The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Minimum Residual Disinfectant Level (MinRDL)
The minimum level of residual disinfectant required at the entry point to the distribution system.

Treatment Technique (TT)
A required process intended to reduce the level of a contaminant in drinking water.

Mrem/year = millirems per year
(a measure of radiation absorbed by the body)

pCi/L = picocuries per liter
(a measure of radioactivity)

ppb = parts per billion,
or micrograms per liter (µg/L)

ppm = parts per million,
or milligrams per liter (mg/L)

ppq = parts per quadrillion,
or picograms per liter

ppt = parts per trillion,
or nanograms per liter

Detected Sample Results

Contaminants

Contaminant	Units	MCL in CCR Units	Maximum Contaminant Level Goal (MCLG)	Level Detected	Range of Detections	Sample Date	Compliance Achieved Yes/No	Source
Free Chlorine	ppm	MRDL = 4	MRDLG = 4	0.96	0.74 - 1.17	Jan-Dec 2022	Yes	Water additive used to control microbes
Trihalomethanes	ppb	80	0	36.8	36.8	Oct 2022	Yes	By-product of disinfection addition
Combined Uranium	pCi/L	30	30	0.74	0.74	Feb 2019	Yes	Erosion of natural deposits
Arsenic	ppb	10	0	4.0	4.0	May 2021	Yes	Erosion of natural deposits
Barium	ppm	2	2	0.051	0.051	May 2021	Yes	Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits
Nitrate (as Nitrogen)	ppm	10	10	1.48	1.48	Jan 2022	Yes	Runoff from fertilizer use
Haloacetic Acids	ppb	60	0	4.6	4.6	Oct 2022	Yes	By-product of disinfection

Entry Point Disinfectant Residual

Contaminant	Units	Minimum Disinfectant Residual	Lowest Level Detected	Range of Detections	Sample Date	Compliance Achieved Yes/No	Source
Free Chlorine	ppm	0.40	0.97	0.97 - 1.59	Jan-Dec 2022	Yes	Water additive used to control microbes

Lead and Copper

Contaminant	Units	Action Level (AL)	Maximum Contaminant Level Goal (MCLG)	90th Percentile Value	Number of Sites Above the EPA Action Level	Compliance Achieved Yes/No	Source
Lead	ppb	15	0	4.0	0 out of 6	Yes	Corrosion of household plumbing
Copper	ppm	1.3	1.3	0.29	0 out of 6	Yes	Corrosion of household plumbing

Microbiological Contaminants

Microbial (related to Assessments/Corrective Actions regarding TC positive results)					
Contaminant	**Treatment Technique**	**Maximum Contaminant Level Goal (MCLG)**	**Assessments/ Corrective Actions**	**Compliance Achieved Yes/ No**	**Source**
Total Coliform Bacteria	Any system that has failed to complete all the required assessments or correct all identified sanitary defects is in violation of the treatment technique requirement	N/A	0 – None Needed	Yes	Naturally present in the environment

Microbial (related to E. coli)					
Contaminant	**Maximum Contaminant Level (MCL)**	**Maximum Contaminant Level Goal (MCLG)**	**Positive Samples**	**Compliance Achieved Yes/No**	**Source**
E. coli	Routine and repeat samples are total coliform-positive and either is E. coli-positive or system fails to take repeat samples following E. coli-positive routine sample or system fails to analyze total coliform-positive repeat sample for E. coli	0	0	Yes	Human and animal fecal waste

Microbial (related to E. coli)					
Contaminant	**Treatment Technique**	**Maximum Contaminant Level Goal (MCLG)**	**Assessments/ Corrective Actions**	**Compliance Achieved Yes/No**	**Source**
E. coli	Any system that has failed to complete all the required assessments or correct all identified sanitary defects is in violation of the treatment technique requirement	N/A	0 - None Needed	Yes	Human and animal fecal waste

Violations and Other Information

Other Violations:
The York Water Company failed to report results for a distribution system chlorine residual in a timely manner for July of 2022. The chlorine residual was in the normal range and was just reported late.

Also, York Water failed to monitor Trihalomethanes and Haloacetic Acids in a timely manner in the 3rd quarter of 2022. Neither of these events required action by or from you, the customer as the resultant levels measured and reported were well below the regulatory limits set by the PADEP and the USEPA. York Water has revised its processes to ensure these samples are collected in a timely manner in the future.

Information about Lead:
Infants and children who drink water containing lead in excess of the action level could experience delays in their physical or mental development. Children could show slight deficits in attention span and learning abilities. Adults who drink this water over many years could develop kidney problems or high blood pressure.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The York Water Company is responsible for providing high quality drinking water but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by following the 6-3-3 rule. If your water has not been used for six hours, flush your tap for 3 minutes, about 3 gallons of water, before consuming. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at http://www.epa.gov/safewater/lead.

2022 Letterkenny Water System

Public Water System I.D. 7280045

The York Water Company — 1816 2022 — Year 207 — "That Good York Water"

This Report Is to Inform You about The Fine Quality Water and Services The York Water Company Delivers to You Every Day.

Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and to protect our water resources. We are committed to ensuring the quality of your water.

'Este informe contiene información muy importante acerca de su agua potable. Tradúzcalo ó hable con alguien que lo entienda bien.

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in untreated source water include:

• Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.

• Inorganic contaminants, such as salts and metals, which can be naturally-occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.

• Pesticides and herbicides, which may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses.

• Organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, and septic systems.

• Radioactive contaminants, which can be naturally-occurring or be the result of oil and gas production and mining activities.

Your water source is the Letterkenny Reservoir located on the Conodoguinet Creek in Letterkenny and Lurgan Townships. The source water flows by gravity approximately 10 miles to our purification plant which is located in Greene Township.

We are pleased to report that our drinking water is safe and meets Federal and State requirements. Those items that were detected during our testing process are detailed on the following pages. If you have any questions about the Water Quality Report, please contact Steve Aumen, Facilities & Treatment Superintendent at 717-267-6025, or email customer.service@yorkwater.com.

If you have any other questions concerning the Company and its operations, please contact JT Hand, President and CEO. We want our valued customers to be informed about their water utility at 717-845-3601, or email customer.service@yorkwater.com.

Some People May Be More Vulnerable to Contaminants in Drinking Water than The General Population.

Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. Environmental Protection Agency/Centers for Disease Control and Prevention guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline at 1-800-426-4791.

Monitoring Your Water

We constantly monitor for contaminants in your drinking water according to federal and state laws. The following tables show the results of our monitoring for the period of January 1 to December 31, 2022. The State allows us to monitor for some contaminants less than once per year because the concentrations of these contaminants do not change frequently. Some of our data is from prior years in accordance with the Safe Drinking Water Act. The date has been noted on the sampling results table.ΩΩ

Definitions

To help you better understand these terms, we've provided the definitions which appear on this page.

Action Level (AL)
The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Maximum Contaminant Level (MCL)
The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG)
The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Residual Disinfectant Level (MRDL)
The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG)
The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Minimum Residual Disinfectant Level (MinRDL)
The minimum level of residual disinfectant required at the entry point to the distribution system.

Treatment Technique (TT)
A required process intended to reduce the level of a contaminant in drinking water.

Mrem/year = millirems per year

Other Information

Information about Lead:

Lead Action Level was exceeded during the most recent round of Lead and Copper Monitoring. This exceedance was due to the collection of water samples from commercial buildings taps that were not commonly used. A water tap with little or no use will cause poor water quality.

Infants and children who drink water containing lead in excess of the action level could experience delays in their physical or mental development. Children could show slight deficits in attention span and learning abilities. Adults who drink this water over many years could develop kidney problems or high blood pressure.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The York Water Company is responsible for providing high quality drinking water but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by following the 6-3-3 rule. If your water has not been used for six hours, flush your tap for 3 minutes, about 3 gallons of water, before consuming. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at http://www.epa.gov/safewater/lead.

2022 Western Cumberland Water System

Public Water System I.D. 7010038

This Report Is to Inform You about The Fine Quality Water and Services The York Water Company Delivers to You Every Day.

Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and to protect our water resources. We are committed to ensuring the quality of your water.

'Este informe contiene información muy importante acerca de su agua potable. Tradúzcalo ó hable con alguien que lo entienda bien.

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in untreated source water include:

• Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.

• Inorganic contaminants, such as salts and metals, which can be naturally-occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.

• Pesticides and herbicides, which may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses.

• Organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, and septic systems.

• Radioactive contaminants, which can be naturally-occurring or be the result of oil and gas production and mining activities.

Your water source is two groundwater wells located inside the physical boundaries of the Lincoln Estates Community. The water from these wells is softened and disinfected as the only form of treatment.

We are pleased to report that our drinking water is safe and meets Federal and State requirements. Those items that were detected during our testing process are detailed on the following pages. If you have any questions about the Water Quality Report, please contact Douglas Crawshaw, Water Quality Manager at 717-848-2984, or email customer.service@yorkwater.com.

If you have any other questions concerning the Company and its operations, please contact JT Hand, President and CEO. We want our valued customers to be informed about their water utility at 717-845-3601, or email customer.service@yorkwater.com.

Violations and Other Information

Other Violations:

The York Water Company reported a single chlorine residual from the distribution system late, in July of 2022. The reading was in the ideal range, but was reported late.

Information about Lead:

Infants and children who drink water containing lead in excess of the action level could experience delays in their physical or mental development. Children could show slight deficits in attention span and learning abilities. Adults who drink this water over many years could develop kidney problems or high blood pressure.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The York Water Company is responsible for providing high quality drinking water but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by following the 6-3-3 rule. If your water has not been used for six hours, flush your tap for 3 minutes, about 3 gallons of water, before consuming. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at http://www.epa.gov/safewater/lead.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
QUALITY OF SERVICE OPERATING PRESSURE STANDARDS

53.53 IX. Quality of Service

D. Indicate whether the company is in compliance with 52 Pa. Code, § 65.5 regarding normal operating pressure standards, and with 52 Pa. Code, § 65.6(d) regarding pressure surveys at regular intervals.

2.
a. Provide details on any major water pressure problems which had occurred since the last rate proceeding in any part of the water distribution system.
b. Describe any action taken on a temporary basis, and the long term solutions developed to address any major water pressure problems.

Response: The Company is in compliance with Commission regulations regarding normal operating pressure standards and pressure surveys at regular intervals.

No major water pressure problems have occurred since the last rate proceeding.

The ordinary range of pressure in the distribution system is 30 psi to 130 psi. System pressures are maintained by the hydraulic grade that is established by the level of water in various tanks and reservoirs and by pumping.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
QUALITY OF SERVICE SERVICE INTERRUPTIONS

53.53 IX. Quality of Service

D. Water and Wastewater Utilities

3.

Provide support to demonstrate that water service is being furnished on a continuous basis by supplying a summary of the company records of each service interruption greater than 24 hours since the last rate proceeding.

Response: The Company has not had a service interruption greater than 24 hours since the last rate case proceeding.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
QUALITY OF SERVICE CUSTOMER COMPLAINTS

53.53 IX. Quality of Service

D. Water and Wastewater Utilities

4.

Provide a discussion of the company's policy, or provide a copy of the policy if in written form, on tracking and responding to customer complaints.

a. Provide a summary report demonstrating the company's compliance with 52 Pa. Code, § 65.3 regarding the full and prompt investigation of service or facility complaints and the record keeping requirments of such complaints.

Response: The Company responds to informal and formal PUC complaints in accordance with the requirements of 52 Pa. Code 65.3

The Company receives complaints and/or inquiries via telephone, email, in-person interaction and social media platforms. In most cases, complaints are resolved at the customer service employee level, and notes are entered in the Company's customer information system as part of the customer's history file. Complaints regarding service or facilities that require additional intervention are escalated to a supervisor for follow-up. When necessary or appropriate, the Company may issue a Company Report or written response to the customer.

All inquiries are tracked for action taken prior to being closed out, and if the inquiry requires action by someone outside of the customer service department, a customer work order will be created to track the activity until completion.

The Company has also established a special link on its web page through which customers can submit complaints or inquiries directly to the customer service department. The President and Chief Executive Officer, the HR Department, and the VP of Customer Service are copied on all of these submissions. The VP of Customer Service monitors the complaint activity daily and coordinates the appropriate response to the inquiry.

In November and December 2024, a live interviewer telephone, mail, and online customer satisfaction survey was conducted by Problosky Research to gather customer feedback.

The Company has a VoIP telephone system. The telephone system has a call back feature. Each call is returned in a timely fashion.

Complaints or inquiries requiring some action on the part of the Company are logged into the Company's customer information system as part of the customer's account record.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
QUALITY OF SERVICE DISTRIBUTION SYSTEM MAPPING

53.53 IX. Quality of Service

D. Water and Wastewater Utilities

5. Indicate whether the company is in compliance with 52 Pa. Code, § 65.4(b) regarding complete and current mapping of the entire distribution system.

Response: The Company keeps complete maps, plans and records of its entire distribution system for its water service showing the size, character and location of each main, street valve and service line, as well as its collection systems for waste-water service showing the size, character and location of each sewer line, manhole, and lateral.

53.53 IX. Quality of Service

D. Water and Wastewater Utilities

6. Provide a summary report demonstrating the company's efforts in water conservation, since the last rate proceeding, pursuant to 52 Pa. Code, § 65.20.

Response: Education - The Company and its employees undertake an active role in the community to stress the need for water conservation. Speakers are provided to local organizations to explain the need for water conservation. The Company provides text books and a film to local school and scout groups on water conservation. The Company has also sponsored and provided instruction for the Boy Scout merit badge on Water and Soil Conservation.

Water Audit For Large Users - The Company has assigned a team of employees to complete the water audit process in a continuous improvement effort.

Efficiency Plumbing Fixtures - Most municipalities in which the Company serves have building code provisions which require the installation of water saving plumbing fixtures.

Unaccounted For Water - Refer to Exhibit No. HXI-5, the Company's water audit team also is involved with this process.

Leak Detection - Leak detection and repair is one of the Company's highest priorities. The Company has an employee whose sole responsibility is leak detection. During calendar year 2024, the Company's Leak Detection Coordinator detected 184 leaks throughout the Company's service territory.

In 2021, the Company also invested in mobile leak detection equipment to continue to search for water leaks in the distribution system.

Our Distribution Department Superintendent periodically contacts municipal street crew superintendents, police and fire officials in the municipalities served by The York Water Company to remind and encourage them to contact the Company if they observe any unusual water flows in the streets or at valve boxes or hydrants. All such reports are promptly investigated.

Metering - The Company meters all customer usage with the exception of fire service. All meter readings are checked during the billing process to make sure that the most recent consumption is consistent with the historical average. If the reading is abnormal, before billings are mailed, a telephone call is placed to the customer to tell them about the abnormal reading and to encourage them to investigate whether they have any leaking fixtures. The Company has received high praise from its customers for the validation procedure.

Conservation Plan - The Company seeks to encourage cost-effective water conservation in various contacts with its customers.
Each year our customers receive bill inserts that describe ways to conserve water. In addition, a brochure that the Company provides to all new customers contains a section on water conservation. Also, the Company's Consumer Confidence Report (Refer to Exhibit No. HIX-1) contains water conservation information.

The Company has a Drought Contingency Plan, approved by the Commission and the Department of Environmental Protection, filed as a part of its Tariff.

The York Water Company became a partner of EPA's Water Sense program in 2008. The Company provides information on its website and through a bill insert regarding this program. The program seeks to educate Americans about saving water and protecting the environment.

THE YORK WATER COMPANY

QUALITY OF SERVICE METER TESTING

53.53 IX. Quality of Service

D. Water and Wastewater Utilities

7. Provide a discussion of the company's policy regarding meter requirements, replacements and testing. State if the company's procedures are in compliance with 52 Pa. Code, § 65.8(b).
   a. Provide meter test records as required in 52 Pa. Code, § 65.8(c) for the 50 meters most recently removed from service.
   b. Provide a discussion of the company's policy and history of compliance with 52 Pa. Code, § 65.9 regarding adjustment of bills for meter error within the last year.

Response: The Company's policies regarding meter requirements, replacements and testing and adjustment of bills for meter error are in compliance with 52 Pa. Code, Paragraphs 65.8 and 65.9.

Meter test records for the meters removed from service thus far in 2025 are attached.

53.53 X. Balance Sheet

D. Water and Wastewater Utilities

4. Describe the nature and/or origin and amounts of Notes Receivable, Accounts Receivable from Associated Companies, and other significant receivables, other than Customer Accounts, which appear on Balance Sheet.

Response: Notes Receivable

Note Receivable-Mt Zion Water District (Springettsbury Township) (Filed with the Commission at Docket No. U-850075)	255,481

The Company was approached by officials of the above-named municipalty regarding the extension of the Company's water mains to serve the municipality. Residents in the municipality were experiencing contamination problems with their wells and public water service was believed to be the best solution. The Company wanted to assist in improving the water quality in these troubled areas. However, the municipality was unwilling to pay for the facilities, and the Company could not compel existing residents to make contributions.

The Company developed a solution that charges residents a reasonable fee for connection while not burdening the municipality. The Company provided the funds for the construction of the facilities. For accounting purposes the Company lent funds to the municipalty to cover the cost of the project. The municipalty concurrently returned the funds to the Company which were recorded as an advance for construction.

As a part of the arrangement, the facilities constructed were leased to the municipality. However, there are no lease payments. The Company operates the facilities as agent for the municipality. Customers are billed directly by the Company. Customers in the water districts are charged the Company's repumped system rates because the water district is connected to the repumped system. Sales volume of, and revenues received from customers in the water district, are included in the Company's pro forma revenues, as set forth in Exhibit No. HII-2. The municipality, as lessee of the facilities, charges an application fee for each customer requesting to be connected to the system. In addition, the water district requires customers to pay surcharges. Amounts received from application fees and surcharges are paid to the Company, and the Company applies such amounts as payment of interest on the funds lent by the Company to the municipality, and as payment of the principal of the loan. In addition, as customers are connected to the system, the note receivable and the advance are reduced.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
NOTES RECEIVABLE, ACCOUNTS RECEIVABLE FROM ASSOCIATED COMPANIES AND OTHER ACCOUNTS RECEIVABLE AS OF DECEMBER 31, 2024

Accounts Receivable From Affiliated Companies

The York Water Company had no accounts receivable from associated companies as of December 31, 2024.

Other Accounts Receivable	457,036

The York Water Company classifies other significant receivables, other than customer accounts, in Account No. 142, Other Accounts Receivable. A detail of Other Accounts Receivable as of December 31, 2024 is shown below.

The York Water Company Employee Stock Purchase Plan (a)	45,748
Customer Advances for Construction	373,905
Reimbursement for Damaged Property	25,831
Bulk Water	4,230
Electric Curtailment Receivable	13,128
Other Miscellaneous Accounts Receivable	4,194
Reserve For Uncollectible Accounts	(10,000)
	457,036

(a) The York Water Company has an Employee Stock Purchase Plan program. Stock purchases are paid entirely by employees through employee payroll deductions. Stock purchases are made on a quarterly basis. Pending the actual stock purchases, the employee payroll deductions are deposited in a segregated bank account, and are credited on the Company's books as "Amounts Withheld From Employees". Interest earned on the payroll deductions also is credited to the employees. When stock purchases are made after the end of the quarter, the purchase price of the stock is credited to "Common Stock Issued" and debited to "Other Accounts Receivable." The Company is subsequently reimbursed for the sale of shares purchased through the plan from the monies deposited in the segregated bank account by debiting "Amounts Withheld From Employees" and crediting "Other Accounts Receivable."

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
ACCUMULATED PROVISION FOR UNCOLLECTIBLE ACCOUNTS
AS OF DECEMBER 31, 2024

53.53 X. Balance Sheet

D. Water and Wastewater Utilities

5. Provide the amount of accumulated reserve for uncollectible accounts, method and rates of accrual, amounts accrued and amounts written-off in each of last three years.

Response: The York Water Company uses the reserve method of recording uncollectible accounts for book purposes.

The amount of accumulated reserve as of December 31, 2024, 2023 and 2022 and the amounts accrued and written-off for twelve months ended December 31, 2024, 2023 and 2022 are shown below.

	Twelve Months Ended December 31,			
Year	Accumu-lated Reserve	Annual Accrual	Write-offs	Recoveries of Amounts Previously Written-off
(1)	(2)	(3)	(4)	(5)
2024	1,600,000	1,071,758	497,416	30,658
2023	1,000,000	538,152	412,798	24,646
2022	850,000	431,852	470,874	39,023

Refer to Exhibit No. HIII-2-2 for an adjustment of uncollectible accounts during the twelve months ended December 31, 2024 to a two-year ratio of the net of actual uncollectible accounts written-off to total operating revenues at existing rates.

Refer to Exhibit No. HIII-2-40 for an adjustment of uncollectible accounts under proposed rates during the twelve months ended December 31, 2024 to a two-year ratio of the net of actual uncollectible accounts written-off to total operating revenues.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
DEFERRED ASSETS AS OF DECEMBER 31, 2024

53.53 X. Balance Sheet

D. Water and Wastewater Utilities

8. Explain in detail, including the amount and purpose, the deferred asset accounts that currently operate to effect or will at a later date effect the operating account supplying:

a. Origin of these accounts.

b. Probable change to this account in the near future.

c. Amortization of these amounts currently charged to operations or to be charged in the near future.

Response: (a), (b) and (c)

Account (1)	As of December 31, 2024 (2)
Unamortized Debt Expense	2,665,793

This account includes the unamortized portion of debt expense as of December 31, 2024 associated with the issuance of long-term debt. The debt expense is amortized over the respective terms of long-term debt by crediting this account and debiting Account No. 428, Amortization of Debt Expense.

Account (1)	As of December 31, 2024 (2)
Other Deferred Debits - Deferred Rate Case Expense	214,986

Deferred rate case expenses are unamortized balance of the prior rate case being amortized over 48 months on the corporate books. The amortization ends in February 2027.

Refer to Exhibit No. HIII-2-1 for the normalization of the estimated expenses of this rate case over forty-eight months.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
DEFERRED ASSETS AS OF DECEMBER 31, 2024

Account (1)	As of December 31, 2024 (2)
Other Deferred Debits- Cash Value of Insurance Policies	4,934,554

The Company has a supplemental retirement benefit plan for five key employees of the Company consisting of the President and Chief Executive Officer, Chief Financial Officer, Chief Administrative Officer and General Counsel, Vice President-Operations, and Vice President-Engineering and seven retired former key employees. The plan is funded through life insurance policies.

The Company has a deferred savings plan for fifteen of its management and supervisory employees and ten retired former management employees. The plan is also funded through life insurance policies.

The deferred debit related to both plans' benefits represents the current cash surrender value of the life insurance policies that have been purchased to reimburse the Company for the costs of the plans.

The Company also reflects on its books of account as a deferred credit the current accrued liability with respect to the deferred compensation benefits.

The expenses and income associated with the Company's supplemental retirement and deferred savings plans have been eliminated from this rate case in accordance with the Settlement Agreement approved by the Commission under Docket No. R-000016236 with the exception of expenses from the deferred savings plan for employees not in the defined benefit pension plan.

Account (1)	As of December 31, 2024 (2)
Other Deferred Debits - Preliminary Survey	7,056

This account includes expenditures for preliminary surveys, plans and investigations made for the purpose of determining the feasibility of projects under contemplation.

These expenditures are not included in the Company's rate base nor in the cost of service.

THE YORK WATER COMPANY

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
OTHER DEFERRED CREDITS AS OF DECEMBER 31, 2024

53.53 X. Balance Sheet

D. Water and Wastewater Utilities

10. Provide details of other deferred credits as to their origin and disposition policy (e.g. amortization)

Response: Other Deferred Credits-Interest Rate Swap 385,890

The Company utilizes an interest rate swap agreement to convert its variable rate debt to a fixed rate (cash flow hedge). As of December 31, 2024 the Company recorded an unrealized loss on the Interest Rate Swap. The Interest Rate Swap Agreement will expire on October 1, 2029.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
OTHER RESERVES

53.53 X. Balance Sheet

D. Water and Wastewater Utilities

11. Provide details of any significant reserves, other than depreciation and bad debt, appearing on balance sheet.

Response:

There are no reserves other than depreciation and bad debts on the Company's balance sheet.

There is a deferred regulatory liability on the Company's balance sheet for the basis difference due to the IRS tangible property regulation adoption in 2014. The Company recorded a catch-up deduction that represents the federal and state income tax deduction for the years 2007 - 2013.

The amortization of the catch-up deduction over fifteen years was specifically approved by the Commission under the Settlement Agreement under Docket No. R-2018-3000019. The amortization period began on March 1, 2019 and ends on February 28, 2034. The unamortized balance as of December 31, 2024 was $2,375,540.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
RETAINED EARNINGS FOR TWELVE MONTHS ENDED DECEMBER 31, 2024, 2023 AND 2022

53.53 X. Balance Sheet

D. Water and Wastewater Utilities

12. Provide an analysis of unappropriated retained earnings for the test year and two preceding years.

Response:

		Twelve Months Ended December 31, 2024	Twelve Months Ended December 31, 2023	Twelve Months Ended December 31, 2022
Balance at Beginning of Period		85,003,947	72,962,505	64,392,117
Add:	Net Income for Period	20,325,076	23,757,004	19,580,176
Deduct:	Cash Dividends for Period	12,226,242	11,715,562	11,009,788

D. Water and Wastewater Utilities

2. Supply a copy of internal and independent audit reports of the test year and prior calendar year, noting any exceptions and recommendations and disposition thereof.

Response: The Company does not have an internal audit report. The Independent Auditor's Reports covering the financial statements for the years ended December 31, 2024 and 2023 are a part of The York Water Company's 2024 and 2023 Annual Report on Form 10-K. The audit reports are attached.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Stockholders and the Board of Directors of The York Water Company:

Opinion on the Financial Statements

We have audited the accompanying balance sheets of The York Water Company (the "Company") as of December 31, 2024 and 2023, the related statements of income, common stockholders' equity, and cash flows, for each of the two years in the period ended December 31, 2024, and the related notes and financial statement schedule listed in Item 15(a)2 (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2024 and 2023, and the results of its operations and its cash flows for each of the two years in the period ended December 31, 2024, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters

Critical audit matters are matters arising from the current period audit of the financial statements that were communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. We determined that there are no critical audit matters.

THE YORK WATER COMPANY
JANUARY 2024 STATEMENT OF INCOME UNAUDITED

	Month			
	Actual		Budget	
	January 2024	Change Over Same Month Last Year	Monthly Budget	Change Over Budget
Operating Revenues	$5,864,059	18.2%	$5,914,993	-0.9%
Operating Expenses	4,014,803	15.6%	3,864,011	3.9%
Interest Expense and Income Deductions	233,146	1.0%	172,853	34.9%
Income Taxes	396,213	24.0%	424,833	-6.7%
Net Income	$1,219,897	30.1%	$1,453,296	-16.1%

EXPLANATION:

Operating Revenues

Monthly operating revenues were 18.2% higher than the same period last year due primarily to the rate increase effective March 1st, 2023, partially offset by lower revenues from the Distribution Service Improvement Charge. Total per capita consumption for the month was 5.0% lower than the same period last year. Compared to budget, monthly actuals were 0.9% lower.

Operating Expenses

Operating expenses were 15.6% higher in January 2024 than January 2023 due primarily to higher expenses for distribution system maintenance, wages, depreciation, water treatment, and outside services, which were partially offset by the lower pension contribution. Compared to budget, monthly actuals were 3.9% higher due primarily to higher than expected expenses for distribution system maintenance and water treatment, which were partially offset by lower depreciation.

Interest Expense and Other Income Deductions

Interest expense and other income deductions for the month were 1.0% higher than the same period last year due primarily to higher interest expense, which was partially offset by higher capitalized interest. Compared to budget, monthly actuals were 34.9% higher than expected due primarily to lower capitalized interest.

Income Taxes

Monthly income taxes were higher than prior year due primarily to higher taxable income. Compared to budget, monthly income taxes were 16.1% lower. The effective tax rate for January 2024 was 24.5%, compared to 25.4% for January 2023.

EXPLANATION:

Operating Revenues

Monthly and year-to-date operating revenues were 23.4% and 20.7% higher, respectively, than the same periods last year due primarily to the rate increase effective March 1st, 2023, partially offset by lower revenues from the Distribution Service Improvement Charge. Total per capita consumption for the month and year-to-date periods was 1.6% and 3.3% lower, respectively, than the same periods last year. Compared to budget, monthly and year-to-date actuals were 2.1% and 0.6% higher, respectively.

Operating Expenses

Operating expenses were 13.7% higher in February 2024 than February 2023 due primarily to higher expenses for distribution system maintenance, depreciation, wastewater treatment, wages, and purchased power, which were partially offset by the lower pension contribution. Year-to-date operating expenses were 14.7% higher than last year due primarily to higher expenses for distribution system maintenance, depreciation, wages, wastewater treatment, outside services, water treatment, and purchased power, which were partially offset by the lower pension contribution. Compared to budget, monthly actuals were 1.9% higher due primarily to higher than expected expenses for distribution system maintenance and purchased power, which were partially offset by lower depreciation and wages. Year-to-date actuals were 2.9% higher due primarily to higher than expected expense for distribution system maintenance, which was partially offset by lower depreciation.

Interest Expense and Other Income Deductions

Interest expense and other income deductions for the month and year-to-date periods were 13.0% and 5.9% lower, respectively, than the same periods last year due primarily to higher capitalized interest, which was partially offset by higher interest expense. Compared to budget, monthly and year-to-date actuals were 66.0% and 43.1% lower, respectively, due primarily to higher than expected capitalized interest.

Income Taxes

Monthly and year-to-date income taxes were higher than prior year due primarily to higher taxable income. Compared to budget, monthly and year-to-date income taxes were 6.2% and 6.7% lower, respectively. The effective tax rate for the month and year-to-date periods ended February 2024 were 4.5% and 14.3%, respectively, compared to (18.7)% and 5.4% for the same periods in 2023.

EXPLANATION:

Operating Revenues

Monthly and year-to-date operating revenues were 4.2% and 14.5% higher, respectively, than the same periods last year due primarily to the rate increase effective March 1st, 2023, partially offset by lower revenues from the Distribution Service Improvement Charge. Total per capita consumption for the month and year-to-date periods was 0.1% higher and 2.2% lower, respectively, than the same periods last year. Compared to budget, monthly and year-to-date actuals were 2.1% and 1.1% higher, respectively.

Operating Expenses

Operating expenses were 8.4% higher in March 2024 than March 2023 due primarily to higher expenses for insurance, depreciation, and distribution system maintenance. Year-to-date operating expenses were 12.5% higher than last year due primarily to higher expenses for distribution system maintenance, depreciation, wages, insurance, wastewater treatment, outside services, and purchased power, which were partially offset by the lower pension contribution. Compared to budget, monthly actuals were 1.1% lower due primarily to lower than expected expenses for wages and depreciation, which were partially offset by higher insurance. Year-to-date actuals were 1.6% higher due primarily to higher than expected expenses for distribution system maintenance and insurance, which were partially offset by lower depreciation and wages.

Interest Expense and Other Income Deductions

Interest expense and other income deductions for the month were 56.9% higher than the same period last year due primarily higher interest expense and lower capitalized interest, which were partially offset by higher earnings on life insurance policies. Interest expense and other income deductions for the year-to-date period were 23.2% higher than the same period last year due primarily to higher interest expense, which was partially offset by higher capitalized interest and higher earnings on life insurance policies. Compared to budget, monthly actuals were 6.3% lower due primarily to higher than expected earnings on life insurance policies, lower interest expense and higher capitalized interest. Year-to-date actuals were 25.9% lower due primarily to higher than expected capitalized interest.

Income Taxes

Monthly income taxes were lower than prior year due primarily to higher deductions for tax repair expenditures and year-to-date income taxes were higher than prior year due primarily to higher taxable income. Compared to budget, monthly and year-to-date income taxes were higher. The effective tax rate for the month and year-to-date periods ended March 2024 were 8.0% and 12.2%, respectively, compared to 22.2% and 12.9% for the same periods in 2023.

EXPLANATION:

Operating Revenues

Monthly operating revenues were 3.5% lower than the same period last year due primarily to a decrease in consumption. Year-to-date operating revenues were 9.5% higher than the same period last year due primarily to the rate increase effective March 1st, 2023, partially offset by lower revenues from the Distribution Service Improvement Charge. Total per capita consumption for the month and year-to-date periods was 5.3% and 3.0% lower, respectively, than the same periods last year. Compared to budget, monthly and year-to-date actuals were 4.3% and 0.3% lower, respectively.

Operating Expenses

Operating expenses were 17.7% higher in April 2024 than April 2023 due primarily to higher expenses for depreciation, distribution system maintenance, wages, and wastewater treatment. Year-to-date operating expenses were 13.8% higher than last year due primarily to higher expenses for distribution system maintenance, depreciation, wages, insurance, wastewater treatment, outside services, purchased power, and water treatment, which were partially offset by the lower pension contribution. Compared to budget, monthly actuals were 2.2% higher due primarily to higher than expected expenses for distribution system maintenance and purchased power, which were partially offset by lower depreciation. Year-to-date actuals were 1.7% higher due primarily to higher than expected expenses for distribution system maintenance, insurance, outside services, and purchased power, which were partially offset by lower depreciation and wages.

Interest Expense and Other Income Deductions

Interest expense and other income deductions for the month were 51.4% higher than the same period last year due primarily higher interest expense and lower capitalized interest, which were partially offset by lower retirement expense. Interest expense and other income deductions for the year-to-date period were 33.2% higher than the same period last year due primarily to higher interest expense, which was partially offset by higher capitalized interest, higher earnings on life insurance policies, and lower retirement expense. Compared to budget, monthly actuals were 8.6% lower due primarily to lower than expected retirement and interest expenses. Year-to-date actuals were 19.8% lower due primarily to higher than expected capitalized interest and lower retirement and interest expense.

Income Taxes

Monthly and year-to-date income taxes were 34.4% and 4.2% lower, respectively, than prior year due primarily to lower taxable income. Compared to budget, monthly and year-to-date income taxes were higher. The effective tax rate for the month and year-to-date periods ended April 2024 were 14.3% and 12.6%, respectively, compared to 11.9% and 12.6% for the same periods in 2023.

EXPLANATION:

Operating Revenues

Monthly operating revenues were 4.5% higher than the same period last year. Year-to-date operating revenues were 8.3% higher than the same period last year due primarily to the rate increase effective March 1st, 2023, partially offset by lower revenues from the Distribution Service Improvement Charge. Total per capita consumption for the month and year-to-date periods was 1.8% and 2.7% lower, respectively, than the same periods last year. Compared to budget, monthly and year-to-date actuals were 3.6% and 0.5% higher, respectively.

Operating Expenses

Operating expenses were 13.3% higher in May 2024 than May 2023 due primarily to higher expenses for depreciation, distribution system maintenance, wages, wastewater treatment, and insurance. Year-to-date operating expenses were 13.7% higher than last year due primarily to higher expenses for distribution system maintenance, depreciation, wages, insurance, wastewater treatment, purchased power, outside services, and billing and collection services, which were partially offset by the lower pension contribution and source maintenance. Compared to budget, monthly actuals were 1.6% higher due primarily to higher than expected expenses for distribution system maintenance, which were partially offset by lower depreciation. Year-to-date actuals were 1.7% higher due primarily to higher than expected expenses for distribution system maintenance, insurance, purchased power, and outside services, which were partially offset by lower depreciation and wages.

Interest Expense and Other Income Deductions

Interest expense and other income deductions for the month were 108.6% higher than the same period last year due primarily higher interest expense and lower capitalized interest. Interest expense and other income deductions for the year-to-date period were 47.2% higher than the same period last year due primarily to higher interest expense, which was partially offset by higher capitalized interest, higher earnings on life insurance policies, and lower retirement expense. Compared to budget, monthly actuals were 5.0% lower due primarily to lower than expected interest expense and higher capitalized interest. Year-to-date actuals were 16.4% lower due primarily to higher than expected capitalized interest and lower interest and retirement expense.

Income Taxes

Monthly and year-to-date income taxes were higher than prior year due to lower deductions for tax repair expenditures. Compared to budget, monthly and year-to-date income taxes were higher. The effective tax rate for the month and year-to-date periods ended May 2024 were 13.7% and 12.9%, respectively, compared to (1.6)% and 8.7% for the same periods in 2023.

EXPLANATION:

Operating Revenues

Monthly operating revenues were 1.4% lower than the same period last year. Year-to-date operating revenues were 6.5% higher than the same period last year due primarily to the rate increase effective March 1st, 2023, partially offset by lower revenues from the Distribution Service Improvement Charge. Total per capita consumption for the month and year-to-date periods was 1.4% and 2.5% lower, respectively, than the same periods last year. Compared to budget, monthly actuals were 2.2% lower and year-to-date actuals were consistent with budget.

Operating Expenses

Operating expenses were 6.7% lower in June 2024 than June 2023 due primarily to decreased expenses for the lower pension contribution, insurance, and depreciation, which were partially offset by higher expenses for an increased allowance for uncollectible accounts, wastewater treatment, distribution and source maintenance, and wages and benefits. Year-to-date operating expenses were 9.9% higher than last year due primarily to higher expenses for distribution system maintenance, depreciation, wages and benefits, an increased allowance for uncollectible accounts, wastewater treatment, purchased power, outside services, and billing and collection services, which were partially offset by the lower pension contribution. Compared to budget, monthly actuals were 13.6% lower due primarily to lower than expected expenses for the pension contribution, insurance, depreciation, and wages and benefits, which were partially offset by higher than expected expenses for an increased allowance for uncollectible accounts, distribution system maintenance, wastewater treatment, and source maintenance. Year-to-date actuals were 0.9% lower due primarily to lower than expected expenses for the pension contribution, depreciation, wages and benefits, and insurance, which were partially offset by higher than expected expenses for distribution system maintenance, an increased allowance for uncollectible accounts, purchased power, and wastewater treatment.

Interest Expense and Other Income Deductions

Interest expense and other income deductions for the month were 105.9% higher than the same period last year due primarily to lower capitalized interest and higher interest expense. Interest expense and other income deductions for the year-to-date period were 60.2% higher than the same period last year due primarily to higher interest expense. Also adding to the increase was lower capitalized interest which was partially offset by higher earnings on life insurance policies. Compared to budget, monthly actuals were 14.2% lower due primarily to higher than expected capitalized interest and lower interest expense. Year-to-date actuals were 15.9% lower due primarily to higher than expected capitalized interest and lower interest and retirement expenses.

Income Taxes

Monthly income taxes were lower than prior year due to lower deductions for tax repair expenditures and year-to-date income taxes were lower than prior year due to lower taxable income. Compared to budget, monthly and year-to-date income taxes were higher. The effective tax rate for the month and year-to-date periods ended June 2024 were 3.6% and 10.8%, respectively, compared to 18.7% and 11.0% for the same periods in 2023.

EXPLANATION:

Operating Revenues

Monthly operating revenues were 10.7% higher than the same period last year due to higher per capita consumption and the newly effective Distribution System Improvement Charge, or DSIC. Year-to-date operating revenues were 7.1% higher than the same period last year due primarily to the rate increase effective March 1st, 2023, partially offset by lower revenues from the DSIC. Total per capita consumption for the month and year-to-date periods was 5.8% higher and 1.2% lower, respectively, than the same periods last year. Compared to budget, monthly and year-to-date actuals were 9.7% and 1.5% higher, respectively.

Operating Expenses

Operating expenses were 9.1% higher in July 2024 than July 2023 due primarily to higher expenses for wages and benefits, depreciation, purchased power, and wastewater and water treatment, which were partially offset by decreased expenses for the lower pension contribution, outside services, and distribution system maintenance. Year-to-date operating expenses were 9.8% higher than last year due primarily to higher expenses for distribution system maintenance, wages and benefits, depreciation, wastewater treatment, an increased allowance for uncollectible accounts, purchased power, water treatment, and billing and collection services, which were partially offset by the lower pension contribution. Compared to budget, monthly actuals were 1.0% lower due primarily to lower than expected expenses for the pension contribution, depreciation, and distribution system maintenance, which were partially offset by higher than expected expenses for wages and benefits, purchased power, and wastewater treatment. Year-to-date actuals were 0.9% lower due primarily to lower than expected expenses for the pension contribution, depreciation, insurance, and wages and benefits, which were partially offset by higher than expected expenses for distribution system maintenance, an increased allowance for uncollectible accounts, purchased power, wastewater treatment, source maintenance, water treatment, and outside services.

Interest Expense and Other Income Deductions

Interest expense and other income deductions for the month were 127.8% higher than the same period last year due primarily to lower capitalized interest and higher interest expense. Interest expense and other income deductions for the year-to-date period were 68.8% higher than the same period last year due primarily to higher interest expense and lower capitalized interest, which were partially offset by higher earnings on life insurance policies. Compared to budget, monthly actuals were 13.8% lower due primarily to higher than expected capitalized interest and lower interest and retirement expenses. Year-to-date actuals were 15.6% lower due primarily to higher than expected capitalized interest and lower interest and retirement expenses.

Income Taxes

Monthly and year-to-date income taxes were higher than prior year due to lower deductions for tax repair expenditures. Compared to budget, monthly income taxes were lower and year-to-date income taxes were higher. The effective tax rate for the month and year-to-date periods ended July 2024 were 7.9% and 10.2%, respectively, compared to (26.1)% and 4.3% for the same periods in 2023.

EXPLANATION:

Operating Revenues

Monthly operating revenues were 1.4% higher than the same period last year due to the newly effective Distribution System Improvement Charge, or DSIC. Year-to-date operating revenues were 6.3% higher than the same period last year due primarily to the rate increase effective March 1st, 2023, partially offset by lower revenues from the DSIC. Total per capita consumption for the month and year-to-date periods was 1.7% and 1.3% lower, respectively, than the same periods last year. Compared to budget, monthly and year-to-date actuals were 0.6% and 1.4% higher, respectively.

Operating Expenses

Operating expenses were 9.3% higher in August 2024 than August 2023 due primarily to higher expenses for depreciation, wastewater and water treatment, wages and benefits, and insurance, which were partially offset by decreased expenses for the lower pension contribution. Year-to-date operating expenses were 9.7% higher than last year due primarily to higher expenses for wages and benefits, depreciation, distribution system maintenance, wastewater treatment, an increased allowance for uncollectible accounts, purchased power, water treatment, and billing and collection services, which were partially offset by the lower pension contribution. Compared to budget, monthly actuals were 3.5% lower due primarily to lower than expected expenses for the pension contribution, depreciation, and wages and benefits, which were partially offset by higher than expected expenses for wastewater treatment and insurance. Year-to-date actuals were 1.2% lower due primarily to lower than expected expenses for the pension contribution, depreciation, wages and benefits, and insurance, which were partially offset by higher than expected expenses for distribution system maintenance, an increased allowance for uncollectible accounts, wastewater treatment, purchased power, source maintenance, water treatment, and outside services.

Interest Expense and Other Income Deductions

Interest expense and other income deductions for the month were 162.5% higher than the same period last year due primarily to lower capitalized interest and higher interest expense. Interest expense and other income deductions for the year-to-date period were 79.0% higher than the same period last year due primarily to higher interest expense and lower capitalized interest, which were partially offset by higher earnings on life insurance policies. Compared to budget, monthly actuals were 5.3% lower due primarily to higher than expected capitalized interest and lower interest expense. Year-to-date actuals were 14.1% lower due primarily to higher than expected capitalized interest and lower interest and retirement expenses.

Income Taxes

Monthly income taxes were 6.7% lower than prior year due to lower taxable income. Year-to-date income taxes were 62.1% higher than prior year due to lower deductions for tax repair expenditures. Compared to budget, monthly and year-to-date income taxes were higher. The effective tax rate for the month and year-to-date periods ended August 2024 were 24.7% and 12.1%, respectively, compared to 19.7% and 6.7% for the same periods in 2023.

EXPLANATION:

Operating Revenues

Monthly operating revenues were 3.0% higher than the same period last year due primarily to the newly effective Distribution System Improvement Charge, or DSIC. Year-to-date operating revenues were 6.0% higher than the same period last year due primarily to the rate increase effective March 1st, 2023, partially offset by lower revenues from the DSIC. Total per capita consumption for both the month and year-to-date periods was 1.3% lower than the same periods last year. Compared to budget, monthly and year-to-date actuals were 2.2% and 1.5% higher, respectively.

Operating Expenses

Operating expenses were 7.9% higher in September 2024 than September 2023 due primarily to higher expenses for an increased allowance for uncollectible accounts, depreciation, insurance, wastewater treatment, wages and benefits, water treatment, and distribution system maintenance, which were partially offset by decreased expenses for the prior year pumping of raw water from the Susquehanna River, not repeated this year, and the lower pension contribution. Year-to-date operating expenses were 9.5% higher than last year due primarily to higher expenses for depreciation, wages and benefits, distribution system maintenance, wastewater treatment, an increased allowance for uncollectible accounts, purchased power, water treatment, insurance, and billing and collection services, which were partially offset by the lower pension contribution and decreased expenses for the prior year pumping of raw water from the Susquehanna River, not repeated this year. Compared to budget, monthly actuals were 2.3% higher due primarily to higher than expected expenses for an increased allowance for uncollectible accounts, insurance, distribution system maintenance, and water treatment, which were partially offset by lower than expected expenses for the pension contribution, depreciation, and wages and benefits. Year-to-date actuals were 0.8% lower due primarily to lower than expected expenses for the pension contribution, depreciation, wages and benefits, and insurance, which were partially offset by higher than expected expenses for distribution system maintenance, an increased allowance for uncollectible accounts, wastewater treatment, purchased power, water treatment, and source maintenance.

Interest Expense and Other Income Deductions

Interest expense and other income deductions for the month were 171.7% higher than the same period last year due primarily to lower capitalized interest and higher interest expense. Interest expense and other income deductions for the year-to-date period were 87.5% higher than the same period last year due primarily to higher interest expense and lower capitalized interest, which were partially offset by higher earnings on life insurance policies and lower retirement expense. Compared to budget, monthly actuals were 11.5% lower due primarily to lower than expected interest expense, and higher than expected earnings on life insurance policies and capitalized interest. Year-to-date actuals were 13.8% lower due primarily to higher than expected capitalized interest, lower than expected interest and retirement expenses, and higher earnings on life insurance policies.

Income Taxes

Monthly income taxes were lower than prior year due to lower taxable income. Year-to-date income taxes were higher than prior year due to lower deductions for tax repair expenditures. Compared to budget, monthly income taxes were lower and year-to-date income taxes were higher. The effective tax rate for the month and year-to-date periods ended September 2024 were (18.8)% and 8.9%, respectively, compared to (0.9)% and 5.8% for the same periods in 2023.

EXPLANATION:

Operating Revenues

Monthly operating revenues were 5.1% higher than the same period last year due primarily to the Distribution System Improvement Charge, or DSIC. Year-to-date operating revenues were 5.9% higher than the same period last year due primarily to the rate increase effective March 1st, 2023. Total per capita consumption for the month and year-to-date periods was 1.3% higher and 1.0% lower, respectively, than the same periods last year. Compared to budget, monthly and year-to-date actuals were 6.9% and 2.0% higher, respectively.

Operating Expenses

Operating expenses were 2.6% higher in October 2024 than October 2023 due primarily to higher expenses for depreciation and wages and benefits, which were partially offset by the lower pension contribution. Year-to-date operating expenses were 8.8% higher than last year due primarily to higher expenses for depreciation, wages and benefits, distribution system maintenance, wastewater treatment, an increased allowance for uncollectible accounts, purchased power, water treatment, insurance, and billing and collection services, which were partially offset by the lower pension contribution and decreased expenses for the prior year pumping of raw water from the Susquehanna River, not repeated this year. Compared to budget, monthly actuals were 0.4% higher due primarily to higher than expected water treatment and other expenses, which were partially offset by lower than expected expected expenses for the pension contribution and depreciation. Year-to-date actuals were 0.7% lower due primarily to lower than expected expenses for the pension contribution, depreciation, and wages and benefits, which were partially offset by higher than expected expenses for distribution system maintenance, an increased allowance for uncollectible accounts, water and wastewater treatment, purchased power, source maintenance, and outside services.

Interest Expense and Other Income Deductions

Interest expense and other income deductions for the month were 220.2% higher than the same period last year due primarily to lower capitalized interest, and higher interest and retirement expenses. Interest expense and other income deductions for the year-to-date period were 97.8% higher than the same period last year due primarily to higher interest expense and lower capitalized interest, which were partially offset by higher earnings on life insurance policies. Compared to budget, monthly actuals were 2.4% lower due primarily to higher than expected capitalized interest. Year-to-date actuals were 12.5% lower due primarily to higher than expected capitalized interest, lower than expected interest and retirement expenses, and higher earnings on life insurance policies.

Income Taxes

Monthly and year-to-date income taxes were higher than prior year due to lower deductions for tax repair expenditures. Compared to budget, monthly and year-to-date income taxes were higher. The effective tax rate for the month and year-to-date periods ended October 2024 were 25.6% and 10.7%, respectively, compared to 19.8% and 7.3% for the same periods in 2023.

EXPLANATION:

Operating Revenues

Monthly operating revenues were 1.6% higher than the same period last year due primarily to the Distribution System Improvement Charge, or DSIC. Year-to-date operating revenues were 5.5% higher than the same period last year due primarily to the rate increase effective March 1st, 2023. Total per capita consumption for the month and year-to-date periods was 0.6% and 1.0% lower, respectively, than the same periods last year. Compared to budget, monthly and year-to-date actuals were 2.8% and 2.1% higher, respectively.

Operating Expenses

Operating expenses were 3.7% higher in November 2024 than November 2023 due primarily to higher expenses for depreciation, purchased power, and insurance, which were partially offset by the lower pension contribution. Year-to-date operating expenses were 8.3% higher than last year due primarily to higher expenses for depreciation, wages and benefits, distribution system maintenance, wastewater treatment, an increased allowance for uncollectible accounts, purchased power, insurance, water treatment, and billing and collection services, which were partially offset by the lower pension contribution and decreased expenses for the prior year pumping of raw water from the Susquehanna River, not repeated this year. Compared to budget, monthly actuals were 3.7% lower due primarily to lower than expected expected expenses for the pension contribution, depreciation, and wages and benefits, which were partially offset by higher than expected expenses for water treatment. Year-to-date actuals were 1.0% lower due primarily to lower than expected expenses for the pension contribution, depreciation, and wages and benefits, which were partially offset by higher than expected expenses for distribution system maintenance, an increased allowance for uncollectible accounts, water treatment, purchased power, wastewater treatment, source maintenance, and outside services.

Interest Expense and Other Income Deductions

Interest expense and other income deductions for the month were 284.8% higher than the same period last year due primarily to lower capitalized interest, and higher interest and retirement expenses. Interest expense and other income deductions for the year-to-date period were 109.1% higher than the same period last year due primarily to higher interest expense and lower capitalized interest, which were partially offset by higher earnings on life insurance policies. Compared to budget, monthly actuals were 3.5% lower due primarily to higher than expected capitalized interest and lower interest expense. Year-to-date actuals were 11.6% lower due primarily to higher than expected capitalized interest, lower than expected interest and retirement expenses, and higher earnings on life insurance policies.

Income Taxes

Monthly and year-to-date income taxes were higher than prior year due to lower deductions for tax repair expenditures. Compared to budget, monthly and year-to-date income taxes were higher. The effective tax rate for the month and year-to-date periods ended November 2024 were 25.8% and 11.9%, respectively, compared to 12.3% and 7.8% for the same periods in 2023.

EXPLANATION:

Operating Revenues

Monthly operating revenues were 6.1% higher than the same period last year due primarily to the Distribution System Improvement Charge, or DSIC. Year-to-date operating revenues were 5.5% higher than the same period last year due primarily to the rate increase effective March 1st, 2023. Total per capita consumption for the month and year-to-date periods was 1.8% higher and 0.8% lower, respectively, than the same periods last year. Compared to budget, monthly and year-to-date actuals were 1.8% and 2.0% higher, respectively.

Operating Expenses

Operating expenses were 15.3% higher in December 2024 than December 2023 due primarily to higher expenses for distribution system maintenance, outside services, wages and benefits, depreciation, and an increased allowance for uncollectible accounts, which were partially offset by the lower pension contribution. Year-to-date operating expenses were 9.0% higher than last year due primarily to higher expenses for depreciation, wages and benefits, distribution system maintenance, an increased allowance for uncollectible accounts, wastewater treatment, purchased power, insurance, outside services, water treatment, and billing and collection services, which were partially offset by the lower pension contribution and decreased expenses for the prior year pumping of raw water from the Susquehanna River, not repeated this year. Compared to budget, monthly actuals were 16.8% higher due primarily to higher than expected expenses for distribution system maintenance, an increased allowance for uncollectible accounts, insurance, outside services, and wastewater and water treatment, which were partially offset by lower than expected expected expenses for the pension contribution, depreciation, and wages and benefits. Year-to-date actuals were 0.5% higher due primarily to higher than expected expenses for distribution system maintenance, an increased allowance for uncollectible accounts, water and wastewater treatment, outside services. insurance, purchased power, and source maintenance, which were partially offset by lower than expected expenses for the pension contribution, depreciation, and wages and benefits.

Interest Expense and Other Income Deductions

Interest expense and other income deductions for the month were 29.9% higher than the same period last year due primarily to lower capitalized interest and higher interest expense, which were partially offset by lower retirement expenses and contributions. Interest expense and other income deductions for the year-to-date period were 101.7% higher than the same period last year due primarily to lower capitalized interest and higher interest expense, which were partially offset by lower retirement expenses, higher earnings on life insurance policies, and lower contributions. Compared to budget, monthly actuals were 45.0% lower due primarily to lower than expected retirement expense and contributions. Year-to-date actuals were 14.7% lower due primarily to higher than expected capitalized interest, lower than expected interest and retirement expenses, and higher earnings on life insurance policies.

Income Taxes

Monthly income taxes were lower than prior year due to higher deductions for tax repair expenditures. Year-to-date income taxes were higher than prior year due to lower deductions for tax repair expenditures. Compared to budget, monthly and year-to-date income taxes were lower and higher, respectively. The effective tax rate for the month and year-to-date periods ended December 2024 were (80.0)% and 6.2%, respectively, compared to were (32.5)% and 5.1% for the same periods in 2023.

	Actual		Budget	
	January 2025	Change Over Same Month Last Year	Monthly Budget	Change Over Budget
Operating Revenues	$6,245,817	6.5%	$6,018,011	3.8%
Operating Expenses	4,493,458	11.9%	4,121,476	9.0%
Interest Expense and Income Deductions	776,371	233.0%	764,455	1.6%
Income Taxes	234,593	-40.8%	266,265	-11.9%
Net Income	$741,395	-39.2%	$865,815	-14.4%

EXPLANATION:

Operating Revenues

Monthly operating revenues were 6.5% higher than the same period last year due primarily to the Distribution System Improvement Charge. Total per capita consumption for the month was 10.1% higher than the same period last year. Compared to budget, monthly actuals were 3.8% higher.

Operating Expenses

Operating expenses were 11.9% higher in January 2025 than January 2024 due primarily to higher expenses for depreciation, distribution system maintenance, wastewater treatment, wages and benefits, purchased power, and insurance, which were partially offset by the lower pension contribution. Compared to budget, monthly actuals were 9.0% higher due primarily to higher than expected expenses for distribution system maintenance, wastewater treatment, insurance, and depreciation.

Interest Expense and Other Income Deductions

Interest expense and other income deductions for the month were 233.0% higher than the same period last year due primarily to lower capitalized interest and higher interest expense. Compared to budget, monthly actuals were 1.6% higher than expected due primarily to higher interest expense.

Income Taxes

Monthly income taxes were lower than prior year due to lower taxable income. Compared to budget, monthly income taxes were 11.9% lower. The effective tax rate for January 2025 was 24.0%, compared to 24.5% for January 2024.

EXPLANATION:

Operating Revenues

Monthly and year-to-date operating revenues were 2.8% and 4.7% higher, respectively, than the same periods last year due primarily to the Distribution Service Improvement Charge. Total per capita consumption for the month and year-to-date periods was 6.3% and 8.2% higher, respectively, than the same periods last year. Compared to budget, monthly and year-to-date actuals were 0.5% and 2.2% higher, respectively.

Operating Expenses

Operating expenses were 0.6% lower in February 2025 than February 2024 due primarily to the lower pension contribution and lower expenses for wastewater treatment, which were partially offset by higher depreciation. Year-to-date operating expenses were 5.8% higher than last year due primarily to higher expenses for depreciation, distribution system maintenance, insurance, wages and benefits, a higher allowance for uncollectible accounts, and water treatment, which were partially offset by the lower pension contribution. Compared to budget, monthly actuals were 1.9% lower due primarily to lower than expected expenses for wastewater treatment and wages and benefits, which were partially offset by higher depreciation. Year-to-date actuals were 3.7% higher due primarily to higher than expected expenses for distribution system maintenance, depreciation, insurance, and water treatment, which were partially offset by lower wastewater treatment expense.

Interest Expense and Other Income Deductions

Interest expense and other income deductions for the month and year-to-date periods were 278.1% and 253.8% higher, respectively, than the same periods last year due primarily to lower capitalized interest and higher interest expense. Compared to budget, monthly actuals were 2.1% lower due primarily to lower than expected interest expense and higher capitalized interest. Year-to-date actuals were 0.3% lower due primarily to higher capitalized interest and lower interest expense.

Income Taxes

Monthly income taxes were higher than prior year due to lower deductions for tax repair expenditures and year-to-date income taxes were lower than prior year due primarily to lower taxable income. Compared to budget, monthly and year-to-date income taxes were higher than expected. The effective tax rate for the month and year-to-date periods ended February 2025 were 16.7% and 19.8%, respectively, compared to 4.5% and 14.3% for the same periods in 2024.

EXPLANATION:

Operating Revenues

Monthly and year-to-date operating revenues were both 4.7% higher than the same periods last year due primarily to the Distribution Service Improvement Charge. Total per capita consumption for the month and year-to-date periods was 0.5% and 3.2% higher, respectively, than the same periods last year. Compared to budget, monthly and year-to-date actuals were 2.4% and 2.3% higher, respectively.

Operating Expenses

Operating expenses were 1.6% lower in March 2025 than March 2024 due primarily to lower insurance expense and the lower pension contribution, which were partially offset by higher depreciation. Year-to-date operating expenses were 3.4% higher than last year due primarily to higher expenses for depreciation, distribution system maintenance, water treatment, wages and benefits, and purchased power, which were partially offset by the lower pension contribution and insurance. Compared to budget, monthly actuals were 6.3% lower due primarily to lower than expected insurance expense. Year-to-date actuals were 0.4% higher due primarily to higher than expected expenses for distribution system maintenance, depreciation, water treatment, and purchased power, which were partially offset by lower expenses for insurance and wages and benefits, and a lower allowance for uncollectible accounts.

Interest Expense and Other Income Deductions

Interest expense and other income deductions for the month were 24.2% higher than the same period last year due primarily to higher interest expense and lower capitalized interest. Interest expense and other income deductions for the year-to-date period was 118.2% higher than the same period last year due primarily to lower capitalized interest and higher interest expense. Compared to budget, monthly actuals were 1.0% lower due primarily to higher than expected earnings on life insurance policies, which were partially offset by higher interest expense. Year-to-date actuals were 0.5% lower due primarily to higher earnings on life insurance policies and higher capitalized interest, which were partially offset by higher interest expense.

Income Taxes

Monthly income taxes were lower than prior year due to higher deductions for tax repair expenditures and year-to-date income taxes were lower than prior year due primarily to lower taxable income. Compared to budget, monthly income taxes were lower than expected and year-to-date income taxes were higher than expected. The effective tax rate for the month and year-to-date periods ended March 2025 were 0.9% and 11.5%, respectively, compared to 8.0% and 12.2% for the same periods in 2024.

Nonrevenue water is a summation of apparent losses, real losses, unbilled metered consumption, and unbilled unmetered consumption. Estimates of water use/loss are utilized for unmetered values, including, but not limited to, main breaks, service line leaks, and fire hydrant flow tests. To derive the percentage of nonrevenue water, the nonrevenue water value, in gallons, is divided by the total produced water, in gallons. Total produced water includes all eight reporting water systems, which encompasses the two water treatment plants in York and Franklin Counties, as well as six well systems.

The Company has heightened awareness of nonrevenue water tracking efforts in the current and previous years. Nonrevenue water reduction measures include the timely setting of new meters for acquired potable service lines, the deployment of sixty data loggers across the system to track leakage, with an additional thirty arriving in 2025, and a monthly engineering review of pump station data. Data tracking programs are being implemented to include the submission of water use data by fire companies and developers for firefighting and fire system testing purposes. Additional measures include the metering and monitoring of company water use and more accurate main break and service line leak water loss calculations.

(4) The effect of the change on the utility's customers.

RESPONSE Refer to the attached Notice of Proposed Rate Changes.

NOTICE OF PROPOSED WATER RATE CHANGES

To Our Customers:

The York Water Company filed a request with the Pennsylvania Public Utility Commission (PUC) to increase your water rates as of August 1, 2025. A full investigation of this request could delay the change until March 2026. This notice describes the Company's rates request, the PUC's role, and what actions you can take.

The Company has requested an overall base rate increase for water service of $20.3 million per year. If the Company's entire request is approved, the typical water bill for customers would increase as indicated by the category below:

Residential gravity customers using 4,383 gallons per month would increase from $47.78 to $58.26 per month, or by 21.9%. **Residential repumped customers** using 3,672 gallons per month would increase from $56.48 to $72.26 per month, or by 27.9%.

Commercial gravity customers using 26,568 gallons per month would increase from $159.98 to $192.41 per month, or by 20.3%. **Commercial repumped customers** using 40,958 gallons per month would increase from $385.82 to $502.69 per month, or by 30.3%.

Industrial gravity customers using 126,547 gallons per month would increase from $604.80 to $747.71 per month, or by 23.6%. **Industrial repumped customers** using 301,845 gallons per month would increase from $2,439.99 to $3,192.15 per month, or by 30.8%.

To find out your customer class or how the requested increase may affect your water, contact The York Water Company at 1-800-750-5561. The rates requested by The York Water Company for water customers may be found in Supplement No. 165 to Tariff Water-Pa P.U.C. No. 14. You may examine the material filed with the PUC which explains the requested increase and the reasons for it. A copy of this material is kept at The York Water Company's office. Upon request, the Company will send you the Statement of Reasons for Water Supplement No. 165 to Tariff Water-Pa. P.U.C. No. 14 explaining why the rate increase has been requested.

The state agency which approves rates for public utilities is the PUC. The PUC will examine the requested rate increase and can prevent existing rates from changing until it investigates and/or holds hearings on the request. The Company must prove that the requested rates are reasonable. After examining the evidence, the PUC may grant all, some, or none of the request, or may reduce existing rates.

The PUC may change the amount of the rate increase or decrease requested by the utility for each customer class. As a result, the rate charged to you may be different than the rate requested by the Company as shown above.

There are three ways to challenge a Company's request to change its rates:

1. You can file a formal complaint. If you want a hearing before a judge, you must file a formal complaint. By filing a formal complaint, you assure yourself the opportunity to take part in hearings about the rate increase request. All complaints should be filed with the PUC before August 1, 2025. If no formal complaints are filed, the Commission may grant all, some, or none of the request without holding a hearing before a judge.

2. You can send us a letter telling why you object to the requested rate increase. Sometimes there is information in these letters that makes us aware of problems with the Company's service or management. This information can be helpful when we investigate the rate request.

   Send your letter or request for a formal complaint form to the Pennsylvania Public Utility Commission, Post Office Box 3265, Harrisburg, PA 17105-3265.

3. You can be a witness at a public input hearing. Public input hearings are held if the Commission opens an investigation of the Company's rate increase request and if there is a large number of customers interested in the case. At these hearings, you have the opportunity to present your views in person to the PUC judge hearing the case and the Company representatives. All testimony given "under oath" becomes part of the official rate case record. These hearings are held in the service area of the Company.

53.52 Applicability: public utilities other than canal, turnpike, tunnel, bridge and wharf companies.

(a) Whenever a public utility, other than a canal, turnpike, tunnel, bridge or wharf company files a tariff, revision, or supplement effecting changes in the terms and conditions of service rendered or to be rendered, it shall submit to the Commission, with the tariff, revision or supplement, statements showing all of the following:

(9) Customer polls taken and other documents which indicate customer acceptance and desire for the proposed change. If the poll or other documents reveal discernible public opposition, an explanation of why the change is in the public interest shall be provided.

RESPONSE No customer polls were taken, and no other documents indicate customer acceptance and desire for the proposed change. Refer to Exhibit No. F(b)-1 for an explanation of why the change is in the public interest.

THE YORK WATER COMPANY

DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION

PLANS FOR INTRODUCING OR IMPLEMENTING THE CHANGES

53.52 Applicability: public utilities other than canal, turnpike, tunnel, bridge and wharf companies.

(a) Whenever a public utility, other than a canal, turnpike, tunnel, bridge or wharf company files a tariff, revision, or supplement effecting changes in the terms and conditions of service rendered or to be rendered, it shall submit to the Commission, with the tariff, revision or supplement, statements showing all of the following:

(10) Plans the utility has for introducing or implementing the changes with respect to its ratepayers.

RESPONSE The Company will publish in the major newspapers serving the Company's service area a paid newspaper advertisement containing a description of the proposed rate charges.

The Company will also provide a notice of the proposed rate increase inserted in envelopes containing billings to customers until all such notices are included in billings mailed to customers whose rates will be increased.

The Company will publish the notice of proposed rate change on its website as well.

(11) FCC, FERC or Commission orders or rulings applicable to the filing.

RESPONSE Refer to Exhibit No. H(a)-11.

THE YORK WATER COMPANY

DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION

SPECIFIC REASONS FOR PROPOSED INCREASE IN WATER RATES

53.52 Applicability; public utilities other than canal, turnpike, tunnel, bridge, and wharf companies

(b) Whenever a public utility other than a canal,turnpike, tunnel, bridge,or wharf company files a tariff, revision, or supplement which will increase or decrease the bills to its customers, it shall submit in addition to the requirements of subsection (a), to the Commission, with the tariff, revision or supplement, statements showing the following:

(1) The specific reasons for each increase or decrease.

RESPONSE: The York Water Company has prepared and filed the data required under Title 52, Pennsylvania Code, Sections 53.52 and 53.53 in support of the proposed rates. The supporting data for the tariff revision are for the twelve months ending February 28, 2027, or as of the close of the same twelve-month period, adjusted for ratemaking purposes.

Despite the best efforts by The York Water Company to control costs, the effects of increased expenses and net additions to rate base have reduced returns.

The specific reasons the Company proposes to increase its water rates are as follows:

(a) To provide sufficient revenues to recover the cost of providing water service to its consumers;
(b) To allow it to discharge properly its public duties by continuing to furnish an adequate, safe, and reliable level of service;
(c) To maintain its facilities properly; and
(d) To afford the opportunity to more nearly approach a fair and reasonable rate of return on the original cost measure of value of its property used and useful in rendering water service.

Also, please see the attached Statement of Reasons to be provided to customers upon request.

THE YORK WATER COMPANY

Statement of Reasons
For the 2025 Rate Increase Request

The York Water Company (the "Company") is requesting Public Utility Commission ("PUC") approval for a base rate increase for water customers of $20.3 million, and for wastewater customers, of $3.9 million to begin August 1, 2025. From our past experience, it is likely the PUC may suspend implementation of the rates until its investigation of the need for the increases is completed which may take until March 2026.

Rate Increase

The Company last filed for base rate increases for its water and wastewater operations in May 2022, three years ago. Our main reasons for the increase are as follows:

- Recovery of $145 million in capital expenditures. The Company has greatly increased the total plant investment from the level claimed in our last rate request in 2022. This increase of approximately $145 million (through February 2027) in system improvements since the last rate request includes the following major items:

    1. Replacement of 30 miles of pipe. Replacement, reinforcement, and relining of aging water mains, replacement of service lines, meters, and hydrants. Nearly 30 miles of aging pipeline, about 3% of the Company's total in service, was replaced. This replacement strategy extends the life of our infrastructure, reduces costs associated with main breaks and leaks, improves pipe efficiency while reducing energy demand and provides improved customer service and reliability.
    2. Distribution system improvements. Improvements to standpipes and pumping equipment to ensure customers have a safe and reliable supply of water that meets current and proposed regulations.
    3. Pumping equipment. Upgrade of pumping equipment at the Company's water and wastewater pump stations to increase efficiency that reduces costs and provide redundancy and reliability.
    4. Construction and expansion of wastewater treatment plants. Construction required to service the wastewater needs of growing communities in a safe and efficient manner that meets or exceeds increasingly stringent regulatory and discharge requirements.
    5. Enhanced security. System monitoring and information technology system upgrades.
    6. Improved customer service. Upgrade our enterprise resource planning platform to enhance customer service, increase efficiency, and enhance data security and compliance.
    7. Improvements to dams. Construction projects required by the Department of Environmental Protection to ensure that the dams continue to be safe and effective for many years into the future.

8. Lead service lines replacement. Replacement of all known company-owned lead service lines. In addition, replacement of customer-owned lead service lines when discovered and/or identified by the customer.
9. Upgrades to water and wastewater treatment equipment and facilities. These projects are necessary to maintain compliance with existing and proposed regulations and provide resiliency in operations.

Investments in these and similar projects, all of which are undertaken in York, Adams Franklin, and Lancaster Counties, are important to our ability to ensure a safe, adequate, and reliable supply of drinking water and to maintain proper handling and disposal of wastewater to our customers.

- While the Company has intentionally taken steps to control operating expenses, the costs of serving our customers at the level of service they deserve have gone up. The increase would allow the Company to recover costs for increased wages, benefits, chemicals, power, materials, and supplies and increased annual depreciation. Despite these increases, York Water remains one of the most efficient water utilities in the Nation, continuing to reduce or eliminate various expenses since its last rate case, including reduction in income taxes from the tax repair deductions. These reduced expenses are reflected in this rate filing.

- The increase would provide an opportunity for our 209-year-old Company to earn a fair return on the capital it has invested in infrastructure in our community and would assist the Company in maintaining a solid financial position.

Please refer to the Company's Direct Testimony and Exhibits for additional reasons for and support of the requested rate increase.

THE YORK WATER COMPANY

DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION

OPERATING STATEMENT FOR THE TWELVE MONTHS ENDING
FEBRUARY 28, 2027

53.52

Applicability; public utilities other than canal, turnpike, tunnel, bridge, and wharf companies

(b)

Whenever a public utility other than a canal,turnpike, tunnel, bridge,or wharf company files a tariff, revision, or supplement which will increase or decrease the bills to its customers, it shall submit in addition to the requirements of subsection (a), to the Commission, with the tariff, revision or supplement, statements showing the following:

(2)

The operating income statement of the utility for a 12-month period, the end of which shall not be more than 120 days prior to the filing. Water and wastewater utilities with annual revenues under $100,000 and municipal corporations subject to Commission jurisdiction may provide operating income statements for a 12-month period, the end of which may not be more than 180 days prior to the filing.

RESPONSE:

Refer to Exhibit No. FI-2

Please be advised that by letter dated February 26, 2025, the Pa PUC granted The York Water Company's request for a 30-day extension to file its base rate case on or before May 30, 2025, based upon a historic test year ended December 31, 2024, a future test year ending December 31, 2025 and a fully projected future test year ending February 28, 2027 as adjusted for ratemaking purposes.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
NUMBER OF CUSTOMERS AS OF FEBRUARY 28, 2027
WHOSE BILLS WILL BE INCREASED

CALCULATION OF THE PROPOSED REVENUE INCREASE
PROJECTED TO AN ANNUAL BASIS

53.52 Applicability; public utilities other than canal, turnpike, tunnel, bridge, and wharf companies

(b) Whenever a public utility other than a canal,turnpike, tunnel, bridge,or wharf company files a tariff, revision, or supplement which will increase or decrease the bills to its customers, it shall submit in addition to the requirements of subsection (a), to the Commission, with the tariff, revision or supplement, statements showing the following:

(4) A calculation of the total increases, in dollars, by tariff subdivision, projected to an annual basis.

RESPONSE: Refer to Exhibit No. FII-2

THE YORK WATER COMPANY

DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION

NUMBER OF CUSTOMERS WHOSE BILLS WILL BE DECREASED

53.52

Applicability; public utilities other than canal, turnpike, tunnel, bridge, and wharf companies

(b)

Whenever a public utility other than a canal,turnpike, tunnel, bridge,or wharf company files a tariff, revision, or supplement which will increase or decrease the bills to its customers, it shall submit in addition to the requirements of subsection (a), to the Commission, with the tariff, revision or supplement, statements showing the following:

(5)

A calculation of the number of customers by tariff subdivision, whose bills will be decreased.

RESPONSE:

Under the proposed rates, no customers' bills will be decreased.

THE YORK WATER COMPANY

DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION

CALCULATION OF THE PROPOSED REVENUE DECREASE
PROJECTED TO AN ANNUAL BASIS

53.52 Applicability; public utilities other than canal, turnpike, tunnel, bridge, and wharf companies

(b) Whenever a public utility other than a canal,turnpike, tunnel, bridge,or wharf company files a tariff, revision, or supplement which will increase or decrease the bills to its customers, it shall submit in addition to the requirements of subsection (a), to the Commission, with the tariff, revision or supplement, statements showing the following:

(6) A calculation of the total decreases, in dollars, by tariff subdivision, projected to an annual basis.

RESPONSE: Under the proposed rates, operating revenues for water service will not decrease.

THE YORK WATER COMPANY

DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION

STATEMENT OF CALCULATION OF THE RATE OF RETURN UNDER EXISTING RATES FOR THE TWELVE MONTHS ENDING FEBRUARY 28, 2027 AND ANTICIPATED RATE OF RETURN TO BE EARNED WHEN THE PROPOSED RATES BECOME EFFECTIVE

53.52 Applicability; public utilities other than canal, turnpike, tunnel, bridge, and wharf companies

(c) If a public utility files a tariff, revision, or supplement which it is calculated will increase the bills of a customer or a group of customers by an amount, when projected to an annual basis, exceeding 3% of the operating revenues of the utility-subsection (b)(4) divided by the operating revenues of the utility for a 12-month period as defined in subsection (b)(2)-or which it is calculated will increase the bills of 5% or more of the number of customers served by the utility-subsection (b)(3) divided by subsection (a) (2)-it shall submit to the Commission with the tariff, revision, or supplement, in addition to the statements required by subsections (a) and (b), all of the following information:

(1) A statement showing the utility's calculation of the rate of return earned or operating ratio (if the utility qualifies to use an operating ratio under §53.54 (relating to small water and wastewater utilities)) earned in the 12-month period referred to in subsection (b)(2), and the anticipated rate of return or operating ratio to be earned when the tariff, revision, or supplement becomes effective. The rate base used in this calculation shall be supported by summaries of original cost for the rate of return calculation. When an operating ratio is used in this calculation, it shall be supported by studies of margin above operation and maintenance expense plus depreciation as referred to in § 53.54(b)(2)(B).

RESPONSE: Refer to Exhibit No. FV-1

THE YORK WATER COMPANY

DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION

BALANCE SHEET AS OF FEBRUARY 28, 2027

THE YORK WATER COMPANY

DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION

DEPRECIATION RESERVE PER BOOKS AS OF FEBRUARY 28, 2027
APPLICABLE TO UTILITY PLANT IN SERVICE

53.52

Applicability; public utilities other than canal, turnpike, tunnel, bridge, and wharf companies

(c) If a public utility files a tariff, revision, or supplement which it is calculated will increase the bills of a customer or a group of customers by an amount, when projected to an annual basis, exceeding 3% of the operating revenues of the utility-subsection (b)(4) divided by the operating revenues of the utility for a 12-month period as defined in subsection (b)(2)-or which it is calculated will increase the bills of 5% or more of the number of customers served by the utility-subsection (b)(3) divided by subsection (a) (2)-it shall submit to the Commission with the tariff, revision, or supplement, in addition to the statements required by subsections (a) and (b), all of the following information:

(4) A statement showing the amount of depreciation reserve, at the date of the balance sheet required by paragraph (2), applicable to the property, summarized as required by paragraph (3).

RESPONSE: Refer to Exhibit No. FX-1. The company does not maintain the book reserve by plant account.

THE YORK WATER COMPANY

DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION

STATEMENT OF NET OPERATING INCOME, OPERATING REVENUES AND OPERATING EXPENSES FOR TWELVE MONTHS ENDING FEBRUARY 28, 2027

53.52

Applicability; public utilities other than canal, turnpike, tunnel, bridge, and wharf companies

(c)

If a public utility files a tariff, revision, or supplement which it is calculated will increase the bills of a customer or a group of customers by an amount, when projected to an annual basis, exceeding 3% of the operating revenues of the utility-subsection (b)(4) divided by the operating revenues of the utility for a 12-month period as defined in subsection (b)(2)-or which it is calculated will increase the bills of 5% or more of the number of customers served by the utility-subsection (b)(3) divided by subsection (a) (2)-it shall submit to the Commission with the tariff, revision, or supplement, in addition to the statements required by subsections (a) and (b), all of the following information:

(5) A statement of operating income, setting forth the operating revenues and expenses by detailed accounts for the 12-month period ending on the date of the balance sheet required by paragraph (2).

RESPONSE: Refer to Exhibit No. FI-2.

THE YORK WATER COMPANY

DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION

MAJOR CHANGES IN OPERATING OR FINANCIAL CONDITION

53.52 Applicability; public utilities other than canal, turnpike, tunnel, bridge, and wharf companies

(c) If a public utility files a tariff, revision, or supplement which it is calculated will increase the bills of a customer or a group of customers by an amount, when projected to an annual basis, exceeding 3% of the operating revenues of the utility-subsection (b)(4) divided by the operating revenues of the utility for a 12-month period as defined in subsection (b)(2)-or which it is calculated will increase the bills of 5% or more of the number of customers served by the utility-subsection (b)(3) divided by subsection (a) (2)-it shall submit to the Commission with the tariff, revision, or supplement, in addition to the statements required by subsections (a) and (b), all of the following information:

(6) A brief description of a major change in the operating or financial condition of the utility occurring between the date of the balance sheet required by paragraph (2) and the date of transmittal of the tariff, revision, or supplement. As used in this paragraph, a major change is one which materially alters the operating or financial condition of the utility from that reflected in paragraphs (1)-(5).

RESPONSE: No major change in the operating or financial condition is projected to occur after December 31, 2024, the date of the balance sheet required by paragraph (2) of subsection C of 53.52 (51 PA Code Ch. 53), and the date of transmittal of the tariff supplement.

REVENUE SUMMARY

	Total Company	Water	Wastewater
Present Rate Revenues (1)	$ 79,067,144	$70,396,610	$ 8,670,534
Additional Revenue Requirement (2)	$ 24,169,485	$20,311,978	$ 3,857,507
% Increase		28.9%	44.5%
Wastewater Revenue Allocation (3)	$ -	$ -	$ -
Proposed Revenues	$103,236,629	$90,708,588	$12,528,041
Revenue Increase	$ 24,169,485	$20,311,978	$ 3,857,507
% Increase		28.9%	44.5%

(1) As presented on Exhibit Nos. FII-2 page 9 and FII-2W page 2. Includes DSIC and STAS revenues for water.

(2) As calculated on Exhibit Nos. FV-1 page 6 and FV-1W page 6.

(3) The wastewater allocation is the amount of the wastewater revenue requirement that the Company is proposing to be consolidated with the water revenue requirement to derive the proposed water and wastewater rates in this case.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
OPERATING REVENUE ADJUSTMENTS UNDER EXISTING RATES

ACCOUNT (1)	EXPLANATION (2)		ADJUST-MENT INCREASE DECREASE (3)
	To project operating revenues for estimated metered residential gravity customers connected and disconnected during the future test year ending December 31, 2025.		
	Two Year Average Metered Residential Gravity Customers Net Gain	126	
	Average Annual Revenue per Average Metered Residential Gravity Customer	550.25	
	Annualized Revenue Adjustment = Net Gain x Average Annual Revenue	69,332	
	(a) Portion of Adjustment Included in Twelve Months Ending December 31, 2025	34,666	
46100100	Metered Sales to Residential Customers		34,666

(a) The estimated average net gain of metered residential gravity customers for the twelve months ending December 31, 2025 is presumed to occur evenly throughout the test year. Accordingly, one-half of the annualized revenue adjustment determined in this Exhibit is projected to occur during the twelve months ending December 31, 2025 and is carried forward to Exhibit No. FII-2, page 3. The remainder of the annualized revenue adjustment is reflected on Exhibit No. FII-2-10.

11. State Tax Adjustment Surcharge

12.1 In addition to the charges provided in this tariff, a surcharge of 0.00% will apply to all charges for service rendered on or after August 1, 2025. (I) (C)

The above surcharge will be recomputed, using the same elements prescribed by the Commission.

a. Whenever any of the tax rates used in the calculation of the surcharge are changed; and

b. Whenever the utility makes effective any increased or decreased rates.

The above recalculation will be submitted to the Commission within 10 days after the occurrence of the event or date which occasions such recomputation; and, if the recomputed surcharge is less than the one then in effect, the Company will, and if the recomputed surcharge is more than the one then in effect, the Company may, submit with such recomputation a tariff or supplement to reflect such recomputed surcharge, the effective date of which shall be 10 days after filing.

Unmetered Service for Residential Class

Applicable for water service furnished in the City of York, Boroughs of East Prospect, Glen Rock, Jacobus, Jefferson, Loganville, New Freedom, New Salem, North York, Railroad, Seven Valleys, Shrewsbury, Spring Grove, West York, Manchester, Mount Wolf, York Haven and Yorkana, and Townships of Codorus, Conewago, Hellam, Hopewell, Jackson, North Hopewell, Paradise, Shrewsbury, Springettsbury, Springfield, Spring Garden, Manchester, East Manchester, Newberry, North Codorus, West Manchester, West Manheim, Windsor, York, Lower Windsor, and Washington, York County, Pennsylvania, and the Boroughs of Abbottstown and Carroll Valley, and Townships of Berwick, Cumberland, Oxford, Hamilton, Reading, Mount Pleasant Union, and Straban Township in Adams County, Pennsylvania, and the Townships of Greene, Hamilton, and Letterkenny in Franklin County, Pennsylvania, and the Townships of Salisbury and West Donegal in Lancaster County, Pennsylvania on and after the Effective Date shown at the bottom of this page. (C)

Applicable to a customer in the Residential Class that is added to the Company's service territory through an acquisition and does not have a meter at the customer's service address on the date of closing of such acquisition.

All water supplied by the Company under this rate schedule will be unmetered. However, the Company may install a meter of appropriate size at the customer's premise based on the Company's meter installation schedule as determined by the Company. Upon installation of a meter at the customer's service address by the Company, a customer will no longer be eligible for this rate schedule and will be charged a service charge based on the size of meter required to render adequate service along with a charge for consumption usage based upon the applicable metered rates in effect for the Residential Class.

The Distribution System Improvement Charge (DSIC) shall not be applied to bills of water customers in Washington Township; this will remain in effect until an amended Long-Term Infrastructure Improvement Plan (LTIIP) is filed and approved which includes Washington Township. Following the approval of an amended LTIIP, the DSIC surcharge shall be applicable to water customers in Washington Township.

Rate

The following monthly rate for Residential service shall apply:	$72.34 per month	(I)
The following monthly rate for Commercial service shall apply:	$100.09 per month	(I)
The following monthly rate for Residential service shall apply to customers previously served by Clyde A. and Nancy L. Scott d/b/a Scott Water Company in Greene Township in Franklin County, Pennsylvania:	$42.61 per month

To project pension expense included in the cost of service for the Company's two defined benefit pension plans (one plan for union-represented employees and one plan for general and administrative employees) to reflect the cash contribution to the pension trusts. The Company has reflected in its cost of service for rate-making purposes the cash contributions to its two defined benefit pension plans since the pension plans were established in 1959. The Commission in its orders at Docket No. R-00027975, dated June 26, 2003, Docket No. R-00049165, dated November 9, 2004, Docket No. R-00061322, dated September 15, 2006, Docket No. R-2008-2023067, dated October 9, 2008, Docket No. R-2010-2157140, dated November 4, 2010, Docket No. R-2012-2336379 dated February 28, 2014, Docket No. R-2018-3000019, dated March 1, 2019, and Docket No. R-2022-3031340 approved cash contributions plus administrative costs as the basis for the Company's ratemaking claim for pension expense.

53.53 III Operating Expense

D. Water and Wastewater Utilities

5 Submit detailed computation of adjustments to operating expenses for salary, wage and fringe benefit increases (union and non-union merit, progression, promotion and general) granted during the test year and six months subsequent to the test year. Supply data showing for the test year:

a. Actual payroll expense (regular and overtime separately), by categories of operating expenses, i.e.- maintenance, operating transmission, distribution, other.

b. Date, percentage increase and annual amount of each general payroll increase during the test year.

c. Dates and annual amounts of merit increases or management salary adjustments.

d. Total annual payroll increases in the test year.

e. Proof that the actual payroll plus the increases equal the payroll expense claimed in the supporting data (by categories of expenses).

f. Detailed list of employee benefits and cost thereof for union and non-union personnel. Any specific benefits for executives and officers should also be included, and cost thereof.

g. Support the annualized pension cost figures.

(i) State whether these figures include any unfunded pension costs. Explain.

(ii) Provide latest actuarial study used for determining pension accrual rates.

h. Submit a schedule showing any deferred income and consultant fee paid to both corporate officers and employees in the historic and future test years.

RESPONSE Refer to Page 2

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
OPERATING EXPENSE ADJUSTMENTS FOR SALARY, WAGE AND FRINGE
BENEFIT INCREASES

Response:

a., d and e. Refer to Exhibit Nos. FIII-2-1, FIII-2-1(a), FIII-2-1(b), FIII-2-15(a), and FIII-2-15(b) for detailed computations of adjustments to operating expenses for salary and wage increases to be granted in 2025, and a description of the procedure followed in computing pro forma payroll.

Refer to Exhibit Nos. FIII-2-25, FIII-2-25(a), FIII-2-25(b), FIII-2-40(a), and FIII-2-40(b) for detailed computations of adjustments to operating expenses for salary and wage increases to be granted in 2026.

b. and c. In 2025, an approximate 3.5% increase is projected to union, and 3.7% to non-union and management employees. The increase does not reflect a merit allowance. Performance is considered in establishing nonunion and management compensation.

In 2026, an approximate 3.5% increase is projected to union, and 3.7% to non-union and management employees. The increase does not reflect a merit allowance. Performance is considered in establishing nonunion and management compensation.

f. Refer to Exhibit Nos. FIII-2-3, FIII-2-6 and FIII-2-17 for detailed computations of adjustments to operating expenses for the twelve months ending December 31, 2025 for fringe benefits.

Refer to Exhibit Nos. FIII-2-27, FIII-2-30 and FIII-2-45 for detailed computations of adjustments to operating expenses for the twelve months ending February 28, 2027 for fringe benefits.

Refer to Exhibit No.FIII-2-10 and FIII-2-21 for detailed computations of indirect labor, group life insurance, health insurance, workers' compensation insurance, payroll taxes and pension expense capitalized to reflect expense adjustments for the twelve months ending December 31, 2025, and Exhibit No. FIII-2-34 and FIII-2-49 for the computations for the twelve months ending February 28, 2027.

Refer to Exhibit No. FIII-2 for employee benefits and the costs thereof.

The amount of vacation (including personal days and holidays) to be paid during the twelve months ending December 31, 2025, is 1,464,624

The amount of vacation (including personal days and holidays) to be paid during the twelve months ending February 28, 2027, is 1,624,018

g. The Company reflects for ratemaking purposes its actual cash payments to the defined benefit pension plans plus administrative fees.

h. No consultant fees are paid to corporate officers or employees.

Refer to Exhibit HIII-5 for the latest actuarial study for determining pension accrual rates.

14. Provide the two most recent actuarial studies for both pension expense and postretirement benefits other than pensions (OPEBs).

Response: Refer to Exhibit No. HIII-5 for the most recent actuarial valuation for pension expense.

Refer to Exhibit No. HIII-14 for the second most recent actuarial valuation for pension expense.

Refer to Exhibit No. HIII-14 for the two most recent actuarial studies for postretirement benefits other than pensions.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
PENSION EXPENSE FOR THE TWELVE MONTHS ENDING DECEMBER 31, 2025
AND ENDED DECEMBER 31, 2024 AND 2023

53.53 III. Operating Expense

D. Water and Wastewater Utilities

15. Identify the total pension expense under SFAS 87 for the test year and the portion charged to O&M. Include an analysis showing the contribution to the pension plan and the amount deferred or expensed for each of the past two years and the test year.

Response:

Year	Contribution To Pension Plans	SFAS 87 Expense	Amount Expensed	Amount Deferred
2025	-	(568,748)	-	(568,748)
2024	111,209	(687,331)	111,209	(798,540)
2023	1,680,000	(1,150,827)	1,680,000	(2,830,827)

The Company has two defined benefit pension plans (one plan for union-represented employees and one plan for administrative and general employees). The Company has reflected in its cost of service for ratemaking purposes the cash contributions to its two defined benefit pension plans since the pension plans were established in 1959. The Commission in its Orders at Docket No. R-00027975, dated June 26, 2003 Docket No. R-00049165, dated November 9, 2004, Docket No. R-00063122, dated September 15, 2006, Docket No. R-2008-2023067, dated October 9, 2008, Docket No. R-2010-2157140, dated November 4, 2010, Docket No. R-2012-2336379, dated January 9, 2014, Docket No. R-2018-3000019, dated January 17, 2019, and Docket No. R-2022-3031340, dated January 12, 2023 approved cash contributions plus administrative costs as the basis for the Company's ratemaking claim for pension expense.

OPEB EXPENSE FOR THE TWELVE MONTHS ENDING FEBRUARY 28, 2027

53.53 III. Operating Expense

D. Water and Wastewater Utilities

16. Provide an analysis of OPEBs showing the accrual amount under SFAS 106 and the pay-as-you-go expense.

Response:

Description	SFAS 106 Expense	Pay-As-You-Go Expense
Post Retirement Death Benefits	(10,712)	2,000

The Company pays a death benefit to the beneficiaries of Company employees and retirees. Pay-as-you-go costs of postretirement benefits other than pensions expensed during the twelve months ending December 31, 2025 were 2,000 representing one death. The Company has assumed the same one death per year in its cost of service claim.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
SFAS NO. 106 EXPENSE FOR THE TWELVE MONTHS ENDING FEBRUARY 28, 2027

53.53 III. Operating Expense

D. Water and Wastewater Utilities

17. Reconcile the historical and future test year SFAS No. 106 expense levels with the amount identified in the actuarial report.

Response:

The Company is not claiming SFAS No. 106 expenses in the cost of service.

Refer to Exhibit No. FIII-16 for pay-as-you-go postretirement expenses included in the cost of service.

Refer to Exhibit No. HIII-2-24 for the elimination of the cost of SFAS No. 106 postretirement health and death benefits.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
SFAS NO. 106 EXPENSE FOR THE TWELVE MONTHS ENDING FEBRUARY 28, 2027

53.53 III. Operating Expense

D. Water and Wastewater Utilities

18. Please identify the actual or projected amounts contributed to SFAS No. 106 funds for the historic and future test years. Identify the actual or projected dates and amounts of the contributions.

Response:

No amounts, either actual or projected, have been contributed to SFAS No. 106 funds for the historic and future test years.

Because the Company's SFAS No. 106 obligations are so small, the Company has not established funds to meet those obligations. The Company claims its SFAS No. 106 obligations in its cost of service on a pay-as-you-go basis.

THE YORK WATER COMPANY

SFAS 112 POSTRETIREMENT BENEFITS

53.53 III. Operating Expense

D. Water and Wastewater Utilities

21. State whether the test year expenses reflect any accruals for postretirement benefits under SFAS 112. If yes, provide complete details including supporting documentation, assumptions, and funding mechanisms.

Response:

Test year expenses do not reflect any accruals for postretirement benefits under SFAS 112.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
INCENTIVE COMPENSATION

53.53 III. Operating Expense

D. Water and Wastewater Utilities

22. Provide a copy of all incentive compensation and/or bonus plans and provide the level of related bonus payments included in the cost of service. Provide information for the preceding two years and any changes since the last rate case.

Response: A copy of the Company's Cash Incentive Plan is attached. The purpose of the Cash Incentive Plan is to help the Company motivate and reward participants who provide substantial services to the Company, contribute to the achievement of Company goals and promote the creation of value for customers. The Cash Incentive Plan was approved by the Company's Compensation Committee and Board of Directors on January 26, 2003.

A copy of the Cash Incentive Plan Performance Objectives for 2024 and 2025 is also attached.

Projected cash incentive payments of $351,394 for the twelve months ending February 28, 2027 are included in the cost of service. Cash incentive payments for the twelve months ending December 31, 2025 and ended December 31, 2024, are $338,857 and $296,198, respectively.

A copy of the Company's Long-Term Incentive Plan (LTIP) is attached. The purpose of the LTIP is to reward key employees and directors when key metrics have been met, to begin to integrate variable compensation into the entire compensation package, and to better align key employee goals with those of the Company as a whole.

The key metrics to be met before the awarding of stock grants are three-year average return on equity of greater than or equal to 9.5%, three-year average total shareholder return of 9.5% or greater, 3-year average customer complaint rate less than the average for PA companies, and 3-year average prices lower than the PA average. Each of the four goals have equal weighting.

Projected LTIP stock grants of $266,136 for the twelve months ending February 28, 2027 are included in the cost of service. LTIP stock grants for the twelve months ending December 31, 2025 and ended December 31, 2024, were $219,191 and $182,192, respectively.

THE YORK WATER COMPANY

Cash Incentive Plan

Purpose:

The purpose of the Incentive Plan (the "Plan") is to aid The York Water Company (the "Company") in retaining, attracting, motivating and rewarding associates ("Participants") who provide substantial services to the Company, to recognize contributions and reward achievement of Company goals, and promote the creation of value for customers by more closely aligning the interest of participants with those of customers. The Plan authorizes cash-based incentives for participants.

Definitions:

(a) "Annual Incentive Award" means a cash-based performance award granted to a Participant representing a right to receive payment, as determined by the Compensation Committee, based on the achievement of Company goals in a period of one (1) fiscal year or portion thereof.

(b) "Beneficiary" means the legal representatives of the Participant's estate entitled to receive benefits under a Participant's Annual Incentive Award upon a Participant's death. Each Participant will be permitted to designate a beneficiary to receive the benefits specified under the Participant's Annual Incentive Award upon the Participants death.

(c) "Committee" means the Compensation Committee of the Board of Directors of the Company.

(d) "Participant" means a person designated by the Committee to be eligible to receive an Annual Incentive Award under the Plan.

Administration:

The Plan shall be administered by the Committee, which shall have complete and final authority to select Participants, to determine the goals and circumstances under which Annual Incentive Awards are granted, to grant awards, to prescribe documents evidencing or setting terms of Annual Incentive Awards, to make amendments to the Plan, to establish rules and regulations for the administration of the Plan, to construe and interpret the Plan, to correct defects, supply omissions or reconcile inconsistencies as the Committee may deem necessary or advisable for the administration of the Plan. Decisions of the Committee with respect to the administration and interpretation of the Plan shall be final, conclusive and binding upon all persons interested in the Plan, including Participants and Beneficiaries.

Terms of Awards:

The Committee is authorized to grant cash-based Annual Incentive Awards, which may be earned upon the attainment or satisfaction of organizational goals. In addition, the Committee may specify that any Annual Incentive Award be conditioned upon achievement or satisfaction of business criteria or other measures of performance. The Committee may exercise its discretion to eliminate, to reduce or increase the amounts payable as Annual Incentive Awards, subject to such business criteria or other measures of performance.

(a) One or more of the following business criteria or other measures of performance may be used by the Committee in establishing Annual Incentive Awards: (1) growth in revenues or assets; (2) earnings from operations; (3) net income or net income per common share; (4) return on investment or return on equity; (5) stock price or shareholder return and (6) strategic business criteria, consisting of meeting specified water quality standards, environmental or safety standards, affordability of rates and customer satisfaction standards.

The targeted levels of performance with respect to such business criteria or other measures may be established at such levels and in such terms as the Committee may determine.

The Plan shall become effective upon approval of the Board of Directors of the Company. The Plan will remain in effect until terminated by action of the Board of Directors of the Company.

Performance Measures:

Annual Incentive Awards are granted upon the successful attainment and satisfaction of Performance Objectives within a given year. Attainment of Performance Objectives shall be measured over an annual incentive period of up to or more than one year, as specified by the Committee. A Performance Objective shall be established no later than ninety (90) days after the beginning of any annual incentive period.

Performance Objectives are approved by the Committee. The successful attainment and satisfaction of Performance Objectives is determined by the Committee and shall be final, conclusive and binding.

The achievement of each Performance Objective will be awarded a score of five (5) points. No points will be awarded for partial achievement of Performance Objectives. Annual Incentive Awards will be granted upon an overall score of seventy-five (75) percent of the available Performance Objective score. Achieving Performance Objectives and receiving Annual Incentive Awards will be the shared responsibility of the Participants. If an overall score of seventy-five (75) percent of the available Performance Objective is achieved, all Participants will receive Annual Incentive Awards. If an overall score of less than seventy-five (75%) of the available Performance Objective score is achieved, no Participant will receive an Annual Incentive Award.

Certain Performance Objectives may be designated by the Committee to be eligible for a Performance Bonus Score. The Committee may select Performance Objectives that are critical and highly important to the successful completion of the Company's mission and, at the Committee's sole discretion, award a Performance Bonus Score of five (5) points for the successful achievement or completion of Performance Objectives so designated.

Settlement:

Each year, the Committee will determine the amount of the Annual Incentive Award. Settlement of the Annual Incentive Award will be in cash. The Company is authorized to withhold from any Annual Incentive Award amounts of withholding or other taxes due in connection with the payment of the Annual Incentive Award.

Detailed Discussion

1. Infrastructure Replacement/Relining: ~52,000 feet of pipe [VP, Engr]

To have a water main replacement average of 80-100 years in accordance with PUC policy and industry standards. Focus will be on replacing pre-1940's pipes, which are most likely to have lead service lines, as well as acquired transite main. This will reduce water quality issues, increase fire flows, decrease service disruptions to customers, decrease unaccounted water, decrease O&M repair costs, decrease traffic disruptions, and decrease risk. This is an increase to the 50,000 feet objective in 2023.

2. Analyze the Energy Source for Susquehanna River Pumping Station [VP, Engr]

With the drought of 2023, for the first time since constructed over 20 years ago, the Company operated the diesel pumps at SRPS to transfer up to 12 MGD from the Susquehanna River to Lake Redman. There was significant expense for diesel fuel and air emissions permit considerations for using the diesel engines. The Company will conduct a study and analyze the cost/benefit opportunity of converting from diesel to electric.

3. Develop a Water Quality Model for the Main Distribution System [VP, Engr]

New regulations, most notably the Disinfection Requirements Rule of 2018, are forcing the Company to reevaluate its distribution network of pipes, tanks, and pumps. Beginning April 2019 the Company must maintain a minimum disinfectant residual concentration in the distribution system of a least 0.2 mg/L, a tenfold increase over the previous standard of 0.02 mg/L. Using the existing WaterCAD modeling software and supplementing with chemical degradation modelling, the Company will develop a predictive model to anticipate disinfectant stability to better manage resources and reduce costs associated with warm-weather flushing and water storage.

4. Develop Actions and Processes to Comply with 2024 Revised Lead and Copper Rule and New Regulations including PFAS [VP, Ops]

The Company must be compliant with existing and new regulations as promulgated by EPA, DEP and other regulating bodies. While elements remain to be finalized, the Company recognizes certain elements of the Revised Lead and Copper Rule will be enforceable by October 16, 2024. Beginning 2025 the Company must sample for lead and copper at schools and licensed daycare facilities. The company will develop a sampling plan, enhanced employee training program, and communications strategy for the communities we serve ahead of the 2025 sampling requirements and comply with the rule. EPA is expected to release a National Primary Drinking Water Regulation in 2024 establishing Maximum Contaminant Levels for six PFAS in drinking water. The company will comply with the regulation.

5. Develop and Implement an Enhanced Customer Service Representative Training Program [VP, CS]

The Company has experienced significant turnover in the Customer Service Department. The Department is no longer filled with long-tenured, experienced representatives. The Company will develop an enhanced orientation and training program for CSRs that will lead to improving the customer experience while providing additional professional development and paths towards advancement for our employees.

6. Evaluate a potential bill discount program for low-income customers [VP, CS]

As part of the settlement agreement for the Company's most recent base rate filing, the Company agreed to conduct an analysis of the estimated costs, potentially eligible customers, and impact on non-eligible customers of a potential bill discount program. The Company will schedule to meet with the parties to the settlement 30 days after the analysis is complete.

7. Conduct a Customer Survey across the Company's customer base [VP, CS]

Develop and conduct, with outside consultation, a comprehensive customer satisfaction survey. The last survey was conducted on the heals of the Covid pandemic and conditions have changed significantly. The Company will use the results of the survey to inform decisions in how to improve the total customer experience and what investments should be made to more efficiently manage and monitor customer relationships.

8. ERP Evaluation and Selection [CAO]

Complete the ERP evaluation of requirements, select an ERP platform and implementation partner, and award these contracts so that the ERP project can enter Phase II as we close 2024.

9. Complete a market benefits study [VP, HR]

In 2023 the Company conducted a market compensation study. To ensure that we recruit and retain highly skilled team members, we will extend our research to review and benchmark current employee benefits to ensure relevance and alignment with the current labor market.

10. Website Payment Process Enhancements and Public Education Material [CAO]

Reinforcing our focus on improving the customer experience, engage with our payment platform and/or ancillary partner to develop a more streamlined process (fewer clicks) to manage and pay bills and assist customers with payment agreement compliance. Produce and distribute at least 2 public education videos for customer education.

11. Complete a Debt Offering [CFO]

A debt offering would secure the necessary financing to pay down our line of credit to provide the necessary access to capital to fund the Company's anticipated 2024 construction expenditures and water and wastewater acquisitions as well as ensure capital is available in the event of an emergency that requires cash which benefits the customers. The Company will consider its capital structure and current obligations when determining the structure and maturity of this issue and utilize its current credit rating and analysis of market conditions to obtain the lowest debt cost possible.

12. Review the Taxation of Real Property [CFO]

This is a carry-over (incomplete) from 2023. The Company continues to grow and acquire or construct additional real property. The Company intends to audit the taxation of these properties to verify if they should be taxed under municipal property tax code or under Pennsylvania Public Utility Realty Tax (PURTA). The correct classification is important to verify the Company is paying the correct amount of tax on its real property and the correct amount of tax is being passed along to customers in rates.

13. Integrate Organic Growth and Acquired Customers Seamlessly (Water/Wastewater) [VP, OPS]

We expect to receive PUC approval for at least three acquisitions (York Haven, Brookhaven and Pine Run) in 2024 as well as organic growth throughout the year. Integrating these acquisitions involves significant resources across the Company. The seamless transition of customers and services to York Water level service, sound compliance and O&M practices, and mitigation of costs and expenses through economies of scale all must be accomplished while providing a quality customer experience.

14. Metering Infrastructure [VP, Ops]

Prepare and issue an RFP to analyze the process and pace required to achieve 100% remote read capability no later than January 1, 2035. A fixed-base, two-way communications platform can empower customers with actionable insight regarding usage and account management, reduce customer complaints and improve the customer experience. Conduct a survey of suppliers, technologies, propagation studies, cost/benefit analysis, leading to a plan recommendation. The objective is to complete the scope of work contracted for under the RFP in 2024.

15. Wastewater Inflow and Infiltration [VP, Ops]

Create a comprehensive SOP for investigation and reduction of I&I, to include development of a tracking tool and customer education about our wastewater system and water quality. The SOP and results of investigations will assist the Company in prioritizing capital for rehabilitation and repair of defective sanitary sewer assets.

16. ESG Program Development and Expansion [CAO]

Complete a climate baseline assessment for consumption of resources and emissions in 2024 and identify industry benchmarking tools to enable the Company to institute initiatives and programming in 2025. Determine where we are so we can envision where to go. Continue to build organizational awareness of ESG through 2 trainings in 2024 and identification of specific opportunities from each Department. Comply with direction provided by the Board of Directors for prioritization of ESG initiatives. Include an invitation to Board member Paul Bonney to meet with and educate the Company's leadership on ESG and create cross-functional integration of ESG priorities.

Earnings Per Share:

$1.21. The 2023 EPS was audited $1.66/share. The 2024 budget is estimated at $1.26/share. A $1.21 earnings goal is appropriate in 2024 as compared to our budget. This would protect shareholders from any significant downside and also is not so high that it could inappropriately incentivize management to focus on short-term gains at the expense of the more appropriate long-term growth and sustainability. In the event that actual earnings are less than the goal, than the incentive payout could be reduced by the same percentage.

Actual		

Detailed Discussion

1. Infrastructure Replacement/Relining: ~53,000 feet of pipe [VP, Engr]

To have a water main replacement average of 80-100 years in accordance with PUC policy and industry standards. Focus will again be on replacing pre-1940's pipes, which are most likely to have lead service lines, as well as acquired transite main. This will reduce water quality issues, increase fire flows, decrease service disruptions to customers, decrease unaccounted water, decrease O&M repair costs, decrease traffic disruptions, and decrease risk. This is an increase to the 52,000 feet objective in 2024. Highlight the sustainability component of ductile iron pipe as reinforced from intended primary source, US Pipe.

2. Complete a Groundwater Study for the Carroll Valley Water System [VP, Engr]

With the drought of 2023 rolling into 2024 and January 2025, the Company must be proactive in identifying new sources of supply; the Carroll Valley System is a priority due to growth and demand potential on the existing two-well system. The Company will engage a consultant to conduct a desktop analysis of potential new well sites for the Carroll Valley water system. Adding new wells would address the current vulnerability of having the only two existing wells in very close proximity to one another. Developing new wells would also add redundancy for existing customers and help prepare for future growth in the system. Sustainable and reliable sources of supply are the foundation of our sustainability initiatives.

3. Expedite Development of the Company's Sanitary Sewer Geographic Information System [VP, Engr]

The Company has a rudimentary geospatial system for wastewater assets compared to the more sophisticated and more highly developed model for water assets. We will develop the existing sanitary sewer GIS to the standards established for the potable water system by fixing connectivity and providing proper symbology, color schema, and network structure points to wastewater assets. In conjunction with the Wastewater Department, new asset management functionality will be added, including CCTV inspection data, with the goal of improving sanitary sewer asset management and capital project planning. More precise geospatial data that is available to operations and customer service personnel will improve service delivery to our growing portfolio of wastewater customers, especially regarding sanitary sewer blockages and opportunities to reduce I&I.

4. Complete a Market Compensation Study [VP, HR]

To ensure that we recruit and retain highly skilled team members, we will complete this market driven compensation study that covers Directors, Executives and Employees. Continuing to maintain a highly competent and skilled workforce will ensure that the company can provide Water and Wastewater services to all of its customers and meet all of its regulatory requirements.

5. Conduct an Employee Engagement Survey [VP, HR]

The Company is experiencing higher employee turnover rates than had been the norm pre-Covid (2020). While the turnover rates are below utility industry averages, they are anomalous to York Water. The survey will address questions such as ethics, compliance, culture, satisfaction, benefits, employee recognition and events. The Company will use the results of the survey to prepare action and

communication plans responding to survey results and informing our employees of the results. The results and action steps will be shared with the Board of Directors at the September 26, 2025 strategy session.

6. File a Base Rate Case to PA PUC [CFO]

Due to increasing expenses, the recovery of capital costs, and the recovery of capital investments to bring acquired distressed systems to standard, a rate case may be necessary in 2025. Submission of a rate case will ensure the company remains financially sound which will benefit customers.

7. ERP Integration [CAO]

With the selection of a platform and implementation partner, proceed with transition to a new ERP. While recognizing and tending to the challenges of change management and the interruption to old methods, hold to the milestone and budget framework to close 2025 on schedule and on budget for the 2026 launch.

8. Implement a Pilot Study for New Metering Technology [VP, Ops]

Implement and evaluate a pilot of Kamstrup meters, fixed collectors, and acoustic leak detection software, by end of calendar year 2025. The plan for the pilot, including timeline of project, locations of installations, and evaluation criteria, will be developed in consultation with Kamstrup and York Water Operations Team, with the end goal of evaluating Kamstrup as a long-term partner for York Water's metering technology. In addition to the operational benefits provided to York Water, we will evaluate the benefits to improving the customer experience with two-way communication, real-time leak detection, and water usage profiles that encourage conservation. Fixed collection technology, at full build out, would eliminate two meter-reading vehicles from the fleet and reduce the Company's carbon footprint.

9. Refine the Company's Water Audit Methodology and Reduce Unaccounted For Water Below 21% with target of 20%[VP, Ops]

The Company has experienced an increase in unaccounted for water. Redesign the Company's metered and unmetered water loss data collection and reporting, to include utilization of automated Hach WIMS reporting to inform company decision-making to address targeted water loss areas, metering enhancements, and company water use reporting. Using AWWA's methods and standards, improve data validity score to elevate from Tier III to Tier IV by April 2025 with a baseline water loss established by December 2025. Capital has been allocated in the 2025 budget for improved automation, metering and monitoring. This will be an item added to board education for 2025 and presented to the board at two meetings in 2025.

10. Conduct a Physical Security Audit of all Finished Water and Wastewater Facilities [VP, Ops]

Perform a system wide physical security/access audit of all facilities that store, treat or convey finished water and all facilities that treat or convey treated wastewater, including booster stations, tank sites, water treatment plants, wastewater treatment plants, wastewater lift stations etc. Results of the audit will guide how the team improves security/access by utilizing video, drone and access technology, creating consistency, and ultimately better protecting our water/wastewater resources. The results of the audit will inform decisions on how best to deploy resources in 2026 and beyond and better prepare the Company for the next PUC Management Audit.

11. Create a Metric-Driven Customer Service Dashboard [VP, CS]

The Company has a number of digital tools to track customer service responsiveness and customer trends, but they are disjointed. With the arrival of a new VP, CS in March, the Company will take this opportunity to create a Customer Service Dashboard that guides decision making for allocation of resources and takes better advantage of technology. Elements to be considered are payment agreement compliance, customer hold-time, routine appointment scheduling, and data related to customer interface time (length, frequency). The dashboard and results may indicate an opportunity to modify the supervisor and employee structure in the department and how/where best to flex human capital resources, and/or flexible scheduling aligned with customer demand.

Earnings Per Share:

$1.18 . The 2024 EPS was audited $1. /share. The 2025 budget is estimated at $1.23 /share. A $1.18 earnings goal is appropriate in 2025 as compared to our budget. This would protect shareholders from any significant downside and also is not so high that it could inappropriately incentivize management to focus on short-term gains at the expense of more appropriate long-term growth and sustainability. In the event that actual earnings are less than the goal, the incentive payout could be reduced by the same percentage.

THIS DOCUMENT CONSTITUTES PART OF A PROSPECTUS COVERING SECURITIES THAT HAVE BEEN REGISTERED UNDER THE SECURITIES ACT OF 1933

THE YORK WATER COMPANY

130 East Market Street
York, Pennsylvania 17401

To:	All York officers who are members of the Board of Directors; other key York employees who are designated by the Compensation Committee to participle in the Plan; and non-employee members of the Board of Directors
Subject:	The York Water Company Long-Term Incentive Plan
Date:	July 1, 2016
Market for the Securities:	NASDAQ Global Market Trading Symbol: YORW

THE YORK WATER COMPANY

LONG-TERM INCENTIVE PLAN

In February, 2016, the Board of Directors (the "Board") of The York Water Company ("York") adopted The York Water Company Long-Term Incentive Plan (the "Plan")

York solicited proxies for use at its annual meeting of its stockholders to be held on May 2, 2016, to consider and vote upon a proposal to approve the Plan, among other things.

On May 2, 2016, York stockholders approved the Plan at its annual meeting.

The following description of the Plan outlines for you the provisions of the Plan. It is not a complete statement of the Plan. It is recommended that you read and become familiar with the full text of the Plan, which is set forth in Exhibit A to this Prospectus.

What is the Plan?

The Plan provides certain officers, who may also be members of York's Board of Directors (the "Board"), other key York employees who are designated by the Compensation Committee of the Board (the "Committee"), and non-employee members of the Board with the opportunity to receive grants of incentive stock options, nonqualified stock options, unrestricted stock, restricted stock, restricted stock units, performance restricted stock, performance restricted stock units, and stock appreciation rights related to York stock.

When is the Plan effective?

The Plan will become effective as of July 1, 2016.

What is the purpose of the Plan?

The purpose of the Plan is to give participants an ownership interest in York and to create an incentive for them to contribute to York's growth, thereby benefiting York's stockholders, and aligning the economic interests of the participants with those of York's stockholders.

The Plan is necessary to ensure that compensation practices of York are competitive in the industry and to enable York to continue to assist in the attraction and retention of key employees vital to York's success.

Who administers the Plan?

The Plan is administered by the Committee. The Committee consists of not fewer than three (3) members of the Board or the full Board; provided, however, that the Board shall administer the Plan as it relates to the terms, conditions and grant of awards to non-employee members of the Board. The Committee has the authority to determine the individuals to whom grants will be made under the Plan; to determine the type, size, and terms of any grants made; to determine when grants will be made and the duration of any applicable exercise or restriction period; and to deal with any other matters arising under the Plan. The Committee also has the full power and authority to administer and interpret the Plan; to make factual determinations; and to carry out the purpose and intent of the Plan.

Who is eligible to receive grants under the Plan?

The following natural persons are eligible to receive grants under the Plan:

- Officers, who may also be members of the Board
- Key employees of York who are designated by the Committee
- Non-employee members of the Board

How many shares can be issued under the Plan?

The Plan authorizes the issuance of 100,000 shares of York common shares, all of which may be granted as incentive stock options. The maximum number of shares that may be subject to stock option, stock appreciation right, unrestricted stock, restricted stock, restricted stock unit, and performance restricted stock awards made to any individual under the Plan during any calendar year is 2,000 shares.

These limits will be adjusted for stock dividends, stock splits, recapitalizations, reorganizations, mergers, consolidations, combinations, exchanges, or other relevant changes in capitalization occurring after the date of grant.

What types of grants are available under the Plan?

The following types of grants are available under the Plan:

- Incentive Stock Options
- Nonqualified Stock Options
- Stock Appreciation Rights
- Unrestricted Stock
- Restricted Stock
- Restricted Stock Units
- Performance Restricted Stock
- Performance Restricted Stock Units

What are incentive stock options and nonqualified stock options?

Incentive stock options and nonqualified stock options are stock options that give you the right to purchase shares of York common stock at a specified exercise price during a specified period of time.

What is the difference between incentive stock options and nonqualified stock options?

The primary difference between incentive stock options and nonqualified stock options is the tax treatment. Basically, incentive stock options are not taxable at the time of exercise while nonqualified stock options are taxable at exercise. For more detailed information on the tax differences between these two types of options, see **"What are the federal income tax consequences of options, SARS, and stock awards?"** below.

In addition, nonqualified stock options may be awarded to anyone eligible to participate in the Plan. Only York employees or the employees of a subsidiary are eligible to receive incentive stock options.

The exercise price of nonqualified stock options and incentive stock options when issued must be equal to or greater than the fair market value of a share of York stock on the date of grant.

Illustration

If you receive a grant of an incentive stock option and the price per share of York stock at the time of grant is $10, the option exercise price must be $10 or greater.

If you receive an incentive stock option, only $100,000 of your incentive stock option (based upon the fair market value of York stock on the date of grant) may first become exercisable by you during any calendar year. In other words, the aggregate amount of all incentive stock options granted under all of York plans that first become exercisable by you in any calendar year may not exceed $100,000. Any options granted to be exercisable in a calendar year that exceed this limit must be nonqualified stock options.

Illustration

You receive an incentive stock option grant to purchase 75,000 shares of York stock. Under its terms, you can acquire 15,000 shares in Year 1, plus an additional 15,000 shares per year in Years 2 through 4. At the time of the option grant, each share had a fair market value of $10. Thus, each year you could buy stock with a value, at the time of option grant, of $150,000 (15,000 shares × $10). Because of the $100,000 limitation, only the first 10,000 shares that you could acquire in a year would receive the preferential incentive stock option treatment. This is because these 10,000 option shares have an aggregate fair market value, measured at option grant, of $100,000. The additional 5,000 shares that you could acquire for the first time each year would be treated as a nonqualified stock option.

In addition, if you receive an incentive stock option and you own more than 10 percent of the voting power of York stock or the stock of a subsidiary, the exercise price must be at least equal to 110 percent of the fair market value of York stock on the date of grant, and the option term may not be longer than five years.

How will I know what the terms of my grants are?

Each grant under the Plan will be accompanied by a grant agreement. The grant agreement will describe the type (such as an incentive stock option or a nonqualified stock option or a restricted stock unit) of grant that you have been awarded and the terms and restrictions applicable to the grant. The grant agreement for an option and a restricted stock unit will describe when the option or restricted stock unit, as applicable, will become exercisable. You should read the grant agreements along with the Plan.

How can I exercise my options?

You may exercise options that have become exercisable by delivering a notice of exercise to the Treasurer of York, followed by payment of the exercise price within 10 days after the exercise of the option. You may pay the exercise price, as specified by the Committee in your grant agreement, which may include payment by the following methods: (i) in cash; (ii) by delivering to York previously-owned shares; (iii) in the discretion of the Committee, through an election to have shares otherwise issuable to you withheld to pay the exercise price of such option; or (iv) in the discretion of the Committee, through any combination of the payment procedures set forth in (i) through (iii) above.

How long do I have to exercise my options?

The exercise term of each option will be determined by the Committee and set forth in your grant agreement; provided that the exercise period will generally not commence earlier than 6 months after the date of the grant of the option nor end later than 10 years after the date of the grant of the option. If you own more than 10 percent of the voting power of York stock or the stock of a subsidiary, and an incentive stock option is granted to you, the incentive stock option may not have a term that exceeds 5 years from the date of grant.

Illustration

If you receive a stock option with a five-year term on January 1, 2016, the option would need to be exercised no later than December 31, 2020.

What are stock appreciation rights ("SARs")?

SARs may be granted in connection with an option and give you the right to receive the appreciation in the value of York stock over a specified period of time. SARs can be settled in cash, York stock or a combination of the two, as set forth in your grant agreement.

What is the value of a SAR?

In exchange for exercising a SAR, you will receive an amount of cash, York stock or a combination of the two, equal to the amount by which the fair market value of the underlying stock on the date of exercise exceeds the base price of the SAR, as set forth in your grant agreement.

Illustration

If you receive a stock settled SAR for 5,000 shares with a base price of $7 and you exercise the SAR when the current price of York stock is $10, you would receive $15,000 worth of York stock (5,000 shares × $3 (or $10 – $7)), which would be 1,500 shares ($15,000 / $10).

What is the base price of a SAR?

The base price of each SAR will equal the per share exercise price of the related option.

When can I exercise my SARs?

You may exercise your SARs during the period specified in your grant agreement. Your SARs will be subject to vesting and other restrictions as specified in your grant agreement. Upon the exercise of your SAR, the underlying option will be cancelled, and, likewise, upon the exercise of the underlying option, your SAR will be cancelled.

What happens to my options or SARs if I leave York?

Except as provided in your award agreement or unless the Committee determines otherwise, if your employment or service terminates, to the extent your options or SARs are not vested and exercisable, those options or SARs, as applicable, will be forfeited and returned to York.

In the event of you cease to be an employee of York because of death, "Disability", or "Retirement", as such terms are defined in the Plan, your option must be exercised by you, your estate or beneficiaries, as applicable, within 1 year following your death or "Disability", or within 3 years following your "Retirement", prior to the option's expiration. In these cases, you may exercise all or any portion of each option regardless of whether or not they are fully exercisable under the terms of the grant.

In the event your employment is terminated for any other reason, your option must be exercised within 3 months following your termination, prior to the option's expiration.

The Committee may, in its sole discretion, extend the post-termination period during which the option may be exercised; provided however that such period may not extend beyond the original option period. Other than those provisions of the Plan regarding "Change in Control", as such term is defined in the Plan, you have no right to exercise any your options or SARs if you are discharged for willful, deliberate, or gross misconduct, as determined by the Committee in its sole discretion.

What is a stock award?

A stock award is a grant of York stock that is often subject to vesting and transfer restrictions (Restricted Stock) as set forth in the grant agreement, but may not be subject to such restrictions (Unrestricted Stock).

The Committee will determine whether a stock award will be granted, the number of shares that will be awarded, any restrictions applicable to the stock award, and when and how any restrictions will lapse. Restrictions may be based on the lapse of a specified vesting period or upon meeting certain performance goals.

What is a restricted stock unit?

A Restricted Stock Unit represents the right to receive an amount in cash, York stock or a combination of cash and stock (as determined by the Committee) based upon the value of a share of York stock (or such other measurement base as the Committee determines) subject to restrictions. Restrictions may be based on the lapse of a specified vesting period or upon meeting certain performance goals. Restricted Stock Units that vest based upon meeting certain performance goals are called Performance Restricted Stock Units.

Will I receive dividends with respect to my Restricted Stock or Restricted Stock Units?

If York pays a cash dividend to holders of York stock during the period that you hold unvested Restricted Stock or Restricted Stock Units, you will be entitled to receive cash equal to the dividend payable on your Restricted Stock or Restricted Stock Units, which will be reinvested into additional shares of Restricted Stock or Restricted Stock Units when the dividend is paid. The additional shares of Restricted Stock or Restricted Stock Units will be paid at the same time, and to the same extent, that the underlying award is paid.

What happens to my Restricted Stock award or Restricted Stock Unit if I leave York?

Except as provided in your award agreement or unless the Committee determines otherwise, if your employment or service terminates while your Restricted Stock or Restricted Stock Unit is subject to restrictions, any shares, units, and any accrued but unpaid dividends (or dividend equivalents) as applicable, whose restrictions have not yet lapsed will be forfeited and returned to York.

Except as provided in your award agreement or unless the Committee determines otherwise at the time of grant, in the event of you cease to be an employee of York because of death, "Disability", or "Retirement", as such terms are defined in the Plan, and you have completed a minimum of 1 year of employment during your applicable restriction period, your restrictions shall lapse on that number of shares or units (if any) determined by multiplying the (i) full number of shares or units subject to restriction by (ii) a fraction, (x) the numerator of which is the number of full months of employment you have

completed in such restriction period and (y) the denominator of which is the total number of full months in such restriction period.

In the event your employment is terminated, the Committee may, in its sole discretion, waive in whole or in part any or all remaining restrictions. Other than those provisions of the Plan regarding "Change in Control", as such term is defined in the Plan, you have no right to receive payment of any your Restricted Stock or Restricted Stock Units if you are discharged for willful, deliberate, or gross misconduct, as determined by the Committee in its sole discretion.

What is Performance Restricted Stock?

Performance Restricted Stock is Restricted Stock that vests based on the achievement of one or more of the following performance goals: (i) total shareholder return; (ii) return on shareholders' equity; (iii) return on capital; (iv) earnings per share; (v) revenue; (vi) earnings; (vii) cash flow; (viii) operating income; (ix) earnings before interest, taxes, depreciation and amortization; and (x) fair market value of York stock. The Committee will determine a minimum performance level below which no Performance Restricted Stock will be payable. The Committee may adjust the performance measures to reflect significant unforeseen events, unless such adjustment would cause Performance Restricted Stock granted to a "covered employee" under Section 162(m) of the Internal Revenue Code (generally, the CEO and the three most highly compensated officers other than the CFO) to cease to be considered "performance-based compensation" under Section 162(m) of the Internal Revenue Code.

Will I receive dividends with respect to my Performance Restricted Stock?

If York pays a cash dividend to holders of York stock during the performance period for Performance Restricted Stock, you will be entitled to receive dividend equivalents, which will be reinvested into additional shares of Performance Restricted Stock when the dividend is paid. The additional shares of Performance Restricted Stock will be paid at the same time, and to the same extent, that the underlying award of Performance Restricted Stock is paid.

What happens to my Performance Restricted Stock if I leave York?

In the event that, during the performance period, you cease to be an employee of York because of your death, "Disability", or "Retirement", as such terms are defined in the Plan, and you have completed at least 1 year of employment during the applicable performance period, you shall be paid the number of shares of Performance Restricted Stock equal to the number actually earned, as of the end of the performance period, times a fraction, (x) the numerator of which is the number of full months of employment you have completed in such performance period and (y) the denominator of which is the total number of full months in such performance period. If you cease to be an employee of York after the performance period due to your death, Disability or Retirement, all of the shares underlying the Performance Restricted Stock will vest.

If your employment or service terminates during or after the performance period for any reason other than your death, Disability, or Retirement, your Performance Restricted Stock will be forfeited and returned to York.

In the event your employment is terminated, the Committee may, in its sole discretion, continue your right to earn any or all Performance Restricted Stock and waive in whole or in part any or all remaining restrictions. Other than those provisions of the Plan regarding "Change in Control", as such term is defined in the Plan, you have no right to receive payment of any your Performance Restricted Stock if you are discharged for willful, deliberate, or gross misconduct, as determined by the Committee in its sole discretion.

What happens to my grants upon a change in control of York?

The following will occur with respect to awards that terminate in connection with a "Change in Control", as such term is defined in the Plan:

- Stock options and SARs, whether vested or unvested, will become fully exercisable.
- All restrictions applicable to any outstanding Restricted Stock and Restricted Stock Units Award shall lapse as of the date of such Change in Control.
- Performance Restricted Stock will be deemed to have been earned to the maximum extent permitted under the performance goals for any performance period not yet completed as of the effective date of such Change in Control and will immediately vest as of the date of such Change in Control.

All Restricted Stock Units will be settled as promptly as is practicable in accordance with applicable law.

Do I ever have to pay York back for equity grants?

York will, in all appropriate circumstances, as determined by the Committee, and to the extent permitted by applicable law, require reimbursement or forfeiture of all or a portion of any award under the Plan, including any dividends earned or paid in connection with an award, where the Committee has determined that all of the following factors are present:

- York is required to prepare an accounting restatement due to material noncompliance with any financial reporting requirement to which York is subject.
- The award, or its vesting or payment, was predicated upon the achievement of certain financial results that were the subject of the restatement, and such award, vesting or payment occurred or was received during the 3-year period preceding the date York is required to prepare the restatement.
- A smaller award, vesting or payment would have occurred or been made to you based upon the restated financial results.

In each such instance, York will, to the extent deemed appropriate by the Committee, recover or cancel the amount(s) by which an award, or its vesting or payment, during the aforementioned 3-year period exceeded the amount(s) that would have been awarded, vested or paid based on the restated financial results.

Are grants under the Plan transferable?

Generally, grants are not transferable by you except upon death. Grants may only be exercised by you during your lifetime and may not be transferred except by will, through the laws of descent and distribution or, in the case of awards other than incentive stock options, pursuant to a domestic relations order, if permitted by the Committee. The Committee may also permit you to transfer awards other than incentive stock options to applicable immediate family members or certain trusts or other entities established for the benefit of family members.

Can the Plan be amended?

The Plan may generally be amended by the Board or its delegate at any time. The stockholders must, however, approve any amendment for which stockholder approval is required under applicable provisions of the Internal Revenue Code or under applicable exchange requirements or to increase the maximum number of shares of York stock available for distribution under the Plan.

No modification, amendment, or termination of the Plan shall adversely affect your rights as a Plan participant under a grant previously made to you without your consent.

When does the Plan terminate?

The Plan will terminate on May 2, 2026, the tenth anniversary of the adoption date by the York shareholders.

What restrictions on resale apply?

If you are an affiliate of York, you will be subject to limitations on your ability to reoffer or resell shares of stock issued under the Plan. An affiliate is defined under the Securities Act of 1933 (the "Securities Act") to be a person who directly, or indirectly through one or more intermediaries, controls, is controlled by, or is under common control with York. Generally, affiliates may not offer or sell shares unless the offers and sales are made pursuant to an effective registration statement under the Securities Act or pursuant to an exemption. York has filed a registration statement on Form S-8 with respect to the shares offered by this prospectus. Affiliates may also sell shares without registration under the Securities Act pursuant to Rule 144, provided that the applicable terms and conditions of Rule 144 are met.

In addition, Section 16 of the Securities Exchange Act of 1934 (the "Exchange Act") contains provisions to the effect that, among other things, any person who is an York officer or director or a beneficial owner of more than 10 percent of a class of York equity securities may be liable to York for profits realized from any purchase and sale (or any sale and purchase) of York equity securities within a period of less than 6 months. Substantial liabilities may be incurred by persons subject to Section 16 of the Exchange Act in connection with transactions in York equity securities (including stock options).

Before acquiring or disposing of any of York equity securities, you should consult with counsel as to your status as an affiliate, the applicability of Section 16 of the Exchange Act.

What are the federal income tax consequences of options, SARs, and stock awards?

The current United States federal income tax treatment of options and stock awards under the Plan is generally described below. This description of tax consequences is not a complete description. There may be different income tax consequences under certain circumstances, and there may be gift and estate tax consequences. Local, state, and other taxing authorities may also tax grants under the Plan. Tax laws are subject to change. You are urged to consult with your personal tax advisor concerning the application of the general principles discussed below to your own situation and the application of other tax laws. The Plan is not subject to the Employee Retirement Income Security Act of 1974 and is not a tax-qualified plan under Section 401 of the Internal Revenue Code.

Nonqualified Stock Options

There generally are no federal income tax consequences to you or to York upon the grant of a nonqualified stock option.

Upon the exercise of a nonqualified stock option, you will recognize ordinary income in an amount equal to the excess of the fair market value of the shares of York stock at the time of exercise over the exercise price. York generally will be entitled to a corresponding federal income tax deduction.

Upon the sale of the shares of stock acquired upon the exercise of a nonqualified stock option, you will have a capital gain or loss in an amount equal to the difference between the amount realized on the sale and your tax basis in the shares (the exercise price, plus the amount of income recognized at the time of exercise). The capital gain tax rate will depend upon the length of time you held the shares and other factors.

Illustration

On January 1, 2016, you receive a nonqualified stock option grant to purchase 5,000 shares of York stock at an exercise price of $10 per share.

— You will not recognize income and York will not receive a deduction at this time.

On June 15, 2017, you exercise the option to purchase all 5,000 shares when the current price of the stock is $15 per share.

— You will recognize $25,000 of ordinary income (5,000 shares × $5 ($15 – $10)) and York will be entitled to a deduction in the same amount. You will have a $75,000 basis in the shares of stock (the $50,000 exercise price, plus the $25,000 in recognized income).

On September 2, 2019, you sell all 5,000 shares of stock for $25 per share.

— You will recognize $50,000 in long-term capital gains ($125,000 in sales proceeds less your $75,000 in basis).

Incentive Stock Options

There generally are no federal income tax consequences to you or to York upon the grant of an incentive stock option.

You will not recognize income for purposes of the regular federal income tax upon the exercise of an incentive stock option. For purposes of the alternative minimum tax, however, in the year in which you exercise an incentive stock option, the amount by which the fair market value of the shares acquired upon exercise exceeds the exercise price will be included in your alternative minimum taxable income.

You will recognize income when you sell stock acquired upon exercise of an incentive stock option. If you dispose of the shares acquired upon exercise of an incentive stock option after two years from the date the option was granted and after one year from the date the shares were transferred upon the exercise of the option, you will recognize long-term capital gain or loss in the amount of the difference between the amount realized on the sale and the exercise price. York will not be entitled to any corresponding tax deduction.

If you dispose of shares acquired upon your exercise of an incentive stock option before satisfying both holding period requirements (a disqualifying disposition), your gain recognized on the disposition will be taxed as ordinary income to the extent of the difference between the fair market value of the shares on the date of exercise (or the amount realized on the disposition, if less) and the exercise price, and generally, York will be entitled to a deduction in that amount. The gain, if any, in excess of the amount recognized as ordinary income will be long-term or short-term capital gain, depending upon the length of time you held your shares before the disposition.

Illustration

On January 1, 2016, you receive an incentive stock option grant to purchase 5,000 shares of York stock at an exercise price of $10 per share.

— You will not recognize income and York will not receive a deduction at this time.

On June 15, 2017, you exercise the option to purchase all 5,000 shares when the current price of the stock is $15 per share.

— You will not recognize any regular federal income and York will not receive a deduction at this time. You will, however, recognize $25,000 of alternative minimum taxable income (5,000 shares × $5 ($15 – $10).

Scenario 1

On March 2, 2018, you sell all 5,000 shares of stock for $25 per share.

— You will recognize ordinary income in the amount of $25,000 (5,000 shares × $5 (the $15 fair market value of the stock on the date of exercise less the $10 exercise price) and York will receive a deduction in the same amount. You will have a $75,000 basis in the shares of stock (the $50,000 exercise price, plus the $25,000 in recognized ordinary income).

— You will recognize $50,000 in long-term capital gains ($125,000 in sales proceeds less $75,000 in basis).

Scenario 2

On September 2, 2019, you sell all 5,000 shares of stock for $25 per share.

— You will recognize $75,000 in long-term capital gains ($125,000 in sales proceeds less your $50,000 in basis attributable to the exercise price).

Stock Appreciation Rights

There generally are no federal income tax consequences to you or us upon the grant of a SAR. Upon exercise, you will recognize ordinary compensation income equal to the fair market value of any shares received. York generally will be entitled to a corresponding federal income tax deduction at the time of exercise of the SAR.

When you sell any shares acquired by the exercise of a SAR, you will have capital gain or loss in an amount equal to the difference between the amount realized upon the sale and your adjusted tax basis in the shares (the amount of ordinary income recognized by you at the time of exercise of the SAR).

Illustration

On July 1, 2016, you receive an SAR for 3,000 shares with a base amount of $10 per share.

— You will not recognize income and York will not receive a deduction at this time.

On September 25, 2017, you exercise the SAR when the current price of the stock is $15 per share.

— You will recognize $15,000 of ordinary income (3,000 shares × $5 ($15 – $10)) and York will be entitled to a deduction in the same amount. You will have a $15,000 basis in the 1,000 shares of stock you receive.

On April 2, 2020, you sell all 1,000 shares of stock for $25 per share.

— You will recognize $10,000 in capital gains ($25,000 in sales proceeds less your $15,000 in basis).

Stock Awards

If you receive stock awards, you generally will not recognize taxable income, and York will not be entitled to a deduction, until the stock is transferable by you or the stock is no longer subject to a substantial risk of forfeiture for federal tax purposes (i.e., when the shares vest), whichever occurs earlier. When the stock is either transferable or the stock is no longer subject to a substantial risk of forfeiture, you will recognize ordinary income in an amount equal to the fair market value of the shares (less any amounts paid for the shares) at that time, and generally, York will be entitled to a deduction in the same amount.

You may elect to recognize ordinary income, however, in the year when the restricted stock awards are granted in an amount equal to the fair market value of the shares subject to the award (less any amounts paid for such shares) at that time, determined without regard to any restrictions (commonly referred to as making an "83(b) election"). In that event, York generally will be entitled to a corresponding deduction in the same year. Any gain or loss recognized by you upon a later disposition of the shares will be capital gain or loss.

If you receive stock awards that are not subject to a substantial risk of forfeiture or are transferable at grant, you will recognize income on the value of the shares at the date of grant. York will generally be entitled to a corresponding tax deduction.

Illustration

On October 1, 2016, you receive an award for 5,000 shares of restricted stock and the current price of York stock is $10 per share.

Scenario 1

You do not make an 83(b) election to include income in the year of grant.

— You will not recognize any income and York will not receive a deduction at this time.

On October 1, 2017, the restrictions on your stock award lapse and the current price of the stock is $15 per share.

— You will recognize $75,000 of ordinary income (5,000 shares × $15) and York will be entitled to a deduction in the same amount. You will have a $75,000 basis in the shares of stock.

On February 12, 2019, you sell all 5,000 shares of stock for $25 per share.

— You will recognize $50,000 in capital gains ($125,000 in sales proceeds less your $75,000 in basis).

Scenario 2

You make an 83(b) election to include income in the year of grant.

— You will recognize $50,000 of ordinary income (5,000 shares × $10) and York will be entitled to a deduction in the same amount. You will have a $50,000 basis in the shares of stock.

On October 1, 2017, the restrictions on your stock award lapse and the current price of the stock is $15 per share.

— You will not recognize any additional recognize income at this time.

On February 12, 2019, you sell all 5,000 shares of stock for $25 per share.

— You will recognize $75,000 in capital gains ($125,000 in sales proceeds less your $50,000 in basis).

Stock Units

If you receive stock units, you generally will not recognize taxable income, and York will not be entitled to a deduction, until the stock unit is no longer subject to a substantial risk of forfeiture for federal tax purposes (*i.e.*, when the shares vest) and settlement occurs, which generally must occur within 2

1/2 months following the end of the vesting year. When the stock unit is settled, you will recognize ordinary income in an amount equal to the fair market value of the shares (less any amounts paid for the shares) or cash provided at that time, and generally, York will be entitled to a deduction in the same amount.

Tax Withholding

York has the right to deduct from all grants or other compensation payable to you any taxes required to be withheld with respect to grants under the Plan. York may require that you pay to York the amount of any required withholding. The Committee may permit you to satisfy our tax withholding obligation with respect to a grant by having shares withheld or by accepting delivery of shares you previously owned. The value of shares withheld, however, may not exceed the minimum required tax withholding amount.

Transfer of Stock Options

The Committee may permit you to transfer nonqualified stock options to applicable family members or a trust or other entity established for the benefit of family members, consistent with applicable law. The tax consequences of stock option transfers are complex and should be carefully evaluated by you and your tax advisor.

Generally, you will not recognize income at the time you make a gift of a nonqualified stock option to a family member or a trust or other entity. When the transferee later exercises the option, you (and not the transferee) must recognize ordinary income on the difference between the fair market value of the stock and the exercise price.

For federal gift tax purposes, if you transfer an option before the option has become exercisable, the transfer will not be considered by the Internal Revenue Service to be a completed gift until the option becomes exercisable. The value of the gift will be determined when the option becomes exercisable. Gifts of options may qualify for the federal annual gift tax annual exclusion ($14,000 in 2016). If you die after transferring an option in a completed gift transaction, the transferred option may be excluded from your estate for estate tax purposes if the applicable estate tax requirements have been met.

What information is available about York and the Plan?

The Securities Exchange Commission (SEC) allows York to "incorporate by reference" into this prospectus the information York file with it, which means that York can disclose important information to you by referring you to those documents. The information incorporated by reference is considered to be a part of this prospectus, and later information filed with the SEC will update and supersede this information. York incorporates by reference any future filings made with the SEC under Sections 13(a), 13(c), 14, or 15(d) of the Exchange Act until York files a post-effective amendment to the registration statement indicating that all securities offered by this prospectus have been sold or deregistering all securities remaining unsold. The following documents filed with the SEC are incorporated by reference in this prospectus:

(a) The York Annual Report on Form 10-K for the fiscal year ended December 31, 2015;

(b) The York Quarterly Report on Form 10-Q for the quarter ended March 31, 2016;

(c) The York Current Report on Form 8-K filed with the SEC on May 3, 2016; and

(d) The description of York common stock, set forth in the York Current Report on Form 8-K filed with the Commission on June 12, 1997.

You may request a copy of these filings at no cost by writing York at the following address (or such other address as York provides in a notice to you):

The York Water Company
130 East Market Street
York, Pennsylvania 17401

You may request a copy of these filings at no cost by telephoning York at the following telephone number (or such other telephone number as York provides in a notice to you) during standard business hours: (717) 845-3601.

York has filed with the SEC a registration statement on Form S-8 with respect to the shares offered by this prospectus. This prospectus is a part of the registration statement and does not contain all of the information included in the registration statement, certain parts of which are omitted in accordance with the rules and regulations of the SEC. For further information about us and the common stock, please refer to the registration statement. Whenever a reference is made in this prospectus to the Plan, the reference may not be complete, and you should refer to the exhibits that are a part of the registration statement for a copy of the Plan.

York files annual, quarterly and special reports, proxy statements and other information with the SEC. Their SEC filings are available to the public over the Internet at the SEC's web site at www.sec.gov. (This URL is intended to be an inactive textual reference only.) You may also read and copy any document York files at the SEC's public reference rooms in Washington, D.C., New York, New York, and Chicago, Illinois. Please call the SEC at (800) SEC-0330 for further information on the public reference rooms. You may also inspect York's SEC reports and other information at the NASDAQ Global Market, on which York's common stock is listed.

York intends to send to you regular reports concerning your participation in the Plan, and you may request a report of the status of your participation in the Plan at any time. In addition to regularly supplied reports, York will provide to you, without charge, upon your oral or written request, another copy of this prospectus and a copy of any or all of the documents which are incorporated by reference (except that exhibits to such documents will not be provided without charge unless such exhibits are specifically incorporated by reference into such documents), and of any other document required to be delivered to participants in the Plan by rules adopted by the SEC. All requests for information about the Plan and the administrators of the Plan should be directed to us at the address listed above.

This Plan is not subject to any provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

This prospectus is intended to be a summary of the Plan, and in the event of any conflict between the terms of the Plan and this prospectus, the terms of the Plan shall govern. York has authorized no one to provide you with different information.

EXHIBIT A

THE YORK WATER COMPANY LONG-TERM INCENTIVE PLAN

THE YORK WATER COMPANY LONG-TERM INCENTIVE PLAN

ARTICLE I.
GENERAL PROVISIONS

1.1 PURPOSES

The purposes of the Long-Term Incentive Plan (the "Plan") are to advance the long-term success of The York Water Company (the "Company" or "York"), and to increase shareholder value by providing the incentive of long-term stock-based awards to officers, directors and key employees. The Plan is designed to: (1) encourage Company stock ownership by Participants to further align their interest with the interests of shareholders of the Company, (2) ensure that compensation practices of the Company are competitive in the industry and (3) assist in the attraction and retention of key employees vital to the Company's success.

1.2 DEFINITIONS

For the purpose of the Plan, the following terms shall have the meanings indicated:

(a) "**Board**" means the Board of Directors of the Company.

(b) **"Change in Control"** means: (1) the acquisition, directly or indirectly, by any person or entity, or persons or entities acting in concert, whether by purchase, merger, consolidation or otherwise, of voting power over that number of voting shares of the capital stock of the Company which, when combined with the existing voting power of such persons or entities, would enable them to cast more than fifty percent (50%) of the votes which all shareholders of York would be entitled to cast in the election of directors of York; (2) the transfer of ownership (in one transaction or a series of related transactions over a period of twelve months ending on the date of the most recent transaction) of 75% or more of the assets, other than intangible assets, including good will, of York to a transferee other than York or an entity of which a controlling interest is owned by York; provided that in addition, such transferred assets must also have 40% or more of the total gross fair market value of all of the assets of York, inclusive of the intangible assets; or (3) the date that a majority of members of York's Board of Directors is replaced during any twelve-month period by directors whose appointment or election is not endorsed by a majority of the members of York's Board of Directors before the date of the appointment or election.

(c) "**Code**" means the Internal Revenue Code of 1986, as amended, including any successor law thereto.

(d) "**Committee**" means the Compensation Committee of the Board.

(e) "**Common Stock**" means the Common Stock of the Company.

(f) "**Company**" means York Water Company.

(g) "**Disability**" means the Participant, by reason of any medically determinable physical or mental impairment that can be expected to result in death or to last for a continuous period of not less than twelve months, receives benefits for a period of not less than six months under the Company's Salary Continuation policy or any future disability policy as enacted. Medical determination of Disability may be made by either the Social Security Administration or by the provider of disability insurance covering employees or directors of the Company provided that the definition of "disability" applied under such insurance program complies with the requirements of the preceding sentence.

(h) "**Dividend Equivalent**" means an amount equal to the cash dividend paid on one share of Common Stock for each Performance Restricted Share granted during the Performance Period. All Dividend Equivalents will be reinvested in Performance Restricted Shares at a purchase price equal to the Fair Market Value on the dividend date.

(i) "**Fair Market Value**" means as of any date, so long as the Common Stock is traded on a nationally recognized securities exchange or automated dealer quotation system, the closing price of the Common Stock on that day. If the Common Stock is not traded on such an exchange or system and is traded solely on the over-the-counter market, the Fair Market Value shall be the average of the closing bid and asked prices for that day. If the Common Stock is not publicly traded, then Fair Market Value shall mean the value assigned to a share for a given day by the Committee in good faith in the exercise of its reasonable discretion and in a manner consistent with Code Section 409A.

(j) "**Incentive Stock Option**" means a Stock Option that meets the definition under Section 422 of the Code.

(k) "**Non-Employee Director**" means a member of the Board who is not an employee of the Company.

(l) "**Nonqualified Stock Option**" means a Stock Option that does not meet the definition of an Incentive Stock Option.

(m) "**Participant**" means any individual who has met the eligibility requirements set forth in Section 1.6 hereof and to whom a grant has been made and is outstanding under the Plan.

(n) "**Performance Measures**" shall mean the Performance Measures described in Section 4.4 of the Plan.

(o) "**Performance Period**" means, in relation to Performance Restricted Stock for any period for which performance goals have been established.

(p) "**Performance Restricted Stock**" means a right granted to a Participant pursuant to Article IV.

(q) "**Performance Restricted Stock Units**" means a bookkeeping entry representing the equivalent of shares of Stock, awarded to a Participant pursuant to Article V which is subject to a Restriction Period.

(r) "**Restricted Stock Grant**" means an award of Common Stock granted to a Participant pursuant to Article V which is subject to a Restriction Period.

(s) **"Restricted Stock Unit**" means a bookkeeping entry representing the equivalent of shares of Stock, awarded to a Participant pursuant to Article V which is subject to a Restriction Period.

(t) "**Restriction Period**" means in relation to the Performance Restricted Stock Grant or Restricted Stock Grant, the period of time (if any) during which (i) such shares are subject to forfeiture pursuant to the Plan and (ii) such shares may not be sold, assigned, transferred, pledged or otherwise disposed of by the Participant.

(u) "**Retirement**" means termination from employment with the Company at age sixty (60) or older.

(v) "**Stock Appreciation Right**" means a right granted to a Participant pursuant to Article III to surrender to the Company all or any portion of the related Stock Option and to receive in cash or in shares of Common Stock an amount equal to the excess of the Fair Market Value over the option price on the date of such exercise.

(w) "**Unrestricted Stock Grants**" means an award of Common Stock granted to a Participant pursuant to Article V which is not subject to a Restriction Period.

(x) "**Stock Option**" means a right granted to a Participant pursuant to Article II, to purchase, before a specified date and at a specified price, a specified number of shares of Common Stock.

1.3 ADMINISTRATION

The Plan shall be administered by the Compensation Committee of the Board which shall consist of not fewer than three directors of the Company or the full Board; provided, however, that the Board shall administer the Plan as it relates to the terms, conditions and grant of awards to Non-Employee Directors. For purposes of the Plan, the term Committee shall refer to the Compensation Committee of the Board or the full Board, as the case may be. A majority of the Committee shall constitute a quorum, and the acts of a majority of the members present at any meeting at which a quorum is present, or acts approved in writing by a majority of the Committee, shall be deemed the acts of the Committee. Subject to the provisions of the Plan and to directions by the Board, the Committee is authorized to interpret the Plan, to adopt administrative rules, regulations, and guidelines for the Plan, and to impose such terms, conditions, and restrictions on grants as it deems appropriate. The Committee, in its discretion, may allow certain optionees holding unexercised Incentive Stock Options to convert such options to Nonqualified Stock Options. The Committee may, with respect to Participants who are not subject to Section 16(b) of the Exchange Act or "covered employees" within the meaning of Section 162(m) of the Code ("**Section 162(m)**"), delegate such of its powers and authority under the Plan as it deems appropriate to designated officers or employees of the Company.

1.4 TYPES OF GRANTS UNDER THE PLAN

Grants under the Plan may be in the form of any one or more of the following:

(a) Nonqualified Stock Options;

(b) Incentive Stock Options

(c) Stock Appreciation Rights;

(d) Performance Restricted Stock Grants;

(e) Performance Restricted Stock Units

(f) Restricted Stock Grants;

(g) Restricted Stock Units;

(h) Unrestricted Stock Grants

1.5 SHARES SUBJECT TO THE PLAN AND INDIVIDUAL AWARD LIMITATION

(a) A maximum 50,000 shares of Common Stock may be issued under the Plan. All such shares may be granted in the form of Incentive Stock Options, Nonqualified Stock Options, Stock Appreciation Rights, Performance Restricted Shares, Restricted Stock Awards, Restricted Stock Units or Stock Awards, or in any combination of the foregoing. The total number of shares authorized is subject to adjustment as provided in Section 7.1 hereof. Shares of Common Stock issued under the Plan may be treasury shares or authorized but unissued shares. No fractional shares shall be issued under the Plan.

(b) If any Stock Option granted under the Plan expires or terminates, the underlying shares of Common Stock may again be made available for the purposes of the Plan. Any shares of Common Stock that have been granted as Restricted Stock Awards or that have been reserved for distribution in payment for Performance Restricted Shares but are later forfeited or for any other reason are not payable under the Plan, may again be made available for the purposes of the Plan. Furthermore, shares of Common Stock that are (i) tendered or withheld in payment of the exercise price of any Stock Option or in satisfaction of withholding tax obligations arising from any award, and (ii) shares of Common Stock repurchased by the Company that have been designated for allocation to the Plan, shall be available for issuance under the Plan.

(c) The aggregate maximum number of shares of Common Stock that may be granted to any Participant in the form of Stock Options, Stock Appreciation Rights, Performance Restricted Shares, Restricted Stock Awards, Restricted Stock Units and Stock Awards in any one calendar year is 700.

1.6 ELIGIBILITY AND PARTICIPATION

Participation in the Plan shall be limited to officers, who may also be members of the Board, other key employees of the Company who are so designated by the Committee in its discretion and Non-Employee Directors.

ARTICLE II.
STOCK OPTIONS

2.1 GRANT OF STOCK OPTIONS

The Committee may from time to time, subject to the provisions of the Plan, grant Stock Options to Participants. The Committee shall determine the number of shares of Common Stock to be covered by each Stock Option and shall have the authority to grant Incentive Stock Options, Nonqualified Stock Options or a combination thereof; provided, however, that Incentive Stock Options may be granted only to Participants who are employees of the Company and may not be granted to Non-Employee Directors. Furthermore, the Committee may grant a Stock Appreciation Right in connection with a Stock Option, as provided in Article III.

2.2 INCENTIVE STOCK OPTION EXERCISE LIMITATIONS

The aggregate Fair Market Value (determined at the time an Incentive Stock Option is granted) of the shares of Common Stock with respect to which an Incentive Stock Option is exercisable for the first time by a Participant during any calendar year (under all plans of the Company) shall not exceed $100,000 or such other limit as may be established from time to time under the Code.

2.3 OPTION DOCUMENTATION

Each Stock Option shall be evidenced by a written Stock Option agreement ("**Option Agreement**") between the Company and the Participant to whom such Stock Option is granted, specifying the number of shares of Common Stock that may be acquired by its exercise and containing such terms and conditions consistent with the Plan as the Committee shall determine.

2.4 EXERCISE PRICE

The price at which each share covered by a Stock Option may be acquired shall be determined by the Committee at the time the Stock Option is granted and shall not be less than the Fair Market Value of the underlying shares of Common Stock on the day the Stock Option is granted. If an Incentive Stock Option is granted to an employee who, at the time such Incentive Stock Option is granted, owns shares of the Company possessing more than 10 percent of the total combined voting power of all classes of shares of the Company or its subsidiaries ("**10% Shareholder**"), the exercise price of such Stock Option shall not be less than 110% of the Fair Market Value of the underlying shares of Common Stock on the day such Stock Option is granted. The exercise price will be subject to adjustment in accordance with the provisions of Section 7.1 of the Plan.

2.5 EXERCISE OF STOCK OPTIONS

(a) Exercisability. Stock Options shall become exercisable at such times and upon the satisfaction of such conditions and in such installments as the Committee may provide at the time of grant.

(b) Exercise Term. Each Option Agreement shall state the period or periods of time within which the Stock Option may be exercised by the Participant, in whole or in part, which shall be such period or periods of time as may be determined by the Committee, provided that the exercise period shall not commence earlier than six (6) months after the date of the grant of the Stock Option nor end later than ten (10) years after the date of the grant of the Stock Option.

(c) Exercise in the Event of Termination of Employment.

(i) Death: Unless otherwise provided by the Committee at the time of grant, in the event of the death of the Participant, the Stock Option must be exercised by the Participant's estate or beneficiaries within one year following the death of the Participant and prior to its expiration. Each Stock Option may be exercised as to all or any portion thereof regardless of whether or not fully exercisable under the terms of the grant.

(ii) Disability: Unless otherwise provided by the Committee at the time of grant, in the event of the Disability of the Participant, the Stock Option must be exercised within one year following the Participant's termination of employment and prior to its expiration. Each Stock Option may be exercised as to all or any portion thereof regardless of whether or not fully exercisable under the terms of the grant.

(iii) Retirement: Unless otherwise provided by the Committee at the time of grant, in the event of the Retirement of the Participant, the Stock Option must be exercised within three years following the Participant's termination of employment and prior to its expiration. An unexercised Incentive Stock Option will cease to be treated as such and will become a Nonstatutory Stock Option three months following the date of Retirement. Each Stock Option may be exercised as to all or any portion thereof regardless of whether or not fully exercisable under the terms of the grant.

(iv) Other Terminations: Unless otherwise provided by the Committee at the time of grant, in the event a Participant ceases to be an employee of the Company for any reason other than death, Disability, or Retirement, Stock Options which are exercisable on the date of termination must be exercised within three months after termination and prior to the expiration date of any such option. All options which are not exercisable on the date of termination shall be canceled.

(v) Extension of Exercise Period: Notwithstanding all other provisions under Section 2.5(c), in the event a Participant's employment is terminated, the Committee may, in its sole discretion, extend the post-termination period during which the option may be exercised, provided however that such period may not extend beyond the original option period.

(d) Exercise In the Event of a Change in Control: In the event of any Change in Control, all Stock Options shall immediately become exercisable without regard to the exercise period established pursuant to this Section 2.5 and the Option Agreement.

2.6 METHOD OF EXERCISE

The Stock Option may be exercised in whole or in part from time to time by written request received by the Treasurer of the Company. The option price of each share acquired pursuant to a Stock Option shall be paid in full on or within ten (10) days after the exercise of the Stock Option either (i) in cash, (ii) by delivering to the Company previously-owned shares of Common Stock, (iii) in the discretion of the Committee, through an election to have shares of Common Stock otherwise issuable to the Participant withheld to pay the exercise price of such Stock Option, or (iv) in the discretion of the Committee, through any combination of the payment procedures set forth in (i) through (iii) above. However, shares of Common Stock previously acquired by the Participant under the Plan or any other incentive plan of the Company shall not be utilized for purposes of payment upon the exercise of a Stock Option unless those shares have been owned by the Participant for a six-month period or such longer period as the Committee may determine. Common Stock acquired by the Participant which is identified as having been obtained through an Incentive Stock Option under this Plan and is still subject to the holding requirements under Section 422 of the Code may not be tendered in payment of the option price.

2.7 LIMITATION OF RIGHTS AS A SHAREHOLDER

No Participant shall have any rights to dividends or other rights of a shareholder with respect to shares of Common Stock subject to a Stock Option until the Participant has given written notice of exercise of the Stock Option, has paid in full the option price for such shares of Common Stock and has otherwise complied with this Plan, the Option Agreement and such rules and regulations as may be established by the Committee.

ARTICLE III.
STOCK APPRECIATION RIGHTS

3.1 GRANT OF STOCK APPRECIATION RIGHTS

The Committee may, in its discretion, grant Stock Appreciation Rights in connection with all or any part of a Stock Option granted under the Plan. Any Stock Appreciation Right granted in connection with a Stock Option shall be governed by the terms of the Option Agreement and the Plan. A Stock Appreciation Right may be granted either concurrently with the grant of the related Stock Option or, if the related Stock Option is a Nonstatutory Stock Option, at any time thereafter prior to the complete exercise, termination, expiration or cancellation of such related Stock Option, and shall be granted at Fair Market Value in accordance with the requirements for exemption from Section 409A of the Code.

3.2 EXERCISE OF STOCK APPRECIATION RIGHTS

Stock Appreciation Rights shall become exercisable under the same terms and conditions governing the related Stock Option under Section 2 and the Option Agreement, but shall be

exercisable only when the Fair Market Value of the shares subject thereto exceeds the option price of the related Stock Option. Further, the Stock Appreciation Right shall be exercisable only at the time and to the extent that the related Stock Option is exercisable, and in no event after the complete termination or full exercise of the related Stock Option.

3.3 METHOD OF EXERCISE

(a) Stock Appreciation Rights shall permit the Participant, upon exercise of such rights, to surrender the related Stock Option, or any portion thereof, and to receive, without payment to the Company (except for applicable withholding taxes), an amount equal to the excess of the Fair Market Value over the option price. Such amount shall be paid in shares of Common Stock valued at Fair Market Value on the date of exercise or in cash, or any combination of shares and cash, as determined by the Committee in its discretion.

(b) Upon the exercise of a Stock Appreciation Right and surrender of the related Stock Option, or portion thereof, such Stock Option, to the extent surrendered, shall be terminated, and the shares covered by the Stock Option so surrendered shall no longer be available for purposes of the Plan. Upon the exercise or termination of the related Stock Option, the Stock Appreciation Right with respect thereto shall be canceled automatically to the extent of the number of shares of Common Stock with respect to which the related Stock Option was so exercised or terminated.

ARTICLE IV.
PERFORMANCE RESTRICTED STOCK

4.1 GRANT OF PERFORMANCE RESTRICTED STOCK

The Committee may from time to time, grant shares of Common Stock to Participants in the form of Performance Restricted Stock, which will thereafter become the unrestricted property of the Participant only if they are both Earned and become vested. For purposes of the Plan, Performance Restricted Shares shall be deemed to be "**Earned**" as of the day during the Performance Period that the performance of the Company meets or exceeds the Performance Measures established by the Committee relating to those Performance Restricted Stock. Such Performance Restricted Stock shall be subject to the provisions of the Plan terms and conditions, and, if earned, a vesting period as the Committee shall determine.

4.2 PERFORMANCE RESTRICTED SHARE AGREEMENT

Each grant of Performance Restricted Stock shall be evidenced by a written agreement between the Company and Participant to whom such shares are granted. The agreement shall specify the number of Performance Restricted Stock granted, the terms and conditions of the grant, the duration of the Performance Period, the Performance Measures to be achieved, and the vesting period applicable to shares of Common Stock Earned.

4.3 COMMON STOCK EQUIVALENT

Performance Restricted Stock shall be evidenced either by a Common Stock certificate issued in the name of the Participant, which shall bear appropriate restrictive legends relating to

the applicable Performance Measures and the Performance Period, or by book entry on the stock transfer records of the Company showing the issuance of said shares in the name of the Participant and the Performance Measures and Performance Period that apply. Certificates, if issued, shall be held in custody by the Company until the Performance Restricted Stock are both Earned and vested.

4.4 PERFORMANCE MEASURES

Performance Restricted Stock awards shall be conditioned upon the Company's attainment of a specified goal with respect to one or more Performance Measures, including, but not limited to: (i) total shareholder return; (ii) return on shareholders' equity; (iii) return on capital; (iv) earnings per share; (v) revenue; (vi) earnings; (vii) cash flow; (viii) operating income; (ix) earnings before interest, taxes, depreciation and amortization; and (x) Fair Market Value of Common Stock. The Committee shall determine a minimum performance level below which no Performance Restricted Stock shall be payable and a performance schedule under which the number of shares earned may be less than, equal to, or greater than the number of Performance Restricted Stock granted based upon the Company's performance. The Committee may adjust the Performance Measures to reflect significant unforeseen events; provided, however, that the Committee may not make any such adjustment with respect to any award of Performance Restricted Stock to an individual who is then a "covered employee" as such term is defined in Regulation 1.162-27(c)(2) promulgated under Section 162(m), if such adjustment would cause compensation pursuant to such Performance Restricted Stock award to cease to be performance-based compensation under Section 162(m).

4.5 PERFORMANCE PERIOD

The Committee shall establish a Performance Period applicable to each grant of Performance Restricted Stock. Each such Performance Period shall commence as of the date determined by the Committee in its discretion. There shall be no limitation on the number of Performance Periods established by the Committee, and more than one Performance Period may encompass the same calendar year or other period covered by one or more other Performance Periods. The Committee may shorten any Performance Period if it determines that unusual or unforeseen events so warrant.

4.6 DIVIDEND EQUIVALENTS DURING PERFORMANCE PERIOD

If, during the Performance Period, the Company makes a payment of cash dividends to holders of Common Stock, a Participant shall be entitled to receive Dividend Equivalents, which shall be reinvested in additional Performance Restricted Stock at the same time as such cash dividend is paid. Performance Restricted Stock resulting from such dividend reinvestment shall be evidenced by an additional share certificate or by further book entry on the stock transfer records of the Company of Common Stock, bearing the appropriate restrictive legend, and shall be added to the other Performance Restricted Stock held in custody or showing on the Common Stock transfer records of the Company, and shall be payable to the Participant in the same manner and at the same time as the Performance Restricted Stock with respect to which such Dividend Equivalents were issued.

4.7 CONVERSION OF PERFORMANCE RESTRICTED SHARES

(a) At the conclusion of the Performance Period, the Committee shall determine the number of Performance Restricted Stock, if any, that have been earned on the basis of Company performance in relation to the established Performance Measures and that have become vested. The Company shall then, as soon as administratively practicable, deliver or otherwise make available in the Participant's name, shares of Common Stock bearing no Plan-related restrictive legends, in an aggregate amount equal to the number of Performance Restricted Stock, plus additional shares due to Dividend Equivalents, Earned and vested as of the end of the Performance Period. In no event shall such number exceed 300% of the shares contingently granted.

(b) Any Performance Restricted Stock being held in custody or entered on the stock transfer records of the Company, including the related additional stock due to Dividend Equivalents, that the Committee determines to have not been Earned and vested shall be canceled.

4.8 VESTING

Performance Restricted Stock that are Earned during the Performance Period will continue to be restricted property, subject to the Participant's continued employment with the Company through the last day of the Performance Period, at which time the Performance Restricted Stock that were Earned will vest and become the unrestricted property of the Participant. In the event the Participant's employment with the Company terminates during the Performance Period, Section 4.10 shall apply to determine the Participant's rights with respect to Performance Restricted Stock Earned in such Performance Period. The Committee may accelerate or waive the Performance Measures attached to a particular grant, in whole or in part, based on service and such other factors as the Committee may determine.

4.9 OTHER TERMS AND CONDITIONS

Performance Restricted Stock shall be subject to the following terms and conditions:

(a) Except as otherwise provided in the Plan or in the Performance Restricted Stock agreement, the Participant shall have all the rights of a shareholder of the Company, including the right to vote the stock.

(b) Cash dividends paid with respect to Performance Restricted Stock shall be reinvested to purchase additional shares of Common Stock that shall be subject to the same terms, conditions, and restrictions that apply to the Performance Restricted Stock with respect to which such dividends were issued.

4.10 TERMINATION OF EMPLOYMENT DURING A PERFORMANCE PERIOD

(a) In the event a Participant terminates employment during a Performance Period by reason of death, Disability, or Retirement, and the Participant had completed a minimum of one year of employment during the Performance Period, the Participant shall be entitled to that number of shares earned (if any) determined by multiplying the full number of stock earned (if

any) by a fraction, the numerator of which is the number of full months of employment the Participant had completed in such Performance Period and the denominator of which is the total number of full months in such Performance Period. All applicable restrictions shall lapse with respect to such shares and such shares of Common Stock shall be issued to the Participant or the Participant's designated beneficiary following the Performance Period. In the event the Participant had not completed one year of employment during the Performance Period, the Participant shall forfeit all rights to earn such Performance Restricted Stock.

(b) If a Participant terminates employment during a Performance Period for any reason other than death, Disability, or Retirement, the Participant shall forfeit all rights to earn such Performance Restricted Stock.

(c) Notwithstanding Sections 4.10(a) and 4.10(b), in the event a Participant's employment is terminated during a Performance Period under special circumstances, the Committee may, in its sole discretion, continue a Participant's rights to earn any or all Performance Restricted Stock and waive in whole or in part any or all remaining restrictions.

4.11 TERMINATION OF EMPLOYMENT FOLLOWING A PERFORMANCE PERIOD

(a) In the event a Participant terminates employment following a Performance Period by reason of death, Disability, or Retirement, all shares of Common Stock (formerly Performance Restricted Stock) shall immediately vest, and shares of Common Stock shall be issued to the Participant or the Participant's designated beneficiary.

(b) If a Participant terminates employment following a Performance Period for any reason other than death, Disability, or Retirement, the Participant shall forfeit all shares of Common Stock (formerly Performance Restricted Stock) which have not yet vested. Shares of Common Stock which have vested shall be issued to the Participant.

(c) Notwithstanding Sections 4.11(a) and 4.11(b), in the event a Participant's employment is terminated following a Performance Period under special circumstances, the Committee may, in its sole discretion, accelerate the remaining vesting period (if any) associated with that grant.

4.12 CHANGE IN CONTROL PROVISIONS

In the event of any Change in Control, (i) all Performance Restricted Stock granted, including those granted pursuant to Dividend Equivalents, shall be deemed to have been Earned to the maximum extent permitted pursuant to Section 4.4 for any Performance Period not yet completed as of the effective date of such Change in Control and (ii) all shares of Common Stock (which have been converted from Performance Restricted Shares Earned) not otherwise vested shall immediately vest as of the date of such Change in Control.

ARTICLE V.
RESTRICTED STOCK GRANTS AND UNITS AND STOCK AWARDS

5.1 AWARD OF RESTRICTED STOCK AND UNITS AND STOCK GRANTS

The Committee may grant Restricted Stock, Restricted Stock Units and unrestricted Stock Grant to officers and key employees of the Company subject to such terms and conditions as the Committee shall determine, provided that each Restricted Stock Award or Restricted Unit shall be subject to a Restriction Period. Restricted Stock Awards, Restricted Units and Stock Awards shall be used for the purposes of recruitment, recognition, and retention of key employees vital to the Company's success. The Committee may, in its sole discretion, require a Participant to deliver consideration in the form of services or cash as a condition to the grant of a Restricted Stock Award or Stock Award.

5.2 RESTRICTED STOCK AND UNITS AWARD AND STOCK AWARD AGREEMENTS

Each Restricted Stock Award, Restricted Stock Unit and Stock Award shall be evidenced by a written agreement between the Company and the Participant to whom such award is granted. The agreement shall specify the number of shares or units awarded, the terms and conditions of the award and, in the case of a Restricted Stock Award or Restricted Stock Unit, the Restriction Period, and the consequences of forfeiture.

5.3 AWARDS AND CERTIFICATES

Shares of Common Stock awarded pursuant to a Restricted Stock Award or a Stock Award shall be registered in the name of the Participant and evidenced either by the issuance of certificates or by book entry on the stock transfer records of the Company showing the applicable restrictions. Certificates evidencing Restricted Stock Awards, bearing appropriate restrictive legends, shall be held in custody by the Company until the restrictions thereon are no longer in effect. After the lapse or waiver of the restrictions imposed upon the Restricted Stock Award, the Company shall deliver in the Participant's name one or more stock certificates, free of restrictions, evidencing the shares of Common Stock subject to the Restricted Stock Award to which the restrictions have lapsed or been waived, or shall re-register the shares of Common Stock on the stock transfer records of the Company free of the applicable restrictions.

5.4 RESTRICTION PERIOD

At the time a Restricted Stock Award is made, the Committee shall establish a Restriction Period applicable to such award. The Committee may provide for the lapse of such restrictions in installments and may accelerate or waive such restrictions, in whole or in part, based on service and such other factors as the Committee may determine.

5.5 RESTRICTED STOCK UNITS

Restricted Stock Units may be settled in cash or Stock, as determined by the Committee and set forth in the Award Agreement. Holders of Restricted Stock Units shall have no rights as stockholders of the Company. The Committee may provide in an Award Agreement that the

holder of such Restricted Stock Units shall be entitled to receive, upon the Company's payment of a cash dividend on its outstanding Stock, a cash payment for each Restricted Stock Unit held equal to the per-share dividend paid on the Stock, which may be deemed reinvested in additional Restricted Stock Units at a price per unit equal to the Fair Market Value of a share of Stock on the date that such dividend is paid to shareholders.

5.6 OTHER TERMS AND CONDITIONS OF RESTRICTED STOCK AWARDS

Shares of Common Stock subject to Restricted Stock Awards shall be subject to the following terms and conditions:

(a) Except as otherwise provided in the Plan or in the Restricted Stock Award agreement, the Participant shall have all the rights of a shareholder of the Company, including the right to vote the shares.

(b) Cash dividends paid with respect to Common Stock subject to a Restricted Stock Award shall be reinvested to purchase additional shares of Common Stock that shall be subject to the same terms, conditions, and restrictions that apply to the Restricted Stock Award with respect to which such dividends were issued.

5.7 TERMINATION OF EMPLOYMENT

(a) In the event a Participant terminates employment during the Restriction Period by reason of death, Disability or Retirement, and the Participant had completed a minimum of one year of employment during the Restriction Period, restrictions shall lapse on that number of shares or units (if any) determined by multiplying the full number of shares or units subject to restriction by a fraction, the numerator of which is the number of full months of employment the Participant had completed in such Restriction Period and the denominator of which is the total number of full months in such Restriction Period.

(b) If a Participant terminates employment for any reason other than death, Disability, or Retirement, the Participant shall forfeit all shares subject to restriction.

(c) Notwithstanding Sections 5.6(a) and 5.6(b), in the event a Participant's employment is terminated under special circumstances, the Committee may, in its sole discretion, waive in whole or in part any or all remaining restrictions.

5.8 CHANGE IN CONTROL PROVISIONS

In the event of any Change in Control, all restrictions applicable to any outstanding Restricted Stock Restricted Stock Units Award shall lapse as of the date of such Change in Control.

ARTICLE VI.
TAX WITHHOLDING AND DEFERRAL OF PAYMENT

6.1 TAX WITHHOLDING

(a) The Company may withhold from any payment of cash or Common Stock to a Participant or other person pursuant to the Plan an amount sufficient to satisfy any required withholding taxes, including the Participant's social security and Medicare taxes and federal, state and local income tax with respect to income arising from the payment of the award. The Company shall have the right to require the payment of any such taxes before delivering payment or issuing Common Stock pursuant to the award.

(b) At the discretion of the Committee, share tax withholding may be included as a term of any grant of Stock Options, Stock Appreciation Rights, Performance Restricted Shares, Restricted Stock or Unit Awards or Stock Awards.

(c) Share tax withholding shall entitle the Participant to elect to satisfy, in whole or in part, any tax withholding obligations in connection with the issuance of shares of Common Stock earned under the Plan by requesting that the Company either:

(i) withhold shares of Common Stock otherwise issuable to the Participant, or

(ii) by accepting delivery of shares of Common Stock previously owned by the Participant.

In either case, the Fair Market Value of such shares of Common Stock will generally be determined on the date the Participant elects to satisfy such withholding tax obligations in such manner.

(d) Notwithstanding any other provision hereof to the contrary, the Committee, in its sole discretion, may at any time suspend, terminate, or disallow any or all entitlements to share tax withholding previously granted or extended to any Participant.

6.2 NO ELECTIVE DEFERRAL OF PAYMENT

No Participant may be offered the right to elect to defer the receipt of all or any portion of Performance Restricted Shares, Restricted Stock Awards, Stock Awards or any other award otherwise distributable to such Participant. It is the Company's intent that the Plan, and each award feature under the Plan, be exempt from the requirements imposed by Code Section 409A on nonqualified deferred compensation plans and, in furtherance of that intent, the Committee, in its exercise of administrative discretion hereunder, shall at all times do so in a manner that avoids compensation deferral arrangements that would be subject to Code Section 409A. Furthermore, awards that have been made, earned and vested shall be paid out as soon as practicable once all performance and vesting restrictions have been satisfied or lapsed, and in any event shall be paid in full no later than the 15th day of the third month following the end of the Company's taxable year in which all performance and vesting restrictions were satisfied.

ARTICLE VII.
OTHER PROVISIONS

7.1 ADJUSTMENT IN NUMBER OF SHARES AND OPTION PRICES

Grants of Stock Options, Stock Appreciation Rights, Performance Restricted Shares, and Restricted Stock or Unit Awards and Stock Awards shall be subject to adjustment by the Committee as to the number and price of shares of Common Stock or other considerations subject to such grants in the event of changes in the outstanding shares by reason of stock dividends, stock splits, recapitalizations, reorganizations, mergers, consolidations, combinations, exchanges, or other relevant changes in capitalization occurring after the date of grant. In the event of any such change in the outstanding shares, the aggregate number of shares available under the Plan may be appropriately adjusted by the Committee. Except in connection with a corporate transaction involving the Company (including, without limitation, any stock dividend, stock split, extraordinary cash dividend, recapitalization, reorganization, merger, consolidation, split-up, spin-off, combination, or exchange of shares), the terms of outstanding awards may not be amended to reduce the exercise price of an outstanding Stock Option or cancel, exchange or surrender an outstanding Stock Option in exchange for cash, other awards or Stock Options with an exercise price that is less than the exercise price of the original Stock Option. Notwithstanding anything in the Plan to the contrary, neither the Board nor the Committee shall have the authority, without shareholder approval, (i) to accept the surrender of any outstanding Stock Option when the Fair Market Value of a share of Common Stock is less than the exercise price of such outstanding Stock Option and grant new Stock Options or other awards in substitution for such surrendered Stock Option or pay cash in connection with such surrender, (ii) to reduce the exercise price of any outstanding Stock Option, or (iii) to take any other action that would be treated as a repricing of Stock Options under the rules of the primary stock exchange on which the Common Stock is listed.

7.2 NO RIGHT TO EMPLOYMENT

Nothing contained in the Plan, nor in any grant pursuant to the Plan, shall confer upon any Participant any right with respect to continuance of employment by the Company or its subsidiaries, nor interfere in any way with the right of the Company or its subsidiaries to terminate the employment or change the compensation of any employee at any time.

7.3 NONTRANSFERABILITY

A Participant's rights under the Plan, including the right to any shares or amounts payable may not be assigned, pledged, or otherwise transferred except, in the event of a Participant's death, to the Participant's designated beneficiary or, in the absence of such a designation, by will or by the laws of descent and distribution; provided, however, that the Committee may, in its discretion, at the time of grant of a Nonstatutory Stock Option or by amendment of an Option Agreement for an Incentive Stock Option or a Nonstatutory Stock Option, provide that Stock Options granted to or held by a Participant may be transferred, in whole or in part, to one or more transferees and exercised by any such transferee, provided further that (i) any such transfer must be without consideration, (ii) each transferee must be a member of such Participant's "immediate family" or a trust, family limited partnership or other estate planning vehicle

established for the exclusive benefit of one or more members of the Participant's immediate family; and (iii) such transfer is specifically approved by the Committee following the receipt of a written request for approval of the transfer; and provided further that any Incentive Stock Option which is amended to permit transfers during the lifetime of the Participant shall, upon the effectiveness of such amendment, be treated thereafter as a Nonstatutory Stock Option. In the event a Stock Option is transferred as contemplated in this Section 7.3, such transfer shall become effective when approved by the Committee, and such Stock Option may not be subsequently transferred by the transferee other than by will or the laws of descent and distribution. Any transferred Stock Option shall continue to be governed by and subject to the terms and conditions of this Plan and the relevant Option Agreement, and the transferee shall be entitled to the same rights as the Participant as if no transfer had taken place. As used in this Section 7.3, "immediate family" shall mean, with respect to any person, any spouse, child, stepchild or grandchild, and shall include relationships arising from legal adoption.

7.4 COMPLIANCE WITH GOVERNMENT REGULATIONS

(a) The Company shall not be required to issue or deliver shares or make payment upon any right granted under the Plan prior to complying with the requirements of any governmental authority in connection with the authorization, issuance, or sale of such shares.

(b) The Plan shall be construed and its provisions enforced and administered in accordance with the laws of the Commonwealth of Pennsylvania applicable to contracts entered into and performed entirely in such state.

(c) Notwithstanding that the Plan, and each award issued pursuant to the Plan, is intended to be exempt from the requirements Section 409A of the Code imposes on nonqualified deferred compensation plans, in the event that any award under the Plan is determined to provide nonqualified deferred compensation within the meaning of said Section 409A, the distribution of such award to a key employee of the Company, as defined in Section 416(i) of the Code without regard to paragraph (5) thereof, being made on account of the key employee's separation from service with the Company, shall be deferred to a date that is six months after the separation from service. For all purposes under the Plan, a termination of employment shall mean a separation from service as defined by Section 409A of the Code.

7.5 RIGHTS AS A SHAREHOLDER

The recipient of any grant under the Plan shall have no rights as a shareholder with respect thereto unless and until certificates for shares of Common Stock are issued in the name of such recipient; provided, however, that a recipient of (i) an award of Performance Restricted Shares, or (ii) a Restricted Stock Award, evidenced only by book entry on the stock transfer records of the Company pursuant to Section 4.3 or Section 5.3, shall have the right to receive dividends on the shares of Common Stock underlying such award, and, to the extent not inconsistent with the relevant Performance Restricted Share agreement or Restricted Stock Award agreement, shall have all other rights of a shareholder in the Company, including the right to vote the shares, in accordance with Section 4.9 or Section 5.6.

7.6 UNFUNDED PLAN

Unless otherwise determined by the Committee, the Plan shall be unfunded and shall not create (or be construed to create) a trust or separate funds. With respect to any payment not yet made to a Participant, nothing contained herein shall give any Participant any rights that are greater than those of a general creditor of the Company.

7.7 FOREIGN JURISDICTION

The Committee shall have the authority to adopt, amend, or terminate such arrangements, not inconsistent with the intent of the Plan, as it may deem necessary or desirable to make available tax or other benefits of the laws of foreign countries in order to promote achievement of the purposes of the Plan.

7.8 OTHER COMPENSATION PLANS

Nothing contained in this Plan shall prevent the Company from adopting other or additional compensation arrangements, subject to shareholder approval if such approval is required.

7.9 TERMINATION OF EMPLOYMENT – CERTAIN FORFEITURES

Notwithstanding any other provision of the Plan (other than provisions regarding Change in Control, including without limitation Sections 2.5(d), 4.12 and 5.8, which shall apply in all events), a Participant shall have no right to exercise any Stock Option or Stock Appreciation Right or receive payment of any Performance Restricted Share, Restricted Unit or Restricted Stock Award if the Participant is discharged for willful, deliberate, or gross misconduct, as determined by the Committee in its sole discretion. Furthermore, notwithstanding any other provision of the Plan to the contrary, in the event that a Participant receives or is entitled to cash or the delivery or vesting of Common Stock pursuant to an award during the 12-month period prior to the Participant's termination of employment with the Company, then the Committee, in its sole discretion, may require the Participant to return or forfeit the cash and/or Common Stock received with respect to an award (or its economic value as of (i) the date of the exercise of Stock Options or Stock Appreciation Rights; (ii) the date immediately following the end of the Restriction Period for Restricted Stock Units or Awards or the end of the vesting period for Performance Restricted Shares, or (iii) the date of grant or payment with respect to Stock Awards) in the event that the Participant: (y) is discharged for willful, deliberate or gross misconduct, as determined by the Committee in its sole discretion, or (z) engages in any business or enters into any employment which the Committee in its sole discretion determines to be (1) directly or indirectly competitive with the business of the Company or (2) substantially injurious to the Company's financial interest. A Participant may request the Committee in writing to determine whether any proposed business or employment activity would justify such a forfeiture. Such a request shall fully describe the proposed activity and the Committee's determination shall be limited to the specific activity so described. The Committee's right to require forfeiture under this Section 7.9 must be exercised within 90 days after the discovery of an occurrence triggering the Committee's right to require forfeiture but in no event later than 24 months after the Participant's termination of employment with the Company.

7.10 FINANCIAL RESTATEMENT AND CLAWBACK

The Company will, in all appropriate circumstances, as determined by the Committee, and to the extent permitted by applicable law, require reimbursement or forfeiture of all or a portion of any award under the Plan, including any dividends earned or paid in connection with an award, where the Committee has determined that all of the following factors are present: (i) the Company is required to prepare an accounting restatement due to material noncompliance with any financial reporting requirement to which the Company is subject; (ii) the award, or its vesting or payment, was predicated upon the achievement of certain financial results that were the subject of the restatement, and such award, vesting or payment occurred or was received during the three-year period preceding the date the Company is required to prepare the restatement, and (iii) a smaller award, vesting or payment would have occurred or been made to the Participant based upon the restated financial results. In each such instance, the Company will, to the extent deemed appropriate by the Committee, recover or cancel the amount(s) by which an award, or its vesting or payment, during the aforementioned three-year period exceeded the amount(s) that would have been awarded, vested or paid based on the restated financial results, and the Participant shall be required to repay to the Company any such amount(s) received.

ARTICLE VIII.
AMENDMENT AND TERMINATION

8.1 AMENDMENT AND TERMINATION

The Board may modify, amend, or terminate the Plan at any time except that, to the extent then required by applicable law, rule, or regulation, approval of the holders of a majority of shares of Common Stock represented in person or by proxy at a meeting of the shareholders will be required to increase the maximum number of shares of Common Stock available for distribution under the Plan (other than increases due to adjustments in accordance with the Plan). No modification, amendment, or termination of the Plan shall adversely affect the rights of a Participant under a grant previously made to the Participant without the consent of such Participant.

ARTICLE IX.
EFFECTIVE DATE AND DURATION OF PLAN

9.1 EFFECTIVE DATE AND DURATION OF PLAN

The Plan shall become effective as of July 1, 2016, subject to its approval and adoption at the Annual Meeting of the shareholders on May 2, 2016. All rights granted under the Plan must be granted within ten years from its adoption date by the shareholders of the Company. Any rights outstanding ten (10) years after the adoption of the Plan may be exercised within the periods prescribed under or pursuant to the Plan.

PREPAID INCOME TAX AND DEFERRED INCOME TAX CHARGES AND OTHER DEFERRED INCOME TAX CREDITS BY ACCOUNTING AREAS

53.53 IV Taxes

D. Water and Wastewater Utilities

8 Furnish a breakdown of major items comprising prepaid and deferred income tax charges and other deferred income tax credits and reserves by accounting areas.

Response: The York Water Company does not file separate tax returns for water and wastewater, but does account for the income tax expense separately. The York Water Company does not have prepaid federal income and Pennsylvania corporate net income taxes for the Company as a whole. Refer to Exhibit No. FIV-17 for deferred income tax charges for the water portion of the business and Exhibit No. FIV-17W for deferred income tax charges for the wastewater portion of the business.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
COST OF REMOVAL DEDUCTED CURRENTLY FOR INCOME TAX PURPOSES

53.53 IV Taxes

D. Water and Wastewater Utilities

9 Explain the reason for the use of cost of removal of any retired plant figures in the income tax calculations.

Response: The Internal Revenue Code permits a current deduction for costs of removal of utility plant in determining taxable income. The Company makes such a deduction when computing its Federal income tax liability, and passes the tax benefit of the deduction on to its customers in its calculation of current income taxes for ratemaking purposes.

THE YORK WATER COMPANY

TAX SAVINGS DUE TO THE USE OF ACCELERATED DEPRECIATION ON PROPERTY INSTALLED PRIOR TO 1970

53.53 IV Taxes

D. Water and Wastewater Utilities

10 State whether all tax savings due to accelerated depreciation on property installed prior to 1970 have been passed through to income. (If not, explain.)

Response: The York Water Company has used straight-line depreciation for tax purposes, for all years, for property installed prior to 1970.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
INCOME TAX LOSS OR GAIN CARRYOVER

53.53 IV Taxes

D. Water and Wastewater Utilities

11 Show any income tax loss/gain carryovers from previous years that might affect test year income taxes or future year income taxes. Show loss/gain carryovers by years of origin and amounts remaining by years at the end of the test year.

Response: In 2014, the Company adopted the IRS tangible property regulations which allowed the Company to deduct the costs of certain asset improvements that were previously capitalized and being depreciated for tax purposes as an expense on its income tax returns. The Company recorded a catch-up deduction that represents the federal and state income tax deduction for the years 2007 - 2013.

The amortization of the catch-up deduction over fifteen years was specifically approved by the Commission under the Settlement Agreement under Docket No. R-2018-3000019. The amortization period began on March 1, 2019 and ends on February 28, 2034.

The York Water Company has no other income tax loss or gain carryovers from previous tax years that would affect test year or future year income taxes.

Response: Refer to Exhibit No. HIV-12.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
CONSOLIDATED INCOME TAX RETURN

53.53 IV Taxes

D. Water and Wastewater Utilities

13 Under Section 1552 of the Internal Revenue Code and Regulations at 1.1552-1 thereunder, if applicable, a parent company, in filing a consolidated income tax return for the group, must choose one of four options by which it must allocate total income tax liability of the group to the participating members to determine each member's tax liability to the federal government. (If this interrogatory is not applicable, so state).

a. State what option has been chosen by the group.

b. Provide, in summary form, the amount of tax liability that has been allocated to each of the participating members in the consolidated income tax return.

c. Provide a schedule, in summary form, of contributions, which were determined on the basis of separate tax return calculations, made by each of the participating members to the tax liability indicated in the consolidated group tax return. Provide total amounts of actual payments to the tax depository for the tax year, as computed on the basis of separate returns of members.

d. Provide annual income tax return for the group, and if income tax return shows net operating loss, provide details of amount of net operating loss allocated to the income tax returns of each of the members of the consolidated group.

Response: The York Water Company has not filed an election under Section 1552 of the Internal Revenue Code, and does not file a consolidated tax return.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
FEDERAL INCOME TAX RETURNS

53.53 IV Taxes

D. Water and Wastewater Utilities

14 Provide a copy of the corporate federal tax returns and supporting schedules for the preceding three years and, if applicable, a copy of the calculation workpapers for the company's consolidated tax savings adjustment.

Response: Refer to Exhibit No. HIV-14 for a copy of the corporate Federal income tax returns and supporting schedules for the preceding three years.

There are no consolidated tax savings, as the Company is not part of a consolidated tax group.

DEBT INTEREST UTILIZED FOR INCOME TAX CALCULATIONS

53.53 IV Taxes

D. Water and Wastewater Utilities

18 State the amount of debt interest utilized for income tax calculations, and details of debt interest computations, under each of the following rate case bases;

a. Actual test year.

b. Annualized test year-end.

c. Proposed test year-end.

Response: Debt interest expense utilized for the income tax calculation reflected on the Company's corporate books for the twelve months ended December 31, 2024 is actual debt expense incurred during that period.

Debt interest expense utilized for the income tax calculation on projected income for the twelve months ending December 31, 2025 shown on Exhibit No. FIV-17-1 is determined by reflecting the interest charges to ratepayers in the cost of capital determination (interest synchronization).

Rate base	413,332,385	x weighted debt cost rate of	2.06%
= interest expense utilized for income tax calculations of			8,523,195

Debt interest expense utilized for the income tax calculation on pro forma income for the twelve months ending December 31, 2025 shown on Exhibit No. FIV-17-5 is determined by reflecting the interest charges to ratepayers in the cost of capital determination (interest synchronization).

Rate base	413,332,385	x weighted debt cost rate of	2.06%
= interest expense utilized for income tax calculations of			8,523,195

Debt interest expense utilized for the income tax calculation on projected income for the twelve months ending February 28, 2027 shown on Exhibit No. FIV-17-6 is determined by reflecting the interest charges to ratepayers in the cost of capital determination (interest synchronization).

Rate base	444,597,217	x weighted debt cost rate of	2.06%
= interest expense utilized for income tax calculations of			9,167,897

Debt interest expense utilized for the income tax calculation on pro forma income for the twelve months ending February 28, 2027 shown on Exhibit No. FIV-17-10 is determined by reflecting the interest charges to ratepayers in the cost of capital determination (interest synchronization).

Rate base	444,597,217	x weighted debt cost rate of	2.06%
= interest expense utilized for income tax calculations of			9,167,897

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
QUALITY OF SERVICE SDWA VIOLATIONS

53.53 IX. Quality of Service

D. Water and Wastewater Utilities

1

Indicate whether the company is in violation of any provision of the Pennsylvania Safe Drinking Water Act (SDWA) or any rule, regulation or order, or any condition of any permit, variance or exemption granted by the Department of Environmental Protection (DEP), or its predecessor.

a. Provide information indicating whether the company is in compliance with SDWA provisions at the 25 Pa. Code, § 109.401 regarding general public notification requirements.
   (i) Provide a copy of each public notification given in accordance with this section, since the last rate proceeding.
   (ii) Provide a detailed explanation of all actions taken to remedy an acute violation, and/or to comply with the requirements prescribed by a variance or exemption.
   (iii) State whether any fines or penalties were assessed by DEP, and indicate the amounts paid by the company.
b. Provide the most recent copies of all annual consumer confidence reports issued pursuant to SDWA Amendments of 1996 since the last rate proceeding.
   (i) Provide any annual consumer confidence reports which reflect violations of state and federal safe drinking water requirements.
   (ii) Explain how these violations were resolved.

Response: The Company is not in violation of any provision of the Pennsylvania Safe Drinking Water Act or any rule, regulation or order, or any condition of any permit, variance or exemption granted by the Department of Environmental Protection.

The Company is in compliance with Safe Drinking Water Act provisions regarding general public notification requirements. Public notifications given since the last rate proceeding are attached.

A summary of all violations, and actions taken to remedy, is attached to Exhibit No. HIX-1. There have been no fines or penalties assessed by DEP.

A copy of the annual consumer confidence reports issued since the last rate proceeding is attached to Exhibit No. HIX-1.

The attached consumer confidence reports include minor Tier III violations for which the consumer confidence reports can be used for public notification.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
QUALITY OF SERVICE OPERATING PRESSURE STANDARDS

53.53 IX. Quality of Service

D. Water and Wastewater Utilities

2. Indicate whether the company is in compliance with 52 Pa. Code, § 65.5 regarding normal operating pressure standards, and with 52 Pa. Code, § 65.6(d) regarding pressure surveys at regular intervals.
   a. Provide details on any major water pressure problems which had occurred since the last rate proceeding in any part of the water distribution system.
   b. Describe any action taken on a temporary basis, and the long term solutions developed to address any major water pressure problems.

Response: The Company is in compliance with Commission regulations regarding normal operating pressure standards and pressure surveys at regular intervals.

No major water pressure problems have occurred since the last rate proceeding.

The ordinary range of pressure in the distribution system is 30 psi to 130 psi. System pressures are maintained by the hydraulic grade that is established by the level of water in various tanks and reservoirs and by pumping.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
QUALITY OF SERVICE SERVICE INTERRUPTIONS

53.53 IX. Quality of Service

D. Water and Wastewater Utilities

3. Provide support to demonstrate that water service is being furnished on a continuous basis by supplying a summary of the company records of each service interruption greater than 24 hours since the last rate proceeding.

Response: The Company has not had a service interruption greater than 24 hours since the last rate case proceeding.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
QUALITY OF SERVICE CUSTOMER COMPLAINTS

53.53 IX. Quality of Service

D. Provide a discussion of the company's policy, or provide a copy of the policy if in written form, on tracking and responding to customer complaints.

4. a. Provide a summary report demonstrating the company's compliance with 52 Pa. Code, § 65.3 regarding the full and prompt investigation of service or facility complaints and the record keeping requirments of such complaints.

Response: The Company responds to informal and formal PUC complaints in accordance with the requirements of 52 Pa. Code 65.3

The Company receives complaints and/or inquiries via telephone, email, in-person interaction and social media platforms. In most cases, complaints are resolved at the customer service employee level, and notes are entered in the Company's customer information system as part of the customer's history file. Complaints regarding service or facilities that require additional intervention are escalated to a supervisor for follow-up. When necessary or appropriate, the Company may issue a Company Report or written response to the customer.

All inquiries are tracked for action taken prior to being closed out, and if the inquiry requires action by someone outside of the customer service department, a customer work order will be created to track the activity until completion.

The Company has also established a special link on its web page through which customers can submit complaints or inquiries directly to the customer service department. The President and Chief Executive Officer, the HR Department, and the VP of Customer Service are copied on all of these submissions. The VP of Customer Service monitors the complaint activity daily and coordinates the appropriate response to the inquiry.

In November and December 2024, a live interviewer telephone, mail, and online customer satisfaction survey was conducted by Problosky Research to gather customer feedback.

The Company has a VoIP telephone system. The telephone system has a call back feature. Each call is returned in a timely fashion.

Complaints or inquiries requiring some action on the part of the Company are logged into the Company's customer information system as part of the customer's account record.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
QUALITY OF SERVICE DISTRIBUTION SYSTEM MAPPING

53.53 IX. Quality of Service

D. Water and Wastewater Utilities

5. Indicate whether the company is in compliance with 52 Pa. Code, § 65.4(b) regarding complete and current mapping of the entire distribution system.

Response: The Company keeps complete maps, plans and records of its entire distribution system for its water service showing the size, character and location of each main, street valve and service line, as well as its collection systems for waste-water service showing the size, character and location of each sewer line, manhole, and lateral.

53.53 IX. Quality of Service

D. Water and Wastewater Utilities

6. Provide a summary report demonstrating the company's efforts in water conservation, since the last rate proceeding, pursuant to 52 Pa. Code, § 65.20.

Response: Education - The Company and its employees undertake an active role in the community to stress the need for water conservation. Speakers are provided to local organizations to explain the need for water conservation. The Company provides text books and a film to local school and scout groups on water conservation. The Company has also sponsored and provided instruction for the Boy Scout merit badge on Water and Soil Conservation.

Water Audit For Large Users - The Company has assigned a team of employees to complete the water audit process in a continuous improvement effort.

Efficiency Plumbing Fixtures - Most municipalities in which the Company serves have building code provisions which require the installation of water saving plumbing fixtures.

Unaccounted For Water - Refer to Exhibit No. HXI-5, the Company's water audit team also is involved with this process.

Leak Detection - Leak detection and repair is one of the Company's highest priorities. The Company has an employee whose sole responsibility is leak detection. During calendar year 2024, the Company's Leak Detection Coordinator detected 184 leaks throughout the Company's service territory.

In 2021, the Company also invested in mobile leak detection equipment to continue to search for water leaks in the distribution system.

Our Distribution Department Superintendent periodically contacts municipal street crew superintendents, police and fire officials in the municipalities served by The York Water Company to remind and encourage them to contact the Company if they observe any unusual water flows in the streets or at valve boxes or hydrants. All such reports are promptly investigated.

Metering - The Company meters all customer usage with the exception of fire service. All meter readings are checked during the billing process to make sure that the most recent consumption is consistent with the historical average. If the reading is abnormal, before billings are mailed, a telephone call is placed to the customer to tell them about the abnormal reading and to encourage them to investigate whether they have any leaking fixtures. The Company has received high praise from its customers for the validation procedure.

Conservation Plan - The Company seeks to encourage cost-effective water conservation in various contacts with its customers.
Each year our customers receive bill inserts that describe ways to conserve water. In addition, a brochure that the Company provides to all new customers contains a section on water conservation. Also, the Company's Consumer Confidence Report (Refer to Exhibit No. HIX-1) contains water conservation information.

The Company has a Drought Contingency Plan, approved by the Commission and the Department of Environmental Protection, filed as a part of its Tariff.

The York Water Company became a partner of EPA's Water Sense program in 2008. The Company provides information on its website and through a bill insert regarding this program. The program seeks to educate Americans about saving water and protecting the environment.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
QUALITY OF SERVICE METER TESTING

53.53 IX. Quality of Service

D. Water and Wastewater Utilities

7. Provide a discussion of the company's policy regarding meter requirements, replacements and testing. State if the company's procedures are in compliance with 52 Pa. Code, § 65.8(b).
   a. Provide meter test records as required in 52 Pa. Code, § 65.8(c) for the 50 meters most recently removed from service.
   b. Provide a discussion of the company's policy and history of compliance with 52 Pa. Code, § 65.9 regarding adjustment of bills for meter error within the last year.

Response: The Company's policies regarding meter requirements, replacements and testing and adjustment of bills for meter error are in compliance with 52 Pa. Code, Paragraphs 65.8 and 65.9.

Meter test records for the meters removed from service thus far in 2025 are attached to Exhibit No. HIX-7.

Reasonable acquisition costs greater than depreciated original cost are permitted to be included in rate base and amortized over ten years in accordance with Section 1327 of the Public Utility Code.

The inclusion of this unamortized utility acquisition adjustment in original cost rate base was specifically approved by the Commission in accordance with the Settlement Agreement under Docket No. R-2018-3000019. The amortization period began March 1, 2019 (the effective date of rates under Order No. R-2018-3000019) and ends February 28, 2029.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
FUNDS AVAILABILITY

53.53 V. Valuation

D. Water and Wastewater Utilities

10 Identify the funds availability arrangements or terms which the company has with its banks with respect to deposits of customers checks. For example, does the company have same day or next day access to funds deposited.

Response:

The Company has same day access to funds deposited drawn on its banks.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
WORKING CAPITAL - MATERIALS AND SUPPLIES

53.53 V. Valuation

D. Water and Wastewater Utilities

11 In reference to materials and supplies:

(a) What method of inventory valuation was used to develop the claim for materials and supplies?
(b) Does the utility use a material and supply model to calculate needed material and supply levels?
(c) If so, provide the model. Supply an illustrative example of how the monthly balances are derived.
(d) Provide the actual monthly value for the inventory of materials and supplies for the past twelve months. Supply as of the end of the test year, a thirteen month average, by month, for the material and supply account.
(e) Provide the monthly level of materials and supplies for three years prior to the conclusion of the historic test year.

Response:

The Company values its materials and supplies inventory at cost.

The Company has established minimum and maximum levels for items reflected in its materials and supplies inventory. The Company does not use a materials and supplies model to determine needed materials and supplies levels.

PROJECTED PLANT ADDITIONS

53.53 V. Valuation

D. Water and Wastewater Utilities

12 For each non-blanket or projected plant addition to cost the lesser of $100,000 or 0.5% of current rate base, included in the future test year, please provide:

a. Description of the project.
b. Original budgeted cost (broken down by AFUDC and non-AFUDC components).
c. Current budgeted cost (broken down by AFUDC and non-AFUDC components).
d. Reason for change in budgeted cost.
e. Original estimated date of completion and in service.
f. Current estimated date of completion and in service.
g. Reason for change in completion date.
h. Anticipated retirement related to the plant addition.
i. Starting date of project.
j. Amount expended to date.
k. Percent of project currently complete.
l. The depreciation rate applicable.
m. Identify which projects are due to a PA-DEP or EPA requirement.

Response: Refer to Exhibit Nos. FV-12-1, FV-12-2, and FV-12-3 for the twelve months ending December 31, 2025 and Exhibit Nos. FV-12-4, FV-12-5, and FV-12-6 for the period ending February 28, 2027.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
PROJECTED PLANT BALANCES

53.53 V. Valuation

D. Water and Wastewater Utilities

13. Explain how the future test year plant balances were projected and provide supporting workpapers and documentation.

Response: Refer to Exhibit No. FV-12

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
SHARED ASSETS

53.53 V. Valuation

D. Water and Wastewater Utilities

14 Are all of the assets used in the plant-in-service claim used exclusively by the utility? If not, provide the estimated percentage that each shared asset is used by other entities.

Response:

The Company does not share with any other entity the assets used in its plant in service claim.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
PLANT INCLUDED IN RATE BASE

53.53 V. Valuation

D. Water and Wastewater Utilities

15 Is all plant included in rate base currently being used in providing water service? If not, provide a schedule which presents those plant items which are not, and indicate the corresponding amounts and account numbers. Further, provide a detailed narrative explaining the reason why such plant is not being used and the anticipated disposition of the plant.

Response:

All plant included in rate base is currently being used in providing water service.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
CONTRIBUTIONS IN AID OF CONSTRUCTION, CUSTOMERS ADVANCES FOR CONSTRUCTION, BUILDERS DEPOSITS AND CUSTOMERS DEPOSITS

53.53 V. Valuation

D. Water and Wastewater Utilities

16 Provide all workpapers and supporting documentation showing the derivation of the projected balances of contributions in aid of construction, customer advances for construction and company service line and customer deposits for the future test year.

Response:

Refer to Exhibit No. FV-16-1 for the projected balances of contributions in aid of construction for the twelve months ending December 31, 2025.

Refer to Exhibit No. FV-16-2 for the projected balances of customers advances for construction for the twelve months ending December 31, 2025.

Refer to Exhibit No. FV-16-3 for the projected balances of contributions in aid of construction for the twelve months ending February 28, 2027.

Refer to Exhibit no. FV-16-4 for the projected balances of customers advances for construction for the twelve months ending February 28, 2027.

Refer to Exhibit No. FV-8-2 for the projected balances of builders' deposits and water revenues paid in advance.

The Company has no customer deposits.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
DEPRECIATION METHODS

53.53 VI. Depreciation

D. Water and Wastewater Utilities

1. Provide a description of the depreciation methods utilized in calculating annual depreciation amounts and depreciation reserves, together with a discussion of the significant factors which were considered in arriving at estimates of service life and dispersion by account. Supply a comprehensive statement of any changes made in method of depreciation. Provide dates of all field inspections and facilities visited.

Response: Refer to Exhibit Nos. FVI-A and FVI-B.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
DEPRECIATION SURVIVOR CURVES

53.53 VI. Depreciation

D. Water and Wastewater Utilities

2 Set forth,in exhibit form,charts depicting the original and estimates survivor curves and a tabular presentation of the original life table plotted on the chart for each account where the retirement rate method of analysis is utilized.

Response: Refer to Exhibit Nos. FVI-A and FVI-B.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
DEPRECIATION SURVIVING ORIGINAL COST

53.53 VI. Depreciation

D. Water and Wastewater Utilities

3 Provide the surviving original cost at test year end by vintage by account and include applicable depreciation reserves and accruals. These calculations should be provided for plant in service as well as other categories of plant, including, but not limited to, contributions in aid of construction and customers' advances for construction.

Response: Refer to Exhibit Nos. FVI-A and FVI-B.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
DEPRECIATION RESERVE

53.53 VI. Depreciation

D. Water and Wastewater Utilities

4 Provide a comparison of respondent's calculated depreciation reserve v. book reserve by account at the end of the test year.

Response: Refer to Exhibit Nos. FVI-A and FVI-B.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
DEPRECIATION

53.53 VI. Depreciation

D. Water and Wastewater Utilities

5 Supply a schedule by account and depreciable group showing the survivor curve and annual accrual rate estimated to be appropriate:

a. For the purposes of this filing.

b. For the purposes of the most recent rate increase filing prior to the current proceedings.

Response: Refer to Exhibit Nos. FVI-A and FVI-B.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
DEPRECIATION SALVAGE AND COST OF REMOVAL

53.53 VI. Depreciation

D. Water and Wastewater Utilities

6 Provide an exhibit showing gross salvage, cost of removal, and net salvage for the five most recent calendar or fiscal years by account.

Response: Refer to Exhibit Nos. FVI-A and FVI-B.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
RATE OF RETURN CAPITALIZATION RATIOS

53.53 VII. Rate of Return

D. Water and Wastewater Utilities

1. Provide capitalization and capitalization ratios for the last 5-year period and projected through the next two years (with short-term debt and without short-term debt for the company, parent and system (consolidated).

   a. Provide year-end interest coverages before and after taxes for the last three years and at the latest date (indenture and SEC bases) for the company, parent and system (consolidated).

   b. Provide year-end preferred stock dividend coverages for last three years and at latest date (character and SEC bases).

Response:

Refer to Exhibit No. HVII-1.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
RATE OF RETURN LATEST PROSPECTUS

53.53 VII. Rate of Return

D. Water and Wastewater Utilities

2. Provide latest prospectus (company and parent).

Response: Refer to Exhibit No. HVII-2.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
RATE OF RETURN CAPITAL REQUIREMENTS

53.53 VII. Rate of Return

D. Water and Wastewater Utilities

3. Supply projected capital requirements and sources of company, parent and system (consolidated) for the test year and each of three comparable future years.

Response: Refer to Exhibit No. HVII-3.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
RATE OF RETURN DEBT SCHEDULE

53.53 VII. Rate of Return

D. Provide a schedule of debt and preferred stock of company, parent and system (consolidated) as of test year-end and latest date, detailing for each issue (if applicable):

4.

a. Date of issue.
b. Date of maturity.
c. Amount issued.
d. Amount outstanding.
e. Amount retired.
f. Amount required.
g. Gain on reacquisition.
h. Coupon rate.
i. Discount or premium at issuance.
j. Issuance expenses
k. Net proceeds
l. Sinking fund requirements.
m. Effective interest rate.
n. Dividend rate.
o. Effective interest rate.
p. Total average weighted effective cost rate.

Response: Refer to Exhibit No. FVII.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
RATE OF RETURN FINANCIAL DATA

53.53 VII. Rate of Return

D. Water and Wastewater Utilities

5. Supply financial data of company and/or parent for last five years:

a. Earnings-price ratio (average).
b. Earnings-book value ratio (per share basis) (avg. book value).
c. Dividend yield (average).
d. Earnings per share (dollar).
e. Dividends per share (dollars).
f. Average book value per share yearly.
g. Average yearly market price per share (monthly high-low basis).
h. Pre-tax funded debt interest coverage.
i. Post-tax funded debt interest coverage.
j. Market price-book value ratio.

Response:

	2024	2023	2022	2021	2020
Price-Earnings Ratio	26.0	25.1	30.7	36.7	35.3
Earnings-Book Value Ratio	11.1	9.0	9.3	8.7	8.4
Dividend Yield (Average)	2.31%	1.97%	1.83%	1.59%	1.63%
Earnings Per Share	$1.420	$1.660	$1.400	$1.300	$1.270
Dividends Per Share	$0.8516	$0.8189	$0.7874	$0.7571	$0.7280
Average Book Value Per Share	$15.75	$14.97	$13.07	$11.31	$10.64

Post-Tax Funded Debt Interest Coverage	3.28	4.37	4.83	4.45	4.53
Market Price-Book Value Ratio	2.34	2.78	3.29	4.22	4.21

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
RATE OF RETURN AFUDC RATE

53.53 VII. Rate of Return

D. Water and Wastewater Utilities

6. Provide AFUDC charged by company at test year-end and latest date, explain method by which rate was calculated and provide workpaper showing derivation of the company's current AFUDC rate.

Response: The AFUDC rate used by the Company as of December 31, 2024 was 10.04%.

The AFUDC rate is set by the Company based upon the sum of the weighted cost of debt and the weighted cost of common equity as determined in the Company's most recent fully-litigated rate proceeding before the Pennsylvania Public Utility Commission. The AFUDC rate used by the Company has not changed since December 31, 1992. Under FAS62, the capitalization rate to be applied to projects financed with tax-free debt, is the rate of that specific borrowing.

Component	Weighted Cost Rate
Long Term Debt	5.61
Common Equity	4.43
	10.04

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
RATE OF RETURN COVERAGE REQUIREMENTS

53.53 VII. Rate of Return

D. Water and Wastewater Utilities

7. Set forth provisions of company's and parent's charter and indentures (if applicable) which describe coverage requirements, limits on proportions of types of capital outstanding, and restrictions on dividend payouts.

Response:

Additional funded debt may be issued to the extent that total funded debt does not exceed an amount equal to 60% of net property additions, at the time the Company first becomes liable in respect of such indebtedness.

The most restrictive limitation upon payment of dividends on common stock is contained in the note agreements securing the senior notes issued by The York Water Company and all subsequent issues. This restriction provides that cash dividends paid on common stock and buybacks of common stock may not exceed the amount of earned surplus accumulated subsequent to December 31, 1982 plus $1,500,000. As of December 31, 2024, none of the earnings retained in the business are restricted under this provision.

Under the Pedfa Series A debt issue of 2008, the Pedfa Series A and B debt issues of 2019, the YCIDA Series of 2015, and the line of credit, York Water Company is required to maintain an equity to total capitalization ratio of 38% and a minimum interest coverage ratio of 1.80.
The Company has been able to maintain these ratios in all periods.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
RATE OF RETURN BUDGET

53.53 VII. Rate of Return

D. Water and Wastewater Utilities

8. Attach copies of the summaries of the company's projected budgets for the next two years (revenues, expenses and capital).

Response: Refer to Exhibit No. HVII-3 for the capital budgets, Exhibit No. HVII-8 for the 2026 revenue and expense budget, and Exhibit No. HXI-4 for the 2025 revenue and expense budget.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
RATE OF RETURN DEBT REACQUISITIONS

53.53 VII. Rate of Return

D. Water and Wastewater Utilities

9. Describe long-term debt reacquisitions by company and parent as follows:
a. Reacquisitions by issue by year.
b. Total gain on reacquisitions by issue by year.
c. Accounting of gain for income tax and book purposes.

Response: a. Reacquisition by Issue by Year:

3.3% Debentures due 1979 - In 1969, debentures in the principal amount of $128,000 were reacquired.

4.8% Debentures due 1982 - In 1959, debentures in the principal amount of $246,000 were reacquired.

6.0% PEDFA Series 2008B - In 2011, the Company bought back the principal amount of $115,000 under an estate feature.

6.0% PEDFA Series 2008B - In 2013, the Company bought back the principal amount of $5,000 under an estate feature.

4.5% PEDFA Series 2014 - In 2016, the Company bought back the principal amount of $10,000 under an estate feature.

5.0% Monthly Senior Notes Series 2010A - In 2019, the Company bought back the principal amount of $15,000,000 under a call provision.

4.75% YCIDA Series 2006 - In 2019, the Company bought back the principal amount of $10,500,000 under a call provision.

4.5% PEDFA Series 2014 - In 2019, the Company bought back the principal amount of $14,870,000 under a call provision.

b. Total Gain on Reacquisition by Issue by Year:

3.3% Debentures due 1979 - In 1969, the total gain on the reacquisition of debentures was $56,000.

4.8% Debentures due 1982 - In 1959, the total gain on the reacquisition of debentures was $95,325.

There were no gains on any other reacquisition as the bonds were bought back at par.

c. Accounting of Gain for Income Tax and Book Purposes:

3.3% Debentures due 1979 - For book purposes, the total gain on the reacquisition of debentures of $56,000 was deferred in 1969 and amortized over a ten-year period. For tax purposes, the total gain on the reacquisition of debentures of $56,000 was deducted from the tax basis of 1969 depreciable assets.

4.8% Debentures due 1982 - For book purposes, the total gain on the reacquisition of debentures of $95,325 was deferred in 1959 and amortized over a ten-year period. For tax purposes, the total gain on the reacquisition of debentures of $95,325 was deducted from the tax basis of 1959 depreciable assets.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
RATE OF RETURN COMPENSATING BANK BALANCES

53.53 VII. Rate of Return

D. Water and Wastewater Utilities

10.

Provide the following information concerning compensating bank balance requirements for actual test year:

a. Name of each bank.
b. Address of each bank.
c. Type of accounts with each bank (checking, savings, escrow, other services, etc.)
d. Average daily balance in each account.
e. Amount and percentage requirements for compensating bank balances at each bank.
f. Average daily compensating bank balance at each bank.
g. Documents from each bank explaining compensating bank balance requirements.
h. Interest earned on each type of account.

Response: The Company has no compensating balance requirements.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
RATE OF RETURN BANK NOTES PAYABLE

53.53 VII. Rate of Return

D. Water and Wastewater Utilities

11. Provide the following information concerning bank notes payable for actual test year:
   a. Line of credit at each bank.
   b. Average daily balances of notes payable to each bank, by name of bank.
   c. Interest rate charged on each bank note (prime rate formula).
   d. Purpose of each bank note (e.g.-construction, fuel storage, working capital, debt retirement).
   e. Prospective future need for this type of financing.

Response:

	Fulton Bank
Line of Credit	$ 50,000,000
Average Daily Balance	$ 10,086,510
Interest Rate	SOFR + 1.17% LIBOR floor of 0.15% Unused fee of 0.05%
Purpose	Construction, Acquisitions, and Working Capital

The Company expects to need this type of financing indefinitely into the future. When all cash on hand has been used, this type of financing will be used for construction expenditures, acquisitions, or working capital until permanent capital is issued.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
RATE OF RETURN COMMON STOCK OFFERINGS

53.53 VII. Rate of Return

D. Submit details on company or parent common stock offerings (past five years to present) as follows:

12.
a. Date of prospectus.
b. Date of offering
c. Record date.
d. Offering period - dates and number of days.
e. Amount and number of shares of offering.
f. Offering ratio (if rights offering).
g. Percent subscribed.
h. Offering price.
i. Gross Proceeds per share.
j. Expenses per share.
k. Net proceeds per share (i -j).
l. Market price per share.
(1) At record date.
(2) At offering date.
(3) One month after close of offering.
m. Average market price during offering.
(1) Price per share.
(2) Rights per share - average value of rights.
n. Latest reported earnings per share at time of offering
o. Latest reported dividends at time of offering.

Response: Refer to page 2.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
RATE OF RETURN COMMON STOCK OFFERINGS

In April, 2022, the Company closed an underwritten public offering of 976,600 shares and an over-allotment of 146,340 shares. Janney Montgomery Scott LLC was the underwriter in the offering. The Company received net proceeds in the offering, after deducting offering expenses and underwriter's discounts and commissions, of approximately $44.0 million. The net proceeds were used for general corporate purposes, including the Company's capital investment program, repayment of outstanding indebtedness, and potential acquisitions.

The Securities Certificate for the issuance of up to 1,250,000 shares of common stock was registered by the Commission in its Order at Docket No. S-2021-3029613, dated January 13, 2022.

The Company has no parent.

53.53 VII. Rate of Return

D. Water and Wastewater Utilities

23. If applicable, supply a listing of all common equity infusions from the parent to the company over the past five years. In each case, identify date and dollar amount.

Response: The Company has no parent.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
RATE OF RETURN DIVIDEND PAYMENTS TO PARENT

53.53 VII. Rate of Return

D. Water and Wastewater Utilities

24. If applicable, identify the company's common dividend payments to its parent for each of the last five years.

Response: The York Water Company has no parent.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
RATE OF RETURN FINANCIAL PROJECTIONS

53.53 VII. Rate of Return

D. Water and Wastewater Utilities

25. Provide the latest year-by-year financial projections for the company for the next five years. Also, please indicate the date these projections were prepared; whether approved by management; and whether the projections have been submitted to bond rating agencies. The information will be treated in a confidential manner, if requested.

Response: Refer to Exhibit No. HVII-3.

The five-year projections are not formally approved by management or the Board of Directors. Management and the Board have approved only the next year's budget (2025). The budget for 2025 was prepared in November 2024 and the five year forecast was prepared in February and March 2025. The 2025 budget (operating and capital) were provided to Standard & Poor's.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
RATE OF RETURN CONSTRUCTION BUDGET

53.53 VII. Rate of Return

D. Water and Wastewater Utilities

26. Provide the company's 5-year construction budget.

Response: Refer to Exhibit No. HVII-3.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
RATE OF RETURN CAPITAL STRUCTURE TARGET

53.53 VII. Rate of Return

D. Water and Wastewater Utilities

27. Identify the company's and, if applicable, its parent's capital structure targets (percentages of capital types). Provide the complete basis for the capital structure targets.

Response: The Company's capital structure target is to maintain an equity ratio between 50% and 55% of capital.

The target capital structure is determined based on the Company's projected capital needs, the Company's size and the capital structures employed by other comparable investor-owned water utilities.

The Company believes that it must maintain a strong financial profile, including a strong equity ratio, given its construction expenditures and external capital requirements over the next several years. The Company's relatively small size makes it more difficult and expensive to raise external capital, and a strong equity ratio offsets some of the increased risk to investors.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
RATE OF RETURN SHORT TERM DEBT AND CONSTRUCTION WORK IN PROGRESS

53.53 VII. Rate of Return

D. Water and Wastewater Utilities

28. For each month, of the most recent 24 months, supply the company's:
   a. Short-term debt balance.
   b. Short-term debt interest rate.
   c. Balance of construction work in progress.
   d. Balance of construction work in progress which is eligible for AFUDC accrual:

Response: Refer to Exhibit No. HVII-28.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
RATE OF RETURN OTHER DEBT

53.53 VII. Rate of Return

D. Water and Wastewater Utilities

29. Fully identify all debt (other than instruments traded in public markets) owed to all shareholders, corporate officers, or members of the board of directors, its affiliates, parent company, or subsidiaries.

Response: The Company has no debt (other than instruments traded in public markets) owed to shareholders, corporate officers, or members of the Board of Directors. The Company has no affiliates, subsidiaries, or parent company.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
RATE OF RETURN STOCK DIVIDENDS, SPLITS OR PAR VALUE CHANGES

53.53 VII. Rate of Return

D. Water and Wastewater Utilities

30. Provide a summary statement of all stock dividends, splits, or par value changes during the 2-year calendar period preceding the rate case filing.

Response: None.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
RATE OF RETURN PARENT CAPITAL STRUCTURE

53.53 VII. Rate of Return

D. Water and Wastewater Utilities

31. If a claim of the filing utility is based on utilization of the capital structure or capital costs of the parent company and system (consolidated), the reasons for this claim must be fully stated and supported.

Response: The Company has no parent.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
RATE OF RETURN FINANCIAL RATIOS

53.53 VII. Rate of Return

D. Water and Wastewater Utilities

32. To the extent not provided elsewhere, supply financial data of company and/or parent for the last five years.

a. Times interest earned ratio - pre and post tax basis.
b. Preferred stock dividend coverage ratio - post tax basis.
c. Times fixed charges earned ratio - pre tax basis.
d. Dividend payout ratio.
e. AFUDC as a percent of earnings available for common equity.
f. Construction work in progress as a percent of net utility plant.
g. Effective income tax rate.
h. Internal cash generations as a percent of total capital requirements.

Response: Refer to Exhibit No. HVII-32.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
RATE STRUCTURE AND COST OF SERVICE

53.53 VIII. Rate Structure and Cost of Service

D. Water and Wastewater Utilities

1. Provide a complete (fully allocated) cost of service study if an interval of approximately three years has passed between a previous cost of service study and the historic test year date of the current filing. The cost of service study shall provide the necessary data to determine if the water rate structure is fair and equitable to all classifications of water users (including public and private fire protection customers) and reflects, as nearly as possible, the cost of providing the service. The study shall correspond to the test year proposed revenue requirements (future test year only, if used). Summaries of conclusions and all back-up calculations shall be made part of the submission of the cost of service study, and shall include the following:

   a. A description of the allocation methods used. A comparison of the allocated cost of service by class with the present and proposed revenues. A cost of service schedule showing the rate of return produced by present and proposed rates by class of service.
   b. Indicate if the method used for establishing the allocation factors in the cost of service study deviates from the previous study submitted in the last rate case. If yes, indicate which allocation factors were changed and discuss the reason for the changes.
   c. Supply the average day, the maximum day and the maximum hour deliveries to the system adjusted for storage for the test year and two prior years. Also provide workpapers, analyses, comparative data or other documentation supporting the estimated maximum day and peak hour demands by customer class reflected in the company's cost of service study.
   d. Explain thoroughly the methodology employed if the company distinguishes between transmission and distribution mains in its allocation of costs.
   e. Provide a detailed explanation of how storage is utilized to meet base, maximum day and maximum hour demands.
   f. Provide workpapers, calculations and supporting documentation which develop the equivalent meters and equivalent service line weights reflected in the company's cost of service study.
   g. Provide all workpapers and supporting documentation for the fire flow requirement and duration utilized in the cost of service study.
   h. Provide a breakdown of the number and size of private fire services according to the general water service class of customer.
   i. Provide a calculation of the company's base cost of water per unit of consumption.
   j. Provide a detailed cost analysis that supports the company's customer charges, by meter size, showing all direct and indirect costs included.

Response: Refer to Exhibit No. FVIII.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
RATE STRUCTURE AND COST OF SERVICE SPECIAL RATE CONTRACTS

53.53 VIII. Rate Structure and Cost of Service

D. Water and Wastewater Utilities

2. Provide a listing of negotiated special rate contracts which includes a comparison of revenues under special rate contracts and under tariff rates. Provide the cost of service treatment of any deficiency in revenues resulting from the negotiated special rate contracts.

Response: The Company has no special rate contracts.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
COMPARATIVE BALANCE SHEET AS OF FEBRUARY 28, 2027 AND DECEMBER 31, 2024

53.53 X. Balance Sheet

D. Water and Wastewater Utilities

1. Provide a comparative balance sheet for the test year-end and the preceding year-end.

Response: Refer to pages 2 and 3.

4. Describe the nature and/or origin and amounts of Notes Receivable, Accounts Receivable from Associated Companies, and other significant receivables, other than Customer Accounts, which appear on Balance Sheet.

Response: Notes Receivable

Note Receivable-Mt Zion Water District (Springettsbury Township) (Filed with the Commission at Docket No. U-850075)	255,481

The Company was approached by officials of the above-named municipalty regarding the extension of the Company's water mains to serve the municipality. Residents in the municipality were experiencing contamination problems with their wells and public water service was believed to be the best solution. The Company wanted to assist in improving the water quality in these troubled areas. However, the municipality was unwilling to pay for the facilities, and the Company could not compel existing residents to make contributions.

The Company developed a solution that charges residents a reasonable fee for connection while not burdening the municipality. The Company provided the funds for the construction of the facilities. For accounting purposes the Company lent funds to the municipalty to cover the cost of the project. The municipalty concurrently returned the funds to the Company which were recorded as an advance for construction.

As a part of the arrangement, the facilities constructed were leased to the municipality. However, there are no lease payments. The Company operates the facilities as agent for the municipality. Customers are billed directly by the Company. Customers in the water districts are charged the Company's repumped system rates because the water district is connected to the repumped system. Sales volume of, and revenues received from customers in the water district, are included in the Company's pro forma revenues, as set forth in Exhibit No. HII-2. The municipality, as lessee of the facilities, charges an application fee for each customer requesting to be connected to the system. In addition, the water district requires customers to pay surcharges. Amounts received from application fees and surcharges are paid to the Company, and the Company applies such amounts as payment of interest on the funds lent by the Company to the municipality, and as payment of the principal of the loan. In addition, as customers are connected to the system, the note receivable and the advance are reduced.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
NOTES RECEIVABLE, ACCOUNTS RECEIVABLE FROM ASSOCIATED COMPANIES AND OTHER ACCOUNTS RECEIVABLE AS OF FEBRUARY 28, 2027

53.53 X. Balance Sheet

D. Water and Wastewater Utilities

4. Describe the nature and/or origin and amounts of Notes Receivable, Accounts Receivable from Associated Companies, and other significant receivables, other than Customer Accounts, which appear on Balance Sheet.

Accounts Receivable From Affiliated Companies

The York Water Company had no accounts receivable from associated companies as of February 28, 2027.

Other Accounts Receivable	193,896

The York Water Company classifies other significant receivables, other than customer accounts, in Account No. 142, Other Accounts Receivable. A detail of Other Accounts Receivable as of February 28, 2027 is shown below.

The York Water Company Employee Stock Purchase Plan (a)	-
Customer Advances for Construction	156,513
Reimbursement Due From Insurance Company	25,831
Scrap Income Receivable	4,230
Electric Curtailment Receivable	13,128
Other Miscellaneous Accounts Receivable	4,194
Reserve For Uncollectible Accounts	(10,000)
	193,896

(a) The York Water Company has an Employee Stock Purchase Plan program. Stock purchases are paid entirely by employees through employee payroll deductions. Stock purchases are made on a quarterly basis. Pending the actual stock purchases, the employee payroll deductions are deposited in a segregated bank account, and are credited on the Company's books as "Amounts Withheld From Employees". Interest earned on the payroll deductions also is credited to the employees. When stock purchases are made after the end of the quarter, the purchase price of the stock is credited to "Common Stock Issued" and debited to "Other Accounts Receivable." The Company is subsequently reimbursed for the sale of shares purchased through the plan from the monies deposited in the segregated bank account by debiting "Amounts Withheld From Employees" and crediting "Other Accounts Receivable."

THE YORK WATER COMPANY

Other Prepayments	373,263
	1,636,584

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
OTHER CURRENT ASSETS AS OF FEBRUARY 28, 2027

53.53 X. Balance Sheet

D. Water and Wastewater Utilities

7. Explain in detail any other significant (in amount) current assets listed on balance sheet.

Response: The Company has no Miscellaneous Current and Accrued Assets.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
DEFERRED ASSETS AS OF FEBRUARY 28, 2027

53.53 X. Balance Sheet

D. Water and Wastewater Utilities

8. Explain in detail, including the amount and purpose, the deferred asset accounts that currently operate to effect or will at a later date effect the operating account supplying:

a. Origin of these accounts.

b. Probable change to this account in the near future.

c. Amortization of these amounts currently charged to operations or to be charged in the near future.

Response: (a), (b), and (c)

Account (1)	As Of February 28, 2027 (2)
Unamortized Debt Expense	2,261,025

This account includes the unamortized portion of debt expense as of February 28, 2027 associated with the issuance of long-term debt. The debt expense is amortized over the respective terms of long-term debt by crediting this account and debiting Account No. 428, Amortization of Debt Expense.

Account (1)	As Of February 28, 2027 (2)
Other Deferred Debits - Deferred Rate Case Expense	708,563

Deferred rate case expenses will be normalized over forty-eight months on the corporate books. The normalization of rate case expense will be credited to this account and charged to Account No. 666.8, Amortization of Rate Case Expense.

Refer to Exhibit No. HIII-2-1 for the normalization of the estimated expenses of this rate case over forty-eight months.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
DEFERRED ASSETS AS OF FEBRUARY 28, 2027

Account (1)	As Of February 28, 2027 (2)
Other Deferred Debits- Cash Value of Insurance Policies	5,617,226

The Company has a supplemental retirement benefit plan for five key employees of the Company consisting of the President and Chief Executive Officer, Chief Financial Officer, Chief Administrative Officer and General Counsel, Vice President-Operations, and Vice President-Engineering and seven retired former key employees. The plan is funded through life insurance policies.

The Company has a deferred savings plan for fifteen of its management and supervisory employees and ten retired former management employees. The plan is also funded through life insurance policies.

The deferred debit related to both plans' benefits represents the current cash surrender value of the life insurance policies that have been purchased to reimburse the Company for the costs of the plans.

The Company also reflects on its books of account as a deferred credit the current accrued liability with respect to the deferred compensation benefits.

The expenses and income associated with the Company's supplemental retirement and deferred savings plans have been eliminated from this rate case in accordance with the Settlement Agreement approved by the Commission under Docket No. R-000016236 with the exception of expenses from the deferred savings plan for employees not in the defined benefit pension plan.

Account (1)	As Of February 28, 2027 (2)
Other Deferred Debits - Preliminary Survey	7,056

This account includes expenditures for preliminary surveys, plans and investigations made for the purpose of determining the feasibility of projects under contemplation.

These expenditures are not included in the Company's rate base nor in the cost of service.

THE YORK WATER COMPANY

The estimated population served by the Company is 212,000.

May 2025

CORPORATE HISTORY OF THE YORK WATER COMPANY

Letters Patent incorporating The York Water Company under Special Act of the General Assembly of Pennsylvania approved February 8, 1816 (Recorded in L Book Volume 1815-16, page 42) were issued by Simon Snyder, Governor of Pennsylvania, on February 23, 1816 (L.P. Volume 9, page 592).

By virtue of certain statutory mergers and Charter Amendments as hereinafter referred to, The York Water Company has extended its chartered territory so as to include 57 municipalities as follows: The City of York, the Boroughs of East Prospect, Felton, Glen Rock, Hallam, Jacobus, Jefferson, Loganville, Manchester, Mount Wolf, New Freedom, New Salem, North York, Railroad, Seven Valleys, Shrewsbury, Spring Grove, West York, York Haven and Yorkana, and the Townships of East Manchester, Manchester, Spring Garden, Springettsbury and West Manchester, and parts of the Townships of Codorus, Conewago, Hellam, Hopewell, Jackson, Lower Windsor, Monaghan, Newberry, North Codorus, North Hopewell, Paradise, Shrewsbury, Springfield, Washington, West Manheim, Windsor and York, in the County of York and the Boroughs of Abbottstown and Carroll Valley, and Townships of Berwick, Cumberland, Oxford, Hamilton, Reading, Mount Pleasant, Union and Straban, in the County of Adams and the Townships of Greene, Hamilton, and Letterkenny in the County of Franklin and the Townships of Salisbury and West Donegal in the County of Lancaster and the Commonwealth of Pennsylvania. The community served has an estimated population of 212,000.

Articles of Amendment, which expanded and consolidated the Company's chartered territory into one description, was duly filed with the Pennsylvania Department of State on June 29, 1990 (#9033866 to 9033870) with Certificate of Amendment issued thereon.

Miscellaneous amendments relating to administrative matters of minor importance were made to the corporate Charter by Act of April 13, 1827, P.L. 241 (L Book Volume 1826-27, page 241); Act of April 11, 1840, P.L. 300 (L Book Volume 1839-40, page 300); Act of April 2, 1850, P.L. 336 (L Book Volume 1850, page 336 at page 338); Act of February 2, 1866, P.L. 14 (L Book Volume 1866, page 14); by Amendment to the Charter filed May 17, 1967 (3-1-67.13 1261-1264 incl., recorded on August 16, 1967 in York County Record Book 60-L, page 974); and by Amendment to the Charter filed August 15, 1973 (3-1-73.37 607-611 incl., recorded on August 24, 1973 in York County Record Book 66-Y, page 542).

The Constitution of the Commonwealth of Pennsylvania adopted December 16, 1873 and the Act of April 29, 1874 and its Supplements were duly accepted by the Company by filing with the Secretary of the Commonwealth Certificates of Acceptance on May 6, 1891 (Volume 30, page 433), with Letters Patent duly issued thereon (L.P. Volume 55, page 2) and on March 18, 1896 (Volume 46, page 155), with Letters Patent duly issued thereon (L.P. Volume 55, page 56).

The Business Corporation Law of Pennsylvania was duly accepted by the Company by filing its Certificate of Acceptance with the Pennsylvania Department of State on October 27, 1984 (#398082).

* * * * *

The York Water Company acquired certain of its chartered territory by purchase of the franchises and property of the following companies, which were incorporated on the respective dates hereinafter set forth:

THE MAYERSVILLE WATER COMPANY (October 13, 1890, Charter Book No. 34, page 65), with both Authorization for Sale to The York Water Company and Return of Sale filed April 25, 1898 (Miscellaneous Corporation Record Book 20, page 220).

THE WATER COMPANY OF MANCHESTER TOWNSHIP (July 20, 1896, Charter Book No. 49, page 278), with Authorization for Sale to The York Water Company filed February 25, 1897 and Return of Sale filed March 9, 1897 (Miscellaneous Corporation Record Book 20, page 56 and Book 17, page 170).

THE WATER COMPANY OF SPRING GARDEN TOWNSHIP (July 20, 1896, Charter Book No. 49, page 276), with Authorization for Sale to The York Water Company filed February 25, 1897 and Return of Sale filed March 9, 1897 (Miscellaneous Corporation Record Book 20, page 57 and Book 17, page 168).

THE WATER COMPANY OF WEST MANCHESTER TOWNSHIP (July 20, 1896, Charter Book No. 49, page 277), with Authorization for Sale to The York Water Company filed February 25, 1897 and Return of Sale filed March 9, 1897 (Miscellaneous Corporation Record Book 20, page 58 and Book 17, page 169).

THE WATER COMPANY OF SPRINGETTSBURY TOWNSHIP (December 8, 1906,

Charter Book No. 98, page 67), with corporate name changed to YORK SUBURBAN WATER COMPANY on October 31, 1925 (Charter Book No. 218, page 383).

MANCHESTER WATER COMPANY (December 19, 1929, Charter Book No. 272, page 87), with Authorization for Sale to Mt. Wolf-Manchester Water Company filed January 2, 1930 (Miscellaneous Corporation Record Book 175, page 521) and Return of Sale filed January 20, 1930 (Miscellaneous Corporate Record Book 176, page 46).

WATER COMPANY OF EAST MANCHESTER TOWNSHIP (December 19, 1929, Charter Book No. 260, page 462), with Authorization for Sale to Mt. Wolf-Manchester Water Company filed January 2, 1930 (Miscellaneous Corporation Record Book 175, page 524) and Return of Sale filed January 20, 1930 (Miscellaneous Corporation Record Book 176, page 49).

MT. WOLF-MANCHESTER WATER COMPANY (December 19, 1929, Charter Book No. 272, page 90), with Authorization for Sale to York Suburban Water Company filed February 6, 1930 (Miscellaneous Corporation Record Book 176, page 166) and Return of Sale filed February 26, 1930 (Miscellaneous Corporation Record Book 176, page 254); and with Approval from Water and Power Resources Board filed March 3, 1930 (Miscellaneous Corporation Record Book 176, page 276); and Approval of Acceptance of the Act of June 7, 1907 and the Act of April 13, 1905 by Water Supply Commission of Pennsylvania filed March 3, 1930 (Miscellaneous Corporation Record Book 176, page 277).

YORK SUBURBAN WATER COMPANY - Approval from Water and Power Resources Board filed March 3, 1930 (Miscellaneous Corporation Record Book 176, page 280); and Approval

of Acceptance of the Act of June 7, 1907 and the Act of April 13, 1905 by Water Supply Commission of Pennsylvania filed March 3, 1930 (Miscellaneous Corporation Record Book 176, page 282).

THE WATER COMPANY OF YORK TOWNSHIP (October 1, 1940, Charter Book No. 379, pages 281-289 incl.), with Authorization for Sale to York Suburban Water Company filed December 30, 1940 (Miscellaneous Corporation Record Book 258, page 18) and Return of Sale filed December 31, 1940 (Miscellaneous Corporation Record Book 258, page 25).

YORK SUBURBAN WATER COMPANY, with Authorization for Sale to The York Water Company filed May 23, 1941 (Miscellaneous Corporation Record Book 261, page 49) and Return of Sale filed June 2, 1941 (Miscellaneous Corporation Record Book 261, page 188).

* * * * *

By various Charter Amendments from time to time, The York Water Company expanded its chartered territory in York County, Pennsylvania, as follows:

July 7, 1960 - Arlington Park area in the Township of York (Recorded on July 11, 1960 in York County Record Book 49-Y, page 104).

March 23, 1964 - A portion of the Township of Hellam, the Borough of Jacobus and certain portions of the Township of York and of the Township of Springfield (3-1-64.08 1229-1234 incl., recorded on April 8, 1964 in York County Record Book 55-U, page 599).

June 9, 1965 - Portions of the Townships of Windsor and York (3-1-65.17 158-162 incl., recorded on June 23, 1965 in York County Record Book 57-Z, page 298).

August 23, 1967 - Portion of the Township of Jackson (3-1-67.24 289-293 incl., recorded on September 5, 1967 in York County Record Book 60-N, page 290).

July 7, 1977 - Borough of Loganville and portions of the Townships of Springfield and York (3-1-77.33 1336-1340 incl., recorded on July 21, 1977 in York County Record Book 72-J, page 278).

March 19, 1979 - Portion of Hellam Township (Recorded on July 23, 1979 in York County Record Book 79-V, page 935).

May 3, 1983 - Boroughs of New Salem, Seven Valleys, York Haven and Yorkana and portions of the Townships of Lower Windsor, Newberry and North Codorus (as part of the Company's then consolidated description of its total chartered territory) (Department of State #83291065 through 83291071-398082).

May 9, 1985 - Borough of Hallam and surrounding portion of Hellam Township adjacent to and east of the Company's May 3, 1983 consolidated chartered territory (Department of State #85380906 through 85380910-398082).

May 7, 1990 - Portions of Springfield, York, Windsor, Lower Windsor and Hellam Townships (as part of the Company's then consolidated description of its total chartered territory)

(Department of State #9033866 - 9033870).

* * * * *

Various Election Returns for Increases of Capital Stock were duly filed by the Company and its associate companies as more fully appears by reference to the following Miscellaneous Corporation Records Books and Pages: By Water Company of Springettsbury Township, Vol. 145, page 71, and Vol. 178, page 141; by Mt. Wolf-Manchester Water Company, Vol. 178, page 81; and by The York Water Company, Vol. 9, page 139 and Vol. 7, page 207; Vol. 17, page 100-110-277; Vol. 18, page 286; Vol. 21, page 125; Vol. 29, page 49; Vol. 27, page 190; Vol. 51, page 177; Vol. 65, page 249; Vol. 75, page 170; Vol. 112, page 562; Vol. 170, page 57; and Vol. 178, page 110. Certificate for the reduction of the par value of the Company's Common Stock from $25.00 to $10.00 a share was filed February 3, 1930 (Miscellaneous Corporation Record Book 176, page 163).

An Election Return for Increase of Indebtedness was similarly filed by the Company as more fully appears by reference to Roll 3-1-54.24, Film 290 (9-10-54), with Return of Actual Increase of Indebtedness filed to Roll 3-1-56.19, Film 1305 (6-2-56).

On May 20, 1986 the Company's Articles and Charter were amended so as to increase the Company's authorized number of shares to One Million (1,000,000) shares of Common Stock of the par value of $10.00 per share (Department of State 8633 697 through 8633 699).

On June 29, 1990, the Company's Articles and Charter were amended to consolidate the Company's presently chartered territory and proposed additions thereto into one all-inclusive description. Added portions of Springfield, York, Windsor, Lower Windsor and Hellam Townships

(9033866-9033870).

On February 28, 1994, the Company's Articles and Charter were amended to add portions of Lower Windsor, Jackson, North Codorus and Hellam Townships and East Prospect, Wrightsville and Spring Grove Boroughs (Microfilm Number 09415-0349-0352).

On May 20, 1996, the Company's Articles of Incorporation were restated and amended. The amended area added Jefferson Borough and portion of Codorus Township. In addition, authorized shares were increased to 1,200,000 shares (Microfilm Number 9636-94 to 9636-99).

On March 7, 1997, the Company's Articles of Incorporation were amended to add the Boroughs of Glen Rock, Shrewsbury, New Freedom, Railroad, Shrewsbury Township and portions of Hopewell and North Hopewell Townships (Microfilm Number 09719, 1725-1727).

On May 8, 1997, the Company's Articles of Incorporation were amended so as to increase the Company's authorized number of shares to six million (6,000,000) shares of common stock and to permit 500,000 shares of preferred stock, all shares at zero par value.

On January 2, 1998, the Company's Articles of Incorporation were amended to add a portion of the Township of Conewago to the Company's Charter Area (Microfilm Number 09796, 291-293).

On May 6, 1999, the Company’s Articles of Incorporation were amended so as to increase the Company’s authorized number of shares to thirty-one million (31,000,000) shares of common stock and five hundred thousand (500,000) shares of preferred stock. All shares are at zero par

value. This was necessary to facilitate the Shareholder Rights Plan. (Microfilm Number 9935, 176-178)

On May 1, 2000, the Company's Articles of Incorporation were amended and restated. The restated Articles (i) provide for conformance to a previous shareholder approved amendment to the Company's By-Laws and (ii) to delete provisions, which are no longer applicable due to previously approved amendments to the Restated Articles of Incorporation. (Microfilm Number 200035, 389-392)

On May 4, 2010, the Company's Articles of Incorporation were amended so as to increase the Company's authorized number of shares to forty-six million, five hundred thousand (46,500,000) shares of common stock and five hundred thousand (500,000) shares of preferred stock. All shares are at zero par value.

Note: The York Water Company's entity number at the Pennsylvania Department of State is 398082.

Major Variance No. 1

	Twelve Months Ended 12-31-24	12-31-23	Increase (Decrease)
Metered Sales to Residential Customers	4,250,687	3,777,509	473,178

The increase in metered sales to residential customers in the amount of 473,178 was primarily due to the acquisitions.

Major Variance No. 2

	Twelve Months Ended 12-31-24	12-31-23	Increase (Decrease)
Metered Sales to Commercial Customers	658,052	519,047	139,005

The increase in metered sales to commercial customers in the amount of 139,005 was primarily due to the acquisitions.

Major Variance No. 3

	Twelve Months Ended 12-31-24	12-31-23	Increase (Decrease)
Unmetered Sales to Residential Customers	1,844,504	1,698,795	145,709

The increase in unmetered sales to residential customers in the amount of 145,709 was primarily due to the acquisitions.

Major Variance No. 4

	Twelve Months Ended 12-31-24	12-31-23	Increase (Decrease)
Unmetered Sales to Commercial Customers	532,211	418,082	114,129

The increase in unmetered sales to commercial customers in the amount of 114,129 was primarily due to the acquisitions.

Major Variance No. 5

Wastwater Treatment	Twelve Months Ended 12-31-24	12-31-23	Increase (Decrease)
Salaries and Wages - Wastewater Treatment Operations	617,403	545,666	71,737

During the twelve months ended December 31, 2024, Company labor charged to this account increased 71,737 when compared to the twelve months ended December 31, 2023. The increase was primarily due to an increase in employees and an annual wage increase.

Major Variance No. 6

Wastwater Treatment	Twelve Months Ended 12-31-24	12-31-23	Increase (Decrease)
Purchased Treatment - Operations	2,317,357	2,156,242	161,115

During the twelve months ended December 31, 2024, Purchased Treatment - Operations increased 161,115 when compared to the twelve months ended December 31, 2023. The increase was due to higher amounts charged by third party operators of treatment plants connected to some of the Company's collection systems.

Major Variance No. 7

Wastwater Treatment	Twelve Months Ended 12-31-24	12-31-23	Increase (Decrease)
Sludge Removal - Operations	252,926	203,182	49,744

During the twelve months ended December 31, 2024, Sludge Removal - Operations increased 49,744 when compared to the twelve months ended December 31, 2023. The increase was primarily due to the acquisition of wastewater systems.

Major Variance No. 8

Wastewater Treatment	Twelve Months Ended 12-31-24	12-31-23	Increase (Decrease)
Outside Services - Maintenance - Structures	94,170	41,070	53,100

During the twelve months ended December 31, 2024, Outside Services - Maintenance - Structures increased 53,100 when compared to the twelve months ended December 31, 2023. The increase was primarily due to the acquisition of wastewater systems with structures in need of maintenance.

Major Variance No. 9

Wastewater Collection	Twelve Months Ended 12-31-24	12-31-23	Increase (Decrease)
Outside Services - Maintenance	178,132	37,684	140,448

During the twelve months ended December 31, 2024, Outside Services - Maintenance increased 140,448 when compared to the twelve months ended December 31, 2023. The increase was primarily due to inspections of sewer mains through CCTV and sewer main maintenance.

Major Variance No. 10

Wastewater Pumping	Twelve Months Ended 12-31-24	12-31-23	Increase (Decrease)
Outside Services - Maintenance - Equipment	95,568	33,245	62,323

During the twelve months ended December 31, 2024, Outside Services - Maintenance - Equipment increased 62,323 when compared to the twelve months ended December 31, 2023. The increase was primarily due to the acquisition of wastewater systems with equipment in need of maintenance.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
MAJOR VARIANCE EXPLANATIONS FOR COMPARATIVE OPERATING STATEMENT
FOR TWELVE MONTHS ENDED DECEMBER 31, 2024 AND 2023

Major Variance No. 11

	Twelve Months Ended 12-31-24	12-31-23	Increase (Decrease)
Current Federal Income Tax	191,523	(75,361)	266,884

During the twelve months ended December 31, 2024 current federal income taxes increased 266,884 when compared to the twelve months ended December 31, 2023 primarily due to an increase in federal taxable income.

Refer to Exhibit No. HIV-17-2W for an adjustment of current federal income tax for the twelve months ended December 31, 2024, based on pro forma federal taxable income under current base rates.

Refer to Exhibit No. HIV-17-5W for an adjustment of current federal income tax for the twelve months ended December 31, 2024, based on pro forma federal taxable income under proposed base rates.

Refer to Exhibit No. FIV-17-1W for an adjustment of current federal income tax for the twelve months ending December 31, 2025 based on projected federal taxable income under current base rates.

Refer to Exhibit No. FIV-17-5W for an adjustment of current federal income tax for the twelve months ending December 31, 2025 based on pro forma federal taxable income under current base rates.

Refer to Exhibit No. FIV-17-6W for an adjustment of current federal income tax for the twelve months ending February 28, 2027, based on projected federal taxable income under current base rates.

Refer to Exhibit No. FIV-17-10W for an adjustment of current federal income tax for the twelve months ending February 28, 2027, based on pro forma federal taxable income under current base rates.

Refer to Exhibit No. FIV-17-11W for an adjustment of current federal income tax for the twelve months ending February 28, 2027, based on pro forma federal taxable income under proposed base rates.

THE YORK WATER COMPANY

DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION

ACCRUED UTILITY REVENUES AS OF DECEMBER 31, 2024 AND 2023

53.53 II. Operating Revenue

D 5 Provide detailed computations of the determination of accrued revenues as of test year-end and year-end immediately preceding the test year, together with a detailed explanation of the procedures and methods used in developing accrued revenues.

RESPONSE

In response to the enactment of the Tax Reform Act of 1986, the Company estimates for income tax and financial reporting purposes the amount of income attributable to utility services provided during each accounting period, but after the final meter reading, which falls within that accounting period. Pages 2 and 3 of Exhibit No. HII-5W are the detailed computations of this estimate as of December 31, 2024 and 2023, respectively.

Since unbilled revenues from the end of one accounting period are included in the first meter reading for the next accounting period, unbilled revenues from one accounting period are offset by unbilled revenues in the succeeding accounting period, with the result that the Company will record as either for accounting purposes, a debit or credit, the negative or positive difference in accrued revenues between the two accounting periods. This difference represents net accrued revenues recorded for the latter accounting period.

Operating revenues are presented for ratemaking purposes on a "twelve month as billed basis" for the historic and future test years, to eliminate the uncertainties inherent in estimated "unbilled revenues." Refer to Exhibit No. HII-2-2W for an operating revenue adjustment, which eliminates net accrued revenues recorded during the test year from the cost of service.

Refer to Exhibit No. HII-5W, Page 2 of 4, for a detailed computation of accrued utility revenues as of December 31, 2024.

Refer to Exhibit No. HII-5W, Page 3 of 4, for a detailed computation of accrued utility revenues as of December 31, 2023.

Refer to Exhibit No. HII-5W, Page 4 of 4, for a summary of entries recorded during the twelve months ended December 31, 2024 accounting for accrued revenues.

DEBT INTEREST UTILIZED FOR INCOME TAX CALCULATIONS

53.53 IV Taxes

D. Water and Wastewater Utilities

18 State the amount of debt interest utilized for income tax calculations, and details of debt interest computations, under each of the following rate case bases;

a. Actual test year.

b. Annualized test year-end.

c. Proposed test year-end.

Response: Debt interest expense utilized for the income tax calculation reflected on the Company's corporate books for the twelve months ended December 31, 2024 is actual debt expense incurred during that period.

Debt interest expense utilized for the income tax calculation on pro forma income for the twelve months ended December 31, 2024 shown on Exhibit No. HIV-17-2 is determined by reflecting the interest charges to ratepayers in the cost of capital determination (interest synchronization).

Rate base	44,508,541	x weighted debt cost rate of	2.06%
= interest expense utilized for income tax calculations of			917,796

EFFECT OF THE CHANGE ON THE UTILITY'S CUSTOMERS

53.52 Applicability: public utilities other than canal, turnpike, tunnel, bridge and wharf companies.

(a) Whenever a public utility, other than a canal, turnpike, tunnel, bridge or wharf company files a tariff, revision, or supplement effecting changes in the terms and conditions of service rendered or to be rendered, it shall submit to the Commission, with the tariff, revision or supplement, statements showing all of the following:

(4) The effect of the change on the utility's customers.

RESPONSE

Refer to the attached Notice of Proposed Rate Changes.

NOTICE OF PROPOSED WATER AND WASTEWATER RATE CHANGES

To Our Customers:

The York Water Company filed a request with the Pennsylvania Public Utility Commission (PUC) to increase your water and wastewater rates as of August 1, 2025. A full investigation of this request could delay the change until March 2026. This notice describes the Company's rates request, the PUC's role, and what actions you can take.

The Company has requested an overall base rate increase for water service of $20.3 million per year. If the Company's entire request is approved, the typical water bill for customers would increase as indicated by the category below:

Residential gravity customers using 4,383 gallons per month would increase from $47.78 to $58.26 per month, or by 21.9%. **Residential repumped customers** using 3,672 gallons per month would increase from $56.48 to $72.26 per month, or by 27.9%.

Commercial gravity customers using 26,568 gallons per month would increase from $159.98 to $192.41 per month, or by 20.3%. **Commercial repumped customers** using 40,958 gallons per month would increase from $385.82 to $502.69 per month, or by 30.3%.

Industrial gravity customers using 126,547 gallons per month would increase from $604.80 to $747.71 per month, or by 23.6%. **Industrial repumped customers** using 301,845 gallons per month would increase from $2,439.99 to $3,192.15 per month, or by 30.8%.

The Company has also requested an overall base rate increase for wastewater service of $3.9 million. If the Company's entire request is approved, the typical wastewater bill for customers would increase as indicated by the category below:

Asbury Pointe Subdivision residential customers would increase from $86.90 to $93.60 per month per dwelling unit, or by 7.7%.

To find out your customer class or how the requested increase may affect your water or wastewater bill, contact The York Water Company at 1-800-750-5561. The rates requested by The York Water Company for water customers may be found in Supplement No. 165 to Tariff Water-Pa P.U.C. No. 14, and the rates requested by The York Water Company for wastewater customers may be found in Supplement No. 26 to Tariff Wastewater-Pa. P.U.C. No. 1. You may examine the material filed with the PUC which explains the requested increase and the reasons for it. A copy of this material is kept at The York Water Company's office. Upon request, the Company will send you the Statement of Reasons for Water Supplement No. 165 to Tariff Water-Pa. P.U.C. No. 14, and Wastewater Supplement No. 26 to Tariff Wastewater-Pa. P.U.C. No. 1, explaining why the rate increase has been requested.

The state agency which approves rates for public utilities is the PUC. The PUC will examine the requested rate increase and can prevent existing rates from changing until it investigates and/or holds hearings on the request. The Company must prove that the requested rates are reasonable. After examining the evidence, the PUC may grant all, some, or none of the request, or may reduce existing rates.

The PUC may change the amount of the rate increase or decrease requested by the utility for each customer class. As a result, the rate charged to you may be different than the rate requested by the Company as shown above.

There are three ways to challenge a Company's request to change its rates:

1. You can file a formal complaint. If you want a hearing before a judge, you must file a formal complaint. By filing a formal complaint, you assure yourself the opportunity to take part in hearings about the rate increase request. All complaints should be filed with the PUC before August 1, 2025. If no formal complaints are filed, the Commission may grant all, some, or none of the request without holding a hearing before a judge.
2. You can send us a letter telling why you object to the requested rate increase. Sometimes there is information in these letters that makes us aware of problems with the Company's service or management. This information can be helpful when we investigate the rate request.

   Send your letter or request for a formal complaint form to the Pennsylvania Public Utility Commission, Post Office Box 3265, Harrisburg, PA 17105-3265.
3. You can be a witness at a public input hearing. Public input hearings are held if the Commission opens an investigation of the Company's rate increase request and if there is a large number of customers interested in the case. At these hearings, you have the opportunity to present your views in person to the PUC judge hearing the case and the Company representatives. All testimony given "under oath" becomes part of the official rate case record. These hearings are held in the service area of the Company.

The York Water Company

YWC_05.2025_W&WW_A1

NOTICE OF PROPOSED WASTEWATER RATE CHANGES

To Our Customers:

The York Water Company filed a request with the Pennsylvania Public Utility Commission (PUC) to increase your wastewater rates as of August 1, 2025. A full investigation of this request could delay the change until March 2026. This notice describes the Company's rates request, the PUC's role, and what actions you can take.

The Company has requested an overall base rate increase for wastewater service of $3.9 million. If the Company's entire request is approved, the typical wastewater bill for customers would increase as indicated by the category below:

Letterkenny Township (LTMA) residential customers would increase from $86.90 to $93.60 per month per dwelling unit, or by 7.7%.
Letterkenny Township (LTMA) commercial customers would increase from $86.90 to $122.41 per month per dwelling unit, or by 40.9%.

To find out your customer class or how the requested increase may affect your wastewater bill, contact The York Water Company at 1-800-750-5561. The rates requested by The York Water Company for wastewater customers may be found in Supplement No. 26 to Tariff Wastewater-Pa. P.U.C. No. 1. You may examine the material filed with the PUC which explains the requested increase and the reasons for it. A copy of this material is kept at The York Water Company's office. Upon request, the Company will send you the Statement of Reasons for Wastewater Supplement No. 26 to Tariff Wastewater-Pa. P.U.C. No. 1, explaining why the rate increase has been requested.

The state agency which approves rates for public utilities is the PUC. The PUC will examine the requested rate increase and can prevent existing rates from changing until it investigates and/or holds hearings on the request. The Company must prove that the requested rates are reasonable. After examining the evidence, the PUC may grant all, some, or none of the request, or may reduce existing rates.

The PUC may change the amount of the rate increase or decrease requested by the utility for each customer class. As a result, the rate charged to you may be different than the rate requested by the Company as shown above.

There are three ways to challenge a Company's request to change its rates:

1. You can file a formal complaint. If you want a hearing before a judge, you must file a formal complaint. By filing a formal complaint, you assure yourself the opportunity to take part in hearings about the rate increase request. All complaints should be filed with the PUC before August 1, 2025. To Our Customers:

The York Water Company filed a request with the Pennsylvania Public Utility Commission (PUC) to increase your water and wastewater rates as of August 1, 2025. A full investigation of this request could delay the change until March 2026. This notice describes the Company's rates request, the PUC's role, and what actions you can take.

The Company has requested an overall base rate increase for water service of $20.3 million per year. If the Company's entire request is approved, the typical water bill for customers would increase as indicated by the category below:

Residential gravity customers using 4,383 gallons per month would increase from $47.78 to $58.26 per month, or by 21.9%. **Residential repumped customers** using 3,672 gallons per month would increase from $56.48 to $72.26 per month, or by 27.9%.

Commercial gravity customers using 26,568 gallons per month would increase from $159.98 to $192.41 per month, or by 20.3%. **Commercial repumped customers** using 40,958 gallons per month would increase from $385.82 to $502.69 per month, or by 30.3%.

Industrial gravity customers using 126,547 gallons per month would increase from $604.80 to $747.71 per month, or by 23.6%. **Industrial repumped customers** using 301,845 gallons per month would increase from $2,439.99 to $3,192.15 per month, or by 30.8%.

The Company has also requested an overall base rate increase for wastewater service of $3.9 million. If the Company's entire request is approved, the typical wastewater bill for customers would increase as indicated by the category below:

East Prospect Borough and Lower Windsor Area residential customers using 4,800 gallons per month would increase from $92.95 to $127.67, or by 37.4%.
East Prospect Borough and Lower Windsor Area commercial customers using 8,130 gallons per month would increase from $118.14 to $170.53, or by 44.3%.

To find out your customer class or how the requested increase may affect your water or wastewater bill, contact The York Water Company at 1-800-750-5561. The rates requested by The York Water Company for water customers may be found in Supplement No. 165 to Tariff Water-Pa P.U.C. No. 14, and the rates requested by The York Water Company for wastewater customers may be found in Supplement No. 26 to Tariff Wastewater-Pa. P.U.C. No. 1. You may examine the material filed with the PUC which explains the requested increase and the reasons for it. A copy of this material is kept at The York Water Company's office. Upon request, the Company will send you the Statement of Reasons for Water Supplement No. 165 to Tariff Water-Pa. P.U.C. No. 14, and Wastewater Supplement No. 26 to Tariff Wastewater-Pa. P.U.C. No. 1, explaining why the rate increase has been requested.

The state agency which approves rates for public utilities is the PUC. The PUC will examine the requested rate increase and can prevent existing rates from changing until it investigates and/or holds hearings on the request. The Company must prove that the requested rates are reasonable. After examining the evidence, the PUC may grant all, some, or none of the request, or may reduce existing rates.

The PUC may change the amount of the rate increase or decrease requested by the utility for each customer class. As a result, the rate charged to you may be different than the rate requested by the Company as shown above.

There are three ways to challenge a Company's request to change its rates:

1. You can file a formal complaint. If you want a hearing before a judge, you must file a formal complaint. By filing a formal complaint, you assure yourself the opportunity to take part in hearings about the rate increase request. All complaints should be filed with the PUC before August 1, 2025. If no formal complaints are filed, the Commission may grant all, some, or none of the request without holding a hearing before a judge.
2. You can send us a letter telling why you object to the requested rate increase. Sometimes there is information in these letters that makes us aware of problems with the Company's service or management. This information can be helpful when we investigate the rate request.

   Send your letter or request for a formal complaint form to the Pennsylvania Public Utility Commission, Post Office Box 3265, Harrisburg, PA 17105-3265.
3. You can be a witness at a public input hearing. Public input hearings are held if the Commission opens an investigation of the Company's rate increase request and if there is a large number of customers interested in the case. At these hearings, you have the opportunity to present your views in person to the PUC judge hearing the case and the Company representatives. All testimony given "under oath" becomes part of the official rate case record. These hearings are held in the service area of the Company.

NOTICE OF PROPOSED WATER AND WASTEWATER RATE CHANGES

To Our Customers:

The York Water Company filed a request with the Pennsylvania Public Utility Commission (PUC) to increase your water and wastewater rates as of August 1, 2025. A full investigation of this request could delay the change until March 2026. This notice describes the Company's rates request, the PUC's role, and what actions you can take.

The Company has requested an overall base rate increase for water service of $20.3 million per year. If the Company's entire request is approved, the typical water bill for customers would increase as indicated by the category below:

Residential gravity customers using 4,383 gallons per month would increase from $47.78 to $58.26 per month, or by 21.9%. **Residential repumped customers** using 3,672 gallons per month would increase from $56.48 to $72.26 per month, or by 27.9%.

Commercial gravity customers using 26,568 gallons per month would increase from $159.98 to $192.41 per month, or by 20.3%. **Commercial repumped customers** using 40,958 gallons per month would increase from $385.82 to $502.69 per month, or by 30.3%.

Industrial gravity customers using 126,547 gallons per month would increase from $604.80 to $747.71 per month, or by 23.6%. **Industrial repumped customers** using 301,845 gallons per month would increase from $2,439.99 to $3,192.15 per month, or by 30.8%.

The Company has also requested an overall base rate increase for wastewater service of $3.9 million. If the Company's entire request is approved, the typical wastewater bill for customers would increase as indicated by the category below:

Washington Township residential customers using 4,658 gallons per month would increase from $43.29 to $75.76 per month, or by 75.8%.

To find out your customer class or how the requested increase may affect your water or wastewater bill, contact The York Water Company at 1-800-750-5561. The rates requested by The York Water Company for water customers may be found in Supplement No. 165 to Tariff Water-Pa P.U.C. No. 14, and the rates requested by The York Water Company for wastewater customers may be found in Supplement No. 26 to Tariff Wastewater-Pa. P.U.C. No. 1. You may examine the material filed with the PUC which explains the requested increase and the reasons for it. A copy of this material is kept at The York Water Company's office. Upon request, the Company will send you the Statement of Reasons for Water Supplement No. 165 to Tariff Water-Pa. P.U.C. No. 14, and Wastewater Supplement No. 26 to Tariff Wastewater-Pa. P.U.C. No. 1, explaining why the rate increase has been requested.

The state agency which approves rates for public utilities is the PUC. The PUC will examine the requested rate increase and can prevent existing rates from changing until it investigates and/or holds hearings on the request. The Company must prove that the requested rates are reasonable. After examining the evidence, the PUC may grant all, some, or none of the request, or may reduce existing rates.

The PUC may change the amount of the rate increase or decrease requested by the utility for each customer class. As a result, the rate charged to you may be different than the rate requested by the Company as shown above.

There are three ways to challenge a Company's request to change its rates:

1. You can file a formal complaint. If you want a hearing before a judge, you must file a formal complaint. By filing a formal complaint, you assure yourself the opportunity to take part in hearings about the rate increase request. All complaints should be filed with the PUC before August 1, 2025. If no formal complaints are filed, the Commission may grant all, some, or none of the request without holding a hearing before a judge.
2. You can send us a letter telling why you object to the requested rate increase. Sometimes there is information in these letters that makes us aware of problems with the Company's service or management. This information can be helpful when we investigate the rate request.

   Send your letter or request for a formal complaint form to the Pennsylvania Public Utility Commission, Post Office Box 3265, Harrisburg, PA 17105-3265.
3. You can be a witness at a public input hearing. Public input hearings are held if the Commission opens an investigation of the Company's rate increase request and if there is a large number of customers interested in the case. At these hearings, you have the opportunity to present your views in person to the PUC judge hearing the case and the Company representatives. All testimony given "under oath" becomes part of the official rate case record. These hearings are held in the service area of the Company.

The York Water Company

YWC_05.2025_W&WW_F

NOTICE OF PROPOSED WATER AND WASTEWATER RATE CHANGES

To Our Customers:

The York Water Company filed a request with the Pennsylvania Public Utility Commission (PUC) to increase your water and wastewater rates as of August 1, 2025. A full investigation of this request could delay the change until March 2026. This notice describes the Company's rates request, the PUC's role, and what actions you can take.

The Company has requested an overall base rate increase for water service of $20.3 million per year. If the Company's entire request is approved, the typical water bill for customers would increase as indicated by the category below:

Residential gravity customers using 4,383 gallons per month would increase from $47.78 to $58.26 per month, or by 21.9%. **Residential repumped customers** using 3,672 gallons per month would increase from $56.48 to $72.26 per month, or by 27.9%.

Commercial gravity customers using 26,568 gallons per month would increase from $159.98 to $192.41 per month, or by 20.3%. **Commercial repumped customers** using 40,958 gallons per month would increase from $385.82 to $502.69 per month, or by 30.3%.

Industrial gravity customers using 126,547 gallons per month would increase from $604.80 to $747.71 per month, or by 23.6%. **Industrial repumped customers** using 301,845 gallons per month would increase from $2,439.99 to $3,192.15 per month, or by 30.8%.

The Company has also requested an overall base rate increase for wastewater service of $3.9 million. If the Company's entire request is approved, the typical wastewater bill for customers would increase as indicated by the category below:

West Manheim Township residential customers using 4,011 gallons per month would increase from $89.84 to $132.56 per month, or by 47.6%.
West Manheim Township commercial customers using 39,637 gallons per month would increase from $562.27 to $936.36 per month, or by 66.5%.

To find out your customer class or how the requested increase may affect your water or wastewater bill, contact The York Water Company at 1-800-750-5561. The rates requested by The York Water Company for water customers may be found in Supplement No. 165 to Tariff Water-Pa P.U.C. No. 14, and the rates requested by The York Water Company for wastewater customers may be found in Supplement No. 26 to Tariff Wastewater-Pa. P.U.C. No. 1. You may examine the material filed with the PUC which explains the requested increase and the reasons for it. A copy of this material is kept at The York Water Company's office. Upon request, the Company will send you the Statement of Reasons for Water Supplement No. 165 to Tariff Water-Pa. P.U.C. No. 14, and Wastewater Supplement No. 26 to Tariff Wastewater-Pa. P.U.C. No. 1, explaining why the rate increase has been requested.

The state agency which approves rates for public utilities is the PUC. The PUC will examine the requested rate increase and can prevent existing rates from changing until it investigates and/or holds hearings on the request. The Company must prove that the requested rates are reasonable. After examining the evidence, the PUC may grant all, some, or none of the request, or may reduce existing rates.

The PUC may change the amount of the rate increase or decrease requested by the utility for each customer class. As a result, the rate charged to you may be different than the rate requested by the Company as shown above.

There are three ways to challenge a Company's request to change its rates:

1. You can file a formal complaint. If you want a hearing before a judge, you must file a formal complaint. By filing a formal complaint, you assure yourself the opportunity to take part in hearings about the rate increase request. All complaints should be filed with the PUC before August 1, 2025. If no formal complaints are filed, the Commission may grant all, some, or none of the request without holding a hearing before a judge.
2. You can send us a letter telling why you object to the requested rate increase. Sometimes there is information in these letters that makes us aware of problems with the Company's service or management. This information can be helpful when we investigate the rate request.

   Send your letter or request for a formal complaint form to the Pennsylvania Public Utility Commission, Post Office Box 3265, Harrisburg, PA 17105-3265.
3. You can be a witness at a public input hearing. Public input hearings are held if the Commission opens an investigation of the Company's rate increase request and if there is a large number of customers interested in the case. At these hearings, you have the opportunity to present your views in person to the PUC judge hearing the case and the Company representatives. All testimony given "under oath" becomes part of the official rate case record. These hearings are held in the service area of the Company.

YWC_05.2025_W&WW_J

THE YORK WATER COMPANY

DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION

SPECIFIC REASONS FOR PROPOSED INCREASE IN WATER AND WASTEWATER RATES

53.52 Applicability; public utilities other than canal, turnpike, tunnel, bridge, and wharf companies

(b) Whenever a public utility other than a canal,turnpike, tunnel, bridge,or wharf company files a tariff, revision, or supplement which will increase or decrease the bills to its customers, it shall submit in addition to the requirements of subsection (a), to the Commission, with the tariff, revision or supplement, statements showing the following:

(1) The specific reasons for each increase or decrease.

RESPONSE: The York Water Company has prepared and filed the data required under Title 52, Pennsylvania Code, Sections 53.52 and 53.53 in support of the proposed rates. The supporting data for the tariff revision are for the twelve months ending February 29, 2024, or as of the close of the same twelve-month period, adjusted for ratemaking purposes.

Despite the best efforts by The York Water Company to control costs, the effects of increased expenses and net additions to rate base have reduced returns.

The specific reasons the Company proposes to increase its water and wastewater rates are as follows:

(a) To provide sufficient revenues to recover the cost of providing water and wastewater service to its consumers;
(b) To allow it to discharge properly its public duties by continuing to furnish an adequate, safe, and reliable level of service;
(c) To maintain its facilities properly; and
(d) To afford the opportunity to more nearly approach a fair and reasonable rate of return on the original cost measure of value of its property used and useful in rendering water and wastewater service.

Also, please see the attached Statement of Reasons to be provided to customers upon request.

THE YORK WATER COMPANY

Statement of Reasons
For the 2025 Rate Increase Request

The York Water Company (the "Company") is requesting Public Utility Commission ("PUC") approval for a base rate increase for water customers of $20.3 million, and for wastewater customers, of $3.9 million to begin August 1, 2025. From our past experience, it is likely the PUC may suspend implementation of the rates until its investigation of the need for the increases is completed which may take until March 2026.

Rate Increase

The Company last filed for base rate increases for its water and wastewater operations in May 2022, three years ago. Our main reasons for the increase are as follows:

- Recovery of $145 million in capital expenditures. The Company has greatly increased the total plant investment from the level claimed in our last rate request in 2022. This increase of approximately $145 million (through February 2027) in system improvements since the last rate request includes the following major items:

    1. Replacement of 30 miles of pipe. Replacement, reinforcement, and relining of aging water mains, replacement of service lines, meters, and hydrants. Nearly 30 miles of aging pipeline, about 3% of the Company's total in service, was replaced. This replacement strategy extends the life of our infrastructure, reduces costs associated with main breaks and leaks, improves pipe efficiency while reducing energy demand and provides improved customer service and reliability.
    2. Distribution system improvements. Improvements to standpipes and pumping equipment to ensure customers have a safe and reliable supply of water that meets current and proposed regulations.
    3. Pumping equipment. Upgrade of pumping equipment at the Company's water and wastewater pump stations to increase efficiency that reduces costs and provide redundancy and reliability.
    4. Construction and expansion of wastewater treatment plants. Construction required to service the wastewater needs of growing communities in a safe and efficient manner that meets or exceeds increasingly stringent regulatory and discharge requirements.
    5. Enhanced security. System monitoring and information technology system upgrades.
    6. Improved customer service. Upgrade our enterprise resource planning platform to enhance customer service, increase efficiency, and enhance data security and compliance.
    7. Improvements to dams. Construction projects required by the Department of Environmental Protection to ensure that the dams continue to be safe and effective for many years into the future.

8. Lead service lines replacement. Replacement of all known company-owned lead service lines. In addition, replacement of customer-owned lead service lines when discovered and/or identified by the customer.
9. Upgrades to water and wastewater treatment equipment and facilities. These projects are necessary to maintain compliance with existing and proposed regulations and provide resiliency in operations.

Investments in these and similar projects, all of which are undertaken in York, Adams Franklin, and Lancaster Counties, are important to our ability to ensure a safe, adequate, and reliable supply of drinking water and to maintain proper handling and disposal of wastewater to our customers.

- While the Company has intentionally taken steps to control operating expenses, the costs of serving our customers at the level of service they deserve have gone up. The increase would allow the Company to recover costs for increased wages, benefits, chemicals, power, materials, and supplies and increased annual depreciation. Despite these increases, York Water remains one of the most efficient water utilities in the Nation, continuing to reduce or eliminate various expenses since its last rate case, including reduction in income taxes from the tax repair deductions. These reduced expenses are reflected in this rate filing.

- The increase would provide an opportunity for our 209-year-old Company to earn a fair return on the capital it has invested in infrastructure in our community and would assist the Company in maintaining a solid financial position.

Please refer to the Company's Direct Testimony and Exhibits for additional reasons for and support of the requested rate increase.

OPERATING REVENUES UNDER EXISTING AND PROPOSED RATES
FOR TWELVE MONTHS ENDING FEBRUARY 28, 2027

53.53 II Operating Revenues

D. Water and Wastewater Utilities

2 Prepare a summary of operating revenues for the test year, providing the following information:

a. For each classification of customers and for customers forfeited discounts and penalties and miscellaneous water/wastewater revenues:

(i) Revenues.

(ii) Annualizing and normalizing adjustments to arrive at adjusted operating revenues for ratemaking.

(iii) Proposed increase in operating revenues.

(iv) Percent increase in operating revenues.

(v) Operating revenues under proposed rates.

RESPONSE Refer to pages 2 through 10.

REVENUE SUMMARY

	Total Company	Water	Wastewater
Present Rate Revenues (1)	$ 79,067,144	$70,396,610	$ 8,670,534
Additional Revenue Requirement (2)	$ 24,169,485	$20,311,978	$ 3,857,507
% Increase		28.9%	44.5%
Wastewater Revenue Allocation (3)	$ -	$ -	$ -
Proposed Revenues	$103,236,629	$90,708,588	$12,528,041
Revenue Increase	$ 24,169,485	$20,311,978	$ 3,857,507
% Increase	30.6%	28.9%	44.5%

(1) As presented on Exhibit Nos. FII-2 page 9 and FII-2W page 2. Includes DSIC and STAS revenues for water.

(2) As calculated on Exhibit Nos. FV-1 page 6 and FV-1W page 6.

(3) The wastewater allocation is the amount of the wastewater revenue requirement that the Company is proposing to be consolidated with the water revenue requirement to derive the proposed water and wastewater rates in this case.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
OPERATING REVENUE ADJUSTMENTS UNDER EXISTING RATES

ACCOUNT (1)	EXPLANATION (2)		ADJUST-MENT INCREASE DECREASE (3)
	To project operating revenues for estimated metered residential customers connected and disconnected during the future test year ending December 31, 2025.		
	One Year Average Metered Residential Customers Net Gain	326	
	Average Annual Revenue per Average Metered Residential Customer	1,054.88	
	Annualized Revenue Adjustment = Net Gain x Average Annual Revenue	343,891	
	(a) Portion of Adjustment Included in Twelve Months Ending December 31, 2025	171,945	
52200100	Metered Sales to Residential Customers		171,945

(a) The estimated average net gain of metered residential customers for the twelve months ending December 31, 2025 is presumed to occur evenly throughout the test year. Accordingly, one-half of the annualized revenue adjustment determined in this Exhibit is projected to occur during the twelve months ending December 31, 2025 and is carried forward to Exhibit No. FII-2W, page 3. The remainder of the annualized revenue adjustment is reflected on Exhibit No. FII-2-3W.

Section A: Wastewater Service Charge
Imposition of Charge: A wastewater service charge is hereby imposed upon the owner of each improved property which is connected to the wastewater system, whether such use is direct or indirect, and shall be payable as provided herein.

Wastewater Service Charge Payable by Owner of Improved Property Connected to Wastewater System:
The wastewater service charge shall be payable by the owner of each improved property connected to the wastewater system commencing with the earlier of (a) the date of actual physical connection of an improved property to the wastewater system, or (b) Forty-five (45) days from the date indicated on the notice to connect.

The wastewater service charge applicable to any improved property connected to the wastewater system shall be calculated, imposed, and collected on the basis of metered usage as indicated below where accurate usage information is available. Where accurate usage information is not available, one of the other methods set forth below may be utilized in the sole discretion of the Company:

Metered Rate Basis:
Where accurate metered usage data is available, the wastewater service charge for customers connected to the wastewater system will be determined as follows:

Fixed Customer Charge: $117.38 per month (includes the equivalent of one EDU of usage or 350 gallons per day applied to each monthly billing period, to be calculated as 350 times the number of days in the billing period); plus Consumption Charge: $22.947 per thousand gallons consumed in each month for the gallonage included in excess of the amount included in the fixed customer charge. (I) (I)

Calculation of Metered Consumption: Where the Customer purchases water from York Water Company, the Company will utilize York Water Company's metered consumption as the basis for its charges. If the Customer is not served by York Water Company or if the Customer expects that its wastewater usage will differ significantly from its water usage, an approved meter (or meters) shall be installed by the Customer as directed by the Company, to meter water and/or wastewater usage as required to implement the Schedule of Rates listed herein. The meter shall be installed and kept in service so that all usage is recorded. Upon discovery of a meter interruption, the Company will issue a billing adjustment to be determined by the Company as appropriate and in its sole discretion, except as otherwise ordered by the Commission.

(I) Indicates Increase

Greene, Hamilton, and Letterkenny Township Area CONTINUED

The number of EDU's applicable to educational and institutional establishments shall be computed on the highest monthly average daily attendance of pupils (plus faculty, administrators, and staff) for the twelve (12) months preceding the date of the applicable billing period. The owners of such facilities shall be responsible for continuously advising the Company, in writing, of the number of pupils, faculty, administrators and staff in attendance, as an average daily figure, and at any other time upon written request by the Company.

The number of EDU's applicable to retail stores, professional offices and other commercial establishments shall be computed on the basis of the average number of full and part-time employees (including the owner(s) or employer(s)) for the calendar quarter preceding the date of the quarter billing period. The owners of such facilities upon written request shall be responsible for advising the Company, in writing, of the number of employees.

To the extent that the use of any improved property is not adequately described above, the Company may use appropriate guidelines for determining domestic sanitary wastewater flows as promulgated by the Pennsylvania Department of Environmental Protection, at 25 Pa. Code §73.17. Sewage flows, from time to time.

If the use or classification of any improved property is proposed to be changed by the owner, the owner shall notify the Company, in writing, thirty (30) days before such change is to take place.

If the use or classification of any improved property changes, within a billing period**,** the Company will prorate the wastewater service charge. The appropriate credit or additional charge will appear on the statement for the next succeeding billing period.

Flat Rate Charges: The monthly wastewater service charges for connected industrial and commercial customers shall be $117.38 per EDU. The monthly wastewater service charge for connected residential customers shall be $68.06 per EDU. (I) (I)

Estimated Rate Basis: The wastewater service charge may be based upon the Company's estimate of potable water consumed or domestic sanitary wastewater or industrial wastes discharged by any improved property in accordance with the metered rate schedule provided herein.

Wastewater Service Charge by Owner of Multiple Use Improved Property: In the case of multiple use improved property sharing a common connection to the wastewater system or a common structure, each such classification of improved property shall pay a separate wastewater service charge, as though it were housed in a separate structure and had a direct and separate connection to the wastewater system, computed in accordance with the provisions of this Part.

(I) Indicates Increase

Shrewsbury and Springfield Township Area

Commercial and Industrial Customers

A metered rate (based on water consumption) as follows:

	Per Month	Rate	
Shrewsbury and Springfield Township Area	1st 10,500 Gals	$117.38	(I)
Over	10,500 Gals	$22.947 per 1,000 Gals.	(I)

Over	4,000 Gals	$11.70 per 1,000 Gals.	(I)

An unmetered rate as follows:

	Monthly Rate
Shrewsbury and Springfield Township Area	$83.33

(I) Indicates Increase

Shrewsbury and Springfield Township Area CONTINUED

Section A: Reservation Fee
All Customers will be charged a reservation fee of $10/gallon or $3,500/EDU (1 EDU = 350 gallons/day). The minimum reservation fee is one EDU. Reservation fees are customer contribution in aid of plant construction and provision of service and are assessed on a one-time basis at the time of capacity nomination. No service will be provided, or capacity reserved, until payment of the reservation fee has been made. Where the Company determines that the Customer is utilizing more capacity than nominated, the Customer will pay an additional reservation fee equal to the utilized capacity if such capacity is available. If no such capacity is available, the Customer will reduce its usage to the level nominated or determined to be available by the Company until such time as additional capacity becomes available.

Section B: Wastewater Service Charge
Imposition of Charge: A wastewater service charge is hereby imposed upon the owner of each reserved capacity EDU, for service rendered or available to be rendered, and upon the owner of each improved property which is connected to the wastewater system, whether such use is direct or indirect, and shall be payable as provided herein.

Wastewater Service Charge Payable by Owner of Reserved Capacity EDU(s) Not Connected To Wastewater System: The wastewater service charge shall be payable by the owner of each reserved capacity EDU beginning with the earlier of the date of payment of the reservation fee or forty-five (45) days from the date indicated on the notice of availability of wastewater collection, treatment and disposal service.
For reserved capacity EDUs not actually used in the discharge of domestic sanitary wastewater during such quarter, the wastewater service charge shall consist of a fixed charge per EDU reserved of $50 per quarter. Non-payment of such charge for 2 or more quarters shall result in loss of reserved capacity EDUs, or portion thereof, equal to the amount due and owing and customers shall be required to make such payment, plus interest at 1.5% per month, prior to connecting to the system, if such lost EDUs are not otherwise subscribed.

Wastewater Service Charge Payable by Owner of Improved Property Connected to Wastewater System:
The wastewater service charge shall be payable by the owner of each improved property connected to the wastewater system commencing with the earlier of (a) the date of actual physical connection of an improved property to the wastewater system, or (b) Forty-five (45) days from the date indicated on the notice to connect.

The wastewater service charge applicable to any improved property connected to the wastewater system shall be calculated, imposed, and collected on the basis of EDUs reserved and metered usage as indicated below where accurate usage information is available. Where accurate usage information is not available, one of the other methods set forth below may be utilized in the sole discretion of the Company:

Metered Rate Basis:
Where accurate metered usage data is available, the wastewater service charge for customers connected to the wastewater system will be determined as follows:

Fixed Customer Charge: $117.38 per month (includes the equivalent of one EDU of usage or 350 gallons per day applied to each quarterly billing period, to be calculated as 350 times the number of days in the billing period); plus (I)
Consumption Charge: $22.947 per thousand gallons consumed in each quarter for the gallonage included in excess of the amount included in the fixed customer charge. (I)

(I) Indicates Increase

West Donegal Township Area

Section A: Wastewater Service Charge
Imposition of Charge: A wastewater service charge is hereby imposed upon the owner of each improved property which is connected to the wastewater system, whether such use is direct or indirect, and shall be payable as provided herein.
Wastewater Service Charge Payable by Owner of Improved Property Connected to Wastewater System: The wastewater service charge shall be payable by the owner of each improved property connected to the wastewater system commencing with the earlier of (a) the date of actual physical connection of an improved property to the wastewater system, or (b) Forty-five (45) days from the date indicated on the notice to connect.

The wastewater service charge applicable to any improved property connected to the wastewater system shall be calculated, imposed, and collected on the basis of metered usage as indicated below where accurate usage information is available. Where accurate usage information is not available, one of the other methods set forth below may be utilized in the sole discretion of the Company:
Metered Rate Basis:
Where accurate metered usage data is available, the wastewater service charge for customers connected to the wastewater system will be determined as follows:

Customers will be charged at the rate of $22.947 per 1,000 gallons, subject to a minimum charge of $78.14 per month. (I)
Calculation of Metered Consumption: Where the Customer purchases water from York Water Company, the Company will utilize York Water Company's metered consumption as the basis for its charges. If the Customer is not served by York Water Company or if the Customer expects that its wastewater usage will differ significantly from its water usage, an approved meter (or meters) shall be installed by the Customer as directed by the Company, to meter water and/or wastewater usage as required to implement the Schedule of Rates listed herein. The meter shall be installed and kept in service so that all usage is recorded. Upon discovery of a meter interruption, the Company will issue a billing adjustment to be determined by the Company as appropriate and in its sole discretion, except as otherwise ordered by the Commission.
Estimated Rate Basis: The wastewater service charge may be based upon the Company's estimate of potable water consumed or domestic sanitary wastewater or industrial wastes discharged by any improved property in accordance with the metered rate schedule provided herein.

Wastewater Service Charge by Owner of Multiple Use Improved Property: In the case of multiple use improved property sharing a common connection to the wastewater system or a common structure, each such classification of improved property shall pay a separate wastewater service charge, as though it were housed in a separate structure and had a direct and separate connection to the wastewater system, computed in accordance with the provisions of this Part.

(I) Indicates Increase

PART I: STATE TAX ADJUSTMENT SURCHARGE (C)

In addition to the charges provided in this tariff, a surcharge of 0.00% will apply to all charges for service rendered on or after August 1, 2025. (I) (C)

The above surcharge will be recomputed, using the same elements prescribed by the Commission.

a. Whenever any of the tax rates used in the calculation of the surcharge are changed; and

b. Whenever the utility makes effective any increased or decreased rates.

The above recalculation will be submitted to the Commission within 10 days after the occurrence of the event or date which occasions such recomputation; and, if the recomputed surcharge is less than the one then in effect, the Company will, and if the recomputed surcharge is more than the one then in effect, the Company may, submit with such recomputation a tariff or supplement to reflect such recomputed surcharge, the effective date of which shall be 10 days after filing.

THE YORK WATER COMPANY
DATA REQUIREMENTS OF THE PENNSYLVANIA PUBLIC UTILITY COMMISSION
DEBT INTEREST UTILIZED FOR INCOME TAX CALCULATIONS

53.53 IV Taxes

D. Water and Wastewater Utilities

18 State the amount of debt interest utilized for income tax calculations, and details of debt interest computations, under each of the following rate case bases;

a. Actual test year.

b. Annualized test year-end.

c. Proposed test year-end.

Response: Debt interest expense utilized for the income tax calculation reflected on the Company's corporate books for the twelve months ended December 31, 2024 is actual debt expense incurred during that period.

Debt interest expense utilized for the income tax calculation on projected income for the twelve months ending December 31, 2025 shown on Exhibit No. FIV-17-1W is determined by reflecting the interest charges to ratepayers in the cost of capital determination (interest synchronization).

Rate base	49,847,442	x weighted debt cost rate of	2.06%
= interest expense utilized for income tax calculations of			1,027,888

Debt interest expense utilized for the income tax calculation on pro forma income for the twelve months ending December 31, 2025 shown on Exhibit No. FIV-17-5W is determined by reflecting the interest charges to ratepayers in the cost of capital determination (interest synchronization).

Rate base	49,847,442	x weighted debt cost rate of	2.06%
= interest expense utilized for income tax calculations of			1,027,888

Debt interest expense utilized for the income tax calculation on projected income for the twelve months ending February 28, 2027 shown on Exhibit No. FIV-17-7W is determined by reflecting the interest charges to ratepayers in the cost of capital determination (interest synchronization).

Rate base	54,685,381	x weighted debt cost rate of	2.06%
= interest expense utilized for income tax calculations of			1,127,650

Debt interest expense utilized for the income tax calculation on pro forma income for the twelve months ending February 28, 2027 shown on Exhibit No. FIV-17-10W is determined by reflecting the interest charges to ratepayers in the cost of capital determination (interest synchronization).

Rate base	54,685,381	x weighted debt cost rate of	2.06%
= interest expense utilized for income tax calculations of			1,127,650

YORK WATER STATEMENT NO. 1

BEFORE THE

PENNSYLVANIA PUBLIC UTILITY COMMISSION

THE YORK WATER COMPANY

DIRECT TESTIMONY OF JOSEPH T. HAND

Q. State your name and business address.

A. Joseph T. Hand. My business address is: 130 East Market Street, York, Pennsylvania.

Q. By whom are you employed?

A. I am employed by The York Water Company ("York Water" or the "Company").

Q. State your present position with the Company.

A. I am President and Chief Executive Officer.

Q. How long have you been employed by the Company?

A. I have been employed by the Company since March 3, 2008. I served as Chief Operating Officer from March 2008 through February 2020.

Q. What is your educational background?

A. I have a Bachelor of Science degree in Civil Engineering from the University of Vermont, Burlington, VT and a Master's Degree in Business Administration from York College of Pennsylvania, York, Pennsylvania. I am also a graduate of the US Army's Command and General Staff College and Department of Defense's Defense Language Institute.

Q. Are you a member of any professional societies or trade associations?

A. Yes, I am currently a member of the American Water Works Association ("AWWA"), the Waterworks Operators Association of Pennsylvania and the National Association of Water Companies ("NAWC"). I currently serve on the Board of Directors of NAWC and the Pennsylvania Chapter of NAWC, serving twice as Chairman from 2013-2014 and 2021-2023. I am the Vice-Chair of the PA Section AWWA Water Utility Council and a member of the Small Water Systems Technical Assistance Center Board. I was an inaugural member and served one term on the PA Public Utility Commission's Damage Prevention Committee.

Q. What has been your other business experience?

A. In my last assignment on Active Duty with the United States Army, I served as the Deputy Commander and Deputy District Engineer for the Baltimore District, US Army Corps of Engineers ("USACE"). Immediately prior to joining the Company, I was Chief, Navigation Branch, Baltimore District, USACE. I served on Active Duty as an Engineer Officer in the United States Army Corps of Engineers for approximately 22 years.

Q. Have you previously testified before a regulatory commission?

A. Yes, I testified in the Company's last four base rate proceedings.

Q. Will you list the exhibits you are sponsoring in this proceeding?

A. I am sponsoring the following exhibits prepared by me or under my direction and supervision:

Exhibit Nos. HXII-1 and HXII-2 relating to quality of service;

Exhibit Nos. HXI-5 and FXI-5 relating to unaccounted for water;

Exhibit Nos. HXI-6 and FXI-6 relating to corporate history;

Exhibit Nos. HIII-22 and FIII-22 relating to the incentive program; and

Exhibit Nos. HV-12, FV-12, FV-12-1, FV-12-1W, FV-12-2, FV-12-2W, FV-12-3, FV-12-3W, FV-12-4, FV-12-4W, FV-12-5, FV-12-5W, FV-12-6, and FV-12-6W relating to plant additions and retirements.

Q. Please explain the history of the Company.

A. As explained in Exhibit No. FXI-6, York Water is the oldest investor-owned public utility in the country, having been formed in 1816. The Company is engaged in the

business of furnishing water and wastewater service to nearly 80,000 customers pursuant to certificates of public convenience and necessity issued by the Commission. York Water provides direct water service in the City of York, in the Boroughs of East Prospect, Glen Rock, Hallam, Jacobus, Jefferson, Loganville, Manchester, Mount Wolf, New Freedom, New Salem, North York, Railroad, Seven Valleys, Shrewsbury, Spring Grove, West York, York Haven and Yorkana in York County, Pennsylvania, in the Townships of Codorus, Conewago, East Manchester, Hellam, Hopewell, Jackson, Lower Windsor, Manchester, Newberry, North Codorus, North Hopewell, Paradise, Shrewsbury, Springettsbury, Springfield, Spring Garden, Washington, West Manchester, West Manheim, Windsor and York in York County, Pennsylvania, in the Boroughs of Abbottstown and Carroll Valley in Adams County, Pennsylvania, in the Townships of Berwick, Cumberland, Oxford, Hamilton, Reading, Mount Pleasant, Union, and Straban in Adams County, Pennsylvania, in the Townships of Greene, Hamilton, and Letterkenny in Franklin County, Pennsylvania, and in the Townships of Salisbury and West Donegal in Lancaster County, Pennsylvania. The Company also provides wholesale service to the Boroughs of Glen Rock, New Freedom, and Stewartstown and to Dover Township, all in York County.

In addition, York Water provides wastewater service in the Boroughs of East Prospect, Felton, Jacobus, West York, and York Haven in York County, Pennsylvania, in the Townships of East Manchester, Lower Windsor, Monaghan, Newberry, Springfield, Shrewsbury, Washington, and West Manheim in York County, Pennsylvania, in the Townships of Greene, Hamilton, and Letterkenny in

Franklin County, Pennsylvania, in the Township of Straban in Adams County, Pennsylvania, and in the Township of West Donegal in Lancaster County, Pennsylvania.

Q. What are the goals of the Company?

A. York Water is committed to providing its customers with safe, dependable, high-quality drinking water and wastewater services that meet or exceed their expectations and to providing these services at a cost to customers that allows the Company to provide a reasonable rate of return on investment to its shareholders. The Company employs 127 highly skilled and dedicated employees who are focused on providing optimal water and wastewater service to York Water's customers and communities every day. Their dedication is foundational to York Water's success, because satisfied customers drive business success and motivate the Company's team to perform at the highest levels, resulting in growth opportunities and increasing net revenue. York Water's Customer Service and our Operations teams lead the way, but the whole company is committed to superior customer service.

Q. Has the Company accomplished these goals?

A. Yes. As a great example of the Company's success in achieving its goals, not a single formal customer complaint was filed against York Water in all of 2024. To achieve such an impressive result, the team completed over 11,600 in-person transactions and received over 75,000 in-bound phone calls, of which 96% were

addressed in 30 seconds or less. These two metrics reinforce the Company's confidence that York Water is providing its customers with the service and value proposition that they both expect and deserve.

Other successes can be seen in the results of the Company's 2024 customer satisfaction survey. Specifically, in 2024, the Company partnered with a professional survey company to conduct a customer satisfaction survey. 2024 was the appropriate year in which to conduct the survey to gather representational survey results. The survey revealed that 89% of those customers surveyed are satisfied York Water utility customers. 89% of those customers surveyed also stated that the Company's redesigned, customer-facing website (December 2023) – www.yorkwater.com – is easy to use. These findings, along with many other metrics in that survey, will help inform the Company's decision-making and business processes as York Water continues to focus on creating a positive customer experience.

Further, while the Customer Service team is often the face or voice of York Water, it is the Operations team that helps ensure that the Company provides high quality water ("That good York water") and wastewater services throughout its service territories. This team is essential, as they oversee the design, construction, operation, and maintenance of the Company's resilient, reliable, and redundant systems for peak performance and actualized reliability. Although there are several examples that demonstrate the Operations Team's professional acumen, one specific example is the team's planning, preparation, execution, and commitment to ensuring customers' drinking water needs are met even if the face

of natural or man-made environmental challenges. For example, the PA Department of Environmental Protection ("DEP") Drought Task Force has had a drought watch in effect for the Company's entire service territory across four counties for more than a year. With the Lake Williams Dam out of service for its spillway rehabilitation during all of calendar year 2023, the Company was restricted to just one of its two reservoirs in service. Recognizing the importance of historic, spring rainfall trends, the Operations Team managed the construction contract and expedited construction so that the rehabilitated dam could impound water in January 2024 to take advantage of winter thaw, runoff, and spring showers. Working through the December 2023 holidays and January 2024, the Company received approval from PA DEP Dam Safety to refill the reservoir in accordance with a deliberate, engineering-informed plan. In February 2024, York Water began refilling the once empty Lake Williams Reservoir following the nearly two-year rehabilitation of the 100+ year old Lake Williams Dam. Following a precisely monitored refilling plan, and with nearly 8" of rain in the months of March and April, the team completed the slow and methodical refilling of the 1.1-billion-gallon storage reservoir by May 2024. With below average rainfall in May, June, and July 2024 (a paltry 1.21" in July) and above average ambient temperatures, the Company's attention to historic trends and fastidious focus on managing its water resources proved their worth.

Fast forward to spring of 2025 and the drought watch continues for much of Pennsylvania, with a 27" precipitation deficit from January 2023 through April 2025. Through York Water's focus on its water resources, the customers of York

Water have a lower exposure to drought/supply than customers of other water providers in the surrounding four counties. York Water's strategic planning and keen focus on weather trends going back to 1888, results in precisely managed water resources. Despite 27 months of extended drought, the Company effectively captured every drop of water across its watershed, resulting in two full reservoirs in York County and one full reservoir in Franklin County. York Water's customers have a resilient supply of safe, dependable, high-quality drinking water where many of the surrounding providers are or will be placing their customers on water use warnings and restrictions as we enter into the summer months.

Moreover, the Company's rates are among the lowest of the Class A water utilities regulated by the Commission, as shown on Exhibit No. HXII-1. The Company has provided a comparison of the annual average base rate charges under existing rates for the Company and presently effective base rate charges of Veolia Water Pennsylvania, Columbia Water Company, Pennsylvania-American Water Company, and Aqua Pennsylvania, Inc. The annual average residential base rates are based on monthly consumption of 3,900 gallons (York Water's average residential usage). Average annual residential base rate charges for the Company are $625. The average annual residential base rate charges for Veolia Water Pennsylvania, Columbia Water Company, Pennsylvania-American Water Company, and Aqua Pennsylvania, Inc. are $747, $628, $1,104, and $1,097, respectively. Thus, the Company's annual average residential base rate charges are more affordable than the Pennsylvania Class A water utilities that serve the majority of Pennsylvania customers.

One of the primary drivers of why the Company's rates are so low is financial and operational efficiencies. The Company maintains lower rates by managing expenses across all business functions. Another reason York Water's rates are low compared to peers is the Company's disciplined acquisition practice. Following acquisition and certification from the Commission, the Company prioritizes and invests prudently in capital improvements and operation and maintenance expenditures to help ensure that the Company's newest customers receive the same level of reliable services at the same reasonable cost to customers.

Lastly, the Company's effectiveness in meeting its goals can be seen in the most recent Management and Operations Audit performed by the Commission's Bureau of Audits. After an extensive, in-depth audit from November 10, 2020 through March 5, 2021 of the Company's Executive Management and Organizational Structure, Corporate Governance, Financial Management, Water and Wastewater Operations, Emergency Preparedness, Purchasing and Materials Management, Customer Services, and Human Resources and Diversity, the final report noted only seven areas for minor improvement and was unable to assign any monetary savings that would accrue from the Company's implementation plan.

Q. Does the Company have a program to assist low-income customers?

A. Yes. While the Company's rates are among the most affordable rates of the Class A water utilities regulated by the Commission, York Water recognizes that not all customers can easily pay a monthly water bill. To assist those payment troubled customers and those customers experiencing a significant change in financial

capacity, the Company established a Pilot Low Income Customer Assistance Program in 2005. This program grew to serve a high of 68 customers in 2008 and is no longer known as a "pilot" program.

The Company's Low Income Customer Assistance Program is designed to aid low-income, payment troubled customers in reducing water consumption and arrearage amounts. The Company's Low Income Customer Assistance Program includes the following features: (1) it is targeted to low income payment troubled customers (150% of federal poverty level); (2) it includes a water usage reduction component with plumbing repairs and the installation of water conservation devices; (3) it includes a requirement of monthly payments to reduce arrearages; and (4) customers earn immediate forgiveness of up to $120 by meeting payment obligations.

The Company's Low Income Customer Assistance Program was expanded as part of the Settlement approved by the Commission Order entered January 17, 2019, in York Water's 2018 base rate case at Docket Nos. R-2018-3000019, *et al*. Under that Settlement, the Low Income Customer Assistance Program's annual budget was expanded to $20,000 on a pilot basis until the Company's next base rate case. Subsequently, under the Settlement approved by Commission Order entered January 12, 2023, in York Water's 2022 base rate case at Docket Nos. R-2022-3031340, the annual budget was expanded to $40,000. The program has been a success in helping low-income customers pay their water and wastewater bills to avoid shut off, especially during and following the COVID-19 pandemic. The Company is requesting further expansion of the funding level to $60,000 annually

because: (1) the $40,000 annual budget has been fully expended each year; and (2) the Company's customer base and service territory continues to grow.

Furthermore, under the Settlement approved in York Water's 2022 base rate case, the Company was required to propose a pilot low-income bill discount program for residential water and wastewater service in its next base rate proceeding. As such, York Water proposes that up to 200 low-income customers not be billed the fixed residential customer charge, which would save those customers at least $200 each year. The low-income customers can reduce the consumption-based portion of their bill through conservation, so the focus of the pilot low-income bill discount program is on the fixed charge.

Q. How does the Company recover the costs associated with the Low Income Customer Assistance Program?

A. Because the program helps residential customers only, the Company includes the costs associated with the program, including plumbing repairs and bad debt forgiveness, in the cost of service for residential customers.

Q. Has the Company taken any other measures to assist low-income, payment-troubled customers?

A. Yes. York Water does not require a deposit as a condition of service, nor does the Company propose implementing such a policy at this time. York Water also adheres to the applicable rules and regulations governing termination of service.

Further, the Company will negotiate second or subsequent payment agreements in good faith to help low-income customers pay down their balances in arrears.

Q. Is there any demonstration that customers view the Company's service favorably?

A. The Company's superior level of customer service can be demonstrated by reviewing the frequency of customer complaints filed with the Commission's Bureau of Consumer Services. Exhibit No. HXII-2, pages 1 through 6 provide a comparison of the Company's 2023, 2022, and 2021 residential complaint rates and justified residential complaint rates to the 2023, 2022, and 2021 residential complaint rates and justified residential complaint rates of Aqua Pennsylvania, Inc., Pennsylvania-American Water Company and the industry as a whole. The residential complaint rates and justified residential complaint rates for Aqua Pennsylvania, Inc., Pennsylvania-American Water Company, and the industry as a whole are published by the Commission's Bureau of Consumer Services. 2023 is the latest information available. York Water's 2023, 2022, and 2021 residential complaint rates and justified residential complaint rates are significantly lower than the residential complaint rates and justified residential complaint rates of Aqua Pennsylvania, Inc., Pennsylvania-American Water Company and the industry as a whole.

To maintain this exceptionally high level of customer satisfaction, the Company has a policy and procedures for responding and tracking customer inquiries and complaints. In particular, all customer inquiries are tracked for action taken prior to being closed. If an inquiry requires action by someone outside the

customer service area, a customer work order will be created to track the activity until completion. Additionally, the President and Chief Executive Officer is copied on all customer inquiries. The VP of Customer Service also monitors the activity of all inquiries to determine that the customer has received satisfaction or a satisfactory response to the customer's concern. Moreover, all inquiries requiring some action on the part of the Company are logged into the Company's customer information system as part of the customer history file.

York Water also conducts Customer Attitude Surveys to measure the level of its customers' satisfaction and to anticipate and respond to changes in its customers' expectations. The Company has conducted independent Customer Attitude Surveys in 1989, 1992, 1996, 2000, 2004, 2009, 2015, 2020, and 2024. The surveys measured customer satisfaction as it relates to water quality and service. The customer opinions of both quality and service were uniformly excellent. I have previously discussed the results of the most recent survey.

In sum, the data demonstrates that the Company, due to its efforts, delivers to its customers' exceptional customer service and exceptional value.

Q. Does the Company promote the continuation of superior and affordable service to its customers in other ways?

A. Yes. To help York Water continue providing superior and affordable service, the Company established a Cash Incentive Plan approved by the Company's Compensation and Human Capital Committee and Board of Directors on January 26, 2003. The Company's Cash Incentive Plan is designed to motivate and reward

participants who provide superior service, contribute to the achievement of Company goals, and promote the creation of value for customers. The Company establishes a number of performance objectives for the calendar year, each of which provides a direct benefit to its customers. The Company's Cash Incentive Plan also provides for a business criterion upon which annual incentive awards are conditioned. The business criterion is not a performance objective and is not the objective for the incentive plan. However, the business criterion is established to ensure that cash incentives are paid only when the Company's financial profile warrants such a payout.

In addition, the Company established a Long-Term Incentive Plan approved by the Company's stockholders on May 2, 2016, to help York Water continue providing superior and affordable service. The Company's Long-Term Incentive Plan is designed to advance the long-term success of the Company by providing the incentive of long-term stock-based awards to officers, directors, and key employees. The Long-Term Incentive Plan helps ensure that the compensation practices of the Company are competitive in the industry and helps assist with the attraction and retention of directors and key employees that are vital to providing superior and affordable service to York Water's customers.

Q. Is the Company making substantial expenditures to provide for the water supply and wastewater service needs of its customers?

A. Yes. For the Company to continue providing its high-quality water service and exceptional customer service, it is necessary to invest in replacements,

improvements, and additions to the Company's facilities. As explained in Exhibit Nos. FV-12-1, FV-12-2, FV-12-4 and FV-12-5, York Water has projected to place in service $41,708,860 in new or replacement facilities during 2025 and $44,606,360 in 2026 and the first two months of 2027. The Company's projection of new facilities includes: (1) standpipe, booster station, and pumping equipment upgrades; (2) improvements to the Company's water treatment facilities that will make them more efficient; (3) the replacement or relining of aging mains; and (4) the replacement of other infrastructure. Projected additions also include the cost of new services, hydrants, and mains resulting from organic growth within York Water's service territory as well as upgraded meter reading equipment and electronics to make the Company's operations more efficient.

For the Company to continue providing its high-quality wastewater service, it is necessary to invest in replacements, improvements, and additions to the Company's facilities. As explained in Exhibit Nos. FV-12-1W, FV-12-2W, FV-12-4W and FV-12-5W, York Water has projected to place in service $6,581,359 in new or replacement facilities during 2025 and $6,418,667 in 2026 and the first two months of 2027. The Company's projection of new facilities includes improvements to the Company's wastewater treatment facilities that will make them more efficient as well as the replacement and rehabilitation of aging mains, manholes, and other infrastructure. Projected additions also include the cost of upgraded equipment and electronics to make the Company's operations more efficient.

Q. Has the Company also projected retirements and removed them from rate base?

A. Yes. As shown in Exhibit Nos. FV-12-3 and FV-12-6, the Company plans to retire approximately $3,197,285 from utility plant in service during 2025 and $13,774,015 during 2026 and the first two months of 2027. As shown in Exhibit Nos. FV-12-3W and FV-12-6W, the Company plans to retire approximately $39,357 from wastewater utility plant in service during 2025 and $27,575 during 2026.

Q. How is the Company financing its capital requirements?

A. The Company is financing its capital requirements through internally generated funds, proceeds from the issuance of common stock under its dividend reinvestment and direct stock purchase plan and employee stock purchase plans, customer advances, issuances of equity and long-term debt, and temporary borrowings under its lines of credit.

In addition, I note that the Company has implemented a variety of financing methods in the Company's efforts to produce interest cost savings for its customers. The Company's long-term goal for permanent capital is to maintain a capital structure between 50% and 55% equity, which will assist the Company in maintaining an investment grade credit rating that will allow the Company to obtain financing at the lowest cost possible which benefits our customers.

Q. Can you describe the Company's recent acquisition activity?

A. The following is a summary of York Water's recent acquisition activity. York Water supports the Commission's objectives of promoting regionalization and strengthening water and wastewater system viability. These acquisitions will improve the overall capability of the Commonwealth's water and wastewater industry, maintain and improve the quality of water and wastewater service to customers, advance the communities' economic development, and protect the environment.

Country View Manor (Water purchase)

On August 11, 2022, the Company completed the acquisition of the water assets of Country View Manor Community, LLC ("CVM") in York County, Pennsylvania. The Company began operating the existing water facilities on August 15, 2022. CVM served approximately 50 water customers.

With a change in community ownership, the new owner did not have the expertise or wish to continue to provide water service to its residents due to increasing costs and the challenges of meeting regulatory oversight and reporting requirements. CVM determined that it was in the best interests of its current customers to sell its water facilities to a company that has sufficient water operations and maintenance experience to meet the water demands of the public and has more experience dealing with utility service and regulatory requirements associated with providing such service. CVM concluded that its investment in maintaining the water facilities in the future would be insufficient to provide safe and reliable water service.

The Company acquired CVM's source of supply and its water treatment and distribution system, including all the physical plant, property, and equipment. In the process of conducting its due diligence, the Company noted elevated arsenic levels that were close to but had not exceeded the Maximum Contaminant Level ("MCL"). Following acquisition and certification by the Commission, the Company conducted initial baseline sampling and identified arsenic contamination in the wells above the MCL. The Company notified all customers and quickly designed, permitted, and installed a dual arsenic filtration system. The Company also identified and repaired a significant leak that had been ongoing prior to acquisition. The Company improved the system by installing meters and an automated meter reading system, so customers would pay for their own usage. The Company also installed Supervisory Control and Data Acquisition ("SCADA") equipment along with backup power generation to the well house. Prior to the Company's acquisition and priority investment in reliability, the booster pumps were connected to a single source of power and were subject frequent power outages resulting in loss of water supply to residents.

On March 9, 2023, the Company submitted to the Commission an original cost plant-in-service valuation of the CVM water system. The Company paid approximately the depreciated original cost of the acquired system. York Water has included in rate base the depreciated original cost of the acquired system. No amortization of pass-through of the difference between the acquisition cost and the depreciated original cost is appropriate because this acquisition involves a matter of substantial public interest.

County View Manor (Wastewater purchase)

On August 11, 2022, the Company completed the acquisition of the wastewater assets of Country View Manor Community, LLC ("CVM") in York County, Pennsylvania. The Company began operating the existing wastewater collection and treatment facilities on August 15, 2022. CVM served approximately 50 wastewater customers.

As with the water system, with a change in community ownership, the new owner did not have the expertise or wish to continue to provide wastewater service to its residents due to increasing costs and the challenges of meeting regulatory oversight and reporting requirements. CVM determined that it was in the best interests of its current customers to sell its wastewater collection and treatment system to a company that has sufficient wastewater operations and maintenance experience to meet the wastewater demands of the public and has more experience dealing with utility service and regulatory requirements associated with providing such service. CVM concluded that its investment in maintaining the collection and treatment system in the future would be insufficient to provide safe and reliable wastewater collection and treatment services.

The Company acquired CVM's wastewater collection and treatment system, including all the physical plant, property, and equipment. Upon taking over the CVM wastewater collection and treatment system, the Company installed SCADA equipment and backup power generation to improve the reliability of service. During the diligence process, the Company noted safety concerns at the

treatment plant that would expose a sole operator to a dangerous fall hazard. Most of the necessary safety grating above and across the tankage was missing or inadequately supported. Additionally, the Company determined that the critically important comminutor was inoperable, there were no spare parts, motors, or blowers, the exhaust fan did not work, there was an air leak in the final aeration tank, and most alarmingly, the sewer lateral connecting the treatment plant to the collection system was separated and seeping raw sewage. All these deficiencies have been rectified by York Water. To reduce inflow and infiltration ("I&I"), the Company will regrade the driveway to allow excessive rain and runoff to flow away from the plant and not into the equalization tank, which was jeopardizing the plant's hydraulic capacity.

On March 9, 2023, the Company submitted to the Commission an original cost plant-in-service valuation of the CVM wastewater system. The Company paid less than depreciated original cost of the acquired system. York Water has included in rate base the depreciated original cost of the acquired system. No amortization of pass-through of the difference between the acquisition cost and the depreciated original cost is appropriate because this acquisition involves a matter of substantial public interest.

LIDA/FCGA (Water purchase)

On August 25, 2022, the Company completed the acquisition of the water assets of the Letterkenny Industrial Development Authority and Franklin County General Authority ("LIDA/FCGA") in Franklin County, Pennsylvania. The Company

began operating the existing water facilities on August 29, 2022. LIDA/FCGA served approximately 90 water customers, including the Letterkenny Army Depot, a nationally strategic logistics center.

LIDA/FCGA was formed in response to the 2005 Base Realignment and Closure Act ("BRAC"), with the sole purpose of realigning facilities in accordance with BRAC directives. LIDA/FCGA did not wish to continue to provide water service to its residents due to increasing costs and the challenges of meeting regulatory oversight and reporting requirements. LIDA/FCGA did not have the expertise to provide planning support to the military commands operating on Letterkenny Army Depot, nor support the long-term strategic direction of the installation. LIDA/FCGA determined that it was in the best interests of its current customers to sell its water facilities to a company that has sufficient water operations and maintenance experience to meet the water demands of the public and has more experience dealing with planning and projecting utility service and the regulatory requirements associated with providing such service. LIDA/FCGA concluded that its investment in maintaining the water facilities in the future would be insufficient to provide safe and reliable water service.

The Company acquired the LIDA/FCGA water treatment and distribution system, including all the physical, property, and equipment. Prior to acquisition, the most recent filter plant performance evaluation identified 24 deficiencies, including several that had been repeated through multiple inspections without change or improvement. Upon taking over the LIDA/FCGA water facilities, the Company installed monitoring equipment and backup power generation.

LIDA/FCGA was willing to accept the risk of power outage by filling its one finished water storage tank and allowing the system to ride on gravity if the system lost power. In York Water's assessment, this created excessive and unallowable risk in the event of a power outage. After several months of investigation in accordance with the Company's leak detection program, the Company identified a significant leak in the floor of one of the finished water basins. Without proper controls, LIDA/FCGA had no way to monitor the water supply system. Once York Water installed metering diagnostics throughout the treatment and collection network, the Company could quantify that over 100,000 gallons per day were leaking from the finished water basin. The Company replaced the failed valves, isolated the basin, and then repaired the significant leak that had been ongoing well prior to the acquisition. As a result, unaccounted for water has been reduced by nearly 15%.

Also, in reviewing historic reports and logs, the Company determined that the previous operator was not properly reporting monthly usage data to the DEP. Reporting accuracy is critical to both the Company and the DEP and has been improved significantly. While reviewing staffing logs and reports the Company also determined that the previous owner had not properly staffed the facility to meet drinking water regulations, nor had the contract certified operators completed the necessary training.

In addition, public fire protection is a priority on military installations, and even more so at Letterkenny Army Depot because it is a national munitions center. As a federal installation that did not charge for fire hydrants, the public fire

protection network had ballooned to 327 fire hydrants. The Company inspected all 327 fire hydrants to verify they are in proper working order and incorporated them into the Company's hydraulic model to ensure they can be relied upon if needed. Following inspection and modelling, the Company determined 48 of the hydrants, or roughly 15%, were inoperable or were hydraulically obsolete. The Company tagged the hydrants out of service and isolated them from the distribution system, thereby improving overall system capacity.

Further, during the diligence process prior to closing, the Company investigated each commercial and industrial connection. Because Letterkenny Army Depot was a military installation and not subject to local ordinances, none of the domestic water lines had backflow protection, creating a cross-connection risk to the Company's customers. The Company notified all customers of mandatory backflow prevention and began the process to ensure compliance as a condition of service. Again, because Letterkenny Army Depot was a military installation and not subject to local ordinances, fire and domestic services were in a common, single line, without proper backflow protection, and without appropriate metering to account for usage. The Company inspected all fire and domestic service connections and notified all customers of mandatory separation of lines to ensure compliance as a condition of service.

Upon acquisition the Company also noted that there was no meter inspection or exchange policy for commercial and industrial meters. There were no records indicating when meters were inspected or replaced. All meters are now

included in the Company's meter replacement program and inspected in accordance with regulations based upon the size of the meter.

And, while the list of improvements is extensive, the Company paid particular attention to physical security of its important water treatment and storage assets. The Company has installed gates, fencing, monitors, cameras and controls at the primary water treatment facility to monitor and control access to this critical infrastructure.

On March 9, 2023, the Company submitted to the Commission an original cost plant-in-service valuation of the LIDA/FCGA water system. The Company paid less than the depreciated original cost of the acquired system. York Water has included in rate base the depreciated original cost of the acquired system. No amortization of pass-through of the difference between the acquisition cost and the depreciated original cost is appropriate because this acquisition involves a matter of substantial public interest.

LIDA/FCGA (Wastewater purchase)

On August 25, 2022, the Company completed the acquisition of the wastewater assets of LIDA/FCGA in Franklin County, Pennsylvania. The Company began operating the existing wastewater collection and treatment facilities on August 29, 2022. LIDA/FCGA served approximately 90 wastewater customers.

As with the water system, LIDA/FCGA was formed in response to the 2005 BRAC, with the sole purpose of realigning facilities in accordance with BRAC directives. LIDA/FCGA did not wish to continue providing wastewater

service to its residents due to increasing costs and the challenges of meeting regulatory oversight and reporting requirements. LIDA/FCGA did not have the expertise to provide planning support to the military commands operating on Letterkenny Army Depot, nor support the long-term strategic direction of the installation. LIDA/FCGA determined that it was in the best interests of its current customers to sell its wastewater collection and treatment facilities to a company that has sufficient wastewater operations and maintenance experience to meet the wastewater demands of the public and has more experience dealing with planning and projecting utility service and the regulatory requirements associated with providing such service. LIDA/FCGA concluded that its investment in maintaining the wastewater facilities in the future would be insufficient to provide safe and reliable wastewater service.

The Company acquired LIDA/FCGA's wastewater collection and treatment system, including all the physical plant, property, and equipment. Upon taking over the LIDA/FCGA's wastewater collection and treatment system, the Company installed monitoring equipment and backup power generation to improve the reliability of service. LIDA/FCGA was willing to accept the risk of power outage by allowing its tanks to serve as buffers and storing untreated waste until power would return. In York Water's assessment, this created an excessive and unallowable risk of an overflow or illegal discharge in the event of a power outage. Regular, ongoing maintenance and replacement of infrastructure for the collection system was not being done. And, while the list of improvements is extensive, the Company paid particular attention to the physical security of its important

wastewater treatment assets. The Company has installed monitors, cameras and controls at the primary wastewater treatment facility to monitor and control access to this critical infrastructure.

On March 9, 2023, the Company submitted to the Commission an original cost plant-in-service valuation of the LIDA/FCGA wastewater system. The Company paid less than the depreciated original cost of the acquired system. York Water has included in rate base the depreciated original cost of the acquired system. No amortization of pass-through of the difference between the acquisition cost and the depreciated original cost is appropriate because this acquisition involves a matter of substantial public interest.

Albright Trailer Park (Water purchase)

On October 28, 2022, the Company completed the acquisition of the water assets of Albright Trailer Park of R.T. Barclay, Inc. ("Albright") in York County, Pennsylvania. The Company began operating the existing water facilities on October 31, 2022. Albright served approximately 60 water customers.

Albright did not wish to continue to provide water service to its residents due to increasing costs and the challenges of meeting regulatory oversight and reporting requirements. Prior to the acquisition, Albright was served by York Water through a single point connection. The water distribution system that extended from the meter vault through the community was severely compromised, as demonstrated through extremely high water meter readings (average of 220 gallons per unit per day for a mobile home unit). Albright determined that it was in

the best interests of its current customers to sell its water facilities to a company that has sufficient water operations and maintenance experience to meet the water demands of the public and has more experience dealing with utility service and regulatory requirements associated with providing such service. Albright concluded that its investment in maintaining the water facilities in the future would be insufficient to provide safe and reliable water service and determined that it would be more beneficial for the owner to focus on managing the mobile home park and not managing a water system.

The Company acquired the Albright water distribution system including all the physical, property, and equipment. The Company improved the system by installing individual meters and an automated meter reading system so customers would pay for their own usage. The Company spent considerable effort with its leak detection team identifying and then making repairs to the leaking distribution system up to the point of connection with the customer.

On March 9, 2023, the Company submitted to the Commission an original cost plant-in-service valuation of the Albright water system. The Company paid less than the depreciated original cost of the acquired system. York Water has included in rate base the depreciated original cost of the acquired system. No amortization of pass-through of the difference between the acquisition cost and the depreciated original cost is appropriate because this acquisition involves a matter of substantial public interest.

Scott Water Company (Water purchase)

On November 5, 2022, the Company completed the acquisition of the water assets of Scott Water Company ("Scott") in Franklin County, Pennsylvania. The Company began operating the existing water facilities November 18, 2022. Scott served approximately 25 water customers.

Scott did not wish to continue providing water service to its residents due to increasing costs and the challenges of meeting regulatory oversight and reporting requirements. Scott developed the water system along with the development of the 25-lot subdivision and operated the system ever since. Scott determined that it was in the best interests of its current customers to sell its water facilities to a company that has sufficient water operations and maintenance experience to meet the water demands of the public and has more experience dealing with utility service and regulatory requirements associated with providing such service. Scott concluded that its investment in maintaining the water facilities in the future would be insufficient to provide safe and reliable water service.

The Company acquired Scott's water distribution system but none of its wells, well houses, water treatment building, water tank, or associated equipment. York Water abandoned the existing well, lessening the drain on the aquifer. York Water interconnected Scott's distribution system with the Company's existing and recently acquired LIDA system, providing the residents of Scott with a more reliable and plentiful supply of water. Of particular concern to DEP and Scott was a recent report from U.S. Environmental Protection Agency ("EPA") and the Letterkenny Army Depot, which described per- and polyfluoroalkyl substances

("PFAS") migration from the military installation down hydraulic gradient in the direction of the Scott Water System. Disconnecting the system from its groundwater source and connecting it to York Water's surface water source eliminated the risk of PFAS contamination and/or necessary remediation. In addition, York Water improved the system by installing meters and an automated meter reading system so customers would pay for their own usage.

On March 9, 2023, the Company submitted to the Commission an original cost plant-in-service valuation of the acquired water assets of Scott. As noted in the testimony of Mr. Coppersmith, the Company's net cost to acquire the Scott Water System assets was $22,659 greater than the original cost of the property less applicable accrued depreciation. See Exhibit No. FV-1-9.

The negotiations were conducted at arms-length. York Water was not affiliated with Scott. The actual purchase price was reasonable. The net premium is reasonable considering the projected annual revenues that the Company will receive from the customers added as a result of the acquisition. The additional revenue is reflected in this case.

Also, rates to pre-acquisition customers will not increase unreasonably due to this acquisition. Annual revenues from the added customers are sufficient to cover the incremental costs of the acquisition.

In accordance with Section 1327 of the Public Utility Code, the Company requests that amortization of the $22,659 positive acquisition adjustment be permitted over a 10-year period as part of rate base.

SYC WWTP, L.P. (Wastewater purchase)

On December 1, 2022, the Company completed the acquisition of the wastewater assets of SYC WWTP, L.P. and the Albright Trailer Park of R.T. Barclay ("SYC"), Inc. in York County, Pennsylvania. The Company began operating the existing wastewater collection and treatment facilities on December 5, 2022. SYC served approximately 90 wastewater customers.

SYC did not wish to continue providing wastewater service to its residents due to increasing costs and the challenges of meeting regulatory oversight and reporting requirements. SYC determined that it was in the best interests of its current customers to sell its wastewater collection and treatment system to a company that has sufficient wastewater operations and maintenance experience to meet the wastewater demands of the public and has more experience dealing with utility service and regulatory requirements associated with providing such service. SYC concluded that its investment in maintaining the collection and treatment system in the future would be insufficient to provide safe and reliable wastewater collection and treatment services.

The Company acquired SYC's wastewater collection and treatment system, including all the physical plant, property, and equipment. Upon taking over SYC's wastewater collection and treatment system, the Company installed SCADA equipment and backup power generation to improve the reliability of service. The Company replaced the entire ultraviolet treatment system as the acquired system was out of date and there were no parts available.

Also, upon acquisition, the Company determined that one of the blowers did not run as the internal parts were locked up and the motor on another blower needed to be replaced, the sampling meters were outdated and not within specifications, one of the wetland pumps failed, part of the tertiary filter membrane and one of the floats in the tertiary filter had to be replaced, the controls for the blowers needed to be replaced, the elevations were wrong on the wetland floats, the wetland pump station had an effluent pipe that was not properly sealed and allowing partially treated effluent overflow to flow into the creek, one of the treatment trains was completely out of service and in significant disrepair, the failed comminutor needed replacement, and the clarifier weirs needed replacement. In short, the treatment plant was in dire need of overhaul and investment.

The Company has made the necessary repairs to bring the system into compliance with all standards and regulations. With the treatment works aligned with the Company's operating principles, the Company is now focused on the wastewater collection system. Since the Company installed improved influent and discharge monitoring, York Water has noted a significant amount of I&I entering the treatment plant. The Company televised and mapped the entire collection system and has prioritized repairs to eliminate I&I to the plant.

On July 3, 2023, the Company submitted to the Commission an original cost plant-in-service valuation of SYC wastewater system. The Company paid less than the depreciated original cost of the acquired system. York Water has included in rate base the depreciated original cost of the acquired system. No amortization of pass-through of the difference between the acquisition cost and the depreciated

original cost is appropriate because this acquisition involves a matter of substantial public interest.

Conewago Industrial Park (Water purchase)

On October 12, 2023, the Company completed the acquisition of the water assets of Conewago Industrial Park Water and Sewer Company ("CIP") in Lancaster County, Pennsylvania. The Company began operating the existing water facilities October 16, 2023. CIP served approximately 30 water customers.

CIP did not wish to continue providing water service to its residents due to increasing costs and the challenges of meeting regulatory oversight and reporting requirements. CIP determined that it was in the best interests of its current customers to sell its water facilities to a company that has sufficient water operations and maintenance experience to meet the water demands of the public and has more experience dealing with utility service and regulatory requirements associated with providing such service. CIP concluded that its investment in maintaining the water facilities in the future would be insufficient to provide safe and reliable water service.

The Company acquired the CIP water treatment and distribution system including all the physical, property, and equipment. Upon taking over the CIP water facilities, the Company installed SCADA equipment. The Company installed a valve on the fire service at a property that did not have this necessary equipment before acquisition. The existing disinfectant system was inconsistent, and the Company was concerned with meeting DEP regulations. Accordingly,

York Water permitted, designed, and installed a new chlorine injection system. Further, although this is part of a water treatment process, there was no domestic water supply at the treatment plant for operators and employees of the Company, which compromised the health and safety of the workforce. Therefore, the Company installed an internal potable water system. The Company also installed new well flow meters and a new security camera system at the plant to monitor the physical characteristics of the plant and the physical security at the plant. And, finally, to create a more consistent pressure gradient for customers and reduce fluctuations, the Company installed a new educed pressure zone between the chemical mixing and the potable water system.

On February 5, 2024, the Company submitted to the Commission an original cost plant-in-service valuation of CIP water system. The Company paid less than the depreciated original cost of the acquired system. York Water has included in rate base the depreciated original cost of the acquired system. No amortization of pass-through of the difference between the acquisition cost and the depreciated original cost is appropriate because this acquisition involves a matter of substantial public interest.

Conewago Industrial Park (Wastewater purchase)

On October 12, 2023, the Company completed the acquisition of the wastewater assets of Conewago Industrial Park Water and Sewer Company ("CIP") in Lancaster County, Pennsylvania. The Company began operating the existing

wastewater collection and treatment facilities on October 16, 2023. CIP served approximately 30 wastewater customers.

CIP did not wish to continue providing wastewater service to its residents due to increasing costs and the challenges of meeting regulatory oversight and reporting requirements. CIP determined that it was in the best interests of its current customers to sell its wastewater collection and treatment system to a company that has sufficient wastewater operations and maintenance experience to meet the wastewater demands of the public and has more experience dealing with utility service and regulatory requirements associated with providing such service. CIP concluded that its investment in maintaining the collection and treatment system in the future would be insufficient to provide safe and reliable wastewater collection and treatment services.

The Company acquired CIP's wastewater collection and treatment system including all the physical plant, property, and equipment. Upon taking over the CIP wastewater collection and treatment system, the Company installed SCADA equipment. Further, upon acquisition, the Company determined that the chlorine injection pumps needed to be replaced, the heat trace around the outdoor piping did not work, one of the blowers was not operational, the post equalization tank pump needed to be replaced, the emergency backup generator needed significant repairs, the water lines in the building needed to be replaced, and the effluent flow meter needed to be replaced. The Company also installed a new security camera system.

On February 5, 2024, the Company submitted to the Commission an original cost plant-in-service valuation of CIP wastewater system. The Company

paid less than the depreciated original cost of the acquired system. York Water has included in rate base the depreciated original cost of the acquired system. No amortization of pass-through of the difference between the acquisition cost and the depreciated original cost is appropriate because this acquisition involves a matter of substantial public interest.

MESCO, Inc. (Wastewater purchase)

On January 31, 2024, the Company completed the acquisition of the wastewater assets of Memford Estates Sewerage Company, Inc., MESCO, Inc. ("MESCO") in York County, Pennsylvania. The Company began operating the existing collection and treatment facilities February 1, 2024. MESCO served approximately 180 residential wastewater customers.

MESCO was operating under a DEP Consent Order and Agreement ("COA") for numerous violations and deficiencies, including illegal discharges of waste, which included a civil penalty of nearly $16,000. MESCO did not have the resources, nor did it wish to continue providing wastewater service to its residents due to increasing costs and the challenges of meeting regulatory oversight and reporting requirements. MESCO determined that it was in the best interests of its current customers to sell its wastewater collection and treatment system to a company that has sufficient wastewater operations and maintenance experience to meet the wastewater demands of the public and has more experience dealing with utility service and regulatory requirements associated with providing such service. MESCO concluded that its investment in maintaining the collection and treatment

system in the future would be insufficient to provide safe and reliable wastewater collection and treatment services.

In May 2023, DEP entered into a COA with MESCO after many Notices of Violation ("NOVs") detailed significant deficiencies in operating a wastewater system. MESCO was ordered to take certain corrective actions and pay a civil penalty. The findings in the COA are indicative of MESCO's difficulties with operating its wastewater system.

The Company acquired MESCO's wastewater collection and treatment system, including all the physical plant, property, and equipment. Upon taking over the MESCO wastewater collection and treatment system, the Company became subject to satisfying the terms of the COA. The first step was to understand system parameters, operating parameters, and discharge results. Within 90 days of closing and certification from the Commission, the Company had installed SCADA equipment. The Company determined both equalization tank pumps needed to be replaced, both pumps in a lift station needed to be replaced, the effluent pipe from the clarifiers to the chlorine tablet feeder was broken underground and weeping untreated waste, the weirs needed to be replaced, the skimmers in the clarifiers did not work, the chlorine tablet feeder did not work, the bar screen needed to be replaced, the well did not supply proper water pressure, no sampler was present, and no sampling meters were present. The Company is working to remedy these issues.

On July 25, 2024, the Company submitted to the Commission an original cost plant-in-service valuation of MESCO wastewater system. The Company paid

less than the depreciated original cost of the acquired system. York Water has included in rate base the depreciated original cost of the acquired system. No amortization of pass-through of the difference between the acquisition cost and the depreciated original cost is appropriate because this acquisition involves a matter of substantial public interest.

Longstown Mobile Estates (Water purchase)

On February 21, 2024, the Company completed the acquisition of the water assets of Longstown Mobile Estates ("Longstown") in York County, Pennsylvania. The Company began operating the existing water facilities on February 26, 2024. Longstown served approximately 90 water customers.

Longstown did not wish to continue providing water service to its residents due to increasing costs and the challenges of meeting regulatory oversight and reporting requirements. Before the acquisition, Longstown was connected to York Water and was a York Water customer through a single point meter connection. Longstown determined that it was in the best interests of its current customers to sell its water facilities to a company that has sufficient water operations and maintenance experience to meet the water demands of the public and has more experience dealing with utility service and regulatory requirements associated with providing such service. Longstown concluded that its investment in maintaining the water facilities in the future would be insufficient to provide safe and reliable water service.

The Company acquired Longstown's water distribution system, including all the physical plant, property, and equipment. The Company improved the system by installing meters and an automated meter reading system, so customers would pay for their own usage. In addition, the Company installed additional valves throughout Longstown to improve the distribution system with an increased ability to isolate a smaller section of the community and inconvenience fewer customers if a leak were to occur in the future, minimizing disruption to the total system.

On July 25, 2024, the Company submitted to the Commission an original cost plant-in-service valuation of Longstown water system. The Company paid less than the depreciated original cost of the acquired system. York Water has included in rate base the depreciated original cost of the acquired system. No amortization of pass-through of the difference between the acquisition cost and the depreciated original cost is appropriate because this acquisition involves a matter of substantial public interest.

Houston Run (Water purchase)

On September 26, 2024, the Company completed the acquisition of the water assets of Houston Run Community Water System, LLC ("Houston Run") in Lancaster County, Pennsylvania. The Company began operating the existing water facilities October 16, 2023. Houston Run served approximately 15 commercial water customers.

Houston Run did not wish to continue providing water service to its residents due to increasing costs and the challenges of meeting regulatory oversight and reporting requirements. Houston Run determined that it was in the best interests of its current customers to sell its water facilities to a company that has sufficient water operations and maintenance experience to meet the water demands of the public and has more experience dealing with utility service and regulatory requirements associated with providing such service. Houston Run concluded that its investment in maintaining the water facilities in the future would be insufficient to provide safe and reliable water service.

The Company acquired the Houston Run water system, including all the physical, property, and equipment. Upon taking over the Houston Run water facilities, the Company installed SCADA equipment. The Company also determined that Houston Run was not complying with the 4-Log Treatment of viruses for an entry point served by a groundwater source. Without sufficient contact time and facilities in place, the first customer of the system was at risk of contamination. Within six months of closing, the Company designed, permitted, and constructed appropriate contact measures to meet Chapter 109 of the State Drinking Water Act. The Company also improved system reliability and redundancy by adding a backup booster pump, a new chemical mixing and dosing system, and a security and camera system.

On February 20, 2024, the Company submitted to the Commission an original cost plant-in-service valuation of the Houston Run water system. The Company paid less than the depreciated original cost of the acquired system. York

Water has included in rate base the depreciated original cost of the acquired system. No amortization of pass-through of the difference between the acquisition cost and the depreciated original cost is appropriate because this acquisition involves a matter of substantial public interest.

York Haven Sewer Authority (Wastewater purchase)

On December 5, 2024, the Company completed the acquisition of the wastewater assets of York Haven Sewer Authority ("York Haven") in York County, Pennsylvania. The Company began operating the existing collection and treatment facilities on December 9, 2024. York Haven served approximately 230 wastewater customers.

York Haven did not wish to continue providing wastewater service to its residents due to increasing costs and the challenges of meeting regulatory oversight and reporting requirements. York Haven was being managed by a volunteer board of directors who were struggling with adding new members to the board. York Haven determined that it was in the best interests of its current customers to sell its wastewater collection and treatment system to a professional company that has sufficient wastewater operations and maintenance experience to meet the wastewater demands of the public and has more experience dealing with utility service and regulatory requirements associated with providing such service. York Haven concluded that its investment in maintaining the collection and treatment system in the future would be insufficient to provide safe and reliable wastewater collection and treatment services.

The Company acquired York Haven's wastewater collection and treatment system, including all the physical plant, property, and equipment. Prior to acquiring the system, York Water was aware that the primary treatment for the sanitary discharge was gaseous chlorine. Even prior to closing, and prior to Commission certification, the Company designed and applied to the DEP for a permit to replace the less stable and more dangerous gaseous chlorine with a tablet. Within 60 days of closing, less than two reporting months to the DEP, the Company installed the new system. Also, because the Company installed improved SCADA programming, the Company determined that the effluent would not maintain proper dissolved oxygen ("DO"). To improve discharge DO and overall operating performance, the weirs need to be replaced, the pump rail systems needed to be replaced to allow for proper maintenance, and one of two blowers must be replaced. Equally important is the installation of a grinder pump on one of the influent lines to eliminate clogging, the evaluation and correct sizing for capacitors, and the installation of emergency power generation. The Company is working to remedy these issues.

On January 2, 2025, the Company submitted to the Commission an original cost plant-in-service valuation of the acquired assets of York Haven. As noted in the testimony of Mr. Coppersmith, the Company's net cost to acquire the York Haven wastewater assets was $127,481 greater than the original cost of the property less applicable accrued depreciation. See Exhibit No. FV-1-3W. The negotiations were conducted at arms-length. York Water was not affiliated with York Haven. The actual purchase price was reasonable. The net premium is

reasonable considering the projected annual revenues that the Company will receive from the customers added as a result of the acquisition. The additional revenue is reflected in this case.

Rates to pre-acquisition customers will not increase unreasonably due to this acquisition. Annual revenues from the added customers are sufficient to cover the incremental costs of the acquisition.

In accordance with Section 1327 of the Public Utility Code, the Company requests that amortization of the $127,481 positive acquisition adjustment be permitted over a 10-year period as part of rate base.

Pine Run Retirement Community (Water purchase)

On December 12, 2024, the Company completed the acquisition of the water assets of Pine Run Retirement Community ("Pine Run") in Adams County, Pennsylvania. The Company began operating the existing water facilities December 16, 2024. Pine Run served approximately 100 water customers.

Pine Run did not wish to continue providing water service to its residents due to increasing costs and the challenges of meeting regulatory oversight and reporting requirements. Pine Run was subject to a January 2023 NOV from the DEP for significant deficiencies, including elevated gamma radiation exceeding the MCL. Pine Run determined that it was in the best interests of its current customers to sell its water facilities to a company that has sufficient water operations and maintenance experience to meet the water demands of the public and has more experience dealing with utility service and regulatory requirements associated with

providing such service. Pine Run concluded that its investment in maintaining the water facilities in the future would be insufficient to provide safe and reliable water service.

The Company acquired Pine Run's water distribution system but none of its wells, well houses, water treatment building, water tank, or associated equipment. York Water abandoned the existing well, reducing the drain on the aquifer. York Water interconnected Pine Run's distribution system with its existing system, providing the residents of Pine Run with a more reliable and plentiful supply of water. By connecting to York Water's source and disconnecting the existing wells that were contaminated with gamma radiation at levels above the MCL limits, the Company provided the residents of Pine Run with safe drinking water. In addition, York Water improved the system by installing meters and an automated meter reading system so customers would pay for their own usage. The Company also installed an additional blowoff to help with water quality and installed a new vault and dual pressure-reducing valve system.

On December 20, 2024, the Company submitted to the Commission an original cost plant-in-service valuation of Pine Run water system. The Company paid less than the depreciated original cost of the acquired system. York Water has included in rate base the depreciated original cost of the acquired system. No amortization of pass-through of the difference between the acquisition cost and the depreciated original cost is appropriate because this acquisition involves a matter of substantial public interest.

Brookhaven Mobile Home Park (Water purchase)

On December 12, 2024, the Company completed the acquisition of the water assets of Brookhaven Mobile Home Park of ATG Properties, LLC ("Brookhaven") York County, Pennsylvania. The Company began operating the existing water facilities December 16, 2024. Brookhaven served approximately 150 water customers.

Brookhaven did not wish to continue providing water service to its residents due to increasing costs and the challenges of meeting regulatory oversight and reporting requirements. Brookhaven was subject to a November 2022 NOV from the DEP for significant deficiencies including elevated Tetrachloroethylene, also known as perchloroethylene ("PCE"), exceeding the MCL. Brookhaven determined that it was in the best interests of its current customers to sell its water facilities to a company that has sufficient water operations and maintenance experience to meet the water demands of the public and has more experience dealing with utility service and regulatory requirements associated with providing such service. Brookhaven concluded that its investment in maintaining the water facilities in the future would be insufficient to provide safe and reliable water service.

The Company acquired Brookhaven's water distribution system but none of its wells, well houses, water treatment building, water tank, or associated equipment. York Water abandoned the existing well, reducing the drain on the aquifer. York Water interconnected Brookhaven's distribution system with its existing system, providing the residents of Brookhaven with a more reliable and plentiful supply of water. By connecting to York Water's source and disconnecting

the existing wells that were contaminated with PCE levels above the MCL limits, the Company provided the residents of Brookhaven with safe drinking water. In addition, York Water improved the system by installing meters and an automated meter reading system so customers would pay for their own usage. The Company also installed additional valves throughout the system and installed a new vault and dual pressure reducing valve system.

On December 20, 2024, the Company submitted to the Commission an original cost plant-in-service valuation of Brookhaven system. The Company paid less than the depreciated original cost of the acquired system. York Water has included in rate base the depreciated original cost of the acquired system. No amortization of pass-through of the difference between the acquisition cost and the depreciated original cost is

Q. What are your conclusions about the overall effectiveness of the service provided by the Company?

A. York Water is superior in its overall effectiveness and provides exceptional service to its customers at exceptional value. The Commission should recognize such performance in arriving at the allowed rate of return on common equity.

Q. Does this conclude your direct testimony at this time?

A. Yes.

YORK WATER STATEMENT NO. 2

BEFORE THE

PENNSYLVANIA PUBLIC UTILITY COMMISSION

THE YORK WATER COMPANY

DIRECT TESTIMONY OF MATTHEW J. SCARPATO

Q. State your name and business address.

A. Matthew J. Scarpato. My business address is: 130 East Market Street, York, Pennsylvania.

Q. By whom are you employed?

A. I am employed by The York Water Company ("York Water" or the "Company").

Q. State your present position with the Company.

A. I am the Vice President of Operations.

Q. How long have you been employed by the Company?

A. I have been employed by the Company since July 5, 2023.

Q. What is your educational background?

A. I have a Bachelor of Science degree in Accounting from York College of Pennsylvania, York, Pennsylvania and a Master's Degree in Business Administration from the Pennsylvania State University, Harrisburg, York, Pennsylvania.

Q. Are you a member of any professional societies or trade associations?

A. Yes, I am currently a member of the American Water Works Association, the Waterworks Operators Association of Pennsylvania, and the National Association of Water Companies.

Q. What has been your other business experience?

A. From February 2021 through March 2023, I was the Chief Financial Officer and Vice President of Operations for Homestead Village Enhanced Senior Living in Lancaster, Pennsylvania. From May 2020 through February 2021, I was the Chief Financial Officer for Homestead Village Enhanced Senior Living in Lancaster, Pennsylvania. From December 2010 through May 2020, I was the Executive Vice President of Operations and Finance for York Jewish Community Center in York, Pennsylvania.

Q. Have you previously testified before a regulatory commission?

A. No, this is the first time I have presented testimony to the Pennsylvania Public Utility Commission ("Commission").

Q. Will you list the exhibits you are sponsoring in this proceeding?

A. I am sponsoring the following exhibits prepared by me or under my direction and supervision:

Exhibit Nos. HIX-1, HIX-2, HIX-3, HIX-4, HIX-5, HIX-6, HIX-7, FIX-1, FIX-2, FIX-3, FIX-4, FIX-5, FIX-6, and FIX-7 relating to quality of service.

Q. Please outline the operations of the Company.

A. The Company obtains the bulk of its water for its primary water distribution system in York and Adams County from the South and East Branches of the Codorus Creek. The East Branch flows into the Company's two impounding basins on its primary system known as Lake Williams and Lake Redman. The water is taken from the confluence of the east and south branches of the creek and pumped by the Company's Brillhart Pumping Station a distance of approximately two miles to the Company's Purification Plant. The Company also has an intake in the Susquehanna River. Water is pumped through a 15-mile transmission pipeline connecting the Susquehanna River to the Company's Lake Redman impounding reservoir. The Company has an alternate pumping station at Lake Redman, which allows the Company to pump directly from Lake Redman. Water from Lake Redman is pumped a distance of approximately three miles to the Company's Purification Plant.

The Company obtains its water supply for its system for Franklin County from the Roxbury Dam on the Conodoguinet Creek. The Company has a reservoir on this system.

The Company fully treats and filters the water that is supplied to the public. The Company was one of the first public water supply systems in the nation to treat and filter its water supply, having constructed its first filtration and treatment facilities in 1898. After treatment, water for its primary system is retained in two storage basins located at the Purification Plant for eventual distribution to the Company's service areas. In compliance with requirements of the Department of Environmental Protection ("DEP") related to finished water storage facilities, the two basins were covered in 1993 and 1994.

The Company has two separate types of service areas. One is referred to as the "Gravity System." In the "Gravity System," water flows to customers from the Purification Plant without the use of booster pumps. The second service area is referred to as the "Repumped System," for which booster pumps are used to provide necessary water pressure and flow. All booster stations are equipped with at least two pumps and backup power generation to safeguard water service in the event of mechanical or electrical failure.

The Company has thirty-nine standpipes, two finished water reservoirs, and thirty-four booster stations located throughout its service territory, which provide emergency supplies and water pressure.

In addition to the water assets described above, the Company owns and operates seven groundwater sources, one in the Borough of Carroll Valley, Adams County, PA, two in Cumberland Township, Adams County, PA, one in Straban Township, Adams County, PA, one in Washington Township, York County, PA, one in West Donegal Township, Lancaster County, PA, and one in Salisbury Township, Lancaster County, PA. These water supply systems are not connected to the Company's primary water treatment plant and have their own water treatment facilities.

The Company owns and operates eleven wastewater collection systems and treatment facilities, one in East Manchester Township, York County, PA, one in the Borough of East Prospect and Lower Windsor Township, York County, PA, one in Felton Borough, York County, PA, two in Letterkenny Township, Franklin County, PA, one in Straban Township, Adams County, PA, one in Washington Township, York County, PA, one in Shrewsbury Township, York, PA, one in Mount Joy Township, Lancaster County, PA, one in Monaghan Township, York County, PA, and one in the Borough of York Haven, York County, PA. The Company owns and operates three wastewater collection systems, one in West York Borough, York County, PA with wastewater treatment provided by Pennsylvania-American Water

Company, one in Jacobus Borough, York County, PA, with wastewater treatment provided by Springfield Township York County Sewer Authority, and one in West Manheim Township, York County, PA, with wastewater treatment provided by Penn Township.

Q. What measures has the Company taken to ensure the safety and availability of water in the event of an emergency?

A. The Company has a long-standing Emergency Response Plan for drinking water contamination incidents prepared in accordance with the regulatory requirements of DEP and the guidelines established by the United States Environmental Protection Agency ("EPA"). The Emergency Response Plan is tested, evaluated, and updated on a regular basis, not less frequent than annually.

The Company has established a York County Inter Water Utility Cooperation Plan. Under the Plan, if a York County water utility has a water contamination incident or a water loss, the neighboring utilities would assist in meeting drinking water needs through the operation of one or more Drinking Water Fill Stations.

Customers of the affected utility will be notified of the locations and operating hours of the Drinking Water Fill Stations. The Company maintains an inventory of the Drinking Water Fill Station connection facilities.

In addition, York Water has improved its notification procedures in the event of a water contamination incident. To ensure that residential customers, businesses, governmental agencies, and health care facilities are promptly and properly informed and protected in the event of an emergency, the Company has entered into an emergency telephone message distribution contract, which provides rapid telephone notification to its customer base. Annually the Company attempts to secure current telephone numbers and email addresses from all of its customers, and currently has approximately 90% of its customers' landline, cellular, or email telephone numbers/addresses. The telephone numbers and email addresses are kept secure in the Company's database, and access is restricted to customer service staff. In addition to the emergency telephone message distribution notification, the Company provides notification through the Company's website, local radio and television stations, newspapers, and other media.

York Water has installed a Supervisory Control and Data Acquisition ("SCADA") process control network, which enables the Company to immediately detect a water contamination incident throughout its distribution system. This process control network allows the Company to provide rapid customer notification in the event of an emergency.

Q. Mr. Hand's testimony states that one of the goals of the Company is to provide high quality water and excellent service. How has the Company achieved this goal?

A. York Water continually strives to provide superior service to its customers. The Company exceeds all standards for water quality, assuring that its customers receive safe water. And York Water designs and upgrades the Company's delivery system so that its customers receive their water reliably.

To reduce the cost of service to York Water's customers and keep the Company's rates as affordable as possible, York Water encourages water conservation by its customers.

The Company meters all customer water usage with the exception of fire service or temporarily after an acquisition before meters are installed. All meter readings are checked during the billing process to make sure that the most recent consumption is consistent with the historical average. If the reading is abnormal, before billings are mailed, a customer service employee attempts to contact the customer to inform the customer of the abnormal reading and suggest the customer investigate a possible leak. The Company has received high praise from its customers for this validation procedure.

Each year, York Water's customers receive bill inserts or onserts (messages printed on the actual water bill) that describe ways to conserve water. In addition, a brochure that the Company provides to all new customers contains a section on water conservation. Also, the Company's Consumer Confidence Report (Refer to Exhibit No. FIX-1) contains water conservation information.

The Company and its employees undertake an active role in the community to stress the need for water conservation. Speakers are provided to local organizations to explain the need for water conservation. The Company provides coloring books and brochures to local school and scout groups on water conservation. The Company has also sponsored and provided instruction for the Boy Scout merit badge on Water and Soil Conservation. The Company has assigned a team of employees to complete and analyze monthly water audits using industry benchmarks as a guide for performance. When safety conditions allow, the Company offers tours of its water treatment process to school-age children and local scout troops to demonstrate the importance of water conservation, the quality of the product and the value of drinking water to the community.

During the drought periods of 1997, 1999, 2001-2003, and 2023 to the present, the Company issued many press releases urging customers to conserve water. In addition, the Company sponsored a series of water conservation tips broadcast over a local TV station and over the local Cable TV network.

The Company has a Drought Contingency Plan, approved by the Commission and DEP, filed as a part of its Tariff.

The Company practices water conservation as well. Leak detection and repair has always been one of the Company's highest priorities.

The repair of a large leak or one doing any damage takes precedence over all other activities of the distribution department, which operates 24 hours a day, 365 days a year.

The Company has an employee whose sole responsibility is leak detection. During the calendar year 2024, the Company's Leak Detection Coordinator detected 184 leaks throughout the Company's service territory. The Company has purchased and installed leak detection equipment, which allows York Water to continuously monitor portions of its distribution system to detect leaks.

In addition, York Water's Distribution Department Superintendent periodically contacts municipal street crew superintendents, police and fire officials in the 57 municipalities served by the Company to remind and encourage them to contact the Company if they observe any unusual water flows in the streets or at valve boxes or hydrants. All such reports are promptly investigated.

It should also be noted that most of the municipalities in which York Water serves have code provisions that require the installation of water saving plumbing fixtures.

Q. Please describe the actions that the Company takes to maintain and improve the quality and safety of the water provided to customers.

A. In addition to the affordability of the Company's water and the exceptional customer service that York Water provides to its customers, the quality of water the Company delivers to its customers is second to none. As reflected in the attachment to Exhibit No. HIX-1, the Company compares the chemical characteristics of the Company's water supply to the EPA's and DEP's Safe Drinking Water Act standards. This information is posted on the Company's website and mailed to customers who use York Water's water in processing or request the information. The Company's water quality routinely exceeds, and in most instances, far exceeds the Safe Drinking Water Act standards.

The Company maintains its own laboratory and performs nearly 70,000 chemical and bacteriological tests every year to make certain that water quality meets or exceeds recognized standards of water quality and purity. In addition, periodic tests are performed by independent laboratories to confirm that water delivered to customers is safe and aesthetically pleasing to customers.

The Company is not in violation of any provision of the Pennsylvania Safe Drinking Water Act or any rule, regulation or order or any condition of any permit, variance, or exemption granted by the DEP. To the contrary, the Company is in compliance with all Safe Drinking Water Act provisions and generally exceeds such standards. Providing safe and high-quality water is as critically important to the Company as it is to its customers.

Attached to Exhibit No. HIX-1 is the Company's 2024 annual Drinking Water Quality Reports prepared and provided to York Water's customers and users in February 2025. The Safe Drinking Water Act requires community water systems to annually prepare and provide to customers and users annual consumer confidence reports detailing the quality of water delivered by the Company. In addition to sending the report to customers electronically, the Company mails copies to those customers requesting a hard copy of the report. Prior to releasing the report, the Company advertises its availability in local newspapers and places the report on the Company's website so that non-customer users can obtain a copy.

The Company entered into a consent order and agreement with DEP in December 2016 after the Company determined it exceeded the action level for lead as established by the Lead and Copper Rule ("LCR") issued by the EPA. The Company has not had an exceedance in any subsequent compliance test. Under the agreement, the Company committed to exceed the LCR replacement schedule by replacing all of the remaining known company-owned lead service lines within four years from the agreement. The Company completed the replacement of all known company-owned lead service lines by the end of 2018, compressing the replacement schedule from four year to two. Any additional company-owned lead service lines that have been discovered since the end of 2018 have been replaced. Currently, all known company-owned lead service lines have been replaced. The

consent order and agreement was terminated by DEP in June 2022 after determining all obligations had been completed.

The Company was granted approval by the Commission to modify its tariff to include the cost of the replacement of lead customer-owned service lines that are discovered when the Company replaces its lead service lines, and to include the cost of the annual replacement of up to 400 lead customer-owned service lines whenever they are discovered, regardless of the material used for the company-owned service line over nine years from the agreement. All known customer-owned lead service lines that were connected to a company-owned lead service line were replaced by the end of 2018. Any additional customer-owned lead service lines connected to a company-owned lead service line that have been discovered since the end of 2018 have been replaced.

To identify customer-owned lead service lines not adjoining active, identified company-owned lead service lines, the Company continues to canvass its customers and seek their assistance with identifying the material composition of their customer-owned service lines. The Company has used its website as well as targeted mailings to identify customer-owned lead service lines. To date, over 800 customer-owned lead service lines have been replaced by the Company.

Q. Does this conclude your direct testimony at this time?

A. Yes.

YORK WATER STATEMENT NO. 3

BEFORE THE

PENNSYLVANIA PUBLIC UTILITY COMMISSION

THE YORK WATER COMPANY

DIRECT TESTIMONY OF MATTHEW E. POFF

Q. State your name and business address.

A. Matthew E. Poff. My business address is: 130 East Market Street, York, Pennsylvania.

Q. By whom are you employed?

A. I am employed by The York Water Company ("York Water" or the "Company").

Q. State your present position with the Company and explain your duties and responsibilities.

A. I am Chief Financial Officer and Treasurer for the Company. My duties and responsibilities include managing the day to day financial transactions of the Company.

Q. How long have you been employed by the Company?

A. I have been employed by the Company since June 15, 2009.

Q. What is your educational background?

A. I have a Bachelor's Degree from the Pennsylvania State University, University Park, Pennsylvania and a Master's Degree in Business Administration from York College of Pennsylvania, York, Pennsylvania.

Q. Are you a certified public accountant?

A. Yes, I am a certified public accountant licensed by the Commonwealth of Pennsylvania.

Q. What has been your other business experience?

A. From September 2006 through June 2009, I was employed by I. B. Abel, Inc. in York, Pennsylvania as the Chief Financial Officer. In this capacity, I managed the day-to-day accounting and financial transactions of the Company.

From July 1995 through September 2006, I was employed by Beard Miller Company LLP (now Baker Tilly US, LLP) as a certified public accountant. In this capacity, I oversaw the audits and reviews and preparation of financial statements and tax returns for various business entities, both private and public companies of various sizes.

Q. Have you previously testified before a regulatory commission?

A. Yes, I have presented testimony to the Pennsylvania Public Utility Commission ("Commission") in the Company's last three rate cases.

Q. Will you list the water operations exhibits you are sponsoring in this proceeding?

A. I am sponsoring the following water operations exhibits prepared by me or under my direction and supervision:

Exhibit Nos. H (b)-2, H (c)-5, H (c)-6, HI-1, HI-2, HI-3, HI-4, and HI-5 relating to the statement of operations for the water division;

Exhibit Nos. H (a)-2, H (a)-3, H (a)-4, H (a)-5, H (b)-3, H (b)-4, H (b)-5, H (b)-6, HII-1, HII-2, HII-2-1, HII-2-2, HII-2-3, HII-2-4, HII-2-5, HII-2-6, HII-2-7, HII-2-8, HII-2-9, HII-2-10, HII-2-11, HII-2-12, HII-2-13, HII-2-14, HII-2-15, HII-2-16, HII-3, HII-4, HII-5, HII-6, HII-7, HII-8, HII-9, HII-10, HII-11, HII-12, and HII-13 relating to operating revenues for the water division;

Exhibit Nos. HIII-1, HIII-2, HIII-2-1, HIII-2-2, HIII-2-3, HIII-2-4, HIII-2-4 (a), HIII-2-5, HIII-2-6, HIII-2-7, HIII-2-8, HIII-2-9, HIII-2-10, HIII-2-12, HIII-2-13, HIII-2-14, HIII-2-15, HIII-2-16, HIII-2-17, HIII-2-18, HIII-2-19, HIII-2-20, HIII-2-21, HIII-2-22, HIII-2-23, HIII-2-24, HIII-2-25, HIII-2-26, HIII-2-27, HIII-2-28, HIII-2-29, HIII-2-30, HIII-2-31, HIII-2-32, HIII-2-33, HIII-2-34, HIII-2-35, HIII-2-36, HIII-2-37, HIII-2-38, HIII-2-39, HII-2-40, HIII-3, HIII-4, HIII-5, HIII-6, HIII-7, HIII-8, HIII-9, HIII-10, HIII-11, HIII-12, HIII-13, HIII-14, HIII-15, HIII-16, HIII-17, HIII-18, HIII-19, HIII-20, HIII-21, HIII-23, HIII-24, HIII-25, HIII-26, HIII-27, and HIII-28 relating to operating expenses for the water division;

Exhibit Nos. HIV-2, HIV-12, HIV-15, HIV-15-1, HIV-15-2, HIV-15-3, HIV-15-4, and HIV-15-5 related to operating taxes other than income taxes for the water division;

Exhibit Nos. HIV-1, HIV-3, HIV-4, HIV-5, HIV-6, HIV-7, HIV-8, HIV-9, HIV-10, HIV-11, HIV-13, HIV-14, HIV-16, HIV-17, HIV-17-1, HIV-17-2, HIV-17-3, HIV-17-3 (a), HIV-17-4, HIV-17-5, and HIV-18 relating to operating income taxes for the water division;

Exhibit No. HV-1-1, HV-1-10, HV-8-1 (g), HV-8-1 (g)1, HV-8-1 (g)2, and HV-10 relating to the original cost measure of value for the water division;

Exhibit Nos. HVII-1, HVII-2, HVII-3, HVII-4, HVII-5, HVII-6, HVII-7, HVII-8, HVII-9, HVII-10, HVII-11, HVII-12, HVII-13, HVII-14, HVII-15, HVII-16, HVII-17 HVII-18, HVII-19, HVII-20, HVII-21, HVII-22, HVII-23, HVII-24, HVII-25, HVII-26, HVII-27, HVII-28, HVII-29, HVII-30, HVII-31, and HVII-32, relating to rate of return;

Exhibit Nos. H (c)-2, HX-1, HX-2, HX-3, HX-4, HX-5, HX-6, HX-7, HX-8, HX-9, HX-10, HX-11, HX-12, and HX-13 relating to the balance sheet; and

Exhibit Nos. H (a)-1, H (a)-6, H (a)-9, H (a)-10, H (a)-11, H (b)-1, HVIII-1, HVIII-2, HXI-1, HXI-2, HXI-3, and HXI-4.

Q. Explain Exhibit No. H (b)-1.

A. Exhibit No. H (b)-1 provides the specific reasons the Company proposes to increase its water rates. Despite the best efforts by York Water to control costs, the effects of increased expenses and net additions to rate base have reduced returns. The Company proposes to increase its water rates for the following reasons: (1) to provide sufficient

revenues to recover the cost of providing water service to its customers; (2) to allow the Company to properly discharge its public duties by continuing to furnish adequate, safe, and reliable service; (3) to maintain its facilities properly; and (4) to afford the opportunity to more nearly approach a fair and reasonable rate of return on the original cost measure of value of its used and useful property.

Q. Explain Exhibit No. HI-1.

A. Exhibit No. HI-1 provides a detailed comparative operating statement for the twelve months ended December 31, 2024, and December 31, 2023. Column 1 of pages 2 through 8 of Exhibit No. HI-1 reflects the Company's detailed water operating statement per books for the twelve months ended December 31, 2024, showing operating income of $26,939,804. Column 2 of pages 2 through 8 of Exhibit No. HI-1 reflects the Company's detailed operating statement per books for the twelve months ended December 31, 2023, showing operating income of $26,880,477. Column 3 of pages 2 through 8 of Exhibit No. HI-1 reflects the increases and decreases by account between the operating statement for the twelve months ended December 31, 2024, and the operating statement for the twelve months ended December 31, 2023. Major account variances (>$75,000) between the detailed operating statement for the twelve months ended December 31, 2024, and the detailed operating statement for the twelve months ended December 31, 2023 are identified in Column 4 of pages 2 through 8 of Exhibit No. HI-1. Detailed explanations of the causes of the major account variances between the operating statement for the twelve months ended December 31, 2024, and the operating statement for the twelve months ended December 31, 2023, are provided beginning on page 9 of Exhibit No. HI-1.

Pages 19 and 20 of Exhibit HI-1 show the increase in Company labor expense for the twelve months ended December 31, 2024. The increase is principally due to wage increases for existing employees, promotions, and an increase in the number of employees.

As explained on pages 21 and 22 of Exhibit No. HI-1, each year the Company incurs expenses to maintain different components of its plant facilities. As a consequence, the level of maintenance costs charged to each account will vary from year to year, depending upon the nature of maintenance projects undertaken in any one year. The significant factor for ratemaking is not whether an individual account has varied, but whether the overall level of maintenance costs is reasonable. As pages 21 and 22 demonstrate, while maintenance expenses rose by 24.9%, test year maintenance expense, as a percentage of plant in service, rose slightly during the historic test year as compared to the prior twelve-month period.

Q. Explain Exhibit No. HI-2.

A. Exhibit No. HI-2 summarizes ratemaking adjustments under existing rates to per book water statement of income for the twelve months ended December 31, 2024, and the anticipated statement of income when proposed rates become effective. The water income per books for the twelve months ended December 31, 2024, as shown in Column 1 of Exhibit No. HI-2 is $19,613,442. I note that this amount reflects non-operating income and other income deductions not included in the calculation of net operating income for ratemaking purposes. Net operating income for ratemaking purposes was $26,939,804 for the twelve months ended December 31, 2024, as shown in Column 1,

page 2 of Exhibit No. HI-2. Column 3 of Exhibit No. HI-2 shows adjusted net operating income of $24,230,709. The adjustments to net operating income in the amount of $(2,709,095) are shown in Column 2 of Exhibit No. HI-2. These adjustments are detailed in other exhibits, which I will explain later. Column 5 of Exhibit No. HI-2 shows net operating income of $30,651,299 after reflecting adjustments related to the effects of proposed rates. The adjustments to net operating income in the amount of $6,420,590 are shown in Column 4 of Exhibit No. HI-2, and these adjustments are detailed in other exhibits, which I will explain later.

Q. Are you sponsoring any other exhibits regarding the Company's statement of operations?

A. Yes, I am also sponsoring Exhibit Nos. H (b)-2, H (c)-5, H (c)-6, HI-3, HI-4, and HI-5.

Q. Explain Exhibit No. H (b)-3.

A. Exhibit No. H (b)-3 provides the number of water customers whose monthly bills will increase under proposed rates based on pro forma historic test year volumes.

Q. Explain Exhibit No. H (b)-5.

A. Exhibit No. H (b)-5 states that no water customers' monthly bills will decrease under proposed rates based on pro forma historic test year volumes.

Q. Explain Exhibit No. HII-1.

A. Exhibit No. HII-1 is a comparative statement of gallons sold and operating revenues per books by class for the twelve months ended December 31, 2024, and December 31, 2023, and the number of customers by class as of December 31, 2024, and December 31, 2023.

Q. Explain Exhibit No. HII-2.

A. Exhibit No. HII-2 summarizes adjustments to per book operating revenues for the twelve months ended December 31, 2024, that are required for ratemaking purposes. As I will explain later, such adjustments reflect elimination of Distribution System Improvement Charge ("DSIC") revenues billed and recorded on the books during the twelve months ended December 31, 2024, and elimination of net accrued operating revenues recorded on the corporate books during the twelve months ended December 31, 2024. The adjustments also annualize the effects of changes in number of customers, which occurred during the twelve months ended December 31, 2024.

Exhibit No. HII-2, page 2 of 3, shows operating revenues from metered sales, by class, from unmetered sales, by class, from fire protection, by class, and revenues from other than sales of water.

The operating revenues per books, for the twelve months ended December 31, 2024, as shown in Column 1, page 2 of 3 of Exhibit No. HII-2, were $67,541,585. Adjustments under existing rates to decrease historic test year operating revenues in the amount of $(190,505) are summarized on page 3 of 3 of Exhibit No. HII-2 and are shown in Column 2, page 2 of 3 of Exhibit No. HII-2. These adjustments are explained later in Exhibit Nos. HII-2-1 through HII-2-15. Pro forma operating revenues under existing rates, after adjustments, for twelve months ended December 31, 2024, of $67,351,080 are shown in Column 3, page 2 of 3, of Exhibit No. HII-2. The proposed increase in historic test year operating revenues in the amount of $9,001,370 is shown in Column 5, page 2 of 3 of

Exhibit No. HII-2. The corresponding percentage increase in operating revenues is shown in Column 6, page 2 of 3.

For historic test year purposes, the increase of $9,001,370 shown on Exhibit No. HII-2 was not produced by the application of proposed rates to historic test year volumes. Since the Company's claim in this case is based upon data for a fully projected future test year ending February 28, 2027, annualized and normalized for ratemaking purposes, the increase of $9,001,370, or 13.36%, is the increase calculated based upon pro forma historic test year revenues, expenses and rate base that is distributed proportionately among the customer classes.

Q. Explain Exhibit No. HII-2-1.

A. Exhibit No. HII-2-1 eliminates DSIC revenues billed and recorded on the books during the twelve months ended December 31, 2024. The Company's calculations zero the DSIC and roll-into base rates the costs recovered through the charge. The adjustment to eliminate DSIC revenues is carried forward to Exhibit No. HII-2.

Q. Explain Exhibit No. HII-2-2.

A. Exhibit No. HII-2-2 eliminates net accrued operating revenues recorded on the corporate books during the twelve months ended December 31, 2024. In response to the enactment of the Tax Reform Act of 1986, the Company estimates for income tax and financial reporting purposes the amount of income attributable to utility services provided during each accounting period, but after the final meter reading which falls within that accounting period.

Since unbilled revenues from the end of one accounting period are included in the first meter reading for the next accounting period, unbilled revenues from one accounting period are offset by unbilled revenues in the succeeding accounting period, with the result that the Company will record for accounting purposes, as either a debit or credit, the negative or positive difference in accrued revenues between the two accounting periods. This difference represents net accrued revenues recorded for the latter accounting period.

Operating revenues are presented for ratemaking purposes on an "as billed basis" for the historic, future, and fully projected future test years, to eliminate the uncertainties inherent in estimated "unbilled revenues." Therefore, for ratemaking purposes, net accrued operating revenues are eliminated.

Q. Explain Exhibit No. HII-2-3.

A. Exhibit No. HII-2-3 annualizes water operating revenues for metered residential, commercial, and industrial customers by applying metered base rates effective March 1, 2023, to test year water consumption. By Order entered at Docket No. R-2022-3031340, the Commission authorized increased base rates for the Company. These rates are the currently effective base rates of the Company. Annualization of revenues by customer class at present-metered base rates effective March 1, 2023, in the amount of $61,350,103 are shown in Column 2 on Exhibit No. HII-2-3. Application of present base rates to the customer consumption analysis for the twelve months ended December 31, 2024, is shown on Exhibit No. HII-4, which I will explain later. Metered operating revenues by customer class billed and recorded on the corporate books during the twelve months

ended December 31, 2024, in the amount of $61,378,462 are shown in Column 1 of Exhibit No. HII-2-3 and are subtracted from annualized revenues at metered base rates effective March 1, 2023, to determine the adjustment by customer class to operating revenues shown in Column 3 of Exhibit No. HII-2-3 [$61,350,103 - $61,378,462 = $(28,359)]. The adjustment by customer class of operating revenues in the amount of $(28,359) is carried forward to Exhibit No. HII-2, page 3.

Q. Explain Exhibit No. HII-2-4.

A. Exhibit No. HII-2-4 annualizes operating revenues for metered residential gravity customers connected and disconnected during the twelve months ended December 31, 2024. The net gain in number of metered residential gravity customers during the twelve months ended December 31, 2024, was 149 (21,137 metered residential gravity customers as of December 31, 2024, less 20,988 metered residential gravity customers as of December 31, 2023). Since 149 metered residential gravity customers were gained throughout the historic test year, it is assumed the historic test year average number of metered residential gravity customers is equal to the average of metered residential gravity customers at the beginning and end of the historic test year, or 21,063 ([21,137 + 20,988] ÷ 2). Annualized revenues for metered residential gravity customers of $11,706,893 (refer to Exhibit No. HII-4) are divided by the historic test year average number of metered residential gravity customers of 21,063 to calculate the average annual revenue per average metered residential gravity customer in the amount of $555.80 ($11,706,893÷21,063 = $555.80). The adjustment to annualize revenues for the net gain in metered residential gravity customers during the twelve months ended December 31, 2024, is determined by multiplying the net gain of 149 metered residential gravity

customers by the average annual revenue per average metered residential gravity customer in the amount of $555.80 and by dividing the product of this calculation by two [149 x $555.80 ÷ 2 = $41,407]. The product is divided by two since it is reasonable to assume that customers were gained evenly through the historic test year and that annualized revenues already reflect the gain of one-half of one year's revenue, on average, for the 149 customers. The result of the calculations described above is the amount of $41,407, which is carried forward to Exhibit No. HII-2, page 3.

Q. Explain Exhibit No. HII-2-5.

A. Exhibit No. HII-2-5 annualizes operating revenues for metered residential repumped customers connected and disconnected during the twelve months ended December 31, 2024. The net gain in number of metered residential repumped customers during the twelve months ended December 31, 2024, was 1,014 (45,262 metered residential repumped customers as of December 31, 2024, less 44,248 metered residential repumped customers as of December 31, 20203. Since 1,014 additional metered residential repumped customers were added throughout the twelve months ended December 31, 2024, it is assumed the historic test year average number of metered residential repumped customers is equal to the average of the numbers of metered residential repumped customers at the beginning and end of the historic test year, or 44,755 ([45,262 + 44,248] ÷ 2). Annualized revenues for metered residential repumped customers of $29,401,581 (Refer to Exhibit No. HII-4) are divided by the historic test year average number of metered residential repumped customers of 44,755 to calculate the average annual revenue per average metered residential repumped customer in the amount of $656,95 ($29,401,581 ÷ 44,755 = $656.95). The adjustment to annualize revenues for the net

increase in metered residential repumped customers during the twelve months ended December 31, 2024, is determined by multiplying the net gain of 1,014 metered residential repumped customers by the average annual revenue per average metered residential repumped customer in the amount of $656.95, and by dividing the product of this calculation by two (1,014 x $656.95 ÷ 2 = $333,074). The product is divided by two since it is reasonable to assume that customers were added evenly throughout the twelve months ended December 31, 2024, and that annualized revenues already reflect one-half of one year's revenue, on average, for the 1,014 customers. The result of the calculations described above is the amount of $333,074, which is carried forward to Exhibit No. HII-2, page 3.

Q. Explain Exhibit No. HII-2-6.

A. Exhibit No. HII-2-6 annualizes operating revenues for metered commercial gravity customers connected and disconnected during the twelve months ended December 31, 2024. The net gain in number of metered commercial gravity customers during the twelve months ended December 31, 2024, was 12 (2,542 metered commercial gravity customers as of December 31, 2024, less 2,530 metered commercial gravity customers as of December 31, 2023). Since 12 metered commercial gravity customers were gained throughout the twelve months ended December 31, 2024, it is assumed the historic test year average number of metered commercial gravity customers is equal to the average of the numbers of metered commercial gravity customers at the beginning and end of the historic test year, or 2,536 ([2,542 + 2,530] ÷ 2). Annualized revenues for metered commercial gravity customers of $4,718,906 (Refer to Exhibit No. HII-4 reduced by priced out bulk truck sales) are divided by the historic test year average number of

metered commercial gravity customers of 2,536 to calculate the average annual revenue per average metered commercial gravity customer in the amount of $1,860.77 ($4,718,906 ÷ 2,536 = $1,860.77). The adjustment to annualize revenues for the net increase in the number of metered commercial gravity customers during the twelve months ended December 31, 2024, is determined by multiplying the net gain of 12 metered commercial gravity customers by the average annual revenue per metered commercial gravity customer in the amount of $1,860.77 and by dividing the product of this calculation by two [12 x $1,860.77 ÷ 2 = $11,165]. The product is divided by two since it is reasonable to assume that customers were gained evenly throughout the twelve months ended December 31, 2024, and that annualized revenues already reflect the gain of one-half of one year's revenue, on average, for the 12 customers. The result of the calculations described above is the amount of $11,165, which is carried forward to Exhibit No. HII-2, page 3.

Q. Explain Exhibit No. HII-2-7.

A. Exhibit No. HII-2-7 annualizes operating revenues for metered commercial repumped customers connected and disconnected during the twelve months ended December 31, 2024. The net gain in number of metered commercial repumped customers during the twelve months ended December 31, 2024, was 39 (2,259 metered commercial repumped customers as of December 31, 2024, less 2,220 metered commercial repumped customers as of December 31, 2023). Since 39 metered commercial repumped customers were added throughout the twelve months ended December 31, 2024, it is assumed the historic test year average number of metered commercial repumped customers is equal to the average of the numbers of metered commercial repumped customers at the beginning and

end of the historic test year, or 2,240 ([2,259 + 2,220] ÷ 2). Annualized revenues for metered commercial repumped customers of $10,052,230 (Refer to Exhibit No. HII-4 reduced by priced out bulk truck sales) are divided by the historic test year average number of metered commercial repumped customers of 2,240 to calculate the average annual revenue per average metered commercial repumped customer in the amount of $4,487.60 ($10,052,230 ÷ 2,240 = $4,487.60). The adjustment to annualize revenues for the net increase in metered commercial repumped customers during the twelve months ended December 31, 2024, is determined by multiplying the net gain of 39 metered commercial repumped customers by the average annual revenue per average metered commercial repumped customer in the amount of $4,487.60 and by dividing the product of this calculation by two (39 x $4,487.60 ÷ 2 = $87,508). The product is divided by two since it is reasonable to assume that customers were gained evenly throughout the twelve months ended December 31, 2024, and that annualized revenues already reflect the gain of one-half of one year's revenue, on average, for the 39 customers. The result of the calculations described above is the amount of $87,508, which is carried forward to Exhibit No. HII-2, page 3.

Q. Explain Exhibit No. HII-2-8.

A. Exhibit No. HII-2-8 eliminates operating revenues for three metered industrial gravity customers who were disconnected during the twelve months ended December 31, 2024. The annualized revenue adjustment for three metered industrial gravity customers disconnected during the test year of $586 is carried forward to Exhibit No. HII-2, page 3.

Q. Explain Exhibit No. HII-2-9.

A. Exhibit No. HII-2-9 annualizes operating revenues for two metered industrial repumped customers who were connected during the twelve months ended December 31, 2024. The annualized revenue adjustment for two metered industrial repumped customers connected during the test year of $3,484 was carried forward to Exhibit No. HII-2, page 3.

Q. Explain Exhibit No. HII-2-10.

A. Exhibit No. HII-2-10 eliminates the unmetered revenue for properties that have been metered during the twelve months ended December 31, 2024. The ongoing revenue from these customers is included in Exhibit No. HII-2-5. The revenue adjustment of $(15,253) was carried forward to Exhibit No. HII-2, page 3.

Q. Explain Exhibit No. HII-2-11.

A. Exhibit No. HII-2-11 annualizes operating revenues to reflect the number of private fire protection customers as of December 31, 2024, at present rates. Annualized private fire protection revenues in the amount of $2,898,808 shown on Exhibit No. HII-2-10, page 2 of 2 were determined by applying present private fire protection rates effective March 1, 2023, authorized by the Commission's Order entered at Docket No. R-2022-3031340 to the number of private fire hydrants and standby service connections in service as of December 31, 2024. The difference in the amount of $152,673 between the annualized private fire protection revenues of $2,898,808 and the historic test year private fire protection revenues of $2,746,136 ($2,898,808 - $2,746,136 = $152,673), shown on page 2 of 2 of Exhibit No. HII-2-11, is the adjustment to annualize operating revenues for private fire protection customers as of December 31, 2024, which has been carried forward to Exhibit No. HII-2, page 3.

Q. Explain Exhibit No. HII-2-12.

A. Exhibit No. HII-2-12 annualizes operating revenues to reflect the number of public fire protection customers as of December 31, 2024, at present rates. Annualized public fire protection revenues in the amount of $1,827,851 shown on Exhibit No. HII-2-12 were determined by applying the present public fire protection rates effective March 1, 2023, authorized by the Commission's Order entered at Docket No. R-2022-3031340 to the number of public fire hydrants in service as of December 31, 2024. The difference in the amount of $32,120 between the annualized public fire protection revenues of $1,827,851 and the historic test year public fire protection revenues of $1,795,732 ($1,827,851 - $1,795,732 = $32,120) shown on Exhibit No. HII-2-12 is the adjustment to annualize operating revenues for public fire protection customers as of December 31, 2024, which has been carried forward to Exhibit No. HII-2, page 3.

Q. Explain Exhibit No. HII-2-13.

A. Exhibit No. HII-2-13 annualizes lease payments received for communication equipment installed on the Company's standpipes in accordance with the non-exclusive license agreement between the Company and cellular telephone companies. These cellular telephone companies are not affiliated with the Company. This industry is experiencing consolidation. As cellular telephone companies merge, they may have leases with the Company for equipment on the same standpipe for each of the legacy companies. As a result, they are not renewing these duplicate leases or are providing notice they will not be renewing these duplicate leases upon the end of the lease. This is resulting in decreases in annualized lease payments. Rent from water property for the twelve months

ended December 31, 2024, reflects lease payments from the dates of the license agreements. The adjustment of $(23,650) is determined by subtracting the lease payments received and recorded as rental income during the twelve months ended December 31, 2024, of $454,236 from the annual lease payments for the installation of communication equipment in the amount of $430,587 [$430,587 - $454,236 = $(23,650)]. This adjustment of $(23,650) has been carried forward to Exhibit No. HII-2, page 3.

Q. Explain Exhibit No. HII-2-14.

A. Exhibit No. HII-2-14 eliminates the billing and revenue collection services provided to the City of York included in the historic test year miscellaneous water revenues. Before this year, the Company provided billing and revenue collection services to the City of York for their refuse service. The City of York did not renew this contract with the Company. As a result, the billing and revenue collection services the Company provided to the City of York ceased beginning in 2025. The City of York was billed on a monthly basis for the billing and revenue collection services provided by the Company. The Company determined the total revenue included in the historic test year for these services was $418,643. This adjustment of $(418,643) has been carried forward to Exhibit No. HII-2, page 3.

Q. Explain Exhibit No. HII-2-15.

A. Exhibit No. HII-2-15 adjusts customers' late payment charges based on pro forma sales of water under existing rates and a two-year average ratio of customers' late payment charges to total sales of water. Pro forma sales of water under existing rates (Refer to Exhibit No. HII-2) of $66,553,303 are multiplied by the two-year average ratio of

customers' late payment charges to total sales of water of 0.23% (rounded) to determine the annualized customers' late payment charges under existing rates of $150,518 ($66,553,303 x 0.0023).

The adjustment to customers' late payment charges in the amount of $(1,382) is determined by subtracting test year customers' late payment charges of $151,900 from annualized customers' late payment charges under existing rates of $150,518 [$150,518 - $151,900 = $(1,382)]. The adjustment to customers' late payment charges of $(1,382) has been carried forward to Exhibit No. HII-2, as an adjustment to Account No. 47100500.

Q. Explain Exhibit No. HII-2-16.

A. Exhibit No. HII-2-16 adjusts customers' late payment charges based on pro forma sales of water under proposed rates and a two-year average ratio of customers' late payment charges to total sales of water. Pro forma sales of water under proposed rates (Refer to Exhibit No. HII-2) of $75,534,361 are multiplied by the two-year average ratio of customers' late payment charges to total sales of water of 0.23% (rounded) to determine the pro forma customers' late payment charges under proposed rates of $170,829 ($75,534,361 x 0.0023).

The adjustment to customers' late payment charges in the amount of $20,312 is determined by subtracting pro forma customers' late payment charges under existing rates of $150,518 (Refer to Exhibit No. HII-2-15) from pro forma customers' late payment charges under proposed rates of $170,829 ($170,829 - $150,518 = $20,312). The

adjustment to customers' late payment charges of $20,312 has been carried forward to Exhibit No. HII-2, page 2, Column 5, as an adjustment to Account No. 47100500.

Q. Explain Exhibit No. HII-4.

A. Exhibit No. HII-4 provides a detailed customer consumption analysis by customer classification and meter size.

Pages 2 through 4 of Exhibit No. HII-4 provide the application of present-metered base rates, which became effective March 1, 2023, to the customer consumption analysis for the twelve months ended December 31, 2024. The details of the customer consumption analysis are presented on pages 5 through 18 of Exhibit No. HII-4. The application of present-metered base rates to the customer consumption analysis for the twelve months ended December 31, 2024, results in annualized revenues at present-metered base rates on pages 2-4 of Exhibit No. HII-4 of $61,350,103 ($41,108,475 + $14,980,795 + $5,260,833). Annualized revenues at current base rates of $61,350,103 have been carried forward to Exhibit No. HII-2-3, which I have explained previously.

Q. Explain Exhibit No. HII-5.

A. Exhibit No. HII-5 provides a detailed explanation of the accounting procedures and methods used to determine accrued revenues and detailed computations of accrued revenues as of December 31, 2024, and December 31, 2023, based on the explanation that was previously provided with respect to Exhibit No. HII-2-2. Refer to Exhibit No. HII-2-2, which I explained previously, for an operating revenue adjustment, which eliminates net accrued revenues, recorded during the test year from the cost of service.

Page 2 of Exhibit No. HII-5 provides a detailed computation of accrued utility revenues as of December 31, 2024.

Page 3 of Exhibit No. HII-5 provides a detailed computation of accrued utility revenues as of December 31, 2023.

Page 4 of Exhibit No. HII-5 provides a summary of entries recorded during the twelve months ended December 31, 2024, accounting for accrued revenues.

Q. Explain Exhibit No. HII-6.

A. Exhibit No. HII-6 provides a detailed analysis of miscellaneous water revenues for the twelve months ended December 31, 2024, and the calendar years 2023, and 2022.

Q. Explain Exhibit No. HII-7.

A. Exhibit No. HII-7 provides the number of customers, the number of customers added or lost, and the consumption by customer classification for the year ended December 31, 2024, and the year-to-date period ended February 28, 2025.

Q. Explain Exhibit No. HII-10.

A. Exhibit No. HII-10 provides a listing of all public fire protection customers as of December 31, 2024.

Q. Are you sponsoring any other exhibits regarding the Company's operating revenues?

A. Yes, I am also sponsoring Exhibit Nos. H (a)-2, H (a)-3, H (a)-4, H (a)-5, H (b)-4, H (b)-6, HII-3, HII-8, HII-9, HII-11, HII-12, and HII-13.

Q. Explain Exhibit No. HIII-1.

A. Exhibit No. HIII-1 is a comparative statement of water operating expenses per books for the twelve months ended December 31, 2024, December 31, 2023, and December 31, 2022.

I note that in comparing operating expenses for the three twelve-month periods ended December 31, 2024, December 31, 2023, and December 31, 2022, there are variations in labor costs charged to the various expense accounts during the three twelve-month periods. The direct labor charge to the numerous accounts will vary from year to year, in proportion to the change in the number of man-hours from year to year, actually reported on time sheets for different activities charged to different accounts. To the extent permitted with respect to its unionized employees, York Water utilized its complement of employees during the twelve-month periods ended December 31, 2024, 2023, and 2022, where there was the greatest need for manpower. Employees are not assigned to the same work, nor do they perform the same functions, from year to year or from month to month, inasmuch as the need for manpower by system function changes. Therefore, the man-hours charged to the functional accounts, and thus, the labor expense recorded on the books, are directly related to the time the employees spend on the various functions as reported on time sheets. Consequently, the individual expense accounts reflect increases and decreases of various magnitudes in Company labor when comparing different twelve-

month periods. These variations in labor costs charged to different expense accounts can be seen on Exhibit No. HIII-2-4.

Each year the Company incurs expenses to maintain different components of its plant facilities. Therefore, the level of maintenance costs charged to each account will vary from year to year, depending upon the nature of maintenance projects undertaken in any one year. The significant factor for ratemaking is not whether an individual account has varied, but whether the overall level of maintenance costs is reasonable. I note that test year maintenance expense as a percentage of plant in service, has remained the relatively the same during the twelve months ended December 31, 2024, as compared to the prior twelve-month period.

Q. Explain Exhibit No. HIII-2.

A. Exhibit No. HIII-2 summarizes adjustments to operating expenses for the twelve months ended December 31, 2024, to: (1) annualize and normalize the effect of changes occurring during the twelve months ended December 31, 2024; and (2) reflect changes in uncollectible accounts expenses due to the increase in operating revenues resulting from the proposed increase in rates.

Operating expenses per books for the twelve months ended December 31, 2024, in the amount of $26,405,096 are shown in Column 1 of Exhibit No. HIII-2, pages 2 through 5. Adjustments to operating expenses in the amount of $1,800,833, to annualize and normalize the effect of changes occurring during the twelve months ended December 31, 2024, are shown in Column 3 of Exhibit No. HIII-2, pages 2 through 5, and are detailed

in Exhibit Nos. HIII-2-1 through HIII-2-39. Adjustments to operating expenses in the amount of $59,288 to reflect changes in uncollectible accounts expenses due to the increase in operating revenues resulting from the proposed increase in rates are shown in Column 6 of Exhibit No. HIII-2, pages 2 through 5, and is detailed in Exhibit No. HIII-2-40.

Q. Explain Exhibit No. HIII-2-1.

A. Exhibit No. HIII-2-1 adjusts per books operating expenses to reflect a normalized level of rate case expenses for this rate case in the amount of $236,188. The estimated expenses of this rate case are $944,750, assuming a fully litigated rate case, and Exhibit No. HIII-2-1 normalizes the estimated expenses of this rate case over 48 months. The Company proposes to normalize the cost of the current rate case over 48 months, which is the approximate average elapsed time between the filing dates for the Company's last three rate cases.

The adjustment in the amount of $136,964 is determined by subtracting amortization of rate case expenses in the amount of $99,224 recorded on the corporate books during the twelve months ended December 31, 2024, from the annual normalized expenses of this rate case. The annual normalized expenses of the rate case of $236,188 is determined by dividing the estimated expenses of this rate case of $944,750 by 48 months and multiplying by 12 months ($944,750 ÷ 48 x 12), the normalization period. The adjustment to Account No. 66680000 in the amount of $136,964 ($236,188 - $99,224) has been carried forward to Exhibit No. HIII-2, Column 3.

Q. Explain Exhibit No. HIII-2-2.

A. Exhibit No. HIII-2-2 adjusts uncollectible accounts expense for the twelve months ended December 31, 2024, based on a two-year ratio of the net of uncollectible accounts written- off, less recoveries of amounts previously written-off to total operating revenues.

The two-year ratio of 0.66% is multiplied by pro forma operating revenues of $66,553,303 (see Exhibit HII-2) to calculate pro forma uncollectible accounts expense for ratemaking purposes of $439,347 ($66,553,303 x 0.0066). The adjustment to uncollectible accounts in the amount of $(632,411) is determined by subtracting the uncollectible accounts accrual recorded on the books during the test year of $1,071,758 from the calculated pro forma uncollectible accounts for ratemaking purposes of $439,347 [$439,347 - $1,071,758 = $(632,411)]. The adjustment to uncollectible accounts expense of $(632,411) to Account No. 67070000 has been carried forward to Exhibit No. HIII-2, Column 3.

Q. Explain Exhibit No. HIII-2-3.

A. Exhibit No. HIII-2-3 adjusts chemical expense, based on a two-year average of amounts of chemicals used. Pro forma chemical expense in the amount of $1,577,777 is based on applying unit prices of chemicals effective at the time of the rate filing to the two-year average amounts of chemicals used. The adjustment to chemical expense in the amount of $(129,076) is determined by subtracting test year chemical expense of $1,706,854 from calculated pro forma chemical expense of $1,577,777 [$1,577,777 - $1,706,854 = $(129,076)]. The adjustment to Account No. 61830000 in the amount of $(129,076) has been carried forward to Exhibit No. HIII-2, Column 3.

Q. Why do you use a two-year average of chemicals used?

A. The Company's raw water quality varies continually as a result of factors beyond the Company's control, including in particular the amount and quality of rainfall. Different raw water qualities require different chemical treatment to ensure that the Company's treated water quality meets the high-quality standards that York Water's customers have come to expect. A two-year average provides a reasonable normalization of chemical usage. A two-year average has been used in prior base rate cases.

Q. Explain Exhibit No. HIII-2-4.

A. Exhibit No. HIII-2-4 presents an adjustment of payroll expense for union and nonunion employees to reflect the full annual effect of actual hourly and salary rates and annual cash incentive awards and annual stock incentive awards that are effective December 31, 2024. I started by applying the actual hourly rates to a two-year average of regular, overtime and double time hours. Because the need for manpower by system function changes each year, the Company used an average of the two years ended December 31, 2024, and December 31, 2023, to calculate pro forma payroll hours and the distribution of pro forma payroll among capital and expense accounts. Pro forma payroll expense is determined by applying wage rates and annual incentive awards effective December 31, 2024, to the modified two-year average of regular, overtime, and double time payroll hours. The Company included year-end bonuses in an amount of $49,094 in pro forma payroll expense. The Company has consistently provided year-end bonuses to employees for over 29 years as a part of the employees' overall compensation package, and this is an expected part of compensation. The distribution of pro forma payroll among the various

capital and expense accounts is determined by allocating pro forma payroll over the two-year average payroll distribution. The allocation of pro forma payroll is reflected on Exhibit No. HIII-2-4 (a), which I will explain later. Total pro forma payroll expense, by account, of $10,142,670 is shown in Column 1 on page 1 of Exhibit No. HIII-2-4. It is to be noted, in comparing pro forma payroll expense to test year payroll expense, the critical issue is not increases or decreases to individual accounts. The differences for individual accounts are substantially the result of using a two-year average to allocate pro forma payroll, combined with the fact that every year the need for manpower by system function changes.

Total test year payroll expense, by account, in the amount of $9,520,503 is shown in Column 2 on page 1 of Exhibit No. HIII-2-4. The increase in payroll expense of $622,167 represents the difference between pro forma payroll expense, by account, and test year payroll expense, by account, and is shown by account in Column 3 on page 1 of Exhibit No. HIII-2-4. The adjustments have been carried forward to Exhibit No. HIII-2, Column 3.

I note that a portion of pro forma payroll expense for certain specified supervisory and general office employees for twelve months ended December 31, 2024, was capitalized and is reflected, as a reduction to operating expenses, in Account No. 67580002, Miscellaneous Expenses-Administrative and General Expenses Transferred, on Exhibit No. HIII-2-6, which I will explain later.

Q. Explain Exhibit No. HIII-2-4 (a).

A. Exhibit No. HIII-2-4 (a) is the distribution of pro forma labor based on Company labor for the two years ended December 31, 2024, and December 31, 2023. Company labor for the twelve months ended December 31, 2024, of $10,263,675, is shown in Column 1 on page 1 of Exhibit No. HIII-2-4 (a). Company labor for the twelve months ended December 31, 2023, of $9,354,020 is shown in Column 2 on page 1 of Exhibit No. HIII-2-4 (a). Two-year Company labor of $19,617,595, which represents the addition of Company labor for the twelve months ended December 31, 2023, and Company labor for the twelve months ended December 31, 2024, is shown in Column 3 on page 1 of Exhibit No. HIII-2-4 (a). Pro forma payroll of $10,916,302 is distributed among the various capital and expense accounts based on the two-year Company labor. The allocation factor of 0.55645183 shown in Column 4 on page 1 of Exhibit No. HIII-2-4 (a) used to distribute pro forma payroll among the various capital and expense accounts is calculated by dividing Pro Forma Company Labor of $10,916,302 by Two Year Company Labor of $19,617,695. The allocation factor of 0.55645183 is multiplied by each capital and expense amount of Two Year Company Labor shown in Column 3 on page 1 of Exhibit No. HIII-2-4 (a) to determine the pro forma Company labor amount allocated to each capital and expense account shown in Column 5 on page 1 of Exhibit No. HIII-2-4 (a). Pro Forma Company Labor Expense is carried forward to Column 1, pages 1 and 2 of Exhibit No. HIII-2-4.

Q. Explain Exhibit No. HIII-2-5.

A. Exhibit No. HIII-2-5 normalizes over five years the costs of a customer survey. The purpose of the survey is to assist the Company in further improving its customer service. The Company commissions a customer survey approximately every five years. The

Company has commissioned a customer survey in 1989, 1992, 1996, 2000, 2004, 2009, 2015, 2020, and 2024. The Company anticipates conducting another customer survey in 2029. This expense was approved by the Commission as a normalized expense in its Order at Docket No. R-901813 entered July 17, 1991.

The costs of the customer survey completed in 2024 of $24,000 are divided by five years to determine the normalized level of $4,800 ($24,000 ÷ 5). The adjustment to Account No. 63670000 in the amount of $2,323 has been carried forward to Exhibit No. HIII-2, Column 3.

The adjustment to the customer survey in the amount of $(19,200) is determined by subtracting test year customer survey of $24,000 from normalized level of $4,800 ($4,800 - $24,000). The adjustment to the customer survey in the amount of $(19,200) as an adjustment to Account No. 63670000 has been carried forward to Exhibit No. HIII-2, Column 3.

Refer to Mr. Hand's testimony (York Water Statement No. 1) for a further explanation of the customer survey.

Q. Explain Exhibit No. HIII-2-6.

A. Exhibit No. HIII-2-6, consistent with the settlements approved by the Commission in the Company's 1987 and 1996 base rate cases at Docket Nos. R-870769 and R-963619, respectively, adjusts administrative and general expenses capitalized for the twelve months ended December 31, 2024 based on pro forma indirect labor, employee benefit

costs, property insurance, workers' compensation insurance, and pension expense for the twelve months ended December 31, 2024, and a two-year average capitalization ratio.

A portion of the pay of certain specified supervisory and general office employees is capitalized (referred to as "indirect labor") in addition to capitalized payroll determined directly from employee time records. The indirect labor capitalization is calculated based upon three, separate, experienced ratios of directly capitalized payroll to total payroll, as follows:

	Employee Position	**Allocation**
(a)	President and Chief Executive Officer Chief Operating Officer Chief Financial Officer Chief Administrative Officer and General Counsel Controller Finance Manager CPR Clerk CPR Clerk Purchasing Coordinator Materials and Supplies Clerk Vice President of Operations Operations Manager	Ratio of total payroll directly capitalized to total payroll
(b)	GIS Administrator Assistant Distribution Superintendent Assistant Distribution Superintendent Distribution Superintendent Operations & Supply Chain Manager Distribution Line Representative Engineering Technician Engineering Technician Dispatcher Relief Dispatcher	Ratio of directly capitalized payroll of Distribution System Department employees to total Distribution System Department payroll
(c)	Maintenance & Grounds Superintendent Maintenance & Grounds Assistant Superintendent Maintenance & Grounds Assistant	Ratio of directly capitalized payroll of Maintenance and Grounds Department employees to total

Superintendent	Maintenance and Grounds Department payroll

The two-year average general and administrative employees' capitalized ratio is 10.55%. This ratio was applied to pro forma payroll of $1,908,088 for the specified administrative and general employees to determine the pro forma capitalized indirect labor for general and administrative employees of $201,351 ($1,908,088 x 0.1055).

The two-year average distribution employees' capitalized ratio is 17.98%. This ratio was applied to pro forma payroll of $677,398 for the specified distribution employees to determine the pro forma capitalized indirect labor for distribution employees of $121,7642 ($677,398 x 0.1798).

The two-year average maintenance and grounds employees' capitalized ratio is 2.55%. This ratio was applied to pro forma payroll of $244,496 for the specified maintenance and grounds employees to determine the pro forma capitalized indirect labor for maintenance and grounds employees of $6,247 ($244,496 x 0.0255).

As further provided in the settlement of the Company's 1987 base rate proceeding at Docket No. R-870769, a portion of payroll taxes, group life and health insurance expense, workers' compensation insurance expense and property insurance expense are capitalized.

In addition, as provided in the settlement of the Company's 1996 base rate proceeding at Docket No. R-963619, a portion of pension expense is capitalized based upon the ratio of capitalized payroll to total payroll.

The two-year average capitalized payroll ratio is 7.30%. This ratio was applied to pro forma group life and health insurance expense, property insurance expense, and pension expense of $2,009,658, $195,490, and $341,281, respectively, to determine the pro forma capitalized employee benefits, property insurance expense, and pension expense of $146,6161, $14,262, and $24,898, respectively.

The capitalized payroll ratio of 7.30% used to capitalize a portion of group life insurance, health insurance, property insurance, and pension expense is different from the capitalization ratios used for indirect labor because the calculations are based on different allocation factors as prescribed by the prior 1987 and 1996 base rate case settlements.

The capitalization ratios for workers' compensation and payroll taxes of 1.71% and 7.90%, respectively, are based on a two-year average of the actual workers' compensation insurance premiums and payroll tax rates applied to capitalized payroll. The 1.71% ratio of workers' compensation was applied to pro forma capitalized labor from Exhibit HIII-2-4(a) of $745,028 to determine capitalized workers' compensation expense of $12,706. The 7.90% ratio of payroll taxes (including FICA, FUTA, and SUTA) was applied to pro forma capitalized labor from Exhibit HIII-2-4(a) of $745,028 to determine capitalized payroll tax expense of $58,890.

Total pro forma capitalized indirect labor, employee benefits, property insurance expense, payroll taxes and pension expense total $586,735 ($201,351 + $121,764 + $6,247 + $146,616 + $14,262 + $12,706 + $58,890 + $24,898). The adjustment to capitalized indirect labor, employee benefits, property insurance expense, payroll taxes and pension expense in the amount of $(52,906) is determined by subtracting test year capitalized indirect labor, employee benefits, property insurance expenses, payroll taxes and pension expense of $639,641 from calculated pro forma capitalized indirect labor, employee benefits, property insurance expense, payroll taxes and pension expense of $586,735 ($586,735 - $639,641). The adjustment to capitalized indirect labor, employee benefits, property insurance expense, payroll taxes and pension expense in the amount of $(52,906) as an adjustment to Account No. 67580002 and Account No. 40801302 has been carried forward to Exhibit No. HIII-2, Column 3 and Exhibit No. HIV-15.

Q. Explain Exhibit No. HIII-2-7.

A. Exhibit No. HIII-2-7 annualizes the standby letter of credit fees to reflect expected increases in fees. To keep variable interest rates down and to enhance the marketability of the Pennsylvania Economic Development Financing Authority Exempt Facilities Revenue Refunding Bonds, Series A of 2008, the Company entered into a Reimbursement, Credit and Security Agreement that provides a direct pay letter of credit issued to the trustee. Based on the current rising interest rate environment, the Company expects a 10-basis point increase in the fee from its current rate of 1.40% to 1.50%. The rate of 1.50% is applied to the basis of the letter of credit of $12,185,425 based on a 360-day year to determine the total annual fees of $185,320 ($12,185,425 x .015 x 365/360 = $185,230).

The adjustment to the letter of credit fees in the amount of $18,532 is determined by subtracting test year letter of credit fees of $166,788 from calculated letter of credit fees of $185,320 ($185,320 - $166,788). The adjustment to letter of credit fees in the amount of $18,532 as an adjustment to Account No. 67580402 has been carried forward to Exhibit No. HIII-2, Column 3.

Q. Explain Exhibit No. HIII-2-8.

A. Exhibit No. HIII-2-8 annualizes expenses for directors' fees for the twelve months ended December 31, 2024, based on the Company's current complement of directors and schedule of board of director and board committee meetings. President and Chief Executive Officer Hand, who also serves as a director of the Company, is not paid directors' fees.

The adjustment in the amount of $1,352 is determined by subtracting directors' fees for the twelve months ended December 31, 2024, of $418,009 from pro forma directors' fees for the twelve months ended December 31, 2024, of $419,361 ($419,316 - $418,009 = $1,352). The adjustment to directors' fees in the amount of $1,352 as an adjustment to Account No. 67580800 has been carried forward to Exhibit No. HIII-2, Column 3.

Q. Explain Exhibit No. HIII-2-9.

A. Exhibit No. HIII-2-9 adjusts purchased power expenses by location for the twelve months ended December 31, 2024, to reflect generation, transmission, and distribution rates effective or contracted to in 2025, from the Company's electric service providers.

Purchased power expense charged to Account Nos. 61510000, 61530000, 61550000, and 61580000 during the twelve months ended December 31, 2024, of $790,156, $65,457, $559,160, and $14,734, respectively, are subtracted from pro forma purchased power expense of $1,150,568, $84,844, $952,234, and $22,520, respectively, to determine the adjustments to purchased power expense of $360,412, $19,387, $393,074, and $7,786, respectively. Pro forma purchased power includes contracted credits related to a curtailment program with CPower Energy Management expected to be effective for future periods. The adjustments to purchased power expense of $360,412, $19,387, $393,074, and $7,786 have been carried forward to Exhibit No. HIII-2, Column 3.

Q. Explain Exhibit No. HIII-2-10.

A. Exhibit No. HIII-2-10 eliminates expenses of the Company's annual employee picnic incurred during the twelve months ended December 31, 2024, of $5,262. The elimination of the costs of the Company's annual employee picnic of $(5,262) as an adjustment to Account No. 60480006 has been carried forward to Exhibit No. HIII-2, Column 3.

Q. Explain Exhibit No. HIII-2-12.

A. Exhibit No. HIII-2-12 adjusts operating expenses in the amount of $54,876 for additional costs of customer accounting and collecting (excluding uncollectible accounts), purchased power, and chemicals resulting from the annualization of the net increase in number of customers served during the twelve months ended December 31, 2024.

The historical average ratio of customer accounting and collecting, purchased power, and chemical costs to sales of water of 8.50% for the two-year period ended December 31,

2024, was calculated. This ratio was applied to the total operating revenue adjustments in the amount of $645,591 representing annualized increases from load growth, as calculated on Exhibit Nos. HII-2-4 through HII-2-12, to derive the adjustment of $54,876 ($645,591 x 0.085). The adjustment in the amount of $54,876 for additional costs of customer accounting and collecting, purchased power, and chemicals has been carried forward to Exhibit No. HIII-2, Column 3.

Q. Explain Exhibit No. HIII-2-13.

A. Exhibit No. HIII-2-13 annualizes trustee and portfolio management fees for the Company's qualified defined benefit pension plans based on plan asset values as of December 31, 2024. The Company pays for trustee and portfolio management services for its qualified defined benefit pension plans based upon the plan asset values as of the end of each calendar quarter. The adjustment in trustee and portfolio management fees in the amount of $(1,639) is determined by subtracting trustee and portfolio management fees recorded on the corporate books during the twelve months ended December 31, 2024, of $158,054 from the annual trustee and portfolio management fees based on plan asset values as of December 31, 2024, of $156,415, which is calculated based on a trustee and portfolio management fee of 0.25% of the market value of pension plan assets as of December 31, 2024, of $62,565,878 ($62,565,878 x 0.0025 = $156,415). The adjustment to Account No. 60480001 in the amount of $(1,639) for annualized trustee and portfolio management fees has been carried forward to Exhibit No. HIII-2, Column 3. The recovery of administrative costs of the Company's qualified defined benefit pension plans as an expense was specifically approved by the Commission in accordance with the Settlement Agreement under Docket No. R-00027975, and in accordance with the

Settlement Agreements under Docket No. R-2008-2023067, Docket No. R-2010-2157140, Docket No. R-2012-2336379, Docket No. R-2019-3000019, and Docket No. R-2022-3031340.

Q. Explain Exhibit No. HIII-2-14.

A. Exhibit No. HIII-2-14 adjusts fees for the Company's Standard & Poor's corporate credit rating based on the fee schedule in effect January 1, 2025 to December 31, 2025. The Company obtains an investment grade credit rating from Standard & Poor's to allow the Company to issue debt at lower interest rates than the Company could otherwise obtain, thereby reducing the cost of debt paid by York Water's customers. The adjustment of $1,000 is determined by subtracting the corporate credit rating fee incurred and recorded on the books during the twelve months ended December 31, 2024, of $93,000 from the corporate credit rating based on the fee schedule in effect January 1, 2025, of $94,000 ($94,000 - $93,000 = $1,000).

The adjustment to Account No. 67580403 in the amount of $1,000 for the Standard & Poor's corporate credit rating has been carried forward to Exhibit No. HIII-2, Column 3.

Q. Explain Exhibit No. HIII-2-15.

A. Exhibit No. HIII-2-15 amortizes over ten years the acquisition costs of the waterworks property and rights of the Westwood Mobile Home Park less than the original cost of the property when first devoted to public service less the applicable accrued depreciation. The negative acquisition adjustment of $(75,474) is determined by subtracting the depreciated original cost of waterworks property and rights of $96,795 from acquisition costs of

$21,321 [$21,321 - $96,795 = $(75,474)]. The negative acquisition adjustment of $(75,474) is divided by ten years to determine the annual negative amortization of $(7,547) [$(75,474) ÷ 10]. The annual negative amortization of the acquisition costs of $(7,547) has been carried forward to Exhibit No. HIII-2, Column 3. This amortization was specifically approved by the Commission as part of the settlement in the Company's 2018 base rate case at Docket No. R-2018-3000019. The amortization period began March 1, 2019 (the effective date of rates under Docket No. R-2018-3000019) and ends February 28, 2029.

Q. Explain Exhibit No. HIII-2-16.

A. Exhibit No. HIII-2-16 annualizes health insurance expense and group life insurance expense based on the Company's complement of employees and the annualization of actual monthly premiums effective in 2025 for health insurance and group life insurance. The Company offers health insurance coverage for its employees. The Company pays health benefits up to 80% of the premium cost for all participating employees. The Company also offers dental and vision programs for its employees. The Company pays for 80% of the participating employees' dental and vision benefits. The Company pays for a group life insurance benefit for all employees.

The actual 2025 monthly insurance premiums by class are annualized to determine the pro forma annual health insurance and group life insurance expense of $2,441,511. The adjustment in the amount of $411,237 is determined by subtracting the portion of health insurance expense to be borne by all employees of $431,853 and the health insurance expense recorded on the corporate books during the twelve months ended December 31,

2024, in the amount of $2,009,658 from the pro forma annual health insurance expense of $2,441,511 ($2,441,511 - $431,853 - $2,009,658 = $411,237). The adjustment to Account No. 60480005 of $201,392 has been carried forward to Exhibit No. HIII-2, Column 3.

I note that a portion of pro forma health insurance expense and group life insurance expense for the twelve months ended December 31, 2024, was capitalized in accordance with Appendix "B" of the settlement approved in the Company's 1987 rate case (Docket No. R-870769) and is reflected, as a reduction to operating expenses, in Account No. 67580002, Miscellaneous Expenses-Administrative and General Expenses Transferred on Exhibit No. HIII-2-6, which I have explained earlier.

Q. Explain Exhibit No. HIII-2-17.

A. Exhibit No. HIII-2-17 adjusts workers' compensation insurance expense based on pro forma payroll at workers compensation rates in effect as of January 1, 2025. Total pro forma payroll of $10,916,302 is detailed by workers' compensation insurance classifications of waterworks employees, outside sales, employees and clerical employees in the amounts of $5,878,282, $1,350,810, and $3,687,210, respectively. The actual January 1, 2025 workers' compensation premium rates per $100 by classifications are $2.31, $0.21, and $0.08, respectively. These rates are applied to the pro forma payroll by classification to determine the initial workers' compensation insurance premiums. The initial premiums are $135,788 for waterworks employees, $2,837 for outside sales employees, and $2,950 for clerical employees. The initial premiums are subject to an increased employer's liability limit factor of 1.10% and an experience modification factor

of 1.260 as established by the Pennsylvania Compensation Insurance Bureau. Total premiums subject to experience modification of $141,575 ($135,788 + $2,837 + $2,950 = $141,575) are multiplied by the employer's liability limit coverage factor of 1.10% to determine the cost of the increased employer's liability limit of $1,557 ($141,575 x 0.011). The total of initial premiums of $141,575 and increased employer's liability limit cost of $1,557 are multiplied by the Pennsylvania Experience Modification of 1.260 to arrive at adjusted workers' compensation insurance premiums of $180,346 [($141,575 + $1,557) x 1.260]. Adjusted workers' compensation insurance premiums of $180,346 are increased by a 5.0% schedule rating premium of $9,017 ($180,346 x 0.05). The premiums adjusted by application of experience modification of $180,346 and schedule rating of $9,017 are multiplied by and reduced by a 5% safety credit of $(9,468) [($180,346 + $9,017) x (0.05)] to arrive at premiums adjusted by application of schedule rating and safety credit of $179,896 ($180,346 + $9,017 - $9,468). Premiums adjusted by application of schedule rating and safety credit of $179,896 are reduced by an 11.33% premium discount of $20,382 [$179,896 x (0.1133)] and increased by the Pennsylvania Compensation Rating Bureau Fee of $175, a foreign and domestic terrorism surcharge of $3,275, a catastrophe (other than terrorism) surcharge of $2,183, and a 2.42% Pennsylvania Employer Assessment of $3,997 [($179,896 - $20,382 + $175 + $3,275 + $2,183) x 0.0242] to determine pro forma workers' compensation insurance expense of $169,143 ($179,896 - $20,382 + $175 + $3,275 + $2,183+ $3,997). The adjustment to Workers' Compensation Insurance expense of $(309) is determined by subtracting Workers' Compensation Insurance expense recorded on the corporate books during the twelve months ended December 31, 2024, of $169,452 from pro forma workers' compensation insurance expense of $169,143 [$169,143 - $169,452 = $(309)]. The

adjustment to Account No. 65880000 of $(309) has been carried forward to Exhibit No. HIII-2, Column 3.

A portion of pro forma workers' compensation insurance expense for twelve months ended December 31, 2024, is capitalized and is reflected, as a reduction to operating expenses, in Account No. 67580002, Miscellaneous Expenses-Administrative and General Expenses Transferred, on Exhibit No. HIII-2-6, which I have explained earlier.

Q. Explain Exhibit No. HIII-2-18.

A. Exhibit No. HIII-2-18 adjusts gas service expenses incurred during the historic test year to annualized levels based on service rates in effect as of January 1, 2025, reflecting average gas usage over the two-year period including the historic test year. Average gas usage was calculated for the Company's six facilities based on billings for calendar years 2023 and 2024.

The calculated average gas usage by facility was multiplied by the 2025 supply charge, gas cost, distribution charge, and pass through charge and added to the fixed customer charge for each facility. Sales tax was calculated on the combined costs to arrive at pro forma gas service costs of $9,171, $8,498, $11,574, $40,618, $18,701, and $6,378. Gas costs recorded on the corporate books for the twelve months ended December 31, 2024, in the amounts of $7,450, $6,032, $9,973, $31,313, $16,082, and $5,725 were subtracted from pro forma gas costs of $9,171, $8,498, $11,574, $40,618, $18,701, and $6,378, respectively, to determine the adjustments of $1,721, $2,466, $1,601, $9,304, $2,620, and $652, or a total adjustment of $18,363. The adjustments to gas service expense of

$1,721, $2,466, $1,601, $9,304, $2,620, and $652 have been carried forward to Exhibit No. HIII-2, Column 3.

Q. Explain Exhibit No. HIII-2-19.

A. Exhibit No. HIII-2-19 normalizes over three years the costs of accounting, legal, printing, and other services related to the Amendment to Form S-3 for the Company's Dividend Reinvestment and Direct Stock Purchase and Sale Plan filed with the Securities and Exchange Commission in 2022 and the filing of a Securities Certificate to allow shareholders to continue to reinvest their dividends and shareholders and first-time buyers to purchase and sell the Company's stock. Based on the present rate of issuance of common shares under the Company's Dividend Reinvestment and Direct Stock Purchase and Sale Plan, the Company would be required to file another Form S-3 with the Securities and Exchange Commission in 2025 in order to continue its Dividend Reinvestment and Direct Stock Purchase and Sale Plan.

The costs of accounting, legal, printing, and other services related to the Amendment to Form S-3 for the Company's Dividend Reinvestment and Direct Stock Purchase and Sale Plan of $23,285 is divided by three years to determine the annual normalization of $7,762. The normalization of the costs of accounting, legal, printing, and other services related to the Amendment to Form S-3 for the Company's Dividend Reinvestment and Direct Stock Purchase and Sale Plan of $7,762 has been carried forward to Exhibit No. HIII-2, Column 3.

Q. Explain Exhibit No. HIII-2-20.

A. Exhibit No. HIII-2-20 normalizes over ten years the costs of accounting and legal services related to the Form S-8 for the Company's Long-term Incentive Plan filed with the Securities and Exchange Commission in 2016 and the filing of a Securities Certificate to allow shareholders to allow the Company to ensure its compensation practices are competitive in the industry to assist in the attraction and retention of directors and key employees vital to the Company's success. Based on the ten-year life of the Long-term Incentive Plan, the Company would be required to file another Form S-8 with the Securities and Exchange Commission in 2026 in order to continue its Long-term Incentive Plan.

The costs of accounting, legal, printing, and other services related to the Form S-8 for the Company's Long-term Incentive Plan of $17,402 is divided by ten years to determine the annual normalization of $1,740. The normalization of the costs of accounting and legal services related to the Amendment to Form S-3 for the Company's Long-term Incentive Plan of $1,740 has been carried forward to Exhibit No. HIII-2, Column 3.

Q. Explain Exhibit No. HIII-2-21.

A. Exhibit No. HIII-2-21 normalizes over seventeen years the costs of accounting and legal services related to the Amendment to Form S-8 for the Company's Employee Stock Purchase Plan filed with the Securities and Exchange Commission in 2013 to register additional shares for the plan's use. Based on the present rate of issuance of common shares under the Company's Employee Stock Purchase Plan, the Company would be required to file another Form S-8 with the Securities and Exchange Commission in 2030 in order to continue its Employee Stock Purchase Plan.

The costs of accounting, legal, printing, and other services related to the Form S-8 for the Company's Employee Stock Purchase Plan of $17,878 is divided by seventeen years to determine the annual normalization of $1,052. The normalization of the costs of accounting and legal services related to the Amendment to Form S-8 for the Company's Employee Stock Purchase Plan of $1,052 has been carried forward to Exhibit No. HIII-2, Column 3.

Q. Explain Exhibit No. HIII-2-22.

A. Exhibit No. HIII-2-22 amortizes over ten years the acquisition costs of the waterworks property and rights of Scott Water Company in excess of the original cost of the property when first devoted to public service less the applicable accrued depreciation. Reasonable acquisition costs greater than depreciated original cost are permitted to be included in rate base and amortized over ten years in accordance with Section 1327 of the Public Utility Code. The acquisition adjustment of $22,659 is determined by subtracting the depreciated original cost of waterworks property and rights of $9,144 from acquisition costs of $31,803 ($31,803 - $9,144 = $22,659). The acquisition adjustment of $22,659 is divided by ten years to determine the annual amortization of $2,266 ($22,659 ÷ 10). The annual amortization of the acquisition costs of $2,266 has been carried forward to Exhibit No. HIII-2, Column 3.

Refer to the testimony of Mr. Hand (York Water Statement No. 1) for a further explanation of this acquisition and the basis for the Company's proposed amortization.

Q. Explain Exhibit No. HIII-2-23.

A. Exhibit No. HIII-2-23 adjusts gasoline expense for the twelve months ended December 31, 2024, based on the volumes of gasoline used during the twelve months ended December 31, 2024, and the gasoline price per gallon as of March 2025. Pro forma gasoline costs of $256,726 are determined by multiplying the volume of gasoline used during the twelve months ended December 31, 2024, of 75,530 gallons times the price per gallon of gasoline as of March 2025 of $3.399 (75,530 x $3.399 = $256,726). Gasoline costs recorded on the corporate books during the twelve months ended December 31, 2024, of $225,704 and pro forma gasoline costs charged to capital and non-operating accounts of $2,671 are subtracted from the pro forma gasoline costs of $256,726 to determine the adjustment of gasoline costs of $28,352 ($256,726 - $225,704 - $2,671 = $28,352). The adjustment of $28,352 has been carried forward to Exhibit No. HIII-2, Column 3.

Q. Explain Exhibit No. HIII-2-24.

A. Exhibit No. HIII-2-24 adjusts the present value costs of postretirement benefits other than pensions (unfunded health and death benefits) expensed during the twelve months ended December 31, 2024, to reflect pay-as-you-go costs of postretirement benefits other than pensions (unfunded death benefits). The present value costs of postretirement benefits other than pensions expensed during the twelve months ended December 31, 2024, is $(10,712). Pay-as-you-go costs of postretirement benefits other than pensions incurred by the Company during the twelve months ended December 31, 2024, were $2,000, representing one death. The adjustment in the amount of $12,712 is determined by subtracting the present value of postretirement benefit other than pensions recorded on

the corporate books during the twelve months ended December 31, 2024, in the amount of $(10,712) from the pay-as-you-go costs of postretirement benefits other than pensions during the twelve months ended December 31, 2024, in the amount of $2,000 [$2,000 - $(10,712) = $12,712]. The adjustment to postretirement benefits other than pensions of $12,712 has been carried forward to Exhibit No. HIII-2, Column 3.

Q. Explain Exhibit No. HIII-2-25.

A. Exhibit No. HIII-2-25 adjusts fuel expense used for pumping to reflect current unit prices applied to a two-year average of fuel oil used. Pro forma fuel expense in the amount of $39,712 for fuel oil used for pumping is based on applying the unit price of fuel oil near the time of the rate filing to the two-year average of fuel oil used. The adjustment to fuel expense in the amount of $14,520 is determined by subtracting test year fuel expense used for pumping of $25,191 from calculated pro forma fuel expense of $39,712 ($39,712 - $25,191 = $14,520). The adjustment to fuel expense in the amount of $14,520 has been carried forward to Exhibit No. HIII-2, Column 3.

Q. Explain Exhibit No. HII-2-26.

A. Exhibit No. HIII-2-26 amortizes over ten years the acquisition costs of the waterworks property and rights of Margaretta Mobile Home Park in excess of the original cost of the property when first devoted to public service less the applicable accrued depreciation. Reasonable acquisition costs greater than depreciated original cost are permitted to be included in rate base and amortized over ten years in accordance with Section 1327 of the Public Utility Code. The acquisition adjustment of $55,509 is determined by subtracting the depreciated original cost of waterworks property and rights of $46,159 from

acquisition costs of $101,667 ($101,667 - $46,159 = $55,509). The acquisition adjustment of $55,509 is divided by ten years to determine the annual amortization of $5,551 ($55,509 ÷ 10). The annual amortization of the acquisition costs of $5,551 has been carried forward to Exhibit No. HIII-2, Column 3. This amortization was specifically approved by the Commission as part of the settlement in the Company's 2018 base rate case at Docket No. R-2018-3000019. The amortization period began March 1, 2019 (the effective date of rates under Docket No. R-2018-3000019) and ends February 28, 2029.

Q. Explain Exhibit No. HIII-2-27.

A. Exhibit No. HIII-2-27 includes, in operating costs, the expansion of The York Water Cares Low Income Customer Assistance Program. The Commission in its Order at Docket No. R-2022-3031340, dated March 1, 2023 approved $40,000 annually until its next base rate case. The program has been a success in helping low-income customers pay their water and wastewater bills to avoid shut off. The Company requests the funding level be increased to $60,000 annually on the basis that the $40,000 each year has been fully expended and the Company's customer base and service territory continues to grow. This adjustment of $20,000 has been carried forward to Exhibit No. FIII-2, Column 3.

Q. Explain Exhibit No. HIII-2-28.

A. Exhibit No. HIII-2-28 adjusts bank fees to reflect current unit prices applied to the historic test year levels. Pro forma bank fees in the amount of $162,964 are based on applying the unit prices of the various types of fees near the time of the rate filing to the historic test year levels of bank fees. The adjustment to bank fees in the amount of $71,351 is determined by subtracting test year bank fees of $91,614 from calculated pro

forma bank fees of $162,964 ($162,964 - $91,614 = $71,351). The adjustment to bank fees in the amount of $71,351 has been carried forward to Exhibit No. HIII-2, Column 3.

Q. Explain Exhibit No. HIII-2-29.

A. Exhibit No. HIII-2-29 normalizes over ten years the costs of a survey of the Company's filter plant property conducted in 2015. The Company is aware of potential transfers of real estate on lands adjacent to the filter plant property, and desired to identify the boundaries of its filter plant property. The Company anticipates surveying its filter plant property approximately every ten years.

The costs of the survey of the Company's filter plant property during the twelve months ended December 31, 2015, of $30,810 are divided by 10 years to determine the normalized level of $3,081 ($30,810 ÷ 10). The adjustment to normalize the costs of surveying the Company's filter plant property of $3,081 as an adjustment to Account No. 63620002 have been carried forward to Exhibit No. HIII-2, Column 3. I note that the Company reflected a normalized level of survey costs related to its filter plant property in its last rate case at Docket No. R-2022-3031340.

Q. Explain Exhibit No. HIII-2-30.

A. Exhibit No. HIII-2-30 normalizes over five years the cost of a service life study incurred and recorded during the twelve months ended December 31, 2022, of $25,688. The Company, as a public utility with gross intrastate revenues in excess of $20 million, is required to file a service life study with the Commission every five years pursuant to Chapter 73 of the Public Utility Code.

The costs of the service life study during the twelve months ended December 31, 2022, of $25,688 are divided by five years to determine the normalized level of $5,138. Cost of this study amortized on the corporate books during the twelve months ended December 31, 2024, of $5,138 are subtracted from the normalized costs of $5,138 to determine the adjustment of $0. The adjustment to normalize the costs of the service life study of $0 as an adjustment to Account No. 63280003 has been carried forward to Exhibit No. HIII-2, Column 3. I note that the Company reflected a normalized level of service life study costs in its last rate case at Docket No. R-2022-3031340.

Q. Explain Exhibit No. HIII-2-31.

A. Exhibit No. HIII-2-31 normalizes on-line bill payment fees for the twelve months ended December 31, 2024, based on the Company's average monthly fees charged under the current contract. The Company does not charge customers to use the on-line bill payment system. Monthly fees have been generally increasing as more customers use the on-line bill payment method. Average monthly fees for the period January and February 2025 of $42,510 were used as the baseline for normalization by dividing by two and multiplying by twelve to determine pro forma annual fees of $510,126. Fees recorded on the corporate books for the twelve months ended December 31, 2024, of $509,164 are subtracted from annualized fees of $510,126 to determine the adjustment of $962. The adjustment to on-line bill payment fees of $962 to Account No. 67570400 has been carried forward to Exhibit No. HIII-2, Column 3.

Q. Explain Exhibit No. HIII-2-32.

A. Exhibit No. HIII-2-32 amortizes over ten years the acquisition costs of the waterworks property and rights of Lincoln Estates Mobile Home Park less than the original cost of the property when first devoted to public service less the applicable accrued depreciation. The negative acquisition adjustment of $(77,186) is determined by subtracting the depreciated original cost of waterworks property and rights of $146,957 from acquisition costs of $69,772 [$69,772 - $146,957 = $(77,186)]. The negative acquisition adjustment of $(77,186) is divided by ten years to determine the annual negative amortization of $(7,719) [$(77,186) ÷ 10]. The annual negative amortization of the acquisition costs of $(7,719) has been carried forward to Exhibit No. HIII-2, Column 3. This amortization was specifically approved by the Commission as part of the settlement in the Company's 2018 base rate case at Docket No. R-2018-3000019. The amortization period began March 1, 2019 (the effective date of rates under Docket No. R-2018-3000019) and ends February 28, 2029.

Q. Explain Exhibit No. HIII-2-33.

A. Exhibit No. HIII-2-33 amortizes over ten years the acquisition costs of the waterworks property and rights of The Meadows less than the original cost of the property when first devoted to public service less the applicable accrued depreciation. The negative acquisition adjustment of $(158,818) is determined by subtracting the depreciated original cost of waterworks property and rights of $221,778 from acquisition costs of $62,960 [$62,960 - $221,778 = $(158,818)]. The negative acquisition adjustment of $(158,818) is divided by ten years to determine the annual negative amortization of $(15,882) [$(158,818) ÷ 10]. The annual negative amortization of the acquisition costs of $(15,882) has been carried forward to Exhibit No. HIII-2, Column 3. This amortization was

specifically approved by the Commission as part of the settlement in the Company's 2018 base rate case at Docket No. R-2018-3000019. The amortization period began March 1, 2019 (the effective date of rates under Docket No. R-2018-3000019) and ends February 28, 2029.

Q. Explain Exhibit No. HIII-2-34.

A. Exhibit No. HIII-2-34 normalizes over five years the costs of legal services related to the Company's Long Term Infrastructure Improvement Plan filed with the Commission in 2021 to file the plan required pursuant to 52 Pa. Code Section 121. The Code requires the Company to file a Long Term Infrastructure Improvement Plan every five years with the Commission, so the Company would be required to file another plan in 2026.

The costs of legal services related to the Company's Long Term Infrastructure Improvement Plan of $3,358 are divided by five years to determine the annual normalization of $672. Fees recorded on the corporate books for the twelve months ended December 31, 2024, of $0 are subtracted from normalized fees of $672 to determine the adjustment of $672. The adjustment of the costs of legal services related to the Company's Long Term Infrastructure Improvement Plan of $672 has been carried forward to Exhibit No. HIII-2, Column 3.

Q. Explain Exhibit No. HIII-2-35.

A. Exhibit No. HIII-2-35 adjusts fees for the Securities and Exchange Commission reporting software to reflect actual fees effective January 1, 2025. The software allows the Company to file all legally required Securities and Exchange Commission documents and

the upgrade is necessary to be compliant with the EDGAR Next requirements promulgated by the Securities and Exchange Commission. The adjustment of $7,654 is determined by subtracting the reporting software fees incurred and recorded on the books during the twelve months ended December 31, 2024, of $20,900 from the reporting software fees based on the updated contract in effect January 1, 2025 of $28,544 ($28,544 - $20,900 = $7,654). The adjustment of $7,654 has been carried forward to Exhibit No. HIII-2, Column 3.

Q. Explain Exhibit No. HIII-2-36.

A. Exhibit No. HIII-2-36 eliminates legal expenses related to potential acquisitions incurred during the twelve months ended December 31, 2024, of $133,751. The elimination of the costs of the Company's legal expense related to potential acquisitions of $(133,751) as an adjustment to Account No. 63380000 has been carried forward to Exhibit No. HIII-2, Column 3.

Q. Explain Exhibit No. HIII-2-37.

A. Exhibit No. HIII-2-37 amortizes the actual costs of replacing customer-owned lead service lines, excluding the costs recovered as part of the Commission-approved settlements in the Company's 2018 base rate case at Docket No. R-2018-3000019 and the Company's 2022 base rate case at Docket No. R-2022-3031340 over a period of four years. In accordance with Commission's Order entered at Docket No. P-2016-2577404, the Company is permitted to record the cost of all customer-owned lead service line replacements as a regulatory asset. The Company is permitted to amortize the amounts

booked to the regulatory asset account in a base rate proceeding over a reasonable period to be not less than four years and not to exceed six years.

The Company has incurred actual costs replacing customer-owned lead service lines since its last base rate case of $581,191. As part of the settlements in the Company 2018 base rate case at Docket No. R-2018-3000019 and the Company's 2022 base rate case at Docket No. R-2022-3031340, the Commission allowed the regulatory asset to be amortized over a period of four years. The amortization is determined to be $145,298 ($581,191 ÷ 4 = $145,298). The adjustment to maintenance of services in the amount of $137,767 is determined by subtracting the updated amortization of $145,298 from the amortization recorded during the twelve months ended December 31, 2024, of $283,064 [$283,064 - $145,298 = $(137,767)]. The adjustment for customer-owned lead service line replacements of $(137,767) as an adjustment to Account No. 63660004 has been carried forward to Exhibit No. HIII-2, Column 3.

Q. Explain Exhibit No. HIII-2-38.

A. Exhibit No. HIII-2-38 adjusts licensing fees for the enterprise resource planning software to reflect actual licensing fees effective January 1, 2025. The software integrates and manages the Company's core business processes, and the upgrade is necessary as the previous software was in use for over twenty years and has reached its end of life. The adjustment of $640,939 is determined by subtracting the enterprise resource planning software fees incurred and recorded on the books during the twelve months ended December 31, 2024, of $191,972 from the enterprise resource planning software fees based on the updated contract in effect January 1, 2025 of $832,910 ($832,910 -

$191,9720 = $640,939). The adjustment of $640,939 has been carried forward to Exhibit No. HIII-2, Column 3.

Q. Explain Exhibit No. HIII-2-39

A. Exhibit No. HIII-2-39 adjusts automobile insurance for the twelve months ended December 31, 2024, based on the policy effective January 1, 2025. Automobile insurance costs recorded on the corporate books during the twelve months ended December 31, 2024, of $73,350 and pro forma automobile insurance costs charged to capital and non-operating accounts of $2,245 are subtracted from the pro forma automobile insurance costs of $99,425 to determine the adjustment of automobile insurance costs of $23,830 ($99,425 - $73,350 - $2,245 = $23,830). The adjustment of $23,830 has been carried forward to Exhibit No. HIII-2, Column 3.

Q. Explain Exhibit No. HIII-2-40.

A. Exhibit No. HIII-2-40 adjusts uncollectible accounts expense based on pro forma revenues under proposed rates and a two-year average ratio of net uncollectible accounts written off to total operating revenues.

Pro forma historic test year revenues under proposed rates (Refer to Exhibit No. HII-2) of $75,534,361 are multiplied by the two-year average ratio of net write-offs to total operating revenues of 0.66% to determine the pro forma uncollectible accounts expense under proposed rates of $498,634 ($75,534,361 x 0.0066). The adjustment to uncollectible accounts expense in the amount of $59,288 is determined by subtracting pro forma uncollectible accounts expense under existing rates of $439,347 (Refer to Exhibit

No. HIII-2-2) from pro forma uncollectible accounts expense under proposed rates of $498,634 ($498,634 - $439,347 = $59,288). The adjustment to uncollectible accounts expense of $59,288 to Account No. 67070000 has been carried forward to Exhibit No. HIII-2, Column 6.

Q. Explain Exhibit No. HIII-9.

A. Exhibit No. HIII-9 provides a comparative statement of advertising expense per books for the twelve months ended December 31, 2024, December 31, 2023, and December 31, 2022. The Company did not have advertising expenses during the three-year period ended December 31, 2024.

Q. Explain Exhibit No. HIII-10.

A. Exhibit No. HIII-10 provides a schedule of social and service organization memberships paid for by the Company during the twelve months ended December 31, 2024, in the amount of $2,480.

The Company charged social and service membership fees for the twelve months ended December 31, 2024, to Account No. 42600060, Miscellaneous Non-operating Expenses. No social or service memberships are included in the cost of service in this rate proceeding.

Q. Explain Exhibit No. HIII-11.

A. Exhibit No. HIII-11 provides a schedule, by major components, of Contractual Services, Rate Case Expense and Miscellaneous Expense for the twelve months ended December

31, 2024, 2023, and 2022. Page 2 of Exhibit No. HIII-11 provides a schedule of Contractual Services-Auditing for the twelve months ended December 31, 2024, 2023, and 2022. Page 3 of Exhibit No. HIII-11 provides a schedule of Contractual Services-Tax, for the twelve months ended December 31, 2024, 2023, and 2022. Page 4 of Exhibit No. HIII-11 provides a schedule by major components of Contractual Services-Other Accounting for the twelve months ended December 31, 2024, 2023, and 2022. Page 5 of Exhibit No. HIII-11 provides a schedule of Legal Fees Expense for the twelve months ended December 31, 2024, 2023, and 2022. Page 6 of Exhibit No. HIII-11 provides a schedule, by major components, of Contractual Services-Outside Services for the twelve months ended December 31, 2024, 2023, and 2022. Page 7 of Exhibit No. HIII-11 provides a schedule of Rate Case Expense for the twelve months ended December 31, 2024, 2023, and 2022. Page 8 of Exhibit No. HIII-11 shows the components of Other Miscellaneous Expense for the twelve months ended December 31, 2024, 2023, and 2022.

Q. Explain Exhibit No. HIII-13.

A. Exhibit No. HIII-13 provides a detailed schedule of all charitable and civic contributions in the amount of $133,863 for the twelve months ended December 31, 2024. These contributions were offset by $112,600 of tax credits received from the state for educational improvement and scholarship contributions, for a net contribution of $21,263. York Water charged charitable and civic contributions for the twelve months ended December 31, 2021, to Account No. 42600020, Contributions. No charitable or civic contributions are included in the cost of service in this rate proceeding.

Q. Explain Exhibit No. HIII-15.

A. Exhibit No. HIII-15 provides a schedule of pension contributions, SFAS87 pension expense, the amount of SFAS87 pension that was expensed to Operations & Maintenance expenses, and the amount of SFAS87 that was deferred. The Commission, in its Order at Docket No. R-2022-3031340, dated March 1, 2023, limited the contribution to the pension plans to the maximum deductible amount under the Internal Revenue Code, reducing the amount contributed in the year ended December 31, 2024. The Company has two defined benefit pension plans (one plan for union-represented employees and one plan for administrative and general employees). The Company has reflected in its cost of service for ratemaking purposes the cash contributions to its two defined benefit pension plans since the pension plans were established in 1959. The Commission, in its Order at Docket No. R-00027975, dated June 26, 2003, in its Order at Docket No. R-00049165, dated November 9, 2004, in its Order at Docket No. R-00063122, dated September 15, 2006, in its Order at Docket No. R-2008-2023067, dated October 9, 2008, in its Order at Docket No. R-2010-2157140, dated November 4, 2010, in its Order at Docket No. R-2012-2336379, dated February 28, 2014, in its Order at Docket No. R-2018-3000019, dated March 1, 2019, and in its Order at Docket No. R-2022-3031340, dated March 1, 2023 approved cash contributions plus administrative costs as the basis for the Company's ratemaking claim for pension expenses and authorized the Company to defer on its books, the difference between cash contributions and SFAS87 expense.

Q. Explain Exhibit No. HIII-16.

A. Exhibit No. HIII-16 provides SFAS106 expenses incurred during the twelve months ended December 31, 2024, for postretirement death benefits. These expenses were

eliminated from the cost of service on Exhibit No. HIII-2-24. The "pay-as-you-go" expense of $2,000, representing one death benefit paid, is reflected as part of the historic test year cost of service.

Q. Explain Exhibit No. HIII-24.

A. Exhibit No. HIII-24 provides a listing of payments made to industry organizations during the twelve months ended December 31, 2024. These payments are exclusive of lobbying fees, and they are included in cost of service.

Q. Explain Exhibit No. HIII-27.

A. Exhibit No. HIII-27 indicates that no employee positions have been eliminated in the 2024/2025 timeframe.

Q. Are you sponsoring any other exhibits regarding the Company's operating expenses?

A. Yes, I am also sponsoring Exhibit Nos. HIII-3, HIII-4, HIII-5, HIII-6, HIII-7, HIII-8, HIII-12, HIII-14, HIII-17, HIII-18, HIII-19, HIII-20, HIII-21, HIII-23, HIII-25, HIII-26, and HIII-28.

Q. Explain Exhibit No. HIV-1.

A. Exhibit No. HIV-1 provides a copy of the Company's latest Pennsylvania corporate tax report (calendar year 2023). A Pennsylvania corporate tax settlement is not included as the Department of Revenue no longer sends tax settlements.

Q. Explain Exhibit No. HIV-5.

A. Exhibit No. HIV-5 provides a schedule of deferred water operations investment tax credits as of December 31, 2024. In 1972, the Company timely elected the special rule for ratable flow-through of investment tax credits under former Section 46(f)(2) (at that time, Section 46(e)(2)) of the Internal Revenue Code which requires that the Federal investment tax credits be flowed through to ratepayers as a reduction to federal income taxes ratably over the depreciable life of the property. The Company adopted a fifty-year amortization period for Federal investment tax credits to meet the requirements of former Section 46(f)(2) of the Internal Revenue Code. The Company's books reflect the annual amortization for the test year. Because the Company timely elected in 1972 the special rule for ratable flow-through of Federal investment tax credits under former Section 46(f)(2) (at that time Section 46(e)(2)) of the Internal Revenue Code, the only reduction that may be made to the Company's cost of service, with respect to Federal investment tax credits generated in calendar year 1972 and thereafter, is to amortize the Federal investment tax credits ratably over the life of the property. Under the special rule for ratable flow-through, the rate base of the utility cannot be reduced by any portion of deferred Federal investment tax credits.

Q. Explain Exhibit No. HIV-6.

A. Exhibit No. HIV-6 provides a schedule of the adjustments to water taxable net income per books for the twelve months ended December 31, 2024. Adjustments to taxable net income per books for the twelve months ended December 31, 2024, are classified as Expenses Recorded on Books Not Deducted on Return, Income on Books Not Included on Return, and Deductions Not Charged against Booked Income. Tax adjustments classified as expenses recorded on books not deducted on return include: (1) depreciation

on the books in excess of tax depreciation in the amount of $2,231,238; (2) nondeductible lobbying expenses in the amount of $24,228 (for ratemaking purposes the Company does not include lobbying expenses in the cost of service); (3) amortization of rate case expense in the amount of $99,224 (the Company deducts rate case expense in the year incurred for tax purposes but amortizes the expense for book purposes); (4) amortization of service life study expense in the amount of $5,138 (the Company deducts service life study expense in the year incurred for tax purposes but amortizes the expense for book purposes); (5) debt expense amortization on the PEDFA Exempt Facilities Revenue Bonds, Series 2004, the PEDFA Exempt Facilities Revenue Bonds, Series 2008B, the PEDFA Exempt Facilities Revenue Bonds, Series 2004, Monthly Senior Notes, Series 2010A, YCIDA Revenue Bonds, Series 2006, and the PEDFA Exempt Facilities Revenue Refunding Bonds, Series 2014 in the amount of $107,409 (the Company deducted the debt expense in the year it was refinanced for tax purposes but amortizes the expense for book purposes); (6) postretirement benefits in the amount of $(12,712) (for ratemaking purposes the Company does not include the present value of postretirement benefits in the cost of service) (Refer to Exhibit No. HIII-2-24 for the elimination of postretirement benefits from the cost of service); (7) nondeductible vacation pay in the amount of $6,243 (for ratemaking purposes, the Company does not include accrued vacation pay in the cost of service); (8) amortization of acquisition adjustments in the amount of $(51,395) that are not deductible for income taxes (acquisition adjustments are reflected on the Company's income statement as "below the line"); (9) change in bad debt reserve in the amount of $605,000 (the Company deducts bad debt expense when it is incurred and not when it is reserved); (10) expenses relative to the Company's savings plan and supplemental retirement plan in the amount of $(386,104) (savings plan and supplemental

retirement plan expenses are reflected on the Company's income statement as "below the line"); (11) stock based compensation in the amount of $(418) (for ratemaking purposes, the Company does not include non-vested stock based compensation in the cost of service); (12) nondeductible parking expenses in the amount of $8,357 (pursuant to the Tax Cuts and Jobs Act of 2017, the cost of qualified parking expenses provided to employees are 50% deductible); (13) nondeductible business meals in the amount in the amount of $16,770 (only 50% of otherwise allowable meal expenses are deductible); and (14) a prior year state income tax adjustment in the amount of $1,786 (included on 2024's Form 1120).

Tax adjustments classified as income on books not subject to income taxes include interest income received in the amount of $157,875, which is exempt from Federal and state income taxes, and the portion of dividends from domestic corporations (Columbia Water Company common stock) not subject to income tax of $9,184 (interest income and dividends are reflected on the Company's income statement as "below the line").

Tax adjustments classified as deductions not charged against book income include: (1) tax repair expense in the amount of $15,825,216 (the Company deducts repair items for tax purposes but capitalizes repair items for book purposes); (2) cost of customer-owned lead service line replacements in the amount of $(83,895) (the Company deducts the cost of customer-owned lead service line replacements in the year incurred for tax purposes but amortizes the expense for book purposes); (3) cost of removal deducted currently in the amount of $3,505,008 (the Company deducts cost of removal for tax purposes but capitalizes cost of removal for book purposes); (4) tank painting deducted currently of

$16,414 (the Company capitalizes tank painting for book purposes but deducts the costs immediately for tax purposes); (5) changes in prepaid expenses during the current accounting period of $542,011 (the Company deducts prepaid expenses in the year incurred for tax purposes but amortizes the expense for book purposes); (6) contributions and advances deducted currently of $67,419 (the Company deducts refunds paid for those advances that were taxable pursuant to the Tax Cuts and Jobs Act of 2017); and (7) charitable contributions carryover deducted currently of $343,271 (charitable or civic contributions are reflected on the Company's income statement as "below the line").

Adjustments to pro forma taxable net income for ratemaking purposes for the twelve months ended December 31, 2024, are shown on Exhibit No. HIV-17-2, which I will explain later.

Q. Explain Exhibit No. HIV-12.

A. Page 2 of Exhibit No. HIV-12 provides a detail of taxes accrued per books as of December 31, 2024, as well as an explanation of the basis for the accrual of each tax. Page 3 of Exhibit HIV-12 provides a schedule of the amount of taxes accrued monthly for the twelve months ended December 31, 2024.

Q. Explain Exhibit No. HIV-14.

A. Exhibit No. HIV-14 provides a copy of the Company's corporate federal tax returns and supporting schedules for the calendar years 2023, 2022, and 2021. The 2024 corporate federal tax return is on extension and will not be filed until September or October 2025.

Q. Explain Exhibit No. HIV-15.

A. Exhibit No. HIV-15 summarizes adjustments to operating taxes other than income taxes for the twelve months ended December 31, 2024, for ratemaking purposes and to reflect additional operating taxes other than income taxes resulting from the proposed increase in operating revenues.

Operating taxes other than income taxes per books for the twelve months ended December 31, 2024, in the amount of $1,525,678 are shown in Column 1 of Exhibit No. HIV-15 page 2.

Adjustments to operating taxes other than income taxes of $119,870 are made to reflect the calculation of the pro forma level of taxes other than income taxes under existing rates for the twelve months ended December 31, 2024. Such adjustments are shown in Column 3 of Exhibit No. HIV-15 and are detailed in Exhibit Nos. HIV-15-1 through HIV-15-4, and HIII 2-6. Adjustments to operating taxes other than income taxes amounting to $60,725 are made to reflect the increased operating taxes other than income taxes that result from the increase in water operating revenues under proposed rates, and these adjustments are shown in Column 6 of Exhibit No. HIV-15 and are detailed in Exhibit No. HIV-15-5.

Q. Explain Exhibit No. HIV-15-1.

A. Exhibit No. HIV-15-1 presents an adjustment to reflect FICA payroll taxes on pro forma payroll for twelve months ended December 31, 2024, at the tax rate and wage bases effective January 1, 2025. The January 1, 2025 hospitalization insurance (“HI”)

component of the FICA tax of 1.45% is applied to taxable pro forma payroll of $10,916,302 (Refer to Exhibit No. HIII-2-4 (a), page 1) to determine pro forma HI component of FICA taxes of $158,286 ($10,916,302 x 0.0145 = $158,286). Total pro forma payroll in the amount of $10,916,302 is reduced by $637,909, which is that portion of pro forma payroll not subject to old age, survivors, and disability insurance component ("OASDI") of FICA tax to arrive at taxable pro forma payroll of $10,278,394 ($10,916,302 - $637,909 = $10,278,394). The January 1, 2025 OASDI component of FICA tax rate of 6.2% is applied to the taxable pro forma payroll of $10,278,394 to determine pro forma OASDI component of FICA taxes of $637,260 ($10,278,394 x 0.062). The HI component in the amount of $158,286 and the OASDI component in the amount of $637,260 are totaled to determine pro forma FICA taxes in the amount of $795,547 ($158,286+ $637,260 = $795,547). The adjustment to FICA taxes, in the amount of $60,144, is determined by subtracting the test year FICA taxes of $735,403 from the calculated pro forma FICA taxes of $795,547 ($795,547 - $735,403 = $60,144). The FICA adjustment, in the amount of $60,144, has been carried forward to Exhibit No. HIV-15, Column 3.

I note that a portion of pro forma FICA taxes for the twelve months ended December 31, 2024, was capitalized and is reflected, as a reduction to operating expenses, in Account 40801201, Taxes Other than Income Taxes-FICA on Exhibit No. HIII-2-6.

Q. Explain Exhibit No. HIV-15-2.

A. Exhibit No. HIV-15-2 presents an adjustment to reflect Federal unemployment tax on pro forma payroll for twelve months ended December 31, 2024, at the tax rate and wage base

effective January 1, 2025. Total pro forma payroll in the amount of $10,916,302 (Refer to Exhibit No. HIII-2-4 (a), page 1) is reduced by $9,958,782, which is that portion of pro forma payroll that exceeds the 2025 taxable wage base per employee of $7,000, to arrive at taxable pro forma payroll of $957,520 ($10,916,302 - $9,958,782 = $957,520). The 2025 Federal unemployment tax rate of 0.6% is applied to the taxable pro forma payroll of $957,520 to determine pro forma Federal unemployment tax of $5,745. The adjustment to Federal unemployment tax in the amount of $(1,262) is determined by subtracting the test year Federal unemployment tax of $5,745 from the calculated pro forma Federal unemployment tax of $7,007 [$5,745 - $7,007 = $(1,262)]. The Federal unemployment tax adjustment, in the amount of $(1,262), has been carried forward to Exhibit No. HIV-15, Column 3.

I note that a portion of pro forma Federal unemployment tax for the twelve months ended December 31, 2024, was capitalized and is reflected, as a reduction to operating expenses, in Account No. 40801202, Taxes Other than Income Taxes-Federal Unemployment on Exhibit No. HIII-2-6.

Q. Explain Exhibit No. HIV-15-3.

A. Exhibit No. HIV-15-3 presents an adjustment to reflect Pennsylvania unemployment tax on pro forma payroll for twelve months ended December 31, 2024, at the tax rate and wage base effective January 1, 2025. Total pro forma payroll in the amount of $10,916,302 (Refer to Exhibit No. HIII-2-4 (a), page 1) is reduced by $9,556,802, which is that portion of pro forma payroll expense that exceeds the 2025 taxable wage base per employee of $10,000, to arrive at taxable pro forma payroll of $1,359,501 ($10,916,302 -

$9,556,802 = $1,359,501). The 2025 Pennsylvania unemployment tax rate of 1.5282% is applied to the taxable pro forma payroll of $1,359,501 to determine pro forma Pennsylvania unemployment tax of $20,776. The adjustment to Pennsylvania unemployment tax in the amount of $(3,970) is determined by subtracting the test year Pennsylvania unemployment tax of $24,746 from the calculated pro forma Pennsylvania unemployment tax of $20,776 [$20,776 - $24,746 = $(3,970)]. The Pennsylvania unemployment tax adjustment, in the amount of $(3,970), has been carried forward to Exhibit No. HIV-15, Column 3.

I note that a portion of pro forma Pennsylvania unemployment tax for the twelve months ended December 31, 2024, was capitalized and is reflected as a reduction to operating expenses in Account No. 40801203, Taxes Other than Income Taxes-State Unemployment on Exhibit No. HIII-2-6.

Q. Explain Exhibit No. HIV-15-4.

A. Exhibit No. HIV-15-4 presents an adjustment to reflect the Commission's General Assessment, the Consumer Advocate's Assessment, the Small Business Advocate's Assessment, and the Damage Prevention Committee Assessment based on pro forma operating revenues under existing rates for twelve months ended December 31, 2024, and the 2024-2025 assessment factors. The currently-effective combined 2024-2025 assessment rate of 0.676148% for the Commission's General Assessment, the Consumer Advocate's Assessment, the Small Business Advocate's Assessment, and the Damage Prevention Committee Assessment is applied to pro forma operating revenues at existing rates for combined assessment purposes for the twelve months ended December 31, 2024,

in the amount of $64,546,731. The pro forma operating revenues at existing rates for combined assessment purposes is determined by removing sales for resale customers included on Exhibit No. FII-11 and Exhibit No. FII-12 and priced out bulk truck sales included on Exhibit No. HII-4 from total pro forma operating revenues at existing rates on Exhibit No. HII-2, Page 2, Column 3. Sales for resale customers and priced out bulk truck sales are not included in the combined assessment calculation. The currently-effective combined 2024-2025 assessment rate of 0.676148% is applied to the pro forma operating revenues at existing rates for combined assessment purposes for the twelve months ended December 31, 2024, in the amount of $64,546,731 to determine the pro forma combined assessment under existing rates for twelve months ended December 31, 2024, in the amount of $436,432 ($64,546,731 x 0.676148%). The adjustment in the amount of $59,984 is determined by subtracting the test year assessments of $376,448 from the calculated pro forma amount of $436,432 ($436,432 - $376,448 = $59,984). The adjustment in the amount of $59,984 has been carried forward to Exhibit No. HIV-15, Page 2, Column 3.

Q. Explain Exhibit No. HIV-15-5.

A. Exhibit No. HIV-15-5 presents an adjustment to reflect the Commission's General Assessment, the Consumer Advocate's Assessment, the Small Business Advocate's Assessment, and the Damage Prevention Committee Assessment based on pro forma historic test year operating revenues at proposed rates. The currently effective combined 2024-2025 assessment rate of 0.676148% for the Commission's General Assessment, the Consumer Advocate's Assessment, the Small Business Advocate's Assessment, and the Damage Prevention Committee Assessment is applied to pro forma operating revenues

under proposed rates in the amount of $73,527,788. The pro forma operating revenues at existing rates for combined assessment purposes is determined by removing sales for resale customers included on Exhibit No. FII-11 and Exhibit No. FII-12 and priced out bulk truck sales included on Exhibit No. HII-4 from total pro forma operating revenues at proposed rates on Exhibit No. HII-2, Page 2, Column 6. Sales for resale customers and priced out bulk truck sales are not included in the combined assessment calculation. The currently effective combined 2024-2025 assessment rate of 0.676148% is applied to the pro forma operating revenues at proposed rates for combined assessment purposes for the twelve months ended December 31, 2024, in the amount of $73,527,788 to determine the pro forma combined assessment under existing rates for twelve months ended December 31, 2024, in the amount of $497,157 ($73,527,788 x 0.00676148). The adjustment in the amount of $60,725 is determined by subtracting the calculated pro forma expense for the combined assessment under existing rates in the amount of $436,432 (Refer to Exhibit No. HIV-15-4) from the calculated pro forma expense under proposed rates in the amount of $497,157 ($497,157 - $436,432 = $60,725). The adjustment in the amount of $60,725 has been carried forward to Exhibit No. HIV-15, Column 3.

Q. Explain Exhibit No. HIV-17.

A. Exhibit No. HIV-17 summarizes adjustments to water operating income taxes for the twelve months ended December 31, 2024, for ratemaking purposes and to reflect additional operating income taxes resulting from the proposed increase in operating revenues.

Operating income taxes per books for the twelve months ended December 31, 2024, in the amount of $661,290 are shown in Column 1 of Exhibit No. HIV-17. Pro forma adjustments to operating income taxes of $(781,849) are shown in Column 3 of Exhibit No. HIV-17 and are detailed in Exhibit Nos. HIV-17-1 through HIV-17-4. Adjustments to operating income taxes amounting to $2,460,766 are made to reflect the increased operating income taxes that result from the increase in operating revenues under proposed rates, and these adjustments are shown in Column 6 of Exhibit No. HIV-17 and are detailed in Exhibit No. HIV-17-5.

Q. Explain Exhibit No. HIV-17-1.

A. Exhibit No. HIV-17-1 presents an annualized amortization of Federal investment tax credits for the twelve months ended December 31, 2024. The Tax Reform Act of 1986 repealed the investment tax credit provisions effective December 31, 1985. The investment tax credits for 1986 through 2024 are claimed under the transitional property provisions of TRA-86.

Federal investment tax credits as of December 31, 2024, generated during the period 1972 through 2024 are shown on Column 2 of Exhibit No. HIV-17-1. The Company adopted a fifty-year amortization period for Federal investment tax credits to meet the requirements of former Section 46(f)(a) of the Internal Revenue Code. The pro forma annual amortization of Federal investment tax credits in the amount of $(38,309) shown in Column 4 of Exhibit No. HIV-17-1 is determined by dividing the Federal investment tax credits generated, shown in Column 2, by the fifty-year amortization period shown in Column 3.

In 1972, the Company timely elected the special rule for ratable flow-through of investment tax credits under former Section 46(f)(2) (at that time Section 46(e)(2)) of the Internal Revenue Code, which requires that Federal investment tax credits be flowed through to ratepayers as a reduction to Federal income taxes ratably over the depreciable life of the property. The Company's books reflect the annual amortization for the twelve months ended December 31, 2024. An adjustment of the annual amortization of Federal investment tax credits in the amount of $(2,556) is determined by subtracting the amortization of Federal investment tax credits recorded on the corporate books during the twelve months ended December 31, 2024, in the amount of $(35,753) from the calculated pro forma annual amortization of Federal investment tax credits in the amount of $(38,309), shown in Column 4 [$(38,309) - $(35,753) = $(2,556)]. The adjustment of the annual amortization of Federal investment tax credits in the amount of $(2,556) has been carried forward to Exhibit HIV-17, Column 3.

Because the Company timely elected in 1972, the special rule for ratable flow-through of Federal investment tax credits under former Section 46(f)(2) (at that time Section 46(e)(2)) of the Internal Revenue Code, the only reduction that may be made to the Company's cost of service, with respect to Federal investment tax credits generated in calendar year 1972 and thereafter, is to amortize the Federal investment tax credits ratably over the life of the property. Under the special rule for ratable flow-through, the rate base of the utility cannot be reduced by any portion of deferred Federal investment tax credits.

Q. Explain Exhibit No. HIV-17-2.

A. Exhibit No. HIV-17-2 presents an adjustment to reflect current Federal income tax and current Pennsylvania corporate net income tax based on pro forma water taxable income under existing rates at the currently effective Federal income tax rate of 21% and at the currently effective Pennsylvania corporate net income tax rate of 8.49%.

Total pro forma operating income before income taxes and excluding depreciation under existing rates in the amount of $37,499,603 is determined by subtracting pro forma operating expenses under existing rates in the amount of $28,205,929 (Refer to Exhibit No. HIII-2, Page 2 of 8, Column 4) and pro forma operating taxes other than income taxes under existing rates in the amount of $1,645,548 (Refer to Exhibit No. HIV-15, Page 2 of 2, Column 4) from pro forma operating revenues under existing rates in the amount of $67,351,080 (Refer to Exhibit No. HII-2, Page 2 of 3, Column 3) ($67,351,080 - $28,205,929 - $1,645,548 = $37,499,603). To arrive at taxable income at present rates, amounts are added for expenses of the Customer Survey of $(19,200), Dividend Reinvestment and Direct Stock Purchase and Sale Plan of $7,762, Long-term Incentive Plan of $1,740, Employee Stock Purchase Plan of $1,052, Normalization of Rate Case Expenses of $236,188, Amortization of Acquisition Adjustments of $(23,331), Amortization of Lead Service Line Replacements of $145,298, Filter Plant Yard Piping Survey of $3,081, Service Life Study of $5,138, Long-term Infrastructure Improvement Plan of $672, Nondeductible Parking of $8,357, and Nondeductible Meals of $16,770, and amounts are then deducted for tax repair expense in the amount of $15,825,216, cost of removal in the amount of $3,505,008, tank painting in the amount of $16,414, state tax depreciation in the amount of $11,261,347, and pro forma interest expense deduction for

ratemaking purposes in the amount of $7,885,662. Expenses of the Company's Customer Survey of $(19,200), Dividend Reinvestment and Direct Stock Purchase and Sale Plan of $7,762, Long-term Incentive Plan of $1,740, Employee Stock Purchase Plan of $1,052, Normalization of Rate Case Expenses of $236,188, Amortization of Acquisition Adjustments of $(23,331), Amortization of Lead Service Line Replacements of $145,298, Filter Plant Yard Piping Survey of $3,081, Service Life Study of $5,138, Long-term Infrastructure Improvement Plan of $672, Nondeductible Parking of $8,357, and Nondeductible Meals of $16,770 are not allowed as a deduction for income tax purposes. Since these amounts are included in operating expenses and deducted in arriving at the figure of $37,499,603, they must be added back in arriving at taxable income. Tax repair expense in the amount of $15,825,216 has been capitalized on the corporate books but is taken as a current deduction on the Company's Federal and State income tax returns. Cost of removal in the amount of $3,505,008 has been capitalized on the corporate books but is taken as a current deduction on the Company's Federal and State income tax returns. Tax depreciation in the amount of $11,261,347 is detailed on Exhibit No. HIV-17-3 and Exhibit No. HIV-17-3 (a). I note that the state tax depreciation is greater than Federal tax depreciation due to the provisions of Act 89 of 2002, which I will explain later with respect to Exhibit No. HIV-17-3 (a). Pro forma interest expense deduction for ratemaking purposes in the amount of $7,885,662 is determined by reflecting the interest charges to ratepayers in the cost of capital determination (Interest Synchronization) (Rate Base of $382,415,236 x Weighted Debt Cost Rate of 2.06%).

Pro forma taxable income under existing rates in the amount of $(610,520) is determined by adding the expenses of the Customer Survey of $(19,200), Dividend Reinvestment and

Direct Stock Purchase and Sale Plan of $7,762, Long-term Incentive Plan of $1,740, Employee Stock Purchase Plan of $1,052, Normalization of Rate Case Expenses of $236,188, Amortization of Acquisition Adjustments of $(23,331), Amortization of Lead Service Line Replacements of $145,298, Filter Plant Yard Piping Survey of $3,081, Service Life Study of $5,138, Long-term Infrastructure Improvement Plan of $672, Nondeductible Parking of $8,357, and Nondeductible Meals of $16,770, and deducting tax repair expense in the amount of $15,825,216, cost of removal in the amount of $3,050,008, tank painting in the amount of $16,414, state tax depreciation in the amount of $11,261,347, and pro forma interest expense in the amount of $7,885,662 from pro forma net operating income in the amount of $37,499,603 [$37,499,603 + $(19,200) + $7,762 + $1,740 + $1,052 + $236,188 + $(23,331) + $145,298 + $3,081 + $5,138 + $672 + $8,357 + $16,770 - $15,825,216 - $3,505,008 - $16,414 - $11,261,347 - $7,885,662 = $(610,520)].

Pro forma State income tax under existing rates in the amount of $(51,833) is determined by applying the Pennsylvania corporate net income tax rate of 8.49% to pro forma taxable income in the amount of $(610,520) [$(610,520) x 0.0849 = $(51,833)]. Pro forma Federal taxable income under existing rates in the amount of $249,844 is determined by subtracting pro forma State income tax under existing rates in the amount of $(51,833) and adding back State depreciation in excess of Federal depreciation of $808,531 (Refer to Exhibit No. HIV-17-3 (a)) from pro forma taxable income in the amount of $(610,520) [$(610,520) - $(51,833) + $808,531 = $249,844]. Pro forma Federal income tax under existing rates in the amount of $52,467 is determined by applying the presently effective Federal income tax rate of 21% to the pro forma Federal

taxable income under existing rates in the amount of $249,844 ($249,844 x 0.21 = $52,467). Total pro forma current income taxes under existing rates in the amount of $634 is determined by adding pro forma state income tax under existing rates in the amount of $(51,833) and pro forma Federal income tax under existing rates in the amount of $52,467 [$(51,833) + $52,467 = $634). The adjustment to income taxes in the amount of $(598,377) is determined by subtracting current income taxes recorded on the corporate books during the twelve months ended December 31, 2024, in the amount of $599,011 from total pro forma current income taxes under existing rates in the amount of $634 [$634 - $599,011 = $(598,377)]. The adjustment to income taxes at present rates in the amount of $(598,377) has been carried forward to Exhibit No. HIV-17, Column 3.

Q. Explain Exhibit No. HIV-17-3.

A. Exhibit No. HIV-17-3 provides information concerning income tax depreciation used to calculate current and deferred Federal Income Taxes for ratemaking purposes. To explain Exhibit HIV-17-3, a general explanation of the tax depreciation methods used by York Water for various vintages of property is required.

For property placed in service during calendar year 1970 and prior years, the Company's method of tax depreciation is the straight-line method. No provision has been made in the rate case exhibits for normalization of tax depreciation for property placed in service in 1970 and prior years.

For property placed in service during calendar years 1971 through 1978, the Company's method of tax depreciation is the double declining balance method. As explained later,

normalization of the income tax deferrals resulting from use of an accelerated tax depreciation method for property placed in service during calendar years 1971 through 1978 is required by Internal Revenue Code Section 167(1)(2)(B) because the Company's "applicable 1968 method" was straight line. The Company also filed, as a precaution, a timely election with the Internal Revenue Service electing normalization of accelerated depreciation.

For property placed in service during calendar years 1979 and 1980, the Company's method of tax depreciation is the double declining balance method under the Internal Revenue Service's Asset Depreciation Range System. Normalization of the income tax deferrals resulting from use of an accelerated depreciation method for property placed in service during the calendar years 1979 and 1980 also is required by Internal Revenue Code Section 167(1)(2)(B).

Normalization of the income tax deferrals resulting from the use of an accelerated tax depreciation method for property placed in service during calendar years 1971 through 1980 is required because the Company's "applicable 1968 method," for purposes of Section 167 of the Internal Revenue Code, was the straight-line method. Under Section 167(1)(2)(B) of the Internal Revenue Code, because the Company's "applicable 1968 method" was straight line, the Company may not deduct accelerated depreciation for property placed in service during calendar years 1971 through 1980 for income tax purposes unless there is normalization for ratemaking purposes.

For property placed in service beginning with calendar year 1981 and continuing through 2024, the Company employs various methods of tax depreciation as permitted by law. Normalization of the tax deferrals resulting from the use of these accelerated depreciation methods is required by the Internal Revenue Code.

I note that for qualified property placed in service after September 10, 2001, and before January 1, 2005, the Company's method of tax depreciation includes either the Internal Revenue Code's Special 30 Percent Depreciation Allowance or the Internal Revenue Code's Special 50 Percent Depreciation Allowance.

I note that for qualified property placed in service after January 1, 2008, and before January 1, 2018, the Company's method of tax depreciation includes either the Internal Revenue Code's 50 Percent First Year Bonus Depreciation or the Internal Revenue Code's 100 Percent First Year Bonus Depreciation.

If the Company is not permitted to recover revenues necessary to provide for normalization of the income tax effects of accelerated depreciation, the Company will not be permitted to deduct accelerated depreciation for Federal income tax purposes.

Tax depreciation by vintage year in the amount of $13,777,980 for property included in the measure of value is shown on Exhibit No. HIV-17-3, Column 3.

Deferred taxes must comply with the normalization requirements of Internal Revenue Code Sections 167 and 168. The amount of $13,777,980 is reduced by $12,091,684,

which is the amount included for ratemaking purposes as depreciation to determine the difference of $1,686,296 to be used for calculating the deferred Federal income tax ($13,777,980 - $12,091,684 = $1,686,296). The Federal income tax rate of 21% is applied to the $1,686,296 to determine the deferred Federal income tax amount of $354,122 ($1,686,296 x 0.21). The adjustment to deferred Federal income tax in the amount of $(196,269) is determined by subtracting deferred Federal income tax recorded on the corporate books during the twelve months ended December 31, 2024, in the amount of $550,391 from the calculated deferred Federal income tax amount of $354,122 [$354,122 - $550,391 = $(196,269)]. The adjustment to deferred Federal income tax in the amount of $(196,269) has been carried forward to Exhibit No. HIV-17, Column 3.

Q. Explain Exhibit No. HIV-17-3 (a).

A. Exhibit No. HIV-17-3 (a) presents the calculation of the state tax decoupling from the Federal Special 30-Percent and 50 Percent Depreciation Allowance in accordance with Act 89 of 2002 signed into law June 29, 2002 and the Economic Growth and Tax Relief Reconciliation Act of 2001, the Job Creation and Worker Assistance Act of 2002, the Jobs and Growth Tax Relief Reconciliation Act of 2003, the Economic Stimulus Act of 2008, and the Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010. These acts require corporate taxpayers who elect the Federal Special 30-Percent and 50 Percent Depreciation Allowance to make adjustments that eliminate the effect of the Federal Special 30-Percent and 50 Percent Depreciation Allowance in arriving at Pennsylvania taxable income. Because Act 89 of 2002 eliminated the effect of the first-year Federal bonus depreciation, additional State depreciation deductions are allowed in subsequent years.

The recovery of a portion of the bonus depreciation of $808,531 is carried forward to Exhibit No. HIV-17-2 as an adjustment to State Tax Depreciation.

The basis of property qualified for the additional first year depreciation allowance is reflected in Column 2 of Exhibit No. HIV-17-3 (a). Total Federal tax depreciation is shown in Column 3 of Exhibit No. HIV-17-3 (a). The adjustment for additional allowed state depreciation in lieu of the Federal Special 30-Percent and 50 Percent depreciation is reflected in Column 6 and is determined by multiplying Federal depreciation shown in Column 5 by 0.42857 (3/7). The factor of 0.42857 (3/7) is reflected in the Bureau of Corporation Taxes Adjustment for Bonus Depreciation (Form REV-784).

Q. Explain Exhibit No. HIV-17-4.

A. Exhibit No. HIV-17-4 calculates the reversal of excess deferred Federal income taxes related to accelerated depreciation on property. Upon passage of the Tax Cuts and Jobs Act of 2017, the Company adjusted the balance of its deferred Federal income taxes related to accelerated depreciation on property to the newly enacted statutory Federal income tax rate of 21%. The difference between the existing balance of deferred Federal income taxes related to accelerated depreciation on property and the adjusted balance of deferred Federal income taxes related to accelerated depreciation on property was recorded as a regulatory liability for the excess deferred Federal income taxes related to accelerated depreciation on property.

A reversal is recorded for the excess deferred Federal income taxes whose normalized depreciation exceeds tax depreciation, that is, the tax life of the property has reached what is commonly referred to as the "turnaround point." The vintage years that have reached the turnaround point are 1971 through 1972, 1979, 1980 through 1998, 2006, 2011, and 2015 through 2017. Tax depreciation for these vintage years subject to normalization requirements of Internal Revenue Code Section 167 and 168 is $907,719. The amount of tax depreciation of $907,719 is less than $2,226,824, which is the amount included for ratemaking purposes as depreciation on property placed in service during these vintage years. The difference of $(1,319,105) is to be used for calculating the return of excess previously deferred Federal income tax to be reversed [$907,719 - $2,226,824 = $(1,319,105)]. Tax depreciation, and thus excess deferred Federal income taxes recovered from customers, was computed to the turnaround point for all of these properties at a rate of 21%, 34%, 46%, or 48%. The excess of 2% between 48% and 46% has been amortized as a reduction to the cost of service in prior rate proceedings. However, the Tax Reform Act of 1986 and the Tax Cuts and Jobs Act of 2017 prohibits flow back of the excess between the prior rates and the current rate any faster than ratably over the tax life of the property following the property attaining the turnaround point. This ratable flow back is to be achieved by using a weighted average tax rate, representing the weighted average rate for each vintage for all years prior to the turnaround year. The weighted average rate for each vintage year, which has reached the turnaround point, is shown in Column 6. The weighted average tax rate is applied to the tax depreciation subject to deferral shown in Column 4 to determine the reversal of deferred Federal income taxes in the amount of $(454,868). This was compared to the value of the deferred Federal income taxes at the newly enacted rate of $(277,012)

determined by multiplying the total tax depreciation subject to deferral of $(1,319,105) by the newly enacted rate of 21% [$(1,319,105) x 0.21 = $(277,012)]. The difference between the deferred Federal income taxes at prior rates of $(454,868) and those at the newly enacted rate of $(277,012) is the reversal of the excess deferred Federal income taxes of $(177,856) [$(454,868) - $(277,012) = $(177,856)]. An adjustment of the excess deferred Federal income taxes in the amount of $15,353 is determined by subtracting the reversal of excess deferred Federal income taxes recorded on the corporate books during the twelve months ended December 31, 2024, in the amount of $(193,209), from the calculated pro forma reversal of excess deferred Federal income taxes in the amount of $(177,856) [$(177,856) - $(193,209) = $15,353]. The adjustment of the reversal of deferred Federal income taxes in the amount of $15,353 has been carried forward to Exhibit HIV-17, Column 3.

Q. Please explain Exhibit No. HIV-17-5.

A. Exhibit No. HIV-17-5 presents an adjustment to reflect increased Federal income tax and state income tax based on the calculated revenue increase using historic test year data.

The total calculated water operating revenue increase using historic test year data in the amount of $8,981,058 (Refer to Exhibit No. HII-2, page 2, Column 5) is increased by the increase in late charges of $20,312 (Refer to Exhibit No. HII-2-15) and is reduced by the increase in pro forma expense for the Commission's General Assessment, the Consumer Advocate's Assessment, the Small Business Advocate's Assessment, and the Damage Prevention Committee Assessment under calculated rates in the amount of $60,725 (Refer to Exhibit No. HIV-15-5) and the increase in pro forma uncollectible accounts

expense under calculated rates of $59,288 (Refer to Exhibit No. HIII-2-40) to arrive at the net increase in taxable income subject to state income tax in the amount of $8,881,356 ($8,981,058 + $20,312 - $60,725 - $59,288 = $8,881,356). The state income tax rate of 8.49% is applied to the net increase in taxable income subject to state income tax in the amount of $8,881,356 to determine the increase of $754,027 in the state income tax as a result of the proposed revenue increase ($8,881,356 x 0.0849). The increase in the amount of $754,027 in the state income tax has been carried forward to Exhibit No. HIV-17, Column 6.

The proposed revenue increase subject to state income tax of $8,881,356 is reduced further by the increase of $754,027 in state income tax to determine the proposed revenue increase in the amount of $8,127,329 subject to Federal income tax ($8,881,356 - $754,027 = $8,127,329). The presently effective Federal income tax rate of 21% is applied to determine the increase in the amount of $1,706,739 in the Federal income tax that results from the proposed revenue increase ($8,127,329 x 0.21), and this amount has been carried forward to Exhibit No. HIV-17, Column 6.

Q. Explain Exhibit No. HIV-18.

A. Exhibit No. HIV-18 provides an explanation of the debt interest expense utilized for the income tax calculation reflected on the Company's corporate books, and an explanation and the calculation of debt interest expense utilized for the income tax calculation on pro forma income for the twelve months ended December 31, 2024.

Debt interest expense utilized for the income tax calculation reflected on the Company's corporate books for the twelve months ended December 31, 2024, is actual debt expense incurred during that period. Debt interest expense utilized for the income tax calculation on pro forma income for the twelve months ended December 31, 2024, is determined by reflecting the interest charges to ratepayers in the cost of capital determination (interest synchronization).

The original cost measure of value as of December 31, 2024 (Refer to Exhibit No. HV-1, page 2) of $382,415,236 times the weighted debt cost rate of 2.06% equals the interest expense utilized for income tax calculation on pro forma income for the twelve months ended December 31, 2024, of $7,885,662 ($382,415,236 x 2.06% = $7,885,662).

Debt interest expense on pro forma income for the twelve months ended December 31, 2024, in the amount of $7,885,662 has been carried forward to Exhibit No. HIV-17-2, which I explained previously.

Q. Are you sponsoring any other exhibits regarding the Company's operating taxes?

A. Yes, I am also sponsoring Exhibit Nos. HIV-2, HIV-3, HIV-4, HIV-7, HIV-8, HIV-9, HIV-10, HIV-11, HIV-13, and HIV-16.

Q. Explain Exhibit No. HV-1-1.

A. Exhibit No. HV-1-1 is a summary, by year, of the unamortized balances of deferred income taxes related to accelerated depreciation and the unamortized balances of excess

deferred income taxes related to accelerated depreciation that are deducted from the measure of value.

Page 1 of Exhibit No. HV-1-1 is a summary, by year, of the unamortized balance in the amount of $25,514,033, as of December 31, 2024, of deferred income taxes related to accelerated depreciation, that are deducted from the measure of value. Column 2 lists, by year, deferred federal income taxes resulting from accelerated depreciation from 1971 through 2024. The balance in Column 2 is $25,514,033.

Deferred Federal Income Tax Related to Accelerated Depreciation on Property Constructed with Customers' Advances for Construction and Contributions in Aid of Construction have been eliminated from this schedule.

By Order entered April 28, 1988, at Docket Nos. R-870769 and P-870225, the Commission approved the Company's proposal to account for income taxes on Customers' Advances for Construction ("Advances") and Contributions in Aid of Construction ("Contributions") pursuant to what is known as "Method 5" treatment. Under Method 5 treatment, the Company excluded, for ratemaking purposes, all income taxes paid by the Company as a result of receipt of Contributions or Advances and excluded, from the calculation of income taxes, the portion of tax depreciation that related to property constructed with Contributions or Advances. Under this procedure, customers did not bear the increased income taxes resulting from the receipt of Contributions or Advances, and the Company recovered, over the tax life of the property, reductions in income taxes in an amount equal to the increased income taxes resulting

from receipt of Contributions and Advances. Under Method 5, it is necessary for the Company to retain the benefits resulting from depreciation on property constructed with a Contribution or Advance, so that York Water is compensated for the additional income taxes paid as a result of the TRA-86 requirement that a Contribution or Advance be recognized as taxable income in the year received.

The unamortized balance of deferred income taxes as of December 31, 2024, in the amount of $25,514,033 has been carried forward to Exhibit No. HV-1, page 2 and has been deducted from the original cost measure of value.

Page 2 of Exhibit No. HV-1-1 is a summary, by year, of the unamortized balance in the amount of $13,089,927, as of December 31, 2024, of excess deferred income taxes related to accelerated depreciation, that are deducted from the measure of value. Column 2 lists, by year, excess deferred federal income taxes resulting from accelerated depreciation from 1971 through 2017. The balance in Column 2 is $13,089,927.

The unamortized balance of excess deferred income taxes as of December 31, 2021, in the amount of $13,089,927 has been carried forward to Exhibit No. HV-1, page 2 and has been deducted from the original cost measure of value.

Q. Explain Exhibit No. HV-1-10.

A. Exhibit No. HV-1-10 is a summary, by year, of the unamortized balance in the amount of $1,157,922, as of December 31, 2024, of taxes on deposits for construction and customer advances, that are added to the original measure of value. Column 2 lists, by year, taxes

on deposits for construction and customer advances from 2018 through 2020. The balance in Column 2 is $1,157,922.

Under the Tax Cuts and Jobs Act of 2017, the definition of tax contributions in aid of construction was modified under Section 118(b) and the exclusion from gross income under Section 118(c) was repealed. The modification to the definition of taxable contribution in aid of construction includes contributions from customers as well as any payment received from a governmental or civic entity. Under the Company's approved tariff, the Company will pay income taxes on any deposit, Customer Advance, Contribution in Aid of Construction, or other like amounts received from an applicant which shall constitute taxable income as defined by the Internal Revenue Service. Such income taxes shall be segregated in a deferred account for inclusion in rate base in a future rate case proceeding. Such income taxes associated with a deposit or advance will not be charged to the specific depositor of capital. This provision was rescinded under the Infrastructure Investment and Jobs Act of 2021.

The unamortized balance of taxes on deposits for construction and customer advances as of December 31, 2024, in the amount of $1,157,922 has been carried forward to Exhibit No. HV-1, page 2 and has been included in the original cost measure of value.

Q. Explain Exhibit No. HV-8-1 (g).

A. Exhibit No. HV-8-1 (g) is the calculation by service territory of the average lag days from the provision of service to receipt of operating revenues. Calculations of the lag days in receipt of operating revenues of 61.4 for metered repumped customers and lag days of

60.5 for metered gravity customers are shown in Columns 2 and 3, respectively. The components of the operating revenue lag day calculation, shown in Column 1, include the lag from the midpoints of the billing cycle (service lag), the lag from mid-point of the meter reading to billing (billing lag) and the lag from billing to collection ("collection lag"). "Billing" for purposes of determining the billing lag and the collection lag is the date that bills are entered into the Company's accounts receivable for that billing cycle. The calculation of the billing lag for metered repumped customers and metered gravity customers are presented on Exhibit No. HV-8-1 (g) 1, which I will explain later. The calculation of the collection period lag is presented in Exhibit No. HV-8-1 (g) 2, which I will explain later. The total lag days have been carried forward to Column 3 of Exhibit No. HV-8-1.

Q. Explain Exhibit No. HV-8-1 (g) 1.

A. Exhibit No. HV-8-1 (g) 1 provides the calculation of average lag days to read meters, enter data, validate and process data, and enter amounts into accounts receivable. The calculation of average lag days for repumped customers during the twelve months ended December 31, 2024, of 5.5 is shown on page 1 of Exhibit No. HV-8-1 (g) 1, and the calculation of average lag days for gravity customers during the twelve months ended December 31, 2024, of 4.6 is shown on page 2 of Exhibit No. HV-8-1 (g) 1.

For each service area, the date of the mid-point of the meter reading for each billing cycle is shown in Column 2, and the date amounts were entered into the Company's accounts receivable for each billing cycle is shown in Column 3. The number of days of lag between the date of the mid-point of the meter reading and the date amounts were entered

into the Company's accounts receivable is calculated and shown in Column 4. The twelve-month average of lag days per billing cycle is determined by adding the lag days for each billing cycle shown in Column 4 and dividing by the number of billing cycles.

The average billing lag days of 5.5 and 4.6 for metered repumped and metered gravity billing cycles, respectively, have been carried forward to Exhibit HV-8-1 (g).

Under the Company's validation procedure, if a customer's meter reading meets certain criteria of either high or low consumption based on historical averages, the reading is listed on a report for review by the accounts receivable coordinator. If the coordinator is unable to determine the reason for the unusual consumption, a reread order is generated, and a meter reader is dispatched to the customer's premises to investigate the situation. The meter reader rereads the meter and, assuming the reading confirms the initial reading, checks for leaks, checks meter operation, and notifies the customer of the results of the investigation. Only after this process is completed is the meter reading considered to be validated. I note that internal controls set up within our accounting system require that validation for all bills be completed before all bills for each cycle are booked to accounts receivable.

Page 3 of Exhibit No. HV-8-1 (g) 1 is a summary of the Company's billing lag calculated during the period 1991 to 2024. The billing lag calculations demonstrate a significant improvement (reduction) in the billing lag during this period. As reflected on this exhibit, the billing lag for repumped and gravity customers has been reduced by 64.7% and 62.3%, respectively, since 1991 due to the installation of radio frequency reading for all

meters and the realignment of meter reading routes and cycles. The Company continues to look at other automated meter reading options to make the meter reading process even more efficient.

Q. Explain Exhibit No. HV-8-1 (g) 2.

A. Exhibit No. HV-8-1 (g) 2 presents the calculation of the weighted average operating revenue collection lag. This is the average lag between billing customers and receipt of revenues.

The weighted average operating revenue collection lag of 40.7 days is determined by dividing the number of days in the test year by the calculated turnover ratio of 9.0 times (365 ÷ 9.0 = 40.7). The calculated turnover ratio of 9.0 times is determined by dividing test year sales of water and penalties (excluding unbilled) in the amount of $66,473,760 by the annual average of outstanding customers' monthly accounts receivable balances per books in the amount of $7,408,701 ($66,473,760 ÷ $7,408,701 = 9.0). The weighted average operating revenue collection lag of 40.7 days has been carried forward to Exhibit No. HV-8-1 (g).

Q. Are you sponsoring any other exhibits regarding the original cost measure of value?

A. Yes, I am also sponsoring Exhibit No. HV-10.

Q. Explain Exhibit No. HVII-1.

A. Exhibit No. HVII-1 provides capitalization and capitalization ratios for the five years ended December 31, 2024, and the projected capitalization and capitalization ratios for December 31, 2025, through February 28, 2027.

Exhibit No. HVII-1 also provides year-end interest coverages for the last three years.

Q. Explain Exhibit No. HVII-2.

A. Exhibit No. HVII-2 details the latest prospectus offered by the Company. A copy of the prospectus, dated April 1, 2022, issued in connection with the common stock offering is attached to Exhibit No. HVII-2.

Q. Explain Exhibit No. HVII-3.

A. Attached to Exhibit No. HVII-3 is a copy of Projected Five Year Capital Requirements for Five Years Ended December 31, 2029 and a Schedule of Projected Statement of Cash Flows for Five Years Ended December 31, 2029, which reflects the sources of funds for each of the future five years.

Q. Explain Exhibit No. HVII-6.

A. Exhibit No. HVII-6 provides information concerning the rate used for the Company's allowance for funds used during construction ("AFUDC"). The AFUDC rate used by the Company as of December 31, 2024, was 10.04%. The AFUDC rate is set by the Company based upon the sum of the weighted cost of debt and the weighted cost of common equity as determined in the Company's most recent fully litigated rate

proceeding before the Commission. The AFUDC rate used by the Company has not changed since December 31, 1992.

Q. Explain Exhibit No. HVII-7.

A. Exhibit No. HVII-7 describes the Company's indenture requirements and dividend restrictions.

Q. Explain Exhibit No. HVII-9.

A. Exhibit No. HVII-9 describes long-term debt reacquisitions by the Company. There have been no long-term debt reacquisitions by the Company since 1969.

Q. Explain Exhibit No. HVII-11.

A. Exhibit No. HVII-11 provides information on the lines of credit available to the Company. The Company had average daily borrowings of $10,086,510 under its lines of credit during the twelve months ended December 31, 2024. Refer to Exhibit No. FVII-11 for the projected borrowings under the Company's lines of credit during the twelve months ending February 28, 2027.

Q. Explain Exhibit No. HVII-15.

A. Attached to Exhibit No. HVII-15 is a copy of the 2024 Annual Report to Shareholders, The York Water Company 2024 SEC Form 10-K, and the 2024 SEC Forms 10-Q.

Q. Explain Exhibit No. HVII-17

A. Exhibit No. HVII-17 provides the corporate and bond rating history for the Company. The Company has obtained a Standard & Poor's Corporate Rating to meet the criteria for the issuance of tax-free bonds through the Pennsylvania Economic Development Financing Authority. In addition to meeting the criteria to secure tax-free debt, obtaining an investment grade credit rating from Standard & Poor's allows the Company to issue tax-free debt at lower interest rates than the Company could otherwise obtain, thereby reducing the cost of debt paid by York Water's customers.

On October 9, 2022, Standard and Poor's assigned its 'A-' rating to the Company's Pennsylvania Economic Development Financing Authority $10,500,000 Exempt Facilities Revenue Refunding Bonds Series A of 2022 and the Company's Pennsylvania Economic Development Financing Authority $14,870,000 Exempt Facilities Revenue Refunding Bonds Series B of 2022. The rating on the bonds reflects the Company's credit rating without the use of credit enhancements.

The Company's overall corporate rating of 'A-' from Standard and Poor's has been reaffirmed every year since 2004.

Q. Explain Exhibit No. HVII-20.

A. Exhibit No. HVII-20 provides a listing of security issuances for the Company for the next two years.

It is important for York Water to maintain a strong financial profile so that it can raise both equity and debt capital needed to finance construction during 2025 and 2026. The

Company expects to incur $100 million in construction expenditures (exclusive of acquisitions) during this two-year period. While a portion of these expenditures will be provided from internally generated funds and developer contributions, a strong financial profile is necessary to access capital markets for the remaining capital requirements at reasonable terms.

Capital is needed to meet the ongoing capital needs of providing water and wastewater service to customers in the Company's service territory.

The Company plans to continue to issue equity through its Dividend Reinvestment and Direct Stock Purchase and Sale Plan and its Employee Stock Purchase Plan.

Q. Explain Exhibit No. HVII-27.

A. Exhibit No. HVII-27 provides the Company's capital structure target.

The Company's capital structure target is to maintain an equity ratio between 50% and 55% of capital.

The target capital structure is determined based on the Company's projected capital needs, the Company's size and the capital structures employed by other comparable investor-owned water utilities.

The Company believes that it must maintain a strong financial profile, including a strong equity ratio given its construction expenditures and external capital requirements over the next several years. The Company's relatively small size makes it more difficult and expensive to raise external capital, and a strong equity ratio offsets the increased risk to investors.

Q. Explain Exhibit No. HVII-28.

A. Exhibit No. HVII-28 shows the Company's short-term debt balance, the construction work in progress balance, and the balance of construction work in progress, which is eligible for AFUDC for the most recent twenty-four months.

Q. Explain Exhibit No. HVII-32.

A. Exhibit No. HVII-32 provides various financial ratios not provided elsewhere for the five years ended December 31, 2021.

Q. Are you sponsoring any other Exhibits relating to rate of return?

A. Yes, I am also sponsoring Exhibit Nos. HVII-4, HVII-5, HVII-8, HVII-10, HVII-12, HVII-13, HVII-14, HVII-16, HVII-18, HVII-19, HVII-21, HVII-22, HVII-23, HVII-24, HVII-25, HVII-26, HVII-29, HVII-30 and HVII-31.

Q. Explain Exhibit No. HX-1.

A. Exhibit No. HX-1 is the Company's comparative balance sheet, per books, as of December 31, 2024, and December 31, 2023. Page 2 of Exhibit HX-1 reflects the assets of the Company net of depreciation reserve and reserve for uncollectible accounts in the

amount of $610,295,603 as of December 31, 2024, and $567,805,133 as of December 31, 2023. Page 3 of Exhibit No. HX-1 reflects the liabilities and total capitalization of the Company in the amount of $610,295,603 as of December 31, 2024, and $567,805,133 as of December 31, 2023.

Q. Explain Exhibit No. HX-2.

A. Exhibit No. HX-2 sets forth the major items of Other Physical Property, Investment in Affiliated Companies and Other Investments as of December 31, 2024. Exhibit No. HX-2 reflects the Other Physical Property of the Company as of December 31, 2024, in the amount of $2,070,079 and other investments as of December 31, 2021, in the amount of $59,724. Other investments of $59,724 represent shares of stock of Columbia Water Company purchased by York Water. The Company has no affiliates.

Q. Explain Exhibit No. HX-3.

A. Exhibit No. HX-3 sets forth the amount and a description of Special Cash Deposits held by the Company as of December 31, 2024. As of December 31, 2024, the Company has deposited in an interest-bearing statement savings account funds of its employees in the amount of $45,748. These funds of the Company's employees in the amount of $45,748 are offset by a credit amount, reflected in Account 23100211, Employee Benefits Withheld-ESPP and can be used only for purchase of the Company's common stock on behalf of employees in accordance with the Company's Employee Stock Purchase Plan.

As of December 31, 2024, the Company has deposited $500 with York Township to be used to indemnify the Township against any loss or damage caused by the Company while working in the Township's streets.

Q. Explain Exhibit No. HX-4.

A. Exhibit No. HX-4 details and describes Notes Receivable, Accounts Receivable from Associated Companies and Other Accounts Receivable as of December 31, 2024. Page 1 of Exhibit No. HX-4 details Notes Receivable as of December 31, 2024, in the amount of $255,481, comprised of a note receivable from a water district. A general description of the water district procedure can be found in the Commission's Order in York Water's 1992 rate case (77 Pa. P.U.C. 367).

York Water had no accounts receivable from associated companies as of December 31, 2024.

York Water classifies other significant receivables, other than customer accounts, in Account 142, Other Accounts Receivable. A detail of Other Accounts Receivable as of December 31, 2024, in the amount of $457,036 is shown on page 2 of Exhibit No. HX-4.

A component of Other Accounts Receivable as of December 31, 2021, shown on page 2 of Exhibit No. HX-4 is The York Water Company Employees' Stock Purchase Plan in the amount of $45,748.

York Water has an Employee Stock Purchase Plan program. Stock purchases are paid entirely by employees through employee payroll deductions. Stock purchases are made on a quarterly basis. Pending the actual stock purchases, the employee payroll deductions are deposited in a segregated bank account and are credited on the Company's books as Employee Benefits Withheld-ESPP (See Exhibit No. HX-3). As an offsetting entry, the Company debits, to Other Accounts Receivable, an amount that matches the payroll deductions. Interest earned on the payroll deductions also is credited to the employees. When stock purchases are made, the purchase price of the stock is credited to Other Accounts Receivable and is debited to Amounts Withheld from Employees.

Q. Explain Exhibit No. HX-5.

A. York Water uses the reserve method of recording uncollectible accounts for book purposes. Exhibit No. HX-5 provides the amount of accumulated reserve for uncollectible accounts as of December 31, 2024, 2023, and 2022. Exhibit No. HX-5 also provides the annual accruals, amounts of accounts written off and recoveries of amounts previously written off for the twelve months ended December 31, 2024, 2023, and 2022. Exhibit Nos. HIII-2-2 and HIII-2-40 present the Company's uncollectible accounts expense for ratemaking purposes.

Q. Explain Exhibit No. HX-6.

A. Exhibit No. HX-6 provides a list of prepayments as of December 31, 2024, in the amount of $1,702,663.

Q. Explain Exhibit No. HX-8.

A. Exhibit No. HX-8 details and describes Other Deferred Assets as of December 31, 2024. As of December 31, 2024, the Company reflected on its balance sheet Unamortized Debt Expense in the amount of $2,665,793. This account includes the unamortized portion of debt expense as of December 31, 2024, associated with the issuance of long-term debt. The debt expense is amortized over the respective terms of long-term debt by crediting this account and debiting Account 428, Amortization of Debt Expense.

As of December 31, 2024, the Company reflected on its balance sheet Deferred Rate Case Expense in the amount of $214,986. The normalization of rate case expenses for book purposes will be credited to this account and charged to Account No. 66680000, Rate Case Expenses. I note that the Company's claim for rate case expense is based upon a normalization of estimated expenses.

As of December 31, 2024, the Company reflected on its balance sheet Cash Value of Deferred Compensation Plans in the amount of $4,934,554. The Company has a supplemental retirement plan for five key employees of the Company, consisting of the President and Chief Executive Officer, Chief Financial Officer, Chief Administrative Officer and General Counsel, Vice-President-Operations, and Vice President-Engineering and seven retired former key employees. The plan is funded through life insurance policies. The Company has a deferred savings plan for fifteen of its management and supervisory employees and ten retired former management employees. The plan is also funded through life insurance policies. The deferred debit related to both plans' benefits represents the current cash surrender value of the life insurance policies that have been purchased to reimburse the Company for the costs of the plans. The Company also

reflects on its books of account as a deferred credit the current accrued amount of the Company's future liability with respect to the deferred compensation benefits.

The expenses and income associated with the Company's supplemental retirement and deferred savings plans have been eliminated from this rate case in accordance with the settlement approved by the Commission in the Company's 2001 base rate case at Docket No. R-00016236 with the exception of expenses from the deferred savings plan for employees not in the defined benefit pension plan.

As of December 31, 2024, the Company reflected on its balance sheet deferred preliminary survey costs in the amount of $7,056. This account includes expenditures for preliminary surveys, plans and investigations made for the purpose of determining the feasibility of projects under consideration. These expenditures are not included in the Company's rate base or in the cost of service in this case.

York Water does not have deferred asset accounts for temporary facilities, research and development and property losses, and therefore, there is no amortization with regard to such items, which would affect operating results.

Q. Explain Exhibit No. HX-10.

A. Exhibit No. HX-10 details and describes Other Deferred Credits as of December 31, 2024. As of December 31, 2024, the Company reflected on its corporate books deferred interest rate swap in the amount of $385,890. The Company utilizes an interest rate swap agreement to convert its variable rate debt to a fixed rate (a cash flow hedge). As of

December 31, 2024, the Company recorded an unrealized loss on the interest rate swap. The interest rate swap agreement will expire on October 1, 2029.

Q. Explain Exhibit No. HX-12.

A. Page 2 of Exhibit No. HX-12 provides an analysis of Retained Earnings for the twelve months ended December 31, 2024, 2023, 2022, and 2021.

Q. Are you sponsoring any other exhibits regarding the Company's balance sheet?

A. Yes, I am also sponsoring Exhibit Nos. H (c)-2, HX-7, HX-9, HX-11, and HX-13.

Q. Are you sponsoring any other exhibits?

A. Yes, I am also sponsoring Exhibit Nos. H (a)-1, H (a)-6, H (a)-9, H (a)-10, H (a)-11, HVIII-1, HVIII-2, HXI-1, HXI-2, HX1-3, and HXI-4.

Q. Does this conclude your historic test year direct testimony at this time?

A. Yes.

YORK WATER STATEMENT NO. 4

BEFORE THE

PENNSYLVANIA PUBLIC UTILITY COMMISSION

THE YORK WATER COMPANY

DIRECT TESTIMONY OF DANIEL E. COPPERSMITH JR.

Q. State your name and business address.

A. Daniel E. Coppersmith Jr. My business address is: 130 East Market Street, York, Pennsylvania.

Q. By whom are you employed?

A. I am employed by The York Water Company ("York Water" or the "Company").

Q. State your present position with the Company and explain your duties and responsibilities.

A. I am the Finance Manager for the Company. My duties and responsibilities include preparing the operating budget, managing the Property Records Department, and filing data requirements with the Pennsylvania Public Utility Commission ("Commission").

Q. How long have you been employed by the Company?

A. I have been employed by the Company since June 19, 2007.

Q. What is your educational background?

A. I have a Bachelor's of Science Degree in Accounting from Central Penn College.

Q. Have you previously testified before a regulatory commission?

A. Yes, I have presented testimony to the Commission in the Company's last two rate cases.

Q. Will you list the exhibits you are sponsoring in this proceeding?

A. I am sponsoring the following water operations exhibits prepared by me or under my direction and supervision:

Exhibit No. H (c)-3 relating to utility plant;

Exhibit No. HI-2-1 relating to depreciation expense included in the statement of operations for the water division; and

Exhibit Nos. H (c)-1, HV-1, HV-1-2, HV-1-3, HV-1-6, HV-1-7, HV-1-8, HV-1-9, HV-2, HV-3, HV-4, HV-5, HV-6, HV-7, HV-8, HV-8-1, HV-8-2, HV-8-3, HV-8-4, HV-9, HV-11, HV-13, HV-14, HV-15, HV-16, HV-16-1 and HV-16-2 relating to the original cost measure of value for the water division.

Q. Explain Exhibit No. H(c)-3.

A. Exhibit No. H(c)-3 provides a summary, by detailed plant account, of the book value of utility property as of December 31, 2024.

Q. Explain Exhibit No. HI-2-1.

A. Exhibit No. HI-2-1 adjusts the water depreciation accrual from the level reflected on the corporate books for the twelve months ended December 31, 2024, to the level determined in the depreciation study identified as Exhibit No. HVI. The adjustment in the amount of $1,379,736 is determined by subtracting the booked depreciation accrual for the twelve months ended December 31, 2024, in the amount of $12,009,717 from the pro forma annual depreciation accrual in the amount of $13,389,453. The adjustment in the amount of $1,379,736 has been carried forward to Exhibit No. HI-2, Column 2.

Q. Who will testify with respect to the pro forma depreciation expense for the twelve month period ended December 31, 2024?

A. John J. Spanos, President, Depreciation and Valuation Studies, Gannett Fleming Valuation and Rate Consultants, Inc. will testify with respect to the annual water depreciation accrual.

Q. Are you sponsoring any other exhibits regarding the Company's water statement of operations?

A. No.

Q. Explain Exhibit No. HV-1.

A. Exhibit No. HV-1 provides a summary of the components of the water original cost measure of value in the amount of $382,415,236 as of December 31, 2024, net operating income available and rate of return under existing rates for the twelve months ended December 31, 2024, net operating income and rate of return under existing rates after adjustments for ratemaking purposes ("pro forma") for the twelve months ended

December 31, 2024, and net operating income and rate of return under proposed rates for the twelve months ended December 31, 2024.

A summary of the components of the original cost measure of value in the amount of $382,415,236 as of December 31, 2024, is shown on page 2 of Exhibit No. HV-1.

One component is the utility plant in service less book accrued depreciation as of December 31, 2024. The original cost of utility plant in service per books as of December 31, 2024, is $573,754,156 and the accrued depreciation as of December 31, 2024, is $114,366,888. The depreciated original cost of utility plant in service as of December 31, 2024, is $459,387,268 ($573,754,156 - $114,366,888 = $459,387,268). The details of original cost of utility plant in service and accrued depreciation by account, sub account and vintage are set forth in Exhibit No. HVI.

Q. Who will testify with respect to accrued depreciation in the amount of $114,366,888 as of December 31, 2024, related to utility plant in service?

A. John J. Spanos will testify with respect to water accrued depreciation (see York Water Statement No. 106).

Q. Will you continue with your explanation of Page 2 of Exhibit No. HV-1?

A. The unamortized balance, as of December 31, 2024, of deferred Federal income taxes related to water accelerated depreciation in the amount of $25,514,033 is deducted from the original cost measure of value, and this amount is set forth in Exhibit No. HV-1-1, which is explained in Mr. Poff's testimony (see York Water Statement No. 3).

The unamortized balance, as of December 31, 2024, of excess deferred Federal income taxes related to accelerated depreciation in the amount of $13,089,927 is deducted from the original cost measure of value, and this amount is set forth in Exhibit No. HV-1-1, which is explained in Mr. Poff's testimony (see York Water Statement No. 3).

An amount of $34,267,831 representing contributions in aid of construction less accrued depreciation as of December 31, 2024, is deducted from the original cost measure of value. This amount consists of the original cost of contributions in aid of construction per books as of December 31, 2024, in the amount of $43,064,337 less accrued depreciation as of December 31, 2024, in the amount of $8,796,506 ($43,064,337 - $8,796,506 = $34,267,831). The details are shown by account, sub account and vintage in Exhibit No. HVI.

An amount of $10,568,467 for customers' advances for construction less accrued depreciation as of December 31, 2024, is deducted from the original cost measure of value. This component consists of the original cost of customers' advances for construction per books as of December 31, 2024, in the amount of $14,892,027 less accrued depreciation as of December 31, 2024, in the amount of $4,323,560 ($14,892,027 - $4,323,560 = $10,568,467). The details are shown by account, sub account and vintage in Exhibit No. HVI.

Q. Who will testify with respect to the accrued depreciation related to contributions and advances?

A. John J. Spanos will testify with respect to accrued depreciation (see York Water Statement No. 106).

Q. Do the amounts set forth in Exhibit No. HV-1 for Contributions and Advances reflect any amounts related to income tax liabilities that the Company has incurred between January 1, 1987, and June 12, 1996, as a result of the TRA-86 requirement that Contributions and Advances be taxed or has incurred between January 1, 2018, and December 31, 2020, as a result of the Tax Cuts and Jobs Act of 2017 requirement that Contributions and Advances be taxed?

A. No. Consistent with the Company's ratemaking and accounting procedure in effect at the time with regard to the income taxes on Contributions and Advances, the Company has made no adjustment to amounts recorded between January 1, 1987, and June 12, 1996, or between January 1, 2018, and December 31, 2020, for Contributions or Advances to reflect additional income taxes that were required to be paid with respect to receipt of such Contributions or Advances as a result of Section 824 of TRA-86 or the Tax Cuts and Jobs Act of 2017. Contributions and Advances received between January 1, 1987, and June 12, 1996, and between January 1, 2018, and December 31, 2020, are reflected in the utility plant accounts and in the accounts for Contributions and Advances, as shown in Exhibit No. HVI at the original cost of the facilities constructed with the Contribution or Advance, without consideration of the associated income tax liability incurred by the Company. Under federal tax law provisions in effect at the time, contributions and advances received subsequent to June 12, 1996, through December 31, 2017, were not taxed. Under federal tax law provisions currently in effect, contributions and advances received subsequent to December 31, 2020, are not taxed.

Q. Will you continue with your explanation of Exhibit No. HV-1?

A. Funds supplied through Customer Advances in the amount of $1,696,554 are deducted from the original cost measure of value, and this amount is set forth in Exhibit No. HV-1-2, which I will explain later.

Materials and supplies in the amount of $3,536,482 are included in the original cost measure of value, and the details are set forth in Exhibit No. HV-11, which I will explain later.

An allowance for cash working capital in the amount of $3,554,371 is included in the original cost measure of value. The details are shown in Exhibit Nos. HV-8, HV-8-1, HV-8-1 (a), HV-8-1 (b), HV-8-1 (c), HV-8-1 (d), HV-8-1 (e), HV-8-1 (f), HV-8-1 (g), HV-8-1 (g) 1, HV-8-1 (g) 2, HV-8-2, HV-8-3, and HV-8-4, which Mr. Poff and I will explain later.

Unamortized utility plant adjustments for Margaretta Mobile Home Park, Westwood Mobile Home Park, Lincoln Estates Mobile Home Park, The Meadows, and Scott Water Company in the amount of $(83,994) ($23,129 + $(31,448) + $(32,160) + $(66,174) + $22,659) are included in the original cost measure of value. The details are set forth in Exhibit Nos. HV-1-3, HV-1-6, HV-1-7, HV-1-8, and HV-1-9. I note that Exhibit No. HV-1-4 and Exhibit No. HV-1-5 were not used in this case.

Taxes on deposits for construction and customer advances in the amount of $1,157,922 are included in the original cost measure of value. The details are set forth in Exhibit No. HV-1-10, which Mr. Poff will explain in his testimony (see York Water Statement No.3).

Column 1 of page 3 of Exhibit No. HV-1 shows net operating income available for return under existing rates for the twelve months ended December 31, 2024, in the amount of $26,939,804 and the rate of return on the original cost measure of value as of December 31, 2021, of 7.04%. Column 3 of page 3 of Exhibit No. HV-1 shows the adjustments to net operating income in the amount of $(2,709,095). These water operation adjustments have been detailed in other exhibits, which Mr. Poff is testifying (see York Water Statement No. 3). Column 4 of page 3 of Exhibit No. HV-1 shows pro forma net operating income available for return under existing rates for twelve months ended December 31, 2024, in the amount of $24,230,709 and the rate of return on the original cost of measure of value as of December 31, 2021, of 6.34%. Adjustments to pro forma net operating income for the twelve months ended December 31, 2024, related to the effect of proposed rates in the amount of $6,420,590 are shown in Column 6 of page 3 of Exhibit No. HV-1. These adjustments have been detailed in other exhibits, to which Mr. Poff is testifying (see York Water Statement No. 3). Column 7 of page 3 of Exhibit No. HV-1 shows pro forma net operating income available for return for the twelve months ended December 31, 2024, in the amount of $30,651,299 and the rate of return on the original cost measure of value as of December 31, 2024, of 8.01%.

Q. Explain Exhibit No. HV-1-2.

A. Exhibit No. HV-1-2 shows the thirteen-month average of customers' advances received from developers that have not been spent on construction projects as of December 31, 2024. The Company's normal procedure with respect to revenue-producing projects is to estimate the cost of the project and to require the developer to deposit the estimated cost prior to construction. Construction generally is completed within a period of several months, after which any advance in excess of construction costs is refunded. If

construction costs exceed the original estimate, the developer must advance additional costs to make up the difference. The thirteen-month average of customer advances received from developers with respect to revenue-producing projects remaining under construction as of December 31, 2024, in the amount of $4,906,198 are shown in Column 2 of Exhibit No. HV-1-2. The thirteen-month average of advance dollars that have been spent as of December 31, 2024, in the amount of $3,209,644 are shown in Column 3 of Exhibit No. HV-1-2. The thirteen-month average of customers' advances remaining to be spent as of December 31, 2021, in the amount of $1,696,554 ($4,906,198 - $3,209,644) are shown in Column 4 of Exhibit No. HV-1-2. The customers' advances remaining to be spent as of December 31, 2024, of $1,696,554 has been carried forward to Exhibit No. HV-1, page 2 and has been deducted from the original cost measure of value.

Q. Explain Exhibit No. HV-1-3.

A. Exhibit No. HV-1-3 provides the calculation of the unamortized utility plant acquisition adjustment relative to the acquisition of Margaretta Mobile Home Park as of December 31, 2024, in the amount of $23,129 included in the original cost measure of value.

Reasonable acquisition costs greater than depreciated original cost are permitted to be included in rate base and amortized over ten years in accordance with Section 1327 of the Public Utility Code.

The unamortized acquisition adjustment of $23,129 is determined by subtracting the depreciated original cost of waterworks property acquired from Margaretta Mobile Home Park in the amount of $46,159 and the amortization from March 1, 2019, the effective date of rates under the Order issued in the Company's 2018 base rate proceeding (Docket

No. R-2018-3000019), to December 31, 2024 in the amount of $32,380 from the Margaretta Mobile Home Park acquisition costs of $101,667 ($101,667 - $46,159 - $32,380 = $23,129).

Q. Explain Exhibit No. HV-1-6.

A. Exhibit No. HV-1-6 provides the calculation of the unamortized negative utility plant acquisition adjustment relative to the acquisition of Westwood Mobile Home Park as of December 31, 2024, in the amount of $(31,448) deducted from the original cost measure of value.

The negative acquisition adjustment subject to amortization of $(75,474) is determined by subtracting the depreciated original cost of waterworks property acquired from Westwood Mobile Home Park in the amount of $96,795 from the Westwood Mobile Home Park acquisition costs of $21,321 [$21,321 - $96,795 = ($75,474)]. The unamortized Westwood Mobile Home Park negative acquisition adjustment as of December 31, 2024, of $(31,448) is determined by subtracting the amortization during the period March 1, 2019, the effective date of rates under the Order issued in the Company's 2018 base rate proceeding (Docket No. R-2018-3000019), through December 31, 2024, of $(44,027) from the negative acquisition adjustment subject to amortization of $(75,474) [$(75,474) – $(44,027) = $(31,448)].

Q. Explain Exhibit No. HV-1-7.

A. Exhibit No. HV-1-7 provides the calculation of the unamortized negative utility plant acquisition adjustment relative to the acquisition of Lincoln Estates Mobile Home Park as

of December 31, 2024, in the amount of $(32,160) deducted from the original cost measure of value.

The negative acquisition adjustment subject to amortization of $(77,185) is determined by subtracting the depreciated original cost of waterworks property acquired from Lincoln Estates Mobile Home Park in the amount of $146,957 from the Lincoln Estates Mobile Home Park acquisition costs of $69,772 [$69,772 - $146,957 = $(77,185)]. The unamortized Lincoln Estates Mobile Home Park negative acquisition adjustment as of December 31, 2024, of $(32,160) is determined by subtracting the amortization during the period March 1, 2019, the effective date of rates under the Order issued in the Company's 2018 base rate proceeding (Docket No. R-2018-3000019), through December 31, 2024, of $(45,025) from the negative acquisition adjustment subject to amortization of $(77,185) [($77,185) – $(45,025) = $(32,160)].

Q. Explain Exhibit No. HV-1-8.

A. Exhibit No. HV-1-8 provides the calculation of the unamortized negative utility plant acquisition adjustment relative to the acquisition of The Meadows as of December 31, 2021, in the amount of $(66,174) deducted from the original cost measure of value.

The negative acquisition adjustment subject to amortization of $(158,818) is determined by subtracting the depreciated original cost of waterworks property acquired from The Meadows in the amount of $221,778 from The Meadows acquisition costs of $62,960 [$62,960 - $221,778 = $(158,818)]. The unamortized The Meadows negative acquisition adjustment as of December 31, 2021, of $(66,174) is determined by subtracting the amortization during the period March 1, 2019, the effective date of rates under the Order

issued in the Company's 2018 base rate proceeding (Docket No. R-2018-3000019), through December 31, 2024, of $(92,644) from the negative acquisition adjustment subject to amortization of $(158,818) [$(158,818) – $(92,644) = $(66,174)].

Q. Explain Exhibit No. HV-1-9.

A. Exhibit No. HV-1-9 provides the calculation of the acquisition adjustment subject to amortization relative to the acquisition of the Scott Water Company as of December 31, 2024, in the amount of $22,659 included in the original cost measure of value.

Reasonable acquisition costs greater than depreciated original cost are permitted to be included in rate base and amortized over ten years in accordance with Section 1327 of the Public Utility Code. Please see the testimony of Mr. Hand (York Water Statement No. 1) for details on this acquisition.

The acquisition adjustment subject to amortization of $22,659 is determined by subtracting the depreciated original cost of waterworks property acquired from the Scott Water Company in the amount of $9,144 from the Scott Water Company acquisition costs of $31,803 ($31,803 - $9,144 = $22,659).

The Company is proposing amortization over a ten-year period in Exhibit No. HIII-2-22.

Q. Explain Exhibit No. HV-8.

A. Exhibit No. HV-8 is the calculation of the cash working capital requirement in the amount of $3,554,371 to be included in the original cost measure of value. The cash working capital requirement consists of various amounts that are listed on Exhibit No.

HV-8. The first amount on Exhibit No. HV-8 is $4,245,987 that is the cash working capital allowance calculated using the lead-lag methodology. The total of pro forma operating expenses including taxes, less uncollectible accounts and amortized expenses in the amount of $29,436,096 is divided by the number of days in the pro forma test year, 365 ($29,436,096 ÷ 365) to derive the average daily operating expense, including taxes, in the amount of $80,647 and this amount is then multiplied by the net lag relationship between the receipt of operating revenues and the payment of operating expenses and taxes of 52.6 days to arrive at the cash working capital requirement in the amount of $4,245,987 ($80,647 x 52.6). The calculation of the net lag of 52.6 days is shown on Exhibit No. HV-8-1, which will be explained later.

The second amount shown on Exhibit No. HV-8 is $137,523 and is for prepayment of the Commission, Office of Consumer Advocate ("OCA"), Office of Small Business Advocate ("OSBA"), and Damage Prevention Committee ("DPC") assessments. This represents a thirteen-month average of monthly prepayment balances of the Commission, OCA, OSBA, and DPC assessments reflected on the Company's balance sheet for the thirteen months ended December 31, 2024. Prepaid Commission, OCA OSBA, and DPC assessments have been excluded from the Company's lead-lag study. The calculation of the thirteen-month average prepayment balance is presented on Exhibit No. HV-8-4, which I will explain later.

The third amount shown on Exhibit No. HV-8 is $(409,315) that is a deduction with respect to builders' deposits and water revenues paid by customers in advance. This represents a thirteen-month average of builders' deposits and water revenues paid in

advance. The calculation of the thirteen-month average is shown on Exhibit No. HV-8-2, which I will explain later.

The fourth amount is $(419,823) that is a deduction with respect to interest payments. The calculation of the deduction with respect to interest payments is shown on Exhibit No. HV-8-3, which I will explain later.

The total cash working capital requirement in the amount of $3,554,371, is carried forward to Exhibit No. HV-1 and is included in the Company's original cost measure of value.

Q. Explain Exhibit No. HV-8-1.

A. Exhibit No. HV-8-1 is the calculation of the net lag relationship of 52.6 days between the receipt of operating revenues and the payment of operating expenses including taxes. The 52.6 day net lag relationship, shown in Column 5, is determined by reducing the weighted average lag days in receipt of revenues of 61.2 days by the weighted average lag days in payment of expenses and taxes of 8.5 days (61.2 – 8.5 = 52.6). The weighted average lag days in receipt of operating revenues of 52.6 days is determined by multiplying pro forma sales of water under existing rates by class, shown in Column 2, by the estimated number of lag days by class, shown in Column 3, to arrive at dollar days of 4,071,193,721 shown in Column 4. The estimated number of lag days by class is calculated in Exhibit No. HV-8-1 (g), which Mr. Poff will explain in his testimony (York Water Statement No. 3). The dollar-day amount of 4,071,193,721 shown in Column 4 is divided by total pro forma revenues from sales of water at existing rates of $66,552,814 shown in Column 2 to produce 61.2 days (4,071,193,721 ÷ $66,552,814 = 61.2).

The weighted average lag days in payment of operating expenses and taxes of 8.5 days is determined by multiplying pro forma operating expenses including taxes, excluding uncollectible accounts and amortized expenses, shown in Column 2, in the amount of $29,436,096 by the estimated number of lag days in payment of expenses and taxes by class of expense and tax, shown in Column 3, to arrive at dollar days of 250,890,794, shown in Column 4. The dollar-day amount of 250,890,794, shown in Column 4, is divided by total pro forma operating expenses including taxes, excluding uncollectible accounts and amortized expenses, in the amount of $29,436,096 to produce 8.5 days (250,890,794 ÷ $29,436,096 = 8.5). The calculation of lag days for payroll expense is presented in footnote (a) of Exhibit No. HV-8-1. The calculation of lag days for power purchased, insurance, other goods and services and taxes is based on an analysis of invoices paid during twelve months ended December 31, 2024.

The net lag relationship of 52.6 days between the receipt of operating revenues and the payment of operating expenses including taxes has been carried forward to Exhibit No. HV-8.

Q. Explain Exhibit No. HV-8-2.

A. Exhibit No. HV-8-2 shows the calculation of the thirteen-month average of builders' deposits and water revenues paid in advance in the amount of $409,315 based upon the month-end balances of builders' deposits and water revenues paid in advance for the thirteen months ended December 31, 2024. The thirteen-month average of builders' deposits and water revenues in advance of $409,315 has been carried forward to Exhibit No. HV-8.

Q. Explain Exhibit No. HV-8-3.

A. Exhibit No. HV-8-3 presents the calculation of the payment lag for interest payments in the amount of $419,823. The amount of $419,823 is calculated by multiplying the average daily interest payments of $22,022 by the net interest payment lag of 19.1 days ($22,022 x 19.1). The average daily interest expense in the amount of $22,022 is calculated by dividing the interest payments in the amount of $8,037,870 by the number of days in the test year of 365 ($8,037,870 ÷ 365 = $22,022). The net interest payment lag of 19.1 days is determined by subtracting the weighted average lag days in receipt of operating revenues of 61.2 days from the weighted average lag days for interest payments of 80.2 days (80.2 days – 61.2 days = 19.1 days). The weighted average lag days for interest payments of 80.2 days is determined by dividing weighted interest payments of 644,931,099 shown in Column 3, by interest payments in the amount of $8,037,870, shown in Column 1 ($644,931,099 ÷ $8,037,870 = 80.2). The interest available for working capital in the amount of $419,823 has been carried forward to Exhibit No. HV-8.

Q. Explain Exhibit No. HV-8-4.

A. Exhibit No. HV-8-4 shows the calculation of the thirteen-month average of prepaid Commission, OCA, OSBA, and DPC assessments of $137,523 based upon the month-end balances of prepaid Commission, OCA, OSBA), and DPC assessments for the thirteen months ended December 31, 2024. Prepaid Commission, OCA, OSBA, and DPC assessments have been excluded from the Company's lead-lag study. The thirteen-month average of prepaid Commission, OCA, OSBA, and DPC assessments of $137,523 has been carried forward to Exhibit No. HV-8.

Q. Explain Exhibit No. HV-11.

A. Exhibit No. HV-11 describes the Company's materials and supplies methodology. In addition, this Exhibit shows the calculation of the thirteen-month average, in the amount of $3,536,482, of materials and supplies based upon month-end balances for the thirteen months ended December 31, 2024. I note that under the Company's accounting procedure, amounts are included in the materials and supplies balance upon receipt of the materials and supplies. The total for the thirteen-month period is $45,974,263, and this amount is divided by 13 to arrive at the thirteen-month average of the materials and supplies balance in the amount of $3,536,482 ($45,974,263 ÷ 13). The thirteen-month average in the amount of $3,536,482 has been carried forward to Exhibit No. HV-1, page 2 and has been added to the original cost measure of value.

Q. Are you sponsoring any other exhibits regarding the original cost measure of value?

A. Yes, I am also sponsoring Exhibit Nos. H (c)-1, HV-2, HV-3, HV-4, HV-5, HV-6, HV-7, HV-9, HV-13, HV-14, HV-15, HV-16, HV-16-1, and HV-16-2.

Q. Does this conclude your historic test year direct testimony at this time?

A. Yes.

YORK WATER STATEMENT NO. 103

BEFORE THE

PENNSYLVANIA PUBLIC UTILITY COMMISSION

THE YORK WATER COMPANY

DIRECT TESTIMONY OF MATTHEW E. POFF

Q. State your name and business address.

A. Matthew E. Poff. My business address is: 130 East Market Street, York, Pennsylvania.

Q. By whom are you employed?

A. I am employed by The York Water Company ("York Water" or the "Company").

Q. State your present position with the Company and explain your duties and responsibilities.

A. I am Chief Financial Officer and Treasurer for the Company. My duties and responsibilities include managing the day to day financial transactions of the Company.

Q. How long have you been employed by the Company?

A. I have been employed by the Company since June 15, 2009.

Q. What is your educational background?

A. I have a Bachelor's Degree from the Pennsylvania State University, University Park, Pennsylvania and a Master's Degree in Business Administration from York College of Pennsylvania, York, Pennsylvania.

Q. Are you a certified public accountant?

A. Yes, I am a certified public accountant licensed by the Commonwealth of Pennsylvania.

Q. What has been your other business experience?

A. From September 2006 through June 2009, I was employed by I. B. Abel, Inc. in York, Pennsylvania as the Chief Financial Officer. In this capacity, I managed the day-to-day accounting and financial transactions of the Company.

From July 1995 through September 2006, I was employed by Beard Miller Company LLP (now Baker Tilly US, LLP) as a certified public accountant. In this capacity, I oversaw the audits and reviews and preparation of financial statements and tax returns for various business entities, both private and public companies of various sizes.

Q. Have you previously testified before a regulatory commission?

A. Yes, I have presented testimony to the Pennsylvania Public Utility Commission ("Commission") in the Company's last three rate cases.

Q. Will you list the exhibits you are sponsoring in this proceeding?

A. I am sponsoring the following exhibits prepared by me or under my direction and supervision:

Exhibit Nos. F (b)-2, F (c)-5, F (c)-6, FI-1, FI-2, FI-3, FI-4, and FI-5 relating to the statement of operations for the water division;

Exhibit Nos. F (a)-2, F (a)-3, F (a)-4, F (a)-5, F (b)-3, F (b)-4, F (b)-5, F (b)-6, FII-1, FII-2, FII-2-1, FII-2-2, FII-2-3, FII-2-4, FII-2-5, FII-2-6, FII-2-7, FII-2-8, FII-2-9, FII-2-10, FII-2-11, FII-2-12, FII-2-13, FII-2-14, FII-2-15, FII-2-16, FII-2-17, FII-2-18, FII-2-20, FII-2-21, FII-2-22, FII-2-23, FII-2-24, FII-2-25, FII-2-26, FII-2-27, FII-2-28, FII-2-29, FII-2-30, FII-2-31, FII-2-32, FII-2-34, FII-2-35, FII-2-36, FII-2-37, FII-2-38, FII-2-39, FII-2-40, FII-2-41, FII-2-42, FII-2-43, FII-3, FII-4, FII-5, FII-6, FII-7, FII-8, FII-9, FII-10, FII-11, FII-12, and FII-13 relating to operating revenues for the water division;

Exhibit Nos. FIII-1, FIII-2, FIII-2-1, FIII-2-1(a), FIII-2-1(b), FIII-2-2, FIII-2-3, FIII-2-4, FIII-2-5, FIII-2-6, FIII-2-7, FIII-2-8, FIII-2-9, FII-2-10, FIII-2-11, FIII-2-12, FIII-2-15, FIII-2-15(a), FIII-2-15(b), FIII-2-16, FIII-2-17, FIII-2-18, FIII-2-19, FIII-2-20, FIII-2-21, FIII-2-22, FIII-2-25, FIII-2-25(a), FIII-2-25(b), FIII-2-26, FIII-2-27, FIII-2-28, FIII-2-29, FIII-2-30, FIII-2-31, FIII-2-32, FIII-2-33, FIII-2-34, FIII-2-35, FIII-2-36, FIII-2-37, FIII-2-40, FIII-2-40(a), FIII-2-40(b), FIII-2-41, FIII-2-42, FIII-2-43, FIII-2-44, FIII-2-45, FIII-2-46, FIII-2-47, FIII-2-48, FIII-2-49, FIII-2-50, FIII-2-51, FIII-2-52, FIII-2-55, FIII-3, FIII-4, FIII-5, FIII-6, FIII-7, FIII-8, FIII-9, FIII-10, FIII-11, FIII-12, FIII-13, FIII-14, FIII-15, FIII-16, FIII-17, FIII-18, FIII-19, FIII-20, FIII-21, FIII-23, FIII-24, FIII-25, FIII-26, FIII-27, and FIII-28 relating to operating expenses for the water division;

Exhibit Nos. FIV-2, FIV-12, FIV-15, FIV-15-1, FIV-15-2, FIV-15-3, FIV-15-4, FIV-15-5, FIV-15-6, FIV-15-7, FIV-15-8, FIV-15-9, FIV-15-10, FIV-15-11, and FIV-15-12 relating to operating taxes other than income taxes for the water division;

Exhibit Nos. FIV-1, FIV-3, FIV-4, FIV-5, FIV-6, FIV-7, FIV-8, FIV-9, FIV-10, FIV-11, FIV-13, FIV-14, FIV-16, FIV-17, FIV-17-1, FIV-17-2, FIV-17-3, FIV-17-3 (a), FIV-17-4, FIV-17-5, FIV-17-6, FIV-17-7, FIV-17-8, FIV-17-8 (a), FIV-17-9, FIV-17-10, FIV-17-11, and FIV-18 relating to operating income taxes for the water division;

Exhibit Nos. FV-1-1, FV-1-10, FV-8-1(g), FV-8-1(g)1, FV-8-1(g)2, and FV-10 relating to the original cost measure of value for the water division;

Exhibit Nos. FVII-1, FVII-2, FVII-3, FVII-4, FVII-5, FVII-6, FVII-7, FVII-8, FVII-9, FVII-10, FVII-11, FVII-12, FVII-13, FVII-14, FVII-15, FVII-16, FVII-17, FVII-18, FVII-19, FVII-20, FVII-21, FVII-22, FVII-23, FVII-24, FVII-25, FVII-26, FVII-27, FVII-28, FVII-29, FVII-30, FVII-31, and FVII-32, relating to rate of return;

Exhibit Nos. F (c)-2, FX-1, FX-2, FX-3, FX-4, FX-5, FX-6, FX-7, FX-8, FX-9, FX-10, FX-11, FX-12, and FX-13 relating to the balance sheet; and

Exhibit Nos. F (a)-1, F (a)-6, F (a)-9, F (a)-10, F (a)-11, F (b)-1, FVIII-2, FXI-1, FXI-2, FXI-3, and FXI-4.

Q. Explain Exhibit No. F (b)-1.

A. Exhibit No. F (b)-1 provides the specific reasons the Company proposes to increase its water rates. Despite the best efforts by York Water to control costs, the effects of increased expenses and net additions to rate base have reduced returns. The Company proposes to increase its water rates for the following reasons: (1) to provide sufficient revenues to recover the cost of providing water service to its customers; (2) to allow the Company to properly discharge its public duties by continuing to furnish adequate, safe, and reliable service; (3) to maintain its facilities properly; and (4) to afford the opportunity to more nearly approach a fair and reasonable rate of return on the original cost measure of value of its used and useful property.

Q. Explain Exhibit No. FI-2.

A. Exhibit No. FI-2 summarizes the projections of income for the twelve months ending December 31, 2025, and February 28, 2027, and the adjustments to such projected income to: (1) annualize and normalize the effect of changes occurring during the twelve months ending December 31, 2025, and February 28, 2027; and (2) reflect changes in operating revenues, uncollectible accounts, Commission, Consumer Advocate, Small Business Advocate, and Damage Prevention Control assessments, and income taxes due to the increase in operating revenues resulting from the proposed increase in rates.

Projected net income for the twelve months ending December 31, 2025, in the amount of $16,253,727 is shown in Column 4 of Exhibit No. FI-2, pages 2 through 4. I note that this amount reflects non-operating income and other income deductions not included in the calculation of net operating income for ratemaking purposes. In deriving the projected net operating income, I began with the pro forma net operating income at

present rates for the twelve months ended December 31, 2024, in the amount of $16,904,347, which is shown in Column 1 of Exhibit No. FI-2, pages 2 through 4, and which is taken from Exhibit No. HI-2. The net of all adjustments to revenues and expenses results in projected future test year level of income adjustments of $(621,330) at present rates as shown in Column 3 of Exhibit No. FI-2, pages 2 and 3. These adjustments are detailed in other exhibits, which will be explained later. The net operating income of $23,609,379 represents net operating income for the projected future test year. It is necessary to adjust such net operating income to reflect and annualize various changes during the future test year to determine operating income at the level of operations at the end of the test year at present rates to be used for ratemaking purposes.

Exhibit No. FI-2, pages 5 and 6 summarize the pro forma adjustments to the projected future test year net operating income. Projected net operating income for the twelve months ending December 31, 2025, in the amount of $23,609,379 is shown in Column 1 of Exhibit No. FI-2, pages 5 and 6. Adjustments to operating income in the net amount of $(423,974), to annualize and normalize the effect of changes during the twelve months ending December 31, 2025, are shown in Column 3 of Exhibit No. FI-2, pages 5 and 6. These adjustments are detailed in other exhibits, which I will explain later. The net operating income of $23,185,405 represents net operating income for the pro forma future test year.

In deriving the projected net operating income for the fully projected future test year, I began with the pro forma net operating income at present rates for the twelve months ended December 31, 2025, in the amount of $23,185,405, which is shown in Column 1 of

Exhibit No. FI-2, pages 8 and 9. The net of all adjustments to revenues and expenses results in fully projected future test year income adjustments of $(1,902,024) at present rates as shown in Column 3 of Exhibit No. FI-2, pages 8 and 9. These adjustments are detailed in other exhibits, which I will explain later. The net operating income of $21,283,381 represents net operating income for the fully projected future test year ending February 28, 2027. It is necessary to adjust such net operating income to reflect and annualize various changes during the future test year to determine operating income at the level of operations at the end of the test year at present rates to be used for ratemaking purposes.

Exhibit No. FI-2, pages 11 and 12 summarize the pro forma adjustments to the fully projected future test year net operating income. Projected net operating income for the twelve months ending February 28, 2027, in the amount of $21,283,381 is shown in Column 1 of Exhibit No. FI-2, pages 11 and 12. Adjustments to operating income in the net amount of $(278,060), to annualize and normalize the effect of changes during the twelve months ending February 28, 2027, are shown in Column 3 of Exhibit No. FI-2, pages 11 and 12. These adjustments are detailed in other exhibits, which I will explain later. The net operating income of $21,005,321 represents net operating income for the pro forma fully projected future test year.

Column 6 of Exhibit No. FI-2 pages 11 and 12 provides a summary of the increases to net operating income under proposed base rates at the fully projected future test year level of operations. The net increase to net operating income at proposed rates would be $14,646,663 after reflecting increases in operating revenues, and related increase in

uncollectible accounts, Commission, Consumer Advocate, Small Business Advocate, and Damage Prevention Control assessments and income taxes. These adjustments are shown in Column 6 of Exhibit No. FI-2, pages 11 and 12 and are detailed in other exhibits, which I will explain later. Pro forma net operating income for the twelve months ending February 28, 2027, in the amount of $35,651,984 is shown in Column 7 of Exhibit No. FI-2, pages 11 and 12.

Q. Are you sponsoring any other exhibits regarding the Company's statement of operations?

A. Yes, I am also sponsoring Exhibit Nos. F (b)-2, F (c)-5, F (c)-6, FI-1, FI-3, FI-4, and FI-5.

Q. Explain Exhibit No. F (b)-3.

A. Exhibit No. F (b)-3 provides the number of customers whose monthly bills will increase under proposed rates based on pro forma historic test year volumes.

Q. Explain Exhibit No. F (b)-5.

A. Exhibit No. F (b)-5 provides that no customers' monthly bills will decrease under proposed rates based on pro forma historic test year volumes.

Q. Explain Exhibit No. FII-1.

A. Exhibit No. FII-1 is a comparative statement of gallons sold and operating revenues by class for the twelve months ending December 31, 2025, and ending February 28, 2027, and the number of customers by class as of December 31, 2025, and February 28, 2027.

Q. Explain Exhibit No. FII-2.

A. Exhibit No. FII-2 summarizes the projections of operating revenues under existing rates for the twelve months ending December 31, 2025, and February 28, 2027, as well as the adjustments to such projected operating revenues to: (1) annualize the effect of changes occurring during the twelve months ending December 31, 2025, and February 28, 2027, under existing rates; and (2) reflect the increase in operating revenues resulting from the proposed increase in rates for water service. I note that York Water is not proposing in this case to allocate a portion of the wastewater revenue requirement to water customers.

Projected operating revenues under existing rates for the twelve months ending December 31, 2025, in the amount of $67,381,609 are shown in Column 3 of Exhibit No. FII-2, page 2. In deriving the projected operating revenues under existing rates, I began with the pro forma operating revenues at present rates for the twelve months ended December 31, 2024, in the amount of $67,351,080, which are shown in Column 1 of Exhibit No. FII-2, page 2, and which are taken from Exhibit No. HII-2. Adjustments to the pro forma historic test year operating revenues to project the future test year operating revenues under existing rates in the amount of $30,529 are shown in Column 2 of Exhibit No. FII-2, page 2. These adjustments are detailed in Exhibit Nos. FII-2-1 through FII-2-9, which I will explain later and are summarized in Exhibit No. FII-2, page 3.

Exhibit No. FII-2, page 4 summarizes the pro forma adjustments to the projected future test year operating revenues. Projected operating revenues under existing rates for the twelve months ending December 31, 2025, in the amount of $67,381,609 are shown in Column 1 of Exhibit No. FII-2, page 4. Adjustments to operating revenues under existing

rates in the amount of $436,868 to annualize the effect of changes during the twelve months ending December 31, 2025, are shown in Column 2 of Exhibit No. FII-2, page 4. These adjustments are detailed in Exhibit Nos. FII-2-10 through FII-2-19, which I will explain later, and are summarized in Exhibit No. FII-2, page 5. Column 3 of Exhibit No. FII-2, page 4 shows the pro forma operating revenues under existing rates of $67,818,476 for the twelve months ending December 31, 2025.

Projected operating revenues under existing rates for the twelve months ending February 28, 2027, in the amount of $67,987,204 are shown in Column 3 of Exhibit No. FII-2, page 6. In deriving the projected operating revenues under existing rates, I began with the pro forma operating revenues at present rates for the twelve months ended December 31, 2025, in the amount of $67,818,476, which are shown in Column 1 of Exhibit No. FII-2, page 6. Adjustments to the pro forma future test year operating revenues to project the fully projected future test year operating revenues under existing rates in the amount of $168,728 are shown in Column 2 of Exhibit No. FII-2, page 6. These adjustments are detailed in Exhibit Nos. FII-2-20 through FII-2-32, which I will explain later, and are summarized in Exhibit No. FII-2, page 7.

Exhibit No. FII-2, page 9 summarizes the pro forma adjustments to the fully projected future test year operating revenues. Projected operating revenues under existing rates for the twelve months ending February 28, 2027, in the amount of $67,987,204 are shown in Column 1 of Exhibit No. FII-2, page 9. Adjustments to operating revenues under existing rates in the amount of $318,106 to annualize the effect of changes during the twelve months ending February 28, 2027, are shown in Column 2 of Exhibit No. FII-2, page 9.

These adjustments are detailed in Exhibit Nos. FII-2-34 through FII-2-42, which I will explain later, and are summarized in Exhibit No. FII-2, page 8.

Pro Forma Distribution System Improvement Charge and State Tax Adjustment Surcharge revenues at existing rates of $2,091,789 based upon current DSIC and STAS rates are shown in Column 4, page 9. Adjustments to operating revenues in the amount of $20,311,978 reflect the increase in operating revenues due to the application of proposed base rates set forth in Supplement No. 165 to Tariff Water-Pa. P.U.C. No. 14 are shown in Column 8 of Exhibit No. FII-2, page 9. Pro forma operating revenues under proposed rates for the twelve months ending February 28, 2027, in the amount of $88,617,288 are shown in Column 9 of Exhibit No. FII-2, page 9.

Q. Explain Exhibit No. FII-2-1.

A. Exhibit No. FII-2-1 projects operating revenues under existing rates for estimated metered residential gravity customers connected and disconnected during the twelve months ending December 31, 2025. The projected net gain in number of metered residential gravity customers during the twelve months ending December 31, 2025, is 126. This projection is based on the average net gain in metered residential gravity customers for the two years ended December 31, 2024. The projected net gain of metered residential gravity customers during the twelve months ending December 31, 2025, of 126 is multiplied by the annual average revenue per average metered residential gravity customer during the historic test year ended December 31, 2024, which has been reduced due to a projected decline in usage that I will explain later, of $550.25 to derive the annualized revenue adjustment of $69,332 (126 x $550.25).

In order to present the projected future test year metered sales to residential customers, it is necessary to determine the portion of the annualized revenue adjustment in the amount of $69,332 that will occur during the twelve months ending December 31, 2025. The projected net gain of metered residential gravity customers for the twelve months ending December 31, 2025, is presumed to occur evenly throughout the future test year. Accordingly, one half (0.50) of the annualized revenue adjustment determined in this Exhibit is projected to occur during the twelve months ending December 31, 2025. The portion of the annualized revenue adjustment included in the twelve months ending December 31, 2025, or $34,666 ($69,332 x 0.50) has been carried forward to Exhibit No. FII-2, page 3. The remainder of the annualized revenue adjustment is reflected on Exhibit No. FII-2-10, which I will explain later.

Q. Explain Exhibit No. FII-2-2.

A. Exhibit No. FII-2-2 projects operating revenues under existing rates for estimated metered residential repumped customers connected and disconnected during the twelve months ending December 31, 2025. The projected net gain in number of metered residential repumped customers during the twelve months ending December 31, 2025, is 698. This projection is based on the average net gain in metered residential repumped customers for the two years ended December 31, 2024, exclusive of metered residential repumped customers gained during that period through the Longstown, Brookhaven, and Pine Run acquisitions. The Longstown acquisition, which occurred on February 21, 2024, the Brookhaven acquisition, which occurred on December 12, 2024, and the Pine Run acquisition, which occurred on December 12, 2024, resulted in the unusual,

immediate addition of a number of customers and are not representative of normal customer growth. Therefore, in estimating projected growth in customers based upon recent experience, it is proper to exclude customers added as a result of these acquisitions. I note that the annualization of revenues for these acquisitions is reflected in Exhibit No. FII-2-5. The projected net gain of metered residential repumped customers during the twelve months ending December 31, 2025, of 698 is multiplied by the annual average revenue per average metered residential repumped customer during the historic test year ended December 31, 2024, which has been reduced due to a projected decline in usage that I will explain later, of $651.91 to derive the annualized revenue adjustment of $455,034 (698 x $651.91).

In order to present projected future test year metered sales to residential customers, it is necessary to determine the portion of the annualized revenue adjustment in the amount of $455,034 that will occur during the twelve months ending December 31, 2025. The projected net gain of metered residential repumped customers for the twelve months ending December 31, 2025, is presumed to occur evenly throughout the future test year.

Accordingly, one half (0.50) of the annualized revenue adjustment determined in this Exhibit is projected to occur during the twelve months ending December 31, 2025. The portion of the annualized revenue adjustment included in the twelve months ending December 31, 2025, or $227,517 ($455,034 x 0.50) has been carried forward to Exhibit No. FII-2, page 3. The remainder of the annualized revenue adjustment is reflected on Exhibit No. FII-2-11, which I will explain later.

Q. Explain Exhibit No. FII-2-3.

A. Exhibit No. FII-2-3 projects operating revenues under existing rates for estimated metered commercial gravity customers connected and disconnected during the twelve months ending December 31, 2025. The projected net gain in number of metered commercial gravity customers during the twelve months ending December 31, 2025, is 7. This projection is based on the average net gain in metered commercial gravity customers for the two years ended December 31, 2024. The projected net gain of metered commercial gravity customers during the twelve months ending December 31, 2025, of 7 is multiplied by the annual average revenue per average metered commercial gravity customer during the historic test year ended December 31, 2024 of $1,860.77 to derive the annualized revenue adjustment of $13,025 (7 x $1,860.77).

In order to present projected future test year metered sales to commercial customers, it is necessary to determine the portion of the annualized revenue adjustment in the amount of $13,025 that will occur during the twelve months ending December 31, 2025. The projected net gain of metered commercial gravity customers for the twelve months ending December 31, 2025, is presumed to occur evenly throughout the future test year.

Accordingly, one-half (0.50) of the annualized revenue adjustment determined in this Exhibit is projected to occur during the twelve months ending December 31, 2025. The portion of the annualized revenue adjustment included in the twelve months ending December 31, 2025, or $6,513 ($13,025 x 0.50) has been carried forward to Exhibit No. FII-2, page 3. The remainder of the annualized revenue adjustment is reflected on Exhibit No. FII-2-12, which I will explain later.

Q. Explain Exhibit No. FII-2-4.

A. Exhibit No. FII-2-4 projects operating revenues under existing rates for estimated metered commercial repumped customers connected and disconnected during the twelve months ending December 31, 2025. The projected net gain in number of metered commercial repumped customers during the twelve months ending December 31, 2025, is 12. This projection is based on the average net gain in metered commercial repumped customers for the two years ended December 31, 2024, exclusive of metered commercial repumped customers gained during that period through the Conewago Industrial Park and Houston Run acquisitions. The Conewago Industrial Park acquisition, which occurred on October 12, 2023 and the Houston Run acquisition, which occurred on September 26, 2024, resulted in the unusual, immediate addition of a number of customers and are not representative of normal customer growth. Therefore, in estimating projected growth in customers based upon recent experience, it is proper to exclude customers added as a result of these acquisitions. I note that the annualization of revenues for these acquisitions is reflected in Exhibit No. FII-2-14. The projected net gain of metered commercial customers during the twelve months ending December 31, 2025, of 12 is multiplied by the annual average revenue per average metered commercial repumped customer during the historic test year ended December 31, 2024 of $4,487.60 to derive the annualized revenue adjustment of $53,851 (12 x $4,487.60).

In order to present projected future test year metered sales to commercial customers, it is necessary to determine the portion of the annualized revenue adjustment in the amount of $53,851 that will occur during the twelve months ending December 31, 2025. The

projected net gain of metered commercial repumped customers for the twelve months ending December 31, 2025, is presumed to occur evenly throughout the future test year.

Accordingly, one-half (0.50) of the annualized revenue adjustment determined in this Exhibit is projected to occur during the twelve months ending December 31, 2025. The portion of the annualized revenue adjustment included in the twelve months ending December 31, 2025, or $26,926 ($53,851 x 0.50) has been carried forward to Exhibit No.FII-2, page 3. The remainder of the annualized revenue adjustment is reflected on Exhibit No. FII-2-13, which I will explain later.

Q. Explain Exhibit No. FII-2-5.

A. Exhibit No. FII-2-5 projects private fire protection revenues under existing rates based on the projected number of private fire hydrants and standby private fire service connections placed in service during the future test year ending December 31, 2025. The projected net gain in the number of private fire hydrants and standby private fire service connections is multiplied by the present annual rate for private fire hydrants and standby private fire service connections as approved by the Commission effective March 1, 2023, to derive the annualized private fire protection revenue adjustment in the amount of $87,052. The projected net gain in the number of private fire hydrants and standby private fire service connections is based on the average gain in private fire hydrants and standby private fire service connections for the two years ended December 31, 2024.

In order to present projected future test year private fire protection revenues, it is necessary to determine the portion of the annualized revenue adjustment in the amount of

$87,052 that will occur during the twelve months ending December 31, 2025. The projected net gain of private fire hydrants and standby private fire service connections for the twelve months ending December 31, 2025, is presumed to occur evenly throughout the future test year.

Accordingly, one half (0.50) of the annualized revenue adjustment determined in this Exhibit is projected to occur during the twelve months ending December 31, 2025. The portion of the annualized revenue adjustment included in the twelve months ending December 31, 2025, or $43,526 ($87,052 x 0.50) has been carried forward to Exhibit No. FII-2, page 3. The remainder of the annualized revenue adjustment is reflected on Exhibit No. FII-2-15, which I will explain later.

Q. Explain Exhibit No. FII-2-6.

A. Exhibit No. FII-2-6 projects public fire protection revenues under existing rates based on the projected number of public fire hydrants placed in service during the future test year ending December 31, 2025. The projected net gain in the number of public fire hydrants is multiplied by the present annual rate for public fire hydrants as approved by the Commission effective March 1, 2023, to derive the annualized public fire protection revenue adjustment in the amount of $35,716. The projected net gain in the number of public fire hydrants is based on the average net gain in public fire hydrants for the two years ended December 31, 2024.

In order to present projected future test year public fire protection revenues, it is necessary to determine the portion of the annualized revenue adjustment in the amount of

$35,716 that will occur during the twelve months ending December 31, 2025. The projected net gain of public fire hydrants for the twelve months ending December 31, 2025, is presumed to occur evenly throughout the future test year.

Accordingly, one half (0.50) of the annualized revenue adjustment determined in this Exhibit is projected to occur during the twelve months ending December 31, 2025. The portion of the annualized revenue adjustment included in the twelve months ending December 31, 2025, or $17,858 ($35,716 x 0.50) has been carried forward to Exhibit No. FII-2, page 3. The remainder of the annualized revenue adjustment is reflected on Exhibit No. FII-2-17, which I will explain later.

Q. Explain Exhibit No. FII-2-7.

A. Exhibit No. FII-2-7 projects lease payments received for communication equipment installed on the Company's standpipes in accordance with the non-exclusive license agreements between the Company and non-affiliated cellular telephone companies. Projected rent from water property for the twelve months ending December 31, 2025, of $445,516 reflects actual lease payments to be received during the twelve months ending December 31, 2025. The adjustment of $14,929 is determined by subtracting the pro forma lease payments for the installation of communication equipment for the twelve months ended December 31, 2024, in the amount of $430,587 (Refer to Exhibit No. HII-2-12) from the projected lease payments to be received and recorded as rental income during the twelve months ending December 31, 2025, of $445,516 ($445,516 - $430,587 = $14,929). The revenue adjustment in the amount of $14,929 has been carried forward to Exhibit No. FII-2, page 3.

Q. Explain Exhibit No. FII-2-8.

A. Exhibit No. FII-2-8 projects customers' late payment charges based on projected sales of water under existing rates and a two-year average ratio of customers' late payment charges to total sales of water. Projected sales of water under existing rates (Refer to Exhibit No. FII-2) of $66,568,868 are multiplied by the two-year average ratio of customers' late payment charges to total sales of water of 0.23% to determine the projected customers' late payment charges under existing rates of $150,553 ($66,568,868 x 0.23%).

The adjustment to customers' accounts in the amount of $35 is determined by subtracting pro forma customers' late payment charges under existing rates for twelve months ended December 31, 2024, of $150,518 (Refer to Exhibit No. HII-2-15) from projected customers' late payment charges under existing rates for twelve months ending December 31, 2025, of $150,553 ($150,553 - $150,518 = $35). The adjustment to customers' late payment charges of $35 has been carried forward to Exhibit No. FII-2, page 3 as an adjustment to Account No. 47100500.

Q. Explain Exhibit No. FII-2-9.

A. Exhibit No. FII-2-9 projects a decline in residential revenues based on a three year average decline in consumption by residential customers. The Company has noticed per customer consumption declines over the last several years, due to conservation by customers, including water conservation devices on appliances and faucets in newer homes. As a result, the Company has seen increased revenues from acquisitions and

adding new customers largely offset by reduced consumption. It is appropriate to consider this trend in future rates.

I begin the calculation by determining the pro forma residential gravity consumption for the twelve months ended December 31, 2024, of 10,938,222 (hundred gallons). Pro forma consumption is the sum of the actual historic test year residential gravity consumption found on Exhibit No. HII-4 page 2, of 10,899,034 (hundred gallons) and the consumption for the 149 residential gravity customers added on Exhibit No. HII-2-4, that was not already included in the historic test year of 39,188 (hundred gallons).

In order to calculate the consumption of the customers added, it is necessary to determine average monthly consumption per customer. I first calculate an average monthly bill based on Exhibit No. HII-2-4 of $46.32 ($555.80/12), back out the fixed customer charge of $17.25 to arrive at the charge related to consumption of $29.07. Dividing the $29.07 by the residential gravity consumption charge approved at Docket No. R-2022-3031340 of $6.631 per thousand gallons, I arrive at the average monthly consumption per customer of 4,383 gallons.

Customers are assumed to be added evenly over the historic test year, so I take half of the year's bills for the 149 customers of 894 (149 x 6), and multiply by the average monthly consumption per customer of 4,383 to arrive at 3,918,800 gallons used by customers added during the historic test year, that was not included in historic test year revenues. I then convert the 3,918,800 gallons to hundred gallons (3,918,800/100=39,188) to arrive at consumption to be added to arrive at pro forma residential gravity consumption.

The pro forma residential gravity consumption of 10,938,222 (hundred gallons) is then multiplied by the three-year average decline in residential consumption plus a factor to account for the expected decline in residential gravity consumption due to the May 2025 increase in City of York consumption based wastewater rates from Pennsylvania American Water Company of 1.59% to arrive at reduced consumption in hundreds of gallons of 173,918 (10,938,222 x 0.0159). The reduced consumption is multiplied by the residential gravity consumption charge, approved at Docket No. R-2022-3031340, of $6.631 per thousand, to arrive at the adjustment to residential gravity revenues of $(115,325) [173,918 x $0.6631].

The second part of the adjustment is calculated by first determining the pro forma residential repumped consumption for the twelve months ended December 31, 2024, of 19,773,573 (hundred gallons). Pro forma consumption is the sum of the actual historic test year residential repumped consumption found on Exhibit No. HII-4 page 2, of 19,550,140 (hundred gallons) and the consumption for the 1,014 residential repumped customers added on Exhibit No. HII-2-5, that was not already included in the historic test year of 223,433 (hundred gallons).

In order to calculate the consumption of the customers added, it is necessary to determine average monthly consumption per customer. I first calculate an average monthly bill based on Exhibit No. HII-2-5 of $54.75 ($656.95/12), back out the fixed customer charge of $17.25 to arrive at the charge related to consumption of $37.50. Dividing the $37.50 by the residential repumped consumption charge approved at Docket No. R-2022-

3031340 of $10.210 per thousand gallons, I arrive at the average monthly consumption per customer of 3,672 gallons.

Customers are assumed to be added evenly over the historic test year, so I take half of the year's bills for the 1,014 customers of 6,084 (1,014 x 6), and multiply by the average monthly consumption per customer of 3,672 to arrive at 22,343,300 gallons used by customers added during the historic test year, that was not included in historic test year revenues. I then convert the 22,343,300 gallons to hundred gallons (22,343,300/100=223,433) to arrive at consumption to be added to arrive at pro forma residential repumped consumption.

The pro forma residential repumped consumption of 19,773,573 (hundred gallons) is then multiplied by the three-year average decline in residential consumption of 1.12% to arrive at reduced consumption in hundreds of gallons of 221,464 (19,773,573 x 0.0112). The reduced consumption is multiplied by the residential repumped consumption charge, approved at Docket No. R-2022-3031340 of $10.210 per thousand, to arrive at the adjustment to residential repumped revenues of $(226,115) [221,464 x $1.0210).

The combined revenue adjustment in the amount of $(341,440) [$(115,325)+$(226,115)] has been carried forward to Exhibit No. FII-2, page 3.

Q. Explain Exhibit No. FII-2-10.

A. Exhibit No. FII-2-10 annualizes operating revenues for estimated metered residential gravity customers connected and disconnected during the twelve months ending

December 31, 2025. As explained previously, the Company projects a net gain of 126 in the number of metered residential gravity customers during the twelve months ending December 31, 2025. The projected net gain of metered residential gravity customers during the twelve months ending December 31, 2025, of 126 is multiplied by the annual average revenue per average metered residential gravity customer during the historic test year ended December 31, 2024, which has been reduced due to a projected decline in usage that I have previously explained, of $550.25 to derive the annualized revenue adjustment of $69,332 (126 x $550.25).

As explained previously with respect to Exhibit No. FII-2-1, I have already reflected in projected future test year revenues that portion of the increased revenues from these 126 customers that are projected to be gained during the future test year ending December 31, 2025. That projected amount is $34,666, or one half of the annualized revenue adjustment of $69,332. The remaining half of the annualized revenue adjustment is reflected on Exhibit No. FII-2-10 as an annualization adjustment to the future test year projection. The remaining half of the annualized revenue adjustment of $34,666 has been carried forward to Exhibit No. FII-2, page 5.

Q. Explain Exhibit No. FII-2-11.

A. Exhibit No. FII-2-11 annualizes operating revenues for estimated metered residential repumped customers connected and disconnected during the twelve months ending December 31, 2025. As explained previously, the Company projects a net gain of 698 in the number of metered residential repumped customers during the twelve months ending December 31, 2025. The projected net gain of metered residential repumped customers

during the twelve months ending December 31, 2025, of 698 is multiplied by the annual average revenue per average metered residential repumped customer during the historic test year ended December 31, 2024, which has been reduced due to a projected decline in usage that I have previously explained, of $651.91 to derive the annualized revenue adjustment of $455,034 (698 x $651.91).

As explained previously with respect to Exhibit No. FII-2-2, I have already reflected in projected future test year revenues that portion of the additional revenues from these 698 customers that are projected to be received during the future test year ending December 31, 2025. That projected amount is $227,517, or one half of the annualized revenue adjustment of $455,034. The remaining half of the annualized revenue adjustment is reflected on Exhibit No. FII-2-11 as an annualization adjustment to the future test year projection. The remaining half of the annualized revenue adjustment of $227,517 has been carried forward to Exhibit No. FII-2, page 5.

Q. Explain Exhibit No. FII-2-12.

A. Exhibit No. FII-2-12 annualizes operating revenues for estimated metered commercial gravity customers connected and disconnected during the twelve months ending December 31, 2025. As explained previously, the Company projects a net gain of 7 in the number of metered commercial gravity customers during the twelve months ending December 31, 2025. The projected net gain of metered commercial gravity customers during the twelve months ending December 31, 2025, of 7 is multiplied by the annual average revenue per average metered commercial gravity customer during the historic test

year ended December 31, 2025 of $1,860.77 to derive the annualized revenue adjustment of $13,025 (7 x $1,860.77).

As explained previously with respect to Exhibit No. FII-2-3, I have already reflected in projected future test year revenues that portion of the reduced revenues from these 7 customers that are projected to be gained during the future test year ending December 31, 2025. That projected amount is $6,513, or one half of the annualized revenue adjustment of $13,025. The remaining half of the annualized revenue adjustment is reflected on Exhibit No. FII-2-12 as an annualization adjustment to the future test year projection. The remaining half of the annualized revenue adjustment of $6,513 has been carried forward to Exhibit No. FII-2, page 5.

Q. Explain Exhibit No. FII-2-13.

A. Exhibit No. FII-2-13 annualizes operating revenues for estimated metered commercial repumped customers connected and disconnected during the twelve months ending December 31, 2025. As explained previously, the Company projects a net gain of 12 in the number of metered commercial repumped customers during the twelve months ending December 31, 2025. The projected net gain of metered commercial repumped customers during the twelve months ending December 31, 2025, of 12 is multiplied by the annual average revenue per average metered commercial repumped customer during the historic test year ended December 31, 2024 of $4,487.60 to derive the annualized revenue adjustment of $53,851 (12 x $4,487.60).

As explained previously with respect to Exhibit No. FII-2-4, I have already reflected in projected future test year revenues that portion of the additional revenues from these 12 customers that are projected to be lost during the future test year ending December 31, 2025. That projected amount is $26,926, or one half of the annualized revenue adjustment of $53,851. The remaining half of the annualized revenue adjustment is reflected on Exhibit No. FII-2-13 as an annualization adjustment to the future test year projection. The remaining half of the annualized revenue adjustment of $26,926 has been carried forward to Exhibit No. FII-2, page 5.

Q. Explain Exhibit No. FII-2-14.

Exhibit No FII-2-14 annualizes commercial and industrial revenues for customers in service as of December 31, 2024 for West Donegal Township and Salisbury Township in Lancaster County, Pennsylvania. When the Company acquired the water system of Conewago Industrial Park in West Donegal Township and Houston Run Community, the Company adopted the rates as they existed before acquisition. As part of this base rate case filing, the Company is proposing to bill these acquired customers at its repumped rates. Column 2 is the total number of bills for these customers in service as of December 31, 2024. Column 3 is the total annual consumption for these customers in service as of December 31, 2024. These bills totals and consumption are multiplied by the residential repumped consumption charge, approved at Docket No. R-2022-3031340.

The adjustment to repumped commercial revenue for West Donegal Township commercial customers of $(5,559) is determined by subtracting test year repumped commercial revenue of $124,525 from calculated repumped commercial revenue of

$118,966 [$118,966 - $124,525 = $(5,559)]. The adjustment to repumped commercial revenue of $(5,559) has been carried forward to Exhibit No. FII-2, page 5.

The adjustment to repumped commercial revenue for Salisbury Township commercial customers of $29,444 is determined by subtracting test year repumped commercial revenue of $6,179 from calculated repumped commercial revenue of $35,622 [$35,622 - $6,179 = $29,444]. The adjustment to repumped commercial revenue of $29,444 has been carried forward to Exhibit No. FII-2, page 5.

The adjustment to repumped industrial revenue for West Donegal Township commercial industrial customers of $982 is determined by subtracting test year repumped commercial revenue of $2,290 from calculated repumped commercial revenue of $3,272 [$3,272 - $2,290 = $982]. The adjustment to repumped industrial revenue of $982 has been carried forward to Exhibit No. FII-2, page 5.

Q. Explain Exhibit No. FII-2-15.

A. Exhibit No. FII-2-15 annualizes private fire protection revenues under existing rates based on the estimated number of private fire hydrants and standby private fire service connections placed in service during the future test year ending December 31, 2025. The projected net gain in the number of private fire hydrants and standby private fire service connections is multiplied by the present annual rate for private fire hydrants and standby private fire service connections as approved by the Commission effective March 1, 2023, to derive the annualized private fire protection revenue adjustment in the amount of $87,052.

As explained previously with respect to Exhibit No. FII-2-5, I have already reflected in projected future test year revenues that portion of the additional revenues from these connections that are projected to be received during the future test year ending December 31, 2025. That projected amount is $43,526, or one half of the annualized revenue adjustment of $87,052. The remaining half of the annualized revenue adjustment in the amount of $43,526 is reflected on Exhibit No. FII-2-15 as an annualization adjustment to the future test year projection. The remaining half of the annualization adjustment in the amount of $43,526 has been carried forward to Exhibit No. FII-2, page 5.

Q. Explain Exhibit No. FII-2-16.

A. Exhibit No FII-2-16 annualizes private fire protection revenues for customers in service as of December 31, 2024 for West Donegal Township and Salisbury Township in Lancaster County, Pennsylvania. When the Company acquired the water system of Conewago Industrial Park in West Donegal Township and Houston Run Community, the Company adopted the rates as they existed before acquisition. As part of this base rate case filing, the Company is proposing to bill these acquired customers at its private fire protection rates. The number of private fire hydrants and standby private fire service connections placed in service as of December 31, 2024 are multiplied by the repump fire protection rates approved at Docket No. R-2022-3031340.

The adjustment to repumped fire protection revenue for West Donegal Township and Salisbury Township fire protection customers of $49,472 is determined by subtracting test year repumped fire protection revenue of $49,000 from calculated repumped

commercial fire protection of $98,472 ($98,472 - $49,000 = $49,472). The adjustment to repumped fire protection commercial revenue of $49,472 has been carried forward to Exhibit No. FII-2, page 5.

Q. Explain Exhibit No. FII-2-17.

A. Exhibit No. FII-2-17 annualizes public fire protection revenues under existing rates based on the estimated number of public fire hydrants placed in service during the future test year ending December 31, 2025. The projected net gain in the number of public fire hydrants is multiplied by the present annual rate for public fire hydrants as approved by the Commission effective March 1, 2023, to derive the annualized public fire protection revenue adjustment in the amount of $35,716.

As explained previously with respect to Exhibit No. FII-2-6, I have already reflected in projected future test year revenues that portion of the additional revenues from these connections that are projected to be received during the future test year ending December 31, 2025. That projected amount is $17,858, or one half of the annualized revenue adjustment of $35,716. The remaining half of the annualized revenue adjustment in the amount of $17,858 is reflected on Exhibit No. FII-2-17 as an annualization adjustment to the future test year projection. The remaining half of the annualized revenue adjustment in the amount of $17,858 has been carried forward to Exhibit No. FII-2, page 5.

Q. Explain Exhibit No. FII-2-18.

A. Exhibit No. FII-2-18 annualizes lease payments received for communication equipment installed on the Company's standpipes in accordance with the non-exclusive license

agreement between the Company and cellular telephone companies. Rent from water property for the twelve months ending December 31, 2025, reflects annualized lease payments from the license agreements of $450,065. The adjustment of $4,549 is determined by subtracting the lease payments to be received and recorded as rental income during the twelve months ending December 31, 2025, of $445,516 from the annual lease payments for the installation of communication equipment in the amount of $450,065 ($450,065 - $445,516 = $4,549). This amount of $4,549 has been carried forward to Exhibit No. FII-2, page 5.

Q. Explain Exhibit No. FII-2-19.

A. Exhibit No. FII-2-19 annualizes customers' late payment charges based on pro forma sales of water under existing rates and a two-year average ratio of customers' late payment charges to total sales of water. Pro forma sales of water under existing rates (Refer to Exhibit No. FII-2) of $67,000,211 are multiplied by the two-year average ratio of customers' late payment charges to total sales of water of 0.23% to determine the pro forma customers' late payment charges under existing rates of $151,528 ($67,000,211 x 0.23%).

The adjustment to customers' late payment charges in the amount of $976 is determined by subtracting projected customers' late payment charges under existing rates for twelve months ending December 31, 2025, of $150,553 (Refer to Exhibit No. FII-2-8) from pro forma customers' late payment charges under existing rates for twelve months ending December 31, 2025, of $151,528 ($151,528 - $150,553 = $976). The adjustment to

customers' late payment charges of $976 has been carried forward to Exhibit No. FII-2, page 5 as an adjustment to Account No. 47100500.

Q. Explain Exhibit No. FII-2-20.

A. Exhibit No. FII-2-20 projects operating revenues for the estimated metered residential gravity and repumped customers connected and disconnected during January and February 2026. Although these customers are projected to be added prior to the fully projected future test year, the revenues from these customers will be included in the revenues earned for the twelve months ending February 28, 2027, so it is appropriate to include these revenues.

As was the case for the twelve months ending December 31, 2022, the Company projects a net gain of 126 in the number of metered residential gravity customers during the twelve months ending December 31, 2026. The projected net gain of metered residential gravity customers during the twelve months ending December 31, 2026 of 126 is divided by twelve and multiplied by two to yield the number of customers expected to be gained during the two-month period ending February 28, 2026, which is 21 (126 / 12 x 2). Next, the number of customers gained during the two-month period is multiplied by the annual average revenue per average metered residential gravity customer during the future test year ended December 31, 2025, of $546.41 to derive the annualized revenue adjustment for residential gravity customers of $11,475 (21 x $546.41).

Next, the same process is followed for residential repumped customers. The Company projects a net gain of 698 in the number of metered residential repumped customers

during the twelve months ending December 31, 2026. The projected net gain of metered residential repumped customers during the twelve months ending December 31, 2026, is divided by twelve and multiplied by two to yield the number of customers expected to be gained during the two-month period ending February 28, 2026, which is 116 (698 / 12 x 2). Next, the number of customers gained during the two-month period is multiplied by the annual average revenue per average metered residential repumped customer during the future test year ended December 31, 2025, of $646.93 to derive the annualized revenue adjustment for residential repumped customers of $75,259 (116 x $646.93).

The total adjustment for the estimated residential gravity and repumped customers to be added during January and February 2026, of $86,734 ($11,475 + $75,259) has been carried forward to Exhibit No. FII-2, page 7.

Q. Explain Exhibit No. FII-2-21.

A. Exhibit No. FII-2-21 projects operating revenues for the estimated metered commercial gravity and repumped customers connected and disconnected during January and February 2026. Although these customers are projected to be added prior to the fully projected future test year, the revenues from these customers will be included in the revenues earned for the twelve months ending February 28, 2027, so it is appropriate to include these revenues.

As was the case for the twelve months ending December 31, 2025, the Company projects a net gain of 7 in the number of metered commercial gravity customers during the twelve months ending December 31, 2025. The projected net gain of metered commercial

gravity customers during the twelve months ending December 31, 2025, of 7 is divided by twelve and multiplied by two to yield the number of customers expected to be gained during the two-month period ending February 28, 2026, which is 1 (7 / 12 x 2). Next, the number of customers gained during the two-month period is multiplied by the annual average revenue per average metered commercial gravity customer during the future test year ended December 31, 2025, of $1,860.77 to derive the annualized revenue adjustment for commercial gravity customers of $2,171 (1 x $1,860.77).

Next, the same process is followed for commercial repumped customers. The Company projects a net gain of 12 in the number of metered commercial repumped customers during the twelve months ending December 31, 2026. The projected net gain of metered commercial repumped customers during the twelve months ending December 31, 2026 is divided by twelve and multiplied by two to yield the number of customers expected to be gained during the two-month period ending February 28, 2026, which is 2 (12 / 12 x 2). Next, the number of customers gained during the two-month period is multiplied by the annual average revenue per average metered commercial repumped customer during the future test year ended December 31, 2025, of $4,487.60 to derive the annualized revenue adjustment for commercial repumped customers of $8,975 (2 x $4,487.60).

The total adjustment for the estimated commercial gravity and repumped customers to be added during January and February 2026, of $11,146 ($2,171 + $8,975) has been carried forward to Exhibit No. FII-2, page 7.

Q. Explain Exhibit No. FII-2-22.

A. Exhibit No. FII-2-22 projects private fire protection revenues under existing rates based on the projected number of private fire hydrants and standby private fire service connections placed in service during the two-month period ending February 28, 2026. Although these hydrants and connections are projected to be added prior to the fully projected future test year, the revenues from these customers will be included in the revenues earned for the twelve months ending February 28, 2027, so it is appropriate to include these customers.

The projected net gain in the number of private fire hydrants and standby private fire service connections is divided by twelve and multiplied by two to get the prorated gain in customers for the two-month period ending February 28, 2026, for each service type. The prorated gain in customers is multiplied by the present annual rate for private fire hydrants and standby private fire service connections as approved by the Commission effective March 1, 2023, to derive the annualized private fire protection revenue adjustment in the amount of $14,509.

The adjustment for private fire protection hydrants and connections projected to be added during the two months ending February 28, 2026 of $14,509 has been carried forward to Exhibit No. FII-2, page 7.

Q. Explain Exhibit No. FII-2-23.

A. Exhibit No. FII-2-23 projects public fire protection revenues for hydrant customers projected to be added during the two months ending February 28, 2026. Although these hydrants are projected to be added prior to the fully projected future test year, the

revenues from these customers will be included in the revenues earned for the twelve months ending February 28, 2027, so it is appropriate to include these customers.

The projected net gain in the number of public fire hydrants is divided by twelve and multiplied by two to get the prorated gain in hydrants for the two-month period ending February 28, 2026. The prorated gain in customers is multiplied by the present annual rate for public fire hydrants as approved by the Commission effective March 1, 2023, to derive the annualized public fire protection revenue adjustment in the amount of $5,953.

The adjustment for public fire protection hydrants projected to be added during the two months ending February 28, 2026 of $5,953 has been carried forward to Exhibit No. FII-2, page 7.

Q. Explain Exhibit No. FII-2-24.

A. Exhibit No. FII-2-24 projects operating revenues under existing rates for estimated metered residential gravity customers connected and disconnected during the twelve months ending February 28, 2027. The projected net gain in number of metered residential gravity customers during the twelve months ending February 28, 2027, is 126. This projection is based on the average net gain in metered residential gravity customers for the two years ended December 31, 2024. The projected net gain of metered residential gravity customers during the twelve months ending February 28, 2027, of 126 is multiplied by the annual average revenue per average metered residential gravity customer of $545.78 to derive the annualized revenue adjustment of $68,768 (126 x $545.78).

In order to present the fully projected future test year metered sales to residential customers, it is necessary to determine the portion of the annualized revenue adjustment in the amount of $68,768 that will occur during the twelve months ending February 28, 2027. The projected net gain of metered residential gravity customers for the twelve months ending February 28, 2027, is presumed to occur evenly throughout the fully projected future test year.

Accordingly, one half (0.50) of the annualized revenue adjustment determined in this Exhibit is projected to occur during the twelve months ending February 28, 2027. The portion of the annualized revenue adjustment included in the twelve months ending February 28, 2027, or $34,384 ($68,768 x 0.50) has been carried forward to Exhibit No. FII-2, page 7. The remainder of the annualized revenue adjustment is reflected on Exhibit No. FII-2-34, which I will explain later.

Q. Explain Exhibit No. FII-2-25.

A. Exhibit No. FII-2-25 projects operating revenues under existing rates for estimated metered residential repumped customers connected and disconnected during the twelve months ending February 28, 2027. The projected net gain in number of metered residential repumped customers during the twelve months ending February 28, 2027, is 698. This projection is based on the average net gain in metered residential repumped customers for the two years ended December 31, 2024, exclusive of metered residential repumped customers gained during that period through the Longstown, Brookhaven, and Pine Run acquisitions. The Longstown acquisition, which occurred on February 21,

2024, the Brookhaven acquisition, which occurred on December 12, 2024, and the Pine Run acquisition, which occurred on December 12, 2024, resulted in the unusual, immediate addition of a number of customers and are not representative of normal customer growth. Therefore, in estimating projected growth in customers based upon recent experience, it is proper to exclude customers added as a result of these acquisitions. The projected net gain of metered residential repumped customers during the twelve months ending February 28, 2027, of 698 is multiplied by the annual average revenue per average metered residential repumped customer of $646.11 to derive the annualized revenue adjustment of $450,982 (698 x $646.11).

In order to present fully projected future test year metered sales to residential customers, it is necessary to determine the portion of the annualized revenue adjustment in the amount of $450,982 that will occur during the twelve months ending February 28, 2027. The projected net gain of metered residential repumped customers for the twelve months ending February 28, 2027, is presumed to occur evenly throughout the fully projected future test year.

Accordingly, one half (0.50) of the annualized revenue adjustment determined in this Exhibit is projected to occur during the twelve months ending February 28, 2027. The portion of the annualized revenue adjustment included in the twelve months ending February 28, 2027, or $225,491 ($450,982 x 0.50) has been carried forward to Exhibit No. FII-2, page 7. The remainder of the annualized revenue adjustment is reflected on Exhibit No. FII-2-35, which I will explain later.

Q. Explain Exhibit No. FII-2-26.

A. Exhibit No. FII-2-26 projects operating revenues under existing rates for estimated metered commercial gravity customers connected and disconnected during the twelve months ending February 28, 2027. The projected net gain in number of metered commercial gravity customers during the twelve months ending February 28, 2027, is 7. This projection is based on the average net gain in metered commercial gravity customers for the two years ended December 31, 2024. The projected net gain of metered commercial gravity customers during the twelve months ending February 28, 2027, of 7 is multiplied by the annual average revenue per average metered commercial gravity customer of $1,860.77 to derive the annualized revenue adjustment of $13,025 (7 x $1,860.77).

In order to present fully projected future test year metered sales to commercial customers, it is necessary to determine the portion of the annualized revenue adjustment in the amount of $13,025 that will occur during the twelve months ending February 28, 2027. The projected net gain of metered commercial gravity customers for the twelve months ending February 28, 2027, is presumed to occur evenly throughout the fully projected future test year.

Accordingly, one-half (0.50) of the annualized revenue adjustment determined in this Exhibit is projected to occur during the twelve months ending February 28, 2027. The portion of the annualized revenue adjustment included in the twelve months ending February 28, 2027, or $6,513 ($13,025 x 0.50) has been carried forward to Exhibit No.

FII-2, page 7. The remainder of the annualized revenue adjustment is reflected on Exhibit No. FII-2-36, which I will explain later.

Q. Explain Exhibit No. FII-2-27.

A. Exhibit No. FII-2-27 projects operating revenues under existing rates for estimated metered commercial repumped customers connected and disconnected during the twelve months ending February 28, 2027. The projected net gain in number of metered commercial repumped customers during the twelve months ending February 28, 2027, is 12. This projection is based on the average net loss in metered commercial repumped customers for the two years ended December 31, 2024, exclusive of metered commercial repumped customers gained during that period through the Conewago Industrial Park and Houston Run acquisitions. The Conewago Industrial Park acquisition, which occurred on October 12, 2023 and the Houston Run acquisition, which occurred on September 26, 2024, resulted in the unusual, immediate addition of a number of customers and are not representative of normal customer growth. Therefore, in estimating projected growth in customers based upon recent experience, it is proper to exclude customers added as a result of these acquisitions. The projected net gain of metered commercial customers during the twelve months ending February 28, 2027, of 12 is multiplied by the annual average revenue per average metered commercial repumped customer of $4,487.60 to derive the annualized revenue adjustment of $53,851 (12 x $4,487.60).

In order to present fully projected future test year metered sales to commercial customers, it is necessary to determine the portion of the annualized revenue adjustment in the amount of $53,851 that will occur during the twelve months ending February 28, 2027.

The projected net gain of metered commercial repumped customers for the twelve months ending February 28, 2027, is presumed to occur evenly throughout the fully projected future test year.

Accordingly, one-half (0.50) of the annualized revenue adjustment determined in this Exhibit is projected to occur during the twelve months ending February 28, 2027. The portion of the annualized revenue adjustment included in the twelve months ending February 28, 2027, or $26,926 ($53,851 x 0.50) has been carried forward to Exhibit No.FII-2, page 7. The remainder of the annualized revenue adjustment is reflected on Exhibit No. FII-2-37, which I will explain later.

Q. Explain Exhibit No. FII-2-28.

A. Exhibit No. FII-2-28 projects private fire protection revenues under existing rates based on the projected number of private fire hydrants and standby private fire service connections placed in service during the fully projected future test year ending February 28, 2027. The projected net gain in the number of private fire hydrants and standby private fire service connections is multiplied by the present annual rate for private fire hydrants and standby private fire service connections as approved by the Commission effective March 1, 2023, to derive the annualized private fire protection revenue adjustment in the amount of $87,052. The projected net gain in the number of private fire hydrants and standby private fire service connections is based on the average gain in private fire hydrants and standby private fire service connections for the two years ended December 31, 2024.

In order to present fully projected future test year private fire protection revenues, it is necessary to determine the portion of the annualized revenue adjustment in the amount of $87,052 that will occur during the twelve months ending February 28, 2027. The projected net gain of private fire hydrants and standby private fire service connections for the twelve months ending February 28, 2027, is presumed to occur evenly throughout the fully projected future test year.

Accordingly, one half (0.50) of the annualized revenue adjustment determined in this Exhibit is projected to occur during the twelve months ending February 28, 2027. The portion of the annualized revenue adjustment included in the twelve months ending February 28, 2027, or $43,526 ($87,052 x 0.50) has been carried forward to Exhibit No. FII-2, page 7. The remainder of the annualized revenue adjustment is reflected on Exhibit No. FII-2-38, which I will explain later.

Q. Explain Exhibit No. FII-2-29.

A. Exhibit No. FII-2-29 projects public fire protection revenues under existing rates based on the projected number of public fire hydrants placed in service during the fully projected future test year ending February 28, 2027. The projected net gain in the number of public fire hydrants is multiplied by the present annual rate for public fire hydrants as approved by the Commission effective March 1, 2023, to derive the annualized public fire protection revenue adjustment in the amount of $35,716. The projected net gain in the number of public fire hydrants is based on the average net gain in public fire hydrants for the two years ended December 31, 2024.

In order to present fully projected future test year public fire protection revenues, it is necessary to determine the portion of the annualized revenue adjustment in the amount of $35,716 that will occur during the twelve months ending February 28, 2027. The projected net gain of public fire hydrants for the twelve months ending February 28, 2027, is presumed to occur evenly throughout the fully projected future test year.

Accordingly, one half (0.50) of the annualized revenue adjustment determined in this Exhibit is projected to occur during the twelve months ending February 28, 2027. The portion of the annualized revenue adjustment included in the twelve months ending February 28, 2027, or $17,858 ($35,716 x 0.50) has been carried forward to Exhibit No. FII-2, page 7. The remainder of the annualized revenue adjustment is reflected on Exhibit No. FII-2-39, which I will explain later.

Q. Explain Exhibit No. FII-2-30.

A. Exhibit No. FII-2-30 projects lease payments received for communication equipment installed on the Company's standpipes in accordance with the non-exclusive license agreements between the Company and non-affiliated cellular telephone companies. Projected rent from water property for the twelve months ending February 28, 2027, of $452,868 reflects actual lease payments to be received during the twelve months ending February 28, 2027. The adjustment of $2,804 is determined by subtracting the pro forma lease payments for the installation of communication equipment for the twelve months ended December 31, 2025, in the amount of $450,065 (Refer to Exhibit No. FII-2-18) from the projected lease payments to be received and recorded as rental income during the twelve months ending February 28, 2027, of $452,868 ($452,868 - $450,065 =

$2,804). The revenue adjustment in the amount of $2,804 has been carried forward to Exhibit No. FII-2, page 7.

Q. Explain Exhibit No. FII-2-31.

A. Exhibit No. FII-2-31 projects customers' late payment charges based on projected sales of water under existing rates and a two-year average ratio of customers' late payment charges to total sales of water. Projected sales of water under existing rates (Refer to Exhibit No. FII-2) of $67,165,761 are multiplied by the two-year average ratio of customers' late payment charges to total sales of water of 0.23% to determine the projected customers' late payment charges under existing rates of $151,903 ($67,165,761 x 0.23%).

The adjustment to customers' accounts in the amount of $374 is determined by subtracting pro forma customers' late payment charges under existing rates for twelve months ended December 31, 2025, of $151,528 (Refer to Exhibit No. FII-2-19) from projected customers' late payment charges under existing rates for twelve months ending February 28, 2027, of $151,903 ($151,903 - $151,528 = $374). The adjustment to customers' late payment charges of $374 has been carried forward to Exhibit No. FII-2, page 7 as an adjustment to Account No. 47100500.

Q. Explain Exhibit No. FII-2-32.

A. Exhibit No. FII-2-32 projects a decline in residential revenues based on a three year average decline in consumption by residential customers. The Company has noticed per customer consumption declines over the last several years, due primarily to increased

conservation by customers including water conservation devices on appliances and faucets in newer homes. As a result, the Company has seen increased revenues from acquisitions and adding new customers largely offset by reduced consumption. It is appropriate to consider this trend in future rates.

I begin the calculation by determining the pro forma residential gravity consumption for the twelve months ending December 31, 2025, of 10,829,528 (hundred gallons). Pro forma consumption is the sum of the pro forma historic test year residential gravity consumption found on Exhibit No. FII-2-9, of 10,938,222 (hundred gallons), the projected reduction in consumption calculated on Exhibit No. FII-2-9 of (173,918) (hundred gallons) for the twelve months ending December 31, 2025, and the consumption for the 126 residential gravity customers projected to be added during the twelve months ending February 29, 2027, on Exhibit No. FII-2-24 of 65,224 (hundred gallons) [10,938,222 + (173,918) + 65,224 = 10,829,528].

The pro forma residential gravity consumption of 10,829,528 (hundred gallons) is then multiplied by the three-year average decline in residential consumption of 1.12% to arrive at reduced consumption in hundreds of gallons of 121,291 (10,829,528 x 0.0112). The reduced consumption is multiplied by the residential gravity consumption charge, approved at Docket No. R-2022-3031340, of $6.631 per thousand, to arrive at the adjustment to residential gravity revenues of $(80,428) [121,291 x $0.6631].

The second part of the adjustment is calculated by first determining the pro forma residential repumped consumption for the twelve months ended December 31, 2018, of

19,856,269 (hundred gallons). Pro forma consumption is the sum of the pro forma historic test year residential repumped consumption found on Exhibit No. FII-2-9, of 19,773,573 (hundred gallons), the projected reduction in consumption calculated on Exhibit No. FII-2-9 of (221,464) (hundred gallons) for the twelve months ending December 31, 2025, and the consumption for the 698 residential repumped customers projected to be added during the twelve months ending February 29, 2027, on Exhibit No. FII-2-25 of 229,763 (hundred gallons) [19,773,573 + (221,464) + 304,160 = 19,856,269].

The pro forma residential repumped consumption of 19,856,269 (hundred gallons) is then multiplied by the three-year average decline in residential consumption of 1.12% to arrive at reduced consumption in hundreds of gallons of 222,390 (19,856,269 x 0.0112). The reduced consumption is multiplied by the residential repumped consumption charge, approved at Docket No. R-2022-3031340, of $10.210 per thousand, to arrive at the adjustment to residential repumped revenues of $(227,060) [(222,390 x $1.0210].

The combined revenue adjustment in the amount of $(307,488) [$(80,428) + $(227,060)] has been carried forward to Exhibit No. FII-2, page 7.

Q. Explain Exhibit No. FII-2-34.

A. Exhibit No. FII-2-34 annualizes operating revenues for estimated metered residential gravity customers connected and disconnected during the twelve months ending February 28, 2027. As explained previously, the Company projects a net gain of 126 in the number

of metered residential gravity customers during the twelve months ending February 28, 2027. The projected net gain of metered residential gravity customers during the twelve months ending February 28, 2027, of 126 is multiplied by the annual average revenue per average metered residential gravity customer of $545.78 to derive the annualized revenue adjustment of $68,768 (126 x $545.78).

As explained previously with respect to Exhibit No. FII-2-24, I have already reflected in fully projected future test year revenues that portion of the increased revenues from these 126 customers that are projected to be gained during the fully projected future test year ending February 28, 2027. That projected amount is $34,384, or one half of the annualized revenue adjustment of $68,768. The remaining half of the annualized revenue adjustment is reflected on Exhibit No. FII-2-34 as an annualization adjustment to the fully projected future test year projection. The remaining half of the annualized revenue adjustment of $34,384 has been carried forward to Exhibit No. FII-2, page 8.

Q. Explain Exhibit No. FII-2-35.

A. Exhibit No. FII-2-35 annualizes operating revenues for estimated metered residential repumped customers connected and disconnected during the twelve months ending February 28, 2027. As explained previously, the Company projects a net gain of 698 in the number of metered residential repumped customers during the twelve months ending February 28, 2027. The projected net gain of metered residential repumped customers during the twelve months ending February 28, 2027, of 698 is multiplied by the annual average revenue per average metered residential repumped customer of $646.11 to derive the annualized revenue adjustment of $450,982 (698 x $646.11).

As explained previously with respect to Exhibit No. FII-2-25, I have already reflected in fully projected future test year revenues that portion of the additional revenues from these customers that are projected to be received during the fully projected future test year ending February 28, 2027. That projected amount is $225,491, or one half of the annualized revenue adjustment of $450,982. The remaining half of the annualized revenue adjustment is reflected on Exhibit No. FII-2-35 as an annualization adjustment to the fully projected future test year projection. The remaining half of the annualized revenue adjustment of $225,491 has been carried forward to Exhibit No. FII-2, page 8.

Q. Explain Exhibit No. FII-2-36.

A. Exhibit No. FII-2-36 annualizes operating revenues for estimated metered commercial gravity customers connected and disconnected during the twelve months ending February 28, 2027. As explained previously, the Company projects a net gain of 7 in the number of metered commercial gravity customers during the twelve months ending February 28, 2027. The projected net gain of metered commercial gravity customers during the twelve months ending February 28, 2027, of 7 is multiplied by the annual average revenue per average metered commercial gravity customer of $1,860.77 to derive the annualized revenue adjustment of $13,025 (7 x $1,860.77).

As explained previously with respect to Exhibit No. FII-2-26, I have already reflected in fully projected future test year revenues that portion of the reduced revenues from these 7 customers that are projected to be gained during the fully projected future test year ending February 28, 2027. That projected amount is $6,513, or one half of the annualized

revenue adjustment of $13,025. The remaining half of the annualized revenue adjustment is reflected on Exhibit No. FII-2-36 as an annualization adjustment to the fully projected future test year projection. The remaining half of the annualized revenue adjustment of $6,513 has been carried forward to Exhibit No. FII-2, page 8.

Q. Explain Exhibit No. FII-2-37.

A. Exhibit No. FII-2-37 annualizes operating revenues for estimated metered commercial repumped customers connected and disconnected during the twelve months ending February 28, 2027. As explained previously, the Company projects a net gain of 12 in the number of metered commercial repumped customers during the twelve months ending February 28, 2027. The projected net gain of metered commercial repumped customers during the twelve months ending February 28, 2027, of 12 is multiplied by the annual average revenue per average metered commercial repumped customer of $4,487.60 to derive the annualized revenue adjustment of $53,851 (12 x $4,48760).

As explained previously with respect to Exhibit No. FII-2-27, I have already reflected in fully projected future test year revenues that portion of the additional revenues from these 12 customers that are projected to be gained during the fully projected future test year ending February 28, 2027. That projected amount is $26,926, or one half of the annualized revenue adjustment of $53,851. The remaining half of the annualized revenue adjustment is reflected on Exhibit No. FII-2-37 as an annualization adjustment to the fully projected future test year projection. The remaining half of the annualized revenue adjustment of $26,926 has been carried forward to Exhibit No. FII-2, page 8.

Q. Explain Exhibit No. FII-2-38.

A. Exhibit No. FII-2-38 annualizes private fire protection revenues under existing rates based on the estimated number of private fire hydrants and standby private fire service connections placed in service during the fully projected future test year ending February 28, 2027. The projected net gain in the number of private fire hydrants and standby private fire service connections is multiplied by the present annual rate for private fire hydrants and standby private fire service connections as approved by the Commission effective March 1, 2023, to derive the annualized private fire protection revenue adjustment in the amount of $87,052.

As explained previously with respect to Exhibit No. FII-2-28, I have already reflected in fully projected future test year revenues that portion of the additional revenues from these connections that are projected to be received during the fully projected future test year ending February 28, 2027. That projected amount is $43,526, or one half of the annualized revenue adjustment of $87,052. The remaining half of the annualized revenue adjustment in the amount of $43,526 is reflected on Exhibit No. FII-2-28 as an annualization adjustment to the fully projected future test year projection. The remaining half of the annualization adjustment in the amount of $43,526 has been carried forward to Exhibit No. FII-2, page 8.

Q. Explain Exhibit No. FII-2-39.

A. Exhibit No. FII-2-39 annualizes public fire protection revenues under existing rates based on the estimated number of public fire hydrants placed in service during the fully projected future test year ending February 28, 2027. The projected net gain in the number

of public fire hydrants is multiplied by the present annual rate for public fire hydrants as approved by the Commission effective March 1, 2023, to derive the annualized public fire protection revenue adjustment in the amount of $35,716.

As explained previously with respect to Exhibit No. FII-2-29, I have already reflected in fully projected future test year revenues that portion of the additional revenues from these connections that are projected to be received during the fully projected future test year ending February 28, 2027. That projected amount is $17,858, or one half of the annualized revenue adjustment of $35,716. The remaining half of the annualized revenue adjustment in the amount of $17,858 is reflected on Exhibit No. FII-2-39 as an annualization adjustment to the fully projected future test year projection. The remaining half of the annualized revenue adjustment in the amount of $17,858 has been carried forward to Exhibit No. FII-2, page 8.

Q. Explain Exhibit No. FII-2-40.

A. Exhibit No. FII-2-40 projects the annual impact on residential revenue from the creation of a pilot bill discount program as required in its Order at Docket No. R-2022-3031340 dated March 1, 2023. The Company proposes that the fixed customer charge of $17.25 approved at Docket No. R-2022-3031340 would not be billed to 200 low-income customers. The annual amount is $207 per customer ($17.25 x 12). The annualized amount of the pilot bill discount program is $(41,400) ($207 x 200). This amount of $(41,400) has been carried forward to Exhibit No. FII-2, page 8.

Q. Explain Exhibit No. FII-2-41.

A. Exhibit No. FII-2-41 annualizes lease payments received for communication equipment installed on the Company's standpipes in accordance with the non-exclusive license agreement between the Company and cellular telephone companies. These cellular telephone companies are not affiliated with the Company. Rent from water property for the twelve months ending February 28, 2027, reflects annualized lease payments from the license agreements of $456,968. The adjustment of $4,100 is determined by subtracting the lease payments to be received and recorded as rental income during the twelve months ending February 28, 2027, of $456,968 from the annual lease payments for the installation of communication equipment in the amount of $452,868 ($456,968 - $452,868 = $4,100). This amount of $4,100 has been carried forward to Exhibit No. FII-2, page 8.

Q. Explain Exhibit No. FII-2-42.

A. Exhibit No. FII-2-42 annualizes customers' late payment charges based on pro forma sales of water under existing rates and a two-year average ratio of customers' late payment charges to total sales of water. Pro forma sales of water under existing rates (Refer to Exhibit No. FII-2) of $67,479,058 are multiplied by the two-year average ratio of customers' late payment charges to total sales of water of 0.23% to determine the pro forma customers' late payment charges under existing rates of $152,611 ($67,479,058 x 0.23%).

The adjustment to customers' late payment charges in the amount of $709 is determined by subtracting projected customers' late payment charges under existing rates for twelve months ending February 28, 2027, of $151,903 (Refer to Exhibit No. FII-2-31) from pro

forma customers' late payment charges under existing rates for twelve months ending February 28, 2027, of $152,611 ($152,611 - $151,903 = $709). The adjustment to customers' late payment charges of $709 has been carried forward to Exhibit No. FII-2, page 8 as an adjustment to Account No. 47100500.

Q. Explain Exhibit No. FII-2-43.

A. Exhibit No. FII-2-43 adjusts customers' late payment charges based on pro forma sales of water under proposed rates and a two-year average ratio of customers' late payment charges to total sales of water. Pro forma sales of water under proposed rates of $87,745,202 are multiplied by the two-year average ratio of customers' late payment charges to total sales of water of 0.23% to determine the pro forma customers' late payment charges under proposed rates of $198,445 ($87,745,202 x 0.0023).

The adjustment to customers' late payment charges in the amount of $45,834 is determined by subtracting pro forma customers' late payment charges under existing rates of $152,611 (Refer to Exhibit No. FII-2-42) from pro forma customers' late payment charges under proposed rates of $198,445 ($198,445 - $152,611 = $45,834). The adjustment to customers' late payment charges of $22,876 has been carried forward to Exhibit No. FII-2, page 9, Column 6, as an adjustment to Account No. 47100500.

Q. Explain Exhibit No. FII-3.

A. Exhibit No. FII-3 provides a comparison of present and proposed base rates. The present base rates are those set forth in Supplement No. 151 to Water-Pa P.U.C. No. 14 approved by the Commission March 1, 2023. The proposed base rates are set forth in Supplement

No. 165 to Water-Pa. P.U.C. No. 14. A copy of the Company's proposed tariff supplement is attached to Exhibit No. FII-3.

Q. Explain Exhibit No. FII-4.

A. Exhibit No. FII-4 provides a detailed customer consumption analysis by customer classification and meter size. Pages 2 through 7 of Exhibit No. FII-4 provides the application of present metered base rates, which became effective March 1, 2023, to the pro forma customer consumption analysis for the twelve months ending February 28, 2027.

Q. Explain Exhibit No. FII-9.

A. Exhibit No. FII-9, page 2 provides the number of customers by class as of December 31, 2022, 2023, and 2024 and the projected number of customers by class as of December 31, 2025, and as of February 28, 2027, February 29, 2028, and February 28, 2029. Page 3 of Exhibit No. FII-9 provides consumption by customer class for the twelve months ended December 31, 2022, 2023, and 2024 and the projected consumption by customer class for the twelve months ending December 31, 2025, and as of February 28, 2027, February 29, 2028, and February 28, 2029.

Q. Explain Exhibit No. FII-11.

A. Exhibit No. FII-11 provides revenues from sales for resale to four municipalities for years ended December 31, 2022, 2023, and 2024. These revenues are for single-point customers covered by the Company's tariff provisions and are included as commercial customer sales on the Company's books.

Q. Explain Exhibit No. FII-12.

A. Exhibit No. FII-12 provides consumption and billings at current metered base rates and proposed metered base rates for the Company's ten largest customers for the twelve months ended December 31, 2024. Exhibit No. FII-12 also provides consumption and billing at metered base rates for the Company's ten largest customers for the twelve months ended December 31, 2023 and 2022.

Q. Explain Exhibit No. FII-13.

A. Exhibit No. FII-13 provides consumption and billings for the twelve months ended December 31, 2024, 2023, and 2022 for the one (1) sale for resale customer not included in Exhibit No. FII-12.

Q. Are you sponsoring any other exhibits relative to operating revenues?

A. Yes, I am also sponsoring Exhibit Nos. F (a)-2, F (a)-3, F (a)-4, F (a)-5, F (b)-4, F (b)-6, FII-5, FII-6, FII-7, FII-8, and FII-10.

Q. Explain Exhibit No. FIII-1.

A. Exhibit No. FIII-1 is a comparative statement of operating expenses per books for the twelve months ended December 31, 2024, and projected operating expenses, by account, for the twelve months ending December 31, 2025, and February 28, 2027.

Q. Explain Exhibit No. FIII-2.

A. The purpose of Exhibit No. FIII-2 is to summarize adjustments to operating expenses for the twelve months ending December 31, 2025, to annualize and normalize the effect of changes occurring during the twelve months ending December 31, 2025, to summarize adjustments to operating expenses for the twelve months ending February 28, 2027, to annualize and normalize the effect of changes occurring during the twelve months ending February 28, 2027, and to reflect changes in uncollectible accounts expenses due to the increase in operating revenues resulting from the proposed increase in rates.

Pro forma operating expenses for the twelve months ended December 31, 2024, in the amount of $28,205,929 are shown in Column 1 of Exhibit FIII-2, pages 2 through 8. Adjustments required to project operating expenses for the twelve months ending December 31, 2025, in the amount of $781,549 are shown in Column 3 of Exhibit FIII-2, pages 2 through 8, and are detailed in Exhibit Nos. FIII-2-1 through FIII-2-12. Projected operating expenses for the twelve months ending December 31, 2025, in the amount of $28,987,478 are shown in Column 4 of Exhibit FIII-2, pages 2 through 8.

Adjustments to operating expenses in the amount of $945,049 to annualize and normalize the effect of changes projected to occur during the twelve months ending December 31, 2025, are shown in Column 6 of Exhibit FIII-2, pages 2 through 8, and are detailed in Exhibit Nos. FIII-2-15 through FIII-2-22. Pro forma operating expenses for the twelve months ending December 31, 2025, in the amount of $29,932,527 are shown in Column 7 of Exhibit FIII-2, pages 2 through 8.

Pro forma operating expenses for the twelve months ending December 31, 2025, in the amount of $29,932,527 are shown in Column 1 of Exhibit FIII-2, pages 9 through 15. Adjustments required to project operating expenses for the twelve months ending February 28, 2027, in the amount of $1,222,191 are shown in Column 3 of Exhibit FIII-2, pages 9 through 15, and are detailed in Exhibit Nos. FIII-2-25 through FIII-2-37. Projected operating expenses for the twelve months ending February 28, 2027, in the amount of $31,154,718 are shown in Column 4 of Exhibit FIII-2, pages 9 through 15.

Projected operating expenses for the twelve months ending February 28, 2027, in the amount of $31,154,718 are shown in Column 1 of Exhibit FIII-2, pages 16 through 22. Adjustments to operating expenses in the amount of $678,044 to annualize and normalize the effect of changes projected to occur during the twelve months ending February 28, 2027, are shown in Column 3 of Exhibit FIII-2, pages 16 through 22, and are detailed in Exhibit Nos. FIII-2-40 through FIII-2-52. Pro forma operating expenses for the twelve months ending February 28, 2027, in the amount of $31,832,762 are shown in Column 4 of Exhibit FIII-2, pages 16 through 22.

Adjustments to operating expenses in the amount of $133,785 to reflect changes in uncollectible accounts expenses due to the increase in operating revenues resulting from the proposed increase in rates are shown in Column 6 of Exhibit FIII-2, pages 16 through 22, and are detailed in Exhibit FIII-2-55. Pro forma operating expenses for the twelve months ending February 28, 2027, in the amount of $31,966,547 are shown in Column 7 of Exhibit FIII-2, pages 16 through 22.

Q. Explain Exhibit FIII-2-1.

A. Exhibit FIII-2-1 is a projection of payroll expense for union and nonunion employees for the future test year ending December 31, 2025. It reflects projected hourly and salary rates effective in 2025, annual cash and equity incentive awards effective in 2025, and projected new employees. The Company included year-end bonuses in an amount of $55,143 in projected payroll expense. The Company has consistently provided year-end bonuses to employees for over 29 years as a part of the employee's overall compensation package, and this is an expected part of compensation. Column 1 of Exhibit FIII-2-1 reflects pro forma payroll expense for the twelve months ended December 31, 2024, in the amount of $10,142,670 (Refer to Exhibit No. HIII-2-4). Column 2 of Exhibit No. FIII-2-1 reflects the effect during the twelve months ending December 31, 2025, of the projected hourly and salary rate increases effective in 2025, annual cash and equity incentive awards effective in 2025, and projected new employees, in the amount of $383,304. The effect of the projected hourly and salary rate increases, annual cash and equity incentive awards, and projected new employees is determined and shown on Exhibit No. FIII-2-1 (a), which I will explain later. The effect during the twelve months ending December 31, 2025, of the projected hourly and salary rate increases, annual cash and equity incentive awards, and projected new employees in the amount of $383,304 has been carried forward to Column 3 of Exhibit No. FIII-2, pages 2 through 8. Column 3 of Exhibit No. FIII-2-1 reflects the projected payroll expense for the twelve months ending December 31, 2025, in the amount of $10,525,974.

I note that a portion of projected payroll expense for certain specified supervisory and general office employees for twelve months ending December 31, 2025, was capitalized

and is reflected, as a reduction to operating expenses, in Account No. 67580002, Administrative and General Expenses Capitalized, on Exhibit No. FIII-2-10, which I will explain later.

Q. Explain Exhibit No. FIII-2-1 (a).

A. Exhibit No. FIII-2-1 (a) is a projection of the effect during the twelve months ending December 31, 2025, of the projected hourly and salary rate increases, annual cash and equity incentive awards, and projected new employees. Column 1 of Exhibit No. FIII-2-1 (a) reflects the projected payroll expense for the twelve months ending December 31, 2025, in the amount of $10,525,974. The projected payroll expense for the twelve months ending December 31, 2025, in the amount of $10,525,974 is determined and shown on Exhibit No. FIII-2-1 (b), which I will explain later. Column 2 of Exhibit No. FIII-2-2 (a) reflects the annualized payroll expense for the historic test year in the amount of $10,142,670 (Refer to Exhibit No. HIII-2-4). Column 3 of Exhibit No. FIII-2-1 (a) is the projected increase in payroll expense in the amount of $383,304 as a result of the projected union employee increases effective May 1, 2025, the projected nonunion employee increases effective October 1, 2025, annual cash and equity incentive awards, and projected new employees. The projected increase in payroll expense is determined by subtracting the annualized historic test year payroll expense of $10,142,670, shown in Column 2 from the projected payroll expense for the twelve months ending December 31, 2025, of $10,525,974, shown in Column 1 ($10,525,974 - $10,142,670 = $383,304). The amount of the projected payroll expense increases to be incurred during the twelve months ending December 31, 2025, in the amount of $383,304 has been carried forward to Exhibit No. FIII-2-1, Column 2.

Q. Explain Exhibit No. FIII-2-1 (b).

A. Exhibit No. FIII-2-1 (b) provides the distribution of projected labor based on Company labor for the two years ended December 31, 2024. Company labor for the twelve months ended December 31, 2024, of $10,263,675, is shown in Column 1 of Exhibit No. FIII-2-1 (b). Company labor for the twelve months ended December 31, 2023 of $9,354,020 is shown in Column 2 of Exhibit No. FIII-2-1 (b). Two-Year Company Labor of $19,617,695, which represents the addition of Company labor for the twelve months ended December 31, 2024, and Company labor for the twelve months ended December 31, 2023, is shown in Column 3 on Exhibit No. FIII-2-1 (b). Projected payroll of $11,328,843 is distributed among the various capital and expense accounts based on the Two-Year Company Labor. The allocation factor of 0.57748 shown in Column 4 of Exhibit No. FIII-2-1 (b) used to distribute projected payroll among the various capital and expense accounts is calculated by dividing Projected Company Labor of $11,328,843 by Two Year Company Labor of $19,617,695. The allocation factor of 0.57748 is multiplied by each capital and expense amount of Two-Year Company Labor shown in Column 3 of Exhibit No. FIII-2-1 (b) to determine the projected Company labor amount allocated to each capital and expense account shown in Column 5 of Exhibit No. FIII-2-1 (b). Projected Company Labor Expense is carried forward to Column 1 of Exhibit No. FIII-2-1 (a).

Q. Explain Exhibit No. FIII-2-2.

A. Exhibit No. FIII-2-2 projects trustee and portfolio management fees for the twelve months ending December 31, 2025, for the Company's qualified defined benefit pension

plans based on projected plan asset values during 2025. The Company pays for trustee and portfolio management services for its qualified defined benefit pension plans based upon the plan asset values. The adjustment in trustee and portfolio management fees in the amount of $1,092 is determined by subtracting pro forma trustee and portfolio management fees for the twelve months ended December 31, 2024, of $156,415 (Refer to Exhibit No. HIII-2-13) from the projected trustee and portfolio management fees based on projected plan asset values during the twelve months ending December 31, 2025, of $157,506, which is calculated based on a trustee and portfolio management fee of 0.25%, the current rate, of the average projected plan assets for 2025 of $63,002,525 ($63,002,525 x 0.0025). The average projected plan assets for 2025 of $63,002,525 is determined by averaging the actual plan assets as of December 31, 2024, of $62,565,878 and projected plan assets as of December 31, 2025, of $63,439,172, based on a 5.0% annual growth rate and assumed distributions. The adjustment in the amount of $1,092 for projected trustee and portfolio management fees as an adjustment to Account No. 60480001 has been carried forward to Exhibit No. FIII-2, Column 3.

Q. Explain Exhibit No. FIII-2-3.

A. Exhibit No. FIII-2-3 projects health insurance expense and group life insurance expense for the twelve months ending December 31, 2025, based on the Company's complement of employees and the annualization of actual monthly premiums effective in 2025 for health insurance and group life insurance. The Company offers health insurance coverage for its employees. The Company pays health benefits up to 80% of the premium cost for all participating employees. The Company also offers dental and vision programs for its employees. The Company pays for 80% of the participating employees'

dental and vision benefits. The Company pays for a group life insurance benefit for all employees.

The actual 2025 monthly insurance premiums by class are annualized to determine the projected annual health insurance expense of $2,736,975. The adjustment in the amount of $238,015 is determined by subtracting the portion of health insurance expense to be borne by all employees of $489,302 and the pro forma health insurance expense for the twelve months ended December 31, 2025, in the amount of $2,009,658 from the projected annual health insurance expense of $2,736,975 ($2,736,975 - $489,302 - $2,009,658 = $238,015). The adjustment to Account No. 60480005 of $238,015 has been carried forward to Exhibit No. FIII-2, Column 3.

I note that a portion of projected health insurance expense for the twelve months ended December 31, 2025, was capitalized in accordance with Appendix "B" to the Settlement Agreement in the Company's 1987 rate case (Docket No. R-870769) and is reflected, as a reduction to operating expenses, in Account No. 67580002, Miscellaneous Expenses-Administrative and General Expenses Transferred on Exhibit No. FIII-2-10, which I will explain later.

Q. Explain Exhibit No. FIII-2-4.

A. Exhibit No. FIII-2-4 adjusts auditing fees for the twelve months ending December 31, 2025, based upon the Audit Committee approved proposal for services of the Company's independent registered public accountants.

The costs of auditing fees for twelve months ending December 31, 2025, are $264,950. The adjustment of $14,758 is determined by subtracting auditing fees incurred and recorded during the twelve months ended December 31, 2024, of $250,192 from proposed auditing fees for the twelve months ending December 31, 2025, of $264,950 ($264,950 - $250,192 = $14,758). The adjustment of auditing fees for the twelve months ending December 31, 2025, of $14,758 as an adjustment to Account No. 63280 has been carried forward to Exhibit No. FIII-2, Column 3.

Q. Explain Exhibit No. FIII-2-5.

A. Exhibit No. FIII-2-5 projects property, miscellaneous property floater, crime and fiduciary liability, ERISA bond, cyber, general liability, excess liability, directors and officers liability, pollution and underground storage tank liability, employment practices, flood, kidnap and ransom, service fee and highway restoration bond insurance expense for the twelve months ending December 31, 2025, to reflect actual insurance premiums effective January 1, 2025. The projected property, miscellaneous property floater, crime and fiduciary liability, ERISA bond, cyber, general liability, excess liability, directors and officers liability, pollution and underground storage tank liability, employment practices, flood, kidnap and ransom, service fee and highway restoration bond insurance expense for the twelve months ending December 31, 2024, is shown in Column 2 of Exhibit No. FIII-2-5. Property, miscellaneous property floater, crime and fiduciary liability, ERISA bond, cyber, general liability, excess liability, directors and officers liability, pollution and underground storage tank liability, employment practices, flood, kidnap and ransom, service fee and highway restoration bond insurance expense of $1,031,703 for the twelve months ended December 31, 2024, shown in Column 3 of Exhibit No. FIII-2-5, is

subtracted from the projected insurance expense of $1,108,918 to derive the adjustments to property, miscellaneous property floater, crime and fiduciary liability, ERISA bond, cyber, general liability, excess liability, directors and officers liability, pollution and underground storage tank liability, employment practices, flood, kidnap and ransom, service fee and highway restoration bond insurance expense shown in Column 4. The adjustments totaling $77,215 for the insurance premiums have been carried forward to Exhibit No. FIII-2, Column 3.

A portion of projected property insurance expense for twelve months ending December 31, 2025, is capitalized in accordance with Appendix "B" to the Settlement Agreement in the Company's 1987 rate case (Docket No. R-870769) and is reflected as a reduction to operating expenses in Account No. 67580002, Administrative and General Expenses Capitalized, on Exhibit No. FIII-2-10, which I will explain later.

Q. Explain Exhibit No. FIII-2-6.

A. Exhibit No. FIII-2-6 projects workers' compensation insurance expense based on projected payroll for the twelve months ending December 31, 2025, at workers compensation rates in effect as of January 1, 2025. Total projected payroll of $11,328,843 is detailed by workers' compensation insurance classifications of waterworks employees, outside sales and clerical employees in the amounts of $6,102,950, $1,379,092, and $3,846,801, respectively. The actual January 1, 2025 workers' compensation premium rates per $100 by classifications are $2.31, $0.21, and $0.08 respectively. These rates are applied to the projected payroll by classification to determine the projected initial workers' compensation insurance premiums. The

projected initial premiums are $140,978 for waterworks employees, $2,896 for outside sales, and $3,077 for clerical employees. The projected initial premiums are subject to an increased employer's liability limit factor of 1.10% and an experience modification factor of 1.260 as established by the Pennsylvania Compensation Insurance Bureau. Total projected premiums subject to experience modification of $146,952 ($140,978 + $2,896 + $3,077 = $146,952) are multiplied by the increased employer's liability limit factor of 1.10% to determine the cost of the increased employer's liability limit of $1,616 ($146,952 x 0.011). The total of initial premiums of $146,952 and increased employer's liability limit cost of $1,616 are multiplied by the Pennsylvania Experience Modification of 1.260 to arrive at adjusted workers' compensation insurance premiums of $187,196 [($146,952 + $1,616) x 1.260]. Adjusted workers' compensation insurance premiums of $187,196 are increased by a 5.0% schedule rating premium of $9,360 ($187,196 x 0.05). The premiums adjusted by the application of experience modification of $187,196 and schedule rating of $9,360 are multiplied by and reduced by a 5% safety credit of $(9,828) [($187,196 + $9,360) x (0.05)] to arrive at premiums adjusted by application of schedule rating and safety credit of $186,728 ($187,196 + $9,360 - $9,828). Premiums adjusted by application of schedule rating and safety credit of $186,728 are reduced by an 11.33% premium discount of $21,156 [$186,728 x (0.1133)] and increased by the Pennsylvania Compensation Rating Bureau Fee of $175, a foreign and domestic terrorism surcharge of $3,399, a catastrophe (other than terrorism) surcharge of $2,266 and a 2.42% Pennsylvania Employer Assessment of $4,148 [($186,728 - $21,156 + $175 + $3,399 + $2,266) x 0.0242] to determine projected workers' compensation insurance expense of $175,559 [($186,728 - $21,156 + $175 + $3,399 + $2,266 + $4,148). The adjustment to Workers' Compensation Insurance expense of $6,416 is determined by subtracting pro

forma Workers' Compensation Insurance expense for the twelve months ended December 31, 2024, of $169,143 from projected workers' compensation insurance expense of $175,559 ($175,559 - $169,143 = $6,416). The adjustment to Account No. 65880000 of $6,416 has been carried forward to Exhibit No. FIII-2, Column 3.

A portion of projected workers' compensation insurance expense for twelve months ending December 31, 2025, is capitalized in accordance with Appendix "B" to the Settlement Agreement in the Company's 1987 rate case (Docket No. R-870769) and is reflected, as a reduction to operating expenses, in Account No. 67580002, Administrative and General Expenses Capitalized, on Exhibit No. FIII-2-10, which I will explain later.

Q. Explain Exhibit FIII-2-7.

A. Exhibit FIII-2-7 projects uncollectible accounts expense for the twelve months ending December 31, 2025, in the amount of 439,449 by applying the two-year average percent of uncollectible accounts actually written off less recoveries of 0.66% to projected operating revenues under existing rates for the twelve months ending December 31, 2025, of $66,568,868 (Refer to Exhibit No. FII-1) ($66,568,868 x 0.0066). The adjustment to uncollectible accounts in the amount of $103 is determined by subtracting pro forma uncollectible accounts during the twelve months ended December 31, 2024, in the amount of $439,347 (Refer to Exhibit No. HIII-2-2) from the calculated projected uncollectible accounts for ratemaking purposes in the amount of $439,449 ($439,449 - $439,347 = $103). The adjustment to uncollectible accounts expense in the amount of $103 to Account No. 67070000 has been carried forward to Exhibit FIII-2, Column 3.

Q. Explain Exhibit No. FIII-2-8.

A. Exhibit No. FIII-2-8 projects the allocations to wastewater for the twelve months ending December 31, 2025, based on the Company's current allocation methodology and projected expense adjustments to the accounts that are allocated. Various expenses that are for both the water and wastewater portions of the business are recorded on the water side of the business. At the end of each accounting period, a portion of those allocable expenses are recorded as a reduction to expense on the water side of the business and an addition to expense on the wastewater side of the business.

The allocable portion of indirect labor, indirect fringe benefits, and operating expense to wastewater based on the projected balances of the accounts to be allocated for the twelve months ending December 31, 2025, is calculated to be $(531,732). The payroll taxes and fringe benefits on the direct labor recorded on the wastewater side of the business is calculated to be $(243,044). The adjustment of $7,941 is determined by subtracting the allocation to wastewater for the twelve months ended December 31, 2024, of $(782,717) by the calculated allocable portion of indirect labor, indirect fringe benefits, and operating expense of $(531,732) and calculated payroll taxes and fringe benefits on the direct labor of $(243,044) [$(531,732) + $(243,044) - $(782,717) = $7,941]. The adjustment of allocations to wastewater for the twelve months ending December 31, 2022, of $7,941 as an adjustment to Account No. 67580005 has been carried forward to Exhibit No. FIII-2, Column 3.

Q. Explain Exhibit No. FIII-2-9.

A. Exhibit No. FIII-2-9 projects director's fees for the twelve months ending December 31, 2025, based on the Company's current complement of directors, schedule of Board of Director and Board committee meetings, and projected 2025 fee increase. Directors who are also current employees of the Company receive no additional compensation for Board service.

The projected costs of director's fees for twelve months ending December 31, 2025, are $501,702. The adjustment of $82,341 is determined by subtracting pro forma director's fees for the twelve months ended December 31, 2024, of $419,361 from Exhibit No. HIII-2-8, from projected director's fees for the twelve months ending December 31, 2025, of $501,702 ($501,702 - $419,361 = $82,341). The projection of director's fees for the twelve months ending December 31, 2025, of $82,341 as an adjustment to Account No. 67580800 has been carried forward to Exhibit No. FIII-2, Column 3.

Q. Explain Exhibit No. FIII-2-10.

A. Exhibit No. FIII-2-10 projects administrative and general expenses capitalized for the twelve months ending December 31, 2025, in accordance with the Settlement Agreements under Docket Nos. R-870769 and R-963619 based on projected indirect labor, employee benefit costs, property insurance, workers' compensation insurance, and pension expense for the twelve months ending December 31, 2025, and a two-year average capitalization ratio.

A portion of the pay of certain specified supervisory and general office employees is capitalized (referred to as "indirect labor") in addition to capitalized payroll determined

directly from employee time records. The Company has updated the specified supervisory and general office employees to reflect the current complement of employee positions. Some employee positions described in the settlement of the Company's 1987 base rate proceeding no longer exist, and many new employee positions have been created. The indirect labor capitalization is calculated based upon three, separate, experienced ratios of directly capitalized payroll to total payroll, as follows:

	Employee Position	**Allocation**
(a)	President and Chief Executive Officer Chief Operating Officer Chief Financial Officer Chief Administrative Officer and General Counsel Controller Finance Manager CPR Clerk CPR Clerk Purchasing Coordinator Materials and Supplies Clerk Vice President of Operations Operations Manager	Ratio of total payroll directly capitalized to total payroll
(b)	GIS Administrator Assistant Distribution Superintendent Assistant Distribution Superintendent Distribution Superintendent Operations & Supply Chain Manager Distribution Line Representative Engineering Technician Engineering Technician Dispatcher Relief Dispatcher	Ratio of directly capitalized payroll of Distribution System Department employees to total Distribution System Department payroll
(c)	Maintenance & Grounds Superintendent Maintenance & Grounds Assistant Superintendent Maintenance & Grounds Assistant	Ratio of directly capitalized payroll of Maintenance and Grounds Department employees to total

Superintendent Maintenance and Grounds Department payroll

The two-year average general and administrative employees' capitalized ratio is 10.55%. This ratio was applied to projected payroll of $1,925,697 for the specified administrative and general employees to determine the projected capitalized indirect labor for general and administrative employees of $203,209 ($1,925,697 x 0.1055).

The two-year average distribution employees' capitalized ratio is 17.98%. This ratio was applied to projected payroll of $699,104 for the specified distribution employees to determine the projected capitalized indirect labor for distribution employees of $125,665 ($699,104 x 0.1798).

The two-year average maintenance and grounds employees' capitalized ratio is 2.55%. This ratio was applied to projected payroll of $246,747 for the specified maintenance and grounds employees to determine the projected capitalized indirect labor for maintenance and grounds employees' of $6,304 ($246,747 x 0.0255).

As further provided in the settlement of the Company's 1987 base rate proceeding at Docket No. R-870769, a portion of payroll taxes, group life and health insurance expense, workers' compensation insurance expense and property insurance expense will be capitalized.

In addition, as provided in the settlement of the Company's 1996 base rate proceeding at Docket No. R-963619, a portion of pension expense will be capitalized based upon the ratio of capitalized payroll to total payroll.

The two-year average capitalized payroll ratio is 7.30%. This ratio was applied to projected group life and health insurance expense, property insurance expense and pension expense of $2,247,673, $222,449, and $342,372, respectively, to determine the projected capitalized employee benefits, property insurance expense and pension expense of $163,981, $16,229, and $24,978, respectively.

The capitalized payroll ratio of 7.30% used to capitalize these expenses is different than the capitalized ratios used for indirect labor because the calculations are based on different allocation factors as prescribed by the Settlement Agreement. The latter ratio compares total capitalized payroll to total payroll, while the ratios used for indirect labor concern only a portion of the Company's employees.

The capitalization ratios for workers' compensation and payroll taxes of 1.71% and 7.90%, respectively, are based on a two-year average of the actual workers' compensation insurance premiums and payroll tax rates applied to capitalized payroll. The 1.71% ratio of workers' compensation was applied to pro forma capitalized labor from Exhibit FIII-2-1 (b) of $773,183 to determine capitalized workers' compensation expense of $13,187. The 7.90% ratio of payroll taxes (including FICA, FUTA, and SUTA) was applied to pro forma capitalized labor from Exhibit FIII-2-1 (b) of $773,183 to determine capitalized payroll tax expense of $61,116.

Total projected capitalized indirect labor, employee benefits, property insurance expense, payroll taxes and pension expense total $614,669 ($203,209 + $125,665 + $6,304 + $163,981 + $16,229 + $13,187 + $61,116 + $24,978). The adjustment to capitalized indirect labor, employee benefits, property insurance expense, payroll taxes and pension expense in the amount of $27,934 is determined by subtracting pro forma capitalized indirect labor, employee benefits, property insurance expenses, payroll taxes and pension expense for the twelve months ended December 31, 2024, of $586,735 from calculated projected capitalized indirect labor, employee benefits, property insurance expense, payroll taxes and pension expense of $614,669 ($614,669 - $586,735). The adjustment to capitalized indirect labor, employee benefits, property insurance expense, payroll taxes and pension expense in the amount of $27,934 as an adjustment to Account No. 67580002 and Account No. 40801302 has been carried forward to Exhibit No. FIII-2, Column 3 and Exhibit No. FIV-15.

Q. Explain Exhibit No. FIII-2-11.

A. Exhibit No. FIII-2-11 projects increased operating expenses for additional costs of customer accounting and collecting expenses (excluding uncollectible accounts), purchased power and chemicals resulting from the projection of the net increase in number of customers served during the twelve months ending December 31, 2025.

The historical average ratio of customer accounting and collecting, purchased power and chemical costs to sales of water of 8.50% for the two-year period ended December 31, 2024, was calculated. This ratio was applied to the total operating revenue adjustments in

the amount of $357,005 representing projected increases from load growth, as calculated on Exhibit Nos. FII-2-1 through FII-2-6, to derive an adjustment of $30,346 ($357,005 x 0.085).

The historical average ratio of power and chemical only costs to sales of water of 4.9% for the two-year period ended December 31, 2024, was calculated. This ratio was applied to the total operating revenue adjustments in the amount of $(341,440) representing projected decreases from load growth, as calculated on Exhibit No. FII-2-9 to derive an adjustment of $(16,872) [$(341,440 x 0.049].

The adjustment in the amount of $13,474 [$30,346 + $(16,872) = $13,474] for additional costs of customer accounting and collecting, purchased power and chemicals has been carried forward to Exhibit No. FIII-2, Column 3.

Q. Explain Exhibit No. FIII-2-12.

A. Exhibit No. FIII-2-12 projects the effect of increased maintenance expenses as utility plant in service increases. The Company calculated a two-year average rate of maintenance expenses as a percentage of utility plant in service of 0.73%. The two-year average rate was applied to the projected utility plant in service at December 31, 2025 of $681,352,401. The projected total maintenance expenses of $4,993,006 is determined by applying the two-year average rate of maintenance expenses as a percentage of utility plant in service to projected utility plant in service at December 31, 2025 ($681,352,401 x 0.0073). The projected effect of increased maintenance expenses in the amount of $12,672 is determined by subtracting the test year maintenance expenses of $4,980,334

from the projected maintenance expenses of $4,993,006 ($4,993,006 - $4,980,334). The adjustment of $12,672 has been carried forward to Exhibit No. FIII-2, Column 3.

Q. Explain Exhibit FIII-2-15.

A. Exhibit FIII-2-15 is a pro forma of payroll expense for union and nonunion employees for the future test year ending December 31, 2025. It reflects projected hourly and salary rates effective in 2025, annual cash and equity incentive awards effective in 2025, and projected new employees. The Company included year-end bonuses in an amount of $55,143 in projected payroll expense. The Company has consistently provided year-end bonuses to employees for over 29 years as a part of the employee's overall compensation package, and this is an expected part of compensation. Column 1 of Exhibit FIII-2-1 reflects projected payroll expense for the twelve months ended December 31, 2025, in the amount of $10,525,974 (Refer to Exhibit No. FIII-2-1). Column 2 of Exhibit No. FIII-2-1 reflects the effect during the twelve months ending December 31, 2025, of the pro forma hourly and salary rate increases effective in 2025, annual cash and equity incentive awards effective in 2025, and projected new employees in the amount of $993,261. The effect of the pro forma hourly and salary rate increases, annual cash and equity incentive awards, and projected new employees is determined and shown on Exhibit No. FIII-2-15 (a), which I will explain later. The effect during the twelve months ending December 31, 2025, of the pro forma hourly and salary rate increases, annual cash and equity incentive awards, and projected new employees in the amount of $993,261 has been carried forward to Column 6 of Exhibit No. FIII-2. Column 3 of Exhibit No. FIII-2-15 reflects the pro forma payroll expense for the twelve months ending December 31, 2025, in the amount of $11,519,235.

I note that a portion of pro forma payroll expense for certain specified supervisory and general office employees for twelve months ending December 31, 2025, was capitalized and is reflected, as a reduction to operating expenses, in Account No. 67580002, Administrative and General Expenses Capitalized, on Exhibit No. FIII-2-21, which I will explain later.

Q. Explain Exhibit No. FIII-2-15 (a).

A. Exhibit No. FIII-2-15 (a) is a pro forma of the effect during the twelve months ending December 31, 2025, of the projected hourly and salary rate increases, annual cash and equity incentive awards, and projected new employees. Column 1 of Exhibit No. FIII-2-15 (a) reflects the pro forma payroll expense for the twelve months ending December 31, 2025, in the amount of $11,519,235. The pro forma payroll expense for the twelve months ending December 31, 2025, in the amount of $11,519,235 is determined and shown on Exhibit No. FIII-2-15 (b), which I will explain later. Column 2 of Exhibit No. FIII-2-15 (a) reflects the projected payroll expense for the twelve months ending December 31, 2025 in the amount of $10,525,974 (Refer to Exhibit No. FIII-2-1). Column 3 of Exhibit No. FIII-2-15 (a) is the pro forma increase in payroll expense in the amount of $993,261 as a result of the projected union employee increases effective May 1, 2025, the projected nonunion employee increases effective October 1, 2025, annual cash and equity incentive awards, and projected new employees. The pro forma increase in payroll expense is determined by subtracting the projected payroll expense for the twelve months ending December 31, 2025, of $10,525,974, shown in Column 2 from the pro forma payroll expense for the twelve months ending December 31, 2025, of

$11,519,235, shown in Column 1 ($11,519,235 - $10,525,974 = $993,261). The amount of the pro forma payroll expense increases to be incurred during the twelve months ending December 31, 2025, in the amount of $993,261 has been carried forward to Exhibit No. FIII-2-15, Column 2.

Q. Explain Exhibit No. FIII-2-15 (b).

A. Exhibit No. FIII-2-15 (b) provides the distribution of pro forma labor based on Company labor for the two years ended December 31, 2024. Company labor for the twelve months ended December 31, 2024, of $10,263,675, is shown in Column 1 of Exhibit No. FIII-2-1 (b). Company labor for the twelve months ended December 31, 2023 of $9,354,020 is shown in Column 2 of Exhibit No. FIII-2-15 (b). Two-Year Company Labor of $19,617,695, which represents the addition of Company labor for the twelve months ended December 31, 2024, and Company labor for the twelve months ended December 31, 2023, is shown in Column 3 on Exhibit No. FIII-2-15 (b). Pro forma payroll of $12,397,865 is distributed among the various capital and expense accounts based on the Two-Year Company Labor. The allocation factor of 0.63197 shown in Column 4 of Exhibit No. FIII-2-15 (b) used to distribute pro forma payroll among the various capital and expense accounts is calculated by dividing Pro Forma Company Labor of $12,397,865 by Two-Year Company Labor of $19,617,695. The allocation factor of 0.63197 is multiplied by each capital and expense amount of Two-Year Company Labor shown in Column 3 of Exhibit No. FIII-2-1 (b) to determine the pro forma Company labor amount allocated to each capital and expense account shown in Column 5 of Exhibit No. FIII-2-15 (b). Pro Forma Company Labor Expense is carried forward to Column 1 of Exhibit No. FIII-2-15 (a).

Q. Explain Exhibit No. FIII-2-16.

A. Exhibit No. FIII-2-16 adjusts trustee and portfolio management fees for the twelve months ending December 31, 2025, for the Company's qualified defined benefit pension plans based on projected plan asset values as of December 31, 2025. The Company pays for trustee and portfolio management services for its qualified defined benefit pension plans based upon the plan asset values. The adjustment in trustee and portfolio management fees in the amount of $1,092 is determined by subtracting projected trustee and portfolio management fees for the twelve months ending December 31, 2025, of $157,506 (Refer to Exhibit No. FIII-2-2) from the pro forma trustee and portfolio management fees based on projected plan asset values as of December 31, 2025, of $158,598, which is calculated based on a trustee and portfolio management fee of 0.25% of the projected plan assets as of December 31, 2025, of $63,439,172 ($63,439,175 x 0.0025). The projected plan assets as of December 31, 2025, of $63,439,172 are based on a 5.0% annual growth rate and assumed distributions. The adjustment in the amount of $1,092 for pro forma trustee and portfolio management fees as an adjustment to Account No. 60480001 has been carried forward to Exhibit No. FIII-2, Column 6.

Q. Explain Exhibit No. FIII-2-17.

A. Exhibit No. FIII-2-17 adjusts workers' compensation insurance expense based on pro forma payroll at workers compensation rates in effect as of January 1, 2025. Total pro forma payroll of $12,397,865 is detailed by workers' compensation insurance classifications of waterworks employees, outside sales and clerical employees in the amounts of $6,608,356, $1,463,935, and $4,325,574, respectively. The actual January 1,

2025 workers' compensation premium rates per $100 by classifications are $2.31, $0.21, and $0.08, respectively. These rates are applied to the pro forma payroll by classification to determine the pro forma initial workers' compensation insurance premiums. The initial premiums are $152,653 for waterworks employees, $3,074 for outside sales, and $3,460 for clerical employees. The initial premiums are subject to an increased employer's liability limits factor of 1.10% and an experience modification factor of 1.260 as established by the Pennsylvania Compensation Insurance Bureau. Total premiums subject to experience modification of $159,188 ($152,653 + $3,074 + $3,460 = $159,188) are multiplied by the increased employer's liability limit factor of 1.10% to determine the cost of the increased employer's liability limits of $1,751 ($159,188 x 0.011). The total of initial premiums of $159,188 and increased employer's liability limits cost of $1,751 are multiplied by the Pennsylvania Experience Modification of 1.260 to arrive at adjusted workers' compensation insurance premiums of $202,783 [($159,188 + $1,751) x 1.260]. Adjusted workers' compensation insurance premiums of $202,783 are increased by a 5.0% schedule rating premium of $10,139 ($202,783 x 0.05). The premiums adjusted by application of experience modification of $202,783 and schedule rating of $10,139 are multiplied by and reduced by a 5% safety credit of $(10,646) [($202,783 + $10,139) x (0.05)] to arrive at premiums adjusted by application of schedule rating and safety credit of $202,276 ($202,783 + $10,139 - $10,646). Premiums adjusted by application of schedule rating and safety credit of $202,276 are reduced by an 11.33% premium discount of $22,918 [$202,276 x (0.1133)] and increased by the Pennsylvania Compensation Rating Bureau Fee of $175, a foreign and domestic terrorism surcharge of $3,719, a catastrophe (other than terrorism) surcharge of $2,480 and a 2.42% Pennsylvania Employer Assessment of $4,495 [($202,276 - $22,918 + $175 + $3,719 +

$2,480) x 0.0242] to determine pro forma workers' compensation insurance expense of $190,227 ($202,276 - $22,918 + $175 + $3,719 + $2,480 + $4,495). The adjustment to Workers' Compensation Insurance expense of $14,668 is determined by subtracting projected Workers' Compensation Insurance expense during the twelve months ending December 31, 2025, of $175,559 from pro forma workers' compensation insurance expense of $190,227 ($190,227 - $175,559 = $14,668). The adjustment to Account No. 65880000 of $14,668 has been carried forward to Exhibit No. FIII-2, Column 6.

A portion of pro forma workers' compensation insurance expense for twelve months ending December 31, 2025, is capitalized in accordance with Appendix "B" to the Settlement Agreement in the Company's 1987 rate case (Docket R-870769) and is reflected, as a reduction to operating expenses, in Account No. 67580002, Administrative and General Expenses Capitalized, on Exhibit No. FIII-2-21, which I will explain later.

Q. Explain Exhibit No. FIII-2-18.

A. Exhibit No. FIII-2-18 annualizes uncollectible accounts expense for the twelve months ending December 31, 2025, in the amount of $442,297 by applying the two-year average percent of uncollectible accounts actually written off less recoveries of 0.66% to pro forma operating revenues under existing rates for the twelve months ending December 31, 2025, of $67,000,211 (Refer to Exhibit No. FII-2) ($67,000,211 x 0.0066). The adjustment to uncollectible accounts in the amount of $2,847 is determined by subtracting projected uncollectible accounts during the twelve months ending December 31, 2025, in the amount of $439,449 (Refer to Exhibit No. FIII-2-7) from the calculated pro forma uncollectible accounts for ratemaking purposes in the amount of $442,297 ($442,297 -

$439,449 = $2,847). The adjustment of $2,847 to Account No. 67070000 has been carried forward to Exhibit No. FIII-2, Column 6.

Q. Explain Exhibit No. FIII-2-19.

A. Exhibit No. FIII-2-19 annualizes the allocations to wastewater for the twelve months ending December 31, 2025, based on the Company's current allocation methodology and pro forma expense adjustments to the accounts that are allocated. Various expenses that are for both the water and wastewater portions of the business are recorded on the water side of the business. At the end of each accounting period, a portion of those allocable expenses are recorded as a reduction to expense on the water side of the business and an addition to expense on the wastewater side of the business.

The allocable portion of indirect labor, indirect fringe benefits and operating expense to wastewater based on the pro forma balances of the accounts to be allocated for the twelve months ending December 31, 2025, is calculated to be $(537,773). The payroll taxes and fringe benefits on the direct labor recorded on the wastewater side of the business is calculated to be $(265,979). The adjustment of $(28,975) is determined by subtracting the projected allocation to wastewater for the twelve months ending December 31, 2025, of $(774,776) (see Exhibit No. FIII-2-8) by the calculated allocable portion of indirect labor, indirect fringe benefits and operating expense of $(537,773) and calculated payroll taxes and fringe benefits on the direct labor of $(265,979) [$(537,773) + $(265,979) - $(774,776) = $(28,975)]. The adjustment of allocations to wastewater for the twelve months ending December 31, 2025, of $(28,975) as an adjustment to Account No. 67580005 has been carried forward to Exhibit No. FIII-2, Column 6.

Q. Explain Exhibit No. FIII-2-20.

A. Exhibit No. FIII-2-20 annualizes director's fees for the twelve months ending December 31, 2025, based on the Company's current complement of directors, schedule of meetings, and projected 2025 fee increase. The adjustment to annualize, in the amount of $18,489, is determined by subtracting the projected director's fees for the twelve months ending December 31, 2025 (see Exhibit No. FIII-2-9) in the amount of $501,702 from the calculated pro forma director's fees for the twelve months ended December 31, 2025, of $520,191 ($520,191 - $501,702 = $18,489). The annualization adjustment of $18,489 is carried forward to Exhibit No. FIII-2, Column 6. Directors who are also current employees of the Company receive no additional compensation for Board service.

Q. Explain Exhibit No. FIII-2-21.

A. Exhibit No. FIII-2-21 adjusts administrative and general expenses capitalized for the twelve months ending December 31, 2025, in accordance with the Settlement Agreements under Docket Nos. R-870769 and R-963619 based on pro forma indirect labor, employee benefit costs, property insurance, workers' compensation insurance and pension expense for the twelve months ending December 31, 2025, and a two-year average capitalization ratio.

A portion of the pay of certain specified supervisory and general office employees is capitalized (referred to as "indirect labor") in addition to capitalized payroll determined directly from employee time records. The Company has updated the specified supervisory and general office employees to reflect the current complement of employee

positions. Some employee positions described in the Settlement of the Company's 1987 base rate proceeding no longer exist, and many new employee positions have been created. The indirect labor capitalization is calculated based upon three, separate, experienced ratios of directly capitalized payroll to total payroll, as follows:

	Employee Position	**Allocation**
(a)	President and Chief Executive Officer Chief Operating Officer Chief Financial Officer Chief Administrative Officer and General Counsel Controller Finance Manager CPR Clerk CPR Clerk Purchasing Coordinator Materials and Supplies Clerk Vice President of Operations Operations Manager	Ratio of total payroll directly capitalized to total payroll
(b)	GIS Administrator Assistant Distribution Superintendent Assistant Distribution Superintendent Distribution Superintendent Operations & Supply Chain Manager Distribution Line Representative Engineering Technician Engineering Technician Dispatcher Relief Dispatcher	Ratio of directly capitalized payroll of Distribution System Department employees to total Distribution System Department payroll
(c)	Maintenance & Grounds Superintendent Maintenance & Grounds Assistant Superintendent Maintenance & Grounds Assistant Superintendent	Ratio of directly capitalized payroll of Maintenance and Grounds Department employees to total Maintenance and Grounds Department payroll

The two-year average general and administrative employees' capitalized ratio is 10.55%. This ratio was applied to pro forma payroll of $1,978,522 for the specified administrative

and general employees to determine the pro forma capitalized indirect labor for general and administrative employees of $208,783 ($1,978,522 x 0.1055).

The two-year average distribution employees' capitalized ratio is 17.98%. This ratio was applied to pro forma payroll of $764,220 for the specified distribution employees to determine the pro forma capitalized indirect labor for distribution employees of $137,370 ($764,220 x 0.1798).

The two-year average maintenance and grounds employees' capitalized ratio is 2.55%. This ratio was applied to pro forma payroll of $253,500 for the specified maintenance and grounds employees to determine the pro forma capitalized indirect labor for maintenance and grounds employees of $6,477 ($253,500 x 0.0255).

As further provided in the settlement of the Company's 1987 base rate proceeding at Docket No. R-870769, a portion of payroll taxes, group life and health insurance expense, workers' compensation insurance expense, and property insurance expense will be capitalized.

In addition, as provided in the settlement of the Company's 1996 base rate proceeding at Docket No. R-963619, a portion of pension expense will be capitalized based upon the ratio of capitalized payroll to total payroll.

The two-year average capitalized payroll ratio is 7.30%. This ratio was applied to pro forma group life and health insurance expense, property insurance expense, and pension

expense of $2,247,673, $222,449, and $343464, respectively, to determine the pro forma capitalized employee benefits, property insurance expense, and pension expense of $163,981, $16,229, and $25,058, respectively.

The capitalized payroll ratio of 7.30% used to capitalize these expenses is different than the capitalized ratios used for indirect labor because the calculations are based on different allocation factors as prescribed by the Settlement Agreement. The latter ratio compares total capitalized payroll to total payroll, while the ratios used for indirect labor concern only a portion of the Company's employees.

The capitalization ratios for workers' compensation and payroll taxes of 1.71% and 7.90%, respectively, are based on a two-year average of the actual workers' compensation insurance premiums and payroll tax rates applied to capitalized payroll. The 1.71% ratio of workers' compensation was applied to pro forma capitalized labor from Exhibit FIII-2-15 (b) of $846,143 to determine capitalized workers' compensation expense of $14,431. The 7.90% ratio of payroll taxes (including FICA, FUTA and SUTA) was applied to pro forma capitalized labor from Exhibit FIII-2-15 (b) of $846,143 to determine capitalized payroll tax expense of $66,883.

Total pro forma capitalized indirect labor, employee benefits, property insurance expense, payroll taxes and pension expense total $639,212 ($208,783 + $137,370 + $6,477 + $163,981 + $16,229 + $14,431 + $66,883 + $25,058). The adjustment to capitalized indirect labor, employee benefits, property insurance expense, payroll taxes, and pension expense in the amount of $24,543 is determined by subtracting projected capitalized

indirect labor, employee benefits, property insurance expenses, payroll taxes, and pension expense for the twelve months ending December 31, 2025, of $614,669 from calculated pro forma capitalized indirect labor, employee benefits, property insurance expense, payroll taxes, and pension expense of $639,212 ($639,212 - $614,669). The adjustment to capitalized indirect labor, employee benefits, property insurance expense, payroll taxes, and pension expense in the amount of $24,543 as an adjustment to Account No. 67580002 and Account No. 40801302 has been carried forward to Exhibit No. FIII-2, Column 6 and Exhibit No. FIV-15, Column 6.

Q. Explain Exhibit No. FIII-2-22.

A. Exhibit No. FIII-2-22 adjusts operating expenses in the amount of $36,665 for additional costs of customer accounting and collecting expenses (excluding uncollectible accounts), purchased power and chemicals resulting from the annualization of the net increase in number of customers served during the twelve months ending December 31, 2025. The historical average ratio of customer accounting and collecting, purchased power, and chemical costs to sales of water of 8.50% for the two-year period ended December 31, 2024, was calculated. This ratio was applied to the total operating revenue adjustments in the amount of $431,343 representing pro forma increases from load growth, as calculated on Exhibit Nos. FII-2-10 through FII-2-17, to derive the adjustment of $36,665 ($431,343 x 0.085). The adjustment in the amount of $36,665 for additional costs of customer accounting and collecting, purchased power and chemicals has been carried forward to Exhibit No. FIII-2, Column 6.

Q. Explain Exhibit FIII-2-25.

A. Exhibit FIII-2-25 is a projection of payroll expense for union and nonunion employees for the fully projected future test year ending February 28, 2027. It reflects projected hourly and salary rates effective in 2026 and annual cash and equity incentive awards effective in 2026. The Company included year-end bonuses in an amount of $53,250 in projected payroll expense. The Company has consistently provided year-end bonuses to employees for over 29 years as a part of the employee's overall compensation package, and this is an expected part of compensation. Column 1 of Exhibit FIII-2-25 reflects pro forma payroll expense for the twelve months ending December 31, 2025, in the amount of $11,519,235 (Refer to Exhibit No. FIII-2-15). Column 2 of Exhibit No. FIII-2-25 reflects the effect during the twelve months ending February 28, 2027, of the projected hourly and salary rate increases effective in 2026 and annual cash and equity incentive awards effective in 2026 in the amount of $152,270. The effect of the projected hourly and salary rate increases and annual cash and equity incentive awards is determined and shown on Exhibit No. FIII-2-25 (a), which I will explain later. The effect during the twelve months ending February 28, 2027, of the projected hourly and salary rate increases and annual cash and equity incentive awards in the amount of $152,270 has been carried forward to Column 3 of Exhibit No. FIII-2, pages 9 through 15. Column 3 of Exhibit No. FIII-2-25 reflects the projected payroll expense for the twelve months ending February 28, 2027, in the amount of $11,671,506.

I note that a portion of projected payroll expense for certain specified supervisory and general office employees for twelve months ending February 28, 2027, was capitalized and is reflected, as a reduction to operating expenses, in Account No. 67580002,

Administrative and General Expenses Capitalized, on Exhibit No. FIII-2-34, which I will explain later.

Q. Explain Exhibit No. FIII-2-25 (a).

A. Exhibit No. FIII-2-25 (a) is a projection of the effect during the twelve months ending February 28, 2027, of the projected hourly and salary rate increases and annual cash and equity incentive awards. Column 1 of Exhibit No. FIII-2-25 (a) reflects the projected payroll expense for the twelve months ending February 28, 2027, in the amount of $11,671,506. The projected payroll expense for the twelve months ending February 28, 2027, in the amount of $11,671,506 is determined and shown on Exhibit No. FIII-2-25 (b), which I will explain later. Column 2 of Exhibit No. FIII-2-25 (a) reflects the pro forma payroll expense for the future test year in the amount of $11,519,235 (Refer to Exhibit No. FIII-2-15). Column 3 of Exhibit No. FIII-2-25 (a) is the projected increase in payroll expense in the amount of $152,270 as a result of the projected union employee increases effective May 1, 2026, the projected nonunion employee increases effective October 1, 2026, and annual cash and equity incentive awards. The projected increase in payroll expense is determined by subtracting the pro forma future test year payroll expense of $11,519,235, shown in Column 2 from the projected payroll expense for the twelve months ending February 28, 2027, of $11,671,506, shown in Column 1 ($11,671,506 - $11,519,235 = $152,270). The amount of the projected payroll expense increases to be incurred during the twelve months ending February 28, 2027, in the amount of $152,270 has been carried forward to Exhibit No. FIII-2-25, Column 2.

Q. Explain Exhibit No. FIII-2-25 (b).

A. Exhibit No. FIII-2-1 (b) provides the distribution of projected labor based on Company labor for the two years ended December 31, 2024. Company labor for the twelve months ended December 31, 2024, of $10,263,675, is shown in Column 1 of Exhibit No. FIII-2-25 (b). Company labor for the twelve months ended December 31, 2023 of $9,354,020 is shown in Column 2 of Exhibit No. FIII-2-25 (b). Two-Year Company Labor of $19,617,695, which represents the addition of Company labor for the twelve months ended December 31, 2024, and Company labor for the twelve months ended December 31, 2023, is shown in Column 3 on Exhibit No. FIII-2-1 (b). Projected payroll of $12,561,750 is distributed among the various capital and expense accounts based on the Two-Year Company Labor. The allocation factor of 0.64033 shown in Column 4 of Exhibit No. FIII-2-25 (b) used to distribute projected payroll among the various capital and expense accounts is calculated by dividing Projected Company Labor of $12,561,750 by Two-Year Company Labor of $19,617,695. The allocation factor of 0.64033 is multiplied by each capital and expense amount of Two-Year Company Labor shown in Column 3 of Exhibit No. FIII-2-25 (b) to determine the projected Company labor amount allocated to each capital and expense account shown in Column 5 of Exhibit No. FIII-2-25 (b). Projected Company Labor Expense is carried forward to Column 1 of Exhibit No. FIII-2-25 (a).

Q. Explain Exhibit No. FIII-2-26.

A. Exhibit No. FIII-2-26 projects trustee and portfolio management fees for the twelve months ending February 28, 2027, for the Company's qualified defined benefit pension plans based on projected plan asset values. The Company pays for trustee and portfolio management services for its qualified defined benefit pension plans based upon the plan

asset values. The adjustment in trustee and portfolio management fees in the amount of $2,279 is determined by subtracting pro forma trustee and portfolio management fees for the twelve months ended December 31, 2025, of $158,598 (Refer to Exhibit No. HIII-2-16) from the projected trustee and portfolio management fees based on projected plan asset values during the twelve months ending February 28, 2027, of 160,877, which is calculated based on a trustee and portfolio management fee of 0.25%, the current rate, of the average projected plan assets of $64,350,777 ($64,350,777 x 0.0025). The average projected plan assets of $64,350,777 is determined by averaging the projected plan assets as of February 28, 2026, of $63,582,832 and projected plan assets as of February 28, 2027, of $65,118,723, based on a 5.0% annual growth rate, assumed contributions and distributions. The adjustment in the amount of $2,279 for projected trustee and portfolio management fees as an adjustment to Account No. 60480001 has been carried forward to Column 3 of Exhibit No. FIII-2, Pages 9 through 15.

Q. Explain Exhibit No. FIII-2-27.

A. Exhibit No. FIII-2-27 projects health insurance expense for the twelve months ending February 28, 2027, based on the Company's complement of employees and the annualization of projected monthly premiums effective in 2026, for health insurance and group life insurance. The Company offers health insurance coverage for its employees. The Company pays health benefits up to 80% of the premium cost for all participating employees. The Company also offers dental and vision programs for its employees. The Company pays for 80% of the participating employees' dental and vision benefits. The Company pays for a group life insurance benefit for all employees.

The projected 2026 monthly insurance premiums by class, as determined through consultation with the Company's actuary, are annualized to determine the projected annual health insurance expense of $2,898,285. The adjustment in the amount of $125,570 is determined by subtracting the portion of health insurance expense to be borne by all employees of $525,042 and the projected health insurance expense for the twelve months ended December 31, 2025, in the amount of $2,373,243 from the projected annual health insurance expense of $2,898,285 ($2,898,285 - $525,042 - $2,373,243 = $125,570). The adjustment to Account No. 60480005 of $125,570 has been carried forward to Column 3 of Exhibit No. FIII-2, pages 9 through 15.

I note that a portion of projected health insurance expense for the twelve months ended February 28, 2027, was capitalized in accordance with Appendix "B" to the Settlement Agreement in the Company's 1987 rate case (Docket No. R-870769) and is reflected, as a reduction to operating expenses, in Account No. 67580002, Miscellaneous Expenses-Administrative and General Expenses Transferred on Exhibit No. FIII-2-34, which I will explain later.

Q. Explain Exhibit No. FIII-2-28.

A. Exhibit No. FIII-2-28 projects auditing fees for the twelve months ending February 28, 2027, based upon the increase in 2025 fees over 2024 fees of 5.0% for services of the Company's independent registered public accountants for the integrated audits of the financial statements and internal controls, quarterly reviews, tax preparation of the federal income tax return, and limited scope audits of the employee benefit plans.

The costs of auditing fees for twelve months ending December 31, 2025, are $264,950 as shown on Exhibit No. FIII-2-4. Projected auditing fees for the twelve months ending February 28, 2027, of $278,200 are calculated by taking the 2025 auditing fees for the integrated audits of the financial statements and internal controls, quarterly reviews, tax preparation of the federal income tax return, and limited scope audits of the employee benefit plans and applying a 5.0% increase ($264,950 x 1.05 = $278,200). The adjustment of $13,250 is determined by subtracting auditing fees for the twelve months ending December 31, 2025, of $264,950 from proposed auditing fees for the twelve months ending February 28, 2027, of $278,200 ($278,200 - $264,950 = $13,250). The adjustment to auditing fees for the twelve months ending February 28, 2027, of $13,250 as an adjustment to Account No. 63280 has been carried forward to Column 3 of Exhibit No. FIII-2, pages 9 through 15.

Q. Explain Exhibit No. FIII-2-29.

A. Exhibit No. FIII-2-29 projects property, miscellaneous property floater, crime and fiduciary liability, ERISA bond, cyber, general liability, excess liability, directors and officers liability, pollution and underground storage tank liability, employment practices, flood, kidnap and ransom, service fee, and highway restoration bond insurance expense for the twelve months ending February 28, 2027, based upon actual insurance premiums effective January 1, 2025, with an average inflationary increases and anticipated increases in coverage amounts of certain lines of insurance. The projected property, miscellaneous property floater, crime and fiduciary liability, ERISA bond, cyber, general liability, excess liability, directors and officers liability, pollution and underground storage tank liability, employment practices, flood, kidnap and ransom, service fee, and highway

restoration bond insurance expense for the twelve months ending February 28, 2027, is shown in Column 2. Property, miscellaneous property floater, crime and fiduciary liability, ERISA bond, cyber, general liability, excess liability, directors and officers liability, pollution and underground storage tank liability, employment practices, flood, kidnap and ransom, service fee, and highway restoration bond insurance expense of $1,108,918 for the future test year ending December 31, 2025, shown in Column 3 of Exhibit No. FIII-2-5, is subtracted from the projected insurance expense of $1,298,326 to derive the adjustments to property, miscellaneous property floater, crime and fiduciary liability, ERISA bond, cyber, general liability, excess liability, directors and officers liability, pollution and underground storage tank liability, employment practices, flood, kidnap and ransom, service fee, and highway restoration bond insurance expense shown in Column 4. The adjustments totaling $189,408 for the insurance premiums have been carried forward to Column 3 of Exhibit No. FIII-2, pages 9 through 15.

A portion of projected property insurance expense for twelve months ending February 28, 2027, is capitalized in accordance with Appendix "B" to the Settlement Agreement in the Company's 1987 rate case (Docket No. R-870769) and is reflected as a reduction to operating expenses in Account No. 67580002, Administrative and General Expenses Capitalized, on Exhibit No. FIII-2-34, which I will explain later.

Q. Explain Exhibit No. FIII-2-30.

A. Exhibit No. FIII-2-30 projects workers' compensation insurance expense based on projected payroll for the twelve months ending February 28, 2027, at workers compensation rates in effect as of January 1, 2025. Total projected payroll of

$12,561,750 is detailed by workers' compensation insurance classifications of waterworks employees, outside sales and clerical employees in the amounts of $6,711,378, $1,478,997, and $4,371,375, respectively. The actual January 1, 2025 workers' compensation premium rates per $100 by classifications are $2.31, $0.21, and $0.08 respectively. These rates are applied to the projected payroll by classification to determine the projected initial workers' compensation insurance premiums. The projected initial premiums are $155,033 for waterworks employees, $3,106 for outside sales and $3,497 for clerical employees. The projected initial premiums are subject to an increased employer's liability limit factor of 1.10% and an experience modification factor of 1.260 as established by the Pennsylvania Compensation Insurance Bureau. Total projected premiums subject to experience modification of $161,636 ($155,033 + $3,106 + $3,497 = $161,636) are multiplied by the increased employer's liability limit factor of 1.10% to determine the cost of the increased employer's liability limit of $1,778 ($161,636 x 0.011). The total of initial premiums of $161,636 and increased employer's liability limit cost of $1,778 are multiplied by the Pennsylvania Experience Modification of 1.260 to arrive at adjusted workers' compensation insurance premiums of $205,901 [($161,636 + $1,778) x 1.260]. Adjusted workers' compensation insurance premiums of $205,901 are increased by a 5.0% schedule rating premium of $10,295 ($205,901 x 0.05). The premiums adjusted by application of experience modification of $205,901 and schedule rating of $10,295 are multiplied by and reduced by a 5% safety credit of $(10,810) [($205,901 + $10,295) x (0.05)] to arrive at premiums adjusted by application of schedule rating and safety credit of $205,387 ($205,901 + $10,295 - $10,810). Premiums adjusted by application of schedule rating and safety credit of $205,387 are decreased by a 11.33% premium discount of $23,270 [$205,387 x (0.1133)] and

increased by the Pennsylvania Compensation Rating Bureau Fee of $175, a foreign and domestic terrorism surcharge of $3,769, a catastrophe (other than terrorism) surcharge of $2,512 and a 2.42% Pennsylvania Employer Assessment of $4,563 [($205,387 - $23,270 + $175 + $3,769 + $2,512) x 0.0242] to determine projected workers' compensation insurance expense of $193,136 ($205,387 - $23,270 + $175 + $3,769 + $2,512 + $4,563). The adjustment to Workers' Compensation Insurance expense of $2,909 is determined by subtracting pro forma Workers' Compensation Insurance expense for the twelve months ended December 31, 2025, of $190,227 from projected workers' compensation insurance expense of $193,136 ($193,136 - $190,227 = $2,909). The adjustment to Account No. 65880000 of $2,909 has been carried forward to Column 3 of Exhibit No. FIII-2, pages 9 through 15.

A portion of projected workers' compensation insurance expense for twelve months ending February 28, 2027, is capitalized in accordance with Appendix "B" to the Settlement Agreement in the Company's 1987 rate case (Docket No. R-870769) and is reflected, as a reduction to operating expenses, in Account No. 67580002, Administrative and General Expenses Capitalized, on Exhibit No. FIII-2-34, which I will explain later.

Q. Explain Exhibit No. FIII-2-31.

A. Exhibit No. FIII-2-31 projects uncollectible accounts expense for the twelve months ending February 28, 2027, in the amount of $443,390 by applying the two-year average percent of uncollectible accounts actually written off less recoveries of 0.66% to projected operating revenues under existing rates for the twelve months ending February 28, 2027, of $67,165,761 (Refer to Exhibit No. FII-1) ($67,165,761 x 0.0066). The

adjustment to uncollectible accounts in the amount of $1,093 is determined by subtracting pro forma uncollectible accounts during the twelve months ending December 31, 2025, in the amount of $442,2975 (Refer to Exhibit No. FIII-2-18) from the calculated projected uncollectible accounts for ratemaking purposes in the amount of $443,390 ($443,390 - $442,297 = $1,093). The adjustment to uncollectible accounts expense in the amount of $1,093 to Account No. 67070000 has been carried forward to Column 3 of Exhibit FIII-2, pages 9 through 15.

Q. Explain Exhibit No. FIII-2-32.

A. Exhibit No. FIII-2-32 projects the allocations to wastewater for the twelve months ending February 28, 2027, based on the Company's current allocation methodology and projected expense adjustments to the accounts that are allocated. Various expenses that are for both the water and wastewater portions of the business are recorded on the water side of the business. At the end of each accounting period, a portion of those allocable expenses are recorded as a reduction to expense on the water side of the business and an addition to expense on the wastewater side of the business.

The allocable portion of indirect labor, indirect fringe benefits, and operating expense to wastewater based on the projected balances of the accounts to be allocated for the twelve months ending February 28, 2027, is calculated to be $(592,647). The payroll taxes and fringe benefits on the direct labor recorded on the wastewater side of the business is calculated to be $(269,494). The adjustment of $(58,390) is determined by subtracting the allocation to wastewater for the future test year ended December 31, 2025, of $(803,751) (see Exhibit No. FIII-2-19) by the calculated allocable portion of indirect

labor, indirect fringe benefits and operating expense of $(592,647) and calculated payroll taxes and fringe benefits on the direct labor of $(269,494) [$(592,647) + $(269,494) - $(803,751) = $(58,390)]. The adjustment of allocations to wastewater for the twelve months ending February 28, 2027, of $(58,390) as an adjustment to Account No. 67580005 has been carried forward to Column 3 of Exhibit No. FIII-2, pages 9 through 15.

Q. Explain Exhibit No. FIII-2-33.

A. Exhibit No. FIII-2-33 projects director's fees for the twelve months ending February 28, 2027, based on the Company's current complement of directors, schedule of Board of Director and Board committee meetings, and projected 2026 fee increase. Directors who are also current employees of the Company receive no additional compensation for Board service.

The projected costs of director's fees for the twelve months ending February 28, 2027, are $587,519. The adjustment of $67,328 is determined by subtracting pro forma director's fees for the twelve months ended December 31, 2025, of $520,191 from Exhibit No. FIII-2-25, from projected director's fees for the twelve months ending February 28, 2027, of $587,519 ($587,519 - $520,191 = $67,328). The projection of director's fees for the twelve months ending February 28, 2027, of $67,328 as an adjustment to Account No. 67580800 has been carried forward to Column 3 of Exhibit No. FIII-2, pages 9 through 15.

Q. Explain Exhibit No. FIII-2-34.

A. Exhibit No. FIII-2-34 projects administrative and general expenses capitalized for the twelve months ending February 28, 2027, as previously agreed to in the Settlement Agreements under Docket Nos. R-870769 and R-963619 based on projected indirect labor, employee benefit costs, property insurance, workers' compensation insurance, and pension expense for the twelve months ending February 28, 2027, and a two-year average capitalization ratio.

A portion of the pay of certain specified supervisory and general office employees is capitalized (referred to as "indirect labor") in addition to capitalized payroll determined directly from employee time records. The Company has updated the specified supervisory and general office employees to reflect the current complement of employee positions. Some employee positions described in the settlement of the Company's 1987 base rate proceeding no longer exist, and many new employee positions have been created. Please refer to my testimony with regard to Exhibit No. FIII-2-10 for a listing of employee positions capitalized and the allocation ratio for each.

The two-year average general and administrative employees' capitalized ratio is 10.55%. This ratio was applied to projected payroll of $1,996,782 for the specified administrative and general employees to determine the projected capitalized indirect labor for general and administrative employees of $210,710 ($1,996,782 x 0.1055).

The two-year average distribution employees' capitalized ratio is 17.98%. This ratio was applied to projected payroll of $771,254 for the specified distribution employees to

determine the projected capitalized indirect labor for distribution employees of $138,635 ($771,254 x 0.1798).

The two-year average maintenance and grounds employees' capitalized ratio is 2.55%. This ratio was applied to projected payroll of $255,835 for the specified maintenance and grounds employees to determine the projected capitalized indirect labor for maintenance and grounds employees' of $6,536 ($255,835 x 0.0255).

As further provided in the settlement of the Company's 1987 base rate proceeding at Docket No. R-870769, a portion of payroll taxes, group life and health insurance expense, workers' compensation insurance expense, and property insurance expense will be capitalized.

In addition, as provided in the settlement of the Company's 1996 base rate proceeding at Docket No. R-963619, a portion of pension expense will be capitalized based upon the ratio of capitalized payroll to total payroll.

The two-year average capitalized payroll ratio is 7.30%. This ratio was applied to projected group life and health insurance expense, property insurance expense, and pension expense of $2,373,243, $249,143, and $869,534, respectively, to determine the projected capitalized employee benefits, property insurance expense, and pension expense of $173,142, $18,176, and $63,438, respectively.

The capitalized payroll ratio of 7.30% used to capitalize these expenses is different than the capitalized ratios used for indirect labor because the calculations are based on different allocation factors as prescribed by the Settlement Agreement. The latter ratio compares total capitalized payroll to total payroll, while the ratios used for indirect labor concern only a portion of the Company's employees.

The capitalization ratios for workers' compensation and payroll taxes of 1.71% and 7.90%, respectively, are based on a two-year average of the actual workers' compensation insurance premiums and payroll tax rates applied to capitalized payroll. The 1.71% ratio of workers' compensation was applied to pro forma capitalized labor from Exhibit FIII-2-25 (b) of $857,328 to determine capitalized workers' compensation expense of $14,622. The 7.90% ratio of payroll taxes (including FICA, FUTA and SUTA) was applied to pro forma capitalized labor from Exhibit FIII-2-25 (b) of $857,328 to determine capitalized payroll tax expense of $67,767.

Total projected capitalized indirect labor, employee benefits, property insurance expense, payroll taxes, and pension expense total $693,026 ($210,710 + $138,635 + $6,536 + $173,142 + $18,176 + $14,622 + $67,767 + $63,438). The adjustment to capitalized indirect labor, employee benefits, property insurance expense, payroll taxes, and pension expense in the amount of $53,814 is determined by subtracting pro forma capitalized indirect labor, employee benefits, property insurance expenses, payroll taxes, and pension expense for the twelve months ended December 31, 2025, of $639,212 from calculated projected capitalized indirect labor, employee benefits, property insurance expense, payroll taxes, and pension expense of $693,026 ($693,026 - $639,212). The adjustment

to capitalized indirect labor, employee benefits, property insurance expense, payroll taxes, and pension expense in the amount of $53,814 as an adjustment to Account No. 67580002 and Account No. 40801302 has been carried forward to Exhibit No. FIII-2, Column 3 and Exhibit No. FIV-15.

Q. Explain Exhibit No. FIII-2-35.

A. Exhibit No. FIII-2-35 is to adjust pension expense included in the cost of service for the Company's two defined benefit pension plans (one plan for general and administrative employees and one plan for union-represented employees) to reflect the cash contribution to the pension trust. The Company has reflected in its cost of service for ratemaking purposes the cash contributions to its two defined benefit pension plans since the pension plans were established in 1959. The Commission in its Order at Docket R-00027975, dated June 26, 2003, in its Order at Docket No. R-00049165, dated November 9, 2004, in its Order at Docket No. R-00061322, dated September 16, 2006, in its Order at Docket No. R-2008-2023067, dated October 9, 2008, in its Order at Docket No. R-2010-2157140, dated November 4, 2010, in its Order at Docket No. R-2012-2336379, dated February 28, 2014, in its Order at Docket No. R-2018-3000019, dated March 1, 2019 , and in its Order at Docket No. R-2022-3031340 dated March 1, 2023, approved cash contributions plus administrative costs as the basis for the Company's ratemaking claim for pension expense as part of full settlements of those cases.

The Company intends to make cash contributions to its two defined benefit pension plans equal to the Service Cost as of January 1, 2024. The service cost represents the cost of benefits that are earned each year by the participants.

For the general and administrative employees pension plan, the service cost is $427,208. For the union-represented employees pension plan, the service cost is $208,004. The total to be contributed is rounded to $635,000 ($427,208 + $208,004 = $635,212).

The Company believes that it is in the best interest of the plans, their participants, and York Water's customers to make cash contributions to the plans to ensure that the plans are fully funded. The Company is recommending a contribution to the plans to fund the service cost that will maintain the fully funded status of the plans.

The adjustment in pension expense in the amount of $523,791 is determined by subtracting actual pension contributions made during the twelve months ended December 31, 2024, in the amount of $111,209 from the projected cash contributions during the twelve months ending February 28,2027 of $635,000. Please see my Statement No. 3 for an explanation of the contribution that was made in 2024. The pension adjustment in the amount of $523,791 ($635000 - $111,209) to account 67580003 has been carried forward to Column 3 of Exhibit No. FIII-2, pages 9 through 15.

Q. Explain Exhibit No. FIII-2-36.

A. Exhibit No. FIII-2-36 projects increased operating expenses for additional costs of customer accounting and collecting expenses (excluding uncollectible accounts), purchased power and chemicals resulting from the projection of the net increase in number of customers served during the twelve months ending February 28, 2027.

The historical average ratio of customer accounting and collecting, purchased power, and chemical costs to sales of water of 8.50% for the two-year period ended December 31, 2024, was calculated. This ratio was applied to the total operating revenue adjustments in the amount of $473,038 representing projected increases from load growth, as calculated on Exhibit Nos. FII-2-20 through FII-2-29, to derive an adjustment of $40,209 ($473,038 x 0.085).

The historical average ratio of power and chemical only costs to sales of water of 4.9% for the two-year period ended December 31, 2024, was calculated. This ratio was applied to the total operating revenue adjustments in the amount of $(307,488) representing projected decreases from load growth, as calculated on Exhibit No. FII-2-32 to derive an adjustment of $(15,194) [$(307,488 x 0.049].

The adjustment in the amount of $25,015 [$40,209 + $(15,194) = $25,015] for additional costs of customer accounting and collecting, purchased power, and chemicals has been carried forward to Exhibit No. FIII-2, pages 9 through 15.

Q. Explain Exhibit No. FIII-2-37.

A. Exhibit No. FIII-2-37 projects the effect of increased maintenance expenses as utility plant in service increases. The Company calculated a two-year average rate of maintenance expenses as a percentage of utility plant in service of 0.73%. The two-year average rate was applied to the projected utility plant in service at February 28, 2027 of $718,575,838. The projected total maintenance expenses of $5,265,782 is determined by applying the two-year average rate of maintenance expenses as a percentage of utility

plant in service to projected utility plant in service at February 28, 2027 ($718,575,838 x 0.0073). The projected effect of increased maintenance expenses in the amount of $272,776 is determined by subtracting the test year maintenance expenses of $4,980,334 and the future test year adjustment of $12,672 on Exhibit No. FIII-2-12 from the projected maintenance expenses of $5,265,782 [$5,265,782 – ($4,980,334 + $12,672)]. The adjustment of $272,776 has been carried forward to Exhibit No. FIII-2, Column 3.

Q. Explain Exhibit FIII-2-40.

A. Exhibit FIII-2-40 is a pro forma of payroll expense for union and nonunion employees for the fully projected future test year ending February 28, 2027. It reflects pro forma hourly and salary rates effective in 2026 and annual cash and equity incentive awards effective in 2026. The Company included year-end bonuses in an amount of $53,250 in pro forma payroll expense. The Company has consistently provided year-end bonuses to employees for over 29 years as a part of the employee's overall compensation package, and this is an expected part of compensation. Column 1 of Exhibit FIII-2-1 reflects projected payroll expense for the twelve months ended February 28, 2027, in the amount of $11,671,506 (Refer to Exhibit No. FIII-2-25). Column 2 of Exhibit No. FIII-2-40 reflects the effect during the twelve months ending February 28, 2027 of the pro forma hourly and salary rate increases effective in 2026 and annual cash and equity incentive awards effective in 2026, in the amount of $297,234. The effect of the pro forma hourly and salary rate increases and annual cash and equity incentive awards is determined and shown on Exhibit No. FIII-2-40 (a), which I will explain later. The effect during the twelve months ending February 28, 2027, of the pro forma hourly and salary rate increases and annual

cash and equity incentive awards in the amount of $297,234 has been carried forward to Column 3 of Exhibit No. FIII-2, page 16 through 22. Column 3 of Exhibit No. FIII-2-40 reflects the pro forma payroll expense for the twelve months ending February 28, 2027, in the amount of $11,968,739.

I note that a portion of pro forma payroll expense for certain specified supervisory and general office employees for twelve months ending February 28, 2027, was capitalized and is reflected, as a reduction to operating expenses, in Account No. 67580002, Administrative and General Expenses Capitalized, on Exhibit No. FIII-2-49, which I will explain later.

Q. Explain Exhibit No. FIII-2-40 (a).

A. Exhibit No. FIII-2-40 (a) is a pro forma of the effect during the twelve months ending February 28, 2027, of the projected hourly and salary rate increases and annual cash and equity incentive awards. Column 1 of Exhibit No. FIII-2-1 (a) reflects the pro forma payroll expense for the twelve months ending February 28, 2027, in the amount of $11,968,739. The pro forma payroll expense for the twelve months ending February 28, 2027, in the amount of $11,968,739 is determined and shown on Exhibit No. FIII-2-40 (b), which I will explain later. Column 2 of Exhibit No. FIII-2-15 (a) reflects the projected payroll expense for the twelve months ending February 28, 2027 in the amount of $11,671,506 (Refer to Exhibit No. FIII-2-25). Column 3 of Exhibit No. FIII-2-40 (a) is the pro forma increase in payroll expense in the amount of $297,234 as a result of the projected union employee increases effective May 1, 2026, the projected nonunion employee increases effective October 1, 2026, and annual cash and equity incentive

awards. The pro forma increase in payroll expense is determined by subtracting the projected payroll expense for the twelve months ending February 28, 2027 of $11,671,5061, shown in Column 2 from the pro forma payroll expense for the twelve months ending February 28, 2027, of $11,968,739, shown in Column 1 ($11,968,739 - $11,671,506 = $297,234). The amount of the pro forma payroll expense increases to be incurred during the twelve months ending February 28, 2027, in the amount of $297,234 has been carried forward to Exhibit No. FIII-2-40, Column 2.

Q. Explain Exhibit No. FIII-2-40 (b).

A. Exhibit No. FIII-2-40 (b) provides the distribution of pro forma labor based on Company labor for the two years ended December 31, 2024. Company labor for the twelve months ended December 31, 2024, of $10,263,675, is shown in Column 1 of Exhibit No. FIII-2-1 (b). Company labor for the twelve months ended December 31, 2023 of $9,354,020 is shown in Column 2 of Exhibit No. FIII-2-1 (b). Two-Year Company Labor of $19,617,695, which represents the addition of Company labor for the twelve months ended December 31, 2024, and Company labor for the twelve months ended December 31, 2023, is shown in Column 3 on Exhibit No. FIII-2-40 (b). Pro forma payroll of $12,881,655 is distributed among the various capital and expense accounts based on the Two-Year Company Labor. The allocation factor of 0.65663 shown in Column 4 of Exhibit No. FIII-2-40 (b) used to distribute pro forma payroll among the various capital and expense accounts is calculated by dividing Pro Forma Company Labor of $12,881,655 by Two-Year Company Labor of $19,617,695. The allocation factor of 0.65,663 is multiplied by each capital and expense amount of Two-Year Company Labor shown in Column 3 of Exhibit No. FIII-2-40 (b) to determine the pro forma Company

labor amount allocated to each capital and expense account shown in Column 5 of Exhibit No. FIII-2-40 (b). Pro Forma Company Labor Expense is carried forward to Column 1 of Exhibit No. FIII-2-40 (a).

Q. Explain Exhibit No. FIII-2-41.

A. Exhibit No. FIII-2-41 projects market adjustment to the Company's 401(k) match and contributions to be implemented during the twelve months ending December 31, 2026 and included in cost of service for the twelve months ending February 28, 2027. The Company believes that these changes are necessary to retain and recruit qualified employees in a competitive labor market.

There are two provisions within the Company's 401(k) plan. The basic 401(k) plan is available for employees that are eligible for the Company's defined benefit pension plans. The Company match in the basic 401(k) plan is 100% of employees contributions up to a flat amount of $2,800. The Company is not projecting any changes to this plan.

The enhanced 401(k) plan is available for employees that are not eligible for the Company's defined benefit pension plan. All employees hired after May 1, 2010 are included in the enhanced 401(k) plan. The Company makes an annual contribution of $1,200 to each employee's account whether or not they defer their own compensation. The Company match in the enhanced 401(k) plan is 100% of employees' contributions up to 4% of the employees' compensation. The Company is projecting to increase its annual contribution to the greater of $1,200 or 2% of the employees' compensation. The adjustment will be $42,712 based on the increase from $1,200 to 2% for those

participants with compensation between $1,200 and 2%. The adjustment for 401(k) contributions for the twelve months ending February 28, 2027, of $42,712 as an adjustment to Account No. 60400002 has been carried forward to Exhibit No. FIII-2, Column 3.

Q. Explain Exhibit No. FIII-2-42.

A. Exhibit No. FIII-2-42 projects annual Company 401(k) match and contributions for employees added during the future test year ending December 31, 2025, as of February 28, 2027. The Company would be responsible for an annual contribution of the greater of $1,200 per employee or 2% of the employees' compensation. The Company's annual 401(k) contributions for the added employees will be $23,381. In addition, the Company is responsible for making matching contributions of 100% of the employee's contribution up to a maximum of 4% of the employee's compensation. The matching contribution for the added employees will be $42,714 based on the application of the 4% matching contribution rate multiplied by the annual wages of the added employees of $1,067,841 ($1,067,841 x 4% = $42,714) The total adjustment of $66,095 is determined by combining the Company annual contributions of $23,381 and the Company matching contributions of $42,714 ($23,381 + $42,714 = $66,095) The adjustment for 401(k) contributions for the twelve months ending February 28, 2027, of $66,095 as an adjustment to Account No. 60400002 has been carried forward to Exhibit No. FIII-2, Column 3.

Q. Explain Exhibit No. FIII-2-43.

A. Exhibit No. FIII-2-43 projects annual deferred compensation matching contributions for employees currently participating, and salaried employees to be added during the future test year ending December 31, 2025, as of February 28, 2027. The Company sponsors a deferred compensation plan with members of its management that requires it to make matching contributions of 100% of the employee's contribution up to a maximum of 5% of the employee's compensation. Previous rate cases have eliminated the expenses associated with the deferred compensation plan in accordance with the Settlement Agreement approved by the Commission under Docket No. R-000016236. The Company is including in this rate case the deferred compensation matching contributions for employees not eligible for the Company's defined benefit plan. The employees will build their retirement savings through the 401(k) plan and the deferred compensation plan. Since the contributions to the defined benefit plan are included in the cost of service, the Company believes its contributions to the deferred compensation plan for those employees on whose behalf it is not making contributions to the defined benefit plan should be included in the cost of service.

There are currently six employees participating in the deferred compensation plan not eligible for the defined benefit pension plan. The annual matching contributions for these six employees based on their pro forma wages for the twelve months ending February 28, 2027, and their current matching percentages is $60,062. Six salaried employees projected to be added during the twelve months ended December 31, 2025, will be eligible for participation in the deferred compensation plan but not in the defined benefit pension plan. The annual matching contributions for these six employees based on their pro forma wages for the twelve months ending February 28, 2027, and the average

matching percentage of the four employees currently participating of 4.00% is calculated to be $35,021. The total adjustment of $95,083 is determined by combining the Company matching contributions for the currently participating employees of $60,062 and the Company matching contributions for the added employees of $35,021 ($60,062 + $35,021 = $95,083). The adjustment for deferred compensation contributions for the twelve months ending February 28, 2027, of $95,083 as an adjustment to Account No. 60400002 has been carried forward to Exhibit No. FIII-2, Column 3.

Q. Explain Exhibit No. FIII-2-44.

A. Exhibit No. FIII-2-44 adjusts trustee and portfolio management fees for the twelve months ending February 28, 2027, for the Company's qualified defined benefit pension plans based on projected plan asset values as of February 28, 2027. The Company pays for trustee and portfolio management services for its qualified defined benefit pension plans based upon the plan asset values. The adjustment to trustee and portfolio management fees in the amount of $1,920 is determined by subtracting projected trustee and portfolio management fees for the twelve months ending February 28, 2027, of $160,877 (Refer to Exhibit No. FIII-2-26) from the pro forma trustee and portfolio management fees based on projected plan asset values as of February 28, 2027, of $162,797, which is calculated based on a trustee and portfolio management fee of 0.25% of the projected plan assets as of February 28, 2027, of $65,118,723 ($65,118,723 x 0.0025). The projected plan assets as of February 28, 2027, of $65,118,723 are based on a 5.0% annual growth rate, assumed contributions, and assumed distributions. The adjustment in the amount of $1,920 for pro forma trustee and portfolio management fees

as an adjustment to Account No. 60480001 has been carried forward to Exhibit No. FIII-2, Column 3.

Q. Explain Exhibit No. FIII-2-45.

A. Exhibit No. FIII-2-45 adjusts workers' compensation insurance expense based on pro forma payroll at workers compensation rates in effect as of January 1, 2025. Total pro forma payroll of $12,881,655 is detailed by workers' compensation insurance classifications of waterworks employees, outside sales, and clerical employees in the amounts of $6,848,697, $1,524,182, and $4,508,776, respectively. The actual January 1, 2025 workers' compensation premium rates per $100 by classifications are $2.31, $0.21, and $0.08 respectively. These rates are applied to the pro forma payroll by classification to determine the pro forma initial workers' compensation insurance premiums. The initial premiums are $158,205 for waterworks employees, $3,201 for outside sales, and $3,607 for clerical employees. The initial premiums are subject to an increased employer's liability limits factor of 1.10% and an experience modification factor of 1.260 as established by the Pennsylvania Compensation Insurance Bureau. Total premiums subject to experience modification of $165,013 ($158,205 + $3,201 + $3,607 = $165,013) are multiplied by the increased employer's liability limit factor of 1.10% to determine the cost of the increased employer's liability limits of $1,815 ($165,013 x 0.011). The total of initial premiums of $165,013 and increased employer's liability limits cost of $1,815 are multiplied by the Pennsylvania Experience Modification of 1.260 to arrive at adjusted workers' compensation insurance premiums of $210,203 [($165,013 + $1,815) x 1.260]. Adjusted workers' compensation insurance premiums of $210,203 are increased by a 5.0% schedule rating premium of $10,510 ($210,203 x 0.05). The premiums adjusted by

the application of experience modification of $201,203 and schedule rating of $10,510 are multiplied by and reduced by a 5% safety credit of $(11,036) [($210,203 + $10,510) x (0.05)] to arrive at premiums adjusted by application of schedule rating and safety credit of $209,678 ($210,203 + $10,510 - $11,036. Premiums adjusted by application of schedule rating and safety credit of $209,678 are decreased by a 11.33% premium discount of $23,756 [$209,678 x (0.1133)] and increased by the Pennsylvania Compensation Rating Bureau Fee of $175, a foreign and domestic terrorism surcharge of $3,864, a catastrophe (other than terrorism) surcharge of $2,576 and a 2.42% Pennsylvania Employer Assessment of $4,659 [($209,678 - $23,756 + $175 + $3,864 + $2,576) x 0.0242] to determine pro forma workers' compensation insurance expense of $197,196 ($209,678 - $23,756 + $175 + $3,864 + $2,576 + $4,659). The adjustment to Workers' Compensation Insurance expense of $4,061 is determined by subtracting projected Workers' Compensation Insurance expense during the twelve months ending February 28, 2027, of $193,136 from pro forma workers' compensation insurance expense of $197,196 ($197,196 - $193,136 = $4,061). The adjustment to Account No. 65880000 of $4,061 has been carried forward to Exhibit No. FIII-2, Column 3.

A portion of pro forma workers' compensation insurance expense for twelve months ending February 28, 2027, is capitalized in accordance with Appendix "B" to the Settlement Agreement in the Company's 1987 rate case (Docket R-870769) and is reflected, as a reduction to operating expenses, in Account No. 67580002, Administrative and General Expenses Capitalized, on Exhibit No. FIII-2-49, which I will explain later.

Q. Explain Exhibit No. FIII-2-46.

A. Exhibit No. FIII-2-46 annualizes uncollectible accounts expense for the twelve months ending February 28, 2027, in the amount of $445,458 by applying the two-year average percent of uncollectible accounts actually written off less recoveries of 0.66% to pro forma operating revenues under existing rates for the twelve months ending February 28, 2027, of $67,479,058 (Refer to Exhibit No. FII-2) ($67,479,058 x 0.0066). The adjustment to uncollectible accounts in the amount of $2,068 is determined by subtracting projected uncollectible accounts during the twelve months ending February 28, 2027, in the amount of $443,390 (Refer to Exhibit No. FIII-2-31) from the calculated pro forma uncollectible accounts for ratemaking purposes in the amount of $445,458 ($445,458 - $443,390 = $2,068). The adjustment of $2,068 to Account No. 67070000 has been carried forward to Exhibit No. FIII-2, Column 3.

Q. Explain Exhibit No. FIII-2-47.

A. Exhibit No. FIII-2-47 annualizes the allocations to wastewater for the twelve months ending February 28, 2027, based on the Company's current allocation methodology and pro forma expense adjustments to the accounts that are allocated. Various expenses that are for both the water and wastewater portions of the business are recorded on the water side of the business. At the end of each accounting period, a portion of those allocable expenses are recorded as a reduction to expense on the water side of the business and an addition to expense on the wastewater side of the business.

The allocable portion of indirect labor, indirect fringe benefits and operating expense to wastewater based on the pro forma balances of the accounts to be allocated for the twelve months ending February 28, 2027, is calculated to be $(599,197). The payroll taxes and

fringe benefits on the direct labor recorded on the wastewater side of the business is calculated to be $(276,358). The adjustment of $(13,413) is determined by subtracting the projected allocation to wastewater for the twelve months ended February 28, 2027, of $(862,142) (see Exhibit No. FIII-2-32) by the calculated allocable portion of indirect labor, indirect fringe benefits and operating expense of $(599,197) and calculated payroll taxes and fringe benefits on the direct labor of $(276,358) [$(599,197) + $(276,358) - $(862,142) = $(13,413)]. The adjustment of allocations to wastewater for the twelve months ending February 27, 2027, of $(13,413) as an adjustment to Account No. 67580005 has been carried forward to Exhibit No. FIII-2, Column 3.

Q. Explain Exhibit No. FIII-2-48.

A. Exhibit No. FIII-2-48 annualizes director's fees for the twelve months ending February 28, 2027, based on the Company's current complement of directors, schedule of meetings, and the projected 2026 fee increase. The adjustment to annualize in the amount of $10,711 is determined by subtracting the projected director's fees for the twelve months ending February 28, 2027 (see Exhibit No. FIII-2-33) in the amount of $587,519 from the calculated pro forma director's fees for the twelve months ended February 28, 2027, of $598,230 ($598,230 - $587,519 = $10,711). The annualization adjustment of $10,711 is carried forward to Exhibit No. FIII-2, Column 3. Directors who are also current employees of the Company receive no additional compensation for Board service.

Q. Explain Exhibit No. FIII-2-49.

A. Exhibit No. FIII-2-49 adjusts administrative and general expenses capitalized for the twelve months ending February 28, 2027, in accordance with the Settlement Agreements

under Docket Nos. R-870769 and R-963619 based on pro forma indirect labor, employee benefit costs, property insurance, workers' compensation insurance, and pension expense for the twelve months ending February 28, 2027, and a two-year average capitalization ratio.

A portion of the pay of certain specified supervisory and general office employees is capitalized (referred to as "indirect labor") in addition to capitalized payroll determined directly from employee time records. The Company has updated the specified supervisory and general office employees to reflect the current complement of employee positions. Some employee positions described in the Settlement of the Company's 1987 base rate proceeding no longer exist, and many new employee positions have been created. Please refer to my testimony with regard to Exhibit No. FIII-2-10 for a listing of employee positions capitalized and the allocation ratio for each.

The two-year average general and administrative employees' capitalized ratio is 10.55%. This ratio was applied to pro forma payroll of $2,051,563 for the specified administrative and general employees to determine the pro forma capitalized indirect labor for general and administrative employees of $216,491 ($2,051,563 x 0.1055).

The two-year average distribution employees' capitalized ratio is 17.98%. This ratio was applied to pro forma payroll of $792,356 for the specified distribution employees to determine the pro forma capitalized indirect labor for distribution employees of $142,428 ($792,356 x 0.1798).

The two-year average maintenance and grounds employees' capitalized ratio is 2.55%. This ratio was applied to pro forma payroll of $262,838 for the specified maintenance and grounds employees to determine the pro forma capitalized indirect labor for maintenance and grounds employees of $6,715 ($262,838 x 0.0255).

As further provided in the settlement of the Company's 1987 base rate proceeding at Docket No. R-870769, a portion of payroll taxes, group life and health insurance expense, workers' compensation insurance expense, and property insurance expense will be capitalized.

In addition, as provided in the settlement of the Company's 1996 base rate proceeding at Docket No. R-963619, a portion of pension expense will be capitalized based upon the ratio of capitalized payroll to total payroll.

The two-year average capitalized payroll ratio is 7.30%. This ratio was applied to pro forma group life and health insurance expense, property insurance expense, and pension expense of $2,373,243, $249,143, and $871,454, respectively, to determine the pro forma capitalized employee benefits, property insurance expense, and pension expense of $173,142, $18,176, and $63,578, respectively.

The capitalized payroll ratio of 7.30% used to capitalize these expenses is different than the capitalized ratios used for indirect labor because the calculations are based on different allocation factors as prescribed by the Settlement Agreement. The latter ratio

compares total capitalized payroll to total payroll, while the ratios used for indirect labor concern only a portion of the Company's employees.

The capitalization ratios for workers' compensation and payroll taxes of 1.71% and 7.90%, respectively, are based on a two-year average of the actual workers' compensation insurance premiums and payroll tax rates applied to capitalized payroll. The 1.71% ratio of workers' compensation was applied to pro forma capitalized labor from Exhibit FIII-2-40 (b) of $879,161 to determine capitalized workers' compensation expense of $14,994. The 7.90% ratio of payroll taxes (including FICA, FUTA and SUTA) was applied to pro forma capitalized labor from Exhibit FIII-2-40 (b) of $879,161 to determine capitalized payroll tax expense of $69,493.

Total pro forma capitalized indirect labor, employee benefits, property insurance expense, payroll taxes, and pension expense total $705,017 ($216,491 + $142,428 + $6,715 + $173,142 + $18,176 + $14,994 + $69,493 + $63,578). The adjustment to capitalized indirect labor, employee benefits, property insurance expense, payroll taxes, and pension expense in the amount of $11,991 is determined by subtracting projected capitalized indirect labor, employee benefits, property insurance expenses, payroll taxes, and pension expense for the twelve months ending February 28, 2027, of $693,026 from calculated pro forma capitalized indirect labor, employee benefits, property insurance expense, payroll taxes, and pension expense of $705,017 ($705,017 - $693,026). The adjustment to capitalized indirect labor, employee benefits, property insurance expense, payroll taxes and pension expense in the amount of $11,991 as an adjustment to Account No.

67580002 and Account No. 40801302 has been carried forward to Exhibit No. FIII-2, Column 6 and Exhibit No. FIV-15, Column 6.

Q. Explain Exhibit No. FIII-2-50.

A. Exhibit No. FIII-2-50 projects the annual costs associated with identification of customer-owned service line material in compliance with the Lead and Copper Rule Improvement (LCRI) promulgated by the U.S. Environmental Protection Agency. The Company must identify the materials of all customer-owned service lines to replace all lead service lines within ten years. This requires two-point visual inspection which would require excavation for one of those two points. The Company has estimated it will require costs of at least $150,000 per year over the ten years to identify all unknown customer-owned service lines. The adjustment of $150,000 has been carried forward to Exhibit No. FIII-2, Column 3.

Q. Explain Exhibit No. FIII-2-51.

A. Exhibit No. FIII-2-51 adjusts operating expenses in the amount of $30,150 for additional costs of customer accounting and collecting expenses (excluding uncollectible accounts), purchased power and chemicals resulting from the annualization of the net increase in number of customers served during the twelve months ending February 28, 2027. The historical average ratio of customer accounting and collecting, purchased power and chemical costs to sales of water of 8.5% for the two-year period ended December 31, 2024, was calculated. This ratio was applied to the total operating revenue adjustments in the amount of $354,697 representing pro forma increases from load growth, as calculated on Exhibit Nos. FII-2-34 through FII-2-39, to derive the adjustment of $30,150 ($354,697

x 0.085). The adjustment in the amount of $30,150 for additional costs of customer accounting and collecting, power and chemicals has been carried forward to Exhibit No. FIII-2, Column 3.

Q. Explain Exhibit No. FIII-2-52.

A. Exhibit No. FIII-2-52 projects the annual costs of acoustic leak detection software. The software allows the Company to more accurately identify the source of leaks in its distribution system. The adjustment of $23,900 has been carried forward to Exhibit No. FIII-2, Column 3.

Q. Explain Exhibit No. FIII-2-55.

A. Exhibit No. FIII-2-55 adjusts uncollectible accounts expense based on pro forma revenues under proposed rates and a two-year average ratio of net uncollectible accounts written off to total operating revenues. Pro forma revenues under proposed rates (Refer to Exhibit No. FII-2) of $87,745,202 are multiplied by the two-year average ratio of net write-offs to total operating revenues of 0.66% to determine the pro forma uncollectible accounts expense under proposed rates of $579,243 ($87,745,202 x 0.0066). The adjustment to uncollectible accounts expense in the amount of $133,785 is determined by subtracting pro forma uncollectible accounts expense under existing rates of $445,458 (Refer to Exhibit No. FIII-2-46) from pro forma uncollectible accounts expense under proposed rates of $579,243 ($579,243 - $445,458 = $133,785). The adjustment to uncollectible accounts expense of $133,785 to Account No. 67070000 has been carried forward to Exhibit No. FIII-2, Column 6.

Q. Explain Exhibit No. FIII-11.

A. Exhibit No. FIII-11 provides a schedule, by major components, of Contractual Services, Rate Case Expense and Miscellaneous Expense for the projected twelve months ending February 28, 2027, and December 31, 2025, and the twelve months ended December 31, 2024. Page 2 of Exhibit No. FIII-11 provides a schedule of Contractual Services-Auditing for the twelve months ending February 28, 2027, and December 31, 2025, and the twelve months ended December 31, 2024. Page 3 of Exhibit No. FIII-11 provides a schedule of Contractual Services-Tax for the twelve months ending February 28, 2027, and December 31, 2025, and the twelve months ended December 31, 2024. Page 4 of Exhibit No. FIII-11 provides a schedule, by major components, of Contractual Services-Other Accounting for the twelve months ending February 28, 2027, and December 31, 2025, and the twelve months ended December 31, 2024. Page 5 of Exhibit No. FIII-11 provides a schedule of Contractual Services-Legal for the twelve months ending February 28, 2027, and December 31, 2025, and the twelve months ended December 31, 2024. Page 6 of Exhibit FIII-11 provides a schedule of Contractual Services-Outside Services for the twelve months ending February 28, 2027, and December 31, 2025, and the twelve months ended December 31, 2024. Page 7 of Exhibit No. FIII-11 provides a schedule, by rate case, of Rate Case Expense for the twelve months ending February 28, 2027, and December 31, 2025, and the twelve months ended December 31, 2024. Page 8 of Exhibit No. FIII-11 provides a schedule, by major components, of Miscellaneous Expense for the twelve months ending February 28, 2027, and December 31, 2025, and the twelve months ended December 31, 2024.

Q. Explain Exhibit No. FIII-15.

A. Exhibit No. FIII-15 provides a schedule of pension contributions, SFAS87 pension expense, the amount of SFAS pension expense, which was expensed to O&M, and the amount of SFAS87, which was deferred.

The Company has two defined benefit pension plans (one plan for general and administrative employees, and one plan for union-represented employees). The Company has reflected in its cost of service for ratemaking purposes the cash contributions to its two defined benefit pension plans since the pension plans were established in 1959. The Commission, in its Order at Docket No. R-00027975, dated June 26, 2003, in its Order at Docket No. R-00049165, dated November 9, 2004, in its Order at Docket No. R-00063122, dated September 15, 2006, in its Order at Docket No. R-2008-2023067, dated October 9, 2008, in its Order at Docket No. R-2010-2157140, dated November 4, 2010, in its Order at Docket No. R-2012-2336379, dated February 28, 2014, in its Order at Docket No. R-2018-3000019, dated March 1, 2019 , and in its Order at Docket No. R-2022-3031340 dated March 1, 2023 approved cash contributions plus administrative costs as the basis for the Company's ratemaking claim for pension expense and authorized the Company to defer on its books, the difference between cash contributions and SFAS87 expense, per the full settlement agreements in each case.

The Company believes that it is in the best interest of the plans, their participants, and York Water's customers to make cash contributions to the plans to ensure that the plans are fully funded. The Company is recommending a contribution to the plans to fund the service cost.

Q. Explain Exhibit No. FIII-16.

A. Exhibit No. FIII-16 provides for no SFAS106 expenses to be included in the cost of service for the twelve months ended February 28, 2027. The "pay-as-you-go" expense of $2,000 representing one death benefit paid to the beneficiaries of Company retirees is reflected as part of the fully projected future test year cost of service on Exhibit No. HIII-2-24.

Q. Are you sponsoring any other exhibits regarding the Company's operating expenses?

A. Yes, I am also sponsoring Exhibit Nos. FIII-3, FIII-4, FIII-5, FIII-6, FIII-7, FIII-8, FIII-9, FIII-10, FIII-12. FIII-13, FIII-14, FIII-17, FIII-18, FIII-19, FIII-20, FIII-21, FIII-23, FIII-24, FIII-25, FIII-26, FIII-27, and FIII-28.

Q. Explain Exhibit No. FIV-15.

A. Exhibit No. FIV-15 summarizes projected and pro forma adjustments to operating taxes other than income taxes for the twelve months ending December 31, 2025, and February 28, 2027, for ratemaking purposes and to reflect additional operating taxes other than income taxes resulting from the proposed increase in operating revenues.

Pro forma operating taxes other than income taxes for the twelve months ended December 31, 2024, in the amount of $1,645,548 are shown in Column 1, Page 2 of Exhibit FIV-15. Adjustments to operating taxes other than income taxes of $112,466 reflect the calculation of the projected level of taxes other than income taxes under existing rates for the twelve months ending December 31, 2025. Such adjustments are shown in Column 3, Page 2 of Exhibit No. FIV-15 and are detailed in Exhibit Nos. FIV-

15-1, FIV-15-2, FIV-15-3, FIV-15-4, FIV-15-5, and FIII-2-10. Projected operating taxes other than income taxes for the twelve months ended December 31, 2025, in the amount of $1,758,014 are shown in Column 4, Page 2 of Exhibit FIV-15.

Adjustments to operating taxes other than income taxes of $75,099 reflect the calculation of the Pro Forma level of taxes other than income taxes under existing rates for the twelve months ending December 31, 2025. Such adjustments are shown in Column 6, Page 2 of Exhibit No. FIV-15 and are detailed in Exhibit Nos. FIV-15-6, FIV-15-7, and FIII-2-21. Pro Forma operating taxes other than income taxes for the twelve months ending December 31, 2025, in the amount of $1,833,113 are shown in Column 7, Page 2 of Exhibit No. FIV-15 and are carried forward to Column 1, Page 3 of Exhibit No. FIV-15.

Projected adjustments to operating taxes other than income taxes of $11,328 are shown in Column 3, Page 3 of Exhibit No. FIV-15 and are detailed in Exhibit Nos. FIV-15-8, FIV-15-9, and FIII-2-34. Projected operating taxes other than income taxes for the twelve months ended February 28, 2027, in the amount of $1,844,441 are shown in Column 4, Page 3 of Exhibit FIV-15. Adjustments to operating taxes other than income taxes of $20,533 reflect the calculation of the Pro Forma level of taxes other than income taxes under existing rates for the twelve months ending February 28, 2027. Such adjustments are shown in Column 6, Page 3 of Exhibit No. FIV-15 and are detailed in Exhibit Nos. FIV-15-10, FIV-15-11, and FIII-2-49. Pro forma operating taxes other than income taxes for the twelve months ending February 28, 2027, of $1,864,974 are shown in Column 7, Page 3 of Exhibit No. FIV-15 and are carried forward to Column 1 of Page 4 of Exhibit No. FIV-15.

Adjustments to operating taxes other than income taxes amounting to $137,029 are made to reflect the increased operating taxes other than income taxes that result from the increase in operating revenues under proposed rates. These adjustments are shown in Column 3, Page 4 of Exhibit No. FIV-15 and are detailed in Exhibit No. FIV-15-12. Pro Forma operating taxes other than income taxes under proposed rates for the twelve months ended February 28, 2027, in the amount of $2,002,004 are shown in Column 4, Page 4 of Exhibit FIV-15.

Q. Explain Exhibit No. FIV-15-1.

A. Exhibit No. FIV-15-1 is an adjustment to reflect FICA payroll taxes on projected payroll for twelve months ending December 31, 2025, at the tax rate and wage bases effective January 1, 2025. The January 1, 2025 hospitalization insurance ("HI") component of the FICA tax of 1.45% is applied to taxable projected payroll of $11,328,843 to determine projected HI component of FICA taxes of $164,268 ($11,328,843 x 0.0145 = $164,268). Total projected payroll in the amount of $11,328,843 is reduced by $657,876, which is that portion of projected payroll not subject to old age, survivors, and disability insurance component ("OASDI") of FICA tax to arrive at taxable projected payroll of $10,670,967 ($11,328,843 - $657,876 = $10,670,967). The January 1, 2025 OASDI component of FICA tax rate of 6.2% is applied to the taxable projected payroll of $10,670,967 to determine projected OASDI component of FICA taxes of $661,600 ($10,670,967 x 0.062). The HI component in the amount of $164,268 and the OASDI component in the amount of $661,600 FICA taxes are totaled to determine projected FICA taxes in the amount of $825,868 ($164,268 + $661,600 = $825,868). The adjustment to FICA taxes,

in the amount of $30,321, is determined by subtracting the pro forma FICA taxes for twelve months ended December 31, 2024, of $795,547 (Refer to Exhibit No. HIV-15-1) from the calculated projected FICA taxes of $825,868 ($825,868 - $795,547 = $30,321). The FICA adjustment, in the amount of $30,321, has been carried forward to Exhibit No. FIV-15, Page 2, Column 3.

I note that a portion of projected FICA taxes for the twelve months ending December 31, 2025, was capitalized and is reflected, as a reduction to operating expenses, in Account 40801302, Miscellaneous Taxes Other Than Income Taxes on Exhibit No. FIII-2-10.

Q. Explain Exhibit No. FIV-15-2.

A. Exhibit No. FIV-15-2 presents an adjustment to reflect Federal unemployment tax on projected payroll for twelve months ended December 31, 2025, at the tax rate and wage base effective January 1, 2025. Total projected payroll in the amount of $11,328,843 is reduced by $10,259,323, which is that portion of projected payroll that exceeds the 2025 taxable wage base per employee of $7,000, to arrive at taxable projected payroll of $1,069,520 ($11,328,843 - $10,259,323 = $10,069,520). The 2025 Federal unemployment tax rate of 0.6% is applied to the taxable projected payroll of $1,069,520 to determine projected Federal unemployment tax of $6,417. The adjustment to Federal unemployment tax in the amount of $672 is determined by subtracting the pro forma test year Federal unemployment tax of $5,745 from the calculated projected Federal unemployment tax of $6,417 ($6,417 - $5,745 = $672). The Federal unemployment tax adjustment in the amount of $672 has been carried forward to Exhibit No. FIV-15, Column 3.

I note that a portion of projected Federal unemployment tax for the twelve months ended December 31, 2025, was capitalized and is reflected, as a reduction to operating expenses, in Account No. 40801302, Miscellaneous Taxes Other Than Income Taxes on Exhibit No. FIII-2-10.

Q. Explain Exhibit No. FIV-15-3.

A. Exhibit No. FIV-15-3 presents an adjustment to reflect Pennsylvania unemployment tax on projected payroll for twelve months ended December 31, 2025, at the tax rate and wage base effective January 1, 2025. Total projected payroll in the amount of $11,328,843 is reduced by $9,809,343 which is that portion of projected payroll expense that exceeds the 2025 taxable wage base per employee of $10,000, to arrive at taxable projected payroll of $1,519,501 ($11,328,843 - $9,809,343 = $1,519,501). The 2025 Pennsylvania unemployment tax rate of 1.5282% is applied to the taxable projected payroll of $1,519,501 to determine projected Pennsylvania unemployment tax of $23,221. The adjustment to Pennsylvania unemployment tax in the amount of $2,445 is determined by subtracting the pro forma test year Pennsylvania unemployment tax of $20,776 from the calculated projected Pennsylvania unemployment tax of $23,221 ($23,221 - $20,776 = $2,445). The Pennsylvania unemployment tax adjustment, in the amount of $2,445, has been carried forward to Exhibit No. FIV-15, Column 3.

I note that a portion of projected Pennsylvania unemployment tax for the twelve months ended December 31, 2025, was capitalized and is reflected, as a reduction to operating

expenses, in Account No. 40801302, Miscellaneous Taxes Other Than Income Taxes on Exhibit No. FIII-2-10.

Q. Explain Exhibit No. FIV-15-4.

A. FIV-15-4 is an adjustment to reflect the Pennsylvania Public Utility Realty Tax for the twelve months ending December 31, 2025, based on the most recent state taxable value, millage rate and transitional credit adjustments. The adjustment in the amount of $81,148 is determined by subtracting the pro forma realty taxes for the twelve months ended December 31, 2024, of $387,834 (Refer to Exhibit No. HIV-15 Page 2) from the calculated projected amount of $387,834 [$387,834 - $306,686 = $81,148]. The adjustment in the amount of $81,148 has been carried forward to Exhibit No. FIV-15, Page 2, Column 3.

Q. Explain Exhibit No. FIV-15-5.

A. Exhibit No. FIV-15-5 is an adjustment to reflect the Commission's General Assessment, the Consumer Advocate's Assessment, the Small Business Advocate's Assessment, and the Damage Prevention Control Assessment, based on projected operating revenues under existing rates for twelve months ending December 31, 2025, and the 2024-2025 assessment factors. The currently-effective combined 2024-2025 assessment rate of 0.676148% for the Commission's General Assessment, the Consumer Advocate's Assessment, the Small Business Advocate's Assessment, and the Damage Prevention Control Assessment is applied to projected operating revenues at existing rates for twelve months ending December 31, 2025, in the amount of $64,562,296. The projected operating revenues at existing rates for combined assessment purposes is determined by

removing sales for resale customers included on Exhibit No. FII-12 and Exhibit No. FII-13 and priced out bulk truck sales included on Exhibit No. HII-4 from total projected operating revenues at existing rates on Exhibit No. FII-2, Page 2, Column 4. Sales for resale customers and priced out bulk truck sales are not included in the combined assessment calculation. The currently-effective combined 2024-2025 assessment rate of 0.676148% is applied to the projected operating revenues at existing rates for combined assessment purposes for the twelve months ended December 31, 2025, in the amount of $50,446,207 to determine the projected combined assessment under existing rates for twelve months ended December 31, 2025, in the amount of $436,537 ($64,562,296 x 0.00676148). The adjustment in the amount of $105 is determined by subtracting the pro forma assessments for the twelve months ended December 31, 2024, of $436,432 (Refer to Exhibit No. HIV-15-4) from the calculated projected amount of $436,537 [$436,537 - $436,432 = $105]. The adjustment in the amount of $105 has been carried forward to Exhibit No. FIV-15, Page 2, Column 3.

Q. Explain Exhibit No. FIV-15-6.

A. Exhibit No. FIV-15-6 is an adjustment to reflect FICA payroll taxes on pro forma payroll for twelve months ending December 31, 2025, at the tax rate and wage bases effective January 1, 2025. The January 1, 2025 HI component of the FICA tax of 1.45% is applied to taxable pro forma payroll of $12,397,865 to determine projected HI component of FICA taxes of $179,769 ($12,397,865 x 0.0145 = $179,769). Total pro forma payroll in the amount of $12,397,865 is reduced by $719,665, which is that portion of pro forma payroll not subject to OASDI of FICA tax to arrive at taxable pro forma payroll of $11,678,200 ($12,397,865 - $719,665 = $11,678,200). The January 1, 2025 OASDI

component of FICA tax rate of 6.2% is applied to the taxable pro forma payroll of $11,678,200 to determine pro forma OASDI component of FICA taxes of $724,048 ($11,678,200 x 0.062). The HI component in the amount of $179,769 and the OASDI component in the amount of $724,048 of FICA taxes are totaled to determine projected FICA taxes in the amount of $903,817 ($179,769 + $724,048 = $903,8173). The adjustment to FICA taxes in the amount of $77,949 is determined by subtracting the projected FICA taxes for twelve months ending December 31, 2025, of $825,868 (Refer to Exhibit No. FIV-15-1) from the calculated pro forma FICA taxes of $903,817 ($903,817 - $825,868 = $77,949). The FICA adjustment, in the amount of $77,949, has been carried forward to Exhibit No. FIV-15, Page 2, Column 6.

I note that a portion of pro forma FICA taxes for the twelve months ending December 31, 2025, was capitalized and is reflected, as a reduction to operating expenses, in Account 40801302, Miscellaneous Taxes Other Than Income Taxes Transferred on Exhibit No. FIII-2-21.

Q. Explain Exhibit No. FIV-15-7.

A. Exhibit No. FIV-15-7 is an adjustment to reflect the Commission's General Assessment, the Consumer Advocate's Assessment, the Small Business Advocate's Assessment, and the Damage Prevention Control Assessment based on Pro Forma operating revenues under existing rates for twelve months ending December 31, 2025, and the 2024-2025 assessment factors. The currently-effective combined 2024-2025 assessment rate of 0.676148% for the Commission's General Assessment, the Consumer Advocate's Assessment, the Small Business Advocate's Assessment, and the Damage Prevention

Control Assessment is applied to Pro Forma operating revenues at existing rates for twelve months ending December 31, 2025, in the amount of $64,993,639. The pro forma operating revenues at existing rates for combined assessment purposes is determined by removing sales for resale customers included on Exhibit No. FII-12 and Exhibit No. FII-13 and priced out bulk truck sales included on Exhibit No. HII-4 from total pro forma operating revenues at existing rates on Exhibit No. FII-2, Page 2, Column 4. Sales for resale customers and priced out bulk truck sales are not included in the combined assessment calculation. The currently-effective combined 2024-2025 assessment rate of 0.676148% is applied to the pro forma operating revenues at existing rates for combined assessment purposes for the twelve months ended December 31, 2025, in the amount of $64,993,639 to determine the pro forma combined assessment under existing rates for twelve months ended December 31, 2025, in the amount of $439,453 ($64,993,639 x 0.00676148). The adjustment in the amount of $2,917 is determined by subtracting the projected year assessments for the twelve months ended December 31, 2025, of $436,537 (Refer to Exhibit No. FIV-15-5) from the calculated pro forma amount of $439,453 ($439,453 - $436,537 = $2,917). The adjustment in the amount of $2,917 has been carried forward to Exhibit No. FIV-15, Page 2, Column 6.

Q. Explain Exhibit No. FIV-15-8.

A. Exhibit No. FIV-15-8 is an adjustment to reflect FICA payroll taxes on projected payroll for twelve months ending February 28, 2027, at the tax rate and wage bases effective January 1, 2025. The January 1, 2025 HI component of the FICA tax of 1.45% is applied to taxable pro forma payroll of $12,561,750 to determine projected HI component of FICA taxes of $182,145 ($12,561,750 x 0.0145 = $182,145). Total projected payroll in

the amount of $12,561,750 is reduced by $742,955, which is that portion of projected payroll not subject to OASDI of FICA tax to arrive at taxable projected payroll of $11,818,795 ($12,561,750 - $742,955 = $11,818,795). The January 1, 2025 OASDI component of FICA tax rate of 6.2% is applied to the taxable projected payroll of $11,818,795 to determine pro forma OASDI component of FICA taxes of $732,765 ($11,818,795 x 0.062). The HI component in the amount of $182,145 and the OASDI component in the amount of $732,765 of FICA taxes are totaled to determine projected FICA taxes in the amount of $914,911 ($182,145 + $732,765 = $914,911). The adjustment to FICA taxes in the amount of $11,093 is determined by subtracting the Pro Forma FICA taxes for twelve months ending December 31, 2025, of $903,817 (Refer to Exhibit No. FIV-15-6) from the calculated projected FICA taxes of $914,911 ($914,911 - $903,817 = $11,093). The FICA adjustment, in the amount of $11,093, has been carried forward to Exhibit No. FIV-15, Page 3, Column 3.

I note that a portion of projected FICA taxes for the twelve months ending February 28, 2027, was capitalized and is reflected, as a reduction to operating expenses, in Account 40801302, Miscellaneous Taxes Other Than Income Taxes Transferred on Exhibit No. FIII-2-34.

Q. Explain Exhibit No. FIV-15-9.

A. Exhibit No. FIV-15-9 is an adjustment to reflect the Commission's General Assessment, the Consumer Advocate's Assessment, the Small Business Advocate's Assessment, and the Damage Prevention Control Assessment based on projected operating revenues under existing rates for twelve months ending February 28, 2027, and the 2024-2025

assessment factors. The currently-effective combined 2024-2025 assessment rate of 0.676148% for the Commission's General Assessment, the Consumer Advocate's Assessment, the Small Business Advocate's Assessment, and the Damage Prevention Control Assessment is applied to projected operating revenues at existing rates for twelve months ending February 28, 2027, in the amount of $65,159,189. The projected operating revenues at existing rates for combined assessment purposes is determined by removing sales for resale customers included on Exhibit No. FII-12 and Exhibit No. FII-13 and priced out bulk truck sales included on Exhibit No. HII-4 from total projected operating revenues at existing rates on Exhibit No. FII-2, Page 2, Column 4. Sales for resale customers and priced out bulk truck sales are not included in the combined assessment calculation. The currently-effective combined 2024-2025 assessment rate of 0.676148% is applied to the projected operating revenues at existing rates for combined assessment purposes for the twelve months ended February 28, 2027, in the amount of $65,159,189 to determine the projected combined assessment under existing rates for twelve months ended February 28, 2027, in the amount of $440,573 ($65,159,189 x 0.00676148). The adjustment in the amount of $1,119 is determined by subtracting the Pro Forma year assessments for the twelve months ending December 31, 2025, of $439,453 (Refer to Exhibit No. FIV-15-7) from the calculated projected amount of $440,573 ($440,573 - $439,453 = $1,119). The adjustment in the amount of $1,119 has been carried forward to Exhibit No. FIV-15, Page 3, Column 3.

Q. Explain Exhibit No. FIV-15-10.

A. Exhibit No. FIV-15-10 is an adjustment to reflect FICA payroll taxes on Pro Forma payroll for twelve months ending February 28, 2027, at the tax rate and wage bases

effective January 1, 2025. The January 1, 2025 HI component of the FICA tax of 1.45% is applied to taxable Pro Forma payroll of $12,881,655 to determine projected HI component of FICA taxes of $186,784 ($12,881,655 x 0.0145 = $186,784). Total Pro Forma payroll in the amount of $12,881,655 is reduced by $812,825, which is that portion of Pro Forma payroll not subject to OASDI of FICA tax to arrive at taxable Pro Forma payroll of $12,068,830 ($12,881,655 - $812,825 = $12,068,830). The January 1, 2025 OASDI component of FICA tax rate of 6.2% is applied to the taxable Pro Forma payroll subject to OASDI of $12,068,830 to determine pro forma OASDI component of FICA taxes of $748,267 ($12,068,830 x 0.062). The HI component in the amount of $186,784 and the OASDI component in the amount of $748,267 of FICA taxes are totaled to determine Pro Forma FICA taxes in the amount of $935,051 ($186,784 + $748,267 = $935,051). The adjustment to FICA taxes, in the amount of $20,141, is determined by subtracting the projected FICA taxes for twelve months ending February 28, 2027, of $914,911 (Refer to Exhibit No. FIV-15-6) from the calculated Pro Forma FICA taxes of $935,051 ($935,051 - $914,911 = $20,141). The FICA adjustment in the amount of $20,141 has been carried forward to Exhibit No. FIV-15, Page 3, Column 6.

I note that a portion of Pro Forma FICA taxes for the twelve months ending February 28, 2027, was capitalized and is reflected, as a reduction to operating expenses, in Account 40801302, Miscellaneous Taxes Other Than Income Taxes Transferred on Exhibit No. FIII-2-49.

Q. Explain Exhibit No. FIV-15-11.

A. Exhibit No. FIV-15-11 is an adjustment to reflect the Commission's General Assessment, the Consumer Advocate's Assessment, the Small Business Advocate's Assessment, and the Damage Prevention Control Assessment based on Pro Forma operating revenues under existing rates for twelve months ending February 28, 2027, and the 2024-2025 assessment factors. The currently-effective combined 2024-2025 assessment rate of 0.676148% for the Commission's General Assessment, the Consumer Advocate's Assessment, the Small Business Advocate's Assessment, and the Damage Prevention Control Assessment is applied to Pro Forma operating revenues at existing rates for twelve months ending February 28, 2027, in the amount of $65,472,486. The pro forma operating revenues at existing rates for combined assessment purposes is determined by removing sales for resale customers included on Exhibit No. FII-12 and Exhibit No. FII-13 and priced out bulk truck sales included on Exhibit No. HII-4 from total pro forma operating revenues at existing rates on Exhibit No. FII-2, Page 2, Column 4. Sales for resale customers and priced out bulk truck sales are not included in the combined assessment calculation. The currently-effective combined 2024-2025 assessment rate of 0.676148% is applied to the pro forma operating revenues at existing rates for combined assessment purposes for the twelve months ended February 28, 2027, in the amount of $65,472,486 to determine the pro forma combined assessment under existing rates for twelve months ended February 28, 2027, in the amount of $442,691 ($65,472,486 x 0.00676148). The adjustment in the amount of $2,118 is determined by subtracting the projected year assessments for the twelve months ending February 28, 2027, of $440,573 (Refer to Exhibit No. FIV-15-9) from the calculated Pro Forma amount of $442,691 ($442,691 - $440,573 = $2,118). The adjustment in the amount of $2,118 has been carried forward to Exhibit No. FIV-15, Page 3, Column 6.

Q. Explain Exhibit No. FIV-15-12.

A. Exhibit No. FIV-15-12 is an adjustment to reflect the Commission's General Assessment, the Consumer Advocate's Assessment, the Small Business Advocate's Assessment, and the Damage Prevention Control Assessment based on Pro Forma operating revenues under proposed rates for twelve months ending February 28, 2027, and the 2024-2025 assessment factors. The currently-effective combined 2024-2025 assessment rate of 0.676148% for the Commission's General Assessment, the Consumer Advocate's Assessment, the Small Business Advocate's Assessment, and the Damage Prevention Control Assessment is applied to Pro Forma operating revenues under proposed rates for twelve months ending February 28, 2027, in the amount of $85,738,630. The pro forma operating revenues at proposed rates for combined assessment purposes is determined by removing sales for resale customers included on Exhibit No. FII-12 and Exhibit No. FII-13 and priced out bulk truck sales included on Exhibit No. HII-4 from total pro forma operating revenues at proposed rates on Exhibit No. FII-2, Page 2, Column 4. Sales for resale customers and priced out bulk truck sales are not included in the combined assessment calculation. The currently-effective combined 2024-2025 assessment rate of 0.676148% is applied to the pro forma operating revenues at proposed rates for combined assessment purposes for the twelve months ended February 28, 2027, in the amount of $85,738,630 to determine the pro forma combined assessment under proposed rates for twelve months ended February 28, 2027, in the amount of $579,720 ($85,738,630 x 0.00676148). The adjustment in the amount of $137,029 is determined by subtracting the pro forma year assessments for the twelve months ending February 28, 2027, of $442,691 (Refer to Exhibit No. FIV-15-11) from the calculated Pro Forma amount of $579,720

($579,720 - $442,691 = $137,029). The adjustment in the amount of $137,029 has been carried forward to Exhibit No. FIV-15, Page 4, Column 3.

Q. Are you sponsoring any other exhibits regarding the Company's taxes other than income taxes?

A. Yes, I am also sponsoring Exhibit Nos. FIV-2 and FIV-12.

Q. Explain Exhibit No. FIV-5.

A. Exhibit No. FIV-5 provides a schedule of deferred investment tax credits as of February 28, 2027. In 1972, the Company timely elected the special rule for ratable flow-through of investment tax credits under former Section 46(f)(2) (at that time Section 46(e)(2)) of the Internal Revenue Code, which requires that the Federal investment tax credits be flowed through to ratepayers as a reduction to federal income taxes ratably over the depreciable life of the property. The Company adopted a fifty-year amortization period for Federal investment tax credits to meet the requirements of former Section 46(f)(2) of the Internal Revenue Code.

Because the Company timely elected in 1972 the special rule for ratable flow-through of Federal investment tax credits under former Section 46(f)(2) (at that time Section 46(e)(2)) of the Internal Revenue Code, the only reduction that may be made to the Company's cost of service, with respect to Federal investment tax credits generated in calendar year 1972 and thereafter, is to amortize the Federal investment tax credits ratably over the life of the property. Under the special rule for ratable flow-through, the

rate base of the utility cannot be reduced by any portion of deferred Federal investment tax credits.

Q. Explain Exhibit No. FIV-17.

A. Exhibit No. FIV-17 summarizes adjustments to operating income taxes for the twelve months ending February 28, 2027, for ratemaking purposes and to reflect additional operating income taxes resulting from the proposed increase in operating revenues.

Pro forma operating income taxes for the twelve months ended December 31, 2024, in the amount of $(120,559) are shown in Column 1 of Page 2 of Exhibit FIV-17. Projected adjustments to operating income taxes of $(1,249,849) are shown in Column 3 of Page 2 of Exhibit No. FIV-17 and are detailed in Exhibit Nos. FIV-17-1 through FIV-17-4, which I will explain later. Pro forma adjustments to operating income taxes of $(159,306) are shown in Column 6 of Page 2 of Exhibit No. FIV-17 and are detailed in Exhibit No. FIV-17-5, which I will explain later. Pro forma operating income taxes for the twelve months ending December 31, 2025, in the amount of $(1,529,715) are shown in Column 7 of Page 2 of Exhibit No. FIV-17 and are carried forward to Column 1 of Page 3 of Exhibit No. FIV-17. Projected adjustments to operating income taxes of $(198,995) are shown in Column 3 of Page 3 of Exhibit No. FIV-17 and are detailed in Exhibit Nos. FIV-17-6 through FIV-17-9, which I will explain later. Projected operating income taxes for the twelve months ending February 28, 2027, in the amount of $(1,728,710) are shown in Column 4 of Page 3 of Exhibit No. FIV-17 and are carried forward to Column 1 of Page 4 of Exhibit No. FIV-17. Pro forma adjustments to operating income taxes of $(102,412) are shown in Column 3 of Page 4 of Exhibit No.

FIV-17 and are detailed in Exhibit No. FIV-17-10, which I will explain later. Adjustments to operating income taxes amounting to $5,394,500 are made to reflect the increased operating income taxes that will result from the increase in operating revenues under proposed rates and these adjustments are shown in Column 6 of Page 4 of Exhibit No. FIV-17 and are detailed in Exhibit No. FIV-17-12, which I will explain later.

Q. Explain Exhibit No. FIV-17-1.

A. Exhibit No. FIV-17-1 is an annualized amortization of Federal investment tax credits for the twelve months ended December 31, 2025. The Tax Reform Act of 1986 repealed the investment tax credit provisions effective December 31, 1985. The investment tax credits for 1986 through 2025 are claimed under the transitional property provisions of TRA-86.

Federal investment tax credits as of December 31, 2025, generated during the period 1972 through 2025 are shown on Column 2 of Exhibit No. FIV-17-1. The Company adopted a fifty-year amortization period for Federal investment tax credits to meet the requirements of former Section 46(f)(2) of the Internal Revenue Code. The pro forma annual amortization of Federal investment tax credits in the amount of $(38,374) shown in Column 4 of Exhibit No. FIV-17-1 is determined by dividing the Federal investment tax credits generated, shown in Column 2, by the fifty-year amortization period shown in Column 3.

In 1972, the Company timely elected the special rule for ratable flow-through of investment tax credits under former Section 46(f)(2) (at that time Section 46(e)(2)) of the Internal Revenue Code which requires that Federal investment tax credits be flowed

through the ratepayers as a reduction to Federal income taxes ratably over the depreciable life of the property. An adjustment of the annual amortization of Federal investment tax credits in the amount of $(65) is determined by subtracting the pro forma amortization of Federal investment tax credits for the period ended December 31, 2024, of $(38,309) (Refer to Exhibit No. HIV-17-1) from the calculated pro forma annual amortization of Federal investment tax credits in the amount of $(38,374), shown in Column 4 [$(38,374) - $(38,309) = $(65)]. The adjustment of the annual amortization of Federal investment tax credits in the amount of $(65) has been carried forward to Exhibit FIV-17, Page 2, Column 3.
