Re: Petition of Columbia Water Company for Approval of a Lead Service Line Replacement Program, Related Tariff Changes, Modification of Long-Term Infrastructure Improvement Plan, and Waiver of Termination Regulations; Docket Nos. P-2022-3034702 and P-2023-3041845; **LEAD SERVICE LINE REPLACEMENT PLAN AND MODIFIED LONG-TERM INFRASTRUCTURE IMPROVEMENT PLAN COMPLIANCE FILING**

Dear Secretary Homsher:

Pursuant to Ordering Paragraph 3 of the Commission's October 9, 2025 Order in this proceeding, attached for filing is Columbia Water Company's: (1) Lead Service Line Replacement Plan including appendices and a current pdf version of the service line inventory; and (2) Modified Long-Term Infrastructure Improvement Plan. Please note the excel sheets for the inventory will be uploaded to the PUC SharePoint at these docket numbers.

If you have questions regarding this filing, please contact me.

Very truly yours,

/s/ Whitney E. Snyder

COLUMBIA WATER COMPANY LEAD SERVICE LINE REPLACEMENT PLAN

Definitions

Refer to the tariff for definitions.

1.0 – SERVICE LINE INVENTORY

Columbia Water Company ("CWC") has prepared its Service Line Inventory. It complies with the current United States Environmental Protection Agency ("USEPA") and Pennsylvania Department of Environmental Protection ("PADEP") guidelines. The Service Line Inventory will be updated at a minimum annually, or as additional information becomes available. If CWC purchases any water distribution system in the future, the Service Line Inventory will be updated to include the acquired system's information and meet the deadlines set forth by the Public Utility Commission ("PUC").

The Service Line Inventory will comply with the timing and direction of the USEPA regulations as enforced by the PADEP, inclusive of future changes to those regulations as may be amended from time to time. The Service Line Inventory for CWC identifies material types on both the company owned and customer owned sides of the service lines. It can be sorted by material type. All discovered lead components have been detailed.

CWC plans to identify, at a minimum, a cumulative average of 10.0% of the initial unknown service materials annually by means of utilizing existing records, modeling, statistical analysis, and mechanical excavation. There are no assumed service line materials in the Service Line Inventory.

See appendix L for the Service Line Inventory Legend and Instructions.

Incorporating the Inventory into the GIS System

CWC is in the process of incorporating the Service Line Inventory into its GIS system. Once the Service Line Inventory is on the GIS, the Service Line Inventory can be updated in real time.

2.0 – PLANNING AND REPLACEMENTS

Annual Projections

CWC estimates it can replace up to approximately 50 lead service lines per year, including 25 Company-owned lead service lines and 25 Customer-owned lead service lines. This projection was determined by estimating the total number of lead service lines to be less than 400. After all existing records have been inventoried, CWC will review this annual projection and adjust it as

necessary. The annual cap for customer-owned lead service line replacements ("LSLR") is 25 customer-owned lead service lines or $125,000, whichever is less.

Replacing Lead Service Lines in Conjunction with Old Main Replacements

These replacements will be planned. Record-reviews of old age mains within the oldest parts of the distribution system will be analyzed to determine which water mains in the distribution system should be replaced. Prior to choosing a target area, our distribution crew will review records and/or physically inspect a portion of the service lines within a proposed area to gauge the likelihood of lead within that area. Coordination with municipalities will take place to minimize costs and minimize impacts on roads and neighborhoods.

Once the LSLR Project Areas are determined, the projects will be posted on the CWC website at least 6 months in advance of the work being done. Prior to the work being initiated, CWC staff will contact customers within an LSLR Project Area at least four times over the six-month period once an LSLR Project Area has been identified, or until the customer responds to the Company, whichever is sooner, to determine whether there are customer-owned lead service lines and to verify the presence of the customer-owned lead service lines. Customers will initially receive a phone call to set up an appointment for an interior inspection of the service line. Door hangers and/or a mailed letter explaining the health effects of lead and documentation explaining the service line program will be used if the customer cannot be contacted via telephone.

Replacing Lead Service Lines Discovered by Mechanical Excavation

Areas with a higher likelihood of having lead service lines will be prioritized for these projects. CWC will physically excavate the service lines to determine material types. If a service line is determined to be lead, coordination will occur with the customer(s) and the property owner to have the service line replaced.

Replacing Customer-Owned Lead Service Lines Discovered Inside the Building

CWC will reach out to the customers with lead or unknown service lines. These customers will receive documentation describing the health effects related to lead. See appendix A for this information. They will be provided with information explaining how to determine their own service line material and what to do if they believe their service line material is lead; See appendix B for related documentation. CWC staff will be checking and documenting service line material in conjunction with meter changes. Customers who discover a lead service line may call and schedule to have their service line replaced. CWC will schedule to replace customer-owned lead service lines in accordance with the tariff. If the company side is lead, it will be replaced at the same time with the customer side. These replacements will occur as discovered.

Emergency Replacements

If a lead service line is leaking or otherwise defective at the time it is discovered, CWC will replace the lead service line in accordance with the tariff. The distribution staff will maintain the proper equipment and tools necessary for emergency service line replacements. If a lead service line is

discovered during an emergency but isn't leaking, the replacement of the line will be scheduled for replacement at a later date.

Prioritization of Lead Service Line Replacements

Determination of LSLR projects will be prioritized based on targeted sensitive populations as defined by the USEPA and PADEP, which includes areas with elevated levels of lead in tap water, areas with high concentrations of lead service lines, and/or areas of the distribution system which have elevated corrosion rates. These areas are more specifically found on houses built prior to 1950 with water mains older than 1970 within Columbia Borough or Marietta Borough.

A list of sensitive populations has also been developed to determine the service line materials. The list includes schools, nursing homes, large apartment buildings, churches, and industries. These service lines have been or will be detailed as sensitive populations in the Service Line Inventory. Homes with multiple meters and multiple family residents will also be prioritized to determine service line material.

Disposal of Lead

Lead removed from any project will be disposed of at an appropriate facility to ensure proper disposal of all lead. Scrap receipts will be kept on file. The proceeds from the recycling efforts will be added to our operating revenue. The customer will not have any right to the proceeds of a recycled lead service line.

Coordination with the Property Owner and Customer(s)

When a lead service line is discovered at a property, CWC will contact the customer(s) and property owner to let them know of the discovery. Customers will be given information explaining the health effects of lead and what they should do to prevent lead in their water. See appendix A for the documentation.

CWC staff will then let the customer(s) and property owner know how to schedule to have their service line replaced and when the scheduled replacement is to occur.

Prior to replacing the property-owner's portion of a lead service line, an agreement between CWC and the property-owner, or representative of the property-owner, must be signed ("Property Owner Agreement"). See appendix C. These forms will be kept on file.

When the customer-owned LSL crosses one (or more than one) property to access another, the Company will attempt to obtain approval from all property owners to allow the work necessary to replace the Customer-Owned LSL and evaluate solutions available to install conforming service lines. If the Company is unable to obtain the neighboring property owner or owners' consent, and there is no other viable and economic solution (to be determined in the Company's sole discretion) such as installing conforming service lines, the Company will commence procedures to terminate service to the neighboring property owner or owners' property as set forth in the following section of this LSLR Plan.

Refusal of Lead Service Line Replacement

If a customer or property owner refuses to grant permission to CWC to replace the lead service line or refuses to have it replaced, Columbia Water will (1) provide the customer and property owner, if the customer is not the property owner, with a complete disclosure of the known health hazards from the continued use of a LSL, see Appendix A of the LSLR Plan, (2) inform the customer or property owner, if the customer is not the property owner, that refusal or failure to accept will require replacement of the customer-owned LSL, at the customer or property owner's expense, within 1 year from LSLR project commencement for the customer or property owner, if the customer is not the property owner, to be eligible for reimbursement; and (3) communicate to the customer and property owner, if the customer is not the property owner, that failure to allow Columbia Water to complete the LSLR or to replace the customer-owned LSL concurrent with the replacing the Company-owned LSL will lead to termination of water service under the provisions of Columbia Water's tariff.

If the customer or property owner, if the customer is not the property owner, still refuses replacement of the customer-owned LSL, the Company will require the customer or property owner, if the customer is not the property owner, to sign a form documenting their refusal. See Appendix N of the LSLR Plan. If the customer or property owner refuses or fails to sign the refusal form, the Company will make a record of and document the customer's refusal.

The Company will then schedule to replace its portion of the Company-owned LSL and notify the customer in writing of the partial LSLR no later than ten days prior to the scheduled replacement and terminate water service at that location the day prior to replacing the Company-owned LSL. Columbia Water will not connect an Applicant to water service where a property owner previously refused or failed to accept the utility's offer of a LSLR until the Applicant verifies that the replacement of a customer-owned LSL by providing a paid invoice from a licensed contractor or notarized statement from a licensed contractor attesting to completion of the LSLR.

The Company will offer a new customer applying for water service in a household that previously refused a LSLR replacement the option to have CWC replace the customer portion of the LSL to reestablish service. Prior to offering the applicant an LSLR, the Company will verify that the applicant owns or will own the property for which service is requested.

Non-Owner Occupied Premises

The Company may stand in the shoes of the property owner and is authorized to replace a Customer-Owned LSL when (1) the Company has offered to replace at no direct cost to the property owner a Customer-Owned LSL, (2) the property is not occupied by the legal owner of the property, and (3) the Company has made attempts to obtain authorization for the Customer LSLR pursuant to this Tariff and the LSLR Plan and (a) the legal owner cannot be identified, (b) the legal owner cannot be located, or (c) the Company has notified the legal owner but the owner has never responded.

In such instances, and when, in the sole discretion of the Company, replacing the customer-owned LSL and preventing the termination of water service would be reasonable and in the public interest,

the Company may proceed to make the replacement without obtaining authorization from the property owner. In any such instance of replacement, the Company, and any person associated with the Company, including but not limited to employees, agents, board members and executives, are released and held harmless from any and all claims, causes of action, damages or losses, of any nature, whatsoever with respect to the work performed by the Company or its contractors, and shall not be otherwise liable for any claim asserted by any person, including the property owner, as a result of the LSLR except to the extent otherwise authorized by the Company's Tariff.

If, prior to completing the LSLR, a property owner expressly, in writing, refuses to allow the replacement of the customer-owned LSL, the Company will not proceed with the replacement and will proceed with termination procedures as specified in the above section of the LSLR Plan. The Company also retains discretion to refuse to replace a customer-owned LSL in circumstances where the Company's employees or contractors may be placed in a dangerous situation in attempting to do the replacement.

Warranty

Upon completion of an LSLR by the Company or a contractor at the Company's request, a Completion-Agreement Form must be signed by the CWC and the property-owner, or representative of the property-owner. See appendix D. From the date of the Completion Agreement Form, the Company will provide a two-year warranty for materials and workmanship of the replaced customer-owned portion of the Service Line. This warranty shall cover repairs conducted by the Company or a contractor at the Company's request of the replaced customer-owned portion of the Service Line up to $2,500 per customer, including restoration of surfaces consistent with this LSLR Plan, so long as the customer allows access to the property for repairs. Only material defects and incomplete installation methods are covered by the warranty. The warranty does not cover, among other things, damage caused by natural disasters, acts of God, fires, terrorism, excavation activities, acts of sabotage, or deliberate damage. The Company shall have no liability for any damages not covered by the warranty.

LSLR Routine Procedure and Restoration

Columbia Water intends to replace LSLs using existing routes through a combination of pipe splitting and/or pipe pulling. This approach removes or displaces existing pipe while simultaneously replacing it with a new pipe and is the preferred method under normal circumstances. Columbia Water may also utilize guided boring to install new pipe along a different route or using open trench excavation to remove replace the pipe. The appropriate replacement technique will depend on a combination of many site-specific characteristics, including, but not limited to, time constraints, soil characteristics, depth to ground water or rock, depth of road foundation, condition of the service line, proximity of other utility services (e.g., electric, gas, cable, sewer, storm water), site conditions (e.g., access, parking, paving, landscaping, overhead obstructions), pipe conditions (e.g., length of pipe, pipe diameter and wall thickness, bury depth, configuration, and repair history, and conditions inside the home like a finished basement with limited access to the water meter and plumbing. All new pipe installation will be copper or plastic.

See also appendix E for the LSLR Routine Procedures. These procedures will be publicly available at the main office and on the CWC website. CWC will restore roadways and public sidewalks, backfill any trenches excavated as part of the replacement process and will fill and seal any wall or floor penetrations in the private home. No other restoration will be conducted for Lead Service Line Replacements. The Company will not replace any landscaping, interior finishes, paving, seeding, or walkways. All restoration costs shall be borne by the Customer or property owner, if the Customer is not the property owner.

Risk Mitigation Measures

All customers and property owners with an LSLR will receive documentation prior to work being initiated explaining the health effects of lead and information on flushing their interior plumbing. See appendix F for this documentation. The Company will provide customer(s) affected by an LSLR with a pitcher filter, six months of replacement cartridges, and use instructions approximately thirty days prior to the scheduled LSLR, but no later than the day of the LSLR. The affected customer(s) will be provided a pitcher filter hand delivered by the Company. If there isn't a customer home at the time of delivery, the Company will use a door hanger indicating how a pitcher can be obtained. A follow-up phone call will also be made to the customer to determine whether they received the door hanger and that they should either pick their pitcher filter up at our main office of 220 Locust St, Columbia PA 17512, or schedule to have someone deliver the pitcher prior to the LSLR. See appendix G for this document. If the affected service line serves more than one residence, such as a multi-unit building or a non-residential unit, CWC will provide the documentation and pitcher-filter to every unit in the building.

Flushing

CWC will assist customers with the flushing of the customer's interior plumbing after an LSLR. Information on flushing is in the LSLR Information document (appendix B), which is provided to all customers that have an LSLR. A detailed description of how to flush will also be found on the CWC website. See appendix H for the link.

Sampling

CWC will be offering to collect water samples for all customers who have an LSLR. If the customer wants their water sampled, CWC will provide the customer with sampling procedures and bottles to collect one set of follow-up first draw and 5th liter tap samples. See appendix I for the LSLR sampling procedures. The sampling with be scheduled with the customer and will be collected between three to six months after completion of the LSLR. If either of the follow up samples exceed 15 ppb of lead, CWC will provide the results of both samples to residents as soon as practicable but no later than three calendar days after becoming aware of the results. If none of the follow up samples exceed 15 ppb of lead, CWC shall provide the results of the samples to residents within 30 days after receiving the results. Accompanying information from CWC includes an explanation of the effects of lead, a list of steps consumers can take to reduce exposure to lead in drinking water, contact information for CWC, and the maximum contaminant level goal and the action level for lead, as well as the definitions for these two terms. The follow-up sample

results, and accompanying information will be delivered to the customer through one of the following methods – electronically, mail, phone, hand delivered, or another method approved by PADEP. See appendix J for the documentation to be provided to the customer. If the offer to follow-up sample is not accepted by the customer, no sample will be collected, and the decline of sampling will be documented.

Reimbursement

No later than 30 days after LSLR Project Commencement, the Company will mail Appendix M and a letter detailing eligibility for an LSLR reimbursement and instructions on how to obtain the reimbursement to customers within the LSLR Project Area. Any handout necessary for a customer or owner to receive reimbursement shall be mailed physically and electronically mailed to customers and owners, along with the forms remaining available on the company's website, on a reasonable best-efforts basis where the Company has the customer or property owner's email address.

If an eligible customer chooses to use their own contractor to replace the customer-owned service line, CWC shall reimburse the customer for the replacement cost of the customer-owned lead service line. See appendix M for the Reimbursement Form. Customers are to use this as a guide for determining eligibility for reimbursement, and ensuring they have the correct documentation for reimbursement. For every lead service line replaced, an LSLR Cost form will be completed. See appendix K for the LSLR Cost Form. CWC will use these completed forms to establish the reimbursement amount for the customers who choose to use their own contractors. We will reimburse the customers in a manor that is consistent with our tariff and PUC guidelines.

Financial Considerations and Funding

CWC's annual budget will include costs relating to LSLR. Budget considerations include the cost for any outreach costs, funds for customer sampling following LSLR, costs of pitchers and replacements, additional staffing, the costs of the materials, and any additional costs that may be incurred.

The cost incurred by CWC for LSLRs will be funded with a combination of commercial loans, cash from operations, and/or PennVEST loans.

Annual Reporting

When an LSLR is completed, the service address, the length of the lead removed, the pipe diameter, and the actual cost will be documented. See appendix K for this document. This information will be compiled annually for the LSLR Program Report.

Website Information, Links, and Documentation

CWC will add lead service line documentation to its website within 1 year of PUC approval. A tab will be created on the website's main page, which will link a user to a specific page about lead service lines. Appendix's A, B, F, H, and M will be made available on the website through links.

These documents provide information about LSLR routine procedures, flushing, determining service line material, and the health effects associated with lead.

The website will include information about upcoming LSLR projects. Projected main replacement projects will be posted on the LSLR webpage and provide customers with specific information of when LSLR projects will occur.

A secure, online interactive map will be provided for customers to have the ability to determine if a lead service line may exist at their location. A method will be provided to allow a customer to request assistance in determining if their service line is a lead service line.

The web page will include information regarding the reimbursement requirements and instructions for customers to determine their ability for reimbursement of a previous LSLR. CWC will explore options for providing an online tool for customers to determine their eligibility for reimbursement.

The Company's LSLR website and all documentation regarding LSLRs will be available in both English and Spanish and, upon request, the Company will provide any/all documentation regarding LSLRs in other languages to customers directly. The Company will also make its translation services available to customers who call the Company's customer service and request translation of the written information into other languages.

Any community outreach programs or coordination efforts will be posted on the website.

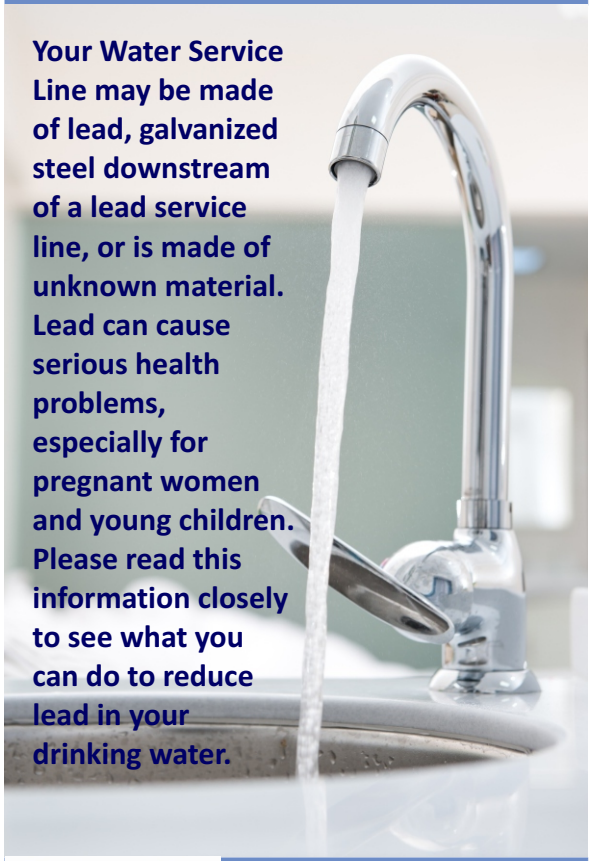
Columbia Water Company

IMPORTANT INFORMATION ABOUT LEAD IN YOUR DRINKING WATER

Your Water Service Line may be made of lead, galvanized steel downstream of a lead service line, or is made of unknown material. Lead can cause serious health problems, especially for pregnant women and young children. Please read this information closely to see what you can do to reduce lead in your drinking water.



Columbia WATER Company

220 Locust Street
Columbia, PA 17512
(717) 684-2188
Columbiawaterco.com

HEALTH EFFECTS OF LEAD

Exposure to lead in drinking water can cause serious health effects in all age grouops. Infants and children can have decreases in IQ and attention span. Lead exposure can lead to new learning and behavior problems or exacerbate existing learning and behavior problems. The children of women who are exposed to lead before or during pregnancy can have increased risk of these adverse health effects. Adults can have increased risks of heart disease, high blood pressure, kidney or nervous system problems.

SOURCES OF LEAD

Lead is a common metal found in the environment. Drinking water is also a possible source of lead exposure. The main sources of lead exposure are lead-based paint and lead-contaminated dust or soil, and some plumbing materials. Brass faucets, fittings, and valves, including those advertised as “lead-free” may contribute lead to drinking water. Until 2014, the law allowed end-use brass fixtures, such as faucets with up to 8 percent lead to be labeled as “lead-free”.

SOURCES OF LEAD (CONTINUED)

When water is in contact with pipes, and plumbing containing lead for several hours, the lead may enter drinking water. Homes built before 1988 are more likely to have lead pipes or lead solder. EPA estimates that 10 to 20 percent of a person’s potential exposure to lead may come from drinking water. Infants who consume mostly formula mixed with lead-containing water can receive 40 to 60 percent of their exposure to lead from drinking water.

Don’t forget about other sources of lead such as lead paint, lead dust, and lead in soil. Wash your children’s hands and toys often as they can come into contact with dirt and dust containing lead.

STEPS YOU CAN TAKE TO REDUCE YOUR EXPOSURE TO LEAD IN YOUR WATER

1. Run your water to flush out lead. Run water for 30-60 seconds to flush lead from interior plumbing or until it becomes cold or reaches a steady temperature before using it for drinking or cooking, if it hasn’t been used for several hours.

2. Use cold water for cooking and preparing baby formula. Do not cook with or drink water from the hot water tap; lead dissolves more easily into hot water. Do not use water from the hot water tap to make baby formula.

STEPS TO REDUCE EXPOSURE TO LEAD IN YOUR DRINKING WATER (CONTINUED)

3. Do not boil water to remove lead. Boiling water will not reduce lead.

4. Look for alternative sources of treatment. You may want to consider purchasing bottle water or a water filter. Read the package to be sure the filter is approved to reduce lead or contact NSF international at 800-NSF-8010 or www.nsf.org for information on performance standards for water filters. Be sure to maintain and replace a filter device in accordance with the manufacturer's instructions to protect water quality.

5. Test your water for lead. Call us at 717-684-2188 to find out how to get your water tested for lead.

6. Get your child's blood tested. Contact your local health department or health care provider to find out how you can get your child tested for lead, if you are concerned about exposure.

7. Identify and replace plumbing fixtures containing lead. New brass faucets, fittings, and valves, including those advertised as "lead-free" may contribute lead to drinking water. Until 2014, the law allowed end-use brass fixtures, such as faucets, with up to 8% lead to be labeled as "lead-free".

LEAD MONITORING REQUIREMENTS

Columbia Water Company is required by the Enviornmental Protection Agency to sample 30 high-risk homes/buildings within the Columbia Water distribution system to determine the levels of lead in the water. A high-risk home is determined by the service line material, the age of the home, leaded solder, or plumbing fixtures with lead. The sampling results can be found on the PADEP Website at: http://www.drinkingwater.state.pa.us/

COLUMBIA WATER COMPANY'S PROGRAM TO REDUCE/REMOVE LEAD

1.Corrosion Control Treatment
Addition of a corrosion inhibitor makes it less likely that lead will dissolve into the water.

2. Lead Service Line Replacement
Columbia Water Company continues to replace company-owned and customer-owned lead service lines. Columbia Water must replace its portion of a lead service line when a customer notifies Columbia Water that they are replacing their portion of the lead service line. All lead service lines are to be replaced by 2047.

3. Public Education Program
Columbia Water Company strives to educate the public on lead in drinking water. For example, this pamphet provides customers information on how to reduce lead in your water.

FOR MORE INFORMATION

For more information, please call us at 717-684-2188 or visit our website at Columbiawaterco.com.

If your line is made of lead or galvanized steel downstream of a lead service line, you may be eligible to have your service line replaced at no direct cost to you. For more information on how to determine your service line material, please call us at 717-684-2188 or visit our website at Columbiawaterco.com.

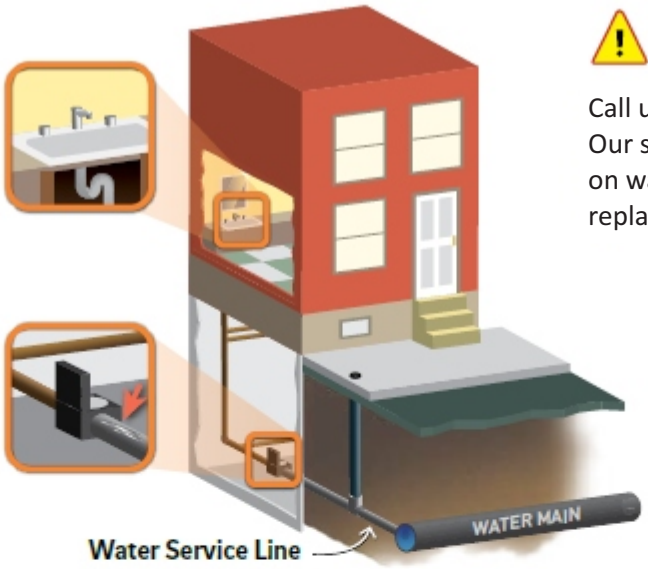
Appendix B

COLUMBIA WATER COMPANY

How to Check Your Water Service Line Material

Lead can also be found in older brass fixtures and valves and in old solder or epoxy, where pipes are joined.

You can test the water service line where it connects to the water meter in the basement.



Water Service Line
May be made of lead, copper, galvanized steel or plastic.

For any questions about lead in your water:

Call us at (717) 684-2188.
Our staff will provide information on water testing, safety tips, and replacement options.

Possible Pipe Materials

Follow these steps:

You will need:

- Key or a coin
- Strong refrigerator magnet

1. Find the water meter in your basement. Look at the pipe that comes through the outside wall of your home and connects to your meter.
2. Carefully scratch the pipe (like you would a lottery ticket) with a key or a coin. Do not use a knife or other sharp tool. Take care not to make a hole in the pipe. If the scratch turns a shiny silver color, it could be lead or steel. **NOTE:** If pipe is painted, use sandpaper to expose the metal first.
3. Place the magnet on the pipe. If a magnet sticks, it is a steel pipe.

Other ways you can check for lead:

- **Purchase a lead test kit at a hardware or home improvement store.** These kits test what the pipe is made from—not the water inside. Look for an EPA recognized kit.
- **A licensed and insured plumber can inspect your pipes and other plumbing for lead or steel. Replacing an older brass faucet or valve might reduce the lead in water.**

Appendix C

COLUMBIA WATER COMPANY

Lead Service Line Replacement Agreement

This **LEAD SERVICE LINE REPLACEMENT AGREEMENT** is made _____ ____, 20___ by and between **Columbia Water Company** (the "**Company**") and _____, an adult individual or individuals with an address of _____ (collectively, the "**Owner**", and referenced collectively hereafter as the singular "I").

In consideration of the Columbia Water Company's (the "Company") efforts to remove lead water services, the owner has given permission per the attached signed agreement to the Company and/or its officials, employees, or contractors to excavate, investigate, and replace non-copper water services on the property described below:

The street address for this property is: _____

The Owner shall permit temporary access and right of entry to and upon the above-referenced property to the Company and the Company's designated agent(s) and/or contractor(s) to perform investigation, inspection, construction and testing of the new private water service line and to enable any needed adjustments, maintenance, or repairs during the guarantee period.

As Owner, I hereby acknowledge that I understand that the work contemplated by this Agreement shall be performed subject to the following provisions:

1. The service line replacement is mandated by the Commonwealth of Pennsylvania "Lead and Copper Rule," adopted by the Pennsylvania Department of Environmental Protection. I understand the Company is not permitted to re-establish water service to the water main until my lead/galvanized water service is completely replaced.

2. A new copper private water service line will be constructed at the Company's expense from the curb box in the public right-of-way to the water meter on the Owner's property, including the meter setting and any necessary connections to reset the water meter. The existing service line will be disconnected and either capped off or removed.

3. The Company will restore roadways and public sidewalks, backfill any trenches excavated as part of the replacement process and will fill and seal any wall or floor penetrations in the private home. No other restoration will be conducted for Customer Lead Service Line replacements. The Company will not replace any landscaping, interior finishes, paving, seeding, or walkways. All restoration costs shall be borne by the Property Owner.

4. If a contractor is doing the work as contemplated in this Agreement on behalf of the Company, the contractor doing the work shall provide reasonably adequate insurance to protect the Owner against any loss that may result from damage caused by negligent construction operations on the Owner's property. Said contractor shall be required to provide the Company with adequate proof of such insurance coverage.

5. The Company guarantees that any work performed by the Company or its Contractor pursuant to this Agreement shall be free from defects in materials and workmanship for a period of two (2) years after completion (the "Guarantee Period").

COLUMBIA WATER COMPANY

Lead Service Line Replacement Agreement

THE PROPERTY OWNER'S/OWNERS' OBLIGATIONS.

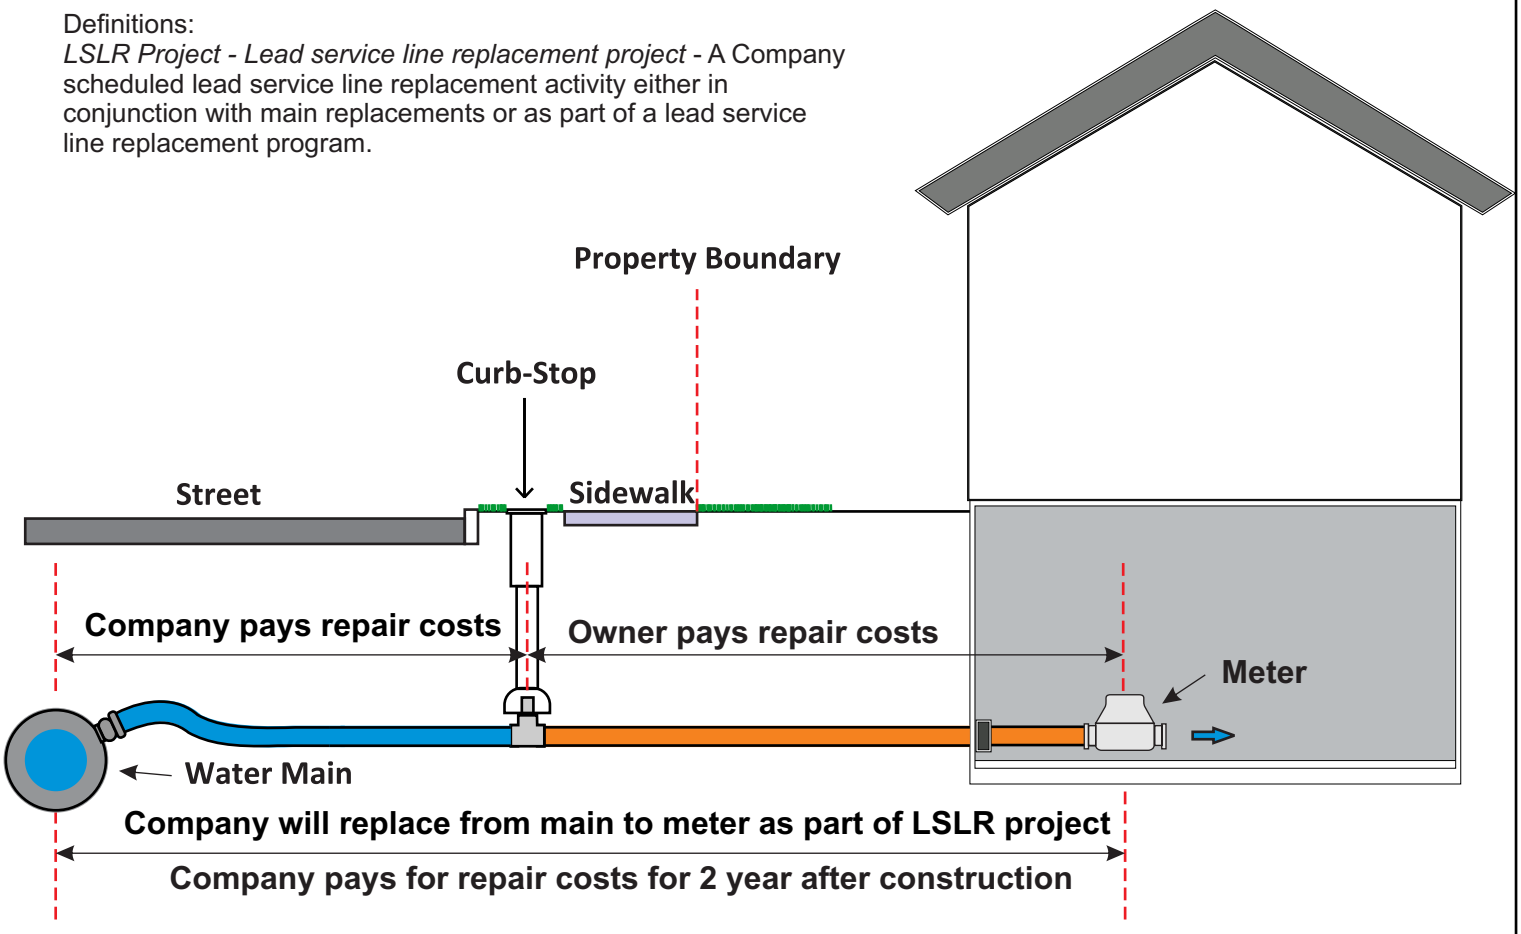
1. I hereby confirm that I and/or we are the only owner/owners of the above referenced property and that I/we have or will provide adequate proof thereof to the Company;

2. I permit temporary access and right of entry to and upon the above-referenced property to the Company and the Company's designated contractor(s) to perform construction and testing of the new private water service line and to enable any needed adjustments, maintenance, or repairs during the Guarantee Period;

3. I assume full responsibility for the maintenance, repair, and replacement of the private part of the water service line, located on the above-referenced property, after expiration of the Guarantee Period. After the expiration of the Guarantee Period of two (2) years, the responsibility of each party (Company and the Owner) shall be as shown on the diagram below; and

4. I shall hold the Company harmless and free from any claim or liability from any lawsuits, claims, injuries or damage done in performance of the water service line replacement work.

Definitions:
LSLR Project - Lead service line replacement project - A Company scheduled lead service line replacement activity either in conjunction with main replacements or as part of a lead service line replacement program.



COLUMBIA WATER COMPANY

Lead Service Line Replacement Agreement

MISCELLANEOUS TERMS.

1. The responsibility of the maintenance, repair and the replacement of the water service located in the public right-of-way will be pursuant to Columbia Water Company's tariff.
2. This Agreement is a legally binding document; Owner's signature will commit Owner to this Agreement's terms. Owner acknowledges that he/she has been advised to discuss all aspects of this Agreement with an attorney; that Owner has carefully reviewed and fully understands all the provisions of this Agreement; and that Owner is voluntarily entering this Agreement.
3. This document states the entire agreement reached between the parties hereto with respect to the construction contemplated hereby and supersedes all prior or contemporaneous agreements, understandings, representations, and warranties between the parties.
4. This Agreement may be executed in multiple counterparts, and signatures may be exchanged by facsimile or e-mail transmission, each of which shall constitute an original and all of which shall constitute one (1) Agreement. A facsimile or electronic signature on this Agreement shall be deemed an original signature and binding on the parties hereto.
5. This Agreement shall be governed by and construed in accordance with the laws of the Commonwealth of Pennsylvania without regard to conflict of law principles.
6. If any provision in this Agreement shall be found invalid, illegal, or unenforceable in any respect, the validity of the remaining provisions contained in this Agreement shall not be affected.
7. This Agreement may not be amended or modified except by a written instrument signed by the Company and Owner.

COLUMBIA WATER COMPANY

Lead Service Line Replacement Completion Form

PROPERTY OWNER: _____

PROPERTY ADDRESS: _____

This Lead Service Line Removal Completion Form is made by and between the Columbia Water Company and the above-named property owner to document that the removal of the customer-owned lead water service by the Columbia Water Company has be completed.

Now, therefore, the parties hereby agree in and to the following:

1. Columbia Water Company has replaced the lead service line at (address)_____ as part of the Columbia Water Company's Lead Service Line Replacement Program.

2. The work to replace the lead service line was completed on (date)_____.

3. The Columbia Water Company has removed the lead service at the address above in a manner and within the time frame described and agreed to with the property owner.

4. Columbia Water Company has backfilled any trenches excavated as part of the replacement process and has filled and sealed any wall or floor penetrations in the private home.

_____

Property Owner Signature & Date

Columbia Water Signature & Date

Appendix E

COLUMBIA WATER COMPANY

Lead Service Line Replacement Routine Procedure

1. Columbia Water Company's service line replacement contractors will notify you when excavations & replacements will be occurring at your property. Because the contractors need to access your home as part of this process, you or someone who is at least 18 years old must be home while the pipe replacement is taking place.

2. As part of this service line excavation & replacement, you may request that your water be tested after the service line is replaced. Water testing is by request only and residents will have to give separate permission for water testing to be done.

3. Your water will be shut off for a period of 4 to 8 hours while the line is being replaced. The contractor will make every effor to have your water restored the same day that installation begins. Please maintain a clear path to the water meter and clear material away from the water meter so work crews can run the replacement pipe to it.

4. The contractor will flush the water in your home for 15 minutes after the pipe is replaced to remove any residue or sediment from the water line. You should flush your pipes a second time for at least 15 minutes at the highest flow rate once the contractor has left. You will be provided with a water filter and/or replacement cartridges, if you do not already have them. Please continue to use your water filters for at least 6 months after service line replacement.

5. The Company will restore roadways and public sidewalks, backfill any trenches excavated as part of the replacement process and will fill and seal any wall or floor penetrations in the private home. No other restoration will be conducted for Lead Service Line Replacements. The Company will not replace any landscaping, interior finishes, paving, seeding, or walkways. All restoration costs shall be borne by the Customer or property owner, if the Customer is not the property owner.

COLUMBIA WATER COMPANY

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Lead Service Line Replacement Information

ESTE INFORME CONTIENE INFORMACION IMPORTANTE ACERCA DE SU AGUA POTABLE. HAGA QUE ALGUIEN LO TRADUZCA PARA USTED, O HABLE CON ALGUIEN QUE LO ENTIENDA.

Columbia Water Company is replacing your lead service line. This notice provides information you need to know regarding the replacement and why it is important.

The pipe that connects your household plumbing to the water main in the street is called a service line. Columbia Water Company is replacing your service line because it either contains lead, is galvanized iron/steel and was or is currently downstream of lead, or there is a lead gooseneck, pigtail or connector on your service line. Lead from your existing pipes can leach into the water you drink. While it's important for the long term quality of your drinking water to remove these lead pipes, studies have shown that when lead service lines are disturbed, in the short-term they can release lead for weeks or months after the disturbance. There are steps you can take to protect you and your family from exposure to lead in tap water which are explained below.

What should I do?

After the service line is returned to service but before using the water for consumption, remove and clean all faucet aerators, flush your service line and all internal plumbing by opening all taps and letting the water run for at least 30 minutes, and re-install the cleaned aerators.

To conserve water instead of simply running the water for 30 minutes, other household/non-potable water usage activities such as washing clothes, showering, flushing the toilet and running the dishwasher are effective methods of flushing the pipes.

After the initial flush, run the water for 3-5 minutes before using and use cold water for cooking and drinking to reduce your exposure to lead in the water.

In addition to flushing the lines, you are being provided with a pitcher filter that is certified to remove lead and six months of replacement cartridges. This filter may be used for water that will be used for drinking and cooking.

Why should I do it?

Exposure to lead in drinking water can cause serious health effects in all age groups. Infants and children can have decreases in IQ and attention span. Lead exposure can lead to new learning and behavior problems or exacerbate existing learning and behavior problems. The children of women who are exposed to lead before or during pregnancy can have increased risk of these adverse health effects. Adults can have increased risk of heart disease, high blood pressure, kidney, or nervous systems problems.

For more information, please contact Columbia Water Company at 717-684-2188.

Appendix G

COLUMBIA WATER COMPANY

Lead Service Line Replacement Pitcher Filter

Columbia Water Company has recently removed lead from your service line. It is recommended to use a Brita pitcher filter for the next 6 months for drinking water and cooking purposes. We are providing one free of charge to you, but are having trouble getting in contact with you. Please either pick your pitcher filter up at our main office of 220 Locust St, Columbia PA 17512, or call us at 717-684-2188 to schedule to have someone deliver a pitcher to you.

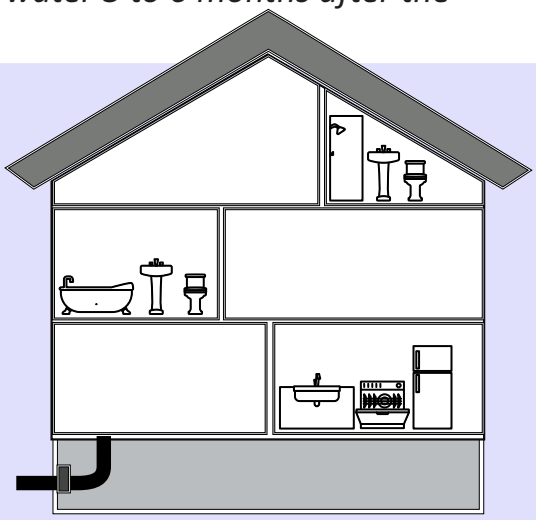
Appendix H

COLUMBIA WATER COMPANY

Flushing After a Lead Service Line Replacement

After your lead service line has been replaced, it is important to flush all of the pipes in your house. Flushing will remove any lead that may have entered the pipes in your house during construction. You should flush all interior plumbing the same day or before the next time you use your water. **DO NOT USE** hot water until the initial flushing is completed to prevent lead particles from settling in your hot water tank.

Columbia Water will offer to sample your water 3 to 6 months after the replacement of your lead service line.

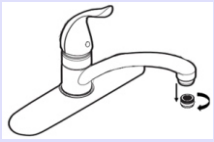


Flushing Instructions

1. Find all the faucets that will drain, including the basement and on all floors in your house.
2. Remove aerators and screens where ever possible, including the shower heads, from all faucets you plan to flush. Include the laundry tubs, hose-bibs, bathtubs, and showers as flushing points.
3. After all the aerators are off, open the faucets running at highest rate possible, using cold water.
4. After all faucets are opened, leave the water running for at least 30 minutes.

5. After 30 minutes, turn off the faucets.
6. Clean aerators/screens at each faucet. You may need to replace screens/aerators if too old or worn.
7. Use the Brita Filter provided for your drinking water for the next six months.

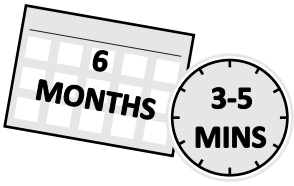
Cleaning Your Aerator



1. Remove faucet aerators and clean out any particles that may have accumulated there. The aerator is usually at the tip of the faucet and can be screwed off to clean.
2. After your lead service line is replaced, clean debris from aerators and screens once a month for six months. After six months, clean debris annually.

Daily Flushing

Daily flushes should continue for six months after your lead service line is replaced. Flush cold water through the plumbing in your house for 3-5 minutes each morning (or after an extended period of no water usage) before cooking and drinking.



NOTE: Taking a shower, running the dishwasher or flushing a toilet will flush your lines.

For more information, please call Columbia Water Company at 717-684-2188

Revised Appendix I

COLUMBIA WATER COMPANY

Lead Service Line Replacement Sampling Procedure

READ AND FOLLOW THESE SAMPLING INSTRUCTIONS CAREFULLY. THE RESULTS OF THE TESTS WILL NOT BE ACCURATE IF THE SAMPLING PROCEDURE ISN'T FOLLOWED CORRECTLY.

Lead samples need to be collected after water has sat in your service line and interior plumbing for several hours (at least 6 hours). Because of this, it is recommended to sample first thing in the morning.

1. PRIOR TO RUNNING ANY WATER (including flushing your toilet) remove the aerator from your kitchen or bathroom sink.
2. Clear ample space on your counter top. You'll need enough space to fit all five bottles.
3. Place the bottles out on the counter in order - 1 through 5.
4. Remove the caps from all five bottles.
5. While holding bottle no. 1 under the faucet, turn on the cold water and begin filling the bottle.
6. Once the bottle is filled to the black fill line, keep the water running and simultaneously remove bottle no. 1 and put bottle no. 2 under the faucet.
7. Continue this process for bottles 3, 4, and 5 until all five bottles are filled.
8. Once all five bottles are filled, turn the water off and tighten the caps on the bottles.
9. Place the bottles into the provided box and fill out the bottom of this form.
10. Once the form is complete, put the form in the provided box.
11. Put the box in the designated bottle pick-up area at your residence.

KEY THINGS TO REMEMBER THAT CAN EASILY BE FORGOTTEN

Collect the samples after not running water for 6 hours.
Remember to fill each bottle to the black fill line (not above nor below).
Let the water run continuously while filling all five bottles.
Use cold water.

TO BE COMPLETED BY RESIDENT

Name (print): _____

Date and Time Water was Last Used: _____

Date and Time of Sampling: _____

Location of Sampling (i.e., kitchen sink/bathroom sink): _____

I have read the above directions and have taken the tap samples in accordance with these instructions.

Signature: _____ **Date:** _____

Columbia Water Company will contact you with the sample results. If a sample exceeds 15 ug/L of lead, notification will be no later than 3 calendar days of sample results. If a sample does not exceed 15 ug/L of lead, notification will be no later than 30 days of the sample results. Contact Taz Keyser at 717-449-0161 with any questions.

Appendix J

Lead Service Line Replacement Sample Results

SERVICE LINE ADDRESS: _____

HEALTH EFFECTS OF LEAD

Lead can cause serious health problems if too much enters your body from drinking water or other sources. It can cause damage to the brain and kidneys, and can interfere with the production of red blood cells that carry oxygen to all parts of your body. The greatest risk of lead exposure is to infants, young children, and pregnant women. Scientists have linked the effects of lead on the brain with lowered IQ in children. Adults with kidney problems and high blood pressure can be affected by low leveols of lead mnore than healthy adults. Lead is stored in the bones and it can be released later in life. During pregnancy, the child receives lead from the mother's bones, which may affect brain development.

STEPS YOU CAN TAKE TO REDUCE YOUR EXPOSURE TO LEAD IN YOUR WATER

1. Run your water to flush out lead. Run water for 30-60 seconds to flush lead from interior plumbing or until it becomes cold or reaches a steady temperature before using it for drinking or cooking, if it hasn't been used for several hours.
2. Use cold water for cooking and preparing baby formula. Do not cook with or drink water from the hot water tap; lead dissolves more easily into hot water. Do not use water from the hot water tap to make baby formula.
3. Do not boil water to remove lead. Boiling water will not reduce lead.
4. Look for alternative sources of treatment. You may want to consider purchasing bottle water or a water filter. Read the package to be sure the filter is approved to reduce lead or contact NSF international at 800-NSF-8010 or www.nsf.org for information on performance standards for water filters. Be sure to maintain and replace a filter device in accordance with the manufacturer's instructions to protect water quality.
5. Test your water for lead. Call us at 717-684-2188 to find out how to get your water tested for lead.
6. Get your child's blood tested. Contact your local health department or health care provider to find out how you can get your child tested for lead, if you are concerned about exposure.
7. Identify and replace plumbing fixtures containing lead. New brass faucets, fittings, and valves, including those advertised as "lead-free" may contribute lead to drinking water. Until 2014, the law allowed end-use brass fixtures, such as faucets, with up to 8% lead to be labeled as "lead-free".

CONTACT INFORMATION

Address: 220 Locust Street, Columbia PA 17512
Phone Number: 717-684-2188
Website: www.Columbiawaterco.com

DEFINITIONS

Maximum Contaminant Level Goal or MCLG: The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety. MCLG for lead is 0.000 mg/L
Maximum Contaminant Level or MCL: The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology. MCL for lead is 0.015 mg/L

Estimated equipment: Cost: _____

Restoration: Cost: _____

Total estimated cost of LSLR: Cost: _____

Revised Appendix L

COMMONWEALTH OF PENNSYLVANIA
DEPARTMENT OF ENVIRONMENTAL PROTECTION
BUREAU OF SAFE DRINKING WATER

INSTRUCTIONS FOR EXPORT OF USER DATA

Introduction: The Department has developed a procedure whereby a system with an extant service line inventory database may export their data in a specified format, then submit it to the Department for import into the Department's PA SLI spreadsheet.

Using this procedure yields numerous advantages for both the Department and the System:

- The user does not need to determine/report the Service Line Classification or Sampling Tier. This will be done automatically when the data are imported into the spreadsheet.
- The spreadsheet will also automatically determine if sufficient evidence has been provided for the SL Class determination of Non-Lead.
- The spreadsheet allows the user to take advantage of the built-in csv export function for purposes of uploading results to the Department via DWELR.
- Information submitted by the Systems will be consistent regardless of whether the data were entered directly into the PA SLI spreadsheet or imported, resulting in fewer data gaps and fact-checking for Department personnel. The System also benefits from reduced fact checking.

Use: The system must provide an export file in a format that is compatible with import into Excel, for example Excel spreadsheet or csv file.

- The export file must contain the fields noted below, in the same order, with blanks or nulls in empty fields to maintain the order.
- Not all fields require a response, but a blank or null must be used in non-responsive fields to maintain the correct order.
- The System is encouraged to submit test data before finalizing their export procedure to ensure that it is compatible with the Department's requirements for import.

Procedure: Once the System has completed their initial inventory and is ready to submit:

- Email the export file to ra-padwis@pa.gov. In the subject field include the PWSID number (only one PWSID per submission) and the words "for import into PA SLI".
- In the same email, also submit the cover form 3930-FM-BSDW0042b, available on e-Library. Instructions for completion of the cover form are also available on e-Library as document number 3930-FM-BSDW0042.
- In the body of the email, for Community Water Systems, indicate if ≥ 20% of the structures served are multi-family residences.
- Department staff will enter the cover form information, import the export file, and return the completed PA SLI spreadsheet to the System.

  - IMPORTANT NOTE: Errors may be identified during the import procedure. For example, duplicate addresses or insufficient evidence for a determination of Non-Lead.
  - If errors are found, the spreadsheet to the System will NOT include the erroneous entries. The errors must be fixed by the System.
    - If there are only a few errors, those entries can be manually entered into the PA SLI spreadsheet by the System.
    - If there are many errors, it is suggested to make the corrections in the System's database and create another export file (preferably containing only the erroneous entries), then send the spreadsheet and corrected export file back to the Department for re-import.
- Once the completed, error-free spreadsheet is received by the System, follow the "create export" procedure for csv file export located on the "Introduction" tab of the completed PA SLI spreadsheet and upload via DWELR. Instructions for upload to DWELR will be provided once the interface is active.
  - Users must have a DWELR account to upload the SLI.
  - Users can upload the SLI with either an L or P DWELR account.
  - If the exported csv file is very large, another mechanism for upload may be necessary. This will be detailed in the instructions once the interface is active.

Required Fields:

The user export file must contain 38 columns or fields in the following order. Headers may be included or not.

- Important: Note that the designation "optional" does not mean the field can be omitted, just that it is not required to have a response in that field. The export file must always have 38 fields.

Basic information:

1. Service line classification {LEAVE EMPTY}
2. Sufficient evidence for determination of non-lead {LEAVE EMPTY}
3. LCRR sampling tier {LEAVE EMPTY}
4. {LEAVE EMPTY}
5. Unique service line ID (Required)
6. Record type (Required; Default answer = Initial)
7. Date replacement completed (Leave blank for initial inventory, used for updated inventory only)
8. Ownership type (Required)
9. Street address 1 (Required)
10. Street address 2 (Optional)

11. City or township (Required)
12. Zip code (Required)
13. School? (Default answer = No)
14. Childcare facility? (Default answer = No)

Questions related to System-Owned side (Leave blank if ownership type is Customer):

15. Material (Required)
16. Was material ever previously lead? (Default answer = Yes)
17. Lead pigtails, goosenecks or connectors present upstream? (Default answer = Yes)
18. Installation date range (Required)
19. Installation date specific (Optional)
20. Diameter in inches (Required)
21. Basis of material Classification 1 – Non-Field (Optional)
22. Basis of material classification 2 – Non-Field (Optional)
23. Basis of material classification 3 – Field (Optional)
24. Date of field verification (Required if 23 is answered)
25. Additional comments (Required if "other" is selected for 21, 22 or 23)

Questions related to Customer-Owned side (Leave blank if ownership type is System):

26. Material (Required)
27. Lead pigtails, goosenecks or connectors present upstream? (Default answer = Yes)
28. Installation date range (Required)
29. Installation date specific (Optional)
30. Basis of material Classification 1 – Non-Field (Optional)
31. Basis of material classification 2 – Non-Field (Optional)
32. Basis of material classification 3 – Field (Optional)
33. Date of field verification (Required if 32 is answered)
34. Additional comments (Required if "other" is selected for 30, 31, or 32)

Questions related to Sampling Tier:

35. Service line connected to: (Required)
36. POE treatment present? (Required)
37. Interior building plumbing contains lead solder? (Required)
38. Current LCR sampling site (Required)

Acceptable Responses (by field number listed above):

1, 2, 3, 4. Leave these fields blank.

5. Response required in this field.
   - May contain up to 30 characters

- Can use letters and/or numbers in any combination
- Use only uppercase letters; lowercase letters will be converted to uppercase
- Can use hyphen (-), underscore (_), period(.)
- May not use spaces, commas or other special characters (i.e., *, !, @, etc.)

6. Response required in this field. Acceptable responses are (I, U, A, D)
   - Initial (I): Use this designation for the initial inventory submitted on or before October 16, 2024
   - Update (U): Use this designation when submitting an updated inventory, to indicate the record is being revised
     - If the update is due to a service line replacement, enter the replacement date in field 7
   - Add (A): Use this designation to add service lines to an existing inventory
   - Inactive (D): Use this designation to indicate a record is being inactivated. Records cannot be deleted.
     - Example: Property was made into a parking lot and the service line was decommissioned.
     - Add a text comment explaining the reason for inactivation in fields 25 and/or 34.

7. Field may be left blank.
   - For the initial inventory this field MUST be blank.
   - Use MM/DD/YYYY format.

8. Response required in this field. Acceptable responses are (J, S, C)
   - Joint (J)
   - System (S)
   - Customer (C)

9 - 12. Response required in this field.
   - Each SLID must be associated with a unique address.
   - Duplicate addresses are not allowed.
   - For the zip code, use 5-digits (not 5 + 4).

13. Response required in this field. Acceptable responses are (N, YE, YS, YA).
    Default answer = N

- A school (YA) is "any building associated with public, non-public/private, or charter institutions that primarily provides teaching and learning for elementary or secondary students."
- An elementary school (YE) contains students in grades up to and including grade 8 (includes pre-school).
- A secondary school (YS) contains students in grades no less than 9 and no greater than 12.

14. Response required in this field. Acceptable responses are (N, Y). Default answer = N
    - A child care facility is "a location that houses a licensed provider of child care, day care, or early learning services to children as determined by the State licensing agency."

15 & 26. Response required in this field. Acceptable responses are (A, B, C, D, E, F, G, H, J, K, L, M, O, P, Q, R, S).
- Lead (A)
- Lead-lined galvanized (B)
- Galvanized (C)
- Copper (D)
- Cast iron – lined (E)
- Cast iron - unlined (F)
- HDPE - high density polyethylene (G)
- PVC - polyvinyl chloride (H)
- CPVC - chlorine treated PVC (J)
- PEX - cross-linked polyethylene (K)
- ABS - acrylonitrile butadiene styrene (L)
- PB – polybutylene (M)
- Asbestos cement (O)
- Other non-lead material (P)
- Unknown - Likely Lead (Q)
- Unknown - Unlikely Lead (R)
- Unknown (S)

16, 17 & 27. Response required in this field. Acceptable responses (Y, N, S). Default answer = Yes
- Yes (Y)
- No (N)
- Not sure (S)

18 & 28. Response required in this field.
Acceptable responses are (A, B, C, D, E, F, G, H, J, K, L, M, O, P)
– Pre-1901 (A)
– 1901 – 1910 (B)
– 1911 – 1920 (C)
– 1921 – 1930 (D)
– 1931 – 1940 (E)
– 1941 – 1950 (F)
– 1951 – 1960 (G)
– 1961 – 1970 (H)
– 1971 – 1980 (J)
– 1981 – 1990 (K)
– 1991 – 2000 (L)
– 2001 – 2010 (M)
– 2011 – 2020 (O)
– 2021 – 2030 (P)

19 & 29. These fields may be left.
- Use these fields to enter more specific installation date information for the service line, if available.
- Can be entered in any format including text and partial dates.

20. Response required in this field.
- Enter the diameter in inches.
- Format as a number with 2 decimal places.

21, 22, 30 & 31. These fields may be left blank but will affect the determination of sufficient evidence for non-lead! Acceptable responses are ({EMPTY}, A, B, C, D).
- Records review (A)
- Modeling/statistical analysis (B)
- Water sampling (not allowed for systems with corrosion control treatment) (C)
- Other (must enter comments in fields 25 and/or 34) (D)

23 & 32. These fields may be left blank but will affect the determination of sufficient evidence for non-lead! Acceptable responses are ({EMPTY}, E, F, G, H, J, K, L).
- Visual inspection at existing access point (E)
- CCTV inspection inside pipe, full length (F)
- CCTV inspection outside pipe, at curb box (G)
- Mechanical excavation, 1 location (H)

- Mechanical excavation, 2 locations (J)
- Mechanical excavation, 3+ locations (K)
- Other (must enter comment in fields 25 and/or 34) (L)

24 & 33. Response required in this field IF fields 23 or 32 are not {EMPTY}. Otherwise this field may be left blank.

- Date must be entered in MM/DD/YYYY format
- Date must be BEFORE than the initial inventory date recorded on the Cover Form (3930-FM-BSDW0042b)

25 & 34. Response required in this field IF responded "D" (other) in fields 21, 22, 30 or 31 OR responded "L" (other) in fields 23 or 32.

- Free form text field
- Character limit = 250

35. Response required in this field. Acceptable responses are (S, M, O).

- Note: An error will occur if the CWS does not indicate whether ≥ 20% of structures served are multi-family residences.
- Single family residence (S). One service line provides drinking water for one family.
- Multi family residence (M). One service line provides drinking water for multiple families (e.g., apartment complex where there is only a single service line).
- Building/Other (O). If the service line cannot be categorized as S or M, choose O.

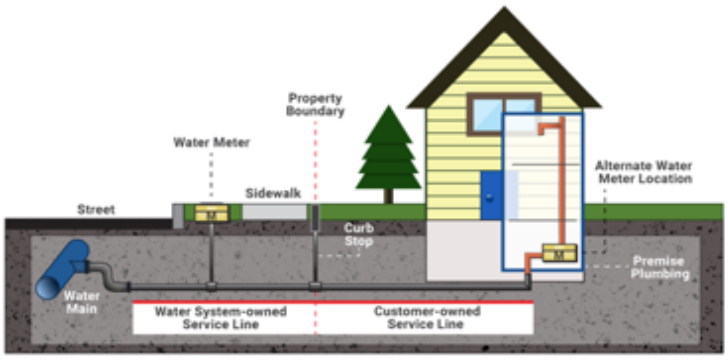
36 & 37. Response required in these fields. Acceptable responses are (Y, N, S). Default answer = Not sure

- Yes (Y)
- No (N)
- Not sure (S)

38. This field may be left blank. Acceptable responses are ({EMPTY}, Y, N)

Determination of Service Line Classification

Service Line Designation Where Ownership Is Split Between the Water System and Customer



NOTE: The classification of a service line applies to the entire length of the service line, regardless of ownership.

System-Owned Portion Material Type	Customer-Owned Portion Material Type	Service Line Classification[2,3,4,5]
Lead or lead-lined	Any material	*Lead*
Any material	Lead or lead-lined	*Lead*
Unknown	Any material but lead or lead-lined	*Lead Status Unknown*
Any material but lead or lead-lined	Unknown	*Lead Status Unknown*
Any material but lead, lead-lined, galvanized, or unknown	Any material but lead, lead-lined, galvanized, or unknown	*Non-Lead*[1]

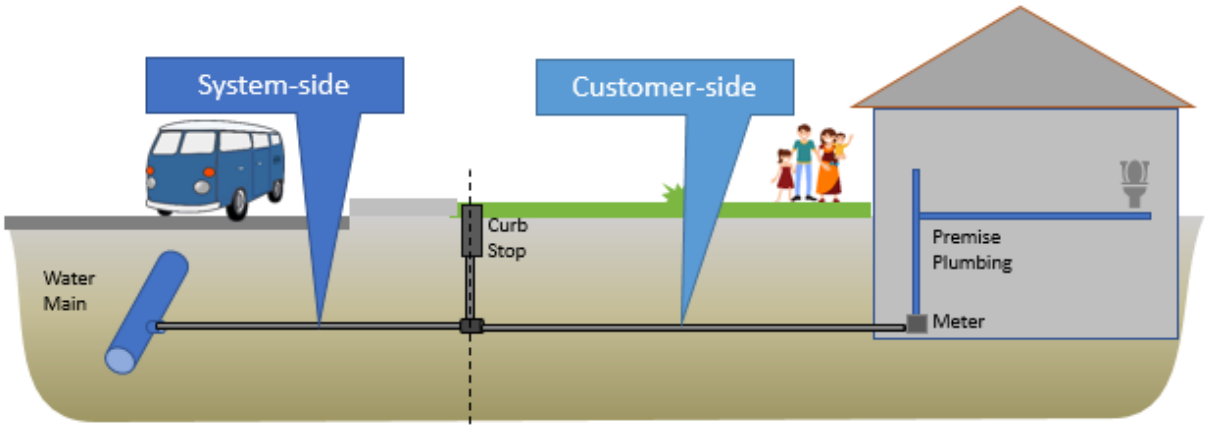
System-Owned Portion		Customer-Owned Portion		
Lead Connector Upstream?	Material Type	Lead Connector Upstream?	Material Type	
No	Any material but lead, lead-lined, or unknown	No	Galvanized	*Non-Lead*
No	Galvanized	No	Any material but lead, lead-lined, or unknown	*Non-Lead*
No	Galvanized	No	Galvanized	*Non-Lead*
No	Not previously lead	No	Galvanized	*Non-Lead*
Yes or Not sure	Galvanized	Any response	Any material but lead, lead-lined or unknown	*Galvanized Requiring Replacement*
Yes or Not sure	Any material but lead, lead-lined or unknown	Any response	Galvanized	*Galvanized Requiring Replacement*
No	Any material but lead, lead-lined or unknown	Yes or Not sure	Galvanized	*Galvanized Requiring Replacement*
Any response	Previously lead or unsure if previously lead	Any response	Galvanized	*Galvanized Requiring Replacement*

[1]Any determination of Non-Lead is subject to review and approval by the Department.
[2]It is only necessary to replace the portions of the service line that are Lead or Galvanized Requiring Replacement.
[3]When both portions of the service line are Lead or Galvanized Requiring Replacement, both portions must be replaced at the same time. Partial replacements are not allowed.
[4]If either portion of the service line is classified as Lead Status Unknown, it must be replaced unless further investigation changes the classification to Non-Lead. The change in classification must be submitted to the Department in the Updated Inventory.
[5]The presence of lead connectors, goosenecks or pigtails is only relevant to the determination of Galvanized Requiring Replacement.

Evidence Required for Non-Lead Designation

To categorize pipe material as non-lead (e.g. copper), the water system is expected to show sufficient evidence through one of the "stand-alone" verification options, or a combination of 2 or more other methods as described below.

Note: For systems that own a portion of the service line, such as shown below, the pipe material for both the customer and system portions must be identified.



"Stand-Alone" Records Method Options: The following options do not need to be combined with another method to verify a pipe is non-lead:

- Records indicating service line installation/replacement date after January 6, 1991 (the effective date of the PA Lead Ban)
  -OR-
- Record of a local ordinance prohibiting lead service line installation and water system records indicating service line installation/replacement after the ordinance effective date.

Combination of Two (or more) Other Methods: If water system records do not meet either of the stand-alone criteria above, the system may use any TWO other investigation techniques from the list below:

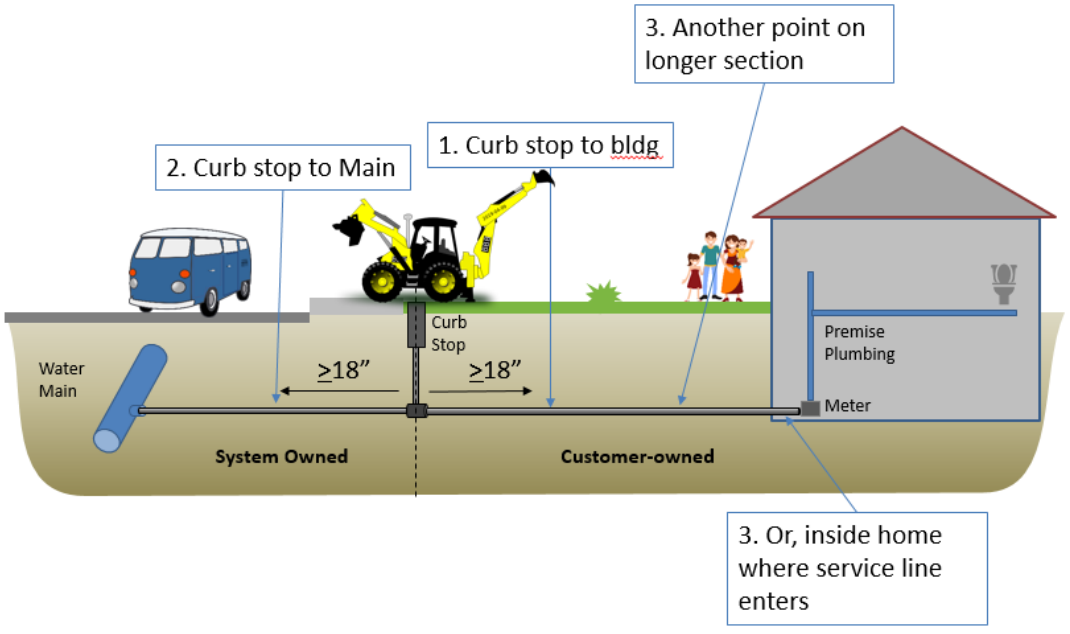
- Records review
- Modeling/Statistical analysis
- Water sampling (5th liter sampling, if system does not have corrosion control treatment)
- Field verification, options include*:
  - Visual inspection at existing access point (This includes any access points in which the material type can clearly be determined, such as a meter pit, or the service line entry to the basement at the customer side)
  - CCTV inspection outside pipe – at curb box
  - Mechanical excavation at a location along each half of the service line (i.e. customer-side and system-side)

* **Representative Field Verification:** Note that if a system is verifying records using a field method, a statistically sound subset of service lines can be field verified, rather than every line. Systems should follow the procedure established in the Michigan EGLE "Minimum Service Line Material Verification Requirements" document. This method should only be used for a homogeneous area, such as a residential neighborhood in which the houses were built in the same time period.

- Other method reviewed by DEP

"Stand-Alone" Field Method Options: If a system does not have any records, then there are two stand-alone field method options. Use ONE of the following verification methods:

- Internal CCTV inspection over the full length of the service line
  – OR -
- Mechanical excavation in at least 3 locations over the length of the service line as follows (visual below):
  - Curb stop to building:
    - A minimum of 18 inches from the curb stop
    - Or, if the distance to the building is less than 18 inches, halfway to the building
  - Curb stop to water main:
    - A minimum of 18 inches from the curb stop
    - Or, if the distance to the water main is less than 18 inches, halfway to the main
  - Third point (choose one):
    - Inside the home where the service line enters (inspected by water system personnel, not customer)
    - A second excavation point in the longer section of service line that is at least halfway between the first point and the building or water main
  - Special note: If the system has sufficient evidence for one portion of a jointly-owned line, then only 2 mechanical excavation locations are required in the other portion of the service line.



Regulatory Q & A – Inventory Requirements of the LCRR

Question	Answer	Regulatory Citation(s)
1. Who must prepare a service line inventory?	All community water systems (CWSs) and non-transient non-community water systems (NTNCWSs).	40 CFR §141.84(a)
2. What material classification should I use?	Service lines must be classified as one of four types: – Lead, – Galvanized Requiring Replacement (GRR), – Non-Lead, (specify the actual material such as copper or plastic), or – Lead Status Unknown. Where the material is unknown, EPA recommends that systems use subclassifications to capture additional information (e.g., unknown - unlikely lead).	40 CFR §141.84(a)(4) & §109.706
3. What if the service lines in my system are split ownership, meaning that my system owns a portion and the customer owns a portion?	The inventory must include both the system-owned and customer-owned portions of the service line; however, systems must count each service line from the water main to the interior building plumbing only once for determining the number of service lines requiring replacement, assigning a tap sample tiering classification, and facilitating reporting of inventory information to the State and EPA. Refer to the "Class & Tier Info" section below for information on how to classify service lines that have split ownership.	40 CFR §§141.84(a)(2) & (a)(7)(i)
4. What information should I use to identify service line material and prepare my inventory?	You **must** use previous materials evaluation, construction and plumbing codes/records, water system records, distribution system inspections and records, information obtained through normal operations, and state-specified information to prepare your inventory. EPA recommends systems consider additional service line investigation methods such as visual inspection, water quality sampling, and excavation.	40 CFR §§141.84(a)(3) & (a)(5)
5. When is the initial inventory due?	October 16, 2024	40 CFR §141.80(a)(3)[1]
6. What if I have no Lead, Galvanized Requiring Replacement (GRR), or Lead Status Unknown service lines?	You have some different requirements that are explained in the answers to questions 7, 8, and 9.	N/A

Question	Answer	Regulatory Citation(s)
7. Do I need to update my inventory?	**For systems with Lead, GRR, or Lead Status Unknown service lines** The service line inventory should improve over time with better information. You **must submit inventory updates** to your state on the following frequency: (1) Annually if you conduct lead tap sampling semi-annually or annually. (2) Triennially (i.e., once every 3 years) if you conduct lead tap sampling triennially. **For systems with only Non-Lead service lines** You are not required to provide an update. However, if you subsequently find any Lead, Galvanized Requiring Replacement or Lead Status Unknown service lines, you **must** notify the State within 30 days and prepare an updated inventory on a schedule established by the State.	40 CFR §141.90(e)(3)
8. Do I need to make my information publicly available?	**For systems with Lead, GRR, or Lead Status Unknown service lines** You must make the inventory publicly available and include a locational identifier for lead service lines and GRR. Water systems serving more than 50,000 people must provide inventories on-line. **For systems with only Non-Lead service lines** You can provide a written statement, in lieu of the inventory, that your distribution system has no lead or GRR service lines along with a general description of all applicable sources used to make that determination.	40 CFR §§141.84(a)(8) & (a)(9)
9. Do I need to include a statement in my Consumer Confidence Report (CCR)?	**For systems with Lead, GRR, or Lead Status Unknown service lines** CWSs must indicate how the public can access the service line inventory information in their CCR. **For systems with only Non-Lead service lines** CWSs must include a statement that a service line inventory contains no lead service lines and instructions on how to access the information.	40 CFR §141.153(d)(4)(xi)
10. What information must the State report to EPA?	For each water system, the number of Lead, GRR, and Lead Status Unknown service lines in its distribution system, reported separately.	40 CFR §142.15(c)(4)(iii)(D)

[1] On June 10, 2021, EPA signed a rule extending the compliance date from January 16, 2024 to October 16, 2024 (86 FR 31939).

Appendix M

COLUMBIA WATER COMPANY

Lead Service Line Replacement Reimbursement Form

Eligible customers seeking reimbursement for their lead service line replacement need to complete this form, have the documentation requested in the checklist below, and either e-mail, fax, or hand deliver a copy of the documents to Columbia Water Company ("CWC").

Complete this Checklist

- ☐ 1. Proof of Lead Service Line - a combination of the following:
  - ☐ A photograph of the service line
  - ☐ Verified statement from contractor
  - ☐ CWC documentation
- ☐ 2. Copy of paid invoice
- ☐ 3. Detailed estimate of work from the contractor

E-mail, fax, or hand deliver a copy of this document and accompanying documents to Columbia Water Company.

Email Address: Columbiawater@Columbiawater.net
Fax Number: 717-684-4566
Street Address: 220 Locust St, Columbia PA 17512

Please Print Clearly

CUSTOMER ACCOUNT INFORMATION

1. Address: _____
2. Account No.: _____
3. Name: _____
4. Phone No.: _____
5. E-mail: _____

PLUMBER/CONTRACTOR INFORMATION

1. Business Name: _____
2. Business Address: _____
3. Contact Person: _____
4. Phone No.: _____
5. E-mail: _____

REPLACEMENT DETAILS

1. Date of the replacement: _____
2. Length of warranty: _____
3. Description of plumbing improvements made: _____
4. Description of restoration work completed: _____
5. Any other unusual conditions that increased project costs? _____

I hereby certify that all information in this document is true and accurate to the best of my knowledge.

Appendix N

COLUMBIA WATER COMPANY

Lead Service Line Replacement Refusal Form

DECLINE PRIVATE LEAD SERVICE LINE REPLACEMENT

I DECLINE to have Columbia Water Company (the "Company") address my privately owned lead service line. I understand that lead is a toxic metal that can be harmful to human health even at low exposure levels. Lead is persistent, and it can accumulate in the human body over time. All persons, especially pregnant women, children, and infants, are vulnerable to the dangerous effects of lead in drinking water. For more information on the harmful effects of lead in drinking water, please visit the following website maintained by the United States Environmental Protection Agency: https://www.epa.gov/ground-water-and-drinking-water/basic-information-about-lead-drinking-water.

I understand that my refusal or failure to accept the Company's offer to replace my privately owned lead service line will require replacement of my Private LSL at my expense within one (1) year from the date when the commencement of the work on my Property would have begun in order for me to be eligible for reimbursement for the replacement of my Private LSL by the Company.

I further understand that my refusal or failure to allow the Company or its representative to replace my Private LSL, or my failure to replace my Private LSL concurrently with the Company's replacement of its portion of its service line if applicable, may lead to termination of my water service under the applicable provisions of the Company's currently-effective tariff.

COLUMBIA WATER COMPANY

MODIFIED
LONG-TERM INFRASTRUCTURE IMPROVEMENT PLAN

2023-2027

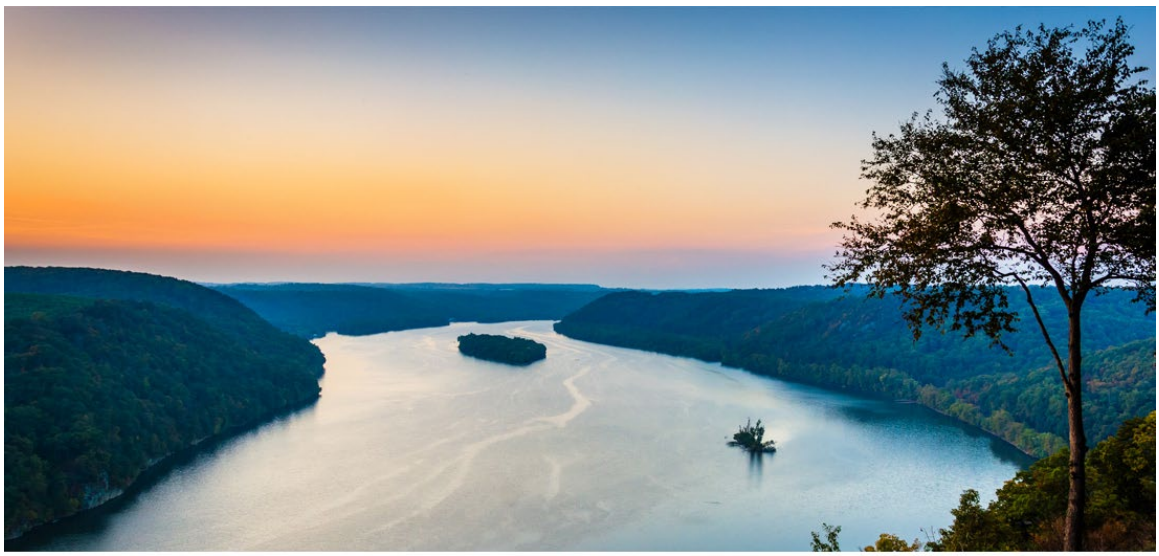

Table of Contents

Introduction 1
Section 1 – Types and Age of Eligible Property 3
Section 2 – Schedule for Planned Replacement of Eligible Property 6
Section 3 – Location of Eligible Property 9
Section 4 – Estimate of the Quantity of Eligible Property to be Replaced 9
Section 5 – Projected Annual Expenditures 10
Section 6 – Acceleration of Infrastructure Replacement 11
Section 7 – Workforce Management Plan and Training 12
Section 8 – Outreach and Coordination with other Utilities 12

Introduction

In accordance with the requirements of 66 Pa. C.S. §§ 1350 - 1360 and the Public Utility Commission's Final Order for the Implementation of Act 11 of 2012 (Public Meeting of August 2, 2012, Docket No. M-2012-2293611), Columbia Water Company's (CWC) Long-Term Infrastructure Improvement Plan (LTIIP) addresses infrastructure investment through its long-established and cost-effective Distribution System Improvement Charge (DSIC)[1,2].

Since its establishment of a DSIC in April of 2003, CWC has replaced over 27,400 feet of pipe. This represents about 3.8% of its distribution system pipe that has been renewed through the DSIC program. In addition to pipe, CWC has replaced 940 service lines which is approximately 9% of the total service lines and 5,330 old age meters which is over 51% of the Company's meters. This has allowed CWC to continue to provide safe and reliable service to its customers. In addition, the DSIC has allowed the Company to manage infrastructure replacement costs in an effective manner by directly targeting those costs without the need for additional rate case filings, the reasonable costs of which are borne by the ratepayers.

Prior to Commission approval of the Company's last rate filing on March 1, 2018 at Docket No. R-2017-2598203, the Company operated two districts known as the Columbia District and the Marietta District. For purposes of the DSIC, the March 1, 2018 Commission Order combined the rate districts and made the Marietta Rate District DSIC eligible. Prior to the March 1, 2018 Commission Order, only the Columbia Rate District was DSIC eligible. This LTIIP is for CWC's distribution system that is located in the Columbia and Marietta rate districts. On March 31, 2022, the Company acquired East Donegal Township Municipal Authority ("East Donegal").[3] The Company operates the East Donegal Rate District as a separate, independent system. Except to the extent necessary to carry out its Lead Service Line Replacement (LSLR) Plan (LSLR Plan), as discussed below, the Company's LTIIP does not include the distribution system located in the East Donegal Rate District.

In accordance with the requirements of 66 Pa. C.S. § 1311 and the Public Utility Commission's Final Rulemaking Order for the Implementation of Act 120 of 2018 (Public Meeting of February 24, 2022, Docket No. L-2020-3019521), CWC is now submitting this modification to its LTIIP to incorporate CWC's LSLR Plan into its LTIIP. CWC's LSLR Plan addresses the Company's efforts to replace Company-owned and Customer-owned service lines made of lead materials as approved at Docket No. P-2023-3041845. The modified-LTIIP only applies to the East Donegal Rate District to the extent necessary to implement its LSLR Plan.[4]

---

[1] The Pennsylvania Public Utility Commission authorized CWC to establish a DSIC through Final Order dated April 17, 2003 at Docket No. P-00021979.

[2] The Pennsylvania Public Utility Commission authorized CWC to include the Marietta Rate District into its DSIC program through Final Order dated March 1, 2018 at Docket No. R-2017-2598203.

[3] The Pennsylvania Public Utility Commission authorized CWC to acquire the East Donegal Township Municipal Authority through Order dated February 3, 2022 at Docket No. A-2021-3027134, *et al*.

[4] The East Donegal rate district does not have a DSIC. As a result, the Company does not include East Donegal capital improvements in its DSIC. Similarly, LSLR costs that are attributable to the East Donegal system will not be recovered through the DSIC. The Company, however, reserves the right to request Commission approval to apply

CWC provides public water service to residential, commercial, public and industrial customers in Columbia, Marietta and Mountville Boroughs, West Hempfield, Manor, and East Donegal Townships, Lancaster County and Hellam Township, York County, Pennsylvania. CWC served approximately 12,230 customers at the end November 2024. Figure 1 shows the CWC service area covered by this LTIIP.

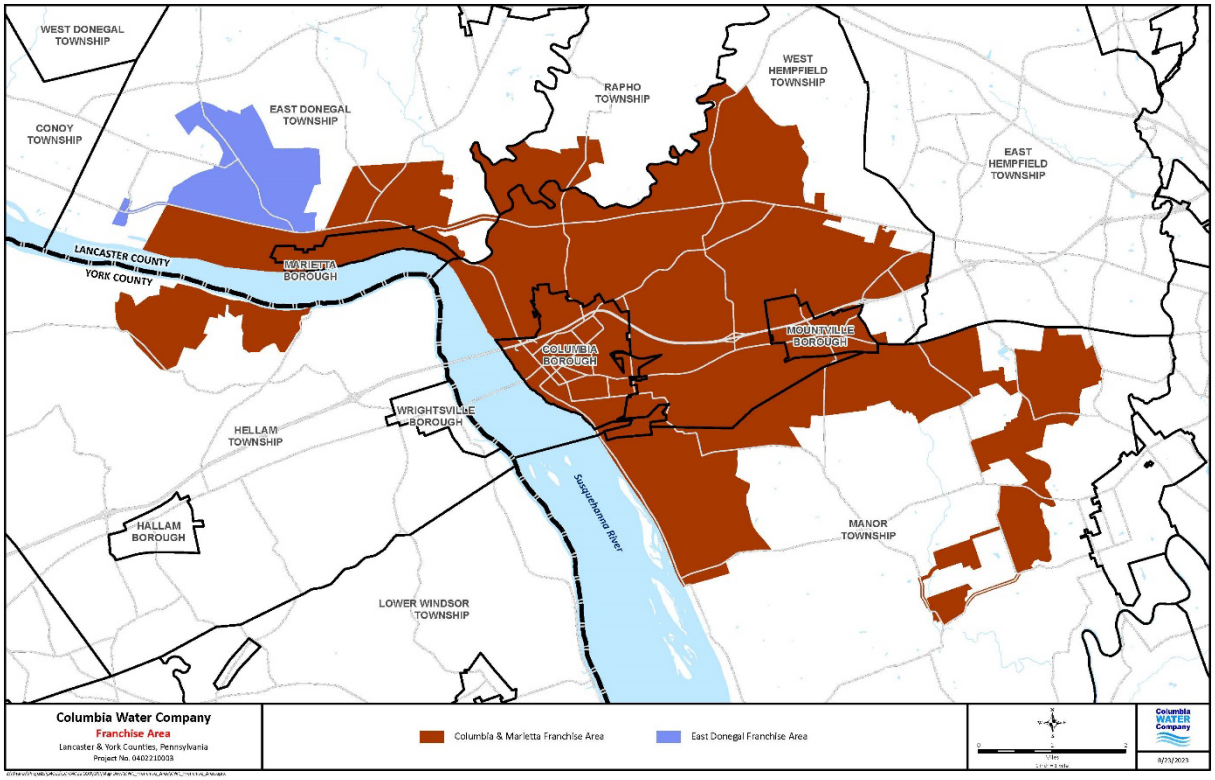

Figure 1 – Columbia Water Company Service Area

The CWC distribution system is comprised of water mains that vary in size from 4-inch through 36-inch with the material type being mainly cast iron and ductile iron. The age of the water mains range from the 1870s through 2023. The condition of the pipes vary throughout the system and age is not always the best indicator of pipe condition. Other factors like the original quality of the pipe, installation and geology impact the pipe condition and reliability.

This LTIIP identifies how CWC will use the DSIC to replace aging infrastructure at an accelerated pace. This LTIIP will identify the types and ages of infrastructure eligible for DSIC recovery; schedule for the planned replacements; location of the eligible property; estimates of the quantity to be replaced; projected annual expenditures; manner in which the replacement will be accelerated; workforce management plan to ensure work is completed safely and cost effectively; and description of outreach to other utilities to minimize disruption to customers; as well as the benefit to customers of accelerated infrastructure rehabilitation and replacement.

---

the DSIC to the East Donegal Rate District and recover these LSLR costs and all other DSIC-eligible costs attributable to the East Donegal Rate District through the DSIC.

This LTIIP will also incorporate the Company's LSLR Plan into its LTIIP. In October 2018, Governor Wolf signed into law Act 120 of 2018 (Act 120), which became effective on December 23, 2018. Act 120 amended Section 1311(b) of the Public Utility Code in order to, *inter alia*, authorize water utilities to pursue comprehensive replacement of lead service lines (LSLs) that remain in service across Pennsylvania subject to Commission approval. The Commission promulgated its LSLR Regulations requiring a Class A water public utility to remove and replace all LSLs, whether entity-owned or customer-owned, within or connected to its water distribution systems within 25 years from the effective date of the Commission's regulations. Moreover, 52 Pa. Code § 65.54(b) requires that the utility shall include with its LSLR Program a modified LTIIP containing a LSLR plan as a separate and distinct component of the entity's LTIIP. Accordingly, Columbia Water has begun efforts to replace LSLs in its system, including galvanized materials downstream of a LSL, as well as any lead pigtail, gooseneck, or other fitting that is connected to a LSL. This LTIIP will identify how CWC will incorporate its LSLR Plan into its LTIIP to continue replacing aging infrastructure in combination with the replacement of LSLs.

Section 1 – Types and Age of Eligible Property

A listing of all eligible property, as defined in 66 Pa. C.S. §1351(3), is provided in this section. CWC developed and integrated a Geographic Information Systems (GIS) to map and manage its water system assets. The water system assets such as water mains, valves, hydrants, tanks, and service lines are spatially located and attributed with information about the distribution system. This information is supplemented with paper mapping and files as necessary. This process provides the means for CWC to document data and provides the Company with an efficient means to identify DSIC eligible facilities for replacement. These efficiencies translate into direct savings to the customers by specifically targeting the appropriate facilities to be replaced.

CWC has also developed a LSL inventory to locate, track, and replace Company-owned and Customer-owned service lines that contain lead, galvanized steel downstream of a LSL, and lead pigtails, goosenecks, or other fittings connected to LSLs. Columbia Water has incorporated the LSL inventory into its GIS to map and manage these assets. This information is supplemented with paper mapping and files as necessary.

CWC owns the following water system components:

> *Water mains* – In a water distribution system the water mains form the network necessary to distribute water to the customers. Larger water mains are used to move large volumes of water to pressure zones and key demand areas. Smaller mains fill in the network and are normally located beneath the streets and roads in the front of homes, businesses, schools and factories. Water gets delivered from the water main to the customer through a service line. CWC owns approximately 722,890 Linear Feet (LF) of water mains, not including the East Donegal Rate District. The material type of the water main generally depends on the installation date and the installing party. Newer mains are normally ductile iron cement lined (DICL) pipe with the older mains being mainly unlined cast iron pipe. Very limited pockets of polyvinyl chloride (PVC) exist within the system.

Company-Owned Service lines - Water gets delivered from the water main to the customer's curb stop through a Company-owned, pressurized service line. CWC owns the service line between the water main and the curb stop (Company-owned service line). The Company-owned service lines vary in size from 6-inch down to ¾-inch with a majority of CWC's service lines being constructed of copper. A small portion of Company-owned service lines may be made of lead. Only copper is used when Company-owned service lines are replaced. The Company owns approximately 10,657 service lines for its Columbia and Marietta Rate Districts and 1,582 service lines for its East Donegal Rate District. The Company estimates the total number of Company-owned LSLs that need to be replaced to be less than 200. CWC plans to identify, at a minimum, a cumulative average of 10.0% of the initial unknown service materials annually by means of utilizing existing records, modeling, statistical analysis, and mechanical excavation.

Valves – Valves are used to control the volume and direction of flow in the distribution system. They are also used to isolate sections of water main for replacements or repairs. Almost all valves are buried and are opened or closed through a valve box that extends from the valve to the ground surface. The valves vary in size from 4-inch through 16-inch. CWC owns approximately 3,570 valves in its system, not including the East Donegal Rate District.

Hydrants – Hydrants are typically located along roadways and rights-of-way. Hydrants are used to flush water from the water system and to assist in fighting fires. Generally, a hydrant can be isolated from the distribution system by opening or closing a dedicated hydrant valve. Hydrants play a critical role in system maintenance and community fire protection. CWC owns approximately 999 hydrants in its system, not including the East Donegal Rate District.

Meters – Meters are used to measure the amount of water used by a customer. Meters are sized based upon the amount of water a customer uses. Typically residential customers have a 5/8-inch or 3/4-inch meter. Commercial customers have meters that range from 3/4-inch through 2-inch meters. Industrial customers normally have meters in the 2-inch through 6-inch range. CWC owns approximately 10,407 meters in its system, not including the East Donegal Rate District.

Customers own the following water system components:

Customer-Owned Service Lines - the portion of the service line extending from the Curb Stop to the meter or one foot inside a building foundation, whichever is farther (Customer-owned service line). The Customer-owned service line is owned by the customer. Generally, any replacement of the Customer-owned service line is the responsibility of the customer and not included in this LTIIP. However, Customer-owned service lines are included in this LTIIP only for purposes of the LSLR Plan and the replacement of Customer-owned service lines made of lead materials. The Customer-owned service lines vary in size from 6-inch down to ¾-inch with a majority of Customer-owned service lines being constructed of copper. A small portion of Customer-owned service lines may be made of lead. Copper or plastic is used when Customer-owned service lines are replaced

pursuant to the LSLR Plan. The Company has identified approximately 12,115 Customer-owned service lines across all three rate districts. The Company estimates the total number of Customer-owned LSLs that need to be replaced to be less than 400. CWC plans to identify, at a minimum, a cumulative average of 10.0% of the initial unknown service materials annually by means of utilizing existing records, modeling, statistical analysis, and mechanical excavation.

Table 1 provides a breakdown of eligible property by type, not including the property eligible for replacement under the LSLR Plan. Table 2 provides a breakdown of the water main by size. Table 3 provides a breakdown of eligible property for the LSLR Plan. Table 5 provides a breakdown of the company side and customer side service line materials eligible under the LSLR Plan by material.

Table 1 – Types and Age of Eligible Property

Property Type	Quantity***	Age (Year)
Water mains **	722,890 LF	1875 - 2023
Company-owned service lines	10,657 EA	1875 - 2023
Valves	3,570 EA	1875 - 2023
Hydrants	999 EA	1875 - 2023
Meters	10,657 EA	1990 - 2023

** - less than 2% of all water mains were installed prior to 1900.
*** - does not include the East Donegal Rate District.

Table 2 – Quantity of Water Mains by Size

Water Main Diameter (inches)	Quantity (Linear Feet)**
4	7,550
6	143,650
8	311,050
10	52,200
12	195,000
16	13,100
36	340
TOTAL	**722,890**

** - does not include the East Donegal Rate District.

Table 3 – Types and Age of Eligible Property Under the LSLR Plan

Property Type	Quantity**	Age (Year)
Company-owned service lines	12,051 EA	1875 – 2023
Customer-owned service lines	12,050 EA	1875 - 2023

** - only eligible to the extent the service lines are made of lead materials.

Table 4 – Company-Side and Customer-Side Service Lines Eligible Under the LSLR Plan by Material

Company Side Material		Customer Side Material	
Lead	4	Lead	1
Copper	4,297	Copper	2,135
Unlikely Lead	4,560	Unlikely Lead	5,103
Unknown	3,173	Unknown	4,807
Likely Lead	1	Likely Lead	1
Other	16	Other	3
TOTAL	12,051	TOTAL	12,050

Section 2 – Schedule for Planned Replacement of Eligible Property

CWC understands the importance and benefits of continuous renewal of aging infrastructure to continue to provide safe and reliable service to our customers. This section provides an overview of the planning process for replacing aging water distribution system infrastructure and Company-owned and Customer-owned LSLs. This section does not discuss the planning process for new water main extensions or for improvements to treatment, storage and pumping facilities since they are not DSIC eligible.

Many components must be evaluated and weighted when determining which infrastructure to replace in a given year. In general the following components, in order of priority, are used to select infrastructure to replace each year:

- Planned state highway improvements;
- Planned municipal street improvements;
- Planned large scale improvements by other utilities;
- Water main break frequency;
- Age;
- Material quality; and
- Installation quality.

The first three items are given the highest priority since CWC has little to no influence on the scheduling of work by outside entities. CWC understands the significant benefit to the customers and municipalities when infrastructure is replaced and/or improved concurrently with other public infrastructure work. CWC meets at least annually with the municipalities in which it serves public water to coordinate the replacement of water system infrastructure with planned street upgrades. This directly reduces the cost to the Company and thus, to customers, by providing for less construction work and expense to replace these lines.

With respect to material quality, the Company will prioritize the replacement of services lines made of lead materials. These projects will be prioritized based on targeted sensitive populations as defined by the Environmental Protection Agency (EPA) and the Pennsylvania Department of Environmental Protection (PADEP), which includes areas with elevated levels of lead in tap water, areas with high concentrations of lead service lines, and/or areas of the distribution system which have elevated corrosion rates. A list of sensitive populations has also been developed to determine the service line materials. The list includes schools, nursing homes, large apartment buildings, churches, and industries. These service lines have been or will be detailed as sensitive populations in the Service Line Inventory. Homes with multiple meters and multiple family residents will also be prioritized to determine service line material.

Lead materials will be identified through four methods: (1) in combination with main replacements, (2) through mechanical excavation, (3) through customer self-surveys, and (4) emergency repairs, as set forth below:

> *In Combination with Main Replacements* - As part of its broader LTIIP efforts, Columbia Water will analyze record-reviews of old age mains within the oldest parts of the distribution system to determine which water mains in the distribution system should be replaced. Prior to choosing a LSLR Project Area, the Company's distribution crew will review records and/or physically inspect a portion of the service lines within a proposed area to gauge the likelihood of lead within that area. Coordination with municipalities will take place to minimize costs and minimize impacts on roads and neighborhoods. Once the LSLR Project Areas are determined, the projects will be posted on the Columbia Water website at least six (6) months in advance of the work being done. Prior to the work being initiated, Columbia Water staff will reach out to the customers to determine all service line materials within the affected area, and to provide the customers with detailed information regarding the routine procedures and the potential health risks involved.

Mechanical Excavation - Areas with a higher likelihood of having lead service lines will be prioritized for these projects. Columbia Water will physically excavate the service lines to determine material types. If a service line is determined to be lead, coordination will occur with the customer(s) and the property owner to have the service line replaced.

Customer Self-Surveys - Columbia Water will reach out to the customers with lead, galvanized requiring replacement, or unknown service lines. Customers who discover a lead service line may call and schedule to have their service line replaced. CWC will schedule to replace customer-owned lead service lines. If the company side is lead, it will be replaced at the same time with the customer side. These replacements will occur as discovered.

Emergency Repair - If a lead service line is leaking or otherwise defective at the time it is discovered, CWC will replace the lead service line in accordance with its tariff. Columbia Water staff will maintain the proper equipment and tools necessary for emergency service line replacements. If a lead service line is discovered during an emergency but is not leaking, the replacement of the line will be scheduled for replacement at a later date.

The Company plans to undertake repair and replacement of its system components in the following manner:

Water main replacement – Work normally entails full replacement of the water main (as opposed to rehabilitate) since this option eliminates long-term structural and integrity deficiencies that remain when a water main is simply rehabilitated. Further, this option is also considerably less disruptive to the customer since the new main can be installed, tested and placed into service before moving service lines from the old main to the new main. Disruption of water service is minimal since the customer is without service during their service line switch over only. In areas where considerable construction or restoration costs would be incurred to replace a water main, rehabilitation of the existing main is pursued.

Valve and hydrant replacement – Work normally involves the full replacement of the valve and hydrant. Occasionally a relatively new valve or hydrant will be rebuilt and/or reused but only in those situations where the reliability and integrity are well known. Valves and hydrants normally get replaced at the same time a water main is being replaced or rehabilitated. There are times when critical valves and hydrants are replaced independently of a full scale water replacement project. Properly operating valves greatly benefit the customers since it minimizes the geographic area impacted by a main repair and minimizes the amount of time needed to make a repair. A schedule of valve and hydrant replacements is provided in Table 5.

Company-Owned Service line replacement – Work normally involves the full replacement of the company-owned service line between the water main and the curb stop. The work will include replacement of the curb stop and curb box. Company-owned service lines get replaced during full scale water replacement projects or if the Company determines they otherwise need to be replaced due to conditions including but not limited to leaks or malfunction.

Meter replacement or repair– Residential and commercial meters normally involve full replacement. Some commercial and industrial meters can be rehabilitated. Meter replacement is typically based upon meter age. CWC replaces its meters in compliance with the schedule in the Commission's regulation at 52 Pa. Code § 65.8. Accelerated replacement of meters will benefit customers directly through more accurate meter readings.

Lead service line replacement – Work involves replacing Company-owned and Customer-owned LSLs using existing routes through a combination of pipe splitting and/or pipe pulling. This approach removes or displaces existing pipe while simultaneously replacing it with a new pipe and is the preferred method under normal circumstances. Columbia Water may also utilize guided boring to install new pipe along a different route or using open trench excavation to remove replace the pipe. The appropriate replacement technique will depend on a combination of many site-specific characteristics, including, but not limited to, time constraints, soil characteristics, depth to ground water or rock, depth of road foundation, condition of the service line, proximity of other utility services (e.g., electric, gas, cable, sewer, storm water), site conditions (e.g., access, parking, paving, landscaping, overhead obstructions), pipe conditions (e.g., length of pipe, pipe diameter and wall thickness, bury depth, configuration, and repair history, and conditions inside the home like a finished basement with limited access to the water meter and plumbing. All new pipe installation will be copper or plastic.

Section 3 – Location of Eligible Property

All of the CWC's eligible property is located in Lancaster and York Counties, Pennsylvania. More specifically, the property is located in the boroughs of Columbia, Marietta and Mountville and in portions of the townships of West Hempfield, East Donegal, Hellam and Manor. See Figure 1 for additional details.

Areas with Company-owned and Customer-owned LSLs are more specifically found on houses built prior to 1950 with water mains older than 1970 within Columbia Borough and Marietta Borough. Though lead service line materials may be found in Mountville Borough and in portions of the townships of West Hempfield, East Donegal, Hellam and Manor. See Figure 1 for additional details.

Section 4 – Estimate of the Quantity of Eligible Property to be Replaced

Table 5 identifies eligible property that is projected to be replaced in the next five years. These quantities were prepared based upon the best available information (planned municipal and utility projects, main break data, pipe age, etc.) at the time this plan was prepared. Actual quantities may vary depending on conditions that could change in the distribution system or changes made by the municipalities to their street projects.

Table 5 – Projected Quantities of Eligible Property to be Replaced for 2023 - 2027

Year	Water Main (LF)	Service lines (ea.)	Valves	Hydrants	Meters
2023	1,200	30	5	3	140
2024	1,200	30	5	3	140
2025	1,200	50	5	3	140
2026	1,200	50	5	3	140
2027	1,200	50	5	3	140

Prior to 2024, the LTIIP contained 30 service line replacements. The Company-owned service lines being replaced were primarily made of lead materials. The Company is now planning to undertake 50 service line replacements, which includes replacing Company-owned and Customer-owned LSLRs, on an annual basis beginning in 2025.

Section 5 – Projected Annual Expenditures

The projected annual expenditures for the 2023 to 2027 period are listed in Table 6 below. These estimates are based upon the quantities listed in Table 5 and recent construction costs. A break down by category is provided in Table 7.

Table 6 – Projected Annual Expenditures for 2023 - 2027

Year	Projected Annual Expenditures
2023	$280,000
2024	$280,000
2025	$380,000
2026	$380,000
2027	$380,000

Table 7 – Projected Annual Expenditures by Category for 2023 - 2027

Year	Water Main	Service Lines	Valves	Hydrants	Meters	Total
2023	$160,000	$45,000	$15,000	$10,000	$50,000	$280,000
2024	$160,000	$45,000	$15,000	$10,000	$50,000	$280,000
2025	$160,000	$145,000	$15,000	$10,000	$50,000	$380,000
2026	$160,000	$145,000	$15,000	$10,000	$50,000	$380,000
2027	$160,000	$145,000	$15,000	$10,000	$50,000	$380,000

Prior to 2024, the Company was already investing $45,000 into replacing primarily Company-owned service lines made of lead. The Company is committing to an additional $100,000 for a total of $145,000 for Company-owned and Customer-owned LSLRs beginning in 2025. For all projects, the most prudent, cost-effective methods will be used to complete the project. Almost all eligible property is abandoned in place after the replacement infrastructure is installed and therefore is not salvageable. Meters can be salvaged and are sold at local salvage yards.

Section 6 – Acceleration of Infrastructure Replacement

CWC has a track record of investing in its infrastructure to maintain safe and reliable service to all of its customers including infrastructure not eligible for DSIC. Over the past 5 years considerable investment has occurred in major upgrades of its water system including a system-wide security system, four (4) emergency generators, repainted two tanks, and installing a new intake in the Susquehanna River. In addition CWC purchased an adjacent water system that was being operated by part-time contractors.

In addition to the capital expenditures listed above, CWC, through the use of its DSIC, continued to replace water mains, Company-owned service lines, valves, hydrants and meters. Figure 2 graphs the projected and historical DSIC eligible capital expenditures. With the completion of the large projects listed above, additional capital will be directed towards expediting infrastructure replacement.

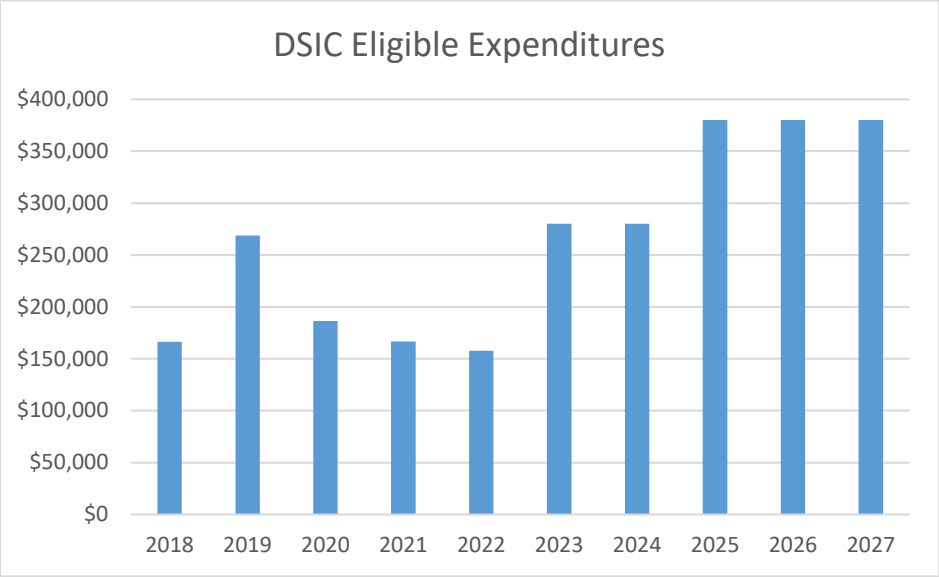

Figure 2 – Projected and Historic DSIC Eligible Expenditures

The projected DSIC eligible expenditures will accelerate the replacement of infrastructure by approximately 80 percent. Moreover, through the Company's LSLR Plan, the Company will make a concerted effort to replace existing LSLs in a timely manner within the time frame set forth in 52 Pa. Code § 65.53(a). The LSLR Plan will take place in conjunction with Columbia Water's other infrastructure investments.

Section 7 – Workforce Management Plan and Training

To ensure system reliability, public safety, quality installation and cost-effectiveness, all DSIC eligible projects will be constructed by qualified personnel. CWC uses a competitive bidding process for the purchase of piping, valves and hydrants. A list of materials is prepared for the project and sent to the four (4) major pipe suppliers for price quotes. CWC utilizes its own staff and equipment for the installation of water mains, Company-owned service lines, Customer-owned service lead service lines, valves, hydrants and meters. Company employees utilized for this type of work have extensive training in the use of heavy equipment, pipe laying procedures, disinfection procedures and safety training. For water mains greater than 12-inches in diameter, stream crossings or expedited Pa DOT projects, CWC uses qualified local contractors for water main, valves and hydrant installations. These local contractors are prequalified based upon experience with similar projects, safety record, and qualifications of personnel. All project sites are inspected regularly throughout the construction process by Company personnel.

Section 8 – Outreach and Coordination with other Utilities

CWC meets annually, and often times more frequently, with the municipalities where it provides pubic water service to coordinate the replacement of water main with the reconstruction and/or repaving of streets and roadways. These meetings often times include the other utilities serving the same areas. CWC coordinates its replacement projects to coincide with other planned roadway and utility work. PaDOT is very effective at notifying utilities well ahead of planned state highway projects making coordination of the work an easy process. In each of the municipalities where CWC provides public water service, public officials have a strong record of planning street projects far enough in advance to allow each of the major utilities to upgrade facilities as necessary.

For each project, CWC coordinates all work with the state or local municipality through planning meetings and the permitting process. In addition, CWC utilizes the PA One Call system to minimize utility conflicts and notifies customers of proposed work with door hangers throughout the construction process.

CERTIFICATE OF SERVICE

I hereby certify that I have this day served a true copy of the foregoing document upon the parties, listed below, in accordance with the requirements of 52 Pa. Code § 1.54 (relating to service by a party).
