Re: MARL PA PUC Docket #: A-2026-3060856

I am commenting against this transmission line. I was born and raised in Pennsylvania so I care deeply about the people and the land.

High towers with high voltage wires that provide no service to Pennsylvania must be stopped. People's land becomes the ugly view and any right to that land is removed forever. The taxes are paid by you, but a Florida utility now can do what it wants, when it wants on your land. Views, woodland, cropland destroyed to feed data centers in Virginia must be stopped.

Please say no to this devastation of people's lives. High towers and high voltage do not provide for healthy lives.

Respectfully, ~~Sara Evans~~
