Purchased Water Adjustment Charge

The Company may apply a Purchased Water Adjustment Clause (“PWAC”) to its water rates set forth under Schedule of Metered Rates to reflect an increase or decrease in the rates charged by its wholesale water suppliers, Bucks County Water and Sewer Authority (“BCWSA”) and Pennsylvania American Water Company (“PENN-AM”), who are referred to jointly as “Wholesalers.” The purchased water adjustment charges will not apply to wholesale customers because they are billed the actual cost of purchased water each month on a current basis.

The PWAC will be calculated based on changes in the Company’s Wholesalers rates from the purchased water included in the Company’s Baseline Cost. For the purpose of calculating the PWAC the Baseline Cost is the annual purchased water cost reflected as an operating expense in the Company’s most recently concluded base rate case. This amount will remain constant until such time base rates are reset.

Customers shall be notified of changes in the PWAC by including appropriate information on the first bill they receive following any change. An explanatory bill insert shall also be included with the first billing.

When the Company’s water suppliers change their rates for water purchased by the Company, the Company will re-compute the PWAC based upon its annual purchased water costs reflecting the level of consumption and other billing determinants that formed the basis for the Baseline Cost.

Determination of Purchased Water Adjustment Charge

A PWAC may be implemented on the effective date of a change in Wholesalers’ rates charged to the Company for purchased water but not on less than forty-five (45) days’ notice. The Company may, at its option, implement a PWAC, to recover an increase in purchased water costs. However, if the rate is a decrease, the Company must implement a credit PWAC to reflect the decrease.

The baseline items determined in the Company’s most recently concluded base rate case are:

Baseline Purchased Water Cost (per thousand gallons)		\$3.581	(I)
BCWSA (Customer)	\$0.017		(D)
BCWSA (Consumption)	\$3.614		(I)
PENN-AM	\$3.328		(I)
Baseline 1,000 Gallons of Purchased Water		446,135	(D)
BCWSA	372,081		(D)
PENN-AM	74,054		(D)
Baseline 1,000 Gallons of Water Sales		671,941	(D)

The PWAC, per thousand gallons, shall be computed to the nearest one-hundredth cent (0.01¢) in accordance with the formulas set forth below:

$$\text{PWAC} = \frac{(\text{CHGPWC} \times 446,135)}{671,941} \quad \text{(C)}$$

- (D) Indicates decrease
