**Initial issuance** for nuisance gusts with a weak frontal passage Wed and more importantly a preliminary outlook for a late work-week wind/snow event (details not set in stone for the late-week event).

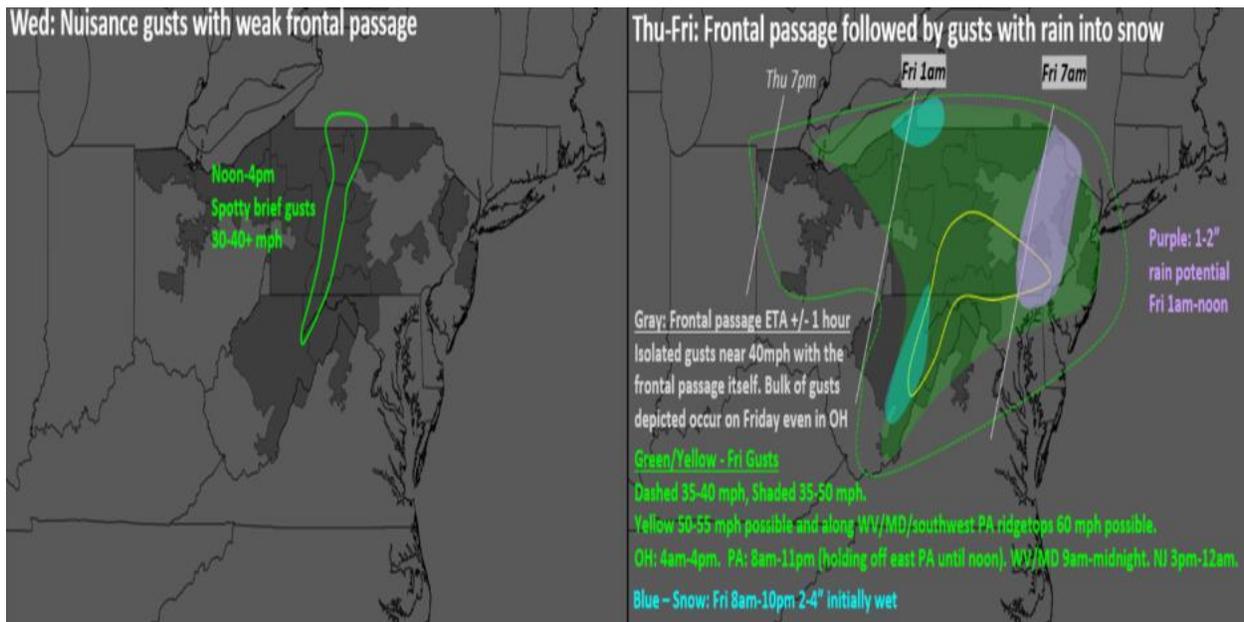

**Tuesday, December 16, 2025 @ 0815**

**Changes.**

Wed: Limited time-widow to the afternoon.

Thu-Fri: Frontal passage - changed timing in PA/WV/MD/NJ. Snow - removed OH area, modified northwest PA area. Wind - added specific timing, modified details of max wind gusts and areas. Rain - added 1-2" rain potential area.

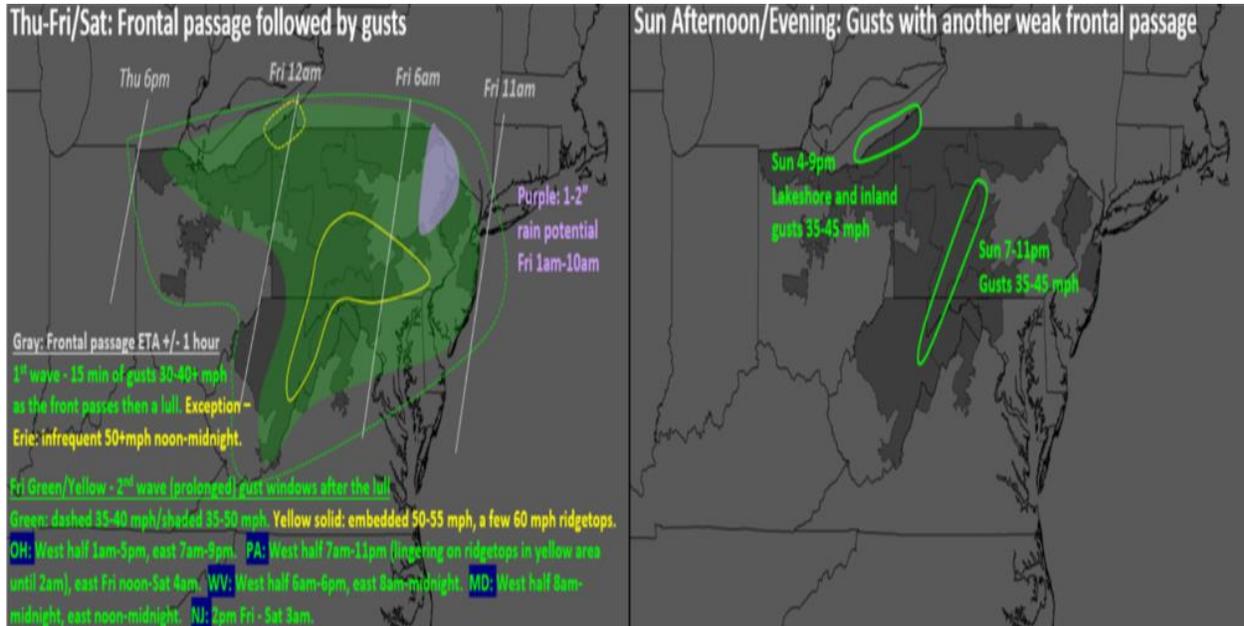

**Wednesday, December 17, 2025 @ 1618**

**Changes:**

**Thu:** Added area in northwest PA that locally could gust to 50+ mph afternoon/evening until the front arrives.

**Thu-Fri:** Fine-tuned timing of frontal passage and second wave of wind.

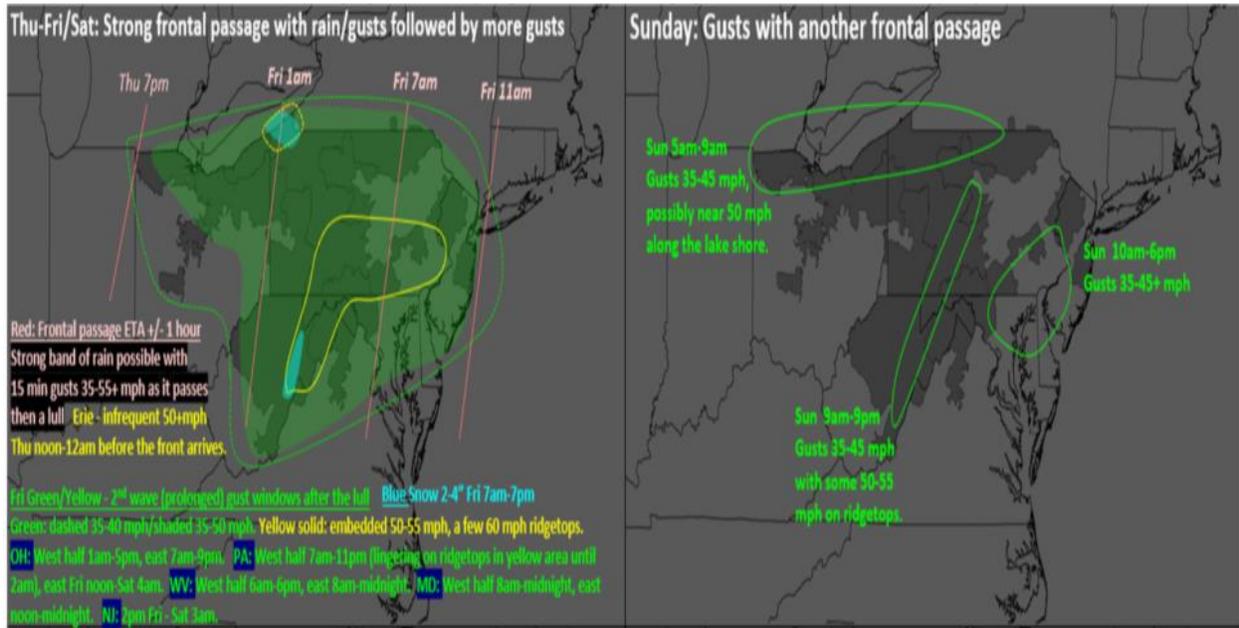

**Thursday, December 18, 2025 @ 0828**

**Changes:**

Thu-Fri: Added mention of a strong band of rain/gusts with the frontal passage itself, expanded generally 50+ mph gust area, re-introduced small snow areas.

Sun: Significant changes applied to timing/location of wind gust threat.

**Friday, December 19, 2025 @ 1513**

**Changes:**

Quick update based on latest guidance to affirm previously estimated end times. Also touched up timing and decrease magnitude of gusts on Sunday which looks more nuisance-type than anything significant (if the Sunday trend continues, we might be able to drop the alert for that day).

Regardless, still looking quiet Mon through Christmas from a damaging weather perspective (some light snow Monday turning into rain by Tue with a separate round of light to moderate rain Christmas day – none of which looks sufficient to warrant an alert)
