<sup>4</sup> Application p. 6

<sup>5</sup> 66 Pa. C.S. § 1102(a)(2).

The Applicant avers that it will primarily offer fiber-based transport services, including private line, Ethernet, and optical wavelength services, to enterprise and wholesale customers. The Applicant further states that it will provide these services with facilities under its control, which will be obtained from its affiliates, Brightspeed Broadband, LLC, pursuant to commercial agreements.<sup>6</sup>

Based upon the averments in its Application, the Commission determines that Brightspeed will be using non-switched facilities to provide dedicated point-to-point (or multipoint) transport services to a host of jurisdictional and non-jurisdictional communications service providers and to other customers in the Commonwealth. The Commission acknowledges that an applicant that offers a transmission path service on a non-discriminatory basis to the public is providing a jurisdictional telecommunication service under 66 Pa. C.S. § 102.<sup>7</sup>

Additionally, the Commission has certificated competitive non-switched dedicated direct access point-to-point transmission service or “special access service”<sup>8</sup> to business customers and other large volume users within the Commonwealth since 1991.<sup>9</sup> CAP authority may only be used to provide dedicated transport services using non-switched facilities. It may not be used to access the Public Switched Network, to provide local service, or to offer toll calling to end user customers. If a utility with CAP authority wishes to provide access to the Public Switched Network, or to provide local exchange telecommunications service and/or interexchange calling services (intraLATA or

Section 1103(a) of the Code authorizes the Commission to approve an application “only if the commission shall find or determine that the granting of such certificate is necessary or proper for the service, accommodation, convenience, or safety of the public.” 66 Pa. C.S. § 1103(a). Premised upon our review of the Application and the proposed tariff, we conclude that the Applicant’s request to offer dedicated transport services using non-switched facilities on a wholesale basis to other communications service providers and on a retail basis to business customers is consistent with the aforementioned statutory criteria in the Code and also with our Orders, our regulations, and TA-96, as the Applicant’s proposed CAP services do not raise concerns at this time regarding safety, adequacy, reliability, or privacy. Further, through the attestations in and attachments to its application, and absent any information to the contrary, the Applicant has demonstrated that it is financially, managerially, and technically capable of providing special access services as a CAP. Consistent with the aforementioned, we conclude that the Applicant meets the requirements for certification as a CAP, consistent with this Order.

Notwithstanding our conclusion that the Applicant meets the requirements for certification as a CAP, we note that there are a few deficiencies in the proposed tariff.

Consequently, we shall direct the Applicant to revise its tariff in accordance with the changes noted in Appendix A of this Order.<sup>10</sup> The Applicant shall thereafter file its Initial Tariff reflecting the requested changes on or before sixty days from the date of entry of this Order. The Applicant may file its Initial Tariff electronically, consistent

<sup>10</sup> Regardless of the review process, any tariff provision(s) inconsistent with the provisions of the Code, TA-96, our regulations, or Orders will be deemed inoperative and superseded.

with Commission rules.<sup>11</sup> Copies of the Initial Tariff shall also be served upon the same entities receiving service of the original Application. If the time required for such resolution and filing exceeds sixty days, the Applicant may request an extension of an additional sixty days with the Commission's Secretary. Thus, if the Initial Tariff is not filed within sixty days (120 days including the extension) of the entry of this Order, the Application will be dismissed and the authority granted herein will be revoked without further Commission Order.

We note that the Commission will only approve tariff provisions regarding limitation of liability consistent with law. The Commission does not have jurisdiction to determine liability or award monetary damages. Any tariff provisions contained in the Initial Tariff regarding limitation of liability inconsistent with any applicable laws, rules and regulations will be deemed inoperative and superseded.

To the extent that the proposed tariff contains rates, the Initial Tariff may become effective on one day's notice from the date upon which it is filed and served.

Carriers are required to provide telecommunications service to customers in Pennsylvania within one year of certification.<sup>12</sup>

In accordance with the affidavit that accompanied the Application, the Applicant has agreed to abide by all applicable federal and state laws and regulations and by the decisions of the Commission. We remind the Applicant that, in accordance with our *TA-96 Implementation Orders*, a public utility that seeks Commission certification or that is certificated in Pennsylvania to provide telecommunications service, as defined by state and federal law, must provide the service in full compliance with all applicable provisions of Pennsylvania and federal law. This includes compliance with Section 1511

of Pennsylvania's Business Corporation Law, 15 Pa. C.S. § 1511,<sup>13</sup> when siting facilities/equipment in public rights-of-way. Failure to comply with applicable law may result in fines being imposed against a public utility or in the suspension or revocation of the utility's Certificate of Public Convenience, consistent with due process.

We remind the Applicant that certificated public utilities in Pennsylvania are required to file with the Commission an accurate annual financial report and an accurate separate statement of gross intrastate (wholesale and retail) revenues for fiscal assessment purposes, as received from operations conducted pursuant to the authority granted by the Commission's certification order.<sup>14</sup> This requirement includes filing an accurate and separate statement of gross intrastate revenues from jurisdictional CAP services offered in Pennsylvania. Applicant is required to accurately and separately account for and report to the Commission its jurisdictional revenues related to the CAP portion of its business. Additional reporting of intrastate retail revenues is also required for the purpose of Pennsylvania Universal Service Fund contribution assessments.<sup>15</sup> Failure to comply with applicable reporting requirements may result in billing for back payments due and the imposition of fines and/or other lawful remedies, including revocation of certification, consistent with due process.

<sup>13</sup> 15 Pa. C.S. § 1511(e) provides as follows: "A public utility corporation shall have the right to enter upon and occupy streets, highways, waters and other public ways and places for one or more of the principal purposes specified in subsection (a) and ancillary purposes reasonably necessary or appropriate for the accomplishment of the principal purposes, including the placement, maintenance and removal of aerial, surface and subsurface public utility facilities thereon or therein. Before entering upon any street, highway or other public way, the public utility corporation shall obtain such permits as may be required by law and shall comply with the lawful and reasonable regulations of the governmental authority having responsibility for the maintenance thereof."
