Re: Duquesne Light Company – Docket No. M-2025-3052814

Secretary Matthew Homsher:

Enclosed please find a written outage report for the storm event that occurred in Duquesne Light Company's (Duquesne or the Company) service territory on Tuesday, April 29, 2025, pursuant to 52 Pa. Code § 67.1. This report is being re-filed with an updated docket number. The Company respectfully requests that it replace the report originally filed on June 18, 2025 in its entirety.

Please note, the Company recently launched an Outage Management System but continues to use its legacy system for the purposes of PUC reporting. As such, you may note differences between the reported data contained in this report and that communicated publicly during the event. See Appendix 4 for more detail.

Should you require additional information, please contact me at (412) 393-8324.

A handwritten signature in blue ink that reads "Wesley Terek". The signature is fluid and cursive, with the first name "Wesley" and last name "Terek" clearly distinguishable.

- (b) Approximate number of outage cases and trouble cases for each county affected during the event:

Allegheny County had a total of 3,634 troubled locations and 821 outages while Beaver County had a total of 800 troubled locations and 252 outages for a combined total of 4,434 troubled locations and 1,073 outages in Duquesne Light's service territory.

- (c) Approximate number of outages for each county affected during the event:

Allegheny County had a total of 210,857 customers and Beaver County had a total of 54,448 customers for a combined total of 265,305 customers affected throughout this storm event.

- (d) Approximate number of outage cases exceeding 6 or more hours in duration:

A total of 981 outage cases exceeded six or more hours in duration.

- (e) A listing of each outage case exceeding 6 or more hours in duration, including the following information:

A listing of each outage case exceeding six or more hours in duration can be found in *Appendix 1 - Outage Cases Exceeding Six or More Hours in Duration*.

(f) Reason for the interruption or outages:

At approximately 1700 on Tuesday, April 29, 2025, Duquesne Light's service territory was affected by severe thunderstorms with damaging winds. This weather caused downed power lines, fallen trees, and damage to our poles and equipment. The National Weather Service (NWS) reported that the highest wind speed during this storm was 41 mph and the highest wind gust recorded was 71 mph. Wind gusts of upwards of 79 mph were reported.

For additional weather information, please see section (m) of this report.

(g) Projected time of restoration:

The projected time of restoration for the majority of our customers was set for 2300 on Wednesday, May 7, 2025.

(h) The number of utility workers, contract workers, and workers received as mutual aid assigned specifically to the repair work by general function, that is linemen, troublemen, tree crews, and the like:

Utility / Company	# of Workers	General Function
Duquesne Light	215	Lineworkers
Duquesne Light	52	Troubleshooters

APPENDIX 4

Key reporting difference between DLC's Outage Management System (OMS) and legacy system of record, the Outage History Database (OHDB)

In June 2024, Duquesne Light Company ("Company") implemented an Outage Management System (OMS). Prior to implementation of this system, the Company utilized its Outage History Database (OHDB). Under the legacy system, reliability metrics are reported in kilovolt-amperes (kVA). Based on the kVA out of service, the Company can estimate the approximate number of customers out of service. In contrast, the OMS provides an exact number of customers out of service.

The Company is currently running both systems in parallel and continues to use OHDB data for PUC reporting. Once the Company has developed sufficient operational experience in the OMS, it will petition the PUC to move from its current kVA-based reporting to customer-based reporting.

During the April 29, 2025 storm restoration, the Company provided public updates on customers out of service based on OMS data. Thus, the numbers of customers reported herein, which are based on OHDB data, differ in some responses from data on customers out of service reported publicly during the storm event, which were based on OMS data.

For transparency, the Company is including below the responses for items (a) through (d) of section "5. Interruption or Outage" if they were reported using the OMS data.

5. Interruption or Outage:

(a) Number of customers affected:

366,501 customers, constituting approximately 60% of the 612,157 customers in Duquesne Light's service territory.

(b) Approximate number of outage cases and trouble cases for each county affected during the event:

Allegheny County had a total of 3,634 troubled locations and 3,461 outages while Beaver County had a total of 800 troubled locations and 649 outages for a combined total of 4,434 troubled locations and 4,110 outages in Duquesne Light's service territory.

(c) Approximate number of outages for each county affected during the event:

Allegheny County had a total of 305,833 customers and Beaver County had a total of 60,668 customers for a combined total of 366,501 customers affected throughout this storm event.

(d) Approximate number of outage cases exceeding 6 or more hours in duration:

A total of 3,724 outage cases exceeded six or more hours in duration.
