LANCASTER PA 17603

To whom it may concern:

The Commission's regulations at 52 Pa. Code §29.314(b)(1) require that all taxis must be equipped with meters. However, in 2016 the Commission became aware that new computer, cell phone, and tablet applications were likely to result in taximeters becoming obsolete.

In 2017, as a result of legislative action, the Commission adopted several new regulations which recognized that taxi companies desired to utilize devices such as tablet and cell phone apps. One of those regulations, 52 Pa. Code §29.314(b)(9), states that:

Nothing herein precludes the use of an alternative device to traditional mechanical meters, such as a tablet or computer, that the Commission approves upon petition of a certificate holder. An alternative device must meet the requirements established for meters, including accuracy and consumer information requirements.

The Commission received your petition on August 6, 2025. An officer of the Motor Carrier Enforcement Division conducted an inspection on August 14, 2025 and the new equipment is herewith approved.

Sincerely,

A handwritten signature in blue ink that reads 'Tatjana Roth'.

Tatjana Roth, Supervisor
Bureau of Technical Utility Services
MCC Division
