## **CONSERVATION SERVICE PROVIDER (“CSP”) APPLICATION FOR REGISTRATION IN THE COMMONWEALTH OF PENNSYLVANIA**

Conservation Service Providers (“CSPs”) have a specific role under Act 129, which requires a covered Electric Distribution Company’s Energy Efficiency and Conservation (EE&C) plan to include one or more CSPs to implement at least a portion of the EE&C Plan. 66 Pa.C.S. § 2806.1(b)(1)(i)(E). CSPs provide information and technical assistance to EDCs on *measures* that enable a person to increase energy efficiency or reduce energy consumption. CSPs must have no direct or indirect ownership, partnership or other affiliated interest with an EDC. 66 Pa.C.S. § 2806.1 (m). Only registered CSPs may advise an EDC and/or provide consultation, design, or administration or management services to an EDC related to the implementation of the EDC’s EE&C Plan. As such, registration of business entities as approved CSPs is required before entering into a contractual agreement with an EDC exclusively for the provision of consultation, design, administration, management or advisory services regarding that EDC’s EE&C plan. This registry is not intended as a resource for business, whose sole purpose is the installation of measures, supplying of equipment or other contracting work for use by the general public and EDC customers. If providing such services, registration as a CSP is not required for entering into an agreement with an EDC.

Any CSP subcontractor with an annual contract cost that equals or exceeds 10% of the CSP annual contract cost and is directly performing services pursuant to a contract with a CSP which has contracted with an EDC after Commission approval should also register as a CSP. This does not include third party contractors which participate in or support an EE&C Plan but are not directly contracted with a CSP which has a direct contractual relationship with the EDC subject to Act 129.

To qualify an applicant must have at least two years of experience in providing program consultation, design, administration, management or advisory services related to energy efficiency and conservation services. CSP registration is not required of entities that limit their services to the installation of energy efficiency measures or the provision of equipment or materials to EDC customers or the public in general.

**ev.energy has delivered a full range of smart charging solutions, from 17 passive managed charging programs that encourage consumers to shift their own consumption to 24 active managed charging programs that automate charging to the cheapest and greenest times of day. With active programs, we have experience in static load shifting that help customers automatically benefit from time-of-use (TOU) rates and enables utilities to call manual demand response events, as well as more dynamic and automated load shaping programs that unlock the load flexibility of EVs across a 24-hour day (at intervals of 15 minutes or less) or smooth secondary peaks that occur when many vehicles plug in after a TOU window. In 2023, we deployed a bidirectional charging demonstration in the United Kingdom where we tested the benefits of V2H and V2G, including market research on customer receptivity to**

these programs. We are working on a partnership with a major auto OEM to deploy an AC bidirectional pilot in the U.S. This table shows our full list of clients in North America.
