqua's <u>proposed</u> rates?

A: Aqua's proposed rate increases would exacerbate existing levels of unaffordability for Aqua's low income customers. The impact of the proposed increase on low income water rates varies not only between rate zone and across income levels, but also according to customer usage.

[48] CAUSE-PA I-4, Attachment, CAUSE-PA I-22, Attachment.

In addition to showing residential water and wastewater burdens at existing rates, CAUSE-PA Exhibit 1 also provides a snapshot of residential water and wastewater burdens at proposed rates for Rate Zone 1 Water and Rate Zone 1 Wastewater – broken down by income tier and at various usage levels, ranging from 2,000 to 10,000 gallons. As shown by CAUSE-PA Exhibit 1, low income customers will face unaffordable combined water/wastewater burdens at proposed rates. For example, at proposed rates, a family of four at 50% FPL using 6,000 gallons/month would have a combined water/wastewater burden of 20% - *1/5 of their monthly income*.

The varied rate impacts by usage levels detailed in CAUSE-PA Exhibit 1 are particularly important in the context of examining rate impacts for low income households, as low income households are more likely to live in aging housing stock with leaky pipes and fixtures, and are less able to afford repairs and efficiency upgrades to control usage levels.[49] The average water usage of a residential customer, excluding low income customers, ranged from 3,670 gallons in January 2024 to 4,260 gallons in June 2024.[50] For confirmed low income customers, however, water usage ranged from 4,892 gallons in January 2024 to 5,173 gallons in June 2024.[51] The average confirmed low income household's usage was 33% higher in the winter and 21% higher in the summer than a non-low income residential customer's usage. The impact of these disparities is that many of Aqua's low income customers are currently unable to afford existing rates and will be further affected by any approved increase in water rates as a result of this proceeding. Overall, the detailed water and wastewater burden charts in CAUSE-PA Exhibit 1 show the significant water/wastewater burdens that many low income customers bear at existing and proposed rates.

---

[50] CAUSE-PA I-19(b), Attachment.
[51] CAUSE-PA I-19(c), Attachment.

Q: How would Aqua's proposed rate increase impact vulnerable households?

A: As I noted above, the substantial rate increase proposed by Aqua is likely to cause increased terminations of economically vulnerable consumers or, in the alternative, will cause economically vulnerable households to go without other critical life necessities such as housing, energy, food, medicine, childcare, and other essential services to afford water and wastewater services to their home.

Water terminations pose a serious threat to public health and human dignity. Without access to running water, families are unable to cook, bathe, clean, or flush the toilet.[52] Access to water service is tied directly to the health and well-being of the household, and the habitability of the home.[53] Water terminations are akin to eviction from a home, as the home may be deemed uninhabitable or even condemned following termination of water service, forcing families to vacate with little to no notice.[54] Termination of service to the home can also jeopardize parental custody of children, trigger eviction and condemnation, result in the loss of housing assistance, and is often cited as a catalyst for homelessness[55] In fact, utility insecurity and bill payment trouble itself is a predictor of first-time homelessness.[56]

[56] Colin Middleton, Kim Boynton, David Lewis & Andrew M. Oster, The Value of Utility Payment History in Predicting Homelessness, PLOS (Oct. 9, 2023), available at: https://journals.plos.org/plosone/article?id=10.1371/journal.pone.0292305.

Even at Aqua's current rates, low income families must make difficult choices between paying for utility services and other basic necessities – raising rates for these consumers will make their ability to afford and/or obtain and retain such necessities more difficult.

Q: Are low income customers enrolled in Aqua's CAP protected from the financial impact of the proposed rate increase?

A: CAP will reduce (though not eliminate) the financial impact of Aqua's proposed rate increases for CAP participants. Unlike a Percentage of Income Program, which ties rates directly to each participant's household income, Aqua's CAP is designed as a tiered rate discount program which provides an aggregated group of participants a percentage discount on rates. Further, volumetric discounts on water and wastewater rates apply *only* to the first 2,000 gallons of usage.[57] When rates increase, without a corresponding increase in the CAP discount, the resulting CAP charges necessarily increase. The effectiveness of Aqua's CAP at offsetting the impact of an approved rate increase is dependent on approval of robust enhancements to the structure and level of discounts provided under the CAP and the ability of customers to enroll.

As it stands, Aqua's CAP enrollment remains very low – reaching just 5.9% of Aqua's estimated low income customers and 22% of Aqua's confirmed low income customers (those *already known* by the Company to be income eligible for CAP) as of June 2024. [58] Low income customers that are not enrolled in the CAP, over 94% of estimated low income customers, will shoulder the full, unmitigated financial burden of the rate increase – compounding existing high levels of rate unaffordability.

[57] Aqua St. 13 at 3-4.
[58] CAUSE-PA I-4, Attachment; CAUSE-PA I-5, Attachment.

Q: What is your overarching conclusion about the impact of Aqua's proposed rate increase on low income water and wastewater customers?

A: Aqua's current rates are already unaffordable for its low income customers, especially for those at the lowest end of the poverty scale (at or below 50% FPL) and those with higher usage and/or larger family sizes. Increasing rates will push service further out of reach for those many customers who already struggle to make ends meet.

V. AQUA LOW INCOME ASSISTANCE PROGRAMS

Q: Please summarize Aqua's current low income assistance programs.

A: Aqua offers three distinct low income assistance programs: a Customer Assistance Program (CAP), a hardship fund (Aqua Aid), and a leak repair and conservation program.[59]

CAP: Aqua's current CAP program replaced its Helping Hand program following the conclusion of Aqua's 2021 Base Rate Case.[60] CAP provides tiered discounts for customers with incomes up to 200% FPL. The program also includes an arrearage forgiveness component of $25 per month, provided that the CAP participant pays their monthly bill on time.[61] CAP is administered primarily by a third party administrator, Dollar Energy Fund (DEF). There are a limited number of Community Based Organizations (CBOs) and two in-house Aqua employees who may also process applications.[62]

Aqua Aid: Like CAP, a version of Aqua Aid was functioning as Helping Hand until Aqua's last Base Rate Case filing in 2021, where Aqua proposed to relaunch the program as Aqua Aid.[63] The 'new' Aqua Aid program was launched in late 2023.[64] Aqua Aid

[59] Aqua St. 13 at 3-5.
[60] Id. at 5.
[61] Id. at 3-4.
[62] CAUSE-PA I-8, Attachment 1.
[63] Aqua St. 13 at 4-5.
[64] Id. at 7.

provides for grants of up to $500 once per year for those households able to access one, with some flexibility on grant maximum dependent on individual circumstances. The income eligibility for Aqua Aid is also 200% FPL but provides for some flexibility up to 250% FPL for special needs customers; for example, older or disabled customers.[65] Aqua also maintains some flexibility regarding actual grant amounts, depending on circumstances; for example, a significant leak that has since been repaired.[66] Aqua Aid grants are solely administered by Aqua's two in-house CAP team employees.[67]

Leak Repair and Conservation Program: In 2023, Aqua launched a conservation and leak repair program with an income eligibility of 200% FPL and initial budget of $100,000.[68] The leak repair component is designed to assist low income customers who are receiving very high bills due to a leak they cannot afford to repair. It can assist with smaller fixes, like a leaky toilet, or larger leaks like substantial service line leaks.[69] It is unclear from the Company's filing how a customer can access a conservation kit independent of having had a leak repaired. The leak repair and conservation program is administered by Aqua's two in-house CAP team employees.[70]

Q: Is Aqua's CAP producing affordable bills for program participants at current rates?

A: No. Although assisting in reducing the level of arrears, as currently structured, CAP is not providing precise levels of affordability for its participants. The unaffordability of CAP rates is particularly pronounced for higher usage and lower income customers. For example, as shown in CAUSE-PA Exhibit 1, a four person household enrolled in CAP living right at the federal poverty

[65] Id. at 7-8.
[66] CAUSE-PA I-9, Attachment.
[67] CAUSE-PA II-17.
[68] Aqua St. 13 at 13.
[69] Id.
[70] CAUSE-PA I-28.

level (100% FPL), using 6,000 gallons per month, would have a combined water and wastewater burden of 7%. A CAP household living at 50% FPL with that same usage, such as a mother with three children working a full-time minimum wage job, would have a combined water and wastewater burden of 11%. These resulting water burdens are well above the generally accepted affordability standards discussed above.

One significant issue with Aqua's current (and proposed) CAP structure is the lack of segmentation between customers between 0-50% FPL and those between 51-100% FPL. The effect of this structure is that, for any household using more than 2,000 gallons per month, a household at 50% FPL will have twice the water and wastewater burden of a household at 100% FPL. This structure does not sufficiently mitigate costs for those households at the lowest end of the poverty scale.

Regarding both water and wastewater CAP structures, there is no volumetric discount above 2,000 gallons of usage. In other words, the program effectively functions as a flat rate discount. This fixed structure of discount is insufficient, especially for larger households, and contributes to existing disparities in water and wastewater burdens for the lowest income households. Low income households often have disproportionately higher usage as a result of plumbing and fixture leaks from living in older homes, as evidenced by usage levels cited above – yet most often lack the discretionary income to invest in repairs themselves and/or are unable to force their landlord to make such repairs.[71]

Q: Is Aqua proposing any changes to its CAP?

A: No.

[71] Water/Color Report at 28.

Q: Do you have any proposed reforms to improve affordability for CAP participants?

A: Yes. I recommend that Aqua amend its CAP structure and discount levels to improve rate affordability. This is especially critical to help mitigate the impact of any rate increase approved in the context of this proceeding.

Q: What reforms do you recommend making to the structure and discount levels of the CAP, and why?

A: First, I recommend that Aqua extend its volumetric discount to improve affordability for larger families and higher usage. As currently structured, the volumetric discount is only applied to the first 2,000 gallons of usage per month. This CAP structure does not produce equitable and consistently affordable rates for CAP participants, especially considering that low income households have proportionally higher water consumption than other residential customers. As of June 2024, the average water usage level of a residential customer, excluding confirmed low income customers, was 4,260 gallons per month.[72] In comparison, the average usage level of a confirmed low income residential customer was 5,173 gallons per month.[73] This means that confirmed low income customers are using an average of 21.4% more water than non-low income residential customers. Due to this higher average usage, not only are low income customers already seeing higher bills than residential customers who are not low income, the very limited volumetric discounts are not producing consistently affordable rates for CAP participants.

Second, I recommend that Aqua disaggregate its discount levels between 0-50% FPL and 51-100% FPL. As shown in CAUSE-PA Exhibit 1, at Aqua's proposed rates, a family of four enrolled in CAP using 6,000 gallons per month with income at 50% FPL will have a combined

[72] CAUSE-PA I-19(b), Attachment.
[73] CAUSE-PA I-19(c), Attachment.

water and wastewater burden of 11%, whereas that same family at 100% FPL will have a combined water and wastewater burden of 5%. While neither bill is affordable, tiered discounts must be designed to result in acceptable water and wastewater burdens for all low income households and are not adequate if they result in households at 50% FPL carrying more than twice the burden as households at 100% FPL.

In the context of past rate proceedings with regulated water companies, I have recommended that a tiered Percentage of Income Payment (PIP) structure be implemented, as have other experts for CAUSE-PA and OCA.[74] I stand by past analyses which determined that implementing a PIP structure would, in the long term, ensure that those with the lowest levels of FPL and/or with larger families are not paying a disproportionate level of their incomes for critical and life-sustaining water/wastewater services. This is particularly true as rates for basic water and wastewater services are likely to continue to rise in the short term, further increasing the exigency that Aqua's program structure deliver accessible, consistent, and equitable levels of affordability to economically vulnerable households. While I continue to support adoption of a PIP structure as the preferred method of targeting and achieving affordability for low income customers, I recognize there may be current system constraints that complicate adoption of a PIP at this time. Thus, in the context of the present case, I recommend that Aqua adopt shorter-term revisions to the CAP discount levels to improve rate affordability and equity within the program. Nevertheless, I continue to believe that Aqua should ultimately transition to a PIP. Should Aqua undergo any systems upgrades, it should be required to ensure the upgrades will support implementation of a PIP structure in the future.

---

[74] Pa. PUC v. PAWC, CAUSE-PA St. 1, Docket No. R-2022-3031672, et al (July 29, 2022). Pa. PUC v. PAWC, OCA St. 5, Docket No. R-2022-3031672, et al (July 29, 2022); Pa PUC v. PWSA, Pittsburgh United St. 1, Docket No. R-2023-3039919, -20, -21 (August 9, 2023).

As an interim solution to help address unaffordability within CAP, I recommend the following CAP structure and discount levels to better ensure the program produces affordable water/wastewater burdens and participants stay connected to services:

Table 5: Recommended CAP Levels and Discounts

	Water		Wastewater	
	Fixed Charge	**Volumetric Charge** (all usage)	**Fixed Charge**	**Volumetric Charge** (all usage)
Tier 1 (0-50% FPL)	100%	85%	85%	85%
Tier 2 (51-100% FPL)	100%	75%	75%	75%
Tier 3 (101-150% FPL)	100%	50%	65%	50%
Tier 4 (151%-200% FPL)	100%	25%	50%	25%

Pursuant to this proposal, customers with income levels between 0-200% FPL would see marked improvements to bill affordability and reductions in water/wastewater burdens, especially those customers living at the lowest end of the income scale. As stated above, the average income of Aqua's confirmed low income customers is just $20,627.40.[75] Under Aqua's proposed rates, a CAP household of four at this average CAP income level, using 6,000 gallons per month, would see a combined water and wastewater burden of over 8%. By comparison, under my recommendation the very same CAP participant (same household size, usage, and income) would have a 3.4% combined water/wastewater burden under the above-described CAP proposal, which is within accepted affordability standards. CAUSE-PA Exhibit 1 provides a full breakdown of relative water and wastewater burdens at current and proposed CAP rates.

At the proposed discount levels I have outlined, low income customers will be able to realize levels of affordability consistent with income level, household size, and usage levels. This will in turn help to improve CAP payment rates, reduce disproportionately higher arrears, and

[75] CAUSE-PA I-6.

prevent disproportionately high rate of payment trouble and involuntary termination. While adoption of my recommended reforms is needed now, to address current rate unaffordability, these reforms will become even more crucial if the Commission were to approve a further increase in water and wastewater rates as a result of this proceeding. I note that my recommendations in this proceeding should not be read as preclusive of the need for longer-term improvements, including transition to a PIP, to ensure that Aqua's CAP provides consistent affordability to its participants.

It is imperative that additional improvements are made so that economically vulnerable households across Aqua's service territory receive a reasonably affordable water and wastewater bill – lessening the disproportionately high burdens low income families face. Utility assistance programs are most successful at achieving programmatic goals (improved affordability and bill payment, as well as reducing uncollectible expenses) when they are designed to deliver consistent and targeted levels of affordability across income and usage levels in tandem with meaningful arrearage management.[76]

Q: Do you have concerns about the number of Aqua customers that are enrolled in Aqua's CAP?

A: Yes. I am concerned that only a very small portion of Aqua customers are currently enrolled in CAP – far fewer than those who Aqua has already identified in its system as income eligible for the program.

[76] See e.g., NRDC, Water Affordability Toolkit: Affordability and Assistance Programs, available at: https://www.nrdc.org/sites/default/files/water-affordability-toolkit-section-8.pdf.

Table 6: CAP Enrollment v. Confirmed & Estimated Low Income Customers

	CLI Customers[77]	ELI Customers[78]	CAP Participants	CLI % Enrollment	ELI % Enrollment
Dec. 2023	27,446	109,143	5059	18%	4.6%
June 2024	28,918	109,143	6457	22%	5.9%

As the above Table shows, CAP enrollment remains extremely low amongst customers who Aqua has already confirmed to be low income. Indeed, roughly 80% of households *known* to be eligible for Aqua's CAP are not enrolled. Tens of thousands of other low income consumers, not identified by the Company, remain unenrolled. Based on Aqua's estimated low income customer count of 109,143,[79] Aqua's CAP has reached only 4-6% of its estimated eligible households since 2023. Improvements are needed to ensure the program is accessible to all eligible households.

Ms. Black states in her testimony that Aqua is currently projecting CAP enrollment to increase to 12% of its estimated low income customer base by the end of 2024, and to 20% by the end of 2025.[80] Ms. Black also notes in her testimony that Aqua saw "challenges in enrolling customers in CAP with the new income documentation requirements."[81] She then goes on to state that "customers with arrears often follow the path of least resistance, meaning when given option between making a verbal payment agreement and completing an application and submitting income documentation to participate in a more beneficial program, they may opt for the verbal agreement."[82] My extensive experience indicates that this observation is correct. Given that the

[82] Id. at 10:10-13.

arrearage and termination levels for CAP participants is far lower than for Aqua's low income non-CAP participants, and further given that Aqua's CAP enrollment rate needs to improve, Aqua should make every effort to make enrolling in CAP a greater priority and as simple as entering a payment arrangement. I will provide several recommendations below.

Aqua's efforts in data sharing with the Pennsylvania Department of Human Services (DHS) to conduct outreach and enroll LIHWAP recipients into CAP was helpful to jumpstart enrollment as the program began.[83] However, LIHWAP has been closed since August 2023[84], and that pool of applicants may soon be exhausted, if it has not been already. It will require significant *additional* outreach – together with streamlined and simplified enrollment processes - to reach acceptable levels of CAP enrollment. Even if Aqua is able to meet the modest enrollment goals it set out to achieve, the vast majority of low income customers in Aqua's service territory will still not be enrolled in CAP. Unless and until Aqua improves CAP access, the vast majority of low income customers in Aqua's service territory will continue to be charged categorically unaffordable bills.

Aqua must take immediate steps to increase outreach to and enrollment of the remaining 94% of its estimated low income population that is not currently enrolled in CAP. It is critical that Aqua address the disparate rates of payment trouble and terminations among low income customers, which will grow more pronounced if its substantial rate increase proposal is approved.

[83] Aqua St. 13 at 10-11.
[84] Press Release, Shapiro Administration Extends Deadline to Apply for LIHWAP to Help Pennsylvanians Pay Utility Bills (Aug. 16, 2023), https://www.media.pa.gov/pages/dhs_details.aspx?newsid=946.

Q: Do you have recommendations to improve CAP enrollment for Aqua's low income customers?

A: Yes. As an overarching matter, I recommend that the Commission require Aqua to develop and submit a comprehensive Universal Service Plan for periodic Commission review and approval. Currently, as a water/wastewater utility, Aqua is not explicitly required by statute to submit periodic plans related to their low income assistance programming for Commission review and approval. This leaves a substantial gap for the Commission, consumers, and utility advocates, who must rely on Aqua's tariffs and the information that can be pieced together from Aqua's website or Commission orders to determine important program rules, polices, and procedures for Aqua's low income assistance programs. Indeed, there is presently no central place for the Commission or consumers to reference basic facts about Aqua's program eligibility, rate discounts, grant amounts, and enrollment process. This engenders consumer confusion and hampers consumers' ability to learn about and ultimately enroll in Aqua's low income assistance programs. I therefore recommend that Aqua be required to file a Universal Service Plan and an accompanying Petition for Commission review and approval within one year of the final Order in this case.

Second, to more accurately identify and better serve its low income customer base, I recommend that Aqua screen all new and moving customers for income eligibility at the time their service is established. For existing customers, Aqua should routinely screen for income on any non-emergency calls, and/or should inquire whether there has been any update to their income information already noted in their account. Upon establishing an online account, and once annually thereafter, customers should be given the opportunity to voluntarily self-disclose any changes to their income information. All customers identified as low income through this process should be identified in the system as a confirmed low income customer and should be referred for enrollment

in Aqua's low income assistance programs. Consumers should be able to opt out of disclosing their income if they so choose but should first be informed that they may be eligible for lower rates or efficiency and conservation measures.

Third, I recommend that Aqua develop call center scripting that encourages income eligible customers to pursue CAP enrollment and/or other available assistance programs before entering an unaffordable payment arrangement. To help reduce barriers to enrollment in CAP, Aqua should implement a warm transfer to DEF to complete the enrollment process and should temporarily suspend collections while the customer's application is reviewed.

Fourth, Aqua should work with its Aqua Assistance Collaborative (AAC), its advisory collaborative, to identify ways to further streamline CAP enrollment, including but not limited to the use of categorical eligibility and pursuit of additional data sharing agreements with local and state agencies and other utilities that operate similar programs.

Fifth, Aqua should expand its partnerships with local, community-based organizations (CBOs) to improve program outreach and assist with program enrollment. CBOs are rooted in the community and administer a range of human services programs designed to improve the health, safety, and financial security of low income Pennsylvanians.

Finally, Aqua should be required to establish quantitative goals related to affirmative customer outreach for the purpose of enrolling low income customers in CAP. This affirmative outreach should include telephone contacts, mailings, and forms of electronic communication (with customer consent). Aqua should also be required to track and report relevant data regarding its progress to its AAC to help refine outreach efforts based on data-driven analysis of outcomes. Aqua should in turn expand membership of its AAC to include a broader array of community voices from all corners of Aqua's expansive service territory.

Improving the identification of low income customers, and better matching them to critical rate assistance, debt management, and usage reduction services at the earliest opportunity, is essential to improving Aqua's ability to provide just and reasonable rates and services to low income households – especially in light of Aqua's request to substantially increase residential rates through this proceeding. It would also help improve the ability of Aqua, the Commission, and stakeholders to assess Aqua's customer service metrics – including its credit, collections, termination, reconnection, complaint, and universal service data – to determine whether and to what extent its rates, policies, and programs are just and reasonable in appropriately serving the needs of its low income customers.

Q: Is Aqua proposing any changes to Aqua Aid in the context of this proceeding?

A: No.

Q: Do you have any concerns related to Aqua Aid?

A: Yes. While the grant levels seem sufficient based on average arrearage levels for confirmed low income and CAP customers, the miniscule number of grants being processed is concerning in light of the disparate confirmed low income termination rates as discussed above. In 2023, Aqua reported a total of 20 grants processed[85] yet 4,179 confirmed low income customers had their service involuntarily terminated for nonpayment.[86] Thus far in 2024, just 46 Aqua Aid grants have been processed,[87] yet 1,457 confirmed low income customers – including many CAP customers – have had their service involuntarily terminated due to nonpayment.[88] This evidence suggests that Aqua Aid is not appropriately accessible to those in need.

[85] CAUSE-PA I-26.
[86] CAUSE-PA I-18.
[87] See CAUSE-PA I-26, response does not specify end date of 2024 reporting.
[88] CAUSE-PA I-18.

Q: Do you have any recommendations related to Aqua Aid?

A: Yes. Consistent with my earlier recommendations regarding CAP, Aqua should routinely screen and refer eligible customers to Aqua Aid and should expand partnerships with local Community Based Organizations to improve program outreach and assist with enrollment. Aqua should work with its AAC to identify potential CBO partners across Aqua's wide ranging service territory.

Q: Please describe Aqua's current water efficiency assistance programming.

A: Aqua's existing programming consists of furnishing conservation kits as well as providing leak repairs at no cost to the customer.[89] The program is run by Aqua's in-house Customer Assistance Program team and their number is provided to customers via information in termination notices and through field personnel.[90] Aqua initiated the program with a budget of $100,000 and proposes to increase that budget to $132,000 in 2025.[91] Further, Aqua is intending to segment its 2025 budget by type of service as follows: $50,000 for service line leak repairs, $82,000 for inside leak repairs, and $22,000 for conservation kits.[92]

Q: Do you have any concerns about Aqua's water efficiency programming?

A: I appreciate that Aqua has voluntarily instituted a leak repair and conservation program and is actively taking feedback from its AAC. I also recognize that this is a relatively new program with limited data, and my recommendations below are intended to help ensure the program's success. Nevertheless, I am concerned the budget is not adequate to appropriately scale up the program across Aqua's broad service territory. I am also concerned that Aqua is not tracking

[89] Aqua St. 13 at 12-13.
[90] Id.
[91] Id. at 14: 10-12.
[92] Id. at 15.

appropriate metrics to assist in evaluating the success of the program and identifying needed reforms or gaps in available services.

Q: Do you have any recommendations about Aqua's water efficiency programming?

A: Yes. First, I recommend that Aqua increase its budget for conservation, line, and leak repair. As I have explained at length, the proposed rate increase will fall hardest on higher usage households – even for those enrolled in CAP. Based on the size of Aqua's service territory, Aqua's proposed annual budget of just $132,000 per year seems inadequate to serve likely need. Reduction of unnecessarily high water usage among low income customers is in the interest of all residential consumers. I recommend Aqua increase available funding for this program to $400,000, split proportionately across the different conservation and line repair services. This increase would provide the Company flexibility to provide usage reduction services. It would also allow Aqua to more effectively target high usage customers enrolled in CAP, which is an important cost-control measure for the program.

Second, I recommend Aqua track specific performance metrics so the success of the program can be monitored and provide valuable data for adjustments in the future. First, I recommend that Aqua track the households receiving conservation kits and track usage levels at three months and six months after receiving the kits. Aqua should also attempt to follow up with customers between 30 and 60 days of receiving the kits to determine whether the customers have installed them, if they need any assistance installing them, and if they have any further questions regarding the kits. Ideally, this call would also function as an additional CAP outreach for those recipients not yet enrolled. Aqua should continue to work with its AAC to determine the precise avenue and wording of these outreaches.

Third, I recommend similar tracking metrics for customers that received both service line leak repairs and inside leak repairs, to review usage one week post-repair to confirm that the repair was successfully completed and that there may not be additional repairs needed. If it appears based on usage that further repairs may be necessary, Aqua should proactively reach out to these customers to coordinate whatever follow up may be necessary. By reviewing usage soon after initial repairs, this may prevent the customer receiving another high and/or unaffordable bill.

Finally, Aqua should be required to coordinate its service delivery with other utilities in its service territories that operate energy efficiency and conservation programs, such as Low Income Usage Reduction Programs (LIURP) and Act 129 programs. Many utility conservation programs already provide a number of measures that increase water efficiency in customers' households, such as low-flow faucets and shower heads.[93] Partnering with other energy efficiency programs will not only allow Aqua to leverage other utility conservation programs, but it will also ensure that customers can obtain comprehensive conservation measures to reduce their overall water and energy usage.

VI. SUMMARY OF RECOMMENDATIONS

Q: Please summarize the recommendations you have made throughout your direct testimony.

A: In my direct testimony, I have made several recommendations to address unaffordability of Aqua's rates for water/wastewater services at both present and proposed rates for low income customers. I recommend that the Commission order the following:

[93] See 52 Pa. Code § 58.14.

Low Income Household Identification

- That Aqua adopt a broader definition of confirmed low income customers, including other information or indicators that reasonably places the customer in a low income designation. Such information should include:
    - Enrollment or participation in a low income assistance or conservation program (CAP, Aqua Aid, or Aqua's leak repair and conservation program).
    - Receipt of a federal, state, or local utility assistance, such as LIHWAP or LIHEAP.
    - Receipt of other emergency utility assistance.
    - Indication by the customer of inability to pay current bill and/or requests for income based payment arrangements.
    - Contact immediately prior to termination.
    - Other referrals to low income programs.
    - Self-certification by the customer.
    - Income information received based on request for a medical certificate.

CAP Structure

- That Aqua disaggregate its discount levels between 0-50% FPL and 51-100% FPL.
- That Aqua extend its volumetric discount to improve affordability for larger families and higher usage.
- That Aqua revise its CAP structure and discount levels to the structure and levels shown in Table 12.

CAP Enrollment and Outreach

- That Aqua develop and submit a comprehensive Universal Service Plan for periodic Commission review and approval.
- That Aqua screen all new and moving customers for income eligibility at the time their service is established. For existing customers, Aqua should routinely screen for income on any non-emergency calls, and/or should inquire whether there has been any update to their income information already noted in their account
- That Aqua develop call center scripting that appropriately encourages customers to pursue CAP enrollment before entering an unaffordable payment arrangement.
    - Aqua should establish a warm transfer process to refer income eligible customers to DEF to complete an application and should temporarily suspend collections and/or termination while the application is processed.
- That Aqua work with its Aqua Assistance Collaborative (AAC) to identify ways to further streamline CAP enrollment, including but not limited to, the use of categorical eligibility and pursuit of additional data sharing agreements with local and state agencies and other utilities that operate similar programs.
- That Aqua expand partnerships with Community Based Organizations (CBOs) to assist with outreach and enrollment.

- That Aqua establish quantitative goals related to affirmative customer outreach for the purpose of enrolling low income customers in CAP.

Aqua Aid

- That Aqua explore the expanded use of Community Based Organizations (CBOs) that are already providing services to customers likely to be eligible for Aqua Aid, along with other of Aqua's low income assistance programs.
- That Aqua work with its AAC to identify potential CBO partners across Aqua's wide ranging service territory.

Leak Repair and Conservation Program

- That Aqua increase its budget for conservation, line, and leak repair to $400,000, with targeted outreach to high usage CAP customers.
- That Aqua track the households receiving conservation kits and track usage levels at three months and six months after receiving the kits. Aqua should also attempt to follow up with customers between 30 and 60 days of receiving the kits.
- That, for those customers who received leak repairs, Aqua review usage one week post-repair to confirm that the repair was successfully completed and that there may not be additional repairs needed.
- That Aqua coordinate its service delivery with other utilities in its service territories that operate energy efficiency and conservation programs, such as Low Income Usage Reduction Programs (LIURP) and Act 129 programs.

Q: Does that conclude your direct testimony?

A: Yes; however, I reserve the right to submit rebuttal and surrebuttal testimony in response to testimony submitted by other parties in this proceeding.

Appendix A

Resume - Harry S. Geller, Esq.

RESUME OF HARRY S. GELLER

EDUCATIONAL BACKGROUND:

Harpur College, State University of New York at Binghamton, B.A. 1966
Washington College of Law, American University, J.D. 1969
New York University Law School, courses in Urban Affairs and Poverty Law, as part of Volunteers in Service to America (VISTA) Program 1969-1971

EMPLOYMENT:

1988 – 2015 Executive Director, Pennsylvania Utility Law Project (PULP), a project of the civil non-profit Pennsylvania Legal Aid Network. PULP is dedicated to providing technical support, information sharing, and representation to low-income individuals and organizations, assisting and advocating for the low income in utility and energy matters. Responsibilities include project oversight, case consultation, co-counseling, and participation on task forces, work groups and advisory panels, community education and training in utility and energy matters affecting the low income.

While at PULP, served in the following capacities:

- Chairman, Low-Income Home Energy Assistance Program (LIHEAP) Advisory Committee to the Secretary, Pennsylvania Department of Human Services
- Member, Pennsylvania Public Utility Commission, Consumer Advisory Council Coordinator, Pennsylvania Legal Services Utility/Energy Work Groups
- Member, Weatherization Policy Advisory Committee to the Department of Community and Economic Development
- Member, PECO Universal Service Advisory Committee and LIURP Subcommittee

1974-1987 Staff Attorney, Managing Attorney and ultimately, Executive Director of Legal Services, Incorporated (LSI), a civil legal services program serving Adams, Cumberland, Franklin and Fulton Counties. Through a restructuring with other legal services programs, LSI became part of what is now known as MidPenn Legal Services and Franklin County Legal Services.

1971-1972 Staff Attorney, New York City Legal Aid Society, Criminal Court and Supreme Court Branches, New York County.

1969-1971 Volunteer in Service to America (VISTA) assigned to the New York University Law School Project on Urban Affairs and Poverty Law.

BAR ADMISSIONS

New York State
Commonwealth of Pennsylvania
United States District Court, Middle District of Pennsylvania

Cases in which Harry S. Geller has participated as a witness before the Pennsylvania Public Utility Commission since July 1, 2015

- Pennsylvania Public Utility Commission v. FirstEnergy Pennsylvania Electric Company, Docket No. R-2024-3047068
- Pennsylvania Public Utility Commission v. Duquesne Light Company, Docket No. R-2024-3046523
- Petition of PPL Electric Utilities Corp. for Approval of DSP for Period of June 1, 2025 through May 31, 2029, Docket No. P-2024-3047290
- Pennsylvania Public Utility Commission v. Peoples Natural Gas Company, LLC, Docket No. R-2023-3044549
- Pennsylvania Public Utility Commission v. PGW, Docket No. R-2023-3037933.
- Pennsylvania Public Utility Commission v. PWSA, Docket Nos. R-2023-3039920; R-2023-3039921; R-2023-3039919
- Pennsylvania Public Utility Commission v. PAWC, Docket Nos. R-2023-3043189; R-2023-3043190
- Pennsylvania Public Utility Commission v. Peoples Natural Gas Co. LLC, Docket No. R-2023-3044549
- Petition of PPL Electric Utilities Corp. for Approval of DSP for Period of June 1, 2025 through May 31, 2029, Docket No. P-2024-3047290
- Pennsylvania Public Utility Commission v. Philadelphia Gas Works, R-2022-3034229, P- 2022-3034264
- Pennsylvania Public Utility Commission v. National Fuel Gas Distribution Corporation, R-2022-3035730
- Pennsylvania Public Utility Commission v. Columbia Gas of Pa., Docket No.
- R-2022-3031211
- Pennsylvania Public Utility Commission v. Pa. American Water Co., Docket Nos.
- R-2022-3031672 & -3031673
- Pennsylvania Public Utility Commission v. UGI Utilities, Inc. – Gas Division, R-2021- 3030218.
- Joint Petition of MetEd, Penelec, Penn Power, and West Penn Power for Approval of their Default Service Programs for the Period Commencing June 1, 2023 through May 31, 2027, Docket Nos. P-2021-3030012, -13, -14, -21
- Pennsylvania Public Utility Commission v. Aqua Pennsylvania, Inc. and Aqua Pennsylvania Wastewater, Inc., Docket Nos. R-2021-3027385, R- 2021-3027386.
- Pennsylvania Public Utility Commission v. Pittsburgh Water and Sewer Authority, R-2021-3024773, R-2021-3024774, R-2021-3024779.
- Pennsylvania Public Utility Commission v. Duquesne Light Company, R-2021- 3024750.
- Pennsylvania Public Utility Commission v. PECO Energy – Electric Division, R-2021-3024601.
- Pennsylvania Public Utility Commission v. Columbia Gas of Pennsylvania, Inc., R-2021-3024296.
- Tenant Union Representative Network v. PECO Energy Company, C-2020-3021557
- Pennsylvania Public Utility Commission v. Philadelphia Gas Works, R-2020-3017206.

- Petition of PPL Electric Utilities Corporation for Approval of a Default Service Program for the Period of June 1, 2021 through May 31 , 2025, Docket No. P-2020-3019356.
- Petition of PECO Energy Company for Approval of Its Default Service Program for the Period from June 1, 2021 through May 31, 2025, Docket No. P-2020-3019290.
- Petition of Duquesne Light Company For Approval of Default Service Plan For The Period June 1, 2021 Through May 31, 2025, Docket No. P-2020-3019522.
- Joint Application of Aqua America, Inc., Aqua Pennsylvania, Inc., Aqua Pennsylvania Wastewater, Inc., Peoples Natural Gas Company LLC and Peoples Gas Company LLC for all of the Authority and Necessary Certificates of Public Convenience to Approve a Change in Control of Peoples Natural Gas Company LLC, and Peoples Gas Company LLC by way of the Purchase of all of LDC Funding LLC's Membership Interests by Aqua America, Inc., Docket Nos. A-2018-3006061, A-2018-3006062, A-2018-3006063.
- Pennsylvania Public Utility Commission v. Aqua Pennsylvania, Inc. et al. Docket Nos. R-2018-3003558 et seq.
- Pennsylvania Public Utility Commission v. Duquesne Light Company, Docket No. R-2018-3000124.
- Pennsylvania Public Utility Commission v. PECO Energy Company- Electric Division, Docket No. R-2018-3000164.
- Joint Petition of MetEd, Penelec, Penn Power, and West Penn Power for Approval of their Default Service Programs for the period commencing June 1, 2019 through May 31, 2023, Docket Nos. P-2017-2637855, P-2017-2637857, P-2017-2637858; P-2017-2637866.
- Pennsylvania Public Utility Commission et al. v. Philadelphia Gas Works, Docket No. R-2017-2586783.
- PECO Energy Company's Pilot Plan for an Advance Payments Program and Petition for Temporary Waiver of Portions of the Commission's Regulations with Respect to that Plan, Docket No. P-2016-2573023.
- Petition of PECO Energy Company for Approval of a Default Service Program for the Period of June 1, 2017 through May 31, 2019, Docket No. P-2016-2534980.

DOCKET NO. R-2024-3047822 & R-2024-3047824

COALITION FOR AFFORDABLE UTILITY SERVICE AND ENERGY EFFICIENCY IN PENNSYLVANIA

DATA REQUEST SET I

CAUSE-PA-I-1 How much of Aqua's approximately $126 million total proposed increase is proposed to be allocated to an increase in residential rates? Please disaggregate between water and wastewater divisions.

RESPONSE

Please see CAUSE-PA-I-1 Attachment which shows the change in revenues from present to proposed rates as of December 31, 2025, by customer class, and further broken down by each water and wastewater division.

DATA REQUEST SET I

CAUSE-PA-I-5 As of the most recent date available, how many estimated low income customers reside in Aqua's service territory, disaggregated by division? Please explain how Aqua arrived at its estimated figures and include citation and/or copies of any and all workpapers used to perform this estimation.

RESPONSE See CAUSE-PA-I-5 - Attachment. Census data by county was utilized to determine the estimated low income population.

DATA REQUEST SET I

CAUSE-PA-I-8 What are the policies and procedures for eligibility and enrollment in Aqua's CAP? Please provide a copy of all written policies and/or procedures, memoranda, training materials, and other written documents, created by Aqua or the agencies and/or organizations contracted to administer Aqua's programs, which describe the policies and procedures for eligibility and enrollment in Aqua's CAP.

RESPONSE Please see CAUSE-PA-I-8 – Attachment 1 – 3 for all documents related to the administration of Aqua's CAP by Dollar Energy Fund, including training and reference materials.

Aqua Pennsylvania

CAP

Mailing Address:

Aqua CAP

P.O. Box 42329

Pittsburgh, PA 15203

Program Fax:
1-412-515-1662

Program Email:
aqua@defdocs.org

Program Telephone Number (Dollar Energy Fund):
1-888-282-6816

Aqua:
1-877-987-2782

Public Utility Commission
1-800-692-7380

Program Overview:

The **Aqua Customer Assistance Program (CAP)** is a discount program designed to provide monthly financial assistance for residential water and/or wastewater customers.

Program guidelines and eligibility requirements are subject to change.

Aqua Pennsylvania is a part of Essential Utilities Company, serves more than 1.4 million residents in 32 counties in Pennsylvania.

Aqua PA has been using an assistance program called Helping Hand was designed to assist low-income customers to manage their water bill. CAP will replace the Helping Hand Program.

Dollar Energy Fund Contact Center will be overseeing a Customer Assistance Program (CAP) for Aqua CAP. Phone lines will be open from 8am-5pm Monday through Friday.

Systems Used for CCSs:

- CRM
- MyApp
- OSCAR

Systems Used for Income Specialists

- CRM
- Docuware
- MyApp
- OSCAR

CAP Details and Eligibility:

CAP provides an overall discount on the customer's bill:

- **0-200% FPIG (tiered program- see charts on next page)**
- Must be a **residential** account
- The **ratepayer must live in the residence** they would like to enroll in CAP
- **Proof of income for anyone over 18 and not in high school**
    - You can use your normal income chart to advise what proof to send in
    - Customer can submit their W-2 from the previous year instead of paystubs
- Assistance with past due balances and termination notices
    - Past due balance assistance is known as arrearage forgiveness
    - If a customer has a termination notice, applies for program, **and is enrolled**, term is stopped.
- Most times, the customer CAN be reinstated/re-enrolled into the program.
    - The original deferment balance will be put back into deferment.
    - Possibility of additional debt accrued while removed from the program also deferred with original debt.
- Previously, Aqua CAP did not help with restoral of services. As of 3/10/2023, if services are terminated, customers should be advised to submit income. If income is verified, and the customers qualifies for this program, restoration of water service can be scheduled. See full service off procedure.
- It is possible to have Aqua for both water and wastewater, just water or just wastewater. Be sure to ask the customer who their provider is for water and wastewater.

After enrollment, customers must do the following to remain on the program:

- Complete a recertification:
    - SS/SSI/SSD/SSP/Pension or those enrolled by Aqua due to receiving LIHWAP will recertify every 3 years

- Zero Income customers will recertify every 6 months
- Other customers will recertify every 2 years

- When it's time to recertify, customers will be notified by a letter within 60 days of the benefit end date and then 30 days, if customer has not completed the re-cert when the first letter was mailed.
- Customers can also be removed if they call in and report household/income changes that put them over 200% FPIG

Current Discount Tiers:

RESIDENTIAL WATER CUSTOMERS			
	At or Below 100% FPIG	101% – 150% FPIG	151% – 200% FPIG
Fixed Base Facility Customer Charge	100% discount	100% discount	100% discount
Consumption Charge (first 2,000 gallons)	100% discount	50% discount	0% discount

RESIDENTIAL WASTEWATER CUSTOMERS			
	At or Below 100% FPIG	101% – 150% FPIG	151% – 200% FPIG
Fixed Base Facility Customer Charge	75% discount	65% discount	50% discount
Consumption Charge (first 2,000 gallons)	100% discount	50% discount	0% discount

CAP Application Process:

The customer can do the CAP application:

- Online through MyApp
- In person with a local agency through OSCAR
- Over the phone with a CSR through OSCAR

ALWAYS check for a MyApp first.

- If the customer does the application online we will be able to "push" the customer's application into OSCAR- this means the MyApp information can be imported into OSCAR.

If you do not find the customer in MyApp, you will work in OSCAR to complete the application over the phone.

Script available with all necessary steps needed for a phone call at the end of the manual.

SERVICE OFF PROCEDURES:

All customers should be asked if their service is currently on or off.

If service is off:

- Obtain verbal income to determine CAP eligibility
- If eligible, advise to provide income documentation
    - Check for MyApp, if none exists create or update OSCAR application (regardless of balance amount)
    - Move OSCAR to Service Off
    - Advise to send Income Documentation
    - Include in your notes:
      Per customer, $__ needed to restore
      Sent referral to Aqua Aid or referred to other services

- Ask customer to state past due balance
- Advise customer to send income documentation. **Once verified**…
    - If balance < $500, we will submit CAP app- service should be restored and balance will be enrolled in CAP.
    - If balance > $500, we may need to refer customer for additional assistance from Aqua Aid before we can enroll* (advise we do not have access to their system but you will send an email on their behalf to Aqua Aid and the Aqua team will reach out to the customer. Send email to AquaCAP@aquaamerica.com-- you also must copy (CC) CSRHelp email on the original email.)
        - Aqua Aid Email Template
            - Subject: Service Off/ RP Name/Account #
            - Body:
                - Applying for CAP, states service off
                - States they owe more than $500, referring for Aqua aid grant
        - Do not refer to Aqua Aid until we have verified the customer's income and have determined they are income eligible.
- If not income eligible, refer to 211 and other social service/community action agencies for assistance.
    - Emergency Rental Assistance Program (ERAP) is still open in some counties and provides assistance for utilities.
- **No** reconnection fee must be paid up front. If applicable, the customer will be billed for it.

***Note:** Helping Hands grant has been renamed Aqua Aid.

Referrals to Aqua CAP for grant assistance:

Service off only w/balance higher than $500 (balances $500 or lower can be restored with CAP; no need for grant) |
On CAP, in threat of Termination

- Ask customer if they use water for main heating (i.e. boiler system/hot water radiators).
- If hot water heat, and customer has submitted verified income, refer to AquaCAP@aquaamerica.com.
- If hot water heat, but customer has not yet submitted income, advise customer to provide documents ASAP in order to be considered for both CAP and a grant to assist with restoration; also refer to 211 for assistance. Please emphasize they **may qualify** or **may be eligible** for further assistance. Once income is verified, our team will review for enrollment and may provide a grant as needed to bring the balance down to restore service. If the balance is near $500, we may waive the $500 requirement and enroll directly into CAP.
- If non-hot water heat, evaluate if special needs exist (i.e. medical situation; elderly; young children); if customer has submitted verified income, refer to AquaCAP@aquaamerica.com
- If non-hot water heat w/special needs, but has not yet submitted income, advise customer to provide documents ASAP in order to be considered for both CAP and a grant to assist with restoration; also refer to 211 for assistance.

Clarifications from Aqua:

- Do NOT send email if customer is eligible for CAP and balance is $500 or lower
- Do NOT send simply because there are young children or elderly in the home. ONLY send if customer is not eligible for other assistance.
- Keep in mind customer is not eligible for LIHEAP for their water (even if it is their main heat source) but remind customer to apply for other heat source for main heat (ie gas, electric etc). Most water heat systems require some form of power source-ie gas or electric.
- Customers are only eligible for grant if water heat is their main heat source. Exceptions may be made for special needs.
- **Do not send email for grant assistance until AFTER income is received and verified**

Note for admin working income verification: If you are not able to verify the income, you would keep the customer in the Service Off code. Outbound call to the customer to let them know the income was not acceptable and what is needed.

Income Changes:

Customer is currently enrolled in the CAP program and it is not time to recertify but they call with an income update. What do you do? You will need to screen the customer and update their income. Any income change will impact their discount.

- Screen for CRM. Update income in CRM and Oscar.
  - Customer now reports zero income
    - Update income in CRM and Oscar- complete zero income form in Oscar.
    - Keep Oscar in Enrolled.
    - Notes must clearly state customer called with income change. Aqua reps will work this code and move to Ready to enroll to change discount.
    - Send email to AquaCAP@aquaamerica.com (CC: CSRHelp) advise of income change so they can adjust tier.
  - Customer reports any other change in income that will impact tier level.
    - Do NOT move Oscar out of Enrolled- Explanation: If you move the customer to waiting for income and they never send new income, this record will move to waiting for income email sent to incomplete application to incomplete app email sent to Not enrolled when the customer is actually still enrolled and now our Oscar record is incorrect. If customer does not send new income, their discount will not be adjusted.
      - **Exception:** If customer reports they are now over income for the program- move Oscar to Dismissal needed. No POI needed. Advise customer they will be removed.
    - Enter clear notes customer called with change in income.
    - Advise customer to send POI
    - When income is received, verify, update Oscar but leave in Enrolled.
    - Send email to AquaCAP@aquaamerica.com (CC: CSRHelp) advise of income change so they can adjust tier.
  - Customer reports change in income that makes them over income for the program
    - Update CRM and Oscar with new income
    - Move Oscar to Dismissal Needed, over income.

CAP Agreement:

As a participant in Aqua's CAP, I agree to:

- **Pay the CAP amount due** by the due date each month.
- **Update my household size and income** when I enroll in CAP, when asked for by CAP or when either my household size or income changes.

I confirm that:

- My service address is my personal residence.
- I must notify Aqua if my household size or income changes within 30 days of the change.
- If I fail to respond when asked to update my household and income information, I will be removed from CAP.
- **If I fall behind or miss a payment,** I understand my account will be subject to collections.

DO YOU AGREE?

CRM Wrap Codes:

Choose CAP – Aqua as program in activity note

Wrap Code	What it Means
Completed Application:	Customer is eligible and you completed the application in Oscar.
Inquiry:	Any CAP call that does not result in completing an Oscar application but does include CAP questions.
Left Message	Outbound call-phone call only. Notes should indicate number called and what message was left.
No Answer	Outbound call-phone call only.
Outbound call	Outbound call- used anytime you make contact with a customer on an outbound call. Phone call only
Customer callback (task)	Task only- Created phone call when customer requests supervisor/clarification callback.

OSCAR Pending Codes and MyApp Pending Codes.

Use your KB for up-to-date information.

Aqua CAP Script/Talking Points

Thank you for calling Dollar Energy Fund, my name is _____. May I have your name please?

Who do you have for your water provider?

Who do you have for your sewage (wastewater) provider?

Is it your name listed on the Aqua account?

If NO***:*** ***Please spell the full first and last name of the account holder.***

Search CRM for the account holder's record.

If YES: Search CRM for record. If none is found, ask for full social (see below).

Can you spell your first and last name please?

For Aqua, you may speak with any person 18 years or older who lives in the home.

Starting a CRM Record: ***It looks like we need to create a record for you here at Dollar Energy Fund. For security purposes and to locate the record in the future, can you please verify the full social security number?***

Search CRM a second time with full social of the account holder. If no record found, create one using the Aqua account holder's name/social

CRM Record Exists: ***For security purposes, can you please verify the last four digits of the social security number? And the date of birth?***

WHAT IS THE PRIMARY PHONE NUMBER YOU WOULD LIKE TO ADD TO YOUR ACCOUNT?

If Cell: WE WILL CONTACT YOU OCCASSIONALLY TO KEEP YOU UP TO DATE WITH OUR PROGRAMS. DO YOU GIVE PERMISSION TO DOLLAR ENERGY FUND TO CONTACT YOU BY TEXT MESSAGE?

WOULD YOU LIKE TO ADD A SECONDARY PHONE NUMBER TO YOUR ACCOUNT TODAY?

WE CAN SEND YOU FOLLOW-UP COMMUNICATION THROUGH EMAIL. WHAT EMAIL ADDRESS CAN I PUT ON FILE FOR YOU?

"I don't have one."

THANK YOU. IF YOU DO SIGN UP FOR AN EMAIL, YOU CAN PUT IT ON FILE WITH US AT A LATER TIME.

"I have one, but I don't check it." "I don't want to receive spam emails." "I could give you my husbands', but I don't want him to receive any spam emails."

I UNDERSTAND BUT WE DO ENCOURAGE YOU TO PROVIDE ONE. WE WILL NOT SHARE YOUR EMAIL AND CURRENTLY ONLY SEND FOLLOW-UP COMMUNICATION REGARDING THE CONVERSATIONS WE HAVE OVER THE PHONE WITH YOU. WHAT IS THE EMAIL ADDRESS WE CAN SEND THOSE TO?

MAY I PLEASE HAVE YOUR MAILING ADDRESS?

IS THE MAILING ADDRESS THE SAME AS THE SERVICE ADDRESS?

May I have the Aqua account number please?

Complete program and utility section under the Details tab in CRM. Aqua records cannot be pulled from CRM into OSCAR without entering this information and saving.

To confirm, this is a residential address, correct?

Thank you. May I place you on a brief hold?

Search MyApp and OSCAR for an Aqua record. The customer may have started the application online or through an agency. Even if found in MyApp and/or OSCAR, continue the conversation below.

Thank you for holding. Because the Aqua CAP program is based on income, I need to ask you a few questions to determine if your household is income eligible. How many people reside in your home?

Go through normal DEF income screening in CRM, adding all household members and income. Children's income is not counted for this program, but it must be entered in CRM. Check minor box if applicable.

Thank you for that information. May I place you on a brief hold while I determine your income eligibility?

<u>If the customer isn't eligible due to over income:</u>

*You will advise and start closing your call. No OSCAR application needed. Advise of 211!

*If they are close to being income eligible, you can ask clarifying questions about the income to determine if they are **actually** income eligible

Based on the income you provided, you are income eligible to apply for the program. The Aqua Customer Assistance Program provides you a discount on the fixed charges of your bill and possibly the usage charges of your bill. You will find out your full eligibility and the amount of your discounts after completion of the application process. I'm now going to ask you a few questions to complete your application…

Complete the OSCAR application.

I am now going to read you the CAP agreement…

***As a participant in Aqua's CAP, I agree to:**

Pay the CAP amount due by the due date each month.
Update my household size and income when I enroll in CAP, when asked for by CAP or when either my household size or income changes.

I confirm that:

My service address is my personal residence.
I must notify Aqua if my household size or income changes within 30 days of the change.
If I fail to respond when asked to update my household and income information, I will be removed from CAP.
If I fall behind or miss a payment, I understand my account will be subject to collections.

DO YOU AGREE?

To complete your enrollment, you will need to send proof of all adult income in the home. Do you have a pen and paper?

You must send in the following…

YOU CAN UPLOAD YOUR INCOME DOCUMENTS THROUGH OUR WEBSITE. DO YOU HAVE ACCESS TO THE INTERNET ON YOUR PHONE OR COMPUTER?

OKAY, GREAT! YOU WILL FIRST WANT TO SAVE YOUR INCOME DOCUMENTATION TO YOUR DEVICE. THEN YOU WILL NAVIGATE TO OUR WEBSITE WWW.DOLLARENERGY.ORG. THE WORD DOLLAR IS SPELLED OUT D-O-L-L-A-R AND ENERGY IS E-N-E-R-G-Y DOT ORG. CAN YOU REPEAT THAT BACK TO ME? ONCE YOU ARE ON THE WEBSITE, YOU WILL SEE A TOOLBAR. IN THE TOP RIGHT CORNER, YOU WILL SELECT MYDOCS. YOU WILL BE PROMPTED TO ENTER YOUR STATE, UTILITY COMPANY, AND YOUR ACCOUNT NUMBER. YOU WILL THEN UPLOAD EACH PIECE OF INCOME DOCUMENTATION YOU SAVED. DO YOU HAVE ANY QUESTIONS ABOUT THAT?

*TO **EMAIL**, YOU WILL NEED TO TAKE A PICTURE OF THE INCOME WITH YOUR PHONE. MAKE SURE YOU GET THE FULL DOCUMENT IN THE PICTURE AND TAKE AN INDIVIDUAL PICTURE FOR EVERY PAGE OF INCOME. PLEASE DO NOT PASSWORD PROTECT THE EMAIL. OUR EMAIL IS AQUA@DEFDOCS.ORG (A-Q-U-A@ D as in Dog, E as in Elephant, F as in Frank, D as in Dog, O as in Oscar, C as in Cat, and S as in sam dot org). CAN YOU PLEASE REPEAT BACK THE EMAIL ADDRESS? PLEASE PUT YOUR NAME, ACCOUNT #, AND UTILITY COMPANY IN THE SUBJECT LINE OF YOUR EMAIL.*

FAX: *BEFORE FAXING PLEASE PUT THE ACCOUNT HOLDER'S NAME, ACCOUNT NUMBER, AND UTILITY COMPANY ON THE TOP OF EACH DOCUMENT. OUR FAX NUMBER IS 1-412-515-1662. CAN YOU PLEASE REPEAT THAT BACK TO ME?*

MAILING ADDRESS: *BEFORE MAILING, PLEASE PUT THE ACCOUNT HOLDER'S NAME, ACCOUNT NUMBER, AND UTILITY COMPANY ON THE TOP OF EACH DOCUMENT. OUR MAILING ADDRESS IS: Aqua CAP, P.O. BOX 42329, PITTSBURGH, PA 15203 CAN YOU PLEASE REPEAT THAT BACK TO ME?*

Please remember you will not be enrolled into CAP until we receive your proof of your income. If you are eligible, you will be enrolled and you will receive a letter in the mail letting you know you have been accepted to the program. You will see your discount reflected on your bill.

Do you have any questions about what we've discussed today?

May I ask, who do you have as your electric and gas supplier?

- If First Energy, Columbia Gas, People's Natural Gas, National Fuel, or sewage with Pennsylvania American Water, offer to transfer for assistance. If you do transfer put in your notes next to provider, "Transferred"
- If Duquesne Light or any other utility, offer the utility or CAP program number for possible assistance
- If customer doesn't know this information, advise they can call back to see if other assistance may be available for their utilities

And are you satisfied with how I handled your call today?

If NO: ***If you are not satisfied, you do have the right to contact the PUC. The phone number is 1-800-692-7380.***

If Yes: **Thank you.*

Thank you for calling Dollar Energy Fund. I hope you have a good rest of your day.

Income Verification: IMPORTANT:

Income tips:

- Do NOT move records out of Enrolled into Income received.
    - Once a record is enrolled we will not move it out of enrolled for new income. If the income level has changed, send an email to Aqua Help that new income was received and verified and they will email Aqua CAP to adjust the tier.
    - Otherwise, only move to Income received when record moves into recertification process to waiting for income.
    - If customer applied via MyApp and we received verified income-DO NOT PUSH if Oscar record has already recently been enrolled by Aqua. Treat like any other income update- update the income in Oscar- include in note- applied via MyApp POI received, updated income. Email Aqua CAP to adjust income if necessary-Move MyApp to CAP app complete.
- If Aqua has notes customer received LIHWAP, no POI is necessary for enrollment.

Admin Procedures:

Before working tasks in either MyApp or OSCAR, review the following reminders:

MyApp

Income Received

Start your timed batch activity

- Program: CAP-Aqua
- Wrap Code: MyApp Admin
- Notes: Working MyApp Income Received

Pending codes you may move MyApp to while working Income Received:

- **Ready for CAP**- if all income was verified and customer's FPIG is 200% or lower, all requirements are met and the application is complete with no errors, move to this code.
- **Ineligible, over income**- all income was received and FPIG is over 200%, move to this code.
- **Ineligible, bad account number**- the account number is not 16 digits and does not start with 00, move to this code.
- **Incomplete application**- income was received but the application has errors (RP listed twice) or is missing information (DOB), move to this code.

Aqua Ready for CAP Entry MyApp

Start your timed batch activity

- Program: CAP-Aqua
- Wrap Code: MyApp Admin
- Notes: Working MyApp Ready for CAP Entry

OSCAR

Always add a task note when working in Oscar.

Income Received

Start your timed batch activity

- Program: CAP-Aqua
- Wrap Code: OSCAR Admin
- Notes: Working OSCAR Income Received

See Pending Codes chart- Aqua team from PNG will be working certain codes.

NOTE: If you are working both MyApp & OSCAR, you do not create two CRM notes. Use the MyApp note and continue documenting the rest of the notes relevant to what you worked.

Working Aqua Income Received MyApp

Click on the "**Income Received**" category in MyApp

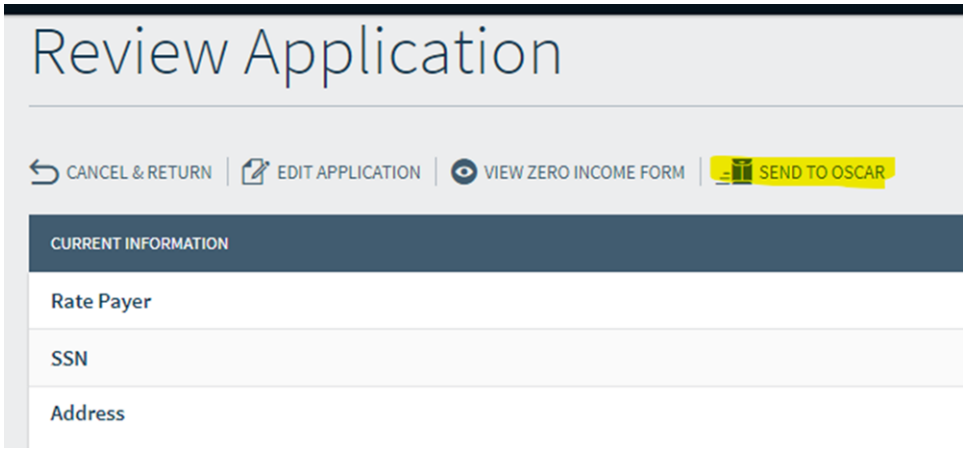
Click on a customer's name to open the MyApp record

Search CRM

- If no record found: Create CRM record based on information from MyApp

Determine Eligibility first:

- **Not eligible for CAP - over income**
  - Add your comment in MyApp: Aqua/Name & Account/all adult income verified DATE/over income for CAP
  - Move to **Ineligible** and select reason code. We do not push ineligible records to OSCAR
  - Add a task note in CRM
    - Program: Cap-Aqua
    - Wrap Code: MyApp Admin
      - Note: Aqua/Name & Account/ all adult income verified DATE /over income for CAP
- **Income eligible for CAP**
  - Review the MyApp application for accuracy
  - Leave comments:
    - Aqua/Name & Account/all adult income verified DATE/Ready to enroll
    - Aqua/Name & Account/ 0 income HH/Ready to enroll
  - Process application through to save
  - Move to **Ready for Oscar Entry** and click Save.
  - Navigate back to Application Review and search for the customer again
  - Push to OSCAR. The MyApp record will automatically move to CAP Application Complete. Do not change this code.



- If no OSCAR record exists or can be updated, the OSCAR record will go into **Income Received**
  - Leave in Income Received- the Aqua team would like to review all records and move those eligible to Ready to enroll.
- If OSCAR already exists that was recently updated or already moved to a code that does not allow the push, the push may not have been successful. Move the MyApp record to **CAP Application Complete**. (This sometimes happen when the OSCAR record was incorrectly worked instead of working MyApp record). Work the record in OSCAR. Make sure it is in Income received for the Aqua team to review.
- Add a task note in CRM
  - Program: Cap-Aqua
  - Wrap Code: MyApp Admin
  - Note options:
    - Aqua/Name & Account/all adult income verified DATE/pushed to Oscar Income Received
    - Aqua/Name & Account/ 0 income HH/Oscar already updated, moved MyApp to CAP app complete, Oscar Income received.

Note when working in two systems (MyApp & OSCAR): Only add one MyApp Admin note, even though you worked within both MyApp and Oscar

****Don't forget to close your timed batch activity when you are done working MyApp Admin****

Working AQUA Ready For Oscar entry

If you are working Income received in MyApp and move a record to Ready for Oscar, work all the way through and do the push. Do not leave in Ready for Oscar entry.

Working Aqua Income Received OSCAR

"Income Received" category in OSCAR

Income Received	Aqua

DO NOT WORK- Aqua will work these and move to Ready to Enroll if appropriate.

NOTE: Aqua will be creating Oscar applications for customers who received a LIWAP grant and moving them to Ready to enroll. No POI is needed if customer received a LIWAP grant (however it MUST be verified by Aqua- we will not enroll based on verbal report from customer stating they received the grant).

SERVICE OFF:

If previous notes state balance is < $500: Move to Income Received

If previous notes state balance is > $500: Keep in Service Off

COALITION FOR AFFORDABLE UTILITY SERVICE AND ENERGY EFFICIENCY IN PENNSYLVANIA

DATA REQUEST SET I

CAUSE-PA-I-9 What are the applicable policies and procedures for awarding Aqua Aid grants, including policies and procedures related to Aqua Aid grants for its administering agencies? Please provide a copy of any and all written policies and/or procedures, memoranda, guidance documents, training materials, call scripts, emails, or other written documents which describe the policies and procedures related to awarding an Aqua Aid grant, including documents created and/or utilized by Aqua and/or the agencies and/or organizations contracted to administer Aqua's programs.

RESPONSE See CAUSE-PA-I-9 – Attachment for program guidelines. These guidelines were introduced to the Aqua Assistance Collaborative (AAC) in August of 2023 to gain input and suggestions from the group. Customers seeking an Aqua Aid grant may do so verbally through contacting the Aqua CAP team or via email at our dedicated inbox (AquaCAP@aquaamerica.com). All Aqua Aid customers are screened for CAP participation. CAP participants are not required to produce any income documentation to establish income eligibility for an Aqua Aid grant.

Eligibility Guidelines

AQUA AID
Bringing neighbors & needs together.

General Guidelines

- Arrears, termination notice or service off
- Residential
- Single family
- Income at or below 200% FPL
- One grant per account per calendar year
- Customer must enroll in CAP

Additional Flexibilities

- High bill due to leak (leak has been repaired)
- Special needs (seniors, disabled, etc.) can be served up to 250% FPL
- General grant guideline is $500 maximum, but larger grants could be approved depending on circumstance.
- Other circumstances that warrant assistance to customers who do not fit the general guidelines for participation.

AQUA PENNSYLVANIA WASTEWATER, INC.

DOCKET NO. R-2024-3047822 & R-2024-3047824

COALITION FOR AFFORDABLE UTILITY SERVICE AND ENERGY EFFICIENCY IN PENNSYLVANIA

DATA REQUEST SET I

CAUSE-PA-I-22 From 2019 to present, disaggregated by division, month, and year, please provide the total dollars in debt and the average arrearage level for each of the following Aqua customer segments:

a. All residential customers;
b. Residential customers, excluding confirmed low income customers and CAP customers;
c. Confirmed low income customers;
d. Confirmed low income customers, excluding CAP customers; and
e. CAP customers.

Please provide this data in a live excel spreadsheet.

RESPONSE

Please see CAUSE-PA-I-22 - Attachment.

COALITION FOR AFFORDABLE UTILITY SERVICE AND ENERGY EFFICIENCY IN PENNSYLVANIA

DATA REQUEST SET I

CAUSE-PA-I-26 From 2019 to present disaggregated by division, month, and year, please provide the number and dollar amounts of Aqua Aid grants awarded for each of the following Aqua customer segments:

a. All residential customers;
b. Residential customers, excluding confirmed low income customers and CAP customers
c. Confirmed low income customers;
d. Confirmed low income customers, excluding CAP customers; and
e. CAP customers.

Please provide this data in a live excel spreadsheet.

RESPONSE

See table below. Please note that prior to the fall of 2023, tracking for hardship grants did not include customer income data, therefore for all grants processed prior to that time, classification is residential generally as the Company cannot identify confirmed low income status. Upon transition to the Aqua CAP internal team in the fall of 2023, customer income and CAP participation is now available to track grant recipients. The grant total for 2019 was taken from bank statements for the grant funds and therefore did not include the number of recipients.

	Number	Amount	Residential	CLI	CLI excl. CAP	CAP
2019	*unknown	$2,260	*unknown			
2020	64	$12,951.99	64			
2021	202	$55,181.22	202			
2022	5	$4,953.29	5			
2023	20	$13,356.95	20	11	0	11
2024	46	$32,571.31	46	46	0	46

DOCKET NO. R-2024-3047822 & R-2024-3047824

COALITION FOR AFFORDABLE UTILITY SERVICE AND ENERGY EFFICIENCY IN PENNSYLVANIA

DATA REQUEST SET I

CAUSE-PA-I-28 What are the applicable policies and procedures for eligibility and enrollment into Aqua's leak repair program, including policies and procedures related to Aqua's leak repair program for the administering agencies? Please provide a copy of any and all written policies and/or procedures, memoranda, guidance documents, training materials, call scripts, emails, or other written documents which describe the policies and procedures related to accessing the leak repair program.

RESPONSE Aqua's leak repair program is handled in-house by the Aqua CAP team. The income guideline is the same as other Aqua programs – 200% FPL. If a customer is participating in CAP, no income documentation is required. If the customer is not participating in CAP, income documentation is required and CAP enrollment is completed to ensure customer receives the discounted rates for which they are eligible. The program generally serves homeowners and proof of ownership is required. Under special circumstances, the program may serve tenants with signed landlord permission.

DATA REQUEST SET II

CAUSE-PA-II-1 Regarding Aqua's response to CAUSE-PA I-3, what information does Aqua rely on to determine that a customer is "level 1 or 2A based on the federal poverty guidelines." Please explain and provide a copy of any written policies, procedures, SOPs, or other documents which specifically describe how Aqua classifies customer levels based on federal poverty guidelines.

RESPONSE Aqua obtains customer income information on a voluntary and verbal basis. If the income and household composition provided by the customer indicates their income is at or below 150% of Federal Poverty Level, the customer is classified as 'level 1'. If their income indicates 151 to 200% of Federal Poverty Level, the customer's income is classified as 'level 2A'. Both categories are specific to the billing system of Aqua and are determined by the information an agent or employee enters on an account.

PREPARED SURREBUTTAL TESTIMONY OF HARRY S. GELLER, ESQ.

I. INTRODUCTION

Q: Please state your name, occupation, and business address.

A: My name is Harry Geller. I am a retired attorney with emeritus status. Before retirement, I served as the long-time Director of the Pennsylvania Utility Law Project. I continue to serve as a consultant to legal aid programs and their clients, and maintain an office at 118 Locust St., Harrisburg, PA 17101.

Q: Did you previously submit testimony in this proceeding?

A: Yes. I submitted direct testimony that is pre-marked as CAUSE-PA Statement 1.

Q: What is the purpose of your surrebuttal testimony?

A: My surrebuttal testimony responds to the rebuttal testimony of Constance E. Heppenstall and Rita F. Black for Aqua Pennsylvania (Aqua or the Company) and Zachari Walker for the Bureau of Investigation and Enforcement (I&E).

My surrebuttal testimony is not intended to address every issue raised or otherwise discussed by other parties' witnesses in rebuttal testimony. The absence of an explicit response to any specific recommendation or position of any witness does not indicate my agreement. Unless required for context in providing a further response to rebuttal testimony, I will not reiterate the extensive arguments and evidence that I provide in my direct testimony. To the extent an argument or recommendation raised by any party is already sufficiently addressed through the record, I do not intend to respond, and stand firmly on the evaluation, analysis, and recommendations contained in my direct testimony. I further note that several witnesses advanced legal arguments in their preserved direct and rebuttal testimony. Unless a factual basis is necessary to inform a particular legal argument, I do not intend to respond to legal theories or argument through the

course of my testimony. Rather, I am informed by Counsel for CAUSE-PA that all legal arguments will be fully addressed, as necessary and appropriate, through briefing.

Q: How is your surrebuttal testimony organized?

A: My surrebuttal testimony is divided into 5 sections as follows:

In Section I, I introduce my surrebuttal testimony. In Section II, I respond to the rebuttal testimony of Aqua's expert witness, Constance E. Heppenstall (Aqua St. 5-R), related to Aqua's inclining block rate structure.

In Section III, I will respond to rebuttal testimony of Aqua's expert witness, Rita F. Black (Aqua 13-R), related to Aqua's universal service programs and related policies and procedures, and the critical need to implement various enhancements and reforms as a condition to any approved rate increase in this proceeding to address deep unaffordability at existing and proposed rates.

In Section IV, I will respond to rebuttal testimony of I&E expert witness Zachari Walker (I&E St. 1-R) related to my recommendations that the Commission require Aqua to increase funding for its Leak Repair and Conservation Program and to file a unified Universal Service Plan necessary for improved oversight and transparency.

Finally, In Section V, I conclude my surrebuttal testimony.

II. RESPONSE TO AQUA WITNESS CONSTANCE E. HEPPENSTALL (AQUA ST. 5-R)

Q: Please briefly summarize Ms. Heppenstall's rebuttal testimony to which you wish to respond.

A: In my direct testimony in this matter, I explain that Aqua uses an inclining block structure for its volumetric charges, meaning there is one rate for usage up to 2,000 gallons, and a rate for

its volumetric charges that is nearly 20% higher for any usage over 2,000 gallons.[1] Aqua's inclining block rate structure has a disparate impact on low income households with larger families – and correspondingly higher usage – and renters who often do not have control over household water usage due to conditions of their home and are less able to make necessary repairs or adopt water efficiency upgrades.[2]

In response, Ms. Heppenstall argues that Aqua's inclining block rates were implemented to encourage conservation and to provide a low "lifeline" rate for Seniors and low water users – including apartment dwellers.[3] Ms. Heppenstall argues that if this rate structure were replaced with a one block rate, the rate for the first 2,000 gallons of usage would be higher for these customers because the one block rate would be a weighted average of the low "lifeline" rate and the higher second block rate.[4]

Q: What is your response to Ms. Heppenstall's rebuttal testimony related to inclining block rates, as you have outlined?

A: To be clear, I did not propose for Aqua to eliminate its inclining block rate structure. My discussion of Aqua's inclining block rate structure was to underscore the need for improved volumetric discounts for all usage levels to more equitably assist low income customers. As currently structured, Aqua's CAP contains no volumetric discount for usage above 2,000 gallons.[5] This discount structure is insufficient, and has a disparate impact on larger households who have correspondingly higher usage levels.[6] Aqua's CAP structure also contributes to the broader disparities in water/ wastewater burdens between low income households and general

[6] Id.

residential ratepayers, as low income households are more likely to have less efficient appliances and experience plumbing and fixture leaks from living in older homes – yet most often lack the discretionary income to invest in repairs or upgrades and/or are unable to force their landlords to make such repairs or upgrades.[7]

To address these disparities, and improve the equitable distribution of rate assistance, I continue to recommend that the Commission require Aqua to amend its Customer Assistance Program (CAP) to provide a discount on usage levels exceeding 2,000 gallons/month.[8] Expanding the volumetric discount offered by Aqua's CAP is particularly important because Aqua's confirmed low income customers use, on average, approximately 21.4% more water than non-low income residential customers.[9] I continue to stand by my recommendation that Aqua be required to improve the discounts and structure of its CAP, including expanding the volumetric discounts offered to CAP participants.

III. RESPONSE TO AQUA WITNESS RITA BLACK (AQUA ST. 13-R)

Q: Please briefly summarize Ms. Black's rebuttal testimony in response to your recommendations that the Commission require Aqua to improve its categorization and assessment of low income customers, to which you wish to respond.

A: In my direct testimony, I explain that Aqua is undercounting low income customers, as it only includes customers that Aqua has direct contact with and who have affirmatively shared income information with the Company.[10] I explain that this consistent undercounting results in an underassessment of relative needs across Aqua's service territory, which in turn makes it difficult to ensure assistance programs are appropriately funded and designed to ensure low

[7] CAUSE-PA St. 1 at 24: 12-19.
[8] Id. at 25-27.
[9] Id. at 25.
[10] Id. at 12-13.

income families can access water and wastewater service. I further note that this consistent undercounting prevents identification and remediation of important trends related to low income customers – including whether low income customers can consistently afford and maintain services. In addition, Aqua's undercounting of low income customers hampers efforts to conduct appropriately targeted outreach to low income customers, so that these customers can learn about and access assistance programs and protections necessary to staying connected to services.

I recommend through my direct testimony that Aqua adopt a broader definition and improve tracking of its "confirmed low income customers." Specifically, I proposed that Aqua develop a proactive and routinized income screening process, which identifies and tracks customers who fall within the following categories:[11]

- Enrollment or participation in a low income assistance or conservation program (CAP, Aqua Aid, or Aqua's Leak Repair and Conservation Program).
- Receipt of a federal, state, or local utility assistance, such as LIHWAP or LIHEAP.
- Receipt of other emergency utility assistance.
- Indication by the customer of inability to pay current bill and/or requests for income based payment arrangements.
- Contact immediately prior to termination.
- Other referrals to low income programs.
- Self-certification by the customer.
- Income information received based on request for a medical certificate.

In response, Ms. Black argues that Aqua's CAP is relatively new and that Aqua's current processes and procedures adequately identify low income customers.[12] Ms. Black also argues that Aqua already utilizes several of the categories recommended in my direct testimony to identify low income households.[13] Specifically, Ms. Black notes that any customers who are

[11] Id. at 13.
[12] Aqua St. 13-R at 2: 11-14.
[13] Id. at 2: 15-21.

currently participating in CAP, Aqua Aid, and Aqua's leak repair or conservation kit offerings have verified income at or below 200% of the Federal Poverty Level (FPL) and are therefore counted.[14] Ms. Black also notes that my recommended inclusions are unnecessary because (1) no customers are currently participating in the Low Income Household Water Assistance Program (LIHWAP), making this recommendation is moot; (2) Aqua took affirmative steps to participate in the Low Income Home Energy Assistance Program (LIHEAP) data sharing opportunities with the Pennsylvania Department of Human Services (DHS), but has no other way of knowing whether customers receive a LIHEAP grant; (3) customers who self-certify their incomes or contact Aqua to discuss payment arrangements prior to termination are already counted as low income; and (4) medical certificates are not dependent on income and do not serve as a reasonable basis for determining a customer is low income.[15]

Q: What if your response to Ms. Black's rebuttal testimony related to improving Aqua's identification and classification of low income customers, as you have outlined?

A: I strongly contest that the newness of Aqua's CAP is a reasonable basis or justification to perpetuate policies which undercount low income customers. Indeed, the newness of Aqua's CAP makes it even more essential that Aqua act now to improve its policies for identification and assessment of its low income customer population and, in turn, implement the goals and metrics that I have recommended related to its counting and assessment of low income customers. As discussed, Aqua is significantly undercounting its low income customers, and only counting those customers that Aqua has had direct contact with who have affirmatively disclosed

[14] Id. at 2-3.
[15] Id. at 3: 1-16.

income information. [16] Ms. Black similarly acknowledges that Aqua's CAP only reflects a portion of the potentially eligible population.[17]

Ms. Black dismisses the use of a medical certificate as part of the low income identification process. I respectfully disagree. A medical certificate is actually an important part of the low income identification process as it is both necessary and appropriate to identify a household's income status following submission of a medical certificate. Section 56.114(2) of the Commission's regulations state, in relevant part, that medical certificates may be renewed "if the customer has met the obligations under § 56.116 (relating to duty of customer to pay bills)." Section 56.97(b) additionally requires that a public utility "exercise good faith and fair judgment in attempting to enter a reasonable payment arrangement or otherwise equitably resolve the matter." Aqua has an affirmative duty, pursuant to these provisions, to actively work with a household who has submitted a medical certificate to connect them with available assistance programs or negotiate an equitable payment arrangement. Unless and until Aqua confirms otherwise, customers identified as low income through the medical certification process should be included in Aqua's low income customer count.

I further disagree with Ms. Black and I stand by my recommendation that customers in receipt of federal, state, or local utility assistance (such as LIHWAP and LIHEAP) should be classified as confirmed low income is appropriate. Low income customers may disclose receipt of other forms of utility assistance through conversations with Aqua, or provide other affirmative proof of their receipt of such assistance. These customers should be classified as confirmed low income customers without having to provide duplicative information demonstrating their low income status. I note, too, that I explicitly recognized the current status of LIHWAP in my direct

[16] CAUSE-PA St. 1 at 12: 13-20.
[17] Aqua St. 13-R at 4: 1-6.

testimony, and I disagree with Ms. Black that Aqua should no longer consider participation in LIHWAP as an indicator of low income status. While LIHWAP is currently closed to new applicants, the program is still authorized in federal law and there is substantial ongoing advocacy to secure additional funding at the state and federal level. Aqua's policies should be appropriately flexible to identify low income households as such when they are participating in LIHEAP, LIHWAP, or other assistance programs with income guidelines consistent with Aqua's CAP.

For these reasons, and the reasons set forth in my direct testimony, I stand by my recommendations that Aqua be required to make important improvements to its identification, tracking, assessment, and categorization of confirmed low income customers.

Q: Please briefly summarize Ms. Black's rebuttal testimony related to your recommendation that Aqua be required to develop and submit a Universal Service Plan, to which you wish to respond.

A: In my direct testimony, I recommend that Aqua be required to develop and submit a Universal Service Plan for periodic Commission review and approval, with the first Universal Service Plan and accompanying Petition filed within one year of the final order in this proceeding.[18] OCA expert witness Roger Colton similarly notes that the policies regarding universal service programs should be brought forward to Pennsylvania's water and wastewater utilities.[19]

In response to these recommendations, Ms. Black argues that jurisdictional water and wastewater utilities in Pennsylvania are not currently bound by any explicit statutory or regulatory requirements to submit a Universal Service Plan, and that individual base rate

[18] CAUSE-PA St. 1 at 31.
[19] OCA St. 6 at 19-20.

proceedings are not the proper forum to address these issues.[20] Ms. Black notes that, if and when the Commission chooses to engage stakeholders to discuss expanding universal service requirements for water/wastewater providers, Aqua will actively participate in these efforts.[21]

Q: What is your response to Ms. Black rebuttal testimony to your recommendation that Aqua submit a Universal Service Plan, as you have outlined?

A: As I discuss in my direct testimony, requiring Aqua to develop and submit a Universal Service Plan for periodic Commission review and approval is essential to provide the Commission, stakeholders, and consumers with a central place to reference basic facts about Aqua's program eligibility, rate discounts, grant amounts, and enrollment processes.[22] I acknowledge in my direct testimony that jurisdictional water and wastewater utilities are not currently required by statute or regulation to file a Universal Service Plan. However, I explain that a Universal Service Plan is nevertheless necessary and appropriate to facilitate program oversight, promote transparency, and ensure accessibility. Aqua's universal service programs were approved by the Commission to address an identified need for comprehensive rate assistance to address deep and widespread rate unaffordability. They were established in furtherance of mandates in the Public Utility Code to provide safe and accessible service to all households based on just and reasonable rates – not in furtherance of an explicit statutory mandate for water utilities to establish a suite of universal service programs. The lack of a unified document which contains all Commission approved parameters for Aqua's Commission-approved programs hinders enforcement, obfuscates transparency, and complicates program accessibility. Thus, the Commission should rely on the same authority used to approve Aqua's

[20] Aqua St. 13-R at 9.
[21] Id. at 9-10.
[22] CAUSE-PA St. 1 at 31: 1-15.

universal service programs to also require it to file a unified Universal Service Plan. While I am supportive of efforts to advance statewide policy regarding the coordination and streamlined delivery of universal service programs, the lack of a current statewide obligation or proceeding does not preclude the Commission from directing Aqua to develop and submit a Universal Service Plan.

A Universal Service Plan is specifically designed towards addressing low income customers' ability to learn about and ultimately enroll in assistance critical to addressing the unaffordability of Aqua's rates. Aqua should not be permitted to obtain a rate increase in the context of the present proceeding to be borne by customers least able to afford it, while avoiding its responsibilities to provide robust review and enhancements to low income assistance programs. As discussed in further detail below, requiring Aqua to submit a Plan provides accessibility and transparency to the public, and an important opportunity for the Commission to oversee the policies, procedures, and program requirements which necessarily affect whether Aqua's low income customers are able to enroll in available assistance. Thus, I stand firmly behind my recommendation that the Commission require Aqua to submit a Universal Service Plan for formal Commission review and approval.

Q: Please briefly summarize Ms. Black's rebuttal testimony in response to your recommended improvements to the discounts and structure under Aqua's CAP, to which you wish to respond.

A: In my direct testimony, I explain that Aqua's CAP is not currently producing affordable bills for participants. For example, a family of four at 100% FPL using 6,000 gallons/month would have a combined water/ wastewater burden of 7% - far exceeding accepted levels of

affordability.[23] At the same usage level, a family of four at 50% FPL would have a combined water/wastewater burden of 20% - 1/5th of their monthly household income. These burden levels will increase if Aqua is permitted to increase its base rates, and will have a disproportionate impact on larger families and those with high usage that is beyond their ability to control.[24]

To improve the equitable distribution of assistance to Aqua's low income households, and better offset the impact of Aqua's rate increase, I recommend through direct testimony that Aqua extend the volumetric discount offered under CAP to the entire usage portion of the bill; disaggregate its discount levels between 0-50% FPL and 51-100% FPL;[25] and adjust its CAP discount levels as set forth in Table 5 of my direct testimony.[26] Under my adjusted CAP proposal, Aqua's CAP would more equitably address the affordability needs of struggling low income customers – ensuring rate assistance is more closely calibrated to meet the needs of individual consumers based on relative income level, household size, and usage levels.[27]

In response, Ms. Black notes that, under Aqua's current CAP, customers with income at or below 100% FPL receive a 100% discount on their first 2,000 gallons in addition to a 100% discount on their fixed charge.[28] As a result, customers who consume 2,000 gallons or less per month do not receive any charges for water service.[29] Ms. Black notes that, under my CAP design, customers between 0-50% FPL would be responsible to pay 15% of their usage charges, and customers between 51-100% FPL would be responsible for paying 25% of their usage charges.[30] Similarly, she explains that, under Aqua's current CAP, customers with incomes

[23] CAUSE-PA St. 1 at 23-24.

[29] Id.
[30] Aqua St. 13-R at 12-13.

between 51-100% FPL using 2,000 gallons or less per month are not charged for any consumption.[31] Ms. Black argues that my proposal to adjust income tiers and discount levels would cause these customers (namely, households at/below 100% FPL using 2,000 gallons or less each month) to experience an increase in their bill.[32] However, she fails to quantify the number of CAP households using 2,000 gallons or less of water each month who would, in theory, experience an increase in CAP rates pursuant to my proposal – nor does she quantify the resulting water and wastewater burden for these households.

Finally, Ms. Black alleges that it is inappropriate to divide the first income tier, which currently includes households with income between 0-100% FPL, to include separate income tiers for 0-50% FPL and 51-100% FPL.[33] Ms. Black argues that all customers with incomes at or below the federal poverty line are facing financial hardship and asserts that my proposal would decrease benefits for some customers between 51-100% FPL, as discussed above.[34] However, as noted, she does not quantify the resulting water and wastewater burden for households she asserts would lose benefits under my proposal.

Q: What is your response to Ms. Black's rebuttal to your recommended improvements to the discount levels and structure of Aqua's CAP, as you have outlined?

A Ms. Black's rebuttal supports maintaining the current level of discounts for a limited segment of customers, consisting of an unknown number, whose water usage is below 2,000 gallons a month. However, under my proposal, the discounts for water and wastewater customers will be altered, depending on the customer's usage level and FPL (which accounts for both relative income and household size). That said, the structure and discount levels which I

[31] Id. at 13.
[32] Id.
[33] Aqua St. 13-R at 14: 1-9.
[34] Id.

recommend in Table 5 of my direct testimony are developed to achieve more equitable levels of affordability for all CAP participants, in a manner that accounts for variations in FPL, family size, and usage level. As illustrated in CAUSE-PA Exhibit 1, the resulting water and wastewater burdens under my proposal, across all income tiers and usage levels, would improve under my proposal.

Ms. Black's concern that my proposal would decrease benefit levels for a subset of CAP customers with 2,000 gallons or less of usage per month are not supported by data, and fails to account for the fact that a greater segment of Aqua's low income customers would obtain more equitable rates while the group identified by Ms. Black would still receive a bill that is well within accepted levels of affordability. As of June 2024, the average water usage level of confirmed low income customers was 5,173 gallons per month.[35] In other words, a substantial majority of Aqua's low income customers have usage levels exceeding 2,000 gallons/month, and over half of Aqua's low income customers have usage levels exceeding 5,173 gallons/month.

Pursuant to my CAP proposal, CAP participants across all income tiers would see marked improvements to bill affordability and reduction in their water and wastewater burdens. These improved discounts would be particularly pronounced for customers between 0-50% FPL, who are at the bottom of the poverty scale and experience the most acute financial hardships affording and staying connected to services. It is unclear based on Ms. Black's analysis how many households may ultimately see a bill increase under my proposal because their usage levels fall under 2,000 gallons/month. As discussed, the average usage levels of Aqua's CAP customers fall well above 2,000 gallons. As of June 2024, Aqua reported that the average usage of CAP water customers was 5,148 gallons/month; the average usage of CAP wastewater customers was 4,747

[35] CAUSE-PA St. 1 at 25: 1-17.

gallons/month; and the average usage of water/wastewater CAP customers was 3,769 gallons/month.[36]

In sum, my proposal would substantially improve resulting affordability for the vast majority of CAP participants – while also ensuring improved equity in the distribution of benefits across income level, household size, and usage level. While there is a potential that some CAP participants with very low usage (below 2,000 gallons) will see a slight reduction in discount level, all low usage households would continue to receive a bill that is consistent with accepted levels of affordability. I therefore stand firmly by my recommendations to improve the structure and discount levels of Aqua's CAP.

Q: Please briefly summarize Ms. Black's rebuttal testimony in response to your recommended improvements to Aqua Aid to which you wish to respond.

A: In my direct testimony, I raise concerns that Aqua has issued only a miniscule number of grants through Aqua Aid in comparison to Aqua's confirmed low income termination rates.[37] To help improve access to and knowledge of Aqua Aid grants, I recommend that the Commission require Aqua to routinely screen and refer eligible customers to Aqua Aid; expand partnerships with local Community Based Organizations (CBOs) to improve program outreach and assistance with enrollment; and work with its Aqua Assistance Collaborative (AAC) to identify potential CBO partners across its service territory.[38]

Ms. Black argues that these recommendations are premature.[39] She notes that Aqua Aid recently replaced Helping Hand and made certain improvements to outreach, including the use of

[36] CAUSE-PA to Aqua I-19, Attachment.
[37] CAUSE-PA St. 1 at 33: 13-20.
[38] Id. at 34: 1-6.
[39] Aqua St. 13-R at 16: 8-21.

a bill insert to increase awareness about Aqua Aid.[40] Ms. Black indicates that, in response to these efforts, Aqua is seeing marked increases to requests for assistance – though she does not qualify this claimed increase, which runs counter to the enrollment data provided by Aqua in response to discovery.[41] Ms. Black also notes that using an internal team to evaluate these requests allows Aqua to address other assistance needs, including if customers are unaware of or not enrolled in CAP.[42]

Q: What is your response to Ms. Black's rebuttal testimony to your recommended improvements to Aqua Aid, as you have outlined?

A: My recommendations related to Aqua Aid are timely and would help to enhance screening and improve CBO coordination to supplement current efforts to improve awareness and uptake of the program. Indeed, these enhancements are especially critical now, as Aqua seeks to substantially increase rates for life-sustaining water and wastewater services. Aqua's hardship fund is not appropriately accessible to its low income customers, with only a small number customers able to access available assistance compared to the need amongst low income customers.[43] For example, in 2023, Aqua reported a total of 20 grants processed, despite 4,179 confirmed low income customers experiencing an involuntary service termination for nonpayment.[44]

While I am encouraged by Aqua's efforts to conduct additional outreach to residential customers, more must be done to improve the accessibility, reach, and effectiveness of Aqua Aid. My recommended improvements to Aqua Aid provide an important routinized mechanism

[40] Id.
[41] Id.

[43] CAUSE-PA St. 1 at 33: 13-20.
[44] Id.

through which customers will be regularly screened for need and eligibility for grant assistance. In addition, increasing coordination with CBOs will help to open important opportunities for outreach related to Aqua Aid to supplement Aqua's current efforts, and would improve the ability to provide holistic services to address other critical needs. Thus, I stand by my recommended improvements to Aqua Aid, as discussed in detail in my direct testimony.

Q: Please briefly summarize Ms. Black's rebuttal testimony related to your support of a Percentage of Income Payment (PIP) structure, to which you wish to respond.

A: In my direct testimony, I explain that Aqua's CAP will reduce but not eliminate the financial impact of Aqua's proposed rate increase for CAP participants.[45] Unlike a PIP, which ties rates directly to each participant's household income, Aqua's CAP is designed as a tiered rate discount program which provide designated groups of participants certain delineated discount on rates.[46] Thus, if rates increase without a corresponding increase in CAP discounts, the resulting CAP charges also increase.[47] In recognition of current system constraints for Aqua to transition to a PIP, I recommend that Aqua make improvements to its CAP discount levels and income tiers in the short term, while ensuring over the longer term that planned system upgrades will support implementation of a PIP in the future.[48] OCA expert witness, Roger Colton, similarly argues that Aqua's eventual conversion of its CAP to a PIP is a preferrable outcome.[49]

In her rebuttal testimony, Ms. Black acknowledges that PIPs provide an important safety net for potential rate changes resulting from increases in energy costs.[50] Nevertheless, Ms. Black argues that PIPs are costly to other ratepayers who must bear the responsibility for the portion of

[50] Aqua St. 13-R at 21: 8-22.

the bill CAP participants are not asked to pay.[51] Ms. Black argues that any consideration of Aqua implementing a PIP must evaluate the mechanism through which actual costs will be recovered, and the level of costs that nonparticipant residential customers bear.[52]

Q: What is your response to Ms. Black's rebuttal to PIPs, as you have outlined?

A: To be clear, although I strongly believe in the preferability of a PIP to Aqua's current CAP model, I have not recommended in the context of this proceeding that Aqua be required to implement a PIP structure, only that it be required to ensure any planned system upgrades allow for future PIP implementation. Ms. Black's arguments focus on allegations that implementation of a PIP structure will be too costly for non-CAP customers. Ms. Black does not allege that the costs of system upgrades necessary to support a PIP structure would be unduly burdensome. Nor does she provide any actual data, information, or cost projections to support her assertion that a PIP is more expensive than the current discount structure.

I do not dispute that the costs and benefits of implementing a PIP should be considered prior to approving a future transition in program design. I note that an analysis of costs to nonparticipant customers must include avoided costs as a result of improved CAP affordability – including avoided uncollectible expenses which occur when CAP participants experience involuntary termination as a result of unaffordable monthly bills. These uncollectible expenses affect all ratepayers and must be accounted for in any assessment of the reasonableness of PIP implementation.

IV. RESPONSE TO I&E WITNESS ZACHARI WALKER (I&E St. 1-R)

Q: Please briefly summarize I&E witness Walker's rebuttal testimony to your recommendations regarding Aqua's Leak Repair and Conservation Program, to which you wish to respond.

A: In my direct testimony, I explain that Aqua's proposed rate increase would fall hardest on high usage low income households.[53] I note that Aqua's proposed annual budget of just $132,000/ year for its Leak Repair and Conservation program was inadequate to service likely need.[54] I therefore recommend in my direct testimony that Aqua increase available funding to $400,000/ year, divided proportionally across different conservation and line repair services.[55] I explain that this increase would help to improve access to usage reduction services, reduce disparities in the impact of Aqua's proposed rate increase on high usage households, allow Aqua needed flexibility to provide comprehensive leak repair and usage reduction services, and more effectively target high usage customers enrolled in CAP to help control CAP costs.[56]

Zachari Walker disagrees with my recommendations to improve funding for the Leak Repair and Conservation Program[57] and argues that I do not provide proof that the Company is capable of utilizing its current leak repair program budget, or that this budget would not be sufficient to cover the costs associated with this program.[58] Witness Walker also argues that, as Aqua's program costs are embedded in base rates, this recommendation would increase ratepayer costs with no certainty that funds can or will be spent, or to ensure that ratepayers are not contributing to Aqua's income if funds remain unspent.[59]

[58] Id.
[59] Id.

Q: What is your response to Witness Walker's rebuttal testimony regarding your proposed funding increase for Aqua's Leak Repair and Conservation Program?

A: As discussed at length in my direct testimony, Aqua's low income customers currently carry substantial water and wastewater burdens, which will exacerbate if Aqua is permitted to increase its basic rates of service.[60] Aqua's low income customers also carry disproportionate amounts of residential customer debt and have markedly higher rates of involuntary termination for nonpayment compared to residential customers as a whole.[61]

The unaffordability of Aqua's existing and proposed rates is particularly pronounced for low income customers carrying high usages.[62] This disproportionate impact based on usage is particularly important because Aqua's low income customers carry average higher usage levels compared to residential customers as a whole. For example, the average water usage of residential customers, excluding low income customers, ranged from 3,670 gallons in January 2024 and 4,260 gallons in June 2024. By comparison confirmed low income customer water usage ranged from 4,892 gallons in January 2024 and 5,173 gallons in June 2024.[63] If Aqua is permitted to increase rates, it must be required to increase assistance available to mitigate high usage and correspondingly higher monthly bills. This is particularly important since low income households often have high usage as a result of plumbing and fixture leaks because of living in older homes – yet most often lack the discretionary income to invest in repairs themselves and/or are unable to force their landlord to make such repairs.[64]

---

[60] CAUSE-PA St. 1 at 15.
[61] Id. at 16-18.
[62] Id. at 18-19.

For these reasons, I stand firmly by my recommendation that Aqua be required to increase its budget for its Leak Repair and Conservation Program. Nevertheless, I recognize I&E's witness Walker's concerns, and agree that additional provisions should be made to ensure that program funding is appropriately used to support usage reduction and leak/ line repairs for low income customers. In addition to my recommendations in my direct testimony, I further recommend herein that Aqua be required to consult with its AAC to evaluate and implement additional methods for providing usage reduction and repair services to at-need customers. Similarly, I recommend that Aqua be required to consult with its AAC to develop and implement a plan for coordinating delivery of conservation and repair assistance with other conservation assistance within its service territory – including other utilities' Low Income Usage Reduction Programs (LIURPs).

Q: Please briefly summarize I&E's rebuttal to your recommendation that Aqua be required to develop and submit a Universal Service Plan for the Commission's review and approval, to which you wish to respond.

A: As discussed, I recommend in my direct testimony that the Commission require Aqua to develop and submit a Universal Service Plan for periodic Commission review and approval, with the first Universal Service Plan and accompanying Petition filed within one year of the final order in this proceeding.[65]

Similar to Rita Black, Zachari Walker argues that my recommendation should be rejected because jurisdictional water/ wastewater utilities are not currently required to file Universal

https://www.epa.gov/system/files/documents/2021-07/ws-assistance-that-saves-efficiency-and-affordability.pdf; NRDC, Water Affordability Advocacy Toolkit: Water Efficiency and Plumbing Repair Assistance (2022), available at: https://www.nrdc.org/sites/default/files/water-affordability-toolkit-section-10.pdf.

[65] CAUSE-PA St. No. 1, at p. 31.

Service Plans, and that statewide guidance is needed rather than ordering individual utilities to be required to file Universal Service Plans in a piecemeal fashion.[66]

In support of his contentions, Witness Walker cites to the recent Commission order in the Pennsylvania-American Water Company (PAWC) base rate proceeding, in which the Commission rejected a plan to develop a conservation program and found that " [i]n the absence of a regulation that mandates a [LIURP] for water companies, similar to the regulations that exists for electric distribution companies and natural gas distribution companies, we find it inappropriate for the Commission to impose such obligation of PAWC alone."[67]

Q: What if your response to Walker's rebuttal related to your recommendation that Aqua be required to develop and periodically submit a Universal Service Plans, as you have outlined?

A: As I discussed above, the lack of a current statewide proceeding does not preclude the Commission from directing Aqua to develop and submit a unified Universal Service Plan. Universal Service Plans provide an essential means by which the Commission can evaluate and exercise oversight over utilities' universal service programs. Simply updating Aqua's website to include additional program information does not substitute for a formal review of universal service programs to ensure that they are designed in a manner that is reasonable and in line with statute, regulation, and Commission orders. While low income programs must necessarily be considered in any determination related to the justness and reasonableness of rates, it is essentially that additional avenues are provided so that the Commission has the ability to periodically review, and ultimately compel, important changes to Aqua's universal service

[66] Aqua St. 13-R at 5-6.
[67] Id. at 6: 10-22, citing PA Public Utility Commission et al v. PA American Water Company, Docket Nos. R-2023-3043189 et al, p. 346 (Order Entered July 22, 2024).

programs without having to wait for Aqua to submit a request to increase it rates. Requiring Aqua to submit a Universal Service Plan for periodic Commission review and approval would provide this important forum.

Finally, counsel for CAUSE-PA has advised me that issues related to the applicability of the Commission's Order in the recent PAWC base rate proceeding require certain legal analyses which CAUSE-PA reserves for briefing. That said, I note that Witness Walker's analyses do not take into consideration that previous Commission orders clearly demonstrate that it is well within the Commission's purview to order implementation and improvements to water/ wastewater assistance programs. For example, the Commission approved the creation of important improvements to water/ wastewater utilities' universal service programs in the context of Aqua's prior rate proceedings. Indeed, in the Commission Order in the recent PAWC base rate proceeding relied on by I&E witness Walker, the Commission orders PAWC to make several important changes to its universal service programs, including to the structure and discount levels of its Bill Discount Program (BDP).[68]

For these reasons and the reasons set forth in the direct testimony, I stand firmly by my recommendation that Aqua be required to develop and submit a USP for periodic Commission review and approval.

V. CONCLUSION

Q: Does this conclude your surrebuttal testimony?

A: Yes.

OF

RICHARD A. BAUDINO

ON BEHALF OF

AQUA LARGE USERS GROUP

J. KENNEDY AND ASSOCIATES, INC.

SEPTEMBER 12, 2024

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

Pennsylvania Public Utility Commission	:	
	:	
v.	:	R-2024-3047822 (Water
	:	R-2024-3047824 (Wastewater)
Aqua Pennsylvania, Inc.	:	
Aqua Pennsylvania Wastewater, Inc.		

REBUTTAL TESTIMONY OF RICHARD A. BAUDINO

Q. Please state your name and business address.

A. My name is Richard A. Baudino. My business address is J. Kennedy and Associates, Inc. ("Kennedy and Associates"), 570 Colonial Park Drive, Suite 305, Roswell, Georgia 30075.

Q. What is your occupation and by whom are you employed?

A. I am a consultant to Kennedy and Associates.

Q. Please describe your education and professional experience.

A. I received my Master of Arts degree with a major in Economics and a minor in Statistics from New Mexico State University in 1982. I also received my Bachelor of Arts Degree with majors in Economics and English from New Mexico State in 1979. I began my professional career with the New Mexico Public Service Commission Staff in October 1982 and was employed there as a Utility Economist. During my employment with the Staff, my responsibilities included the analysis of a broad range of issues in the ratemaking field. Areas in which I testified included cost of service, rate of return, rate design, revenue

requirements, analysis of sale/leasebacks of generating plants, utility finance issues, and generating plant phase-ins.

In October 1989, I joined the utility consulting firm of Kennedy and Associates as a Senior Consultant where my duties and responsibilities covered substantially the same areas as those during my tenure with the New Mexico Public Service Commission Staff. I became Manager in July 1992 and was named Director of Consulting in January 1995. Currently, I am a consultant with Kennedy and Associates.

Exhibit ___(RAB-1) summarizes my expert testimony experience.

Q. On whose behalf are you testifying?

A. I am testifying on behalf of the Aqua Large Users Group ("Aqua LUG").

Q. What is the purpose of your Rebuttal Testimony?

A. The purpose of my Rebuttal Testimony is to respond to the Direct Testimony of Mr. Roger Cathcart, witness for the Office of Small Business Advocate ("OSBA"). Specifically, I will respond to Mr. Cathcart's proposed water service class revenue allocation proposals for Aqua Pennsylvania, Inc. ("Aqua" or "Company").

Q. Please summarize your understanding of Mr. Cathcart's water service class revenue allocation proposal.

A. On page 8, lines 144 - 150 of his Direct Testimony, Mr. Cathcart explained that he agreed with Aqua's proposed water service class revenue allocation exclusive of Act 11 considerations. However, Mr. Cathcart further proposed changes in the amounts of Act 11 revenue allocated to water service classes that are based on his recommendations regarding

(1) the overall level of the Company's awarded wastewater revenue requirement and (2) the overall level of wastewater rates.

Beginning on page 11 of his Direct Testimony, Mr. Cathcart explained that he opposed the Company's proposed increases to its Base and East Whiteland divisions. He took issue with:

- The increase to the Base division of 14.3%.
- The increase to the East Whiteland division of 109.4%.

Mr. Cathcart presented his proposed wastewater division increases on his Schedule Q-4WW. His recommendations resulted in a reduction of Act 11 revenues to $19.7 million. His Schedule Q-6WW further presented his recommended wastewater service class increases, which ranged from 15% for Public Authority to 47% for Industrial customers. These wastewater class increases affected the Act 11 amounts that Mr. Cathcart recommended be collected from Aqua's water service classes. These amounts are summarized in the table shown at the top of page 14 of his Direct Testimony.

Q. Do you agree with Mr. Cathcart's proposed water service class revenue allocation proposal?

A. No. Mr. Cathcart's proposed revenue allocation introduced a revenue allocation distortion with respect to the increase that the Commercial water service class receives. This is due to his proposed reallocation of the Act 11 revenues from Aqua's wastewater operations.

Q. Please explain how Mr. Cathcart's proposed reallocation of Act 11 revenues affected his proposed increase to the Commercial water service class.

A. Mr. Cathcart's reallocation of Act 11 revenues inappropriately raised the percentage revenue increase for the Commercial water service class relative to the overall system

increase in water revenues. Rebuttal Table 1 below presents a comparison of the water service class increases presented by the Company and Mr. Cathcart along with each class's relative rate of return at current rates.

Rebuttal Table 1
Comparison of Water Class Revenue Allocations

	Aqua Proposed	OSBA Proposed	Current RROR
Residential	19.9%	19.1%	0.97
Commercial	18.2%	18.5%	1.04
Industrial	20.6%	21.9%	0.86
Public	19.2%	19.2%	1.17
Other Water Utilities	11.3%	11.3%	6.42
Private Fire Prot.	6.3%	6.3%	1.44
Public Fire Prot.	12.8%	12.8%	0.95
Total Sales	18.9%	18.6%	1.00

The relative rate of return ("RROR") shows how close a particular service class is to the overall system rate of return. A RROR less than 1.0 indicates that a service class has an earned rate of return that is below the system average return. Normally, that class should receive a percentage revenue increase greater than the system average increase in order for that class to move closer to the system average rate of return. Conversely, a RROR greater than 1.0 indicates that a service class has an earned rate of return greater than the system average and should receive a percentage increase that is lower than the system average increase. A RROR of 1.0 shows that a service class has an earned return equal to the system average and would then merit a percentage increase that is about equal to the system average increase.

Rebuttal Table 1 presents the water service class RRORs at current rates based on the class cost of service study ("CCOSS") presented by Company witness Constance Heppenstall. The Commercial class RROR at current rates is 1.04, which means that Commercial

customers have a current rate of return that is greater than the system average return and, therefore, should receive an increase less that the system average increase. The Company's proposed increase of 18.2% is considerably lower than the Company's proposed overall system increase of 18.9%, which is consistent with the CCOSS results. However, the OSBA Commercial class increase of 18.5% is about the same as the OSBA's proposed overall increase of 18.6%.

Q. What is the reason that Commercial water service customers receive a higher percentage increase under the OSBA's proposed revenue allocation?

A. The reason is that Mr. Cathcart proposed a much larger increase in the allocation of Act 11 revenues to the Commercial class than Aqua's allocation. This allocation was based on his proposed increases to the wastewater service classes, which then affected the amounts of Act 11 revenues that were assigned to each water service class. Rebuttal Table 2 presents a comparison of the Act 11 revenues allocated to each water service class by the Company and Mr. Cathcart.

Rebuttal Table 2
Proposed Allocations of Act 11 Revenues

	Aqua Proposed	OSBA Proposed
Residential	$ 13,116,320	$ 10,193,966
Commercial	$ 8,245,608	$ 8,706,186
Industrial	$ 340,775	$ 610,508
Public	$ 147,926	$ 140,629
Total	$ 21,850,629	$ 19,651,289

Rebuttal Table 2 shows the substantial shift of Act 11 revenues away from the Residential class and to the Commercial and Industrial classes. In the case of the Commercial class, this shift raised its total percentage increase to approximately the system average increase as I described above.

Q. Explain how the increase in Act 11 Commercial revenues occurred.

A. Mr. Cathcart proposed a lower increase in wastewater revenues for the Commercial class than Aqua proposed. Mr. Cathcart's Schedule Q-6WW shows an increase to the Commercial wastewater class of 20.1%, or $3,979,273. According to Schedule Q-1WW the Company's proposed increase to Commercial wastewater customers was 22.5%, or $4,452,865. Mr. Cathcart's lower proposed wastewater increase also increased the amount of Act 11 revenues assigned to the Commercial water class.

I note that Mr. Cathcart's proposed increase to Commercial wastewater customers, 20.1%, is lower than the overall wastewater increase of 23.1% shown in his Schedule Q-6WW.

Q. Should the Commission accept the OSBA's proposed water service revenue allocation?

A. No. Although Mr. Cathcart followed an approach that is similar to Aqua's in terms of assigning Act 11 revenues to the corresponding water service classes, the resulting increase to Commercial water service customers is inconsistent with the results of the Company's water CCOSS. Given that the Commercial water service class is above the system average return, it should receive an increase below the system average increase. Aqua's increase as proposed by Ms. Heppenstall appropriately recognizes and follows this relationship. Mr. Cathcart's approach does not, as it allocates a greater percentage increase to the Commercial class than is warranted by the Company's CCOSS.

I recommend that the Commission follow Aqua's proposed revenue allocation in this case. If the Commission allows a lower increase than the Company requested, then Aqua's proposed water service class percentage increases should be scaled back proportionately.

Q. Does this conclude your Rebuttal Testimony?

A. Yes.

RESUME OF RICHARD A. BAUDINO

EDUCATION

New Mexico State University, M.A.
Major in Economics
Minor in Statistics

New Mexico State University, B.A.
Economics
English

Thirty-nine years of experience in utility ratemaking and the application of principles of economics to the regulation of electric, gas, and water utilities. Broad based experience in revenue requirement analysis, cost of capital, rate of return, cost and revenue allocation, and rate design.

REGULATORY TESTIMONY

Preparation and presentation of expert testimony in the areas of:

Cost of Capital for Electric, Gas and Water Companies
Electric, Gas, and Water Utility Cost Allocation and Rate Design
Revenue Requirements
Gas and Electric industry restructuring and competition
Fuel cost auditing
Ratemaking Treatment of Generating Plant Sale/Leasebacks

RESUME OF RICHARD A. BAUDINO

EXPERIENCE

1989 to Present: **Kennedy and Associates: Director of Consulting, Consultant** - Responsible for consulting assignments in revenue requirements, rate design, cost of capital, economic analysis of generation alternatives, electric and gas industry restructuring/competition and water utility issues.

1982 to 1989: **New Mexico Public Service Commission Staff: Utility Economist** - Responsible for preparation of analysis and expert testimony in the areas of rate of return, cost allocation, rate design, finance, phase-in of electric generating plants, and sale/leaseback transactions.

DIRECT TESTIMONY

OF

CARLOS PADILLA

On Behalf of

SCH USA, LLC

Topics Addressed:

Background on Split Rock Resort
EDU Billing Method for Unmetered Service
Summary of Request for Relief

August 16, 2024

TABLE OF CONTENTS

I. INTRODUCTION.....1

II. BACKGROUND 2

III. EDU BILING.....4

IV. CONCLUSION 6

I. INTRODUCTION

Q. PLEASE STATE YOUR NAME AND TITLE.

A. My name is Carlos Padilla and I am Senior Counsel for Thy Collection. Thy Collection owns and operates the Bel Air Collection Resorts & Spas. SCH USA, LLC ("SCH USA") is a part of Bel Air Collection Resorts & Spas.

Please note that I am testifying as a fact witness, not as an attorney. I am not licensed to practice law in the United States.

Q. WHAT ARE YOUR JOB RESPONSIBILITIES?

A. I manage the Company's regulatory risks and permits in Pennsylvania. I also investigate and respond to litigation and potential litigation concerning our properties in Pennsylvania.

Q. HAVE YOU EVER TESTIFIED BEFORE THIS COMMISSION?

A. Yes, I have submitted direct testimony in SCH USA's consolidated formal complaint proceedings against Aqua Wastewater Pennsylvania, Inc. at Docket Nos. C-2022-3036893 and C-2022-3037118, which are currently pending before the Pennsylvania Public Utility Commission ("PUC" or "Commission").

I wish to note that SCH USA's individual billing issues are being addressed in its formal complaint proceedings and not in this base rate case.

Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

A. The purpose of my testimony is to provide background information on SCH USA's Split Rock Resort.

Q. ARE ANY OTHER WITNESSES TESTIFYING ON BEHALF OF SCH USA?

A. Yes. Ronald Carrier of Big Lake Consulting Group, LLC and Frank Lacey of Electric Advisors Consulting, LLC will also be providing testimony. *See* SCH USA St. Nos. 2 and 3, respectively.

II. BACKGROUND

Q. DOES SCH USA OPERATE A BUSINESS IN PENNSYLVANIA?

A. Yes. SCH USA operates a large commercial resort property known as the "Split Rock Resort." The Resort is located in an area called Lake Harmony, which is in Kidder Township, Carbon County, Pennsylvania.

Q. HOW LONG HAS SCH USA OWNED THIS PROPERTY?

A. We purchased the Resort property on October 29, 2020. At that time, we also purchased the wells that provide water for the Resort.

Q. PLEASE DESCRIBE THE SPLIT ROCK RESORT PROPERTY.

A. Split Rock Resort includes the following buildings and amenities.

- **The Lodge:** The Lodge is a luxury resort hotel. It has 50 hotel rooms, a restaurant, and a meeting room.
- **Willowbrook:** Willowbrook is a resort hotel with 256 guest rooms.
- **The Galleria:** The Galleria is also a resort hotel, with 77 hotel rooms and eight VIP rooms. The Galleria is also in close proximity to other on-property features, including: a food court and shops; restaurants; movie theater; racquetball court; waterpark; indoor pool; lobby bar; and a large meeting space.
- **Laundry**: There is also a laundry that serves the above properties.

Q. WHO PROVIDES WATER SERVICE TO SPLIT ROCK RESORT?

A. We provide our own water from wells, under a permit issued by the Delaware River Basin Commission ("DRBC").

Q. WHO PROVIDES WASTEWATER SERVICE TO SPLIT ROCK RESORT?

A. Aqua Pennsylvania Wastewater, Inc. ("Aqua") provides wastewater service to the Resort, which is a commercial wastewater customer. We have four wastewater accounts with Aqua, for the Lodge, Willowbrook, the Galleria, and the Laundry. The Resort is in Aqua's Rate Zone 4.

Q. IN GENERAL, WHAT ARE SCH USA CONCERNS WITH AQUA'S WASTEWATER BILLING AND CURRENT AND PROPOSED TARIFFS?

A. As will be discussed in greater detail below and further addressed by SCH USA witnesses Carrier and Lacey, Aqua's current and proposed wastewater tariff results in unjust and unreasonable rates being charged to SCH USA. Because SCH USA's water usage is not metered, Aqua bills the Resort for wastewater usage on an Equivalent Dwelling Unit ("EDU") basis. Billing SCH USA on a flat, per EDU basis assumes that the Resort is always at 100% full occupancy. However, since purchasing the resort and coming out of the COVID-19 pandemic, the resort's occupancy rates in all of its operations have been significantly lower than 100%.

Q. WHAT DOES THAT MEAN FOR THE RESORT'S OVERALL WASTEWATER USAGE?

A. In my view, if our resort is operating at anything less than 100% occupancy – which is what the EDU based rates are set on – SCH USA is being charged for more wastewater usage than what Aqua is collecting and treating. This makes the required 100% occupancy-at-all-times charge unreasonable, and thus our actual usage is consistently much lower than what is being billed by Aqua. The EDUs charged to SCH USA under

the current and proposed wastewater tariffs have no relationship whatsoever to actual usage at the property, and therefore are unjust and unreasonable.

Q. WHAT RELIEF IS SCH USA SEEKING?

A. SCH USA is simply seeking to pay rates that are just and reasonable and based on the actual wastewater service being provided. This could be accomplished in a number of ways, including: (1) measuring actual water consumption; (2) measuring actual wastewater discharges to Aqua's system; (3) adjusting the EDUs used for billing purposes to better reflect actual usage and occupancy; or (4) assigning a different proxy that more accurately reflects actual usage and occupancy. Aqua should be directed to explicitly provide for such billing options in its tariff in order to allow currently unmetered customers such as SCH USA to be billed for actual usage, rather than using EDUs which are an unfair and inaccurate estimation.

III. EDU BILLING

Q. AS YOU PREVIOUSLY STATED, SCH USA'S CONCERN IS WITH AQUA'S BILLING THAT IS BASED ON EDUS. CAN YOU PLEASE PROVIDE MORE INFORMATION?

A. Yes. Aqua bills SCH USA a flat rates based on EDUs. This methodology assumes that the Resort is at full occupancy, every single day of the year. This approach is unreasonable as applied to SCH USA because our actual wastewater usage is much lower than what is being billed by Aqua, since our occupancy rates are significantly lower than 100%.

Q. HOW WERE THE EDUS FOR SCH USA DETERMINED?

A. The number of EDUs were originally set by a Settlement Agreement between Split Rock's original owner and Kidder Township in 2010. This Settlement Agreement and its use in determining the number of EDUs is further addressed by SCH USA witness Frank

Lacey. SCH USA St. No. 3. As Mr. Lacey further discusses, these EDUs have no relation to actual usage by the Resort, resulting in rates that are unjust and unreasonable.

Q. IS AQUA PROPOSING TO CHANGE THE DEFINITION OF EDU IN ITS WASTEWATER TARIFF?

A. Yes, it appears that Aqua's proposed change to the definition of EDU is an attempt to solidify Aqua's position that the Resort's EDUs are based on a "predetermined EDU allocation" as established in the Settlement Agreement discussed above. As Mr. Lacey discusses further, the Settlement Agreement is not a valid method of determining Split Rock Resort's EDUs – let alone reflecting its actual usage – and this proposed definition change must be rejected.

Q. WHAT DO YOU BELIEVE SHOULD BE DONE TO MEASURE SCH USA'S WASTEWATER USAGE SO THAT BILLS WILL BE BASED ON ACTUAL USAGE?

A. First, Aqua could use wastewater meters to measure SCH USA's actual discharges into its wastewater system and bill SCH USA based on these actual measurements.

As a second option, SCH USA's actual water consumption could be metered and Aqua could use water consumption as a proxy for wastewater usage for billing purposes. In this instance, water meters could be used to determine a more accurate, and more reasonable, quantity of wastewater being discharged to Aqua's system. These metering options are discussed in more detail by SCH USA witnesses Carrier and Lacey.

Aqua should be directed to explicitly provide for such billing options in its tariff in order to allow currently unmetered customers such as SCH USA to be billed for actual usage.

IV. CONCLUSION

Q. DOES THIS COMPLETE YOUR DIRECT TESTIMONY?

A. Yes.

VERIFICATION

I, Carlos R. Padilla, hereby state that: (1) I am the Senior Counsel for SCH USA, LLC ("SCH USA"); (2) the facts set forth in my testimony are true and correct (or are true and correct to the best of my knowledge, information and belief); and, (3) I expect to be able to prove the same at a hearing held in this matter. I understand that the statements herein are made subject to the penalties of 18 Pa. C.S. § 4904 (relating to unsworn falsification to authorities).

DIRECT TESTIMONY

OF

RONALD CARRIER

On Behalf of

SCH USA, LLC

Topics Addressed:

Definition of EDUs
Wastewater Measurement and Billing

August 16, 2024

TABLE OF CONTENTS

I. INTRODUCTION AND BACKGROUND 1

II. WASTEWATER MEASUREMENT AND BILLING 2

III. CONCLUSION 10

TABLE OF EXHIBITS

Exhibit	Description
Appendix A	Resume of Ronald Carrier
Appendix B	List of Previous Testimony
RC-1	Aqua Discovery Responses

I. INTRODUCTION AND BACKGROUND

Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A. My name is Ronald Carrier. My business address is 2316 Anchor Court, Holt, MI 48842.

Q. WHAT IS YOUR CURRENT POSITION?

A. I am the founding principal of Big Lake Consulting Group, LLC, which is a regulatory strategy consulting company that offers services such as tariff analyses, strategic planning, and regulatory support including the provision of testimony in regulatory proceedings.

Q. ON WHOSE BEHALF ARE YOU TESTIFYING IN THIS PROCEEDING?

A. I am an independent consultant testifying on behalf of SCH USA, LLC ("SCH USA").

Q. PLEASE SUMMARIZE YOUR EDUCATIONAL BACKGROUND AND PROFESSIONAL EXPERIENCE.

A. As a consultant, I provide policy- and market-related consulting services to advanced energy management companies, wholesale energy companies and renewable energy project developers. I have worked in the regulated energy industry for approximately 40 years, beginning immediately after earning my undergraduate degree. Early in my career, I was employed by Consumers Energy as an engineer at their Palisades Nuclear Station. At Consumers Energy I also held various managerial roles in Industrial Energy Sales, Natural Gas Rate Administration and Electric Customer Choice Administration. I have also worked for Strategic Energy, a retail electricity and natural gas services company, and Direct Energy, a retail electric and gas supplier that acquired Strategic Energy in 2008. I created Big Lake Consulting Group LLC in 2021. I hold a Bachelor of Science degree in Mechanical Engineering from the University of Michigan and a Master

of Business Administration degree from Central Michigan University. My resume is provided as Appendix A.

Q. HAVE YOU EVER TESTIFIED BEFORE THE PENNSYLVANIA PUBLIC UTILITY COMMISSION OR ANY OTHER REGULATORY AGENCY?

A. Yes. I have testified before the Pennsylvania Public Utility Commission ("Commission" or "PA PUC"). I have also testified before other state regulatory agencies, and legislatures. In addition to Pennsylvania, I have provided expert testimony before the utility commission in Michigan. I have presented legislative testimony in Michigan and Illinois. I have also spoken at trade shows, conferences and other industry and corporate events. A detailed listing of my prior testimony is contained in Appendix B.

Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

A. The purpose of my testimony is to explain how Equivalent Dwelling Units ("EDUs") are used by Aqua Pennsylvania Wastewater, Inc. ("Aqua") for billing for wastewater services, and to show that there are more accurate means to measure actual wastewater flow for billing purposes.

II. <u>WASTEWATER MEASUREMENT AND BILLING</u>

Q. WHAT IS AN "EQUIVALENT DWELLING UNIT"?

A. An EDU is an estimated measurement of how much wastewater a customer produces when a means to meter the actual wastewater flow is not available.

Q. HOW ARE EDUS GENERALLY DETERMINED?

A. EDUs are generally calculated by taking the estimated wastewater produced by an unmetered wastewater customer and dividing it by the average wastewater produced by a single-family residence. The resulting value is the EDU value. For example, if a business has an estimated wastewater flow of 800 gallons per day and the average

wastewater flow from a single-family residence is 400 gallons per day, the EDU value for the business would be calculated as: 800 ÷ 400 = 2.0.

Q. DOES AQUA USE EDUS FOR BILLING PURPOSES?

A. Yes, Aqua uses EDUs for billing purposes when wastewater customers do not have metered water service.

Q. HOW DOES AQUA CALCULATE EDUS?

A. According the Aqua's current Tariff Sewer-PA P.U.C. No. 3, Original Page 25, Aqua uses the sewage flows for the type of business as outlined in the Pennsylvania Department of Environmental Protection regulation at 25 Pa. Code § 73.17 and then divides that value by the estimated average daily wastewater flow from a single-family unit.

In Aqua's proposed Tariff Sewer-PA P.U.C. No. 4, Original Page 26, Aqua proposes to revise the definition of EDU to provide as follows:

> Equivalent Dwelling Unit or "EDU": Except for existing Customers acquired by the Company through a purchase or acquisition and for billing purposes only, the EDU is a measure assigned by the Company based upon the estimated average daily wastewater flow for the type of business, as calculated by the PaDEP regulation at 52 Pa. Code § 73.17(b) divided by the Company's typical estimated average daily wastewater flow from a current single-family unit. Residential Customers are designated as one (1) EDU; however, in the Company's sole discretion, the Company may assign more than one (1) EDU for a residential Property.
>
> For existing customers without a predetermined EDU allocation, the EDU is a measure based upon the estimated average daily wastewater flow for the type of business based on water usage, divided by the typical estimated average daily wastewater flow from a current single-family unit. For other existing customers acquired by the Company through a purchase or acquisition, the number of equivalent dwelling units is available at https://www.aquawater.com/about/states-we-serve/pennsylvania/index.php.
>
> Any Customer who modifies their properties in a manner that impacts the EDU calculation, including in areas previously acquired by the Company,

will be subject to the EDU definition described above. The Company will consider a Customer's request for a change in the number of assigned EDU's upon presentation of substantial evidence, satisfactory to the Company in its sole discretion. The Customer shall bear the burden of proof for all such requests.

Q. DOES AQUA CHARGE THE SPLIT ROCK RESORT FOR WASTEWATER SERVICE BASED ON EDUS?

A. Yes, Aqua charges Split Rock Resort for wastewater service based on EDUs.

Q. WHY DOES AQUA BILL SPLIT ROCK BASED ON EDUS RATHER THAN FOR ACTUAL WASTEWATER USAGE?

A. Aqua bills Split Rock based on EDUs rather than actual wastewater usage as Split Rock does not have metered water service for their facilities. Water service is provided by wells located on or near the Split Rock properties.

Q. HOW DID AQUA DETERMINE THE NUMBER OF EDUS TO CHARGE SPLIT ROCK FOR WASTEWATER SERVICE?

A. It appears that Aqua assigned the EDU to three of the four accounts by using EDUs contained in the Release and Settlement Agreement between the Resort's original developer and Kidder Township ("Settlement Agreement"). This Settlement Agreement, executed in 2010, established the EDUs for the various properties that are now owned by SCH USA. There is no description detailing how the EDUs were calculated for the various properties covered by the agreement. There is also no evidence to suggest how Aqua determined the EDUs for the fourth bill.

Q. DO YOU HAVE ANY CONCERNS WITH AQUA'S CURRENT PRACTICE OF CHARGING SPLIT ROCK BASED ON EDUS?

A. Yes, for several reasons. First, an EDU is simply an estimate of wastewater flow based on assumptions that may nor may not hold true for any business, while accurate metering technologies are readily available in the market. Second, Aqua is using EDU values based on an over a decade old Settlement Agreement that doesn't specify how the EDUs

were calculated. Further, through Aqua's proposed changes to the tariff definition of EDU, it appears that the Company is attempting to solidify its position of charging SCH USA for EDUs based on the outdated Settlement Agreement, as will be discussed further by SCH USA witness Lacey.

Q. WHAT OTHER CONCERNS DO YOU HAVE REGARDING AQUA'S PROPOSED CHANGES TO THE DEFINITION OF EDU?

A. The definition of an EDU in the current Aqua tariff is "The EDU is a measure based upon the estimated average daily wastewater flow for the type of business, as calculated by the Pennsylvania Department of Environmental Protection regulation at 25 Pa. Code § 73.17 divided by the typical estimated average daily wastewater flow from a current single-family unit. In the Company's sole discretion, the Company may assign more than one (1) EDU for a residential Property."[1] Aqua proposes to add wording to allow the Company to estimate the average daily wastewater flow from a single-family unit.

Q. WHY IS THIS A CONCERN?

A. This is concerning for two reasons. First, as SCH USA witness Lacey mentions in his testimony, 25 Pa. Code § 73.17 does not determine the average daily flow of wastewater from facilities. Rather, the numbers presented are estimates of peak daily flow that should be used for "design criteria" for on-lot sewage systems. The regulation is not an accurate method for determining actual wastewater flows from any particular property. Secondly, under Aqua's proposed definition of EDU and how to calculate the EDUs for customers, all of the estimated wastewater flows for performing the EDU calculations are contained in 25 Pa. Code § 73.17, ***except*** for the estimated average wastewater flow from

[1] Aqua Pennsylvania Wastewater Inc. Tariff Sewer-PA-P.U.C. No. 3, Original Page 25.

a single-family unit. Since 25 Pa. Code § 73.17 contains an estimated average wastewater flow from a single-family unit and identifies it as 400 gallons per day, it isn't appropriate for Aqua to fabricate its own estimate.

Q. DOES THE ESTIMATE OF THE AVERAGE WASTEWATER FLOW FROM A SINGLE-FAMILY RESIDENTAIL UNIT HAVE A SIGNIFICANT IMPACT ON THE EDU CALCULATION?

A. Yes it does. Earlier in my testimony, I used the 400 gallon per day average that is contained in 25 Pa. Code § 73.17 to arrive at the EDU value of 2 for the customer in the example. If the average estimated residential flow is changed, it can have a significant impact on the resulting EDU value. By changing the value from 400 gallons per day to 250, the resulting EDU value would go from 2 to 3.2.

Q. IN GENERAL, IS IT PREFERABLE FOR A UTILITY TO CHARGE FOR UTILITY SERVICE BASED ON ACTUAL USAGE, OR BASED ON A FLAT FEE?

A. It is preferable for a utility to charge for utility service based on actual usage wherever possible. In fact, Aqua itself has recognized that volumetric billing is preferable to flat rate billing.[2] This is especially true for businesses that have variability in their usage. This is the case with SCH USA as their properties have occupancy rates that fluctuate greatly throughout the year and from year to year.

When a utility bases their billing on a flat fee, they are making assumptions on the utilization of their service for that customer and if the customer's usage varies from that estimate, the customer either pays too much if the utilization is less than the utility estimate or pays less than they should if their utilization ends up being more than the

[2] *See* Aqua St. No. 10 at 14; SCH USA Exhibit RC-1, Aqua Response to OCA-II-5.

utility estimate. In either case, there is a winner and a loser that doesn't take place if actual usage is utilized for billing.

Q. WHAT ALTERNATIVE MEANS ARE AVAILABLE TO DETERMINE ACTUAL WASTEWATER USAGE MORE ACCURATELY FOR BILLING PURPOSES?

A. There are metering technologies available that allow for direct measurement of wastewater flow, negating the need for estimating the usage based on EDUs or from water meter readings. Two of the most common types of metering technologies used in measurement of sewage flow are ultrasonic flowmeters and electromagnetic flowmeters. Ultrasonic flowmeters operate using the principle of the Doppler effect. The Doppler effect is defined as the increase (or decrease) in the frequency of sound, light, or other waves as the source and observer move towards each other.[3] The most common example of the Doppler effect is what you hear when a moving train is sounding its horn and the tone you hear drops in frequency as the train passes you. Ultrasonic flowmeters are attached to the outside of the sewer line and do not come into contact with the sewage flow.

An electromagnetic flowmeter functions based on the Faraday's law of electromagnetic induction.[4] It measures the flow of the sewage when the flow moves through the magnetic field induced by the flowmeter. Unlike the ultrasonic flowmeter, the electromagnetic flowmeter typically has a probe that is inserted inside the sewer pipe.

[4] See https://byjus.com/physics/faradays-law/.

Q. YOU MENTIONED WASTEWATER METERS AS AN ALTERNATIVE OPTION. ARE YOU AWARE OF WASTEWATER METERS BEING USED BY OTHER UTILITIES?

A. Yes. A non-exhaustive review of sewer tariffs from around the country has identified several utilities that allow for the use of wastewater meters for billing rather than using estimated usage or billings based on EDUs.

Gaines Charter Township, located in Michigan, has the following provision in their Schedule of Rates and Charges: "For an Industrial or Commercial Customer with a sewage meter (e.g., the Kent County Landfill located in Byron Township), the Sewer Use Fee shall be billed based upon the actual metered flow of Sewage discharged to the Sewer System."[5]

The City of Kalamazoo, Michigan also allows for the direct metering of wastewater flow. Their current city code provides that "Any user of the wastewater system may elect to rearrange his water supply pipes and metering, for the purpose of eliminating from the total water consumption applicable to wastewater charges the water not running to the sanitary sewers, or he may elect to establish metering facilities registering the discharge from his premises to the sanitary sewers. All such arrangements shall be made subject to the approval of the Director, and the expense thereof, including installation, maintenance, and operation, shall be borne by the user."[6]

The City of Mishawaka, Indiana, has a provision in their rates to allow for direct metering of wastewater discharge. The provision says, "The city reserves the right to bill

[5] Charter Township of Gaines, County of Kent, Michigan, AN ORDINANCE TO ADMINISTER, REGULATE AND PROVIDE FOR THE CONNECTION TO AND USE OF THE PUBLIC WATER AND SEWER SYSTEMS; TO REGULATE THE USE OF PRIVATE WELLS AND PRIVATE SEWAGE DISPOSAL; TO PROHIBIT CROSS CONNECTIONS TO THE WATER SYSTEM; TO PROVIDE FOR THE SETTING AND COLLECTION OF RATES AND CHARGES FOR THE USE OF THE WATER AND SEWER SYSTEMS; AND TO PROVIDE PENALTIES FOR ORDINANCE VIOLATIONS, Section 1612.e.

[6] City of Kalamazoo, MI Code §28-72.

residential, commercial and industrial users for their wastewater discharge on the basis of their actual wastewater flow volumes, as opposed to sewage rates based on water usage."[7]

The last example that I will present is from the City of Tacoma, Washington. While the City of Tacoma generally bases the billings for wastewater on the metered water service, they do allow for some exceptions. Research indicates that there are about two dozen commercial or industrial customers that have their rates calculated based on sampling and metering of each business.[8]

Q. HAS THE COMMISSION RECOGNIZED THE POTENTIAL TO USE WASTEWATER METERS TO CALCULATE ACTUAL USAGE FOR BILLING PURPOSES?

A. Yes. The Commission's sample wastewater tariff recognizes that metered rates can be charged based on the metered volume of wastewater discharged at a property into the wastewater system.[9] Mr. Lacey has noted in his testimony that the Commission allows for both water-based and sewage-based metering in Aqua's tariff.

Q. DOES AQUA BILL ANY WASTEWATER CUSTOMERS IN ITS SERVICE TERRITORY BASED ON ACTUAL USAGE OBTAINED FROM WASTEWATER METERS?

A. Yes, Aqua does have customers that are billed based on metered wastewater flows.[10]

Q. CAN WASTEWATER USAGE BE BILLED BASED ON METERED WATER CONSUMPTION?

A. Yes. Even though the common practice of basing sewer charges on metered water consumption is a more accurate means of determining sewage usage than calculating

[7] City of Mishawaka, PART I – CODE OF ORDINANCES, CHAPTER 62, SECTION 62.181, City's right to determine billing method.
[8] See https://www.cityoftacoma.org/government/city_departments/environmentalservices/rates/wastewater_rates.

[10] SCH USA Exhibit RC-1, Aqua Response to SCH-I-1.

EDUs, it is still just another form of estimating sewer usage. This is because not all the water going through the water meter ends up going into the sewer system. Depending on the facility, some of it can be used for drinking while some of it can be used for cooking or other domestic purposes.

Q. DOES AQUA BILL ANY WASTEWATER CUSTOMER(S) IN ITS SERVICE TERRITORY BASED ON ACTUAL USAGE OBTAINED FROM WATER METERS, WHERE WATER IS PROVIDED BY A WELL OR BY AN ENTITY OTHER THAN A UTILITY, MUNICIPALITY, OR MUNICIPAL AUTHORITY?

A. Yes, Aqua does have some wastewater customers who are billed based on water meter reads from meters connected to customer owned wells.[11]

Q. DO YOU HAVE ANY RECOMMENDATIONS?

A. Yes. As outlined in Mr. Padilla's testimony (SCH USA St. No. 1), the Commission should require Aqua to explicitly provide for billing options in its tariff to allow currently unmetered customers such as SCH USA to be billed for actual usage, including by installing water meters to measure actual water consumption, or installing wastewater meters to measures actual wastewater discharges to the Aqua system.

III. CONCLUSION

Q. DOES THIS COMPLETE YOUR DIRECT TESTIMONY?

A. Yes.

ENERGY REGULATORY AFFAIRS EXECUTIVE

Top performing, successful and driven professional with extensive experience in wholesale and retail energy markets. Expertise in RTO/ISO stakeholder processes, market design, tariff interpretation and advocacy. Proven track record in identifying risks and opportunities for the business at both the wholesale and retail levels. Core competencies include:

Leadership • Team Building • Strategic Planning • Presentations • Communication • Negotiations

EXPERIENCE

Big Lake Consulting Group, LLC, Holt, MI
President, April 2021 to Present
Provide policy and market related consulting service to wholesale energy companies, advanced energy management companies and renewable energy project developers.

Direct Energy, Houston, TX **June 2008 – April 2021**
Director of Wholesale and FERC Policy, September 2019 – April 2021
Led the team of regulatory affairs professionals responsible for the PJM, New York ISO, MISO, ISO-New England and ERCOT Regional Transmission Organizations and developed Direct Energy's wholesale electric advocacy positions at the Federal Energy Regulatory Commission.

- Coordinated intervention at FERC that resulted in a $5 million reduction in PJM fees assessed to Direct Energy.
- Negotiated a settlement with a utility that resulted in a $3.1 million payment to Direct Energy.
- Provided expert opinion to Wholesale Trading Team that allowed them to develop a capacity purchase strategy to meet unique regulatory requirements in certain MISO states.

Director of Government and Regulatory Affairs, June 2008 – September 2019
Managed advocacy positions of Direct Energy at ISO-New England and MISO as well as providing lobbying support for the Michigan and Illinois markets served by Direct Energy.

- Developed Direct Energy's regulatory strategy in NEPOOL, and MISO markets and advocated for the company's interests in the NEPOOL and MISO stakeholder process.
- Provided regular communication and analysis to Direct Energy's trading desk, generation management group, demand response team, and credit team related to proposed changes to ISO-NE and MISO rules.
- Delivered routine updates on the NEPOOL and MISO markets to Direct Energy's sales team.
- Supported the Michigan regulatory and legislative team by attending lobbying meetings and educating legislators.

Strategic Energy, Pittsburgh, Pa
Director of Wholesale Market Development, September 2006 – June 2008
Directed the wholesale electric policy activities for the Company, managing interactions at New York ISO, PJM, MISO and New England ISO as well as FERC.

- Led Federal Energy Regulatory activities for, intervening in MISO/PJM SECA case, resulting in over $6 million being reimbursed to Strategic Energy.
- Provided support to the trading desk on RTO market rule changes.
- Managed Strategic Energy's legislative and regulatory efforts in Michigan.

OTHER RELEVANT EXPERIENCE

Strategic Energy, Pittsburgh, PA - Manager, Regulatory and Legislative Affairs
Consumers Energy Company, Jackson, MI - Customer Choice Program Manager, Director, Wholesale Power Sales, Director, Competitive Analysis and Planning, Regional Sales Director

OTHER PROFESSIONAL ACTIVITIES

Treasurer and Trustee of Energy Michigan, 5/13 to Present
Joint Nominating Representative of the NEPOOL Supplier Sector, 1/17 – 3/20

EDUCATION

Master of Business Administration - Central Michigan University
Bachelor of Science: Mechanical Engineering - University of Michigan

AQUA PENNSYLVANIA, INC. &
AQUA PENNSYLVANIA WASTEWATER, INC.

DOCKET NO. R-2024-3047822 & R-2024-3047824

SCH USA, LLC

SET I INTERROGATORIES

SCH-I-1 Does Aqua bill any wastewater customer(s) in its service territory based on actual usage obtained from wastewater meters? If so, for each such customer, please identify:

a. The type of customer (residential, commercial, industrial, etc.);

b. The customer's rate zone as established in Aqua's wastewater tariff; and

c. Whether the wastewater meter(s) was/were installed at Aqua's expense, the customer's expense, or a combination thereof.

d. For any customer identified in parts (a)-(c) above, provide their average wastewater usage.

e. For any average usage provided in (d) above, is that average greater or less than an EDU proxy for flow figures for that customer as identified in 25 Pa. Code § 73.17?

RESPONSE

a. through c. The Company has two commercial customers, one in Rate Zone 2 and one in Rate Zone 11 that are billed based on metered wastewater flows. The wastewater meters and associated infrastructure necessary for reading wastewater flows and billing was installed and in operation prior to the acquisition of each of the systems by Aqua PA. These customers were grandfathered in upon acquisition of these systems and Aqua PA adopted the billing structure, in place at the time of acquisition, which included either a meter size or EDU charge in addition to a volumetric charge.

d. through e. The customer in Rate Zone 2 had an average monthly flow of approximately 1,059,700 gallons for the HTY ending December 31, 2023. The

customer in Rate Zone 11 had an average monthly flow of approximately 150,800 gallons for the HTY ending December 31, 2023. The EDU proxy for flow figures for customers as identified in 25 Pa. Code § 73.17 is for design purposes and as noted in the response above, the 2 customers identified are billed using both a base charge and a volumetric charge, not solely an EDU charge, therefore the analysis requested cannot be completed as requested.

SCH USA, LLC

SET I INTERROGATORIES

SCH-I-2 Does Aqua bill any wastewater customer(s) in its service territory based on actual usage obtained from water meters, where water is provided by a well or by an entity other than a utility, municipality, or municipal authority? If so, for each such customer, please identify:

a. The type of customer (residential, commercial, industrial, etc.);
b. The customer's rate zone as established in Aqua's wastewater tariff; and
c. Whether the water meter(s) was/were installed at Aqua's expense, the customer's expense, the water provider's expense, or some combination thereof.

RESPONSE

a. The Company has limited wastewater customers who are billed based on water meter reads where the water is provided by a well. When the Company acquired the systems referenced below, the company adopted the existing rates structure and method in which these customers were billed.

b. and c. Rate Zone 7 (Limerick) – 53 Commercial accounts with customer installed meters.
Rate Zone 11 (New Garden) = 73 Residential accounts with customer installed meters at the time of acquisition, which were updated to read via radio frequency at Aqua's expense.
Rate Zone 11 (New Garden) = 24 Commercial accounts with customer installed meters at the time of acquisition, which were updated to read via radio frequency at Aqua's expense.
Rate Zone 4 – (Blakeslee) 66 Commercial accounts that at the time of acquisition, had meters that were installed by Tobyhanna Township, but have since been replaced by the Company.

OFFICE OF CONSUMER ADVOCATE

SET II INTERROGATORIES

OCA-II-5 Reference Statement No. 10, page 14, lines 21-23. Please identify all Commission orders and provide a copy of all documents relied upon to support Mr. Herbert's claim that the preference is to charge a metered rate when water reads are available.

RESPONSE

Please refer to page 272 of the Order from Aqua's last base rate case at Dockets No. R-2021-3027385 and R-2021-3027386 where the Commission states that "There is no question that volumetric billing is preferable to flat-rate billing, as it provides better price signals and promotes conservation, as well as resulting in a more equitable distribution of the variable costs of wastewater service among ratepayers".

VERIFICATION

I, Ronald Carrier, hereby state that: (1) I am the founding principal of Big Lake Consulting Group, LLC; (2) the facts set forth in my testimony are true and correct (or are true and correct to the best of my knowledge, information and belief); and, (3) I expect to be able to prove the same at a hearing held in this matter. I understand that the statements herein are made subject to the penalties of 18 Pa. C.S. § 4904 (relating to unsworn falsification to authorities).

FL-2	Asset Purchase Agreement Between the Township of Kidder and Little Washington Wastewater Company d/b/a Suburban Wastewater Company, dated March 15, 2012.
FL-3	Aqua Discovery Responses

I. INTRODUCTION AND BACKGROUND

Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A. My name is Frank Lacey. My business address is 3 Traylor Drive, West Chester, PA 19382.

Q. WHAT IS YOUR CURRENT POSITION?

A. I am the founding principal of Electric Advisors Consulting, LLC, which is a regulatory strategy consulting firm and offers services such as tariff analyses, strategic planning, procurement analysis, and regulatory support, including the provision of testimony in regulatory and judicial proceedings.

Q. ON WHOSE BEHALF ARE YOU TESTIFYING IN THIS PROCEEDING?

A. I am an independent consultant testifying on behalf of SCH USA, LLC ("SCH USA").

Q. PLEASE SUMMARIZE YOUR EDUCATIONAL BACKGROUND AND PROFESSIONAL EXPERIENCE.

A. As a consultant, I provide policy- and market-related consulting services to advanced energy management companies and end-use customers. I have worked in regulated industries for approximately 31 years, beginning immediately after earning my graduate degree. Early in my career, I was employed as a consultant to industry participants, first by Putnam, Hayes & Bartlett, Inc. and then by Arthur Andersen Business Consulting. I have also worked for Strategic Energy, a retail electricity and natural gas services company, and Direct Energy, a retail electric and gas supplier that acquired Strategic Energy in 2008. I created Electric Advisors Consulting LLC in 2015. I hold a Bachelor of Science degree in Transportation and Logistics from the University of Maryland and a Master of Science in Industrial Administration with concentrations in finance and

environmental management from the Tepper School of Business at Carnegie Mellon University. My resume is provided as Appendix A.

Q. HAVE YOU EVER TESTIFIED BEFORE THE PENNSYLVANIA PUBLIC UTILITY COMMISSION OR ANY OTHER REGULATORY AGENCY?

A. Yes. I have testified before the Pennsylvania Public Utility Commission ("Commission" or "PA PUC") on numerous occasions. In addition to Pennsylvania, I have provided expert testimony before the utility commissions in New York, Ohio, Maryland, New Jersey, Massachusetts, Illinois, Delaware, Rhode Island, Virginia, Utah and California. I have also testified numerous times before state legislatures, and twice as a technical conference witness at the Federal Energy Regulatory Commission ("FERC"). I have also filed expert reports in judicial proceedings in the Superior Court of New Jersey in Bergen County, in the Supreme Court of the State of New York in New York County and in the U.S. District Court for the Eastern District of North Carolina. I have presented oral testimony in less formal proceedings before the Commissions in Pennsylvania, Maryland, Delaware and Texas. I have presented legislative testimony in New York, Maryland, Pennsylvania, Delaware, Connecticut, Michigan, California and Texas. I have also spoken at numerous trade shows, conferences and other industry and corporate events as an expert on regulatory issues. A detailed listing of my prior testimony is contained in Appendix B.

Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

A. The purpose of my testimony is to show that Aqua's proposed wastewater tariff, including changes to the definition of Equivalent Dwelling Unit, will result in unjust and unreasonable rates as they apply to currently unmetered wastewater customers, such as SCH USA. I will also show that Aqua, despite requesting increases in rates, is not

offering, nor is it planning to offer, any meaningful customer service level improvements. Aqua's unwillingness to facilitate metering of either well water inflows or wastewater outflows results in the inefficient use of resources including water, wastewater, chemicals used to treat both and energy consumed to transport and treat water and wastewater.

II. REASONABLENESS OF AQUA'S WASTEWATER BILLING METHOD

Q. HAVE YOU REVIEWED AQUA'S CURRENT AND PROPOSED WASTEWATER TARIFFS?

A. Yes, I have.

Q. DO YOU HAVE ANY CONCERNS WITH HOW AQUA BILLS SCH USA FOR WASTEWATER SERVICE AS A CURRENTLY UNMETERED WASTEWATER CUSTOMER?

A. Yes. I have several. Most importantly, Aqua is billing SCH USA on a metric called equivalent dwelling units ("EDU"). Aqua's calculation of EDUs at the property significantly overstates the volume of wastewater that is produced at the property. The number of EDUs that are currently billed to SCH USA and which would be billed to SCH USA under the proposed wastewater tariff have no relationship whatsoever with flows emanating from the properties.

Q. TO YOUR KNOWLEDGE, HOW WERE THE NUMBER OF EDUS ASSOCIATED WITH THE SPLIT ROCK RESORT ORIGINALLY DETERMINED?

A. It is my understanding that the EDUs were determined during a litigation that was initiated in 2007 between a prior owner of Split Rock Resort and the Township of Kidder ("Kidder").[1] During the course of that proceeding, the litigants reached a Settlement

[1] See SCH USA Exhibit FL-3, Aqua Response to SCH Interrogatory SCH-I-9. *"The EDUs that are stipulated in [Aqua's] Compliance tariff were taken from the Settelemt Agreement entered into between the Township of Kidder and Vacation Charters LTD., Split Rock Country Club, Inc., and Summit Management & Utilities, Inc."*

Agreement[2] ("Settlement") on several issues, including the number of EDUs that would be used in calculating Split Rock Resort's wastewater charges. A copy of the Settlement is provided as Exhibit FL-1. This Settlement was agreed to, and the number of EDUs was determined before a proposed expansion of 198 units (384 rooms) at the resort was started. Importantly, the proposed expansion of 192 units (384 rooms), included in the derivation of EDUs included in the settlement, was never actually built. Aqua is currently (and has always been) billing SCH USA for wastewater throughput from those unbuilt rooms that were planned when the Settlement was negotiated.

Q. SHOULD THE SETTLEMENT AGREEMENT HAVE ANY WEIGHT ON THE RATES THAT ARE CURRENTLY CHARGED TO SPLIT ROCK RESORT?

A. No, it should not. The referenced Settlement was adopted by the Kidder Board of Supervisors on November 18, 2010. On March 15, 2012, Little Washington Wastewater Company D/B/A Suburban Wastewater Company ("LWWC") entered into an Asset Purchase Agreement ("APA") with the Township of Kidder to purchase the wastewater system that is currently owned by Aqua. A copy of the APA is provided as Exhibit FL-2. Under this APA, only two paragraphs from that Settlement were transferred from Kidder to LWWC. The APA states: "LWWC shall not assume any rights or obligations of Seller under any contract, agreement, commitment, lease, certificate, permit or other instrument, whether oral, written, express or implied, except with respect to: (i) those agreements, contracts, permits and other instruments listed on Schedule 1.4 attached hereto…."

Schedule 1.4 of the APA states "Seller shall assign to LWWC Seller's right to collect the payments still to be made by the Plaintiff to Kidder Township under

[2] Release and Settlement Agreement, *Vacation Charters LTD., Split Rock Country Club, Inc., Summit Management & Utilities, Inc., v. Kidder Township*, In the Court of Common Pleas of Carbon County, Pennsylvania, Docket No. CV-07-4079.

paragraphs nine and ten of that certain Release and Settlement Agreement entered by and between Vacation Charters LTD as Plaintiff and Kidder Township pursuant to the civil action filed in the Court of Common Pleas of Carbon County, Pennsylvania at Docket No. CV-07-4079…." The payments outlined in paragraphs nine and ten of the Settlement were to resolve disputed charges from the wastewater system between 2002 and 2010. These payments and the related paragraphs in the Settlement have no bearing on the calculation of EDUs or the billing of future wastewater flows. The plain language of this APA shows that only the repayment terms of past due amounts were passed to LWWC when they purchased Kidder's wastewater system. The remaining terms of the Settlement are long expired. The EDU estimations from that Settlement have no weight or value.

Q. DOES THE SETTLEMENT AGREEMENT PROVIDE AN ACCURATE BASIS FOR BILLING SCH USA FOR WASTEWATER SERVICE?

A. No. The Settlement Agreement does not provide an accurate basis for billing. The settlement terms were negotiated in 2010, a time when a proposed expansion at the resort was envisioned but which was never actually built. To my knowledge, neither water consumption nor wastewater elimination at the resort has ever been metered or measured in any manner. The application of Settlement-based EDUs to Split Rock Resort might have been appropriate at some point in time, but this approach provides no relationship to the actual wastewater flow from Split Rock Resort currently. Aqua's continued use of EDUs to calculate SCH USA's wastewater bills is unjust and unreasonable. With technologies for metering readily available, wastewater outflows (or freshwater inflows) should be metered and wastewater should be billed accordingly.

Q. HAVE YOU ATTEMPTED TO ESTIMATE THE WASTEWATER EMANATING FROM THE SPLIT ROCK RESORT?

A. I have researched different methodologies for estimating water consumption and wastewater from hotels and resorts. I was not able to find a single, expert approach to estimating either water consumption or wastewater flow at a hotel or resort. I was able to find a few different methodologies that were used in various studies. The metrics that each of these methodologies had in common was that they relied on the number of rooms and the occupancy rate of the hotel. Aqua's billings to Split Rock Resort do not consider occupancy rates in any manner.

Q. WHY IS OCCUPANCY IMPORTANT?

A. Occupancy is one of the primary drivers of water and wastewater consumption. Occupancy rates drive direct consumption (bathing, toilets, sinks, etc.) and indirect consumption (food prep, laundry, etc.).

Q. DOES AQUA'S EDU-BASED BILLING METHODOLOGY REFLECT OCCUPANCY IN ANY MANNER?

A. No. EDU-based billing results in the same wastewater bill every month, whether occupancy is at zero percent or 100 percent.

Q. DOES AQUA'S BILLING METHOD, WHICH IS BASED ON EDUS, ACCURATELY REFLECT ACTUAL USAGE AT THE SCH USA PROPERTY?

A. No. The EDU-based billing method has no relevance to the actual usage of wastewater services for the property. A review of the Settlement referenced above shows that wastewater usage was never calculated, or even estimated for the purposes of that Settlement. Also, in adopting the Settlement, the parties noted that the Willowbrook facility consisted of 128 units (256 rooms) and that 192 more units (384 rooms) were to be built at Willowbrook. That expansion would have been included in the agreed upon

EDUs in the Settlement. Those additional rooms were never built. Mr. Padilla notes in his testimony that the Willowbrook facility consists of only 256 rooms. Finally, as discussed above, the settlement terms have all expired.

Q. DOES 25 PA. CODE § 73.17, CITED IN AQUA'S TARIFF, HAVE ANY RELEVANCE TO THE CALCULATION OF EDUS AT THE PROPERTY?

A. No. Aqua's current tariff references 25 Pa. Code § 73.17 as a basis for EDU calculations. This section of the Pennsylvania Code is not about actual wastewater flow rates. The metrics outlined in these regulations are planning guidelines and represent the Commonwealth's Department of Environmental Protection's ("DEP") definition of "peak daily flows for the design" of systems. These regulations are not related to billing or actual wastewater flows. 25 Pa. Code § 73.17(c) states that actual water meter or sewer meter flow could be used in the design of sewage system. However, it further states that "If average daily flows are used, the peak daily flow shall be calculated by multiplying the average daily flow by two." In other words, it appears that the DEP regulations require that sewage systems should be designed for two times the size of average daily flow into the system.

The clarification that this regulation was for planning and design purposes was added in 1997. In the rulemaking process then, a "commentator suggested that the section be clarified to make it clear that the flows outlined in § 73.17 are to be used strictly for the <u>design</u> of onlot systems…." The regulator's response to this comment was that the "Board agrees and appropriate clarifying language has been inserted as a lead-in to this section as well as the text of subsection (a)."[3] The planning language in the regulation was very deliberate and it makes no estimation of actual flows or billing

[3] 27 Pa.B. 5890 (emphasis added).

parameters. Aqua readily acknowledges that the regulations cited are design criteria. In Aqua's response to Interrogatory SCH-I-1, Aqua states "The EDU proxy for flow figures for customers as identified in 25 Pa. Code § 73.17 is for design purposes…."[4] Yet, somehow, despite this acknowledgement, they continue to use the regulation as the basis for its billing metrics.

Q. HOW DOES AQUA'S CURRENT TARIFF UTILIZE 25 PA. CODE § 73.17?

A. Aqua's current tariff defines an EDU as "a measure based upon the estimated average daily wastewater flow for the type of business, as calculated by the Pennsylvania Department of Environmental Protection regulation at 25 Pa. Code § 73.17 divided by the typical estimated average daily wastewater flow from a current single-family unit."[5] Despite what the tariff says, 25 Pa. Code § 73.17 does not detail estimated average daily wastewater flow. As noted above, the flow figures in this section of the regulations are two times the magnitude of the average daily flow and they are design and planning requirements, not usage numbers.

Q. IS AQUA PROPOSING ANY CHANGE TO THE DEFINITION OF EDU IN ITS TARIFF?

A. Yes, Aqua is proposing to modify the definition of EDU in its tariff to state as follows:

> Equivalent Dwelling Unit or "EDU": Except for existing Customers acquired by the Company through a purchase or acquisition and for billing purposes only, the EDU is a measure assigned by the Company based upon the estimated average daily wastewater flow for the type of business, as calculated by the PaDEP regulation at 52 Pa. Code § 73.17(b) divided by the Company's typical estimated average daily wastewater flow from a current single-family unit. Residential Customers are designated as one (1) EDU; however, in the Company's sole discretion, the Company may assign more than one (1) EDU for a residential Property.

[4] See SCH USA Exhibit FL-3, Aqua Response to Interrogatory SCH-I-1, sections d. through e.
[5] See Aqua Tariff, p. 25 (emphasis added).

> For existing customers without a predetermined EDU allocation, the EDU is a measure based upon the estimated average daily wastewater flow for the type of business based on water usage, divided by the typical estimated average daily wastewater flow from a current single-family unit. For other existing customers acquired by the Company through a purchase or acquisition, the number of equivalent dwelling units is available at https://www.aquawater.com/about/states-we-serve/pennsylvania/index.php.
>
> Any Customer who modifies their properties in a manner that impacts the EDU calculation, including in areas previously acquired by the Company, will be subject to the EDU definition described above. The Company will consider a Customer's request for a change in the number of assigned EDU's upon presentation of substantial evidence, satisfactory to the Company in its sole discretion. The Customer shall bear the burden of proof for all such requests.

By comparison, the current definition of EDU is much shorter, at just two sentences:

> Equivalent Dwelling Unit or "EDU": The EDU is a measure based upon the estimated average daily wastewater flow for the type of business, as calculated by the Pennsylvania Department of Environmental Protection regulation at 25 Pa. Code § 73.17 divided by the typical estimated average daily wastewater flow from a current single-family unit. In the Company's sole discretion, the Company may assign more than one (1) EDU for a residential Property.

Q. DO YOU HAVE CONCERNS WITH AQUA'S PROPOSED CHANGE TO THE DEFINITION OF EDU?

A. Yes, I do. Because SCH USA is a customer acquired through a purchase or acquisition, and Aqua's position is that SCH USA has a "predetermined EDU allocation" under the Settlement Agreement, it appears that Aqua is attempting to modify the EDU definition to provide a basis for continuing to bill SCH USA based on the Settlement Agreement. As I have explained in detail, the EDUs in the Settlement Agreement are not valid and have no relationship to the actual wastewater produced at the property. Continuing to bill SCH USA on this basis is unjust and unreasonable. This proposed tariff change should be rejected.

Additionally, within this new definition, Aqua sets itself up as the judge and jury when it comes to evaluating requests for changes to EDU calculations. The proposed definition states "[Aqua] will consider a Customer's request for a change in the number of assigned EDU's upon presentation of substantial evidence, satisfactory to the Company in its sole discretion." It is neither just nor reasonable that Aqua set itself up in this manner. However, if the Commission is inclined to allow this, it should require Aqua to define what comprises "substantial" evidence and the criteria by which Aqua will make its determinations "in its sole discretion." For example, Aqua has been presented with evidence showing that 192 units (384 rooms) that were contemplated in the Settlement were never built. Yet, in their sole discretion, Aqua has refused to bill SCH USA based on any other metric than the Settlement EDUs. A change to the size of a hotel of 384 rooms seems to be "substantial" evidence, yet Aqua apparently sees that evidence differently.

Finally, the definition of EDU continues to lean on the planning requirements for wastewater systems in the Pa. Code. The regulation itself states that the design criteria for peak flow should be the average daily flow multiplied by two. For all of these reasons, the revised definition of EDU should be rejected.

Q. IN THE EVENT THAT THE SPLIT ROCK RESORT REACHES FULL OCCUPANCY, WOULD THIS AFFECT THE ABILITY OF AQUA'S WASTEWATER SYSTEM TO HANDLE THE WASTEWATER FLOW FROM THE RESORT?

A. The regulations cited by Aqua were last modified in 1997. The Split Rock Resort was built after those regulations were implemented. Presumably, then, the wastewater system should have been designed to handle two times the expected wastewater flow from the resort. At the time the Settlement was entered into, expected wastewater flow also

included the portions of the resort that were planned for, but not yet built (such as the 192 additional units at Willowbrook, which were never built). For planning purposes, the wastewater system was likely designed to consider at least some occurrence of full occupancy at the Resort, including wastewater from the planned units. Therefore, peak occupancy should not affect the ability of the wastewater system to handle wastewater flow from the resort. More importantly, it is not SCH USA's financial responsibility to plan for growth at the Aqua facilities. The Settlement Agreement presumably encompassed the growth that was envisioned at the time by the entities to the Settlement. We know for certain that the growth envisioned for the resort never materialized and the resort has been charged based on those growth assumptions since the Settlement was entered into. In essence, overbillings to the resort (billings based on hotel rooms never built) have allowed Aqua and its predecessor companies to handle growth without incremental investment or costs to the other ratepayers. The resort has, to some degree, subsidized growth at the facility.

Q. HAVE YOU REVIEWED THE TESTIMONY PROVIDED BY SCH USA WITNESS RONALD CARRIER IN SCH USA ST. NO. 2?

A. I have.

Q. BASED ON YOUR REVIEW OF THE BACKGROUND MATERIALS AND MR. CARRIER'S ANALYSIS, WHAT DO YOU CONCLUDE?

A. Mr. Carrier identified two types of wastewater metering technologies that are available to Aqua. He also noted that in the absence of wastewater metering, water inflow metering could be used as a proxy for wastewater flows. I agree with this assessment and additionally note that Aqua's existing and proposed wastewater tariff allows for water metering and wastewater metering in different zones. Of note, Aqua admitted in its response to Interrogatory SCH-I-1 that it serves customers whose wastewater output is

measured by meters.[6] In response to Interrogatory SCH-I-2, Aqua acknowledged that it provides wastewater services to both residential and commercial customers across its footprint where the customer's usage is determined by meters implemented on water wells.[7]

My conclusion is that Aqua's tariff, as applied to SCH USA and the properties at Split Rock Resort is unjust and unreasonable. SCH USA is being billed for an amount of wastewater that is not in any way related to the amount of wastewater generated at the property, while Aqua is in possession of the technical capabilities to meter either well water inflows or wastewater outflows to determine the appropriate billing to the resort.

Q. HAS SCH USA BROUGHT ITS CONCERNS ABOUT BILLING TO AQUA'S ATTENTION?

A. SCH has raised their concerns privately, has filed a complaint against Aqua at the Commission, and is now intervening in this Rate Proceeding.

Q. HOW HAS AQUA RESPONDED?

A. Aqua has essentially ignored all requests from SCH USA to modify its billing units or billing practices for SCH USA. Privately, it has largely ignored SCH USA's outreach. In the context of the complaint proceeding, which is still on-going, Aqua has argued that the issues are more appropriate for a Rate Proceeding. To date in this proceeding, they have answered interrogatories that indicate to me that they are not interested in pursuing solutions for customers.

[6] See SCH USA Exhibit FL-3, Aqua Response to Interrogatory SCH-I-1. "[Aqua] has two commercial customers … that are billed based on metered wastewater flows."
[7] See SCH USA Exhibit FL-3, Aqua Response to Interrogatory SCH-I-2. "[Aqua] has limited customers who are billed based on water meter reads where the water is provided by a well."

Q. COULD YOU PLEASE EXPLAIN WHAT YOU MEAN BY THAT?

A. Yes. When asked about customers being served by wastewater meters, they admit to serving them, but then caveat the answer by saying "The wastewater meters and associated infrastructure necessary for reading wastewater flows and billing was installed and in operation prior to the acquisition of each of the systems by Aqua PA. These customers were grandfathered in upon acquisition of these systems and Aqua PA adopted the billing structure, in place at the time of the acquisition, which included either a meter size or EDU charge in addition to a volumetric charge."[8] Similarly, when asked about customers metering well water, they responded that they serve those types of customers but hedged that response by saying that Aqua "adopted the existing rates structure and method in which these customers were billed" by acquisition.[9] In these answers, they admit having technologies in-house that can provide adequate billing service to customers who are either billed based on metered wastewater flow or who are on metered well water inflows, but are reluctant to provide that same level of service to other customers.

Q. IN ITS RESPONSE TO INTERROGATORY OCA-XVII-10, AQUA ADDRESSED ITS PLANS FOR OBTAINING METERED WATER USAGE DATA FOR CURRENTLY UNMETERED WASTEWATER CUSTOMERS. HAVE YOU READ THAT RESPONSE?

A. I have. In the response, Aqua states that it "does not have plans at this time to install company-owned water meters on privately-owned water wells for systems that are currently unmetered."[10] I find this answer interesting because in its response to Interrogatory OCA-XI-14, in answering a question about why customers are not

[8] SCH USA Exhibit FL-3, Aqua Response to Interrogatory SCH-I-1.
[9] SCH USA Exhibit FL-3, Aqua Response to Interrogatory SCH-I-2.
[10] SCH USA Exhibit FL-3, Aqua Response to Interrogatory OCA-XVII-10.

switching to metered billing, Aqua's response is "The customers that are not switching to metered billing are either unmetered customers or obtain their water from privately-owned water wells and metered water information is not available for these customers." In this series of responses, Aqua has come full circle. First, it acknowledges that it can and does supply wastewater services based on meter data from private wells. It states it does not have plans install meters on private wells, but then says customers aren't switching to meter-based bills because meter information is not available for the customers.

Q. DO YOU KNOW IF AQUA HAS CONSIDERED PROVIDING METERED SERVICES TO ITS CUSTOMERS?

A. Aqua stated in its response to Interrogatory SCH-I-3 that it "has not conducted any studies, investigation or other assessment on the use or feasibility of wastewater meters" since 2012.[11] Based on that response, and some of the others noted already, I do not believe they are considering providing metered services to customers.

Q. COULD CUSTOMERS PROVIDE THEIR OWN METERS ON EITHER WELL WATER INFLOWS OR WASTEWATER OUTFLOWS?

A. They should be able to.

Q. HAS AQUA ADDRESSED THIS QUESTION?

A. Not directly. However, in its Response to Interrogatory DAY-IV-3, Aqua stated that "Water meter reading technology for meters on private wells will be functionally similar to water meters on a public water system. That said, there are inherent complications with metering private wells as compared to standard residential water supply, for example, approved rate structure, ownership, initial installation responsibility and cost,

[11] SCH USA Exhibit FL-3, Aqua Response to Interrogatory SCH-I-3.

access for repair and replacement, shut-off procedure for delinquency or non-compliance, etc."[12]

Q. ARE THESE CONCERNS OF AQUA'S VALID?

A. Aqua has identified some business and operating issues with respect to metering private wells. Based on my experience in regulated industries, many of these concerns are outdated, boilerplate reasons for resisting change. Aqua already provides wastewater services to customers with private wells that are metered, and bills those customers based on those meters' output. In providing that service, I find it reasonable to assume that they resolved most, if not all, of these problems. If not resolved, the stated issues appear very simple to resolve. For example, I do not see a reason for a different rate structure if flow-based rates already exist, and they do in Aqua's tariff. Ownership would be by the owner of the well (or wastewater producer if wastewater was metered). Installation and costs would fall to the owner. Repair and replacement would be the responsibility of the owner. There is no reason that shut-off procedures would differ for a well-metered customer or an unmetered customer. Additionally, Aqua could, with the consent of the Commission, limit meters to certain technical specifications and communications technologies. Also, inspection criteria could be included in under an owned-meter situation. SCH USA is not opposed to any reasonable requirements around meter usage. They are simply seeking to be charged rates that are just and reasonable – rates that are remotely close to actual wastewater streams produced.

[12] SCH USA Exhibit FL-3, Aqua Response to DAY-IV-3.

Q. WOULD AQUA NEED TO MODIFY ITS BILLING SYSTEM TO ACCOMMODATE MORE CUSTOMERS ON METER-READ WELLS?

A. I would not opine that "no changes are necessary." However, as noted, Aqua already bills wastewater services based on metered data. They clearly are capable of generating meter-based bills to customers. But this question of billing system changes should be irrelevant. We are operating in an age of digital commerce. We are operating in an age where resources should be managed more efficiently and that includes water and wastewater resources. Aqua appears to be living in an age of socialized water and wastewater needs. Meters are a tool that will lead to more efficient consumption. Aqua should be striving to make its water and wastewater systems as efficient as possible. That efficiency requires customer knowledge of consumption. Unmetered water and/or wastewater removes incentives for customer efficiency and that inefficiency wastes not only water, but well water treatment chemicals, wastewater treatment chemicals, energy to move and treat the water and energy to move and treat the wastewater. Inaction on metering is societally inefficient. The Commission should push Aqua to move toward metering and explicitly allowing private ownership of meters for wastewater billing purposes if the utility is unwilling to invest in meters.

Q. DO YOU HAVE ANY RECOMMENDATIONS?

A. Yes. First, Aqua's proposed tariff continues to rely on a Pennsylvania regulation that is comprised of design criteria for wastewater systems to calculate billing units for customers. The tariff could be rejected for that reason alone. Additionally, Aqua's current and proposed tariff and business practices allow for consumption-based billing, yet Aqua is not enabling customers with metering tools. Consumption-based billing can be calculated by measuring either water inflows or wastewater outflows. The

Commission should reject Aqua's proposed change to the definition of EDU, and require Aqua to include any necessary language in its tariff clearly allowing unmetered customers such as SCH USA to be billed for actual usage, including by installing meters, regardless of the owner of the meter, to measure actual water inflows or wastewater outflows. Inclusion of metering provisions, even if at the customer's expense, will lead to more efficient consumption of water, wastewater, chemicals associated with the treatment of both, and energy used to transport and treat water and wastewater.

III. CONCLUSION

Q. DOES THIS COMPLETE YOUR DIRECT TESTIMONY?

A. Yes.

Appendix A

Frank Lacey

3 Traylor Drive
West Chester, PA 19382
724-413-0849
Frank@eacpower.com
https://www.linkedin.com/in/fplaceyelectricityleadership/

Summary

Disciplined energy industry executive consultant and leader known for implementing innovative regulatory and business strategies empowering clients to benefit from emerging and complex regulatory policies.

Experience

Board of Directors
Current: Atmospheric G2 (Regulatory chair); HData (advisor).

Prior experience: Advanced Energy Management Alliance (Founding member and chairman); Smart Electric Power Alliance (f/k/a: Solar Electric Power Association) (finance); Association for Demand Response and Smart Grid (finance); Electric Power Supply Association (finance); ERCOT (finance); Retail Energy Supply Association; Kennett Square Golf and Country Club (Long-Range Planning).

Electric Advisors Consulting, LLC 2015- Present
Founder and President

Increased shareholder value of clients by more than $400 million through regulatory channels. Identify policy priorities and advise senior leadership on strategic implications of potential changes in the electricity industry, including renewable integration, nuclear developments, storage and Electric Vehicle charging integration. Advocate for RTO/ISO market reforms to create value for clients. Apply strong analytical skills to relevant consultancy engagements including M&A strategies; government (state and federal) funding initiatives; market entry strategies, ESG implementation; FERC and state regulatory and legislative policy engagement; strategic planning; complex litigation assistance; expert testimony; and complex tariff analysis.

Comverge, Inc./CPower Corporation 2011- 2015
Senior Vice President, Regulatory and Market Strategy

Developed and implemented corporate legislative and regulatory strategy, including new market entry plans for a $150 million company performing demand response services. Identified revenue growth opportunities through regulatory channels adding over $10 million in annual earnings. Developed FERC-accepted credit and risk management policies. Developed M&A opportunities including acquisition of demand response business, integration with Enerwise and ultimate spin-off of CPower.

Direct Energy 2006 - 2011
Director, Products and Complex Transactions (2008-2011)

For a multi-billion dollar retail electric and gas company, managed Complex Transaction team consisting of four direct reports and eight operations and functional leaders. Generated over $50 million in incremental gross margin sold. Delivered quality customer service and internal communications to enable incremental business commitments. Implemented Customer Experience team to receive customer feedback and adjust internal operations, increasing Net Promoter Scores by 22 points.

Director, Government and Regulatory Affairs (2006-2008)

Managed legislative and regulatory strategy and regulatory risk in Mid-Atlantic region of US, participating in multiple rate proceedings and regulatory initiatives, securing approximately $100 million in value from regulatory developments. Positioned firm as leading industry voice on policy matters.

Starlight Energy 2004 - 2005
President

Led the development of business plan and pro formas for venture seeking $20 million in equity financing and other financial relationships. Secured $100 million credit relationship and working capital financing to enable launch of retail Electricity Company. Secured FERC approval for market-based rate authority.

Strategic Energy 2001- 2004
Director, Regulatory Affairs,

For a $2 Billion retail electric and gas services firm, served on the company's Leadership team, managing a regulatory group of 15 people. Created and/or protected more than $400 million in market opportunities through regulatory channels. Created the leading industry voice on policy issues; Led the development of regulatory strategy, advocacy campaigns, the oversight of regulatory risk and the attainment of desired regulatory results, advocating across 15 states and at FERC.

Arthur Andersen Business Consulting 1998 - 2001
Senior Manager

Exhibit FL-1

IN THE COURT OF COMMON PLEAS OF CARBON COUNTY, PENNSYLVANIA
CIVIL ACTION - LAW

VACATION CHARTERS LTD., SPLIT ROCK COUNTRY CLUB, INC., SUMMIT MANAGEMENT & UTILITIES, INC.,	:	
Plaintiffs	:	Docket No.: CV-07-4079
vs.	:	
KIDDER TOWNSHIP,	:	
Defendant	:	

RELEASE AND SETTLEMENT AGREEMENT

KNOW ALL MEN BY THESE PRESENTS:

THIS RELEASE AND SETTLEMENT AGREEMENT is made and entered into by and between **VACATION CHARTERS LTD., SPLIT ROCK COUNTRY CLUB, INC.**, and ***SUMMIT MANAGEMENT & UTILITIES, INC.*** for themselves and for the benefit of their officers, agents, shareholders, subsidiaries, successors and assigns, (hereinafter referred to as "Plaintiffs") and the **TOWNSHIP OF KIDDER,** for itself and for the benefit of its officers, agents, employees, elected officials and insurers (hereinafter referred to collectively as "Defendant").

WHEREAS, the Plaintiffs have presented a claim against Defendants arising from a certain Asset Purchase Agreement and also the circumstances of Defendant providing sanitary sewer service to certain properties of the Plaintiffs which claims are the subject of the above captioned matter in the County of Carbon, Pennsylvania (the "Lawsuit"); and

WHEREAS, the Defendant has filed a counter-claim enumerating and specifying certain claims for monetary damages against the Plaintiffs herein to the same term and number (also included in the definition of the "Lawsuit"); and

WHEREAS, the Plaintiffs and Defendant desire to settle the matter as asserted in the Lawsuit, the parties enter into this Release and Settlement Agreement according to the following terms:

1. Each party hereto shall bear all attorneys fees and costs arising from their actions or the actions of their own counsel in connection with the Lawsuit and with this Release and Settlement Agreement.

2. The parties hereto acknowledge for themselves and their officers, elected officials, shareholders, employees, insurers, assigns and successors, and any related entities, that this Release and Settlement Agreement is a release of all the claims asserted in the Lawsuit. The parties further agree that the promises, conditions and covenants as set out herein are sufficient consideration and that this Release and Settlement Agreement effects a full and final complete compromise of all matters involving disputed issues of law and fact asserted in the Lawsuit. The parties fully assume the risk that the facts or the law may be otherwise than what they believe.

3. Upon execution and adoption of this Release and Settlement Agreement by the parties hereto counsel for the parties each will deliver to opposing counsel an executed Praecipe to Settle, Discontinue and End with prejudice the Lawsuit, including the Complaint and the Counter Claim.

4. The parties represent and warrant that no other person or entity not a party to this Release and Settlement Agreement has had any interest in the claims, demands, obligations or causes

of action asserted in the Lawsuit; that the parties have the sole and exclusive right to enter into and be bound by the terms and provisions of this Release and Settlement Agreement; to make payment of or receive the sums specified in it; and that the parties have not sold, assigned, transferred, conveyed or otherwise disposed of any of the claims, demands, obligations or causes of action referred to in this Release and Settlement Agreement.

5. The parties agree and acknowledge that the promises, covenants, conditions and sums specified in this Release and Settlement Agreement are accepted as a full and complete compromise in all matters asserted in the Lawsuit. Payment of the sums by any party as set out in this Release and Settlement Agreement, and the adoption of action by either of the parties as required under the terms and provisions of this Release and Settlement Agreement and the negotiations for this settlement (including all statements, admissions or commissions) by the parties or their attorneys or representatives shall not be considered admissions of fault or wrongdoing by any of the parties.

6. This Release and Settlement Agreement shall be binding upon and inure to the benefit of the officers, shareholders, subsidiaries, agents, employees, elected officials, insurers, executors, administrators, personal representatives, heirs, successors and assigns of each. The parties specifically acknowledge there are no other understandings or agreement verbal or otherwise in relation thereto between the parties to this Release and Settlement Agreement. The parties agree that this Release and Settlement Agreement may not be modified orally but may be modified only by a written agreement.

7. In entering into this Release and Settlement Agreement, the parties hereto have relied upon their respective counsel for legal advice; for the Plaintiffs, Jane Maughan, Esquire and James Nanovic, Esquire; for the Defendant, Anthony R. Sherr, Esquire; Gretchen D. Sterns,

Esquire, and Daniel A. Miscavige, Esquire, who are counsel selected by the parties hereto. The terms of this Release and Settlement Agreement have been completely read and explained to the parties by their counsel; those terms and conditions and the legal effect thereof have been fully understood and voluntarily accepted by them.

8. The parties hereto enter this Release and Settlement Agreement in the Commonwealth of Pennsylvania, the situs being the County of Carbon, and said documents shall be construed and interpreted in accordance with the Law of the Commonwealth of Pennsylvania.

9. Plaintiffs agree to pay the Defendant the sum of Two Hundred and Fifty Thousand Dollars ($250,000.00) which sum is acknowledged to be a compromise amount of the Claim of the Defendant for tapping fees, user fees and for delinquent user fees for sewage treatment at the public sanitary sewer system owned and operated by the Defendant, for all sums due for the period from January 1, 2002 through and including June 30, 2010. The parties acknowledge that this sum shall be considered a municipal debt for services provided by the Defendant Municipality and shall be accorded all such priority and status as a municipal debt.

10. The parties agree that the principal amount of Two Hundred and Fifty Thousand Dollars ($250,000.00) will be paid by the Plaintiffs to the Defendant, without interest, over a ten (10) year period commencing January 2, 2012 and terminating January 2, 2021. Each payment shall be in the amount of Twenty-Five Thousand Dollars ($25,000.00) and shall be due on January 2nd of each year commencing January 2, 2012. Defendant shall provide Plaintiff with a notice, no later than December 20th each year, of the upcoming payment due on the upcoming January 2nd; however, the failure of the Defendant to provide said notice does not relieve Plaintiffs of the obligation to make timely payment as provided herein. Any

payments made later than 10 days after the 2nd day of January in any year in which they are due shall bear interest at the rate of ten (10%) percent per annum. In addition, any such delinquent amounts shall also accrue charges which the Defendant may occur for reasonable attorney fees, court costs and other costs of collection of said monies. The Plaintiffs agree that such additional costs, attorney's fees and collection fees and interest shall have the same status for collection and lien purposes as the principal amount due.

11. The parties agree that none of the Plaintiffs' obligations under the terms of this Release and Settlement Agreement are intended to be affected by a discharge in Bankruptcy. The parties further specifically intend that the Plaintiffs' obligations under the terms of this Release and Settlement Agreement shall be non-dischargeable and not subject to discharge in Bankruptcy due to the nature of the municipal obligation and further that it is substantive and primary consideration for the Plaintiffs' obligations under the terms and conditions of the Release and Settlement Agreement.

12. Effective July 1, 2010, and based on all the currently existing improvements at the premises owned, operated and or occupied by the Plaintiffs, Plaintiffs will be obligated to pay Defendant sewage treatment user fees, which will be billed at a basis of 430 EDUs according to the following schedule of EDU's.

Location	EDU
Lodge	32
Cove Cottage	1
Pavillion	1
Lebanon Cottage	1
Westwood	90
Galleria	115
Forest Inn	3
Mini Golf	1

Location	EDU
Cope Cottage	1
Accounting	4
Time Share Sales	3
Purchasing	1
Resort Maintenance	2
Golf Maintenance	2
East Gate	1
Cart Barn	1
Water Park	30
Willowbrook	128
Club House	13
TOTAL	430

The parties acknowledge that 320 units have been approved for construction at Willowbrook; that 192 units remain to be built and that 128 units presently are completed. The parties acknowledge that both built and unbuilt units have two bedrooms and a construction design that permits Plaintiffs to sell each unit as two separate spaces by a lock out door that cuts the unit into two. Notwithstanding this lock out design, the parties agree that each of the 320 Willowbrook units are one EDU.

13. Defendant shall issue regular quarterly billing in the regular billing cycle as maintained and utilized by the Defendant Township to Vacation Charters Ltd., with billing detailed on five (5) separate bills separated as follows:

a. Westwood Condominium Association, Inc.(90 EDU);

b. Willowbrook at Lake Harmony (128 EDU); 218

c. The Galleria and the Water Park (145 EDU); 363

d. Split Rock Country Club, Inc. (for the Clubhouse and the Cart Barn) (14 EDU);

377

e. All the remaining uses of the Plaintiffs (53 EDU). 430

The parties agree that such billing shall be at the quarterly rate for billing as established from time to time by the Board of Supervisors of the Township Kidder or its successor. Any future EDUs added to the system by the Plaintiffs shall be billed at the then existing quarterly user rate as established by the Defendant or its successor. In the event that Defendant issues a new or revised user fee ordinance in the future, or in the event that any successor to Defendant seeks or establishes a rate change on user fees, Plaintiffs retain their right to challenge any new user fee ordinance, resolution or rate change in accordance with Pennsylvania law relating to the rights of users to challenge revised user fees or rate changes; however, Plaintiffs shall not have the right to challenge the Defendant or its successor's right to charge Plaintiffs a user fee. Plaintiffs acknowledge that in the event they or any of them challenge a new or revised user fee ordinance, they remain obliged to make all payments required under this Release and Settlement Agreement and all then-existing user fees pending the outcome of their challenge.

14. Commencing July 1, 2010 the rate for tapping fees for Plaintiffs' new connections for any additional EDU's shall be Two Thousand Dollars ($2,000.00) per EDU. This rate is agreed to in consideration of the ownership by Plaintiffs at their premises of certain improvements consisting of collection lines, pumping stations, laterals, force mains and transmission lines and the Plaintiffs' permitting the passage of sewerage through said improvements to the Defendant's sewer system. This tapping fee rate is and shall be based on a capacity part calculation only, and does not and shall not include other calculations or parts. The parties agree that the future tapping fees assessed to Plaintiff shall be subject to changes in the tapping fee as adopted from time to time by the Board

of Supervisors or their successors for tapping fees for connection to the Township sanitary sewer system. Any future changes in the tapping fee as calculated by the Engineer of the Defendant Township or its successor shall include a sub-calculation reflecting a capacity only charge for Plaintiff. Plaintiffs retain their right to challenge any future tapping fee rate, rate setting procedure, ordinance or resolution in accordance with Pennsylvania law regarding the rights of individuals and entities to challenge tapping fees. However, Plaintiffs shall not have the right to challenge the Defendant or its successor's right to charge Plaintiffs a tapping fee. Plaintiffs remain responsible for all construction required to construct lateral connections from any new or improved facility to the sewer system. Plaintiffs acknowledge that in the event they or any of them challenge a new or revised tapping fee ordinance, they remain obliged to make all payments required under this Release and Settlement Agreement and all then-existing tapping fees pending the outcome of their challenge.

15. At the 2011 Organizational Meeting of the Board of Supervisors of the Defendant, the Defendant will establish a Sanitary Sewer Committee which shall advise the Board of Supervisors on matters related to the maintenance and operation of the Sewer Plant and Sewer System. The Committee shall consist of a minimum of five (5) or maximum of seven (7) members at the sole discretion of the Board of Supervisors. In the event the Board of Supervisors elects a five (5) member Committee, Vacation Charters Ltd., or its successors shall have the right but not the obligation to name a maximum of two (2) members to the Committee; if a seven (7) member Committee is created by the Board of Supervisors, Vacation Charters Ltd., or its successors shall have the right but not the obligation to name a maximum of three (3) members. The Defendant anticipates an

adoption of an Ordinance substantially in the form that is attached hereto and marked as Exhibit "A".

16. In the event that the Defendant Township has not substantially initiated required statutory or other regulatory procedures necessary to effect the sale, transfer or conveyance of the Sewer Plant and Sewer System currently maintained by the Defendant by June 30, 2014, the Board of Supervisors of the Defendant shall initiate procedures required by statute or regulation to establish a Sewer Authority. The intent of establishment of said Sewer Authority shall be to accept transfer of assets, obligations, operations and maintenance of the Sewer Plant and the Sewer System from the Township to the Authority. The obligation of Defendant herein is subject to existing laws, statutes, regulations as well as any limitations or restrictions as existing or may be imposed by any borrowing entity holding outstanding indebtedness from the Township by reason of the maintenance and operation of the Sewer Plant or the Sewer System.

17. The parties previously entered into an Asset Purchase Agreement with respect to the sale of the Sewer Plant and other improvements to the Defendant, certain provisions of which survived the sale of the Sewer Plant. This Release and Settlement Agreement supersedes all Asset Purchase Agreements entered into by the parties at any time and the parties agree that all such previously executed Asset Purchase Agreements are now null and void.

18. The parties acknowledge that through the Asset Purchase Agreements, the Defendant purchased from the Plaintiffs and owns:

    a. Land, buildings and improvements situate at adjacent to I-80 and Split Rock Golf Course in the Township of Kidder, Carbon County,

Pennsylvania consisting of 6.41 acres more or less, conveyed in the Deed dated April 30, 2002, recorded in the Office of the Recorder of Deeds in and for the County of Carbon, at Book 1019 Page 442.

b. Fixtures, tangible personal property and equipment as existing on the aforesaid site as of April 30, 2002;

c. Certain Inventory listed below, as previously set out in Exhibit B to the Asset Purchase Agreements:

Physical Inventory of Summit Management and Utilities

Tankage	One – bar screen and 12 inch comminutor
	One – 38,500 gallon scum retention / distribution tank
	Two – 75,000 gallon SBR's
	One – 75,000 gallon sludge holding tank
	One – 75,000 gallon decant equalization tank
	One – 600,000 gallon gpd chemical treatment unit
	One – 600,000 gallon gpd ABW sand filter
	One – 22,130 gallon chlorine contact tank
Compressors	Three – Roots 76 U-RAI 20 hp
	Two – Roots 68 U-RAI 20 hp
	Two – Roots 47 U-RAI 15 hp
	Two – Roots 45 U-RAI 7 hp
	Four – Roots 33 U-RAI 5 hp
Emergency Power	One – Kohler 200KW diesel generator
	One – 800 amp automatic switchgear
Chemical Feed Equipment	Two – 400 gallon day tanks
	Two – W-T44-747 Metering pumps
	Two – W-T two cylinder scales for 150 lb cylinders
	Two – WI V75VA5 v-notch cholrinators

	One – Eagle electronic scale for two one ton cylinders
	One – Spanco 2 ton rolling gantry with one ton cylinder lifting bar
Flow Metering	One - EIT model 7960 ultrasonic flow meter with 7 day recording chart

d. Certain right-of-ways for sewer transmission lines as more particularly described in the Deed dated April 30, 2002, recorded in the Office of the Recorder of Deeds in and for the County of Carbon at Book 1019 Page 443, and in the General Grant of Easement dated June 20, 2002, recorded in the Office of the Recorder of Deeds in and for the County of Carbon at Book 1063 Page 327.

e. Certain transmission lines of existing customers, a list of such transmission lines and existing customers being previously identified as Exhibit "D" to the Asset Purchase Agreement, a copy of which is attached hereto as Exhibit B to this Release and Settlement Agreement.

19. Subject to the rights granted Defendant in the Deed of Easement and General Grant of Easement identified above, the Plaintiffs retain ownership of all collection lines, pumps, pumping stations, laterals and transmission lines located at the premises owned by the Plaintiffs not conveyed to Defendants, including but not limited to the small pumping station and force main servicing Split Rock Lodge.

20. As was previously provided in the Asset Purchase Agreements, and according to the terms set out below, in the event the Plaintiffs wish to continue to utilize effluent for

spray irrigation during the months of May through October of any year, Defendant and its successors and or assigns remain obligated to make available to Plaintiffs treated effluent at the sewer plant. Any pumping required will be at the sole expense of Plaintiffs. Any operating expenses related to pumping will be paid by the Plaintiffs; however, Plaintiffs shall obtain and bear the cost related to obtaining any permits required for such use. All sewage effluent shall be treated to standards required by the Pennsylvania DEP permit and will be made available by Defendant for spray irrigation of the golf courses owned by Vacation Charters, Ltd., or Split Rock Country Club, Inc., and their subsidiaries or any other successors or assigns during the period of time identified above. Any and all additional costs attributable to Plaintiffs' request for treated sewage effluent to be made available by Defendant for spray irrigation for the aforesaid golf courses (e.g., legal, engineering, etc.) shall be paid by Plaintiffs and/or the owners of the golf courses. These costs shall not include costs associated with the distribution of sewage effluent not attributable to spray irrigation of the golf courses.

21. Until April 30, 2012, Defendant and its successors and or assigns shall reserve capacity for Plaintiffs, their successors, subsidiaries or assigns, at the sewage treatment facility as follows:

a. 53 EDUs to Summit Management and Utilities, Inc., and its related companies or their subsidiaries or assigns;

b. One EDU per lot for any lots remaining of the 90 lots at Split Rock Golf Course;

c. 192 EDUs for the remaining Willowbrook Condominium development.

Any reserve capacity not utilized by April 30, 2012, shall no longer be made available

without additional charge or maintained without additional charge and the Defendant or said assignee shall have no further obligation to maintain further reserves for the Plaintiffs or its subsidiaries or related companies.

22. Plaintiffs will pay for any new lateral attachment to existing lines or extensions of existing lines that may be necessary to serve any new development.

23. Plaintiffs' entities hereby represent that they have taken appropriate corporate action to endorse, enter into and be bound by the terms, conditions and provisions of this Release and Settlement Agreement and that the undersigned are fully authorized by the Plaintiffs entities to endorse and execute this Release and Settlement Agreement on behalf of all Plaintiffs herein.

24. Defendant, Township of Kidder, has duly adopted and ratified the terms and conditions of this Release and Settlement Agreement at a regular meeting of the Board of Supervisors of the Township of Kidder held on the 18th day of November, 2010 by a Vote of

5 Yes 0 No 0 Abstained 0 Absent.

Exhibit "A"

ORDINANCE NO.: _____

AN ORDINANCE ADOPTED BY THE BOARD OF SUPERVISORS OF THE TOWNSHIP OF KIDDER ESTABLISHING A SANITARY SEWER ADVISORY COMMITTEE AND ALL DETAILS RELATED THERETO

Section 1. Establishment

A Sanitary Sewer Advisory Committee is hereby established by the Township of Kidder, Carbon County, Pennsylvania.

Section 2. Purpose

The purpose of the Sanitary Sewer Advisory Committee shall be to advise the Board of Supervisors on matters related to and dealing with the operation and maintenance of the Sewer Plant and Sanitary Sewer System currently maintained by the Board of Supervisors of the Township of Kidder.

Section 3. Membership

A. The Sanitary Sewer Advisory Committee shall be composed of five (5) members of the Township of Kidder who shall be appointed by the Board of Supervisors. It is acknowledged that two (2) members of the Committee may be appointed by Vacation Charters Ltd. or its successors. In the event that the said Vacation Charters Ltd. or its successors do not provide written notification of its nominees within thirty (30) days of adoption of this Ordinance or vacancies of such positions hereunder the Board of Supervisors may fill those positions with appointees of their choosing. The remaining three (3) members shall be appointed by the Board of Supervisors.

B. The Board of Supervisors shall fill all vacancies subject to the preceding paragraph.

Section 4. Terms of Office

A. Members of the Sanitary Sewer Advisory Committee (henceforth Committee) shall serve for a term of four (4) years except the initial appointment shall be so staggered that approximately one-fourth (1/4) of the membership shall expire each year and the terms of their successor shall be four years each.

B. Membership of two (2) members shall expire December 31, 2011; one (1) member shall expire December 31, 2012; one (1) member shall expire December 31, 2013 and one (1) member shall expire on December 31, 2014.

C. Members may resign at any time with written notice to the Board of Supervisors. Members whose terms will expire may request reappointment by written request to the Board of

Supervisors at least one month prior to the expiration of their term.

D. Members may be removed by the Board of Supervisors, with or without the recommendation of a majority of the other members, for malfeasance or neglect in the performance of their duties. Failure to attend either three (3) consecutive regularly scheduled meetings or four (4) regularly scheduled meetings during a twelve-month period shall constitute neglect.

E. The Board of Supervisors, subject to Section 3 (A) of this Ordinance, shall appoint successors for members who resign or are removed to serve for the remainder of the term of the member or members.

Section 5. Compensation

Members of the Committee shall receive no compensation for their services, but they may be reimbursed for expenses actually and necessarily incurred by them in the performance of their duties, provided that the expenses have the prior approval of the Board of Supervisors.

Section 6. Powers of the Committee

The Sanitary Sewer Advisory Committee shall have the following powers:

A. To identify potential problems or difficulties and recommend plans and programs to the Board of Supervisors for the operation and maintenance of the Sewer Plant and Sanitary Sewer

System.

B. To make recommendations to the Board of Supervisors of the Township of Kidder.

C. To perform any other duties assigned to it by the Board of Supervisors but not to exercise any powers or perform any duties which by law are conferred or imposed upon a state agency or the Township entity itself.

Section 7. Organization and Meetings

A. The Chairman of the Committee shall be appointed annually by the Board of Supervisors; the Committee may select its own Vice Chair and Secretary.

B. The Committee shall meet at least quarterly and at other times as directed by the Board of Supervisors. Said meetings shall be advertised and open to the public.

C. The Committee shall keep written records of its meetings and activities and shall make an annual report to the Board of Supervisors which shall be made known and available to the public.

Section 8. Appropriations

The Board of Supervisors may appropriate funds for the expenses incurred by the Committee in accordance with an annual budget. Appropriations may be expended for such administrative, clerical, and printing as may from time to time be required and approved by the Board of Supervisors and shall be within the limits of the annual budget.

Section 9. Effective Date

The effective date of this Ordinance shall be the date of adoption as set out herein.

Duly adopted by the Board of Supervisors of the Township of Kidder, County of Carbon and Commonwealth of Pennsylvania at the reorganization meeting of the Board of Supervisors held the _____ day of January, 2011 by a Vote of:

_____ Yes _____ No _____ Abstained _____ Absent.

ASSETS PURCHASE AGREEMENT

Between

THE TOWNSHIP OF KIDDER

And

LITTLE WASHINGTON WASTEWATER COMPANY
D/B/A
SUBURBAN WASTEWATER COMPANY

March 15th, 2012

THIS ASSETS PURCHASE AGREEMENT, dated as of the 15th day of March 2012, by and between **The Township of Kidder,** a Township of the Second Class organized and existing under the laws of the Commonwealth of Pennsylvania with principal offices at Lake Harmony, Kidder Township, Carbon County, Pennsylvania ("**Seller**"), and **Little Washington Wastewater Company d/b/a Suburban Wastewater Company** ("**LWWC**"), a Pennsylvania corporation with an office at 762 W. Lancaster Avenue, Bryn Mawr, PA 19010, with reference to the following:

RECITALS

A. Seller owns and maintains a wastewater collection and treatment system that provides wastewater service to residential and commercial customers within a portion of Kidder Township, Carbon County, Pennsylvania.

B. LWWC is a wholly owned subsidiary of Aqua Pennsylvania, Inc., and a public wastewater utility that furnishes wastewater service to the public in various portions of Pennsylvania, including Carbon County.

C. Seller desires to sell, and LWWC desires to purchase, certain assets, properties and rights of Seller owned and used in connection with Seller's System Assets (hereinafter referred to as "**Assets**"), all upon the terms and conditions set forth herein.

NOW, THEREFORE, in consideration of the recitals and the covenants, representations, warranties and agreements herein contained, and intending to be legally bound hereby, the parties hereto agree as follows:

1. SALE AND PURCHASE OF THE SELLER'S ASSETS

Subject to the terms and conditions hereinafter set forth, LWWC shall purchase from Seller, and Seller shall sell, assign, transfer, grant, convey and deliver to LWWC at Closing (hereinafter defined), all of the Assets. The Assets include all of the assets, properties and rights of Seller (whether tangible or intangible, real, personal or mixed) which are held, used or useful in connection with the existing collection and treatment of wastewater within the Seller's wastewater service area.

The Assets are being sold free and clear of all mortgages, liens, pledges, security interest, charges, taxes, claims, restrictions and encumbrances of any nature whatsoever, including, without limitation, the following debts, which shall be satisfied at Closing out of the sale proceeds: (1) Mauch Chunk Trust Company of Jim Thorpe, Pennsylvania with the estimated satisfaction at time of Closing to be Two Million Sixty-Four Thousand Two Hundred Twenty Dollars and Eight Cents ($2,064,220.08); and (2) Seller's existing indebtedness to Pennvest at the time of Closing, which is estimated to be Seven Million Nine Hundred Twenty-Four Thousand Ninety-One Dollars and Sixty-One Cents ($7,924,091.61).

1.1 Assets Further Defined

The Assets shall, without limitation to the definition stated above, include the specific assets, properties and rights of Seller set forth on Schedule 1.1, and the following:

(a) all the land, buildings, pipes, pipelines, treatment facilities, odor control stations, pumping stations, lift stations, holding tanks, customer grinder pumps (included in the grinder pump is that portion of the customer wastewater lateral between the curb-line or edge-of-road to the street-side of the grinder pump; all of which LWWC may, in its sole discretion, convey to the customer following Closing upon satisfaction of the above-referenced Pennvest indebtedness and release of the Pennvest lien(s); see Attachment 6 for list of subject customer properties), storage tanks, plants, structures, improvements, fixtures, rights-of-way, rights, uses, licenses and easements owned by Seller and relating to the Assets, or in which Seller has an interest, and all hereditaments, tenements and appurtenances belonging, appertaining or relating to the Assets;

(b) all machinery, equipment, tools, furniture, furnishings, leasehold improvements, goods, and other tangible personal property relating to the Assets owned by Seller or in which Seller has an interest;

(c) all supplies and inventories relating to the Assets;

(d) all rights of Seller under any written or oral contract, easement, license, agreement, lease, plan, instrument, registration, permit, certificate, or other authorization or approval of any nature, or other document, commitment, arrangement, undertaking, practice or authorization, relating to the Assets;

(e) all rights and choses in action of Seller arising out of occurrences before or after the Closing relating to the Assets, with the exception of the pending municipal lien against the Estate of Nicholas Pantages;

(f) all information, files, records, data, plans, contracts and recorded knowledge, including customer and supplier lists and property records, related to the foregoing; and

(g) Accounts Receivable existing as of the twenty-first (21st) day after the Closing Date (as defined below) for wastewater service to residents and other customers within Kidder Township, as well as all and any liens.

1.2 Excluded Assets

Notwithstanding the foregoing, the Assets shall not include any of the following:

(a) any and all customer wastewater laterals (with the exception of grinder pumps and that portion of the customer wastewater lateral between the curb-line or edge-of-road to the street-side of the grinder pump; all of which LWWC may in its sole discretion convey to the customer following Closing upon satisfaction of the above-referenced Pennvest

indebtedness and release of the Pennvest lien(s) for the properties identified on Attachment 6) from the curb-line or edge-of-road to and throughout the customer's property;

(b) all piping and fixtures internal to each individual customer's structure (whether residential, commercial, industrial or other types);

(c) cash on hand and any cash or payments received within twenty (20) days of the Closing Date (as defined below); and

(d) any assets listed in Schedule 1.2(d) which is attached hereto and incorporated herein by reference.

1.3 Consideration

a) The total purchase price ("**Purchase Price**") for the Assets shall be Eleven Million Three Hundred Fifty-Seven Thousand and Fifty-One Dollars ($11,357,051.00) to be paid by LWWC to Seller at Closing.

1.4 Contractual Rights and Obligations

LWWC shall not assume any rights or obligations of Seller under any contract, agreement, commitment, lease, certificate, permit or other instrument, whether oral, written, express or implied, except with respect to: (i) those agreements, contracts, permits and other instruments listed on Schedule 1.4 attached hereto, made part hereof and incorporated herein by reference and (ii) grinder pumps and that portion of the customer wastewater lateral between the curb line or edge of road to the street side of the grinder pump any or all of which LWWC may in its sole discretion convey to the customer following Closing and for which, in the event of such conveyance, LWWC agrees to indemnify and hold harmless Seller as provided for in Section 8.1 below.

1.5 Non-Assumption of Liabilities

With the exception of the assumption of contractual duties to be performed after the date of Closing under the surviving contracts listed on Schedule 1.4 attached hereto together with the ongoing obligation to provide wastewater service to the customers of the Seller served by the Assets ("**Assumed Obligations**"), all liabilities and obligations of Seller shall remain the sole responsibility of Seller, including any and all liabilities or obligations under any employee benefit plan, practice or arrangement or pension, retirement or savings plan. Except for the Assumed Obligations, LWWC shall not assume and shall not be liable for any liabilities or obligations of Seller of any nature whatsoever, whether express or implied, fixed or contingent, whatsoever.

2. CLOSING

Subject to the provisions of Sections 4 and 5 below, closing hereunder ("**Closing**") shall take place by mail or at the offices of LWWC located at 762 W. Lancaster Avenue, Bryn Mawr, Pennsylvania or other mutually agreed upon location, commencing at 10:00 A.M. local time, on or before the later to occur of: (i) a date thirty five (35) days after the receipt of final regulatory approvals, including without limitation those described in Section 5.6 below, or (ii) June 30, 2012.

The date of the Closing is referred to herein as the "**Closing Date**". The effective time of the legal transfer hereunder shall be 12:01 a.m. on the day following the Closing Date. If the Closing has not occurred on or before June 28, 2013, either Party shall have the right to terminate this Agreement in accordance with the provisions of this Agreement, provided that such termination shall be without prejudice to the rights of either party which has performed its obligations under this Agreement, if Closing does not occur because of a material breach of this Agreement by the other party.

2.1 Items to be delivered at Closing

At the Closing and subject to the terms and conditions herein contained:

(a) Seller shall deliver to LWWC the Assets, including, without limitation, the following:

(i) instruments and documents of conveyance and transfer, all in form reasonably satisfactory to LWWC and its counsel, as shall be necessary and effective to transfer and assign to, and vest in, LWWC good and marketable title to the Assets and all rights to operate the Assets as such is now being operated, including, but not limited to the following documents: a *Deed* for each fee parcel wherein any treatment, pumping, odor control, storage or other associated facilities are situated; a *Bill of Sale and Assignments* and an *Assignment of Intangibles* and other instruments and documents of conveyance and transfer, all in form reasonably satisfactory to LWWC and its counsel, as shall be necessary and effective to transfer and assign to, and vest in LWWC good and marketable title to the Assets; and an *Assignment and Grant of Easement* for any easement LWWC requires to utilize, maintain, repair and replace any Assets or facilities located outside of any parcels to be conveyed and/or publicly dedicated roadways.

(ii) *Assignment* and copies of, or the originals as appropriate, of all the agreements, contracts, commitments, leases, plans, bids, quotations, proposals, instruments, certificates, permits and other instruments belonging to Seller that are part of or related to the Assets;

(iii) a complete and accurate list of the names and addresses of all customers of Seller, both in paper form and in electronic form on a compact disk (CD) that can be downloaded to a computer, along with a billing history for each customer. LWWC acknowledges that Aqua Pennsylvania, Inc. is Seller's current billing administrator. Seller agrees that Aqua Pennsylvania, Inc. shall provide customer billing information to LWWC as contemplated in this paragraph;

(iv) a certificate, in form and substance satisfactory to LWWC, executed by each third party to any agreement listed on Schedule 1.4 confirming that all representations and warranties of Seller with respect to such contract are true and correct, and that there is no defense, counterclaim or asserted set off by

such party under the agreement, and that Seller and such party are each in compliance with the requirements of the agreement, and to the extent such party's consent is required to an assignment of the contract to LWWC, such consent;

(v) keys to any and all buildings and gates; and

(vi) releases of liens or satisfaction pieces for all mortgages and liens affecting the Assets or other proofs reasonably required by: (A) LWWC to establish clear title to the Assets, or (B) LWWC's title agent to remove such liens and mortgages as exceptions to LWWC's title insurance policy.

and simultaneously with such delivery, all such steps shall be taken as may be required to put LWWC in actual possession and operating control of the Assets.

(b) Seller shall deliver to LWWC, the agreements, opinions, certificates and other documents and instruments referred to in **Section 5** hereof.

(c) LWWC and Seller agree that customer billing information shall be provided to LWWC within seven (7) days immediately prior to Closing. LWWC shall use these billings to begin the billing cycle for its new customers following Closing. LWWC acknowledges that Aqua Pennsylvania, Inc. is Seller's current billing administrator. Seller agrees that Aqua Pennsylvania, Inc. shall provide customer billing information to LWWC as contemplated in this paragraph.

2.2 Transfer Taxes on Real Property

Any transfer taxes imposed on the conveyance or transfer of any real property pursuant to this Agreement shall be paid one-half each by LWWC and Seller. Notwithstanding the foregoing to the contrary, Seller's contribution to the payment of such transfer taxes shall be capped at a maximum of $7,500.00.

2.3 Transfer of Utilities

Seller and LWWC will cooperate to transfer utility service, including telephone, electric and gas service providing such service to any of the Assets as of the Closing Date. In the event service cannot be transferred in the name of LWWC as of the Closing Date, the bills shall be pro-rated as of the Closing Date, and LWWC shall retain from the Purchase Price its estimate of the amount of such bills not yet paid by Seller.

2.4 Remedy

The Parties acknowledge that the Assets are unique and not otherwise available and agree that, in addition to any other available remedy, either party may invoke any equitable remedy to enforce performance hereunder, including, without limitation, the remedy of specific performance.

2.5 Further Assurances

Seller, from time to time after the Closing, at LWWC's request, and without compensation, will execute, acknowledge and deliver to LWWC such other instruments of sale, conveyance, assignment and transfer and will take such other actions and execute and deliver such other documents, certifications and further assurances as LWWC may reasonably require in order to vest in LWWC, and/or to place LWWC fully in possession of, all of the Assets. Each of the parties hereto, without compensation, will cooperate with the other and execute and deliver to the other such other instruments and documents and take such other actions as may be reasonably requested from time to time by any other party hereto as necessary to carry out, evidence and confirm the purposes of this Agreement.

3. CONDUCT OF PARTIES PENDING CLOSING

3.1 Seller agrees that, with respect to the Assets, pending the Closing and except as otherwise agreed to in writing by LWWC:

(a) The business of Seller shall be conducted solely in the ordinary course consistent with past practice.

(b) Seller, at Seller's cost and pursuant to Seller's agreement with Aqua Resources, shall continue to maintain and service the tangible Assets in good working order such that they will be in proper working order at Closing.

(c) Seller will use its best efforts to maintain its relations and goodwill with its suppliers, customers and any others having business relations with it.

(d) Seller shall comply with all laws, ordinances, rules, regulations and orders applicable to it and to the conduct of its business.

(e) Seller will promptly advise LWWC in writing of all events between the date hereof and Closing which could render any representation or warranty under the Agreement, if restated and republished as of Closing, untrue or incorrect in any material respect.

(f) Seller will promptly advise LWWC in writing promptly after Seller receives knowledge of the threat or commencement of any dispute, claim, action, suit, proceeding, arbitration or investigation against or involving the Assets or the sale and transfer thereof to LWWC, or of the occurrence of any event (exclusive of general economic factors affecting business in general) of a nature that is or may be materially adverse to the business, operations, properties, assets, prospects or condition (financial or otherwise) of Seller.

(g) Seller will conduct its business in such a manner that at the Closing the representations and warranties of Seller contained in this Agreement shall be true as though such representations and warranties were made on and as of such date. Furthermore, Seller will use its best efforts to cause all of the conditions to this Agreement to be satisfied on or prior to the Closing Date.

(h) Seller will not take any action which would result in a material breach of any of the representations and warranties of Seller hereunder.

(i) Seller will provide LWWC with such financial and other reports of its business as LWWC may reasonably request.

(j) Seller will give to LWWC, its officers, employees, accountants, counsel and other representatives free and full access to and the right to inspect, during normal business hours, all of the premises, properties, assets, records, contracts and other documents relating to its business and operations, and shall permit them to consult with the officers, employees, accountants, counsel and agents of Seller for the purpose of making such investigation of the business and operations of Seller as LWWC shall desire to make, provided that such investigation shall not unreasonably interfere with the wastewater business or operations of Seller.

(k) Seller shall notify and consult with LWWC prior to the initiation, development or execution of any plans for expansion of or improvements to the Assets.

(l) Seller will cooperate with LWWC sending any customer notices that in LWWC's judgment are necessary or desirable in connection with the transactions contemplated herein.

4. CONDITIONS PRECEDENT TO SELLER'S OBLIGATIONS

All obligations of Seller under this Agreement are subject to the fulfillment or satisfaction, or waiver by LWWC, prior to or at the Closing, of each of the following conditions precedent:

4.1 Closing Certificate; Performance by LWWC

LWWC shall have performed and complied with all agreements and conditions required by this Agreement to be performed or complied with by it prior to or at the Closing; and Seller shall have been furnished with a certificate or certificates of LWWC dated the Closing Date, signed by an officer of LWWC, certifying, in such detail as Seller may reasonably request, to the fulfillment of the foregoing conditions and that all representations and warranties made by LWWC in this Agreement are true and correct as of Closing, except such as have been rendered incorrect because of events which occurred after the date hereof, as disclosed in writing by LWWC to Seller within a reasonable time after the event occurred.

4.2 Litigation Affecting Closing

Other than as previously disclosed to LWWC in writing, on the Closing Date, no proceeding shall be pending or threatened before any court or governmental agency in which it is sought to restrain or prohibit or to obtain damages or other relief in connection with this Agreement or in the consummation of the transactions contemplated hereby, and no investigation that might eventuate in any such suit, action or proceeding shall be pending or threatened.

5. CONDITIONS PRECEDENT TO LWWC'S OBLIGATIONS

All obligations of LWWC under this Agreement are subject to the fulfillment or satisfaction, or waiver by Seller, prior to or at the Closing, of each of the following conditions precedent:

5.1 Satisfaction with Operational and Real Estate Title Issues

LWWC shall be satisfied, within forty-five (45) days following the execution of this Agreement, with the results of its due diligence inspections of the overall operational functionality of the Assets that LWWC may elect to perform, including LWWC's satisfactory review of the quality of title to the real property to be conveyed to LWWC from Seller. LWWC shall be satisfied at Closing that there has been no material deterioration therein between the expiration of such forty-five (45) day period and Closing. Additionally, prior to Closing, LWWC shall be satisfied with its review of the real estate and the quality of fee or easement title to be conveyed to LWWC from Seller. Except for the discovery of latent defects, LWWC is otherwise familiar with the current condition of the personal property comprising the wastewater system.

5.2 Closing Certificate; Performance by Seller

Seller shall have performed and complied with all agreements and conditions required by this Agreement to be performed or complied with by it prior to or at the Closing; and LWWC shall have been furnished with a *Bring Down Certificate* or *Certificates* of Seller dated the Closing Date, signed by the appropriate officials of Seller, certifying, in such detail as LWWC may reasonably request, to the fulfillment of the conditions precedent in Section 3 and that all representations and warranties are true and correct as of Closing, except as disclosed by Seller pursuant to Section 3.1(e), and the facts as contained in such disclosure(s) shall not result, as determined by LWWC in its reasonable judgment, in a material adverse change in the condition of the Assets or business and operations of Seller relating to the Assets.

5.3 Litigation Affecting Closing

On the Closing Date, no proceeding shall be pending or threatened before any court or governmental agency in which it is sought to restrain or prohibit or to obtain damages or other relief in connection with this Agreement or the consummation of the transactions contemplated hereby, and no investigation that might eventuate in any such suit, action or proceeding shall be pending or threatened.

5.4 Seller Authorizations

Seller shall have furnished LWWC with certified copies of all proceedings of Seller, including signed and certified copies of: (i) the minutes of meetings whereby the transaction hereby contemplated was duly authorized, and (ii) appropriate resolutions and other document(s) authorizing the transactions hereby contemplated, as LWWC reasonably shall require.

5.5 Opinion of Counsel

Counsel for Seller, both the solicitor and bond counsel (if applicable), shall have delivered to LWWC at Closing an opinion of such counsel, in form and substance consistent with that identified as Schedule 5.5.

5.6 Governmental Approvals

LWWC shall timely submit and subsequently receive all governmental authorizations needed for the transfer of the Assets, including, but not limited to, adoption and approval of an Order from The Pennsylvania Public Utility Commission ("**PUC**") authorizing: (a) the transfer of the Assets as contemplated by this Agreement; (b) LWWC to provide wastewater service to the residents in the Service Area; (c) Seller to abandon such Service Area and LWWC to assume the ownership and operation of the Assets and to provide wastewater service to the public in the Service Area; and (d) a *Certificate of Public Convenience* from the PUC. Such governmental authorizations, orders, authorizations and approvals by the PUC shall be in form and substance satisfactory to LWWC in its sole discretion and shall survive Closing along with the applicability of LWWC's *Rules and Regulations* applying to any and all existing and future customers that would receive service from LWWC through the Assets or any extensions thereof.

5.7 Material Damage

The Assets shall not be, or be threatened to be, materially adversely affected by fire, explosion, earthquake, disaster, accident, cessation or interruption of utility or other services, flood, drought, lack of supply, contamination of water supply, embargo, riot, civil disturbance, uprising, activity of armed forces or act of God or public enemy, or any other event or occurrence.

5.8 Satisfaction of LWWC

All actions, proceedings, resolutions, instruments and documents required to carry out this Agreement or incidental hereto and all other related matters shall have been approved on the Closing Date by LWWC in the exercise of its reasonable judgment.

6. REPRESENTATIONS AND WARRANTIES OF SELLER

6.1 Seller hereby represents and warrants to LWWC as follows:

(a) Organization. The Township of Kidder is duly organized, validly existing, solvent, and in good standing under the laws of the State of Pennsylvania.

(b) Assets Ownership. Seller holds the exclusive right, title and interest to the Assets and facilities comprising the Assets as set out on Schedule 1.1 attached hereto.

(c) Current Operations. Seller has all requisite power and authority and all agreements, contracts, commitments, leases, certificates, licenses, permits, regulatory authorizations and other instruments required to conduct the business of the Assets as it has been and is now being conducted and to own and operate the Assets. Seller's current operator of the Assets is Aqua Resources.

(d) Legal Authority. Seller has the full power and lawful authority to transfer to LWWC the rights, title and interest in and to the Assets.

(e) Due Authorization; Valid and Binding. Seller has the full power and lawful authority

to execute and deliver this Agreement and all related agreements and to consummate and perform the transactions contemplated hereby and has duly and validly authorized the execution of this Agreement and all related documents and agreements by all necessary proceedings. This Agreement and all related agreements constitute the valid and binding obligation of Seller.

(f) No Approvals or Violations.. This Agreement does not require any further approvals of any other party, does not violate any law, ordinance or regulation, does not conflict with any order or decree, and does not conflict with or result in a breach of any contract, lease or permit to which Seller is a party. The proposed transfer does not violate, conflict with or result in the breach of any term, condition or provision of any instrument, contract, lease, agreement, permit, certificate or other document to which Seller is a party or is otherwise bound or affected, or by which the Assets may be bound or affected.

(g) Party to Decree. With the exception of the *Release and Settlement Agreement* between Seller and Vacation Charters, Ltd., dated November 18, 2010 (copy attached as Schedule 6.1(g)), which will be assigned to Buyer at Closing, Seller is not party to, or subject to the provision of, any judgment, order, writ, injunction or decree of any court or of any governmental official, agency or instrumentality relating to the Assets.

(h) Defeasance. As of the Closing, (if applicable) the Seller's bonds, (hereinafter referred to as the "**Bonds**"), if any, will be defeased, and any and all liens and encumbrances on the Assets will have been removed. The Defeasance will be done in a proper and lawful manner.

(i) List of Assets. Schedule 1.1 contains a true and complete list of the Assets.

(j) Customer Records. The data contained in the customer records provided to LWWC is true and accurate.

(k) Seller shall cooperate with LWWC and shall use reasonable efforts to help LWWC collect or enforce any rights assigned to LWWC under this Agreement. LWWC acknowledges that Aqua Pennsylvania, Inc. is Seller's current billing administrator.

6.2 Except as set forth on Schedule 6.2, Seller hereby represents and warrants to LWWC as follows:

(a) Title of Assets. Seller has good and marketable title to the Assets, free and clear of all liens, encumbrances and security interests.

(b) Undisclosed Liabilities. Other than as disclosed herein, there are no liabilities or obligations of Seller, either accrued, absolute, contingent or otherwise, relating to the Assets. For purposes of this Agreement, the term liabilities shall include, without

limitation, any direct or indirect indebtedness, guaranty, endorsement, claim, loss, damage, deficiency, cost, expense, obligation or responsibility either accrued, absolute, contingent or otherwise.

(c) Condition of Assets. All the tangible property included in the Seller's Assets are in good operating condition and repair, are usable in the regular course of business and conform to all applicable laws, ordinances, codes, rules and regulations relating to their construction, use and operation, and are free from any known material defects except such minor defects as do not substantially interfere with the continued use thereof in the conduct of normal operations. Except for latent defects, LWWC is otherwise aware of the current condition of the wastewater system and the personal property comprising the wastewater system.

(d) No Other Parties. No person other than Seller owns or has any interest in any equipment or other tangible assets or properties currently utilized or necessary to the operations or business of the Seller's Assets.

(e) Adequacy of Rights. All agreements, contracts, commitments, leases, certificates, permits and other instruments related to the Assets to which Seller is a party are valid and enforceable in accordance with their terms, are in good standing, and the parties thereto are in compliance with the provisions thereof. No party is in default in the performance, observance or fulfillment of any material obligation, covenant or condition contained therein, and no event has occurred, which with or without the giving of notice or lapse of time, or both, would constitute a default there under.

(f) Adequacy of Property Rights. All leases, licenses, rights of way, and easements related in any manner to the assets and properties comprising the Seller's Assets and all other instruments, documents and agreements pursuant to which Seller has obtained the right to use any real property in connection with the Assets are in good standing, valid and effective in accordance with their respective terms, and with respect thereto, there is no existing default or event which could constitute a default. Seller possesses all property rights necessary to operate the Assets.

(g) Rights to Facilities. Seller has good and valid rights to occupy and to obtain access to the areas where the discharge lines and other facilities of the Assets are located.

(h) Pending Litigation. There are no pending claims, actions, investigations or legal or administrative proceedings regarding the Assets or Seller's ability to transfer the Assets.

(i) Threatened Litigation. Other than as previously disclosed to LWWC in writing, to the best of Seller's knowledge, there are no threatened claims, actions, investigations or legal or administrative proceedings regarding the Assets or Seller's ability to transfer the Assets, nor does Seller know of any basis for any such claim, action or proceeding.

(j) Contract for Refunds. Seller is not a party to any contract for future payment of refunds under any extension agreement, customer deposit agreement or similar agreement with respect to the Assets.

(k) Contract with Suppliers. Seller is not a party to any contract for the purchase of, or payment for supplies, equipment or for services related to the Assets, except such contracts that shall not survive Closing. LWWC acknowledges that Seller has notified it that Seller currently has contracts with Caterpillar, Waste Management, Inc., and the electrical provider, none of which shall survive Closing to the extent the terms of said Contract permit termination at or prior to Closing. Seller will cooperate in the transfer of utility service in accordance with Section 2.3 above.

(l) No Material Change. Within the past two years, Seller has not: 1) made or suffered any amendment or termination of any material agreement, contract, commitment or lease or any governmental permit or authorization to which it is a party or by which it is bound; or 2) canceled, modified or waived any debts or claims held by it; or 3) waived any rights of substantial value.

(m) No Material Adverse Conditions. There are no conditions or developments existing or, to the knowledge of Seller, threatened which would have a material adverse effect on the Assets.

(n) Compliance with Law. Seller is not in any material violation of any law, ordinance or governmental rule or regulation to which it or its business, operations, assets or properties is subject and has not failed to obtain, or to adhere to the requirements of, any certificate, license, permit or other governmental authorization necessary to the ownership of its assets and properties or to the conduct of its business.

(o) Insurance. Seller has procured and will maintain through the date on which Closing is held its current policies of insurance.

6.3 Except as set forth in Schedule 6.3, Seller hereby represents and warrants to and with LWWC as follows with respect to compliance with environmental laws:

(a) Compliance with Law. To the best of Seller's actual knowledge, Seller has been and is in compliance with: (i) all laws and regulations pertaining to the Assets and (ii) all Environmental Laws (as hereinafter defined). LWWC acknowledges that Aqua Resources is Seller's current Operation's Manager and agrees it is aware of the current status of compliance with the law and environmental conditions except for latent circumstances which may not be evident at the time of this Agreement.

(b) Adequacy of Permits. To the best of Seller's actual knowledge, after diligent inquiry and investigation, Seller has obtained and continues to possess all permits, licenses,

approvals or other authorizations which are required under the Environmental Laws, has filed such timely and complete renewal applications as may be required prior to the Closing Date, and also has complied with all reporting and record keeping requirements under the Environmental Laws.

(c) Environmental Conditions. Except as previously disclosed to LWWC in writing, to the best of Seller's actual knowledge, following diligent inquiry and investigation, there are no past or present events, conditions, circumstances, activities, practices, incidents, actions or plans pertaining or relating to the Assets which may impede or prevent continued compliance with the Environmental Laws or which may give rise to any civil or criminal liability under the Environmental Laws. LWWC acknowledges that Aqua Resources is Seller's current Operation's Manager and agrees it is aware of the current status of compliance with the law and environmental conditions except for latent circumstances which may not be evident at the time of this Agreement.

(d) Compliance with Decrees. Seller has been and is in compliance with all orders, decrees, judgments and notices issued against the Seller under or in connection with the Environmental Laws.

As used in this Agreement, the following terms shall have the following meaning:

The term "**Environmental Laws**" shall include all federal, state and, local environmental laws and regulations, including, without limitation, the Clean Water Act ("**CWA**"), also known as the Federal Water Pollution Control Act ("**FWPCA**"), 33 U.S.C. § 1251 et seq., the Toxic Substances Control Act ("**TSCA**"), 15 U.S.C. § 2601 et seq., the Federal Insecticide, Fungicide and Rodenticide Act ("**FIFRA**"), 7 U.S.C. §§ 136 et. seq., the Safe Drinking Water Act ("**SDWA**"), 42 U.S.C. §§ 300 (f) et seq., the Surface Mining Control and Reclamation Act ("**SMCRA**"), 30 U.S.C. §§ 1201 et seq., the Comprehensive Environmental Response, Compensation and Liability Act ("**CERCLA**"), 42 U.S.C. § 9601 et seq., the Superfund Amendment and Reauthorization Act of 1986 ("**SARA**"), Public Law 99-499, 100 Stat., 1613, the Resource Conservation and Recovery Act ("**RCRA**"), 42 U.S.C. 6901, the Atomic Energy Act ("**AEA**"), Act of August 30, 1954, Ch. 1073,68 Stat. 919 (codified as amended in scattered sections of 5 U.S.C. and 42 U.S.C.). Any reference to a legislative act or regulation shall be deemed to include all amendments thereto and all regulations, orders, decrees, judgments, opinions directives or notices issued thereunder.

The term "**Environmental Condition**" shall mean any condition or circumstance related to the Assets, whether created by Seller or any other party, which (1) required or requires abatement or correction under an Environmental Law, or (2) has given or may give rise to any civil or criminal liability under an Environmental Law, or (3) has created or may create a public or private nuisance, including the presence of asbestos, PCB's, hazardous substances, petroleum products, radioactive waste or radon, on, in or about the Assets.

6.4 Reserved.

6.5 No Misleading Statements

No representation or warranty by Seller in this Agreement or in any document delivered or to be delivered pursuant hereto or in connection herewith, and no statement, document, agreement, information or certificate made or furnished or to be made or furnished to LWWC pursuant hereto or in connection with the negotiation, execution or performance of this Agreement, now and as of the Closing Date, contain any untrue statement of a material fact, or fail to state any fact necessary to make any statement herein or therein not misleading.

6.6 Documents Produced

Seller will deliver at Closing to LWWC true and complete copies of all the agreements, contracts, commitments, leases, certificates, plans, maps, permits and other instruments, documents and undertakings described in this Agreement.

7. REPRESENTATIONS AND WARRANTIES OF LWWC

7.1 LWWC hereby represents and warrants to Seller as follows:

(a) Organization. LWWC is a corporation duly organized and validly existing and in good standing under the laws of the State of Pennsylvania.

(b) Due Authorization; Valid and Binding. LWWC has the full power and lawful authority to execute this Agreement and to consummate and perform the transactions contemplated hereby and has duly and validly authorized the execution of this Agreement by all necessary proceedings. This Agreement constitutes the valid and binding obligations of LWWC.

(c) Financial Wherewithal. LWWC has the financial wherewithal to complete the purchase of the Assets as contemplated hereunder and upon completion of Closing, to operate and manage the Assets at, or exceeding, the level of service provided by the Seller prior to Closing.

(d) If this transaction is approved by the PUC, LWWC will adopt and freeze the Kidder Township sewer base rates until at least January 1, 2014.

(e) LWWC agrees that it will charge no tap fees to any new user of the existing sewer system.

(f) LWWC agrees that the Seller will be relieved from all future capital improvement expenditures for the sanitary sewer system.

8. INDEMNIFICATION

8.1 Indemnification of Seller

From and after the Closing, LWWC will reimburse, indemnify and hold Seller and its officials

and employees harmless from and against any and all liabilities, obligations, damages, losses, actions, audits, deficiencies, claims, fines, costs and expenses, including attorney's fees and costs resulting from, relating to, or arising out of:

(a) the provision of wastewater service by LWWC for the period following Closing;

(b) issues of regulatory compliance and claims by third parties for events that occur following the date of Closing that are not attributable to events that occurred prior to Closing;

(c) the failure of LWWC to perform any of its covenants following Closing;

(d) LWWC's post-closing conveyance, if any, of grinder pumps and that portion of the customer wastewater lateral between the curb line or edge of road to the street side of the grinder pump to the customer; and

(e) the enforcement of this Section 8.

8.2 *Indemnification of LWWC*

From and after the Closing, Seller will reimburse, indemnify and hold LWWC and its affiliates, and their officers, directors and employees, harmless from and against any and all liabilities, obligations, damages, losses, actions, audits, deficiencies, claims, fines, costs and expenses, including attorney's fees and costs resulting from, relating to, or arising out of:

(a) any liabilities or obligations of Seller of any nature whatsoever except for those liabilities and obligations of Seller which LWWC specifically assumes pursuant to this Agreement;

(b) any misrepresentation, breach of warranty or non-fulfillment of any agreement or covenant on the part of Seller under this Agreement, or from any misrepresentation in, or omission from, any Schedule or information furnished to LWWC pursuant to this Agreement or in connection with the negotiation, execution or performance of this Agreement;

(c) the provision of wastewater service by Seller for the period prior to the date of Closing;

(d) issues of regulatory compliance and claims by third parties for events that are attributable to events that occurred prior to Closing, excluding events disclosed to LWWC in writing prior to Closing, ;

(e) Seller's failure to perform any of its covenants following Closing;

(f) Seller's tax liability; and/or

(g) the enforcement of this Section 8.

8.3 General

Each party shall provide the other party with reasonable notice of any claims arising under this Section 8. The indemnification rights of the parties under this Section 8 are independent of and in addition to such rights and remedies as the parties may have at law or in equity or otherwise for any misrepresentation, breach of warranty, or failure to fulfill any agreement or covenant hereunder.

9. SURVIVAL OF REPRESENTATIONS AND WARRANTIES

All representations, warranties and agreements made by the parties in this Agreement or in any agreement, document, statement or certificate furnished hereunder or in connection with the negotiation, execution and performance of this Agreement shall survive the Closing. Notwithstanding any investigation or audit conducted before or after the Closing Date or the decision of any party to complete the Closing, each party shall be entitled to rely upon the representations, warranties and agreements set forth herein and therein.

10. MISCELLANEOUS

10.1 Contents of Agreement; Parties in Interest; etc.

This Agreement sets forth the entire understanding of the parties hereto with respect to the transactions contemplated hereby. It shall not be amended or modified except by written instrument duly executed by each of the parties hereto. Any and all previous agreements and understandings between or among any or all of the parties regarding the subject matter hereof, whether written or oral, are superseded by this Agreement.

10.2 Binding Effect

All of the terms and provisions of this Agreement shall be binding upon, inure to the benefit of and be enforceable by the legal representatives, successors and assigns of Seller or LWWC.

10.3 Waiver

Any term or provision of this Agreement may be waived at any time by the party or parties entitled to the benefit thereof by a written instrument executed by such party or parties.

10.4 Notices

Any notice, request, demand, waiver, consent, approval or other communication which is required or permitted hereunder shall be in writing and shall be deemed given only if delivered personally or sent by telegram or by registered or certified mail, postage prepaid, return receipt requested, as follows:

If to LWWC:
Anthony J. Donatoni, President
Little Washington Wastewater Company
762 W. Lancaster Avenue
Bryn Mawr, PA 19010

With a required copy to:
Christopher Luning
762 W. Lancaster Avenue
Bryn Mawr, PA 19010

And a required copy to attorney for LWWC:
Stephen McConnell, Esq.
Reger Rizzo & Darnall LLP
2929 Arch St., 13th Floor
Philadelphia, PA, 19104-2899

If to Seller:
Township of Kidder
c/o John P. Finnerty, Manager
Kidder Township Municipal Bldg.
PO Box 576
Lake Harmony, PA 18624

With Copy To attorney for Seller:
Daniel A. Miscavige, Esquire
67 North Church Street
Hazleton, PA 18201

or to such other address as the addressee may have specified in a written notice duly given to the sender as provided herein. Such notice, request, demand, waiver, consent, approval or other communication will be deemed to have been given as of the date so delivered.

10.5 Law to Govern

This Agreement shall be governed by and interpreted and enforced in accordance with the laws of the State of Pennsylvania without giving effect to any conflicts of laws provisions.

10.6 No Benefit to Others

The representations, warranties, covenants and agreements contained in this Agreement are for the sole benefit of the parties hereto, and their legal representatives, successors and assigns, and they shall not be construed as conferring any rights on any other persons.

10.7 Headings, Gender, etc.

All section headings contained in this Agreement are for convenience of reference only, do not form a part of this Agreement and shall not affect in any way the meaning or interpretation of this Agreement. Words used herein, regardless of the number and gender specifically used, shall be deemed and construed to include any other number, singular or plural, and any other gender, masculine, feminine or neuter, as the context requires.

10.8 Exhibits and Schedules

All Exhibits, Attachments and Schedules referred to herein are intended to be and hereby are specifically made a part of this Agreement.

10.9 Cooperation/Further Assurances

Seller from time to time after the Closing, at LWWC's request, and without additional compensation, will execute, acknowledge and deliver to LWWC such other instruments of sale, conveyance, assignment and transfer and will take such other actions and execute and deliver such other documents, certifications and further assurances as LWWC may reasonably require in order to vest in LWWC, and/or to place LWWC fully in possession of, all of the Assets. Each of the parties hereto, without additional compensation, will cooperate with the other and execute and deliver to the other such instruments and documents and take such actions as may be reasonably requested from time to time by any other party hereto as necessary to carry out, evidence and confirm the purposes of this Agreement.

10.10 Severability

Any provision of this Agreement that is invalid or unenforceable in any jurisdiction or under any circumstance shall be ineffective to the extent of such invalidity or unenforceability without invalidating or rendering unenforceable the remaining provisions hereof, and any such invalidity or unenforceability in any jurisdiction or under any circumstance shall not invalidate or render unenforceable such provision in any other jurisdiction or under any other circumstance, unless, in either event, the involved or unenforceable provision causes this Agreement to fail of its essential purpose.

10.11 Counterparts

This Agreement may be executed in any number of counterparts and any signatory hereto may execute any such counterpart, each of which when executed and delivered shall be deemed to be an original and all of which counterparts taken together shall constitute but one and the same instrument. This Agreement shall become binding when one or more counterparts taken together shall have been executed and delivered by all signatories. It shall not be necessary in making proof of this Agreement or any counterpart hereof to produce or account for any of tbe other counterparts.

10.12 Risk of Loss

Seller assumes risk of loss in connection with the assets prior to Closing including without limitation, risk of loss from fire and other casualty. In the event of any loss or damage to any of the assets, the purchaser at its option, prior to or at Closing (i) request that the damage asset be replaced or restored to substantially the same condition of the asset as of the date of this agreement; (ii) request an adjustment to the purchase price as can be agreed upon by the parties, or (iii) request the insurance procedures of the Seller and/or other moneys to enable Buyer to make a proper restoration of the asset.

Schedule 1.1
List of Assets

I. TREATMENT FACILITIES:

1. One (1) Treatment Facility, equipped with (at a minimum) electric power, telephone lines and sewage disposal lines and/or systems, and all other related treatment equipment and processes as identified on the Treatment Facility Plans.

II. COLLECTION SYSTEM:

1. All wastewater collection (gravity and/or force) mains and lines, and related appurtenances, including fittings, holding tanks, odor control stations, pump stations (including electric and other utilities, if applicable), manholes (including electric and other utilities, if applicable), effluent discharge lines (including electric and other utilities, if applicable), and laterals (from mains to the curb line or edge-of-road), all of which are depicted on the maps or plans attached hereto at Attachment 2)
2. Residential accounts representing approximately 983 EDU's and commercial accounts representing approximately 523 EDU's that coincide with the laterals identified in the foregoing paragraph II (1)
3. A total of 784 Grinder Pumps including that portion of the customer wastewater lateral between the curb-line or edge-of-road to the street-side of the grinder pump; all of which LWWC may in its sole discretion convey to the customer following Closing upon satisfaction of the above-referenced Pennvest indebtedness and release of the Pennvest lien(s). The Grinder Pumps are located within customer properties as noted on Attachment 6 and further identified as follows:
   (a) Model 2010 – 772
   (b) Model 2015 – 5
   (c) Spare (2010) – 7

III. REAL ESTATE

1. Fee title to all parcels of land associated with the Treatment Facilities and Collection System, including but not limited to the following:
   a) Land, buildings and improvements situate at and adjacent to I-80 and Split Rock Golf Course in the Township of Kidder, Carbon County, Pennsylvania consisting of 6.4 acres more or less as set forth more fully in Deed Book 1019, Pages 439 - 453.
   b) Deeds to 3 parcels obtained for Odor Control Stations:
      (i) Deed Book 1084, Page 819;
      (ii) Deed Book 1084, Page 824; and
      (iii) Deed Book 1084, Page 830
2. Various easements and/or rights of way as required, including permanent and perpetual access (including, but not limited to, pedestrian, vehicular and utilities) to and for the Treatment Facilities and Collection System, including but not limited to the following:
   a) Easements for any and all components of the Assets located outside of any roads that would be dedicated to any municipal entity.
   b) Assignment of right-of-way through property of Summit Management Utilities, Vacation Charters and Blue Ridge Real Estate from and included in original purchase of Sewer Plant from Summit Management, including rights set forth in Deed Book 1019, page 439 et seq.;

c) Right-of-way 432-1 Vacation Charters;
d) Right-of-way Vacation Charges dated December 5, 1996;
e) Right-of-way Split Rock Country Club Inc.
f) Easement – Vacation Charters;
g) Easement – Lake Harmony Groups;
h) Easement – Lake Harmony Estates Property Owners;
i) Easement – Wells/Finkbiner;
j) Easement – Lipsi;
k) Easement – Milberg/Leibowitz;
l) Easement – Oves;
m) Easement – Blue Ridge Real Estate Company;
n) Assignment of all Grinder Pump Easements from individual property owners to the Township of Kidder; and
o) Right-of-way on existing Township streets.

IV. MISCELLANEOUS:

1. Assignment of any and all manufacturer's warranties for the Assets;
2. Any and all permits associated with the Assets, including Assignment of NPDES required permits;
3. Billing records, including a list of the names and addresses of all wastewater customers at the time of Closing;
4. Maps and/or Plans of the existing Assets in place at the time of Closing;
5. Keys to any and all buildings included as components of the Assets;
6. Release and Settlement Agreement with Vacation Charters, Ltd. also attached at **Schedule 6.1(g)**;
7. Copies, of the originals, of all agreements, contracts, commitments, leases, plans, bids, quotations, proposals, instruments, certificates, and other instruments belonging to Seller that are part of or related to the Assets; and
8. All machinery, equipment and other tangible property, personal property, including tools, supplies, inventories and customer records and contracts, financial records, engineering drawings, vendor contracts, environmental reports and all other records necessary to the continued operation of the Assets;
9. Fixtures, tangible personal property and equipment as existing on the aforesaid site as of the date of this Agreement; and
10. Accounts Receivable existing as of the twenty-first (21st) day after the Closing Date for wastewater service to residents and other customers within Kidder Township, as well as all and any liens.

Schedule 1.2(c)
Excluded Assets

Schedule 1.4
Assumed Rights

1. Seller shall assign to LWWC Seller's right to collect the payments still to be made by the Plaintiff to Kidder Township under paragraphs nine and ten of that certain *Release and Settlement Agreement* entered by and between Vacation Charters LTD as Plaintiff and Kidder Township pursuant to the civil action filed in the Court of Common Pleas of Carbon County, Pennsylvania at Docket No. CV-07-4079, a copy of which *Release and Settlement Agreement* is attached hereto. Seller represents that as of the date of this Agreement said remaining payments total $225,000.00. LWWC has had full opportunity to fully investigate and become familiar with the terms and conditions of this agreement and, as such, agrees to execute the appropriate document or documents at Closing so as to release, indemnify and hold barmless Seller as well as its Board of Supervisors, agents, employees, representatives, personal representatives and assigns from all claims, suits, causes of action and judgments or demands of any kind arising out of the agreements with Summit Management and Vacation Charters. Such documents shall be acceptable to the parties and their respective counsel and include al relevant agreements.

2. Seller shall execute all relevant transfer forms such that any permits associated with the Assets shall transfer to LWWC immediately upon Closing. Such transfer forms will be completed by LWWC and executed by the parties at Closing and subsequently filed by LWWC with the appropriate regulatory agencies.

Schedule 5.5

Proposed Opinion Letter – subject to revision

[LETTERHEAD]

_____, 2012

Little Washington Wastewater Company
762 West Lancaster Avenue
Bryn Mawr, Pennsylvania 19010

Dear Sirs:

I have acted as counsel to the Seller in conjunction with the Assets Purchase Agreement dated as of _____, 2012 (the "**Agreement**") between Kidder Township ("**Seller**") and Little Washington Wastewater Company ("**LWWC**"). The Agreement provides for LWWC to acquire from Seller the Seller's wastewater system assets situated in Kidder Township, Carbon County, Pennsylvania (collectively herein called the "**Assets**").

I have examined the Agreement and the certifications, documents and instruments delivered pursuant thereto. I have also examined original copies, certified copies and file copies of records, agreements, instruments, certificates of public officials and officers and other documents relating to the Assets.

Based upon the foregoing, to the best of my knowledge, I am of the opinion that:

(a) Seller is a township of the second class, duly organized, validly existing and in good standing under the laws of the Commonwealth of Pennsylvania.

(b) Seller owns the Assets and the wastewater system assets and is operating the wastewater system currently in the same manner in which it has been operated since Seller acquired the wastewater system assets in 2002.

(c) Neither the execution and delivery of the Agreement by Seller, nor consummation and performance of the transactions contemplated thereby results in a violation of any judgment, order, writ, injunction or decree of any court or of any governmental official, agency or instrumentality which is applicable to Seller.

(d) The execution and delivery of the Agreement and the performance of the transactions contemplated hereby do not violate, conflict with or result in the breach (with or without the giving of notice or lapse of time or both) of any term, condition or provision of any partnership or operating agreement, or any instrument, contract, lease, agreement, permit, certificate or other document to which Seller is a party, or is otherwise bound or affected, or by which any of Assets may be bound or affected.

(e) Seller has full power, authority and legal right to sell, convey, assign, transfer and deliver the Assets to LWWC as provided in the Agreement.

(f) All proceedings required to be taken by the Seller to carry out the Agreement, and to authorize the Seller to sell, convey, assign, transfer and deliver to LWWC the Assets pursuant to the Agreement have been or will be duly and properly taken.

(g) The Agreement has been duly executed and delivered by Seller and is the legal, valid and binding obligation of Seller enforceable against Seller in accordance with the terms of the Agreement.

(h) The instruments delivered by Seller to transfer the Assets to LWWC have been duly authorized, executed and delivered, are legal, valid and binding in accordance with their terms.

(i) There is no action, suit, or proceeding pending or, to the knowledge of the undersigned, threatened against or affecting Seller before or by any court, administrative agency, or other governmental authority which brings into question the validity of the transactions contemplated by the Agreement.

(j) LWWC is expressly permitted to install, maintain, repair and replace the sanitary sewer lines under, through, and along the public streets, roads and alleys within Kidder Township.

The opinions expressed herein are limited to matters of federal law and the laws of the Commonwealth of Pennsylvania. This opinion is provided to LWWC solely for the purpose of complying with Seller's obligations under the Agreement. This opinion is given for LWWC's use and benefit, and, except as may be otherwise permitted by law, may not be relied upon by any other person without the prior written consent of the undersigned.

Sincerely yours,

[Attorney for Seller]

Schedule 6.1(g)
***Release and Settlement Agreement* with**
Vacation Charters, Ltd., dated November 18, 2010

IN THE COURT OF COMMON PLEAS OF CARBON COUNTY, PENNSYLVANIA
CIVIL ACTION - LAW

VACATION CHARTERS LTD., SPLIT ROCK COUNTRY CLUB, INC., SUMMIT MANAGEMENT & UTILITIES, INC.,	:	
Plaintiffs	:	Docket No.: CV-07-4079
vs.	:	
KIDDER TOWNSHIP,	:	
Defendant	:	

RELEASE AND SETTLEMENT AGREEMENT

KNOW ALL MEN BY THESE PRESENTS:

THIS RELEASE AND SETTLEMENT AGREEMENT is made and entered into by and between **VACATION CHARTERS LTD., SPLIT ROCK COUNTRY CLUB, INC., and *SUMMIT MANAGEMENT & UTILITIES, INC.*** for themselves and for the benefit of their officers, agents, shareholders, subsidiaries, successors and assigns, (hereinafter referred to as "Plaintiffs") and the **TOWNSHIP OF KIDDER,** for itself and for the benefit of its officers, agents, employees, elected officials and insurers (hereinafter referred to collectively as "Defendant").

WHEREAS, the Plaintiffs have presented a claim against Defendants arising from a certain Asset Purchase Agreement and also the circumstances of Defendant providing sanitary sewer service to certain properties of the Plaintiffs which claims are the subject of the above captioned matter in the County of Carbon, Pennsylvania (the "Lawsuit"); and

WHEREAS, the Defendant has filed a counter-claim enumerating and specifying certain claims for monetary damages against the Plaintiffs herein to the same term and number (also included in the definition of the "Lawsuit"); and

WHEREAS, the Plaintiffs and Defendant desire to settle the matter as asserted in the Lawsuit, the parties enter into this Release and Settlement Agreement according to the following terms:

1. Each party hereto shall bear all attorneys fees and costs arising from their actions or the actions of their own counsel in connection with the Lawsuit and with this Release and Settlement Agreement.

2. The parties hereto acknowledge for themselves and their officers, elected officials, shareholders, employees, insurers, assigns and successors, and any related entities, that this Release and Settlement Agreement is a release of all the claims asserted in the Lawsuit. The parties further agree that the promises, conditions and covenants as set out herein are sufficient consideration and that this Release and Settlement Agreement effects a full and final complete compromise of all matters involving disputed issues of law and fact asserted in the Lawsuit. The parties fully assume the risk that the facts or the law may be otherwise than what they believe.

3. Upon execution and adoption of this Release and Settlement Agreement by the parties hereto counsel for the parties each will deliver to opposing counsel an executed Praecipe to Settle, Discontinue and End with prejudice the Lawsuit, including the Complaint and the Counter Claim.

4. The parties represent and warrant that no other person or entity not a party to this Release and Settlement Agreement has had any interest in the claims, demands, obligations or causes

of action asserted in the Lawsuit; that the parties have the sole and exclusive right to enter into and be bound by the terms and provisions of this Release and Settlement Agreement; to make payment of or receive the sums specified in it; and that the parties have not sold, assigned, transferred, conveyed or otherwise disposed of any of the claims, demands, obligations or causes of action referred to in this Release and Settlement Agreement.

5. The parties agree and acknowledge that the promises, covenants, conditions and sums specified in this Release and Settlement Agreement are accepted as a full and complete compromise in all matters asserted in the Lawsuit. Payment of the sums by any party as set out in this Release and Settlement Agreement, and the adoption of action by either of the parties as required under the terms and provisions of this Release and Settlement Agreement and the negotiations for this settlement (including all statements, admissions or commissions) by the parties or their attorneys or representatives shall not be considered admissions of fault or wrongdoing by any of the parties.

6. This Release and Settlement Agreement shall be binding upon and inure to the benefit of the officers, shareholders, subsidiaries, agents, employees, elected officials, insurers, executors, administrators, personal representatives, heirs, successors and assigns of each. The parties specifically acknowledge there are no other understandings or agreement verbal or otherwise in relation thereto between the parties to this Release and Settlement Agreement. The parties agree that this Release and Settlement Agreement may not be modified orally but may be modified only by a written agreement.

7. In entering into this Release and Settlement Agreement, the parties hereto have relied upon their respective counsel for legal advice; for the Plaintiffs, Jane Maughan, Esquire and James Nanovic, Esquire; for the Defendant, Anthony R. Sherr, Esquire; Gretchen D. Sterns,

Esquire, and Daniel A. Miscavige, Esquire, who are counsel selected by the parties hereto. The terms of this Release and Settlement Agreement have been completely read and explained to the parties by their counsel; those terms and conditions and the legal effect thereof have been fully understood and voluntarily accepted by them.

8. The parties hereto enter this Release and Settlement Agreement in the Commonwealth of Pennsylvania, the situs being the County of Carbon, and said documents shall be construed and interpreted in accordance with the Law of the Commonwealth of Pennsylvania.

9. Plaintiffs agree to pay the Defendant the sum of Two Hundred and Fifty Thousand Dollars ($250,000.00) which sum is acknowledged to be a compromise amount of the Claim of the Defendant for tapping fees, user fees and for delinquent user fees for sewage treatment at the public sanitary sewer system owned and operated by the Defendant, for all sums due for the period from January 1, 2002 through and including June 30, 2010. The parties acknowledge that this sum shall be considered a municipal debt for services provided by the Defendant Municipality and shall be accorded all such priority and status as a municipal debt.

10. The parties agree that the principal amount of Two Hundred and Fifty Thousand Dollars ($250,000.00) will be paid by the Plaintiffs to the Defendant, without interest, over a ten (10) year period commencing January 2, 2012 and terminating January 2, 2021. Each payment shall be in the amount of Twenty-Five Thousand Dollars ($25,000.00) and shall be due on January 2nd of each year commencing January 2, 2012. Defendant shall provide Plaintiff with a notice, no later than December 20th each year, of the upcoming payment due on the upcoming January 2nd; however, the failure of the Defendant to provide said notice does not relieve Plaintiffs of the obligation to make timely payment as provided herein. Any

payments made later than 10 days after the 2nd day of January in any year in which they are due shall bear interest at the rate of ten (10%) percent per annum. In addition, any such delinquent amounts shall also accrue charges which the Defendant may occur for reasonable attorney fees, court costs and other costs of collection of said monies. The Plaintiffs agree that such additional costs, attorney's fees and collection fees and interest shall have the same status for collection and lien purposes as the principal amount due.

11. The parties agree that none of the Plaintiffs' obligations under the terms of this Release and Settlement Agreement are intended to be affected by a discharge in Bankruptcy. The parties further specifically intend that the Plaintiffs' obligations under the terms of this Release and Settlement Agreement shall be non-dischargeable and not subject to discharge in Bankruptcy due to the nature of the municipal obligation and further that it is substantive and primary consideration for the Plaintiffs' obligations under the terms and conditions of the Release and Settlement Agreement.

12. Effective July 1, 2010, and based on all the currently existing improvements at the premises owned, operated and or occupied by the Plaintiffs, Plaintiffs will be obligated to pay Defendant sewage treatment user fees, which will be billed at a basis of 430 EDUs according to the following schedule of EDU's.

Location	EDU
Lodge	32
Cove Cottage	1
Pavillion	1
Lebanon Cottage	1
Westwood	90
Galleria	115
Forest Inn	3
Mini Golf	1

Location	EDU
Cope Cottage	1
Accounting	4
Time Share Sales	3
Purchasing	1
Resort Maintenance	2
Golf Maintenance	2
East Gate	1
Cart Barn	1
Water Park	30
Willowbrook	128
Club House	13
TOTAL	430

The parties acknowledge that 320 units have been approved for construction at Willowbrook; that 192 units remain to be built and that 128 units presently are completed. The parties acknowledge that both built and unbuilt units have two bedrooms and a construction design that permits Plaintiffs to sell each unit as two separate spaces by a lock out door that cuts the unit into two. Notwithstanding this lock out design, the parties agree that each of the 320 Willowbrook units are one EDU.

13. Defendant shall issue regular quarterly billing in the regular billing cycle as maintained and utilized by the Defendant Township to Vacation Charters Ltd., with billing detailed on five (5) separate bills separated as follows:

a. Westwood Condominium Association, Inc.(90 EDU);

b. Willowbrook at Lake Harmony (128 EDU);

c. The Galleria and the Water Park (145 EDU);

d. Split Rock Country Club, Inc. (for the Clubhouse and the Cart Barn) (14 EDU);

e. All the remaining uses of the Plaintiffs (53 EDU).

The parties agree that such billing shall be at the quarterly rate for billing as established from time to time by the Board of Supervisors of the Township Kidder or its successor. Any future EDUs added to the system by the Plaintiffs shall be billed at the then existing quarterly user rate as established by the Defendant or its successor. In the event that Defendant issues a new or revised user fee ordinance in the future, or in the event that any successor to Defendant seeks or establishes a rate change on user fees, Plaintiffs retain their right to challenge any new user fee ordinance, resolution or rate change in accordance with Pennsylvania law relating to the rights of users to challenge revised user fees or rate changes; however, Plaintiffs shall not have the right to challenge the Defendant or its successor's right to charge Plaintiffs a user fee. Plaintiffs acknowledge that in the event they or any of them challenge a new or revised user fee ordinance, they remain obliged to make all payments required under this Release and Settlement Agreement and all then-existing user fees pending the outcome of their challenge.

14. Commencing July 1, 2010 the rate for tapping fees for Plaintiffs' new connections for any additional EDU's shall be Two Thousand Dollars ($2,000.00) per EDU. This rate is agreed to in consideration of the ownership by Plaintiffs at their premises of certain improvements consisting of collection lines, pumping stations, laterals, force mains and transmission lines and the Plaintiffs' permitting the passage of sewerage through said improvements to the Defendant's sewer system. This tapping fee rate is and shall be based on a capacity part calculation only, and does not and shall not include other calculations or parts. The parties agree that the future tapping fees assessed to Plaintiff shall be subject to changes in the tapping fee as adopted from time to time by the Board

of Supervisors or their successors for tapping fees for connection to the Township sanitary sewer system. Any future changes in the tapping fee as calculated by the Engineer of the Defendant Township or its successor shall include a sub-calculation reflecting a capacity only charge for Plaintiff. Plaintiffs retain their right to challenge any future tapping fee rate, rate setting procedure, ordinance or resolution in accordance with Pennsylvania law regarding the rights of individuals and entities to challenge tapping fees. However, Plaintiffs shall not have the right to challenge the Defendant or its successor's right to charge Plaintiffs a tapping fee. Plaintiffs remain responsible for all construction required to construct lateral connections from any new or improved facility to the sewer system. Plaintiffs acknowledge that in the event they or any of them challenge a new or revised tapping fee ordinance, they remain obliged to make all payments required under this Release and Settlement Agreement and all then-existing tapping fees pending the outcome of their challenge.

15. At the 2011 Organizational Meeting of the Board of Supervisors of the Defendant, the Defendant will establish a Sanitary Sewer Committee which shall advise the Board of Supervisors on matters related to the maintenance and operation of the Sewer Plant and Sewer System. The Committee shall consist of a minimum of five (5) or maximum of seven (7) members at the sole discretion of the Board of Supervisors. In the event the Board of Supervisors elects a five (5) member Committee, Vacation Charters Ltd., or its successors shall have the right but not the obligation to name a maximum of two (2) members to the Committee; if a seven (7) member Committee is created by the Board of Supervisors, Vacation Charters Ltd., or its successors shall have the right but not the obligation to name a maximum of three (3) members. The Defendant anticipates an

adoption of an Ordinance substantially in the form that is attached hereto and marked as Exhibit "A".

16. In the event that the Defendant Township has not substantially initiated required statutory or other regulatory procedures necessary to effect the sale, transfer or conveyance of the Sewer Plant and Sewer System currently maintained by the Defendant by June 30, 2014, the Board of Supervisors of the Defendant shall initiate procedures required by statute or regulation to establish a Sewer Authority. The intent of establishment of said Sewer Authority shall be to accept transfer of assets, obligations, operations and maintenance of the Sewer Plant and the Sewer System from the Township to the Authority. The obligation of Defendant herein is subject to existing laws, statutes, regulations as well as any limitations or restrictions as existing or may be imposed by any borrowing entity holding outstanding indebtedness from the Township by reason of the maintenance and operation of the Sewer Plant or the Sewer System.

17. The parties previously entered into an Asset Purchase Agreement with respect to the sale of the Sewer Plant and other improvements to the Defendant, certain provisions of which survived the sale of the Sewer Plant. This Release and Settlement Agreement supersedes all Asset Purchase Agreements entered into by the parties at any time and the parties agree that all such previously executed Asset Purchase Agreements are now null and void.

18. The parties acknowledge that through the Asset Purchase Agreements, the Defendant purchased from the Plaintiffs and owns:

    a. Land, buildings and improvements situate at adjacent to I-80 and Split Rock Golf Course in the Township of Kidder, Carbon County,

Pennsylvania consisting of 6.41 acres more or less, conveyed in the Deed dated April 30, 2002, recorded in the Office of the Recorder of Deeds in and for the County of Carbon, at Book 1019 Page 442.

b. Fixtures, tangible personal property and equipment as existing on the aforesaid site as of April 30, 2002;

c. Certain Inventory listed below, as previously set out in Exhibit B to the Asset Purchase Agreements:

Physical Inventory of Summit Management and Utilities

Tankage	One – bar screen and 12 inch comminutor
	One – 38,500 gallon scum retention / distribution tank
	Two – 75,000 gallon SBR's
	One – 75,000 gallon sludge holding tank
	One – 75,000 gallon decant equalization tank
	One – 600,000 gallon gpd chemical treatment unit
	One – 600,000 gallon gpd ABW sand filter
	One – 22,130 gallon chlorine contact tank
Compressors	Three – Roots 76 U-RAI 20 hp
	Two – Roots 68 U-RAI 20 hp
	Two – Roots 47 U-RAI 15 hp
	Two – Roots 45 U-RAI 7 hp
	Four – Roots 33 U-RAI 5 hp
Emergency Power	One – Kohler 200KW diesel generator
	One – 800 amp automatic switchgear
Chemical Feed Equipment	Two – 400 gallon day tanks
	Two – W-T44-747 Metering pumps
	Two – W-T two cylinder scales for 150 lb cylinders
	Two – WT V75VA5 v-notch cholrinators

	One – Eagle electronic scale for two one ton cylinders
	One – Spanco 2 ton rolling gantry with one ton cylinder lifting bar
Flow Metering	One - EIT model 7960 ultrasonic flow meter with 7 day recording chart

d. Certain right-of-ways for sewer transmission lines as more particularly described in the Deed dated April 30, 2002, recorded in the Office of the Recorder of Deeds in and for the County of Carbon at Book 1019 Page 443, and in the General Grant of Easement dated June 20, 2002, recorded in the Office of the Recorder of Deeds in and for the County of Carbon at Book 1063 Page 327.

e. Certain transmission lines of existing customers, a list of such transmission lines and existing customers being previously identified as Exhibit "D" to the Asset Purchase Agreement, a copy of which is attached hereto as Exhibit B to this Release and Settlement Agreement.

19. Subject to the rights granted Defendant in the Deed of Easement and General Grant of Easement identified above, the Plaintiffs retain ownership of all collection lines, pumps, pumping stations, laterals and transmission lines located at the premises owned by the Plaintiffs not conveyed to Defendants, including but not limited to the small pumping station and force main servicing Split Rock Lodge.

20. As was previously provided in the Asset Purchase Agreements, and according to the terms set out below, in the event the Plaintiffs wish to continue to utilize effluent for

spray irrigation during the months of May through October of any year, Defendant and its successors and or assigns remain obligated to make available to Plaintiffs treated effluent at the sewer plant. Any pumping required will be at the sole expense of Plaintiffs. Any operating expenses related to pumping will be paid by the Plaintiffs; however, Plaintiffs shall obtain and bear the cost related to obtaining any permits required for such use. All sewage effluent shall be treated to standards required by the Pennsylvania DEP permit and will be made available by Defendant for spray irrigation of the golf courses owned by Vacation Charters, Ltd., or Split Rock Country Club, Inc., and their subsidiaries or any other successors or assigns during the period of time identified above. Any and all additional costs attributable to Plaintiffs' request for treated sewage effluent to be made available by Defendant for spray irrigation for the aforesaid golf courses (e.g., legal, engineering, etc.) shall be paid by Plaintiffs and/or the owners of the golf courses. These costs shall not include costs associated with the distribution of sewage effluent not attributable to spray irrigation of the golf courses.

21. Until April 30, 2012, Defendant and its successors and or assigns shall reserve capacity for Plaintiffs, their successors, subsidiaries or assigns, at the sewage treatment facility as follows:

a. 53 EDUs to Summit Management and Utilities, Inc., and its related companies or their subsidiaries or assigns;

b. One EDU per lot for any lots remaining of the 90 lots at Split Rock Golf Course;

c. 192 EDUs for the remaining Willowbrook Condominium development.

Any reserve capacity not utilized by April 30, 2012, shall no longer be made available

without additional charge or maintained without additional charge and the Defendant or said assignee shall have no further obligation to maintain further reserves for the Plaintiffs or its subsidiaries or related companies.

22. Plaintiffs will pay for any new lateral attachment to existing lines or extensions of existing lines that may be necessary to serve any new development.

23. Plaintiffs' entities hereby represent that they have taken appropriate corporate action to endorse, enter into and be bound by the terms, conditions and provisions of this Release and Settlement Agreement and that the undersigned are fully authorized by the Plaintiffs entities to endorse and execute this Release and Settlement Agreement on behalf of all Plaintiffs herein.

24. Defendant, Township of Kidder, has duly adopted and ratified the terms and conditions of this Release and Settlement Agreement at a regular meeting of the Board of Supervisors of the Township of Kidder held on the 18th day of November, 2010 by a Vote of

5 Yes 0 No 0 Abstained 0 Absent.

Exhibit "A"

ORDINANCE NO.: _____

AN ORDINANCE ADOPTED BY THE BOARD OF SUPERVISORS OF THE TOWNSHIP OF KIDDER ESTABLISHING A SANITARY SEWER ADVISORY COMMITTEE AND ALL DETAILS RELATED THERETO

Section 1. Establishment

A Sanitary Sewer Advisory Committee is hereby established by the Township of Kidder, Carbon County, Pennsylvania.

Section 2. Purpose

The purpose of the Sanitary Sewer Advisory Committee shall be to advise the Board of Supervisors on matters related to and dealing with the operation and maintenance of the Sewer Plant and Sanitary Sewer System currently maintained by the Board of Supervisors of the Township of Kidder.

Section 3. Membership

A. The Sanitary Sewer Advisory Committee shall be composed of five (5) members of the Township of Kidder who shall be appointed by the Board of Supervisors. It is acknowledged that two (2) members of the Committee may be appointed by Vacation Charters Ltd. or its successors. In the event that the said Vacation Charters Ltd. or its successors do not provide written notification of its nominees within thirty (30) days of adoption of this Ordinance or vacancies of such positions hereunder the Board of Supervisors may fill those positions with appointees of their choosing. The remaining three (3) members shall be appointed by the Board of Supervisors.

B. The Board of Supervisors shall fill all vacancies subject to the preceding paragraph.

Section 4. Terms of Office

A. Members of the Sanitary Sewer Advisory Committee (henceforth Committee) shall serve for a term of four (4) years except the initial appointment shall be so staggered that approximately one-fourth (1/4) of the membership shall expire each year and the terms of their successor shall be four years each.

B. Membership of two (2) members shall expire December 31, 2011; one (1) member shall expire December 31, 2012; one (1) member shall expire December 31, 2013 and one (1) member shall expire on December 31, 2014.

C. Members may resign at any time with written notice to the Board of Supervisors. Members whose terms will expire may request reappointment by written request to the Board of

Supervisors at least one month prior to the expiration of their term.

D. Members may be removed by the Board of Supervisors, with or without the recommendation of a majority of the other members, for malfeasance or neglect in the performance of their duties. Failure to attend either three (3) consecutive regularly scheduled meetings or four (4) regularly scheduled meetings during a twelve-month period shall constitute neglect.

E. The Board of Supervisors, subject to Section 3 (A) of this Ordinance, shall appoint successors for members who resign or are removed to serve for the remainder of the term of the member or members.

Section 5. Compensation

Members of the Committee shall receive no compensation for their services, but they may be reimbursed for expenses actually and necessarily incurred by them in the performance of their duties, provided that the expenses have the prior approval of the Board of Supervisors.

Section 6. Powers of the Committee

The Sanitary Sewer Advisory Committee shall have the following powers:

A. To identify potential problems or difficulties and recommend plans and programs to the Board of Supervisors for the operation and maintenance of the Sewer Plant and Sanitary Sewer

System.

B. To make recommendations to the Board of Supervisors of the Township of Kidder.

C. To perform any other duties assigned to it by the Board of Supervisors but not to exercise any powers or perform any duties which by law are conferred or imposed upon a state agency or the Township entity itself.

Section 7. Organization and Meetings

A. The Chairman of the Committee shall be appointed annually by the Board of Supervisors; the Committee may select its own Vice Chair and Secretary.

B. The Committee shall meet at least quarterly and at other times as directed by the Board of Supervisors. Said meetings shall be advertised and open to the public.

C. The Committee shall keep written records of its meetings and activities and shall make an annual report to the Board of Supervisors which shall be made known and available to the public.

Section 8. Appropriations

The Board of Supervisors may appropriate funds for the expenses incurred by the Committee in accordance with an annual budget. Appropriations may be expended for such administrative, clerical, and printing as may from time to time be required and approved by the Board of Supervisors and shall be within the limits of the annual budget.

Section 9. Effective Date

The effective date of this Ordinance shall be the date of adoption as set out herein.

Duly adopted by the Board of Supervisors of the Township of Kidder, County of Carbon and Commonwealth of Pennsylvania at the reorganization meeting of the Board of Supervisors held the _____ day of January, 2011 by a Vote of:

_____ Yes _____ No _____ Abstained _____ Absent.

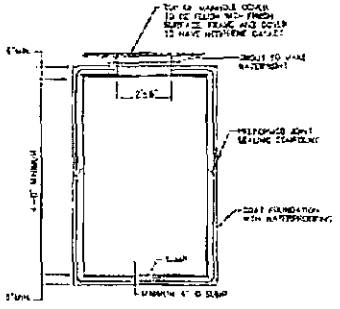
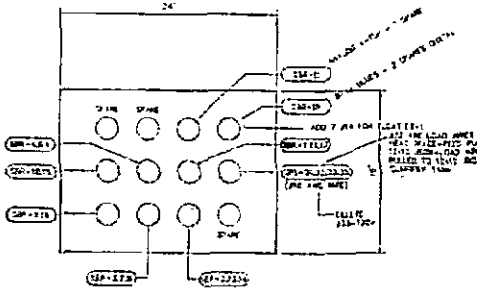
SECTIONAL PLAN



PRECAST HANDHOLE DETAIL

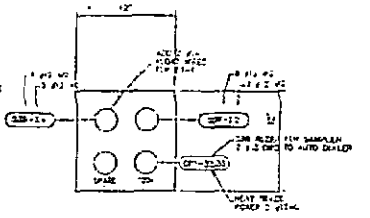
PRECAST HANDHOLE REQUIREMENTS:

1. PRODUCTS
   - A. MANUFACTURER: A.G. MELLER, INC., SANDIGET UTILITY VAULTS, INC., PENN-CAST PRODUCTS OR EQUAL.
   - B. MATERIALS: REINFORCED CONCRETE, 4000 PSI MIN. COMPRESSIVE STRENGTH.
   - C. LOADING: LIVE LOAD TO MEET AASHTO H20 OR H25 PER WHEEL.
   - D. STANDARDS: REINFORCING STEEL: ASTM A615 GRADE 60
   - E. WELDED FABRIC: ASTM A185
   - F. CONCRETE: ASTM C33
   - G. CEMENT: ASTM C150 TYPE I
   - H. CONSTRUCTION: PRECAST SECTIONS OF FLOOR SECTION, INTERMEDIATE SECTIONS IF REQUIRED, AND ROOF SECTION, WITH TONGUE AND GROOVE FIT JOINTS BETWEEN SECTIONS. FACTORY SEAL AT EACH JOINT.
   - I. DUCT ENTRANCES: MOLDED PLASTIC WITH INTEGRAL END BELL AND GASKET FOR DUCT TERMINATION.
   - J. WATERPROOFING: THREE (3) COATS OF APPROVED COMPOUND APPLIED TO ALL EXTERIOR FACES AND FACTORY SEAL AT JOINTS. COMPOUND SHALL BE SPRAY-SEAL 100 OR EQUAL AT LEAST 3 COATS SHALL BE APPLIED GIVING A TOTAL DRY FILM THICKNESS OF A MINIMUM OF 22 MILS.
   - K. MANHOLE COVER AND FRAME: EAST IRON, 30 INCH DIAMETER OPENING FOR HEAVY WEIGHT TRAFFIC, MARKED NON-SKID TOP SURFACE, 6 INCH HIGH FRAME, 4 INCH OPENING, SIZES FOR STANDARD MANHOLE COVER SHALL BE 33.750 AND 8.000 SIZES TO FRAME. FRAME SHALL BE 30.750 AND CENTERED OR CAULKED TO TOP OF MANHOLE.
2. INSTALLATION
   - A. SET BOTTOM SECTION OF MANHOLE ON FLAT BOTTOM EXCAVATION WHICH HAS BEEN LEVELED WITH 6 INCHES OF CRUSHED STONE. SET SUCCEEDING SECTIONS IN PLACE APPLYING APPROVED WATERTIGHT MASTIC IN EVERY BETWEEN SECTIONS. GROUT OUTSIDE OF JOINTS AND ALL SLEEVES THAT ENTER MANHOLE. APPLY TWO (2) COATS OF APPROVED WATERPROOF WASTE SEAL TO ENTIRE INSIDE.
   - B. PROVIDE AT LEAST THREE COURSES OF BRICK BETWEEN ROOF SECTION OF MANHOLE AND FRAME FOR MANHOLE COVER TO ALLOW FOR ADJUSTMENT OF GRADE IF NECESSARY. SET MANHOLE COVER & FRAME ABOVE SURROUNDING GRADE IN MEANS SHOWN IN AASHTO AND SLOPE FULL EXCAVATION 1 FOOT 33 GRADE. BRICK SHALL BE AS SPECIFIED IN SECTION 04400.
   - C. BACKFILL EXCAVATION TAKE CARE TO ACCOMMODATE THE OUTSIDE CONDITIONS OF MANHOLE AND/OR PIPE ENTRY.



DUCTBANK SECTION

3" PVC SCH40, 3" SEPARATION, 3" CONCRETE ENVELOPE. DUCT MINIMUM 24" BELOW FINISHED GRADE



DUCTBANK SECTION

1" PVC SCH40

CONTRACTOR

ELECTRICAL SERVICE NOTES

1. THE FOLLOWING NOTES PROVIDE GENERAL GUIDANCE ON THE CONTRACTORS SCOPE OF WORK IN THE ELECTRICAL SERVICE ENTRANCE, BUT DOES NOT LIMIT THE CONTRACTOR'S RESPONSIBILITY TO PROVIDE AND INSTALL ALL EQUIPMENT REQUIRED BY THE POWER UTILITY, REFER TO RULES FOR ELECTRICAL METER AND SERVICE INSTALLATIONS, PENNSYLVANIA POWER AND LIGHT CO.

2. CONTACT PPL AND PROVIDE THEM AN APPLICATION FOR 120/240 VOLT SINGLE PHASE SERVICE. PROVIDE PPL WITH SITE PLANS AND SINGLE LINE DIAGRAM. SEE DRAWING E04 FOR SITE PLAN AND LOCATION.

EXCAVATION AND BACKFILLING

1. PROVIDE ALL TRENCHING AND BACKFILLING. THE TRENCH IS TO MAINTAIN A MINIMUM 24" SEPARATION WITH THE WATER LINE. ELECTRIC LINES AND WATER LINE SHALL BE IN SEPARATE TRENCHES.

2. PROVIDE TRANSFORMER PAD AND EXCAVATION AND BACKFILLING.

3. PROVIDE 2" PVC SCHEDULE 40 ELECTRICAL GRADE CONDUIT AND WIRE FROM SERVICE RECEIVING POLE TO METER BASE. BURY CONDUIT A MINIMUM OF 24" BELOW FINISHED GRADE.

4. PROVIDE AND INSTALL UTILITY APPROVED METER BASE.

5. PROVIDE WEATHERHEAD ON SERVICE RECEIVING POLE AND A GUY ATTACHMENT AS REQUIRED.

POWER COMPANY INTERCONNECTION

1. PROVIDE AND INSTALL SERVICE LATERAL CONDUCTORS FROM TRANSFORMER SECONDARIES TO SERVICE RECEIVING POLE.

2. PROVIDE AND INSTALL METER.

SANITARY SEWERS

CONTRACT No. 3

9/28/02
OK (MR)
(2 Kidder copy-dr

GENERAL NOTES:

1. SEWERS IN NON-ROAD AREAS ARE TO BE LOCATED WITH EASEMENTS AS SHOWN ON CONSTRUCTION SHEETS TO BE USED FOR EXACT ANGLES AND DISTANCES.
2. CONFINE ALL WORK TO WITHIN ROAD R/W WHERE SEWERS ARE PLANNED IN WITH LOCATIONS.
3. NOT ALL TREES ARE SHOWN. TREES MAY BE EFFECTED IN THE CONSTRUCTION AREA WHICH ARE NOT SHOWN ON THE DRAWINGS. IT IS THE CONTRACTOR'S RESPONSIBILITY TO REMOVE TREES LOCATED IN THE WAY OF NEW CONSTRUCTION AS DETAILED BY THE SPECIFICATIONS.
4. PHOTOGRAMMETRIC MAP MAPPING FOR THIS PROJECT WAS PREPARED BY THE EARL GEORGE, ALLGEIER, INC. FROM AERIAL PHOTOGRAPHY TAKEN ON APRIL 11, 2001. SURFACE CONTROL AND SUPPLEMENTAL ROAD TOPOGRAPHY WERE PERFORMED BY MICHAEL D. GIOVANELLI ASSOCIATES INC., DETAILING TO DETECTION GAS AND NOW WITH 2001 REVISIONS WERE BASED ON NOVEMBER 1999 AND COMPLETED AND BASED ON MAY 1987.
5. ROAD RIGHTS-OF-WAY AND PROPERTY LINES WERE TAKEN FROM DEEDS, TAX MAPS, SUBDIVISION PLANS AND ACTUAL FIELD SURVEYS PREPARED BY HANOVER ENGINEERING ASSOCIATES INC.
6. THE SANITARY SEWER SYSTEM WAS DESIGN OF FIRST FLOOR SEWAGE LATERAL DRAINS OUT ON THE FRONT OF THE HOUSE AND ON THE LOW SIDE OF THE PROPERTY.
7. GRINDER PUMPS SHALL BE PROVIDED FOR ALL DWELLINGS INCLUDING THE LOW PRESSURE SEWERS SHOWN ON THE DRAWINGS. SEE SPECIFICATIONS FOR GRINDER PUMP LIST.
8. PROVIDE GRINDER PUMPS FOR DWELLINGS LABELED (GP) THAT CONNECT TO NEW GRAVITY SEWER MAIN.
9. DUE TO THE STEEP GRADES OF THE ROADS/SEWER, THE LATERALS SHOULD BE PLACED ON THE DOWN SLOPE SIDE OF THE PROPERTY, OTHERWISE A GRINDER PUMP MAY BE REQUIRED.
10. LOCATION OF EXISTING UTILITIES SHOWN ON THESE PLANS ARE NOT NECESSARILY COMPLETE. THE CONTRACTOR SHALL NOTIFY ALL UTILITY COMPANIES OPERATING WITHIN THE CONSTRUCTION AREA AND VERIFY THE LOCATION, SIZE, TYPE AND ELEVATIONS OF ANY UTILITIES PRIOR TO CONSTRUCTION.
11. ALL GRAVITY LATERALS SHALL BE 6" PVC, SDR 35 AND FORCEMAIN LATERALS SHALL BE 1" PVC, SDR 21.
12. CONTRACTOR SHALL BE AWARE THAT EXISTING SOLID WASTE MAY BE PRESENT IN SOME OF THE ROADS IN THIS PROJECT. THESE WASTE MAPS HAVE NOT IDENTIFIED IN THE PA DEP FILES.
13. SANITARY SEWER SHALL BE CONSTRUCTED WITHIN A 30 FOOT RADIUS OF A PRIVATE/INDUSTRIAL WELL AND 100 FOOT RADIUS OF A PUBLIC WELL.
14. THE FOLLOWING ROADS ARE THE SMALL ROAD THRU OUT CONTRACT 3 AND 4: LEMBERT SUMMIT, LINDEMUTH DRIVE AND EISENHUT, DAMMERICH AND R.O.W.

LEGEND

- 3" — LOW PRESSURE SEWER (SIZE & SIZE)

CONTRACT No. 4

GENERAL NOTES

1. DETAILS IN SPECIFICATIONS APPLY TO THIS PROJECT AND SHOULD BE USED AS PART OF CONSTRUCTION. REFER TO SPECIFIED ITEMS FOR EXACT WIDTH AND DIMENSIONS.
2. CONTRACTOR SHALL RESTORE ALL WORK TO AT LEAST EQUAL CONDITION AS EXISTED PRIOR TO CONSTRUCTION.
3. NOT ALL TREES AND BRUSH WITHIN RIGHT-OF-WAYS IN THE CONSTRUCTION AREA MAY BE SHOWN ON THE DRAWINGS. IT IS THE CONTRACTOR'S RESPONSIBILITY TO REMOVE TREES LOCATED IN THE RIGHT-OF-WAY IN CONSTRUCTION AS DETAILED IN THE SPECIFICATIONS.
4. MANUFACTURER'S SHOP DRAWINGS FOR ITEMS INDICATED AND PREPARED BY THE CONTRACTOR AS SHOWN UPON THE CONSTRUCTION PLANS OR WHERE SPECIFIED IN THE SPECIFICATIONS, SHALL BE SUBMITTED TO THE ENGINEER FOR REVIEW AND APPROVAL BEFORE ANY MATERIALS ARE PURCHASED OR FABRICATED. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL DIMENSIONS, QUANTITIES AND CONSTRUCTION TECHNIQUES. NO WORK SHALL BE DONE WITHOUT APPROVED SHOP DRAWINGS ON HAND.
5. ROAD ROUTE NUMBERS AND PROPERTY LINES ALONG WITH EXISTING STREETS, RAILROADS, SUBDIVISION PLANS AND NEARBY BUILDINGS SHOWN ON THE PLANS WERE OBTAINED BY MANUAL EXPEDITED PHOTOGRAPHY, INC.
6. THE SANITARY SEWER SYSTEM WAS LAYED OUT BY FAST FLOW SERVICE, LOCATED APPROXIMATELY IN THE CENTER OF THE STREET AND ON THE LOW SIDE OF THE DEVELOPMENT.
7. ENGINEER SHALL BE INVOLVED IN ALL DISCUSSIONS CONCERNING THE LOW PRESSURE SEWERS SHOWN ON THE DRAWINGS, AND SPECIFICATIONS FOR GRINDER PUMP UNITS.
8. PROVIDE GRINDER PUMPS FOR DWELLINGS LABELED (GP) THAT CONNECT TO NEW GRAVITY SEWER MAIN.
9. SEE THE SHEET INDEX OF THE PLANS AND SPECIFICATIONS. THE EXISTING HOUSE IS PLACED ON THE DOWN SLOPE SIDE OF THE PROPERTY. OTHERWISE A GRINDER PUMP MAY BE REQUIRED.
10. LOCATION OF ELECTRIC UTILITIES SHOWN ON THESE PLANS ARE NOT NECESSARILY COMPLETE THE CONTRACTOR SHALL NOTIFY ALL UTILITY COMPANIES OPERATING WITHIN THE CONSTRUCTION AREA AND VERIFY THE LOCATION, SIZE, TYPE AND ELEVATION OF ALL UTILITIES PRIOR TO CONSTRUCTION.
11. ALL GRAVITY SEWERS SHALL BE (8" PVC, SDR 35) AND PRESSURE SEWERS SHALL BE (1.5" HDPE, SDR 11).
12. CONTRACTOR SHALL BE AWARE THAT EXISTING WATER MAINS MAY BE PRESENT IN SOME OF THE AREAS IN THIS DEVELOPMENT THAT WATER MAINS WERE NOT IDENTIFIED BY THE PA ONE CALL.
13. SANITARY SEWER SHALL BE CONSTRUCTED A MINIMUM OF A 50 FOOT RADIUS OF A PRIVATE/NON-DOMESTIC WELL AND 100 FOOT RADIUS OF A PUBLIC WELL.

LEGEND

- LOW PRESSURE SEWER LINE & SIZE
- NEW GRAVITY SANITARY SEWER (SSL) AND MANHOLE
- EXIST. SANITARY SEWER AND MANHOLE

AQUA PENNSYLVANIA, INC. &
AQUA PENNSYLVANIA WASTEWATER, INC.

DOCKET NO. R-2024-3047822 & R-2024-3047824

SCH USA, LLC

SET I INTERROGATORIES

SCH-I-1 Does Aqua bill any wastewater customer(s) in its service territory based on actual usage obtained from wastewater meters? If so, for each such customer, please identify:

a. The type of customer (residential, commercial, industrial, etc.);

b. The customer's rate zone as established in Aqua's wastewater tariff; and

c. Whether the wastewater meter(s) was/were installed at Aqua's expense, the customer's expense, or a combination thereof.

d. For any customer identified in parts (a)-(c) above, provide their average wastewater usage.

e. For any average usage provided in (d) above, is that average greater or less than an EDU proxy for flow figures for that customer as identified in 25 Pa. Code § 73.17?

RESPONSE

a. through c. The Company has two commercial customers, one in Rate Zone 2 and one in Rate Zone 11 that are billed based on metered wastewater flows. The wastewater meters and associated infrastructure necessary for reading wastewater flows and billing was installed and in operation prior to the acquisition of each of the systems by Aqua PA. These customers were grandfathered in upon acquisition of these systems and Aqua PA adopted the billing structure, in place at the time of acquisition, which included either a meter size or EDU charge in addition to a volumetric charge.

d. through e. The customer in Rate Zone 2 had an average monthly flow of approximately 1,059,700 gallons for the HTY ending December 31, 2023. The

customer in Rate Zone 11 had an average monthly flow of approximately 150,800 gallons for the HTY ending December 31, 2023. The EDU proxy for flow figures for customers as identified in 25 Pa. Code § 73.17 is for design purposes and as noted in the response above, the 2 customers identified are billed using both a base charge and a volumetric charge, not solely an EDU charge, therefore the analysis requested cannot be completed as requested.

SCH USA, LLC

SET I INTERROGATORIES

SCH-I-2 Does Aqua bill any wastewater customer(s) in its service territory based on actual usage obtained from water meters, where water is provided by a well or by an entity other than a utility, municipality, or municipal authority? If so, for each such customer, please identify:

a. The type of customer (residential, commercial, industrial, etc.);
b. The customer's rate zone as established in Aqua's wastewater tariff; and
c. Whether the water meter(s) was/were installed at Aqua's expense, the customer's expense, the water provider's expense, or some combination thereof.

RESPONSE

a. The Company has limited wastewater customers who are billed based on water meter reads where the water is provided by a well. When the Company acquired the systems referenced below, the company adopted the existing rates structure and method in which these customers were billed.

b. and c. Rate Zone 7 (Limerick) – 53 Commercial accounts with customer installed meters.
Rate Zone 11 (New Garden) = 73 Residential accounts with customer installed meters at the time of acquisition, which were updated to read via radio frequency at Aqua's expense.
Rate Zone 11 (New Garden) = 24 Commercial accounts with customer installed meters at the time of acquisition, which were updated to read via radio frequency at Aqua's expense.
Rate Zone 4 – (Blakeslee) 66 Commercial accounts that at the time of acquisition, had meters that were installed by Tobyhanna Township, but have since been replaced by the Company.

SCH USA, LLC

SET I INTERROGATORIES

SCH-I-9 If the basis provided for No. 8 includes any document outside of Aqua's existing wastewater tariff, produce such documents.

RESPONSE

Please refer to the Company's compliance tariff, attached as SCH-I-9 Attachment 1, which was filed at Docket No. A-2012-2298067 as part of the Company's Kidder Township acquisition. The EDUs for the premises which SCH USA currently own are listed out on Page 6 of the attachment. SCH USA has replaced Vacation Charters as the owner of Willowbrook at Lake Harmony, The Galleria and the Water Park, and Remaining Uses (Lodge). SCH USA currently also owns a Laundromat, which is not specifically broken out in the compliance tariff and that is billed at 4 EDU's as mentioned in the Company's response to SCH-I-7.

The EDUs that are stipulated in the Company's Compliance tariff were taken from the Settlement Agreement entered into between the Township of Kidder and Vacation Charters Ltd., Split Rock Country Club, Inc., and Summit Management & Utilities, Inc. As reflected in the Compliance Tariff, Willowbrook at Lake Harmony would be billed 128 EDUs; the Galleria and the Water Park would be billed 145 EDUs; remaining uses (Lodge) would be billed 53 EDUs. SCH USA did not acquire all the assets previously owned by Vacation Charters Ltd., Split Rock Country Club, Inc., and Summit Management & Utilities, Inc. set forth in the settlement agreement. SCH only acquired the assets related to 330 EDUs. The remaining 110 EDUs that were transferred to Aqua PA are billed to another customer.

Please refer to SCH-I-9 Attachment 2 for a copy of this agreement.

OFFICE OF CONSUMER ADVOCATE

SET XVII INTERROGATORIES

OCA-XVII-10 Please identify Aqua's plans with respect to obtaining metered water usage data for currently unmetered wastewater customers, including customers in Rate Zone 4, Little Washington Service Territory, Honeycroft Village, Londonderry Township, Chester County.

RESPONSE

For wastewater customers, Aqua PA bills on actual meter readings for systems that have access to and utilize metered public water from a municipality or a private utility regulated by the PUC. The Company does not have plans at this time to install company-owned water meters on privately-owned water wells for systems that are currently unmetered.

Witness: Todd Duerr
Date: 8/12/2024

AQUA PENNSYLVANIA, INC. &
AQUA PENNSYLVANIA WASTEWATER, INC.

DOCKET NO. R-2024-3047822 & R-2024-3047824

JOHN DAY

SET IV INTERROGATORIES

DAY-IV-3 Referring to Duerr response to Day II-1, showing that Aqua uses RF technology to meter 100% of its wastewater customers in Rate Zone 4 where Aqua owns the water and wastewater system.
What research has the Company performed into utilities across the United States that use RF technology or advanced metering infrastructure (AMI) to meter homes with private wells?

RESPONSE

As clarification, Aqua uses RF technology to read water meters in Rate Zone 4 where they exist.

Aqua has not performed research into utilities across the United States that use RF technology or advanced metering infrastructure (AMI) to meter homes with private wells. Water meter reading technology for meters on private wells will be functionally similar to water meters on a public water system. That said, there are inherent complications with metering private wells as compared to standard residential water supply, for example, approved rate structure, ownership, initial installation responsibility and cost, access for repair and replacement, shut-off procedure for delinquency or non-compliance, etc.

VERIFICATION

I, Frank P. Lacey, hereby state that: (1) I am the founding principal of Electric Advisors Consulting, LLC; (2) the facts set forth in my testimony are true and correct (or are true and correct to the best of my knowledge, information and belief); and, (3) I expect to be able to prove the same at a hearing held in this matter. I understand that the statements herein are made subject to the penalties of 18 Pa. C.S. § 4904 (relating to unsworn falsification to authorities).

SURREBUTTAL TESTIMONY

OF

RONALD CARRIER

On Behalf of

SCH USA, LLC

Topics Addressed:

Wastewater Measurement and Billing

September 26, 2024

I. INTRODUCTION AND BACKGROUND

Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A. My name is Ronald Carrier. My business address is 2316 Anchor Court, Holt, MI 48842.

Q. HAVE YOU PREVIOUSLY PROVIDED TESTIMONY IN THIS PROCEEDING?

A. Yes, I provided Direct Testimony on August 16, 2024 on behalf of SCH USA, LLC (SCH USA St. No. 2).

Q. WHAT TOPICS DID YOU ADDRESS IN YOUR DIRECT TESTIMONY?

A. In my Direct Testimony, I explained how Equivalent Dwelling Units ("EDUs") are used by Aqua Pennsylvania Wastewater, Inc. ("Aqua") to bill for wastewater services, and showed that there are more accurate means to measure actual wastewater flow for billing purposes.

Q. WHAT IS THE PURPOSE OF YOUR SURREBUTTAL TESTIMONY?

A. The purpose of my Surrebuttal Testimony is to respond to certain points made in the Rebuttal Testimony of Aqua witness Todd M. Duerr (Aqua St. No. 11-R).

Q. IN GENERAL, HAS ANYTHING IN AQUA'S REBUTTAL TESTIMONY CHANGED YOUR POSITION AS STATED IN YOUR DIRECT TESTIMONY?

A. No.

II. RESPONSE TO AQUA WITNESS DUERR

Q. AQUA WITNESS DUERR STATES IN HIS REBUTTAL TESTIMONY THAT TWO METERING TECHNOLOGIES, ULTRASONIC AND ELECTROMAGNETIC, ARE USED IN "FULL PIPE, PRESSURIZED FLOW"[1] APPLICATIONS. IS THIS STATEMENT TRUE?

A. Yes, both ultrasonic and electromagnetic flow meters can be used in full pipe, pressurized flow applications.

Q. WITNESS DUERR ALSO STATES THAT NEITHER OF THESE TECHNOLOGIES CAN BE USED IN SCH USA'S SYSTEM AS IT IS MAINLY A

[1] Aqua St. No. 11-R at 7.

GRAVITY SYSTEM AND NOT A FULL PIPE, PRESSURIZED FLOW SYSTEM. IS THIS STATEMENT ACCURATE?

A. No. There are several manufacturers that offer electromagnetic flow meters for use in non-pressurized, partially filled pipes for the use in measuring municipal wastewater.

Q. DO ULTRASONIC FLOW METERS REQUIRE THE PIPE TO BE FULL?

A. Yes.

Q. DOES THIS MEAN THAT AN ULTRASONIC FLOW METER CANNOT BE USED ON A GRAVITY FLOW SYSTEM?

A. Not necessarily. In some applications, it is possible to configure the sewer line to create a section of pipe that dips below the lowest part of the sewer line and then reconnect to the downstream section of the sewer line. This u-shaped section of pipe will remain full allowing the ultrasonic meter to measure the full pipe flow.

Q. AQUA WITNESS DUERR CONTENDS THAT CUSTOMER OWNED WATER METERS CANNOT BE UTILIZED AS AQUA CANNOT BE CONFIDENT THAT METERS WILL BE IN PLACE. DO YOU AGREE?

A. No. SCH USA would allow Aqua to verify installation of any water meters.

Q. MR. DUERR ALSO CONTENDS THAT METERS PLACED ON CUSTOMER-OWNED WATER FACILITIES MAY NOT BE MAINTAINED, IMPACTING THEIR ACCURACY. DO YOU AGREE WITH THIS ASSESSMENT?

A. No. It would be reasonable for the Commission to require that any customer-owned meter be tested for accuracy before installation. It would also be reasonable to require periodic re-testing of the meter to ensure that the meter is measuring accurately.

III. <u>CONCLUSION</u>

Q. DOES THIS COMPLETE YOUR SURREBUTTAL TESTIMONY?

A. Yes.

VERIFICATION

I, Ronald Carrier, hereby state that: (1) I am the founding principal of Big Lake Consulting Group, LLC; (2) the facts set forth in my testimony are true and correct (or are true and correct to the best of my knowledge, information and belief); and, (3) I expect to be able to prove the same at a hearing held in this matter. I understand that the statements herein are made subject to the penalties of 18 Pa. C.S. § 4904 (relating to unsworn falsification to authorities).

SURREBUTTAL TESTIMONY

OF

FRANK LACEY

On Behalf of

SCH USA, LLC

Topics Addressed:

Reasonableness of Aqua's Wastewater Billing Method

September 26, 2024

I. INTRODUCTION AND BACKGROUND

Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A. My name is Frank Lacey. My business address is 3 Traylor Drive, West Chester, PA 19382.

Q. HAVE YOU PREVIOUSLY PROVIDED TESTIMONY IN THIS PROCEEDING?

A. Yes, I provided Direct Testimony on August 16, 2024 on behalf of SCH USA, LLC (SCH USA St. No. 3).

Q. WHAT TOPICS DID YOU ADDRESS IN YOUR DIRECT TESTIMONY?

A. In my Direct Testimony I provided testimony showing that Aqua's proposed wastewater tariff, including changes to the definition of Equivalent Dwelling Unit ("EDU"), will result in unjust and unreasonable rates as they apply to currently unmetered wastewater customers, such as SCH USA. I also discussed how Aqua's continued unwillingness to facilitate metering of either well water inflows or wastewater outflows results in the inefficient use of resources and inaccurate billing for SCH USA as an unmetered wastewater customer.

Q. WHAT IS THE PURPOSE OF YOUR SURREBUTTAL TESTIMONY?

A. The purpose of my Surrebuttal Testimony is to respond to certain points made in the Rebuttal Testimonies of Aqua witnesses Christopher Manning (Aqua St. No. 3-R), Gregory Herbert (Aqua St. No. 10-R), and Todd Duerr (Aqua St. No. 11-R).

Q. IN GENERAL, HAS ANYTHING IN AQUA'S REBUTTAL TESTIMONY CHANGES YOUR POSITION AS STATED IN YOUR DIRECT TESTIMONY?

A. No. The prevailing theme of Aqua's Rebuttal Testimony regarding flat rate billing for the currently unmetered wastewater service to SCH USA is "we've always done it that way." That is not a compelling argument on any level.

II. RESPONSE TO AQUA WITNESS MANNING

Q. HOW DOES AQUA WITNESS MANNING JUSTIFY BILLING SCH USA BASED ON EDUS DETERMINED IN A 2010 SETTLEMENT AGREEMENT, TO WHICH NEITHER AQUA NOR SCH USA WAS A PARTY?

A. Mr. Manning states that it "is commonplace with any acquisition, [that] the number of EDUs, or billing determinants, associated with a customer remain consistent with what the system's previous owner had been charging."[1]

Q. HOW DO YOU RESPOND TO MR. MANNING'S POSITION?

A. His statement is unpersuasive. First, we are beyond the period of time where Aqua is just "adopting" what the prior owner had done. Additionally, keeping the same cost structure implemented in 2010 implies that nothing has changed since then in the service territory – no new homes, no new businesses, no efficiencies, no incremental wastewater consumption, etc. In other words, the ratio of wastewater costs that was allocated to the owner of the Split Rock resort 14 years ago is the same ratio of wastewater costs that the resort is responsible for today.

Q. WHAT OTHER BASIS DOES MR. MANNING PROVIDE FOR MAINTAINING THE NUMBER OF EDUS BILLED TO SCH USA?

A. Mr. Manning argues that the Commission reviewed the number of EDUs billed to SCH USA in each of its last two rate proceedings. I have reviewed those proceedings and already commented on them. The Commission did not expressly approve an allocation of costs or EDUs to SCH USA in those proceedings.

[1] Aqua St. No. 3-R at

Q. HOW DOES MR. MANNING RESPOND TO SCH USA'S POSITION THAT THE CURRENT FLAT RATE DOES NOT REFLECT VARYING OCCUPANCY AT THE RESORT?

A. Mr. Manning argues that "Factoring in occupancy rate for an unmetered customer is impossible as the customers' usage is not tracked. SCH USA is an unmetered customer that only asserts that their occupancy rates impact the amount of wastewater they are producing. SCH USA provides no auditable, numerical data pertaining to its water and wastewater usage, but claims that their actual wastewater usage is much lower than what is being billed by Aqua. SCH USA has offered no substantiation or validation of this claim."[2] By their own logic, Aqua should not be able to bill SCH USA for any wastewater disposal because it is unmetered and Aqua has offered no substantiation or validation of the amounts it is charging.

Mr. Manning further argues "The Company is required to handle the maximum amount of flow that could come from this customer. EDUs are not a variable number and do not ebb and flow with each and every customer's usage at their premise."[3] In other words, Aqua is charging SCH USA for the maximum amount of flow that could come from the property and their rates have nothing to do with actual services rendered. This type of assessment is unfair to customers with variable wastewater needs. Worse yet, it creates tremendous disincentives to any type of water or wastewater conservation or efficiencies.

Q. ARE THE TESTIMONIES OF AQUA'S WITNESSES CONSISTENT ON WHETHER THE COMPANY IS CHARGING SCH USA ASSUMING FULL OCCUPANCY?

A. No, it appears not. In the context of Mr. Manning's statement that Aqua must handle the maximum amount of flow that could come from SCH USA, I am somewhat confused by the statement from Aqua Witness Herbert that Aqua does not charge SCH USA based on full occupancy. I am not sure how billing for the "maximum amount of flow" is different from billing based on full occupancy. Does Aqua expect maximum flow to occur at a time other than full occupancy? Would billing based on full occupancy result in a bill that is greater than the maximum amount of flow that could come from the facility? Aqua's positions are inconsistent and do not provide a basis for continuing to bill SCH USA based on an inaccurate flat rate.

Q. MR. MANNING CLAIMS THAT AQUA'S 2021 RATE CASE ALREADY ADDRESSED FLAT RATE BILLING FOR UNMETERED WASTEWATER CUSTOMERS. HOW DO YOU RESPOND?

A. Mr. Manning cites Administrative Law Judge Joel H. Cheskis from the 2021 rate proceeding addressing Mr. Day's complaint. SCH USA's situation is different from Mr. Day's in that case. SCH USA is not asking for relief because the wastewater consumption at the Split Rock resort is variable. Rather, SCH USA is asking to be charged volumetrically for its exact impact on the wastewater system. The solution to SCH USA's concerns could be a rate tied to occupancy. It could be a metered rate on either water consumption or wastewater flow. It is not SCH USA who is seeking special treatment. It is Aqua who refuses to provide a metered option to SCH USA when they provide that option to other customers.

III. RESPONSE TO AQUA WITNESSES HERBERT AND DUERR

Q. WHAT IS MR. HERBERT'S POSITION REGARDING AQUA'S ABILITY TO CHANGE THE LEVEL OF EDUS CHARGED TO SCH USA?

A. Mr. Herbert stated that Aqua cannot change the level of EDUs charged to a customer because the Commission "sets and approves the rates, rate structures and billing determinants charged to its customers."[4] This is true, but the Commission does not dictate the number of billing units charged to each of a utility's customers.

Q. HOW DO YOU RESPOND TO MR. HERBERT'S ARGUMENT REGARDING AQUA'S ABILITY TO BILL BASED ON METERED PRIVATE WELLS?

A. In response to my statements about Aqua's ability to meter private wells, Mr. Herbert argues that these customers were on metered service before Aqua acquired them and kept the same billing processes in place "similar to how Aqua has maintained the same number of predetermined EDUs to charge its unmetered customers a flat rate in the Township."[5] In other words, if the companies Aqua bought didn't invest in modern technologies and capabilities, then we are stuck in the technological dark ages. In the context of tectonic technological advancements since 2010, when the EDUs were determined and assessed to the Split Rock Resort, Aqua and its predecessor companies have been unable or unwilling to make any technological changes. This is a stunning admission and should be reason alone to reject Aqua's arguments about why they are unwilling to allow metering on the SCH USA wells.

Q. PLEASE RESPOND TO AQUA WITNESS DUERR'S REBUTTAL.

A. Mr. Duerr makes similar arguments. He admits that Aqua has customers who are billed based on meter reads where the water is provided by a private well, but states that "SCH

[4] Aqua St. No. 10-R at 5.
[5] Aqua St. No. 10-R at 8.

USA was not billed [with meters] at the time of acquisition" as support for why they are not able to be billed with meters today.[6] He states that Aqua cannot be confident that private meters, "if they exist, are maintained and accurate."[7] Meter testing for operations and accuracy is a common skillset within regulated utilities. I would presume that since Aqua has a lack of confidence in meters on private wells and has customers with meters on private wells, that it possesses the skills in-house to test the accuracy of those meters. I do not see any reason that they could not test meters on the SCH USA wells.

Q. PLEASE RESPOND TO MR. HERBERT'S ARGUMENTS REGARDING THE COSTS OF SCH USA'S PROPOSALS.

A. Mr. Herbert's statement that "any costs the Company would incur to make these recommended changes to measure usage will increase the revenue requirement, not reduce it, and ultimately increase the rates paid by SCH USA"[8] is unsupported and not credible. I understand that the implementation of technology solution comes at a cost. However, for Mr. Herbert's statement to be true, the technology would have to show that SCH USA is using more water than it is currently being billed for, which according to other statements, is based on the maximum amount of flow of wastewater from the property.

Mr. Herbert also suggests that "individual customer's rates cannot be considered in a vacuum, and if SCH USA's allocated number of EDUs were reduced, it would impact other customers rates in Rate Zone 4."[9] Ironically, that is only true if Aqua is operating in a vacuum. If nothing has changed in Zone 4 since 2021, that would be true.

7 Aqua St. No. 11-R at 7.
8 Aqua St. No. 10-R at 9.
9 Aqua St. No. 10-R at 10.

However, if customers moved in or out, if customers expanded or contracted, if families got bigger or smaller, or if the amount of families or businesses in Zone 4 grew, then a change in one place does not have to change the others. This would be especially true if customers were metered. If customers were metered, changes would be dynamic and customers would never be affected by other customers' changes.

Q. HOW DO YOU RESPOND TO AQUA'S POSITION THAT SCH USA'S EDUS ARE APPROPRIATELY BASED ON THE 2010 SETTLEMENT?

A. Aqua continues to rely on the Settlement to justify its position in this rate proceeding with respect to SCH USA and in the related complaint docket.[10] The reliance on the Settlement is not warranted.

The referenced settlement was adopted by the Kidder Board of Supervisors on November 18, 2010. On March 15, 2012, Little Washington Wastewater Company D/B/A Suburban Wastewater Company ("LWWC") entered into an Asset Purchase Agreement ("APA") with the Township of Kidder to purchase the wastewater system that is currently owned by Aqua. Under this APA, only two paragraphs from that Settlement were transferred from Kidder to LWWC. The APA states: "LWWC shall not assume any rights or obligations of Seller under any contract, agreement, commitment, lease, certificate, permit or other instrument, whether oral, written, express or implied, except with respect to: (i) those agreements, contracts, permits and other instruments listed on Schedule 1.4 attached hereto…."

Schedule 1.4 of the APA states "Seller shall assign to LWWC Seller's right to collect the payments still to be made by the Plaintiff to Kidder Township under paragraphs nine and ten of that certain Release and Settlement Agreement entered by and

[10] *See* Aqua St. No. 3-R at 16-18; Aqua St. No. 10-R at 3; Aqua St. No. 11-R at 4.

between Vacation Charters LTD as Plaintiff and Kidder Township pursuant to the civil action filed in the Court of Common Pleas of Carbon County, Pennsylvania at Docket No. CV-07-4079…." The payments outlined in paragraphs nine and ten of the Settlement were to resolve disputed charges from the wastewater system between 2002 and 2010. These payments and the related paragraphs in the Settlement have no bearing on the calculation of EDUs or the billing of future wastewater flows. The plain language of this APA shows that only the repayment terms of past due amounts were passed to LWWC when they purchased Kidder's wastewater system. The remaining terms of the Settlement are long expired. The EDU estimations from that Settlement have no weight or value. The terms of the Settlement were not conveyed to LWWC, so it is not possible that they were conveyed to Aqua.

III. CONCLUSION

Q. DOES THIS COMPLETE YOUR SURREBUTTAL TESTIMONY?

A. Yes.

VERIFICATION

I, Frank P. Lacey, hereby state that: (1) I am the founding principal of Electric Advisors Consulting, LLC; (2) the facts set forth in my testimony are true and correct (or are true and correct to the best of my knowledge, information and belief); and, (3) I expect to be able to prove the same at a hearing held in this matter. I understand that the statements herein are made subject to the penalties of 18 Pa. C.S. § 4904 (relating to unsworn falsification to authorities).
