

Re: Petition – Use of Mobile GPS Taxi Meter Application

PUC Certificate No.: A-6328235

Applicant: Mehmet Anigi

Dear Pennsylvania, Public Utility Commission,

I respectfully request official confirmation regarding the use of the mobile GPS taxi meter application “Taximeter – GPS Taxi Cab Meter” for my call-and-demand service operating under PUC Certificate A-6328235.

I have programmed the application to match the exact rates in the approved tariff and performed multiple test trips to verify:

- Mileage is calculated correctly
- Time-based charges match the tariff
- The total fare is accurately displayed
- The fare is visible to the passenger inside the vehicle

Attached to this filing are:

- Screenshots of the application showing fare calculation
- Photographs of the application display inside the vehicle
- A sample test-trip showing correct mileage and tariff calculation

I respectfully request guidance on whether:

This GPS-based mobile application may be accepted for official fare calculation, or

A physical taximeter must be installed.

Thank you for your time and consideration.

Sincerely,

Mehmet Anigi
