To Whom it May Concern:

I'm not opposed to progress, but at what costs to the citizens of Pennsylvania and to the environment. Before I would purchase a house, I would ask what are the average monthly heating bills. I might be able to afford to live in the house. What are the costs going to be to run the data center and who will pay for it? Why should my electrical cost increase because of the new data center? I'm tired of corporations receiving tax breaks and the average citizen picks up the bill.

Thank you.
