RE: Compliance Tariff Supplement – Lead Service Line Replacement Program
Docket No. P-2024-3050185

Secretary:

As the operator of the Evitts Creek Water Company, the City of Cumberland is refiling their compliance tariff supplement after receiving guidance from PUC staff. These pages are being refiled as replacement pages to address and revise minor language/formatting corrections.

I, Robert Smith, hereby state that the facts within this submission set forth are true and correct to the best of my knowledge, information and belief, and that I expect to be able to prove the same at a hearing held in this matter. I understand that the statements herein are made subject to the penalties of 18 Pa. C.S. § 4904 (relating to unsworn falsification to authorities).

If there are any questions or issues with this submission, please contact Robert Smith via email (robert.smith@cumberlandmd.gov) or phone (301-759-6600).

Respectfully,

Robert Smith, PE
Director of Engineering and Utilities
Secretary - Evitts Creek Water Company

Supplement No. 001 to
Tariff Water - Pa. P.U.C. No. 4

EVITTS CREEK WATER COMPANY
RATES, RULES AND REGULATIONS GOVERNING
THE PROVISION OF WATER SERVICE
TO THE PUBLIC IN CUMBERLAND VALLEY TOWNSHIP, BEDFORD COUNTY,
PENNSYLVANIA

ISSUED: April 17, 2026

Lead Service Line Replacement (LSLR) Program	22 (C)

(C) Indicates Change

PART V: LEAD SERVICE LINE REPLACEMENT (LSLR) PROGRAM

(1) Supersession

This section of the Company’s tariff supersedes all other conflicting provisions of this tariff for purposes of implementing the Company’s LSLR Program.

(2) Definitions

The following words and phrases, when used in Part V of this tariff, shall have the meanings assigned below unless the context clearly indicates otherwise:

Curb Stop: A water service shutoff valve located in a water service line near the curb or edge of the street and between the water main and the building.

Customer: A party contracting with an entity for service.

Customer-owned Lead Service Line (Customer-owned LSL): The portion of the lead service line extending from the curb, property line or entity connection to an entity’s water meter or, if the entity’s meter is located outside of the structure or water is not metered by the entity, at the first shutoff valve located within the interior of the structure.

Company: Evitts Creek Water Company

Company-owned Lead Service Line (Company-owned LSL): The portion of the lead service line extending from the Company’s main to the Curb Stop.

Distribution system improvement charge (DSIC): The term as defined in 52 Pa. Code § 121.2.

Entity: A public utility as defined in 66 Pa.C.S. § 102 (relating to definitions) engaged in diverting, developing, pumping, impounding, distributing or furnishing water service to or for the public for compensation, a municipal corporation as defined in 52 Pa. Code § 65.52 (relating to definitions), and an authority as defined in 66 Pa.C.S. § 3201(1) (relating to definitions).

Galvanized service line: Iron or steel piping that has been dipped in zinc to prevent corrosion and rusting.

Independent Legal Restrictions: Commission regulations or Orders which otherwise prevent termination of water service at a property including but not limited to winter moratorium, medical certifications, or Commission directed moratoriums or suspensions.

Lead service line (LSL): A service line made of lead that connects the water main to a building inlet and a lead pigtail, gooseneck or other fitting that is connected to the lead line. A galvanized service line is considered a lead service line if it ever was or is currently downstream of any lead service line or service line of unknown material.

Lead service line replacement (LSLR): A service line, whether entity-owned or customer-owned, installed to replace a lead service line.

Lead service line replacement plan (LSLR Plan): A plan and supporting documents submitted to and approved by the Commission that specify how an entity intends to implement its lead service line replacement program.

Lead service line replacement program (LSLR Program): A program submitted to and approved by the Commission for the replacement of lead service lines by an entity.

Lead service line replacement project (LSLR Project): An entity-scheduled lead service line replacement activity either in conjunction with main replacements or as part of a lead service line replacement program.

Lead service line replacement project area (LSLR Project Area): The area encompassing an entity's scheduled lead service line replacement activities, which includes the area within a 1-mile radius of a lead service line replacement project if served by the entity.

LSLR Project Commencement: Installation of the first lead service line replacement within a lead service line replacement project area.

Partial lead service line replacement (Partial LSLR): A lead service line replacement that does not replace both the entity-owned and customer-owned portions of a lead service line.

Property Owner Agreement: An agreement between the Company and a property owner for the replacement of a customer-owned LSL that allows the Company's employees and contractors to gain access to their private property in order to replace their customer-owned LSL prior to the initiation of any work by the Company to replace the customer-owned LSL.

Service line: The pipe and appurtenances which connect any main to an entity's water meter or, if the entity's water meter is located outside of the structure or the connection is not metered by the entity, at the first shutoff valve located within the interior of the structure.

(3) LSLR Plan

Notwithstanding the Rules in this tariff relating to customer responsibility for customer service lines, the Company will replace customer-owned LSLs pursuant to its LSLR Program and LSLR Plan as initially approved by the Commission at Docket No. P-2024-3050185, together with future Commission-approved updates. The Company may

modify its annual cap for LSLRs with Commission approval. The costs incurred by the Company to undertake remediation efforts pursuant to its LSLR Plan shall be recoverable in the Company's DSIC, PENNVEST Surcharge, and in base rates, as applicable.

The Company's LSLR Plan applies to any LSL serving any customer, the replacement of which is operationally feasible, and where the property owner authorizes the replacement or replaces the line in accordance with the Company's LSLR Program.

(4) LSLR Annual Cap

The Company will cap LSLR Projects at three (3) customer-owned LSLRs in the first year and at one (1) customer-owned LSLR on an annual basis thereafter. If a customer reimbursement provided pursuant to this tariff or an emergency LSLR causes the Company to exceed its annual cap, the Company will increase its current annual cap by the number of emergency repairs and/or reimbursements and decrease its annual cap by the same amount for the following year only.

(5) LSL Replacements

The Company will offer to replace customer-owned LSLs at no direct cost to the customer or property owner, if the customer is not the property owner: (i) at any residential or non-residential property where the Company replaces a Company-owned main connected to a customer-owned LSL; (ii) at any property where the Company replaces a company-owned LSL connected to a customer-owned LSL; and (iii) at any property with a private-side only LSL located within a LSLR Project Area where LSLRs are performed; (iv) when the Company's operations crew replaces a Company-owned facility regardless of material, in emergencies, including line breaks, leaks, or other unplanned emergency replacements, that is a LSL or that is connected to a LSL; (v) and any other circumstance as required to avoid the replacement of a partial LSL.

Except in the case of non-owner occupied properties at which the Company has received the customer's acceptance of the Company's offer to replace the customer-owned LSL as set forth in Section (7) below, the Company shall enter into a property owner Agreement with the property owner for replacement of a customer-owned LSL that allows the Company's employees and contractors to gain access to their private property in order to replace their customer-owned LSL prior to the initiation of any work by the Company to replace the customer-owned LSL. The Property Owner Agreement shall be in a form provided by the Company and shall include provisions that require property owners to release and hold harmless the Company from any and all claims, causes of action, damages or losses, of any nature, whatsoever with respect to the work performed by the Company or its contractors that are not covered by the Company's LSLR Program warranty.

(6) Customer Refusal

Except as set forth below, if after being notified of the Company's offer to replace at no cost a customer-owned LSL, the property owner has not provided an executed Property Owner Agreement authorizing the replacement of the customer service line or has refused

replacement, the Company will (1) provide the customer and property owner, if the customer is not the property owner, with a complete disclosure of the known health hazards from the continued use of a LSL, (2) inform the customer or property owner, if the customer is not the property owner, that refusal or failure to accept will require replacement of the customer-owned LSL, at the customer or property owner's expense, within 1 year from LSLR Project Commencement for the customer or property owner, if the customer is not the property owner, to be eligible for reimbursement, and (3) communicate to the customer and property owner, if the customer is not the property owner, that failure to allow the Company to complete the LSLR or to replace the customer-owned LSL concurrent with the Company replacing the Company-owned LSL will lead to termination of water service under the provisions of this tariff prior to the Company replacing the Company-Owned LSL.

If the customer or property owner, if the customer is not the property owner, does not sign the Property Owner Agreement or refuses replacement of the customer-owned LSL within ten days after the Company undertakes the aforementioned steps, the Company will require the customer or property owner, if the customer is not the property owner, to sign a form documenting their refusal. If the customer or property owner refuses or fails to sign the refusal form, the Company will make a record of and document the customer's refusal or failure to sign the refusal form. The Company will then schedule to replace its portion of the Company-owned LSL and notify the customer in writing of this replacement no later than ten days prior to the scheduled replacement and terminate water service at that location the day prior to replacing the Company-owned LSL. The Company will proceed with termination of water service to a location irrespective of whether Independent Legal Restrictions would otherwise delay or prohibit termination. Such notice and termination shall be deemed consistent with Chapter 14 of the Public Utility Code. Moreover, in these instances, the Company is not required to comply with termination procedures described in other portions of its tariff or the Commission's regulations.

At any time prior to completing termination, or, within ten days after termination, the property owner executes the Property Owner Agreement, water service will be restored to the property, provided that service will not be restored until either both the Company-owned LSL and the customer-owned LSL have been replaced or, in the Company's sole discretion, an alternative, non-lead temporary bypass is installed until both the Company-owned LSL and the customer-owned LSL have been replaced.

The Company will not connect an Applicant to water service where a property owner previously refused or failed to accept the Company's offer of a LSLR until the Applicant verifies the replacement of the customer-owned LSL by providing a paid invoice from a licensed contractor or a notarized statement from a licensed contractor attesting to completion of the LSLR.

(7) Service Line Demarcation

If a shutoff valve is not located within 12 inches of the structure wall of the property, the Company may install a shutoff valve during the LSLR to serve as a point of demarcation between the property's service line and the property's interior water distribution piping.

The Company shall perfect its ownership of the portion of the service line located within the then-existing right-of-way in conformance with its tariff to ensure that the Company can obtain necessary permits during the planning phase of a LSLR Project.

(8) Prohibition on Partial LSLRs and Notice Requirements

Neither a customer nor a property owner may install a Partial LSLR. A Partial LSLR installed after July 23, 2022, must result in termination of service until both the Company-owned LSL and customer-owned LSL have been replaced. The Company will proceed with immediate termination of water service to a location being served by a partial LSLR installed after July 23, 2022, irrespective of whether Independent Legal Restrictions would otherwise delay or prohibit termination. Such termination shall be deemed consistent with Chapter 14 of the Public Utility Code. Moreover, in these instances, the Company is not required to comply with termination procedures described in other portions of its tariff or the Commission's regulations.

Where a customer or a property owner, if the customer is not the property owner, elects to replace the customer-owned LSL, the customer or property owner shall replace the customer-owned LSL concurrent with the Company replacing the Company-owned LSL, provided that the customer or property owner, if the customer is not the property owner, provides the Company at least 180 days' notice prior to replacing the customer-owned LSL.

The Company shall not connect an Applicant for water service to the Company-owned service line at a property where a customer or property owner, if the customer is not the property owner, previously refused or failed to accept the Company's offer of a LSLR until the Applicant verifies the replacement of the customer-owned LSL by providing a paid invoice from a licensed contractor or a verified statement from a licensed contractor attesting to completion of the LSLR.

(9) Reimbursement

Where a customer or property owner, if the customer is not the property owner, has replaced its own customer-owned LSL, the customer or property owner shall submit to the Company a reimbursement form, which may be provided by the Company to a customer or property owner by mail or email upon request or on the Company's website, and which must be completed by the customer or property owner and provided to the Company by mail, email, fax, or hand delivery as specified by the Company on its reimbursement form, which contains, at a minimum, a detailed estimate and paid invoice from a licensed contractor verifying the replacement of the customer-owned LSL. Instead of a detailed estimate, a verified statement from the contractor attesting to completion of a LSLR may be sufficient in the Company's discretion. A paid invoice must be submitted.

Upon submission of the reimbursement form, the Company will review the information that was provided within 90 days of receiving the reimbursement form to determine eligibility for a reimbursement. If sufficient information has not been provided at the time of submitting the reimbursement form, the Company will contact the customer or property owner to request the necessary information to determine eligibility. The Company will have an additional 45 days from the time it receives the additional information to determine a customer's eligibility for reimbursement.

A customer or property owner, if the customer is not the property owner, is eligible to receive a reimbursement if the customer or property owner's service address is located within a LSLR Project Area and the customer-owned LSL is replaced within one year before or from LSLR Project Commencement. A customer or property owner, if the customer is not the property owner, located within a LSLR Project Area is eligible for a reimbursement of LSLR expenses up to 125% of the average cost the Company would have incurred to perform the replacement of a similarly-sized service line, not to exceed the actual cost to the customer or property owner.

Reimbursements will be paid directly to the customer or property owner, if the customer is not the property owner, through the issuance of a check. The Company will issue a check within 90 days after verifying that the customer or property owner is eligible for reimbursement.

(10) Warranty

For customer-owned LSLs replaced by the Company or its contractor, the Company will provide a two-year warranty for materials and workmanship of the Company's LSLR work, including the Company's restoration of surfaces consistent with this tariff, commencing from the date the LSLR is complete. This warranty shall cover repairs and replacements conducted by the Company or its contractor of the LSLR work up to a maximum warranty coverage amount of 125% of the Company's cost for the LSLR work, so long as the customer allows access to the property for repairs.

The warranty does not cover, among other things, damage caused by natural disasters, acts of God, fires, terrorism, excavation activities, acts of sabotage, or deliberate damage. The Company shall have no liability for any damages not covered by the warranty.

(11) Limitation of Liability

The Company's liability relating to LSLR efforts is limited as set forth in this tariff.

(12) Restoration

The Company will backfill to the previous grade any trenches excavated as part of the LSLR process and will fill and seal any wall or floor penetrations in the private home. The Company will restore roadways and sidewalks within the public right-of-way. No other restoration will be conducted for LSLRs. The Company will not replace any landscaping, interior finishes, paving, seeding, or walkways. All restoration costs shall be

borne by the customer or property owner, if the customer is not the property owner, unless otherwise required by the Company's LSLR Program warranty.

(13) Ownership of Replacement Service Line

After a customer-owned LSL is replaced by the Company, the customer shall continue to own the customer portion of the Service Line and shall have full responsibility for the repair, replacement and maintenance of the new customer portion of the Service Line.
