Re: Pennsylvania Public Utility Commission Section 529 Investigation into the Acquisition of Wonderview Water Company, Inc. and Wonderview Sanitary Facilities, Inc.; Docket No. M-2025-3053936

STATUS REPORT OF RECEIVER VEOLIA WATER PENNSYLVANIA, INC.

Dear Secretary Homsher:

The *Ex Parte* Emergency Order entered March 14, 2025 in the above-referenced matter, appointed VWPA as the Receiver to manage and operate Wonderview Water Company, Inc. and Wonderview Sanitary Facilities, Inc. Appendix A, Paragraph 1.o. of that Order directed VWPA to file quarterly status reports with the Commission "to detail any relevant updates pursuant to duties and responsibilities assigned through receivership."

VWPA filed an Initial Status Report on May 21, 2025 and a quarterly status report on September 8, 2025. VWPA has not filed quarterly status reports since that date because this case has been stayed by order of Administrative Law Judge John M. Coogan. Due to the length of the stay, and out of an abundance of caution, enclosed for filing with the Pennsylvania Public Utility Commission is another status report of Receiver Veolia Water Pennsylvania, Inc.

A copy of this document has been served in accordance with the attached Certificate of Service.

If you have any questions regarding this filing, please direct them to me. Thank you for your attention to this matter.

Sincerely,

COZEN O'CONNOR

By: David P. Zambito

Counsel for *Veolia Water Pennsylvania, Inc.*

STATUS REPORT TO THE
PENNSYLVANIA PUBLIC
UTILITY COMMISSION OF
THE
WONDERVIEW WATER COMPANY, INC. AND WONDERVIEW
SANITARY FACILITIES, INC.

DATED May 20, 2026

BY VEOLIA WATER PENNSYLVANIA, INC. AS RECEIVER

DOCKET NO. M-2025-3053936

BACKGROUND

On March 14, 2025, the Pennsylvania Public Utility Commission (Commission) issued an Emergency Order at Docket No. M-2025-3053936, wherein it was directed that Veolia Water Pennsylvania, Inc. (VWPA) act as receiver for Wonderview Water Company, Inc. (WWC) and Wonderview Sanitary Facilities, Inc. (WSF), beginning on March 21, 2025 and an investigation be instituted into whether the Commission should order a capable public utility to acquire WWC and WSF pursuant to Section 529 of the Pennsylvania Public Utility Code.

VWPA has operated WWC and WSF since March 21, 2025. VWPA used the available customer data provided to contact the customers of WWC and WSF by email/text/phone via the Notify System and by letter via the USPS. The content of these messages alerted the customers to the change in operator, the next steps related to billing, and how to contact VWPA with questions or in the event of an emergency.

STATUS REPORT

Customer Notifications

1. Public notifications issued

VWPA issued a Tier II notice on behalf of WWC on April 01, 2026. This notification is a PADEP requirement in a Consent Order issued January 2024 and is to be issued every 3 months until all conditions listed in the Consent Order are corrected. This Consent Order requires WWC to: install meters at wells 2, 3, & 4 for the purpose of measuring and limiting water withdrawal to permitted levels, install a meter at the system entry point to verify the permitted instantaneous max flow into the system is adhered to, install well 3 well head protection, and install well 3 level sensing.

To date VWPA has installed meters on wells 2, 3, & 4, restricted flow to no more than permitted withdrawal limits on well 2, 3, & 4, and installed level sensing within well 3.

Operations

1. Daily operational activities

VWPA has operated WWC and WSF since March 21, 2025. Staff from VWPA continue to visit these locations daily. Chlorine residuals are monitored, chemicals

maintained, and daily required DEP testing is conducted. A sampling schedule has been created by VWPA Water Quality to meet PADEP permit compliance requirements and required monthly reports are being filed. VWPA has integrated WWC and WSF system assets into the VWPA GIS mapping system and continues to update these maps with real time data from the field. VWPA Non Revenue Water (NRW) personnel have swept the system to identify existing leaks. These leaks are being repaired by VWPA T&D personnel or contractors.

2. Assessment of customer base and connection status

VWPA has integrated all 162 WWC and 161 WSF customers into its customer management and billing systems. Customers continue to have their meters read monthly in accordance with the WWC and WSF Tariff.

System Improvements

Since VWPA provided the last status update of WWC and WSF, it has done the following:

1. Infrastructure upgrades

WWC

- Continued Engineering work on the remaining items from DEP consent order.

WSF

- Completed Jetting, Camera, and GPSing of the collection system to assess condition and create accurate mapping.

2. Future Improvements

Veolia is working with the parties to the Section 529 proceeding to develop plans for improvements for WWC and WSF.

Finance

VWPA has established deferred accounts for Labor and OPEX expenses being incurred by the operation of the WWC and WSF systems. Customers are being billed on the same cycle as before receivership began, with the meters being read on or about the 21st of each month.

VWPA continues to work with the original owner on the transfer of all documents, the retention of all WWC and WSF assets, and financial information. In some instances, information is incomplete or may not exist.

VWPA prepared annual reports for WWC and WSF for calendar year 2025, which include extensive financial information about the companies. Those reports were filed with the Commission prior to the April 30, 2026 deadline and are publicly available from the Commission's website.

Purchase

VWPA has completed purchase discussions with the owner of WWC and WSF. Agreements have been signed by VWPA and the owner of WSF and WWC for the purchase of the assets of both companies as well as 3 additional parcels of land necessary to run the operations. The agreements are currently being reviewed by all interested parties for approval.

CONCLUSION

VWPA will continue to operate WWC and WSF as receiver during the pendency of the 529 Proceeding and will continue to provide quarterly status reports, as directed by the Commission, in the Emergency Order dated March 14, 2025, Docket No. M-2025-3053936.
