Re: Docket No. M-2025-3054271

I support the following statement from the Better Path Coalition and No False Climate Solutions PA. “The problems being addressed in PUC’s tentative order are largely manufactured ones resulting from the state’s rush to get into the data center business before the boom goes bust. As is too often the case, the public is only engaged after the big decisions are made. Our first opportunity to comment comes when the only things left to decide are how to deal with the new project/business/industry. At that point, advancement of the thing under consideration is taken to be an inevitability when it really isn’t. Therefore, we feel it is important to state up front that we oppose the approval of hyperscale data centers in Pennsylvania based on many well-documented concerns about their environmental, health, safety, climate, quality of life, economic, and ethical impacts that scattershot regulations across agencies, in this case tariffs, cannot address. Our regulatory agencies should be our advocates, using their expertise to stop the state from creating preventable problems rather than resigning themselves to managing them.”

What will you do to ensure that PA regulatory agencies do their jobs to protect Pennsylvania citizens from the environmental, health, safety, climate, quality of life, economic, and ethical impacts of massive data centers?
