Re: Bashore Truck Service, Inc.
Docket No. M-2026-3061024

Dear Secretary Homsher:

Bashore Truck Service, Inc. submits these comments in response to the Tentative Order regarding cancellation of its Certificate of Public Convenience.

Bashore Truck Service, Inc. has consistently completed and submitted the annual Motor Carrier Assessment Reports requested by the Commission. In connection with those filings, we also previously provided correspondence explaining the nature of our operations.

Our company owns and operates one tow truck, which is used solely to transport disabled customer vehicles to our repair facility for repair services. We do not provide general public towing services, roadside towing, police rotation towing, or transportation of vehicles to locations other than our repair facility.

When completing the annual assessment reports, we reported zero operating revenue because it was our understanding that revenue associated with transporting disabled vehicles to our own repair facility for repair work constituted exempt revenue and therefore was not reportable for assessment purposes. Any towing charges associated with these activities are incidental to our repair operations and are included only in connection with repair services performed by our shop.

If the reports were completed incorrectly or if the Commission believes these activities should have been reported differently, we respectfully request clarification regarding the proper reporting method so that we may make any necessary corrections or adjustments going forward.

Additionally, if the Commission determines that Bashore Truck Service, Inc. does not require a Certificate of Public Convenience for the limited activities described above, we would appreciate clarification on that issue as well, and we will comply with whatever requirements are applicable.

Thank you for your consideration of these comments.

Sincerely,

Bashore Truck Service, Inc
Gerald Bashore
General Manager
