Switched access rate changes

Federal Communications Commission rules require us to adjust capped interstate switched access rates to reflect pool election changes, except for terminating end office rates and originating toll-free rates specified in the 8YY Access Charge Reform Order. Pool election changes for the upcoming tariff year resulted in a 0.5711% decrease from current rate levels following the methodology specified in 47 CFR §51.909(a)(6). We will adjust switched access rates by the factor for the upcoming tariff year. This decrease was reflected in the data shown in the CAF ICC website when it opened on March 16 for data entry.

We will apply the rate decrease related to pool election changes to originating non-toll-free end office rates and all non-toll-free transport rate elements. Rates are rounded up to the last significant decimal place for a five or greater and rounded down otherwise.

In the [CAF ICC website](#) (login required), we will modify the following for test period 2026-2027:

- Interstate switched access rate levels
- Intrastate switched access rate levels for those companies with intrastate rates at parity with interstate rates
- Switched access revenues

Interstate terminating end office access service rates remain as bill and keep.

Proposed interstate and intrastate monthly and nonrecurring switched access rates can be viewed in the CAF ICC Data Collection website in the Study Area Intrastate Data section by selecting the Intrastate Revenues (FCC TRP) Output link. Your company's existing local switching and local transport rate band assignments will remain unchanged in the upcoming filing. **Adjusted intrastate rates will be available on April 16 and need to be filed with state regulatory commissions.**
