

The proposed increase of energy cost pushed on to local communities and businesses is outrageous. These AI data base centers already have a huge unregulated environmental impact on the communities. These big corporations can foot the bill if they want to consume this energy and need to be better regulated. The executive order signed recently to have no state interfere with regulating these data centers is outrageous and we all need to do better. Let's start with not putting the financial burden on the community and let the corporations foot the bill.
