Re: Amended Petition of the Hanover Municipal Water Works for Approval of its Lead Service Line Replacement Program – Docket No. P-2024-3050231

Dear Secretary Chiavetta:

Please find enclosed for filing the Hanover Municipal Water Works ("HMWW") Amended Petition for Approval of its Lead Service Line Replacement Program, pursuant to Public Utility Commission's ("Commission") regulations located at 52 Pa. Code § 65.51, *et seq*.

As required, this filing includes: (1) HMWW's Amended Petition for Approval of its Lead Service Line Replacement Program; (2) HMWW's Proposed Lead Service Line Replacement Plan (Appendix A); (3) HMWW's *pro forma* tariff supplement (Appendix B); and (4) information required by Section 53.52(a) of the Commission's regulations (Appendix C).

This Amended Petition is being served, as stated in the attached Certificate of Service, upon the Commission's Bureau of Investigation and Enforcement, the Office of Consumer Advocate, and the Office of Small Business Advocate.

Should you have any questions or concerns, please feel free to contact me at the address listed above.

Very Truly Yours,

SALZMANN HUGHES, P.C.

/s/ Isaac P. Wakefield
Isaac P. Wakefield

IPW/bkl
Enclosure
cc: Certificate of Service

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

Petition of the Hanover Municipal Water Works for Approval of its Lead Service Line Replacement Program and Related Tariff Changes, Pursuant to 66 Pa.C.S. § 1311(b) and 52 Pa. Code § 65.51, *et seq*.	:	Docket No. P. 2024-3050231

AMENDED PETITION OF THE HANOVER MUNICIPAL WATER WORKS FOR APPROVAL OF ITS LEAD SERVICE LINE REPLACEMENT PROGRAM

AND NOW, the Hanover Municipal Water Works ("HMWW") by and through its legal counsel, Salzmann Hughes, P.C., pursuant to Section 1311(b)(2) of the Pennsylvania Public Utility Code, as well as 52 Pa. Code 65.61, *et seq*., hereby submits an amended petition to the Pennsylvania Public Utility Commission ("Commission") for Approval of its Lead Service Line Replacement Program ("LSLR Program") and related pro forma tariff revisions that will authorize HMWW to replace customer-owned lead service lines and to recover the associated costs related to those replacements, as set forth herein, as permitted under Act 120 of 2018. In support thereof, HMWW respectfully represents as follows:

I. INTRODUCTION

1. HMWW is part of an incorporated municipality in York County, Pennsylvania with a population of approximately 16,573.

2. HMWW provides water service to approximately 18,000 customers, which include areas outside of HMWW's incorporating municipality in the following York County locations: (1) Penn Township, (2) West Manheim Township, (3) Heidelberg Township; as well as the following Adams County locations: (1) McSherrystown Borough, and (2) Conewago Township.

3. HMWW water service outside of its municipal limits is regulated by the Commission pursuant to the Code.

4. The names, addresses and phone number of HMWW's counsel are:

Timothy J. Shultis, Esq.
Isaac P. Wakefield, Esq.
Idan V. Ghazanfari, Esq.
Salzmann Hughes, P.C.

ighazanfari@salzmannhughes.com

II. LEGAL BACKGROUND

5. On October 24, 2018, Act 120 of 2018 ("Act 120") was signed into law and amended Section 1311(b) of the Public Utility Code ("Code") to address replacement of private lead service lines ("LSL") by utilities and to account for utilities' recovery of related costs.

6. On March 14, 2022, the Commission entered its Final Rulemaking Order establishing regulations to implement Act 120. Sections 65.51 through 65.62 of those regulations became effective on Jule 23, 2022.[1]

7. These regulations established timing, program, and approval process requirements for LSL replacements.[2]

8. Section 65.55(a) of the Commission's regulations requires a municipal corporation to file a LSLR program within 2 years of the effective date of the regulations.[3]

9. On July 24, 2024, the Commission issued a Secretarial Letter at Docket No. P-2024-3050231 granting HMWW an extension of time to December 19, 2024, to allow for accumulation of required information to design its LSLR Program.

[1] *See* 52 Pa. Code § 65.51, *et seq*.
[2] *Id*.
[3] 52 Pa. Code § 65.55(a).

10. Section 65.54(a) of the Commission's regulations requires LSLR program petition petitions be filed with the Commission's Secretary's Bureau with copies served upon the Bureau of Investigation and Enforcement, the Office of Consumer Advocate, the Office of Small Business Advocate, and the parties of record in the entity's most recent base rate case.[4]

11. Municipal corporations, like HMWW, are required to replace all LSLs, within or connected to its water distribution systems, beyond its corporate limits, whether municipal corporation-owned or customer-owned, within 30 years of July 23, 2022 (the effective date of the regulations).[5]

12. Section 65.55(b) requires a LSLR program must include: (1) a LSLR plan; (2) a *pro forma* tariff or tariff supplement containing the proposed changes necessary to implement the LSLR program; and (3) information required by the Commission for filings under Section 1308 of the Code,[6] including statements required by Section 53.52(a) of the Commission's regulations.[7]

13. An LSLR plan must minimally include specific items related to a service line inventory, planning and replacements, and communications, outreach, and education.[8]

14. The Commission has developed a model *pro forma* tariff supplement designed to comply with the requirements set forth in Section 65.58.[9]

15. Section 65.60 requires that costs for LSL replacements be recorded under separate and distinct subaccounts and allows for deferred income taxes related to LSL under certain circumstances.[10]

---

[4] 52 Pa. Code § 65.54(a).
[5] 52 Pa. Code § 65.53(b).
[6] 66 Pa.C.S. § 1308.
[7] 52 Pa. Code § 53.52(a).
[8] 52 Pa. Code §§ 65.56(a), (b), (c).
[9] 52 Pa. Code §§ 65.58(a)-(e).
[10] 52 Pa. Code § 65.60.

16. HMWW has previously established a Commission-approved Long Term Infrastructure Improvement Plan ("LTIIP").

17. Section 65.54(b) requires entities with Commission-approved LTIIPs include with their LSLR Programs a modified LTIIP containing an LSLR Plan as a separate and distinct component of the LTIIP.[11]

18. In addition to Act 120's requirements, LSLs are the subject of the EPA Lead and Copper Rule, which is enforced by Pennsylvania's Department of Environmental Protection ("DEP"). Environmental regulations direct actions and requirements related to LSL remediation efforts and range from a health-based "action level" to inventory, sampling, LSL replacement and customer notification requirements.

19. The EPA's Lead and Copper Rule Revisions ("LCRR") became effective on December 16, 2021, and water systems were required to comply with the LCRR by October 16, 2024.[12]

20. HMWW timely submitted its service line data in accordance with those requirements.

21. On December 19, 2024, HMWW submitted its Petition for approval of its LSLR program in accordance with the extended deadline.

22. Out of an abundance of caution, that submission included a proposed modification to HMWW's Commission-approved LTIIP in an effort to comply with Section 65.54(b) despite no immediate intention to recover costs through that mechanism.

[11] 52 Pa. Code § 65.54(b).
[12] *See* C.F.R. §§ 141.80, 141.84(a).

23. Upon further consideration, HMWW now wishes to file this Amended Petition removing the proposed LTIIP modifications, otherwise keeping its proposed LSLR Program identical, and clarify it is not immediately seeking to recover costs through those available means.

III. HMWW's PROPOSED LSLR PROGRAM

20. As required by Section 65.55(b), the necessary elements of HMWW's LSLR program are attached to this Petition, including: (1) HMWW's LSLR Plan (Appendix A); (2) a *pro forma* tariff supplement containing the proposed changes necessary to implement the LSLR Program (Appendix B); and (3) information required by Section 53.52(a) of the Commission's regulations (Appendix C).

21. HMWW's LSLR Plan (Appendix A) provides detailed information on each of the elements required by Section 65.56, and supplements its contents with exhibits including the following:

a. Service Line Inventory – Exhibit A

b. Property Owner Agreement for LSLR – Exhibit B

c. Communications, Outreach, and Education – Exhibit C

22. HMWW's *pro forma* tariff supplement (Appendix B) utilizes the Commission's provided form and addresses each of the items that Section 65.58 requires, including an annual program cap, description of the service line demarcation, specific information on partial LSLRs, reimbursements, and a warranty on LSLR work.

23. HMWW's *pro forma* tariff supplement states that HMWW will replace up to 20 customer LSLs per year with a program cap of $70,000.00.

24. HMWW will strive to revisit its program caps as necessary when future LSLs are identified to ensure that all LSLs in its system within 30 years of the effective date of the regulations, as required by Section 65.53(b).[13]

25. HMWW recognizes that its LSLR Plan is designed to be revisited in accordance with Section 65.57, which requires periodic review and updates at least once every 5 years.[14]

26. Similarly, once the Commission approves HMWW's LSLR Program, HMWW commits to filing an annual LSLR Program report by March 1 of each year, or as otherwise required for compliance with HMWW's LTIIP.[15]

27. HMWW's proposed LSLR Program does not contemplate immediate recovery of costs through modifications of its existing Commission-approved LTIIP.

28. Therefore, HMWW has not included a proposed modified LTIIP with this filing that would otherwise be required pursuant to Section 65.54(b).

IV. CONCLUSION

For the foregoing reasons, HMWW respectfully requests that the Commission grant this Amended Petition and approve its proposed LSLR Program, including its LSLR Plan and *pro forma* tariff.

Respectfully Submitted,

SALZMANN HUGHES, P.C.

APPENDIX A

HMWW's Proposed Lead Service Line Replacement Plan

HANOVER MUNICIPAL WATER WORKS

LEAD SERVICE LINE REPLACEMENT PLAN

1. Goals

This lead service line replacement plan ("LSLR Plan") was developed by the Hanover Municipal Water Works ("HMWW") to ensure compliance with the United States Environmental Protection Agency ("USEPA"), Pennsylvania Department of Environmental Protection ("PADEP"), and Pennsylvania Public Utility Commission's ("PUC") regulations and guidance on lead in drinking water and lead service lines ("LSLs"). These regulations were developed to address the health issues associated with lead in water. The goal of this LSLR Plan is to remediate all the LSLs within HMWW's water system. The USEPA and PADEP recently revised the Lead and Copper Rule to require systematic replacement of LSLs over time. The regulations contain two replacement time frames. The USEPA requires all LSLs to be replaced over a thirty-three (33) year period, if water quality is in compliance with the Lead and Copper Rule. Whereas, the PUC requires replacement in thirty (30) year period. HMWW's goal is to replace all LSLs in its PUC jurisdictional service territory in thirty (30) years.

2. Objectives

HMWW will replace both the privately-owned and HMWW-owned portion of an LSL from the main to the curb stop on HMWW-owned side, and from the curb stop into the building on the privately-owned side of the service line.

HMWW has completed an LSL inventory by October 16, 2024, in accordance with the Revised Lead and Copper Rule. To the degree necessary, HMWW will provide detailed information regarding the progress of its LSL inventory in accordance with Section 65.56 of the PUC's regulations for LSLR plans.

3. Definitions

a. "Service lines" or "service line" means the pipe or pipes that connect(s) a water main to a building inlet and any fitting connected to the pipe or pipes.

b. "Lead service lines" or "lead service line" or "LSL" includes any service line made of lead, galvanized iron, or galvanized steel.

c. "Copper service lines" or "copper service line" includes any

service line that is made of copper.

4. Processes and Procedures

HMWW has a current (initial) LSL inventory for HMWW-owned portion of service lines. That service line inventory is attached to this LSLR Plan as Exhibit A. There are currently no confirmed LSLs within HMWW limits nor are there any in HMWW's PUC Jurisdictional Territory.

After the inventory is fully verified for the submitted inventory, pursuant to the 52 Pa. Code § 65.55, HMWW would be obligated to remove and replace all LSLs, whether HMWW owned or customer owned within 30 years. Any service line in the inventory with an unknown material must be considered an LSL. HMWW currently has over 18,000 customer water accounts and of that number roughly sixty one percent (61%), or 11,000 customer accounts, require identification of service line material. HMWW will continue to budget funds to cover these investigations and continue its customer outreach campaigns.

HMWW will cap its LSL replacements at twenty (20) per year in the PUC Jurisdictional Area.

Exhibit B provides the Agreement Form by which the customer (property owner) will authorize a LSL replacement. Exhibit B also outlines the procedures for documenting refusal of, or failure to accept HMWW's offer to replace a privately-owned LSL. This authorization includes the disclosures required under 52 Pa. Code § 65.56(b)(10)(i)-(iii).

5. Inventory of Lead Service Lines

In recognition of the USEPA and PADEP regulatory requirements, HMWW has conducted an inventory of all service lines in its service territory. An inventory is required of all customer service lines, both HMWW-owned side of the service line as well as the privately-owned side of the service line. An accurate inventory is a critical part of the new Lead and Copper Rule, and HMWW has based its inventory on the following evidence-based records, methods, and/or techniques:

a. Curb Cards and Verification

HMWW has curb cards for its public system service lines. A curb card is an index card which shows the information on the privately-owned side of the service line. These cards date back to the late 1800's, and have information including service line size, date of installation and material. According to PADEP guidance documents, the curb cards are not sufficient validation, alone, for a service line inventory, and

they need to be verified. However, the USEPA regulations require only one form of validation, which can include reliance on records. HMWW plans to use the curb cards for information on the privately-owned side of the service line. Predictive models can verify the accuracy of the curb cards and assist in identifying other LSLs

b. Excavation

Excavation can also be used to check the curb cards as part of verification process when using predictive models. This means that there is a certain portion of a service line that will require excavation to corroborate the information on the curb card. HMWW will only excavate at the curb box because of the short distance from box to building entry in an urban environment. In areas outside of HMWW limits, there may be a need for separate points of verification along the same service line. The service lines that are found to be LSLs at the time of excavation may not be replaced at that time.

c. Inspections

On the privately-owned side of the service line, when there is a need to replace a water meter, or a building inspection by HMWW Code Enforcement Department is required, HMWW can inspect the service line at the meter or in the building basement to verify the material of the service line.

d. Customer-Provided Information

HMWW developed a Geographic Information System ("GIS") application to assist in the identification of LSLs. Customers will be asked to identify their water line and take a picture of it so that HMWW staff can verify the material of the incoming water line. The information will be entered into an online database. Public education will precede deployment of the GIS application.

6. Operation and Maintenance

a. Existing Corrosion Control Measures and Statistical Analysis of 2022 Lead Testing.

HMWW does not currently implement measures to protect customers from lead leaching into the water from service lines.

b. Inspections

HMWW performs routine maintenance on its transmission and distribution system and routinely fixes main breaks. During the course of this work, HMWW may find

LSLs. If HMWW finds a LSL, and HMWW is already excavating, HMWW will replace the LSL in accordance with Section 7 of this LSLR Plan.

c. Routine Maintenance

If a LSL is found on the privately-owned side of the service line, the line will need to be scheduled for replacement. The privately-owned side will require replacement before HMWW replaces its portion of the service line. HMWW will identify preapproved, qualified contractors with predetermined costs associated with LSL replacement. If the customer uses one of these preapproved, qualified contractors, replacement of the LSL will be completed at no cost to the customer. If the customer chooses to use a contractor that is not preapproved by HMWW, HMWW will not cover the costs of the replacement of the customer's LSL. The exception to this provision will be if HMWW directly contracts the LSL replacement as part of a neighborhood HMWW project. In this case, the two-year warranty will still apply.

HMWW will investigate HMWW-owned portion of the service line if the customer chooses his or her own plumber. If HMWW-owned portion of the service line is found to contain lead, HMWW will replace its portion of the service line within ninety (90) days after the customer replaces their portion of the service line.

If a LSL is discovered on either HMWW-owned or privately-owned side of the service line, then HMWW will provide water filters to the customer that are capable of removing lead from water (NSF 53). HMWW will also provide the customer with a lead testing kit to determine the level of lead that may be in the customer's drinking water. It is the responsibility of the customer to accurately perform the test.

Once the customer-owned side of the service line has been replaced, HMWW will designate HMWW-owned portion of the service line for replacement. HMWW will continue to provide the customer with water filters until HMWW-owned portion of the service line has been replaced. HMWW will also continue to provide the customer with water filters after the replacement as set forth in Section 8.b of this LSLR Plan.

d. Meter Replacement

Meter replacements occur every twenty (20) years. If HMWW schedules a meter replacement and the service line coming into the home is determined to be a LSL, the replacement of the LSL is required. HMWW will test dig HMWW-owned side of the service line to determine if it is lead, if the material is otherwise unknown, but the privately-owned side must be replaced. The procedures in Section 7 of this LSLR Plan will apply.

e. Emergencies

The entire service line must be replaced under the LSL Rules if the service line is lead on both sides. If HMWW replaces its portion of the service line, and the private side is also lead, then HMWW will install a temporary water line until the customer has

replaced their service line. The customer will be required to sign the consent authorization in Exhibit B. If the customer refuses to execute the consent, the water service will be terminated, following HMWW's shut-off procedures.

7. System Replacements

a. Replacement Criteria

With the service line inventory complete, HMWW will need to replace the LSLs. It is anticipated that LSLRs will occur April 1st through October 31st. The replacement process for LSLs will comply with the requirements set forth by the PADEP, USEPA, and the PUC.

PUC regulations, 52 Pa. Code § 65.58(d), require a reimbursement to an eligible customer or property owner who replaced their LSL, within 1 year before or from LSLR project commencement. HMWW will use due diligence to identify property owners to obtain the appropriate consent, assisted by deeds and other historical property information maintained by the Lancaster County Property Assessment Office.

Service lines will be replaced as follows:

- *Lead on HMWW-Owned Side and Lead on Privately-Owned Side (Full Line Replacement)*

The entire service line must be replaced under the PUC regulations if the service line is lead on both sides. If HMWW replaces its portion of the service line, and the private side is also lead, then HMWW will install a temporary water line until the customer has replaced their service line. The customer must contact HMWW to schedule for the completion of the work within four (4) weeks of the installation of the temporary service. Failure to do so will result in the temporary water service being shut off and the customer not having any water service until the privately-owned portion of the LSL is replaced and any other relevant requirements under HMWW's tariff for reconnection are satisfied.

- *Lead on HMWW-Owned Side and Copper on the Privately-*

Owned Side

The customer may have previously replaced his or her portion of the service line with copper, or a copper service line may have been installed when the customer's property was built. If this is the case, HMWW will replace HMWW-owned portion of the LSL up to the existing copper service line. All the procedures associated with installation of a full service line replacement will be followed, but the customer will not need to replace their portion of the service line.

- *Copper on HMWW-Owned Side and Lead on the Privately-Owned Side*

If HMWW-owned portion of the service line is copper and the privately-owned portion is lead, the privately-owned portion must be replaced. The customer will need to replace his or her portion of the service line up to HMWW-owned portion of the service line. All the procedures associated with installation of a full service line replacement will be followed. The customer must contact HMWW and arrange for the replacement to be completed within four (4) weeks of the installation of the temporary service. Failure to do so will result in the temporary water service being shut off and the customer not having any water service until the privately-owned portion of the LSL is replaced and any other relevant requirements under HMWW's tariff for reconnection are satisfied.

- *Copper on HMWW-Owned Side and on the Customer-Owned Side*

If both portions of the service line are copper, no replacement is required.

LSLs will be disposed of in accordance with PADEP regulations. HMWW does not anticipate recycling LSLs. However, if the lead can be recycled, any proceeds from such recycling would be returned to a "Miscellaneous Revenue" line in HMWW's annual water utility budget. The customer would not have any right to the proceeds of a recycled LSL.

b. Prioritization of Replacements

HMWW first step, as mandated by PA DEP/US EPA was to systematically evaluate its historic Service Line Material Inventory and improve its accuracy. That effort, while initially completed in October of 2024, will be ongoing with review and refinements for as long as the lead service identification and replacement program is active.

Data from the updated inventory is now being used to create a publicly accessible Service Line Inventory map (online GIS based map), which allows any HMWW customer to look up the service line material for their address and understand the status of lead identification on both the public and private sides of the connection.

The updated Service Line Material Inventory map is now being used to determine where to allocate the limited resources available for lead service line removal. Given that HMWW has ruled out lead being present on the public side of the connection, the effort is being focused on the collection and refinement of private side data. As the initial data and confirmation from the private side is collected (by office staff, field teams and the online Survey123 tool) HMWW will focus on concentrated areas where a majority of service lines are confirmed to be lead. An area will be considered a majority where three or more service connections (on the private side) are determined to be lead.

If an area of the water distribution system exhibits "majority" characteristics (for lead services), staff and field teams will field review other customers properties in the immediate vicinity. This will be coupled with a staff review of available records (meter service cards, building permit files, owner interviews, etc.). The limits of the area will be considered to be where three or more properties in the proximity do not have lead services (private side).

With the boundary established and the lead services confirmed, HMWW will allocate a portion of the annual lead service replacement budget to address the specific area. This allocation will continue until all identified lead services have been replaced within the subject area. The amount of available funds for this prioritization will be capped at two thirds of the total annual budget. The residual one third of funding will be available to replace lead services in areas not considered to be "majority" areas.

c. Anticipated Workflow of Replacements when Identified.

HMWW will generally follow this workflow, from identification to mitigation (replacement):

i. The lead service will be initially identified by either record review, public/owner input, or by field teams (during the course of other planned work on the water distribution system).

ii. Once initially identified, HMWW will go through such efforts as necessary to fully confirm the presence and extent of lead service at the property. This will include a combination of interior plumbing review, interviews with the owner, field excavation (if warranted) on the exterior (from curb stop to

building), two minimum locations.

iii. Once fully confirmed, the Service Line Material Inventory database and mapping will be updated to reflect the actual conditions.

iv. If the service is confirmed to consist of lead, staff will conduct a review of adjacent properties to determine if there are other lead services in the vicinity that would constitute a majority.

   a. If there is a majority, staff will review specific conditions at each property, factoring such items as number of children, elderly, number of users of service (e.g., multi-family), etc. to help prioritize which services to replace (with available funds) that will have the greatest positive impact.

   b. If there is not a majority, staff will confirm that there is available funding for the individual replacement and proceed with the replacement accordingly. If funds are not available, the property will be added to a "Confirmed Replacement Plan Inventory" for replacement as soon as funding is available (on a first come first served basis).

v. For all services to be replaced, HMWW will review and determine if the work can be completed using in-house workforces. If the work cannot be completed by in-house workforces, the Borough will have standing agreements with three local plumbers (vetted and competitively bid) to provide the necessary services. The owner will be free to choose their preferred plumber from the list.

vi. Replacement work done by a private owner, or their contractor, will be reviewed on a case-by-case basis. The ability for the owner to be reimbursed will be based on, but not limited to, factors such as the cost, contractor qualifications, preapproval by HMWW and coordination with HMWW during replacement (inspections). Reimbursed costs will be capped at 125 percent of what it would have cost HMWW to replace a similarly sized service line. Work completed by HMWW, or its designated contractors, will be warranted for a period of 18 months after work is completed. Work done by the owner (or their contractor) will not be warranted by HMWW.

vii. When the work is to be completed by HMWW, or their preferred contractors, the owner will execute a standard agreement with the Borough that outlines the terms and conditions of the service replacement.

viii. Once work is completed, regardless of whom performed the replacement,

the service line records for the property (and mapping) will be updated.

ix. If a service is determined to contain lead, and the owner does not wish to have it replaced, they will need to execute a "waiver & release" of liability with HMWW.

8. Post Replacement Measures

a. Notices and Instructions

Following a LSL replacement, the following steps will occur:

i. HMWW will post an informational door hanger at the residence. The door hanger will inform the resident of the work done, instruct them how to flush pipes and taps, and direct the resident to collect a post-replacement water sample after allowing the water to sit unused for 6 to 8 hours;

ii. Provide the household with a tap water sample kit;

iii. If a partial LSL was performed, and the resident fails to return the water test sample and arrange for replacement of the privately-owned portion of the service line with a preapproved, qualified contractor from HMWW's list within two weeks, HMWW will give notice to the customer that it intends to shut off the temporary water service to the customer's property;

iv. HMWW provides an additional free test to a customer when the customer's previous post-replacement tap water sample reveals lead levels above 10 ppb; and

v. If a post-replacement sample shows water lead levels above 50 ppb, HMWW will deliver to the residence at least one (1) case of generally-available bottled water per day until HMWW completes a meter drop and flush at the residence. Residents who receive a meter drop and flush will remain eligible for additional water filter cartridges and other assistance as described above.

b. Testing

If a resident's post-replacement tap water lead test reveals lead levels above ten (10) ppb, HMWW will provide to the resident an additional testing kit, at no charge, and instructions to return a follow-up test result three (3) months after the initial test.

If the follow-up test result shows lead levels above ten (10) ppb, HMWW will assist

the resident in determining why lead levels remain elevated.

If such further testing reveals lead levels above ten (10) ppb, HMWW will provide to the resident, at no charge, a generally-available NSF-certified water filter to remove lead, six (6) months of filter cartridges, and an additional tap water lead testing kit with instructions to return a follow-up test result three (3) months after the initial test.

c. *Warranty*

When the customer replaces the privately-owned LSL, HMWW will provide a two (2) year warranty on workmanship and materials. This will be a part of the agreement that HMWW has with the customer. The warranty will start on the date construction is completed. Maximum coverage will be for the cost of the installation. It is anticipated that the agreement will allow the contractor to remediate any deficiencies with the installation under the terms of the contract as HMWW contracts require performance bonds.

9. Financial Considerations

HMWW anticipates that it will fund its LSLR Program with capital funds and/or other loans (e.g., PENNVEST loans) or grants (such as Local Share Account or LSA).

a. Financial Responsibility for Privately-Owned Service Line Replacements – PUC Jurisdictional Territory and HMWW Limits

HMWW will cover the cost of replacement of a LSL if HMWW performs the work, the customer resides in HMWW's PUC Jurisdictional Territory or within HMWW limits, and the customer timely enters into the Form Agreement attached as Exhibit B.

b. Reimbursement of LSL Replacements

If an LSL is found on the privately-owned side of the service line, the line will need to be scheduled for replacement. HMWW will provide the LSL replacement. If the customer agrees to HMWW replacement of the LSL, it will be completed at no cost to the customer. If the customer chooses to use a contractor that is not preapproved by HMWW, HMWW will reimburse the customer provided:

- HMWW is provided an opportunity to inspect the customer's installation. The property owner or customer must provide HMWW notice a minimum

of 72 hours' notice of the installation time.

- The property owner or customer reimburses HMWW for the cost of the inspector. Current inspection costs are $89 per hour and will increase annually. The time for inspection is anticipated to be less than four (4) hours.

- The property owner or customer presents HMWW with the bill for reimbursement within 30 days of the installation's completion.

- The property owner or customer will be reimbursed using a HMWW issued check for up to 100% of the cost of a similarly sized service line, with similar attributes of replacement at the property in HMWW's sole discretion. HMWW will determine the average cost of the installation.

- HMWW will issue the reimbursement via check.

- HMWW will issue the reimbursement check for eligible applications no later than one hundred eighty (180) days from receipt of the eligible application.

c. Cost Tracking of LSL Replacements Within HMWW Limits

HMWW will separately identify all projected LSL replacement costs and details on its budgets and audits.

d. PUC Jurisdictional Territory

HMWW will separately identify all projected LSL replacement costs and details on its cost projections in its rate filings. Actual costs will be included if known.

10. Customer Outreach and Communications

The PADEP and USEPA require HMWW to publish information on both HMWW-owned portion and the privately-owned portion of the service line. To accomplish this, HMWW requires assistance from its customers. HMWW will send out notifications and request that customers check their portion of the service line as it comes into their building or residence. This will require the customer to take a photograph for verification by HMWW personnel. HMWW has been actively engaging in a customer information campaign, which is attached as Exhibit C.

HMWW will add a service line inventory to its website within twelve (12) months of PUC

approval of this LSLR Plan that will include the following:

- An online tool describing the LSL replacement schedule by geographic location, at least six (6) months into the future;

- Information regarding the reimbursement requirements and a secure online tool that provides customers or property owners, if the customer is not the property owner, the ability to determine whether the customer or property owner may be eligible for reimbursement;

- Information that provides the ability to determine whether a property may have a LSL, delineating the known or reasonably anticipated material types or HMWW-owned and privately-owned portions of the service line and a method to request assistance to determine if the service line is a LSL;

- Information and resources relating to health risks associated with lead in water and LSLs, the status of efforts to replace the lines, and any community meetings.
