To whom it may concern,

I disagree with all decisions made in my case. From what I understand, I do not have enough evidence to refute my claim. I will collect notarized documents to prove that my neighbors and I received new meters in the year of 2022 or 2023. I wanted to inform you that the story of me receiving my new meter in 2006 is untrue. If I were given new pipes in my front yard that means it would have been hooked up to old meters, which is also untrue. I was told that it is safe due to the pipes being 9 ft. & 6 inches in the ground, but that does not help in any way. I do not feel safe with the current circumstances and would like this issue to be fixed.

Sincerely, Helena Barnhill
