PREHEARING CONFERENCE ORDER

You are receiving this Order because you have been identified as a person who may have an interest in the above captioned proceeding filed with the Pennsylvania Public Utility Commission (Commission). This Order will describe the process the Commission will follow in considering this application, the options you may have for involvement, and how to become a party to this case. There is no requirement that you participate, however, if you do not, then the case will proceed and be decided without your input.

Application Summary

On August 8, 2025, Mid-Atlantic Interstate Transmission, LLC (MAIT or Applicant) filed an Application pursuant to 52 Pa. Code 57.74(c). The project proposes to construct approximately 12.9 miles of 230 kilovolt (kV) transmission line by rebuilding the existing 115 kV and 138 kV transmission lines between the Pennsylvania-Maryland border and the Hunterstown Substation to double-circuit 230/115 kV and 230/138 kV lines, respectively. The proposed Carroll-Hunterstown 230 kV Transmission Line will cross 12.9 miles in Straban, Mount Pleasant, Mount Joy, and Germany Townships in Adams County, Pennsylvania. It is proposed to be constructed within an existing transmission corridor, which is currently occupied

by the Carroll-Germantown 138 kV, Germantown-Lincoln 115 kV, Lincoln-Riley 115 kV, and Riley-Hunterstown 115 kV transmission lines. The Carroll-Hunterstown 230 kV Transmission Line is needed to increase the current carrying capacity of the existing Carroll-Hunterstown corridor that connects the Hunterstown Substation in Adams County, Pennsylvania to Carroll Substation in Carroll County, Maryland to meet current and expected transmission system needs in Adams and Carroll counties and surrounding areas.

The proposed route for the Carroll-Hunterstown 230 kV Transmission Line occupies existing ROW on 85 property tracts, including land upon which the existing Germantown, Lincoln, Straban, and Hunterstown substations are situated. New ROW is required for one parcel that currently accommodates the existing Hunterstown Substation in Adams County, Pennsylvania. MAIT does not anticipate any directly impacted landowners will object to the Carroll-Hunterstown 230 kV Transmission Line. In total, the proposed Carroll-Hunterstown 230 kV Transmission Line is approximately 24.2 miles in length, with 12.9 miles in Pennsylvania and 11.3 miles in Maryland.

Construction on the Carroll-Hunterstown Improvements Project is scheduled to begin on or about April 1, 2027, subject to Commission approval, to meet an in-service date of June 1, 2028. MAIT has requested that the Commission issue its final ruling in this matter by January 2027.
