R-2025-3057164

Dear Chair of PUC:

I request that the PPL request for increasing electric distribution rates be denied. Instead, I suggest that the company do the following: The pay, benefits and pensions of the CEO, CIO, CFO, board of directors, and senior managers be cut by 50% for the next 5 years. In addition, dividends should be cut by 50% for 5 years as well. These monies can then be used to pay for the desired improvements.

Seniors depend on electricity to run medical equipment to keep them alive. Many seniors can't work to earn extra money due to their health issues. (Especially veterans!). Our pensions and social security aren't rising, but all our other expenses are. We are choosing between food or electricity to run our medical equipment.

Why is PPL trying to kill off their customers?

Let them, instead, make the changes I suggested. Deny their rate increase!

Yours,

Sharon Haffey
