TO ALL PARTIES OF RECORD

Application of PPL Electric Utilities for approval to alter the public crossing (DOT# 589 529 A) where State Route 2002 (East Main Street) crosses, above grade, the tracks of East Penn Railroad in Emmaus Borough, Lehigh County.

To Whom It May Concern:

By application filed with the Commission on March 19, 2025, PPL Electric Utilities seeks Commission approval to alter the public crossing (DOT# 589 529 A) by the replacement of an existing utility pole and raising of the existing aerial cables where State Route 2002 (East Main Street) crosses, above grade, the tracks of East Penn Railroad in Emmaus Borough, Lehigh County

One pole will be replaced and the aerial cables will be raised within the right-of-way of East Main Street and East Penn Railroad. The proposed raising of these aerial cables will provide a minimum vertical clearance of 17.5' from the highway bridge structure (highway bridge is above the rails at an unknown vertical clearance) to the lowest-in-height cable at the referenced crossing.

The Commission hereby establishes its jurisdictional limits at the subject crossing as the area within the confines of the railroad right-of-way and the highway right-of-way.

In its application, PPL Electric Utilities states that the proposed installation is necessary to provide adequate, efficient, and reasonable service to the public in Lehigh County and surrounding areas.

PPL Electric Utilities will be directed to perform the necessary installation, provide for maintenance and protection of highway and pedestrian traffic during installation and accept future maintenance responsibility for the new pole and altered facilities, at its sole cost and expense. The cost of the project at the subject crossing is anticipated to be approximately \$10,000.

All work is to be performed in accordance with the plans attached to the application as "Exhibit A".

PPL Electric Utilities has served a copy of the application and installation plan to all parties in interest. All parties in interest were queried by letter dated May 22, 2025, as to any objection to the subject application. None of the parties have responded with any objection to the subject application or plans.

The Commission has exclusive jurisdiction in crossing alterations and is the final arbiter of any fees associated with a crossing application. Any conditions, including fees associated with a crossing application, must be approved by the Commission.

Upon full consideration of the matters involved, we find that a hearing is not necessary and that a Secretarial Letter may be issued approving the application.

The Commission issues this Secretarial Letter in accordance with Section 2702 of the Public Utility Code and finds that the alteration of the crossing is necessary and proper for the service, accommodation, convenience, or safety of the public.

The application of PPL Electric Utilities is approved as herein directed:
