FINALLY FILED

## RATE MLP MUNICIPAL LIGHT AND POWER

**Availability.**

Only to the CITY OF PHILADELPHIA, in lieu and to the exclusion of Rate GLP, for electric service requirements of the municipality for purposes other than provided under Rate SL-P.

**Current Characteristics.**

Standard single-phase or polyphase secondary service.

**Rate.**

2.2¢ per kwh.

**Rate-Price Modification for Space Heating Service:** (C)(D)

WINTER PERIOD DEFINED. Eight billing months ending October 16 through June 15, inclusive.

SUMMER PERIOD DEFINED. Four billing months ending June 16 through October 15, inclusive.

A. SINGLE METER.

Applicable where an area is heated solely by permanently connected electric resistance space heating installations, with a total capacity of not less than 15 kilowatts, which are acceptable to the Company and are in service prior to June 16, 1968.

During the Winter Period the energy used for heating shall be determined for each of the billing months by multiplying the billing period degree-days by the estimated heating energy requirements per degree-day of the area to be heated as determined by a mutually acceptable formula.

The price for this energy use shall be 1.2¢ per kwh in lieu of the rate of 2.2¢ per kwh which will apply to the Customer's other use on the same service.

This modification will be applied upon notification to the Company of qualifying installations. It shall be the responsibility of the Customer to notify the Company of any subsequent changes in the installation.

B. SEPARATE METERS.

Electricity supplying permanently connected resistance space heating installations or heating equipment sensitive to outdoor temperature with a total capacity of not less than 5 kilowatts, which are acceptable to the Company and are the sole source of heat for the application, will be measured by a separate meter, apart from his other requirements for electric service at the premises. Air conditioning equipment also may be supplied through the separate meter.

During the Winter Period the usage of this separate circuit shall be billed at 1.2¢ per kwh in lieu of the rate of 2.2¢ per kwh.

During the Summer Period the combined usage shall be billed at 2.2¢ per kwh.

OFFICIALLY FILED TARIFF

## RATE T TRACTION SERVICE—*Continued* (C) (I)

**Kilowatt-Hours Guarantee.**

The kilowatt-hours to be paid for each month shall be not less than the kilowatt-hours obtained by multiplying 30% of the hours in the month by the billing demand for the month, provided that the Customer is not prevented from using a normal amount of energy by any cause beyond his control.

**Maximum Capacity to be Made Available.**

The maximum amount of capacity which the Company will make available may be specified in a written Service Contract or, if not so specified, shall be 75,000 kilowatts. Additional capacity for standard high-tension service will be made available upon reasonable advance written notice from the Customer.

**Receiving Equipment Responsibilities.**

The Customer shall own and bear the entire cost of necessary inspection, repair and maintenance of any transforming, switching, or other receiving equipment required.

**Termination of Service.**

Unless otherwise stated in a written Service Contract, service under this rate is terminable by the Company or the Customer upon not less than 60 days' written notice.

**Written Service Contract.**

At the Customer's election, service hereunder may be evidenced by a written Service Contract, specifying the maximum amount of capacity to be made available by the Company, for an annual term and under such further detailed conditions of service supply as are not inconsistent with those stated in this rate or in the Rules and Regulations.

**Payment Terms.**

Each month, the Company will render a bill to the Customer covering the charges for the preceding calendar month and Customer shall pay such bill within 20 days after receipt thereof.

RECEIVED
Penna. Public Utility Comm.
APR 1 1966

(C)(I) Indicates change and increase.

## STANDARD RIDERS—*Continued*

**Applicable to rates as indicated in Applicability Index of Riders, Page No. 46**

(C)

### OFF-PEAK RIDER

**Applicability.** To the restricted use of purchased energy caused by the seasonal requirements of customers other than those using the service for comfort cooling, where the Company is the exclusive source of supply for the connected load.

**Winter Months Defined.** November, December, January and February.

**Summer Months Defined.** June, July, August and September.

**Basis Contract.** The Customer shall enter into a standard contract for service under the applicable rate which will stipulate the maximum billing demand to be supplied.

**Restricted Use.** Use shall be restricted between the hours of 7 a. m. and 7 p. m. daily except Saturdays and holidays to demands not in excess of 50% of the maximum billing demand of the Customer's contract both during the winter months and, upon notice by Company given at least twelve hours prior to the time the Customer is to restrict the use of service and specifying the duration of such restricted use, during periods of hot weather occurring in the summer months.

**Minimum Waiver.** The minimum payment obligations of the applicable rate under the contract shall not apply during the winter months nor during any summer month in which notice of restriction has been given to Customer.

**Rate Application.** Service taken each month shall be paid for at the applicable rate under the contract except as modified by the terms of this rider.

**Excess Demand.** Demands in excess of 50% of the maximum billing demand stipulated in the Customer's contract imposed between the hours of 7 a. m. and 7 p. m. daily except Saturdays and holidays either during the winter months, or in a summer month during a period for which notice has been given to restrict use, will be billed an additional charge of $2.00 per kilowatt per month for such excess demand.

**Contract Term.** Coincidentally with the term of the rate applied.

### RECEIVERSHIP RIDER

**Applicability.** To service supplied a Receiver-Trustee for the continued operation of a property formerly under contract for its electric service requirements.

**Authority for Operation.** The Receiver-Trustee shall possess the authority under appointment by Court, through an order duly entered, to operate premises recited in a contract for electric service under which the Company has been supplying energy.

**Acceptance.** The Receiver-Trustee shall accept and adopt for the continuation of the supply of electric service the contract theretofore in effect, including all of its provisions, and agree to pay the Company for all service furnished hereunder during the receivership-trusteeship at the rate specified therein.

**Billing.** Bills are to be rendered directly to the agent of the Receiver-Trustee.

**Contract Term.** The completion of the term of the contract taken over, or as terminated by the discharge of the Receiver-Trustee, or as arranged with the Receiver-Trustee for the continuation of supply under the standard terms of this TARIFF.

## RATES AVAILABLE UNDER THIS TARIFF

**Rate R (Philadelphia Division) and Rate R-S (Suburban Divisions) Residence Service.** These rates are available to single-phase electric service to the dwelling and appurtenances of a single private family for the domestic requirements of its members other than for the main or principal source of heat supply and also to service for related farm purposes when such service is supplied through one meter in conjunction with the farmhouse domestic requirements.

"Residence Service," as employed herein, is not susceptible of particularizing all the uses embraced therein.

As illustrative only of its general meaning:

The term includes service to: (a) The separate dwelling-unit in an apartment house, but not the halls, basement, or other portions of such building common to more than one such unit; (b) The premises occupied as the living-quarters of five persons or less who unite to establish a common dwelling-place for their own personal comfort and convenience on a cost-sharing basis; (c) The premises owned by a church, and primarily designated or set aside for, and actually occupied and used as, the dwelling-place of a priest, rabbi, pastor, rector, nun or other functioning Church Divine, and his or her resident associates; (d) Private dwellings in which space is occasionally used for the conduct of business by a person residing therein; (e) Farm purpose uses by an individual employing the natural processes of growth for the production of grain, stock, dairy, poultry, garden truck, or other agricultural products.

The term does NOT include service to: (a) Premises institutional in character including Clubs, Fraternities, Orphanages or Homes; (b) Premises defined as a rooming house or boarding house in the Municipal Code for Cities of the First Class enacted by Act of General Assembly; (c) The space in an apartment or other residential building primarily devoted to a professional or other office, studio, or other gainful pursuit; (d) Farms operated principally to sell, prepare, or process products produced by others; (e) Electric furnaces or welding apparatus other than a transformer type "limited input" arc welder with an input not to exceed 37½ amperes at 240 volts.

**Rate HS Heat-Storage Service.** Available only in conjunction with residence service, for any Customer receiving service at 120-240 volts, 3 wires, for the operation of heat-storage equipment of a type approved by the Company, when the demand or load of the heat-storage installation does not exceed the Customer's demand for service to his other residence load and where the supply of service is confined to a single connection, separately metered.

**Rate GLP General Light and Power** is defined as the supply of electric service through a single metering installation for general lighting and/or power requirements of offices, professional, commercial or industrial establishments, and other applications outside the scope of the Residence Service Rates; Residence Service, when used through the same meter and in conjunction with General Light and Power Service, will be supplied under this rate unless the Customer so separates and arranges his wiring that domestic use can be separately metered and makes a separate contract for other service.

**Rate PD Primary-Distribution Power.** Untransformed electric service from the primary supply lines of the Company's distribution system where the Customer installs, owns, and maintains, any transforming, switching and other receiving equipment required.

**Rate HT High-Tension Power.** Untransformed electric service from the Company's high-tension transmission lines, where the Customer installs, owns, and maintains, any transforming, switching and other receiving equipment required.

(C) **Rate FLP Federal Light and Power.** Available only to the United States Government, in lieu and to the exclusion of Rate GLP, for electric service requirements of Federal Departments for purposes other than provided under Rates SL-P and SL-S.

**Rate MLP Municipal Light and Power.** Available only to the City of Philadelphia, in lieu and to the exclusion of Rate GLP, for electric service requirements of the municipality for purposes other than provided under Rate SL-P.

(C) Indicates change.

EFFECTIVE AUG 1 - 1964

OFFICIAL FILED TARIFF

## RULES AND REGULATIONS—*Continued*

### 17. PAYMENT TERMS

**17.1 Billing Period.** Billing for service will be based upon the amount of use and the time interval of its supply, and rate values stated for direct application only to monthly supply periods will be adjusted when the regular meter readings are taken at other than monthly intervals or when the time elapsed between readings is substantially greater or less than a month.

**17.2 Billing Plan.** Unless otherwise stipulated, the rate schedules set forth herein state net prices. Standard bills will show the net amount and a gross amount 5% greater than the net amount. The difference between the gross and net amounts will be allowed as a deduction for prompt payment.

(C) **17.3 Net-Payment Period.** Bills are due upon presentation, and payment may be made at any commercial office of the Company. The net rates are contingent upon prompt payment. The final date for payment of the net amount will not fall on a Saturday, or a holiday as defined in Definition of Terms, or on Washington's Birthday, Good Friday, Columbus Day and Veterans Day, and will be at least 10 days after day of presentation, except on accounts with the United States of America or the Commonwealth of Pennsylvania or any of their departments or institutions, for which 30 days will be allowed. The business day next following the final date shown on the bill for net payment will be allowed as a day of grace for delivery of payments. Failure to receive bill will not excuse customers from payment obligations, and payments must be made without regard to any counterclaims whatsoever.

**17.4 Gross Payments.** Where the payment terms are stipulated as Standard under a rate schedule set forth herein, the gross amount stipulated on the bill becomes due on the expiration of the net-payment period. The Company may waive the collection of the gross amount on an overdue bill provided that not more than one other such waiver has been made on bills of the preceding 11 months.

**17.5 Payment by Mail.** Mailed remittances for the net amount of a bill received after the day of grace will be accepted by the Company as a tender of payment within the net-payment period if the enclosing envelope bears United States Post Office date-stamp of the day of grace which is allowed for delivery of payments, or any date prior thereto.

# RATE GLP GENERAL LIGHT AND POWER

**Availability.**

Electric service through a single metering installation for general lighting and/or power requirements of offices, professional, commercial or industrial establishments, and other applications outside the scope of the Residence Service Rates.

**Current Characteristics.**

Standard single phase or polyphase secondary service.

CANCELLED by Revised Page No. 30 EFFECTIVE

**Monthly Rate Table.**

**Capacity Charge Prices:** Per kw of billing demand:

| | |
|---|---|
| $1.50 per kw for the first | 3 kw |
| 1.20 " " " " next | 10 " |
| 1.00 " " " " excess over | 15 " |

Includes first 10 hrs. use of billing demand.

**Energy Charge Prices:** Per kwh:

| | |
|---|---|
| 4.4¢ per kwh for the next | 64 hrs. use of billing demand but not less than 100 kwh |
| 1.4¢ " " " " " | 70 " " " " " " " " 105 " |
| 1.0¢ " " " " | 250 " " " " " " " " 380 " |
| 0.8¢ " " " " | additional use. |

**Minimum Earned Rate:** 2.0¢ per kwh, applicable only to customers whose assessed demands include one or more residence units.

**Determination of Demand.**

The billing demand, which shall never be less than 1 kilowatt, shall be determined by measurement or by assessment, computed to the nearest 0.1 of a kilowatt when assessed and taken at the value indicated by the demand meter when measured, subject to the following provisions:

**Assessed Demand:** The assessed demand shall be taken at the percentages of connected load specified in the Rules and Regulations.

**Measured Demand:** Demands which, by the assessment formula, are 5 kilowatts or more, are to be determined by measurement. Determination of demand by measurement shall continue for a period of not less than 11 months following any month in which the billing demand was 5 kilowatts or more. Any Customer, whose assessed demand is less than 5 kilowatts, may have the demand measured, instead of assessed, by written request that a demand meter be installed for a period of not less than one year.

**Power Factor:** Demands of 20 kilowatts or greater will be adjusted in accordance with the Rules and Regulations whenever the power factor of the Customer's load is found to be less than the standards therein specified.

**Minimum Demand:** The billing demand shall be not less than 40% of the greatest demand of any month of the preceding 11 months, nor less than the minimum value stated in a contract for service.

**Minimum Charge.**

The monthly minimum charge shall be the capacity charge for the billing demand for the month, but not less than $1.50 for single-phase service nor $4.50 for polyphase service.

**Term of Contract.**

Annual.

OFFICIALLY FILED TARIFF

CANCELLED by Revised Page No. 48 EFFECTIVE JUN 16 1966

STANDARD RIDERS—*Continued*

**Applicable to rates as indicated in Applicability Index of Riders, Page No. 46**

## CONSTRUCTION RIDER

**Applicability.** To service supplied during a preliminary operating or construction period while the load is being built up to normal level or during a receding load period after the expiration of a standard contract term while a business is in process of dissolution.

**Guarantee Waived.** The guarantee minimum of a contract will be waived during the expanding load period preceding the operation within the load limits provided in the contract or the receding load period subsequent to the fulfillment of a contract term.

**Rider Term.** The total term of application of this rider during the preliminary or construction period shall be 6 months subject to the option of the Company to grant not more than two successive renewals of the rider term on major construction projects. Its application subsequent to the completion of a contract term shall be for not more than one year.

**Contract Term.** The termination date of a contract for service to permanent installations to which this rider is applied shall be extended for a period corresponding to the total time of the rider application during start up, construction or extension of the Customer's plant so that the Company will be assured the business represented by service to the total connected load for the term provided in the contract.

**Other Riders.** This rider, when applied on temporary installations to which the Temporary Service Rider is also applied, shall not act to modify the requirement that monthly minimum charges be paid for a period of not less than 6 months.

(C) (D)

## ELECTRIC HOUSE-HEATING RIDER

**Applicability.** To a premises supplied under Rates R, R-S and HS which employs electricity as the main or principal source of heat supply, subject to the following conditions:

1. **Heat Loss.** The heat loss of the premises to be heated, computed in accordance with the provisions of either the "Heating Ventilating Air Conditioning Guide" of ASHRAE*, or "The NEMA** Manual for Electric House Heating"; for a temperature differential of 70° F (including an estimated amount for heat losses in ducts of the heat distribution system), and expressed in full thousand Btu per hour, hereinafter called "MBtu of the computed heat loss," shall not exceed 30 Btu per square foot of floor area measured to the exterior surface of outside walls of the space to be heated.

2. **Electric Heating Systems** shall be of a type and application approved by the Company, and shall be confined to the following systems:

   (a) Resistance heating systems permanently installed in rooms or at central locations, the aggregate connected load not exceeding 320 watts per MBtu of the computed heat loss.

   (b) Heat Pump systems using a substantially constant-temperature heat-source (such as, for example, well-water) and permanently installed at central locations, the aggregate heating capacity, at the established normal minimum temperature of the heat source, not exceeding 1.1 times the computed heat loss.

*American Society of Heating, Refrigerating and Air Conditioning Engineers
**National Electrical Manufacturers Association

---

The application of rates proposed by Supplement No. 8 to Tariff Electric—Pa. P. U. C. No. 23, filed to become effective January 18, 1971, is hereby suspended until July 18, 1971, in accordance with order adopted by the Pennsylvania Public Utility Commission on January 15, 1971, at C. 19114. Rates named in Tariff Electric—Pa. P. U. C. No. 23 and Supplements 1 through 6 thereto will continue in effect until otherwise amended.

Issued: January 15, 1971

Issued in compliance with Section VI of the Tariff Regulations.

Issued by R. F. GILKESON, *President*
1000 Chestnut Street
Philadelphia

# RATE R-H RESIDENTIAL HEATING SERVICE

**Availability.**

Single-phase electric service to the dwelling and appurtenances of a single private family (or to a multiple dwelling unit building consisting of two to five dwelling units, whether occupied or not), for domestic requirements when such service is supplied through one meter and where electricity is the sole source of energy regularly used for permanently connected space heating installations which meet the Company's requirements. This rate schedule is not available for commercial, institutional or industrial establishments. (C)

NOTICE
*This page of the Tariff never went into effect.* (I)(C)

**Current Characteristics.**

Standard single-phase secondary service.

**Monthly Rate Table.**

(For multiple dwelling unit buildings, the kilowatt-hours in each block of this rate table, except the first block, will be multiplied by the number of dwelling units.)

October through May

| | | |
|---|---|---|
| $1.00 | minimum, covers the first | 10 kwh |
| 6.30¢ | per kwh for the next | 45 " |
| 3.80¢ | " " " " " | 45 " |
| 2.80¢ | " " " " " | 200 " |
| 2.30¢ | " " " " " | 200 " |
| 1.25¢ | " " " " additional use. | |

June through September

| | | |
|---|---|---|
| $1.00 | minimum covers the first | 10 kwh |
| 6.30¢ | per kwh for the next | 45 " |
| 3.80¢ | " " " " | 45 " |
| 2.80¢ | " " " " additional use. | |

SUSPENDED
TO: JUL 18 1971 OCT 18 1971
AT: C-1 9114
Not Postponed To See Supp #6 NOV 11 1971
SUSPENSION VACATED
EFFECTIVE NOV 17 1971

Water Heating (Applicable June through September): If electricity supplied under this rate is the sole source of energy to water heating equipment of a type and size approved by the Company, then 400 kwh will be billed at 1.4¢ per kwh and the balance of the total kwh billed at the above rate. When this balance is less than 100 kwh, then only the kwh in excess of 100 are billed at 1.4¢ per kwh. (When more than one dwelling unit is supplied through a single meter, this provision will apply to each dwelling unit with an electric water heater.)

Heat Pumps: Where heat pumps using outdoor air as the heat-source are the source of heat supply, the charge in the initial price block above shall be $5.00 during the eight months of October through May. (C)

Minimum Charge: Charge in the initial price block above.

Air Quality Fuel Charge and
State Tax Adjustment Clause apply to this rate.

**Combined Residential and Commercial Service.**

Where a portion of the service supplied is used for commercial purposes, the appropriate general service rate is applicable to all service; or, at the option of the Customer, the wiring may be so arranged that the residential service may be separately metered and this rate is then applicable to the residential service only.

**Budgeted Billing.**

At the option of the Customer, an estimated total bill for the use of electricity may be budgeted over a period designated by the Company and an average bill rendered for payment each month. Any adjustment between the estimated amount so paid and the actual charges for the electricity used during such months will be made at the end of the budgeted period.

If a budget plan bill is unpaid when the next monthly bill is about to be rendered, the budget arrangement for billing may be terminated by the Company.

**Term of Contract.**

Annual.

**Payment Terms.**

Standard.

# RATE SL-P STREET LIGHTING IN CITY OF PHILADELPHIA

**Availability.**

Only to a governmental agency, municipal, state or federal, for outdoor lighting of streets, highways, bridges, parks or similar places, including directional highway signs at locations where other outdoor lighting service is established hereunder, for the safety and convenience of the public within the City of Philadelphia by incandescent filament, mercury-vapor, fluorescent or sodium-vapor lamps of standard sizes and types approved by the Company where the Customer installs, owns and maintains all Utilization Facilities as hereinafter defined. Service will be supplied under this rate for street Lighting Units supported in a conventional manner, such as on poles, posts, brackets or hangers, and under conditions of installation and supply acceptable to the Company. (C)

**Characteristics of Supply.**

Service under this rate will be from series 6.6 ampere circuits or from standard single-phase secondary circuits, as specified by the Company, except that, where conditions require, or where existing standard secondary circuits are not available, the Company at its option may supply service from nonstandard secondary circuits, providing nominally 240 volts.

NOTICE
*This page of the Tariff never went into effect.*

**Monthly Rate Table.**

**Facilities Charge Prices:**

For Lighting Units in service as of the fifteenth day of the month:

$0.67 per Lighting Unit supplied from standard secondary (aerial or underground) circuits where the Customer owns the individual control for each Lighting Unit.

$0.81 per Lighting Unit supplied from aerial (series or secondary) circuits where the Company provides group controls.

$3.43 per Lighting Unit supplied from underground (series or secondary) circuits where the Company provides group controls.

**Capacity Charge Prices:**

0.40¢ per watt for the first 100 watts of billing demand per Lighting Unit.

0.26¢ per watt for the additional watts of billing demand.

SUSPENDED
TO: JUL 18 1971 OCT 18 197
AT: C-1 9114
Postponed To NOV 11 1971
See Supp #6

**Energy Charge Price:**

1.7¢ per kwh of energy billed.

Air Quality Fuel Charge and
State Tax Adjustment Clause apply to this rate.

SUSPENSION VACATED
EFFECTIVE NOV 17 1971

**Lighting Unit.**

A Lighting Unit shall comprise each lighting installation which is separately connected to a delivery point on the Company's series or secondary circuit.

**Determination of Billing Demand.**

The wattage, expressed to the nearest tenth of a watt, of a Lighting Unit shall be composed of manufacturer's rating of its lamps, ballasts, transformers, individual controls and other load components required for its operation. The aggregate of wattages of all Lighting Units in service as of the fifteenth day of a month shall constitute the billing demand for the month.

**Determination of Energy Billed.**

The energy use for a month of a Lighting Unit shall be computed to the nearest kilowatt-hour as the product of one thousandth of its wattage and the effective hours of use of such wattage during the calendar month under the established operation schedules approved by the authorized representatives of the Customer and the Company. The aggregate of the kilowatt-hours thus computed for all Lighting Units in service as of the fifteenth day of a month shall constitute the energy billed for the month.

## STANDARD RIDERS—*Continued*

**Applicable to rates as indicated in Applicability Index of Riders, Page No. 52**

### TRANSFORMER-RENTAL RIDER

*This rider is in process of elimination and its application is restricted to customers who had it incorporated in contracts, or had accepted it in writing, prior to October 15, 1963. The capacity of each individual installation under this rider shall be limited to the amount in service as of that date. Ownership of facilities provided under this rider will be made available to the Customer if he wishes to purchase them from the Company.*

**Applicability.** To the supply in Suburban Divisions, of a transformer installation furnished, operated and maintained on the premises of a Customer to transform a single standard primary or high-tension service to a supply corresponding in phase and voltage to the standard polyphase secondary or primary service supplied by the Company at the time when and in the territory where the installation is made. Transformation from standard high-tension service to 2,400 volts, 3-phase, although nonstandard in 4,160-volt, 3-phase areas, may be furnished at the Customer's request in such areas.

**Installation Conditions.** The transformer installation under this rider is limited to a single bank of transformers installed in accordance with the Company's applicable standards, and to exclusive operation and control by the Company. Suitable housing, foundations, supporting structures and inclosures for such installations and all secondary facilities including suitable overload protective equipment, shall be provided, owned and maintained by the Customer.

SUSPENSION VACATED
EFFECTIVE NOV 17 1971

**Monthly Rental Charge.**

**Fixed Charge:**

| Supply Voltage | Type of Switching Installation | Amount |
|---|---|---|
| 2,400 volts or 4,160 volts | Outdoor or Indoor | $16.50 |
| 13,200 volts | Outdoor | 44.00 |
| 13,200 volts | Indoor | 99.00 |
| 33,000 volts | Outdoor | 99.00 |

**Operating Charge:**

10.38¢ per kilowatt of demand.

State Tax Adjustment Clause applies to this rider.

**NOTICE**
***This page of the Tariff never went into effect.***

**Demand Defined.** The demand for application of this rider shall be:

(a) the billing demand of the current month, or

(b) when in conjunction with the Night Service Rider, the sum of the on-peak billing demand of the current month and the greatest off-peak billing demand of the 12 months ending with the current month, said sum, however, not to exceed the greatest monthly total of on-peak and off-peak billing demands in the same period.

No waivers allowable as to minimum demands shall be considered as applicable in the determination of the transformer-rental charge.

**Liability.** The Company shall not be liable for any loss, damage or injuries to person or property, including loss of life or property, sustained by the Customer, his agents or employees or by any person whomsoever, arising out of the presence or operation of said transformer installation on the Customer's premises, except where caused by the negligence of the Company, its agents and employees, and except for injuries sustained by the Company's employees, not caused by the negligence of the Customer, his agents and employees.

**Contract Term.** Coincidentally with the rate to which this rider is attached, but for not less than 3 years from the date the rider is accepted.

NOV 18 1970
Bureau of Transportation

(I) Indicates increase.

OFFICIALLY FILED TARIFF

OFFICIALLY FILED TARIFF

## HOW TO USE LOOSE-LEAF TARIFF

1. This TARIFF is issued on the loose-leaf plan. Each page will be issued as "Original Page," consecutively numbered, commencing with the Title Page, which in all cases will be considered as Page No. 1. For example: "Original Page No. 2," "Original Page No. 3," etc.

2. All changes in, additions to, or eliminations from original pages will be made by the issue of consecutively numbered supplements to this TARIFF and by reprinting the page or pages affected by such change, addition, or elimination. Such supplements will indicate the changes which they effect and will carry a statement of the make-up of the TARIFF, as revised. The Table of Contents will be reissued with each supplement.

3. When a page is reprinted the first time, it will be designated under the P. U. C. number as "First Revised Page No. . . .," the second time as "Second Revised Page No. . . .," etc. First revised pages will supersede original pages; second revised pages will supersede first revised pages, etc.

4. When changes or additions to be made require more space than is available, one or more pages will be added to the TARIFF, to which the same number will be given with letter affix. For example: If changes were to be made in Original Page No. 2 and, to show the changed matter, more than one page should be required, the new page would be issued as "First Revised Page No. 2, superseding Original Page No. 2"; and the added page would be issued as "Original Page No. 2A." If a second added page should be required, it would be issued as "Original Page No. 2B." Subsequent reprints will be consecutively designated as "Second Revised . . . .," "Third Revised . . . .," etc.

5. On receipt of a revised page it will be placed in the TARIFF immediately following the page which it is to supersede, and the page which is to be superseded thereby plainly marked "See following revised page." On the date when such revised page becomes effective the page superseded should be removed from the TARIFF.

SUSPENSION VACATED
EFFECTIVE AUG 3 - 1969

## RATE MLP MUNICIPAL LIGHT AND POWER—*Continued*

**Special Rules and Regulations.**

1. Whenever it is advantageous to the Customer at points where he has been receiving untransformed electric service from primary supply lines of the Company's distribution system, or from the Company's high-tension transmission lines, service will be supplied under this rate in lieu of the application of Rates PD or HT, and the Customer shall continue to own and maintain any transforming, switching and other receiving equipment required. On new contracts, or on additions to old contracts for any application of this rate where the prospective demand exceeds 25 kilowatts, the Company, in order to secure the most efficient use of its supply circuits, may require that service be taken at primary or high-tension voltage under the same conditions of receiving equipment ownership.

2. Service for lighting enclosed structures, tunnels or underpasses will be supplied under this rate at secondary voltage when the Customer provides satisfactory location for the Company's transformers and provides and installs the required wiring, time-control and service entrance equipment. When satisfactory transformer location cannot be provided, service may be supplied at primary voltage to Customer-owned transformers in accordance with Special Rule 1 above.

**Term of Contract.**

Annual.

**Payment Terms.**

The final date for payment of the net amount of the bill shall be at least 30 days after presentation.

OFFICIALLY FILED TARIFF

TARIFF SECTION

OFFICIALLY FILED TARIFF

## RATE BLI BORDERLINE INTERCHANGE SERVICE

**Availability.**

Electric service supplied under reciprocal agreements, to neighboring electric utilities for resale in their adjacent territory at delivery points where the Company in its judgment can provide capacity in excess of the requirements of present and prospective customers in its own territory and for periods fixed by contract and terminable after the expiration of the initial term if capacity is no longer available.

**Current Characteristics.**

Standard primary or secondary service.

**Monthly Rate Table.**

**Investment Charge:**

An amount equal to 1% per month on the additional investment in facilities required to deliver and meter the service supplied.

**Energy Charge:**

2¢ per kwh.

**Measurement.**

The energy delivered may be metered or may be estimated from the purchaser's resales plus an agreed-upon correction to cover transformation and distribution losses.

**Term of Contract.**

5 years, and thereafter from year to year until terminated by 60 days' notice from either party to the other.

**Payment Terms.**

Payment of amounts billed shall be made within 15 days from date of bill.

OFFICIALLY FILED TARIFF

## STANDARD RIDERS—*Continued*

**Applicable to rates as indicated in Applicability Index of Riders, Page No. 46**

### TEMPORARY SERVICE RIDER

**Applicability.** To the supply of service for a temporary period.

**Availability.** Temporary service will be supplied only when the Company has available unsold distributing and generating capacity from which to furnish it and its supply will not in any way interfere with service to other customers.

**Investment in Supply Facilities.** The cost of the connection and disconnection of the service supply and of any equipment and extension of facilities required to furnish the temporary service under the applicable rate shall be paid by the Customer, but such payment shall not confer upon, nor entitle the Customer to any title to, or right of property in, said facilities and equipment.

**Minimum Term.** Application of this rider to Rates R, R-S, R-H, R-M, GLP, ELP (C) and MLP shall not, for billing purposes, be considered to be for a period of less than one month.

Application of this rider to Rates PD and HT shall require payment of the minimum provisions of the contract for each month of the temporary service period, but in no case shall such period be considered, with respect to the guarantee of the monthly minimum charges, as of less duration than 6 months.

**Rate-Price Modification.** When this rider is applied to Rates PD or HT, the last two price blocks of the energy charge shall not apply and energy use otherwise falling into these blocks shall be billed at the price of the second block of each rate.

**Contract Term.** Short-term arrangements as agreed upon.

### TRANSFORMER-RENTAL RIDER

*This rider is in process of elimination and its application is restricted to customers who had it incorporated in contracts, or had accepted it in writing, prior to October 15, 1963. The capacity of each individual installation under this rider shall be limited to the amount in service as of that date. Ownership of facilities provided under this rider will be made available to the Customer if he wishes to purchase them from the Company.*

**Applicability.** To the supply in Suburban Divisions, of a transformer installation furnished, operated and maintained on the premises of a Customer to transform a single standard primary or high-tension service to a supply corresponding in phase and voltage to the standard polyphase secondary or primary service supplied by the Company at the time when and in the territory where the installation is made. Transformation from standard high-tension service to 2,400 volts, 3-phase, although nonstandard in 4,160-volt, 3-phase areas, may be furnished at the Customer's request in such areas.

OFFICIALLY FILED TARIFF

## RATES AVAILABLE UNDER THIS TARIFF—*Continued*

**Rate FLP Federal Light and Power.** Available only to the United States Government, in lieu and to the exclusion of Rate GLP, for electric service requirements of Federal Departments for purposes other than provided under Rates SL-P and SL-S.

**Rate MLP Municipal Light and Power.** Available only to the City of Philadelphia, in lieu and to the exclusion of Rate GLP, for electric service requirements of the municipality for purposes other than provided under Rate SL-P.

**Rate PSL Private Street Lighting.** This rate is in process of elimination and is restricted to lamps in service on October 15, 1963.

**Rate SL-P Street Lighting in City of Philadelphia.** Available only to a governmental agency, municipal, state or federal, for outdoor lighting of streets, highways, bridges, parks or similar places, including directional highway signs at locations where other outdoor lighting service is established, for the safety and convenience of the public within the City of Philadelphia by incandescent filament, mercury-vapor, or fluorescent lamps of standard sizes and types approved by the Company where the Customer installs, owns and maintains all Utilization Facilities. Service will be supplied under this rate for street Lighting Units supported in a conventional manner, such as on poles, posts, brackets or hangers, and under conditions of installation and supply acceptable to the Company.

**Rate SL-S Street Lighting—Suburban.** Outdoor lighting of streets, highways, bridges, parks and similar places for the safety and convenience of the public in Suburban Divisions.

**Rate POL Private Outdoor Lighting.** Outdoor lighting of sidewalks, driveways, yards, lots and similar places, outside the scope of service under Rates SL-P and SL-S, by mercury vapor lamps of the sizes hereinafter specified. (C)

**Rate TL-S Traffic Signal Lighting—Suburban.** Available to any municipality in Suburban Divisions using Company's standard service for electric traffic signal lights installed, owned and maintained by the municipality.

**Rate RR Railroad Service.** Available only to railroad corporations for electric service for the operation of electrified railroad systems and appurtenances.

**Rate T Traction Service.** Available only to street railway corporations for electric service for the operation of electrified transportation systems and appurtenances.

**Rate BLI Borderline Interchange Service.** Electric service supplied under reciprocal agreements, to neighboring electric utilities for resale in their adjacent territory at delivery points where the Company in its judgment can provide capacity in excess of the requirements of present and prospective customers in its own territory and for periods fixed by contract and terminable after the expiration of the initial term if capacity is no longer available.

(See rate pages for additional details of availability, rates and conditions.)

## RATE R RESIDENCE SERVICE (D)

**Availability.**

Single-phase electric service, in the PHILADELPHIA DIVISION, to the dwelling and appurtenances of a single private family for the domestic requirements of its members, other than for the main or principal source of heat supply and also to service for related farm purposes when such service is supplied through one meter in conjunction with the farmhouse domestic requirements.

**Current Characteristics.**

Standard single-phase secondary service.

**Monthly Rate Table.**

Prices per kwh:

$1.00 minimum covers the first 14 kwh
5.0¢ per kwh for the next 25 "
3.0¢ " " " " " 36 "
1.8¢ " " " " additional use.

**Minimum Charge.**

$1.00 per month.

**Term of Contract.**

Annual.

**Payment Terms.**

Standard.

(D) Indicates decrease.

Philadelphia Electric Company

# RATE HT HIGH-TENSION POWER

**Availability.**

Untransformed electric service from the Company's high-tension transmission lines, where the Customer installs, owns, and maintains, any transforming, switching and other receiving equipment required.

**Current Characteristics.**

Standard high-tension service.

CANCELLED
by
Revised Page No. 32
EFFECTIVE JAN 1 - 1969

**Monthly Rate Table.**

**Capacity Charge Prices:** Per kw of billing demand:

| | | |
|---|---|---|
| $1.80 per kw | for the first..... | 100 kw |
| 1.25 " | " " " next..... | 400 " |
| 1.15 " | " " " ..... | 4,500 " |
| 1.00 " | " " " excess over | 5,000 " |

**Energy Charge Prices:** Per kwh:

| | | | |
|---|---|---|---|
| 1.00¢ | per kwh for the first | 150 hrs. use of billing demand | |
| 0.70¢ | " " " " next | 150 " " " " " | but not more than 1,200,000 kwh (D) |
| 0.50¢ | " " " " " | 100 " " " " " | but not more than 500,000 kwh (D) |
| 0.40¢ | " " " " additional use. | | (D) |

**Discount for 66,000 or Higher Supply Voltage:** (D)

10¢ per kw for the first 10,000 kw of measured demand, applicable to customers supplied at 66,000 or higher supply voltage whose minimum contract demand is not less than 1,000 kw.

**Determination of Billing Demand.**

The billing demand each month shall be computed to the nearest kilowatt, and shall be the measured demand adjusted in accordance with the Rules and Regulations whenever the power factor of the Customer's load is found to be less than the standards therein specified, except that in no case shall the billing demand be less than 40% of the maximum billing demand value specified in a contract under this rate, nor less than 100 kilowatts.

**Delivery Points.**

Where the load of an industrial Customer located on single or contiguous premises becomes greater than the capacity of the standard circuit or circuits established by the Company to supply the Customer, an additional separate delivery point may be established for such premises upon the written request of the Customer and billing continued as if the service were being delivered and metered at a single point, provided such multi-point delivery is not disadvantageous to the Company.

**Minimum Charge.**

The monthly minimum charge shall be the energy charge applied to the kilowatt-hours that would result from 100 hours' use of the Customer's billing demand for the month, plus the capacity charge for such billing demand, less the supply voltage discount where applicable. (D)

**Term of Contract.**

3 years, and thereafter from year to year until terminated by 60 days' notice from either party to the other.

STANDARD RIDERS—*Continued*

**Applicable to rates as indicated in Applicability Index of Riders, Page No. 46**

ELECTRIC HOUSE-HEATING RIDER—*Continued*

(c) Heat Pump systems using outdoor air as heat-source and equipped with supplementary resistance heating units or systems, permanently installed in rooms or at central locations. The aggregate heating capacity of the heat pump equipment (i.e. exclusive of any resistance heating units or systems), at 0° F temperature of the heat source, shall be not less than 40 per cent nor more than 60 per cent of the computed heat loss; the aggregate connected load of all resistance heating units or systems, whether integral with the heat pump assembly or independent thereof, shall be not less than 150 watts per MBtu of the computed heat loss; and such resistance units or systems shall be energized by stages, each stage controlled by an outdoor thermostat, and limited to 100 watts per MBtu of the computed heat loss.

(d) Heat Pump systems using outdoor air as heat-source and equipped with a supplementary heat storage system, permanently installed at central locations. The aggregate heating capacity of the heat pump equipment (i.e. exclusive of the heat storage system), at 0° F temperature of the heat source, shall be not less than 40 per cent nor more than 60 per cent of the computed heat loss; and the heat storage system shall be of a type approved by the Company, shall be sized at not less than eight gallons per MBtu of the computed heat loss when employing hot water at atmospheric pressure and shall be equipped with electric heating elements whose aggregate connected load shall not exceed 120 watts per MBtu of the computed heat loss.

The supply of service to the heat storage system shall be separately metered under metering provisions of Rate HS, and shall be controlled by a clock, or other timing device, and by an interlock switch. These controlling devices shall be provided by the Company; shall be subject to inspection and control of setting by the Company; and shall be sealed by the Company. The wiring therefor shall be provided by the Customer to a location on the premises designated by the Company.

Service to the aggregate of all electric heating elements of the heat storage system shall be available daily for 5½ hours at night, the hours to be established from time to time by the Company; and service to a portion of said heating elements with a connected load not exceeding 60 watts per MBtu of the computed heat loss shall be available also during other periods of the day, established from time to time by the Company, but only when the heat pump is not operating.

**Monthly Charges** for all electric service on the premises, uncontrolled as to the time of use, exclusive of the Unrestricted Service provided under Rate HS, shall be computed in accordance with the provisions of Rates R or R-S except that, when the electric heating system is of the type specified in 2(c), there shall be added to the amount thus computed, in each of the eight heating season months from October to May both inclusive, a charge at a rate of $2.00 per kilowatt applied to 60 per cent of the connected load of all resistance heating units or systems installed for heating the premises. All electric service on the premises controlled as to the time of use and separately metered, as provided in 2(d) and under Rate HS, shall be billed at the price provisions of Rate HS. (C)

**Budget Billing** shall be used at Customer's option.

## RATE WH WATER HEATING SERVICE

**Availability.**

In conjunction with the Residence Service rates and with residence service under Rates GLP and GS, for any Customer receiving service at 120-240 volts, 3 wires, for the operation of water heating equipment of a type approved by the Company, when the demand or load of the water heating installation does not exceed the Customer's demand for service to his other residence load and where the supply of service is confined to a single connection, separately metered.

*Not available when the source of supply is service purchased from a neighboring company under a borderline purchase agreement.*

**Unrestricted Service.**

The supply of service shall be confined to water heating hot-water installations used for all domestic purposes except as a source of heat supply to the premises.

Rate: 1.4¢ per kwh.

Minimum Charge: $1.12 per month.

Air Quality Fuel Charge and
State Tax Adjustment Clause apply.

SUSPENDED
TO: JUL 1 8 1971 OCT 1 8 1971
AT: C-1 9114
Op. Postponed to
See Supp # 11 NOV 1 1 1971

**Off-Peak Service.**

The supply of service to water heating installations where the daily period of use shall be limited by a clock or other timing device to the hours established from time to time by the Company. The clock and controlling device shall be types provided by the Company; shall be subject to inspection and control of setting by the Company; and shall be sealed by the Company. The Company shall not be obligated to provide additional or new supply facilities.

Rate: 1.2¢ per kwh for the first 400 kwh per month (I)
1.0¢ " " " " additional use. (I)

SUSPENSION VACATED
EFFECTIVE NOV 1 7 1971

Minimum Charge: $1.12 per month.

Air Quality Fuel Charge and
State Tax Adjustment Clause apply.

**Electrical Characteristics of Equipment.**

The water heating installations shall be 240 volts, alternating-current, 2 wires, single-phase, 60 cycles.

**Term of Contract.**

Annual.

# RATE SL-S STREET LIGHTING—SUBURBAN

**Availability.**

Outdoor lighting of streets, highways, bridges, parks and similar places for the safety and convenience of the public in Suburban Divisions.

**Rate Table—Manufacturer's Rating of Lamp Sizes.** (I)

INCANDESCENT FILAMENT LAMPS

| SIZE OF LAMP | RATE PER YEAR | SIZE OF LAMP | RATE PER YEAR |
|---|---|---|---|
| 1,000 Lumens | $33.48 | 6,000 Lumens | $ 82.44 |
| 2,500 " | 53.16 | 10,000 " | 113.04 |
| 4,000 " | 67.80 | | |

MERCURY-VAPOR LAMPS

| SIZE OF LAMP | RATE PER YEAR |
|---|---|
| 100 Watts (nominally 4,000 Lumens) | $ 60.00 |
| 175 " ( " 8,000 " ) | 80.04 |
| 250 " ( " 12,000 " ) | 99.36 |
| 400 " ( " 20,000 " ) | 122.64 |
| 700 " ( " 35,000 " ) | 158.04 |
| 1,000 " ( " 55,000 " ) | 203.28 |

*The supply of 320 lumen lamps at $17.64 per year and 600 lumen lamps at $25.08 per year is in the process of elimination and is restricted for any Customer to the total of each rating in service on October 15, 1963, and in each succeeding year beginning January 1, 1964, to the number of each rating in service on January first of each such year.* (I)

NOTICE
*This page of the Tariff never went into effect.*

SUSPENDED
TO: ~~JUL 18 1971~~ OCT 18 1971
AT: C-19114
Ord Postponed To NOV 11 1971
See Supp #6

Air Quality Fuel Charge and State Tax Adjustment Clause apply to this rate.

**Lighting Improvement Discount.**

The bill calculated at the pricing of the basic Monthly Rate Table will be reduced by 10% times the ratio of the number of mercury-vapor lamps in service to the total number of lamps in service.

SUSPENSION VACATED
EFFECTIVE NOV 17 1971

**General Provisions.**

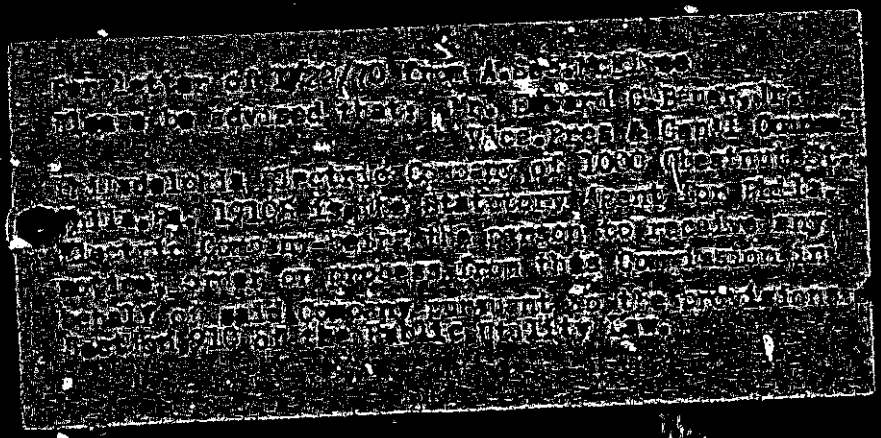

1. SERVICE. The lighting service will be operated on an all-night, every-night lighting schedule of approximately 4,100 hours annual burning time, under which lights are turned on after sunset and off before sunrise. It includes the supply of lamps and their renewal when burned out or broken.

2. OUTAGE ALLOWANCES. Written notice to the Company prior to 4 p. m. of the failure of any light to burn on the previous night shall entitle the Customer to a pro rata reduction in his street lighting bill for the hours of failure if such failure continues for a period in excess of 12 hours after the notice is received. Allowances will not be made for outages resulting from the Customer's failure to protect the lighting system or from riot, fire, storm, flood, interference by civil or military authorities, or any other cause beyond the Company's control.

## RATES AVAILABLE UNDER THIS TARIFF

**Rate R (Philadelphia Division) and Rate R-S (Suburban Divisions) Residence Service.** These rates are available to single-phase electric service to the dwelling and appurtenances of a single private family for the domestic requirements of its members and also to service for related farm purposes when such service is supplied through one meter in conjunction with the farmhouse domestic requirements.

"Residence Service," as employed herein, is not susceptible of particularizing all the uses embraced therein.

As illustrative only of its general meaning:

The term includes service to: (a) The separate dwelling unit in an apartment house, but not the halls, basement, or other portions of such building common to more than one such unit; (b) The premises occupied as the living quarters of five persons or less who unite to establish a common dwelling place for their own personal comfort and convenience on a cost-sharing basis; (c) The premises owned by a church, and primarily designated or set aside for, and actually occupied and used as, the dwelling place of a priest, rabbi, pastor, rector, nun or other functioning Church Divine, and his or her resident associates; (d) Private dwellings in which a portion of the space is used for the conduct of business by a person residing therein; (e) Farm purpose uses by an individual employing the natural processes of growth for the production of grain, stock, dairy, poultry, garden truck, or other agricultural products.

The term does NOT include service to: (a) Premises institutional in character including Clubs, Fraternities, Orphanages or Homes; (b) Premises defined as a rooming house or boarding house in the Municipal Code for Cities of the First Class enacted by Act of General Assembly; (c) A premises containing a residence unit but primarily devoted to a professional or other office, studio, or other gainful pursuit; (d) Farms operated principally to sell, prepare, or process products produced by others, or farms using air conditioning for climatic control in conjunction with growth processes (except those customers receiving such service as of January 18, 1971); (e) Electric furnaces or welding apparatus other than a transformer type "limited input" arc welder with an input not to exceed 37½ amperes at 240 volts. (C)

**Rate R-M Residence Service.** Single-phase electric service, in the entire territory of the Company, to a multiple dwelling unit building consisting of two to five dwelling units (whether occupied or not) for domestic requirements when such service is supplied through one meter.

**Rate R-H Residential Heating Service.** Single-phase electric service to the dwelling and appurtenances of a single private family (or to a multiple dwelling unit building consisting of two to five dwelling units, whether occupied or not), for domestic requirements when such service is supplied through one meter and where electricity is the sole source of energy regularly used for permanently connected space heating installations which meet the Company's requirements. This rate schedule is not available for commercial, institutional or industrial establishments. (C)

**Rate WH Water Heating Service.** In conjunction with the Residence Service rates and with residence service under Rates GLP and GS, for any Customer receiving service at 120-240 volts, 3 wires, for the operation of water heating equipment of a type approved by the Company, when the demand or load of the water heating installation does not exceed the Customer's demand for service to his other residence load and where the supply of service is confined to a single connection, separately metered.

**Rate GLP General Light and Power.** This rate is in the process of elimination and is restricted to those installations and those customers receiving service under this rate as of January 18, 1971. (C)

**Rate GS General Service.** Electric service through a single metering installation for offices, professional, commercial or industrial establishments, and other applications outside the scope of the Residence Service rate schedules. A Heating Modification is available for customers with electric resistance space heating installations.

**Rate PD Primary-Distribution Power.** Untransformed electric service from the primary supply lines of the Company's distribution system where the Customer installs, owns and maintains, any transforming, switching and other receiving equipment required. However, standard primary service is not available in areas where the distribution voltage has been changed to 13 kv unless the Customer was served with standard primary service prior to the conversion of the area to 13 kv. OFFICIALLY FILED TARIFF

# RATE PSL PRIVATE STREET LIGHTING

**(C) Availability.**

This rate is in process of elimination and is restricted to lamps in service on October 15, 1963.

**Rate Table.**

The Customer pays the cost of installation and pays for service in accordance with the following schedule for each lamp connected to the Company's lines:

| Size of Lamp Manufacturer's Rating | Price Per Lamp Per Annum |
|---|---|
| 2,500 lumens | $51.45 |
| 4,000 " | 67.10 |
| 6,000 " | 79.20 |
| 10,000 " | 90.20 |

**Special Terms and Conditions.**

Series-incandescent lighting adjacent to, or on a Customer's property but not in, or attached to any building, and only for premises adjacent to the Company's series-incandescent circuits will be furnished in Philadelphia Division in accordance with the lighting schedule established for municipal street lighting.

Lamps, wires, fixtures, and appurtenances, are installed at the Customer's expense, but remain the property of the Company, and will be adjusted, maintained, operated, and repaired by it as part of the service cost. The Company shall not be liable for damage, or for claims for damage, to person or property, arising, accruing, or resulting from, installation, location, or use, of lamps, wires, fixtures, and appurtenances; or resulting from failure of any light, or lights, to burn, for any cause, beyond or other than the rental of said light, or lights, for the actual period of such failure. Claims for deductions for failure to burn must be made in writing the day after such failure.

The Customer shall permit any accredited employee of the Company to have access to the premises for adjusting, maintaining, and repairing service; the Customer shall be responsible for the safekeeping of the installation (damage by fire excepted) and for preventing meddling or interference with the same.

**Term of Contract.**

Annual.

**Payment Terms.**

Standard. Monthly bills will be rendered for 1/12 of the per annum price.

# APPLICABILITY INDEX OF RIDERS

## Introductory Statement

Customers under the different rates of this TARIFF frequently desire services or present situations and conditions of supply which require special supply terms, charges or guarantees or which warrant modification of the amount or method of charge from the prices set forth in the rate under which they are supplied. Modifications for such conditions are defined by rider provisions included as a part of this TARIFF. Riders may be employed when applicable, with or without signed agreement between the Customer and the Company as the case may require, notwithstanding anything to the contrary contained in the rate to which the rider is applied.

| RIDERS | PAGE NUMBERS | RATES TO WHICH RIDERS APPLY | | | | | | | | | |

OFFICIALLY FILED TARIFF

## STANDARD RIDERS—*Continued*

**Applicable to rates as indicated in Applicability Index of Riders, Page No. 46**

### TRANSFORMER-RENTAL RIDER—*Continued*

**Installation Conditions.** The transformer installation under this rider is limited to a single bank of transformers installed in accordance with the Company's applicable standards, and to exclusive operation and control by the Company. Suitable housing, foundations, supporting structures and inclosures for such installations and all secondary facilities including suitable overload protective equipment, shall be provided, owned and maintained by the Customer.

**Monthly Rental Charge.**

**Fixed Charge:**

| Supply Voltage | Type of Switching Installation | Amount |
|---|---|---|
| 2,400 volts or 4,160 volts | Outdoor or Indoor | $16.50 |
| 13,200 volts | Outdoor | 44.00 |
| 13,200 volts | Indoor | 99.00 |
| 33,000 volts | Outdoor | 99.00 |

**Operating Charge:**

8.25¢ per kilowatt of demand.

**Demand Defined.** The demand for application of this rider shall be:

(a) the billing demand of the current month, or

(b) when in conjunction with the Night Service Rider, the sum of the on-peak billing demand of the current month and the greatest off-peak billing demand of the 12 months ending with the current month, said sum, however, not to exceed the greatest monthly total of on-peak and off-peak billing demands in the same period.

No waivers allowable as to minimum demands shall be considered as applicable in the determination of the transformer-rental charge.

**Liability.** The Company shall not be liable for any loss, damage or injuries to person or property, including loss of life or property, sustained by the Customer, his agents or employees, or by any person whomsoever, arising out of the presence or operation of said transformer installation on the Customer's premises, except where caused by the negligence of the Company, its agents and employees, and except for injuries sustained by the Company's employees, not caused by the negligence of the Customer, his agents and employees.

**Contract Term.** Coincidentally with the rate to which this rider is attached, but not less than 3 years from the date the rider is accepted.

# LIST OF CHANGES MADE BY THIS SUPPLEMENT

## CHANGES

**Title Page.**

EASTERN DIVISION.

Second-Class Township of Upper Gwynedd, Montgomery County—changed to First-Class Township.

SCHUYLKILL DIVISION.

Second-Class Township of Upper Pottsgrove, Montgomery County—changed to First-Class Township.

**Rates Available Under This Tariff.** (3RD REV. PAGE 5.)

RATE R-M. The words "multiple dwelling-unit building" are substituted for the words "multiple-family building" to make the availability more comprehensive.

RATE HS. The availability of this rate in conjunction with Rate R-M is added.

**Definition of Terms.** (2ND REV. PAGE 8, ORIGINAL PAGE 8A.)

service.

STANDARD POLYPHASE SECONDARY. Provision (c) is expanded to include all Residence Service rates.

STANDARD HIGH TENSION. A description of a portion of Bucks County to which 13,200-volt service will be made available is added. The wording on Page 8 is rearranged and Page 8A is added to provide for the additional description.

**Rule 12.2.** (1ST REV. PAGE 18.)

This rule is expanded to conform with present practice.

**Rules 17.2 and 17.4.** (3RD REV. PAGE 24.)

These rules are reworded for clarity.

**Rate R-M Residence Service.** (1ST REV. PAGE 28A.)

The words "multiple dwelling-unit building" are substituted for the words "multiple-family building" to make the availability more comprehensive.

**Rate HS Heat-Storage Service.** (2ND REV. PAGE 29.)

The availability statement of this rate is changed to include Rate R-M, making this rate available in conjunction with Rate R-M.

**Applicability Index of Riders.** (2ND REV. PAGE 46.)

Rate R-M is added to the table and the applicability to this rate of the following riders is indicated: Casualty, Extension Guarantee, Receivership and Temporary Service.

**Temporary Service Rider.** (1ST REV. PAGE 57.)

The minimum term provisions are extended to Rates R-H and R-M.

## LIST OF CHANGES MADE BY THIS SUPPLEMENT

### DECREASES

**Rate R Residence Service.** (1ST REV. PAGE 27.)

**Rate R-C Residence Service.** (1ST REV. PAGE 28.)

The minimum earned rate provision of these rates is withdrawn, resulting in decreases.

**Rate GLP General Light and Power.** (1ST REV. PAGE 30.)

The kilowatt demand specified in the rate at which power factor adjustments will be made is changed from 20 kilowatts to 25 kilowatts, resulting in decreases.

**Rate HT High-Tension Power.** (1ST REV. PAGE 32.)

A limitation is placed on the kilowatt-hours to be billed in the second and third blocks of the energy charge, the pricing of the last block of the energy charge is changed from 0.45¢ to 0.40¢ and a special discount provision is added for customers served at 66,000 or higher supply voltage, resulting in decreases.

**Rate RR Railroad Service.** (1ST REV. PAGE 42.)

The last block of the energy charge is changed from 0.50¢ to 0.45¢, resulting in a decrease in charge.

### CHANGES

**Definition of Terms.** (1ST REV. PAGE 8.)

Service, STANDARD HIGH TENSION. 220,000 volts is added to Paragraph (c).

**Rule 14.3.** (1ST REV. PAGE 19.)

This rule is reworded for simplification.

**Rule 15.1.** (2ND REV. PAGE 20.)

This rule is reworded to conform with the change in Rule 15.4.

**Rule 15.4.** (2ND REV. PAGE 20.)

This rule is reworded to provide for the determination of power factor by reactive metering, at the customer's option, and to specify the load level at which power factor tests are made.

**Rule 17.2.** (2ND REV. PAGE 24.)

This rule is reworded for clarity.

**Electric House-Heating Rider.** (2ND REV. PAGE 49.)

Reference to the minimum earned rate provision under monthly charges is eliminated.

**Night Service HT Rider.** (1ST REV. PAGE 54.)

The applicability provision is changed to include higher supply voltages, to conform with the redefinition of standard high tension service.

## RATES AVAILABLE UNDER THIS TARIFF—*Continued*

(C) **Rate PSL Private Street Lighting.** This rate is in process of elimination and is restricted to lamps in service on October 15, 1963.

**Rate SL-P Street Lighting in City of Philadelphia.** Available only to a governmental agency, municipal, state or federal, for outdoor lighting of streets, highways, bridges, parks or similar places, including directional highway signs at locations where other outdoor lighting service is established, for the safety and convenience of the public within the City of Philadelphia by incandescent filament, mercury-vapor, or fluorescent lamps of standard sizes and types approved by the Company where the Customer installs, owns and maintains all Utilization Facilities. Service will be supplied under this rate for street Lighting Units supported in a conventional manner, such as on poles, posts, brackets or hangers, and under conditions of installation and supply acceptable to the Company.

(C) **Rate SL-S Street Lighting—Suburban.** Outdoor lighting of streets, highways, bridges, parks and similar places for the safety and convenience of the public in Suburban Divisions.

(C) **Rate TL-S Traffic Signal Lighting—Suburban.** Available to any municipality in Suburban Divisions using Company's standard service for electric traffic signal lights installed, owned and maintained by the municipality.

**Rate RR Railroad Service.** Available only to railroad corporations for electric service for the operation of electrified railroad systems and appurtenances.

(C) **Rate T Traction Service.** Available only to street railway corporations for electric service for the operation of electrified transportation systems and appurtenances.

**Rate BLI Borderline Interchange Service.** Electric service supplied under reciprocal agreements, to neighboring electric utilities for resale in their adjacent territory at delivery points where the Company in its judgment can provide capacity in excess of the requirements of present and prospective customers in its own territory and for periods fixed by contract and terminable after the expiration of the initial term if capacity is no longer available.

# RATE R RESIDENCE SERVICE

**Availability.**

Single-phase electric service, in the PHILADELPHIA DIVISION, to the dwelling and appurtenances of a single private family for the domestic requirements of its members other than for the main or principal source of heat supply and also to service for related farm purposes when such service is supplied through one meter in conjunction with the farmhouse domestic requirements.

**Current Characteristics.**

Standard single-phase secondary service.

**Monthly Rate Table.**

Prices per kwh:

| | |
|---|---|
| $1.00 minimum covers the first | 14 kwh |
| 5.0¢ per kwh for the next | 25 " |
| 3.0¢ " " " " " | 36 " |
| 1.8¢ " " " " | additional use. |

**Minimum Earned Rate.**

Not less than 2¢ per kwh.

**Minimum Charge.**

$1.00 per month.

**Term of Contract.**

Annual.

**Payment Terms.**

Standard.

RECEIVED

TARIFF SECTION

(I) (D)

# RATE HT HIGH-TENSION POWER

**Availability.**

Untransformed electric service from the Company's high-tension transmission lines, where the Customer installs, owns, and maintains, any transforming, switching and other receiving equipment required.

**Current Characteristics.**

Standard high-tension service.

**Monthly Rate Table.**

**Capacity Charge Prices:** Per kw of billing demand:

| | | |
|---|---|---|
| $1.80 per kw | for the first..... | 100 kw |
| 1.25 " | " " next..... | 400 " |
| 1.15 " | " " ..... | 4,500 " |
| 1.00 " | " " excess over | 5,000 " |

CANCELLED
by
1st Revised Page No. 32
EFFECTIVE 6/1/65

**Energy Charge Prices:** Per kwh:

1.00¢ per kwh for the first 150 hrs. use of billing demand
0.70¢ " " " " next 150 " " " " "
0.50¢ " " " " " 100 " " " " "
0.45¢ " " " " additional use.

**Determination of Billing Demand.**

The billing demand each month shall be computed to the nearest kilowatt, and shall be the measured demand adjusted in accordance with the Rules and Regulations whenever the power factor of the Customer's load is found to be less than the standards therein specified, except that in no case shall the billing demand be less than 40% of the maximum billing demand value specified in a contract under this rate, nor less than 100 kilowatts.

**Delivery Points.**

Where the load of an industrial Customer located on single or contiguous premises becomes greater than the capacity of the standard circuit or circuits established by the Company to supply the Customer, an additional separate delivery point may be established for such premises upon the written request of the Customer and billing continued as if the service were being delivered and metered at a single point, provided such multi-point delivery is not disadvantageous to the Company.

**Minimum Charge.**

The monthly minimum charge shall be the energy charge applied to the kilowatt-hours that would result from 100 hours' use of the Customer's billing demand for the month, plus the capacity charge for such billing demand.

**Term of Contract.**

3 years, and thereafter from year to year until terminated by 60 days' notice from either party to the other.

**Payment Terms.**

Standard.

## STANDARD RIDERS—*Continued*

**Applicable to rates as indicated in Applicability Index of Riders, Page No.**

### ELECTRIC HOUSE-HEATING RIDER—*Continued*

(c) Heat Pump systems using outdoor air as heat-source and equipped with supplementary resistance heating units or systems, permanently installed in rooms or at central locations. The aggregate heating capacity of the heat pump equipment (i.e. exclusive of any resistance heating units or systems), at 0° F temperature of the heat source, shall be not less than 40 per cent nor more than 60 per cent of the computed heat loss; the aggregate connected load of all resistance heating units or systems, whether integral with the heat pump assembly or independent thereof, shall be not less than 150 watts per MBtu of the computed heat loss; and such resistance units or systems shall be energized by stages, each stage controlled by an outdoor thermostat, and limited to 100 watts per MBtu of the computed heat loss.

(d) Heat Pump systems using outdoor air as heat-source and equipped with a supplementary heat storage system, permanently installed at central locations. The aggregate heating capacity of the heat pump equipment (i.e. exclusive of the heat storage system), at 0° F temperature of the heat source, shall be not less than 40 per cent nor more than 60 per cent of the computed heat loss; and the heat storage system shall be of a type approved by the Company, shall be sized at not less than eight gallons per MBtu of the computed heat loss when employing hot water at atmospheric pressure and shall be equipped with electric heating elements whose aggregate connected load shall not exceed 120 watts per MBtu of the computed heat loss.

The supply of service to the heat storage system shall be separately metered under metering provisions of Rate HS, and shall be controlled by a clock, or other timing device, and by an interlock switch. These controlling devices shall be provided by the Company; shall be subject to inspection and control of setting by the Company; and shall be sealed by the Company. The wiring therefor shall be provided by the Customer to a location on the premises designated by the Company.

Service to the aggregate of all electric heating elements of the heat storage system shall be available daily for 5½ hours at night, the hours to be established from time to time by the Company; and service to a portion of said heating elements with a connected load not exceeding 60 watts per MBtu of the computed heat loss shall be available also during other periods of the day, established from time to time by the Company, but only when the heat pump is not operating.

(C) **Monthly Charges** for all electric service on the premises, uncontrolled as to the time of use, exclusive of the Unrestricted Service provided under Rate HS, shall be computed in accordance with the provisions of Rates R or R-S without the application of the minimum earned rate provision except that, when the electric heating system is of the type specified in 2(c), there shall be added to the amount thus computed, in each of the eight heating season months from October to May both inclusive, a charge at a rate of $2.00 per kilowatt applied to 60 per cent of the connected load of all resistance heating units or systems installed for heating the premises. Electric service on the premises controlled as to the time of use and separately metered, as provided in 2(d) and under Rate HS, shall be billed at the price provisions of Rate HS.

**Budget Billing** shall be used at Customer's option.

SUSPENDED
TO: JUL 18 1971, OCT 3 1971
AT: C-1 9 11 4
(per Pennsylvania PUC Secretary's Letter dated NOV 1 1971)
SUSPENSION VACATED
EFFECTIVE NOV 1 1971

OFFICIALLY FILED TARIFF

NOTICE
*This page of the Tariff never went into effect.*

## RATE GLP GENERAL LIGHT AND POWER

**Availability.**

Electric service through a single meter for the total requirements of offices, professional, commercial or industrial establishments, and other applications outside the scope of the Residence Service rate schedules. This rate is not available for billing demands over 4.9 kilowatts.

*Service under this rate is restricted to those installations and those customers receiving service under Rate GLP as of January 18, 1971* (C)

SUSPENDED
TO: JUL 1 8 1971 OCT 1 8 1971
AT: C-1 5114 (I)(C)

**Current Characteristics.**

Standard single-phase or polyphase secondary service.

**Monthly Rate Table.**

**Capacity Charge Price:**

$2.30 per kw includes the first 10 hours' use of billing demand.

Not Postponed to
See Supp #16 NOV 1 1 1971

**Energy Charge Prices:**

6.6¢ per kwh for the next 64 hours' use of billing demand but not less than 100 kwh
2.1¢ " " " " 70 " " " " " " " 105 "
1.5¢ " " " " 250 " " " " " " " 380 "
1.2¢ " " " " additional use.

SUSPENSION VACATED
EFFECTIVE NOV 1 7 1971

**Residence Service Modification:** Where the assessed demand includes one or more residence units, the last price block of the above table shall be 2.3¢ per kwh instead of 1.2¢ per kwh.

Air Quality Fuel Charge and
State Tax Adjustment Clause apply to this rate.

**Determination of Demand.**

The billing demand, which shall never be less than 1 kilowatt, shall be determined to the nearest 0.1 of a kilowatt by assessment, except that at the option of the Company the demand may be determined by measurement. The billing demand shall not be less than 40% of the greatest demand of any month of the preceding 11 months.

**Assessed Demand Calculation.**

The assessed demand shall be taken at these percentages of connected load:

1. Lighting Load—70% of the kilowatts of the lighting load.
2. Power Load—85% of the kilowatts of the power load.

Appliance, cooking, water heating and miscellaneous load will be supplied in connection with either class, and when so supplied shall be included in the assessed demand at the following values:

1. Cooking and Water Heating Load—20% of the kilowatts of the connected load.
2. Appliance and Miscellaneous Load—40% of the kilowatts of the connected load.
3. Residence Load—0.6 kilowatt for each portion of the connected load, other than water heating, which would comply with the availability intent of Rates R and R-S Residence Service if separately metered as a residence unit, where not more than five such units are served. Metered demand measurement will be required where more than five residence units are involved.

OFFICIALLY FILED TARIFF

## RATES AVAILABLE UNDER THIS TARIFF—*Continued*

**Rate HT High-Tension Power.** Untransformed electric service from the Company's high-tension transmission lines, where the Customer installs, owns, and maintains, any transforming, switching and other receiving equipment required.

**Rate FLP Federal Light and Power.** Available only to the United States Government, in lieu and to the exclusion of Rates GLP and GS, for electric service requirements of Federal Departments for the purposes other than provided under Rates SL-P and SL-S. A Heating Modification is available for customers with electric resistance space heating installations. (C)

**Rate MLP Municipal Light and Power.** Available only to the City of Philadelphia, in lieu and to the exclusion of Rates GLP and GS, for electric service requirements of the municipality for purposes other than provided under Rate SL-P. A Heating Modification is available for customers with electric resistance space heating installations. (C)

**Rate POL Private Outdoor Lighting.** Outdoor lighting of sidewalks, driveways, yards, lots and similar places, outside the scope of service under Rates SL-P and SL-S, by mercury vapor lamps of the sizes specified.

**Rate PSL Private Street Lighting.** This rate is in process of elimination and is restricted to lamps in service on February 3, 1969. (C)

**Rate SL-P Street Lighting in City of Philadelphia.** Available only to a governmental agency, municipal, state or federal, for outdoor lighting of streets, highways, bridges, parks or similar places, including directional highway signs at locations where other outdoor lighting service is established, for the safety and convenience of the public within the City of Philadelphia by incandescent filament, mercury-vapor, or fluorescent lamps of standard sizes and types approved by the Company where the Customer installs, owns and maintains all Utilization Facilities. Service will be supplied under this rate for street Lighting Units supported in a conventional manner, such as on poles, posts, brackets or hangers, and under conditions of installation and supply acceptable to the Company.

**Rate SL-S Street Lighting—Suburban.** Outdoor lighting of streets, highways, bridges, parks and similar places for the safety and convenience of the public in Suburban Divisions.

**Rate TL-S Traffic Signal Lighting—Suburban.** Available to any municipality in Suburban Divisions using Company's standard service for electric traffic signal lights installed, owned and maintained by the municipality.

**Rate RR Railroad Service.** Available only to railroad corporations for electric service for the operation of electrified railroad systems and appurtenances.

**Rate T Traction Service.** Available to any corporation or authority for electric service for the operation of electrified street railway systems and appurtenances.

**Rate BLI Borderline Interchange Service.** Electric service supplied under reciprocal agreements, to neighboring electric utilities for resale in their adjacent territory at delivery points where the Company in its judgment can provide capacity in excess of the requirements of present and prospective customers in its own territory and for periods fixed by contract and terminable after the expiration of the initial term if capacity is no longer available.

(See rate pages for additional details of availability, rates and conditions.)

OFFICIALLY FILED TARIFF

## RATE SL-P STREET LIGHTING IN CITY OF PHILADELPHIA

**Availability.**

Only to a governmental agency, municipal, state or federal, for outdoor lighting of streets, highways, bridges, parks or similar places, including directional highway signs at locations where other outdoor lighting service is established hereunder, for the safety and convenience of the public within the City of Philadelphia by incandescent filament, mercury-vapor, or fluorescent lamps of standard sizes and types approved by the Company where the Customer installs, owns and maintains all Utilization Facilities as hereinafter defined. Service will be supplied under this rate for street Lighting Units supported in a conventional manner, such as on poles, posts, brackets or hangers, and under conditions of installation and supply acceptable to the Company.

**Characteristics of Supply.**

Service under this rate will be from series 6.6 ampere circuits or from standard single-phase secondary circuits, as specified by the Company, except that, where conditions require, or where existing standard secondary circuits are not available, the Company at its option may supply service from nonstandard secondary circuits, providing nominally 240 volts.

**Monthly Rate Table.**

**Facilities Charge Prices:**

For Lighting Units in service as of the fifteenth day of the month.

$0.50 per Lighting Unit supplied from standard secondary (aerial or underground) circuits where the Customer owns the individual control for each Lighting Unit.

$0.60 per Lighting Unit supplied from aerial (series or secondary) circuits where the Company provides group controls.

$2.50 per Lighting Unit supplied from underground (series or secondary) circuits where the Company provides group controls. (D)

**Capacity Charge Prices:**

0.30¢ per watt for the first 100 watts of billing demand per Lighting Unit. (D)
0.20¢ per watt for the additional watts of billing demand. (D)

**Energy Charge Price:**

1.2¢ per kwh of energy billed. (D)

**Lighting Unit.**

A Lighting Unit shall comprise each lighting installation which is separately connected to a delivery point on the Company's series or secondary circuit.

**Determination of Billing Demand.**

The wattage, expressed to the nearest tenth of a watt, of a Lighting Unit shall be composed of manufacturer's rating of its lamps, ballasts, transformers, individual controls and other load components required for its operation. The aggregate of wattages of all Lighting Units in service as of the fifteenth day of a month shall constitute the billing demand for the month.

**Determination of Energy Billed.**

The energy use for a month of a Lighting Unit shall be computed to the nearest kilowatt-hour as the product of one thousandth of its wattage and the effective hours of use of such wattage during the calendar month under the established operation schedules approved by the authorized representatives of the Customer and the Company. The aggregate of the kilowatt-hours thus computed for all Lighting Units in service as of the fifteenth day of a month shall constitute the energy billed for the month.

OFFICIALLY FILED TARIFF

# STANDARD RIDERS

**Applicable to rates as indicated in Applicability Index of Riders, Page No. 46**

## ALLEY-LIGHTING AND TRAFFIC-SIGNAL RIDER

**Applicability.** To multiple, unmetered lighting service supplied the City of Philadelphia to operate incandescent lamps and appurtenances installed, owned and maintained by the City, which assumes the cost involved in making the connections to the Company's facilities.

**Service Defined.** All-night outdoor lighting of alleys and courts by incandescent lights installed on poles or supports supplied by the City, and/or operation of traffic signals erected either upon existing poles of the Company or upon poles or supports supplied by the City.

**Notice to Company.** The City shall give advance notice to the Company of all proposed new installations or of the replacement or reconstruction of existing installations. The City shall advise the Company as to each new installation or any change in the equipment or connected load of an existing installation, including any change in burning hours and the date on which such new or changed operation took effect.

**Charge.** 1.9¢ per kwh.

**Plan of Monthly Billing.** Bills may be rendered in equal monthly installments, computed from the calculated annual use of energy, adjusted each month to give effect to any new or changed rate of annual use, by reason of changes in the City's installation, with charge or credit for fractional parts of the month during which a change occurred.

**Liability Provision.** The Company shall not be liable for damage, or for claims for damage, to persons or property, arising, accruing or resulting from, installation, location or use of lamps, wires, fixtures and appurtenances; or resulting from failure of any light, or lights, to burn for any cause whatsoever.

**Term.** Annual contract.

## DEFINITION OF TERMS AND EXPLANATION OF ABBREVIATIONS—*Continued*

**pronouns.** The masculine, singular, pronoun (he, his, him) relates to Customer, whether male, female, partnership or corporation.

**property line.** The division line between land held in or for private use, and land in which the public or the Company has a right of use; or, the division line between separately owned or occupied land.

**service.** The supply of capacity and energy for use by the Customer, including all things done by the Company in connection with such supply.

STANDARD SINGLE-PHASE SECONDARY; alternating current, 60 cycles, nominally 120-240 volts, 3 wires, except that nominally 120 volts, 2 wires may be supplied for connection to wiring installations which consist of not more than two 15-ampere branch circuits.

STANDARD POLYPHASE SECONDARY; alternating current, 60 cycles:

(a) nominally 120-240 volts, 2-phase, 5 wires;

(b) nominally 240 volts, 3-phase, 3 wires; a fourth wire neutral will be extended for the supply of 120-240-volt single-phase equipment in combination with this service where the service-capacity required does not exceed 15 kilovoltamperes on any one of the phases;

(c) nominally 120-208 volts, 3-phase, 4 wires, where 4,160 volts, 3-phase primary is available, for the exclusive supply of secondary service to one or more buildings or units situated on a single premises occupied by one or more than one Customer, with transformers and secondaries installed on the premises at suitable locations provided by the owner, except that residence units on the same premises billed under Rates R or R-S will be supplied at 120-240 volts, single-phase, 3 wires;

(d) nominally 120-240 volts, 3-phase, 7 wires, for supply only to single-phase equipment requiring more than 75 kilovoltamperes of service capacity, with transformers located on Customer's premises.

STANDARD PRIMARY; unregulated alternating current, 60 cycles, nominally 2,400 volts, 2-phase, 3 wires, or nominally 4,160 volts, 3-phase, 3 or 4 wires.

STANDARD HIGH TENSION; unregulated alternating current, 60 cycles, 3-phase, 3 wires:

(a) nominally 13,200 volts (subject to paragraph (c) hereof) in the CITY OF PHILADELPHIA with the exception of that portion north of a boundary formed by Pennypack Creek from its intersection with the City Line eastwardly to Verree Road, and thence by a line projected to the intersection of Grant Avenue and Surrey Road, by Grant Avenue to Roosevelt Boulevard, by Roosevelt Boulevard to Comly Road, southeasterly by Comly Road and a line formed by Comly Road projected to Poquessing Creek; in MONTGOMERY COUNTY as follows:—that portion of Cheltenham Township, bounded by Washington Lane, Church Road to the Abington Township Line, the Abington Township Line, and the City of Philadelphia; and that portion of Cheltenham Township bounded by the Springfield Township Line, Cheltenham Avenue, Washington Lane and a line projected from Washington Lane to the Springfield Township Line, such line being parallel to and ½ mile from Cheltenham Avenue; and that portion of Lower Merion Township, bounded by the City Line, the Norristown Branch of the Pennsylvania Railroad and the Schuylkill River; and that portion of Springfield Township, bounded by Cheltenham Township Line, Ivy Hill Road, Stenton Avenue and a line formed by Gravers Lane extended to the boundary with Cheltenham Township at Cheltenham Avenue; in DELAWARE COUNTY as follows:—City of Chester; Eddystone, Marcus Hook, Trainer and Upland Boroughs; Lower Chichester and Tinicum Townships; and in that portion of Ridley Township adjacent to Essington Avenue;

(b) nominally 33,000 volts (subject to paragraph (c) hereof) elsewhere for other than loads of customers being supplied at 13,200 volts as of October 1, 1955, or such increases in those loads as can be supplied with existing 13,200-volt facilities;

(c) nominally 66,000, 132,000 or 220,000 volts anywhere in the Company's service territory for loads of such character as to require supply at one of such voltages in order not to impose unsatisfactory service conditions on the Company's supply system, or for loads of such character that supply at one of such voltages is desired both by the Company and the Customer. (C)

**service-supply lines.** The facilities (conductors, cables, conduits, etc.) extending from the Company's facilities in the highway or other land line location to the facilities owned and maintained by the Customer.

(C) Indicates change.

(C) # RATE FLP FEDERAL LIGHT AND POWER

**Availability.**

Only to the UNITED STATES GOVERNMENT, in lieu and to the exclusion of Rate GLP, for electric service requirements of Federal Departments for purposes other than provided under Rates SL-P and SL-S.

CANCELLED by Revised Page No. 33 EFFECTIVE [illegible]

**Current Characteristics.**

Standard single-phase or polyphase secondary service.

**Rate.**

2.2¢ per kwh.

**Special Rules and Regulations.**

Whenever it is advantageous to the Customer at points where he has been receiving untransformed electric service from primary supply lines of the Company's distribution system, or from the Company's high-tension transmission lines, service will be supplied under this rate in lieu of the application of Rates PD or HT, and the Customer shall continue to own and maintain any transforming, switching and other receiving equipment required. On new contracts, or on additions to old contracts for any application of this rate where the prospective demand exceeds 25 kilowatts, the Company, in order to secure the most efficient use of its supply circuits, may require that service be taken at primary or high-tension voltage under the same conditions of receiving equipment ownership.

**Term of Contract.**

Annual.

**Payment Terms.**

The final date for payment of the net amount of the bill shall be at least 30 days after presentation.

### ELECTRIC HOUSE-HEATING RIDER—*Continued*

(c) Heat Pump systems using outdoor air as heat-source and equipped with supplementary resistance heating units or systems, permanently installed in rooms or at central locations. The aggregate heating capacity of the heat pump equipment (i.e. exclusive of any resistance heating units or systems), at 0° F temperature of the heat source, shall be not less than 40 per cent nor more than 60 per cent of the computed heat loss; the aggregate connected load of all resistance heating units or systems, whether integral with the heat pump assembly or independent thereof, shall be not less than 150 watts per MBtu of the computed heat loss; and such resistance units or systems shall be energized by stages, each stage controlled by an outdoor thermostat, and limited to 100 watts per MBtu of the computed heat loss.

(d) Heat Pump systems using outdoor air as heat-source and equipped with a supplementary heat storage system, permanently installed at central locations. The aggregate heating capacity of the heat pump equipment (i.e. exclusive of the heat storage system), at 0° F temperature of the heat source, shall be not less than 40 per cent nor more than 60 per cent of the computed heat loss; and the heat storage system shall be of a type approved by the Company, shall be sized at not less than eight gallons per MBtu of the computed heat loss when employing hot water at atmospheric pressure and shall be equipped with electric heating elements whose aggregate connected load shall not exceed 120 watts per MBtu of the computed heat loss.

The supply of service to the heat storage system shall be separately metered under metering provisions of Rate HS, and shall be controlled by a clock, or other timing device, and by an interlock switch. These controlling devices shall be provided by the Company; shall be subject to inspection and control of setting by the Company; and shall be sealed by the Company. The wiring therefor shall be provided by the Customer to a location on the premises designated by the Company.

Service to the aggregate of all electric heating elements of the heat storage system shall be available daily for 5½ hours at night, the hours to be established from time to time by the Company; and service to a portion of said heating elements with a connected load not exceeding 60 watts per MBtu of the computed heat loss shall be available also during other periods of the day, established from time to time by the Company, but only when the heat pump is not operating.

**Monthly Charges** for all electric service on the premises, uncontrolled as to the time of use, in a month shall be computed in accordance with the provisions of Rates R or R-S without the application of the minimum earned rate provision except that, when the electric heating system is of the type specified in 2(c), there shall be added to the amount thus computed, in each of the eight heating season months from October to May both inclusive, a charge at a rate of $2.00 per kilowatt applied to 60 per cent of the connected load of all resistance heating units or systems installed for heating the premises. All electric service on the premises controlled as to the time of use and separately metered, as provided in 2(d) and under Rate HS, shall be billed at the price provisions of Rate HS.

**Budget Billing** shall be used at Customer's option.

# LIST OF CHANGES MADE BY THIS SUPPLEMENT

## INCREASES

**Rate WH Water Heating Service.** (4th Rev. Page 29.)
The prices for unrestricted service and off-peak service are changed (except the minimum charges), resulting in increases.

**Rate FLP Federal Light and Power.** (4th Rev. Page 36.)

**Rate MLP Municipal Light and Power.** (4th Rev. Page 38.)

**Rate POL Private Outdoor Lighting.** (4th Rev. Page 40.)
In each of the above rates the prices in the monthly rate table are changed, resulting in increases.

**Rate TL-S Traffic Signal Lighting—Suburban.** (4th Rev. Page 47.)
The price of the energy rate is changed, resulting in increases.

**Rate RR Railroad Service.** (4th Rev. Page 48.)

**Rate T Traction Service.** (4th Rev. Page 49.)
In each of the above rates the prices in the monthly rate table are changed, resulting in increases.

**Rate BLI Borderline Interchange Service.** (4th Rev. Page 51.)
The price of the energy charge is changed, resulting in increases.

**Night Service HT Rider.** (3rd Rev. Page 59.)

**Night Service PD Rider.** (3rd Rev. Page 60.)
In each of the above riders the price of the capacity charge is changed, resulting in increases.

**Traffic Signal and Alley Lighting Rider.** (4th Rev. Page 63.)
The price of the energy charge is changed, resulting in increases.

**Transformer Rental Rider.** (3rd Rev. Page 64.)
The price of the operating charge is changed, resulting in increases.

See Supp #12

## INCREASES AND CHANGES

**Rate R Residence Service.** (4th Rev. Page 25.)

**Rate R-S Residence Service.** (4th Rev. Page 26.)

**Rate R-M Residence Service.** (4th Rev. Page 27.)
In each of the above rates the prices (except the minimum charge) and the blocking in the monthly rate table are changed, resulting in increases.

**Rate R-H Residential Heating Service.** (4th Rev. Page 28.)
The prices (except the minimum charge) and the blocking in the monthly rate table are changed, resulting in increases.

The availability provision is changed, making this rate applicable when electricity is the sole source, instead of the primary source, of energy used for space heating; customers presently served under this rate will not be affected. In the heat pump provision the word "primary" is deleted and "eight billing months" is changed to "eight months" for clarity.

**Rate GLP General Light and Power.** (4th Rev. Page 30; 2nd Rev. Page 31.)
The price of the first block of the capacity charge, the prices of the energy charge, the price of the residence service modification and the prices of the minimum charge provision are changed, resulting in increases.

The last two price blocks of the capacity charge in the monthly rate table are eliminated as this rate is not available for demands over 4.9 kw. The restriction provision is updated.

**Rate GS General Service.** (4th Rev. Page 32; 2nd Rev. Page 33.)
The prices in the monthly rate table are changed; in the measured demand portion of the rate table the second block is changed to modify the hours' use of billing demand for customers with demands greater than 50 kw; the prices of the minimum charge provision are changed; and the price for heating use under separate metering is changed. The result of all of these changes is net increases.

In the single meter heating modification provision an additional minimum demand limit of one-half of the monthly measured demand is added but customers in service as of January 18, 1971 are not affected by this change.

**Rate PD Primary-Distribution Power.** (4th Rev. Page 34.)
The prices in the monthly rate table and the provision for determination of billing demand are changed, resulting in increases.

The availability provision is changed to provide a clearer description of conditions under which service will be available in areas converted to 13 kv.

**Rate HT High-Tension Power.** (5th Rev. Page 35.)
The prices in the monthly rate table, the high voltage discount provision and the provision for determination of billing demand are changed, resulting in net increases.

**Rate PSL Private Street Lighting.** (4th Rev. Page 41.)
The prices in the rate table are changed, resulting in increases.
The restriction provision of this rate is updated.

**Rate SL-P Street Lighting in City of Philadelphia.** (4th Rev. Page 42.)
The prices in the monthly rate table are changed, resulting in increases.
The availability provision is changed to include sodium vapor lamps which are now in use by the Customer.

**Rate SL-S Street Lighting—Suburban.** (4th Rev. Page 45.)
The prices in the rate table and the lighting improvement discount provision are changed, resulting in net increases.

**Farm Service Rider.** (3rd Rev. Page 57.)
The price of the demand charge for farm service is changed, resulting in increases.
The restriction provision of this rider is updated.

Bureau of Rates
TARIFF SECTION

OFFICIALLY FILED TARIFF

## RATE GLP GENERAL LIGHT AND POWER—*Continued*

CONNECTED LOAD. The aggregate of all the devices located on the premises of the Customer which are connected to the Company's service, or which can be simultaneously connected by the insertion of fuses or by the closing of a switch, the manufacturer's rating being used to determine the magnitude of the load. In the absence of such manufacturer's rating, the rating will be determined by measuring the kilovoltamperes required for its operation.

The connected load is classified as to purpose for this application as follows:

1. LIGHTING—illumination and display load.
2. POWER—motors in excess of ½ horsepower individual rating and industrial baking and heating installations.
3. COOKING AND WATER HEATING—heating appliances used in the preparation of food or beverages, including ranges and water heaters.
4. APPLIANCE AND MISCELLANEOUS—load which does not conform to the other applications.

Electrical appliances, including ranges, radios and lighting fixtures with an aggregate rated capacity of not less than 500 watts which are operated solely for making intermittent sales demonstrations by a vendor of such equipment who is otherwise a Customer of the Company shall, at the written request of the Customer to the Company, be excluded from the connected load for determining the Customer's assessed demand. The capacity of signs and window display loads shall not be thus excluded.

GASEOUS TUBE LIGHTING. Connected load values of gaseous tube lighting units shall be based upon their total capacity requirement measured in terms of current and voltage. Manufacturer's rating for complete units shall be used where such rating includes the tubes and their auxiliaries and where power factor compensation is included to produce a power factor of 90% or better.

Units for which only the wattage of the lamp is available, shall be taken at the lamp wattage plus 25% for the auxiliaries in the case of units having more than one lamp, and plus 30% in the case of units with single lamps.

The wattage of units which do not include power factor compensation shall be taken from the manufacturer's over-all rating or computed in accordance with the provisions of the preceding paragraph and, in either case, multiplied by a factor of 1.8 to fix the connected load value.

WELDERS. The connected load value of transformer-type or resistance-type welders served on secondary service, other than any limited input welder supplied on a residence service contract or included in a residence unit demand factor, shall be taken at 70% of the product of the maximum primary current and the rated primary voltage as determined by test. Welders may be sealed, at the Customer's option, at a control point below their maximum capacity, in which case the test shall be taken for such restricted duty point. The Company may, at its option, use the welder name-plate ratings for resistance-type, or transformer name-plate ratings for transformer-type welders in lieu of a test, where the name-plate ratings conform to the USASI or AIEE recommended standards. Welder connected loads so determined shall be classified as power in the application of the assessed demand formula.

LOAD INSPECTIONS. It is a condition precedent to the supply of service under this rate that the Company's representatives shall have access to the premises at reasonable times to inspect and count the connected load. Demands fixed by assessment will remain in effect until a subsequent recount of connected load made by the Company at approximately an annual, or other interval, depending upon the use of service by the Customer, results in a change in value.

## RATE RR RAILROAD SERVICE

**Availability.**

Only to railroad corporations for electric service for the operation of their railroad systems and appurtenances.

**Character and Amount of Electric Service.**

Service to be supplied hereunder will be single-phase alternating current at nominally twenty-five (25) cycles per second and at nominally 13,200 volts, except that service to the Customer's incidental requirements for signal system and other miscellaneous uses will be at such available frequency and voltage as may be established by the Company from time to time. The total amount of capacity initially to be made available shall not exceed 20,000 kilowatts. Additional capacity, if available, will be supplied upon reasonable advance written notice from the Customer.

**Monthly Rate Table.**

SUSPENDED
TO: JUL 18 1971 OCT 18 197
AT: C-1 9114
Vol. Postponed To
See Supp. No. NOV 11 1971
SUSPENSION VACATED
EFFECTIVE NOV 17 1971

**Capacity Charge:**

$5.15 per kw of billing demand.

**Energy Charge:**

1.4¢ per kwh for the first 400 hrs. use of the billing demand.
0.63¢ " " " " additional use.

Air Quality Fuel Charge and
State Tax Adjustment Clause apply to this rate.

**Determination of Billing Demand.**

For each day in the month, there shall be selected the single clock-hour in which the kilowatt-hour draft by the Customer is the greatest. One-third of the aggregate number of kilowatt-hours drawn by the Customer during the highest three of the clock-hours so selected will constitute the Customer's maximum demand, in kilowatts, for such month.

The Customer shall maintain the power factor of his load as near unity as practicable and should the power factor of said load during any hour used in determining the maximum demand be found to be less than sixty-five (65) per cent, then the draft for that hour will be adjusted by multiplying it by the quotient obtained by dividing the actual power factor, expressed as a decimal, into 0.65.

The billing demand each month shall be the maximum demand for such month adjusted for power factor as specified above, except that in no case shall the billing demand in a month be less than 75% of the greatest adjusted maximum demand established during the preceding 12 months, nor less than 14,000 kilowatts.

**Minimum Charge.**

The minimum charge for each month shall be the energy charge applied to the kilowatt-hours obtained by multiplying 30% of the hours in the month by the billing demand for the month, plus the capacity charge for such billing demand.

**Delivery Point.**

The point of delivery for service rendered under this rate shall be the twenty-five (25) cycle, 13,200-volt bus bars at a frequency changer substation established by the Company, except that service to the Customer's incidental requirements for signal system and other miscellaneous uses at such substation may be at such other point as shall be acceptable to the Company.

**Receiving Equipment Responsibilities.**

Beyond the delivery point, the Customer shall own and bear the entire cost of necessary inspection, repair and maintenance of any transforming, switching, or other receiving equipment required.

**Termination of Service.**

Unless otherwise stated in a written Service Contract, service under this rate is terminable by the Company or the Customer upon not less than 60 days' written notice.

**Written Service Contract.**

At the Customer's election, service hereunder may be evidenced by a written Service Contract for an annual term and under such further detailed conditions of service supply as are not inconsistent with those stated in this rate or in the Rules and Regulations.

**Payment Terms.**

Each month, the Company will render a bill to the Customer covering the charges for the preceding calendar month and Customer shall pay such bill within 20 days after receipt thereof.

(I) Indicates increase.

OFFICIALLY FILED TARIFF

OFFICIALLY FILED TARIFF

## DEFINITION OF TERMS AND EXPLANATION OF ABBREVIATIONS (C)

a. c. alternating current.

available rate. A rate which may be obtained by a Customer if his use of service conforms to the character of supply contemplated in the rate, and his location is such that this service can be supplied from existing facilities of the Company.

billing demand. The assessed or measured demand after correction, if any, for power factor; except that the billing demand may be limited to a minimum figure.

Btu British thermal unit.

capacity charge. A charge based upon demand, either with or without power factor correction.

continuous service. Service which the Company endeavors to keep available at all times.

Customer. Any person, partnership, association, or corporation, lawfully receiving service from the Company.

Customer's service extension. The facilities extending from the Customer's service-receiving equipment to the Company's service-supply lines.

demand. The maximum rate-of-use of energy.

energy charge. A charge based upon kilowatt-hours of use.

holidays. New Year's Day, Lincoln's Birthday, Washington's Birthday, Good Friday, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans Day, Thanksgiving Day, Christmas Day and Sundays. (C)

hp, horsepower. As used herein, horsepower shall be computed as the equivalent of 750 watts.

kv, kilovolts. 1000 volts. (C)

kva, kilovoltampere. Unit of measurement of rate-of-use which determines electrical capacity required; it is obtained by multiplying the voltage of a circuit by its amperage.

kw, kilowatt. Unit of measurement of rate-of-use of electric energy; 1000 watts.

kwh, kilowatt-hour. Unit of measurement of quantity of energy; an amount equivalent to the use of 1000 watts for one hour.

lumen. Unit of measurement of quantity of light.

month. A month under this TARIFF means 1/12 of a year, or the period of approximately 30 days between two regular consecutive readings of the Company's meter or meters installed on the Customer's premises.

point of delivery. That single point at which the service-supply lines of the Company terminate and the Customer's facilities for receiving the service begin.

power factor. As used herein, power factor is, in a single-phase circuit, the ratio of the watts to the voltamperes, and, in a polyphase circuit, is the ratio of the total watts to the vector sum of the voltamperes in the several phases.

Terms and Conditions.

1. Ownership and Type of Control Facilities.

a. Lighting Units Supplied from Standard Secondary Circuits: Customer shall provide, own and maintain, for each of such Lighting Units, the individual control of a type approved by the Company except that, at the option of the Customer, the Company will continue to provide group control facilities presently in service.

b. Lighting Units Supplied from Series and from Nonstandard Secondary Circuits: Company will provide, own and maintain group control facilities.

2. Ownership of Utilization Facilities.

a. Lighting Units Supplied from Aerial Circuits: Customer shall provide, own and maintain the Utilization Facilities comprising the brackets, hangers, luminaires, lamps, ballasts, transformers, individual controls (where used) and other components required for the operation of such Lighting Units, conductors, moulding and supporting insulators between the lamp receptacles and line wires of the Company's distribution facilities.

Company shall provide the supporting pole or post for such aerially supplied Lighting Unit and will issue authorization to permit the Customer to install thereon the said Utilization Facilities.

b. Lighting Units Supplied from Underground Circuits: Customer shall provide, own and maintain the Utilization Facilities comprising the supporting pole or post, foundation with 90-degree pipe bend, brackets or hangers, luminaires, lamps, ballasts, transformers, individual controls (where used), and other components required for the operation of such Lighting Units, conductors and conduits from the lamp receptacles to sidewalk level, or in special cases, such as Federally and State financed limited access highways, to a delivery point designated by the Company on its secondary voltage circuit, and shall assume all costs of installing such Utilization Facilities.

Where vertical extensions are required on foreign-owned posts for the support of such underground supplied Lighting Units, the extensions shall be provided and owned by the Customer. Rentals incurred on such foreign-owned posts shall be the responsibility of the Customer.

Except as provided in 5 hereof, the Company shall own conduit from the distribution circuit to the 90-degree pipe bend, shall own conductors from its distribution system to the designated delivery point or to the sidewalk level as specified in 2b, and shall provide sufficient length of conductors for splicing at the designated delivery point or in the post base where sidewalk level access is provided. Where a splicing chamber is provided in the post base, the Customer shall provide space for any relays or similar devices required for the operation of the street lighting circuit.

3. Standards of Construction for Utilization Facilities. Customer construction shall meet the Company's standards which are based upon the National Electrical Safety Code. Designs of proposed construction deviating from such standards shall be submitted to the Company for approval before proceeding with any work.

4. Power Factor. The Utilization Facilities provided by the Customer shall be of such a nature as to maintain the power factor of each Lighting Unit at not less than 85%.

5. Supply Facilities. Lighting service shall be supplied from distribution facilities and equipment, including group control facilities where required, installed at the cost and expense of the Company and owned and controlled by it, except that in locations (such as bridges, overpasses, underpasses and limited access highways) where Company ownership of conduit, manholes or vaults may not be practical for reasons beyond its control, the Customer shall make available, at no expense to the Company, space for the Company's distribution facilities required in rendering service under this rate.

Bureau of Rates and Research

OFFICIALLY FILED

## STANDARD RIDERS—*Continued* (C)

**Applicable to rates as indicated in Applicability Index of Riders, Page No. 46**

### CASUALTY RIDER

**Applicability.** To service delivered during a period when a Customer is prevented for a length of time in excess of 48 hours from using all or a substantial part of the amount contracted for by reason of strike, riot, fire, storm, flood, drought, interference by civil or military authorities, or any other cause beyond his control.

**Notice Required.** Written request shall be made to the Company for the application of this rider with advice as to the extent of the interruption, its date, cause and probable duration.

**Guarantees Waived.** Guarantees of revenue under the Customer's contract shall be suspended during the period of the interruption, but shall be restored when the cause of interruption shall cease, be removed or remedied.

**Bills Prorated.** Bills for service supplied shall be prorated, based upon the actual level of operation during the period of suspension of guarantees.

**Return to Normal Use.** The Customer shall use reasonable diligence in resuming the use of service provided in his contract.

**Term.** The contract term shall be extended for a period equal to the period of suspension so that the Company shall secure a working term at full connected load equal to the term of the contract.

(C) Indicates change.

## DEFINITION OF TERMS AND EXPLANATIONS

### ABBREVIATIONS—Continued

pronouns. The masculine, singular, pronoun (he, his, him) relates to Customer whether male, female, partnership or corporation.

property line. The division line between land held in or for private use, and land in which the public or the Company has a right of use; or, the division line between separately owned or occupied land.

service. The supply of capacity and energy for use by the Customer, including all things done by the Company in connection with such supply.

STANDARD SINGLE-PHASE SECONDARY; alternating current, 60 cycles, nominally 120-240 volts, 3 wires, except that nominally 120 volts, 2 wires may be supplied for connection to wiring installations which consist of not more than two 15-ampere branch circuits.

STANDARD POLYPHASE SECONDARY; alternating current, 60 cycles:

(a) nominally 120-240 volts, 2-phase, 5 wires;

(b) nominally 240 volts, 3-phase, 3 wires; a fourth wire neutral will be extended for the supply of 120-240-volt single-phase equipment in combination with this service where the service-capacity required does not exceed 15 kilovoltamperes on any one of the phases;

(c) nominally 120-208 volts, 3-phase, 4 wires, where 4,160 volts, 3-phase primary is available, for the exclusive supply of secondary service to one or more buildings or units situated on a single premises occupied by one or more than one Customer, with transformers and secondaries installed on the premises at suitable locations provided by the owner, except that residence units on the same premises billed under Rates R or R-S will be supplied at 120-240 volts, single-phase, 3 wires;

(C) (d) nominally 120-240 volts, 3-phase, 7 wires, for supply only to single-phase equipment requiring more than 75 kilovoltamperes of service capacity, with transformers located on Customer's premises.

STANDARD PRIMARY; unregulated alternating current, 60 cycles, nominally 2,400 volts, 2-phase, 3 wires, or nominally 4,160 volts, 3-phase, 3 or 4 wires.

STANDARD HIGH TENSION; unregulated alternating current, 60 cycles, 3-phase, 3 wires:

(a) nominally 13,200 volts (subject to paragraph (c) hereof) in the CITY OF PHILADELPHIA with the exception of that portion north of a boundary formed by Pennypack Creek from its intersection with the City Line eastwardly to Verree Road, and thence by a line projected to the intersection of Grant Avenue and Surrey Road, by Grant Avenue to Roosevelt Boulevard, by Roosevelt Boulevard to Comly Road, southeasterly by Comly Road and a line formed by Comly Road projected to Poquessing Creek; in MONTGOMERY COUNTY as follows:—that portion of Cheltenham Township, bounded by Washington Lane, Church Road to the Abington Township Line, the Abington Township Line, and the City of Philadelphia; and that portion of Cheltenham Township bounded by the Springfield Township Line, Cheltenham Avenue, Washington Lane and a line projected from Washington Lane to the Springfield Township Line, such line being parallel to and ½ mile from Cheltenham Avenue; and that portion of Lower Merion Township, bounded by the City Line, the Norristown Branch of the Pennsylvania Railroad and the Schuylkill River; and that portion of Springfield Township, bounded by Cheltenham Township Line, Ivy Hill Road, Stenton Avenue and a line formed by Gravers Lane extended to the boundary with Cheltenham Township at Cheltenham Avenue; in DELAWARE COUNTY as follows:—City of Chester; Eddystone, Marcus Hook, Trainer and Upland Boroughs; Lower Chichester and Trainer Townships; and in that portion of Ridley Township adjacent to Essington Avenue;

(b) nominally 33,000 volts (subject to paragraph (c) hereof) elsewhere for other than loads of customers being supplied at 13,200 volts as of October 1, 1955, or such increases in those loads as can be supplied with existing 13,200-volt facilities;

(c) nominally 66,000 or 132,000 volts anywhere in the Company's service territory for loads of such character as to require supply at one of such voltages in order not to impose unsatisfactory service conditions on the Company's supply system, or for loads of such character that supply at one of such voltages is desired both by the Company and the Customer.

service-supply lines. The facilities (conductors, cables, conduits, etc.) extending from the Company's facilities in the highway, or other trunk line location to the facilities owned and maintained by the Customer.

OFFICIALLY FILED TARIFF

(D) RATE R-S RESIDENCE SERVICE

**Availability.**

Single-phase electric service, in SUBURBAN DIVISIONS, to the dwelling and appurtenances of a single private family for the domestic requirements of its members other than for the main or principal source of heat supply and also to service for related farm purposes when such service is supplied through one meter in conjunction with the farmhouse domestic requirements.

**Current Characteristics.**

Standard single-phase secondary service.

**Monthly Rate Table.**

Prices per kwh:

$1.00 minimum covers the first 12 kwh
5.0¢ per kwh for the next 44 "
3.0¢ " " " " " 44 "
2.0¢ " " " " " 100 "
1.8¢ " " " " additional use.

**Minimum Earned Rate.**

Not less than 2¢ per kwh.

**Minimum Charge.**

$1.00 per month.

**Term of Contract.**

Annual.

**Payment Terms.**

Standard.

OFFICIALLY FILED TARIFF

# RATE MLP MUNICIPAL LIGHT AND POWER

**Availability.**

Only to the CITY OF PHILADELPHIA, in lieu and to the exclusion of Rate GLP, for electric service requirements of the municipality for purposes other than provided under Rate SL.

CANCELLED
Revised Page No. 34
EFFECTIVE JUN 16 1968

**Current Characteristics.**

Standard single-phase or polyphase secondary service.

**Rate.**

2.3¢ per kwh

**Special Rules and Regulations.**

1. Whenever it is advantageous to the Customer at points where he has been receiving untransformed electric service from primary supply lines of the Company's distribution system, or from the Company's high-tension transmission lines, service will be supplied under this rate in lieu of the application of Rates PD or HT, and the Customer shall continue to own and maintain any transforming, switching and other receiving equipment required. On new contracts, or on additions to old contracts for any application of this rate where the prospective demand exceeds 25 kilowatts, the Company, in order to secure the most efficient use of its supply circuits, may require that service be taken at primary or high-tension voltage under the same conditions of receiving equipment ownership.

2. Service for lighting enclosed structures, tunnels or underpasses will be supplied under this rate at secondary voltage when the Customer provides satisfactory location for the Company's transformers and provides and installs the required wiring, time-control and service entrance equipment. When satisfactory transformer location cannot be provided, service may be supplied at primary voltage to Customer-owned transformers in accordance with Special Rule 1 above.

**Term of Contract.**

Annual.

(C) **Payment Terms.**

The final date for payment of the net amount of the bill shall be at least 30 days after presentation.

## STANDARD RIDERS—*Continued*

**Applicable to rates as indicated in Applicability Index of Riders, Page No. 46**

### NIGHT SERVICE HT RIDER

**Applicability.** To service supplied during off-peak hours for demands in excess of those supplied during on-peak hours where the Company is the exclusive source of service for the connected load so supplied and where (a) at 13,200 or 33,000 supply voltage the demand specified for off-peak hours shall be limited to an amount designated by the Company which in no event shall be greater than 10,000 kilowatts, and (b) at 66,000 or higher supply voltage the demand specified for off-peak hours shall be limited to an amount designated by the Company which in no event shall be greater than either three times the maximum value of demand specified in the contract or the sum of 20,000 kilowatts and said maximum demand value, whichever is lower, except that when the said maximum demand value is less than 3,334 kilowatts, the demand specified for off-peak hours shall be limited as in (a) above. (C)

**Definition of Peak Hours.** ON-PEAK HOURS are defined as those hours between 7 a. m. and 7 p. m., Eastern Standard Time or Daylight Saving Time, whichever is in common use, daily except Saturdays and holidays.

OFF-PEAK HOURS are defined as the hours other than those specified as on-peak hours.

**Service Rate.** Rate HT, including all its terms and guarantees, is applicable to service supplied during on-peak hours. The capacity charge and blocking of the energy charge of said rate shall be based on the billing demand for on-peak hours except that, when the greatest demand during off-peak hours, as determined by measurement and adjusted for power factor, exceeds the demand specified for off-peak hours, the amount of such excess shall be added to the billing demand for on-peak hours and the resultant sum shall then constitute the basis for said capacity charge and blocking of the energy charge.

**Night Service Capacity Charge:** 60¢ per kw of off-peak billing demand per month.

**Determination of Off-Peak Billing Demand.** The off-peak billing demand shall be the amount by which the greatest demand during off-peak hours, as determined by measurement and adjusted for power factor, exceeds the billing demand for on-peak hours, whether the latter is a minimum or an actual demand, except that, when said greatest demand during off-peak hours exceeds the demand specified for off-peak hours, said greatest off-peak demand shall be reduced by the amount of the excess in determining the off-peak billing demand. In no event shall the off-peak billing demand be less than 25% of the greatest off-peak billing demand determined during any month of the preceding 11 months.

**Other Riders.** Where the Off-Peak Rider and this rider are applied to the same contract, the Off-Peak Rider will be applied only to the provisions of the contract, and this rider will then be applied to the contract as modified. This rider will not be applied in conjunction with the Temporary Service Rider.

Term: Annual.

Philadelphia Electric Company

Supplement No. 8 to
Electric—Pa. P.U.C. No. 23
SECOND REVISED PAGE No. 2A
Superseding FIRST REVISED PAGE No. 2A

(DATED 1/6/71)

## LIST OF CHANGES MADE BY THIS SUPPLEMENT—Continued

### CHANGES

**Title Page.**

EASTERN DIVISION. The address of the local office in Jenkintown is changed from York Road and Summit Avenue to 417 N. York Road.

MAIN LINE DIVISION. The new division office address of 213 W. County Line Road, Ardmore is added and the former division office address of 5 E. Lancaster Avenue, Ardmore is now listed as a local office.

**Rates Available.** (2nd Rev. Page 5a)

Rates R and R-S. The restriction provision relating to service for certain classes of farms is updated.

Rate R-H. Changed to make this rate applicable only when electricity is the sole source of energy used for space heating.

Rate GLP. The restriction provision of this rate is updated.

Rate PD. Changed to provide a clearer description of conditions under which service will be available in areas converted to 13 kv.

**Definition of Terms.** (2nd Rev. Page 8a)

Service.

Standard Polyphase Secondary. Provision (b) is changed to include reference to single premises with loads exceeding 150 kva to clarify Company practice for loads of this size and provision (c) is changed to include the wording "at a suitable location provided by the owner" for consistency with other provisions under standard polyphase secondary service.

Standard High Tension. The indicated voltage of nominally 13,000 volts is corrected to read 13,200 volts. Also, a new paragraph is added to have the owner provide a suitable location for Company's transformation equipment when his load exceeds 7,000 kw.

**Rule 9.2.** (2nd Rev. Page 16a)

The wording of this rule is changed to enable the Company to expedite the introduction of service for a Customer.

**Applicability Index of Riders.** (2nd Rev. Page 52a)

Footnote (2) is changed to update the restriction provision of the Farm Service Rider.

**Auxiliary or Readiness-to-Serve Rider.** (2nd Rev. Page 53a)

The provisions of this rider are changed to clarify its application to industrial rates with contract limits but these changes will not apply to customers with standby service as of January 18, 1971.

OFFICIALLY FILED TARIFF

OFFICIALLY FILED TARIF

# RATE GS GENERAL SERVICE

**Availability.**

Electric service through a single metering installation for offices, professional, commercial or industrial establishments, and other applications outside the scope of the Residence Service rate schedules.

SUSPENDED
TO: ~~JUL 18 1971~~ OCT 18 971
AT: C-1 9114 (I)(C)
Use Postponed To
See Supplement NOV 11 1971
SUSPENSION VACATED
EFFECTIVE NOV 17 1971

**Current Characteristics.**

Standard single-phase or polyphase secondary service.

**Monthly Rate Table.**

**Without Demand Measurement**

$2.55 includes the first 20 kwh
6.95¢ per kwh for the next 90 kwh or 30¢ of the total kwh, whichever is greater
*2.52¢ " " " " " 50 " " 30¢ " " " " " " "
1.26¢ " " " " additional use.

**With Demand Measurement**

$2.55 includes the first 20 kwh
6.95¢ per kwh for the next 80 hours' use of billing demand to 50 kw plus 55 hours' use of billing demand in excess of 50 kw
*2.52¢ " " " " " 80 " " " " "
1.26¢ " " " " additional use; except
0.80¢ " " over both 400 hours' use of billing demand and 2,000 kwh.

* During October through May this block is eliminated.

Air Quality Fuel Charge and
State Tax Adjustment Clause apply to this rate.

**NOTICE**
***This page of the Tariff never went into effect.***

**Determination of Demand.**

The billing demand will be measured where consumption exceeds 1100 kilowatt-hours per month for three consecutive months; or where load tests indicate a demand of 5 or more kilowatts; or where the Heating Modification is applied; or where the Customer requests demand measurement. Where demand measurement is requested by the Customer, a $6.00 annual surcharge will be payable until the above demand or consumption level is exceeded. Measured demands will be determined to the nearest 0.1 of a kilowatt but will not be less than 1.2 kilowatts. With demand measurement, during October through May the billing demand will not be less than 40% of the highest billing demand in the preceding months of June through September, nor less than the minimum value stated in a contract for service.

**Power Factor.**

Demands of 25 kilowatts or greater will be adjusted in accordance with the Rules and Regulations whenever the power factor of the Customer's load is found to be less than the standards therein specified.

**Minimum Charge.** (I)

The monthly minimum charge for all customers served under this rate will never be less than $2.55 for single-phase service nor less than $6.40 for polyphase service; additionally, where demand is measured the monthly minimum charge will never be less than $2.15 per kw of billing demand.

Penna. Public Utility Comm.
NOV 17 1970

(Continued)

(I) Indicates increase.
(C) Indicates change.

ORIGINALLY FILED

NOTICE
*This page of the Tariff never went into effect*

## RATE T TRACTION SERVICE

**Availability.**

To any corporation or authority for electric service for the operation of electrified street railway systems and appurtenances.

**Character of Electric Service.**

Service supplied hereunder will be standard high-tension service, except that a limited portion of the total capacity made available may be non-standard three-phase alternating current at nominally 25 cycles and at nominally 13,200 volts. The non-standard 25-cycle service is in the process of elimination and is restricted to locations receiving supply at 25 cycles as of January 1, 1966. The amount of 25-cycle supply will not be increased at any such location, and the Company may require the Customer to reduce or eliminate his requirements for 25-cycle supply upon not less than 6 months' written notice.

SUSPENDED(I)
TO: JUL 1 8 1971 OCT 1 8 1971
AT: C-1 9114
Not Postponed To NOV 1 1 1971
See Supp #26
SUSPENSION VACATED
EFFECTIVE NOV 1 7 1971

**Monthly Rate Table.**

**Capacity Charge Prices:** Per kw of billing demand:

$2.57 per kw for the first 20,000 kw
2.07 per kw for the excess over 20,000 kw

**Energy Charge Prices:**

0.9¢ per kwh for the first 400 hours' use of the billing demand
0.6¢ per kwh for the additional use.

Air Quality Fuel Charge and
State Tax Adjustment Clause apply to this rate.

**Determination of Billing Demand.**

For each day in the month, there will be selected the single clock-hour during which the sum of the kilowatt-hours drawn by the Customer at all the metering points is the greatest. One-third of the aggregate number of kilowatt-hours drawn during the highest three of the clock-hours so selected will constitute the Customer's maximum demand, in kilowatts, for such month.

The Customer shall maintain the power factor of his load as near unity as practicable, and should the combined power factor of said load during any hour used in determining the maximum demand be found to be less than 98%, then the draft for that hour will be adjusted by multiplying it by the quotient obtained by dividing the actual combined power factor, expressed as a decimal, into 0.98.

The billing demand each month shall be the maximum demand for such month adjusted for power factor as specified above, except that in no case shall the billing demand be less than 40% of the maximum capacity which the Company makes available.

OFFICIALLY FILED TARIFF

## DEFINITION OF TERMS AND EXPLANATION OF ABBREVIATIONS—*Continued*

pronouns. The masculine, singular, pronoun (he, his, him) relates to Customer, whether male, female, partnership or corporation.

property line. The division line between land held in or for private use, and land in which the public or the Company has a right of use; or, the division line between separately owned or occupied land.

service. The supply of capacity and energy for use by the Customer, including all things done by the Company in connection with such supply.

STANDARD SINGLE-PHASE SECONDARY; alternating current, 60 cycles, nominally 120-240 volts, 3 wires, except that nominally 120 volts, 2 wires may be supplied for connection to wiring installations which consist of not more than two 15-ampere branch circuits.

STANDARD POLYPHASE SECONDARY; alternating current, 60 cycles:

(a) nominally 120-240 volts, 2-phase, 5 wires;

(b) nominally 240 volts, 3-phase, 3 wires; a fourth wire neutral will be extended for the supply of 120-240-volt single-phase equipment in combination with this service where the service capacity required does not exceed 15 kilovoltamperes on any one of the phases. Where the load to a single premises exceeds 100 kva, transformers will be installed on the premises at a suitable location provided by the owner; (C)

(c) nominally 120-208 volts, 3-phase, 4 wires, (where 3-phase distribution is available) for the exclusive supply of secondary service to one or more buildings or units situated on a single premises occupied by one or more than one Customer, with transformers and secondaries installed on the premises at suitable locations provided by the owner, except that residence units on the same premises billed under Residence Service rates will be supplied at 120-240 volts, single-phase, 3 wires;

(d) nominally 277-480 volts, 3-phase, 4 wires (where 3-phase distribution is available) for the exclusive supply of secondary service to one or more buildings or units situated on a single premises occupied by one or more than one Customer, where the load exceeds 150 kva and the owner provides a suitable location, for the installation of transformers on his premises;

(e) nominally 120-240 volts, 3-phase, 7 wires, for supply only to single-phase equipment requiring more than 150 kilovoltamperes of service capacity, with transformers located on Customer's premises at a suitable location provided by the owner. (C)

STANDARD PRIMARY; unregulated alternating current, 60 cycles, nominally 2,400 volts, 2-phase, 3 wires, or nominally 4,160 volts, 3-phase, 3 or 4 wires. Availability of these voltages is limited to those areas which have not been converted to 13 kv distribution.

STANDARD HIGH TENSION; unregulated alternating current, 60 cycles, 3-phase, 3 wires (4-wire, 13 kv service is available in areas that have been converted to 13 kv distribution):

Nominally 13,200, 33,000, 66,000, 132,000 or 220,000 volts as available in the various sections of the Company's service territory for loads of such character as to require supply at one of such voltages in order not to impose unsatisfactory service conditions on the Company's supply system, or for loads of such character that supply at one of such voltages is desired both by the Company and the Customer. (C)

For service at 13,200 or 33,000 volts, where the Customer's load exceeds 7,000 kw, the owner may be required to provide a suitable location on his premises for the installation of Company's transformation equipment. (C)

service-supply lines. The facilities (conductors, cables, conduits, etc.) extending from the Company's facilities in the highway or other trunk line location to the facilities owned and maintained by the Customer.

## RATE SL-P STREET LIGHTING IN CITY OF PHILADELPHIA—*Continued*

6. CONNECTION OF LIGHTING UNITS. For new Lighting Units, relocated Lighting Units and for any modernization or maintenance work involving connections to the Company's distribution circuits, in accordance with the provisions of 2, the Customer shall provide sufficient length of conductors to permit the Company to make taps at the top of the pole for aerial circuits, or for splices to underground circuits at the designated delivery point on the Company's secondary voltage circuit, at the splicing chamber in the post base (where provided), or at the nearest available manhole, handhole or splice box (where such splicing chamber is not provided). In the latter case, the Customer will bill the Company for the cost of the conductors from the sidewalk level to the manhole, handhole or splice box. All work done by the Customer that may involve Company street lighting, control, and other distribution circuits shall be performed under Company permit and blocking procedures.

7. LOCATION AND TYPE OF INSTALLATION. The prices of the rate apply to street lighting service under conditions named herein at locations designated by the properly authorized representatives of the Customer.

8. SERVICE. Lighting service will be operated on all-night, every-night lighting schedules, to be approved by the authorized representatives of the Customer and the Company, under which lights normally are turned on after sunset and off before sunrise. Extended lighting service during all daylight hours will be supplied for lamps specified by the Customer.

9. CHANGE IN SIZE AND TYPE OF LIGHTING UNITS. Written notice of any planned change in size or type of any components of Lighting Units by locations shall be furnished by the Customer to the Company not less than 10 days prior to the effective date of such change. The Customer shall be responsible for notification to the Company of any changes made in manufacturer's wattage ratings of Lighting Units used.

10. SERVICE MAINTENANCE. Upon receipt of report of Lighting Unit or Units not burning, the Company will determine the cause of failure and will restore service on street lighting or distribution circuit and control equipment, disconnecting if necessary any faulty Lighting Units from the circuit. Customer will make necessary repairs between the lamp receptacle of the faulty Lighting Unit or Units and the point of connection to the Company's street lighting or distribution circuit. In the event the fault is located in the Company owned facilities, the Customer will bill the Company for this portion of the replaced facilities.

11. AUTHORIZATION AND PROTECTION. Customer shall, to the extent of his ability, furnish any requisite authority for the erection and maintenance of poles, wires, fixtures and other equipment necessary to operate the lights at the locations and under the conditions designated, and shall protect the Company from malicious damage to the lighting system.

12. ADDITIONAL LIGHTING. Lighting service for additional lamps installed by the Customer will be supplied by the Company upon written notice from the Customer specifying the locations of the installations unless the proposed additional lighting makes the investment or cost of providing distribution equipment excessive, in which case a portion of the investment or cost shall be borne by the Customer subject to agreement between the Customer and the Company.

13. RELOCATION OF LIGHTING UNITS. Where a pole is replaced by the Company at its own option, it shall be the Customer's responsibility to have the Utilization Facilities transferred from the old to the new pole.

14. OUTAGE ALLOWANCE. Company will use reasonable diligence to provide a continuous, regular and uninterrupted supply of service and the Customer will use reasonable diligence to protect the lighting system. In lieu of determination of the actual hours of Lighting Unit outages resulting from a failure of any light to burn for any reason, a deduction of 0.20% of the monthly capacity and energy charges will be made on the monthly bill. Company shall not be liable for service interruptions as a result of the Customer's failure to protect the lighting system, or as a result of riot, fire, storm, flood, interference by civil or military authorities or any other cause beyond its control.

## STANDARD RIDERS—*Continued* (C)

**Applicable to rates as indicated in Applicability Index of Riders, Page No. 46**

### CONSTRUCTION RIDER

**Applicability.** To service supplied during a preliminary operating or construction period while the load is being built up to normal level or during a receding load period after the expiration of a standard contract term while a business is in process of dissolution.

**Guarantee Waived.** The guarantee minimum of a contract will be waived during the expanding load period preceding the operation within the load limits provided in the contract or the receding load period subsequent to the fulfillment of a contract term.

**Rider Term.** The total term of application of this rider during the preliminary or construction period shall be 6 months subject to the option of the Company to grant not more than two successive renewals of the rider term on major construction projects. Its application subsequent to the completion of a contract term shall be for not more than one year.

**Contract Term.** The termination date of a contract for service to permanent installations to which this rider is applied shall be extended for a period corresponding to the total time of the rider application during start up, construction or extension of the Customer's plant so that the Company will be assured the business represented by service to the total connected load for the term provided in the contract.

**Other Riders.** This rider, when applied on temporary installations to which the Temporary Service Rider is also applied, shall not act to modify the requirement that monthly minimum charges be paid for a period of not less than 6 months.

# LIST OF CHANGES MADE BY THIS SUPPLEMENT

## DECREASES AND CHANGES

**Rate R-M Residence Service.** (ORIGINAL PAGE 28A.)

This is a new rate for the supply of service through a single meter to a multiple-family building consisting of 2 to 5 dwelling units.

**Rate GLP General Light and Power.** (2ND REV. PAGE 30.)

The minimum earned rate provision is eliminated and the energy charge prices in the rate are modified where the customer's assessed demand includes one or more residence units so that the last price block of the energy charge table shall be 1.5¢ per kilowatt-hour, resulting in decrease.

## CHANGES

**Rates Available Under This Tariff.** (2ND REV. PAGE 5.)

The availability of new Rate R-M is added.

**Rate GLP General Light and Power.** (2ND REV. PAGE 30.)

The availability provision of this rate is being changed to restrict service under this rate to customers whose load consists of from 2 to 5 residence units, inclusive, and whose load is predominantly residential in character, receiving such service as of August 3, 1966.

TARIFF ELECTRIC—PA. P. U. C. No. 22, *first filed to be effective October 15, 1963, is modified so that it now consists of the* ORIGINAL TARIFF *with the following changes:*

## RULES AND REGULATIONS—Continued

### 3. CUSTOMER'S INSTALLATION

**3.1 Information from Customer.** The Company should be advised by the Customer or his representative, in writing, preferably on a form supplied by the Company, of premises to be equipped for electricity, giving exact location, and details of all current consuming devices to be installed.

**3.2 Meter Location.** There shall be provided, free of expense to the Company, at a location which the Company will designate in writing upon request, outdoors at its option, a suitable place for the meter or meters and any other supply, protective or control equipment of the Company which may be required in the delivery of electric service.

**3.3 Point of Delivery.** The Company will designate in writing, upon request, a satisfactory point of delivery where the Customer shall terminate his wiring and facilities for connection to the supply lines of the Company. The failure to request and obtain such location may result in refusal of service pending rearrangement of Customer's facilities, but the designation of a point of delivery does not constitute an agreement or obligation on the part of the Company to furnish service.

(C) **3.4 Service Entrance Equipment.** Service entrance wiring and equipment and all construction between the point of delivery and the meter shall be at the expense of the Customer and shall include an approved switch or disconnect control unit which may be sealed by the Company. The standard size of the Customer's single-phase service entrance for new and modernized installations shall be three-conductor, 120-240-volt, 100-ampere nominal capacity with a 3-wire control unit having a rated capacity of not less than 100 amperes, except for individual installations having not more than two 15-ampere branch circuits, in which case the service entrance conductors shall be not less than two-conductor, 120-volt, 30-ampere nominal capacity.

**3.5 Secondary Service Connection.** (a) Wiring of any premises for connection to overhead lines must be brought outside of the building wall to a location designated or approved by the Company, at which point the house wiring must extend at least 3 feet for attachment to the Company's service-supply lines.

(b) Service connections to the Company's underground distribution system shall terminate in the Customer's premises in an approved connection box from which Customer's wiring shall extend to his other service entrance equipment.

(c) Underground service connections from overhead distribution lines shall be terminated in the same manner as those supplied from underground distribution unless the size of wire used permits direct connection to the Customer's service entrance equipment.

**3.6 Underground Service.** Customers desiring an underground service from overhead wires must bear the excess cost incident thereto. Specifications and terms for such construction will be furnished by the Company on request.

**3.7 Nonstandard Service.** The Customer shall pay the cost of any special installation necessary to meet his peculiar requirements for service at other than standard voltages, or for the supply of closer voltage regulation than required by standard practice.

**3.8 Relay Protection.** The Customer must install at his own expense a reverse-phase relay of approved type on all alternating current motors for passenger and freight elevators, hoists, and cranes, and a reverse-power relay for parallel operation.

OFFICIALLY FILED TARIFF

(D) RATE SL-P STREET LIGHTING IN CITY OF PHILADELPHIA

**Availability.**

Only to a governmental agency, municipal, state or federal, for outdoor lighting of streets, highways, bridges, parks or similar places, including directional highway signs at locations where other outdoor lighting service is established hereunder, for the safety and convenience of the public within the City of Philadelphia by incandescent filament, mercury-vapor, or fluorescent lamps of standard sizes and types approved by the Company where the Customer installs, owns and maintains all Utilization Facilities as hereinafter defined. Service will be supplied under this rate for street Lighting Units supported in a conventional manner, such as on poles, posts, brackets or hangers, and under conditions of installation and supply acceptable to the Company.

**Characteristics of Supply.**

Service under this rate will be from series 6.6 ampere circuits or from standard single-phase secondary circuits, as specified by the Company, except that, where conditions require, or where existing standard secondary circuits are not available, the Company at its option may supply service from nonstandard secondary circuits, providing nominally 240 volts.

**Monthly Rate Table.**

Facilities Charge Prices:

For Lighting Units in service as of the fifteenth day of the month.

$0.50 per Lighting Unit supplied from standard secondary (aerial or underground) circuits where the Customer owns the individual control for each Lighting Unit.

$0.60 per Lighting Unit supplied from aerial (series or secondary) circuits where the Company provides group controls.

$2.70 per Lighting Unit supplied from underground (series or secondary) circuits where the Company provides group controls.

Capacity Charge Prices:

0.32¢ per watt for the first 100 watts of billing demand per Lighting Unit.
0.22¢ per watt for the additional watts of billing demand.

Energy Charge Price:

1.4¢ per kwh of energy billed.

**Lighting Unit.**

A Lighting Unit shall comprise each lighting installation which is separately connected to a delivery point on the Company's series or secondary circuit.

**Determination of Billing Demand.**

The wattage, expressed to the nearest tenth of a watt, of a Lighting Unit shall be composed of manufacturer's rating of its lamps, ballasts, transformers, individual controls and other load components required for its operation. The aggregate of wattages of all Lighting Units in service as of the fifteenth day of a month shall constitute the billing demand for the month.

**Determination of Energy Billed.**

The energy use for a month of a Lighting Unit shall be computed to the nearest kilowatt-hour as the product of one thousandth of its wattage and the effective hours of use of such wattage during the calendar month under the established operation schedules approved by the authorized representatives of the Customer and the Company. The aggregate of the kilowatt-hours thus computed for all Lighting Units in service as of the fifteenth day of a month shall constitute the energy billed for the month.

## STANDARD RIDERS—*Continued*

**Applicable to rates as indicated in Applicability Index of Riders, Page No. 46**

### NIGHT SERVICE HT RIDER

**Applicability.** To service supplied during off-peak hours for demands in excess of those supplied during on-peak hours where the Company is the exclusive source of service for the connected load so supplied and where (a) at 13,200 or 33,000 supply voltage the demand specified for off-peak hours shall be limited to an amount designated by the Company which in no event shall be greater than 10,000 kilowatts, and (b) at 66,000 or 132,000 supply voltage the demand specified for off-peak hours shall be limited to an amount designated by the Company which in no event shall be greater than either three times the maximum value of demand specified in the contract or the sum of 20,000 kilowatts and said maximum demand value, whichever is lower, except that when the said maximum demand value is less than 3,334 kilowatts, the demand specified for off-peak hours shall be limited as in (a) above.

**Definition of Peak Hours.** ON-PEAK HOURS are defined as those hours between 7 a. m. and 7 p. m., Eastern Standard Time or Daylight Saving Time, whichever is in common use, daily except Saturdays and holidays.

OFF-PEAK HOURS are defined as the hours other than those specified as on-peak hours.

**Service Rate.** Rate HT, including all its terms and guarantees, is applicable to service supplied during on-peak hours. The capacity charge and blocking of the energy charge of said rate shall be based on the billing demand for on-peak hours except that, when the greatest demand during off-peak hours, as determined by measurement and adjusted for power factor, exceeds the demand specified for off-peak hours, the amount of such excess shall be added to the billing demand for on-peak hours and the resultant sum shall then constitute the basis for said capacity charge and blocking of the energy charge.

(I) **Night Service Capacity Charge:** 60¢ per kw of off-peak billing demand per month.

**Determination of Off-Peak Billing Demand.** The off-peak billing demand shall be the amount by which the greatest demand during off-peak hours, as determined by measurement and adjusted for power factor, exceeds the billing demand for on-peak hours, whether the latter is a minimum or an actual demand, except that, when said greatest demand during off-peak hours exceeds the demand specified for off-peak hours, said greatest off-peak demand shall be reduced by the amount of the excess in determining the off-peak billing demands. In no event shall the off-peak billing demand be less than 25% of the greatest off-peak billing demand determined during any month of the preceding 11 months.

**Other Riders.** Where the Off-Peak Rider and this rider are applied to the same contract, the Off-Peak Rider will be applied only to the provisions of the contract, and this rider will then be applied to the contract as modified. This rider will not be applied in conjunction with the Temporary Service Rider.

**Term.** Annual.

## RATE GS GENERAL SERVICE—*Continued*

**Heating Modification.**

A. SINGLE METER.

Applicable where an area is heated solely by permanently connected electric resistance space heating installations acceptable to the Company and where the area heating requirements are at least equal to the Customer's electrical energy requirements for other purposes during October through May.

During October through May the monthly maximum measured demand shall be reduced by one-half of the kilowatt input to the space heating installations. This kilowatt input, used for determining such decrease in billing demand, shall not exceed the kilowatt space heating requirements of the area to be heated as determined by a mutually acceptable formula. During October through May the billing demand shall never be less than 15 kilowatts; or, except for those customers in service as of January 18, 1971, less than one-half of the monthly measured demand. (C)

This modification will be applied upon notification to the Company of qualifying installations. It shall be the responsibility of the Customer to notify the Company of any subsequent changes in the installation.

B. SEPARATE METERS.

At the option of the Customer, electricity supplying permanently connected resistance space heating installations or heating equipment sensitive to outdoor temperature with a total capacity of not less than 5 kilowatts, which are acceptable to the Company and are the sole source of heat for the application, will be measured apart from his other requirements for electric service at the premises. Air conditioning equipment also may be supplied through this separate heating circuit.

During October through May the usage of this separate circuit shall be billed at 1.25¢ per kwh in lieu of the pricing of the basic Monthly Rate Table. (I)

During June through September the combined usage shall be billed under the price provisions of the basic Monthly Rate Table.

**Term of Contract.**

Annual.

**Payment Terms.**

Standard.

## RATE BLI BORDERLINE INTERCHANGE SERVICE

**Availability.**

Electric service supplied under reciprocal agreements, to neighboring electric utilities for resale in their adjacent territory at delivery points where the Company in its judgment can provide capacity in excess of the requirements of present and prospective customers in its own territory and for periods fixed by contract and terminable after the expiration of the initial term if capacity is no longer available.

SUSPENDED
TO: JUL 1 8 1971 OCT 1 8 1971
AT: C-1 9114
Ltr Postponed To
See Supp 11 NOV 1 1 1971

**Current Characteristics.**

Standard primary or secondary service.

**Monthly Rate Table.**

**Investment Charge:**

An amount equal to 1% per month on the additional investment in facilities required to deliver and meter the service supplied.

SUSPENSION VACATED
EFFECTIVE NOV 1 7 1971

**Energy Charge:** (I)

2.8¢ per k-h.

Air Quality Fuel Charge and
State Tax Adjustment Clause apply to this rate.

**Measurement.**

The energy delivered may be metered or may be estimated from the purchaser's resales plus an agreed-upon correction to cover transformation and distribution losses.

**Term of Contract.**

5 years, and thereafter from year to year until terminated by 60 days' notice from either party to the other.

**Payment Terms.**

Payment of amounts billed shall be made within 15 days from date of bill.

# NOTICE.

This Tariff makes {Increases / Decreases / Changes} in existing rules and rates. See Page 2.

OFFICIALLY FILED TARIFF

# RULES AND REGULATIONS

## 1. THE ELECTRIC SERVICE TARIFF

1.1 **Filing and Posting.** A copy of this TARIFF, which comprises the Rates, Rules and Regulations under which electric service will be supplied to its customers by PHILADELPHIA ELECTRIC COMPANY, is on file with the Pennsylvania Public Utility Commission and is posted and open to inspection at the offices of the Company.

1.2 **Revisions.** This TARIFF may be revised, amended, supplemented or otherwise changed from time to time in accordance with the Pennsylvania "Public Utility Law," and such changes, when effective, shall have the same force as the present TARIFF.

1.3 **Application.** The TARIFF provisions apply to everyone lawfully receiving electric service from the Company, under the rates therein, and receipt of electric service shall constitute the receiver a Customer of the Company as the term is used herein, whether service is based upon contract, agreement, accepted signed application, or otherwise.

1.4 **Basis of Charge.** Time elapsed is a factor in the supply of electric service and the rates and minimum charges named in this TARIFF, while predicated on periods of supply of not less than one year, are stated in values for direct application only to monthly periods of service supply and will be adjusted for application to service supplied during other time intervals.

1.5 **Rules and Regulations.** The Rules and Regulations, filed as a part of this TARIFF, are a part of every contract for service made by the Company and govern all classes of service where applicable, unless specifically modified by a rate or rider provision.

1.6 **Use of Riders.** The terms governing the supply of service under a particular rate may be modified or amended only by the application of those standard riders, filed as part of this TARIFF, which are specifically mentioned as applicable to that rate in the Applicability Index of Riders.

1.7 **Statement by Agents.** No representative has authority to modify a TARIFF rule or provision, or to bind the Company by any promise or representation contrary thereto.

## 2. SERVICE LIMITATIONS

2.1 **Character.** This TARIFF applies only to the supply of electric energy of the standard characteristics available in the locality in which the premises to be served are situated. The Company does not offer to supply energy of nonstandard characteristics.

2.2 **Single-Point Delivery.** Unless otherwise stipulated therein, the rates named in this TARIFF for each class of service are based upon its supply through a single delivery and metering point for the total requirements at each separate premises of the contracting Customer. Separate supply for the same Customer at other points of consumption shall be separately metered and billed.

# RATE SL-S STREET LIGHTING—SUBURBAN

**Availability.**

Outdoor lighting of streets, highways, bridges, parks and similar places for the safety and convenience of the public in Suburban Divisions.

**Rate Table—Manufacturer's Rating of Lamp Sizes.**

INCANDESCENT FILAMENT LAMPS

| SIZE OF LAMP | RATE PER YEAR | SIZE OF LAMP | RATE PER YEAR |
|---|---|---|---|
| 1,000 Lumens | $24.75 | 6,000 Lumens | $61.60 |
| 2,500 " | 39.60 | 10,000 " | 84.70 |
| 4,000 " | 50.60 | | |

MERCURY VAPOR LAMPS

| SIZE OF LAMP | RATE PER YEAR | SIZE OF LAMP | RATE PER YEAR |
|---|---|---|---|
| 4,000 Lumens | $49.20 | 20,000 Lumens | $100.30 |
| 8,000 " | 66.00 | 35,000 " | 129.60 |
| 12,000 " | 81.60 | 55,000 " | 166.80 |

*The supply of 320 lumen lamps at $13.20 per year, 600 lumen lamps at $18.70 per year and 15,000 lumen mercury vapor lamps at $97.00 per year is in the process of elimination and is restricted for any Customer to the total of each rating in service on October 15, 1963, and in each succeeding year beginning January 1, 1964, to the number of each rating in service on January first of each such year.*

**Lighting Improvement Discount.**

The amount by which any monthly bill exceeds the product of $2.50 times the total number of lamps supplied shall be subject to a discount of 10% for customers having in service no lamps smaller than 1,000-lumen rating, or to a discount of 5% for customers having in service any lamps smaller than 1,000-lumen rating.

**General Provisions.**

1. SERVICE. The lighting service will be operated on an all-night, every-night lighting schedule of approximately 4,100 hours annual burning time, under which lights are turned on after sunset and off before sunrise. It includes the supply of lamps and their renewal when burned out, broken, or giving less than 80% of the rated light output.

2. OUTAGE ALLOWANCES. Written notice to the Company prior to 4 p. m. of the failure of any light to burn on the previous night shall entitle the Customer to a pro rata reduction in his street lighting bill for the hours of failure if such failure continues for a period in excess of 12 hours after the notice is received. Allowances will not be made for outages resulting from the Customer's failure to protect the lighting system or from riot, fire, storm, flood, interference by civil or military authorities, or any other cause beyond the Company's control.

AUG 15 1963
Bureau of Rates and Research

(C) (D) Indicates change and decrease.

## STANDARD RIDERS—*Continued*

**Applicable to rates as indicated in Applicability Index of Riders, Page No. 46**

### EMERGENCY OR AUXILIARY RIDER

**Applicability.** To the supply of emergency or auxiliary service to a Customer whose premises are regularly supplied with electric light or power, or both, from a privately owned source of supply.

**Extent of Supply.** The amount of kilowatts and the maximum demand in kilovolt-amperes shall be defined by contract.

**Method of Supply.** The connection with the Company's service shall be made through a double-throw switch or switches.

**Control of Supply.** In case the number of kilowatts contracted for is less than the maximum demand of the Customer's plant as estimated by the Company, the Customer's demand shall be limited to the load in kilowatts contracted for by means of a circuit breaker or single fuses, of types approved by the Company, to be furnished, installed, connected and maintained by the Customer at his expense.

The maximum-demand setting of the circuit breaker and its adjustment shall be under the sole control of the Company and shall not be tampered or interfered with in any way by the Customer.

Use by the Customer of fuses of capacity too great to limit his demand to the kilowatts contracted for shall be sufficient cause for the discontinuance of service by the Company.

**Parallel Operation.** The Customer shall not at any instant operate his usual source of supply in parallel with the Company's service.

**Measurement of Supply.** Meters will be installed by the Company for the measurement of demands imposed and kilowatt-hours taken.

**Rate and Billing.** The demand to be paid for each month shall be not less than the kilowatts specified in the contract and the kilowatt-hours to be paid for each month shall not be less than would result from 50 hours' use of the demand specified in the contract. Billing for such service shall be at the rate in conjunction with which this rider is employed.

**Liability.** The Customer shall reimburse the Company for all loss or damage sustained by it as a result of his use of the Company's service under the provisions of this rider.

**Term.** Annual contract.

### EXTENSION GUARANTEE RIDER

(C) **Applicability.** To the supply of residence service where an overhead line extension in trunk line location of a length greater than 1,320 feet per service connection is required.

**Rate and Minimum Guarantees.** Service from such line extension will be supplied at tariff rates applicable to the class of service desired but subject to the payment of a monthly minimum of whole dollar values by each guarantor Customer, of $1.00 for each 1/6 mile, or major fraction thereof, of extension length per guarantor. Payments for service supplied under Rate HS will not be credited to the satisfaction of this monthly minimum.

**Guarantor Customers.** Separately metered service delivery points shall pay equal monthly minimums subject to the following exceptions:

## RULES AND REGULATIONS—*Continued*

### 12. SERVICE CONTINUITY

12.1 **Regularity of Supply.** The Company will use reasonable diligence to furnish continuous, regular and uninterrupted supply of service; but, should the supply be interrupted by the Company for the purpose of making repairs, changes, or improvements, in any part of its system for the general good of the service or the safety of the public, or should the supply of service be interrupted, or fail, by reason of accident, strike, legal process, state or municipal interference, or any cause whatsoever, beyond its control, the Company shall not be liable for damages, direct or consequential, resulting from such interruption or failure.

12.2 **Notice of Trouble.** The Customer shall send written notice to the office of the Company, immediately, should the service be unsatisfactory for any reason, or should there be any defects, trouble, or accident, affecting the supply of electricity.

12.3 **Relocation of Delivery Point.** In the event that the Company shall be required by any public authority to place underground any portion of its mains, wires, or service-supply lines, or relocate any poles or feeders, the Customer, at his own expense, shall change the location of his point of delivery to a point readily accessible to the new location.

### 13. CUSTOMER'S USE OF SERVICE

13.1 **Resale of Service.** A Customer may resell energy purchased from the Company under a single contract at one application of an available rate when the purchased energy is the exclusive source of the Customer's supply, is for the total requirements of the premises served, and the location and use of the resold energy conforms to the availability requirements of this TARIFF for supply to Customer for his own account.

13.2 **Fluctuations.** Electric service must not be used in such a manner as to cause unusual fluctuations or disturbances in the Company's supply system, and, in the case of violation of this rule, the Company may discontinue service, or require the Customer to modify his installation and or equip it with approved controlling devices.

13.3 **Type of Installations.** Motor and other installations connected to the Company's lines must be of a type to use minimum starting current and must conform to the requirements of the Company as to wiring, character of equipment, and control devices.

13.4 **Surge Protector.** Any Customer using electricity for operating wireless apparatus may be required to provide a surge protector, which will be installed and maintained by the Company on the premises of the Customer at his expense, for the protection of the Company's metering and transforming equipment.

13.5 **Unbalanced Load.** The Customer shall at all times take, and use, energy in such manner that the load will be balanced between phases to within nominally 10%. In the event of unbalanced polyphase loads, the Company reserves the right to require the Customer to make the necessary changes at his expense to correct the unsatisfactory condition, or to compute the demand used for billing purposes on the assumption that the load on each phase is equal to that on the greatest phase.

13.6 **Additional Load.** The service connection, transformers, meters and equipment supplied by the Company for each Customer, have a finite capacity, and no additions to the equipment or load connected thereto will be allowed except by consent of the Company.

13.7 **Change of Installation.** The Customer shall give immediate written notice to the Company of any proposed increase or decrease in, or change of purpose or location of, his installation.

13.8 **Failure to Give Notice.** Failure to give notice of additions or changes in load or location shall render the Customer liable for any damage to the meters or their auxiliary apparatus, or the transformers, or wires, of the Company, caused by the additional or changed installation.

## RATE HS HEAT-STORAGE SERVICE

**Availability.**

Only in conjunction with residence service under Rate GLP and Rates R and R-S, for any Customer receiving service at 120-240 volts, 3 wires, for the operation of heat-storage equipment of a type approved by the Company, when the demand or load of the heat-storage installation does not exceed the Customer's demand for service to his other residence load and when the supply of service is confined to a single connection, separately metered. (C)

*Not available when the source of supply is service purchased from a neighboring company under a borderline-purchase agreement.*

**Unrestricted Service.**

The supply of service shall be confined to heat-storage hot-water installations used for all domestic purposes except as a source of heat supply to the premises.

Rate: 1.3¢ per kwh.

Minimum Charge: $1.12 per month.

**Off-Peak Service.**

The supply of service to heat-storage installations where the daily period of use shall be limited by a clock or other timing device to the hours established from time to time by the Company. The clock and controlling device shall be types provided by the Company; shall be subject to inspection and control of setting by the Company; and shall be sealed by the Company. The Company shall not be obligated to provide additional or new supply-facilities.

Rate: 1.0¢ per kwh for the first 400 kwh per month
0.8¢ " " " " additional use.

Minimum Charge: $1.12 per month.

**Electrical Characteristics of Equipment.**

The heat-storage installations shall be 240 volts, alternating-current, 3 wires, single-phase, 60 cycles.

**Term of Contract.**

Annual.

**Payment Terms.**

Standard.

## RATE RR RAILROAD SERVICE

**Availability.**

Only to railroad corporations for electric service for the operation of electrified railroad systems and appurtenances.

**Character and Amount of Electric Service.**

Service to be supplied hereunder will be single-phase alternating current at nominally twenty-five (25) cycles per second and at nominally 13,200 volts, except that service to the Customer's incidental requirements for signal system and other miscellaneous uses will be at such available frequency and voltage as may be established by the Company from time to time. The total amount of capacity initially to be made available shall not exceed 20,000 kilowatts. Additional capacity, if available, will be supplied upon reasonable advance written notice from the Customer.

**Monthly Rate Table.**

**Capacity Charge:**

$2.25 per kw of billing demand.

**Energy Charge:**

1.05¢ per kwh for the first 400 hrs. use of the billing demand
0.50¢ " " " " additional use.

CANCELLED by Revised Page No. 42 EFFECTIVE July 1 - 1965

**Determination of Billing Demand.**

For each day in the month, there shall be selected the single clock-hour in which the kilowatt-hour draft by the Customer is the greatest. One-third of the aggregate number of kilowatt-hours drawn by the Customer during the highest three of the clock-hours so selected will constitute the Customer's maximum demand, in kilowatts, for such month.

The Customer shall maintain the power factor of his load as near unity as practicable and should the power factor of said load during any hour used in determining the maximum demand be found to be less than sixty-five (65) per cent, then the draft for that hour will be adjusted by multiplying it by the quotient obtained by dividing the actual power factor, expressed as a decimal, into 0.65.

The billing demand each month shall be the maximum demand for such month adjusted for power factor as specified above, except that in no case shall the billing demand in a month be less than 75% of the greatest adjusted maximum demand established during the preceding 12 months, nor less than 14,000 kilowatts.

**Minimum Charge.**

The minimum charge for each month shall be the energy charge applied to the kilowatt-hours obtained by multiplying 30% of the hours in the month by the billing demand for the month, plus the capacity charge for such billing demand.

**Delivery Point.**

The point of delivery for service rendered under this rate shall be the twenty-five (25) cycle, 13,200-volt bus bars at a frequency changer substation established by the Company, except that service to the Customer's incidental requirements for signal system and other miscellaneous uses at such substation may be at such other point as shall be acceptable to the Company.

**Receiving Equipment Responsibilities.**

Beyond the delivery point, the Customer shall own and bear the entire cost of necessary inspection, repair and maintenance of any transforming, switching, or other receiving equipment required.

**Termination of Service.**

Unless otherwise stated in a written Service Contract, service under this rate is terminable by the Company or the Customer upon not less than 60 days' written notice.

**Written Service Contract.**

At the Customer's election, service hereunder may be evidenced by a written Service Contract for an annual term and under such further detailed conditions of service supply as are not inconsistent with those stated in this rate or in the Rules and Regulations.

**Payment Terms.**

Each month, the Company will render a bill to the Customer covering the charges for the preceding calendar month and Customer shall pay such bill within 20 days after receipt thereof.

(D) Indicates decrease.

## STANDARD RIDERS—*Continued*

**Applicable to rates as indicated in Applicability Index of Riders, Page No. 46**

### NIGHT SERVICE PD RIDER

**Applicability.** To service supplied during off-peak hours for demands in excess of those supplied during on-peak hours where the Company is the exclusive source of service for the connected load so supplied and where the demand specified for off-peak hours shall be limited to an amount designated by the Company which in no event shall be greater than 1,200 kilowatts.

**Definition of Peak Hours.** ON-PEAK HOURS are defined as those hours between 7 a. m. and 9 p. m., Eastern Standard Time or Daylight Saving Time, whichever is in common use, daily except Saturdays and holidays.

OFF-PEAK HOURS are defined as the hours other than those specified as on-peak hours.

**Service Rate.** Rate PD, including all its terms and guarantees, is applicable to service supplied during on-peak hours. The capacity charge and blocking of the energy charge of said rate shall be based on the billing demand for on-peak hours except that, when the greatest demand during off-peak hours, as determined by measurement and adjusted for power factor, exceeds the demand specified for off-peak hours, the amount of such excess shall be added to the billing demand for on-peak hours and the resultant sum shall then constitute the basis for said capacity charge and blocking of the energy charge.

(I) **Night Service Capacity Charge:** 70¢ per kw of off-peak billing demand per month.

**Determination of Off-Peak Billing Demand.** The off-peak billing demand shall be the amount by which the greatest demand during off-peak hours, as determined by measurement and adjusted for power factor, exceeds the billing demand for on-peak hours, whether the latter is a minimum or an actual demand, except that, when said greatest demand during off-peak hours exceeds the demand specified for off-peak hours, said greatest off-peak demand shall be reduced by the amount of the excess in determining the off-peak billing demand. In no event shall the off-peak billing demand be less than 25% of the greatest off-peak billing demand determined during any month of the preceding 11 months.

**Other Riders.** Where the Off-Peak Rider and this rider are applied to the same contract, the Off-Peak Rider will be applied only to the provisions of the contract, and this rider will then be applied to the contract as modified. This rider will not be applied in conjunction with the Temporary Service Rider.

**Term.** Annual.

Philadelphia Electric Company

SUSPENSION VACATED
EFFECTIVE NOV 17 1971

## RATES AVAILABLE UNDER THIS TARIFF

SUSPENDED
TO: OCT 18 1971
AT: C-1 911 OCT 18 1971
Effective Date: NOV 1 1971

**Rate R (Philadelphia Division) and Rate R-S (Suburban Divisions) Residence Service.** These rates are available to single-phase electric service to the dwelling and appurtenances of a single private family for the domestic requirements of its members and also to service for related farm purposes when such service is supplied through one meter in conjunction with the farmhouse domestic requirements.

"Residence Service," as employed herein, is not susceptible of definition embracing all the uses embraced therein.

As illustrative only of its general meaning:

The term includes service to: (a) The separate dwelling unit in an apartment house, but not the halls, basement, or other portions of such building common to more than one such unit; (b) The premises occupied as the living quarters of five persons or less who unite to establish a common dwelling place for their own personal comfort and convenience on a cost-sharing basis; (c) The premises owned by a church, and primarily designated or set aside for, and actually occupied and used as, the dwelling place of a priest, rabbi, pastor, rector, nun or other functioning Church Divine, and his or her resident associates; (d) Private dwellings in which a portion of the space is used for the conduct of business by a person residing therein; (e) Farm purpose uses by an individual employing the natural processes of growth for the production of grain, stock, dairy, poultry, garden truck, or other agricultural products.

The term does NOT include service to: (a) Premises institutional in character including Clubs, Fraternities, Orphanages or Homes; (b) Premises defined as a rooming house or boarding house in the Municipal Code for Cities of the First Class enacted by Act of General Assembly; (c) A premises containing a residence unit but primarily devoted to a professional or other office, studio, or other gainful pursuit; (d) Farms operated principally to sell, prepare or process products produced by others, or farms using air conditioning for climatic control in conjunction with growth processes (except those customers receiving such service as of January 18, 1971); (e) Electric furnaces or welding apparatus other than a transformer type "limited input" arc welder with an input not to exceed 37½ amperes at 240 volts. (C)

**Rate R-M Residence Service.** Single-phase electric service, in the entire territory of the Company, to a multiple dwelling unit building consisting of two to five dwelling units (whether occupied or not) for domestic requirements when such service is supplied through one meter.

**Rate R-H Residential Heating Service.** Single-phase electric service to the dwelling and appurtenances of a single private family (or to a multiple dwelling unit building consisting of two to five dwelling units, whether occupied or not), for domestic requirements when such service is supplied through one meter and where electricity is the sole source of energy regularly used for permanently connected space heating installations which meet the Company's requirements. This rate schedule is not available for commercial, institutional or industrial establishments. (C)

**Rate WH Water Heating Service.** In conjunction with the Residence Service rates and with residence service under Rates GLP and GS, for any Customer receiving service at 120-240 volts, 3 wires, for the operation of water heating equipment of a type approved by the Company, when the demand or load of the water heating installation does not exceed the Customer's demand for service to his other residence load and where the supply of service is confined to a single connection, separately metered.

**Rate GLP General Light and Power.** This rate is in the process of elimination and is restricted to those installations and those customers receiving service under this rate as of January 18, 1971. (C)

**Rate GS General Service.** Electric service through a single metering installation for offices, professional, commercial or industrial establishments, and other applications outside the scope of the Residence Service rate schedules. A Heating Modification is available for customers with electric resistance space heating installations.

**Rate PD Primary-Distribution Power.** Untransformed electric service from the primary supply lines of the Company's distribution system where the Customer installs, owns, and maintains, any transforming, switching and other receiving equipment required. However, standard primary service is not available in areas where the distribution voltage has been changed to 13 kv unless the Customer was served with standard primary service prior to the conversion of the area to 13 kv. State Tax Adjustment Clause apply to this rate.

NOTICE
*This page of the Tariff never went into effect.*

**Determination of Billing Demand.**

The billing demand will be computed to the nearest kilowatt and will never be less than the measured demand, adjusted for power factor in accordance with the Rules and Regulations, nor less than 25 kilowatts. Additionally, during the eight months of October through May the billing demand will not be less than 40% of the maximum demand specified in the contract nor less than 70% of the highest billing demand in the preceding months of June through September. (I)

**Minimum Charge.**

The monthly minimum charge shall be the energy charge applied to the kilowatt-hours that would result from 100 hours' use of the Customer's billing demand for the month, plus the capacity charge for such billing demand.

**Term of Contract.**

3 years, and thereafter from year to year until terminated by 60 days' notice from either party to the other.

**Payment Terms.**

Standard.

## APPLICABILITY INDEX OF RIDERS

### Introductory Statement

Customers under the different rates of this TARIFF frequently desire services or present situations and conditions of supply which require special supply terms, charges or guarantees or which warrant modification of the amount or method of charge from the prices set forth in the rate under which they are supplied. Modifications for such conditions are defined by rider provisions included as a part of this TARIFF. Riders may be employed when applicable, with or without signed agreement between the Customer and the Company as the case may require, notwithstanding anything to the contrary contained in the rate to which the rider is applied.

OFFICIALLY FILED TARIFF

## RULES AND REGULATIONS—*Continued*

2.3 **Single-Point Availability.** Electric service delivered at a single point is available to one or more buildings or units devoted essentially to a single purpose, provided and so long as:

a. Such buildings or units are:

(1) held, possessed, and either utilized or operated as a single establishment by a single responsible entity, and

(2) unified on a basis of family, business, industry, enterprise, or governmental agency or through conveniences and services, such as heat, elevator, janitor care of halls, walks and lawns, etc., furnished by such entity, and

(3) situated on a single or on contiguous land parcels except where such buildings or units constitute interdependent parts of a single industrial enterprise. In determining "contiguity" hereunder of parcels abutting opposite sides of public or private ways, the boundaries of such parcels shall be considered as extending to the center of such ways.

b. There is granted and maintained to the Company easement or other rights, adequate in the Company's reasonable judgment to supply service direct to any such buildings or units if, as and when a cessation of any one or more of the conditions stated in paragraph lettered "a" above should occur, or there should arise in any manner a Company duty of such direct supply.

c. The transforming, receiving and distribution facilities on the Customer's side of the delivery point are:

(1) furnished, installed and maintained at the expense of the Customer, and

(2) owned or leased by the Customer, and

(3) operated and controlled by or at the expense of the Customer.

d. The Company is under no legal obligation of direct supply to any portion of said buildings or units or their appurtenances.

e. A guarantee by deposit or otherwise is given and maintained to the Company sufficient in its reasonable judgment to insure it against loss in primary, secondary and/or distribution investment in the event of change in the nature of holding and possession of such buildings or units, or in the occupancy thereof, or in the type of service delivered thereto.

f. All utilization equipment on the Customer's side of the Company delivery point is furnished, installed, operated and maintained by the operator of the buildings or units supplied or by the tenants of such operator whose use of electricity is dependent upon the single-point delivery and metering of service.

g. Any use of public highways by such operator for the latter's distribution facilities does not conflict or interfere with the franchise rights of the Company.

2.4 **Compliance with Availability.** The use of the Company's service shall not be for any purpose other than that covered by the availability provisions of the rate or rider under which service is supplied.

2.5 **Single-Phase up to 150 Kva.** Single-phase secondary service is available for loads up to 150 kilovoltamperes. Loads in excess of this amount will be supplied polyphase service. (C)

2.6 **Polyphase Loads Aggregating Less Than 7½ Hp.** Polyphase service is not available to installations aggregating less than 7½ horsepower, unless the excess cost of supplying polyphase rather than single-phase service is borne by the Customer.

2.7 **Motors.** Service is not available to motors which do not meet the Company's standard requirements.

(C) # RATE POL PRIVATE OUTDOOR LIGHTING

**Availability.**

Outdoor lighting of sidewalks, driveways, yards, lots and similar places, outside the scope of service under Rates SL-P and SL-S, by mercury vapor lamps of the sizes hereinafter specified.

**Rate Table.**

Based on nominal rating of mercury vapor lamp sizes.

| | Rate per Lighting Unit per Month | |
|---|---|---|
| Size of Lamp | Lighting Unit Attached to Company's Pole | Lighting Unit Attached to Customer's Pole |
| 4,000 Lumens | $4.40 | $4.00 |
| 8,000 " | 5.75 | 5.35 |
| 12,000 " | 7.00 | 6.60 |
| 20,000 " | 8.50 | 8.10 |

**General Provisions.**

1. Lighting Unit. A Lighting Unit shall be comprised of a bracket, the lead wires and a luminaire, including lamp, reactor and control.

2. Installations. In connection with the service provided herein, the Company will install, own and maintain all facilities on the highway, all standard service-supply lines and all Lighting Units. The Customer will install, own and maintain all poles on his property and all service extensions on his property from the Company's standard service-supply lines.

Investment by the Company in standard lighting installations under standard conditions of supply will be limited to that warranted by the revenue in prospect, any additional investment to be assumed by the Customer.

Standard supply to lighting installations will be from aerial wires, except that, at the option of the Company, in areas where its other distribution facilities are underground, supply may be underground.

For underground supply furnished at the request of the Customer where aerial supply would be normal, or for other than standard installations made at the request of the Customer and of a type approved by the Company, the Company will assume the cost up to the amount it would normally have invested and the additional cost shall be assumed by the Customer.

3. Location and Authorization. Lighting Units shall be installed at locations and upon poles approved by the Company and in positions permitting servicing from a ladder truck. Customer construction shall meet the Company's standards which are based upon the National Electrical Code.

The Customer shall obtain and submit any permits or other authority requisite to the installation and operation of the Lighting Units served hereunder.

4. Service. Each lamp shall be individually controlled by a photoelectric cell which shall operate to energize the lamp during periods of darkness and to de-energize it during other periods. The service shall include the supply of lamps and their renewal when burned out. Renewal of lamps will be made only during regular daytime working hours after notification by the Customer of the necessity therefor.

5. Outage Allowances. Written notice to the Company prior to 4 p. m. of the failure of any light to burn on the previous night shall entitle the Customer to a pro rata reduction in the charges under this rate for the hours of failure if such failure continues for a period in excess of 24 hours after the notice is received. Allowances will not be made for outages resulting from riot, fire, storm, flood, interference by civil or military authorities, or any other cause beyond the Company's control.

**Contract Term.**

For each Lighting Unit, an initial term of three years and thereafter from year to year.

**Payment Terms.**

Standard.

Received
Penna. Public Utility Comm.

(C) Indicates change.

OFFICIALLY FILED TARIFF

## STANDARD RIDERS—*Continued*

**Applicable to rates as indicated in Applicability Index of Riders, Page No. 46**

### EXTENSION GUARANTEE RIDER—*Continued*

First, minimums of less than average values established under TARIFF provisions heretofore in effect shall not be increased;

Second, a guarantor who is the owner or responsible operator of a property, so long as he continues a guarantor under this rider, may elect to have additional service connections and/or meters installed for service to be supplied for his account on the same property at the applicable rate without the Extension Guarantee Rider minimum. No adjustment of extension minimums will be made for such an account and it will be supplied only to a guarantor Customer concurrently with his regular account, with payments for service taken from it not applicable to the satisfaction of the minimum obligation of his guarantor account.

**Additional Guarantors.** The minimums effective for an existing line extension will be adjusted to give credit for the addition of any new guarantors who have not already been included in their establishment.

**Additional Extensions.** A continuation of an existing line extension or a lateral thereto shall be considered as a new and separate extension unless the density of the guarantor customers served from it is equal to or greater than that of the line extension from which it originates, in which case the guarantors it serves shall pay minimums determined the same as under "Additional Guarantors."

**Guarantee Termination.** The minimums effective for a line extension will be terminated 5 years after the extension has been energized.

**Investment Protection.** The Company may delay construction of any line extension until the house wiring of the guarantor contracting to be served therefrom shall have been completed.

An applicant may be required to post a corporate surety bond, or other satisfactory security with the Company to guarantee a term of use or a reasonable assurance of revenue from the investment made in supply facilities. Such protection shall not exceed the total amount of the minimum bills which would accrue over a three-year period of use of the service and is to be cancelled or returned to the Customer when such term has been completed by payment of the bills for service taken during it. If service is terminated at an earlier date any difference between the amount of the guarantee and the amount actually paid for service shall be retained by the Company and the balance returned.

**Term of Contract.** The contract for service to any new connection or reconnection shall be for a term of one year and for the monthly minimum then in effect for the line from which it is supplied or as adjusted to give credit for said connection, and such minimum, unless reduced by the operation of the provisions of this rider, shall continue in effect for any continuation or extension of the contract term.

## RULES AND REGULATIONS—*Continued*

### 14. MEASUREMENT

**14.1 Supply of Meters.** The measurement of electric service shall be by meters furnished and installed by the Company. The Company will select the type and make of metering equipment, and may, from time to time, change or alter the equipment, its sole obligation being to supply meters that will accurately and adequately furnish records for billing purposes.

**14.2 Special Measurements.** The Company shall have the right, at its option and its own expense, to place demand meters, reactive component meters, or other instruments, on the premises of any Customer, for the purpose of measuring the demand and/or the power factor, or for other tests of all, or any part, of the Customer's load.

**14.3 Power Factor Measurement.** The Company reserves the right to measure the power factor of the Customer's load. Such measurement shall be made at the point where the electricity is metered, by test at a time of normal load or, at the option of the Company, by permanently installed instruments.

**14.4 Reverse Registration.** The Company may, by ratchet or other device, control its meters to prevent reverse registration.

**14.5 Meter Elimination.** The kilowatt-hours and billing demands to be paid for may be determined by computation instead of by measurement in the case of installations having a fixed load or demand value controlled to operate for a definite number of hours each day.

**14.6 Meter Reading Intervals.** The Company will read its meters at scheduled regular intervals of one or more months and will render standard bills for the recorded use of service based upon the time interval between meter readings.

**14.7 Interim Bills.** Appropriately marked statements for the money amount of a Customer's average monthly bill, subject to revision upon Customer request or when meter readings disclose a change in the rate-of-use, may be rendered for the monthly intervals between meter readings. Payments of them will be shown as a credit on the next standard bill rendered.

**14.8 Estimated Usage.** The Company may estimate the amount of service supplied to premises where access to the meter is not available, or to installations at remote locations, for such number of months as the type of installation, normal regularity of usage, or other circumstances may warrant, and will render bills in standard form based on such estimate and so marked, for the Customer's acceptance. Meter readings will be secured from time to time and billing will be revised when they disclose that the estimate failed to approximate the actual usage.

# RATE HS HEAT-STORAGE SERVICE

**Availability.**

Only in conjunction with residence service, for any Customer receiving service at 120-240 volts, 3 wires, for the operation of heat-storage equipment of a type approved by the Company, when the demand or load of the heat-storage installation does not exceed the Customer's demand for service to his other residence load and where the supply of service is confined to a single connection, separately metered.

*Not available when the source of supply is service purchased from a neighboring company under a borderline-purchase agreement.*

**Unrestricted Service.**

The supply of service shall be confined to heat-storage hot-water installations used for all domestic purposes except as a source of heat supply to the premises.

**Rate:** 1.3¢ per kwh.

**Minimum Charge:** $1.12 per month.

**Off-Peak Service.**

The supply of service to heat-storage installations where the daily period of use shall be limited by a clock or other timing device to the hours established from time to time by the Company. The clock and controlling device shall be types provided by the Company; shall be subject to inspection and control of setting by the Company; and shall be sealed by the Company. The Company shall not be obligated to provide additional or new supply-facilities.

(D) **Rate:** 1.0¢ per kwh for the first 400 kwh per month
0.2¢ " " " " additional use.

**Minimum Charge:** $1.12 per month.

**Electrical Characteristics of Equipment.**

The heat-storage installations shall be 240 volts, alternating-current, 2 wires, single-phase, 60 cycles.

**Term of Contract.**

Annual.

**Payment Terms.**

Standard.

## RATE T TRACTION SERVICE

**Availability.**

Only to street railway corporations for electric service for the operation of electrified transportation systems and appurtenances.

**Character and Amount of Electric Service.**

Service to be supplied hereunder will be standard high-tension service, except that 30,000 kilowatts maximum of the total capacity made available may be three-phase alternating current at nominally 25 cycles and at nominally 13,200 volts. The total amount of capacity initially to be made available will not exceed 90,000 kilowatts. Additional capacity for standard high-tension service, if available, will be supplied upon reasonable advance written notice from the Customer. The nonstandard 25-cycle service available under this rate is in the process of elimination and is restricted to customers receiving such nonstandard service as of the effective date of this TARIFF. The Company may require the Customer to reduce or eliminate his requirements for nonstandard 25-cycle service within the limits of availability of Company's existing equipment.

CANCELLED by Revised Page No. 43 EFFECTIVE JUN 16 1966

**Monthly Rate Table.**

**Capacity Charge:**

$1.05 per kilowatt of billing demand.

**Energy Charge:**

The rate per kilowatt-hour shall be determined as follows:

The total annual generating and operating costs for the year 1962 shall be computed according to the cost items specified in the classification of accounts prescribed by the Pennsylvania Public Utility Commission as the operating accounts for steam, hydro, energy purchases, substation and transmission expenses (the hydro costs being those of the Conowingo plant from which energy is furnished to the Company). To these total annual costs there shall be added a figure representing an adjustment for additional annual charges on the capital costs of the Conowingo hydroelectric plant, namely, an amount equal to $3,466,600. The total figure thus computed and divided by the total net output in kilowatt-hours for said year represents the bus-bar cost to the Company per kilowatt-hour. To this bus-bar cost so obtained shall be added an amount equal to 15% and the final figure thus obtained shall be the energy charge per kilowatt-hour.

**Transmission and Distribution Investment Charge:**

As compensation for the use of the investment by Company in transmission lines, cables and distribution substation switching equipment required for the exclusive service of Customer, Customer shall pay 1/12 of 13½% of the total investment made for these purposes.

**Determination of Billing Demand.**

For each day in the month, there will be selected the single clock-hour during which the sum of the simultaneous drafts, in kilowatt-hours, drawn by the Customer at all his metering points is the greatest. One-third of the aggregate number of kilowatt-hours drawn by the Customer during the highest three of the clock-hours so selected shall be divided by 0.97 and the resultant figure will constitute the Customer's maximum demand, in kilowatts, for such month.

## STANDARD RIDERS—*Continued*

**Applicable to rates as indicated in Applicability Index of Riders, Page No. 46**

(C)

### TEMPORARY SERVICE RIDER

**Applicability.** To the supply of service for a temporary period.

**Availability.** Temporary service will be supplied only when the Company has available unsold distributing and generating capacity from which to furnish it and its supply will not in any way interfere with service to other customers.

**Investment in Supply Facilities.** The cost of the connection and disconnection of the service supply and of any equipment and extension of facilities required to furnish the temporary service under the applicable rate shall be paid by the Customer, but such payment shall not confer upon, nor entitle the Customer to any title to, or right of property in, said facilities and equipment.

**Minimum Term.** Application of this rider to Rates R, R-S, GLP, FLP and MLP shall not, for billing purposes, be considered to be for a period of less than one month.

Application of this rider to Rates PD and HT shall require payment of the minimum provisions of the contract for each month of the temporary service period, but in no case shall such period be considered, with respect to the guarantee of the monthly minimum charges, as of less duration than 6 months.

**Rate-Price Modification.** When this rider is applied to Rates PD or HT, the last two price blocks of the energy charge shall not apply and energy use otherwise falling into these blocks shall be billed at the price of the second block of each rate.

**Contract Term.** Short term arrangements as agreed upon.

(C)

### TRANSFORMER-RENTAL RIDER

*This rider is in process of elimination and its application is restricted to customers who had it incorporated in contracts, or had accepted it in writing, prior to October 15, 1963. The capacity of each individual installation under this rider shall be limited to the amount in service as of that date. Ownership of facilities provided under this rider will be made available to the Customer if he wishes to purchase them from the Company.*

**Applicability.** To the supply in Suburban Divisions, of a transformer installation furnished, operated and maintained on the premises of a Customer to transform a single standard primary or high-tension service to a supply corresponding in phase and voltage to the standard polyphase secondary or primary service supplied by the Company at the time when and in the territory where the installation is made. Transformation from standard high-tension service to 2,400 volts, 3-phase, although nonstandard in 4,160-volt, 3-phase areas, may be furnished at the Customer's request in such areas.

## DEFINITION OF TERMS AND EXPLANATION OF ABBREVIATIONS—*Continued*

**pronouns.** The masculine, singular, pronoun (he, his, him) relates to Customer, whether male, female, partnership or corporation.

**property line.** The division line between land held in or for private use, and land in which the public or the Company has a right of use; or, the division line between separately owned or occupied land.

**service.** The supply of capacity and energy for use by the Customer, including all things done by the Company in connection with such supply.

STANDARD SINGLE-PHASE SECONDARY; alternating current, 60 cycles, nominally 120–240 volts, 3 wires, except that nominally 120 volts, 2 wires may be supplied for connection to wiring installations which consist of not more than two 15-ampere branch circuits.

STANDARD POLYPHASE SECONDARY; alternating current, 60 cycles:

(a) nominally 120–240 volts, 2-phase, 5 wires;

(b) nominally 240 volts, 3-phase, 3 wires; a fourth wire neutral will be extended for the supply of 120–240-volt single-phase equipment in combination with this service where the service capacity required does not exceed 15 kilovoltamperes on any one of the phases. Where the load to a single premises exceeds 100 kva, transformers will be installed on the premises at a suitable location provided by the owner; (C)

(c) nominally 120-208 volts, 3-phase, 4 wires, (where 3-phase distribution is available) for the exclusive supply of secondary service to one or more buildings or units situated on a single premises occupied by one or more than one Customer, with transformers and secondaries installed on the premises at suitable locations provided by the owner, except that residence units on the same premises billed under Residence Service rates will be supplied at 120-240 volts, single-phase, 3 wires;

(d) nominally 277–480 volts, 3-phase, 4 wires (where 3-phase distribution is available) for the exclusive supply of secondary service to one or more buildings or units situated on a single premises occupied by one or more than one Customer, where the load exceeds 150 kva and the owner provides a suitable location, for the installation of transformers on his premises;

(e) nominally 120–240 volts, 3-phase, 7 wires, for supply only to single-phase equipment requiring more than 150 kilovoltamperes of service capacity, with transformers located on Customer's premises at a suitable location provided by the owner. (C)

STANDARD PRIMARY; unregulated alternating current, 60 cycles, nominally 2,400 volts, 2-phase, 3 wires, or nominally 4,160 volts, 3-phase, 3 or 4 wires. Availability of these voltages is limited to those areas which have not been converted to 13 kv distribution.

STANDARD HIGH TENSION; unregulated alternating current, 60 cycles, 3-phase, 3 wires (4-wire, 13 kv service is available in areas that have been converted to 13 kv distribution):

Nominally 13,200, 33,000, 66,000, 132,000 or 220,000 volts as available in the various sections of the Company's service territory for loads of such character as to require supply at one of such voltages in order not to impose unsatisfactory service conditions on the Company's supply system, or for loads of such character that supply at one of such voltages is desired both by the Company and the Customer. (C)

For service at 13,200 or 33,000 volts, where the Customer's load exceeds 7,000 kw, the owner may be required to provide a suitable location on his premises for the installation of Company's transformation equipment. (C)

RECEIVED
NOV 19 1970

**service-supply lines.** The facilities (conductors, cables, conduits, etc.) extending from the Company's facilities in the highway or other trunk line location to the facilities owned and maintained by the Customer.

(C) Indicates change.

# RATE HT HIGH-TENSION POWER

**Availability.**

Untransformed electric service from the Company's high-tension transmission lines, where the Customer installs, owns, and maintains, any transforming, switching and other receiving equipment required. Provided, however, that a Customer served under the provisions of Rate T Traction Service, may elect to take service under the provisions of this rate, when and if such Customer enters into an agreement with the Company to convert its receiving equipment within a period of four years or less so that its entire requirements may be supplied with standard high-tension service.

**Current Characteristics.**

Standard high-tension service.

SUSPENDED

| Capacity Charge Prices: | Per kw of billing demand: | |
|---|---|---|
| $4.00 | per kw for the first | 25 kw |
| 2.50 | " " " " next | 25 " |
| 1.70 | " " " " " | 450 " |
| 1.55 | " " " " " | 4,500 " |
| 1.40 | " " " " " | 20,000 " |
| 1.30 | " " " " excess over | 25,000 " |

| Energy Charge Prices: | | |
|---|---|---|
| 1.38¢ | per kwh for the first 150 hrs. use of billing demand | |
| 1.01¢ | " " " " next 150 " " " " " | but not more than 1,200,000 kwh |
| 0.69¢ | " " " " 100 " " " " " | but not more than 500,000 kwh |
| 0.50¢ | " " " " additional use. | |

NOTICE
*This page of the Tariff never went into effect.*

**High Voltage Discount:**

For customers supplied at 33,000 volts:
5¢ per kw for the first 2,000 kw of measured demand.
For customers supplied at 66,000 volts or higher:
10¢ per kw for the first 10,000 kw of measured demand.

**Air Quality Fuel Charge and State Tax Adjustment Clause apply to this rate.**

**Determination of Billing Demand.**

The billing demand will be computed to the nearest kilowatt and will never be less than the measured demand, adjusted for power factor in accordance with the Rules and Regulations, nor less than 25 kilowatts. Additionally, during the eight months of October through May the billing demand will not be less than 40% of the maximum demand specified in the contract nor less than 70% of the highest billing demand in the preceding months of June through September. (I)

**Delivery Points.**

Where the load of an industrial Customer located on single or contiguous premises becomes greater than the capacity of the standard circuit or circuits established by the Company to supply the Customer, an additional separate delivery point may be established for such premises upon the written request of the Customer and billing continued as if the service were being delivered and metered at a single point, provided such multi-point delivery is not disadvantageous to the Company.

**Minimum Charge.**

The monthly minimum charge shall be the energy charge applied to the kilowatt-hours that would result from 100 hours' use of the Customer's billing demand for the month, plus the capacity charge for such billing demand, less the supply voltage discount where applicable.

**Term of Contract.**

3 years, and thereafter from year to year until terminated by 60 days' notice from either party to the other.

OFFICIALLY FILED TARIFF

Philadelphia Electric Company

OFFICIALLY FILED TARIFF

**NOTICE**
***This page of the Tariff never went into effect.***

## STANDARD RIDERS

**Applicable to rates as indicated in Applicability Index of Riders, Page No. 52**

### AUXILIARY OR READINESS-TO-SERVE RIDER (C)

**Applicability.** Service to a Customer, any part of whose electric requirements are regularly provided by other than Company-owned facilities, and where the Company supply can be substituted for that of the Customer, will be supplied only under the provisions of this rider. Locations receiving high tension service under agreements permitting substitution of Company supply for that of the Customer in effect as of January 18, 1971 will be billed under the terms and provisions of Rate HT.

**Extent of Supply.** The maximum demand in kilowatts which the Company is obligated to supply shall be defined by contract but shall never be less than 5 kilowatts.

**Control of Supply.** In case the number of kilowatts contracted for is less than the Customer's maximum demand as estimated by the Company, the Company may require the Customer to limit his demand to the load in kilowatts contracted for by means of a circuit breaker or fuses, of types approved by the Company, to be furnished, installed, connected and maintained by the Customer at his expense. The fuse size or the setting of the circuit breaker and its adjustment shall be under the sole control of the Company.

**Parallel Operation.** The Customer shall not at any instant operate any other source of supply in parallel with the Company's service without written permission from the Company.

**Rate and Billing.** Monthly billing will be under the provisions of the rates in conjunction with which this rider is employed, except as modified herein.

The billing demand shall not be less than the maximum kilowatts specified in the contract nor less than 90% of the highest billing demand of any month of the preceding eleven months. When the Company has adequate capacity, a Customer may be granted advance permission to exceed his maximum contract demand without being subject to the 90% ratchet on the demand so created. The kilowatt-hours billed in any month shall not be less than would result from 100 hours' use of the billing demand. Service under rates having no billing demands will be billed under the provisions of Rate GS (with demand measurement), as modified by this rider.

**Liability.** The Customer shall reimburse the Company for all loss or damage sustained by it as a result of his use of the Company's service under the provisions of this rider.

**Term.** Annual.

## LIST OF CHANGES MADE BY THIS TARIFF

CANCELLED by Revised Page No. 3 EFFECTIVE AUG 3 - 1969

### INCREASES

Rule 18.6. (PAGE 23.)
The reconnection charges are changed, resulting in increase.

Rate SL-P Street Lighting in City of Philadelphia. (PAGES 42, 43 AND 44.)
The facilities, capacity and energy charge prices are changed, resulting in increases.

Rate TL-S Traffic Signal Lighting—Suburban. (PAGE 47.)
The pricing of this rate is changed, resulting in increases.

Rate RR Railroad Service. (PAGE 48.)
The capacity and energy charge prices are changed, resulting in increases.

Rate T Traction Service. (PAGES 49 AND 50.)
The capacity and energy charge prices are changed, resulting in increases.

Rate BLI Borderline Interchange Service. (PAGE 51.)
The pricing of this rate is changed, resulting in increases.

RECEIVED
Penna. Public Utility Comm.
DEC 5 1968
Bureau of Rates and Research
TARIFF SECTION

Night Service HT Rider. (PAGE 59.)
The pricing of the capacity charge is changed, resulting in increases.

Night Service PD Rider. (PAGE 60.)
The pricing of the capacity charge is changed, resulting in increases.

### INCREASES, DECREASES AND CHANGES

Rate GS General Service. (PAGES 32 AND 33.)
This is a new rate which takes the place of existing Rate GLP; transfer of customers from existing Rate GLP to this rate results in increases and decreases.

This new rate provides service through single metering installations with billing determined either by energy use up to certain limits or by measured demand when use is beyond these limits.

SUSPENDED
TO: AUG 3 - 1969
AT: C-18640
SUSPENSION VACATED
EFFECTIVE AUG 3 - 1969

### INCREASES AND CHANGES

Rate R Residence Service. (PAGE 25.)

Rate R-S Residence Service. (PAGE 26.)

Rate R-M Residence Service. (PAGE 27.)

In each of the above rates the pricing, blocking and form of rate are changed, resulting in increases.

Rate R-H Residential Heating Service. (PAGE 28.)
The pricing, blocking and form of rate are changed, resulting in increases. A new provision for water heating applicable June through September is added.

Rate WH Water Heating Service. (PAGE 29.)
(FORMER RATE HS HEAT-STORAGE SERVICE.)
The title of this rate is changed and reference to heat-storage within the provisions of the rate are changed to water heating. The availability of this rate is extended to include Rate R-H and residence service under Rate GS. The pricing for Off-Peak Service is changed, resulting in increases.

Rate GLP General Light and Power. (PAGES 30 AND 31.)
Service under this rate is restricted to those installations and those customers receiving service as of February 2, 1969.

The pricing, form and application of this rate are changed, resulting in increases. Space heating service in conjunction with this rate is eliminated and this rate is made available only to customers with billing demands through 4.9 kilowatts.

OFFICIALLY FILED TARIFF

## RULES AND REGULATIONS—*Continued*

### 3. CUSTOMER'S INSTALLATION

**3.1 Information from Customer.** The Company should be advised by the Customer or his representative, in writing, preferably on a form supplied by the Company, of premises to be equipped for electricity, giving exact location, and details of all current consuming devices to be installed.

**3.2 Meter Location.** There shall be provided, free of expense to the Company, at a location which the Company will designate in writing upon request, outdoors at its option, a suitable place for the meter or meters and any other supply, protective or control equipment of the Company which may be required in the delivery of electric service.

**3.3 Point of Delivery.** The Company will designate in writing, upon request, a satisfactory point of delivery where the Customer shall terminate his wiring and facilities for connection to the supply lines of the Company. The failure to request and obtain such location may result in refusal of service pending rearrangement of Customer's facilities, but the designation of a point of delivery does not constitute an agreement or obligation on the part of the Company to furnish service.

**3.4 Service Entrance Equipment.** All equipment beyond the point of delivery, except the meter, shall be installed by the Customer. Installation shall be in conformity with the National Electrical Code and the Company's published "Electric Service Requirements", and shall include, where necessary, an approved sealable device for mounting a meter. The meter will be supplied, owned and sealed by the Company.

**3.5 Secondary Service Connection.** (a) Wiring of any premises for connection to overhead lines must be brought outside of the building wall to a location designated or approved by the Company, at which point the house wiring must extend at least 3 feet for attachment to the Company's service-supply lines.

(b) Service connections to the Company's underground facilities shall terminate on the Customer's premises in an approved connection box from which Customer's wiring shall extend to his other service entrance equipment. (C)

(c) Underground service connections from overhead distribution lines shall be terminated in the same manner as those supplied from underground distribution unless the size of wire used permits direct connection to the Customer's service entrance equipment.

**3.6 Underground Service.** Customers desiring an underground service from overhead wires must bear the excess cost incident thereto. Specifications and terms for such construction will be furnished by the Company on request.

**3.7 Nonstandard Service.** The Customer shall pay the cost of any special installation necessary to meet his peculiar requirements for service at other than standard voltages, or for the supply of closer voltage regulation than required by standard practice.

**3.8 Relay Protection.** The Customer must install at his own expense a reverse-phase relay of approved type on all alternating current motors for passenger and freight elevators, hoists, and cranes, and a reverse-power relay for parallel operation.

OFFICIALLY FILED TARIFF

## RATE SL-S STREET LIGHTING—SUBURBAN—*Continued*

3. LIGHTING INSTALLATIONS. The prices in the Rate Table apply to all Company-approved installations for (a) federal, state, county and municipal authorities and community associations entering into a 5-year contract for lighting service; and (b) building operation developers for lighting, during the development period, of streets that are to be dedicated, where the municipality has approved the lighting and agreed to subsequently assume the charges for it under a standard contract.

Standard lighting installations under standard conditions of supply will be made on the public highways at the expense of the Company to the extent warranted by the revenue in prospect, any additional investment to be assumed by the Customer.

Standard supply to lighting installations will be from aerial wires, except that, at the option of the Company, in areas where its other electric distribution facilities are underground, supply may be underground.

For underground supply furnished at the request of the Customer where aerial supply would be normal, or for other than standard installations made at the request of the Customer and of a type approved by the Company, the Company will assume the cost up to the amount it would normally have invested and the additional cost shall be assumed by the Customer.

The installation cost for lighting on private property, or for contracts of less than standard term, shall be paid by the Customer.

Title to all lighting installations [illegible] be approved by the Company shall be vested in the Company and all necessary maintenance, repair and replacement of equipment in such installations will be made by the Company. Maintenance, repair and replacement of nonstandard equipment shall be at the expense of the Customer.

4. EXCESS COSTS. In cases where the remote location of the proposed new or additional lighting, or the number or spacing of the lamps, or the lack of necessary supply lines or any other reason makes the cost of installation excessive, such excess costs shall be assumed by the Customer as mutually agreed.

5. LOCATION, AUTHORIZATION AND PROTECTION. The location of lamps to be supplied is to be approved by the properly designated authorized representative of the Customer and the Customer shall furnish any requisite authority for the erection and maintenance of poles, wires, luminaires and other equipment necessary to operate the lamps at the approved locations. He shall protect the Company from damage to the lighting system to the extent of his ability. The Company agrees upon receipt of a request in writing from the Customer to relocate a lamp to a new adjacent location. Such relocation shall be at the expense of the Customer unless, in the opinion of the Company, it will provide better illumination or be for the safety and convenience of the general public.

**Contract Term.**

Standard contracts shall be for a term of 5 years, and thereafter from term to term.

**Payment Terms.**

Bills will be rendered monthly. Each month, for the purpose of prorating the price, shall be considered 1/12 of a year.

RECEIVED
Pa. Public Utility Comm.
AUG 15 1963
Bureau of Rates and Research

OFFICIALLY FILED TARIFF

## STANDARD RIDERS—*Continued*

**Applicable to rates as indicated in Applicability Index of Riders, Page No. 46**

### FARM SERVICE RIDER

(C) *This rider is in process of elimination and its application is restricted to those customers who were served under its provisions prior to October 15, 1963.*

**Applicability.** To the supply of single-phase service for farm purpose uses by an individual employing the natural processes of growth for the production of grain, stock, dairy, poultry, garden truck, or other agricultural product, when taken through one meter in conjunction with the farmhouse domestic requirements for which the Residence Service Rate would be available.

Not applicable to any use of electric service for industrial operations, commercial processing, or in the conduct of any other agency for the preparation or distribution of products of others.

**Rate.** The Residence Service Rate with the addition of a monthly charge for farm service of:

$1.12 per kw of farm load demand which includes the first 10 hours' use of the demand.

Additional residences on, and occupied by persons connected with the operation of the farm may be included under this rate at a charge of $1.12 each, including energy at the same rate as under the farm load demand charge.

**Farm Load Demand.** The farm load demand shall be the arithmetical sum, computed to the nearest 0.1 kilowatt, of the assessed demands of the various loads supplied, taken at the following percentages of the connected load:

| | |
|---|---|
| Yard, barn and outbuilding lighting in excess of 2,000 watts, and production lighting such as poultry house, greenhouse, etc. | 40% |
| Motor loads consisting of units of 2 horsepower or less rating | 55 |
| Motor loads consisting of units larger than 2 horsepower | 85 |
| Heating applications such as electric brooders, incubators, dairy sterilizers and water heaters, soil heating cable, etc. | 20 |

**Exemptions.** Incidental illumination in the yard, barn and outbuildings up to a total of 2,000 watts and ½ horsepower of motor capacity used for combined house and farm water pumping duty will be considered as service appurtenant to the dwelling and will not be included in the farm load demand.

Where an electric range is a part of the domestic utilization, a portable farm motor, not over 7½ horsepower in size, which is used at various locations and is mounted on a vehicle so it can be moved from place to place, will be exempt from assessment.

**Minimum.** The monthly minimum charge under this rider shall be the charge for the farm service plus the $1.00 minimum of the Residence Service Rate.

**Term.** Annual contract.

by
2nd Revised Page No. 2
EFFECTIVE OCT 10 1964

### CHANGES

Rule 3.4. (1st Rev. Page 11.)
This rule is reworded to conform with present practice.

Rule 17. (1st Rev. Page 24.)
The title of this rule is changed for clarity.

Rule 17.3. (1st Rev. Page 24.)
This rule is expanded to conform with present practice.

Rate POL Private Outdoor Lighting. (Orig. Page 40A.)
This is a new rate providing for private outdoor lighting service.

Electric House-Heating Rider. (1st Rev. Page 49.)
A clause is added to exclude Unrestricted Service under Rate HS in the computation of Monthly Charges.

Tariff Electric—Pa. P. U. C. No. 22, *first filed to be effective October 15, 1963, is modified so that it now consists of the* Original Tariff *with the following changes:*

## RATES AVAILABLE UNDER THIS TARIFF

**Rate R (Philadelphia Division) and Rate R-S (Suburban Divisions) Residence Service.** These rates are available to single-phase electric service to the dwelling and appurtenances of a single private family for the domestic requirements of its members and also to service for related farm purposes when such service is supplied through one meter in conjunction with the farmhouse domestic requirements.

"Residence Service," as employed herein, is not susceptible of particularizing all the uses embraced therein.

As illustrative only of its general meaning:

The term includes service to: (a) The separate dwelling-unit in an apartment house, but not the halls, basement, or other portions of such building common to more than one such unit; (b) The premises occupied as the living-quarters of five persons or less who unite to establish a common dwelling-place for their own personal comfort and convenience on a cost-sharing basis; (c) The premises owned by a church, and primarily designated or set aside for, and actually occupied and used as, the dwelling-place of a priest, rabbi, pastor, rector, nun or other functioning Church Divine, and his or her resident associates; (d) Private dwellings in which space is occasionally used for the conduct of business by a person residing therein; (e) Farm purpose uses by an individual employing the natural processes of growth for the production of grain, stock, dairy, poultry, garden truck, or other agricultural products.

The term does NOT include service to: (a) Premises institutional in character including Clubs, Fraternities, Orphanages or Homes; (b) Premises defined as a rooming house or boarding house in the Municipal Code for Cities of the First Class enacted by Act of General Assembly; (c) The space in an apartment or other residential building primarily devoted to a professional or other office, studio, or other gainful pursuit; (d) Farms operated principally to sell, prepare, or process products produced by others; (e) Electric furnaces or welding appatatus other than a transformer type "limited input" arc welder with an input not to exceed 37½ amperes at 240 volts.

**Rate R-M Residence Service.** Single-phase electric service, in the entire territory of the Company, to a multiple dwelling-unit building consisting of two to five dwelling units (whether occupied or not) for domestic requirements when such service is supplied through one meter.

**Rate HS Heat-Storage Service.** Available only in conjunction with residence service under Rate GLP and Rates R, R-S and R-M, for any Customer receiving service at 120-240 volts, 3 wires, for the operation of heat-storage equipment of a type approved by the Company, when the demand or load of the heat-storage installation does not exceed the Customer's demand for service to his other residence load and where the supply of service is confined to a single connection, separately metered.

**Rate R-H Residential Heating Service.** Single-phase electric service to the dwelling and appurtenances of a single private family, or to a multiple dwelling-unit building consisting of two to five dwelling units (whether occupied or not), for domestic requirements when such service is supplied through one meter and where electricity is the primary source of energy regularly used for permanently connected space heating installations which meet the Company's requirements. This rate schedule is not available for commercial, institutional or industrial establishments. (C)

**Rate GLP General Light and Power** is defined as the supply of electric service through a single metering installation for general lighting and/or power requirements of offices, professional, commercial or industrial establishments, and other applications outside the scope of the Residence Service Rates; Residence Service, when used through the same meter and in conjunction with General Light and Power Service, will be supplied under this rate unless the Customer so separates and arranges his wiring that domestic use can be separately metered and makes a separate contract for other service.

**Rate PD Primary-Distribution Power.** Untransformed electric service from the primary supply lines of the Company's distribution system where the Customer installs, owns, and maintains, any transforming, switching and other receiving equipment required.

**Rate HT High-Tension Power.** Untransformed electric service from the Company's high tension transmission lines, where the Customer installs, owns and maintains any transforming, switching and other receiving equipment required.

(C) Indicates change.

## RULES AND REGULATIONS—*Continued*

### 15. BILLING DEMAND DETERMINATION

**15.1 Billing Demands.** Billing demands may be assessed at a per cent of the Customer's connected load or measured by a recording or indicating instrument showing, unless otherwise specified, the greatest 30-minute rate-of-use of energy, provided that in the case of hoists, elevators, welding machines, electric furnaces, or other installations where the use of electricity is intermittent or subject to violent fluctuation, the demand may be fixed by special determination.

**15.2 Contract Minimums.** Where the load to be served is of such intermittent or fluctuating nature that the 30-minute interval of demand measurement will not record a sufficient value to reflect the true supply capacity required, the Company will require a minimum monthly payment for the demand value that would result from the application of the assessed demand formula.

**15.3 Demand Measurements.** Billing demands for service furnished at rates which provide for their determination by the alternate methods of measurement or assessment may always, at the option of the Company, be determined by measurement. The demands of loads that include installations for the main or principal source of heat supply for a premises, and all demands of 5 kilowatts or more will be measured.

**15.4 Power Factor Adjustment.** The power factor of the use of demand measured service shall be determined by test under normal load conditions and if less than the standard herein set forth, the measured demand shall be increased by the ratio between the standard power factor value and the test power factor to determine the billing demand, except when the statement of the rate provides other treatment of power factor. Power factor values are defined as standard for minimum kilowatt demand values fixed by contract or otherwise under the terms of this TARIFF as follows:

| Minimum Demand Value | Standard Power Factor | |
|---|---|---|
| 75 kw or less | 80% | (D) |
| From 76 kw to 1,000 kw | 90% | |
| In excess of 1,000 " | 95% | |

Where gaseous tube lighting units, not compensated to produce a power factor of 90% or better, are included in installations for which the billing demand is determined by measurement without the application of the power factor adjustment rule, the measured demand shall have added to it a factor of 0.8 of the over-all rating of such load as supplied by the manufacturer or computed as set forth in Rule 15.6.

## RATE R-H RESIDENTIAL HEATING SERVICE (C) (D)

**Availability.**

Single-phase electric service to the dwelling and appurtenances of a single private family for the domestic requirements of its member, where electricity is the primary source of energy regularly used for permanently connected space heating installations which meet the Company's requirements. This rate schedule is not available for commercial, institutional or industrial establishments.

CANCELLED by Revised Page No. 29A EFFECTIVE 6/16

**Current Characteristics.**

Standard single-phase secondary service.

**Monthly Rate Table.**

Prices per kwh:

| | |
|---|---|
| $1.00 minimum covers the first..... | 14 kwh |
| 3.25¢ per kwh for the next..... | 86 " |
| 1.80¢ " " " " ..... | 400 " |
| 1.80¢ " " " " additional use—For billing months ended June 16 through October 15, inclusive. | |
| 1.20¢ " " " " additional use—For billing months ended October 16 through June 15, inclusive. | |

Where heat pumps using outdoor air as the heat-source are the main and principal source of heat supply, a charge of $2.00 per kilowatt of the connected load of all resistance heating elements installed for heating the premises, except that such charge shall not exceed $4.00, shall be made in each of the eight billing months ended October 16 through June 15, inclusive.

**Minimum Charge:** $1.00 per month.

**Combined Residential and Commercial Service.**

Where a portion of the service supplied is used for commercial purposes, the appropriate general service rate is applicable to all service; or, at the option of the Customer, the wiring may be so arranged that the residential service may be separately metered and this rate is then applicable to the residential service only.

**Budgeted Billing.**

At the option of the Customer, an estimated total bill for the use of electricity may be budgeted over a period designated by the Company and an average bill rendered for payment each month. Any adjustment between the estimated amount so paid and the actual charges for the electricity used during such months will be made at the end of the budgeted period.

If a budget plan bill is unpaid when the next monthly bill is about to be rendered, the budget arrangement for billing may be terminated by the Company.

CANCELLED by Revised Page No. 44
EFFECTIVE JUN 16 1968

## RATE T TRACTION SERVICE—*Continued*

**Determination of Billing Demand—*Continued***

The Customer shall maintain the power factor of his load as near unity as practicable, and should the combined power factor of said load during any hour used in determining the maximum demand be found to be less than 98%, then the simultaneous draft for that hour will be adjusted by multiplying it by the quotient obtained by dividing the actual combined power factor, expressed as a decimal, into 0.98.

The billing demand each month shall be the maximum demand for such month adjusted for power factor as specified above, except that in no case shall the billing demand in a month be less than 75% of the greatest adjusted maximum demand established during the preceding 12 months, nor less than 64,880.4 kilowatts.

**Kilowatt-Hours Guarantee.**

The kilowatt-hours to be paid for each month shall be not less than the kilowatt-hours obtained by multiplying 30% of the hours in the month by the billing demand for the month, provided that the Customer is not prevented from using a normal amount of energy by any cause beyond his control.

**Delivery Points.**

All electrical capacity and energy furnished will be delivered to Customer at locations to which service is being supplied as of the effective date of this Tariff or at locations acceptable to the Company. Points of delivery may be removed or established upon reasonable notice from Customer in writing, except that 25-cycle supply is limited to locations receiving supply at 25 cycles as of October 1, 1959, and the amount of such supply will not be increased at any such location. When points of delivery are established or when service supply facilities to delivery points require modification, the type, character and amount of service and facilities will be specified by the Company.

**Receiving Equipment Responsibilities.**

The Customer shall own and bear the entire cost of necessary inspection, repair and maintenance of any transforming, switching, or other receiving equipment required.

**Termination of Service.**

Unless otherwise stated in a written Service Contract, service under this rate is terminable by the Company or the Customer upon not less than 60 days' written notice.

**Written Service Contract.**

At the Customer's election, service hereunder may be evidenced by a written Service Contract for an annual term and under such further detailed conditions of service supply as are not inconsistent with those stated in this rate or in the Rules and Regulations.

**Payment Terms.**

Each month, the Company will render a bill to the Customer covering the charges for the preceding calendar month and Customer shall pay such bill within 20 days after receipt thereof.

## RULES AND REGULATIONS—*Continued*

### 9. INTRODUCTION OF SERVICE

9.1 **Wiring in Progress.** Service-supply lines will not be installed prior to the time that the wiring of the premises is actually in progress.

9.2 **Inspection.** The Company reserves the right to refuse the introduction of service unless a written certification of approval, satisfactory to the Company, has been received from a competent inspection agency authorized to perform this service in the specific locality supplied. (C)

9.3 **Company's Right to Inspect.** The Company shall have the right, but shall not be obliged, to inspect any installation before electricity is introduced or at any later time, and reserves the right to reject any wiring or appliances not in accordance with the Company's standard requirements; but such inspection, or failure to inspect, or to reject, shall not render the Company liable or responsible for any loss or damage, resulting from defects in the installation, wiring, or appliances, or from violation of Company rules, or from accidents which may occur upon the premises of the Customer.

9.4 **Defective Installation.** The Company may refuse to connect if, in its judgment, the Customer's installation is defective, or does not comply with such reasonable requirements as may be necessary for safety, or is in violation of the Company's standard requirements.

9.5 **Unsatisfactory Installation.** The Company may refuse to connect if, in its judgment, the Customer's equipment, or use thereof, might injuriously affect the equipment of the Company, or the Company's service to other customers.

9.6 **Final Connection.** In all cases the final connection between the Customer's installation and the Company's service-supply lines shall be made by, or under the supervision of a representative of the Company.

SUSPENSION VACATED
EFFECTIVE NOV 1 7 1971

**Monthly Rate Table.**

October through May
2.9¢ per kwh.

June through September
3.4¢ per kwh.

**Heating Modification.**

A. SINGLE METER.

Applicable where an area is heated solely by permanently connected electric resistance space heating installations, with a total capacity of not less than 15 kilowatts, which are acceptable to the Company and were in service prior to June 16, 1968.

During October through May the energy used for heating shall be determined for each of the billing months by multiplying the billing period degree-days by the estimated heating energy requirements per degree-day of the area to be heated as determined by a mutually acceptable formula.

The price for this energy use shall be 1.25¢ per kwh in lieu of the rate of 2.9¢ per kwh which will apply to the Customer's other use on the same service. (I)

This modification will be applied upon notification to the Company of qualifying installations. It shall be the responsibility of the Customer to notify the Company of any subsequent changes in the installation.

B. SEPARATE METERS.

Electricity supplying permanently connected resistance space heating installations or heating equipment sensitive to outdoor temperature with a total capacity of not less than 5 kilowatts, which are acceptable to the Company and are the sole source of heat for the application, will be measured by a separate meter, apart from his other requirements for electric service at the premises. Air conditioning equipment also may be supplied through this separate meter.

During October through May the usage of this separate circuit shall be billed at 1.25¢ per kwh in lieu of the rate of 2.9¢ per kwh. (I)

During June through September the combined usage shall be billed at 3.4¢ per kwh. (I)

Air Quality Fuel Charge and State Tax Adjustment Clause apply to this rate.

## STANDARD RIDERS—*Continued*

**Applicable to rates as indicated in Applicability Index of Riders, Page No. 52**

SUSPENSION VACATED
EFFECTIVE NOV 17 1971

### FARM SERVICE RIDER

*This rider is in process of elimination and its application is restricted to those customers who were served under its provisions as of January 18, 1971.* (C)

**Applicability.** To the supply of single-phase service for farm purpose uses by an individual employing the natural processes of growth for the production of grain, stock, dairy, poultry, garden truck, or other agricultural product, when taken through one meter in conjunction with the farmhouse domestic requirements for which the Residence Service Rate would be available.

Not applicable to any use of electric service for industrial operations, commercial processing, or in the conduct of any other agency for the preparation or distribution of products of others.

**Rate.** The Residence Service Rate with the addition of a monthly charge for farm service of:

$1.40 per kw of farm load demand which includes the first 10 hours' use of the demand. (I)

Additional residences on, and occupied by persons connected with the operation of the farm may be included under this rate at a charge of $1.40 each, including energy at the same rate as under the farm load demand charge. (I)

**State Tax Adjustment Clause** applies to this rider.

**Farm Load Demand.** The farm load demand shall be the arithmetical sum, computed to the nearest 0.1 kilowatt, of the assessed demands of the various loads supplied, taken at the following percentages of the connected load:

| | |
|---|---|
| Yard, barn and outbuilding lighting in excess of 2,000 watts, and production lighting such as poultry house, greenhouse, etc. | 40% |
| Motor loads consisting of units of 2 horsepower or less rating. | 55 |
| Motor loads consisting of units larger than 2 horsepower | 85 |
| Heating applications such as electric brooders, incubators, dairy sterilizers and water heaters, soil heating cable, etc. | 20 |

**Exemptions.** Incidental illumination in the yard, barn and outbuildings up to a total of 2,000 watts and ½ horsepower of motor capacity used for combined house and farm water pumping duty will be considered as service appurtenant to the dwelling and will not be included in the farm load demand.

Where an electric range is a part of the domestic utilization, a portable farm motor, not over 7½ horsepower in size, which is used at various locations and is mounted on a vehicle so it can be moved from place to place, will be exempt from assessment.

**Minimum.** The monthly minimum charge under this rider shall be the charge for the farm service plus the $1.00 minimum of the Residence Service rate.

**Term.** Annual contract

## LIST OF CHANGES MADE BY THIS TARIFF—*Continued*

### INCREASES AND CHANGES—*Continued*

**Rate PD Primary-Distribution Power.** (PAGE 34.)

The capacity and energy charge prices and the provision for determination of billing demand are changed, resulting in increases. The availability provision of this rate is modified.

**Rate HT High-Tension Power.** (PAGE 35.)

The capacity charge prices and blocking are changed; the energy charge prices, except the end block price, are changed; and the provision for determination of billing demand is changed, resulting in increases. The minimum billing demand provision is changed from 100 kilowatts to 25 kilowatts.

**Rate FLP Federal Light and Power.** (PAGES 36 AND 37.)

**Rate MLP Municipal Light and Power.** (PAGES 38 AND 39.)

In each of the above rates the pricing and form of rate are changed, resulting in increases; the availability is revised to include reference to Rate GS.

**Rate POL Private Outdoor Lighting.** (PAGE 40.)

The pricing of all lamps is changed, resulting in increases. The description of lamp sizes is expanded to include wattage ratings.

**Rate PSL Private Street Lighting.** (PAGE 41.)

The pricing of lamps is changed, resulting in increases. The restriction provision of this rate is updated.

**Rate SL-S Street Lighting—Suburban.** (PAGES 45 AND 46.)

The pricing of incandescent filament lamps and mercury vapor lamps is changed, resulting in increases. Reference to 15,000 lumen mercury vapor lamps in the restriction provision is deleted; the description of mercury vapor lamp sizes is expanded to include wattage ratings; and the description of Service under General Provisions is revised to reflect present practice.

**Auxiliary or Readiness-to-Serve Rider.** (PAGE 53.)
(FORMER EMERGENCY OR AUXILIARY RIDER.)

The rate and billing provisions of this rider are changed, resulting in increases.

**Traffic Signal and Alley Lighting Rider.** (PAGE 63.)
(FORMER ALLEY-LIGHTING AND TRAFFIC-SIGNAL RIDER.)

The pricing of the charge under this rider is changed, resulting in increases.

## RULES AND REGULATIONS—*Continued*

### 4. APPLICATION FOR SERVICE

**4.1 Place of Application.** Applications for electric service may be made at any commercial office of the Company.

**4.2 Service Contract.** Every applicant for electric service may be required to sign a contract, agreement, or other form, then in use by the Company, covering the special circumstances of his use of electricity, and shall abide by these Rules and Regulations and the standard requirements of the Company.

**4.3 Contract Data.** The application shall contain a statement of the premises to be served, the rate under which service is desired, and such conditions or riders as are applicable to the special circumstances of the case.

**4.4 Right to Reject.** The Company may place limitations on the amount and character of service it will supply or may reject applications for service not available under a standard rate, or which might affect the supply of service to other customers, or to be delivered at a location which involves excessive supply cost, or for other good and sufficient reasons.

**4.5 Acceptance.** When an application is accepted, or when service is supplied according thereto either without modification or with supplemental agreement, it constitutes the contract between the Customer and the Company, subject to the Rules and Regulations.

**4.6 Special Contracts.** Standard contracts shall be for terms as specified in the statement of the rate, but where large or special investment is necessary for the supply of service, or where service is to be used for an emergency or temporary replacement of another method of operation, contracts of longer term than specified in the rate, or with special guarantees of revenue, or both, may be required.

**4.7 Unauthorized Use.** Unauthorized connection to the Company's electric service-supply facilities, and/or the use of service obtained from the Company without authority, or by any false pretense, may be terminated by the Company without notice. The use of service without notifying the Company and enabling it to read its meter will render the user liable for any amount due for service supplied to the premises from the time of the last reading of the meter, immediately preceding his occupancy, as shown by the Company's books.

(C) RATE TL-S TRAFFIC SIGNAL LIGHTING—SUBURBAN

**Availability.**

To any municipality in SUBURBAN DIVISIONS using Company's standard service for electric traffic signal lights installed, owned and maintained by the municipality.

**Current Characteristics.**

Standard single-phase secondary service.

**Rate.**

2.2¢ per kwh.

**Special Rules and Regulations.**

The use of energy will be estimated by the Company on the basis of the size of lamps and controlling apparatus and the burning-hours. The Customer shall immediately notify the Company whenever any change is made in the equipment or the burning-hours, so that the Company may forthwith revise its estimate of the energy used.

The Company shall not be liable for damage to person or property arising, accruing, or resulting, from the attachment of the signal equipment to its poles, wires, or fixtures.

**Minimum Charge.**

$1.00 per month per service-installation.

## STANDARD RIDERS—*Continued*

**Applicable to rates as indicated in Applicability Index of Riders, Page No. 46**

### INVESTMENT RETURN GUARANTEE RIDER

**Applicability.** To contracts which require investment in supply facilities greater than warranted by the revenue assured by the minimum of the rate under which service is supplied.

**Cost of Extension.** The cost of the extension of supply facilities, including the cost of the service connection, shall be set forth in each agreement for the application of this rider.

**Minimum Guarantee.** The minimum monthly payment for service shall be the amount set forth in the rider agreement or, in the event of later increases of the Customer's load, the minimum of the rate at which service is rendered, whichever minimum obligation is the greater.

(C) **Construction Advances.** Where the service desired is of a special character or doubtful permanency, the Company will require payment of a sum equal to the cost of the extension as an advance for construction. A credit of 20% of the net amount of the Customer's bills for service will be allowed by the Company up to an aggregate refund of 100% of such sum, with the right to retain such portion of the advance as needed to guarantee the payment of subsequent bills.

**Fulfillment of Contract Term.** In the event of the discontinuance for any reason of the supply or use of energy prior to the expiration of the term of the contract with which this rider is applied, the Customer shall pay the Company immediately thereon a pro rata share of the cost of the extension for the unexpired portion of the contract term.

**Ownership of Supply Facilities.** The provisions of this rider shall not under any circumstances be considered as conferring upon the Customer any title to, or right of property in, the supply facilities.

**Contract Term.** Contract terms in excess of one year may be arranged with the Customer to assure the return required by the investment in supply facilities.

## RATES AVAILABLE UNDER THIS TARIFF

**Rate R (Philadelphia Division) and Rate R-S (Suburban Divisions) Residence Service.** These rates are available to single-phase electric service to the dwelling and appurtenances of a single private family for the domestic requirements of its members and also to service for related farm purposes when such service is supplied through one meter in conjunction with the farmhouse domestic requirements.

"Residence Service," as employed herein, is not susceptible of particularizing all the uses embraced therein.

As illustrative only of its general meaning:

The term includes service to: (a) The separate dwelling-unit in an apartment house but not the halls, basement, or other portions of such building common to more than one such unit; (b) The premises occupied as the living-quarters of five persons or less who unite to establish a common dwelling-place for their own personal comfort and convenience on a cost-sharing basis; (c) The premises owned by a church, and primarily designated or set aside for, and actually occupied and used as, the dwelling-place of a priest, rabbi, pastor, rector, nun or other functioning Church Divine, and his or her resident associates; (d) Private dwellings in which space is occasionally used for the conduct of business by a person residing therein; (e) Farm purpose uses by an individual employing the natural processes of growth for the production of grain, stock, dairy, poultry, garden truck, or other agricultural products.

The term does NOT include service to: (a) Premises institutional in character including Clubs, Fraternities, Orphanages or Homes; (b) Premises defined as a rooming house or boarding house in the Municipal Code for Cities of the First Class enacted by Act of General Assembly; (c) The space in an apartment or other residential-building primarily devoted to a professional or other office, studio, or other gainful pursuit; (d) Farms operated principally to sell, prepare, or process products produced by others; (e) Electric furnaces or welding apparatus other than a transformer type "limited input" arc welder with an input not to exceed 37½ amperes at 240 volts.

**Rate R-M Residence Service.** Single-phase electric service, in the entire territory of the Company, to a multiple dwelling-unit building consisting of two to five dwelling units (whether occupied or not) for domestic requirements when such service is supplied through one meter. (C)

**Rate HS Heat-Storage Service.** Available only in conjunction with residence service under Rate GLP and Rates R, R-S and R-M, for any Customer receiving service at 120-240 volts, 3 wires, for the operation of heat-storage equipment of a type approved by the Company, when the demand or load of the heat-storage installation does not exceed the Customer's demand for service to his other residence load and where the supply of service is confined to a single connection, separately metered. (C)

**Rate R-H Residential Heating Service.** Single-phase electric service to the dwelling and appurtenances of a single private family for the domestic requirements of its members where electricity is the primary source of energy regularly used for permanently connected space heating installations which meet the Company's requirements. This rate schedule is not available for commercial, institutional or industrial establishments.

**Rate GLP General Light and Power** is defined as the supply of electric service through a single metering installation for general lighting and/or power requirements of offices, professional, commercial or industrial establishments, and other applications outside the scope of the Residence Service Rates; Residence Service, when used through the same meter and in conjunction with General Light and Power Service, will be supplied under this rate unless the Customer so separates and arranges his wiring that domestic use can be separately metered and makes a separate contract for other service.

**Rate PD Primary-Distribution Power.** Untransformed electric service from the primary supply lines of the Company's distribution system where the Customer installs, owns, and maintains, any transforming, switching and other receiving equipment required.

**Rate HT High-Tension Power.** Untransformed electric service from the Company's high-tension transmission lines, where the Customer installs, owns, and maintains, any transforming, switching and other receiving equipment required.

## RULES AND REGULATIONS—*Continued*

### 15. BILLING DEMAND DETERMINATION

**15.1 Billing Demands.** Billing demands may be assessed at a per cent of the Customer's connected load or measured by a recording or indicating instrument showing, unless otherwise specified, the greatest 30-minute rate-of-use of energy, provided that in the case of hoists, elevators, welding machines, electric furnaces, or other installations where the use of electricity is intermittent or subject to violent fluctuation, the demand may be fixed by special determination.

**15.2 Contract Minimums.** Where the load to be served is of such intermittent or fluctuating nature that the 30-minute interval of demand measurement will not record a sufficient value to reflect the true supply capacity required, the Company will require a minimum monthly payment for the demand value that would result from the application of the assessed demand formula.

(C) **15.3 Demand Measurements.** Billing demands for service furnished at rates which provide for their determination by the alternate methods of measurement or assessment may always, at the option of the Company, be determined by measurement. The demands of loads that include installations for the main or principal source of heat supply for a premises, and all demands of 5 kilowatts or more will be measured.

**15.4 Power Factor Adjustment.** The power factor of the use of demand measured service shall be determined by test under normal load conditions and if less than the standard hereinafter set forth, the measured demand shall be increased by the ratio between the standard power factor value and the test power factor to determine the billing demand, except when the statement of the rate provides other treatment of power factor. Power factor values are defined as standard for minimum kilowatt demand values fixed by contract or otherwise under the terms of this TARIFF as follows:

| Minimum Demand Value | Standard Power Factor |
|---|---|
| Less than 50 kw | 80% |
| From 50 kw to 1,000 " | 90% |
| In excess of 1,000 " | 95% |

Where gaseous tube lighting units, not compensated to produce a power factor of 90% or better, are included in installations for which the billing demand is determined by measurement without the application of the power factor adjustment rule, the measured demand shall have added to it a factor of 0.8 of the over-all rating of such load as supplied by the manufacturer or computed as set forth in Rule 15.6.

OFFICIAL FILED TARIFF

## RATE GLP GENERAL LIGHT AND POWER

**Availability.**

Electric service through a single metering installation for general lighting and/or power requirements of offices, professional, commercial or industrial establishments, and other applications outside the scope of the Residence Service Rates.

*Service under this rate to customers whose load consists of from 2 to 5 residence units, inclusive, and whose load is predominantly residential in character, is restricted to those customers at those locations receiving such service as of August 3, 1966.* (C)

**Current Characteristics.**

Standard single-phase or polyphase secondary service.

CANCELLED by 3 Revised Page No. 30 EFFECTIVE JUN 1 2 1968

**Monthly Rate Table.**

**Capacity Charge Prices:** Per kw of billing demand:

| | | |
|---|---|---|
| $1.50 | per kw for the first | 5 kw |
| 1.20 | " " " " next | 10 " |
| 1.00 | " " " " excess over | 15 " |

Includes first 16 hrs. use of billing demand.

**Energy Charge Prices:** Per kwh:

| | | |
|---|---|---|
| 4.4¢ | per kwh for the next | 64 hrs. use of billing demand but not less than 100 kwh |
| 1.4¢ | " " " " " | 70 " " " " " 105 " |
| 1.0¢ | " " " " " | 250 " " " " " 380 " |
| 0.8¢ | " " " " | additional use. |

**Rate-Price Modification for Residence Service:** Where the assessed demand includes one or more residence units, the last price block of the above table shall be 1.5¢ per kwh instead of 0.8¢ per kwh. (C)(D)

**Determination of Demand.**

The billing demand, which shall never be less than 1 kilowatt, shall be determined by measurement or by assessment, computed to the nearest 0.1 of a kilowatt when assessed and taken at the value indicated by the demand meter when measured, subject to the following provisions:

**Assessed Demand:** The assessed demand shall be taken at the percentages of connected load specified in the Rules and Regulations.

**Measured Demand:** Demands which, by the assessment formula, are 5 kilowatts or more, are to be determined by measurement. Determination of demand by measurement shall continue for a period of not less than 11 months following any month in which the billing demand was 5 kilowatts or more. Any Customer, whose assessed demand is less than 5 kilowatts, may have the demand measured, instead of assessed, by written request that a demand meter be installed for a period of not less than one year.

**Power Factor:** Demands of 25 kilowatts or greater will be adjusted in accordance with the Rules and Regulations whenever the power factor of the Customer's load is found to be less than the standards therein specified.

**Minimum Demand:** The billing demand shall be not less than 40% of the greatest demand of any month of the preceding 11 months, nor less than the minimum value stated in a contract for service.

**Minimum Charge.**

The monthly minimum charge shall be the capacity charge for the billing demand for the month but not less than $1.50 for single-phase service nor $4.50 for polyphase service.

**Term of Contract.**

Annual.

**Payment Terms.**

Standard.

## Introductory Statement

Customers under the different rates of this TARIFF frequently desire services or present situations and conditions of supply which require special supply terms, charges or guarantees or which warrant modification of the amount or method of charge from the prices set forth in the rate under which they are supplied. Modifications for such conditions are defined by rider provisions included as a part of this TARIFF. Riders may be employed when applicable, with or without signed agreement between the Customer and the Company, as the case may require, notwithstanding anything to the contrary contained in the rate to which the rider is applied.

The application of rates provided in Supplement No. 8 to Tariff Electric-Pa. P. U. C. No. 23, filed November 18, 1970, to become effective January 18, 1971, which by order of the Pennsylvania Public Utility Commission dated January 15, 1971, at C. 19114 was suspended for a period of six months to July 18, 1971, and which by order of said Commission was further suspended for an additional three months to October 18, 1971, is hereby voluntarily postponed for an additional period to November 11, 1971. Meanwhile, presently effective rates named in Tariff Electric-Pa. P. U. C. No. 23 and supplements thereto, will continue in effect until otherwise amended.

## RATE R RESIDENCE SERVICE

SUSPENSION VACATED
EFFECTIVE NOV 1 7 1971

OFFICIALLY FILED TARIFF

**Availability.**

Single-phase electric service, in the PHILADELPHIA DIVISION, to the dwelling and appurtenances of a single private family for the domestic requirements of its members and also to service for related farm purposes when such service is supplied through one meter in conjunction with the farmhouse domestic requirements.

**Current Characteristics.**

Standard single-phase secondary service.

**Monthly Rate Table.** (I)(C)

| | | |
|---|---|---|
| $1.00 | minimum includes the first..... | 10 kwh |
| 6.3¢ | per kwh for the next..... | 35 " |
| 3.8¢ | " " " " " ..... | 45 " |
| 2.8¢ | " " " " " ..... | 210 " |
| 2.8¢ | " " " | all kwh over 300 per month during June through September; |
| 2.3¢ | " " " | all kwh over 300 per month during October through May. |

Air Quality Fuel Charge and
State Tax Adjustment Clause apply to this rate.

**Minimum Charge.**

$1.00 per month.

**Term of Contract.**

Annual.

**Payment Terms.**

Standard.

## RATE MLP MUNICIPAL LIGHT AND POWER

**Availability.**

Only to the CITY OF PHILADELPHIA, in lieu and to the exclusion of Rates GLP and GS, for electric service requirements of the municipality for purposes other than provided under Rate SL-P.

**Current Characteristics.**

Standard single-phase or polyphase secondary service.

SUSPENDED
TO: JUL 18 1971 OCT 18 1971
AT: C-1 9114
Ord. Postponed to NOV 11 1971
See Supp. #16
SUSPENSION VACATED
EFFECTIVE NOV 17 1971

**Monthly Rate Table.**

**October through May**
2.9¢ per kwh.

**June through September**
3.1¢ per kwh.

**Heating Modification.**

A. SINGLE METER.

Applicable where an area is heated solely by permanently connected electric resistance space heating installations, with a total capacity of not less than 15 kilowatts, which are acceptable to the Company and were in service prior to June 16, 1968.

During October through May the energy used for heating shall be determined for each of the billing months by multiplying the billing period degree-days by the estimated heating energy requirements per degree-day of the area to be heated as determined by a mutually acceptable formula.

The price for this energy use shall be 1.25¢ per kwh in lieu of the rate of 2.9¢ per kwh which will apply to the Customer's other use on the same service. (I)

This modification will be applied upon notification to the Company of qualifying installations. It shall be the responsibility of the Customer to notify the Company of any subsequent changes in the installation.

B. SEPARATE METERS.

Electricity supplying permanently connected resistance space heating installations or heating equipment sensitive to outdoor temperature with a total capacity of not less than 5 kilowatts, which are acceptable to the Company and are the sole source of heat for the application, will be measured by a separate meter, apart from his other requirements for electric service at the premises. Air conditioning equipment also may be supplied through this separate meter.

During October through May the usage of this separate circuit shall be billed at 1.25¢ per kwh in lieu of the rate of 2.9¢ per kwh. (I)

During June through September the combined usage shall be billed at 3.1¢ per kwh. (I)

**Air Quality Fuel Charge and State Tax Adjustment Clause apply to this rate.**

OFFICIALLY FILED TARIFF

OFFICIALLY FILED TARIFF

## STANDARD RIDERS—*Continued*

**Applicable to rates as indicated in Applicability Index of Riders, Page No. 52**

### NIGHT SERVICE HT RIDER

**Applicability.** To service supplied during off-peak hours for demands in excess of those supplied during on-peak hours where the Company is the exclusive source of service for the connected load so supplied. The demand specified for off-peak hours shall be limited to an amount determined by the Company which shall be dependent upon the capacity of the facilities available for such supply.

**Definition of Peak Hours.** ON-PEAK HOURS are defined as those hours between 7 a. m. and 7 p. m., Eastern Standard Time or Daylight Saving Time, whichever is in common use, daily except Saturdays and holidays.

OFF-PEAK HOURS are defined as the hours other than those specified as on-peak hours.

**Service Rate.** Rate HT, including all its terms and guarantees, is applicable to service supplied during on-peak hours. The capacity charge and blocking of the energy charge of said rate shall be based on the billing demand for on-peak hours except that, when the greatest demand during off-peak hours, as determined by measurement and adjusted for power factor, exceeds the demand specified for off-peak hours, the amount of such excess shall be added to the billing demand for on-peak hours and the resultant sum shall then constitute the basis for said capacity charge and blocking of the energy charge.

**Night Service Capacity Charge:** 80¢ per kw of off-peak billing demand per month. (I)

**State Tax Adjustment Clause** applies to this rider.

**Determination of Off-Peak Billing Demand.** The off-peak billing demand shall be the amount by which the greatest demand during off-peak hours, as determined by measurement and adjusted for power factor, exceeds the billing demand for on-peak hours, whether the latter is a minimum or an actual demand, except that, when said greatest demand during off-peak hours exceeds the demand specified for off-peak hours, said greatest off-peak demand shall be reduced by the amount of the excess in determining the off-peak billing demand. In no event shall the off-peak billing demand be less than 25% of the greatest off-peak billing demand determined during any month of the preceding 11 months.

**Other Riders.** Where the Off-Peak Rider and this rider are applied to the same contract, the Off-Peak Rider will be applied only to the provisions of the contract, and this rider will then be applied to the contract as modified. This rider will not be applied in conjunction with the Temporary Service Rider.

**Term.** Annual.

## LIST OF CHANGES MADE BY THIS TARIFF—*Continued*

### CHANGES—*Continued*

RATE GS. This is a new rate.

RATE PD. Availability is modified to make reference to 13 kv distribution voltage.

RATES FLP AND MLP. In each of these rates the availability is revised to include reference to Rate GS and to include reference to the Heating Modification for space heating service.

RATE PSL. The restriction provision of this rate is updated.

Definition of Terms. (PAGES 7 AND 8.)

connected load. This term is deleted; a description of connected load is added to Rate GLP.

holidays. Five holidays are added.

kv kilovolts. This term is added.

limited-period service. This term is deleted because it is obsolete.

service.

STANDARD POLYPHASE SECONDARY.

(c) Expanded to include reference to 3-phase distribution.

(d) New provision making reference to 277–480 volt service where 3-phase distribution is available.

(e) Formerly designated as (d). Limitation of service is changed to 150 kva.

STANDARD PR... The availability is modified.

STANDARD HIGH TENSION. The geographical limits for 13 kv supply are removed and provisions for 13 kv, 4-wire service are added.

SUSPENDED
TO: AUG 3 - 1969
AT: C-18640
SUSPENSION VACATED
EFFECTIVE AUG 3 - 1969

Rule 2.5. (PAGE 10.)

The availability of single-phase secondary service is extended to loads up to 150 kva.

RECEIVED
Penna. Public Utility Comm.
DEC 5, 1968

Rule 3.5. (PAGE 11.)

Provision (b) is revised for clarity.

Rule 6.5. (PAGE 14.)

Trailer park definition is changed from three to two locations.

Bureau of Rates and Research
TARIFF SECTION

Rule 11.2. (PAGE 17.)

Former Rule 11.2 Fixing of Demand is eliminated because, with the restriction of Rate GLP, it is no longer applicable. Because of this change, former Rule 11.3 is now numbered Rule 11.2.

Rule 13. (PAGE 18.)

Rule 13.4 Surge Protector is eliminated because it is no longer required. Because of this change, former Rules 13.5, 13.6, 13.7 and 13.8 are now numbered 13.4, 13.5, 13.6 and 13.7, respectively.

Rule 15. (PAGE 20.)

Rule 15.2—Former Rule 15.2 is eliminated and its provisions are covered by new Rule 15.2 which also includes the provisions of former Rule 15.9.

Rule 15.4—Reference to gaseous tube lighting is eliminated because this provision is not applied.

Rules 15.5, 15.6, 15.7 and 15.8—These rules are eliminated and their provisions are added to Rate GLP (Pages 30 and 31.)

Rule 17.3. (PAGE 22.)

The statement of applicable days concerning net-payment period is expanded to include additional holidays listed in the Definition of Terms.

OFFICIALLY FILED TARIFF

## RULES AND REGULATIONS—*Continued*

### 5. CREDIT

5.1 **Payment Obligation.** The supply of service for any purpose, at any location, is contingent upon payment of all charges provided for in this TARIFF as applicable to the location and the character of service.

5.2 **Prior Debts.** Service will not be furnished to former customers until any indebtedness to the Company for previous service has been satisfied.

5.3 **Guarantee of Payments.** Where an applicant's credit is not established, a deposit, or other guarantee, satisfactory to the Company, may be required as security for the payment of final bills and compliance with the Company's Rules and Regulations, before the Company will render service. Any Customer having secured the return of a deposit shall not be required to make a new deposit unless the service has been discontinued and the Customer's credit standing impaired through failure to comply with TARIFF provisions.

5.4 **Amount of Deposit.** The deposit shall be not less than $5 nor more than the estimated gross bill which would accrue for use of service at applicable rate or rates for any single billing period plus one month, such period not to exceed four months.

5.5 **Return of Deposit.** Deposits secured from a Residence Service Customer shall be returned when undisputed bills covering a period of 12 consecutive months shall have been paid within 30 days following presentation. If payment of any contested bill is withheld beyond the period herein mentioned and the dispute is terminated substantially in favor of the Customer, payment must have been made within 10 days thereafter. In cases of discontinuance of service, deposits will be returned in full upon payment of all service charges and guarantees or with deduction of unpaid accounts.

5.6 **Interest on Deposit.** The Company will allow simple interest at the rate of 6% per annum on cash deposits. Deposits shall cease to bear interest upon discontinuance of service.

# RATE RR RAILROAD SERVICE

**Availability.**

Only to railroad corporations for electric service for the operation of electrified railroad systems and appurtenances.

**Character and Amount of Electric Service.**

Service to be supplied hereunder will be single-phase alternating current at nominally twenty-five (25) cycles per second and at nominally 13,200 volts, except that service to the Customer's incidental requirements for signal system and other miscellaneous uses will be at such available frequency and voltage as may be established by the Company from time to time. The total amount of capacity initially to be made available shall not exceed 20,000 kilowatts. Additional capacity, if available, will be supplied upon reasonable advance written notice from the Customer.

**Monthly Rate Table.**

**Capacity Charge:**

$2.25 per kw of billing demand.

**Energy Charge:**

1.05¢ per kwh for the first 400 hrs. use of the billing demand
0.45¢ " " " " additional use. (D)

**Determination of Billing Demand.**

For each day in the month, there shall be selected the single clock-hour in which the kilowatt-hour draft by the Customer is the greatest. One-third of the aggregate number of kilowatt-hours drawn by the Customer during the highest three of the clock-hours so selected will constitute the Customer's maximum demand, in kilowatts, for such month.

The Customer shall maintain the power factor of his load as near unity as practicable and should the power factor of said load during any hour used in determining the maximum demand be found to be less than sixty-five (65) per cent, then the draft for that hour will be adjusted by multiplying it by the quotient obtained by dividing the actual power factor, expressed as a decimal, into 0.65.

The billing demand each month shall be the maximum demand for such month adjusted for power factor as specified above, except that in no case shall the billing demand in a month be less than 75% of the greatest adjusted maximum demand established during the preceding 12 months, nor less than 14,000 kilowatts.

**Minimum Charge.**

The minimum charge for each month shall be the energy charge applied to the kilowatt-hours obtained by multiplying 30% of the hours in the month by the billing demand for the month, plus the capacity charge for such billing demand.

**Delivery Point.**

The point of delivery for service rendered under this rate shall be the twenty-five (25) cycle, 13,200-volt bus bars at a frequency changer substation established by the Company, except that service to the Customer's incidental requirements for signal system and other miscellaneous uses at such substation may be at such other point as shall be acceptable to the Company.

**Receiving Equipment Responsibilities.**

Beyond the delivery point, the Customer shall own and bear the entire cost of necessary inspection, repair and maintenance of any transforming, switching, or other receiving equipment required.

**Termination of Service.**

Unless otherwise stated in a written Service Contract, service under this rate is terminable by the Company or the Customer upon not less than 60 days' written notice.

**Written Service Contract.**

At the Customer's election, service hereunder may be evidenced by a written Service Contract for an annual term and under such further detailed conditions of service supply as are not inconsistent with those stated in this rate or in the Rules and Regulations.

**Payment Terms.**

Each month, the Company will render a bill to the Customer covering the charges for the preceding calendar month and Customer shall pay such bill within 20 days after receipt thereof.

(D) Indicates decrease.

## STANDARD RIDERS—*Continued*

**Applicable to rates as indicated in Applicability Index of Riders, Page No. 46**

### NIGHT SERVICE HT RIDER

**Applicability.** To service supplied during off-peak hours for demands in excess of those supplied during on-peak hours where the Company is the exclusive source of service for the connected load so supplied. The demand specified for off-peak hours shall be limited to an amount determined by the Company which shall be dependent upon the capacity of the facilities available for such supply. (C)

**Definition of Peak Hours.** ON-PEAK HOURS are defined as those hours between 7 a. m. and 7 p. m., Eastern Standard Time or Daylight Saving Time, whichever is in common use, daily except Saturdays and holidays.

OFF-PEAK HOURS are defined as the hours other than those specified as on-peak hours.

**Service Rate.** Rate HT, including all its terms and guarantees, is applicable to service supplied during on-peak hours. The capacity charge and blocking of the energy charge of said rate shall be based on the billing demand for on-peak hours except that, when the greatest demand during off-peak hours, as determined by measurement and adjusted for power factor, exceeds the demand specified for off-peak hours, the amount of such excess shall be added to the billing demand for on-peak hours and the resultant sum shall then constitute the basis for said capacity charge and blocking of the energy charge.

**Night Service Capacity Charge:** 60¢ per kw of off-peak billing demand per month.

**Determination of Off-Peak Billing Demand.** The off-peak billing demand shall be the amount by which the greatest demand during off-peak hours, as determined by measurement and adjusted for power factor, exceeds the billing demand for on-peak hours, whether the latter is a minimum or an actual demand, except that, when said greatest demand during off-peak hours exceeds the demand specified for off-peak hours, said greatest off-peak demand shall be reduced by the amount of the excess in determining the off-peak billing demand. In no event shall the off-peak billing demand be less than 25% of the greatest off-peak billing demand determined during any month of the preceding 11 months.

**Other Riders.** Where the Off-Peak Rider and this rider are applied to the same contract, the Off-Peak Rider will be applied only to the provisions of the contract, and this rider will then be applied to the contract as modified. This rider will not be applied in conjunction with the Temporary Service Rider.

**Term.** Annual.

Issued by Supplement No. 9

## RATES AVAILABLE UNDER THIS TARIFF

**Rate R (Philadelphia Division) and Rate R-S (Suburban Divisions) Residence Service.** These rates are available to single-phase electric service to the dwelling and appurtenances of a single private family for the domestic requirements of its members and also to service for related farm purposes when such service is supplied through one meter in conjunction with the farmhouse domestic requirements.

"Residence Service," as employed herein, is not susceptible of particularizing all the uses embraced therein.

As illustrative only of its general meaning:

The term includes service to: (a) The separate dwelling-unit in an apartment house but not the halls, basement, or other portions of such building common to more than one such unit; (b) The premises occupied as the living-quarters of five persons or less who unite to establish a common dwelling-place for their own personal comfort and convenience on a cost-sharing basis; (c) The premises owned by a church, and primarily designated or set aside for, and actually occupied and used as, the dwelling-place of a priest, rabbi, pastor, rector, nun or other functioning Church Divine, and his or her resident associates; (d) Private dwellings in which space is occasionally used for the conduct of business by a person residing therein; (e) Farm purpose uses by an individual employing the natural processes of growth for the production of grain, stock, dairy, poultry, garden truck, or other agricultural products.

The term does NOT include service to: (a) Premises institutional in character including Clubs, Fraternities, Orphanages or Homes. (b) Premises defined as a rooming house or boarding house in the Municipal Code for Cities of the First Class enacted by Act of General Assembly; (c) The space in an apartment or other residential building primarily devoted to a professional or other office, studio, or other gainful pursuit; (d) Farms operated principally to sell, prepare, or process products produced by others; (e) Electric furnaces or welding apparatus other than a transformer type "limited input" arc welder with an input not to exceed 37½ amperes at 240 volts.

**Rate R-M Residence Service.** Single-phase electric service, in the entire territory of the Company, to a multiple-family building consisting of two to five dwelling units (whether occupied or not) for domestic requirements when such service is supplied through one meter. (C)

**Rate HS Heat-Storage Service.** Available only in conjunction with residence service under Rate GLP and Rates R and R-S, for any Customer receiving service at 120-240 volts, 3 wires, for the operation of heat-storage equipment of a type approved by the Company, when the demand or load of the heat-storage installation does not exceed the Customer's demand for service to his other residence load and where the supply of service is confined to a single connection, separately metered.

**Rate R-H Residential Heating Service.** Single-phase electric service to the dwelling and appurtenances of a single private family for the domestic requirements of its members where electricity is the primary source of energy regularly used for permanently connected space heating installations which meet the Company's requirements. This rate schedule is not available for commercial, institutional or industrial establishments.

**Rate GLP General Light and Power** is defined as the supply of electric service through a single metering installation for general lighting and/or power requirements of offices, professional, commercial or industrial establishments, and other applications outside the scope of the Residence Service Rates; Residence Service, when used through the same meter and in conjunction with General Light and Power Service, will be supplied under this rate unless the Customer so separates and arranges his wiring that domestic use can be separately metered and makes a separate contract for other service.

**Rate PD Primary-Distribution Power.** Untransformed electric service from the primary supply lines of the Company's distribution system where the Customer installs, owns, and maintains any transforming, switching and other receiving equipment required.

**Rate HT High-Tension Power.** Untransformed electric service from the Company's high-tension transmission lines, where the Customer installs, owns, and maintains, any transforming, switching and other receiving equipment required.

## RULES AND REGULATIONS—*Continued*

### 17. STANDARD PAYMENT TERMS

**17.1 Billing Period.** Billing for service will be based upon the amount of use and the time interval of its supply, and rate values stated for direct application only to monthly supply periods will be adjusted when the regular meter readings are taken at other than monthly intervals or when the time elapsed between readings is substantially greater or less than a month.

**17.2 Billing Plan.** Unless otherwise stipulated, the rate schedules set forth herein state net prices. Standard bills will show a net amount, and a gross amount in which the cost of service currently billed is increased by 3 per cent. The difference between the gross and net amounts will be allowed as a deduction for prompt payment. (C)

**17.3 Net-Payment Period.** Bills are due upon presentation, and payment may be made at any commercial office of the Company or authorized payment agency. The net rates are contingent upon prompt payment. The final date for payment of the net amount will not fall on a Saturday, or a holiday as defined in Definition of Terms, or on Washington's Birthday, Good Friday, Columbus Day and Veterans Day, and will be at least 10 days after day of presentation, except on accounts with the United States of America or the Commonwealth of Pennsylvania or any of their departments or institutions, for which 30 days will be allowed. The business day next following the final date shown on the bill for net payment will be allowed as a day of grace for delivery of payments. Failure to receive bill will not excuse customers from payment obligations, and payments must be made without regard to any counterclaims whatsoever.

**17.4 Gross Payments.** Where the payment terms are stipulated as Standard under a rate schedule set forth herein, the gross amount stipulated on the bill becomes due on the expiration of the net-payment period. The Company may waive the collection of the gross amount on an overdue bill provided that not more than one other such waiver has been made on bills of the preceding 11 months.

**17.5 Payment by Mail.** Mailed remittances for the net amount of a bill received after the day of grace will be accepted by the Company as a tender of payment within the net-payment period if the enclosing envelope bears United States Post Office date-stamp of the day of grace which is allowed for delivery of payments, or any date prior thereto.

OFFICIALLY FILED TARIFF

# RATE GLP GENERAL LIGHT AND POWER

**Availability.**

Electric service through a single metering installation for general lighting and/or power requirements of offices, professional, commercial or industrial establishments, and other applications outside the scope of the Residence Service Rates.

**Current Characteristics.**

Standard single-phase or polyphase secondary service.

CANCELLED
2 Revised Page No. 30
EFFECTIVE 1-3-1966

**Monthly Rate Table.**

**Capacity Charge Prices:** Per kw of billing demand:

$1.50 per kw for the first..... 5 kw
1.20 " " " " next..... 10 "
1.00 " " " " excess over 15 "

Includes first 16 hrs. use of billing demand.

**Energy Charge Prices:** Per kwh:

4.4¢ per kwh for the next 64 hrs. use of billing demand but not less than 100 kwh
1.4¢ " " " " " 70 " " " " " " " " " 105 "
1.0¢ " " " " " 250 " " " " " " " " " 380 "
0.8¢ " " " " additional use.

**Minimum Earned Rate:** 2.0¢ per kwh, applicable only to customers whose assessed demands include one or more residence units.

**Determination of Demand.**

The billing demand, which shall never be less than 1 kilowatt, shall be determined by measurement or by assessment, computed to the nearest 0.1 of a kilowatt when assessed and taken at the value indicated by the demand meter when measured, subject to the following provisions:

**Assessed Demand:** The assessed demand shall be taken at the percentages of connected load specified in the Rules and Regulations.

**Measured Demand:** Demands which, by the assessment formula, are 5 kilowatts or more are to be determined by measurement. Determination of demand by measurement shall continue for a period of not less than 11 months following any month in which the billing demand was 5 kilowatts or more. Any Customer, whose assessed demand is less than 5 kilowatts, may have the demand measured, instead of assessed, by written request that a demand meter be installed for a period of not less than one year.

**Power Factor:** Demands of 25 kilowatts or greater will be adjusted in accordance with the Rules and Regulations whenever the power factor of the Customer's load is found to be less than the standards therein specified. (D)

**Minimum Demand:** The billing demand shall be not less than 40% of the greatest demand of any month of the preceding 11 months, nor less than the minimum value stated in a contract for service.

**Minimum Charge.**

The monthly minimum charge shall be the capacity charge for the billing demand for the month, but not less than $1.50 for single-phase service nor $4.50 for polyphase service.

**Term of Contract.**

Annual.

**Payment Terms.**

Standard.

(C) ## APPLICABILITY INDEX OF RIDERS

### Introductory Statement

Customers under the different rates of this TARIFF frequently desire services or present situations and conditions of supply which require special supply terms, charges or guarantees or which warrant modification of the amount or method of charge from the prices set forth in the rate under which they are supplied. Modifications for such conditions are defined by rider provisions included as a part of this TARIFF. Riders may be employed when applicable, with or without signed agreement between the Customer and the Company as the case may require, notwithstanding anything to the contrary contained in the rate to which the rider is applied.

# RATE POL PRIVATE OUTDOOR LIGHTING

**Availability.**

Outdoor lighting of sidewalks, driveways, yards, lots and similar places, outside the scope of service under Rates SL-P and SL-S, by mercury vapor lamps of the sizes hereinafter specified.

**Monthly Rate Table.** (I)

Based on nominal rating of mercury vapor lamp sizes.

| Size of Lamp | Price per Lighting Unit: Lighting Unit Attached to Company's Pole | Price per Lighting Unit: Lighting Unit Attached to Customer's Pole |
|---|---|---|
| 100 Watts (nominally 4,000 Lumens) | $ 5.20 | $4.65 |
| 175 " ( " 8,000 " ) | 6.90 | 6.35 |
| 250 " ( " 12,000 " ) | 8.40 | 7.85 |
| 400 " ( " 20,000 " ) | 10.25 | 9.70 |

Air Quality Fuel Charge and State Tax Adjustment Clause apply to this rate.

NOTICE

*This page of the Tariff never went into effect.*

**General Provisions.**

1. Lighting Unit. A Lighting Unit shall be comprised of a bracket, the lead wires and a luminaire, including lamp, reactor and control.

2. Installations. In connection with the service provided herein, the Company will install, own and maintain all facilities on the highway, all standard service-supply lines and all Lighting Units. The Customer will install, own and maintain all poles on his property and all service extensions on his property from the Company's standard service-supply lines.

Investment by the Company in standard lighting installations under standard conditions of supply will be limited to that warranted by the revenue in prospect, any additional investment to be assumed by the Customer.

Standard supply to lighting installations will be from aerial wires, except that, at the option of the Company, in areas where its other distribution facilities are underground, supply may be underground.

For underground supply furnished at the request of the Customer where aerial supply would be normal, or for other than standard installations made at the request of the Customer and of a type approved by the Company, the Company will assume the cost up to the amount it would normally have invested and the additional cost shall be assumed by the Customer.

3. Location and Authorization. Lighting Units shall be installed at locations and upon poles approved by the Company and in positions permitting servicing from a ladder truck. Customer construction shall meet the Company's standards which are based upon the National Electrical Code.

The Customer shall obtain and submit any permits or other authority requisite to the installation and operation of the Lighting Units served hereunder.

4. Service. Each lamp shall be individually controlled by a photoelectric cell which shall operate to energize the lamp during periods of darkness and to de-energize it during other periods. The service shall include the supply of lamps and their renewal when burned out. Renewal of lamps will be made only during regular daytime working hours after notification by the Customer of the necessity therefor.

5. Outage Allowances. Written notice to the Company prior to 4 p. m. of the failure of any light to burn on the previous night shall entitle the Customer to a pro rata reduction in the charges under this rate for the hours of failure if such failure continues for a period in excess of 24 hours after the notice is received. Allowances will not be made for outages resulting from riot, fire, storm, flood, interference by civil or military authorities, or any other cause beyond the Company's control.

SUSPENSION VACATED
EFFECTIVE NOV 17 1971

**Contract Term.**

For each Lighting Unit, an initial term of three years and thereafter from year to year.

## STANDARD RIDERS—*Continued*

**Applicable to rates as indicated in Applicability Index of Riders, Page No. 52.**

### NIGHT SERVICE PD RIDER

**Applicability.** To service supplied during off-peak hours for demands in excess of those supplied during on-peak hours where the Company is the exclusive source of service for the connected load so supplied and where the demand specified for off-peak hours shall be limited to an amount designated by the Company which in no event shall be greater than 1,200 kilowatts.

**Definition of Peak Hours.** ON-PEAK HOURS are defined as those hours between 7 a. m. and 7 p. m., Eastern Standard Time or Daylight Saving Time, whichever is in common use, daily except Saturdays and holidays.

OFF-PEAK HOURS are defined as the hours other than those specified as on-peak hours.

**Service Rate.** Rate PD, including all its terms and guarantees, is applicable to service supplied during on-peak hours. The capacity charge and blocking of the energy charge of said rate shall be based on the billing demand for on-peak hours except that, when the greatest demand during off-peak hours, as determined by measurement and adjusted for power factor, exceeds the demand specified for off-peak hours, the amount of such excess shall be added to the billing demand for on-peak hours and the resultant sum shall then constitute the basis for said capacity charge and blocking of the energy charge.

**Night Service Capacity Charge:** 95¢ per kw of off-peak billing demand per month. (I)

**State Tax Adjustment Clause** applies to this rider.

**Determination of Off-Peak Billing Demand.** The off-peak billing demand shall be the amount by which the greatest demand during off-peak hours, as determined by measurement and adjusted for power factor, exceeds the billing demand for on-peak hours, whether the latter is a minimum or an actual demand, except that, when said greatest demand during off-peak hours exceeds the demand specified for off-peak hours, said greatest off-peak demand shall be reduced by the amount of the excess in determining the off-peak billing demand. In no event shall the off-peak billing demand be less than 25% of the greatest off-peak billing demand determined during any month of the preceding 11 months.

**Other Riders.** Where the Off-Peak Rider and this rider are applied to the same contract, the Off-Peak Rider will be applied only to the provisions of the contract, and this rider will then be applied to the contract as modified. This rider will not be applied in conjunction with the Temporary Service Rider.

**Term.** Annual.

## LIST OF CHANGES MADE BY THIS TARIFF—*Continued*

### CHANGES—*Continued*

**Applicability Index of Riders.** (PAGE 52.)

AUXILIARY OR READINESS-TO-SERVE RIDER. This new rider supersedes the former Emergency or Auxiliary Rider; its applicability is extended to Rates R, R-S, R-M, R-H, GLP, GS, PD, HT, FLP and MLP.

TRAFFIC SIGNAL AND ALLEY LIGHTING RIDER. This rider replaces the former Alley-Lighting and Traffic-Signal Rider; only the title is changed.

FARM SERVICE RIDER. The restriction provision of this rider in the footnote is updated.

RATE GS is added to this index and the applicability of the following riders is indicated: Auxiliary, Casualty, Extension Guarantee, Investment Return Guarantee, Receivership and Temporary Service.

**Extension Guarantee Rider.** (PAGE 56.)

The Rate and Minimum Guarantees provision is changed to make reference to Rate WH.

**Farm Service Rider.** (PAGE 57.)

The restriction provision of this rider is updated.

**Temporary Service Rider.** (PAGE 62.)

The Investment in Supply Facilities provision is revised to reflect current practice and the Minimum Terms provision is extended to Rate GS.

## RULES AND REGULATIONS—*Continued*

### 6. PRIVATE-PROPERTY CONSTRUCTION

6.1 **Company's Service-Supply Lines.** Where the Company has supply facilities of adequate capacity on the highway or in other trunk line location adjacent to the premises to be served, it will provide, own and maintain standard service-supply lines for a new connection or a change in connection or for a change in contract as follows: (a) a single span of open wire construction to the first suitable support of the Customer, nominally 100 feet inside the property line of the Customer. The Customer's support shall be so located that the service span will be free of obstruction, and adequately supported as required by the size and weight of the conductors; (b) overhead or underground cable construction to a point approximately 18 inches inside the property line of the Customer. In new residential subdivisions of five or more lots, or to new apartment buildings containing at least five apartments, underground cable construction will be extended to a meter location or connection box located at the building or buildings, as designated by the Company and in accordance with Rule 7.3. (C)

6.2 **Service-Supply Alterations.** Changes in location of service-supply lines or meters, for the accommodation of the Customer, shall be at the expense of the Customer.

6.3 **Customer's Service Extension.** The Customer shall provide, own and maintain the service extension from the Company's service-supply lines to his receiving equipment.

6.4 **Meters and Transformers.** The Company will provide, own and maintain any meter or meters, and also the transformer or transformers, required in the supply of service of the current characteristics specified by the rate or rider under which the supply is made. The supply of transformers by the Company shall be limited to those required for a single standard transformation.

6.5 **Trailer Parks.** Where it is established by plans, development, use or other facts that the operation of a trailer park is predominantly to provide rental locations for non-transient trailers, with not less than two ~~nor more than four~~ such locations, the Company, upon written application of the trailer park operator and upon the receipt of an enabling agreement and of adequate rights-of-way, will construct, own and operate within the trailer park specified aerial distribution facilities for separate supply and metering by the Company for each trailer's use of electric energy, the trailer park operator being liable for payment for service to trailer park tenants not contracting in writing for service in their own names. The Company's obligation to install or extend such distribution facilities within the trailer park is limited to the investment warranted by the anticipated revenue. Alterations of such distribution facilities at the request of the park operator when not for the purpose of serving additional trailer rental locations will be at the cost of the trailer park operator. A trailer park operator desiring underground distribution facilities within a trailer park consisting of less than five locations must bear the excess cost incident thereto. Specifications and terms for such underground construction will be furnished by the Company on request. In new trailer parks consisting of five or more locations, underground distribution facilities will be extended in accordance with Rule 7.3. (C) (C)

OFFICIALLY FILED

## RATE T TRACTION SERVICE (C) (I)

**Availability.**

To any corporation or authority for electric service for the operation of electrified street railway systems and appurtenances.

**Character of Electric Service.**

Service supplied hereunder will be standard high-tension service, except that a limited portion of the total capacity made available may be non-standard three-phase alternating current at nominally 25 cycles and at nominally 13,200 volts. The non-standard 25-cycle service is in the process of elimination and is restricted to locations receiving supply at 25 cycles as of January 1, 1966. The amount of 25-cycle supply will not be increased at any such location, and the Company may require the Customer to reduce or eliminate his requirements for 25-cycle supply upon not less than 6 months' written notice.

**Monthly Rate Table.**

**Capacity Charge Prices:** Per kw of billing demand:

$1.80 per kw for the first 20,000 kw
$1.50 per kw for the excess over 20,000 kw

**Energy Charge Prices:** Per kwh:

0.70¢ per kwh for the first 400 hrs. use of the billing demand
0.45¢ per kwh for the additional use.

**Determination of Billing Demand.**

For each day in the month, there will be selected the single clock-hour during which the sum of the kilowatt-hours drawn by the Customer at all the metering points is the greatest. One-third of the aggregate number of kilowatt-hours drawn during the highest three of the clock-hours so selected will constitute the Customer's maximum demand, in kilowatts, for such month.

The Customer shall maintain the power factor of his load as near unity as practicable, and should the combined power factor of said load during any hour used in determining the maximum demand be found to be less than 98%, then the draft for that hour will be adjusted by multiplying it by the quotient obtained by dividing the actual combined power factor, expressed as a decimal, into 0.98.

The billing demand each month shall be the maximum demand for such month adjusted for power factor as specified above, except that in no case shall the billing demand be less than 40% of the maximum capacity which the Company makes available.

## STANDARD RIDERS—*Continued*

**Applicable to rates as indicated in Applicability Index of Riders, Page No. 46**

### NIGHT SERVICE PD RIDER

**Applicability.** To service supplied during off-peak hours for demands in excess of those supplied during on-peak hours where the Company is the exclusive source of service for the connected load so supplied and where the demand specified for off-peak hours shall be limited to an amount designated by the Company which in no event shall be greater than 1,200 kilowatts.

**Definition of Peak Hours.** On-Peak hours are defined as those hours between 7 a. m. and 7 p. m., Eastern Standard Time or Daylight Saving Time, whichever is in common use, daily except Saturdays and holidays. (D)

Off-Peak hours are defined as the hours other than those specified as on-peak hours.

**Service Rate.** Rate PD, including all its terms and guarantees, is applicable to service supplied during on-peak hours. The capacity charge and blocking of the energy charge of said rate shall be based on the billing demand for on-peak hours except that, when the greatest demand during off-peak hours, as determined by measurement and adjusted for power factor, exceeds the demand specified for off-peak hours, the amount of such excess shall be added to the billing demand for on-peak hours and the resultant sum shall then constitute the basis for said capacity charge and blocking of the energy charge.

**Night Service Capacity Charge:** 70¢ per kw of off-peak billing demand per month.

**Determination of Off-Peak Billing Demand.** The off-peak billing demand shall be the amount by which the greatest demand during off-peak hours, as determined by measurement and adjusted for power factor, exceeds the billing demand for on-peak hours, whether the latter is a minimum or an actual demand, except that, when said greatest demand during off-peak hours exceeds the demand specified for off-peak hours, said greatest off-peak demand shall be reduced by the amount of the excess in determining the off-peak billing demand. In no event shall the off-peak billing demand be less than 25% of the greatest off-peak billing demand determined during any month of the preceding 11 months.

**Other Riders.** Where the Off-Peak Rider and this rider are applied to the same contract, the Off-Peak Rider will be applied only to the provisions of the contract, and this rider will then be applied to the contract as modified. This rider will not be applied in conjunction with the Temporary Service Rider.

## LIST OF CHANGES MADE BY THIS SUPPLEMENT

### DECREASES

**Night Service F-D Rider.** (1ST REV. PAGE 55.)

In the definition of peak hours, the on-peak hours are changed from 7 a.m. and 9 p.m. to 7 a.m. and 7 p.m., resulting in decreases.

### CHANGES

CANCELLED by 9th Revised Page No. 2 EFFECTIVE MAR 26 1968

**Title Page.**

EASTERN DIVISION.

Second-Class Township of Lower Salford, Montgomery County—added.

WESTERN DIVISION.

Address of Division Office changed to 175 N. Caln Road;
Second-Class Township of West Nantmeal, Chester County—added;
Second-Class Townships of Chanceford and Fawn, both in York County—added.

**Rates Available Under This Tariff.** (4TH REV. PAGE 5.)

RATE R-H RESIDENTIAL HEATING SERVICE. The availability statement is changed to extend the availability of this rate to multiple dwelling-unit buildings consisting of two to five dwelling units.

**Rate R-H Residential Heating Service.** (1ST REV. PAGE 29A.)

The availability statement is changed to extend the availability of this rate to multiple dwelling-unit buildings consisting of two to five dwelling units and the phrase "per dwelling unit" is added to the second and third blocks of the monthly rate table.

The heat pump provision in the monthly rate table is reworded for clarity.

# LIST OF CHANGES MADE BY THIS SUPPLEMENT

## DECREASES

**Rate R-H Residential Heating Service.** (ORIGINAL PAGE 29A.)

This is a new rate for residential service which includes house heating.

**Electric House-Heating Rider.** (1ST REV. PAGE 48; 3RD REV. PAGE 49.)

This rider is withdrawn. Customers presently served under its provisions will be transferred to new Rate R-H, resulting in decreases.

**Rate SL-P Street Lighting in City of Philadelphia.** (1ST REV. PAGE 30.)

The pricings in the Monthly Rate Table are changed, resulting in a decrease.

## CHANGES

**Title Page.**

Second-Class Township of Marple in Delaware County is changed to First-Class Township.

**Rates Available Under This Tariff.** (1ST REV. PAGE 5; 1ST REV. PAGE 6.)

RATES R AND R-S. The restriction regarding use of service for the main or principal source of heat supply is removed.

RATE HS. The availability of this rate only in conjunction with residence service under Rate GLP and Rates R and R-S is specifically indicated.

RATE R-H. The availability of this new rate is added.

RATE POL. The availability of this rate is added.

Rearrangement of Pages 5 and 6 is required by the addition of the availability statement of new Rate R-H.

**Rate R Residence Service.** (2ND REV. PAGE 27.)

**Rate R-S Residence Service.** (2ND REV. PAGE 28.)

The restriction regarding use of service for the main or principal source of heat supply is removed.

**Rate HS Heat-Storage Service.** (1ST REV. PAGE 29.)

The availability statement is reworded to indicate that this rate is available only in conjunction with residence service under Rate GLP and Rates R and R-S.

**Applicability Index of Riders.** (1ST REV. PAGE 46.)

Electric House-Heating Rider and Rate HS are removed from the table, Rate R-H is added to the table and the applicability to this rate of the following riders is indicated: Casualty, Extension Guarantee, Receivership and Temporary Service.

**Standard Riders.** (1ST REV. PAGE 47; 1ST REV. PAGE 48; 3RD REV. PAGE 49.)

Casualty Rider is moved from Page 47 to Page 48.

Construction Rider is moved from Page 48 to Page 49.

Electric House-Heating Rider is withdrawn and is removed from Pages 48 and 49; thus, the riders have been rearranged on Pages 47, 48 and 49.

## RATES AVA[illegible] THIS TARIFF

**Rate R** (PHILADELPHIA DIVISION) and **Rate RS** (SUBURBAN DIVISIONS) **Residence Service.** These rates are available to single-phase electric service to the dwelling and appurtenances of a single private family for the domestic requirements of its members and also to service for related farm purposes when such service is supplied through one meter in conjunction with the farmhouse domestic requirements. (C)

"Residence Service," as employed herein, is not susceptible of particularizing all the uses embraced therein.

As illustrative only of its general meaning:

The term includes service to: (a) The separate living-unit in an apartment house, but not the halls, basement, or other portions of such building common to more than one such unit; (b) The premises occupied as the living-quarters of five persons or less who unite to establish a common dwelling-place for their own personal comfort and convenience on a cost-sharing basis; (c) The premises owned by a church, and primarily designated or set aside for, and actually occupied and used as, the dwelling-place of a priest, rabbi, pastor, rector, nun or other functioning Church Divine, and his or her resident associates; (d) Private dwellings in which space is occasionally used for the conduct of business by a person residing therein; (e) Farm purpose uses by an individual employing the natural processes of growth for the production of grain, stock, dairy, poultry, garden truck, or other agricultural products.

The term does NOT include service to: (a) Premises institutional in character including Clubs, Fraternities, Orphanages or Homes; (b) Premises defined as a rooming house or boarding house in the Municipal Code for Cities of the First Class enacted by Act of General Assembly; (c) The space in an apartment or other residential building primarily devoted to a professional or other office, studio, or other gainful pursuit; (d) Farms operated principally to sell, prepare, or process products produced by others; (e) Electric furnaces or welding apparatus other than a transformer of "limited input" are welder with an input not to exceed 37½ amperes at 240 volts.

**Rate HS Heat-Storage Service.** Available only in conjunction with residence service under Rate GLP and Rates R and R-S, for any Customer receiving service at 120-240 volts, 3 wires, for the operation of heat-storage equipment of a type approved by the Company, when the demand or load of the heat-storage installation does not exceed the Customer's demand for service to his other residence load and where the supply of service is confined to a single connection, separately metered. (C)

**Rate R-H Residential Heating Service.** Single-phase electric service to the dwelling and appurtenances of a single private family for the domestic requirements of its members where electricity is the primary source of energy regularly used for permanently connected space heating installations which meet the Company's requirements. This rate schedule is not available for commercial, institutional or industrial establishments. (C)

**Rate GLP General Light and Power** is defined as the supply of electric service through a single metering installation for general lighting and/or power requirements of offices, professional, commercial or industrial establishments, and other applications outside the scope of the Residence Service Rates; Residence Service, when used through the same meter and in conjunction with General Light and Power Service, will be supplied under this rate unless the Customer so separates and arranges his wiring that domestic use can be separately metered and makes a separate contract for other service.

**Rate PD Primary-Distribution Power.** Untransformed electric service from the primary supply lines of the Company's distribution system where the Customer installs, owns, and maintains, any transforming, switching and other receiving equipment required.

**Rate HT High-Tension Power.** Untransformed electric service from the Company's high-tension transmission lines, where the Customer installs, owns, and maintains, any transforming, switching and other receiving equipment required.

## RULES AND REGULATIONS—*Continued*

### (C) 17. STANDARD PAYMENT TERMS

**17.1 Billing Period.** Billing for service will be based upon the amount of use and the time interval of its supply, and rate values stated for direct application only to monthly supply periods will be adjusted when the regular meter readings are taken at other than monthly intervals or when the time elapsed between readings is substantially greater or less than a month.

**17.2 Billing Plan.** Unless otherwise stipulated, the rate schedules set forth herein state net prices. Standard bills will show the net amount and a gross amount 3% greater than the net amount. The difference between the gross and net amounts will be allowed as a deduction for prompt payment.

(C) **17.3 Net-Payment Period.** Bills are due upon presentation, and payment may be made at any commercial office of the Company or authorized payment agency. The net rates are contingent upon prompt payment. The final date for payment of the net amount will not fall on a Saturday, or a holiday as defined in Definition of Terms, or on Washington's Birthday, Good Friday, Columbus Day and Veterans Day, and will be at least 10 days after day of presentation, except on accounts with the United States of America or the Commonwealth of Pennsylvania or any of their departments or institutions, for which 30 days will be allowed. The business day next following the final date shown on the bill for net payment will be allowed as a day of grace for delivery of payments. Failure to receive bill will not excuse customers from payment obligations, and payments must be made without regard to any counterclaims whatsoever.

**17.4 Gross Payments.** Where the payment terms are stipulated as Standard under a rate schedule set forth herein, the gross amount stipulated on the bill becomes due on the expiration of the net-payment period. The Company may waive the collection of the gross amount on an overdue bill provided that not more than one other such waiver has been made on bills of the preceding 11 months.

**17.5 Payment by Mail.** Mailed remittances for the net amount of a bill received after the day of grace will be accepted by the Company as a tender of payment within the net-payment period if the enclosing envelope bears United States Post Office date-stamp of the day of grace which is allowed for delivery of payments, or any date prior thereto.

# RATE GLP GENERAL LIGHT AND POWER

**Availability.**

Electric service through a single metering installation for general lighting and/or power requirements of offices, professional, commercial or industrial establishments, and other applications outside the scope of the [illegible] Service Rates.

**Current Characteristics.**

Standard single-phase or polyphase secondary service.

CANCELLED by 2 Revised Page No. 30 EFFECTIVE AUG 3 - 1966

**Monthly Rate Table.**

**Capacity Charge Prices:** Per kw of billing demand:

| | | |
|---|---|---|
| $1.50 per kw | for the first | 5 kw |
| 1.20 " | " next | 10 " |
| 1.00 " | " excess over | 15 " |

Includes first 10 hrs. use of billing demand.

**Energy Charge Prices:** Per kwh:

| | | |
|---|---|---|
| 4.4¢ per kwh | for the next | 64 hrs. use of billing demand but not less than 100 kwh |
| 1.4¢ " | " " | 70 " " " " " " " " 105 " |
| 1.0¢ " | " " | 250 " " " " " " " " 380 " |
| 0.8¢ " | " " | additional use. |

**Minimum Earned Rate:** 2.0¢ per kwh, applicable only to customers whose assessed demands include one or more residence units.

**Determination of Demand.**

The billing demand, which shall never be less than 1 kilowatt, shall be determined by measurement or by assessment, computed to the nearest 0.1 of a kilowatt when assessed and taken at the value indicated by the demand meter when measured, subject to the following provisions:

**Assessed Demand:** The assessed demand shall be taken at the percentages of connected load specified in the Rules and Regulations.

**Measured Demand:** Demands which, by the assessment formula, are 5 kilowatts or more, are to be determined by measurement. Determination of demand by measurement shall continue for a period of not less than 11 months following any month in which the billing demand was 5 kilowatts or more. Any Customer, whose assessed demand is less than 5 kilowatts, may have the demand measured, instead of assessed, by written request that a demand meter be installed for a period of not less than one year.

**Power Factor:** Demands of 25 kilowatts or greater will be adjusted in accordance with the Rules and Regulations whenever the power factor of the Customer's load is found to be less than the standards therein specified. (D)

**Minimum Demand:** The billing demand shall be not less than 40% of the greatest demand of any month of the preceding 11 months, nor less than the minimum value stated in a contract for service.

**Minimum Charge.**

The monthly minimum charge shall be the capacity charge for the billing demand for the month, but not less than $1.50 for single-phase service nor $4.50 for polyphase service.

**Term of Contract.**

Annual.

**Payment Terms.**

Standard.

STANDARD RIDERS

Applicable to rates as indicated in Applicability Index of Riders, Page No. 46

## ALLEY-LIGHTING AND TRAFFIC-SIGNAL RIDER

**Applicability.** To multiple, unmetered lighting service supplied the City of Philadelphia to operate incandescent lamps and appurtenances installed, owned and maintained by the City, which assumes the cost involved in making the connections to the Company's facilities.

**Service Defined.** All-night outdoor lighting of alleys and courts by incandescent lights installed on poles or supports supplied by the City, and/or operation of traffic signals erected either upon existing poles of the Company or upon poles or supports supplied by the City.

**Notice to Company.** The City shall give advance notice to the Company of all proposed new installations or of the replacement or reconstruction of existing installations. The City shall advise the Company as to each new installation or any change in the equipment or connected load of an existing installation, including any change in burning hours and the date on which such new or changed operation took effect.

**Charge.** 1.9¢ per kwh.

**Plan of Monthly Billing.** Bills may be rendered in equal monthly installments, computed from the calculated annual use of energy, adjusted each month to give effect to any new or changed rate of annual use, by reason of changes in the City's installation, with charge or credit for fractional parts of the month during which a change occurred.

**Liability Provision.** The Company shall not be liable for damage, or for claims for damage, to persons or property, arising, accruing or resulting from installation, location or use of lamps, wires, fixtures and appurtenances; or resulting from failure of any light, or lights, to burn for any cause whatsoever.

**Term.** Annual contract.

## CASUALTY RIDER

**Applicability.** To service delivered during a period when a Customer is prevented for a length of time in excess of 48 hours from using all or a substantial part of the amount contracted for by reason of strike, riot, fire, storm, flood, drought, interference by civil or military authorities, or any other cause beyond his control.

**Notice Required.** Written request shall be made to the Company for the application of this rider with advice as to the extent of the interruption, its date, cause and probable duration.

**Guarantees Waived.** Guarantees of revenue under the Customer's contract shall be suspended during the period of the interruption, but shall be restored when the cause of interruption shall cease, be removed or remedied.

**Bills Prorated.** Bills for service supplied shall be prorated, based upon the actual level of operation during the period of suspension of guarantees.

**Return to Normal Use.** The Customer shall use reasonable diligence in resuming the use of service provided in his contract.

**Term.** The contract term shall be extended for a period equal to the period of suspension so that the Company shall secure a working term at full connected load equal to the term of the contract.

PENNSYLVANIA PUBLIC UTILITY COMMISSION

In re: Implementation of Presidential Executive Order No. 11615 providing for stabilization of prices, rents, wages and salaries.

ORDER

BY THE COMMISSION, AUGUST 23, 1971:

Pursuant to Executive Order No. 11615 of the President of the United States issued August 15, 1971, all rate changes filed with this Commission and due to become effective after August 14, 1971 shall not become effective until and unless otherwise authorized by the Commission; provided, that a change consisting entirely of decreases in rates may be made effective unless otherwise ordered by this Commission. No fuel cost adjustment, purchased gas cost adjustment, or State tax adjustment shall be changed from the amount thereof in effect August 14, 1971, until further authorization of this Commission.

Every public utility affected by this order shall attach a copy thereof to its tariff and shall not be required to submit a supplement or other document to accomplish the purposes of this order. Transportation utilities, in lieu of such attachment, may use as their authority Special Permission Number 27616 dated August 16, 1971 to file the necessary postponing supplements.

This order shall be published in the Pennsylvania Bulletin forthwith.

PENNSYLVANIA PUBLIC UTILITY COMMISSION

(signed) George I. Bloom

Chairman

## RATE PSL PRIVATE STREET LIGHTING

**Availability.**

This rate is in process of elimination and is restricted to lamps in service on January 18, 1971. (C)

**Rate Table.** (I)

The Customer pays the cost of installation and pays for service in accordance with the following schedule for each lamp connected to the Company's lines:

| Size of Lamp Manufacturer's Rating | Price Per Lamp Per Annum |
|---|---|
| 2,500 lumens | $ 73.28 |
| 4,000 " | 92.88 |
| 6,000 " | 109.56 |
| 10,000 " | 124.80 |

Air Quality Fuel Charge and
State Tax Adjustment Clause apply to this rate.

**Special Terms and Conditions.**

Series-incandescent lighting adjacent to, or on a Customer's property but not in, or attached to, any building, and only for premises adjacent to the Company's series-incandescent circuits will be furnished in Philadelphia Division in accordance with the lighting schedule established for municipal street lighting.

Lamps, wires, fixtures, and appurtenances, are installed at the Customer's expense, but remain the property of the Company, and will be adjusted, maintained, operated, and repaired by it as part of the service cost. The Company shall not be liable for damage, or for claims for damage, to person or property, arising, accruing, or resulting from, installation, location, or use, of lamps, wires, fixtures, and appurtenances; or resulting from failure of any light, or lights, to burn, for any cause, beyond or other than the rental of said light, or lights, for the actual period of such failure. Claims for deductions for failure to burn must be made in writing the day after such failure.

The Customer shall permit any accredited employee of the Company to have access to the premises for adjusting, maintaining, and repairing service; the Customer shall be responsible for the safekeeping of the installation (damage by fire excepted) and for preventing meddling or interference with the same.
