

Hello,

I am in full support of the Docket Number M-2025-3054271 and Katie Muth's efforts to protect the homeowners from big businesses and the rising electricity costs incurred by AI Data Centers. It only makes sense that any increase in utility load and expense due to large companies or AI efforts be the sole responsibility of the company{ies} themselves and not be passed on to individual homeowners in Dauphin County.

Please make sure companies foot this expense and not homeowners!

Thank you. Respectfully,

Lisa Rehrer
