STANDARD RIDERS—*Continued*

Applicable to rates as indicated in Applicability Index of Riders, Page No. 41

INVESTMENT RETURN GUARANTEE RIDER

Applicability. To contracts which require investment in supply facilities greater than warranted by the revenue assured by the minimum of the rate under which service is supplied.

Cost of Extension. The cost of the extension of supply facilities, including the cost of the service connection, shall be set forth in each agreement for the application of this rider.

Minimum Guarantee. The minimum monthly payment for service shall be the amount set forth in the rider agreement or, in the event of later increases of the Customer's load, the minimum of the rate at which service is rendered, whichever minimum obligation is the greater.

Construction Advances. Where the service desired is of limited amount or doubtful permanency, the Company will require payment as an advance for construction of a sum which will be credited to bills for service rendered as they accrue, with the right to retain such portion of the advance as needed to guarantee the payment of subsequent bills.

Fulfillment of Contract Term. In the event of the discontinuance for any reason of the supply or use of energy prior to the expiration of the term of the contract with which this rider is applied, the Customer shall pay the Company immediately thereon a pro rata share of the cost of the extension for the unexpired portion of the contract term.

Ownership of Supply Facilities. The provisions of this rider shall not under any circumstances be considered as conferring upon the Customer any title to, or right of property in, the supply facilities.

Contract Term. Contract terms in excess of one year may be arranged with the Customer to assure the return required by the investment in supply facilities.

METER RENTAL RIDER

Applicability. To the supply and maintenance, on any part of a Customer's load served exclusively by the Company, of watt-hour meters in excess of those required to measure the energy to be billed to the Customer, including the reading of such meters.

Submetering Defined. Submetering provided hereunder shall be confined to standard watt-hour meters for the standard secondary voltages furnished by the Company. Demand registers, demand meters, two-rate registers, load control devices or contact mechanisms shall not be furnished nor permitted to be attached to submeters furnished by the Company.

Charge—Per Month.

Self-contained meters	
Single-phase 120 or 240 v. up to 50 A	$0.50
2- or 3-phase 240 v. up to 50 A	1.00
Instrument Transformer meters	
Single-phase 240 v.	1.50
2- or 3-phase 240 v.	3.00

RATES AVAILABLE UNDER THIS TARIFF—*Continued*

Rate SL-P Street Lighting in City of Philadelphia. Available only to a governmental agency, federal, state or municipal, for outdoor lighting service of highways, bridges, parks or similar places, for the safety and convenience of the public, within the City of Philadelphia by series incandescent filament lamps of standard sizes and by multiple or series mercury-vapor lamps of standard sizes where the Customer installs, owns and maintains all Utilization Facilities.

Rate SL-S Street Lighting. Outdoor lighting of highways, bridges, parks and similar places for the safety and convenience of the public in Suburban Divisions.

(C) **Rate PSL Private Street Lighting.** This rate is in process of elimination and is restricted to lamps in service on March 1, 1955.

Rate RRR Railroad Service—Small. Available for railroad corporations using the Company's high tension service for operation of railroad systems and appurtenances and guaranteeing a demand not less than 9,200 kilowatts.

Rate T Traction Service. Available for street-railway corporations using the Company's standard high tension service for transportation purposes and requiring initially not less than 130,000 kilowatts of capacity.

Rate BLI Borderline Interchange Service. Electric service supplied under reciprocal agreements, to neighboring electric utilities for resale in their adjacent territory at delivery points where the Company in its judgment can provide capacity in excess of the requirements of present and prospective Customers in its own territory and for periods fixed by contract and terminable after the expiration of the initial term if capacity is no longer available.

RULES AND REGULATIONS—*Continued*

8. RIGHTS-OF-WAY

8.1 Term and Rentals. When the premises of a Customer is so located that he can be served only by facilities extending over the property of another, the Customer shall accept service for such term as is provided in the permit or agreement covering the location and the maintenance of service equipment, and he shall reimburse Company for any and all special, or rental, charges that may be made for such rights by said permit or agreement.

8.2 Procurement by Customer. Customers applying for the construction of an extension may be required to secure to, and for, the Company, all necessary and convenient rights-of-way and to pay the costs incident thereto.

8.3 Delays. Applications for service from an extension to be constructed where a right-of-way is not owned by the Company will only be accepted subject to delays incident to obtaining a satisfactory right-of-way.

9. INTRODUCTION OF SERVICE

9.1 Wiring in Progress. Service-supply lines will not be installed prior to the time that the wiring of the premises is actually in progress.

9.2 Underwriter's Inspection. Electricity will not be introduced until a certificate of approval has been issued by the Fire Underwriters' Association having jurisdiction in the territory supplied.

9.3 Company's Right to Inspect. The Company shall have the right, but shall not be obliged, to inspect any installation before electricity is introduced or at any later time, and reserves the right to reject any wiring or appliances not in accordance with the Company's standard requirements; but such inspection, or failure to inspect, or to reject, shall not render the Company liable or responsible for any loss or damage, resulting from defects in the installation, wiring, or appliances, or from violation of Company rules, or from accidents which may occur upon the premises of the Customer.

9.4 Defective Installation. The Company may refuse to connect if, in its judgment, the Customer's installation is defective, or does not comply with such reasonable requirements as may be necessary for safety, or is in violation of the Company's standard requirements.

9.5 Unsatisfactory Installation. The Company may refuse to connect if, in its judgment, the Customer's equipment, or use thereof, might injuriously affect the equipment of the Company, or the Company's service to other customers.

9.6 Final Connection. In all cases the final connection between the Customer's installation and the Company's service-supply lines shall be made by or under the supervision of a representative of the Company.

Philadelphia Electric Company
AUG 3 1960
Bureau of Rates and Research

10. COMPANY EQUIPMENT ON CUSTOMER'S PREMISES

10.1 Company Maintenance. The Company shall keep in repair and maintain its own property installed on the premises of the Customer.

10.2 Customer's Responsibility. The Customer shall be responsible for safekeeping of the Company's property while on the Customer's premises. In the event of injury or destruction of any such property the Customer shall pay the costs of repairs and replacement.

10.3 Protection by Customer. The Customer shall protect the equipment of the Company on his premises, and shall not permit any person, except a Company employee having a standard badge of the Company or other Company identification, to break any seals upon, or do any work on, any meter or other apparatus of the Company located on the Customer's premises.

EFF

RATE SL—STREET LIGHTING—*Continued*

CITY DUCT: Lamps erected on iron poles or other fixtures; energy supplied by conductors installed in conduit owned and maintained by the Customer.

CITY-OWNED: Lamps erected on poles or other fixtures; energy supplied by conductors, either aerial or in pipe or conduit, the entire equipment of pipe, conduit, poles, fixtures and conductors owned, controlled or leased and maintained by the Customer.

ROOSEVELT BOULEVARD: Lamps erected on the Roosevelt Boulevard on iron poles or fixtures; energy supplied by conductors plowed or trenched in the ground or installed in pipe or conduit.

MARKET STREET ELEVATED: Lamps attached to the Market Street elevated structure; energy supplied by conductors installed in pipe or conduit on the elevated structure.

Terms and Conditions.

1. SUPPLY FACILITIES. The lighting service under the conditions above stated, other than for facilities supplied by the Customer as set forth under "City Duct" and "City-Owned" conditions, shall be supplied from facilities and equipment installed at the cost and expense of the Company and owned and controlled by it except that the type of ornamental iron poles to be supplied shall be subject to agreement between the Customer and the Company and the expense to the Company shall be limited to the cost of poles of recognized standard design.

2. RELOCATION OF FACILITIES. The cost of any change in location of lamp posts, manholes, conduit, cable or other facilities used for municipal lighting shall be borne by the Customer unless such change is for the betterment of illumination, in which case it shall be made at the expense of the Company as soon as practicable after receipt of notice to make the change.

3. LOCATION AND TYPE OF INSTALLATION. The prices of this rate apply to lamps supplied under conditions named herein at locations designated by the properly authorized representatives of the Customer.

4. SERVICE. The lighting service will be operated on an all night, every night, lighting schedule of approximately 4,100 hours annual burning time to be approved by the authorized representatives of the Customer, under which lights are turned on after sunset and off before sunrise. It includes the supply of lamps, energy, the cleaning and maintenance of lamps, fixtures and supply facilities and the renewal of lamps broken or burned out.

5. AUTHORIZATION AND PROTECTION. The Customer shall, to the extent of his ability, furnish any requisite authority for the erection and maintenance of poles, wires, fixtures and other equipment necessary to operate the lights at the locations and under the conditions designated, and shall protect the Company from malicious damage to the lighting system.

6. ADDITIONAL LIGHTING. Additional lamps to continue in use for the balance of the existing contract term, will be installed by the Company on the basis defined in "Supply Facilities" for any standard service condition upon written notice from the Customer specifying the location of their installation and the condition of service, unless the proposed additional lighting is at such a remote location, or the number or spacing of the additional lamps, or lack of necessary supply lines, or any other reason makes the investment or cost of providing, erecting and maintaining said lamps excessive, in which case a portion of the investment or cost shall be borne by the Customer subject to agreement between the Customer and the Company.

EFFECTIVE

RATE SL-P STREET LIGHTING IN CITY OF PHILADELPHIA—*Continued*

(C) 10. ADDITIONAL LIGHTING. Lighting Service for additional lamps installed by the Customer on the bases defined in "1. Ownership of Utilization Facilities", "2. Standards of Construction for Utilization Facilities" and "4. Connection of Lighting Units" will be supplied by the Company for any standard service condition upon written notice from the Customer specifying the locations of the installations and type of lighting service required, unless the proposed additional lighting makes the investment or cost of providing distribution and control equipment excessive, in which case a portion of the investment or cost shall be borne by the Customer subject to agreement between the Customer and the Company.

(C) 11. VERTICAL RELOCATION OF LIGHTING UNITS. Vertically relocated Lighting Units supplied from aerial circuits requiring Company to increase pole height, shall bear the price for the Distribution and Control Charge applicable for installations in new locations.

Vertically relocated Lighting Units supplied from aerial circuits within the capacity of existing poles, as determined by Company, shall incur no change in the price of the Distribution and Control Charge. Where a pole is replaced by Company at its own option, it shall be the Customer's responsibility to have the Utilization Facilities transferred from the old to the new pole but the Customer shall not incur any change in the price of the Distribution and Control Charge.

(C) 12. OUTAGE ALLOWANCE. The Company will use reasonable diligence to provide a continuous, regular and uninterrupted supply of service and the Customer will use reasonable diligence to protect the lighting system. In lieu of a determination of the actual hours of Lighting Unit outages resulting from a failure of any light to burn for any reason, a deduction of 0.15 per cent of the monthly Energy Charge including Fuel Adjustment will be made on the monthly bill. Company shall not be liable for service interruptions as a result of the Customer's failure to protect the lighting system, or as a result of riot, fire, storm, flood, interference by civil or military authorities or any other cause beyond its control.

Contract Term.

Annual.

(C) **Payment Terms.**

Bills will be rendered monthly. Each month, for the purpose of prorating the Distribution and Control Charge, shall be considered one-twelfth of a year.

RATE T TRACTION SERVICE—*Continued*

Amount and Character of Capacity—*(Continued.)*

Customer agrees to purchase from Company all of his requirements for capacity and energy necessary for the operation and maintenance of his transportation facilities, excepting:

First—An amount not to exceed 3,375 kilowatts.

Second—Should any additional line or lines be acquired by Customer which may have outstanding bona fide contracts for supply of power from parties not owned or controlled by Company or its affiliated companies, the provisions of this rate shall not attach to such properties until the expiration of such contracts.

The Company will supply additional power in excess of the guaranteed demand upon 9 months' written notice for an increase of 6,000 kilowatts or less; or 12 months' notice for an increase of more than 6,000 kilowatts and not over 9,000 kilowatts; or 18 months' notice for an increase of more than 9,000 kilowatts.

Kilowatt-Hours Guarantee.

The kilowatt-hours to be paid for each month shall be not less than would be required by the use of the energy taken hereunder at a monthly load factor of 30%, provided, however, that the Customer is not prevented from using a normal amount of energy by any cause beyond his control. The 30% load factor is defined as that number of kilowatt-hours which will equal 30% of the total number of kilowatt-hours which the energy represented by the demand for the month could produce if exerted during each and every hour of the month.

Term of Contract.

Subject to the provision set forth above for the termination of contract in the event that the demand in any month falls below 64,880.4 kilowatts, the use of current shall not be for a shorter term than 20 years extending from October 1, 1929, to September 30, 1949, and, unless written notice of termination is given by either party to the other at least 2 years prior to the termination date just mentioned, it shall continue for a further term of 5 years and so on for successive terms of 5 years, subject to termination as to each such 5-year period by 2 years' notice as aforesaid.

Termination of Contract.

Upon the termination of the Agreement at the end of a 20-year period and any extended term effected through the provisions of the Agreement, Company agrees to transfer and convey to Customer all such facilities, except generation facilities, as can only be used at that time exclusively for and in connection with the delivery of energy under this rate, and Customer agrees to pay to Company the original cost of the same, less a reasonable amount for depreciation.

By the term facilities used in connection with the delivery of energy is meant transmission lines and cables, receiving, transforming and converting apparatus and equipment used exclusively for the service of Customer.

Payment Terms.

As specified in the contract.

STANDARD RIDERS—*Continued*

Applicable to rates as indicated in Applicability Index of Riders, Page No. 47

(I) PD NIGHT SERVICE RIDER

Applicability. To service supplied during off-peak hours for demands in excess of those supplied during on-peak hours where the capacity supplied by the Company does not exceed 800 kilovoltamperes and is the exclusive source of service for the connected load so supplied.

Definition of Peak-Hours. ON-PEAK HOURS are defined as those hours between 7 a. m. and 9 p. m., Eastern Standard Time, daily, omitting Sundays, or Daylight Saving Time, whichever is in common use.

OFF-PEAK HOURS are defined as the hours other than those specified as on-peak hours.

On-Peak Service Rate. Rate PD including all its terms and guarantees for service supplied during on-peak hours. The blocking of the energy charge of said rate will be based in all cases on the billing demand for on-peak hours.

Night Service Capacity Charge: 60¢ per kw of excess off-peak billing demand per month.

Determination of Excess Off-Peak Billing Demand. The excess off-peak billing demand shall be the amount by which the greatest demand occurring during off-peak hours, as determined by measurement and adjusted for power factor, exceeds the billing demand for on-peak hours, whether the latter is a minimum or an actual demand. In no event shall the excess off-peak billing demand to be paid for be less than 25% of the greatest aforesaid-determined excess off-peak billing demand during any month of the preceding 11 months or greater than an amount prescribed by the Company.

Other Riders. Where the Off-Peak Rider and this rider are applied to the same contract, the Off-Peak Rider will be applied only to the provisions of the contract and this rider will then be applied to the contract as modified. This rider will not be applied in conjunction with the Temporary Service Rider.

FEB 25 1949

Bureau of Rates and Research
TARIFF SECTION

Term. Annual contract.

RECEIVERSHIP RIDER

) service supplied a Receiver-Trustee for the continued operation of
nder contract for its electric service requirements.

Operation. The Receiver-Trustee shall possess the authority under
Court, through an order duly entered, to operate premises recited in a
ic service under which the Company has been supplying energy.

ice. The Receiver-Trustee shall accept and adopt for the continuation of the supply of electric service the contract therefore in effect, including all of its provisions, and agree to pay the Company for all service furnished hereunder during the receivership-trusteeship at the rate specified therein.

Billing. Bills are to be rendered directly to the agent of the Receiver-Trustee.

Contract Term. The completion of the term of the contract taken over, or as terminated by the discharge of the Receiver-Trustee, or as arranged with the Receiver-Trustee for the continuation of supply under the standard terms of this TARIFF.

(I) Indicates increase.

FILED TARIFF

OFFICIALLY FILED TARIFF

STANDARD RIDERS—*Continued*

Applicable to rates as indicated in Applicability Index of Riders, Page No. 41

METER RENTAL RIDER—*Continued*

Meter Readings. The meters will be read by the Company's reader on his regular reading trip and a statement of the meter readings and of the usage recorded between such regular reading dates supplied the Customer.

Customer's Wiring. The Customer shall provide standard meter mounting and test facilities; also enclosures for any instrument transformers.

Control of Meters. The meters and metering equipment will be sealed by the Company, and access to the wiring and connections shall be available only to authorized employees of the Company.

Routine Tests. The Company will test and maintain the meters within the accuracy requirements and test periodicity specified by the Pennsylvania Public Utility Commission for each class of service.

Request Tests. The Company will make additional tests and inspections of its meters at the request of the Customer, subject to a charge for each test of—

$1.50 for single-phase meters.
2.50 for polyphase meters.

Ownership. The provisions of this rider shall not under any circumstances be considered as conferring upon the Customer any title to, or right of property in, the submetering equipment.

Protection. The Customer shall protect the equipment of the Company and, in the event of its damage or destruction by overload, fire or other cause, the cost of repairs or replacement shall be paid by the Customer.

Liability. The Company shall not be liable in any way for the payment of damages or claims arising by reason of the failure of any of its meters to register accurately the service which the Customer supplies or resells through it to a third party, other than for the obligation to test and re-calibrate the meter so that it will operate accurately after the error has been discovered.

Term. Annual contract.

OFF-PEAK RIDER

Applicability. To the restricted use of purchased energy during the winter months caused by the seasonal requirements of the entire plant of Customers purchasing service on measured demand contracts. Not available in conjunction with the Seasonal Rider.

Winter Months Defined. November, December, January and February.

Base Contract. The Customer shall enter into a standard contract for service under the applicable rate which will stipulate the maximum billing demand to be supplied.

(C) **Restricted Use.** Use shall be restricted between the hours from 7 a. m. to 7 p. m. daily except Saturdays and holidays during the winter months to demands not in excess of 50% of the maximum billing demand of the Customer's contract.

Minimum Waiver. The minimum payment obligations of the contract shall not apply during the four winter months nor during the months of October, March and April.

Rate Application. Service taken each month shall be paid for at the rate subject to the monthly minimum charge due under the contract except as waived by the terms of this rider.

(C) **Excess Demand.** Demands imposed between the hours from 7 a. m. to 7 p. m. daily except Saturdays and holidays during the months of November, December, January or February in excess of 50% of the maximum billing demand stipulated in the Customer's contract, will be billed an additional charge of $2.00 per kilowatt per month for such excess demand.

Contract Term. Coincidentally with the [illegible] or for a winter season, if so elected by the Customer.

RATES AVAILABLE UNDER THIS TARIFF—*Continued*

(C) **Rate SL-P Street Lighting in City of Philadelphia.** Available only to a governmental agency, federal, state or municipal, for outdoor lighting service of highways, bridges, parks or similar places, for the safety and convenience of the public, within the City of Philadelphia by series incandescent filament lamps of standard sizes and by multiple or series mercury-vapor lamps of standard sizes where the Customer installs, owns and maintains all Utilization Facilities.

Rate SL-S Street Lighting. Outdoor lighting of highways, bridges, parks and similar places for the safety and convenience of the public in Suburban Divisions.

Rate PSL Private Street Lighting. Available in PHILADELPHIA DIVISION for series-incandescent lighting service adjacent to, or on, a Customer's property but not in, or attached to, any building, and available only to premises adjacent to the Company's series-incandescent circuits. It will be furnished only in accordance with the lighting schedule established for municipal street-lighting.

Rate RRR Railroad Service—Small. Available for railroad corporations using the Company's high tension service for operation of railroad systems and appurtenances and guaranteeing a demand not less than 9,200 kilowatts.

Rate T Traction Service. Available for street-railway corporations using the Company's standard high tension service for transportation purposes and requiring initially not less than 130,000 kilowatts of capacity.

Rate BLI Borderline Interchange Service. Electric service supplied under reciprocal agreements, to neighboring electric utilities for resale in their adjacent territory at delivery points where the Company in its judgment can provide capacity in excess of the requirements of present and prospective Customers in its own territory and for periods fixed by contract and terminable after the expiration of the initial term if capacity is no longer available.

RULES AND REGULATIONS—*Continued*

9.3 Company's Right to Inspect. The Company shall have the right, but shall not be obliged, to inspect any installation before electricity is introduced or at any later time, and reserves the right to reject any wiring or appliances not in accordance with the Company's standard requirements; but such inspection, or failure to inspect, or to reject, shall not render the Company liable or responsible for any loss or damage, resulting from defects in the installation, wiring, or appliances, or from violation of Company rules, or from accidents which may occur upon the premises of the Customer.

9.4 Defective Installation. The Company may refuse to connect if, in its judgment, the Customer's installation is defective, or does not comply with such reasonable requirements as may be necessary for safety, or is in violation of the Company's standard requirements.

9.5 Unsatisfactory Installation. The Company may refuse to connect if, in its judgment, the Customer's equipment, or use thereof, might injuriously affect the equipment of the Company, or the Company's service to other customers.

9.6 Final Connection. In all cases the final connection between the Customer's installation and the Company's service supply lines shall be made by or under the supervision of a representative of the Company.

10. COMPANY EQUIPMENT ON CUSTOMER'S PREMISES

10.1 Company Maintenance. The Company shall keep in repair and maintain its own property installed on the premises of the Customer.

10.2 Customer's Responsibility. The Customer shall be responsible for safe-keeping of the Company's property while on the Customer's premises. In the event of injury or destruction of any such property the Customer shall pay the costs of repairs and replacement.

10.3 Protection by Customer. The Customer shall protect the equipment of the Company on his premises, and shall not permit any person, except a Company employee having a standard badge of the Company or other Company identification, to break any seals upon, or do any work on, any meter or other apparatus of the Company located on the Customer's premises.

10.4 Tampering. In the event of the Company's meters or other property being tampered or interfered with, the Customer being supplied through such equipment shall pay the amount which the Company may estimate is due for service used but not registered on the Company's meter, and for any repairs or replacements required, as well as for costs of inspections, investigations, and protective installations.

10.5 Right of Access. The Company's identified employees shall have access to the premises of the Customer at all reasonable times for the purpose of reading meters, and for installing, testing, inspecting, repairing, removing or changing any or all equipment belonging to the Company.

RECEIVED
Public Utility Com
FEB 15 1949
Bureau of Rates and Research
TARIFF SECTION

10.6 Ownership and Removal. All equipment supplied by the Company shall remain its exclusive property, and the Company shall have the right to remove the same from the premises of the Customer at any time after the termination of service from whatever cause.

11. TARIFF OPTIONS ON APPLICATIONS FOR SERVICE

11.1 Choice of Rate. Where the class of service supply or conditions of use are such that two or more rates are available, an applicant shall select the rate or rates to be applied to his service.

11.2 Fixing of Demand. Where, under demand rates, it is optional to have the demand measured in lieu of having it determined by the application of an assessment rule, an applicant shall select which method shall apply.

11.3 Company Assistance. The Company upon request will, to a reasonable extent, assist an applicant in selecting the most advantageous rate or rate application.

12. SERVICE CONTINUITY

12.1 Regularity of Supply. The Company will use reasonable diligence to provide a continuous, regular and uninterrupted supply of service; but, should the supply be interrupted by the Company for the purpose of making repairs, changes, or improvements, in any part of its system for the general good of the service or the safety of the public, or should the supply of service be interrupted, or fail, by reason of accident, strike, legal process, State or municipal interference, or any cause whatsoever, beyond its control, the Company shall not be liable for damages, direct or consequential, resulting from such interruption or failure.

OFFICIALLY FILED TARIFF

RATE SL-P STREET LIGHTING IN CITY OF PHILADELPHIA—*Continued*

8. SERVICE MAINTENANCE. Upon receipt of report of lamp or lamps not burning, Company will determine the cause of failure and will restore service on street lighting distribution circuit and control equipment disconnecting if necessary the faulty lamp or lamps from the circuit. Customer will make necessary repairs between the lamp or lamps not burning and the point of connection to Company's street lighting distribution circuit. In the event the fault is located in the Company-owned facilities, Customer will bill the Company for this portion of the replaced facilities.

9. AUTHORIZATION AND PROTECTION. The Customer shall, to the extent of his ability, furnish any requisite authority for the erection and maintenance of poles, wires, fixtures and other equipment necessary to operate the lights at the locations and under the conditions designated, and shall protect the Company from malicious damage to the lighting system.

10. ADDITIONAL LIGHTING. Lighting Service for additional lamps installed by the Customer on the bases defined in "1. Ownership of Utilization Facilities", "2. Standards of Construction for Utilization Facilities" and "4. Connection of Lamps" will be supplied by the Company for any standard service condition upon written notice from the Customer specifying the locations of the installations and type of lighting service required, unless the proposed additional lighting makes the investment or cost of providing distribution and control equipment excessive, in which case a portion of the investment or cost shall be borne by the Customer subject to agreement between the Customer and the Company.

11. VERTICAL RELOCATION OF LAMPS. Vertically relocated lamps supplied from aerial circuits requiring Company to increase pole height, shall bear the price for the Distribution and Control Charge applicable for installations in new locations.

Vertically relocated lamps supplied from aerial circuits within the capacity of existing pole, as determined by Company, shall incur no change in the price of the Distribution and Control Charge. Where a pole is replaced by Company at its own option, it shall be the Customer's responsibility to have the Utilization Facilities transferred from the old to the new pole but the Customer shall not incur any change in the price of the Distribution and Control Charge.

12. OUTAGE ALLOWANCE. The Company will use reasonable diligence to provide a continuous, regular and uninterrupted supply of service and the Customer will use reasonable diligence to protect the lighting system. In lieu of a determination of the actual hours of lamp outages resulting from a failure of any light to burn for any reason, a deduction of 0.15 per cent of the monthly Energy Charge including Fuel Adjustment will be made on the monthly bill. Company shall not be liable for service interruptions as a result of the Customer's failure to protect the lighting system, or as a result of riot, fire, storm, flood, interference by civil or military authorities or any other cause beyond its control.

Contract Term.

Annual.

Payment Terms.

Bills will be rendered monthly. Each month, for the purpose of prorating the Distribution and Control Charge, and Lamp Renewing, Cleaning and Replacement of Glassware Charge, shall be considered one-twelfth of a year.

APPLICABILITY INDEX OF RIDERS

Introductory Statement

Customers under the different rates of this TARIFF frequently desire services or present situations and conditions of supply which require special supply terms, charges or guarantees or which warrant modification of the amount or method of charge from the prices set forth in the rate under which they are supplied. Modifications for such conditions are defined by rider provisions included as a part of this TARIFF. Riders may be employed when applicable, with or without signed agreement between the Customer and the Company as the case may require, notwithstanding anything to the contrary contained in the rate to which the rider is applied.

STANDARD RIDERS—*Continued*

Applicable to rates as indicated in Applicability Index of Riders, Page No. 41

TEMPORARY SERVICE RIDER—*Continued*

Investment in Supply Facilities. The cost of the connection and disconnection of the service supply and of any equipment and extension of facilities required to furnish the temporary service under the applicable rate shall be paid by the Customer, but such payment shall not confer upon, nor entitle the Customer to any title to, or right of property in, said facilities and equipment.

Minimum Term. Application of this rider to Rates R, R-S and GLP shall not, for billing purposes, be considered to be for a period of less than one month.

Application of this rider to Rates PD and HT shall require payment of the minimum provisions of the contract for each month of the temporary service period, but in no case shall such period be considered, with respect to the guarantee of the monthly minimum charges, as of less duration than 6 months.

Rate-Price Modification. When this rider is applied to Rates PD or HT the last price block of the energy charge shall not apply.

Contract Term. Short term arrangements as agreed upon.

COPY NOTICE
Revised Page No. 51
EFFECTIVE NOV 20 1951

TRANSFORMER-RENTAL RIDER

Applicability. To the supply in Suburban Divisions of transformer installation furnished, operated and maintained on the premises of a Customer to transform a single standard primary or high-tension service to a supply corresponding in phase and voltage to the standard polyphase secondary or primary service supplied by the Company at the time when and in the territory where the installation is made. Transformation from standard high-tension service to 2,300 volts, 3-phase, although non-standard in 4,000-volt, 3-phase, areas, may be furnished at the Customer's request in such areas.

Installation Conditions. The transformer installation under this rider is limited to a single bank of transformers installed in accordance with the Company's applicable standards, and to exclusive operation and control by the Company. Suitable housing, foundations, supporting structures, and inclosures, for such installations and all secondary facilities including suitable over-load protective equipment, shall be provided, owned, and maintained by the Customer.

(I) **Monthly Rental Charge.**

Fixed Charge:

Supply Voltage	Type of Switching Installation	Amount
2,300 volts or 4,000 volts	Outdoor or Indoor	$16.50
13,200 volts	Outdoor	44.00
13,200 volts	Indoor	99.00
33,000 volts	Indoor	99.00

STANDARD RIDERS—*Continued*

Applicable to rates as indicated in Applicability Index of Riders, Page No. 41

(C)

PD NIGHT SERVICE RIDER

Applicability. To service supplied during off-peak hours for demands in excess of those supplied during on-peak hours where the Company is the exclusive source of service for the connected load so supplied and where the demand specified for off-peak hours shall be limited to an amount designated by the Company which in no event shall be greater than 1,200 kilowatts.

Definition of Peak-Hours. ON-PEAK HOURS are defined as those hours between 7 a. m. and 9 p. m., Eastern Standard Time or Daylight Saving Time, whichever is in common use, daily except Saturdays and holidays.

OFF-PEAK HOURS are defined as the hours other than those specified as on-peak hours.

Service Rate. Rate PD, including all its terms and guarantees, is applicable to service supplied during on-peak hours. The capacity charge and blocking of the energy charge of said rate shall be based on the billing demand for on-peak hours except that, when the greatest demand during off-peak hours, as determined by measurement and adjusted for power factor, exceeds the demand specified for off-peak hours, the amount of such excess shall be added to the billing demand for on-peak hours and the resultant sum shall then constitute the basis for said capacity charge and blocking of the energy charge.

Night Service Capacity Charge: 60¢ per kw of off-peak billing demand per month.

Determination of Off-Peak Billing Demand. The off-peak billing demand shall be the amount by which the greatest demand during off-peak hours, as determined by measurement and adjusted for power factor, exceeds the billing demand for on-peak hours, whether the latter is a minimum or an actual demand, except that, when said greatest demand during off-peak hours exceeds the demand specified for off-peak hours, said greatest off-peak demand shall be reduced by the amount of the excess in determining the off-peak billing demand. In no event shall the off-peak billing demand be less than 25% of the greatest off-peak billing demand determined during any month of the preceding 11 months.

Other Riders. Where the Off-Peak Rider and this rider are applied to the same contract, the Off-Peak Rider will be applied only to the provisions of the contract, and this rider will then be applied to the contract as modified. This rider will not be applied in conjunction with the Temporary Service Rider.

Term. Annual.

RECEIVERSHIP RIDER

Applicability. To service supplied a Receiver-Trustee for the continued operation of a property formerly under contract for its electric service requirements.

Authority for Operation. The Receiver-Trustee shall possess the authority under appointment by Court, through an order duly entered, to operate premises recited in a contract for electric service under which the Company has been supplying energy.

Acceptance. The Receiver-Trustee shall accept and adopt for the continuation of the supply of electric service the contract theretofore in effect, including all of its provisions, and agree to pay the Company for all service furnished hereunder during the receivership-trusteeship at the rate specified therein.

Billing. Bills are to be rendered directly to the agent of the Receiver-Trustee.

Contract Term. The completion of the term of the contract taken over, or as terminated by the discharge of the Receiver-Trustee, or as arranged with the Receiver-Trustee for the continuation of supply under the standard terms of this TARIFF.

INCREASE

Rates Available. (6TH REV. 6.)
Rate RR has been added and superceded Rate RRR has been omitted.

Rate RRR Railroad Service—Small. (PAGE 36.)
This rate is superseded by **Rate RR Railroad Service** (1ST REV. 36.). The new rate expands and clarifies the character of and obligations concerning service furnished, and provides changes in capacity and energy charges resulting in an increase.

RATES AVAILABLE UNDER THIS TARIFF—*Continued*

(C) **Rate SL-S Street Lighting.** Outdoor lighting of highways, bridges, parks and similar places for the safety and convenience of the public in Suburban Divisions.

Rate PSL Private Street Lighting. Available in PHILADELPHIA DIVISION for series-incandescent lighting service adjacent to, or on, a Customer's property but not in, or attached to, any building, and available only to premises adjacent to the Company's series-incandescent circuits. It will be furnished only in accordance with the lighting schedule established for municipal street-lighting.

Rate RRR Railroad Service—Small. Available for railroad corporations using the Company's high tension service for operation of railroad systems and appurtenances and guaranteeing a demand not less than 9,200 kilowatts.

Rate T Traction Service. Available for street-railway corporations using the Company's standard high tension service for transportation purposes and requiring initially not less than 130,000 kilowatts of capacity.

Rate BLI Borderline Interchange Service. Electric service supplied under reciprocal agreements, to neighboring electric utilities for resale in their adjacent territory at delivery points where the Company in its judgment can provide capacity in excess of the requirements of present and prospective Customers in its own territory and for periods fixed by contract and terminable after the expiration of the initial term if capacity is no longer available.

For Additional Details of Availability, Rates, and Conditions, See Rate Pages.

RULES AND REGULATIONS—*Continued*

17.3 Net-Payment Period. Bills are due upon presentation, and payment may be made at any commercial office of the Company. The net rates are contingent upon prompt payment. The final date for payment of the net amount will not fall on a Sunday or holiday and will be at least 10 days after day of presentation, except on accounts with the United States of America or the Commonwealth of Pennsylvania or any of their departments or institutions, for which 30 days will be allowed. The business day next following the final date shown on the bill for net payment will be allowed as a day of grace for delivery of payments. Failure to receive bill will not excuse customers from payment obligations, and payments must be made without regard to any counterclaims whatsoever.

17.4 Gross Payments. Where the payment terms are stipulated as Standard under a rate schedule set forth herein, the gross amount stipulated on the bill becomes due on the expiration of the net payment period. The Company may waive the collection of the gross amount on an overdue bill provided that not more than one other such waiver has been made on bills of the preceding 11 months.

17.5 Payment by Mail. Mailed remittances for the net amount of a bill received after the day of grace will be accepted by the Company as a tender of payment within the net payment period if the enclosing envelope bears United States post-office date stamp of the day of grace which is allowed for delivery of payments, or any date prior thereto.

TARIFF SECTION

18. DISCONNECTION BY THE COMPANY

18.1 Non-Payment Shut-Off. The Company may disconnect its service on reasonable notice and remove its equipment in case of non-payment of bill.

18.2 Shut-Off for Cause. The Company may disconnect on reasonable notice if entry to its meter or meters is refused or if access thereto is obstructed or hazardous; or for other violation of these Rules and Regulations.

18.3 Safety Shut-Off. The Company may disconnect without notice if the Customer's installation has become hazardous or defective.

18.4 Defective-Equipment Shut-Off. The Company may disconnect without notice if the Customer's equipment or use thereof might injuriously affect the equipment of the Company, or the Company's service to other customers; or if, upon a re-examination of the Customer's installation by a Fire Underwriters' Association having jurisdiction, a certificate of approval is refused.

18.5 Shut-Off for Fraud. The Company may disconnect without notice for abuse, fraud, or tampering with the connections, meters, or other equipment of the Company.

18.6 Reconnection Charge. As a condition precedent to the restoration of service discontinued by reason of act or default of the Customer, the Company may require the payment of the monthly minimum for the unexpired term of the contract, or so much of it as has accrued during the period of suspension, together with all arrearages, and a re-connection charge of:

(a) $1.00 per account where disconnection was effected by removal of fuses at the meter location; or

(b) $3.00 per account where disconnection was effected by cutting taps; or

(c) Actual cost where disconnection was effected by removing service connections.

TARIFF SECTION

Lighting Improvement Discount.

The amount by which any monthly bill exceeds the product of $2.50 times the total number of lamps supplied shall be subject to a discount of 10% for Customers having in service no lamps smaller than 1,000-lumen rating, or to a discount of 5% for Customers having in service any lamps smaller than 1,000-lumen rating.

General Provisions.

1. SERVICE. The lighting service will be operated on an all night, every night, lighting schedule of approximately 4,100 hours annual burning time, under which lights are turned on after sunset and off before sunrise. It includes the supply of lamps and their renewal when burned out, broken, or giving less than 80% of the rated light output.

2. OUTAGE ALLOWANCES. Written notice to the Company prior to 4 p. m. of the failure of any light to burn on the previous night shall entitle the Customer to a pro rata reduction in his street lighting bill for the hours of failure if such failure continues for a period in excess of 12 hours after the notice is received. Allowances will not be made for outages resulting from the Customer's failure to protect the lighting system or from riot, fire, storm, flood, interference by civil or military authorities, or any other cause beyond the Company's control.

3. INSTALLATION OF NEW OR ADDITIONAL LIGHTING. The prices in the Rate Table apply to aerially supplied standard overhead installations for (a) federal, state, county and municipal authorities and community associations entering into a five-year contract for lighting service, (b) building operation developers for lighting, during the development period, of streets that are to be dedicated, where the municipality has approved the lighting and agreed to subsequently assume the charges for it under a standard contract. Such installations will be made on the public highways at the expense of the Company to the extent warranted by the revenue in prospect, any additional investment to be assumed by the Customer. For other than aerially supplied standard overhead installations, the Company will assume the cost of any facilities

APPLICABILITY INDEX OF RIDERS

Introductory Statement

Customers under the different rates of this TARIFF frequently desire services or present situations and conditions of supply which require special supply terms, charges or guarantees or which warrant modification of the amount or method of charge from the prices set forth in the rate under which they are supplied. Modifications for such conditions are defined by rider provisions included as a part of this TARIFF. Riders may be employed when applicable, with or without signed agreement between the Customer and the Company as the case may require, notwithstanding anything to the contrary contained in the rate to which the rider is applied.

EFFECTIVE

Applicable to rates as indicated in Applicability Index of Riders, Page No.

TRANSFORMER-RENTAL RIDER—*Continued*

Demand Defined. The demand for application of this Rider shall be

(a) the billing demand of the current month, or

(b) when in conjunction with the Night Service Rider, the sum of the on-peak billing demand of the current month and the greatest excess off-peak billing demand of the 12 months ending with the current month, said sum, however, not to exceed the greatest monthly total of on-peak and excess off-peak billing demands in the same period, or

(c) when in conjunction with the Seasonal Rider, not less than 2/3 of the greatest demand of the preceding 11 months.

No waivers allowable as to minimum demands shall be considered as applicable in the determination of the transformer-rental charge.

Liability. The Company shall not be liable for any loss, damage or injuries to person or property, including loss of life or property, sustained by the Customer, his agents or employees, or by any person whomsoever, arising out of the presence or operation of said transformer installation on the Customer's premises, except where caused by the negligence of the Company, its agents and employees, and except for injuries sustained by the Company's employees, not caused by the negligence of the Customer, his agents and employees.

Contract Term. Coincidentally with the rate to which this rider is attached, but for not less than 3 years from the date the rider is accepted.

VENDOR RIDER

Applicability. To the supply of service for the operation of electrical appliances, including electric ranges, radios and lighting fixtures, the aggregate rated capacity of which is not less than 500 watts, and which are operated solely for making intermittent sales demonstrations by a Customer who is a vendor of such appliances and/or fixtures and is also otherwise a Customer of the Company.

Billing Demand Factor. The demonstration equipment shall not be included as part of the connected load for determining the Customer's assessed demand. The capacity of signs and window-display loads shall not be thus excluded.

TARIFF SECTION

OFFICIALLY FILED TARIFF

STANDARD RIDERS—*Continued*

Applicable to rates as indicated in Applicability Index of Riders, Page No. 41

SEASONAL RIDER

Applicability. To additional use of purchased energy during the summer months caused by the seasonal requirements of the entire plant of customers purchasing service on measured demand contracts. Not available in conjunction with the Off-Peak Rider.

Summer Months Defined. The months of March to October inclusive.

Base Contract. Service supplied during the months of November, December, January and February shall be subject to standard contract arrangement and shall not exceed the maximum billing demand stipulated in the contract.

Additional Summer Service. Service will be supplied during the summer months for demands in excess of the maximum demand stipulated in the Customer's contract. The demands billed during such months shall not be less than the minimum billing demand of the Customer's contract and shall not exceed 3 times the maximum of the contract.

Rider Application Period. This rider is applicable during the time within the summer months when the load exceeds the maximum billing demand of the Customer's contract, commencing when the seasonal use first produces such load value in the spring and terminating in the fall when the load drops to a value less than the contract maximum.

Rider Power Factor. The determination of normal load power factor for use in computing the kilowatt value of billing demand shall be made separately for the load conditions which exist while the Customer is operating within his contract limits, and for those existing during the rider application period.

Rate Modification. Service shall be billed each month at the prices of the rate applied to the kilowatt billing demand of that month, which shall not be less than the minimum of the Customer's contract.

Excess Demands. Demands in excess of 3 times the maximum kilowatt billing demand stipulated by the Customer's contract, imposed during the months of March to October, inclusive, will be billed at the tariff prices plus a charge of $2.00 per kilowatt per month for such excess demand.

Proration for Start-up and Shut-down. Upon advance notice from the Customer enabling the Company to secure the necessary readings of its demand and kilowatt-hour meters, bills will be prorated twice each year, contingent on the Customer observing contract limits in the winter and exceeding them in the summer, once for each month when the load crosses the maximum limit of the contract, going up in the spring and again when it drops back in the fall. The proration will be for the portion of the month during which each operating level was in effect.

Contract Term. Coincidentally with the term of the rate applied, or for a summer season, if so elected by the Customer.

RECEIVED
Penna. Public Utility Comm.
FEB 15 1949
Bureau of Rates and Research

TEMPORARY SERVICE RIDER

Applicability. To the supply of service for a temporary period.

Availability. Temporary service will be supplied only when the Company has available unsold distributing and generating capacity from which to furnish it and its supply will not in any way interfere with service to other Customers.

RATES AVAILABLE UNDER THIS TARIFF—*Continued*

Rate SL-S Street Lighting. Series-out-door-incandescent service for the lighting of public places, parks, streets, private roadways and similar purposes in SUBURBAN DIVISIONS.

Rate PSL Private Street Lighting. Available in PHILADELPHIA DIVISION for series-incandescent lighting service adjacent to, or on, a Customer's property but not in, or attached to, any building, and available only to premises adjacent to the Company's series-incandescent circuits. It will be furnished only in accordance with the lighting schedule established for municipal street-lighting.

Rate RRR Railroad Service—Small. Available for railroad corporations using the Company's high tension service for operation of railroad systems and appurtenances and guaranteeing a demand not less than 9,200 kilowatts.

Rate T Traction Service. Available for street-railway corporations using the Company's standard high tension service for transportation purposes and requiring initially not less than 130,000 kilowatts of capacity.

Rate BLI Borderline Interchange Service. Electric service supplied under reciprocal agreement to neighboring electric utilities for resale in their adjacent territory at delivery points where the Company in its judgment can provide capacity in excess of the requirements of present and prospective Customers in its own territory and for periods fixed by contract and terminable after the expiration of the initial term if capacity is no longer available.

OFFICIALLY FILED TARIFF

RATE SL-P STREET LIGHTING IN CITY OF PHILADELPHIA

(C) Availability.

Only to a governmental agency, federal, state or municipal, for outdoor lighting service of highways, bridges, parks or similar places, for the safety and convenience of the public, within the City of Philadelphia by incandescent filament, mercury-vapor or fluorescent lamps of standard sizes and types approved by the Company where the Customer installs, owns and maintains all Utilization Facilities as hereinafter defined. Service will be supplied under this Rate for Street Lighting Units supported in a conventional manner, such as on poles, posts, brackets or hangers, and under conditions of installation and supply acceptable to the Company.

Current Characteristics.

From Series 6.6 Amperes or Standard Single-Phase Secondary circuits.

Rate Table.

The term Lighting Unit for the purpose of determining wattage and Distribution and Control Charge shall include:

(a) for Aerial Installations:—All lamps, ballasts, transformers or other load components pertinent to a lighting installation supported by a single bracket or hanger.

(b) for Underground Installation:—All lamps, ballasts, transformers or other load components pertinent to a lighting installation at one pole, post, bracket or hanger location.

Lighting Unit wattage will be composed of manufacturer's rating of the lamps, ballasts, transformers or other load components required for its operation. Kilowatt-hours will be computed as the product of the total connected Lighting Unit wattage in Kw. in service as of each day of the month and the hours of lighting schedule for the Lighting Unit in the billing period.

Energy Charge Prices: per Kwh.:

Lighting Units up to 250 watts.....	2.6¢ per Kwh.
Lighting Units from 251 to 400 watts.....	2.1¢ per Kwh.
Lighting Units in excess of 400 watts.....	1.6¢ per Kwh.

Fuel Adjustment Clause: Applies to the total computed kilowatt-hours.

Distribution and Control Charge Prices: per Annum:

AERIAL SUPPLY: per Lighting Unit:

$ 7.00 for installations in service as of August 31, 1953, and for any replaced installation at the same location after that date.

$ 9.00 for installations in new locations after August 31, 1953.

UNDERGROUND SUPPLY: per Lighting Unit:

$24.00 for installations in service as of August 31, 1953, and for any replaced installation at the same location after that date.

$40.00 for installations in new locations after August 31, 1953.

CANCELLED
BY Revised Page No. 33A
EFFECTIVE MAR 1 - 1961

Terms and Conditions.

1. OWNERSHIP OF UTILIZATION FACILITIES.

UNDERGROUND SUPPLY: Customer shall own the Utilization Facilities comprising the supporting pole or post, foundation with 90 degree pipe bend, brackets or hangers, luminaires, lamps, ballasts, transformers or other components required for the operation of Lighting Unit and conductors and any conduits from the lamp receptacle to sidewalk level.

Where vertical extensions are required on foreign-owned poles for the support of an underground supplied Lighting Unit, the extension shall be provided and owned by the Customer. Rentals incurred on such foreign-owned posts shall be the responsibility of the Customer.

NOV 21 1957
Bureau of Research

General Provisions.

1. SERVICE. The lighting service will be operated on an all night, every night, lighting schedule of approximately 4,100 hours annual burning time, under which lights are turned on after sunset and off before sunrise. It includes the supply of lamps and their renewal when burned out, broken, or giving less than 80% of the rated light output.

2. OUTAGE ALLOWANCES. Written notice to the Company prior to 4 p. m. of the failure of any light to burn on the previous night shall entitle the Customer to a pro rata reduction in his street lighting bill for the hours of failure if such failure continues for a period in excess of 12 hours after the notice is received. Allowances will not be made for outages resulting from the Customer's failure to protect the lighting system or from riot, fire, storm, flood, interference by civil or military authorities, or any other cause beyond the Company's control.

3. INSTALLATION OF NEW OR ADDITIONAL LIGHTING. The prices in the Rate Table apply to aerially supplied standard overhead installations for (a) federal, state, county and municipal authorities and community associations entering into a five-year contract for lighting service, (b) building operation developers for lighting, during the development period, of streets that are to be dedicated, where the municipality has approved the lighting and agreed to subsequently assume the charges for it under a standard contract. Such installations will be made on the public highways at the expense of the Company to the extent warranted by the revenue in prospect, any additional investment to be assumed by the Customer. For other than aerially supplied standard overhead installations, the Company will assume the cost of any facilities

APPLICABILITY INDEX OF RIDERS

Introductory Statement

Customers under the different rates of this TARIFF frequently desire special services or present unusual situations and conditions of supply which require special supply terms, charges or guarantees or which warrant modification of the amount or method of charge from the prices set forth in the rate under which they are supplied. Modifications for such conditions are defined by rider provisions included as a part of this TARIFF. Riders may be employed when applicable, with or without signed agreement between the Customer and the Company as the case may require, notwithstanding anything to the contrary contained in the rate to which the rider is applied.

OFFICIALLY FILED TARIFF

STANDARD RIDERS—*Continued*

Applicable to rates as indicated in Applicability Index of Riders, Page No. 41

TEMPORARY SERVICE RIDER—*Continued*

Investment in Supply Facilities. The cost of the connection and disconnection of the service supply and of any equipment and extension of facilities required to furnish the temporary service under the applicable rate shall be paid by the Customer, but such payment shall not confer upon, nor entitle the Customer to any title to, or right of property in, said facilities and equipment.

Minimum Term. Application of this rider to Rates R, R-S and GLP shall not, for billing purposes, be considered to be for a period of less than one month.

Application of this rider to Rates PD and HT shall require payment of the minimum provisions of the contract for each month of the temporary service period, but in no case shall such period be considered, with respect to the guarantee of the monthly minimum charges, as of less duration than 6 months.

Rate-Price Modification. When this rider is applied to Rates PD or HT, the last price block of the energy charge shall not apply.

Contract Term. Short term arrangements as agreed upon.

TRANSFORMER-RENTAL RIDER

(C) **Applicability.** To the supply in Suburban Divisions, of a transformer installation furnished, operated and maintained on the premises of a Customer to transform a single standard primary or high-tension service to a supply corresponding in phase and voltage to the standard polyphase secondary or primary service supplied by the Company at the time when and in the territory where the installation is made. Transformation from standard high-tension service to 2,400 volts, 3-phase, although non-standard in 4,160-volt, 3-phase, areas, may be furnished at the Customer's request in such areas.

Installation Conditions. The transformer installation under this rider is limited to a single bank of transformers installed in accordance with the Company's applicable standards, and to exclusive operation and control by the Company. Suitable housing, foundations, supporting structures, and inclosures, for such installations and all secondary facilities including suitable over-load protective equipment, shall be provided, owned, and maintained, by the Customer.

Monthly Rental Charge.

Fixed Charge:

Supply Voltage	Type of Switching Installation	Amount
(C) 2,400 volts or 4,160 volts	Outdoor or Indoor	$16.50
13,200 volts	Outdoor	44.00
13,200 volts	Indoor	99.00
33,000 volts	Outdoor	99.00

Operating Charge:

8.25¢ per kilowatt of demand.

(C) Indicates change.

EFFECTIVE MAR 31 1953

CHANGES

Title Page. A local office address has been changed.

Rate SL Street Lighting. (1st Rev. 31, 32, 33.)

Rate Table I has been withdrawn, as it is not in use.

Prices are provided for additional sizes and types, namely:

15,000 lumen incandescent lamps;

15,000 and 20,000 lumen multiple mercury vapor lamps.

The "Description of Conditions of Service" and "Terms and Conditions" have been more clearly defined.

Rate SL-S Street Lighting. (1st Rev. 34; Orig. 34A.)

Prices are provided for additional sizes and types, namely:

15,000 lumen incandescent lamps;

15,000 and 20,000 lumen multiple mercury vapor lamps;

Installations at remote locations.

The "General Provisions" have been rearranged and service specifications more clearly defined.

TARIFF ELECTRIC—PA. P. U. C. No. 19, *first filed to be effective April 18, 1949, is modified so that it now consists of the* ORIGINAL TARIFF *with the following changes:*

RATES AVAILABLE UNDER THIS TARIFF

(D) **Rate R (Philadelphia Division) and Rate R-S (Suburban Divisions) Residence Service.** These rates are available to single-phase electric service to the dwelling and appurtenances of a single private family for the domestic requirements of its members other than for the main or principal source of heat supply and also to service for related farm purposes when such service is supplied through one meter in conjunction with the farmhouse domestic requirements.

"Residence Service," as employed herein, is not susceptible of particularizing all the uses embraced therein.

As illustrative only of its general meaning:

The term includes service to: (a) The separate dwelling-unit in an apartment house, but not the halls, basement, or other portions of such building common to more than one such unit; (b) The premises occupied as the living-quarters of five persons or less who unite to establish a common dwelling-place for their own personal comfort and convenience on a cost-sharing basis; (c) The premises owned by a church, and primarily designated or set aside for, and actually occupied and used as, the dwelling-place of a priest, rabbi, pastor, rector, nun or other functioning Church Divine, and his or her resident associates; (d) Private dwellings in which space is occasionally used for the conduct of business by a person residing therein; (e) Farm purpose uses by an individual employing the natural processes of growth for the production of grain, stock, dairy, poultry, garden truck, or other agricultural products.

The term does NOT include service to: (a) Premises institutional in character including Clubs, Fraternities, Orphanages or Homes; (b) Premises defined as a rooming house or boarding house in the Municipal Code for Cities of the First Class enacted by Act of General Assembly; (c) The space in an apartment or other residential building primarily devoted to a professional or other office, studio, or other gainful pursuit; (d) Farms operated principally to sell, prepare, or process products produced by others; (e) Electric furnaces or welding apparatus other than a transformer type "limited input" arc welder with an input not to exceed 37½ amperes at 240 volts.

Rate HS Off-Peak Heat Storage. Available only in conjunction with residence service for any Customer receiving service at 120-240 volts, 3 wires, for the operation of heat storage hot water equipment when the demand or load of the heat storage installation does not exceed the Customer's demand for service to his other residence load.

Rate GLP General Light and Power is defined as the supply of electric service through a single metering installation for general lighting and/or power requirements of offices, professional, commercial or industrial establishments, and other applications outside the scope of the Residence Service Rates; Residence Service, when used through the same meter and in conjunction with General Light and Power Service, will be supplied under this rate unless the Customer so separates and arranges his wiring that domestic use can be separately metered and makes a separate contract for other service.

Rate PD Primary-Distribution Power. Untransformed service from primary supply lines, where the Customer installs, owns, and maintains the receiving equipment.

Rate HT High-Tension Power. Untransformed service from high-tension transmission lines, where the Customer installs, owns, and maintains the receiving equipment.

Rate QLF Quantity—High Load Factor—Power. Untransformed, large quantity, high load factor, electric service from high-tension transmission lines, where the Customer installs, owns, and maintains the receiving equipment.

Rate MLP Municipal Light and Power. Available only to the City of Philadelphia, in lieu and to the exclusion of Rate GLP, for electric service requirements of the municipality for purposes other than provided under the Availability Statement of Rate SL-P.

Rate FLP Federal Light and Power. Available only to the United States Government, in lieu and to the exclusion of Rate GLP, for the general lighting and power requirements of Federal departments.

Rate TL-S Traffic Signal Lighting. Available to any municipality in Suburban Divisions using the Company's standard service for multiple incandescent traffic-signal lights.

TARIFF

CANCELLED by Revised Page No. 6 EFFECTIVE JUN 21 1965

DEFINITION OF TERMS AND EXPLANATION OF ABBREVIATIONS—*Continued*

pronouns. The masculine, singular, pronoun (he, his, him) relates to Customers whether male, female, partnership or corporation.

property-line. The division-line between land held in or for private use, and land in which the public or the Company has a right of use; or, the division-line between separately owned or occupied land.

service. The supply of capacity for use by the Customer, including all things done by the Company in connection with such supply.

STANDARD SINGLE-PHASE SECONDARY; alternating current, 60 cycles, nominally 120-240 volts, 3 wires, except that nominally 120 volts, 2 wires may be supplied for connection to lighting installations which consist of not more than a single 15 ampere circuit.

STANDARD POLYPHASE SECONDARY; alternating current, 60 cycles:

(a) nominally 120-240 volts, 2-phase, 5 wires;

(b) nominally 240 volts, 3-phase, 3 wires; a fourth wire neutral will be extended for the supply of 120-240 volt single-phase equipment in combination with this service where the service-capacity required does not exceed 15 kilovoltamperes on any one of the phases;

(c) nominally 120-208 volts, 3-phase, 4 wires for the exclusive supply of secondary service to one or more buildings or units situated on a single premises occupied by one or more than one Customer, with transformers and secondaries installed on the premises at suitable locations provided by the owner;

(d) nominally 120-240 volts, 3-phase, 7 wires, for supply only to single-phase equipment requiring more than 50 kilovoltamperes of service capacity, with transformers located on Customer's premises.

STANDARD PRIMARY; unregulated alternating current, 60 cycles, nominally 2,400 volts, 2-phase, 3 wires, or nominally 4,160 volts, 3-phase, 3 or 4 wires.

(C) STANDARD HIGH TENSION; unregulated alternating current, 60 cycles, 3-phase, 3 wires:

(a) nominally 13,200 volts (subject to paragraph (c) hereof) in the CITY OF PHILADELPHIA with the exception of that portion north of a boundary formed by Pennypack Creek from its intersection with the City Line eastwardly to Verree Road, and thence by a line projected to the intersection of Grant Avenue and Surrey Road, by Grant Avenue to Roosevelt Boulevard, by Roosevelt Boulevard to a point 3,000 feet north of Grant Avenue, and thence by a line, paralleling Grant Avenue, projected to Poquessing Creek; in MONTGOMERY COUNTY as follows:—that portion of Cheltenham Township, bounded by Washington Lane, Church Road to the Abington Township Line, the Abington Township Line, and the City of Philadelphia; and that portion of Cheltenham Township bounded by the Springfield Township Line, Cheltenham Avenue, Washington Lane and a line projected from Washington Lane to the Springfield Township Line, such line being parallel to and ½ mile from Cheltenham Avenue; and that portion of Lower Merion Township, bounded by the City Line, the Norristown Branch of the Pennsylvania Railroad and the Schuylkill River; and that portion of Springfield Township, bounded by Cheltenham Township Line, Ivy Hill Road, Stenton Avenue and a line formed by Graver's Lane extended to the boundary with Cheltenham Township at Cheltenham Avenue; in DELAWARE COUNTY as follows:—City of Chester; Eddystone, Marcus Hook, Trainer and Upland Boroughs; Lower Chichester and Tinicum Townships; and in that portion of Ridley Township adjacent to Essington Avenue;

(b) nominally 33,000 volts (subject to paragraph (c) hereof) elsewhere for other than loads of Customers being supplied at 13,200 volts as of October 1, 1955, or such increases in those loads as can be supplied with existing 13,200-volt facilities;

(c) nominally 66,000 or 132,000 volts anywhere in the Company's service territory for loads of such character as to require supply at one of such voltages in order not to impose unsatisfactory service conditions on the Company's supply-system, or for loads of such character that supply at one of such voltages is desired both by the Company and the Customer.

service-supply lines. The facilities (conductors, cables, conduits, etc.) extending from the Company's facilities in the highway or other property in question to the facilities owned and maintained by the Customer.

(C) Indicates change.

RATE SL-P STREET LIGHTING IN CITY OF PHILADELPHIA

(C) Availability.

Only to a governmental agency, federal, state or municipal, for outdoor lighting service of highways, bridges, parks or similar places, for the safety and convenience of the public, within the City of Philadelphia by series incandescent filament lamps and by multiple or series mercury-vapor or fluorescent lamps of standard sizes and types approved by the Company where the Customer installs, owns and maintains all Utilization Facilities as hereinafter defined. Service will be supplied under this Rate for Street Lighting Units supported in a conventional manner, such as on poles, posts, brackets or hangers, and under conditions of installation and supply acceptable to the Company.

Current Characteristics.

From Series 6.6 Amperes or Standard Single-Phase Secondary circuits.

CANCELLED
BY Revised Page No. 33A
EFFECTIVE SEP 1 - 1958

(C) Rate Table.

The term Lighting Unit for the purpose of determining wattage and Distribution and Control Charge shall include:

(a) for Aerial Installations:—All lamps, ballasts, transformers or other load components pertinent to a lighting installation supported by a single bracket or hanger.

(b) for Underground Installations—All lamps, ballasts, transformers or other load components pertinent to a lighting installation at one pole, post, bracket or hanger location.

Lighting Unit wattage will be composed of manufacturer's rating of the lamps, ballasts, transformers or other load components required for its operation. Kilowatt-hours will be computed as the product of the total connected Lighting Unit wattage in Kw. in service as of each day of the month and the hours of lighting schedule for the Lighting Unit in the billing period.

Energy Charge Prices: per Kwh.:

Lighting Units up to 250 watts.....	2.6¢ per Kwh.
Lighting Units from 251 to 400 watts.....	2.1¢ per Kwh.
Lighting Units in excess of 400 watts.....	1.6¢ per Kwh.

RECEIVED
Public Utility Commission
JUN 20 1957

TARIFF SECTION

Fuel Adjustment Clause: Applies to the total computed kilowatt-hours.

Distribution and Control Charge Prices: per Annum:

AERIAL SUPPLY: per Lighting Unit:

$ 7.00 for installations in service as of August 31, 1953, and for any replaced installation at the same location after that date.

$ 9.00 for installations in new locations after August 31, 1953.

UNDERGROUND SUPPLY: per Lighting Unit:

$24.00 for installations in service as of August 31, 1953, and for any replaced installation at the same location after that date.

$40.00 for installations in new locations after August 31, 1953.

Terms and Conditions.

(C) 1. OWNERSHIP OF UTILIZATION FACILITIES.

UNDERGROUND SUPPLY: Customer shall own the Utilization Facilities comprising the supporting pole or post, foundation with 90 degree pipe bend, brackets or hangers, luminaires, lamps, ballasts, transformers or other components required for the operation of Lighting Unit and conductors and any conduits from the lamp receptacle to sidewalk level.

Where vertical extensions are required on foreign-owned posts for the support of an underground supplied Lighting Unit, the extension shall be provided and owned by the Customer. Rentals incurred on such foreign-owned posts shall be the responsibility of the Customer.

(C) RATE SL-S STREET LIGHTING

Availability.

Outdoor lighting of highways, bridges, parks and similar places for the safety and convenience of the public in Suburban Divisions.

Rate Table—Manufacturers' Rating of Lamp Sizes.

INCANDESCENT LAMPS

Size of Lamp	Rate Per Year	Size of Lamp	Rate Per Year
1,000 Lumens	$24.75	6,000 Lumens	$61.60
2,500 "	39.60	10,000 "	84.70
4,000 "	50.60	15,000 "	125.00

MULTIPLE MERCURY VAPOR LAMPS

Size of Lamp	Rate Per Year	Size of Lamp	Rate Per Year
15,000 Lumens	$97.00	20,000 Lumens	$107.00

RATE PER LAMP FOR AN INSTALLATION REMOTE FROM AN EXISTING SERIES CIRCUIT

Installations of Single Lamps.....1.5 times the above Rate
Installations of Two Lamps.....1.25 times the above Rate
Installations of Three or More Lamps.....Same as the above Rate

The supply of 320 lumen lamps at $13.20 per year and 600 lumen lamps at $18.70 per year is in process of elimination and is restricted for any Customer to the total of each rating in service on January 21, 1952 and in each succeeding year beginning January 1, 1953 to the number of each rating in service on January first of each such year.

Lighting Improvement Discount.

The amount by which any monthly bill exceeds the product of $2.50 times the total number of lamps supplied shall be subject to a discount of 10% for Customers having in service no lamps smaller than 1,000-lumen rating, or to a discount of 5% for Customers having in service any lamps smaller than 1,000-lumen rating.

General Provisions.

1. SERVICE. The lighting service will be operated on an all night, every night, lighting schedule of approximately 4,100 hours annual burning time, under which lights are turned on after sunset and off before sunrise. It includes the supply of lamps and their renewal when burned out, broken, or giving less than 80% of the rated light output.

2. OUTAGE ALLOWANCES. Written notice to the Company prior to 4 p. m. of the failure of any light to burn on the previous night shall entitle the Customer to a pro rata reduction in his street lighting bill for the hours of failure if such failure continues for a period in excess of 12 hours after the notice is received. Allowances will not be made for outages resulting from the Customer's failure to protect the lighting system or from riot, fire, storm, flood, interference by civil or military authorities, or any other cause beyond the Company's control.

3. INSTALLATION OF NEW OR ADDITIONAL LIGHTING. The prices in the Rate Table apply to aerially supplied standard overhead installations for (a) federal, state, county and municipal authorities and community associations entering into a five-year contract for lighting service, (b) building operation developers for lighting, during the development period, of streets that are to be dedicated, where the municipality has approved the lighting and agreed to subsequently assume the charges for it under a standard contract. Such installations will be made on the public highways at [illegible] the Company to the extent warranted by the revenue in prospect, any additional [illegible] demanded by the Customer. For other than aerially supplied standard overhead [illegible]ions, the Company will assume the cost of any facilities

APPLICABILITY INDEX OF RIDERS

Introductory Statement

Customers under the different rates of this TARIFF frequently desire special services or present unusual situations and conditions of supply which require special supply terms, charges or guarantees or which warrant modification of the amount or method of charge from the prices set forth in the rate under which they are supplied. Modifications for such conditions are defined by rider provisions included as a part of this TARIFF. Riders may be employed when applicable, with or without signed agreement between the Customer and the Company as the case may require, notwithstanding, anything to the contrary contained in the rate to which the rider is applied.

TARIFF SECTION

LIST OF CHANGES MADE BY THIS SUPPLEMENT

CHANGES

Tariff Electric-Pa. P.U.C. No. 20 is hereby withdrawn and cancelled effective January 1, 1954.

Pursuant to the merger of Chester County Light and Power Company into Philadelphia Electric Company, service will be supplied under the provisions of Tariff Electric-Pa. P.U.C. No. 19 of Philadelphia Electric Company.

STANDARD RIDERS—*Continued*

Applicable to rates as indicated in Applicability Index of Riders, Page No. 41

TRANSFORMER-RENTAL RIDER—*Continued*

Demand Defined. The demand for application of this Rider shall be

(a) the billing demand of the current month, or

(C) (b) when in conjunction with the Night Service Rider, the sum of the on-peak billing demand of the current month and the greatest off-peak billing demand of the 12 months ending with the current month, said sum, however, not to exceed the greatest monthly total of on-peak and off-peak billing demands in the same period, or

(c) when in conjunction with the Seasonal Rider, not less than 2/3 of the greatest demand of the preceding 11 months.

No waivers allowable as to minimum demands shall be considered as applicable in the determination of the transformer-rental charge.

Liability. The Company shall not be liable for any loss, damage or injuries to person or property, including loss of life or property, sustained by the Customer, his agents or employees, or by any person whomsoever, arising out of the presence or operation of said transformer installation on the Customer's premises, except where caused by the negligence of the Company, its agents and employees, and except for injuries sustained by the Company's employees, not caused by the negligence of the Customer, his agents and employees.

Contract Term. Coincidentally with the rate to which this rider is attached, but for not less than 3 years from the date the rider is accepted.

RECEIVED
Penna. Public Utility Comm.
JUL 12 1963
Bureau of Rates and Research

VENDOR RIDER

Applicability. To the supply of service for the operation of electrical appliances, including electric ranges, radios and lighting fixtures, the aggregate rated capacity of which is not less than 500 watts, and which are operated solely for making intermittent sales demonstrations by a Customer who is a vendor of such appliances and/or fixtures and is also otherwise a Customer of the Company.

Billing Demand Factor. The demonstration equipment shall not be included as part of the connected load for determining the Customer's assessed demand. The capacity of signs and window-display loads shall not be thus excluded.

(C) Indicates change.

OFFICIALLY FILED TARIFF

RATES AVAILABLE UNDER THIS TARIFF

Rate R (PHILADELPHIA DIVISION) and **Rate R-S** (SUBURBAN DIVISIONS) **Residence Service.** Residence Service is defined as the supply of single-phase electric service to the dwelling and appurtenances of a single private family for the domestic requirements of its members other than for the main or principal source of heat supply.

"Residence Service," as employed herein, is not susceptible of particularizing all the uses embraced therein.

As illustrative only of its general meaning:

The term includes service to: (a) The separate dwelling-unit in an apartment house, but not the halls, basement, or other portions of such building common to more than one such unit; (b) The premises occupied as the living-quarters of five persons or less who unite to establish a common dwelling-place for their own personal comfort and convenience on a cost-sharing basis; (c) The premises owned by a church, and primarily designated or set aside for, and actually occupied and used as, the dwelling-place of a priest, rabbi, pastor, rector, nun or other functioning Church Divine, and his or her resident associates; (d) Private dwellings in which space is occasionally used for the conduct of business by a person residing therein.

The term does NOT include service to: (a) Premises institutional in character including Clubs, Fraternities, Orphanages or Homes; (b) Premises defined as a rooming house or boarding house in the Municipal Code for Cities of the first class enacted by Act of General Assembly; (c) The space in an apartment or other residential building primarily devoted to a professional or other office, studio, or other gainful pursuit. This rate is not applicable to the use in the home of electric furnaces or welding apparatus other than a transformer type "limited input" arc welder with an input not to exceed 37½ amperes at 240 volts.

Rate HS Off-Peak Heat-Storage. Available only in conjunction with residence service for any Customer receiving service at 120-240 volts, 3 wires, for the operation of heat-storage hot-water equipment when the demand or load of the heat-storage installation does not exceed the Customer's demand for service to his other residence load.

Rate GLP General Light and Power is defined as the supply of electric service through a single metering installation for general lighting and/or power requirements of offices, professional, commercial or industrial establishments, and other applications outside the scope of the Residence Service Rates; Residence Service, when used through the same meter and in conjunction with General Light and Power Service will be supplied under this rate unless the Customer so separates and arranges his wiring that domestic use can be separately metered and makes a separate contract for other service.

Rate PD Primary-Distribution Power. Untransformed service from primary supply-lines, where the Customer installs, owns, and maintains, the receiving equipment.

Rate HT High-Tension Power. Untransformed service from high-tension transmission lines, where the Customer installs, owns, and maintains, the receiving equipment.

Rate QLF Quantity—High Load Factor—Power. Untransformed, large quantity, high load factor, electric service from high-tension transmission lines, where the Customer installs, owns, and maintains, the receiving equipment.

(C) **Rate MLP Municipal Light and Power.** Available only to the CITY OF PHILADELPHIA, in lieu and to the exclusion of Rate GLP, for electric service requirements of the municipality for purposes other than provided under the Availability Statement of Rate SL-P.

Rate FLP Federal Light and Power. Available only to the UNITED STATES GOVERNMENT, in lieu and to the exclusion of Rate GLP, for the general lighting and power requirements of Federal departments.

Rate TL-S Traffic Signal Lighting. Available to any municipality in SUBURBAN DIVISIONS using the Company's standard [illegible] for Public Highway traffic-signal lights.

EFFECTIVE

DEFINITION OF TERMS AND EXPLANATION OF ABBREVIATIONS—*Continued*

pronouns. The masculine, singular, pronoun (he, his, him) relates to Customer, whether male, female, partnership or corporation.

property-line. The division-line between land held in or for private use, and land in which the public or the Company has a right of use; or, the division-line between separately owned or occupied land.

service. The supply of capacity for use by the Customer, including all things done by the Company in connection with such supply.

STANDARD SINGLE-PHASE SECONDARY; alternating current, 60 cycles, nominally 120-240 volts, 3 wires, except that nominally 120 volts, 2 wires may be supplied for connection to wiring installations which consist of not more than a single 15 ampere circuit.

STANDARD POLYPHASE SECONDARY; alternating current, 60 cycles:

(a) nominally 120-240 volts, 2-phase, 5 wires;

(b) nominally 240 volts, 3-phase, 3 wires; a fourth wire neutral will be extended for the supply of 120-240 volt single-phase equipment in combination with this service where the service-capacity required does not exceed 15 kilovoltamperes on any one of the phases;

(c) nominally 120-208 volts, 3-phase, 4 wires for the exclusive supply of secondary service to one or more buildings or units situated on a single premises occupied by one or more than one Customer, with transformers and secondaries installed on the premises at suitable locations provided by the owner.

(d) nominally 120-240 volts, 3-phase, 7 wires, for supply only to single-phase equipment requiring more than 50 kilovoltamperes of service capacity, with transformers located on Customer's premises.

STANDARD PRIMARY; unregulated alternating current, 60 cycles, nominally 2,400 volts, 2-phase, 3 wires, or nominally 4,160 volts, 3-phase, 3 or 4 wires.

(C) STANDARD HIGH TENSION; unregulated alternating current, 60 cycles, 3-phase, 3 wires:

(a) nominally 13,200 volts (subject to paragraph (c) hereof) in the City of Philadelphia with the exception of that portion north of a boundary formed by Pennypack Creek from its intersection with the City Line eastwardly to Grant Avenue, and by Grant Avenue to Poquessing Creek; in Montgomery County as follows:—that portion of Cheltenham Township, bounded by Washington Lane, Church Road to the Abington Township Line, The Abington Township Line, and the City of Philadelphia; and that portion of Lower Merion Township, bounded by the City Line, the Norristown Branch of the Pennsylvania Railroad and the Schuylkill River; in Delaware County as follows:—City of Chester; Eddystone, Marcus Hook, Trainer and Upland Boroughs; Lower Chichester and Tinicum Townships; and in that portion of Ridley Township adjacent to Essington Avenue.

(b) nominally 33,000 volts (subject to paragraph (c) hereof) elsewhere for other than loads of Customers being supplied at 13,200 volts as of October 1, 1955, or such increases in those loads as can be supplied with existing 13,200-volt facilities.

(c) nominally 66,000 or 132,000 volts anywhere in the Company's service territory for loads of such character as to require supply at one of such voltages in order not to impose unsatisfactory service conditions on the Company's supply-system, or for loads of such character that supply at one of such voltages is desired both by the Company and the Customer.

service-supply lines. The facilities (conductors, cables, conduits, etc.) extending from the Company's facilities in the highway or other trunk-line portion to the facilities owned and maintained by the Customer.

RATE HS OFF-PEAK HEAT STORAGE SERVICE

(C) **Availability.**

Only in conjunction with residence service, for any Customer receiving service at 120-240 volts, 3 wires, for the operation of heat-storage hot-water equipment of a type approved by the Company, when the demand or load of the heat storage installation does not exceed Customer's demand for service to his other residence load.

Not available when the source of supply is service purchased from a neighboring company under a borderline purchase agreement.

Rate.

1¢ per kwh.

Minimum Charge.

$1.12 per month.

(C) **Special Rules and Regulations.**

The heat-storage installation shall be 240-volt, alternating-current, 2-wire, single-phase, 60-cycle.

The supply of service to the water heater shall be confined to a single connection, separately metered, and the daily period of use limited by a clock or other timing device to hours to be established from time to time by the Company. The clock and controlling device shall be types provided by the Company; shall be subject to inspection and control of setting by the Company; and shall be sealed by the Company.

The Company shall not be obligated to provide additional or new supply facilities.

When service under this Rate is supplied to a Customer served in accordance with the provisions of the Extension Guarantee Rider, *monthly guarantees as provided in said rider shall not be affected by any payments for service under this Rate.*

Term of Contract.

Annual.

Payment Terms.

RATE SL-P STREET LIGHTING IN CITY OF PHILADELPHIA

Availability.

Only to a governmental agency, federal, state or municipal, for outdoor lighting service of highways, bridges, parks or similar places, for the safety and convenience of the public, within the City of Philadelphia by series incandescent filament lamps of standard sizes and by multiple or series mercury-vapor lamps of standard sizes where the Customer installs, owns and maintains all Utilization Facilities as hereinafter defined.

Current Characteristics.

From Series 6.6 Amperes of Standard Single-Phase Secondary circuits.

Rate Table.

Energy Charge Prices: per Kwh.:

Lamps up to 250 watts: 2.6¢ per Kwh.
Lamps from 251 to 400 watts: 2.1¢ per Kwh.
Lamps in excess of 400 watts: 1.6¢ per Kwh.

Lamp wattage to be composed of manufacturer's rating of the lamp and of any ballast or transformer required for operation of the lamp. Kilowatt-hours shall be computed as the product of the total connected lamp wattage in kw. in service as of each day of the month and the hours of lighting schedule for the lamp in the billing period.

Fuel Adjustment Clause: Applies to the total computed kilowatt-hours.

Distribution and Control Charge Prices: per Annum:

AERIAL SUPPLY: per lamp:

$7.00 for installations in service as of August 31, 1953, and for any replaced installation at the same location after that date.

$9.00 for installations in new locations after August 31, 1953.

UNDERGROUND SUPPLY: per post:

$24.00 for installations in service as of August 31, 1953, and for any replaced installation at the same location after that date.

$40.00 for installations in new locations after August 31, 1953.

Lamp Renewing, Cleaning and Replacement of Glassware Charge Prices: per Annum: *(This provision of the Rate Table applies to a complete coverage of all lamps of the Customer's street lighting system and is not available for partial or piecemeal application. Company may discontinue this service and withdraw this provision of the Rate Table beginning with January 1 of any year by giving written notice to the Customer on or before the immediately preceding June 1.)*

For the renewal of lamps broken or burned out, replacement of broken glassware other than lamps, where replacement glassware is supplied by the Customer, and periodic cleaning of light transmitting and reflecting surfaces of luminaires in service:

SERIES INCANDESCENT:	1,000 Lumens		$ 2.00 per Lamp

RATE SL-S STREET LIGHTING

Availability.

Series, outdoor incandescent service for the lighting of public places, parks, streets, private roadways and similar purposes in SUBURBAN DIVISIONS.

(I) **Rate Table—Manufacturers' Rating of Lamp Sizes.**

SIZE OF LAMP	RATE PER YEAR	*RESTRICTED SIZES	RATE PER YEAR
1,000 Lumens	$24.75	320 Lumens	$13.20
2,500 "	39.60	600 "	18.70
4,000 "	50.60		
6,000 "	61.60		
10,000 "	84.70		

** The supply of 320 and 600 lumen lamps is in the process of elimination and is restricted for any Customer to the total of each rating in service on April 18, 1949 and in each succeeding year beginning January 1, 1950 to the number of each rating in service on January first of each such year.*

Lighting Improvement Discount.

The amount by which any monthly bill exceeds the product of $2.50 times the total number of lamps supplied shall be subject to a discount of 10% for Customers having in service no lamps smaller than 1,000-lumen rating, or to a discount of 5% for Customers having in service any lamps smaller than 1,000-lumen rating.

General Provisions.

1. INSTALLATION COST. A lighting system of aerial construction will be installed where warranted by the business in prospect, at the cost and expense of the Company or an equivalent allowance will be made toward the cost of ornamental, underground or non-standard equipment, for (a) municipal authorities, housing developments and community associations entering into a five-year contract for lighting service, (b) building operation developers for the lighting of their streets during the development period, when they have the approval of the contemplated lighting by the municipality in which they are located with its agreement to subsequently assume, under its standard contract, the charges for such lighting. The cost of installation for private lighting or for contracts of less than standard term shall be paid by the Customer.

2. SERVICE. The lighting service will be operated on an all night, every night, lighting schedule of approximately 4,100 hours annual burning time, under which lights are turned on after sunset and off before sunrise. It includes the supply of lamps, energy, the cleaning and maintenance of lamps and fixtures, and the renewal of lamps burned out, broken, or giving less than 80% of the rated light output.

3. LOCATION AND TYPE OF INSTALLATION. This rate applies to lamps supplied at locations designated by properly authorized representatives of the Customer and supported from standard overhead construction. It also applies to the supply from underground cable to ornamental standards where the Customer assumes the difference in cost between overhead and underground construction.

4. AUTHORIZATION AND PROTECTION. The Customer shall, to the extent of his ability, furnish any requisite authority for the erection and maintenance of poles, wires, fixtures and other equipment necessary to operate lights at the locations designated and shall protect the Company from malicious damage to the lighting system.

5. ADDITIONAL LIGHTING. Additional lamps will be installed by the Company on the same basis as defined in "INSTALLATION COST" upon written notice and agreement from the Customer covering their use for the remaining period of an uncancelled contract, unless the proposed additional lighting is at such a remote location, or the number or spacing of the additional lamps, or lack of necessary supply lines or any other reason makes the investment or cost for supply excessive, in which case the installation shall be subject to agreement between the Customer and the Company as to the investment or cost to be borne by the Customer.

6. OUTAGE ALLOWANCES. Written notice to the Company prior to 4 p. m. of the failure of any light to burn on the previous night except when due to the Customer's failure to protect the lighting system or his interference with it, shall entitle the Customer to a pro rata reduction in his street lighting bill for the hours of failure if such failure continues for a period in excess of 12 hours after the notice is received.

Contract Term.

Standard contracts shall be for a term of 5 years, and thereafter from term to term.

Payment Terms.

Bills will be rendered monthly. Each month, for the purpose of prorating the p[illegible] will be considered 1/12 of a year.

(I) **Indicates increase.**

STANDARD RIDERS—*Continued*

Applicable to rates as indicated in Applicability Index of Riders, Page No. 41

CONSTRUCTION RIDER

Applicability. To service supplied during a preliminary operating or construction period while the load is being built up to normal level or during a receding load period after the expiration of a standard contract term while a business is in process of dissolution.

Guarantee Waived. The guarantee minimum of a contract will be waived during the expanding load period preceding the operation within the load limits provided in the contract or the receding load period subsequent to the fulfillment of a contract term.

Rider Term. The total term of application of this rider during the preliminary or construction period shall be 6 months subject to the option of the Company to grant not more than two successive renewals of the rider term on major construction projects. Its application subsequent to the completion of a contract term shall be for not more than one year.

Contract Term. The termination date of a contract for service to permanent installations to which this rider is applied shall be extended for a period corresponding to the total time of the rider application during start up, construction or extension of the Customer's plant so that the Company will be assured the business represented by service to the total connected load for the term provided in the contract.

Other Riders. This rider, when applied on temporary installations to which the *Temporary Service Rider* is also applied, shall not act to modify the requirement that monthly minimum charges be paid for a period of not less than 6 months.

TARIFF SECTION

CONTRACT COMMUTATION RIDER

Applicability. To service supplied at the option of the Company or request of the Customer under an applicable rate for a stipulated term less than annual, but not less than 3 months, in lieu of the time-factor of the standard annual term and its minimum payment obligations.

Commutation of Rate. The 12 months' total of the quantity factors of the Monthly Rate Table of the applicable rate, including minimum, discount, and other provisions, shall be prorated to equal monthly amounts for the term agreed upon, and such commuted rate table shall be employed for billing.

Rate Application. Records of use, both kilowatt-hours and demand, shall be determined monthly and the commuted prices, as fixed by the term of the contract, shall be applied to such use and billed unless the result is less than the commuted monthly minimum.

Contract Extensions. Where use is continued beyond the term contracted under the rider, such additional use prior to the end of 1 year from the date of the rider application shall be billed at the price block of the rate to which the Customer's prior use shall entitle him—at the low step of the rate if the use during the contract period shall have been sufficient to have covered the quantities of the higher price blocks.

Contract Renewals. If the use of service continues for more than 12 months, it shall, beginning with the second year or later renewal period, be billed either—

(a) at commuted rates in accordance with a renewal of the rider application, or

(b) at the Monthly Rate Table of the applicable rate.

Annual Adjustment. Contingent on use, as protected by commuted annual minimums, service is to be billed at prices and price blocks equivalent to those of an annual term contract and the total amount paid for service supplied during intervals of one year or less is to be not more than would result from billing all service taken for the entire period as a single block of use and a single application of 12 times the monthly rate table.

Term. Contracts for service under the terms of this rider shall be for such term as fixed by the Company, or stipulated by the Customer.

RATES AVAILABLE UNDER THIS TARIFF

Rate R (PHILADELPHIA DIVISION) and **Rate R-S** (SUBURBAN DIVISIONS), **Residence Service.** Residence Service is defined as the supply of single-phase electric service to the dwelling and appurtenances of a single private family for the domestic requirements of its members other than for the main or principal source of heat supply.

"Residence Service," as employed herein, is not susceptible of particularizing all the uses embraced therein.

As illustrative only of its general meaning:

The term includes service to: (a) The separate dwelling unit in an apartment house, but not the halls, basement, or other portions of such building common to more than one such unit; (b) The premises occupied as the living-quarters of five persons or less who unite to establish a common dwelling-place for their own personal comfort and convenience on a cost-sharing basis; (c) The premises owned by a church, and primarily designated or set aside for, and actually occupied and used as, the dwelling-place of a priest, rabbi, pastor, rector, nun or other functioning Church Divine, and his or her resident associates; (d) Private dwellings in which space is occasionally used for the conduct of business by a person residing therein.

(C) The term does NOT include service to: (a) Premises institutional in character including Clubs, Fraternities, Orphanages or Homes; (b) Premises defined as a rooming house or boarding house in the Municipal Code for Cities of the first class enacted by Act of General Assembly; (c) The space in an apartment or other residential building primarily devoted to a professional or other office, studio, or other gainful pursuit. This rate is not applicable to the use in the home of electric furnaces or welding apparatus other than a transformer type "limited input" arc welder with an input not to exceed 37½ amperes at 240 volts.

(C) **Rate HS Off-Peak Heat-Storage.** Available only in conjunction with residence service for any Customer receiving service at 120-240 volts, 3 wires, for the operation of heat-storage hot-water equipment when the demand or load of the heat-storage installation does not exceed the Customer's demand for service to his other residence load.

Rate GLP General Light and Power is defined as the supply of electric service through a single metering installation for general lighting and/or power requirements of offices, professional, commercial or industrial establishments, and other applications outside the scope of the Residence Service Rates; Residence Service, when used through the same meter and in conjunction with General Light and Power Service will be supplied under this rate unless the Customer so separates and arranges his wiring that domestic use can be separately metered and makes a separate contract for other service.

Rate PD Primary-Distribution Power. Untransformed service from primary supply-lines, where the Customer installs, owns, and maintains, the receiving equipment.

Rate HT High-Tension Power. Untransformed service from high-tension transmission lines, where the Customer installs, owns, and maintains, the receiving equipment.

Rate QLF Quantity—High Load Factor—Power. Untransformed, large quantity, high load factor, electric service from high-tension transmission lines, where the Customer installs, owns, and maintains, the receiving equipment.

Rate MLP Municipal Light and Power. Available only to the CITY OF PHILADELPHIA, in lieu and to the exclusion of Rate GLP, for electric service supplied to the municipality for purposes other than street lighting.

Rate FLP Federal Light and Power. Available only to the UNITED STATES GOVERNMENT, in lieu and to the exclusion of Rate GLP, for the general lighting and power requirements of Federal departments.

EFFECTIVE JUN 10 1958

DEFINITION OF TERMS AND EXPLANATION OF ABBREVIATIONS—*Continued*

pronouns. The masculine, singular, pronoun (he, his, him) relates to Customer, whether male, female, partnership or corporation.

property-line. The division-line between land held in or for private use and land in which the public or the Company has a right of use; or, the division-line between separately owned or occupied land.

service. The supply of capacity for use by the Customer, including all things done by the Company in connection with such supply.

(C) STANDARD SINGLE-PHASE SECONDARY; alternating current, 60 cycles, nominally 120–240 volts, 3 wires, except that nominally 120 volts, 2 wires may be supplied for connection to wiring installations which consist of not more than a single 15 ampere circuit.

(C) STANDARD POLYPHASE SECONDARY; alternating current, 60 cycles:

(a) nominally 120–240 volts, 2-phase, 5 wires;

(b) nominally 240 volts, 3-phase, 3 wires; a fourth wire neutral will be extended for the supply of 120–240 volt single-phase equipment in combination with this service where the service-capacity required does not exceed 15 kilovoltamperes on any one of the phases;

(c) nominally 120–208 volts, 3-phase, 4 wires for the exclusive supply of secondary service to one or more buildings or units situated on a single premises occupied by one or more than one Customer, with transformers and secondaries installed on the premises at suitable locations provided by the owner.

(d) nominally 120–240 volts, 3-phase, 7 wires, for supply only to single-phase equipment requiring more than 50 kilovoltamperes of service capacity, with transformers located on Customer's premises.

(C) STANDARD PRIMARY; unregulated alternating current, 60 cycles, nominally 2,400 volts, 2-phase, 3 wires, or nominally 4,160 volts, 3-phase, 3 or 4 wires.

STANDARD HIGH TENSION; unregulated alternating current, 60 cycles, 3-phase, 3 wires:

(a) nominally 13,200 volts in the City of Philadelphia with the exception of that portion north of a boundary formed by Pennypack Creek from its intersection with the City Line eastwardly to Grant Avenue, and by Grant Avenue to Poquessing Creek; in Montgomery County as follows:—that portion of Cheltenham Township, bounded by Washington Lane, Church Road to the Abington Township Line, The Abington Township Line, and the City of Philadelphia; and that portion of Lower Merion Township, bounded by the City Line, the Norristown Branch of the Pennsylvania Railroad and the Schuylkill River; in Delaware County as follows:—City of Chester; Eddystone, Marcus Hook, Trainer and Upland Boroughs; Lower Chichester and Tinicum Townships; and in that portion of Ridley Township adjacent to Essington Avenue.

(b) nominally 33,000 volts elsewhere for other than loads of customers being supplied at 13,200 volts as of October 1, 1955, or such increases in those loads as can be supplied with existing 13,200-volt facilities.

service-supply lines. The facilities (conductors, cables, conduits, etc.) extending from the Company's facilities in the highway or other right-of-way location to the facilities owned and maintained by the Customer.

(I) RATE HS OFF-PEAK HEAT STORAGE SERVICE

Availability.

Only in conjunction with residence service, for any Customer receiving service at 115-230 volts, 3 wires, for the operation of heat-storage hot-water equipment of a type approved by the Company, when the demand or load of the heat-storage installation does not exceed Customer's demand for service to his other residence load.

Not available when the source of supply is service purchased from a neighboring company under a borderline purchase-agreement.

Rate.

1¢ per kwh.

Minimum Charge.

$1.12 per month.

Special Rules and Regulations.

The heat-storage installation shall be 230-volt, alternating-current, 2-wire, single-phase, 60-cycle.

The supply of service to the water heater shall be confined to a single connection, separately metered, and the daily period of use limited by a clock or other timing device to hours to be established from time to time by the Company. The clock and controlling device shall be types provided by the Company; shall be subject to inspection and control of setting by the Company; and shall be sealed by the Company.

The Company shall not be obligated to provide additional or new supply-facilities.

When service under this Rate is supplied to a Customer served in accordance with the provisions of the Extension Guarantee Rider, *monthly guarantees as provided in said rider shall not be affected by any payments for service under this Rate.*

Term of Contract.

Annual.

Payment Terms.

Standard.

RATE SL-P STREET LIGHTING IN CITY OF PHILADELPHIA

Availability.

Only to a governmental agency, federal, state or municipal, for outdoor lighting service of highways, bridges, parks or similar places, for the safety and convenience of the public, within the City of Philadelphia by series incandescent filament lamps of standard sizes and by multiple or series mercury-vapor lamps of standard sizes where the Customer installs, owns and maintains all Utilization Facilities as hereinafter defined.

Current Characteristics.

From Series 6.6 Amperes or Standard Single-Phase Secondary circuits.

Rate Table.

Energy Charge Prices: per Kwh.:

Lamps up to 250 watts: 2.6¢ per Kwh.
Lamps from 251 to 400 watts: 2.1¢ per Kwh.
Lamps in excess of 400 watts: 1.6¢ per Kwh.

Lamp wattage to be composed of manufacturer's rating of the lamp and of any ballast or transformer required for operation of the lamp. Kilowatt-hours to be computed as the product of the total connected lamp wattage in kw. in service as of each day of the month and the hours of lighting schedule for the lamp in the billing period.

Fuel Adjustment Clause: Applies to the total computed kilowatt-hours.

Distribution and Control Charge Prices: per Annum:

AERIAL SUPPLY: per lamp:

$7.00 for installations in service as of August 31, 1953, and for any replaced installation at the same location after that date.

$9.00 for installations in new locations after August 31, 1953.

UNDERGROUND SUPPLY: per post:

$24.00 for installations in service as of August 31, 1953, and for any replaced installation at the same location after that date.

$40.00 for installations in new locations after August 31, 1953.

Lamp Renewing, Cleaning and Replacement of Glassware Charge Prices: per Annum: *(This provision of the Rate Table applies to a complete coverage of all lamps of the Customer's street lighting system and is not available for partial or piecemeal application. Company may discontinue this service and withdraw this provision of the Rate Table beginning with January 1 of any year by giving written notice to the Customer on or before the immediately preceding June 1.)*

For the renewal of lamps broken or burned out, replacement of broken glassware other than lamps, where replacement glassware is supplied by the Customer, and periodic cleaning of light transmitting and reflecting surfaces of luminaires in service:

SERIES INCANDESCENT:	1,000 Lumens	$ 2.00 per Lamp	
	2,500 "	2.80 " "	
	4,000 "	3.00 " "	
	6,000 "	3.40 " "	
	10,000 "	6.80 " "	
	15,000 "	7.70 " "	
MERCURY VAPOR:	11,000 "	$20.00 " "	
	15,000 "	10.50 " "	
	20,000 "	20.00 " "	
(C)	35,000 "	40.00 " "	

Glassware includes any optical assembly where such assembly is an integral part of the unit. All necessary glassware items required shall be provided by the Customer and delivered by him to warehouse locations specified by the Company in sufficient quantities to enable the Company to furnish continued service.

RATE SL-S STREET LIGHTING—(Continued)

3. INSTALLATION OF NEW OR ADDITIONAL LIGHTING. The prices in the Rate Table apply to aerially supplied standard overhead installations for (a) federal, state, county and municipal authorities and community associations entering into a five-year contract for lighting service; (b) building operation developers for lighting, during the development period, of streets that are to be dedicated, where the municipality has approved the lighting and agreed to subsequently assume the charges for it under a standard contract. Such installations will be made on the public highways at the expense of the Company to the extent warranted by the revenue in prospect, any additional investment to be assumed by the Customer. For other than aerially supplied standard overhead installations, the Company will assume the cost of any facilities which meet its standards up to the sum it would have invested for an aerially supplied standard overhead installation, any additional investment to be by or at the expense of the Customer. The installation cost for lighting on private property, or for contracts of less than standard term, shall be paid by the Customer. Title to all installations meeting the Company's standards shall be vested in the Company and all necessary maintenance, repair and replacement of equipment in such installations will be made by the Company. Maintenance, repair and replacement of nonstandard equipment shall be at the expense of the Customer.

4. EXCESS COSTS. In cases where the remote location of the proposed new or additional lighting, or the number or spacing of the lamps, or the lack of necessary supply lines or any other reason makes the cost of installation excessive, such excess costs shall be assumed by the Customer as mutually agreed.

5. LOCATION, AUTHORIZATION AND PROTECTION. The location of lamps to be supplied is to be approved by the properly designated authorized representative of the Customer and the Customer shall furnish any requisite authority for the erection and maintenance of poles, wires, luminaires and other equipment necessary to operate the lamps at the approved locations. He shall protect the Company from damage to the lighting system to the extent of his ability. The Company agrees upon receipt of a request in writing from the Customer to relocate a lamp to a new adjacent location. Such relocation shall be at the expense of the Customer unless, in the opinion of the Company, it will provide better illumination or be for the safety and convenience of the general public.

Contract Term.

Standard contracts shall be for a term of 5 years, and thereafter from term to term.

Payment Terms.

Bills will be rendered monthly. Each month, for the purpose of prorating the price, shall be considered 1/12 of a year.

STANDARD RIDERS—*Continued*

Applicable to rates as indicated in Applicability Index of Riders, Page No.

FARM SERVICE RIDER

Applicability. To the supply of single-phase service for farm purpose uses by an individual employing the natural processes of growth for the production of grain, stock, dairy, poultry, garden truck, or other agricultural product, when taken through one meter in conjunction with the farmhouse domestic requirements for which the Residence Service Rate would be available.

Not applicable to any use of electric service for industrial operations, commercial processing, or in the conduct of any other agency for the preparation or distribution of products of others.

(C) *This rider is in process of elimination and its application is restricted to those Customers who were served under its provisions prior to July 31, 1961.*

Rate. The Residence Service Rate with the addition of a monthly charge for farm service of:

$1.12 per kw of farm load demand which includes the first 10 hours' use of the demand.

Additional residences on, and occupied by persons connected with the operation of the farm may be included under this rate at a charge of $1.12 each, including energy at the same rate as under the farm load demand charge.

Farm Load Demand. The farm load demand shall be the arithmetical sum, computed to the nearest 0.1 kilowatt, of the assessed demands of the various loads supplied, taken at the following percentages of the connected load:

Yard, barn and outbuilding lighting in excess of 2,000 watts, and production lighting such as poultry house, greenhouse, etc.	40%
Motor loads consisting of units of 2 horsepower or less rating	55
Motor loads consisting of units larger than 2 horsepower	85
Heating applications such as electric brooders, incubators, dairy sterilizers and water heaters, soil heating cable, etc.	20

Exemptions. Incidental illumination in the yard, barn and outbuildings up to a total of 2,000 watts and ¾ horsepower of motor capacity used for combined house and farm water pumping duty will be considered as service appurtenant to the dwelling and will not be included in the farm load demand.

Where an electric range is a part of the domestic utilization, a portable farm motor, not over 7½ horsepower in size, which is used at various locations and is mounted on a vehicle so it can be moved from place to place, will be exempt from assessment.

RECEIVED
Pennsylvania Public Utility Comm.
MAY 29 1961

Minimum. The monthly minimum charge under this rider shall be the charge for the farm service plus the $1.00 minimum of the Residence Service Rate.

Term. Annual contract.

HT NIGHT SERVICE RIDER

Applicability. To service supplied during off-peak hours for demands in excess of those supplied during on-peak hours where the capacity supplied by the Company does not exceed 10,000 kilovoltamperes and is the exclusive source of service for the connected load so supplied.

Definition of Peak-Hours. ON-PEAK HOURS are defined as those hours between 7 a. m. and 7 p. m., Eastern Standard Time or Daylight Saving Time, whichever is in common use, daily except Saturdays and holidays.

OFF-PEAK HOURS are defined as the hours other than those specified as on-peak hours.

On-Peak Service Rate. Rate HT including all its terms and guarantees for service supplied during on-peak hours. The blocking of the energy charge of said rate will be based in all cases on the billing demand for on-peak hours.

Night Service Capacity Charge: 50¢ per kw of excess off-peak billing demand per month.

(C) Indicates change.

OFFICIALLY FILED TARIFF

LIST OF CHANGES MADE BY THIS SUPPLEMENT

INCREASES, DECREASES, CHANGES

Title Page; Back of Title Page.

Pursuant to the mergers of Chester County Light and Power Company and of Southern Pennsylvania Power Company into Philadelphia Electric Company the territory of the Western Division is enlarged to include the service territories formerly supplied by the two first named companies and the provisions of this Tariff are made applicable therein.

CANCELLED
By Revised Page No. 2
EFFECTIVE NOV 30 1954

OFFICIALLY FILED TARIFF

RATES AVAILABLE UNDER THIS TARIFF

Rate R (PHILADELPHIA DIVISION) and Rate R-S (SUBURBAN DIVISIONS) Residence Service. Residence Service is defined as the supply of single-phase electric service to the dwelling and appurtenances of a single private family for the domestic requirements of its members other than for the main or principal source of heat supply.

"Residence Service," as employed herein, is not susceptible of particularizing all the uses embraced therein.

As illustrative only of its general meaning:

The term includes service to: (a) The separate dwelling-unit in an apartment house, but not the halls, basement, or other portions of such building common to more than one such unit; (b) The premises occupied as the living-quarters of five persons or less who unite to establish a common dwelling-place for their own personal comfort and convenience on a cost-sharing basis; (c) The premises owned by a church, and primarily designated or set aside for, and actually occupied and used as, the dwelling-place of a priest, rabbi, pastor, rector, nun or other functioning Church Divine, and his or her resident associates; (d) Private dwellings in which space is occasionally used for the conduct of business by a person residing therein.

The term does NOT include service to: (a) Premises institutional in character including Clubs, Fraternities, Orphanages or Homes; (b) Premises defined as a rooming house or boarding house in the Municipal Code for Cities of the first class enacted by Act of General Assembly; (c) The space in an apartment or other residential building primarily devoted to a professional or other office, studio, or other gainful pursuit. This rate is not applicable to the use in the home of electric furnaces or welding apparatus other than a transformer type "limited input" arc welder with an input not to exceed 37½ amperes at 230 volts.

DEC 30 1954

Rate HS Off-Peak Heat-Storage. Available only in conjunction with residence service for any Customer receiving service at 115-230 volts, 3 wires, for the operation of heat-storage hot-water equipment when the demand or load of the heat-storage installation does not exceed the Customer's demand for service to his other residence loads.

Rate GLP General Light and Power is defined as the supply of electric service through a single metering installation for general lighting and/or power requirements of offices, professional, commercial or industrial establishments, and other applications outside the scope of the Residence Service Rates; Residence Service, when used through the same meter and in conjunction with General Light and Power Service will be supplied under this rate unless the Customer so separates and arranges his wiring that domestic use can be separately metered and makes a separate contract for other service.

Rate PD Primary-Distribution Power. Untransformed service from primary supply-lines, where the Customer installs, owns, and maintains, the receiving equipment.

Rate HT High-Tension Power. Untransformed service from high-tension transmission lines, where the Customer installs, owns, and maintains, the receiving equipment.

Rate QLF *Quantity—High Load Factor—Power.* Untransformed, large quantity, high load factor, electric service from high-tension transmission lines, where the Customer installs, owns, and maintains, the receiving equipment.

Rate MLP Municipal Light and Power. Available only to the CITY OF PHILADELPHIA, in lieu and to the exclusion of Rate GLP, for electric service supplied to the municipality for purposes other than street lighting.

Rate FLP Federal Light and Power. Available only to the UNITED STATES GOVERNMENT, in lieu and to the exclusion of Rate GLP, for the general lighting and power requirements of Federal departments.

Rate TL-S Traffic Signal Lighting. Available to any municipality in SUBURBAN DIVISIONS using the Company's standard service for multiple-incandescent traffic-signal lights.

CANCELLED
By Revised Page No.
EFFECTIVE OCT 1 1955

DEFINITION OF TERMS AND EXPLANATION OF ABBREVIATIONS—*Continued*

pronouns. The masculine, singular, pronoun (he, his, him) relates to Customer, whether male, female, partnership or corporation.

property-line. The division-line between land held in or for private use, and land in which the public or the Company has a right of use; or, the division-line between separately owned or occupied land.

service. The supply of capacity for use by the Customer, including all things done by the Company in connection with such supply.

STANDARD SINGLE-PHASE SECONDARY; alternating current, 60 cycles, nominally 115–230 volts, 3 wires, except that nominally 115 volts, 2 wires may be supplied for connection to wiring installations which consist of not more than a single 15 ampere circuit.

(C) STANDARD POLYPHASE SECONDARY; alternating current, 60 cycles:

(a) nominally 115–230 volts, 2-phase, 5 wires;

(b) nominally 230 volts, 3-phase, 3 wires; a fourth wire neutral will be extended for the supply of 115–230 volt single-phase equipment in combination with this service where the service-capacity required does not exceed 15 kilovoltamperes on any one of the phases;

(c) nominally 120–208 volts, 3-phase, 4 wires for the exclusive supply of secondary service to one or more buildings or units situated on a single premises occupied by one or more than one Customer, with transformers and secondaries installed on the premises at suitable locations provided by the owner.

(d) nominally 115–230 volts, 3-phase, 7 wires, for supply only to single-phase equipment requiring more than 50 kilovoltamperes of service capacity, with transformers located on Customer's premises.

STANDARD PRIMARY; unregulated alternating current, 60 cycles, nominally 2,300 volts, 2-phase, 3 wires, or nominally 4,000 volts, 3-phase, 3 or 4 wires.

(C) STANDARD HIGH TENSION; unregulated alternating current, 60 cycles, 3-phase, 3 wires:

(a) nominally 13,200 volts in the City of Philadelphia with the exception of that portion north of a boundary formed by Pennypack Creek from its intersection with the City Line eastwardly to Grant Avenue, and by Grant Avenue to Poquessing Creek; in Montgomery County as follows:—that portion of Cheltenham Township, bounded by Washington Lane, Church Road to the Abington Township Line, The Abington Township Line, and the City of Philadelphia; and that portion of Lower Merion Township, bounded by the City Line, the Norristown Branch of the Pennsylvania Railroad and the Schuylkill River; in Delaware County as follows:—City of Chester; Eddystone, Marcus Hook, Trainer and Upland Boroughs; Lower Chichester and Tinicum Townships; and in that portion of Ridley Township adjacent to Essington Avenue.

(b) nominally 33,000 volts elsewhere for other than loads of customers being supplied at 13,200 volts as of March 31, 1953, or such increases in those loads as can be supplied with existing 13,200-volt facilities.

service-supply lines. The facilities (conductors, cables, conduit, etc.) extending from the Company's facilities in the highway or other trunk line location to the facilities owned and maintained by the Customer.

OFFICIALLY FILED TARIFF

RATE MLP MUNICIPAL LIGHT AND POWER

Availability.

Only to the CITY OF PHILADELPHIA, in lieu and to the exclusion of Rate GLP, for electric service supplied to the municipality for purposes other than street lighting.

CANCELLED
By Revised Page No. 28
EFFECTIVE AUG 20 1957

Current Characteristics.

Standard single-phase or polyphase secondary service.

(I) Rate.

2.2¢ per kwh.

Special Rules and Regulations.

Whenever it is advantageous to the Customer at points where he has been receiving untransformed electric service from primary supply lines of the Company's distribution system, or from the Company's high-tension transmission lines, service will be supplied under this rate in lieu of the application of Rates PD or HT, and the Customer shall continue to own and maintain any transforming, switching and other receiving equipment required. On new contracts, or on additions to old contracts for any application of this rate where the prospective demand exceeds 25 kilowatts, the Company, in order to secure the most efficient use of its supply circuits, may require that service be taken at primary or high-tension voltage under the same conditions of receiving-equipment ownership.

Term of Contract.

Annual.

(C) (D) RATE SL-P STREET LIGHTING IN CITY OF PHILADELPHIA

Availability.

Only to a governmental agency, federal, state or municipal, for outdoor lighting service of highways, bridges, parks or similar places, for the safety and convenience of the public, within the City of Philadelphia by series incandescent filament lamps of standard sizes and by multiple or series mercury-vapor lamps of standard sizes where the Customer installs, owns and maintains all Utilization Facilities as hereinafter defined.

Current Characteristics.

From Series 6.6 Amperes or Standard Single-Phase Secondary circuits.

Rate Table.

Energy Charge Prices: per Kwh.:

Lamps up to 250 watts: 2.6¢ per Kwh.
Lamps from 251 to 400 watts: 2.1¢ per Kwh.
Lamps in excess of 400 watts: 1.6¢ per Kwh.

Lamp wattage to be composed of manufacturer's rating of the lamp and of any ballast or transformer required for operation of the lamp. Kilowatt-hours to be computed as the product of the total connected lamp wattage in kw. in service as of each day of the month and the hours of lighting schedule for the lamp in the billing period.

Fuel Adjustment Clause: Applies to the total computed kilowatt-hours.

Distribution and Control Charge Prices: per Annum:

AERIAL SUPPLY: per lamp:

$7.00 for installations in service as of August 31, 1953, and for any replaced installation at the same location after that date.

$9.00 for installations in new locations after August 31, 1953.

UNDERGROUND SUPPLY: per post:

$24.00 for installations in service as of August 31, 1953, and for any replaced installation at the same location after that date.

$40.00 for installations in new locations after August 31, 1953.

Lamp Renewing, Cleaning and Replacement of Glassware Charge Prices: per Annum: *(This provision of the Rate Table applies to a complete coverage of all lamps of the Customer's street lighting system and is not available for partial or piecemeal application. Company may discontinue this service and withdraw this provision of the Rate Table beginning with January 1 of any year by giving written notice to the Customer on or before the immediately preceding June 1.)*

For the renewal of lamps broken or burned out, replacement of broken glassware other than lamps, where replacement glassware is supplied by the Customer, and periodic cleaning of light transmitting and reflecting surfaces of luminaires in service:

SERIES INCANDESCENT:	1,000 Lumens	$ 2.00 per Lamp	
	2,500 "	2.80 " "	
	4,000 "	3.00 " "	
	6,000 "	3.40 " "	
	10,000 "	6.80 " "	
	15,000 "	7.70 " "	
MERCURY VAPOR:	11,000 "	$20.00 " "	
	15,000 "	10.50 " "	
	20,000 "	20.00 " "	

Glassware includes any optical assembly where such assembly is an integral part of the unit. All necessary glassware items required shall be provided by the Customer and delivered by him to storehouse locations specified by the Company in sufficient quantities to enable the Company to perform the required service.

(C) (D) Indicates a new rate making decreases.

(C) RATE SL-S STREET LIGHTING—(Continued)

which meet its standards up to the sum it would have invested for an aerially supplied standard overhead installation, any additional investment to be by or at the expense of the Customer. The installation cost for lighting on private property, or for contracts of less than standard term, shall be paid by the Customer. Title to all installations meeting the Company's standards shall be vested in the Company and all necessary maintenance, repair and replacement of equipment in such installations will be made by the Company. Maintenance, repair and replacement of nonstandard equipment shall be at the expense of the Customer.

4. Excess Costs. In cases where the remote location of the proposed new or additional lighting, or the number or spacing of the lamps, or the lack of necessary supply lines or any other reason makes the cost of installation excessive, such excess costs shall be assumed by the Customer as mutually agreed.

5. Location, Authorization and Protection. The location of lamps to be supplied is to be approved by the properly designated authorized representative of the Customer and the Customer shall furnish any requisite authority for the erection and maintenance of poles, wires, luminaries and other equipment necessary to operate the lamps at the approved locations. He shall protect the Company from damage to the lighting system to the extent of his ability. The Company agrees upon receipt of a request in writing from the Customer to relocate a lamp to a new adjacent location. Such relocation shall be at the expense of the Customer unless, in the opinion of the Company, it will provide better illumination or be for the safety and convenience of the general public.

Contract Term.

Standard contracts shall be for a term of 5 years, and thereafter from term to term.

Payment Terms.

Bills will be rendered monthly. Each month, for the purpose of prorating the price shall be considered 1/12 of a year.

STANDARD RIDERS—*Continued*

Applicable to rates as indicated in Applicability Index of Rider, Page No. 21.

FARM SERVICE RIDER

Applicability. To the supply of single-phase service for farm purpose use by an individual employing the natural processes of growth for the production of grain, stock, dairy, poultry, garden truck, or other agricultural product, when taken through one meter in conjunction with the farm house domestic requirements for which the Residence Service Rate would be available.

Not applicable to any use of electric service for industrial operations, commercial processing, or in the conduct of any other agency for the preparation or distribution of products of others.

Rate. The Residence Service Rate with the addition of a monthly charge for farm service of:

$1.12 per kw. of farm load demand which includes the first 10 hours' use of the demand.

Additional residences on, and occupied by persons connected with the operation of the farm may be included under this rate at a charge of **$1.12** each, including energy at the same rate as under the farm load demand charge.

Farm Load Demand. The farm load demand shall be the arithmetical sum, computed to the nearest 0.1 kilowatt, of the assessed demands of the various loads supplied, taken at the following percentages of the connected load:

Yard, barn and outbuilding lighting in excess of 2,000 watts, and production lighting such as poultry house, greenhouse, etc.	40%
Motor loads consisting of units of 2 horsepower or less rating	55
Motor loads consisting of units larger than 2 horsepower	85
Heating applications such as electric brooders, incubators, dairy sterilizers and water heaters, soil heating cable, etc.	20

Exemptions. Incidental illumination in the yard, barn and outbuildings up to a total of 2,000 watts and ½ horsepower of motor capacity used for combined house and farm water pumping duty will be considered as service appurtenant to the dwelling and will not be included in the farm load demand.

Where an electric range is a part of the domestic utilization, a portable farm motor, not over 7½ horsepower in size, which is used at various locations and is mounted on a vehicle so it can be moved from place to place, will be exempt from assessment.

Minimum. The monthly minimum charge under this rider shall be the charge for the farm service plus the **$1.00** minimum of the Residence Service Rate.

Term. Annual contract.

HT NIGHT SERVICE RIDER

Applicability. To service supplied during off-peak hours for demands in excess of those supplied during on-peak hours where the capacity supplied by the Company does not exceed 10,000 kilovoltamperes and is the exclusive source of service for the connected load so supplied.

(C) **Definition of Peak-Hours.** ON-PEAK HOURS are defined as those hours between 7 a. m. and 7 p. m., Eastern Standard Time or Daylight Saving Time, whichever is in common use, daily except Saturdays and holidays.

OFF-PEAK HOURS are defined as the hours other than those specified as on-peak hours.

On-Peak Service Rate. Rate HT including all its terms and guarantees for service supplied during on-peak hours. The blocking of the energy charge of said rate will be based in all cases on the billing demand for on-peak hours.

Night Service Capacity Charge: 50¢ per kw. of excess off-peak billing demand per month.

LIST OF CHANGES MADE BY THIS SUPPLEMENT

CHANGES

Title Page.

Second-class Township of Towamencin, Montgomery County, has been added.

Rule 18.4. (1ST REV. 18.)

Rule is reworded to conform with present practice.

Rate SL-P Street Lighting in City of Philadelphia. (3RD REV. 33B; 3RD REV. 34)

Terms and Conditions modified with reference to the supply of service in limited access highways and other special cases.

Rearrangement of these pages was required because of additional wording.

Rate SL-S Street Lighting. (2ND REV. 34A.)

General Provisions revised to clarify the application of pricing to aerially or underground supplied lighting installations.

Applicability Index of Riders. (4TH REV. 41.)

Applicability of the Casualty Rider extended to Rate QLF.

Applicability of the Casualty and Receivership Riders extended to Rate RR.

HT Night Service Rider. (ORIG. 46A.) (FORMERLY ON PGS. 2ND REV. 46 AND 1ST REV. 47.)

Applicability is expanded to permit supply at 66,000 or 132,000 volts to loads greater than 10,000 kilowatts. Terminology relating to demands is changed and the determination of off-peak and on-peak billing demands amplified.

(3RD REV. 46; 2ND REV. 47.)

Rearrangement of these pages was required because the HT Night Service Rider was moved to Page 46A.

PD Night Service Rider. (2ND REV. 49.)

Applicability is expanded to permit designation of demands up to 1,200 kilowatts for off-peak hours and the statement of the rider otherwise changed to be consistent with the terminology and provisions of the HT Night Service Rider.

CHANGES

Definition of Terms. (5TH REV. 8.)
Service.
Redefined to include the supply of "energy" as part of the service rendered by the Company.

STANDARD SINGLE-PHASE SECONDARY. Two-wire service made available for a maximum of two rather than one 15-ampere circuit.

STANDARD POLYPHASE SECONDARY. Paragraph (c)-120-208 volts, 3-phase, 4-wire service restricted to locations where 4,160 volts, 3-phase primary service is available. Provision for 120-240 volts, single-phase, 3-wire service to Rates R and R-S Customers added.

STANDARD HIGH TENSION. The 13,200-volt area is redefined.

Rule 2.5. (1ST REV. 10.)
The maximum load which will be supplied by a single-phase secondary service is changed from 50 kva. to 75 kva.

Rule 2.6. (1st Rev. 10.)
Provisions of this rule are extended to all motors and the minimum aggregate horsepower which will be supplied by a polyphase service is changed from 5 hp. to 7½ hp.

Rule 3.1. (1ST REV. 10.)
Rule is reworded for clarity.

Rule 6.1. (2ND REV. 12.)
Provision of this rule concerning aerial facilities which the Company will provide, own and maintain is reworded for clarity.

RECEIVED

LIST OF CHANGES MADE BY THIS SUPPLEMENT

CHANGES

Title page. Changes have been made in divisional designations, territory served and a local office address has been added.

Rate MLP Municipal Light and Power. (4TH REV. 5; 1ST REV. 28.)

Availability is extended to include lighting of certain structures, tunnels or underpasses under special conditions.

Rate SL-P Street Lighting in City of Philadelphia. (4TH REV. 6; 3RD REV. 33A; 1ST REV. 33B; 1ST REV. 33C.)

Availability is extended to fluorescent lamps and conditions of installation are added.

Lamp Renewing, Cleaning and Replacement of Glassware Charge Prices are withdrawn from the Rate Table as the supply of this service has been discontinued. Designation of lamps has been changed to Lighting Units which are defined.

Provision 2 of the Terms and Conditions has been restated for clarity and the responsibility of the Customer for correct ratings of units has been further defined in Provision 7.

HT Night Service Rider. (1ST REV. 46.)

PD Night Service Rider. (1ST REV. 49.)

Present exemption of Sundays with reference to on-peak hours has been extended to include other defined holidays and Saturdays.

Off-Peak Rider. (1ST REV. 48.)

Present exemption of Sundays as a period of restricted use has been extended to include other defined holidays and Saturdays.

CANCELLED
By Revised Page No. 27
Effective OCT 1 1955

CHANGES

Rate SL Street Lighting. (2ND REV. 31, 3RD REV. 32, 2ND REV. 33).

This rate is withdrawn because Rate SL-P will be applicable to street lighting service supplied to the City of Philadelphia.

Rate PSL Private Street Lighting. (1ST REV. 35).

The rate is restated naming prices now applicable to aerial service and restricted to lamps in service on March 1, 1955.

RATES AVAILABLE UNDER THIS TARIFF

Rate R (PHILADELPHIA DIVISION) and **Rate R-S** (SUBURBAN DIVISIONS) **Residence Service.** Residence Service is defined as the supply of single-phase electric service to the dwelling and appurtenances of a single private family for the domestic requirements of its members other than for the main or principal source of heat supply.

"Residence Service," as employed herein, is not susceptible of particularizing all the uses embraced therein.

As illustrative only of its general meaning:

The term includes service to: (a) The separate dwelling-unit in an apartment house, but not the halls, basement, or other portions of such building common to more than one such unit; (b) The premises occupied as the living-quarters of five persons or less who unite to establish a common dwelling-place for their own personal comfort and convenience on a cost-sharing basis; (c) The premises owned by a church, and primarily designated or set aside for, and actually occupied and used as, the dwelling-place of a priest, rabbi, pastor, rector, nun or other functioning Church Divine, and his or her resident associates; (d) Private dwellings in which space is occasionally used for the conduct of business by a person residing therein.

The term does NOT include service to: (a) Premises institutional in character including Clubs, Fraternities, Orphanages or Homes; (b) Premises defined as a rooming house or boarding house in the Municipal Code for Cities of the first class enacted by Act of General Assembly; (c) The space in an apartment or other residential building primarily devoted to a professional or other office, studio, or other gainful pursuit. This rate is not applicable to the use in the home of electric furnaces or welding apparatus other than a transformer type "limited input" arc welder with an input not to exceed 37½ amperes at 230 volts.

Rate HS Off-Peak Heat-Storage. Available only in conjunction with residence service for any Customer receiving service at 115-230 volts, 3 wires, for the operation of heat-storage hot-water equipment when the demand or load of the heat-storage installation does not exceed Customer's demand for service to his other residence load.

Rate GLP General Light and Power is defined as the supply of electric service through a single metering installation for general lighting and/or power requirements of offices, professional, commercial or industrial establishments, and other applications outside the scope of the Residence Service Rates; Residence Service, when used through the same meter and in conjunction with General Light and Power Service will be supplied under this rate unless the Customer so separates and arranges his wiring that domestic use can be separately metered and makes a separate contract for other service.

Rate PD Primary-Distribution Power. Untransformed service from primary supply-lines, where the Customer installs, owns, and maintains, the receiving equipment.

Rate HT High-Tension Power. Untransformed service from high-tension transmission lines, where the Customer installs, owns, and maintains, the receiving equipment.

Rate QLF Quantity—High Load Factor—Power. Untransformed, large quantity, high load factor, electric service from high-tension transmission lines, where the Customer installs, owns, and maintains, the receiving equipment.

Rate MLP Municipal Light and Power. Available only to the CITY OF PHILADELPHIA, in lieu and to the exclusion of Rate GLP, for electric service supplied to the municipality for purposes other than street lighting.

Rate FLP Federal Light and Power. Available only to the UNITED STATES GOVERNMENT, in lieu and to the exclusion of Rate GLP, for the general lighting and power requirements of Federal departments.

Rate TL-S Traffic Signal Lighting. Available to any municipality in SUBURBAN DIVISIONS using the Company's standard service for multiple-incandescent traffic-signal lights.

(C) **Rate SL Street Lighting.** Available only to a governmental agency, federal, state or municipal, for outdoor lighting service within the City of Philadelphia, by series incandescent filament lamps of standard sizes of 1,000, 2,500, 4,000, 6,000, 10,000 and 15,000 lumens, and multiple mercury-vapor lamps of standard sizes of 15,000 and 20,000 lumens.

(C) **Indicates change.**

OFFICIALLY FILED TARIFF

DEFINITION OF TERMS AND EXPLANATION OF ABBREVIATIONS—*Continued*

pronouns. The masculine, singular, pronoun (he, his, him) relates to Customer, whether male, female, partnership or corporation.

property-line. The division-line between land held in or for private use, and land in which the public or the Company has a right of use; or, the division-line between separately owned or occupied land.

service. The supply of capacity for use by the Customer, including all things done by the Company in connection with such supply.

STANDARD SINGLE-PHASE SECONDARY; alternating current, 60 cycles, nominally 115–230 volts, 3 wires, except that nominally 115 volts, 2 wires may be supplied for connection to wiring installations which consist of not more than a single 15 ampere circuit.

STANDARD POLYPHASE SECONDARY; alternating current, 60 cycles:

(a) nominally 115–230 volts, 2-phase, 5 wires;

(b) nominally 230 volts, 3-phase, 3 wires; a fourth wire neutral will be extended for the supply of 115–230 volt single-phase equipment in combination with this service where the service-capacity required does not exceed 15 kilovoltamperes on any one of the phases;

(c) nominally 115 volts, 3-phase, 4 wires, or nominally 115–230 volts, 3-phase, 7 wires, for supply only to single-phase equipment requiring more than 50 kilovoltamperes of service capacity, with transformers located on Customer's premises.

STANDARD PRIMARY; unregulated alternating current, 60 cycles, nominally 2,300 volts, 2-phase, 3 wires, or nominally 4,000 volts, 3-phase, 3 or 4 wires.

(C) STANDARD HIGH TENSION; unregulated alternating current, 60 cycles, 3-phase, 3 wires:

(a) nominally 13,200 volts in the City of Philadelphia with the exception of that portion north of a boundary formed by Red Lion Road from its intersection with the City Line eastwardly to Poquessing Creek; in that portion of Cheltenham Township, Montgomery County, bounded by Washington Lane, Church Road, and the Abington Township line; in Delaware County as follows:—City of Chester; Eddystone, Marcus Hook, Trainer and Upland Boroughs; Lower Chichester and Tinicum Townships; and in that portion of Ridley Township adjacent to Essington Avenue.

(b) nominally 33,000 volts elsewhere for other than loads of customers being supplied at 13,200 volts as of April 18, 1949, or such increases in those loads as can be supplied with existing 13,200-volt facilities.

service-supply lines. The facilities (conductors, cables, conduits, etc.) extending from the Company's facilities in the highway or other trunk-line location to the facilities owned and maintained by the Customer.

Description of Conditions of Service Designated Above.

AERIAL: Lamps erected on poles or fixtures; energy supplied by overhead wires.

UNDERGROUND: Lamps erected on poles or fixtures; energy supplied by conductors installed underground.

SINGLE: When each pole or fixture supports one lamp.

TWIN: When each pole or fixture supports 2 or more lamps.

CITY DUCT: Lamps erected on poles or fixtures; energy supplied by conductors installed in conduit owned and maintained by the Customer.

CITY-OWNED: Lamps erected on poles or fixtures; energy supplied by conductors, either aerial or in pipe or conduit, the entire equipment of pipe, conduit, poles, fixtures and conductors owned, controlled or leased and maintained by the Customer.

ROOSEVELT BOULEVARD: Lamps erected on the Roosevelt Boulevard on poles or fixtures; energy supplied by conductors plowed or trenched in the ground or installed in pipe or conduit.

MARKET STREET ELEVATED: Lamps attached to the Market Street elevated structure; energy supplied by conductors installed in pipe or conduit on the elevated structure.

(C) RATE SL-P STREET LIGHTING IN CITY OF PHILADELPHIA—*Continued*

Terms and Conditions.

1. OWNERSHIP AND TYPE OF CONTROL FACILITIES.
   a. LIGHTING UNITS SUPPLIED FROM STANDARD SECONDARY CIRCUITS: Customer shall provide, own and maintain, for each of such Lighting Units, the individual control of a type approved by the Company except that, at the option of the Customer, the Company will continue to provide group control facilities in service on the effective date of this Supplement.
   b. LIGHTING UNITS SUPPLIED FROM SERIES AND FROM NONSTANDARD SECONDARY CIRCUITS: Company will provide, own and maintain group control facilities.

2. OWNERSHIP OF UTILIZATION FACILITIES.
   a. LIGHTING UNITS SUPPLIED FROM AERIAL CIRCUITS: Customer shall provide, own and maintain the Utilization Facilities comprising the brackets, hangers, luminaires, lamps, ballasts, transformers, individual controls (where used) and other components required for the operation of such Lighting Units, conductors, moulding and supporting insulators between the lamp receptacles and line wires of the Company's distribution facilities.

      Company shall provide the supporting pole or post for such aerially supplied Lighting Unit and will issue authorization to permit the Customer to install thereon the said Utilization Facilities.
   b. LIGHTING UNITS SUPPLIED FROM UNDERGROUND CIRCUITS: Customer shall provide, own and maintain the Utilization Facilities comprising the supporting pole or post, foundation with 90-degree pipe bend, brackets or hangers, luminaires, lamps, ballasts, transformers, individual controls (where used) and other components required for the operation of such Lighting Units, conductors and conduits from the lamp receptacles to sidewalk level, and shall assume all costs of installing such Utilization Facilities.

      Where vertical extensions are required on foreign-owned posts for the support of such underground supplied Lighting Units, the extensions shall be provided and owned by the Customer. Rentals incurred on such foreign-owned posts shall be the responsibility of the Customer.

      Except as provided in 5 hereof, the Company shall own conduit from the distribution circuit to the 90-degree pipe bend, shall own conductors from its distribution system to the sidewalk level and shall provide sufficient length of conductors for splicing in the post base where sidewalk level access is provided. Where a splicing chamber is provided in the post base, the Customer shall provide space for any relays or similar devices required for the operation of the street lighting circuit.

3. STANDARDS OF CONSTRUCTION FOR UTILIZATION FACILITIES. Customer construction shall meet the Company's standards which are based upon the National Electrical Safety Code. Designs of proposed construction deviating from such standards shall be submitted to the Company for approval before proceeding with any work.

4. POWER FACTOR. The Utilization Facilities provided by the Customer shall be of such a nature as to maintain the power factor of each Lighting Unit at not less than 85%.

5. SUPPLY FACILITIES. Lighting service shall be supplied from distribution facilities and equipment, including group control facilities where required, installed at the cost and expense of the Company and owned and controlled by it, except that in locations (such as bridges, overpasses and underpasses) where Company ownership of conduit is not practical for reasons beyond its control, the Customer shall make available, at no expense to the Company, space for the Company's distribution facilities required in rendering service under this rate.

6. CONNECTION OF LIGHTING UNITS. For new Lighting Units, relocated Lighting Units and for any modernization or maintenance work involving connections to the Company's distribution circuits, in accordance with the provisions of 2, the Customer shall provide sufficient length of conductors to permit the Company to make taps at the top of the pole for aerial circuits, or for splices to underground circuits at the splicing chamber in the post base (where provided), or at the nearest available manhole. In the latter case, the Customer will bill the Company for the cost of the conductors from the sidewalk level to the manhole. All work done by the Customer that may involve Company street lighting control facilities or distribution circuits shall be performed under Company permit and blocking procedures.

CANCELLED

CANCELLED SEP 30
By Revised Page No. 1
EFFECTIVE MAR 1 1950

RATE PSU PRIVATE STREET LIGHTING

Availability.

Available for series-incandescent lighting service adjacent to, or on, a Customer's property but not in, or attached to, any building, and available only to premises adjacent to the Company's series-incandescent circuits. It will be furnished only in accordance with the lighting schedule established for municipal street-lighting. Available only in PHILADELPHIA DIVISION.

(I) Rate Table.

The Customer pays the cost of installation and pays for service in accordance with the following schedule for each lamp connected to the Company's lines:

Size of Lamp Manufacturer's rating	Aerial Service Amount per year, payable monthly	Underground Service Amount per year, payable monthly
2,500 lumens	$51.45	$62.45
4,000 "	67.10	78.10
6,000 "	79.20	92.40
10,000 "	90.20	103.40

Special Terms and Conditions.

Lamps, wires, fixtures, and appurtenances, are installed at the Customer's expense, but remain the property of the Company, and will be adjusted, maintained, operated, and repaired by it as part of the service cost. The Company shall not be liable for damage, or for claims for damage, to person or property, arising, accruing, or resulting from, installation, location, or use, of lamps, wires, fixtures, and appurtenances; or resulting from failure of any light, or lights, to burn, for any cause, beyond or other than the rental of said light, or lights, for the actual period of such failure. Claims for deductions for failure to burn must be made in writing the day after such failure.

The Customer shall permit any accredited employee of the Company to have access to the premises for adjusting, maintaining, and repairing, service; the Customer shall be responsible for the safekeeping of the installation (damage by fire excepted) and for preventing meddling or interference with the same.

STANDARD RIDERS—*Continued*

Applicable to rates as indicated in Applicability Index of Rider P. U. C. No. 41

FARM SERVICE RIDER

Applicability. To the supply of single-phase service for farm purpose uses by an individual employing the natural processes of growth for the production of grain, stock, dairy, poultry, garden truck, or other agricultural product, when taken through one meter in conjunction with the farm house domestic requirements for which the Residence Service Rate would be available.

Not applicable to any use of electric service for industrial operations, commercial processing, or in the conduct of any other agency for the preparation or distribution of products of others.

(I) **Rate.** The Residence Service Rate with the addition of a monthly charge for farm service of:

$1.12 per kw. of farm load demand which includes the first 10 hours' use of the demand.

Additional residences on, and occupied by persons connected with the operation of the farm may be included under this rate at a charge of $1.12 each, including energy at the same rate as under the farm load demand charge.

Farm Load Demand. The farm load demand shall be the arithmetical sum, computed to the nearest 0.1 kilowatt, of the assessed demands of the various loads supplied, taken at the following percentages of the connected load:

Yard, barn and outbuilding lighting in excess of 2,000 watts, and production lighting such as poultry house, greenhouse, etc.	40%
Motor loads consisting of units of 2 horsepower or less rating	55
Motor loads consisting of units larger than 2 horsepower	85
Heating applications such as electric brooders, incubators, dairy sterilizers and water heaters, soil heating cable, etc.	20

Exemptions. Incidental illumination in the yard, barn and outbuildings up to a total of 2,000 watts and ½ horsepower of motor capacity used for combined house and farm water pumping duty will be considered as service appurtenant to the dwelling and will not be included in the farm load demand.

Where an electric range is a part of the domestic utilization, a portable farm motor, not over 7½ horsepower in size, which is used at various locations and is mounted on a vehicle so it can be moved from place to place, will be exempt from assessment.

RECEIVED
Penna. Public Utility Comm.
FEB 15 1949

(I) **Minimum.** The monthly minimum charge under this rider shall be the charge for the farm service plus the $1.00 minimum of the Residence Service Rate.

Term. Annual contract.

(I) **HT NIGHT SERVICE RIDER**

Applicability. To service supplied during off-peak hours for demands in excess of those supplied during on-peak hours where the capacity supplied by the Company does not exceed 10,000 kilovoltamperes and is the exclusive source of service for the connected load so supplied.

Definition of Peak-Hours. ON-PEAK HOURS are defined as those hours between 7 a. m. and 7 p. m., Eastern Standard Time, daily, omitting Sundays, or Daylight Saving Time, whichever is in common use.

OFF-PEAK HOURS are defined as the hours other than those specified as on-peak hours.

On-Peak Service Rate. Rate HT including all its terms and guarantees for service supplied during on-peak hours. The blocking of the energy charge of said rate will be based in all cases on the billing demand for on-peak hours.

Night Service Capacity Charge: 50¢ per kw of excess off-peak billing demand per month.

(I) Indicates increase.

LIST OF CHANGES MADE BY THIS SUPPLEMENT

ADDITIONS AND CHANGES

The following rules have been added or changed to make provision for the reading of meters at other than monthly intervals and the rendering of interim period average monthly bills:

Rule 1-g Basis of Charge. (1st Rev. 4). A new rule.

Rule 3-b Amount of Deposit. (1st Rev. 5). Former Rule 3-b revised.

Rule 15-a Meter Reading Intervals. (1st Rev. 11). Former Rule 15-a in part, revised.
Rule 15-b Billing Period. (1st Rev. 11). Former Rule 15-a in part, revised.
Rule 15-c Interim Bills. (1st Rev. 11). A new rule.
Rule 15-d Net Payment Period. (1st Rev. 11). Former Rule 15-b, revised.
Rule 15-e Payment by Mail. (1st Rev. 12). Former Rule 15-c.
Rule 15-f Estimated Usage. (1st Rev. 12). Former Rule 15-d, revised.

REDUCTION

Rule 13-d Extension Revenue Guarantees. (1st Rev. 10). The applicability requirement as to connection density has been liberalized, the minimum guarantees reduced, and a guarantee termination provision added.

RATES AVAILABLE UNDER THIS TARIFF

(C) **Rate R** (PHILADELPHIA Division) and **Rate R-S** (SUBURBAN DIVISIONS) **Residence Service.** Residence Service is defined as the supply of single-phase electric service to the dwelling and appurtenances of a single private family for the domestic requirements of its members other than for the main or principal source of heat supply.

"Residence Service," as employed herein, is not susceptible of particularizing all the uses embraced therein.

As illustrative only of its general meaning:

The term includes service to: (a) The separate dwelling-unit in an apartment house, but not the halls, basement, or other portions of such building common to more than one such unit; (b) The premises occupied as the living-quarters of five persons or less who unite to establish a common dwelling-place for their own personal comfort and convenience on a cost-sharing basis; (c) The premises owned by a church, and primarily designated or set aside for, and actually occupied and used as, the dwelling-place of a priest, rabbi, pastor, rector, nun or other functioning Church Divine, and his or her resident associates; (d) Private dwellings in which space is occasionally used for the conduct of business by a person residing therein.

The term does NOT include service to: (a) Premises institutional in character including Clubs, Fraternities, Orphanages or Homes; (b) Premises defined as a rooming house or boarding house in the Municipal Code for Cities of the first class enacted by Act of General Assembly; (c) The space in an apartment or other residential building primarily devoted to a professional or other office, studio, or other gainful pursuit. This rate is not applicable to the use in the home of electric furnaces or welding apparatus other than a transformer type "limited input" arc welder with an input not to exceed 37½ amperes at 230 volts.

Rate HS Off-Peak Heat-Storage. Available only in conjunction with residence service for any Customer receiving service at 115-230 volts, 3 wires, for the operation of heat-storage hot-water equipment when the demand or load of the heat-storage installation does not exceed the Customer's demand for service to his other residence load.

Rate GLP General Light and Power is defined as the supply of electric service through a single metering installation for general lighting and/or power requirements of offices, professional, commercial or industrial establishments, and other applications outside the scope of the Residence Service Rates; Residence Service, when used through the same meter and in conjunction with General Light and Power Service will be supplied under this rate unless the Customer so separates and arranges his wiring that domestic use can be separately metered and makes a separate contract for other service.

Rate PD Primary-Distribution Power. Untransformed service from primary supply-lines, where the Customer installs, owns, and maintains, the receiving equipment.

Rate HT High-Tension Power. Untransformed service from high-tension transmission lines, where the Customer installs, owns, and maintains, the receiving equipment.

Rate QLF Quantity—High Load Factor—Power. Untransformed, large quantity, high load factor, electric service from high-tension transmission lines, where the Customer installs, owns, and maintains, the receiving equipment.

Rate MLP Municipal Light and Power. Available only to the CITY OF PHILADELPHIA, in lieu and to the exclusion of Rate GLP, for electric service supplied to the municipality for purposes other than street lighting.

Rate FLP Federal Light and Power. Available only to the UNITED STATES GOVERNMENT, in lieu and to the exclusion of Rate GLP, for the general lighting and power requirements of Federal departments.

Rate TL-S Traffic Signal Lighting. Available to any municipality in SUBURBAN DIVISIONS using the Company's standard service for multiple-incandescent traffic-signal lights.

Rate SL Street Lighting. Available only to the CITY OF PHILADELPHIA for series-outdoor-incandescent lighting for municipal purposes within the boundaries of the City and County of Philadelphia.

RULES AND REGULATIONS—*Continued*

c. The transforming, receiving and distribution facilities on the Customer's side of the delivery point are:
(1) furnished, installed and maintained at the expense of the Customer, and
(2) owned or leased by the Customer, and
(3) operated and controlled by or at the expense of the Customer.

d. The Company is under no legal obligation of direct supply to any portion of such buildings or units or their appurtenances.

e. A guarantee by deposit or otherwise is given and maintained to the Company sufficient in its reasonable judgment to insure it against loss in primary, secondary and/or distribution investment in the event of change in the nature of holding and possession of such buildings or units, or in the occupancy thereof, or in the type of service delivered thereto.

f. All utilization equipment on the Customer's side of the Company delivery point is furnished, installed, operated and maintained by the operator of the buildings or units supplied or by the tenants of such operator whose use of electricity is dependent upon the single point delivery and metering of service.

g. Any use of public highways by such operator for the latter's distribution facilities does not conflict or interfere with the franchise rights of the Company.

2.4 Compliance with Availability. The use of the Company's service shall not be for any purpose other than that covered by the availability-provisions of the rate or rider under which service is supplied.

2.5 Single Phase up to 50 Kva. Single-phase secondary service will not be supplied where the load to be served requires more than 50 kilovoltamperes of service capacity. The Customer must arrange to receive polyphase service for loads requiring capacity in excess of this amount.

RECEIVED
Pennsylvania Public Utility Commission
FEB 15 1949

(C) **2.6 Motors.** The Company reserves the right to refuse the supply of service to single-phase motors not meeting its standard requirements, and to polyphase installations aggregating less than 5 horsepower.

3. CUSTOMER'S INSTALLATION

3.1 Information from Customer. The Company should be advised, either directly or through an electrical contractor, in writing, preferably on form supplied by the Company, of premises to be equipped for electricity, giving their exact location and the details of all current consuming devices to be installed.

3.2 Meter Location. There shall be provided, free of expense to the Company, at a location which the Company will designate in writing upon request, outdoors at its option, a suitable place for the meter or meters and any other supply, protective or control equipment of the Company which may be required in the delivery of electric service.

3.3 Point of Delivery. The Company will designate in writing, upon request, a satisfactory point of delivery where the Customer shall terminate his wiring and facilities for connection to the supply lines of the Company. The failure to request and obtain such location may result in refusal of service pending re-arrangement of Customer's facilities, but the designation of a point of delivery does not constitute an agreement or obligation on the part of the Company to furnish service.

(C) **3.4 Service Entrance Equipment.** Service entrance wiring and equipment and all construction between the point of delivery and the meter shall be at the expense of the Customer and shall include an approved switch or disconnect control unit which may be sealed by the Company. The standard service entrance for receipt of single phase secondary service shall consist of two #6 AWG insulated conductors and one #8 AWG uninsulated conductor with a 3-wire control unit having a rated capacity of not less than 60 amperes.

3.5 Secondary Service Connection. (a) Wiring of any premises for connection to overhead lines must be brought outside of the building wall to a location designated or approved by the Company, at which point the house wiring must extend at least 3 feet for attachment to the Company's service supply lines.

(b) Service connections to the Company's underground distribution system shall terminate on the Customer's premises in an approved connection box from which Customer's wiring shall extend to his other service entrance equipment.

(C) Indicates change.

RATE SL-P STREET LIGHTING IN CITY OF PHILADELPHIA—*Continued*

Company shall own conduit from its street lighting distribution circuit to the 90 degree pipe bend and shall own conductors from its street lighting distribution circuit to the sidewalk level and shall provide sufficient length of conductors for splicing in the post-base where sidewalk level access is provided. Where a splicing chamber is provided in the post-base, the Customer shall provide space for any relays or similar control devices required for the operation of the street lighting circuit. These devices will be owned by the Company.

AERIAL SUPPLY: Customer shall own the Utilization Facilities comprising the brackets, hangers, luminaires, lamps, ballasts or transformers required for the operation of the Lighting Unit, conductors and any moulding and supporting insulators between the lamp receptacle and line wires of the street lighting distribution circuit.

Company shall provide the supporting pole or post for an aerial supplied Lighting Unit and will issue authorization to permit the Customer to install street lighting Utilization Facilities.

(C) 2. STANDARDS OF CONSTRUCTION FOR UTILIZATION FACILITIES. Customer construction shall meet the Company's standards which are based upon the National Electrical Safety Code. Designs of proposed construction deviating from such standards shall be submitted to the Company for approval before proceeding with any work involving such deviation.

3. SUPPLY FACILITIES. Lighting service shall be supplied from standard distribution and control facilities and equipment installed at the cost and expense of the Company and owned and controlled by it.

(C) 4. CONNECTION OF LIGHTING UNITS. For new Lighting Units, relocated Lighting Units and for any modernization or maintenance work involving connections to Company's street lighting circuits Customer shall provide sufficient length of conductors to permit Company to make taps at the top of the pole for aerial circuits, or for splices to underground circuits at the splicing chamber in the post base (where provided), or at the nearest available manhole. In the latter case, the Customer will bill the Company for the cost of the conductors from the sidewalk level to the manhole. All work done by the Customer that may involve Company street lighting and control circuits shall be performed under Company permit and blocking procedures.

5. LOCATION AND TYPE OF INSTALLATION. The prices of this rate apply to street lighting service under conditions named herein at locations designated by the properly authorized representatives of the Customer.

6. SERVICE. Lighting service will be operated on an all-night, every night lighting schedule of approximately 4,100 hours annual burning time, to be approved by the authorized representative of the Customer, under which lights are turned on after sunset and off before sunrise. Extended lighting service during all daylight hours, approximately 4,660 additional hours of burning time, will be supplied for lamps specified by the Customer.

(C) 7. CHANGE IN SIZE AND TYPES OF LIGHTING UNITS. Written notice of any planned change in size or type of any components of Lighting Units by locations shall be furnished by Customer to Company not less than 10 days prior to the effective date of such change. The Customer shall be responsible for notification to the Company of any changes made in Manufacturer's wattage ratings of Lighting Units used.

(C) 8. SERVICE MAINTENANCE. Upon receipt of report of Lighting Unit or Units not burning, Company will determine the cause of failure and will restore service on street lighting distribution circuit and control equipment disconnecting if necessary any faulty Lighting Units from the circuit. Customer will make necessary repairs between the lamp receptacle of the faulty Lighting Unit or Units and the point of connection to Company's street lighting distribution circuit. In the event the fault is located in the Company-owned facilities, Customer will bill the Company for this portion of the replaced facilities.

9. AUTHORIZATION AND PROTECTION. The Customer shall, to the extent of his ability, furnish any requisite authority for the erection and maintenance of poles, wires, fixtures and other equipment necessary to operate the lights at the locations and under the conditions designated, and shall protect the Company from malicious damage to the lighting system.

(C) Indicates change.

OFFICIALLY FILED TARIFF

OFFICIALLY FILED TARIFF

RATE RRR RAILROAD SERVICE—SMALL

Availability.

Available for railroad corporations using the Company's high tension service for operation of railroad systems and appurtenances and guaranteeing a demand not less than 9,200 kilowatts.

Monthly Rate Table.

(I) **Capacity Charge:**

$1.50 per kw of billing demand.

Energy Charge:

0.5¢ per kwh.

Fuel-Adjustment Clause: Applies to this rate.

CANCELLED by Revised Page 36 EFFECTIVE SEP 1 1961

Determination of Demand.

As soon as practicable after the end of each calendar month of the term of a contract, the Customer's demand in kilowatts taken from the Company for such month shall be ascertained as follows:

From each of 3 days in the month there shall be selected one even or clock hour, which shall be the hour of greatest combined draught (in kilowatt-hours) of the day from which it is taken; and said 3 days shall be such that the total draught of the 3 hours selected therefrom in the manner thus indicated shall be greater than the total draught of 3 hours similarly selected from any other 3 days in the month. One-third of the aggregate number of kilowatt-hours drawn and consumed by the Customer during the 3 hours selected as aforesaid from each month shall be taken and considered as the number of kilowatts constituting the Customer's demand for such month.

The Customer agrees to maintain a power factor as near unity as practicable and should the power factor, during the hours used in determining the demand, average less than 65%, during any month, then the demand upon which the capacity charge is based shall be corrected by dividing the demand by the actual power factor and then multiplying by 65%.

Demand Guarantee.

For each month during the term of a contract or any extension thereof, the amount of electrical capacity which the Company shall stand ready to supply and shall supply, and for which the Customer shall be obligated to pay, shall be not less than 75% of the greatest demand during the preceding 12 months.

Kilowatt-Hours Guarantee.

The kilowatt-hours to be paid for each month shall be not less than would be required by the use of the demand at a monthly load factor of 30% provided, however, that the Customer is not prevented from using a normal amount of energy by any cause beyond his reasonable control. The 30% load factor is defined as that number of kilowatt-hours which will equal 30% of the total number of kilowatt-hours which the demand for the month could produce if exerted during each and every hour of the month.

Point of Delivery.

The point of delivery for service rendered under this rate shall be the generating station of the Company from which service is supplied or such other point in the immediate vicinity thereof as may be acceptable to the Company.

EFFECTIVE NOV 21 1955

STANDARD RIDERS—*Continued*

Applicable to rates as indicated in Applicability Index of Riders, Page No. 41

HT NIGHT SERVICE RIDER—*Continued*

Determination of Excess Off-Peak Billing Demand. The excess off-peak billing demand shall be the amount by which the greatest demand occurring during off-peak hours, as determined by measurement and adjusted for power factor, exceeds the billing demand for on-peak hours, whether the latter is a minimum or an actual demand. In no event shall the excess off-peak billing demand to be paid for be less than 25% of the greatest as-aforesaid-determined excess off-peak billing demand during any month of the preceding 11 months or greater than an amount prescribed by the Company.

Other Riders. Where the Off-Peak Rider and this rider are applied to the same contract, the Off-Peak Rider will be applied only to the provisions of the contract, and this rider will then be applied to the contract as modified. This rider will not be applied in conjunction with the Temporary Service Rider.

Term. Annual contract.

INVESTMENT RETURN GUARANTEE RIDER

Applicability. To contracts which require investment in supply facilities greater than warranted by the revenue assured by the minimum of the rate under which service is supplied.

Cost of Extension. The cost of the extension of supply facilities, including the cost of the service connection, shall be set forth in each agreement for the application of this rider.

Minimum Guarantee. The minimum monthly payment for service shall be the amount set forth in the rider agreement or, in the event of later increases of the Customer's load, the minimum of the rate at which service is rendered, whichever minimum obligation is the greater.

Construction Advances. Where the service desired is of limited amount or doubtful permanency, the Company will require payment as an advance for construction of a sum which will be credited to bills for service rendered as they accrue, with the right to retain such portion of the advance as needed to guarantee the payment of subsequent bills.

Fulfillment of Contract Term. In the event of the discontinuance for any reason of the supply or use of energy prior to the expiration of the term of the contract with which this rider is applied, the Customer shall pay the Company immediately thereon a pro rata share of the cost of the extension for the unexpired portion of the contract term.

Ownership of Supply Facilities. The provisions of this rider shall not under any circumstances be considered as conferring upon the Customer any title to, or right of property in, the supply facilities.

Contract Term. Contract terms in excess of one year may be arranged with the Customer to assure the return required by the investment in supply facilities.

METER RENTAL RIDER

Applicability. To the supply and maintenance, on any part of a Customer's load served exclusively by the Company, of watt-hour meters in excess of those required to measure the energy to be billed to the Customer, including the reading of such meters.

Submetering Defined. Submetering provided hereunder shall be confined to standard watt-hour meters for the standard secondary voltages furnished by the Company. Demand registers, demand meters, two-rate registers, load control devices or contact mechanisms shall not be furnished nor permitted to be attached to submeters furnished by the Company.

Charge—Per Month.

(C) **Self-contained meters**	
Single-phase 120 or 240 v. up to 50 A	$0.50
2- or 3-phase 240 v. up to 50 A	1.00
(C) **Instrument Transformer meters**	
Single-phase 240 v.	1.50
2- or 3-phase 240 v.	3.00

RATES AVAILABLE UNDER THIS TARIFF—Continued

(C) **Rate SL-P Street Lighting in City of Philadelphia.** Available only to a governmental agency, municipal, state or federal, for outdoor lighting service of streets, highways, bridges, parks or similar places, including directional highway signs at locations where other outdoor lighting service is established, for the safety and convenience of the public within the City of Philadelphia by incandescent filament, mercury-vapor, or fluorescent lamps of standard sizes and types approved by the Company where the Customer installs, owns and maintains all Utilization Facilities. Service will be supplied under this rate for street Lighting Units supported in a conventional manner, such as on poles, posts, brackets or hangers, and under conditions of installation and supply acceptable to the Company.

Rate SL-S Street Lighting. Outdoor lighting of highways, bridges, parks and similar places for the safety and convenience of the public in Suburban Divisions.

Rate PSL Private Street Lighting. This rate is in process of elimination and is restricted to lamps in service on March 1, 1955.

Rate RRR Railroad Service—Small. Available for railroad corporations using the Company's high tension service for operation of railroad systems and appurtenances and guaranteeing a demand not less than 9,200 kilowatts.

Rate T Traction Service. Available for street-railway corporations using the Company's standard high tension service for transportation purposes and requiring initially not less than 130,000 kilowatts of capacity.

Rate BLI Borderline Interchange Service. Electric service supplied under reciprocal agreements, to neighboring electric utilities for resale in their adjacent territory at delivery points where the Company in its judgment can provide capacity in excess of the requirements of present and prospective Customers in its own territory and for periods fixed by contract and terminable after the expiration of the initial term if capacity is no longer available.

RULES AND REGULATIONS—*Continued*

5.5 Return of Deposit. Deposits secured from a Residence Service Customer shall be returned when undisputed bills covering a period of 12 consecutive months shall have been paid within 30 days following presentation. If payment of any contested bill is withheld beyond the period herein mentioned and the dispute is terminated substantially in favor of the Customer, payment must have been made within 10 days thereafter. In cases of discontinuance of service, deposits will be returned in full upon payment of all service charges and guarantees or with deduction of unpaid accounts.

5.6 Interest on Deposit. The Company will allow simple interest at the rate of 6% per annum on cash deposits. Deposits shall cease to bear interest upon discontinuance of service.

6. PRIVATE-PROPERTY CONSTRUCTION

6.1 Company's Service-Supply Lines. Where the Company has supply-facilities of adequate capacity on the highway or in other trunk-line location adjacent to the premises to be served, it will provide, own and maintain standard service-supply lines for a new connection or a change in connection or for a change in contract as follows: (a) a single span (nominally 100 feet) of open-wire construction to the first suitable support of the Customer, which shall be so located that the service-span will be free of obstruction and supported at the point required by its size and weight; (b) overhead or underground cable-construction to a point approximately 18 inches inside the property-line of the Customer.

6.2 Customer's Service-Extension. The Customer shall provide, own and maintain the service-extension from the Company's service-supply lines to his receiving equipment.

6.3 Meters and Transformers. The Company will provide, own and maintain any meter or meters, and also the transformer or transformers, required in the supply of service of the current-characteristics specified by the rate or rider under which the supply is made. The supply of transformers by the Company shall be limited to those required for a single standard transformation.

(C) **6.4 Trailer Parks.** Where it is established by plans, development, use or other facts that the operation of a trailer park is predominantly to provide rental locations for non-transient trailers, with not less than three such locations, the Company, upon written application of the trailer park operator and upon the receipt of an enabling agreement and of site rights-of-way, will construct, own and operate within the trailer park specified aerial distribution facilities for separate supply and metering by the Company for each trailer's use of electric energy, the trailer park operator being liable for payment for service to trailer park tenants not contracting in writing for service in their own names. The Company's obligation to install or extend such distribution facilities within the trailer park is limited to the investment warranted by the anticipated revenue. Alterations of such distribution facilities at the request of the park operator when not for the purpose of serving additional trailer rental locations will be at the cost of the trailer park operator. A trailer park operator desiring underground distribution facilities within the trailer park must bear the excess cost incident thereto. Specifications and terms for such underground construction will be furnished by the Company on request.

7. EXTENSIONS

AUG 3 1960

7.1 Trunk-Line Construction. The Company will construct, own and maintain overhead or underground supply-facilities, either secondary, primary, or high tension, located on the highway or on rights-of-way acquired by the Company and used [illegible] Company's general supply-system.

TARIFF SECTION

7.2 Obligation to Extend. The Company's obligation to extend its facilities to a new point of delivery is limited to the assumption of new investment to the extent warranted by the revenue anticipated from the business to be supplied.

7.3 Special Extensions. Where the business in prospect does not warrant the expenditure required to serve it, the Company will determine, from the circumstances of each case, what guarantees of revenue, or what financing, shall be required of the Customer.

7.4 Extension Refunds. All, or part, of that part of the cost of any extension which is financed by a Customer may be refunded to him over a term of years upon such basis or conditions as may be determined by the Company, and specified in the contract for service.

(C) Indicates change.

RATE SL STREET LIGHTING—*Continued*

Terms and Conditions.

1. SUPPLY FACILITIES. The lighting service under the conditions above stated, other than for facilities supplied by the Customer as set forth under "City Duct" and "City-Owned" conditions, shall be supplied from standard facilities and equipment installed at the cost and expense of the Company and owned and controlled by it except that in the event steel poles are used, the type to be supplied shall be subject to agreement between the Customer and the Company and the expense to the Company shall be limited to the cost of poles of the Company's standard design.

2. RELOCATION OF FACILITIES. The cost of any change in location of lamp posts, manholes, conduit, cable or other facilities used for lighting shall be borne by the Customer unless such change results in an increase in revenue to the Company, in which case it shall be made at the expense of the Company as soon as practicable after receipt of written notice to make the change.

3. LOCATION AND TYPE OF INSTALLATION. The prices of this rate apply to lamps supplied under conditions named herein at locations designated by the properly authorized representatives of the Customer.

(C) 4. SERVICE. The lighting service, supplied at the prices of the rate table, will be operated on an all-night, every-night lighting schedule of approximately 4,100 hours annual burning time to be approved by the authorized representatives of the Customer, under which lights are turned on after sunset and off before sunrise. Extended lighting service during all daylight hours, approximately 4,660 additional hours of burning time, will be supplied for lamps specified by the Customer at charges as follows, additional to prices named in the rate table:

MANUFACTURER'S RATED SIZE	ADDITIONAL CHARGE
Series Incandescent:	
1,000 Lumens	$ 5.00
2,500 "	9.60
4,000 "	13.30
6,000 "	18.60
10,000 "	34.20
15,000 "	44.70
Multiple Mercury Vapor:	
15,000 Lumens	$31.50
20,000 "	41.00

TARIFF SECTION

Lighting service includes the supply of lamps, energy, the cleaning and maintenance of lamps, fixtures and supply facilities, and the renewal of lamps broken or burned out.

5. AUTHORIZATION AND PROTECTION. The Customer shall, to the extent of his ability, furnish any requisite authority for the erection and maintenance of poles, wires, fixtures and other equipment necessary to operate the lights at the locations and under the conditions designated, and shall protect the Company from malicious damage to the lighting system.

6. ADDITIONAL LIGHTING. Additional lamps, to continue in use for the balance of the existing contract term, will be installed by the Company on the basis defined in "Supply Facilities" for any standard service condition upon written notice from the Customer specifying the location of their installation and the condition of service, unless the proposed additional lighting is at such a remote location, or the number or spacing of the additional lamps, or lack of necessary supply lines, or any other reason makes the investment or cost of providing, erecting and maintaining said lamps excessive, in which case a portion of the investment or cost shall be borne by the Customer subject to agreement between the Customer and the Company.

7. OUTAGE ALLOWANCES. The Company will use reasonable diligence to provide a continuous, regular and uninterrupted supply of service, but should the supply of service be interrupted as a result of the Customer's failure to protect the lighting system or as a result of riot, fire, storm, flood, interference by civil or military authorities or any other cause beyond its control, the Company shall not be liable and no allowance for outage will be made. Failure of any light to burn for any other reason will, upon written notice to the Company, entitle the Customer to a deduction from the street lighting bill for the hours of failure in accordance with the following Table of Allowances for Outage.

EFFECTIVE AUG 20 1955

RATE SL-P STREET LIGHTING IN CITY OF PHILADELPHIA—Continued

Terms and Conditions.

1. OWNERSHIP OF UTILIZATION FACILITIES.

UNDERGROUND SUPPLY: Customer shall own the Utilization Facilities comprising the lamp-supporting pole or post, foundation with 90 degree pipe bend, bracket, luminaire, lamp, ballast or transformer required for the operation of the lamp, and conductors from the lamp to sidewalk level.

Where vertical extensions are required on foreign-owned posts for the support of an underground supplied lamp, the extension shall be provided and owned by the Customer. Rentals incurred on such foreign-owned posts shall be the responsibility of the Customer.

Company shall own conduit from its street lighting distribution circuit to the 90 degree pipe bend and shall own conductors from its street lighting distribution circuit to the sidewalk level, and shall provide sufficient length of conductors for splicing in the post-base where sidewalk level access is provided. Where a splicing chamber is provided in the post base, the Customer shall provide space for any relays or similar control devices required for the operation of the street lighting circuit. These devices will be owned by the Company.

AERIAL SUPPLY: Customer shall own the Utilization Facilities comprising the bracket, luminaire, lamp, ballast or transformer required for the operation of the lamp, conductors and any moulding and supporting insulators between the lamp and line wires of the street lighting distribution circuit.

Company shall provide the supporting pole or post for an aerial supplied lamp and will issue authorization to permit the Customer to install street lighting Utilization Facilities.

2. STANDARDS OF CONSTRUCTION FOR UTILIZATION FACILITIES. Customer construction shall meet the Company's standards which are based upon the National Electrical Safety Code. Proposed revisions of such standards shall be submitted to the Company for approval before proceeding with any work involving the revised standards.

3. SUPPLY FACILITIES. Lighting service shall be supplied from standard distribution and control facilities and equipment installed at the cost and expense of the Company and owned and controlled by it.

4. CONNECTION OF LAMPS. For new lamps, relocated lamps and for any modernization or maintenance work involving connections to Company's street lighting circuits Customer shall provide sufficient length of conductors to permit Company to make taps at the top of the pole for aerial circuits, or for splices to underground circuits at the splicing chamber in the post base (where provided), or at the nearest available manhole. In the latter case, the Customer will bill the Company for the cost of the conductors from the sidewalk level to the manhole. All work done by the Customer that may involve Company street lighting and control circuits shall be performed under Company permit and blocking procedures.

5. LOCATION AND TYPE OF INSTALLATION. The prices of this rate apply to street lighting service under conditions named herein at locations designated by the properly authorized representatives of the Customer.

6. SERVICE. Lighting service will be operated on an all-night, every night lighting schedule of approximately 4,100 hours annual burning time, to be approved by the authorized representative of the Customer, under which lights are turned on after sunset and off before sunrise. Extended lighting service during all daylight hours, approximately 4,660 additional hours of burning time, will be supplied for lamps specified by the Customer.

7. CHANGE IN SIZE AND TYPE OF LAMPS. Written notice of any planned change in size or type of lamps by locations shall be furnished by Customer to Company not less than 10 days prior to the effective date of such change.

STANDARD RIDERS—*Continued*

Applicable to rates as indicated in Applicability Index of Rider No. 100

HT NIGHT SERVICE RIDER—*Continued*

Determination of Excess Off-Peak Billing Demand. The excess off-peak billing demand shall be the amount by which the greatest demand occurring during off-peak hours, as determined by measurement and adjusted for power factor, exceeds the billing demand for on-peak hours, whether the latter is a minimum or an actual demand. In no event shall the excess off-peak billing demand to be paid for be less than 25% of the greatest as-aforesaid-determined excess off-peak billing demand during any month of the preceding 11 months or greater than an amount prescribed by the Company.

Other Riders. Where the Off-Peak Rider and this rider are applied to the same contract, the Off-Peak Rider will be applied only to the provisions of the contract, and this rider will then be applied to the contract as modified. This rider will not be applied in conjunction with the Temporary Service Rider.

Term. Annual contract.

Bureau of Rates and Research
TARIFF SECTION

INVESTMENT RETURN GUARANTEE RIDER

Applicability. To contracts which require investment in supply facilities greater than warranted by the revenue assured by the minimum of the rate under which service is supplied.

Cost of Extension. The cost of the extension of supply facilities, including the cost of the service connection, shall be set forth in each agreement for the application of this rider.

Minimum Guarantee. The minimum monthly payment for service shall be the amount set forth in the rider agreement or, in the event of later increases of the Customer's load, the minimum of the rate at which service is rendered, whichever minimum obligation is the greater.

Construction Advances. Where the service desired is of limited amount or doubtful permanency, the Company will require payment as an advance for construction of a sum which will be credited to bills for service rendered as they accrue, with the right to retain such portion of the advance as needed to guarantee the payment of subsequent bills.

Fulfillment of Contract Term. In the event of the discontinuance for any reason of the supply or use of energy prior to the expiration of the term of the contract with which this rider is applied, the Customer shall pay the Company immediately thereon a pro rata share of the cost of the extension for the unexpired portion of the contract term.

Ownership of Supply Facilities. The provisions of this rider shall not under any circumstances be considered as conferring upon the Customer any title to, or right of property in, the supply facilities.

Contract Term. Contract terms in excess of one year may be arranged with the Customer to assure the return required by the investment in supply facilities.

METER RENTAL RIDER

Applicability. To the supply and maintenance, on any part of a Customer's load served exclusively by the Company, of watt-hour meters in excess of those required to measure the energy to be billed to the Customer, including the reading of such meters.

Submetering Defined. Submetering provided hereunder shall be confined to standard watt-hour meters for the standard secondary voltages furnished by the Company. Demand registers, demand meters, two-rate registers, load control devices or contact mechanisms shall not be furnished nor permitted to be attached to submeters furnished by the Company.

Charge—Per Month.

Self-contained meters	
Single-phase 115 or 230 v. up to 50 A.	$0.50
2- or 3-phase 230 v. up to 50 A.	1.00
Instrument Transformer meters	
Single-phase 230 v.	1.50
2- or 3-phase 230 v.	3.00

Applicable to rates as indicated in Applicability Index of Riders, Page No. 41

METER RENTAL RIDER—*Continued*

Meter Readings. The meters will be read by the Company's reader on his regular reading trip and a statement of the meter readings and of the usage recorded between such regular reading dates supplied the Customer.

Customer's Wiring. The Customer shall provide standard meter mounting and test facilities; also enclosures for any instrument transformers.

Control of Meters. The meters and metering equipment will be sealed by the Company, and access to the wiring and connections shall be available only to authorized employees of the Company.

Routine Tests. The Company will test and maintain the meters within the accuracy requirements and test periodicity specified by the Pennsylvania Public Utility Commission for each class of service.

Request Tests. The Company will make additional tests and inspections of its meters at the request of the Customer, subject to a charge for each test of—

$1.50 for single-phase meters.
2.50 for polyphase meters.

Ownership. The provisions of this rider shall not under any circumstances be considered as conferring upon the Customer any title to, or right of property in, the submetering equipment.

Protection. The Customer shall protect the equipment of the Company and, in the event of its damage or destruction by overload, fire or other cause, the cost of repairs or replacement shall be paid by the Customer.

Liability. The Company shall not be liable in any way for the payment of damages or claims arising by reason of the failure of any of its meters to register accurately the service which the Customer supplies or resells through it to a third party, other than for the obligation to test and re-calibrate the meter so that it will operate approximately within the limits been discovered.

Term. Annual contract.

OFF-PEAK RIDER

Applicability. To the restricted use of purchased energy during the winter months caused by the seasonal requirements of the entire plant of Customers purchasing service on measured demand contracts. Not available in conjunction with the Seasonal Rider.

Winter Months Defined. November, December, January and February.

Base Contract. The Customer shall enter into a standard contract for service under the applicable rate which will stipulate the maximum billing demand to be supplied.

Restricted Use. Use shall be restricted between the hours from 7 a. m. to 7 p. m. on week-days during the winter months to demands not in excess of 50% of the maximum billing demand of the Customer's contract.

Minimum Waiver. The minimum payment obligations of the contract shall not apply during the four winter months nor during the months of October, March and April.

Rate Application. Service taken each month shall be paid for at the rate subject to the monthly minimum charge due under the contract except as waived by the terms of this rider.

Excess Demand. Demands imposed between the hours from 7 a. m. to 7 p. m. on week-days during the months of November, December, January or February in excess of 50% of the maximum billing demand stipulated in the Customer's contract, will be billed an additional charge of $2.00 per kilowatt per month for such excess demand.

Contract Term. Coincidentally with the term of the rate applied, or for a winter season, as elected by the Customer.

OFFICIALLY FILED TARIFF

RULES AND REGULATIONS

1 - GENERAL

1-a Filing and Posting

A copy of this Tariff which contains the rates, rules and regulations governing the supply of electric service is on file with the Pennsylvania Public Utility Commission and is posted and open to inspection at the offices of the Company.

1-b Revisions

This Tariff may be revised, amended, supplemented or otherwise changed from time to time in accordance with the Public Utility Law of Pennsylvania and such changes when effective shall have the same force as the original Tariff.

1-c Statement by Agents

No representative has authority to modify any rule or provision of this Tariff, or to bind the Company by any promise or statement contrary thereto.

1-d Rules and Regulations

The Rules and Regulations are a part of every contract for service and govern all classes of service unless otherwise specifically stated by a rate.

1-e No Prejudice of Rights

The failure by the Company to enforce any of the provisions of this Tariff shall not be deemed a waiver of its right to do so.

1-f Gratuities to Employees

The Company's employees are strictly forbidden to demand or accept any personal compensation, or gifts, for service rendered by them while working for the Company on the Company's time.

(C) 1-g Basis of Charge

Time elapsed is a factor in the supply of electric service and the rates and minimum charges named in this Tariff, while predicated on periods of supply of not less than one year, are stated in values for direct application only to monthly periods of service supply and will be adjusted for application to service supplied during other time intervals.

2 - APPLICATION AND CONTRACT FOR SERVICE

2-a Contract for Service

A written application for the supply of service will be required from each Customer. This application when accepted by the Company constitutes the contract between the Company and the Customer, subject to the Rules and Regulations.

2-b Right to Reject Application

The Company may reject any application for service not available under a standard rate, or which involves excessive service cost, or which might affect the supply of service to other Customers, or for other good and sufficient reasons.

2-c One Point of Delivery

The rates in this Tariff, unless otherwise stated, are based upon the supply of the service to one entire premises through a single delivery and metering point. The Company will supply only one meter for each class of service. The use of service at two or more separate properties will not be combined for billing purposes.

2-d Short Term Contracts

Service will be supplied under Rates X and RLP on seasonal or short term contracts subject to the guaranteed revenue for a period of one (1) year.

CHANGES

Rate SL-P Street Lighting in City of Philadelphia (4TH REV. 33A.)

Availability revised to permit incandescent filament lamps to be supplied from multiple circuits.

Rate SL-S Street Lighting (3RD REV. 34.)

The rate for 15,000 lumen incandescent filament lamps is withdrawn. No customers are receiving service under it.

A rate is provided for 35,000 lumen mercury vapor lamps.

Revisions have been made to permit mercury vapor lamps to be supplied from series circuits and to eliminate the relation of remote locations to series circuits.

RATES AVAILABLE UNDER THIS TARIFF—*Continued*

(C) **Rate SL-P Street Lighting in City of Philadelphia.** Available only to a governmental agency, federal, state or municipal, for outdoor lighting service of highways, bridges, parks or similar places, for the safety and convenience of the public, within the City of Philadelphia by series incandescent filament lamps and by multiple or series mercury-vapor or fluorescent lamps of standard sizes and types approved by the Company where the Customer installs, owns and maintains all Utilization Facilities. Service will be supplied under this Rate for Street Lighting Units supported in a conventional manner, such as on poles, posts, brackets or hangers, and under conditions of installation and supply acceptable to the Company.

Rate SL-S Street Lighting. Outdoor lighting of highways, bridges, parks and similar places for the safety and convenience of the public in Suburban Divisions.

Rate PSL Private Street Lighting. This rate is in process of elimination and is restricted to lamps in service on March 1, 1955.

Rate RRR Railroad Service—Small. Available for railroad corporations using the Company's high tension service for operation of railroad systems and appurtenances and guaranteeing a demand not less than 9,200 kilowatts.

Rate T Traction Service. Available for street-railway corporations using the Company's standard high tension service for transportation purposes and requiring initially not less than 130,000 kilowatts of capacity.

Rate BLI Borderline Interchange Service. Electric service supplied under reciprocal agreements, to neighboring electric utilities for resale in their adjacent territory at delivery points where the Company in its judgment can provide capacity in excess of the requirements of present and prospective Customers in its own territory and for periods fixed by contract and terminable after the expiration of the initial term if capacity is no longer available.

RULES AND REGULATIONS—*Continued*

5.5 Return of Deposit. Deposits secured from a Residence Service Customer shall be returned when undisputed bills covering a period of 12 consecutive months shall have been paid within 30 days following presentation. If payment of any contested bill is withheld beyond the period herein mentioned and the dispute is terminated substantially in favor of the Customer, payment must have been made within 10 days thereafter. In cases of discontinuance of service, deposits will be returned in full upon payment of all service charges and guarantees or with deduction of unpaid accounts.

5.6 Interest on Deposit. The Company will allow simple interest at the rate of 6% per annum on cash deposits. Deposits cease to bear interest upon discontinuance of service.

6. PRIVATE PROPERTY CONSTRUCTION

6.1 Company's Service-Supply Lines. Where the Company has supply-facilities of adequate capacity on the highway or other trunk-line location adjacent to the premises to be served, it will provide, own and maintain standard service-supply lines for a new connection or a change in connection or for a change in contract as follows: (a) a single span (nominally 100 feet) of open-wire construction to the first suitable support of the Customer, which shall be so located that the service-span will be free of obstruction and supported at the point required by its size and weight; (b) overhead or underground cable-construction to a point approximately 18 inches inside the property-line of the Customer.

6.2 Customer's Service-Extension. The Customer shall provide, own and maintain the service-extension from the Company's service-supply lines to the receiving equipment.

6.3 Meters and Transformers. The Company will provide, own and maintain any meter or meters, and also the transformer or transformers, required in the supply of service of the current-characteristics specified by the rate or rider under which the service is rendered. The supply of transformers by the Company shall be limited to those required for a single standard transformation.

RECEIVED
FEB 15 1949
TARIFF SECTION

7. EXTENSIONS

7.1 Trunk-Line Construction. The Company will construct, own and maintain overhead or underground supply-facilities, either secondary, primary, or high tension, located on the highway or on rights-of-way acquired by the Company and used or intended to be used as part of the Company's general supply-system.

7.2 Obligation to Extend. The Company's obligation to extend its facilities to a new point of delivery is limited to the assumption of new investment to the extent warranted by the revenue anticipated from the business to be supplied.

7.3 Special Extensions. Where the business in prospect does not warrant the expenditure required to serve it, the Company will determine, from the circumstances of each case, what guarantees of revenue, or what financing, shall be required of the Customer.

7.4 Extension Refunds. All or part, of that part of the cost of any extension which is financed by a Customer may be refunded to him over a term of years upon such basis or conditions as may be determined by the Company, and specified in the contract for service.

8. RIGHTS-OF-WAY

8.1 Term and Rentals. When the premises of a Customer is so located that he can be served only by facilities extending over the property of another, the Customer shall accept service for such term as is provided in the permit or agreement covering the location and the maintenance of service-equipment, and he shall reimburse Company for any and all special, or rental, charges that may be made for such rights by said permit or agreement.

8.2 Procurement by Customer. Customers applying for the construction of an extension may be required to secure to, and for, the Company, all necessary and convenient rights-of-way and to pay the costs incident thereto.

8.3 Delays. Applications for service from an extension to be constructed where a right-of-way is not owned by the Company will only be accepted subject to delays incident to obtaining a satisfactory right-of-way.

9. INTRODUCTION OF SERVICE

9.1 Wiring in Progress. Service-supply lines will not be installed prior to the time that the wiring of the premises is actually in progress.

9.2 Underwriter's Inspection. Electricity will not be introduced until a certificate of approval has been issued by the Fire Underwriters' Association having jurisdiction in the territory supplied.

EFFECTIVE

(C) RATE SL STREET LIGHTING—*Continued*

Terms and Conditions.

1. SUPPLY FACILITIES. The lighting service under the conditions above stated, other than for facilities supplied by the Customer as set forth under "City Duct" and "City-Owned" conditions, shall be supplied from standard facilities and equipment installed at the cost and expense of the Company and owned and controlled by it except that in the event steel poles are used, the type to be supplied shall be subject to agreement between the Customer and the Company and the expense to the Company shall be limited to the cost of poles of the Company's standard design.

2. RELOCATION OF FACILITIES. The cost of any change in location of lamp posts, manholes, conduit, cable or other facilities used for lighting shall be borne by the Customer unless such change results in an increase in revenue to the Company, in which case it shall be made at the expense of the Company as soon as practicable after receipt of written notice to make the change.

3. LOCATION AND TYPE OF INSTALLATION. The prices of this rate apply to lamps supplied under conditions named herein at locations designated by the properly authorized representatives of the Customer.

4. SERVICE. The lighting service will be operated on an all night, every night, lighting schedule of approximately 4,100 hours annual burning time to be approved by the authorized representatives of the Customer, under which lights are turned on after sunset and off before sunrise. It includes the supply of lamps, energy, the cleaning and maintenance of lamps, fixtures and supply facilities and the renewal of lamps broken or burned out.

5. AUTHORIZATION AND PROTECTION. The Customer shall, to the extent of his ability, furnish any requisite authority for the erection and maintenance of poles, wires, fixtures and other equipment necessary to operate the lights at the locations and under the conditions designated, and shall protect the Company from malicious damage to the lighting system.

6. ADDITIONAL LIGHTING. Additional lamps, to continue in use for the balance of the existing contract term, will be installed by the Company on the basis defined in "Supply Facilities" for any standard service condition upon written notice from the Customer specifying the location of their installation and the condition of service, unless the proposed additional lighting is at such a remote location, or the number or spacing of the additional lamps, or lack of necessary supply lines, or any other reason makes the investment or cost of providing, erecting and maintaining said lamps excessive, in which case a portion of the investment or cost shall be borne by the Customer subject to agreement between the Customer and the Company.

7. OUTAGE ALLOWANCES. The Company will use reasonable diligence to provide a continuous, regular and uninterrupted supply of service, but should the supply of service be interrupted as a result of the Customer's failure to protect the lighting system or as a result of fire, storm, flood, interference by civil or military authorities or any other cause beyond its control, the Company shall not be liable and no allowance for outage will be made. Failure of any light to burn for any other reason will, upon written notice to the Company, entitle the Customer to a deduction from the street lighting bill for the hours of failure in accordance with the following Table of Allowances for Outage.

(C) RATE SL-P STREET LIGHTING IN CITY OF PHILADELPHIA—*Continued*

7. Location and Type of Installation. The prices of the rate apply to street lighting service under conditions named herein at locations designated by the properly authorized representatives of the Customer.

8. Service. Lighting service will be operated on all-night, every-night lighting schedules, to be agreed to by the authorized representatives of the Customer and the Company, under which lights normally are turned on after sunset and off before sunrise. Extended lighting service during all daylight hours will be supplied for lamps specified by the Customer.

9. Change in Size and Type of Lighting Units. Written notice of any planned change in size or type of any components of Lighting Units by locations shall be furnished by the Customer to the Company not less than 10 days prior to the effective date of such change. The Customer shall be responsible for notification to the Company of any changes made in manufacturer's wattage ratings of Lighting Units used.

10. Service Maintenance. Upon receipt of report of Lighting Unit or Units not burning, the Company will determine the cause of failure and will restore service on street lighting or distribution circuit and control equipment, disconnecting if necessary any faulty Lighting Units from the circuit. Customer will make necessary repairs between the lamp receptacle of the faulty Lighting Unit or Units and the point of connection to the Company's street lighting or distribution circuit. In the event the fault is located in the Company-owned facilities, the Customer will bill the Company for this portion of the replaced facilities.

11. Authorization and Protection. Customer shall, to the extent of his ability, furnish any requisite authority for the erection and maintenance of poles, wires, fixtures and other equipment necessary to operate the lights at the locations and under the conditions designated, and shall protect the Company from malicious damage to the lighting system.

12. Additional Lamps. Lighting service for additional lamps installed by the Customer will be supplied by the Company upon written notice from the Customer specifying the locations of the installations unless the proposed additional lighting makes the investment or cost of providing distribution equipment excessive, in which case a portion of the investment or cost shall be borne by the Customer subject to agreement between the Customer and the Company.

13. Relocation of Lighting Units. Where a pole is replaced by the Company at its own option, it shall be the Customer's responsibility to have the Utilization Facilities transferred from the old to the new pole.

14. Outage Allowance. Company will use reasonable diligence to provide a continuous, regular and uninterrupted supply of service and the Customer will use reasonable diligence to protect the lighting system. In lieu of determination of the actual hours of Lighting Unit outages resulting from a failure of any light to burn for any reason, a deduction of 0.20% of the monthly capacity and energy charges including fuel adjustment will be made on the monthly bill. Company shall not be liable for service interruptions as a result of the Customer's failure to protect the lighting system, or as a result of riot, fire, storm, flood, interference by civil or military authorities or any other cause beyond its control.

RATE FOR TRACTION SERVICE—*Continued*

Determination of Demand.

As soon as practicable after the end of each calendar month, the demand of Customer in kilowatts of electrical capacity will be determined as follows:

From each of 3 days in the month, there shall be selected the clock-hour of greatest use by Customer of electrical energy in kilowatt-hours metered simultaneously at all points of delivery, said 3 days being such that the total use of energy for the 3 clock-hours selected therefrom in the manner indicated, shall be greater than the total use of energy for 3 clock-hours similarly selected from any other 3 days in the month. These measurements shall be taken at the 13,200-volt buses of the Customer, or adjusted to demands at the 13,200-volt buses by proper correction in those cases where direct current is measured at the points of delivery. One-third of the total number of kilowatt-hours thus selected and adjusted shall be increased by dividing by 0.97 to compensate for distribution and transformation losses. The final figure, subject to minimum billing demand and/or to correction for power factor as hereinafter specified, shall be taken as the number of kilowatts constituting the demand of Customer for billing purposes for that month.

The Customer agrees to maintain a power factor as near unity as practicable and should the power factor, during the hours used in determining the demand, average less than 98% during any month, then the demand upon which the primary charge is based shall be corrected by dividing the demand by the actual power factor and then multiplying by 98%.

Demand Guarantee.

Should the demand in any month be less than 75% of the greatest demand for any prior month during the preceding 12 months, then the demand for billing purposes shall be taken at 75% of such greatest prior demand within a 12-months' period. Customer must guarantee that the demand will be not less at any time during the life of his agreement than 64,880.4 kilowatts, this being the minimum amount of demand which Customer must pay for. In the event that the demand shall in any month fall below 64,880.4 kilowatts, which is the guaranteed minimum demand, then either party shall have the right and may elect to terminate the agreement under this rate subject to the length of time for notice of termination and to all provisions for termination contained in the agreement relating to the rights of the parties thereto upon termination.

Amount and Character of Capacity.

The Company will maintain 130,000 kilowatts of capacity, of which the major portion shall be for the supply of 60-cycle energy and the minor portion for the supply of 25-cycle energy. The 25-cycle supply is limited to the Allison, Dauphin, Market, Ranstead, and Sansom substations as of November 5, 1947, and neither the Company nor the Customer will require that they be changed from 25-cycle to 60-cycle before September 30, 1954.

Applicable to rates as indicated in Applicability Index of Riders, Page No. 47.

PD NIGHT SERVICE RIDER

Applicability. To service supplied during off-peak hours for demands in excess of those supplied during on-peak hours where the capacity supplied by the Company does not exceed 800 kilovoltamperes and is the exclusive source of service for the connected load so supplied.

(C) **Definition of Peak-Hours.** On-peak hours are defined as those hours between 7 a. m. and 9 p. m., Eastern Standard Time or Daylight Saving Time, whichever is in common use, daily except Saturdays and holidays.

Off-Peak hours are defined as the hours other than those specified as on-peak hours.

On-Peak Service Rate. Rate PD including all its terms and guarantees for service supplied during on-peak hours. The blocking of the energy charge of said rate will be based in all cases on the billing demand for on-peak hours.

Night Service Capacity Charge: 60¢ per kw of excess off-peak billing demand per month.

Determination of Excess Off-Peak Billing Demand. The excess off-peak billing demand shall be the amount by which the greatest demand occurring during off-peak hours, as determined by measurement and adjusted for power factor, exceeds the billing demand for on-peak hours, whether the latter is a minimum or an actual demand. In no event shall the excess off-peak billing demand to be paid for be less than 25% of the greatest aforesaid-determined excess off-peak billing demand during any month of the preceding 11 months or greater than an amount prescribed by the Company.

Other Riders. Where the Off-Peak Rider and this rider are applied to the same contract, the Off-Peak Rider will be applied only to the provisions of the contract, and this rider will then be applied to the contract as modified. This rider will not be applied in conjunction with the Temporary Service Rider.

Term. Annual contract.

RECEIVERSHIP RIDER

Applicability. To service supplied a Receiver-Trustee for the continued operation of a property formerly under contract for its electric service requirements.

Authority for Operation. The Receiver-Trustee shall possess the authority under appointment by Court, through an order duly entered, to operate premises recited in a contract for electric service under which the Company has been supplying energy.

Acceptance. The Receiver-Trustee shall accept and adopt for the continuation of the supply of electric service the contract theretofore in effect, including all of its provisions, and agree to pay the Company for all service furnished hereunder during the receivership-trusteeship at the rate specified therein.

Billing. Bills are to be rendered directly to the agent of the Receiver-Trustee.

Contract Term. The completion of the term of the contract taken over, or as terminated by the discharge of the Receiver-Trustee, or as terminated with the Receiver-Trustee for the continuation of supply under the standard terms of this Tariff.
