***Re: Completed Restoration of Momentary and Sustained Interruptions –
FirstEnergy Pennsylvania Electric Company; Docket No. M-2025-3052814***

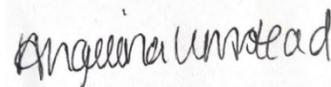

Dear Secretary Homsher:

Pursuant to 52 Pa. Code § 67.1, FirstEnergy Pennsylvania Electric Company on behalf of Penelec Rate District (“Penelec”) submits written notification of completed restoration efforts following storm conditions that began on April 29, 2025 that caused multiple service interruptions in the Penelec service territory.

Attached please find the details relative to the impact of this recent outage event and the restoration activities that took place. It should be noted that the review and approval process of this outage information is still in progress at the time of filing this report and as such, all outage information contained in this report should be considered preliminary.

If you have any questions, please contact me at (610) 921-6202.

Sincerely,

Angelina Umstead

ELECTRIC UTILITY REPORT OF OUTAGE TO
PENNSYLVANIA PUBLIC UTILITY COMMISSION
SECRETARY'S BUREAU
P O BOX 3265
HARRISBURG, PA 17105-3265

1. Reporting Utility: FirstEnergy Pennsylvania Electric Company ("FE PA")
on behalf of its Penelec Rate District ("Penelec")
Address: 800 Cabin Hill Drive
Greensburg, PA 15601

2. Name and title of person making report:

John Hawkins
(Name)

President Pennsylvania
(Title)

3. Telephone number: (330) 384-4795
(Telephone Number)

4. Date and time report was made to Commission:

April 29, 2025
(Date)

2018
(Time)

5. Interruption or Outage:

(a) Number of customers affected: 150,192 (represents 25.4% of Penelec's total customers).

(b) Approximate number of outage cases and trouble cases for each county affected during event: See response to 5(c)

(c) Approximate number of outages for each county affected during the event:

County	Outages	Outage Cases	Trouble Cases
Bedford	2,594	13	32
Blair	15,902	138	458
Bradford	192	9	11
Cambria	47,063	301	657
Centre	3,861	53	149
Clarion	633	11	6
Clearfield	33,055	218	440
Crawford	169	8	10
Erie	5,256	32	42
Forest	15	3	6
Franklin	680	11	6
Huntingdon	614	31	70
Indiana	21,717	217	462
Jefferson	6,586	58	137
Lycoming	185	9	7
McKean	1,239	20	18
Mifflin	4,382	84	147
Perry	18	1	0
Potter	705	5	8
Somerset	1,004	43	83
Susquehanna	246	6	4
Tioga	572	27	16
Venango	518	24	27
Warren	1,650	19	10
Wayne	2	1	2
Westmoreland	1,218	14	8
Wyoming	116	2	5
Total	150,192	1,358	2,821

(d) Approximate number of outage cases exceeding 6 or more hours in duration: 892

(e) A listing of each outage case exceeding 6 or more hours in duration:
See Attachment A.

(f) Reason for the interruption or outages: Beginning the afternoon of Tuesday, April 29, 2025, a weather system began moving through Pennsylvania including FE PA's service territory, producing heavy rains and wind gusts of approximately 66 miles

per hour on Tuesday and 54 miles per hour on Thursday, May 1, 2025. FE PA’s transmission network received significant damage as a result of the storm, which delayed restoration efforts after this weather event. See Attachment B for the maximum wind gusts for April 29 - May 2, 2025, and 24-hour total precipitation for April 29, 2025, and May 1 – May 4, 2025.

Damage as a result of high winds included downed wires, damaged or broken poles, trees, branches, and crossarms. The Clearfield, Indiana, Dubois, and Altoona regions were the hardest hit areas. Approximately 57.6% of the total outages that occurred were tree related and an additional 14.6% were wind related.

Preliminary data indicates the reliability impact of the storm was 209.5 minutes of SAIDI, 0.254 of SAIFI, and an overall storm CAIDI of 825.8 minutes.

- (g) Projected time of restoration: It was estimated that the majority of customers would be restored by 2300 on Sunday, May 4, 2025.

See Attachment C for the restoration curve and Attachment D for the order restoration graphs.

- (h) The number of utility workers, contract workers, and workers received as mutual aid assigned specifically to the repair work by general function:

Company	# of Workers	General Function

- (i) The date and time of the first information of a service interruption: April 29, 2025, at 1713.
- (j) The date and time that repair crews were assembled: Crews were on duty at the start of this event. Additional crews were called in as the storm progressed.
- (k) The actual time that service was restored to the last affected customer: May 4, 2025, at 2033.
- (l) A general description of the physical damage sustained by the utility facilities as a result of the interruption/outage:

Equipment	Number
Primary Spans	1,565
Secondary Spans	323
Crossarms Replaced	96
Cutouts Replaced	94
Poles Replaced	125
Transformers Replaced	62
Wire & Cable Replaced (feet)	18,248

- (m) If the interruption/outage event was weather-related, the utility’s weather reports, outlooks, or scenarios for the day before and the day of the interruption/outage event:

See Attachment E for the weather forecast reports.

- (n) If the interruption/outage event caused approximate outages that exceed 10% or more of the number of customers in the utility’s entire service territory, rank the event in terms of the number and duration of outages and provide 2 comparable events, including the number and duration of outages for those comparable events.

Rank by Number of Outages	Operating Company	Date	Event Description	Duration (hours)	Customers Affected
1	Penelec	April 29 to May 4, 2025	High Winds and Rain	123 hours 20 minutes	150,192 (25.4%)
2	Penelec	January 9 to January 13, 2024	High Winds and Rain	108 hours 25 minutes	112,452 (19.2%)
3	Penelec	March 15 to March 20, 2025	High Winds and Rain	128 hours 7 minutes	104,243 (17.6%)

Remarks: The storm statistics contained in this report are preliminary. The review and approval of the storm statistics were still in progress as of the time this report was filed.

Attachment A: A listing of each outage case exceeding six or more hours in duration, including the following information¹:

Attachment C: Restoration Curve

Attachment D: Order Restoration Graphs

Attachment E: Meteorologist Reports

Monday, April 28, 2025 @ 0934

New Issuance:

A cold front will approach/move through the FE footprint Tuesday, providing the opportunity for severe thunderstorms capable of damaging wind gusts. Storms are expected to develop across OH early Tuesday afternoon and push eastward, with broken line segments of storms likely to develop by mid/late afternoon. Scattered/widespread damaging gusts will be possible.

There is still uncertainty as to where and when storms will develop, and adjustments to risk levels and timing may be necessary in future alerts.

Tuesday, April 29, 2025 @ 0859

Update:

A wave of severe thunderstorms with damaging wind gusts remains likely today across portions of western and central FE.

Changes:

- Small adjustments storm risk areas, with minor adjustments of highest risk areas, as well as expanding general risk eastward into east PA for this evening
- Small updates on timing (may require further adjustments this afternoon)
- Isolated tornadoes will be possible
- Added mention of general (non-thunderstorm) 40+ mph wind gusts across OH and northern PA this afternoon.
- An isolated severe storm or two will be possible across OH from 10am – 2pm (not depicted in alert graphic below).

Tuesday, April 29, 2025 @ 1321

Update:

Adjusted forecast to account for current and expected storm activity:

- A small line of severe storms in southwest OH is expected to intensify and generally expand as it moves east/northeast. This system will bring the risk of both widespread and significant (65+ mph) wind gusts as it moves through central/eastern OH, western PA and possibly northern WV this afternoon and evening.
- Separate storm development is possible across areas of northeast OH and northwest PA later this afternoon.
- Another separate (secondary) round of isolated/scattered thunderstorms now appears possible in areas OH, WV and southwest PA later this evening as the cold front itself pushes through. A separate alert graphic has been added for this secondary storm threat.

FE PA Storm Report

Tuesday, April 29, 2025 @ 1811

Update:

Lines of severe thunderstorms will continue to push eastward though areas of A) northern PA, B) central PA, and C) northern WV/western MD over the next 2-3 hours. Storms will gradually begin to weaken after sunset across portions of central PA and western MD, but will still be capable of isolated/scattered damaging gust in those areas into the late evening hours.

The intense line of thunderstorms moving through southern PA is likely to maintain intensity for the next 2-3 hours as it moves eastward. Widespread 50-60+ mph gusts, with scattered gusts of 70+ mph, will be possible across southern & central PA.

A second round of isolated/scattered storms remains possible across areas of OH and WV this evening. Storms are expected to be generally less intense, but still may be capable of isolated damaging gusts and heavy rainfall (which may lead to localized flash flooding in areas that saw earlier storm activity).

Wednesday, April 30, 2025 @ 0810

New Issuance:

Scattered severe thunderstorms will be possible across areas of western FE Thursday afternoon and evening ahead of a weak cold front, providing the risk for scattered damaging wind gusts. Storms may develop into a few small clusters during the evening, particularly across northeast OH and northwest PA—which would increase the local damaging wind threat.

Additionally, periods of general (e.g., non-thunderstorm) 35-45 mph gusts are also expected Thursday afternoon across areas of OH.

Wednesday, April 30, 2025 @ 1437

Update:

Small adjustments to thunderstorm risk areas, mainly expanding the areas to the east/south. Scattered thunderstorms, some expected to be severe and capable of pockets of damaging wind gusts, are expected over the broad risk area Thursday afternoon and evening.

Additionally, added mention of a few isolated gusts to 50 mph tomorrow in portions of Ohio (if and when periods of sunshine break through).

Thursday, May 1, 2025 @ 0833

Update:

No major changes to today's forecast, just subtle adjustments:

- Slight adjustment in risk areas
- Slight adjustment to storm timing window, moving a bit earlier into the afternoon
- Adjusted timing of non-thunderstorm wind gusts in OH

Note: A broad timing window for storm activity is provided, as multiple rounds of storms are possible this afternoon. Isolated storm activity may begin as early as 1-2pm this afternoon, with the stronger storm activity and greater storm coverage expected late this afternoon into this evening.

Additionally, due to the offending cold front being extremely slow moving, a marginal risk of strong/severe isolated thunderstorms has been added for Friday.

FE PA Storm Report

Thursday, May 1, 2025 @ 1234

Update:

One last update this afternoon, with a few small changes: 1) pull the higher risk of damaging storms a bit westward into central OH for this afternoon, and 2) pull the general storm risk a bit east to include portions of Maryland (Potomac Edison) this evening.

No changes to Friday's forecast at this time.

FE PA Storm Report

Friday, May 2, 2025 @ 0837

Update:

Adjustments this morning:

- Added areas of northeast OH/northwest PA and southern WV where scattered storms are slightly more likely this afternoon and evening
- Minor adjustments to timing

Added an area in eastern FE on Saturday afternoon/evening where an additional round of scattered thunderstorms is possible.

FE PA Storm Report

Friday, May 2, 2025 @ 1317

Update:

Adjustments this afternoon:

- Slight increase in storm risk for areas of OH/northwestern PA/western WV; slight adjustment to expand risk a bit east in eastern PA & MD.
- Adjusted time window to account for storm development a few hours ahead of schedule this afternoon.

No changes to Saturday's forecast at this time.

FE PA Storm Report

Saturday, May 3, 2025 @ 0841

Update:

The bulk of the strong storm/damaging wind threat will shift east today, to areas of eastern and southern FE.

Adjustments this morning:

- Slight increase in storm risk for a narrow band stretching through eastern WV, MD, eastern PA and northern NJ. This is where the highest ‘concentration’ of storm activity is expected this afternoon and evening.
- Small additional adjustments to the overall storm threat and general timing.

Isolated storm activity is possible (again) across a similar area of FE on Sunday; at this point, the damaging whether risk is low enough Sunday is not included in this alert. An alert for Sunday may be needed at a future time.

Sunday, May 4, 2025 @ 0818

Update:

An additional round of isolated thunderstorms is possible this evening across areas of southern PA, MD, and WV.
