

(C-2024-3046232)

To Rosemary Chiavetta

I disagree with your decision. Section 1501 does not mandate perfect service, nor ~~does~~ ^{MUST} a public utility provide the best possible service, most certainly, a public utility is not a grantor of either perfect service or the best possible service [B]

yeah! columbia gas could have the smallest, minute gas leak that over time builds up in a school building and explodes causing the death of 1,000's of children. Under section 1501 this is fine "I don't believe so"

yeah West Penn Power can generate power not 110 volts as required maybe 105 volts maybe 115 volts. What's a couple of volts, (minute) causing millions of dollars damage to electronic equipment and death and destruction.

Penn American can supply a family with contaminated water (just a little contaminated) if the whole family is sickened and dies. No big deal. They don't have to supply families with safe drinking water. How important is clean drinking water according to you not much!

Your en Idiot

Sincerely

Michael V. Weisman

P.S. see you in a real court

PASS this on to Judge Mary D. King.
