EXHIBIT B

Property Owner Agreement for Lead Service Line Replacement

PROPERTY OWNER AGREEMENT FOR LEAD SERVICE LINE REPLACEMENT

Hanover Municipal Water Works ("HMWW"), as part of its approved Lead Service Line Replacement Program ("LSLR Program") is offering replacement of qualifying Owners' owned Lead Service Line ("LSL") connected to HMWW's System at no cost.

_____ ("Owner") _____ ("Property")
Print Name *Print Address*

Owner or Owner's legal representative, must provide authorization and consent to participate in the LSLR Program by signing this Agreement. HMWW will not replace Owner's LSL without this signed Agreement in place. Declining to participate in the LSLR Program means that HMWW **will not** replace your LSL at no cost. Owner's continued use of LSLs could have harmful effects. An informational form regarding such harmful effects is appended to this Agreement.

Should Owner refuse to enter into this Agreement, Owner understands the requirement to replace the LSL within 1 year from the commencement date, and further, that failure to do so will lead to termination of service under the provisions of HMWW's tariff.

Owner understands that any approved LSL replacement pursuant to HMWW's LSLR Program does not affect continuing ownership and maintenance responsibilities. Following completion of the replacement line, Owner shall remain responsible for all ownership and maintenance of lateral service lines consistent with HMWW's Rules and Regulations.

HMWW, its employees, agents, contractors, and subcontractors, are permitted to access Owner's Property to perform the work associated with the LSL replacement ("Work"). The Work includes: (1) Accessing the water meter on the Property; (2) Shutting off water service; (3) Removing and replacing Owner's existing LSL; (4) Connecting the new service line to HMWW's System and associated testing; and (5) Reasonably restoring Owner's Property to as nearly as practicable its former condition, which shall not include damage to trees or landscaping.

In consideration for performing the Work at HMWW's cost, Owner agrees to indemnify, release and hold harmless HMWW, its employees, agents, contractors, and subcontractors from and against all claims, liability and costs ("Claims") resulting from acts and omissions of HMWW in performing the Work. Notwithstanding the foregoing, HMWW's liability in any event is limited to the cost of repairing or replacing the LSL.

BUREAU OF SAFE DRINKING WATER

CONSUMER NOTIFICATION OF A LEAD STATUS UNKNOWN SERVICE LINE

November 15, 2024

Dear Water Customer,

Hanover Municipal Water Works would like to inform you that the material of the water service line to your property has yet to be determined. **If you are a landlord and own multiple properties or a building with multiple units contained therein, this letter serves as notice to those properties and/or units as well and it is your responsibility to provide a copy of this notification to your individual tenants / owners.** Please note this is for water service lines serviced by Hanover Municipal Water Works only. Subsequently, the service line has been classified as Lead Status Unknown. This means that all or a portion of the service line may be made of lead or galvanized piping requiring replacement. Water supplied through a service line of unknown material has the potential to increase your risk of exposure to lead. For further information regarding your service line, our service line inventory is accessible at the Hanover Borough Municipal Website located under "*Departments – Water Resources - Water Distribution Systems*" (Note: Lead Service mapping dashboard is currently under final development and will be operational 1Q 2025).

What is a Service Line?

A service line is the piping that connects your household or building plumbing to the water main in the street. Ownership varies by water system but is typically split between the water system and the customer. Hanover Municipal Water Works owns the section of the service line from the Water Main to the curb stop / curb box, while the section from the curb stop / curb box to the water meter is owned by the customer.

How Can I Determine My Service Line Material?

Hanover Municipal Water Works is continuing service line identification and replacement. If your service line is found to contain lead or galvanized piping requiring replacement, you will receive a separate notice with information about service line replacement and financing opportunities. A link is provided on the Hanover Borough municipal website with instructions for self-identification and/or request for assistance.

What are the Health Effects of Lead?

Exposure to lead in drinking water can cause serious health effects in all age groups. Infants and children can have decreases in IQ and attention span. Lead exposure can lead to new learning and behavior problems or exacerbate existing learning and behavior problems. The children of women who are exposed to lead before or during pregnancy can have increased risk of these adverse health effects. Adults can have increased risks of heart disease, high blood pressure, kidney, or nervous system problems.

What Can I do to Reduce Exposure to Lead in Drinking Water?

- **Run your water to flush out lead.** If the water has not been used for several hours, run the water for 15-30 seconds to flush lead from interior plumbing or run the water until it becomes cold or reaches a steady temperature before using it for drinking or cooking. Only use cold water for drinking and cooking.
- **Do NOT use water from the hot water tap to make baby formula.**
- **Do NOT boil water to remove lead. Boiling water will not reduce lead.**
- **Look for alternative sources or treatment of water, such as use of a pitcher filter that is certified to remove lead and replace the cartridges on a routine frequency or use bottled water.**
- **Identify and replace premise plumbing fixtures containing lead.** Brass faucets, fittings, and valves, including those advertised as "lead free" installed prior to 2014, may contribute lead to drinking water because the law allowed fixtures with up to 8% lead to be labeled as lead free.
- **Regularly clean your aerators/screens on plumbing fixtures.** Sediment, debris, and lead particles can collect in your aerator. If lead particles are caught in the aerator, lead can get into your water.

For more information, call us at 717-637-3877, or visit our website at www.hanoverboroughpa.gov. For more information on reducing lead exposure around your home/building and the health effects of lead, visit EPA's website at http://www.epa.gov/lead or contact your health care provider.

Sincerely,

Hanover Municipal Water Works
Hanover Department of Water Resources – Water Distribution Systems Division

228 High Street
Hanover, PA 17331

Hanover Borough Lead Survey

Welcome!

Thank you for being a Partner in Progress!

As a reminder from our recent newsletter, the Water Resources Department is conducting a lead service line inventory to ensure a safe and healthy water supply for our community. Your participation is critical to this effort!

This short survey will ask you a few questions about the water service line entering your home. By taking just a few minutes to complete it, you'll be playing a vital role in expediting the identification of lead service lines and prioritizing replacement efforts.

Let's work together for a lead-free future!

Department of Water Resources

Thank you in advance for being a Partner in Progress!

Scan the code for the lead service line inventory.

The Borough of Hanover recently shared our commitment to a safe and lead-free water system in our newsletter, "Protecting Our Pipes, Protecting Our Health: Lead Service Line Inventory." Now, we're reaching out directly to you with actionable steps you can take to help us achieve that goal.

The Water Resources Department is conducting a lead service line inventory for our side of each water service, to identify and prioritize replacements. We have been busy doing research, interviews and field investigations. In some cases, we have also been making replacements. As part of that effort, we are now seeking your help by completing our online survey: HERE (It is also available at https://survey123.arcgis.com/share/a669752644f74941a47ffd2ba94e64b8.)

Specifically, we need your help to map the location and material for your water service line (known as "Customer side"). This information is crucial for prioritizing replacement efforts and for controlling operational costs. If your home was built before 1986, there's a higher chance of you having a lead service line. In order to pursue federal and state funds, to offset the cost to replace lead services, we need to be able to show an accurate accounting of where the lead services reside.

Visit our website: https://www.HanoverBoroughPA.gov/ to learn more about lead service lines and our efforts to locate them.

Safeguarding Our Water: Lead Service Line Inventory Update

Protecting Residents from Lead Exposure
As part of our commitment to providing safe drinking water, the Borough of Hanover Department of Water Resources is conducting a lead service line inventory. This crucial project identifies and locates any lead pipes that may still be present in our system.

Why does this matter?
Prior to 1986, lead was commonly used in plumbing materials. These pipes can leach lead into drinking water, especially when disturbed or corroded, posing a health risk, particularly for young children.

What are we doing?
Data Dive: Historical records, permits, and drawings are being reviewed to map existing service line materials.
Fieldwork Underway: Our team is systematically visiting properties and visually assessing accessible points like water meter boxes.
Tech Solutions: We're utilizing cutting-edge Geographic Information Systems (GIS) to map and analyze the water system.

What's next?
Once the inventory is complete, we'll prioritize lead service line replacement, starting with those posing the highest risk.

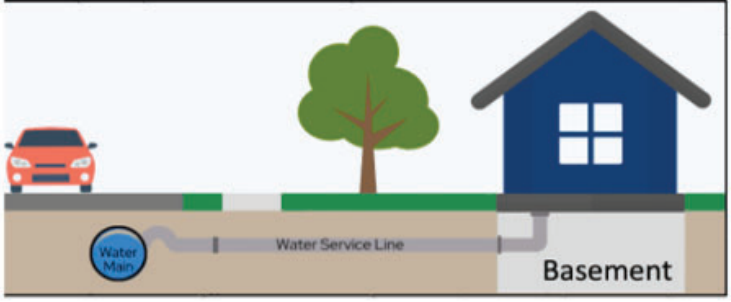
Your Role as a Property Owner
Survey participation: Watch for your invitation to complete a brief online survey about your water service line material. If your home was built before 1986, there's a higher chance of lead presence.
Stay Informed: Visit the Borough website or social media pages for updates and resources on the project.
Together, we can ensure a safe and healthy water supply for our community. Let's protect our pipes and protect our health!

For more information, contact Planning and Engineering Director Eric Mains at
EMains@HanoverBoroughPA.gov or 717-637-3877 x 1005.
Thank you in advance for your cooperation!

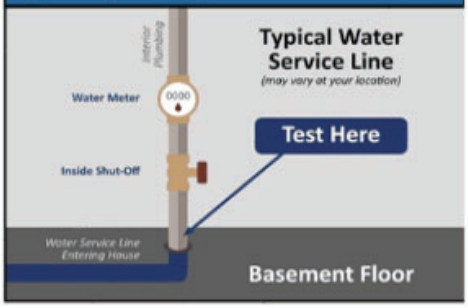
Department of Water Resources

Scan the code for the lead service line inventory.

1. Find your water service line
(typically located in your basement)



2. Scratch the surface of the pipe
(typically coming out of floor or wall)



3. Identify your water service line. Test your pipe

You have a lead pipe if....

Scratch Test - scraped area is shiny & silver.
Magnet Test - magnet will not stick to pipe.
Tapping Test - tapping a coin on the pipe makes dull noise.

You have a galvanized pipe if....

Scratch Test - scraped area remains dull grey.
Magnet Test - magnet will stick to pipe.
Tapping Test - tapping a coin on the pipe makes metallic ringing noise.

You have a copper pipe if....

Scratch Test - scraped area is copper in color, like a penny.
Magnet Test - magnet will not stick to pipe.
Tapping Test - tapping a coin on the pipe makes metallic ringing noise.

Lead Service Line Replacement (LSLR) Program	XX (C)

(C) Indicates Change

PART V: LEAD SERVICE LINE REPLACEMENT (LSLR) PROGRAM

(1) Supersession

This section of the Company's tariff supersedes all other conflicting provisions of this tariff for purposes of implementing the Company's LSLR Program.

(2) Definitions

The following words and phrases, when used in Part V of this tariff, shall have the meanings assigned below unless the context clearly indicates otherwise*:*

Curb Stop: A water service shutoff valve located in a water service line near the curb or edge of the street and between the water main and the building.

Customer: A party contracting with an entity for service.

Customer-owned Lead Service Line (Customer-owned LSL): The portion of the lead service line extending from the curb, property line or entity connection to an entity's water meter or, if the entity's meter is located outside of the structure or water is not metered by the entity, at the first shutoff valve located within the interior of the structure.

Company: Hanover Municipal Water Works

Company-owned Lead Service Line (Company-owned LSL): The portion of the lead service line extending from the Company's main to the Curb Stop.

Distribution system improvement charge (DSIC): The term as defined in 52 Pa. Code § 121.2.

Entity: A public utility as defined in 66 Pa.C.S. § 102 (relating to definitions) engaged in diverting, developing, pumping, impounding, distributing or furnishing water service to or for the public for compensation, a municipal corporation as defined in 52 Pa. Code § 65.52 (relating to definitions), and an authority as defined in 66 Pa.C.S. § 3201(1) (relating to definitions).

Galvanized service line: Iron or steel piping that has been dipped in zinc to prevent corrosion and rusting.

Independent Legal Restrictions: Commission regulations or Orders which otherwise prevent termination of water service at a property including but not limited to winter moratorium, medical certifications, or Commission directed moratoriums or suspensions.

Lead service line (LSL): A service line made of lead that connects the water main to a building inlet and a lead pigtail, gooseneck or other fitting that is connected to the lead line. A galvanized service line is considered a lead service line if it ever was or is currently downstream of any lead service line or service line of unknown material.

Lead service line replacement (LSLR): A service line, whether entity-owned or customer-owned, installed to replace a lead service line.

Lead service line replacement plan (LSLR Plan): A plan and supporting documents submitted to and approved by the Commission that specify how an entity intends to implement its lead service line replacement program.

Lead service line replacement program (LSLR Program): A program submitted to and approved by the Commission for the replacement of lead service lines by an entity.

Lead service line replacement project (LSLR Project): An entity-scheduled lead service line replacement activity either in conjunction with main replacements or as part of a lead service line replacement program.

Lead service line replacement project area (LSLR Project Area): The area encompassing an entity's scheduled lead service line replacement activities, which includes the area within a 1-mile radius of a lead service line replacement project if served by the entity.

LSLR Project Commencement: Installation of the first lead service line replacement within a lead service line replacement project area.

Partial lead service line replacement (Partial LSLR): A lead service line replacement that does not replace both the entity-owned and customer-owned portions of a lead service line.

Property Owner Agreement: An agreement between the Company and a property owner for the replacement of a customer-owned LSL that allows the Company's employees and contractors to gain access to their private property in order to replace their customer-owned LSL prior to the initiation of any work by the Company to replace the customer-owned LSL.

Service line: The pipe and appurtenances which connect any main to an entity's water meter or, if the entity's water meter is located outside of the structure or the connection is not metered by the entity, at the first shutoff valve located within the interior of the structure.

(3) LSLR Plan

Notwithstanding the Rules in this tariff relating to customer responsibility for customer service lines, the Company will replace customer-owned LSLs pursuant to its LSLR Program and LSLR Plan as initially approved by the Commission at Docket No. P-2024-

3050231, together with future Commission-approved updates. The Company may modify its annual cap for LSLRs with Commission approval. The costs incurred by the Company to undertake remediation efforts pursuant to its LSLR Plan shall be recoverable in the Company's DSIC, PENNVEST Surcharge, and in base rates, as applicable.

The Company's LSLR Plan applies to any LSL serving any customer, the replacement of which is operationally feasible, and where the property owner authorizes the replacement or replaces the line in accordance with the Company's LSLR Program.

(4) LSLR Annual Cap

The Company will cap LSLR Projects at 20 customer-owned LSLRs on an annual basis, with a maximum budgeted amount of $70,000.00 per year. If a customer reimbursement provided pursuant to this tariff or an emergency LSLR causes the Company to exceed its annual cap, the Company will increase its current annual cap by the number of emergency repairs and/or reimbursements and decrease its annual cap by the same amount for the following year only. Any portion of the annual cap that is not spent that year will roll over to the next subsequent year. The Company may petition the Commission to modify its annual cap amount per year if, in the Company's sole discretion, the Company determines these amounts are not adequate to meet the needs of the LSLR Plan. Any petition to modify the budgeted amount or maximum number of replacements per year is subject to Commission approval. Costs incurred by the Company under the LSLR Plan shall be subject to Act 120 of 2018 (P.L. 738, No. 120) and the accounting and ratemaking treatment approved by the Commission, entered _____, 2025 at Docket No. P-2024-3050231. After a

(5) LSL Replacements

The Company will offer to replace customer-owned LSLs at no direct cost to the customer or property owner, if the customer is not the property owner: (i) at any residential or non-residential property where the Company replaces a Company-owned main connected to a customer-owned LSL; (ii) at any property where the Company replaces a company-owned LSL connected to a customer-owned LSL; and (iii) at any property with a private-side only LSL located within a LSLR Project Area where LSLRs are performed; (iv) when the Company's operations crew replaces a Company-owned facility regardless of material, in emergencies, including line breaks, leaks, or other unplanned emergency replacements, that is a LSL or that is connected to a LSL; (v) and any other circumstance as required to avoid the replacement of a partial LSL.

Except in the case of non-owner occupied properties at which the Company has received the customer's acceptance of the Company's offer to replace the customer-owned LSL as set forth in Section (7) below, the Company shall enter into a property owner Agreement with the property owner for replacement of a customer-owned LSL that allows the Company's employees and contractors to gain access to their private property in order to replace their customer-owned LSL prior to the initiation of any work by the Company to replace the customer-owned LSL. The Property Owner Agreement shall be in a form provided by the Company and shall include provisions that require property owners to

release and hold harmless the Company from any and all claims, causes of action, damages or losses, of any nature, whatsoever with respect to the work performed by the Company or its contractors that are not covered by the Company's LSLR Program warranty.

(6) Customer Refusal

Except as set forth below, if after being notified of the Company's offer to replace at no cost a customer-owned LSL, the property owner has not provided an executed Property Owner Agreement authorizing the replacement of the customer service line or has refused replacement, the Company will (1) provide the customer and property owner, if the customer is not the property owner, with a complete disclosure of the known health hazards from the continued use of a LSL, (2) inform the customer or property owner, if the customer is not the property owner, that refusal or failure to accept will require replacement of the customer-owned LSL, at the customer or property owner's expense, within 1 year from LSLR Project Commencement for the customer or property owner, if the customer is not the property owner, to be eligible for reimbursement, and (3) communicate to the customer and property owner, if the customer is not the property owner, that failure to allow the Company to complete the LSLR or to replace the customer-owned LSL concurrent with the Company replacing the Company-owned LSL will lead to termination of water service under the provisions of this tariff prior to the Company replacing the Company-Owned LSL.

If the customer or property owner, if the customer is not the property owner, does not sign the Property Owner Agreement or refuses replacement of the customer-owned LSL within ten days after the Company undertakes the aforementioned steps, the Company will require the customer or property owner, if the customer is not the property owner, to sign a form documenting their refusal. If the customer or property owner refuses or fails to sign the refusal form, the Company will make a record of and document the customer's refusal or failure to sign the refusal form. The Company will then schedule to replace its portion of the Company-owned LSL and notify the customer in writing of this replacement no later than ten days prior to the scheduled replacement and terminate water service at that location the day prior to replacing the Company-owned LSL. The Company will proceed with termination of water service to a location irrespective of whether Independent Legal Restrictions would otherwise delay or prohibit termination. Such notice and termination shall be deemed consistent with Chapter 14 of the Public Utility Code. Moreover, in these instances, the Company is not required to comply with termination procedures described in other portions of its tariff or the Commission's regulations.

At any time prior to completing termination, or, within ten days after termination, the property owner executes the Property Owner Agreement, water service will be restored to the property, provided that service will not be restored until either both the Company-owned LSL and the customer-owned LSL have been replaced or, in the Company's sole discretion, an alternative, non-lead temporary bypass is installed until both the Company-owned LSL and the customer-owned LSL have been replaced.

The Company will not connect an Applicant to water service where a property owner previously refused or failed to accept the Company's offer of a LSLR until the Applicant verifies the replacement of the customer-owned LSL by providing a paid invoice from a licensed contractor or a notarized statement from a licensed contractor attesting to completion of the LSLR.

(7) Service Line Demarcation

If a shutoff valve is not located within 12 inches of the structure wall of the property, the Company may install a shutoff valve during the LSLR to serve as a point of demarcation between the property's service line and the property's interior water distribution piping.

The Company shall perfect its ownership of the portion of the service line located within the then-existing right-of-way in conformance with its tariff to ensure that the Company can obtain necessary permits during the planning phase of a LSLR Project.

(8) Prohibition on Partial LSLRs and Notice Requirements

Neither a customer nor a property owner may install a Partial LSLR. A Partial LSLR installed after July 23, 2022, must result in termination of service until both the Company-owned LSL and customer-owned LSL have been replaced. The Company will proceed with immediate termination of water service to a location being served by a partial LSLR installed after July 23, 2022, irrespective of whether Independent Legal Restrictions would otherwise delay or prohibit termination. Such termination shall be deemed consistent with Chapter 14 of the Public Utility Code. Moreover, in these instances, the Company is not required to comply with termination procedures described in other portions of its tariff or the Commission's regulations.

Where a customer or a property owner, if the customer is not the property owner, elects to replace the customer-owned LSL, the customer or property owner shall replace the customer-owned LSL concurrent with the Company replacing the Company-owned LSL, provided that the customer or property owner, if the customer is not the property owner, provides the Company at least 180 days' notice prior to replacing the customer-owned LSL.

The Company shall not connect an Applicant for water service to the Company-owned service line at a property where a customer or property owner, if the customer is not the property owner, previously refused or failed to accept the Company's offer of a LSLR until the Applicant verifies the replacement of the customer-owned LSL by providing a paid invoice from a licensed contractor or a verified statement from a licensed contractor attesting to completion of the LSLR.

(9) Reimbursement

Where a customer or property owner, if the customer is not the property owner, has replaced its own customer-owned LSL, the customer or property owner shall submit to the Company a reimbursement form, which may be provided by the Company to a

customer or property owner by mail or email upon request or on the Company's website, and which must be completed by the customer or property owner and provided to the Company by mail, email, fax, or hand delivery as specified by the Company on its reimbursement form, which contains, at a minimum, a detailed estimate and paid invoice from a licensed contractor verifying the replacement of the customer-owned LSL. Instead of a detailed estimate, a verified statement from the contractor attesting to completion of a LSLR may be sufficient in the Company's discretion. A paid invoice must be submitted.

Upon submission of the reimbursement form, the Company will review the information that was provided within 90 days of receiving the reimbursement form to determine eligibility for a reimbursement. If sufficient information has not been provided at the time of submitting the reimbursement form, the Company will contact the customer or property owner to request the necessary information to determine eligibility. The Company will have an additional 45 days from the time it receives the additional information to determine a customer's eligibility for reimbursement.

A customer or property owner, if the customer is not the property owner, is eligible to receive a reimbursement if the customer or property owner's service address is located within a LSLR Project Area and the customer-owned LSL is replaced within one year before or from LSLR Project Commencement. A customer or property owner, if the customer is not the property owner, located within a LSLR Project Area is eligible for a reimbursement of LSLR expenses up to 125% of the average cost the Company would have incurred to perform the replacement of a similarly-sized service line, not to exceed the actual cost to the customer or property owner.

Reimbursements will be paid directly to the customer or property owner, if the customer is not the property owner, through the issuance of a check. The Company will issue a check within 90 days after verifying that the customer or property owner is eligible for reimbursement.

(10) Warranty

For customer-owned LSLs replaced by the Company or its contractor, the Company will provide a two-year warranty for materials and workmanship of the Company's LSLR work, including the Company's restoration of surfaces consistent with this tariff, commencing from the date the LSLR is complete. This warranty shall cover repairs and replacements conducted by the Company or its contractor of the LSLR work up to a maximum warranty coverage amount of 125% of the Company's cost for the LSLR work, so long as the customer allows access to the property for repairs.

The warranty does not cover, among other things, damage caused by natural disasters, acts of God, fires, terrorism, excavation activities, acts of sabotage, or deliberate damage. The Company shall have no liability for any damages not covered by the warranty.

(11) Limitation of Liability

The Company's liability relating to LSLR efforts is limited as set forth in this tariff.

(12) Restoration

The Company will backfill to the previous grade any trenches excavated as part of the LSLR process and will fill and seal any wall or floor penetrations in the private home. The Company will restore roadways and sidewalks within the public right-of-way. No other restoration will be conducted for LSLRs. The Company will not replace any landscaping, interior finishes, paving, seeding, or walkways. All restoration costs shall be borne by the customer or property owner, if the customer is not the property owner, unless otherwise required by the Company's LSLR Program warranty.

(13) Ownership of Replacement Service Line

After a customer-owned LSL is replaced by the Company, the customer shall continue to own the customer portion of the Service Line and shall have full responsibility for the repair, replacement and maintenance of the new customer portion of the Service Line.

APPENDIX C

Information required by Section 53.52(a) of the Commission's regulations

Data Responses to 52 Pa. Code § 53.52

(a) (1) The specific reason for each change.

Response: This change is required in order to comply with PA DEP mandates for the identification, inventory and mitigation of lead service lines, as part of the Hanover Borough Water Works community water system.

(2) The total number of customers served by the utility.

Response: Estimated number of customers is 40,900 as of the submission of the Service Line Inventory Form to PA DEP.

(3) A calculation of the number of customers, by tariff subdivision, whose bills will be affected by the change.

Response: Zero. This change does not affect the billing of the customers, regardless of tariff subdivision, as it is solely focused on the identification and mitigation of lead service lines ("Customer" side only as the Borough believes itself to have mitigated all lead from the "System" side).

(4) The effect of the change on the utility's customers.

Response: The only anticipated effect this change will have is if a Customer has lead material on their water service, it will require coordination with the Hanover Municipal Water Works for the mitigation and abatement of that lead material.

(5) The direct or indirect effect of the proposed change on the utility's revenue and expenses.

Response: This change will not affect the utility's revenue. However, it will have a direct impact on the utility's expenses as it will require that a strategy be developed to identify (increased labor and third party consulting support to locate lead services) and funding to mitigate / replace any lead found in water services (on the "Customer" side). The overall extent of impact is unknown as the utility is still actively assessing the presence of lead services using public input tools, meter replacements, and other means.

(6) The effect of the change on the service rendered by the utility.

Response: This change will not affect the service rendered other than to enhance it by offering a means to identify and mitigate any lead service line that may be serving the "Customer". All other aspects of the services rendered by the Hanover Municipal Water Works will remain unchanged.

(7) A list of factors considered by the utility in its determination to make the change. The list shall include a comprehensive statement about why these factors were chosen and the relative importance of each.

Response: This effort is solely one that is being mandated by the Public Utility Commission and the PA Department of Environmental Protection. There were no other factors considered. It's relative importance is rooted in the understanding that lead service lines are detrimental to the overall health and wellbeing of the customers served by the community water system.

(8) Studies undertaken by the utility in order to draft its proposed change.

Response: There were no studies undertaken by the utility with regard to this change. The larger body of work that substantiated that lead is a health risk was done at the Federal and State levels.

(9) Customer polls taken and other documents which indicate customer acceptance and desire for the proposed change. If the poll or other documents reveal discernible public opposition, an explanation of why the change is in the public interest shall be provided.

Response: As this is a mandated effort, polls were not taken (nor appropriate) to determine acceptance. However, there has been a social engagement campaign with the customer base using webpages and social media to educate the public with regard to the mandate and how it impacts their water use. It also advocated for them to help the utility identify lead services by providing them with a web / mobile based tool to log various data about their water service.

(10) Plans the utility has for introducing or implementing the changes with respect to its ratepayers.

Response: As noted in Number 9 above, the utility has engaged with the community users of the water system to make them aware of the regulations and the need to identify the presence of any lead services. As the change to the tariff progresses, it will be reported out at public meeting and on various web and social media platforms. Information related to the lead service program has also been going out with water billing.

(11) Commission order or rulings applicable to the filing.

Response: (a) *Rulemaking to Implement Act 120 of 2018 at 52 Pa. Code Chapters 65 and 66*, Docket No. L-2020-3019521 (Final Rulemaking Order entered Mar. 14, 2022)

VERIFICATION

I, P. Eric Mains, P.E., Director of the Planning & Engineering Department for the Borough of Hanover, who in such capacity provides direct, overall, technical, and engineering support to Hanover's Department of Water Resources, hereby state that the facts above set forth are true and correct to the best of my knowledge, information and belief and that I expect to be able to prove the same at a hearing held in this matter. I understand that the statements herein are made subject to the penalties of 18 Pa.C.S. § 4904 (relating to unsworn falsification to authorities).
