Attention: William C. Packer
Vice President, Regulatory Accounting & Regional Controller

Ladies and Gentlemen:

Pursuant to your request, we have determined the annual depreciation accruals applicable to wastewater plant as of December 31, 2023 for the East Whiteland Wastewater Operations. Summaries of the original cost, annual accruals and the book depreciation reserve are presented in Tables 1 and 2, beginning on page I-3 of the attached report.

A description of the methods and procedures upon which the study was based, as well as support for the service life estimates, is set forth in a companion report "2024 Depreciation Study - Calculated Annual Depreciation Accruals Related to Wastewater Plant as of December 31, 2024".

Respectfully submitted,

GANNETT FLEMING VALUATION

DEPRECIATION STUDY

PART I. RESULTS OF STUDY

SUMMARY OF RESULTS

Table 1 summarizes the results of the depreciation study, which sets forth the book reserve and the calculated annual depreciation related to original cost as of December 31, 2023, and the annual amortization of negative salvage for the East Whiteland Wastewater Operations. Table 2 presents the calculation of the amortization of experienced net salvage, by account, based on the five-year period, 2019-2023.

DETAILED TABULATIONS OF DEPRECIATION CALCULATIONS

The supporting data for the depreciation calculations are presented in account sequence in the section beginning on page II-2. The original cost, calculated accrued depreciation, allocated book reserve, future accruals, remaining life and annual accrual are shown for each vintage of each account or subaccount. The amounts of regular retirements, gross salvage, and cost of removal are set forth by account for the years 2019 through 2023, on page III-2.

Attention: William C. Packer
Vice President, Regulatory Accounting & Regional Controller

Ladies and Gentlemen:

Pursuant to your request, we have determined the annual depreciation accruals applicable to wastewater plant as of December 31, 2024 for the East Whiteland Operations. The results of our study as of December 31,2024, are presented in the attached report. The results of our study as of December 31, 2023, are presented in our report, "2023 Depreciation Study - Calculated Annual Depreciation Accruals Related to Wastewater Plant as of December 31, 2023." The same methods, procedures and estimates are used in both studies.

The attached report sets forth a description of the methods and procedures upon which the studies were based, the estimates of survivor curves, and the calculated annual depreciation as of December 31, 2024.

Respectfully submitted,

GANNETT FLEMING VALUATION

PART I. INTRODUCTION

AQUA PENNSYLVANIA, INC.

DEPRECIATION STUDY

PART I. INTRODUCTION

SCOPE

This report sets forth the results of the depreciation study for Aqua Pennsylvania, Inc. to determine the annual depreciation accrual rates and amounts applicable to the original cost of wastewater plant as of December 31, 2024 for the East Whiteland Wastewater Operations. The rates and amounts are based on the straight line remaining life method of depreciation. This report also describes the concepts, methods and judgments which underlie the recommended annual depreciation accrual rates related to wastewater plant in service as of December 31, 2024.

Part I, Introduction, contains statements with respect to the basis of the study and the development of net original cost. Part II, Estimation of Survivor Curves, presents descriptions of the considerations and methods used in the service life study. Part III, Service Life Considerations, presents the results of the average service life analysis. Part IV, Calculation of Annual and Accrued Depreciation, describes the procedures used in the calculation of group depreciation. Part V, Results of Study, presents summaries by depreciable group of annual depreciation accrual rates and amounts, as well as composite remaining lives. Part VI, Service Life Statistics presents the statistical analysis of service life estimates, Part VII, Detailed Depreciation Calculations presents the detailed tabulations of annual depreciation and Part VIII, Experienced and Estimated Net Salvage presents the cost of removal and gross salvage recorded for the period 2020-2024.

BASIS OF THE STUDY

The purpose of the depreciation study was to determine the annual depreciation accruals applicable to the original cost of wastewater plant in service as of December 31, 2024. For most accounts, the straight line remaining life method using attained ages, the book depreciation reserve and estimated survivor curves, was the basis for the calculation of annual depreciation. For certain accounts, the annual and accrued amortization amounts were based on the age of the property and the selected amortization period.

The survivor curve estimates were based on judgment which incorporated (1) analyses of historical data related to wastewater property for all wastewater systems; (2) consideration of the character, use and location of the property; (3) probable future events and management plans; and (4) a general knowledge of wastewater property lives. The use of Iowa type survivor curves is a generally-accepted method of estimating average service life when the actual lives of individual property units are dispersed.

PART II. ESTIMATION OF SURVIVOR CURVES

PART II. ESTIMATION OF SURVIVOR CURVES

The calculation of annual depreciation based on the straight line method requires the estimation of survivor curves and the selection of group depreciation procedures. The estimation of survivor curves is discussed below and the development of net salvage is discussed in later sections of this report.

SURVIVOR CURVES

The use of an average service life for a property group implies that the various units in the group have different lives. Thus, the average life may be obtained by determining the separate lives of each of the units or by constructing a survivor curve by plotting the number of units which survive at successive ages.

The survivor curve graphically depicts the amount of property existing at each age throughout the life of an original group. From the survivor curve, the average life of the group, the remaining life expectancy, the probable life, and the frequency curve can be calculated. In Figure 1, a typical smooth survivor curve and the derived curves are illustrated. The average life is obtained by calculating the area under the survivor curve, from age zero to the maximum age, and dividing this area by the ordinate at age zero. The remaining life expectancy at any age can be calculated by obtaining the area under the curve, from the observation age to the maximum age, and dividing this area by the percent surviving at the observation age. For example, in Figure 1, the remaining life at age 30 is equal to the crosshatched area under the survivor curve divided by 29.5 percent surviving at age 30. The probable life at any age is developed by adding the age and remaining life. If the probable life of the property is calculated for each year of age, the probable life curve shown in the chart can be developed. The frequency curve presents the number of units retired in each age interval. It is derived by obtaining the differences between the amount of property surviving at the beginning and at the end of each interval.

This study has incorporated the use of Iowa curves developed from a retirement rate analysis of historical retirement history. A discussion of the concepts of survivor curves and of the development of survivor curves using the retirement rate method is presented below.

Iowa Type Curves

The range of survivor characteristics usually experienced by utility and industrial properties is encompassed by a system of generalized survivor curves known as the Iowa type curves. There are four families in the Iowa system, labeled in accordance with the location of the modes of the retirements (or the portion of the frequency curve with the highest level of retirements) in relationship to the average life and the relative height of the modes. The left moded curves, presented in Figure 2, are those in which the greatest frequency of retirement occurs to the left of, or prior to, average service life. The symmetrical moded curves, presented in Figure 3, are those in which the greatest frequency of retirement occurs at average service life. The right moded curves, presented in Figure 4, are those in which the greatest frequency occurs to the right of, or after, average service life. The origin moded curves, presented in Figure 5, are those in which the greatest frequency of retirement occurs at the origin, or immediately after age zero. The letter designation of each family of curves (L, S, R or O) represents the location of the mode of the associated frequency curve with respect to the average service life. The numbers represent the relative heights of the modes of the frequency curves within each family. A higher number designates a higher mode curve.

The Iowa curves were developed at the Iowa State College Engineering Experiment Station through an extensive process of observation and classification of the ages at which industrial property had been retired. A report of the study which resulted in the classification of property survivor characteristics into 18 type curves, which constitute three of the four families, was published in 1935 in the form of the Experiment Station's Bulletin 125.

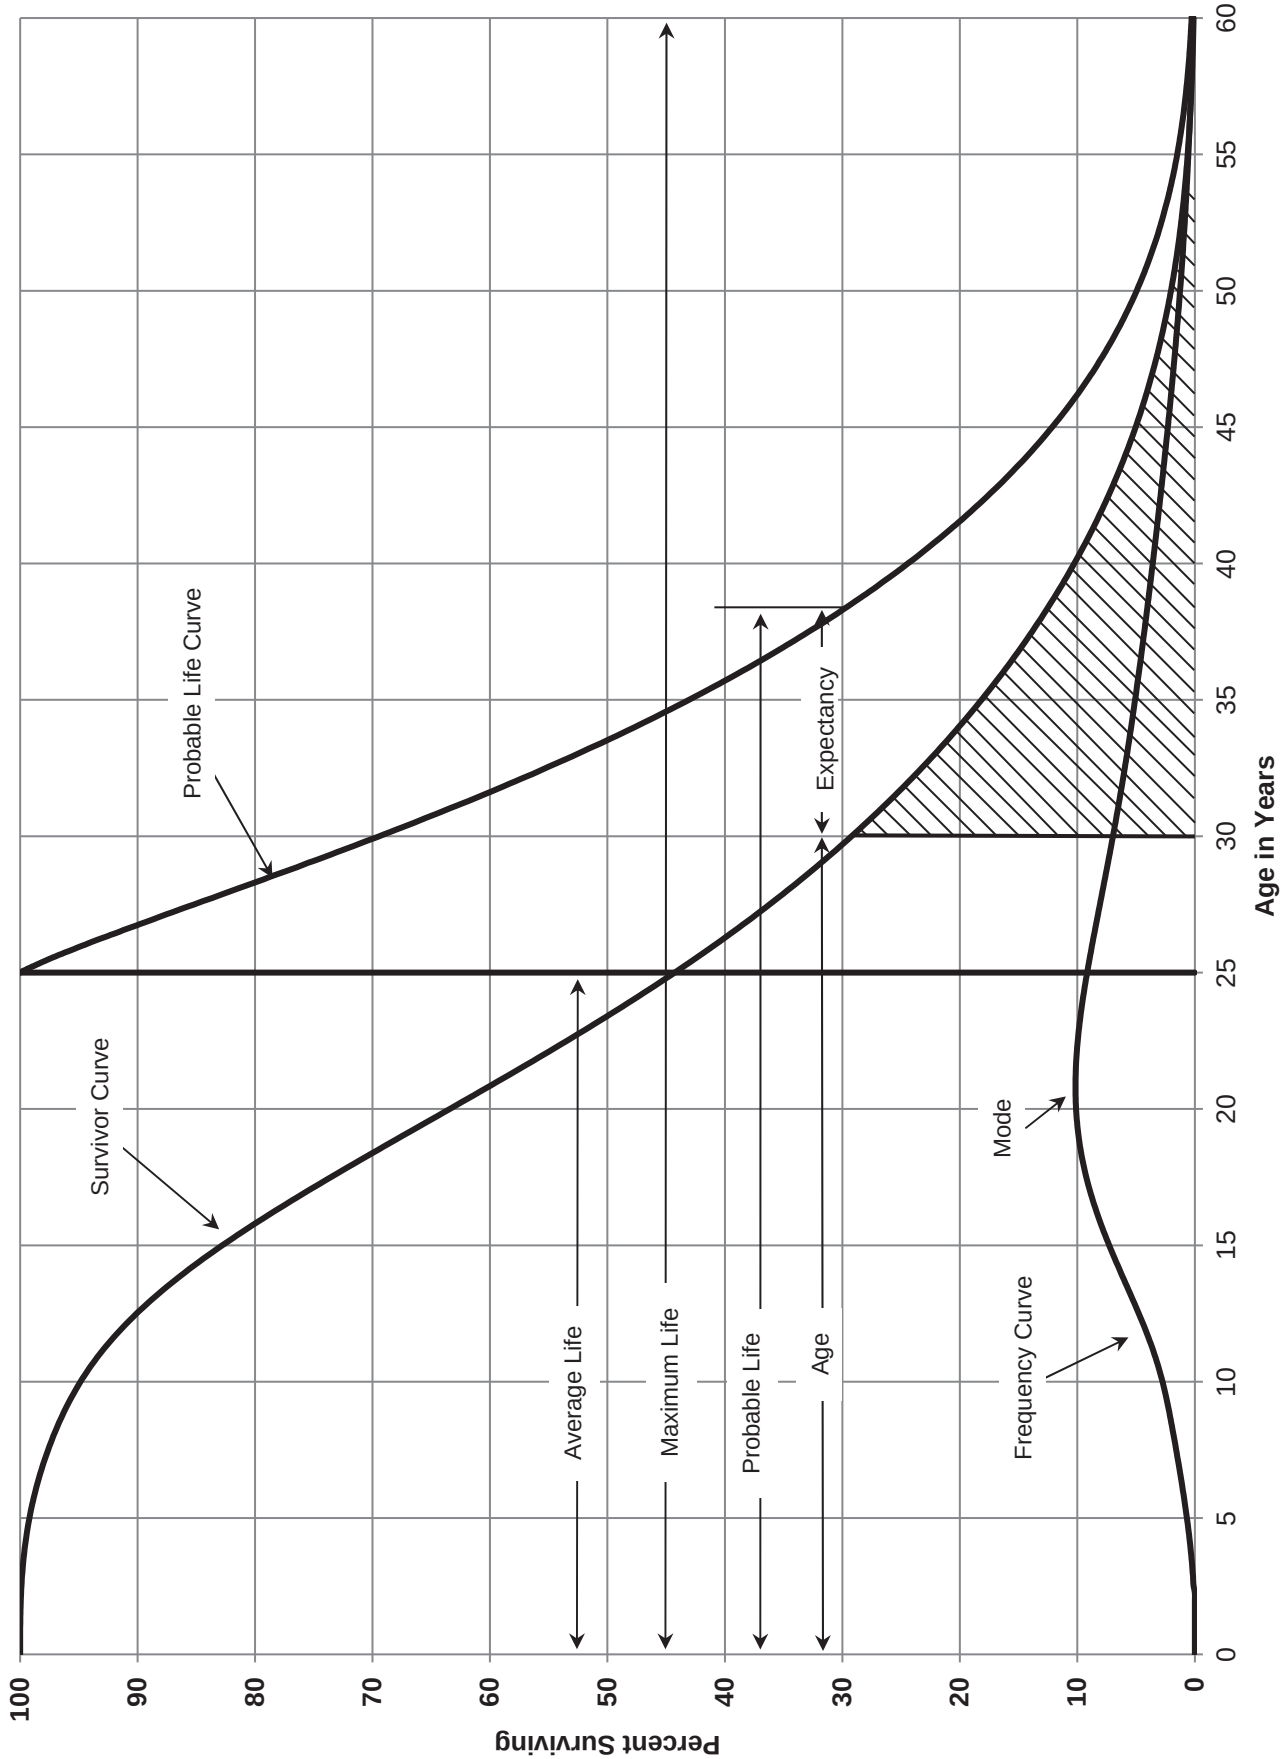

FIGURE 1. TYPICAL SURVIVOR CURVE AND DERIVED CURVES

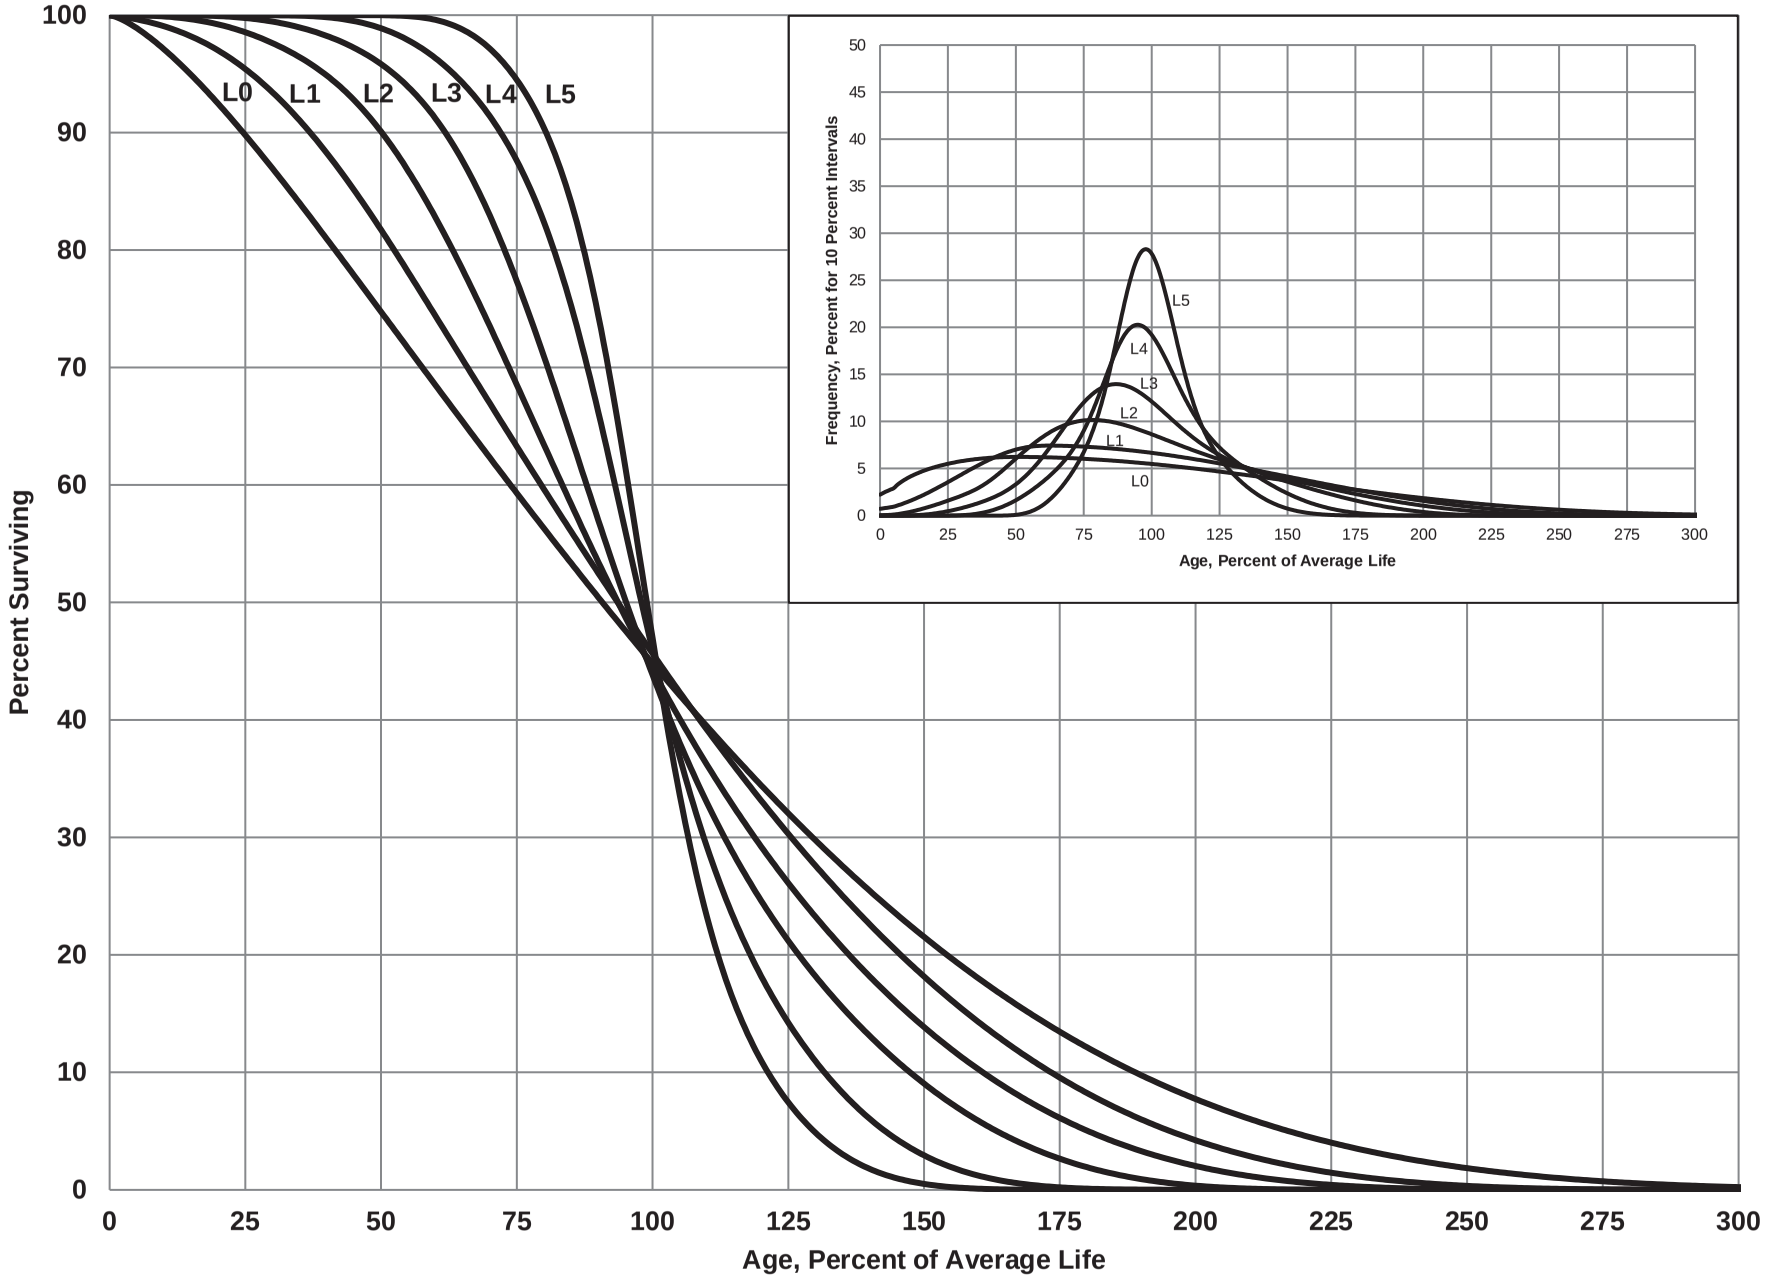

FIGURE 2. LEFT MODAL OR "L" IOWA TYPE SURVIVOR CURVES

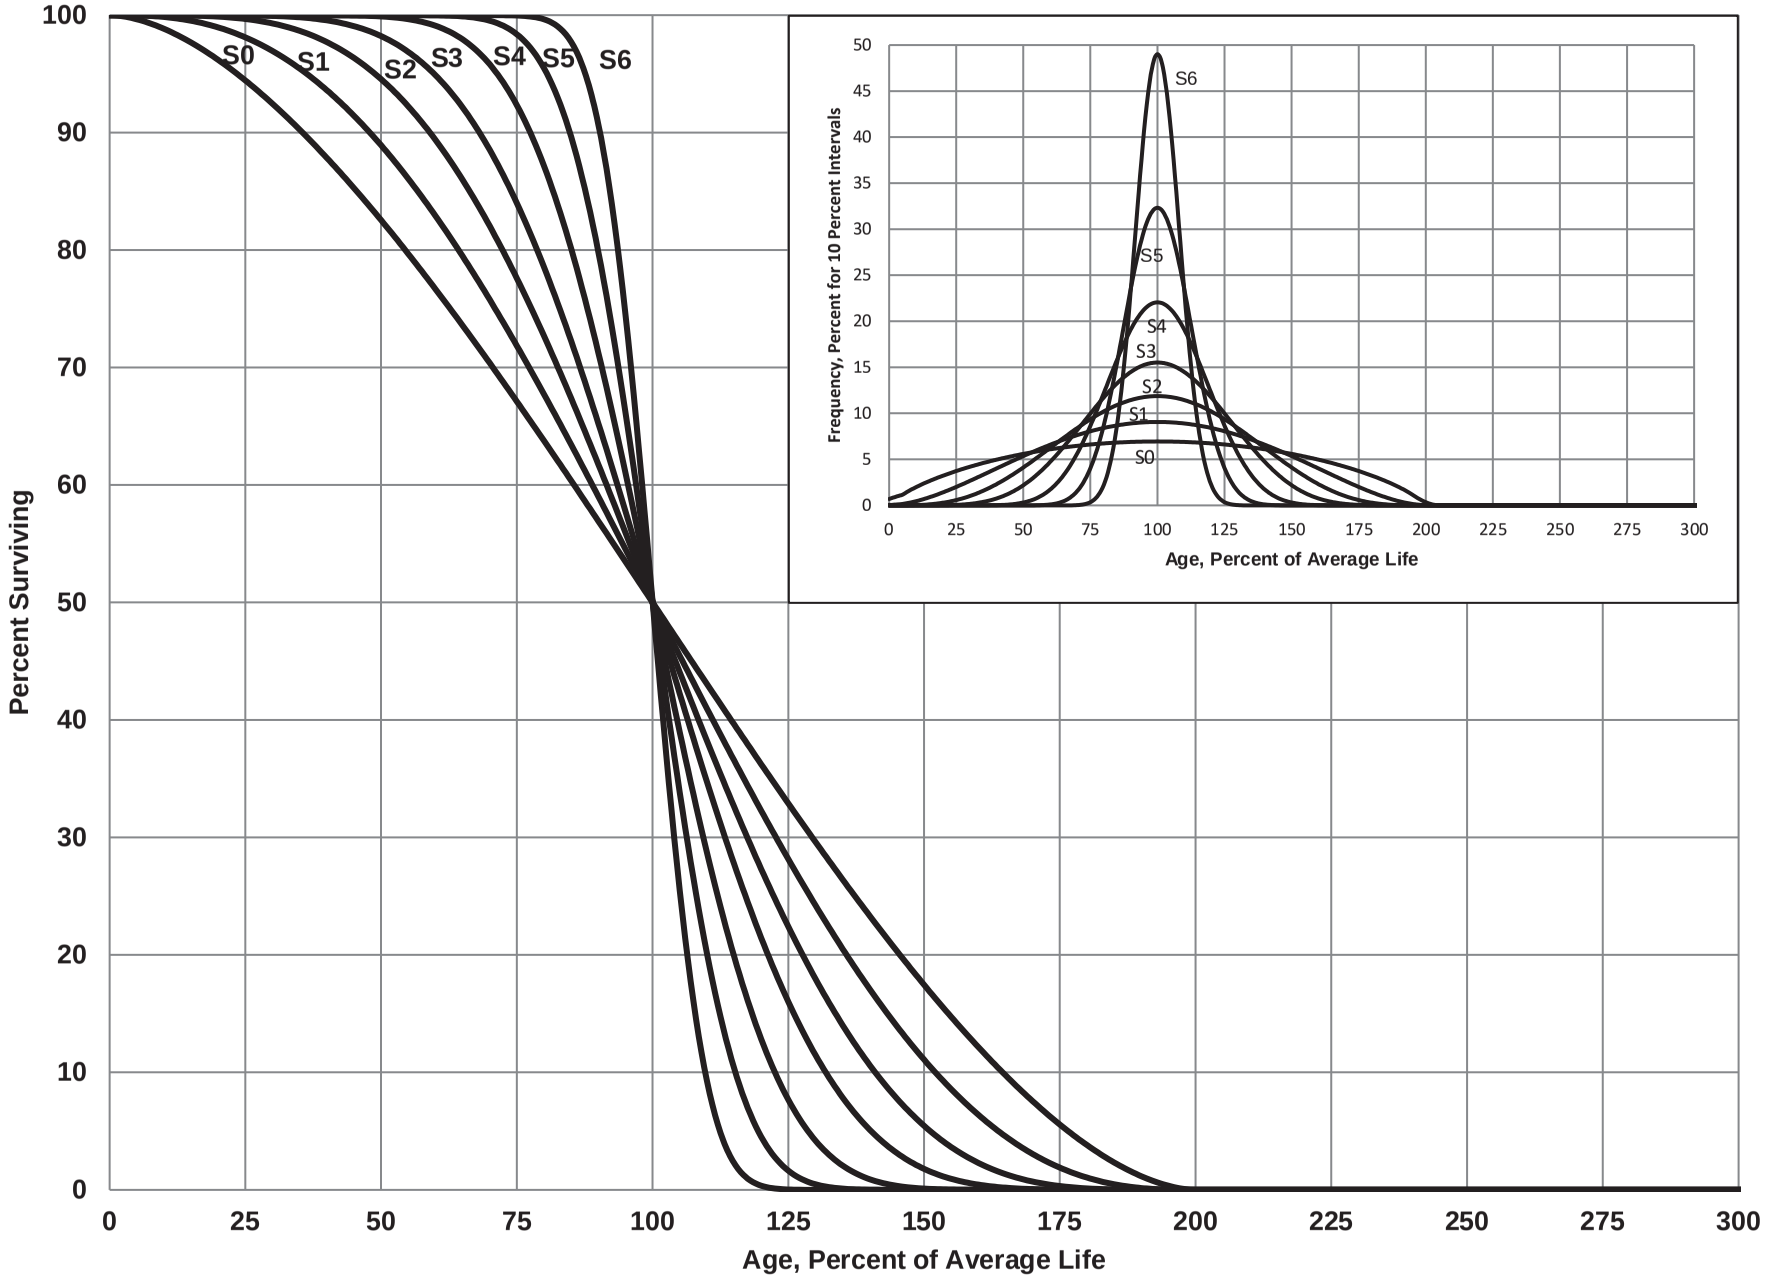

FIGURE 3. SYMMETRICAL OR "S" IOWA TYPE SURVIVOR CURVES

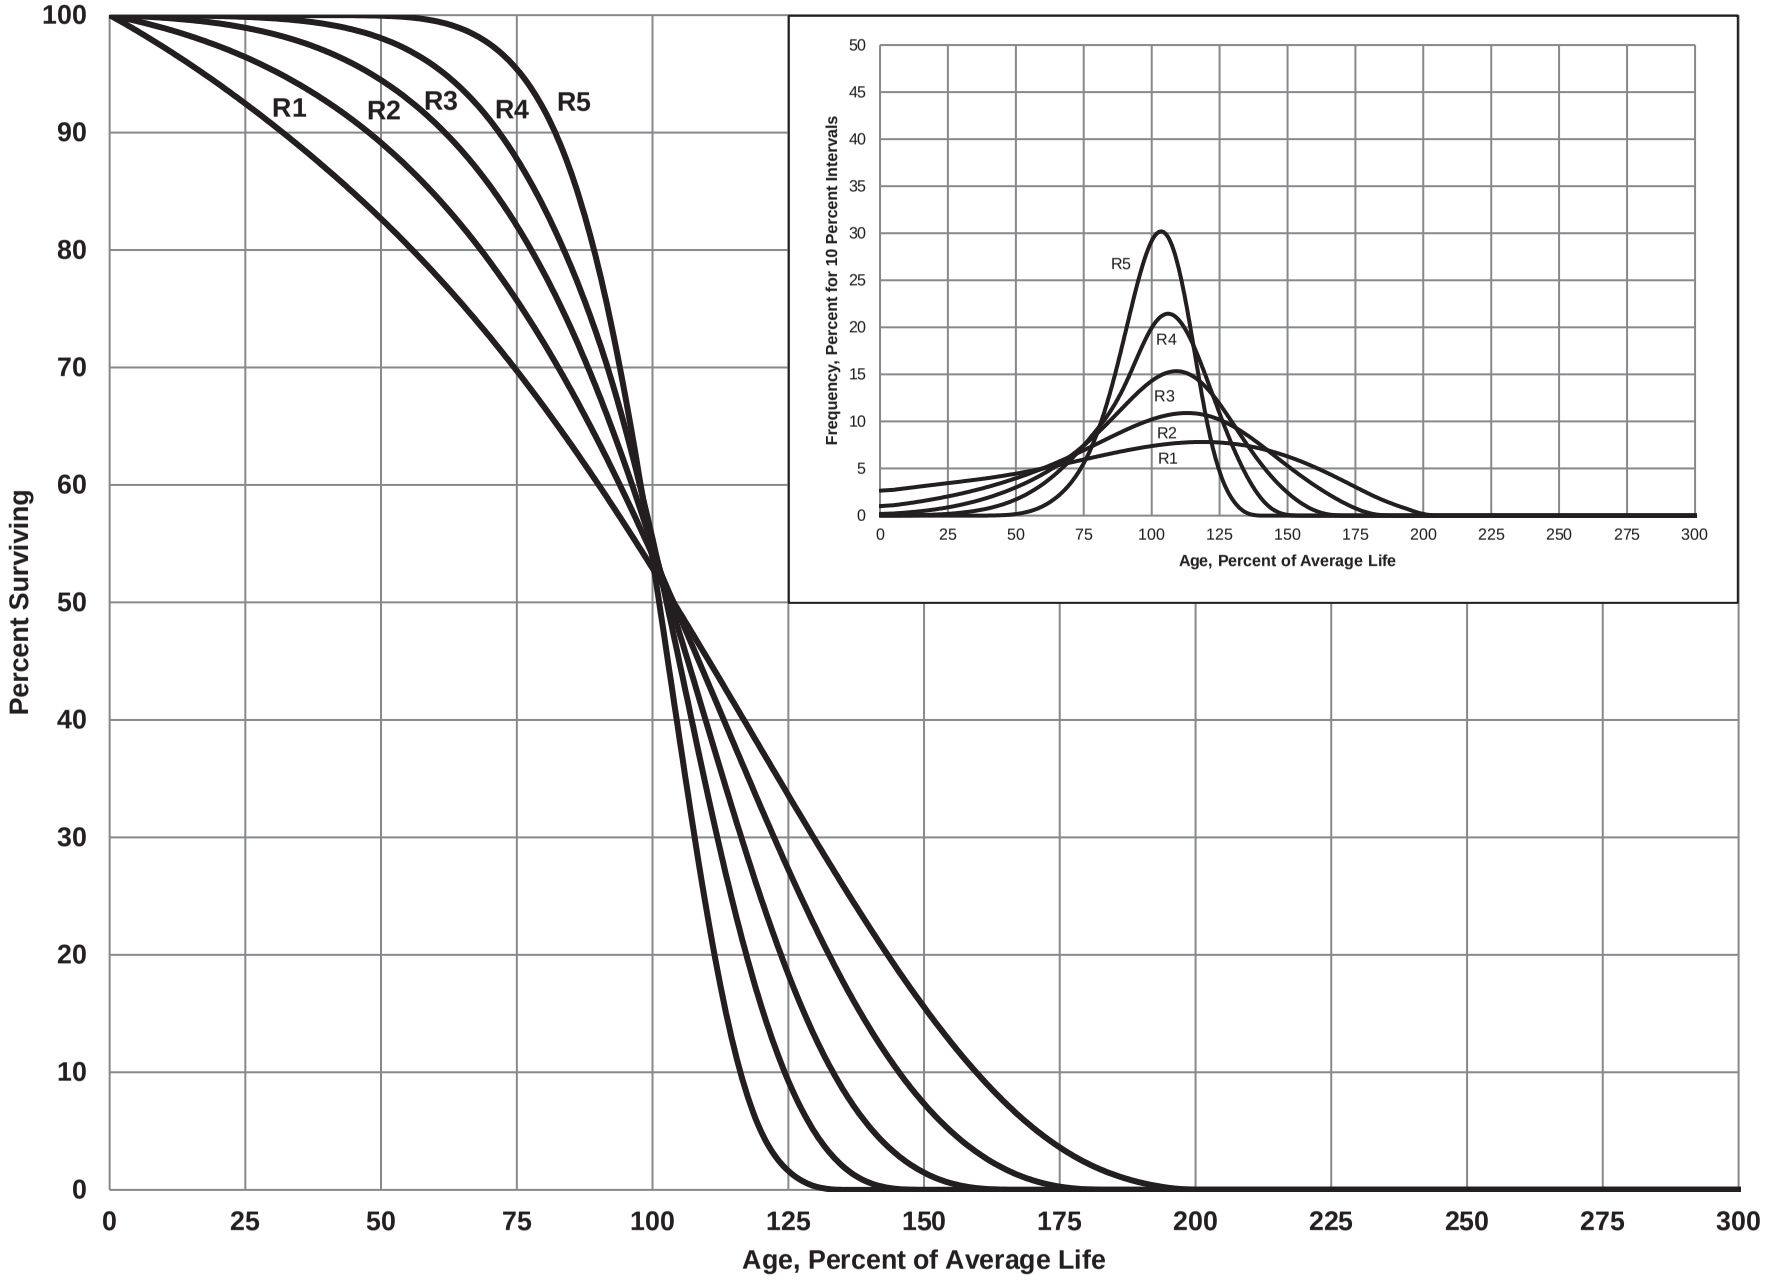

FIGURE 4. RIGHT MODAL OR "R" IOWA TYPE SURVIVOR CURVES

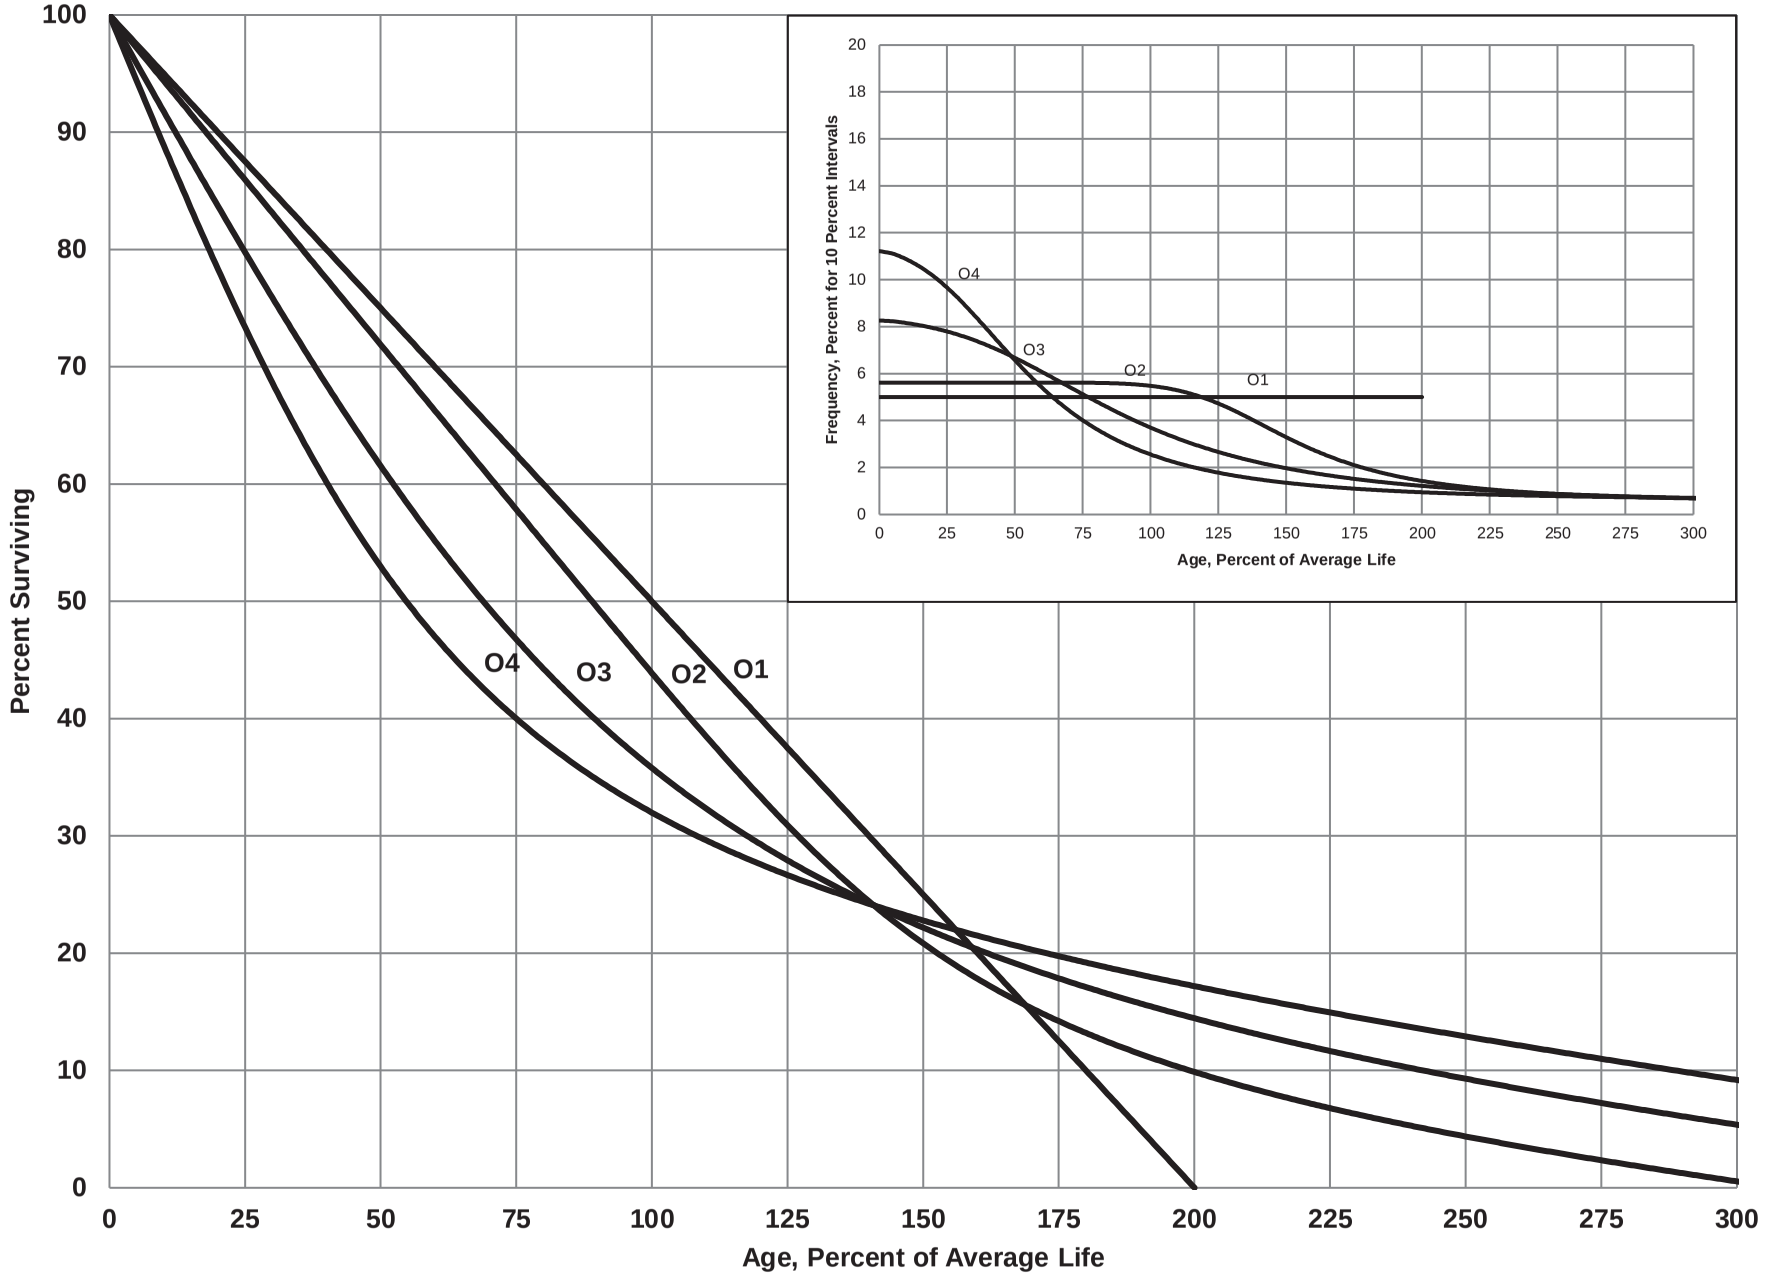

FIGURE 5. ORIGIN MODAL OR "O" IOWA TYPE SURVIVOR CURVES

These curve types have also been presented in subsequent Experiment Station bulletins and in the text, "Engineering Valuation and Depreciation."[1] In 1957, Frank V. B. Couch, Jr., an Iowa State College graduate student, submitted a thesis presenting his development of the fourth family consisting of the four O type survivor curves.

Retirement Rate Method of Analysis

The retirement rate method is an actuarial method of deriving survivor curves using the average rates at which property of each age group is retired. The method relates to property groups for which aged accounting experience is available and is the method used to develop the original stub survivor curves in this study. The method (also known as the annual rate method) is illustrated through the use of an example in the following text and is also explained in several publications including "Statistical Analyses of Industrial Property Retirements,"[2] "Engineering Valuation and Depreciation,"[3] and "Depreciation Systems."[4]

The average rate of retirement used in the calculation of the percent surviving for the survivor curve (life table) requires two sets of data: first, the property retired during a period of observation, identified by the property's age at retirement; and second, the property exposed to retirement at the beginning of the age intervals during the same period. The period of observation is referred to as the experience band. The band of years which represent the installation dates of the property exposed to retirement during the experience band is referred to as the placement band. An example of the calculations used in the development of a life table follows. The example includes schedules of annual aged property transactions, a schedule of plant exposed to retirement, a life table and illustrations of smoothing the stub survivor curve.

Schedules of Annual Transactions in Plant Records

The property group used to illustrate the retirement rate method is observed for the experience band 2014-2023 for which there were placements during the years 2009-2023. In order to illustrate the summation of the aged data by age interval, the data were compiled in the manner presented in Schedules 1 and 2 on pages II-11 and II-12. In Schedule 1, the year of installation (year placed) and the year of retirement are shown. The age interval during which a retirement occurred is determined from this information. In the example which follows, $10,000 of the dollars invested in 2009 were retired in 2014. The $10,000 retirement occurred during the age interval between 4½ and 5½ years on the basis that approximately one-half of the amount of property was installed prior to and subsequent to July 1 of each year. That is, on the average, property installed during a year is placed in service at the midpoint of the year for the purpose of the analysis. All retirements also are stated as occurring at the midpoint of a one-year age interval of time, except the first age interval which encompasses only one-half year.

The total retirements occurring in each age interval in a band are determined by summing the amounts for each transaction year-installation year combination for that age interval. For example, the total of $143,000 retired for age interval 4½-5½ is the sum of the retirements entered on Schedule 1 immediately above the stair step line drawn on the table beginning with the 2014 retirements of 2009 installations and ending with the 2023 retirements of the 2018 installations. Thus, the total amount of 143 for age interval 4½-5½ equals the sum of:

$$10 + 12 + 13 + 11 + 13 + 13 + 15 + 17 + 19 + 20.$$

SCHEDULE 1. RETIREMENTS FOR EACH YEAR 2014-2023

[a] Transfer Affecting Exposures at Beginning of Year
[b] Transfer Affecting Exposures at End of Year
[c] Sale with Continued Use
Parentheses Denote Credit Amount.

In Schedule 2, other transactions which affect the group are recorded in a similar manner. The entries illustrated include transfers and sales. The entries which are credits to the plant account are shown in parentheses. The items recorded on this schedule are not totaled with the retirements, but are used in developing the exposures at the beginning of each age interval.

Schedule of Plant Exposed to Retirement

The development of the amount of plant exposed to retirement at the beginning of each age interval is illustrated in Schedule 3 on page II-14. The surviving plant at the beginning of each year from 2014 through 2023 is recorded by year in the portion of the table headed "Annual Survivors at the Beginning of the Year." The last amount entered in each column is the amount of new plant added to the group during the year. The amounts entered in Schedule 3 for each successive year following the beginning balance or addition are obtained by adding or subtracting the net entries shown on Schedules 1 and 2. For the purpose of determining the plant exposed to retirement, transfers-in are considered as being exposed to retirement in this group at the beginning of the year in which they occurred, and the sales and transfers-out are considered to be removed from the plant exposed to retirement at the beginning of the following year. Thus, the amounts of plant shown at the beginning of each year are the amounts of plant from each placement year considered to be exposed to retirement at the beginning of each successive transaction year. For example, the exposures for the installation year 2019 are calculated in the following manner:

Exposures at age 0	= amount of addition	= $750,000
Exposures at age ½	= $750,000 - $ 8,000	= $742,000
Exposures at age 1½	= $742,000 - $18,000	= $724,000
Exposures at age 2½	= $724,000 - $20,000 - $19,000	= $685,000
Exposures at age 3½	= $685,000 - $22,000	= $663,000

SCHEDULE 3. PLANT EXPOSED TO RETIREMENT
JANUARY 1 OF EACH YEAR 2014-2023
SUMMARIZED BY AGE INTERVAL

Experience Band 2014-2023

2023											7,490	0-½
Total	1,975	2,382	2,824	3,318	3,872	4,494	5,247	6,017	6,852	7,799	44,780	

t s r t e ear

For the entire experience band 2014-2023, the total exposures at the beginning of an age interval are obtained by summing diagonally in a manner similar to the summing of the retirements during an age interval (Schedule 1). For example, the figure of 3,789, shown as the total exposures at the beginning of age interval 4½-5½, is obtained by summing:

255 + 268 + 284 + 311 + 334 + 374 + 405 + 448 + 501 + 609.

Original Life Table

The original life table, illustrated in Schedule 4 on page II-16, is developed from the totals shown on the schedules of retirements and exposures, Schedules 1 and 3, respectively. The exposures at the beginning of the age interval are obtained from the corresponding age interval of the exposure schedule, and the retirements during the age interval are obtained from the corresponding age interval of the retirement schedule. The retirement ratio is the result of dividing the retirements during the age interval by the exposures at the beginning of the age interval. The percent surviving at the beginning of each age interval is derived from survivor ratios, each of which equals one minus the retirement ratio. The percent surviving is developed by starting with 100% at age zero and successively multiplying the percent surviving at the beginning of each interval by the survivor ratio, i.e., one minus the retirement ratio for that age interval. The calculations necessary to determine the percent surviving at age 5½ are as follows:

Percent surviving at age 4½	=	88.15				
Exposures at age 4½	=	3,789,000				
Retirements from age 4½ to 5½	=	143,000				
Retirement Ratio	=	143,000	÷	3,789,000	=	0.0377
Survivor Ratio	=	1.000	-	0.0377	=	0.9623
Percent surviving at age 5½	=	(88.15)	x	(0.9623)	=	84.83

The totals of the exposures and retirements (columns 2 and 3) are shown for the purpose of checking with the respective totals in Schedules 1 and 3. The ratio of the total retirements to the total exposures, other than for each age interval, is meaningless.

SCHEDULE 4. ORIGINAL LIFE TABLE
CALCULATED BY THE RETIREMENT RATE METHOD

Column 2 from Schedule 3, Column 12, Plant Exposed to Retirement.
Column 3 from Schedule 1, Column 12, Retirements for Each Year.
Column 4 = Column 3 Divided by Column 2.
Column 5 = 1.0000 Minus Column 4.
Column 6 = Column 5 Multiplied by Column 6 as of the Preceding Age Interval.

The original survivor curve is plotted from the original life table (column 6, Schedule 4). When the curve terminates at a percent surviving greater than zero, it is called a stub survivor curve. Survivor curves developed from retirement rate studies generally are stub curves.

Smoothing the Original Survivor Curve

The smoothing of the original survivor curve eliminates any irregularities and serves as the basis for the preliminary extrapolation to zero percent surviving of the original stub curve. Even if the original survivor curve is complete from 100% to zero percent, it is desirable to eliminate any irregularities, as there is still an extrapolation for the vintages which have not yet lived to the age at which the curve reaches zero percent. In this study, the smoothing of the original curve with established type curves was used to eliminate irregularities in the original curve.

The Iowa type curves are used in this study to smooth those original stub curves which are expressed as percents surviving at ages in years. Each original survivor curve was compared to the Iowa curves using visual and mathematical matching in order to determine the better fitting smooth curves. In Figures 6, 7, and 8, the original curve developed in Schedule 4 is compared with the L, S, and R Iowa type curves which most nearly fit the original survivor curve. In Figure 6, the L1 curve with an average life between 12 and 13 years appears to be the best fit. In Figure 7, the S0 type curve with a 12-year average life appears to be the best fit and appears to be better than the L1 fitting. In Figure 8, the R1 type curve with a 12-year average life appears to be the best fit and appears to be better than either the L1 or the S0.

In Figure 9, the three fittings, 12-L1, 12-S0 and 12-R1 are drawn for comparison purposes. It is probable that the 12-R1 Iowa curve would be selected as the most representative of the plotted survivor characteristics of the group.

PART III. SERVICE LIFE CONSIDERATIONS

PART III. SERVICE LIFE CONSIDERATIONS

Judgments

The survivor curve estimates were based on judgment which considered factors including statistical analyses of retirements, Company policies and outlook as determined during discussions with management, and survivor curve estimates from previous studies of the other Aqua Pennsylvania wastewater systems. For depreciable groups which consist of numerous similar items of property, the distribution of the lives of the units in the group was judged on the basis of an average survival pattern for the entire group.

The amortization period selected for general plant Account 397.00 is discussed in the section, “Amortization of General Plant Accounts.”

PART IV. CALCULATION OF ANNUAL AND ACCRUED DEPRECIATION

PART IV. CALCULATION OF ANNUAL AND ACCRUED DEPRECIATION

BOOK RESERVE

The book reserve as of December 31, 2023, is the result of a bringforward of the book reserves established by the Commission for the East Whiteland wastewater operations at the time of acquisition. The projected book reserve as of December 31, 2024, is a bringforward of the December 31, 2023 book reserve based on projected accruals, retirements, cost of removal, gross salvage and other credits.

CALCULATION OF DEPRECIATION

The annual depreciation accruals as of December 31, 2024, are based on the straight line remaining life method and the equal life group procedure. For the purpose of calculating the remaining life accruals as of December 31, 2024, the book reserve is allocated among vintages in proportion to the calculated accrued depreciation as of December 31, 2024.

Group Depreciation Procedures

A group procedure for depreciation is appropriate when considering more than a single item of property. Normally, the items within a group do not have identical service lives but have lives that are dispersed over a range of time.

In the average service life procedure, the rate of annual depreciation is based on the average life or average remaining life of the group, and this rate is applied to the surviving balances of the group's cost. A characteristic of this procedure is that the cost of plant retired prior to average life is not fully recouped at the time of retirement, whereas

the cost of plant retired subsequent to average life is more than fully recouped. Over the entire life cycle, the portion of cost not recouped prior to average life is balanced by the cost recouped subsequent to average life.

In the equal life group procedure, the property group is subdivided according to service life. That is, each equal life group includes that portion of the property which experiences the life of that specific group. The relative size of each equal life group is determined from the property's life dispersion curve. This procedure eliminates the need to base depreciation on average lives, inasmuch as each group is equivalent to a unit having a single life. The full costs of short-lived units are accrued during their lives, leaving no deferral of accruals required to be added to the annual costs associated with long-lived units. The calculated depreciation for the property group is the summation of the calculated depreciation based on the service life of each equal life group.

Remaining Life Annual Accruals

For the purpose of calculating remaining life accrual rates as of December 31, 2024, the estimated book depreciation reserve for each plant account is allocated among vintages in proportion to the calculated accrued depreciation for the account. Explanations of remaining life accruals and calculated accrued depreciation based on the equal life group procedure follow. The detailed calculations are set forth in the Results of Study section of the report.

Equal Life Group Procedure

In the equal life group procedure, the remaining life annual accrual for each vintage is determined by dividing future book accruals (original cost less book reserve) by the composite remaining life for the surviving original cost of that vintage. The composite remaining life is derived by compositing the individual equal life group remaining lives in accordance with the following equation:

$$\text{Composite Remaining Life} = \frac{\sum(\frac{\text{Book Cost}}{\text{Life}} \text{ x Remaining Life})}{\sum \frac{\text{Book Cost}}{\text{Life}}}.$$

The book costs and lives of the several equal life groups which are summed in the foregoing equation are defined by the estimated survivor curve.

Inasmuch as book cost divided by life equals the whole life annual accrual, the foregoing equation reduces to the following form:

$$\text{Composite Remaining Life} = \frac{\sum \text{Whole Life Future Accruals}}{\sum \text{Whole Life Annual Accruals}}$$

or

$$\text{Composite Remaining Life} = \frac{\sum \text{Book Cost - Calc. Reserve}}{\sum \text{Whole Life Annual Accrual}}.$$

The annual accrual rate for each account is equal to the sum of the remaining life annual accruals for all vintages divided by the account's total original cost. The account's "composite remaining life" is calculated by dividing the sum of the future book accruals for all vintages by the sum of the remaining life annual accruals for all vintages.

The calculated accrued depreciation in the equal life group procedure also represents that portion of depreciable cost which will not be allocated to expense through future accruals. However, the calculation is based at the equal life group level rather than the vintage group level and does not require the use of averages. The equal life group accrued depreciation ratio is calculated as follows:

$$Ratio = 1 - \left(\frac{Remaining\ Life}{Service\ Life}\right)$$

Inasmuch as service life minus remaining life equals age, when averages are not employed, the foregoing equation reduces to:

$$Ratio = \left(\frac{Age}{Service\ Life}\right)$$

AMORTIZATION OF GENERAL PLANT ACCOUNTS

In order to use a more efficient and cost effective accounting process for equipment recorded in general plant Account 397.00; amounts capitalized in this account are amortized rather than depreciated. Amortization as defined in the Uniform System of Accounts is the gradual extinguishment of an amount in an account by distributing such amount over a fixed period, over the life of the asset or liability to which it applies, or over the period during which it is anticipated the benefit will be realized.

The primary reasons for the amortization of certain general plant accounts is that the effort required to unitize additions, periodically inventory equipment and determine amounts to be retired for equipment recorded in these accounts is disproportionate to the original cost of the equipment when compared to other wastewater plant accounts.

Accounting for such equipment using an amortization concept consists of capitalization of amounts to these accounts based on the same criteria as used previously under depreciation accounting, amortization of the asset over a fixed period, retirement of the equipment at the end of the amortization period and recognition of any net salvage related to disposition of equipment in these accounts as a gain or loss. For equipment in these accounts that was placed in service prior to implementation of amortization accounting, the net book value by vintage amortized over the remaining amortization period specified for each account and the original cost will be retired at the end of this period.

The amortization periods selected for each account or subaccount are based on a review of the existing depreciation rates for the accounts, typical service lives used for each type of equipment and a consideration of the period during which it is anticipated that most of the benefit of the equipment will be realized. The amortization periods are as follows:

Account Number	Description	Amortization Period, Years
397.00	Miscellaneous Equipment	25

NET SALVAGE

Experienced net salvage is incorporated in the results of the study as it was reported on the Company's books and records for the period January 1, 2020 through December 31, 2023 and estimated for the period January 1, 2024 through December 31, 2024. The calculation of the amortization is shown in Table 4 on page V-7. The amounts

of gross salvage and removal cost by account for each year are set forth in the section beginning on page VIII-2.

Net salvage is presented in this manner to determine the amount of net salvage to be amortized to the cost of service for ratemaking purposes. In order to be consistent with this manner of recognizing net salvage, no adjustments for net salvage were made to the annual depreciation calculated for the individual accounts.

PART V. RESULTS OF STUDY

PART V. RESULTS OF STUDY

DESCRIPTION OF SUMMARY TABULATIONS

Table 1 summarizes the results of the depreciation study which sets forth, by depreciable group, the estimated survivor curve, calculated annual accruals and book reserve related to net original cost and the annual amortization of net salvage. Table 2 presents the bringforward to December 31, 2024 of the book reserve as of December 31, 2023. Table 3 sets forth the calculation of estimated depreciation accruals for the twelve months ended December 31, 2024. Table 4 presents the amortization of experienced and estimated net salvage, by account, based on the five-year period, 2020-2024. The total amortization amount is incorporated in the total annual accrual in Table 1.

DESCRIPTION OF DETAILED TABULATIONS

Supporting statistical data for the estimates of average service lives and survivor curves, the annual depreciation calculations, and gross salvage and cost of removal for the years 2020-2024 are presented in three sections.

The section beginning on page VI-2 sets forth, for each depreciable group analyzed by the retirement rate method, a chart depicting the original and estimated survivor curves followed by a tabular presentation of the original life table plotted on the chart. A cumulative summary, by year installed, for utility plant and the supporting data for the original cost depreciation calculations are presented in the section beginning on page VII-3. The tabulations of experienced and estimated net salvage, by year and account for the five-year period 2020-2024, are presented in the section beginning on page VIII-2.

In the first section, the survivor curves estimated for the depreciable groups are shown as dark smooth curves on the charts. Each smooth survivor curve is denoted by a numeral followed by the type curve designation. The numeral used is the average life derived from the entire curve from 100 percent to zero percent surviving. In cases where only a segment of the estimated curve is used in the depreciation calculation, the numeral used for identification purposes is not a designation of the average life of the group. The titles of the charts indicate the group, the symbol used to plot the points of the original life table, and the experience and placement bands of the life tables which were plotted. The experience band indicates the range of years for which the retirements were used to develop the stub survivor curve. The placements indicate, for the related experience band, the range of years of installations which appear in the experience.

The tables of the calculated annual depreciation related to original cost are presented in account sequence in the second section and indicate the estimated average survivor curves used in the calculations. The tables set forth, for each installation year, the original cost, calculated accrued depreciation, allocated book reserve, remaining life expectancy, and the calculated annual accrual.

Detailed tabulations setting forth the cost of removal, gross salvage and net salvage amounts, by account and year, are presented in the third section. The net salvage amounts, by account and year, are carried forward to Table 4, which presents the five-year amortization of net salvage.

Attention: William C. Packer
Vice President, Regulatory Accounting & Regional Controller

Ladies and Gentlemen:

Pursuant to your request, we have determined the annual depreciation accruals applicable to wastewater plant as of December 31, 2025 for the East Whiteland Wastewater Operations. The results of our study as of December 31, 2024 are presented in our report titled "2024 Depreciation Study - Calculated Annual Depreciation Accruals Related to Wastewater Plant as of December 31, 2024". The same methods, procedures and estimates are used in both studies.

Summaries of the original cost, annual accruals, book depreciation reserve and amortization of net salvage are presented in Tables 1 through 4, beginning on page I-3 of the attached report.

Respectfully submitted,

GANNETT FLEMING VALUATION

DEPRECIATION STUDY

PART I. RESULTS OF STUDY

DESCRIPTION OF SUMMARY TABULATIONS

Tables 1 through 4 presented on pages I-3 through I-7 summarize the results of the depreciation study as of December 31, 2025 for the East Whiteland Wastewater Operations. Table 1 sets forth, by depreciable group, the estimated survivor curve, original cost, book depreciation reserve as of December 31, 2025, future book accruals, calculated annual accrual amount and rate, and composite remaining life for plant in service. Table 2 presents the bringforward of the book reserve to December 31, 2025. Table 3 sets forth the calculation of the depreciation accruals for the twelve months ended December 31, 2025. Table 4 presents the annual amortization of experienced and estimated net salvage based on the period 2021 through 2025.

DESCRIPTION OF DETAILED TABULATIONS

The supporting data for the depreciation calculations are presented in account sequence in the section beginning on page II-2. The original cost, calculated accrued depreciation, allocated book reserve, future accruals, remaining life and annual accrual are shown for each vintage of each account or subaccount. The amounts of regular retirements, gross salvage and cost of removal are set forth by account for the years 2021 through 2025, on page III-2.

CALCULATION OF LEAD DAYS FOR HOURLY LABOR

BASED ON LEAD-LAG STUDY FOR THE TWELVE MONTHS ENDED DECEMBER 31, 2023

Facts	(Lead)/ Lag Days
(1)	(2)
All union labor employees are paid for a two week period (i.e., Days 1 through 7).	
Pay date is four days following the end of the payroll period (i.e., Day 11, where 11 = 7 + 4).	
Thrid party vendor, ADP, recives funds 1 to 2 days before paydays (i.e., Day 9.5, where 9.5 = 11 - 1.5).	
Salaries and Wages (4 days)	
LEAD [9.5 - 4.0 = 5.5; where 4.0 = (1 + 7 = 8 ÷ 2 = 4.0)]	5.5
Total Hourly Labor	5.5

AQUA PENNSYLVANIA, INC.

CALCULATION OF LEAD DAYS FOR NON-UNION LABOR

BASED ON LEAD-LAG STUDY FOR THE TWELVE MONTHS ENDED DECEMBER 31, 2023

Facts	(Lead)/ Lag Days
(1)	(2)
All non-union labor employees are paid for a two week period (i.e., Days 1 through 14).	
Pay date is four days following the end of the payroll period (i.e., Day 18, where 18 = 14 + 4).	
Thrid party vendor, ADP, recives funds 1 to 2 days before paydays (i.e., Day 16.5, where 16.5 = 18 - 1.5).	
Salaries and Wages (4 days)	
LEAD [16.5 - 7.5 = 9.0; where 7.5 = (1 + 14 = 15 ÷ 2 = 7.5)]	9.0
Total Non-Union Labor	9.0

AQUA PENNSYLVANIA, INC.

CALCULATION OF LEAD DAYS FOR MANAGEMENT FEE

XI. CONCLUSION 33

I. INTRODUCTION AND BACKGROUND

Q. What is your name and business address?

A. William C. Packer. My business address is 762 W. Lancaster Avenue, Bryn Mawr, Pennsylvania 19010.

Q. By whom are you employed and in what capacity?

A. I am employed by Essential Utilities, Inc. ("Essential") as Vice President Regulatory Accounting and Regional Controller. In this position, I am the Regional Controller of Aqua Pennsylvania, Inc. ("AP"), and Aqua New Jersey, Inc. ("Aqua NJ"). Additionally, I oversee rate issues for all subsidiaries of Essential. Essential is the parent company of Aqua Pennsylvania, Inc. and Aqua Pennsylvania Wastewater, Inc. ("APW") (collectively "Aqua PA" or the "Company").

Q. Please describe your education and business experience.

A. I graduated from the Richard Stockton College of New Jersey in 1998 with a Bachelor of Science degree in Business Studies with a concentration in accounting. I began my 25-year career in the utility industry in September 1999, when I joined New Jersey American Water Company ("NJ American") as a General Staff Accountant and held various positions in finance and accounting at NJ American. At NJ American, I had the opportunity to support the rate-making process by working closely with operating subsidiaries in 23 states.

I began my career with the Company in March 2005 where I was hired by Aqua NJ as Assistant Controller. I held this position until December 2006 when I transferred to Aqua America, Inc. and have held a variety of positions in finance and accounting. Since starting at the Company, I have been the chief accounting and revenue requirement witness in rate cases filed before the Pennsylvania Public Utility Commission ("PUC" or the

"Commission") since 2008. In 2020, my role was expanded to include financial regulatory oversight, direction, and support of all Essential water and gas subsidiaries and is the current capacity in which I serve.

In addition to my corporate experience, after serving as a Council Member for a number of years, I was elected as Mayor of the Borough of Woodbury Heights in 2019 and continue to serve in this role. The Borough of Woodbury Heights is one of 565 municipalities in the state and has a population of approximately 3,000. I have been an elected official since 2010 and the Borough owns and operates both its own water and wastewater utilities, thus giving me a unique perspective to the considerations municipalities face when it comes to providing utility service to its residents.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is as follows: Section II of my direct testimony explains the Company's need for rate relief; Section III introduces the other witnesses that provide direct testimony on behalf of Aqua PA and support various other aspects of the Company's initial filing; Section IV identifies and describes the principal accounting exhibits (*i.e.*, Exhibits 1-A through 1-B (Water) and 1-C through 1-E (Wastewater)) submitted in support of Aqua PA's proposed rate increase for water and wastewater operations, respectively; Sections V explain and support the Company's operating expense; Section VI is the Company request for deferred accounting; Section VII is depreciation, taxes and other items; (8) Section VIII explains the Company's rate base claims; Section IX describes the Company's proposed capital structure; and Section X identifies additional factors the Commission should consider when determining the appropriate return on equity for Aqua PA, explains why Aqua PA is entitled to an equity allowance that recognizes exemplary

managerial performance, and recommends the appropriate return on equity to be utilized in this proceeding in light of the analysis of Mr. Paul R. Moul (Statement No. 7).

Q. For which of the Company's principal exhibits are you responsible?

A. I am responsible for the primary accounting exhibits for water and wastewater operations, respectively, AP Exhibits 1-A through 1-E. In addition, I oversaw and assisted in the preparation of the backup volumes that contain responses to the Commission's standard rate case filing requirements with respect to: A. Statement of Income, B. Operating Revenues, C. Operating Expenses, D. Taxes, E. Rate Base, G. Rate of Return, H. Rate Structure, J. Balance Sheet, and K. Other Data.

II. AQUA PA'S NEED FOR RATE RELIEF

Q. Why is Aqua PA seeking rate relief at this time?

A. The Company's last consolidated water and wastewater base rate case was filed approximately three years ago at Docket Nos. R-2021-3027385, R-2021-3027386, et al. ("2021 Base Rate Case"). Rates established in that case became effective on May 19, 2022. Since March 31, 2023 (*i.e.*, the end of the fully projected future test year used in the 2021 Base Rate Case), the Company will have invested over $950 million in water and wastewater utility infrastructure through the fully projected test year ("FPFTY") ending December 31, 2025. Investments in replacing old and installing new utility infrastructure account for approximately 60% of the requested need for rate relief in this application.

Q. Please describe the Company's level of investment since the 2021 Base Rate Case.

A. Since the end of its last base rate case, the Company's average capital expenditure program for water and wastewater operations has been approximately $300 million annually. Indeed, the Company has been investing in new and replacement infrastructure for many

years at an accelerated rate to proactively address aging infrastructure and evolving regulatory requirements. The accelerated levels of investment, particularly since the establishment of the Distribution System Improvement Charge ("DSIC"), have enabled significant enhancements to the Company's utility infrastructure. As a result, main breaks and water quality complaints have been reduced and AP's unaccounted for water metrics have been improving overall.

For water operations, this investment includes replacement of lead service lines ("LSL"), per- and poly-fluroalkyl ("PFAS") remediation, distribution system mains, and appurtenances such as hydrants, service lines, and meters. For wastewater operations, much of this investment has been directed towards base wastewater operating systems (legacy systems) that were presented in the 2021 Base Rate Case.

Considering the investments that have been made, Aqua PA's need for rate relief also includes recovery for an increase in annual depreciation expense, which is further explained and supported in the testimony of Aqua PA witness John Spanos, Statement No. 6.

Q. What are some of the other factors driving Aqua PA's need for rate relief?

A. In addition to needed infrastructure investment, Aqua PA has experienced increases in its O&M expenses since its 2021 Base Rate Case. Foremost, the substantial rates of inflation that have been experienced since the conclusion of the 2021 Base Rate Case have increased O&M expenses. O&M cost increases represents approximately 38% of the Company's claim for additional rate relief in this filing.

Q. Please elaborate specifically on the need for rate relief related to Aqua PA's wastewater systems.

A. Regarding wastewater operations, APW began to provide this service in 1996. Since then, APW has acquired and rehabilitated different types of wastewater systems, many of which are troubled for a variety of reasons. APW furnishes wastewater service to approximately 57,000 customers. While small in comparison to Aqua PA's water utility business, which services approximately 445,000 customers, the wastewater business requires a considerable amount of investment.

APW's wastewater utility files on a consolidated basis for all its wastewater operations but also presents separately the wastewater system acquisitions acquired since the 2021 Base Rate Case as part of the Section 1329, 66 Pa.C.S. § 1329, Fair Market Value ("Section 1329") acquisition process.

In this proceeding, the Company has proposed to continue to allocate a portion of its wastewater cost of service amongst its water customer base to moderate the rate increase impact to wastewater customers. The Company's request for rate relief is necessary to provide a reasonable opportunity to have its wastewater operations earn a fair rate of return.

Q. Please explain the changing circumstances impacting the Company regarding borrowing costs.

A. Aqua PA maintains a solid A credit rating from Standard and Poor's ("S&P"), which results in a lower cost of borrowing and directly benefiting customer rates. Since the 2021 Base Rate Case however, the historical trend of a declining and low interest rate environment has moved significantly in the opposite direction. Interest rates on both short- and long-term debt instruments have increased nationwide in response to the Federal Reserve's actions to increase interest rates to combat high inflation. As a result of these circumstances, the cost of new borrowing for the Company is increasing as evidenced in

Exhibit 1-A through 1-E, Schedule E-1, showing the pro-forma capitalization structure and embedded cost of long-term debt. Specifically, since the 2021 Base Rate Case, the embedded cost of long-term debt has increased from 4.00% to 4.32% in this filing. Despite the changing interest rate environment, the Company is still able to secure competitive borrowing rates because of its investment grade credit rating. Additionally, the Company is continuing to pursue low interest loan opportunities through the Pennsylvania Infrastructure Investment Authority ("PENNVEST") and the amount of PENNVEST loans is expected to grow as a percentage of the total Company long term debt portfolio in this high interest rate environment.

Q. Please explain Aqua PA's ongoing efforts to control O&M expenses.

A. The Company continues to focus on cost saving measures and maximizing its purchasing power using national contracts, consolidated procurement efforts, and operating efficiency. Like many other utilities, costs in many areas have increased, consistent with the nationwide inflation trend and the Company will support those increases in this case. Mr. Duerr (Statement No. 11) highlights operational cost increases and measures and efforts to control and minimize costs.

III. INTRODUCTION OF OTHER WITNESSES

Q. Please identify the other witnesses who are providing direct testimony on behalf of Aqua PA in this proceeding.

A. In addition to me, the following witnesses will be responsible for presenting testimony in the following areas:

- **Statement No. 2 – Renee T. Marquis.** Ms. Marquis's testimony addresses certain expense adjustments, depreciation and taxes other than income, acquisitions, certain rate base issues, and the consolidation of rate zones.

- **Statement No. 3 – Christopher E. Manning.** Mr. Manning addresses certain expense adjustments contained in the Company's principal accounting exhibits.

- **Statement No. 4 – Michael S. Ercolino.** Mr. Ercolino also addresses certain expense adjustments contained in the Company's principal accounting exhibits.

- **Statement No. 5 – Constance E. Heppenstall.** Ms. Heppenstall explains the cost of service allocation study performed in this case, and support aspects of the Company's proposed customer rate design. She also sponsors Exhibit Nos. 5-A (Parts I and II), 5-B (Parts I and II), and 5-C to the Company's filing.

- **Statement No. 6 – John J. Spanos.** Mr. Spanos explains the depreciation exhibits prepared in support of this filing (*i.e.*, Exhibits 6-A, Part I through 6-E, Part I (the results of each depreciation study for the historic test year ("HTY")), Exhibits 6-A, Part II through 6-E, Part II (the results of each depreciation study for the future test year ("FTY")), and Exhibits 6-A, Part III through 6-E, Part III (the results of each depreciation study for the FPFTY)) and addresses issues related to depreciation.

- **Statement No. 7 – Paul R. Moul.** Mr. Moul testifies regarding the Company's proposed costs of capital, and sponsors Exhibit 4-A in support of his recommendations.

- **Statement No. 8 – Panpilas Fischer.** Ms. Fischer addresses various income tax issues related to Aqua PA.

- **Statement No. 9 – Harold Walker.** Mr. Walker address cash working capital.

- **Statement No. 10 – Gregory Herbert.** Mr. Herbert address revenue and billing adjustments.

- **Statement No. 11 – Todd M. Duerr.** Mr. Duerr testifies regarding Aqua PA's water and wastewater operations, LSLs, PFAS, troubled systems, and exemplary management performance.

- **Statement No. 12 – Micheal Convery.** Mr. Convery testifies regarding Aqua PA's investment in water and wastewater, including PFAS and LSL capital projects.

- **Statement No. 13 – Rita F. Black.** Ms. Black testifies regarding Aqua PA's universal service plan.

IV. PRINCIPAL ACCOUNTING EXHIBITS

Q. Were the exhibits entitled "Aqua Pennsylvania, Inc., Exhibit 1-A and 1-B, Revenue, Expense and Rate Base Claims" and "Aqua Pennsylvania Wastewater, Inc., Exhibits

1-C through 1-E, Revenue, Expense and Rate Base Claims" prepared by you or under your supervision?

A. Yes, they were.

Q. Why is Aqua PA presenting five separate revenue requirement studies, inclusive of Exhibit 1-A and 1-B (applicable to water operations) and Exhibits 1-C through 1-E (applicable to wastewater operations)?

A. Aqua PA is presenting separate revenue requirement studies to comply with the terms and conditions of the Commission's approvals of Aqua PA's acquisitions of certain water and wastewater systems that are included for the first time in this case. The terms of the Commission's approvals under Section 1329 provided that the Company would submit separate cost of service studies for those systems in its next base rate case.

Q. Please explain the content of Exhibits 1-A and 1-B and 1-C through 1-E.

A. Exhibits 1-A and 1-B and 1-C through 1-E are being submitted in support of Aqua PA's proposed rate increase for water and wastewater operations, respectively. They present the Company's pro forma revenue, expense and rate base data based on HTY (year ended December 31, 2023), FTY (year ending December 31, 2024), and FPFTY (year ending December 31, 2025). Data for the HTY were obtained from the Company's books and records. For the FTY, revenues are based on the estimated number of customers served as of December 31, 2024. Correspondingly, for the FPFTY, revenues are based on the estimated number of customers served as of December 31, 2025. Operating expenses have been similarly adjusted to reflect FTY and FPFTY-end conditions. Aqua PA's claimed rate base includes its estimated net Utility Plant in Service at December 31, 2024 and December 31, 2025.

Q. Do you anticipate the need to make additional adjustments to the data set forth in Exhibits 1-A and 1-B or 1-C through 1-E?

A. Not currently. Should adjustments or revisions become necessary the Company will provide updates accordingly.

Q. Does Aqua PA propose to submit revised accounting exhibits to reflect any such adjustments or revisions?

A. Yes. As it has consistently done in previous base rate proceedings, Aqua PA will submit, during the rebuttal phase of this case, exhibits to be identified as Exhibit 1-A(a) through Exhibit 1-E(e), which will correct any errors that may be identified, incorporate known changes and adopt any other appropriate adjustments that come to the Company's attention during the litigation process.

Q. You indicated that the Company submitted data for HTY, FTY and FPFTY. What data set will the Company principally rely upon to support its proposed revenue increase?

A. The Company will rely principally upon the data for its FPFTY as authorized by Section 315 of the Public Utility Code, 66 Pa.C.S. § 315, which allows a utility to utilize either a FTY or a FPFTY when filing a base rate case.

Q. How were the FTY and FPFTY data that appear in Exhibits 1-A through 1-E developed?

A. Exhibits 1-A through 1-E were developed in the same manner that Aqua PA has used in prior cases. The actual results for the year ended December 31, 2023, as taken from Aqua PA's books and records, were used as the starting point for purposes of developing projected revenue and expense levels anticipated as of December 31, 2024, and December

31, 2025. Specific HTY, FTY, and FPFTY rate adjustments are set forth in the referenced exhibits. The FTY capital additions and retirements, described in the Rate Base section of my testimony, were added to the Utility Plant in Service at December 31, 2023 to arrive at the FTY amount. Correspondingly, the FPFTY capital additions and retirements were added to the Utility Plant in Service at December 31, 2024, to arrive at the FPFTY amount. The Utility Plant in Service, Accumulated Depreciation, Customer Advances for Construction ("CAC"), and Contributions In Aid Of Construction ("CIAC") for the HTY, FTY, and FPFTY are shown in Exhibits 6-A through 6-E, Parts I, II, and III and summarized on Exhibits 1-A through 1-E on Schedules G-1 and G-6 respectively.

Q. Please explain the data on Schedule A-2 of Exhibit 1-A through 1-E.

A. Schedule A-2 of Exhibit 1-A and 1-B and Exhibit 1-C through 1-E shows the number of customers served at December 31, 2023, and anticipated to be served at December 31, 2024, and December 31, 2025 by customer classification. Schedule A-2 of Exhibit 1-A and Exhibit 1-B indicates that the bills of most existing accounts and newly acquired accounts will be changed by Tariff Water-PA P.U.C. No. 4. In addition, Schedule A-2 of Exhibits 1-C through 1-E shows the bills of most accounts will be changed by Tariff Sewer-PA P.U.C. No. 4.

V. OPERATING EXPENSES

OVERVIEW OF ADJUSTMENTS

Q. What is shown on Schedule C-3 of Exhibits 1-A through 1-E?

A. This schedule summarizes the adjustments to operating expenses under present rates, the details of which are shown on Schedules C-4.1 through C-10.2 in Exhibits 1-A through 1-B and schedules C-4.1 through C-9.1 in Exhibits 1-C through 1-E. Most of these adjustments are self-explanatory. Additional supporting information is included in the

back-up books entitled "Balance Sheet" and "Operating Expense". As shown in Schedule C-3 of Exhibit 1-A and Exhibit 1-B, these adjustments result in a net decrease in HTY operating expenses of $512,297, an increase in the FTY operating expenses of $10,022,409 and an increase in the FPFTY operating expenses of $14,842,729 for water service. As shown in Schedule C-3 of Exhibits 1-C through 1-E, these adjustments result in a net increase in HTY operating expenses of $1,762,418, in FTY operating expenses of $2,141,979, and in FPFTY operating expenses of $3,858,293 for wastewater service. I would note that these same adjustments are carried forward to the third, fifth, and seventh columns in Schedule A-1 of Exhibits 1-A through 1-E.

Q. Mr. Packer, are you sponsoring each of the expense adjustments noted in Schedule C-3 of Exhibit 1-A through 1-E?

A. No. The witnesses who are responsible for the expense adjustments are as follows:

EXPENSE ADJUSTMENT	SCHEDULE	RESPONSIBLE WITNESS	EXHIBIT(S)
General Price Level Adjustment	C-4.1	C. Manning	1-A to 1-E
Uncollectible Accounts	C-4.2	R. Marquis	1-A to 1-E
Additional Cost of Serving Customers	C-4.3	C. Manning	1-A and 1-C
Rate Case Expense	C-4.4	M. Ercolino	1-A to 1-E
Payroll	C-4.5	C. Manning	1-A to 1-E
Insurance Expense	C-4.6	C. Manning	1-A to 1-E
Management Service & Sundry	C-4.7	W. Packer	1-A to 1-E
Page Held for Future Use	C-4.8	N/A	1-A to 1-E
Miscellaneous Adjustment	C-4.9	C. Manning & W. Packer	1-A to 1-E
Specific Expenses Not Subject To Inflation	C-4.10	C. Manning	1-A to 1-E

Audit Fee Expense	C-4.11	M. Ercolino	1-A to 1-E
Adjustment to Amortization of Acquisition Adjustments	C-5.1	R. Marquis	1-A and 1-C
Amortization of New Negative Acquisition Adjustments	C-5.2	R. Marquis	1-C
Purchased Power Expense	C-6.1	C. Manning	1-A to 1-E
Chemical Expense	C-6.2	C. Manning	1-A to 1-E
Purchased Water Expense	C-7.1	C. Manning	1-A
Purchased Wastewater Treatment Expense	C-7.1	C. Manning	1-C to 1-E
Water Production Adjustment	C-7.2	C. Manning	1-A
Dredging Expense	C.7.3	C. Ercolino	1-A
Employee Group Insurance	C-8.1	W. Packer	1-A
Pension	C-8.2	W. Packer	1-A
Post-Retirement Benefits	C-8.3	W. Packer	1-A
401K	C-8.4	C. Manning	1-A
Remove Intracompany Benefits	C-8.5	W. Packer	1-A
Legal Expense	C-9.1	M. Ercolino	1-A
Eliminate NAWC Lobbying Expense	C-9.2	M. Ercolino	1-A
Eliminate Twin Lakes Expense	C-10.1	W. Packer	1-A
Eliminate Venango Expenses	C-10.2	W. Packer	1-A

Q. What services are provided by Aqua Services, Inc. ("Aqua Services") and how are those services charged?

A. The services cover a full range of corporate support services, including, but not limited to; accounting and financial, administration, communications, corporate secretarial, customer service and billing, engineering, financial, fleet, human resources, information systems, operation, rates and regulatory, risk management, water quality, legal, and purchasing,

contracts and sales of real estate. Please see the Attachment to OE6 for further details. Aqua Services' personnel keep time records and, where appropriate, their time and related overheads are directly assigned to the subsidiary for which they are working. Where costs incurred in rendering services in common to multiple companies, and not related exclusively to a particular company, they are allocated to all such companies based on the number of customers served by each company.

Q. Please explain the adjustments on Schedule 4.7 of Exhibits 1-A through 1-E entitled "Management Service & Sundry".

A. The amounts listed in Schedule C-4.7 of Exhibits 1-A and 1-B summarize the Company's estimated additional annual payroll expense and the increase in the Company portion of employee group insurance premiums of the service company employees whose time was charged to AP during the test year. The same data are shown in Schedule C-4.7 of Exhibits 1-C through 1-E for service company employees whose time was charged to APW during the test year.

Q. Please explain the adjustments appearing on Schedule C-8.1 of Exhibit 1-A for Employee Group Insurance.

A. Aqua PA provides healthcare coverage to all of its full-time employees. The adjustment utilizes the coverage level associated with the Company's present complement of authorized positions times the contract prices, less the employee co-pay, a vacancy credit, and an adjustment for the portion not charged to operations.

Q. Please explain the adjustment to Pension Expense as shown in Schedule C-8.2 of Exhibit 1-A.

A. In this case, the Company is requesting a pension expense allowance of $2 million (for both the FTY and FPFTY), which, in my judgment and the guidance received from the Company's pension actuary Willis Towers Watson, is a reasonable estimate of the annual amount that the Company will contribute to its pension funds on an ongoing basis. From that figure, I deducted the portion expected to be capitalized and not charged to operating expense. The capitalization percentage is the same as that used in the Payroll Expense adjustment in Schedule C-4.5 of Exhibit 1-A. This resulted in a net rounded expense decrease of $2.7 million for the FTY and no change in the FPFTY level.

Q. Can you explain the Company's adjustment to Other Post-Employment Benefits ("OPEB") recorded pursuant to Statement of Financial Accounting Standards ("FAS") 106 that is shown in Schedule C-8.3 in Exhibit 1-A?

A. Yes. The Company's claim consists of two components: (1) the annual expense and (2) the amortization of the funding deficit or excess between FAS 106 and implicit authorized rate recovery over a three-year period beginning January 1, 2025 which is the beginning of the FPFTY. The summation of the two components identified above is reduced by the portion that is capitalized. The capitalization percentage is the same as that used in the Payroll Expense adjustment in Schedule C-4.5 of Exhibit 1-A. The annual expense for the Company's employees is based on the Actuarial Valuation Report dated April 2024 for the Company's Post Retirement Welfare Plan, which has been submitted in response to filing data request OE-14.

Q. Please explain the adjustments in Schedule C-8.5 of Exhibits 1-A and Schedule C-8.1 of Exhibits 1-B through 1-E.

A. These adjustments reduce operating expenses for water base operations as presented in Schedule C-8.5 of Exhibit 1-A and increase expenses as presented in Schedule C-8.1 of Exhibits 1-B through 1-E which is an allocation of employee benefits and other general overheads necessary to reflect an appropriate amount of expenses attributable to those respective operations.

ACQUISITIONS SINCE THE 2021 BASE RATE CASE

Q. Has the Commission requested that Aqua PA find solutions for small troubled water and wastewater systems in the Commonwealth?

A. Yes. The Company is currently operating two systems under receivership orders, Twin Lakes Utilities, Inc. ("Twin Lakes") and Venango Water Company ("Venango"), issued by the Commission. Since the last case, Aqua PA has acquired three systems – the Municipal Authority of the Borough of Shenandoah ("Shenandoah"), North Heidelberg Sewer Company ("NHSC"), and James Black Water Service Company – Bell Aire Acres ("Belle Aire Acres"), all of which were small troubled systems that I will discuss. Aqua PA is committed to being a leader in promoting consolidation in the water and wastewater industry. In many instances, systems become severely troubled and government officials, regulators, and communities ask us for our assistance. This involves a significant amount of time, commitment, and coordination within many departments throughout our Company. Despite the challenges that come with troubled systems, without consolidation into a larger organization, they would not be viable. The Company remains committed to being a solution in the Commonwealth. I will further elaborate on this topic related to the Commission's determination of an appropriate equity return rate later in my testimony. Aqua PA's request for continued regulatory asset treatment associated with the systems being operated under receivership is outlined below.

Q. Please comment on the request by the PUC for AP to become the Receiver for Venango.

A. Mr. Duerr provides more detail in his testimony (Statement No. 11). This was clearly a troubled system, and I am proud of the AP team that stepped in to provide safe drinking water to these Commonwealth residents. It is an example of AP's proactive, caring, and steadfast commitment to help solve problems of small utility systems.

Q. Please explain AP's involvement with the Twin Lakes.

A. On January 14, 2021, the PUC issued an order in Docket No. P-2020-3020914 naming Aqua PA as the Receiver for the Twin Lakes water system beginning January 15, 2021, and continuing through the pendency of a proceeding brought under Section 529 of the Public Utility Code, 66 Pa.C.S. § 529 ("Section 529"). By Order entered November 18, 2021, the PUC directed AP to acquire the Twin Lakes water system. A series of appeals has followed that have continued to delay the acquisition. Since the January 14, 2021 Order, AP has acted in the capacity directed by the PUC and continued to provide safe and adequate utility service to approximately 105 customers connected to the Twin Lakes water system. AP will continue in this capacity until the litigation is resolved.

Q. Please explain APW's involvement with NHSC.

A. APW agreed to become the Receiver for NHSC during the pendency of a proceeding under Section 529 on March 5, 2018. The Commission entered an Order dated February 9, 2018, at Docket No. M-2018-2645983 identifying APW as the Receiver and specifying certain duties for Aqua PA to perform during the Section 529 proceeding. On March 31, 2023, after significant work, focus and commitment from key stakeholders, APW closed on this acquisition and is serving these customers.

Q. Please explain Aqua PA's involvement with the Belle Aire Acres.

A. On September 3, 2019, the PUC issued an order in Docket No. M-2019-3012563 naming AP as the Receiver for this system beginning September 11, 2019, and continuing through the pendency of the Section 529 proceeding. Since then, the AP has acted in that capacity directed by the PUC and continued to provide save and adequate utility service to the 19 customers connected to the Belle Aire Acres system until such time the system is acquired by a capable public utility. After significant work, perseverance, and dedication by the key stakeholders, the AP closed on this acquisition on May 2, 2024.

Q. Can you explain AP's treatment in this case of Twin Lakes and Venango – the Receivership systems and any requests thereto?

A. Yes. For the purposes of this rate case Aqua PA has adjusted revenues, expenses, and rate base to remove these systems from the consideration of its proposed based rate increase. However, Aqua PA does request that it receive approval to continue the deferred accounting treatment it was authorized in each of the proceedings to which Aqua PA was named Receiver. Aqua PA will continue the deferred accounting until its next base rate case following the final resolution of each of the two receiverships. When it files that base rate case, Aqua PA will present claims for any return on or return of investments and expenses incurred by Aqua PA until said rate relief. Given the fact that these systems have not been acquired by Aqua PA, I believe this request is reasonable.

DEFERRED ACCOUNTING TREATMENT OF BAD DEBT DUE TO THE PANDEMIC

Q. Please discuss the PUC's May 13, 2020 Secretarial Letter regarding COVID-19 Cost Tracking and Creation of Regulatory Asset?

A. The May 13, 2020 Secretarial Letter ("Secretarial Letter") responded to Governor Wolf's March 6, 2020 Proclamation of Disaster Emergency ("Emergency Proclamation"). To that

end, the Commission issued an "Emergency Order". The Emergency Order declared a termination moratorium for public utility services. Recognizing the pandemic in general and the termination moratorium specifically would likely increase costs to utilities (e.g., uncollectible expense), the Commission then issued a Secretarial Letter dated May 13, 2020, that directed public utilities to "account for prudently incurred incremental extraordinary, nonrecurring expenses related to COVID-19, which result from compliance with the Commission's moratorium suspension." Utilities also were specifically authorized to create regulatory assets for incremental uncollectible expenses (related to COVID-19) above those embedded in base rates.

Q. Did Aqua PA make a claim for incremental COVID-19 expenses related to uncollectible accounts expense in its 2021 Base Rate Case?

A. Aqua PA identified the deferred incremental uncollectible accounts expenses related to COVID-19 through the end of the HTY (March 31, 2021) in that case. However, the Company deferred seeking recovery of these expenses and requested to continue deferring incremental uncollectible accounts expense over and above its recovery levels such that they can be reviewed for reasonableness and recovered in this proceeding, The PUC authorized this continued deferral, because at the time of the 2021 Base Rate Case it was unknown whether additional expenses resulting from COVID-19 would be incurred, or whether any deferred amounts would subsequently be collected from customers.

Q. Did the PUC direct a cut-off date for incremental uncollectible accounts expenses in the 2021 Base Rate Case?

A. No. However, the Company ceased recording any adjustments to deferrals as of December 31, 2022, which was one quarter prior to the end of the FPFTY in the last rate case.

Q. What is the Company's claim for deferred incremental uncollectible accounts expense resulting from COVID-19?

A. The Company is requesting recovery of its deferred expenses occasioned by the COVID-19 pandemic over a two-year period beginning in the FPFTY in this application. Specifically, in Exhibits 1-A and 1-C, Schedule C-4.9, the Company is requesting an expense amortization of $2,511,175 and $419,962 annually for its water and wastewater operations respectively. The total recovery of deferred expense cost total $5.862 million.

Q. Is it appropriate for the Company to recover these deferred amounts?

A. Yes. They represent costs incurred for uncollectable expense over and above recovery levels established prior rate cases going back to 2018. Absent deferral this would impair the Company's opportunity to realize fair operating returns for service provided during an extremely difficult period nationally. Utility service is as an indispensable service, as such, utility companies like Aqua PA were expected to maintain safe, adequate, and reliable utility service, while other industries were shut down completely. The understandable difficulties many of our customers faced during this time economically were financially bridged during this period by virtue of the Emergency Order and termination moratorium. This was able to be accomplished through solid utility management and securing additional short-term liquidity through Aqua's parent company Essential.

VI. DEFERRED ACCOUNTING REQUEST PFAS TREATMENT COSTS

Q. Please explain the Company's request for the Commission to authorize it to defer costs incurred associated with PFAS Treatment?

A. The Company is seeking approval of its request to defer costs incurred that are not reflected in the cost of service rates resulting from this rate case, but are expected to be completed

during the calendar years 2026 and thereafter. This would include the cost of deferred depreciation on new assets placed in service, incremental O&M expenses incurred over FPFTY levels established in this filing, and a carrying cost of capital while the deferred amounts are not reflected in base rates charged to customers.

Q. Why is the Company seeking this relief?

A. Deferred accounting authorization is typically utilized for significant, non-recurring, type events affecting utilities, that absent deferred authorization, the economic impacts of the investments and expense incurred would significantly impair the Company's opportunity to realize a Commission authorized fair rate of return.

Q. Are the costs expected to be incurred significant?

A. Yes. Current estimates for capital investments to deal with PFAS treatment are approximately $300 million, spent between 2024 and 2029. Additionally, incremental O&M expenses occasioned by PFAS solutions are estimated to be as much as five percent of the capital invested. Company witnesses Duerr (Statement No. 11) and Convery (Statement No. 12), provide greater details as to the scope of the PFAS challenges facing the Company and details on projects underway, a small portion of which are included in this case.

Q. Is the Company pursuing any actions to offset costs expected for PFAS?

A. Yes. We have pursued and received grant funds to offset approximately $10 million of investments made for production wells in North Hills and Hatboro. Furthermore, we are actively seeking additional grant funds and low interest loans through PENNVEST. Finally, we are participants in class action lawsuits against the known major chemical manufacturing companies. We have no assurance of receipt of such further grants, loans

or litigation proceeds, and therefore have not projected such amounts in this case. To the extent that any funds are received as a result of these efforts, it is expected that the majority of such funds would be deferred as well, along with the costs I have outlined, with the Commission deferral authorization we are seeking.

VII. DEPRECIATION, TAXES AND OTHER ITEMS

Q. The next series of adjustments to Aqua PA's Statement of Income is found in Schedules D-1 through D-2.5, E-1 through E-4, and F-1 through F-2 of Exhibits 1-A through 1-E. Who are the responsible witnesses for these adjustments?

A. The responsible witnesses for the adjustments are as follows:

ADJUSTMENT	SCHEDULE	RESPONSIBLE WITNESS	EXHIBIT(S)
Summary of Depreciation	D-1	R. Marquis & J. Spanos	1-A to 1-E
Summary of Adjustments To Taxes Other Than Income	D-2	R. Marquis	1-A to 1-E
PUC - General Assessment	D-2.1	R. Marquis	1-A to 1-E
OCA and OSBA - General Assessment	D-2.2	R. Marquis	1-A to 1-E
Public Utility Realty Tax	D-2.3	M. Ercolino	1-A to 1-E
Pennsylvania Property Tax	D-2.4	M. Ercolino	1-A to 1-E
Payroll Taxes	D-2.5	C. Manning	1-A to 1-E
Interest on Long-Term Debt	E-1	W. Packer	1-A to 1-E
Amortization of Debt Discount and Expense	E-2	W. Packer	1-A to 1-E
Other Interest Charges	E-3	W. Packer	1-A to 1-E
Interest During Construction	E-4	W. Packer	1-A to 1-E
Summary of Adjustment to Income Taxes	F-1	P. Fischer	1-A to 1-E

Computation of Federal and State Income Taxes Under Present and Proposed Rates	F-2	P. Fischer	1-A to 1-E

Q. Please explain your calculation of interest on long-term debt on Schedule E-1 of Exhibits 1-A and 1-B and Exhibits 1-C through 1-E.

A. A calculation is made to synchronize the interest expense applicable to the long-term debt portion with the original cost rate base as of December 31, 2025. I have used the same capital structure as recommended by Mr. Moul for rate of return purposes (see Statement No. 7 and Exhibit 4-A). The projected weighted cost rate of long-term debt (for both water and wastewater) as of December 31, 2024 and December 31, 2025 is 4.24% and 4.32%, respectively. The synchronized interest was used to adjust the interest expense recorded for the year ended December 31, 2023 and the resulting adjustment carried forward to Schedule A-1 of Exhibits 1-A and 1-B and 1-C through 1-E.

Q. The next adjustment is for amortization of debt discount and expense appearing on Schedule E-2 of Exhibits 1-A and 1-B and Exhibits 1-C through 1-E. Please explain this adjustment.

A. This adjustment removes those costs because, consistent with the way these costs are reflected for ratemaking in Pennsylvania, their recovery has been reflected in the yield-to-maturity calculation of Aqua PA's claimed long-term debt cost rate.

Q. Schedule E-3 of Exhibits 1-A and 1-B and Exhibits 1-C through 1-E reflects decreases in other interest charges. Please explain this adjustment.

A. Other interest charges for the year ending December 31, 2023 were principally for funds borrowed through bank loans to finance Aqua PA's capital expenditures. The bank loans

outstanding are anticipated to be refinanced with long-term debt prior to the end of the FTY. Therefore, the interest on bank loans has been eliminated.

Q. The last adjustment, on Schedule E-4 of Exhibits 1-A and 1-B and Exhibits 1-C through 1-E, is for interest during construction. Please explain this adjustment.

A. For financial accounting purposes, interest during construction is recorded as income. However, for ratemaking purposes, it is reflected in the allowance for funds used during construction ("AFUDC") and included in the original cost of utility plant. This adjustment is made to eliminate interest during construction as income and is consistent with the treatment accorded this item in Aqua PA's previous base rate cases.

VIII. RATE BASE

Q. Please describe the data presented in Schedule G-1 of Exhibits 1-A through 1-E.

A. Those pages show Aqua PA's claimed original cost measure of value as anticipated under present and proposed rates for the FTY and FPFTY.

Q. Schedules G-2 through G-7 in Exhibits 1-A through 1-E set forth various components of the Company's rate base claim. Please identify the responsible witnesses for these items.

A. Witness responsibilities are as follows:

ADJUSTMENT	SCHEDULE	RESPONSIBLE WITNESS	EXHIBIT(S)
Utility Plant in Service & Accumulated Depreciation	G-2	J. Spanos & R. Marquis	1-A to 1-E
Utility Plant Acquisition Adjustments	G-3	R. Marquis	1-A and 1-C
Materials & Supplies	G-4	W. Packer	1-A
Cash Working Capital	G-5	H. Walker	1-A to 1-E

CIAC & CAC	G-6	J. Spanos & R. Marquis	1-A to 1-E
Deferred Income Taxes	G-7	P. Fischer	1-A to 1-E

Q. Please explain the addition in Exhibit 1-A for materials and supplies.

A. As shown in Schedule G-4 of Exhibit 1-A, this amount was developed by averaging the monthly balances in the Materials and Supplies account for the thirteen months ended December 31, 2023. While Exhibit 1-C contains a schedule G-4, Aqua PA does not maintain a significant number of standby materials and supplies for wastewater operations and, therefore, material and supplies are expensed as they are purchased.

Q. Has Aqua PA included a claim for cash working capital in rate base?

A. Yes. Please refer to the testimony and exhibits of Mr. Walker (Statement No. 9). The results of Aqua PA's lead/lag study yielded a positive result, thus Aqua PA, consistent with Commission practice, is making a claim for cash working capital. The calculations are included in Exhibit 1-A through 1-E, Schedules G-5.1, G-5.2, G-5.3, and G-5.4.

IX. CAPITAL STRUCTURE RATIOS

Q. Mr. Moul's proposed rate of return, as set forth in Exhibit 4-A, is based on a FPFTY-end capital structure consisting of 46.05% long-term debt and 53.95% common equity. How were these figures derived?

A. Consistent with past practice, the starting point was Aqua PA's actual capitalization at the end of the HTY. The respective amounts of long-term debt and common equity at December 31, 2023 were then adjusted to reflect anticipated changes during the FTY and FPFTY. In sum, Aqua PA's total permanent capitalization is expected to increase by approximately $447 million (net of depreciation) over that period.

Q. What accounts for that increase?

A. There are several factors. Aqua PA's long-term debt balance is anticipated to grow by nearly $93 million because of the issuance of new and the retirement of existing debt series. The net effect of these financings is a slight increase in Aqua PA's embedded long-term debt cost rate from 4.24% to 4.32%. Aqua PA's common equity is projected to increase by $354 million. Details regarding all these changes are provided on Schedule 5 of Exhibit 4-A. Total capitalization and total rate base are both projected to be approximately $5 billion by the end of the FPFTY. Unfortunately, rising interest rates have resulted in an increase in long term debt costs of approximately $7 million of the total requested revenue increase in this case.

X. RETURN ON EQUITY CONSIDERATIONS

Q. Please explain how Aqua PA derived its requested return on equity allowance.

A. In Statement No. 7, Mr. Moul has recommended a return on common equity ("ROE") of at least 10.95%. His testimony and Exhibit 4-A offer a through explanation of his calculation methodology. The various methodologies used by Mr. Moul produced an ROE range of 10.58% to 13.80%. Looking only at the Discounted Cash Flow ("DCF") and Risk Premium ("RP") methods (which is reflective of past Commission practice) produces a narrower range of 10.58%-11.50%. Based on this range, Mr. Moul observes that the ROE being proposed in the calculation of the cost of service at 10.95% is notably at the lower end of the range he analyzed. As observed by Mr. Moul, an ROE of 10.95% is utilized for the purposes of calculating the Company's overall revenue requirement in this instant proceeding, which is certainly reasonable, and again, within Mr. Moul's range of ROEs I described earlier.

Q. Please explain why you believe Aqua PA is entitled to an equity allowance that recognizes exemplary managerial performance.

A. Aqua PA has consistently provided its customers with safe and reliable water and wastewater service at reasonable rates. This is the product of a mission based, dedicated, and knowledgeable workforce that is constantly seeking to improve quality and control costs. Aqua PA is committed to providing safe and reliable service to the community and protecting the environment. Aqua PA continues to accept the challenge of acquiring troubled or weaker water and wastewater systems in an effort to promote the Commission's goal of regionalization. Mr. Duerr also provides reasons and examples supporting an equity allowance that recognizes exemplary managerial performance.

Q. Could you be more specific with respect to the measures undertaken by Aqua PA that you believe should enter the Commission's determination of an appropriate equity return rate?

A. In my view, the Company's performance in the following areas fully supports a return of at least 10.95%:

1. Water Quality

AP has achieved significant compliance with all existing Federal and State drinking water standards in its water systems in Pennsylvania. AP provides filtration for all surface water sources and disinfection for all ground water sources and specialized treatment for specific contaminants where necessary.

AP has been a leader in the industry on several fronts. To proactively address customer owned LSLs, the Company filed its LSL application under Act 120 of 2018, P.L. 738, No. 120, prior to the issuance of the Commission's final regulations promulgated

pursuant to Section 1311(b)(2) of the Public Utility Code, 66 Pa. C.S. § 1311(b)(2), to help customers address this issue sooner. AP successfully worked with stakeholders in an expedited fashion to help address customer-owned LSLs in one community where this issue occurred. AP has since expanded its LSL replacement program to remove lead and galvanized service lines throughout its footprint and to comply with regulations issued by the Pennsylvania Department of Environmental Protection ("PADEP") and the U.S. Environmental Protection Agency ("EPA").

In addition, AP continues to be a leader when it comes to addressing emerging contaminants. Managing emerging contaminants is a continuous process as science improves our ability to detect and understand the impacts of chemicals in use for decades as well as newly developed chemicals. In February 2020, AP announced that it is committed to installing mitigation technology at water treatment facilities where sources of water exceed 13 parts per trillion ("ppt") for any PFAS substance. Setting a company-wide standard of 13 ppt, well below the then in place EPA non-enforceable health advisory level of 70 ppt is a significant benefit to our customers. I also highlight that AP worked to obtain a PENNVEST grant in the amount of $5,217,178 for the Hatboro wells which addressed PFAS treatment. Grant funds received by the Company are treated as a CIAC which reduces rate base and future depreciation expense, thus a reduction customer rates.

Aqua PA operates a water-quality laboratory in Bryn Mawr that conducts thousands of tests annually on water and wastewater samples from Aqua PA's systems across the Commonwealth. The laboratory has a national reputation in the field of testing for trace levels of compounds. In fact, the laboratory operates testing equipment that can detect down to the ppt level. Customer water quality is incredibly important to Aqua PA.

Therefore, Aqua PA maintains a Technical Services Department that is in the laboratory and is staffed to handle water quality complaints exclusively. Having this staff with ready access to the resources of Aqua PA's laboratory allows for prompt response, investigations, and resolution of water quality complaints.

In March 2023, the Company was informed of an 8,000-gallon spill of hazardous chemicals near our Bristol Water Treatment Plant and just upstream of the Delaware River. The Company's response to this incident was highly regarded as excellent and emergency lab testing services were performed for multiple entities impacted by this event. Company witness Mr. Todd Duerr (Statement No. 11) covers this in more detail in his testimony.

2. Wastewater Treatment Compliance

As I noted earlier, APW has been growing its wastewater utility service through the acquisition of systems that come in various states of compliance, need for repair and attention. It has demonstrated that it can be the solution to ever growing wastewater utility challenges and continues to make improvements to wastewater utility infrastructure as reflected by the capital additions included in its utility plant in service in this case, which include some larger-scale treatment plant upgrades.

The Company has a team of wastewater managers and operators that maintain and safely operate these wastewater systems. Our wastewater team has a deep bench of prior experience, including running the Philadelphia Long Term Combined Sewer Overflow ("CSO") Program and Wet Weather Programs for the City of Philadelphia as well as industrial pretreatment and combined sewer system and management of consent orders and operating and managing the 20 million gallons per day City of Scranton wastewater treatment plant, which includes a CSO collection system.

3. System Reliability & Infrastructure Rehabilitation

The Company continues to fulfill its obligation to provide safe and reliable utility service to its customers and the facts presenting in this application are no exception. The goal of reliable utility service is to achieve 24-hour per day uninterrupted service to all customers and, especially, to customers with specific health care and public safety needs such as hospitals, outpatient surgical centers, schools, and public and private fire protection systems.

The facilities that Aqua PA has installed over the years, combined with its professional operations and maintenance staff, assure that customers' needs are met, and that uninterrupted service is provided. Company witnesses Duerr and Convery (Statement Nos. 11 and 12) provide examples and greater detail of the below summarized infrastructure investments in the assets providing utility service to customers. These proactive measures include, but are not limited to:

- Water Treatment Plant Investments:
  - Crum Creek Water Treatment Plant – Pre-Treatment Facility
  - Pickering Water Treatment Plant - Phase 1 Filter Additions
  - Roaring Creek Water Treatment Plant – Bear Gap Rehab Primary Spillway
  - Shenango Water Treatment Plant – Contact Basin
- Distribution System Investments:
  - 2,700 linear feet 36-inch, transmission pipe – Neshaminy to Bethayres
  - 3,000 linear feet 12-inch ductile iron pipe – Coventry Lane
  - 12,000 linear feet of 36-inch transmission pipe and interconnection – Thorndale.

- 2,000 linear feet of 20-inch ductile iron pipe and 1,000 linear feet of 16-in ductile iron pipe – South Oak Avenue & Providence Road
- 3,900 linear feet of 16-inch distribution pipe – East Eagle Road

- LSL Replacement Program:
  - The Company has an active LSL replacement program that it continues to make significant investments annually.
- Process Control Systems:
  - The Company is reinforcing the security of our Supervisory Control and Data Acquisition ("SCADA") servers by moving them to a new off-site location where both physical security and cybersecurity is improved.
- Dam Efficiency Study:
  - The Company is currently evaluating two of our dams for the potential of low-impact hydro power generation.
- PFAS Treatment:
  - Chalfont Well #11
  - Hatboro Wells #6 & #8
  - Perkiomen Woods
- Wastewater Infrastructure Investments and Consolidation:
  - Penn Township Wastewater Treatment Plant Phase II
  - Deerfield Knoll Wastewater Treatment Plant to Pump Station (Consolidation)
  - Penn London Wastewater Treatment Plant to Pump Station (Consolidation)
  - Cheltenham Interceptor A

- Inflow and Infiltration investigations – Cheltenham and East Norriton
- Pump Station Upgrade – East Norriton

In each case these, and other, improvements have enhanced the efficiency, reliability, and the quality of service to customers. Aqua PA has invested, and will continue to invest, in its infrastructure to improve its systems.

4. Customer Service

Since the last rate case, Aqua PA has implemented mobile application access to customers through an ePortal, that enables customers to view their account, manage it, and access their consumption data. Customers can have real-time updates on service outages and visibility into service orders.

Our team developed a process for displaying disruptions on Aqua PA's external website, with an interactive map-based solution. The new experience, and what our customers will have access to on Aqua PA's externally facing, public website, will involve an external Geographical Information System Disruption Map that will allow them to see activity in their service area by simply entering a street address, city, zip code, or by using their smart phone's location. The map website will be updated every hour to provide our customers with the latest updates on disruptions to their service.

5. Acquisition of Small Troubled Water and Wastewater Systems

Aqua PA has acquired many community water systems previously owned and operated by entities within the public and private (private investor-owned or homeowners' associations) sectors. Upon acquiring these systems, Aqua PA made immediate improvements in quality, supply, and customer service. At the same time, existing customers have received the benefits of improved efficiency and the spreading of fixed

costs over a larger customer base. From a more macro viewpoint, the regionalization of water and wastewater systems will allow for consistent, reliable service, which, in turn, improves the economics and quality of life of the regions the Company serves.

Aqua PA intends to continue to provide solutions for the long-term water supply and wastewater treatment requirements in Pennsylvania. Since the conclusion of the Company's last rate case, it has completed its acquisitions of NHSC and Belle Aire Acres. Also, the Company currently serves as the PUC appointed receiver of the Venango and Twin Lakes systems.

6. Aqua Aid & Customer Assistance Programs ("CAP")

Aqua PA voluntarily implemented a program in 1994 designed to facilitate the payment of water bills by its low-income residential customers. This program is called "A Helping Hand." It was the first program of its kind offered by any investor-owned water utility in Pennsylvania and has been looked at as a model by other utilities. This program provides water audits, appropriate repairs where necessary and, upon the identification of qualified customers, the partial forgiveness of prior arrearages or a grant. In the current proceeding, Aqua PA is continuing its comprehensive approach to address affordability for low-income customers.

Aqua PA voluntarily proposed, and the Commission approved, a robust and comprehensive CAP in the 2021 Base Rate Case, with a tiered structure similar to the structure in place at the Peoples Companies that provides the largest benefit to those with the least income. The CAP is available to both water and wastewater customers. Further details are covered in the testimony of Ms. Black (Statement No. 13).

7. Aqua PA is recognized in Pennsylvania for excellence in a key area of operations. Following are examples of awards Aqua PA has received since its last rate filing.

All twelve of Aqua PA's surface water treatment plants in Pennsylvania are enrolled in the Partnership for Safe Water, a program developed by the EPA, the American Water Works Association ("AWWA"), and other organizations to guide water utilities towards improving drinking water quality by optimizing system operations. Four of Aqua PA's surface water treatment plants have achieved the Phase III Directors Award, and two water treatment plants have received the President's Award (the highest-level award). AWWA is the largest organization of water supply professionals in the world.

Q. Mr. Packer, please summarize why you believe the Commission should grant Aqua PA's requested rate increase.

A. Overall, Aqua PA is a mission-based utility focused on providing safe and reliable service to its customers. It consistently makes prudent and necessary investments in its infrastructure to serve customers. With the approval of an adequate ROE, Aqua PA will be able to continue to address the formidable tasks of rehabilitating its infrastructure, acquiring and repairing aging and troubled systems, and maintaining quality service. The Commission has given clear signals that service quality is a critical component in establishing rates.

XI. CONCLUSION

Q. Does that conclude your Direct Testimony at this time?

Yes, however I reserve the right to supplement my Direct Testimony as needing during the progression of this case.

VII. MISCELLANEOUS 9

VIII. CONCLUSION 10

I. INTRODUCTION AND PURPOSE OF TESTIMONY

Q. What is your name and business address?

A. My name is Renee T. Marquis. My business address is 762 W. Lancaster Avenue, Bryn Mawr, Pennsylvania 19010.

Q. By whom are you employed and in what capacity?

A. I am employed by Essential Utilities, Inc. ("Essential") as Manager of Rates.

Q. On whose behalf are you providing this direct testimony?

A. I am providing this testimony on behalf of Aqua Pennsylvania, Inc. ("AP") and Aqua Pennsylvania Wastewater, Inc. ("APW") (collectively "Aqua PA" or the "Company").

Q. Please describe your education and business experience.

A. I graduated from Widener University in 2004 with a Bachelor of Science degree in Business Administration with a concentration in Accounting. I also have my Master of Business Administration, with a concentration in Business Process Management, which was attained in 2016. Prior to joining Aqua PA, I worked for KPMG, LLP as a Senior Associate where I performed financial statement audits and reviewed internal control practices for a variety of clients. In 2009, I joined Widener University in the position of Senior Accountant, where I continued to utilize my background in financial accounting by performing various functions including, but not limited to, account reconciliations, variance analysis, and account analysis including property, plant, and equipment. In August of 2014, I joined Aqua Services, Inc. ("Aqua Services") as a Director, Property Accounting, where I was responsible for oversight and administration of Aqua America Inc.'s ("Aqua America") utility plant accounting subledger. In July of 2015, I was promoted to Manager of Rates and Planning at Aqua PA. In September of 2019, I was

promoted to Director of Investor Relations at Essential. In April of 2024, I returned to the Rates department as the Manager of Rates.

Q. What are your duties as Manager of Rates?

A. My duties as Manager of Rates primarily include assisting with the preparation and presentation of rate case filings for the subsidiaries of Essential. I report directly to the Vice President Rates and Regulatory Accounting and Regional Controller, with whom I assist in the oversight and direction of regulatory accounting matters for the Company.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to: (1) identify and describe certain adjustments of the Company's expense and rate base claims that I am sponsoring as presented in Exhibits 1-A through 1-B and Exhibits 1-C through 1-E in support of the Company's proposed rate increase for water and wastewater operations, respectively; (2) provide an overview of the Company's acquisitions since the end of its last water and wastewater base rate case; and (3) discuss proposed tariff changes.

Q. For which of the Company's Exhibits are you responsible?

A. I am responsible for portions of Exhibits 1-A through 1-B and Exhibits 1-C through 1-E including: (1) various operating expenses; (2) change in amortization acquisition adjustments; (3) amortization of new negative acquisition adjustments; (4) depreciation; and (5) taxes other than income, including general assessment fees. In addition, I am responsible for Exhibit 3, and I assisted in the preparation of the following backup volumes that contain responses to the Pennsylvania Public Utility Commission's ("Commission") standard rate case filing requirements: Statement of Income, Operating Revenue, Operating

Expense, Rate Base, Rate of Return, Rate Structure, Balance Sheet, and Other Data as all of these are indispensable to the rate case filing.

Q. Are you including any other exhibits with your testimony?

A. Yes. Attached to my Direct Testimony is RTM-1, RTM-2, and RTM-3.

II. CERTAIN OPERATING EXPENSES

Q. Did you prepare any adjustments to the Company's Operating Expenses?

A. Yes, I am responsible for the following adjustments: (1) Uncollectible Accounts; (2) Derivation of Uncollectible Accounts; (3) Change in Amortization of Acquisition Adjustments; and (4) Amortization of New Positive Acquisition Adjustments.

Q. Please explain the adjustment to Uncollectible Accounts expense on Schedule C-4.2 of Exhibits 1-A through 1-E.

A. The Company's claims for uncollectible accounts expense were developed by applying the three-year average factor of net write-offs (as supported in Schedule C-4.2.i) to the Historic Test Year ("HTY"), Future Test Year ("FTY") and Fully Projected Future Test Year ("FPFTY") level revenues at present rates for both Exhibits 1-A and 1-C.

The annualized uncollectible accounts factor was calculated by utilizing the Company's actual write-off experienced for the three years ended December 31, 2023, divided by the Total Sales to General Customers for the three years ended December 31, 2023. The three years included within the average calculations are for the twelve months ended December 31, 2021, December 31, 2022, and December 31, 2023. For water, Schedule C-4.2.i in Exhibit 1-A calculates an annualized uncollectible accounts factor of 0.44006%. For wastewater, Schedule C-4.2.i in Exhibit 1-C calculates an annualized

uncollectible accounts factor of 1.05080%. Schedule C-4.2 also includes an adjustment for arrearage forgiveness as part of Aqua PA's customer assistance program.

Q. Please explain the amortization of Acquisition Adjustments shown on Schedule C-5.1 of Exhibit 1-A and 1-C.

A. There are eight acquisition adjustments in Exhibit 1-A and nine acquisition adjustments in Exhibit 1-C that will be fully amortized by the end of the FPFTY.

Q. Please explain the Amortization of New Negative Acquisition Adjustment on Schedule C-5.2 of Exhibit 1-C.

A. The Company is proposing to amortize the negative acquisition adjustment involving the North Heidelberg acquisition that was closed after the completion of Aqua PA's last rate case. Listed on Schedule C-5.2 of Exhibit 1-C is the first year amortization of the new negative acquisition adjustment. A twenty-year amortization period was selected, similar to the treatment of prior acquisition adjustments approved by the Commission.

III. DEPRECIATION AND TAXES OTHER THAN INCOME

Q. Please explain the Statement of Depreciation shown on Schedule D-1 of Exhibits 1-A through 1-B and Exhibits 1-C through 1-E.

A. The Statement of Depreciation in Exhibits 1-A through 1-B and Exhibits 1-C through 1-E shows the Company's annual depreciation expense claims for the FTY and FPFTY for both water and wastewater assets. The annual provision for depreciation was computed by Mr. John Spanos for utility plant in service as of December 31, 2024 and December 31, 2025 using the straight-line average remaining life method as set forth in Mr. Spanos's Exhibit Nos. 6-A through 6-E. The amount computed by Mr. Spanos (Statement No. 6) relates to utility plant in service, inclusive of customers' advances for construction ("CAC"),

contributions in aid of construction ("CIAC") and any related retirements of assets. Comparing the Company's claimed amount with the annualized depreciation expense for the year ended December 31, 2023, results in a FTY increase of $4,595,747 and a FPFTY increase of $3,878,754 for water assets; additionally, a FTY increase of $828,692 and a FPFTY increase of $609,726 for wastewater assets.

Q. Please explain the summary provided in Schedule D-2 of Exhibits 1-A through 1-E.

A. The schedules referenced show a summary of the adjustments to taxes other than income taxes for the HTY, FTY, and FPFTY at present rates and the FPFTY at proposed rates. Each of the adjustments is discussed below.

Q. Please explain the adjustments for General Assessments within Exhibits 1-A through 1-E.

A. The adjustment set forth on Schedules D-2.1 and D-2.2 of Exhibits 1-A through 1-E are related to the General Assessments, which provide funding for Commission, Office of Consumer Advocate ("OCA"), Office of Small Business Advocate ("OSBA"), and the Damage Prevention Committee ("DPC") and are based on the actual assessment factors billed for the period July 1, 2023 to June 30, 2024. The assessed rates were applied to Gross Utility Revenues at present rates for the FTY and FPFTY and at proposed rates for the FPFTY.

IV. CERTAIN COMPONENTS OF RATE BASE

Q. Please describe the data presented in Schedule G-2 of Exhibits 1-A and 1-B through 1-E and identify who is responsible for this data.

A. Schedule G-2 shows the Company's actual utility plant in service as of December 31, 2023, and the projected utility plant in service per scheduled additions and retirements for the

twelve months ending December 31, 2024 and December 31, 2025. It also shows the Accumulated Depreciation for each year associated with the Utility Plant in Service. I worked with Mr. Spanos by providing him Company data on projected FTY and FPFTY additions and retirements amongst all categories of utility plant in service, including linear property, non-linear property, information technology hard & soft costs, and supervisory control and data acquisition ("SCADA"). Accordingly, the aforementioned data was used as the basis for Mr. Spanos's Exhibit Nos. 6-A through 6-E.

Q. Please explain the derivation of the total Original Cost of Utility Plant in Service for both water and wastewater assets for the FTY and FPFTY as reflected in Schedule G-2 and referenced in Schedule G-1 of Exhibits 1-A through 1-E.

A. The starting point for both water and wastewater utility plant in service was the HTY ending balance of $5,726,651,949 for water and $686,471,223 for wastewater. That figure was then increased to reflect FTY and FPFTY plant additions (net of retirements) and acquired systems utility plant acquisition adjustments ("UPAA"), which will be discussed later in my testimony. The anticipated additions and retirements of water assets for the years ended December 31, 2024, and December 31, 2025, are set forth in detail in Attachment RTM-1 to my testimony and are comprised of needed improvements to the Company's infrastructure including, but not limited to water supply, storage, and distribution facilities. The majority of the Company's capital investment remains in distribution assets such as mains, services, hydrants, valves, and meters. The anticipated additions and retirements of wastewater assets for the years ended December 31, 2024, and December 31, 2025, are set forth in detail in Attachment RTM-2 to my testimony. Details of capital investments are covered in Statement No. 12 by Aqua PA witness Michael

Convery. Details of the accumulated depreciation used in Schedules G-2 can be found in Statement No. 6 authored by Aqua PA witness John Spanos.

Q. Please explain the adjustments on Schedule G-3 of Exhibit 1-A.

A. The adjustment in Schedule G-3 of Exhibits 1-A reflect the fully amortized positive UPAA of N.U.I. and White Rock.

Q. Please explain the reductions from rate base for CIAC and CAC as listed on Schedules G-6 of Exhibits 1-A through 1-E.

A. These reductions to rate base are summarized in Mr. Spanos's Exhibits 6-A through 6-E. The CIAC and CAC related to plant in service at December 31, 2023, reflect the actual CIAC and CAC recorded on the Company's books of account as of that date.

V. ACQUISITIONS

Q. Please provide an overview of the North Heidelberg Sewer Company ("North Heidelberg") troubled wastewater acquisition which the Company is reflecting in its rate base pursuant to Section 1327 of the Public Utility Code, 66 Pa. C.S. § 1327.

A. Since the Company's last rate case was filed, the Company has completed the acquisition of WW-1, North Heidelberg, which is not yet reflected in the Company's rate base. Exhibit 3 contains the journal entry and the original cost study for the acquisition, as mentioned above corresponding to the listed classification system.

Q. How does the Company propose to treat this acquisition for rate purposes?

A. With respect to this acquisition, the Company paid less than depreciated original cost ("DOC"), the assets acquired were recorded on its regulatory books of account at DOC, and the Company has amortized the difference between the DOC and purchase price as an

offset (i.e., reduction) to revenue requirement consistent with Section 1327 of the Public Utility Code. This is considered a "negative" acquisition adjustment.

Q. Section 1327 enumerates certain criteria that an acquiring company must meet in order to include the acquisition adjustment in rate base. Do you believe that the acquisition for which you are seeking "negative" acquisition adjustment treatment satisfies those criteria?

A. Yes, I do. The specific acquisition falling into the "negative" acquisition adjustment category, as well as the proposed amortization of the adjustment associated therewith, are set forth on Schedule C-5.2 of Exhibit 1-C. Exhibit 3 consists of a series of schedules which describe how the acquisition shown on Schedule C-5.2 of Exhibit 1-C satisfies the requirements of Section 1327.

Q. How did Aqua PA determine the DOC of the North Heidelberg system acquired since its last case?

A. The Company engaged outside professional utility valuation firm Gannett Fleming who are experienced and knowledgeable in performing utility valuations pursuant to Commission requirements. The results of those analyses were documented in the form of an original cost study which is being submitted with this rate filing as part of Exhibit 3.

VI. CONSOLIDATION OF RATE ZONES

Q. Please discuss the proposed consolidation of rate zones and updates in the proposed Water and Wastewater Tariffs.

A. As in prior rate cases, the Company continues to consolidate and move toward single tariff pricing. Company Witness Heppenstall's (Statement No. 5) proposed rate design outlines these changes, and they are included in Original Tariff Water-PA P.U.C. No. 4 and Original

Tariff Sewer-PA P.U.C. No. 4. The Company has also provided updates and clarifications to the proposed tariffs, in particular, the addition of more robust pretreatment and wastewater control regulations in the Original Tariff Sewer-PA P.U.C. No. 4.

Q. Please generally describe how APW wastewater customers are billed.

A. If the customer is an AP water customer or has a water meter from another water company, the Company will utilize the water reads to calculate the wastewater usage for the wastewater customer. If the customer is on a private well or the water reads are not available, APW will calculate a flat fee to bill the customer. APW's preference is to charge both a base facility charge and a volumetric charge, which we believe encourages conservation and provides customers' with greater control over their wastewater bill.

Q. How many APW wastewater customers are billed on a flat rate?

A. Currently there are approximately 9,400 wastewater customers that are charged a flat fee. In this case, APW is moving approximately 4,500 of those customers to metered billing. The majority that are moving a metered wastewater rate are for the East Whiteland system. The remainder of customers are on private wells.

VII. MISCELLANEOUS

Q. Please provide information on commitments/directives from prior PUC orders.

A. The Company is providing the following information related to certain Commission orders since the last base rate case:

- Requested billing information: Shenandoah $429,632, Lower Makefield $508,966, and East Whiteland $271,552.
- Infrastructure Investment and Jobs Act ("IIJA"): any grant funds received through IIJA funding is treated as CIAC.

- Information regarding AP's building lease: the Company was required to provide testimony of the rate charged per square foot that was developed in the most recent study versus the rate charged to Aqua Services. A comparison is not necessary as the rate is the same and is reasonable as it based on a market rate. The most recent study is included with my testimony as Attachment RTM-3. Total square feet (sq. ft.) of AP headquarters 129,996 sq. ft. Area of AP headquarters occupied by Aqua Services is 55,498 sq. ft. Area of AP headquarters that is rented by Aqua Services is 70,975 sq. ft.
- Penn Township territory expansion: the assets are not included in this rate case due to timing issues.

VIII. CONCLUSION

Q. Does that conclude your testimony at this time?

A. Yes, it does, but I reserve the right to supplement my testimony as needed during this proceeding.

MARKET OVERVIEW –

762 West Lancaster Avenue boasts a prime location in the center of Bryn Mawr along the Main Line submarket of the Philadelphia Western Suburbs. The market is revered by many and lures a diverse tenant base due to its proximity to the homes of business leaders, the vibrancy of a small town feel and a broad spectrum of amenities. The market consists mostly of older commercial buildings, varying in condition and positioned among restaurants, retail stores and strip centers. The Bryn Mawr office market typically enjoys office occupancy rates above 85%, with a current vacancy rate of 9.0%. Annual absorption of space is primarily from within the market with limited activity coming from outside markets. Most buildings are positioned with asking rents net of electric. While there is an array of different companies that make up the tenant base of the Bryn Mawr market, medical office, dental office and administrative offices are the most active tenants today.

COVID-19 has created a great deal of uncertainty in the real estate market in general. Many companies are trying to figure out how their workforce will be working with decisions being made between a total work at home environment, having all employees come back to the office or a hybrid of the two. Due to the heavy reliance on the medical community and its associated offices in the Bryn Mawr area, the Bryn Mawr market remains generally stable with very few large blocks of space available. Many of the leases that have come due recently and are about to come due are renewing, many of them on a short-term basis, to see how the market and market rates move in the near future. Activity lately has been comprised of companies testing the market to leverage their existing landlords.

BUILDING OVERVIEW –

762 West Lancaster Avenue is a landmark location and delivers immediate presence in the downtown Bryn Mawr submarket. With a total size over 130,000 sq. ft. the property is the largest Headquarter building on Route 30. Access to the building is excellent off both Lancaster Avenue (Route 30) and Elliott Avenue and minutes from Rt. 3, I-476 and I-76. Unmatched amenities are within walking distance in every direction and compliment the location of the building. Company identity is highlighted, through on-street monument signage and on flag poles providing rare corporate recognition.

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

DOCKET NOS. R-2024-3047822, R-2024-3047824

AQUA PENNSYLVANIA, INC.
AQUA PENNSYLVANIA WASTEWATER, INC.

PREPARED DIRECT TESTIMONY OF CHRISTOPHER E. MANNING

Topics Addressed:

Certain Expense Adjustments

DATE SERVED: May 23, 2024 **Statement No. 3**
DATE ADMITTED: _____

TABLE OF CONTENTS

I. INTRODUCTION AND SCOPE OF TESTIMONY 1

II. OPERATING EXPENSE ADJUSTMENTS 2

III. OTHER EXPENSES 13

IV. CONCLUSION 13

I. INTRODUCTION AND SCOPE OF TESTIMONY

Q. What is your name and business address?

A. My name is Christopher. E. Manning. My business address is 762 W. Lancaster Avenue, Bryn Mawr, Pennsylvania 19010.

Q. By whom are you employed and in what capacity?

A. I am employed by Aqua Pennsylvania, Inc. as a Finance and Rate Analyst II.

Q. On whose behalf are you providing this direct testimony?

A. I am providing this testimony on behalf of Aqua Pennsylvania, Inc. ("AP") and Aqua Pennsylvania Wastewater, Inc. ("APW") (collectively "Aqua PA," or the "Company").

Q. Have you previously provided testimony before the Pennsylvania Public Utility Commission ("PUC" or the "Commission")?

A. Yes. I provided testimony in Aqua PA's last base rate case proceeding and other customer proceedings.

Q. Please describe your education and business experience.

A. I graduated from Saint Joseph's University in 2018 with a Bachelor of Science degree in Business Administration, with a major in Accounting. Prior to joining Aqua PA, I worked for KPMG, LLP as an associate where I performed financial statement audits. In October of 2019, I joined Aqua PA as a Finance and Rate Analyst I. I was promoted to my current role as Finance and Rates Analyst II in 2023.

Q. What are your duties as a Finance and Rate Analyst?

A. My duties include assisting in the preparation of various financial regulatory filings submitted with the Commission. Those filings include but are not limited to the following: Quarterly Earnings Reports, Distribution System Improvement Charge ("DSIC") filings,

water and wastewater tariff compliance filings, and other regulatory compliance filings upon request of the PUC. My duties also include the preparation of base rate cases and supporting those applications as an accounting witness.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to identify and describe certain operating expense adjustments, including general price level adjustment, inflation factor calculation, cost of serving additional customers, labor, insurance, miscellaneous expense adjustments, specific expenses not subject to inflation, purchased power, chemicals, purchased water, purchased wastewater treatment, and the water production adjustment.

II. OPERATING EXPENSE ADJUSTMENTS

Q. Please explain the General Price Level Adjustment appearing on Schedule C-4.1 of Exhibits 1-A through 1-E.

A. This adjustment reflects the anticipated effect of price increases on operating expenses, like transportation, supplies, outside services, and other small expense categories that were not specifically adjusted for elsewhere in this case. The future test year ending December 31, 2024 ("FTY") adjustment is derived from the total pro forma historic test year ended December 31, 2023 ("HTY") operating expenses, less the amounts specifically adjusted in this filing or not otherwise subject to increases. The remaining amount is then multiplied by the average gross domestic product ("GDP") chained price index forecast from the first quarter of 2024 through the fourth quarter of 2024 to arrive at the increase amount for the twelve months ending December 31, 2024. The fully projected future test year ending December 31, 2025 ("FPFTY") adjustment in the above-referenced Exhibits is derived from the total pro forma FTY operating expenses, less the amounts specifically adjusted in

this filing or not otherwise subject to increases. The remaining amount is then multiplied by the average GDP chained price index forecast from the first quarter of 2025 through the fourth quarter of 2025 to arrive at the increase amount for the twelve months ending December 31, 2025.

Q. Please explain the Inflation Factor appearing on Schedule C-4.1.i of Exhibits 1-A and through 1-E.

A. The Inflation Factor appearing on Schedule C-4.1.i is utilized to calculate the impact of inflation on the Company's expenses in the FTY and FPFTY. The Company utilizes the Blue Chip Economic Indicators to pull the quarterly consumer price index ("CPI") percentage for each forecasted quarter in the FTY and FPFTY. For the FTY, the Company utilizes the forecasted percentage change for each quarter to calculate an annual average and then multiplies that by the expenses subject to inflation. Since the forecast is not available for the quarters in the FPFTY, the Company uses the last available forecasted quarterly percentage change and uses that as the annual rate to multiply inflation eligible expenses. The index data for both adjustments was obtained from the Blue Chip Economic Indicators, dated August 11, 2023. The calculation for the annual rate used to adjust inflation eligible expenses by can be found within Schedule C-4.1.i in Exhibits 1-A through 1-E.

Q. Please explain the adjustment for Cost of Serving Additional Customers appearing on Schedule C-4.3 of Exhibit 1-A.

A. This adjustment recognizes the incremental expense associated with providing service to additional customers. The derivation of the operating ratio between incremental operating expenses and revenue is developed in the lower portion of the schedule. The application

of the operating ratio to the additional revenue from new customers connected during the three years ended December 31, 2025 (exclusive of acquisitions) is shown in the upper portion of the schedule. In Exhibit 1-A, an adjustment of $148,303 is produced from the calculation. This is the additional operating expense that is incurred in conjunction with the $2,538,435 of additional operating revenue from the new water customers connected during the three years ended December 31, 2025.

Q. Please explain the adjustment for Cost of Serving Additional Customers appearing on Schedule C-4.3 of Exhibit 1-C.

A. This adjustment recognizes the incremental expense associated with providing service to additional customers. The derivation of the operating ratio between incremental operating expenses and revenue is developed in the lower portion of the schedule. The application of the operating ratio to the additional revenue from new customers connected during the three years ended December 31, 2025 (exclusive of acquisitions) is shown in the upper portion of the schedule. In Exhibit 1-C, an adjustment of $196,671 is produced from the calculation. This is the additional operating expense that is incurred in conjunction with the $782,764 of additional operating revenue from the new wastewater customers connected during the three years ended December 31, 2025.

Q. Please explain the Company's claim for payroll expense.

A. Aqua PA's labor and labor related expenses are associated with employees that support Aqua PA alone and are solely on Aqua PA's payroll. The Company's claim for payroll expense is developed in Exhibit 2, and is summarized in Schedules C-4.5 of Exhibits 1-A through 1-E. The adjustment reflects known or anticipated changes to the Company's union and non-union employees at the end of the FPFTY. The Company's FTY and

FPFTY claims for payroll expense related to water base service as reflected in Schedule C-4.5 of Exhibit 1-A approximates $36.1 million and $37.9 million, respectively. The Company's FTY and FPFTY claims for payroll expense related to Shenandoah as reflected in Schedule C-4.5 of Exhibit 1-B approximates $0.344 million and $0.351 million, respectively. The Company's claim for payroll expense related to wastewater base service as reflected in Schedule C-4.5 of Exhibit 1-C approximates $3.4 million for the FTY and $3.5 million for the FPFTY. The Company's claim for payroll expense related to Lower Makefield service as reflected in Schedule C-4.5 of Exhibit 1-D approximates $0.157 million for the FTY and $0.161 million for the FPFTY. The Company's claim for payroll expense related to East Whiteland service as reflected in Schedule C-4.5 of Exhibit 1-E approximates $0.165 million for the FTY and $0.170 million for the FPFTY. In calculating those costs, I included the salaries and wages associated with the Company's present complement of authorized positions. In addition, salary and wage levels were adjusted to reflect known or projected changes in compensation as follows.

Exhibits 1-A, 1-B, and 1-C Non-Union Payroll – Employees are granted individual salary increases through an annual performance review. The water base non-union gross payroll, at FTY and FPFTY salary levels, was determined to be $19,742,612 and $21,174,682, respectively. The Shenandoah non-union gross payroll, at FTY and FPFTY salary levels, was determined to be $144,912 and $148,313, respectively. The wastewater base non-union gross payroll, at FTY and FPFTY salary levels, was determined to be $2,392,450 and $2,562,460 respectively. In deriving these claims, I first started with employees' actual labor rates for January 1, 2024 through March 31, 2024 which were established as of April 1, 2023. I then added to those first three months of 2024, the actual

awarded labor rates as of April 1, 2024 for the remaining nine months of 2024 to establish the FTY amount. For the FPFTY, I used the actual labor rates as of April 1, 2024 for the first three months of 2025 and then applied an additional merit pay increase in labor rates for the remainder of 2025. The assumed percentage increases are included in Schedule 4 of Exhibit 2. The Company's labor claims includes the full compensation package for eligible employees including both short-term and long-term incentive compensation. To the extent that an employee's base pay was increased as I described earlier, a commensurate adjustment in the amount of eligible incentive pay would follow accordingly at the same percentage levels.

Exhibit 1-A through 1-E Union Payroll – Aqua PA has seven different unions, each with its own collective bargaining agreements and anniversary dates where changes in hourly rates will become effective. The Water Base gross union payroll, at the FTY and FPFTY levels, was determined to be $34,026,087 and $35,246,945, respectively. The Shenandoah gross union payroll, at the FTY and FPFTY levels, was determined to be $367,400 and $374,176, respectively. The Wastewater Base gross union payroll, at the FTY and FPFTY levels, was determined to be $2,613,648 and $2,685,297, respectively. The Lower Makefield gross union payroll, at the FTY and FPFTY levels, was determined to be $233,456 and $239,661, respectively. The East Whiteland gross union payroll, at the FTY and FPFTY levels, was determined to be $246,332 and $252,916, respectively. The Company's claims were developed by taking the actual pay rates effective in 2023 and applying the increases that are scheduled to take effect in each collective bargaining agreement during the FTY and FPFTY. Further details regarding contractual increase percentages are provided in Exhibit 2 – Payroll.

The gross payroll amounts in Exhibits 1-A through 1-E reflect a reasonable vacancy adjustment that is in line with the Company's actual experience. These amounts are further reduced by capitalized labor and non-operating labor as experienced in the HTY and applied to the FTY and FPFTY to arrive at the total expense labor.

Q. Please explain the adjustment to Insurance Expense on Schedule C-4.6 of Exhibits 1-A through 1-E.

A. Aqua PA holds insurance policies for General Liability, Auto Liability, Workers Compensation, and Miscellaneous Other (Surety Bonds, Property, etc.) forms of coverage. These policies are annually reviewed and analyzed by the Company and its third-party insurance broker and carrier, utilizing a multi-year claims history, to determine the required reserve for each type of insurance. For water operations, the HTY insurance claim was based on actual premiums experienced in 2023. The Company also included actual amounts paid for the FTY claim as noted in Schedule C-4.6 of each of the Exhibits 1-A through 1-E. For the FPFTY claim the Company included an increase in its insurance claim based on discussion with the Company's insurance brokers concerning future projected increases in insurance premiums. The total insurance amounts were adjusted to remove that portion of insurance cost which is not charged to operating expense. For wastewater operations, the same methodology was applied to derive the FTY and FPFTY claims; however, the total wastewater insurance expense was then allocated to each division (Exhibits 1-C through 1-E) based on the number of customers served.

Q. Please explain the miscellaneous adjustments shown in Schedule C-4.9 of Exhibits 1-A.

A. On Line 2 Schedule C-4.9 of Exhibit 1-A there is an adjustment for an insurance reimbursement that occurred during the HTY for expenses related to Hurricane Ida not previously included in the prior rate case. On Lines 3-6 there is a total of $1.43 million related to new recurring operational expenses that did not occur in the HTY, related to granular activate carbon ("GAC") filter change outs, right of way ("ROW") clearing, residual hauling, and other operational expenses as mentioned in Mr. Duerr's testimony.

Schedule C-4.9 also adjusts to remove fines that were not appropriate to leave in the HTY.

Q. Please explain the miscellaneous adjustments shown in Schedule C-4.9 of Exhibits 1-B.

A. The Shenandoah system was acquired on July 24, 2023, the adjustments in Schedule C-4.9 of Exhibit 1-B reflect the annualization of Shenandoah expenses for supplies, transportation and outside services.

Q. Are there also adjustments included in Schedule 4.9 with respect to Exhibits 1-C?

A. Yes, this adjustment will be addressed by Mr. Packer in Statement No.1.

Q. Please explain the Specific Expense Not Subject to Increase shown in Schedule C-4.10 of Exhibits 1-A through 1-E.

A. This schedule lists those expenses that are not separately adjusted for or are otherwise not subject to growth from the general price level adjustment. As I explained earlier, these expenses were eliminated from the operating expenses subject to the general price level adjustment in Schedule C-4.1. There were no expense adjustments in Schedule C-4.10 of Exhibits 1-D and 1-E.

Q. Please explain the adjustment to Purchased Power detailed in Schedule C-6.1 of Exhibits 1-A through 1-E.

A. The Purchased Power Expense in the above-referenced Exhibits consists of two components: (1) Electric (Schedule C-6.1.i), and (2) Gas (Schedule C-6.1.ii).

The electric purchased power expense is projected to increase in the FTY and FPFTY based upon rates contracted through the FPFTY. Current rates are used to determine the electric costs for the HTY. The Company's purchase power expense reflects increases in electric supply contracts through the FTY and FPFTY. The Company has electric supply contracts for various facilities with Philadelphia Electric Company; Pennsylvania Electric Company, Pennsylvania Power Company, Metropolitan Edison Company, Pennsylvania Power & Light Company (collectively "First Energy Pennsylvania Electric Company"); and the Allegheny Power Service Corporation. Non-contracted electric power supply rates were escalated by 0.5% in the FTY and 2.8% in the FPFTY based upon estimates from the U.S. Energy Information Administration ("EIA").

The gas purchased power expense claims for the HTY are based on current rates as shown in Schedule 6.1.ii of Exhibit 1-A, 1-C, and 1-D. The FTY and FPFTY costs were escalated by 4.3% in the FTY and 10.9% in the FPFTY based on EIA estimates.

Q. Please provide some examples that show how Aqua PA implements cost-reduction practices with respect to purchased power.

A. With respect to its water operations, the Company participates in supply, utility and PJM peak and demand response programs where possible to reduce electric costs. Additionally, the Company utilizes solar generated power at its Pickering and Ingrams Mill treatment plants that produce electric savings in the form of reductions in power purchased from

electric suppliers. Both the program-related costs savings and solar power-related usage reductions are shown in Schedule C-6.1.i of Exhibit 1-A.

Q. Please explain the adjustment to Chemicals Expense in Schedule C-6.2 of Exhibits 1-A and through 1-C.

A. The Company utilizes various chemicals in the water and wastewater treatment processes. In order to secure the best available pricing, the Company conducts a competitive bidding process to establish unit price contracts for the chemical requirements at its various treatment plants. The claim for chemical expense in Schedule C-6.2 for Exhibit 1-A was based on the total production gallons for the twelve months ended December 31, 2023, multiplied by the normalized chemical treatment cost per million gallons. The cost per million gallons for the HTY was increased by a normalized average year over year growth rate to arrive at the treatment cost per million gallons for the FTY and FPFTY. The increase in the cost per million gallons accounts for both price increases and increases in chemical feed rates based on treatment needs. The increase in chemical costs in the FTY and FPFTY is primarily driven by the need to feed significantly greater amounts of chemicals, including powder activated carbon ("PAC") and polymer, to address treatment for per- and polyfluoroalkyl substances ("PFAS") at several of the Company's facilities. The U.S. Environmental Protection Agency ("EPA") recently released a maximum contaminant level ("MCL") for PFAS which is driving the increased treatment costs. The chemicals used to treat for PFAS will be incremental over the Company's prior expense levels presented in prior base rate proceedings and were not part of the HTY. Further explanation of the environmental, operational, and engineering need for this increased chemical

treatment is addressed in the Direct Testimonies of Todd M. Duerr (Statement No. 11) and Michael Convery (Statement No. 12).

The claim for chemical expense in Schedule C-6.2 of Exhibit 1-B was based on the Company's chemical cost per million gallons under Aqua PA's ownership of the Shenandoah system. This cost per million gallons was then applied to the normalized annual production amounts at the Shenandoah treatment plant. For the FTY and FPFTY the Company increased the chemical expense in accordance with the same percentage under Schedule C-6.2 of Exhibit 1-A.

The claim for chemical expense in Schedule C-6.2 of Exhibits 1-C was calculated by taking the average chemical expense for the three years ended December 31, 2023 to arrive at the claim for the FTY and FPFTY.

Q. Please explain the adjustment to Purchased Water Expense detailed in Schedule C-7.1 of Exhibit 1-A.

A. The purchased water expense claim was generally derived by taking HTY gallons, and then applying current rates. The Company made adjustments to reflect known and anticipated increases from its water suppliers. The FTY and FPFTY claim includes a rate increase from the Philadelphia Water Department ("PWD") that became effective January 1, 2024 and carries through the FPFTY. In addition, the FPFTY claim reflects that the Company will cease purchasing water from Downingtown Municipal Authority ("DMA") and the Chester Water Authority ("CWA") at Cheyney Road at a point in time during the FTY as shown in Schedule C-7.1.i of Exhibit 1-A. The reduction in the water the Company purchases will result in an increase in the production volumes as I describe later in my

Direct Testimony. The Company will maintain the interconnection at Cheyney Road with CWA for emergency purposes, as needed.

Q. Explain the adjustment to Purchased Wastewater Treatment Expense in Schedule C-7.1 of Exhibits 1-C through 1-E.

A. The purchased wastewater treatment expense claim was generally derived by taking HTY gallons and costs, as applicable, and then applying current rates. Exhibits 1-C through 1-E include various adjustments based on assumptions made for each wastewater system. The FTY and FPFTY claim includes a rate increase from the PWD for wastewater treatment for the Company's Cheltenham system that became effective January 1, 2024 and carries through the FPFTY. In addition, the FTY and FTPY claim includes a rate increase from the Morrisville Municipal Authority for the Company's Lower Makefield system that became effective March 1, 2024 and carries through the FPFTY. Schedule 7.1 in each of Exhibits 1-C through 1-E identifies various assumptions applicable to any adjustments for each wastewater system or indicates that no adjustments are being claimed.

Q. Please explain the Water Production Adjustment in Schedule C-7.2 of Exhibit 1-A.

A. The water production adjustment accounts for the costs that will be incurred as a result of the Company no longer purchasing water from DMA and CWA (at Cheyney Road). The gallons that are no longer being purchased from DMA and CWA (at Cheyney Road) will now be produced by the Company's facilities. The cost associated with the increased gallon production at the Company's facilities is partially offset by the decrease in gallons reflected in the declining residential consumption adjustment from Schedule B-7 of Exhibit 1-A as described in the Direct Testimony of Gregory Herbert (Statement No. 10).

III. OTHER EXPENSES

Q. Please explain the Company's adjustment for payroll taxes.

A. The Company's adjustment to Federal and State payroll taxes appears in Schedule D-2.5 in Exhibit 1-A. The FTY and FPFTY adjustments for both Federal and State payroll taxes is based on the Company's FTY and FPFTY payroll claims. The Federal and State unemployment taxes were calculated using the Company's current tax rates and taxable wage bases.

The pro forma tax amounts were then reduced by the amount not charged to operations. Payroll taxes applicable to Shenandoah and wastewater operations are an allocated portion of total Company taxes and handled as a component of the intracompany allocation of expenses shown in Exhibit 1-A, Schedule C-8.5.

IV. CONCLUSION

Q. Does that conclude your testimony at this time?

A. Yes, it does, but I reserve the right to supplement my testimony as needed during this proceeding.

PREPARED DIRECT TESTIMONY OF MICHAEL S. ERCOLINO

Topics Addressed:

Certain Expense Adjustments

DATE SERVED: May 23, 2024 **Statement No. 4**
DATE ADMITTED: _____

TABLE OF CONTENTS

I. INTRODUCTION AND SCOPE OF TESTIMONY 1

II. ADJUSTMENTS 2

III. CONCLUSION 4

I. INTRODUCTION AND SCOPE OF TESTIMONY

Q. What is your name and business address?

A. My name is Michael S. Ercolino. My business address is 762 W. Lancaster Avenue, Bryn Mawr, Pennsylvania 19010.

Q. By whom are you employed and in what capacity?

A. I am employed by Aqua Pennsylvania, Inc. as a Finance and Rate Analyst I.

Q. On whose behalf are you providing this direct testimony?

A. I am providing this testimony on behalf of Aqua Pennsylvania, Inc. ("AP") and Aqua Pennsylvania Wastewater, Inc. ("APW") (collectively "Aqua PA" or the "Company").

Q. Please describe your education and business experience.

A. I graduated from Widener University in 2022 with a Bachelor of Science degree in Business Administration, with a major in accounting. Prior to joining Aqua PA, I worked for Ernst and Young, LLP as an associate where I prepared Corporate Federal/State Tax Returns and performed tax provision/financial statement audits. In September of 2023, I joined Aqua PA at my current role as a Finance and Rate Analyst I.

Q. What are your duties as a Finance and Rate Analyst?

A. My duties include assisting in the preparation of various financial regulatory filings submitted with the Pennsylvania Public Utility Commission ("PUC" or the "Commission"). Those filings include but are not limited to the following: Quarterly Earnings Reports, Distribution System Improvement Charge ("DSIC") filings, water and wastewater tariff compliance filings, and other regulatory compliance filings upon request of the PUC. My duties also include the preparation of base rate cases and supporting those applications as an accounting witness.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to identify and describe certain operating expense adjustments, including rate case expense, audit fees, dredging expense, legal expense, elimination of certain expenses, and the Company's claims for Public Utility Realty Tax Act ("PURTA"), and Pennsylvania property taxes.

II. OPERATING EXPENSE ADJUSTMENTS

Q. Please explain the Company's claim for rate case expense of $2,610,000 presented on Schedule C-4.4 of Exhibit 1-A through 1-E.

A. The adjustments in Schedules C-4.4 reflect the estimated costs of this rate case. 88.67% of the total cost is being allocated to the Water Base and Shenandoah, and 11.33% is being allocated to the Wastewater Base, Lower Makefield, and East Whiteland. The total rate case expense claim is allocated to each respective exhibit based on the ratio of customers served to total customers. The Company proposes to normalize this cost over a twenty-four month period, which is the anticipated interval between this and the Company's next base rate case.

Q. Please explain the Company's claim for audit fees presented on Schedule C-4.11 of Exhibit 1-A through 1-E.

A. The adjustments in Schedule C-4.11 reflect the audit fee amounts included in this rate case. The Company's audit fee cost in the historic test year ("HTY") is $991,557. The audit fee cost for the future test year ("FTY") is $974,884 and the fully projected future test year ("FPFTY") audit fees are $982,475. The estimates for the FTY and FPFTY were provided by the Company's third-party auditors. The total audit fee amounts were adjusted to remove that portion of the audit fees which is not charged to operating expense. The

Company then allocated these audit fees as shown in Schedule C-4.11 of Exhibit 1-A through 1-E.

Q. Please explain the Dredging Expense adjustment shown in Schedule C-7.3 of Exhibit 1-A.

A. The Company sets forth an adjustment to normalize the Dredging Expense with respect to water operations. The Company's request is normalize the total dredging expense of $1,500,000 over three years or to normalize $500,000 annually which is consistent with the treatment of this expense in the Company's last base rate case.

Q. Please explain the adjustment to Legal Expense shown in Schedule C-9.1 of Exhibit 1-A and 1-C.

A. The Company incurs costs for general legal services during the normal course of business to protect and defend the Company's interest in a variety of legal matters. This adjustment normalizes the Company's legal expense claim, exclusive of base rate case expense, to levels that are expected to be realized during the first year rates are in effect and more in line with prior experiences. The three-year average for legal expenses has been utilized to ensure that the Company's legal expenses will be representative of what it can expect to incur in a normal year.

Q. Please explain the adjustment in Schedule C-9.2 of Exhibit 1-A to eliminate National Association of Water Companies ("NAWC") Lobbying Expense.

A. Consistent with past rate cases, the lobbying potion of the annual dues paid to the NAWC has been removed from the Company's operation expense claim. The resulting adjustment reduced pro-forma operating expense by $43,494.

Q. Please explain the adjustment for PURTA in Schedule D-2.3 of Exhibit 1-A.

A. The taxes imposed by PURTA for the FTY and FPFTY are based on the estimated tax liability for 2023. This is the latest statement that the Company has received from the Commonwealth of Pennsylvania.

Q. Please explain the adjustments for Pennsylvania property tax listed in Schedule D-2.4 of Exhibits 1-A and 1-C.

A. The Company's claim for property taxes is its actual HTY property taxes. Historically, the Company has not seen significant amount of volatility in its property tax liability. Should information arise during the course of this proceeding that would justify an adjustment, I will revise the Company's claim accordingly.

III. CONCLUSION

Q. Does that conclude your testimony at this time?

A. Yes, it does, but I reserve the right to supplement my testimony as needed during this proceeding.

PREPARED DIRECT TESTIMONY OF CONSTANCE E. HEPPENSTALL

Topics Addressed:

Cost of Service Allocation
Customer Rate Design

DATE SERVED: May 23, 2024 **Statement No. 5**
DATE ADMITTED: _____

BEFORE THE PENNSYLVANIA PUBLIC UTILITY COMMISSION

RE: AQUA PENNSYLVANIA, INC.
DOCKET R-2024-3047822 AND R-2024-3047824

DIRECT TESTIMONY OF CONSTANCE E. HEPPENSTALL

Q. Please state your name and address.

A. My name is Constance E. Heppenstall. My business address is 1010 Adams Avenue, Audubon, Pennsylvania.

Q. By whom are you employed?

A. I am employed by Gannett Fleming Valuation and Rate Consultants, LLC.

Q. Please describe your position with Gannett Fleming Valuation and Rate Consultants, LLC, and briefly state your general duties and responsibilities.

A. My title is Senior Project Manager, Rate Studies. My duties and responsibilities include the preparation of accounting and financial data for revenue requirement and cash working capital claims, the allocation of cost of service to customer classifications, and the design of customer rates in support of public utility rate filings.

Q. Have you presented testimony in rate proceedings before a regulatory agency?

A. Yes. I have testified before the Pennsylvania Public Utility Commission ("Commission" or "PUC"), the Kentucky Public Service Commission, the Arizona Corporation Commission, the Missouri Public Service Commission, the Virginia State Corporation Commission, the Hawaii Public Utility Commission, the West Virginia Public Service Commission, the New Jersey Board of Public Utilities, the Indiana Utility Regulatory Commission, the Public Utilities Commission of Ohio, the

Nevada Public Utility Commission, and the California Public Utility Commission concerning revenue requirements, cost of service allocation, and rate design. A list of cases in which I have testified is attached to my testimony.

Q. What is your educational background?

A. I have a Bachelor of Arts in Economics from the University of Virginia, Charlottesville, Virginia and a Master of Science in Industrial Administration from the Tepper School of Business at Carnegie-Mellon University, Pittsburgh, Pennsylvania.

Q. Would you please describe your professional affiliations?

A. I am a member of the National Association of Water Companies and the Pennsylvania Municipal Authorities Association.

Q. Briefly describe your work experience.

A. I joined the Valuation and Rate Division of Gannett Fleming, Inc. in August 2006, as a Rate Analyst and was promoted to my current position in 2012. Prior to my employment at Gannett Fleming, Inc., I was a Vice President of PriMuni, LLP where I developed financial analyses to test proprietary software in order to ensure its pricing accuracy in accordance with securities industry's conventions. From 1987 to 2001, I was employed by Commonwealth Securities and Investments, Inc. as a public finance professional where I created and implemented financial models for public finance clients in order to create debt structures to meet clients' needs. From 1986 to 1987, I was a public finance associate with Mellon Capital Markets.

Q. What is the purpose of your testimony in this proceeding?

A. My testimony is in support of the cost of service allocation and rate design studies conducted under my direction and supervision for the combined water and wastewater utility plants of Aqua Pennsylvania, Inc. and Aqua Pennsylvania Wastewater, Inc. (collectively "Aqua AP" or the "Company").

Q. Have you prepared exhibits presenting the results of your studies?

A. Yes. Exhibit No. 5-A, Part I presents the results of the water allocation of the pro forma cost of service as of December 31, 2025, for Water Base Operations and separately for Shenandoah Water Operations. Exhibit No. 5-B, Part I presents the results of the wastewater allocation of the pro forma cost of service as of December 31, 2025, for Wastewater Base Operations and separately for Lower Makefield and East Whiteland Wastewater Operations.

WATER - COST OF SERVICE ALLOCATION STUDIES

Q. Briefly describe the purpose of your cost allocation studies in Exhibit 5-A, Part I.

A. Exhibit 5-A, Part I presents water cost of service studies for the following areas:

Water Base Operations
Shenandoah Operation

The Company is providing cost of service studies, other than the Base Operations, for the additional area as a requirement of the PA PUC order related to acquisition of this area.

The purpose of the studies was to allocate the water cost of service, which is the total revenue requirement, to the several customer classifications. In the studies, the total costs were allocated to the residential, commercial, industrial,

public, other water utilities, private fire protection and public fire protection classifications in accordance with generally-accepted principles and procedures. The cost of service allocation results in indications of the relative cost responsibilities of each class of customers. The allocated cost of service is one of several criteria appropriate for consideration in designing customer rates to produce the required revenues.

Q. Have you prepared an exhibit presenting the results of your studies?

A. Yes. As previously noted, the results of my allocation of the pro forma cost of service as of December 31, 2025, are presented in Exhibit No. 5-A, Part I.

Q. Please describe the method of cost allocation that was used in your study.

A. The base-extra capacity method, as described in the 2017 and prior Water Rates Manuals published by the American Water Works Association ("AWWA"), was used to allocate the pro forma costs. This method is a recognized method for allocating the cost of providing water service to customer classifications in proportion to the classifications' use of the commodity, facilities and services. It is generally accepted as a sound method for allocating the cost of water service and has been used by the Company and accepted by this Commission in the Company's rate cases for over 30 years.

Q. Is the method described in Exhibit No. 5-A, Part I?

A. Yes. It is described on pages 3 and 4 of the exhibit.

Q. Please describe the procedure followed in the cost allocation studies.

A. Each identified classification of cost in the pro forma cost of service was allocated to the customer classifications using appropriate allocation factors. This allocation

is presented in Schedules D and D-S of Exhibit No. 5-A, Part I. The account numbers and associated items of cost, which include operation and maintenance expenses, depreciation expense, taxes and income available for return, are identified in columns 1 and 2 of Schedules D and D-S. The cost of each item, shown in column 4, is allocated to the several customer classifications based on allocation factors referenced in column 3. The development of the allocation factors is presented in Schedules E and E-S of the exhibit.

I will use some of the larger cost items to illustrate the principles and considerations used in the cost allocation methodology. Water purchased for resale, purchased electric power and treatment chemicals are examples of costs that tend to vary with the amount of water consumed and are thus considered base costs. They are allocated to the several customer classifications in direct proportion to the average daily consumption of those classifications using Factor 1. The development of Factor 1 is shown in Schedules E and E-S of Exhibit No. 5-A, Part I.

Other sources of supply, pumping, purification, and transmission costs are associated with meeting usage requirements in excess of the average, generally to meet maximum day requirements. Costs of this nature were allocated to customer classifications partially as base costs, proportional to average daily consumption, partially as maximum day extra capacity costs, in proportion to maximum day extra capacity, and, in the case of certain pumping stations and transmission mains, partially as fire protection costs, through the use of Factors 2 and 3. The development of the allocation factors, referenced as Factors 2 and 3,

is shown in Schedules E and E-S of Exhibit No. 5-A, Part I. Costs associated with distribution mains and storage facilities were allocated partly on the basis of average consumption and partly on the basis of maximum hour extra demand, including the demand for fire protection service, because these facilities are designed to meet maximum hour and fire demand requirements. The development of the factors, referenced as Factors 4 and 5, used for these allocations is shown in Schedules E and E-S of Exhibit No. 5-A, Part I. Fire demand costs were allocated to public and private fire protection service and general service in proportion to the relative potential demands on the system by hydrants, fire services and commercial service lines sized to provide both fire protection and general service, as presented in Schedules G and G-S of Exhibit No. 5-A, Part I.

Costs associated with pumping facilities were allocated on combined bases of maximum day, maximum day including fire and maximum hour extra capacity because these facilities serve these functions. The relative weightings of Factor 2 (maximum day), Factor 3 (maximum day with fire) and Factor 4 (maximum hour) for pumping facilities were based on the functional use of pumps and footage of mains, serving maximum day and maximum hour functions.

Costs associated with meters and services facilities were allocated to customer classifications in proportion to the capital costs of the sizes and quantities of meters and services serving each classification. The development of factors for meters and services, referenced as Factor 7 and Factor 8, is presented in Exhibit No. 5-A, Part I.

Costs for customer accounting, billing and collecting were allocated based on the number of bills for each classification, and costs for meter reading were allocated on the basis of the number of bills rendered to metered customers. The development of these factors, referenced as Factor 9 and Factor 10, is presented in Exhibit No. 5-A, Part I.

Administrative and general costs were allocated based on allocated direct costs excluding those costs such as purchased water, power and chemicals which require little administrative and general expense. The development of factors for this allocation, referenced as Factor 14, is presented in Exhibit No. 5-A, Part I,

Annual depreciation accruals were allocated based on the function of the facilities represented by the depreciation expense for each depreciable plant account. The original cost less accrued depreciation of utility plant in service was similarly allocated for the purpose of developing factors, referenced as Factor 18, for allocating items such as income taxes and return. The development of Factor 18 is presented in Exhibit No. 5-A, Part I.

Q. What was the source of the total cost of service data set forth in column 4 of Schedules D and D-S of Exhibit No. 5-A, Part I?

A. The pro forma costs of service were furnished by the rate department of the Company, and are set forth in Exhibit Nos. 1-A and 1-B.

Q. Refer to Schedules E and E-S of Exhibit No. 5-A, Part I, and explain the source of the system maximum day and maximum hour ratios used in the development of factors referenced as Factors 2, 3, 4 and 5.

A. The ratios were based on a review of experienced Company data set forth on Schedule F of Exhibit No. 5-A, Part I. The maximum day ratio of 1.4 times the average day approximates the ratio of maximum daily send-out experienced by the Company in 1999, 2001, 2010, and 2011, the year in which the most recent maximum day delivery was experienced. The maximum hour ratio of 2.0 times the average hour approximates the peak hour consumption experienced by the Company in 1995, 1997, 2001, 2010, and 2011.

Q. Are the system maximum day and maximum hour ratios the same as the ratios used in the study presented in the Company's prior rate case?

A. Yes, they are.

Q. What factors were considered in estimating the maximum day extra capacity and maximum hour extra capacity demands used for the customer classifications in the development of Factors 2, 3, 4 and 5?

A. The estimated demands were based on judgment that considered field studies of customer class demands conducted for the Company, field observations of the service areas of the Company, field studies of similar service areas in Pennsylvania conducted by my firm, and generally-accepted customer class maximum day and maximum hour demand ratios. The study of customer class demands was initiated in 1991 with the selection and monitoring of Residential customers and neighborhoods. Monitoring continued for these customers with some additional modifications and for customers from other classes. The results of the demand study are presented in the Appendix of Exhibit No. 5-A, Part I. A

discussion of the specific factors considered for each class also is presented in the Appendix.

Q. Are the customer class extra capacity factors the same as those used in the most recent cost of service study for the Company?

A. Yes, they are.

Q. Please describe why the unrecovered portion of public fire protection is allocated to other classes.

A. The study reallocates the unrecovered portion of public fire protection to the residential, commercial, industrial, and public classifications. This was done pursuant to Section 1328 of the Public Utility Code which states that public fire hydrant rates only need to recover 25% of the cost of service and the unrecovered portion should be recovered in the other classes' fixed charges. Effectively, the statute has reassigned the unrecovered costs to other classes, and it is appropriate to reflect that reassignment in the cost of service.

Q. How did you allocate the unrecovered portion of public fire service?

A. Based on the requirement that these costs are to be recovered in fixed charges, I allocated the unrecovered public fire costs using Factor 21, which is based on the meter equivalents of the residential, commercial, industrial, and public classifications.

Q. Have you summarized the results of your cost allocation study?

A. Yes. The results are summarized in columns 1, 2 and 3 of Schedules A and A-S in Exhibit No. 5-A, Part I. Column 2 sets forth the total allocated pro forma cost of service as of December 31, 2025, for each customer classification identified in

column 1. Column 5 presents each customer classification's cost responsibility as a percent of the total cost.

Q. Have you compared these cost responsibilities with the proportionate revenue under existing rates for each customer classification?

A. Yes. A comparison of the allocated cost responsibilities and the percentage revenue under existing rates can be made by comparing columns 6 and 8 of Schedule A and 5 and 7 of Schedule A-S of Exhibit 5-A, Part I. In addition, the Water Base Cost of Service Schedule A-1 shows a comparison of the percentages of revenues under present and proposed without regard to Act 11 contributions.

Q. Does the Water Base cost of service include a cost sharing for the Shenandoah system?

A. Yes, to mitigate the rate increase to Shenandoah customers, a contribution from Water Base revenues is required. The recovery of this revenue was allocated to the individual customer classes based on the Shenandoah cost of service by class less proposed Shenandoah revenues by class.

Q. How was the amount of Act 11 cost to be recovered in water rates determined?

A. The amount of Act 11 recovery was determined by subtracting the proposed level of wastewater revenue after various increases from the pro forma cost of wastewater service for the twelve months ended December 31, 2025 from the revenue requirement for each area. The Act 11 allocation by class is equal to the wastewater cost of service by class less proposed revenues.

WATER RATE DESIGN

Q. Is the proposed rate structure presented in an exhibit?

A. Yes. A comparison of the present and proposed rate schedules is presented in the response to Standard Data Request OR-3 and on Schedule I.

Q. What are the appropriate factors to be considered in the design of the rate structure?

A. In preparing a rate structure, one should consider the allocated costs of service, the impact of radical changes from the present rate structure, the understandability and ease of application of the rate structure, community and social influences, and the value of service, particularly competitive concerns. General guidelines should be developed with management to determine the extent to which each of these criteria is to be incorporated in the rate structure to be designed, inasmuch as the pricing of a commodity or service ultimately should be a function of management.

Q. Did you develop rate design guidelines during discussions with Company management?

A. Yes, I did. The guidelines were: (1) maintain separate rate divisions for those areas with year-round usage and those areas with seasonal usage; (2) maintain a low-use block for the residential class at 2,000 gallons per month in each division, and a sixth block for the industrial classification for usage over 10 million gallons per month; (3) continue movement of those areas with year-round usage toward the Main Division rates; (4) increase existing Main Division private fire service line rates 14% and private hydrant charges by 0%; (5) increase the existing Public Fire Hydrant rate up to the 25% of cost of service level and (6) move the Shenandoah rate structure to the Main Division rate structure. For those rate divisions with a

public fire hydrant rate below $34 per month, propose an increase so that achieving the State-wide rate can be accomplished in two or more rate cases.

Q. Do the proposed rates comply with these guidelines?

A. Yes, they do.

Q. In what manner has the goal of rate equalization been continued for each of the divisions?

A. In general, the proposed customer charges and consumption rates for these Divisions represent a movement toward the Main Division rates by varying degrees.

For Main Division, the 5/8-inch customer charge was set at $23.90 per month. This represents an $1.92 base rate increase (8.7% over present rates of $20.51 including the Distribution System Improvement Charge (DSIC)). Base rates for all other meter sizes were increased by a similar percentage. Consumption charges were increased so that revenues by class move toward cost of service indicators and to recover the total revenue requirement.

Q. Please explain the proposed rates for all of the non-seasonal divisions.

A. The Rate Zone 2 and Belle Aire rate Zone will move to Rate Zone 1 in this case. Beech Mountain, Bristol Township, Concord Park and Treasure Lake division rates will continue to move toward Zone 1 rates.

Two other areas, Bunker Hill and Phoenixville, rates were increased to move toward Zone 1 rates. The Company capped the rate increases for these two areas to 75%.

Shenandoah's rate structure will move to Rate Zone 1 rate structure, eliminating minimums and altering the blocking structure for all classes. Proposed rates were set at rates that would mitigate increases by customer class and acknowledging the large change in rate structure.

Q. Please explain the rate structure for seasonal areas.

A. The Zone 3 Division has a significant number of seasonal customers and will continue to be served under the merged seasonal rate design. The customer charge is increased to $33.90 per month but is offset with a lower first block consumption rate than Main Division for the first 4,000 gallons. The bills for the seasonal rate structure are equalized with Main Division at the 3,870 gallon average per month and greater consumption levels.

Q. Please explain the concerns regarding competing sources of supply for Industrial, Public and Sales to Other Water Utilities customers.

A. To avoid the loss of very large customers from which the Company recovers a significant amount of its fixed costs, competitive service riders were proposed and approved in the Company's 1997 rate proceeding. The competitive service riders DIS (Demand-Based Industrial Service), DRS (Demand-Based Resale Service) and EGS (Electric Generation Service) enable the Company to retain customers who can develop water supplies at average costs per hundred gallons that are less than the Company's tariff rates. These customers, in return for a negotiated rate that is less than the tariff rate, are required to enter into a contract with the Company, purchase a minimum amount of water each month and maintain favorable load factors. The use of such riders retains the recovery of significant

fixed costs from these customers that otherwise would have to be recovered from all other customers.

Q. What are you proposing for the Main Division public fire hydrant rate?

A. The present annual rate of $28.57 per year is less than 25 percent of the annual cost per hydrant. Section 1328 of the Public Utility Code requires that public fire hydrant rates recover no more than 25 percent of the cost of service. The Company is proposing that the Main Division public fire hydrant rate be increased to this level.

Q. What is the annual public fire hydrant cost of service?

A. The annual cost of service for a public fire hydrant is $1,554.40. The public fire cost at 25% of the cost of service is $388.60 or $32.38 per month.

Q. What changes are proposed for the public fire hydrant rates in the other divisions?

A. For those divisions where the existing rate per month is less than the current Main Division rate of $28.57, the Company is increasing these rates so that equity of Public Fire rates can hopefully be achieved in the next rate case.

Q. How were the present metered private fire rates increased under proposed rates?

A. The present Main Division base rates for private fire service lines customers were increased approximately 14%. The Main Division Private Hydrant rates are increase by 0% because they are at their full cost of service. For those divisions where the existing Private Hydrant rate per month is less than the current Main

Division rate of $51.10, the Company is increasing these rates so that equity of these rates can be achieved in the next rate case.

Q. Please describe the development of the rates for the standby tariff.

A. The proposed Industrial Standby Rates and Resale and Electric Generation Standby Rates include service, demand and commodity rates. The service charges are the same as those set forth on the Schedule of Rates for the Main Division proposed in this case.

The demand and commodity rates are based on the results of the cost of service allocation to cost functions found in the Appendix of Exhibit No. 5-A, Part I. The firm standby demand charge includes fixed operating and capital costs in the base and extra capacity functions. The interruptible standby demand charge includes fixed operating costs in the base and extra capacity functions.

The commodity rate associated with deliveries pursuant to firm standby demand includes variable operating costs. The commodity rate associated with deliveries pursuant to interruptible standby demand includes variable operating costs and capital costs in the base and extra capacity functions. The commodity rate for deliveries in excess of the firm and interruptible standby demand is the rate for the first block for the Main Division.

Q. Did you prepare a schedule to show the calculation of the standby rates?

A. Yes. Schedule H of Exhibit No. 5-A, Part I sets forth the calculation of the firm and interruptible standby rates based on the cost of service data submitted in this case.

WASTEWATER – COST OF SERVICE ALLOCATION

Q. Please describe your Exhibit No. 5-B, Part I.

A. Exhibit No. 5-B, Part I presents wastewater cost of service studies for the following areas:

Wastewater Base Operations
Lower Makefield Operations
East Whiteland Operations

The Company is providing cost of service studies, other than the Base Operations, for the additional areas as a requirement of the PA PUC orders related to acquisitions of these areas.

Q. Please describe the overall cost of service allocation methodology for the Company's Wastewater Divisions.

A. The cost of service allocation studies for the Company's Wastewater Operations include the revenue requirements for each of the Company's wastewater operations previously described.

The purpose of the studies is to allocate the total cost of service for each division, which is the total revenue requirement, to the several customer classifications. In the studies, the total costs are allocated to the residential and non-residential customer classifications in accordance with generally accepted cost of service principles and procedures.

Q. Have you prepared an exhibit presenting the results of your studies?

A. Yes. The results of my allocations of the pro forma cost of service as of December 31, 2025, and proposed customer rates to produce the pro forma revenue requirements for each division as of that date are presented in Exhibit No. 5-B, Part I.

Q. Please describe the method of cost allocation that was used in your studies.

A. I used the functional cost allocation methodology described in "Financing and Changes for Wastewater Systems," Manual of Practice No. 27, published by the Water Environment Federation ("Manual of Practice No. 27"). This method allocated the cost of providing wastewater service to customer classifications in proportion to each classifications' use of the service provider's facilities and services. Costs are assigned to cost components using predominant operational purposes as cost-causative factors. The functional cost method is generally accepted as a sound method for allocating the cost of wastewater service.

Q. What procedures did you use to apply the cost allocation methodology for wastewater operations?

A. Each element of the cost of service is allocated to customer classifications according to the functional categories of flow, infiltration and inflow ("I&I"), customer facilities and customer accounting. The functional costs are allocated to customer classifications based on the amount of flow contributed to the system, the amount of I&I allocated to each class, and the number and relative size of customers.

Q. Have you summarized the results of your cost allocation study?

A. Yes. The results are summarized in columns 1, 2, 3 and 4 of Schedules A, A-LM and A-EW for each study in Exhibit 5-B, Part I, Column 2 of each schedule sets forth the total allocated pro forma cost of service for each customer classification identified in column 1. Column 3 presents the total Act 11 revenues for each division proposed to be transferred to the water cost of service study, in Exhibit No. 5-A, Part I –Schedules A, A-LM and A-EW. Column 4 shows the revised total

allocated pro forma cost of service for each customer classification identified in column 1. Column 5 presents each customer classification's cost responsibility as a percent of the total cost. The cost of service by class in column 2 was developed in Schedule B of each study. The factors that allocate the functional costs to customer classes are presented in Schedules C, C-LM and C-EW of each study. The factors that allocate the cost of service to the cost functions are shown in Schedules E, E-LM and E-EW of each study.

Q. Have you compared these cost responsibilities with the proportionate revenue under existing rates for each customer classification?

A. Yes. A comparison of the allocated cost responsibilities and the percentage revenue under existing rates can be made by comparing columns 5 and 7 of each Schedules A, A-LM and A-EW in Exhibit 5-B, Part I. The revenues in column 8 are simply the revenues that would be required to move toward (or approximate) the cost of service in column 4, and the increase or decrease from present revenues is shown in column 10, with the percentage increase or decrease in column 11.

WASTEWATER RATE DESIGN

Q. Is the proposed rate structure presented in an exhibit?

A. Yes, on Schedule F-WW of Exhibit 5-B, Part I.

Q. Did you develop rate design guidelines during discussions with Company management?

A. Yes, I did. The guidelines were: (1) move toward additional consolidation of rates across rate zones; (2) for metered areas, develop a rate structure that includes a

customer charge or EDU charge and a single block usage charge; and (3) for unmetered areas, develop a monthly flat rate to equal 3,870 gallons priced-out at the respective zone rates, and (4) where possible, eliminate an allowance.

Q. Does the proposed rate design comply with these guidelines?

A. Yes. Of the various rate zones, the proposed rates consolidate Rate Zones 1, 1A, 7, 9, 10, and 12. Rate Zones 8 and 11 are consolidated to Rate Zone 2 rates. Rate Zones 3, 4, 5, 6 and 13 remain standalone rate zones. No rate increases are proposed for Rate Zones 2, 3, 4 and 5 as these rates produce an average customer rate that is currently higher than the proposed Main Division Rate Zone 1 rates.

Q. Does this conclude your direct testimony?

A. Yes, it does.

CONSTANCE E. HEPPENSTALL – LIST OF CASES TESTIFIED

	Year	Jurisdiction	Docket No.	Client Utility	Subject

Depreciation

DATE SERVED: May 23, 2024 **Statement No. 6**
DATE ADMITTED: _____

Statement No. 6

BEFORE THE PENNSYLVANIA PUBLIC UTILITY COMMISSION

RE: AQUA PENNSYLVANIA, INC.

DIRECT TESTIMONY OF JOHN J. SPANOS

Q. Please state your name and address.

A. My name is John J. Spanos. My business address is 207 Senate Avenue, Camp Hill, Pennsylvania 17011.

Q. With what firm are you associated?

A. I am associated with the firm of Gannett Fleming Valuation and Rate Consultants, LLC ("Gannett Fleming").

Q. How long have you been associated with Gannett Fleming?

A. I have been associated with the firm since June 1986.

Q. What is your position in the firm?

A. I am President.

Q. What is your educational background?

A. I have Bachelor of Science degrees in Industrial Management and Mathematics from Carnegie-Mellon University and a Master of Business Administration from York College of Pennsylvania.

Q. Are you a member of any professional societies?

A. Yes. I am a member and past President of the Society of Depreciation Professionals. I am also a member of the American Gas Association/Edison Electric Institute Industry Accounting Committee.

Q. Do you hold any special certification as a depreciation expert?

A. Yes. The Society of Depreciation Professionals has established national standards for depreciation professionals. The Society administers an examination to become certified in this field. I passed the certification exam in September 1997 and was recertified in August 2003, February 2008, January 2013, February 2018 and February 2023.

Q. Please outline your experience in the field of depreciation.

A. I have over 37 years of depreciation experience which includes giving expert testimony in more than 460 cases before 46 regulatory commissions, including the Pennsylvania Public Utility Commission ("Commission"). These cases have included depreciation studies in the electric, gas, water, wastewater and pipeline industries. In addition to cases where I have submitted testimony, I have also supervised over 800 other depreciation or valuation assignments. Please refer to Appendix A for my qualifications statement, which includes further information with respect to my work history, case experience, and leadership in the Society of Depreciation Professionals.

Q. What is the purpose of your testimony?

A. I was asked by Aqua Pennsylvania, Inc. and Aqua Pennsylvania Wastewater, Inc. (collectively "Aqua PA" or the "Company") to prepare depreciation studies with regards to plant in service as of December 31, 2023 and, as claimed by the Company, as of December 31, 2024 and December 31, 2025 for water and wastewater assets by system.

Q. Have you prepared exhibits presenting the results of your studies?

A. Yes. Exhibit Nos. 6-A, Part 1 through 6-E, Part 1 present the results of each depreciation study as of the historic test year ended December 31, 2023 ("HTY"). Exhibit Nos. 6-A, Part 2 through 6-E, Part 2 present the results of each depreciation study as of the future test year ending December 31, 2024 ("FTY"). Exhibit Nos. 6-A, Part 3 through 6-E, Part 3 present the results of each depreciation study as of the fully projected future test year ending December 31, 2025 ("FPFTY"). In addition, I am responsible for the responses to Depreciation Data Filing Requirements FR VI.1, FR VI.2, FR VI.3, FR VI.4, FR VI.5 and FR VI.6 that are presented as Appendix B to this testimony.

Q. Please describe Exhibit Nos. 6-A through 6-E.

A. Exhibit No. 6-A, Part 1 titled "2023 Depreciation Study - Calculated Annual Depreciation Accruals Related to Water Plant as of December 31, 2023," includes the results of the depreciation study related to the water assets as of December 31, 2023. The report also includes the detailed depreciation calculations. Exhibit No. 6-A, Part 2, titled "2024 Depreciation Study - Calculated Annual Depreciation Accruals Related to Water Plant as of December 31, 2024" includes the results of the depreciation study related to the estimated water assets as of December 31, 2024. The report also includes explanatory text, statistics related to the estimation of service life, and the detailed depreciation calculations. Exhibit No. 6-A, Part 3 titled "2025 Depreciation Study – Calculated Annual Depreciation Accruals Related to Water Plant as of December 31, 2025", includes the results of the depreciation study related to the estimated water assets as of December 31, 2025. The Exhibit Nos. 6-B, Part 1, Part 2 and Part

3 are organized in the same fashion for the Shenandoah Operations. The Exhibit Nos. 6-C, Part 1 through 6-E, Part 3 are organized in the same fashion for the wastewater assets by system. The Exhibit Nos. 6-C represent the Wastewater Base systems; 6-D represents the Lower Makefield Operations; and 6-E represent the East Whiteland Operations.

Q. What was the purpose of your depreciation studies?

A. The purpose of the depreciation studies was to estimate the annual depreciation accruals related to water and wastewater plant in service for ratemaking purposes and, using Commission-approved procedures, to estimate Aqua PA's book reserve as of December 31, 2024 and December 31, 2025.

Q. Is Aqua PA's claim for annual depreciation in the current proceeding based on the same method of depreciation as was used in its most recent water and wastewater rate proceeding in Docket Nos. R-2021-3027385 and R-2021-3027386, respectively?

A. Yes, it is. For most plant accounts, the current claim for annual depreciation is based on the straight line remaining life method of depreciation which has been used for over thirty-five years. For Accounts 340, 341.2, 342, 343, 346, 347 and 348 for water assets and Accounts 390, 392, 393, 394, 396 and 397 for wastewater assets, the claim is based on the straight line remaining life method of amortization. The annual amortization is based on amortization accounting, which distributes the unrecovered cost of fixed capital assets over the remaining amortization period selected for each account.

Q. What group procedure is being used in this proceeding for depreciable accounts?

A. The same group procedures as in the last approved rate proceeding are used for each study. The equal life group procedure is used in the current proceeding for all depreciable accounts and installation years of water and wastewater plant.

Q. Is Aqua PA's claim for accrued depreciation in the current proceeding made on the same basis as has been used for over thirty-five years?

A. Yes. The current claim for accrued depreciation for water assets is the book reserve brought forward from the book reserve approved by the Commission at Docket No. R-850174. Similarly, for wastewater assets, accrued depreciation is brought forward from the previously approved level at the time of acquisition.

Q. How was the book reserve used in the calculation of annual depreciation?

A. The book reserve by account was allocated to vintages to determine original cost less accrued depreciation by vintage. The total annual accrual is the sum of the results of dividing the original costs less accrued depreciation by the vintage composite remaining lives.

Q. How was the book reserve as of December 31, 2024 and December 31, 2025 estimated?

A. The book reserve as of December 31, 2024 and December 31, 2025, by account, was projected by adding estimated accruals, gross salvage and the amortization of net salvage, and subtracting estimated retirements and cost of removal from the book reserve as of December 31, 2023. Annual accruals were calculated based on an average yearly or monthly plant balance. For most accounts, gross salvage and cost of removal were estimated by (1) expressing actual gross

salvage and cost of removal as a percent of retirements by account, for the most recent five-year period, and (2) applying those percents to the projected retirements by account. The projected book reserve by account was allocated to vintages for the purpose of the annual accrual calculation based on calculated accrued depreciation as of December 31, 2024 and December 31, 2025.

Q. Have service life studies of Aqua PA's water and wastewater utility property been performed?

A. Yes. Service life studies were performed during 2020 for the water assets and during 2024 for the wastewater assets. The service life studies were the basis for the service lives I used to calculate annual accruals.

Q. Briefly outline the procedure used in performing the service life studies.

A. The service life studies consisted of assembling and compiling historical data from the records related to the water and wastewater plant of Aqua PA and its predecessors; statistically analyzing such data to obtain historical trends of survivor characteristics; obtaining supplementary information from management and operating personnel concerning Company practices and plans as they relate to plant operations; and interpreting the above data to form judgments of service life characteristics. Iowa type survivor curves were used to describe the estimated survivor characteristics of the mass property groups. Individual service lives were used for major individual units of plant, such as reservoirs and buildings housing treatment plants, pump stations, offices and shops. The life span concept was recognized by coordinating the lives of associated plant installed in subsequent years with the probable retirement date defined by the life estimated for the major unit.

Q. What statistical data were employed in the historical analyses performed for the purpose of estimating service life characteristics?

A. The data consisted of the entries made to record retirements and other transactions related to the water plant during the period 1954-2019 and the wastewater plant during the period 2010-2023. These entries were classified by depreciable group, type of transaction, the year in which the transaction took place, and the year in which the plant was installed. Types of transactions included in the data were plant additions, retirements, transfers, and balances.

Q. What was the source of these data?

A. They were assembled from Company records related to its utility plant in service.

Q. Were the methods used in the service life studies the same as those used in other depreciation studies for water and wastewater plant presented before this Commission?

A. Yes. The methods are the same ones that have been presented previously for Aqua PA and for other water and wastewater companies before the Commission and that have been accepted by the Commission in its past orders concerning water and wastewater utilities.

Q. Are the factors considered in your estimates of service life presented in Exhibit Nos. 6-A, Part 2 through 6-E, Part 2?

A. Yes. A discussion of the factors considered in the estimation of service lives is presented in Part III, Service Life Considerations, of 6-A, Part 2 and 6-B Part 2 for water accounts and in Part III, Service Life Considerations, of Exhibit Nos. 6-C through 6-E, Part 2 for wastewater accounts.

Q. Please outline the contents of Exhibit Nos. 6-A, Part 2 through 6-E, Part 2.

A. Exhibit No. 6-A, Part 2 is presented in eight parts. Part I, Introduction, contains statements with respect to the plan of the report, and the basis of the study. Part II, Estimation of Survivor Curves, presents descriptions of the considerations and the methods used in the service life studies. Part III, Service Life Considerations, presents the factors and judgment utilized in the average service life analysis. Part IV, Calculation of Annual and Accrued Depreciation, describes the procedures used in the calculation of group depreciation. Part V, Results of Study, presents a summary by depreciable group of annual depreciation accrual rates and amounts. Part VI, Service Life Statistics, presents the statistical analysis of service life estimates. Part VII, Detailed Depreciation Calculations, presents the detailed tabulations of annual depreciation. Part VIII, Experienced and Estimated Net Salvage, presents the cost of removal and gross salvage recorded for the period 2020-2024.

Table 1, pages V-5 through V-8, presents the estimated survivor curve, the original cost as of December 31, 2024, and the book reserve and calculated annual depreciation for each account or subaccount of Water Plant. Table 2, pages V-9 and V-10, presents the bringforward to December 31, 2024, of the book depreciation reserve as of December 31, 2023. Table 3 on page V-11 and V-12 sets forth the calculation of the annual accruals used in the bringforward. Table 4, page V-13, presents the experienced and estimated net salvage during the five-year period, 2020 through 2024.

The section beginning on page VI-2 presents the results of the retirement rate analyses prepared as the historical bases for the service life estimates. The section beginning on page VII-2 presents the depreciation calculations related to original cost. The tabulation on pages VII-3 through VII-8 presents the cumulative depreciated original cost by year installed. The tabulations on pages VII-10 through VII-173 present the calculation of annual depreciation by vintage by account for each depreciable group of water plant. The tabulation on pages VIII-2 through VIII-6 presents the retirements, gross salvage, and cost of removal by account for each year during the period 2020 through 2024. Exhibit No. 6-B, Part 2 is presented in the same fashion for the Shenandoah water plant. Exhibit Nos. 6-C, 6-D and 6-E, Part 2 are presented in the same fashion for wastewater plant.

Q. Please outline the contents in Exhibit Nos. 6-A, Part 3 through 6-E, Part 3.

A. Exhibit No. 6-A, Part 3 includes a description of the results, summaries of the depreciation calculations, and the detailed depreciation calculations as of December 31, 2025. The descriptions and explanations presented in Exhibit No. 6-A, Part 2 are also applicable to the depreciation calculations presented in Exhibit No. 6-A, Part 3. The graphs and tables related to service lives presented in Exhibit No. 6-A, Part 2 also support the service life estimates used in Exhibit No. 6-A, Part 3 inasmuch as the estimates are the same for both test years. The summary tables and detailed depreciation calculations as of December 31, 2025, are organized and presented in the same manner as those as of December 31, 2024. Exhibit Nos. 6-B, Part 3 is presented in the same fashion for the

Shenandoah water plant. Exhibit Nos. 6-C, 6-D and 6-E, Part 3 are presented in the same fashion for wastewater plant.

Q. Please outline the contents of Exhibit Nos. 6-A, Part I through 6-E, Part 1.

A. Exhibit No. 6-A, Part 1 includes a description of the results, summaries of the depreciation calculations, and the detailed depreciation calculations as of December 31, 2023. The descriptions and explanations presented in Exhibit No. 6-A, Part 2 are also applicable to the depreciation calculations presented in Exhibit No. 6-A, Part 1. The graphs and tables related to service lives presented in Exhibit No. 6-A, Part 2 also support the service life estimates used in Exhibit No. 6-A, Part 1, inasmuch as the estimates are the same for both test years. The summary tables and detailed depreciation calculations as of December 31, 2023, are organized and presented in the same manner as those as of December 31, 2024. Exhibit No. 6-B, Part 1 is presented in the same fashion for Shenandoah water plant. Exhibit Nos. 6-C, 6-D and 6-E, Part 1 are presented in the same fashion for wastewater plant.

Q. Please use an example to illustrate the manner in which the study is presented in Exhibit Nos. 6-A, Part 1 through 6-E, Part 3.

A. I will use Account 331.03, Mains and Accessories – 12 Inch and Over, as my example, inasmuch as it is one of the largest depreciable group of water assets and represents approximately 13 percent of the original cost of depreciable water utility plant as of December 31, 2024, the FTY.

The retirement rate method was used to analyze the survivor characteristics of this group. The life tables for the 1954-2019, 1985-2019 and 2000-2019

experience bands are presented on pages VI-123 through VI-134 of Exhibit No. 6-A, Part 2. The life tables, or original survivor curves, are plotted along with the estimated smooth survivor curve, the 95-S3, on page VI-122.

The calculation of the annual depreciation related to the original cost of water plant as of December 31, 2023 is presented on pages II-101 through II-104 of Exhibit No. 6-A, Part 1. The calculation is based on the 95-S3 survivor curve, the attained age, and the allocated book reserve. The calculation as of December 31, 2024 is presented on pages VII-101 through VII-104 of Exhibit No. 6-A, Part 2 and is based in part on the bringforward of the book reserve. The calculation as of December 31, 2025 is presented on pages II-102 through II-104 of Exhibit No. 6-A, Part 3 and is based in part on the bringforward of the book reserve. The tabulations in Exhibits 6-A, Part 1 through 3 set forth the installation year, the original cost, calculated accrued depreciation, allocated book reserve, future accruals, remaining life and annual accrual. The totals are brought forward to Table 1 on page I-4 in Exhibit No. 6-A, Part 1 on page V-6 in Exhibit No. 6-A, Part 2, and page I-6 in Exhibit No. 6-A, Part 3. The same process is conducted for the Shenandoah water system and each wastewater system.

Q. In what manner is net salvage incorporated in the depreciation calculations?

A. As stated on page IV-7 of Exhibit No. 6-A, Part 2, no adjustment for net salvage was made to the calculated annual depreciation amounts. The total calculated annual depreciation set forth on page I-6 of Exhibit No. 6-A, Part 1, on page V-8 of Exhibit No. 6-A, Part 2 and on page I-6 of Exhibit No. 6-A, Part 3 reflects an

addition for the amortization of negative net salvage in accordance with the practice of this Commission. The amortization is based on experience during the period 2019 through 2023 for the calculation as of December 31, 2023, on experience during the period 2020 through December 31, 2023, plus estimates for the year 2024 for the calculation as of December 31, 2024, and on experience during the period 2021 through December 31, 2023, plus estimates for the years 2024 and 2025 for the calculation as of December 31, 2025. The detail by plant account of regular retirements, gross salvage, and cost of removal for each year is presented on pages III-2 through III-6 of Exhibit No. 6-A, Part 1 and on pages VIII-2 through VIII-6 of Exhibit No. 6-A, Part 2 and on pages III-2 through III-6 of Exhibit No. 6-A, Part 3. The totals are brought forward to Table 2 on page I-7 of Exhibit No. 6-A, Part 1, to Table 4 on page V-13 of Exhibit No. 6-A, Part 2 and to Table 4 on page I-11 of Exhibit No. 6-A, Part 3 in which the amounts of the five-year amortizations are calculated. The same calculations are presented in the Shenandoah water and wastewater studies.

Q. Does this complete your testimony at this time?

A. Yes, it does.

Appendix A

JOHN SPANOS

DEPRECIATION EXPERIENCE

Q. Please state your name.

A. My name is John J. Spanos.

Q. What is your educational background?

A. I have Bachelor of Science degrees in Industrial Management and Mathematics from Carnegie-Mellon University and a Master of Business Administration from York College.

Q. Do you belong to any professional societies?

A. Yes. I am a member and past President of the Society of Depreciation Professionals and a member of the American Gas Association/Edison Electric Institute Industry Accounting Committee.

Q. Do you hold any special certification as a depreciation expert?

A. Yes. The Society of Depreciation Professionals has established national standards for depreciation professionals. The Society administers an examination to become certified in this field. I passed the certification exam in September 1997 and was recertified in August 2003, February 2008, January 2013, February 2018 and February 2023.

Q. Please outline your experience in the field of depreciation.

A. In June 1986, I was employed by Gannett Fleming Valuation and Rate Consultants, Inc. as a Depreciation Analyst. During the period from June 1986 through December 1995, I helped prepare numerous depreciation and original cost studies for utility companies in various industries. I helped perform depreciation studies for the following telephone companies: United Telephone of Pennsylvania, United Telephone of New Jersey, and Anchorage Telephone Utility. I helped perform depreciation studies for the following companies in

the railroad industry: Union Pacific Railroad, Burlington Northern Railroad, and Wisconsin Central Transportation Corporation.

I helped perform depreciation studies for the following organizations in the electric utility industry: Chugach Electric Association, The Cincinnati Gas and Electric Company (CG&E), The Union Light, Heat and Power Company (ULH&P), Northwest Territories Power Corporation, and the City of Calgary - Electric System.

I helped perform depreciation studies for the following pipeline companies: TransCanada Pipelines Limited, Trans Mountain Pipe Line Company Ltd., Interprovincial Pipe Line Inc., Nova Gas Transmission Limited and Lakehead Pipeline Company.

I helped perform depreciation studies for the following gas utility companies: Columbia Gas of Pennsylvania, Columbia Gas of Maryland, The Peoples Natural Gas Company, T. W. Phillips Gas & Oil Company, CG&E, ULH&P, Lawrenceburg Gas Company and Penn Fuel Gas, Inc.

I helped perform depreciation studies for the following water utility companies: Indiana-American Water Company, Consumers Pennsylvania Water Company and The York Water Company; and depreciation and original cost studies for Philadelphia Suburban Water Company and Pennsylvania-American Water Company.

In each of the above studies, I assembled and analyzed historical and simulated data, performed field reviews, developed preliminary estimates of service life and net salvage, calculated annual depreciation, and prepared reports for submission to state public utility commissions or federal regulatory agencies. I performed these studies under the general direction of William M. Stout, P.E.

In January 1996, I was assigned to the position of Supervisor of Depreciation Studies. In July 1999, I was promoted to the position of Manager, Depreciation and

Valuation Studies. In December 2000, I was promoted to the position as Vice-President of Gannett Fleming Valuation and Rate Consultants, Inc., in April 2012, I was promoted to the position as Senior Vice President of the Valuation and Rate Division of Gannett Fleming Inc. (now doing business as Gannett Fleming Valuation and Rate Consultants, LLC) and in January of 2019, I was promoted to my present position of President of Gannett Fleming Valuation and Rate Consultants, LLC. In my current position I am responsible for conducting all depreciation, valuation and original cost studies, including the preparation of final exhibits and responses to data requests for submission to the appropriate regulatory bodies.

Since January 1996, I have conducted depreciation studies similar to those previously listed including assignments for Pennsylvania-American Water Company; Aqua Pennsylvania; Kentucky-American Water Company; Virginia-American Water Company; Indiana-American Water Company; Iowa-American Water Company; New Jersey-American Water Company; Hampton Water Works Company; Omaha Public Power District; Enbridge Pipe Line Company; Inc.; Columbia Gas of Virginia, Inc.; Virginia Natural Gas Company National Fuel Gas Distribution Corporation - New York and Pennsylvania Divisions; The City of Bethlehem - Bureau of Water; The City of Coatesville Authority; The City of Lancaster - Bureau of Water; Peoples Energy Corporation; The York Water Company; Public Service Company of Colorado; Enbridge Pipelines; Enbridge Gas Distribution, Inc.; Reliant Energy-HLP; Massachusetts-American Water Company; St. Louis County Water Company; Missouri-American Water Company; Chugach Electric Association; Alliant Energy; Oklahoma Gas & Electric Company; Nevada Power Company; Dominion Virginia Power; NUI-Virginia Gas Companies; Pacific Gas & Electric Company; PSI Energy; NUI - Elizabethtown Gas Company; Cinergy Corporation – CG&E; Cinergy

Corporation – ULH&P; Columbia Gas of Kentucky; South Carolina Electric & Gas Company; Idaho Power Company; El Paso Electric Company; Aqua North Carolina; Aqua Ohio; Aqua Texas, Inc.; Aqua Illinois, Inc.; Ameren Missouri; Central Hudson Gas & Electric; Centennial Pipeline Company; CenterPoint Energy-Arkansas; CenterPoint Energy – Oklahoma; CenterPoint Energy – Entex; CenterPoint Energy - Louisiana; NSTAR – Boston Edison Company; Westar Energy, Inc.; United Water Pennsylvania; PPL Electric Utilities; PPL Gas Utilities; Wisconsin Power & Light Company; TransAlaska Pipeline; Avista Corporation; Northwest Natural Gas; Allegheny Energy Supply, Inc.; Public Service Company of North Carolina; South Jersey Gas Company; Duquesne Light Company; MidAmerican Energy Company; Laclede Gas; Duke Energy Company; E.ON U.S. Services Inc.; Elkton Gas Services; Anchorage Water and Wastewater Utility; Kansas City Power and Light; Duke Energy North Carolina; Duke Energy South Carolina; Monongahela Power Company; Potomac Edison Company; Duke Energy Ohio Gas; Duke Energy Kentucky; Duke Energy Indiana; Duke Energy Progress; Northern Indiana Public Service Company; Tennessee- American Water Company; Columbia Gas of Maryland; Maryland-American Water Company; Bonneville Power Administration; NSTAR Electric and Gas Company; EPCOR Distribution, Inc.; B. C. Gas Utility, Ltd; Entergy Arkansas; Entergy Texas; Entergy Mississippi; Entergy Louisiana; Entergy Gulf States Louisiana; the Borough of Hanover; Louisville Gas and Electric Company; Kentucky Utilities Company; Madison Gas and Electric; Central Maine Power; PEPCO; PacifiCorp; Minnesota Energy Resource Group; Jersey Central Power & Light Company; Cheyenne Light, Fuel and Power Company; United Water Arkansas; Central Vermont Public Service Corporation; Green Mountain Power; Portland General Electric Company; Atlantic City Electric; Nicor Gas Company; Black Hills Power; Black Hills Colorado Gas; Black Hills Energy Arkansas, Inc.; Black Hills Kansas

Gas; Black Hills Service Company; Black Hills Utility Holdings; Public Service Company of Oklahoma; City of Dubois; Peoples Gas Light and Coke Company; North Shore Gas Company; Connecticut Light and Power; New York State Electric and Gas Corporation; Rochester Gas and Electric Corporation; Greater Missouri Operations; Tennessee Valley Authority; Omaha Public Power District; Indianapolis Power & Light Company; Vermont Gas Systems, Inc.; Metropolitan Edison; Pennsylvania Electric; West Penn Power; Pennsylvania Power; PHI Service Company - Delmarva Power and Light; Atmos Energy Corporation; Citizens Energy Group; PSE&G Company; Berkshire Gas Company; Alabama Gas Corporation; Mid-Atlantic Interstate Transmission, LLC; SUEZ Water; WEC Energy Group; Rocky Mountain Natural Gas, LLC; Illinois-American Water Company; Northern Illinois Gas Company; Public Service of New Hampshire; FirstEnergy Service Corporation; Northeast Ohio Natural Gas Corporation; Blue Granite Water Company; Spire Missouri, Inc.; Dominion Energy South Carolina, Inc.; South FirstEnergy Operating Companies; Dayton Power and Light Company; Liberty Utilities; East Kentucky Power Cooperative; Bangor Natural Gas; Hanover Borough Municipal Water Works; West Virginia American Water Company; Evergy Metro; Evergy Missouri West; Granite State Electric; Bluegrass Water; The Borough of Ambler; Newtown Artesian Water Company and Connecticut Water Company.

My additional duties include determining final life and salvage estimates, conducting field reviews, presenting recommended depreciation rates to management for its consideration and supporting such rates before regulatory bodies.

Q. Have you submitted testimony to any state utility commission on the subject of utility plant depreciation?

A. Yes. I have submitted testimony to the Pennsylvania Public Utility Commission; the

Commonwealth of Kentucky Public Service Commission; the Public Utilities Commission of Ohio; the Nevada Public Utility Commission; the Public Utilities Board of New Jersey; the Missouri Public Service Commission; the Massachusetts Department of Telecommunications and Energy; the Alberta Energy & Utility Board; the Idaho Public Utility Commission; the Louisiana Public Service Commission; the State Corporation Commission of Kansas; the Oklahoma Corporate Commission; the Public Service Commission of South Carolina; Railroad Commission of Texas – Gas Services Division; the New York Public Service Commission; Illinois Commerce Commission; the Indiana Utility Regulatory Commission; the California Public Utilities Commission; the Federal Energy Regulatory Commission ("FERC"); the Arkansas Public Service Commission; the Public Utility Commission of Texas; Maryland Public Service Commission; Washington Utilities and Transportation Commission; The Tennessee Regulatory Commission; the Regulatory Commission of Alaska; Minnesota Public Utility Commission; Utah Public Service Commission; District of Columbia Public Service Commission; the Mississippi Public Service Commission; Delaware Public Service Commission; Virginia State Corporation Commission; Colorado Public Utility Commission; Oregon Public Utility Commission; South Dakota Public Utilities Commission; Wisconsin Public Service Commission; Wyoming Public Service Commission; the Public Service Commission of West Virginia; Maine Public Utility Commission; Iowa Utility Board; Connecticut Public Utilities Regulatory Authority; New Mexico Public Regulation Commission; Commonwealth of Massachusetts Department of Public Utilities; Rhode Island Public Utilities Commission and the North Carolina Utilities Commission.

Q. Have you had any additional education relating to utility plant depreciation?

A. Yes. I have completed the following courses conducted by Depreciation Programs, Inc.:

"Techniques of Life Analysis," "Techniques of Salvage and Depreciation Analysis," "Forecasting Life and Salvage," "Modeling and Life Analysis Using Simulation," and "Managing a Depreciation Study." I have also completed the "Introduction to Public Utility Accounting" program conducted by the American Gas Association.

Q. Does this conclude your qualification statement?

A. Yes.

LIST OF CASES IN WHICH JOHN J. SPANOS SUBMITTED TESTIMONY

	Year	Jurisdiction	Docket No.	Client Utility	Subject
01.	1998	PA PUC	R-00984375	City of Bethlehem – Bureau of Water	Original Cost and Depreciation
02.	1998	PA PUC	R-00984567	City of Lancaster	Original Cost and Depreciation

III. REPAIRS DEDUCTIONS FOR RATEMAKING PURPOSES 13

IV. ACT 40 17

V. STATE TAX RATE CHANGE 19

VI. CONCLUSION 20

DIRECT TESTIMONY OF PANPILAS W. FISCHER

I. INTRODUCTION AND PURPOSE OF TESTIMONY

Q. What is your name and business address?

A. My name is Panpilas Fischer, and my business address is 4355 Cobb Parkway, Suite J255, Atlanta, GA 30339.

Q. By whom are you employed and in what capacity?

A. I am a consultant with Regulated Capital Consultants, LLC ("RCC"). My role in this case is to provide support to the Aqua Pennsylvania Inc. and Aqua Pennsylvania Wastewater Inc., (collectively "Aqua PA" or the "Company") finance team for the delivery of all filing requirements associated with the Pennsylvania Public Utility Commission ("PUC" or "Commission") calculation of federal and state income taxes. Specifically, I have worked with the Company to develop the rate case income tax schedules F-2 and the balance of Accumulated Deferred Income Taxes ("ADIT") in rate base.

Q. Would you please relate your education and business experience?

A. I graduated from the Ohio State University in 1987 with a Bachelor of Science degree in Business Administration, with a concentration in accounting. I am a Certified Public Accountant in the State of Ohio. I have held various positions in public accounting at a national firm, KPMG and a regional firm, Clark Schaefer Hackett Business Advisors. I began my career in the utility industry in October 2000, when I joined NiSource Corporate Services Co. as a Financial Analyst in the Tax Department. Throughout my tenure there I held various positions of increasing responsibility overseeing tax compliance, tax provision, regulatory support and tax planning for the regulated entities. In October 2015, I accepted the position of Tax Director. In June 2020 I began working for RCC as a consultant. In this role I have provided the following services to clients:

- Assistance with tax compliance, tax depreciation, deferred income tax and provision set up and maintenance
- Project management and support on tax technical and functional issues
- Audit support including review of tax compliance with United State Internal Revenue Service ("IRS") normalization rules and ASC 740
- Regulatory tax support including development of income tax data and filing requirements for regulatory reports and rate proceedings

Q. Have you been a witness in matters previously before the Commission?

A. Yes, I have provided written and oral testimony to the PUC, the Maryland Public Service Commission and the Massachusetts Department of Public Utilities. I have also provided written testimony to the Kentucky Public Service Commission, the Ohio Public Utilities Commission and the Virginia State Corporation Commission.

Q. What is the purpose of your testimony?

A. First, I will explain the calculation of the Company's federal and state income tax expense included in cost of service in this case and the tax balances included in rate base. Second, I will describe how the Company is reflecting the effects of its continued tax treatment of repairs authorized in its last base rate case at PUC Docket Nos. R-2021-3027385 and R-2021-3027386, et al. ("2021 Base Rate Case") and any claims related to the repairs "Collar" (described in detail below) due to customers. Third, I will address the Consolidated Tax Adjustment and how the Company's income tax expense is in compliance with Act 40 of 2016 ("Act 40"), which added Section 1301.1 to the Pennsylvania Public Utility Code. Lastly, I will describe how the reduction in the Pennsylvania Corporate Net Income ("CNI") tax rate affects the development of the

Company's revenue requirement in this case.

II. AQUA PA'S CALCULATION OF FEDERAL AND STATE INCOME TAXES

Q. Which schedules contain the computations of the income tax expense element of the Company's cost of service?

A. The income tax computation is shown on Schedules F-2 of Exhibit Nos. 1-A (Water) and 1-B (Shenandoah water operations, as well as Exhibit No. 1-C (Wastewater), and Exhibit Nos. 1-D through 1-E (representing individual wastewater operations). All schedules in these exhibits are titled "Computation of Federal and State Income Taxes Under Present and Proposed Rates".

Q. Please explain the basis for the state and federal income tax computations set forth on Schedule F-2 of Exhibit Nos. 1-A through 1-E.

A. Schedule F-2 of Exhibit Nos. 1-A through 1-E each contain four income tax expense computations: (1) one for the historic test year ended December 31, 2023 ("HTY") at base rates then in effect (which are the same as current base rates); (2) one for the future test year ending December 31, 2024 ("FTY") at current base rates; (3) one for the FPFTY at current base rates; and (4) one for the FPFTY at the rates proposed by the Company. All four of the computations employ the same methodology. However, since the Company's claim in this case is based upon the level of income tax expense applicable to the FPFTY at proposed rates, I will describe that computation in (columns (9) and (10)) of each schedule. These computations are similar across Schedule F-2 in each of Exhibit Nos. 1-A through 1-E. When using the terms "water" and "wastewater", I am referring to the amounts from Exhibit Nos. 1-A and 1-C respectively because the amounts on those Exhibits comprise the majority of the components that derive the income tax expense

amounts.

The calculation of total income tax expense consists of two parts. First, the schedule shows the computation of current federal and state income tax expense – that is, the income tax that would be paid with respect to operations during the year assuming the projected levels of income and expense are achieved. The second part is the computation of deferred federal and state income tax expense. The two components, when combined, equal the Company's total income tax expense to be recovered in proposed base rates.

Q. How is the Company's current income tax expense calculated?

A. The calculation of current income tax expense begins with pre-tax income (operating income before income taxes and before interest expense). There are several adjustments made to this number that are the same or similar for both federal and state income tax purposes. These are interest expense, tax repairs, book depreciation, tax depreciation and other property related adjustments such as cost of removal and Allowance for Funds Used During Construction ("AFUDC") debt. Interest expense (line 2) is not reflected in pre-tax income but is deductible for both federal and state income tax purposes. Consequently, an adjustment must be made. The tax repairs deduction (line 4) is the deduction that the Company projects it will claim during the test year for both federal and state income tax purposes. The nature of this deduction is described later in my testimony. Book depreciation is added back for both the federal and state income tax purposes (line 5). Tax depreciation is then deducted for both federal and state income tax purposes (line 6). Other property related adjustments are deducted for both federal and state income tax purposes (line 7).

Q. What depreciable lives and depreciation methods does the Company use for federal income tax purposes?

A. The Company uses the following depreciable lives and depreciation methods for tax purposes:

Utility Property Vintages		
1969 and prior	50 years [(1)]	Straight-Line
1970	50 years [(1)]	Double Declining Balance Switching to Straight-Line
1971 to 1980	40 years [(2)]	Double Declining Balance Switching to Straight-Line
1981 to 1986	15 years	Accelerated Cost Recovery System ("ACRS")
1987 to June, 1996	20 years	Modified Accelerated Cost Recovery System ("MACRS")
June 1996 and subsequent	25 years	Straight-Line
Tax Exempt Financed Property	50 years	Straight-Line
Buildings		
1970 and prior	45 years [(1)]	Straight-Line
1971 to 1980	45 years [(2)]	Straight-Line
1981 to 1984 (portion)	15 years	ACRS
1984 (portion) to 1985	18 years	ACRS
1986	19 years	ACRS
1987 and subsequent	31 1/2 years	Straight-Line
Office Equipment		
1970 and prior	10 years [(1)]	Straight-Line
1971 to 1980	8 years [(2)]	Double Declining Balance
1981 to 1986	5 years	ACRS
1987 and subsequent	7 years	MACRS

Qualified Technological Equipment		
1987 and subsequent	5 years	MACRS

(1) Guideline Lives

(2) Lives under Asset Depreciation Range ("ADR")

Q. Why do the federal and state tax depreciation amounts differ from one another?

A. The federal tax depreciation amounts are approximately $86.5 million for water and $19.8 million for wastewater, while the comparable state amounts are approximately $89.2 million for water and $19.9 million for wastewater The higher state income tax amounts are the result of deducting in the current year a portion of prior years' bonus depreciation that was not deductible for Pennsylvania income tax purposes in the year that the property was placed in service.

Q. Is there another adjustment to arrive at taxable income?

A. Yes. Since state income taxes are deductible for federal income tax purposes, once the current state income tax liability is computed (column (10), line 12) by multiplying state taxable income (column (10), line 8) by the state income tax rate (column (10), line 9) and making adjustments for any state net operating loss (column (10), line 11) that amount is deducted (column (9), line 3) to derive federal taxable income. I discuss the state net operating loss and the income tax rate decrease later in my testimony. Federal taxable income is then multiplied by the 21% federal income tax rate.

Q. Are there any other adjustments necessary to derive current income tax expense?

A. Yes. As a result of taking accelerated depreciation deductions and tax repairs, the Company has produced tax net operating losses ("NOLs") for both Federal and Pennsylvania income tax purposes. As of December 31, 2025, the Company projects that it will have a state net

operating loss carryforward ("NOLC") of approximately $438.8 million for water and $20.1 million for wastewater. Under Pennsylvania law, this NOLC can offset state taxable income, subject to both taxable income and time limitations. Pennsylvania law limits the NOLC offset to a percentage of the state taxable income produced. This limit was 35% in 2018 and 2019 and increased to 40% in 2020 and thereafter. There is utilization of the state NOLC reflected in the FPFTY for water due to the level of tax deductions. The state NOLC is increasing into the FPFTY for wastewater. The Federal NOLC is projected to be $81.0 million for water and $0 for wastewater as of December 31, 2025. There is no utilization of the Federal NOLC reflected in the FPFTY due to the return filing group's inability to monetize the NOL. Under the Company's Tax Sharing Agreement, if the consolidated filing group has negative taxable income, then companies with positive taxable income would not get to utilize their NOLCs. However, if the consolidated filing group has positive taxable income, then companies with tax losses would be able to monetize those losses.

Q. What is the total current income tax expense claimed by the Company?

A. Total current federal income tax expense for the FPFTY at proposed rates is projected to be $35,271,389 federal for water and $3,831,966 for wastewater, while total current state income tax expense for the FPFTY is projected to be $11,258,410 for water and $2,177,551 for wastewater.

Q. Please explain the deferred income tax component of the Company's total income tax expense.

A. Pennsylvania regulatory policy is, generally, to charge customers a level of tax expense equal to the taxes the utility expects to pay currently, therefore the Company does not record state deferred income taxes on its property related book vs. tax timing differences,

with limited exceptions. This is referred to as "flow through" tax accounting. The exceptions where the Company does record state deferred income taxes are for historical main cleaning and lining costs, certain method/life differences on pre-1971 vintage assets and state NOLCs prior to 2025. For federal income tax purposes, the Company records deferred income taxes, particularly as it relates to the tax benefits of accelerated depreciation, which is subject to the tax normalization rules with the exception of the tax repairs deduction, which is discussed later in my testimony, and book vs. tax depreciation on pre-1971 vintage assets where federal tax statutes did not require full normalization of accelerated tax depreciation versus book straight line depreciation recovered in rates. The provision of deferred income taxes is the accounting and ratemaking mechanism that implements the normalization requirement the Internal Revenue Code imposes as a condition for using the liberalized depreciation methodologies allowed for income tax purposes. The normalization rules do not permit the tax benefit of liberalized tax depreciation to be flowed-through to customers as a tax deduction in the year(s) those deductions occur. Instead, the tax effects of those amounts are recorded as deferred taxes. These taxes are deferred, not eliminated; the taxes that are deferred will be paid to the government later in the life of the depreciable asset when the difference between book and tax depreciation reverses. To recognize the fact that deferred taxes are a source of capital for the Company that does not have a capital cost, accumulated deferred income taxes ("ADIT") are deducted from rate base for ratemaking purposes. The Company's deferred tax expense in this case also includes the flow-through of excess ADIT and the amortization of some older vintage investment tax credits that I will explain hereafter. Additionally, tax repairs amounts related to the "collar" mechanism, Section (481)

adjustment, and the FIN 48 provision are reflected as adjustments to deferred tax expense. I have included a discussion of these adjustments in Section III of my testimony.

Q. Please explain the provision of deferred income tax expense for accelerated depreciation.

A. As I explained previously, deferred income tax expense arises from the normalization requirement imposed by the Internal Revenue Code and reflects the difference between tax depreciation and book depreciation. Tax depreciation is calculated by multiplying the tax basis of assets by the applicable depreciation rates used for income tax purposes. The applicable depreciation rates are a function of the depreciable lives and depreciation methods for each relevant vintage of the Company's property. Because depreciable lives and methods differ based on the year plant was placed in service, the difference between tax and book depreciation and the associated tax effect differs depending on the vintage year of the property involved. For assets acquired prior to 1971, there are no deferred taxes because this property was not subject to a normalization requirement. In total, the difference between tax depreciation and book depreciation when multiplied by the 21% federal income tax rate is ($11,709,084) for water and $1,060,928 for wastewater (Exhibit No. 1-A and 1-C, Schedule F-2, column (9), lines 13 and 14). I further note that the calculation of this amount for each wastewater operation is similarly reflected in Schedule F-2, column (9), lines 13 and 14 of Exhibit Nos. 1-C through 1-E.

Q. Does the Company record deferred state tax income expense related to its use of accelerated depreciation?

A. No, it does not. The Company has not normalized deferred state income taxes on most property related differences based on Pennsylvania regulatory requirements. The IRS

normalization rules only apply to the federal income tax. The Company continues to flow-through the benefits of accelerated depreciation on its book depreciable assets with the exception of a small amount of assets that had received normalization treatment in the past on the water company and will continue to receive normalization treatment as the timing difference reverses. The Company also normalized deferred state income taxes on historical main cleaning and lining costs, which continue to receive normalization treatment as the timing difference reverses.

Q. Please explain the impact of excess ADIT on the Company's deferred income tax expense.

A. The Company's deferred tax expense is reduced for the flow-back of excess protected ADIT resulting from past rate reductions, notably the 2017 Tax Cuts and Jobs Act ("TCJA") tax rate reduction which reduced the federal income tax rate from 35% to 21%. This flow-back is computed using the Average Rate Assumption Method ("ARAM"). This method required the Company to keep deferred taxes intact until book depreciation exceeds tax depreciation for the vintage years affected. The reduction is $2,997,502 for water and $28,945 for wastewater, as shown in column (9), on line 20, of Schedule F-2 of Exhibit Nos. 1-A and 1-C. The deferred tax expense is also adjusted for the flow-back, or recovery in the case of water, of the unprotected excess/(deficient) ADIT. The amounts are an increase to deferred tax expense of ($242,749) for water and a decrease of $551 for wastewater (column (9), line 21). These amounts are being amortized over ten years.

Q. Please explain the impact of the investment tax credit amortization on the Company's deferred income tax expense.

A. The tax effect of investment tax credits is flowed back to customers over the book lives of

the assets that generated the credits. The amounts of $102,140 for water and $0 for wastewater are reflected as a reduction to deferred income tax expense in column (9), on line 26, Schedule F-2 of Exhibit No. 1-A.

Q. What is the Company's total projected deferred income tax expense?

A. The total amount of these various components constitutes the Company's anticipated federal deferred tax expense of ($7,351,798) for water and $1,480,684 for wastewater for the FPFTY at proposed rates as set forth on Schedule F-2 of Exhibit Nos. 1-A and 1-C. The corresponding state amounts are $2,262,749 for water and $0 for wastewater.

Q. What is the Company's total projected income tax expense?

A. The Company projects total federal income tax expense of $27,919,590 for water and $5,312,630 for wastewater, and state income tax expense of $13,521,159 for water and $2,177,551 for wastewater. Notably, the combined water and wastewater effective income tax rate is 14.95% in this case, which is meaningfully lower than the effective statutory income tax rates for federal and state at 27.31%. This difference is primarily the direct result of the tax repairs benefits continuing to be passed through to customers.

Q. How is the ADIT set forth in the Company's rate base calculation on Schedule G-1 of Exhibits 1-A through 1-E derived?

A. The ADIT for the rate base calculation, as shown on Schedule G-1 of Exhibit No. 1-A through Exhibit No. 1-E, is calculated by including the normalized deferred taxes and the unamortized excess ADIT related to the tax rate reductions resulting from the tax law changes made in 1986 and 1993 at the end of the FPFTY. The ADIT also includes the excess ADIT resulting from the TCJA rate reduction as a reduction to rate base. This amount has been classified as a regulatory liability on the Company's balance sheet but is

also considered ADIT for purposes of the rate base calculation. Also included in rate base is the ADIT asset for the Federal NOLC. The deferred tax asset represents the cash benefits the Company has not received because of the NOLs. The Company booked and will continue to book deferred federal income taxes in those years for which the Company has not received any cash for its losses. The deferred tax asset is included in rate base because the Company cannot reflect an increase in deferred taxes for tax depreciation deductions that have not been realized. To do so would violate the principles of the normalization requirements under the Internal Revenue Code. Past IRS rulings addressing this issue have made it clear that companies cannot reduce rate base for benefits that have not been realized. The ADIT asset for the PA NOL is also included in rate base. Inclusion of the ADIT for the PA NOL in rate base is a recognition of pre-2025 normalization accounting treatment that recorded deferred income tax expense on the PA NOL. Note that the Company will discontinue the normalization of state income tax expense for the PA NOL in 2025, as such in the FPFTY, the Company is not reflecting any deferred state income tax expense in cost of service for the creation of PA NOL that is projected for wastewater. As a result of the PA tax rate decrease, the Company also recorded a regulatory asset for the deficient deferred state taxes related to the ADIT asset for the PA NOL. This amount is $3,043,460 and $0 has been included as an increase to rate base in the FPFTY for water and wastewater respectively.

Q. Are there any other adjustments to ADIT included in rate base?

A. Yes, there are. The Company has calculated a projected test period normalization adjustment ("pro rata normalization adjustment"). Whenever there are estimated changes in the deferred taxes that occur in a future rate period, the normalization requirements of

the Internal Revenue Code require that the deferred taxes be reflected on a pro rata basis as provided under Reg. Section 1.167(I)-1(h)(6)(ii). A future test period is defined as that portion of the test period after the effective date of the rate order. Under the pro rata basis, the change in the deferred taxes is determined by multiplying the change by a fraction of the number of days remaining in the period at the time such change is to be accrued over the total number of days in the future period. Applying this calculation resulted in a decrease to ADIT of $0 for water and $711,971 for wastewater.

The Company has included as a decrease to rate base, a regulatory liability of $2,436,764 for the uncertain tax positions ("FIN 48") provision related to the historical tax repairs deduction. I will discuss this in more detail in the next section of my testimony.

III. REPAIRS DEDUCTIONS FOR RATEMAKING PURPOSES

Q. Please address the 2011 change in method of tax accounting for repairs and how that is impacting tax expense in this proceeding.

A. Yes, in 2011 the Company filed with the IRS National Office for permission to change its definition of "unit of property". Depending on how the unit of property for the Company's network assets is defined, certain expenditures can potentially be deducted on the tax return rather than be capitalized. When the Company received permission from the IRS for this method change, under the law, it was eligible to claim a deduction under Internal Revenue Code Section 481(a) for the cumulative impact on taxable income as of the beginning of the year of its method change. A Section 481(a) adjustment has the effect of amending all prior income tax returns to adjust taxable income to a taxpayer's new method, except the net impact on taxable income for the prior years is reflected entirely as a deduction (or income) on the current year return. In the Company's 2011 rate case, Docket No. R-2011-

2267958 (“2011 Base Rate Case”), the Company received approval to give the tax benefit of the Section 481(a) adjustment to customers over a ten-year amortization period beginning in 2013. Then, in the Company’s 2018 rate case, Docket No. R-2018-3003558, R-2018-3003561, et al. (“2018 Base Rate Case”), the Company proposed accelerating this amortization to attempt to align the full amortization of the Section 481(a) adjustment with its next base rate case test year. In the Company’s most recent 2021 Base Rate Case, the remaining balance was reset to amortize over 36 months such that in this case, there remains only a full year amortization in the HTY and the FTY. The tax benefit of the Section 481(a) adjustment is fully amortized by the FPFTY.

At the time the Company received permission from the IRS to change its method of accounting in 2011, no industry specific guidance on the unit of property and methodology that the Company proposed to use to determine “capital” versus “repair” existed for the water industry and currently there continues to exist no specific guidance for the water industry, even though industry guidance has been released for the electric and gas transmission and distribution industry, as well as the electric generation industry. This resulted in the Company recording uncertain tax positions (FIN 48) on its financial statements. Under FIN 48, the Company is required to routinely assess the need or a provision for uncertain tax positions. Tax positions are first evaluated as to whether it is more likely than not it will be sustained upon audit examination, including the resolution of any related appeals or litigation processes, based on the technical merits of the position. Tax positions are then evaluated to determine the benefit to recognize in the financial statements, which is the largest amount of tax benefit that is greater than 50 percent likely of being realized upon ultimate settlement. Based on the release of guidance for the gas

industry in 2023 under the Natural Gas Safe Harbor rules (Rev. Proc. 2023-15), which provided more clarity on the rules around the unit of property that the IRS would find acceptable, the Company has released its reserves for the uncertain tax positions and is proposing to refund to customers $4,873,528 over a two-year period. This amount is before the gross-up for taxes. This decrease in deferred income tax expense of $2,436,764 per year for water and $0 for wastewater is reflected in Schedule F-2, column (9), on line 22 for Exhibit No. 1-A (Water). As previously stated, the Company has included as a decrease to rate base, a regulatory liability of $2,436,764 in the FPFTY, which represents the unamortized FIN 48 provision related to the repairs deductions.

Q. How does the change in method impact the Company's taxable income going forward?

A. As in the 2021 Base Rate Case, tax expense is being reduced for the capital additions expected in the test period to meet the standard of a repair as stipulated in the 2018 Base Rate Case settlement, where the flow-through accounting basis was approved. Moreover, a specific level of net repairs deduction (the "Collar") was specified (i.e., $158.9 million for water and wastewater on a consolidated basis). The components of the Collar included the deduction itself projected, reduced by any provision for uncertain tax positions (FIN 48) projected, less AFUDC.

Also approved in the 2018 Base Rate Case was a provision that should the Company incur a net repairs deduction that was $3 million over or under the Collar, the Company would establish a regulatory asset or liability for the income tax expense impacts associated with the amount over or under the $158.9 million, with such regulatory asset or liability to be incorporated in the Company's next base rate case for inclusion in future tax

expense claims. When the net repairs deductions for the Company fall within the range of $154.9 million to $162.9 million, customers would not have to return the reduced tax benefits or likewise the Company would not have to refund the additional tax benefits to customers. Additionally, the Settlement required that, if the Company incurred net repairs deductions that resulted in the Company reporting a regulatory asset or liability with a net cumulative income tax impact of $10 million or larger, then the Company would notify the Commission, the Office of Consumer Advocate, the Commission's Bureau of Investigation and Enforcement and the Office of Small Business Advocate as to a plan to address the amount due from or due to customers.

In the 2021 Base Rate Case, the Company received approval to revise the amount of the Collar to $159.06 million and the level of tax repairs over/under amount that would generate a regulatory asset or liability to $4 million. The Company is proposing that the Collar methodologies established in the 2018 Base Rate Case remain in place and request that the Collar amount be updated from the level approved in the 2021 Base Rate Case of $159.06 million to $163.06 million to reflect the increasing levels of capital spend that typically results in increased deductions for tax repairs.

Q. Does the Company have a regulatory asset or liability to address in this case?

A. Yes. The Company's projected tax repairs deduction for tax year 2023 was approximately $33.7 million above the top range of the 2021 Rate Case Collar of $163.06 million, at $192.8 million resulting in a regulatory liability of $9.5 million before the gross-up for taxes at the end of the HTY. The Company is proposing to amortize this over two years as a reduction to deferred income tax expense in the amount of $4,737,469 per year starting in the FPFTY as reflected in Schedule F-2, Line 23. This amount is the tax benefit of the

tax repair deduction before tax gross-up to be returned to customers.

Q. What are the projected repair benefits included in the FPFTY?

A. Referring to Schedule F-2, Line 4, "Tax Repair Deduction" in both Exhibits 1-A (Water) and 1-C (Wastewater), the Company has reflected a consolidated net tax repair deduction of approximately $163.06 million, compared to the $159.06 million target established in the 2021 Base Rate Case. Since this is within the $4 million of the top range, there is no additional regulatory asset or liability projected for the FPFTY.

Q. Referencing Exhibits 1-B and 1-C through 1-E, Schedule F-2, did you project any repairs benefit?

A. No. These are wastewater systems recently acquired by the Company pursuant to Section 1329 of the Public Utility Code, 66 Pa. C.S. § 1329. The IRS regulations regarding tangible property have provisions that dictate repairs expenses are those attributed to the taxpayer's use of the assets. Given that the Company has only owned and operated these systems 1-2 years (Shenandoah-1 year, Lower Makefield and East Whiteland-2 years), and that the investments during this time period are more restorative in nature, the investments being made by the Company are not expected to yield any repair benefit. As such these investments will be treated as tax assets instead of tax repairs.

IV. ACT 40

Q. Can you briefly describe how Act 40 changed prior Commission practice related to the practice of making a consolidated tax adjustment?

A. Yes, with the enactment of Act 40, Pennsylvania eliminates the requirement to make a consolidated tax adjustment for ratemaking purposes. Instead, a utility's tax expense for regulatory purposes is calculated on a stand-alone basis and is not subsidized by the tax

losses of its affiliates. Act 40 has been codified as Section 1301.1 of the Public Utility Code. Section 1301.1(a) which clearly and unambiguously states:

> "If an expense or investment is not allowed to be included in a public utility's rates, the related income tax deductions, and credits, including tax losses of the public utility's parent or affiliated companies, shall not be included in the computation of income tax expense to reduce rates. The deferred income taxes used to determine the rate base of a public utility for ratemaking purposes shall be based solely on the tax deductions and credits received by the public utility and shall not include any deductions or credits generated by the expenses or investments of a public utility's parent or any affiliated entity."

Section 1301.1(b) requires a public utility seeking to change rates to demonstrate that it uses at least 50 percent of what would have been a consolidated tax expense adjustment, or "differential," under the law prior to Act 40, for reliability or infrastructure related capital investments and the other 50 percent for general corporate purposes.

Q. Have you calculated the "differential" in income taxes referenced in Act 40?

A. Yes, included in TX13 Attachment 2 is the calculation of such an adjustment using the modified effective tax rate methodology traditionally used by the Commission prior to the enactment of Act 40. TX13 Attachment 2 calculated the former consolidated tax adjustment to be $75,205,377. Section 1301.1(b) requires that $37.6 million (50% of the $75.2 million consolidated tax adjustment) be spent on infrastructure replacement. Company witness Mr. William C. Packer discusses the Company's capital spend in his Direct Testimony (Statement No. 1), where he explains that the Company's average investment in reliability or infrastructure related capital investment is approximately $300 million per year through the FPFTY ending December 31, 2025. Given this fact, the Company is making significant investments in rate base that is far in excess of the 50% requirement of any consolidated tax benefits that would potentially be attributable to the

Company under a hypothetical consolidated tax adjustment. As far as the requirement that 50% of the differential be spent on general corporate purposes, I refer to the level of operations and maintenance expenses claimed in this case of approximately $188 million per the testimony of Company witness Packer on Exhibits 1-A through 1-E, Schedule C-2, which also exceeds the 50% threshold. These levels of investment satisfy the requirements of Act 40 and are certainly in the spirit of what Act 40 was intended to facilitate.

V. STATE TAX RATE CHANGE

Q. What changes in Pennsylvania tax law have been enacted since the filing of the last rate case?

A. House Bill 1342 was signed into law in Pennsylvania on July 8, 2022. The law made significant changes to the Commonwealth's corporate net income tax laws:

- Corporate net income tax rate reduction from 9.99 to 4.99 percent over a period of years;
- Sales factor changes;
- Codification of economic nexus standards.

Q. When is the rate reduction effective?

A. House Bill 1342 reduces that rate incrementally to 4.99%. These rate reductions are scheduled to occur automatically and are not contingent on state tax revenues meeting or

exceeding specific thresholds. The rate is first reduced to 8.99% for the 2023 tax year. The rate is further reduced as follows:

8.49% for tax year 2024

7.99% for tax year 2025

7.49% for tax year 2026

6.99% for tax year 2027

6.49% for tax year 2028

5.99% for tax year 2029

5.49% for tax year 2030

4.99% for tax years beginning January 1, 2031, and thereafter.

Q. How has the rate reduction been reflected in the income tax calculations in this case?

A. By the FPFTY the rate is 7.99% and because the FPFTY is a full 12 months of 2025, the Company is using the 7.99% rate to calculate state income tax expense for the FPFTY.

Q. How will future changes to the state income tax rate be reflected?

A. Future changes to the state income tax rate will be managed through the State Tax Adjustment Surcharge ("STAS"), or in future base rate proceedings.

VI. CONCLUSION

Q. Does this conclude your direct testimony?

A. Yes, however I reserve the right to supplement my Direct Testimony as needing during the progression of this case.

APPENDIX A A-1

I. INTRODUCTION AND QUALIFICATIONS.

Q. STATE YOUR NAME AND ADDRESS.

A. My name is Harold Walker, III. My business address is 1010 Adams Avenue, Audubon, Pennsylvania, 19403.

Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?

A. I am employed by Gannett Fleming Valuation and Rate Consultants, LLC as Manager, Financial Studies.

Q. PLEASE DESCRIBE YOUR QUALIFICATIONS AND YOUR EDUCATIONAL BACKGROUND AND EMPLOYMENT EXPERIENCE.

A. My educational background, business experience and qualifications are attached hereto as **Appendix A**.

II. SCOPE OF TESTIMONY

Q. WHAT IS THE PURPOSE OF YOUR DIRECT TESTIMONY?

A. The purpose of my testimony is to recommend an appropriate cash working capital allowance that Aqua Pennsylvania, Inc. and Aqua Pennsylvania Wastewater, Inc. ("Aqua PA" or "Company") should be afforded an opportunity to earn on as part of its rate base claim. My recommendation is based upon the results of five lead-lag studies that were performed under my direct supervision. The five studies are for the Water Base Operations, Shenandoah Water Operations, Wastewater Base Operations, Lower Makefield Wastewater Operations, and East Whiteland

Wastewater Operations.

Q. HAVE YOU PREPARED AN EXHIBIT PRESENTING THE RESULTS OF YOUR STUDY?

A. Yes. I have prepared Exhibit 7 which contains the 27 supporting schedules, identified as Schedule HW-1 through Schedule HW-27, summarizing the Company's cash working capital requirement in these proceeding.[1]

III. PRINCIPLES OF CASH WORKING CAPITAL

Q. WOULD YOU PLEASE EXPLAIN THE RATEMAKING PRINCIPLES CONCERNING THE INCLUSION OF WORKING CAPITAL AS AN ELEMENT OF RATE BASE?

A. Yes. The working capital allowance is a component of rate base. A utility's need for working capital was first recognized in the noted United States Supreme Court case, *Smyth v. Ames*.[2] Among the many benchmarks established in the case was the "property devoted to public use" doctrine as a basis for fixing rates. The case recognized that among the matters to be considered in determining the value of property used was "the sum required to meet operating expenses."[3] Since that

[1] Exhibit 7 provides support for the Company's cash working capital rate base elements shown on Schedules G-5 through G-5.4 of Exhibit 1-A, Exhibit 1-B, Exhibit 1-C, Exhibit 1-D and Exhibit 1-E for the Water Base Operations, Shenandoah Water Operations, Wastewater Base Operations, Lower Makefield Wastewater Operations, and East Whiteland Wastewater Operations, respectively.

[2] *Smyth v. Ames*, 169 U.S. 466 (1898), overruled on other grounds by *Fed Power Comm'n v. Nat. Gas Pipeline Co. of Am.*, 315 U.S. 575, 586 (1942). Specifically, *Fed. Power Comm'n* departed from the holding in *Smyth* that fair market value in cost of service ratemaking must be used and instead concluded that "[t]he Constitution does not bind rate-making bodies to the service of any single formula or combination of formulas."

[3] *Id*. at 547.

time, working capital has generally been recognized as a proper item to be included in the rate base on which a utility is entitled to earn a return.

Q. WHAT IS CASH WORKING CAPITAL?

A. Cash working capital is a component of working capital, representing the amount of funds necessary to finance the day-to-day operations of the Company. For ratemaking purposes, cash working capital is included as a component of a utility's rate base.

Q. WHY IS CASH WORKING CAPITAL INCLUDED AS AN ELEMENT OF RATE BASE?

A. Working capital is included in rate base to compensate investors for the use of their funds over and above their investment in plant, and to provide investors with a return on the funds required by the Company for daily operations. Cash working capital bridges the gap between the time when funds are provided to the Company by investors to allow the Company to provide service to customers, and the time revenues are received from customers as reimbursement for these services.

IV. OVERVIEW OF A LEAD-LAG STUDY

Q. HOW WAS THE CASH WORKING CAPITAL REQUIREMENT DETERMINED?

A. I conducted five lead-lag studies to determine the Company's cash working capital requirement. The lead-lag studies in this case measured the level of funding required to operate on a day-to-day basis in a sufficient amount to cover Aqua PA's

operating expenses (O&M, Taxes and Interest). This was measured by calculating the net lag between: (1) the amount of time elapsed between the provision of the cost of service and the receipt of the revenue requirement from the Company's customers (known as the revenue lag); and (2) the amount of time elapsed between when the Company receives goods and services used by the Company to provide service and the payment by the Company for those operating expense items (known as the expense lead). The difference between these two elapsed periods of time is known as the "net lag." The net lag was multiplied by the average daily operating expenses (or revenue requirement) to determine the Company's cash working capital requirement.

Q. PLEASE DESCRIBE THE COMPONENTS OF A CASH WORKING CAPITAL ANALYSIS.

A. The two primary components of a cash working capital analysis are revenue lags and expense leads. The revenue lag is the elapsed time between when the delivery of a company's product, or provision of service, to its customers occurs and when a company receives payment for the delivery of the product. Investor-provided funds are required to keep a company running during the revenue lag time period, when the revenue stream is temporarily insufficient to finance daily operational needs.

As mentioned above, the expense lead is the elapsed time between when a good or service is provided to a company and when a company pays its supplier, or vendor, for the good or service. During the expense lead time period, cash

received from customers may temporarily exceed a company's payments to its suppliers for goods or services, and the excess may be used to repay investor-provided funds.

The net difference between the revenue lag and expense lead determines a company's cash working capital requirement. Additional details of the revenue lag and the expense lead calculations are provided below.

Q. GENERALLY SPEAKING, HOW DID YOU CALCULATE THE REVENUE LAG?

A. The revenue lag is the sum of three distinct components: the service period lag, the billing lag, and the collection lag.

Q. WHAT IS THE SERVICE PERIOD LAG?

A. The service period lag is the average time between meter readings. The average, or mid-point, between meter readings, based on monthly meter readings, is roughly 15 days. The mid-point service period lag is produced by dividing the service period of roughly 30 days by two.

Q. WHAT IS THE BILLING LAG?

A. The billing lag is the time from the meter reading date to the date the customer is billed. On the customer billing date, the bill is mailed to the customer, and the total billing amount for the cycle is recorded to Aqua PA's accounts receivable. The

bills are prepared and mailed roughly two days after meters are read.

Q. WHAT IS THE COLLECTION LAG?

A. The collection lag is the average number of days from the date the bills are mailed to customers to the date payments are received by Aqua PA. This was determined by summing the daily accounts receivable balance during the twelve months ended December 31, 2023, and dividing by the sum of the daily receipts for the same period.

Q. GENERALLY SPEAKING, HOW DID YOU CALCULATE THE EXPENSE LEAD?

A. In a lead-lag study, the cost of service, or expense, lead days are calculated for each invoice or account by subtracting the midpoints of the service periods (the service lead) from the date the Company paid the invoices or accounts (the payment lead) and then summing these two data points.

The service lead is the average time that a service or good was provided to the Company. If a service or good was provided for 20 days, the 20-day service period is divided by two to produce a midpoint of ten days for the service period lead.

The payment lead is the number of days from the midpoint of the service period to the payment date for the service or good. If payment for the service or good was provided on the 30th day and the midpoint of the service period was the

10th day, the payment lead is 20 days (30 days – ten days).

Q. WHY ARE MIDPOINTS USED IN THE CASH WORKING CAPITAL ANALYSIS?

A. Midpoints are used to determine the weighted average period during which a service or good is rendered or provided during the service period, or between meter reads. The midpoint assumes that, on average, service is provided evenly over the service period. For example, if a service is provided over a 30-day period, then on average, 30 days of service was provided evenly for 15 days (30÷2) of the service period. Mathematically, the midpoint is the weighted average number of days that the full service period number of days (*e.g.,* 30 days) was provided.

V. AQUA PA'S LEAD-LAG STUDY

Q. DID YOU CONSIDER AQUA PA'S OVERALL COST OF SERVICE IN YOUR LEAD-LAG STUDY?

A. No. I considered only a portion of Aqua PA's cost of service items in my lead-lag study to be consistent with the lead-lag methodology used in Pennsylvania. In Pennsylvania, lead-lag studies do not include non-cash expense items.

A lead-lag study based on O&M, Taxes and Interest likely understates the full cash working capital requirement and affords the minimum cash working capital requirement. A lead-lag study based on the entire revenue requirement and cost of service provides a more accurate measure of the cash working capital

requirement.

Q. WHAT DATA SET DID YOU UTILIZE IN YOUR LEAD-LAG STUDY?

A. The data sets were selected after developing an understanding of the Company's collections, payment policies, and procedures. To inform my understanding of these items, I requested representative data sets from the Company. Once the requested raw data had been provided, data validation was performed by comparing an actual invoice or a bill with data from the utility's systems to ensure accuracy.

The revenue lag data set for the Company was based on an accounts receivable analysis of the beginning balance, the daily charges to this balance as bills were processed and mailed, and the daily receipts for all the days of the year during the 12 months ended December 31, 2023. The revenue lag data set for the Company also included an analysis of the cycle billing, the beginning and ending service dates (meter read dates), and the date bills were mailed (or posted).

The expense lead data set was based on information generated from the Company's central accounts payable system. The expense lead data sets for the 12 months ended December 31, 2023, were analyzed to develop the service beginning and ending dates, the amount purchased, and the date of payment.

Q. WHAT TIME PERIOD DOES YOUR LEAD-LAG STUDY ENCOMPASS?

A. The lead-lag study in this case analyzed the net revenues and the associated net cost of service during the 12 months ended December 31, 2023, to derive the lag

(lead) days for the revenue requirement and the related cost of service line items.

Q. HOW WERE THE REVENUE LAG DAYS AND EXPENSE LEAD DAYS USED TO CALCULATE AQUA PA'S CASH WORKING CAPITAL REQUIREMENT?

A. For each cost of service line item, the lead days (expense) were subtracted from the lag days (revenue) to determine the net lag days for that cost of service line item category (i.e., O&M, Taxes, and Interest). Next, the net lag days for that cost of service line item category was multiplied by the average O&M, Taxes, and Interest expense per day (expenses ÷ 365 days) line item to produce the cash working capital required for each cost of service line item category. This process was followed for each cost of service line item. Finally, the cash working capital requirement of each cost of service line item category were totaled (summed) to calculate Aqua PA's total cash working capital requirement.

VI. RESULTS OF THE LEAD-LAG STUDY

Q. WHAT ARE THE RESULTS OF THE LEAD-LAG STUDY?

A. The lead-lag schedules are set forth in Schedule HW-1 through Schedule HW-27 provided in my Exhibit 7. Schedule HW-1 summarizes Aqua PA's cash working capital requirements. As shown on page 1 of Schedule HW-1, I determine the Water Base Operations' cash working capital requirement is $7,712,000. Similarly, I determine the Shenandoah Water Operations' cash working capital requirement is $133,000 (Schedule HW-1 page 2), the Wastewater Base Operations' cash working capital requirement is $1,247,000 (Schedule HW-1 page 3), the Lower

Makefield Wastewater Operations' cash working capital requirement is -$365,000 (negative) (Schedule HW-1 page 4), and the East Whiteland Wastewater Operations cash working capital requirement is -$29,000 (negative) (Schedule HW-1 page 5).

Q. PLEASE DESCRIBE SCHEDULE HW-1.

A. As shown on Schedule HW-1, the cash working capital requirement is based on the net lag days required to finance each cost of service line item category. The net lag day calculations are a result of subtracting their respective expense lead days from the revenue lag days to determine the appropriate net lag days, which was multiplied by the average O&M, Taxes, and Interest expense per day (expenses ÷ 365 days) line item. The lag days for the receipt of the revenue requirement is developed on Schedule HW-2. The lead days for the cost of service line items are developed on Schedules HW-4 through HW-27, and the schedule references for the lead days for the cost of service line items is shown on Schedule HW-3.

Q. PLEASE EXPLAIN THE PROCEDURES USED TO DETERMINE AQUA PA'S CASH WORKING CAPITAL REQUIREMENT SHOWN ON SCHEDULE HW-1.

A. The process used to determine Aqua PA's cash working capital requirement, shown on Schedule HW-1, is the same for each line item category shown. Because the process is the same, I will discuss the hourly labor expense line item (first line item) as a means of explaining the methodology used for each line item

(Schedule HW-1, page 1).

The hourly labor expense line item amount of $23,668,323 (column A) was multiplied by its corresponding 5.5 lead days to determine the $130,175,779 weighted line item amount in column C. A similar process was followed for each expense sub-account line item and then all expense sub-account line items were totaled. The total expense sub-account line item weighted line item amount of $3,046,253,729 (column C) was divided by the total expense sub-account line item amount of $137,239,204 (column A) to determine the total expense sub-account line item 22.2 lead days (column E). The total expense sub-account line item 22.2 lead days (column E) was subtracted from the 51.5 revenue lag days (column D) to determine the 29.3 net lag days (column F). The total expense sub-account line item amount of $137,239,204 (column A) was divided by 365 days to determine a daily expense per day of $375,998 (column G), which was multiplied by the 29.3 net lag days (column F) to determine the cash working capital amount, $11,016,736 (column H) ($137,239,204 ÷ 365 = $375,998 × 29.3 = $11,016,736). The cash working capital amount of $11,016,736 (column H) was rounded to determine the recommended cash working capital amount of $11,017,000 (column I) for the expense sub-account line items.

A similar process was followed for the taxes sub-account line items and the interest sub-account line items. The cash working capital requirement of all sub-account line items categories (O&M, Taxes, and Interest) line items were totaled (summed) to calculate Water Base Operations' $7,712,000 total cash working capital requirement. A similar procedure was followed to calculate the Shenandoah

Water Operations' cash working capital requirement of $133,000 (Schedule HW-1, page 2), the Wastewater Base Operations cash working capital requirement of $1,247,000 (Schedule HW-1, page 3), the Lower Makefield Wastewater Operations cash working capital requirement of -$365,000 (Schedule HW-1, page 4), and the East Whiteland Wastewater Operations cash working capital requirement of -$29,000 (Schedule HW-1, page 5).

Q. PLEASE EXPLAIN THE PROCEDURES USED TO DETERMINE THE REVENUE LAG.

A. Schedule HW-2 shows the development of the 51.5-day lag for the Water Base Operations. Similar results were reached in the other operations studied: a 57.4-day revenue lag for the Shenandoah Water Operations, 53.7 lag days for the Wastewater Base Operations, 32.1 lag days for the Lower Makefield Wastewater Operations, and 55.0 lag days for the East Whiteland Wastewater Operations. These revenue lags reflect the individual operations' billings and collections frequencies.

Q. PLEASE EXPLAIN THE PROCEDURES USED TO DETERMINE THE SERVICE PERIOD AND THE BILLING LAG DAYS FOR CUSTOMER REVENUES.

A. The lag days for the service period and the billing lag are developed on page 2 of Schedule HW-2. As mentioned previously, the service period lag was measured from the midpoint of the service period to the meter reading date, and the billing

lag was measured from the meter reading date to the billing date.

The Water Base Operations' service period was divided by two to produce the average service period lag of 15.2 days, as shown on page 2 of Schedule HW-2. The Water Base Operations' bills are prepared, mailed, and recorded to accounts receivable 2.0 days after meters are read. Adding the average service period lag to the billing lag produces a combined 17.2-day service period and billing lag (15.2 days + 2.0 days = 17.2 days) as shown on page 2 of Schedule HW-2. A similar 17.2-day service period and billing lag resulted for the Shenandoah Water Operations, Wastewater Base Operations, Lower Makefield Wastewater Operations, and East Whiteland Wastewater Operations. These combined service period and billing lags reflect the individual operations' billing frequency.

Q. PLEASE DESCRIBE THE PROCEDURE USED TO CALCULATE THE COLLECTION LAG.

A. As mentioned previously, the collection lag is the average number of days from the date the bills were mailed to the date payments are received and was determined by summing the daily accounts receivable balance during the test year and dividing by the sum of the daily test year receipts. This results in an average collection lag of 34.3 days for the Water Base Operations as shown on page 3 of Schedule HW-2. The collection lags for the other operations studied were determined to be: 40.2 lag days for the Shenandoah Water Operations, 36.5 lag days for the Wastewater Base Operations, 14.9 lag days for the Lower Makefield Wastewater Operations,

and 37.8 lag days for the East Whiteland Wastewater Operations. These lags reflect the individual operations' accounts receivable balances (collection lag) and their collection frequencies.

Q. PLEASE SUMMARIZE THE TOTAL REVENUE LAG.

A. The total revenue lag of 50.9 lag days for the Water Base Operations includes a 17.2-day service period and billing lag and an average collection lag of 34.7 days. The Shenandoah Water Operations' total revenue lag of 57.4 days includes a 17.2-day service period and billing lag and an average collection lag of 40.2 days. The Wastewater Base Operations' total revenue lag of 53.7 days includes a 17.2-day service period and billing lag and an average collection lag of 36.5 days. The Lower Makefield Wastewater Operations' total revenue lag of 32.1 days includes a 17.2-day service period and billing lag and an average collection lag of 14.9 days. The East Whiteland Wastewater Operations total revenue lag of 55.0 days includes a 17.2-day service period and billing lag and an average collection lag of 37.8 days. Each of these calculations is detailed on page 1 of Schedule HW-2.

Q. PLEASE EXPLAIN THE CALCULATION OF LEAD DAYS FOR THE O&M, TAXES, AND INTEREST EXPENSES SHOWN ON SCHEDULE HW-1.

A. For each O&M, Taxes, and Interest expense line item that is shown, the lead days were calculated for each invoice or account based on the midpoints of the service periods to the dates the Company paid the invoices or accounts. Schedule HW-3 shows the schedule references for the O&M, Taxes, and Interest expense lead

days for the Company.

Q. HOW WERE THE LEAD DAYS DETERMINED FOR THE O&M EXPENSES SUB-ACCOUNT LINE ITEMS SHOWN ON SCHEDULE HW-1?

A. For the O&M expense sub-accounts line items shown, the lead days were determined for each invoice or account based on the midpoints of the service periods to the dates the Company paid the invoices or accounts. For example, the weighted average lead days for hourly labor expense equals 5.5 days (see Schedule HW-4). The lead days for hourly labor expenses were calculated for each invoice examined based on the midpoints of the service periods to the dates the Company paid the invoices.

Similar analyses were conducted for non-union labor (see Schedule HW-5), management fee (see Schedule HW-6), electric power (see Schedule HW-7), water purchased (see Schedule HW-8), wastewater purchased (see Schedule HW-9), employee group insurance (see Schedule HW-10), liability insurance (see Schedule HW-11), SFI postage (see Schedule HW-12), pension (see Schedule HW-13), SFAS106 (see Schedule HW-14), and all other expenses (see Schedule HW-15).

Q. HOW WERE THE LEAD DAYS DETERMINED FOR THE TAXES SUB-ACCOUNT LINE ITEMS SHOWN ON SCHEDULE HW-1?

For the taxes sub-account line items, the lead days were calculated based on the midpoint of the tax service period to the payment date, weighted by the actual

amount paid. The taxes sub-accounts include; PA PUC - general assessments (see Schedule HW-16), OCA & SBA - general assessments (see Schedule HW-17), public utility realty tax (see Schedule HW-18), local, county, school, & municipal tax (see Schedule HW-19), FICA taxes - hourly (see Schedule HW-20), FICA taxes - executive & exempt (see Schedule HW-21), federal unemployment tax (see Schedule HW-22), PA unemployment tax (see Schedule HW-23), PA State income tax (see Schedule HW-24), and federal income tax (see Schedule HW-25).

Q. HOW WERE THE LEAD DAYS DETERMINED FOR THE INTEREST SUB-ACCOUNT LINE ITEMS SHOWN ON SCHEDULE HW-1?

For the interest sub-account line items, the lead days were calculated based on the midpoint of the interest service period to the payment date, weighted by the actual amount paid. The interest sub-accounts include; long term debt-interest (see Schedule HW-26), and PennVest-interest (see Schedule HW-27).

VII. CONCLUSION

Q. WHAT ARE THE RESULTS OF THE LEAD-LAG STUDY?

A. The results of the lead-lag study are shown on Schedule HW-1. The results of the lead-lag study shown on Schedule HW-1 show the required cash working capital to bridge the gap between the time when funds are provided to the Company by investors to allow the Company to provide service to customers, and the time revenues are received from customers as reimbursement for these services. As shown on page 1 of Schedule HW-1, the Water Base Operations' cash working capital requirement is $7,712,000. Similarly, the Shenandoah Water Operations' cash working capital requirement is $133,000 (Schedule HW-1, page 2), the Wastewater Base Operations' cash working capital requirement is $1,247,000 (Schedule HW-1, page 3), the Lower Makefield Wastewater Operations' cash working capital requirement is -$365,000 (negative) (Schedule HW-1, page 4), and the East Whiteland Wastewater Operations cash working capital requirement is -$29,000 (negative) (Schedule HW-1, page 5).

Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?

A. Yes, it does.

APPENDIX A

Professional Qualifications
of
Harold Walker, III
Manager, Financial Studies
Gannett Fleming Valuation and Rate Consultants, LLC.

EDUCATION

Mr. Walker graduated from Pennsylvania State University in 1984 with a Bachelor of Science Degree in Finance. His studies concentrated on securities analysis and portfolio management with an emphasis on economics and quantitative business analysis. He has also completed the regulation and the rate-making process courses presented by the College of Business Administration and Economics Center for Public Utilities at New Mexico State University. Additionally, he has attended programs presented by The Institute of Chartered Financial Analysts (CFA).

Mr. Walker was awarded the professional designation "Certified Rate of Return Analyst" (CRRA) by the Society of Utility and Regulatory Financial Analysts. This designation is based upon education, experience, and the successful completion of a comprehensive examination. He is also a member of the Society of Utility and Regulatory Financial Analysts (SURFA) and has attended numerous financial forums sponsored by the Society. The SURFA forums are recognized by the Association for Investment Management and Research (AIMR) and the National Association of State Boards of Accountancy for continuing education credits.

Mr. Walker obtained a license as a Municipal Advisor Representative (Series 50) by Municipal Securities Rulemaking Board (MSRB) and Financial Industry Regulatory Authority (FINRA).

BUSINESS EXPERIENCE

Prior to joining Gannett Fleming Valuation and Rate Consultants, LLC., Mr. Walker was employed by AUS Consultants - Utility Services. He held various positions during his eleven years with AUS, concluding his employment there as a Vice President. His duties included providing and supervising financial and economic studies on behalf of investor owned and municipally owned water, wastewater, electric, natural gas distribution and transmission, oil pipeline and telephone utilities as well as resource recovery companies.

In 1996, Mr. Walker joined Gannett Fleming Valuation and Rate Consultants, LLC. In his capacity as Manager, Financial Studies and for the past twenty years, he has continuously studied rates of return requirements for regulated firms. In this regard, he supervised the preparation of rate of return studies in connection with his testimony and in the past, for other individuals. He also assisted and/or developed dividend policy studies, nuclear prudence studies, calculated fixed charge rates for avoided costs involving cogeneration projects, financial decision studies for capital budgeting purposes and developed financial models for determining future capital requirements and the effect of those requirements on investors and ratepayers, valued utility property and common stock for acquisition and divestiture, and assisted in the private placement of fixed capital securities for public utilities.

Head, Gannett Fleming GASB 34 Task Force responsible for developing Governmental Accounting Standards Board (GASB) 34 services and educating Gannett Fleming personnel and Gannett Fleming clients on GASB 34 and how it may affect them. The GASB 34 related services include inventory of assets, valuation of assets, salvage estimation, annual depreciation rate determination, estimation of depreciation reserve, asset service life determination, asset condition assessment, condition assessment documentation, maintenance estimate for asset preservation, establishment of condition level index, geographic information system (GIS) and data management services, management discussion and analysis (MD&A) reporting, required supplemental information (RSI) reporting, auditor interface, and GASB 34 compliance review.

In 2004, Mr. Walker was elected to serve on the Board of Directors of SURFA. Previously, he served as an ex officio directors as an advisor to SURFA's existing President. In 2000, Mr. Walker was elected President of SURFA for the 2001-2002 term. Prior to that, he was elected to serve on the Board of Directors of SURFA during the period 1997-1998 and 1999-2000. He also previously served on the Pennsylvania Municipal Authorities Association, Electric Deregulation Committee.

EXPERT TESTIMONY

Mr. Walker has submitted testimony or been deposed on various topics before regulatory commissions and courts in 27 states including: Alaska, Arizona, California, Colorado, Connecticut, Delaware, Hawaii, Idaho, Illinois, Indiana, Kentucky, Maryland, Massachusetts, Michigan, Missouri, New Hampshire, Nevada, New Jersey, New York, North Carolina, Oklahoma, Pennsylvania, Rhode Island, South Carolina, Vermont, Virginia, and West Virginia. His testimonies covered various subjects including lead-lag studies, fair rate of return, fair market value, the taking of natural resources, benchmarking, appropriate capital structure and fixed capital cost rates, depreciation, purchased water adjustments, synchronization of interest charges for income tax purposes, valuation, cash working capital, financial analyses of investment alternatives, and fair value. The following tabulation provides a listing of the electric power, natural gas distribution, telephone, wastewater, and water service utility cases in which he has been involved as a witness.

DATE ADMITTED: _____

BEFORE THE PENNSYLVANIA PUBLIC UTILITY COMMISSION

RE: AQUA PENNSYLVANIA, INC.
DOCKET R-2024-3047822 AND R-2024-3047824

DIRECT TESTIMONY OF GREGORY R. HERBERT

Q. Please state your name and address.

A. My name is Gregory R. Herbert. My business address is 207 Senate Avenue, Camp Hill, Pennsylvania 17011.

Q. By whom are you employed?

A. I am employed by Gannett Fleming Valuation and Rate Consultants, LLC.

Q. Please describe your position with Gannett Fleming Valuation and Rate Consultants, LLC, and briefly state your general duties and responsibilities.

A. My position is Assistant Project Manager, Rate Studies. My duties and responsibilities include the preparation of accounting and financial data for utilities regarding revenues under present and proposed rates, including pro forma adjustments to the historic test year (HTY), Future Test Year (FTY) and Fully Projected Future Test Year (FPFTY) revenues, and the design of customer rates. Additionally, my responsibilities include developing pro forma revenue requirements, and conducting cost allocations by customer class, capital recovery fee, lead-lag, and depreciation studies for investor-owned and municipal-owned utilities. I joined Gannett Fleming in May 2017.

Q. Have you presented testimony in rate proceedings before a regulatory agency?

A. Yes. I have testified before the Pennsylvania Public Utility Commission ("PA PUC" or the "Commission"), the Illinois Commerce Commission, the Virginia State

Corporate Commission, and the New Jersey Board of Public Utilities concerning revenue requirements, proof of revenues, and rate design. A list of cases in which I have testified or assisted Gannett Fleming staff is attached to my testimony as Appendix A.

Q. What is your educational background?

A. I have a Bachelor of Science Degree in Economics from the Pennsylvania State University.

Q. Would you please describe your professional affiliations?

A. I am a member of the American Water Works Association, the National Association of Water Companies, and the Pennsylvania Municipal Authorities Association.

Q. Briefly describe your work experience.

A. Prior to my employment at Gannett Fleming, I was a Senior Analyst, in the Performance Reporting Group of Cambridge Associates, LLC where I oversaw the financial preparation of monthly and annual performance and benchmarking reports for public and private endowment clients.

Q. What is the purpose of your testimony in this proceeding?

A. My testimony is in support of the application of rates to customers' billing determinants and the pro forma revenue adjustments of Aqua Pennsylvania, Inc. and Aqua Pennsylvania Wastewater, Inc. (collectively "Aqua PA" or the "Company").

Q. Have you prepared exhibits presenting the results of your studies?

A. Yes. Exhibit No. 5-A, Part II presents the application of water rates to the customers' bill analysis and the pro forma revenue adjustments for water

operations and divisions. Exhibit No. 5-B, Part II presents the application of wastewater rates to the customers' bill analysis for the wastewater operations and divisions and the pro forma revenue adjustments.

WATER - APPLICATION OF RATES TO CUSTOMERS' BILL ANALYSIS AND PRO FORMA REVENUE ADJUSTMENTS

Q. Please describe Exhibit No. 5-A, Part II.

A. Exhibit No. 5-A, Part II, titled "Operating Revenue from Sales of Water for the Twelve Months Ended December 31, 2025" presents the application of the present rates to the bill analysis for each rate zone and the development of pro forma revenues under present rates as of December 31, 2025, and the development of pro forma revenues under proposed rates based on estimated conditions during the FPFTY ended December 31, 2025.

Q. What was the purpose of the bill analysis?

A. The purpose of the rate application was to establish the level of revenues to be derived from each customer classification under present and proposed rates based on the billing determinants for the twelve months ended December 31, 2023, December 31, 2024 and December 31, 2025.

Q. Please outline the contents of Exhibit No. 5-A, Part II.

A. Exhibit No. 5-A, Part II includes the plan of the exhibit, an explanation of the rate application procedures, summaries of the rate applications and the application of present rates to the several bill analyses.

Schedule 1 presents the summary of pro forma revenue for the Water Base Operations under present and proposed rates for the twelve months ended December 31, 2025 and the proposed revenue increase.

Schedule 1-S presents the summary of pro forma revenue for the acquired Shenandoah Water Operations under present and proposed rates for the twelve months ended December 31, 2025 and the proposed revenue increase.

Schedule 2 presents a summary of the application of proposed rates for the twelve months ended December 31, 2025 under proposed rates for each rate zone listed.

Schedule 3 presents a summary of the revenue, pro forma revenue and revenue adjustments for the Water Base Operations under present rates, for the twelve months ended December 31, 2023, 2024 and 2025.

Schedule 3-S presents a summary of the revenue, pro forma revenue and revenue adjustments for the acquired Shenandoah Water Operations under present rates, for the twelve months ended December 31, 2023, 2024 and 2025.

Schedule 3-S also shows a historic test year (HTY) revenue adjustment for the annualization of revenues for the Shenandoah Rate Zone that was acquired on July 24, 2023. The booked revenues in Column 2, Schedule 3-S only show partial HTY revenue for the months of August through December 2023. However, the Company received the billing data for the months of January through July of the HTY from the Municipal Authority of the Borough of Shenandoah, and the billing determinants shown on Schedule 5 reflect the full twelve months of billing

data. Therefore, the adjustment to booked revenues is shown on Schedule 3-S, Column 3.

Schedule 4 presents a summary of the application of pro forma revenues under present rates for the twelve months ended December 31, 2025 for each rate zone.

Schedule 5 presents the application of present rates to the bill analysis for each of the rate zones.

Schedule 6 presents adjustments to the application of present and proposed rates to Rate Zone 1 that has experienced customer growth.

Schedules 7A and 7B set forth the application of rates under present and proposed metered private fire and private and public fire hydrants.

Q. Please explain the calculations associated with the application of the rates to the billing determinants.

A. An analysis of customer billing determinants for the twelve months ended December 31, 2023, was prepared by the Company. The data also included the monthly billing determinants for the public and private fire protection customers classes for the twelve months ended December 31, 2023. The Company's analysis was summarized, and the results are presented in the Introduction of Exhibit No. 5-A, Part II. The present rates for the Base Water Operations Rate Zones and the acquired Shenandoah Rate Zone were applied to the billing data, including the pro forma revenue adjustments and summarized in Schedule 3 and Schedule-3-S.

Column 11 of Schedule 3 applies the 7.16% Distribution System Improvement Charge (DSIC) surcharge to the bill analysis revenue to determine

revenues under present rates in column 12. The revenues are adjusted for pro forma revenue adjustments shown in columns 7 and 8 to develop the total revenues in column 12.

The development of pro forma revenues under present and proposed rates for each division is presented in Schedule 5. A comparison of customer bills is provided on Schedule 8 in response to Standard Data Request OR-3.

Q. Please list the various water revenue adjustments.

A. The following adjustments were made for water operations: (1) Declining Usage Adjustment; (2) Change in Customers; (3) DSIC Annualization Adjustment; (4) Unbilled Revenue; and (5) Projected Customer Assistance Program Adjustments.

Q. Please describe the declining usage adjustment.

A. In the Company's most recent base rate case at Docket Nos. R-2021-3027385, *et al*., the Company claimed a 4,000 gallon monthly average residential usage which was adjusted due to the COVID revenue adjustment and was utilized to calculate the proposed flat rate customer charges. For the current case, the average monthly residential usage based on the HTY billing data is 3,870 gallons per month, which is also utilized to calculate the proposed flat rate customer charges for this rate case. The average monthly usage from the prior rate case of 4,000 gallons declined 3.2% to the average monthly residential usage of 3,870 gallons in the current rate case. The Company determined it would be a conservative approach to calculate a 0.5% decline of the HTY residential usage of Rate Zones 1, 2 and 3 to apply to the pro forma FTY and FPFTY residential billed usage instead of applying a 3.2% decline to the pro forma FTY and FPFTY residential usage. The

declining usage adjustment reduces the revenues in each the FTY and FPFTY by $1,219,249 under present rates.

Q. Please describe the change in customers adjustment.

A. Schedule 6 calculates the adjustment to revenues for the change in customers due to organic growth to the residential and commercial classes in Rate Zone 1. The customer growth was determined by evaluating the change in residential and commercial customers in Rate Zone 1 from the years 2021 to 2022 and from 2022 to 2023 and taking the average growth of these two time periods to determine the projected growth in customers. Schedule 6 includes an annualized HTY adjustment to revenues and pro forma adjustments to revenues in the FTY and FPFTY for the change in customers and is brought forward to Schedule 5.

Q. Please describe the annualization of DSIC revenues adjustment.

A. Schedule 3 shows a revenue adjustment to reflect the annualization of the DSIC revenues for the year ended December 31, 2025, based on the Company's pro forma level at the end of the FPFTY of 7.16% that is expected to become effective on January 1, 2025. The annualization of DSIC revenues also include the private fire protection class. Shenandoah Water does not have an adjustment for pro forma DSIC revenue as it is a newly acquired system.

Q. Please describe the adjustment to eliminate unbilled revenue.

A. The Company records booked revenue on an accrual basis and therefore requires an adjustment to be made to eliminate the effect of revenue that was accrued in booked revenue but was not billed during the twelve months ended December 31, 2023. The adjustment is consistent with Aqua PA's prior rate proceedings.

Q. Please describe the pro forma revenue adjustments made in the FTY and FPFTY for the estimated number of water customers that are eligible for the Company's Customer Assistance Program.

A. The Company provided an analysis that estimates the number of residential customers that are eligible for the Customer Assistance Program (CAP) by each county of Pennsylvania in which the Company provides water service. The analysis was completed for the three tiers of Federal Poverty Level (FPL) thresholds that the Company's present discounted rates cover, which include residential customers at 100% or less than FPL for Tier 1 discounted rates, 100% to 150% FPL for Tier 2 discounted rates, and 150% to 200% FPL for Tier 3 discounted rates. See Company Witness Black, Statement No. 13 for further discussion of the Company's CAP.

The Company estimates 12%, or 11,794 out of 98,285 of its estimated eligible residential water customers will be signed up for the CAP during the FTY, and estimates 20%, or 19,657 out of 98,285 of its eligible residential water customers will be signed up for the CAP during the FPFTY shown in Table 1 below.

Table 1	WATER	Participation	Rates
Aqua PA Residential Customers	388,660	FTY	FPFTY
Estimate of Eligible Customers:		12%	20%
1.0x FPL	43,388	5,207	8,678
1.0-1.5x FPL	26,469	3,176	5,294
1.5-2.0x FPL	28,428	3,411	5,686

98,285	11,794	19,657

The Company's analysis also calculates the total costs/discounts of the CAP under present rates for the Company's three tiers of discounted rates at the estimated 12% of eligible customers during the FTY and at the estimated 20% of eligible customers during the FPFTY. I then utilized the Company's provided analysis to calculate the total costs of the CAP for water customers under proposed rates.

The total calculated discounts under present and proposed rates for the FTY and FPFTY were summarized by each rate zone and brought forward to Schedule 5, Exhibit 5-A, Part II as a reduction to pro forma revenues for the FTY and FPFTY.

Q. Please explain how the water proof of revenues were determined under proposed rates.

A. The proposed rates that are sponsored by Witness Heppenstall, Exhibit 5-A, Part I, were applied to the billing determinants as of December 31, 2025 shown in Schedule 5, Exhibit 5-A, Part II to calculate the revenues under proposed rates. The revenues under proposed rates were brought forward from Schedule 5 to summary Schedule 1 and Schedule 2 of Exhibit 5-A, Part II. Please reference Company Witness Heppenstall, Statement No. 5 for further discussion on the Company's proposed water rate design.

WASTEWATER - APPLICATION OF RATES TO CUSTOMERS' BILL ANALYSIS AND PRO FORMA REVENUE ADJUSTMENTS

Q. Please describe Exhibits 5-B, Part II.

A. Exhibit 5-B, Part II titled "Operating Revenue from Sales of Wastewater for the Twelve Months Ended December 31, 2025" presents the application of the present rates to the bill analysis for each rate division and the development of pro forma revenues under present rates as of December 31, 2025, and the development of pro forma revenues under proposed rates based on estimated conditions during the FPFTY ended December 31, 2025.

Q. What was the purpose of the rate application?

A. The purpose of the rate application was to establish the level of revenues to be derived from each customer classification under present and proposed rates based on the billing determinants for the twelve months ended December 31, 2023, December 31, 2024, and December 31, 2025.

Q. Please outline the contents of Exhibit 5-B, Part II.

A. Exhibit 5-B, Part II includes the plan of the exhibit, an explanation of the rate application procedures, summaries of the rate applications and the application of present rates to the several bill analyses.

Schedule 1-WW presents the summary of pro forma revenues for the Wastewater Base Operations (Rate Zones 1 through 11 and 14) under present and proposed rates for the twelve months ended December 31, 2025 and the proposed increase.

Schedule 1-LM presents the summary of pro forma revenues for Lower Makefield Wastewater Operations (Rate Zone 12) under present and proposed rates for the twelve months ended December 31, 2025 and the proposed increase.

Schedule 1-EW presents the summary of pro forma revenues for the East Whiteland Wastewater Operations (Rate Zone 13) under present and proposed rates for the twelve months ended December 31, 2025 and the proposed increase.

Schedule 2-WW presents a summary of the application of proposed rates and the development of the pro forma revenues for the twelve months ended December 31, 2025 under proposed rates for each wastewater rate zone.

Schedule 3-WW presents a summary of the revenue, pro forma revenue and revenue adjustments for the Wastewater Base Operations (Rate Zones 1 through 11 and 14) under present rates, for the twelve months ending December 31, 2023, 2024 and 2025.

Schedule 3-LM presents the summary of revenue, pro form revenue and revenue adjustments for the acquired Lower Makefield Wastewater Operations (Rate Zone 12) under present rates, for the twelve months ending December 31, 2023, 2024 and 2025

Schedule 3-EW presents the summary of revenue, pro forma revenue and revenue adjustments for the acquired East Whiteland Wastewater Operations (Rate Zone 13) under present rates, for the twelve months ending December 31, 2023, 2024 and 2025.

Schedule 4-WW presents a summary of the application of pro forma revenues under present rates for the twelve months ending December 31, 2025 for each wastewater rate zone.

Schedule 5-WW presents the application of present and proposed rates to the bill analysis for each of the wastewater rate zones.

Schedule 6-WW presents adjustments to the application of present and proposed rates for customer growth which impact Rate Zones 1 through 11.

Q. Please explain the calculations associated with the application of the rates to the billing determinants.

A. An analysis of customer billing determinants for the twelve months ended December 31, 2023, was prepared by the Company. The Company's analysis was summarized, and the results are presented in the Introduction of Exhibit 5-B, Part II. The present rates for each rate zone in the Wastewater Base Operations and acquired systems were applied to the billing data including the pro forma revenue adjustments and are summarized in Schedule 3-WW, Schedule 3-LM and Schedule 3-EW.

Column 9 of Schedule 3-WW applies the 1.34% DSIC surcharge to the bill analysis revenue to determine pro forma revenues under present rates in column 10. The revenues are further adjusted for pro forma revenue adjustments in columns 6 and 8 to develop the total revenues in column 10.

The development of pro forma revenues under proposed rates for each division in the Wastewater Base Operations is presented in Schedule 5-WW. A

comparison of the present and proposed rates for each rate zone, as well as comparisons of customer bills, is provided on Schedule 7-WW.

Q. What was the average monthly usage to calculate flat rate wastewater bills for unmetered customers?

A. The water operation's average monthly residential usage of 3,870 gallons was used to calculate the proposed flat rates for unmetered wastewater customers. The Company has used the water operation's average monthly residential usage to calculate the wastewater flat rates in prior cases and is following this precedent.

Q. Please list the various wastewater revenue adjustments.

A. The following adjustments were made for wastewater operations: (1) Change in Customers; (2) DSIC Annualization Adjustment; (3) Unbilled Revenue; (4) Flat Rate Customers Moving to Metered Rates; (5) Projected Customer Assistance Program Adjustments.

Q. Please describe the change in customers adjustment.

A. Schedule 6-WW calculates the adjustment to revenues for the change in customers due to organic growth to the residential class. Schedule 6-WW includes an annualized HTY adjustment to revenues and pro forma adjustments to revenues in the FTY and FPFTY for the change in customers and is brought forward to Schedule 5-WW. The customer growth was determined by evaluating the change in residential customers from the years 2021 to 2022 and from 2022 to 2023 and taking the average growth of these two time periods to determine the projected growth in customers. The customer growth adjustment was made for the residential class in Rate Zones 1 through 11, as Rate Zones 12 and 13 are newly

acquired systems and the historical customer counts were not available for 2021, and Rate Zone 14 did not experience residential customer growth over the years 2021 through 2023..

Q. Please describe the annualization of DSIC revenues adjustment.

A. Schedule 3-WW shows a revenue adjustment to reflect the annualization of the DSIC revenues for the year ended December 31, 2025 based on the Company's pro forma level at the end of the FPFTY of 1.34% that is expected to become effective on January 1, 2025. Lower Makefield (Rate Zone 12) and East Whiteland (Rate Zone 13) do not have pro forma adjustments for DSIC revenue as they are newly acquired systems.

Q. Please describe the adjustment to eliminate unbilled revenue.

A. The Company records booked revenue on an accrual basis and therefore requires an adjustment to be made to eliminate the effect of revenue that was accrued in booked revenue but was not billed during the twelve months ended December 31, 2023. The adjustment is consistent with prior rate proceedings.

Q. Please describe the revenue adjustments to move flat rate customers to metered rates.

A. The Company has wastewater customers in various rate zones that are charged flat rates for wastewater but are also currently the Company's water customers that are charged metered water rates and their water usage is tracked by the Company. The Company is moving these customers from a flat wastewater rate to a metered wastewater rate to be consistent with the preference to charge a metered rate when water reads are available by a PUC utility. The wastewater

customers that currently have metered water usage will be moved to and charged metered wastewater rates under proposed rates once final rates are approved by the Commission. There are 69 residential customers in Rate Zone 1A; 519 residential customers and 47 commercial customers in Rate Zone 2; 964 residential customers and 72 commercial customers in Rate Zone 3; 21 residential customers in Rate Zone 5; and 2,892 residential customers, 1,614 commercial customers, 29 Industrial customers, and 5 public customers in Rate Zone 13 that are being moved to metered rates. The flat rate to metered rate adjustments for these customers are shown in Schedule 5-WW, which are based on these customers' water billing determinants for the HTY.

Q. Please describe the pro forma revenue adjustments made in the FTY and FPFTY for the estimated number of wastewater customers that are eligible for the Company's CAP.

A. The Company provided an analysis that estimates the number of residential wastewater customers that are eligible for the CAP by each county of Pennsylvania in which the Company provides wastewater service. The analysis was completed for the three tiers of FPL thresholds that the Company's present discounted rates cover, which include residential customers at 100% or less than FPL for Tier 1 discounted rates, 100% to 150% FPL for Tier 2 discounted rates, and 150% to 200% FPL for Tier 3 discounted rates. See Company Witness Black, Statement No. 13 for further discussion of the Company's CAP.

The Company estimates 12%, or 1,303 out of 10,858 of its estimated eligible residential wastewater customers will be signed up for the CAP during the

FTY, and estimates 20%, or 2,172 out of 10,858 of its estimated eligible residential wastewater customers will be signed up for the CAP during the FPFTY shown in Table 2 below.

Table 2	SEWER	Participation	Rate
Aqua PA Residential Customers	46,971	FTY	FPFTY
Estimate of Eligible Customers:		12%	20%
1.0x FPL	4,795	575	959
1.0-1.5x FPL	2,893	347	579
1.5-2.0x FPL	3,169	380	634
	10,858	1,303	2,172

The Company's analysis also calculates the total costs/discounts of the CAP under present rates for the Company's three tiers of discounted rates at the estimated 12% of eligible customers during the FTY and at the estimated 20% of eligible customers during the FPFTY. I then utilized the Company's provided analysis to calculate the total costs of the wastewater CAP under proposed rates.

The total calculated discounts under present and proposed rates for the FTY and FPFTY were summarized by each Rate Zone and brought forward to Schedule 5-WW, Exhibit 5-A, Part II as a reduction to pro forma revenues for the FTY and FPFTY.

Q. Please explain how the wastewater proof of revenues were determined under proposed rates.

A. The proposed rates that are sponsored by Witness Heppenstall, Exhibit 5-B, Part I, were applied to the billing determinants as of December 31, 2025 shown in Schedule 5-WW, Exhibit 5-B, Part II to calculate the revenues under proposed rates. The revenues under proposed rates were brought forward from Schedule 5-WW to summary Schedule 1-WW and Schedule 2-WW of Exhibit 5-B, Part II. Please reference Company Witness Heppenstall, Statement No. 5 for further discussion on the Company's proposed wastewater rate design.

Q. Does this conclude your direct testimony?

A. Yes, it does.

X. CONCLUSION 33

I. INTRODUCTION AND SCOPE OF TESTIMONY

Q. Please state your name and business address.

A. My name is Todd Duerr. My business address is 762 W. Lancaster Avenue, Bryn Mawr, Pennsylvania 19010.

Q. By whom are you employed and in what capacity?

A. I am employed by Aqua Pennsylvania, Inc., ("AP") as Vice President of Operations.

Q. On whose behalf are you providing this Direct Testimony?

A. I am providing this testimony on behalf of AP and Aqua Pennsylvania Wastewater, Inc. ("APW") (collectively "Aqua PA," or the "Company").

Q. Please provide a brief description of your education and work experience.

A. I have a Bachelor of Arts Degree in Mathematics from Bloomsburg University, a Bachelor of Science Degree (B.S.) in Civil Engineering Technology from Temple University, and a Master's Degree in Water Resources & Environmental Engineering from Villanova University. I have worked in various engineering, operations, and business leadership roles and have over 34 years of experience in the water and wastewater utility industry. I have worked at AP since March 2020, initially as Vice President of Water Production for Southeast Pennsylvania, with my responsibilities expanded now as Vice President of Operations for all Aqua PA water and wastewater systems. I am a Registered Professional Engineer in Pennsylvania and a Licensed Water and Wastewater Operator in Pennsylvania.

Q. Have you previously testified before the Pennsylvania Public Utility Commission ("PUC" or the "Commission")?

A. Yes. I provided testimony in Aqua PA's 2021 base rate proceeding at Docket Nos. R-2021-3027385 and R-2021-3027386.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to describe Aqua PA's water and wastewater operational performance and how it benefits our customers.

Q. Are you including any other exhibits with your Direct Testimony?

A. Yes. Included with my Direct Testimony are Attachments TMD-1 through TMD-6.

II. OVERVIEW OF OPERATIONS

Q. Please describe AP and its water systems.

A. AP owns and operates water systems serving approximately 445,000 customers in 32 counties throughout Pennsylvania. AP holds 116 Public Water Supply permits from the Pennsylvania Department of Environmental Protection ("PADEP"). AP operates surface water treatment plants ("WTP") and groundwater wells each with various forms of treatment. AP's service territories are designated as either Southeast Pennsylvania ("SEPA"), which includes a contiguous system within portions of Bucks, Chester, Delaware, and Montgomery counties and separate smaller systems in portions of Berks, Bucks, Chester, and Montgomery counties, or Greater Pennsylvania ("GPA"), which includes AP's service territories outside of SEPA. Aqua PA has over 600 employees in support of its mission to provide life's most essential resource – water.

Q. Please describe APW and its wastewater systems.

A. APW is a wholly owned subsidiary of AP. APW is engaged in the business of collecting, treating, transporting, and disposing of wastewater. APW owns and operates wastewater systems serving approximately 57,000 customers. As with the water systems, territories are broken into SEPA (Bucks, Chester, Delaware, Berks, Montgomery Counties) and GPA systems in Adams, Carbon, Clarion, Clearfield, Lackawanna, Luzerne, Monroe, Pike, Schuylkill, Venango, and Wyoming Counties. Some of APW's wastewater systems are co-located with AP water operations and some are distinct from AP's water operations.

APW operates 40 wastewater treatment plants ("WWTP") treating and discharging 1.96 billion gallons per year. In addition, APW owns and operates "collection only" systems that collect and convey untreated wastewater to other entities for treatment and disposal at their facility ("Purchased Wastewater Treatment").

Q. Please describe how Aqua PA operations supports its primary objective of providing safe and reliable water and wastewater service.

A. The Company operates continuously with professional staff and facilities that have received and will continue to receive prudent investment. Aqua PA has an organizational structure with many subject matter experts assigned to specific roles that, when aggregated, provide outstanding reliability in water and wastewater service, and compliance with PADEP and other applicable regulations. Aqua PA's operational staff is supported by technology, analytical laboratory facilities, and processes and programs designed to achieve consistent compliance.

Q. Please provide information about how water quality is supported by the Aqua PA's laboratory.

A. The Company's laboratory is a key component of operations and has a unique role in assuring customers the water they receive meets regulatory requirements, or the wastewater returned to the environment is safe for aquatic and plant life. The laboratory is located with our headquarters in Bryn Mawr. It has instruments that are used by our chemists, micro-biologists, and quality control staff to ensure results meets stringent requirements imposed by the PADEP. The laboratory and the staff must be certified for each type of test run, and the PADEP does periodic, intensive audits of the laboratory to confirm requirements are met.

Annually the laboratory conducts 90,000 water quality tests using 50 different analytical methods for 240 water quality parameters. Samples run include those for compliance (reported to PADEP), operational (used by operators to help guide process control decisions), and special/event-based samples (used in unique situations we encounter).

Q. What additional technology supports safe, reliable water and wastewater service?

A. In addition to the technology used to test for water and wastewater compliance, technology is used in our operations to deliver safe reliable water and wastewater services. I will explain several examples of Aqua PA's capabilities below.

Q. Please explain the Company's Supervisory Control and Data Acquisition ("SCADA") systems.

A. Automation and controls of our water and wastewater facilities enable operators to know in real time the status of key operational systems and water quality parameters. Otherwise known as SCADA or Operational Technology, this system of computers, instrumentation, specialty programming, operator displays, and communication networks provides operations teams with the ability to evaluate current status of treatment facilities, evaluate trends in treatment, system pressure, storage tank levels, pump status, and provides alarm notification of an out of range parameter that can be addressed by remote control or by dispatching staff to the location. Aqua PA's SCADA systems are fully protected by a sophisticated cybersecurity platform designed, monitored, and supported by our in-house information security experts.

Q. Please describe the Company's Geographic Information System ("GIS").

A. Another technology that the Company utilizes is GIS. The Company has robust GIS software that is a geographical interface of our network of pipes, tanks, pump stations, regulator valves, and fire hydrants. The GIS also has data associated assets used by operations staff in the field to make decisions regarding asset maintenance or repair. For example, if a main break occurs and a partial shutdown of the main is required to make the repair, the distribution team assesses the location of valves relative to the leak location and can operate valves that will keep the highest number of customers in service while the repair is made. The GIS is used by operations staff to assist customers when calls are received regarding service issues. Operations staff can locate assets and work in the area that may be contributing to the short-term issue and communicate with the customer what the problem is and dispatch crews to the specific location.

Q. Please describe the Company's outward facing disruption map for customers.

A. The Company recently implemented another customer focused technology service by adding "disruption icons" on an interactive system map customers can access from our website via their phone or computer. When work in an area of our system is occurring that may directly or indirectly affect our customers (e.g., construction causing traffic slow-downs or a main break repair), the map is updated with icons that give basic information to the customer about the work and expected time of completion.

Q. Has Aqua PA provided new technology to make customer service easier for customers?

A. Yes, Recently, Aqua rolled out an ePortal and new mobile application. Through the ePortal and mobile application, customers can manage their account, view, and access their

consumption data. Customers can also receive real-time updates on system outages and have visibility into no water and pressure related service orders.

III. COST SAVING MEASURES

Q. Please provide Aqua PA's energy efficiency program that seeks to mitigate energy costs.

A. Aqua PA is continuously looking for ways to be more efficient and save costs. Moving water and wastewater through networks of pipes to and from Aqua PA's plants requires extensive amounts of energy. The Company relies on several different sources of energy for various business activities. Electricity is our most consumed form of energy and nearly all the electricity we use is needed to operate pumps and treatment equipment at our WTPs and WWTPs. Vehicle fuel is the second largest source of energy, as we operate a fleet of vehicles for regular physical monitoring of our infrastructure. Natural gas is used to heat our facilities and is our third largest energy source.

In recent years, Aqua PA has remediated its top tier energy conservation opportunities which resulted in a 21% reduction in energy usage from the baseline and an annual $178,000 savings for projected 2025 energy costs. These savings were attained by traditional energy reduction approaches. Examples include realigning asset original design to current operating conditions by reducing pump and motors sizes, eliminating throttled valves, and installing variable frequency drives and compatible motors.

Aqua PA tracks energy usage across our portfolio using industry standard benchmarks including water-electric as cost per thousand gallons treated and corresponding consumption as kilo-watt-hour per thousand gallon treated. The same metrics are tracked for wastewater although that is a smaller impact to energy costs. This metric is a high-level means to compare ourselves to industry benchmarks like the

American Water Works Association ("AWWA") and assess the impact of our energy efficiency efforts and market conditions that cause energy prices to fluctuate. The AWWA benchmark is $0.20/1,000 gallons treated. Aqua PA's actual metrics for the past few years were: 2020 - $0.23/1,000 gallons; 2021 - $0.20/1,000 gallons; 2022 - $0.20/1,000 gallons; 2023 - $0.20/1,000 gallons. While the actual results for the past 3 years are the same, they are below our internal target goals.

Aqua PA evaluates renewable energy options to reduce and stabilize purchased energy cost. From Aqua PA's two solar fields at our Pickering and Ingrams Mill WTPs we generate approximately 2,700-Megawatt hours annually. The savings from avoided energy purchases and through the sale of solar renewable energy credits is approximately $330,000 annually, based on our 2025 energy costs. The Company is currently evaluating two of our dams for the potential of low-impact hydro power generation.

Q. Does AP produce all its water supplies that it delivers to its customers?

A. No. AP does purchase water from adjacent water systems for primary, supplemental, and/or emergency supply.

Q. What are the benefits associated with purchased water?

A. A benefit of purchased water is resiliency. Having available supply for periods when AP's supplies are challenged helps ensure our customers receive uninterrupted water service. An example is when the Pickering water plant flooded in 2021 due to Hurricane Ida and for 10 days AP needed to produce or purchase 30 million gallons per day ("MGD") from remaining supplies or from other water providers. Another benefit to our customers is that water can be purchased from Philadelphia Water Department ("PWD") at our Cheltenham Township interconnections for a competitive rate that helps save costs to customers in

times where the Company needs to meet high demands in the summer or extended droughts in the region. In addition, where cost-effective, rather than designing excessive transmission/booster facilities from other AP locations many miles away and incurring higher electricity costs and chemical consumption to move the water, it is prudent to buy water to minimize these costs to the customer.

Q. How does the Company advocate for its customers when addressing rate increases from suppliers of purchased water?

A. Unexpected rate increases enacted by our purchased water suppliers are ultimately passed onto our customers once approved in a subsequent base rate case. Leading up to this base rate case, six purchased water suppliers have notified us of, or enacted increased rates through negotiated agreements. Details of this increased cost is contained in the Direct Testimony of Christopher Manning (Statement No. 3).

In two cases, after being notified of either a rate increase or request to renew an expiring agreement, AP decided it was in the best interest of our customers to discontinue use of these purchased water supplies and replace the same with our own supplies.

In one example, a supplier decided to raise the rates at the expiration of the agreement. AP immediately began good-faith discussions with the supplier to reach a mutually acceptable agreement moving forward. Ultimately, discussions were not productive. Accepting the offer would have resulted in an increase cost of $1.5 million per year under this one contract. AP explored options and decided to construct a new pipeline from its system to replace the purchased water supply. The project was completed in May 2024. For the full year 2025, we estimate a cost avoidance to customers of $1.68 million compared to 2023 incurred costs.

Our focus on controlling purchased water costs by active and strategic new agreement negotiations, the decision to build our own pipelines, and the decision to forego continued use of interconnections offset the increases enacted by water suppliers included in this base rate case.

IV. LEAD SERVICE LINES

Q. Please describe AP's lead service line replacement ("LSLR") program.

A. The replacement of lead service lines is and will continue to be a significant part of AP's capital budget and is required by our environmental regulators. AP has been replacing both customer and Company lead service lines ("LSLs") in its system since the Commission approved AP's initial LSLR program in 2021. Originally, the Company was approved to replace 200 customer LSLs per year at an annual budget of $800,000. The Company has ramped up the LSLR program to identify and replace LSLs throughout its system. The Company has recently filed an update to the LSLR program in compliance with the Commission's regulations under Act 120 of 2018 to address the increased costs of replacing LSLs and to allow the Company to perform up to 1,500 replacements per year (after an initial ramp up in the first two years of the LSLR Plan). The update to the LSLR program also takes into consideration the anticipated Lead and Copper Rule Improvements ("LCRI") timeline of 10 years to replace all LSLs in the Company's system.

Q. Have there been recent changes to the Lead and Copper Rule?

A. Yes. Two recent and overlapping rules were promulgated/proposed. On December 16, 2021, the U.S. Environmental Protection Agency ("EPA") announced final revisions to the National Primary Drinking Water Regulations for lead and copper under authority of the Safe Drinking Water Act - called the Lead and Cooper Rule Revisions ("LCRR"). The

operational and capital costs associated with implementing these newer regulations is included in the current rate case filings.

The LCRR requires all public water systems to develop a LSL inventory and make it publicly available; develop an LSLR plan; sample schools and childcare facilities for lead and copper; strengthen treatment to comply with the new 10 microgram/liter (µg/L) trigger level; communicate with the public about the LCRR's requirements and the steps AP is taking to meet them.

On November 30, 2023, the EPA announced the proposed LCRI. EPA anticipates finalizing the LCRI prior to October 16, 2024, and AP is proceeding with replacements in accordance with the LCRI. LCRI supplements the LCRR, and contains the following new requirements: achieving 100% LSL (both customer and Company) replacement within 10 years; locating legacy LSLs and continuous updating of service line inventory; improving customer water tap sampling methods; lowering the Lead Action Level from 15 µg/L to 10 µg/L and associated related actions; and strengthening protections to reduce exposure for systems with multiple lead action level exceedances.

Q. Provide actions AP is taking to comply with the new rules.

A. AP is compliant with current lead and copper rule requirements and is on-track to comply with all provisions of the new rules. AP is dedicated to increasing public health protection by adjusting treatment to prevent leaching from lead piping and lead-containing appurtenances. AP has been selectively transitioning certain systems to orthophosphate, which is EPA's preferred method for reducing corrosion. Orthophosphate helps better coat the pipe, providing a protective barrier between any existing lead materials and drinking water. In many cases, orthophosphate is more cost effective than polyphosphate or blended

phosphates and allows AP to keep chemical costs lower while providing enhanced protection.

The Company has successfully changed our Perkiomen Woods, West Chester, and Bristol distribution systems to orthophosphate and we have seen in a decrease in lead and copper results, which was the objective - more protection to our customers. To meet the October 16, 2024 service line inventory deadline, AP has been aggressively identifying and replacing Company side lead and galvanized service lines and using the Commission approved LSLR Plan to support concurrent customer side replacements of lead and galvanized lines. We have a goal of replacing all known lead service lines by the October deadline.

AP is anticipating a substantial increase in customer sampling for lead and copper in 2025. This is related to the LCRR and discussion with PADEP where reduced sampling for compliant systems (e.g., once every three years) will be reset to once per quarter using the enhanced sampling requirements in the LCRI which requires collecting first liter and fifth liter samples at sites with LSLs and use of the higher of the two values when determining compliance with the rule. This will require additional resources for sampling and a substantial workload increase for the Company's Lab (in addition to the per- and poly-fluroalkyl ("PFAS") sampling and Unregulated Contaminant Monitoring Rule ("UCMR") 5 testing).

V. PER- AND POLY-FLUOROALKYL SUBSTANCES

Q. What are PFAS?

A. PFAS are man-made (synthetic) chemicals that have been used in industry and consumer products worldwide since the 1940s. PFAS have been used to make nonstick cookware, water-repellent clothing, stain resistant fabrics and carpets, some cosmetics, some

firefighting foams, and products that resist grease, water, and oil. These PFAS chemicals are often referred to as "forever chemicals" due to the strong chemical bonding of the molecules that are extremely difficult to break down and, as a result, can persist indefinitely in the environment. There are thousands of PFAS species within the PFAS family. The most studied PFAS are perfluorooctanoic acid ("PFOA") and perfluorooctane sulfonic acid ("PFOS"). For purposes of this testimony, these PFAS chemicals are the focus of current regulatory matters, and the levels of four other PFAS species are being addressed by EPA through a proxy method known as a Hazard Index.

Q. Do PFAS present health concerns?

A. The PFAS chemicals have been detected in many water supplies. Research has identified the following potential or real concerns from ingestion of these compounds at levels above regulatory thresholds as follows:

- Altered metabolism and body weight regulation, and risk of childhood obesity.
- Increased risk of some cancers.
- Reduced ability of the immune system to fight infections.

Q. Does AP notify customers of the presence of PFAS in their finished water supplies?

A. Yes. AP has been the industry leader in addressing PFAS before a rule was in place. We have been testing our water sources for PFAS for more than seven years, treating water that exceeds 13 ppt, and transparently sharing PFAS testing with customers, voluntarily, on our water quality reports. AP created a website dedicated to posting PFAS levels in its water. Moving forward, the Company will discontinue that website and comply with the PADEP's regulations and all PFAS testing will be available in the Company's Consumer Confidence Reports that are available on the Company's website.

Q. Has the PADEP adopted any standards for the level of PFAS in public water supplies?

A. Yes. On January 14, 2023, the PFAS Maximum Contaminant Level ("MCL") Rule was published in the Pennsylvania Bulletin setting MCLs for PFOA and PFOS in drinking water. The rule sets an MCL of 14 ppt for PFOA and an MCL of 18 ppt for PFOS. Compliance with the MCLs is determined based on a Running Annual Average of samples collected each calendar quarter.

Q. Does AP meet current DEP standards?

A. Yes. There are a few facilities that currently have PFAS results close to or greater than the PADEP MCLs, but these locations are undergoing active construction to install PFAS removal systems which will be completed before the end of 2024 and allow AP to remain in compliance with PADEP's regulations. Even before the PADEP considering entering the rule making process for the PFAS chemicals, AP was piloting, designing and installing PFAS removal systems. As of May 2024, the Company has four (4) PADEP permitted and operational PFAS treatment systems. AP feeds Powder Activated Carbon ("PAC") at our Neshaminy WTP to mitigate the impact of the PFAS in the source water, and the finished water levels of PFAS are below PADEP requirements. The concentration our customers receive from the facilities where these PFAS treatment systems are installed is below detection limits. We have other systems that are close to or above the PADEP MCLs which are in the design/construction stage and will be completed in time to meet the compliance requirements.

Q. What treatment processes does AP currently use to remove PFAS from water supplies?

A. AP uses three types of treatment. One is Granular Activated Carbon ("GAC") contact pressure vessels. Another is Ion Exchange ("IX") in pressurized vessels. The third is the use of PAC which is fed into the raw source water at our Neshaminy WTP, a 12 MGD facility. AP was the leader in Pennsylvania for pilot testing then implementing full scale use of all three types of treatment.

In July 2018, AP chose to turn off our North Hills well station in Abington Township when PFAS samples exceeded our self-imposed limit (and subsequently the PADEP and EPA limits). This was challenging to manage, as this source provides water in a densely populated area of our system. Due to AP's resilient system architecture, investments, and operational flexibility, we supplemented the lost water from other sources. AP's treatment department researched options for treatment since GAC units would be large in size. AP gained approval from PADEP to conduct a year-long pilot to test different anion exchange resins to determine their effectiveness in removing PFAS. The pilot program identified a resin that met requirements, and after review of the data, PADEP gave approval to install a full-scale system. In July 2023, the well was returned to service and represents the first IX treatment system in Pennsylvania.

Q. Has the EPA recently adopted regulations concerning PFAS in public water supplies?

A. Yes

Q. What do those new regulations require?

A. The EPA has established MCLs at 4 ppt for PFOA and PFOS, individually (values materially lower than the PADEP established limits). Pursuant to the Safe Drinking Water Act section 1412(b)(10), the final PFAS National Primary Drinking Water Regulation ("NPDWR") is effective June 25, 2024. The compliance date for the PFAS NPDWR, other

than the MCLs, is April 26, 2027. All systems must comply with the MCLs by April 26, 2029. There are various reporting and notification requirements associated with the new rule. The new EPA MCLs will supersede the PADEP MCLs for PFOA and PFOS.

Q. Has AP developed plans to comply with the new EPA requirements?

A. Yes.

Q. What do those plans entail?

A. AP has evaluated the number of systems affected by this new EPA rule. More information and examples of types of treatment projects are detailed in the Direct Testimony of Michael Convery (Statement No. 12).

Q. Please explain why it is important to meet the requirements of the EPA rule.

A. It is important for the AP to meet the requirements of EPA due to the health concerns the presence of PFAS presents.

Q. What are AP's current O&M expenses to treat PFAS?

A. The O&M expense figures to treat PFAS are discussed in the Direct Testimony of Christopher E. Manning (Statement No. 3). These reflect both actual expenses and those projected through the FPFTY.

AP is experienced in managing the O&M aspects of PFAS treatment systems. The Company's first treatment system was commissioned in 2017, and as of May 2024, we have four (4) systems treating for PFAS at wells and the use of PAC at our Neshaminy WTP.

O&M expenses for PFAS treatment include regular process control testing, compliance testing (both performed by the Company's Lab), maintenance of equipment, increase electric costs due to higher pressure through the vessels, and labor by daily

operator and our treatment staff. The most expensive cost is the change-out of expired media in the vessels which can occur every one to three years. Our staff manages the change-out process, which include managing water supply while the vessels are taken off-line, arranging with a carbon supply vendor to extract the expired GAC and install new GAC, performing initial rinsing of the new media, and arranging for the disposal of the rinse water. The Company has historical trends in costs for this process and they are reflected in our base rate case. These costs will increase proportionally with adding more systems to meet the new EPA rule.

Q. What changes in operations does AP anticipate following the installation of new equipment to treat PFAS to the new EPA requirements?

A. Once new systems are commissioned, significant work will recur annually. The work is outlined above yet at a much larger scale/frequency than currently reflected in our rates. AP will need additional staff to manage the testing and logistically complicated media changeout processes, specialized equipment to manage the rinse water process since some sewer systems are now prohibiting the discharge of the rinse water adding extra costs to the process. Overall, the new treatment techniques, chemicals to treat for PFAS, and ongoing and new labor requirements associated with PFAS testing and removal will increase costs to supply water not just for AP but across the Commonwealth and will be present into the future.

Q. How has treatment of PFAS impacted chemical costs to the Company?

A. New to this rate case is the increased cost to treat PFAS chemicals under the recent EPA regulation. The Company has included the significant cost to add PAC to the raw water sources at four surface WTPs. It is important to note that this chemical, once added to the

water, removes some or all of the PFAS chemicals of concern, and then is wasted to the residual solids process.

The plants and current average daily flow where we plan to use PAC are Pickering West – 30 MGD; Crum – 16 MGD; Pickering East – 12 MGD; and Ingrams Mill – 4 MGD. The dosage of PAC needed to remove the PFAS chemicals of concern at these flows plus other chemical costs to process the resultant solids (e.g., polymer at sludge presses) and added hauling costs results is an added cost.

VI. WASTEWATER OPERATIONS

Q. Please describe the challenges facing APW that influences decisions on investments.

A. The biggest challenge to APW and its customers is the level of investment needed to bring facilities acquired (including through Receivership) to a stable level of asset condition and operation. The cost to replace wastewater assets is one of the highest of all the standard utilities. To support this investment, other costs include vehicles and equipment, staffing, safety programs, laboratory testing, costs related to permit changes, and all the related operational costs outlined in my colleagues' testimony.

Most of APW's acquired assets were in poor condition – WWTPs, collection pipes, force mains, lift stations, no SCADA, and not designed for operational best practices. Many of the facilities are reaching their end of useful life. APW is managing to maintain the assets in-kind while programmatically replacing major or all components of the treatment and pumping assets. For example, many treatment tanks were built by housing developers using minimal quality components such as carbon steel tanks which cannot be maintained like a steel water storage tank. After 20 years of operation, it is common to see these tanks rusting and holes opening in them.

In many cases, the assets were undersized, perhaps meeting minimum design standards but far from meeting the requirements of real-time flows and operational needs. An example would be a small equalization tank with manual flow-splitter boxes. Operators are challenged to handle high flows and balance flows through the plant often leading to downstream compliance and operational management issues.

When replaced, APW will design and construct the facilities to the right size to ensure we can meet permit requirements and limit short life- major assets (e.g., use pre-cast concrete tanks in lieu of carbon steel tanks). Several examples of where we corrected asset issues on a major scale include Penn Township WWTP, Media Borough WWTP, Treasure Lake WWTP, and soon the Laurel Lakes and Rivercrest WWTPs.

The above issues are not isolated to developer-built plants. Many of the municipally acquired plants were in poor condition and likely a driver of why the former owner divested. The need for investment to restore basic safety elements, ensure compliance, and stabilize assets that are "in imminent threat of failure" can delay lower priority investments.

While WWTPs and lift stations are in varying states of restoration, a significant amount of the collection system mains are deteriorated and need significant work. Inflow and Infiltration ("I&I") are common in most every wastewater system, and the sources of it are from both leaking mains and manholes, and customer and other contributions (e.g., laterals, illegal roof drain connections, illegal sump pump connections, stormwater cross connections, other utilities that have broken APW's pipe when installing their asset). APW's capital plan is created to maximize investment needs while mitigating the impacts

to rates. APW has and will continue to address these situations to maintain proper operation and compliance with our discharge permits.

Q. How is APW prioritizing which investments to make that support operation of the facilities?

A. Many investments are "self-prioritizing" as we work through the outcome of original design and construction decisions by former owners, and as permit conditions change. For example, in the last discharge permit renewal for our Treasure Lake WWTP, a limitation on copper concentration (load) was added resulting in significant upgrades to comply with the permit. Post upgrades, our operations protocol requires feeding new chemicals and managing sludge differently than pre-permit change.

Another example is our Cheltenham system where we inherited a corrective action plan and connection management plan to reduce discharges from I&I. APW has been successful through investments and operational work like televising and cleaning sewer mains and continuing to work with PWD (where flow is conveyed for treatment) to potentially construct a large surge tank where we would collect peak flows and manage the discharge from the tank through operational decisions.

Internal processes include regular meetings with our operations and engineering teams to discuss project progress, review long-term planning, and review in-field experiences that need immediate attention (e.g., if a steel tank wall is seen as near failure, plans are formulated to temporarily repair the wall until the final investment plans are executed).

VII. TROUBLED WASTEWATER SYSTEMS

Q. Does APW serve as a Receiver for any troubled wastewater systems?

A. For informational purposes, since the last base rate case, APW has acquired the assets of the North Heidelberg Sewer Company ("NHSC") in Berks County which was previously under Receivership.

Q. What has APW done to improve the NHSC system?

A. While Receiver, APW stabilized operations through our standard operational management and processes. The WWTP was seriously flooded in September 2021 from Hurricane Ida. See Attachment TMD-1. The WWTP was inundated with floodwater for days afterward, and access to the WWTP was cut off by floodwater. In addition, the stormwater system in the area was destroyed and had to be rebuilt before repairs to the WWTP could start. APW operations and engineering staff with a contractor were able to recommission the plant in about 14 days including temporary power, a new ultraviolet disinfection system, clean the control building, and establishing process control. I do not believe this recovery could have been achieved if the system remained with the original owner. Aqua PA's operations team maintained compliance with the permit under these temporary asset conditions while new facilities could be procured/constructed. NHSC continues to be run in compliance with permit requirements.

The customers of the NHSC system have benefited from APW's operating and now owning the system. APW's ability to manage the initial deteriorated conditions, the Hurricane Ida incident, the rebuild, and on-going upgrades and operational efficiencies in my opinion would not have been possible under original ownership.

Q. Has APW acquired any public wastewater systems after the filing of its last base rate case?

A. Yes. APW acquired Lower Makefield Township, Bucks County, and East Whiteland Township, Chester County, wastewater systems.

Lower Makefield Township ("LMT") was acquired on March 4, 2022. LMT has approximately 11,000 connections and consists of 113 miles of collection mains, 14 lift stations and associated force mains. All wastewater is conveyed to other adjacent utilities for treatment.

East Whiteland Township ("EWT") was acquired on August 12, 2022. It has approximately 3,850 connections (8,200 Equivalent Dwelling Units) and consists of 57 miles of collection mains, 12 lift stations and associated force mains. All wastewater is conveyed to other adjacent utilities for treatment.

Q. What improvements have been made to the LMT system after APW's acquisition?

A. Based on my experience, LMT system is a typical deferred maintenance and investment system. Since acquiring the system, APW has implemented improvements and operational efficiencies including: 1) cleaned and inspected nearly 15 miles (13%) of collection system that resulted in roots clearing, fixing broken pipe and cross-bore repairs; 2) I&I identification; 3) cleaned the large lift station wet wells which were laden with grease build-up and grit accumulation that causes premature asset failure; 4) addressed operational control problems including rapid pump cycling; 5) field survey work to update poor mapping transferred to APW to facilitate proper system operation; 6) PA one-call compliance; 7) added all emergency generators to a preventative maintenance program and made repairs for reliability; 8) major maintenance upgrades at lift stations including replacing non-working valves; 9) installed new grinding systems; 10) rebuilt pumps due to failed bearing and vibration issues; 11) replaced poor control systems, installed SCADA

and alarming systems for early detection of issues and remote monitoring by operators; and 12) replacement of non-functioning air release valves, replacement of failed safety fencing, replacement of failed motors and variable speed motor drives, replacement of electrical components, and replacement of five above ground fuel tanks that were not compliant with regulations.

Q. What improvements have been made to the EWT system since acquisition?

A. The EWT system is similar to the above described LMT system. The EWT system condition ranges from poor (high occurrence of operational issues or asset failure) to fair (system conveys sewage but assets and operational protocols at acquisition were outdated and unmaintained). All lift stations now have SCADA replacing old, unsupported, dialer systems. Mains that go through Rights-of-Way ("ROW") are difficult to access as the ROWs were not maintained and mature vegetation exists. A force main break and gravity line break in the system took significantly longer to find and fix due to this unmaintained ROWs. Results of televising and main repairs shows many of the pipe joints not aligned and off-set, resulting in I&I and allowing solids to aggregate on the sharp edges to block flow. APW created a formalized preventative maintenance plan for cleaning lines and is planning replacements of the worst sections of mains.

VIII. TROUBLED WATER SYSTEMS

Q. Does AP serve as a receiver for any troubled water systems?

A. Yes. As of this base rate case filing, AP has two systems in Receivership under Section 529 of the Public Utility Code, 66 Pa. C.S. § 529. First is the Venango Water Company ("Venango") water system, in Reno, Venango County. Venango has approximately 230 customers and is comprised of two spring sources (Bellows and Shaffer Springs) with chemical feed systems (disinfection via chlorine, pH adjustment via soda ash, and a

corrosion inhibitor), one storage tank (extremely poor condition), and approximately seven miles of mains, valves and hydrants. Aqua assumed its Receivership of Venango via a Commission order of August 11, 2023.

Second is Twin Lakes Utilities, Inc. ("Twin Lakes") water system. Twin Lakes serves a small 113-customer community called Sagamore Estates in Shohola Township, Pike County. Twin Lakes is owned by Middlesex Water Company but operated and managed by AP under a Receivership since January 14, 2021, when the Commission issued an order appointing Aqua as Receiver for the system.

Additionally, AP became owner of the James Black Water Service Company – Belle Aire Acres system ("Belle Aire Acres") on May 2, 2024. Belle Aire is a small troubled 19 customer water system in Jefferson Township, Lackawanna County, that AP had operated under Receivership since September 11, 2019.

Q. What has AP done to enable address operational and environmental issues in the Venango system?

A. I am extremely proud of the Aqua team that prioritized responding to help customers served by the Venango system. See Attachment TMD-2. AP received a Commission order on Friday evening August 11, 2023, to immediately assume Receivership on Saturday August 12, 2023 of the Venango system due to alleged contamination of the source water from a spill in the watershed that affected one of the two raw water sources (springs). AP had its team at Reno on Saturday morning August 12, 2023, to start system operation. Prior to the issuance of the Commission's order, there was a "Do Not Consume Order" that had been issued by the former owner under directive of the PADEP.

AP assigned a team of operations, engineering, and functional support staff to work through the objective of restoring safe drinking water to the community. Working with the PADEP and local governmental representatives and integrating with a pro-active community support group, AP was able to lift the "Do Not Consume Order". AP's Receivership started on August 12 and by September 1, the Do Not Consumer Order was lifted. During that initial period, AP hauled drinking water from our Emlenton WTP to Reno to restore storage tank levels and support system flushing requirements to ensure safe water was in the distribution system. AP continued to haul water through the winter of 2023-2024 until the remaining spring was recharged to meet average daily demand.

Many other system improvements were made in the first three months to correct serious safety issues, install instrumentation to assist in monitoring water quality and provide automatic notification alarming of key instrument readings, fixed chemical feed lines, and many other improvements. AP is required to file quarterly status reports to the Commission to detail any relevant updates pursuant to duties and responsibilities assigned through Receivership. See Attachment TMD-3. Three status reports have been submitted with the last one dated April 8, 2024. Each provide details of AP's actions to improve daily service and look at options for long-term source of supply options.

Q. Please describe the improvements made to the Twin Lakes system under AP's Receivership.

A. Since January 2021, AP has invested in the Twin Lakes system by addition of treatment to mitigate lead action level exceedances from 2019; renovated the well station to include treatment for lead reduction and significant safety improvements; permitted and installed online continuous chlorine residual monitoring equipment; added process control alarming

improving response time to treatment and production issues; replaced two booster pumps that provide system pressure; replaced ~25% of the residential meters that have failed; performed system-wide leak detection and repaired several leaks reducing water loss; made a portable emergency generator is available for backup power (no prior emergency backup power was present at the system). The Twin Lakes system is operated by AP staff (not contractors) who visit the system multiple times each week.

Q. Has AP acquired any other public water systems since its last base rate case that you would like to highlight?

A. Yes. In addition to Belle Aire Acres noted previously, on July 24, 2023, AP acquired the assets of the Municipal Authority of the Borough of Shenandoah ("Shenandoah"). The system has approximately 3,000 customers in Borough of Shenandoah and the surrounding communities.

Q. What improvements have been made to the Shenandoah system subsequent to AP's acquisition?

A. While relatively early in ownership, it is clear that AP's expertise, financial capability, and overall utility operation program has and will continue to benefit the Shenandoah water system. See Attachment TMD-4.

Some of the infrastructure dates back to the late 1800s, when Shenandoah had multiple competing water companies serving the same areas causing multiple mains to be co-located in streets depending on which customer subscribed to which company. This has led to undocumented mapping and challenging operational and asset improvement planning.

The system has 60% non-revenue water according to the latest analysis done by Shenandoah. Within four months of taking ownership, AP replaced 95% of all customer water meters as part of an integration project, and to reset the baseline for apparent losses from meter inaccuracies. The water mains frequently leak or break for various reasons and contribute to water loss. From August 2023 to May 7, 2024, AP has repaired 44 main breaks, numerous other service leaks, and has completed a full system wide leak survey that found 32 leaks which will be repaired in 2024. AP is also completing the replacement of approximately 4,000 lineal feet ("LF") of aging cast iron pipe with 8-inch ductile iron pipe, and is planning future main replacement projects, one which will eliminate a long low use main located through a wetland and other mains which have been identified by AP as highly prone to breaks and leaks.

AP inspected all hydrants in August and September 2023 identifying 23% of the hydrants as inoperable. AP began an immediate replacement program of these hydrants that was hampered by the lack of operating isolation valves, almost non-existent maps, and hydrants connected to undersized water mains. The work to correct this fire hydrant deficiency was completed in January 2024.

There is a 2 MGD WTP serving the community. After AP took ownership, it performed an inspection of the WTP, which found serious safety concerns such as a leaking caustic chemical system, uninspected chlorine gas system components, non-working key assets, and water quality testing process lacking the rigor AP provides. A team of AP's water treatment plant managers, safety specialist, compliance teams, and other subject matter experts spent time at the WTP identifying areas for improvements and nearly all have been implemented or are programmed for investment.

Q. What other projects were required that AP took over and implemented in the Shenandoah system?

A. Shenandoah was required by the National Pollution Discharge Elimination System ("NPDES") permit to design, permit and install a means to remove chlorine from the WTP sludge dewatering discharge stream. AP recently completed the design and permitting of the de-chlorination system and will complete installation of this system by July 2024.

Another project Shenandoah was required complete was to install structures and flow measuring equipment at the high hazard dam to allow conservation releases into the associated watersheds as required by the PADEP Water Allocation permits. AP assumed a grant from the Susquehanna River Basin Commission originally awarded to Shenandoah to fund this project to be completed in 2024.

IX. OTHER EXAMPLES OF EXEMPLARY MANAGEMENT PERFORMANCE

Q. Please describe an example of AP's emergency response in action.

A. To demonstrate the value of Emergency Planning, Response, and Business Continuity Plans, consider the September 1, 2021, Hurricane Ida storm that caused AP's largest water plant – Pickering West – to flood and be out of use. Other impacts from Hurricane Ida included the complete loss of our NHSC WWTP as described earlier in my Direct Testimony.

Focusing on the loss of 30 MGD of production from the Pickering West WTP, AP and its customers were faced with a serious and unscripted loss of service with a prospect of not knowing when water service could be restored. AP's highly skilled and experienced staff recovered from this disaster in 10 days. See Attachment TMD-5. I believe that AP's prudent and consistent infrastructure investment made the difference for our customers.

The entirety of AP's staff and functional support teams were focused in an organized and logical process to return a flooded major WTP to service.

Q. Please explain how AP's investment in its infrastructure and in emergency planning allowed AP to continue service while its largest WTP was out of service.

A. Our engineering team collaborated and worked with our control center and distribution team to move water from areas throughout SEPA. This was done by analyzing our hydraulic models, procuring and installing large temporary pumps and tapping mains to form new pressure districts. Our other water plants maximized output to supplement the demand and we purchased water through our longstanding partnerships throughout the region. The result was continuity of service to our customers, and no water main breaks. This underscores the benefits of continued investment in AP's assets (e.g., main replacements), plant upgrades, purchased water analysis, and the value of a large company to recover from such an event.

Q. Are there any examples recently of how Aqua PA's lab was used to respond to significant environmental events?

A. Yes. An example of the value of the Company's lab resource brings to our customers is an event where a chemical spill occurred in the Delaware River in March 2023. See Attachment TMD-6. The water supply of AP's Bristol water plant and other water suppliers that have intakes on the affected Delaware River stretch were in jeopardy of causing the unidentified contaminant entering the public water supply. Fortunately, no water supplier had the spilled chemical enter its facility intakes and therefore into the public drinking water system. However, during the spill response, Aqua PA's laboratory was engaged to "decode" the unknown chemical. Our staff used their expertise and

sophisticated instruments to identify compounds of concern from information provided by the manufacturer and the resultant analytical data allowed other water suppliers to make key operational decisions to manage through the event. Aqua PA's laboratory was able to provide analytical testing for other affected water purveyors during this event helping to protect the general Philadelphia-Camden New Jersey area.

Several weeks earlier the Aqua PA lab provided similar support to water purveyors in western Pennsylvania and eastern Ohio to ensure customer safety in the aftermath the East Palestine, OH Norfolk-Southern train derailment and spill.

Aqua PA's operations and our respective customers receive significant value from this investment made in support of our core objective.

Q. Please describe Aqua PA's proactive efforts to test for the forever chemicals referred to as PFAS.

A. In addition to the Company's extensive testing in each specific area, our laboratory is only one of two that are accredited in Pennsylvania to test for PFAS, which have been linked to numerous health concerns. Aqua PA has been committed to testing every one of our water sources for contamination since the addition of this testing capability in 2016.

In 2017, Aqua PA's lab became a leader in PFAS testing by becoming one of the first utilities to be state-certified to test for the forever chemicals. Shortly after in 2020, Aqua PA set a company-wide standard to treat and remove PFOS and PFOA concentrations above 13 ppt. Aqua PA's lab recently expanded its PFAS testing capabilities by purchasing a second Liquid Chromatography with tandem mass spectrometry ("LC/MS/MS") and setting up EPA method 537.1 for the analysis for 18 compounds. The laboratory also holds EPA UCMR 5 certification for method 537.1.

Q. Does Aqua PA proactively participate in American Water Works Association ("AWWA") programs?

A. Yes. Aqua PA has taken a leadership role in AWWA programs to enhance water quality compliance assurance such as "Partnership for Safe Water" (surface water plants), "Partnership for Clean Water" (Wastewater treatment plants), and "Partnership for Safe Water Distribution System" (water distribution systems). This past year an AP employee was the President of the Pennsylvania AWWA chapter. These rigorous programs benefit our customers by enhancing our focus on the water quality we provide to customers, and the water returned to the environment. The Company goes beyond the required regulatory testing, which only confirms if we meet compliance, to ensure that we are providing excellent water quality to our customers. These programs challenge us to enact optimization strategies that reinforce our existing compliance programs and to ensure water quality meets customer expectations.

The program has four levels of achievement, with annual reviews of progress against on-going optimization initiatives. All surface WTPs are enrolled in the program and progressing through the four phases. At present we have two (2) plants with the highest-level award – The President's Award, four (4) with Phase III awards, and six (6) in the Phase II data collection phase which, when completed, will enter the Phase III program for self-assessment and identification of optimization opportunities. The Company's Media WWTP received a Phase III award in 2022. In May 2024, we will receive a Phase III award for our Uwchlan water distribution system.

Q. How does Aqua PA work with PADEP in improving WTP performance?

A. AP receives a periodic a PADEP inspection and evaluation process known as “Filter Plant Performance Evaluation” (“FPPE”). The FPPE process evaluates current and historical filter plant operations and water quality data focusing on filter plant capability to maintain compliance reliably and consistently with Pennsylvania's Safe Drinking Water Requirements on a short and long-term basis. There are three overall ratings from lowest to highest; “Needs Improvement”, “Satisfactory”, and “Commendable”. In the past three years, ten (10) of AP’s WTPs received a FPPE. Overall ratings were two (2) plants receiving “Satisfactory”, and seven (7) plants receiving “Commendable”, both difficult to achieve without consistent attention to daily operational excellence and regular facility investment.

X. CONCLUSION

Q. Does that conclude your Direct Testimony?

A. Yes, it does, but I reserve the right to supplement my Direct Testimony as needed during this proceeding.

SINKHOLE LOCATION ON GOLF COURSE PROPERTY OVER TOP OF CULVERT. NHSC PROPERTY LINE AT WOODS/FENCE LINE TO THE RIGHT. EARTH WASHED INTO THE COLLAPSED CULVERT SUBSTANIALY BLOCKING IT.

SINKHOLE APPROXIMATELY 12 FEET IN DIAMETER AND 12 FEET DEEP.

The Derrick: Permanent Alternate Water Supply Being Considered For Village Of Reno, Venango County After Contamination By Conventional Oil Well Wastewater Spill

On October 13, The Derrick reported the Franklin General Authority is considering a request for a permanent water connection to the Village of Reno water supply system to provide 36,000 gallons of water a day to replace the water lost as a result of a conventional oil well wastewater spill.

One of the springs supplying water to the Village of Reno's system was contaminated in July by a spill from conventional oil well wastewater tanks operated by Petro Erie, Inc. and the 550 people in Reno have been getting emergency supplies of make-up water ever since.

The Village of Reno's water supply is owned by the Venango Water Company which is being operated by Aqua Pennsylvania under an emergency order issued by the Public Utility Commission on August 12.

Aqua Pennsylvania made the request for the interconnection to the Franklin General Authority to help avoid the cost of trucking water to the Reno water system daily.

The Authority is expected to consider the request as early as its meeting in December.

Click Here to read the article. [PDF of article]

Summary Of Spill Incident

The conventional oil well wastewater release from Petro Erie's production wastewater tanks was discovered on July 20 and was found to have contaminated the Village of Reno's water supply in Sugarcreek Borough, Venango County leaving the community of over 550 residents and businesses without clean water for more than six weeks.

Although the "do not consume" order to residents in Reno was lifted on September 1, the water supply emergency continues with drinking water trucked into the community every week. Read more here.

Sadly, on September 9, Sugarcreek Borough Mayor Charlie McDaniel, who had been a leader in his community responding to the Village of Reno water emergency for the last six weeks, was found deceased in his home. Read more here.

On October 5, Petro Erie Inc. filed an expanded appeal with the Environmental Hearing Board of DEP's August 16, 2023 order requiring the operator to restore the Village Of Reno's water supply and clean up the spill of conventional oil well wastewater from wells the company operates in Venango County. [EHB Docket No. 2023075]

One grounds for the appeal is that the "Appellant lacks the financial ability to comply with the Order."

This is the second order DEP issued in this case and the second appeal of those orders filed by Petro Erie, Inc. [EHB Docket No. 2023063]

This is the second time the company said it lacked the financial ability to comply with DEP's orders. Read more here.

On August 21, a DEP inspection found two more Petro Erie, Inc. conventional oil well wastewater tanks with a pipe running from the tanks to a discharge area in a ditch with clear indications of wastewater dumping. Read more here.

On August 29, a DEP inspection found Petro Erie, Inc. had begun some cleanup at the site of the original wastewater tank release, but there was no activity at the site the day of the inspection. Read more here.

On September 25, 2023, DEP did a follow up inspection of the Lower Reno 1 conventional oil well operated by Petro Erie, Inc. in Sugarcreek Borough, Venango County and found a limited amount of excavation was done in a drainage ditch impacted by the production wastewater spill that contaminated the Village of Reno water supply and the dirt was stockpiled for later disposal. [DEP inspection report + photos]

The latest information from DEP's Northwest Regional Office is available on its Venango Water Company/ Petro Erie Inc. Investigation webpage.

Visit the Aqua Pennsylvania Venango webpage for more information on activities related to the water supply system the company is operating on an emergency basis for the Venango Water Company.

Do Not Consume Water Advisory Lifted In Village Of Reno; Petro Erie, Inc. Barely Begins Cleanup Of Conventional Oil Wastewater Spill Site That Contaminated The Water Supply In Venango County

On September 2, Makayla Keating of the The Derrick reported the do not consume water advisory has been lifted in the Village of Reno, Venango County after six weeks of emergency water distribution for the over 200 community residents and businesses affected.

The water supply was contaminated by a release of conventional oil well production wastewater from tanks operated by Petro Erie Inc on or about July 20.

The announcement was made by Aqua Pennsylvania which was operating the Venango Water Company serving the Village under an emergency order from the Public Utility Commission.

The full announcement is on the Aqua PA Venango webpage.

The Derrick reported the chair of the Reno Neighborhood Association said the community is "very, very excited to go back and we're appreciative of Aqua Pennsylvania and all of the volunteers and community for their donations."

A planned emergency distribution of water was still held Friday evening at the Reno fire hall.

The Derrick said The Pointe, a nonprofit drop in center, and The YMCA in Oil City both opened their showering facilities to Reno residents. The Pointe also made available a washer and dryer.

The Franklin Housing Authority also donated a unit for Reno residents to shower and a washer and dryer was donated by Appliance Pros.

The Derrick reported local churches and individuals made significant product and monetary donations to help the Reno community.

Click Here to read the entire article from The Derrick.

Petro Erie Cleanup Barely Started In Venango County

On August 29, 2023, DEP did a follow up inspection of the Lower Reno 6 conventional oil well and wastewater tanks operated by Petro Erie Inc. in Sugarcreek Borough, Venango County and found "there is no activity onsite and a mini excavator is staged onsite."

A wastewater release from the tanks contaminated the Village of Reno's water supply and over 200 community residents and businesses continue to be on emergency water distribution since July 20.

The inspection found Petro Erie had begun some cleanup activity at the site. Contaminated soil had been excavated to a depth of just a few inches to about three feet at the deepest point in some areas, put on piles and covered with a tarp.

"Field screening with a soil conductivity probe indicates that there is still a high level of [wastewater] impacted soil within the excavation."

Photos in the inspection report show the wastewater tanks are still sitting in a pool of wastewater and no effort was made to deal with the leaking tanks. The earthen dike around the tanks appeared to be holding the wastewater.

On August 29, 2023, DEP did a follow up inspection of the Lower Reno 6 conventional oil well and wastewater tanks operated by Petro Erie Inc. in Sugarcreek Borough, Venango County and found "there is no activity onsite and a mini excavator is staged onsite."

A wastewater release from the tanks contaminated the Village of Reno's water supply and over 200 community residents and businesses continue to be on emergency water distribution since July 20.

The inspection found Petro Erie had begun some cleanup activity at the site. Contaminated soil had been excavated to a depth of just a few inches to about three feet at the deepest point in some areas, put on piles and covered with a tarp.

"Field screening with a soil conductivity probe indicates that there is still a high level of [wastewater] impacted soil within the excavation."

Photos in the inspection report show the wastewater tanks are still sitting in a pool of wastewater and no effort was made to deal with the leaking tanks. The earthen dike around the tanks appeared to be holding the wastewater.

The conventional oil well itself was found to be inoperable--electric was disconnected and the oil production line was disconnected and removed.

DEP noted the cleanup consultant retained by Petro Erie--Moody and Associates-- did send an initial report on the site dated August 8, 2023.

However, the inspection report says Petro Erie still owes DEP a written report on how it plans to bring the site into compliance. The report was due August 11, 2023.

The inspection report said "cleanup needs to continue at the site." "The Department requests that the operator continue with the cleanup process and communicate with the Department throughout the process."

AQUA℠

An Essential Utilities Company

VIA E-FILING

Rosemary Chiavetta, Secretary
Pennsylvania Public Utility Commission
400 North Street
Harrisburg, PA 17120

Re: Venango Water Company – Ex Parte Emergency Order Naming Aqua Pennsylvania, Inc. as Receiver
Docket No. M-2023-3042180

Section 529 Investigation of Venango Water Company
Docket No. I-2023-3042312

Dear Secretary Chiavetta:

Enclosed please find Aqua Pennsylvania, Inc.'s ("Aqua") Initial Status Report to the Pennsylvania Public Utility Commission ("PUC" or the "Commission") in accordance with Aqua's Receivership duties for the Venango Water Company established via the Commission's Ex Parte Emergency Order Entered August 11, 2023, Ordering Paragraph 4, Appendix A Paragraph 1.o., in Docket No. M-2023-3042180, and ratified by the Commission's Ratification Order Entered August 24, 2023. This status report is being filed in both the M-Docket and I-Docket referenced above.

If you have any questions regarding this filing, please contact me at 610-645-1130.

Sincerely,

Alexander R. Stahl
Regulatory Counsel

INITIAL STATUS REPORT TO THE

PENNSYLVANIA PUBLIC UTILITY COMMISSION

VENANGO WATER COMPANY

AQUA PENNSYLVANIA, INC., AS RECEIVER

DOCKET NO. M-2023-3042180

DOCKET NO. I-2023-3042312

Dated: October 11, 2023

A. BACKGROUND

On August 11, 2023, the Pennsylvania Public Utility Commission ("PUC" or the "Commission") issued an Ex Parte Emergency Order at Docket No. M-2023-3042180 ("Receivership Order") naming Aqua Pennsylvania, Inc. ("Aqua" or the "Company") as Receiver for the Venango Water Company ("VWC").[1] The VWC system serves approximately 215 customers and is comprised of two spring sources (Bellows and Shaffer Springs), one storage tank, and approximately 7 miles of mains. The Receivership Order was ratified by the Commission through its Ratification Order entered on August 24, 2023. Aqua was directed to assume its Receivership role on August 12, 2023. Included within the Commission's Receivership Order, the Company was directed to "[s]ubmit an initial status report to the Commission within 60 days of assuming operations and then quarterly thereafter to detail any relevant updates pursuant to duties and responsibilities assigned through receivership."[2]

Aqua now submits its Initial Status Report ("Status Report") on the operations of VWC as directed by the Commission.

B. INITIAL STATUS REPORT

1. Pre-Receivership

On or about July 21, 2023, the Pennsylvania Department of Environmental Protection ("DEP") issued a Do Not Consume ("DNC") notice to the customers of VWC related to a brine spill and potential contamination of one of VWC's sources of supply – the Bellows Spring. On August 4, 2023, the DEP issued a Notice of Violation to VWC, included with this Status Report as **Attachment A**.

Aqua received the Commission's Receivership Order on that Friday evening and quickly convened an operations meeting the night of August 11, 2023 to stand-up its emergency response team to be onsite on August 12, 2023.

The Commission directed that Aqua provide bottled water to the VWC customers.[3] Aqua arranged for a tractor trailer to deliver bottled water to the VWC customers and distributed it at the Reno Volunteer Fire Company. Aqua also arranged for a tanker of potable water to be on-site where VWC customers could fill bottles for consumption.

The Commission directed that utility service serving the VWC facilities be transferred to the Receiver.[4] Electric service was transferred and established in Aqua's name as Receiver in accordance with the Commission's Receivership Order.

[1] In re: Venango Water Company, Docket No. M-2023-3042180, Ex Parte Emergency Order, Ordering Paragraph No. 4 (August 11, 2023) (hereinafter "Receivership Order").
[2] Id. Ordering Paragraph No. 4, Appendix A Paragraph 1.o.
[3] Id. Ordering Paragraph No. 5.
[4] Id. Ordering Paragraph No. 8.

The Commission directed that VWC preserve all hard copy or electronic records, files, bank statements, documents, papers, or any other materials related to the offering of utility water service, including records of all contracts, agreements loans, payments, and other arrangements with affiliated companies.[5]

The Commission directed that by August 12, 2023, VWC turn over copies or originals of all books, records, accounts, and any other information, and all operations assets, including keys to locks securing facilities, buildings, and any other property, whether personal or real property, used and useful in the provision of utility water service to customers served by VWC to the Receiver.[6] The Commission also directed that VWC, including its owners and employees, provide full and unconditional cooperation with the orderly transition of operations, management, and oversight to the Receiver.[7]

2. Financial

The Receivership Order directed Aqua to establish the financial position of VWC at the time Aqua assumed its Receivership role.[8] Aqua is working to establish the financial position of VWC as of the start of Aqua's Receivership. VWC has previously submitted Class C Annual Reports to the Commission which includes financial and operational data, the most recent of which was submitted on June 30, 2023 and available on the Commission's website.[9] Aqua will continue to track expenses and capital improvements related to the VWC system through deferred accounting treatment via establishment of a regulatory asset in accordance with Aqua's Receivership duties.[10]

3. Operations and Capital Expenditures

On August 12, 2023, Aqua began its Receivership duties for the VWC system, and Aqua arrived onsite on August 12, 2023 to assess the state of operations of the VWC system. Aqua changed the existing locks and posted its signage at the system. Included with this Status Report as **Attachment B** are pictures of the initial walkthrough of the VWC system when Aqua arrived on site. Aqua's initial concern upon assuming operations of the VWC system was the level of water in the only storage tank for the system. When Aqua arrived on site, there was approximately two feet of water in the storage tank, which if not corrected could have depressurized the system. To address this issue Aqua consulted with DEP and, after approval from DEP, turned the Bellows Spring back on and initiated another DNC notice to customers, a copy of which is included with this Status Report as **Attachment C**. The Bellows Spring was turned back on to ensure customers would have water for sanitary purposes, but not for consumption. Additionally, within the first two days of being on-site, Aqua had a tank inspection performed due to the apparent poor condition of the storage tank. That report is included in this Status Report as **Attachment D**.

---

[5] Id. Ordering Paragraph No. 9.
[6] Id. Ordering Paragraph No. 10 and 11.
[7] Id. Ordering Paragraph No. 12.
[8] Id. Ordering Paragraph 4, Appendix A Paragraph 1.r.
[9] See https://www.puc.pa.gov/pcdocs/1791853.pdf.
[10] Receivership Order, Ordering Paragraph 4, Appendix A Paragraphs 1.s and 2.b.

Aqua began trucking in water from its Emlenton water treatment plant on August 14, 2023 to fill the storage tank to ensure there was enough storage for sanitary use throughout the system. As trucking continued, enough water was brought in to allow Aqua to turn off the Bellows Spring on August 15, 2023. The Bellows Spring has remained off since that date. In the first month of operation Aqua has trucked in over 1,200,000 gallons of water from Emlenton to VWC system. Inclusive of trucking costs, and if the water had been sold at Aqua's Sales to Other Utilities rate, the cost to get this water to VWC would have equated to approximately $50,000. Aqua has not charged VWC customers for the trucked water from Emlenton.

As Aqua was stabilizing the VWC system, Aqua began testing the source and points throughout the distribution system, per DEP parameters and additional parameters Aqua believed necessary. The test results were shared with DEP and a plan for lifting the DNC was developed. After the full battery of multiple days of testing at several locations in the system showed that the water met drinking water standards, Aqua, in coordination with DEP, lifted the DNC on September 1, 2023, a copy of which is included in this Status Report as **Attachment E**. From the start of Aqua's Receivership through September 1, 2023 when the DNC was lifted Aqua collected and analyzed over 40 gallons of water, and performed more than 1,600 lab analyses for 45 lab analytes.

Aqua attended two public meetings on August 14 and September 13, 2023 to provide information to customers, and developed a website that customers can visit for information about Aqua's efforts to lift the DNC. Aqua's test results were also posted this same website: https://www.aquawater.com/venango.php. Aqua also met with local officials and DEP multiple times a week leading up to the DNC lift to ensure they were informed of the most recent information. Aqua directly reached out to customers that had concerns that were discussed during the public meetings or had reached out separately to Aqua, including sampling at customer homes where water quality concerns were raised.

Aqua has completed the following improvements to the VWC system since beginning its Receivership duties:

i. Installed SCADA controls at Shaffer Spring.

ii. Replaced the existing SCADA system to meet Aqua's operational and security requirements, and installed outdoor antenna and cabling.

iii. Installed chemical feed pumps.

iv. Installed a new chlorine analyzer and Aqua is working to permit it for continuous monitoring.

v. Installed a new heating system.

vi. Installed a pressure transducer at the water storage tank.

vii. Installed a new service line to connect a new customer.

viii. Conducted leak detection and Aqua is currently reviewing the results to address leaks within the system.

ix. Conducted flushing of the system.

x. Performed a storage tank inspection.

xi. Updated sampling plans and emergency response plans.

The above improvements were necessary to restore and continue quality and reliable service to the customers of VWC. Aqua is developing a recommended capital plan for the VWC system and will provide recommendations on capital improvements in a subsequent status report.[11] Along with the capital plan Aqua will be providing a breakdown of costs incurred during the Receivership in a future status report. Aqua is pursuing low cost/no cost financing for capital improvements for the system through the Pennsylvania Infrastructure Investment Authority ("PENNVEST"). However, PENNVEST informed the Company that Aqua must be the owner of VWC to receive a grant award. The Company does not agree with this and plans to submit an application to PENNVEST for a grant for the work deemed necessary.

Since the initial event causing the issuance of the DNC, the DEP has filed an Order on against Petro Erie, Inc. on August 16, 2023 ("Petro Erie Order"), citing violations of various statutes and DEP regulations. A copy of the Petro Erie Order is included in this Status Report as **Attachment F**.

While Aqua will continue to operate the system during its Receivership, the Company does want to note that this system is in close proximity to two municipal systems, which could more easily serve the VWC customers. Aqua's closest system is approximately 27 miles (40 minutes) away, while Sugarcreek Borough's and the City of Franklin's water systems are approximately 1.2 miles and 1.8 miles away from the VWC system, respectively.

As Aqua continues to operate the system to ensure compliance with the Receivership Order, Aqua will make improvements necessary to provide quality and reliable service. Aqua will have further information on operational issues in later reports.

4. Initial Customer Billing

Aqua has implemented the existing rates of VWC as set forth in VWC's Supplement No. 24 to Water – Pa. P.U.C. No. 3, effective November 15, 2018. Aqua's initial billing of the VWC customers occurred on September 15, 2023, and was based on mainly estimated meter readings (with some actual reads) using historical consumption. A copy of the notice accompanying the first bill from Aqua is included as **Attachment G**. Aqua is facing issues getting access to customer properties to manually read the meters. Aqua is reviewing alternative means to get actual meter reads for customers in the future. Aqua has posted the VWC tariff on Aqua's website and will continue billing customers the rates under the VWC tariff during the pendency of the Receivership.

[11] Id. Ordering Paragraph 4, Appendix A Paragraph 1.c.

C. CONCLUSION

Aqua will continue to investigate the system's operations and financial status and will make necessary improvements to operate the VWC system to ensure quality service to the VWC customers for the period of its Receivership duties during the 529 proceeding. Aqua will provide an update to this Initial Status Report on or before January 9, 2024.

NOTICE OF VIOLATION

CERTIFIED MAIL NO. 9489 0090 0027 6506 3081 34

Venango Water Company
c/o Mr. Randall L. Rhodes, Secretary &
Mr. Kevin Rhodes, Treasurer
P.O. Box 397
Reno, PA 16343

Re: Safe Drinking Water Violations
Venango Water WTP
PWSID No. 6610014
Sugarcreek Borough, Venango County

Dear Mssr. Rhodes:

As you are aware, around July 14, 2023 the Venango Water Company's ("Venango Water") public water system began to experience water quality issues and customers began to contact the water company regarding water quality issues. On July 20, 2023, the Department of Environmental Protection ("Department") was officially notified by Venango Water of a suspected discharge from a tank battery located upgradient of the Bellow Spring source. The Department confirmed this contamination and requested Venango Water to: 1) no longer utilize the Bellows Spring as a source of supply until further notice from the Department; 2) issue a Tier 1 public notice in the form of a "Do Not Consume Advisory" to all customers of the water system ("Tier 1 PN"); 3) simultaneously issue a water conservation notice to all customers of the water system; and 4) provide bottled water to all customers of the Venango Water system.

On July 21, 2023, Department staff conveyed to Venango Water that a complete version of the Tier 1 PN needed to be made available to all customers (as opposed to an abbreviated message). Department staff also began discussions of possible short-term and long-term options for Venango Water to utilize to ensure safe and potable water is continuously provided to the Venango Water customers. Additionally, the Department has conducted several inspections of the public water system and has determined that Venango Water is in violation of the Safe Drinking Water Act and its Regulations. Specifically, the Department has determined Venango Water's:

- Failure to review and update its Emergency Response Plan at least annually and as necessary to reflect changes to communication procedures and contact information pursuant to 25 Pa. Code § 109.707(c);

- Failure to develop a plan for the provision of safe and adequate drinking water under emergency circumstances pursuant to 25 Pa. Code § 109.707(a);

- Failure to develop an Emergency Response Plan that provides for corrective actions for probable emergency situations pursuant to 25 Pa. Code § 109.707(a)(6);

- Failure to implement Emergency Response Plan when necessary pursuant to 25 Pa. Code § 109.707(b);

- Failure to present the Emergency Response Plan to the Department upon request pursuant to 25 Pa. Code § 109.707(c)(2); and

- Failure to take whatever investigate or corrective action is necessary to assure that safe and potable water is continuously supplied to the users in accordance with 25 Pa. Code § 109.4(4).

Further, on July 9, 2021, the Department received a Request for Reserve Designation application for the following sources: Upper Well (Source 012); Lower Well (Source 013), and Lower Spring (014). On January 10, 2022, the Department returned the July 2021 Request for Reserve Designation application and identified six (6) deficiencies associated with the application. To date, the Department has not received an updated application, including $50 application fee, for the reserve designation of these three (3) sources. Because the three (3) sources are not approved Reserve Sources, Venango Water's failure to conduct periodic monitoring of the water system which includes the raw water of these permitted sources violates 25 Pa. Code § 109.718.

In order to return the public water system to compliance, the Department requests that Venango Water:

1. Within thirty (30) days, update the existing Emergency Response Plan to reflect changes to communication procedures and contact information. Additionally, one of the specific scenarios outlined in the Emergency Response Plan shall include the contamination of one or more sources, then both short-term and long-term measures that are anticipated to be implemented to ensure safe and potable water is continuously supplied to users of the Venango Water public water system;

2. On or before August 20, 2023, and continuing monthly thereafter until notified by the Department in writing, repeat the Tier 1 PN to all customers, including a water conservation notice;

3. Submit a certification that the Tier 1 PN requirements have been fulfilled, along with a copy of each notice, to this office within 10 days of issuing the public notice in accordance with 25 Pa. Code § 109.701(a)(4); and

4. Within thirty (30) days, complete one of the following options: 1) submit an updated Request for Reserve Designation application, including $50 application fee, which addresses the six (6) items outlined in the January 10, 2022 return letter; 2) submit an updated Comprehensive Monitoring Plan which reflects that all permitted sources are included in future monitoring requirements for the water system; or 3) submit a permit application, including $50 application fee, which requests the proper abandonment of any or all of the sources known as Upper Well (Source 012), Lower Well (Source 013), and Lower Spring (Source 014).

This Notice of Violation is neither an order nor any other final action of the Department. It neither imposes nor waives any enforcement action available to the Department under any of its statutes. If the Department determines that an enforcement action is appropriate, you will be notified of the action.

If you have any questions concerning this matter, please contact me by electronic mail at jblashaw@pa.gov or by telephone at 814.332.6304.

Sincerely,

Justin T. Blashaw

PUBLIC NOTIFICATION (PN) CERTIFICATION FORM

Public Water System Name: Venango Water Company PWSID Number: 6610014

Date of Violation/Situation: August 12, 2023

Description of Violation/Situation: A contaminated soure was put on-line to ensure adaquate water supply for fire protection and non-potable customer use. The PN was a re-issue of PN already issued at the start of the emergency.

Notified DEP (or CHD) within 1 hour Date or NA: N/A

Consulted with DEP within 24 hours Date or NA: M/A

PN Level: ☒ Tier 1 ☐ Tier 2 ☐ Tier 3

Type of notice addressed by this certification: ☒ Initial ☐ Repeat

Methods and date of public notice deliveries to customers:

Method:	WAVE (Revese 911 System) Script attached	Date:	August 12, 2023
Method:	Posted PN in Public Places (Fire and Social Hall)	Date:	August 14, 2023
Method:	Distributed PN at Public Meeting	Date:	August 14, 2023
Method:		Date:	

☒ The public notice included the required elements: a description of the violation/situation; potential health effects; the population at risk; if alternate water supplies need to be used; when the violation/situation occurred; when the system will resolve the violation/situation; what is being done to correct the problem; actions consumers can take; water system contact information; and language encouraging broader distribution of the notice.

☒ A copy of each type of notice that was distributed is attached to this certification form

Certified by:

As a representative of the Public Water System (PWS) indicated above, I certify that public notification addressing the above violation/situation was distributed to all customers in accordance with the prescribed content, format, deadlines and delivery requirements outlined in Chapter 25 Pa. Code Chapter 109 Subchapter D of the Department of Environmental Protection (DEP)'s regulations.

Venango Wave Distribution

This is Aqua Pennsylvania - we are now operating the Venango Water Company in the Reno community.

Your system is experiencing potential contamination issues, and we're turning on impacted source water to stabilize water system pressure.

As a result you may experience discolored water, and your water system remains under a Do Not Consume order.

Visit https://www.aquawater.com/venango.php for more information. We'll continue to update you about your service on that webpage.

DRINKING WATER WARNING

DO NOT CONSUME THE WATER

NO BEBA EL AGUA

ESTE INFORME CONTIENE INFORMACIÓN IMPORTANTE ACERCA DE SU AGUA POTABLE. HAGA QUE ALGUIEN LO TRADUZCA PARA USTED, O HABLE CON ALGUIEN QUE LO ENTIENDA.

Aqua Pennsylvania is experiencing potential contamination issues with one of its sources serving the Venango Water System. **The impacted source water is being turned back on to stabilize water system pressure.** As a result, you may also experience discolored water.

On July 20, 2023, a discharge from a brine storage tank uphill of the source for Venango Water Company was identified. Due to the potential for contamination of the source, consumption of the water at Venango Water Company is not advised due to the risk to public health.

What should I do?

DO NOT DRINK THE WATER. Use bottled water or alternative sources for drinking, cooking, or food preparation **until further notice.** Throw away ice cubes if made with tap water.

DO NOT BOIL THE WATER. Boiling, freezing, filtering, or letting water stand does not reduce the potential contamination. Excessive boiling can make the potential contamination more concentrated.

What is being done?

Aqua Pennsylvania is working with the Department of Environmental Protection to investigate the discharge in the brine tank and determine the potential impact on the source for the public water system. You will be notified when the water is safe for human consumption.

Please share this information with other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by Aqua Pennsylvania, Inc.

Re: 400,000 Gallon Reservoir- Reno Tank (Sugarcreek, PA)
Emergency Inspection- Visual Only

Dear Mr. Martin:

On August 14, 2023, Dixon Engineering Inc. performed an emergency inspection on the 400,000-gallon water storage reservoir located in Sugarcreek, PA. The inspection was requested by Aqua PA, Inc. Purposes of the inspection were to evaluate the interior and exterior coating's performance and life expectancy, assess the condition of metal surfaces and appurtenances, review safety and health aspects, and make budgetary recommendations for continued maintenance of the tank. The tank had approximately 6' feet of water remaining in the tank so only a visual inspection of the wet interior was completed from the tank roof hatch.

The inspection was performed by Shannon Vidika, Regional Manager and AMPP/NACE Certified #10335.

CONCLUSIONS:

1. The exterior coating is in poor condition overall. The exterior coating system appears to be an aluminum system. Minimal coating remains. Coating deterioration includes spot failures to the substrate with rust undercutting, topcoat delamination, rust bleedthrough, and erosion. There are numerous coating failures throughout.

2. The wet interior coating is unknown. There appears no coating is remaining as the interior has excessive rust present. Due to the deteriorated ladder and water remaining in the tank, the interior was only inspected from the roof hatch.

3. The tank has approximately (100) repairs that were made on the tank sidewall. The repairs were mostly bolts with rubber to stop the active leaks.

FOR THE COATING INDUSTRY

720 Lafayette Rd.
Medina, OH 44256
Telephone: (330)983-0062
Fax: (330)725-0512

RECOMMENDATIONS:

1. Abrasive blast clean the exterior inside a dust tight containment system and repaint with a urethane system. The estimated cost is $120,000 plus $50,000 for containment.

2. Abrasive blast clean the entire wet interior and repaint with an 100% solids epoxy system. The estimated cost is $190,000.

3. Install a suspended ring, impressed current cathodic protection system in the wet interior. The estimated cost is $25,000.

4. Coat the foundation to help prevent deterioration. The cost would be incidental to exterior painting.

5. Repair areas of missing or damaged grout between the steel baseplate and the concrete foundation. The estimated cost is $15,000.

6. Install an overflow splash pad, duckbill valve and modify overflow pipe. The estimated cost is $12,000.

7. Install (2) 30” roof hatches. The estimated cost is $11,000.

8. Remove the existing wet interior ladder. The estimated cost is $2,000.

9. Repair the previous repairs on the tank sidewall with patch plates. The estimated cost is $25,000.

10. Roof beam replacement may be necessary. Add a contingency of $50,000.

11. Modification of the interior center column may be necessary. Add a contingency of $30,000.

12. Install rigging couplings on the roof for temporary fall prevention of workers in the wet interior. The cost would be incidental to the next painting project.

13. Install a 30-inch diameter sidewall manway. The estimated cost is $9,000.

14. Replace the roof vent with a pressure vacuum vent to meet current {PA DEP} requirements. The estimated cost is $7,000.

Fax: (330)725-0512

15. Install an exterior sidewall ladder w/fall prevention. The estimated cost is $6,000.

16. Install a step-off platform at the top of the sidewall. The estimated cost is $10,000.

17. Install deflector bars at the end of the fill/draw pipe in the wet interior to meet current {PA-DEP} requirements. The cost would be $500.

18. Weld pits in the wet interior that are deeper than one half the original metal thickness. The estimated cost is $15,000.

DIXON
ENGINEERING & INSPECTION SERVICES
FOR THE COATING INDUSTRY

780 Lafayette Rd.
Medina, OH 44256
Telephone: (330)983-0062
Fax: (330)725-0512

COST SUMMARY:

Exterior repaint with containment	$170,000
Wet interior repaint	190,000
Cathodic protection	25,000
Foundation repairs	15,000
Install duck bill valve and splash pad	12,000
Install a 30-inch sidewall manway	9,000
Install (2) 30" roof hatches	11,000
Remove wet interior ladder	2,000
Sidewall patch plates	25,000
Install a pressure vacuum vent	7,000
Install exterior ladder w/fall prevention device	6,000
Install a Step off platform	10,000
Fill pipe deflector bars	500
Contingency for interior steel repairs	80,000
Pit Welding	15,000
Sub Total	$577,500
Engineering and Contingencies	$100,000
Total	$677,500

Notes: Due to the condition of the tank it may be more cost beneficial to build a new ground storage tank to take the place of this tank.

If you have any questions or concerns, please call me at (330) 983-0062 ext. 402.

Thank you for choosing DIXON for your inspection needs.

STEEL TANK FIELD INSPECTION REPORT

RESERVOIR

DATE: **8/14/2023**

OWNER: **Venango County- Reno Tank(Emergency Inspection for Aqua PA**

TANK NAME: **Reno Tank**

LOCATION: Address/Cross Streets: **41-25'20.5"N, 79-45'52.2W**
City: **Sugarcreek**
State: **PA**

TANK SIZE: Capacity: **400,000 gallons**
Diameter: **54 feet 0 inches *(measured)***
Overflow (HWL):**22 feet 0 inches *(measured)***
Sidewall height: **24 feet 0 inches *(measured)***

CONSTRUCTION: ☒ **Welded** ☐ **Riveted** ☐ **Bolted**
Type: ☒ **Reservoir** ☐ **Standpipe**
Type of roof: ☐ **Hemisphere** ☒ **Flat** ☐ **Aluminum geodesic dome**

YEAR CONSTRUCTED: ☒**Unknown**

USE: ☐ **Fire protection only** ☒ **Potable water and fire protection**

Exterior coating sample taken for type: ☐ **Yes** ☐ **No**

Coating information below is from: ☐ **Owner *personnel/specifications/email***
☐ **Dixon *specifications/project*** ☐ **Exterior coating sample taken for type**

COATING HISTORY	EXTERIOR	WET INTERIOR	DRY INTERIOR
YEAR COATED	**Unknown**	**Unknown**	**N/A**

PERSONNEL: Lead inspector **Shannon C. Vidika**

METHOD OF INSPECTION: ☒ **Visual** ☐ **Dive** ☐ **ROV** ☐ **Float**

SITE CONDITIONS

Fenced: ☐ **Yes** ☒ **No**
Site large enough for contractor's equipment: ☐ **Yes** ☐ **No**
Control building: ☐ **Yes** ☒ **No**
Antenna control site: ☐ **Yes** ☒ **No**
Number: ☐ **1** ☐ **2**
Type: ☐ **Building** ☐ **Platform**
Would antenna sites interfere with containment: ☐ **Yes** ☒ **No**
Power lines within 50 feet: ☐ **Yes (estimated distance feet)** ☒ **No**
Are power lines attached to the structure: ☐ **Yes** ☒ **No**
Would power lines interfere with containment: ☐ **Yes** ☒ **No**
Site drainage: ☐ **Toward tank** ☒ **Away from tank**
Indications of underground leakage: ☒ **Yes** ☐ **No**
Vegetation, tree, etc. encroachment: ☒ **Yes** ☐ **No**
Rubbing on the tank: ☒ **Yes** ☐ **No**
Would there be interference with future containment: ☐ **Yes** ☒ **No**
Site comments: **Tank is located in the woods on a hill. Access may be difficult for contractors' equipment.**

EXPOSED PIPING:

☒ **N/A**

FOUNDATION

Foundation exposed: ☒ **Yes** ☐ **No**
Exposed height: **0-6 inches**
Exposed foundation condition: ☐ **Good** ☐ **Fair** ☒ **Poor**
Damage or deterioration: ☒ **Yes** ☐ **No**
Type of damage: ☐ **Cracks** ☒ **Spalls/chips** ☒ **Exposed aggregate**
Severity: ☐ **Minor** ☐ **Moderate** ☒ **Severe**
Crack location: ☐ **At the anchor bolts** ☒ **Random**
Total spall area: **50 sq. feet (50 sq. feet need repair)**
Foundation coated: ☐ **Yes** ☒ **No** ☐ **Top only**
Type of baseplate gap filler: ☐ **Grout** ☐ **Caulk** ☐ **Felt pad** ☒ **None**
Undermining of foundation: ☒ **Yes** ☐ **No**
Foundation comments: **It appears the foundation may have shifted in areas. Large areas of spalling are present.**

EXTERIOR COATING

Sidewall:

Lettering: ☐ **Yes** ☒ **No**
Logo: ☐ **Yes** ☒ **No**
Topcoat condition: ☐ **Good** ☐ **Fair** ☒ **Poor**
Previous coat/system condition: ☐ **Good** ☐ **Fair** ☒ **Poor**
Describe coating: ☐ **Fading** ☐ **Delaminating** ☐ **Spot coating failures to substrate** ☒ **Rust undercutting** ☒ **Erosion** ☐ **Rust bleedthrough** ☐ **Micro-cracking** ☐ **Clear coat failures** ☐ **No significant coating deterioration**
Dry film thickness: **1-3 mils**
Panel connections: ☒ **Welded** ☐ **Riveted** ☐ **Bolted and**
Metal condition: ☐ **Good** ☐ **Fair** ☒ **Poor**
Bottom shell steel thickness: **0.14-0.26 inches**
Sidewall comments: **Approximately 20% coating remains. The coating appears to be an aluminum topcoat. The sidewall has about (100) areas that have been plugged from previous leaks.**

Roof:

Topcoat condition: ☐ **Good** ☐ **Fair** ☒ **Poor**
Previous coat/system condition: ☐ **Good** ☐ **Fair** ☒ **Poor**
Describe coating: ☐ **Fading** ☐ **Delaminating** ☐ **Spot coating failures to substrate** ☒ **Rust undercutting** ☒ **Erosion** ☐ **Rust bleedthrough** ☐ **Micro-cracking** ☐ **Clear coat failures** ☐ **No significant coating deterioration**
Dry film thickness: **1-2 mils**
Metal condition: ☐ **Good** ☒ **Fair** ☐ **Poor**
Roof comments: **10% coating remains on the roof. Erosion is present.**

EXTERIOR APPURTENANCES

Sidewall Manway:

Size: **24 inches**
Cover attachment: ☐ **Hinged** ☐ **Davit arm** ☒ **Bolts**
Metal condition: ☐ **Good** ☒ **Fair** ☐ **Poor**

Anchor Bolts:

☒ **N/A**

Overflow Pipe:

Diameter: **6 inches**

EXTERIOR APPURTENANCES

Metal condition: ☐ **Good** ☒ **Fair** ☐ **Poor**
Discharge orientation: ☐ **Horizontal** ☒ **Vertical** ☐ **Angle**
Screen condition: ☐ **Good** ☒ **Fair** ☐ **Poor** ☐ **None present**
Percent of screen open: ☒ **100**
Flap gate/Duck bill check valve: ☐ **Yes** ☒ **No**
Air gap: ☒ **Yes** ☐ **No**
Lowest part of discharge to the ground distance: **12 inches**
Overflow discharges to: ☐ **Concrete splash pad** ☐ **Catch basin with drain** ☐ **Riprap** ☐ **Funnel** ☒ **Ground** ☐ **Routes underground**
Condition: ☐ **Good** ☒ **Fair** ☐ **Poor**

Drain Valve:

Number: ☒ **1** ☐ **2**
Type: ☐ **Babco** ☐ **Shand & Jurs** ☒ **Unknown**
Functioning properly: ☐ **Yes** ☐ **No** ☒ **Not used during inspection**
Metal condition: ☒ **Good** ☐ **Fair** ☐ **Poor**
Mud valve comments: **Located at the bottom of the tank sidewall. Valve is a 6" inch.**

Sidewall Ladder:

☐ **N/A**
Height to start of ladder: **0 feet.**
Toe clearance: ☐ **Less than 7 inches** ☒ **7 inches or greater**
Width of rungs: ☒ **16+ inches** ☐ **Less than 16 inches**
Thickness of rungs: ☐ **½** ☒ **⅝** ☐ **¾** **inch**
Shape of rungs: ☐ **Diamond** ☒ **Round** ☐ **Rebar**
Metal condition: ☐ **Good** ☒ **Fair** ☐ **Poor**
Fall prevention device: ☐ **Yes** ☒ **No**
Cage: ☒ **Yes** ☐ **No**
Vandal guard: ☐ **Yes** ☒ **No**

WET INTERIOR COATING

Roof:

Topcoat condition: ☐ **Good** ☐ **Fair** ☒ **Poor**
Primer coating condition: ☐ **Good** ☐ **Fair** ☒ **Poor**
Describe coating: ☐ **Delaminating** ☐ **Spot coating failures to substrate** ☒ **Rust undercutting** ☐ **Rust bleedthrough** ☐ **Blisters** ☐ **Weld burns** ☒ **No coating remaining**
Metal condition: ☐ **Good** ☐ **Fair** ☐ **Poor**
Roof comments: **Only visual as the tank still had around 6' feet of water.**

Sidewall:

Topcoat condition: ☐ **Good** ☐ **Fair** ☒ **Poor**
Primer coating condition: ☐ **Good** ☐ **Fair** ☒ **Poor**
Describe coating: ☐ **Delaminating** ☐ **Spot coating failures to substrate** ☒ **Rust undercutting** ☐ **Rust bleedthrough** ☐ **Blisters** ☐ **Erosion/abrasion** ☒ **No coating remaining**
Mineral deposits: ☐ **Light** ☒ **Moderate** ☐ **Heavy**
Metal condition: ☐ **Good** ☐ **Fair** ☒ **Poor**
Active pitting: ☒ **Yes** ☐ **No**
Panel connections: ☒ **Welded** ☐ **Riveted** ☐ **Bolted**
Sidewall comments: **Sidewalls only visual inspected from roof hatch**

Floor:

☒ **Not inspected**

WET INTERIOR APPURTENANCES

Ladder:

Toe clearance: ☒ **Less than 7 inches** ☐ **7 inches or greater**

WET INTERIOR APPURTENANCES

Width of rungs: ☒ **16+ inches** ☐ **Less than 16 inches**
Thickness of rungs: ☐ **½** ☒ **⅝** ☐ **¾** **inch**
Shape of rungs: ☐ **Diamond** ☒ **Round** ☐ **Rebar**
Shape of side rails: ☒ **Flat** ☐ **Angle** ☐ **Channel**
Metal condition: ☐ **Good** ☐ **Fair** ☒ **Poor - steel loss**
Fall prevention device: ☐ **Yes** ☒ **No**
Ladder comments: **Ladder unsafe due to severely corroded.**

Cathodic Protection:

☒ **N/A**

Roof Stiffeners:

☐ **N/A**
Orientation: ☒ **Radial** ☐ **Radial with support ring** ☐ **Transverse**
Metal condition: ☐ **Good** ☒ **Fair** ☐ **Poor**
Roof stiffener comments: **Unable to inspect all roof stiffeners.**

Sidewall Stiffener/Painter's Railing:

☒ **N/A**

Column:

Center column shape: ☒ **Round** ☐ **Back-to-side channel** ☐ **Square**
Column comments: **Unable to determine condition.**

Overflow Pipe Inlet:

Overflow comments: **Unknown**

Fill Pipe:

Fill pipe comments: **Unknown**

Separate Draw Pipe:

Draw pipe comments: **Unknown**

Drain Pipe:

Drainpipe comments: **Valve located on exterior at bottom of sidewall.**

Mixer:

☒ **N/A**

Field Inspection Report is prepared from the contractor's viewpoint. It contains information the contractor needs to prepare his bid for any repair or recoating. The engineer uses it to prepare the engineering report. Cost estimates are more accurate if the contractor's problems can be anticipated. While prepared from the contractor's viewpoint, the only intended beneficiary is the owner. These reports are completed with diligence, but the accuracy is not guaranteed. The contractor is still advised to visit the site.

RECOMMENDATIONS:

COATINGS:

Exterior: ☐ **No work** ☒ **ABC & repaint** ☐ **HPWC & overcoat**
☐ **Recaulk Panels (glass lined)** ☐ **Recaulk Aluminum dome**

Wet Interior: ☐ **No work** ☒ **Full ABC & repaint** ☐ **Roof ABC and repaint**
☐ **Caulk lap seams** ☒ **Pit filling** ☐ **Recaulk Panels (glass lined)**

REPAIRS:

Foundation:

☒ ***Spall/Crack*** **repair**

Health:
- ☐ **No work**
- ☐ **Weld cathodic protection caps**
- ☐ **Modify overflow discharge**
- ☒ **Overflow duck bill valve**
- ☐ **Replace/install overflow screen**
- ☒ **Install overflow splash pad**
- ☒ **Pressure vacuum vent**
- ☒ **Wet interior roof hatch replacement**
- ☒ **Wet interior roof hatch gasket**

Safety:
- ☐ **No work**
- ☐ **Roof handrail**
- ☐ **Painter's railing**
- ☐ **Painter's railing supports at butt welds**
- ☒ **Roof rigging couplings**
- ☒ **Replace sidewall ladder with fall prevention**
- ☒ **Vandal guard**
- ☒ **Wet interior ladder replacement**
- ☒ **Step-off platform**
- ☒ **Swing gate**
- ☒ **30 inch sidewall manway**
- ☒ **Fill/draw pipe deflector bars**

Misc.:
- ☐ **No work**
- ☐ **Trim trees/shrubs**
- ☐ **Cathodic protection system**
- ☒ **Cathodic clips and pressure fitting**
- ☒ **Roof stiffener repair**
- ☒ **Center column top support replacement**

- ☐ **Mechanical mixer**
- ☐ **Install/Replace sample tap**
- ☐ **Chemical feed coupling**
- ☐ **Remove level indicator**
- ☒ **Weld patch plates on the roof/sidewall**
- ☒ **Pit welding**
- ☐ **Sump pump in the pit**
- ☐ **Replace/verify operation of aviation lights**
- ☐ **Light fixtures**
- ☐ **Antenna relocation/modification**

DRINKING WATER PROBLEM CORRECTED
IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

ESTE INFORME CONTIENE INFORMACIÓN IMPORTANTE ACERCA DE SU AGUA POTABLE. HAGA QUE ALGUIEN LO TRADUZCA PARA USTED, O HABLE CON ALGUIEN QUE LO ENTIENDA.

As a customer of Venango Water Company, you were notified on July 20th and August 12th, 2023, of a problem with the drinking water and were advised to discontinue drinking the water.

We are pleased to report that the problem has been corrected and that you can now resume drinking the water.

What should I do?

As a precaution, Aqua recommends customers flush any plumbing fixtures used for consumptive purposes that have not been regularly used by briefly running the water for 30 seconds prior to drinking the water. Please flush only one fixture at a time. Also, we recommend that the ice from automatic ice machines be discarded.

What Happened?

The potentially contaminated source of water supply was removed from service and will remain that way until it is determined safe to return to service. Aqua supplemented drinking water from its Aqua Pennsylvania Emlenton water system as permitted by PADEP and by supplying bottled water. Aqua coordinated with PA DEP and performed comprehensive water sampling and water main flushing across the system. The latest water sample results confirm compliance with drinking water regulatory standards.

If you have any questions, please visit: https://www.aquawater.com/venango.php

Customer Service: 877.987.2782

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by *Aqua Pennsylvania, Inc on behalf of Venango Water Company.*

COMMONWEALTH OF PENNSYLVANIA
DEPARTMENT OF ENVIRONMENTAL PROTECTION

IN THE MATTER OF:

Petro Erie, Inc.	:	Clean Streams Law,
7395 Market Road	:	Land Recycling Act,
Fairview, PA 16415	:	Oil and Gas Act, and Solid
	:	Waste Management Act

ORDER

Now this 16th day of August 2023, the Commonwealth of Pennsylvania, Department of Environmental Protection ("Department") has made and determined the following Findings and hereby issues this Order to Petro Erie, Inc.

FINDINGS

A. The Department is the agency with the duty to administer and implement the Land Recycling and Environmental Remediation Standards Act, Act of May 19, 1995, *as amended*, 35 P.S. §§ 6026.101-6026.908 ("Land Recycling Act"); and to administer and enforce The Clean Streams Law, Act of June 22, 1937, P.L. 1987, *as amended,* 35 P.S. §§ 691.1-691.1001 ("Clean Streams Law"); the Oil and Gas Act, Act of February 14, 2012, P.L. 87, No. 13, 58 Pa. C.S. §§ 3201-3274 ("Oil and Gas Act"); the Pennsylvania Safe Drinking Water Act, Act of May 1, 1984, P.L. 206, *as amended*, 35 P.S. §§ 721.1-721.17 ("Safe Drinking Water Act"); the Solid Waste Management Act, Act of July 7, 1980, P.L. 380, *as amended*, 35 P.S. §§ 6018.101-6018.1003 ("Solid Waste Management Act"); Section 1917-A of the Administrative Code of 1929, Act of April 9, 1929, P.L. 177, *as amended,* 71 P.S. § 510-17 ("Administrative Code"); and the rules and regulations promulgated thereunder ("Regulations").

B. Petro Erie, Inc. is a Pennsylvania domestic business corporation that engages in various oil and gas exploration and production activities in Pennsylvania and maintains a registered business address of 7395 Market Road, Fairview, PA 16415 ("Petro Erie").

C. Petro Erie is the permitted operator of 14 oil and/or gas wells located in Sugarcreek Township, Venango County, which are the subject of this Order (collectively, the "Petro Erie Wells"). A list of the Petro Erie Wells by permit number, well name and number, and municipality and county where each well is located is attached and incorporated herein as Exhibit A.

D. Some of the Petro Erie Wells are served by a tank battery, which consists of two 210-barrel steel storage tanks and four 100-barrel polyethylene storage tanks that are situated within secondary containment ("Tank Battery").

Unpermitted Discharge of Residual Waste to Ground

E. On July 20, 2023, the Department inspected the Tank Battery in response to a complaint of a suspected release of oil and gas production fluids. During this inspection, the Department observed that the Tank Battery's secondary containment drain valve was open and brine and/or other production fluids were draining out of the secondary containment area and onto the ground.

F. On July 21, 2023, the Department inspected the Tank Battery and observed:

1. brine and/or other production fluids were dripping from a pipeline between two of the polyethylene storage tanks in the Tank Battery;

2. the Tank Battery's secondary containment drain valve was open and brine and/or other production fluids were draining out of the secondary containment area and onto the ground;

3. the flow path of the discharged brine and/or other production fluids extended approximately 180 feet from the Tank Battery's secondary containment drain valve and ranged from approximately 6 to 20 feet in width ("Impacted Area"); and

4. dead and discolored vegetation was located within the Impacted Area.

G. A map depicting the approximate surface boundaries of the Impacted Area is attached and incorporated herein as Exhibit B.

H. On July 21, 2023, following the Department's inspection, the Department issued an administrative order requiring cleanup and remediation of the spill and/or release to Petro Erie ("Field Order"). A true and correct copy of the Field Order is attached and incorporated herein as Exhibit C.

I. The Field Order required Petro Erie to, among other things:

1. immediately cease and desist the discharge of a regulated substance onto the ground and/or into the waters of the Commonwealth;

2. immediately contain the released regulated substance;

3. immediately prevent any further migration of the regulated substance from the site of the release;

4. immediately prevent the regulated substance from continuing to reach or further impacting surface water or groundwater; and

5. immediately notify downstream users that a release of the regulated substance occurred.

J. Neither Petro Erie, nor any other person or entity, had or has a permit or authorization from the Department to dispose of residual waste onto the ground or into the waters of the Commonwealth.

Water Resources

K. Venango Water Company is a registered Pennsylvania corporation that maintains a mailing address of 91 Brook Street, P.O. Box 397, Reno, PA 16343.

L. Venango Water Company owns and operated a public water supply (PWSID No. 6610014) located in Sugarcreek Borough, Venango County ("Water Supply").

M. The Water Supply has multiple raw water sources, including a collection of springs that flow into two separate cisterns. The Bellows Spring consists of four springs that are piped from the springs' sources to one of those cisterns ("Bellows Spring"). The Shaffer Spring consists of four springs that are piped from the springs' sources to the other cistern ("Shaffer Spring").

N. After receiving treatment at their respective treatment plants, the treated water from the Shaffer Spring and Bellows Spring flows to a common distribution system that consists of a 400,000-gallon storage tank and serves approximately 214 residential and commercial service connections, and a population of approximately 550 customers located within the Village of Reno and the municipality of Sugarcreek Borough.

O. On October 8, 2014, water samples were collected from the Bellows Spring and the Shaffer Spring ("2014 Water Samples").

P. The Tank Battery is located approximately 0.5 miles upgradient of the Bellows Spring cistern.

Q. On or about July 20, 2023, Venango Water Company turned off the Bellows Spring source in response to dirty water complaints from its customers.

R. On July 20, 2023, Venango Water Company notified the Department of the suspected contamination of the Bellows Spring, and the Department requested that Venango Water Company issue a Tier 1 public notice in the form of a "Do Not Consume Advisory" to its customers and request that its customers voluntarily conserve water.

S. On July 21, 2023, the Department collected samples from the Tank Battery and the Bellows Spring cistern.

T. On July 24, 2023, the Department collected samples from the Tank Battery, the Bellows Spring cistern, and the Shaffer Spring cistern.

U. On July 31, 2023, the Department collected samples from the Bellows Spring cistern and the Shaffer Spring cistern.

V. On August 3 and 7, 2023, the Department collected samples from the Tank Battery, and from each of the individual four springs that flow into the Bellows Spring cistern. In addition, on August 7, 2023, the Department collected samples from entry point number 132 of the Water Supply.

W. On August 14, 2023, the Department collected samples from each of the individual four springs that flow into the Bellows Spring cistern and from the Bellows Spring cistern.

X. The samples collected by the Department from the Bellows Spring cistern on the dates identified in Paragraphs S through U, above, are hereinafter collectively referred to as the "Department's Bellows Spring Samples."

Y. The Department's Bellows Spring Samples were analyzed by a laboratory, and those analytical results detected the following parameters at concentrations above their respective Maximum Contaminant Levels ("MCLs"): total dissolved solids ("TDS"), chloride, manganese, and aluminum.

Z. Aluminum, barium, magnesium, manganese, chloride, TDS, sodium, and zinc were also detected in the Department's Bellows Spring Samples at concentrations higher than they were detected in the 2014 Water Samples.

AA. The brine and/or other production fluids discharged from the Tank Battery, as described in Paragraphs E and F, above, impacted the Bellows Spring and affected the quality of the water supplying the Water Supply.

BB. Aqua Pennsylvania, Inc. ("Aqua PA") is a Pennsylvania registered corporation with a mailing address of 762 Lancaster Avenue, Bryn Mawr, PA 19010.

CC. On August 11, 2023, the Pennsylvania Public Utility Commission ("PUC") issued an Ex Parte Emergency Order directing Aqua PA to act as a receiver for Venango Water Company beginning August 12, 2023 to operate the Water Supply, and continuing during the pendency of the PUC's proceedings initiated pursuant to Section 529 of the Public Utility Code, 66 Pa. C.S. § 529.

DD. As of the date of this Order, Petro Erie has not submitted to the Department a plan to permanently restore or replace the Water Supply.

July 24, 2023 Inspection of Petro Erie Wells

EE. On July 24, 2023, the Department inspected the Petro Erie Wells and observed:

1. crude oil, brine, and/or production fluids discharged directly to the ground at the Lower Reno 19 well (Permit No. 121-45441) ("Lower Reno 19 Impacted Area");

2. the Lower Reno 6 well (Permit No. 121-45433) ("Lower Reno 6 Well") was spud on or about August 12, 2014, but no well record has been filed with the Department;

3. there was no production tubing head or surface casing head installed on the Lower Reno 6 Well; there was no observable cement to surface associated with any surface casing string; and the conductor pipe was neither installed by driving the conductor pipe nor was the conductor pipe cemented to surface thereby creating the potential for groundwater impacts from the infiltration of groundwater and/or production fluids to the uncemented casing strings and well bore;

4. annual production reports had not been submitted to the Department for any of the Petro Erie Wells for the 2022 reporting year;

5. mechanical integrity assessment reports had not been submitted to the Department for any of the Petro Erie Wells for the 2022 reporting year;

6. the permit number and operator's name, address, and telephone number were not posted at any of the Petro Erie Wells; and

7. at eight of the Petro Erie Wells, there was equipment onsite that is no longer necessary for the operation of the wells. A list of these eight wells, by permit number, and well name and number, is attached and incorporated herein as Exhibit D (collectively, the "Wells with Unnecessary Equipment").

Applicable Law

FF. Petro Erie is the "owner" and "operator," as those terms are defined in Section 3203 of the Oil and Gas Act, 58 Pa. C.S. § 3203, of the Petro Erie Wells.

GG. Petro Erie is a "person," as that term is defined in Section 3203 of the Oil and Gas Act, 58 Pa. C.S. § 3203; Section 103 of the Solid Waste Management Act, 35 P.S § 6018.103; and Section 1 of the Clean Streams Law, 35 P.S. § 691.1.

HH. The crude oil, brine, and/or other production fluids described in Paragraphs E, F, and EE.1., above, are "residual wastes" and "solid wastes," as those terms are defined in Section 103 of the Solid Waste Management Act, 35 P.S § 6018.103.

II. The depositing of a solid waste on the ground as identified in Paragraphs E, F, and EE.1, above, constitutes "disposal" as that term is defined in Section 103 of the Solid Waste Management Act, 35 P.S. § 6018.103, and 25 Pa. Code § 287.1

JJ. Pursuant to Section 301 of the Solid Waste Management Act, 35 P.S. § 6018.301, no person shall dispose of residual waste within this Commonwealth unless such disposal is authorized by the rules and regulations of the Department.

KK. Pursuant to Section 302 of the Solid Waste Management Act, 35 P.S. § 6018.302, it is unlawful for any person to dispose or permit the disposal of any residual waste in a manner which is contrary to the rules and regulations of the Department.

LL. Pursuant to Section 610 of the Solid Waste Management Act, 35 P.S. § 6018.610, it is unlawful for any person to dump or deposit, or permit the dumping or depositing, of any solid waste

on the surface of the ground by any means, unless a permit for the dumping of such solid waste has been obtained from the Department.

MM. Pursuant to Section 3217(a) of the Oil and Gas Act, to aid in the protection of fresh groundwater, well operators shall control and dispose of brines produced from the drilling, alteration, or operation of an oil or gas well in a manner consistent with the Clean Streams Law, 35 P.S. §§ 691.1-691.1001, or any regulation promulgated under the Clean Streams Law.

NN. Pursuant to 25 Pa. Code § 78.54, a well operator shall control and dispose of fluids, residual waste, and drill cuttings, including top-hole water, brines, drilling fluids, drilling muds, stimulation fluids, well servicing fluids, oil, production fluids, and drill cuttings in a manner that prevents pollution of the waters of this Commonwealth and in accordance with 25 Pa. Code §§ 78.55-78.58 and 78.60-78.63 and with the statutes under which the Regulations are promulgated.

OO. Pursuant to 25 Pa. Code § 78.57(a), unless a permit has been obtained under 25 Pa. Code § 78.60(a) (relating to discharge requirements), the operator shall collect the brine and other fluids produced during operation, service, and plugging of the well in a tank, pit, or a series of pits or tanks, or other device approved by the Department for subsequent disposal or reuse.

PP. Pursuant to 25 Pa. Code § 78.64(d), drainage of containment facilities around oil tanks is acceptable only if: (1) the accumulation in the containment facility consists of only precipitation directly to the containment facility and drainage will not cause a harmful discharge or result in a sheen; and (2) the containment drain valve is opened and resealed, or other drainage procedure, as applicable, is conducted under responsible supervision.

QQ. Pursuant to 25 Pa. Code § 78.66(a), a release of a substance causing or threatening pollution of the waters of this Commonwealth shall comply with the reporting and corrective action requirements of 25 Pa. Code § 91.33 (relating to incidents causing or threatening pollution).

RR. Pursuant to 25 Pa. Code § 91.33(a), if, because of an accident or other activity or incident, a toxic substance or another substance which would result in pollution or create a danger of pollution of the waters is placed so that it might discharge, flow, be washed, or fall into these waters, it is the responsibility of the person at the time in charge of the substance or owning or in possession of the premises, facility, vehicle, or vessel from or on which the substance is discharged or placed to immediately notify the Department by telephone of the location and nature of the danger.

SS. Pursuant to 25 Pa. Code § 91.33(b), a person shall immediately take steps necessary to prevent injury to property and downstream users of the waters of the Commonwealth from pollution or a danger of pollution and, in addition thereto, within 15 days from the incident, shall remove from the ground and from the affected waters of this Commonwealth to the extent required by this title the residual substances contained thereon or therein.

TT. Pursuant to 25 Pa. Code §§ 78.66(b) and (c), if a reportable release of brine on or into the ground occurs at the well site, the owner or operator shall notify the Department as soon as practicable by telephone, but no later than two hours after detecting or discovering the release.

UU. Pursuant to 25 Pa. Code § 78.66(e), upon the occurrence of any release, the owner or operator shall take necessary corrective actions to prevent the substance from reaching the waters of this Commonwealth, recover or remove the substance which was released, and dispose of the substance in accordance with this subchapter or as approved by the Department.

VV. The Bellows Spring is "waters of the Commonwealth," as defined by Section 1 of the Clean Streams Law, 35 P.S. § 691.1.

WW. The brine and/or production fluids described in Paragraphs E and F, above, are "industrial wastes" and "pollution," as those terms are defined in Section 1 of the Clean Streams Law, 35 P.S. § 691.1

XX. Pursuant to Section 307 of the Clean Streams Law, 35 P.S. § 691.307(a), no person shall discharge or permit the discharge of industrial wastes in any manner, directly or indirectly, into any of the waters of the Commonwealth unless such discharge is authorized by the rules and regulations of the Department or such person has first obtained a permit from the Department.

YY. Pursuant to Section 402 of the Clean Streams Law, 35 P.S. § 691.402, it is unlawful for any person or municipality to put or place into any of the waters of the Commonwealth, or allow or permit to be discharged from property owned or occupied by such person or municipality into any of the waters of the Commonwealth, any substance of any kind or character that could potentially result in pollution of the waters of the Commonwealth.

ZZ. Pursuant to 25 Pa. Code § 78.73(b), an operator shall prevent brine and any other fluids or materials from below the casing seat from entering fresh groundwater and shall otherwise prevent pollution or diminution of fresh groundwater.

AAA. The Water Supply is a "system," as defined by 25 Pa. Code § 109.1, and a "public water system" and a "community water system," as those terms are defined in Section 3 of the Safe Drinking Water Act, 35 P.S. § 721.3, and 25 Pa. Code § 109.1.

BBB. Pursuant to Section 3218(a) of the Oil and Gas Act, 58 Pa. C.S. § 3218(a), and 25 Pa. Code § 78.51(a), a well operator who affects a public water supply by pollution shall restore or replace the affected supply with an alternate source of water adequate in quantity and quality for the purpose served by the water supply.

CCC. Pursuant to 25 Pa. Code § 78.82(2), if the operator installs conductor pipe in the well, the conductor pipe shall be installed in a manner that prevents subsurface infiltration of surface water or fluids by either driving the pipe into place or cementing the pipe form the seat to the surface.

DDD. Pursuant to 25 Pa. Code § 78.83b(a), if cement used to permanently cement the surface casing is not circulated to the surface despite pumping a volume of cement equal to or greater than 120% of the calculated annular space, the operator shall determine the top of the cement, notify the Department, and meet at least one of the additional requirements set forth in 25 Pa Code 78.83b(a)(1)-(5).

EEE. Pursuant to Section 3211(g) of the Oil and Gas Act, 58 Pa. C.S. § 3211(g), the well permit number and operator's name, address, and telephone number shall be conspicuously posted at the well site during site preparation, construction of the well site, and during drilling, operating or alteration of the well.

FFF. Pursuant to 25 Pa. Code § 78.88(e), a well operator shall submit an annual report to the Department identifying the compliance status of each well with the mechanical integrity requirements of the Regulations.

GGG. Pursuant to Section 3222(a) of the Oil and Gas Act, 58 Pa. C.S. § 3222(a), and 25 Pa. Code § 78.121(a), a well operator shall file with the Department an annual report on or before February 15th of each year specifying the amount of production on the most well-specific basis available, along with the status of each well.

HHH. Pursuant to Section 3222(b)(1) of the Oil and Gas Act, 58 Pa. C.S. § 3222(b)(1), and 25 Pa. Code § 78.122(a), a well operator shall maintain a record of each well drilled or altered and shall submit that report to the Department within 30 after the drilling of the well.

III. Pursuant to Section 3216(c) of the Oil and Gas Act, 58 Pa. C.S. § 3216(c), a well operator shall fill all pits used to contain produced fluids or industrial wastes and remove unnecessary drilling supplies/equipment not needed for production within nine months from completion of drilling of the well.

Violations

JJJ. Petro Erie's unpermitted and unauthorized disposal of brine and/or production fluids to the ground at the Impacted Area, as described in Paragraphs E, F.1., and F.2., above, violates Sections 301, 302(a), and 610 of the Solid Waste Management Act, 35 P.S. §§ 6018.301, 6018.302(a), and 6018.610(4), and 25 Pa. Code §§ 78.54 and 78.57(a).

KKK. Petro Erie's unpermitted and unauthorized disposal of crude oil, brine, and/or production fluids to the ground at the Lower Reno 19 Impacted Area, as described in Paragraph EE.1, above, violates Sections 301, 302(a), and 610 of the Solid Waste Management Act, 35 P.S. §§ 6018.301, 6018.302(a), and 6018.610(4), and 25 Pa. Code § 78.57(a).

LLL. Petro Erie's drainage of accumulation in the Tank Battery's secondary containment that did not consist of only precipitation, which caused a harmful discharge or resulted in a sheen and was not done under proper supervision, as described in Paragraphs E and F.2., above, violates 25 Pa. Code § 78.64(d).

MMM. Petro Erie's failure to notify the Department of the release of brine and/or other production fluids to the ground at the Impacted Area and the release of crude oil, brine, and/or production fluids to the ground at the Lower Reno 19 Impacted Area, as described in Paragraphs E, F, and EE.1., above, violates 25 Pa. Code §§ 78.66(a), (b), and (c).

NNN. Petro Erie's failure to notify the Department of the release of brine and/or other production fluids to the ground at the Impacted Area and the Lower Reno 19 Impacted Area, as described in Paragraphs E, F, and EE.1., above, and its failure to remove the solid waste from the ground and affected waters of the Commonwealth within 15 days from the incident violates 25 Pa. Code §§ 91.33(a) and (b).

OOO. Petro Erie's failure to take necessary corrective actions to prevent the brine and/or other production fluids that were released to the ground at the Impacted Area from reaching the

waters of this Commonwealth and its failure to recover or remove and dispose of those substances in accordance with the Regulations, as described in Paragraphs E and F, above, and its failure to recover or remove and dispose of the crude oil, brine, and/or production fluids at the Lower Reno 19 Impacted Area in accordance with the Regulations, as described in Paragraph EE.1, above, violates 25 Pa. Code § 78.66(e).

PPP. Petro Erie's failure to control and dispose of brine from an oil and gas well, as described in Paragraphs E, F, and EE.1, above, violates Section 3217(a) of the Oil and Gas Act, 58 Pa. C.S. § 3217(a).

QQQ. Petro Erie's unauthorized and unpermitted discharge of industrial wastes into the waters of the Commonwealth, as described in Paragraphs E and F, above, violates Sections 307 and 402 of the Clean Streams Law, 35 P.S. §§ 691.307(a) and 691.402, and 25 Pa. Code § 78.73(b).

RRR. Petro Erie's failure to install conductor pipe in the Lower Reno 6 Well in a manner that prevents subsurface infiltration of surface water or fluids, as described in Paragraph EE.3., above, violates 25 Pa. Code § 78.82(c).

SSS. Petro Erie's failure to meet one of the additional requirements set forth in 25 Pa Code §§ 78.83b(a)(1)-(5) after failing to circulate cement to the surface on the surface casing for the Lower Reno 6 Well, as described in Paragraph EE.3., above, violates 25 Pa. Code § 78.83b(a).

TTT. Petro Erie's failure to submit Annual Production Reports for the Petro Erie Wells, specifying the amount of production during the 2022 reporting year, as identified in Paragraph EE.4., above, violates 25 Pa. Code § 78.121(a).

UUU. Petro Erie's failure to submit Mechanical Integrity Assessment Reports for the Petro Erie Wells during the 2022 reporting year, as identified in Paragraph EE.5., above, violates 25 Pa. Code § 78.88(e).

VVV. Petro Erie's failure to submit a well record within 30 days after the drilling of the Lower Reno 6 Well, as identified in Paragraph EE.2., above, violates Section 3222(b) of the Oil and Gas Act, 58 Pa. C.S. § 3222(b), and 25 Pa. Code § 78.122(a).

WWW. Petro Erie's failure to post the well permit number and the operator's name, address, and telephone number at each of the Petro Erie Wells, as identified in Paragraph EE.6., above, violates Section 3211(g) of the Oil and Gas Act, 58 Pa. C.S. § 3211(g).

XXX. Petro Erie's failure to remove unnecessary drilling supplies/equipment not needed for production within nine months from completion of drilling of the Wells with Unnecessary Equipment, as identified in Paragraph EE.7., above, violates Section 3216(c) of the Oil and Gas Act, 58 Pa. C.S. § 3216(c).

YYY. The violations described in Paragraphs JJJ through MMM and OOO through XXX, above, constitute unlawful conduct pursuant to Section 3259 of the Oil and Gas Act, 58 Pa. C.S. § 3259; a public nuisance pursuant to Section 3252 of the Oil and Gas Act, 58 Pa. C.S. § 3252; and subject Petro Erie to civil penalty liability pursuant to Section 3256 of the Oil and Gas Act, 58 Pa. C.S. § 3256.

ZZZ. The violations described in Paragraphs NNN and QQQ, above, constitute unlawful conduct pursuant to Section 611 of the Clean Streams Law, 35 P.S. § 691.611; a statutory nuisance under Section 307(c) of the Clean Streams Law, 35 P.S. § 691.307(c); and subject Petro Erie to civil penalty liability pursuant to Section 605 of the Clean Streams Law, 35 P.S. § 691.605.

AAAA. The violations described in Paragraphs JJJ and KKK, above, constitute unlawful conduct under Sections 302 and 610 of the Solid Waste Management Act, 35 P.S. §§ 6018.302 and 6018.610; a statutory nuisance under Section 601 of the Solid Waste Management Act, 35 P.S. § 6018.601; and subject Petro Erie to civil liability under Section 605 of the Solid Waste Management Act, 35 P.S. § 6018.605.

BBBB. On July 21 and July 24, 2023, the Department sent Notices of Violation to Petro Erie for some of the violations described in Paragraphs JJJ through XXX, above.

CCCC. As of the date of this Order, Petro Erie has not corrected the violations identified in Paragraphs JJJ through XXX, above, nor has it demonstrated remediation of the release of brine and/or other production fluids at the Impacted Area or the release of crude oil, brine, and/or other production fluids at the Lower Reno 19 Impacted Area.

ORDER

NOW, THEREFORE, pursuant to Sections 3218 and 3253 of the Oil and Gas Act, 58 Pa. C.S. §§ 3218 and 3253; Section 5 of the Clean Streams Law, 35 P.S. § 691.5; Section 602 of the Solid Waste Management Act 35 P.S. § 6018.602; and Section 1917-A of the Administrative Code, 71 P.S. § 510-17, the Department hereby ORDERS Petro Erie to do the following:

1. ***Temporary Water Supply.*** Within **24 hours** after the receipt of this Order, Petro Erie shall: (1) provide a temporary supply of potable water (*e.g.*, bottled water) to the users of the Water Supply ("Temporary Water"); and (2) confirm in writing to the Department that it has provided Temporary Water to the users of the Water Supply. Petro Erie shall continue to provide Temporary Water to the users of the Water Supply as long as the "Do Not Consume Advisory," refenced in Paragraph R, above, remains in effect. After the "Do Not Consume Advisory" is lifted, Petro Erie shall continue to provide Temporary Water to any user(s) of the Water Supply who continues to request it until Petro Erie has restored or replaced the Bellows Spring, in accordance with the requirements of Paragraph 2, below. Notwithstanding the above, if the "Do Not Consume Advisory" is reinstated prior to the Bellows Spring being restored or replaced in accordance with the requirements of Paragraph 2, below, then Petro Erie shall resume providing Temporary Water to the users of the Water Supply as long as the "Do Not Consume Advisory" remains in effect.

2. ***Permanent Water Supply.*** Within **45 days**, after the date of this Order, Petro Erie shall provide a plan to restore or replace the quantity and quality of water provided by the Bellows Spring ("Restoration or Replacement Plan"). The Restoration or Replacement Plan shall include the following:

a. proposed corrective actions to permanently restore or replace the Bellows Spring, in accordance with Section 3218(a) of the Oil and Gas Act, 58 Pa. C.S. § 3218(a), and 25 Pa. Code § 78.51(d);

b. a proposed schedule to implement the corrective actions;

c. the independent laboratory, certified by the Department, that Petro Erie will use to analyze samples from the restored or replaced water supply;

d. a schedule for confirmatory sampling of the restored or replaced water supply after Petro Erie asserts that it has permanently restored or replaced the Bellows Spring. Such samples will be used to determine whether the restored and/or replaced water supply meets the standards set forth in Section 3218(a) of the Oil and Gas Act, 58 Pa. C.S. § 3218(a), and 25 Pa. Code § 78.51. The confirmatory sampling schedule should allow: for split samples with the Department; and that sampling would only take place Monday through Thursday during Department working hours and with prior advance notice to the Department before any scheduled sampling of the restored and/or replaced water supply.

e. proposed arrangements between Petro Erie and Venango Water Company and/or Aqua PA to provide for all plumbing, conveyance, pumping, or auxiliary facilities necessary for the use of the permanently restored or replaced water supply.

f. proposed arrangements between Petro Erie and Venango Water Company and/or Aqua PA documenting how Petro Erie will: (1) reimburse Venango Water Company and/or Aqua PA for any increased operating and maintenance costs incurred by Venango Water Company

and/or Aqua PA resulting from the implementation of all temporary and/or interim measures needed to provide adequate quantity and quality water for the purposes served by the Water Supply; and (2) compensate Venango Water Company and/or Aqua PA on a permanent basis for any increased operating and maintenance costs for the replaced or restored water supply.

g. if any of the actions required by Paragraphs 2.a. through 2.f., above, have been completed, the Restoration or Replacement Plan shall include a description of how and when those items were completed.

3. ***Remediation of Impacted Area and Lower Reno 19 Impacted Area.*** Petro Erie shall address the discharges and disposal of brine and/or other production fluids at the Impacted Area and the discharges and disposal of crude oil, brine, and/or other production fluids at the Lower Reno 19 Impacted Area by demonstrating attainment of one or a combination of remediation standards under the Land Recycling Act in accordance with the following:

a. within **30 days** after the date of this Order, Petro Erie shall submit to the Department, at the address identified in Paragraph 12 (Correspondence with the Department), below, for review and approval, a written plan for addressing the release of brine and/or other production fluids at the Impacted Area and the release of crude oil, brine, and/or other production fluids at the Lower Reno 19 Impacted Area, as well as a schedule for implementing the remediation at the Impacted Area and the Lower Reno 19 Impacted Area and submitting a final report demonstrating attainment of one or a combination of remediation standards under Sections 302, 303, and/or 304 of the Land Recycling Act, 35 P.S. §§ 6026.302, 6026.303, and/or 6026.304 by **July 31, 2024** ("Remediation Schedule").

b. upon receipt of the Department's written approval of the Remediation Schedule, Petro Erie shall address the release of brine and/or other production fluids at the Impacted Area and the release of crude oil, brine, and/or other production fluids at the Lower Reno 19 Impacted Area in accordance with the Department-approved Remediation Schedule, the Land

Recycling Act, and this Order.

4. ***Lower Reno 6 Well Integrity.***

a. Within **30 days** after the date of this Order, Petro Erie shall submit to the Department, at the address identified in Paragraph 12 (Correspondence with the Department), below, for review and approval, a written plan that identifies corrective actions addressing how Petro Erie will: (1) permanently restrict surface water from the well bore of the Lower Reno 6 Well; and (2) satisfy the requirements of 25 Pa. Code §§ 78.83b(a)(1)-(5) ("Well Bore Plan"). The Well Bore Plan shall also include an implementation schedule for implementing the corrective actions identified in the Well Bore Plan.

b. Upon receipt of the Department's written approval of the Well Bore Plan, Petro Erie shall implement the corrective actions contained in the Department-approved Well Bore Plan in accordance with the Department-approved implementation schedule.

5. ***Well Record for Lower Reno 6 Well.*** Within **30 days** after the date of this Order, Petro Erie shall complete and submit to the Department, at the address identified in Paragraph 12 (Correspondence with the Department), below, Department Form 8000-FM-OOGM0004a, "Well Record," in accordance with Section 3222(b) of the Oil and Gas Act, 58 Pa. C.S. § 3222(b), and 25 Pa. Code § 78.122(a).

6. ***Annual Production Reports.***

a. On or before **October 31, 2023**, Petro Erie shall submit annual production and status reports for the Petro Erie Wells for the time period from January 1 through December 31, 2022.

b. On or before **February 15, 2024**, and on or before February 15th of every year thereafter, Petro Erie shall submit production and status reports for the Petro Erie Wells for the previous reporting year.

c. The annual production and status reports shall be submitted electronically through the Department's web site and shall include, at a minimum, the amount of production for the Petro Erie Wells and all other information require under 25 Pa. Code § 78.121 on the most well-specific basis available.

7. ***Mechanical Integrity Assessment.***

a. On or before **October 31, 2023**, Petro Erie shall inspect and test the integrity of the Petro Erie Wells, in accordance with 25 Pa. Code § 78.88.

b. On or before **February 15, 2024**, Petro Erie shall complete and submit the Department Form 8000-FM-OOGM0126, "Quarterly Mechanical Integrity Assessment of Operating Oil and Gas Wells," for the Petro Erie Wells, in accordance with 25 Pa. Code § 78.88.

8. ***Posting of Operator Information.*** Within **30 days** after the date of this Order, Petro Erie shall post the well permit number and the operator's name, address, and telephone number in a conspicuous manner at the Petro Erie Wells in accordance with Section 3211(g) of the Oil and Gas Act, 58 Pa. C.S. § 3211(g).

9. ***Removal of Unnecessary Equipment.*** On or before **October 31, 2023**, Petro Erie shall remove drilling supplies/equipment not needed for production from the Wells with Unnecessary Equipment identified in Exhibit D.

10. ***Document Review and Approval by the Department.*** With regard to any document that Petro Erie is required to submit pursuant to this Order, the Department will review such document and will approve or disapprove the document or portion thereof, in writing. If the document, or any portion thereof, is disapproved by the Department, Petro Erie shall submit to the Department a revised document that addresses the Department's identified concerns within a reasonable time, as specified by the Department. The Department will approve, or modify and approve, the revised document in writing. Upon the Department's approval of a document, or any

portion thereof, such approved document, including any identified corrective action and schedule contained therein, shall become an obligation of this Order and shall be enforceable as such.

11. ***Replacement of Field Order.*** This Order replaces Petro Erie's obligations under the Field Order but does not replace the Findings of the Field Order.

12. ***Correspondence with the Department.*** All correspondence with the Department regarding this Order shall be addressed to:

Robert Bechtel
Environmental Group Manager
Northwest District Oil and Gas Operations Department of Environmental Protection 230 Chestnut Street
Meadville, PA 16335
Telephone: (814) 573-3610
E-Mail: robechtel@pa.gov

Any person aggrieved by this action may appeal the action to the Environmental Hearing Board ("Board") pursuant to Section 4 of the Environmental Hearing Board Act, 35 P.S. § 7514, and the Administrative Agency Law, 2 Pa. C.S. Chapter 5A. The Board's address is:

Environmental Hearing Board
Rachel Carson State Office Building, Second Floor
400 Market Street
P.O. Box 8457
Harrisburg, PA 17105-8457

TDD users may contact the Environmental Hearing Board through the Pennsylvania Relay Service, 800-654-5984.

Appeals must be filed with the Board within 30 days of receipt of notice of this action unless the appropriate statute provides a different time. This paragraph does not, in and of itself, create any right of appeal beyond that permitted by applicable statutes and decisional law.

A Notice of Appeal form and the Board's rules of practice and procedure may be obtained online at http://ehb.courtapps.com or by contacting the Secretary to the Board at 717-787-3483. The Notice of Appeal form and the Board's rules are also available in braille and on audiotape from the

Secretary to the Board.

IMPORTANT LEGAL RIGHTS ARE AT STAKE. YOU SHOULD SHOW THIS DOCUMENT TO A LAWYER AT ONCE. IF YOU CANNOT AFFORD A LAWYER, YOU MAY QUALIFY FOR FREE PRO BONO REPRESENTATION. CALL THE SECRETARY TO THE BOARD AT 717-787-3483 FOR MORE INFORMATION. YOU DO NOT NEED A LAWYER TO FILE A NOTICE OF APPEAL WITH THE BOARD.

IF YOU WANT TO CHALLENGE THIS ACTION, YOUR APPEAL MUST BE FILED WITH AND RECEIVED BY THE BOARD WITHIN 30 DAYS OF RECEIPT OF NOTICE OF THIS ACTION.

ORDER REQUIRING CLEANUP AND REMEDIATION OF A SPILL(S) AND/OR RELEASE(S)

DEP DOCKET NUMBER:			
PERSON(S) SUBJECT TO ORDER: Petro Erie Inc	**PHONE NO.:** 814-881-9800	**EMAIL:** lemp@verlocity.net	
ADDRESS OF PERSON(S) SUBJECT TO ORDER: 7395 Market Rd. Fairview, PA 16415-2826		**MUNICIPALITY:** Sugarcreek	
PROJECT NAME/SITE ID/FACILITY NUMBER/Location of Violation(s):	**COUNTY:** Venango	**GPS COORDINATES:** 41.42808 -79.76825	
PERMIT NO(S).: 121-454133 Lower Reno 6		**DATE OF INSPECTION:** 7/21/2023	**TIME OF INSPECTION:** (A.M.) P.M. 8:00
NAME AND TITLE OF RECEIVING OFFICIAL:			

The Department of Environmental Protection (Department) is the agency with the duty and authority to administer the Land Recycling and Environmental Remediation Standards Act, Act of May 19, 1995, P.L. 4, 35, 35 P.S. §§ 6026.101-6026.908 (Act 2); and to administer and enforce the Oil and Gas Act, Act of February 14, 2012, P.L. 87, No. 13, 58 Pa. C.S §§ 3201-3274 (2012 Oil and Gas Act); the Solid Waste Management Act, Act of May 1, 1984, P.L. 206, as amended, 35 P.S. §§ 6018.101-6018.1003 (Solid Waste Management Act); The Clean Streams Law, Act of June 22, 1937, P.L. 1987, as amended, 35 P.S. §§ 691.1-691.1001 (Clean Streams Law); Section 1917-A of the Administrative Code of 1929, Act of April 9, 1929, P.L. 177, as amended, 71 P.S. §510-17 (Administrative Code); and the rules and regulations promulgated thereunder.

The undersigned authorized representative of the Department has conducted an inspection of the above location on the above date and has determined that the violation(s) listed in this Order has/have occurred. This Order applies when a spill(s), discharge(s), disposal, and/or release(s) (hereinafter collectively "spill(s) or release(s)") of substances creates "pollution" and/or a danger of "pollution" to "Waters of the Commonwealth" as those terms are defined in Section 1 of the Clean Streams Law, 35 P.S. § 691.1.

Hereinafter the term "regulated substance(s)" as used in this Order shall have the same meaning as "regulated substance" as that term is defined in section 103 of Act 2, 35 P.S. § 6026.103. The regulated substance(s) that has/have been spilled or released to the ground and/or the waters of the Commonwealth as identified in this Order is/are also a "residual waste" as that term is defined in Section 103 of the Solid Waste Management Act, 35 P.S. § 6018.103, and an "industrial waste," as that term is defined in Section 1 of the Clean Streams Law, 35 P.S. § 691.1.

If applicable, each well permit issued for the well(s) identified at the location above contains the following two conditions: (1) "This permit and the permittee's authority to conduct the activities authorized by this permit are conditioned upon operator's compliance with applicable law and regulations"; and (2) "This permit does not relieve the operator from the obligation to comply with the Clean Streams Law and all statutes, rules and regulations administered by the Department.

The violation(s) identified in this Order constitutes a violation/violations, as applicable, of the well permit issued for the well(s) identified above at the location; constitutes unlawful conduct pursuant to Section 3259 of the 2012 Oil and Gas Act, 58 Pa. C.S. § 3259, Section 611 of the Clean Streams Law, 35 P.S. § 691.611, and Section 302 of the Solid Waste Management Act, 35 P.S. § 6018.302; a statutory nuisance under Section 3252 of the 2012 Oil and Gas Act, 58 P.S. § 3252, Sections 307(c) and/or 402(b) of the Clean Streams Law, 35 P.S. §§ 691.307(c) and/or 402(b), and Section 601 of the Solid Waste Management Act, 35 P.S. § 6018.601; and subjects the Person(s) identified in this Order to a claim for civil penalties under Section 3256 of the 2012 Oil and Gas Act, 58 Pa. C.S § 3256, Section 605 of the Clean Streams Law, 35 P.S. § 691.605, and Section 605 of the Solid Waste Management Act, 35 P.S. § 6018.605.

8000-FM-OOGM0130 7/2015

Project Name/Site ID/Facility Number: Lower Reno 6
Permit No.: 121-454133

Pursuant to Section 3253 of the 2012 Oil and Gas Act 58 Pa. C.S § 3253, Section 610 of the Clean Streams Law 35 P.S. § 691.610, Section 602 of the Solid Waste Management Act 35 P.S. § 6018.602; and Section 1917-A of the Administrative Code 71 P.S. § 510-17, the Department hereby ORDERS that the Person(s) Subject to this Order shall perform the corrective actions listed in this Order. Nothing contained in this Order shall be construed to relieve or limit the obligations of the above mentioned persons, including, but not limited to, the "well operator" as that term is defined in Section 3203 of the 2012 Oil and Gas Act, 58 Pa. C.S § 3203, of any well/project/site/facility/location included in this Order to comply with the terms and conditions of any permit, if applicable, existing or hereafter issued by the Department to the operator, or to limit any civil or criminal liability of the person. Additional requirements may be imposed in the future by subsequent Department orders or other actions.

Joint and Several Responsibility (As Applicable): The Persons Subject to this Order as identified above are jointly and severally responsible for the obligations under this Order.

VIOLATIONS

☒ **UNAUTHORIZED SPILL(S) OR RELEASE(S) OF REGULATED SUBSTANCE(S) TO WATERS OF THE COMMONWEALTH OR TO GROUND CREATING A POTENTIAL FOR POLLUTION OF WATERS OF THE COMMONWEALTH:**

☒ SPILL OR RELEASE OF PRODUCTION FLUIDS FROM TANK OR PIT in violation of Section 3259 of the 2012 Oil and Gas Act (58 Pa. C.S. § 3259), Sections 307,401, and/or 402(b) of the Clean Streams Law (35 P.S. §§ 691.307, 691.401, and 691.402(b)), Section 301 of the Solid Waste Management Act (35 P.S. § 6018.301), and 25 Pa. Code §§ 78.54, 78.57(a), 78.60(a), 91.33, and/or 91.34.

☒ SPILL(S) OR RELEASE(S) OF REGULATED SUBSTANCE(S) FROM TANK OR PIT in violation of Section 3259 of the 2012 Oil and Gas Act, 58 Pa. C.S § 3259, Sections 307, and 401, of the Clean Streams Law, 35 P.S. §§ 691.307 and ,691.401, Section 301 of the Solid Waste Management Act, 35 P.S. § 6018.301, 25 Pa. Code §§ 78.54, 78.56, 78.60(a), 91.33, and/or 91.34, and/or the conditions in the permit(s) for the well(s).

☐ SPILL(S) OR RELEASE(S) OF REGULATED SUBSTANCE(S) FROM WELLHEAD in violation of Section 3259 of the 2012 Oil and Gas Act, 58 Pa. C.S § 3259 , Sections 307 and, 401, of the Clean Streams Law, 35 P.S. §§ 691.307 and, 691.401, Section 301 of the Solid Waste Management Act, 35 P.S. § 6018.301, 25 Pa. Code §§ 78.54, 78.56,78.60(a), 91.33, and/or the conditions in the permit(s) for the well(s).

☒ OTHER SPILL(S) OR RELEASE(S) OF REGULATED SUBSTANCE(S) ON THE WELL SITE OR ACCESS ROAD in violation of Section 3259 of the 2012 Oil and Gas Act, 58 Pa. C.S § 3259, Sections 307, and 401, of the Clean Streams Law, 35 P.S. §§ 691.307 and, 691.401, and Section 301 of the Solid Waste Management Act, 35 P.S. §6018.301, 25 Pa. Code §§ 78.54,78.60(a), 91.33, and/or the conditions in the permit(s) for the well(s).

☐ SPILL(S) OR RELEASE(S) OF REGULATED SUBSTANCE(S) FROM PIPELINE in violation of Sections 307, and 401, of the Clean Streams Law, 35 P.S. §§ 691.307, and 691.401, and Section 301 of the Solid Waste Management Act, 35 P.S. § 6018.301, 25 Pa. Code § 91.33, and/or the conditions in the permit(s) for the well(s).

☒ FAILURE TO HAVE SECONDARY CONTAINMENT AROUND OIL TANK(S) WITH A CAPACITY OF AT LEAST 660 GALLONS OR A COMBINED CAPACITY OF 1,320 GALLONS in violation of 25 Pa. Code §§ 78.64 and 91.34, and the conditions in the permit(s) for the well(s).

☐ FAILURE TO HAVE SUFFICIENT CONTAINMENT CAPACITY AROUND REGULATED SUBSTANCE STORAGE TANK(S) THAT ARE NOT EQUIPPED WITH INDIVIDUAL SECONDARY CONTAINMENT AT AN UNCONVENTIAL WELL SITE in violation of Section 3218.2(d) of the 2012 Oil and Gas Act, 58 Pa. C.S § 3218.2(d), and the conditions in the permit(s) for the well(s).

☒ FAILURE TO REPORT A RELEASE OF A REGULATED SUBSTANCE in violation of 25 Pa. Code §§ 78.66, and 91.33, and/or the conditions in the permit(s) for the well(s).

DESCRIPTION OF VIOLATIONS

On 7/20/2023, the Department received a complaint of a release from a tank battery located approximately 0.75 miles north of the Venango Water PWSID:6610014. The Department responded to the site and observed production fluids (Brine) leaking from a tank battery secondary containment 75 feet northeast of the lower Reno 6 oil well (121-45433). This well is currently listed as "proposed but never materialized" in the Department's tracking system, but the well exists and appears to have been drilled in 2013-2014.

The Department returned on 7/21/2023, to inspect the area and take additional samples. Production fluids were observed inside and outside containment. A visually impacted area was observed stretching 180 feet south of the secondary containment drain valve and spread from 6 feet to 20 feet in width. Production fluids were observed running out of the open drain valve at the time of inspection. The valve was closed to prevent further release. Conductivity readings were taken around the entire area. Reading exceeding the limits of the meter were recorded, in excess of 20,000 Micro Siemens. Samples were collected from a spring near the impacted area, which is a raw water source for a public water supply.

CORRECTIVE ACTION REQUIRED OR ACTIVITY TO BE CEASED:

☒ Immediately cease the spill(s) or release(s) of regulated substance(s) onto the ground and/or into the waters of the Commonwealth described above.

☒ Immediately contain spilled or released regulated substance(s).

☒ Immediately prevent migration of the regulated substance(s) from the site of the spill or release. If the regulated substance(s) have already migrated from the site of the spill or release, immediately prevent any further migration of the regulated substance from the site of the spill or release.

☒ Immediately prevent the regulated substance(s) from reaching or impacting surface water or groundwater. If the regulated substance(s) have already reached or impacted surface water or groundwater, immediately prevent the regulated substance(s) from continuing to reach or from further impacting surface water or groundwater.

☒ Immediately notify downstream users that a spill or release of the regulated substance(s) occurred.

☐ Within _____ days, submit to the Department, in writing, a report which details the cause and duration of each violation and the corrective action taken to prevent its recurrence.

☐ Within _____ days, submit to the Department a copy of a site specific Control and Disposal Plan that meets the requirements of 25 Pa. Code Chapter 78.

☐ Within _____ days, remove all regulated substance(s) from the tank(s) and/or pit(s) described above and properly dispose of all of the regulated substance(s) at a permitted disposal/recycling facility in accordance with the Solid Waste Management Act, the Clean Streams Law, the 2012 Oil and Gas Act, and the Regulations.

☐ Within _____ days, submit receipts and/or other applicable documentation to the Department to verify that the regulated substance(s) was/were removed from the tank(s) and/or pit(s) described above and disposed of at a permitted treatment facility in accordance with the Solid Waste Management Act, the Clean Streams Law, the 2012 Oil and Gas Act, and the Regulations.

☐ Investigate and remediate the contamination from the spill(s) or release(s) of regulated substance(s) pursuant to applicable provisions of Act 2 and its Regulations and this Order, as follows:

Within ten days, hire a qualified environmental consultant to investigate and remediate the soil, groundwater, surface water, wetlands, and/or sediments that was/were contaminated by the spill or release of regulated substance(s), and simultaneously submit to the Department, in writing, the name, address, and telephone number of such consultant;

Within 60 days, submit to the Department a written plan to investigate and remediate the soil, groundwater, surface water, wetlands, and/or sediments that was/were contaminated by the spill or release of regulated substance(s) ("Remediation Plan"). The Remediation Plan shall, at a minimum: (1) be prepared and submitted by the qualified environmental consultant hired in accordance with this order; (2) include a complete, written Notice of Intent to Remediate the contaminated soil and groundwater that complies with all of the requirements of 25 Pa. Code § 250.5(a); (3) include a summary of the interim remedial actions that have been completed to date to contain the spill or release of regulated substance(s), and the plan and schedule for continuing these interim remedial actions until the final, Department-approved remedial actions have been completed in accordance with this Order; (4) include a schedule for completing the remedial actions and for submitting the reports required to demonstrate attainment with the chosen remediation standard in accordance with the requirements of 25 Pa. Code §§250.2(b)(1) and 250.2(b)(2); and (5) identify the date when all disturbed areas will be completely restored and re-vegetated;

☐ White – Receiving Official ☐ Yellow – DEP, DOGO ☐ Pink – Department Representative

Project Name/Site ID/Facility Number: Lower Reno 6
Permit No.: 121-454133

Upon receipt of the Department's written approval of the Remediation Plan or revised Remediation Plan, and in accordance with the Department-approved schedule, investigate and remediate the soil, groundwater, surface water, wetlands, and/or sediments that was/were contaminated by the spill or release of regulated substance(s) in accordance with the Department-approved Remediation Plan;

Submit "Progress Reports" to the Department on a quarterly basis. The Progress Reports shall be due by the 30th day of the month following each calendar quarter (*i.e.* April 30, July 30, October 30, and January 30), and describe the actions taken in the previous quarter to comply with the requirements of this Order, including the requirements in plans or other documents approved by the Department under this Order; and

Take any and all actions necessary to obtain access to any property necessary to comply with the obligations under this Order.

☐ Additional Requirements:

CORRESPONDENCE WITH THE DEPARTMENT:

All correspondence with the Department concerning this Order shall be addressed to:
Robert Bechtel Env. Group Manager District of Oil & Gas Operations
230 Chestnut St
Meadville PA 16335 (814) 573-3610
email: robechtel@pa.gov

DOCUMENT REVIEW AND APPROVAL BY THE DEPARTMENT:

With regard to the Remediation Plan and any other document submitted pursuant to the requirements of this Order, the Department will review the document and will approve, approve with modification(s), or disapprove the document, or portion thereof, in writing. If the document, or any portion thereof, is disapproved by the Department, a revised document shall be submitted to the Department that addresses the Department's concern within a reasonable time, as specified by the Department. The Department will approve, modify and approve, or disapprove the revised document in writing. Upon approval by the Department, the document, including the schedules identified in the document, shall become a part of this Order for all purposes and shall be enforceable as such.

APPEAL NOTICE

Any person aggrieved by this action may appeal, pursuant to Section 4 of the Environmental Hearing Board Act, 35 P.S. § 7514, and the Administrative Agency Law, 2 Pa. C.S. Chapter 5A, to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P.O. Box 8457, Harrisburg, PA 17105-8457, 717-787-3483. TDD users may contact the Board through the Pennsylvania Relay Service, 800-654-5984. Appeals must be filed with the Environmental Hearing Board within 30 days of receipt of written notice of this action unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of Practice and Procedure may be obtained from the Board. The appeal form and the Board's rules of Practice and Procedure are also available in Braille or on audiotape from the Secretary to the Board at 717-787-3483. This paragraph does not, in and of itself, create any right of appeal beyond that permitted by applicable statutes and decisional law.

IF YOU WANT TO CHALLENGE THIS ACTION, YOUR APPEAL MUST REACH THE BOARD WITHIN 30 DAYS. YOU DO NOT NEED A LAWYER TO FILE AN APPEAL WITH THE BOARD.

IMPORTANT LEGAL RIGHTS ARE AT STAKE, HOWEVER, SO YOU SHOULD SHOW THIS DOCUMENT TO A LAWYER AT ONCE. IF YOU CANNOT AFFORD A LAWYER, YOU MAY QUALIFY FOR FREE PRO BONO REPRESENTATION. CALL THE SECRETARY TO THE BOARD (717-787-3483).

AQUA PENNSYLVANIA, INC.

RECEIVER FOR

VENANGO WATER COMPANY

Dear Venango Water Customer,

Aqua Pennsylvania, Inc. ("Aqua") has been operating the Venango Water Company ("VWC") as Receiver as ordered by the Pennsylvania Public Utility Commission ("PUC") since August 12, 2023.

Our work to date

Aqua worked diligently since taking over as Receiver to lift the Do Not Consume that had been in place since July 21, 2023. Actions included stabilizing the VWC system to ensure there was adequate water supply for sanitary purposes, trucking water from Aqua's Emlenton water system to fill the VWC tank and for flushing purposes, and testing and sampling throughout the distribution system and source to ensure the water meets DEP drinking water regulations. On September 1, 2023, Aqua provided notice to the VWC customers that the Do Not Consume was lifted after consultation and approval of the Pennsylvania Department of Environmental Protection ("DEP").

Aqua will now continue operating the system under the PUC's Order until a determination is made by the PUC under the Section 529 of the Public Utility Code, 66 Pa. C.S. § 529 ("529 Proceeding"). The 529 Proceeding will determine whether a capable public utility should acquire the VWC system.

Next Steps for Customers

Under the PUC's Order, Aqua is required to assume the customer service, billing and collections functions of VWC.

Customer Service

With Aqua, you have access to our U.S.-based, state-of-the-art customer service call centers:

- Our representatives are available to assist with your service and billing needs Monday through Friday between 8 a.m. and 5 p.m. at **877.987.2782**.
- For emergencies outside of these hours, you can call **877.987.2782** and the issue will be addressed promptly by our operations team.
- We also provide updates and resources to our customers through Facebook, Twitter and Instagram. You can follow us at @MyAquaWater.

Billing & Payment

Enclosed is Aqua's first bill to the VWC customers, which has been estimated based on prior consumption history. Aqua will work to reconcile this estimated read with later actual readings in future billings to VWC customers. Customers may review their rights as it pertains to estimated billings under 52 Pa. Code § 56.12. Your base rates will not change while the 529 proceeding is conducted. Aqua will continue to bill you in accordance with the VWC tariff which can be found on Aqua's website at https://www.aquawater.com/_assets/doc/venango-water-co-tariff-no-3-effective-11-15-2018.pdf.

When it comes to paying your bill, Aqua has several payment options for customers:

- You may mail your payment to:
  Aqua
  P.O. Box 70279
  Philadelphia, PA 19176-0279

- Aqua e-billing, which allows you to pay your bill online and receive an electronic bill.

- If you use direct debit to autopay your current bill or a bill-payer service from your bank account, you must take the following steps once you receive your first Aqua bill that has your account number – please allow appropriate time to follow this process and for your bank to make the change:
  - **Change the payee designation to Aqua Pennsylvania**
  - Update the payee account number to your new 16-digit account number on your enclosed bill.
  - Change the mailing address for the payment to the remittance address on your Aqua bill.

- Learn much more about bill payment options at https://www.aquawater.com/customers/pay-my-bill/index.php

We look forward to serving you while we operate the VWC system.

Re: Venango Water Company – Ex Parte Emergency Order Naming Aqua Pennsylvania, Inc. as Receiver
Docket No. M-2023-3042180

Section 529 Investigation of Venango Water Company
Docket No. I-2023-3042312

Dear Secretary Chiavetta:

Enclosed please find Aqua Pennsylvania, Inc.'s ("Aqua") Second Status Report to the Pennsylvania Public Utility Commission ("PUC" or the "Commission") in accordance with Aqua's Receivership duties for the Venango Water Company established via the Commission's Ex Parte Emergency Order Entered August 11, 2023, Ordering Paragraph 4, Appendix A Paragraph 1.o., in Docket No. M-2023-3042180, and ratified by the Commission's Ratification Order Entered August 24, 2023. This status report is being filed in both the M-Docket and I-Docket referenced above.

If you have any questions regarding this filing, please contact me at 610-645-1130.

Sincerely,

Alexander R. Stahl
Regulatory Counsel

SECOND STATUS REPORT TO THE

PENNSYLVANIA PUBLIC UTILITY COMMISSION

VENANGO WATER COMPANY

AQUA PENNSYLVANIA, INC., AS RECEIVER

DOCKET NO. M-2023-3042180

DOCKET NO. I-2023-3042312

Dated: January 9, 2024

A. BACKGROUND

On August 11, 2023, the Pennsylvania Public Utility Commission ("PUC" or the "Commission") issued an Ex Parte Emergency Order at Docket No. M-2023-3042180 ("Receivership Order") naming Aqua Pennsylvania, Inc. ("Aqua" or the "Company") as Receiver for the Venango Water Company ("VWC").[1] The VWC system serves approximately 215 customers and is comprised of two spring sources (Bellows and Shaffer Springs), one storage tank, and approximately 7 miles of mains. The Receivership Order was ratified by the Commission through its Ratification Order entered on August 24, 2023. Aqua was directed to assume its Receivership role on August 12, 2023. Included within the Commission's Receivership Order, the Company was directed to "[s]ubmit an initial status report to the Commission within 60 days of assuming operations and then quarterly thereafter to detail any relevant updates pursuant to duties and responsibilities assigned through receivership."[2] Aqua submitted its Initial Status Report on October 11, 2023.

Aqua now submits its Second Status Report ("Status Report") on the operations of VWC as directed by the Commission.

B. SECOND STATUS REPORT

1. Financial

The Receivership Order directed Aqua to establish the financial position of VWC at the time Aqua assumed its Receivership role.[3] Aqua is working to establish the financial position of VWC as of the start of Aqua's Receivership, however, Aqua does not have access to all financial records of VWC. VWC has previously submitted Class C Annual Reports to the Commission which includes financial and operational data, the most recent of which was submitted on June 30, 2023 and available on the Commission's website.[4] Aqua will continue to track expenses and capital improvements related to the VWC system through deferred accounting treatment via establishment of a regulatory asset in accordance with Aqua's Receivership duties.[5]

Aqua and the Pennsylvania Infrastructure Investment Authority ("PENNVEST") have discussed funding opportunities for construction of a pipeline that would deliver water from the City of Franklin, Venango County, and for the construction of a new water storage tank. PENNVEST provided options for this project including an Aqua loan, a Venango loan or a White Knight Program loan. PENNVEST indicated that a grant would not likely be offered due to the higher median income of Sugar Creek Borough. The White Knight program would afford an opportunity for low-interest loan, but Aqua would have to commit at least $650,000 and Aqua would have to produce a letter of intent to own the VWC's assets. Ownership of the VWC system will ultimately be determined by the Commission through this Section 529 proceeding.

---

[5] Receivership Order, Ordering Paragraph 4, Appendix A Paragraphs 1.s and 2.b.

2. Operations and Capital Expenditures

On August 12, 2023, Aqua began its Receivership duties for the VWC system. Since the Initial Status Report, Aqua has completed the following improvements to the VWC system:

i. Installed winterization on the temporary water storage tank and booster station used for hauling water.

ii. Began leak detection in the system to address water loss, and Aqua will be continuing leak detection efforts.

iii. Removed above ground chlorine contact tanks at Shaffer Spring.

iv. Purchased utility task vehicle in order to access the VWC spring sources.

v. Water hauling reduced from once or twice a week to once every 2-3 weeks.

In November 2023, Aqua met with the City of Franklin's Council to discuss options of a bulk water agreement. The City Council indicated it would make a decision on availability of water and present its terms after January 1, 2024. The City's decision regarding provision of water to VWC will be key to the ultimate conclusion of the current situation as a pipeline from the City of Franklin would provide a permanent alternate source of drinking water for VWC customers.

Aqua is developing a recommended capital plan for the VWC system and will provide recommendations on capital improvements in a subsequent status report.[6] Along with the capital plan Aqua will be providing a breakdown of costs incurred during the Receivership in a future status report.

Since the First Status Report, Aqua received one Notice of Violation ("NOV") regarding payment of the Chapter 302 Operator Certification Service Fee, included as **Attachment A**. However, this NOV was due to a timing issue of payment arriving during the holidays and when the list of NOVs was generated. This NOV has been resolved with DEP.

Aqua was informed by the Rhodes family that they intended to cease providing operations service to the remaining systems owned by the Blaine Edwin Rhodes Estate ("Rhodes Utilities") effective December 31, 2023.[7] Aqua was subsequently informed that the Rhodes family intended to continue its current operations until a resolution can be reached. On January 3, 2024, the Commission's Bureau of Investigation and Enforcement ("I&E") filed a Petition requesting the

[6] Id. Ordering Paragraph 4, Appendix A Paragraph 1.c.

[7] In addition to VWC, systems owned by the Blaine Edwin Rhodes Estate include Sugarcreek Water Company, West Hickory Water Company, Plumer Water Company, Fryburg Water Company, Cooperstown Water Company, and Blaine E. Rhodes Sewer Company.

Commission open a 529 proceeding regarding the Rhodes Utilities.[8] Aqua is currently reviewing I&E's petition.

As Aqua continues to operate the VWC system to ensure compliance with the Receivership Order, Aqua will make improvements necessary to provide quality and reliable service. Aqua will have further information on operational issues in later reports.

C. CONCLUSION

Aqua will continue to investigate the system's operations and financial status and will make necessary improvements to operate the VWC system to ensure quality service to the VWC customers for the period of its Receivership duties during the 529 proceeding. Aqua will provide an update to this Status Report on or before April 8, 2024.

DEPARTMENT OF ENVIRONMENTAL PROTECTION

January 4, 2024

NOTICE OF VIOLATION

VENANGO WATER CO
PO BOX 397
RENO PA 16343-0397

Dear Permittee:

On July 1, 2023, the Department of Environmental Protection (DEP) issued an Available Operator Report (AOR) for completion, and an invoice for payment of Chapter 302 Water and Wastewater Operator Certification Program annual service fees under the authority of 25 Pa. Code §302.1202(b) and §302.202. The details of this invoice are as follows:

Permittee Name:	VENANGO WATER CO
Facility Name:	VENANGO WATER CO
Permit No.:	6610014
Account No.:	739628
Amount Due:	$100
Due Date:	August 31, 2023

Additionally, in October 2023, DEP issued email notice to systems who had not paid the annual fee and provided an extension to the due date. **As of the date of this letter, the Chapter 302 Operator Certification Service Fee has not been paid.** We remind you that failure to pay the annual fee in full and/or failure to submit the AOR constitutes violations of 25 Pa. Code §302.202(c) and 302.1202(b), respectively, and subjects the permittee named above to enforcement action under the Water and Wastewater Systems Operators' Certification Act, 63 P.S. § 1014(c). The Act provides for up to $1,000 per day in civil penalties and up to $1,000 per day in summary criminal penalties for each violation. Each day of continued violation constitutes a separate offense. Continued failure to submit the fee will require an interest payment when the next annual fee invoice is transmitted. Other actions may be pursued such as revocation of your permit and/or referral to the Office of the Attorney General. You should also be aware that this violation is a matter of public record and may be found on DEP's website at www.dep.pa.gov/DATA AND TOOLS/EFACTS.

Please submit the AOR and provide payment within **15 days** from the date of this letter. Otherwise, DEP may use any, and all, enforcement procedures, penalties and remedies afforded under the Water and Wastewater Systems Operators' Certification Act to compel compliance. Checks should be made payable to the "Commonwealth of Pennsylvania." Please include your permit number with all correspondence. The AOR and payment should be mailed to the following address:

ATTN: Chapter 302 Annual Service Fee
PA Department of Environmental Protection
P.O. Box 8467
Harrisburg, PA 17105-8467

This Notice of Violation is neither an order nor any other final action of the Department. It neither imposes nor waives any enforcement action available to the Department under any of its statutes. If the Department determines that an enforcement action is appropriate, you will be notified of the action.

If you have any questions about this notice, you have already submitted the AOR and payment, or would like a re-print of the AOR and Invoice please contact me at lorweaver@pa.gov or 717.772.4056.

Sincerely,

Lori L. Weaver

THIRD STATUS REPORT TO THE

PENNSYLVANIA PUBLIC UTILITY COMMISSION

VENANGO WATER COMPANY

AQUA PENNSYLVANIA, INC., AS RECEIVER

DOCKET NO. M-2023-3042180

DOCKET NO. I-2023-3042312

DOCKET NO. P-2024-3045205

Dated: April 8, 2024

A. BACKGROUND

On August 11, 2023, the Pennsylvania Public Utility Commission ("PUC" or the "Commission") issued an Ex Parte Emergency Order at Docket No. M-2023-3042180 ("Receivership Order") naming Aqua Pennsylvania, Inc. ("Aqua" or the "Company") as Receiver for the Venango Water Company ("VWC").[1] The VWC system serves approximately 215 customers and is comprised of two spring sources (Bellows and Shaffer Springs), one storage tank, and approximately 7 miles of mains. The Receivership Order was ratified by the Commission through its Ratification Order entered on August 24, 2023.[2] Aqua was directed to assume its Receivership role on August 12, 2023. Included within the Commission's Receivership Order, the Company was directed to "[s]ubmit an initial status report to the Commission within 60 days of assuming operations and then quarterly thereafter to detail any relevant updates pursuant to duties and responsibilities assigned through receivership."[3] Aqua submitted its Initial Status Report on October 11, 2023. Aqua submitted its Second Status Report on January 9, 2024

Aqua now submits its Third Status Report ("Status Report") on the operations of VWC as directed by the Commission.

B. THIRD STATUS REPORT

1. Financial

The Receivership Order directed Aqua to establish the financial position of VWC at the time Aqua assumed its Receivership role.[4] Aqua is working to establish the financial position of VWC as of the start of Aqua's Receivership, however, Aqua does not have access to all financial records of VWC. VWC has previously submitted Class C Annual Reports to the Commission which includes financial and operational data, the most recent of which was submitted on June 30, 2023 and available on the Commission's website.[5] Aqua will continue to track expenses and capital improvements related to the VWC system through deferred accounting treatment via establishment of a regulatory asset in accordance with Aqua's Receivership duties.[6]

Aqua and the Pennsylvania Infrastructure Investment Authority ("PENNVEST") have discussed funding opportunities for construction of a pipeline that would deliver finished water from the City of Franklin, Venango County, construction of a new water storage tank and other ancillary system components. PENNVEST provided options for this project including an Aqua loan, a Venango loan or a White Knight Program loan. PENNVEST indicated that a grant would not likely be offered due to the higher median income of Sugar Creek Borough. The White Knight program would afford an opportunity for low-interest loan, but Aqua would have to commit at least $650,000 and Aqua would have to produce a letter of intent to own the VWC's assets.

[1] In re: Venango Water Company, Docket No. M-2023-3042180, Ex Parte Emergency Order, Ordering Paragraph No. 4 (August 11, 2023) (hereinafter "Receivership Order").
[2] Id., Order (August 24, 2023).
[3] Id. Ordering Paragraph No. 4, Appendix A Paragraph 1.o.
[4] Id. Ordering Paragraph 4, Appendix A Paragraph 1.r.
[5] See https://www.puc.pa.gov/pcdocs/1791853.pdf.
[6] Receivership Order, Ordering Paragraph 4, Appendix A Paragraphs 1.s and 2.b.

Ownership of the VWC system will ultimately be determined by the Commission through this Venango 529 Proceeding.

2. Operations and Capital Expenditures

On August 12, 2023, Aqua began its Receivership duties for the VWC system. Since the Second Status Report, Aqua has completed the following improvements to the VWC system:

i. Aqua located the transmission mains from both the Shaffer Spring and the Bellows Spring to the respective well stations. The location of the transmission lines was previously unknown.

ii. Aqua has ceased hauling water during the winter months as the Shaffer Spring was able to supply enough water for customer consumption.

iii. Electrical upgrades were made to the Shaffer Spring Station bringing the building up to electrical code, including installation of a new 200-amp service, 120/240-volt single phase overhead service, new receptacles, and lighting.

iv. A portable generator with extended fuel tank was purchased for the Shaffer Spring disinfection system. This will allow chlorine disinfection in the event of a power outage.

v. The soda ash chemical injection quill, feed lines, and chemical feeder were replaced when the existing chemical feed pump failed. A broken isolation valve in the Shaffer Spring treatment plant was replaced.

In November 2023, Aqua met with the City of Franklin's Council to discuss options concerning a bulk water agreement. The City Council indicated it would make a decision on availability of water and present its terms after January 1, 2024. Aqua is currently negotiating a water supply agreement with the City of Franklin; however, if terms cannot be reached Aqua will evaluate developing a new well in the Reno area.

Aqua is developing a recommended capital plan for the VWC system and will provide recommendations on capital improvements in a subsequent status report, which will be dependent on whether a new well or an interconnection with the City of Franklin is determined to be the source of supply for the VWC system going forward.[7] Also in a future status report, along with the capital plan, Aqua will be providing a breakdown of costs incurred during the Receivership.

Aqua has not received any notices of violation since the last status report.

[7] Id. Ordering Paragraph 4, Appendix A Paragraph 1.c.

3. Other Proceedings

Aqua was informed by the Rhodes family that they intended to cease providing operations service to the remaining systems owned by the Blaine Edwin Rhodes Estate ("Rhodes Utilities") effective December 31, 2023.[8] Aqua was subsequently informed that the Rhodes family intended to continue its current operations until a resolution can be reached. On January 3, 2024, the Commission's Bureau of Investigation and Enforcement ("I&E") filed a Petition requesting the Commission open a 529 proceeding regarding the Rhodes Utilities.[9] On February 15, 2024, I&E filed a Petition to Consolidate the Venango 529 Proceeding with the Rhodes Utilities 529 Proceeding. On March 20, 2024, Administrative Law Judge ("ALJ") Mark J. Hoyer issued the First Interim Order Amending Caption and Consolidating the Section 529 Investigations Of Venango Water Company, Sugar Creek Water Company, West Hickory Water Company, Plumer Water Company, Fryburg Water Company, Cooperstown Water Company, And Blane E. Rhodes Sewer Company, And Ordering Notice To Be Provided To All Customers Of These Utilities Of The Initiation Of A Section 529 Investigation Proceeding In The Same Manner As A Proposed General Rate Increase And Ordering These Utilities To Preserve Records.[10] ALJ Hoyer's First Interim Order consolidated the Venango 529 Proceeding and the Rhodes Utilities 529 Proceeding.

In accordance with the First Interim Order, Aqua provided notice of the Venango 529 Proceeding and the Rhodes Utilities 529 Proceeding in VWC customer bills that were sent on March 29, 2024, a copy of which is included in this Status Report as **Attachment A**.

C. CONCLUSION

Aqua will continue to investigate the VWC system's operations and financial status and will make necessary improvements to operate the VWC system to ensure quality service to the VWC customers for the period of its Receivership duties during the 529 proceeding. Aqua will provide an update to this Status Report on or before July 8, 2024.

[8] In addition to VWC, systems owned by the Blaine Edwin Rhodes Estate include Sugarcreek Water Company, West Hickory Water Company, Plumer Water Company, Fryburg Water Company, Cooperstown Water Company, and Blaine E. Rhodes Sewer Company.

[9] See *Pa. Pub. Util. Comm'n v. The Blane Edwin Rhodes Estate*, Docket No. P-2024-3045205 (Jan. 3, 2024) (hereinafter "Rhodes Utilities 529 Proceeding").

[10] Venango Water Company – Ex Parte Emergency Order Naming Aqua Pennsylvania, Inc. as Receiver; Section 529 Investigation of Venango Water Company; Section 529 Investigation of Sugarcreek Water company, West Hickory Water Company, Plumer Water Company, Fryburg Water Company, Cooperstown Water Company and Blaine E. Rhodes Sewer Company, Docket Nos. M-2023-3042180, I-2023-3042312, and P-2024-3045205 (March 20, 2024). (hereinafter "First Interim Order").

ATTACHMENT A

NOTICE OF SECTION 529 PROCEEDINGS

To Venango Water Company Customers:

The Section 529 Proceedings

Venango Water Company ("VWC") is your water service provider. By Ex Parte Emergency Order entered on August 11, 2023, the Pennsylvania Public Utility Commission ("PUC") named Aqua Pennsylvania, Inc. ("Aqua") as Receiver for the VWC system during the pendency of the investigation instituted under Section 529 of the Public Utility Code, 66 Pa. C.S. § 529 ("VWC 529 Proceeding"). The Docket Numbers for the VWC Proceeding are M-2023-3042180 and I-2023-3042312. Aqua has been operating the VWC system as Receiver since August 12, 2023. Through the VWC 529 Proceeding the PUC will determine whether a capable public utility should acquire VWC.

In addition to the VWC 529 Proceeding, a second Section 529 proceeding has been opened regarding six other utilities under common ownership with VWC – Section 529 Investigation of Sugarcreek Water Company, West Hickory Water Company, Plumer Water Company, Fryburg Water Company, Cooperstown Water Company and Blaine E. Rhodes Sewer Company ("Rhodes Estate 529 Proceeding"). The Docket Number for the Rhodes Estate 529 Proceeding is P-2024-3045205. The Rhodes Estate 529 Proceeding has been consolidated with the VWC 529 Proceeding (together, referred to as the "Section 529 Proceedings").

Notice of the Section 529 Proceedings and Opportunity to Participate

As a customer of VWC, you are entitled to receive Notice of the Section 529 Proceedings and an opportunity to participate in them.

Actions You Can Take

You are not required to participate in the Section 529 Proceedings. The burden to prosecute the Section 529 Proceedings is with the PUC's Bureau of Investigation and Enforcement. Should you wish to participate, there are three ways to do so:

1. Sending a letter to the PUC. You can tell the PUC why you support or object to a capable public utility acquiring the subject system(s). This information can be helpful when the PUC investigates the issues. Send your letter, referencing the Docket Numbers M-2023-3042180, I-2023-3042312, and P-2024-3045205, to the Secretary's Bureau, Pennsylvania Public Utility Commission, Commonwealth Keystone Building, 400 North Street, 2nd Floor, Room-N201, Harrisburg, PA 17120. You can also contact the Pennsylvania Office of Consumer Advocate ("OCA") with questions, concerns and comments. The OCA is an active party representing the interests of residential customers. The telephone number for the OCA is 717-783-5048 or toll-free 800-684-6560.

2. You can file a formal Petition to Intervene asking the PUC to allow you to be a party – the petition must state who you are, why you want to be a party, and what your specific concerns are. Petitions should include the Docket Numbers M-2023-3042180, I-2023-3042312, and P-2024-3045205, and be sent to the Secretary's Bureau, Pennsylvania Public Utility Commission, Commonwealth Keystone Building, 400 North Street, 2nd Floor, Room-N201, Harrisburg, PA 17120.

3. You can attend or be a witness at a public input hearing, if one is held, where you will have the opportunity to present your views to the Administrative Law Judge and the parties. All testimony given "under oath" becomes part of the official case record. If no public input hearings are held, you still have the right to attend any hearings that are held in the case but will not be permitted to testify unless you have requested and been granted permission to intervene or are called by a party as a witness.

Aqua Pennsylvania's Quick Action Makes for a Safer Schuylkill County

By Helen Harris

Published: 5:24 am EDT April 3, 2024 Updated: 11:39 am EDT April 2, 2024

Image via Aqua America.

Aqua replaced 37 non-functioning fire hydrants in Shenandoah Borough, West Mahanoy, and Butler Townships, enhancing public safety.

In a major step toward improving public safety for the people of Shenandoah Borough, West Mahanoy, and Butler Townships, Aqua Pennsylvania successfully replaced 37 inoperable fire hydrants less than six months after acquiring the water system from the Municipal Authority of the Borough of Shenandoah (MABS) in July 2023.

"Within the first three weeks of ownership, we identified nearly 25 percent of the fire hydrants protecting this community as inoperable. It became an immediate priority," said Aqua Pennsylvania President Marc Lucca. "Our work on fire hydrants marks a real improvement that people can see, and rest assured knowing they will operate when required. We're proud to serve this community and our partnership with emergency responders who put their lives on the line when responding to fire emergencies."

Shenandoah Borough officials praised Aqua's quick work in fixing this serious problem.

"I'm pleased with the progress being made, especially with addressing the issue of the inoperable hydrants, with the safety of the residents being paramount in the town," said Shenandoah Borough Manager Tony Sajone. "Since the onset, the Borough has had a very good working relationship with Aqua, which is instrumental in facing the many challenges that the future will bring in updating the current infrastructure system."

Learn more about Aqua and how, for over 135 years, it's protected and provided water. Aqua provides water and wastewater services to more than three million people in eight states, and that number continues to grow.

Featured Shenandoah

Aqua replaces 37 inoperable fire hydrants so far in Shenandoah area

SHENANDOAH – Just under six months after they took control of Shenandoah's water system, Aqua Pennsylvania has replaced 37 inoperable hydrants, the Bryn Mawr-based company said in an update Tuesday.

The private water company's $12 Million purchase of the Municipal Authority of the Borough of Shenandoah closed in late July.

"Within the first 3 weeks of ownership we identified nearly 25% of the fire hydrants protecting this community to be inoperable. It became an immediate priority," said Aqua President Marc Lucca in a media release. "Our work on fire hydrants marks a real improvement that people can see, and rest assured knowing they will operate when required. We're proud to serve this community and our partnership with emergency responders who put their lives on the line when responding to fire emergencies."

As of Tuesday, 37 hydrants had been replaced. Aqua initially said 45 hydrants were inoperable in August, and more were bagged later.

Some were replaced that month, including some that had been missing for years.

The latest wave of replacements began in December.

"I'm pleased with the progress being made, especially with addressing the issue of the inoperable hydrants, with the safety of the residents being of paramount importance in the town," said Borough Manager Tony Sajone."Since the onset, the Borough has had a very good working relationship with Aqua, which is instrumental in facing the many challenges that the future will bring in updating the current infrastructure system."

Thirteen fire hydrants, Aqua said, were "deemed as either unnecessary or poorly located" and are not being replaced.

The MABS system covers Shenandoah borough, the northern half of West Mahanoy Township including Shenandoah Heights, Raven Run, William Penn, and Lost Creek, as well as the villages of Connerton and Rappahannock in Butler Township and several houses on Mahanoy Avenue in Girardville.

The Shenandoah Sentinel
Upper Schuylkill County's Community Connection

Aqua contractor begins replacement of more hydrants

December 20, 2023 The Shenandoah Sentinel

KAYLEE LINDENMUTH / SHENANDOAH SENTINEL - The worksite at Chester and West Streets in Shenandoah where a contractor was replacing a fire hydrant on Dec. 20, 2023.

SHENANDOAH – The next round of fire hydrant replacements have begun in Shenandoah.

Dan Shingara Enterprises, Irish Valley, was at work replacing hydrants at Poplar and Jardin and at Chester and West Streets on the south side of town.

They are contracted by Aqua Pennsylvania, the new owners of Shenandoah's water system, who had previously said a quarter of the hydrants in the system were inoperable.

As more hydrants are bagged, Aqua provides update

SHENANDOAH – Some more fire hydrants in Shenandoah and the William Penn/Lost Creek area are now bagged and Aqua Pennsylvania says most of them will be replaced in the next few months.

The Sentinel sought an update this week from the Montgomery County-based company that purchased the Municipal Authority of the Borough of Shenandoah after fresh bags were placed on hydrants downtown and in the township.

They previously had said about a quarter of the hydrants in the MABS were inoperable and many were bagged in August, with some being replaced at that time.

At that time, Aqua called the evaluation of its hydrants "an important first step… to make sure they offer fire protection, and to start the repair or replacement process for hydrants that aren't working."

An Aqua spokesperson told *the Sentinel* Tuesday, "Most of the hydrants currently bagged will be replaced within the next few months, including some unbagged hydrants that are otherwise operable but have other maintenance issues."

"The industry standard for minimum water main sizes required to support fire hydrants is 6". However, there are bagged hydrants (and some unbagged) are located on mains less than 6"," they continued. "This group of hydrants may not be replaced and will be removed if they cannot be connected to a larger nearby main and/or cannot provide adequate fire flow as determined by our engineering team."

Aqua replacing, repairing 45 fire hydrants deemed ‘inoperable' in Shenandoah water system

By Hyun Soo Lee Staff Writer
Aug 16, 2023

1 of 5

A “Not In Service” bag covers a fire hydrant Monday at East Coal and North Bower streets in Shenandoah.
JACQUELINE DORMER /
STAFF PHOTOGRAPHER

SHENANDOAH — Nearly a quarter of the fire hydrants in and near Shenandoah have been deemed inoperable by Aqua Pennsylvania Inc., which has taken over the borough water system.

The Bryn Mawr-based water company said it conducted an evaluation and found that 45 of 195 hydrants in the system, or 23%, are out of service.

Aqua is working on replacing and repairing the hydrants, some of which have been covered over with bags that say "Not in Service" on them.

On July 24, Aqua officially completed its purchase of the Municipal Authority of the Borough of Shenandoah, serving about 3,000 customers throughout Shenandoah, much of West Mahanoy Twp. and a small part of Butler Twp.

In a recent news release, the company said an important first step was to evaluate all hydrants to "make sure they offer fire protection" and to start the repairs or replacements of hydrants that aren't working.

Aqua has notified local fire departments of its plans and is working closely with them through the process, the company said.

"We got right to work when we began operating MABS last month, including our fire hydrant inspection, which supports fire protection and improves system reliability and operations," Aqua President Marc Lucca said in the release. "This is an important first step as we begin to make the necessary improvements to the community's water infrastructure."

The company recently installed a few new hydrants, including one on Monday outside Oravitz Home for Funerals Inc. at 40 N. Jardin St.

Owner Stephen F. Oravitz said there had not been a hydrant at that location for two years, as the previous one had been removed due to a slow leak.

"Instead of repairing the hydrant, they (MABS) just shut it off and took it out, so we didn't have anything there for about two years," he said.

The new hydrant is from Mueller Co. in Albertville, Alabama.

Oravitz said the new repairs and replacements will help boost safety across town in the event of fires.

"The workers there from Aqua seemed very knowledgeable and courteous, and they cleaned up nicely when they were done," he said.

In November 2020, the Shenandoah Borough Council approved the sale of MABS to Aqua for about $12 million.

The Pennsylvania Public Utility Commission approved the sale July 13, allowing Aqua to take over the assets later that month.

Upon closing of the sale, the borough paid off MABS' outstanding debt of $5.3 million and received the net balance of $6.7 million for its own uses.

Tony Sajone, borough manager, said the borough has not decided how it will spend the money but that it will hold public input meetings to discuss options.

Aqua plans to invest $23 million in upgrades to Shenandoah's water system over the next 10 years, including $10 million for water main replacements.

The company will also launch a water meter replacement and installation program to help address water loss, which has been estimated at 60%.

Aqua currently serves approximately 1.5 million customers in 32 counties throughout Pennsylvania. For more information, visit AquaWater.com.

Attempts to contact Shenandoah Fire Chief Rick Examitas and other fire personnel for more information on the hydrant repairs were unsuccessful.

PA Chamber® of Business and Industry

IN QUICK RESPONSE TO HURRICANE IDA, AQUA PA HELPS PA RESIDENTS WEATHER THE STORM

AQUA
An Essential Utilities Company

This month marks six months since Hurricane Ida rolled through southeastern Pennsylvania, bringing record rainfall and damaging flooding to areas of southeastern PA – including the Pickering West Water Treatment Plant, Aqua Pennsylvania's largest suburban Philadelphia treatment facility. At Aqua, we are committed to delivering safe and reliable drinking water for all, and this event highlighted just how critical that commitment truly is.

For perspective on just how powerful the storm was, 20 percent of the annual rainfall normally expected fell in a six-hour-period. This hurricane brought historic and catastrophic flooding – you may recall that astonishing image of Philadelphia's Vine Street Expressway completely underwater. The flooding inundated and damaged most of the treatment plant's infrastructure, which normally delivers 30 million gallons per day to approximately 1 million people in three counties. For nine days, our team managed the recovery of the plant by altering its operations so we could provide water to the service area, and deal with related storm aftermath at our other nearby water treatment facilities.

We were forced to implement a boil water advisory in two towns and issue a voluntary request for water conservation while we modified the distribution of water from other plants. Immediately after floodwaters receded, a team of employees and contractors worked around the clock to optimize production at our other plants and ensure service continued without interruption. Throughout this entire time, our number one priority was to provide service to our customers – safe, reliable access to a critical resource they need to live and work.

While we are not immune to floods that can happen annually, our team puts various plans in place to ensure our services remain dependable and accessible for all. We recognize the importance of having actionable natural disaster plans in place to help mitigate some of the potential effects of this hurricane and future storms.

One of the main reasons we avoided a large-scale boil water advisory and were able to keep the water flowing was due to the many sources of drinking water and robust distribution infrastructure throughout southeastern Pennsylvania, allowing us to reroute the water supply to compensate for the loss. In addition, the quick thinking, response, and guidance of our dedicated Aqua crew members prevented the problem from worsening and affecting our customers for a longer duration.

Additional tactics that helped us remain strong and continue water flow was a combination of media, social and digital outreach, customer specific email and text alerts, and focused, strategic communication that proved effective. Aqua was able to fully saturate all available media channels to reach a significant number of people in a short period of time – the storm came in fast, and we reacted swiftly and efficiently. Our conservation messaging resulted in a customer response driving a measurable reduction in water consumption, affording us time to redirect water flow and help us avoid a larger scale issue.

Through the heroic efforts of our people, and the benefit of years of infrastructure investment throughout our system, Aqua was able to restore the operation of the plant from total outage in 9 days while sustaining service. Our plan is to employ corrective actions from this experience as we invest in operational strategies and infrastructure to ensure fast recovery and resilience from future circumstances. As a large water company with the available resources to endure these seemingly more frequent events, our customers should rest easy knowing that they have a water company serving them that can “weather the storm.”

Marc A. Lucca is President of Aqua Pennsylvania, Inc.

Aqua Pennsylvania serves approximately 1.5 million people in 32 counties throughout the Commonwealth of Pennsylvania. Visit AquaAmerica.com, or follow Aqua on Facebook at facebook.com/MyAquaAmerica and on Twitter at @MyAquaAmerica.

The Philadelphia Inquirer

Aqua Pennsylvania to customers: Go ahead and open the taps

The water company ended its request to reduce nonessential water, put in place after the remnants of Hurricane Ida on Sept. 1 knocked out its largest treatment plant.

Aqua Pennsylvania customers can go ahead and open the taps: The water company on Thursday ended its request to reduce nonessential water use that was put in place after the remnants of Hurricane Ida on Sept. 1 knocked out its largest treatment plant.

The Bryn Mawr water company owned by Essential Utilities Inc. said that it has recovered sufficient storage on its suburban water system to rescind its request for customers to conserve. "As we return to normal routines, let's enjoy this essential resource, but not be wasteful," Marc Lucca, president of Aqua Pennsylvania, said in a statement.

Record water levels breached the flood walls of Aqua's Pickering West treatment plant in Schuylkill Township, near Phoenixville, inundating the plant that supplies up to 40% of the drinking water for Aqua's suburban customers in Chester, Montgomery, Delaware, and Bucks Counties.

The company was able to maintain supply to most of its customers by ramping up production at other treatment plants located throughout its system.

But water pressure fell in some locations and Aqua last week advised customers in East Whiteland and Charlestown Townships to boil water. It rescinded the boil water alert on Sept. 10, but still asked customers to conserve until that request was lifted on Thursday.

Aqua has 372,000 water customers in Chester, Delaware, Montgomery, and Bucks Counties and serves an estimated population of about 1 million in Philadelphia's collar counties.

Aqua Ends Request for Southeastern Pennsylvania Customers to Conserve Water in Ida's Aftermath

By Mark Hostutler

Published: 5:16 am EDT September 17, 2021 Updated: 10:07 pm EDT September 16, 2021

Image via Aqua.

Aqua Pennsylvania has ended its request that customers reduce nonessential water use to aid the recovery of normal water supply in the utility's southeastern Pennsylvania service area.

On Sept. 10, Aqua announced the recovery of partial operations at its Pickering West water treatment plant, which was heavily damaged by the devastating floods caused by remnants of Hurricane Ida. This recovery, along with customer conservation efforts, helped the utility bring drinking water supply for Chester, Delaware, Montgomery, and Bucks counties back to normal operation levels.

Marc Lucca, president of Aqua Pennsylvania, thanked customers who answered his call for water conservation.

"From everyone at Aqua, I thank all our customers in southeastern Pennsylvania for their support and cooperation," said Lucca. "With your help, we have recovered distribution system water storage to within normal levels and are able to end our earlier request. Aqua customers can now resume normal water use."

Lucca said the devastating effects of the storm emphasized the critical importance of access to safe drinking water.

"As we return to normal routines, let's enjoy this essential resource, but not be wasteful," he said.

The Pickering West water treatment plant normally provides up to 40 percent of Aqua's drinking water supply to its southeastern Pennsylvania service area. Aqua's many sources of drinking water and robust water distribution infrastructure throughout the four-county system allowed for rerouting of water supply to compensate for the loss.

Aqua Pennsylvania serves approximately 1.5 million people in 32 counties throughout the Commonwealth of Pennsylvania. Visit AquaAmerica.com for more information or follow Aqua on Facebook at facebook.com/MyAquaAmerica and on Twitter at @MyAquaAmerica.

Philadelphia suburbs on the long road to recovery after Ida

PHILADELPHIA (KYW Newsradio) — Five days since Ida bulldozed the region, there are still significant complications across the Philadelphia suburbs.

Aqua Pennsylvania had to shut down its Pickering East and West water treatment plants due to the flooding. President Marc Lucca said those plants provide up to 40% of their daily water supply for customers in Bucks, Montgomery, Chester, and Delaware counties.

"I've been in this business for 30 years," he said. "I've seen a lot of storm damage. I've worked in different parts of the country. I have never seen anything like it."

Lucca said they have other treatment plants and wells, but with the loss of one of their major suppliers, they need customers across the system to continue to chip in to make sure everyone has water. Simple steps like turning off sprinklers, not watering the lawn or washing the car, or only running the washing machine or dishwasher with a full load.

In Upper Dublin, the township building, police department, an elementary school and the high school were all damaged by a tornado. Upper Dublin School District Superintendent Steve Yanni said while parts of the district were hit hard, others have little to no damage. Regardless, the community is mobilizing as one.

"The community's been really great. I think the people that were unaffected realize how lucky they were and are grateful they weren't affected," he said.

At least the silver lining to the coronavirus pandemic, Yanni said, is they are already set up to do virtual classes for students in storm-affected schools.

The district is also working to accommodate families who don't have power or need a place for their kids to go during the day.

Damage assessment teams are out across Montgomery County surveying the harder-hit areas.

WATERSHED

Philly officials say the water is safe. How do we know that?

More than 100 samples of water have been taken in 12 locations in the river, outside the plant, and in the raw water storage basin.

Aqua Lab Director Alicia Beauchamp tests water samples from the March 25 Delaware River chemical spill at the company's Bryn Mawr headquarters. (Courtesy of Aqua Water)

On Tuesday evening, the city of Philadelphia gave its residents the all clear to drink their tap water, after more than an estimated 8,000 gallons of a water-based latex finishing solution spilled from the Trinseo Altuglas plant in Bristol, Pa. into the Delaware River late Friday night.

Much of the chemical mixture settled in a containment pond, but rainfall contributed to the milky white liquid spilling into the stormwater system, and eventually the Delaware River. By early Sunday evening, the discharge had halted. Clean up continues at the site, but any danger to drinking water systems has passed.

WHYY spoke to a number of experts to find out how these spills are handled, how the water is tested, and why it's safe to drink.

What chemicals were spilled into the Delaware River?

The chemicals included:

- butyl acrylate: a clear, flammable liquid used in the manufacture of resins, sealants and paint formulations. It's one of the chemicals that was released during the East Palestine, Ohio. train derailment.
- ethyl acrylate: a colorless liquid used in the production of acrylic resins, water-based latex paints, plastics, and rubber.
- methyl methacrylate: a colorless flammable liquid used to make plastics, resins, paints, and coatings.

Trinseo, the company responsible for the spill, only provided the brand name of the product for the first 13 hours of the spill, according to the Philadelphia Water Department, making it impossible to test for specific chemicals at that time. The chemical components were not provided until about 1:30 p.m. on Saturday.

How was contamination prevented in Philadelphia?

The Baxter water treatment plant is the only one of the city's three plants connected to water from the Delaware River. The Philadelphia Water Department shut intakes to the Baxter water treatment plant as a precaution. The plant had stored enough clean water prior to the spill that it could send to residents' taps.

How was the water monitored?

More than a hundred samples of water have been taken in 12 locations in the river, outside the plant, and in the raw water storage basin.

Scientists used gas chromatography and mass spectrometry to test for the chemicals. This is an analytical technique that allows scientists to separate components of a complex mixture — such as the various components in water — and analyze them to get information about the structure of those components, and how much of it is present.

The standard technique has been around for about 50 years, and is commonly used for trace analysis of environmental water samples.

Environmental analytical chemist Chuck Powley of PFAS Solutions in Delaware said the technology is very reliable, and that the three chemicals of concern are compatible with this technique.

"These are very common chemicals. They've been around for quite a while, and there are standard EPA methods for analyzing them in water," he said.

The method can detect chemicals to single parts per billion.

"You can think of that in terms of, if you have a billion dollars, and you gave someone $1, the amount that person has is one part per billion," said Jon Scaffidi, an administrative scientist at the Philadelphia Water Department's Bureau of Laboratory Services, during a press conference Tuesday.

Following the Friday chemical spill, Aqua, which supplies water to eight states and has a site in Bristol, tested samples day and night for 63 kinds of chemicals.

The company was already prepared to test for butyl acrylate, because it serves water in Ohio, where the train derailment took place. Even though Aqua doesn't regularly test for the other two chemicals, it had the technology in place to do so, said Christopher Crockett, vice president and chief environmental, safety, & sustainability officer of essential utilities.

It's a complicated process, however.

"Most people think this testing is like the CSI Miami montage, where you go and they play a song, and next thing you know, they have all the test results back," Crockett said. "But, you have to process it, set it up, and then it takes about an hour to run … you're taking a couple dozen or so samples at a time … And basically you're waiting for the machine to run to get the results."

Scientists also must review the data to make sure no errors were made.

The Philadelphia Water Department also utilized three additional private labs to help with testing, a spokesperson for the department said.

"This was important to maximize turn-around time of results," he said in an email. "Finding specialized labs that can test for these chemicals at the parts-per-billion level absolutely added to the challenges of the spill response."

Computer modeling also predicted the path of the spill and how long the chemical compound would take to work its way down the Delaware River. Crockett likens it to dumping a bunch of rubber ducks in the water.

"It would basically simulate how those rubber ducks would move down through the Delaware River, and when those rubber ducks would get to different places and where they were going," he said.

Because the Delaware River is tidal, the path is a bit tricky.

"When you dump the ducks in, they might go downstream 10 miles, but then they might come back up 8 miles with the tide," he said. "After 24 hours, they've only moved 2 miles downstream, net. So it's kind of like three steps forward, one step back. The computer basically simulates exactly that sloshing back and forth, and how long it will take for something to move its way down through there."

What do tests finally show?

The three chemicals were never found in the water. Testing in the river demonstrated that as the contaminated water diluted and traveled down the river, the risk to the drinking water system passed. There is no longer the possibility of the chemicals entering the Baxter plant.

Crockett said the city was prepared to handle the situation because of what he likes to call "utility first responders."

"There are utility workers in the water industry that are constantly dealing with these issues so that [residents] don't have to think about it. So it doesn't have to become, 'Should I buy bottled water or not?'" he said. "There are probably a dozen or more of these types of events every year in the Delaware Valley … We have systems like the early warning system,and we have [standard operating procedures] … that we drill for like this so that when these things happen, everything works like it should have."

Was Philadelphia the only water system threatened by the spill?

No. Aqua Water has a plant in Bristol, but the company shut down the intake. Aqua recently reopened after ensuring no contaminants entered its system. New Jersey American Water has a plant in Delran, and they too reported that their testing showed no presence of the contaminants. Burlington, N.J. also has a plant right across the river from the spill site.

What agencies participated in responding to the spill?

The U.S. Coast Guard is the lead federal agency responding to the spill. Others include the EPA, the Pennsylvania Department of Environmental Protection, the New Jersey Department of Environmental Protection, and the Pennsylvania Fish and Boat Commission.

grid

What just happened? Making sense of Philly's tango with tainted water.

Let's rewind. This past Sunday afternoon, iPhone sirens blared and the following message flashed across the screen of hundreds of thousands of Philadelphians:

"*City of Phila recommends using bottled drinking water from 2PM 3/26/2023 until further notice for all Phila Water Department customers. Contaminants have not been found in the system at this time but this is out of caution due to a spill in the Delaware River.*"

What ensued were some of the scariest and most confusing few days in recent memory.

Worried citizens packed into big-box and grocery stores alike, buying up all the bottled water, moving on to the Gatorade and triggering international media attention. Over the next 48 hours, officials within the Kenney messaging seeking to reassure city residents, saying there was no sign of contamination in the city's water supply and moving back the timeline for when it could potentially arrive. Mostly, they were met with suspicion and scorn from all corners, including residents, media outlets and candidates seeking to replace Kenney in the mayor's office later this year.

Then, on Tuesday night, word came down that it was all over, just like that.

"*City declares water is safe, will not be impacted by spill*," the latest smartphone message asserted.

So ... what gives?

As a journalist who has sat in many tense rooms as communities grappled with tainted water supplies, here's what I saw, based on my reading of all available information and conversations with water experts.

Just after midnight on Saturday,

authorities say a pipe ruptured at a chemical plant called Trinseo Altuglas in Bristol, a little over eight miles up the Delaware River from Philadelphia's Baxter Water Treatment Plant, the city's largest. Reportedly, some 8,000 gallons of a trio of chemicals used in plastic production leaked into the nearby Otter Creek near its confluence with the Delaware.

Chris Crockett, a former deputy commissioner at the Philadelphia Water Department and now chief environmental and safety officer at suburban water provider Essential Utilities (aka Aqua Pennsylvania), told me that emergency response infrastructure quickly went into effect.

In 2005, the Philadelphia Water Department led the creation of the Delaware Valley Early Warning System, which is essentially a contamination alert system for drinking water utilities across the region. When a chemical spill or similar incident occurs, the system automatically models how and when it will move through the region's waterways and warns utilities with vulnerable water intakes.

The Pennsylvania Department of Environmental Protection (PADEP) confirmed to *Grid* that the event was categorized as "high risk," which generated both phone calls and emails to all potentially impacted water providers and also calculated "a time of travel to downriver intakes." Utilities were free to make their own decisions from there.

For Aqua Pennsylvania, their actions were a no-brainer, Crockett says. One of their intakes on the Delaware was located less than one-half mile upstream from the plant, making it vulnerable as the river's tidal action can push contaminants northward. Crockett says the company had flexibility to replace the water with other sources throughout its suburban network and leave the plant offline until it was sure the chemicals were gone.

In fact, Crockett said a spill of the

Altuglas magnitude isn't even that out of the ordinary. Every year brings many kinds of spills or accidents across the watershed. In 2004, nearly 300,000 gallons of oil spilled into the river in Paulsboro. The following year, 100 million gallons of toxic fly ash entered the upper watershed. In 2012, more than 20,000 gallons of vinyl chloride leaked into the river from New Jersey.

So what happened in Philadelphia this time around? By various accounts, after word of the spill went out, water department officials began reviewing models of how the chemical plume could move down the river, while also coordinating with agencies like the Environmental Protection Agency and U.S. Army Corps of Engineers on what actual testing of river water was showing.

The circumstances in the war room likely looked like this:

1. Altuglas claimed three chemicals had leaked. While each one comes with various health effects, toxics experts generally have said that none would be likely to seriously harm people at low levels, after being diluted by the robust Delawa River. But that wasn't certain, and i is also not unheard of for chemical companies to update the list of spilled chemicals after the fact to include something potentially more nefarious.
2. While modeling and testing the rive is useful, it is not foolproof. Chemicals can become caught up ir rocky outcrops and appear to dissipate only to reemerge later. Crockett, whose lab tested many of the samples taken over the past few days, echoed City officials in saying that all testing of river water and various intakes showed no detectable levels of the chemicals except at the epicenter of the spill. But, that does not create certainty that the chemicals were not still lurking somewhere in significant amounts and making their way toward the city's intake.
3. Scars remain fresh on the national psyche from the train derailment and chemical releases in East Palestine, Ohio, in early February. And the two incidents shared a common chemical: butyl acrylate, which the CDC says can "cause redness, tearing, and irritation of the eyes, runny nose, scratchy throat, difficult breathing, and redness and cracking of the skin."

Facing all these variables, in a Monday press conference, Mayor Kenney said the City's ultimate decision was to ensure that no amount whatsoever of the chemical spill reached the tap water of Philadelphians, by alerting the public and putting the Baxter plant on a minimum operating level. Thus, the City chose drastic action even as the chemical threat may well have been a phantom.

Again, speaking as someone who has been in rooms where public officials deny any public hazard exists even when it clearly does, I think the City's reaction could have been far worse. And by Tuesday, it appeared the authorities were convinced that the threat, to the extent there ever was one, had passed. In the end, all available evidence suggests Philadelphians were kept safe.

But that still leaves hard questions abou the City's communication strategy.

Somewhere, someone made the decision to push out the first mass-text alert on Sunday, triggering the start of panic. Officials with PADEP confirmed to *Grid* that the sending of such alerts was at the sole discretion of the city's officials. The calculus behind their decision and reasons for the specific wording used — "use bottled water until further notice" — are at this point unknown.

Next, the City's slow drip-drip of updates, keeping fresh the specter of maybe-soon-to-be-contaminated drinking water, might have been meant to reassure, but in many ways did the opposite.

Ultimately, a great amount of accountability should be placed on Trinseo Altuglas and environmental regulators. What failed, why and what will be done to prevent it — or something even worse at the next plant down the river — from happening in the future?

But in Philadelphia, the trials of the last few days suggest a deep need for City officials to take a hard look at their crisis communications playbook and perhaps do some cleanup of their own.

The Philadelphia Inquirer

NEWS

Philly drinking water deemed safe but chemical spill monitoring ongoing, officials say

The threat of contamination will pass by Thursday, according to city officials, but water testing will continue through next week.

Philadelphia officials say tap water from the Baxter treatment plant is safe to drink at least through 3:30 p.m. Tuesday as they continue to monitor the impact of a chemical spill from a plant upstream on the Delaware River.

So far, no contaminants related to Friday night's inadvertent discharge of 8,100 gallons of tainted water from the Trinseo plant in Bristol, Bucks County, have been detected at the Baxter water treatment facility, which supplies drinking water for more than half of the city.

Officials said at a briefing Monday that the threat of contamination should pass by Wednesday night or Thursday. The Philadelphia Water Department said it would continue testing drinking water into next week, though, to ensure the water is safe.

Randy Hayman, the department's commissioner and CEO, said tests have been conducted at 12 locations along the Delaware River, including just outside the Baxter plant.

"All the tests so far have been negative," Hayman said.

Mike Carroll, deputy managing director for the Office of Transportation, Infrastructure and Sustainability, said testing "has been going on around the clock and will continue." The latest test was at 4 p.m. Monday.

City officials say that residents can safely continue to use the water in their homes. "It is safe to drink and use tap water to cook with it, took brush your teeth, to bathe in," Caroll said.

The contaminants may not reach the city water supply, but if they do, officials said, they should have the capacity to treat the water, given that the chemicals would be highly diluted and pose a low risk.

If the city is unable to fully remediate any chemicals from the system, officials said they will have a plan to distribute water.

Anne Nadol, the city's commerce director, said restaurants and businesses should also have no fear of using tap water for now. She said officials hope to give another update Tuesday morning.

Officials are recommending that schools, day cares, and restaurants continue to operate.

"Let's be clear," said Mayor Jim Kenney. "The city has been monitoring this since it first occurred on Friday night. PWD has been active since the weekend, working with the U.S. Coast Guard. The Pennsylvania Department of Environmental Protection is constantly monitoring and testing the work to ensure the health of the public."

No traces of the chemicals have been found in any water system along the Pennsylvania or New Jersey sides of the river.

The chemical spill

Friday's spill occurred at a chemical plant owned by Trinseo, a manufacturing firm that makes plastics and latex binders. The company said that an "equipment failure" resulted in 8,100 gallons of latex emulsion solution dumped into Otter Creek, a tributary of the Delaware River. The solution is about 50% water and 50% latex polymer, according to the company. The solution also contains butyl acrylate, one of the chemicals released in February's train derailment in East Palestine, Ohio, when rail cars caught fire and left a cloud of toxic smoke over the town, causing an evacuation and health scare.

The plant that produces acrylic products such as Altuglas, similar to plexiglass, has a history of mishaps — including at least four recent contamination incidents. It is located within a cluster of industrial companies along the Delaware River north of Philadelphia that has hosted chemical giants since the early 20th century.

Throughout its history, the site has been subject to frequent monitoring by government regulators. Over the past decade, the U.S. Coast Guard twice before detected releases of acrylates, which can be toxic, from the Bristol facility into the Delaware. The EPA had separately flagged two other acrylate releases.

A big concern in Philly

Friday's spill highlighted the city's vulnerability when it comes to water: It is at the mercy of river water and cannot draw from underground aquifers, unlike water departments in communities such as Camden, which gets water from wells in addition to the river.

The Philadelphia Water Department provides drinking water for 1.7 million residents of the city as well as Lower Bucks County. It operates three main drinking plants that treat hundreds of millions of gallons of water daily. The Baxter treatment plant in Torresdale takes in water from the Delaware River and serves about 58% of the city. The Queen Lane and Belmont plants take in water from the Schuylkill.

The plants use an elaborate process that screens out solids, doses it with chlorine, and filters through layers of sand, gravel, and carbon. The water is dosed again with chlorine to preserve it on a journey through miles of pipe to individual homes and businesses. The system complies with National Primary Drinking Water Regulations for about 100 contaminants.

But the city does not normally look for, or treat, any of the three chemicals released in the spill.

Early warning system worked

Chris Crockett, chief environmental, safety and sustainability officer for water company Aqua Pennsylvania, said none of the water systems it operates surrounding Philadelphia has detected the chemicals released in the spill.

Crockett said water officials throughout the region were notified quickly of the spill through the Delaware Valley Early Warning System, which he helped start when he worked for the Philadelphia Water Department. The system acts as a regional information hub during spills.
Aqua, as well as other water utilities in the system, were already testing for butyl acrylate because officials moved to put testing standards in place in the Philadelphia area after the East Palestine derailment.

The EPA has not issued guidance for maximum contaminant levels for butyl acrylate. But the Centers for Disease Control has offered guidance of a maximum of 500 parts per billion.

He said the system's computer modeling predicted the path of the spill and how long the chemical compound would take to work its way down the river.

"I know the public is worried about this," Crockett said. "But the systems that we have put in place on the Delaware River actually worked exactly like they were supposed to."

Philadelphia is using the same detection standards as Aqua, according to Carroll. And the modeling has helped city officials figure out where chemicals from the spill are heading.

"The smallest amount we can detect is in a single part per billion," Carroll said. "We've detected none of the material in any of the testing that we've done."

PHILADELPHIA (CBS) -- Aqua Pennsylvania leaders credit quick, scientific-based decision-making for protecting one of its water treatment plants that's roughly 2,000 feet from where the chemical spill in Bristol floated into the Delaware River.

Aqua's water treatment plant in Bristol serves about 30,000 customers in several places, including Bristol Borough and Bristol Township.

Todd Duerr, Aqua Pennsylvania's vice president of operations, said the treatment team immediately made their way to the plant after being notified of the chemical spill Friday night.

"They went down toward the spill site. They looked at what the water was. They saw there were some traces of a white substance," Duerr said. "We didn't know what it was, so we decided to shut the plant down."

Duerr said the plant had the advantage of being upstream of the spill.

"As the water starts to move downstream, we know we had fresh water upstream coming past our intake," Duerr said. "So, we knew there was no danger."

But a river's water level rises and falls throughout the day.

Once the Delaware River starts to rise, water gets pushed back upstream, which significantly increases the risk of the leaked chemical floating back towards the plant.

Aqua Pennsylvania devised a plan, where they closely monitored the river levels. Once the river started to rise, Aqua closed its river intake and reopened it only after the river's level started to drop. A falling river level means water is back flowing downstream.

"Let's watch the river. Let's do some scientific testing at our laboratories, a few other things in our treatment system," Duerr said. "We didn't turn the plant on until we were confident we knew what the situation was."

Aqua Pennsylvania President Marc Lucca said so far, their testing has shown no traces of the chemical in their water supply.

"We train for these types of things. We practice these types of events all the time," Lucca said. "We are here 24/7, 365 to protect their drinking water so they never have to think about it."

Aqua Pennsylvania said the chemical is now far enough downstream that they only have to be in a heightened state of alert for another 1-2 days.

Quick actions prevented chemical spill from impacting water supply in Philadelphia suburbs

BRISTOL, Pa. - Quick actions from those in charge of a water treatment facility near a chemical spill along the Delaware River prevented the harmful toxins from entering the plant.

Health officials in Bucks County said Sunday that between 8,100 and 12,000 gallons of a water-based latex-finishing solution spilled into the river late Friday because of a burst pipe at the Trinseo Altuglas chemical facility in Bristol Township.

The midnight spill happened at low tide less than half a mile upstream from the AQUA Pennsylvania water treatment facility. AQUA President Mark Lucca said by the time he heard about the spill the plant had already been shutdown thanks in part to early warning sensors that helped them decide to shut off water intake from the river.

"The first thing people are asking us is 'is my water safe to drink?' It absolutely is safe to drink, how do we know? Because it never got into the plant" Lucca said.

AQUA's local water reserves were fairly high, so Bristol's water supply was never threatened. And even if it was, AQUA says it would have been able to call on more supply from company resources in nearby Delaware and Montgomery counties.

"We have a lot of resources within Southeastern Pennsylvania to move water from one area to another, which is what got us through all the plant was shut down," AQUA Vice President Todd Duerr said.

AQUA says it waited until shortly after the next high tide to reopen the facility to ensure clean water from upstream flushed the potentially chemical-tainted water down the Delaware River. The plant normally operates 24-hours a day, but their operations are currently cut in half.

"Whenever the tide would go out, recognize that the water upstream is fresh, there's nothing in that," Duerr said. "Every day the plume is moving further and further downstream, so with all those data points in mind, we decided if the plant should come on or not."

The data-driven water company says it will continue to use information collected on a daily basis to decide when to safely return the plant to 100% capacity.

The Philadelphia Inquirer

How the Ohio train derailment had local water officials prepared for the Bristol spill

Chris Crockett, chief environmental, safety and sustainability officer for Aqua Pennsylvania, said none of the water systems it operates surrounding Philadelphia has detected the acrylate compounds released in the spill.

Crockett said the company's EPA-accredited lab in Bryn Mawr is able to detect down to one part per billion, but hasn't found anything.

However, he said that Aqua, as well as other water systems in the region, were prepared to test for butyl acrylate because it was one of the chemicals of concern in the East Palestine, Ohio, derailment in February.

Crockett said water officials throughout the region were notified quickly of the Friday spill through the Delaware Valley Early Warning System, which he helped start when he formerly worked for the Philadelphia Water Department. The unique system acts as a regional clearinghouse for spill information.

Local officials had already worked on guidance for testing butyl acrylate into the system. The EPA has issued no guidance for maximum contaminant levels for the compound. But the CDC offered guidance of a maximum of 500 parts per billion.

He said the system's computer modeling predicted the path of the spill and how long the chemical compound would take to work its way down the river. Because the Delaware River is tidal in the Philadelphia area, the water sloshes back and forth as it slowly makes its way downstream.

As a result, it could take several days from the time of the spill to where it passes by Philadelphia. At that point, Crockett said, it would also likely be so diluted as to be undetectable.

"I know the public is worried about this," Crockett said. "But the systems that we have put in place on the Delaware River actually worked exactly like they were supposed to."

A. WATER INFRASTRUCTURE 3

B. LEAD SERVICE LINE REPLACEMENT 7

C. PFAS RELATED INFRASTRUCTURE 9

D. WASTEWATER INFRASTRUCTURE 11

III. CONCLUSION 15

I. INTRODUCTION AND BACKGROUND

Q. Please state your name and business address.

A. Michael Convery. My business address is 762 W. Lancaster Avenue, Bryn Mawr, Pennsylvania 19010.

Q. By whom are you employed and in what capacity?

A. I am employed by Aqua Pennsylvania, Inc., ("AP") as Planning and Engineering Director.

Q. Please provide a brief description of your education and work experience.

A. I graduated from Penn State University in 2008 with a Bachelors of Science in Environmental Systems Engineering. I joined AP in 2009 as Project Engineer. I was promoted to Project Manager at AP and then moved to Aqua Services, Inc. ("Aqua Services") as Senior Project Manager. I then was promoted to Manager of Hydraulic Modeling and Planning in Aqua Services. I was promoted to my current role of Director of Planning and Engineering of AP. I am Registered Professional Engineering in Pennsylvania and Maryland.

Q. Have you previously testified before the Pennsylvania Public Utility Commission ("PUC" or the "Commission")?

A. No.

Q. What is the purpose of your direct testimony?

A. The purpose of my testimony is to provide an overview of the reasons why AP and Aqua Pennsylvania Wastewater, Inc. ("APW") (together with AP, "Aqua PA" or the "Company") continues to need to upgrade and improve its water and wastewater infrastructure. In particular, I will focus on per- and poly-fluoroalkyl substances ("PFAS") and lead service lines ("LSL").

Q. Are you sponsoring any exhibits associated with your direct testimony?

A. No.

Q. Are you responsible for any responses to the Commission's filing requirements and/or standard data requests that were included with Aqua PA's initial filing in this case?

A. Yes. I am sponsoring certain responses to the Commission's standard filing requirements, as well as standard data requests, where my name is listed as the sponsoring witness for a given response.

II. AQUA PA'S CAPITAL INVESTMENT

Q. Please describe the key driver involved in the Company's capital investment decisions.

A. The primary driver of the Company's capital investment decision making process is compliance with state and federal rules and regulations from our environmental regulators.

A. WATER INFRASTRUCTURE

Q. Can you provide a few examples of major projects that are included in the Company's claimed utility plant for the future test year ("FTY") and fully projected future test year ("FPFTY") for its water operations?

A. Yes. Below provides a discussion of major projects during the FTY and FPFTY.

1. Neshaminy to Bethayres (36-inch)-PH 3B Water Main Replacement

The Company plans to replace approximately 2,700 linear feet ("LF") of transmission main with 36-inch TR-Flex ductile iron ("DI") pipe along Philmont Avenue in the Company's Main southeast ("SEPA") system in Montgomery County. The existing main has experienced frequent leaks leading to extensive surface damage. The existing

main is also undersized and the replacement main will enhance system reliability and improve customer service.

2. Coventry Lane, Westtown Water Main Replacement

The Company plans to replace approximately 3,000 LF of distribution main with 12-inch DI pipe along Coventry Lane and South Matlack Street in the Company's Main SEPA system in Chester County. The replacement main will enhance system reliability and improve customer service.

3. Marshalton Thorndale Road, West Bradford

The Company plans to install approximately 12,000 LF of 12-inch DI transmission main with 36-inch DI at Marshalton Thorndale Road in the Company's Spring Run system in Chester County. This main will interconnect two sections of the Company's distribution system to improve water quality, enhance system reliability, and improve customer service.

4. South Concord Rd SR 2006, Westtown

The Company plans to replace approximately 5,700 LF of distribution main with 12-inch DI pipe along South Concord Road in the Company's Main SEPA system in Chester County. The existing main has experienced frequent leaks leading to extensive surface damage. The existing main is also undersized and the replacement main will enhance system reliability and improve customer service.

5. South Oak Lane, Aldan Borough

The Company plans to replace approximately 2,000 LF of distribution main with 20-inch DI pipe along South Oak Avenue and approximately 1,000 LF of distribution main with 16-inch ductile iron DI pipe along Providence Road in the Company's Main SEPA system in Delaware County. The existing main has experienced frequent leaks leading to

extensive surface damage. The existing main is also undersized and the replacement main will enhance system reliability and improve customer service.

6. East Eagle Road, Haverford Twp

The Company plans to replace approximately 3,900 LF of distribution main with 16-inch DI pipe along East Eagle Road and approximately 2,300 LF of distribution main with 8-inch DI pipe along West Darby Road in the Company's Main SEPA system in Delaware County. The existing main has experienced frequent leaks leading to extensive surface damage. The replacement main will enhance system reliability and improve customer service.

7. New Pretreatment Facility-Crum

The Crum water treatment plant ("WTP") is permitted for 24 million gallons per day ("MGD") at full design capacity. However, the pretreatment stage has not been reliable in the summer months when organic loading is high, resulting in the WTP being unable to operate at permitted capacity due to poor settling performance at the sedimentation basins with carryover overloading the filters. Specifically, there is unwanted sediment build-up near the top of the plate settlers resulting in clogging and inhibited settling. It is also noted that the existing sludge collection system in the sedimentation basins is outdated and underperforming. This project is necessary to add a fourth sedimentation basin to the pretreatment train and install a modern and more efficient sludge collection system in all basins. The addition of the 4th basin will reduce settled water turbidity, reduce operations and maintenance ("O&M") frequency and costs through less backwashing of filters, and better-concentrated residual management. The addition will also ensure that the Crum WTP will be able to reliably meet the permitted capacity with one basin out of service

and consistently achieve settled water turbidity goals established by the American Water Works Association ("AWWA") Partnership for Safe Drinking Water.

8. Pickering East WTP Rehabilitation Phase 1 – Filter Additions

The Phase 1 Expansion of the Pickering East WTP includes the demolition of the existing clearwell, construction of six new gravity filters in a new filter building, and associated site work. The expansion will increase capacity from 15 MGD to 28 MGD, providing operational reliability to the contiguous system. The Pickering WTP complex is the primary water producer in AP's Main SEPA system and its operation is critical to supplying communities in Montgomery, Chester, and Delaware Counties. The filter expansion will ensure resiliency in providing safe drinking water to communities during catastrophic events as was experienced during Hurricane Ida in 2021 as more fully explained in the Direct Testimony of Todd M. Duerr (Statement No. 11).

9. Bear Gap No. 2 Dam Rehabilitate Primary Spillway

Bear Gap No. 2 Dam was constructed in the 1920s and impounds 592 MG of water and provides a raw source for the Roaring Creek WTP. It is classified as a high hazard dam (Class B-1) under current Pennsylvania Department of Environmental Protection ("PADEP") Dam Safety regulations. The concrete chute spillway is a means to bypass excess flow safely over the dam. In 1946 and 1972, the erodible bedrock foundation caused incidents that required significant repairs. Since the 2017 Oroville Dam incident, chute spillways have been reevaluated to look for physical factors that contribute to spillway failure. The current spillway at Bear Gap No. 2 presents 33 of the 41 of the most common risk factors. The new project aims to mitigate each of those factors by removing the existing principal and auxiliary spillways and constructing a new spillway with a labyrinth weir that

can safely pass the Probable Maximum Flood. The chute will be designed with an internal drainage system to prevent undermining, and the bedrock foundation will be protected to minimize internal erosion. The project also includes improvements to the outlets works to maintain operation during construction and remote sensors to provide onsite safety and flood emergency information to County Emergency Management Agencies.

10. Shenango WTP – Contact Basin

The Shenango WTP is permitted for 16 MGD at full design capacity. Currently, the WTP has no pre-treatment, and water pumped into the plant comes into contact with the filters within 30 to 45 minutes. During the summer months when total organic carbon loading is high, higher levels of disinfection byproducts are formed. Phase 1 of the project will include the addition of a Raw Water Basin to increase pre-filter contact time and the addition of Powder Activated Carbon Silo and feed system to reduce total organic carbon ("TOC") loading and reduce disinfection by-products ("DBP").

B. LEAD SERVICE LINE REPLACEMENT

Q. Does AP have a LSL replacement program?

A. Yes. The LSL replacement program and the changes to the lead and copper rules, including the implementation of those rules through the U.S. Environmental Protection Agency ("EPA") and PADEP, is more fully explained in the Direct Testimony of Todd M. Duerr (Statement No. 11).

Q. Is the LSL replacement program another significant driver of capital the Company must expend to comply with EPA and PADEP regulations.

A. Yes. AP has filed an amended Long-Term Infrastructure Improvement Plan ("LTIIP"), which includes a LSL replacement plan ("LSLR Plan") to comply with Commission

regulations. The LSLR Plan includes a significant amount of capital to comply with the EPA's regulations for replacement of LSLs over a 10-year period. However, these amounts may be subject to increases if AP must comply with PADEP's proposed implementation of the EPA's regulations.

Q. Please describe the current status of AP replacements of LSLs in its system and any significant replacement projects.

A. Below is a description of the status of AP's LSL replacements in Pennsylvania and a major replacement project in AP's system.

1. Lead Service Line ("LSL") Replacements – Customer Side

AP is required by the EPA, the PADEP, and the Commission to identify and replace all customer-side lead and galvanized service lines. To date AP has 102,148 customer service lines to identify and 11,126 customer service lines to replace. AP is actively working on reducing these numbers through records research, identification through meter replacements, in-person surveys, customer self-identification, test holes, and service line replacements.

2. West Chester Lead Service Line Replacement

The purpose of this project is to identify and replace any known and found lead or galvanized customer water service lines throughout the West Chester system. These efforts will ensure that lead is eradicated from consumer drinking water in that system. There are 13,982 customers within the West Chester system. To date AP has identified 406 lead and galvanized customer service lines that need replacement. AP has replaced 96 lead and galvanized customer service lines in West Chester and will continue to undertake replacements through the remainder of 2024 and into 2025.

C. PFAS RELATED INFRASTRUCTURE

Q. Do the Company's capital investment decisions reflected in the FTY and FPFTY in this case also reflect specific investments to address new regulatory requirements related to PFAS?

A. Yes, each of the FTY and FPFTY reflect such capital investments.

Q. Why does AP plan to place capital projects into service to address PFAS at this time?

A. Aqua PA witness Todd M. Duerr (Statement No. 11) more fully identifies and describes (1) PFAS, (2) why PFAS present specific health and safety concerns, (3) the new federal and state regulatory requirements that AP must be fully compliant with by 2029, (4) AP's plan to comply with these requirements, and (5) specific O&M expenses that will be incurred by the Company to address PFAS.

Q. Please provide a description of the types of PFAS-related capital projects that AP plans to place into service during the FTY and FPFTY.

A. The projects described below are the types of projects that AP is implementing in the FTY and FPFTY.

1. <u>WTP PFAS Treatment Piloting and Rapid Scale Small Column Testing ("RSSCT")</u>

AP plans to implement treatment for PFAS at several surface WTPs to comply with the proposed federal Maximum Contaminant Level ("MCL"). The PADEP requires pilot testing for permitting of PFAS treatment of surface water sources. In response to a request by AP, PADEP indicated that a pilot study at the Neshaminy WTP could support permitting of several other WTPs with similar treated water quality provided that a separate evaluation of simultaneous compliance is completed for each WTP. This testing program will evaluate the ability of granular activated carbon ("GAC") and ion exchange ("IX") resin

technologies as process additions to the Neshaminy WTP for the removal of PFAS. These technologies have been selected for evaluation because they are two of the best available options for PFAS removal per the PADEP. The program will also include bench-scale evaluations for five additional surface WTPs in the form of RSSCTs. The Neshaminy WTP pilot will be conducted on-site at the WTP using a filter pilot skid with four 6-inch diameter columns allowing for four different filter media to be tested concurrently. Pilot operations will take place over a 9-month period.

2. Chalfont Well #11 PFAS Treatment

The Chalfont Well #11 facility serves customers within our Chalfont Borough service territory. The treatment will consist of GAC pressure vessels and chemical treatment system upgrades. This treatment will be installed to comply with the current PADEP MCL and the EPA MCL. The treatment will be in service by Q4 of 2024.

3. Hatboro Well #6 and #8 PFAS Treatment

Hatboro wells #6 and #8 directly serve the Hatboro service area within the AP Main SEPA system. The treatment will consist of IX resin pressure vessels, chemical treatment system upgrades, and onsite hypochlorite generation. The treatment is being installed to comply with the current PADEP MCL and the EPA MCL. The treatment will be in service by Q4 of 2024.

4. Perkiomen Woods PFAS Treatment

The Perkiomen Woods Well Station includes a single well that is the sole source of water supply to the Perkiomen Woods development. The proposed PFAS treatment system at the Perkiomen Woods Well Station will include two trains of Anion IX treatment each

consisting of two vessels, a pre-filtration system upstream of the Anion IX vessel trains, and well pump replacement. The project is schedule to be in service by Q4 2024.

5. North Hills PFAS Treatment

The North Hills Well Facility is located in Abington Township and is part of our AP Main SEPA system. This project consisted of a full pilot study to evaluate the best treatment method for PFAS for the project-specific raw water quality. GAC and IX were piloted for this effort. IX was chosen as the best-suited treatment method based on the raw water quality. The project consisted of IX pressure vessels for PFAS treatment, chemical treatment system improvements, prefiltration for the IX system, and pump upgrades. The pilot data as a result of this project can be used to compared similar water quality for treatment in other well facilities throughout Pennsylvania. This project was in service in July 2023.

Q. Are these projects required for Aqua PA to continue to provide safe and reliable service to its customers?

A. Yes.

D. WASTEWATER INFRASTRUCTURE

Q. Can you provide a few examples of major projects that are included in the Company's claimed utility plant for the FTY and FPFTY for its wastewater operations?

A. Yes. Below is a description of the major wastewater projects through the FPFTY.

1. Bacton Hill and Planebrook Sewer Extension

The Bacton Hill and Planebrook projects are two sanitary sewer extensions in East Whiteland Township that we were required to complete within one year of obtaining all necessary permits per our asset purchase agreement for the East Whiteland sewer system.

The Bacton Hill sewer extension will include approximately 9,200 LF of new gravity sewer mains and 2,100 LF of new low-pressure sewer main which will provide service to 52 new customers. The Planebrook sewer extension will include approximately 5,300 LF of new gravity sewer mains and 2,600 LF of new low-pressure sewer main which will provide service to 84 new customers.

2. Upgrade Willistown Knoll Pump Station

The Willistown Knoll pump station is inaccessible for vehicles due to its location. This project will install a bridge and a new access road to improve access to the pump station for maintenance, future upgrade projects, and emergency response which will improve service reliability and prevent sanitary sewer overflows ("SSOs"). The estimated cost of this project is $375,000.

3. Penn Township Wastewater Treatment Plant ("WWTP") Upgrade II

Phase II of the Penn Township project is targeted at achieving a much lower Total Nitrogen ("TN") effluent limitation in our stream discharge due to losing reuse of our effluent for horticultural purposes. PADEP recently provided Preliminary Treatment Requirements for a stream discharge relocated to the unnamed tributary behind our Penn Township WWTP. It will include a CAP Load for TN and Total Phosphorus which as flow increases, the concentration of both of these parameters will decrease. The project will also include the provision of drip irrigation disposal on our existing rapid infiltration Basin site.

4. Deerfield Wastewater Treatment Plant Convert to Pump Station (Consolidation)

The Deerfield Knoll WWTP is near the end of its useful life and would require major upgrades or rehabilitation in the near future to continue operating in compliance.

After examining the costs, it was determined that it would be less expensive to convert the Deerfield Knoll WWTP into a pump station and send the flow to APW's nearby Willistown Woods WWTP. The estimated cost of this project is $1,750,000.

5. Penn London WWTP to Pump Station (Consolidation)

The Penn London WWTP is one of APW's most expensive WWTP to operate when comparing cost per thousand gallons treated. The primary reason for this high cost of treatment is that the WWTP serves only one school, and during the summer months the WWTP cannot operate in compliance due to low flows and insufficient organic loading. Therefore, during the summer, the flow must be pumped and hauled elsewhere for treatment and disposal which results in high costs. APW determined that it would be more cost effective to convert the Penn London WWTP into a pump station and send the flow to APW's nearby Penn Township WWTP. The estimated cost of this project is $750,000.

6. Cheltenham Interceptor A

Interceptor A has a long history of SSOs due to insufficient capacity during wet weather flows. Wet weather flows are contributed by APW's Cheltenham system, Abington Township, Jenkintown Borough, and the Philadelphia Water Department. Due to the limited dry weather and insufficient wet weather operating conditions, the PADEP has implemented a Correction Action Plan ("CAP") and Connection Management Plan ("CMP") for the Cheltenham Interceptor A. Based on hydraulic modeling work and coordination with stakeholders, it was determined that pipe upsizing of the lower portion of Interceptor A in addition to a storage tank is necessary to achieve routine compliance in managing wet weather flows.

7. Inflow and Infiltration ("I&I") Work 2025 – Cheltenham

This project consists of a variety of sewer main inspection and pipe repair/rehabilitation work throughout the Cheltenham collection system targeted to reduce I&I. Based on pipe defects identified through APW's inspection work, sewer mains will be replaced in part or in whole as well as structural cast in place pipe ("CIPP") liners. Defective laterals (portions owned by APW) may also be included. This work is being performed to maintain compliance with the PADEP's CAP for the Cheltenham System. The work in 2025 is estimated at $900,000.

8. I&I Work Phase V – East Norriton

This project consists of sewer main inspection and pipe repair/rehabilitation work within specific subbasins of the East Norriton collection system. APW has identified subbasins that contribute the greatest amount of I&I during wet weather events. Sewer main CIPP will be installed in the existing vitrified clay pipe in the priority basins. This project is one of a multi-year phased plan to reduce I&I within the collection system. This phase of the project is estimated at $1,225,000.

9. Germantown Pump Station Upgrade – East Norriton

The Germantown Pump Station is the third largest of nine total pump stations within the East Norriton Sewage collection system with three 100 horsepower Pumps. This project will consist of an overall upgrade to the facility including upgrade of non-code compliant electrical equipment, new electrical service, new emergency power transfer switch, new pump control system, expansion of the existing building footprint to allow for code compliance safety clearances to all equipment, repairs to the existing building, and upgrades to the mechanical piping systems. The pumps were previously rebuilt under a separate project.

III. CONCLUSION

Q. Does this conclude your Direct Testimony at this time?

A. Yes, it does. However, I reserve the right to supplement my Direct Testimony as may be necessary during the course of this proceeding.

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

AQUA PENNSYLVANIA, INC.
AQUA PENNSYLVANIA WASTEWATER, INC.

PREPARED DIRECT TESTIMONY OF RITA F. BLACK DIRECTOR, COMMUNITY ASSISTANCE PROGRAMS ESSENTIAL UTILITIES

DATE SERVED: May 23, 2024 **Statement No. 13**
DATE ADMITTED:_____

PREPARED DIRECT TESTIMONY
OF RITA F. BLACK

Q. Please state your name and business address.

A. My name is Rita F. Black and my business address is located at 375 North Shore Drive, Pittsburgh, Pennsylvania 15212.

Q. By whom are you employed and in what capacity?

A. I am employed by Essential Utilities, Inc. ("Essential") as the Director of Community Assistance Programs. In this role, I lead assistance programs for Aqua Pennsylvania, Inc. and Aqua Pennsylvania Wastewater, Inc. (collectively "Aqua PA"), and Peoples Natural Gas Company LLC ("Peoples"), as well as the regulated utilities of Essential operating in other states.

Q. Please describe your educational and professional background.

A. Following receipt of a Bachelor of Science Degree in Accounting from Robert Morris University, I joined Peoples and began a career spanning more than 30 years across the areas of customer service, rates and regulatory affairs, and low-income programming. From 2001 through 2014, I worked in the Rates and Regulatory Affairs department of Peoples as an analyst. My responsibilities as an analyst in the Rates and Regulatory Affairs department included the development and administration of the Universal Service Rider and preparation of the Universal Service Energy and Conservation Plan ("USECP"), as well as tariff filings, testimony preparation and other analytical projects. In 2014, I was promoted to Manager, Customer Relations for Peoples and was responsible for oversight of all low-income programming, including its Customer Assistance Program ("CAP"), Low Income Usage Reduction Program ("LIURP"), Emergency Furnace and Houseline

Repair Program ("EFHRP"), Hardship Fund, and Customer Assistance, Referral and Evaluation Services ("CARES"). In addition to oversight of low-income programming, I was also responsible for compliance on customer related issues for Pennsylvania, West Virginia, and Kentucky. I was promoted to Director, Customer Relations in 2016 and was subsequently promoted to Director, Community Assistance Programs in April of 2021 with responsibility for all regulated states under the Essential footprint, including Aqua PA. In this role, my oversight of low-income programming has expanded to include our water and wastewater entities. I retain responsibility for natural gas low-income programming and compliance across our natural gas footprint.

Q. Have you testified previously in any regulatory proceeding?

A. Yes. I have testified in hearings conducted by the Pennsylvania Public Utility Commission ("PUC" or "Commission") for formal complaints. I have also submitted direct and rebuttal testimony in base rate proceedings for Peoples[1] and Aqua PA[2].

Q. What is the purpose of your Direct Testimony in this case?

A. In my current role, I provide leadership and guidance on low-income issues, including development, design, and implementation of low-income programming for Aqua PA. I also lead our Aqua Assistance Collaborative ("AAC"), whose members include representatives from the PUC's Bureau of Consumer Services ("BCS"), the PUC's Office of Communications, the Office of Consumer Advocate ("OCA"), the Pennsylvania Utility Law Project ("PULP"), and other stakeholders. My testimony will provide an overview of the programs approved in Aqua PA's previous base rate case,[3] describe the transition from

[1] *See* Docket Nos. R-2010-2201702; R-2012-2285985; R-2023-3044549.
[2] *See* Docket Nos. R-2021-3027385, R-2021-3027386
[3] *See* Docket Nos. R-2021-3027385, R-2021-3027386.

the former Helping Hand Collaborative to the AAC, provide an overview of the Consumer Education and Outreach Plan ("CEOP"), introduce the newly branded Aqua Aid hardship fund, formerly known as Helping Hand, and I will provide an overview of implementation and customer adoption of Aqua PA's programs, including projections for expected enrollment and participation. I will also propose changes to the leak repair/conservation program approved in the Aqua PA's last rate case. Specifically, I will propose separate budgets for leak repair and conservation. I will also put forth a proposed segmentation of leak repair program dollars as suggested through collaboration with ACC.

Q. Please list the exhibits that you are sponsoring as a witness.

A. I am sponsoring Exhibit Nos. RFB-1, RFB-2, RFB-3, and RFB-4, and they are attached to my Direct Testimony.

Q. Please provide an overview of the universal service programs currently available to Aqua PA customers.

A. Aqua PA offers a suite of programs designed to improve affordability for low-income households. Specifically, Aqua PA developed a CAP that provided tiered discounts for households up to 200% of the Federal Poverty Limit ("FPL"). The tiered discounts are as follows:

Water Discounts

	Up to 100% FPL	100 to 101% FPL	151 to 200% FPL
Fixed Base Facility Customer Charge	100%	100%	100%
Consumption Charge (first 2,000 gallons)	100%	50%	0%

Wastewater Discounts

	Up to 100% FPL	100 to 101% FPL	151 to 200% FPL
Fixed Base Facility Customer Charge	75%	65%	50%
Consumption Charge (first 2,000 gallons)	100%	50%	0%

Similar discounts are provided to flat billed wastewater customers. These discounts to flat billed wastewater customers range and are set forth below for each tier.

Tier 1 - Between 63.65% - 71.45%

Tier 2 - Between 45.93% - 59.05%

Tier 3 - Between 25.66% - 42.40%

In addition to the discounts, which are designed to improve affordability on a current bill basis, Aqua PA's CAP also offers Arrearage Forgiveness. At the time of enrollment, any balance owed to Aqua PA is frozen as a pre-CAP balance, eligible for Arrearage Forgiveness. Each month, when the CAP participants pay their discounted monthly bill on time, a $25 Arrearage Forgiveness credit towards the pre-CAP balance is applied to the account, until the pre-CAP balance has been full exhausted. While participating in CAP, customers do not accrue late payment charges if their payments are not made on time.

Aqua PA also implemented a leak repair and conservation program that provides $100,000 annually for the purchase of conservation kits and to repair leaks that are negatively impacting income eligible customers, either through increased bills, or the prospect of termination due to willful waste. Aqua PA uses the 200% FPL threshold for this and all assistance programs.

Prior to its last base rate proceeding, Aqua PA operated a hardship fund called "Helping Hand." A hardship fund is a fund of last resort, intended to provide support to

customers facing arrearages that could lead to termination of service or require assistance to restore service. Helping Hand was also the name of the prior payment assistance program which was replaced by CAP. While the Helping Hand payment assistance program was eliminated, the hardship fund remained. In order to avoid confusion between the retired and existing Helping Hand program, and to increase engagement for the hardship fund, it was renamed "Aqua Aid" in 2023.

Q. Please describe the ACC you mentioned in your opening remarks.

A. Aqua PA has had a collaborative stakeholder group which includes OCA and PULP for a number of years. This group was called the "Helping Hand Collaborative" and met approximately twice a year to receive updates on Aqua's Helping Hand programs and to give input into those programs. Following the approval of the universal service programs in Aqua PA's most recent rate case, I began to lead to the engagement of this stakeholder group and sought to expand its role in working with Aqua PA. The first project we focused on with this group was the development of Aqua PA's first CEOP. We also discussed the rollout of the new programs and how to ensure that we were launching the programs in an accessible way for our customers. We determined that, particularly in these early years of the programs, it is critical that we engage with these stakeholders on a more regular basis. Therefore, we increased the meetings to four times per year and established a consistent cadence for the meetings: February, May, August, and November for 2024. As we were moving away from the Helping Hand brand, we changed the name to the "Aqua Assistance Collaborative" to better describe our work together. Its members currently include representatives from OCA, PULP, BCS and the PA PUC Office of Communications. We are currently recruiting for social service agencies to join this group as well.

Q. You mentioned the ACC's first focus area was the development of the CEOP. Please describe the CEOP.

A. The CEOP is an annual plan that seeks to both educate consumers and attract enrollments into the Aqua PA's universal service programs, particularly CAP. It includes activities for general audience education and outreach along with target audience efforts. The current CEOP is provided as Exhibit RFB-1. General audience activities include bill inserts, website information and social media advertisements. Targeted efforts in the initial CEOP focused on the transition from Helping Hand to CAP as well as Low Income Household Water Assistance Program ("LIHWAP") recipients. LIHWAP was a temporary federally funded assistance program that provided grants to income eligible customers with arrears and as such, provided a unique opportunity for us to identify customers most in need of CAP. We also participate in local in-person outreach events such as BeUtilityWise, consumer fairs and senior fairs.

Q. Please describe the transition from Helping Hand to Aqua Aid.

A. Helping Hand was a two-pronged assistance program that had been in place for a number of years. It provided a payment plan option under which customers that were income eligible and in arrears could participate to receive the benefit of a $25 credit towards their arrears for each timely payment made on their account. The second prong was a hardship fund under which customers could receive assistance with short term needs, such as reducing an account balance that occurred due to a water leak.

The payment plan prong of Helping Hand was replaced by CAP. CAP retained the $25 credit per month as an Arrearage Forgiveness benefit, but importantly added discounts

on monthly bills based on income. This was an important expansion of benefits to improve overall affordability, particularly for those with the lowest incomes.

The hardship fund remained intact after the institution of CAP. We were finding, however, that it was not well utilized by customers who could potentially benefit from the fund. While call center agents could offer a Helping Hand grant to a customer they were working with, educating customers of this potential assistance and encouraging use was still challenging. It was our goal to revamp the program, increasing visibility and, in turn, use of the fund. By providing income guidelines that would be public to customers, we hope to encourage more participation. We also thought it would be most helpful to rebrand the program as Aqua Aid in order to differentiate it from the former Helping Hand. This was particularly important because some agencies posted information indicating to customers that Helping Hand had ended, leading customers to believe assistance was no longer available. While the information regarding the ending of the program was particular to the Helping Hand payment plan, we understood it was confusing to customers. We decided to use the Aqua Aid name and logo used in other states to not only address this confusion, but to provide more consistency across the Essential water and wastewater companies. We relaunched the hardship program as Aqua Aid in late 2023.

Q. What are the guidelines for Aqua Aid?

A. There are general guidelines, as well as flexibility for special circumstances. The income threshold is 200% FPL or below for customers applying for assistance with arrears or to restore service following termintion. We do provide enrollment flexibility up to 250% FPL for special needs customers, such as senior or disabled customers. The general grant guideline is a maximum of $500 once per calendar year, however the grant amount could

be higher if circumstances warrant. We also wanted to ensure flexibility is given for those with high bills due to a water leak, in cases in which the leak has been repaired. The guidelines are reflected on page 4 of Exhibit RFB-2, which is the deck reviewed with ACC at the February, 2024 meeting. Aqua Aid was a key area of discussion at the February meeting as we were seeking input from stakeholders on the general guidelines, as well as feedback on the level of detail we should include on our website related to Aqua Aid.

In order to promote Aqua Aid under its new name, and encourage both applications for assistance and donations from customers looking to help their neighbors, all June 2024 bills have or will include a two-sided bill insert focused on promotion of Aqua Aid. One side includes information for those seeking assistance while the other side covers the donation procedure available to customers. The bill insert is provided as Exhibit RFB-3.

Q. Let's move on to the programs that were approved in the prior base rate proceeding, beginning with CAP. Is the program fully operational?

A. Yes. Instituting a complex CAP that included tiered discount benefits along with Arrearage Forgiveness was a significant lift for both Aqua PA's customer information system and the business. Following approval of the universal service programs, work began to build out the rate schedules necessary to support three levels of discounts for water customers and three levels of discounted rates for wastewater customers within the Aqua PA's billing system. Aqua PA also hired two employees to the Community Assistance Program team to begin support of the universal service programs. Some significant system changes were necessary to support the CAP design. The most challenging upgrade to Aqua PA's billing system surrounded freezing the pre-CAP balance to allow for Arrearage Forgiveness benefits. It was important that these balances be frozen from not only collections, but also

to reflect that the pre-CAP balance is deferred on the monthly billing statement. Our Information Technology ("IT") team, in partnership with the Aqua PA's billing department, was able to devise a way to freeze the balances, provide clarity on the bill, and ensure that the $25 credits could be automatically posted when payments were made by CAP customers on the due date.

Another challenge to launching CAP was preparing Aqua PA's processes to allow for customers to apply for CAP through the Dollar Energy Fund ("DEF"), our CAP administrator, ensuring that at the time of application, a hold is placed on the customer's account to allow them sufficient time to complete the application process, and to allow for their account to be enrolled at the proper discount level when they have been approved to participate. We now have a smooth daily process by which files are shared between DEF and Aqua PA to complete these functions.

Q. Were there any changes in CAP eligibility from the proposal in the prior base rate proceeding to the approved CAP?

A. Yes. There was a significant change. We proposed that customers be able to self-attest income in order to enroll in CAP, similar to how payment arrangements and the prior Helping Hand program were handled. We created enrollment projections on the assumption that our proposed program would be approved under the self-attestation method. Under the Commission's Final Order, however, CAP enrollment was limited to those customers who provided proof of income to participate.[4] We were also required to implement a recertification process similar to that of Peoples. Within 60 days of entry date

[4] R-2021-3027385, May 12,2022 Order, Page 339.

of the Order, Aqua PA was required to submit a written plan for income certification and recertification for CAP participation, which it did on July 14, 2022.

Q. How did this requirement impact CAP enrollment?

A. As I mentioned earlier in my testimony, upon receiving approval of the CAP, efforts began to build out the necessary functionality with the Aqua PA's billing system to support CAP and build the staff and processes necessary to manage the daily tasks for all of the approved programs. As these processes and system changes were implemented, we gradually began outreach, first to Helping Hand participants, to encourage them to enroll in CAP.

We saw challenges in enrolling customers with the new income documentation requirements. Unfortunately, customers with arrears often follow the path of least resistance, meaning when given option between making a verbal payment agreement and completing an application and submitting income documentation to participate in a more beneficial program, they may opt for the verbal agreement. This is a particular challenge when the program, such as Aqua PA's CAP, is brand new.

In order to ensure our vulnerable customers were participating and to provide an easy pathway for LIHWAP eligible customers to obtain a more affordable bill, we included a provision in our certification and recertification requirements to allow receipt of LIHWAP to act as proxy for submitted income. Because these customers had already proven their income eligibility to the state to obtain a LIHWAP grant, their eligibility for CAP has been validated. We were also able to reach agreement with the Department of Human Services ("DHS") to participate in a limited data sharing agreement, which provided Aqua PA with the household income and composition information used for approved LIHWAP grants for the purposes of automatically enrolling those customers into

CAP. We received that information in late 2023 and this has led to the biggest increase in CAP participation since the start of the program.

In Aqua PA's most recent base rate proceeding, we completed a needs assessment using census and Aqua PA customer data to project the potential eligible population. We then projected annually, for three years, the level of enrollment we expected to see, using income self-attestation as the basis of enrollment. We projected 10% of eligible customers would enroll in the first year, rising to 15% in year two and reaching the 25% level by end of year three. Current enrollment levels have reached roughly 6,000 across both water and wastewater. Under our original projections, we would have reached 10,682 in year one and grown to 16,023 in year two.

Q. What level of participation are you currently projecting for CAP?

A. I updated our needs assessment for currently available census data and Aqua PA active accounts as well to determine the basis for potential enrollment. Considering our current participation level, which reflects roughly 5% of estimated eligible customers, I am projecting that our CAP enrollment levels will grow to 12% this year and reach 20% by the end of 2025. To meet these projections, the performance of our CEOP will be critically important, along with ongoing input and guidance from ACC as we look for ways to increase customer awareness and acceptance levels for CAP. My calculations are reflected in Exhibit RFB-4.

Q. The enrollment projections you have set are aggressive. What are your plans for meeting these projections?

A. While the Aqua PA had a CAP-like plan in Helping Hand, there were restrictions to participation. Customers who did not maintain their monthly payments were removed from

the program. Customers who had participated in it previously were unable to re-enroll. Aqua PA's CAP is designed as a universal service program. It allows for participation based on income eligibility and does not include provisions that would take away the benefits if a customer missed a payment. As with all new things, it can take some time for customers and our customer contact employees to adopt a new program like CAP. As we entered 2024, we were seeing much stronger adoption with more referrals from call center personnel to our CAP administrator and an increase in customers contacting our team to learn more about CAP. It is prominent on Aqua PA's website, and we are promoting it through in-person events in local areas as well as broad outreach via email, bill inserts and paid advertising. We have added additional social service agencies to the network that accepts CAP applications. Customer contact personnel receive training about CAP and are encouraged to offer this information to all low-income customers they are working with. These efforts should also lead to word-of-mouth referrals from one customer to another.

Q. Moving on from CAP, please provide a status update on the other program approved in the previous base rate proceeding, specifically, the $100,000 in funding to support leak repairs and conservation kits.

A. The leak repair program has proved to be a necessary program as it supports not only affordability, but health and safety. When we first proposed the program, we were looking for a safety net for low-income homeowners that were facing leak repairs they could not afford. When we began rolling the program out in 2023, we focused on two areas: 1) customers at threat of termination for willful waste of water; and 2) customers with high bills due to easily repairable leaks, such as a leaking toilet. We added language to the termination notices regarding willful waste of water to offer the program to those who may

need assistance in addressing a major service leak. We also created cards for our field personnel to share with consumers that may need help repairing a leak. As awareness of our program has grown, we are seeing an increase in requests for assistance.

Q. Please describe how the leak program operates.

A. Customers seeking assistance from the program contact our Community Assistance Programs team via telephone or email. We respond to them to learn more about their needs and to share eligibility information. If the customer is not already enrolled in CAP, we encourage them to apply for CAP, so they have both proved eligibility to be assisted with their leak issue, but also have the benefit of a reduced bill going forward. Once we know the customer is income eligible, we arrange for a local plumber to visit the home to address the leak. The invoice from the plumber is sent directly to Aqua PA for payment. In 2023, we repaired a leak in a water pit for a senior citizen customer who would otherwise have faced termination of service for willful waste of water. We also assisted with other service line leaks and a leaking toilet.

Q. You mentioned an increase in requests for assistance. Please describe this further.

A. In just the first three months of 2024, we have already more than doubled the number of customers we are assisting with leaks. Similar to 2023, some are minor repairs such as leaking toilets, typically under $500, while others are substantial service line leaks in the $4,000 to $5,000 range. This trend is positive, in that it shows that this program is filling an important need for our vulnerable customers and we are seeing good utilization of the overall budget. However, it is also concerning because our overall annual budget of $100,000 is intended to cover conservation kits, in addition to leak repairs.

Q. How much of the budget is spent on conservation kits?

A. We have been fortunate that an existing stock of conservation kits remains from the former Helping Hand program. This has allowed us to use all of our current repair fund dollars for repairs. This is important because 1,000 conservation kits, including shipping and handling to customers' homes, is roughly $22,000.

Q. Are you proposing an increase to the leak repair fund?

A. Yes. If we subtract out the $22,000 that would be spent on conservation kits, we would have roughly $78,000 to use for leaks and repairs. In the first two months of the year, we have already spent $14,000. Most of the customers we are serving through this program have incomes below the poverty level. We expect that as more customers learn about the program, the use will continue to increase. I am therefore proposing an increase to the annual budget of the leak repair fund, for leak repairs only, to $132,000 for 2025. I developed these figures under the assumption that we will likely spend $11,000 per month in repairs as more customers seek assistance because of increased awareness of the program.

Q. In your opening remarks, you mention a 'segmentation' of leak repair funding. Please describe this proposal.

A. At the February meeting of the ACC, we discussed the leak repair program. I shared the growth we are seeing in customer use of the program, along with examples of the types of repairs Aqua PA has performed. One of our stakeholders suggested that as we think about the budget, and to ensure that we are allocating dollars to meet the varying needs of our customers, that we consider this as a budget in three segments. Namely, service line repair, inside leak repair, and conservation kits, respectively. This stakeholder suggested that by segmenting these items and placing limits on them, we can have better control over the

limited funds. For example, since service line repairs can cost $5,000 or more, under our current budget, we could serve roughly 16 customers with service line leaks and have nothing left for those with minor leaks that are directly impacting their water bills, leading to more collections risk. However, if we segment these dollars, there will be a limit to how much can be spent on service lines, reserving dedicated funds to leak repairs that directly affect affordability. I think this is a wise approach and would envision the increased budgets I am proposing to be segmented as such:

	2025
Service Line Repairs	$50,000
Inside Leak Repairs	$82,000
Conservation Kits	$22,000

Q. Does this conclude your Direct Testimony?

A. Yes. I reserve the right to submit supplemental testimony if additional issues arise during the course of this proceeding. Thank you.

Harrisburg, PA 17105-3265

RE: PA Public Utility Commission v. Aqua Pennsylvania, Inc.
Docket No. R-2021-3027385
PA Public Utility Commission v. Aqua Pennsylvania Wastewater, Inc.
Docket No. R-2021-3027386

Dear Secretary Chiavetta:

In accordance with the Pennsylvania Public Utility Commission's ("Commission") Opinion and Order entered May 15, 2022 at the above referenced dockets, Aqua Pennsylvania, Inc. and Aqua Pennsylvania Wastewater, Inc. (collectively "Aqua" or "Company") submits its second annual Consumer Education and Outreach plan ("CEOP") which is updated to reflect the Aqua's 2023 activities and progress statuses. The Company is also including examples of outreach materials and a list of priorities for 2024.

If you have any questions regarding the CEOP, please contact Rita Black – Director, Community Assistance Programs at 412-208-6530.

Sincerely,

Mary McFall Hopper
Regulatory Counsel

Aqua Pennsylvania Consumer Education and Outreach Plan

November 2023 Annual Report & Plan

Purpose:

- To provide a multi-pronged approach to consumer education with the goal of creating awareness of Aqua's income-based programs and connecting eligible populations to enrollment.
- To reach eligible customers, particularly those who are payment troubled or have very low income.
- To develop partnerships with other utilities and community social service agencies to connect eligible customers with the resource of Aqua CAP.

General Audience Education & Outreach Activities

Activity	Frequency	2023 Update
Bill Inserts	At least once annually	October 2023 bill insert followed by November 2023 email
Website self-screening tool (in development)	Available 24/7	Tool in development
Website program information	Available 24/7	Available
Social Media Advertisements	Periodic advertisements to increase awareness that include a link to begin the online application for CAP.	Included in media plan
Community education	Posters/handouts provided to schools, churches and social service agencies.	Examples attached

Additional Target Audience Education & Outreach Activities

Activity	Details	2023 Update
Incoming callers screened for eligibility	Application for service; bill payment discussions; termination/restoration calls; PFA calls	Training and resources for call centers complete
Direct mailing to current Helping Hand participants	Letter to Helping Hand participants that describes the additional benefits available in the new CAP.	Outreach to HH participants completed
Focused outreach to LIHWAP recipients	Letter/email to LIHWAP recipients offering the new CAP. This will emphasize income documentation is not required since LIHWAP can be used as proof of income eligibility.	Partnership w/DHS allowed for data sharing for the purposes of CAP enrollment.
Email Campaign to payment troubled households	Identify customers with arrears and/or low income using Aqua's billing system to generate an email campaign with links to Aqua's website to learn more and begin the application process through the online application.	Email campaign launched to all residential customers in November 2023.

Limited Income Events	Provide representatives and materials to local events: senior fairs, resource fairs, etc.	See attached report of attended events.
Direct calls to at risk customers	Using reporting of customers in arrears with potential low or limited incomes, members of the Community Assistance Programs team will make outbound calls and/or send letters.	These outreach efforts included ERAP recipients and others identified by the Aqua customer team.
Maintaining program info on resource websites	Use of Findhelp.org and PA 2-1-1 websites and others as identified.	Aqua's programs are included in Findhelp.org
Field contact employee referrals	Variety of tools including door hangers and flyers that will be maintained by Operations staff in their vehicles that can be shared with customers directly.	Cards for leak repair were distributed to field personnel. Door hangers for CAP are in development.

Annual Training/Community Education Opportunities

Association	Training/Support	2023 Update
PA 211 Call Center	Training provided at least once per year regarding CAP eligibility and enrollment processes and water leak repair program.	In development
Resource Fairs	Held throughout the service territory on various dates. Aqua staff will answer questions/distribute information.	See attached report of attended events.
BeUtilityWise	Annual participation in planning, program development and presentations to attendees regarding Aqua CAP.	Participated in panel presentation at Harrisburg BeUtilityWise
Train the Trainer events	Offer training to additional local agencies, community partners.	In development
Utility sponsored zoom/in-person events	Partner with gas and electric utilities to participate in utility focused outreach efforts	In development
Outreach mailings	Targeting school districts with a high percentage of free/reduced lunch students; local churches	Planned for January 2024

Special Needs/Limited English Proficiency/Protection From Abuse

- Outreach materials (posters/handouts) will be prepared in both English and Spanish translations. We will also provide materials in other languages if we find a need for a particular population.
- Support to vulnerable customers provided by CARES representatives when customers are having difficulty understanding and/or completing steps to enroll in CAP. Dedicated phone line and email address (AquaCAP@aquaamerica.com; 412-208-6818)

CAP Enrollment Methods

Method	Availability
Self-service online application	Available 24/7 at https://www.hardshiptools.org/MyApp/
Via telephone	Monday through Friday from 8 a.m. to 4:30 p.m. Customers can begin the application process and learn how to submit the required documentation to complete their enrollment.
Dollar Energy Fund Screening Agency	Applications by appointment with local agencies.

Ease of Enrollment Efforts

- No income documentation required if customer has received LIHWAP.
- Online application available at: https://www.hardshiptools.org/MyApp/.
- Income documents can be submitted via upload, fax or US mail.

Consumer Education & Outreach Plan Updates

As these programs are relatively new for Aqua Pennsylvania, establishing connections within the social service community and engagement from stakeholders will be important to building up the number and variety of outreach efforts and materials. In order to ensure the continued development of the CEOP receives appropriate attention, the Company continues to work with its advisory group whose members include representatives from the Office of Consumer Advocate, Pennsylvania Utility Law Project, PA PUC Office of Investigation & Enforcement, Bureau of Consumer Services, Office of Communications and social service agencies.

2024 Aqua Assistance Collaborative Meeting Dates:

- February 21
- May 22
- August 21
- November 20

Key Focus Areas for 2024

- Building social service agency relationships for participation in collaborative meetings as well as direct community connections to increase awareness and enrollment.
- Increasing involvement in BeUtilityWise events throughout the service territory.
- Evaluating impact of media campaign to identify areas of success or modifications needed.

Media Promotional Plan (attached)

- Target markets for promotional efforts tied to census and customer data regarding low-income populations
- Mix of print, transit and digital audio advertising across key counties.
- Timing includes fall push for enrollment, followed by spring push as moratorium ends.

Date	Organization	Type (In person, Web, Radio/Television)	Outreach Material Taken	Audience (i.e. customer, social service agencies)	Number of Participants	Area (Where is event located?)	Notes
06/22/22	Church of Christian Compassion	In Person	ERAP/LIHWAP	Customers	50	Church of Christian Compassion (PHILA/DELCO/SEPA)	
09/23/22	Be Utility Wise	In Person	CAP/ERAP/LIWHAP	Customers	50-75	Sharon Hill (DELCO/SEPA)	State Senator Anthony Williams
10/21/22	Senior Expo	In Person	ERAP/LIHWAP	Customers	75-100	Springfield Township (DELCO/SEPA)	State Representative O'Mara
11/21/22	New Garden Town Hall	In Person	CAP/ERAP/LIWHAP	Customers	200+	New Garden Elementary School (Chester County)	New Garden Township
03/30/23	Consumer Utility Fair	In Person	CAP	Customers	75-100	Yeadon Borough (DELCO/SEPA)	State Senator Anthony Williams
08/13/23	Summertime Family Festival & Resource Fair	In person	CAP/ERAP/LIWHAP	Customers	200+	Norristown, PA (Montgomery County)	State Representative Craig Scott
11/14/2023	Utility Resource Fair	In Person	CAP/Leak Repair	Customers		Ridley Township (DELCO/SEPA)	Ridley Township Public Library
11/17/2023	Be Utility Wise	In Person	CAP	Social Service Agencies	100+	Harrisburg	Participated in CAP Panel to highlight Aqua's new programs

AQUA

An Essential Utilities Company

Need help with your water or wastewater bills?

We're here to help.

Learn more about Aqua Pennsylvania's Customer Assistance Program (CAP)

If you or someone you know needs help with your water or wastewater bills, financial assistance is available. Aqua Pennsylvania's new program is designed to help customers experiencing financial difficulties by making monthly bills more affordable.

Assistance is available year-round to qualifying households.

PROGRAM BENEFITS

- Discounts on monthly water and wastewater bills
- $25 credit toward overdue balances when timely monthly payments are made

Who is eligible?

Customers with income at or below the following guidelines may be eligible:

HOUSEHOLD SIZE	GROSS MONTHLY INCOME	GROSS ANNUAL INCOME
1	$2,430	$29,160
2	$3,287	$39,440
3	$4,143	$49,720
4	$5,000	$60,000
5	$5,857	$70,280
6	$6,713	$80,560
7	$7,570	$90,840
8	$8,427	$101,120
For each additional person add	$428.33	$5,140

¿Necesita ayuda con sus facturas de agua o aguas residuales?

Estamos aquí para ayudar.

Obtenga más información sobre el Programa de Asistencia al cliente (CAP) de Aqua Pennsylvania

Si usted o alguien que conoce necesita ayuda con sus facturas de agua o aguas residuales, hay asistencia financiera disponible. El nuevo programa de Aqua Pennsylvania está diseñado para ayudar a los clientes con dificultades financieras haciendo que las facturas mensuales sean más fáciles de pagar.

El programa de ayuda está disponible durante todo el año para los hogares que cumplan con los requisitos financieros.

BENEFICIOS DEL PROGRAMA

- Descuentos en las facturas mensuales de agua y alcantarillado
- Crédito de $25 para saldos vencidos cuando se realizan pagos mensuales oportunos

¿Quién es elegible?

Los clientes con ingresos iguales o inferiores a los siguientes requisitos financieros pueden ser elegibles:

TAMAÑO DE LA FAMILIA	TOTAL DE INGRESOS MENSUALES	TOTAL DE INGRESOS ANUALES
1	$2,430	$29,160
2	$3,287	$39,440
3	$4,143	$49,720
4	$5,000	$60,000
5	$5,857	$70,280
6	$6,713	$80,560
7	$7,570	$90,840
8	$8,427	$101,120
Por cada personal adicional añada	$428.33	$5,140

VERIFICATION

I, Rita F. Black, Director, Community Assistance Programs, hereby state that the facts set forth in the foregoing letter dated November 30, 2023 at Docket No. R-2021-3027385 and R-2021-3027386 are true and correct to the best of my knowledge, information, and belief and that I expect to be able to prove the same at any hearing held in this matter. I understand that my statement herein is make subject to the penalties of 18 Pa. C.S.§4904 (relating to unsworn falsification to authorities).

Eligibility Guidelines

AQUA AID
Bringing neighbors & needs together.

General Guidelines

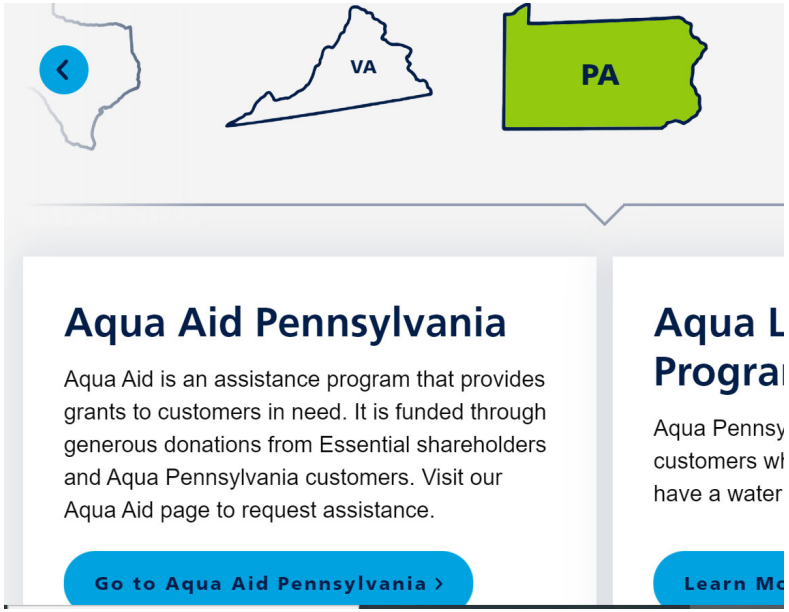
- Arrears, termination notice or service off
- Residential
- Single family
- Income at or below 200% FPL
- One grant per account per calendar year
- Customer must enroll in CAP

Additional Flexibilities

- High bill due to leak (leak has been repaired)
- Special needs (seniors, disabled, etc.) can be served up to 250% FPL
- General grant guideline is $500 maximum, but larger grants could be approved depending on circumstance.
- Other circumstances that warrant assistance to customers who do not fit the general guidelines for participation.

Aqua Aid – Website Info

Currently limited info on website: Topic for discussion: Income chart? Guidelines? Special needs income exceptions



About Aqua Aid Pennsylvania

The program is focused on customers within the communities Aqua serves and is funded by generous donations from our shareholders and Aqua Pennsylvania customers.

How are funds awarded and disbursed?

To learn more and apply please contact our team at AquaCAP@AquaAmerica.com or call 412-208-0618.

Leak Repair Program Examples

From small jobs to multiple issues in one home

- Household income – 84% FPL
- Leak repair services completed:
  - Reset toilet & replace inside parts
  - Kitchen faucet
  - Rebuild bathtub faucet
  - Replace washing machine hoses & install new single bowl laundry tub.
  - $2,800 total expenditure

Other examples of services provided:

- Replace leaking service line – 180% FPL $4,800
- Install valve and flapper on leaking toilet $295

All customers screened for CAP eligibility/participation. Aqua Aid assistance provided for high bill as needed.

Annual budget for leak repair & conservation kits: $100,000

Conservation Kits

- Helping Hand program sent kits to new enrollees, but enrollment levels were very small
- Many CAP participants are low users (i.e. less than 2,000 gallons per month)

Topic for discussion:

- ➢Prioritize by high usage alone?
- ➢Provide to customers who received leak repair services?
- ➢Other ideas/best practices?

Aqua Assistance Collaborative 2024

2024 Meeting Dates	Participants	Topics
• February 21 • May 22 • Aug 21 • Nov 20	• Social service agencies or other stakeholders – **Please share recommendations**	• Program updates • Participation statistics • Trends/barriers/areas of improvement

CAP Enrollment Opportunities

We plan to expand available agencies beyond the current HH agencies to more communities.

- Dollar Energy has an online application at its website www.dollarenergy.org/myapp that is available for Aqua customers
- Customers may apply via phone at 1-888-282-6816
- Participating agencies: Central Susquehanna Opportunities Inc; Community Action of Montgomery County

Income Verification
• Monthly or annual income
• Paystubs; benefit statements; tax forms
• Zero Income Form can be submitted to enroll a customer for 6 months while they obtain income (i.e. benefits)
• Income docs waived if rec'd LIHWAP

NYSE: **WTRG**

Customer Assistance Program (CAP) Discounts

WATER	WASTEWATER
Base Facility Customer Charge: Tiers 1-3: $0 **100% discount on fixed**	Base Facility Customer Charge: Tier 1: **75% discount on fixed** Tier 2: **65% discount on fixed** Tier 3: **50% discount on fixed**
Consumption Charge: **100% discount on consumption of first 2k gallons** for residential water customers at or below 100% FPL. **50% discount on consumption of first 2k gallons** for residential water customers with incomes between 101 and 150% FPL. **0% discount on consumption** for residential water customers with incomes between 151% and 200% FPL.	Consumption Charge: **100% discount on consumption of first 2k gallons** for residential water customers at or below 100% FPL. **50% discount on consumption of first 2k gallons** for residential water customers with incomes between 101 and 150% FPL. **0% discount on consumption** for residential water customers with incomes between 151 and 200% FPL.

AQUA PENNSYLVANIA, INC.
2024 RATE CASE
FILING REQUIREMENTS

A. Statement of Income

SI1. Provide comparative operating statements for the historic test year and the immediately preceding 12 months showing increases and decreases between the two periods. These statements should supply detailed explanation of the causes of the major (greater than 15%) variances between the historic test year and preceding year by detailed account number. Limit the explanation to differences of $10,000 or greater.

A.

Please see the attached Schedule SI1-a for Water, Schedule SI1-b for Shenandoah Water, Schedule SI1-c for Wastewater Base, Schedule SI1-d for Wastewater Lower Makefield, and Schedule SI1-e for Wastewater East Whiteland. Lower Makefield Wastewater and East Whiteland Wastewater were acquired in 2022 and Shenandoah Water was acquired after 12/31/2022; therefore, the comparison of operating statements between the historic test year and the immediately preceding 12 months is not applicable to these divisions. Explanations are provided below for revenue and expenses that meet the variance criteria listed above:

Revenues

Water:

· 4601 - Unmetered Water Revenues decrease is related to the Sun Valley customers that moved from Unmetered to Metered following the rate increase effective May 19, 2022.

· 474 DSIC Charge Revenues decreased due to Distribution System Improvement Charge rate which was reset to 0.00% effective May 19, 2022 when new rates went into effect; Docket No. M-2021-3027385.

Wastewater Base:

· Residential increase primarily due to full year of rate increase reflected in 2023 that was effective May 19, 2022.

· Commercial increase primarily due to full year of rate increase reflected in 2023 that was effective May 19, 2022.

· 5360 Other WW - revenues decreased due to Distribution System Improvement Charge rate which was reset to 0.00% effective May 19, 2022 when new rates went into effect; Docket No. M-2021-3027386.

Expenses

Water:

· Acct. 604 the Employee Benefits decrease reflects the change of the Pension contribution

· Acct. 610 Purchased Water - Increase is attributable to an increase in price per thousand gallons paid by the Company in Downingtown.

· Acct. 616 Purchased Power - Increase is attributable to an increase in generation fuel costs.
· Acct. 618 Chemicals - Increase is attributable to an across the board increase in chemical prices.
· Acct. 620 Supplies - the decrease is primarily attributable to certain types of charges being charged to 675 Other in 2023 compared to prior year being charged to account 620 Supplies
· Acct. 632 OS Accounting - increase is the result of increases to audit fees from the Company's third party auditor.
· Acct. 635 Lab Testing - Increase is attributable to increased testing and increased pricing from third party vendors.
· Acct. 636 OS Other - Decrease is attributable to an insurance receipt from property damage caused by Hurricane Ida in 2021.
· Acct. 666 Amortization of rate Case - Decrease reflects the difference of a full year vs a partial year of 2021/2022 rate case costs.
· Acct. 670 Bad Debt - Decrease in expense due to reverting back to using policy reserve percentages that were in place prior to Covid.
· Acct. 675 Other - the increase is primarily attributable to certain types of charges being charged to 620 Supplies in 2023 compared to prior year being charged to account 675 Other

Expenses

Wastewater Base:

· Acct. 711 Sludge - increase is attributable to an increase in the hauling rate and increase in amount of sludge to be processed.
· Acct. 716 Purchased Power - Increase is attributable to an increase in generation fuel costs.
· Acct. 718 Chemicals - increase is attributable to an across the board increase in chemical prices.
· Acct. 731 OS Engineering - increase in primarily attributable to an increase in ongoing Engineering projects.
· Acct. 732 OS Accounting - increase is the result of increases to audit fees from the Company's third party auditor.
· Acct. 733 OS Legal - The increase reflects an increase in general legal expenses for the Wastewater Base operation.
· Acct. 734 Management Fees - Increase is primarily attributable to the change in the allocation of management fees between water and wastewater.
· Acct. 735 Lab Testing - Increase is attributable to increased testing and increased pricing from third party vendors.
· Acct. 757 Insurance - Increase is primarily attributable to the allocation between water and wastewater.
· Acct. 758 Insurance - Increase is primarily attributable to the allocation between water and wastewater.
· Acct. 759 Insurance - Increase is primarily attributable to the allocation between water and wastewater.
· Acct. 766 Amortization of rate Case - Decrease reflects the difference of a full year vs a partial year of 2021/2022 rate case costs.
· Acct. 770 Bad Debt - Increase in expense due to reverting back to using policy reserve percentages that were in place prior to Covid.
· Acct. 675 Other - The decrease is primarily attributable to certain types of charges being charged to 775 Other in 2022 compared to being charged to OS Other, Lab Testing and Sludge in 2023.

2024 RATE CASE
FILING REQUIREMENTS

A. Statement of Income

SI2. Prepare an income statement for the various time frames of the rate proceeding including:

Column

1—Book recorded income statement for the test year.

2—Adjustments to book recorded income statement to annualize and normalize under present rates.

3—Income statement under present rates after adjustments in Col. 2.

4—Adjustments to Col. 3 for revenue increase requested.

5—Income statement under proposed rates.

A. Please refer to Exhibits 1-A through 1-B, Schedule A-1 for water and Exhibits 1-C through 1-E, Schedule A-1 for wastewater.

AQUA PENNSYLVANIA, INC.
2024 RATE CASE
FILING REQUIREMENTS

A. Statement of Income

SI3. If a company has separate operating divisions, an income statement must be shown for each division, plus an income statement for the company as a whole.

A. Please refer to Exhibits 1-A through 1-B, Schedule A-1 for water and Exhibits 1-C through 1-E, Schedule A-1 for wastewater.

AQUA PENNSYLVANIA, INC.
2024 RATE CASE
FILING REQUIREMENTS

A. Statement of Income

SI4. Provide Operating Income claims under:

a. Present rates.

b. Pro forma present rates (annualized & normalized).

c. Proposed rates (annualized & normalized).

A. Please refer to Exhibits 1-A through 1-B, Schedule A-1 for water and Exhibits 1-C through 1-E, Schedule A-1 for wastewater.

FILING REQUIREMENTS

B. Operating Revenues

OR1. Prepare a summary of operating revenues for the historic test year and the year preceding the historic test year, providing the following information:

a. For each classification of customers:

(i) Number of customers as of year-end.

(ii) Gallons sold.

(iii) Revenues.

b. Customers' penalties and miscellaneous water revenues.

A.

Please refer to Schedules A-2 and B-2 of Exhibits 1-A through 1-B for water and Schedules A-2 and B-2 of Exhibit 1-C through 1-E for wastewater and to the direct testimonies of Gregory R. Herbert and Constance E.Heppenstall and the accompanying Exhibit 5-A for water, Exhibit 5-B for wastewater for the above operating revenue filing requirements. No bill analysis was performed for the year prior to the historic test year on a Company wide basis.

AQUA PENNSYLVANIA, INC.
2024 RATE CASE
FILING REQUIREMENTS

B. Operating Revenues

OR2. Prepare a summary of operating revenues for the historic test year, providing the following information:

a. For each classification of customers and for customers' penalties and miscellaneous water or wastewater revenues:

(i) Revenues.

(ii) Annualizing and normalizing adjustments to arrive at adjusted operating revenues for ratemaking.

(iii) Proposed increase in operating revenues.

(iv) Percent increase in operating revenues.

(v) Operating revenues under proposed rates.

A. Please refer to Schedules B-1 through B-10 of Exhibits 1-A for the water base, which excludes Shenandoah.
Refer to Schedules B-1 through B-10 of Exhibit 1-B for Shenandoah.
Refer to Schedules B-1 through B-7 of Exhibit 1-C for Wastewater Base, which excludes Lower Makefield and East Whiteland.
Refer to Schedules B-1 through B-7 of Exhibits 1-D and 1-E for Lower Makefield and East Whiteland.
Additionally, refer to the direct testimonies of Gregory R. Herbert and Constance E. Heppenstall and the accompanying Exhibit 5-A for water, Exhibit 5-B for wastewater for the above operating revenue filing requirements.

AQUA PENNSYLVANIA, INC.
2024 RATE CASE
FILING REQUIREMENTS

B. Operating Revenues

OR3.

Provide a schedule of present and proposed tariff rates showing dollar change and percent of change by block. Provide increases to customers at various monthly uses (each 5,000 gallon consumption increment) showing billings at existing and proposed rates. Provide also an explanation of any change in block structure and the reason therefore. Provide a copy of the proposed tariff or tariff supplement on a red line basis, to easily identify any changes.

A.

Please refer Exhibit 5-A for water, Exhibit 5-B for wastewater, and to the attached schedule of present and proposed tariff rates and notes showing dollar and block changes.

Please refer to Original Tariff Water-PA P.U.C. No. 4 as filed for Aqua Pennsylvania, Inc.

Please refer to Original Tariff Sewer-PA P.U.C. No. 4 as filed for Aqua Pennsylvania Wastewater, Inc.

AQUA PENNSYLVANIA, INC.
2024 RATE CASE
FILING REQUIREMENTS

B. Operating Revenues

OR4. Provide for the future test year a detailed customer consumption analysis and the application of rates to support present and proposed revenues by customer classification and tariff rate schedule.

A. Please refer to the direct testimonies of Gregory R. Herbert and Constance E. Heppenstall and the accompanying Exhibit 5-A for water, Exhibit 5-B for wastewater for the consumption analysis and the application of rates to support present and proposed revenues by customer classification and tariff rate schedule.

AQUA PENNSYLVANIA, INC.
2024 RATE CASE
FILING REQUIREMENTS

B. Operating Revenues

OR5. Provide detailed computations of the determination of accrued revenues as of historic test year-end and year-end immediately preceding the historic test year, together with a detailed explanation of the procedures and methods used in developing accrued revenues.

A. The Company calculates unbilled or accrued revenues based on each customers most recent water/sewer bill issued. The calculation utilizes the days of service covering the billing period and determines the accrued revenue on a per day basis, which is applied to the unbilled days between the end of the month and the actual read/billing date for the customer. The Company had unbilled revenues accrued of $32,445,255, $31,389,747, and $24,431,223 as of the twelve months ended December 31, 2023, 2022, and 2021 respectively.

AQUA PENNSYLVANIA, INC.
2024 RATE CASE
FILING REQUIREMENTS

B. Operating Revenues

OR6.

Provide a detailed breakdown of miscellaneous water revenues for the historic test year and the two years immediately preceding the historic test year. For the historic test year, provide a monthly breakdown and an explanation of monthly variances greater than 15%.

A. Please see the attached.

FILING REQUIREMENTS

C. Operating Expenses

OE1. Prepare a summary of operating expenses by operating expense account for the historic test year and the 2 years preceding the test year.

A. Please see the attached OE1-a through b for water and attached OE1-c through c for wastewater. Lower Makefield (OE1-d) and East Whiteland (OE1-e) were acquired after 12/31/2021; therefore, the summary of expenses for 12/31/2021 are not applicable. Shenandoah (OE1-b) was acquired after 12/31/2022; therefore, the summary of expenses for 12/31/2021 and 12/31/2022 are not applicable.

AQUA PENNSYLVANIA, INC.
2024 RATE CASE
FILING REQUIREMENTS

C. Operating Expenses

OE2. Prepare a summary of operating expenses for the historic test year providing annualizing and normalizing adjustments to arrive at adjusted future operating expenses for ratemaking, including supporting data.

A. Please refer to Schedule C-2, Summary of Expense Accounts, in Exhibits 1-A and 1-B for water and in Exhibits 1-C through 1-E for wastewater.

AQUA PENNSYLVANIA, INC.
2024 RATE CASE
FILING REQUIREMENTS

C. Operating Expenses

OE3. List extraordinary property losses as a separate item, not included in operating expenses or depreciation and amortization. Sufficient supporting data must be provided, such as explanation and breakdown of costs.

A. The Company has not incurred extraordinary property losses.

AQUA PENNSYLVANIA, INC.
2024 RATE CASE
FILING REQUIREMENTS

C. Operating Expenses

OE4. Supply detailed calculations of normalization of rate case expense, including supporting data for outside services rendered. Provide the items comprising the rate case expense claim (include the actual billings or invoices in support of each kind of rate case expense) and the items comprising the actual expenses of the prior rate cases.

A. a) Please refer to Schedule C-4.4 of Exhibit 1-A through Exhibit 1-B for water and Schedule C-4.4 of Exhibits 1-B through 1-E for wastewater for the Company's rate case expense claims.

b) Prior rate case expense detail:

	2018 Case R-2018-3003558 **Water & Wastewater**
Engineering, Cost Allocation and Depreciation	$ 316,835
Legal	681,419
Other Consultants	77,906
Rate of Return	57,832
Notices and Postage	321,647
Miscellaneous	46,129
Total	$ 1,501,768

	2021 Case R-2021-3027385 / R-2021-3027386 **Water & Wastewater**
Engineering, Cost Allocation and Depreciation	$ 400,000
Legal	1,200,000
Other Consultants	100,000
Rate of Return	95,000
Notices and Postage	340,000
Miscellaneous	65,000
Total	$ 2,200,000

AQUA PENNSYLVANIA, INC.
2024 RATE CASE
FILING REQUIREMENTS

C. Operating Expenses

OE5. Submit detailed computation of adjustments to operating expenses for salary, wage and fringe benefit increases (union and nonunion merit, progression, promotion and general) granted during the historic test year and during the 12 months subsequent to the historic test year. Supply data for the historic test year showing:

a. Actual payroll expense (regular and overtime separately) by categories of operating expenses, i.e., maintenance, operating transmission, distribution, other.

b. Date, percentage increase and annual amount of each general payroll increase during the historic test year and future test year.

c. Dates and annual amounts of merit increases or management salary adjustments.

d. Total annual payroll increases in the historic and future test years.

e. Proof that the actual payroll plus the increases equal the payroll expense claimed in the supporting data by categories of expenses.

f. Detailed list of employee benefits and cost thereof for union and nonunion personnel. Specific benefits for executives and officers should be included, and costs thereof.

g. Support the annualized pension cost figures by providing the following:

(i) State whether these figures include any unfunded pension costs. Explain.

(ii) Provide latest actuarial study used for determining pension accrual rates.

h. Submit a schedule showing any deferred income and consultant fee, paid to both, corporate officers and employees in historic and future test years.

A. a., b., c., d., and e. Please refer to Exhibit 2 and the testimony of Christopher E. Manning.

f. The detailed list of employee benefits will be provided separately and forwarded under a Confidentiality Agreement.

g. Please refer to the Company's response to OE14.

h. The Company has none.

AQUA PENNSYLVANIA, INC.
2024 RATE CASE
FILING REQUIREMENTS

C. Operating Expenses

OE6. Supply an exhibit showing an analysis, by functional accounts, of the charges by affiliates (service corporations, etc.) for services rendered included in the operating expenses of the filing company for the historic and future test years and for the 12-month period ended prior to the historic test year:

a. Supply a copy of contracts, if applicable.

b. Explain the nature of the services provided.

c. Explain the basis on which charges are made.

d. If charges are allocated, identify allocation factors used.

e. Supply the components and amounts comprising the expense in this account.

f. Provide details of initial source of charge and reason thereof.

A. a. Please see the attached.

b., c., and d. Aqua Services offers to Aqua America's subsidiaries a full range of corporate support services, including, but not limited to, accounting, administration, communications, corporate secretarial, customer service and billing, engineering, financial, fleet, human resources, information systems, operations, legal, purchasing, contracts and sales, rates and regulatory compliance, risk management and water quality. All expenses that can be identified as being related exclusively to a specific company shall be charged directly to that company whenever possible, at fully allocated cost, based upon personnel timesheets. Costs that are rendered in common with other affiliated companies shall be allocated among the companies served based upon the number of customers served at the immediately preceding calendar year end as compared to the total number of customers served by the group.

AGREEMENT

This Agreement entered into this 22 day of April, ~~2022~~ 2024 by and between Aqua Pennsylvania, Inc. ("Aqua PA"), a corporation organized and existing under the laws of the Commonwealth of Pennsylvania with its principal place of business located at 762 W. Lancaster Avenue, Bryn Mawr, Pennsylvania 19010, and Essential Utilities, Inc. ("Essential"), a corporation organized and existing under the laws of the Commonwealth of Pennsylvania, with its principal place of business located at 762 W. Lancaster Avenue, Bryn Mawr, PA 19010, and collectively hereinafter referred to jointly as the "Parties" or individually as a "Party"

RECITALS

1. WHEREAS, Aqua PA is a subsidiary of Essential; and

2. WHEREAS, Aqua PA has been organized for and is presently engaged in the business of providing water and/or wastewater services as a public utility in the Commonwealth of Pennsylvania; and

3. WHEREAS, Essential is the parent company of various natural gas, water and/or wastewater companies and provides insurance coverage and treasury and cash management functions for the various water and/or wastewater companies including Aqua PA; and

4. WHEREAS, Aqua PA may request, and Essential may agree to provide, insurance coverage and treasury and cash management functions and the Parties are entering into this Agreement to specifically define the terms by which Essential may provide such insurance coverage and treasury and cash management functions to Aqua PA; and

DocuSign Envelope ID: 54C7B20A-8BA0-4C89-8033-7168CF155FDF

5. WHEREAS, Essential may engage and subcontract with other companies or persons, including other affiliated companies to provide portion of the insurance coverage and treasury and cash management functions; and

6. WHEREAS the insurance coverage and treasury and cash management functions to be provided under this Agreement are to be rendered by Essential to Aqua PA at the lower of their cost or market, as herein provided.

ARTICLE 1. INSURANCE COVERAGE TO BE PROVIDED

1.1 During the term of this Agreement as set forth in Article 4 and upon the terms and conditions hereinafter set forth, Aqua PA may request that Essential provide insurance coverage.

ARTICLE 2. TREASURY AND CASH MANAGEMENT FUNCTIONS

2.1 During the term of this Agreement as set forth in Article 4 and upon the terms and conditions hereinafter set forth, Aqua PA may request that Essential provide treasury and cash management functions,

ARTICLE 3. PAYMENT FOR SERVICES AND BILLING PROCEDURES AND BOOKS AND RECORDS

3.1 In consideration for the services to be rendered by Essential as herein provides, Aqua PA agrees to pay Essential the costs of the services provided to it.

ARTICLE 4. TERM OF AGREEMENT

4.1 This Agreement shall become effective as of the later of (a) the date first set forth above or (b) the date the Parties receive the last of any necessary approval of governmental regulatory agencies having jurisdiction over this Agreement. This Agreement shall supersede all prior agreement, written or oral, which shall terminate on the date of this Agreement become effective. This Agreement shall continue in full force and effect until terminated by either of the Parties

DocuSign Envelope ID: 54C7B20A-8BA0-4C89-8033-7168CF155FDF

hereto giving the other Party hereto thirty (30) days' prior notice in writing; provided however, that this Agreement shall terminate as of the date Aqua PA ceases to be an affiliate of Essential.

ARTICLE 5. BREACH

5.1. Either Party to the Agreement may terminate this Agreement upon material breach by the other Party. The non-breaching Party shall provide written notice of such breach to the other Party by certified mail, setting forth in detail the allege failure and/or deficiency. If such breach is not corrected by the breaching Party within thirty (30) days from receipt of written notice by certified mail, this Agreement shall thereupon terminate.

ARTICLE 6. INFORMATION EXCHANGE

6.1 Aqua PA shall provide such information as required by Essential to perform its obligations hereunder. Such information may need to be provided to third parties in order to obtain insurance coverage or so as to obtain appropriate insurance premiums for insurance covering being provided. Any confidential information will be treated as such and Essential will endeavor to provide information in a confidential matter.

ARTICLE 7. GENERAL PROVISIONS

7.1. JOINT OBLIGATION OF THE PARTIES. Essential and Aqua PA agree to cooperate in all matter that are the subject of this Agreement.

7.2 ARBITRATION. It is the state purpose and goal of both Parties at all times to resolve any disputes and reach agreement by good faith negotiation between the Parties, without recourse to arbitration or other legal actions. In the event, however, that any such dispute cannot be settled through negotiation, either Party may request that the matters(s) in dispute be referred to arbitration. The demand for arbitration must be submitted to the American Arbitration Association within sixty (60) calendar days after the date of such request, in which case the

arbitration shall be conducted at a mutually agreed upon location in accordance with the rules and procedures then existing under the Commercial Arbitration rules of the American Arbitration Association, provided that notwithstanding anything to the contrary contained in such Rules and the following shall apply: The arbitration board shall consists of a single arbitrator. The Parties shall endeavor to agree upon the single arbitrator. If the Parties fail to agree on a single arbitrator within twenty (20) business days, the arbitrator shall be selected by the American Arbitration Association or otherwise in accordance with such Rules. After the appointment of the arbitrator, the arbitrator shall meet as necessary for the purpose of reaching a determination in the dispute, and the decision of the arbitrator, submitted in writing, to the Parties shall be final and binding upon both Parties. Judgment upon any decision rendered by arbitrator may be entered in any court having jurisdiction. Each Party shall bear the expense of its own witnesses, and the expenses of the arbitrator and any general expenses of the arbitration shall be borne equally by the Parties.

7.3. FORCE MAJEURE. Neither Party will be in default or otherwise liable for any delay in or failure of its performance hereunder due to any act of God, adverse weather condition, fire, flood, riot, strike, terrorism, accident, war, governmental requirement, inability to secure materials, labor or transportation, cable cut or other cause beyond the reasonable control of the affected party.

7.4. STANDARD OF CARE. Essential shall perform its services with that degree of care, diligence and professional skill and judgment which is normally exercised by professionals in its industry. Except as otherwise expressly set forth in this Agreement, Essential makes no warranties, representations, or other agreements, expressed or implied with respect to this Agreement and the services provided hereunder. Essential's entire liability to Aqua PA for any

claim, loss, expense, or damage under this Agreement, including any claims for incidental, consequential, indirect, or punitive damages shall in no event exceed the sums actually paid by Aqua PA to Essential during the most recent calendar year.

7.5 ASSIGNMENT. Neither party may assign this Agreement without the prior written consent of the other party, which consent shall not be unreasonably withheld.

7.6 GOVERNING LAW. The Agreement shall be governed by and construed under the laws of the Commonwealth of Pennsylvania.

7.7. INDEMNIFICATION:

7.7.1. To the extent allowed by law, Essential shall defend, indemnify and hold harmless Aqua PA, its officers, directors, employees and agents from and against any and all liability, including liability to third parties, for personal injury, including death, property damage, or other actions, damages, fines, penalties, claims, demands, judgments, losses, costs, expenses, suite and actions (including reasonable attorney's fees), for personal injury, including death, property damage or other injury, to the extent caused by or arising out of negligence or wrongful or willful misconduct on the Part of Essential or its officers, employees, agents, contractors and subcontractors in connection with services provided pursuant to the terms of this Agreement.

7.7.2. To the extent allowed by law, Aqua PA shall defend, indemnify and hold harmless Essential, its officers, directors, employees and agents from and against any and all liability, including liability to third parties, for personal injury, including death, property damage, or other actions, damages, fines, penalties, claims, demands, judgments, losses, costs, expenses, suite and actions (including reasonable attorney's fees), for personal injury, including death, property damage or other injury to the extent caused by or arising out of

negligence or wrongful or willful misconduct on the part of Aqua PA its officers, employees, agents, contractors and subcontractors in connection with services provided pursuant to the terms of this Agreement.

7.8. SEVERABILITY. Each provision of this Agreement is severable from the whole, and if one provision is declared invalid, the other provisions shall remain in effect.

7.9. NO WAIVER. Failure by a party of enforce any provision of this Agreement, or the waiver thereof in any instance, shall not be construed as a general waiver of rights.

7.10. NOTICES. Any notice given or made pursuant to this Agreement will be effective only if in writing and delivered in person, by messenger, by overnight delivery, or by certified mail, return receipt to a Party at the address first written above.

7.11. COMPLETE AGREEMENT. The terms of this Agreement constitute the entire agreement between the Parties concerning the subject matter hereof, and this Agreement may be modified only in a writing signed by both Parties.

7.12. TITLES AND HEADINGS. Titles and headings to sections or paragraphs herein are inserted merely for convenience of reference and are not intended to be a part of or to affect the meaning or interpretation of this Agreement.

7.13. COUNTERPARTS. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

RE: Affiliated Interest Agreement between Aqua Pennsylvania, Inc., PNG Companies, LLC and Aqua Services, Inc. at Docket No. G-2020-3019819

Dear Attorney Hopper:

On May 15, 2020, Aqua Pennsylvania, Inc. filed the above-captioned affiliated interest agreement (AIA) with the Commission pursuant to 66 Pa.C.S. §§ 2102, *et seq.* By the Secretarial Letter dated May 19, 2020, the Commission extended the statutory consideration period for this AIA until further action of the Commission. On April 16, 2021, Aqua filed an executed copy of the AIA at this docket.

Upon review of the filing, it does not appear that the AIA is unreasonable or contrary to the public interest. Therefore, the filing is hereby approved. This approval applies only to the AIA and services, matters, and parties specifically and clearly defined under this instant proceeding. However, approval of this filing does not constitute a determination that associated costs or expenses are reasonable or prudent for the purposes of determining just and reasonable rates. Furthermore, Commission approval is contingent upon the possibility that subsequent audits, reviews, and inquiries in any Commission proceeding may be conducted, pursuant to 66 Pa. C.S. §§ 2102, *et seq*., and further investigation will occur in an appropriate rate proceeding.

Sincerely,

Rosemary Chiavetta
Secretary

AFFILIATED INTEREST AGREEMENT

This Affiliated Interest Agreement ("AIA") dated as of April 14, 2021 between Aqua Services, Inc., a corporation organized and existing under the laws of the Commonwealth of Pennsylvania, with its principal place of business located at 762 West Lancaster Avenue, Bryn Mawr, PA 19010 (hereinafter "Service Company"), Aqua Pennsylvania, Inc., located at 762 West Lancaster Avenue, Bryn Mawr, PA 19010 (hereinafter "Aqua PA") and PNG Companies, LLC, located at 375 North Shore Drive, Suite 600, Pittsburgh, PA 15212 (hereinafter "PNG"), and collectively hereinafter referred to jointly as the "Parties" or individually as a "Party".

RECITALS

1. WHEREAS, Service Company, Aqua PA, and PNG are direct or indirect subsidiaries of Essential Utilities, Inc., a Pennsylvania corporation (hereinafter "Essential"); and

2. WHEREAS, Aqua PA has been organized for and is presently engaged in the business of providing water and/or wastewater services as a public utility in the Commonwealth of Pennsylvania (hereinafter Aqua PA and any of its affiliates that are also engaged in the business of providing water and/or wastewater services as a public utility in the same state are collectively referred to in this Agreement as Aqua PA)

3. WHEREAS, Peoples Natural Gas Company, LLC and Peoples Gas Company LLC (collectively, "Peoples") have been organized for and are presently engaged in the business of providing natural gas service as public utilities in the Commonwealth of Pennsylvania, and which are both wholly-owned direct subsidiaries of PNG, which in turn is a wholly-owned direct subsidiary of LDC Holdings LLC ("Holdings"); Holdings is a Delaware

limited liability company and a wholly-owned direct subsidiary of LDC Funding LLC, a Delaware limited liability company, which is a wholly-owned direct subsidiary of Essential; and

4. WHEREAS, Service Company maintains an organization whose officers and employees are familiar with the utility business, including the business and operations of Aqua PA, and PNG , and have experience and expertise in accounting and financial services, administration, communications, corporate secretarial, customer service and billing, engineering, financial, fleet services, human resources, information systems, operation, rates and regulatory, risk management, water quality, legal, and purchasing, contracts and sales of real estate of water, wastewater and gas utilities. The officers and employees of Service Company are qualified to aid, assist and advise Aqua PA and PNG in their business operations through the services to be performed under this AIA; and

5. WHEREAS, Aqua PA and PNG are entering into this AIA with Service Company to specifically define the types of services available to them, as set forth in Exhibit A attached hereto and made a part hereof, while specifically acknowledging that Service Company shall at all times in the provision of such services act as agent of the principals, Aqua PA and PNG; and

6. WHEREAS, Service Company has entered or proposes to enter into agreements similar to this agreement with other affiliated companies that are direct or indirect subsidiaries of Essential (hereinafter individually a "Subsidiary" or collectively the "Subsidiaries"), including those Subsidiaries that are regulated public utilities and those Subsidiaries that are other non-regulated businesses (the "Non-Regulated Companies"); and

7. WHEREAS, Service Company may engage or subcontract with other companies or persons, including other Subsidiaries, to provide portions of the services hereunder; and

8. WHEREAS, Service Company, Aqua PA and PNG acknowledge that Aqua PA's rates are regulated by the Pennsylvania Public Utility Commission ("PAPUC"), and as such the charges for services provided pursuant to this AIA are subject to approval by the PAPUC); and

9. WHEREAS, the services to be rendered under this AIA are to be rendered by Service Company to Aqua PA and PNG at the lower of their cost or market to Service Company, as hereinafter provided.

NOW, THEREFORE, in consideration of the premises and mutual agreements herein contained, Service Company, Aqua PA and PNG agree as follows:

ARTICLE I. PERSONNEL AND SERVICES TO BE PROVIDED

1.1 During the term of this AIA as set forth in Article V and upon the terms and conditions hereinafter set forth, Service Company may provide to Aqua PA and PNG the Accounting and Financial Services, Administration, Communication, Corporate Secretarial, Customer Service and Billing, Engineering, Financial, Fleet Services, Human Resources, Information Systems, Operation, Rates and Regulatory, Risk Management, Water Quality, Legal, and Purchasing as set forth on Exhibit A attached hereto, provided, however, that Aqua PA and PNG may perform any such services with their own personnel or engage or subcontract with another company or person to provide those services on their behalf. All such services provided by Service Company (or its designees) are integral to the provision of safe and adequate utility service and are performed in an effort to capture economies of scale and to otherwise ensure efficiencies in the cost of providing service to customers.

1.2 Service Company may engage or subcontract with another Subsidiary, company or person to provide the services hereunder on its behalf. If Service Company engages a Subsidiary of Essential to provide any of the services hereunder, such services shall be charged to Aqua PA and PNG on the same basis as the services provided by the Service Company.

1.3 Service Company shall employ qualified officers and employees to provide the services hereunder and those persons shall be available to serve as officers of Aqua PA and PNG.

ARTICLE II. PAYMENT FOR SERVICES

2.1 In consideration for the services to be rendered by Service Company as herein provided, Aqua PA and PNG agree to pay to Service Company the cost of the services provided to them at the lower of cost or market as determined as provided in this Article II and in Article III.

2.2 Directly Charged Services. The costs for service rendered by Service Company personnel directly for (i) Aqua PA shall be charged to Aqua PA based on such personnel's time sheets; and (ii) PNG shall be charged to PNG based on such personnel's time sheets.

2.3 Indirectly Charged Joint Management Personnel Services. For services that are made available by Service Company in common to other Essential Subsidiaries, including Aqua PA and/or PNG, which cannot be identified and are not related exclusively to a particular Subsidiary, and which are provided by senior-level personnel (hereinafter "Joint Management Personnel"), the costs for such services will be derived by allocating a percentage of the cost centers under which Service Company provides such services using the Modified Massachusetts Formula ("MMF"). The MMF is a four-factor formula, which allocates costs to subsidiaries giving equal weight to customer count; rate base; number of employees; and non-labor operations and maintenance expenses ("O&M") and taxes other than income ("TOTI"), as adjusted. In the event of changes due to significant acquisitions, mergers or asset sales, this allocation will be adjusted. The services provided by Joint Management Personnel may include any services as are listed on Exhibit A. Service Company's cost centers to which the MMF applies will be analyzed at least annually by Service Company, Aqua PA and PNG to determine whether the list of services on Exhibit A is complete and appropriate. The Parties may update the list of services on Exhibit A

without amending this Agreement. Once the MMF allocation is complete, the cost for Joint Management Personnel services allocated to PNG will be further allocated between PNG and its subsidiaries (the "PNG Subsidiaries") in accordance with their applicable then-existing affiliated interest agreements. For such costs allocated to Aqua PA, those costs will be first allocated between the water and wastewater Subsidiaries (the "Utility Companies") and the Non-Regulated Companies as set forth in Article 2.4. The portion of the costs for such common services allocated to the Utility Companies or a group of Utility Companies will be further allocated as set forth below in Article 2.5.

2.4 Indirectly Charged Non-Joint Management Personnel Services. For services that are made available by Service Company in common to other Utility Companies, including Aqua PA, and Non-Regulated Companies, which cannot be identified and are not related exclusively to a particular Subsidiary, and which are not provided by Joint Management Personnel, the cost for such services will be first allocated between the Utility Companies and the Non-Regulated Companies based on the relative proportion of the total Utility Companies assets and the Non-Regulated Companies assets at the most recent fiscal year end to the total assets of all the Utility and Non-Regulated Companies assets combined. The portion of the costs for such common services allocated to the Utility Companies or a group of Utility Companies, will be further allocated as set forth below in Article 2.5.

2.5 The portion of the costs for such common services, including Joint Management Personnel and Non-Joint Management Personnel services, allocated to the Utility Companies or a group of Utility Companies will be further and finally allocated to each Utility Company or group of Utility Companies, including Aqua PA, based on the ratio of the number of customers served by each Utility Company or the group of Utility Companies at the most recent fiscal year end to

the number of customers served by all Utility Companies, subject to adjustment during any year for a substantial change in the number of customers at any Utility Company or among the Utility Companies since the previous year-end in accordance with Service Company's accounting policies.

2.5.1 For purposes of this calculation, customers of the Utility Companies who receive both water and wastewater services from a Utility Company will be counted as 1.5 customers.

2.6 Indirectly Charged Customer Service and Billing Services. For Customer Service and Billing Services provided the Utility Companies, including Aqua PA, and to non-affiliated entities ("Third Party Clients") utilizing the Customer Service Billing System employed by the Service Company to provide these Services, which Services cannot be identified and are not related exclusively a particular Utility Company or Third Party Client, the cost for such Customer Service and Billing Services will first be allocated between the Third Party Clients and the Utility Companies based on the relative proportion of Third Party Clients' and Utility Companies' revenues budgeted to be generated from the Customer Service Billing System for the current year to the total budgeted revenues to be generated from the Customer Service Billing System for the current year for all Third Party Clients and Utility Companies combined.

2.6.1 The portion of the costs for such common Customer Service and Billing Services allocated to the Utility Companies or a group of Utility Companies will be further allocated to each Utility Company or group of Utility Companies, including Aqua PA, based on the ratio of the number of customers served by each Utility Company or the group of Utility Companies at the most recent fiscal year end to the number of customers served by all Utility Companies, subject to adjustment during any year for a substantial change in the number of

customers at any Utility Company or among the Utility Companies since the previous year-end in accordance with the Service Company's accounting policies. For purposes of this calculation, customers of the Utility Companies who receive both water and wastewater services from a Utility Company will be counted as 1.5 customers.

2.7 The amount for a Service Company employee's costs to be billed shall be computed on the employee's total labor rate, including base pay and other compensation, payroll taxes and fringe benefits (calculated on a per hour basis), plus a general overhead factor as set forth in Article III.

2.8 All direct expenses of Service Company incurred in connection with services rendered by Service Company which can reasonably be identified and related exclusively to a particular utility, such as Aqua PA, shall be charged directly to that utility.

ARTICLE III. ALLOWANCE FOR OVERHEAD

3.1 In determining the cost for services rendered by the Service Company to Aqua PA and PNG as herein provided, there shall be added to the base pay rate of all officers and employees for whose services charges are to be made, a percentage sufficient to cover the overhead of Service Company, as defined below, allocable to each such officer or employee. The overhead shall be calculated each year and shall be based on the ratio of the total overhead of the Service Company for the year to the total salaries of the Service Company officers and employees for whose services charges are to be made to the Subsidiaries, including Aqua PA and PNG. No general overhead or other markups by the Service Company shall be added to costs incurred for services of consultants or other third parties employed by Service Company.

3.2 The term "overhead" shall include, but not be limited to:

3.2.1 building costs, lease costs, utilities, and other costs associated with office space and equipment; and

3.2.2 taxes other than payroll taxes.

ARTICLE IV. BILLING PROCEDURES AND BOOKS AND RECORDS

4.1 As soon as practicable after the last day of each month, Service Company shall render bills to Aqua PA and PNG for all amounts due from Aqua PA and/or PNG for services and expenses for such month, computed pursuant to Article II and Article III. Alternatively, Service Company may require any other affiliated company from which it procures services for Aqua PA and/or PNG to bill Aqua PA and/or PNG for such services and related expenses on the same basis as set forth in Article II and Article III. Such bills shall be in sufficient detail to show the charge for each service rendered. All amounts shall be paid by Aqua PA and PNG within thirty (30) days after receipt of the bill.

4.2 Service Company agrees to keep its books and records, and to require any other affiliated company providing services to Aqua PA and PNG hereunder to keep their books and records, available at all times for inspection by representatives of Aqua PA and PNG or by regulatory bodies having jurisdiction over Aqua PA and the PNG Subsidiaries during normal business hours and upon reasonable advance notice.

4.3 Service Company shall at any time, upon request of Aqua PA or PNG, furnish any and all information required by Aqua PA and/or PNG with respect to the services rendered by Service Company or any affiliated companies hereunder, the costs thereof, and the allocation of such costs among the Subsidiaries.

ARTICLE V. TERM OF AGREEMENT

5.1 This AIA shall become effective as of the later of (a) the date first set forth above or (b) the date the Parties receive the last of any necessary approvals of governmental regulatory agencies having jurisdiction over this AIA. Upon becoming effective, this AIA shall supersede all prior agreements, written or oral, which shall terminate on the date this AIA becomes effective. This AIA shall continue in full force and effect until terminated by either of the parties hereto giving the other party hereto thirty days' notice in writing; provided, however, that this AIA shall terminate as of the date Aqua PA, PNG or Service Company ceases to be an affiliate of Essential.

5.2 Upon termination of the AIA without cause by Aqua PA or PNG, Service Company shall continue to provide services to the terminating Party at the terminating Party's request for a period of no more than sixty (60) days from and after the effective date of the termination to facilitate the terminating Party's transition to another service provider. Such transition shall be provided on the same terms and conditions as set forth in this AIA, including compensation.

ARTICLE VI. BREACH

6.1 Any Party to the AIA may terminate this AIA upon material breach by the other Party. The non-breaching Party shall provide written notice of such breach to the other Party by certified mail, setting forth in detail the alleged failure and/or deficiency. If such breach is not corrected by the breaching Party within thirty (30) days from receipt of written notice by certified mail, this Agreement shall thereupon terminate as to that Party.

ARTICLE VII. OTHER AGREEMENTS

7.1 It is understood by Aqua PA and PNG that Service Company has entered or may enter into similar agreements with other Subsidiaries to which similar services are to be furnished.

Service Company will not enter into agreements to perform similar services for other companies on terms more favorable than those provided herein.

ARTICLE VIII. INFORMATION EXCHANGE

8.1 Aqua PA and PNG shall provide such information as required by Service Company for Service Company to perform is obligations hereunder. Service Company agrees on behalf of it and its employees and contractors that it will maintain such information as confidential and not disclose such information to third parties unless required by law and applicable regulatory agencies (including the PAPUC). Service Company's obligation of confidentiality will not apply to information which (a) is or becomes available to the public other than as a result of a disclosure by Service Company or its employees or contractors, (b) was in Service Company's possession and obtained on a non-confidential basis prior to its disclosure by Aqua PA or PNG, or (c) becomes available to Service Company on a non-confidential basis from a person or entity other than Aqua PA and/or PNG who Service Company does not know or have reason to know is under an obligation of confidentiality to Aqua PA and/or PNG.

ARTICLE IX. GENERAL PROVISIONS

9.1 JOINT OBLIGATIONS OF THE PARTIES. Service Company, Aqua PA and PNG agree to cooperate in all matters that are the subject of this AIA.

9.1.1 RIGHTS AND OBLIGATIONS OF THE PRINCIPAL. As principals, Aqua PA and PNG understand that (i) Service Company, as their agent, shall act at all times for the benefit of the principals; (ii) principals shall be entitled to exercise control over agent's activities in the fulfillment of its agency functions and responsibilities as set forth in the AIA; (iii) principals are entitled to request and obtain a report from agent detailing actions taken on agent's

behalf under this AIA; and (iv) agent will conscientiously fulfill its duties as agent under the AIA upon the terms most favorable to Aqua PA and PNG.

9.1.2 RIGHTS AND OBLIGATIONS OF THE AGENT. Service Company hereby accepts and agrees to act as Aqua PA's and PNG's agent, and in so doing specifically acknowledges the following: (i) agent shall be entitled to obtain from the principal necessary instructions and consultancy in order to fulfill agent's obligations under the AIA; (ii) upon request, agent shall have a duty to disclose a report detailing all actions taken by agent on behalf of the principal under the AIA; (iii) agent shall act in good faith at all times for the benefit of the principal and in the principal's best interests; (iv) by accepting this agency, Service Company has a duty to ensure (as the principal does) that the costs of performing services on behalf of principal hereunder are just and reasonable so as to maximize recovery of such costs, where appropriate, in Aqua PA's PAPUC-approved rates; and (v) should any cost for services rendered by agent be deemed non-recoverable in customer rates by statute, regulation or the PAPUC, principal shall have the right to reject payment for such services and/or to seek reimbursement from agent for any such costs already paid.

9.2 ARBITRATION. It is the stated purpose and goal of the Parties at all times to resolve any disputes and reach agreement by good faith negotiation between the Parties, without recourse to arbitration or other legal actions. In the event, however, that any such dispute cannot be settled through negotiation, either Party may request that the matter(s) in dispute be referred to arbitration. The demand for arbitration must be submitted to the American Arbitration Association within sixty (60) calendar days after the date of such request, in which case the arbitration shall be conducted at a mutually agreed upon location, in accordance with the rules and procedures then existing under the Commercial Arbitration rules of the American Arbitration Association (the

"Rules"), provided that notwithstanding anything to the contrary contained in such Rules the following shall apply: The arbitration board shall consist of a single arbitrator. The Parties shall endeavor to agree upon the single arbitrator. If the Parties fail to agree on a single arbitrator within twenty (20) business days, the arbitrator shall be selected by the American Arbitration Association or otherwise in accordance with such Rules. The decision of the arbitrator, submitted in writing to the Parties shall be final and binding upon both Parties. Judgment upon any decision rendered by the arbitrator may be entered in any court having jurisdiction. Each Party shall bear the expense of its own witnesses, and the expenses of the arbitrator and any general expenses of the arbitration shall be borne equally by the Parties.

9.3 FORCE MAJEURE. No Party will be in default or otherwise liable for any delay in or failure of its performance hereunder due to any act of God, adverse weather condition, fire, flood, riot, strike, terrorism, accident, war, governmental requirement, inability to secure materials, labor or transportation, cable cut or other cause beyond the reasonable control of the affected party.

9.4 STANDARD OF CARE. Service Company shall perform its services with that degree of care, diligence and professional skill and judgment which is normally exercised by professionals in its industry, and consistent with its duties as agent. Except as otherwise expressly set forth in this AIA, Service Company makes no warranties, representations or other agreements, expressed or implied, with respect to this AIA and the services provided hereunder.

9.5 LIMITATION OF LIABILITY. Service Company's entire liability to Aqua PA and PNG, respectively, for any claim, loss, expense or damage arising under this AIA, including any claims for special, incidental, consequential, indirect or punitive damages, shall in no event exceed the sums actually paid by Aqua PA or PNG, respectively and as the case may be, to Service Company during the most recent calendar year.

9.6 ASSIGNMENT. No Party may assign this AIA without the prior written consent of the other Parties, which consent shall not be unreasonably withheld.

9.7 GOVERNING LAW. This AIA shall be governed by and construed under the laws of the Commonwealth of Pennsylvania.

9.8 INDEMNIFICATION.

9.8.1 To the extent allowed by law, Service Company shall defend, indemnify and hold harmless Aqua PA and PNG, their officers, directors, employees and agents from and against any and all liability, including liability to third parties, for personal injury, including death, property damage, other injury, or other actions, damages, fines, penalties, claims, demands, judgments, losses, costs, expenses, suits and actions (including reasonable attorney's fees), to the extent caused by or arising out of negligence or wrongful or willful misconduct on the part of Service Company or its officers, employees, agents, contractors and subcontractors in connection with services provided pursuant to the terms of this AIA.

9.8.2 To the extent allowed by law, Aqua PA shall defend, indemnify and hold harmless Service Company, its officers, directors, employees and agents from and against any and all liability, including liability to third parties for personal injury, including death, property damage, other injury, or other actions, damages, fines, penalties, claims, demands, judgments, losses, costs, expenses, suits and actions (including reasonable attorney's fees), to the extent caused by or arising out of negligence or wrongful or willful misconduct on the part of Aqua PA or its officers, employees, agents, contractors and subcontractors in connection with services provided pursuant to the terms of this AIA.

9.8.3 To the extent allowed by law, PNG shall defend, indemnify and hold harmless Service Company, its officers, directors, employees and agents from and against any and

all liability, including liability to third parties for personal injury, including death, property damage, other injury, or other actions, damages, fines, penalties, claims, demands, judgments, losses, costs, expenses, suits and actions (including reasonable attorney's fees), to the extent caused by or arising out of negligence or wrongful or willful misconduct on the part of PNG or its officers, employees, agents, contractors and subcontractors in connection with services provided pursuant to the terms of this AIA.

9.9 TAXES. To the extent that the services provided by Service Company, as enumerated herein, are subject to any state or local gross receipts tax (including but not limited to local business privilege taxes in Pennsylvania), Service Company shall have the right to reimbursement of such taxes from Aqua PA and PNG, respectively and as may be appropriate, subject to their rights as set forth above in paragraph 9.1.2(v).

9.10 SEVERABILITY. Each provision of this AIA is severable from the whole, and if one provision is declared invalid, the other provisions shall remain in effect.

9.11 NO WAIVER. Failure by a Party to enforce any provision of this AIA, or the waiver thereof in any instance, shall not be construed as a general waiver of rights.

9.12 NOTICES. Any notice given or made pursuant to this AIA will be effective only if in writing and delivered in person, by messenger, by overnight delivery, or by certified mail, return receipt to a Party at the address first written above.

9.13 COMPLETE AGREEMENT. The terms of this AIA constitute the entire agreement between the Parties concerning the subject matter hereof, and this AIA may be modified only in a writing signed by the Parties. This AIA and the exhibits incorporated herein shall be modified and/or amended only by writing signed by the Parties and shall not be effective until filed with and approved by applicable regulatory agencies, including the PAPUC.

9.14 TITLES AND HEADINGS. Titles and headings to sections or paragraphs herein are inserted merely for convenience of reference and are not intended to be a part of or to affect the meaning or interpretation of this AIA.

9.15 COUNTERPARTS. This AIA may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

IN WITNESS WHEREOF, Service Company, Aqua PA, and PNG have caused this AIA to be signed in their respective corporate names by their respective Presidents or Vice Presidents, as of the day and year first above written.

EXHIBIT A

Without limitation, services to be provided by Service Company will include the following, which are services that are performed by Service Company (or its designees) in an effort to capture economies of scale and to otherwise ensure efficiencies in the cost of providing service to customers of Aqua PA and the PNG Subsidiaries[7]:

A. Accounting and Financial Services. Service Company will oversee and assist in the preparation and implementation of accounting methods and procedures that conform to the requirements, rules and regulation of governmental authorities having jurisdiction over Aqua PA and the PNG Subsidiaries and will oversee and assist in the preparation of Aqua PA and PNG's monthly financial reports, annual reports and other reports, including those for any governmental authorities. Service Company will oversee and assist in the establishment and maintenance of current record keeping techniques; review accounting procedures, methods and forms; and evaluate systems of internal controls for receipt and disbursement of funds, materials and supplies, and other assets. Service Company will assist in the maintenance of accounting records as required by Aqua PA and PNG. Service Company will oversee the work of and cooperate and consult with any independent certified public accountant for Aqua PA and PNG. Service Company will also provide services related to accounts payable, payroll, utility plant accounting, consolidation, SEC reporting/filing, ratemaking, regulatory relations, cash management, capital structure management, capital budgeting and allocation, operating budgeting and long-range planning.

Service Company will assist in the preparation of operating and construction budgets and monitor the control over such budgets by comparing experienced costs to the projections.

---

[7] The definitions used herein are consistent with those used in the AIA to which this Exhibit is a part.

Service Company will prepare or assist in the preparation of federal, state and local tax returns for and to the extent required by Aqua PA and PNG.

B. Administration. Service Company will assist in the performance of Aqua PA's and PNG's corporate activities. Those employees will keep themselves informed on Aqua PA's and PNG's operations. They will make recommendations to Aqua PA and PNG for operating expenditures and for additions to and improvements of property, plant and equipment. They will keep abreast of economic, regulatory, governmental and operational developments and conditions that may affect Aqua PA and PNG and advise Aqua PA and PNG of such developments and conditions to the extent that they may be important to them.

Service Company will provide an internal audit staff for periodic audits of accounts, records, policies and procedures of Aqua PA and PNG and submit reports thereon.

C. Communications. Service Company will recommend procedures to promote satisfactory relations with employees, customers, communities and the general public and assist in the preparation of communication materials, (including press releases, brochures, audio visual presentations and speeches) plant tours, public exhibits and displays and other related services to inform the public.

D. Corporate Secretarial. Service Company will maintain, in such places and manner as may be required by applicable law, corporate documents of Aqua PA and PNG, such as minute books, charters, bylaws, contracts, deeds and other corporate records. It will maintain, or arrange for the maintenance of, records of stockholders of Aqua PA and PNG and perform other corporate secretarial functions as required including preparation of notices of stockholder and director meetings and the minutes thereof.

Service Company will review and may assist in the preparation of documents and reports required by Aqua PA and PNG such as deeds, easements, contracts, charters, franchises, trust indentures and regulatory reports and filings.

E. Customer Service and Billing. Service Company may provide customer service and billing services to Aqua PA including live and automated telephone service to customers, non-telephonic services (including regular mail, facsimile, e-mail and Internet based), rendering of periodic bills and notices to customers based on Aqua PA's tariffs, collections, assisting customers with water service changes, resolving customer disputes, work order distribution, remittance processing and data input to the customer information system.

F. Engineering. Service Company may provide engineering consulting regarding, and provide engineering services in connection with, the design, permitting and constructing of utility facilities.

Service Company may conduct facility planning, hydraulic analyses and prepare or review maps, charts, operating statistics, reports and other pertinent data, as needed to support these engineering services. It may assist in the protection of their properties by periodic inspection of their structures, including, as applicable, tanks reservoirs, dams, wells and electrical and mechanical equipment.

The engineering services provided by Service Company may also include the conduct of field investigations as necessary to obtain engineering information and, when required, the preparation of studies, reports, designs, drawings, cost estimates, specifications, and contracts for the construction of additions to or improvements of sources of supply, treatment plants, pumping stations, collection and distribution systems, and such other facilities as may be requested Service Company may provide a materials management program to arrange for the

purchase of equipment, materials, and supplies in volume on a basis advantageous to Aqua PA and PNG and assist in the evaluation of new and existing products and application procedures.

G. Financial. Service Company will assist in the development and implementation of financing programs for Aqua PA and PNG, including the furnishing of advice from time to time on securities market conditions and the form and timing of financing; advice concerning arrangements for the sale of securities; and assistance in the preparation of necessary papers, documents, registration statements, prospectuses, petitions, applications and declarations. Service Company will prepare reports to be filed with, and reply to inquiries made by, security holders and bond and mortgage trustees.

Service Company will assist Aqua PA and PNG in treasury and cash management functions, including arrangements for bank credit lines, establishment of collection policies, and development of temporary investment programs.

H. Fleet Services. Service Company may provide various fleet management services, including assistance with vehicle ordering and leasing, fuel card management, vehicle maintenance support and oversight, vehicle signage, vehicle tides and driver training.

I. Human Resources. Service Company will assist in obtaining qualified personnel in establishing appropriate rates of pay for those employees, and in negotiating with bargaining units, if any, representing employees. Service Company will recommend and/or carry out training programs for the development of personnel and advise and assist Aqua PA and PNG regarding personnel issues and human resource policies and procedure. It will also advise and assist Aqua PA and PNG in regard to group employee insurance, pension and benefit plans and in the drafting or revising of those plans when required. It will provide advice regarding employment and benefit laws and procedures and assist in implementing controls for compliance with such laws.

J. Information Systems. Service Company will make available to Aqua PA and PNG electronic data processing systems, networks, applications and services. Service Company will design, implement and maintain a computer network, data communications system, database and applications services, desktop and laptop computers, and peripheral equipment along with periodic upgrades, data backups and recovery procedures for the benefit of Aqua and PNG.

K. Operation. Service Company may develop and assist in' the implementation of operating procedures to promote the efficient and economic operation of Aqua PA and PNG. Periodic operational reviews may be performed by Service Company personnel and recommendations for improvements will be reported to Aqua PA and PNG.

L. Rates and Regulatory. Service Company personnel will make recommendations for changes in rates, tariffs, rules and regulations and will assist in the conduct of proceedings before, and in their compliance with the rulings of, regulatory bodies having jurisdiction over their operations. These personnel will keep abreast of economic and regulatory developments and conditions that may affect Aqua PA and the PNG and advise Aqua PA and/or PNG of developments and conditions to the extent that they may be important to Aqua PA and/or PNG. Service Company Rates and Regulatory personnel will assist in the preparation of rate filings, or applications and the supporting documents and exhibits requested or required by regulatory commissions. Service Company will also provide qualified personnel to testify as required during any regulatory proceedings.

M. Risk Management. Service Company will provide risk management services to review the exposures to accidental loss, recommend methods of protection, either through the purchase of insurance, self-insurance or other risk management techniques and arrange for the purchase of insurance coverage. Service Company will also supervise the investigation of claims

and assist in the negotiation and settlement of such claims at the request of Aqua PA and/or PNG. It will assist, as requested by Aqua PA and/or PNG, in the establishment of safety and security programs.

N. Water Quality. Service Company will provide information to Aqua PA on relevant current or pending water quality, drinking water, and other environmental regulations. It will review water quality data and provide advice and consultation to assist Aqua PA in complying with current and proposed water quality standards set by federal or state agencies. It will provide technical assistance and general direction for Aqua PA personnel on water quality issues, assist in selecting compliance strategies and evaluating alternatives for capital projects driven by environmental compliance or water quality, and assist in providing responses to and coordination with public agencies to maintain or achieve compliance.

Service Company will also provide laboratory testing services for compliance testing for which it or its affiliated lab is certified in a particular state, or for non-compliance testing where special testing services or a check on a local lab might be needed. Service Company will help evaluate pricing of local and regional laboratory services, provide competitive pricing where appropriate in negotiating pricing with contract laboratories, and will provide inspection and/or audits of contract labs where appropriate.

Service Company will provide services for the generation and distribution of Annual Water Quality Reports (CCR's) in compliance with state and federal requirements and will post and maintain these documents on the Aqua PA website. The Service Company will also assist in drafting and/or editing required public notices and public educations material related to water quality.

O. Environmental Matters. Service Company may provide information on relevant current or pending environmental regulations. It will provide advice and consultation to assist in complying with current and proposed environmental standards set by federal or state agencies. It will provide technical assistance and general direction in selecting compliance strategies and evaluating alternatives for capital projects driven by environmental compliance and assist in providing responses to and coordination with public agencies to maintain or achieve compliance.

P. Legal. Service Company will provide legal services, including legal advice and representation on legal matters. Service Company will also provide oversight of outside council retained to represent Aqua PA and/or PNG.

Q. Purchasing, Contracts and Sales of Real Estate. Service Company may (a) act as purchasing agent for Aqua PA and PNG, so far as it is feasible, in the purchase of supplies, materials and equipment for which Aqua PA and/or PNG may submit a requisition through the Service Company's purchasing system; (b) endeavor to secure prompt shipment and delivery items ordered; (c) provide Aqua PA and PNG the benefit of cash, trade and quantity discounts obtained by Service Company with respect to items ordered for each; (d) keep in touch with market conditions and endeavor to recommend to Aqua PA and PNG purchases at advantageous times; (e) negotiate purchases and sales of real estate and the terms of leases; (f) analyze quotations or competitive bids of suppliers or contractors submitted to Aqua PA and/or PNG and make recommendations relative thereto; and (g) establish and assist in the administration of purchasing card accounts.

AFFILIATED INTEREST AGREEMENT

This Affiliated Interest Agreement ("AIA") dated as of December 20, 2021, between Aqua Pennsylvania, Inc., a corporation organized and existing under the laws of the Commonwealth of Pennsylvania, with its principal place of business located at 762 W. Lancaster Avenue, Bryn Mawr, PA 19010 (hereinafter "Aqua PA"), and Aqua Pennsylvania Wastewater, Inc., a corporation organized and existing under the laws of the Commonwealth of Pennsylvania, with its principal place of business located at 762 W. Lancaster Avenue, Bryn Mawr, PA 19010, (hereinafter "Aqua Wastewater"), and collectively hereinafter referred to jointly as the "Parties" or individually as a "Party".

RECITALS

A. WHEREAS, Aqua PA and Aqua Wastewater are direct or indirect subsidiaries of Essential Utilities, Inc., a Pennsylvania corporation (hereinafter "Essential"); and

B. WHEREAS, Aqua PA is currently a wholly-owned direct subsidiary of Essential; and

C. WHEREAS, Aqua PA has been organized for and is presently engaged in the business of providing water services as a public utility in the Commonwealth of Pennsylvania; and

D. WHEREAS, Aqua PA maintains an organization whose officers and employees are familiar with the water and wastewater utility business, accounting and financial services, administration, communications, corporate secretarial, customer service and billing, engineering, financial, fleet services, human resources, information systems, operation, rates and regulatory, risk management, water quality, legal, and purchasing, contracts and sales of real estate of water and wastewater utilities. The officers and employees of Aqua PA are qualified to aid, assist and advise Aqua Wastewater in its business operations through the services to be performed under this

AIA listed in **Exhibit A**; and

E. WHEREAS, Aqua Wastewater is a wholly-owned indirect subsidiary of Essential; and

F. WHEREAS, Aqua Wastewater has been organized for and is presently engaged in the business of providing wastewater services as a public utility in the Commonwealth of Pennsylvania; and

G. WHEREAS, the Parties believe that it is in their interest to enter into an arrangement whereby Aqua PA may agree to purchase administrative, financial, management, and other services described herein, from Aqua Services, Inc. ("Service Company"), other Essential affiliates or third parties, which will be provided at the lower of cost or market; and

H. WHEREAS, Aqua Wastewater is entering into this AIA with Aqua PA to specifically define the types of services available to it as set forth in **Exhibit A** attached hereto and made a part hereof; and

NOW, THEREFORE, in consideration of the premises and mutual agreements herein contained, Aqua PA and Aqua Wastewater agree as follows:

ARTICLE I
PERSONNEL AND SERVICES TO BE PROVIDED

1.1 During the term of this AIA as set forth in Article V and upon the terms and conditions hereinafter set forth, Aqua PA may provide to Aqua Wastewater administration, accounting and financial, administration, communication, corporate secretarial, customer service and billing, engineering, financial, fleet services, human resources, information systems, operations, rates and regulatory, risk management, water quality, legal and purchasing as set forth on **Exhibit A** attached hereto, provided, however, that Aqua Wastewater may perform any such services with its own personnel or engage another company or person to provide those services on

its behalf. Aqua PA may engage or subcontract with another company, including Service Company, or person to provide such services on its behalf.

1.2 Aqua PA shall employ qualified officers and employees to provide the services hereunder and those persons shall be available to serve as officers of Aqua Wastewater.

ARTICLE II
PAYMENT FOR SERVICES

2.1 In consideration for the services to be rendered by Aqua PA as herein provided, Aqua Wastewater agrees to pay to Aqua PA the cost of the services provided to it as determined as provided in this Article II and in Article III.

2.2 Directly Charged Services.

2.2.1 The costs for service rendered by Aqua PA personnel directly for Aqua Wastewater shall be charged based on such personnel's time sheets.

2.2.2 All direct expenses of Aqua PA incurred in connection with services rendered by Aqua PA, Service Company or third parties, which can reasonably be identified and related exclusively to Aqua Wastewater shall be charged directly to Aqua Wastewater.

2.3 Indirectly Charged Services.

2.3.1. For services that are made available by Aqua PA, or charged to Aqua PA by Service Company, which cannot be identified and are not related exclusively to Aqua PA or Aqua Wastewater, the cost for such services will be allocated between the Parties based on the ratio of the number of customers served by each of them at the most recent fiscal year end, subject to adjustment during any year for a substantial change in the number of customers of Aqua PA or Aqua Wastewater since the previous year-end.

2.3.2 The amount for an Aqua PA employee's costs to be billed shall be computed on the employee's total labor rate, including base pay and other compensation, payroll taxes and

fringe benefits (calculated on a per hour basis), plus a general overhead factor as set forth in Article III.

ARTICLE III
ALLOWANCE FOR OVERHEAD

3.1 In determining the cost for services rendered by Aqua PA to Aqua Wastewater as herein provided, there shall be added to the base pay rate of all officers and employees for whose services charges are to be made, a percentage sufficient to cover the overhead of Aqua PA, as defined below, allocable to each such officer or employee. The overhead shall be calculated each year and shall be based on the ratio of the total overhead of Aqua PA for the year to the total salaries of Aqua PA officers and employees for whose services charges are to be made to Aqua Wastewater. No general overhead or other markups by Aqua PA shall be added to costs incurred for services of consultants or other third parties employed by Aqua PA.

3.2 The term "overhead" shall include, but not be limited to:

3.2.1 building costs, lease costs, utilities, and other costs associated with office space and equipment, and

3.2.2 taxes other than payroll taxes.

ARTICLE IV
BILLING PROCEDURES AND BOOKS AND RECORDS

4.1 As soon as practicable after the last day of each month, Aqua PA shall render a bill to Aqua Wastewater for all amounts due from Aqua Wastewater for services and expenses for such month, computed pursuant to Article II and Article III. Such bills shall be in sufficient detail to show the charge for each service rendered. All amounts shall be paid by Aqua Wastewater within thirty (30) days after receipt of the bill.

4.2 Aqua PA agrees to keep its books and records, and to require Service Company or any other affiliate if providing services to Aqua Wastewater hereunder to keep their books and

records, available at all times for inspection by representatives of Aqua Wastewater or by regulatory bodies having jurisdiction over Aqua Wastewater during normal business hours and upon reasonable advance notice.

4.3 Aqua PA shall at any time, upon request of Aqua Wastewater, furnish any and all information required by Aqua Wastewater with respect to the services rendered by Aqua PA, Service Company or other affiliates hereunder, the costs thereof, and the allocation of such costs to Aqua Wastewater.

ARTICLE V
TERM OF AGREEMENT

5.1 This AIA shall become effective as of the later of (a) the date first set forth above or (b) the date the Parties receive the last of any necessary approvals of governmental regulatory agencies having jurisdiction over this AIA. Upon becoming effective, this AIA shall supersede all prior agreements, written or oral, which shall terminate on the date this AIA becomes effective. This AIA shall continue in full force and effect until terminated by either of the parties hereto giving the other party hereto thirty days' notice in writing; provided, however, that this AIA shall terminate as of the date Aqua PA or Aqua Wastewater ceases to be an affiliate of Essential.

5.2 Upon termination of the AIA without cause by Aqua Wastewater, Aqua PA shall continue to provide services to Aqua Wastewater at its request for a period of no more than sixty (60) days from and after the effective date of the termination to facilitate Aqua Wastewater's transition to another service provider. Such transition shall be provided on the same terms and conditions as set forth in this Agreement, including compensation.

ARTICLE VI
BREACH

6.1 Either Party to the AIA may terminate this AIA upon material breach by the other Party. The non-breaching Party shall provide written notice of such breach to the other Party by

certified mail, setting forth in detail the alleged failure and/or deficiency. If such breach is not corrected by the breaching Party within thirty (30) days from receipt of written notice by certified mail, this AIA shall thereupon terminate.

ARTICLE VII
OTHER AGREEMENTS

7.1 It is understood by Aqua Wastewater that Aqua PA has entered or may enter into similar agreements with other affiliates to which similar services are to be furnished. Aqua PA will not enter into agreements to perform similar services for other companies on terms more favorable than those provided herein.

ARTICLE VIII
INFORMATION EXCHANGE

8.1 Aqua Wastewater shall provide such information as required by Aqua PA for Aqua PA to perform is obligations hereunder. Aqua PA agrees on behalf of it and its employees and contractors that it will maintain such information as confidential and not disclose such information to third parties unless required by law and applicable regulatory agencies (including the Pennsylvania Public Utility Commission ("PAPUC")). Aqua PA's obligation of confidentiality will not apply to information which (a) is or becomes available to the public other than as a result of a disclosure by Aqua PA or its employees or contractors, (b) was in Aqua PA's possession and obtained on a non-confidential basis prior to its disclosure by Aqua Wastewater, or (c) becomes available to Aqua PA on a non-confidential basis from a person or entity other than Aqua Wastewater who Aqua PA does not know or have reason to know is under an obligation of confidentiality to Aqua Wastewater.

ARTICLE IX
GENERAL PROVISIONS

9.1 JOINT OBLIGATIONS OF THE PARTIES. Aqua PA and Aqua Wastewater agree to cooperate in all matters that are the subject of this AIA.

9.2 ARBITRATION. It is the stated purpose and goal of the Parties at all times to resolve any disputes and reach agreement by good faith negotiation between the Parties, without recourse to arbitration or other legal actions. In the event, however, that any such dispute cannot be settled through negotiation, either Party may request that the matter(s) in dispute be referred to arbitration. The demand for arbitration must be submitted to the American Arbitration Association within sixty (60) calendar days after the date of such request, in which case the arbitration shall be conducted at a mutually agreed upon location, in accordance with the rules and procedures then existing under the Commercial Arbitration rules of the American Arbitration Association, provided that notwithstanding anything to the contrary contained in such Rules the following shall apply: The arbitration board shall consist of a single arbitrator. The Parties shall endeavor to agree upon the single arbitrator. If the Parties fail to agree on a single arbitrator within twenty (20) business days, the arbitrator shall be selected by the American Arbitration Association or otherwise in accordance with such Rules. After the appointment of the arbitrator, the arbitrator shall meet as necessary for the purpose of reaching a determination in the dispute, and the decision of the arbitrator, submitted in writing, to the Parties shall be final and binding upon both Parties. Judgment upon any decision rendered by arbitrator may be entered in any court having jurisdiction. Each Party shall bear the expense of its own witnesses, and the expenses of the arbitrator and any general expenses of the arbitration shall be borne equally by the Parties.

9.3 FORCE MAJEURE. No Party will be in default or otherwise liable for any delay in or failure of its performance hereunder due to any act of God, adverse weather condition, fire,

flood, riot, strike, terrorism, accident, war, governmental requirement, inability to secure materials, labor or transportation, cable cut or other cause beyond the reasonable control of the affected Party.

9.4 STANDARD OF CARE. Aqua PA shall perform its services with that degree of care, diligence and professional skill and judgment which is normally exercised by professionals in its industry. Except as otherwise expressly set forth in this AIA, Aqua PA makes no warranties, representations or other agreements, expressed or implied with respect to this AIA and the services provided hereunder. Aqua PA's entire liability to Aqua Wastewater for any claim, loss, expense or damage under this AIA, including any claims for special, incidental, consequential, indirect or punitive damages shall in no event exceed the sums actually paid by Aqua Wastewater to Aqua PA during the most recent calendar year.

9.5 ASSIGNMENT. No Party may assign this AIA without the prior written consent of the other Party, which consent shall not be unreasonably withheld.

9.6 GOVERNING LAW. This AIA shall be governed by and construed under the laws of the Commonwealth of Pennsylvania.

9.7 INDEMNIFICATION:

9.7.1 To the extent allowed by law, Aqua PA shall defend, indemnify and hold harmless Aqua Wastewater, its officers, directors, employees and agents from and against any and all liability, including liability to third parties, for personal injury, including death, property damage, other injury, or other actions, damages, fines, penalties, claims, demands, judgments, losses, costs, expenses, suits and actions (including reasonable attorney's fees), to the extent caused by or arising out of negligence or wrongful or willful misconduct on the part of Aqua PA or its officers, employees, agents, contractors and subcontractors in connection with services provided pursuant to the terms of this AIA.

9.7.2 To the extent allowed by law, Aqua Wastewater shall defend, indemnify and hold harmless Aqua PA, its officers, directors, employees and agents from and against any and all liability, including liability to third parties, for personal injury, including death, property damage, other injury, or other actions, damages, fines, penalties, claims, demands, judgments, losses, costs, expenses, suite and actions (including reasonable attorney's fees), to the extent caused by or arising out of negligence or wrongful or willful misconduct on the part of Aqua Wastewater or its officers, employees, agents, contractors and subcontractors in connection with services provided pursuant to the terms of this AIA.

9.8 SEVERABILITY. Each provision of this AIA is severable from the whole, and if one provision is declared invalid, the other provisions shall remain in effect.

9.9 NO WAIVER. Failure by a Party to enforce any provision of this AIA, or the waiver thereof in any instance shall not be construed as a general waiver of rights.

9.10 NOTICES. Any notice given or made pursuant to this AIA will be effective only if in writing and delivered in person, by messenger, by overnight delivery, or by certified mail, return receipt to a Party at the address first written above.

9.11 COMPLETE AGREEMENT. The terms of this AIA constitute the entire agreement between the Parties concerning the subject matter hereof, and this AIA may be modified only in a writing signed by both Parties. This AIA and the exhibits incorporated herein shall be modified and/or amended only by writing signed by the Parties and shall not be effective until filed with and approved by applicable regulatory agencies, including the PAPUC.

9.12 TITLES AND HEADINGS. Titles and headings to sections or paragraphs herein are inserted merely for convenience of reference and are not intended to be a part of or to affect the meaning or interpretation of this AIA.

9.13 COUNTERPARTS. This AIA may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

IN WITNESS WHEREOF, Aqua PA and Aqua Wastewater have caused this AIA to be signed in their respective corporate names by their respective Presidents or Vice Presidents, as of the day and year first above written.

EXHIBIT A

SERVICES

Without limitation, services to be provided by Aqua PA will include the following:

A. Accounting and Financial Services. Aqua PA will oversee and assist in the preparation and implementation of accounting methods and procedures that conform to the requirements, rules and regulation of governmental authorities having jurisdiction over Aqua Wastewater and will oversee and assist in the preparation of Aqua Wastewater's monthly financial reports, annual reports and other reports, including those for any governmental authorities. Aqua PA will oversee and assist in the establishment and maintenance of current record keeping techniques; review accounting procedures, methods and forms; and evaluate systems of internal controls for receipt and disbursement of funds, materials and supplies, and other assets. Aqua PA will assist in the maintenance of accounting records as required by Aqua Wastewater. Aqua PA will oversee the work of and cooperate and consult with any independent certified public accountant for Aqua Wastewater. Aqua PA will also provide services related to accounts payable, payroll, utility plant accounting, consolidation, SEC reporting/filing, ratemaking, regulatory relations, cash management, capital structure management, capital budgeting and allocation, operating budgeting and long-range planning.

Aqua PA will assist in the preparation of operating and construction budgets and monitor the control over such budgets by comparing experienced costs to the projections.

Aqua PA will prepare or assist in the preparation of federal, state and local tax returns for and to the extent required by Aqua Wastewater.

B. Administration. Aqua PA will assist in the performance of Aqua Wastewater's corporate activities. Those employees will keep themselves informed on Aqua Wastewater's

operations. They will make recommendations to Aqua Wastewater for operating expenditures and for additions to and improvements of property, plant and equipment. They will keep abreast of economic, regulatory, governmental and operational developments and conditions that may affect Aqua Wastewater and advise Aqua Wastewater of such developments and conditions to the extent that they may be important to them.

Aqua PA will provide an internal audit staff for periodic audits of accounts, records, policies and procedures of Aqua Wastewater and submit reports thereon.

C. Communications. Aqua PA will recommend procedures to promote satisfactory relations with employees, customers, communities and the general public and assist in the preparation of communication materials, (including press releases, brochures, audio visual presentations and speeches) plant tours, public exhibits and displays and other related services to inform the public.

D. Corporate Secretarial. Aqua PA will maintain, in such places and manner as may be required by applicable law, corporate documents of Aqua Wastewater, such as minute books, charters, bylaws, contracts, deeds and other corporate records. It will maintain, or arrange for the maintenance of, records of stockholders of Aqua Wastewater and perform other corporate secretarial functions as required including preparation of notices of stockholder and director meetings and the minutes thereof.

Aqua PA will review and may assist in the preparation of documents and reports required by Aqua Wastewater such as deeds, easements, contracts, charters, franchises, trust indentures and regulatory reports and filings.

E. Customer Service and Billing. Aqua PA may provide customer service and billing services to Aqua Wastewater including live and automated telephone service to customers,

non-telephonic services (including regular mail, facsimile, e-mail and Internet based), rendering of periodic bills and notices to customers based on Aqua Wastewater's tariffs, collections, assisting customers with water service changes, resolving customer disputes, work order distribution, remittance processing and data input to the customer information system.

F. Engineering. Aqua PA may provide engineering consulting regarding, and provide engineering services in connection with, the design, permitting and constructing of utility facilities.

Aqua PA may conduct facility planning, hydraulic analyses and prepare or review maps, charts, operating statistics, reports and other pertinent data, as needed to support these engineering services. It may assist in the protection of their properties by periodic inspection of their structures, including, as applicable, tanks reservoirs, dams, wells and electrical and mechanical equipment.

The engineering services provided by Aqua PA may also include the conduct of field investigations as necessary to obtain engineering information and, when required, the preparation of studies, reports, designs, drawings, cost estimates, specifications, and contracts for the construction of additions to or improvements of sources of supply, treatment plants, pumping stations, collection and distribution systems, and such other facilities as may be requested. Aqua PA may provide a materials management program to arrange for the purchase of equipment, materials, and supplies in volume on a basis advantageous to Aqua Wastewater and assist in the evaluation of new and existing products and application procedures.

G. Financial. Aqua PA will assist in the development and implementation of financing programs for Aqua Wastewater, including the furnishing of advice from time to time on securities market conditions and the form and timing of financing; advice concerning arrangements for the sale of securities; and assistance in the preparation of necessary papers, documents, registration

statements, prospectuses, petitions, applications and declarations. Aqua PA will prepare reports to be filed with, and reply to inquiries made by, security holders and bond and mortgage trustees.

Aqua PA will assist Aqua Wastewater in treasury and cash management functions, including arrangements for bank credit lines, establishment of collection policies, and development of temporary investment programs.

H. Fleet Services. Aqua PA may provide various fleet management services, including assistance with vehicle ordering and leasing, fuel card management, vehicle maintenance support and oversight, vehicle signage, vehicle tides and driver training.

I. Human Resources. Aqua PA will assist in obtaining qualified personnel in establishing appropriate rates of pay for those employees, and in negotiating with bargaining units, if any, representing employees. Aqua PA will recommend and/or carry out training programs for the development of personnel and advise and assist Aqua Wastewater regarding personnel issues and human resource policies and procedure. It will also advise and assist Aqua Wastewater in regard to group employee insurance, pension and benefit plans and in the drafting or revising of those plans when required. It will provide advice regarding employment and benefit laws and procedures and assist in implementing controls for compliance with such laws.

J. Information Systems. Aqua PA will make available to Aqua Wastewater electronic data processing systems, networks, applications and services. Aqua Wastewater will design, implement and maintain a computer network, data communications system, database and applications services, desktop and laptop computers, and peripheral equipment along with periodic upgrades, data backups and recovery procedures for the benefit of Aqua Wastewater.

K. Operation. Aqua PA may develop and assist in' the implementation of operating procedures to promote the efficient and economic operation of Aqua Wastewater. Periodic

operational reviews may be performed by Aqua PA personnel and recommendations for improvements will be reported to Aqua Wastewater.

L. Rates and Regulatory. Aqua PA personnel will make recommendations for changes in rates, tariffs, rules and regulations and will assist in the conduct of proceedings before, and in their compliance with the rulings of, regulatory bodies having jurisdiction over their operations. These personnel will keep abreast of economic and regulatory developments and conditions that may affect Aqua Wastewater and advise Aqua Wastewater of developments and conditions to the extent that they may be important to Aqua Wastewater. Aqua PA Rates and Regulatory personnel will assist in the preparation of rate filings, or applications and the supporting documents and exhibits requested or required by regulatory commissions. Aqua PA will also provide qualified personnel to testify as required during any regulatory proceedings.

M. Risk Management. Aqua PA will provide risk management services to review the exposures to accidental loss, recommend methods of protection, either through the purchase of insurance, self-insurance or other risk management techniques and arrange for the purchase of insurance coverage. Aqua PA will also supervise the investigation of claims and assist in the negotiation and settlement of such claims at the request of Aqua Wastewater. It will assist, as requested by Aqua Wastewater, in the establishment of safety and security programs.

N. Water Quality. Aqua PA will provide information to Aqua Wastewater on relevant current or pending water quality, drinking water, and other environmental regulations. It will review water quality data and provide advice and consultation to assist Aqua Wastewater in complying with current and proposed water quality standards set by federal or state agencies. It will provide technical assistance and general direction for Aqua Wastewater personnel on water quality issues, assist in selecting compliance strategies and evaluating alternatives for capital

projects driven by environmental compliance or water quality, and assist in providing responses to and coordination with public agencies to maintain or achieve compliance.

Aqua PA will also provide laboratory testing services for compliance testing for which it or its affiliated lab is certified in a particular state, or for non-compliance testing where special testing services or a check on a local lab might be needed. Aqua PA will help evaluate pricing of local and regional laboratory services, provide competitive pricing where appropriate in negotiating pricing with contract laboratories, and will provide inspection and/or audits of contract labs where appropriate.

Aqua PA will provide services for the generation and distribution of Annual Water Quality Reports (CCR's) in compliance with state and federal requirements and will post and maintain these documents on the Aqua website. Aqua PA will also assist in drafting and/or editing required public notices and public educations material related to water quality.

O. Environmental Matters. Aqua PA may provide information on relevant current or pending environmental regulations. It will provide advice and consultation to assist in complying with current and proposed environmental standards set by federal or state agencies. It will provide technical assistance and general direction in selecting compliance strategies and evaluating alternatives for capital projects driven by environmental compliance and assist in providing responses to and coordination with public agencies to maintain or achieve compliance.

P. Legal. Aqua PA will provide legal services, including legal advice and representation on legal matters. Aqua PA will also provide oversight of outside council retained to represent Aqua Wastewater.

Q. Purchasing, Contracts and Sales of Real Estate. Aqua PA may (a) act as purchasing agent for Aqua Wastewater, so far as it is feasible, in the purchase of supplies, materials and

equipment for which Aqua Wastewater may submit a requisition through the purchasing system; (b) endeavor to secure prompt shipment and delivery items ordered; (c) provide Aqua Wastewater the benefit of cash, trade and quantity discounts obtained by Aqua PA with respect to items ordered for each; (d) keep in touch with market conditions and endeavor to recommend to Aqua Wastewater purchases at advantageous times; (e) negotiate purchases and sales of real estate and the terms of leases; (f) analyze quotations or competitive bids of suppliers or contractors submitted to Aqua Wastewater and make recommendations relative thereto; and (g) establish and assist in the administration of purchasing card accounts.

AFFILIATED INTEREST AGREEMENT

This Affiliated Interest Agreement ("AIA") dated as of December 20, 2021, between Aqua Pennsylvania, Inc., a corporation organized and existing under the laws of the Commonwealth of Pennsylvania, with its principal place of business located at 762 W. Lancaster Avenue, Bryn Mawr, PA 19010 (hereinafter "Aqua PA"), and Aqua Pennsylvania Wastewater, Inc., a corporation organized and existing under the laws of the Commonwealth of Pennsylvania, with its principal place of business located at 762 W. Lancaster Avenue, Bryn Mawr, PA 19010, (hereinafter "Aqua Wastewater"), and collectively hereinafter referred to jointly as the "Parties" or individually as a "Party".

RECITALS

A. WHEREAS, Aqua PA and Aqua Wastewater are direct or indirect subsidiaries of Essential Utilities, Inc., a Pennsylvania corporation (hereinafter "Essential"); and

B. WHEREAS, Aqua PA is currently a wholly-owned direct subsidiary of Essential; and

C. WHEREAS, Aqua PA has been organized for and is presently engaged in the business of providing water services as a public utility in the Commonwealth of Pennsylvania; and

D. WHEREAS, Aqua PA maintains an organization whose officers and employees are familiar with the water and wastewater utility business, accounting and financial services, administration, communications, corporate secretarial, customer service and billing, engineering, financial, fleet services, human resources, information systems, operation, rates and regulatory, risk management, water quality, legal, and purchasing, contracts and sales of real estate of water and wastewater utilities. The officers and employees of Aqua PA are qualified to aid, assist and advise Aqua Wastewater in its business operations through the services to be performed under this

AIA listed in **Exhibit A**; and

E. WHEREAS, Aqua Wastewater is a wholly-owned indirect subsidiary of Essential; and

F. WHEREAS, Aqua Wastewater has been organized for and is presently engaged in the business of providing wastewater services as a public utility in the Commonwealth of Pennsylvania; and

G. WHEREAS, the Parties believe that it is in their interest to enter into an arrangement whereby Aqua PA may agree to purchase administrative, financial, management, and other services described herein, from Aqua Services, Inc. ("Service Company"), other Essential affiliates or third parties, which will be provided at the lower of cost or market; and

H. WHEREAS, Aqua Wastewater is entering into this AIA with Aqua PA to specifically define the types of services available to it as set forth in **Exhibit A** attached hereto and made a part hereof; and

NOW, THEREFORE, in consideration of the premises and mutual agreements herein contained, Aqua PA and Aqua Wastewater agree as follows:

ARTICLE I
PERSONNEL AND SERVICES TO BE PROVIDED

1.1 During the term of this AIA as set forth in Article V and upon the terms and conditions hereinafter set forth, Aqua PA may provide to Aqua Wastewater administration, accounting and financial, administration, communication, corporate secretarial, customer service and billing, engineering, financial, fleet services, human resources, information systems, operations, rates and regulatory, risk management, water quality, legal and purchasing as set forth on **Exhibit A** attached hereto, provided, however, that Aqua Wastewater may perform any such services with its own personnel or engage another company or person to provide those services on

its behalf. Aqua PA may engage or subcontract with another company, including Service Company, or person to provide such services on its behalf.

1.2 Aqua PA shall employ qualified officers and employees to provide the services hereunder and those persons shall be available to serve as officers of Aqua Wastewater.

ARTICLE II
PAYMENT FOR SERVICES

2.1 In consideration for the services to be rendered by Aqua PA as herein provided, Aqua Wastewater agrees to pay to Aqua PA the cost of the services provided to it as determined as provided in this Article II and in Article III.

2.2 Directly Charged Services.

2.2.1 The costs for service rendered by Aqua PA personnel directly for Aqua Wastewater shall be charged based on such personnel's time sheets.

2.2.2 All direct expenses of Aqua PA incurred in connection with services rendered by Aqua PA, Service Company or third parties, which can reasonably be identified and related exclusively to Aqua Wastewater shall be charged directly to Aqua Wastewater.

2.3 Indirectly Charged Services.

2.3.1. For services that are made available by Aqua PA, or charged to Aqua PA by Service Company, which cannot be identified and are not related exclusively to Aqua PA or Aqua Wastewater, the cost for such services will be allocated between the Parties based on the ratio of the number of customers served by each of them at the most recent fiscal year end, subject to adjustment during any year for a substantial change in the number of customers of Aqua PA or Aqua Wastewater since the previous year-end.

2.3.2 The amount for an Aqua PA employee's costs to be billed shall be computed on the employee's total labor rate, including base pay and other compensation, payroll taxes and

fringe benefits (calculated on a per hour basis), plus a general overhead factor as set forth in Article III.

ARTICLE III
ALLOWANCE FOR OVERHEAD

3.1 In determining the cost for services rendered by Aqua PA to Aqua Wastewater as herein provided, there shall be added to the base pay rate of all officers and employees for whose services charges are to be made, a percentage sufficient to cover the overhead of Aqua PA, as defined below, allocable to each such officer or employee. The overhead shall be calculated each year and shall be based on the ratio of the total overhead of Aqua PA for the year to the total salaries of Aqua PA officers and employees for whose services charges are to be made to Aqua Wastewater. No general overhead or other markups by Aqua PA shall be added to costs incurred for services of consultants or other third parties employed by Aqua PA.

3.2 The term "overhead" shall include, but not be limited to:

3.2.1 building costs, lease costs, utilities, and other costs associated with office space and equipment, and

3.2.2 taxes other than payroll taxes.

ARTICLE IV
BILLING PROCEDURES AND BOOKS AND RECORDS

4.1 As soon as practicable after the last day of each month, Aqua PA shall render a bill to Aqua Wastewater for all amounts due from Aqua Wastewater for services and expenses for such month, computed pursuant to Article II and Article III. Such bills shall be in sufficient detail to show the charge for each service rendered. All amounts shall be paid by Aqua Wastewater within thirty (30) days after receipt of the bill.

4.2 Aqua PA agrees to keep its books and records, and to require Service Company or any other affiliate if providing services to Aqua Wastewater hereunder to keep their books and

records, available at all times for inspection by representatives of Aqua Wastewater or by regulatory bodies having jurisdiction over Aqua Wastewater during normal business hours and upon reasonable advance notice.

4.3 Aqua PA shall at any time, upon request of Aqua Wastewater, furnish any and all information required by Aqua Wastewater with respect to the services rendered by Aqua PA, Service Company or other affiliates hereunder, the costs thereof, and the allocation of such costs to Aqua Wastewater.

ARTICLE V
TERM OF AGREEMENT

5.1 This AIA shall become effective as of the later of (a) the date first set forth above or (b) the date the Parties receive the last of any necessary approvals of governmental regulatory agencies having jurisdiction over this AIA. Upon becoming effective, this AIA shall supersede all prior agreements, written or oral, which shall terminate on the date this AIA becomes effective. This AIA shall continue in full force and effect until terminated by either of the parties hereto giving the other party hereto thirty days' notice in writing; provided, however, that this AIA shall terminate as of the date Aqua PA or Aqua Wastewater ceases to be an affiliate of Essential.

5.2 Upon termination of the AIA without cause by Aqua Wastewater, Aqua PA shall continue to provide services to Aqua Wastewater at its request for a period of no more than sixty (60) days from and after the effective date of the termination to facilitate Aqua Wastewater's transition to another service provider. Such transition shall be provided on the same terms and conditions as set forth in this Agreement, including compensation.

ARTICLE VI
BREACH

6.1 Either Party to the AIA may terminate this AIA upon material breach by the other Party. The non-breaching Party shall provide written notice of such breach to the other Party by

certified mail, setting forth in detail the alleged failure and/or deficiency. If such breach is not corrected by the breaching Party within thirty (30) days from receipt of written notice by certified mail, this AIA shall thereupon terminate.

ARTICLE VII
OTHER AGREEMENTS

7.1 It is understood by Aqua Wastewater that Aqua PA has entered or may enter into similar agreements with other affiliates to which similar services are to be furnished. Aqua PA will not enter into agreements to perform similar services for other companies on terms more favorable than those provided herein.

ARTICLE VIII
INFORMATION EXCHANGE

8.1 Aqua Wastewater shall provide such information as required by Aqua PA for Aqua PA to perform is obligations hereunder. Aqua PA agrees on behalf of it and its employees and contractors that it will maintain such information as confidential and not disclose such information to third parties unless required by law and applicable regulatory agencies (including the Pennsylvania Public Utility Commission ("PAPUC")). Aqua PA's obligation of confidentiality will not apply to information which (a) is or becomes available to the public other than as a result of a disclosure by Aqua PA or its employees or contractors, (b) was in Aqua PA's possession and obtained on a non-confidential basis prior to its disclosure by Aqua Wastewater, or (c) becomes available to Aqua PA on a non-confidential basis from a person or entity other than Aqua Wastewater who Aqua PA does not know or have reason to know is under an obligation of confidentiality to Aqua Wastewater.

ARTICLE IX
GENERAL PROVISIONS

9.1 JOINT OBLIGATIONS OF THE PARTIES. Aqua PA and Aqua Wastewater agree to cooperate in all matters that are the subject of this AIA.

9.2 ARBITRATION. It is the stated purpose and goal of the Parties at all times to resolve any disputes and reach agreement by good faith negotiation between the Parties, without recourse to arbitration or other legal actions. In the event, however, that any such dispute cannot be settled through negotiation, either Party may request that the matter(s) in dispute be referred to arbitration. The demand for arbitration must be submitted to the American Arbitration Association within sixty (60) calendar days after the date of such request, in which case the arbitration shall be conducted at a mutually agreed upon location, in accordance with the rules and procedures then existing under the Commercial Arbitration rules of the American Arbitration Association, provided that notwithstanding anything to the contrary contained in such Rules the following shall apply: The arbitration board shall consist of a single arbitrator. The Parties shall endeavor to agree upon the single arbitrator. If the Parties fail to agree on a single arbitrator within twenty (20) business days, the arbitrator shall be selected by the American Arbitration Association or otherwise in accordance with such Rules. After the appointment of the arbitrator, the arbitrator shall meet as necessary for the purpose of reaching a determination in the dispute, and the decision of the arbitrator, submitted in writing, to the Parties shall be final and binding upon both Parties. Judgment upon any decision rendered by arbitrator may be entered in any court having jurisdiction. Each Party shall bear the expense of its own witnesses, and the expenses of the arbitrator and any general expenses of the arbitration shall be borne equally by the Parties.

9.3 FORCE MAJEURE. No Party will be in default or otherwise liable for any delay in or failure of its performance hereunder due to any act of God, adverse weather condition, fire,

flood, riot, strike, terrorism, accident, war, governmental requirement, inability to secure materials, labor or transportation, cable cut or other cause beyond the reasonable control of the affected Party.

9.4 STANDARD OF CARE. Aqua PA shall perform its services with that degree of care, diligence and professional skill and judgment which is normally exercised by professionals in its industry. Except as otherwise expressly set forth in this AIA, Aqua PA makes no warranties, representations or other agreements, expressed or implied with respect to this AIA and the services provided hereunder. Aqua PA's entire liability to Aqua Wastewater for any claim, loss, expense or damage under this AIA, including any claims for special, incidental, consequential, indirect or punitive damages shall in no event exceed the sums actually paid by Aqua Wastewater to Aqua PA during the most recent calendar year.

9.5 ASSIGNMENT. No Party may assign this AIA without the prior written consent of the other Party, which consent shall not be unreasonably withheld.

9.6 GOVERNING LAW. This AIA shall be governed by and construed under the laws of the Commonwealth of Pennsylvania.

9.7 INDEMNIFICATION:

9.7.1 To the extent allowed by law, Aqua PA shall defend, indemnify and hold harmless Aqua Wastewater, its officers, directors, employees and agents from and against any and all liability, including liability to third parties, for personal injury, including death, property damage, other injury, or other actions, damages, fines, penalties, claims, demands, judgments, losses, costs, expenses, suits and actions (including reasonable attorney's fees), to the extent caused by or arising out of negligence or wrongful or willful misconduct on the part of Aqua PA or its officers, employees, agents, contractors and subcontractors in connection with services provided pursuant to the terms of this AIA.

9.7.2 To the extent allowed by law, Aqua Wastewater shall defend, indemnify and hold harmless Aqua PA, its officers, directors, employees and agents from and against any and all liability, including liability to third parties, for personal injury, including death, property damage, other injury, or other actions, damages, fines, penalties, claims, demands, judgments, losses, costs, expenses, suite and actions (including reasonable attorney's fees), to the extent caused by or arising out of negligence or wrongful or willful misconduct on the part of Aqua Wastewater or its officers, employees, agents, contractors and subcontractors in connection with services provided pursuant to the terms of this AIA.

9.8 SEVERABILITY. Each provision of this AIA is severable from the whole, and if one provision is declared invalid, the other provisions shall remain in effect.

9.9 NO WAIVER. Failure by a Party to enforce any provision of this AIA, or the waiver thereof in any instance shall not be construed as a general waiver of rights.

9.10 NOTICES. Any notice given or made pursuant to this AIA will be effective only if in writing and delivered in person, by messenger, by overnight delivery, or by certified mail, return receipt to a Party at the address first written above.

9.11 COMPLETE AGREEMENT. The terms of this AIA constitute the entire agreement between the Parties concerning the subject matter hereof, and this AIA may be modified only in a writing signed by both Parties. This AIA and the exhibits incorporated herein shall be modified and/or amended only by writing signed by the Parties and shall not be effective until filed with and approved by applicable regulatory agencies, including the PAPUC.

9.12 TITLES AND HEADINGS. Titles and headings to sections or paragraphs herein are inserted merely for convenience of reference and are not intended to be a part of or to affect the meaning or interpretation of this AIA.

9.13 COUNTERPARTS. This AIA may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

IN WITNESS WHEREOF, Aqua PA and Aqua Wastewater have caused this AIA to be signed in their respective corporate names by their respective Presidents or Vice Presidents, as of the day and year first above written.

AQUA PENNSYLVANIA, INC.

Title: Vice President - Regulatory Accounting + Regional Controller

EXHIBIT A

SERVICES

Without limitation, services to be provided by Aqua PA will include the following:

A. Accounting and Financial Services. Aqua PA will oversee and assist in the preparation and implementation of accounting methods and procedures that conform to the requirements, rules and regulation of governmental authorities having jurisdiction over Aqua Wastewater and will oversee and assist in the preparation of Aqua Wastewater's monthly financial reports, annual reports and other reports, including those for any governmental authorities. Aqua PA will oversee and assist in the establishment and maintenance of current record keeping techniques; review accounting procedures, methods and forms; and evaluate systems of internal controls for receipt and disbursement of funds, materials and supplies, and other assets. Aqua PA will assist in the maintenance of accounting records as required by Aqua Wastewater. Aqua PA will oversee the work of and cooperate and consult with any independent certified public accountant for Aqua Wastewater. Aqua PA will also provide services related to accounts payable, payroll, utility plant accounting, consolidation, SEC reporting/filing, ratemaking, regulatory relations, cash management, capital structure management, capital budgeting and allocation, operating budgeting and long-range planning.

Aqua PA will assist in the preparation of operating and construction budgets and monitor the control over such budgets by comparing experienced costs to the projections.

Aqua PA will prepare or assist in the preparation of federal, state and local tax returns for and to the extent required by Aqua Wastewater.

B. Administration. Aqua PA will assist in the performance of Aqua Wastewater's corporate activities. Those employees will keep themselves informed on Aqua Wastewater's

operations. They will make recommendations to Aqua Wastewater for operating expenditures and for additions to and improvements of property, plant and equipment. They will keep abreast of economic, regulatory, governmental and operational developments and conditions that may affect Aqua Wastewater and advise Aqua Wastewater of such developments and conditions to the extent that they may be important to them.

Aqua PA will provide an internal audit staff for periodic audits of accounts, records, policies and procedures of Aqua Wastewater and submit reports thereon.

C. Communications. Aqua PA will recommend procedures to promote satisfactory relations with employees, customers, communities and the general public and assist in the preparation of communication materials, (including press releases, brochures, audio visual presentations and speeches) plant tours, public exhibits and displays and other related services to inform the public.

D. Corporate Secretarial. Aqua PA will maintain, in such places and manner as may be required by applicable law, corporate documents of Aqua Wastewater, such as minute books, charters, bylaws, contracts, deeds and other corporate records. It will maintain, or arrange for the maintenance of, records of stockholders of Aqua Wastewater and perform other corporate secretarial functions as required including preparation of notices of stockholder and director meetings and the minutes thereof.

Aqua PA will review and may assist in the preparation of documents and reports required by Aqua Wastewater such as deeds, easements, contracts, charters, franchises, trust indentures and regulatory reports and filings.

E. Customer Service and Billing. Aqua PA may provide customer service and billing services to Aqua Wastewater including live and automated telephone service to customers,

non-telephonic services (including regular mail, facsimile, e-mail and Internet based), rendering of periodic bills and notices to customers based on Aqua Wastewater's tariffs, collections, assisting customers with water service changes, resolving customer disputes, work order distribution, remittance processing and data input to the customer information system.

F. Engineering. Aqua PA may provide engineering consulting regarding, and provide engineering services in connection with, the design, permitting and constructing of utility facilities.

Aqua PA may conduct facility planning, hydraulic analyses and prepare or review maps, charts, operating statistics, reports and other pertinent data, as needed to support these engineering services. It may assist in the protection of their properties by periodic inspection of their structures, including, as applicable, tanks reservoirs, dams, wells and electrical and mechanical equipment.

The engineering services provided by Aqua PA may also include the conduct of field investigations as necessary to obtain engineering information and, when required, the preparation of studies, reports, designs, drawings, cost estimates, specifications, and contracts for the construction of additions to or improvements of sources of supply, treatment plants, pumping stations, collection and distribution systems, and such other facilities as may be requested. Aqua PA may provide a materials management program to arrange for the purchase of equipment, materials, and supplies in volume on a basis advantageous to Aqua Wastewater and assist in the evaluation of new and existing products and application procedures.

G. Financial. Aqua PA will assist in the development and implementation of financing programs for Aqua Wastewater, including the furnishing of advice from time to time on securities market conditions and the form and timing of financing; advice concerning arrangements for the sale of securities; and assistance in the preparation of necessary papers, documents, registration

statements, prospectuses, petitions, applications and declarations. Aqua PA will prepare reports to be filed with, and reply to inquiries made by, security holders and bond and mortgage trustees.

Aqua PA will assist Aqua Wastewater in treasury and cash management functions, including arrangements for bank credit lines, establishment of collection policies, and development of temporary investment programs.

H. Fleet Services. Aqua PA may provide various fleet management services, including assistance with vehicle ordering and leasing, fuel card management, vehicle maintenance support and oversight, vehicle signage, vehicle tides and driver training.

I. Human Resources. Aqua PA will assist in obtaining qualified personnel in establishing appropriate rates of pay for those employees, and in negotiating with bargaining units, if any, representing employees. Aqua PA will recommend and/or carry out training programs for the development of personnel and advise and assist Aqua Wastewater regarding personnel issues and human resource policies and procedure. It will also advise and assist Aqua Wastewater in regard to group employee insurance, pension and benefit plans and in the drafting or revising of those plans when required. It will provide advice regarding employment and benefit laws and procedures and assist in implementing controls for compliance with such laws.

J. Information Systems. Aqua PA will make available to Aqua Wastewater electronic data processing systems, networks, applications and services. Aqua Wastewater will design, implement and maintain a computer network, data communications system, database and applications services, desktop and laptop computers, and peripheral equipment along with periodic upgrades, data backups and recovery procedures for the benefit of Aqua Wastewater.

K. Operation. Aqua PA may develop and assist in' the implementation of operating procedures to promote the efficient and economic operation of Aqua Wastewater. Periodic

operational reviews may be performed by Aqua PA personnel and recommendations for improvements will be reported to Aqua Wastewater.

L. Rates and Regulatory. Aqua PA personnel will make recommendations for changes in rates, tariffs, rules and regulations and will assist in the conduct of proceedings before, and in their compliance with the rulings of, regulatory bodies having jurisdiction over their operations. These personnel will keep abreast of economic and regulatory developments and conditions that may affect Aqua Wastewater and advise Aqua Wastewater of developments and conditions to the extent that they may be important to Aqua Wastewater. Aqua PA Rates and Regulatory personnel will assist in the preparation of rate filings, or applications and the supporting documents and exhibits requested or required by regulatory commissions. Aqua PA will also provide qualified personnel to testify as required during any regulatory proceedings.

M. Risk Management. Aqua PA will provide risk management services to review the exposures to accidental loss, recommend methods of protection, either through the purchase of insurance, self-insurance or other risk management techniques and arrange for the purchase of insurance coverage. Aqua PA will also supervise the investigation of claims and assist in the negotiation and settlement of such claims at the request of Aqua Wastewater. It will assist, as requested by Aqua Wastewater, in the establishment of safety and security programs.

N. Water Quality. Aqua PA will provide information to Aqua Wastewater on relevant current or pending water quality, drinking water, and other environmental regulations. It will review water quality data and provide advice and consultation to assist Aqua Wastewater in complying with current and proposed water quality standards set by federal or state agencies. It will provide technical assistance and general direction for Aqua Wastewater personnel on water quality issues, assist in selecting compliance strategies and evaluating alternatives for capital

projects driven by environmental compliance or water quality, and assist in providing responses to and coordination with public agencies to maintain or achieve compliance.

Aqua PA will also provide laboratory testing services for compliance testing for which it or its affiliated lab is certified in a particular state, or for non-compliance testing where special testing services or a check on a local lab might be needed. Aqua PA will help evaluate pricing of local and regional laboratory services, provide competitive pricing where appropriate in negotiating pricing with contract laboratories, and will provide inspection and/or audits of contract labs where appropriate.

Aqua PA will provide services for the generation and distribution of Annual Water Quality Reports (CCR's) in compliance with state and federal requirements and will post and maintain these documents on the Aqua website. Aqua PA will also assist in drafting and/or editing required public notices and public educations material related to water quality.

O. Environmental Matters. Aqua PA may provide information on relevant current or pending environmental regulations. It will provide advice and consultation to assist in complying with current and proposed environmental standards set by federal or state agencies. It will provide technical assistance and general direction in selecting compliance strategies and evaluating alternatives for capital projects driven by environmental compliance and assist in providing responses to and coordination with public agencies to maintain or achieve compliance.

P. Legal. Aqua PA will provide legal services, including legal advice and representation on legal matters. Aqua PA will also provide oversight of outside council retained to represent Aqua Wastewater.

Q. Purchasing, Contracts and Sales of Real Estate. Aqua PA may (a) act as purchasing agent for Aqua Wastewater, so far as it is feasible, in the purchase of supplies, materials and

equipment for which Aqua Wastewater may submit a requisition through the purchasing system; (b) endeavor to secure prompt shipment and delivery items ordered; (c) provide Aqua Wastewater the benefit of cash, trade and quantity discounts obtained by Aqua PA with respect to items ordered for each; (d) keep in touch with market conditions and endeavor to recommend to Aqua Wastewater purchases at advantageous times; (e) negotiate purchases and sales of real estate and the terms of leases; (f) analyze quotations or competitive bids of suppliers or contractors submitted to Aqua Wastewater and make recommendations relative thereto; and (g) establish and assist in the administration of purchasing card accounts.

Contract Services Agreement

AFFILIATED INTEREST AGREEMENT

This Affiliated Interest Agreement dated as of _____, 20__, between Aqua Resources, Inc., a corporation organized and existing under the laws of the Commonwealth of Pennsylvania, with its principal place of business located at 762 W. Lancaster Avenue, Bryn Mawr, PA 19010 (hereinafter "Aqua Resources"), and Aqua Pennsylvania, Inc., a corporation organized and existing under the laws of the Commonwealth of Pennsylvania, with its principal place of business located at 762 W. Lancaster Avenue, Bryn Mawr, PA 19101 (hereinafter "Aqua PA") and collectively hereinafter referred to jointly as the "Parties" or individually as a "Party".

RECITALS

1. WHEREAS, both Aqua Resources and Aqua PA are direct or indirect subsidiaries of Aqua America, Inc., a Pennsylvania corporation (hereinafter "Aqua America"); and
2. WHEREAS, Aqua PA has been organized for and is presently engaged in the business of providing water and/or wastewater services as a public utility in the Commonwealth of Pennsylvania (hereinafter Aqua PA and any of its subsidiaries that are also engaged in the business of providing water and/or wastewater services as a public utility are collectively referred to in this Agreement as Aqua PA); and
3. WHEREAS, Aqua Resources provides various wastewater and sludge services as set forth in Appendix A hereto to water and wastewater utilities (the "Services"); and
4. WHEREAS, Aqua PA may from time to time request from Aqua Resources, and Aqua Resources may agree to provide, certain of the Services and the Parties are entering into this

Agreement to specifically define the terms by which Aqua Resources may provide such Services to Aqua PA.

NOW, THEREFORE, in consideration of the premises and mutual agreements herein contained, Aqua Resources and Aqua PA agree as follows:

ARTICLE I. PERSONNEL AND SERVICES TO BE PROVIDED

1.1 During the term of this Agreement as set forth in Article V and upon the terms and conditions hereinafter set forth, Aqua PA may request that Aqua Resources provide certain of the Services set forth in Appendix A. Aqua Resources may also provide the Services on its own or may engage or subcontract with another company or person to provide part or all of the Services on its behalf.

1.2 Aqua Resources shall employ qualified employees to provide the Services hereunder.

1.3 Aqua PA may engage or subcontract with other companies or persons to provide portions of the Services at the lower of cost or market hereunder or may perform such Services itself and is under no obligation to engage Aqua Resources to perform any of the Services.

ARTICLE II. PAYMENT FOR SERVICES

2.1 The services to be rendered under this agreement are to be rendered by Aqua Resources to Aqua PA at the lower of cost or market. In consideration for the services rendered by Aqua Resources to Aqua PA as herein provided, Aqua PA agrees to pay to Aqua Resources the charges for the Services which are at the lower of cost or market as set forth in Appendix B, or such amendments and supplements to Appendix B as the Parties may agree to.

2.2 Aqua Resources agrees that the charges for the Services performed for Aqua PA shall be at the lower of cost or market and no greater than the charges Aqua Resources charges for the same Services rendered to other Aqua Resources customers.

ARTICLE III. BILLING PROCEDURES AND BOOKS AND RECORDS

3.1 As soon as practicable after the last day of each month, Aqua Resources shall render a bill to Aqua PA for all amounts due from Aqua PA for the Services provided by Aqua Resources during the preceding month, computed pursuant to Appendix B. Such bills shall be in sufficient detail to show the charge for each service rendered. All amounts shall be paid by Aqua PA within thirty (30) days after Aqua Resource's receipt of the bill.

3.2 Aqua Resources agrees to keep its books and records available at all times for inspection by representatives of Aqua PA during normal business hours and upon reasonable advance notice.

3.3 Aqua Resources shall at any time, upon request of Aqua PA, furnish any and all information required by Aqua PA with respect to the services rendered by Aqua Resources.

ARTICLE IV. TERM OF AGREEMENT

4.1 This Agreement shall become effective as of the later of (a) the date first set forth above or (b) the date the Parties receive the last of any necessary approval of governmental regulatory agencies having jurisdiction over this agreement. This Agreement shall supersede all prior agreements, written or oral, which shall terminate on the date this Agreement becomes effective. This Agreement shall continue in full force and effect until terminated by either of the Parties hereto giving the other Party hereto thirty (30) days' prior notice in writing; provided,

however, that this Agreement shall terminate as of the date Aqua PA or Aqua Resources ceases to be an affiliate of Aqua America.

ARTICLE V. BREACH

5.1 Either Party to the Agreement may terminate this Agreement upon material breach by the other Party. The non-breaching Party shall provide written notice of such breach to the other Party by certified mail, setting forth in detail the alleged failure and/or deficiency. If such breach is not corrected by the breaching Party within thirty (30) days from receipt of written notice by certified mail, this Agreement shall thereupon terminate.

ARTICLE VI. OTHER AGREEMENTS

6.1 It is understood by Aqua PA that Aqua Resources may enter into agreements with other customers for the same or similar services. If such agreements are entered into, they must be submitted to the Pennsylvania Public Utility Commission as provided in statute and regulation as necessary. Aqua Resources will not enter into agreements to perform similar services for other companies on terms more favorable than those provided herein.

ARTICLE VII. INFORMATION EXCHANGE

7.1 Aqua PA shall provide such information as required by Aqua Resources for Aqua Resources to perform is obligations hereunder. Aqua Resources agrees on behalf of it and its employees and contractors that it will maintain any such information that is designated as confidential by Aqua PA as confidential and not disclose such information to third parties. Aqua Resources' obligation of confidentiality will not apply to information which (a) is or becomes available to the public other than as a result of a disclosure by Aqua Resources or its employees or

contractors, (b) was in Aqua Resources' possession and obtained on a non-confidential basis prior to its disclosure by Aqua PA, or (c) becomes available to Aqua Resources on a non-confidential basis from a person other than Aqua PA who Aqua Resources does not know or have reason to know is under an obligation of confidentiality to Aqua PA.

ARTICLE VIII. GENERAL PROVISIONS

8.1 JOINT OBLIGATIONS OF THE PARTIES. Aqua Resources and Aqua PA agree to cooperate in all matters that are the subject of this Agreement.

8.2 ARBITRATION. It is the stated purpose and goal of both Parties at all times to resolve any disputes and reach agreement by good faith negotiation between the Parties, without recourse to arbitration or other legal actions. In the event, however, that any such dispute cannot be settled through negotiation, either Party may request that the matter(s) in dispute be referred to arbitration. The demand for arbitration must be submitted to the American Arbitration Association within sixty (60) calendar days after the date of such request, in which case the arbitration shall be conducted at a mutually agreed upon location, in accordance with the rules and procedures then existing under the Commercial Arbitration rules of the American Arbitration Association, provided that notwithstanding anything to the contrary contained in such Rules the following shall apply: The arbitration board shall consist of a single arbitrator. The Parties shall endeavor to agree upon the single arbitrator. If the Parties fail to agree on a single arbitrator within twenty (20) business days, the arbitrator shall be selected by the American Arbitration Association or otherwise in accordance with such Rules. After the appointment of the arbitrator, the arbitrator shall meet as necessary for the purpose of reaching a determination in the dispute, and the decision of the arbitrator, submitted in writing, to the Parties shall be final and binding upon both Parties. Judgment upon any decision rendered by the arbitrator may be entered in any court having

jurisdiction. Each Party shall bear the expense of its own witnesses, and the expenses of the arbitrator and any general expenses of the arbitration shall be borne equally by the Parties.

8.3 FORCE MAJEURE. Neither Party will be in default or otherwise liable for any delay in or failure of its performance hereunder due to any act of God, adverse weather condition, fire, flood, riot, strike, terrorism, accident, war, governmental requirement, inability to secure materials, labor or transportation, cable cut or other cause beyond the reasonable control of the affected party.

8.4 STANDARD OF CARE. Aqua Resources shall perform its services with that degree of care, diligence and professional skill and judgment which is normally exercised by professionals in its industry. Except as otherwise expressly set forth in this Agreement, Aqua Resources makes no warranties, representations or other agreements, expressed or implied with respect to this Agreement and the services provided hereunder.

8.5 ASSIGNMENT. Neither Party may assign this Agreement without the prior written consent of the other Party, which consent shall not be unreasonably withheld.

8.6 GOVERNING LAW. This Agreement shall be governed by and construed under the laws of the Commonwealth of Pennsylvania and the Pennsylvania Public Utility Commission.

8.7 INDEMNIFICATION:

8.7.1 To the extent allowed by law and as limited by this Agreement, Aqua Resources shall defend, indemnify and hold harmless Aqua PA, its officers, directors, employees and agents from and against any and all liability, including liability to third parties, for personal injury, including death, property damage, or other actions, damages, fines, penalties, claims, demands, judgments, losses, costs, expenses, suit and actions (including reasonable attorney's fees), for personal injury, including death, property damage or other injury, to the extent caused by or arising out of negligence or wrongful or willful misconduct on the part of Aqua Resources or its

officers, employees, agents, contractors and subcontractors in connection with the Services provided pursuant to the terms of this Agreement.

8.7.2 To the extent allowed by law and as limited by this Agreement, Aqua PA shall defend, indemnify and hold harmless Aqua Resources, its officers, directors, employees and agents from and against any and all liability, including liability to third parties, for personal injury, including death, property damage, or other actions, damages, fines, penalties, claims, demands, judgments, losses, costs, expenses, suit and actions (including reasonable attorney's fees), for personal injury, including death, property damage or other injury, to the extent caused by or arising out of negligence or wrongful or willful misconduct on the part of Aqua PA or its officers, employees, agents, contractors and subcontractors in connection with the Services provided pursuant to the terms of this Agreement.

8.7.3 Aqua Resources' and Aqua PA's entire liability to the other for any claim, loss, expense or damage under this Agreement, including any claims for indemnification, and including any claims for special, incidental, consequential, indirect or punitive damages, shall in no event exceed the amount actually paid by Aqua PA to Aqua Resources during the most recent calendar year.

8.8 SEVERABILITY. Each provision of this Agreement is severable from the whole, and if one provision is declared invalid, the other provisions shall remain in effect.

8.9 NO WAIVER. Failure by a Party to enforce any provision of this Agreement, or the waiver thereof in any instance, shall not be construed as a general waiver of rights.

8.10 NOTICES. Any notice given or made pursuant to this Agreement will be effective only if in writing and delivered in person, by messenger, by overnight delivery, or by certified mail, return receipt requested as follows:

8.11 COMPLETE AGREEMENT. The terms of this Agreement constitute the entire agreement between the Parties concerning the subject matter hereof, and this Agreement may be modified only in a writing signed by both Parties. This Agreement and the exhibits incorporated herein shall be modified and/or amended only by writing signed by both Parties and shall not be effective until filed with and approved by applicable regulatory agencies, including the Pennsylvania Public Utility Commission.

8.12 TITLES AND HEADINGS. Titles and headings to sections or paragraphs herein are inserted merely for convenience of reference and are not intended to be a part of or to affect the meaning or interpretation of this Agreement.

8.13 COUNTERPARTS. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

IN WITNESS WHEREOF, Aqua Resources and Aqua PA have caused this Agreement to be signed in their respective corporate names by their respective Presidents or Vice Presidents, as of the day and year first above written.

APPENDIX A
Contract Services Agreement
Between
Aqua Pennsylvania, Inc.
and
Aqua Resources, Inc.

Aqua Resources provides the following services to Aqua Pennsylvania:

Wastewater sludge hauling; reseeding; digester, lagoon, filter, tank cleaning
Pit, vault & wet well cleaning
Sewer cleaning, televising & inspection; manhole inspection & repair; pump, valve, etc. maintenance & repair
Water main leak detection
Portable restroom rental
Water & wastewater treatment plant operation & maintenance
Construction • Pump stations • Water & wastewater treatment facilities • On-lot septic systems • Backflow device installation • Meter vault/pit installation • Sewer & water line connections
Cross Connection Control Program Management

APPENDIX B
To
Contract Services Agreement
Between
Aqua Pennsylvania, Inc. and Aqua Resources, Inc.

Aqua Resources Price Guide

Equipment	Rate*
Televising • Lateral push camera with operator (for 2 - 6 inch pipe and 150 feet in length) • Van with 2 man crew (minimum 8 inch pipe)	 $185.00 for first hour, $85.00 for each additional hour. $170.00 per hour, minimum 4 hours
Jetting (for sewer, tank or pit cleaning) • Trailer with 2 man crew (minimum 2 inch pipes) • Truck with 2 man crew (based in Souderton for tank/pit cleaning)	 $160.00 per hour, minimum 4 hours $170.00 per hour
Standard Vacuum pumper with operator	$125.00 per hour
High Vacuum pumper with 2 man crew	$250.00 per hour
Dump Truck (6 wheel) with operator	$104.00 per hour

2024 RATE CASE
FILING REQUIREMENTS

C. Operating Expenses

OE12. Submit details of information covering research and development expenditures, by project, within the company and note forecasted company programs.

A. Most of the Company's research activities are conducted under the direction of the Laboratory Manager.

Aqua Pennsylvania's central laboratory explores analytical methods and evaluates new products, technology, and data from pilot studies of promising treatment processes. Staff participate in projects undertaken by the Water Research Foundation (WaterRF). They review published research and proposed regulations and legislation to keep ahead of regulations and to apply cost-effective technologies to source water and treatment issues.
The laboratory is equipped gas chromatograph (GC) and gas chromatograph/mass spectrometer (GC/MS) instruments for analysis of trace organic contaminants in raw and treated water. Implementation of Solid Phase Microextraction (SPME) analysis of part-per-trillion levels of taste and odor compounds increased productivity for these analyses almost three-fold over previous methods. The laboratory also uses a state-of-the-art liquid chromatograph/mass spectrophotometer to monitor for future contaminants under consideration by EPA. EPA requires Aqua to monitor for unregulated contaminants in advance of rulemaking via the Unregulated Contaminant Monitoring Rule. This equipment allows us to monitor for PFOA and PFOS chemicals which were regulated by PADEP in 2023 and EPA in 2024. This has allowed detailed investigation of source water conditions and treatment processes with quick sample turnaround and to take legal action against the polluters.
This monitoring work evaluates distribution system water quality, helping the company prioritize capital investments in distribution system infrastructure improvements to meet current and future proposed regulations. This includes monitoring for implementation the upcoming Revised Lead and Copper Rule, the proposed Lead and Copper Rule Improvements, and Unregulated Contaminant Monitoring Rule 5 in 2023 through 2025. We have participated in research projects to better understand testing methods for Legionella in drinking water. The past several years a PA legislator has proposed legislation requiring Legionella testing in drinking water statewide.
The Company is a subscriber to WaterRF and supports research in many areas through subscription fees.

AQUA PENNSYLVANIA, INC.
2024 RATE CASE
FILING REQUIREMENTS

C. Operating Expenses

OE14. Provide the two most recent actuarial studies for both pension expense and postretirement benefits other than pensions (OPEBs).

A. The Company is providing to the Commission, the two most recent actuarial studies for both pension expense and OPEBs. The actuarial studies are proprietary and confidential. Accordingly, the Company is providing the actuarial studies in sealed envelopes that are marked "CONFIDENTIAL AND PROPRIETARY." The Company hereby requests that the contents of such envelopes be maintained CONFIDENTIAL by the Commission; that the Commission's Secretary place such material in NON-PUBLIC FOLDERS; and that any employee of the Commission that may have access to such material be directed to maintain its confidentiality. The Company understands that, pursuant to 52 Pa. Code Section 5.423(b), the material provided in the sealed envelopes will not be disclosed pending the issuance of an order or other action by the Commission on the Company's request. The Company will, however, provide this information to a party to this proceeding pursuant to the execution of a suitable confidentiality agreement.

a) See attached Actuarial Reports dated March 2023 and April 2024 for pension expense.

b) See attached Actuarial Reports dated March 2023 and April 2024 for OPEB expense.

AQUA PENNSYLVANIA, INC.
2024 RATE CASE
FILING REQUIREMENTS

C. Operating Expenses

OE15. Identify the total pension expense under statement of accounting standards (SFAS 87) for the historic test year and the portion charged to operation and maintenance (O & M). Include an analysis showing the contribution to the pension plan and the amount deferred or expensed for each of the past 2 years and the historic test year. Also provide any estimates for the future year.

A. Please see the Company's response to OE14 for the SFAS 87 pension expense amounts. Please refer to Schedule C-8.2 in Exhibit 1-A for the pension expense charged to O&M for the historic test year and estimated for the future test year and fully projected future test year.

	FOR THE TWELVE MONTHS ENDED	
	12/31/2021	12/31/2022
Pension Expense *	$ 12,000,000	$ 12,000,000

FILING REQUIREMENTS

C. Operating Expenses

OE16. Provide an analysis of OPEBs showing the accrual amount under SFAS 106 and the pay-as-you-go expense.

A. Please refer to Schedule C-8.3 of Exhibit 1-A and the Company's response to OE14.

AQUA PENNSYLVANIA, INC.
2024 RATE CASE
FILING REQUIREMENTS

C. Operating Expenses

OE17. Reconcile the historic and future test year SFAS No. 106 expense levels with the amount identified in the actuarial report.

A. Please refer to Schedule C-8.3 of Exhibit 1-A.

AQUA PENNSYLVANIA, INC.
2024 RATE CASE
FILING REQUIREMENTS

C. Operating Expenses

OE18. Identify the actual or projected amounts contributed to SFAS No. 106 funds for the historic and future test years. Identify the actual or projected dates and amounts of the contributions.

A. Please refer to Exhibit 1-A for projected expense claims and projected future funding contributions. Contributions are typically made in the December each year.

AQUA PENNSYLVANIA, INC.
2024 RATE CASE
FILING REQUIREMENTS

C. Operating Expenses

OE19. Explain the funding options or plans which are being used for SFAS No. 106 costs. Identify the portion of costs which are eligible for tax preferred funding.

A. The Company maintains Voluntary Employee Beneficiary Association plans ("VEBA"), which provide benefits for its union employees and its non-union employees.

The Internal Revenue Service has made a determination that the VEBA plans meet the requirements of Section 501(c) 9 of the Internal Revenue Code and are generally exempt from federal or state taxes. The income from the VEBA plans is not included in the Company's taxable income.

Each year, the Company's actuary determines the Company's maximum tax-deductible funding limitations for the plans based on claim cost assumptions and asset values. The Company contributes to the VEBA plans based on either the lower of the maximum tax-deductible contribution or the OPEB expense recognized in the calendar year.

AQUA PENNSYLVANIA, INC.

OE25. If the company has included any costs associated with canceled construction projects or obsolete inventory in requested rates, separately identify the items, provide the related amounts and explain the reason for the cancellation or obsolescence.

A. No costs associated with cancelled construction projects have been included in the Company's cost of service.

The historic test year expenses reflect ($53,798) in obsolete inventory. This expense is consistent with the policy derived from the recommendation from the most recent Management Efficiency Audit by the PUC.

AQUA PENNSYLVANIA, INC.
2024 RATE CASE
FILING REQUIREMENTS

C. Operating Expenses

OE26. Explain how the company accounts for vacation pay for book and ratemaking purposes.

A. The Company maintains both an asset and liability account for vacation pay. The net effect for book purposes equals zero. The Company has made no claim for vacation pay for ratemaking purposes since a full year of salaries and wages for each employee has been included in the Company's claim.

AQUA PENNSYLVANIA, INC.
2024 RATE CASE
FILING REQUIREMENTS

C. Operating Expenses

OE27. Indicate whether any employee positions have been eliminated since the commencement of the historic test year or are expected to be eliminated during the future test year.

A. The Company has not eliminated any positions since the commencement of the historic test year. The Company does not expect to eliminate any positions during the future test year, but does expect to eliminate two positions in the fully projected future test year.

Name of Corporation

AQUA PENNSYLVANIA WASTEWATER, INC.

Address	City	State	ZIP Code	Revenue ID Number
762 W LANCASTER AVE	BRYN MAWR	PA	19010-348	1000644734

SECTION I TAX REPORT INFORMATION (Whole dollars only.)

1. Income or Loss from Federal Return on a Separate Company Basis (From RCT-101, Section C, Line 1)	1.	-5,672,035.
2. PA Taxable Income or Loss (From RCT-101, Section C, Line 12)	2.	-5,765,703.
3. PA Corporate Net Income Tax Due (From RCT-101, Section C, Line 20)	3.	-189,009.

SECTION II DECLARATION OF OFFICER (See instructions.) **Keep a copy of the corporation's tax report, RCT-101.**

4a. ☐ I consent that the corporation's refund check may be mailed directly to the address provided on RCT-101.

4b. ☒ I do not want a refund mailed to the corporation, or the corporation is not receiving a refund.

4c. ☐ I authorize (1) the PA Department of Revenue and its designated financial institution to initiate an electronic funds withdrawal entry to my financial institution account designated in the electronic portion of my 2022 Pennsylvania Corporate Net Income Tax Report for payment of my state taxes owed; and (2) my financial institution to debit the entry to my account. I also authorize the financial institutions involved in the processing of my electronic payment of taxes to receive confidential information necessary to answer inquiries and resolve issues related to my payment. **To revoke a payment, I must contact my financial institution account indicated in the tax preparation software for payment of the corporation state taxes.**

If I filed a balance-due report, I understand if the PA Department of Revenue does not receive full and timely payment of my tax liability, I remain liable for the tax due and all applicable interest and penalties. If I filed a joint federal and state tax return/report and there is an error on my federal return, I understand my state report will be rejected.

Under penalties of perjury, I declare I am an officer of the above-named corporation and the information I provided to my electronic return originator (ERO) and/or transmitter and the amounts in Part I above agree with the amounts on the corresponding lines of the corporation's 2022 Pennsylvania Corporate Net Income Tax Report. To the best of my knowledge and belief, the corporation's report is true, correct and complete. I consent to my ERO and/or transmitter sending the corporation's report and accompanying schedules and statements to the Internal Revenue Service (IRS) and subsequently by the IRS to the PA Department of Revenue. I also consent to the PA Department of Revenue sending my ERO and/or transmitter, through the IRS, an acknowledgment of receipt of transmission, an indication of whether or not the corporation's report is accepted and, if rejected, the reason(s) for rejection.

I affirm under penalties prescribed by law, this report, including any accompanying schedules and statements, has been examined by me and to the best of my knowledge and belief is a true, correct and complete report. If this report is an amended report, the taxpayer hereby consents to the extension of the assessment period for this tax year to one year from the date of filing of this amended report or three years from the filing of the original report, whichever period last expires, and agrees to retain all required records pertaining to that tax and tax period until the end of the extended assessment period, regardless of any statutory provision providing for a shorter period of retention. For purposes of this extension, an original report filed before the due date is deemed filed on the due date. I am authorized to execute this consent to the extension of the assessment period.

SECTION I TAX REPORT INFORMATION (Whole dollars only.)

1. Income or Loss from Federal Return on a Separate Company Basis (From RCT-101, Section C, Line 1)	1.	-3,212,275.
2. PA Taxable Income or Loss (From RCT-101, Section C, Line 12)	2.	-3,292,565.
3. PA Corporate Net Income Tax Due (From RCT-101, Section C, Line 20)	3.	-64,405.

SECTION II DECLARATION OF OFFICER (See instructions.) **Keep a copy of the corporation's tax report, RCT-101.**

4a. ☐ I consent that the corporation's refund check may be mailed directly to the address provided on RCT-101.

4b. ☒ I do not want a refund mailed to the corporation, or the corporation is not receiving a refund.

4c. ☐ I authorize (1) the PA Department of Revenue and its designated financial institution to initiate an electronic funds withdrawal entry to my financial institution account designated in the electronic portion of my 2022 Pennsylvania Corporate Net Income Tax Report for payment of my state taxes owed; and (2) my financial institution to debit the entry to my account. I also authorize the financial institutions involved in the processing of my electronic payment of taxes to receive confidential information necessary to answer inquiries and resolve issues related to my payment. **To revoke a payment, I must contact my financial institution account indicated in the tax preparation software for payment of the corporation state taxes.**

If I filed a balance-due report, I understand if the PA Department of Revenue does not receive full and timely payment of my tax liability, I remain liable for the tax due and all applicable interest and penalties. If I filed a joint federal and state tax return/report and there is an error on my federal return, I understand my state report will be rejected.

Under penalties of perjury, I declare I am an officer of the above-named corporation and the information I provided to my electronic return originator (ERO) and/or transmitter and the amounts in Part I above agree with the amounts on the corresponding lines of the corporation's 2022 Pennsylvania Corporate Net Income Tax Report. To the best of my knowledge and belief, the corporation's report is true, correct and complete. I consent to my ERO and/or transmitter sending the corporation's report and accompanying schedules and statements to the Internal Revenue Service (IRS) and subsequently by the IRS to the PA Department of Revenue. I also consent to the PA Department of Revenue sending my ERO and/or transmitter, through the IRS, an acknowledgment of receipt of transmission, an indication of whether or not the corporation's report is accepted and, if rejected, the reason(s) for rejection.

SECTION III DECLARATION OF ELECTRONIC RETURN ORIGINATOR (ERO) AND PAID PREPARER (See instructions.)

I declare I have reviewed the above-named corporation's report, and the entries on Form PA 8453 C are true, correct and complete to the best of my knowledge and belief. I obtained the corporate officer's signature on this form before submitting the report to the PA Department of Revenue, provided the corporate officer a copy of all forms and information to be filed with the PA Department of Revenue and followed all other requirements specified by the PA Department of Revenue and in IRS Pub. 3112, IRS e-file Application and Participation, and Pub. 4163, Modernized e-File (MeF) Information for Authorized IRS e-file Providers of forms 1120/1120S. If I am also the preparer, under penalties of perjury, I declare I examined the above-named corporation's report, accompanying schedules and statements, and to the best of my knowledge and belief they are true, correct and complete. I understand I am required to keep this form and the supporting documents for three years.

I affirm under penalties prescribed by law, this report, including any accompanying schedules and statements, has been examined by me and to the best of my knowledge and belief is a true, correct and complete report. If this report is an amended report, the taxpayer hereby consents to the extension of the assessment period for this tax year to one year from the date of filing of this amended report or three years from the filing of the original report, whichever period last expires, and agrees to retain all required records pertaining to that tax and tax period until the end of the extended assessment period, regardless of any statutory provision providing for a shorter period of retention. For purposes of this extension, an original report filed before the due date is deemed filed on the due date. I am authorized to execute this consent to the extension of the assessment period.

FEDERAL EMPLOYER IDENTIFICATION NUMBER (FEIN) 23-1999647

Name of Corporation

AQUA PENNSYLVANIA WASTEWATER, INC.

Address	City	State	ZIP Code	Revenue ID Number
762 W LANCASTER AVE	BRYN MAWR	PA	19010-348	1000644734

SECTION I TAX REPORT INFORMATION (Whole dollars only.)

1. Income or Loss from Federal Return on a Separate Company Basis (From RCT-101, Section C, Line 1)	1.	-5,672,035.
2. PA Taxable Income or Loss (From RCT-101, Section C, Line 12)	2.	-5,765,703.
3. PA Corporate Net Income Tax Due (From RCT-101, Section C, Line 20)	3.	-189,009.

SECTION II DECLARATION OF OFFICER (See instructions.) **Keep a copy of the corporation's tax report, RCT-101.**

4a. ☐ I consent that the corporation's refund check may be mailed directly to the address provided on RCT-101.

4b. ☒ I do not want a refund mailed to the corporation, or the corporation is not receiving a refund.

4c. ☐ I authorize (1) the PA Department of Revenue and its designated financial institution to initiate an electronic funds withdrawal entry to my financial institution account designated in the electronic portion of my 2022 Pennsylvania Corporate Net Income Tax Report for payment of my state taxes owed; and (2) my financial institution to debit the entry to my account. I also authorize the financial institutions involved in the processing of my electronic payment of taxes to receive confidential information necessary to answer inquiries and resolve issues related to my payment. **To revoke a payment, I must contact my financial institution account indicated in the tax preparation software for payment of the corporation state taxes.**

If I filed a balance-due report, I understand if the PA Department of Revenue does not receive full and timely payment of my tax liability, I remain liable for the tax due and all applicable interest and penalties. If I filed a joint federal and state tax return/report and there is an error on my federal return, I understand my state report will be rejected.

Under penalties of perjury, I declare I am an officer of the above-named corporation and the information I provided to my electronic return originator (ERO) and/or transmitter and the amounts in Part I above agree with the amounts on the corresponding lines of the corporation's 2022 Pennsylvania Corporate Net Income Tax Report. To the best of my knowledge and belief, the corporation's report is true, correct and complete. I consent to my ERO and/or transmitter sending the corporation's report and accompanying schedules and statements to the Internal Revenue Service (IRS) and subsequently by the IRS to the PA Department of Revenue. I also consent to the PA Department of Revenue sending my ERO and/or transmitter, through the IRS, an acknowledgment of receipt of transmission, an indication of whether or not the corporation's report is accepted and, if rejected, the reason(s) for rejection.

SECTION III DECLARATION OF ELECTRONIC RETURN ORIGINATOR (ERO) AND PAID PREPARER (See instructions.)

I declare I have reviewed the above-named corporation's report, and the entries on Form PA 8453 C are true, correct and complete to the best of my knowledge and belief. I obtained the corporate officer's signature on this form before submitting the report to the PA Department of Revenue, provided the corporate officer a copy of all forms and information to be filed with the PA Department of Revenue and followed all other requirements specified by the PA Department of Revenue and in IRS Pub. 3112, IRS e-file Application and Participation, and Pub. 4163, Modernized e-File (MeF) Information for Authorized IRS e-file Providers of forms 1120/1120S. If I am also the preparer, under penalties of perjury, I declare I examined the above-named corporation's report, accompanying schedules and statements, and to the best of my knowledge and belief they are true, correct and complete. I understand I am required to keep this form and the supporting documents for three years.

I affirm under penalties prescribed by law, this report, including any accompanying schedules and statements, has been examined by me and to the best of my knowledge and belief is a true, correct and complete report. If this report is an amended report, the taxpayer hereby consents to the extension of the assessment period for this tax year to one year from the date of filing of this amended report or three years from the filing of the original report, whichever period last expires, and agrees to retain all required records pertaining to that tax and tax period until the end of the extended assessment period, regardless of any statutory provision providing for a shorter period of retention. For purposes of this extension, an original report filed before the due date is deemed filed on the due date. I am authorized to execute this consent to the extension of the assessment period.

2024 RATE CASE
FILING REQUIREMENTS

D. Taxes

TX3. Submit a schedule showing for the last 3 years the Income Tax refunds, plus interest, net of taxes, received from the Federal government due to prior years' claims.

A. Aqua Pennsylvania, Inc. has not received income tax refunds from the Federal government due to prior years' claims in the last three years.

AQUA PENNSYLVANIA, INC.
2024 RATE CASE
FILING REQUIREMENTS

D. Taxes

TX4. Provide detailed computations showing the deferred income taxes derived by using accelerated tax depreciation applicable to post-1969 utility property that increases productive capacity, and accelerated depreciation rate (ADR) rates on property (separate between State and Federal; also, rate used). If based on the historic test year, justify.

a. State whether tax depreciation is based on all rate base items claimed as of the end of the future test year, and whether it is the annual tax depreciation at the end of the future test year.

b. Reconcile any difference between the deferred tax balance, as shown as a reduction to measures of value (rate base), and the deferred tax balance as shown on the balance sheet.

A. Please see the attached.

a. The Company's tax depreciation is based on all rate base items claimed as of the end of the fully projected future test year, and it is the annual tax depreciation at the end of the fully projected future test year.

b. Please refer to the attached.

TX5. Submit a schedule showing a breakdown of accumulated investment tax credits, (3%, 4%, 7%, 10% and 11%), together with details of methods used to write-off the unamortized balances.

A. Please see the attached.

AQUA PENNSYLVANIA, INC.
SUMMARY OF ITC
FOR THE TEST YEAR ENDED DECEMBER 31, 2023

Unamortized Investment Tax Credits are amortized using straight line amortizataion. Amortization begins once the credit has been taken on the Company's tax return. If the credit expires before it is utilized, the credit is written off and there is no amortization to reduce tax expense.

TX6. Submit a schedule showing the adjustments for taxable net income per book, including below-the-line items, and pro-forma under existing rates, together with an explanation of any difference between the adjustments. Indicate charitable donations and contributions in the tax calculation for ratemaking purposes.

A. Please refer to the attached and also Exhibit 1-A, Schedule F-2 for water and Exhibit 1-B, Schedule F-2 for wastewater. The differences between book and proforma tax adjustments are due to timing and deductible refunds from advances to builders.

TX13. Under Section 1552 of the Internal Revenue Code and Regulations at 1.1552-1 if applicable, a parent company, in filing a consolidated Income Tax return for the group, must choose one of four options by which it must allocate total income tax liability of the group to the participating members to determine each member's tax liability to the Federal government. If this request is not applicable, provide an explanation.

a. State what option has been chosen by the group.

b. Provide, in summary form, the amount of tax liability that has been allocated to each of the participating members in the consolidated Income Tax return.

c. Provide a schedule, in summary form, of contributions, which were determined on the basis of separate tax return calculations, made by each of the participating members to the tax liability indicated in the consolidated group tax return. Provide total amounts of actual payments to the tax depository for the tax year, as computed on the basis of separate returns of members.

d. Provide annual Income Tax return for group, and if Income Tax return shows net operating loss, provide details of amount of net operating loss allocated to the Income Tax returns of each of the members of the consolidated group.

A. a. Each member participating in Essential Utilities, Inc.'s consolidated Federal tax return has its share of tax liability calculated on a separate return basis. Members are compensated for tax attributes when utilized by the consolidated group (benefits of loss method). Please see the Attachment 1 for Essential Utilities, Inc.'s consolidated Federal Income Tax Summary and Attachment 2 for the calculation of the consolidate tax savings adjustment pursuant to Act 40.

b. See Column 9 of attached schedule for each income members' tax liability, and pro-rata reimbursement for the utilization of loss members' net operating losses.

c. See Column 5 of the attached schedule for the tax liabilities paid by the income generating memebers of the consolidated group for the utilization of the loss members tax attributes. No cash payments were made during the test year due to the generation of tax losses.

d. Please see the Attachment 1 - Essential Utilities, Inc.'s consolidated Federal Income Tax Summary. Column 10 contains the net operating loss allocated to each loss member of the consolidated group.

RB10. Identify the funds availability arrangements or terms which the company has with its banks with respect to deposits of customer checks. For example, does the company have same day or next day access to funds deposited?

A. Funds availability from customer check deposits depends on several factors including: the day and time of deposit, the drawee endpoint, and the bank of deposit's ledger cutoff time and availability schedule. The Company utilizes a retail lockbox site for processing the majority of customer remittances, which generally results in an availability between 0 to 2 days. Typically, funds from out-of-state checks are available 2 days after deposit, while funds from checks drawn on local banks are available 0 and 1 day depending upon when they are processed by the lockbox.

RB11. In reference to materials and supplies:

a. What method of inventory valuation was used to develop the claim for materials and supplies?

b. Does the utility use a material and supply model to calculate needed material and supply levels?

c. If so, provide the model. Supply an illustrative example of how the monthly balances are derived.

d. Provide the actual monthly value for the inventory of materials and supplies for the past 12 months. Supply as of the end of the historic test year, a 13-month average, by month, for the material and supply account.

e. Provide the monthly level of materials and supplies for 3 years prior to the conclusion of the historic test year.

A. a. The Company's claim for materials and supplies is based on recording inventories at cost, not in excess of market value. Cost is determined using the first-in, first-out method.

b. The Company does not use a material and supply model to calculate needed material and supply levels.

c. The Company does not use a material and supply model.

d. Please refer to Exhibits 1-A through 1-B, Schedule G-4 for water and Exhibits 1-C through 1-E, Schedule G-4 for wastewater.

AQUA PENNSYLVANIA, INC.
2024 RATE CASE
FILING REQUIREMENTS

F. Depreciation

DP5. Supply a schedule by account and depreciable group showing the survivor curve and annual accrual rate estimated to be appropriate:

a. For the purposes of this filing.

b. For the purposes of the most recent rate increase filing prior to the current proceedings.

A. Please see the attached.

Aqua Pennsylvania, Inc.
Data Requirements of the Pennsylvania Public Utility Commission
Depreciation Study

FR VI.5

Aqua Pennsylvania, Inc.
VI. Depreciation

5. Supply a schedule by account and depreciable group showing the survivor curve and annual accrual rate estimated to be appropriate:

   a. For the purposes of this filing.

   b. For the purposes of the most recent rate increase filing prior to the current proceedings.

Answer:

a. Refer to Table 1 in Exhibit Nos. 6-A, Part 1 through 6-E, Part 3.

b. Refer to pages FR VI.5 (2) to FR VI.5 (40) for survivor curves and annual accrual rates estimated to be appropriate in the most recent prior water rate filings and the most recent wastewater filings. Only the water base and wastewater base operations had prior filings. This is the initial filing for Shenandoah Water, Lower Makefield Wastewater and East Whiteland Wastewater.

2024 RATE CASE
FILING REQUIREMENTS

G. Rate of Return

RR1. Provide capitalization and capitalization ratios for the last 5-year period and projected through the next 2 years (with short-term debt and without short-term debt) for the company, parent and consolidated system.

a. Provide year-end interest coverages before and after taxes for the last 3 years and at the latest date, including indenture and Securities and Exchange Commission (SEC) bases, for the company, parent and consolidated system.

b. Provide year-end preferred stock dividend coverages for the last 3 years and at latest date, including charter and SEC bases.

A. Please see attached Schedule RR1(a) that shows the capitalization and capitalization ratios for the last five-year period (2019-2023) with short-term debt and without short-term debt for the Company, Parent and consolidated system. The forecasts related to the Company for 2024 and 2025 are included. The forecasts related to the Parent and consolidated system for 2024 and 2025 are not available at the present time.

a. Please see attached Schedule RR1(b) that provides year-end interest coverage before and after taxes for the last three years (2021-2023), including Indenture and SEC Bases, for the Company, Parent and consolidated system.

b. There is no preferred stock outstanding for the Company, Parent and consolidated system for the last three years.

SIXTY-SECOND SUPPLEMENTAL

INDENTURE

DATED AS OF JULY 27, 2023

AND EFFECTIVE AS OF AUGUST 1, 2023

TO

INDENTURE OF MORTGAGE

DATED AS OF JANUARY 1, 1941

AQUA PENNSYLVANIA, INC.

TO

THE BANK OF NEW YORK MELLON TRUST COMPANY, N. A., as Trustee

322066-5

(B) In the event that the Officers' Certificate delivered to the Trustee pursuant to the provisions of paragraph (A) of this Section shall state, pursuant to the requirements of subparagraph (vi), the Cost or Fair Value of Available Permanent Additions acquired by the Company during the preceding calendar year, the documents specified in paragraphs 2, 3, 5, 6 and 7 of subdivision (B) of Section 3 of Article IV of the Original Indenture.

(C) An amount in cash equal to the sum set forth in subparagraph (viii) of the Officers' Certificate provided for in paragraph (A) hereof.

SECTION 3. All cash deposited with the Trustee as part of any Maintenance or Improvement Deposit provided for in Section 1 of this Article, may, at the option of the Company, be applied to the purchase of bonds under the provisions of Section 2 of Article X of the Original Indenture or to the redemption of bonds under the provisions of Section 3 of Article X of the Original Indenture or may be withdrawn by the Company at any time to reimburse the Company for the cost of a Net Amount of Available Permanent Additions (excluding, however, from any such Available Permanent Additions all Permanent Additions included in any certificate delivered to the Trustee for the purpose of obtaining a credit against any Maintenance or Improvement Deposit provided for in Section 1 of this Article to the extent that such Permanent Additions have been used for any such credit). The Trustee shall pay to or upon the written order of the Company all or any part of such cash upon the receipt by the Trustee of:

(a) A Resolution requesting such payment; and

(b) The documents specified in paragraphs 2, 5, 6 and 7 of subdivision (B) of Section 3 of Article IV of the Original Indenture, with such modifications, additions and omissions as may be appropriate in the light of the purposes for which they are used.

ARTICLE III.

Covenants of the Company

SECTION 1. The Company hereby covenants and agrees with the Trustee, for the benefit of the Trustee and all the present and future holders of the Bonds, that the Company will pay the principal of and premium, if any, of and interest on all bonds issued or to be issued as aforesaid under and secured by the Original Indenture as hereby supplemented, as well as all bonds which may be hereafter issued in exchange or substitution therefor, and will perform and fulfill all of the terms, covenants and conditions of the Original Indenture and of this Sixty-Second Supplemental Indenture with respect to the additional bonds to be issued under the Original Indenture as hereby supplemented.

SECTION 2. The Company covenants and agrees that so long as any of the Bonds are outstanding (a) the Company will not make any Stock Payment if, after giving effect thereto, its retained earnings, computed in accordance with generally accepted accounting principles consistently applied, will be less than the sum of (i) Excluded Earnings, if any, since December 31, 2022, and (ii) $20,000,000; (b) Stock Payments made more than forty (40) days after the commencement, and prior to the expiration, of any Restricted Period shall not exceed 65% of the Company's Net Income during such Restricted Period; and (c) the Company will not authorize a

Stock Payment if there has occurred and is continuing an event of default under subsections (a) or (b) of Section 1 of Article XI of the Original Indenture.

For the purposes of this Section 2 the following terms shall have the following meanings:

"Capitalization" shall mean the sum of (i) the aggregate principal amount of all Debt at the time outstanding, (ii) the aggregate par or stated value of all capital stock of the Company of all classes at the time outstanding, (iii) premium on capital stock, (iv) capital surplus, and (v) retained earnings.

"Debt" means (i) all indebtedness, whether or not represented by bonds, debentures, notes or other securities, for the repayment of money borrowed, (ii) all deferred indebtedness for the payment of the purchase price of property or assets purchased (but Debt shall not be deemed to include customer advances for construction or any bonds issued under the Indenture which are not Outstanding Bonds), (iii) leases which have been or, in accordance with generally accepted accounting principles, should be recorded as capital leases and (iv) guarantees of the obligations of another of the nature described in clauses (i), (ii) or (iii) which have been or, in accordance with generally accepted accounting principles, should be recorded as debt.

"Determination Date" shall mean the last day of each calendar quarter. Any calculation with respect to any Determination Date shall be based on the Company's balance sheet as of such date.

"Excluded Earnings" shall mean 35% of the Company's Net Income during any Restricted Period.

"Net Income" for any particular Restricted Period shall mean the amount of net income properly attributable to the conduct of the business of the Company for such period, as determined in accordance with generally accepted accounting principles consistently applied, after payment of or provision for taxes on income for such period.

"Outstanding Bonds" shall mean bonds which are outstanding within the meaning indicated in Section 20 of Article I of the Original Indenture except that, in addition to the bonds referred to in clauses (a), (b) and (c) of said Section 20, said term shall not include bonds for the retirement of which sufficient funds have been deposited with the Trustee with irrevocable instructions to apply such funds to the retirement of such bonds at a specified time, which may be either the maturity thereof or a specified redemption date, whether or not notice of redemption shall have been given.

"Restricted Period" shall mean a period commencing on any Determination Date on which the total Debt of the Company is, or as the result of any Stock Payment then declared or set aside and to be made thereafter will be, more than 70% of Capitalization, and continuing until the third consecutive Determination Date on which the total Debt of the Company does not exceed 70% of Capitalization.

"Stock Payment" shall mean any payment in cash or property (other than stock of the Company) to any holder of shares of any class of capital stock of the Company as such holder,

whether by dividend or upon the purchase, redemption, conversion or other acquisition of such shares, or otherwise.

SECTION 3. The Company covenants and agrees that so long as any of the Bonds are outstanding neither the Company nor any subsidiary of the Company will, directly or indirectly, lend or in any manner extend its credit to, or indemnify, or make any donation or capital contribution to, or purchase any security of, any corporation which directly or indirectly controls the Company, or any subsidiary or affiliate (other than an affiliate which is a subsidiary of the Company) of any such corporation.

ARTICLE IV.

The Trustee

SECTION 1. The Trustee hereby accepts the trust hereby declared and provided, and agrees to perform the same upon the terms and conditions in the Original Indenture, as supplemented by this Sixty-Second Supplemental Indenture.

SECTION 2. Rights of the Trustee.

(a) Subject to the provisions of Article XIII of the Original Indenture, the Trustee may execute any of the trusts or powers hereof and perform any of its duties by or through attorneys and agents, and the Trustee shall not be responsible for the negligence or misconduct of any such attorney or agent selected with due care.

(b) The Trustee shall be entitled to advice of counsel concerning all matters of trusts hereof and the duties hereunder. The Trustee may act or refrain from acting and rely upon and be free from all liability for so relying upon the opinion or advice of any attorney (who may be the attorney or attorneys for the Company) and shall be free from all liability for any action taken or not taken in reliance on such opinion or advice. The Trustee may act and rely on written opinions of experts employed by the Trustee and such advice shall be full and complete authorization and protection in respect of any action taken, suffered or omitted by the Trustee hereunder in good faith and in reliance thereon. The Trustee shall not be responsible for any loss or damage resulting from any action or non-action in good faith taken in reliance upon such opinion or advice.

(c) The Trustee shall not be bound to confirm, verify or make any investigation into the facts or matters stated in any financial or other statements, resolution, certificate, statement, instrument, opinion, report, notice, request, direction, consent, order or other paper or document furnished pursuant to the terms hereof, and the Trustee may conclusively rely and shall be protected in acting or refraining from acting upon any document believed by it to be genuine and to have been signed or presented by the proper person.

(d) Delivery of reports, information and documents to the Trustee is for informational purposes only and the Trustee's receipt of such shall not constitute constructive notice or knowledge of any information contained therein or

IV 3 (4

pany to permit the legal and valid issue and authentication and delivery of the bonds which have been applied for has been duly had and taken;

4. An Officers' Certificate, as herein defined, stating the aggregate principal amount of all bonds at the time outstanding under this Indenture, and, unless the Opinion of Counsel provided for in paragraph 3 of this subdivision (*B*) shall state that the amount of indebtedness or bonded indebtedness which may be incurred by the Company is not then limited by law or by corporate action, also stating that the total amount of indebtedness or bonded indebtedness of the Company outstanding, including the aggregate principal amount of bonds issued and outstanding, as herein defined, under this Indenture plus the aggregate principal amount of bonds applied for in the accompanying application, does not exceed an amount which shall be specified in the Certificate;

5. The officially authenticated certificates or other documents, if any, specified in the Opinion of Counsel provided for in paragraph 3 of this subdivision (*B*), including evidence satisfactory to the Trustee of the payment or provision for payment of any taxes therein referred to;

6. If the bonds, the authentication and delivery of which are then applied for, are not a part of any series then existing, a Resolution or Resolutions and an indenture supplemental hereto, creating the series of which such bonds are a part.

SECTION 3. (*A*) Subject to the provisions of Section 2 of this Article bonds in addition to those provided for in any other Section hereof may from time to time be executed by the Company and delivered to the Trustee

and shall be authenticated and delivered by the Trustee upon the basis of Available Permanent Additions, subject to the conditions, provisions and limitations set forth in this Section. The aggegate principal amount of bonds that may be authenticated and delivered from time to time under the provisions of this Section is limited to seventy per cent. (70%) of the Net Amount of Available Permanent Additions, made the basis of the authentication and delivery thereof certified or provided in subdivision (*B*) of this Section.

No bonds shall be authenticated and delivered under this Section unless the Net Earnings of the Company as shown by a Net Earnings Certificate for a period of twelve (12) consecutive calendar months within the fifteen (15) calendar months next preceding the application for authentication and delivery of bonds, shall have been not less than one and three-quarters (1¾) times the interest requirements for a period of one year upon (*a*) the bonds applied for, (*b*) all bonds outstanding, as herein defined, on the date of such application, and (*c*) all indebtedness outstanding on the date of such application which is secured by any lien for the payment of money or its equivalent prior to or on a parity with the lien of this Indenture other than Permitted Liens, as herein defined.

(*B*) No application by the Company to the Trustee for the authentication and delivery of bonds under this Section shall be granted by the Trustee, until the Trustee shall have received:

1. The documents provided for in Section 2 of this Article;

2. An Engineer's Certificate, as herein defined, dated not more than thirty (30) days preceding the

NOTE PURCHASE AGREEMENT

DATED AS OF NOVEMBER 3, 2016

Default or Event of Default would exist under the terms of this Agreement, and *provided, further,* that once a Subsidiary has been designated an Unrestricted Subsidiary, it shall not thereafter be redesignated as a Restricted Subsidiary on more than one occasion. Within ten days following any designation described above, the Company will deliver to each Purchaser a notice of such designation accompanied by a certificate signed by a Senior Financial Officer of the Company certifying compliance with all requirements of this **Section 9.6** and setting forth all information required in order to establish such compliance.

Section 9.7. Subsidiary Guaranty. (a) If at any time any Subsidiary of the Company shall become a co-obligor under, or guarantor of Debt outstanding under, any Material Credit Facility (a *"Subsidiary Guarantor"*), then concurrently with any such event the Subsidiary Guarantor shall execute and deliver to the holders of the Notes an unconditional guarantee of the Notes which shall be in form and substance satisfactory to the Required Holders, and (b) deliver such proof of corporate or other action, incumbency of officers, opinions of counsel and other documents as is consistent with those delivered by the Company pursuant to **Section 4** on the Closing Date or as the Required Holders shall have reasonably requested.

SECTION 10. NEGATIVE COVENANTS.

The Company covenants that so long as any of the Notes are outstanding:

Section 10.1. Limitation on Debt. The Company will not permit Consolidated Debt (determined as of the last day of each fiscal quarter) to exceed 65% of Consolidated Total Capitalization as of such date.

Section 10.2. Limitation on Liens. The Company will not, and will not permit any of its Restricted Subsidiaries to, directly or indirectly create, incur, assume or permit to exist (upon the happening of a contingency or otherwise) any Lien on or with respect to any property or asset (including, without limitation, any document or instrument in respect of goods or accounts receivable) of the Company or any such Restricted Subsidiary, whether now owned or held or hereafter acquired, or any income or profits therefrom, or assign or otherwise convey any right to receive income or profits, except:

(a) Liens for taxes, assessments or other governmental charges that are not yet due and payable or the payment of which is not at the time required by **Section 9.4**; *provided,* any such tax, assessment or other governmental charge shall be paid prior to the commencement of any proceedings to foreclose any Lien related thereto;

(b) any attachment or judgment Lien, unless the judgment it secures shall not, within 60 days after the entry thereof, have been discharged or execution thereof stayed pending appeal, or shall not have been discharged within 60 days after the expiration of any such stay;

(c) Liens incidental to the conduct of business or the ownership of properties and assets (including landlords', carriers', warehousemen's, mechanics', materialmen's and other similar Liens for sums not yet due and payable or which are being contested in

(xi) Investments in addition to the Investments permitted by the preceding clauses (i) through (x); *provided* that the aggregate principal amount of Investments outstanding pursuant to this clause (xi) shall not at any time exceed 25% of Consolidated Net Worth.

In valuing Investments for purposes of applying the limitations set forth in clause (xi) of this **Section 10.6**, such Investments shall be taken at the original cost thereof, without allowance for any subsequent write-offs or appreciation or depreciation therein, but less any amount repaid or recovered on account of capital or principal.

Section 10.7. Nature of Business. Neither the Company nor any Restricted Subsidiary will engage in any business, other than, when taken as a whole, the general nature of the business in which the Company and its Restricted Subsidiaries are engaged on the date of this Agreement and other energy related regulated business activities and non-regulated business activities that are complementary to the foregoing.

Section 10.8. Transactions with Affiliates. The Company will not and will not permit any Restricted Subsidiary to enter into directly or indirectly any Material transaction or group of related transactions (including without limitation the purchase, lease, sale or exchange of properties of any kind or the rendering of any service) with any Affiliate (other than the Company or another Restricted Subsidiary), except upon fair and reasonable terms no less favorable to the Company or such Restricted Subsidiary than would be obtainable in a comparable arm's-length transaction with a Person not an Affiliate. In addition, the Company will not, and will not permit any Restricted Subsidiary to, make any loan or advance to the Company or any Restricted Subsidiary except in the ordinary course of business and in accordance with the reasonable requirements of the business of the Company or any such Restricted Subsidiary.

Section 10.9. Acquisitions. The Company will not, and will not permit any Restricted Subsidiary to, make any acquisition of all or substantially all of the assets or capital stock of any business entity if at the time of such acquisition and after giving effect thereto, a Default or Event of Default shall exist.

Section 10.10. Unrestricted Subsidiaries. The Company will not at any time permit Unrestricted Subsidiaries to (i) own more than 40% of the Consolidated Total Assets of the Company and its Subsidiaries, or (ii) account for more than 40% of the consolidated gross revenues of the Company and its Subsidiaries, determined in each case in accordance with GAAP.

Section 10.11. Interest Coverage Covenant. Section 6.1(b) (the *"Interest Coverage Covenant"*) of the Bank Credit Agreement in effect on the date of this Agreement (as such covenant may be amended or modified from time to time whether pursuant to an amendment to the Bank Credit Agreement in effect on the date of this Agreement or any new, restated or replacement Bank Credit Agreement) is hereby incorporated by reference into this **Section 10.11**. The Interest Coverage Covenant shall continue in effect until such time as the Interest Coverage Covenant shall have been eliminated from the Bank Credit Agreement or all

indebtedness under the Bank Credit Agreement is repaid in full and all commitments related thereto are terminated; *provided*, that if at the time of any such repayment or the termination of any such commitment a Default or Event of Default shall exist under this Agreement, then the Interest Coverage Covenant shall continue in full force and effect so long as such Default or Event of Default continues to exist. If at any time a Default or Event of Default exists under the Interest Coverage Covenant, no modification or waiver of the Interest Coverage Covenant shall be effective unless the Required Holders shall have consented thereto. Promptly, but in no event more than 5 Business Days following the execution of any Bank Credit Agreement (or any amendment thereto) which changes or eliminates the Interest Coverage Covenant, the Company shall furnish each holder of the Notes with a copy of such agreement.

Section 10.12. Economic Sanctions, Etc. The Company will not, and will not permit any Controlled Entity to (a) become (including by virtue of being owned or controlled by a Blocked Person), own or control a Blocked Person or (b) directly or indirectly have any investment in or engage in any dealing or transaction (including any investment, dealing or transaction involving the proceeds of the Notes) with any Person if such investment, dealing or transaction (i) would cause any holder or any affiliate of such holder to be in violation of, or subject to sanctions under, any law or regulation applicable to such holder, or (ii) is prohibited by or subject to sanctions under any U.S. Economic Sanctions Laws.

SECTION 11. EVENTS OF DEFAULT.

An *"Event of Default"* shall exist if any of the following conditions or events shall occur and be continuing:

(a) the Company defaults in the payment of any principal or Make-Whole Amount, if any, on any Note when the same becomes due and payable, whether at maturity or at a date fixed for prepayment or by declaration or otherwise; or

(b) the Company defaults in the payment of any interest on any Note for more than five Business Days after the same becomes due and payable; or

(c) the Company defaults in the performance of or compliance with any term contained in **Section 8.5, 10.1, 10.2, 10.3, 10.4, 10.5** or **10.11**; or

(d) the Company defaults in the performance of or compliance with any Material term contained herein (other than those referred to in paragraphs (a), (b) and (c) of this **Section 11**) and such default is not remedied within 30 days after the earlier of (i) a Responsible Officer obtaining actual knowledge of such default and (ii) the Company receiving written notice of such default from any holder of a Note (any such written notice to be identified as a "notice of default" and to refer specifically to this paragraph (d) of **Section 11**); or

(e) any representation or warranty made in writing by or on behalf of the Company or by any officer of the Company in this Agreement or in any writing required

thereof at the interest rate implicit in such rentals and otherwise in accordance with GAAP) under the lease relating to such Sale-and-Leaseback Transaction.

"Bank Credit Agreement" means the bank credit agreement dated as of March 23, 2012, between the Company and PNC Bank National Association, as agent, and the banks party thereto, as from time to time amended or restated or any replacement facility which constitutes the primary bank credit facility of the Company.

"Blocked Person" means (a) a Person whose name appears on the list of Specially Designated Nationals and Blocked Persons published by OFAC, (b) a Person, entity, organization, country or regime that is blocked or a target of sanctions that have been imposed under U.S. Economic Sanctions Laws or (c) a Person that is an agent, department or instrumentality of, or is otherwise beneficially owned by, controlled by or acting on behalf of, directly or indirectly, any Person, entity, organization, country or regime described in clause (a) or (b).

"Business Day" means (a) for the purposes of **Section 8.6** only, any day other than a Saturday, a Sunday or a day on which commercial banks in New York City are required or authorized to be closed, and (b) for the purposes of any other provision of this Agreement, any day other than a Saturday, a Sunday or a day on which commercial banks in Philadelphia, Pennsylvania or New York, New York are required or authorized to be closed.

"Capital Lease" means, at any time, a lease with respect to which the lessee is required concurrently to recognize the acquisition of an asset and the incurrence of a liability in accordance with GAAP.

"Capital Lease Obligation" means, with respect to any Person and a Capital Lease, the amount of the obligation of such Person as the lessee under such Capital Lease which would, in accordance with GAAP, appear as a liability on a balance sheet of such Person.

"Change in Control" is defined in **Section 8.7**.

"Closing" is defined in **Section 3**.

"Code" means the Internal Revenue Code of 1986, as amended from time to time, and the rules and regulations promulgated thereunder from time to time.

"Company" means Aqua America, Inc., a Pennsylvania corporation.

"Confidential Information" is defined in **Section 20**.

"Consolidated Debt" means, as of any date of determination, the total of all Debt of the Company and its Subsidiaries outstanding on such date, after eliminating all offsetting debits and credits between the Company and its Subsidiaries and all other items required to be eliminated in the course of the preparation of consolidated financial statements of the Company and its Subsidiaries in accordance with GAAP.

"Consolidated Funded Debt" means, as of any date of determination, the total of all Funded Debt of the Company and its Subsidiaries outstanding on such date, after eliminating all offsetting debits and credits between the Company and its Subsidiaries and all other items required to be eliminated in the course of the preparation of consolidated financial statements of the Company and its Subsidiaries in accordance with GAAP.

"Consolidated Net Worth" means, as of any date of determination, the sum of (i) the par value (or value stated on the books of the corporation) of the capital stock (but excluding treasury stock and capital stock subscribed and unissued) of the Company and its Subsidiaries plus (ii) the amount of the paid-in capital and retained earnings of the Company and its Subsidiaries, in each case as such amounts would be shown on a consolidated balance sheet of the Company and its Subsidiaries as of such time prepared in accordance with GAAP.

"Consolidated Total Assets" means, as of any date of determination, the total amount of all assets of the Company and its Subsidiaries, as such amounts would be shown on a consolidated balance sheet of the Company and its Subsidiaries as of such time prepared in accordance with GAAP.

"Consolidated Total Capitalization" means, as of any date of determination, the sum of (i) Consolidated Funded Debt and (ii) Consolidated Net Worth.

"Controlled Entity" means (i) any of the Subsidiaries of the Company and any of their or the Company's respective Controlled Affiliates and (ii) if the Company has a parent company, such parent company and its Controlled Affiliates. As used in this definition, *"Control"* means the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of a Person, whether through the ownership of voting securities, by contract or otherwise.

"Debt" means, with respect to any Person, without duplication,

(a) its liabilities for borrowed money;

(b) its liabilities for the deferred purchase price of property acquired by such Person (excluding accounts payable and other accrued liabilities arising in the ordinary course of business but including, without limitation, all liabilities created or arising under any conditional sale or other title retention agreement with respect to any such property);

(c) its Capital Lease Obligations;

(d) all liabilities for borrowed money secured by any Lien with respect to any property owned by such Person (whether or not it has assumed or otherwise become liable for such liabilities);

(e) all non-contingent liabilities in respect of reimbursement agreements or similar agreements in respect of letters of credit or instruments serving a similar function issued or accepted for its account by banks and other financial institutions;

NOTE PURCHASE AGREEMENT

DATED AS OF MARCH 31, 2006

1996608.01.14
162584-7

SECTION 10. NEGATIVE COVENANTS.

The Company covenants that so long as any of the Notes are outstanding:

Section 10.1. Limitation on Debt. The Company will not permit Consolidated Debt (determined as of the last day of each fiscal quarter) to exceed 62% of Consolidated Total Capitalization as of such date.

Section 10.2. Limitation on Liens. The Company will not, and will not permit any Subsidiary to, directly or indirectly create, incur, assume or permit to exist (upon the happening of a contingency or otherwise) any Lien on or with respect to any property or asset (including, without limitation, any document or instrument in respect of goods or accounts receivable) of the Company or any Subsidiary, whether now owned or held or hereafter acquired, or any income or profits therefrom, or assign or otherwise convey any right to receive income or profits, except:

(a) Liens for taxes, assessments or other governmental charges that are not yet due and payable or the payment of which is not at the time required by **Section 9.4**; *provided*, any such tax, assessment or other governmental charge shall be paid prior to the commencement of any proceedings to foreclose any Lien related thereto;

(b) any attachment or judgment Lien, unless the judgment it secures shall not, within 60 days after the entry thereof, have been discharged or execution thereof stayed pending appeal, or shall not have been discharged within 60 days after the expiration of any such stay;

(c) Liens incidental to the conduct of business or the ownership of properties and assets (including landlords', carriers', warehousemen's, mechanics', materialmen's and other similar Liens for sums not yet due and payable or which are being contested in good faith by appropriate proceedings diligently conducted) and Liens to secure the performance of bids, tenders, leases, or trade contracts, or to secure statutory obligations (including obligations under workers compensation, unemployment insurance and other social security legislation), surety or appeal bonds or other Liens incurred in the ordinary course of business and not in connection with the borrowing of money;

(d) leases or subleases granted to others, zoning restrictions, easements, rights-of-way, restrictions and other similar charges or encumbrances, in each case incidental to the ownership of property or assets or the ordinary conduct of the business of the Company or any of its Subsidiaries, *provided* that such Liens do not, materially impair the use of such property and which are not violated in any material respect by the existing or proposed use by the Company and its Subsidiaries of the properties subject to such Liens;

(e) Liens securing Debt of a Subsidiary to the Company or to a Subsidiary;

(f) Liens created under indentures, mortgages and deeds of trust securing Debt of the Company or a Subsidiary;

"Capital Lease" means, at any time, a lease with respect to which the lessee is required concurrently to recognize the acquisition of an asset and the incurrence of a liability in accordance with GAAP.

"Capital Lease Obligation" means, with respect to any Person and a Capital Lease, the amount of the obligation of such Person as the lessee under such Capital Lease which would, in accordance with GAAP, appear as a liability on a balance sheet of such Person.

"Change in Control" is defined in **Section 8.7**.

"Closing" is defined in **Section 3**.

"Code" means the Internal Revenue Code of 1986, as amended from time to time, and the rules and regulations promulgated thereunder from time to time.

"Company" means Aqua Pennsylvania, Inc., a Pennsylvania corporation.

"Confidential Information" is defined in **Section 20**.

"Consolidated Debt" means, as of any date of determination, the total of all Debt of the Company and its Subsidiaries outstanding on such date, after eliminating all offsetting debits and credits between the Company and its Subsidiaries and all other items required to be eliminated in the course of the preparation of consolidated financial statements of the Company and its Subsidiaries in accordance with GAAP.

"Consolidated Funded Debt" means, as of any date of determination, the total of all Funded Debt of the Company and its Subsidiaries outstanding on such date, after eliminating all offsetting debits and credits between the Company and its Subsidiaries and all other items required to be eliminated in the course of the preparation of consolidated financial statements of the Company and its Subsidiaries in accordance with GAAP.

"Consolidated Net Worth" means, as of any date of determination, the sum of (i) the par value (or value stated on the books of the corporation) of the capital stock (but excluding treasury stock and capital stock subscribed and unissued) of the Company and its Subsidiaries plus (ii) the amount of the paid-in capital and retained earnings of the Company and its Subsidiaries, in each case as such amounts would be shown on a consolidated balance sheet of the Company and its Subsidiaries as of such time prepared in accordance with GAAP.

"Consolidated Total Assets" means, as of any date of determination, the total amount of all assets of the Company and its Subsidiaries, as such amounts would be shown on a consolidated balance sheet of the Company and its Subsidiaries as of such time prepared in accordance with GAAP.

"Consolidated Total Capitalization" means, as of any date of determination, the sum of (i) Consolidated Funded Debt and (ii) Consolidated Net Worth.

"Debt" means, with respect to any Person, without duplication,

(a) its liabilities for borrowed money;

(b) its liabilities for the deferred purchase price of property acquired by such Person (excluding accounts payable and other accrued liabilities arising in the ordinary course of business but including, without limitation, all liabilities created or arising under any conditional sale or other title retention agreement with respect to any such property);

(c) its Capital Lease Obligations;

(d) all liabilities for borrowed money secured by any Lien with respect to any property owned by such Person (whether or not it has assumed or otherwise become liable for such liabilities);

(e) all non-contingent liabilities in respect of reimbursement agreements or similar agreements in respect of letters of credit or instruments serving a similar function issued or accepted for its account by banks and other financial institutions;

(f) Swaps of such Person; and

(g) Guaranties of such Person with respect to liabilities of a type described in any of clauses (a) through (f) hereof.

Debt of any Person shall include all obligations of such Person of the character described in clauses (a) through (g) to the extent such Person remains legally liable in respect thereof notwithstanding that any such obligation is deemed to be extinguished under GAAP.

"Default" means an event or condition the occurrence or existence of which would, with the lapse of time or the giving of notice or both, become an Event of Default.

"Default Rate" means with respect to the Notes, that rate of interest per annum that is the greater of (i) 7.66% per annum, or (ii) 2% over the rate of interest publicly announced by PNC Bank, N.A. in New York, New York as its "base" or "prime" rate.

"Environmental Laws" means any and all federal, state, local, and foreign statutes, laws, regulations, ordinances, rules, judgments, orders, decrees, permits, concessions, grants, franchises, licenses, agreements or governmental restrictions relating to pollution and the protection of the environment or the release of any materials into the environment, including but not limited to those related to hazardous substances or wastes, air emissions and discharges to waste or public systems.

"ERISA" means the Employee Retirement Income Security Act of 1974, as amended from time to time, and the rules and regulations promulgated thereunder from time to time in effect.

"Debt" means, with respect to any Person, without duplication,

(a) its liabilities for borrowed money;

(b) its liabilities for the deferred purchase price of property acquired by such Person (excluding accounts payable and other accrued liabilities arising in the ordinary course of business but including, without limitation, all liabilities created or arising under any conditional sale or other title retention agreement with respect to any such property);

(c) its Capital Lease Obligations;

(d) all liabilities for borrowed money secured by any Lien with respect to any property owned by such Person (whether or not it has assumed or otherwise become liable for such liabilities);

(e) all non-contingent liabilities in respect of reimbursement agreements or similar agreements in respect of letters of credit or instruments serving a similar function issued or accepted for its account by banks and other financial institutions;

(f) Swaps of such Person; and

(g) Guaranties of such Person with respect to liabilities of a type described in any of clauses (a) through (f) hereof.

Debt of any Person shall include all obligations of such Person of the character described in clauses (a) through (g) to the extent such Person remains legally liable in respect thereof notwithstanding that any such obligation is deemed to be extinguished under GAAP.

"Default" means an event or condition the occurrence or existence of which would, with the lapse of time or the giving of notice or both, become an Event of Default.

"Default Rate" means with respect to the Notes, that rate of interest per annum that is the greater of (i) 7.66% per annum, or (ii) 2% over the rate of interest publicly announced by PNC Bank, N.A. in New York, New York as its "base" or "prime" rate.

"Environmental Laws" means any and all federal, state, local, and foreign statutes, laws, regulations, ordinances, rules, judgments, orders, decrees, permits, concessions, grants, franchises, licenses, agreements or governmental restrictions relating to pollution and the protection of the environment or the release of any materials into the environment, including but not limited to those related to hazardous substances or wastes, air emissions and discharges to waste or public systems.

"ERISA" means the Employee Retirement Income Security Act of 1974, as amended from time to time, and the rules and regulations promulgated thereunder from time to time in effect.

AMENDED AND RESTATED CREDIT AGREEMENT

among

AQUA PENNSYLVANIA, INC.

and

THE BANKS PARTY HERETO

and

PNC BANK, NATIONAL ASSOCIATION
as Agent

Dated as of November 17, 2016

5.9 Taxes. Pay when due all taxes, assessments and governmental charges imposed upon it or any of its properties or that it is required to withhold and pay over, except where contested in good faith and where adequate reserves have been set aside to the extent required under GAAP.

5.10 Covenants of the Indenture. Comply at all times with the covenants contained in the Indenture, as last supplemented by the Supplemental Indenture, without regard to any amendment of or supplement to the Indenture occurring after October 15, 2010.

5.11 Guarantees of Obligations. It is the intent of the parties hereto that all of the obligations of the Borrower hereunder shall be unconditionally guaranteed by all of its Material Subsidiaries to the maximum extent permitted under any Requirement of Law applicable to any such Material Subsidiary. Accordingly, in the event that any Material Subsidiary shall be formed, acquired or come into existence after the date hereof then the Borrower will cause such Material Subsidiary to (i) execute and deliver a Guaranty Agreement in form and substance satisfactory to the Agent pursuant to which such Material Subsidiary will become a "Guarantor" hereunder, and guarantee the obligations of the Borrower hereunder and under the Notes and other Loan Documents and (ii) deliver such proof of corporate or other action, incumbency of officers, opinions of counsel and other documents as is consistent with those delivered by the Borrower pursuant to Section 4.1 on the Closing Date or as the Agent shall have reasonably requested.

5.12 Anti-Money Laundering/International Trade Law Compliance. No Covered Entity will become a Sanctioned Person. No Covered Entity, either in its own right or through any third party, will (a) have any of its assets in a Sanctioned Country or in the possession, custody or control of a Sanctioned Person in violation of any Anti-Terrorism Law; (b) do business in or with, or derive any of its income from investments in or transactions with, any Sanctioned Country or Sanctioned Person in violation of any Anti-Terrorism Law; (c) engage in any dealings or transactions prohibited by any Anti-Terrorism Law or (d) use the Loans to fund any operations in, finance any investments or activities in, or make any payments to, a Sanctioned Country or Sanctioned Person in violation of any Anti-Terrorism Law. The funds used to repay the Loans will not be derived from any unlawful activity. Each Covered Entity shall comply with all Anti-Terrorism Laws. The Borrower shall promptly notify the Agent in writing upon the occurrence of a Reportable Compliance Event.

SECTION 6. NEGATIVE COVENANTS

The Borrower hereby agrees that, so long as the Commitments remain in effect, any Note remains outstanding and unpaid or any other amount is owing to any Bank or the Agent hereunder, the Borrower shall not directly or indirectly:

6.1 Financial Covenants.

(a) Equity to Capital Ratio. Permit as of the end of any fiscal quarter the Equity to Capital Ratio to be less than thirty eight percent (38%).

(b) Interest Coverage Ratio. Permit as of the end of any fiscal quarter the Interest Coverage Ratio to be less than 1.8 to 1.

6.2 Limitation on Certain Debt. Except for the Loans and Commitments under the Loan Documents and the Term Loan Facilities, at any time enter into, assume or suffer to exist lines of credit or comparable extensions of credit from one or more commercial banks (or their Affiliates) under which the Borrower has incurred or may incur aggregate Debt in excess of $15,000,000.

6.3 Limitation on Liens. Create, incur, assume or suffer to exist any Lien upon any of its property, assets or revenues, including, without limitation, the stock of its Subsidiaries, whether now owned or hereafter acquired, except for:

(a) The following, (i) if the validity or amount thereof is being contested in good faith by appropriate and lawful proceedings diligently conducted so long as levy and execution thereon have been stayed and continue to be stayed or (ii) if a final judgment is entered and such judgment is discharged within thirty (30) days of entry, and in either case they do not materially impair the ability of the Borrower to perform its obligations hereunder or under the other Loan Documents:

(A) Claims or Liens for taxes, assessments or charges due and payable and subject to interest or penalty, provided that the Borrower maintains such reserves or other appropriate provisions as shall be required by GAAP and pays all such taxes, assessments or charges forthwith upon the commencement of proceedings to foreclose any such Lien;

(B) Claims, Liens or encumbrances upon, and defects of title to, real or personal property including any attachment of personal or real property or other legal process prior to adjudication of a dispute on the merits; and

(C) Claims or Liens of mechanics, materialmen, warehousemen, carriers, or other statutory nonconsensual Liens;

(b) pledges or deposits in connection with workers' compensation, unemployment insurance and other social security legislation;

(c) deposits to secure the performance of bids, trade contracts (other than for borrowed money), leases, statutory obligations, surety and appeal bonds, performance bonds and other obligations of a like nature incurred in the ordinary course of business of the Borrower;

(d) easements, rights-of-way, restrictions and other similar encumbrances incurred in the ordinary course of business which, in the aggregate, are not substantial in amount and which do not interfere with the ordinary conduct of the business of the Borrower;

(e) Liens which were in existence on the date hereof and shown on Schedule 6.3 and replacements, extensions or replacements thereof;

"Covered Entity": (a) the Borrower, each of the Borrower's Subsidiaries and all Guarantors and (b) each Person that, directly or indirectly, is in control of a Person described in clause (a) above. For purposes of this definition, control of a Person shall mean the direct or indirect (x) ownership of, or power to vote, 25% or more of the issued and outstanding equity interests having ordinary voting power for the election of directors of such Person or other Persons performing similar functions for such Person, or (y) power to direct or cause the direction of the management and policies of such Person whether by ownership of equity interests, contract or otherwise.

"Daily LIBOR Rate" shall mean, for any day, the rate per annum determined by the Agent by dividing (the resulting quotient rounded upwards, if necessary, to the nearest 1/100th of 1%) (x) the Published Rate by (y) a number equal to 1.00 minus the Eurocurrency Reserve Requirements. The Published Rate shall be adjusted as of each Business Day based on changes in the Published Rate or the Eurocurrency Reserve Requirements without notice to the Borrower, and shall be applicable from the effective date of any such change. Notwithstanding the foregoing, if the Daily LIBOR Rate as determined above would be less than zero, such rate shall be deemed to be zero for purposes of this Agreement.

"Debt": with respect to any Person, at any time, without duplication, all of (i) its liabilities for borrowed money, (ii) liabilities secured by any Lien existing on property owned by such Person (whether or not such liabilities have been assumed), (iii) its liabilities in respect to Capital Leases; (iv) its liabilities under Contingent Obligations; and (v) all other obligations which are required by GAAP to be shown as liabilities on its balance sheet but excluding (x) deferred taxes and other deferred or long-term liabilities and other amounts not in respect of borrowed money and (y) the aggregate amount of accounts receivable sold, factored or otherwise transferred for value without recourse (other than for breach of representations).

"Default": any of the events specified in Section 7, whether or not any requirement for the giving of notice, the lapse of time, or both, or any other condition precedent therein set forth, has been satisfied.

"Defaulting Bank": any Bank, as determined by the Agent, that has (a) failed to fund any portion of its Revolving Credit Loans or participations in Swing Line Loans within three Business Days of the date required to be funded by it hereunder, (b) notified the Borrower, the Agent, the Swing Line Bank or any Bank in writing that it does not intend to comply with any of its funding obligations under this Agreement or has made a public statement to the effect that it does not intend to comply with its funding obligations under this Agreement or under other agreements in which it commits to extend credit, (c) failed, within three Business Days after request by the Agent, to confirm that it will comply with the terms of this Agreement relating to its obligations to fund prospective Revolving Credit Loans or participations in Swing Line Loans, (d) otherwise failed to pay over to the Agent or any other Bank any other amount required to be paid by it hereunder within three Business Days of the date when due, unless the subject of a good faith dispute, or (e) (i) become or is insolvent or has a parent company that has become or is insolvent, (ii) become the subject of a Bail-In Action, or (iii)

become the subject of a bankruptcy or insolvency proceeding, or has had a receiver, conservator, trustee or custodian appointed for it, or has taken any action in furtherance of, or indicating its consent to, approval of or acquiescence in any such proceeding or appointment or has a parent company that has become the subject of a bankruptcy or insolvency proceeding, or has had a receiver, conservator, trustee or custodian appointed for it, or has taken any action in furtherance of, or indicating its consent to, approval of or acquiescence in any such proceeding or appointment (it being understood that a Defaulting Bank shall cease to be a Defaulting Bank if the Borrower, the Agent and the Swing Line Bank shall each agree that such Defaulting Bank has adequately remedied all matters that caused such Bank to be a Defaulting Bank).

"Distribution": in respect of any corporation, (a) dividends, distributions or other payments on account of any capital stock of the corporation (except distributions in common stock of such corporation); (b) the redemption or acquisition of such stock or of warrants, rights or other options to purchase such stock (except when solely in exchange for common stock of such corporation); and (c) any payment on account of, or the setting apart of any assets for a sinking or other analogous fund for, the purchase, redemption, defeasance, retirement or other acquisition of any share of any class of capital stock of such corporation or any warrants or options to purchase any such stock.

"Dollars" and "$": dollars in lawful currency of the United States of America.

"EEA Financial Institution": (i) any credit institution or investment firm established in any EEA Member Country which is subject to the supervision of an EEA Resolution Authority, (ii) any entity established in an EEA Member Country which is a parent of an institution described in clause (i) of this definition, or (iii) any financial institution established in an EEA Member Country which is a subsidiary of an institution described in clauses (i) or (ii) of this definition and is subject to consolidated supervision with its parent.

"EEA Member Country": any of the member states of the European Union, Iceland, Liechtenstein and Norway.

"EEA Resolution Authority" any public administrative authority or any person entrusted with public administrative authority of any EEA Member Country (including any delegee) having responsibility for the resolution of any EEA Financial Institution.

"Environmental Laws": any and all applicable foreign, Federal, state, local or municipal laws, rules, orders, regulations, statutes, ordinances, codes, decrees or binding requirements of any Governmental Authority, or binding Requirement of Law (including common law) regulating, relating to or imposing liability or standards of conduct concerning protection of the environment or public health, remediation of environmental conditions, or damages arising from such conditions, as now or may at any time hereafter be in effect.

"Equity to Capital Ratio": at the date of determination, the ratio of Consolidated Shareholders' Equity to the sum of (i) Consolidated Funded Debt and (ii) Consolidated Shareholders' Equity.

"ERISA": the Employee Retirement Income Security Act of 1974, as amended from time to time.

"EU Bail-In Legislation Schedule": the EU Bail-In Legislation Schedule published by the Loan Market Association (or any successor person), as in effect from time to time.

"Eurocurrency Reserve Requirements": for any day as applied to a Eurodollar Loan, the aggregate (without duplication) of the rates (expressed as a decimal fraction) of reserve requirements in effect on such day (including, without limitation, basic, supplemental, marginal and emergency reserves under any regulations of the Board of Governors of the Federal Reserve System or other Governmental Authority having jurisdiction with respect thereto) dealing with reserve requirements prescribed for eurocurrency funding (currently referred to as "Eurocurrency Liabilities" in Regulation D of such Board) maintained by a member bank of such System.

"Eurodollar Rate": with respect to the Loans comprising any Eurodollar Borrowing for any Interest Period, the interest rate per annum determined by the Agent by dividing (the resulting quotient rounded upwards, if necessary, to the nearest 1/100th of 1% per annum) (a) the rate which appears on the Bloomberg Page BBAM1 (or on such other substitute Bloomberg page that displays rates at which U.S. dollar deposits are offered by leading banks in the London interbank deposit market), or the rate which is quoted by another source selected by the Agent as an authorized information vendor for the purpose of displaying rates at which U.S. dollar deposits are offered by leading banks in the London interbank deposit market (for purposes of this definition, an "Alternate Source"), at approximately 11:00 a.m., London time, two (2) Business Days prior to the commencement of such Interest Period as the London interbank offered rate for U.S. Dollars for an amount comparable to such Eurodollar Borrowing and having a borrowing date and a maturity comparable to such Interest Period (or if there shall at any time, for any reason, no longer exist a Bloomberg Page BBAM1 (or any substitute page) or any Alternate Source, a comparable replacement rate determined by the Agent at such time (which determination shall be conclusive absent manifest error)), by (b) a number equal to 1.00 minus the Eurocurrency Reserve Requirements; provided, however, that if the Eurodollar Rate determined as provided above would be less than zero, such rate shall be deemed to be zero for purposes of this Agreement.

The Eurodollar Rate shall be adjusted with respect to any Eurodollar Borrowing that is outstanding on the effective date of any change in the Eurocurrency Reserve Requirements as of such effective date. The Agent shall give prompt notice to the Borrower of the Eurodollar Rate as determined or adjusted in accordance herewith, which determination shall be conclusive absent manifest error.

"Eurodollar Borrowing": a Borrowing comprised of Eurodollar Loans.

"Eurodollar Loan": any Revolving Credit Loan bearing interest at a rate determined by reference to the Eurodollar Rate in accordance with the provisions of Section 2.

"Event of Default": any of the events specified in Section 7, provided that any requirement for the giving of notice, the lapse of time, or both, or any other condition, has been satisfied.

"Excluded Taxes": as defined in subsection 2.12(a).

"Existing Credit Agreement": as defined in the Background to this Agreement.

"Exposure": as to any Bank at any date, an amount equal to the sum of (a) the aggregate principal amount of all Loans made by such Bank then outstanding and (b) the principal amount of such Bank's pro rata share of Swing Line Loans then outstanding based on its Commitment Percentage.

"FATCA": Sections 1471 through 1474 of the Code, as of the date of this Agreement (or any amended or successor version that is substantially comparable and not materially more onerous to comply with), any current or future regulations or official interpretations thereof and any agreement entered into pursuant to Section 1471(b)(1) of the Code.

"Federal Funds Effective Rate": for any day, the weighted average of the rates on overnight Federal funds transactions with members of the Federal Reserve System arranged by Federal funds brokers, as published on the next succeeding Business Day by the Federal Reserve Bank of New York, or, if such rate is not so published for any day which is a Business Day, the average of the quotations for the day of such transactions received by the Agent from three Federal funds brokers of recognized standing selected by it.

"Federal Funds Open Rate" for any day shall mean the rate per annum which is the daily federal funds open rate as quoted by ICAP North America, Inc. (or any successor) as set forth on the Bloomberg Screen BTMM for that day opposite the caption "OPEN" (or on such other substitute Bloomberg Screen that displays such rate), or as set forth on such other recognized electronic source used for the purpose of displaying such rate as selected by the Agent (an "Alternate Federal Funds Source") (or if such rate for such day does not appear on the Bloomberg Screen BTMM (or any substitute screen) or on any Alternate Federal Funds Source, or if there shall at any time, for any reason, no longer exist a Bloomberg Screen BTMM (or any substitute screen) or any Alternate Federal Funds Source, a comparable replacement rate determined by the Agent at such time (which determination shall be conclusive absent manifest error)); provided, that if such day is not a Business Day, the Federal Funds Open Rate for such day shall be the Federal Funds Open Rate on the immediately preceding Business Day."

"Fee Letter": the letter from the Agent to the Borrower dated November 14, 2016 regarding certain fees payable by the Borrower.

"Fees": as defined in subsection 2.4(a).

"Foreign Bank": any Bank that is not created or organized under the Laws of the United States, any State thereof or the District of Columbia.

"GAAP": at any time with respect to the determination of the character or amount of any asset or liability or item of income or expense, or any consolidation or other accounting computation, generally accepted accounting principles as applied to the public utility industry, as such principles shall be in effect on the date of, or at the end of the period covered by, the financial statements from which such asset, liability, item of income, or item of expense, is derived, or, in the case of any such computation, as in effect on the date when such computation is required to be determined, subject to Section 1.3(b).

"Governmental Authority": shall mean the government of the United States of America or any other nation, or of any political subdivision thereof, whether state or local, and any agency, authority, instrumentality, regulatory body, court, central bank or other entity exercising executive, legislative, judicial, taxing, regulatory or administrative powers or functions of or pertaining to government (including any supra-national bodies such as the European Union or the European Central Bank) and any group or body charged with setting financial accounting or regulatory capital rules or standards (including, without limitation, the Financial Accounting Standards Board, the Bank for International Settlements or the Basel Committee on Banking Supervision or any successor or similar authority to any of the foregoing).

"Guarantor": any Material Subsidiary which becomes a "Guarantor" after the date hereof pursuant to Section 5.11.

"Guaranty": any Guaranty Agreement entered into by a Guarantor pursuant to Section 5.11.

"Indenture": means the Indenture of Mortgage dated as of January 1, 1941 between the Borrower and Chase Manhattan Trust Company, National Association, as successor Trustee, as amended and supplemented.

"Insolvency": with respect to any Multiemployer Plan, the condition that such Plan is insolvent within the meaning of Section 4245 of ERISA.

"Insolvent": pertaining to a condition of Insolvency.

"Interest Coverage Ratio": at the date of determination, the ratio of Consolidated EBIT to Consolidated Interest Expense, in each case for the prior four (4) consecutive fiscal quarters.

"Interest Payment Date": (a) as to any Base Rate Loan or Swing Line Loan, the last day of each month, (b) as to any Eurodollar Loan having an Interest Period of three months or less, the last day of such Interest Period, and (c) as to any Eurodollar Loan having an Interest Period longer than three months, each day which is three months, or a

whole multiple thereof, after the first day of such Interest Period and the last day of such Interest Period.

"Interest Period": with respect to any Eurodollar Loan:

(i) initially the period commencing on the borrowing or conversion date, as the case may be, with respect to such Eurodollar Loan and ending one, two, three or six months thereafter, as selected by the Borrower in their notice of borrowing or notice of conversion, given with respect thereto; and

(ii) thereafter, each period commencing on the last day of the next preceding Interest Period applicable to such Eurodollar Loan and ending one, two, three or six months thereafter, as selected by the Borrower by irrevocable notice to the Agent not less than three Business Days prior to the last day of the then current Interest Period with respect thereto;

provided that, the foregoing provisions relating to Interest Periods are subject to the following:

(i) if any Interest Period would end on a day other than a Business Day, such Interest Period shall be extended to the next succeeding Business Day unless such next succeeding Business Day would fall in the next calendar month, in which case such Interest Period shall end on the next preceding Business Day;

(ii) any Interest Period that begins on the last Business Day of a calendar month (or on a day for which there is no numerically corresponding day in the calendar month at the end of such Interest Period) shall end on the last Business Day of a calendar month;

(iii) an Interest Period that otherwise would extend beyond the Termination Date shall end on the Termination Date; and

(iv) the Borrower shall select Interest Periods so as not to require a payment or prepayment of any Eurodollar Loan during an Interest Period for such Loan.

"Investments": investments (by loan or extension of credit, purchase, advance, guaranty, capital contribution or otherwise) made in cash or by delivery of Property, by the Borrower (i) in any Person, whether by acquisition of stock or other ownership interest, indebtedness or other obligation or Security, or by loan, advance or capital contribution, or (ii) in any Property or (iii) any agreement to do any of the foregoing.

"Law": any law(s) (including common law), constitution, statute, treaty, regulation, rule, ordinance, opinion, issued guidance, release, ruling, order, executive order, injunction, writ, decree, bond, judgment, authorization or approval, lien or award of or any settlement arrangement, by agreement, consent or otherwise, with any Governmental Body, foreign or domestic.

whether in one transaction or in a series of transactions, assets (including Equity Interests in Subsidiaries) representing all or substantially all of the assets of the Company and the Subsidiaries (whether now owned or hereafter acquired), taken as a whole, to any Person or Persons, except (i) to the Company and/or any Subsidiaries and (ii) as permitted under Section 6.02(a)(ii)(B) or 6.02(a)(iii).

SECTION 6.03. Restrictive Agreements. The Company will not, and will not permit any Restricted Subsidiary to, enter into or permit to exist any contractual obligation (other than this Agreement or any other Loan Document) that limits the ability of any Restricted Subsidiary to make dividends or other distributions with respect to its Equity Interests to the Company or any Restricted Subsidiary, unless the Company determines in good faith that such contractual obligations would not materially impede the Company's ability to meet its payment obligations under this Agreement.

SECTION 6.04. Transactions with Affiliates. The Company will not, and will not permit any Restricted Subsidiary to, enter into or cause, suffer or permit to exist any transaction, arrangement or contract with any Affiliate (other than the Company or any Restricted Subsidiary) that is on terms materially less favorable to the Company or such Restricted Subsidiary than those that would be obtained at such time in a comparable arm's-length transaction with a Person other than an Affiliate, provided that the foregoing shall not apply to (a) any payments made and other transactions entered into in the ordinary course of business with officers and directors of the Company or any Subsidiary, and consulting fees and expenses incurred in the ordinary course of business payable to former officers or directors of the Company or any Subsidiary or (b) any other transaction (if part of a series of related transactions, together with such related transactions) involving consideration or value of less than $10,000,000.

SECTION 6.05. Financial Covenant. The Company will not permit the ratio, on the last day of any fiscal quarter of the Company, of (a) Consolidated Funded Debt as of such day to (b) the sum of (i) Consolidated Funded Debt as of such day and (ii) Consolidated Shareholders' Equity as of such day, to exceed 65%.

ARTICLE VII

Events of Default

SECTION 7.01. Events of Default. If any of the following events ("Events of Default") shall occur and be continuing:

(a) the Company shall fail to pay any principal of any Loan or any LC Disbursement when and as the same shall become due and payable, whether at the due date thereof or at a date fixed for prepayment thereof or otherwise;

(b) the Company shall fail to pay any interest or any fee or any other amount (other than an amount referred to in clause (a) of this Section 7.01) payable under this Agreement or any other Loan Document, when and as the same shall become due and payable, and such failure shall continue unremedied for a period of five days;

Prospectus Supplement
(To Prospectus dated April 15, 2021)

Up to $500,000,000

ESSENTIAL UTILITIES, INC.

Common Stock

This prospectus supplement and the accompanying prospectus relate to the offer and sale from time to time of shares of our common stock, par value $0.50 per share, having an aggregate gross sales price of up to $500,000,000 through any of Barclays Capital Inc. ("Barclays"), RBC Capital Markets, LLC ("RBC Capital Markets"), TD Securities (USA) LLC ("TD Securities"), Wells Fargo Securities, LLC ("Wells Fargo Securities"), Robert W. Baird & Co. Incorporated ("Baird") and Janney Montgomery Scott LLC ("Janney Montgomery Scott"), as our agents under separate sales agreements. We refer to Barclays, RBC Capital Markets, TD Securities, Wells Fargo Securities, Baird and Janney Montgomery Scott, each as a sales agent and collectively as the sales agents.

The sales agreements provide that, in addition to the issuance and sale of shares of our common stock by us through the sales agents, we may enter into forward sale agreements, between us and any of Barclays Bank PLC, Royal Bank of Canada, The Toronto-Dominion Bank and Wells Fargo Bank, National Association. We refer to these affiliated entities, when acting in such capacity, as forward purchasers. In connection with each such forward sale agreement, the relevant forward purchaser will, at our request, borrow from third parties and, through the relevant sales agent, sell a number of shares of our common stock equal to the number of shares of our common stock that will underlie such forward sale agreement to hedge such forward purchaser's exposure under such forward sale agreement. We refer to sales agents, when acting as agents for forward purchasers, as forward sellers.

Sales of common stock pursuant to this prospectus supplement and the accompanying prospectus, if any, may be made in negotiated transactions or transactions that are deemed to be "at-the-market" transactions as defined in Rule 415 under the Securities Act of 1933, as amended (the "Securities Act"), including sales made by means of ordinary brokers' transactions through the facilities of the New York Stock Exchange (the "NYSE") at market prices, to or through a market maker, through an electronic communications network, in negotiated transactions, in any manner permitted by applicable law, or as otherwise agreed between the applicable sales agent and us.

The sales agreements also provide that we may sell shares of our common stock to a sales agent as principal for its own account at a price agreed upon at the time of the sale. If we sell shares of our common stock to a sales agent as principal, then we will enter into a separate terms agreement with that sales agent setting forth the terms of such transaction.

None of the sales agents is required to sell any specific dollar amount of shares of our common stock, but each will, subject to the terms and conditions of the applicable sales agreement, use its commercially reasonable efforts to sell the shares offered as instructed by us. The offering of shares of our common stock pursuant to the sales agreements will terminate upon the earlier of (1) the sale of shares of our common stock subject to the sales agreements (including shares sold by us to or through the sales agents and borrowed shares sold through the sales agents, acting as forward sellers) and any terms agreement having an aggregate gross sales price of $500,000,000 and (2) with respect to a particular sales agreement, the termination of such sales agreement by us or by the applicable sales agent as permitted therein.

In connection with sales through any of the sales agents under one or more of the sales agreements, we will pay the applicable sales agent a commission equal to 1.00% of the gross sales price of all shares of our common stock sold by such sales agent. In connection with any forward sale transaction, the applicable sales agent, as forward seller, will receive an effective per share commission of 1.00% of the volume-weighted average price per share at which the shares of common stock are sold, as adjusted, pursuant to such forward sale agreement.

The net proceeds we receive from the sale of our common stock through a sales agent on our behalf pursuant to one or more of the separate sales agreements or to a sales agent acting as a principal will be the gross proceeds received from such sales less the compensation paid to the sales agents and any other costs we may incur in issuing and/or selling the shares of our common stock; provided, however, that we will not initially receive any proceeds from the sale of borrowed shares of our common stock by any forward seller. We expect to receive proceeds from the sale of shares of our common stock upon future physical settlement(s) of the relevant forward sale agreement with the relevant forward purchaser on dates specified by us on or prior to the maturity date of such forward sale agreement, in which case we will expect to receive, subject to certain adjustments, aggregate net cash proceeds at settlement equal to the number of shares underlying the relevant forward sale agreement, multiplied by the relevant forward sale price. If we elect to cash settle or net share settle a forward sale agreement, we may not receive any proceeds (in the case of cash settlement) or will not receive any proceeds (in the case of net share settlement), and we may owe cash (in the case of cash settlement) or shares of our common stock (in the case of net share settlement) to the relevant forward purchaser.

Our common stock is listed on the NYSE under the symbol "WTRG." On October 13, 2022, the last reported sale price of our common stock on the NYSE was $40.27 per share.

Investing in our common stock involves risks. See "Risk Factors" on page S-6 of this prospectus supplement, page 4 of the accompanying prospectus and in the documents we incorporate by reference in this prospectus supplement and the accompanying prospectus.

Neither the U.S. Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus supplement or the accompanying prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

ABOUT THIS PROSPECTUS SUPPLEMENT

Unless otherwise specified or the context requires otherwise, references in this prospectus supplement to:

- "Essential Utilities," the "Company," "we," "us," "our" and similar references refer to Essential Utilities, Inc. and its subsidiaries; and
- "this offering" refers to the offering of shares of our common stock from time to time pursuant to this prospectus supplement and the accompanying prospectus.

All references to currency amounts included in this prospectus supplement are in U.S. dollars unless specifically noted otherwise.

This document is in two parts. The first part is this prospectus supplement, which describes the specific terms of this offering of our common stock and also adds to and updates information contained in the accompanying prospectus and the documents incorporated by reference in the accompanying prospectus. The second part is the accompanying prospectus, which gives more general information about us, some of which does not apply to this offering of our common stock. To the extent the information in this prospectus supplement is inconsistent with the information in the accompanying prospectus, you should rely on the information in this prospectus supplement.

We have not, and the sales agents, the principals, the forward purchasers and the forward sellers have not, authorized anyone to provide you with any information other than that contained or incorporated by reference in this prospectus supplement, the accompanying prospectus or in any free writing prospectus we may provide to you in connection with this offering. Neither we nor any of the sales agents, the principals, the forward purchasers or the forward sellers take any responsibility for, or provide any assurances as to the reliability of, any additional or different information that others may give you. Neither we nor any of the sales agents, the principals, the forward purchasers or the forward sellers are offering to sell our common stock or seeking offers to buy our common stock in jurisdictions where offers or sales are not permitted. You should assume that the information contained in this prospectus supplement, the accompanying prospectus and any related free writing prospectus is accurate only as of their respective dates or as of the respective dates specified in such information, as applicable, and the information contained in documents incorporated by reference is accurate only as of the respective dates of those documents or as of the respective dates specified in such information, as applicable, in each case regardless of the time of delivery of this prospectus supplement or the accompanying prospectus or any such free writing prospectus or any sale of our common stock. Our business, financial condition, results of operations and prospects may have changed since those dates.

The distribution of this prospectus supplement, the accompanying prospectus and any related free writing prospectus and the offering of our common stock in certain jurisdictions may be restricted by law. Persons into whose possession this prospectus supplement, the accompanying prospectus and any such free writing prospectus come should inform themselves about and observe any such restrictions. This prospectus supplement, the accompanying prospectus and any such free writing prospectus do not constitute, and may not be used in connection with, an offer or solicitation by anyone in any jurisdiction in which such offer or solicitation is not authorized or in which the person making such offer or solicitation is not qualified to do so or to any person to whom it is unlawful to make such offer or solicitation. See "Plan of Distribution (Conflicts of Interest)."

TRADEMARKS, TRADE NAMES AND SERVICE MARKS

We own or have rights to trademarks, trade names and service marks that we use in conjunction with the operation of our business and that appear in this prospectus supplement. This prospectus supplement may also contain trademarks, trade names and service marks of other companies which, to our knowledge, are the property of their respective owners. We do not intend our use or display of other parties' trademarks, trade names or service marks to imply, and such use or display should not be construed to imply, a relationship with, or endorsement or sponsorship of us by these other parties. Solely for convenience, trademarks, trade names and service marks referred to in this prospectus supplement may appear without the ® or ™ symbols, but the absence of such symbols does not indicate the registration status of such trademarks, trade names or service marks and is not intended to indicate, in any way, that we will not assert, to the fullest extent under applicable law, our rights or the rights of the applicable licensor to such trademarks, trade names and service marks.

FORWARD-LOOKING STATEMENTS

Certain statements in this prospectus supplement, the accompanying prospectus and the documents they incorporate by reference contain, and any free writing prospectus we may provide to you in connection with this offering are "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), that are made based upon, among other things, our current assumptions, expectations, plans, and beliefs concerning future events and their potential effect on us. These forward-looking statements involve risks, uncertainties and other factors, many of which are outside our control that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by these forward-looking statements. In some cases you can identify forward-looking statements where statements are preceded by, followed by or include the words "believes," "expects," "estimates," "anticipates," "plans," "future," "potential," "probably," "predictions," "intends," "will," "continue," "in the event" or the negative of such terms or similar expressions. Such forward-looking statements include, but are not limited to, statements regarding:

- the impact of the novel coronavirus ("COVID-19") pandemic or the measures implemented by the Company as a result of the COVID-19 pandemic;
- opportunities for future acquisitions, both within and outside the water, wastewater, and natural gas industries, the success of pending acquisitions and the impact of future acquisitions;
- acquisition-related costs and synergies;
- the sale of water and wastewater divisions;
- the impact of conservation awareness of customers and more efficient fixtures and appliances on water and natural gas usage per customer;
- the impact of our business on the environment, and our ability to meet our climate change goals;
- our authority to carry on our business without unduly burdensome restrictions;
- our capability to pursue timely rate increase requests;
- the capacity of our water supplies, water facilities, wastewater facilities, and natural gas supplies and storage facilities;
- the impact of decisions of governmental and regulatory bodies, including decisions to raise or lower rates and decisions regarding potential acquisitions;
- developments, trends and consolidation in the water, wastewater, and natural gas utility and infrastructure industries;
- the impact of changes in and compliance with governmental laws, regulations and policies, including those dealing with the environment, health and water quality, taxation, and public utility regulation;
- the development of new services and technologies by us or our competitors;
- the ongoing integration of the acquisition (the "Peoples Gas Acquisition") of a natural gas distribution company consisting of Peoples Natural Gas Company LLC, Peoples Gas Company LLC, Peoples Gas West Virginia, Inc., Peoples Gas Kentucky, Inc., and Delta Natural Gas Company Inc. (collectively, these businesses are referred to as "Peoples");
- the availability of qualified personnel;
- the condition of our assets;
- recovery of capital expenditures and expenses in rates;
- projected capital expenditures and related funding requirements;

- the availability and cost of capital financing;
- dividend payment projections;
- the impact of geographic diversity on our exposure to unusual weather;
- the continuation of investments in strategic ventures;
- our ability to obtain fair market value for condemned assets;
- the impact of fines and penalties;
- the impact of legal proceedings;
- general economic conditions, including inflation;
- the impact of federal and/or state tax policies and the regulatory treatment of the effects of those policies; and
- the amount of income tax deductions for qualifying utility asset improvements and the Internal Revenue Service's ultimate acceptance of the deduction methodology.

Because forward-looking statements involve risks and uncertainties, there are important factors that could cause actual results to differ materially from those expressed or implied by these forward-looking statements, including, but not limited to:

- impacts from the global outbreak of COVID-19, including on consumption, usage and collections;
- the success in the closing of, and the profitability of, future acquisitions;
- changes in general economic, business, credit and financial market conditions;
- our ability to manage the expansion of our business, including our ability to manage our expanded operations resulting from the Peoples Gas Acquisition;
- changes in environmental conditions, including the effects of climate change;
- our ability to integrate and otherwise realize all of the anticipated benefits of businesses, technologies or services which we may acquire;
- the decisions of governmental and regulatory bodies, including decisions on regulatory filings, including rate increase requests and decisions regarding potential acquisitions;
- our ability to file rate cases on a timely basis to minimize regulatory lag;
- the impact of inflation on our business and on our customers;
- geopolitical forces;
- abnormal weather conditions, including those that result in water use restrictions;
- the seasonality of our business;
- our ability to treat and supply water or collect and treat wastewater;
- our ability to source sufficient natural gas to meet customer demand in a timely manner;
- the continuous and reliable operation of our information technology systems, including the impact of cyber security attacks or other cyber-related events;
- changes in governmental laws, regulations and policies, including those dealing with taxation, the environment, health and water quality, and public utility regulation;
- the extent to which we are able to develop and market new and improved services;

- the effect of the loss of major customers;
- our ability to retain the services of key personnel and to hire qualified personnel as we expand;
- labor disputes;
- increasing difficulties in obtaining insurance and increased cost of insurance;
- cost overruns relating to improvements to, or the expansion of, our operations;
- increases, including inflation, in the costs of goods and services;
- significant or prolonged disruptions in the supply of important goods or services;
- the effect of natural gas price volatility;
- civil disturbance or terroristic threats or acts;
- changes to the rules or our assumptions underlying our determination of what qualifies for an income tax deduction for qualifying utility asset improvements;
- changes in, or unanticipated, capital requirements;
- changes in our credit rating or the market price of our common stock;
- changes in valuation of strategic ventures;
- changes in accounting pronouncements;
- litigation and claims;
- restrictions on our subsidiaries' ability to make dividends and other distributions;
- dilution to our shareholders related to any financing transactions; and
- broad discretion of our management to use the net proceeds from this offering.

Given these risks and uncertainties, you should not place undue reliance on any forward-looking statements. You should read this prospectus supplement, the accompanying prospectus and the documents that we incorporate by reference into this prospectus supplement completely and with the understanding that our actual results, performance and achievements may be materially different from what we expect. These forward-looking statements represent assumptions, expectations, plans and beliefs only as of the date of this prospectus supplement, the date of the document containing the applicable statement or the date specified in such statement, as applicable. Except for our ongoing obligations to disclose certain information under the federal securities laws, we are not obligated, and assume no obligation, to update these forward-looking statements, even though our situation may change in the future. For further information or other factors which could affect our financial results and such forward-looking statements, see "Risk Factors." We qualify all of our forward-looking statements by these cautionary statements.

Investing in our common stock involves risks. You should review and consider carefully the risks, uncertainties and other factors that affect our business, financial condition and results of operations and the value of our common stock, including those described in the "Business," "Risk Factors," and "Management's Discussion and Analysis of Financial Condition and Results of Operations" sections and other sections in our Annual Report on Form 10-K for the fiscal year ended December 31, 2021, filed with the SEC on March 1, 2022 and in our Quarterly Reports on Form 10-Q for the three months ended March 31, 2022 and June 30, 2022, filed with the SEC on May 10, 2022 and August 9, 2022, respectively, therein and those described in the "Risk Factors" sections and other sections of this prospectus supplement and the accompanying prospectus and the documents incorporated by reference therein. You may obtain copies of these reports and documents as described under "Where You Can Find Additional Information; Incorporation of Certain Documents by Reference" in this prospectus supplement. These risks, uncertainties and other factors could cause you to suffer a loss of all or part

of your investment in our shares of common stock. Before making an investment decision, you should carefully consider these risks, uncertainties and other factors, as well as other information contained or incorporated by reference in this prospectus supplement and the accompanying prospectus and any related free writing prospectus we may provide to you in connection with this offering. However, additional risks and uncertainties not presently known to us or that we currently deem immaterial may also impair our business, operations, financial condition and financial results and the value of our shares of common stock.

MARKET AND INDUSTRY DATA

This prospectus supplement, the accompanying prospectus and the documents incorporated by reference in this prospectus supplement and the accompanying prospectus include, and any free writing prospectus we may provide to you in connection with this offering may include, market, demographic and industry data and forecasts related to our business that are based on or derived from sources such as independent industry publications, publicly available information, government data and other information from third parties or that have been compiled or prepared by our management or employees. We do not guarantee the accuracy or completeness of any of this information, and we have not independently verified any of the information provided by third-party sources.

In addition, market, demographic and industry data and forecasts involve estimates, assumptions and other uncertainties and are subject to change based on various factors, including those discussed under the heading “Risk Factors” in this prospectus supplement and under similar headings in the documents that are incorporated by reference in this prospectus supplement and the accompanying prospectus. Accordingly, you should not place undue reliance on any of this information.

PROSPECTUS SUPPLEMENT SUMMARY

The following summary highlights, and should be read together with, the information contained elsewhere in this prospectus supplement, the accompanying prospectus and the documents incorporated by reference herein and therein. This summary may not contain all of the information that may be important to you, and you should carefully read this entire prospectus supplement, the accompanying prospectus, any free writing prospectus we may provide to you in connection with this offering and the documents incorporated by reference herein and therein before making an investment decision. You may obtain a copy of the documents incorporated by reference by following the instructions in the section titled "Where You Can Find Additional Information; Incorporation of Certain Documents by Reference" in this prospectus supplement.

Unless we state otherwise or the context otherwise requires, references appearing in this prospectus supplement to "Essential Utilities," the "Company," "we," "us" and "our" should be read to refer to Essential Utilities, Inc. and its subsidiaries.

Essential Utilities, Inc.

Essential Utilities, Inc., is a Pennsylvania corporation and the holding company for regulated utilities providing water, wastewater or natural gas services to an estimated five million people in Pennsylvania, Ohio, Texas, Illinois, North Carolina, New Jersey, Indiana, Virginia, West Virginia, and Kentucky under the Aqua and Peoples brands.

One of our largest operating subsidiaries is Aqua Pennsylvania, Inc., which accounted for approximately 55% of our operating revenues and approximately 68% of income for our regulated water segment in 2021. Our other regulated water or wastewater utility subsidiaries provide similar services in seven additional states. Additionally, commencing on March 16, 2020, with the completion of the Peoples Gas Acquisition, the Company began to provide natural gas distribution services to customers in western Pennsylvania, Kentucky and West Virginia. As of December 31, 2021, approximately 93% of the total number of natural gas utility customers we serve were in western Pennsylvania.

Our growth in revenues over the past five years is primarily a result of the Peoples Gas Acquisition, increases in water and wastewater rates and customer growth. The increase in our utility customer base, as shown below, has been due to customers added through acquisitions, partnerships with developers, and organic growth (excluding dispositions):

Year	Utility Customer Growth Rate
2021	1.2%
2020	42.9%
2019	2.1%
2018	2.3%
2017	1.1%

In 2021, 2020, and 2019, our customer count increased by 21,246, 772,099, and 21,108 customers, respectively, primarily due to the water and wastewater utility systems that we acquired, organic growth, and in 2020, due to the Peoples Gas Acquisition that resulted in the addition of approximately 750,000 natural gas utility customers. Overall, for the five year period of 2017 through 2021, our utility customer base, adjusted to exclude customers associated with utility system dispositions, increased at an annual compound rate of 13.4%. During the five year period ended December 31, 2021, our utility customer base including customers associated with utility systems acquisitions and dispositions increased from 972,265 at January 1, 2017 to 1,820,049 at December 31, 2021.

The Offering

The following summary contains basic information about this offering and may not contain all of the information that may be important to you. You should read this entire prospectus supplement, the accompanying prospectus, any free writing prospectus we may provide to you in connection with this offering and the documents incorporated by reference herein and therein before making an investment decision.

As used in this section, unless the context otherwise requires, references to "Essential Utilities," the "Company," "we," "us," "our" and similar references refer only to Essential Utilities, Inc. and not to its consolidated subsidiaries.

Issuer	Essential Utilities, Inc., a Pennsylvania corporation.
Common Stock Offered	Shares of our common stock with an aggregate gross sales price of up to $500,000,000. The shares of our common stock offered pursuant to this prospectus supplement and the accompanying prospectus include newly issued shares that may be offered and sold by us to or through the sales agents, acting as our sales agents or as principal, and borrowed shares of our common stock that may be offered and sold by the forward purchasers through their respective forward sellers.
Use of Proceeds	We intend to use the net proceeds from any sales of shares of our common stock to or through the sales agents and the net cash proceeds from the settlement of any forward sale agreements for general corporate purposes, which may include working capital, capital expenditures, water and wastewater utility acquisitions and repaying outstanding indebtedness, including under our revolving credit facility or the revolving credit facilities of our subsidiaries. See "Use of Proceeds" and "Plan of Distribution (Conflicts of Interest)—Conflicts of Interest". We will not initially receive any proceeds from the sale of borrowed shares of our common stock by the forward purchasers through their respective forward sellers in connection with any forward sale agreement as a hedge of such forward sale agreement. For additional information, see "Plan of Distribution (Conflicts of Interest)—Sales Through Forward Sellers".
Accounting Treatment of Forward Sales	In the event that we enter into any forward sale agreements, we expect that before any issuance of shares of our common stock upon settlement of any forward sale agreement, the shares issuable upon settlement of that particular forward sale agreement will be reflected in our diluted earnings per share calculations using the treasury stock method. Under this method, the number of shares of our common stock used in calculating diluted earnings per share is deemed to be increased by the excess, if any, of the number of shares that would be issued upon physical settlement of such forward sale agreement over the number of shares that could be purchased by us in the market (based on the average market price during the relevant period) using the proceeds receivable upon settlement (based on the adjusted forward sale price at the end of the reporting period).

	Consequently, prior to physical or net share settlement of a particular forward sale agreement and subject to the occurrence of certain events, we anticipate there will be no dilutive effect on our earnings per share except during periods when the average market price of our common stock is above the per share adjusted forward sale price of such forward sale agreement. However, if we physically or net share settle any forward sale agreement, delivery of shares of our common stock on any such settlement of such forward sale agreement will result in dilution to our earnings per share and return on equity.
Dividend Policy	We have historically paid quarterly dividends on our common stock; however, the declaration, amount, timing and payment of any future dividends are subject to the determination and approval of our board of directors based on then current or anticipated future conditions, including our results of operations, capital requirements, financial condition, legal requirements or other factors deemed relevant by our board of directors. See "Listing of Our Common Stock and Dividends."
Listing	Our common stock is listed on the NYSE under the symbol "WTRG."
Transfer Agent and Registrar	The registrar and transfer agent for our common stock is Computershare Trust Company, N.A.
Certain United States Federal Income Tax Considerations	Certain United States federal income tax considerations to non-U.S. holders of the ownership and disposition of our common stock are described in "Certain United States Federal Income Tax Considerations to Non-U.S. Holders" included in this prospectus supplement.
Risk Factors	Investing in our common stock involves risks. See "Risk Factors" in this prospectus supplement, the accompanying prospectus and in the documents we incorporate by reference in this prospectus supplement and the accompanying prospectus for a discussion of some of the risks and other factors you should carefully consider before deciding to invest in our common stock.
Conflict of Interests	Certain of the sales agents and/or their affiliates are also lenders and/or agents under our and our subsidiaries' revolving credit facilities and receive customary fees and expenses in connection therewith. To the extent we use proceeds from this offering to repay indebtedness under our or our subsidiaries' revolving credit facilities, such sales agents and/or affiliates may receive proceeds from this offering. Because such sales agents and/or affiliates may receive more than 5% of the net proceeds of this offering, the sales agents may be deemed to have a "conflict of interest" under Financial Industry Regulatory Authority, Inc. ("FINRA") Rule 5121. Accordingly, this offering is being made in compliance with the applicable provisions

of FINRA Rule 5121. The appointment of a "qualified independent underwriter" is not required in connection with this offering as a "bona fide public market," as defined in FINRA Rule 5121, exists for our common stock. In addition, to comply with FINRA Rule 5121, each of the sales agents will not confirm any sales to any account over which it exercises discretionary authority without the specific written approval of the transaction from the account holder. See "Plan of Distribution (Conflicts of Interest)" and "Use of Proceeds".

RISK FACTORS

Investing in our common stock involves risks. You should review and carefully consider the risks, uncertainties and other factors described below and all of the information included elsewhere in this prospectus supplement, the accompanying prospectus, any free writing prospectus we may provide to you in connection with this offering and the documents incorporated by reference herein and therein before deciding to invest in our common stock. We also urge you to carefully consider the risks, uncertainties and other factors set forth under the headings "Forward-Looking Statements" and "Market and Industry Data." However, additional risks and uncertainties not presently known to us or that we currently deem immaterial may also impair our business, operations, financial condition and financial results and the value of our common stock.

Risks Related to Our Business

For a discussion of specific risks related to our business, operations, financial condition and financial results please see the "Business," "Risk Factors," and "Management's Discussion and Analysis of Financial Condition and Results of Operations" sections and other sections in our Annual Report on Form 10-K for the fiscal year ended December 31, 2021, filed with the SEC on March 1, 2022 and in our Quarterly Reports on Form 10-Q for the three months ended March 31, 2022 and June 30, 2022, filed with the SEC on May 10, 2022 and August 9, 2022, respectively, as updated by our subsequent annual, quarterly and other reports and documents we file with the SEC that are incorporated by reference in this prospectus supplement and the accompanying prospectus. See "Where You Can Find Additional Information; Incorporation of Certain Documents by Reference" in this prospectus supplement.

Risks Related to this Offering and Ownership of Our Common Stock

The price of our common stock may be volatile. This volatility may affect the price at which one could sell our common stock, and the sale or resale of substantial amounts of our common stock could adversely affect the market price of our common stock.

The price of our common stock on the NYSE constantly changes. We expect that the market price of our common stock will continue to fluctuate. Our stock price may fluctuate as a result of a variety of factors, many of which are beyond our control. Further, the sale or issuance of substantial amounts of our common stock, or the perception that additional sales or issuances could occur, could adversely affect the market price of our common stock, even if the business is doing well. In addition, the availability for sale of substantial amounts of our common stock could adversely impact its market price. Any of the foregoing may also impair our ability to raise additional capital through the sale of our equity securities.

The common stock offered by us in an offering will be sold in "at the market offerings", and investors who buy shares at different times will likely pay different prices.

Investors who purchase shares of our common stock in this offering at different times will likely pay different prices, and so may experience different outcomes in their investment results. We will have discretion, subject to market demand, to vary the timing, prices and numbers of shares sold, and there is no minimum or maximum sales price. Investors may experience a decline in the value of their shares as a result of share sales made at prices lower than the prices they paid.

Our management will have broad discretion in the use of the net proceeds from this offering and may allocate the net proceeds from this offering in ways that you and other shareholders may not approve.

Our management will have broad discretion in its use of the net proceeds, including for any of the purposes described in the section entitled "Use of Proceeds," and you will not have the opportunity as part of your investment decision to assess whether the net proceeds are being used appropriately. Because of the number and variability of factors that will determine our use of the net proceeds from this offering, their ultimate use may

vary substantially from their currently intended use. The failure of our management to use these funds effectively could harm our business. Pending their use, we may invest the net proceeds from this offering in short-term, investment-grade, interest-bearing investments. These investments may not yield a favorable return to our shareholders.

We expect that we will need to raise additional capital, and raising additional funds by issuing additional equity securities or with additional debt financing may cause dilution to shareholders or restrict our operations.

We expect that we will need to raise additional capital in the future in order to, among other things, repay indebtedness and fund our operations and future acquisitions, which we may do through equity and equity-linked securities offerings or additional debt financings, as well as borrowings under our credit facilities. Additional issuances of equity securities, including shares of our common stock, or debt or other securities that are convertible into or exchangeable for, or that represent the right to receive, common stock could dilute the economic and other rights and interests of holders of shares of our common stock and cause the market price of our common stock to decline. Subject to certain exceptions, such issuances may be made without any action or approval by our shareholders.

Any new debt financing we enter into may involve covenants that restrict our operations more than our current outstanding debt and credit facilities. These restrictive covenants could include limitations on additional borrowings and specific restrictions on the use of our assets, as well as prohibitions or limitations on our ability to create liens, pay dividends, receive distributions from our subsidiaries, redeem or repurchase our stock or make investments. These covenants could hinder our access to capital markets and limit or delay our ability to carry out our capital expenditure program.

Anti-takeover provisions in our organizational documents and under Pennsylvania law might discourage, delay or prevent changes in control of our company and may result in an entrenchment of management and diminish the value of our common stock.

Certain provisions of our articles of incorporation and bylaws could have the effect of delaying, deterring or preventing another party from acquiring or seeking to acquire control of us. These provisions are intended to discourage certain types of coercive takeover practices and inadequate takeover bids and to encourage anyone seeking to acquire control of us to negotiate first with our board of directors. However, these provisions could also delay, deter or prevent a change of control or other takeover of our company that our shareholders might consider to be in their best interests, including transactions that might result in a premium being paid over the market prices of our common stock, and may also limit the prices that investors are willing to pay in the future for our common stock. These provisions may also have the effect of preventing changes in our management.

For example, our articles of incorporation and bylaws include anti-takeover provisions that:

- authorize our board of directors, without a vote or other action by our shareholders, to cause the issuance of preferred stock in one or more series and, with respect to each series, to fix the number of shares constituting that series and to establish the rights, preferences, privileges and restrictions of that series, which may include, among other things, dividend and liquidation rights and preferences, rights to convert such shares into common stock, voting rights and other rights which may adversely affect the voting or other rights and the economic interests of holders of our common stock;

- require that certain fundamental transactions must be approved by the holders of 75% of the outstanding shares of our capital stock entitled to vote on the matter unless at least a majority of the members of the board of directors has approved the transaction, in which case the required shareholder approval will be the minimum approval required by applicable law;

- establish advance notice requirements and procedures for shareholders to submit nominations of candidates for election to our board of directors and to propose other business to be brought before a shareholders meeting;

- provide that vacancies in our board of directors, including vacancies created by the removal of any director or any increase in the number of directors, may be filled by a majority of the directors then in office or by the sole remaining director;

- provide that no shareholder may cumulate votes in the election of directors, which means that the holders of a majority of our outstanding shares of common stock can elect all directors standing for election by our common shareholders;

- require that any action to be taken by our shareholders must be taken either (1) at a duly called annual or special meeting of shareholders or (2) by the unanimous written consent of all of our shareholders;

- require action by shareholders entitled to cast a majority of the votes which all shareholders are entitled to cast at the particular meeting in order for our shareholders to call a special meeting of shareholders; and

- provide that a state court located within Montgomery County, Pennsylvania (or, in the event such court lacks jurisdiction over such action or proceeding, the United States District Court for the Eastern District of Pennsylvania) will be the exclusive forum for the adjudication of certain disputes, including derivative actions.

In addition, anti-takeover provisions in Pennsylvania law could make it more difficult for a third party to acquire control of us including, but not limited to, provisions relating to (1) control share acquisitions, (2) disgorgement of profits by certain controlling persons, (3) business combination transactions with interested shareholders, and (4) the rights of shareholders to demand fair value for their stock following a control transaction. Pennsylvania law permits corporations to opt-out of these anti-takeover provisions, but we have not done so. Such provisions could have the effect of deterring takeovers or delaying changes in control or management of us. Additionally, such provisions could limit the price that some investors might be willing to pay in the future for shares of our common stock.

We may be unable to, or may choose not to, continue to pay dividends on our common stock at current or planned rates or at all.

Any future payments of cash dividends, and the amount of any cash dividends we pay, on our common stock will depend on, among other things, our financial condition, capital requirements and results of operations, and the ability of our subsidiaries to distribute cash to us, as well as other factors that our board of directors may consider relevant. If we were to reduce the amount of cash dividends per share payable on our common stock, fail to increase the amount of those cash dividends per share in the future or cease paying those cash dividends altogether, it would likely have an adverse impact on the market price of our common stock. In addition, under Pennsylvania law, our board of directors (or an authorized committee thereof) may not declare and pay dividends on shares of our common stock if, after giving effect to the dividend (1) we would be unable to pay our debts as they become due in the ordinary course of business, or (2) our total assets would be less than the sum of our total liabilities plus the amount that would be needed, if we were to be dissolved as of the date for measuring the dividend, to satisfy the preferential rights upon dissolution of shareholders whose preferential rights are superior to those receiving the dividend.

Our ability to pay dividends and to meet our debt obligations largely depends on the performance of our subsidiaries and the ability to utilize the cash flows from those subsidiaries.

Essential Utilities is a holding company substantially all of whose assets are owned by its subsidiaries and substantially all of whose operations are conducted through its subsidiaries. Our ability to pay dividends and meet our debt and other obligations depends almost entirely on cash flows from our subsidiaries and, in the short

term, our ability to raise capital from external sources. In the long term, cash flows from its subsidiaries depend on their ability to generate operating cash flows in excess of their own expenditures, common and preferred stock dividends (if any), and debt or other obligations. Our subsidiaries are separate and distinct legal entities that are not obligated to pay dividends or make loans or distributions to Essential Utilities (whether to enable Essential Utilities to pay dividends on its common stock, to pay principal and interest on its debt, to settle, repurchase or redeem its debt or other securities, or to satisfy its other obligations). In addition, notwithstanding its controlling interest in such subsidiaries, many of them are limited in their ability to pay dividends or make loans or distributions to Essential Utilities, including, without limitation, as a result of legislation, regulation, court order, contractual restrictions and other restrictions or in times of financial distress. As a result, we may not be able to cause our subsidiaries and other entities to distribute funds or provide loans sufficient to enable us to pay dividends and meet our debt and other obligations.

Risks Related to Forward Sale Agreements

Settlement provisions contained in any forward sale agreement subject us to certain risks.

A forward purchaser will have the right to accelerate a forward sale agreement that it enters into with us and require us to physically settle such forward sale agreement on a date specified by such forward purchaser if:

- in such forward purchaser's commercially reasonable judgment, it or its affiliate is unable to hedge (or maintain a hedge of) its exposure under such forward sale agreement in a commercially reasonable manner because (x) insufficient shares of our common stock have been made available by securities lenders for borrowing or (y) the forward purchaser or its affiliate would incur a stock borrowing cost in excess of a specified threshold;
- we declare or issue any dividend or distribution on shares of our common stock
  - payable in cash in excess of specified amounts or that otherwise constitutes an extraordinary dividend under the forward sale agreement,
  - payable in securities of another company as a result of a spinoff or similar transaction,
  - of any other type of securities (other than our common stock) or assets for consideration of less than the prevailing market price, as determined in a commercially reasonable manner by the calculation agent (as defined in the applicable sales agreement), or
  - that is, by its terms or declared intent, outside the normal course of our operations or normal dividend policies or practices;
- certain ownership thresholds applicable to such forward purchaser and its affiliates are exceeded;
- an intended event is announced that if consummated would result in a specified extraordinary event under such forward sale agreement (including certain mergers or tender offers, as well as certain events involving our nationalization, insolvency or a delisting of our common stock) or an event occurs that would constitute a hedging disruption or change in law; or
- certain other events of default, termination events or other specified events occur, including, among others, any material misrepresentation made in connection with such forward sale agreement or our insolvency (each as more fully described in each forward sale agreement).

A forward purchaser's decision to exercise its right to accelerate any forward sale agreement and to require us to settle any such forward sale agreement will be made irrespective of our interests, including our need for capital. In such cases, we could be required to issue and deliver shares of our common stock under the terms of the physical settlement provisions of the applicable forward sale agreement irrespective of our capital needs, which would result in dilution to our earnings per share and may adversely affect the market price of our common stock. In addition, upon certain events of bankruptcy or insolvency relating to us, the forward sale agreement will automatically terminate without further liability of either party (other than in the event of a breach by us of

certain representations or warranties contained in the forward sale agreement). Following any such termination, we would not issue any shares of common stock and we would not receive any proceeds pursuant to the forward sale agreement.

Under the terms of each forward sale agreement, we generally have the right to elect physical, cash or net share settlement. Subject to the provisions of such forward sale agreement, delivery of our shares on any physical settlement or, to the extent we are obligated to deliver shares of our common stock, net share settlement will result in dilution to our earnings per share and return on equity. If we elect to cash or net share settle all or a portion of the shares of our common stock underlying any forward sale agreement, we would expect the relevant forward purchaser or one of its affiliates to purchase shares of our common stock in secondary market transactions over an unwind period to:

- return shares of our common stock to securities lenders in order to unwind such forward purchaser's hedge position (after taking into consideration any shares of our common stock to be delivered by us to such forward purchaser, in the case of net share settlement); and
- if applicable, in the case of net share settlement, deliver shares of our common stock to us to the extent required in settlement of such forward sale agreement.

If the price of our common stock at which these purchases are made is below the relevant forward sale price, such forward purchaser will pay us such difference in cash (if we cash settle) or deliver to us shares of our common stock having a market value equal to such difference (if we net share settle), subject to a fixed reduction as provided in the applicable forward sale agreement. If the price of our common stock at which these purchases are made exceeds the applicable forward sale price, we will pay such forward purchaser an amount in cash equal to such difference (if we elect to cash settle) or we will deliver to such forward purchaser a number of shares of our common stock having a market value equal to such difference (if we elect to net share settle), subject to a fixed reduction as provided in the applicable forward sale agreement. Any such difference could be significant. See "Plan of Distribution (Conflicts of Interest)—Sales Through Forward Sellers."

In addition, the purchase of our common stock by a forward purchaser or its affiliate to unwind the forward purchaser's hedge position could cause the price of our common stock to increase over time (or prevent a decrease over time), thereby increasing the amount of cash (in the case of cash settlement) or the number of shares (in the case of net share settlement) that we would owe such forward purchaser upon settlement of the applicable forward sale agreement or decreasing the amount of cash (in the case of cash settlement), or the number of shares (in the case of net share settlement), that such forward purchaser would owe us upon settlement of the applicable forward sale agreement.

The forward sale price we expect to receive upon physical settlement of any forward sale agreement will be subject to adjustment on a daily basis based on a floating interest rate factor equal to the overnight bank funding rate less a spread, and will decrease on certain dates specified in the relevant forward sale agreement by the quarterly dividend amount per share we currently expect to declare during the term of such forward sale agreement. If the overnight bank funding rate is less than the spread on any day, the interest rate factor will result in a daily reduction of the forward sale price. If the market value of shares of our common stock during the relevant valuation period under any forward sale agreement is above the relevant forward sale price, in the case of cash settlement, we would pay the relevant forward purchaser an amount in cash equal to the difference or, in the case of net share settlement, we would deliver to the relevant forward purchaser a number of shares of our common stock having a value equal to the difference. Thus, we could be responsible for a potentially substantial cash or stock payment. If the market value of shares of our common stock during the relevant valuation period under any forward sale agreement is below the relevant forward sale price, in the case of cash settlement, we would be paid the difference in cash by the relevant forward purchaser or, in the case of net share settlement, we would receive from the relevant forward purchaser a number of shares of our common stock having a value equal to the difference. See "Plan of Distribution (Conflicts of Interest)—Sales Through Forward Sellers" for information on the forward sale agreements.

In the case of our bankruptcy or insolvency, any forward sale agreement that is in effect will automatically terminate, and we would not receive the expected proceeds from any forward sales of our common stock.

If we or a regulatory authority with jurisdiction over us institutes, or we consent to, a proceeding seeking a judgment in bankruptcy or insolvency or any other relief under any bankruptcy or insolvency law or other similar law affecting creditors' rights, or we or a regulatory authority with jurisdiction over us presents a petition for our winding-up or liquidation, or we consent to such a petition, any forward sale agreement that is then in effect will automatically terminate. If any such forward sale agreement so terminates under these circumstances, we would not be obligated to deliver to the relevant forward purchaser any common stock not previously delivered, and the relevant forward purchaser would be discharged from its obligation to pay the applicable forward sale price per share in respect of any shares of common stock not previously settled under the applicable forward sale agreement. Therefore, to the extent that there are any shares of common stock with respect to which any forward sale agreement has not been settled at the time of the commencement of any such bankruptcy or insolvency proceedings, we would not receive the relevant forward sale price per share in respect of those shares.

USE OF PROCEEDS

The shares of our common stock offered pursuant to this prospectus supplement and the accompanying prospectus include newly issued shares that may be offered and sold by us to or through the sales agents, acting as our sales agents or as principals, and borrowed shares of our common stock that may be offered and sold by the forward purchasers through their respective forward sellers. We intend to use the net proceeds from this offering for general corporate purposes, which may include working capital, capital expenditures, water and wastewater utility acquisitions and repaying outstanding indebtedness, including under our revolving credit facility or the revolving credit facilities of our subsidiaries.

The amount of proceeds from this offering will depend upon the number of shares of our common stock sold, the market price at which they are sold and, with respect to any forward sale transaction, the settlement method as described below. There can be no assurance that we will be able to sell any shares under or fully utilize the sales agreements or any forward sale agreement as a source of financing.

We will not initially receive any proceeds from the sale of borrowed shares of our common stock by the forward purchasers through their respective forward sellers in connection with any forward sale agreement as a hedge of such forward sale agreement. In the event of full physical settlement of a forward sale agreement, which we expect to occur on or prior to the maturity date of such forward sale agreement, we expect to receive aggregate cash proceeds equal to the product of the initial forward sale price per share under such forward sale agreement and the number of shares of our common stock underlying such forward sale agreement, subject to the price adjustment and other provisions of such forward sale agreement. If, however, we elect to cash settle or net share settle any forward sale agreement, we would expect to receive an amount of proceeds that is significantly lower than the product set forth in the immediately preceding sentence (in the case of any cash settlement) or will not receive any proceeds (in the case of any net share settlement), and we may owe cash (in the case of any cash settlement) or shares of our common stock (in the case of any net share settlement) to the relevant forward purchaser. We intend to use any cash proceeds that we receive upon physical settlement of any forward sale agreement, if physical settlement applies, or upon cash settlement of any forward sale agreement, if we elect cash settlement, for the purposes provided in the first paragraph of this section.

Certain of the sales agents and/or their affiliates are also lenders and/or agents under our and our subsidiaries' revolving credit facilities and receive customary fees and expenses in connection therewith. To the extent we use proceeds from this offering to repay indebtedness under our or our subsidiaries' revolving credit facilities, such sales agents and/or affiliates may receive proceeds from this offering. See "Plan of Distribution (Conflicts of Interest)—Conflicts of Interest".

LISTING OF OUR COMMON STOCK AND DIVIDENDS

Our common stock is listed on the NYSE under the symbol "WTRG." As of October 11, 2022, there were 262,290,761 shares of our common stock outstanding and as of June 30, 2022 there were options to acquire 860,341 shares of our common stock outstanding.

On October 13, 2022, the last reported sale price of our common stock on the NYSE was $40.27. As of October 13, 2022, there were 20,443 holders of record of our common stock.

We have historically paid quarterly dividends on our common stock; however, the declaration, amount, timing and payment of any future dividends are subject to the determination and approval of our board of directors based on then-current or anticipated future conditions, including our results of operations, capital requirements, financial condition, legal requirements or other factors deemed relevant by our board of directors. See "Risk Factors—Risks Related to this Offering and Our Common Stock—We may be unable to, or may choose not to, continue to pay dividends on our common stock at current or planned rates or at all."

CERTAIN UNITED STATES FEDERAL INCOME TAX CONSIDERATIONS TO NON-U.S. HOLDERS

The following is a summary of certain United States federal income tax consequences of the ownership and disposition of our common stock. This summary deals only with common stock that is held as a capital asset by a non-U.S. holder (as defined below).

A "non-U.S. holder" means a beneficial owner of our common stock (other than an entity or arrangement treated as a partnership for United States federal income tax purposes) that is not, for United States federal income tax purposes, any of the following:

- an individual who is a citizen or resident of the United States;
- a corporation (or any other entity treated as a corporation for United States federal income tax purposes) created or organized in or under the laws of the United States, any state thereof or the District of Columbia;
- an estate the income of which is subject to United States federal income taxation regardless of its source; or
- a trust if it (1) is subject to the primary supervision of a court within the United States and one or more United States persons have the authority to control all substantial decisions of the trust or (2) has a valid election in effect under applicable United States Treasury regulations to be treated as a United States person.

This summary is based upon provisions of the Internal Revenue Code of 1986, as amended (the "Code"), and regulations, rulings and judicial decisions as of the date hereof. Those authorities may be changed, perhaps retroactively, so as to result in United States federal income tax consequences different from those summarized below. This summary does not address all of the United States federal income tax consequences that may be relevant to you in light of your particular circumstances, nor does it address the Medicare tax on net investment income, United States federal estate and gift taxes or the effects of any state, local or foreign tax laws. In addition, it does not represent a detailed description of the United States federal income tax consequences applicable to you if you are subject to special treatment under the United States federal income tax laws (including if you are a United States expatriate, foreign pension fund, "controlled foreign corporation," "passive foreign investment company" or a partnership or other pass-through entity for United States federal income tax purposes). We cannot assure you that a change in law will not alter significantly the tax considerations that we describe in this summary.

If a partnership (or other entity or arrangement treated as a partnership for United States federal income tax purposes) holds our common stock, the tax treatment of a partner will generally depend upon the status of the partner and the activities of the partnership. If you are a partnership or a partner of a partnership considering an investment in our common stock, you should consult your tax advisors.

If you are considering the purchase of our common stock, you should consult your own tax advisors concerning the particular United States federal income tax consequences to you of the ownership and disposition of our common stock, as well as the consequences to you arising under other United States federal tax laws and the laws of any other taxing jurisdiction.

Dividends

In the event that we make a distribution of cash or other property (other than certain pro rata distributions of our stock) in respect of our common stock, the distribution generally will be treated as a dividend for United States federal income tax purposes to the extent it is paid from our current or accumulated earnings and profits, as determined under United States federal income tax principles. Any portion of a distribution that exceeds our current and accumulated earnings and profits generally will be treated first as a tax-free return of capital, causing

a reduction in the adjusted tax basis of a non-U.S. holder's common stock, and to the extent the amount of the distribution exceeds a non-U.S. holder's adjusted tax basis in our common stock, the excess will be treated as gain from the disposition of our common stock (the tax treatment of which is discussed below under "—Gain on Disposition of Common Stock").

Dividends paid to a non-U.S. holder generally will be subject to withholding of United States federal income tax at a 30% rate or such lower rate as may be specified by an applicable income tax treaty. However, dividends that are effectively connected with the conduct of a trade or business by the non-U.S. holder within the United States (and, if required by an applicable income tax treaty, are attributable to a United States permanent establishment) are not subject to the withholding tax, provided certain certification and disclosure requirements are satisfied. Instead, such dividends are subject to United States federal income tax on a net income basis generally in the same manner as if the non-U.S. holder were a United States person as defined under the Code. Any such effectively connected dividends received by a foreign corporation may be subject to an additional "branch profits tax" at a 30% rate or such lower rate as may be specified by an applicable income tax treaty.

A non-U.S. holder who wishes to claim the benefit of an applicable treaty rate and avoid backup withholding, as discussed below, for dividends will be required (a) to provide the applicable withholding agent with a properly executed Internal Revenue Service ("IRS") Form W-8BEN or Form W-8BEN-E (or other applicable form) certifying under penalty of perjury that such holder is not a United States person as defined under the Code and is eligible for treaty benefits or (b) if our common stock is held through certain foreign intermediaries, to satisfy the relevant certification requirements of applicable United States Treasury regulations. Special certification and other requirements apply to certain non-U.S. holders that are pass-through entities rather than corporations or individuals.

A non-U.S. holder eligible for a reduced rate of United States federal withholding tax pursuant to an income tax treaty may obtain a refund of any excess amounts withheld by timely filing an appropriate claim for refund with the IRS.

Gain on Disposition of Common Stock

Subject to the discussion of backup withholding below, any gain realized by a non-U.S. holder on the sale or other disposition of our common stock generally will not be subject to United States federal income tax unless:

- the gain is effectively connected with a trade or business of the non-U.S. holder in the United States (and, if required by an applicable income tax treaty, is attributable to a United States permanent establishment of the non-U.S. holder);
- the non-U.S. holder is an individual who is present in the United States for 183 days or more in the taxable year of that disposition, and certain other conditions are met; or
- we are or have been a "United States real property holding corporation" for United States federal income tax purposes and certain other conditions are met.

A non-U.S. holder described in the first bullet point immediately above will be subject to tax on the gain derived from the sale or other disposition in the same manner as if the non-U.S. holder were a United States person as defined under the Code. In addition, if any non-U.S. holder described in the first bullet point immediately above is a foreign corporation, the gain realized by such non-U.S. holder may be subject to an additional "branch profits tax" at a 30% rate or such lower rate as may be specified by an applicable income tax treaty. An individual non-U.S. holder described in the second bullet point immediately above will be subject to a 30% (or such lower rate as may be specified by an applicable income tax treaty) tax on the gain derived from the sale or other disposition, which gain may be offset by United States source capital losses even though the individual is not considered a resident of the United States.

Generally, a corporation is a "United States real property holding corporation" if the fair market value of its United States real property interests equals or exceeds 50% of the sum of the fair market value of its worldwide real property interests and its other assets used or held for use in a trade or business (all as determined for United States federal income tax purposes). We believe we are not and do not anticipate becoming a "United States real property holding corporation" for United States federal income tax purposes. If, however, we are or become a "United States real property holding corporation," so long as our common stock is regularly traded on an established securities market during the calendar year in which the sale or other disposition occurs, only a non-U.S. holder who holds or held (at any time during the shorter of the five-year period preceding the date of disposition or the holder's holding period) more than 5% of our common stock will be subject to United States federal income tax on the sale or other disposition of our common stock.

Information Reporting and Backup Withholding

Distributions paid to a non-U.S. holder and the amount of any tax withheld with respect to such distributions generally will be reported to the IRS. Copies of the information returns reporting such distributions and any withholding may also be made available to the tax authorities in the country in which the non-U.S. holder resides under the provisions of an applicable income tax treaty.

A non-U.S. holder will not be subject to backup withholding on distributions received if such holder certifies under penalty of perjury that it is a non-U.S. holder (and the payor does not have actual knowledge or reason to know that such holder is a United States person as defined under the Code), or such holder otherwise establishes an exemption.

Information reporting and, depending on the circumstances, backup withholding will apply to the proceeds of a sale or other disposition of our common stock made within the United States or conducted through certain United States-related financial intermediaries, unless the beneficial owner certifies under penalty of perjury that it is a non-U.S. holder (and the payor does not have actual knowledge or reason to know that the beneficial owner is a United States person as defined under the Code), or such owner otherwise establishes an exemption.

Backup withholding is not an additional tax and any amounts withheld under the backup withholding rules will be allowed as a refund or a credit against a non-U.S. holder's United States federal income tax liability, provided the required information is timely furnished to the IRS.

Additional Withholding Requirements

Under Sections 1471 through 1474 of the Code (such Sections commonly referred to as "FATCA"), a 30% United States federal withholding tax may apply to any dividends paid on our common stock to (1) a "foreign financial institution" (as specifically defined in the Code and whether such foreign financial institution is the beneficial owner or an intermediary) which does not provide sufficient documentation, typically on IRS Form W-8BEN-E, evidencing either (a) an exemption from FATCA, or (b) its compliance (or deemed compliance) with FATCA (which may alternatively be in the form of compliance with an intergovernmental agreement with the United States) in a manner which avoids withholding, or (2) a "non-financial foreign entity" (as specifically defined in the Code and whether such non-financial foreign entity is the beneficial owner or an intermediary) which does not provide sufficient documentation, typically on IRS Form W-8BEN-E, evidencing either (a) an exemption from FATCA, or (b) adequate information regarding certain substantial United States beneficial owners of such entity (if any). If a dividend payment is both subject to withholding under FATCA and subject to the withholding tax discussed above under "—Dividends," an applicable withholding agent may credit the withholding under FATCA against, and therefore reduce, such other withholding tax. While withholding under FATCA would also have applied to payments of gross proceeds from the sale or other taxable disposition of our common stock, proposed United States Treasury regulations (upon which taxpayers may rely until final regulations are issued) eliminate FATCA withholding on payments of gross proceeds entirely. You should consult your own tax advisors regarding these requirements and whether they may be relevant to your ownership and disposition of our common stock.

CERTAIN ERISA CONSIDERATIONS

The following is a summary of certain considerations associated with the purchase of our common stock by (i) employee benefit plans that are subject to Title I of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), (ii) plans, individual retirement accounts and other arrangements that are subject to Section 4975 of the Code or provisions under any other U.S. or non-U.S. federal, state, local or other laws or regulations that are similar to such provisions of ERISA or the Code (collectively, "Similar Laws"), and (iii) entities which are deemed to hold the assets of any of the foregoing types of plans, accounts or arrangements (each of the foregoing described in clauses (i), (ii), and (iii) being referred to herein as a "Plan").

General Fiduciary Matters and Prohibited Transaction Issues

ERISA and the Code impose certain duties on persons who are fiduciaries of a Plan subject to Title I of ERISA or Section 4975 of the Code (each referred to as a "Covered Plan") and prohibit certain transactions involving the assets of a Covered Plan and its fiduciaries or other interested parties. Under ERISA and the Code, any person who exercises any discretionary authority or control over the administration of such a Covered Plan or the management or disposition of the assets of such a Covered Plan, or who renders investment advice for a fee or other compensation to such a Covered Plan, is generally considered to be a fiduciary of the Covered Plan.

Section 406 of ERISA and Section 4975 of the Code prohibit Covered Plans from engaging in specified transactions involving plan assets with persons or entities who are "parties in interest," within the meaning of ERISA, or "disqualified persons," within the meaning of Section 4975 of the Code, unless an exemption is available, of which there are many. A party in interest or disqualified person who engaged in a non-exempt prohibited transaction may be subject to excise taxes and other penalties and liabilities under ERISA and the Code. In addition, the fiduciary of the Covered Plan that engaged in such a non-exempt prohibited transaction may be subject to penalties and liabilities under ERISA and the Code.

In considering an investment in our common stock with a portion of the assets of any Plan, a fiduciary of the Plan should consult with its counsel to determine whether the investment is in accordance with the documents and instruments governing the Plan and the applicable provisions of ERISA, the Code and any Similar Law relating to a fiduciary's duty to the Plan, including without limitation, the prudence, diversification and delegation of control provisions of ERISA, the Code and any other applicable Similar Laws, and to confirm that such purchase will not constitute or result in a non-exempt prohibited transaction.

Government plans, foreign plans and certain church plans, while not subject to the fiduciary responsibility provisions of Title I of ERISA or the prohibited transaction provisions of Section 406 of ERISA or Section 4975 of the Code, may nevertheless be subject to Similar Laws. As noted above, fiduciaries of such Plans should consult with their counsel before acquiring shares of our common stock.

Representation

By its acceptance of our common stock, each purchaser and subsequent transferee will be deemed to have represented and warranted that either (i) no portion of the assets used by such purchaser or transferee to acquire our common stock constitutes assets of any Plan or (ii) the acquisition of our common stock by such purchaser or transferee will not constitute or result in a non-exempt prohibited transaction under Section 406 of ERISA or Section 4975 of the Code or a similar violation under any applicable Similar Laws.

The foregoing discussion is general in nature and is not intended to be all-inclusive. Due to the complexity of these rules and the penalties that may be imposed upon persons involved in non-exempt prohibited transactions, it is particularly important that fiduciaries or other persons considering purchasing our common stock on behalf of, or with the assets of, any Plan, consult with their counsel regarding the potential applicability of ERISA, Section 4975 of the Code or any Similar Law and whether an exemption would be required. Neither

this discussion nor anything provided in this prospectus is, or is intended to be, investment advice directed at any potential Plan purchasers, or at Plan purchasers generally, and such purchasers of our common stock should consult and rely on their own counsel and advisers as to whether an investment in our common stock is suitable for the Plan. The sale of our common stock to any Plan is in no respect a representation by us, a sales agent or any of our or their affiliates or representatives that such an investment meets all relevant legal requirements with respect to investments by Plans generally or any particular Plan, or that such investment is prudent or appropriate for plans generally or any particular Plan.

PLAN OF DISTRIBUTION (CONFLICTS OF INTEREST)

We have entered into separate sales agreements, dated October 14, 2022, with each of the sales agents and, as applicable, principals, forward purchasers and forward sellers, under which we may offer and sell shares of our common stock having an aggregate gross sales price of up to $500,000,000 from time to time through the sales agents, acting as our sales agents, or, if applicable, as forward sellers, or directly to the sales agents acting as principals.

Sales of common stock pursuant to this prospectus supplement and the accompanying prospectus, if any, may be made in negotiated transactions or transactions that are deemed to be "at-the-market" transactions as defined in Rule 415 under the Securities Act, including sales made by means of ordinary brokers' transactions through the facilities of the NYSE at market prices, to or through a market maker, through an electronic communications network, in negotiated transactions, in any manner permitted by applicable law, or as otherwise agreed between the applicable sales agent and us.

The sales agreements also provide that, in addition to the issuance and sale of shares of our common stock by us through the sales agents or directly to the sales agents acting as principals, we may, as applicable, also deliver instructions to a sales agent specifying that such sales agent, as a forward seller, use commercially reasonable efforts to sell, from time to time, shares of our common stock borrowed by the applicable forward purchaser in connection with one or more forward sale agreements, as described below. In no event will the aggregate number of shares of our common stock sold under the sales agreements through the sales agents, each as an agent for us and, if applicable, as principal and as a forward seller, have an aggregate gross sales price in excess of $500,000,000.

None of the sales agents is required to sell any specific dollar amount of shares of our common stock, but each will, subject to the terms and conditions of the applicable sales agreement, use its commercially reasonable efforts to sell the shares offered as instructed by us.

In connection with the sale of shares of our common stock on our behalf, the sales agents, forward purchasers and/or forward sellers may each be deemed to be an "underwriter" within the meaning of the Securities Act, and some or all of the compensation paid to the sales agents, forward purchasers and forward sellers may be deemed to be underwriting commissions or discounts.

The net proceeds we receive from the sale of our common stock through a sales agent on our behalf pursuant to one or more of the separate sales agreements or to a sales agent acting as a principal will be the gross proceeds received from such sales less the compensation paid to the sales agents and any other costs we may incur in issuing and/or selling the shares of our common stock; provided, however, that we will not initially receive any proceeds from the sale of borrowed shares of our common stock by any forward seller. We expect to receive proceeds from the sale of shares of our common stock upon future physical settlement(s) of the relevant forward sale agreement with the relevant forward purchaser on dates specified by us on or prior to the maturity date of such forward sale agreement, in which case we will expect to receive, subject to certain adjustments, aggregate net cash proceeds at settlement equal to the number of shares underlying the relevant forward sale agreement, multiplied by the relevant forward sale price. If we elect to cash settle or net share settle a forward sale agreement, we may not receive any proceeds (in the case of cash settlement) or will not receive any proceeds (in the case of net share settlement), and we may owe cash (in the case of cash settlement) or shares of our common stock (in the case of net share settlement) to the relevant forward purchaser.

We intend to report to the SEC at least quarterly the number of shares of our common stock sold to or through the sales agents (including as forward sellers) under the sales agreements during the relevant quarterly period and the aggregate net proceeds to us in connection with such sales, together with any other information we reasonably believe is required to comply with the Securities Act and Exchange Act with respect to such sales.

Sales Through Sales Agents

From time to time during the term of the sales agreements, and subject to the terms and conditions set forth therein, we may deliver instructions to any of the sales agents. Upon receipt of such instructions from us, and subject to the terms and conditions of the sales agreements, each sales agent has agreed to use its commercially reasonable efforts consistent with its normal trading and sales practices to sell the amount of shares of our common stock specified in our instructions. The obligation of any sales agent under the sales agreements to sell shares of our common stock pursuant to our instructions is subject to a number of conditions, which such sales agent reserves the right to waive in its sole discretion. We or the relevant sales agent may suspend the offering of shares of our common stock at any time upon proper notice to the other, upon which the selling period will immediately terminate.

Settlement for sales of shares of our common stock will occur on the second trading day following the date on which the sales were made unless another date shall be agreed to in writing by us and the relevant sales agent.

We will pay each sales agent a commission equal to 1.00% of the sales price of all shares of our common stock sold through it as our agent under the sales agreements.

Sales Through Forward Sellers

From time to time during the term of the sales agreements, and subject to the terms and conditions set forth therein, we may enter into one or more forward sale agreements with a forward purchaser and deliver instructions to its sales agent, requesting that the sales agent execute sales of borrowed shares of our common stock as a forward seller in connection with the applicable forward sale agreement, and subject to the terms and conditions of the relevant sales agreement, the relevant forward purchaser will attempt to borrow, and such forward seller will use its commercially reasonable efforts consistent with its normal trading and sales practices to sell, such shares of our common stock on such terms to hedge such forward purchaser's exposure under such forward sale agreement. We or the relevant forward seller may immediately suspend the offering of shares of our common stock at any time upon proper notice to the other. We expect settlement between a forward purchaser and the relevant forward seller of sales of borrowed shares of our common stock, as well as the settlement between the relevant forward seller and buyers of such shares in the market, to occur on the second trading day following each date on which the sales are made. The obligation of each forward seller under the relevant sales agreement to execute such sales of shares of our common stock is subject to a number of conditions, which each forward seller reserves the right to waive in its sole discretion.

In connection with each forward sale agreement, the relevant forward seller will receive, reflected in a reduced initial forward sale price payable by the relevant forward purchaser under its forward sale agreement, a commission equal to 1.00% of the volume weighted average of the sales prices of all borrowed shares of our common stock sold during the applicable period by it as a forward seller. We refer to this commission rate as the forward selling commission.

The initial forward sale price per share under each forward sale agreement will equal the product of (1) an amount equal to one minus the applicable forward selling commission and (2) the volume weighted average price per share at which the borrowed shares of our common stock were sold pursuant to the relevant sales agreement by the relevant forward seller to hedge the relevant forward purchaser's exposure under such forward sale agreement. Thereafter, the forward sale price will be subject to the price adjustment provisions of the relevant forward sale agreement. If we elect to physically settle any forward sale agreement by delivering shares of our common stock, we will receive an amount of cash from the relevant forward purchaser equal to the product of the initial forward sale price per share under such forward sale agreement and the number of shares of our common stock underlying such forward sale agreement, subject to the price adjustment and other provisions of such forward sale agreement. Each forward sale agreement will provide that the initial forward sale price, as well as the sales prices used to calculate the initial forward sale price (in the case of sales over a number of days), will be subject to adjustment on a daily basis based on a floating interest rate factor equal to the overnight bank funding rate less a spread. In addition, the initial forward sale price will be subject to decrease on certain dates specified in

the relevant forward sale agreement by the amount per share of quarterly dividends we currently expect to declare during the term of such forward sale agreement. If the overnight bank funding rate is less than the spread on any day, the interest rate factor will result in a daily reduction of the forward sale price.

Under the terms of each forward sale agreement, we generally have the right to elect physical, cash or net share settlement. Subject to the provisions of such forward sale agreement, delivery of our shares on any physical settlement or, to the extent we are obligated to deliver shares of our common stock, net share settlement will result in dilution to our earnings per share and return on equity. If we elect to cash or net share settle all or a portion of the shares of our common stock underlying any forward sale agreement, we would expect the relevant forward purchaser or one of its affiliates to purchase shares of our common stock in secondary market transactions over an unwind period to:

- return shares of our common stock to securities lenders in order to unwind such forward purchaser's hedge position (after taking into consideration any shares of our common stock to be delivered by us to such forward purchaser, in the case of net share settlement); and
- if applicable, in the case of net share settlement, deliver shares of our common stock to us to the extent required in settlement of such forward sale agreement.

If the price of our common stock at which these purchases are made is below the relevant forward sale price, such forward purchaser will pay us such difference in cash (if we cash settle) or deliver to us shares of our common stock having a market value equal to such difference (if we net share settle). If the price of our common stock at which these purchases are made exceeds the applicable forward sale price, we will pay such forward purchaser an amount in cash equal to such difference (if we elect to cash settle) or we will deliver to such forward purchaser a number of shares of our common stock having a market value equal to such difference (if we elect to net share settle). Any such difference could be significant.

In addition, the purchase of our common stock by a forward purchaser or its affiliate to unwind the forward purchaser's hedge position could cause the price of our common stock to increase over time, thereby increasing the amount of cash (in the case of cash settlement), or the number of shares (in the case of net share settlement), that we would owe such forward purchaser upon settlement of the applicable forward sale agreement or decrease the amount of cash (in the case of cash settlement), or the number of shares (in the case of net share settlement), that such forward purchaser would owe us upon settlement of the applicable forward sale agreement.

A forward purchaser will have the right to accelerate a forward sale agreement that it enters into with us and require us to physically settle such forward sale agreement on a date specified by such forward purchaser if:

- in such forward purchaser's commercially reasonable judgment, it or its affiliate is unable to hedge (or maintain a hedge of) its exposure under such forward sale agreement in a commercially reasonable manner because (x) insufficient shares of our common stock have been made available by securities lenders for borrowing or (y) the forward purchaser or its affiliate would incur a stock borrowing cost in excess of a specified threshold;
- we declare or issue any dividend or distribution on shares of our common stock
  - payable in cash in excess of specified amounts or that otherwise constitutes an extraordinary dividend under the forward sale agreement,
  - payable in securities of another company as a result of a spinoff or similar transaction,
  - of any other type of securities (other than our common stock) or assets for consideration of less than the prevailing market price, as determined in a commercially reasonable manner by the calculation agent (as defined in the applicable sales agreement), or
  - that is, by its terms or declared intent, outside the normal course of our operations or normal dividend policies or practices;

- certain ownership thresholds applicable to such forward purchaser and its affiliates are exceeded;
- an intended event is announced that if consummated would result in a specified extraordinary event under such forward sale agreement (including certain mergers or tender offers, as well as certain events involving our nationalization, insolvency or a delisting of our common stock) or an event occurs that would constitute a hedging disruption or change in law; or
- certain other events of default, termination events or other specified events occur, including, among others, any material misrepresentation made in connection with such forward sale agreement or our insolvency (each as more fully described in each forward sale agreement).

A forward purchaser's decision to exercise its right to accelerate any forward sale agreement and to require us to settle any such forward sale agreement will be made irrespective of our interests, including our need for capital. In such cases, we could be required to issue and deliver shares of our common stock under the terms of the physical settlement provisions of the applicable forward sale agreement irrespective of our capital needs, which would result in dilution to our earnings per share and may adversely affect the market price of our common stock. In addition, upon certain events of bankruptcy or insolvency relating to us, the forward sale agreement will automatically terminate without further liability of either party (other than in the event of a breach by us of certain representations or warranties contained in the forward sale agreement). Following any such termination, we would not issue any shares of common stock and we would not receive any proceeds pursuant to the forward sale agreement.

Provisions of the Sales Agreements

We have agreed to indemnify the sales agents and the forward purchasers against certain liabilities, including liabilities under the Securities Act, or to contribute to payments the sales agents may be required to make in respect of those liabilities.

If a sales agent or we have reason to believe that the exemptive provisions set forth in Rule 101(c)(1) of Regulation M under the Exchange Act are not satisfied, that party will promptly notify the other and sales of common stock under the sales agreements will be suspended until that or other exemptive provisions have been satisfied in the judgment of the sales agents and us.

Because there is no minimum offering amount contemplated by the sales agreements, commissions and net proceeds to us from the sale of shares of our common stock under this prospectus supplement and the accompanying prospectus, if any, are not determinable at this time. We estimate that the total expenses from this offering payable by us, including among others SEC registration fees, legal fees and accounting fees but excluding compensation payable to the sales agents under the sales agreements and expense reimbursement payable to the sales agents under the terms of the sales agreements, will be approximately $560,000.

The offering of shares of our common stock pursuant to the sales agreements will terminate upon the earlier of (1) the sale of shares of our common stock subject to the sales agreements (including shares sold by us to or through the sales agents and borrowed shares sold through the sales agents, acting as forward sellers) and any terms agreement having an aggregate gross sales price of $500,000,000 and (2) with respect to a particular sales agreement or terms agreement, the termination of such sales agreement by us or by the applicable sales agent as permitted therein.

The sales agreements also provide that we may sell shares of common stock to a sales agent as principal for its own account at a price agreed upon at the time of the sale. If we sell shares of common stock to a sales agent as principal, then we will enter into a separate terms agreement with that sales agent setting forth the terms of such transaction, and as applicable, we will describe that terms agreement in a separate prospectus supplement or pricing supplement.

This summary of the material provisions of the sales agreements does not purport to be a complete statement of the terms and conditions. A copy of the form of sales agreement is filed as an exhibit to a report filed under the Securities Exchange Act of 1934, as amended, and incorporated by reference in this prospectus supplement. See "Where You Can Find More Information; Incorporation of Certain Information by Reference."

Relationships with Sales Agents

In the ordinary course of their business, certain of the sales agents and/or their affiliates have in the past performed, and may continue to perform, investment banking, broker dealer, lending, financial advisory or other services for us for which they have received, or may receive, separate fees. Certain of the sales agents and/or their affiliates have acted, and may act, as underwriters and/or initial purchasers with respect to our securities offerings and have received, and may in the future receive, customary fees and expenses in connection therewith.

The sales agents and their affiliates are full service financial institutions engaged in various activities, which may include securities trading, commercial and investment banking, financial advisory, investment management, investment research, principal investment, hedging, financing and brokerage activities. In the ordinary course of their business, the sales agents and their affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers, and such investment and securities activities may involve securities and/or instruments of the Company. The sales agents and their affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or instruments and may at any time hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

Conflicts of Interest

Certain of the sales agents and/or their affiliates are also lenders and/or agents under our and our subsidiaries' revolving credit facilities and receive customary fees and expenses in connection therewith. To the extent we use proceeds from this offering to repay indebtedness under our or our subsidiaries' revolving credit facilities, such sales agents and/or affiliates may receive proceeds from this offering. Because such sales agents and/or affiliates may receive more than 5% of the net proceeds of this offering, the sales agents may be deemed to have a "conflict of interest" under FINRA Rule 5121. Accordingly, this offering is being made in compliance with the applicable provisions of FINRA Rule 5121. The appointment of a "qualified independent underwriter" is not required in connection with this offering as a "bona fide public market," as defined in FINRA Rule 5121, exists for our common stock. In addition, to comply with FINRA Rule 5121, each of the sales agents will not confirm any sales to any account over which it exercises discretionary authority without the specific written approval of the transaction from the account holder.

Selling Restrictions

Other than in the United States, no action has been taken by us, the sales agents or the forward purchasers that would permit a public offering of the securities offered by this prospectus supplement and the accompanying prospectus in any jurisdiction where action for that purpose is required. The securities offered by this prospectus supplement and the accompanying prospectus may not be offered or sold, directly or indirectly, nor may this prospectus supplement and the accompanying prospectus or any other offering material or advertisements in connection with the offer and sale of any such securities be distributed or published in any jurisdiction, except under circumstances that will result in compliance with the applicable rules and regulations of that jurisdiction. Persons into whose possession this prospectus supplement and the accompanying prospectus come are advised to inform themselves about and to observe any restrictions relating to the offering and the distribution of this prospectus supplement and the accompanying prospectus. This prospectus supplement and the accompanying prospectus do not constitute an offer to sell or a solicitation of an offer to buy any securities offered by this prospectus supplement and the accompanying prospectus in any jurisdiction in which such an offer or a solicitation is unlawful.

LEGAL MATTERS

Certain legal matters will be passed upon for us by Simpson Thacher & Bartlett LLP, New York, New York. Ballard Spahr LLP, Philadelphia, Pennsylvania, will issue an opinion regarding certain matters of Pennsylvania law, including the validity of the securities offered by the prospectus supplement. Certain legal matters will be passed upon for the sales agents and forward purchasers by Cravath, Swaine & Moore LLP, New York, New York.

EXPERTS

The financial statements and management's assessment of the effectiveness of internal control over financial reporting (which is included in Management's Report on Internal Control over Financial Reporting) incorporated in this prospectus supplement by reference to the Annual Report on Form 10-K for the year ended December 31, 2021 have been so incorporated in reliance on the report of PricewaterhouseCoopers LLP, an independent registered public accounting firm, given on the authority of said firm as experts in auditing and accounting.

WHERE YOU CAN FIND ADDITIONAL INFORMATION; INCORPORATION OF CERTAIN DOCUMENTS BY REFERENCE

We file annual, quarterly and current reports, proxy statements and other information with the SEC. The SEC maintains a website at *www.sec.gov* that contains periodic and current reports, proxy and information statements, and other information regarding registrants that are filed electronically with the SEC.

These documents are also available, free of charge, through the Investors section of our website, which is located at *www.essential.co*. Information contained on our website is not incorporated by reference into this prospectus supplement or the accompanying prospectus, and you should not consider information on our website to be part of this prospectus supplement or the accompanying prospectus.

We have filed with the SEC a "shelf" registration statement on Form S-3 under the Securities Act of 1933 relating to the securities that may be offered by this prospectus supplement. This prospectus supplement is a part of that registration statement, but does not contain all of the information in the registration statement. We have omitted certain parts of the registration statement in accordance with rules and regulations of the SEC. Statements made in this prospectus supplement as to the contents of any contract, agreement or other documents are not necessarily complete, and, in each instance, we refer you to a copy of such document filed as an exhibit to the registration statement, of which this prospectus supplement is a part, or otherwise filed with the SEC. For more detail about us and any securities that may be offered by this prospectus supplement, you may examine the registration statement on Form S-3 and the exhibits filed with it at the locations listed in the previous paragraph.

The SEC allows us to "incorporate by reference" into this prospectus supplement and the accompanying prospectus the information we file with them, which means that we can disclose important information to you by referring you to those documents. The information incorporated by reference is considered to be part of this prospectus supplement. When we file information with the SEC in the future, that information will automatically update and supersede this information. We incorporate by reference the documents listed below and any future filings we will make with the SEC under Sections 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of 1934 until we sell all of the securities covered by this prospectus supplement or this offering is terminated; provided, however, that we are not incorporating, in each case, any portions of documents or information furnished or deemed to have been furnished and not filed in accordance with SEC rules:

- Our Annual Report on Form 10-K for the year ended December 31, 2021 filed with the SEC on March 1, 2022;
- Our Quarterly Reports on Form 10-Q for the quarterly periods ended March 31, 2022 and June 30, 2022 filed with the SEC on May 10, 2022 and August 9, 2022, respectively;

- The portions of our Definitive Proxy Statement on Schedule 14A filed with the SEC on March 21, 2022, that are incorporated by reference into our Annual Report on Form 10-K for the fiscal year ended December 31, 2021;

- Our Current Report on Form 8-K filed with the SEC on February 18, 2022, March 4, 2022, March 21, 2022, May 12, 2022 and May 20, 2022; and

- The description of our common stock set forth in our Registration Statement on Form 8-A, including any amendments or reports filed for the purpose of updating such description.

These documents contain important business and financial information about us that is not included in or delivered with this prospectus supplement. You may request a copy of any or all documents that we incorporate by reference at no cost, by writing or telephoning us at:

Essential Utilities, Inc.
762 W. Lancaster Avenue
Bryn Mawr, PA 19010-3489
Telephone: 610-527-8000
Attention: Corporate Secretary

We have not, and the sales agents and forward purchasers have not, authorized anyone to provide you with any information other than that contained or incorporated by reference in this prospectus supplement, the accompanying prospectus or in any free writing prospectus we may provide to you in connection with this offering. Neither we nor the sales agents or forward purchasers take any responsibility for, or provide any assurances as to the reliability of, any additional or different information that others may give you. You should assume that the information contained in this prospectus supplement, the accompanying prospectus and any free writing prospectus we may provide to you in connection with this offering is accurate only as of their respective dates or as of the respective dates specified in such information, as applicable, and the information contained in documents incorporated by reference is accurate only as of the respective dates of those documents or as of the respective dates specified in such information, as applicable, in each case regardless of the time of delivery of this prospectus supplement or the accompanying prospectus or any such free writing prospectus or any sale of our common stock. Our business, financial condition, results of operations and prospects may have changed since those dates.

Any statement contained herein or in a document incorporated or deemed to be incorporated by reference herein shall be deemed to be modified or superseded for purposes of this prospectus supplement to the extent that a statement contained herein, in any other subsequently filed document which also is or is deemed to be incorporated by reference herein or in the accompanying prospectus, modifies or supersedes such statement. Any such statement so modified or superseded shall not be deemed, except as so modified and superseded, to constitute a part of this prospectus supplement.

PROSPECTUS

ESSENTIAL UTILITIES, INC.

Common Stock
Preferred Stock
Common Stock Purchase Contracts
Warrants
Units
Depositary Shares
Debt Securities

Essential Utilities, Inc. may, from time to time, in one or more offerings, offer and sell common stock, preferred stock, common stock purchase contracts, warrants, units, depositary shares and debt securities. The debt securities and preferred stock may be convertible into or exchangeable or exercisable for other securities. We will provide specific terms of any offering and the offered securities in supplements to this prospectus. The prospectus supplements may also add, update or change information contained in this prospectus.

We may offer and sell these securities to or through underwriters, dealers or agents, directly to purchasers or through a combination of these methods. If an offering of securities involves any underwriters, dealers or agents, then the names of the underwriters, dealers or agents and the terms of the arrangements with such entities will be stated in an accompanying prospectus supplement.

Our common stock is listed on the New York Stock Exchange under the symbol "WTRG." The last reported sale of the common stock on the New York Stock Exchange on April 14, 2021 was $46.87 per share. We have not yet determined whether any of the other securities that may be offered by this prospectus will be listed on any exchange, inter-dealer quotation system or over-the-counter market. If we decide to seek listing of any such securities upon issuance, an accompanying prospectus supplement will disclose the exchange, quotation system or market on which the securities will be listed.

The prospectus may not be used to sell our securities unless it is accompanied by a prospectus supplement.

Investing in our securities involves risk. Before you invest, you should carefully read and evaluate the risk factors and other information included in this prospectus and any applicable prospectus supplement, including the documents incorporated by reference. See "Risk Factors" beginning on page 4 of this prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The date of this prospectus is April 15, 2021.

ABOUT THIS PROSPECTUS

This document is called a prospectus and is part of a registration statement that we filed with the Securities and Exchange Commission (SEC) using a "shelf" registration process. Under this shelf process, we may, from time to time, in one or more offering, offer and sell common stock, preferred stock, common stock purchase contracts, warrants, units, depositary shares and debt securities. This prospectus provides you with a general description of the securities we may offer. Each time we sell any securities under this prospectus, we will provide a prospectus supplement that will contain specific information about the terms of that offering and the offered securities. That prospectus supplement may include a discussion of any risk factors or other special considerations applicable to those securities. The prospectus supplement also may add, update or change information contained in this prospectus. You should read both this prospectus and the applicable prospectus supplement and the exhibits filed with our registration statement together with the additional information described below under the heading "Where You Can Find More Information" before you decide whether to invest in the securities.

The registration statement (including the exhibits) of which this prospectus is a part contains additional information about us and the securities we may offer by this prospectus. Specifically, we have filed certain legal documents that control the terms of the securities offered by this prospectus as exhibits to the registration statement. We will file certain other legal documents that will control the terms of the securities we may offer by this prospectus as exhibits to the registration statement or to reports we file with the SEC. The registration statement and the reports can be read at the SEC website or at the SEC offices mentioned under the heading "Where You Can Find More Information."

We have not authorized anyone to provide you with information different from that contained or incorporated by reference in this prospectus, any prospectus supplements or any free writing prospectus prepared by or on behalf of us or to which we have referred you. We take no responsibility for, and can provide no assurance as to the reliability of, any other information that others may give you. We are not making an offer to sell these securities in any jurisdiction where the offer or sale is not permitted. You should assume that the information appearing in this document is accurate only as of the date on the front cover of this document. Our business, financial condition, results of operations and prospects may have changed since that date.

Except as otherwise provided in this prospectus, unless the context otherwise requires, references in this prospectus to "Essential Utilities," "we", "us", "our", "Registrant" or the "Company" refer to Essential Utilities, Inc. and its direct and indirect subsidiaries. In addition, references to "Aqua Pennsylvania" refer to our wholly-owned subsidiary, Aqua Pennsylvania, Inc., and its subsidiaries, and references to "Peoples" refer to our wholly-owned subsidiaries Peoples Natural Gas Company LLC, Peoples Gas Company LLC, Peoples Gas West Virginia, Inc., Peoples Gas Kentucky, Inc., and Delta Natural Gas Company Inc., and their subsidiaries.

FORWARD-LOOKING STATEMENTS

Certain statements in this prospectus, or incorporated by reference into this prospectus, are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act") and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act") that are made based upon, among other things, our current assumptions, expectations, plans, and beliefs concerning future events and their potential effect on us. These forward-looking statements involve risks, uncertainties and other factors, many of which are outside our control that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by these forward-looking statements. In some cases you can identify forward-looking statements where statements are preceded by, followed by or include the words "believes," "expects," "anticipates," "plans," "future," "potential," "probably,"

“predictions,” “intends,” “will,” “continue” “in the event” or the negative of such terms or similar expressions. Forward-looking statements in this prospectus, or incorporated by reference into this prospectus, include, but are not limited to, statements regarding:

- the impact of the novel coronavirus (“COVID-19”) pandemic or the measures implemented by the Company as a result of the COVID-19 pandemic.
- expectations regarding the impact of the integration of the Peoples Gas Acquisition (as defined below);
- opportunities for future acquisitions, both within and outside the water, wastewater, and natural gas industries, the success of pending acquisitions and the impact of future acquisitions;
- acquisition-related costs and synergies;
- the sale of water, wastewater, and/or gas subsidiaries;
- the impact of conservation awareness of customers and more efficient fixtures and appliances on water and natural gas usage per customer;
- our authority to carry on our business without unduly burdensome restrictions;
- our capability to pursue timely rate increase requests;
- the capacity of our water supplies, water facilities, wastewater facilities, and natural gas supplies and storage facilities;
- the impact of decisions of governmental and regulatory bodies, including decisions to raise or lower rates and decisions regarding potential acquisitions;
- developments, trends and consolidation in the water, wastewater, and natural gas utility and infrastructure industries;
- the impact of changes in and compliance with governmental laws, regulations and policies, including those dealing with the environment, health and water quality, taxation, and public utility regulation;
- the development of new services and technologies by us or our competitors;
- the availability of qualified personnel;
- the condition of our assets;
- recovery of capital expenditures and expenses in rates;
- projected capital expenditures and related funding requirements;
- the availability and cost of capital financing;
- dividend payment projections;
- the impact of geographic diversity on our exposure to unusual weather;
- the continuation of investments in strategic ventures;
- our ability to obtain fair market value for condemned assets;
- the impact of fines and penalties;
- the impact of legal proceedings;
- general economic conditions;
- the impact of federal and/or state tax policies and the regulatory treatment of the effects of those policies; and
- the amount of income tax deductions for qualifying utility asset improvements and the Internal Revenue Service’s ultimate acceptance of the deduction methodology.

Because forward-looking statements involve risks and uncertainties, there are important factors that could cause actual results to differ materially from those expressed or implied by these forward-looking statements, including but not limited to:

- impacts from the global outbreak of COVID-19, including on consumption, usage and collections
- the diversion of our management's time and resources caused by the integration efforts with respect to the Peoples Gas business and associated system implementations;
- the success in the closing of, and the profitability of future acquisitions;
- changes in general economic, business, credit and financial market conditions;
- our ability to manage the expansion of our business, including our ability to manage our expanded operations resulting from the Peoples Gas Acquisition;
- our ability to integrate and otherwise realize all of the anticipated benefits of businesses, technologies or services which we may acquire;
- changes in environmental conditions, including the effects of climate change;
- the decisions of governmental and regulatory bodies, including decisions on regulatory filings, including rate increase requests and decisions regarding potential acquisitions;
- our ability to file rate cases on a timely basis to minimize regulatory lag;
- abnormal weather conditions, including those that result in water availability, water use restrictions, gas availability or usage, or electricity interruptions;
- the seasonality of our business;
- our ability to treat and supply water or collect and treat wastewater;
- our ability to source sufficient natural gas to meet customer demand in a timely manner;
- the continuous and reliable operation of our information technology systems, including the impact of cyber security attacks or other cyber-related events;
- changes in governmental laws, regulations and policies, including those dealing with taxation, the environment, health and water quality, and public utility regulation;
- the extent to which we are able to develop and market new and improved services;
- the effect of the loss of major customers;
- our ability to retain the services of key personnel and to hire qualified personnel as we expand;
- labor disputes;
- increasing difficulties in obtaining insurance and increased cost of insurance;
- cost overruns relating to improvements to, or the expansion of, our operations;
- increases in the costs of goods and services;
- the effect of natural gas price volatility;
- civil disturbance or terroristic threats or acts;
- changes to the rules or our assumptions underlying our determination of what qualifies for an income tax deduction for qualifying utility asset improvements;
- changes in, or unanticipated, capital requirements;
- changes in our credit rating or the market price of our common stock;

- changes in valuation of strategic ventures;
- the phase-out of the London Interbank Offered Rate ("LIBOR"), or the replacement of LIBOR with a different reference rate or modification of the method used to calculate LIBOR, which may adversely affect interest rates;
- changes in accounting pronouncements;
- litigation and claims; and
- restrictions on our subsidiaries' ability to make dividends and other distributions.

Given these risks and uncertainties, you should not place undue reliance on any forward-looking statements. You should read this prospectus and the documents that we incorporate by reference into this prospectus completely and with the understanding that our actual results, performance and achievements may be materially different from what we expect. These forward-looking statements represent assumptions, expectations, plans and beliefs only as of the date of this prospectus, the date of the document containing the applicable statement or the date specified in such statement, as applicable. Except for our ongoing obligations to disclose certain information under the federal securities laws, we are not obligated, and assume no obligation, to update these forward-looking statements, even though our situation may change in the future. For further information or other factors which could affect our financial results and such forward-looking statements, see "Risk Factors." We qualify all of our forward-looking statements by these cautionary statements.

ESSENTIAL UTILITIES, INC.

Essential Utilities, Inc. is a Pennsylvania corporation and the holding company for regulated utilities providing water, wastewater, or natural gas services to an estimated five million people in Pennsylvania, Ohio, Texas, Illinois, North Carolina, New Jersey, Indiana, Virginia, West Virginia, and Kentucky under the Aqua and Peoples brands. Essential Utilities, which prior to its name change on February 3, 2020 was known as Aqua America, Inc., was formed in 1968 as a holding company for its primary subsidiary, Aqua Pennsylvania, formerly known as Philadelphia Suburban Water Company.

Our principal executive office is located at 762 W. Lancaster Avenue, Bryn Mawr, Pennsylvania 19010-3489, and our telephone number is 610-527-8000. Our website may be accessed at www.essential.co. The references to our website and the SEC's website are intended to be inactive textual references only, and the contents of those websites are not incorporated by reference herein and should not be considered part of this prospectus.

RISK FACTORS

Investing in our securities involves risks. Please see the risk factors described under the section captioned "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2020, as such risk factors may be updated from time to time in filings we make with the SEC subsequent to the date hereof. Before making an investment decision, you should carefully consider these risk factors, together with all other information contained in or incorporated by reference into this prospectus or any applicable prospectus supplement (which includes information contained in certain filings we make with the SEC subsequent to the date hereof as set forth in the section below captioned "Where You Can Find More Information"). Please also refer to the section above captioned "Forward-Looking Statements."

USE OF PROCEEDS

Unless we otherwise specify in the applicable prospectus supplement, we intend to use the net proceeds from the sale of the securities we may offer by this prospectus to fund our capital expenditures, to provide capital for our growth strategy, which includes potential future acquisitions of municipally owned and investor-owned water and wastewater systems, regulated utilities and infrastructure projects, and market-based activities complementary to our regulated business, to fund the integration of any businesses that we acquire into our existing business, and to purchase and maintain plant equipment, as well as for working capital and other general corporate purposes. Our management will have broad discretion in the allocation of net proceeds from the sale of any securities sold by us.

DESCRIPTION OF CAPITAL STOCK

As of April 9, 2021, our authorized capital stock was 601,770,819 shares, consisting of:

- 600,000,000 shares of common stock, par value $0.50 per share, of which 245,636,516 shares were outstanding; and
- 1,770,819 shares of preferred stock, par value $1.00 per share, of which no shares were outstanding.

The following summary of certain terms of our common stock and preferred stock is qualified in its entirety by the provisions of our Amended and Restated Articles of Incorporation and Amended and Restated Bylaws, each of which is incorporated by reference as an exhibit to the registration statement of which this prospectus constitutes a part.

Common Stock

This section describes the general terms of our common stock. For more detailed information, you should refer to our articles of incorporation and bylaws, including any amendments thereto, copies of which have been filed with the SEC. These documents are incorporated by reference into this prospectus.

Voting Rights

Holders of our common stock are entitled to one vote for each share held by them at all meetings of the shareholders and are not entitled to cumulate their votes for the election of directors.

Dividend Rights and Limitations

Holders of our common stock may receive dividends when declared by our board of directors. Because we are a holding company, the funds we use to pay any dividends on our common stock are derived predominantly from the dividends that we receive from our direct and indirect subsidiaries. Therefore, our ability to pay dividends to holders of our common stock depends upon the subsidiaries' earnings, financial condition and ability to pay dividends. Most of our subsidiaries are subject to regulation by state utility commissions and the amounts of their earnings and dividends are affected by the manner in which they are regulated. In addition, they are subject to restrictions on the payment of dividends contained in their various debt agreements. Under the most restrictive debt agreements, the amount available for payment of dividends to us as of December 31, 2020 was approximately $1,729,269,000 of Aqua Pennsylvania's retained earnings and $276,283,000 of the retained earnings of certain other subsidiaries. Payment of dividends on common stock is also subject to the preferential rights of the holders of any outstanding preferred stock.

Liquidation Rights

In the event that we liquidate, dissolve or wind-up, the holders of our common stock are entitled to share ratably in all of the assets that remain after we pay our liabilities. This right is subject, however, to the prior distribution rights of any outstanding preferred stock.

Listing

Our common stock is listed on the New York Stock Exchange, or NYSE, under the symbol "WTRG."

Preferred Stock

Our board of directors has the authority, from time to time and without further action by our shareholders, to divide our unissued capital stock into one or more classes and one or more series within any class and to make determinations of the designation and number of shares of any class or series and determinations of the voting rights, preferences, limitations and special rights, if any, of the shares of any class or series. The rights, preferences, limitations and special rights of different classes of capital stock may differ with respect to dividend rates, amounts payable on liquidation, voting rights, conversion rights, redemption provisions, sinking fund provisions and other matters. The rights, preferences, privileges and restrictions of each series may be fixed by the designations of that series set forth in either a restated version of our articles of incorporation or a certificate of designations relating to that series, which will be filed with the SEC as an exhibit to or incorporated by reference in the registration statement of which this prospectus constitutes a part.

The issuance of preferred stock may be perceived by some as possibly having the effect of delaying, deferring or preventing a change of control of us without further action by our shareholders. The issuance of preferred stock with voting and conversion rights may also adversely affect the voting power of the holders of our common stock. In certain circumstances, an issuance of preferred stock could possibly have the effect of decreasing the market price of our common stock.

Whenever preferred stock is to be sold pursuant to this prospectus, we will file a prospectus supplement relating to that sale which will specify:

- the number of shares in the series of preferred stock;
- the designation for the series of preferred stock by number, letter or title that will distinguish the series from any other series of preferred stock;
- the dividend rate, if any, and whether dividends on that series of preferred stock will be cumulative, noncumulative or partially cumulative;
- the voting rights of that series of preferred stock, if any;
- any conversion provisions applicable to that series of preferred stock;
- any redemption or sinking fund provisions applicable to that series of preferred stock;
- any preemptive rights provisions applicable to that series of preferred stock;
- the liquidation preference per share of that series of preferred stock; and
- the terms of any other preferences or rights, if any, applicable to that series of preferred stock.

Anti-Takeover Provisions

Pennsylvania State Law Provisions

Under Section 1712 of the Pennsylvania Business Corporation Law of 1988, as amended, or the PBCL, which is applicable to us, directors stand in a fiduciary relation to their corporation and, as such, are required to perform their duties in good faith, in a manner they reasonably believe to be in the best interests of the

corporation and with such care, including reasonable inquiry, skill and diligence, as a person of ordinary prudence would use under similar circumstances. Under Section 1715 of the PBCL, in discharging their duties, directors may, in considering the best interests of their corporation, consider various constituencies, including, shareholders, employees, suppliers, customers and creditors of the corporation, and upon communities in which offices or other establishments of the corporation are located. Directors are not required to give prominent consideration to the interests of any particular constituency. Absent a breach of fiduciary duty, a lack of good faith or self-dealing, any act of the board of directors, a committee thereof or an individual director is presumed to be in the best interests of the corporation. Actions by directors relating to an acquisition or potential acquisition of control of the corporation are not subject to any greater obligation to justify, or higher burden of proof, than is applied to any other acts of directors. The PBCL expressly provides that the fiduciary duty of directors does not require them to (i) redeem or otherwise render inapplicable outstanding rights issued under any shareholder rights plan; (ii) render inapplicable the anti-takeover statutes set forth in Chapter 25 of the PBCL (described below); or (iii) take any action solely because of the effect it may have on a proposed acquisition or the consideration to be received by shareholders in such a transaction. In addition, Section 2513 of the PBCL specifically validates shareholder rights plans, or "poison pills," and the discriminatory dilution provisions contained in such plans.

Chapter 25 of the PBCL contains several anti-takeover statutes applicable to publicly-traded corporations. Corporations may opt-out of such anti-takeover statutes under certain circumstances. We have not opted-out of any of such statutes.

Section 2538 of Subchapter 25D of the PBCL requires certain transactions with an "interested shareholder" to be approved by a majority of disinterested shareholders. "Interested shareholder" is defined broadly to include any shareholder who is a party to the transaction or who is treated differently than other shareholders and affiliates of the interested shareholder.

Subchapter 25E of the PBCL requires a person or group of persons acting in concert which acquires 20% or more of the voting shares of the corporation to offer to purchase the shares of any other shareholder at "fair value." "Fair value" means the value not less than the highest price paid per share by the controlling person or group during the 90-day period prior to the control transaction, plus a control premium. Among other exceptions, Subchapter 25E does not apply to shares acquired directly from the corporation in a transaction exempt from the registration requirements of the Securities Act, or to a one-step merger.

Subchapter 25F of the PBCL generally establishes a 5-year moratorium on a "business combination" with an "interested shareholder." "Interested shareholder" is defined generally to be any beneficial owner of 20% or more of the corporation's voting stock or an affiliate or associate of the corporation that at any time within the prior five-year period was a beneficial owner of 20% or more of the corporation's voting stock. "Business combination" is defined broadly to include mergers, consolidations, asset sales and certain self-dealing transactions. Certain restrictions apply to business combination following the 5-year period. Among other exceptions, Subchapter 25F will be rendered inapplicable if the board of directors approves the proposed business combination, or approves the interested shareholder's acquisition of 20% of the voting shares, in either case prior to the date on which the shareholder first becomes an interested shareholder.

Subchapter 25G of the PBCL provides that "control shares" lose voting rights unless such rights are restored by the affirmative vote of a majority of (i) the disinterested shares (generally, shares held by persons other than the acquiror, executive officers of the corporation and certain employee stock plans) and (ii) the outstanding voting shares of the corporation. "Control shares" are defined as shares which, upon acquisition, will result in a person or group acquiring for the first time voting control over (a) 20%, (b) 33 1/3% or (c) 50% or more of the outstanding shares, together with shares acquired within 180 days of attaining the applicable threshold and shares purchased with the intention of attaining such threshold. A corporation may redeem control shares if the acquiring person does not request restoration of voting rights as permitted by Subchapter 25G. Among other exceptions, Subchapter 25G does not apply to a merger, consolidation or a share exchange if the corporation is a party to the transaction agreement.

Subchapter 25H of the PBCL provides in certain circumstances for the recovery by the corporation of profits realized from the sale of its stock by a controlling person or group if the sale occurs within 18 months after the controlling person or group became a controlling person or group, and the stock was acquired during such 18-month period or within 24 months before such period. A controlling person or group is a person or group that has acquired, offered to acquire, or publicly disclosed an intention to acquire 20% or more of the voting shares of the corporation or a person or group that has otherwise publicly disclosed or caused to be disclosed that it may seek to acquire control of the corporation through any means. Among other exceptions, Subchapter 25H does not apply to transactions approved by both the board of directors and the shareholders prior to the acquisition or distribution, as appropriate.

Subchapter 25I of the PBCL mandates severance compensation for eligible employees who are terminated within 24 months after the approval of a control-share acquisition. Eligible employees generally are all employees employed in Pennsylvania for at least two years prior to the control-share approval. Severance equals the weekly compensation of the employee multiplied by the employee's years of service (up to 26 years), less payments made due to the termination.

Subchapter 25J of the PBCL requires the continuation of certain labor contracts relating to business operations owned at the time of a control-share approval.

Articles of Incorporation and Bylaw Provisions

Certain provisions of our articles of incorporation and bylaws may have the effect of discouraging unilateral tender offers or other attempts to take over and acquire our business. These provisions might discourage some potentially interested purchaser from attempting a unilateral takeover bid for us on terms which some shareholders might favor. Our articles of incorporation require that certain fundamental transactions must be approved by the holders of 75% of the outstanding shares of our capital stock entitled to vote on the matter unless at least a majority of the members of the board of directors has approved the transaction, in which case the required shareholder approval will be the minimum approval required by applicable law. The fundamental transactions that are subject to this provision are those transactions that require approval by shareholders under applicable law or the articles of incorporation. These transactions include certain amendments of our articles of incorporation or bylaws, certain sales or other dispositions of our assets, certain issuances of our capital stock, or certain transactions involving our merger, consolidation, division, reorganization, dissolution, liquidation or winding up. Our articles of incorporation and bylaws provide that:

- a special meeting of shareholders may only be called by the chairman, the president, the board of directors or shareholders entitled to cast a majority of the votes which all shareholders are entitled to cast at the particular meeting;
- nominations for election of directors may be made by any shareholder entitled to vote for election of directors if the name of the nominee and certain information relating to the nominee is filed with our corporate secretary not less than 14 days nor more than 50 days before any meeting of shareholders to elect directors; and
- certain advance notice procedures must be met for shareholder proposals to be made at annual meetings of shareholders. These advance notice procedures generally require a notice to be delivered not less than 90 days nor more than 120 days before the anniversary date of the immediately preceding annual meeting of shareholders.

Transfer Agent and Registrar

The transfer agent and registrar for our common stock is Computershare Trust Company, N.A.

DESCRIPTION OF COMMON STOCK PURCHASE CONTRACTS

We may issue stock purchase contracts, representing contracts entitling or obligating holders to purchase from us, and us to sell to the holders, a specified number of shares or amount of common stock at a future date or dates. The price per share of common stock may be fixed at the time each contract is issued or may be determined by reference to a specific formula set forth in the contract. Each common stock purchase contract may be issued separately or as a part of a unit, each consisting of a common stock purchase contract and, as security for the holder's obligation to purchase the common stock under the contract, the following:

- our senior debt securities or subordinated debt securities described under "Description of Debt Securities;"
- debt obligations of third parties, including U.S. Treasury securities;
- any other asset as security described in the applicable prospectus supplement; or
- any combination of the foregoing.

Each common stock purchase contract may require us to make periodic payments to the holder of the unit or vice versa, and such payments may be unsecured or prefunded on some basis discussed in the applicable prospectus supplement. Each common stock purchase contract may require holders to secure their obligations thereunder in a specified manner and, in certain circumstances, we may deliver a newly issued prepaid common stock purchase contract, which is referred to as a "prepaid security," upon release to a holder of any collateral securing such holder's obligations under the original contract.

The applicable prospectus supplement will describe the terms of any common stock purchase contract and, if applicable, prepaid security. The description in the prospectus supplement will not purport to be complete and will be qualified in its entirety by reference to the contracts, the collateral arrangements and depositary arrangements, if applicable, relating to such contracts and, if applicable, the prepaid securities and the documents pursuant to which such prepaid securities will be issued. The applicable prospectus supplement will also describe the material United States federal income tax considerations applicable to the common stock purchase contracts.

DESCRIPTION OF WARRANTS

General

The following summary of certain provisions of the warrants does not purport to be complete and is subject to, and qualified in its entirety by reference to, the provisions of the warrant agreement that will be filed with the SEC in connection with the offering of such warrants.

We may issue warrants for the purchase of debt securities, preferred stock or common stock. Warrants may be issued independently or together with debt securities, preferred stock or common stock offered by any prospectus supplement and may be attached to or separate from any such offered securities. Each series of warrants will be issued under a separate warrant agreement to be entered into between the Company and a bank or trust company, as warrant agent. The warrant agent will act solely as the Company's agent in connection with the warrants and will not assume any obligation or relationship of agency or trust for or with any holders or beneficial owners of warrants.

Debt Warrants

The prospectus supplement relating to a particular issue of debt warrants will describe the terms of such debt warrants, including the following: (a) the title of such debt warrants; (b) the offering price for such debt warrants, if any; (c) the aggregate number of such debt warrants; (d) the designation and terms of the debt securities purchasable upon exercise of such debt warrants; (e) if applicable, the designation and terms of the debt securities with which such debt warrants are issued and the number of such debt warrants issued with each

such debt security; (f) if applicable, the date from and after which such debt warrants and any debt securities issued therewith will be separately transferable; (g) the principal amount of debt securities purchasable upon exercise of a debt warrant and the price at which such principal amount of debt securities may be purchased upon exercise (which price may be payable in cash, securities, or other property); (h) the date on which the right to exercise such debt warrants shall commence and the date on which such right shall expire; (i) if applicable, the minimum or maximum amount of such debt warrants that may be exercised at any one time; (j) whether the debt warrants represented by the debt warrant certificates or debt securities that may be issued upon exercise of the debt warrants will be issued in registered or bearer form; (k) information with respect to book-entry procedures, if any; (1) the currency or currency units in which the offering price, if any, and the exercise price are payable; (m) if applicable, a discussion of material United States federal income tax considerations; (n) the anti-dilution provisions of such debt warrants, if any; (o) the redemption or call provisions, if any, applicable to such debt warrants; (p) any provisions for changes to or adjustments in the exercise price for the debt warrants and (q) any additional terms of such debt warrants, including terms, procedures, and limitations relating to the exchange and exercise of such debt warrants.

Stock Warrants

The prospectus supplement relating to any particular issue of preferred stock warrants or common stock warrants will describe the terms of such warrants, including the following: (a) the title of such warrants; (b) the offering price for such warrants, if any; (c) the aggregate number of such warrants; (d) the designation and terms of the common stock or preferred stock purchasable upon exercise of such warrants; (e) if applicable, the designation and terms of the offered securities with which such warrants are issued and the number of such warrants issued with each such offered security; (f) if applicable, the date from and after which such warrants and any offered securities issued therewith will be separately transferable; (g) the number of shares of common stock or preferred stock purchasable upon exercise of a warrant and the price at which such shares may be purchased upon exercise; (h) the date on which the right to exercise such warrants shall commence and the date on which such right shall expire; (i) if applicable, the minimum or maximum amount of such warrants that may be exercised at any one time; (j) the currency or currency units in which the offering price, if any, and the exercise price are payable, (k) if applicable, a discussion of material United States federal income tax considerations; (l) the anti-dilution provisions of such warrants, if any; (m) the redemption or call provisions, if any, applicable to such warrants; (m) any provisions for changes to or adjustments in the exercise price for the stock warrants and (n) any additional terms of such warrants, including terms, procedures and limitations relating to the exchange and exercise of such warrants.

DESCRIPTION OF UNITS

We may, from time to time, issue units comprised of one or more of the other securities that may be offered under this prospectus, in any combination. Each unit will be issued so that the holder of the unit is also the holder of each security included in the unit. Thus, the holder of a unit will have the rights and obligations of a holder of each included security. The unit agreement under which a unit is issued may provide that the securities included in the unit may not be held or transferred separately at any time, or at any time before a specified date.

The applicable prospectus supplement will describe the terms of any unit. The description in the prospectus supplement will not purport to be complete and will be qualified in its entirety by reference to units, the collateral arrangements and depositary arrangements, if applicable, relating to such units and, if applicable, the prepaid securities and the documents pursuant to which such prepaid securities will be issued. The applicable prospectus supplement will also describe the material United States federal income tax considerations applicable to the units.

DESCRIPTION OF DEPOSITORY SHARES

We may, at our option, offer fractional shares of our preferred stock, rather than whole shares of our preferred stock. In the event we do so, we will issue receipts for depositary shares, each of which will represent a fraction (to be set forth in the prospectus supplement relating to offering of the depositary shares) of a share of the related series of preferred stock.

The shares of our preferred stock represented by depositary shares will be deposited under a deposit agreement between us and a bank or trust company selected by us having its principal office in the United States and that meets certain other requirements. Subject to the terms of the deposit agreement, each owner of a depositary share will be entitled, in proportion to the applicable fraction of a share of preferred stock, represented by the depositary share to all of the rights and preferences of the preferred stock represented by the depositary shares (including dividend, voting, redemption, conversion and liquidation rights).

The above description of depositary shares is only a summary, is not complete and is subject to, and is qualified in its entirety by the description in the applicable prospectus supplement and the provisions of the deposit agreement, which will contain the form of depository receipt. A copy of the deposit agreement will be filed with the SEC as an exhibit to or incorporated by reference in the registration statement of which this prospectus is a part.

DESCRIPTION OF DEBT SECURITIES

Please note that in this section entitled “Description of Debt Securities,” references to “we,” “us,” “ours” or “our” refer only to Essential Utilities, Inc. and not to its consolidated subsidiaries. Also, in this section, references to “holders” mean those who own debt securities registered in their own names, on the books that we maintain or the trustee maintains for this purpose, and not those who own beneficial interests in debt securities registered in street name or in debt securities issued in book-entry form through one or more depositaries. Owners of beneficial interests in the debt securities should read the section below entitled “Book-Entry Procedures and Settlement.”

General

The debt securities offered by this prospectus will be our unsecured obligations, except as otherwise set forth in an accompanying prospectus supplement, and will be either senior or subordinated debt. We will issue senior debt securities under an Indenture dated as of April 23, 2019, as amended and supplemented by the First Supplemental Indenture, dated as of April 23, 2019, each between the Company and U.S. Bank, N.A., as trustee (as amended, the “senior debt indenture”). We will issue subordinated debt under a subordinated debt indenture. We sometimes refer to the senior debt indenture and the subordinated debt indenture, individually, as an indenture and, collectively, as the indentures. We have filed the senior debt indenture and a form of the subordinated debt indenture with the SEC as exhibits to the registration statement of which this prospectus forms a part. You can obtain copies of the indentures by following the directions outlined in “Where You Can Find More Information,” or by contacting the applicable indenture trustee.

A form of each debt security, reflecting the particular terms and provisions of a series of offered debt securities, will be filed with the SEC at the time of the offering and incorporated by reference as exhibits to the registration statement of which this prospectus forms a part.

The following briefly summarizes certain material provisions that may be included in the indentures. Other terms, including pricing and related terms, will be disclosed for a particular issuance in an accompanying prospectus supplement. You should read the more detailed provisions of the applicable indenture, including the defined terms, for provisions that may be important to you. You should also read the particular terms of a series of debt securities, which will be described in more detail in an accompanying prospectus supplement. So that you may easily locate the more detailed provisions, the numbers in parentheses below refer to sections

in the applicable indenture or, if no indenture is specified, to sections in each of the indentures. Wherever particular sections or defined terms of the applicable indenture are referred to, such sections or defined terms are incorporated into this prospectus by reference, and the statement in this prospectus is qualified by that reference.

The trustee under each indenture will be determined at the time of issuance of debt securities, and the name of the trustee will be provided in an accompanying prospectus supplement.

The indentures provide that our senior or subordinated debt securities may be issued in one or more series, with different terms, in each case as we authorize from time to time. We also have the right to "reopen" a previous issue of a series of debt securities by issuing additional debt securities of such series without the consent of the holders of debt securities of the series being reopened or any other series. Any additional debt securities of the series being reopened will have the same ranking, interest rate, maturity and other terms as the previously issued debt securities of that series. These additional debt securities, together with the previously issued debt securities of that series, will constitute a single series of debt securities under the terms of the applicable indenture.

Types of Debt Securities

We may issue fixed or floating rate debt securities. Fixed rate debt securities will bear interest at a fixed rate described in the prospectus supplement. This type includes zero coupon debt securities, which bear no interest and are often issued at a price lower than the principal amount. United States federal income tax consequences and other special considerations applicable to any debt securities issued at a discount will be described in the applicable prospectus supplement.

Upon the request of the holder of any floating rate debt security, the calculation agent will provide the interest rate then in effect for that debt security, and, if determined, the interest rate that will become effective on the next interest reset date. The calculation agent's determination of any interest rate, and its calculation of the amount of interest for any interest period, will be final and binding in the absence of manifest error.

All percentages resulting from any interest rate calculation relating to a debt security will be rounded upward or downward, as appropriate, to the next higher or lower one hundred-thousandth of a percentage point.

All amounts used in or resulting from any calculation relating to a debt security will be rounded upward or downward, as appropriate, to the nearest cent, in the case of U.S. dollars, or to the nearest corresponding hundredth of a unit, in the case of a currency other than U.S. dollars, with one-half cent or one-half of a corresponding hundredth of a unit or more being rounded upward.

In determining the base rate that applies to a floating rate debt security during a particular interest period, the calculation agent may obtain rate quotes from various banks or dealers active in the relevant market, as described in the prospectus supplement. Those reference banks and dealers may include the calculation agent itself and its affiliates, as well as any underwriter, dealer or agent participating in the distribution of the relevant floating rate debt securities and its affiliates.

Information in the Prospectus Supplement

The prospectus supplement for any offered series of debt securities will describe the following terms, as applicable:

- the title;
- whether the debt is senior or subordinated;
- whether the debt securities are secured or unsecured and, if secured, the collateral securing the debt;
- the total principal amount offered;

- the percentage of the principal amount at which the debt securities will be sold and, if applicable, the method of determining the price;
- the maturity date or dates;
- whether the debt securities are fixed rate debt securities or floating rate debt securities;
- if the debt securities are fixed rate debt securities, the yearly rate at which the debt security will bear interest, if any, and the interest payment dates;
- if the debt security is an original issue discount debt security, the yield to maturity;
- if the debt securities are floating rate debt securities, the interest rate basis; any applicable index currency or maturity, spread or spread multiplier or initial, maximum or minimum rate; the interest reset, determination, calculation and payment dates, and the day count used to calculate interest payments for any period;
- the date or dates from which any interest will accrue, or how such date or dates will be determined, and the interest payment dates and any related record dates;
- if other than in U.S. dollars, the currency or currency unit in which payment will be made;
- the denominations in which the currency or currency unit of the securities will be issuable if other than denominations of $1,000 and integral multiples thereof;
- the terms and conditions on which the debt securities may be redeemed at our option;
- any obligation we may have to redeem, purchase or repay the debt securities at the option of a holder upon the happening of any event and the terms and conditions of redemption, purchase or repayment;
- the names and duties of the trustee and any co-trustees, depositaries, authenticating agents, calculation agents, paying agents, transfer agents or registrars for the debt securities;
- any material provisions of the applicable indenture described in this prospectus that do not apply to the debt securities;
- a discussion of United States federal income tax, accounting and special considerations, procedures and limitations with respect to the debt securities;
- whether and under what circumstances we will pay additional amounts to holders in respect of any tax assessment or government charge, and, if so, whether we will have the option to redeem the debt securities rather than pay such additional amounts; and
- any other specific terms of the debt securities that are consistent with the provisions of the indenture.

The terms on which a series of debt securities may be convertible into or exchangeable for other of our securities or any other entity will be set forth in the prospectus supplement relating to such series. Such terms will include provisions as to whether conversion or exchange is mandatory, at the option of the holder or at our option. The terms may include provisions pursuant to which the number of other securities to be received by the holders of such series of debt securities may be adjusted.

We will issue the debt securities only in registered form. As currently anticipated, debt securities of a series will trade in book-entry form, and global notes will be issued in physical (paper) form, as described below under “Book-Entry Procedures and Settlement.” Unless otherwise provided in the accompanying prospectus supplement, we will issue debt securities denominated in U.S. dollars and only in denominations of $1,000 and integral multiples thereof.

The prospectus supplement relating to offered debt securities denominated in a foreign or composite currency will specify the denomination of the offered debt securities.

The debt securities may be presented for exchange, and debt securities other than a global security may be presented for registration of transfer, at the principal corporate trust office of the trustee named in the applicable prospectus supplement. Holders will not have to pay any service charge for any registration of transfer or exchange of debt securities, but we may require payment of a sum sufficient to cover any tax or other governmental charge payable in connection with such registration of transfer (Section 3.05).

Payment and Paying Agents

Distributions on the debt securities other than those represented by global notes will be made in the designated currency against surrender of the debt securities at the principal corporate trust office of the trustee named in the applicable prospectus supplement. Payment will be made to the registered holder at the close of business on the record date for such payment. Interest payments will be made at the principal corporate trust office of the trustee named in the applicable prospectus supplement, or by a check mailed to the holder at his registered address. Payments in any other manner will be specified in the applicable prospectus supplement.

Calculation Agents

Calculations relating to floating rate debt securities and indexed debt securities will be made by the calculation agent, an institution that we appoint as our agent for this purpose. We may appoint one of our affiliates as calculation agent. We may appoint a different institution to serve as calculation agent from time to time after the original issue date of the debt security without your consent and without notifying you of the change. The initial calculation agent will be identified in the applicable prospectus supplement.

Senior Debt

We may issue senior debt securities under the senior debt indenture. Senior debt will constitute our unsecured and unsubordinated obligations and will rank on a basis equal in priority with all our other unsecured and unsubordinated debt.

Subordinated Debt

We may issue subordinated debt securities under the subordinated debt indenture. Subordinated debt will constitute our unsecured and subordinated obligations and will be junior in right of payment to our senior debt (including senior debt securities), which is defined as “senior indebtedness” in the subordinated debt indenture (Section 16.01 of the subordinated debt indenture).

If we default in the payment of any principal of, or premium, if any, or interest on any senior debt when it becomes due and payable after any applicable grace period, then, unless and until the default is cured or waived or ceases to exist, we cannot make a payment on account of or redeem or otherwise acquire the subordinated debt securities (Section 16.04 of the subordinated debt indenture).

If there is any insolvency, bankruptcy, liquidation or other similar proceeding relating to us or our property, then all senior debt must be paid in full before any payment may be made to any holders of subordinated debt securities (Section 16.02 of the subordinated debt indenture).

Furthermore, if we default in the payment of the principal of and accrued interest on any subordinated debt securities that is declared due and payable upon an event of default under the subordinated debt indenture, holders of all our senior debt will first be entitled to receive payment in full in cash before holders of such subordinated debt can receive any payments (Section 16.03 of the subordinated debt indenture).

Except as may be otherwise set forth in an accompanying prospectus supplement, senior debt means:

- the principal, premium, if any, and interest in respect of indebtedness for money borrowed and indebtedness evidenced by securities, notes, debentures, bonds or other similar instruments issued, including, as to us, the senior debt securities;
- all capitalized lease obligations;
- all obligations representing the deferred purchase price of property; and
- all deferrals, renewals, extensions and refundings of obligations of the type referred to above (Section 1.01 of the subordinated debt indenture).

However, senior debt does not include:

- the subordinated debt securities (Section 16.01 of the subordinated debt indenture);
- any indebtedness that by its terms is subordinated to, or ranks in priority on an equal basis with, subordinated debt securities (Section 1.01 of the subordinated debt indenture); and
- items of indebtedness (other than capitalized lease obligations) that would not appear as liabilities on a balance sheet prepared in accordance with accounting principles generally accepted in the United States of America.

Covenants

The accompanying prospectus supplement will contain any covenants applicable to the debt securities.

Modification of the Indentures

The indentures will provide that we and the relevant trustee may enter into supplemental indentures to establish the form and terms of any new series of debt securities without obtaining the consent of any holder of debt securities (Section 9.01).

We and the trustee may, with the consent of the holders of at least a majority in aggregate outstanding principal amount of the debt securities of a series, modify the applicable indenture or the rights of the holders of the securities of such series (Section 9.02).

No such modification may, without the consent of each holder of an affected security:

- extend the fixed maturity of any such security;
- reduce the rate or change the time of payment of interest on such security;
- reduce the principal amount of such securities or the premium, if any, on such security;
- change any obligation of ours to pay additional amounts with respect to such security;
- reduce the amount of the principal payable on acceleration of such security if issued originally at a discount;
- adversely affect the right of repayment or repurchase of such security at the option of the holder;
- reduce or postpone any sinking fund or similar provision with respect to such security;
- change the currency or currency unit in which such security is payable or the right of selection thereof;
- impair the right to sue for the enforcement of any payment with respect to such security on or after the maturity of such security;

- reduce the percentage of the aggregate outstanding principal amount of debt securities of the series referred to above whose holders need to consent to the modification or a waiver without the consent of such holders; or
- change any obligation of ours with respect to such security to maintain an office or agency.

Defaults

Except as may be otherwise set forth in an accompanying prospectus supplement, each indenture will provide that events of default regarding any series of debt securities will be:

- our failure to pay for 30 days required interest on any debt security of such series;
- our failure to pay principal or premium, if any, on any debt security of such series when due;
- our failure to make any required scheduled installment payment for 30 days on debt securities of such series;
- our failure to perform for 90 days after notice any other covenant in the relevant indenture other than a covenant included in the relevant indenture solely for the benefit of a series of debt securities other than such series; and
- certain events of bankruptcy or insolvency, whether voluntary or not (Section 5.01).

Except as may be otherwise set forth in an accompanying prospectus supplement, if an event of default regarding debt securities of any series issued under the indentures should occur and be continuing, either the trustee or the holders of 25% in the principal amount of outstanding debt securities of such series may declare each debt security of that series due and payable (Section 5.02). We may be required to file annually with the trustee a statement of an officer as to the fulfillment by us of our obligations under the indenture during the preceding year.

No event of default regarding one series of debt securities issued under an indenture is necessarily an event of default regarding any other series of debt securities.

Holders of a majority in aggregate principal amount of the outstanding debt securities of any series will be entitled to control certain actions of the trustee under the indentures and to waive past defaults regarding such series (Sections 5.12 and 5.13). The holders of debt securities generally will not be able to require the trustee to take any action, unless one or more of such holders provides to the trustee reasonable security or indemnity (Section 6.02).

If an event of default occurs and is continuing regarding a series of debt securities, the trustee may use any sums that it holds under the relevant indenture for its own reasonable compensation and expenses incurred prior to paying the holders of debt securities of such series (Section 5.06).

Before any holder of any series of debt securities may institute action for any remedy, except payment on such holder’s debt security when due, the holders of not less than 25% in principal amount of the debt securities of that series outstanding must request the trustee to take action. Holders must also offer and give the satisfactory security and indemnity against liabilities incurred by the trustee for taking such action (Section 5.07).

Defeasance

Except as may otherwise be set forth in an accompanying prospectus supplement, after we have deposited with the trustee, cash or government securities, in trust for the benefit of the holders sufficient to pay the principal of, premium, if any, and interest on the debt securities of such series when due, and satisfied certain other conditions, including receipt of an opinion of counsel that holders will not recognize taxable gain or loss for United States federal income tax purposes, then:

- we will be deemed to have paid and satisfied our obligations on all outstanding debt securities of such series, which is known as defeasance and discharge (Section 14.02); or
- we will cease to be under any obligation, other than to pay when due the principal of, premium, if any, and interest on such debt securities, relating to the debt securities of such series, which is known as covenant defeasance (Section 14.03).

When there is a defeasance and discharge, the applicable indenture will no longer govern the debt securities of such series, we will no longer be liable for payments required by the terms of the debt securities of such series and the holders of such debt securities will be entitled only to the deposited funds. When there is a covenant defeasance, however, we will continue to be obligated to make payments when due if the deposited funds are not sufficient.

Governing Law

Unless otherwise stated in the prospectus supplement, the debt securities and the indentures will be governed by New York law (Section 1.12).

Concerning the Trustee Under the Indentures

We may have banking and other business relationships with the trustee named in the prospectus supplement, or any subsequent trustee, in the ordinary course of business.

Form, Exchange and Transfer

We will issue debt securities only in registered form; no debt securities will be issued in bearer form (Section 2.03). We will issue each debt security in book-entry form only, unless otherwise specified in the applicable prospectus supplement. We will issue any common stock issuable upon conversion of any debt security being offered in both certificated and book-entry form, unless otherwise specified in the applicable prospectus supplement. Debt securities in book-entry form will be represented by a global security registered in the name of a depositary, which will be the holder of all the debt securities represented by the global security (Section 2.04). Those who own beneficial interests in a global security will do so through participants in the depositary's system, and the rights of these indirect owners will be governed solely by the applicable procedures of the depositary and its participants. Only the depositary will be entitled to transfer or exchange a debt security in global form, since it will be the sole holder of the debt security (Section 3.05). These book-entry securities are described below under "Book-Entry Procedures and Settlement."

If any debt securities are issued in non-global form or cease to be book-entry securities (in the circumstances described in the next section), the following will apply to them:

- The debt securities will be issued in fully registered form in denominations stated in the prospectus supplement. You may exchange debt securities for debt securities of the same series in smaller denominations or combined into fewer debt securities of the same series of larger denominations, as long as the total amount is not changed (Section 3.05).

- You may exchange, transfer, present for payment or exercise debt securities at the office of the relevant trustee or agent indicated in the prospectus supplement (Section 3.05). You may also replace lost, stolen, destroyed or mutilated debt securities at that office. We may appoint another entity to perform these functions or may perform them (Section 3.06).
- You will not be required to pay a service charge to transfer or exchange the debt securities, but you may be required to pay any tax or other governmental charge associated with the transfer or exchange (Sections 3.05 and 3.06). The transfer or exchange, and any replacement, will be made only if our transfer agent is satisfied with your proof of legal ownership. The transfer agent may also require an indemnity before replacing any debt securities (Section 3.06).
- If we have the right to redeem, accelerate or settle any debt securities before their maturity or expiration, and we exercise that right as to less than all those debt securities, we may block the transfer or exchange of those debt securities during the period beginning 15 days before the day we mail the notice of exercise and ending on the day of that mailing, in order to freeze the list of holders to prepare the mailing. We may also refuse to register transfers of or exchange any debt security selected for early settlement, except that we will continue to permit transfers and exchanges of the unsettled portion of any debt security being partially settled (Section 3.05).
- If fewer than all of the debt securities represented by a certificate that are payable or exercisable in part are presented for payment or exercise, a new certificate will be issued for the remaining amount of securities (Section 15.02).

Book-Entry Procedures and Settlement

Most offered debt securities will be book-entry (global) securities. Upon issuance, all book-entry securities will be represented by one or more fully registered global securities, without coupons (Section 3.02). Each global security will be deposited with, or on behalf of, The Depository Trust Company, or DTC, a securities depository, and will be registered in the name of DTC or a nominee of DTC (Section 3.01). DTC will thus be the only registered holder of these debt securities.

Purchasers of debt securities may only hold interests in the global notes through DTC if they are participants in the DTC system. Purchasers may also hold interests through a securities intermediary—banks, brokerage houses and other institutions that maintain securities accounts for customers—that has an account with DTC or its nominee. DTC will maintain accounts showing the security holdings of its participants, and these participants will in turn maintain accounts showing the security holdings of their customers. Some of these customers may themselves be securities intermediaries holding securities for their customers. Thus, each beneficial owner of a book-entry security will hold that debt security indirectly through a hierarchy of intermediaries, with DTC at the top and the beneficial owner's own securities intermediary at the bottom.

The debt securities of each beneficial owner of a book-entry security will be evidenced solely by entries on the books of the beneficial owner's securities intermediary. The actual purchaser of the debt securities will generally not be entitled to have the debt securities represented by the global securities registered in its name and will not be considered the owner under the declaration. In most cases, a beneficial owner will also not be able to obtain a paper certificate evidencing the holder's ownership of debt securities. The book-entry system for holding securities eliminates the need for physical movement of certificates and is the system through which most publicly traded common stock is held in the United States. However, the laws of some jurisdictions require some purchasers of securities to take physical delivery of their securities in definitive form. These laws may impair the ability to transfer book-entry securities.

A beneficial owner of book-entry securities represented by a global security may exchange the securities for definitive (paper) securities only if:

- DTC is unwilling or unable to continue as depositary for such global security and we do not appoint a qualified replacement for DTC within 90 days; or
- We in our sole discretion decide to allow some or all book-entry securities to be exchangeable for definitive securities in registered form (Section 3.05).

Unless we indicate otherwise, any global security that is exchangeable will be exchangeable in whole for definitive securities in registered form, with the same terms and of an equal aggregate principal amount. Definitive securities will be registered in the name or names of the person or persons specified by DTC in a written instruction to the registrar of the securities (Section 3.05). DTC may base its written instruction upon directions that it receives from its participants.

In this prospectus, for book-entry securities, references to actions taken by security holders will mean actions taken by DTC upon instructions from its participants, and references to payments and notices of redemption to security holders will mean payments and notices of redemption to DTC as the registered holder of the securities for distribution to participants in accordance with DTC's procedures.

DTC is a limited purpose trust company organized under the laws of the State of New York, a member of the Federal Reserve System, a clearing corporation within the meaning of the New York Uniform Commercial Code and a clearing agency registered under section 17A of the Securities Exchange Act. The rules applicable to DTC and its participants are on file with the SEC.

We will not have any responsibility or liability for any aspect of the records relating to, or payments made on account of, beneficial ownership interest in the book-entry securities or for maintaining, supervising or reviewing any records relating to the beneficial ownership interests.

PLAN OF DISTRIBUTION

We may sell any of the securities being offered by this prospectus separately or together:

- through agents;
- to or through underwriters who may act directly or through a syndicate represented by one or more managing underwriters;
- through dealers;
- through a block trade in which the broker or dealer engaged to handle the block trade will attempt to sell the securities as agent, but may position and resell a portion of the block as principal to facilitate the transaction;
- through "at the market" offerings, within the meaning of Rule 415(a)(4) of the Securities Act, to or through a market maker or into an existing trading market on an exchange or otherwise;
- in exchange for our outstanding indebtedness;
- directly to purchasers, through a specific bidding, auction or other process; or
- through a combination of any of these methods of sale.

If the securities offered under this prospectus are issued in exchange for our outstanding securities, the applicable prospectus supplement will describe the terms of the exchange, and the identity and the terms of sale of the securities offered under this prospectus by the selling security holders.

The distribution of securities may be effected from time to time in one or more transactions at a fixed price or prices that may be changed, at market prices prevailing at the time of sale or prices related to prevailing market prices or at negotiated prices.

Agents designated by us from time to time may solicit offers to purchase the securities. We will name any agent involved in the offer or sale of the securities and set forth any commissions payable by us to an agent in the prospectus supplement for that transaction. Unless otherwise indicated in the prospectus supplement, any agent will be acting on a best efforts basis for the period of its appointment. Any agent may be deemed to be an "underwriter" of the securities as that term is defined in the Securities Act.

If we utilize an underwriter or underwriters in the sale of securities, we will execute an underwriting agreement with the underwriter or underwriters at the time we reach an agreement for sale. We will set forth in the prospectus supplement the names of the specific managing underwriter or underwriters, as well as any other underwriters, and the terms of the transactions, including compensation of the underwriters and dealers. This compensation may be in the form of discounts, concessions or commissions. Underwriters and others participating in any offering of securities may engage in transactions that stabilize, maintain or otherwise affect the price of securities. We will describe any of these activities in the prospectus supplement.

If a dealer is utilized in the sale of the securities, we or an underwriter will sell securities to the dealer, as principal. The dealer may then resell the securities to the public at varying prices to be determined by the dealer at the time of resale. The prospectus supplement will set forth the name of the dealer and the terms of the transactions.

We may directly solicit offers to purchase the securities, and we may sell directly to institutional investors or others. These persons may be deemed to be underwriters within the meaning of the Securities Act with respect to any resale of the securities. The prospectus supplement will describe the terms of any direct sales, including the terms of any bidding or auction process, if utilized.

Agreements we enter into with agents, underwriters and dealers may entitle them to indemnification by us against specified liabilities, including liabilities under the Securities Act, or to contribution by us to payments they may be required to make in respect of these liabilities. The prospectus supplement will describe the terms and conditions of indemnification or contribution.

Certain of the agents, underwriters and dealers that we sell the securities offered under this prospectus to or through, and certain of their affiliates, engage in transactions with and perform services for us in the ordinary course of business. We may enter into hedging transactions in connection with any particular issue of the securities offered under this prospectus, including forwards, futures, options, interest rate or exchange rate swaps and repurchase or reverse repurchase transactions with, or arranged by, the applicable agent, underwriter or dealer, an affiliate of that agent, underwriter or dealer or an unrelated entity. We, the applicable agent, underwriter or dealer or other parties may receive compensation, trading gain or other benefits in connection with these transactions. We are not required to engage in any of these transactions. If we commence these transactions, we may discontinue them at any time. Counterparties to these hedging activities also may engage in market transactions involving the securities offered under this prospectus.

No securities may be sold under this prospectus without delivery (in paper format, in electronic format, in electronic format on the Internet, or by other means) of the applicable prospectus supplement describing the method and terms of the offering.

LEGAL MATTERS

Unless otherwise indicated in the applicable prospectus supplement, certain legal matters, including the validity of the debt securities that may be offered, will be passed upon for us by Simpson Thacher & Bartlett LLP, New York, New York. Unless otherwise indicated in the applicable prospectus supplement, certain matters of Pennsylvania law, including the validity of the securities that may be offered, will be passed upon for us by Ballard Spahr LLP, Philadelphia, Pennsylvania. If legal matters in connection with the offering made by this prospectus are passed on by counsel for the underwriters, dealers or agents, if any, that counsel will be named in the applicable prospectus supplement.

EXPERTS

The financial statements and management's assessment of the effectiveness of internal control over financial reporting (which is included in Management's Report on Internal Control over Financial Reporting) incorporated in this prospectus by reference to the Annual Report on Form 10-K for the year ended December 31, 2020 have been so incorporated in reliance on the report (which contains an explanatory paragraph on the effectiveness of internal control over financial reporting due to the exclusion of Peoples Gas because it was acquired by the Company in a purchase business combination during 2020) of PricewaterhouseCoopers LLP, an independent registered public accounting firm, given on the authority of said firm as experts in auditing and accounting.

The consolidated financial statements of LDC Funding LLC as of December 31, 2019 and 2018 and for each of the three years in the period ended December 31, 2019, incorporated in this prospectus by reference to our Current Report on Form 8-K filed on April 15, 2021, have been audited by Deloitte & Touche LLP, independent auditors, as stated in their report, which is incorporated by reference herein, and are incorporated in reliance upon the report of such firm given upon their authority as experts in accounting and auditing.

WHERE YOU CAN FIND MORE INFORMATION

We file annual, quarterly and current reports, proxy statements and other information with the SEC. You may read and copy any document we file at the SEC's Public Reference Room at 100 F Street N.E., Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for further information on the Public Reference Room. You may also obtain our SEC filings from the SEC's website at www.sec.gov or from our website at www.essential.co.

We have filed with the SEC a "shelf" registration statement on Form S-3 under the Securities Act relating to the securities that may be offered by this prospectus. This prospectus is a part of that registration statement, but does not contain all of the information in the registration statement. We have omitted certain parts of the registration statement in accordance with rules and regulations of the SEC. Statements made in this prospectus as to the contents of any contract, agreement or other documents are not necessarily complete, and, in each instance, we refer you to a copy of such document filed as an exhibit to the registration statement, of which this prospectus is a part, or otherwise filed with the SEC. For more detail about us and any securities that may be offered by this prospectus, you may examine the registration statement on Form S-3 and the exhibits filed with it at the locations listed in the previous paragraph.

The SEC allows us to "incorporate by reference" the information we file with them, which means that we can disclose important information to you by referring you to those documents. The information incorporated by reference is considered to be part of this prospectus. When we file information with the SEC in the future, that information will automatically update and supersede this information. We incorporate by reference the documents listed below and any future filings we will make with the SEC under Sections 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act until we sell all of the securities covered by this prospectus; provided, however, that we are not incorporating, in each case, any documents or information deemed to have been furnished and not filed in accordance with SEC rules:

- Our Annual Report on Form 10-K for the year ended December 31, 2020, filed with the SEC on March 1, 2021;
- Our Current Report on Form 8-K filed with the SEC on April 15, 2021; and
- The description of our common stock set forth in our Registration Statement on Form 8-A, including any amendments or reports filed for the purpose of updating such description.

These documents contain important business and financial information about us that is not included in or delivered with this prospectus. You may request a copy of any or all documents that we incorporate by reference at no cost, by writing or telephoning us at:

Essential Utilities, Inc.
762 W. Lancaster Avenue
Bryn Mawr, PA 19010-3489
Telephone: 610-527-8000
Attention: Corporate Secretary

We have not authorized anyone to provide you with information different from that contained or incorporated by reference in this prospectus, any prospectus supplements or any free writing prospectus prepared by or on behalf of us or to which we have referred you. We take no responsibility for, and can provide no assurance as to the reliability of, any other information that others may give you. You should not assume that the information provided in this prospectus or incorporated by reference in this prospectus is accurate as of any date other than the date on the front of this prospectus or the date of those documents. Our business, financial condition, results of operations and prospects may have changed since those dates.

If you find inconsistencies between the documents, or between the documents and this prospectus or the applicable prospectus supplement, you should rely on the most recent document, prospectus or prospectus supplement.

Prospectus Supplement
(To Prospectus dated February 28, 2018)

6,700,000 Shares

ESSENTIAL UTILITIES, INC.

Common Stock

The forward seller referred to below is offering 6,700,000 shares of our common stock, par value $0.50 per share. We have entered into a forward sale agreement with Royal Bank of Canada (through its agent RBC Capital Markets), whom we refer to in such capacity as the "forward purchaser," with respect to 6,700,000 Shares of our common stock. In connection with the forward sale agreement, the forward purchaser or its affiliate and/or agent, whom we refer to in such capacity as the "forward seller," at our request, is borrowing from third parties and selling to the underwriter 6,700,000 shares of our common stock. If in the good faith, commercially reasonable judgment of the forward purchaser, it or its affiliate is unable to borrow and deliver for sale on the anticipated closing date a number of shares of our common stock underlying the forward sale agreement, or it or its affiliate would be unable to borrow, at a stock loan rate not greater than a specified rate, and deliver for sale on the anticipated closing date such number of shares of our common stock, or if certain other conditions to the forward seller's obligations have not been satisfied, then we will issue and sell directly to the underwriter a number of shares of our common stock equal to the number of shares that the forward seller does not borrow and deliver.

We will not initially receive any proceeds from the sale of our common stock sold by the forward seller to the underwriter, except in certain circumstances described in this prospectus supplement, including the last sentence of the previous paragraph. The forward sale agreement provides for settlement on a settlement date or dates to be specified at our discretion on or prior to August 10, 2021. If we elect to cash settle all or a portion of the forward sale agreement, we may not receive any proceeds from such election, and we may owe cash to the forward purchaser. If we elect to net share settle all or a portion of the forward sale agreement, we will not receive any cash proceeds from such election, and we may owe shares of our common stock to the forward purchaser. See "Underwriting (Conflicts of Interest)—Forward Sale Agreement" for a description of the forward sale agreement.

The underwriter proposes to offer shares of our common stock from time to time to purchasers directly or through agents, or through brokers in brokerage transactions on the NYSE, in the over-the-counter market, or to dealers in negotiated transactions, or in a combination of such methods of sale or otherwise, at a fixed price or prices, which may be changed, or at market prices prevailing at the time of sale, at prices related to such prevailing market prices, or at negotiated prices. In connection with the sale of shares of our common stock, the underwriter may be deemed to have received compensation in the form of underwriting discount.

The underwriter has agreed to purchase shares of our common stock from the forward seller at a price of $46.00 per share. We expect to receive estimated net proceeds from the sale of shares of our common stock, before expenses, of approximately $308.2 million upon full physical settlement of the forward sale agreement, which we expect to occur on or prior to August 10, 2021. For the purpose of calculating the estimated net proceeds to us, we have assumed that the forward sale agreement is fully physically settled based on the initial forward sale price of $46.00 per share. The forward sale price is subject to adjustment pursuant to the forward sale agreement, and the actual proceeds, if any, will be calculated as described in this prospectus supplement.

Although we expect to settle the forward sale agreement entirely by the full physical delivery of shares of our common stock to the forward purchaser in exchange for cash proceeds, we may elect cash settlement or net share settlement for all or a portion of our obligations under the forward sale agreement. See "Underwriting (Conflicts of Interest)—Forward Sale Agreement" for a description of the forward sale agreement.

Our common stock is listed on the New York Stock Exchange (the "NYSE") under the symbol "WTRG." The last reported sale price of our common stock on the NYSE on August 10, 2020 was $47.81 per share.

Investing in our common stock involves risks. See "Risk Factors" on page S-7 of this prospectus supplement, page 6 of the accompanying prospectus and in the documents we incorporate by reference in this prospectus supplement and the accompanying prospectus to read important factors you should consider before investing in our common stock.

Neither the Securities and Exchange Commission (the "SEC") nor any other regulatory body has approved or disapproved of these securities or passed upon the adequacy or accuracy of this prospectus supplement or the accompanying prospectus. Any representation to the contrary is a criminal offense.

The underwriter expects that the shares of our common stock will be delivered against payment on or about August 13, 2020.

ABOUT THIS PROSPECTUS SUPPLEMENT

Unless otherwise specified or the context requires otherwise, references in this prospectus supplement to (1) "Essential Utilities," the "Company," "we," "us," "our" and similar references refer to Essential Utilities, Inc. and its subsidiaries and (2) "this offering" refers to this offering of the shares pursuant to this prospectus supplement and the accompanying prospectus. Essential Utilities, Inc. was formerly known as Aqua America, Inc. prior to its name change on February 3, 2020, and accordingly, unless otherwise specified or the context requires otherwise, references in the accompanying prospectus and the documents incorporated by reference in the accompanying prospectus to Aqua America, Inc. refer to Essential Utilities, Inc and its subsidiaries.

This document is in two parts. The first part is this prospectus supplement, which describes the specific terms of this offering of the shares of our common stock and also adds to and updates information contained in the accompanying prospectus and the documents incorporated by reference in the accompanying prospectus. The second part is the accompanying prospectus, which gives more general information about us, some of which does not apply to this offering of the shares of our common stock. To the extent the information in this prospectus supplement is inconsistent with the information in the accompanying prospectus, you should rely on the information in this prospectus supplement.

We have not, and the underwriter and the forward seller have not, authorized anyone to provide you with any information other than that contained or incorporated by reference in this prospectus supplement, the accompanying prospectus or in any free writing prospectus we may provide to you in connection with this offering. Neither we nor the underwriter or the forward seller take any responsibility for, or provide any assurances as to the reliability of, any additional or different information that others may give you. Neither we nor the underwriter or the forward seller are offering to sell the shares or seeking offers to buy the shares in jurisdictions where offers or sales are not permitted. You should assume that the information contained in this prospectus supplement, the accompanying prospectus and any related free writing prospectus is accurate only as of their respective dates or as of the respective dates specified in such information, as applicable, and the information contained in documents incorporated by reference is accurate only as of the respective dates of those documents or as of the respective dates specified in such information, as applicable, in each case regardless of the time of delivery of this prospectus supplement or the accompanying prospectus or any such free writing prospectus or any sale of the shares of our common stock. Our business, financial condition, results of operations and prospects may have changed since those dates.

The distribution of this prospectus supplement, the accompanying prospectus and any related free writing prospectus and the offering of the shares of our common stock in certain jurisdictions may be restricted by law. Persons into whose possession this prospectus supplement, the accompanying prospectus and any such free writing prospectus come should inform themselves about and observe any such restrictions. This prospectus supplement, the accompanying prospectus and any such free writing prospectus do not constitute, and may not be used in connection with, an offer or solicitation by anyone in any jurisdiction in which such offer or solicitation is not authorized or in which the person making such offer or solicitation is not qualified to do so or to any person to whom it is unlawful to make such offer or solicitation. See "Underwriting (Conflicts of Interest)."

BASIS OF PRESENTATION

On March 16, 2020, we completed the acquisition of all of the issued and outstanding limited liability company membership interests of LDC Funding LLC (the "Peoples Acquisition"), which is the parent of a group of natural gas public utility companies that we refer to as "Peoples". Unless otherwise specified or the context requires otherwise, the information as of or in respect of periods prior to the closing of the Peoples Acquisition included in this prospectus supplement and the accompanying prospectus, including the documents incorporated by reference herein or therein, does not give effect to the Peoples Acquisition.

The unaudited pro forma consolidated combined statement of net income for the year ended December 31, 2019 and for the six months ended June 30, 2020 included or incorporated by reference in this prospectus supplement and the accompanying prospectus gives pro forma effect to the Peoples Acquisition and certain related transactions as if we had completed such transactions as of January 1, 2019, unless otherwise specified. The unaudited pro forma consolidated combined balance sheet as of June 30, 2020 is not presented in this prospectus supplement or the accompanying prospectus as Peoples is reflected in our historical consolidated balance sheet as of June 30, 2020. The unaudited pro forma consolidated combined statement of net income for the year ended December 31, 2019 and for the six months ended June 30, 2020 included in our Current Report on Form 8-K/A filed with the U.S. Securities and Exchange Commission (the "SEC") on August 10, 2020, which is incorporated by reference in this prospectus supplement and the accompanying prospectus and may be obtained as described in this prospectus supplement under the heading "Where You Can Find Additional Information; Incorporation of Certain Documents by Reference," does not give effect to our issuance of common stock in this offering. Moreover, the unaudited pro forma consolidated combined statement of net income for the year ended December 31, 2019 and for the six months ended June 30, 2020 included in our Current Report on Form 8-K/A filed with the SEC on August 10, 2020 has been calculated on the basis of assumptions made by our management at the time such information was prepared.

As a result, purchasers of shares in this offering should not place undue reliance on the pro forma and as adjusted information included or incorporated by reference in this prospectus supplement and the accompanying prospectus.

All references to currency amounts included in this prospectus supplement are in U.S. dollars unless specifically noted otherwise.

FORWARD-LOOKING STATEMENTS

Certain statements in this prospectus supplement, the accompanying prospectus and the documents they incorporate by reference contain, and any free writing prospectus we may provide to you in connection with this offering are "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act") and Section 21E of the Exchange Act that are made based upon, among other things, our current assumptions, expectations, plans, and beliefs concerning future events and their potential effect on us. These forward-looking statements involve risks, uncertainties and other factors, many of which are outside our control that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by these forward-looking statements. In some cases you can identify forward-looking statements where statements are preceded by, followed by or include the words "believes," "expects," "anticipates," "plans," "future," "potential," "probably," "predictions," "intends," "will," "continue," "in the event" or the negative of such terms or similar expressions. Such forward-looking statements include, but are not limited to, statements regarding:

- recovery of capital expenditures and expenses in rates;
- projected capital expenditures and related funding requirements;
- our capability to pursue timely rate increases;
- expectations regarding the impact of the Peoples Acquisition, including statements regarding the impact of the transaction on the Company;
- developments, trends and consolidation in the water, wastewater and natural gas utility and infrastructure industries;
- opportunities for future acquisitions, both within and outside the water, wastewater, and natural gas industries, the success of pending acquisitions and the impact of future acquisitions;
- the capacity of our water and natural gas supplies and facilities;
- the availability and cost of capital financing;
- dividend payment projections;
- the impact of geographic diversity on our exposure to unusual weather;
- the impact of conservation awareness of customers and more efficient fixtures and appliances on water usage and gas consumption per customer;
- our authority to carry on our business without unduly burdensome restrictions;
- the continuation of investments in strategic ventures;
- our ability to obtain fair market value for condemned assets;
- the impact of fines and penalties;
- the impact of changes in and compliance with governmental laws, regulations and policies, including those dealing with taxation, the environment, health and water quality, and public utility regulation;
- the impact of decisions of governmental and regulatory bodies, including decisions to raise or lower rates and decisions regarding potential acquisitions;
- the development of new services and technologies by us or our competitors;
- the availability of qualified personnel;
- the condition of our assets;
- the impact of legal proceedings;

- general economic conditions;
- acquisition-related costs and synergies;
- the sale of water and wastewater divisions;
- the impact of federal and/or state tax policies and the regulatory treatment of the effects of those policies;
- the amount of income tax deductions for qualifying utility asset improvements and the Internal Revenue Service's ultimate acceptance of the deduction methodology; and
- the impact of the novel coronovirus ("COVID-19") or the measures implemented by the Company as a result of COVID-19.

Because forward-looking statements involve risks and uncertainties, there are important factors that could cause actual results to differ materially from those expressed or implied by these forward-looking statements, including but not limited to:

- the diversion of our management's time and resources caused by integration efforts with respect to the Peoples Acquisition;
- our ability to manage the expansion of our business, including our ability to manage our expanded operations following the closing of the Peoples Acquisition;
- our ability to treat and supply water or collect and treat wastewater;
- our ability to source a sufficient supply of natural gas to meet the demands of our gas utility customers in a timely manner;
- the continuous and reliable operation of our information technology systems, including the impact of cyber security attacks or other cyber-related events;
- our ability to integrate and otherwise realize all of the anticipated benefits of businesses, technologies or services which we may acquire;
- changes in general economic, business, credit and financial market conditions;
- changes in governmental laws, regulations and policies, including those dealing with taxation, the environment, health and water quality, and public utility regulation;
- the profitability of future acquisitions;
- changes to the rules or our assumptions underlying our determination of what qualifies for an income tax deduction for qualifying utility asset improvements;
- the decisions of governmental and regulatory bodies, including decisions on rate increase requests and decisions regarding potential acquisitions;
- our ability to file rate cases on a timely basis to minimize regulatory lag;
- abnormal weather conditions, including those that result in water use restrictions and seasonality effects;
- changes in, or unanticipated, capital requirements;
- changes in our credit ratings or the market price of our common stock;
- changes in valuation of strategic ventures;
- the phase-out of LIBOR, or the replacement of LIBOR with a different reference rate or modification of the method used to calculate LIBOR, which may adversely affect interest rates;

- the extent to which we are able to develop and market new and improved services;
- the effect of the loss of major customers;
- our ability to retain the services of key personnel and to hire qualified personnel as we expand;
- labor disputes;
- increasing difficulties in obtaining insurance and increased cost of insurance;
- cost overruns relating to improvements to, or the expansion of, our operations;
- increases in the costs of goods and services and commodity prices;
- civil disturbance or terroristic threats or acts;
- changes in accounting pronouncements;
- litigation and claims;
- changes in environmental conditions, including the effects of climate change;
- restrictions on our subsidiaries' ability to make dividends and other distributions; and
- impacts from the global outbreak of COVID-19, including on consumption and collections.

Given these risks and uncertainties, you should not place undue reliance on any forward-looking statements. You should read this prospectus supplement, the accompanying prospectus and the documents that we incorporate by reference into this prospectus supplement completely and with the understanding that our actual results, performance and achievements may be materially different from what we expect. These forward-looking statements represent assumptions, expectations, plans and beliefs only as of the date of this prospectus supplement, the date of the document containing the applicable statement or the date specified in such statement, as applicable. Except for our ongoing obligations to disclose certain information under the federal securities laws, we are not obligated, and assume no obligation, to update these forward-looking statements, even though our situation may change in the future. For further information or other factors which could affect our financial results and such forward-looking statements, see "Risk Factors." We qualify all of our forward-looking statements by these cautionary statements.

Investing in our common stock involves risks. You should review and consider carefully the risks, uncertainties and other factors that affect our business, financial condition and results of operations and the value of the shares, including those described in the "Business," "Risk Factors," "Management's Discussion and Analysis of Financial Condition and Results of Operations" and "Management's Discussion and Analysis of Financial Condition and Results of Operations of Peoples" sections and other sections in our Annual Report on Form 10-K for the fiscal year ended December 31, 2019 and our Quarterly Reports on Form 10-Q for the quarter ended March 31, 2020 filed with the SEC on May 8, 2020 and the quarter ended June 30, 2020 filed with the SEC on August 6, 2020, and those described in the "Risk Factors" sections and other sections of this prospectus supplement and the accompanying prospectus. You may obtain copies of these reports and documents as described under "Where You Can Find Additional Information; Incorporation of Certain Documents by Reference" in this prospectus supplement. These risks, uncertainties and other factors could cause you to suffer a loss of all or part of your investment in the shares. Before making an investment decision, you should carefully consider these risks, uncertainties and other factors, as well as other information contained or incorporated by reference in this prospectus supplement and the accompanying prospectus and any related free writing prospectus we may provide to you in connection with this offering. However, additional risks and uncertainties not presently known to us or that we currently deem immaterial may also impair our business, operations, financial condition and financial results and the value of the shares.

MARKET AND INDUSTRY DATA

This prospectus supplement, the accompanying prospectus and the documents incorporated by reference in this prospectus supplement and the accompanying prospectus include, and any free writing prospectus we may provide to you in connection with this offering may include, market, demographic and industry data and forecasts related to our business that are based on or derived from sources such as independent industry publications, publicly available information, government data and other information from third parties or that have been compiled or prepared by our management or employees. We do not guarantee the accuracy or completeness of any of this information, and we have not independently verified any of the information provided by third-party sources.

In addition, market, demographic and industry data and forecasts involve estimates, assumptions and other uncertainties and are subject to change based on various factors, including those discussed under the heading “Risk Factors” in this prospectus supplement and under similar headings in the documents that are incorporated by reference in this prospectus supplement and the accompanying prospectus. Accordingly, you should not place undue reliance on any of this information.

PROSPECTUS SUPPLEMENT SUMMARY

The following summary highlights, and should be read together with, the information contained elsewhere in this prospectus supplement, the accompanying prospectus and the documents incorporated by reference herein and therein. This summary may not contain all of the information that may be important to you, and you should carefully read this entire prospectus supplement, the accompanying prospectus, any free writing prospectus we may provide to you in connection with this offering and the documents incorporated by reference herein and therein before making an investment decision. You may obtain a copy of the documents incorporated by reference by following the instructions in the section titled "Where You Can Find Additional Information; Incorporation of Certain Documents by Reference," in this prospectus supplement. Unless we state otherwise or the context otherwise requires, references appearing in this prospectus supplement to "Essential Utilities," the "Company," "we," "us" and "our" should be read to refer to Essential Utilities, Inc. and its subsidiaries.

Essential Utilities, Inc.

Essential Utilities, Inc., formerly known as Aqua America, Inc., is a Pennsylvania corporation and the holding company for regulated utilities providing water, wastewater or natural gas distribution services to an estimated five million people in Pennsylvania, Ohio, Texas, Illinois, North Carolina, New Jersey, Indiana, Virginia, West Virginia and Kentucky under the Aqua and Peoples brands. One of our largest operating subsidiaries, Aqua Pennsylvania, Inc. ("Aqua Pennsylvania"), provides water or wastewater services to approximately one-half of the total number of water or wastewater customers we serve, who are located in the suburban areas in counties north and west of the City of Philadelphia and in 27 other counties in Pennsylvania. Our other regulated water or wastewater utility subsidiaries provide similar services in seven other states.

Pursuant to the Company's growth strategy, commencing on March 16, 2020, with the completion of the Peoples Gas Acquisition, the Company began to provide natural gas distribution services to customers in western Pennsylvania, Kentucky, and West Virginia. Approximately 93% of the total number of natural gas utility customers we serve are in western Pennsylvania. Lastly, the Company's market-based activities are conducted through Aqua Infrastructure, LLC and Aqua Resources, Inc. and certain other non-regulated subsidiaries of Peoples. Aqua Infrastructure provides non-utility raw water supply services for firms in the natural gas drilling industry. Aqua Resources manages a water system operating and maintenance contract, and offers, through a third-party, water and sewer service line protection solutions and repair services to households. The non- regulated subsidiaries of Peoples provide utility service line protection solutions and repair services to households and operates gas marketing and production entities.

Our growth in revenues over the past five years is primarily a result of increases in rates and customer growth. The increase in our utility customer base, as shown below, has been due to customers added through acquisitions, partnerships with developers, and organic growth (excluding dispositions):

Year	Utility Customer Growth Rate
2019	2.1%
2018	2.3%
2017	1.1%
2016	1.6%
2015	1.9%

In 2019, our customer count increased by 21,108 customers, primarily due to utility systems that we acquired and organic growth. Overall, for the five-year period of 2015 through 2019, our utility customer base,

adjusted to exclude customers associated with utility system dispositions, increased at an annual compound rate of 1.8%. During the five-year period ended December 31, 2019, our utility customer base, including customers associated with utility system acquisitions and dispositions, increased from 940,119 at January 1, 2015 to 1,026,704 at December 31, 2019.

The Peoples Acquisition brings Essential Utilities' total water, wastewater and natural gas customer count to approximately 1,773,000 on a pro forma basis as of December 31, 2019.

Our principal executive office is located at 762 W. Lancaster Avenue, Bryn Mawr, Pennsylvania 19010-3489, and our telephone number is 610-527-8000. Our website may be accessed at *www.essential.co*. The reference to our website is intended to be an inactive textual reference only, and the contents of our website are not incorporated by reference herein and should not be considered part of this prospectus supplement.

Recent Developments

COVID-19

The impact of the global outbreak of the COVID-19 pandemic has created significant volatility in the global economy and led to reduced economic activity. We are monitoring the global outbreak of COVID-19 and taking steps to mitigate the potential risks to our employees and our customers posed by its spread. For information regarding the COVID-19 pandemic and its impact on our business, see our Quarterly Reports on Form 10-Q for the quarter ended March 31, 2020 filed with the SEC on May 8, 2020 and the quarter ended June 30, 2020 filed with the SEC on August 6, 2020.

THE OFFERING

The following summary contains basic information about this offering and may not contain all of the information that may be important to you. You should read this entire prospectus supplement, the accompanying prospectus, any free writing prospectus we may provide to you in connection with this offering and the documents incorporated by reference herein and therein before making an investment decision.

As used in this section, unless the context otherwise requires, references to "Essential Utilities," the "Company," "we," "us," "our" and similar references refer only to Essential Utilities, Inc. and not to its consolidated subsidiaries.

Issuer	Essential Utilities, Inc., a Pennsylvania corporation
Common Stock Offered by this Prospectus Supplement	6,700,000 shares
Common Stock to be Outstanding Immediately Before this Offering	245,154,699 shares(1)
Common Stock to be Outstanding Immediately After the Offering	245,154,699 shares(1)(2)
Common Stock to be Outstanding After Settlement of the Forward Sale Agreement Assuming Physical Settlement	251,854,699 shares(1)(2)(3)

(1) This amount is based on the total number of shares of our common stock that was outstanding on August 7, 2020. In calculating that number of shares, we did not take into account shares issuable upon settlement of the purchase contracts that are part of the tangible equity units, reserved for issuance upon exercise or vesting of stock options, restricted stock units or performance share units or issuable under the dividend reinvestment plan, employee stock purchase plan or 401(k) savings plan.

(2) Such number of shares of our common stock assumes that we will not be required to issue the shares of our common stock that are the subject of this offering in lieu of the forward seller borrowing and selling such shares to the underwriter as further described elsewhere in this prospectus supplement. For more information, see "Underwriting (Conflicts of Interest)."

(3) The forward seller has advised us that it intends to acquire shares of our common stock to be sold in this offering through borrowings from third-party stock lenders. Subject to the occurrence of certain events, we will not be obligated to deliver shares of our common stock under the forward sale agreement (if at all) until later settlement of the forward sale agreement, which provides for settlement on a settlement date or dates to be specified at our discretion on or prior to August 10, 2021. Except in certain circumstances, we have the right to elect cash settlement or net share settlement under the forward sale agreement. Although we intend to elect full physical settlement under the forward sale agreement, if we elect cash settlement we will not issue any shares and if we elect net share settlement, the number of shares we issue upon settlement of the forward sale agreement may be substantially less than the amount we would have issued upon full physical settlement, or we may not issue any shares upon such net share settlement at all. See "Underwriting (Conflicts of Interest)–Forward Sale Agreement" for a description of the forward sale agreement.

Use of Proceeds	We will not initially receive any proceeds from the sale of the shares of our common stock offered by the forward seller in this offering, unless an event occurs that requires us to issue and sell such shares to the underwriter in lieu of the forward seller selling such shares to the underwriter as further described elsewhere in this prospectus supplement, in which case we intend to use all net proceeds we receive from any such sales for the same purposes described below. We expect to receive net proceeds (after deducting estimated expenses) of approximately $307.5 million, subject to the price adjustment and other provisions of the forward sale agreement, in the event of full physical settlement of the forward sale agreement, which we expect to occur on or prior to August 10, 2021. For purposes of calculating the proceeds to us upon settlement of the forward sale agreement, we have assumed that the forward sale agreement is physically settled based upon the initial forward sale price of $46.00 per share on the effective date of the forward sale agreement, which will be August 11, 2020. We will not receive any proceeds under the forward sale agreement on the closing date of this offering. The actual proceeds from the forward sales are subject to the final settlement of the forward sale agreement. The forward sale price that we expect to receive upon physical settlement of the forward sale agreement is subject to adjustment on a daily basis based on a floating interest rate factor equal to the overnight bank funding rate less a spread and will be decreased based on amounts related to expected dividends on shares of our common stock during the term of the forward sale agreement, including the dividend declared on August 4, 2020 and having a record date of August 14, 2020. If the overnight bank funding rate is less than the spread on any day, the interest rate factor will result in a daily reduction of the forward sale price for such day.

We currently intend to elect full physical settlement of the forward sale agreement and to use the net proceeds, if any, that we would receive upon settlement of the forward sale agreement for general corporate purposes, including for water and wastewater utility acquisitions, working capital and capital expenditures. If we elect to cash settle all or a portion of the forward sale agreement, we will not receive any proceeds from the sale of shares of our common stock related to such election of cash settlement of the forward sale agreement and we may either receive a cash payment from, or owe a cash payment to, the forward purchaser. If we elect to net share settle all or a portion of the forward sale agreement, we will not receive any proceeds from the sale of shares of our common stock related to such election, and we may either receive shares of our common stock from, or owe shares of our common stock to, the forward purchaser.

Certain United States Federal Income and Estate Tax Considerations	Certain United States federal income and estate tax considerations to non-U.S. holders of purchasing, owning and disposing of our common stock are described in “Certain United States Federal Income and Estate Tax Considerations to Non-U.S. Holders” included in this prospectus supplement.

Listing	Our common stock is listed on the New York Stock Exchange (the "NYSE") under the symbol "WTRG."
Dividend Policy	We have historically paid quarterly dividends on our common stock; however, the declaration, amount, timing and payment of any future dividends are subject to the determination and approval of our board of directors based on then-current or anticipated future conditions including our results of operations, capital requirements, financial condition, legal requirements or other factors deemed relevant by our board of directors. See "Listing of Our Common Stock and Dividends."
Transfer Agent and Registrar	The registrar and transfer agent for our common stock is Computershare Trust Company, N.A.
Accounting Treatment	Before the issuance of shares of our common stock, if any, upon settlement of the forward sale agreement, we expect that the shares issuable upon settlement of the forward sale agreement will be reflected in our diluted earnings per share calculation using the treasury stock method. Under this method, the number of shares of our common stock used in calculating diluted earnings per share is deemed to be increased by the excess, if any, of the number of shares of common stock that would be issued upon full physical settlement of the forward sale agreement over the number of shares of common stock that could be purchased by us in the market (based on the average market price of our common stock during the applicable reporting period) using the proceeds receivable upon full physical settlement (based on the adjusted forward sale price at the end of the reporting period). Consequently, we anticipate there will be no dilutive effect on our earnings per share except during periods when the average market price of shares of our common stock is above the applicable adjusted forward sale price, which is initially $46.00 per share, subject to increase or decrease based on the overnight bank funding rate, less a spread, and subject to decrease by amounts related to expected dividends on shares of our common stock during the term of the forward sale agreement. However, if we decide to physically settle or net share settle the forward sale agreement, delivery of our shares to the forward purchaser on the physical settlement or net share settlement of the forward sale agreement would result in dilution to our earnings per share.
Conflicts of Interest	All of the proceeds of this offering (excluding proceeds to us with respect to any shares of common stock that we may issue and sell directly to the underwriter in lieu of the forward seller selling our common stock to the underwriter) will be paid to the forward purchaser (or its affiliate). Because RBC Capital Markets, or its affiliate, will receive more than 5% of the net proceeds of this offering, not including underwriting compensation, RBC Capital Markets is deemed to have a conflict of interest within the meaning of Rule 5121 (Public Offerings of Securities with Conflicts of Interest)

	of the Financial Industry Regulatory Authority, Inc. ("FINRA"). Accordingly, this offering will be conducted in compliance with the applicable requirements of FINRA Rule 5121. Pursuant to that rule, the appointment of a "qualified independent underwriter" is not required in connection with this offering, as the shares of our common stock have a "bona fide public market" (as such terms are defined in FINRA Rule 5121). In accordance with FINRA Rule 5121, RBC Capital Markets may not confirm any sales to any account over which it exercises discretionary authority without the prior written approval of the transaction from the account holder.
Risk Factors	Investing in our common stock involves risks. See "Risk Factors" in this prospectus supplement, the accompanying prospectus and in the documents we incorporate by reference in this prospectus supplement and the accompanying prospectus for a discussion of some of the risks and other factors you should carefully consider before deciding to invest in shares of our common stock.

In this prospectus supplement, unless otherwise indicated, the number of shares of our common stock outstanding and the other information based thereon is based on 245,154,699 shares of our common stock outstanding as of August 7, 2020, and does not reflect:

- 11.1 million shares of our common stock issuable upon settlement of the tangible equity units ("TEUs") purchase contracts outstanding as of June 30, 2020, assuming the maximum number of shares issuable upon automatic settlement of such TEU purchase contracts that are components of the TEUs; and
- 18.7 million shares of our common stock reserved for issuance upon exercise of stock options outstanding, upon vesting of our time based restricted stock units, upon vesting of our performance based restricted stock units or performance share units, as well as additional shares we may issue under our dividend reinvestment program, employee stock purchase plan or 401(k) savings plans.

RISK FACTORS

Investing in our common stock involves risks. You should review and carefully consider the risks, uncertainties and other factors described below and all of the information included elsewhere in this prospectus supplement, the accompanying prospectus, any free writing prospectus we may provide to you in connection with this offering and the documents incorporated by reference herein and therein before deciding to invest in the shares. We also urge you to consider carefully the risks, uncertainties and other factors set forth under the headings "Forward-Looking Statements" and "Market and Industry Data." However, additional risks and uncertainties not presently known to us or that we currently deem immaterial may also impair our business, operations, financial condition and financial results and the value of the shares.

Risks Related to Our Business

For a discussion of specific risks related to our business, operations, financial condition and financial results, please see the "Business," "Risk Factors," "Management's Discussion and Analysis of Financial Condition and Results of Operations" sections in our Annual Report on Form 10-K for our fiscal year ended December 31, 2019 and the "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" sections in our Quarterly Reports on Form 10-Q for the quarter ended March 31, 2020 filed with the SEC on May 8, 2020 and the quarter ended June 30, 2020 filed with the SEC on August 6, 2020, in each case, as updated by our annual, quarterly and other reports and documents we file with the SEC that are incorporated by reference in this prospectus supplement and the accompanying prospectus. See "Where You Can Find Additional Information; Incorporation of Certain Documents by Reference," in this prospectus supplement.

Risks Related to the Forward Sale Agreement

Settlement provisions contained in the forward sale agreement subject us to certain risks.

The forward purchaser will have the right to accelerate the forward sale agreement (or, in certain cases, the portion thereof that it determines is affected by the relevant event) and require us to physically settle the forward sale agreement on a date specified by the forward purchaser if:

- in the commercially reasonable judgment of the forward purchaser, it or its affiliate is unable to hedge its exposure to the transactions contemplated by the forward sale agreement because of the lack of sufficient shares of our common stock being made available for borrowing by stock lenders or it or its affiliate is unable to borrow such number of shares at a rate equal to or less than an agreed maximum stock loan rate;
- we declare any dividend, issue or distribution on shares of our common stock (i) payable in cash in excess of a specified amount or that otherwise constitutes an extraordinary dividend under the forward sale agreement, (ii) payable in securities of another company as a result of a spin-off or similar transaction, (iii) of any other type of securities (other than our common stock), rights, warrants or other assets for payment (cash or other consideration) at less than the prevailing market price, as reasonably determined by the forward purchaser or (iv) any other special dividend or distribution that is outside the normal course of our operations of normal dividend policies or practices;
- certain ownership thresholds applicable to the forward purchaser are exceeded;
- an event is announced that, if consummated, would result in an extraordinary event (as defined in the forward sale agreement) including, among other things, certain mergers and tender offers, as well as certain events such as a delisting of our common stock (each as more fully described in the forward sale agreement); or
- certain other events of default or termination events occur, including, among other things, any material misrepresentation made by us in connection with our entry into the forward sale agreement, our bankruptcy (except as described below) or certain changes in law (each as more fully described in the forward sale agreement).

The forward purchaser's decision to exercise its right to accelerate the forward sale agreement (or, in certain cases, the portion thereof that it determines is affected by the relevant event) and to require us to settle the forward sale agreement will be made irrespective of our interests, including our need for capital. In such cases, we could be required to issue and deliver shares of our common stock under the terms of the physical settlement provisions of the forward sale agreement irrespective of our capital needs, which would result in dilution to our earnings per share and may adversely affect the market price of our common stock. In addition, upon certain events of bankruptcy or insolvency related to us, the forward sale agreement will automatically terminate without further liability of either party to such agreement (other than in the event of a breach by us of certain representations or warranties contained in the forward sale agreement). Following any such termination, we would not issue any shares of common stock or receive any proceeds pursuant to the forward sale agreement.

The forward sale agreement provides for settlement on a settlement date or dates to be specified at our discretion on or prior to August 10, 2021. The forward sale agreement will be physically settled, unless we elect to settle the forward sale agreement in cash or to net share settle the forward sale agreement. If we decide to physically settle or net share settle the forward sale agreement, delivery of shares of our common stock upon any physical settlement or net share settlement of the forward sale agreement will result in dilution to our earnings per share. If we elect cash or net share settlement for all or a portion of the shares of our common stock underlying the forward sale agreement, we would expect the forward purchaser or one of its affiliates to repurchase a number of shares of our common stock equal to the portion for which we elect cash or net share settlement in order to satisfy its obligation to return the shares of our common stock the forward purchaser or its affiliate had borrowed in connection with sales of our common stock under this prospectus supplement and, if applicable in connection with net share settlement, to deliver shares of our common stock to us. If the market value of our common stock at the time of the purchase is above the forward sale price at that time, we will pay or deliver, as the case may be, to the forward purchaser under the forward sale agreement, an amount in cash, or a number of shares of our common stock with a market value, equal to such difference. Any such difference could be significant. Conversely, if the market value of our common stock at the time of such purchase is below the forward sale price at that time, the forward purchaser will pay or deliver, as the case may be, to us under the forward sale agreement, an amount in cash, or a number of shares of our common stock with a market value, equal to such difference. See "Underwriting (Conflicts of Interest)—Forward Sale Agreement" for a description of the forward sale agreement.

The forward sale price that we expect to receive upon physical settlement of the forward sale agreement is subject to adjustment on a daily basis based on a floating interest rate factor equal to the overnight bank funding rate less a spread and will be decreased based on amounts related to expected dividends on shares of our common stock during the term of the forward sale agreement. If the overnight bank funding rate is less than the spread on any day, the interest rate factor will result in a daily reduction of the forward sale price for such day. As of the date of this prospectus supplement, the overnight bank funding rate is less than the spread, and if the overnight bank funding rate remains constant or decreases prior to the settlement of the forward sale agreement, we may receive less than the initial forward sale price per share upon physical settlement of the forward sale agreement.

In addition, the purchase of shares of our common stock by the forward purchaser or its affiliate to unwind the forward purchaser's hedge position could cause the market price of our common stock to increase over time, thereby increasing the amount of cash we would owe to the forward purchaser upon a cash settlement or increasing the number of shares of our common stock we would owe to the forward purchaser upon a net share settlement, as the case may be, of the forward sale agreement, or decreasing the amount of cash that the forward purchaser would owe us upon a cash settlement or decreasing the number of shares of our common stock that the forward purchaser would owe us upon a net share settlement, as the case may be, of the forward sale agreement. We will not be able to control the manner in which the forward purchaser unwinds its hedge positions.

In certain bankruptcy or insolvency events, the forward sale agreement will automatically terminate, and we would not receive the expected proceeds from the forward sales of our common stock.

If we institute or consent to, or an appropriate regulatory or other authority institutes against us, a proceeding seeking a judgment in bankruptcy or insolvency or any other relief under any bankruptcy or insolvency law or other similar law affecting creditors' rights or if we or such authority presents a petition for our winding up or liquidation or we consent to such a petition, the forward sale agreement will automatically terminate. If the forward sale agreement so terminates, we would not be obligated to deliver to the forward purchaser any shares of our common stock not previously delivered (or for which physical settlement has not been elected), and the forward purchaser would be discharged from its obligation to pay the forward sale price per share in respect of any shares of our common stock not previously settled (or for which physical settlement has not been elected). Therefore, to the extent there are any shares of our common stock with respect to which we have not elected to physically settle under the forward sale agreement at the time of the institution of or consent to any such bankruptcy or insolvency proceedings or any such petition, we would not receive the forward sale price per share in respect of those shares of our common stock.

Risks Related to this Offering and Our Common Stock

The unaudited pro forma consolidated combined financial information and other adjusted information included or incorporated by reference in this prospectus supplement and the accompanying prospectus are presented for illustrative purposes only and do not purport to represent what the financial position or results of operations of the combined company would have been had the Peoples Acquisition been completed on the dates assumed for purposes of that information, nor do they represent the actual financial position or results of operations of the combined company following the Peoples Acquisition.

The unaudited pro forma consolidated combined financial information and other adjusted information included or incorporated by reference in this prospectus supplement and the accompanying prospectus are presented for illustrative purposes only, are based on numerous adjustments, assumptions and estimates, are subject to numerous other uncertainties and do not purport to reflect what the combined company's financial position or results of operations would have been had the Peoples Acquisition been completed as of the dates assumed for purposes of that information, nor do they reflect the financial position or results of operations of the combined company following the Peoples Acquisition. Such unaudited pro forma consolidated combined financial information and certain other adjusted information reflects the assumptions of our management at the time that such information was initially prepared.

In any event, our actual financial positions and results of operations following the Peoples Acquisition may not be consistent with, or evident from, the unaudited pro forma consolidated combined financial information or other adjusted information included or incorporated by reference in this prospectus supplement and the accompanying prospectus.

For purposes of the unaudited pro forma consolidated combined financial information as of December 31, 2019, the $3.465 billion base cash purchase price payable in connection with the Peoples Acquisition (the "Cash Acquisition Consideration") has been preliminarily allocated to the identifiable assets acquired and liabilities assumed based on limited information presently available to estimate fair values. The Cash Acquisition Consideration will be allocated among the relative fair values of the identifiable assets acquired and liabilities assumed based on their estimated fair values as of the date of the Peoples Acquisition. The relative fair values of the assets acquired and liabilities assumed are estimates, which are subject to change pending further review. The actual amounts recorded with respect to the Peoples Acquisition may differ materially from the information presented in the unaudited pro forma consolidated combined financial information.

As a result of the foregoing, investors should not place undue reliance on unaudited pro forma consolidated combined financial information and other adjusted information included or incorporated by reference in this prospectus supplement and the accompanying prospectus.

The price of our common stock may be volatile. This volatility may affect the price at which you could sell our common stock, and the sale or resale of substantial amounts of our common stock could adversely affect the market price of our common stock.

The sale or issuance of substantial amounts of our common stock, or the perception that additional sales or issuances could occur, could adversely affect the market price of our common stock, even if the business is doing well. In addition, the availability for sale of substantial amounts of our common stock could adversely impact its market price. Shares of our common stock will also be issuable upon settlement or redemption of the TEU purchase contracts and the number of shares may be substantial. The settlement rates for the TEU purchase contracts will be subject to certain anti-dilution adjustments that could increase, potentially significantly, the number of shares of our common stock issuable upon such settlement or redemption. Any of the foregoing may also impair our ability to raise additional capital through the sale of our equity securities.

Raising additional funds by issuing additional equity securities or with additional debt financing in the future may cause dilution to shareholders or restrict our operations.

We expect that we will need to raise additional capital in the future in order to, among other things, repay indebtedness and fund our operations and future acquisitions, which we may do through equity and equity-linked securities offerings or additional debt financings, as well as borrowings under our credit facilities. Additional issuances of equity securities, including shares of our common stock, or debt or other securities that are convertible into or exchangeable for, or that represent the right to receive, common stock could dilute the economic and other rights and interests of holders of shares of our common stock and cause the market price of our common stock to decline. Subject to certain exceptions, such issuances may be made without any action or approval by our shareholders.

Any new debt financing we enter into may involve covenants that restrict our operations more than our current outstanding debt and credit facilities. These restrictive covenants could include limitations on additional borrowings, and specific restrictions on the use of our assets, as well as prohibitions or limitations on our ability to create liens, pay dividends, receive distributions from our subsidiaries, redeem or repurchase our stock or make investments. These covenants could hinder our access to capital markets and limit or delay our ability to carry out our capital expenditure program.

Anti-takeover provisions in our organizational documents and under Pennsylvania law might discourage, delay or prevent changes in control of our company and may result in an entrenchment of management and diminish the value of our common stock.

Certain provisions of our articles of incorporation and bylaws could have the effect of delaying, deterring or preventing another party from acquiring or seeking to acquire control of us. These provisions are intended to discourage certain types of coercive takeover practices and inadequate takeover bids and to encourage anyone seeking to acquire control of us to negotiate first with our board of directors. However, these provisions could also delay, deter or prevent a change of control or other takeover of our company that our shareholders might consider to be in their best interests, including transactions that might result in a premium being paid over the market prices of our common stock, and may also limit the prices that investors are willing to pay in the future for our common stock. These provisions may also have the effect of preventing changes in our management.

For example, our articles of incorporation and bylaws include anti-takeover provisions that:

- authorize our board of directors, without a vote or other action by our shareholders, to cause the issuance of preferred stock in one or more series and, with respect to each series, to fix the number of shares constituting that series and to establish the rights, preferences, privileges and restrictions of that series, which may include, among other things, dividend and liquidation rights and preferences, rights to convert such shares into common stock, voting rights and other rights which may adversely affect the voting or other rights and the economic interests of holders of our common stock;

- require that certain fundamental transactions must be approved by the holders of 75% of the outstanding shares of our capital stock entitled to vote on the matter unless at least a majority of the members of the board of directors has approved the transaction, in which case the required shareholder approval will be the minimum approval required by applicable law;
- establish advance notice requirements and procedures for shareholders to submit nominations of candidates for election to our board of directors and to propose other business to be brought before a shareholders meeting;
- provide that vacancies in our board of directors, including vacancies created by the removal of any director, or any increase in the number of directors may be filled by a majority of the directors then in office or by the sole remaining director;
- provide that no shareholder may cumulate votes in the election of directors, which means that the holders of a majority of our outstanding shares of common stock can elect all directors standing for election by our common shareholders;
- require that any action to be taken by our shareholders must be taken either (1) at a duly called annual or special meeting of shareholders or (2) by the unanimous written consent of all of our shareholders; and
- require action by shareholders entitled to cast a majority of the votes which all shareholders are entitled to cast at the particular meeting in order for our shareholders to call a special meeting of shareholders.

In addition, anti-takeover provisions in Pennsylvania law could make it more difficult for a third party to acquire control of us including, but not limited to, provisions relating to (1) control share acquisitions, (2) disgorgement of profits by certain controlling persons, (3) business combination transactions with interested shareholders, and (4) the rights of shareholders to demand fair value for their stock following a control transaction. Pennsylvania law permits corporations to opt-out of these anti-takeover provisions, but we have not done so. Such provisions could have the effect of deterring takeovers or delaying changes in control or management of us. Additionally, such provisions could limit the price that some investors might be willing to pay in the future for shares of our common stock.

We may be unable to, or may choose not to, continue to pay dividends on our common stock at current or planned rates or at all.

Any future payments of cash dividends, and the amount of any cash dividends we pay, on our common stock will depend on, among other things, our financial condition, capital requirements and results of operations, and the ability of our subsidiaries to distribute cash to us, as well as other factors that our board of directors may consider relevant. If we were to reduce the amount of cash dividends per share payable on our common stock, fail to increase the amount of those cash dividends per share in the future or cease paying those cash dividends altogether, it would likely have an adverse impact on the market price of our common stock. In addition, under Pennsylvania law, our board of directors (or an authorized committee thereof) may not declare and pay dividends on shares of our common stock if, after giving effect to the dividend (1) we would be unable to pay our debts as they become due in the ordinary course of business, or (2) our total assets would be less than the sum of our total liabilities plus the amount that would be needed, if we were to be dissolved as of the date for measuring the dividend, to satisfy the preferential rights upon dissolution of shareholders whose preferential rights are superior to those receiving the dividend.

Essential Utilities' ability to pay dividends and to meet its debt obligations largely depends on the performance of its subsidiaries and the ability to utilize the cash flows from those subsidiaries.

Essential Utilities is a holding company substantially all of whose assets are owned by its subsidiaries and substantially all of whose operations are conducted through its subsidiaries. Essential Utilities' ability to pay dividends and meet its debt and other obligations depends almost entirely on cash flows from its subsidiaries and,

in the short term, its ability to raise capital from external sources. In the long term, cash flows from its subsidiaries depend on their ability to generate operating cash flows in excess of their own expenditures, common and preferred stock dividends (if any), and debt or other obligations. Its subsidiaries are separate and distinct legal entities that are not obligated to pay dividends or make loans or distributions to Essential Utilities (whether to enable Essential Utilities to pay dividends on its common stock, to pay principal and interest on its debt, to settle, repurchase or redeem its debt (including the amortizing notes components of its TEUs) or other securities (including the purchase contracts components of its TEUs)), or to satisfy its other obligations). In addition, notwithstanding its controlling interest in such subsidiaries, many of them, including certain entities of Peoples, are limited in their ability to pay dividends or make loans or distributions to Essential Utilities, including, without limitation, as a result of legislation, regulation, court order, contractual restrictions and other restrictions or in times of financial distress. As a result, Essential Utilities may not be able to cause its subsidiaries and other entities to distribute funds or provide loans sufficient to enable it to pay dividends and meet its debt and other obligations.

USE OF PROCEEDS

We will not initially receive any proceeds from the sale of the shares of our common stock offered by the forward seller in this offering, unless an event occurs that requires us to issue and sell such shares to the underwriter in lieu of the forward seller selling such shares to the underwriter as further described elsewhere in this prospectus supplement, in which case we intend to use all net proceeds we receive from any such sales for the same purposes described below.

We expect to receive net proceeds (after deducting estimated expenses) of approximately $307.5 million, subject to the price adjustment and other provisions of the forward sale agreement, in the event of full physical settlement of the forward sale agreement, which we expect to occur on or prior to August 10, 2021. For purposes of calculating the proceeds to us upon settlement of the forward sale agreement, we have assumed that the forward sale agreement is physically settled based upon the initial forward sale price of $46.00 per share on the effective date of the forward sale agreement, which will be August 11, 2020. We will not receive any proceeds under the forward sale agreement on the closing date of this offering. The actual proceeds from the forward sales are subject to the final settlement of the forward sale agreement. The forward sale price that we expect to receive upon physical settlement of the forward sale agreement is subject to adjustment on a daily basis based on a floating interest rate factor equal to the overnight bank funding rate less a spread and will be decreased based on amounts related to expected dividends on shares of our common stock during the term of the forward sale agreement, including the dividend declared on August 4, 2020 and having a record date of August 14, 2020. If the overnight bank funding rate is less than the spread on any day, the interest rate factor will result in a daily reduction of the forward sale price for such day. See “Underwriting (Conflicts of Interest)—Forward Sale Agreement” for a description of the forward sale agreement.

We currently intend to elect full physical settlement of the forward sale agreement and to use the net proceeds, if any, that we would receive upon settlement of the forward sale agreement for general corporate purposes, including for water and wastewater utility acquisitions, working capital and capital expenditures. If we elect to cash settle all or a portion of the forward sale agreement, we will not receive any proceeds from the sale of shares of our common stock related to such election of cash settlement of the forward sale agreement and we may either receive a cash payment from, or owe a cash payment to, the forward purchaser. If we elect to net share settle all or a portion of the forward sale agreement, we will not receive any proceeds from the sale of shares of our common stock related to such election, and we may either receive shares of our common stock from, or owe shares of our common stock to, the forward purchaser.

LISTING OF OUR COMMON STOCK AND DIVIDENDS

Our common stock is listed on the NYSE under the symbol “WTRG.” As of August 7, 2020, there were 245,154,699 shares of our common stock outstanding.

On August 10, 2020, the last reported sale price of our common stock on the NYSE was $47.81.

We have historically paid quarterly dividends on our common stock; however, the declaration, amount, timing and payment of any future dividends are subject to the determination and approval of our board of directors based on then-current or anticipated future conditions including our results of operations, capital requirements, financial condition, legal requirements or other factors deemed relevant by our board of directors. See “Risk Factors—Risks Related to Our Common Stock—We may be unable to, or may choose not to, continue to pay dividends on our common stock at current or planned rates or at all.”

CERTAIN UNITED STATES FEDERAL INCOME AND ESTATE TAX CONSIDERATIONS TO NON-U.S. HOLDERS

The following is a summary of certain United States federal income and estate tax consequences of the purchase, ownership and disposition of our common stock as of the date hereof. Except where noted, this summary deals only with common stock that is held as a capital asset by a non-U.S. holder (as defined below).

A "non-U.S. holder" means a beneficial owner of our common stock (other than an entity treated as a partnership for United States federal income tax purposes) that is not, for United States federal income tax purposes, any of the following:

- an individual citizen or resident of the United States;
- a corporation (or any other entity treated as a corporation for United States federal income tax purposes) created or organized in or under the laws of the United States, any state thereof or the District of Columbia;
- an estate the income of which is subject to United States federal income taxation regardless of its source; or
- a trust if it (1) is subject to the primary supervision of a court within the United States and one or more United States persons have the authority to control all substantial decisions of the trust or (2) has a valid election in effect under applicable United States Treasury regulations to be treated as a United States person.

This summary is based upon provisions of the Internal Revenue Code of 1986, as amended (the "Code"), and regulations, rulings and judicial decisions as of the date hereof. Those authorities may be changed, perhaps retroactively, so as to result in United States federal income and estate tax consequences different from those summarized below. This summary does not address all aspects of United States federal income and estate taxes and does not deal with foreign, state, local or other tax considerations that may be relevant to non-U.S. holders in light of their particular circumstances. In addition, it does not represent a detailed description of the United States federal income and estate tax consequences applicable to you if you are subject to special treatment under the United States federal income tax laws (including if you are a United States expatriate, foreign pension fund, "controlled foreign corporation," "passive foreign investment company" or a partnership or other pass-through entity for United States federal income tax purposes). We cannot assure you that a change in law will not alter significantly the tax considerations that we describe in this summary.

If a partnership (or other entity treated as a partnership for United States federal income tax purposes) holds our common stock, the tax treatment of a partner will generally depend upon the status of the partner and the activities of the partnership. If you are a partner of a partnership holding our common stock, you should consult your tax advisors.

If you are considering the purchase of our common stock, you should consult your own tax advisors concerning the particular United States federal income and estate tax consequences to you of the purchase, ownership and disposition of our common stock, as well as the consequences to you arising under other United States federal tax laws and the laws of any other taxing jurisdiction.

Dividends

In the event that we make a distribution of cash or other property (other than certain pro rata distributions of our stock) in respect of our common stock, the distribution generally will be treated as a dividend for United States federal income tax purposes to the extent it is paid from our current or accumulated earnings and profits, as determined under United States federal income tax principles. Any portion of a distribution that exceeds our current and accumulated earnings and profits generally will be treated first as a tax-free return of capital, causing

a reduction in the adjusted tax basis of a non-U.S. holder's common stock, and to the extent the amount of the distribution exceeds a non-U.S. holder's adjusted tax basis in our common stock, the excess will be treated as gain from the disposition of our common stock (the tax treatment of which is discussed below under "—Gain on Disposition of Common Stock").

Dividends paid to a non-U.S. holder generally will be subject to withholding of United States federal income tax at a 30% rate or such lower rate as may be specified by an applicable income tax treaty. However, dividends that are effectively connected with the conduct of a trade or business by the non-U.S. holder within the United States (and, if required by an applicable income tax treaty, are attributable to a United States permanent establishment) are not subject to the withholding tax, provided certain certification and disclosure requirements are satisfied. Instead, such dividends are subject to United States federal income tax on a net income basis in the same manner as if the non-U.S. holder were a United States person as defined under the Code. Any such effectively connected dividends received by a foreign corporation may be subject to an additional "branch profits tax" at a 30% rate or such lower rate as may be specified by an applicable income tax treaty.

A non-U.S. holder who wishes to claim the benefit of an applicable treaty rate and avoid backup withholding, as discussed below, for dividends will be required (a) to provide the applicable withholding agent with a properly executed Internal Revenue Service ("IRS") Form W-8BEN or Form W-8BEN-E (or other applicable form) certifying under penalty of perjury that such holder is not a United States person as defined under the Code and is eligible for treaty benefits or (b) if our common stock is held through certain foreign intermediaries, to satisfy the relevant certification requirements of applicable United States Treasury regulations. Special certification and other requirements apply to certain non-U.S. holders that are pass-through entities rather than corporations or individuals.

A non-U.S. holder eligible for a reduced rate of United States federal withholding tax pursuant to an income tax treaty may obtain a refund of any excess amounts withheld by timely filing an appropriate claim for refund with the IRS.

Gain on Disposition of Common Stock

Subject to the discussion of backup withholding below, any gain realized by a non-U.S. holder on the sale or other disposition of our common stock generally will not be subject to United States federal income tax unless:

- the gain is effectively connected with a trade or business of the non-U.S. holder in the United States (and, if required by an applicable income tax treaty, is attributable to a United States permanent establishment of the non-U.S. holder);
- the non-U.S. holder is an individual who is present in the United States for 183 days or more in the taxable year of that disposition, and certain other conditions are met; or
- we are or have been a "United States real property holding corporation" for United States federal income tax purposes and certain other conditions are met.

A non-U.S. holder described in the first bullet point immediately above will be subject to tax on the gain derived from the sale or other disposition in the same manner as if the non-U.S. holder were a United States person as defined under the Code. In addition, if any non-U.S. holder described in the first bullet point immediately above is a foreign corporation, the gain realized by such non-U.S. holder may be subject to an additional "branch profits tax" at a 30% rate or such lower rate as may be specified by an applicable income tax treaty. An individual non-U.S. holder described in the second bullet point immediately above will be subject to a 30% (or such lower rate as may be specified by an applicable income tax treaty) tax on the gain derived from the sale or other disposition, which gain may be offset by United States source capital losses even though the individual is not considered a resident of the United States.

Generally, a corporation is a "United States real property holding corporation" if the fair market value of its United States real property interests equals or exceeds 50% of the sum of the fair market value of its worldwide

real property interests and its other assets used or held for use in a trade or business (all as determined for United States federal income tax purposes). We believe we are not and do not anticipate becoming a "United States real property holding corporation" for United States federal income tax purposes. If, however, we are or become a "United States real property holding corporation," so long as our common stock is regularly traded on an established securities market during the calendar year in which the sale or other disposition occurs, only a non-U.S. holder who holds or held (at any time during the shorter of the five year period preceding the date of disposition or the holder's holding period) more than 5% of our common stock will be subject to United States federal income tax on the sale or other disposition of our common stock.

Federal Estate Tax

Common stock held by an individual non-U.S. holder at the time of death will be included in such holder's gross estate for United States federal estate tax purposes, unless an applicable estate tax treaty provides otherwise.

Information Reporting and Backup Withholding

Distributions paid to a non-U.S. holder and the amount of any tax withheld with respect to such distributions generally will be reported to the IRS. Copies of the information returns reporting such distributions and any withholding may also be made available to the tax authorities in the country in which the non-U.S. holder resides under the provisions of an applicable income tax treaty.

A non-U.S. holder will not be subject to backup withholding on dividends received if such holder certifies under penalty of perjury that it is a non-U.S. holder (and the payor does not have actual knowledge or reason to know that such holder is a United States person as defined under the Code), or such holder otherwise establishes an exemption.

Information reporting and, depending on the circumstances, backup withholding will apply to the proceeds of a sale or other disposition of our common stock made within the United States or conducted through certain United States-related financial intermediaries, unless the beneficial owner certifies under penalty of perjury that it is a non-U.S. holder (and the payor does not have actual knowledge or reason to know that the beneficial owner is a United States person as defined under the Code), or such owner otherwise establishes an exemption.

Backup withholding is not an additional tax and any amounts withheld under the backup withholding rules will be allowed as a refund or a credit against a non-U.S. holder's United States federal income tax liability provided the required information is timely furnished to the IRS.

Additional Withholding Requirements

Under Sections 1471 through 1474 of the Code (such Sections commonly referred to as "FATCA"), a 30% United States federal withholding tax may apply to any dividends paid on our common stock to (1) a "foreign financial institution" (as specifically defined in the Code) which does not provide sufficient documentation, typically on IRS Form W-8BEN-E, evidencing either (a) an exemption from FATCA, or (b) its compliance (or deemed compliance) with FATCA (which may alternatively be in the form of compliance with an intergovernmental agreement with the United States) in a manner which avoids withholding, or (2) a "non- financial foreign entity" (as specifically defined in the Code) which does not provide sufficient documentation, typically on IRS Form W-8BEN-E, evidencing either (a) an exemption from FATCA, or (b) adequate information regarding certain substantial United States beneficial owners of such entity (if any). If a dividend payment is both subject to withholding under FATCA and subject to the withholding tax discussed above under "—Dividends," the withholding under FATCA may be credited against, and therefore reduce, such other withholding tax. You should consult your own tax advisors regarding these requirements and whether they may be relevant to your ownership and disposition of our common stock.

CERTAIN ERISA CONSIDERATIONS

The following is a summary of certain considerations associated with the purchase of our common stock by (i) "employee benefit plans" within the meaning of Section 3(3) of the Employee Retirement Income Security Act of 1974, as amended ("ERISA") that are subject to Title I of ERISA, (ii) plans, individual retirement accounts and other arrangements that are subject to Section 4975 of the Code or provisions under any other federal, state, local, non-U.S. or other laws or regulations that are similar to such provisions of ERISA or the Code (collectively, "Similar Laws"), and (iii) entities which are deemed to hold the assets of any of the foregoing types of plans, accounts or arrangements (each of the foregoing described in clauses (i), (ii), and (iii) being referred to herein as a "Plan").

General fiduciary matters and prohibited transaction issues

ERISA and the Code impose certain duties on persons who are fiduciaries of a Plan subject to Title I of ERISA or Section 4975 of the Code (a "Covered Plan") and prohibit certain transactions involving the assets of a Covered Plan and its fiduciaries or other interested parties. Under ERISA and the Code, any person who exercises any discretionary authority or control over the administration of such a Covered Plan or the management or disposition of the assets of such a Covered Plan, or who renders investment advice for a fee or other compensation to such a Covered Plan, is generally considered to be a fiduciary of the Covered Plan.

Section 406 of ERISA and Section 4975 of the Code prohibit Covered Plans from engaging in specified transactions involving plan assets with persons or entities who are "parties in interest," within the meaning of ERISA, or "disqualified persons," within the meaning of Section 4975 of the Code, unless an exemption is available. The issuer and/or the underwriter, or any of their respective affiliates, may be a "party in interest" or a "disqualified person" within the meaning of ERISA and the Code. A party in interest or disqualified person who engaged in a non-exempt prohibited transaction may be subject to excise taxes and other penalties and liabilities under ERISA and the Code. In addition, the fiduciary of the Covered Plan that engaged in such a non-exempt prohibited transaction may be subject to penalties and liabilities under ERISA and the Code.

In considering an investment in our common stock with a portion of the assets of any Plan, a fiduciary should determine whether the investment is in accordance with the documents and instruments governing the Plan and the applicable provisions of ERISA, the Code or any Similar Law relating to a fiduciary's duty to the Plan, including without limitation, the prudence, diversification, delegation of control and prohibited transaction provisions of ERISA, the Code and any other applicable Similar Laws.

Government plans, foreign plans and certain church plans, while not subject to the fiduciary responsibility provisions of Title I of ERISA or the prohibited transaction provisions of Section 406 of ERISA or Section 4975 of the Code, may nevertheless be subject to Similar Laws. Fiduciaries of such Plans should consult with their counsel before acquiring shares of our common stock.

Representation

By its acceptance of our common stock, each purchaser and subsequent transferee will be deemed to have represented and warranted that either (i) no portion of the assets used by such purchaser or transferee to acquire our common stock constitutes assets of any Plan or (ii) the acquisition of our common stock by such purchaser or transferee will not constitute or result in a non-exempt prohibited transaction under Section 406 of ERISA or Section 4975 of the Code or a similar violation under any applicable Similar Laws.

The foregoing discussion is general in nature and is not intended to be all-inclusive. Due to the complexity of these rules and the penalties that may be imposed upon persons involved in non-exempt prohibited transactions, it is particularly important that fiduciaries or other persons considering purchasing our common stock on behalf of, or with the assets of, any Plan, consult with their counsel regarding the potential applicability of ERISA, Section 4975 of the Code or any Similar Law and whether an exemption would be required.

Neither this discussion nor anything provided in this prospectus is, or is intended to be, investment advice directed at any potential Plan purchasers, or at Plan purchasers generally, and such purchasers of our common stock should consult and rely on their own counsel and advisers as to whether an investment in our common stock is suitable for the Plan. The sale of our common stock to any Plan is in no respect a representation by us, an underwriter or any of our or their affiliates or representatives that such an investment meets all relevant legal requirements with respect to investments by Plans generally or any particular Plan, or that such investment is prudent or appropriate for Plans generally or any particular Plan.

UNDERWRITING (CONFLICTS OF INTEREST)

Subject to the terms and conditions stated in the underwriting agreement dated the date of this prospectus supplement, RBC Capital Markets has agreed to purchase, and the forward seller has agreed to sell to the underwriter, 6,700,000 shares of our common stock.

The underwriting agreement provides that the obligation of the underwriter to purchase the shares of our common stock included in this offering are subject to approval of certain legal matters by its counsel and to certain other customary conditions. The underwriter is obligated to purchase all of the shares of our common stock being offered pursuant to this prospectus supplement if it purchases any of such shares of our common stock. The offering of the shares of our common stock by the underwriter is subject to receipt and acceptance and to the underwriter's right to reject any order in whole or in part.

The underwriter may offer the shares from time to time to purchasers directly or through agents, or through brokers in brokerage transactions on the NYSE, in the over-the-counter market, or to dealers in negotiated transactions, or in a combination of such methods of sale or otherwise, at a fixed price or prices, which may be changed, or at market prices prevailing at the time of sale, at prices related to such prevailing market prices, or at negotiated prices. In connection with the sale of shares of our common stock, the underwriter may be deemed to have received compensation in the form of underwriting discounts. The underwriter may effect such transactions by selling shares to or through dealers, and such dealers may receive compensation in the form of discounts, concessions, or commissions from the underwriter and/or purchasers of shares for whom it may act as an agent or to whom it may sell as principal. The difference between the price at which the underwriter purchases shares and the price at which the underwriter resells such shares may be deemed underwriting compensation.

We estimate that the total expenses related to this offering will be approximately $700,000.

We have agreed to indemnify the underwriter, the forward purchaser and the forward seller against certain liabilities, including liabilities under the Securities Act, or to contribute to payments the underwriter, the forward seller or the forward purchaser may be required to make in respect of those liabilities.

Forward Sale Agreement

We have entered into a forward sale agreement on the date of this prospectus supplement with the forward purchaser, relating to 6,700,000 shares of our common stock. In connection with the execution of the forward sale agreement, and at our request, the forward seller is borrowing from third parties and selling in this offering 6,700,000 shares of our common stock.

If in the commercially reasonable judgment of the forward purchaser, it or its affiliate is unable to borrow, or it or its affiliate is unable to borrow at a stock loan rate not greater than a specified rate, and deliver for sale on the anticipated closing date, any shares of our common stock then the forward sale agreement will be terminated in its entirety. If in the commercially reasonable judgment of the forward purchaser, it or its affiliate is unable to borrow and deliver for sale on the anticipated closing date a number of shares of our common stock underlying the forward sale agreement, or it or its affiliate would be unable to borrow, at a stock loan rate not greater than a specified rate, and deliver for sale on the anticipated closing date such number of shares of our common stock, then we will issue and sell directly to the underwriter a number of shares of our common stock equal to the number of shares that the forward seller does not borrow and deliver, and the number of shares of our common stock to which the forward sale agreement relates will be reduced to the number that the forward seller can so borrow and deliver. In the event that the number of shares of our common stock to which the forward sale agreement relates is so reduced, the commitment of the underwriter to purchase shares of our common stock from the forward seller and the forward seller's obligation to borrow such shares for delivery and sale to the underwriter, as described above, will be replaced with the commitment to purchase from us and our

corresponding obligation to issue and sell directly to the underwriter all or such portion of the number of shares of our common stock not borrowed and delivered by the forward seller. In such event, we or the underwriter will have the right to postpone the closing date for up to three business days to effect any necessary changes to the documents or arrangements in connection with such closing.

We expect to receive net proceeds (after deducting estimated expenses) of approximately $307.5 million, subject to the price adjustment and other provisions of the forward sale agreement, in the event of full physical settlement of the forward sale agreement, which we expect to occur on or prior to August 10, 2021. For purposes of calculating the proceeds to us upon settlement of the forward sale agreement, we have assumed that the forward sale agreement is physically settled based upon the initial forward sale price of $46.00 per share on the effective date of the forward sale agreement, which will be August 11, 2020. We will not receive any proceeds under the forward sale agreement on the closing date of this offering. The actual proceeds from the forward sales are subject to the final settlement of the forward sale agreement. The forward sale price that we expect to receive upon physical settlement of the forward sale agreement is subject to adjustment on a daily basis based on a floating interest rate factor equal to the overnight bank funding rate less a spread and will be decreased based on amounts related to expected dividends on shares of our common stock during the term of the forward sale agreement, including the dividend declared on August 4, 2020 and having a record date of August 14, 2020. If the overnight bank funding rate is less than the spread on any day, the interest rate factor will result in a daily reduction of the forward sale price for such day.

The forward sale agreement provides for settlement on a settlement date or dates to be specified at our discretion, but which we expect to occur on or prior to August 10, 2021. On a settlement date or dates, if we decide to physically settle the forward sale agreement, we will issue shares of our common stock to the forward purchaser at the then-applicable forward sale price. The forward sale price will initially be $46.00 per share, which is the price at which the underwriter has agreed to buy the shares of common stock offered hereby. The forward sale agreement provides that the initial forward sale price will be subject to adjustment based on a floating interest rate factor equal to the overnight bank funding rate less a spread, and will be subject to decrease on each of certain dates specified in the forward sale agreement by amounts related to expected dividends on shares of our common stock during the term of the forward sale agreement. If the overnight bank funding rate is less than the spread on any day, the interest rate factor will result in a daily reduction of the forward sale price. As of the date of this prospectus supplement, the overnight bank funding rate is less than the spread, and if the overnight bank funding rate remains constant or decreases prior to the settlement of the forward sale agreement, we may receive less than the initial forward sale price per share upon physical settlement of the forward sale agreement.

Before the issuance of shares of our common stock, if any, upon settlement of the forward sale agreement, we expect that the shares issuable upon settlement of the forward sale agreement will be reflected in our diluted earnings per share calculation using the treasury stock method. Under this method, the number of shares of our common stock used in calculating diluted earnings per share is deemed to be increased by the excess, if any, of the number of shares of our common stock that would be issued upon full physical settlement of the forward sale agreement over the number of shares of common stock that could be purchased by us in the market (based on the average market price of our common stock during the applicable reporting period) using the proceeds receivable upon full physical settlement (based on the adjusted forward sale price at the end of the reporting period). Consequently, we anticipate there will be no dilutive effect on our earnings per share except during periods when the average market price of shares of our common stock is above the applicable adjusted forward sale price, which is initially $46.00 per share, subject to increase or decrease based on the overnight bank funding rate, less a spread, and subject to decrease by amounts related to expected dividends on shares of our common stock during the term of the forward sale agreement.

However, if we decide to physically settle or net share settle the forward sale agreement, delivery of shares of our common stock to the forward purchaser on any such physical settlement or net share settlement of the forward sale agreement would result in dilution to our earnings per share.

The forward purchaser will have the right to accelerate the forward sale agreement (or, in certain cases, the portion thereof that it determines is affected by the relevant event) and require us to physically settle the forward sale agreement on a date specified by the forward purchaser if:

- in the commercially reasonable judgment of the forward purchaser, it or its affiliate is unable to hedge its exposure to the transactions contemplated by the forward sale agreement because of the lack of sufficient shares of our common stock being made available for borrowing by stock lenders or it or its affiliate is unable to borrow such number of shares at a rate equal to or less than an agreed maximum stock loan rate;
- we declare any dividend, issue or distribution on shares of our common stock (i) payable in cash in excess of a specified amount or that otherwise constitutes an extraordinary dividend under the forward sale agreement, (ii) payable in securities of another company as a result of a spin-off or similar transaction, (iii) of any other type of securities (other than our common stock), rights, warrants or other assets for payment (cash or other consideration) at less than the prevailing market price, as reasonably determined by the forward purchaser or (iv) any other special dividend or distribution that is outside the normal course of our operations of normal dividend policies or practices;
- certain ownership thresholds applicable to the forward purchaser are exceeded;
- an event is announced that, if consummated, would result in an extraordinary event (as defined in the forward sale agreement) including, among other things, certain mergers and tender offers, as well as certain events such as a delisting of our common stock (each as more fully described in the forward sale agreement); or
- certain other events of default or termination events occur, including, among other things, any material misrepresentation made by us in connection with our entry into the forward sale agreement, our bankruptcy (except as described below) or certain changes in law (each as more fully described in the forward sale agreement).

The forward purchaser's decision to exercise its right to accelerate the forward sale agreement (or, in certain cases, the portion thereof that it determines is affected by the relevant event) and to require us to settle the forward sale agreement will be made irrespective of our interests, including our need for capital. In such cases, we could be required to issue and deliver shares of our common stock under the terms of the physical settlement provisions of the forward sale agreement irrespective of our capital needs, which would result in dilution to our earnings per share and may adversely affect the market price of our common stock. In addition, upon certain events of bankruptcy or insolvency related to us, the forward sale agreement will automatically terminate without further liability of either party to such agreement (other than in the event of a breach by us of certain representations or warranties contained in the forward sale agreement). Following any such termination, we would not issue any shares of common stock or receive any proceeds pursuant to the forward sale agreement.

The forward sale agreement will be physically settled, unless we elect to settle the forward sale agreement in cash or to net share settle the forward sale agreement (which we have the right to do, subject to certain conditions, other than in the limited circumstances described above). If we decide to physically settle or net share settle the forward sale agreement, delivery of shares of our common stock upon any physical settlement or net share settlement of the forward sale agreement will result in dilution to our earnings per share. If we elect cash or net share settlement for all or a portion of the shares of our common stock underlying the forward sale agreement, we would expect the forward purchaser or one of its affiliates to repurchase a number of shares of our common stock equal to the portion for which we elect cash or net share settlement in order to satisfy its obligation to return the shares of our common stock the forward purchaser or its affiliate had borrowed in connection with sales of our common stock under this prospectus supplement and, if applicable in connection with net share settlement, to deliver shares of our common stock to us. If the market value of our common stock at the time of such purchase is above the forward sale price at that time, we will pay or deliver, as the case may be, to the forward purchaser under the forward sale agreement, an amount in cash, or a number of shares of our common stock with a market value, equal to such difference. Any such difference could be significant.

Conversely, if the market value of our common stock at the time of such purchase is below the forward sale price at that time, the forward purchaser will pay or deliver, as the case may be, to us under the forward sale agreement, an amount in cash, or a number of shares of our common stock with a market value, equal to such difference.

In addition, the purchase of shares of our common stock by the forward purchaser or its affiliate to unwind the forward purchaser's hedge position could cause the market price of our common stock to increase over time, thereby increasing the amount of cash we would owe to the forward purchaser upon a cash settlement or increasing the number of shares of our common stock we would owe to the forward purchaser upon a net share settlement, as the case may be, of the forward sale agreement, or decreasing the amount of cash that the forward purchaser would owe us upon a cash settlement or decreasing the number of shares of our common stock that the forward purchaser would owe us upon a net share settlement, as the case may be, of the forward sale agreement. We will not be able to control the manner in which the forward purchaser unwinds its hedge positions.

The foregoing is a description of certain provisions, and their anticipated effects, of the forward sale agreement we have entered into in connection with this offering, a copy of which is available upon request from us at the address set forth in the section of the accompanying prospectus entitled "Where You Can Find More Information." This description of certain terms of the forward sale agreement is not complete and is subject to, and qualified in its entirety by reference to, the provisions of such agreement.

Our common stock is listed on the NYSE under the symbol "WTRG."

We and all of our continuing directors (as described in our Definitive Proxy Statement on Schedule 14A filed with the SEC on March 27, 2020) and officers, through entering into lock-up agreements, have agreed that, without the prior written consent of the underwriter, we and they will not, during the period ending 60 days after the date of this prospectus supplement (the "restricted period"): (i) offer, sell, contract to sell, pledge, grant any option to purchase, make any short sale or otherwise transfer or dispose of, directly or indirectly, our common stock, any options, rights or warrants to purchase our common stock or any securities convertible into or exchangeable for, or substantially similar to, our common stock (collectively, "restricted securities"); (ii) enter into any swap or other agreement that transfers to another, in whole or in part, any of the economic consequences of ownership of the common stock or any such other securities, whether any such transaction described in (i) or (ii) is to be settled by delivery of common stock or such other securities, in cash or otherwise or (iii) publicly disclose the intention to take any of the foregoing actions. In addition, we agreed not to file with the SEC any registration statement relating to any restricted securities, and our continuing directors and officers each agreed not to make any demand for, or exercise any right with respect to, the registration of any restricted securities, in each case during the restricted period and without the prior written consent of the underwriter.

The restrictions described in the immediately preceding paragraph do not apply to:

- the sale of the shares to the underwriter in this offering (including upon settlement of the forward sale agreement);
- the issuance by us of, or the receipt by our continuing directors and officers of, restricted securities pursuant to our existing employee equity or equity-based incentive plans, employee stock purchase plans or dividend reinvestment plans, or upon the conversion or exchange of convertible or exchangeable securities outstanding as of the date of this prospectus supplement;
- the filing by us of registration statements relating to securities issuable under our existing employee equity or equity-based plans or employee stock purchase plans;
- the issuance of shares of common stock in connection with certain investments, acquisitions, with joint ventures, commercial relationships or other strategic transactions, provided that the aggregate number of shares issued or issuable pursuant to this clause does not exceed 10% of the number of shares of common stock outstanding immediately after this offering and prior to such issuance;

- in the case of our continuing directors and officers, (i) the establishment of a trading plan pursuant to Rule 10b5-1 under the Exchange Act for the transfer of our common stock following expiration of the restricted period, (ii) transfers in accordance with the terms of existing trading plans pursuant to Rule 10b5-1 under the Exchange Act, (iii) certain transfers of shares held as of the date of this prospectus supplement through our existing 401(k) plan pursuant to portfolio balancing opportunities provided by the terms of such plan, (iv) transfers to us to satisfy certain tax obligations in connection with vesting of restricted stock units, restricted shares, performance share units or phantom shares and (v) certain other transfers to us;
- in the case of our continuing directors and officers, transfers to us upon death, disability or termination or employment, in each case, of such person;
- the receipt by us or our subsidiaries of shares (a) in the exercise of outstanding options, warrants, restricted stock units or other equity interests, including transfers deemed to occur upon the "net" or "cashless" exercise of options or (b) for the sole purpose of paying the exercise price of such options, warrants, restricted stock units or other equity interests or for paying taxes (including estimated taxes) due as a result of the exercise of such options, warrants, restricted stock units or other equity interests or as a result of the vesting of shares under restricted stock awards or restricted stock units pursuant to our existing employee benefit plans disclosed herein relating to this public offering, in each case on a "cashless" or "net exercise" basis, provided that any such shares received upon such exercise shall be subject to the terms of the lock-up agreement;
- tenders, sales or other transfers pursuant to a bona fide third-party tender offer, merger, consolidation or other similar transaction made to all holders of restricted securities involving a "change of control" of us (provided that if such transaction is not consummated, our continuing directors' and officers' shares shall remain subject to the restrictions set forth in the lock-up agreements);
- the exercise for cash of options to purchase shares disclosed as outstanding herein, provided that any such shares received upon such exercise shall be subject to the terms of the lock-up agreements;
- in the case of our continuing directors and officers, the disposition of shares acquired in this offering or in open market transactions after completion of this offering; and
- transfers of shares or other of our securities pursuant to an order of a court or regulatory agency or to comply with any regulations related to ownership by our continuing directors and officers of their shares.

The underwriter, in its sole discretion, may release the common stock and other securities subject to the lock-up agreements described above in whole or in part at any time.

In order to facilitate the offering of the shares, the underwriter may engage in transactions that stabilize, maintain or otherwise affect the price of the shares. Specifically, the underwriter may sell more shares than it is obligated to purchase under the underwriting agreement, creating a naked short position. The underwriter must close out any naked short position by purchasing shares of our common stock in the open market. A naked short position is more likely to be created if the underwriter is concerned that there may be downward pressure on the price of the shares in the open market after pricing that could adversely affect investors who purchase in this offering. As an additional means of facilitating this offering, the underwriter may bid for, and purchase, shares of our common stock in the open market to stabilize the price of the shares. These activities may raise or maintain the market price of the shares above independent market levels or prevent or retard a decline in the market price of the shares. The underwriter is not required to engage in these activities and may end any of these activities at any time.

Conflicts of Interest

The underwriter and its affiliates are full-service financial institutions engaged in various activities, which may include securities trading, commercial and investment banking, financial advisory, investment management, investment research, principal investment, hedging, financing and brokerage activities. The underwriter and its affiliates have, from time to time, performed, and may in the future perform, various financial advisory and investment banking services for us, for which they received or will receive customary fees and expenses. For example, RBC Capital Markets, LLC acted as a financial adviser in connection with the Peoples Acquisition, for which they received customary fees and expenses. The underwriter and/or its affiliates are also lenders and/or agents under certain of our credit facilities, including the Revolving Credit Facility, and receive customary fees and expenses in connection therewith.

In addition, in the ordinary course of its various business activities, the underwriter and its affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers and may at any time hold long and short positions in such securities and instruments. Such investment and securities activities may involve our securities and instruments. The underwriter and/or its affiliates have lending relationships with us and may hedge their credit exposure to us consistent with their customary risk management policies. Typically, the underwriter and its affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in our securities or the securities of our affiliates. Any such credit default swaps or short positions could adversely affect future trading prices of the shares offered hereby. The underwriter and its affiliates may also make investment recommendations or publish or express independent research views in respect of such securities or instruments and may at any time hold, or recommend to clients that they acquire, long or short positions in such securities and instruments.

All of the proceeds of this offering (excluding proceeds to us with respect to any shares of common stock that we may issue and sell directly to the underwriter in lieu of the forward seller selling our common stock to the underwriter) will be paid to the forward purchaser (or its affiliate). Because RBC Capital Markets, or its affiliate, will receive more than 5% of the net proceeds of this offering, not including underwriting compensation, RBC Capital Markets is deemed to have a conflict of interest within the meaning of FINRA Rule 5121. Accordingly, this offering will be conducted in compliance with the applicable requirements of FINRA Rule 5121. Pursuant to that rule, the appointment of a “qualified independent underwriter” is not required in connection with this offering, as the shares of our common stock have a “bona fide public market” (as such terms are defined in FINRA Rule 5121). In accordance with FINRA Rule 5121, RBC Capital Markets may not confirm any sales to any account over which it exercises discretionary authority without the prior written approval of the transaction from the account holder.

Selling Restrictions

Canada

The shares may be sold only to purchasers purchasing, or deemed to be purchasing, as principal that are accredited investors, as defined in National Instrument 45-106 Prospectus Exemptions or subsection 73.3(1) of the Securities Act (Ontario), and are permitted clients, as defined in National Instrument 31-103 Registration Requirements, Exemptions and Ongoing Registrant Obligations. Any resale of the shares must be made in accordance with an exemption from, or in a transaction not subject to, the prospectus requirements of applicable securities laws.

Securities legislation in certain provinces or territories of Canada may provide a purchaser with remedies for rescission or damages if this prospectus supplement (including any amendment thereto) contains a misrepresentation, provided that the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser’s province or territory. The purchaser should

refer to any applicable provisions of the securities legislation of the purchaser's province or territory for particulars of these rights or consult with a legal advisor.

Pursuant to section 3A.3 (or, in the case of securities issued or guaranteed by the government of a non-Canadian jurisdiction, section 3A.4) of National Instrument 33-105 Underwriting Conflicts (NI 33-105), the underwriter is not required to comply with the disclosure requirements of NI 33-105 regarding underwriter conflicts of interest in connection with this offering.

Prohibition of Sales to European Economic Area and United Kingdom Retail Investors

The shares are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area (the "EEA") or in the United Kingdom. For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, "MiFID II"); or (ii) a customer within the meaning of Directive (EU) 2016/97 (as amended or superseded, the "Insurance Distribution Directive"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in Regulation (EU) 2017/1129 (as amended or superseded, the "Prospectus Regulation"). Consequently, no key information document required by Regulation (EU) No 1286/2014 (as amended, the "PRIIPs Regulation") for offering or selling the shares or otherwise making them available to retail investors in the EEA or in the United Kingdom has been prepared and therefore offering or selling the shares or otherwise making them available to any retail investor in the EEA or in the United Kingdom may be unlawful under the PRIIPs Regulation. This prospectus supplement and the accompanying prospectus have been prepared on the basis that any offer of the shares in any Member State of the EEA or in the United Kingdom will be made pursuant to an exemption under the Prospectus Regulation from the requirement to publish a prospectus for offers of the shares. This prospectus supplement and the accompanying prospectus are not a prospectus for the purposes of the Prospectus Regulation.

United Kingdom

In addition, this document is being distributed only to, and is directed only at, and any offer subsequently made may only be directed at: (i) in the United Kingdom, persons having professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005, as amended (the "Order"), and/or persons falling within Article 49(2)(a) to (d) of the Order; (ii) persons who are outside the United Kingdom; and (iii) any other persons to whom it may otherwise lawfully be distributed (all such persons together being referred to as "relevant persons"). This document must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this document relates is available only to, and will be engaged in only with, relevant persons.

Australia

No placement document, prospectus, product disclosure statement or other disclosure document has been lodged with the Australian Securities and Investments Commission ("ASIC") in relation to the offering. This prospectus supplement, the accompanying prospectus and any other offering or marketing material relating to the shares or this offering do not constitute a prospectus, product disclosure statement or other disclosure document under the prospectus, product disclosure statement or other disclosure document under the Corporations Act 2001 (Cth) (the "Corporations Act"), and do not purport to include the information required for a prospectus, product disclosure statement or other disclosure document under the Corporations Act.

Any offer in Australia of the shares may only be made to persons (the "Exempt Investors") who are "sophisticated investors" (within the meaning of section 708(8) of the Corporations Act), "professional investors" (within the meaning of section 708(11) of the Corporations Act) or otherwise pursuant to one or more exemptions contained in section 708 of the Corporations Act so that it is lawful to offer the shares without disclosure to investors under Chapter 6D of the Corporations Act.

The shares applied for by Exempt Investors in Australia must not be offered for sale in Australia for a period of 12 months after the date of allotment under the offering, except in circumstances where disclosure to investors under Chapter 6D of the Corporations Act would not be required pursuant to an exemption under section 708 of the Corporations Act or otherwise or where the offer is pursuant to a disclosure document which complies with Chapter 6D of the Corporations Act. Any person acquiring shares must observe such Australian on-sale restrictions.

This prospectus supplement and the accompanying prospectus contain general information only and do not take account of the investment objectives, financial situation or particular needs of any particular person. They do not contain any securities recommendations or financial product advice. Before making an investment decision, investors need to consider whether the information in this prospectus supplement and the accompanying prospectus is appropriate to their needs, objectives and circumstances, and, if necessary, seek expert advice on those matters.

Hong Kong

The shares may not be offered or sold in Hong Kong by means of any document other than (i) in circumstances which do not constitute an offer to the public within the meaning of the Companies (Winding Up and Miscellaneous Provisions) Ordinance (Cap. 32, Laws of Hong Kong), or (ii) to "professional investors" within the meaning of the Securities and Futures Ordinance (Cap. 571, Laws of Hong Kong) and any rules made thereunder, or (iii) in other circumstances which do not result in the document being a "prospectus" within the meaning of the Companies Ordinance (Cap. 32, Laws of Hong Kong) and no advertisement, invitation or document relating to the shares may be issued or may be in the possession of any person for the purpose of issue (in each case whether in Hong Kong or elsewhere), which is directed at, or the contents of which are likely to be accessed or read by, the public in Hong Kong (except if permitted to do so under the laws of Hong Kong) other than with respect to shares which are or are intended to be disposed of only to persons outside Hong Kong or only to "professional investors" within the meaning of the Securities and Futures Ordinance (Cap. 571, Laws of Hong Kong) and any rules made thereunder.

Japan

The shares have not been and will not be registered under the Financial Instruments and Exchange Act of Japan (Act No. 25 of 1948, as amended) (the "FIEA"). The shares may not be offered or sold, directly or indirectly, in Japan or to or for the benefit of any resident of Japan (including any person resident in Japan or any corporation or other entity organized under the laws of Japan) or to others for reoffering or resale, directly or indirectly, in Japan or to or for the benefit of any resident of Japan, except pursuant to an exemption from the registration requirements of the FIEA and otherwise in compliance with any relevant laws, regulations and ministerial guidelines of Japan.

Korea

Neither this prospectus supplement, the accompanying prospectus nor any other offering or marketing material relating to the shares or the offering should be construed in any way as our (or any of our affiliates or agents) soliciting investment or offering to sell the shares in the Republic of Korea ("Korea"). We are not making any representation with respect to the eligibility of any recipients of this prospectus supplement, the accompanying prospectus nor any other offering or marketing material relating to the shares or the offering to acquire the shares under the laws of Korea, including, without limitation, the Financial Investment Services and Capital Markets Act (the "FSCMA"), the Foreign Exchange Transaction Act (the "FETA"), and any regulations thereunder. The shares have not been registered with the Financial Services Commission of Korea (the "FSC") in any way pursuant to the FSCMA, and the shares may not be offered, sold or delivered, or offered or sold to any person for reoffering or resale, directly or indirectly, in Korea or to any resident of Korea except pursuant to applicable laws and regulations of Korea. Furthermore, the shares may not be resold to any Korean resident

unless such Korean resident as the purchaser of the resold shares complies with all applicable regulatory requirements (including, without limitation, reporting or approval requirements under the FETA and regulations thereunder) relating to the purchase of the resold shares.

Singapore

Neither this prospectus supplement, the accompanying prospectus nor any other offering or marketing material relating to the shares or the offering has been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, neither this prospectus supplement, the accompanying prospectus nor any other offering or marketing material relating to the shares or the offering may be circulated or distributed, nor may the shares be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore, other than (a) to an institutional investor under Section 274 of the Securities and Futures Act, Chapter 289 of Singapore (the "SFA"), (b) to a relevant person, or any person pursuant to Section 275(1A), and in accordance with the conditions specified in Section 275 of the SFA or (c) pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA.

Where the shares are subscribed or purchased under Section 275 by a relevant person which is: (i) a corporation (which is not an accredited investor) the sole business of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or (ii) a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary is an accredited investor, shares, debentures and units of shares and debentures of that corporation or the beneficiaries' rights and interest in that trust shall not be transferable for six months after that corporation or that trust has acquired the shares under Section 275 except: (1) to an institutional investor under Section 274 of the SFA or to a relevant person, or any person pursuant to Section 275(1A) or Section 276(4)(i)(B), and in accordance with the conditions, specified in Section 275 of the SFA; (2) where no consideration is given for the transfer; (3) by operation of law, (4) as specified in Section 276(7) of the SFA or (5) as specified in Regulation 37A of the Securities and Futures (Offers of Investments) (Securities and Securities-based Derivatives Contracts) Regulations 2018 of Singapore.

Solely for the purposes of its obligations pursuant to sections 309B(1)(a) and 309B(1)(c) of the SFA, we have determined, and hereby notify all relevant persons (as defined in Section 309A of the SFA) that the shares are "prescribed capital markets products" (as defined in the Securities and Futures (Capital Markets Products) Regulations 2018) and Excluded Investment Products (as defined in MAS Notice SFA 04-N12: Notice on the Sale of Investment Products and MAS Notice FAA-N16: Notice on Recommendations on Investment Products).

Switzerland

The shares may not be publicly offered in Switzerland and will not be listed on the SIX Swiss Exchange ("*SIX*") or on any other exchange or regulated trading facility in Switzerland. This prospectus supplement, the accompanying prospectus and any other offering or marketing material relating to the shares or this offering do not constitute a prospectus within the meaning of and have been prepared without regard to the disclosure standards for issuance prospectuses under art. 652a or art. 1156 of the Swiss Code of Obligations or the disclosure standards for listing prospectuses under art. 27 ff. of the SIX Listing Rules or the listing rules of any other exchange or regulated trading facility in Switzerland.

Neither this prospectus supplement, the accompanying prospectus nor any other offering or marketing material relating to the shares or the offering may be publicly distributed or otherwise made publicly available in Switzerland. Neither this prospectus supplement, the accompanying prospectus nor any other offering or marketing material relating to the offering, the Company or the shares has been or will be filed with or approved by any Swiss regulatory authority. In particular, this prospectus supplement and the accompanying prospectus will not be filed with, and the offer of shares will not be supervised by, the Swiss Financial Market Supervisory Authority, and the offer of shares has not been and will not be authorized under the Swiss Federal Act on

Collective Investment Schemes (the "*CISA*"). The investor protection afforded to acquirers of interests in collective investment schemes under the CISA does not extend to acquirers of the shares.

Taiwan

The shares have not been and will not be registered or filed with, or approved by, the Financial Supervisory Commission of Taiwan and/or any other regulatory authority of Taiwan pursuant to relevant securities laws and regulations and may not be sold, issued or offered within Taiwan through a public offering or in circumstances which could constitute an offer within the meaning of the Securities and Exchange Act of Taiwan or relevant laws and regulations that require a registration, filing or approval of the Financial Supervisory Commission of Taiwan and/or other regulatory authority of Taiwan. No person or entity in Taiwan has been authorized to offer or sell the shares in Taiwan.

United Arab Emirates

The shares have not been, and are not being, publicly offered, sold, promoted or advertised in the United Arab Emirates (including the Abu Dhabi Global Market and the Dubai International Financial Centre) other than in compliance with the laws, regulations and rules of the United Arab Emirates, the Abu Dhabi Global Market and the Dubai International Financial Centre governing the issue, offering and sale of securities. Further, this prospectus supplement, the accompanying prospectus and any other offering or marketing material relating to the shares or the offering do not constitute a public offer of securities in the United Arab Emirates (including the Abu Dhabi Global Market and the Dubai International Financial Centre) and are not intended to be a public offer. This prospectus supplement, the accompanying prospectus and any other offering or marketing material relating to the shares or the offering have not been approved by or filed with the Central Bank of the United Arab Emirates, the Securities and Commodities Authority, the Financial Services Regulatory Authority or the Dubai Financial Services Authority.

LEGAL MATTERS

Certain legal matters will be passed upon for us by Simpson Thacher & Bartlett LLP, New York, New York. Ballard Spahr LLP, Philadelphia, Pennsylvania will issue an opinion regarding certain matters of Pennsylvania law, including the validity of the securities offered by the prospectus supplement. Certain legal matters will be passed upon for the underwriter by Cravath, Swaine & Moore LLP, New York, New York.

EXPERTS

The financial statements and management's assessment of the effectiveness of internal control over financial reporting (which is included in Management's Report on Internal Control over Financial Reporting) incorporated in this prospectus supplement by reference to the Annual Report on Form 10-K for the year ended December 31, 2019 have been so incorporated in reliance on the report of PricewaterhouseCoopers LLP, an independent registered public accounting firm, given on the authority of said firm as experts in auditing and accounting.

The consolidated financial statements of LDC Funding LLC as of December 31, 2019 and 2018 and for each of the three years in the period ended December 31, 2019, incorporated by reference in this prospectus supplement and in the accompanying prospectus from Essential Utilities' Current Report on Form 8-K/A filed on April 13, 2020, have been audited by Deloitte & Touche LLP, independent auditors, as stated in their report, which is incorporated by reference herein, and are incorporated in reliance upon the report of such firm given upon their authority as experts in accounting and auditing.

WHERE YOU CAN FIND ADDITIONAL INFORMATION; INCORPORATION OF CERTAIN DOCUMENTS BY REFERENCE

We file annual, quarterly and current reports, proxy statements and other information with the SEC. The SEC maintains a website at *www.sec.gov* that contains periodic and current reports, proxy and information statements, and other information regarding registrants that are filed electronically with the SEC.

These documents are also available, free of charge, through the Investors section of our website, which is located at *www.essential.co*. Information contained on our website is not incorporated by reference into this prospectus supplement or the accompanying prospectus and you should not consider information on our website to be part of this prospectus supplement or the accompanying prospectus.

We have filed with the SEC a "shelf" registration statement on Form S-3 under the Securities Act of 1933 relating to the securities that may be offered by this prospectus supplement. This prospectus supplement is a part of that registration statement, but does not contain all of the information in the registration statement. We have omitted certain parts of the registration statement in accordance with rules and regulations of the SEC. Statements made in this prospectus supplement as to the contents of any contract, agreement or other documents are not necessarily complete, and, in each instance, we refer you to a copy of such document filed as an exhibit to the registration statement, of which this prospectus supplement is a part, or otherwise filed with the SEC. For more detail about us and any securities that may be offered by this prospectus supplement, you may examine the registration statement on Form S-3 and the exhibits filed with it at the locations listed in the previous paragraph.

The SEC allows us to "incorporate by reference" into this prospectus supplement and the accompanying prospectus the information we file with them, which means that we can disclose important information to you by referring you to those documents. The information incorporated by reference is considered to be part of this prospectus supplement. When we file information with the SEC in the future, that information will automatically update and supersede this information. We incorporate by reference the documents listed below and any future

filings we will make with the SEC under Sections 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of 1934 until we sell all of the securities covered by this prospectus supplement or this offering is terminated; provided, however, that we are not incorporating, in each case, any portions of documents or information furnished or deemed to have been furnished and not filed in accordance with SEC rules:

- Our Annual Report on Form 10-K for the year ended December 31, 2019 filed with the SEC on February 28, 2020;
- Our Quarterly Reports on Form 10-Q for the quarter ended March 31, 2020 filed with the SEC on May 8, 2020 and the quarter ended June 30, 2020 filed with the SEC on August 6, 2020;
- The portions of our Definitive Proxy Statement on Schedule 14A filed with the SEC on March 27, 2020, that are incorporated by reference into our Annual Report on Form 10-K for the fiscal year ended December 31, 2019;
- Our Current Reports on Form 8-K filed with the SEC on January 16, 2020, February 3, 2020, February 27, 2020 (solely Item 8.01 and related exhibits), March 16, 2020, April 3, 2020, April 13, 2020, April 15, 2020, May 11, 2020 and May 18, 2020 and our Current Reports on Form 8-K/A filed with the SEC on March 18, 2020, April 13, 2020 and August 10, 2020, each of which amended our Current Report on Form 8-K filed with the SEC on March 16, 2020; and
- The description of our common stock set forth in our Registration Statement on Form 8-A, including any amendments or reports filed for the purpose of updating such description.

These documents contain important business and financial information about us that is not included in or delivered with this prospectus supplement. You may request a copy of any or all documents that we incorporate by reference at no cost, by writing or telephoning us at:

Essential Utilities, Inc.
762 W. Lancaster Avenue
Bryn Mawr, PA 19010-3489
Telephone: 610-527-8000
Attention: Corporate Secretary

We have not, and the underwriter and the forward seller have not, authorized anyone to provide you with any information other than that contained or incorporated by reference in this prospectus supplement, the accompanying prospectus or in any free writing prospectus we may provide to you in connection with this offering. Neither we nor the underwriter or the forward seller take any responsibility for, or provide any assurances as to the reliability of, any additional or different information that others may give you. You should assume that the information contained in this prospectus supplement, the accompanying prospectus and any free writing prospectus we may provide to you in connection with this offering is accurate only as of their respective dates or as of the respective dates specified in such information, as applicable, and the information contained in documents incorporated by reference is accurate only as of the respective dates of those documents or as of the respective dates specified in such information, as applicable, in each case regardless of the time of delivery of this prospectus supplement or the accompanying prospectus or any such free writing prospectus or any sale of the shares of our common stock. Our business, financial condition, results of operations and prospects may have changed since those dates.

Any statement contained herein or in a document incorporated or deemed to be incorporated by reference herein shall be deemed to be modified or superseded for purposes of this prospectus supplement to the extent that a statement contained herein, in any other subsequently filed document which also is or is deemed to be incorporated by reference herein or in the accompanying prospectus, modifies or supersedes such statement. Any such statement so modified or superseded shall not be deemed, except as so modified and superseded, to constitute a part of this prospectus supplement.

PROSPECTUS

AQUA AMERICA, INC.

Common Stock
Preferred Stock
Common Stock Purchase Contracts
Warrants
Units
Depositary Shares
Debt Securities

Aqua America, Inc. may, from time to time, in one or more offerings, offer and sell common stock, preferred stock, common stock purchase contracts, warrants, units, depositary shares and debt securities. The debt securities and preferred stock may be convertible into or exchangeable or exercisable for other securities. We will provide specific terms of any offering and the offered securities in supplements to this prospectus. The prospectus supplements may also add, update or change information contained in this prospectus.

We may offer and sell these securities to or through underwriters, dealers or agents, directly to purchasers or through a combination of these methods. If an offering of securities involves any underwriters, dealers or agents, then the names of the underwriters, dealers or agents and the terms of the arrangements with such entities will be stated in an accompanying prospectus supplement.

Our common stock is listed on the New York Stock Exchange under the symbol “WTR.” We have not yet determined whether any of the other securities that may be offered by this prospectus will be listed on any exchange, inter-dealer quotation system or over-the-counter market. If we decide to seek listing of any such securities upon issuance, an accompanying prospectus supplement will disclose the exchange, quotation system or market on which the securities will be listed.

The prospectus may not be used to sell our securities unless it is accompanied by a prospectus supplement.

Investing in our securities involves risk. Before you invest, you should carefully read and evaluate the risk factors and other information included in this prospectus and any applicable prospectus supplement, including the documents incorporated by reference. See “Risk Factors” beginning on page 6 of this prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The date of this prospectus is February 28, 2018.

WHERE YOU CAN FIND MORE INFORMATION	23

ABOUT THIS PROSPECTUS

This document is called a prospectus and is part of a registration statement that we filed with the Securities and Exchange Commission (SEC) using a "shelf" registration process. Under this shelf process, we may, from time to time, in one or more offering, offer and sell common stock, preferred stock, common stock purchase contracts, warrants, units, depositary shares and debt securities. This prospectus provides you with a general description of the securities we may offer. Each time we sell any securities under this prospectus, we will provide a prospectus supplement that will contain specific information about the terms of that offering and the offered securities. That prospectus supplement may include a discussion of any risk factors or other special considerations applicable to those securities. The prospectus supplement also may add, update or change information contained in this prospectus. You should read both this prospectus and the applicable prospectus supplement and the exhibits filed with our registration statement together with the additional information described below under the heading "Where You Can Find More Information" before you decide whether to invest in the securities.

The registration statement (including the exhibits) of which this prospectus is a part contains additional information about us and the securities we may offer by this prospectus. Specifically, we have filed certain legal documents that control the terms of the securities offered by this prospectus as exhibits to the registration statement. We will file certain other legal documents that will control the terms of the securities we may offer by this prospectus as exhibits to the registration statement or to reports we file with the SEC. The registration statement and the reports can be read at the SEC website or at the SEC offices mentioned under the heading "Where You Can Find More Information."

You should rely only upon the information contained in, or incorporated by reference into, this prospectus and the applicable prospectus supplement that contains specific information about the securities we are offering. We have not authorized any other person to provide you with different information. If anyone provides you with different or inconsistent information, you should not rely on it. We are not making an offer to sell these securities in any jurisdiction where the offer or sale is not permitted. You should assume that the information appearing in this document is accurate only as of the date on the front cover of this document. Our business, financial condition, results of operations and prospects may have changed since that date.

Except as otherwise provided in this prospectus, unless the context otherwise requires, references in this prospectus to "Aqua America," "we," "us" or "our" refer to Aqua America, Inc. and its direct and indirect subsidiaries. In addition, references to "Aqua Pennsylvania" refer to our wholly-owned subsidiary, Aqua Pennsylvania, Inc., and its subsidiaries.

FORWARD-LOOKING STATEMENTS

Certain statements in this prospectus, or incorporated by reference into this prospectus, are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 and are made based upon, among other things, our current assumptions, expectations, plans, and beliefs concerning future events and their potential effect on us. These forward-looking statements involve risks, uncertainties and other factors, many of which are outside our control, that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by these forward-looking statements. In some cases you can identify forward-looking statements where statements are preceded by, followed by, or include the words "believes," "expects," "anticipates," "plans," "future," "potential," "probably," "predictions," "intends," "will," "continue" or the negative of such terms or similar expressions. Forward-looking statements in this prospectus, or incorporated by reference into this prospectus, include, but are not limited to, statements regarding:

- recovery of capital expenditures and expenses in rates;

- projected capital expenditures and related funding requirements;
- our capability to pursue timely rate increase requests;
- the availability and cost of capital financing;
- developments, trends and consolidation in the water and wastewater utility and infrastructure industries;
- dividend payment projections;
- opportunities for future acquisitions, both within and outside the water and wastewater industry, the success of pending acquisitions and the impact of future acquisitions;
- the capacity of our water supplies, water facilities and wastewater facilities;
- the impact of federal and/or state tax laws or policies and the regulatory treatment of the effects of those laws or policies, including the Tax Cuts and Jobs Act;
- the impact of geographic diversity on our exposure to unusual weather;
- the impact of conservation awareness of customers and more efficient plumbing fixtures and appliances on water usage per customer;
- our authority to carry on our business without unduly burdensome restrictions;
- the continuation of investments in strategic ventures;
- our ability to obtain fair market value for condemned assets;
- the impact of fines and penalties;
- the impact of changes in and compliance with governmental laws, regulations and policies, including those dealing with taxation, the environment, health and water quality, and public utility regulation;
- the impact of decisions of governmental and regulatory bodies, including decisions to raise or lower rates;
- the development of new services and technologies by us or our competitors;
- the availability of qualified personnel;
- the condition of our assets;
- the impact of legal proceedings;
- general economic conditions;
- acquisition-related costs and synergies;
- the sale of water and wastewater divisions; and
- the amount of income tax deductions for qualifying utility asset improvements and the Internal Revenue Service’s ultimate acceptance of the deduction methodology.

Because forward-looking statements involve risks and uncertainties, there are important factors that could cause actual results to differ materially from those expressed or implied by these forward-looking statements, including but not limited to:

- changes in general economic, business, credit and financial market conditions;
- changes in governmental laws, regulations and policies, including those dealing with taxation, the environment, health and water quality, and public utility regulation;
- the profitability of future acquisitions;

- changes to the rules or our assumptions underlying our determination of what qualifies for an income tax deduction for qualifying utility asset improvements;
- the decisions of governmental and regulatory bodies, including decisions on rate increase requests;
- our ability to file rate cases on a timely basis to minimize regulatory lag;
- abnormal weather conditions, including those that result in water use restrictions;
- changes in, or unanticipated, capital requirements;
- changes in our credit rating or the market price of our common stock;
- changes in valuation of strategic ventures;
- our ability to integrate businesses, technologies or services which we may acquire;
- our ability to manage the expansion of our business;
- our ability to treat and supply water or collect and treat wastewater;
- the extent to which we are able to develop and market new and improved services;
- the effect of the loss of major customers;
- our ability to retain the services of key personnel and to hire qualified personnel as we expand;
- labor disputes;
- increasing difficulties in obtaining insurance and increased cost of insurance;
- cost overruns relating to improvements to, or the expansion of, our operations;
- increases in the costs of goods and services;
- civil disturbance or terroristic threats or acts;
- the continuous and reliable operation of our information technology systems, including the impact of cyber security attacks or other cyber-related events;
- changes in accounting pronouncements;
- litigation and claims; and
- changes in environmental conditions, including the effects of climate change.

Given these risks and uncertainties, you should not place undue reliance on any forward-looking statements. You should read this prospectus and the documents that we incorporate by reference into this prospectus completely and with the understanding that our actual future results, performance and achievements may be materially different from what we expect. These forward-looking statements represent assumptions, expectations, plans and beliefs only as of the date of this prospectus. Except for our ongoing obligations to disclose certain information under the federal securities laws, we are not obligated, and assume no obligation, to update these forward-looking statements, even though our situation may change in the future. For further information or other factors which could affect our financial results and such forward-looking statements, see “Risk Factors.” We qualify all of our forward-looking statements by these cautionary statements.

AQUA AMERICA, INC.

Aqua America, Inc. is the holding company for regulated utilities providing water or wastewater services to an estimated three million people in Pennsylvania, Ohio, Texas, Illinois, North Carolina, New Jersey, Indiana, and Virginia. Our largest operating subsidiary is Aqua Pennsylvania, Inc., which accounted for approximately

52% of our operating revenues and approximately 74% of our net income for 2017. As of December 31, 2017, Aqua Pennsylvania provided water or wastewater services to approximately one-half of the total number of people we serve. Aqua Pennsylvania's service territory is located in the suburban areas in counties north and west of the City of Philadelphia and in 27 other counties in Pennsylvania. Our other regulated utility subsidiaries provide similar services in seven other states. In addition, the Company's market-based activities are conducted through Aqua Infrastructure, LLC and Aqua Resources Inc. Aqua Infrastructure provides non-utility raw water supply services for firms in the natural gas drilling industry. Aqua Resources provides water and wastewater service through two operating and maintenance contracts with municipal authorities close to our utility companies' service territory; and offers, through a third party, water and wastewater line repair service and protection solutions to households. In 2017, we completed the sale of business units that are reported within Aqua Resources, which installed and tested devices that prevent the contamination of potable water and repaired water and wastewater systems, and repaired and performed maintenance on water and wastewater systems. Additionally, during 2016, we completed the sale of business units within Aqua Resources, which provided liquid waste hauling and disposal services and inspection, and cleaning and repair of storm and sanitary wastewater lines.

Aqua America, which prior to its name change in 2004 was known as Philadelphia Suburban Corporation, was formed in 1968 as a holding company for its primary subsidiary, Aqua Pennsylvania, formerly known as Philadelphia Suburban Water Company. In the early 1990s, we embarked on a growth through acquisition strategy focused on water and wastewater operations. Our most significant transactions to date have been the merger with Consumers Water Company in 1999, the acquisition of the regulated water and wastewater operations of AquaSource, Inc. in 2003, the acquisition of Heater Utilities, Inc. in 2004, and the acquisition of American Water Works Company, Inc.'s regulated water and wastewater operations in Ohio in 2012. Since the early 1990s, our business strategy has been primarily directed toward the regulated water and wastewater utility industry, where we have more than quadrupled the number of regulated customers we serve, and have extended our regulated operations from southeastern Pennsylvania to include our current regulated utility operations throughout Pennsylvania and in seven other states. During 2010 through 2013, we sold our utility operations in six states, pursuant to a portfolio rationalization strategy to focus our operations in areas where we have critical mass and economic growth potential. Currently, the Company seeks to acquire businesses in the U.S. regulated sector, which includes water and wastewater utilities and other regulated utilities, and to pursue growth ventures in market-based activities, such as infrastructure opportunities that are supplementary and complementary to our regulated businesses.

Our growth in revenues over the past five years is primarily a result of increases in water and wastewater rates and customer growth. The increase in our utility customer base has been due to customers added through acquisitions, partnerships with developers, and organic growth (excluding dispositions) as shown below:

Year	Utility Customer Growth Rate
2017	1.1%
2016	1.6%
2015	1.9%
2014	1.3%
2013	1.3%

In 2017, our customer count increased by 10,584 customers, primarily due to utility systems that we acquired and organic growth. Overall, for the five-year period of 2013 through 2017, our utility customer base, adjusted to exclude customers associated with utility system dispositions, increased at an annual compound rate of 1.4%. During the five-year period ended December 31, 2017, our utility customer base including customers associated with utility system acquisitions and dispositions increased from 968,357 at January 1, 2013 to 982,849 at December 31, 2017. This five-year period includes the impact of the condemnation of our Fort Wayne, IN system in 2014, which resulted in the loss of approximately 13,000 connections.

Our principal executive office is located at 762 W. Lancaster Avenue, Bryn Mawr, Pennsylvania 19010-3489, and our telephone number is 610-527-8000. Our website may be accessed at www.aquaamerica.com. The references to our website and the SEC's website are intended to be inactive textual references only, and the contents of those websites are not incorporated by reference herein and should not be considered part of this prospectus.

RISK FACTORS

Investing in our securities involves risks. Please see the risk factors described under the section captioned “Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2017, as such risk factors may be updated from time to time in filings we make with the SEC subsequent to the date hereof. Before making an investment decision, you should carefully consider these risk factors, together with all other information contained in or incorporated by reference into this prospectus or any applicable prospectus supplement (which includes information contained in certain filings we make with the SEC subsequent to the date hereof as set forth in the section below captioned “Where You Can Find More Information”). Please also refer to the section above captioned “Forward-Looking Statements.”

USE OF PROCEEDS

Unless we otherwise specify in the applicable prospectus supplement, we intend to use the net proceeds from the sale of the securities we may offer by this prospectus to fund our capital expenditures, to provide capital for our growth strategy, which includes potential future acquisitions of municipally owned and investor-owned water and wastewater systems, regulated utilities and infrastructure projects, and market-based activities complementary to our regulated business, to fund the integration of any businesses that we acquire into our existing business, and to purchase and maintain plant equipment, as well as for working capital and other general corporate purposes. Our management will have broad discretion in the allocation of net proceeds from the sale of any securities sold by us.

CERTAIN RATIOS

Our ratio of earnings to fixed charges and ratio of earnings to combined fixed charges and preferred stock dividends for the periods indicated below were as follows:

	Year Ended December 31,				
	2017	2016	2015	2014	2013
Ratio of earnings to fixed charges	3.90	4.17	4.15	4.05	3.79
Ratio of earnings to combined fixed charges and preferred stock dividends	3.90	4.17	4.15	4.05	3.79

The ratios of earnings to fixed charges and the ratios of earnings to combined fixed charges and preferred stock dividends were computed by dividing our earnings by fixed charges and by combined fixed charges and preferred stock dividends, respectively. For the purpose of these computations, earnings include the sum of income from continuing operations before income taxes and non-controlling interest, and fixed charges, less capitalized interest. Fixed charges consist of interest on all indebtedness, whether expensed or capitalized, amortization of debt expense, and the estimated interest attributable to rental and lease expense calculated using an assumed interest factor of 33% of rental and lease expense.

DESCRIPTION OF CAPITAL STOCK

As of February 13, 2018 our authorized capital stock was 301,770,819 shares, consisting of:

- 300,000,000 shares of common stock, par value $0.50 per share, of which 177,750,505 shares were outstanding; and
- 1,770,819 shares of preferred stock, par value $1.00 per share, of which no shares were outstanding.

The following summary of certain terms of our common stock and preferred stock is qualified in its entirety by the provisions of our articles of incorporation and bylaws each of which is incorporated by reference as an exhibit to the registration statement of which this prospectus constitutes a part.

Common Stock

This section describes the general terms of our common stock. For more detailed information, you should refer to our articles of incorporation and bylaws, including any amendments thereto, copies of which have been filed with the SEC. These documents are incorporated by reference into this prospectus.

Voting Rights

Holders of our common stock are entitled to one vote for each share held by them at all meetings of the shareholders and are not entitled to cumulate their votes for the election of directors.

Dividend Rights and Limitations

Holders of our common stock may receive dividends when declared by our board of directors. Because we are a holding company, the funds we use to pay any dividends on our common stock are derived predominantly from the dividends that we receive from our subsidiaries and the dividends they receive from their subsidiaries. Therefore, our ability to pay dividends to holders of our common stock depends upon our subsidiaries' earnings, financial condition and ability to pay dividends. Most of our subsidiaries are subject to regulation by state utility commissions and the amounts of their earnings and dividends are affected by the manner in which they are regulated. In addition, they are subject to restrictions on the payment of dividends contained in their various debt agreements. Under our most restrictive debt agreements, the amount available for payment of dividends to us as of December 31, 2017 was approximately $1.4 billion of Aqua Pennsylvania's retained earnings and $143 million of the retained earnings of certain other subsidiaries. Payment of dividends on our common stock is also subject to the preferential rights of the holders of any outstanding preferred stock.

Liquidation Rights

In the event that we liquidate, dissolve or wind-up, the holders of our common stock are entitled to share ratably in all of the assets that remain after we pay our liabilities. This right is subject, however, to the prior distribution rights of any outstanding preferred stock.

Preferred Stock

Our board of directors has the authority, from time to time and without further action by our shareholders, to divide our unissued capital stock into one or more classes and one or more series within any class and to make determinations of the designation and number of shares of any class or series and determinations of the voting rights, preferences, limitations and special rights, if any, of the shares of any class or series. The rights, preferences, limitations and special rights of different classes of capital stock may differ with respect to dividend rates, amounts payable on liquidation, voting rights, conversion rights, redemption provisions, sinking fund provisions and other matters. The rights, preferences, privileges and restrictions of each series may be fixed by the designations of that series set forth in either a restated version of our articles of incorporation or a certificate of designations relating to that series, which will be filed with the SEC as an exhibit to or incorporated by reference in the registration statement of which this prospectus constitutes a part.

The issuance of preferred stock may be perceived by some as possibly having the effect of delaying, deferring or preventing a change of control of us without further action by our shareholders. The issuance of preferred stock with voting and conversion rights may also adversely affect the voting power of the holders of our common stock. In certain circumstances, an issuance of preferred stock could possibly have the effect of decreasing the market price of our common stock.

Whenever preferred stock is to be sold pursuant to this prospectus, we will file a prospectus supplement relating to that sale which will specify:

- the number of shares in the series of preferred stock;

- the designation for the series of preferred stock by number, letter or title that will distinguish the series from any other series of preferred stock;
- the dividend rate, if any, and whether dividends on that series of preferred stock will be cumulative, noncumulative or partially cumulative;
- the voting rights of that series of preferred stock, if any;
- any conversion provisions applicable to that series of preferred stock;
- any redemption or sinking fund provisions applicable to that series of preferred stock;
- any preemptive rights provisions applicable to that series of preferred stock;
- the liquidation preference per share of that series of preferred stock; and
- the terms of any other preferences or rights, if any, applicable to that series of preferred stock.

Anti-Takeover Provisions

Pennsylvania State Law Provisions

Under Section 1712 of the Pennsylvania Business Corporation Law of 1988, as amended (PBCL), which is applicable to us, directors stand in a fiduciary relation to their corporation and, as such, are required to perform their duties in good faith, in a manner they reasonably believe to be in the best interests of the corporation and with such care, including reasonable inquiry, skill and diligence, as a person of ordinary prudence would use under similar circumstances. Under Section 1715 of the PBCL, in discharging their duties, directors may, in considering the best interests of their corporation, consider various constituencies, including, shareholders, employees, suppliers, customers and creditors of the corporation, and upon communities in which offices or other establishments of the corporation are located. Directors are not required to give prominent consideration to the interests of any particular constituency. Absent a breach of fiduciary duty, a lack of good faith or self-dealing, any act of the board of directors, a committee thereof or an individual director is presumed to be in the best interests of the corporation. Actions by directors relating to an acquisition or potential acquisition of control of the corporation are not subject to any greater obligation to justify, or higher burden of proof, than is applied to any other acts of directors. The PBCL expressly provides that the fiduciary duty of directors does not require them to (i) redeem or otherwise render inapplicable outstanding rights issued under any shareholder rights plan; (ii) render inapplicable the anti-takeover statutes set forth in Chapter 25 of the PBCL (described below); or (iii) take any action solely because of the effect it may have on a proposed acquisition or the consideration to be received by shareholders in such a transaction. In addition, Section 2513 of the PBCL specifically validates shareholder rights plans, or “poison pills,” and the discriminatory dilution provisions contained in such plans.

Chapter 25 of the PBCL contains several anti-takeover statutes applicable to publicly-traded corporations. Corporations may opt-out of such anti-takeover statutes under certain circumstances. We have not opted-out of any of such statutes.

Section 2538 of Subchapter 25D of the PBCL requires certain transactions with an “interested shareholder” to be approved by a majority of disinterested shareholders. “Interested shareholder” is defined broadly to include any shareholder who is a party to the transaction or who is treated differently than other shareholders and affiliates of the interested shareholder.

Subchapter 25E of the PBCL requires a person or group of persons acting in concert which acquires 20% or more of the voting shares of the corporation to offer to purchase the shares of any other shareholder at “fair value.” “Fair value” means the value not less than the highest price paid per share by the controlling person or group during the 90-day period prior to the control transaction, plus a control premium. Among other exceptions, Subchapter 25E does not apply to shares acquired directly from the corporation in a transaction exempt from the registration requirements of the Securities Act of 1933, or to a one-step merger.

Subchapter 25F of the PBCL generally establishes a 5-year moratorium on a "business combination" with an "interested shareholder." "Interested shareholder" is defined generally to be any beneficial owner of 20% or more of the corporation's voting stock or an affiliate or associate of the corporation that at any time within the prior five-year period was a beneficial owner of 20% or more of the corporation's voting stock. "Business combination" is defined broadly to include mergers, consolidations, asset sales and certain self-dealing transactions. Certain restrictions apply to business combination following the 5-year period. Among other exceptions, Subchapter 25F will be rendered inapplicable if the board of directors approves the proposed business combination, or approves the interested shareholder's acquisition of 20% of the voting shares, in either case prior to the date on which the shareholder first becomes an interested shareholder.

Subchapter 25G of the PBCL provides that "control shares" lose voting rights unless such rights are restored by the affirmative vote of a majority of (i) the disinterested shares (generally, shares held by persons other than the acquiror, executive officers of the corporation and certain employee stock plans) and (ii) the outstanding voting shares of the corporation. "Control shares" are defined as shares which, upon acquisition, will result in a person or group acquiring for the first time voting control over (a) 20%, (b) 33 1/3% or (c) 50% or more of the outstanding shares, together with shares acquired within 180 days of attaining the applicable threshold and shares purchased with the intention of attaining such threshold. A corporation may redeem control shares if the acquiring person does not request restoration of voting rights as permitted by Subchapter 25G. Among other exceptions, Subchapter 25G does not apply to a merger, consolidation or a share exchange if the corporation is a party to the transaction agreement.

Subchapter 25H of the PBCL provides in certain circumstances for the recovery by the corporation of profits realized from the sale of its stock by a controlling person or group if the sale occurs within 18 months after the controlling person or group became a controlling person or group, and the stock was acquired during such 18-month period or within 24 months before such period. A controlling person or group is a person or group that has acquired, offered to acquire, or publicly disclosed an intention to acquire 20% or more of the voting shares of the corporation or a person or group that has otherwise publicly disclosed or caused to be disclosed that it may seek to acquire control of the corporation through any means. Among other exceptions, Subchapter 25H does not apply to transactions approved by both the board of directors and the shareholders prior to the acquisition or distribution, as appropriate.

Subchapter 25I of the PBCL mandates severance compensation for eligible employees who are terminated within 24 months after the approval of a control-share acquisition. Eligible employees generally are all employees employed in Pennsylvania for at least two years prior to the control-share approval. Severance equals the weekly compensation of the employee multiplied by the employee's years of service (up to 26 years), less payments made due to the termination.

Subchapter 25J of the PBCL requires the continuation of certain labor contracts relating to business operations owned at the time of a control-share approval.

Articles of Incorporation and Bylaw Provisions

Certain provisions of our articles of incorporation and bylaws may have the effect of discouraging unilateral tender offers or other attempts to take over and acquire our business. These provisions might discourage some potentially interested purchaser from attempting a unilateral takeover bid for us on terms which some shareholders might favor. Our articles of incorporation require that certain fundamental transactions must be approved by the holders of 75% of the outstanding shares of our capital stock entitled to vote on the matter unless at least a majority of the members of the board of directors has approved the transaction, in which case the required shareholder approval will be the minimum approval required by applicable law. The fundamental transactions that are subject to this provision are those transactions that require approval by shareholders under applicable law or the articles of incorporation. These transactions include certain amendments of our articles of incorporation or bylaws, certain sales or other dispositions of our assets, certain issuances of our capital stock, or

certain transactions involving our merger, consolidation, division, reorganization, dissolution, liquidation or winding up. Our articles of incorporation and bylaws provide that:

- a special meeting of shareholders may only be called by the chairman, the president, the board of directors or shareholders entitled to cast a majority of the votes which all shareholders are entitled to cast at the particular meeting;
- nominations for election of directors may be made by any shareholder entitled to vote for election of directors if the name of the nominee and certain information relating to the nominee is filed with our corporate secretary not less than 14 days nor more than 50 days before any meeting of shareholders to elect directors; and
- certain advance notice procedures must be met for shareholder proposals to be made at annual meetings of shareholders. These advance notice procedures generally require a notice to be delivered not less than 90 days nor more than 120 days before the anniversary date of the immediately preceding annual meeting of shareholders.

Transfer Agent and Registrar

The transfer agent and registrar for our common stock is Computershare Trust Company, N.A.

DESCRIPTION OF COMMON STOCK PURCHASE CONTRACTS

We may issue stock purchase contracts, representing contracts entitling or obligating holders to purchase from us, and us to sell to the holders, a specified number of shares or amount of common stock at a future date or dates. The price per share of common stock may be fixed at the time each contract is issued or may be determined by reference to a specific formula set forth in the contract. Each common stock purchase contract may be issued separately or as a part of a unit, each consisting of a common stock purchase contract and, as security for the holder's obligation to purchase the common stock under the contract, the following:

- our senior debt securities or subordinated debt securities described under "Description of Debt Securities;"
- debt obligations of third parties, including U.S. Treasury securities;
- any other asset as security described in the applicable prospectus supplement; or
- any combination of the foregoing.

Each common stock purchase contract may require us to make periodic payments to the holder of the unit or vice versa, and such payments may be unsecured or prefunded on some basis discussed in the applicable prospectus supplement. Each common stock purchase contract may require holders to secure their obligations thereunder in a specified manner and, in certain circumstances, we may deliver a newly issued prepaid common stock purchase contract, which is referred to as a "prepaid security," upon release to a holder of any collateral securing such holder's obligations under the original contract.

The applicable prospectus supplement will describe the terms of any common stock purchase contract and, if applicable, prepaid security. The description in the prospectus supplement will not purport to be complete and will be qualified in its entirety by reference to the contracts, the collateral arrangements and depositary arrangements, if applicable, relating to such contracts and, if applicable, the prepaid securities and the documents pursuant to which such prepaid securities will be issued. The applicable prospectus supplement will also describe the material United States federal income tax considerations applicable to the common stock purchase contracts.

DESCRIPTION OF WARRANTS

General

The following summary of certain provisions of the warrants does not purport to be complete and is subject to, and qualified in its entirety by reference to, the provisions of the warrant agreement that will be filed with the SEC in connection with the offering of such warrants.

We may issue warrants for the purchase of debt securities, preferred stock or common stock. Warrants may be issued independently or together with debt securities, preferred stock or common stock offered by any prospectus supplement and may be attached to or separate from any such offered securities. Each series of warrants will be issued under a separate warrant agreement to be entered into between the Company and a bank or trust company, as warrant agent. The warrant agent will act solely as the Company's agent in connection with the warrants and will not assume any obligation or relationship of agency or trust for or with any holders or beneficial owners of warrants.

Debt Warrants

The prospectus supplement relating to a particular issue of debt warrants will describe the terms of such debt warrants, including the following: (a) the title of such debt warrants; (b) the offering price for such debt warrants, if any; (c) the aggregate number of such debt warrants; (d) the designation and terms of the debt securities purchasable upon exercise of such debt warrants; (e) if applicable, the designation and terms of the debt securities with which such debt warrants are issued and the number of such debt warrants issued with each such debt security; (f) if applicable, the date from and after which such debt warrants and any debt securities issued therewith will be separately transferable; (g) the principal amount of debt securities purchasable upon exercise of a debt warrant and the price at which such principal amount of debt securities may be purchased upon exercise (which price may be payable in cash, securities, or other property); (h) the date on which the right to exercise such debt warrants shall commence and the date on which such right shall expire; (i) if applicable, the minimum or maximum amount of such debt warrants that may be exercised at any one time; (j) whether the debt warrants represented by the debt warrant certificates or debt securities that may be issued upon exercise of the debt warrants will be issued in registered or bearer form; (k) information with respect to book-entry procedures, if any; (1) the currency or currency units in which the offering price, if any, and the exercise price are payable; (m) if applicable, a discussion of material United States federal income tax considerations; (n) the anti-dilution provisions of such debt warrants, if any; (o) the redemption or call provisions, if any, applicable to such debt warrants; (p) any provisions for changes to or adjustments in the exercise price for the debt warrants and (q) any additional terms of such debt warrants, including terms, procedures, and limitations relating to the exchange and exercise of such debt warrants.

Stock Warrants

The prospectus supplement relating to any particular issue of preferred stock warrants or common stock warrants will describe the terms of such warrants, including the following: (a) the title of such warrants; (b) the offering price for such warrants, if any; (c) the aggregate number of such warrants; (d) the designation and terms of the common stock or preferred stock purchasable upon exercise of such warrants; (e) if applicable, the designation and terms of the offered securities with which such warrants are issued and the number of such warrants issued with each such offered security; (f) if applicable, the date from and after which such warrants and any offered securities issued therewith will be separately transferable; (g) the number of shares of common stock or preferred stock purchasable upon exercise of a warrant and the price at which such shares may be purchased upon exercise; (h) the date on which the right to exercise such warrants shall commence and the date on which such right shall expire; (i) if applicable, the minimum or maximum amount of such warrants that may be exercised at any one time; (j) the currency or currency units in which the offering price, if any, and the exercise price are payable, (k) if applicable, a discussion of material United States federal income tax considerations; (l) the anti-dilution provisions of such warrants, if any; (m) the redemption or call provisions, if any, applicable

to such warrants; (m) any provisions for changes to or adjustments in the exercise price for the stock warrants and (n) any additional terms of such warrants, including terms, procedures and limitations relating to the exchange and exercise of such warrants.

DESCRIPTION OF UNITS

We may, from time to time, issue units comprised of one or more of the other securities that may be offered under this prospectus, in any combination. Each unit will be issued so that the holder of the unit is also the holder of each security included in the unit. Thus, the holder of a unit will have the rights and obligations of a holder of each included security. The unit agreement under which a unit is issued may provide that the securities included in the unit may not be held or transferred separately at any time, or at any time before a specified date.

The applicable prospectus supplement will describe the terms of any unit. The description in the prospectus supplement will not purport to be complete and will be qualified in its entirety by reference to units, the collateral arrangements and depositary arrangements, if applicable, relating to such units and, if applicable, the prepaid securities and the documents pursuant to which such prepaid securities will be issued. The applicable prospectus supplement will also describe the material United States federal income tax considerations applicable to the units.

DESCRIPTION OF DEPOSITORY SHARES

We may, at our option, offer fractional shares of our preferred stock, rather than whole shares of our preferred stock. In the event we do so, we will issue receipts for depositary shares, each of which will represent a fraction (to be set forth in the prospectus supplement relating to offering of the depositary shares) of a share of the related series of preferred stock.

The shares of our preferred stock represented by depositary shares will be deposited under a deposit agreement between us and a bank or trust company selected by us having its principal office in the United States and that meets certain other requirements. Subject to the terms of the deposit agreement, each owner of a depositary share will be entitled, in proportion to the applicable fraction of a share of preferred stock, represented by the depositary share to all of the rights and preferences of the preferred stock represented by the depositary shares (including dividend, voting, redemption, conversion and liquidation rights).

The above description of depositary shares is only a summary, is not complete and is subject to, and is qualified in its entirety by the description in the applicable prospectus supplement and the provisions of the deposit agreement, which will contain the form of depository receipt. A copy of the deposit agreement will be filed with the SEC as an exhibit to or incorporated by reference in the registration statement of which this prospectus is a part.

DESCRIPTION OF DEBT SECURITIES

Please note that in this section entitled “Description of Debt Securities,” references to “we,” “us,” “ours” or “our” refer only to Aqua America, Inc. and not to its consolidated subsidiaries. Also, in this section, references to “holders” mean those who own debt securities registered in their own names, on the books that we maintain or the trustee maintains for this purpose, and not those who own beneficial interests in debt securities registered in street name or in debt securities issued in book-entry form through one or more depositaries. Owners of beneficial interests in the debt securities should read the section below entitled “Book-Entry Procedures and Settlement.”

General

The debt securities offered by this prospectus will be our unsecured obligations, except as otherwise set forth in an accompanying prospectus supplement, and will be either senior or subordinated debt. We will issue senior debt under a senior debt indenture, and we will issue subordinated debt under a subordinated debt indenture. We sometimes refer to the senior debt indenture and the subordinated debt indenture, individually, as an indenture and, collectively, as the indentures. We have filed forms of the indentures with the SEC as exhibits to the registration statement of which this prospectus forms a part. You can obtain copies of the indentures by following the directions outlined in "Where You Can Find More Information," or by contacting the applicable indenture trustee.

A form of each debt security, reflecting the particular terms and provisions of a series of offered debt securities, will be filed with the SEC at the time of the offering and incorporated by reference as exhibits to the registration statement of which this prospectus forms a part.

The following briefly summarizes certain material provisions that may be included in the indentures. Other terms, including pricing and related terms, will be disclosed for a particular issuance in an accompanying prospectus supplement. You should read the more detailed provisions of the applicable indenture, including the defined terms, for provisions that may be important to you. You should also read the particular terms of a series of debt securities, which will be described in more detail in an accompanying prospectus supplement. So that you may easily locate the more detailed provisions, the numbers in parentheses below refer to sections in the applicable indenture or, if no indenture is specified, to sections in each of the indentures. Wherever particular sections or defined terms of the applicable indenture are referred to, such sections or defined terms are incorporated into this prospectus by reference, and the statement in this prospectus is qualified by that reference.

The trustee under each indenture will be determined at the time of issuance of debt securities, and the name of the trustee will be provided in an accompanying prospectus supplement.

The indentures provide that our senior or subordinated debt securities may be issued in one or more series, with different terms, in each case as we authorize from time to time. We also have the right to "reopen" a previous issue of a series of debt securities by issuing additional debt securities of such series without the consent of the holders of debt securities of the series being reopened or any other series. Any additional debt securities of the series being reopened will have the same ranking, interest rate, maturity and other terms as the previously issued debt securities of that series. These additional debt securities, together with the previously issued debt securities of that series, will constitute a single series of debt securities under the terms of the applicable indenture.

Types of Debt Securities

We may issue fixed or floating rate debt securities. Fixed rate debt securities will bear interest at a fixed rate described in the prospectus supplement. This type includes zero coupon debt securities, which bear no interest and are often issued at a price lower than the principal amount. United States federal income tax consequences and other special considerations applicable to any debt securities issued at a discount will be described in the applicable prospectus supplement.

Upon the request of the holder of any floating rate debt security, the calculation agent will provide the interest rate then in effect for that debt security, and, if determined, the interest rate that will become effective on the next interest reset date. The calculation agent's determination of any interest rate, and its calculation of the amount of interest for any interest period, will be final and binding in the absence of manifest error.

All percentages resulting from any interest rate calculation relating to a debt security will be rounded upward or downward, as appropriate, to the next higher or lower one hundred-thousandth of a percentage point.

All amounts used in or resulting from any calculation relating to a debt security will be rounded upward or downward, as appropriate, to the nearest cent, in the case of U.S. dollars, or to the nearest corresponding hundredth of a unit, in the case of a currency other than U.S. dollars, with one-half cent or one-half of a corresponding hundredth of a unit or more being rounded upward.

In determining the base rate that applies to a floating rate debt security during a particular interest period, the calculation agent may obtain rate quotes from various banks or dealers active in the relevant market, as described in the prospectus supplement. Those reference banks and dealers may include the calculation agent itself and its affiliates, as well as any underwriter, dealer or agent participating in the distribution of the relevant floating rate debt securities and its affiliates.

Information in the Prospectus Supplement

The prospectus supplement for any offered series of debt securities will describe the following terms, as applicable:

- the title;
- whether the debt is senior or subordinated;
- whether the debt securities are secured or unsecured and, if secured, the collateral securing the debt;
- the total principal amount offered;
- the percentage of the principal amount at which the debt securities will be sold and, if applicable, the method of determining the price;
- the maturity date or dates;
- whether the debt securities are fixed rate debt securities or floating rate debt securities;
- if the debt securities are fixed rate debt securities, the yearly rate at which the debt security will bear interest, if any, and the interest payment dates;
- if the debt security is an original issue discount debt security, the yield to maturity;
- if the debt securities are floating rate debt securities, the interest rate basis; any applicable index currency or maturity, spread or spread multiplier or initial, maximum or minimum rate; the interest reset, determination, calculation and payment dates, and the day count used to calculate interest payments for any period;
- the date or dates from which any interest will accrue, or how such date or dates will be determined, and the interest payment dates and any related record dates;
- if other than in U.S. dollars, the currency or currency unit in which payment will be made;
- the denominations in which the currency or currency unit of the securities will be issuable if other than denominations of $1,000 and integral multiples thereof;
- the terms and conditions on which the debt securities may be redeemed at our option;
- any obligation we may have to redeem, purchase or repay the debt securities at the option of a holder upon the happening of any event and the terms and conditions of redemption, purchase or repayment;
- the names and duties of the trustee and any co-trustees, depositaries, authenticating agents, calculation agents, paying agents, transfer agents or registrars for the debt securities;
- any material provisions of the applicable indenture described in this prospectus that do not apply to the debt securities;
- a discussion of United States federal income tax, accounting and special considerations, procedures and limitations with respect to the debt securities;

- whether and under what circumstances we will pay additional amounts to holders in respect of any tax assessment or government charge, and, if so, whether we will have the option to redeem the debt securities rather than pay such additional amounts; and
- any other specific terms of the debt securities that are consistent with the provisions of the indenture.

The terms on which a series of debt securities may be convertible into or exchangeable for other of our securities or any other entity will be set forth in the prospectus supplement relating to such series. Such terms will include provisions as to whether conversion or exchange is mandatory, at the option of the holder or at our option. The terms may include provisions pursuant to which the number of other securities to be received by the holders of such series of debt securities may be adjusted.

We will issue the debt securities only in registered form. As currently anticipated, debt securities of a series will trade in book-entry form, and global notes will be issued in physical (paper) form, as described below under “Book-Entry Procedures and Settlement.” Unless otherwise provided in the accompanying prospectus supplement, we will issue debt securities denominated in U.S. dollars and only in denominations of $1,000 and integral multiples thereof.

The prospectus supplement relating to offered debt securities denominated in a foreign or composite currency will specify the denomination of the offered debt securities.

The debt securities may be presented for exchange, and debt securities other than a global security may be presented for registration of transfer, at the principal corporate trust office of the trustee named in the applicable prospectus supplement. Holders will not have to pay any service charge for any registration of transfer or exchange of debt securities, but we may require payment of a sum sufficient to cover any tax or other governmental charge payable in connection with such registration of transfer (Section 3.05).

Payment and Paying Agents

Distributions on the debt securities other than those represented by global notes will be made in the designated currency against surrender of the debt securities at the principal corporate trust office of the trustee named in the applicable prospectus supplement. Payment will be made to the registered holder at the close of business on the record date for such payment. Interest payments will be made at the principal corporate trust office of the trustee named in the applicable prospectus supplement, or by a check mailed to the holder at his registered address. Payments in any other manner will be specified in the applicable prospectus supplement.

Calculation Agents

Calculations relating to floating rate debt securities and indexed debt securities will be made by the calculation agent, an institution that we appoint as our agent for this purpose. We may appoint one of our affiliates as calculation agent. We may appoint a different institution to serve as calculation agent from time to time after the original issue date of the debt security without your consent and without notifying you of the change. The initial calculation agent will be identified in the applicable prospectus supplement.

Senior Debt

We may issue senior debt securities under the senior debt indenture. Senior debt will constitute our unsecured and unsubordinated obligations and will rank on a basis equal in priority with all our other unsecured and unsubordinated debt.

Subordinated Debt

We may issue subordinated debt securities under the subordinated debt indenture. Subordinated debt will constitute our unsecured and subordinated obligations and will be junior in right of payment to our senior debt

(including senior debt securities), which is defined as "senior indebtedness" in the subordinated debt indenture (Section 16.01).

If we default in the payment of any principal of, or premium, if any, or interest on any senior debt when it becomes due and payable after any applicable grace period, then, unless and until the default is cured or waived or ceases to exist, we cannot make a payment on account of or redeem or otherwise acquire the subordinated debt securities (Section 16.04).

If there is any insolvency, bankruptcy, liquidation or other similar proceeding relating to us or our property, then all senior debt must be paid in full before any payment may be made to any holders of subordinated debt securities (Section 16.02).

Furthermore, if we default in the payment of the principal of and accrued interest on any subordinated debt securities that is declared due and payable upon an event of default under the subordinated debt indenture, holders of all our senior debt will first be entitled to receive payment in full in cash before holders of such subordinated debt can receive any payments (Section 16.03).

Except as may be otherwise set forth in an accompanying prospectus supplement, senior debt means:

- the principal, premium, if any, and interest in respect of indebtedness for money borrowed and indebtedness evidenced by securities, notes, debentures, bonds or other similar instruments issued, including, as to us, the senior debt securities;
- all capitalized lease obligations;
- all obligations representing the deferred purchase price of property; and
- all deferrals, renewals, extensions and refundings of obligations of the type referred to above (Section 1.01 of Subordinated Indenture).

However, senior debt does not include:

- the subordinated debt securities (Section 16.01 of Subordinated Indenture);
- any indebtedness that by its terms is subordinated to, or ranks in priority on an equal basis with, subordinated debt securities (Section 1.01 of Subordinated Indenture); and
- items of indebtedness (other than capitalized lease obligations) that would not appear as liabilities on a balance sheet prepared in accordance with accounting principles generally accepted in the United States of America.

Covenants

The accompanying prospectus supplement will contain any covenants applicable to the debt securities.

Modification of the Indentures

The indentures will provide that we and the relevant trustee may enter into supplemental indentures to establish the form and terms of any new series of debt securities without obtaining the consent of any holder of debt securities (Section 9.01).

We and the trustee may, with the consent of the holders of at least a majority in aggregate outstanding principal amount of the debt securities of a series, modify the applicable indenture or the rights of the holders of the securities of such series (Section 9.02).

No such modification may, without the consent of each holder of an affected security:

- extend the fixed maturity of any such security;
- reduce the rate or change the time of payment of interest on such security;
- reduce the principal amount of such securities or the premium, if any, on such security;
- change any obligation of ours to pay additional amounts with respect to such security;
- reduce the amount of the principal payable on acceleration of such security if issued originally at a discount;
- adversely affect the right of repayment or repurchase of such security at the option of the holder;
- reduce or postpone any sinking fund or similar provision with respect to such security;
- change the currency or currency unit in which such security is payable or the right of selection thereof;
- impair the right to sue for the enforcement of any payment with respect to such security on or after the maturity of such security;
- reduce the percentage of the aggregate outstanding principal amount of debt securities of the series referred to above whose holders need to consent to the modification or a waiver without the consent of such holders; or
- change any obligation of ours with respect to such security to maintain an office or agency.

Defaults

Except as may be otherwise set forth in an accompanying prospectus supplement, each indenture will provide that events of default regarding any series of debt securities will be:

- our failure to pay for 30 days required interest on any debt security of such series;
- our failure to pay principal or premium, if any, on any debt security of such series when due;
- our failure to make any required scheduled installment payment for 30 days on debt securities of such series;
- our failure to perform for 90 days after notice any other covenant in the relevant indenture other than a covenant included in the relevant indenture solely for the benefit of a series of debt securities other than such series; and
- certain events of bankruptcy or insolvency, whether voluntary or not (Section 5.01).

Except as may be otherwise set forth in an accompanying prospectus supplement, if an event of default regarding debt securities of any series issued under the indentures should occur and be continuing, either the trustee or the holders of 25% in the principal amount of outstanding debt securities of such series may declare each debt security of that series due and payable (Section 5.02). We may be required to file annually with the trustee a statement of an officer as to the fulfillment by us of our obligations under the indenture during the preceding year.

No event of default regarding one series of debt securities issued under an indenture is necessarily an event of default regarding any other series of debt securities.

Holders of a majority in aggregate principal amount of the outstanding debt securities of any series will be entitled to control certain actions of the trustee under the indentures and to waive past defaults regarding such series (Sections 5.12 and 5.13). The holders of debt securities generally will not be able to require the trustee to take any action, unless one or more of such holders provides to the trustee reasonable security or indemnity (Section 6.02).

If an event of default occurs and is continuing regarding a series of debt securities, the trustee may use any sums that it holds under the relevant indenture for its own reasonable compensation and expenses incurred prior to paying the holders of debt securities of such series (Section 5.06).

Before any holder of any series of debt securities may institute action for any remedy, except payment on such holder's debt security when due, the holders of not less than 25% in principal amount of the debt securities of that series outstanding must request the trustee to take action. Holders must also offer and give the satisfactory security and indemnity against liabilities incurred by the trustee for taking such action (Section 5.07).

Defeasance

Except as may otherwise be set forth in an accompanying prospectus supplement, after we have deposited with the trustee, cash or government securities, in trust for the benefit of the holders sufficient to pay the principal of, premium, if any, and interest on the debt securities of such series when due, and satisfied certain other conditions, including receipt of an opinion of counsel that holders will not recognize taxable gain or loss for United States federal income tax purposes, then:

- we will be deemed to have paid and satisfied our obligations on all outstanding debt securities of such series, which is known as defeasance and discharge (Section 14.02); or
- we will cease to be under any obligation, other than to pay when due the principal of, premium, if any, and interest on such debt securities, relating to the debt securities of such series, which is known as covenant defeasance (Section 14.03).

When there is a defeasance and discharge, the applicable indenture will no longer govern the debt securities of such series, we will no longer be liable for payments required by the terms of the debt securities of such series and the holders of such debt securities will be entitled only to the deposited funds. When there is a covenant defeasance, however, we will continue to be obligated to make payments when due if the deposited funds are not sufficient.

Governing Law

Unless otherwise stated in the prospectus supplement, the debt securities and the indentures will be governed by Pennsylvania law (Section 1.12).

Concerning the Trustee Under the Indentures

We may have banking and other business relationships with the trustee named in the prospectus supplement, or any subsequent trustee, in the ordinary course of business.

Form, Exchange and Transfer

We will issue debt securities only in registered form; no debt securities will be issued in bearer form (Section 2.03). We will issue each debt security in book-entry form only, unless otherwise specified in the applicable prospectus supplement. We will issue any common stock issuable upon conversion of any debt security being offered in both certificated and book-entry form, unless otherwise specified in the applicable prospectus supplement. Debt securities in book-entry form will be represented by a global security registered in the name of a depositary, which will be the holder of all the debt securities represented by the global security (Section 2.04). Those who own beneficial interests in a global security will do so through participants in the depositary's system, and the rights of these indirect owners will be governed solely by the applicable procedures of the depositary and its participants. Only the depositary will be entitled to transfer or exchange a debt security in global form, since it will be the sole holder of the debt security (Section 3.05). These book-entry securities are described below under "Book-Entry Procedures and Settlement."

If any debt securities are issued in non-global form or cease to be book-entry securities (in the circumstances described in the next section), the following will apply to them:

- The debt securities will be issued in fully registered form in denominations stated in the prospectus supplement. You may exchange debt securities for debt securities of the same series in smaller denominations or combined into fewer debt securities of the same series of larger denominations, as long as the total amount is not changed (Section 3.05).
- You may exchange, transfer, present for payment or exercise debt securities at the office of the relevant trustee or agent indicated in the prospectus supplement (Section 3.05). You may also replace lost, stolen, destroyed or mutilated debt securities at that office. We may appoint another entity to perform these functions or may perform them (Section 3.06).
- You will not be required to pay a service charge to transfer or exchange the debt securities, but you may be required to pay any tax or other governmental charge associated with the transfer or exchange (Sections 3.05 and 3.06). The transfer or exchange, and any replacement, will be made only if our transfer agent is satisfied with your proof of legal ownership. The transfer agent may also require an indemnity before replacing any debt securities (Section 3.06).
- If we have the right to redeem, accelerate or settle any debt securities before their maturity or expiration, and we exercise that right as to less than all those debt securities, we may block the transfer or exchange of those debt securities during the period beginning 15 days before the day we mail the notice of exercise and ending on the day of that mailing, in order to freeze the list of holders to prepare the mailing. We may also refuse to register transfers of or exchange any debt security selected for early settlement, except that we will continue to permit transfers and exchanges of the unsettled portion of any debt security being partially settled (Section 3.05).
- If fewer than all of the debt securities represented by a certificate that are payable or exercisable in part are presented for payment or exercise, a new certificate will be issued for the remaining amount of securities (Section 15.02).

Book-Entry Procedures and Settlement

Most offered debt securities will be book-entry (global) securities. Upon issuance, all book-entry securities will be represented by one or more fully registered global securities, without coupons (Section 3.02). Each global security will be deposited with, or on behalf of, The Depository Trust Company, or DTC, a securities depository, and will be registered in the name of DTC or a nominee of DTC (Section 3.01). DTC will thus be the only registered holder of these debt securities.

Purchasers of debt securities may only hold interests in the global notes through DTC if they are participants in the DTC system. Purchasers may also hold interests through a securities intermediary—banks, brokerage houses and other institutions that maintain securities accounts for customers—that has an account with DTC or its nominee. DTC will maintain accounts showing the security holdings of its participants, and these participants will in turn maintain accounts showing the security holdings of their customers. Some of these customers may themselves be securities intermediaries holding securities for their customers. Thus, each beneficial owner of a book-entry security will hold that debt security indirectly through a hierarchy of intermediaries, with DTC at the top and the beneficial owner's own securities intermediary at the bottom.

The debt securities of each beneficial owner of a book-entry security will be evidenced solely by entries on the books of the beneficial owner's securities intermediary. The actual purchaser of the debt securities will generally not be entitled to have the debt securities represented by the global securities registered in its name and will not be considered the owner under the declaration. In most cases, a beneficial owner will also not be able to obtain a paper certificate evidencing the holder's ownership of debt securities. The book-entry system for holding securities eliminates the need for physical movement of certificates and is the system through which most

publicly traded common stock is held in the United States. However, the laws of some jurisdictions require some purchasers of securities to take physical delivery of their securities in definitive form. These laws may impair the ability to transfer book-entry securities.

A beneficial owner of book-entry securities represented by a global security may exchange the securities for definitive (paper) securities only if:

- DTC is unwilling or unable to continue as depositary for such global security and we do not appoint a qualified replacement for DTC within 90 days; or
- We in our sole discretion decide to allow some or all book-entry securities to be exchangeable for definitive securities in registered form (Section 3.05).

Unless we indicate otherwise, any global security that is exchangeable will be exchangeable in whole for definitive securities in registered form, with the same terms and of an equal aggregate principal amount. Definitive securities will be registered in the name or names of the person or persons specified by DTC in a written instruction to the registrar of the securities (Section 3.05). DTC may base its written instruction upon directions that it receives from its participants.

In this prospectus, for book-entry securities, references to actions taken by security holders will mean actions taken by DTC upon instructions from its participants, and references to payments and notices of redemption to security holders will mean payments and notices of redemption to DTC as the registered holder of the securities for distribution to participants in accordance with DTC's procedures.

DTC is a limited purpose trust company organized under the laws of the State of New York, a member of the Federal Reserve System, a clearing corporation within the meaning of the New York Uniform Commercial Code and a clearing agency registered under section 17A of the Securities Exchange Act of 1934. The rules applicable to DTC and its participants are on file with the SEC.

We will not have any responsibility or liability for any aspect of the records relating to, or payments made on account of, beneficial ownership interest in the book-entry securities or for maintaining, supervising or reviewing any records relating to the beneficial ownership interests.

PLAN OF DISTRIBUTION

We may sell any of the securities being offered by this prospectus separately or together:

- through agents;
- to or through underwriters who may act directly or through a syndicate represented by one or more managing underwriters;
- through dealers;
- through a block trade in which the broker or dealer engaged to handle the block trade will attempt to sell the securities as agent, but may position and resell a portion of the block as principal to facilitate the transaction;
- through "at the market" offerings, within the meaning of Rule 415(a)(4) of the Securities Act of 1933, to or through a market maker or into an existing trading market on an exchange or otherwise;
- in exchange for our outstanding indebtedness;
- directly to purchasers, through a specific bidding, auction or other process; or
- through a combination of any of these methods of sale.

If the securities offered under this prospectus are issued in exchange for our outstanding securities, the applicable prospectus supplement will describe the terms of the exchange, and the identity and the terms of sale of the securities offered under this prospectus by the selling security holders.

The distribution of securities may be effected from time to time in one or more transactions at a fixed price or prices that may be changed, at market prices prevailing at the time of sale or prices related to prevailing market prices or at negotiated prices.

Agents designated by us from time to time may solicit offers to purchase the securities. We will name any agent involved in the offer or sale of the securities and set forth any commissions payable by us to an agent in the prospectus supplement for that transaction. Unless otherwise indicated in the prospectus supplement, any agent will be acting on a best efforts basis for the period of its appointment. Any agent may be deemed to be an "underwriter" of the securities as that term is defined in the Securities Act of 1933.

If we utilize an underwriter or underwriters in the sale of securities, we will execute an underwriting agreement with the underwriter or underwriters at the time we reach an agreement for sale. We will set forth in the prospectus supplement the names of the specific managing underwriter or underwriters, as well as any other underwriters, and the terms of the transactions, including compensation of the underwriters and dealers. This compensation may be in the form of discounts, concessions or commissions. Underwriters and others participating in any offering of securities may engage in transactions that stabilize, maintain or otherwise affect the price of securities. We will describe any of these activities in the prospectus supplement.

If a dealer is utilized in the sale of the securities, we or an underwriter will sell securities to the dealer, as principal. The dealer may then resell the securities to the public at varying prices to be determined by the dealer at the time of resale. The prospectus supplement will set forth the name of the dealer and the terms of the transactions.

We may directly solicit offers to purchase the securities, and we may sell directly to institutional investors or others. These persons may be deemed to be underwriters within the meaning of the Securities Act of 1933 with respect to any resale of the securities. The prospectus supplement will describe the terms of any direct sales, including the terms of any bidding or auction process, if utilized.

Agreements we enter into with agents, underwriters and dealers may entitle them to indemnification by us against specified liabilities, including liabilities under the Securities Act of 1933, or to contribution by us to payments they may be required to make in respect of these liabilities. The prospectus supplement will describe the terms and conditions of indemnification or contribution.

Certain of the agents, underwriters and dealers that we sell the securities offered under this prospectus to or through, and certain of their affiliates, engage in transactions with and perform services for us in the ordinary course of business. We may enter into hedging transactions in connection with any particular issue of the securities offered under this prospectus, including forwards, futures, options, interest rate or exchange rate swaps and repurchase or reverse repurchase transactions with, or arranged by, the applicable agent, underwriter or dealer, an affiliate of that agent, underwriter or dealer or an unrelated entity. We, the applicable agent, underwriter or dealer or other parties may receive compensation, trading gain or other benefits in connection with these transactions. We are not required to engage in any of these transactions. If we commence these transactions, we may discontinue them at any time. Counterparties to these hedging activities also may engage in market transactions involving the securities offered under this prospectus.

No securities may be sold under this prospectus without delivery (in paper format, in electronic format, in electronic format on the Internet, or by other means) of the applicable prospectus supplement describing the method and terms of the offering.

LEGAL MATTERS

Unless otherwise indicated in the applicable prospectus supplement, the validity of the securities that may be offered hereby will be passed upon for us by Ballard Spahr LLP, Philadelphia, Pennsylvania. If legal matters in connection with the offering made by this prospectus are passed on by counsel for the underwriters, dealers or agents, if any, that counsel will be named in the applicable prospectus supplement.

EXPERTS

The financial statements and management's assessment of the effectiveness of internal control over financial reporting (which is included in Management's Report on Internal Control over Financial Reporting) incorporated in this Prospectus by reference to the Annual Report on Form 10-K for the year ended December 31, 2017, have been so incorporated in reliance on the report of PricewaterhouseCoopers LLP, an independent registered public accounting firm, given on the authority of said firm as experts in auditing and accounting.

WHERE YOU CAN FIND MORE INFORMATION

We file annual, quarterly and current reports, proxy statements and other information with the SEC. You may read and copy any document we file at the SEC's Public Reference Room at 100 F Street N.E., Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for further information on the Public Reference Room. You may also obtain our SEC filings from the SEC's website at www.sec.gov or from our website at http://ir.aquaamerica.com/.

We have filed with the SEC a "shelf" registration statement on Form S-3 under the Securities Act of 1933 relating to the securities that may be offered by this prospectus. This prospectus is a part of that registration statement, but does not contain all of the information in the registration statement. We have omitted certain parts of the registration statement in accordance with rules and regulations of the SEC. Statements made in this prospectus as to the contents of any contract, agreement or other documents are not necessarily complete, and, in each instance, we refer you to a copy of such document filed as an exhibit to the registration statement, of which this prospectus is a part, or otherwise filed with the SEC. For more detail about us and any securities that may be offered by this prospectus, you may examine the registration statement on Form S-3 and the exhibits filed with it at the locations listed in the previous paragraph.

The SEC allows us to "incorporate by reference" the information we file with them, which means that we can disclose important information to you by referring you to those documents. The information incorporated by reference is considered to be part of this prospectus. When we file information with the SEC in the future, that information will automatically update and supersede this information. We incorporate by reference the documents listed below and any future filings we will make with the SEC under Sections 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of 1934 until we sell all of the securities covered by this prospectus; provided, however, that we are not incorporating, in each case, any documents or information deemed to have been furnished and not filed in accordance with SEC rules:

- Our Annual Report on Form 10-K for the year ended December 31, 2017 filed with the SEC on February 28, 2018; and
- The description of our common stock set forth in our Registration Statement on Form 8-A, including any amendments or reports filed for the purpose of updating such description.

These documents contain important business and financial information about us that is not included in or delivered with this prospectus. You may request a copy of any or all documents that we incorporate by reference at no cost, by writing or telephoning us at:

Aqua America, Inc.

TABLE OF CONTENTS TO MINIMUM FILING REQUIREMENTS
H. RATE STRUCTURE & COST OF SERVICE

MFR	Description
RS1	Cost Of Service
RS2	Special Rate Contracts

AQUA PENNSYLVANIA, INC.
2024 RATE CASE
FILING REQUIREMENTS

H. Rate Structure & Cost of Service

RS1. Provide a listing of negotiated special rate contracts which includes a comparison of revenues under special rate contracts and under tariff rates. Provide the cost of service treatment of any deficiency in revenues resulting from the negotiated special rate contracts. Special rates are defined as rates not contained in the currently effective tariff.

a. A description of the allocation methods used. A comparison of the allocated cost of service by class with the present and proposed revenues. A cost of service schedule showing the rate of return produced by present and proposed rates by class of service.

b. Indicate if the method used for establishing the allocation factors in the cost of service study deviates from the previous study submitted in the last rate case. If yes, indicate which allocation factors were changed and discuss the reason for the changes.

c. Supply the average day, the maximum day and the maximum hour deliveries to the system adjusted for storage for the historic test year and 2 prior years. Also provide workpapers, analyses, comparative data or other documentation supporting the estimated maximum day and peak hour demands by customer class reflected in the company's cost of service study.

d. Explain thoroughly the methodology employed if the company distinguishes between transmission and distribution or collection mains in its allocation of costs.

e. Provide a detailed explanation of how storage is utilized to meet base, maximum day and maximum hour demands.

f. Provide workpapers, calculations and supporting documentation which develop the equivalent meters and equivalent service line weights reflected in the company's cost of service study.

g. Provide all workpapers and supporting documentation for the fire flow requirement and duration utilized in the cost of service study.

h. Provide a breakdown of the number and size of private fire services according to the general water service class of customer.

i. Provide a calculation of the company's base cost of water or wastewater per unit of consumption or usage.

j. Provide a detailed cost analysis that supports the company's customer charges, by meter size, showing all direct and indirect costs included.

A. Please refer to the direct testimonies of Gregory R. Herbert and Constance E. Heppenstall and the accompanying Exhibit 5-A, Appendix A for water, and Exhibit 5-B, Appendix A for wastewater for the above cost of service study filing requirements including the details requested in items (a) through (j).
