Re: Pike County Power and Light rate increase request

R-2024-3052357

I am a customer of The Pike County Power and Light Company and it is requesting a gas rate increase to the tune of a 44% increase as of October, 2025. Now this is utterly ridiculous! My income cannot support an increase—let alone one of this magnitude. I would think that management could figure out a way to be more efficient within the company. And one must wonder what the “higher ups” in the company make in their salaries. There is probably a lot of waste in the company. For instance, are there workers sitting in their idling trucks waiting for the next job to go to? PCLP should tighten its belt!!!

I would like you to really examine why this company needs an increase.
