5.4 SIP Trunking Service, (Cont'd.)

5.4.5 Rates and Charges

A. Application of Rates

SIP Trunking Service is comprised of two rate elements; a transport charge and a call path bundle. There is no additional charge for the managed router required for TDM or Off-Net provisioning. To the extent facilities are available, services offered under this tariff are provided by the Company on an On-Net basis. Unless otherwise noted, prices for services offered under this tariff reflect the On-Net price for such services. Where service is provided on an Off-Net basis, additional charges may apply.

B. Rates

All rates are applied per SIP Trunking Service arrangement at each service location:
