

**VIA E-FILING**

March 16, 2026

Matthew L. Homsher, Secretary  
Pennsylvania Public Utility Commission  
400 North Street  
Keystone Building  
Harrisburg, PA 17120

**Re: Aqua Pennsylvania, Inc.  
Annual Asset Optimization Plan  
Docket No. M-2026-3060865**

Dear Secretary Homsher:

Enclosed please find Aqua Pennsylvania, Inc.'s ("Aqua") Amended Annual Asset Optimization Plan ("Amended AAOP") for its Long-Term Infrastructure Improvement Plan approved in Docket No. P-2023-3043755. This Amended AAOP provides information on the twelve-month period ended December 31, 2025, and projections for the upcoming twelve-month period ending December 31, 2026. The Amended AAOP was updated to include four lead service line replacements that were not in the original 2025 AAOP filing.

A **Redacted** version of Attachment A to the Amended AAOP is included in this filing. The CONFIDENTIAL version of this report and the CONFIDENTIAL electronic version of Attachment A of Aqua's Amended AAOP will be provided via separate mailing to the Secretary's Bureau and to the entities on the Certificate of Service.

If you have any questions regarding this filing, please contact me at 610-645-1130 or by email at [astahl@aquaamerica.com](mailto:astahl@aquaamerica.com).

Sincerely,

A handwritten signature in blue ink, appearing to read "Alex Stahl".

Alexander R. Stahl  
Regulatory Counsel

cc: Certificate of Service  
Ken Shaffer, Bureau of Technical Utility Services (via email, [kennshaffe@pa.gov](mailto:kennshaffe@pa.gov))  
Matthew Lamb, Bureau of Technical Utility Services (via email, [mlamb@pa.gov](mailto:mlamb@pa.gov))

Enclosure

## **AQUA PENNSYLVANIA, INC.**

### **Amended Annual Asset Optimization Plan for Year Ended December 31, 2025**

Aqua Pennsylvania, Inc. (“Aqua” or the “Company”) is submitting this Annual Asset Optimization Plan (“AAOP”) in accordance with the requirements for the Long Term Infrastructure Improvement Plan (“LTIIIP”) as previously submitted on October 31, 2019 per Chapter 13 of the Public Utility Code, 66 Pa. C.S. §§ 1350-1360, Chapter 121 of Title 52 of the Pennsylvania Code, the Pennsylvania Public Utility Commission’s (“PUC” or the “Commission”) Final Implementation Order entered on August 2, 2011 in Docket No. M-2012-2293611, and the Commission’s Supplemental Implementation Order entered on September 15, 2016 in Docket No. M-2012-2293611. The Company’s LTIIIP covers infrastructure investment through its established and longstanding Distribution System Improvement Charge (“DSIC”). The Company received Commission approval of its LTIIIP on June 13, 2024 in Docket No. P-2023-3043755. This AAOP provides information on the reporting period ended December 31, 2025 and projections for the upcoming year ending December 31, 2026.

#### **1. INTRODUCTION**

Aqua owns and operates water systems serving approximately 459,955 customers in 32 counties throughout Pennsylvania. Its water distribution systems include approximately 5,945 miles of pipe, 24,987 hydrants, 86,416 valves, and 452,814 meters. Aqua’s service territories are designated as either Southeast Pennsylvania (“SEPA”), which includes a contiguous distribution system within portions of Bucks, Chester, Delaware, and Montgomery counties and separate smaller systems in portions of Berks, Bucks, Chester, and Montgomery counties, or Greater Pennsylvania (“GPA”), which includes Aqua’s service territories outside of SEPA.

Under Commission regulations, a utility with an approved DSIC shall file an AAOP with the Commission. The AAOP shall be filed annually, 60 days after the 12 months of its LTIIIP has expired. An AAOP must include the following:

- (1) A description that specifies all the eligible property repaired, improved and

replaced in the prior 12-month period under its LTIP and prior year's AAOP.

- (2) A description of the eligible property to be repaired, improved and replaced in the upcoming 12-month period.

## **2. ELIGIBLE PROPERTY REPAIRED, IMPROVED AND REPLACED IN THE PRIOR 12-MONTH PERIOD**

The information below presents a comparison of Aqua's budgeted LTIP expenditures and quantities of property, versus actual expenditures and quantities of property. In addition to planned water main replacements, the DSIC budget also addresses capital cost of 1) water main breaks, 2) highway relocations, and 3) tie-ins to eliminate dead ends.

**Table 1** presents the length of water main replaced in 2025. The majority of work completed in 2025 consisted of 62 miles of water main replacement and water main tie-in installation. Approximately 78% of the water main work was completed in SEPA and 22% in GPA. The majority of main installation consisted of replacement of infrastructure that is nearing the end of its expected useful life. A smaller portion of the work consisted of water main tie-in projects to improve water quality and system reliability. The water main work done in 2025 included approximately 5 miles of larger diameter main (16-inch and greater), approximately 16 stream crossings, and approximately 22 miles of water main installation in state roads.

Pipe replacement construction costs in a given year are dependent on the types and locations of projects. For example, work done in a state road or large diameter pipe replacement projects are typically more expensive than a "typical" 8-inch main replacement project in a local residential street. Other major factors that impact schedule and cost include work by other utilities (gas, electric, Municipal sanitary, Municipal storm water, and oil & gas transmission), SEPTA/Railroad crossing approval, PennDOT paving schedules, County paving schedules, Municipal paving schedules, environmental assessment and approvals, as well as short and long-term system hydraulic needs and constraints. Aqua strives to coordinate all of these factors to find efficiencies and cost savings, such as coordinated work with the adjacent gas utility, local Townships and PennDOT to save on paving restoration costs. Aqua's coordination

efforts are described in detail in Section 9. *OUTREACH AND COORDINATION ACTIVITIES WITH OTHER UTILITIES, PENNDOT, AND LOCAL GOVERNMENTS* of the previously submitted LTIP. Thus, the actual replacement mileage and associated costs in a given year will be driven by these various factors, and may vary from the projected mileage to be placed in service in 2025 from the 2024 AAOP presented in Table 1.

**Table 1 – Water Main Replacement in 2025 from 2024 AAOP vs. Actual**

Projected Miles of Pipe to be Replaced in 2025 from 2024 AAOP	Actual Miles Repaired & Replaced 2025
61	62

In addition to pipe replacement, the DSIC program will continue to address distribution system appurtenances - services, valves, hydrants, and meters. **Table 2** presents projected quantities of assets to be addressed in 2025 from Aqua’s 2024 AAOP compared to the actual number replaced. The projected values for 2025 services, valves, and hydrants were projected based on the specific main replacement projects identified at that time. Meter replacement is independent of main replacement projects, and those values are based on scheduled meter replacements.

**Table 2 – Appurtenance Replacement in 2025 from 2024 AAOP vs. Actual**

Services		Valves		Hydrants		Meters	
Planned	Actual	Planned	Actual	Planned	Actual	Planned	Actual
4,071	4,535	556	825	223	755	21,104	27,639

The Company substantially met its targets for appurtenances replaced during calendar year 2025. Differences between projected and actual amounts of appurtenances are impacted by the characteristics of projects completed and the impact of higher costs. Higher inflation in recent years has impacted the costs of labor and materials. The characteristics of replacement projects (i.e., density of population of different projects)

impacts both the projected and actual amounts. The schedule of projects completed during the year is continually evolving based on system needs and field coordination. The list of projects used to generate the projected schedule and quantities is not exactly the same as the projects that were eventually completed in 2025.

**Table 3** below presents the projected expenditures in 2025 from Aqua’s 2024 AAOP alongside Aqua’s actual spending on projects that are DSIC eligible during the Calendar Year Ended December 31, 2025.

**Table 3 – 2025 Projected Expenditures from 2024 AAOP vs. 2025 Actual Spend on DSIC**

<b>Project Group</b>	<b>2025 Projection from 2024 AAOP</b>	<b>DSIC Actual Spend 2025</b>
Main Replacements	\$129,181,486	\$125,136,109
Tie-In Dead End Mains	10,107,907	9,164,630
Capitalized Main Breaks	4,939,000	7,696,170
Highway Relocations	5,350,000	5,214,418
Valve Replacements	1,385,000	1,819,638
Other Main/DistrSysImpr	3,280,800	2,657,080
Eligible Meters	6,459,999	7,762,476
ERT Devices	1,532,984	1,380,000
Renewal Services - Regular	4,965,000	5,307,905
Renewal Services Main Rehab	20,239,040	20,315,765
Replace/Relocate Hydrants	3,830,440	5,185,002
Customer Owned Lead Service Lines	14,280,928	17,098,913
<b>Total</b>	<b>\$205,552,584</b>	<b>\$208,738,106</b>

The projected expenditures included in the 2024 AAOP were based on the Company’s budgeted plan for replacements at the time of the submission of the AAOP.

In the Commission’s approval of Aqua’s current LTIIP, the Commission required Aqua to provide information regarding line breaks and non-revenue water (“NRW”) for its two main

service areas, SEPA and GPA. **Table 4** below presents Main Break<sup>1</sup> and NRW information by operating division for 2025.

**Table 4 – 2025 Main Break and NRW**

Division	Main Breaks	NRW
SEPA	399	6,393,320,619-gals (18.2%)
GPA	181	2,298,560,631-gals (30.3%)

### 3. ELIGIBLE PROPERTY TO BE REPAIRED, IMPROVED AND REPLACED IN THE UPCOMING 12-MONTH PERIOD

In the upcoming 12-month period ending December 31, 2026, the Company has included its projections for expenditures and quantities of property. **Table 5** below shows the projected quantities of eligible main while **Table 6** shows the projected quantities of eligible appurtenances (services, valves, hydrants, and meters).

**Table 5 – Projected Eligible Property for Year Ending December 31, 2026 – Mains**

Year	Projected Miles of Pipe to be Replaced
2026	57

**Table 6 – Projected Eligible Property for Year Ending December 31, 2026 – Appurtenances**

Year	Services	COLSL	Valves	Hydrants	Meters
2026	4,159	1,500	589	175	8,915

The Company’s projected expenditures for Year Ending December 31, 2026 are included in **Table 7** below.

<sup>1</sup> A structural failure of a water main. This definition does not include leaking hydrants, valves, and services, or water main hit or damaged by a third party.

**Table 7 – Projected Expenditures for Year Ending December 31, 2026**

<b>Project Group</b>	<b>2026 Projection</b>
Main Replacements	\$126,230,033
Tie-In Dead End Mains	\$13,711,088
Capitalized Main Breaks	6,412,059
Highway Relocations	5,449,000
Valve Replacements	1,556,129
Other Main/DistrSysImpr	4,104,950
Eligible Meters	4,891,544
ERT Devices	877,008
Renewal Services - Regular	7,245,610
Renewal Services Main Rehab	17,985,065
Replace/Relocate Hydrants	6,869,788
Customer Owned Lead Service Lines	16,324,324
<b>Total</b>	<b>\$211,656,599</b>

#### **4. LEAD SERVICE LINE REPLACEMENTS**

Aqua received Commission approval for to replace Customer-Owned Lead Service Lines (“COLSLs”) on July 15, 2021 at Docket No. P-2020-3021766. Following Commission approval of Aqua’s Petition, the Commission issued regulations on the implementation of Act 120 of 2018.<sup>2</sup> In accordance with 52 Pa. Code § 65.59, the Company provides the following information on its Lead Service Line Replacement (“LSLR”) Program. Aqua filed an updated Lead Service Line Program on October 23, 2023 to comply with the Commission’s regulations.<sup>3</sup> On April 10, 2025 the Commission approved Aqua’s LSLR

<sup>2</sup> *Rulemaking to Implement Act 120 of 2018 at 52 Pa. Code Chapters 65 and 66*, Docket No. L-2020-3019521 (Mar. 14, 2022) (“Act 120 Order”).

<sup>3</sup> Aqua originally filed its Petition for Third LTIP which included the Company’s Lead Service Line Replacement (“LSLR”) Plan. Aqua filed a separate Petition for Approval of its Lead Service Line Replacement Program after consultation with the Commission’s Bureau of Technical Utility Services to establish two separate dockets for the LTIP and LSLR Plan. The separate LSLR Petition was filed on November 27, 2023 and was docketed at P-2023-3044459.

Program. Information for items (1) through (7), (9), and (14), below, are reflected in **Attachment A.**<sup>4</sup>

- (1) The number of Lead Service Lines (“LSLs”) replaced in the preceding year by water system.**
- (2) The length of LSLs removed, by pipe diameter, in each water system.**
- (3) The length, pipe diameters and material types of LSLRs by water system.**
- (4) The actual cost of each LSLR by water system.**
- (5) The average cost of a LSLR by water system.**
- (6) The total annual LSLR expenditures for the calendar year by customer class.**
- (7) The total projected LSLR expenditures for the following calendar year.**
- (8) The entity’s outreach and coordination activities with other entities, the Department of Transportation, local governments and customers.**

The Company described its outreach and coordination efforts in Section 9 of its LTIIP which is applicable to main replacement projects. Regarding LSLRs for one off replacements, the Company coordinates with the homeowner/customer on timing and documentation of the replacement. If the Company needs to replace a LSL into the roadway, proper permitting is obtained from the specific municipality.

The Company has coordinated larger scale LSL survey and replacement projects with municipalities to ensure the municipality is informed of the Company’s activities and can answer questions to residents as needed.

For the Company’s West Chester Project, the Company has communicated with the Borough of West Chester, Chester County, and surrounding communities concerning the replacement project. the Company had met with the West Chester Borough Manager and Direct of Public Works concerning Aqua’s LSLR program and has coordinated more closely with West Chester and the surrounding communities as the Company has implemented replacements. The Company also established a webpage specific to the West Chester Project to provide customers with information.<sup>5</sup>

---

<sup>4</sup> Per the Settlements approved by the Commission for the LSLR Plans of Aqua’s Receiverships systems, any information regarding the LSLR programs is included in this AAOP. See *Petition of Aqua Pennsylvania, Inc., as the Receiver for Twin Lakes Utilities, Inc., for Approval of the Lead Service Line Replacement Program for Twin Lakes Utilities, Inc.*, Docket No. P-2024-3050254, Order Entered August 14, 2025; and *Petition of Aqua Pennsylvania, Inc. as the Receiver for Venango Water Company For Approval of the Lead Service Line Replacement Program for Venango Water Company*, Docket No. P-2024-3050248, Order Entered January 29, 2026.

<sup>5</sup> <https://www.aquawater.com/westchesterleadreplacement.php>

The Company has contacted Athens Borough, Bradford County; Upper Darby Township, Delaware County; Yeadon Borough, Delaware County; Hatboro Borough, Montgomery County; Bensalem Township, Bucks County; Bristol Township, Bucks County and Bristol Borough, Bucks County; Barrett Township, Monroe County Jefferson Township, Lackawanna County, in advance of the projects that will occur in those areas to inform the municipal officials and police departments that surveying and replacement efforts will be taking place in their areas. The Company also set up a website for the Athens Borough project.<sup>6</sup>

The Company will continue to coordinate with entities as survey and replacement projects are undertaken where such coordination will enhance the replacement of LSLs in a timely and constructive manner.

**(9) The number of LSLR refusals for the calendar year, including municipality and reason for refusal.**

The Company had 219 refusals in 2025. Please see Attachment A for further information. The refusals were mainly due to lack of response from the customer/property owner, and were designated as refusals after multiple attempts to engage the customer/property owner. A refusal letter was sent to these customers

**(10) Applicable lead monitoring requirements established by the Department of Environmental Protection (“DEP”) for each of the entity’s water distribution systems.**

In the Act 120 Order, the Commission stated that information regarding this reporting requirement should indicate whether an entity is in compliance with DEP’s lead monitoring requirements.<sup>7</sup>

The Company is in compliance with DEP’s lead monitoring requirements. Details of the Company’s lead monitoring requirements for its systems can be found at:

<http://www.drinkingwater.state.pa.us/dwrs/HTM/SelectionCriteria.html>

**(11) The entity’s compliance with the regulatory requirements established by the United States Environmental Protection Agency and the Department of Environmental Protection, including a description of any violations thereof associated with lead.**

The Company did not have any lead action level exceedances in 2025.

---

<sup>6</sup> <https://www.aquawater.com/athens-sayre-line-replacement>

<sup>7</sup> Act 120 Order at 58.

**(12) The current status of the entity’s Service Line Inventory efforts.**

Aqua provided its first inventory submittal to DEP and the PUC by the due date of October 16, 2024. Aqua will continue to manage the inventory through service line replacements and identifications. The number of service lines with unknown materials will steadily decrease during the required service line replacement period. Aqua will adjust its methodology as required to meet any future changes to the regulations.

Currently, Aqua is using its staff along with third party vendors to review service line materials proactively and prior to main replacement projects, along with macro level review of its entire system. The Company has built an internal database to house service line material identification. Aqua provided its 2025 annual inventory submittal to DEP by the due date of December 31, 2025.

As of year end 2025 the Company has identified the following LSL and galvanized service lines requiring replacement (“GRR”).<sup>8</sup>

<b>Material Type</b>	<b>Company</b>	<b>Customer</b>
Lead	1	77
GRR	409	7,517
Non-lead	437,065	405,478
Lead status unknown	33,273	57,676
<b>Total</b>	<b>470,748</b>	<b>470,748</b>

**(13) The entity’s efforts to obtain grants, low interest loans and donations for LSLRs.**

Aqua continues to explore opportunities to obtain low-cost no-cost financing for LSL replacement projects throughout its footprint.

Aqua has successfully obtained a \$1.3 million grant/low interest loans in 2025 from the Pennsylvania Infrastructure Investment Authority (“PENNVEST”) for the replacement of approximately 242 COLSLs and GRR service lines in the Bristol Township’s system, which includes the surrounding municipalities.

Aqua is also performing tap card audits and field surveys to determine LSL locations throughout the State. The survey data will be used to make multiple PENNVEST grant/loan applications for other Aqua systems. Aqua’s Main system is targeted for a PENNVEST grant/loan application in 2026. Aqua is committed to protecting customer health by replacing LSLs and using financing options that are beneficial to Aqua customers and the Company alike.

<sup>8</sup> This number represents known COLSLs and GRRs and does not include a factor for unknown customer service line materials.

**(14) LSLs found in completed project areas**

There were six LSLs found in a completed project area in 2025. Please see Attachment A for further information.

**(15) Service terminations at the Company's discretion in accordance with Step-In-Rights**

The Company terminated zero customers at its discretion in 2025 under the Step-In Rights provisions of its Tariff where, in the reasonable judgment of the Company, replacement using Step-In Rights would have placed its workers or utility facilities at a safety risk.
